This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world’s books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that’s often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book’s long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- **Make non-commercial use of the files** We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.

- **Refrain from automated querying** Do not send automated queries of any sort to Google’s system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.

- **Maintain attribution** The Google “watermark” you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.

- **Keep it legal** Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can’t offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book’s appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google’s mission is to organize the world’s information and to make it universally accessible and useful. Google Book Search helps readers discover the world’s books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at [http://books.google.com/](http://books.google.com/)

In the Clerk's Office of the District Court of the Southern District of New York.
E.

Eagle occurs in Scripture as the translation of the Heb. נָחַל (nachal, so called from tearing its prey with its beak); occurs Exod. xix. 4; Lev. xi. 13; Deut. xiv. 12; xxviii. 49; xxxii. 11; 2 Sam. i. 29; Job ix. 26; xxxix. 37; Ps. ciii. 5; Prov. xxxii. 5; xxx. 17; 19. Isa. x. 3; Jer. iv. 13; lxxviiii. 40; xlix. 16; Lam. iv. 19; Ezek. i. 20; x. 14; xvii. 5, 7; Hos. viii. 1; Obad. 4 (Mic. iv. 16; Hab. i. 8), with which all the designations of the kindred dialects agree. Chald. דָּפַן (nashar), Dan. iv. 33; vii. 4, Sept. and N. T. αἰρός (Matt. xxiv. 28; Luke xvii. 37; Rev. iv. 7; xii. 14).

As there are many species of eagles, the nasher, when distinguished from others, seems to have denoted the chief species, the golden eagle, χρυσόμελας, as in Lev. xi. 13; Deut. xiv. 12; and the word, however, seems to have had a broader acceptation, and, like the Greek αἰρός and Arabic نَجْرَة, sometimes comprehends also a species of vulture, especially in those passages where the nasher is said to be bold (Mic. i. 16), and to feed on carcases (Job xxix. 27; Prov. xxx. 17; Matt. xxiv. 29), which, however, the true eagle will occasionally do. See GIER-EAGLE; HAWK; OSPREY; OSSIFRAGE; VULTURE.

1. The characteristics of the eagle referred to in the Scriptures are, its swiftness of flight (Deut. xxviii. 49; 2 Sam. i. 29; Jer. iv. 13; xlix. 16; Lam. iv. 19, etc.); its mounting high into the air (Job xxix. 27; Prov. xxxii. 5; xxx. 19; Isa. xi. 31; Jer. xlix. 10); its strength and vigor (in Ps. ciii. 5); its precocious habits (Job ix. 26; Prov. xxx. 17; compare Αἰλιαν, Αἰμι, x. 14); its setting its nest in high places (in Jer. lxx. 10; comp. Aristotle, Αἰμι, ix. 22; Pliny, x. 4.); the care in training its young to fly (in Exod. xix. 4; Deut. xxviii. 11); its powers of vision (in Job xxix. 29; comp. Homer, Η, xvii, 674; Αἰλιαν, Αἰμι, i. 42; Isidore, Οἰγίγγα, xii, 1; Pliny, xii, 88); and its moulting (Ps. ciii. 5). As king of birds, the eagle naturally became an emblem of powerful empires (Ezek. xxiii. 3, 7), especially in the symbolical figures of Babylon (Dan. vii. 4), and the chernubin (Ezek. i. 10; x. 14, Rev. iv. 7), like the griffin of classical antiquity. See CREATURE, LIVING. Eagles are referred to in Prov. xxx. 17 as first picking out the eyes of their prey.

The following is a close translation of a graphic description of raptorial birds of this class which occurs in the book of Job (xxix. 26, 30):

By thy understanding wilt thou the hawk tower,
Spread his wings southwest?

Perchance on thy bidding the eagle will soar,
Or it is thou that he will make lofty his nest?

A rock will he inhabit, and there he roost;
Upon the peak of a rock, even the citadel:
Wherehe has spied fowl,
From afar his eye will look;
Then his blood will sip blood;
Aye, wherever [are the] shin, there [is] he!

To the last line in this quotation our Saviour seems to allude in Matt. xxiv, 29. Wherefore the carcass

III. — I.
is, there will the eagles be gathered together;" that is, whatever the Jewish people, who were morally and judicially dead, might be, there would the Roman armies, whose standard was an eagle, and whose strength and firmness resembled that of the king of birds, in constant pursuit and devotion. The adroi of Matt. xxiv, 29; Luke xvii, 37, may include the Vultur falkus and Neophron percnopterus; though, as some eagles prey upon dead bodies, there is no necessity to restrict the Greek word to the Vulturizide (see Lucian, Xenop. p. 1; comp. Seneca, Ep. 90; Martial, vi. 63). The image of an eagle is ancient, and has long been, a favorite military ensign. The Persians so employed it, which fact illustrates the passage in Isa. xlvi, 11, where Cyrus is alluded to under the symbol of an "eagle" (G225) or "ravenous bird" (compare Xenoph. Cyrop. vii, 4). The same bird was similarly employed by the Assyrians and the Romans. Eagles are frequently represented in Assyrian sculptures attending the soldiers in their battles, and some have hence supposed that they were trained birds. Considering, however, the wild and intractable nature of eagles, it is very improbable that this was the case. The representation of these birds was doubtless intended to portray the common feature in Eastern battle-field scenery, of birds of prey in the air, that satisfy their hunger upon the bodies of the slain. These passages have been some commentators referred to the vulture, on the assumed ground that the eagle never feeds on carrion, but confines itself to that prey which it has killed by its own prowess. This, however, is a mistake (see Forskal, Descri. Anim. p. 12; compare Michaelis, Orient. Bibl. ix, 37 sq., and new Orient. Bibl. iii, 48 sq.); no such chivalrous feeling exists in either eagle or lion; both will feed ignominiously on a body found dead. Any visitor of the British zoological gardens may see that the habit imputed is at least not invariable. (See also Thomson, Land and Book, i, 401. Aquila bifasciata, of India, was shot by Col. Sykes at the carcasse of a tiger; and A. rapaz, of South Africa, is "frequently one of the first birds that approaches a dead animal."

Of all known birds, the eagle flies not only the highest, but also farther than any other bird, the great eagle, (H. ii. xxi. 308). To this circumstance there are several striking allusions in the sacred volume. Among the evils threatened to the Israelites in case of their disobedience, the prophet names one in the following terms: "The Lord shall bring a nation against thee from far, from the end of the earth, as the eagle dieth" (Deut. xxix, 40). The march of Nebuchadnezzar against Jerusalem is predicted in the same terms: "Behold, he shall come up as clouds, and his chariots as a whirlwind: his horses are swifter than eagles" (Jer. iv. 19); as is his invasion of Moab also: "For thus saith the Lord, Behold, he shall fly as an eagle, and shall spread his wings over Moab" (chap. xlviii, 40); i.e. he shall settle down on the devoted country as an eagle over its prey. (See also Lam. iv. 19; Hos. viii. 2; Hab. i. 8.)

The eagle, it is said, lives to a great age, and, like other birds of prey, sheds his feathers in the beginning of spring. After this season he appears with fresh strength and vigor, and his old age assumes the appearance of youth. To this David alludes when gratefully reviewing the mercies of Jehovah, Who satisfactorily sustains the "youth" with the "strength renewed like the eagle's" (Psa. ciii. 5): as does the prophet, also, when describing the renovating and quickening influences of the Spirit of God: "They that wait upon the Lord shall renew their strength; they shall mount up with wings as eagles; they shall run and not be weary, and they shallwalk and not faint" (Isa. xl, 31). Some Jewish interpreters have illustrated the former passage by a reference to the old fables about the eagle being able to renew his strength when very old (see Bochart, Hieroz. ii, 747). But modern commentators for the most part are inclined to think that these words refer to the eagle after the moultting season, when the bird is more full of activity than before. Others prefer Bengel's explanation, of pursuing a truth which is difficult, so that in point of strength thou art like the eagle."

The passage in Mic. i. 16, "Enlarge thy baldness as the eagle," has been understood by Bochart (Hieroz. ii, 744) and others to refer to the eagle at the time of its moultting in the spring. Oedman (Verwischte Samml. i. 164) erroneously refers it to the prophet to point to the Vultur barbatus (Gypterus), the bearded vulture or lammergeyer, which he supposed was bald. It appears to us to be extremely improbable that there is any reference in the passage under consideration to eagles moultting. Allusion is here made to the custom of shaving the head as a token of mourning; but there would be little or no appropriateness in the comparison of a shaved head with an eagle at the time of moultting. But if the  

mer  

s  

u  

notion here conveyed is very applicable to the whole head and neck of this bird, which is destitute of true feathers. The direction of the prophet is to a token of mourning, which was usually assumed by making bald the head; here, however, it would be enlarged, extended, as the baldness of the eagle.

Exactly answering to this idea is Mr. Bruce's description of the head of the "golden eagle": "the crown of his head was bare; so was the front where the bill and skull joined. The meaning of the prophet, therefore, seems to be that the people were not to content themselves with shaving the crown of the head merely, as on ordinary occasions, but, under this special visitation of retributive justice, were to extend the baldness over the entire head.

With reference to the texts referred to above, which compare the watchful and sustaining care of his people by the Almighty with that exhibited by the eagle in training its young ones to fly, especially the spirited one in Deut. xxxii. 11-12:

As an eagle will roose his nest. Over his fledglings will he hover. A flock will he guide, his proper offspring. He will give them his pliosions: (No) Jehovah, he alone would guide him (i. e. Israel).

And there was not with him a strange god—"

we may quote a passage from Sir Humphrey Davy, who says, "I once saw a very interesting sight above one of the crags of Ben Nevis, as I was going in the pursuit of black game. Two parent eagles were teaching their offspring, two young birds, the manoeuvres of flight. They began by rising from the top of the mountain, in the eye of the sun. It was about midday, and bright for this climate. They at first made small circles, and the young birds imitated them. They paused on their wings, waiting till they had made their first flight, and then took a second and larger gyration, always rising towards the sun, and enlarging their circle of flight so as to make a gradually ascending spiral. The young ones still and gradually followed, apparently flying better as they mounted; and they continued this sublime exercise, always rising, till they became mere points in the air, and the young ones were lost, and afterwards their parents, to our aching sight." The expression in Exod. and Deut., "beareth them on her wings," has been understood by Rabbinical writers and others to mean that the eagle does actually "bear" her offspring on her wings and shoulders. This is putting on the words a construction which they by no means are intended to convey; at the same time, it is not improbable that
the parent bird assists the first efforts of her young by
dying under them, thus sustaining them for a moment,
and encouraging them in their early lessons. (Comp.
Axian, Anim. ii, 40; Oppian, Cymeg. iii, 115; Jerome in
Jesus. xlvi; Naumann, Naturgesch. d. Vögele, i, 215; on
the contrary, Aristotle, Anim. ix, 22.)

Finally, the eagle was an Assyrian emblem, and
hence properly is the refer-
ence in Hab. i, 8. The
eagle-headed deity of the
Assyrian sculptures is that
of the god Niaroch (q.v.);
and in the representations of
battles certain birds of
this order are frequently
shown accompanying the
Assyrian warriors in their
attacks, and in one case
bearing off the entrails of
the slain. From the As-
syrians the use of the eagle as a standard (q.v.) de-
sended to the Persians, and from them probably to
the Romans. In all ages, and in most countries, as the
 proverbial “king of birds,” it has been the symbol of
majesty and power. The tribes, like the lion among
beasts.

2. The eagle, in zoology, forms a
genera of birds of prey, mostly distinguished for their
size, courage, powers of flight, and arms for attack.
The bill is strong, and bent into a plane pointed hook,
without the notch in the inner curve which character-
izes falcons; the nostrils are concealed by a naked
 cere or skin of a yellow or a blue color; the eyes are
lateral, sunken, or placed beneath an overhanging
brow; the head and neck covered with abundance of
longish, narrow-pointed feathers; the chest broad,
and the legs and thighs exceedingly stout and sinewy.

Eagles, properly so called, constitute the genus Aquila,
and have the tail feathered down to the toes; they
are clothed in general with brownish and rust-colored
feathers, and the tail is black, grey, or deep brown.

Sea-eagles (genus Haliaetus) have the tail or legs half
barred and covered with horny scales; not unusually
the head, back, and tail more or less white. The
larger species of both measure, from head to tip of
tail, 3 feet 6 inches or more, and spread their wings
above 7 feet 6 inches; but these are proportionately
broad to their length, for it is the third quill feather
which is longest. If the crow be allowed to a strain within bounds their rapidity of flight, while by
their breadth the power of continuing on the wing is
little or not at all impeded. The claws of the fore
and hind toe are particularly strong and sharp; in
the sea-eagles they form more than half a circle, and
in length measure from $\frac{1}{2}$ to $\frac{1}{2}$ of an inch. These ma-
jestic birds have their abode in Europe, on the shores
of the Mediterranean, in Syria and Arabia, wherever
there are vast woody mountains and lofty cliffs; they
occupy each a single district, always by pairs, except-
ing on the coasts, where the sea-eagle and the osprey
(Pandion haliaetus) may be found not remote from the
region possessed by the rough-legged eagles—the first
because it seeks to subsist on the industry of the sec-
ond, and does not interfere with the prey of the third.
It is in this last genus, most generally represented by
the golden eagle (Aquila chrysaetos) that the most pow-
erful and largest birds are found. That species in its
more juvenile plumage, known as the ring-tailed eagle,
the imperial eagle, or morganick (A. heliacus), and the
booted eagle (A. primnta), is found in Syria; and at
least one species of the sea-eagles (the Hal. ossefranga,
albitrix, or albopectus) frequents the coast, and is
even of stronger wing than the others. These build
usually in the cliffs of Phoenicia, while the others are
more commonly domiciliated within the mountains.
According to their strength and habits, the former
subsist on antelopes, hares, hyraxes, bastard, stork, tor-
toises, and serpents; and the latter usually live on

fish; both pursue the catta (percecles), partridge, and
lizard. The osprey alone being migratory, retires to
Southern Arabia in winter. Not excepting the last
mentioned, are so exclusively averse to carrion as is
commonly asserted: from choice or necessity they all,
but in particular the sea-eagles, occasionally feed upon
carcasses of horses, etc.; and it is well known in the
East that they follow armies for that purpose. Hence
the allusions in Job and Matt. xxiv, 29, though vul-
tures may be included, are perfectly correct. So again
are those which refer to the eagle’s syrie, fixed in the
most elevated cliffs. The swiftness of this bird, stop-
ing among a flock of wild geese with the rushing sound
of a whirlwind, is very remarkable; and all know its
towering flight, suspended on its broad wings among
the clouds with little motion or effort. Thus the pre-
dictions, in which terrible nations coming from afar
are assimilated to eagles, have a poetical and absolute
truth, since there are species, like the golden, which
really inhabit the whole circumference of the earth,
and the natives alluded to bore eagles’ wings for stand-
ards, and for ornaments on their shields, helmets, and
shoulders. In the northern half of Asia, and among
all the Turkish races, this practice is not entirely aban-
donned at this day; and eagle ensigns were constantly
the companions of the chieftains of several of these
Persia, Egypt, the successors of Alexandria, the Etrus-
cans, the Romans, the Celts, and the Arabs’ had eagle
signs of carved work, of metal, or the skins of birds
stuffed, and set up as if they were living. These,
named $\sqrt[3]{\text{say},}$ a “ravenous bird,” Isa. xi, 6, 1,
whence $\sqrt[6]{\text{say},}$ aquila, erige, simurrg, hamura or hama-
ora, karakish (the birds of victory of different na-
tions and periods of antiquity), were always symbo-
cal of rapid, irresistible conquest. A black eagle was
the ensign of Khald, general of Mohammed, at the bat-
tle of Aisladin, and the carved eagle still seen on the
wall of the citadel of Cairo, set up by Karakish, the
vizier of Salal-ad-din, to commemorate his own name
and administration, indicates a species not here enu-
erated. At least four distinct kinds of eagles have
been observed in Palestine, viz. the golden eagle
(Aquila Chrysaetos), the spotted eagle (A. metace),
the common species in the rocky districts (see Ibis, i, 29),
the imperial eagle (Aquila heliacus), and the very com-
mon Circetus gallicus, which preys on the numerous
reptilia of Palestine (see the vernacular Arabic names
of different species of Vulturidae and Falconidae
Loche’s Catalogue des Oiseaux ouvres, en Algerie; and

in Ibis, vols. i, ii, Tristram’s papers on theornithology
of North Africa). The Hel, nesher may stand for any
of these different species, though perhaps more partici-
EAGLE

ular reference to the golden and imperial eagles and the griffon vulture may be intended. The Ag. helicor, here figured, is the species most common in Syria, and is distinguished from the others by a spot of white feathers on each shoulder. (See the Penny Cyclopedia, s. v. Falconide; Hebenstreit, Aquile naturae et S.S. historia, et historia naturalis et e Monument. vet. illustrat., Lips. 1747.) See BIRD.

EAGLE, in the Church of England, the desk or lector from which the lessons are read is often in the form of an eagle with outspread wings. The usage is probably derived from the fact that, in ecclesiastical symbolism, the eagle is the accompanying symbol of the apostle John (see Jamieson, Sacred and Legendary Art, i, 135).

E'nnis (Ma'yrh, Vulg. Eneas, Syr. Mons), a name given (1 Esdr. ix, 21) as that of a third son of Emmer (Immer); apparently in place of Harim, and his first two sons Massach and Eliah of the Heb. list (Ezra x, 21). Fritzsche suggests (Exeg. Handb. in loc.) that eai Ma'yrh is a mispronunciation of the 𐤃𐤉𐤃𐤊𐤆, "and of the sons of," of the Heb. text, the three names following having been omitted by the Greek translator.

Ee' (properly יָשָׁנָה, o n'm, o'n), the organ of hearing. In Scripture the term is frequently employed figuratively. To signify the regard of Jehovah to the prayers of his people, the Psalmist says, "His ears are open to their cry." (Psalm xxxiv, 15). To "uncover the ear" is a Hebraism, and signifies to show or reveal something to a person (1 Sam. xx, 2). The Psalmist, speaking in the person of the Messiah, says, "Sacrifice and offering thou didst not desire; mine ears hast thou opened." (Ps. xl, 6). Ainsworth reads, "Mine ears hast thou digged open." The Sept., which Paul follows (Heb. x, 5), reads the passage thus: "A body hast thou prepared me." "Make the ears of this people heavy," occurs in Isaiah vi, 10, that is, render their ears insensible and deaf; with a similar meaning, the prophet Jeremiah speaks of "ears uncircumcised" (vi, 10). Among the Jews, the slave who renounced the privilege of being made free from servitude in the sabbatical year submitted to have his ear bored through with an awl, which was done in the presence of some judge or magistrate, that it might appear a voluntary act. The ceremony took place at his master's door, and was the mark of perpetual servitude (Exod. xxi, 6). See EAR-RING.

EARS, TOUCHING THE, an ancient ceremony in the baptism of catechumens, which consisted in touching their ears and saying Ephphatha, "him opened." This was joined with the imposition of hands and with exorcism, and is said to have signified the opening of the understanding to receive instruction on the faith. Ambrose derives the custom from our Saviour's example in saying Ephphatha, when he cured the deaf and dumb. The practice never became general.—Bingham, Orig. Eccles. i. c., ch. ii, § 13.

EARS OF CORN יֶבֶן הַנָּבָה, mel'lah, so called from being cut off. Deut. xxiii, 25; דֵּבֶן הַנָּבָה, shibboleth, from its growth, Gen. xli, 5 sq.; Ruth ii, 2; Job xxiv, 24; Isa. xvii, 5; דֵּבֶן, karmel, prop. a cultivated field, as often; hence produce or ears therefrom, i.e. grist. Lev. ii, 14; xxiii, 14; 2 Kings iv, 42; דֵּבֶן, 'ab'ab, green ears, Exod. ix, 31; Lev. ii, 14; אֶבֶן, Matt. xii, 1; Mark ii, 28; iv, 28; Luke vi, 1). The remarkable productiveness of the cereals in Egypt has been proverbial from the days of Joseph (Gen. xli, 47) to the present time. Josutt states in his Christian Observer, that when in Egypt he plucked up at random a few stalks out of the thick grain-fields. "We counted the number of stalks which sprouted from single grains of seed, carefully pulling to pieces each root in order to see that it was one plant. The first had seven stalks, the next three, then eighteen, fourteen.

Each stalk would bear an ear." Even greater numbers than these are mentioned by Dr. Shaw, and still more by Pliny. It also often happens that one of the stalks will bear two ears, while each of these ears will shoot out into a number of lesser ears, affording a most plentiful increase. See CORN.

EARLY, EAR, EAR-ing, an old English agricultural term for ploughing, occurs in Gen. xiv, 6; Exod. xxxii, 21; 1 Sam. viii, 12, as a translation of the term פֶּשֶׁת (chesh, ploughing, as it is elsewhere rendered). (See Crit. Biblica, iii, 210.) The same now obsolete word is used by our translators in Deut. xxxii, 3; Isa. xxx, 24, to represent the Heb. word יִבֶן הַנָּבָה (shab), 'to till, as it is often elsewhere rendered). See AGRICULTURE; EGYPT. So Shakespeare says "to ear the land that has some hopes to grow" (Richard ii, iii, 2). It is etymologically connected with the Latin ara, to plough. It is directly derived from the Anglo-Saxon eorn, "to plough," and is radically the same with harrow. What we call arable land was originally written earlande. The root ar is one of wide use in all the Indo-European languages (see Muller, Science of Language, p. 289). See PLUGH.

Eardley, Sir CULING, one of the founders of the Evangelical Alliance, was born in Hatfield in 1805. He was a son of Sir Culling Smith, baronet, succeeded to the baronetcy in 1829, and in 1847 assumed by royal license his maternal name of Eardley, his mother having been a daughter of the last lord Eardley. He was educated at Oxford, but did not graduate, having scruples as to subscribing the oaths administered in taking the degree of A.B. He represented Pontefract in one short Parliament previous to the Reform Bill, and in 1846 was an unsuccessful candidate for Edin- borough in opposition to lord Macaulay, sir Culling bas- ing his claim chiefly on his opposition to the Maynooth
Early, William, a Methodist Episcopal minister, was born in New Jersey, Oct. 17, 1770; was converted at about nineteen; entered the itinerancy in 1791; was superannuated in 1821, and died in June of the same year, having preached for thirty years. His first two years in the ministry were spent as missionary to New Brunswick, where he endured much hardship in zealously laboring for his Master's cause. His after ministry in Pennsylvania, Delaware, and Maryland was very useful to the Church. — Min. of Conferences, i, 380.

Early English, a title often given to the first pointed or Gothic style of architecture in England. It is also called the Lancet Style, and also (in the nomenclature of the Ecclesiastical Society) the First Pointed Style. "It succeeded the Norman towards the end of the 12th century, and gradually merged into the Decorated at the end of the 13th. It first partook of the heaviness of the Norman, but soon manifested its own beauty and peculiarity of character. The arches are usually equilateral and lancet-shaped; the doorways are often divided into two by a single shaft or smaller pier; the windows are long and narrow, and, when gathered into a group, are frequently surmounted by a large arch, which springs from the extreme moulding of the window on each side. The space between this arch and the tops of the windows is often filled with circles, or with trefoils or quatrefoils, which constituted the earliest form of tracery. Each window, however, is generally desolate of any tracery in itself" (Chambers, a. v.). The mouldings, says Parker, in general consist of alternate rounds and deeply-cut hollows, with a small amphitrite of fillets, producing a strong effect of light and shadow. "Circular windows were more used in England during the prevalence of this style than in either the decorated or perpendicular, and fine specimens remain at York and Lincoln cathedrals, and at Beverley Minster. Groined ceilings are very common in this style; in general they have only cross springers and diagonal ribs, with sometimes longitudinal and diagonal ribs at the apex of the vault, and good bosses of foliage at the intersections. The pilasters usually consist of small shafts arranged round a larger circular pier, but others of different kinds are to be found, and a plain octagonal or circular pillar is common in country churches. The capitals consist of plain mouldings, or are enriched with foliage and sculpture, characteristic of the style. The most prevalent base has a very close resemblance to the Attic base of the ancients, though the proportions are different, and the lower torus is worked with a considerably larger projection. The buttresses are often very bold and prominent, and are frequently carried up to the top of the building with but little diminution, and terminate in acutely-pointed pediments, which, when raised above the parapet, produce in some degree the effect of pinacles. Flying buttresses were first introduced in this style. Pinacles are but sparingly used, and only towards the end of the style. The roofs appear always to have been high-pitched. The ornaments used in this style are by no means so various as in either of the others; occasionally small roses or other flowers, and bunches of foliage, are carved at intervals in the hollow mouldings, but by far the most common and characteristic is the toothed ornament, which is often introduced in great profusion, and the hollows entirely filled with it. The foliage is very remarkable for boldness of effect, and it is often so much undercut as to be connected with the mouldings only by the stalks and edges of the leaves; there is frequently considerable stiffness in the mode in which it is combined, but the effect is almost always good: the prevailing leaf is a trefoil. Towards the latter part of the style crockets were first introduced. The style may be said to begin in the later half of Richard the First's reign, about which time St. Hugh began his cathedral. During the reign of King John the Early English style had obtained the complete mastery; but the reign of Henry III was the great period of the Early English style, which bad now obtained perfection. That king himself and his brother Richard were great builders. The most perfect example of the style is that at Salisbury Cathedral. Towards the end of the reign we have examples, such as the presbytery of Lincoln and the chapter-house of Salisbury, of what may be almost called the Decorated style, though the mouldings and many of the details are pure Early English. This kind of work must best be called Transitional. See Architecture.

Earnest. άνάθεμα is evidently the Hebrew ַָּה (crabon), a pledge, in Greek characters. It is a mercantile term which the Greeks and Romans appear to have adopted from the Phoenicians (kindred in dialect with the Hebrews) as the founders of commerce. With a slight alteration in the letters, but with none whatever in the sense, it becomes the Latin arrabona, in the old English expression Earl's or Art's money) and earnest. These three words occur in the Heb., Sept., and Vulg. in Gen. xxxviii, 17, 18, and in ver. 20, with the exception that the Vulg. there changes it to pygmas. The use of these words in this sense is great; it illustrates their general import, which is that of an earnest or pledge, given and received, to assure the fulfillment of an engagement. Hezchel explains άνάθεμα by πρόσωπον, something given beforehand. The Hebrew word was used generally for pledge (Gen. xxvii, 17), and in its cognate forms for surely (Prov. xvi, 18) and...
AUSTAGE (2 Kings xiv, 14). The Greek derivative, however, acquired a more technical sense, as signifying the deposit paid by the purchaser on entering into an agreement for the purchase of anything (Suid. Lex. s. v.). This idea attaches to all the particular applications of the word, as anything given by way of warranty or security for the performance of a promise; part of a debt paid as an assurance of paying the remainder; part of the price of anything paid before-hand to confirm the bargain between buyer and seller; part of a servant's wages paid at the time of hiring, for the purpose of ratifying the engagement on both sides. The idea that the ear-ring whom to be returned upon the fulfilment of the engagement, or to be considered as part of the stipulation, is also included. A similar legal and technical sense attaches to earment, the payment of which places both the vendor and purchaser in a position to enforce the carrying out of the contract (Blackstone, ii, 30). The payment of earnest-money under the name of arrabon is still one of the common occurrences of Arab life. Similar customs of paying down at the time of a contract "something to bind the bargain" have prevailed among all nations. (See Smith's Dictionary of Class. Arab. s. v. Arrabon.) See EAR BARGAIN.

The word is used three times in the New Testament, but always in a figurative sense: in the first (2 Cor. i, 22) it is applied to the gifts of the Holy Spirit which God bestowed upon the apostles, and by which he may have intended to hire them for his service of his Son; and which were the earnest, assurance, and commencement of those far superior blessings which he would bestow on them in the life to come as the wages of their faithful services: in the second (2 Cor. v, 5; Ephes. i, 13, 14) it is applied to the gifts bestowed on Christians generally upon whom, after baptism, the apostles laid their hands, and which were to them an earnest of obtaining a heavenly habitation and inheritance, upon the supposition of their fidelity. This use of the term finely illustrates the augmented powers and additional capacities promised in a future state. Jerome, in his comment on the second passage, explains, "Si arrabo tantus, quanta erit possessio? If the earnest was so great, how great must be the possession!" (See Kypre, Macknight, and Middleton on these passages; Le Moyne, Not. ad Var. Soc. p. 466 468.) In a spiritual sense, it denotes those gifts and graces which the Christian receives as the earnest and assurance of perfect happiness in a future world. (See Clauswitz, De Arrabalone, Halle, 1747; Winzer, Comment, in loc. Lips. 1836; Schultess, in Keil and Tischmacher's Analet, ii, i, 215 sq.) There is a marked distinction between a promise of this kind as to respect, that the latter is a part-payment, and therefore implies the identity in kind of the deposit with the future full payment; whereas a pledge may be something of a totally different nature, as in Gen. xxxviii, to be resumed by the depositor when he has completed his contract. Thus the expression "earnest of the Spirit" implies, beyond the idea of security, the identity in kind, though not in degree, and the continuity of the Christian's privileges in this world and in the next. Moreover, a pledge is taken back when the promise which it guaranteed is fulfilled; but whatever is given as earnest, being a part in advance of the whole, is of course retained. See PLINUS.

EAR-RING stands in the Auth. Vers. as the rendering of three Heb. words of considerably different import. See RING.

1. בָּשָׂם (agil, from its roundness), properly a ring, specially an ear-ring (Num. xxxi, 50; Ezek. xvi, 12), nearly all the ancient ear-rings exhibited in the sculptures of Egypt and Persopolis being of a circular shape. These also were sometimes spoken of in (though not an exception to the almost universal practice of Asiatics, both in ancient and modern times. That they were not, however, usually worn by men is implied in Judg. xxxix, 24; Job xlii, 11; Prov. xxiv, 12; Hos. ii, 13. The material of which the ear-ring was made was generally gold (Exod. xxxiii, 2), and its form circular, as we may infer from the name כָּשָׂם, by which it is described (Num. xxxvi, 50; Ezek. xvi, 12): such was the shape usual in Egypt (Wilkinson's Egyptians, iii, 370). They were worn by women and by youth of both sexes (Exod. i. c.). It has been inferred from the passage quoted, and from Judg. viii, 24, that they were not worn by men; these passages are, however, by no means conclusive. In the former an order is given to the men in such terms that they could not be mentioned, though they might have been implicitly included; in the latter the amount of the gold is the peculiarity advertised to, and not the character of the ornament, a peculiarity which is still noticeable among the inhabitants of southern Arabia (Wellsted's Travels, i, 321). The mention of the sons in Exod. xxxiii, 2 (which, however, is omitted in the Sept.), is in favor of their having been worn, and it appears unlikely that the Hebrews gave an exception to the almost universal practice of Asiatics, both in ancient and modern times. That they were not, however, usually worn by men is implied in Judg. xxxix, 24; Job xlii, 11; Prov. xxiv, 12; Hos. ii, 13. The material of which the ear-ring was made was generally gold (Exod. xxxiii, 2), and its form circular, as we may infer from the name כָּשָׂם, by which it is described (Num. xxxvi, 50; Ezek. xvi, 12): such was the shape usual in Egypt (Wilkinson's Egyptians, iii, 370). They were worn by women and by youth of both sexes (Exod. i. c.). It has been inferred from the passage quoted, and from Judg. viii, 24, that they were not worn by men; these passages are, however, by no means conclusive. In the former an order is given to the men in such terms that they could not be mentioned, though they might have been implicitly included; in the latter the amount of the gold is the peculiarity advertised to, and not the character of the ornament, a peculiarity which is still noticeable among the inhabitants of southern Arabia (Wellsted's Travels, i, 321). The mention of the sons in Exod. xxxiii, 2 (which, however, is omitted in the Sept.), is in favor of their having been worn, and it appears unlikely that the Hebrews gave an exception to the almost universal practice of Asiatics, both in ancient and modern times. That they were not, however, usually worn by men is implied in Judg.
xiv, 24, where gold ear-rings are mentioned as distinctive of the Ishmaelitish tribes. The men of Egypt also abstained from the use of ear-rings; but how extensively they were worn by men in other nations is shown by the preceding group of heads of different foreigners, collected from the Egyptian monuments. By this also the usual forms of the most ancient ornaments of this description are sufficiently displayed. Those worn by the Egyptian ladies were large, round, single hoops of gold, from one inch and a half to two inches and one third in diameter, and frequently of still greater size, or made of six single rings soldered together. Such probably was the round *opus* of the Hebrews. Among persons of high or royal rank the ornament was sometimes in the shape of an asp, whose body was of gold set with precious stones. Silver ear-rings have also been found at Thebes, either plain hoops like the ear-rings of gold, or simple studs. The ancient Assyrians, both men and women, wore ear-rings of exquisite shape and finish, especially the kings, and those on the later monuments are generally in the form of a cross (Layard, *Nineveh*, ii, 234, 235).

Lan the ear-rings appear to have so far been regarded with superstitious reverence as an amulet; thus it is named in the Chaldean and Samaritan versions *ןֶּבֶל*, a holy thing; and in Is. iii, 20 the word יָשַׁב, prop. amulets, is rendered in the A.V., after the Sept. and Vulg., ear-rings. On this account they were surrendered along with the idols by Jacob's household (Gen. xxxv, 4). Chardin describes ear-rings, with talismanic figures and characters on them, as still existing in the East (Brown's *Antiquities*, ii, 303).

The earth properly the name of the planet on which we dwell. See Geography.

I. There are two Hebrew words thus rendered in the A.V., both of which are rendered by γῆ in the Sept., and this γῆ is rendered by "earth," "land," "ground," in the New Testament. See also Daniel.

1. *אָדָם*, *adamah*, is the earth in the sense of soil or ground, particularly as being susceptible of cultivation; hence the expression הָרָעָה, lit. "man of the ground," for an agriculturist (Gen. ix, 20). The earth supplied the elementary substance of which man's body was formed, and the terms *adam* and *adamah* are brought into juxtaposition, implying an etymological connection (Gen. ii, 7). See Adam.

2. The opinion of the ancient peoples was that the earth was formed of earth. The earth was among the Greeks (Hesiod, *Op. et Di*. 61, 70; Plato, *Rep.* p. 260), the Romans (Virgil, *Georg.* ii, 341; Ovid, *Met.* i, 82), the Egyptians (Diod. Sic. i, 10), and other ancient nations. It is evidently based on the observation of the material into which the body is resolved after death (Job x, 9; Ex. xii, 7). The law prescribed earth as the material out of which altars were to be raised (Exod. xx, 24); Bähr (*Symb.* 1, 488) sees in this a reference to the name *adam*; others, with more reason, compare it with the *ara de cepite* of the Romans (Ovid, *Trist.* v, 5, 9; Horace, *Od.* iii, 8, 4, 5), and view it as a precept of simplicity. Naaman's request for two mules' burden of earth
EARTH

(Earthquake) (2 Kings v. 17) was based on the idea that Jehovah, like the heathen deities, was a local god, and could be worshiped acceptably only on his own soil. See Ground.

2. More generally γῆ, e'reta, which is explained by Von Bohlen (Introdc. to Gen. ii, 6) as meaning etymologically the low in opposition to the high, i.e. the heaven. It is applied in a more or less extended sense: 1, to the whole world (Gen. i, 1); 2, to land as opposed to sea (Gen. i, 10); 3, to a country (Gen. xxi, 32); 4, to a mass of ground (Gen. xxiii, 15); and, 5, to the ground on which a man stands (Gen. xxvi, 3); also, in a more general view, 6, to "the inhabitants of the earth" (Gen. vii, 11; xi, 1); 7, to heathen countries, as distinguished from the land of Israel, especially during the theocracy; i.e. all the rest of the world excepting earth and 2 Kin. viii, 23; 2 Chron. xiii, 9, etc.; particularly the empire of Chaldea and Assyria (Ezra i, 2); 8, in the New Testament especially, "the earth" appears in our translation as applied to the land of Judaea. As in many of these passages it might seem as if the habitable globe were intended, the use of so many terms as "the earth" should have been avoided, and the original rendered by "the land," as in Lev. xxv, 23; Isa. x, 28, and elsewhere. This is the sense which the original bears in Matt. xxiii, 35; xxvi, 35; Mark xv, 38; Luke iv, 23; xxi, 23; Acts i, 17; James v, 17. For a spiritual sense, the word is employed (in the N. T.) in contrast with heaven, to denote things earthly and carnal (John iii, 31; Colos. iii, i, 2). See Wemys, Symbol. Dict. s. v.; comp. World.

To demand earth and water was a custom of the ancient Persians, by which they required a people to acknowledge their dominion; Nebuchadnezzar, in the Greek of Judith (ii, 7), commands Holofernes to march against the people of the West, who had refused submission, and to declare to them that they were to prepare earth and water. Darius ordered his envoys to demand earth and water from the king of the Scythians, and Megabyzus required the same of Amyntas, king of Macedonia, in the name of Darius. Polybius and Plutarch notice this custom among the Persians. Some believe that these symbolical demands denoted dominion of the earth and sea; others, that the earth represented the promise of a future kingdom, as the sea and water, the wine, bread, which is the second part of human nourishment. Ecles. xv, 16, in much the same sense, says, "The Lord hath set fire and water before thee; stretch forth thy hand unto whom thou wilt; and ch. xxxix, 26, "Fire and water are the most necessary things to life and death." The same consideration is as the first principles of the generation, birth, and preservation of man. Prescribed persons were debarred from their use; as, on the contrary, wives in their nuptial ceremonies were obliged to touch them. See ELEMENT.

11. The idea which the ancient Hebrews had of the figure of the earth can only be conjectured from incidental hints occasionally given in Scripture (Isa. xi, 22; Prov. vii, 27; Job xxvi, io; Ps. xxiv, 2; xxxxi, 6). From these passages, taken together, says Rosenmüller (Afterthama'k) 1, i, 133 sq.), we obtain the notion of the earth's disk as circular, rising out of the water, and surrounded with the ocean, the heaven being spread over it as a canopy. Though floating free in the boundless immensity of space, yet, through the Creator's mighty, it remains firmly fixed, without moving (1 Chron. xxvi, 30; Ps. xxiii, i; civ, 5; cxix, 90). It is also fixed there, however, to infer the popular notions of the earth's figure from what may have been nothing more than the bold imagery of poets. Some have supposed that so long as the Hebrews were a nomadic race, they conceived of the earth as resembling a round tent, with the expanse as its covering; but that in later times, when domiciled in Palestine, they spoke of it as a splendid palace resting upon its many pillars (2 Sam. xxii, 8; Ps. lxv, 3; civ, 5; Prov. viii, 25, 29, and the LXX. and Warnke, Hitzig, Theol. Thes. 116 sq.; Ovid, Metam. i, 5 sq.; comp. Fasel, Prop. Ec. i, 10 [Sanchoniathon, ed. Orelli, p. 9 sq.] Zenodavesta, i, 170 sq.) also vary in their representations on this point, describing the earth sometimes as an oblong square, sometimes as a cube, sometimes as a pyramid, sometimes as a chlamys, or overspread mantle.

Earthen Vessel of Earthware. See Portery.

Earthquake (σείση, ra 'askh, a shaking, earthy). The proximate cause of earthquakes, though by no means accurately defined, seems referable to the action of internal heat or fire. That the earth was once subject to the action of a vast internal power springing probably from the development of subterranean or central heat, the elevations and depressions, and the generally scattered and torn character of its exterior make sufficiently evident. A power similar in kind, but more restricted in degree, is still at work in the bowels of the earth, and occasionally breaks down all barriers and devastates certain parts of the world. There is good reason for believing that earthquakes are closely connected with volcanic agency. Both probably spring from the same cause, and may be regarded as one mighty influence operating to somewhat similar results. Volcanic agency, therefore, is an indication which its causes are the first may be taken as indications of the existence (either former, past, actual or possible) of the latter. (See Hitchcock's Geology, p. 234 sq.) The manifestation of these awful phenomena is restricted in its range. Accordingly, geologists have laid down certain volcanic regions or lands within which such manifestations take place. Over these regions various traces of volcanic agency are found, such as either gaseous vapors, or hot springs, or lenticular substances, and in some instances (occasionally) active volcanoes. Several sources of bitumen are found on the Tigris, in the Persian mountains and on the Kaspii, in Armenia, as well as along the Euphrates. At Hit, especially, on the last-mentioned river, it exists on a very large scale, and, having been much used from the earliest times, seems inexhaustible. Abundant traces of it are also to be seen in the rains, owing to the over-all incirvity of Hillah, the ancient Babylon. Syria and Palestine abound in volcanic appearances. Between the River Jordan and Damascus lies a volcanic tract. The entire country about the Dead Sea presents indubitable tokens of volcanic agency. Accordingly, these places are justly considered to come within one of the volcanic regions. The chief of these are; (1) that which extends from the Caspian...
EARTHQUAKE

Sea to the Azores; (2) from the Aeolian Isles to the Moluccas; (3) that of the Andes; (4) the African; (5) the Icelandic. "Syria and Palestine are embraced within the first band, and these present earthquakes are as frequently been subject to earthquakes. (See Stanley, Palest. p. 279, 283, 285, 363; Volney, Trav. i, 261; Rüeggert, Riesen, p. 205.) See PALESTINE.

That earthquakes were among the extraordinary phenomena of Palestine in ancient times is shown in the books of Judges and Kings and in the New Testament. The place of the earthquakes is usually given as being among the Hebrews, and a source of religious admonition and devout emotion. An earthquake, when great, overturns and changes the surface of the earth, subverting mountains, hills, and rocks, sinking some parts, elevating others; turning rivers into lakes and lakes on dry lands, and drying up those that already existed; and is therefore a proper symbol of great revolutions or changes in the government or political world (Heb. xii, 26). See WUMS, Symbolical Dict. s. v. In Psalm xviii, 7, we read, "Then the earth shook and moved not, the mountains trembled and were also of the hills moved and were shaken, because he was wroth" (comp. Hab. iii, 6; Nah. i, 5; Isa. v, 23). It was not an unnatural transition that any signal display of the will, sovereignty, or goodness of Providence should be foretold in connection with, and accompanied as by other signs, when the destruction of the sinners is immediately below, so by earthquakes and their fearful concomitants (see Joel ii, 28; Matt. xxiv, 7, 23). Earthquakes are not infrequently attended with fissures of the earth's surface; instances of this are recorded in connection with the destruction of Korah and his company (Num. xxvi, 32; comp. Josephus, Antiv, iv, 3, 5), and at the time of our Lord's death (Matt. xxvii, 51); the form γ may be paralleled by a similar occurrence at Oropo, in Ca- lauria, A.D. 1783, when the earth opened to the extent of 90 feet and a depth of more than 200 feet, and again, in the latter part of the bed of the Tiber at Lisbon, in which the quay was swallowed up (Pfaff, Schreibgesch. p. 115). These depressions are sometimes on a very large scale; the subsidence of the valley of Siddim, at the southern extremity of the Dead Sea, may be attributed to an earthquake. Similar depressions have occurred in many districts, the most remarkable being the submersion and subsequent re-elevation of the temple of Serapis at Puteoli. The frequency of earthquakes about the Dead Sea is testified in the name Bela (Gen. iv, 22; comp. Jerome ad Isa. xv). Sevilleti, that the source of an earthquake nearly fails to inspire, "conveying to the mind of the spectators a universal and unlimited danger" (Humboldt's Kosmos, i, 212), rendered it a fitting token of the presence of Jehovah (1 Kings xix, 11); hence it is frequently noticed in connection with his appearance (Judg. vi, 4, 2 Sam. xxiv, 8; Ps. lxxvi, 18; xvii, 4; civ, 32; Amos viii, 8; Hab. iii, 10). Earthquakes, together with thunder, lightning, and other fearful phenomena of nature, form no small portion of the stock of materials which the interpreters of the German rationalistic school employ with no less liberality than confidence in order to explain after their manner the events recorded in the Scriptures which have been commonly referred to the immediate agency of God. Hezel, Paulus, and other miracle-exploders would, for this resource, find their "occupation gone." But, if there is reason for the statement that truth is sometimes stranger than fiction, it is found esp. in the course of events and phenomena of nature, as in the case of earthquakes, which may sometimes be observed that their "natural" causes are most unnatural, unlikely, and insufficient. See MIRACLES.

The first visitation of the kind recorded as having happened to Palestine was in the reign of Ahab (about 870 B.C.), and affected the cities of Zimri (xix, 11, 12), which were not erected to go forth and stand upon the mountains before Jehovah: "And behold Jehovah passed by, and a great and strong wind rent the mountains, and brake in pieces the rocks before Jehovah; but Jehovah was not in the wind: and after the wind an earthquake; but Jehovah was not in the earthquake: and after the earthquake a fire: and Jehovah was not in the fire: and after the fire a still small voice." A terrible earthquake, accompanied by "fire" is recorded under the name of Judah" (B.C. 781), which Josephus (Ant. ix, 16, 4) says "shook the ground, and a rent was made in the Temple, so that the rays of the sun shone through it, which, falling upon the king's face, struck him with the leprosy; a punishment which the Jews say was to express the wrath of God consequent on Uzziah's usurpation of the priest's office. That this earthquake was of an awful character may be learned from the fact that Zechariah (xiv, 5) thus speaks respecting it: "Ye shall flee as ye fled before from the earthquake in the days of Uzziah, king of Judah. And I will shake the heavens above, and the earth beneath." This phenomenon appears from Amos (i, 7) that the event was so striking, and left such deep impressions on men's minds, as to become a sort of epoch from which to date and reckon; the prophet's words are, "two years before the earthquake." See UZZIAH. From Zach. xiv, 4 we are to infer that the event was not something which occurred at this time in the Mount of Olives, the mountain being split so as to leave a valley between its summits. Josephus records something of the sort, but his account is by no means clear, for his words (υστομενον το εσωτερικον τον παρα της τατη της εσωτερικης) can hardly mean the "half of the western mountain," which seems to think, but the "half of the western mountain," i.e. of the Mount of Evil Counsel, though it is not clear why this height particularly should be termed the western mountain. We cannot but think that the two accounts have the same foundation, and that the Mount of Olives was really affected by the earthquake. Harkins (comment. on Zechariah, "corruption," may have originated at this time, the rolling down of the side of the hill, as described by Josephus, entitled it to be described as the destroying mountain, in the sense in which the term occurs in Jer. ii, 25. See AZAL.

The only important or clear earthquake mentioned in the New Testament (except the doubtful one of Matt. xxviii, 2) is that which happened at the crucifixion of our Lord (Matt. xxvii, 51; comp. Luke xxi, 44-5; Mark xv, 33). The concomitant darkness is most naturally held to have been an attendant on the earthquake. Earthquakes are not seldom attended by accompaniments which obscure the light of day during (as in this case from the sixth to the ninth hour), and are not infrequently mentioned by historians (o'clock P.M.) several hours. If this is the fact, then the record is consistent with natural phenomena, and the darkness which sceptics have pleaded against speaks actually in favor of the credibility of the Gospel. Now it is well known to naturalists that such obstructions are by no means uncommon. It may be enough to give the following instances. A very remarkable volcanic eruption took place on the 19th of January, 1833, in the volume of Concepcion, situated in the Bay of Fonseca (usually called the coast of Concepcion), in Central America. The eruption was preceded by a rumbling noise, accompanied by a column of smoke which issued from the mountain, increasing until it assumed the form and appearance of a large dense cloud, which, when viewed at the distance of thirty miles, appeared like an immense plume of feathers, rising into the air, with considerable velocity, and moving in every direction. In the course of the two following days several shocks of earthquakes were felt; the morning of the 22d rose fine and clear, but a dense cloud of a pyramidal form was observed in the direction of the north. This gradually increased, and, at 11 o'clock A.M. it had spread over the whole firmament, entirely obscuring the light of day. The darkness equalling in intensity that of the most clouded night: this darkness continued with little intermission for three days; during the whole time a fine black pow-
der continued to fall. This darkness extended over half of Central America. The convulsion was such as to change the outline of the coast, turn the course of a river, and form two new islands. Precisely analogous phenomena were exhibited on occasions of earthquakes that took place at Cartagena in Central America, when there prevailed a dense black fog, which lasted for three days (Recreations in Physical Geography, p. 382).

In the case of the volcanic eruption which overwhelmed Herceulaneum and Pompeii (A.D. 79), we learn from the younger Pliny that a dense column of vapor was first seen rising vertically from Vavonis, and then spreading itself out laterally, so that its upper portion resembled the head, and its lower the trunk of a pine. This black cloud was pierced occasionally by flashes of fire as vivid as lightning, succeeded by darkness more profound than night, and ashes fell even at Mi-

An earthquake appears to exert a very marked influence on our atmosphere: among other effects, Lyell (Principles and Aspects, 4th ed., p. 400) speaks of gusts of wind, interrupted by dead calms; evolution of electric matter or of inflammable gas from the soil, with sulphureous and mephitic vapors; a reddening of the sun's disk, and a haziness in the air often continued for months (Joel ii, 30, 31). Other interpreters, however, understand the earthquake in Matt. xxiv, 21-22 to have been merely some special and supernatural operation of God, in attestation of the marvellous work that was in progress, producing a tumultuous motion in the immediate locality, and in connection therewith a sensible constellation in the minds of the immediate actors; hence there is no other historical allusion to it. This view is confirmed by its being in the second case connected with the angel's descent (Matt. xxviii, 8; comp. 1 Sam. xiv, 15). Like the one that occurred at Philippi (Acts xvi, 10), it is perhaps to be regarded as a somewhat exceptional phenomenon, wrought for a specific purpose, and consequently very limited as to its sphere of action. Nor does it appear from any notices of Scripture that the phenomena of earthquakes, in the ordinary and extensive sense of the term, played more than a very occasional and subordinate part in the scenes of national history. Treatises in Latin on the earthquake at our Saviour's passion have been written by Berger (Viteb. 1710), Posner (Ien. 1672), Schmerauch (Lubben. 1756), Schmid (Jen. 1688). See Darkness.

An earthquake devastated Judaea some years (31) before the birth of our Lord, at the time of the battle of Actium, which Josephus (Ant. xv, 52) reports was such "as had not happened at any other time, which brought great destruction upon the cattle in that country. About ten thousand men also perished by the fall of houses." Jerome writes of an earthquake which, in the time of his childhood (about A.D. 315), destroyed Rabula Moab (Jerome on Isaiah, xv). The writers of the Middle Ages also speak of earthquakes in Palestine, stating that they were not only formidable, but frequent. In 1834 an earthquake shook Jerusalem, and injured the chapel of the nativity at Bethlehem. In 1887 (Jan. 1) Jerusalem and its vicinity were visited by severe shocks of earthquake, yet the city remains without serious injury from these subterranean causes. This last earthquake totally overthrew the village of Safed, in Galilee (Thomson, Land and Book, i, 229), and caused a full account of the nativity at Bethlehem, affecting various parts of Syria, see Kitto, Phys. Hist. of Palest. vol. ii, ch. iv. Comp. Bulunger, in Graevi Theesar. v, 516 sq.; Förblicher, Handb. d. alt. Geogr. i, 636 sq.

East is the rendering of the following terms in the English Bible. See Geography. 1. צִ֥רְחָ֥ה, צָרְחָ֥ה, properly denotes the rising, sc. of the sun, and strictly corresponds with the Gr. ἀνα- ρρων, and the Lat. oriens. It is used tropically for the east indefinitely (Psa. cxii, 12; Dan. viii, 9; Amos-xii, 12, etc.): also: definitely for some place in relation to others, thus, "The land of the east," i.e. the country lying to the east of the land of Canaan, when there was no direct route to the east (Isa. xliii, 7); "the east of Jericho" (Josh. iv, 19); "the east gate" (Neh. iii, 29), and adverbially "eastward" (1 Chron. vii, 28; ix, 24, etc.). Sometimes the full expression צִ֥רְחָ֥ה עַל עַם, צָרְחָ֥ה, is used (indefinitely, Isa. xii, 25; definitely, Judg. xi, 18). See below.

2. צָרְחָ֥ה, ke'dem (with its modifications), properly means what is in front of, before (comp. Psa. cxxxix, 5; Isa. xi, 11 [12]). As the Hebrews, in pointing out the quarters, looked towards the east, צָרְחָ֥ה, Jore, came to signify the east, as הַגָּדֶ֥ת, behind, the west, and צָרְחָ֥ה, the right hand, the south. In this sense kedem is used in each of the seasons (Gen. xxi, 2; xiii, 11, etc.; (d) relatively, Num. xxxix, 11, etc.; (c) definitely, to denote the regions lying to the east of Palestine (Gen. xxix, 1; Num. xxxix, 7; Isa. ix, 11; sometimes in the full form צָרְחָ֥ה עַל עַם, צָרְחָ֥ה, "land of the east" (Gen. xxv, 6), the inhabitants of which are denominated צָרְחָ֥ה עַל עַם, "children of the east." See BNEK KEDEM.

Sometimes kedem and mirach are used together (e.g. Exod. xxvii, 18; Josh. xix, 12), which is after all, not so tautological as it appears to be in our translation "eastward" and "east." It may be that in the use of this etymological distinction, it is natural that kedem should be used when the four quarters of the world are described (as in Gen. xiii, 14; xxviii, 14; Job xxiii, 8, 9; Ezek. xvii, 18 sq.), and mirach when the east is only distinguished from the west (Josh. xi, 8; Psa. 1, 1; ch. xxvii, 7; Ezek. viii, 7). On the other hand, kedem is used of the east as the leading or the first day of the week (Gen. vii, 10), while on the other quarter (Dan. viii, 9; xi, 44; Amos viii, 12); exceptions to this usage occur in Psa. cvii, 8, and Isa. xiii, 5, each, however, admitting of explanation. Again, kedem is used in a strictly geographical sense to describe a spot or country immediately before another in an easterly direction; hence it occurs in such passages as Gen. ii, 8; iii, 24; xx, 1; xiii, 11; xxxv, 6; and hence the subsequent application of the term, as a proper name (Gen. xxv, 6, eastward, unto the land of Kedem), to the lands lying immediately eastward of Palestine, viz. Arabia, Mesopotamia, Babylon, etc. On the other hand, mirach is used of the far east with a less definite significance (Isa. xii, 2, 25; xiii, 5; xlvii, 11). In describing aspect or direction, the terms are used indifferently (comp. kedem in Lev. i, 16, and Josh. vii, 2, with mirach in 2 Chron. v, 12, and 1 Chron. x, 9), etc.

"The East" is the name given by the ancient Hebrews to a certain region, without any regard to its relation to the eastern part of the heavens, comprehending not only Arabia Deserta and the lands of Moab and Ammon, which really lay to the east of Palestine, but also Armenia, Assyria, Mesopotamia, Babylon, and Chaldea, which were situated rather to the north than to the east of Judaea. Its geographical boundaries include Syria, the countries beyond the Tigris and Euphrates, and the shores of the Indian Ocean and of the Arabian Gulf. The name given to this entire region by the Hebrews was צִ֥רְחָ֥ה עַל עַם, צָרְחָ֥ה, (dvar rashah), or the land of Kedem or East; but the Babylonians it was called צִ֥רְחָ֥ה, or Apshur, Arabia. Its miscellaneous population were called by the former "sons of the East," or Orientalis, and by the latter either Arameans, or the "people of the West." The Jews themselves also apply to them the Babylonian name in some of their books written after the Captivity (2 Chron. xxvii, 1; Neh. ii, 9). The Arabs anciently denominated the eastern quarters of the earth, and do so till this day, either by one of these names. To this region belong the "kings of the East." (Isa. xix, 11; Jer. xxxv, 19-25,
EAST

Heb.). The following passages may suffice as instances showing the arbitrary application of the term "east" to this region. Balaam says that Balak, king of Moab, had brought him from the mountains of the east (Num. xxiii, 7), i.e. from Pethor on the Euphrates. Isaiah places Syria in the east (Isa. xi. 11), "the Syrians from the east" (bishop Lowth). The distinction seems to be drawn between the east (Eze. xxvii. 1, Jev 1) and the land of the children of the East." It occurs again in Judg. vi. 3, "Even the children of the East came against them" (Sept. or. iv. into and Vulg. excit. Orientium nationum). The preceding facts enable us to account for the prodigious numbers of people, and sometimes kings, in war against the peoples (Judg. vi. 5; vii. 12), and the children of the East were like grasshoppers for multitude," and for the astonishing carnage recorded (Judg. viii. 10), "there fell a hundred and twenty thousand men that drew the sword." It seems that the inhabitants of this region were distinguished for their proficiency in the arts and sciences (comp. 1 Kings i. 4, 30), and were addicted in the time of Isaiah to superstition (Isa. xxvi). See ARABIA.

The east seems to have been regarded as symbolical of distance (Isa. xvi. 11), as the land stretched out in these regions without any distinct region. And Josephus, ii. 6, the house of Jacob is said to be "replenished from the east" (Ἐδρασθή απὸ τοῦ ἑαυτοῦ), which some explain as referring to witchcraft, or the arts of divination practised in the East, while others, with greater probability, understand it of the men of the East, the diviners and soothsayers who came from the east (comp. Job xv. 3). The correct text may, however, be ΔΈρασθη, with sorcery, which gives a better sense (Gesen. Theolur. p. 1105). See WITHCRAFT.

3. *Avaroλος, sun-rise.* This word usually occurs in the plural, and without the article. When, therefore, we read Matthew ii. 1, 2, that *αυρανολοι* came to Jerusalem saying we have seen his star in την αυραδολον, we are led to suspect some special reason for such a variation. The former phrase is naturally rendered as equivalent to Oriental Magi, and the indefinite expression is to be explained by reference to the use of ὑerule in the Old Testament. The latter phrase offers greater difficulty. If it be taken in the east, the questions arise why the singular and not the customary plural should be used? why the article should be added? and why the wise men should have seen the star in the east when the place where the child was lay to the west of their locality (unless, indeed, they are not in relation to the East, as is often the case, and not the wise men themselves, to whom it seems to refer). Pressed by the difficulties thus suggested, the majority of recent interpreters take πν ἑαυτοῦ in την αυραδολον literally in την ηραντε, and trace a correspondence of this with the ὑerule of the preceding clause, they inquired for the child, whom they knew to be born, because they had seen the rising of his star, the signal of his birth. Alfred's object to this, that for such a meaning we should expect αναρις, if not in ver. 2, certainly in ver. 9; but the construction falls under the case where the article, by indicating something closely associated with the subject, supersedes the use of the demonstrative pronoun. In the Sept. αυρανολος is used both for kedem and Diosk. It should be observed that the expression is, with but few exceptions (Dan. viii. 9; Rev. xxi. 19; comp. vii. 2; xvi. 12), from which it would seem to have been John’s usages (here αναρις, αυρανολος (Matt. ii. 1; viii. 11; xxiv. 27; Luke xxiii. 29), and not αναρις. It is hardly possible that Matthew would use the two terms indifferently in succeeding verses (ii. 1, 2), particularly as he adds the article to αναρωλος, which is invariably absent in other cases (comp. Rev. xix. 18). He seems to insist upon dividing the sexes in the locality—that it was the country called Δέρασθη, or αυρανολος (comp. the modern נאталיו), as distinct from the quarter or point of the compass (αναρις), in which it lay. In confirmation of this, it may be noticed that in the only passage where the article is prefixed to kedem (Gen. x. 30), the term is used for a definite and restricted locality, namely, Southern Arabia. See STAR IN THE EAST.

The only other terms rendered "east" in the Scriptures are xrv (charroth), pottery, applied to a gate of Jerusalem, improperly called "east gate" (Jer. xix. 2), but meaning the potters’ gate (q. c.), i.e. one which led to the "potters’ field" in the valley of Hinnom (see Strong’s Harmony and Exposition, Appendix ii, p. 11). See JERUSALEM. נאטל (mortal), a going forth, as it is elsewhere usually rendered, applied postically to sun-rise (Ps. lixv. 6). For "east wind," "east sea," see below.

EAST, TURNING TOWARDS THE. 1. The earliest churches faced eastward; at a later period (4th or 5th century) this was reversed, and the sacramental table was placed at the east, so that worshippers facing it in their devotions were turned towards the east. The Jewish custom was to turn to the west in prayer. Socrates says (Hist. eccl. 1, ch. v.) that the Jews did not face the east when they prayed. Antiocic had its altar on the west, i.e. towards Jerusalem. 2. Many fanciful reasons are assigned, both by ancient writers and by modern ritualists, for worshipping towards the east. Among them are the following: "(1) The rising sun was the symbol of Christ, the Sun of Righteousness, and since people and the Church were not always able to face towards some quarter of the heavens, they chose that which led them to Christ by symbolical representation (Tertullian, Apol. i, 16). (2) The east was the place of paradise, our ancient habitation and country, which we lose in the fall of Adam by the fall, and whither we hope to be restored again, as to our native abode and rest, in the second Adam, Christ our Saviour (Ap. const. iii. ii. c. 57). (3) The east was considered the most honorable part of the creation, being the light of light and brightness. (4) Christ made his appearance on earth in the east, and thence ascended into heaven, and there will appear again at the last day. The authority of many of the fathers has been added by ecclesiastical writers in support of these views. The author of the Questions to Antoninus, under the name of Athanasius, gives this account of the practice: "(Cf. duct. hot. bk. vi. ch. v.) that he changes the east, as if we thought God any way shut up in those parts of the world, but because God is in himself the true Light. In turning, therefore, towards the created light, we do not worship it, but the great Creator of it; taking occasion from that most excellent element to adore the Creator before all elements and ages in the world." A little attention to geography shows that these are nothing but fancies. That part of the heavens, for example, which is east at six o’clock in the morning, is west at six o’clock in the evening, so that we cannot at both these periods pray towards that quarter of the heavens where (according to Wheatly) God is supposed to have his peculiar residence of glory, unless, if we turn to the east at morning prayer, we turn to west at even song. Not only so, but two individuals on opposite sides of the globe, though both suppose that they are praying with their faces to the east, are, so far as it respects each other, or any particular quarter of the heavens, praying in opposite directions, one east and the other west, one looking towards that quarter, the other away from it. So that all such reasons are rendered futile by the geography of the earth on its axis, every degree of longitude becomes during the twenty-four hours both east and west.”
and himself scorch'd by "a vehement east wind" (Gen. xii, 6; John iv, 8); and often in the prophets, when a blighting desolation is spoken of, it is associated with the east wind, either as the instrument of, or as a lively image of the evil (Ezek. xvii, 10; xix, 12; Hos. xiii, 15; Hab. i, 9, etc.). This arose from the fact that in Egypt, Palestine, and the lands of the Bible generally, the east wind, or a wind more or less strong, blows from his burning shores, and consequently is destructive to the vegetation which is necessary to promote vegetation. In Egypt it is rather a south-east than an east wind, which is commonly found most injurious to health and fruitfulness; but this also is familiarly called an east wind, and it plays a great part in the popular tales, and even in the accounts of modern travellers on the subject: "In the spring the south wind oftentimes springs up towards the south-east, increasing to a whirlwind. The heat then seems insupportable, although the thermometer does not always rise very high. As long as the south-east wind continues, doors and windows are closed, but the fine dust penetrates everywhere; everything dries up; wooden vessels warp and crack. The thermometer rises suddenly from 16-20○ up to 30-36○, and even 38○ at Beaufort. This wind works destruction upon everything. The grass withers, that it entirely perishes; and it blows the sand into the buildings (Egypt. Miss., p. 111)." It is stated by another traveller, Wansleib, with special reference to the strong east wind employed on the occasion of the passage of the Israelites through the Red Sea, which took place shortly after Easter: "From Easter to Pentecost is the most stormy part of the year, for the wind commonly blows during this time from the Red Sea, from the east" (see in Hengstenberg's Egypt and the Rocks of Moses, p. 9, etc.). There is nothing, therefore, in the scriptural allusions to this wind which is not fully borne out by the reports of modern travellers; all that is asserted is as true now, as it has ever been, an unwelcome visitant, and carries along with it many disagreeable effects. See WIND.

Easter (mēra), a Gr. form of the Heb. מַעֲרָחָה, and so Latinized by the Vulgate paques, i.e. Passover. Easter is a word of Saxon origin, and imports a goddess of the Saxons, or, rather, of the East, Estera, in honor of whom sacrifices were annually offered about the Passover time of the year (spring), the name became known by a system of association of ideas to the Christian festival of the resurrection, which happened at the time of the Passover: hence we say Easter-day, Easter-Sunday, but very improperly; as this is by no means referable to the goddess, but only to the god (Germ. Zahl, p. 200). So the present German word for Easter, Ostern, is referred to the same goddess, Estera or Ostera.—Calmet, s. v. The occurrence of this word in the A. V. of Acts xii, 4—"intending after Easter to bring him forth to the people"—is chiefly noticeable as an example of the want of consistency in the translators. See AUTHORIZED VERSION. In the earlier English versions Easter had been frequently used as the translation of מַעֲרָחָה. At the last revision Passover was substituted in all passages but this. It would seem from this, and from the use of such words as "robbers of churches" (Acts xix, 35). "town-clerk" (xvi, 30), "sergeant" (xvi, 35), "deputy" (xiii, 7, etc.), as if the Acts of the Apostles had fallen into the hands of a translator who acted on the principle of choosing, not the most correct, but the most familiar equivalent of the passage, Thucydides, (On the Use of the N. T. p. 21).—Smith, s. v. For all that regards the nature and celebration of the feast referred to in Acts xii, 4, see PASSOVER.

EASTER, CELEBRATION OF. In the ancient Church the seventh day of Passion-week (q. v.), the great Sabbath, as it was called, was observed with rigorous precision as a day of fasting. Religious worship was
celebrated by night; and the vigil continued till dawn, the hour at which it is supposed our Lord arose. At this hour the stillness of the midnight vigil was broken by the joyful acclamation, "The Lord is risen! The Lord is risen! The Lord is risen indeed!

The day of Easter was celebrated with every demonstration on the part of the Christians. There was a solemn celebration of the Lord's Supper; the baptism of catechumens; appropriate salutations, and demonstrations of joy; the liberation of prisoners, and the manumission of slaves. Charities were dispensed, and the doors of justice were closed. The heathen were forbidden to celebrate public spectacles in order that the devotions of Christians might not be interrupted. The week following was considered as a continuation of the festival. During this time, those who had been baptized at Easter continued their devout seclusion in the churches, and they were bound by baptism. On the Sunday following they laid aside their garments of white, and were welcomed as members of the Church.—Bingham, Orig. Eccles. bk. xx. ch. v.

EASTER CONTROVERTIES. There was much controversy in the Church as to the days on which our Lord's resurrection ought to be celebrated. The churches of Asia Minor celebrated the death of the Lord on the day corresponding to the 14th of the month Nisan, on which day, according to the opinion of the whole ancient Church, the crucifixion took place. The orthodox party referred to the words of our Lord in the Synoptics concerning the crucifixion. The other party on the second Sunday also were of the opinion that the crucifixion should be annually commemorated on the particular day of the week on which it occurred, that is, Friday. The resurrection was accordingly commemorated by the former party on the 13th of Nisan, and by the latter on the 14th of Nisan; the words of our Lord in the Synoptics (Matt. xxvii. 62) are in favor of this view. The two parties also differed with regard to the fasting preceding Easter. The Western churches viewed the death-day of Christ exclusively as a day of mourning, and they did not terminate the time of fasting until the Sunday following Good Friday. The Eastern party on the other hand, looking upon the death of Christ as the redemption of mankind, terminated fasting at the hour of Christ's death (2 o'clock in the afternoon), and immediately after celebrated the Agape and the Lord's Supper. In addition to these two parties, there was a third, the Ebionite sect, which kept the 15th of Nisan, and the 16th of Nisan, both of which a few years later were celebrated by bishops of Ephesus. Victor, at first intended to excommunicate the Asiatic churches, and therefore issued an encyclical to the Christians of those regions, but whether he really carried out his threat is not certain. The words of Eusebius ( Hist. Eccl. v. 24) show that the movements of Victor are by some understood as implying a real execution of the excommunication, while the more common opinion is, that, in consequence of the indulgent remonstrances against such a usurpation of power by the Western bishops, especially by Irenee, the threat was abandoned.

Thus far the controversy between the Asiatic and the Western churches had only concerned two points, namely, (1) whether the day of the week or the day of the month on which the death of Christ occurred should be commemorated; (2) when the fasting ought to be terminated. Now a third point, namely, as to the time when the 14th of Nisan really occurred. Many of the Church fathers are of opinion that, according to the original calculation of the Jews up to the time of the destruction of Jerusalem, the 14th of Nisan had always been after the spring equinox, and not before as is the case today. This was the only evidence of calculation of the later Jews that the 14th of Nisan occasionally fell before the equinox. They therefore insisted that the 14th of Nisan, which for both parties within the Church determined the time of Easter, should always be after the equinox. As the year of the Jews is a lunar year, and the 14th of Nisan always a full moon day, the Christians who adopted the above astronomical view, whenever the 14th of Nisan fell before the equinox, would celebrate the death of Christ one month later than the Jewish Passover. As the Christians could not long rely on the Jewish calendar, they had to make their own calculations of the time of Easter. These calculations usually differed, partly from reasons already set forth, and partly because the date of the equinox was fixed by some at the 18th of March, by others at the 19th, and by yet others at the 21st of March. The Council of Arles in 314 endeavored to establish uniformity, but its decrees do not appear to have had great effect. The subject was therefore again discussed and acted upon by the Ecumenical Council of Nice, which decreed that Easter should be celebrated precisely on the day of the spring equinox, on the Friday following the 14th of Nisan. It was also provided that the Church of Alexandria,
as being distinguished in astronomical science, should annually inform the Church of Rome on what day of the year the Easter is fixed, and the Church of Rome should notify all the churches of the world. But even these decrees of the Council of Nice did not put a stop to all differences, and it was reserved to the calculation of Dionysius Exiguus (q. v.) to gradually introduce uniformity of practice into the whole Church. Some countries, like Great Britain, did not abandon their ancient practice until after a long resistance. At the time of Charlemagne uniformity seems to have been established, and no trace is to be found of the Quartodecimani. The revision of the calendar by Pope Gregory XIII, in the whole, retained the Day of Easter, but more accurately the Easter full moon, and made careful provision for avoiding any future deviation of the calendar from the astronomical time. By these minute calculations, however, the Christian Easter sometimes, contrary to the decrees of the Nienfe Council, coincides with the Jewish Passover. This, for instance, was the case in 1825.—Mosheim, Church Hist. i. 68; Neander, Church Hist. i. 298; ii. 301, 302; Mosheim, Comm. i. 523; Wetzel, Die christliche Paschafest der ersten Jahrhunderte (1848); Rottberg, in Zeitschrift fur kirchliche Wissenschaft, ii. 1862, vii. Hefele, in Wetzer u. Welte, Kirchen Lex., iii. 871; Steitz, in Herzog, Real-Encyklop. xi, 140; Steitz, Die Differenz der Occidentalen u. der Kleinasiaten (in Stud. u. Krit. 1865). (A. J. S.)

Easter, John, a distinguished Methodist Episcopal minister. Dates of his early life are wanting. He joined the itinerancy in 1782, and located in 1792. His ministerial career was "brilliant," and "his success almost unparalleled." In 1767, on Brunswick Circuit, Va., eighteen hundred souls were added to the Church under his ministry. William McKendree and Enoch George, afterwards bishops in the Church, were brought to God through his preaching. —See Wakeley's Heroes of Methodism, p. 219; Life and Times of Jesse Lee, p. 336 et al.

Easter, John, a Methodist Episcopal minister, was born in Norfolk Co., England, Sept. 21, 1800, and joined the Wesleyan Methodists in 1824. In 1830 he emigrated to America, and settled in Geneva, N. Y. He entered the itinerancy in 1832, and took a superannuated circuit in 1888. His death was caused by a stroke, at Geneva, on July 4, 1842. Mr. Easter was a man of great worth, and a useful and beloved preacher. —Minutes of Conferences, iii. 345.

Eastern Church, a designation given, 1. Specifically to that which is commonly called the Greek Church, in distinction from the Western (or Latin Church); title claimed by itself is Κυριακή και άποστολική εκκλησία της ιεράπολος: The Catholic and Apostolic Eastern Church. See GREEK CHURCH, Bishop Coxe, in the Churchman's Calendar, calls it the "Grand Trunk, or main stem of the Catholic Church." 2. The name Eastern Church, or, more properly, Eastern churches, is given to Eastern Christendom, divided into the churches named in the following list, which gives their statistics to the close of 1867, as far as they can be ascertained:

1. The Greek Church.—Russia (in Europe, 51,000,000; in Siberia, 2,000,000; in the provinces of the Caucasus no official account of the ecclesiastical statistics has yet been made; the total population of this part of the empire is 4,257,000), the population connected with the Greek Church may be estimated at about 1,500,000, hence total population of Russia connected with the Greek Church is about), 55,000,000; Turkey (inclusive of the dependencies in Europe and Egypt), about 11,500,000; Austria, 2,921,000; Greece (inclusive of the Ionian Islands), 1,220,000; United States of America (chiefly in the territory purchased in 1867 from Russia), 50,000; Prussia, 150,000; China, 200; total, 69,629,700. The figures referring to Russia, Austria, and Prussia are from an official census; those for the United States are from consular and missionary reports; those for Greece, in Pekin; those on Turkey and Greece are estimates almost generally adopted. See GREEK CHURCH; RUSSIA.

2. The Armenian Church.—According to D. Petermann (in Herzog's Real-Encyclopedia), the total number of Armenians scattered in the world is about 2,500,000. Of these, about 100,000 are connected with Rome, and are called United Armenians; 15,000 are Evangelical Armenians, and all others belong to the National (or "Gregorian") Armenian Church. The number of the latter may therefore be set down at about 2,350,000. The greatest number (about 2,000,000) live in Turkey, about 170,000 in Russia, and 30,000 in Persia. See ARMENIAN CHURCH.

3. The Nestorians, including the Christians of St. Thomas in India, number about 165,000 souls, exclusive of those who have connected themselves with Rome, or have become Protestants. See NESTORIANS.

4. The Jacobites in Turkey and India are estimated at about 220,000, but the information concerning them is less definite than that about the preceding churches. See JACOBITES.

5. The Copts and Abyssinians.—The Copts may be roughly estimated at about 200,000, the Abyssinians at about 30,000. See ABBYSSINIAN CHURCH; COPTS. Together, therefore, the population connected with these Eastern communions embraces a population of about 76,500,000. All these bodies lay claim to having bishops of apostolic succession, and consequently all of them are embraced in the union scheme patronized by the High-Church Anglicans. Both the Low-Church and the Broad-Church parties dislike the idea of a union with the Greeks, Copts, Abyssinians, and the other Eastern communions; but the High-Churchmen, of all shades of opinion, are a unit on this subject. The most consistent fact in the history of this movement is the official transmission of a Greek translation of the pastoral letter issued (1867) by the Pan-Anglican Synod to all the patriarchs and bishops of the Greek Church (Schem, in Methodist Quarterly Review, 1868, p. 290).

On the Eastern churches, besides the articles on the separate churches in this Cyclopedia, see Stanley, Lectures on the History of the Eastern Church (N. Y. 1867, 8vo); Neale, History of the Holy Eastern Church (London, 1847-1850, 4 vols. 8vo). A list of the patriarchates, sees, etc., of the Eastern Churches is given in the Greek and Roman Calendar, 1868, p. 96.

Eating (properly ἔστιν, ἀφαί, ἑαυτόν). The ancient Hebrews did not eat indifferently with all persons; they would have esteemed themselves polluted and dishonored by eating with those of another religion or of an odious profession. In Joseph's time they neither ate with the Egyptians nor with the Egyptians with them (Gen. xiii, 32), nor in our Saviour's time with the Samaritans (John iv. 5). The Jews were scandalized at his eating with publicans and sinners (Matt. ix, 11). As there were several sorts of meats the use of which was prohibited, they could not conveniently eat with those who partook of them, fearing to contract pollution by touching such food, or if by accident any particles of it should fall on them. See FOOD. At their meals some suppose they had each his separate table; and that Joseph, entertaining his brethren in Egypt, seated them separately, each at his particular table, while he himself sat down separately from the rest of the brethren, who ate with him; but he sent to his brethren portions out of the provisions which were before him (Gen. xiii, 31 sq.). Elkannah, Samuel's father, who had two wives, distributed their portions to them separately (1 Sam. i, 4, 5). In Homer, each guest is supposed to have had his little table apart, and the master of the feast distributed meat to each
EATING

(Odyss. xiv. 446 sq.). We are assured that this is still practised in China, and that many in India never eat out of the same dish, nor on the same table with another person, believing they cannot do so without sin, and this not only in their own country, but when travelling and in foreign lands. This is also the case with the Brahmins and various castes in India, who will not even use a vessel after a European, though he may only have drunk from it water recently drawn out of a well. The same strictness is observed by the more scrupulous among the Mohammedans, and instances have been known of every plate, and dish, and cup that had been used by Christian guests being broken immediately after their departure. The ancient manners which we see in Homer we see likewise in Scripture, with regard to eating, drinking, and entertainments. There was great plenty, but little delicacy; great respect and honor paid to the guests by serving them plentifully. Joseph sent his brother Benjamin a portion five times larger than those of his other brethren. Samuel set a whole quarter of a calf before Saul (1 Sam. ix. 24). The women did not appear at table in entertainments with the men; this would have been an indecency, as it is at this day throughout the East. See BANQUET.

The Hebrews, as we are told, did not sit at table, but afterwards imitated the Persians and Chaldeans, who reclined on table-beds or divans while eating. (See Gier, De cett. Ebr. ratione comandli, Lips. 1833). This mode of reclining at meals was common in the East, and also among the Greeks and Romans. Under the Roman emperors the couches were sometimes made semicircular. See ACCRETION. At the present day, in the East, the custom is to sit or recline upon the floor at meat, and at other times on cushions. Many of the Arabs use no knife, fork, spoon, or plate in eating their victuals (these being used only by foreigners, and that as a special privilege); they dip their hands into the milk which is placed before them in a wooden bowl, and lift it to their mouth in their palm. Dr. Russell states, "The Arabs, in eating, do not thrust their whole hand into the dish, but only their thumb and two first fingers, with which they take up the morsel, and that in a moderate quantity at a time." The present mode of eating in Syria and Palestine is thus described by Dr. Jowett: "To witness the daily family habits, in the house in which I lived at Deir el Kamar (not far from Beyrount), forcibly reminded me of Scripture scenes. The absence of the females at our meals has already been noticed. There is another custom, by no means agreeable to a European, tc which, however, I would willingly have endeavored to submit, but it was impossible to learn it in the short compass of twenty days' visit. There are on the table, in the evening, two or three messes of stewed meat, vegetables, and sour milk. To me the privilege of a knife, and spoon, and plate was granted; but the rest all helped themselves immediately from the dish, in which it was no uncommon thing to see more than five Arab fingers at one time. The bread, which is extremely thin, tearing and folding up like a sheet of paper, is used for the purpose of rolling together a large mouthful, or sopping up the fluid and vegetables. But the practice which was most revolting to me was this: when the master of the house was found to have a dainty morsel, he took it out with his fingers and applied it to his mouth. This was true Syrian courtesy and hospitality, and had I been sufficiently well-bred, my mouth would have opened to receive it. On my pointing to my plate, however, he had the goodness to deposit the choice morsel there" (Bosworth, p. 219). Niebuhr's account is as follows (De script. Arab., p. 52). "The table of the Orientals is arranged according to their mode of living. As they always sit upon the floor, a large cloth is spread out in the middle of the room upon the floor, in order that the bits and crumbs may not be lost, or the carpet defiled. (On journeys, especially in the deserts, the place of this cloth is supplied by a round piece of leather, which the traveller carries with him, Travels, ii. 372.) Upon this cloth is placed a small stool, which serves as a support for a large round tray; on this the food is served up in various small dishes of copper, well tinned within and without. Among the better class of Arabs, one finds, instead of napkins, a long cloth, which extends to all who sit at table, and which they lay upon their laps. Where this is wanting, each one takes, instead of a napkin, his own handkerchief, or rather small towel, which he always carries with him to wipe himself with after washing. Knives and forks are not used. The Turks sometimes have spoons of wood or horn. The Arabs are so accustomed to use the hand instead of a spoon, that they can do without a spoon even when eating bread and milk prepared in the usual manner. Other kinds of food, such as we commonly eat with a spoon, I do not remember to have seen. It is, indeed, at first, very unpleasant to a European, just arrived in the East, to eat with people who help themselves to the food out of the common dish with their fingers; but this is easily got over, after one has become acquainted with their mode of life. As the Mohammedans are required, by their religion, very often to wash themselves, it is therefore even on this account advisable that their cooks prepare their food with as much cleanliness as those of Europe. The Mohammedans are even obliged to keep their nails cut so short that no impurity can collect under them; for they believe their prayers would be without any effect if there should be the least impurity upon any part of the body; and since, now, before eating, they always wash themselves carefully, and generally too with soap, it comes at length to seem of less consequence whether they help themselves from the dish with clean fingers or with a fork. Among the sheiks of the desert, who require at
EATING

16

EBAL

a meal nothing more than pillaw, i.e., boiled rice, a very large wooden dish is brought on full, and around this one party after another set themselves till the dish is emptied, or they are satisfied. In Merlin, where I once ate with sixteen officers of the Waiteole, a servant placed himself between the guests, and had nothing to do but to take away the empty dishes, and set down the full ones which other servants brought in. As soon as ever the dish was set down, all the sixteen hands were immediately thrust into it, and that to so much purpose, that rarely could any one help himself three times. "They eat, in the East, with very great rapidity; and at this meal in Merlin, in the time of about twenty minutes, we sent out more than fourteen empty dishes." See DINE.

The Hebrews, like the modern Orientals, rose early, about the dawn of the day, when they breakfasted. They were accustomed to take a slight repast about noon; and this to husbandmen and mechanics was probably the principal meal (1 Kings xx, 16; Ruth ii, 14; Luke xiv, 12). Wilkinson says, "That dinner was served up at midday among the ancient Egyptians may be inferred from the invitation given by Joseph to his brethren: 'Bring these men home, and slay and make ready, for these men shall dine with me at noon' (Gen. xlvi, 16); but it is probable that, like the Romans, they also ate supper in the evening, as is still the custom in the East." Supper appears to have been the principal meal among the Hebrews, as it was among the Greeks and Romans. Among the Romans it anciently took place about three o'clock; but in the East, as at the present day in Persia, about six or seven in the evening, in order to avoid the enfeebling heat of the afternoon (Mark vi, 21; Luke xiv, 16; 24; John xii. 2). In 1 Sam. ix, 13, we read that the people would not eat of the feast until Samuel had arrived and consecrated the sacrifice. But this circumstance affords no evidence of the custom of asking a blessing on food. In the time of Christ, however, it was common before every meal to give thanks (Matt. xiv, 19; xv, 36). See MEAL-TIME.

In closing this subject, we may properly notice the obligations which are considered by Eastern people to be contracted by eating together. Niebuhr says, "When a Bedouin sheik eats bread with strangers, they may trust his fidelity and depend on his protection. A traveller will always do well, therefore, to take an early opportunity of securing the friendship of his guide by a meal." The reader will recollect the complaint of the Psalmist (xlii, 9), penetrated with the deep ingratitude of one whom he describes as having been his own familiar friend, in whom he trusted—

established Church, but, on account of his Puritanism, came to New England with the Rev. John Davenport in 1657, and was co-pastor with him at New Haven. He returned to England in 1646, and formed a Congregational church at Duckenden, Cuckshir. By the Act of Uniformity he was compelled to cease preaching in 1662, and died June 9, 1665. He published A Defence of sundry Positions and Scriptures alleged to justify the Congregational Way (1646); second part, 1646:—The Mystery of God incorrupt, or the Word made Flesh cleared up, etc. (1650) or further Confirmation of the Scriptures, produced to prove the Divinity of Jesus Christ, distorted and miserably wrested and abused by Mr. John Knowles, etc. (1651):—

1. (Sept. Γυμίη [Vat. MS. omits], Vulg. Hebāl.) A various reading for Īnāl (q. v.), the son of Joktan (1 Chron. i, 22; comp. Gen. x, 28).

2. (Γαύμιθ v. r. Παύμιλα [Alex MS. Γαύμιλα], Vulg. Hebāl.) The fourth son of Shobal, son of Seir, the Horite of Idumea (Gen. xxxvi, 23; 1 Chron. i, 40). B.C. ante 1294.

3. (Sept. Γαύμιη, Josephus Γαύμιλαν, Vulg. Hebāl.) A mountain on the northern part of the tribe of Ephraim, on the north-eastern side of the valley in which was situated the city of Shechem (now Nablous), in Samaria (q. v.). See Mills, Three Months at Nablous (London, 1864).

1. It was here that the Israelites were enjoined to erect an altar, setting up plastered stones, and respond to the imprecations uttered in the valley, according to the divinely prescribed formula, upon those
who should prove faithful to the Sinitic law (Deut. xi. 29; xxviii. 4, 13), while the responses to the blessings were to be uttered by the other division of the tribal representatives stationed upon the opposite mountain, Gerizim. Both the benediction and the anathema were pronounced by the Levites, who remained with the ark in the centre of the interval (compare Deut. xxviii. 11, 15, with the site of the Talmud, Sota, 36, quoted in Herzweiler's Penta-
teucho). But, notwithstanding the ban thus apparently laid on Ebal, it was further appointed to be the site of the altar of the mountain, an altar of large unshewn stones, plastered with lime, and inscribed with the words of the law (Deut. xxvii. 2-8). On this altar peace-offerings were to be offered, and round it a sacrificial feast was to take place, with other rejoicings (ver. 6, 7). Scholars disagree as to whether there were to be two erections—a kind of cromlech and an altar; or an altar only, with the law inscribed on its stones. The latter was the view of Josephus (Ant. iv. 8, 44; v. 1, 19), the former is un-
hesitatingly adopted by the latest commentators (Keil, Comment. on Josh. viii. 32). The terms of Moses' in-
junctions are not so clear as to infer that no delay was allowed in carrying out this symbolic transaction. It was to be "on the day" that Jordan was crossed (xxvii. 2), before they "went in unto the land flowing with milk and honey" (ver. 3). Accordingly Joshua ap-
ppears to have seized the earliest practicable opportunity, after the ascertaining affairs of the siege of Jericho, the execution of Achan, and the destruction of Ai had been dispatched, to carry out the command (Josh. viii. 30-35). After this Ebal appears no more in the sacred story. By a corruption of the above-cited texts, the Samaritans transferred the site of the appoin-
ted altar to the opposite mountain, which has hence at-
tained the greater notoriety. See Gerizim.

2. The question now arises, where were Ebal and Gerizim situated? The all but unanimous reply to this is, that they are the mounts which form the sides of the fertile valley in which lies Nablus, the ancient Shechem—Ebal on the north and Gerizim on the south.

(1.) It is plain from the passages already quoted that they were situated near together, with a valley between them.

(2.) Gerizim was very near Shechem (Judg. ix. 7), and in Josephus' time their names appear to have been attached to the mounts, which were then, as now, Ebal on the north and Gerizim on the south. Since that they have been mentioned by Benjamin of Tudela (Asher, i. 66) and Sir John Maundeville, and among modern travellers by Maundrell (Mod. Trav. p. 482).

The main impediment to our entire reception of this view rests in the terms of the first mention of the place by Moses in Deut. xii. 30: A. V. "Are they not on the other side Jordan, by the way which the sun goeth down, in the land of the Canaanites, which dwell in the charnian over against Gilgal, beside the plains of Moreh?" Here the mention of Gilgal, which was in the valley of the Jordan near Jericho, of the valley itself (Arakah, mistranslated here only, 'charnian'), and of the Canaanites who dwelt there, and also the other terms of the injunction of Moses, as already noticed, seem to imply that Ebal and Gerizim were in the immediate neighbourhood of Jericho. This is strengthened by the narrative of Joshua, who appears to have carried out the prescribed ceremony on the mounts while his camp was at Gilgal (comp. vi. 22; ix. 6), and before he had (at least before any account of his having) made his way so far into the interior of the country as Shechem.

This is the view taken by Eusebius (Onomasticon, s. v. Palaeb.); "He does not quote the passage in Deut.,

but seems to be led to his opinion rather by the diffi-
culty of the mountains at Shechem being too far apart to admit of the blessings and cursings being heard, and also by his desire to contradict the Samaritans; to add to this that he speaks from no personal knowledge, but simply from hearsay (lambda), as to the existence of two such hills in the Jordan valley. The notice of Eusebius is merely translated by Jerome, with a shade more of accuracy, to the words of the text (\alpha\varepsilon\u0391\u03b6\u03b1\u03bd\u03b1\u03b5\u03b9\u03a6\u03c9, lambra), and expression of difficulty as to the distance, but without any additional information. Procopius and Epiphanius also followed Eusebius, but their mis-
takes have been disposed of by Reland (Pisistr. p. 503-
4; Moret, p. 139-138).

With regard to the passage in Deut., it will perhaps assume a different aspect on examination. (1.) Moses is represented as speaking from the east side of Jordan, before anything was known of the country on the west, beyond the exaggerated reports of the spies, and when everything there was wrapped in mystery, and localities and distances had not assumed any proportions. (2.) A closer rendering of the verse is as follows: "Are they not on the other side the Jordan, beyond (\alpha\varepsilon\u0391\u03b6\u03b1\u03bd\u03b1\u03b5\u03b9\u03a6\u03c9, lambra), the word rendered 'the backside of the desert' in Exod. iii. 1) the way of the sunset, in the land of the Canaanite who dwells in the Arabah over against Gilgal, near the terebinths of Moreh?" If this rendering is correct, a great part of the diffi-
culty has disappeared. Gilgal no longer marks the site of Ebal and Gerizim, but of the dwelling of the Canaanites, who were, it is true, the first to encounter the Israelites on the other side of the river, in their native lowlands, but who, we have it actually on rec-
ord, were both in the time of Abraham (Gen. xii. 6) and of the conquest (Josh. xlvii. 19, 16) located about She-
chem. The word now rendered "beyond" is not rep-
resented at all in the A. V., and it certainly throws the locality much further back; and, lastly, there is the striking landmark of the trees of Moreh, which were standing by Shechem when Abraham first entered the land, and whose name probably survived in Morthia, or Mamortha, a name of Shechem found on coins of the Roman period (Reland, Miscell. p. 137 sq.).

See Gilgal.

In accordance with this is the addition in the Samarian Pentateuch, after the words "the terebinths of Moreh," at the end of Deut. xi. 30, of the words "over against Shechem." This addition is the more credensible because there is not, as in the case noticed afterwards, any apparent motive for it. If this inter-
pretation be accepted, the next verse (31) gains a fresh force: "For ye shall pass over Jordan not only to meet the inhabitants immediately on the other side, but to go in to possess the land [the whole of the country, even the heart of it, where these mounts are situated (glancing back to ver. 29)], the land which Jehovah your God giveth you; and ye shall possess it, and dwell therein." It may also be asked whether the significance of the whole solemn ceremonial of the blessing and cursing is not missed if we understand it as taking place directly a footing had been obtained on the outskirts of the country, and not as acted in the heart of the conquered land, in its most prominent natural position, and close from its old city—Shechem.

This is evidently the view taken by Josephus. His statement (Ant. v. 1, 19) is that it took place after the subjugation of the country and the establishment of the tabernacle at Shiloh. He has no misgivings as to the situation of the mountains. They were at She-
chem (int. 2, 6), and, from these, after the cere-
mony, they were returned to Shiloh.

The narrative of Joshua is more puzzling. But even with regard to this something may be said. It will at once be perceived that the book contains no ac-
count of the conquest of the centre of the country, of those portions which were afterwards the mountain of Ephraim, Efraim, or Galilee. We lose Joshua at
Gilgel, after the conquest of the south, to find him again suddenly at the waters of Merom in the extreme north (x, 43; xi, 7). Of his intermediate proceedings the only record that seems to have escaped is the fragment contained in viii, 30-35. Nor should it be overlooked that some doubt is thrown on this in Josh, viii, 30-35, by its omission in both the Vat. and Alex. MSS. of the text.

The distance of Ebal and Gerizim from each other is not such a tumbling-block to us as it was to Eusebius; though it is difficult to understand how he and Jerome should have been ignorant of the distance to which the voice will travel in the clear elastic atmosphere. One might have gathered it from the instances of this (Sinai and Pal. p. 15); others equally remarkable have been observed by those long resident in the neighborhood, who state that a voice can be heard without difficulty across the valley separating the two spots in question (see also Jona, p. 571).

It is well known that one of the most serious variations between the Hebrew text of the Pentateuch and the Samaritan text is in reference to Ebal and Gerizim. In Deut. xxvii, 4, the Samaritan has Gerizim, while the Hebrew (as in A. V.) has Ebal, as the mount on which the law was given. Both the commentaries on the law were to be erected. Upon this basis the Samaritans ground the sanctity of Gerizim and the authenticity of the Temple and holy place, which have existed there. The arguments upon this difficult question will be found in Kennicott ( Dissert., ii), and in the long view of its position and name by Gill (Bible, p. 777), and lastly Gersinus, De Pent. Sac., p. 61. Two points may merely be glanced at here, which have apparently escaped notice.

1. Both agree that Ebal was the mount on which the cursings were to rest, Gerizim that for blessings. It appears inconsistent that Ebal, the mount of cursings, should be the site of the altar and the record of the law, while Gerizim, the mount of blessing, should remain unoccupied by sanctuary of any kind.

2. Taking into account the known predilection of Orontids for ancient sites on which to fix their sanctuaries, it is much easier to believe, (in the absence of any evidence to the contrary) that in building their temple on Gerizim, the Samaritans were making use of a spot already enjoying a reputation for sanctity, than that they built on a place upon which the curse was laid in the records which they received equally with the Jews. That this was the effect of the sanctity of Gerizim by the Samaritans we seem an argument for its original sanctity. On the other hand, all critics of eminence, with the exception of Kennicott, regard this as a corruption of the sacred text; and when it is considered that the invariable reading in Hebrew MSS. and the ancient versions, both in this passage and the corresponding one in Josh, viii, 30, is " Ebal," it seems strange that any scholar would for a moment doubt its correctness. Kennicott takes an opposite view, maintaining the integrity of the Samaritan reading, and arguing the point at great length; but his arguments are neither sound nor pertinent ( Dissertations on the Hebrew Text, ii, 20 sq.). The Samaritans had a strong reason for corrupting the text, seeing that Gerizim was their sanctuary; and they desired to make it not merely the mountain of blessing, but the place of the altar and the inscribed law. See SAMARITANS.

Ebal is rarely ascended by travellers, and we are therefore in ignorance as to how far the question may be affected by remains of ancient buildings thereon. That such remains do exist is certain, even from the very meagre accounts published (Bartlett, W. d. about Jerusalem, App. p. 261 sq.; and Narrative of Rev. J. Mills in Trans. Pal. Archd. Assoc., 1855), while the mountain is evidently of such extent as to warrant the belief that there is a great deal still to discover.

The report of the old travellers was that Ebal was more barren than Gerizim (see Benjamin of Tudela, and Maundrell, in Early Travels in Palestine, p. 89, 483: Wilson, Lands of the Bible, ii, 71), but this opinion probably arose from a belief in the effects of the curse mentioned above. At any rate, it is not borne out by the latest accounts, according to which there is little or no perceptible difference. They are not isolated mountains, but culminating points of a chain.

Their declivities facing the vale bear a singular resemblance to the sides of the Altar; they are equally ragged and bare; the limestone strata here and there project, forming bold bluffs and precipices; but the greater portion of the slopes, though steep, are formed into terraces, partly natural and partly artificial. For this reason both mountains appear more barren from below than they are in reality, the rare, yet naked supporting walls of the terraces alone being thus visible. The soil, though scanty, is rich. In the bottom of the vale are olive groves, and a few straggling trees extend some distance up the sides. The broad summits and upper slopes have no trees, yet they are not entirely bare. The steeper banks are here and there scantily clothed with dwarf shrubbery; while in spring and early summer, rank grass, brambles, and thistles, intermixed with myriads of bright wild flowers—anemones, convolvulus, tulips, and poppies—spring up with a profusion among the rocks. And as we rose to the bottom to top by beautiful gardens' (Mills; see also Porter, Hand-book, p. 392). The slopes of Ebal towards the valley appear to be steeper than those of Gerizim (Wilson, p. 45, 71). It is also the higher mountain of the two. There is some uncertainty about the measurements, but the following are the results of the latest observations (Van de Velde, Memoir, p. 178):

Nablia, above sea, 1672 ft. Gerizim, do. 1890 1.
gosed the king favorably towards Christianity. In 826, the king, with his wife, his oldest son, his nephew, and a suite of 400 men, came to the emperor's court at Mayence and was baptized. The mission in Denmark was now placed under Ansgar, and Ebbo returned to his diocese (840). He took an active part in the affairs of the state, and in the war of the sons of Louis against their father, he, with most of the bishops, took side with the sons. He presided at the assembly of bishops which in 838 compelled Louis to do public penance, as such an act, according to the law, made him fit to bear arms. But when, in 834, Louis regained his power, Ebbo was arrested and kept a prisoner in the convent of Fulda. He was brought before the Diet of Diedenhofen in 835, and confessed himself guilty of offences which, in the opinion of the judges, made him unfit for any further administration of his office. He was again confined in the convent of Fulda, where he remained until the death of Louis in 840. He then prevailed upon Lothaire, who made an attempt to possess himself of the whole empire of his father, to reinstate him as an antipope (840). In May, 841, king Charles, the brother of Lothaire, again expelled him; and as, at the conclusion of peace, Lothaire did not take a special interest in Ebbo, he lost his archbishopric forever. In the last years of his life, king Louis of Germany appointed him, with that of the Pope, cardinal-priest of the diocese of Hildesheim. He died March 29th, 851. Ebbo compiled an Indiculum Ebodii de ministria Remianis ecclesiis, an instruction for the clergy of his diocese as to their mode of life, and an Apologia Archipriestis Remianae cum ejusdem genii sanctitatem invicem legitimis legationibus. They are of small size and no value.—Herszog, Real-Encyclop. xix, 447; Wetzer u. Welte, Kirchen-Lex. iii, 349. (A. J. S.)

'Ebd' (Heb. id. "بثפ," servant [q. v.], i. e. of God; comp. Abdo), the name of two men.

1. (Many MSS., and the Syr. and Arab. Versions, have "بثפ", Eber; Sept. 1103; Alexandre. M. 103; Vulg. Ebed and Obad.) The father of Gaal (q. v.), who headed the insurgents at Shechem against Abimelech, tyrant judge of the Israelites (Judg. ix. 26-33). B.C. ante 1212.

2. (Sept. אֹבְדָּשׁ v. אֹבְדָּשׁ, Vulgate Abed.) Son of Jonathan, and family-head of the lineage of Adin; he returned with 50 menales from the captivity (Ezra viii, 6). B.C. 459.

'Ebed-jeus, surm Name of the influential Nestorian theologian, was born in Mesopotamia about the middle of the 13th century. After having been for five years bishop of Sigara, in Arabia, he was made Nestorian bishop of Soba or Nisibe in 1290. Where Ebed-Jeus pursued his studies is not known, but the works which he has left us show that he was fluent in the Arabic, well acquainted with the Greek, and his dogmatical writings especially display an extensive knowledge with philosophy and dialectics. He seems also to have been familiar with the works of the great Jacobite Bar-Hebræus. His works, with which he is generally connected, are mostly of a theological character; on the interpretation of the O. and N. T., on the Logos, sacraments of the Church, and a treatise on the truth of the Faith (pub. by A. Mai in Syriac and Lat., Script. Vet. x. 317: ÉpîÔme ou Collection of the Canons of Conoceia (also published by Mai), are apostolici ob Ecclesiam orthodoxam: Prima christianae doctrina Diffusa (A Description of the Countries that permitted the preaching of the Apostles):—23 Canons of the Apostles, edited by St. Clement:—5 other Canons of the Apostles, published also by St. Clement:—The Paradise Eden, containing 50 dialogues divided into two parts, called Roucha and Elias, beginning with the Trinity, and ending with the Resurrection. (Comp. Asseman, Bibl. Or. iii, 1, p. 325 sq.) Of literary importance is his catalogue of 200 Syri.

ian writers (ably edited by Assemane, Bibli. Or. i, 1, p. 1-362), at the close of which his own writings are also given.—Hoefner, Noue. Biegn. Gr. xvi, 594; Herzog, iii, 613; Assemane, Bibli. Oriental. i, part i. (J. H. W.)

'Ebed-Jeuß, a Chaldaean patriarch and Syrian writer; born about the middle of the 3rd century. He received his education at Gogarta, and was afterwards bishop of that place. In 1554 he was elected as the successor of Saluka, first patriarch of the Nestorians, and confirmed by the Pope in 1562. Ebed-Jeuß was a man of great erudition; he was familiar with the writings of the Greeks and Latin fathers, and was also master of the Arabic, Chaldee, and the Syriac. Many of the Nestorians were converted by him, and the numbers of the Chaldees were augmented under his administration. He died a few years after his visit to Rome (1562), in a monastery at the village of Serot in Mesopotamia. We have from him a poem in three parts: Sur le voyage à Rome, le retour et la mort de Saluka; Poème à la louange de Pie IV; A Confession of Faith, read at the 22d session of the Council of Trent.—Assemane, Bibli. Oriental. i, 536; iii, p. 322; Hoefner, Noue. Biographie Générale, xiv, 569. (J. H. W.)

'Ebed-Melech (Heb. Ebed-Melekh, servant of the king, i. a. Arabic Abd-al-Malek, Sept. Ḥabūl[i] 'Abdāl Vultaga Abimelech), an Ethiopian at the court of Zedekiah, king of Judah, who was instrumental in saving the prophet Jeremiah from death by famine (Jer. xxxviii, 7-13), and who, for his humanity in this circumstance, was promised deliverance when the city should fall into the enemy's hands (Jer. xxxix, 15-18). B.C. 589. See Jeremiah. He is there styled a eunuch (עָנָךְ), and he probably had charge of the king's harem (comp. xxxviii, 22, 23), an office which would give him the privilege of private access to the king; but his name seems to be an official title—'king's slave, i. e. minister. See Eunuch.

Ebeh. See Reed.

Ebel. See Talmod.

Ebel, Johann Wilhelm, a Protestant mystic and theosophist, was born in 1784 at Passenheim, in the province of Eastern Prussia. In 1802, while a preacher in the Established Church of Prussia, he attracted the attention of his ecclesiastical superiors on account of his connection with the theosophist Schönherr (q. v.). Subsequently he was appointed preacher at Koenigsberg, where he gathered around him a circle of enthusiastic followers, among them numerous men and a larger number of women. Foremost among the latter were the countess of Kanitz and the countess von der Gröben. In 1837, at the request of the Consistory of that city, a suit was instituted against him and his friend Dietzel, which belongs among the most remarkable trials of the kind in modern times. He was in 1842 acquitted from the chief charge of the establishment of a new sect, but deposed from office for violating his official duties by communicating to others theosophical and philosophic views differing from the doctrines of the Church. He died in 1861, at the villa of his friend the countess von der Gröben. Ebel wrote a number of works, chiefly of a mystic nature, among which are the following: Die Weisheit von Omen (1822);—Der Togensebruch (1824): Die geistliche Erziehung (1825);—Bibeltwarte u. Winke (1827);—Die eigene Entdeckung (1828). A full account of Ebel, his doctrines and followers, is given in Dixon, Spiritual Wares (London and Philadelphia, 1868), where is also printed for the first time a paper by professor Sachs, which was the chief evidence used against Ebel. See also Ebel, ein neuer Lehrmeister im heiligen Schrift (Lepizig, 1838), and Ernst count von Kanitz (follower of Ebel), Ausführung nach Actenquellen, etc. (Basel, 1862). (A. J. S.)
Eben ( Heb. אֶבֶן ebon, stone), stands as a prefix in several geographical names, which designate monuments set up to commemorate certain events [see Stone]: e.g. Eben-bohan; Eben-ezer; Eben-kerer; Eben-zohlekheth.

Eben-bohan. See Bohan.

Eben-ezer. See Ezr.

Eb'en-ezer (Heb. with the art. E'ben ha-E'zer, אֶבֶן הַאֶזֶר, "stone of the help; Sept. ἡ ἀλαταία ἡ ἡμέραν"); Josephus translates λίθος ἡμέρας, the name given to a place marked by a monotonous stone which Samuel set up as a memorial of the divine assistance in battle obtained against the Philistines (1 Sam. vii. 12). See PILLAR. Twenty years before this, the same spot (mentioned in the history under the same name by anticipation of its subsequent designation) witnessed the discomfiture of the Hebrew hosts, the death of the high priest's son, and a pursual of the void hand by the Philistines (1 Sam. iv. 1; v. 1). Its position is carefully defined (1 Sam. vii, 12) as between Mizpeh—"the watch-tower," one of the conspicuous eminences a few miles N. of Jerusalem—and Shen, "the tooth" or "crag," apparently some isolated landmark. Neither of these points, however, is identified with certainty—at least not the latter. According to Josephus' record of the transaction (Ant. vi, 2, 2), the stone was erected to mark the limit of the victory, a spot which he calls Corblege, but in the Hebrew Beth- 
car (q. v.).

Eusebius and Jerome affirm (Onomast. s. v. בֵּית-כָּרָה, Almeiner) that it lay between Jerusalem and Ashkelon, near πανοικισμός ιωνίας, the site of the ancient village called Belec-far. The situation answer in every respect to that assigned to Beth-car; and the name may possibly be an Arab corruption of the latter. It lies in the direct route from Mizpeh to the plain of Philistia, and is just on the borders of the latter province, whence a pursual of the void hand would start (Porter, Handbook for Syn. and Phil., p. 288). But, as this is very far from the probable site of Mizpeh (Nebby-Samwil), it is hardly possible to fix the position of Eben-ezer at that of Beth-car. The monumental stone in question may rather have been set up at the point where the pursual began to dissolve, and we may therefore seek its locality nearer the Israelitish metropolis, possibly at the modern village Bdele, a short distance west of Nebby-Samwil (Robinson, Researches, ii, 133, note). See Shen.

Eben-zelelth. See Zohlekheth.

E'Ber (Heb. id. אֶבֶר, country beyond), the name of five men.

1. (Sept. "Edip," and "Edip," Vulg. "Iber") Ezer (as the name should be Anglicized) was the son of Salah, and father of Peleg, being the third post-deluvian patriarch after Shem (Gen. x, 24; xi, 14; 1 Chron. i, 18, 25). B.C. 2418-1948. He is claimed as the founder of the Hebrew race (Gen. x, 21; Num. xxiv, 24). See Ezer. In Luke iii, 35, his name (E'dip) is Anglicized Eber.

Eber. Paul, a companion of Luther and Melanchthon, and an eminent Hebrew scholar and theologian, was born at Kissingen, Nov. 8, 1511. He received his first instruction from his father, and continued his studies at Anspach. The sudden death of his mother caused his father to recall Paul from Anspach, and while on his way home he was thrown from his horse and became humpbacked. In 1526 he had so far recovered that he could resume his studies at Nuremberg, and in 1532 he entered the university at Wittenberg. Here he was employed as amanuensis to Melanchthon, with whom he became so intimate that he considered him on all important matters, and hence Eber received the name of Philip's Repository (Repositorium Philippi). He was also a faithful disciple of Luther. In 1536 he began to lecture on grammar and philosophy, and in 1541 he accompanied Melanchthon to the Diet at Worms. In 1544 he succeeded Melanchthon in the chair of Greek at Wittenberg, in 1549 dean of the philosophical faculty, and in 1551 rector of the university. After the death of Förster (1556) he was appointed professor of Hebrew and chaplain to the royal chapel at Wittenberg. These positions he soon changed for others, and in 1559 he was made regent-superintendent of the university, and, as doctor of theology, a member of the theological faculty of the university. From this time to the day of his death, Dec. 16, 1560, he devoted himself entirely to theology and to the faithful discharge of his duties as regent-superintendent. After the death of Melanchthon he was regarded as the head of the university. He took large part in the Adiaphoristic and Crypto-Calvinistic controversies, but always showed himself moderate and learned. His principal works are: Expositio Evangelii (Frank, 1576); Calendarium historicum (1531, 4to); Historia populi Judaico a vito ex Babylonico crisi usque ad ultimum evisum Jerusalem (Witich, 1458; new ed. 1562, and trans. into German, French, and Dutch); Unterricht u. Bekenntn. vom h. Sacrament des Leibes u. Blutes unseres Herrn (Witich, 1565); Biblia Veteris Testamenti (Vitemb, 1568); Expositori Evangelii (done by Lechler, 1559, 1576).—Hofer, Neue Biogr. Gntz, 599 sq.; Herzog, Real-Encycl. iii, 618 sq.; Plank, Geach, der protest. Thol. iv, Theil i (Lpz. 1798), 448-529; Sixt, Paul Eber (Heidelberg, 1843, and another book by the same author, Anspach, 1847); Pressel, Paul Eber nach gleichzeitigen Quellen (1863); ibid. 3, 644 sq.

Eberhard, Johann August, a Rationalistic theologian of Germany, was born in 1739 at Halberstadt. He studied theology at Halle, and was in succession preacher at Halberstadt, Berlin, and Charlottenburg. On the latter position he obtained by express order of king Friedrich II. In 1776 he was appointed professor of philosophy at Halle, where he opposed the idealism of Kant and Fichte. He died in 1809. Eberhard is a representative of what is called "the vulgar Rationalistic school" (Vulgir-Rationalismus). He wrote a considerable number of theological, philosophical, historical, and other works. Among his theological works are: Novi Apologia de Sacerdotibus (Berlin, 1772, 9th ed. 1788); Vberbruchung zur natürliche Theologie (Halle, 1781); Geist des Christenthums (Halle, 1807-1808); und Nützlichkeit der Vernunft (Berlin, 1781).—Brockhaus, Conversations-Lex. s. v. (A. J. S.)

Eberlin, Anton, one of the German reformers, was born in Swabia towards the end of the 15th century. He entered the Franciscan order, and was chosen president of the Franciscan convent of Konstanz, from which, in consequence of some difficulties, he was, in 1519, transferred to Ulm. Here he became acquainted with Luther's writings, and having adopted his doctrines, had to leave Ulm in 1521. Repairing to Basle, he became very popular, but was driven away by the bishop of Basle. He found an asylum with Ulrich von Hutten and Francis of Sickening, and wrote with them several works on ecclesiastical and monas-
EBERT, Jacob, an eminent Hebrew scholar, was born at Sprottau in 1494. He was professor of Hebrew and theology at the university then in Frankfort on the Oder, now in Berlin, and at one time its recto magnificus. So versed was he in Hebrew that he could write in that language. He died in 1614. His works are, Historia Jurismentorum (Frankfort on the Oder, 1613); — Institutionum Scripturarum (ibid., 1597); — Electa Hebrew 750 a libro Rabbino Michael Heschonim (1610, 12mo); — Tetra Lectora hebrew in textus exegesis, etc.; — Hoefner, Nouv. Biog. Generale, xxvi, 699 sq. (J. H. W.).

EBERT, Theodor, son of Jacob Ebert (q. v.), succeeded his father as professor of Hebrew at the university in Frankfort on the Oder. He married also the honor of being rector with his father. Ebert died in 1630. Among his principal works are, Vita Christi, tribus de curis rhymorum quadraturorum hebræorum (Frankf., in 1615, 4to); — Animale, pollicita Centuriae (1619, 4to); — Manufactiae auctorat ad discem saeculorum actione (cœxi, 1620, 4to); — Chronologiae hebræorum Læmigg Secerni Doctorum, ab O. C. ad (saeq. psbeatam (1620, 4to); — Eulogia pspsistorum et politicorum quia huncum hebræicam et religiosas orientales eccehersam (1628); — Poëtica Hebraica (1638, 8vo), in which the Hebrew answers are more extensively exemplified than in any other work. — Hoefner, Nouv. Biog. Générale, xxvi, 610; Etheridge, Introd. to Heb. Literature, p. 274.

EBIT'asaph (Heb. Elqaph), אֶבִּיתָסָפָה, prob. a contraction for אֵבִיתֶסָפָה, Abihasapp; Sept., Abihasaph and Ἀβίασαφ, the son of Elkannah and father of Assir, in the genealogy of the Kohathite Levites (1 Chron. vi, 23). B.C. cir. 1660. In ver. 37 he is called the son of Korah, from a comparison of which exegetes (Exod. vi, 24) most interpreters have identified him with the Abihasaph (q. v.) of later passage; but (unless we understand not the three sons of Korah to be meant, but only three in regular descent), the pedigrees of the two cannot be made to tally without violence. See Assir. From 1 Chron. ix, 19, it appears that he had a son named Kore. In 1 Chron. xxvi, 1, his name is abbreviated to ASAPH.

EBONITES, a sect of Judaising Christians who received the doctrines of the Gospel very partially, and denied the divine nature of Christ. They do not appear to have been at any time numerous, and it is doubtful whether they ever obtained such consistency as to have a distinct creed.

1. The Name. — The name is derived from the Hebrew בָּשָׁם, Basham, poor. This term was anciently applied in derision to Christians in general (Epiphanius, adfl. Hier. xxix, 1), and came later to designate Jewish Christians (Origen, cont. Celsum, ii, 1). First (Lexicon, s. v.) makes the derivation refer to Matt. v, 3, making "Ebonites" equivalent to " oppossed pious exiles," meaning a pious tribe. (Vial, ibid., iii, 27) fancifully derives the name from the poverty and meanness of the Ebonite doctrine concerning Christ. — Tertullian (De Praeparet. Haeret., c. xxxiii) derives it from a founder, Ebon, who maintained the authority of the Jewish law, and rejected the miraculous conception and divine nature of spirit. The derivation first given is now generally adopted.

2. History. — Dörner (Person von Christ, Edinb. transl. i, 189 sq.) in German Ebonit tendency as far back as the Epistle to the Hebrews. "From that zeal for the law with which Paul had to contend, the Judaizing spirit was led not at first to impeach the Christology, but rather the Soteriology, or the work of Christ. But the historical importance of the Jewish law showed itself. The party which the Epistle to the Hebrews had in view must have over-estimated the law of the O. T. regarding holy times, places, acts, and persons alike, and have been wanting in the Christian knowledge which knows how to secure to the O. T. its abiding significance, which it has as a divine institute without imperilling the newness and conclusive completeness of Christianity." Epiphanius traces the origin of Ebonitism to the Christians who fled to Pella after the destruction of Jerusalem, A.D. 66 (adfl. Hier. xxix, 1). According to Hesychius (Hist. Eccl., iv, 22), one Theodore of Alexandria, excommunicated by the bishops of the second century, "began to corrupt the Church secretly on account of his not being made a bishop." "We find the sect of the Ebonites in Palestine and the surrounding regions, on the island of Cyprus, in Asia Minor, and even in Rome. Theodore and most of his Ebonites Christians also sometimes attached themselves to it. It continued into the fourth century, but at the time of Theodoret was entirely extinct. It used a Hebrew Gospel, now lost, which was probably a corruption of the Gospel of Matthew" (Schaff, Church History, i, § 68, p. 214).

3. Doctrines. — Dr. Schaff sharply distinguishes Ebonism from Gnosticism as follows: "Ebonism is a Judaizing, pseudo-Petrine Christianity, or a Christianizing Judaism; Gnosticism is a paganizing or pseudo-Pauline Christianity, or a pseudo-Christian heathenism. The Ebonist is a particular division of the Christian religion; the latter a vague expansion of it" (Church History, i, § 67).According to the same writer, "the characteristic marks of Ebonism in all its forms are, degradation of Christianity to the level of Judaism, the principle of the universal and perpetual validity of the Mosaic law, and eminence to the apostle Paul. But, as there were different sects in Judaism itself, we have also to distinguish at least two branches of Ebonism, related to each other, as Pharisaism and Esseniism, or, to use a modern illustration, as the older desist and the speculativistic rationalism of the two schools of Unitarianism in England and America. (1.) The common Ebonites, who were by far the more numerous, embodied the Pharisaic legal spirit, and were the proper successors of the Judaizers opposed in the epistle to the Galatians. Their doctrine may be reduced to the following propositions: (a) Jesus is, indeed, the promised Messiah, the son of David, and the supreme lawgiver, yet a mere man, like Moses and David, sprung by natural generation from Joseph and Mary. The sense of his Messianic calling first arose in him at his baptism by John, after he was exalted higher and higher by the Holy Spirit. Hence Origen compared this sect to the blind man in the Gospel who called to the Lord without seeing him, 'Thou son of David, have mercy on me!' (b.) Circumcision and the observance of the whole ritual law of Moses are necessary for salvation for all." (c.) Paul is an apostate, higher and higher, and all the apostles, for the worst we cannot be discarded. The sect considered him a native heathen, who came over to Judaism in later life from impure motives. (d.) Christ is soon to come again to introduce the glorious millennial reign of the Messias, with a Kingdom of God, which shall with power and great glory come out of Jerusalem for the establishment of the Kingdom.

The second class of Ebonites, starting with Esseniistic notions, gave their Judaism a speculative or theosophic stamp, like the heretics of the Epistle to the Colossians. They form the stepping-stone to Gnosticism.
Among these belong the Elkesalites" (Schoff, Ch. Hist. i, § 68, 214 sq.). The pseudo-Clementine homilies teach a speculative form of Ebionism, essentially Judaizing in spirit and aim [see Clementines, ii. p. 588; and contrast the letter of Polycarp, i. 10, 11; 20; Dorrer, Person of Christ, Edinb. trans., p. 293 sq.).

4. Ebionism has reappeared, since the Reformation, in Socinianism (q. v.), and in the other forms of what is called Unitarianism (q. v.). Some Unitarian writers have undertaken to show that Ebionism was the original form of Christian doctrine, and that the Church dogma of Christ is the product of development; so Priestley, in his History of the Corruptions of Christianity (Birmingham, 1782). Bishop Horsley replied to Priestley in his Charge to the Clergy of St. Albans (1783), and in other tracts, collected in Tracts in Controversy with Dr. Priestley (Dundee, 1812, 3d ed.).

Horsley, in this controversial criticism of Dr. Bull's learned treatment of the subject in his reply to Zwickler (see Bull, On the Trinity, Oxford, 1855, 8 vols. i. 116, ii. 376; iii. 175 et al. See also Waterland, Works, Oxf. 1848, 6 vols. iii. 554 sq.). A far abler advocate of the Socinan view is Baur, in his Christenthum d. drei ersten Jahrhunderte; Lehre u. d. Dreieinigkeit Gottes; Dogmen-geschichte, etc. Baur's position is clearly stated, and refuted by professor Fisher (Am. Prob. and Theol. Rev. Oct. 1864, art. i). "Baur agrees with the old Socinians in the statement that the Jewish Christianity, which with Baur is identical with the Judaizing or Ebionite element; and this type of Christianity prevailed through the larger part of the second century. (See Fisher, i. c., for a criticism of this view, and for a brief but luminous sketch of Ebionism. On the other side, see N. Amer. Rev. April, 1864, p. 569 sq.)

Ebnerian Manuscript (Codex Ebnerianus), usually designated as No. 105 of the Gospels, 48 of the Acts, and 24 of the Pauline Epistles), a beautiful curvilinear Greek MS. of the entire N. T. except Rev., consisting of 125 quarto vellum leaves; assigned to the 12th or 13th century, formerly belonging to Schöner of Eschenbach, of Nuremberg, and now in the Bodleian Library (No. 136). A fac-simile and description are given by Tregelles, in Horne's Intro. p. 220. See Manuscripts, Biblical.

Ébodos (Egypt.), a city mentioned only by Ptolemy (xvii. 18) as situated in the sea-board quarter of Arabia Petræa (see Reland, Phot. p. 463), in 652° and 152°, and in the river Agathopolis, as lying on the Roman road 25 Roman miles S. of Elusa (q. v.). Dr. Robinson (Researches, i. 287) discovered the site in the modern el-Abdâb (otherwise Avjac, ib. p. 560), eight hours from the site of Elusa, at the junction of Wady es-Swamm with Wady el-Birein (ib. p. 294). It contains extensive ruins, situated on a rocky ridge on the Roman road 25 Roman miles S. of Elusa (q. v.). Dr. Robinson (Researches, i. 287) discovered the site in the modern el-Abdâb (otherwise Avjac, ib. p. 560), eight hours from the site of Elusa, at the junction of Wady es-Swamm with Wady el-Birein (ib. p. 294). It contains extensive ruins, situated on a rocky ridge on the Roman road 25 Roman miles S. of Elusa (q. v.). Dr. Robinson (Researches, i. 287) discovered the site in the modern el-Abdâb (otherwise Avjac, ib. p. 560), eight hours from the site of Elusa, at the junction of Wady es-Swamm with Wady el-Birein (ib. p. 294). It contains extensive ruins, situated on a rocky ridge on the Roman road 25 Roman miles S. of Elusa (q. v.). Dr. Robinson (Researches, i. 287) discovered the site in the modern el-Abdâb (otherwise Avjac, ib. p. 560), eight hours from the site of Elusa, at the junction of Wady es-Swamm with Wady el-Birein (ib. p. 294). It contains extensive ruins, situated on a rocky ridge on the Roman road 25 Roman miles S. of Elusa (q. v.).
confine one to the lands of our empire and dominion) as farre as to the island Meroeb, for the space of 996 miles, there is little eben found: and that in all those parts between the few other trees to be found but date-trees, which peradventure may be a cause that eben was counted a rich tribute, and observed the third portion, after gold and ivory" (Holzheimer's Flora, ii. 4). It is sometimes stated that the ancient supposed ebony to come only from India. This arose probably from the passage of Virgil (Georg. ii. 117): "Sola India nigrum fert ebenum." But the term "India" had often a very wide significance, and included the whole of Ethiopia, the purely Arabic "Ethiopia," however, mention both Indian and Ethiopian ebony, as Dioscorides and Pliny; while some mention the Indian, and others the Ethiopian only, as Lucas (Phars. x. 304): "Nigritis Merœcæ secunda colonia, leta comis eboni." The only objection to the above conclusion of any weight, is that Achmea is in the plural form. To this Bochart and others have replied, that there were two kinds of ebony, as mentioned by Theophrastus, Dioscorides, etc., one Ethiopian, the other Indian. Fuller and others maintain that the plural form is employed because the ebony was in pieces; whereas, "ginna palangas, que ex India et Ethiopia magnu numero afferebantur." "Philagynus vocant Herodotus et Arabianus in Peripoli. Plinius palangas, aut philaganes, varietate scriptura, id est, fustos teretes, et qui navibus supponunt, aut quisque idem onus plures bauitant" (Bochart). This view was received by the foreign authors. Of Woods, as Shittim and Almugumm, are also used in the plural form. Besides abrus, Arab authors, as stated by Bochart (l. c.), mention other words as similar to and substituted for ebony: one of these is called alsi, also xemas and xemasin, in the plural form semasian, described as "nigrum lignum ad palangas conferendam." Hence, in the Koran, those who are tormented in Gehenna, it is said, will issue from the fire after a certain period of confinement in it: "They will go forth, I say, like the wood semasian," that is, black, from being burnt in the fire. Such a wood was known we have the testimony of Dioscorides: "Some sell semasina or scanthine wood for ebony, as they are very similar." Some critics, and even Sprengel, in his late edition of Dioscorides, read exevius instead of oxiinov, for no other reason apparently but because xevius was a substance which Egyptian arms are acquainted with, whereas, semasina is only known to those who consult Oriental writers, or who are acquainted with the products of the East. Bochart rightly reprehends this alteration as being unnecessary, in view of the existence of so many words, easily made use of among the modern Arabs, and cites a notice of Arrian to the same effect (Bochart, l. c.). The above word is by Dr. Vincent translated semasium; but this is a herbaceous oil-plant.

If we look to the modern history of ebony, we shall find that it is still derived from more than one source. Thus Mr. Holtzappel, in his recent work on Turning, describes three kinds of ebony. (1.) One from the Mauritius, in round sticks like scaffold poles, seldom exceeding fourteen inches in diameter, the blackest and finest in the grain, the hardest and most beautiful. (2.) The East Indian, which is grown in Ceylon and the Peninsula of India, and exported from Madras and Bombay in logs from six to twenty, and sometimes even twenty-eight inches in diameter, and also in planks. This is less wasteful, but of an inferior grain and color to the above. (3.) The African, shipped from the Cape of Good Hope in billets, the general size of which is from three to six feet long, three to six inches broad, and two to four inches thick. This is the least wasteful, as all the refuse is left behind; but it is the most porous, and the worst in point of color. No Arabian ebony is exported; this, however, is more likely to be owing to the different routes which commerce has taken, although it is again returning to its ancient channels, than to the want of ebony in the ancient Ethiopia. From the nature of the climate, and the existence of forests in which the elephant abounds, there can be no doubt of its being well suited to the group of plants which have been found to yield the ebony of Mauritius, Ceylon, and India, the genus Diospyros of the family Ebenaceae; several species yield varieties of ebony as their heart-wood, as D. ebenum in the Mauritius, and also in Ceylon, where it is called kulacora. It is described by Retz as "folis ovato-lanceolatis, acuminatis, gemmis hirtis;" and he quotes as identical D. globerrima (Fr. Rothb. Nov. Act. Hort. ii. 540, tab. 6). D. ebenum yields the bastard ebony of Ceylon, and D. hirsuta the Calamander wood of the same island, described by Mr. Holtzappel as of a chocolate-brown color, with black stripes and marks, and stated by him to be considered a variety of "D. enebra," the true ebony of Ceylon, a stock of the is the ebony-tree of Coromandel, and is figured among Coromandel plants (l. No. 46); it grows to a large tree in the mountainous parts of Ceylon, and in the Peninsula of India—in Malabar, Coromandel, and Orissa. The black part of the wood of this tree alone forms ebony, and is found only in the centre of large trees, and varies in quantity according to the size and age of the tree. The outside wood is white and soft, and is soon destroyed by time and insects, leaving the black untouched (Roxb. Fl. Ind. ii. 580). Besides these, there is in the Peninsula of India a wood called blackwood, by the native name of Faam, which grows on foreign trees; it grows to an immense size, is heavy, close-grained, of a greenish-black color, with lighter-colored veins running in various directions. It is yielded by the Dalbergia latifolia. To the same genus belongs the Siam, one of the most valued woods of India, and of which the tree has been called Dalbergia siamensis. The wood is remarkably strong, of a light grayish hue, with darker-colored veins. It is called siam and shihium by the natives of India. This is the name which we believe is referred to by Arab authors, and which also appears to have been the original of the semasina of Dioscorides and of the Peripoli. The name may be applied to other nearly allied woods, and therefore, perhaps, to that of the above D. latifolia. It is a curious confirmation of this that Forskal mentions that in his time shihium, with teak and ebony, was among the woods imported from India and Arabia. It is satisfactory to have apparently such competent confirmation of the general accuracy of ancient authors, when we fully understand the subjects and the products of the countries to which they allude. According to Mr. E. Tennent (Ceylon, i. 116) the following trees yield ebony: Diospyros ebenum, D. reticulata, D. ebenus, and D. hirsuta. The wood of the first-named tree, which is abundant throughout all the flat country to the west

Branch of Diospyros Ebenum.
EBRARDUS, an author and theologian of Béthune, in France, who lived during the latter part of the 12th century and the beginning of the 13th. He is known only by his writings. One of the principal of these, his Grecismus, a collection of rules of rhetoric, prosody, grammar, and logic, was for many years used as a text-book by the theological schools. These were Liber antiochenus against the Cathari, which was first published under the title Contra Waldenses in Greter's Trias scriptorum contra Waldenses (Ingolstadt, 1614, 4to), and reprinted in Bibli. Patr. Max. (of Lyons, vol. xxiv), and lastly in Greter's Opera Omnia (vol. xii, part ii).—Horae. Real-Encyclopadie, iii, 925.

Ebrarmer or Ebrarmer, the third Latin patriarch of Jerusalem, was born at Cicon, near Terronan, towards the close of the 11th century. Admitted by Lambert, bishop of Arras, to the priesthood, he joined the first Crusaders, and was of the number appointed by Godfrey de Bouillon canon at the holy sepulchre. In 1112, at the behest of Daimbert (q. v.), he was elevated to the patriarchate, in which, after much contention on the part of Daimbert, he was solemnly confirmed by the decree of a council. He was a member of the Council of Nablous (1120), and in 1123 signed the treaty between the crusading princes and the Venetians. A letter of this period, signed by Lambert of Arras, is contained in the 5th vol. of the Miscellanea of Baluze.—Hoefcr, Nouv. Biog. Generale, xvi, 618.

Ebron (Heb. Abromokh, אבְּרֹוקָה, πασσάγε, i. e. of the sea; Sept. 'Ephoam,' the thirtieth station of the Israelites on their way from Egypt to Canaan (Num. xxxiii, 34, 35). Since it lay near Ezion-Gaber on the west, as they left Jotapata, it was probably in the plain now known as the Kân’a-n-Nabk, immediately opposite the pass of the same name at the head of the Elanitic branch of the Red Sea (see Robinson's Map in Researches, vol. i). Rommel (in the Hall. Encyclop. i, 167) compares the Arrou of Piolomy (v. 17), in Ara- lia Petraea (66° 10' and 29° 40'), with the Harours of the Peutinger Table; a very improbable supposition. Knobel thinks (Ency. Hamb., in loco) that the Ezion-Gaber in question cannot be the port of that name at the head of the Elanitic Gulf; for, as the next station mentioned is Kadesh, this was too far from the north end of the gulf to be reached in one march; but this objection is of little force, as there is no uniformity in the intervals between the stations. Schwarz (Puteat. p. 213) rightly regards Ebron as merely the name of a "ferry," by which the people perhaps crossed this arm of the sea (?) or where travellers usually crossed it.

Ebutius (wEbətjus), a decurion (εἰκέφυρχ), and a person distinguished for good conduct and prompt action, who was sent with Placidus by Vespasian to invest Jotapata while garrisoned by Josephus (Josephus, War, iii, 7, 9). He was slain while defending Vespasian was a furious salary during the siege of Gamala (6e. iv, 1, 5).

Ecbas'num (Vulg. id., Gr. text being lost), one of the five swift scribes who were selected to attend Ebdras (2 Esdr. xiv, 24).

Ecbatana (1 Esdr. vi, 28) or "Ecbatum" (vada 'Ecbarāvā, 2 Macr. i, 3), Judith i, xlii; Tob. 9, etc.; comp. Josephus, Ant. xii, 17, 7; xi, 4, 6; 'Aȳlera- clown of Ctesias i; Herod. ii, 98; ii, 153), the metropolis of Media (Curt. v, 81), situated 88° and 27° 45', according to Ptolemy (vii, 2, 14), and after the time of Cyrus (Herod. ii, 622 sq.; Tassaun. iv, 21; Xenoph. Cyr. v, 6, 22; Tact. iii, 5, 15) two months in the year the residence of the Persian (later the Parthian) kings. It is somewhat doubtful whether the name of this place is really contained in the Hebrew Scriptures. Many of the best commentators understand the expression מָמָה 'Arba in Ezra vi, 2, differently, and translate it in ara, "in a coffin" (see Buxtorf and others, and our English Bible margin). The Sept., however, give in πόλις, "in a city," or (in some MSS.) in ἀμφίτροιν πόλις, which favors the ordinary interpretation. If a city is meant, there is little doubt of one of the two Ecbatanas being intended; for, except these towns, there was no place in the province of Media, "which contained a palace" (דְּמַלַת), or where records are likely to have been deposited. The name Armathax, too, which at first sight seems somewhat remote from Ecbatana, wants but one letter of Hagmatana, which was the native appellation. The earlier and more correct Greek form of the name, too, was Agbatana (see Steph. Byz. p. 19; comp. Vell. Pat. vii, 173). The modern name of the city, "Ascendana," regards the name as Zendish, Aghara-Tamme, "land rising in horses." Hyde (De rer. rer. Pers. p. 541 sq.) compares it with the Persian Aibaden, "cultivated place;" Ilgen (on Tobit, i. c.) regards it as Shemite; compare Syr. Chamasana, "fortress." For other etymologies, see Simonis Onom. V. T. p. 576 sq.; Gesenius, Thes. p. 70.

Two cities of the name of Ecbatana seem to have existed in ancient times, one the capital of Northern Media, the Media Atropatene of Strabo; the other the Metropolis of Media, the larger and more important province known as Media Magna (see Sir R. Harriwell, in the Journal of the Geographical Society, art. ii). The site of the former appears to be marked by the very curious ruins at Takhti i-Sulaiman (lat. 36° 28', 47° 42' E.), to which the latter is commonly referred, which is one of the most important cities of modern Persia. There is generally some difficulty in determining, when Ecbatana is mentioned, whether the northern or the southern metropolis is intended. Few writers are aware of the existence of the two cities, and they lie sufficiently near to one another for geographical notices in most cases to suit either site. The northern city was the "seven-walled town" described by Herodotus, and declared by him to have been the capital of Cyrus (Herod. i, 98-99, 153; comp. Mos. Choren. ii, 94); and it was thus most probably there that the roll was found which proved to Daris that Cyrus had really made a decree allowing the Jews to rebuild their Temple.

Various descriptions of the northern city have come down to us, but none of them is completely to be depended on. That of Zaddaraste (Diod. Fargird II) is the oldest and the least exalted. "Jeushid," it is said, "erected a tower or fortress, sufficiently large, and formed of squared blocks of stone; he assembled in the place a vast population, and stocked the surrounding country with cattle for their use. He caused the water of the great fortress to
Ecbatana
dow forth abundantly. And within the bar, or fortress, he erected a lofty palace, encompassed with walls, and laid it out in many separate divisions, and therein no place was found from front or rear, to command and overawe the fortress." Herodotus, who ascribes the foundation of the city to his king Deioces, says: "The Medes were obedient to Deioces, and built the city now called Agbatana, the walls of which are of great size and strength, rising in courses one within the other. The plan of the place is that each of the walls should out-top the one beyond it by the battlements. The nature of the ground, which is a gentle hill, favors this arrangement in some degree, but it was mainly effected by art. The number of the circles is seven, and the towers standing within the last. The circuit of the outer wall is nearly the same with that of Athens. Of this outer wall the battlements are white, of the next black, of the third scarlet, of the fourth blue, of the fifth orange: all these are colored with paint. The last two have their battlements respectively with silver and gold. All these fortifications Deioces caused to be raised for himself and his own palace. The people were required to build their dwellings outside the circuit of the walls" (Herod. i, 98, 99). Finally, the book of Judith, probably the work of an Alexandrian Jew, professes to give a number of details, which appear to be drawn chiefly from the imagination of the writer (Jud. i, 2-4).

The peculiar feature of the site of Tukki-i-Salehman, which it is proposed to identify with the northern Ecbatana, is a conical hill rising to the height of about 150 feet above the plain, and covered both on its top and sides with massive ruins of the most antique and picturesque character. A perfect cone, formed of large blocks of squared stone, may be traced round the entire hill along its brow; within there is an oval inclosure, about 800 yards in its greatest and 680 in its least diameter, covered with ruins, which cluster round a remarkable lake. This is an irregular basin, about 300 paces in circuit, filled with water exquisitely clear and pleasant to the taste, which is supplied in some unknown manner from the springs which stand uniformly at the same level, whatever the quantity taken from it for irrigating the lands which lie at the foot of the hill. This hill itself is not perfectly isolated, though it appears so to those who approach it by the ordinary route. On three sides—the west, the south, and the north—the acclivity is steep, and the height above the plain uniform; but on the east it abuts upon a hilly tract of ground, and here it is but slightly elevated above the adjoining country. It cannot, therefore, have ever answered exactly to the description of Herodotus, as the eastern side could not any how admit of seven walls of circumvalation. It is doubtful whether even the other sides were thus defended. Although the flanks on these sides are covered with ruins, "no traces remain of any wall but the upper one" (As. Jour. x, 52). Still, as the nature of the ground on three sides would allow this style of defense, and as the account in Herodotus is confirmed by the Armenian historian, writing clearly without knowledge of the earlier author, it seems best to suppose that in the peaceful times of the Persian empire it was thought sufficient to preserve the upper enceinte, while the remains of the other sides fell into decay, and ultimately were superseded by domestic buildings. With regard to the coloring of the walls, or, rather, of the battlements, which has been considered to mark especially the fabulous character of Herodotus's description, recent discoveries show that such a mode of ornamentation was actually in use at the period in question in a neighboring country. The temple of the Seven Spheres at Borissipa was adorned almost exactly in the manner which Herodotus assigns to the Median capital (see BABEL, TOWER ON); and it does not seem at all improbable that, with the object of placing the city under the protection of the seven planets, the seven walls may have been colored nearly as described. Herodotus has a little deranged the order of the hues, which should have been either black, orange, scarlet, gold, white, blue, silver—as at the Borissipa temple—or black, white, orange, blue, scarlet, silver, gold—if the order of the days dedicated to the planets was followed. Even the use of silver and gold in external ornamentation—which seems at first sight highly improbable—is found to have prevailed. Silver roofs were met with by the Greeks at the southern Ecbatana (Polybius, x, 27, 10-12); and there is reason to believe that at Borissipa the gold and silver stages of the temple were actually coated with those metals. (See Rawlinson, Herodotus, i, 185.)

Plan of Ecbatana.

The northern Ecbatana continued to be an important place down to the 13th century after Christ. By the Greeks and Romans it appears to have been known as Gazu, Gizaza, or Cazaza, "the treasure city," on account of the wealth laid up in it, while by the Orientals it was termed Shez. Its decay is referable to the Mogul conquests, c. A.D. 1200; and its final ruin is supposed to date from about the 15th or 16th century (As. Soc. Journ. x, pt. i, 49).

In the 26th book of Macalbeses (ix, 3, etc.), the Ecbatana mentioned is undoubtedly the southern city, now represented both in name and site by Hamadan. This place, situated on the northern flank of the great mountain called formerly Orontes, and now Elwend, was perhaps as ancient as the other, and is far better known in history. If not the Median capital of Cyrus, it was, at any rate, regarded from the time of Darius Hystaspis as the chief city of the Persian empire (Propyl. x, 27). It was afterwards recognised as the metropolis of their empire by the Parthians (Oros. vi, 4). During the Arabic period, from the rise of Bagdad on the one hand and of Isfahan on the other, it sank into comparative insignificance; but still it has never descended below the rank...
of a provincial capital, and even in the present de-
pressed condition of Peru it is a city of from 20,000
to 30,000 inhabitants. The Jews, curiously enough,
regard it as the residence of Ahasuerus (Xerxes ?)—
which in Scripture declared to be Susa (Esth. 1, 2;
ii, 8, etc.)—and show within its precincts the tombs of
Esther and Mordecai (Ker Porter, ii, 105-110). It
is not distinguished by any remarkable peculiarities
from the other cities of its class.

The Echecnas of the book of Tobit is thought by
Sir H. Rawlinson to be the northern city (see As.
Soc. Journ. X, i, 137-141). See ACHMETHA.

Eccard. See ECKHARD.

Boco Homo, a name given in art to pictures rep-
resenting the suffering Saviour as described in John
xix, 5: "Then came Jesus forth, weariyng the crown
of thorns, and the purple robe. And Pilate sat un
then, Behold the man!" It is a comparatively re-
cent subject in art, dating from the 15th century.
There are two forms of it, viz. the devotional picture,
which offers the single head, or half-figure of Christ, to
our contemplation, as the "Man of Sorrows" of the Pas-
ion, and the more or less historical picture, which ei-
erally places him before us attended by Pilate and one
or more attendants, or gives the full scene in numer-
ous figures. For an account of them, see Jamieson,
History of our Lord in Art, ii, 92 sq.

Echclensis or Echelensis, Abraham, a Mas-
onecian doctor, was born at Eczel, Syria, and was
educated in Rome, where he afterwards taught the
Syrian and Arabic languages. In 1630 he was called
to Paris to assist in the preparation of the great Pol-
yclot Bible of Le Jay. For this work Echclensis fur-
nished Rashi in Syrian and Arabic, with a Latin trans-
literation, and the 8d book of Menachem in Arabic.
He undertook also the revision of the Syrian and Arabic
texts, and the Latin versions contributed by Gabriel
Sionita. He returned again to Rome to fill the chair
of Oriental languages offered in that city, and died
there in 1637. Books are numerous; among the
most important are, Linguarum sive Chaldaisorum
perspectiva Studioso Institution (Rome, 1628, 4to).

Sy-
nopsis prophetariorum sapientiarum Arabum inscrip-
ti episcoporum mundum reperientis, ex arabo sermone latini juris
ficta (Par. 1641, 4to):—Sancti Antonii Magni Episcopi
nascentium (Paris, 1641, 8vo):—Concilii Nicaenum II.
acta, etc. (Par. 1614, 8vo):—Sanctorum et mysticae
regulæ, sermone, sermones, admonitiones, responiones, et vita
duplex (Paris, 1646, 8vo):—Sancti Sapientiae, sive ad
scientiam comparationem methodos (Par. 1646):—De
Proprietatis et virtutum medicis omniq. sanctis utraque
instructum (Paris, 1647, 8vo):—Chronicon orientale nunc
primum latinitate donatum cui accessit supplementum Historie
orientalis (Paris, 1655, fol.):—Catalogus librorum Chaldähorum,
tum ecclesiasticorum quam professorum, autore Hubel-Jerem
(Rome, 1653, 8vo), with notes:—Concordantia autem
humanarum orientalis et fidei catholici dogmate
(Mayence, 1655, 8vo).

In this book he seeks to harmonize the sentiments of the Orientals with those of the Roman Church. Leo Allatius assisted him in his work. De Origine nominum Popae... ve de ejus præme
(nota, 1642, 4to), and Ezechielis scriptura (Paris, 1647,
8vo), were works written in the controversy against the Protes-

Ecclesiae Sistatæ, the fourth of the poetical books in
the English arrangement of the O. T., and one of those
usually attributed to Solomon. In the Heb. Bible it is
the last book of the first part of the proph-
ecographia, הַקְּדִישָה, or fourth division of the Jewish
Scriptures. In the Sept. and Vulg. it is placed be-
tween Proverbs and Canticles, as in the A. V. See
BRM.N. It is the fourth of the five Megillot (q. v.)
or Rolls of the Hebrew Bible, and is supposed to be read at the Feast of Tabernacles. The form
of the book is poetico-didactic, without the subtility
of the beautiful parallelism and rhythm which charac-
terize the older poetic effusions of the inspired
writings. The elegance of vigor and charm is manifest
even in the greatest portion of this book (xii, 10),
where the sacred writer rises above his usual level.
(See generally, Berest, in Eichhorn's Bibliothek, x,
955-84; Paulus, in his Neues Testament, i, 201-65;

1827; Muhlert, Palaeogr. Beiträge, p. 192 sq.; Hart-
mann, in der Wiss. Zeitschr. i, 29, 71; Ewald, Ueb. d.
Prediger, Gott, 1826; Umbri, in der Stud. u. Krit.
1849; Bruch, Wissensch.-Lehre der Hebräer, Strassburg,
1861.) See SOLOMON.

I. Title.—The Heb. name is הַקְּדִישָה, Kodesh Lecheth, and is evidently taken from the designation which the writer himself assumes (ch. i, 2, 27; vii, 27; xii, 8, 9, 10; Sept. ezkodsho, Vulg. ecclesiae, Auth. Vers.
"preacher"). It is the particle of הָכִּדָּשׁ, kadosh (cognate with הָכֵדָשׁ, vace, Greek καθίσμα, Eng. call), which properly signifies to call to aether a religious assembly (hence הָכִּדָּשָׁה, a congregation). The apparent anomaly of the feminine termination signifies that the abstract noun has been transferred from the office to the person holding it (so the Arab. kalifah, etc.; see Gesenius, Thes. Heb. p. 1199, 1280), and has thus become capable of use as a masculine proper name, a change of meaning of which we find other instances in
Sophereth (Neh. vii, 57), Pochereth (Ezra ii, 57); and hence, with the single exception of Eccles. vii, 27, the noun, notwithstanding its form, is used throughout in the masculine. Ewald, however (Poet. Bick. iv, 189), connects the feminine termination with the noun מָתַנְתָּה (wisdom), understood, and supposes a poetical license in the use of the word as a kind of symbolic proper name, appealing to Prov. xxx. 1; xxxi. x, as examples of a like usage. As connected with the root קְדִישָה, the word has been applied to one who speaks in an assembly
and there is, to say the least, a tolerable agreement in favor of this interpretation. Thus we have the comment of the Midrash, stating that the writer thus designates himself "because he is spoken in the assembly" (quoted in Preston's Ecclesiastes, note on i, 1); the rendering ttscekddsho, which is by the Sept.; the adoption of this title by Jerome (Pref. in Ecol.), as meaning "qui custum, i.e. ecclesiam congre-
gat, quem nos nuncapere possimus Conciliatorum" the use of "Prediger" by Luther, or "Preacher" in the A. V. On the other hand, taking קְדִישָה in the sense of collecting things, not of summoning persons, and led perhaps by his inability to see in the book itself any greater unity of design than in the chapters of
Proverbs, Grotius (in Ecclus. i, 1) has suggested סְעוּרָה
םֶשָּׁר (computer) as a better equivalent. In this he
has been followed by Herder and Jahn, and Mendels-
sohn has adopted the same rendering (notes on i, 1, and vii, 27, in Preston), seeing in it the statement partly that the writer had compiled the sayings of wise men who had gone before him, partly that he was, by an inductive process, gathering truths from the facts of a wide experience. The title of the book, however, indicates that the author did not write only for a literary public, but that he had in view the whole congregation of the Lord; and that his doctrine was not confined within the narrow bounds of a school, but belonged to the Church in its totality (comp. Psa. xliv, 2-4). Solomon, who in Kings viii is described as עֲנִיִּית הַקְּדִישָה as the people to hold communion
with the Most High in the place which he erected for this purpose, is here again represented as the gatherer (טיות) of the people to the assembly of God. It must, however, be borne in mind that, though Solomon is a representative of the people, he does not lose his individuality. Hence he sometimes describes his own experience (comp. i, 16, 17; ii, 9, 12; vii, 23, etc.), and sometimes utters the words of Wisdom, whose organ he is, just as the apostles are sometimes the organ of the Holy Ghost (comp. Acts vii, 28).

Against the common rendering of טוות by preacher or Ecclesiastes, which is supported by Devaux, Gese-
nius, Knobel, Hertzfeld, Stuart, etc., it has been urged:

(1.) The verb טוות does not properly include the idea of preaching: such, however, would naturally be its derived import, inasmuch as popular assemblies are usually convened for the purpose of being addressed.

(2.) It ascribes to Solomon the office of preacher, which is nowhere mentioned in the Bible; it is too modern a title, and is inconsistent with his character, if not with the contents of the book: this, however, only applies to the title in its modern sense, and not to that above generic view.

(3.) It destroys the connection between the design of the book and the import of this symbolic name: this again depends upon the preconception as to the design of the book; the import, as above explained, is not unsuitable. Moresuitable is it, perhaps, to take it as neither a name of rank nor of office, but simply describes the act of gathering the people together, and can, therefore, not come within the rule which the advocates of the rendering preacher or Ecclesiastes are obliged to urge. The construction of the feminine ver. 17, is incompatible with this view.

c. Abstracts are never formed from the active participle; and, d. There is not a single instance to be found where a concrete is first made an abstract, and then again taken in a personal sense. These objections are too minute to be of much force, and are overruled by the peculiar use and application of this word, which occurs nowhere else.

The other explanations of Koheleth, viz., Gatherer or Acquirer of wisdom, and Solomon is called by this name because he gathered much wisdom (Rashi, Rashbam, etc.); Collector, Compiler, because he collected in this book divin experience, wisdom for the good of mankind (Grotius, Mayer, Mendelssohn, etc.); Eclectic, εὐσεβείς, a name given to him in this place because of his skill in selecting and purifying from the systems of different philosophers the amassed wisdom of the past in this book (Rosenthal); Accumulated wisdom—and this appellation is given to this book, and Wisdom was accumulated in him (Aben-Ezra); The Ros-enthal, the Gathered State of his heart (Coccetti, Schultens, etc.); An assem-bly, an academy—and the first verse is translated "The sayings of the academy of the son of David" (Döderlein, Nachtigal, etc.); An old man—and Solomon indicates by the name Koheleth his weakness of mind when, yielding to his wish, he worshipped idols (Simonis Lex. Heb. v. s.; Schmidt, etc.); Exclaiming voice, analogous to the title assumed by John the Bap-tist—and the words of the inscription ought to be ren-dered, "The words of the voice of one exclaiming" (De Dieu); So, according to the primitive signification of the word, which implied a certain amount of philo-sophy and rhetoric (Devaux); Philosopher or Mor-alist (Sphohn, Gaab, etc.); The departed spirit of Solomon introduced as speaking throughout this book in the form of a shadow (Augusti, Einleit in d. A. T. p. 210); Koheloth is the feminine gender, because it refers to עמה, the intellectual soul, which is understood (Rashi, Rashbam, Ewald, etc.); it is to show the great excellency of the preacher, or his charming style which this gender indicates (Lorinus, Zirkel, etc.), because a preacher travels, as it were, like a mother, in the spiritual birth of her children, and has tender and motherly affection for his people, a similar expression being found in Gal. iv. 19 (Pineda, Mayer, etc.); it is to describe the infirmity of Solomon, who appears here as worn out by old age (Erciser; Simonia, etc.); it is used in a neuter sense, because departed spirits have no specific gender (Augusti); the termination נ is at all feminine, but, as in Arabic, is used as an azaeza; etc., etc., etc., etc. We believe that the simple enumeration of these explanations will tend to show the weakness of a vague, fanciful, and inappropriateness. (See Dindorf, Qanmomo wumen Cohelot Solomonim tributur, Lpz. 1791.)

II. Author and Date.—These have usually been re-garded as determined by the account that the writer gives of himself in ch. i and ii, that it was written by the only "son of David" (i, 1), who was "king over Israel in Jerusalem" (i, 12). According to this, we have in it what may well be called the Confessions of king Solomon, the utterance of a repentance which some have even ventured to compare with that of the 51st psalm. This authorship is corroborated by the unquestionable intentions manifested throughout the book to particular circumstances connected with the life of the great monarch (compare chap. i, 16, etc., with 1 Kings iii, 12; chap. ii, 4-10, with 1 Kings v, 27-22; vii, 1-8; ix, 7-19; x, 14-29; ch. vii. 20, with 1 Kings viii, 46; chap. xii, 9, with 1 Kings iv, 30). Additional internal evidence has been found for this belief in the account of vii, 26-28, as harmonizing with the history of 1 Kings xi, 3, and in an interpretation (somewhat forced perhaps) which refers iv, 13-15 to the murmurs of the people against Solomon, and the piety of Jero-boam as the comfort of the people, already recognized as their future king (Mendelssohn and Freudenthal).

The belief that Solomon was actually the author was, it need hardly be said, received generally by the Rabbinic commentators, and the whole series of Patristic writers. The apparent exceptions to this in the passages by Talmudic writers, which assign the authorship to Hezekiah (Raba Bathera, c. i, fol. 15) or Isaiah (Shohah. Hakka. fol. 66 b, quoted by Michaelis), can hardly be un-derstood as implying more than a share in the work of editing, like that claimed for the "men of Heze-kiah" in Prov. xxv. 1. Grotius (Prof. in Ecles.) was indeed almost the first writer who called it in question, and started a different hypothesis.

It may seem as if the whole question were settled for all who recognise the inspiration of Scripture by the statement, in a canonical and inspired book, as to its own authorship. The book purports, it is said (Preston, Proleg. in Eccles. p. 5), to be written by Sol-omon, and to doubt the literal accuracy of this statement is to call in question the truth and authority of Scripture. To many it has appeared questionable, however, whether we can admit an a priori argument of this character to be decisive. The hypothesis that every such statement in a canonical book must be re-ceived as literally true, is, in fact, an assumption that inspired writers were debared from forms of composition which were open without blame to others. In the literature of every other nation the form of person-ated authorship, where there is no mention of another, has been recognised as a legitimate channel for the expression of opinions or the quasi-dramatic representation of character. Hence it has been asked, Why should we venture on the assertion that, if adopted by the writers of the Old Testament, it would have made them guilty of a falsehood, and been inconsistent with their inspiration? The question of authorship does not involve that of canonical authority. A book written by Solomon would not necessarily be inspired and canonical. It is said that there is nothing that need startle us in the thought that an inspired writer might
use a liberty which has been granted without hesitation to the teachers of mankind in every age and country. Accordingly, the advocates of a different authorship of the books in question that of Solomon feel themselves at liberty to discard these statements of the text as mere literary devices.

They argue that in like manner the book which bears the title "Wisdom of Solomon" asserts, both by its title and its language (vii, 1-21), a claim to the same authorship, and, though the absence of a Hebrew original led to its exclusion from the Jewish canon, the authorship of Solomon was taken for granted by all the early Christian writers who quote it or refer to it. It has also been asserted that the phrase "words of the wise" in the Hebrew text as the standard of canonicity, and by not a few afterwards. But in reply to this it may justly be said that the traditional character of the two books is so different as to defar any comparison of this kind. See Wisdom, Book of.

The following specific objections have been urged against the Solomonic and for the personated authorship of this book. 1. All the other reputed writings of Solomon have his name in the inscription (comp. Prov. i, 1; Song of Songs, i, 1; Psa. lxxxvii), whereas in this book the name of Solomon is studiously avoided, thus showing that it does not occur as its actual author. Yet he gives other equally decisive intimations of his identity, and the peculiar character of the work sufficiently accounts for this partial concealment. Moreover, in some of his other undoubted writings he employs similar nomen de plane (Prov. xxx, 1; xxxi, 1). The symbolic and impersonal name Koheloth shows that Solomon is simply introduced in an ideal sense as the representative of wisdom. On the other hand, it appears to have an equally tangible application to him historically. 2. This is indicated by the sacred writer himself, who represents Solomon as belonging to "that inasmuch as this makes the great monarch say," "I was (מִבְּֽוֹקֵּֽל) king," but had long ago ceased to be king when this was written. That this is the intended author of the book has been acknowledged from time immemorial (comp. Midrash Rabbin. Midrash Jallit in loc.; Talmud, géïn, 68 b; the Chaldee paraphrase, i, 12; Midrash, Maase, Bi-Shlomo, Ha-Melech, ed. Jellinek in Eth Ho-Midrash, ii, 85; Rashi, p. 12). It is also unnecessary that interpretation, but may naturally be understood as simply referring to past incidents, e.g. "I have been [and shall am] king." The passage certainly gives no support to the idea of a fanciful authorship. 4. This is moreover corroborated by various statements in the book itself. It may otherwise be truly said, e.g. Koheloth comparing himself with a long succession of kings who reigned over Israel in Jerusalem (i, 16; ii, 7): the term king in Jerusalem (ibid.) showing that at the time when this was written there was a royal residence in Samaria; the recommendation to individuals not to attempt to resist the oppression of a tyrannical ruler, but to wait for a general revolt (viii, 2-9)—a doctrine which a monarch like Solomon is not likely to propound; the description of a royal spendthrift, and of the misery he inflicts upon the land (x, 16-19), which Solomon would not give unless he intended to write a satire upon himself. These historical allusions are too vague to be thus pressed into service. As to the political references, we know (1 Kings xi, 15, 23) that insurrectionary manifestations did exist in Solomon's reign, and were aggravated by his rigid and uncommissive policy (1 Kings xi, 10). It has been asked whether Solomon would have been likely to speak of himself as in i, 12, or to describe with bitterness the misery and wrong of which his own government had been the cause, as in iii, 16; iv, 1 (Jahn, Efr. ii, 840). On the hypothesis that he was the writer, the whole book is an acknowledgment of evils which he had occasioned, while yet there is no distinct confession and repentance. There are forms of satiety and self-reproach, of which this half hearted, half scornful retrospect of a man's own life—this utterance of bitter words by which he is condemned out of his own mouth—is the most natural expression. Any individual judgment on this point cannot, from the nature of the case, be otherwise than subjective, and our conclusions must be based on evidence as little as possible. 5. The state of oppression, suffering, and misery depicted in this book (iv, 1-4, v, 7; vii, 1-4, 10, 11; 5-7, 20, etc.) cannot be reconciled with the age of Solomon, and unquestionably shows us a scene then glooming under the grinding tyranny of Persia. In this connection the violent changes, the advent of to-day becoming the ruler of to-morrow (x, 5-7). All this, it is said, agrees with the glances into the condition of the Jews under the Persian empire in Ezra and Nehemiah, and with what knows as to the general conditions of the provinces under its satrapa. But we cannot suppose that these evils, which have been prevalent in all times, were alluded to as specially characteristic of the writer's day. 6. The fact that Koheloth is represented as indulging in sensual enjoyments, and acquiring riches and fame, which "Cept that I may be an ornament what is called (i, 11) the children of men (ii, 3-9; iii, 12, 22, etc.), making philosophical experiments to discover the sumnum bonum, is held to be at variance with the conduct of the historical Solomon, and to be an idea of a much later period. In like manner, the admonition not to seek divine council in the profane books of the prophets (xii, 12) are thought to show that this book was written when the speculations of Greece and Alexandria, had found their way into Palestine. In short, the doctrine of a future bar of judgment, whereby Koheloth solves the problem of this book when compared with the vague and dim intimations respecting a future state in the pre-exilian portions of the O. T., is regarded as proving that it is a post-exilian production. But the untrustworthy character of these arguments is evinced by the parallel case of the book of Job (q. v.). It is also urged that the indications of the religious condition of the people, their formalism and much speaking (v, 1, 2), their readiness to evade the performance of their vows by cassicistic excuses (v, 5), represent in like manner the growth of evils, the germs of which appeared soon after the captivity, and which we find in the developed form in the prophecies of Malachi. In addition to this general resemblance, there is the agreement between the use of נְּוָלֵל for the "angel" or priest of God (v, 6, Ewald, in loc.), and the recurrence in Malachi of the terms נְּנֵל and נְּנוּ, the "angel" or messenger of the Lord, as a synonyme for the priest (Mal, ii, 7), the true priest being the great agent in accomplishing God's purposes. Significant, though not conclusive in either direction, is the absence of all reference to any contemporaneous prophetic activity or to any Messianic hopes. This might indicate a time before such hopes had become prevalent, or after they were for a time extinguished. It might, on the other hand, be the natural result of the experience through which the son of David had passed, or simply take its place in the dramatic personation of such a character. The use throughout the book of Elohim instead of Jehovah as the divine name, though characteristic of the book as dealing with the problems of the universe rather than with the relations between the Lord God of Israel and his people, and therefore typical of a higher estimate of the revela tion as to date nearly where it was. The indications of rising questions as to the end of man's life and the constitution of his nature, of doubts like those which afterwards developed in Sadduceesm (iii, 19-21), of a copious literature connected with the questions, confirm, if it is urged (Ewald), the hypothesis of the later date. It may be added, too, that the absence of any
reference to such a work as this in the enumeration of Solomon's writings in 1 Kings iv, 32, tenets, at least, to the same conclusion. But such considerations drawn a sinistro are highly inconclusive. 7. The strongest argument, however, against the Solomonic authorship of this book is its vitiating language and style. It is written throughout in the Hebrew forms, which developed themselves about the time of the Babylonian captivity. So convincing is this fact, that not only have Grotius, J. D. Michaelis, Eichhorn, Dor- derlein, Spener, Jahn, J. E. C. Schmidt, Nachtigal, Kaiser, Rosenmüller, Ewald, Knobel, Gesenius, De Wette, and others, all acknowledged it, but more learned, less exaggerated, less enthralled, less enthusiastic, and even such unquestionably orthodox writers as Umbreit, Hengstenberg, Gerlach, Vaihinger, Stuttgart, Keil, Elster, etc., declare most emphatically that the book was written after the Babylonian captivity; and there is hardly a chief rabbi or a rabbinical Jew to be found who would have the courage to maintain that Solomon wrote Koheloth. Dr. Herzfeld, chief rabbi of Bruns- wick; Dr. Philippson, chief rabbi of Magdeburg; Dr. Geiger, rabbi of Breslau; Dr. Zunn, Professor Luzzato, Dr. Krochmal, Steinacher, J. J. Gruber, and others, and a host of others, affirm that this book is one of the latest productions in the O.-T. canon. We are more overreigned that these are men to whom the Hebrew is almost vernacular, and that some of them write better Hebrew, and in a purer style, than that of Kohel- oth. But even the most censorious, even the most extravagant, even those who entertain the most extreme interpretations of the text itself will weigh more than the opinion of these or all other learned men. On the other hand, the Rabbinical scholars, who certainly were not inferior in a knowledge of Hebrew, appear to have found no difficulty in attributing this book to Sol- mon. Most of those above enumerated are of very questionable sentiments on a point like this, and it must be borne in mind that a very large, if not equal, amount of learning has been arrayed on the opposite side. The last of the above objections, however, does de- serve a more minute consideration.

Many opponents of the Solomonic authorship of Ec- clesiastes have certainly gone much too far in their assertions respecting the imperity of its language. The Graecisms which Zirkle thought that he had found have now generally been given up. The Rabbinisms likewise that stand these glosses, signifi- cations, and forms which seem to appertain to a later period of Hebrew literature, and the Chaldaism, an abundance of which Knobel gathered, require, as Herzfeld has shown (in his Commentary, published at Brunsschweig, 1836, p. 13 sq.), to be much sifted. Ac- cording to Herzfeld, there are in Ecclesiastes more than between eleven and fifteen "young Hebrew" ex- pressions and constructions, and between eight and ten Chaldaism. Nevertheless, it is certain that the book does not belong to the productions of the first, but rather to the second period of the Hebrew language. This alone would not fully dispose the au- thorship of Solomon, for it would not necessarily throw the production into the latest period of Hebrew literature. We could suppose that Solomon, in a philo- sophical work, found the pure Hebrew language to be insufficient, and had, therefore, recourse to the Chal- daizing popular dialect, by which, at a later period, the book-language was entirely displaced. This supposition could not be rejected a priori, since almost every one of the Hebrew authors before the exile did the same, although in a less degree. It has been thought, however, that a striking difference between the lan- guage of Ecclesiastes and the language of the Proverbs renders that explanation quite inadmissible. This difference would prove little if the two books belonged to the same period, for the history of all literature of their kind is, if Ecclesiastes were the same relation to the Proverbs as the Song of Solomon does; but since Ecclesiastes and the Proverbs belong essentially to the same class,
tions of Ezra; \( \text{v} \text{v} \text{v} \text{v} \text{v} \text{v} \text{v} \text{v} \) (chap. i. 17, etc.), \( \text{v} \text{v} \text{v} \text{v} \text{v} \text{v} \text{v} \text{v} \) (ch. i. 18, etc.), \( \text{v} \text{v} \text{v} \text{v} \text{v} \text{v} \text{v} \text{v} \) (ch. v., 5). (4.) Other peculiarities, such as the frequent use of the participle, the rare appearance of the " rar consecutiv," the various uses of the relative particle, concur with the characteristics already noted in affixing to the language and style of this book the stamp of that transition period when the Hebrew language, since its intercourse with the Chaldee, had already lost its ancient purity, and become debased by the absorption of many Chaldee elements. The prevalence of abstract forms again, characteristic of the language of Ecclesiastes, is urged as belonging to a later period than that of Solomon in the Psalms, and to the period of Hebrew disintegration. The answers given to these objections by the defenders of the received belief are (Preston, Eccles., p. 7, (a)) that many of what we call Aramaic or Chaldee forms may have belonged to the period of pure Hebrew, that the Persian influence on the Hebrew was kept in check by the revenue of the Persian government, and that the Persian did not succeed to the captivity, the dates which have been assigned to it occupy a range of more than 500 years. Grodius supposes Zerubbabel to be referred to in xli, as the "One Shepherd" (Comm. in Eccles. in loc.), and as far agreed with Kell (Einleitung in das A. T.), who fixed it in the time of Ezra and Nehemiah. Ezra, Nehemiah, Xerxes, and De Wette conjecture the close of the period of Persian or the commencement of that of Macedonian rule; Berthold, the period between Alexander the Great and Antiochus Epiphanes; Hitizig, circ. B.C. 204; Hartmann, the period of the Macedonians ad etc. The following table will show the different periods to which it has been assigned:

Supposing it were proved that Solomon is only introduced as the speaker, the question arises why the author adopted this form. The usual reply is, that Solomon, among the Israelites, had, as it were, the prerogative of wisdom, and hence the author was induced to put into Solomon's mouth that wisdom which he intended to proclaim, without the slightest intention of forging a supposititious volume. This reply contains some truth, but it does not exhaust the matter. The chief object of the author was to communicate wisdom in general; but next to this, as an illustration from ch. i. 12 sq., he intended to inculcate the vanity of human pursuits. Now, from the mouth of no one could more aptly proceed the proclamation of the nothingness of all earthly things than from the mouth of Solomon, who had possessed them in all their fulness; at whose command were wisdom, riches, and pleasures in abundance, and who had therefore full opportunity to experience the nothingness of all that is earthly.

On the other hand, if we adopt the traditional view that Solomon was the author, we avoid all these doubtful expedients and pious frauds; and, as no other candidate appears, we shall be safest in coinciding with that ancient opinion. The peculiarities of diction may be explained (as in the book of Job) by supposing that the work was written by Solomon during a season of penitence at the close of his life, and edited in its present form, at a later period, perhaps by Ezra.

111. Canonicity.—The earliest catalogues in which the Jews have a list of the books of the Bible, is said to date from the time of Ezra and Nehemiah, and it is probable that we have received this book as forming part of the canon (Mishna, Talmud, iii, 5; Talmud, Baba Bathra, 14). All the ancient versions, therefore—viz. the Septuagint, which was made before the Christian era; the versions of Aquila, Symmachus, and Theodotion, which belong to the second century of Christianity, as well as the cursive manuscripts of the sixth and seventh centuries of the Christian era—do not contain this book. But as it has been included in the Canon from the time of the finger, it is therefore to be regarded as canonical. The following passages in the Talmud indicate, however, that the recognition was not altogether unquestioning, and that it was at least questioned how far the book was one which it was expedient to include in the Scriptures and to set forth publicly. Thus we find the statements (Mishna, Shabbath, c. x, quoted by Mendelssohn in his book on the Canon, p. 74; Midrash, fol. 114 a; Preston, p. 13) that the "wise men sought to secrete the book Koheleth, because they found it in words tending to heresy," and that it is "contradictory to the law;" and that the reason they did not secrete it was "because its beginning and end were consistent with the law;" that when they examined it more carefully they came to the conclusion, "We have looked closely into the book Koheleth, and discovered that its meaning is the same as in the Pentateuch." The chief interest of such passages is that they are consistent with the idea that the book is of some importance also as indicating that it must have commended itself to the teachers of an earlier generation either on account of the external authority by which it was sanctioned or, if not sanctioned, on account of the fact that they had a clear conscience in leaving all its meaning, and were less startled by its apparent difficulties. (See Bab. Megilla, 7 b; Bab. Talm. Sabbath, 30 a; Midrash, Pirqe de-Rabbin Abba, xxviii; Mishna, Eduyoth, v; Jerome, Comment. on the Bible, xii, 13.) Traces of this controversy are to be found in a singular discussion between the schools of Shammai and Hillel, turning on the question whether the book Koheleth were inspired, and in the comments on that question by R. Ob. de Bartenora and Maimonides (Surenhus, iv, 349). Within the Christian Church, the divine inspiration of Ecclesiastes is one of the older and most of the Song of Solomon is denied by the Theologus of Mopocastus. In recent times, the accusers of Ecclesiastes have been Augusti, De Wette, and Knobel; but their accusations are based on mere misunderstandings. They are especially as follows: (1) The author is said to incline towards a moral episcopacy. All his ethical admonitions and doctrines tend to promote the comforts and enjoyments of life. But let us consider above all what tendency and disposition it is to which the author addresses his admonition, serenely and contentedly to enjoy God's gifts. He addresses this admonition to that speculation which will not rest until it has penetrated the whole depth of the inscrutable counsels of God; to that murmuring which bewails the badness of times, and quarrels with God about the sufferings of our terrestrial existence; to that gloomy pity which wearies itself in imaginary good works and external strictness, which is not interested in the welfare of humanity, which is not itself the aricle which gathers, not knowing for whom; making the means of existence our highest aim; building upon an uncertain futurity which is in the hand of God alone. When the author addresses levity he speaks quite otherwise. For instance, in the case of the woman who had no orphan to bequeath, it is better to go to the house of mourning than to the house of feasting; for that is the end of all men; and the living will lay it to his heart. Sorrow is better than
laughter, for by the sadness of the countenance the heart is made better. The heart of the wise man is in the house of mourning, but the heart of fools is in the house of mirth.” The nature of the joy recommended by the author is also misunderstood. Unrestrained merriment and giddy sensuality are not the virtues which our author enumerates. He says to laughter, Thou art mad, and to joy, What art thou doing? He says, ch. vii, 5, 6, “It is better to hear the rebuke of the wise than for a man to hear the song of fools. For as the cracking of thorns under a pot, so is the laughter of fools. 18, 11, 12; “I know that there is no good in them, but for a man to rejoice, and to do good in his life; and in many similar passages, but especially ch. xi, 9, 10, and xii, 1, “Remember now thy Creator in the days of thy youth,” etc. In reference to these passages Ewald says (p. 186), “Finally, in order to remove every doubt, and to speak with perfect clearness, he distinguishes between the eternal judgment, having attained to all the doings of man, and inculcates that man, in the midst of momentary enjoyment, should never forget the whole futurity, the account and the consequences of his doings, the Creator and the Judge.” 10, 11, 12, 13, is, in reference to the conclusion, “In order to make this comparatively small portion of his writing, there is, ver. 13, once more briefly indicated that its tendency is not, by the condemnation of merriment, to recommend an unbridled life, but rather to teach, in harmony with the best old books, the fear of God, in which the whole of consciences consist, or that true singleness of life, satisfying the whole man, and which comprehends everything else that is truly human. It is very necessary to limit the principle of joy which this book recommends again and again in various ways and in the most impressive manner, and to refer this joy to still higher truth, since it is so liable to be misunderstood. 2.) It is objected that in his views concerning the government of the world the author was strongly inclined to fatalism, according to which everything in this world progresses with an eternally unchangeable step; and that he by this fatalism was (3.) led to a base degradation of man with all his doings and, on his dogmatical basis the conviction of the inability of man, notwithstanding all his efforts, to reach his aim. However, this so-called fatalism of our author is nothing else but what our Lord teaches (Matt. vi, 25): ‘Worry not, thought, etc. And as to the moral scepticism, our author says, PS, 72, 13, 15, ‘All his endeavors can do nothing; but at the same time he recommends the fear of God as the never-failing means of salvation. Man in himself can do nothing, but in God he can do all. It is quite clear from ch. vii, 16, 18, where both self-righteousness and wisdom, when separated from God, are described as equally destructive, and opposite to one another is placed the fear of God, as being their common antithesis, that our author, by pointing to the sovereignty of God, did not mean to undermine morality. He that feareth God cometh forth of the offspring of a sensual character, and, the later German to moral scepticism, it would be impossible for him to teach retribution, which he inculcates in numerous passages, and which are not contradicted by others, in which he says that the retribution in individual circumstances is frequently obscure and enigmatical. Where is that sentence that I have not found in the secret of a true blessedness, in the midst of all the distractions and sorrows of the world, as consisting in a tranquil, calm enjoyment of the good that comes from God (Ps. 37).’

The variety of these opinions indicates sufficiently that the book is as far as possible from the character of a formal treatise. It is simply what it professes to be—the confession of a man of wide experience looking back upon his past life, and looking out...
upon the disorders and calamities which surround him. Such a man does not set forth his premises and conclusions with a logical completeness. While it may be true that the absence of a formal arrangement is characteristic of the life mind in all stages of its development (Lewth, De Sci. Polit. Heb., Poel. xxix.), or that it was the special mark of the declining literature of the period that followed the captivity (Ewald, Poet. Bcck. iv. 177), it is also true that it belongs generally to all writings that are addressed to the spiritual rather than the intellectual element in man's nature, and that it is found accordingly in many of the greatest works that have influenced the spiritual life of mankind. In proportion as a man has passed out of the region of traditional, easily-systematized knowledge, and has been under the influence of great personal thoughts—possessed by them, yet hardly mastering them so as to bring them under a scientific classification—are we likely to find this apparent want of method. The true utterances of such a man are the records of his struggles after truth, of his occasional glimpses of it, the wisdom born in all stages of life. The treatises De In imitatione Christi, the Pensées of Pascal, Augustine's Confessions, widely as they differ in other points, have this feature in common. If the writer consciously reproduces the stages through which he has passed, the form he adopts may either be essentially dramatic, or he may make a statement of the changes which have brought him to his present state, or it may repeat and renew the oscillations from one extreme to another which had marked that earlier experience. The writer of Ecclesiastes has adopted and interwoven both the latter methods, and hence, in part, the obscurity which has made it so prosaically in the struggling-block of commentators. He is not a didactic moralist writing a homily on virtue. He is not a prophet delivering a message from the Lord of Hosts to a sinful people. He is a man who has sinned in giving way to vanity and lust, and so has written out the consequences which/file him the penalty of that sin in satiety and weariness of life; in whom the mood of spirit, over-reflective, indisposed to action, of which Shakspeare has given us in Hamlet, Jaques, Richard II, three distinct examples, has become dominant in his darkest form, but who has through all this been under the discipline of a divine education, and has learnt from it the lesson which God meant to teach him. What that lesson was will be seen from an examination of the book itself. Leaving it an open question whether it is possible to arrange the contents of this book (as Köster and Van der Loos have done) in a continuous series of strophes and antiphons, it is tolerably clear that the recurring burden of "Vanity of vanities" and the teaching which recommends a life of calm enjoyment, mark, whenever they occur, a kind of halting-place in the succession of thoughts. It is the summing up of one cycle of experience; the sentence passed upon one phase of life. Taking this, accordingly, as our guide, we may look upon the whole book as falling into four divisions, each, to a certain extent, running parallel with the others in its order and results, and closing with that in which its position no less than its substance is "the conclusion of the whole matter." (L.) Ch. i. and ii. This portion of the book, more than any other, has the character of a personal confession. The preacher starts with reproducing the phenomena and the weariness into which his experience had led him (i. 2, 3). To the man who is thus satiated with life, the order and regularity of nature are oppressive (4, 7-); nor is he led, as in the 90th Psalm, from the things that are transitory to the thought of One whose years are from eternity. In the midst of the ever-recurring changes he finds no process. That which seems to be new is but the renewal of the old (1. 8-11). Then, having laid bare the depth to which he had fallen, he retraces the path by which he had travelled thitherward. First he had sought after wisdom as to that which God seemed to call him (i. 18), but the pursuit of it was a sore travail, and there was no satisfaction in its possession. It could not remedy the blows of the deceitful, evil spirit that he had taken advantage of (i. 15). The first experiment in the search after happiness had failed, and he tried another. It was one to which men of great intellectual gifts and high fortunes are continually tempted—"to surround himself with all the appliances of sensual enjoyment, and yet in thought to hold himself above it" (ii. 1). Nevertheless, he finds in the voluptuous part of the experience which was to enlarge his store of wisdom. This—which one may perhaps call the Goethean idea of life—was what now possessed him. But this also failed to give him peace (ii. 16). "The day in which I exalted all human experience and found it profitless?" (ii. 12). If for a moment he found comfort in the thought that wisdom excelleth folly, and that he was wise (ii. 12, 14), it was soon darkened again by the thought of death (ii. 15). The wise man dies as the fool (ii. 16). This is enough to make the man wise who, without labour and sin, had ascended into the outer darkness of despair (ii. 20). Yet this very despair leads to the remedy. The first section closes with that which, in different forms, is the main lesson of the book—to make the best of what is actual about the world (ii. 24)—to substitute for the reckless, feverish, and immeasurable passion of life, a calm and steady nature. Men may yet find both for the senses and the intellect. This, so far as it goes, is the secret of a true life; this is from the hand of God. On everything there is written, as before, the sentence that it is vanity and vexation of spirits. (L.) Ch. iii. 1-9. The order of thought in this section has a different starting-point. One who looked out upon the infinitely varied phenomena of man's life might yet discern, in the midst of that variety, traces of an order. There are times, and seasons for each of them (iii. 1-6). The age ('age') includes also the various contexts of the world of nature (iii. 1-8). The heart of man, with its changes, is the mirror of the universe (iii. 11), and is, like that, ineradicable. And from this there comes the same conclusion as from the personal experience. Calmly to accept the changes and chances of life, entrusting, as it were, the balance between joy and sorrow to the hand, is the same as to accept the order of nature, this is the way of peace (iii. 13). The thought of the ever-recurring cycle of nature, which before had been irritating and disturbing, now whispers the same lesson. If we suffer, others have suffered before us (iii. 15). God is seeking out the just man, who, in the midst of persecution and oppression, God also in the appointed season repeats his judgments (iii. 16, 17). It is true that this thought has a dark as well as a bright side, and this cannot be ignored. If men come and pass away, subject to laws and changes like those of the natural world, then, it would seem, man has no pre-existing voice above the beast (iii. 19). One end happens to all. All are of the dust and return to dust again (iii. 20). There is no immediate denial of this conclusion. It was to this that the preacher's experience and reflection had led him. Yet even then the thought that the personal being of man terminates with his death, he has still the same counsel to give. Admit that all is darkness beyond the grave, and still there is nothing better on this side of it than the tempo of a tranquil enjoyment (iii. 22). The transition from this result to the opening thoughts of ch. iv seems at first somewhat abrupt, but the preacher is retracing the paths by which he had been actually led to a higher truth than that in which he had then rested, and he will not, for the sake of a formal continuity, smooth over its ruggedness. The new track on which he turns may at first have seemed less promising than the old. Instead of the self-centred search after happiness he looks out upon the miseries and disorders of the world, and learns to
sympathize with suffering (iv, 1). At first this does not multiply his perplexities. The world is out of joint. Men are so full of misery that death is better than life (iv, 4). Indolence leads to poverty (iv, 5). Here, too, he who steers clear of both extremes has the best portion (iv, 6). The man who heaps up riches stands alone without kindred to share or inherit them, and loses all the blessings and advantages of human fellow-feeling (iv, 12). Successful in his survey of life on earth on a large scale, as in that of a personal experience, there is a cycle which is ever repeated. The old and foolish king yields to the young, poor and wise, who steps from his prison to a throne (iv, 15, 14). But he too has his day, and will join all generations in the final judgment (v, 13, 14). All human greatness is swallowed up in the great stream of time.

The opening thought of ch. v again presents the appearance of abruptness, but it is because the survey of human life takes the form of new avenues. The eye of the Preacher passes from the dwellers in palaces to the worshippers in the Temple, the devout and religious men. Have they found out the secret of life, the path to wisdom and happiness? The answer to that question is that there is blindness and folly in mankind through the fashion of this life while the resurrection of the dead is not yet manifest. The unseemly prayers, idle dreams, broken vows, God's messenger, the Priest mocked with excuses—that was what the religion which the Preacher witnessed presented to him (v, 1–6). The command "Fear thou God," means that a man was to take no part in a religion such as this. But the Lord's command also suggested the solution of another problem, that of prevalence of injustice and oppression which had for a long time reduced the spirit of the inquirer. Above all tyranny of petty governors, above the might of the king himself, there was the power of the highest (v, 8); and his judgment was manifest even upon earth. Was there, after all, so great an inequality? Was God's purpose, that the earth should be for all, really counteracted? (v, 9). Was the rich man with his cares and fears happier than the laboring man whose sleep was sweet without anxiety? (v, 10–12). Was there anything permanent in that wealth of his? Did he not leave the world naked as he entered it? And if so, did not all this bring the inquirer round to the same conclusion as before? Moderation, self-control, freedom from all disturbing passions, these are the conditions of the maximum of happiness which is possible in this life. Let this be received as from God. Not the outward means only, but the very capacity of enjoyment is his gift (v, 18, 19). Short as life may be, if a man thus enjoys, he makes the most of it. God approves and answers his cheerfulness. Is not this better than the riches or length of days on which men set their hearts? (vi, 1–5). All are equal in death; all are nearly equal in life (vi, 6). To feed the eyes with what is actually before them is better than the ceaseless wanderings of the spirit (vi, 9).

(III.) Chap. vii, 10–viii, 15. So far the lines of thought all seemed to converge to one result. The ethical teaching that grew out of the wise man's experience had in it something akin to the higher forms of Epicureanism. But the seeker could not rest in this, and found himself beset with thoughts at once more terrible and more easily to be resisted. In the spirit of man looks backwards and before, and the uncertainties of the future vex it (vii, 12). A good name is better, as being more permanent, than riches (vii, 1); death is better than life, the house of mourning than the house of feasting (vii, 2). Self-command and the spirit of calm endurance are a better safeguard against vain speculations than any form of enjoyment (vii, 8, 10). This wisdom is not only a defence, but a test as to whether their measure or may be, but it gives life too them that have it (vii, 12). So far there are signs of a clearer insight into the end of life. Then comes an oscillation which carries him back to the old problems (vii, 15). Wisdom suggests a half-solution of them (vii, 16), and then the question of how the old man is to deal with them (vii, 22); but this is again followed by a relapse into the bitterness of the sated pleasure-seeker. The search after wisdom, as such as it has been in his experience, had led only to the discovery that, though men were wicked, women were more wicked (vii, 26–29). But the report of the life of the universe appears as if perhaps the natural consequence of such an oscillation, and accordingly in ch. vii will we find the sinner moving in the same round as before.

There are the old reflections on the misery of man (vii, 6), the vanity of life (vii, 8), and the conditions of the moral order of the universe (vii, 10, 11), the old conclusion that enjoyment (such enjoyment as is compatible with the fear of God) is the only wisdom (vii, 15).

(IV.) Chap. viii, 16–xii, 8. After the pause implied in his again arriving at the lesson of v, 15, the Preacher retracts the many of his earlier teachings. This time the thought with which he starts is a profound conviction of the inability of man to unravel the mysteries by which he is surrounded (viii, 17), of the nothingness of man when death is thought of as ending all things (ix, 3–9), of the wisdom of enjoying the present (ix, 7–10) and the folly of grasping at the fragments of the generations or individual man (ix, 11, 12). The wide experience of the Preacher suggests sharp and pointed sayings as to these evils (x, 1–20), each true and weighty in itself, but not leading him on to any firm standing-ground or clearer solution of the problems which oppresses him. It is here that the traces of plan and method in the book seem most to fail us. Consciously or unconsciously the writer teaches us how clear an insight into the follies and sins of mankind may coexist with doubt and uncertainty as to theistic and ethical truth. The man who is not a thing of the night after truth. In ch. xi, however, the progress is more rapid. The tone of the Preacher becomes more that of direct exhortation, and he speaks in clearer and higher notes. The conclusions of previous trains of thought are not contradicted, but are placed under a new law and brought into a more harmonious course. The end of man's life is not to seek enjoyment for himself only, but to do good to others, regardless of the uncertainties or disappointments that may attend his efforts (xi, 1–4). His wisdom is to remember that there are things which he cannot know, problems which he cannot solve (xi, 9), and that is the true greatness of his youth, whatever blessings God bestowed on him (xi, 9). But beyond all these there lie the days of darkness, of falling powers and incapacity for enjoyment; and the joy of youth, though it is not to be crushed, is yet to be tempered by the thought that it cannot last forever, and that it too is subject to God's law of retribution (xi, 9, 10). The secret of a true life is that a man should consecrate the vigor of his youth to God (xii, 1). It is well to do this before the night comes, before the slow decay of age benumbs all the faculties of sense (xii, 2, 3); before the spirit returns to God who gave it. The thought of that end rings out once more the knell of the nothingness of all things earthly (xii, 8); but it leads also to "the conclusion of the whole matter," to which to that all trains of thought and all the experiences of life had been leading the several trains of thought, the spirit of the "righteous judgment of God would in the end fulfill itself and set right all the seeming disorders of the world (xii, 13, 14)." (See two articles on the plan and structure of the book of Ecclesiastes in the Method. Quart. Rev. for April and July, 1849, written by Dr. M'Clinotchick from Vahinger, in the Theol. Stud. u. Krit. for July, 1848; also an article by Gurlitt in the Stud. u. Krit. for 1864, ii.

If one were to indulge conjecture, there would per-
happ be some plausibility in the hypothesis that xii, 8 had been the original conclusion, and that the epilogue of xii, 9-11 had been added, either by another writer, or by the same writer on a subsequent occasion. These verses (9-12) have the character of a panegyric designed to give weight to the authority of the teacher. The two that now stand as the conclusion may naturally have originated in the desire to furnish a clue to the perplexities of the book, by stating in a broad instance of the form, not easy to be mistaken, the truth which had before been latent.

If the representation which has been given of the plan and meaning of the book be at all a true one, we find in it, no less than in the book of Job, indications of the struggle with the doubts and difficulties which in all ages of the world have presented themselves to thoughtful observers of the condition of mankind. In its sharp sayings and wise counsels it may present some striking affinity to the Proverbs, which also bear the name of the son of David; but the resemblance is more in form than in substance, and in its essential character it agrees with that great inquiry into the mysteries of God's government which the drama of Job brings before us. There are indeed characteristic differences. In the one we find the highest and boldest forms of Hebrew poetry, a sustained unity of design, a movement of the thought as we see it in songs and oscillations, and the style seldom rises above the rhythmic character of proverbial forms of speech. The writer of the book of Job deals with the great mystery presented by the sufferings of the righteous, and writes as one who has known those sufferings in their intensity. In the latter we have seen the writer of the Proverbs, in whom we trace chiefly the weariness or satiety of the pleasure-seeker, and the failure of all schemes of life but one. In spite of these differences, however, the two books illustrate each other. In both, though by very diverse paths, the inquirer is led to take refuge (as all great thinkers have always done) from his trouble and thought in the thought of the kingdom of God, and to see how great, and that man knows but the smallest fragment of it; that he must refrain from things which are too high for him, and be content with that which is given him to know—the duties of his own life, and the opportunities it presents for his doing the will of God. There is probably a connection in the authorship or editorship of these two books that may to some extent account for this resemblance. See Job (Book of).

V. Commentators.—The following is a full list of separate references to each of our ecclesiastical writers (the most important as indicated by an asterisk) and also the names of some of the more important writers on the subject.

Galante, "Εκκλησιαστάς (4to, Safet, 1570; Frckt. 1681)"; Sidonius, Commentarius (in Germ., Mogunt. 1571, fol.); De Pomis, Discourse (Ven. 1572, 4to); Mercer, Commentarius (Gen. 1575, fol.); Taitzak, "Εκκλησιαστάς (Ven. 1576, 4to); Jaisch, "Εκκλησιαστάς (et constpl. 1578, fol.); id., Commentarius (antw. 1588, 4to); Jansen, Paraphrasis (Leyd. 1578, fol.); Galicho, "Εκκλησιαστάς (Ven. 1578, 4to); Corranus, Paraphrasis (Lond. 1572, 1586, 8vo); ed. Scultet, Francf. 1617, Heidelberg, 1618, 8vo); Senellin, Commentarius (Gen. 1590, 8vo); in English, Stocknick, Lond. 1586, 8vo, Explicatio (Flor. 1580, 8vo; Colon. 1590, 12mo); Lavater, Commentarius (Tigr. 1584, 8vo); Beza, Paraphrasis (Gen. 1588, 1598, 8vo); in German, ib. 1599, 8vo); Gifford, Commentarius (Lond. 1589, 8vo); Strack, Predigten (4to, Casell. 1590; Frckt. 1618; Goth. 1683); Slangendorp, Commentarius (Hafn. 1590, 8vo); Greenham, Brief Sam in (Works, p. 628); Areop, "Εκκλησιαστάς (Constpl. 1591, 4to); Avrilo, "Εκκλησιαστάς (Salonica, 1597, 4to); Baruch ben-Baruch, "Εκκλησιαστάς (Ven. 1599, fol.); Aleseich, "Εκκλησιαστάς (Ven. 1601, 4to); Luchchter, Erklärung (Frkft. 1603, 1611, 4to); Broughton, Commentarius (Lond. 1603, 4to); Lininus, Commentarius (Lugd. 1606, 4to); Bardin, with various titles (in French, Par. 1609, 12mo, 1622, 8vo; in Germ., Guelf. 1602, 8vo); Fay, Commentarius (Gen. 1607, 8vo); V_paid, Commentarius (Lugd. 1610, 4to); Remon, Notae (in the Crit. Sacri, 1618); Sanchez, Commentarius (Bardin. 1619, 4to); "De ipnea, Commentarius (Antw. 1620, fol.); Ferdinand, Commentarius (Rom. 1621, fol.); Granger, Commentarius (Lond. 1621, 4to); Egard, Expositio (Ham. 1622, 4to); Pemble, Exposition (Lond. 1608, 4to); Dietrich, Predigten (fol. Ulm, 1632, 1656; Nurnb. 1665); Drusius, Annotationes (Amst. 1635, 4to); Guillebert, Paraphrasis (Paris, 1655, 1642, 8vo); à Lapide, In Eccles. (Antw. 1638, fol.); Jermin, Commentary (Lond. 1638, fol.); Cartwright, Metaphrasis (4to, Amsterd. 1647, 4th edit. ib. 1683); Trapp, Commentary (Lond. 1650, 4to); Geier, Commentarius (4to, Lpz. 1658; 5th edit. 1730); Mercado, "Εκκλησιαστάς (Amst. 1653, 4to); Cotton, exposition (Lond. 1654, 8vo); Gorse, Explication (in French, Par. 1655, 3 vols. 12mo); Lusitanio, "Εκκλησιαστάς (Ven. 1656, 4to); Leigh, Commentarius (Lond. 1657, fol.); Varenius, Gemma Salomonis (Rost. 1659, 4to); Werenfers, Homile (Basle, 1666, 4to); *Reynolds, Annotations (Lond. 1669, 8vo); *In Assembly's Annot. Works, in (ed. by Washill, Lond. 1670, fol.); de Sayy, I: Ecclesiastics, 2: Sainte Bible, xiv.; Anon. Exposition (Lond. 1689, 4to); Bosseu, Libri Salomonis (Par. 1685, 8vo); Nislet, exposition (Edinb. 1694, 4to); Smith, Explicatio (Anstl. 2 vols. 1699, 1794); Leenhoff, Vertictures (te Wolle, 1700, 8vo); Yeard, Paraphrasis (Lond. 1701, 8vo); Martainay, Commentary (Par. 1705, 12mo); Seebach, Erklärung (Hal. 1705, 8vo); Tietmazz, Erklärun (Nurnb. 1705, 4to); David ben-Ahron, "Εκκλησιαστάς (Prague. 1706, 4to); *Schmid, Commentarius (Strasb. 1709, 4to); Mel, Predigten (Frkft. 1711, 4to); Zierold, Bedeutung, etc. (Lpz. 1715, 4to); Rambach, Adnotationes (Hal. 1720, 8vo); Wachter, Uebers. m. Anm. (Amst. 1729, 4to); France, Commentary (Braband. 1724, 4to); Wolfe, Anmung (Lpz. 1729, 8vo); Hardoun, Paraphrasis (Par. 1729, 12mo); Bauer, Erklärung (Lpz. 1782, 4to); Hansen, Betrachtungen (Lub. 1737, 1744, 4to); Lampe, Adnotationes (in his Medit. Exeg. Gronig. 1741, 4to); Michelis, Commentarius (Lpz. 1757, 4to); Gotti, "Εκκλησιαστάς (Amst. 1753, 4to); Anon. Uebers. m. Anm. (Halle, 1760, 8vo); Peters, Append. zu Crit. Dia. (Lpz. 1769, 8vo); *Des Vaux, Esay, Analytical Paraphrasis, etc. (Lond. 1760, 4to); in (Germ., Halle, 1764, 4to); Carmeli, Speigungens (Ven. 1765, 8vo); *Judetein, "Εκκλησιαστάς (Amst. 1765, 4to); Anon. Codeth, a Podem (Lond. 1768, 4to); *Mendele
ECCLESIASTICAL HISTORY

Ecclesiastic, Ecclesiastical, of or belonging to the Church (ecclesia). In later times the word ecclesiastic is generally treated as a noun, and ecclesiastics often used in the singular number, improperly, to the affairs of the clergy. In the early Church, Christians in general are spoken of by this title, in opposition to Jews, infidels, and heretics. The word means men of the Church, and was applied to Christians as being neither of Jewish synagogues, nor heretics, but of the heathen temples, nor heretics, but of the Church, not members of the Church of Christ; e.g. ἀντιπόλεμοι ἐκκλησιαστεῖοι, Eusebius, iv. 7, cited by Bingham, Orig. Eccles., bk. i, ch. i, § 8.

Ecclesiastical History is that branch of historical theology (q.v.) which treats of the development of the kingdom of God among men on the earth by means of the Church.

I. Idea and Scope of Ecclesiastical History.—The title Ecclesiastical History (Historia Ecclesiastica) was used by all the early writers on this branch of history, both before and after the invention of the term by L. Sozomenus. German writers began the use, in its stead, of the title Church History (Kirchengeschichte), which has of late been adopted also by most English writers. Its ideas and limits depend on the idea which is formed of the Church (ecclesia). See Church.

1. If the Church be regarded as a divine institution, existing in all the ages before Christ as well as since, then the field of Church history reaches back from the beginnings of the history of the first divine covenant to man down to the present time. It would then be divided into Biblical Church History and Ecclesiastical Church History, or History of the Church. If the Church be regarded as the kingdom of God, history, again, could be divided into O. T. and N. T. The entire field of Church history, in its widest sense, would thus be, I. Old-Testament Church history. II. New-Testament Church History, including (1) the life of Christ; (2) the planting of Christianity by the apostles. III. Ecclesiastical history, beginning at the close of the canon, and extending to the present time (see Alexander, Notes on N.-T. Literature and Ecclesiastical History, N.Y., 1867, p. 156 sq.; Stanley, Eastern Church, Introduction).

2. If (as it generally is) for convenience, on the other hand, the term Church be restricted to the Christian Church, then the field of Church history is limited to the development of the kingdom of God among men through and by means of the Christian Church. Its proper starting-point is the incarnation of the eternal Word, who, amenable among us and revealed his glory, the glory of the only-begotten of the Father, full of grace and truth; and next to this the miracle of the first Pentecost, when the Church took her place as a Christian institution, filled with the spirit of the glorified Redeemer, and entrusted with the continuing of his kingdom. The God-man and Saviour of the world, is the author of the new creation, the soul and the head of the Church, which is his body and his bride. In his person and work lies all the fulness of the Godhead and of renewed humanity, the whole plan of redemption, and the key of all history from the creation of the image of God to the resurrection of the body unto everlasting life” (Schaff, Church Hist., vol. i, § 1). Modern writers generally adopt this second view, not only for its practical convenience, but also because the theological ground that the sources of the O. and N. T. history are inspired, that the Church history, since it is a history of the church, are human. The former is therefore called Sacred History, constituting a department by itself. The relations of Christianity to Judaism and heathenism are generally treated by modern writers in an Introduction or in separate chapters, as the Preparation for Christianity; the History of the World: The life of Jesus is so treated by some writers; by most others it is relegated to a separate work. Neander makes one work of “The life of Christ” as the ground of the existence of the Christian Church; another work of the apostolic Church; another of “The Training of Christianity by the Apostles;” while his great Church History continues the development after the apostolic age. Nevertheless, in treating of “Church Discipline and Constitution,” he
ECCLESIASTICAL HISTORY

is compelled to go back to the apostolic age. Dr. Schaff makes "the Church under the Apostles" the first division of his History of the Christian Church, and gives the relations of Christianity to Judaism and heathenism in chap. i., as "Preparations for Christianity." Hinds (History of the Christian Church, 1st Division, Encycl. Metropolitana) treats in an introduction of the relation of Jews and Greeks to Christianity, and thinks the fact makes part i. the Ministry of Christ; part ii. the Apostolic Age; part iii. Age of the Apostolic Fathers.

3. As to the relations to church history to general history, dear Stanley remarks: "To a great extent the two are inseparable; they cannot be divided without some loss to both. It is indeed true, in common parlance, ecclesiastical history is often confounded within limits so restricted as to render such a distinction only too easy. Gibbon’s Decline and Fall of the Roman Empire is, in great part, however reluctantly or unconsciously, the history of the 'rise and progress of the Christian Church.' Never let us think that we can understand the history of the Church apart from the history of the world, any more than we can separate the interests of the clergy from the interests of the laity, which are the interests of the orthodox, and the other branches of society.

Hence the relations of the two spheres to each other is almost as indefinable in a history as it is in practice and in philosophy. In no age are they precisely the same" (Eastern Church, Introduction). A book written from this point of view, however, would be rather a history of the Church, than of the topics discussed and development of man than a history of the Church. So Milman’s Latin Christianity is, to great extent, a general history of the times rather than of the Christian Church, while, at the same time, the Church is the prominent feature of it. It is well that such a book should be written, and the work has been well done by dear Milman.

II. Method of Church History.—The order and arrangement of the material have varied greatly at different periods. The earliest writers (e.g. Eusebius) wrote generally without scientific method, and their arrangement was arbitrary and fortuitous. In the Church of the Middle Ages history was little studied, and what little was written was put in the form of simple chronicles. The first application of method was really made in the Magdeburg Centuries, projected by printer Neumann, and published in 1674. See also Dr. Scharff, Geschichte der Kirchen zum Verhüten der Geschichtskenntniss (1816). The history is divided into centuries, with a topical arrangement under each century of sixteen heads as rubrics, viz.: 1. General view; 2. Extent of the Church; 3. Its external condition; 4. Doctrines; 5. Heresies; 6. Blas; 7. Polity; 8. Churches; 9. Councils; 10. Bishops and doctor; 11. Haiters; 12. Martyrs; 13. Miracles; 14. Jews; 15. Other religions; 16. Political changes affecting the condition of the Church. This centennial arrangement (combined with the rubrical subdivision) maintained its ground for two centuries; the last great work which follows it is Mosheim’s Institutes of Ecclesiastical History. Mosheim divides the material under each century into external and internal history, and these again as follows: External events into prosperous and adverse; internal history into, 1. State of literature and science; 2. State of the Church; 3. Theology; 4. Rites and ceremonies; 5. Heresies and schisms. The latter historians divide the whole history into periods, determined by great events, and then arrange the material under each period by topics or rubrics. Each writer, of course, frames his periods according to his own views of the great epochal events of history, but most of them make three great periods—ancient, medi-
aval, and modern, the first beginning with the day of Pentecost; the second with Gregory the Great, A.D. 590 (acc. to others, with Constantine, 306 or 311, or the fall of the West Roman empire, 476, or Charle-
ugame, 800); the third with the Reformation, 1517.

Perhaps the best modern division is that of Schaff, who proposes nine periods, viz., three ancient, three medieval, three modern, viz.: I. The Apostolic Church, A.D. 1-100. II. The Church persecuted as a sect, to Constantine, the first Christian emperor, A.D. 100-311. III. The Church in union with the Graeco-Roman empire, and amid the storms of the great migration, to the pope Gregory I, A.D. 511-600, and the Church divided among the Germanic nations, to Hildebrand, A.D. 590-1049. V. The Church under the papal hierarchy and the scholastic theology, to Boniface VIII, A.D. 1049-1294. VI. The decay of mediæval Catholicism, and the rise of the free churches of the Reformation, A.D. 1294-1517. VII. The evangelical reformation and the Roman Catholic reaction, A.D. 1517-1600. VIII. The age of polemic orthodoxy and exclusive confession-
alisum, A.D. 1600-1750. IX. The spread of infidelity and the revival of Christianity in Europe and Ameri-
cas, from 1750 to the present time (Hist. I, 14). Dr. J. A. Alexander (Op. cit. p. 214 sq.) objects to the minutes and fixed rubrical arrangement on various grounds, and proposes to set it aside altogether as a framework running through the history and determining its whole form, and to substitute a natural arrangement of the topics discussed by way of a guide to the student, working with a due regard to the mutual relative importance of the topics themselves, so that what is prominent at one time may be wholly in the background at another, instead of giving all an equal prominence at all times, by applying the same scheme or formula to all alike. This method has been adopted by Dr. Schaff. He divides the whole into every artificial or conventional arrangement, far from being new, is recommended by the practice and example of the best historians in every language and in every age, affording a presumptive, if not a conclusive, proof of the practical efficiency and usefulness, and, at the same time, a convenient means of keeping this and other parts of universal history in mutual connection and agreement with each other." See also Bur, Epochen d. Kirch-
lichen Geschichtschreibung (Tübingen, 1832).

III. Branches of Church History.—The branch of history which is divided will of course depend upon the method adopted (see above); but the historian, besides setting forth the progress of Christianity in the world and its vicissitudes, must also treat, more or less fully, of the constitution and government of the Church. See also Branches of History, II. History of the doctrines of the Church; of worship, religious usages, domestic life; of creeds, etc. Some of these are of so great importance as to justify treatment in separate books, and they have, in fact, grown to be independent branches of science: e. g. archaeology, history of doctrines, Church history, systematic theology, etc. History of the fathers, history of councils, Church polity, etc.

IV. Sources of Church History.—For the history of the Jewish Church and of the Apostolic Church, we find in the O. and N. Testament books for the history of the Church and of the O. and N. Testament. For the history since the closing of the Canon, the sources are given by Kurtz as follows: "They are partly primary (original), such as monuments and original documents; partly secondary (derived), among which we reckon traditions, and reported researches of original sources which have been found. Monuments, such as ecclesiastical buildings, pictures, and inscriptions, are commonly only of very subordinate use in Church history. But archives, preserved and handed down, are of the very greatest importance. To this class also belong the acts and decrees of ecclesiastical councils; the decrees and official decrees of the popes (decretales, briefs) and of bishops (pastoral letters); the laws and regesta issuing from imperial chancel-

laries, so far as these refer to ecclesiastical affairs; the rules of monastic orders, liturgies, confessions of faith, letters of personages influential in Church or State; reports of eye-witnesses; sermons and doctrinal
treatises of acknowledged theologians, etc. If the documents in existence are found insufficient, we must have recourse to the original history from the fathers and to the historical investigations of those who had access to original documents which are now no longer extant" (Text-book of Church History, vol. 1, § 8). "The private writings of personal actors in the history, the works of the Church fathers for the first six centuries, of the Mohammedan and Jewish schools of the Middle Ages, and of the Reformers and their opponents for the 16th century, are the richest mines for the historian. They give history in its birth and actual movement; but they must be carefully sifted and weighed, especially the controversial writings, where fact is generally confused with Arrogance and with the benefit of orthodoxy" (Schaff, Church History, vol. 1, § 8).

V. Literature. (1.) Apostolic Church. The Acts of the Apostles may be regarded as the first Church history, for they describe the planting of the Church among Jews and Gentiles from Jerusalem to Rome. (Irenaeus in his Historia in parte, St. Ignatius in his Epistles and kisses, etc.) (2.) Greek Church. Eusebius (q. v.) won by his Church history ( Εκκλησιαστικὴ ἱστορία, up to A.D. 324) the title of the Father of Church history, though he was able to make use of the work of a predecesor, Hegesippus. Eusebius (q. v.) is the most moderate, and truth-loving, and made use of many sources of information which are now lost. As a work of art his is inferior to the classic historians. It was continued on the same plan and in a similar spirit by Socrates, Sozomen, and Theodoret in the fifth, and by the Theodoretus Theodoretus in the sixth centuries. Among the later Greek Church historians Nicephorus Callistus (about 888) deserves mention. A Church history in the modern Greek Church was begun in 1866 by Konst. Kontogonola (Εκκλησιαστικὴ ἱστορία συμβολὰ τῶν Σιάτων συντάσσων τῆς ἱστορίας μίας τῶν Εἰσαγγελίας τῆς Ἱεράς Εὐαγγελίας) in Athens (1866). (3.) The Latin Church before the Reformation. The Latin Church before the Reformation was long content with translations and extracts from Eusebius and his continuators, and but one work of consequence was produced during the Middle Ages. (4.) The Roman Church after the Reformation. At the head of Roman writers of Church history stand of Dr. Scal Tfl., (Rutinis) (-1197), whose Annales Ecclesiastici (Rome, 1588 sq., 12 vols. fol.) come down to the year 1188. They were continued, though with less ability, by Raynaldus, Siscontinus, and very recently, from the year 1549, by J. B. M. Mayer, who for the first time, the church in the sixteenth century was designed as a refutation of the Magdeburg Centuries (see Centuries), and were refuted in part not only by several Protestant writers, but also by Roman scholars, e. g. by Pagli. The work of Natalie Alexander (1724), Historia Ecclesiastica V. et N. T. (Par. 1599 sq., 8 vols. fol.; Bingg, 1785-1791, 21 vols.), is Gallican, learned, and, on the whole, a very valuable work. Fleury (Histoire Ecclesiastique, Par. 1691-1720, 20 vols. 4to) commends himself by mildness of spirit, fluency of style, and copiousness of material. Bossuet (1704) wrote in a very elegant style a history of the world: Discours sur l'Histoire Universelle depuis le commencement du monde jusqu'à l'Empire de Charlemagne (Paris, 1816). Tillemont (1688) compiled, almost entirely in the words of the original authorities, his Mémoires pour servir à l'histoire ecclésiastique des six premiers siècles (Paris, 1689 sq., 4to), which is the most thorough, learned, and accurate history of the six first centuries. The first comprehensive work in Roman Catholic Germany was commenced by count Stolberg, Geschichte der Religion Jesu Christi (Hamburg, 1806-1818, 8vo). The 15 vols. which he completed bring the history down to the year 1850. It is very copious and written with the enthusiasm of a poet, but is not critical. The continuation, by Kerz (vols. 16-28, 8vo, Mentz, 1824-54, to A.D. 1800) and Brisch (v. 38 sq., 8vo), are still inferior. The work of Katerkamp (Kirchengeschichte) (1783-30 to 1783, 4 parts, 8vo) is by far more thorough.

Rohrbacher's Histoire Universelle de l'Eglise (Par. 1842-49, vol. 29, 8vo; a continuation containing the Church History from A.D. 1856, by J. C. Schwitter-Dr. Rohrbacher) is written from an ultramontane standpoint, and has not made sufficient use of the recent investigations. The best Roman Catholic manuals of Church history are those of Döllinger (Gesch. d. christl. Kirche, vol. i parts 1 and 2, Landsbut, 1858-86; Lehrbuch der Kirchen- geschichte, vol. 1, Aachen, 1859 sq. to 24 ed. 1843; Kirchen- geschichte, vol. i, part 1, Heidetum und Judäum, Ratibson, 1857, part 2, Christenthum u. Kirche in der Zeit ihrer Grundle- gung, 1860, Eitter (Handbuch d. Kirchengesch. Bonn, 1826-85, 8 vols.; 6th ed. 1866, 2 vols.), and especial- ly Schickele's (Handbuch d. Kirchengesch. 8 vols.; 3d ed. 1843, Mainz, 1843, 8vo; 4th ed. 2 vols. 1867-68). Post- humid lectures on Church history by Dr. Möhler (died 1868), the greatest Roman Catholic theologian of Germany in the 19th century, were published thirty years after his death by Dr. Gams (Kirchengeschichte, 3 vols. Ratibson, 1878-80), a moderate and impartial Lutheran. The first comprehensive Church history from the Protestant standpoint was compiled by Mathias Flacius (1575), surnamed Illyricus (Ecclesiastica Historia No- stri Testamenti, usually called Centuries Magdeburgenses, Basel, 1556 sq.), and with great care and soundness. It followed the centennial arrangement, and treated of 18 centuries in as many folio volumes. It remained long the standard work of the Lutheran Church, though it is to a certain extent partial and often uncritical (see Centuries). Hottinger (1667) published a similar work, and the standpoint of the 17th century (formed Church), Historia Ecclesiastica N. Testamenti (Zurich, 1655-67, 9 vols.) extending to the 16th century, but it is inferior to that of Flacius. A thorough refutation of Barisonius was furnished by Spanheim (Summa Historiae Ecclesiasticae, Lugd. Bat. 1689, 4to). An attempt to re-write the Church history in a modern spirit (see Centuries) was made by J. G. Arnold (in his Un- partischiere Kirch- und Ketzerhistorie, 1698-1700, 4 vols., to 1698), which, however, was often unjust towards the predominant churches through partiality towards the sects. Objective Church history was greatly advanced by Mohelius's Historia ecclesiastica (1719, a moderate and impartial Lutheran. His Institutiones historiae ecclesiasticae antiquae et recentioriae (Heilbronn, 1755, 4to) is, in the English translation of Murdock (N. Y., 1841, 3 vols., 8yo ed.) and McIlhiney, a favorite text-book in England and America to the present day, and is excellent in general and far the best. The work of Schröck, Christliche Kirch- geschichte (45 vols., to the end of the 18th century, Leipzig, 1768-1812; the last 2 vols. are by Tschirnner), though leaning towards Rationalism, is very valuable for reference. The principal representative of Rationalism among Church historians is Henke, Allgemeine Geschichte der christlichen Kirche (Braunschweig, 1788-1828, 9 vols. 8vo, continued by Vater). The work of Gieseler (1854), Lehrbuch der Kirchengeschichte (Bonn, 1824-1857) gives the history as much as possible in the very words of the sources. It is profoundly learned and impartial, but cold and dry. The best English translation of it is by Prof. H. B. Smith (New York, 1857 sq.). Neander (1850) is generally considered as the father of modern Church history. His aim was to represent Church history as a continuous proof of the divine power of Christianity, and it is therefore prominently the history of church and state. His Allgemeine Geschichte der christlichen Religions und Kirche (Hamburg, 1825-52, 11 vols. 8vo, extending to the council of Basle) has been translated into English by Torrey (Boston, 1847-51, 2 vols. 8vo). Besides these larger works, Germany has produced a great number of excellent manuals. The most important of these are those of Niederer (1846, new ed. 1866), distinguished for fulness and thought: of Hase (9th ed. 1867, translated by Blumenfeld and Wilt, New York, 1855.
ECCLESIASTICAL HISTORY

8vo), distinguished for copiousness combined with conciseness; and Guericke (9th ed. 1867, translated by Shedd, vol. i, 1857), who wrote the best historical work from the old Lutheran standpoint. More a sketch than a manual of Church history is the Kirchengeschichte of Schleiermacher, published after his death by his J. G. J.). The first half of Engelhardt, of Erlangen (Handb. d. Kirchengeschichte, Erlangen, 1832-34, 4 vols.), is an unpretending but valuable arrangement of the subject, as derived from the sources. The manual of Friske, left incomplete (Lehrbuch der Kirchengeschichte, Leipzig, 1850, 1 vol.), learned but stiff, is printed in its best, revised form by Judowitsch in Stuttgart, 1841-46 to 1895, Christianity is treated as the natural product of the time in which it originated. Clerical selfishness, political calculations and intrigues, appear the sole principles of ecclesiastical movements which this author appreciates or discovers. Still, the work is of importance; and those volumes especially which detail the history of the Middle Ages give evidence of original study, and contain much fresh information. The manual of Jacobi (Handbuch der Kirchengeschichte, 5th ed. 1860, 4 vols.), originally delivered to an educated audience, are somewhat diffuse, but clear and attractive. They breathe throughout a warm Christian spirit, nor is the judgment of the lecturer warped by narrow sectarian prejudices. The works by J. A. Kurtz (Lehrbuch der Kirchengeschichte, Leipzig, 1849, 5th ed. 1863; Engl. trans., in 2 vols., Philadelphia, 1869; Handbuch der allgemein. Kirchengesch., vol. i in 3 parts, Mitau, 1853-54, vol. ii, part 1, 1856) belong among the best productions of the Lutheran school. To the same school belong the manuals of W. B. Lindner (Lehrbuch der Kircht. Kirchengesch., Leipzig, 1874-54) and H. Schmid (Lehr. der Kirchengeschichte, Nördlingen, 1851). The manual of Ehrard (Handbuch der christl. K.-u. Dogmengesch. Erlangen, 1865-66, 4 vols.) is written from the standpoint of the United Evangelical Church, as also the work of Neunh. A. Hasse, Kirchengeschichte, Leipzig, 1861-65, 3 vols., published after the author's death by A. Köhler. The works published by F. C. Baur, the founder of the Tübingen school on the Church history of the first six centuries (Das Christenthum u. d. christl. K. der dritter Jahrh. Tübingen, 1853, 3d ed. 1863, and Das christl. K. der vierten Jahrh. Tübingen, 1853, 2d ed. 1863) were after his death completed, so as to form a continuous and complete Church history, by the publication of three volumes, treating several of the Church history of the Middle Ages, of the time from the Reformation to the end of the 16th century, and of the 19th century. The five volumes appeared together under the title Geschichte d. christl. Kirche (Tübingen, 1863-64, 5 vols.). A Church history in biographies was published by F. Böhringer (Die Kirche Christi und ihre Zeugen, Zürich, 1842-48). Among the English works we mention Milner (1797), History of the Ch. of Christ to the 16th century (revised ed. by Grantham, Lond. 1847, 4 vols. 8vo). It has been continued by Dr. Stebbing, The Hist. of the Church of Christ from 1689 to the Eighteenth Century (London, 1839 sq., 3 vols., and a further continuation (Edinb., 1896); Waddington, History of the Church from the earliest Ages to the Reformation (Lond. 2d edit. 3 vols. 8vo, and Hist. of the Reform. on the Continent (Lond. 1841, 3 vols. 8vo), is neither accurate nor profound; Foulkes, Manual of Ecclesiastical Hist. (1861, to the 12th cent.); Robertson, Hist. of the Church (Lond. 2 vols. 1854-56, 8vo) to 1122; Milman, Hist. of Christianity (Lond. 1840, 3 vols. 8vo, reprinted in New York), and Hist. of Latin Christ. (Lond. 1854 sq. 6 vols. to Nicholas V.; 4th ed. in 9 vols. 1867, reprinted in New York), an elaborate and at the same time brilliant work; Hardwick, Hist. of the Christ. Church, vol. i Middle Age, vol ii Reform. (Cambridge, 1853 and 1868, 8vo), an admirable work. The collection of the author: Hinds, Jeremie, and others, Church History, in the Encyclopedia Metropolitana, and in a separate edition (Lond. 1850-58, 4 vols. 8vo); Killen, The Ancient Church (Belfast and New York, 1859, 8vo), an able work from the Presbyterian standpoint. The best works on Church history in America are 1831 by Prof. Schaff (Hist. of the Apostolic Age, New York, 1838, 8vo, and Hist. of the Christian Ch. vol. i to A.D. 311, New York, 1859, 8vos. ii and iii to Gregory the Great, New York, 1867. They have also appeared in a German edition, Geschichte der christl. Kirche, vol. i, Merseburg, 1851, and Leipzig, 1854; vol. ii and iii, Leipzig, 1867). They are distinguished by copiousness of material, philosophical arrangement, and attractive style. A brief work on the history of the Christian Church has been published by Dr. C. M. Butler (Philadelphia, 1869). In Protestant history, a numerous literature on special periods. The works treating of the primitive Church have been given in the article on the APOSTOLIC AGE. An able work on the history of the first three centuries has been published by Ed. de Pressensé (Histoire des trois premiers siecles, Paris, 1854, 8vo), and of modern Church history, by Dr. Nippold (Elberfeld, 1867) and Hagenbach (1865). For the ample literature on the period of the Reformation, see the article REFORMATION. The literature on branches of ecclesiastical history, such as history of heresies, councils, particular religious denominations, popes, saints, countries, monasticism, crusades, etc., and that on prominent men of Church history, is given in the special articles treating of those subjects. Tables of Church history, presenting in parallel columns the various church histories of the world, are to be found in Germany by Vater (Halle, 6th ed. 1838), Danz (Jena, 1838), Lange (Jena, 1841), Dousay (Leipzig, 1841), Uhlemann (to the Reformation, 2d edit. Berlin, 1865); in England, by Riddle (Ecclesiastical Chronology, London, 1840); in America, by H. B. Smith (Hist. of the Ch. of Christ, Philadelphia, 1864, 8vo), ed. 1863). This work has considerably improved the plan of all its predecessors, and, in fact, is the most thorough and complete work of the kind extant. Special dictionaries of Church history were compiled by W. D. Fuhrmann (Handbucher der christl. Religionus-a. Kirchengesch. Halle, 1826-29, 3 vols.) and Neudecker (Allgem. Lex. der Religionus-a. christl. Kirchengesch. Weimar, 1834-37, 5 vols.). Periodicals specially devoted to ecclesiastical history have been published by Staudin, Tschircher, and Vater (Magazin für Religionus-a. Kirchengesch., by Staudin, 4 vols. Hanover, 1835-53; Archiv für alte u. neue Kirchengesch., by Staudin u. Tschircher, 4 vols. 1818-22, 5 vols.; Kirchenrat. Archiv, by Staudin, Tschircher, u Vater, 4 vols. Halle, 1823-26; by Illgen, Niederr. and Kahnis (Zeitschrift für hristl. Theologie, Leipzig, 1832-1858; established by Illgen; since 1845, by Niederr.; since 1867, by Kahnis); by Kist and Roysdaels (Archiv voor Kunst, Techeelsg. en Christel. Letterk., 1828-29). See Herzog, Real-Encykl. v. 722, Hagenbach, Thes. Encyklop. p. 312 sq., Wetzer u. Weis, Kirchen-Lex. v. 130, Christian Remembrancer, xiiii, 62, Jortin, Remarks on Ecclesiastical History; Princeton Rev. xxvi, 200, xxxii, 660; Stanley, Ecclesiastical History (Introduction on the Study of Church History); Dowling,
ECClesiASTICAL POLITY

to the Critical Study of Ecclesiastical History attempted in an Account of the Progress, and a short Notice of the Sources, of the History of the Church (Lond. 1838, 8vo).

Ecclesiastical Polity denotes the principles and laws of Church government. Personal religion is a matter to the individual man and his Maker. But religion necessarily involves social relations; that is to say, it involves society; and no society of men can exist without government. True, there can be no compulsion in religion; but government is not inconsistent with freedom; nay, it is necessary to all true existence of any society, whether of two or of many. The "two conditions essential to a good religious government are, first, a good system for the formation and organization of authority; and, second, a good system of security for liberty" (Guizot, History of Civilization, N. Y. 1840, p. 121).

So Richard Watson: "The Church of Christ being visible and permanent, bound to observe certain rites and to obey certain rules, the existence of government in it is necessarily supposed."

Is any form of Church polity divinely ordained? from the original position in which Christ placed the Church. We gather some elements of polity from the practices of the apostles as recorded in their acts and writings. This polity is not presented as legislative enactments, but simply as facts, showing how the apostles acted in given cases. In the first account we find the Church composed of the apostles and other disciples, and then of the apostles and the multitude of them that believed." Hence it appears that the Church was at first composed entirely of members standing on an equality with one another, and that the apostles alone held a higher rank, and exercised a directing influence over the whole body, which arose from their apostleship. It is this original position of the Church, which is based on the authority of Christ, that is represented, in the New Testament, as the pattern of the Church of Christ (Acts, vii, 53; 1 Tim. ii, 5; Titus, i, 6), and this forms the basis of the Lutheran theory of Church polity, in which the rights of the laity are fairly regarded. "Properly, all Christians have a right to teach—every father his own family; and even to administer the sacraments, as even Tertullian truly observed, and he therefore, in most of his works as diversely, as Grotius, Salmiasius, Böhme, and Spener have maintained. Even among the Jews the teachers of the people were not priests, but laymen; and any one who had proper qualifications might teach in the synagogue or in the temple. Among the ancient Israelites the priests were the leaders of the priesthood, but, for the most part, from other tribes, classes, and orders of the people" (Knapp, Lectures on Christian Theology, Wood's translation, Phila., 1853, 8vo, p. 478). Calvin (Institutes, book iv) sets out the principles of Church polity, as they were divinely commanded. He finds a certain "mode of government delivered to us by the pure word of God" (iv, 1, and traces this form of government in the early Church until its "subversion by the papal tyranny" (ch. v). In substance Calvin asserted the following principles: 1. The First Church of Christ was under the direct government and direction of Christ (1 Cor. xii, 28; Gal. iii, 28). He is the Head of the Church. 2. The Church of Christ should be the city of God. It is a theocracy and of divine institutions as such, and as such is to be regarded with reverence. Its members have a positive obligation to be organized, if possible, as a visible society, and to be organized in all things, so far as possible.—its office-bearers, ordinances, worship, and general administration and arrangements—according to what is prescribed or indicated upon these points in the New Testament. 3. That the fundamental principles, or leading features of what is usually called Presbyterian Church government, are indicated with sufficient clearness in the New Testament, as permanently binding upon the Church. 4. That the Church should be the city of God, independent of civil control, and should conduct its own distinct and independent government by preachers and synods, while the civil power is called upon to afford it protection and support. 5. That human laws, whether about civil or ecclesiastical things, and whether promulgated by civil or religious power, do not, per se, i.e. irrespective of their being sanctioned by the authority of God—impose an obligation upon the conscience. Calvin professed to find all these principles more or less clearly taught in Scripture (B. and F. Ec. Rev. April, 1860, p. 164). On this principle Tullioch remarks (Leaders of the Reformation, p. 179 sq.) that Calvin went too far in asserting that Presbyterianism "is the form of the divine kingdom presented in Scripture." "Presbyterianism became the peculiar Church order of a free Protestantism. It was first, on the contrary, on a principle, therefore, of the Church, that it never could have attained this historical success. But it did not merely assert itself to be wise and conformable to Scripture, and therefore divine, but it claimed the direct impress of a divine right for all its details and applications. This gave it strength and influence over the whole ecclesiastical age, in a rule and order, which was the first element of corruption. The great conception which it embodied was impaired at the root by being fixed in a stagnant and inflexible system, which became identified with the conception as not only equally but specially divine" (p. 181).

Are these elements, some of which are called 'sacramental,' to be found in the Bible? Did not Calvin establish his Church polity and Church discipline upon Scripture? and is not this a warranta-
ble course? Assuredly not, in the spirit in which he did it. The fundamental source of the mistake is here. The Christian Scriptures are a revelation of divine truth, and not a revelation of Church polity. They not only do not lay down the outline of such a polity, but they do not even give the adequate and conclusive hints needed for the determination of all the requirements, that it would have been entirely contrary to the spirit of Christianity to have done so; and because, in point of fact, the conditions of human progress do not admit of the imposition of any unvarying system of government on civil society. The Scriptures inculcate a spirit of self to the life, everywhere expands with it, or narrows with it, but is nowhere in any particular form the absolute condition of life. A definite outline of Church polity, therefore, or a definite code of social ethics, is nowhere given in the New Testament, and the spirit of it is entirely things that it untried. There may be differences of opinion among Presbyterians as to the extent to which a divine right should be claimed for the subordinate features of the system, and some, no doubt, have gone to an extreme in the extent of their claims; but no Presbyterians of eminence in the Church can, in any just sense, claim a divine right for all the details and applications of their system. They have claimed a divine right, or Scripture sanction, only for its fundamental principles, its leading features. It is these only which they allege are indicated by the Lord's example; such a doctrine would bind the Church in all ages. And it is just the same ground that is taken by all the more intelligent and judicious among the reformed prelates and Congregationalists' (Brut. and For. Ev. Review, April, 1860).

Moreover, Calvin did not approve ecclesiastical bodies which he did not choose to adopt the Presbyterian regimen. He introduced his scheme where he had influence to do so; and he employed all the vigor of his talents in pressing upon distant churches the propriety of regulating, in conformity with his sentiments, their ecclesiastical government. But, at the same time, he did not wish to be regarded as the mouthpiece of the Gospel as heard with reverence, and the sacraments are not neglected, there at that time there is a church. Scripture, of faithful pastors, he describes them to be "those who by the doctrine of Christ lead men to true piety, who properly administer the sacred mysteries, and discharge the other spiritual duties." The Reformation and greatest writers of the Church of England held that no form of Church polity is enjoined in Scripture. Cranmer explicitly declared that bishops and priests were of the same order at the commencement of Christianity; and this was the opinion of several of his distinguished contemporaries. Holding this maxim, their support of episcopacy must have proceeded from views of expediency, or, in some instances, from a conviction which prevailed very generally at this early period, that it belonged to the superintendence of the civil to regulate the spiritual as much as the political government; an idea involving in it that no one form of ecclesiastical polity is of divine institution. At a later period, during the reign of queen Elizabeth, we find the same conviction, that it was no violation of Christianity to choose different modes of administering the Church. Archbishop Whitgift, who distinguished himself by the zeal with which he supported the English hierarchy, frequently maintains that the form of discipline is not particularly, and by name, set down in Scripture; and he also plainly assigns a reason for the government laid down by the Scriptures prescribed or commanded to the Church of God" (Watson, s. v.). Hooker maintains this principle with great vigor in his Ecclesiastical Polity (book iii), where the following principles are laid down: 1. The Scripture, though the only standard and law of doctrine, is not a rule for discipline. 2. The practice of the apostles, as they acted according to circumstances, and without that, the Church. 3. Many things are left indifferent, and may be done without sin, although not expressly directed in Scripture. 4. The Church, like other societies, may make laws for her own government, provided they interfere not with Scripture. 5. Human authority may intervene with the Church. In case of a dispute between the Church and the Scriptures, the Church may appoint ceremonies within the limits of the Scriptures. Stillingfleet indicates the same view at large in his Irenicum: "Those things may be said to be jure divino which are not determined one way or other by any positive law of God, but are left wholly between them in a way agreeable to natural right and the general rules of the Word of God." His conclusion is that the reason or ground of Church government, the ratio regimini ecclesiasticae, is of divine right, but that the special mode or system of it is left to human discretion. It is by no means equally indisputable what the form of government must be. The necessity of having of necessity it is not as equally in doubt in the case of civil government. "Though the end of all be the same, yet monarchy, aristocracy, and democracy are in themselves lawful means for attaining the same common end. . . . So the same reason of Church government may be advanced, that God may be a king in the persons acting as governors of the Church in one place which may call for superiority and subordination in another" (Irenicum, p. 40 sq., Phila. 1840).

In the modern Church the Romanists and High Episcopalians claim divine right for their system of government. The Roman Catholic doctrine is thus stated (The Catechism of the Council of Trent, published by command of pope Inno's translation, Baltimore, n. d., 8vo): "Sitting in that chair in which Peter the prince of the apostles sat to the close of life, the Catholic Church recognises in his person the most absolute and universal power, the right of universality—a dignity and a jurisdiction not based on synodal or other human constitutions, but emanating from the authority of God himself. As the successor of St. Peter, and the true and legitimate representative of Peter, he therefore possesses, as universal Church, the father and governor of all the faithful, of bishops also, and of all other prelates, be their station, rank, or power what they may" (p. 222). And (p. 82), speaking of the power of the keys, "it is a power not given to all, but to bishops and priests only." The following extracts from bishop Forbes's Explanation of the Thirty-nine Articles (London and New York, 1867—8, 2 vols. 8vo) present a High-Church Episcopalian view of this subject: "Thus one department of the Church is to be called the Ecclesia docens. To the hierarchy, as distinguished from the great body of Christians, is committed the duty of interpreting and communicating these truths" (Art. xix, p. 268 of vol. i). . . . "It having been shown in the preceding article that the Ecclesia docens hath power to decree rites and ceremonies, and hath authority in controversies of faith, we come to consider one great channel of authority in this episcopalian council. Given that the Church has this power, by whom or how is it to be exercised? By whom but by the apostolical ministry, who are appointed for the perfecting of the saints, for the work of the ministry, for the edifying of the body of Christ? They who are committed the power of the keys, who had, among other duties connected with admission to communion,
to test the orthodoxy of applicants; by those whose important office it was to hand on the form of sound words which they had received to their successors” (Art. xxi, p. 286-9 of vol. i). . . . "Our Lord is the immediate founder of the hierarchy, because it was he who ordained the apostles bishops and assigned to them. ‘As my Father sent me, send I you; receive the Holy Ghost: go ye into all the world and make disciples of every creature; whatsoever ye shall bind or loose on earth shall be bound or loosed in heaven.’ These words denote a power without limit; its measure is not given; its efficacy, its all-sufficiency, extend over the whole world. At the beginning of the Church there was one general episcopate” (Art. xxxvi, p. 699 of vol. ii). . . . "It is needless to add that the discipline as well as the doctrine of the Church was a purely internal matter, in which the state had no interest nor control. . . . They . . . do not mean to prejudice the matter of all Church discipline, for it relegated the sanction of the visible Church into the unseen world. If salvation depended, clave non errante, upon Church membership, and Church membership, under certain laws, was in the hands of the hierarchy, it placed the control of the Church absolutely in the hierarchy” (Art. xxxvii, p. 728-9 of vol. ii). The moderate Episcopalians (including Methodists and Moravians) generally hold that episcopacy is in harmony with Scripture, but is not divinely ordained as essential. For a temperate argument in favour of Church history and episcopacy, see Archbishop Whately’s (The Kingdom of Christ, 2d ed. N. Y. 1845, 12mo) says (p. 59): “Thus a further and important advantage of the Anglican church is furnished by the view that the form of episcopacy has been taken, viz., that it was the plan of the sacred writers to lay down clearly the principles on which Christian churches were to be formed and governed, leaving the mode of application of those principles undetermined and discretionary.” And again (p. 215): “In the English Episcopal Church the province of judicatory (the General Conference) is as yet (1860) an exclusively clerical body. But that body has itself admitted the rights of the laity to the fullest extent by submitting to a popular vote (held in June, 1860) the fundamental question whether lay delegation shall be practically incorporated into the ecclesiastical system or not. The vote is by a very large majority in favor of lay delegation, and now (July, 1861) only the concurrence in the proposed changes of the Restrictive Rules of three fourths of all the members of the Annual Conferences, present and voting thereon, is required for the admission of lay delegates to the next General Conference in 1872. In the Methodist Episcopal Church South, this change in its polity was, by the General Conference held in 1866, likewise submitted to the Annual Conferences, and, having received the requisite approval, has been adopted by the several Conferences, and incorporated in its economy. This subject of controversy in the Methodist Episcopal churches of the United States seems, therefore, now on the eve of settlement. For other points related to ecclesiastical polity, see Church; Church and State; Discipline; Episcopacy; Laymen. Literature.—Hooker, Laws of Ecclesiastical Polity (Works, vol. i); Potter, Discourse of Church Government (Works, vol. ii); Stilllingfleet, Irenicum (Philad. 1842, 8vo); Watson, Institutes, pt. iv; Litton, Church of Christ (Lond. 1853, 8vo); Barrett, Ministry and Polity of the Christian Church (Lond. 1854, 12mo); Storck, Principles of Church Polity (N. Y. 1859, 12mo); Coleman, Primitive Church Polity, 88-50; Wilson, On Church Government; Davidson (Congregational), Ecclesiastical Polity of the New Testament (Lond. 1854, 12mo); Morris (Bishop), On Church Polity (18mo); Fillmore Ecclesiastical Polity, its Forms and Functions, by Ripley (Congregational), Church Polity (Boston, 1865, 18mo); Garrett, Inquiry into the Scriptural View of the Constitution of a Christian Church (Lond. 1848): New Englander, August, 1860, art. vi (Congregational); Leicester A. Sawyer, Organic Christianity, or An Address of Church of God, with its Officers and Government, with its Eves, and Variations, both in ancient, medieval, and modern Times (Boston, 1855, 12mo; Congregational).
ECCLESIASTICUS

Ecclesiasticus, one of the most important of the apocryphal books of the O. T. (see Apocrypha), being of the class ranked in the second canon. See DEUTERO-CANONICAL.

1. Title.—The original Hebrew title of this book, according to the authority of the Jewish writings and St. Jerome (Pref. in Libro Sol. i, 1242), was הֶבְרָאָדֶרֶת, Proverba, or, more fully, בֵּרָאָדֶרֶת יְשִׁירָה אֲנָשָׁה, the Proverbs of Jesus, son of Siria, which was abbreviated, according to a very common practice, into ישִׁירָה אֲנָשָׁה, Ben-Sira; יְשִׁירָה, Shiruk, which we find in a few later writers, evidently originated from a desire to imitate the Greek Σερια, Hence all the quotations made from this book in the Talmud and Midrashim are under these titles. (Comp. Mishna, Tadrim, iii, 15; Chagigga, p. 15; Midrash Rabbi, p. 6, 8.; Tanachuma, p. 69, a, etc.) The Greek MSS., and fathers, however, as well as the prologue to this book, and the printed editions of the Sept., designate it שִׁירָה יְשִׁירָה יְשִׁירָה יְשִׁירָה וְרָאָדֶרֶת (v. r. ישִׁירָה וְרָאָדֶרֶת, and even ישִׁירָה וְרָאָדֶרֶת), The wisdom of Jesus, the son of Siria, or, by way of abbreviation, ישִׁירָה, The wisdom of Sirach, or simply Sirach; also 조산 ኧጎስ, የጎስ እውነት የጎስ, እውነት የጎስ, የጎስ እውነት የጎስ. The wisdom of Sirach, or of all virtues, because of the excellency and diversity of the wisdom it propounds (Jerome, l. c.; comp. Routh, Rel. Sacr. i, 274). In the Syriac version the title is The book of Jesus, the son of Simon Asiro (i. e. the bound); and the same book is called the wisdom of the sages of the Jews. Among the authors it is simply styled Wisdom (Orig. in Matt. xiii, 4); compare Clem. Al. Pol. i, 8, § 69, 72, etc., and Jesus Sirach (August. ad Simplic. 1, 20). The name Ecclesiastus, by which it has been called in the Latin Church ever since the second half of the fourth century (Rufinus, Hieron.; Orig. In Num. xviii, 3), and which has been retained in many versions of the Reformers (e. g. the Zurich Bible, Coverdale, the Geneva version, the Bishops' Bible, and [together with the other title] the Auth. Version) is derived from the old Latin version, adopted by Jerome (the Græce), and is explained by no less than four words—church reading-book. Calmet, however, is of opinion (Preface) that this name was given to it because of its resemblance to Ecclesiastes. But as this explanation of the title is very vague, it is rightly rejected by Luther, and almost all modern critics. The word, like many other Greek names of authors, is derived from a word adopted in the African dialect (e. g. Tertull. De pudic. c. 22, p. 438), and thus it may have been applied naturally in the Vetus Latina to a church reading-book; and when that translation was adopted by Jerome (Pref. in Libro Sol. ii, 299; x. 404, ed. Migone), the local title became the prevailing one throughout the West, where the book was most used. The right explanation of the word is given by Rufinus, who remarks that "it does not designate the author of the book, but the character of the writing," as publicly used in the services of the Church (Comm. in Salm. § 80). The biblical application by Rufinus of the general name of the class (ecclesiasticus as opposed to canonici) to the single book may be explained by its wide popularity. Athanasius, for instance, mentions the book (Ep. Fest. s. f.) as one of those "framed by the fathers to be read by those who wish to be instructed (carnis, κατανοηθηναι) in the word of godliness."

11. Design and Method.—The object of this book is to propound the true nature of wisdom, and to set forth the religious and social duties which she teaches us to follow through all the varied stages and vicissitudes of this life, thus exhibiting the practical end of man's existence by reviewing life in all its different bearings and aspects. Wisdom is represented here, as in Proverbs, as the source of human happiness, and the same views of human life, founded on the belief of a recompense, pervade the instructions of this book also, wherein, however, a more matured reflection is perceptible (De Wette's Einleitung). It is, in fact, the composition of a philosopher who had deeply studied the fortunes and misfortunes of mankind, and who does not hesitate to avow himself of the philosophy of older moralists: xii, 8—xiii, 23; xv, 11—20; xvi, 26—xvii, 20; xix, 6—17; xxii, 16—27; xxvi, 1—18; xxx, 1—13; xxxvii, 27; xxxviii, 15, 24—xxxix, 11, etc. (Ib.). It abound in grace, wisdom, and spirit, although sometimes objects more gentle principles of politeness than that of virtue (Cellerier, introd. à la Lecture des Liv. Saints). It is not frequently marked by considerable beauty and elegance of expression, occasionally rising to the sublime heights of human eloquence, (vol. vii). It has been observed of it by Addison (see Horne's Intro. vol. iv) that "it would be regarded by our modern wits as one of the most shining tracts of morality that are extant if it appeared under the name of a Confucius, or of any celebrated Greerian philosopher."

In addition the fact that no Palestinian production, whether inspired or uninspired, can be reduced to a logically developed treatise according to Aristotelian rules, there are difficulties in tracing the plan of this book, arising from the peculiar circumstances of the author, as well as from the work itself. Ben-Sira brings to this task the plan of his work, the experience of a studious and practical life, and in his great anxiety not to omit any useful lesson which he has gathered, he passes on, after the manner of an Eastern logician, from the nature of heavenly wisdom to her godly functions, to their teaching in life, and to the duties of men. He discloses before the eyes of his readers the inward workings of the heart and mind, he depicts all passions and aspirations, all the virtues and vices, all the duties towards God and man, in proverbs and apothegms, in sayings which have been the property of the nation for ages, and in his own creation, with a rapidity and suddenness of transition which even an Eastern mind finds it at times difficult to follow. Add to this that the original Hebrew is lost, that the Greek translation is very obscure, that it has been mutilated for dogmatic purposes, and that some sections are transposed beyond the limits of adjustment, and the difficulty of displaying satisfactorily the method or plan of this book will at once be apparent, and the differences of opinion respecting it will be no matter of surprise. The book (see Fritzsche’s proleg. in his Commentator) is divisible into several parts or sections, the most obvious being chap. iv, which treats of the nature of wisdom, gives encouragements to submit to it, as well as directions for conducting ourselves in harmony with its teachings; 5, xvi, 22—xviii, 17, shows God in the creation, the position man occupies with regard to it, the giving of the law, and gives directions how he is to conduct himself under different circumstances, and how to avoid sin; 3, xxiv, 1—xxxvii, 24; xxxix, 12—xxvii, 16; xxxvii, 25—27, describes wisdom and the law, and the writer’s position as to the former, gives proverbs, maxims, and admonitions about the conduct of men in a social, wise of view: 4, xxxvi—xxviii, 11; xxxvi, 16—22, describes the wise and just conduct of men, the Lord and his people; 5, xxxvi, 23—xxxvii, 11, instructions and admonitions about social matters; 6, xxxix, 12—xiii, 4, God’s creation, and the position man occupies with regard to it; 7, xiii, 11—16, the praise of the Lord and his people, and extended himself in the domain of nature, and in the celebrated ancestors of the Jewish people. Thereupon follows an epilogue, ch. 1, 27—29, in which the author gives his name, and declares those happy who will ponder over the contents of this book, and act according to its teaching as well as an instance of doing so, 1—30, praising the Lord for deliverance from danger, describing how the writer has successfully followed the paths of wisdom from his very youth, and calling upon the uneducated to get the precious treasures of wisdom. See WISDOM PERSONIFIED.

11. Its Unity.—The peculiar difficulties connected
both with the plan of the book and the present de-
arranged condition of its text will have prepared the
reader for accepting the unity and consistency of
this book. We may therefore say that there is no unity
at all in the composition of this book, and
that it is, in fact, a compilation of divers national say-
gings, from various sources, belonging to different ages
(vertexed, in Horne's Introd. ii, 1018 sq.). En-
couragement is sought for these assertions from the
statement respecting the unity of works of this kind: "
môn to τίτημα τῶν πράγματων, αὐτός ἀυτοῦ ἀξίης ἀγαθοστιγματά συναγαγεῖ, ἀλλὰ καὶ αὐτός ἤθε τίνα ἀφεθήκτο, as well as from the remark of St. Jerome:
"Quorum priorum [παντίκευτο ζευιλιφιρά iurirum] 
Helenorum recepti, non Ecclesiae, sed Pauli
pernaeumotum, cui juncti erant Ecclesiastia-
etes et Canticum Canticorum, ut simultinem Salomo-
nis non solium librum numero, sed etiam materia-
rum genere conquireat" [Pref. in Libr. Solom.,]
which seems to imply that the book of Ben-Sira was intended
to answer to all the three reputed works of Proverbs.
So also Luther. Eichhorn can see in it three different
books: the first book consists of chaps. i-xxiiii,
comprising deutschastic remarks upon life and morals,
and is divisible into two sections, viz. (a) i-ix, and (b) x-
xxiiii; the second book comprises xxvii-xlix, 14, begins
with some vivid description of wisdom's works from
which follow some remarks and maxims without any order; and the third
book, comprising xlii, 15-1, 24, is the only portion of
Siraich carefully worked out, and contains praise of
God and the noble ancestors of the Hebrews (Einle-
tung in d. Ap. p. 50, etc.). Ewald, again, assigns
that work to the first experience of the people in the
basis of his book, so that his merit chiefly consists in
arranging those works and supplementing them.
The first of these two books originated in the fourth
century before Christ, extends from ch. i to xvi, 21, and
covers the sphere of the Wisdom, which of all the
canonical books is the most ancient. The second book
originated in the third century before Christ, extends from xvi, 22, to xxi,
22, and displays the excitement of passions as well as
some penetrating observations, and has been greatly
misplaced in its parts, which Ewald rearranges. The
third book, which is the genuine work of Ben-Sira, ex-
ceeds from xvi, 23 to li, 30, with the exception of the
song of praise contained in xxxxi, 12-35, which
belongs to the author of the second work (Geschichte
of V. Jer. iv, 300, etc.; Jahrb. iii, 131, etc.). These
must suffice as specimen of the opinions entertained by
the authors of the book. When perusing the text of this
book, however, it must be urged—1. That the difference
in form and contents of some of the constituent parts
by no means precludes the unity of the whole, seeing
that the writer brought to the illustration of his design
the experience of a long life, spent both in study and
travelling. 2. That this is evidently the work of the
author's life, and was written by him at different pe-
riods. 3. That the same design and spirit pervaded the
whole, as shown in the foregoing section; and, 4. That
the abruptness of some portions of it is to be traced to
the Eastern style of composition, and more especially
to the present deranged state of the Greek translation.

IV. Author and Date.—This is the only apocryphal
book the author of which is known. The writer tells us
himself that his name is Jesus [i.e. Jesus, the son of Siraich, and that he is of Jerusa-
lem (1, 27). Here, therefore, we have the production of
a Palestinian Jew. The conjectures which have been
made to fill up this short note are not warranted
(e. g. that he was a physician, from xxxxi, 1-15)
or absolutely improbable. There is no evidence to
show that he was of priestly descent; and the simili-
arity of names is scarcely a plausible excuse for confun-
ding him with the Hellenizing high-priest Jason
(2 Macc. iv, 11; George Sync. Chron. p. 276). In
the Talmud, the name of Ben-Sira is יִבְנֵשָׂרָא, or which
יהוָאָרָא is a late error, Josh, Geach. d. Judench. p. 311),
occurs in several places as the author of proverbial
sayings which in part are parallel to sentences in
Ecclesiasticus, but nothing is said as to his date or per-
sion, and the tradition which ascribes the authorship of
the book to Elizezer (B.C. 260) is without any adequate
foundation (Jost, iv.; yet see note 1). The Palestinian
origin of the author is, however, substantiated by in-
ternal evidence, e. g. xxiv, 10. For the various
speculations advanced about the person, character,
acquisitions, and position of the author, we must re-
fer to the article Jesus, son of Sirach. That
the book should have been ascribed by the Latin Church
to Solomon, notwithstanding this plain declaration of
the book itself, is due to the credulity of the Latins. If
Siraich is spoken of, the reference to Solomon's success-
ors, to prophets and other great men who lived before
and after the Babylonish captivity, the mention of the
twelve minor prophets (xix, 10), the citation from the
prophet Malachi (comp. xviii, 10, with Mal. iv, 6), and
the description of the high-priest Simoon (chap. 1), only
shows what the fathers can do.

The age of the book has been, and still is, a subject
of great controversy. The life-like description of
the high-priest Simon, contained in chap. i, seems to indi-
cate that the writer had seen this high functionary of
the Temple in action. But the description of the
same name, viz. Simon, son of Onias, named
the Just, or the Pious, who lived B.C. 370-300,
and Simon II, son of Onias, who lived in the reign
of Ptolemy Philopator, B.C. 217-195 (8 Macc. i, 2). See
noted by Eusebius (Hist. Eccl. iv, 17). The
explanation that Simon I is described by Ben-Sira, whilst
others think that Simon II is intended. The lives and acts
of these two pontiffs, however, as well as the esteem
in which they were respectively held by the people,
as recorded in their national literature, must show to
the reader what of these two high-priests the Ben-Sira
is applicable. 1. The encomiums show beyond
doubt that one of Israel's most renowned high-priests is
described, whereas Simon II was so little distinguish-
ed that Josephus cannot relate a single good thing
about him. 2. Ben-Sira characterizes him as the de-
header of all the people from destruction; whereas in
the time of Simon II no deliverance of either the people
or the Temple was necessary. 3. In the time of Simon
II, Hellenism, the great enemy of Judaism, which was
represented by the sons of Tobias, had made great
progress; and if Ben-Sira had written about Simon II,
we should have expected some comments from this pious poet of
these thoughtless and godless innovations, whereas
there is no allusion to these throughout the whole
of this book. This appears the more strange when it
is borne in mind that Simon II himself sided with
the sons of Tobias, and therefore, that the Ben-Sira
life-like description refers to Simon I. Now Simon
I died B.C. 300, Ben-Sira must have written his
work not earlier than 290-280, as chap. I implies
that this high-priest was dead. (See also infra, sec. vi.)
V. The original Language of the book.—The trans-
lator of this work into Greek most distinctly declares
in his preface that it was written in Hebrew, and St.
Jerome assures us that he had seen the Hebrew original
(cvide supra, sec. iii.). That by the term Ἐφασωρι is
meant Hebrew, and not Aramaic, is evident from
the numerous quotations made from this book both in the Talmud and the Midrashim. Compare

By some writers, however, it is thought that the Sentences of Ben-Sira were written in genuine Hebrew. Besides, some of the historians, the Greek can only be accounted for from the fact that the original was Hebrew. Thus, for example, in xxiv, 26 we read, "He made him knowledge to come forth as light, as Gihon in the days of vintage, where the parallelism Γνως photoshop (Gen. ii, 18), whereby the Νως is designated in later times, which the Sept. also understands by Γνως (Jer. ii, 18), shows that we φως in the first hemistic originated from the translator's mistaking the Hebrew "וגנ" like a stream, for γνως, like light. Comp. also xlix, 9, 3, which is most unintelligible in the Greek through the translator's mistaking the Hebrew בוש for בוש. Bishop Lowth, indeed, went so far as to assert that the translator "seems to have numbered the words, and exactly to have preserved their order, so that, were it literally and accurately to be retranslated, I have very little doubt that, for the most part, the original diction would be recovered." The learned prelate has actually rettranslated this chapter into Hebrew (Beur. Poet. Lect. xxiv, Oxford ed. 1821, p. 324). This rettranslation is also printed by Fritzsche, who has added some corrections of his own, and who also gives a translation of chap. I.

VI. The Greek and other Translations of this Book.—The English translation incorporated in the Sept. was made by the grandson of the author (δ' ως, μου, μου, 1ηρος), who tells us that he came from Palestine into Egypt in his thirty-eight year, "in the reign of Euergetes (1v ῥυ αγων και ῥασιντ αν ἑν τοι ηερο γους Βασιλειας). But there were two kings who have been supposed by scholars to be the personages thus mentioned, Ptolemy II. Philadephus, B.C. 247-222, and Euergetes II. I. e. Ptolemy VII, known by the nickname Physcon, the brother of Ptolemy VI, B.C. 146-116, and the question is, which of these two is meant? Now, if Ben-Sira wrote B.C. cir. 220-200, when an old man, and if we take δ' ως μου, μου, to mean great-grandfather, a sense which it frequently has, and that the translation of Euergetes is the second the death of this illustrious ancestor, his arrival in Egypt in his thirty-eighth year would be B.C. cir. 230, i. e. in the reign of Euergetes I. On the other hand, the manner in which the translator speaks of the Alexandrine version of the Old Testament, and the familiarity which he shows with it, e. g. xlix, 16, "Eve, Ezek. xxiv, 24; comp. Linde, ap. Eichhorn, p. 41, 42," is scarcely consistent with a date so early as the middle of the third century. Winer (De utr. Synec. etat. Erliang. 1832) maintains that Simon the Just is the person referred to, but that it is not necessary to conclude that the author wrote in the latter's time. He thinks that, although the grammatical construction rather requires ἐν τοι ἐν τοι ἔκτυρον to refer to the age of the monarch's reign, Euergetes the Second was the king in whose reign the translation was made, and that the council could not have been yet closed under the reign of the first Euergetes, as implied in the phrase—"the law, the prophets, and the other books." As there appears to be no special reason for the translator's reference to his own age, the date has been taken to allude to that of the reigning Ptolemy by many critics since, e. g. by Bruch, Palmer, of York, Schenkel, Edwald, Fritzsche, etc. The "thirty-eighth year of his reign," although not applicable to the first Euergetes, may refer to the second, if his regency be included. According to this, which De Wette conceives the most probable hypothesis, the translator would have lived B.C. 130-110. The Second Ptolemy B.C. 180-160, and the Jewish historians, tinterpreters, the chronological datum in question refers to the translator's own age, then the grandson of the author was already past middle-age when he came to Egypt; and if his visit took place early in the reign of Ptolemy Physcon, it is quite possible that the book itself was written while the name was still fresh in his memory, at last, of the "men of the great synagogue" was still familiar to his countrymen. Even if the date of the book he brought somewhat lower than the times of Simon the Just, the importance of the position which that functionary occupied in the history of the Jews would be a sufficient explanation of the distinctness of his portraiture; and the political and social troubles to which the book alludes (ii, 6, 12; xxxix, xii) seek to point to the disorders which marked the transition of Jewish allegiance from Egypt to Syria rather than to the condition of the prosperous times in which the translation was enjoyed during the supremacy of the earlier Ptolemies. On the whole, therefore, we may conclude that the book was probably written B.C. cir. 200, and translated B.C. cir. 140.

The present state of this translation, however, is very debatable; the text as well as the MSS. are greatly disfigured by numerous interpolations, omissions, and transpositions. The Old Latin version, which Jerome adopted in the Vulgate without correcting it, was made from this Greek translation, and, besides being barbarous in style, is also greatly mutilated, and in many instances cannot be harmonized with its original. Even in the first two chapters the following words occur which are found in no other part of the Vulgate: "de functo" (i, 15), "reliquiis" (i, 17, 18, 26), "compartiri" (i, 24), "inuerumallo" (i, 26), "obsolcto" (i, 2; v, 1, 10), "reiusmamma" (i, 14). The Syrian text, on the other hand, is the direct text of the Hebrew, and contains a quotation made by Jose ben-Jochanan about 150 B.C. (comp. Aboth, i, 5 with Ben-Sira ix, 12), which the secondary versions have not, because it was dropped from the Greek. Notwithstanding the ill treatment and the changes which this version has been subjected to, it is still one of the best auxiliaries for the restoration of the old text. The Arabic seems to have been made from the Syrian; whilst the old English version of Coverdale, as usual, follows the Zurich Bible and the Vulgate, the Bishops' Bible again copies Coverdale; the Genevan version, as is often the case, departs from the other
English version for the better. The present A. V. chiefly follows the Complutensian edition of the Greek as the Latin Vulgate. The arrangement, however, of chaps. xxx, xxxv—xxxvi, 17 in the Vatican and Complutensian editions is very different. The English version here follows the latter, which is supported by the Latin and Syriac versions against the authority of the Uncial MSS. The extent of the variation may be seen in the following:

Compl., Lat., Syr. A. V. | Fust., MSS. "A, B, C, "
---|---
xxx, 20 | xxxii, 13, λαμπρος καιρος, κ. τ.
xxxii, 20 | xxxiv, xxxv.
xxxii, 16, 17, ληποτωθεσα, κ. τ. | xxxii, 1—16.
xxxii, 10, μεταλαμπαινον | xxxiv, xxxv.
xxxii, 12, μεταλαμπαινον | xxxiv, xxxv.
xxxii, 11—11, φανελαν λαμακος | xxxii, 1—13.
xxxii, 12, και κατεληπτον | xxxvi, 17, ιο.

The most important interpellations are: i, 5, 7; 180; ii, 25; iv, 225; v, 225, 20; xii, 25; xiii, 25; xiv, 25, 22; xv, 5, 10, 17, 18, 21, 21; 225, 225; xvii, 23, 227, 227; xix, 56, 126, 147, 170; xv, 25; 225, 225; xx, 14, 22; xxi, 9, 10, 23c; xxii, 5, 4c, 5b, 19, 26, 225; xxiv, 19, 24; xxi, 19, 25; xxi, 19—27, 1, 29.

All these passages, which occur in the A. V. and the Compl. texts, are wanting in the best MSS. The edition of the Syro-Hexaplaric MS. at Milan, which is at present reported to be in preparation (since 1858), will probably contribute much to the establishment of a sounder text.

The name of the Greek translator is unknown. He is commonly supposed to have borne the same name as his grandfather, but this tradition rests only on conjecture or misunderstanding (Jerome, Synopt. Script. printed as a Prologue in the Compl. ed. in the A. V.).

VII. Canonicity.—Though this book has been quoted in the Jewish Church as early as B.C. 150 and 100, by Joseph ben-Jochanan (Aboth, i, 5), and Simon ben-Shetach (Yanir, v, 3), and references to it are dispersed through the Talmud and Midrashim (vide supra, sec. v), yet these latter declare most distinctly that it is not canonical. Thus Yalkut, c. ii, says the book of Ben-Sira, and all the books written from its time and afterwards, are not canonical. We also learn from this remark that Ben-Sira is the oldest of all apocryphal books, thus confirming the date assigned to it in section iv. A. 11, by Dr. Reay, that he who studies uncanonical books will have no portion in the world to come (Mishna, Shaked, x, 1), is explained by the Jev. Talmud to mean the books of Ben-Sira and Ben-Lazana (comp. the Midrash on Cohesheth xii, 12), it was not, however, named by the Jews as the canonical Scriptures; for though it is quoted in the Talmud, and at times like the Kethubim, yet the study of it was forbidden, and it was classed among "the other books (nı̂sbe, ¸é, lzn), that is, probably, those which were not admitted into the Canon (Dukes, Rabb. Blumenleer, p. 24 sq.)."

Allusions to this book have been supposed to be not unfrequently discernible in the New Testament (comp. especially, Ecclus. xxx, xiii; Rom. ix, 21; xi, 19; Luke xii, 19, 20; v, 11; James i, 19, etc.; xxiv, 17, 18; Matt. xi, 29, 29; John iv, 18, 14; vi, 35, etc.). The earliest clear coincidence with the contents of the book occurs in the epistle of Barnabas (c. xix Ecclus. iv, 31; compare Const. Apost. vii, 11), but in this case the parallelism consists in the thought and not in the words, and there is no mark of quotation. There is no sign of the use of the book in Justin Martyr, which is the more remarkable, as it offers several thought-provoking parallels in style. The first distinct quotations occur in Clement of Alexandria; but from the end of the second century the book was much used and cited with respect, and in the same terms as the canonical Scriptures; and its authorship was often assigned to Solomon, from the similarity which it presented to his writings (August, De Croa pro Mort. 18), Clement speaks of it continually as Scripture (Pied. i, 62; iii, 44; iv, 80, 82), and as the word of Solomon (Strom. ii, 5, § 54), and as the voice of the great Master (taulawuyow, Plo. ii, 10, § 98). Origl cites passages with the same formula as the canonical books (γραμταν, in Johann. xxx, 14; in Matt. xvi, 8, § 8), as Scripture (Comm. in Matt. 44; in Ep. ad Rom. i, 23, 24; and as the utterance of the divine word (c. Cels. viii, 50). The other writers of the Alexandrian school follow the same practice. Dionsius calls its words "divine oraclels (Frag. de Nat. iii, p. 1268, ed. Migne), and Peter Martyr quotes it as the work of "the Preacher" (Frag. § 5, p. 515, ed. Migne). The passage quoted from the Tertullian treatise, Lib. de M. N., 14, 29, is in the form of an argument that even in controversy (c. Jul. Peleq, v, 30); but he expressly notices that it was not in the Hebrew Canon (De Croa pro Mort. 18), "though the Church, especially of the West, had received it into authority" (De Giesi. xvi, 20; compare Speculum, iii, 1127, ed. Paris). Jerome, in a like manner, in Speculum, ii, 20, represents the book with "the canonical Scriptures" as "doubtful," while they are "sure," and in another place (Prol. Guliel.), he says that it "is not in the Canon," and again (Prol. in Libr. Sol.), that it should be read "for the instruction of the people (gelpis), not to support the doctrine of ecclesiastical discipline. The book is cited by Hippolytus (Opp. p. 192) and by Eusebius (Opp. iv, 21, etc.), but is not quoted by Irenaeus; and it is not contained in the Canon of Melito, Origen, Cyril, Laodicea, Hilary, or Rufinus. See Canon.

While the book is destitute of the highest canonical authority, it is of the most important monument of the religious state of the Jews at the period of its composition. As an expression of Palestinian theology it stands alone; for there is no sufficient reason for assuming Alexandrian interpolations, or direct Alexandrian influence (Gneuss, Philo, Philo. ii, 129 sq.). The conception of God as Creator, Preserver, and Governor is strictly conformable to the old Mosaic type; but, at the same time, his mercy is extended to all mankind (xviii, 11-13). Little stress is laid upon the spirit-world, either good (xlvii, 21; xlv, 2; xxxxii, 28) or evil (xxvi, 27), and the doctrine of a resurrection fades away (xlv, 14; xlvii, 24, 28; xlv, 14, 15). Yet comp. xlviii, 11). In addition to the general hope of restoration (xxvii, 1 etc.), one trait only of a Messianic faith is preserved, in which the writer contemplates the future work of Elias (xlviii, 10). The ethical precepts are addressed to the middle class (Eichhorn, Einl. p. 44 sq.). The praise of agriculture (vii, 15) and medicine (xxxviii, 1 sq.), and the constant reference to cheerfulfulness and cheerfulness at the thought of a time when men's thoughts were turned inwards with feelings of despondency and perhaps (Dukes, u. a. p. 27 sq.) of fatalism. At least the book marks the growth of that anxious idealism which was conspicuous in the sayings of the later doctors. Life is already impressed in rules; religion is degenerating into ritualism. knowledge has taken refuge in schools (compare Ewald, Gesch. d. Vold. Israel. 4. 298 sq.)—Kitto, s. v.; Smith, s. v.

VIII. Commentaries, etc.—Special exegetical works which have appeared on the whole of this book are the
ECCLESIOLOGY

of the pulpit; of the hour-glass stand, by which the preacher was warned not to weary the audience; of the flocks; of the reading pew; of the benches, pews, and galleries; of the aisles; of the shrines, fount, or reliquary; of the benediction, or holy-water stoup; of the corbels, with special reference to the head-dress figured on them; of the pavement; of the belfry; of the baptismal font, with its accessories: of the steps, the kneeling-stone, the chasismory, the cover, and the desk; of the tower, with its lantern, parapet, pinnacles, louvres, windows, buttresses, and bells; of the porch and doors, with their niches and seats; of the parvise, or priest's chamber, above the porch; of the monastic cloisters; of the monastic hedges; of the grottoes, or rain-spouts; of the church-yard or village cross; of the church-yard pew; of the lych-gate, or corse-gate, where the corpse was met by the priest; of the crypt; of the confession; of the hagiooscope, or opening in the chancel arch through which the elevation of the host might be seen; of the lych-envelopes, or low window in the side wall of the chancel, the use of which is uncertain; of the chest for alms; of the table of the ten commandments; of the church plate; of the fauld-stool, or lityn stove; of the embroidered vestments; of the work of the image-makers, etc.; of the sepulchral monuments and brasses, with their inscriptions; of the chapels or sacristies; of the vestry; of the dedication crosses. Ecclesiology has a literature of its own, including a monthly journal, called The Ecclesiologist. There are societies for promoting its study, one of which, the Ecclesiological, late Cambridge Camden Society, has published A Hand-book of English Ecclesiology (Lond. 1847).

Ecdippa. See ACHUBE.

Echard, Jacques, a learned Dominican, was born at Rouen September 22, 1644, and died at Paris March 15, 1724. He published S. Thomas Summa suo autori minullo, et in fine F. Vincenti, Bollandonis scripta dissertation, in qua quid de speculo morali sententiam operatur (1708, 8vo). He has contributed to illustrate his order by the "Library of Dominican Writers" (Scriptores ordinis Recitatorum recens, notisque illustrati, incomplit. J. Quinti, et J. Echard, Facs. 1719-21, 2 vols. fol.). He held a high position among all bibliographers.—Hoefner, Novum. Diogr. Ger. v. 623.

Echard, Lawrence, A.M., archdeacon of Stowe, was born in Suffolk about 1671, and was educated at Christ's College, Cambridge. He was presented to the livings of Welton and Elkington, Lincolnshire, and was made archdeacon of Lincoln and prebendary of Stowe in 1712. He died Aug. 16, 1730. In his History of England, written on High-Church principles, he relates facts with perspicuity; and the work is rendered entertaining by short characterizations of the most eminent literary men in the different periods of history. At present, his writings are little valued. His chief works are, (1) A general Ecclesiastical History, from the Nativity of our Saviour to the first Establishment of Christianity by human Laws under Constantine (Lond. 1727, 2 vols. 8vo, 6th edit.); (2) The Roman History, from the building of the City to the Removal of the Holy Seat by Constantine the Great (Lond. 1707, 4 vols. 8vo, 1st edit.); (3) The History of England to the end of the Revolution (Lond. 1707-18, 3 vol. fol.).—Allibone, Dictionary of Authors, i. 540; Kripps, Biographia Britannica, v. 592.

Eck or Eckius, Johannes (Johann Mayer von Eck), one of the most capable and violent of Luther's opponents, was born in Swabia, Nov. 14, 1486, the son of a peasant. He was educated at Heidelberg and Tubingen, and in 1516 was made professor and vice-chancellor at Ingolstadt. His intense ambition for literary fame stimulated him to unwearied activity and industry. In 1512 he was made vice-chancellor of the University of Ingolstadt. In 1514 he published Cen-
from his promise, and he so declared to the elector Frederick on the 13th of March. He wrote at once a reply to Eck, so unanswerable in all its points, and so full of severity, that Eck could no longer remain in doubt as to the fate which awaited him at Leipzig. Eck's aim was undoubtedly not so much to gain the mastery over Carlstadt as over Luther. He published his "Fidei Defensio" (February 1518), in which he accused Luther of being willing to defend against Luther. They referred chiefly to the doctrine of penitence and absolution, and the thirteenth especially sought to provoke an answer from Luther which should make him liable to the Inquisition for heresy. It read: "Romane Ecelest omnes ecclesias ante temporis Sibyllarum, negeamus. Sed eum, qui sedem beataissimi Petri habuit et fidem, successorum Petri et Vicariam Christi generalium semper auguriamus." Eck here really gained his object. Luther accepted the challenge, and answered it by the following: "Romane Ecclesiae omnibus suis sacerdotiis, precedentur et frigidissimis Roman. Pontificum decreta, intra quarumregiones annos nous. Contra qua sunt historiae approbatae et centum annorum, testis scripturae divinae et decretae Niceni Concilii omnium sacra- sissimae." Eck, eager to bring Luther into a still more acute and inextricable conflict, as he was always anxious, on 14, 1519, the following: "Excusatio aderens criminationes Fr. M. Lutheri, ordinis Eremitarum," with the accusation that Luther was a coward, and that he only endeavored to advance Carlstadt in order that he might himself safely retire. To this Luther replied in another "Excommunicationis et Defensionis Dr. J. Ecki," and with the assertion "Ich suche mich weder vor dem Pöbel und des Pöbelns Namen noch vor Pilschen und Puppen" (I am neither afraid of the pope or the pope's name, nor of popings or puppets). But in his letters to Zwingli, which he addressed on this subject, he charged Zwingli with having had the task to quiet Spalatinus, who had grown very doubtful as to the final result of the dispute. But Luther was already decided not to spare the Roman see. The Roman Church he calls (De Weete, Luther's Briefe, i, 260) "Babylon," the power of the Roman pontiff which counts among worldly powers (ib. i, 261). Meanwhile many causes delayed disputation. At last the personal interference of Duke George, who asked of the bishop "not to defend the lazy priests, but to oblige them to meet the battle manfully, unless the pope should interfere," had driven all other details into the background. The session opened at Leipsic June 27, 1519, and from that date to July 8 Eck and Carlstadt were the disputants. Eck admitted that the Scriptures were the ultimate rule of doctrine, and maintained a syncretistic doctrine as to grace and free-will. Carlstadt supported the doctrine of the imputation of Christ's righteousness, and that good works are from grace alone. The controversy led to no result. "On Monday, the 4th of July, at seven in the morning, Luther arose; the antagonist whom Eck most ardently desired to meet, and whose rising fame he hoped to crush by a brilliant victory. He stood in the prime of manhood, and in the fullness of his strength: he was in his thirty-sixth year; his voice was melodious and clear; he was perfectly versed in the Bible, and its aptest sentences presented themselves unbidden to his mind; above all, he inspired an irresistible vitality of argument which struck the truth. The battle immediately commenced on the question of the authority of the papacy, which, at once intelligible and important, riveted universal attention. It was immediately obvious that Luther could not maintain his assertion that the pope's primacy dated only from the last four centuries: he soon found himself forced from this position by ancient documents; and the rather, that no criticism had as yet shaken the authenticity of the false decreals. But his attack on the doctrine that the primacy of the pope (whom he still persisted in regarding as the ecclesiastical bishop) was founded on Scripture and by divine right, was far
more formidable. Christ's words, 'Thou art Peter; feed my sheep,' which have always been cited in this controversy, belong, however, to a later exposition. Nicolaus Lyra's also, of which Luther made the most use, there occurs this explanation, differing from that of the curia, of the passage in Matthew, chap. xvi: 'Quia tu es Petrus, i.e. confessor vere petra qui est Christus fusta; et super hanc petrum, quam conc formavi, edificabo ecclesiam meam.' Luther labored to support the already well-known explanation of them, at variance with that of the curia, by other passages which record similar commissions given to the apostles. Eck quoted passages from the fathers in support of his opinions, to which Luther opposed passages from the same authorities. On this point he would not go into these more recondite regions, Luther's superiority became incontestable. One of his main arguments was that the Greeks had never acknowledged the pope, and yet had not been pronounced heretics; the Greek Church had stood, was standing, and would stand without the papacy. The Gregorian was as the Roman. Eck did not hesitate at once to declare that the Christian and the Roman Church were one; that the churches of Greece and Asia had fallen away, not only from the pope, but from the Christian faith—that they were, so to say, heretical. The whole circuit of the Turkish empire, for instance, was there not one soul that could be saved, with the exception of the few who adhered to the pope of Rome. 'How?' said Luther; 'would you pronounce damnation on the whole Greek Church, which has produced the most eminent fathers, and which has stood against the whole circuit of the Turk? How, then, could it be maintained that no council could be subject to error? Reverend father,' replied Eck, 'if you believe that a council regularly convoked can err, you are to me as a heathen and a publican.' (Disputatio Ecclesiasticae de Anno Domini, 1509.) Such were the results of this discussion. It was continued for a time, and opinions more or less conflicting on purgatory, indulgences, and penance were uttered. Eck renewed the interrupted contest with Carstadt; and although, in the end, the reports of the identity of Christ and his Church, and the doctrine of the two universities; but all these measures could lead to nothing further. The main result of the meeting was, that Luther no longer acknowledged the authority of the Roman Church in matters of faith. At first he had only attacked the instructions given to the preachers and indulgent souls, and the young schoolmen, but he had expressly restrained the decretales of the pope; then he had rejected these, but with appeal to the decision of a council: he now emancipated himself from this last remaining human authority also; and the Confession of the Philistia, and History of Reformation, Austin's translation, bk. ii. ch. iii. After the dispute, in which Eck's pride of intellect had been grievously wounded, he wrote (July 23) a letter to the elector of Saxony exhorting him to discourage the pernicious doctrines of his professor, and to cause his books to be burned. Farel replied with some delay and great moderation, and Carlstadt with bitterness. A bitter controversy followed, in which Melanchton took part, and Eck got the worst of it. In February, 1520, Eck also completed a treatise on the supremacy, in which he promises triumphant victory and clearly to contest Luther's assertion that "it is not of divine right." "Observe, reader," says he, "and thou shalt see that I keep my word." Nor is his work by any means devoid of learning and talent. After obtaining a condemnation of Luther from the university of Louvain and Cologne, Eck went to Rome (1520) to present his book to the pope, and to stir up feeling against Luther. His exhortations animated the enemies of Luther, and they at length prevailed upon the pope to summon a congregation, which was passed sentence of condemnation upon Luther. Leo X. in fact, openly appointed Eck as his nuncio for the promulgation of his bull in Germany. Elated by vanity, Eck set out with puerile exultation to inflict, as he thought, a fatal blow on his devoted adversary. In September he caused the bull to be fixed up in public places in Meijs-
ECKART 49

ECCLESIASTICS. (1.) a sect of ancient philosophers, who professed to select (Selekt) from all systems of philosophy what they deemed to be true. The Ecclesiasts were chiefly Neo-Platonists (q.v.), and the philosophers chiefly selected from were Pythagoras, Plato, and Aristotle. "This union of the Aristotelian and Platonic philosophies was first by Posthumus Pan- drois, whose principles were taken up and maintained by Ammonius Saccas. It may be doubted, however, if the title of ecleci:is can be properly given to Potamo- or Ammonius, the former of whom was in fact merely a Neo-Platonist, and the latter rather jumbled together the different systems of Greek philosophy (with the exception of that of Epicurus) than selected the consistent parts of all of them. The most eminent of the followers of Ammonius were Plotinus, Porphyry, Jamblicus, Proclus, and the ancient Eclecticism became at last little more than an attempt to reconcile Platonism with Christianity." (Penny Cyclop. ix, 260.) See Ammonius.

Clemens Alexandrinus (Strom. I, 228) said: "By philosophy I mean neither the Stoic, nor the Platonic, nor the Epicurean, nor the Aristotelian, but whatever things have been properly said by each of these, and the knowledge—this whole selection I call philosophy." "The sense in which this term is used by Clemens" (of Alexandria), says Mr. Maurice (Mor. and Metaphs. Phil., ii, 33), "is obvious enough. He did not care for Plato, Aristotle, Pythago- rae, as such; far less did he care for the opinions and conflicts of the schools which bore their names; he found in each hints of precious truths of which he de- sired to avail himself; he would gather the flowers without asking in what garden they grew, the prickles he would leave for those who had a fancy for them. Eclecticism, in his sense, seemed only another like another name for catholic wisdom. A man, conscious that every- thing in nature and art was given for his learning, had a right to suck honey wherever it was to be found; he would find sweetness in it if it was hanging wild on trees and shrubs; he could admire the elaborate architec- ture of the cellars in which it was stored. The Au- thor of all good to man had scattered the gifts, had imparted the skill; to receive them thankfully was an act of homage to him. But once lose the feeling of devotion and gratitude, which belonged so remarkably to Clemens—once let it be fancied that the philosopher was not a mere receiver of gifts which had been provided for him, but an ingenious chemist and compounder of various naturally unusable ingredients, and the ecclesiastical doctrine would lead to more self-con-
ECLIPSE

be turned into darkness, and the moon into blood,” we
can hardly avoid discerning an acquaintance with the
appearance of those luminaries while under eclipse.
The interruption of the sun’s light causes him to ap-
pear black; and the moon, during a total eclipse, ex-
hibits a copper color, or what Scripture intends by a
bloody moon. The Biblical narrative is not in par-
nature inspired by an eclipse in the minds of those
who are unacquainted with the cause of it rendered it
a token of impending judgment in the prophetic
books. See EARTHQUAKE.

The plague of darkness in Egypt has been ascribed
by some to the natural phenomena of other countries non-miraculous
agency, but no sufficient account of its intense degree,
long duration, and limited area, as proceeding from
any physical cause, has been given. See PLAGUE OF EGYPT.

Josephus mentions (Ant. xvii, 6, 4 s. f.) an eclipse of
the moon as occurring on the night when Herod
deprived Matthias of the priesthood, and burnt alive
the seditious Matthias and his accomplices. This is
of great importance in the chronology of Herod’s reign,
as it immediately preceded his own death. It has
been connected with the reappearance March 13, B.C. 4. See
HEROD (THE GREAT).

The darkness is in the giv yv of Matt. xxvii, 45, attending the crucifixion has been similarly attributed
to an eclipse. See CRUCIFIXION (OF CHRIST).

Phlegon of Tralles, indeed, mentions an eclipse of
intense darkness, which, he says, in Bithynia, with an
earthquake, which, in the uncertain state of our chronology (see Clinton’s Fusi Romani, Olympia, 202), more or less nearly synchronizes
with the event. Nor was the account without re-
ception in the early Church. See the testimonies to
that effect contained in the History of Phlegon
vindicated, London, 1732). Origen, however, ad loc.
(Latin commentary on Matthew), denies the possibility
of such a cause, arguing that by the fixed Pashcal
reckoning the moon must have been about full, and
denying that Luke xxiii, 45, by the words idoneopho o
παρασκευή, to indicate that fact as the cause. The
genuineness of this commentary has been impeached,
nor is its tenor consistent with Origen adev. Cels. p. 80;
but the argument, unless on such an assumption as
mentioned below, seems decisive, and has ever
since been accounted for to the judgment of Judea. Dean Alford (ad loc.), though without stating
his reason, prefers the wider interpretation of all
the earth’s surface on which it would naturally have
been day. That Phlegon’s darkness, perceived so intense
in Tralles and Bithynia, was felt in Judea, is highly
probable. All the other phenomena of coincidence
darkness and earthquake, taken in connection with the near agreement of time,
gives a probability to the supposition that the former
speaks of the same circumstances as the latter. Wies-
leart (Chron. Synop. p. 880), however, and De Wette (Com-
ment. on Matt.) consider the year of Phlegon’s eclipse
an impossible one for the crucifixion, and reject that
explanation of the darkness. The argument from
the duration (three hours) is also of great force, for an
eclipse seldom lasts in great intensity more than six
minutes. The darkness was instantly dispersed, moreover,
cannot with reason be attributed to the eclipse. If the
moon was at the full at the time of the Passover (q. v.).

On the other hand, Seyfarth (Chronol. Sacr. p. 58, 9) maintains that the Jewish calendar, owing to
their following the sun, had become so far out that the
moon might possibly have been new, and thus,
emitting the year as a possible epoch, revives the argu-
ment for the eclipse as the cause. He, however, views
this rather as a natural basis than as a full account of
the darkness, which in its degree at Jerusalem was
still preternatural (ib. p. 138). The pamphlet of Whis-
ton above quoted, and two by Dr. Sykes, Dissertation
on the Eclipse mentioned by Phlegon, and Defense of the
ECONOMY

a term which properly means the arrangement of a household (oikeia), but is also frequently employed by ecclesiastical writers for the practical measures adopted in order to give effect to a divine dispensation. The Jewish economy included all the details of spiritual and secular government, but the Christian economy, belonging to a kingdom not of this world, has no direct reference to political arrangements." See Dispensation.

Ecclesia, a proclamation or formula of faith, in the form of an edict, written by Sergius, patriarch of Constantinople, published A.D. 690 by the emperor Heraclius, to put an end to the troubles occasioned by the Pseudo-Martyr cassia. It professes to answer the question, Whether in Christ there were one or two orations? though in the same edict the doctrine of one will was plainly inculcated. A considerable number of the Eastern bishops declared their assent to this law, which was also submissively received by Pseudo-Martyr cassia. A patriarch of Constantinople in the East, and in the West the case was quite different. The Roman pontiff, John I, assembled a council at Rome, A.D. 629, in which the ecclesia was rejected, and the Monothelites were condemned (Mosheim's Eccles. Hist. N. Y. ed. i. 435). A copy of it is given in Herodotus, Conclav. iii. 70. It also occurs in Gieseler, Church History, i. 126; Hefele, Conciliengeschichte, iii, 184 sq. See Euchelians.

Ecuador (the Spanish term for Equator), a republic in South America. In lat. it extends from 1° 28' N. to 4° 45' S., while in long. it stretches from 79° to 81° 20'. It measures, therefore, from north to south fully 400 miles, and from east to west nearly 850, presenting an area of about 100,000 square miles. It is bounded by the United States of Colombia, Brazil, Peru, and the Pacific. The population in 1888 was given at 1,004,651, in which the savage and heathen Indians of the eastern province were included, although estimated at 160,000. Six cities have a population of more than 10,000. The majority of the population is of the aboriginal race, speaking the Quichua or some cognate language. Ecuador, until the beginning of the present century, belonged to the Spanish vicereignty of New Granada. After the establishment of the independence of the Spanish colonies, Ecuador formed part, until 1830, of the federal republic of Colombia. Since 1830 it has been an independent republic. The chief cities are Quito, the capital, and Guayaquil, the emporium of foreign trade. The government appears to have been constituted on the model of the United States of North America, having a president and vice-president, with a Senate and a House of Representatives. All the inhabitants belong to the Roman Catholic Church, which contains the following dioceses: 1. The archbishopric of Quito, established as an episcopal see in 1580, and since 1562. 2. The bishopric of Guayaquil, established in 1838; 3. the bishopric of Nueva Cuenca. The public exercise of no other religion is allowed by the Constitution of the state. There were, in 1855, 277 parochial and 106 vice-archdiocesan churches, 554 secular priests, 262 monks in 36 and 202 nuns in 11 convents. The University of Quito, established in 1866 by the Jesuits, has 4 colleges and several seminaries. There were 11 high schools, called colleges or seminaries, and 290 primary schools, of which 30 were for girls. Nearly all the scholars were the children of the whites and mulattoes; the Indian population grows up almost without education. — Algemeine Real-Encyk. iv. 1019; Villavicencio, Cronología de la República del Ecuador (N. Y. 1858). (A. J. S.)

Ed, i. e. "witness" (for Heb. id. ה), supplied (apparently on the authority of a few MSS, and also of the Syr. and the Arab. versions) in the A. V. as the name of the altar erected by the three tribes east of Jordan in commemoration of their adhesion to the other (Josh. xxii. 40). The commonly received Heb. text is literally as follows: "And the sons of Reuben, and the sons of Gad called the altar [יַעֲבֹדָה יִבְרָעֵל, Sept. yahweha yivrael, Vulg. vocaverunt]; for a witness is this [ןַעֲבֹדָה יִבְרָעֵל, Sept. yahweha yivrael, Vulg. testimonium], etc., or as it may be rendered (ץַעֲבֹדָה יִבְרָעֵל being sometimes used absolutely thus), "gave a name to the altar, [saying]," etc. The gloss is unnecessary (see Maurer, Comment, in loc.), for the latter clause furnishes both the name and the explanation (Keil, Comment, in loc.), i. e. they named the altar (as follows), 'This is a witness," etc. See Oakey.

E'dar (Heb. 'Edar, אֶדֶּר, flock, as often rendered), the name of a tower (אֶדֶר), beyond (ἐνδρόμω) which Jacob first built between Bethelhem and Hebron (Gen. xxxv. 21, Sept. Θεσπ. Vat. omits, Vulg. Eder). In Mic. iv. 8 (Sept., Vulg., and A. V. translate παροιμίαν, greez, "flock") it is put for the neighboring village Bethelhem itself, and hence tropically for the royal line of David as sprung thence. It perhaps derived its name from the fact of having been erected as a guard [see Migdal-] flocks, or else from some individual of the name of Eder (q. v.). Jerome (who calls it turris Ader) says it lay 1000 paces from Bethlehem (Onomast. s. v. Bethlehem), and intimates that it contained a prophetic anticipation (comp. Targum of Pseudo-Jonah in loc.) of the birth of the Messiah on the same spot (Luke ii. 7, 8). (See Albert, De turri Ederi, Lips. 1689.) See Bethlehem.

Edayoth. See Talmad.

Eddy, John Reynolds, a Methodist Episcopal minister, son of Rev. Augustus Eddy, was born in Xenia, Ohio, Oct. 10, 1829, obtained a liberal English education, and made some proficiency in the classics. He commenced a study of law, but determined to devote himself to the ministry, and was admitted on trial in the North-west Indiana Conference in 1856. After filling various appointments acceptably, he accepted in 1862 the chaplaincy of the 72d Indiana Regiment. He immediately joined his regiment at Camp Atalissa, freeholders, and commenced his labors among the soldiers. Sunday, June 11, he preached from Prov. xvi. 32; Wednesday, June 24, during a fight between colonel Wilder's cavalry brigade and a rebel force he was instantly killed by a shell.—Min. of Conferences, 1868.

Edelmann, Johann Christian, an infidel German writer, was born at Weissenfels in 1668, and studied theology at Jena. From his youth he evinced an unsteadiness of mind, which afterwards led him, after oscillating between the different Christian denominations, to forsake them all and become an opponent of all orthodoxy. He rejected the Christian revelation as a part of the essence of God, in no way different from him. For some years he abstained from all animal food, in order, as he expressed it, not to eat a part of divinity. He had previously taken part in the translation of the Bible, published at Berlin (q. v.). His principal work is Unschuldige Wahrheiten, in which he attempts to prove that no religion is of any importance: — Moes mit aufgedecktem Angesicht (1740, 8vo); — Christ und Babel (1741, 8vo); — die Gottlichkeit d. Vernunft (1742, 8vo).

He finally went to Berlin, where Friedrich II tolerated
his presence on the plea that he had to put up with many other fools. Edelmann died in Berlin Feb. 15, 1750. See Praetoria, Nachtrichten (1831). He is more just towards heathenism than towards Judaism, and more just towards Judaism than towards Chris-
tianity. Everything positive in religion is, as such, superstitition. Christ was a mere man, whose chief merit consists in the struggle against superstition. What he taught and what he was anxious for, no one, however, may attempt to learn from the New Testa-
ment writings, inasmuch as these were forged as late as the time of Constantine. All which the Church teaches of his divinity, of his merits, of the gracious influence of the Holy Spirit, is absurd. There is no rule of true but reason, and it manifests its truths di-
rectly by a peculiar sense. Whatever this sense says is true. It is this sense which perceives the world. The reality of everything which exists is God. In the sense in which the world admires the reality of the world admires also the reality of God. God is not a

person, least of all are there three persons in God. If God be the substance in all the phenomena, then it follows of itself that God cannot be thought of without the world, and hence that the world has no more

an original in it than has an end. Omnipotence cannot mean the world the body of God, the shadow of God, the son of God. The spirit of God is in all that exists. It is ridiculous to ascribe inspiration to special persons only; every one ought to be a Christ, a prophet, an inspired man. The human spirit, being a breath of God, does not perish; our spirit, separated from its body by death, enters into a connection with some oth-
er body. Thus Edelmann taught a kind of metempsy-
chosis. What he taught had been thoroughly and in-

igeniously said in France and England; but from a

German theologian, and that with such eloquent coarse-

ess, with such a mastery in expatiating in blasphemy, such things were unheard of. But as yet the faith of the Church was a power in Germany!' (Kahnis, German Protestantism, bk. 1, chap. ii. § 2). An autograph-

ography of Edelmann was published by Klose (Berlin, 1836). See also, in the

Kleine, II stor, vol. iii, 242, 243; vol. iv, 168, 169. Major Wil-

ford and professor Wilson find its elements in the

Sanskrit. The Greek ἔθνος is next to identical with it in both sound and sense. It occurs in three places (Isa. xxxvii, 12; Ezek. xxxvii, 23; Amos i, 5) as the name of some eminently pleasant districts, but not the Eden of this article. Of them we have no certain knowledge, except that the latter instance points to the neighborhood of Damascus. In these cases it is pointed, in the Hebrew text, with both syllables short (772); but when it is applied to the primitive seat of man, the first syllable is long. The passages in which it occurs in the latter sense are, in addition to Gen. ii, iii, iv, 10, the few following, of which we transcribe the

chief, because they cast light upon the primordial value:

"He will make her wilderness like Eden, and her des-

tert like the garden of Jehovah." "This is that has been in

Eden, the garden of God." "All the trees of Eden, that were in the garden of God, envied him." "This land which was desolate is become like the garden of Eden" (Isa. i, 8; Ezek. xxix, 13; xxxi, 9, 16, 18, xxxvi, 85; Joel ii, 8). All this evidence goes to show that Eden is rendered "Paradisus," a proper name in three pas-
sages only, Gen. ii, 8, 10; iv, 16, where it is represent-
ed by ἔδαφος. In all others, with the exception of Isa.

ii, 8, it is translated ἐδαφεῖς. In the Vulgate it never occurs as a proper name, but is rendered "culpitas," "locus culpatis," or "deliciar." The Turyn of On-

kelos gives it uniformly ἔδαφος, and in the Peshito Syr-

iac it is the same, with a slight variation in two pas-
sages only.

II. Biblical Description.—The following is a simple translation of the Mosai account of the situation of the Adamic Paradise (Gen. ii, 8-17). See GENEISIS.

Now Jehovah God had planted a garden in Eden eastward, and he placed there the man whom he formed out of the soil. And Jehovah God caused to spring from the ground every tree pleasant for sight or good for food; also the tree of life in the midst of the garden, and the tree of the knowledge of good and evil was in the midst of the garden. Now a river issued from Eden to water the garden, and thence it was parted, and became four head-streams: the name of the first is Pishon, which supplies the one that passes through the land of the Chavilah, where is [the metal] gold (the gold too of that land [is] good); there also [is] the substance called Hiddekel, which supplies a river called the Tigris; and the name of the second river is Gihon; thia [is] the one that supplies all the land of Asshur; and the name of the third river is Têkakô; thia [is] the one that supplies the Euphrates; and the name of the fourth river, that is Perih, supplies the garden of Eden, to tile it, and to keep it. Then Jehovah God took the man, and settled him in the garden of Eden, to till it and to keep it. Then Jehovah God enjoined upon the man, saying, "Of every tree of the garden thou mayest freely eat; except of the tree of the knowledge of good and evil—then shall not eat of it; in the day of thy eating of it thou shalt surely die." The garden of Paradise is here said to be to the east, i. e. in the eastern part of the tract of Eden (see Cense-

nius, Heb. Iez. s. v.). The river which flowed through Eden watered the garden, and thence branched off into four distinct streams. The first problem to be solved, then, is this: To find a river which, at some stage of its course, is divided into four streams, two of which supply the garden and are called the Euphrates; and these rivers with the Hiddekel and Perath has never been disputed, and no hypothesis which omits them is worthy of consideration. Setting aside minor differences of detail, the theories which have been framed with regard to the explanation of the above description of the terrestrial part of the garden, can naturally divide themselves into two classes. The first class includes all those which place the main river of the garden of Eden be-

low the junction of the Euphrates and Tigris, and in-

terpret the names Pison and Gihon of certain portions of these rivers; the second, those which place the Euphrates in the high table-land of Armenia, the fruitful parent of many noble streams. These theories have been sup-

ported by most learned men of all nations, of all ages, and repre

senting every shade of theological belief; but there is scarcely one which is not based in some degree upon a misinterpretation of a part of the narrative. Those who contend that the united stream of the Euphrates and Tigris is the "river" which "goeth forth from Eden to water the garden," have commit-

ted a fatal error in neglecting the true meaning of ἔδαφος, which is only used of the course of a river from its source downerida (comp. Ezek. xlvii, 1). Following the guidance which this word supplies, the de-
scription in ver. 10 must be explained in this manner: the river which takes its rise in Eden, flows into the garden, and from there is divided into four rivers; the separation taking place either in the garden or after leaving it. If this be the case, the Tigris and Euphrates before junction cannot, in this position of the garden, be two of the four branches in question. But, though the Tigris and Euphrates are the third and fourth second class have generally been driven into another but little less destructive. Looking for the true site of Eden in the highlands of Armenia, near the sources of the Tigris and Euphrates, and applying the names Pison and Gibon to some one or other of the rivers which spring from the same region, they have been compelled to give to the meaning of וָּרִיבָּה, a sense which is scarcely supported by a single passage. In no instance is וָּרִיבָּה (lit. "head") applied to the source of a river. On several occasions (comp. Judg. v. 16; Job i. 17, etc.) it is used of the detachments into which the main body of an army is divided, and analogy therefore leads to the conclusion that וָּרִיבָּה denotes the "branches" of the parent stream. There are other difficulties in the details of the several theories which may be obstacles to their entire reception, but it is manifest that no theory which fails to explain above-men menoned cannot be allowed to take its place among things that are probable. What, then, is the river which goes forth from Eden to water the garden? It is a question which has often been asked, and still waits for a fully satisfactory answer. That the ocean stream which surrounded the earth was the source from which the four rivers flowed was the opinion of Josephus (Ant. i. 1, 3; and Johannes Damascenus (De Orthod. Fid. ii. 9). It was the Skat el-Arab, according to those who place the garden of Eden below the junction of the Tigris and Euphrates, and their conjecture would deserve consid- eration were it not that this stream is, so far as any degree of propriety, said to rise in Eden. By those who refer the position of Eden to the highlands of Armenia, the "river" from which the four streams diverge is conceived to mean "a collection of springs," or a well-watered district. It is scarcely necessary to say that this signification of וָּרִיבָּה (nākār) is without a parallel, and even if it could, under certain circumstances, be made to adopt it, such a signification is, in the present instance, precluded by the fact that, whatever meaning we may assign to the word in ver. 10, it must be essentially the same as that which it has in the following verses, in which it is sufficiently definite. Sickler (Augusti, THEOL. MOSAIC, i, 1), supposing that the whole valley to be a myth, solved the difficulty by attributing to its author a large measure of ignorance. The "river" was the Caspian Sea, which in his apprehension was an immense stream from the east. Bertheau, applying the geographical knowledge of the ancients as a test of that of the He- brews, arrived at the same conclusion, on the ground that all the people south of the Armenian and Persian highlands place the dwelling of the gods in the extreme north, and the regions of the Caspian were the northern limit of the horizon of the Israelites (Knobel, Genesis). But he allows the four rivers of Eden to have been real rivers, and not, as Sickler imagined, oceans which bounded the earth east and west of the Nile. The modern Lake Van, or perhaps the ancient stream of which this is now the representative, appears to be the only body of water in this vicinity answer- ing this description. Sickler describes it as follows: "It is to suppose that in former ages great changes had taken place, which have so disguised the rivers in question that their course, connection, and identity are not now traceable; for two of the rivers, at least, remain to this day essentially the same as in all historic times, and the whole narrative of Moses is evidently adapted to the geography as it existed in his own day, being constantly couched in the present tense, and in terms of well-known localities and landmarks." See above.

Some, ever ready to use the knife, have hesitatingly pronounced the whole narrative to be a spurious interpolation of a later age (Granville Penn, MIN. DE DON GED. p. 164). But, even admitting this, the words are not such as a second or third writer would have used. Ewald (Gesch. i. 331, note) affirms, and we have only his word for it, that the tradition originated in the far East, and that in the course of its wanderings the original names of two of the rivers at least were changed to others with which the Hebrews were better acquainted. Hartmann regards the latter as a result of the Babylonian or Persian period. Luther, rejecting the forced interpretations on which the theories of his time were based, gave it as his opinion that the garden remained under the guardianship of angels till the time of the Deluge, and that its site was known to the descendants of Adam; but that by the flood all traces of it were obliterated. But, as before remarked, the narrative is so worded as to convey the idea that the countries and rivers spoken of were still existing in the time of the historian. It has been sug- gested that the description of the garden of Eden is part of a generalized antiquarian document written by the historian, Rosenmüller's GEOGR., 192). The conjecture is beyond criticism; it is equally incapable of proof or disproof, and has not much probability to recommend it. The effects of the flood in changing the face of countries, and altering the relations of land and water, are too little known at present to allow any inferences to be drawn from them. (See below.)

Conjectures with regard to the dimensions of the garden have differed as widely as those which assign its locality. Ephraem Syrus maintained that it surrounded the earth, while Johannes Damascenus restricted it to a circumference of thirty-six or forty miles, and others have made it extend over Syria, Arabia, and Mesopotamia. But of speculations like these there is no end.

III. IDENTIFICATIONS OF THE SITES. It would be difficult, in the whole history of opinion, to find any subject which has so invited, and at the same time so completely baffled conjecture, as the garden of Eden. The three continents of the Old World have been subjected to the most rigorous search; from China to the Canary Islands, from the Mountains of the Moon to the coasts of the Baltic, without any locality which in the least approximated to the description of the first abode of the human race has been left unexamined. The great rivers of Europe, Asia, and Africa have in turn done service as the Pison and Gibon of Scripture, and there remains not one of which the New World wherein the first adventurous theorist may bewilder himself in the mazes of this most difficult question. Upon the question of the exact geographical position of Eden dis- cussions innumerable have been written. Many au- thors have given descriptive lists of them, with argu- ments for and against each. The most convenient presentation of their respective outlines has been re- duced to a tabulatated form, with ample illustrations, by the REV. N. Morren (annexed to his translation of the younger Rosenmüller's Biblical Geography of Central Asia, p. 91-98, Edinb. 1856). He reduces them to nine principal and four additional, as follows: (See the following table; comp. Kalisch, Genesis, p. 100 sq.)

1. The opinion which fixes Eden in Armenia we have placed first, because it is that which has obtained most general support, and seems nearest the truth. (See No. vi.) For if we may suppose that, in former ages, moved to the East (Gen. iv. 16), the city of the Seth remained in the neighborhood of the primval seat of mankind, and that Noah's ark rested not very far from the place of his former abode, then Mount Ararat in Armenia becomes a connecting point between the ante- diluvian and post-diluvian worlds (Gen. viii. 4), and...
the names of the Phrat, Hiddekel, etc., would readily be given to rivers, which, after the great deluge, seemed to flow in channels somewhat corresponding to the Paradisaical streams. The opinion in question was first systematically propounded by Reland, and is held by Calmet, and by his American editor, Prof. Robinson, who, however, understands by Cush, Chasutian, Prof. Stuart takes the Phison for the Kur, and Cush for the Indus, while in the northwestern region of the region between the Caspian Lake and the Persian Gulf (Hab. Chrest: on Gen. i, 10 14). The Cossar, whom Reland finds in Cush, lived near Media, in the tract now called Dilm, south-west of the Caspian Sea. Link takes the Gihon for the river of Cyrus or Cusur, and refers for the Cosar to the river Cydnus. Verbruggen coincides with Reland, except that he takes the Gihon to be the Glynde, which flowed between Armenia and Matiana.

ii. This opinion was most elaborately defended by Huet, bishop of Avranches; but it is also maintained by Calvin, Boehm, Wells, Step, Fores, etc. Fores was of this sentiment in the first edition of his Chronology, but in the second he follows the opinion of Reland. The Shat el-Abab is the name of the united streams of the Euphrates and Tigris. Ainaworks says, "It is probable that the united rivers emptied themselves into a gulf at this period (in ancient times) by several distinct mouths, of which the first or greatest was at Tereon, the Ostium Tigris Occidentale of Pтолей, and the mouth of the Euphrates, according to Aeaecus; the second was the Pastiglris of Pliny, probably the Shat el-Abab, and the Ostium Tigris Oriental of the Alexandrian geographer." Cush he compares with the Cutha of 2 Kings, xxvi, 24; and Havi- lah with the Chalalta of the Eriothenes in Strabo, xvi, 767. Grotius thinks the Phison is the Pastiglris, and the Gihon the Nahr Malikah, or the Chaboras. Huet points out the source of Grotius as to the Phison, but takes the Gihon for the Nahr Surah. Hoppkinson makes the Phison and Gihon to be the two canals of the Euphrates, the Nahr Malikah, and the Nahr Sarees or Sura.

iii. The celebrated Göttingen professor, J. D. Michaelis, originated this hypothesis, though he is doubtful as to some of the points. Gatterer, in the main, agrees with him, only he understands the Hiddekel to be the Indus, and takes the Phison for the Phaxis. Cush is found by Michaelis in the name of the city Cath or Ceth, the ancient capital of Corowrasia, on the Oxus or Jihon, near the site of Balkh. He refers to Quint. Curtius as speaking of the Cossar as Cushian being in Bactria upon the Oxus. Wahl sees Cush in the Khouist of Moses of Chorene, meaning the large province between the Caspian and Persian Seas, as far as the Indus and Oxus. The land of Havihail Michaelis connects with the tribe of Chwialski or Chwalesse, from whom the Russians call the Caspian Sea the Chwalinisko More.

iv. This theory has been proposed by the eminent Orientalist Von Hammer. The Sihon, he says, rises near the town of Cha, and compasses the land of Iah, famous for the gold and precious stones of Turkistan.

v. That Paradise was in Syria was the opinion of the voluminous Le Clerc, in his valuable Commentary, Havihil is the tract mentioned in 1 Sam. xv, 7. Cush is Casiestis or Mount Casuis, near Betania in Syria. This opinion is shared by Lakemacher, who, however, takes the Phison to be the Jordan. Heiddegser thinks the Jordan was the great river of Paradise, an idea adopted by the paradoxical Hardouin, in his Excursus to Plato's Nat. Hist. lib. vi. Others, who place Eden in Arabia Felix, refer it either to the land of the Persian Gulf, and the Gihon into the Red Sea.

vi. This is perhaps the most ancient opinion of any, being found in Josephus (Ant. i, 1, 3), and in several of the fathers, e.g. Theophilus Autol., lii, 24; Ephraim. (Epp. lii, 60); Philostorgus in Nicephor. Hist. Ecc. ix, 13, though the latter takes the Phison for the river Hypasia. The editor of Calmet observes that "the inhabitants of the kingdom of Goiam call the Nile the Gihon." Cush is naturally taken for Ethiopia. This view is embraced by the celebrated Gesenius, with the exception that he maintains the Phison to be the Indus; in this he is followed in the main by Prof. Bush, who likewise observes: "This view of the subject, it is admitted, represents the ancient Eden as a very widely extended territory, reaching from the Indus on the east to the Nile and the Mediterranean on the west, and including the intermediate countries. If the view above given of the topography of Eden be correct, it will be seen that it embraced the fairest portion of Asia, besides a part of Africa, comprising the countries at present known as Cabul, Persia, Armenia, Kurdistan, Syria, Arabia, Abyssinia, and Egypt. The garden was on that side which they termed the "eastward in Eden," was probably situated somewhere in the neighborhood of the Euphrates, perhaps not far from the site of Babylon, a region near its eastern than its western limits; but the exact position is sufficiently vague to attempt to determine." Among the most modern scholars, the context seems now to lie mainly between this view and that of No. 1.

vii. Captain Wilford, well known for his profound acquaintance with Hindu antiquities, advanced the present view, as being founded upon the Indian Puranas (Asiatic Researches, vi, 455, Lond. edit.). It was partly adopted by a late ingenious but fanciful writer, Mr. C. Taylor, editor of Coleret's Dictionary, who, however, makes the Phison the Nehil; the Gihon, the western branch of the Oxus; the Hiddekel, the eastern; and the Phrat, the Hirond. It is, however, the following are given as specimens of the views of the modern German school of neology, which regards the whole narrative as a myth, similar to the Greek tradition of the Hesperides, the Islands of the Blessed, etc. Philip Buttman is the author of the hyposethesis under the present number. The Phison he compares with the Beyong, which is mentioned by Ptolemey as the most considerable river of India east of the Ganges. Ava was early known as a region of gold; and an anonymous geographer, in Hudson's collection, vol. iii, speaks of the Eville or Evilee as being near the Seues or Chinese.

viii. Another neological theory—the author, A. T.
Hartmann, who looks upon the description as a product of the Babylonish or Persian period. The idea of Eden being the far-famed vale of Cushmehr had been anticipated by Herder in his work on the History of Mankind. Appropriate accounts of Cushmehr may be found in the travels of Burns and Jamieson. Many of the names thought by Parrot to be Parthian were in the island of Serendib or Ceylon; while the Greeks place it at Beth-Eden, on Lebanon.

These, indeed, are but a few of the opinions that have been propounded; yet, though many more might be added, we observe that most of them have been much in common, and differ only in some of the details. To enumerate the vagaries of German and other writers on this subject would be endless. (See Kitt's Scripture Lands, p. 1-8.) The fact is that not one of them answers to all the conditions of the problem. It has been remarked that this difficulty might have been expected, and is obviously probable, from the geological changes that may have taken place, and especially in connection with the Deluge. This remark would not be applicable, to the extent that is necessary for the argument, except upon the supposition that the earth in the beginning was not in the form as it is at present. The book of Genesis consists of primeval documents, even antediluvian, and that this is one of them. There is reason to think, however, that since the Deluge the face of the country cannot have undergone any change approaching to that hypothesized by the ancient authors. The famous bed of the river of Eden is 25° to 30° N. and 30° to 35° E.; and the sea which lay to the south, or an elevation of the bed of that sea. See DELUGE.

As nearly as we can gather from the Scriptural description, Eden was a tract of country, the finest imaginable, lying in the latitude of 36° N., and the 40th degree of E. longitude, of such moderate elevation, and so adjusted, with respect to mountain ranges, and watersheds, and forests, as to preserve the most agreeable and salubrious conditions of temperature and all atmospheric changes. Its surface must therefore have been covered by an unbroken plain of hill and plain. In the north part of this land of Eden, the Creator had formed an enclosure, probably by rocks, and forests, and rivers, and had filled it with every product of nature conducive to use and happiness. Due moisture, of both the ground and the water, and the right temperature, the soil from the nearest hills, and the rivulets from the more distant; and such streamlets and rivulets, collected according to the levels of the surrounding country ("it proceeded from Eden") flowed off afterwards in four larger stream, each of which thus became the source of a great river.

Here, then, in the south of Armenia, after the explanation we have given, it may seem the most suitable to look for the object of our exploration, the site of Paradise.

That the Hiddekel (this name is said to be still in use among the tribes who live upon its banks—Col. Chesney, Exp. to Tigris and Euphrates, i, 13) is the Tigris, and the Phrathe the Euphrates, has never been denied, except by those who assume that the whole narrative is a myth which originated elsewhere, and which has been transferred to the Hebrews from their own geographical notions. As the former is the name of the great river by which Daniel sat (Dan. x, 4), and the latter is the term uniformly applied to the Euphrates in the Old Testament, there seems reason to suppose that the appellations in Gen. ii, 14 are to be understood in any other than the ordinary sense. One circumstance in the description is worthy of observation. Of the four rivers, one, the Euphrates, is mentioned by name only, as if that were sufficient to identify it. The other three are defined according to their geographical positions, and it is fair to conclude that they were therefore rivers with which the Hebrews were less intimately acquainted. If this be the case, it is scarcely possible to imagine that Yidden, or, as some say, the Pison, is the Nile, for that river must have been even more familiar to the Israelites than the Euphrates, and have stood as little in need of a definition.

But the stringent difficulty is to find any two rivers that will reasonably answer to the predicates of the Pison and the Gihon; any rivers, which can be collocated as Havilah and Cush. The latter name, indeed, was given by the Hebrews and other Orientals to several extensive countries, and those very distant both from Armenia and from each other. As for Havilah, we have the name again in the account of the dispersion of the sons of Noah. The scholars argue, but whether that was the same as this Havilah, and in what part of Asia it was, we despair of ascertaining. Reland and others, the best writers upon this question, have felt themselves compelled to give to these names a comprehension which destroys all preciseness. So, likewise, the meaning of the two divinest products of the olive can be little more than matter of conjecture—the bedeloch and the stone skoham. The former word occurs only here and in Num. xi, 7. The Septuagint, our oldest and best authority with regard to terms of commerce, renders it the heathen word τόμας, meaning probably the ruby, or possibly the topaz; and in Numbers by κρύσταλλον, which the Greeks applied not merely to rock-cystal, but to any finely transparent mineral. Any of the several kinds of odoriferous gum, which many ancient and modern authorities have maintained, is not likely, for it could not be in value comparable to gold. The pearl is possible, but not quite probable, for it is an animal product, and the connection seems rather to confine us to minerals; and pearls, though transparent, are not transparent as good crystal is. Would not the diamond be an admirable substitute of N? The skoham occurs in ten other places, chiefly in the book of Exodus, and in all those instances our version says onyx; but the Septuagint varies, taking onyx, sardius, sardonix, byzil, prase-stone, sapphire, and amaragdas, which is a green-tinted rock-crystal. The preponderance of the former is in favor of onyx, one of the varieties of banded agate; but the idea of value leads us to think that the emerald is the most probable. There are two remarkable inventories of precious stones in Exod. xxxii, 10-18, and Ezek. xxvii, 18, which include the names of some of the Septuagint with the Hebrew. See Havilah. For attempted identifications of the Pison and Gihon, see those names respectively.

IV. For the Literature of the subject, see PARADISE. 2. (729, Sept. Ezib, but omits Isa. xxxvi, 12, and Ezek. xxvii, 28; Vulg. Eden,) one of the marts which supplied the luxury of Tyre with richly embroidered stuffs. It is associated with Haran, Sheba, and Ashbeha; and in most, 5, Beth-Eden, replacing the name of Eden, is rendered in the Sept. by Charras (Xhab-āb.) In 2 Kings xix, 12, and Isa. xxxvi, 12, "the sons of Eden" are mentioned with Gozan, Haran, and Rezeph, as victims of the Assyrian greed of conquest. Tellasser appears to have been the chief city of the tribe; and Knobel's (Comm. on Isaiah) etymology of this name would point to the highlands of Assyria as their whereabouts. But this has no sound foundation, although the view which it supports receives confirmation from the version of Jonathan, who gives כחנוב (Chanan) as the equivalent of Eden. Bochart proved (Codex. pt. i, p. 274) that this term was applied by the Hymnic writers of the ancient Assyrians to the mountain district of Assyria, which bordered on Media, and was known as Akkadene. But if Gozan be Gausanitis in Mesopotamia, 24 as its equivalent of Eden. Bochart proved (Codex. pt. i, p. 274) that this term was applied by the Hymnic writers of the ancient Assyrians to the mountain district of Assyria, which bordered on Media, and was known as Akkadene. But if Gozan be Gausanitis in Mesopotamia, 24
potamia, and Haran be Carrahe, it seems more natural to look for Eden somewhere in the same locality. Keil (Com. and C. Int., i. 97) thinks it may be Vdum, which Assemin (Bibl. Or. ii, 224) places in Mesopotamia, in the modern province of Dierbark. Bochart, considering the Eden of Genesis and Isaiiah as identical, argues that Gozan, Haran, Rezeph, and Eden are mentioned in order of geographical position, from north to south; and, identifying Gozan with Gausanita, Haran with Carrhe, a little below Gausanita on the Chabur, and Rezeph with Resipha, it gives to Eden a still more southerly situation at the confluence of the Eufrates and Tigris, or even lower. According to him, it may be Addos or Addana, which geographers place on the Euphrates near the present town Eljune, and succeeded in its importance by the town Eljune, which was founded in 1144, when all the Christian churches were converted into mosques. After many vicissitudes, in the course of which Edessa fell successively into the hands of the Sultans of Egypt, the Byzantines, the Mongols, Turks, and Persians, the city was finally conquered by the Turks, and has since formed a portion of the Turkish dominions. The population is variously estimated at from 25,000 to 50,000, of whom 2000 are Armenian Christians. The Jacobites, in the last century, had 150 houses and a church. The rest are Turks, Arameans, Kurds, and Jews. Edessa is regarded by the Eastern ortho-do xians, because it is said to have been the residence of Abraham" (Chambers, Encyclopaedia, s. v.). It is still the seat of a Greek archbishop and an Armenian bishop. A dialect of the Aramaic is still spoken at Edessa (comp. Etheridge on the Aramaic Language, p. 30).

The report of the introduction of Christianity by king Abgar (q. v.), a contemporary of Christ, is probably an unfounded legend; but it is certain that Christianity became firmly rooted in Edessa at a very early period. The twenty-sixth Osrhoenean king (152-167) was a Christian himself, a patriot, and a zealous promoter of Christianity, and the Gnostic Bardasanes is said to have been highly esteemed by him. Edessa was an early episcopal see, and in the 4th century became the chief see of Syrian ecclesiastical learning. The emperor Julian threatened to distribute the large treasure of the churches of Edessa among his soldi, but the knowledge of his death saved the churches from the execution of this threat. In 688, Ephrem (q. v.), the Syrian, came from Nisibis to Edessa, and by his preaching, teaching, and prolific writings, greatly distinguished himself in the defence of the orthodox doctrines of the Church. After the death of Ephrem, the Arians took possession of all the churches of Edessa, but after five years the ascendancy of the orthodox school was restored. Different from the Edessene school established by Ephrem was the Persian school at Edessa, which was intended to be a seminary for the Christian subjects of the Persian king. It attained its highest prosperity in the time of Ephrem, became subsequently a stronghold of Nestorianism, and was on that account dissolved in 488-498. Herzog, Real-Encik., ii, 645; Wetzet und Welte, Kirchen-Lex. iii, 301; Chronicon Edessenum, in Assemani, Biblioth. Oriental., i, 367-428; Cureton, Ancient Syriac Documents relative to Edessa, etc. (Lond. 1866); Etheridge, The Syrian Churches (Lond. 1846), p. 35 sq. See Nestorians.

Edgar, John, D.D., a Presbyterian minister of Ireland, was born in County Down, Ireland, and entered the ministry in 1820. His life from the outset of his ministry in 1820 was one of ceaseless toil. His energy of character was immense, and his name became a tower of strength to all the Christian enterprises with which he was identified. Upon the union of Presbyterians in 1840 he was made one of the professors of Divinity for the Assembly, and the influence he wielded over its students was very great, and he put forth strenuous and successful efforts for the erection and equipment of its theological college in Belfast. He fired the hearts of his students with his own
zest in the work of the evangelization of their country, and spent much of his vacation in personal labors for it. His spirit in church extension was remarkable. His last great effort was in undertaking to raise about $100,000 for erecting additional mansions among the churches. By far the most part of this had been secured before his death." At least fifty of the houses of worship belonging to the Presbyterian Church in Ireland owe their existence to his persevering efforts. He died in Dublin August 26, 1866. See Kilren, *Memoirs of John Edgar* (Belfast and London, 1867); *American Annual Cyclopaedia* for 1866, p. 277.

**Edgar, John Todd, D.D.**, a Presbyterian minister of North Carolina, was born at Scarsmore, April 13, 1792. With the proverbial love for knowledge of the Scotch-Irish, his parents gave him the best education that could be obtained in Kentucky, to which state they removed soon after his birth. He graduated at Princeton in 1816, and was licensed by the New Brunswick Presbytery. In 1817 he was ordained pastor of the church at Flemingsburg, Ky. He was thene called to Maysville, where he labored unremittingly. In 1829 he was induced to accept a call from the church at Frankfort, Ky, where his eloquence soon gathered around him the leading men of the state. Henry Clay said of him, "If you want to hear eloquence, listen to John T. Edgar." In 1833 he became pastor of the First Presbyterian Church in Nashville, Tenn., and continued to discharge the duties of that office with great fidelity and success up to the year 1853, when an association was appointed to aid him. He was distinguished for power in the pulpit, and for a degree of liberality of feeling and public spirit which caused him to be regarded as belonging rather to the whole community than to his particular church. Mr. Edgar wrote little, though at one time he was editor of the *American Presbyterian*, published at Nashville. He died suddenly of apoplexy Nov. 13, 1860.

**Edge**, with reference to the sword, is the rendering of πᾶς, pehus (like *eirix*), Luke xxii, 44, Heb. xi, 34, or from ἐκποιιν, ἐκποιιν, *nomin*, *nomin*, *meces* (Eccles, x, 10); poet. *πελεχ, *a rock, hence *sharpness* (Psa. lxxxvi, 49); elsewhere, in the sense of *brink or margin,* it corresponds to *παφαλ*, *phantas*; and to ἢπα, *kebes*, ἢπα, *katan*, or ἢπα, *katan*, *katan*, *extremity* (Exod. xxxvi, 7; xxxvii, 5; xxii, 26; xxvi, 5; xxxvi, 12; Num. xxxiii, 6; Josh. xiii, 27; Psa. lxxxiv, 4). To put *set on edge* is an inaccurate rendering (Jer. xxxi, 29, 30; Ezek. xviii, 2) of ἢπα, *kukh*, *to be bent* (as Eccles, x, 10). See *Sword,* *Sword,* *Sword,* *Sword,* *Sword,*

**Eidias, or Eddias** (11Eis, Alex. MS. 11Eis, Vulg. Eddeias), the second named of the "sons of Phoros," who took foreign wives after the captivity (1 Esdr. ix, 26); the *Jewish* (q.v.) of the Heb. list (Exra x, 25).

**Edict**, the technical name of a paper read in Presbyterian churches in Scotland, "as a species of guard on the purity of the Christian ministry. It is a public invitation to all who can say anything against the minister to come forward for the purpose. The form of the document authorized by the United Presbyterian Church is as follows: "Whereas the presbytery of—of the United Presbyterian Church have received a call from this congregation, addressed to A. B., preacher (or minister) of the Gospel, to be their minister, and the said call has been sustained as a regular Gospel call, and been accepted of by the said A. B., and he has undergone trials for ordination; and whereas the said presbytery having judged the said A. B. qualified for the ministry of the Gospel and the pastorate of this church, it is referred to the said call to succeed to his ordination on the day of — unless something occur which may reasonably impede it, notice is hereby given to all concerned that if they, or any of them, have anything to object why said A. B. should not be ordained pastor of this congregation, they may repair to the presbytery, which is to meet at — on the said — of —; with certification, that if no valid objection be then made, the presbytery will proceed without further delay. By order of the presbytery."

**Edict of Nantes.** See *Nantes,* France, Reformed Church of.

**Edicts, Imperial.** See *Persecutions.*

**Edification,** "the process by which believers are built up, that is, progressively advanced in knowledge and holiness." (1) The sacred writers perpetually employ this figure as their favorite illustration of the condition of Christians, as forming collectively the temple, and form, in an individual sense, the literal one (2 Cor. iii. 17). It is the temple in which the Lord dwells by his holy Spirit; and as being, individually, "living stones, built up into an habitation for the Lord." 'The words "edify" and "edification" have so completely lost their literal signification in our tongue, that it would be an imposition on the public conscience to use them in speaking of the building of a literal edifice, and thus the reader loses the force and significance of the language of the sacred writers." The word *edify,* especially when applied to individual Christians, has often the meaning of training, though in the strict sense of the *Order of Confirmation* in the English Prayer-book. 'To the end . . . . . . to the more edifying,' the word is probably used in the sense already explained, not in the especial sense of 'instruct' (Eden).

(2) "To perceive the full force and propriety of the term as used by the apostles, it is quite necessary to keep in mind the similitudes by which they generally describe a Christian church. All those spiritual gifts, which were bestowed on the Christians were for the building and edifying of the members of the church. The apostolic power in Church censures was for edification (Ephes. iv. 2). The church itself is the body not to pull down; that is, to preserve the unity of the Church entire, and its communion pure. And we may observe that this edification is primarily applied to the Church: that the Church may receive edifying; that ye may excel to the edifying of the Church; for the edifying of the body of Christ (1 Cor. xiv. 5, 12, 14, 25, iv, 12). And it is very observable wherein the apostle places the edification of the body of Christ, viz. in unity and love: till we all come in the unity of the faith, and of the knowledge of the Son of God, to a perfect man, unto the measure of the stature of Christ (Ephes. iv. 12, 18). Till we are united by one faith unto one body, and perfect man. And speaking the truth in love, may grow up into him in all things, which is the head, even Christ; from whom the whole body is fitly joined together, and compacted by that which every joint supplieth, according to the effectual working in the measure of every part, make increase of the body unto the edifying of itself in love (Ephes. iv, 15, 16). This is an admirable description of the unity of the Church, in which all the parts are closely united and compacted together, as stones and timber are to make one house; and this growth to make increase and in mutual love and charity, which is the very building and edification of the Church, which is edified and built up in love, as the apostle adds, that knowledge puffeth up, but charity edifieth (1 Cor. viii. 1). This builds up the Church of Christ; and that not such a building as charity as we have for all mankind, but such a love and sympathy as is peculiar to the members of the same body, and which none but members can have for each other" (Hook, *Ch. Des. s. v.*).

(3) "Many professors, and even teachers of religion, not greatly liking such union and communion, consequently, yet finding much said in the New Testament of the attainments and comforts of the first Christians have studied to devise means of enjoying these com
forts separately. Instead of the objects that chiefly drew the attention of the first believers, they have endeavored to fix the attention of Christians on a multitude of rules respecting the particular conduct of each in his devout exercises, his attendance on ordinances, and the frame of his heart therein. But this is a scheme of religion which is a mere device. Not only are we plainer from the whole tenor of the Acts of the Apostles, and their epistles to the churches, than that it is the will of Christ his disciples should unite together, holding fellowship in the institutions of the Gospel; and also that, as he in infinite wisdom and grace has furnished provision for their comfort, establishment, and edification, so these blessings can only be effectually enjoyed in proportion as they obey his will in this respect.

Edifice. See Architecture; House; Temple; Church.

Edithryda or Etheldrida, St., daughter of the Anglo-Saxon queen Anne. She made a vow of chastity in her youth, but was afterwards compelled to marry Earl Tondibert, who, at her request, respected her vow. After his death she desired to retire to the island of Ely, but was eventually obliged to marry Egfrid, son of the king of Northumbria. This marriage was dissolved, and in 671 she retired to the convent of Coldingham, and afterwards to the island of Ely, on which she founded a monastery. She was afterwards canonized, and is called Wilfrid named her abbess. Here she led a life of asceticism until her death in 679. —Herzog, Real-Encyk. iii, 618; Butler, Lives of the Saints, June 23.

Edinburgh, the capital of Scotland, and seat of a bishop of the Scotch Episcopal Church. The diocese of Edinburgh had in 1867 24 churches, 2 missions, 83 clergy, and 29 schools. The population of the city was, in 1861, 168,098. Edinburgh is also the seat of a Roman Catholic vicar apostolic, whose district had in 1860 about 60 parishes and 70,000 Roman Catholics. See Churchman's Calendar for 1868; Neber, Kirchl. Geogr. i, 103. (A. J. S.)

Edmund I of England, king and martyr, succeeded in 855, when but fifteen years of age, to his father Offa, king of the East Angles. Edmund reigned in meekness, and his whole life was a preparation for martyrdom. About 870 the heathen Danes invaded the kingdom, after violating the nuns, killing the priests, and laying waste the country, made him a prisoner. Unwilling to offend God by submitting to the terms of his captors, he was tortured, and finally beheaded (870). In 1129 his anniversary was placed among the English holidays, and the kings of England took him for patron. See his Life by Abbo, and another by John Lydgate. —Herzog, Real-Encyklopd. iii, 648.

Edmund, St. EDMUND RICH, archbishop of Canterbury in the thirteenth century, studied at Paris, where he became doctor of theology. Returning to England, he preached for the Crusades with such success as to command the approval of the Pope. He was consecrated archbishop of Canterbury April 2, 1234. It fell to his lot as prelate to resist the will of the Pope, and also that of the king of England, and he did resist manfully. He died at the monastery of Soisay, in France, Nov. 18, 1242. The English people, who admired and loved him, demanded his canonization; the papal court at first refused, but finally yielded, and he was canonized by pope Innocent IV in 1249. His Speculum Ecclesiae is published in the Bibliotheca Patrum. —Hoefler, Nouv. Biog. Générale, xv, 660; Hook, Lives of the Archbishops of Canterbury (1855, vol. iii); Wright, Biographia Literaria (Anglo-Norman period).

Edna (Edna, i. c. 757, plebeian; Vulg. Ama), the wife of Ragnell and mother of Sara, the bride of Tobias (Tob. vii, 2, 8, 14, 16; x, 12; xii, 1).

Edom (Heb. Edom, 'Edam or 'Edom, so called from his red hair, Gen. xxv, 25, or from the red pottage for which he was bought by Esau, xvi, 26). In the later name of Isaac's son, elder twin-brother of Jacob; more frequently called Esau (q. v.). See also Obed-Edom.

Edom (Sept. 'Idouyaia) stands also collectively for the Edomites, the posterity of Edom or Esau; and likewise for their country. See Edomite.

Edomite (Heb. 'Adom, 'Adom, Sept. 'Idouyaiai, fem. plur. 'Idouyaia; 1 Kings xi, 1, Sept. 'Idouyaia; but usually 'Edom, Edom, put collectively for the Edomites). The name Edom (fully written 'Edom, red; see Genesis, Heb. Theseus, i, 26) was originally the secondary name of Esau (Gen. xxv, 30, comp. ver. 25; xxxvi, 8), but is used ethnographically in the O. T., his descendants ("children of Edom," 'Edom 'Edam) being the race who had settled in the south of Palestine, and who at a later period came into conflict with the kindred nation of the Israelites (Deut. xxxii, 7; Num. xxx, 14). Comparatively seldom are the appellations children of Edom (Deut. ii, 4, 6; i Macce, iv, 8), house of Edom (Obad. 18), connected with another race of Edomites, or simply Edom (Jer. xxxi, 8; Obad. 6), used in Scripture for the Edomites or Idumeans; the people and country are often called merely Edom (Num. xxiv, 18; Josh. xv, 1; 2 Sam. vii, 14; 1 Kings xi, 14; and especially by the prophets), hence, more fully, land of Edom (Gen. xxxvi, 16, 21; Num. xxxii, 37), or field of Edom (Gen. xxii, 3; Judg. v, 4). The territory of the Edomites was mountainous (Obad. 8, 9, 19, 21), situated at the southern (Josh. xi, 17; xii, 7), i. e. south-eastern border of Palestine (Num. xxxiv, 9), or more particularly of the tribe of Judah (Josh. xvi, 1, 21), in the neighborhood of the Moabites (Judg. xi, 18; Isa. xi, 14; 2 Kings iii, 8), and was properly called the land or mountain of Seir (anan. Gen. xxvi, 20; xxxii, 4; Josh. xxiv, 2; Ezek. xxxv, 3, 7, 15; comp. Deut. ii, 4, 29). See Shem. Lofty and intersected by chasms in the rocks, it formed a natural fastness (Jer. xxxii, 14; Obad. 3 sq.), but it was no means unfruitful (Gen. xxxvii, 39). It contained, among other cities, the famous rock-hewn Sela (2 Kings xiv, 7), and extended from the Edomite Gulf to the Red Sea (1 Kings ix, 20; 2 Chron. viii, 17). It hence admits of no doubt that the cleft and craggy region traversed by fruitful, and now called el-Shere, rises from the spongy and waterless plains of the Edomites from the southern extremity of the Dead Sea to the eastern arm of the Red Sea, and is separated on the west by the long sandy plain el-Ghor from the desert el-Tib (Seetzen, xviii, 350, 354; Burckhardt, Trav. ii, 668), and bounded on the north by the wady el-Ahas, which separates it from the land of Moab, near Kerak, in the district of Jebel, is the ancient land of Edom, as Saadias has long ago perceived, for he renders Seir in Gen. xxxvi, 8 by the same Arabic name Shera (comp. Baumer in Berghaus's Anmii. d. Erd. u. Volkerkunde, i, 562 sq.). See Sela; Teman; Uz; Bozrah. According to the division in Greek authors, the territory of Edom, Idumaea (Idouyaia, a name evidently derived from the Heb.), was reckoned as a part of Arabia Petraea (see Anthon's Class. Dict. s. v.). The early inhabitants of Mount Seir, who were called Horites, were destroyed by the Edomites (Deut. xii, 22), or rather supplanted and absorbed by them. See Horite. Already, in the time of Moses, the Edomites showed a hostile feeling towards the Israelites by forbidding them to pass through their territories, and thus subjecting them to the hardship of journeying around it (Num. xxx, 15-21; comp. Judges xi, 17; 1 Sam. xiv, 17; 1 Kings ii, 12; 1 Chron. xvi, 28); an act which Saul successfully
avenged (1 Sam. xiv. 47), while David subjugated them (2 Sam. vili. 14; comp. 1 Kings xi. 13 sq.; Psa. ix. 2, 10), and his successor Solomon fitted out a merchant fleet in the Edomite harbors (1 Kings ix. 26), although under his reign a partially successful revolt took place (1 Kings xi. 14 sq.). In the division of the Hebrew commonwealth the Edomites consisted under the name of the Edom (probably by means of viceroyas, 2 Kings iii. 9, 12, 26; but compare 1 Kings xxii. 48; 2 Kings viii. 20), so that their ports were at the disposal of Jewish commerce to the time of Jerom (1 Kings vii. 49), under whose reign (B.C. 885) they threw off all dependence of Syria (2 Kings viii. 20) and retained their independence by force of arms against several succeeding princes of the weak kingdom of Judah (2 Kings viii. 21). Amaziah (2 Kings xiv. 7; 2 Chron. xxv. 11, in B.C. cir. 856, and also Uzziah (2 Kings xiv. 22; 2 Chron. xxv. 11), in B.C. cir. 802, again reduced the Edomites to subjection; and under Ahaz (B.C. cir. 738) they invaded Judaea (2 Chron. xxvii. 17), while, at the same time, the harbor of Elath was wrested from the Jewish dominions by the Syrians (2 Kings xvi. 6). From this time forward, the Edomites, favored by the increasingly formidable attitude of Asshur, the chief confidant of Damascus, and by the political severance of the kingdom of the Chaldeans connected with the kingdom of Judah, enjoying real independence, until they too at last were forced to succumb to the Chaldaean power (Jer. xxvii. 3, 6). The early prophets, nearly contemporary with these events, had already announced Judah's future triumph over the Edomites and the subjects and enemies of Israel (Isa. xi. 14; Joel iii. 19; Amos i. 11), but, after they had made common cause with the foes of Israel at the capture of Jerusalem (Ezek. xxx. 15; xxxvi. 5; Obad. 10, 15 sq.), the denunciations of the prophets became more severe (Ezek. xxi. 20, Lxx. 13, 21 sq.; Ezek. xxxvi. 12 sq.—compare 38; Obad. pass.; Psa. cxxxvii. 7; comp. Isa. xxxiv. 5 sq.; Zeph. i. 1 sq.). The Edomites, it is true, likewise felt the ravages of the Chaldaean march (Mal. i. 3 sq.), but they were left in their own land (in opposition to the view of Eichhorn, De Ezech. Proph. ii. 614, 634; Bezae, Ezech. xiv. 1440, 1625, who maintain that the Idumeans were politically annihilated by Nebuchadnezzar; see Gesenius, Comm. on Isa. i. 906; nor are the predictions of the utter desolation of Edom (e.g. Jer. xiii. 17, sq.) to be pressed to their extreme fulfilment; see Heinrich, De Idumaea et Loci Edomitis, Lpz. 1829, as a purely fortuitous event rent away a portion of southern Palestine (comp. Ezek. xxxv. 10), including the town of Helbon (1 Macc. v. 65). During the Syrian rule they continued to evince their old ill will against the Jews (1 Macc. v. 3, 6); 2 Macc. x. 4 sq. (B.C. 164) until the complete subjection and holy subjection by John Hyrcanus (B.C. cir. 129), and, by a compulsory circumcision, were merged in the Jewish state (Josephus, Ant. xiii. 9, 11; xv. 7, 5; comp. War. iv, 5, 5; yet they were invidiously termed half-Jews, Anti. xiv. 15, 2). From that time Idumea continued under a Jewish prefect (Jerome, Joseph. Ant. xiv. 1, 5). One of these, Antipater, managed so to ingratiate himself with the Jewish court, and, during the disputes concerning the Maccabean succession, wielded the procuratorship of all Judea, with which the friendship of the emperor had invested him, with such efficiency (C. C. G., 47), that he actually succumbed to supreme power in this new capacity or instead of Hyrcanus II (Joseph. Anti. xiv. 8, 5). His son Herod became the acknowledged king of the Jews, and founded an Idumean dynasty in Palestine. Idumea formed a province of his dominions, and was under the administration of a special governor (Jerome, Joseph. Ant. xv. 7, 9). Concerning the further history of this people, we can here only remark that the Idumeans in the last Jewish contest acted the same ruinous part with the Jews themselves (Joseph. War. iv, 4, 1 and 5; vili. 8, 11). The name of Edom or Edomite is to this day hateful to the Jews (Orto, Lex. vulg. p. 169; Lightfoot, Hor. Heb. p. 689). From the time of the overthrow of the Jewish nation, the name of Idumea no longer occurs, but passes away in the wider denomination Arabia (comp. Steph. Byz. p. 834, 841; Strabo xvi. 760, 749); since already for a long period the southern part of the ancient land of the Edomites was reckoned, together with its metropolitan Petra, to the Arab countries (comp. the city of Petra under the name of (E) Edom (Joseph. Anti. xiv. 1, 8; xvii. 8, 2; War. i. 18, 8): so that Idumea, while on the north it included in addition a Jewish district (comp. the term Idumæan for Jew, especially among the Roman poets, Celsi. Hierbd. ii. 469 sq.), at the same time was contracted in its southern part (though in the works of Plutarch, v. 15, 10, v. 17; Strabo, xvi. 760; Jerome in Obs. 1); but this does not affect Biblical geography, and it would be difficult to reduce the point to full historical and topographical clearness (see Ebalad, Palest. p. 89 sq.). See Arabia; Petra. The form of government among the Edomitic people was, like that of surrounding nations, tribal (comp. Gen. xxvi. 15 sq.), yet they originally (or at least earlier than the Israelites) had kings (Gen. xxxvi. 32 sq.; Num. xx. 14; see Tach on Gen. xxxvi. 9 sq.; Bertheau, Isra. Gesch. p. 207), who appear to have been freely elected, and who were merely stately kings of the people (Gen. xxxvi. 40; Ezek. xxxii. 29; comp. Isa. xxxiv. 12, and Gesenius, in loc.; Bengstenberg, Pent. ii. 299 sq.), until (in the time of Solomon) a hereditary dynasty had established itself (1 Kings xi. 14 sq.). While the country remained under a monarchy, the name of Edom was near to disappear (1 Kings xxii. 48); although under Jehoshaphat mention is made (2 Kings iii. 9, 26) of a king (viceroy) of the Edomites (in alliance with him), and from this time they seem to have had an uninterrupted line of kings (Amos ii. 1; Jer. xxvii. 9, Ezk. xxxii. 29). The principal mode of livelihood and employment of the Edomites were commerce by trade by means of caravans (Heeren, Ideen, i. 1, p. 107; Lengerke, Kem. i. 298; compare Ezek. xxviii. 16, where, however, the true reading is Aram; see Haverinck in loc.), probably to Elath and Exon-guber, on the Red Sea; the raising of cattle, agriculture, and the cultivation of vines (Num. xxi. 17; Ezek. xxx. 13); according to Jerome (Osom. s. v. Fenon), also mining (see C. G. Plade, De re metall. Miliarum, Edomiti, et Phemic., Lpz. n. d.). Respecting their religion the Old Test. is entirely silent, except that they lead such a holy existence (Jer. xxxii. 20): Josephus (Ant. xx. 7, 9) mentions one of their gods by the name of Cose (Közi, 7 קז़, the destroyer or ender; see Sitztg. Philos. p. 265; and comp. Epiphan. Har. 55; Lengerke, Kem. i. 298). From the earliest times the wisdom of the Edomites, namely, of the Tameanite branch, was celebrated (Obad. 8; Jer. xii. 7). See Ux. (On the subject generally, see Van Iperen, Hist. crit. Edomorum, et Amalek. Leonard. 1768; Hoffmann, in the Halle. Encyclop. ii. xv. 146). See Idumea.

**Edrei** (Heb. Edre'ı, אֶדְרֵי, mighty; Sept. Ἐδραίος and Ἐδραῖον), the name of two cities.

1. One of the metropolitan towns (Ashhtaroth being the other) of the kingdom of Bashan, beyond the Jordan (Josh. xii. 4, 5; xii. 12; Deut. iii. 10 sq.). It was here that On the final defeat of the Edomites, and lost his kingdom (Num. xxi. 33–35; Deut. i. 4; iii. 1–5). Edrei afterwards belonged to eastern Manasseh (Josh. xiii. 31; Num. xxxii. 35). It is probable that Edrei did not remain long in possession of the Canaanites. May it not be that they abandoned it in consequence of its position within the borders of a wild region infected by numerous robber bands? The Leah is the ancient Argoth, and appears to have been the stronghold of the Geshurites; and they perhaps subsequently occupied Edrei (Josh. xii. 4, 5). It was the seat of a bishop in the early age of Christianity (Reland, Palest. p. 547), and a bishop of
EDREI

Adrai sat in the Council of Seleucia (A.D. 381) and of Chalcedon (A.D. 451). In A.D. 1142 the Crusaders under Baldwin his nephew, came near, or Atradum, then popularly called also Vieniae Bernardi de Stampilis, but they encountered such obstacles in the difficult nature of the ground, the scarcity of water, and the valor of the inhabitants, that they were compelled to retire (Will. Tyr. p. 895, 896, 1082). Abulfeda calls it Adra (Tabk. Pers., ii. p. 210).

There are two ancient towns in Bashan which now claim the honor of being the representatives of Edrei. The one is called Edra, and is situated on the south-west angle of the rocky district of Lejah, the Argob of the Book of Deuteronomy, the Trachonitis of the Greeks. The ruins of Edra are among the most extensive in Hauran. The site is a strange one. It is a rocky promontory projecting from the Lejah [see Trachonitis], having an elevation of some thirty feet above the plain, which spreads out beyond it smooth as a sea, and of unrivaled fertility. The ruins are nearly three miles in circuit, and have a strange, wild look, rising up in black shattered masses from the midst of black rocks. A number of the ancient houses still remain, though half buried beneath heaps of more modern ruins. Their walls, roofs, and doors are all of stone; their very faces are grooved and chiselled, and tell of a great age. The site is a notable city of Arabia, twenty-four miles from Bostra (Onomast. s. v. 'Eroptai, Edra). In another place they give the distance at twenty-five miles from Bosra and six from Ashtaroth (66. s. v. 'Atrapos, Astara, Ader, which in question is called Alpia, Ader). Edra is laid down in the Robinsoner Tables as here indicated (Reland, Palaest., p. 547; comp. Ptol. v. 17, 7). There can be no doubt that the city thus referred to is the modern Dera; and the statement of Eusebius is too explicit to be set aside on the supposition that he has confounded the two cities in dispute. Moreover, it is improbable that the boundaries of Manasseh East extended so far as the locality of Edra. Most modern geographers have therefore concluded that Dera marks the real site of Edrei (Reland, Palaest., p. 547; Ritter, Palaest. and Syr. ii. 584; Burchhardt, Travels in Syria, ii. p. 241; Buckingham, Arab. Tribes, p. 168; Schwarz, however, declares for the other position, Palaest. p. 222).

2. A fortified town of northern Palestine, allotted to the tribe of Naphtali, and situated near Kadesh and Hazor (Josh. xix, 57). About two miles south of Ke- desh is a small village called Edrei. A large church stands at the northern end of the town. A Greek inscription over the door informs us that it was originally a heathen temple, was converted into a church, and dedicated to St. George in A.D. 516. There are the walls of an ancient St. Elias church, and near the centre of the town a cloistered quadrangle, which appears to have been at first attached to a forum, and afterwards to a cathedral. On the public buildings and private houses are many Greek inscriptions. Some were copied by Burchhardt, and some by Rev. J. L. Porter. The total number amounted to about fifty families, of which some eight or ten were Christian, and the rest Mohammedan. A full account of the history and antiquities of Edrei is given in Porter's Five Years in Damascus, ii. 250 sq., and Handbook for Syria and Palestine, p. 559 sq.; also in Burchhardt's Syria, p. 57 sq.; Sch hệ, Dersch's Travel in Syria, p. 57 sq.; Buckingham's Travels among the Arab Tribes, p. 374.

The other place with which Edrei has been identified is called Dera, and stands in a shallow wady in the open plain of Hauran, about fourteen miles south of Edra. The following reasons have been assigned in favor of the other site. 1. The name Edrei, which signifies "strength," and the fact that it was the capital of an ancient and warlike nation, naturally lead to the belief that it was a very strong city. Ancient cities were always, when possible, built on the tops of hills, or in rocky fastnesses, so as to be easily defended. Edra stands on a ridge of jagged rocks, and is so encompassed with cliffs and defiles as to be almost inaccessible. Dera, on the contrary, is, in the open plain, and has no traces of old fortifications (St. Robin- son, ii. 160). 2. The ruins of Edra are more ancient, more important, and much more extensive than those of Dera. The dwellings of Edrei possess all the character-istics of remote antiquity—massive walls, stone roofs, stone doors. The monuments now existing seem to show that it must have been an important town from the time the Romans took possession of Bashan; and that it, and not Dera, was the episcopal see of Adram. 3. Edrai, as it is written in the Babylonian Tablets, is a noted city of Arabia, twenty-four miles from Bostra (Onomast. s. v. 'Eroptai, Edra). In another place they give the distance at twenty-five miles from Bosra and six from Ashtaroth (66. s. v. 'Atrapos, Astara, Ader, which in question is called Alpia, Ader). Edra is laid down in the Robinsoner Tables as here indicated (Reland, Palaest., p. 547; comp. Ptol. v. 17, 7). There can be no doubt that the city thus referred to is the modern Dera; and the statement of Eusebius is too explicit to be set aside on the supposition that he has confounded the two cities in dispute. Moreover, it is improbable that the boundaries of Manasseh East extended so far as the locality of Edra. Most modern geographers have therefore concluded that Dera marks the real site of Edrei (Reland, Palaest., p. 547; Ritter, Palaest. and Syr. ii. 584; Burchhardt, Travels in Syria, ii. p. 241; Buckingham, Arab. Tribes, p. 168; Schwarz, however, declares for the other position, Palaest. p. 222).

EDUCATION.

Education, Hebrew. Although nothing is more carefully incalculated in the Law than the duties of parents to teach their children its precepts and principles (Exod. xii. 26; xiii. 8, 14; Deut. iv. 5, 9, 10; vi. 7, 20; xi. 19, 21; Acts xxii. 3; 2 Tim. iii. 15; Susanna, 8; Josephus, Ap. ii, 16, 17, 25), yet there is little trace among the Hebrews in earlier times of education in any other than a rudimentary sort. The word "school," in the strict construction, of which so much is said in the book of Proverbs, is to be understood chiefly of moral and religious discipline, imparted, according to the direction of the Law, by the teaching and under the example of parents (Prov. i. 2, 6; ii. 20; iv. 1, 7, 20; viii. 1; ix. 1, 10; xi. 1; xvi. 22; xvii. 24; xxxii). Implicit expec-

ations to this statement may perhaps be found in the instances of Moses himself, who was brought up in all Egyptian learning (Acts vii. 22); of the writer of the book of Job, who was evidently well versed in natural history and in the astronomy of the day (Job xxi. 31; xxxiv. xi. 31); of Daniel and his companions in captivity (Dan. i. 4, 17); and, above all, in the intellec-
tual gifts and acquirements of Solomon, which were even more renowned than his political greatness (1 Kings iv. 29, 94; x. 1-9; 2 Chron. ix. 1-8), and the memory of which is kept with singular reverence, not only by monarchs, as Jehoshaphat or Josiah, or by prophets, as Elijah or Isaiah, to enforce, or at least to inculcate reform in the moral condition of the people on the basis of that standard (2 Kings xvii. 15; xxiii. 8-20; 2 Chron. xvii. 7, 9; I Kings xix. 14; Isa. i. 9).
In later times the prophecies, and comments on them as well as on the earlier Scriptures, together with the traditions of the Jews, went into the hands of the rabbis (see Euclet, xxxviii, 24; 26; xxxix, 1-11). St. Jerome adds that Jewish children were taught to say by heart the genealogies (Jerome on Titus, iii, 9; Calmet, Dict. s. v. Génaudie). Parents were required to teach their children some trade, and he who failed to do so was said to be virtually teaching his child to steal (Mishna, Kiddushin, ii, 2, vol. iii, p. 413, Surenhus.; Lightfoot, Chron. Temp. on Acts xviii, vol. ii, p. 79).

The sect of the Essenes, though themselves abhorring marriage, were anxious to undertake, and careful in carrying out the education of children, but confined itself to the temple, and to moral law (Josephus, War, ii, 8, 12; Philo, Quod omnis probus liber, ii, 458, ed. Mangey; § 12, Tauchn.).

Previous to the captivity, the chief deportees of learning were the schools or colleges, from which, in most cases (see Amos vii, 14), proceeded that succession of public teachers who, at various times, endeavored to reform the moral and religious conduct of both rulers and people. (See Werkmeister, De primis scholarum ap. Hebr. originis, Jenalt, 1735; Hegewis, Ob chen dem Alten öffentl. Erziehun g war, Altona, 1811.) In these schools the Law was probably the chief subject of instruction. The study of languages was followed by any Jews till after the Captivity, but from that time the number of Jews residing in foreign countries must have made the knowledge of foreign languages more common than before (see Acts xxii, 37). From the time of the outbreak of the last war with the Romans, parents were forbidden to instruct their children in Greek literature (Mishna, Sotah, c. ix, 15, vol. iii, p. 307, 308, Surenhus.). Nor had it ever been generally pursued by the Jews (Origen, contra Celsum, ii, 34).

Besides the prophetic schools, instruction was given by the priests in the Temple and elsewhere, but their subjects were doubtless exclusively concerned with religion and worship (Lev. x, 11; Ezek. xlii, 23, 24; 1 Chron. xxxv, 7, 8; Mal. ii, 12). Those sovereigns who exhibited any anxiety for the maintenance of the religious element in the Jewish polity were conspicuous in enforcing the religious education of the people (2 Chron. vii, 7, 8; xiv, 6, 11; 2 Kings xiii, 22).

From the time of the settlement in Canaan there must have been among the Jews persons skilled in writing and in accounts. Perhaps the neighborhood of the tribe of Zebulun to the commercial district of Phoenicia may have been the occasion of their reputation for the art of writing. The written language of the tribe are represented (Judg. v, 14) by the same word, "םֹסֵר, sofer," used in that passage of the levying of an army, or, perhaps, of a military officer (Gesenius, s. v.) as is applied to Ezra in reference to the Law (Ezra vii, 6); to Seraiah, David's scribe or secretary (2 Sam. viii, 17); to Shebna, scribe to Hezekiah (2 Kings xviii, 37); to Shemaiah (1 Chron. viii, 6); Baruch, scribe to Jeremiah (Jer. xxvi, 32), and others filling like offices at various times. The municipal officers of the kingdom, especially in the time of Solomon, must have required a staff of well-educated persons in their various departments under the recorder, "שֶׁמֶור, mosher," or historiographer, whose business was to compile memorials of the reign (2 Sam. viii, 16; xx, 24; 2 Kings xviii, 16; 2 Chron. xxxii, 8). Learning, in the tribe above mentioned, was at all times highly esteemed, and educated persons were treated with great respect, and, according to Rabbinical tradition, were called "sons of the noble," and allowed to take precedence of others at table (Lightfoot, Chr. Temp. Acts xviii, vol. ii, 79, 61; Hor. Heb, Luke xiv, 8-24; ii, 540). The same authority depletes the degeneracy of later times in this respect (Mishna, Sotah, ix, 15, vol. iii, 308, Surenhus.).

The schools of the prophets succeeded, after the Captivity, the synagogues, which were either them-

EDWARDS

EDUCATION FOR THE MINISTRY. See MINISTRY, THEOLOGICAL EDUCATION.

Edumia, a place thus described by Eusebius and Jerome (in the Onomasticon, s. v. Eoumyia, Edumia) :

"of the tribe of Benjamin; and there is still a village Eduma, Eoumyia, in Acrobatia, about twelve miles east of Neposia. From this language, Leclerc (noti- cing that Aquam in Edumia is Aquarb in this last place) considers that this place was settled by the Phœnicians, who colonized a similar name farther south.

Van de Velde finds the locality in the modern village Daumen, S. E. of Nabilous (Narrat. ii, 306); a coincidence first pointed out by Robinson (Researches, iii, 108), as lying in the prescribed position, although not within the tribe of Benjamin (apparently a conjecture of Euseb.). It is situated on the tableland overlooking the Jordan valley, and contains a fountain and ancient sepulchres in the outskirt (Robinson, Later Researches, p. 292, 293).

E'duth (עֶדָּת, eduth, precept, as it is often rendered; Sept. and Vulg. translate accordingly) stands (besides being translated elsewhere in its ordinary acception) as a part (in connection with "Shushan") ethnically, as being related to instruction and religious ceremonial, as the contents of the whole were of a revealed or sacred character (title of Ps. 1, lx). See SHOSHANIM.

Edward III, Confessor, king of the Anglo-Saxons, was born in Oxfordshire in 1004, and died Jan. 5, 1066. He was canonized by Pope Alexander III, and styled "Confessor" in the bull of canonization. The only ground for this was the fact that when, in 1044, he married Editha, daughter of earl Godwin, he informed her that he would make her his queen, but that she should not share his bed. He kept this unnatural vow, and for it, in spite of a licentious life, he was anointed by the Pope within the tribe of Benjamin (apparently a conjecture of Euseb.). It is situated on the tableland overlooking the Jordan valley, and contains a fountain and ancient sepulchres in the outskirt (Robinson, Later Researches, p. 292, 293).

Edwards, John, D.D., one of the strongest Calvinistic divines of his age. He was born at Hartford Feb. 26, 1637, and was educated at Merchant-Taylor's School, London. In 1658 he entered St. John's College, Cambridge, where he became scholar and fellow. He was minister of Trinity Church, Cambridge, from 1664 to about 1676, when he was made rector of St. Peter's, Colchester. He returned to Cambridge in 1679, and there wrote industriously on controversial theology. He died April 16, 1716. "It may be questioned whether, since the days of Calvin himself, there has existed a more decided Calvinist than Dr. Edwards. He has better understood the Paul, the Apostles, the Westminster, the Beatitude, the Calvin of his age. Such was his abhorrence of Arminianism that he contended, with the old Puritans, that there is a close connection between it and popery." His principal writings are, Theologia reformata, or the Body and Substance of Christian Religion in Distinct Discourses or Treaties upon the Apostles' Creed, the Lord's Prayer, and the Ten Commandments (Lond. 1713-16, 3 vols. fol.):—A complete History or Survey of all the Diapensations or Methods of Religion (London, 1659, 2 vols. 8vo):—The Arminian Doctrines condemned by the Scripture (Lond. 1711, 8vo):—Authority of the O. and N. T. (Lond. 1693, 3 vols. 8vo):—Exercitions, critical, theological, etc., on important places in the O. and N. T. (Lond. 1702, 8vo):—Socianism unmask'd (Lond. 1697, 8vo):—The Doctrine of Faith and Justification (Lond. 1708, 8vo):—Jones, Christ. Biography, s. v.; Kipps, Biographia Britannica, s. v.

Edwarda, Jonathan, was born at East Windsor, Conn., on the 5th of October, 1708. His great-grandfather on the paternal side was the Rev. Richard Edwards, a clergyman in London in the time of queen Elizabeth. His great-grandfather, William Edwards, was born in England, came to America about the year 1640, and was an honorable trader in Hartford, Conn. His grandfather, Richard Edwards, was born at Hartford, and spent his life there as a respectable and wealthy merchant. His father, Rev. Timothy Edwards, was born in Hartford May 14, 1669. He entered Harvard College in 1687, and received the
two degrees of Bachelor and Master of Arts on the same day, July 4, 1691, one in the morning and the other in the afternoon, 'an uncommon mark of respect paid to his extraordinary proficiency in learning.'

He was ordained pastor of the church at East Windsor in May, 1694. In 1711 he was appointed, by the Legislature of Connecticut, chaplain of the troops sent on an important expedition to Canada. He was distin-
guished for his scholarship, devoutness, and general weight of character. He generally preached extem-
pore, and until he had passed his seventieth year he did not often write the heads of his discourses. He lived to enjoy the fame of his son, and died January 27, 1738. On his memorial side, the great-grandfather of Presi-
dent Edwards was Anthony Stoddard, Esq., who emi-
grated from the west of England to Boston, and was a member of the General Court from 1655 to 1684. The grandfather of Edwards was the Rev. Solomon Stodd-
dard, of Northampton, Mass., one of the most erudite and powerful clergymen of New England. Edwards' mother was Esther, the second child of the Northam-
pton pastor, a lady of excellent education and rare strength of character.

The history of President Edwards cannot be fully made out without considering that both on the pa-
ternal and maternal side he was allied with families belonging to the ecclesiastical aristocracy of New England. He was an only son, and had ten sisters, some of whom became the wives of eminent men. He was trained by his father and his four eldest sisters (all of whom were in very much af-
fected for many months, and concerned about the things of religion and my soul's salvation, and was abundant in religious duties. I used to pray five times a day in secret, and to spend much time in rel-
gious conversation with other boys, and used to meet with them to pray together. I experienced I know not what kind of delight in religion. I, with some of my schoolmates, joined together and built a booth in a swamp, in a very retired spot, for a place of prayer; and, besides, I had particular secret places of my own in the woods where I used to retire by myself, and was from time to time much affected. My affections seemed to be lively and easily moved, and I seemed to be in my element when engaged in religious duties.'

Reflecting on these fervid emotions, Edwards after-
ward regarded them as so signs of genuine piety. He was keen in his analysis of character, and was wont to encourage, not only in others, but also in himself, the habit of severe self-examination, and of jeal-
ous watchfulness against the influence of self-love. Although from his earliest childhood he had been duti-
ful, docile, and exemplary in his outward demeanor, yet he writes concerning his boyhood and youth: 'I was at times very uneasy, especially towards the lat-
ter part of my time at college, when it pleased God to seize me with a pleurisy, in which he brought me nigh to the grave, and shook me over the pit of hell. And yet it was not long after my recovery before I fell again into my old ways of sin. But God would not suffer me to go on with any quietness. I had great fear and vio-

ence of heart against wicked inclinations, repeated resolutions, and bonds that I laid myself under by a kind of vows to God, I was brought wholly to break off all former wicked ways, and all ways of known outward sin, and to apply my soul to the care of God, and to seek to accomplish religious duties, but without that kind of affection and delight which I had formerly experienced.' With his characteristic fidelity in scrutinizing his motives, he looked with distrust on his seeking the Lord after this 'miserable manner, which,' he says, 'has made sometimes in question whether whether such miserable seeking ever succeeded.' At length, however, but precisely at what period he does not state, he began to entertain an abiding confidence in his hav-
ing been regenerated by the Holy Ghost. In the po-
etic and rhetorical style which often characterizes his writings, he says: 'I began to have a new kind of apprehensions and ideas of Christ, and the work of re-
demption, and the glorious way of salvation by him. This I know not how to express otherwise than by a calm, sweet abstraction of soul from all the concerns of this world and the flesh, and a more vital or fixed ideas and imaginations of being alone in the mountains or some solitary wilderness, far from all mankind, sweetly conversing with Christ, and rapt and swallow-
ed up in God. One on occasion 'I walked abroad alone in a solitary Corner, and gave myself over to con-
templation. As I was walking there, and looking upon the sky and clouds, there came into my mind so sweet a sense of the glorious majesty and grace of God as I know not how to express. I seemed to see them both in a sweet conjunction, majesty and meekness joined together; it was a sweet, and gentle, and holy majes-
ty, and also a majestic meekness, an awful sweetness, a high, and great, and holy gentleness. After this my sense of divine things gradually increased, and be-
came more and more lively, and had more of that in-
ward sweetness. The appearance of every thing was altered to me, and that which before had no signif-
cast or appearance of divine glory in almost every thing. God's excellency, his wisdom, his purity, and love, seemed to appear in every thing—in the sun, moon, and stars; in the clouds and blue sky; in the grass, flowers, trees; in the waves and sea—"which used greatly to fix my mind. I often used to sit and view the moon for a long time, and in the day spent much of my time in viewing the clouds and sky, to behold the sweet glory of God in these things, in the mean time singing forth with a low voice my con-
templations in the spirit of the Creator and Redeemer, and scarce anything in all the works of nature was so sweet to me as thunder and lightning; formerly nothing had been so terrible to me. Before, I used to be uncommonly terrired with thunder, and to be struck with terror when I saw a thunder-storm rising; but now, on the contrary, it rejoiced me to hear it. I used to speak, at the first appearance of a thunder-storm, and used to take the opportunity at such times to fix my-
self in order to view the clouds, and see the lightnings play, and hear the majestic and awful voice of God's thunder, which oftentimes was exceedingly entertain-
ing, leading me to sweet contemplations of my great

The sharpness of his intellect, the activity of his imagination, the liveliness of his sensibilities, and the
EDWARDS

Edwards's piety, were regarded as signs of his being called of God to the ministry of the Gospel. Having been a resident scholar at Yale College for nearly two years after his graduate, and having pursued his theological studies during that period, he was "approved" as a preacher in June or July, 1722, two months before he was nineteen years of age. From August, 1722, until April, 1725, he preached in a small Presbyterian church in Yonkers, New York. His eloquence fascinated his hearers, but he felt compelled to decline their urgent invitations to become their pastor. In his solitary walks along the silent banks of the Hudson he: learned more and more of "the bottomless depths of seclusion" that lie below the college, his heart, and of the beauty and amissibleness of true holiness.

"Holiness, as I then wrote down some of my contemplations on it, appeared to me to be of a sweet, pleasant, charming, serene, calm nature, which brought an inexpressible purity, brightness, peacefulness, and ravishment to the soul. In other words, that it made the soul like a field or garden of God, with all manner of pleasant flowers, enjoying a sweet calm, and the gentle, vivifying beams of the sun. The soul of a true Christian, as I then wrote my meditations, appeared like such a little white flower as we see in the spring of the year, growing up from a green bed in the bosom to receive the pleasant beams of the sun's glory; rejoicing, as it were, in a calm rapture; diffusing around a sweet fragrance; standing peacefully and lovingly in the midst of other flowers round about, all in like manner opening their blossoms to drink in the light of the sun. In his sermons and writings in New York that he wrote the thirty-fourth of his well-known "Resolutions" for the government of his life.

In September, 1725, he was called to a tutorship in Yale College. Having passed the preceding winter and spring in severe study at the college, he entered on his tutorship in June, 1726, and left it in September, 1726. After having declined various invitations to take the oversight of churches, he was ordained February 15, 1727, as pastor of the church in Northampton, a colleague with his celebrated grandfather, Solomon Stoddard. He rose at once into eminence as a preacher, especially as a preacher of the divine law, of the divine sovereignty, of man's entire sinfulness by nature, of justification by faith, and of eternal punishment. He often spoke extempore; he seldom made a gesture; his voice was not commanding; his power was in his mind. Dr. Trumbull says that when Mr. Edwards was preaching at Enfield, Conn., "there was such a breathing of distress and weeping that the preacher was obliged to speak to the people and desire silence that he might be heard. A gentleman remarked to President Dwight that when, in his youth, he heard Mr. Edwards describe the day of judgment, he fully supposed that immediately at the close of the sermon "the Judge would descend, and the final separation take place." During the delivery of one of his most overwhelming discourses in the pulpit of a minister unused to such power, this minister is said to have forgotten himself so far as to pull the preacher by the coat, and try to stay the torrent of such appalling eloquence by the question, "Mr. Edwards! Mr. Edwards! is not God a merciful Being?"

In February, 1729, in consequence of the death of Mr. Stoddard, the entire charge of the congregation at Northampton was devolved on Mr. Edwards. In 1728 and 1730 occurred a remarkable "awakening" of religious feeling in his parish; another occurred in 1740, at which period he became a bosom friend of George Whitefield. During both these developments of religious activity he preached with a force which overawed his hearers. While his parochial labors were "skillful and earnest, he studied the phenomena of the revival with the keenness of a philosopher, and they prompted him to write some of his most acute disquisitions. Indeed, nearly all the works which he published during his ministry at Northampton indicate the degree in which he labored for the unloosing the regulation of those religious "awakenings" for which his ministry was distinguished. Some of these works are merely sermons, others are larger treatises. They bear the following titles: God glorified in Man's Dependence (1731): A divine and supernatural Light imparted to the Spirit of God (1731); Sermons on the Holy Ghost (1741); one of his most terrific sermons); Sorrows of the bereaved spread before Jesus (1741); Distinguishing Marks of a Work of the true Spirit (1741); Thoughts on the Revival in New England, etc. (1745): The Watchman's Duty and Account (1745); The true Excellency of a Gospel Minister (1744); A Treatise concerning religious Affections (1746); one of his most spiritual and analytical works); An humble Attempt to promote explicit Agreement and visible Union among God's People in extraordinary Prayer (1746); True Senses, when they are taken from the Balance (1747); God's awful Judgment in breaking the strong Rods of the Community (1748); Life and Diary of the Rev. David Brainerd (1749); a volume which exerted a decisive influence on Henry Martyn, and has affected the missionary spirit of the English as well as American churches. In New York he published a book of 484 pages in 1749; Qualifications for full Communion in the visible Church (1749; a treatise of historical as well as theological importance); Farewell Sermon to the People of Northampton (1750); called "the best farewell sermon ever written."

The last two publications suggest the most sorrowful event of President Edwards's life. He was dismissed from his Northampton pastorate on the 22d of June, 1750. As early as 1744 he had offended many, and among them some of the most influential families in his congregation, by certainregulations he adopted in regard to alleged immoralities prevalent at Northampton. The whole parish was shaken by his resolute and uncompromising reproofs, and was predisposed to resist any subsequent innovation which he might make. His grandfather, Mr. Stoddard, had written the memorial, which many persons who are not immoral have a right to partake of the Lord's Supper. The authoritative influence of Mr. Stoddard had induced not only the Northampton Church, but also many other churches, to adopt that principle. Mr. Edwards, after prolonged deliberation, opposed it. The entire community was aroused by his boldness in controverting the teachings of a man like Solomon Stoddard, "whose word was law." After a prolonged and earnest controversy, he was ejected from the office which he had adorned for more than twenty-three years. He never saw occasion to change the opinions which were so obnoxious to his people; and two years after his dismissal he published a work entitled Misrepresentation corrected and Truth vindicated in a Reply to Mr. Solomon Williams's Book on Qualifications for Communion; to which is added a letter from Mr. Edwards to his late Fleece. In June (1759). After his death, and after a disastrous controversy through the land, his principles prevailed among the evangelical churches.

At the present day, when the dismissal of pastors is so frequent, we cannot easily imagine the mortification and injury which Edwards suffered in consequence of his difficulties with his parish. He was in his forty-seventh year, and had accumulated no property for the support of his large and expensive family. He was compelled to receive pecuniary aid from his friends in remote parts of this country and in Great
Brittain. His wife was a descendant from the earls of Kersington, and was a lady of rare accomplishments. The description which he wrote of her in her girlhood was pronounced by Dr. Chalmers to be one of the most beautiful compositions in the language. He was married to her on the 27th of July, 1727, and at the time of his disinmission, his eldest son, afterwards judge Tim-

God, but yet mutable so that it might fail from it;" and that "man, by his fall into a state of sin, hath wholly lost all ability of will to any spiritual good accompanying salvation;" another school regard Edwards as denying this proposition in its literal, and affirming it only in its figurative sense, and believing that since the Fall man has all the freedom or liberty which he ever had, or can be imagined to have. One class of critics suppose him to believe that motives are the efficient or the necessitating causes of volitions; another class suppose him to believe that the volition is the effect of motive as an occasion, rather than the necessary effect of motive as a cause. The latter class interpret his whole theory of the will in the light of the following remark of Edwards to the Scotch divine: "On the contrary, I have largely declared that the connection between antecedent things and consequent ones, which takes place with regard to the acts of men's wills, which is called moral necessity, is called by the name of necessity improperly, and that all such terms as must, cannot, impossible, unable, irresistible, unavoidable, inescapable, etc., when applied here, are not applied in their proper signification, and are either used nonsensically and with perfect insignificance, or in a sense quite diverse from their original and proper meaning, and their use in common speech, and that such a necessity as attends the acts of men's wills is more properly called certainty than necessity, it being no other than the certain connection between the subject and predicate of the proposition which affirms their existence." It is asserted by many that Edwards makes a distinction between the will and the sensibilities; it is thought by some that he does make a distinction; the acts of the will being acts of moral choice, the processes of the sensibilities being what he elsewhere terms "natural or animal feelings or affec-

During his virtual banishment to the Stockbridge wilderness he wrote another of his more noted works, entitled The great Christian Doctrine of Original Sin defended, etc. The work was finished May 26, 1757, but was not published until 1758, several months after his death. Perhaps the distinctive feature in this treatise is his defence of the doctrine that there was a constituted oneness or identity of Adam and his poster-

in the seventeenth year; and, his daughter, afterwards the mother of president Timothy Dwight, was in her sixteenth year; another daughter, afterwards, the mother of President Dwight, died three years before his dismissal. She was betrothed to David Brainerd, who had been a cherished inmate of her fa-

In July, 1751, about a year after his dismissal, Edwards was installed pastor of the small Congregational church in Stockbridge, Mass., and missionary of the Housatonic tribe of Indians at that place. He preached to the religious services in the Indian language, and was an inter-

preter. In this uncultivated wilderness he was sadly afflicted with the fever and ague, and other disorders incident to the new settlements. He published a characteristic sermon in 1752, entitled True Grace dis-

tinguished from the Experience of Devils. In 1754 he published a dissertation on the subject of his Essay on the Freedom of the Will. Of this essay there are conflicting interpretations. One school of interpreters contend that he believed in a literal inability of the soul to act otherwise than it does act; another school contend that he did not believe in an inability which is absolute and literal, but only a two years of age; his second son, afterwards Dr. Jonathan Edwards, was about five years of age; and his youngest son, afterwards judge Pierpoint Edwards, was an infant of two or three months; his third daughter, afterwards the mother of Aaron Burr, was in her eleventh year; and his fourth daughter, afterwards the mother of President Dwight, died in her sixteenth year. He had a family of three sons and seven daughters—another daughter, Jerusha, having died three years before his dismissal. She was betrothed to David Brainerd, who had been a cherished inmate of her fa-

ther's family.

God's time, when a century old, is one plant with the little sprout from which it sprang; the soul, which is the body, and the body, which is the soul, is one with the infant body from which it grew—"as the body and soul are one with each other, so there is a divine "constitution" according to which Adam and his posterity are "looked upon as one, and dealt with accordingly;" that in his descendants "the first sin" was "the consequence and essential part of his fall, and as sin belonging to them, distinct from their participation in Adam's first sin;" that "the guilt a man has upon his soul at his first existence is one and simple, viz. the guilt of the original apostasy, the guilt of the sin by which the species first rebelled against God. This, and the guilt of sinning from the first moment of the depraved disposition of the heart, are not to be looked upon as two things distinctly imputed and charged upon men in the sight of God," but are one and the same thing, according to an arbitrary constitution, like that which excludes the freedom of the will, which is constantly flowing, or of an animal body which is constantly fluctuating. "When I call this an arbitrary constitution, I mean that it is a constitution which depends on nothing but the divine will, which divine will depends on nothing but the divine wisdom, the will of God. If he could possibly enter into the heart of any man to conceive," (Letter to a Scotch theologian). One school regard Edwards as agreeing with those Calvinists who suppose that "man, in his state of innocency, had freedom and power to do that which is good and well-pleasing to God, but yet mutable so that it might fail from it;" and that "man, by his fall into a state of sin, hath wholly lost all ability of will to any spiritual good accompanying salvation;" another school regard Edwards as denying this proposition in its literal, and affirming it only in its figurative sense, and believing that since the Fall man has all the freedom or liberty which he ever had, or can be imagined to have. One class of critics suppose him to believe that motives are the efficient or the necessitating causes of volitions; another class suppose him to believe that the volition is the effect of motive as an occasion, rather than the necessary effect of motive as a cause. The latter class interpret his whole theory of the will in the light of the following remark of Edwards to the Scotch divine: "On the contrary, I have largely declared that the connection between antecedent things and consequent ones, which takes place with regard to the acts of men's wills, which is called moral necessity, is called by the name of necessity improperly, and that all such terms as must, cannot, impossible, unable, irresistible, unavoidable, inescapable, etc., when applied here, are not applied in their proper signification, and are either used nonsensically and with perfect insignificance, or in a sense quite diverse from their original and proper meaning, and their use in common speech, and that such a necessity as attends the acts of men's wills is more properly called certainty than necessity, it being no other than the certain connection between the subject and predicate of the proposition which affirms their existence." It is asserted by many that Edwards makes a distinction between the will and the sensibilities; it is thought by some that he does make a distinction; the acts of the will being acts of moral choice, the processes of the sensibilities being what he elsewhere terms "natural or animal feelings or affections."
an inferior above a superior good, appeal to Edwards's Dissertation on Virtue as having given a marked impulse with facetious colloquiality, in which he speaks of, such as the new, or the New England, or the Hopkinstian divinity. The two last-named dissertations were not published until 1788, thirty years after his death. In 1704 eighteen of Edwards's sermons were published in a volume, to which was prefixed his memoir by Dr. Samuel Sibly. After the death of his father and the publication of the History of Redemption, in 1788 a new volume of his sermons, in 1789 another new volume of his sermons, in 1793 his Miscellaneous Observations on Important Theological Subjects, in 1796 his Remarks on Important Theological Controversies, were all published at Edinburgh, Scotland. His published works were collected and arranged in eight volumes at Worcester, Mass., under the editorship of Dr. Samuel Austin, in 1809, and have been re-published repeatedly in England and America. A larger edition of his writings, in ten volumes, including a new memoir, and much new material, especially his Notes on the Bible, was published at New York in 1829, under the editorial care of Rev. Dr. Sereno Edwards Dwight. Parts of this edition have been re-published in England. In 1852, his work entitled Charity and its Fruits was published for the first time, and more recently in England and America. It has been re-published in England, which has never been reprinted in America.

One of the most interesting aspects in which president Edwards may be viewed is that of his influence over Whitefield, Brainerd, and two of his theological pupils, Bellamy and Hopkins. Another is that of his influence over Whitefield's converts and various of his treatises were published in Great Britain before they were published in America, and the estimate formed of him by Dr. Erskine, Dr. Chalmers, Robert Hald, Dugald Stewart, Sir Henry Moncrief, Sir James Mackintosh, Dr. Priestley, Dr. George Hillo, Isaac Taylor, and others, was of the highest order. It is true that many men of the same relative position in this country. It is a remarkable fact that, while living in a kind of exile as a missionary among the Indians at Stockbridge, he was invited to the presidency of the college at Prince- ton, New Jersey. He was elected to the office on the 26th of September, 1757. In his first response to the trustees he expressed his great surprise at their appointment, and, among other reasons for declining it, he said, with his characteristic simplicity, "I have a constitution in many respects peculiarly unhappy, attacking me from many quarters. I feel constant weakness and wretchedness of body, presence, and demeanor, with a disagreeable dulness and stiffness much unfitting me for conversation, but more especially for the government of a college." He was dismissed from his Stockbridge pastorate January 4, 1758, after having labored in it six years and a half. He spent a part of January and all of February at Princeton, performing some duties at the college, but was not inaugurated until the 16th of February, 1758. He was inculcated for the small-pox on the 25th of the same month; and after the ordinary effects of the in- culation had nearly subsided, a secondary fever sur- prised, and he died on the 22d of March, 1758. He had then resided at Princeton about nine weeks, and had been the inaugurated president of the college just five weeks. Only nine months, 6 months, 5 days, and 17 days. His father died in his 86th year, only two months before him; his son-in-law, president Burr, died in his 42d year, only six months before him; his daughter, Mrs. President Burr, died in her 27th year, only sixteen days after him; his wife died in her 46th year, only six months and ten days after him. The three last named are interred in the same burial- ground at Princeton. (E. A. P.)

Edwards, Jonathan, D.D., the second son and ninth child of the President whose history has been sketched in the preceding article, was born at North- ampton, Mass., May 26th, 1745. Although each was the president of a college, yet, as the father was not a doctor of divinity, he is but his honorary title, and the son is distinguished from him as the Doctor. In his early childhood young Edwards was afflicted with an ocular disease, and therefore did not learn to read at so early an age as his powers and in- stincts would have inclined him. In consequence also of the physical and mental conditions of his father's religious talent, he was deprived of some important facilities for his education. "When I was but six years of age," he writes in 1788, "my father removed with his family to Stockbridge, where at that time was inhabited by Indians almost solely, as there were but two town or villages, twelve families of white men, and perhaps one hundred and fifty families of Indians. The Indians being the nearest neighbors, I constantly associated with them; their boys were my daily schoolmates and playfellows. Out of my father's house I seldom heard any language but the Indian. By these means I acquired the knowledge of that lan- guage, and a great facility in speaking it. It became more familiar to me than my mother-tongue. I knew the names of some things in Indian that I did not know in English. Even all my thoughts ran in In- dian; and, in fact, the true Indian language is extremely difficult to all but themselves, they acknowledged that I had acquired it perfectly, which, as they said, had never been done before by any Ang- lo-American. On account of my skill in their lan- guage in general, I received from them many compli- ments applauding my superior wisdom. This skill in their language I have in a good measure retained to this day."

Although the pastor at Stockbridge was nominally the teacher of the Housatonmucks, yet, in fact, he often gave instruction to families of the Mowawks, Oneidas, and Tuscaroras, who had come to Stockbridge in the sake of its educational advantages. He was a patron and also an intimate companion of Gideon Hawley, a man highly revered as a preacher to the Indian tribes. The elder Edwards desired that his son Jonathan should be trained for a missionary among the Indians and he therefore sent the boy, not then eleven years old, to a settlement of the Oneida Indians on the banks of the Susquehanna. The faithful friend, Gideon Haw- ley, travelled with the boy, and took the charge of him, but, in consequence of the French and Indian war, was obliged to leave the country. In about six months among the Oneidas. Young Ed- wards endeared himself to the Oneida tribe, and on one occasion, when they expected an attack from the French, the Indians took the boy upon their shoulders, and bore him many miles through the wilderness in place of safety. At that early age he exhibited the traits which afterwards distinguished him—courage, fortitude, and perseverance. While travelling through the wilderness in the depths of winter he was sometimes compelled to sleep on the ground in the open air, and he endured the hardness as a good soldier. He spent the two years 1756, 1757, under the parental roof in Stockbridge, but in January, 1758, his father removed to Princeton, and in October, 1758, both his father and mother were removed from the world, and thus, in his fourteenth year, he was left an orphan. He had no pecuniary means of support, but, being educated, he was supported by the Indians; but, having received promises of aid from the friends of his parents, he entered the Grammar School at Princeton in February, 1760, was admitted to Prince- ton College in September, 1761, and was graduated there in September, 1765. During the presidency and under the preaching of Dr. Finley, he became, as he thought, a true servant of Christ, and in September, 1763, he became a member of the Church. After hav- ing studied theology with Dr. Joseph Bellamy, he was appointed as a preacher in October, 1766, by the Litchfield County Association. In 1767 he was ap-
pointed to the office of tutor at Nassau Hall, and was continued in the office two years. He was also, with great reluctance, at the professorship of languages and logic in the same institution. He had distinguished himself as a linguist and as a logician at Nassau Hall, and at a later day he received the doctorate of divinity from that college. Thus in his earlier years he was honored by his alma mater and by his master. He was now in a situation of uncommon promise, and in his mature years as a man of uncommon attainments. His contemporaries speak of him as indefatigably diligent while at college, and as ever afterwards an eager aspirant for knowledge in its various branches.

Dr. Edwards was also an itinerant and sometimes an eloquent preacher. Accordingly, he was invited to the pastorship of an important church in New Haven, Conn., and was ordained there Jan. 5, 1769. It is stated in his memoir, that the ordaining council were so intensely interested in his preparatory examination that they continued it for their own pleasure and profit several hours after the time which had been previously appointed for the public exercises of the ordination. Several members of his church were advocates of the "half-way covenant;" he, like his father, was decidedly hostile to it. This divergence of views occasioned a considerable trouble to him in his ministerial duties, and extravagances which had been connected with the "great awakening" in 1740-2 were followed by a disastrous reaction among the New England churches, and the ministry of Dr. Edwards was made in some degree insecure. Having removed his family and himself to Savannah, Georgia, his health was greatly disturbed by the demoralizing influences of the Revolutionary war. That war introduced a flood of errors among the people. Dangerous heresies were adopted by some members of his parish. The result of all these untoward events was that he was dismissed from his office May 19, 1780, after having labored in it more than twenty-six years. The *Connecticut Evangelical Magazine* stated that the principal cause "of his dismissal was the departure of some of his parishioners from their former faith, but the ostensible cause assigned by the society was their inability to support a minister of his calibre."

He had already acquired a great reputation as a philosopher and as a philanthropist. He was well known and much beloved by divines in Great Britain, with some of whom he maintained an active correspondence as well as some, who could not, however, cut out some official relations. In January, 1796, he was installed pastor of the church in Colebrook, Conn. Here, in the bosom of an intelligent, affectionate, and confiding parish, he persevered in his rigorous system of study, and prepared himself for works which he did not undertake for a second time. Having enjoyed his present health a little more than three years, he was surprised by being called in May, 1799, to the presidency of Union College, Schenectady, N. Y. After a prolonged examination of his duties, he applied to an ecclesiastical council for their advice, and in accordance with their counsel he accepted the new office. He entered on its duties in the summer of 1799, and was welcomed with unusual demonstrations of joy. Rev. Dr. Andrew Yates, who was associated with Dr. Edwards in the government of the college, says of him: "His disciples were mild and affectionately parental, and his requirements reasonable. Such a change in the government in president Edwards was unexpected to some who professed to know his disposition, and had formed their opinions of him in this respect. It was therefore the more noticed. There was an apparent austerity in the manner in which he laid aside the retirement of study and from habits of close thought, and would leave such an impression after a slight acquaintance; but in his domestic intercourse, and with his intimate friends, while conscientiously strict and prompt in his duties, and while he acted with decision, he was mild and affectionate. The same spirit characterized his government of the college. It was a government also attended with greater mildness and affection than would have been expected, had not the prevailing expectations of some intimated the danger of his erring on the side of severity. His pupils, like a well-regulated family under faithful discipline, were respectfully attached to him."

On April 15, 1799, about a fortnight before his death, he died, at the age of fifty-six years, two months, and six days. "The blood of Christ is my only ground of hope" were among his last words. A highly eulogistic sermon was preached at his funeral in the Reformed Dutch Church at Schenectady by his friend, Rev. Reuben Hawley, of Savannah, who had been greatly affected by the loss of his first wife, who, in June, 1782, was drowned. He had also been reared of one child; but three of his children survived him.

The influence of Dr. Edwards in the pulpit, although not equal to that of his father, was yet greater than might have been expected from his analytic habits. His eye was piercing, his whole manner was impressive, his thoughts were clear and weighty, and his general character was itself a sermon. He was known to be honest, and a hearty lover of the Saviour in Jesus. The world always talked, in the superficial meaning of that phrase, yet he was powerful in conversation with men of letters, and was a prince among disputants; therefore his influence over his theological pupils was perhaps as important as his power in the pulpit. In about the same period, he instructed many young men for the Christian ministry, and his influence is yet apparent in the writings of some of them. One of these pupils was his nephew, president Dwight, of Yale College, who was wont to speak of him with filial reverence; another was Dr. Griffin, president of Williams College, who afforded frequent testimony to the power of his teacher. A large part of Dr. Edwards's influence arose from his interpretations of his father's writings. He often said that he had spent his life on those writings, although, in fact, he had a more various learning than belonged to his father. He studied the published and the unpublished works of the elder president with peculiar care. He was an early and confidential friend of Dr. Bellamy, one of the most intimate associates of the elder president, and he learned from Bellamy the exact shadings of his father's meaning without a long foreknowledge of Dr. Samuel Hopkins, another of president Edwards's bosom companions, and he obtained from Hopkins many nice discriminations in regard to the president's theories as expounded in his conversations. He was thus well fitted to be an editor of his father's works, and he did honor for the present of the *History of the Work of Redemption*, two volumes of sermons, and two volumes of Miscellaneous Observations on Important Theological Subjects. He was also well fitted to write a commentary on his father's doctrinal system, as that system was originally published by the President, or afterwards modified by Hopkins, Bellamy, Smalley, and others. In this aspect there is great value belonging to Dr. Edwards's treatise entitled *Improvements in Theology made by President Edwards and those who have followed his Course of Thought*. In 1797, while he was at Colebuck, he published a *Discourse on the State of the Son of God according to the Rev. Dr. Samuel West*. This volume may be regarded as perhaps the fairest exponent of the elder president's theory of the will. It led Dr. Emmons to say that, of the two, the father had more reason than the son, yet the son was a better reasoner than the father. It is accordingly in his published works that the influence of Dr. Edwards has been most conspicuous. He printed numerous articles in the *New York Theological Magazine*; various sermons, one in 1783, at the ordination of Rev. Timothy Dwight, at Greenfield, Conn.; one in 1791, on the Injustice and Impolicy of
the Slave-trade; one in 1791, on Human Depravity; one in 1792, at the ordination of Rev. Dan Bradley, at Hamden; one in 1792, at the ordination of Rev. William Brown, at Glastonbury; one in 1792, the Concil ad Clerum, preached in the chapel of Yale College on the marriage of a deceased wife's sister; one in 1798, on the death of a prominent minister; one in 1794; in 1797, a sermon on the Future State of Existence and the Immortality of the Soul; in 1799, a Farewell Sermon to the people of Cobrook. The most celebrated of his discourses are the three On the Necessity of the Atonement and its Consistency with Free Grace; and the three On the Atonement, its Necessity, and its Accidents. To these was added his address as his excellency the governor and a large number of both houses of the Legislature of the State of Connecticut, during their session at New Haven, in October, 1785, and published by request. They have been fruitfully studied, and are now thoroughly familiar with the thought, that he has sometimes called the "Edwardsian" theory, and is now commonly adopted by what is termed the "New England school of divines." These discourses have great historical as well as theological importance, and they serve to illustrate the fact that some of the most profound treatises in the science of divinity have been originally preached in sermons. One ultimate design of his volume on the Atonement was to refute the argument which some were deriving from that doctrine in favor of universal salvation. Intimately connected with this volume is another larger work, widely published in 1789, but frequently republished, and entitled, The Salvation of All Men, strictly examined, and the endless Punishment of those who, being conjured and defended against the Reasonings of Dr. Chauncey in his book entitled The Salvation of all Men. This work alone would have established the fame of Dr. Edwards as a divine of singular acuteness, deep penetration, accuracy and precision of thought and style. At the present day it is more suggestive of the true and decisive modes of reasoning on this subject than all the other extant tracts on the subject. The preceding works illustrate the metaphysical acumen and the profound judgment of Dr. Edwards; he published one essay which indicates his tact as a philologist, and which elicited the enthusiastic praises of Humboldt. This is his Observations on the Language of the Muhhekanese, in which the extent of its grammatical and other forms is shown, its genius grammatically traced, and some of its pecularities, and some instances of analogy between that and the Hebrew are pointed out. These observations were "communicated to the Connecticut Society of Arts and Sciences, and published as the report of the society." The best accomplished of American linguists, Hon. John Pickering, who edited one edition of this paper, says of it: "The work has been for some time well known in Europe, where it has undoubtedly contributed to the diffusion of more just ideas than once prevailed respecting the structure of the Indian languages, and has served to correct some of the errors into which learned men had been led by placing too implicit confidence in the accounts of hasty travellers and blundering interpreters. In the Micmacs, that immortal monument of philological research, professor Vater refers to it for the information he has given upon the Mohican language, and he has published large extracts from it. To a perfect familiarity with the Muhhekanese dialect, Dr. Edwards united a stock of grammatical and other learning which well qualified him for the task of reducing to written language the rules of grammar. Nearly all of Dr. Edwards's published writings were collected and reprinted in two octavo volumes, each of above 500 pages, in 1842. They were edited, and a memoir was prefixed to them, by his grandson, Rev. Tryon Edwards. Although the two Edwardses were in various particulars dissimilar, yet in many respects there was a striking resemblance between them. Dr. Samuel Miller, of Princeton, says "the son greatly resembled his venerable father in metaphysical acuteness, in ardent piety, and in the purest exemplification of Christian deportment." The son, like the father, was a tutor in the college where he had been a student; was for a time a professor of divinity; was born where his paternal grandfather had been the pastor; was dismissed on account of his doctrinal opinions; was afterwards the minister of a retired parish; was then president of a college, and died soon after his inauguration. His memoir states that both the father and the son died on the first Sabbath of the January preceding their death from the text, "This year thou shalt die." (E. A. F.)

Edwards, Justin, D.D., an eminent Congregational minister, was born at Westhampton, Mass., April 25, 1787. He graduated at Williams College 1810; entered the Theological Seminary in Andover March, 1811, and was installed pastor of the South Church in the same place December 2, 1812. In 1825 he was one of the sixteen who founded the "American Society for the Promotion of Temperance." He was installed pastor of the Salem-Sfleet Church, Boston, January 1, 1826, but resigned August 20, 1829, and entered the service of the American Temperance Society and the Abolition Society. His zeal, wisdom, and activity contributed, perhaps more than any other agency, to diffuse the principles of the Temperance reform in the United States. He was elected Professor of Theology in the Seminary in New York in 1835, and President of the Seminary at Andover, 1837. He accepted the latter appointment. In 1842 he was chosen secretary of the newly-formed American and Foreign Sabbath Union, and in this service he spent several laborious and eminently useful years. He died July 24, 1853. He published An Address on the Rhetorical Society of the Theological Seminary at Andover (1824).—An Address at the laying of the corner-stone of the new meeting-house in Andover (1826).—A Letter to the friends of Temperance in Mass. (1836).—Permanent Temperance Documents, a series of papers (1850-56).—Permanent Documents, a series of papers on the Sabbath and various tracts for the American Tract Society, and a compendious Commentary (N. T. and part of O. T.; Amer. Tract Society). His life was full of varied but always consecrated labor, and few men have contributed more largely to promote Christian ethics in America by laying their lives on the line in true reform. His "Life of Dr. Justin Edwards, Life of Justin Edwards (Amer. Tract Society); and Sprague, Annals, ii. 572.

Edwards, Morgan, a Baptist minister, was born in Trevethin parish, Wales, May 9, 1722. He commenced preaching in 1738, supplied for seven years a small congregation in Boston, Lincolnshire, and thence removed to Cork, Ireland, where he was pastor for nine years. After spending one year more at Rye, in Sussex, he emigrated to America, and in May, 1761, became pastor of the Baptist Church in Philadelphia. In 1772 he removed to Newark, Del., and preached to several vacant places until the commencement of the Revolution. After the war he delivered lectures on divinity in Philadelphia and other parts of Pennsylvania, as well as in New Jersey, Delaware, and New England. He died January 28, 1796. Besides various manuscripts, he left behind him forty-two volumes of sermons. He published a number of sermons, addresses, pamphlets, etc. —Sprague, Annals, vii. 82.

Edwards, Thomas, on English divinity, was born about 1575, passed A.B. at Trinity College, Cambridge, in 1606, and A.M. in 1609. He did not become a Nonconformist, but yet was always a Puritan in theology. "I never," says he, "had a canonical coat, declined authority for fifty years before the Parliament, though I practiced the old conformity; much less did bow to the altar and at the name of Jesus,
EDWARDS

etc. He was lecturer at Hertford, and afterwards in London. When the Long Parliament declared against
Charles I he sided with them, but when the Independents came into power he opposed them with great vir-
tulence both in writing and acting. He published
Books against the Independency, and a particular
Conferences (1641, 4to:—Antapologia, or a full
answer to the apologetical Narration of Mr. Goodwyn,
Mr. Nye, Mr. Symonds, Mr. Burroughs, Mr. Bridge,
Members of the Assembly of Divines, wherein are
handled many of the Controversies of those Times (1644, 4to)
The chief design of this work we learn from himself,
in the preface to it: "This Antapologia," says he, "I
here recommend to you for a true glass to behold the
faces of Presbytery and Independency in, with
the beauty, order, and strength of the one, and the deform-
ity, disorder, and weakness of the other";—Gangra-
ena, or a Catalogue and discovery of many of the
Errors, Heresies, Blasphemies, and pernicious Practices of the
Sectaries of this Time (1645, 4to):—Gangrena, part ii
(1646, 4to):—Gangrena, part iii:—The casting down
of the last and strongest hold of Satan, or a Treatise
against Toleration (part i, 1647):—Of the particular
Visibleness of the Church: — A Treatise of the Civil Power
in Ecclesiastics, and of Suspension from the Lord's
Supper. He died Aug. 24, 1647. He professed him-
self "a plain, open-hearted man, who hated tricks,
repelled by a zeal for the true worship of God: an
Assembly of Divines, the Directory, the use of the Lord's
Prayer, singing of psalms, etc., and so earnest for
what he took to be the truth that he was usually
called in Cambridge young Luther." — Kippis, Biog.
Brui. vol. vi.

Edwards, Thomas, D.D., a learned Arminian
divine, born at Coventry, England, in 1729; entered
Clare Hall, Cambridge (of which he became fellow),
in 1747; master of the Free School, and rector of St.
John the Baptist, Coventry, in 1758; vicar of Nune-
ston, Warwickshire, in 1770; and died in 1785. His
principal writings are, (1.) The Doctrine of irreversable
Grace proved to have no Foundation in the Writings of the
New Testament (Camb. 1759, 8vo);—(2.) Prolego-
mena in libros veteris Testamenti poeticos (Can.
1762, 8vo).

Edwards, Timothy, a Congregational minister,
born May 14, 1669, at Hartford, Conn. He grad-
uated at Harvard College July 4, 1681, and was or-
dained May, 1684, in New Hampshire, which, with
the relation he sustained until his death, Jan. 27, 1758.
Mr. Edwards was father of the distinguished Jonathan
Edwards. He published but one sermon (Election
Sermon, 1730).—Sprague, Annals, i, 280.

Edwy, surnamed the Fair, eldest son of king Ed-
ward the Confessor, was created king of England
in 955, while his brother Edgar became vice-roy of
Mercia. Edwy had married Alfricga, the daughter
of a noble matron, and was affectionately attached
to his young wife. The monks, at the head of whom
were Dunstan and archbishop Odo, had, during the
reign of Older, so great an influence at the court,
that the young king rejected their counsels, and this
appears to have made them jealous of Alfricga, believ-
ing her to be the cause of this change; and when, on
the occasion of his coronation, the king left his court
for a time, Dunstan, who had watched for an opportu-
nity to revenge himself on the queen, rushed to her
chamber, tore the king from her arms, and brought
him back to his courtiers. In revenge for this indig-
ity, Edwy not only banished Dunstan (956), but ex-
 tended his hatred to the monks generally. Odo
declined the murder, desiring lawful, carried the queen a pris-
oner to Ireland, and ordered her face to be branded
with a red-hot iron. Her wounds soon healed, she
recovered her former beauty, and returned to Glou-
cester. Here she was discovered by Odo's emissaries,
and was treated with such cruelty as to cause her
death. When Edwy attempted to resist this violence
of the monks, Odo formed a conspiracy against him
with Edgar, supported by the Mercians and Northum-
brians, and he was deprived of the larger part of his
kingdom—all England north of the Thames. He sur-
deed his triumph for a time, but was brought to
death before the end of the year 959. While the
monks represent king Edwy as licentious and a mal-
administrator, Huntingdon, who was no party in
the quarrel, gives him a handsome character, reports
that the country flourished under his administration, and
that Odo and Dunstan became his enemies because
he was unwilling to submit to the severity of monastic
rulers.—Hoefler, Nouv. Biog. Génér. xv, 692; Mackin-
tosh, History of England, i, 55 sq.; Wright, Biographe
Brui. Lat. (A. S. F.) 430 sq.; Collier, Eccles. History, i,
430 sq.; Edinb. Rev. xxv and xlix.

Edzardi, Eara, a great Hebrew scholar, was born
at Hamburg June 28, 1629. He pursued his studies
at Leipzig, Wittenberg, and Tübingen, and, in order
to become still more proficient, visited many of the
larger cities, as Zwickau, where he studied under
Daun; Bazel, where he enjoyed the instruction of
Buxtorf (q. v.); Strasbourg, Giessen, Göttingen, and
also Rostock, where he was made a licentiate. On
his return to Hamburg he gave instruction in Hebrew,
and became famous not only for his learning in the
Oriental tongues, his thorough acquaintance with Tal-
udic literature, and Hebrew antiquities, but also for
his zeal in the conversion of Jews and Romanists. He
died January 1, 1708. Most of the works of Edzardi
remain in MS. form. The only book mentioned by
Gräše is Consenans Antiqui. Judicioris ex explicat. christi-
ianorum super Jerem. xvi, 5, 6, Heb. 37. (Kämb.
1760, fol.).—Hoefler, Nouv. Biog. Génér. xv, 694;
Gräše, Aligem. Literärgeschichte, vi, 866. (J. H. W.)

Edzardi, Ezra Heinrich, a theologian and his-
torian, son of Sebastian Edzardi, was born at Hambur-
Jan. 30, 1708. Although his life was very short (he
died Feb. 4, 1738), he left a number of works, of which
the principal are, Sächsische Kirchengeschichte (Alto-
n. 1729, 8vo);—Ordinanz der seih gelehre Luthers
Catechismo (Hamburg, 1721, 8vo);—Disputatio de Cyrc
ante mortuis non contra clement (Wittenbr. 1722, 4to):
—Wohre Lehre von der Graden wohlf (Hamburg, 1721, 4to).

Edzardi, Georg Eilesen, son of Ezra Edzardi,
known as Georg, is a great scholar, was born at
Hamburg January 22, 1661. He studied at the
universities of Giessen, Frankfort on the Oder, and
Heidelberg, and resided for some time at Worms,
where he held many disputations with the Rabins.
After a journey through Germany, he was appointed
professor of Hebrew and history at the gymnasium in
Hamburg. In 1717 he was appointed professor of
Hebrew, and in this department became the worthy suc-
cessor of his father, and, like him, was zealous in the
conversion of the Jews. He died July 23, 1727.
Besides theses on the Talmud, we have from him Ex-
cerpta Generis Biblici (1709);—Hoefler, Nouv. Biog.
Génér. xv, 698; Gräše, Literärgeschichte, vi, 866. (J. H. W.)

Edzardi, Johann Eara, a German historian,
brother of the distinguished Hebraist Georg Eilezer,
was born at Hamburg June 23, 1662. He studied at
his own native place, at Giessen, and at the leading
universities of Germany and Sweden. Edzardi was
for a time an instructor at Rostock, and on his return
to Hamburg was called to London to preside as pastor
over the evangelical Church of the Holy Trinity. He
died Nov. 15, 1713. Besides a Funeral Oration to Queen
Mary, he has also written History of the Church of England.

Edzardi, Sebastian, youngest son of Eara, was
born at Hamburg August 1, 1673. When only eight-
early years old he went to Holland and England, and
soon after entered the University of Wittenberg.
where he received his M.A. degree in 1695. He then entered upon the study of theology, but in 1696 was appointed professor of logic and metaphysics at the Hamburg Gymnasium. As a bishop he was a man of learning, but his zeal for the Lutherans and his hatred of the Reformed, whom he believed insincere in their professions, engaged him in long and violent controversies. The king of Prussia, Friedrich I (in 1706), ordered five of Edzard's dissertations written against the Reformed to be burned as a hate of the sheriff (Walch, Ketter-Historie, i, 512 sq.; iii, 1087 sq.). But this punishment was no avail with Edzard. He even went so far as to impeach the character of the University of Halle, which he called Holle (Tartarus). After the burning of his books he devoted all his strength and faculties in his efforts for the conversion of the Jews. He died June 10, 1736. A complete catalogue of his numerous polemical writings may be found in Thiessen, Vernach. e. Gebüth. Gesch. von Hamburg, Th. 1, 139-154, and in Moller's Cimbría Literari, i, 147-151. His leading dissertations against a union with the Reformed were, Dissert. de unioni cum Reformatis hodiernis fugiendi (Hamb. 1703, 4to); — De circ. eni. coiusm. a Calvinisiiu quaestis (Hamb. 1704, 4to); — Pelagianismus Calvinianorum commutatus (Hamb. [Vitba. 1705, 4to]); — Monarcaeius Calvinianorum. commutatus. una cum calvinum esse erunt (Acad. C. Mart. 1706, 4to); — Hoofer, Nouv. Biogr. Gén. xv, 694; Fuhrmann, Handschrift. d. Kirchengesch. i, 672; Aschbach, Al Gygen. Kirchen-Lexicon, ii, 496; Schröck, Kirchengeschichte s. d. Reform. vili, 231, 392; Grasse, Algygen. Literarischgeschichte, vi, 868. (J. H. W.)

Effectual Calling. See CALL.

Effectual Prayer is the rendering of an expression which occurs James v, 16: "The effectual prayer of a righteous man availeth much." The verb inygein (the root of the English energy), thus translated, signifies to work in, produce, effect (intrinsically, Matt. xiv, 2; Mark vi, 15; or transitively, 1 Cor. xii, 6; Gal. iii, 5; Ephes. i, 11; Phil. ii, 13; or in the "middle voice," Rom. vii, 5; 2 Cor. i, 6; iv, 12; Gal. v, 6; Ephes. iii, 20; Col. i, 29; 1 Thess. ii, 13; 2 Thess. ii, 7). The participle here, if regarded as used in a neuter sense, adjectively, would signify operativus, effectivus, and such is the interpretation of most commentators (see Wolflri Curia, locc.; for the etymology and derivation of the word, see Hammer, Hammond, Whitby, Macknight, Dodridge, and Clarke, to regard it as passive, in its literal sense, invidiosus, implying both earnest earnest and d'vine influence, not full inspiration (although the example of Elijah ad- deduced in the following verse would almost warrant that, but such an allusion as accompanies the supplications of the believing supplicant. See PRAYER.

Efficacious Grace. See Grace; Jansenism.

Effronite, an obscure Transylvanian sect of the sixteenth century, who not only denied the Holy Ghost, but, among other fooleeries, cut their foreheads and anointed them with oil as a mode of initiation. Hence their name "esforna" — out of the bow (Echal, Eccl. Cypcor. v).

Effusion of the Holy Spirit. See Pentecost.

Egbert or Echbert, archbishop of York, was a brother of the Saxon king. After his visit to Rome and his ordination he had for a time the care of the youth of York, and a pupil, and later a friend, of Beda. As teacher at the cathedral school of York, he became celebrated for ex- tensive knowledge and for his Christian character. Among those who were educated at this school were Alcuin and Aelbert. He became bishop of York in 781, and soon after, in 785, York was made an arch- bishopric, with metropolitan power over all bishops north of the river Humber. Even as bishop and arch- bishop, Echbert was a man of learning, but his zeal for the Lutherans and his hatred of the Reformed, whom he believed insincere in their professions, engaged him in long and violent controversies. The king of Prussia, Friedrich I (in 1706), ordered five of Edzard's dissertations written against the Reformed to be burned as a hate of the sheriff (Walch, Ketter-Historie, i, 512 sq.; iii, 1087 sq.). But this punishment was no avail with Edzard. He even went so far as to impeach the character of the University of Halle, which he called Holle (Tartarus). After the burning of his books he devoted all his strength and faculties in his efforts for the conversion of the Jews. He died June 10, 1736. A complete catalogue of his numerous polemical writings may be found in Thiessen, Vernach. e. Gebüth. Gesch. von Hamburg, Th. 1, 139-154, and in Moller's Cimbría Literari, i, 147-151. His leading dissertations against a union with the Reformed were, Dissert. de unioni cum Reformatis hodiernis fugiendi (Hamb. 1703, 4to); — De circ. eni. coiusm. a Calvinisiiu quaestis (Hamb. 1704, 4to); — Pelagianismus Calvinianorum commutatus (Hamb. [Vitba. 1705, 4to]); — Monarcaeius Calvinianorum. commutatus. una cum calvinum esse erunt (Acad. C. Mart. 1706, 4to); — Hoofer, Nouv. Biogr. Gén. xv, 694; Fuhrmann, Handschrift. d. Kirchengesch. i, 672; Aschbach, Al Gygen. Kirchen-Lexicon, ii, 496; Schröck, Kirchengeschichte s. d. Reform. vili, 231, 392; Grasse, Algygen. Literarischgeschichte, vi, 868. (J. H. W.)

Egbert, Saint, was born in the 7th century. He was a monk in the convent of Rathmelsing, and in 614, when seized with the plague, he made a vow that, in case of recovery, he would leave his country and preach the Gospel among the pagans. He accordingly set out as a missionary for Germany, but was by a tempest compelled to return. He then took up his abode among the monks of the island of Hy, from where he sent as missionaries to Friesland, first, the learned monk, Egbert, and, when this was unsuccessful, after two years of fruitless labor, twelve Anglo-Saxon. Egbert had a prominent share in kindling that remarkable missionary zeal which distinguished the Anglo-Saxons in the 8th century. He introduced, in 716, into the monastery of Hy the Roman manner of celebrating Easter, and the Roman calendar. He died in 729. — Beda, Hist. Eccl. Anglii, iii, 27; v, 10, 11, 23; Herzog, Real-Encycl. iii, 658. (A. J. S.)

Egede, Hans, an eminent Danish missionary, called the "apostle of Greenland," was born at Har- stad, Norway (which at that time belonged to Den- mark), Jan. 51, 1686, and became pastor at Drontheim in 1707. Here he conceived the project of a mission to Greenland, having derived from a history of Nor- way the impression that formerly there had been Chris- tians in Greenland, where now there were only hea- thens. "Egede, after receiving some suggestions to this effect from a friend in Bergen, became so enthusi- astic on the subject that he wrote to the king of Bergen and Drontheim in 1710, proposing an expedi- tion to convert the Greenlanders; and on its striking him that such a recommendation would come with an ill grace from one who did not offer to undertake it himself, he made the offer, supposing, however, as he himself tells us, that as it was war-time, and the expedi- tion would require some money, the proposal would not be accepted. He received in reply a strange let- ter from the bishop of Drontheim, Krog, in which the prelate suggested that 'Greenland was undoubtedly a part of America, and could not be very far from Cuba and Hispaniola, where there was found such abun- dance of gold;' concluding that it was very likely that those who went to Greenland would bring home 'in- credible riches.' Egede had made this offer, very oddly, without acquainting his wife; and as soon as she became aware of it, by the receipt of a letter, she, with her mother and his mother, assailed Egede with such strong remonstrances, that, he says in his own account, he was quite conquered, and re- pulsed his folly with a promise to remain in the land which 'God had placed him in.' (Eng. Cypcor.). Soon after he went, however, gave his consent. In 1717 he threw up his benefice at Vaagen, and went with his family to Bergen, endeavoring to find a company to trade with Greenland. The merchants did not re- ceive this project favorably, and Egede determined to lay his plans before the king at Copenhagen. "Fred-
Egede IV of Denmark, who had already, in 1714, founded a college for the propagation of the Gospel, sent Egede back to Bergen with his approbation; a company was formed, to which Egede put down his name for the first subscription of 800 dollars, and finally, on May 8, 1721, a ship called 'Isabel', or 'The Hope', set sail for Greenland, with six souls on board, including Egede and his family. On the 8d of July, after a dangerous voyage, they set foot on shore at Haalservier, on the western coast, and were, on the whole, hospitably received by the natives. The very appearance of the Greenlanders at once put a negative on the superior officer, with only two or three women, men, and their language, which it was now the missionary's business to learn, was found to be entirely of a different kind, being, in fact, nearly related to that spoken by the Esquimaux of Labrador. The climate and the soil were both hard, and harder than the Norwegians had expected, and the only circumstance that was in their favor was the character of the inhabitants, which, though at first excessively phlegmatic, so as to give the idea that their feelings had been frozen, was neither cruel, nor, as was found by further experience, that they received religious impressions. For some years the mission had a hard battle for life. The settlers, unable to obtain sufficient food by fishing and the chase, were entirely dependent on the supply of provisions sent them by annual store-ships from Denmark, and when this supply was delayed, were reduced to live on store-ships from the coast from Greenland. On one occasion even Egede's courage gave way, and he had made up his mind to abandon the mission and return to Europe unless the provisions arrived within fourteen days. His wife alone opposed the resolution, and refused to pack up, persisting in predicting that the store-ship would arrive in six weeks; and, when the time had elapsed, the ships, which had missed the coast, found their way, and brought tidings that, rather than give up the attempt to Christianize Greenland, the king had ordered a lottery in favor of it, and, on the lottery's failing, had imposed a special tax on Denmark and Norway under the name of the Greenland Assessment. In 1727 the Bergen company for trading with Greenland was dissolved, from the losses it had sustained, and the Danish government then resolved on founding a colony in Greenland, and sent in 1738 a ship of war, with a body of soldiers under the command of a Major Paars. The soldiers grew mutinous when they saw to what a country they had been sent, and Egede found his life in more danger from his countrymen than it had ever been from the natives. The death of king Frederick IV, in 1732, occasioned a change in the court of Greenland. The new king, Christian VI., did his utmost to break up the colony and recall all his subjects from Greenland, with the exception of such as chose to remain of their own free-will, to whom he gave directions that provisions were to be allowed for one year, but that they were to be led to expect no further supply. Egede had then been ten years in Greenland, and his labors were beginning to bear fruit. His eldest son Paul, who was a boy of twelve when they landed, had been of much assistance in learning the language and in other ways; his wife and the younger children had greatly in projecting a favorable effect on the natives, who had seen no Europeans before except the crews of the Dutch trading-vessels. The angekoks, or conjurers, who might almost be called the priests of the native religion, had been saved, some into respect and others into silence, by the theological and benevolent influence of the Angekok; the natives had seen with wonder the interest he took in their welfare, and, if they refused to believe the new doctrines themselves, had not forbidden them to their children, of whom Egede had a hundred and fifty baptized. The elder Greenlanders, when Egede told them of the efficacy of prayer, asked him to pray that there should be no winter; and when he spoke of the torment of fire, said they should prefer it to frost. Egede, confirmed by his wife, resolved to remain, and this resolution greatly increased his influence over the Greenlanders, who knew that it could only proceed from zeal in their behalf. The king of Denmark, unable to resist his constancy, sent another ship the following year, and the number went by boat; and, finally, in 1738, announced that he had changed his mind, and determined to devote a yearly sum to the Greenland mission. A dreadful trial was approaching. The Greenland children, of whom some had occasionally been sent to Denmark, almost all died of the small-pox. Two or three of them were taken home from Copenhagen in the vessel which came in 1738; one of them died on the voyage, the other brought the disorder to Greenland, and the mortality was dreadful. From September, 1738, to June, 1739, the contagion spread over the whole country, and Egede went to the Green- land. When the trading-agents afterwards went over the country, they found every dwelling-house empty for thirty leagues to the north of the Danish colony, and the same devastation was said to have extended still farther south: the number of the dead was computed at 2000. That was the beginning of a combination of horrors which could seldom be equalled, but they were met with admirable constancy by Egede and his indefatigable wife. The same ship that brought the small-pox had brought the assistance of some Moravian missionaries. In the year 1736 his son Paul had been sent from the colony to Christiania; and in 1738 he had been sent to study, and the elder Egede, finding his health begin to fail, applied for leave to return home. The permission reached him in 1735, but his return was delayed from the illness of his wife, who longed to see her native land again, but was dead upon her arrival, and the death of her husband, death, and the next year, he appeared, dying finally in Greenland on the 21st of December, 1735, at the age of 62. Egede carried her coffin with him to Denmark, and she was buried in Copenha- gen, where she was followed to the grave by the whole of the clergy of the city. A seminary for the Green- land mission was established there in 1740, and Egede was appointed superintendent, with the title of bishop. In the same year he preferred a memorial for an expendi- tion to be sent out to discover the lost 'eastern col- ony' of the old Norwegians, and offered to accompany it in person, but the proposal was not adopted. In 1747 Egede was sent to Copenhagen, and spent most of the remainder of his life at the house of his daughter Christine, who was married to a clergy- man of the island of Falster. While he was at Copen- hagen he had married a second wife, who accom- panied him to Falster, but before his last illness he expressed a wish that he should be buried in the churchyard of his first wife at Copenhagen, and said that if they would not promise to carry this wish into effect, he would go to Copenhagen to die there. He died at Falster on the 5th of November, 1766 (Eng. Cyclop.). He wrote two books on the history of his life's labors. The first was, Relation anguaadende den Grønlandke Mis- sions Begyndelse og forstætinge (Copen. 1788; German, Hamb. 1748). It is rich in materials, but dry in style. Its chief recommendation is its sincerity. The reader is disposed to give entire confidence to the missionary, who not only tells him that on one occasion he was so eagerly in his vocation, but that on another he occu- pied himself for days in the study of alchemy; who not only speaks of the ardor of his faith at times, but tells us that at others he was seized with a hatred of his task and of religion altogether. The second was, Des gamle Grøn- landers Kunde og ændrede benevolences til forskudd; the work was benevolent work, and was transla- ted into French (1768), and into English in 1745, under the title of A Description of Greenland. The transla- tion was reprinted in 1818. It comprises his observa- tions on the geography and natural history of Green- land, and the manners of its inhabitants.
Egged, Paul, son of Hans, was born at Waagen, Norway; went to Greenland in 1729, in his twelfth year; afterwards studied at Copenhagen; returned to Greenland in 1734; finally left it in 1740, and was, in reward for his labors, appointed chaplain at the hospital of the Bishop of the See, member of the College of Missions, director of the Hospital of Orphans, and finally (1786) bishop of Greenland. Having retired to the house of his son-in-law, pastor Saabye, he did not cease to urge the Danish government to send new expeditions to that colony, and made up his mind to seeing it finally complied with. He died June 8, 1789. He wrote and published a Greenland grammar (Grammatica Greenlandica - Lat. - Dan., Copenhagen, 1760) and dictionary (Dictionarium Greenlandicum Danico-Latino, Copenhagen, 1754), which have since been improved by Fabricius; translated the New Testament into the language, and was the author of a work, Etterretning om Grønland (Information on Greenland, Copenhagen, 1789), which is one of the most interesting in Danish literature. It gives a history of the mission from 1729 to 1786 in a more interesting style than his father was master of. - Hoefier, Nouv. Biogr. Génér. xv, 705.

Egged. See Heiffer.

EGG (777,720, bapto), so called from its whiteness, so-called, in the plur., of eggs deserted (Isa. x, 14), of the eggs of a bird (Deut. xxii, 6), of the ostrich (Job xxxix, 14), or the cockatrice (Isa. lix, 5). See FOWL; OSTRICH; COCKATRICE. It is apparently in this last sense that an egg is contrasted with a scorpion in Luke xi, 12, as a desirable article of food. The body of the scorpion is said to resemble an egg. The head can scarcely be distinguished, as it appears to be joined and continued to the breast. Bochart adduces authorities to prove that scorpions in Judea were about the size of an egg (Job xxxix, 14; Isa. x, 14; lix, 5). The passage in Job xxxii, 6, humanely prohibits the taking away of a brooding bird from a nest, and is similar in its nature to the provision respecting other animals and their young (Lev. xxv, 28).

Eggs are usually considered a great delicacy in the East, and are served up with fish and honey at their entertainments. Among the ancient Egyptians poultry was kept in abundance, and the most remarkable thing connected with it is the manner in which the eggs were hatched by artificial means, and which, from the monuments, we have reason to infer, was known and practised there at a very early period. At present times there are as many as four hundred and fifty of these establishments, which, being heavily taxed, produce a large revenue to the government. The proprietors of these egg-ovens make the round of the villages in their vicinity, and collect eggs from the peasants, which are given in charge to the reapers, who, without any previous examination, place all they receive on mats strewn with bran, in a room eleven feet square, with a flat roof, and about four feet high, over which is a chamber of the same size, but with a vaulted roof, about nine feet high; a small aperture in the centre of the vaulted roof admitted the oven during the warm weather, and another of larger diameter immediately below, communicating with the oven, through whose ceiling it is pierced. By this the man descends to observe the eggs; but in the cold season both openings are closed, and a lamp is kept burning instead, or an extension of the front part of the oven being then used for the same purpose, and shut immediately on its quitting it. In the upper room, the fire is disposed along the length of two troughs, based with earthen slabs, reaching from one side to the other against the front and back walls. In the oven the eggs are placed in a line, corresponding to and immediately below the fire, where they remain half a day. They are then removed to a warmer place, and replaced by others, and so on, till all have taken their share of the warmest positions, to which each set returns, again and again, in regular succession, till the expiration of six days. They are then held up one by one towards a strong light, and if the egg appears round and of a uniform colour, it is evident it has not succeeded; but if it shows an opaque substance within, or the appearance of different shades, the chicken is already formed; and these last are all returned to the oven for four days more, their positions being changed as before. At the expiration of the fourth day they are reserved to another oven, over which, however, there are no fires, where they remain for five days in one heap, the aperture in the roof being closed with tow to exclude air; after which they are placed separately about one, two, or three inches apart, over the fire (Wilkinson's Ant. Egyptians, ii, 170, Am. ed.; Lane's Mod. Egyptians, ii, 5).

The word דַּבָּר (challamuth), in Job vi, 6, which our translators have rendered "the white of an egg," is so rendered by the Hebrew interpreters, and the Targum, or rather, "the slime of the yolk of an egg." The Syriac interpretation gives "a tasteless herb," which is there proverbially used for something unsavoury or insipid. - See Parislain.

Egidio Antonini, surnamed of Viterbo, Latin patriarch of Constantinople, was born at Viterbo in the second half of the 15th century. He was received into the order of the hermits of St. Augustine at the early age of ten years; was professor of philosophy and theology in several towns of Italy, and became one of the most eloquent preachers of his epoch. Having become general of his order in 1507, he was appointed patriarch of Constantinople, and bishop of Viterbo, Nepi, Castro, and Sutri. In 1512 he opened, by order of pope Julius II, the Council of Lateran, and on this occasion severely censured the corruption prevailing in the church. In 1517, and, in particular, on the 27th February of that year. In 1517 pope Leo X sent him to Germany, and appointed him cardinal; in the following year he was sent as papal legate to Spain. Egidio was well versed in the Oriental languages, and a good Latin poet. He wrote a commentary to the first three chapters of Genesis, and to several psalms, Latin dialogues, epistles, and poems, and a treatise De ecclesiae incremento. Some of these works are given in Martene et Durand, Amplissima Collectio veterum monumentorum, tom. iii. - Hoefer, Nouv. Biogr. Génér. xv, 718.

Egidius. See Egidius.

Egidius. See Gil J.uan.
magne, was born about 770. The place of his birth is entirely unknown. At an early age he repaired to the court of Charlemagne, and became a pupil of Alcuin. Eginhard gained the favor of the emperor to a high degree, and an intimate friendship sprang up between him and the emperor's children, especially the emperor's oldest son and successor, Louis le Débonnaire. The emperor appointed him his private secretary, and superintendent of public buildings at Aix-la-Chapelle. Eginhard accompanied the emperor in all his marches and journeys, never separating from him except on one occasion (900), when he was dispatched by Charlemagne on a mission to pope Leo, in order to obtain the signature of the pope for the document which divided the empire among the sons of Charlemagne. The emperor departed in his case, as in that of Alcuin, Angilbert, and some other friends, from his habit not to esteem ecclesiastical benefices in one hand, and gave to him the abbey of St. Bavo and Blandenberg in Ghent, St. Leonius in Maestricht, Fritzlar in Germany, St. Wandregisil in France, and others. On the death of Charlemagne, he was appointed Dean of St. Denis, and Dean of the Abbey of St. Denis, the latter presented him with a large tract of land in the Odenwald, the centre of which was Michelstadt. Here Eginhard spent the last years of his life in retirement. He was in 826 ordained presbyter, and in 827 assumed as abbot the direction of a monastery that he had established, which he afterwards sold on his estates. As his wife Emma was still alive at this time, he appears to have agreed with her to consider her only as a sister. The report that his wife was a daughter of Charlemagne is probably untrue. The year of his death is unknown. He was still alive in 844. He probably had no children, and the claim of the counts of Erbach, who trace their descent from him, and in whose castle the coffins of Eginhard and his wife are still shown, is probably unfounded. The reputation of Eginhard rests chiefly upon his life of Charlemagne (Vita et Concessoria Gloriosissimi Imperatoris Caroli Regis Magni, completed about 890), which is generally regarded as the most important historical work of a biographical nature that has come down to us from the Middle Ages. It frequently served as a model for other biographies, and was extensively used as a school-book. The best edition is that of Pertz (1829), in vol. ii of the monumenta Germaniae Historiae; another edition, with valuable notes and documents, was published by Ideler, Leben u. Wandl. Karl's des Grossen (Gotha, 1839, 2 vols.). Another work, the annales Regni Francorum, Pippini, Caroli Magni, emendavit, compiled upon the period from 741 to 829 (published in Pertz, Monumenta, vol. i). The first part (741-788) is based on the Annals of Lorash; the second part is original. He also wrote an account of the transfer of the relics of St. Marcellinus and St. Peter from Rome to his monastery in Seligenstadt (Historia translationis S. Marcellini et Petri, in Acta Sanctorum, June 2). His Epistolae, 62 in number, are also of considerable value in a historical point of view. They are published in Weikens, Eginhardus v. sanctus (Franck, 1714). Another work, Libellus de partibus liberum in the theological faculty of this university, of which he was president, and of which he rector (qv), in 1607, the title of D.D. Subsequently Moritz also appointed him court preacher at Marburg. He died May 20, 1622. Egininus was one of the first Reformers in Hesse where landgrave Moritz and his successors endeavored to supplant Lutheranism by the Reformed religion. He wrote in defense of the Church a number of short tracts, the most important of which relate to the doctrine of predestination. He is one of those writers in whom the German reformed theology became more scholastic in its character, and was able to express in the stricter Calvinistic form. In 1618 Egin competed in the controversy of the Rosicrucians of which association he had become an active member. He also wrote several books on alchemy and on the-
EGYPT

Eglion (Heb. Eglon', Ἐγλών, place of kefsra, q. d. κηφησαί), the name of a man, and also of two places.

(1. Sept. Ἐγλών, Josephus Ἐγλών, Vulgate Eglon.) An early king of the Moabites (Judg. iii, 12 sq.), who, aided by the Ammonites and the Amalekites, crossed the Jordan and took the cities of Sihon, king of Jericho (Josephus). B.C. 1527. Here he built himself a palace (Josephus, Ant. v, 4, 1 sq.), and continued for eighteen years to oppress the children of Israel, who paid him tribute (Josephus). Whether he resided at Jericho permanently, or only during the summer months (Judg. iii, 9; Josephus), he seems to have formed a familiar intimacy (συμφίλος, Josephus, not Judg.) with Ehud, a young Israelite (marias, Josephus) who lived in Jericho (Josephus, not Judg.), and who, by means of repeated presents, became a favourite courtier of the monarch. Eglon subdued the Israelites beyond the Jordan, and the southern tribes on this side the river, and made Jericho the seat, or one of the seats, of his government. This submission to a power always present must have been more galling to the Israelites than any they had previously suffered. At length (B.C. 1509) they were put to flight through the instrument of Ehud, who slew the Moabish king (Judg. iii, 12-33). See EHUD.

(2. Sept. Ἐγλών v. τ. Ἁλαβ, but in Josh. x, Ὀδόλαιον, Vulgate Eglon, Eglom.) A city in the maritime plain of Judah, near Lachish (Josh. xv, 39), formerly one of the royal cities of the Canaanites (Josh. x. 39). Its Amoritish king Debir (q. v.) formed a confederacy with the neighbouring princes to assist Adoni-zedek, king of Jerusalem, in attacking Gibeah, because that city had made peace with Joshua and the Israelites (Josh. x., 3, 4). Joshua met the confederated kings near Gibeah and routed them (Josh. x, 11). Eglon was soon after visited by Joshua and destroyed (x, 34, 35). Eusebius and Jerome (Onomast. s. v. Ἐγλών, Eglon) erroneously identify it with Oodium or Adullam (q. v.), and say it was still "a large village," ten E. miles (Jerome, twelve) east of Eleutheropolis, being near the southern limit of the territory of the tribe of Judah. See above. On the road from Eleutheropolis to Gaza, nine miles from the former and twelve from the latter, are the ruins of Ajjun, which mark the site of the ancient Eglon (Robinson, Researches, ii, 382). The site is now completely desolate. The ruins are mere shapeless heaps of rubbish, strewn over a large mound (Porter, Handb. for Syria, p. 262). The absence of more imposing remains is easily accounted for. The private houses, like those of Damascus, were built of sun-dried bricks; and the temples and fortifications of the soft calcareous stone of the district, which soon crumbles away. A large mound of rubbish, strewn with stones and pieces of pottery, is all we can now expect to mark the site of an ancient city in this plain (Van de Velde, Narrativa, i. 188; Thomson, Land and Book, ii, 386). 3. Another important place of this name (ἴγλων) according to Schwartz (Palest. p. 235), is mentioned in Talmudical authorities as situated within the bounds of Gad. He identifies it with the present village Ajjun, one mile east of Kulat er-Rubud, or Wady Rejih, which runs parallel with Jebel Ajjun on the south (see Robinson's Map, and comp. Researches, ii, 121). The village is situated on both sides of the new river, which is broad and contains nothing remarkable except a few ancient tombs (Burckhardt, Syria, p. 266).

Ecgolam. See SELACHIN.

Egypt (or, more strictly, Egypt, since the word is but Anglicized from the Gr. and Lat. Αἰγύπτιον, Ἐγγύπτος), a region important from the earliest times, and more clearly identified with Bible incidents than any other, except the Holy Land itself. For a vindication of the harmony between Scripture history and the latest results of Egyptological research (Brugsch, Au dem Orient, Berl. 1864), see Volck in the DOP, 1867, ii, art. 2.

1. Names and common name of Egypt in the Heb. Book of Psalms, Ἐγγύπτιον, Ἐγγύπτας (in, or, more fully, "the land of Egypt"). In form Misraim is a dual, and accordingly it is generally joined with a plural verb. When, therefore, in Gen. x, 6, Misraim is mentioned as a son of Ham, some conclude that nothing more is meant than that Egypt was colonized by descendants of Ham. See MISRAIM. The dual number doubtless indicates the natural division of the country into an upper and a lower region, the plain of the Delta and the narrow valley above, as it has been commonly divided at all times. The singular Misr, Μισρ, Mater, also occurs (2 Kings xii, 24; Isa. xxxvii, 25; perhaps as a proper name in Isa. xix, 6; Zech, vii, 2; A. V. always as an appellative, "the land, city," etc.), and some suppose that it indicates Lower Egypt, the dual only properly meaning the whole country; but there is no sure ground for this assertion. See MAZORS. The mention of Misraim and Pathros together (Isa. xi, 1; Jer. xlv, 1, 15), even if we adopt the explanation which supposes Misraim to be in these places by a late usage put for Misr, by no means proves that, since Pathros is a part of Egypt, Misraim, or rather Mazeor, is here a part also. The mention of a part of a country by the same term as the whole is very usual in Hebrew phraseology. This designation, at all events, is sometimes used for Egypt indiscriminately, and was by the later Arabs extended to the entire country. Josephus (Ant. i, 6, 2) says that all those who inhabit the country call it Misr (Misrâp), and the Egyptians Misrâpum (Μισραῖοι). The natives of Modern Egypt invariably designate it by the name Misr, evidently cognate with its ancient Heb. appellation (Hackett's Illustra. of Scripture, p. 120).

Egypt is also called in the Bible דֶּלֶת, דל, "the land of Ham" (Psa. cxviii, 27; comp. XXVIII, 51), referring to the son of Noah. See HAM. Occasionally (Psa. lxx, 20; xlviii, 15, 16; Jer. ii, 5, 23) it is apparently styled רֶדֶב֫וֹ, רֶדֶב֫וֹ, אֲשֶׁר, i.e., "the proud" or "insolent." See RAMAB. The common ancient Egyptian name of the country is written in hieroglyphics קומ, which was probably pronounced Chom; the detomatic form is KEM (Brugsch, Geographische Inschriften, i, 73, No. 382) and the Coptic forms are Chems or Chem (Memphitic), Kems or Kemi (Sahidic), and Kemi (Bashmuri). This name signifies, alike in the ancient language and in Coptic, "black," and may be supposed to have been given to the land on account of the blackness of its alluvial soil (comp. Plutarch, De Is. et Osir. c. 33). It would seem, however, to be rather a representative of the original Heb. name Ham (i.e., Cham), which likewise in the Semitic languages denotes un-burnt, as a characteristic of African tribes. The other hieroglyphic names of Egypt appear to be of a poetical character.

The Greek and European name (ἡ Αἰγύπτιος, Αἰγύπτος), Egypt, is of uncertain origin and signification (Champion, loc. cit. 77). It is possible, however, to have some etymological connection with the modern name Copt, and is perhaps nothing more than "the land of the Copts" (the prefix ai- being perhaps for ain = yai or γά), from where the Nile is sometimes (Odys. iv, 351, 355; xiv, 237, 238) called Egypt (Αἰγύπτιος). KEM, which was probably pronounced Chem; the detomatic form is KEMI (Brugsch, Geographische Inschriften, i, 73, No. 382) and the Coptic forms are Chems or Chemi (Memphitic), Kemi or Kemi (Sahidic), and Kemi (Bashmuri). This name signifies, alike in the ancient language and in Coptic, "black," and may be supposed to have been given to the land on account of the blackness of its alluvial soil (comp. Plutarch, De Is. et Osir. c. 33). It would seem, however, to be rather a representative of the original Heb. name Ham (i.e., Cham), which likewise in the Semitic languages denotes un-burnt, as a characteristic of African tribes. The other hieroglyphic names of Egypt appear to be of a poetical character.

The Greek and European name (ἡ Αἰγύπτιος, Αἰγύπτος), Egypt, is of uncertain origin and signification (Champion, loc. cit. 77). It is possible, however, to have some etymological connection with the modern name Copt, and is perhaps nothing more than "the land of the Copts" (the prefix ai- being perhaps for ain = yai or γά), from where the Nile is sometimes (Odys. iv, 351, 355; xiv, 237, 238) called Egypt (Αἰγύπτιος).
II. Extent and Population.—Egypt occupies the north-eastern angle of Africa, between N. lat. 31° 37' and 24° 1', and E. long. 27° 13' and 34° 12'. On the E. it is bounded by Palestine, Idumea, Arabia Petraea, and the Arabian Gulf. On the W., the moving sands of the wide Libyan desert obliterate the traces of all political or physical limits. Inhabited Egypt, however, is restricted to the valley of the Nile, which, having a breadth of from two to three miles, is enclosed on both sides by a range of hills: the chain on the eastern side disappears at Mokattam, that on the west extends to the sea. Its limits appear to have always been very nearly the same. In Ezekiel (xxix, 10; xxx, 6), according to the obviously correct rendering
(see Migdol), the whole country is spoken of as extending from Migdol to Syene, which indicates the same limits to the east and the south as at present. Egypt seems, however, to have always been held, except by the modern geographers, to include no more than the tract irrigated by the Nile lying within the limits we have specified. The deserts were at all times wholly different from the valley, and their tribes more or less independent of the rulers of Egypt. Syene, now Aswan, is also assigned by Greek and Arabian writers as the southern limit of Egypt. Here the Nile issues from the granite rocks of the cataracts, and enters Egypt proper. The length of the country, therefore, in a direct line, is 456 geographical miles. The breadth of the valley between Aswan and the Delta is very unequal; in some places the inundations of the river extend to the foot of the mountains; in other parts there remains a strip of a mile or two in breadth, which the water never covers, and which is therefore always dry and barren. Originally the name Egypt designated only this valley and the Delta; but at a later period it came to include also the region between this and the Red Sea from Berenice to Suez, a strong and mountainous tract, with only a few spots fit for tillage, but better adapted to pasturage. It included also, at this time, the adjacent desert on the west, as far as to the oases, those fertile and inhabited islands in the ocean of sand. The name Delta, also, was extended so as to cover the districts between Pelusium and the border of Palestine, and Arabia Petraea; and on the west it included the adjacent tract as far as to the great deserts of Libya and Barca, a region of sand of three days' journey east and west, and as many north and south.

Egypt, in the extensive sense, contains 115,200 square geographical miles, yet it has only a superfi- cies of about 2696 square geographical miles of soil, which the Nile either does or can water and fertilize. This computation includes the river and lakes as well as sandy tracts which can be inundated, and the whole space either cultivated or fit for cultivation is no more than about 5628 square miles. Anciently 3746 square
miles more may have been cultivated, and now it would be possible at once to reclaim about 1259 square miles. These computations are those of Colonel Jacotin and M. Estève, given in the Memoir of the former in the great French work (Description de l'Egypte), 2d ed. xviii. pt. ii. p. 101 sq.). They must be very nearly correct, for the actual state of Egypt at this time. Mr. Lane calculated the extent of the cultivated land in A.D. 1375-6 to be 6500 square geographical miles, from a list of the cultivated lands of towns and villages appended to De Sacy's Abd-Allatf. He thinks this list may be underrated. M. Mengin made a much larger estimate, which began in 1824 but since that time much waste territory has been reclaimed (Mrs. Poole, Englishwoman in Egypt, i. 85). The chief differences in the character of the surface in the times before the Christian era were that the long valley through which flowed the canals from the Red Sea was then cultivated, and that the Gulf of Suez perhaps extended further north than at present.

As to the number of its inhabitants, nothing very definite is known. Its fertility would doubtless give birth to and support a teeming population. In very remote times, many as 8,000,000 are said to have lived on its soil. In the days of Diocletian and Constantius the population was estimated at 3,000,000. Volney made the number 2,300,000. A later government estimate is 3,200,000, which seems to have been somewhat below the fact (Bowring's Report on Egypt and Ceylon, p. 4). According to the census of 1895, taken immediately after the occupation, the population is numbered 8,617,765 in Egypt proper. The Copts are estimated at 800,000, the Bedouins being the most in number. Seven eighths of the entire population are native Mohammedans. In Alexandria, at the close of the last century, scarcely 40,000 inhabitants were counted, whereas at present the city contains 800,000, about half of whom are Arabs and half Europeans. The nationality of the latter has been ascertained to be as follows (the figures represent thousands): Greeks, 25; Italians, 18; French, 16; Anglo-Maltese, 13; Syrians and natives of the Levant, 12; Germans and Swiss, 10; various, 6. Cairo, the capital, contains upwards of 400,000 inhabitants; within its walls are 140 schools, more than 400 mosques, 1166 cafés, 65 public baths, and 11 bazaars. The other towns of importance, from their population, are, in Lower Egypt, Alexandria, 45,000; Rosetta, 20,000; and in Upper Egypt, Luxor, on the left bank of the Nile, numbering 20,000 souls.

III. Geographical Divisions. Under the Pharaohs Egypt was divided into Upper and Lower, "the two regions..." The Western or "the Southern Region..." and Hilt. There were different crowns for the two regions, that of Upper Egypt being white, and that of Lower Egypt red, the two together composing the pharaoh. The sovereign had a special title as ruler of each region: of Upper Egypt he was Suten, "king," and of Lower Egypt Suteb, "bee," the two combined forming the common title Suten-Suteb. The initial sign of the former name is a bent reed, which illustrates what seems to have been a proverbial expression in Palestine as to the danger of trusting to the Pharaohs. (Kings xxix, 6; Ezek. xxix, 6): the latter name may throw light upon the comparison of the king of Egypt to a fly, and the king of Assyria to a bee (Isa. vii, 18). It must be remarked that Upper Egypt is always mentioned before Lower Egypt, and that the crown of the former is mentioned in that of the latter. In some of the times the same division continued. Manetho speaks of it (ap. Josephus, c. apion. 1, 14), and under the Ptolemies it still prevailed. In the time of the Greeks and Romans, Upper Egypt was divided into the Heptanomia and the Thesibis, making altogether three provinces, but the division of the whole country into two was even then the most usual. The Thesibis extended from the first cataract at Philae to Hermopolis, the Heptanomia from Hermopolis to the point where the Delta begins to form itself. About A.D. 400 Egypt was divided into four provinces, Augustamnica Prima and Secunda, and Egyptian Prima and Secunda. The Heptanomia was called Arcadian, from the emperor Arcadius, and Upper Egypt was divided into Upper and Lower Thesibis.

From a remote period Egypt was subdivided into nomes (Hespé, sing. Hespé), each one of which had its special objects of worship. The monuments show that this division was as old as the earlier part of the New Kingdom, which began in 1550 B.C. It is stated that they are said to have been first 36 in number (Diod. Sic., i, 54; Strabo, xvii, 1). Ptolemy enumerates 44, and Pliny 46; afterwards they were further increased.

There is no distinct reference to them in the Bible. In the Sept. version, indeed, ἡ πέντε (Isa. xix. 2) is rendered by νομον, but we have no warrant for translating it otherwise than "kingdom." It is probable that at that time there were two, if not three kingdoms in the country. Two provinces or districts of Egypt are mentioned in the Bible, Pathros (q. v.) and Caphtor (q. v.); the former appears to have been part of Upper Egypt; the latter was evidently so, and must be represented by the Coptic nome, although no doubt of greater extent. The division into nomes was more or less modified till the invasion of the Theran Greeks. Egypt is now composed of 24 departments, which, according to the French system of geographical arrangement, are subdivided into arrondissements and cantons (Bowring's Report).

IV. Surface, Climate, etc. The general appearance of the country cannot have greatly changed since the days of Moses. The Delta was always a vast level plain, although of old more perfectly watered than now by the branches of the Nile and numerous canals, while the narrow valley of Upper Egypt must have suffered still less alteration. Anciently, however, the rushes must have been abundant; whereas now they have almost disappeared, except in the lakes. The whole country is remarkable for its extreme fertility, which especially strikes the beholder when the rich green of the fields is contrasted with the utterly-bare yellow mountains or the sand-strewn rocky desert on the plains. The plains some of the houses on the borders of the villages were destroyed, was, we read, "well watered everywhere...even" like a garden of the Lord, like the land of Egypt" (Gen. xiii. 10). The aspect of Egypt is remarkably uniform. The Delta is a richly-cultivated plain, varied only by the mounds of ancient cemeteries, the ruins of ancient temples, and the few villages seldom met with. The valley in Upper Egypt is also richly cultivated. It is, however, very narrow, and shut in by low hills, rarely higher than 800 feet, which have the appearance of cliffs from the river, and are not often steep. They, in fact, form the border of the desert on either side, and the valley seems to have been, as it were, cut out of a table-land of rock. The valley is rarely more than twelve miles across. The bright green of the fields, the reddish-brown or dull green color of the great river, the tints of the bare yellow rocks, and the deep blue of the sky all combine to form a pleasant view, and often one of great beauty. The soil consists of the mud of the river, resting upon desert sands; hence this country owes its existence, fertility, and beauty to the Nile, whose annual overflow is indispensable for the purposes of agriculture. The country north and south of the cataracts is highly picturesque; the other parts of Egypt, and especially the Delta, are exceedingly uniform and monotonous. The prospect, however, is extremely different, according to the season of the year. From the middle of the spring season, when the harvest is over, one sees nothing but a gray and dusty soil, so full of cracks and chasms that he can hardly pass along. At the time
of the autumnal equinox, the whole country presents nothing but an immeasurable surface of reddish or yellowish water, out of which rise date-trees, villages, and narrow canals, which serve well as means of communication.

After the waters have retreated, which usually remain only a short time at this height, you see, till the end of autumn, only a black and slimy mud. But in winter nature puts on all her splendor. In this season, the freshness and power of the new vegetation, the variety and abundance of vegetable productions, exceed everything that is known in the most celebrated parts of the European continent; and Egypt is then, from one end of the country to the other, nothing but a beautiful garden, a verdant meadow, a field sowen with flowers, or a waving ocean of grain in the car.

The climate is very equable, and, to those who can bear great heat, also healthy; indeed, in the opinion of some, the climate of Egypt is one of the finest in the world. There are, however, unwholesome tracts of salt marsh which extend here and there. Rain seldom falls except on the coast of the Mediterranean. At Thebes a storm will occur, perhaps, not oftener than once in four years. Cultivation nowhere depends upon rain or showers. This absence of rain is mentioned in Deut. (xvi. 10, 11) as rendering artificial irrigation necessary. In the case of Eqypt, and in Zech. (xiv. 18) as peculiar to the country. The atmosphere is clear and shining; a shade is not easily found.

Though rain falls even in the winter months very rarely, it is not altogether wanting, as was once believed. Thunder and lightning are still more unfrequent, and are so completely a matter of their respective qualities that the Egyptians never associate with them the idea of destructive force. Showers of hail descending from the hills of Syria are sometimes known to reach the confines of Egypt. The formation of ice is very uncommon. Dew is produced in great abundance. The wind blows from the north from May to September, when it veers round to the east, assumes a southerly direction, and fluctuates till the close of April. The southerly vernal winds, traversing the arid sands of Africa, are most changeable as well as most unheable to. They form the simoom or samiel, and have proved fatal to caravans and even to armies (View of Ancient and Modern Egypt, Edin. Cab. Library).

Egypt has been visited at all ages by severe pestilences, but it cannot be determined that any of those of ancient times were of the character of the modern plague. The plague with which the Egyptians are threatened in Zech. (l. c.) is described by a word, תְּנָכָה, which is not specially applicable to a pestilence of their country (see ver. 12). See Bortch. Cutaneous disorders, which have always been very prevalent in Egypt, are distinctly mentioned as peculiar to the country (Deut. vii. 15; xxviii. 27, 35, 60, and perhaps Exod. xx. 20, although the reference may be to the plague of boils), and as punishments to the Israelites in case of disobedience, whereas if they obeyed they were to be preserved from them. The Egyptian calumny that made the Israelites a body of lepers and unclean (Joseph. c. Apion.) is thus refuted, and the traditional tale as to the Exodus given by Manetho shown to be altogether wrong in its main facts, which depend upon the truth of this assertion. Famines are frequent, and one in the Middle Ages, in the time of the Fatimite caliphate El-Mustansir-billah, seems to have been even more severe than that of Joseph. Mosquitoes, locusts, frogs, together with the small-pox and the dengue, are the main plagues which are inflicted by Ophithalmia is also very prevalent. See Disease.

V. The Nile.—Egypt is the land of the Nile, the country through which that river flows from the island of Philae, situated just above the Cataracts of Syene, in lat. 24° 1' 56"; to Damietta, in 31° 35' N., where its principal stream pours itself into the Mediterranean Sea. In lat. 30° 15' the Nile divides into two principal streams, which, in conjunction with a third that springs somewhat higher up, forms the great delta, so called from its resemblance to the Greek letter Δ. At Khartum, 160 miles north of Sennār, the Nile forks into two rivers, called Bahr el-Abiad and Bahr el-Azzak, or the white and blue river, the former flowing from the west, the latter from the east. The blue river is the smaller of these, but it possesses the same fame for its kills as the Nile, and is of the same color. The sources of this river were discovered by Bruce; those of the white river were, until quite recently, undiscovered. They are now known to flow from lakes situated among the mountains south of the Nile. (Sources of the Nile, London, 1860.) Most ancient writers mention seven mouths of the Nile, beginning from the east: 1: Pelusiac or Bubastis; 2: Sais or Tanis; 3: Mendesian; 4: Bucolic or Pharaonic (now of Damietta); 5: Sennōnian; 6: Bubitine (now of Rosetta); 7: Canopic or Heracleotic.

The Nile is called in the Bible שֶׁכֶר, מֶשְׁכֶר, or "the black (river)"; also "כָּרָם, מֶשְׁכֶד, "the river." As to the phrases פִּזְיוֹן, פִּיזְיוֹנָה, "the river of Egypt," and פִּזְיוֹנָא, פִּזְיוֹנָא, "the brook of Egypt," it seems unlikely that the Nile should be so specified; and פִּזְיוֹן or פִּזְיוֹנָה here more probably denotes a mountain stream, usually dry, on the borders of Egypt and Palestine, near the modern El-Arish (Num. xxxiv. 5; Josh. xii. 3, etc.). See EGYPT, RIVER OF. Some have thought that פִּזְיוֹן is the origin of the name Nile; others have been anxious to find it in the Sanscrit Nīlau, which means dark blue. The Indus is called Nil-ah, or "the blue river;" the Stulej also is known as the blue river." It is to be observed that the Low Nil was painted blue by the ancient Egyptians. The river is turbid and reddish throughout the year, and turns green about the time when the signs of rising commence, but not long after becomes red and very turbid. The Copitc word is som, "sea," which corresponds to the Arab name for it, kāh, properly sea; thus Nahum iii. 8, "Populous No (Thebes), whose rampart was the sea." In Egyptian the Nile bore the sacred appellation HAPI, or HAPI-MU, "the abyss," or "the abyss of waters." As Egypt was divided into two regions, we find two Niles, HAPI-MES, or Upper Nile, and NAPI-MER, or Lower Nile; HAPI-MES, or the Northern Nile, the former name being given to the river in Upper Egypt and in Nubia. The common appellation is ATUR, or AUR, "the river," which may be compared with the Heb. Fōr.

The inundation, HAPI-UR, "great Nile," or "high Nile," fertilizes and sustains the country, and makes the river its chief blessing, a very low inundation or failure of rising being the cause of famine. The Nile was on this account anciently worshipped, and the plague in which its waters were turned into blood, while injurious to the river itself and its fish (Exod. vii. 19; Ps. cv. 35) was a reproach to the superstition of the Egyptians. The rise begins in Egypt about the summer solstice, and the inundation commences about two months later. The greatest height is attained about or somewhat after the autumnal equinox. The inundation reaches its height in the month of Akhet, or, according to this time, and especially when near the highest, the river rapidly pours along its red turbid waters, and spreads through openings in its banks over the whole valley and plain. The prophet Amos, speaking of the ruin of Israel, metaphorically says that "the land . . . shall be smitten with the sword as [by] the river of Egypt." (viii. 8; ix. 5). Owing to the yearly deposit of alluvial matter, both the bed of the Nile and the land of Egypt are gradually raised. The river proceeds in its current uniformly and quietly at the rate of two and a half or three miles an hour, always deep enough for
navigation. Its water is usually blue, but it becomes of a deep brick-red during the period of its overflow. It is salubrious for bathing, and the Zululand inhabitants which it has so abundantly received. On the river the land is wholly dependent. If the Nile does not rise a sufficient height, sterility and death, if not famine, ensue. An elevation of sixteen cubits is essential to secure the prosperity of the country. Such, however, is the variety of nature, that much the faithfulness of God, that for thousands of years, with but few and partial exceptions, these inundations have in essential particulars been the same. The waters of the stream are conveyed over the surface of the country by canals when natural channels fail. During the months of August and September, and the first quarter of October, it becomes like the Hebrews, a sea with the appearance of a sea dotted with islands. Wherever the waters reach abundance springs forth. The cultivator has scarcely more to do than to scatter the seed. No wonder that a river whose waters are so grateful, salubrious, and beneficial should in days of ignorance have been regarded as an object of worship, and that it is still revered and beloved. See NILE.

VI. Geology. The fertile plain of the Delta and the valley of Upper Egypt are bounded by rocky deserts covered or strewn with sand. On either side of the plain the rocks overlie or form, as it were, the base, about which they rise so steeply as from the river to present the aspect of cliffs. The formation is limestone as far as a little above Thebes, where sandstone begins. The First Cataract, the southern limit of Egypt, is caused by granite and other primitive rocks, which rise through the strata and obstruct the river's bed. In Upper Egypt the mountains near the Nile rarely exceed 300 feet in height, but far in the eastern desert they often attain a much greater elevation. The highest is Jebel Gharib, which rises about 6000 feet above the sea. Limestone, sandstone, and granite, were obtained from quarries near the river; basalt, breccia, and porphyry from others in the eastern desert between the Thebais and the Red Sea. A geological change has, it is thought, in the course of centuries raised the country near the head of the Gulf of Suez, and depressed that on the northern side of the isthmus. The Delta is of a triangular form, its eastern and western limits being nearly marked by the courses of the ancient Pelusiac and Canopic branches of the Nile: Upper Egypt is a narrow winding valley, varying in breadth, but seldom more than twelve miles across, and generally interrupted on the western side. The anciently there was a fertile valley on the course of the Canal of the Red Sea, the Land of Goshen (q. v.), now called Wady Tumelait: this is covered with the sands of the desert. To the south, on the opposite side, is the oasis now called the Fayyum, the old Abarim, connected with the valley by a neck of cultivated land.

VII. Agriculture, etc. The ancient prosperity of Egypt is attested by the Bible, as well as by the numerous monuments of the country. As early as the age of the Great Pyramid it must have been densely populated and well able to support its inhabitants, for it cannot be supposed that there was then much external traffic. In such a climate the wants of man are few, and nature is liberal in necessary food. Even the Egyptians in their hard bondage did "eat freely" the fish, and the vegetables, and fruits of the country, and ever afterwards they longed for the "plenteous plenty of a land where even now starvation is unknown." The contrast of the present state of Egypt with its former prosperity is more to be ascribed to political than to physical causes. It is true that the branchlets of the Nile have failed, and the artificial lakes and ponds for fish have dried up; that the reeds and other water-plants which were of value in commerce, and a shelter for wild-fowl, have mostly perished; that the Land of Goshen, once, at least for pasture, "the best of the land" (Gen. xlv. 6, 11), is now sand-strewn and unwatered, so as scarcely to be distinguished from the desert around, and that the predictions of the prophets have thus received a literal fulfillment. Yet it has not been by any irresistible aggression of nature, but because Egypt, smitten and accursed, has lost all strength and energy. The population is not large enough for the cultivation of the land now fit for culture, and long oppression has taken from it the power and the wealth of commerce.

Egypt is naturally an agricultural country. As far back as the days of Abraham, we find that when the produce failed in Palestine, Egypt was the natural resource. In the time of Joseph it was evidently the granary—at least during famines—of the nations around (Gen. xlvii. 18; Sir. 10; comp. Gen. xxi. 27; Am. xv. 9, 10). The inundation, as taking the place of rain, has always rendered the system of agriculture peculiar; and the artificial irrigation during the time of low Nile is necessarily on the same principle. We read of the Land of Promise that it is "not as the land of Egypt, where the king came out, where he soweds thy seed, and watered it with his foot, as a garden of herbs: but the land whither thou goest in to possess it, [is] a land of hills and valleys, [and] drinketh water of the rain of heaven" (Deut. xi. 10, 11). Watering with the foot may refer to some mode of irrigation by machine, but we are not to think that it is an idiomatic expression implying a laborious work. The monuments do not afford a representation of the supposed machine. That now called the shaft, which is a pole having a weight at one end and a bucket at the other, so hung that the labourer is aided by the weight in raising the full bucket, is depicted, and seems to have been the common means of artificial irrigation (q. v.). There are detailed pictures of breaking up the earth, or ploughing, sowing, harvesting, threshing, and storing the wheat in granaries. See AGRICULTURE. The use of the sleigh, or sled, drawn by oxen or crows, unmuzzled (comp. Deut. xxxv. 4). The processes of agriculture began as soon as the water of the inundation had sunk into the soil, about a month after the autumnal equinox (Exod. ix. 31, 32). Vines were extensively cultivated, and there were several different kinds of vine, one of which, the smaerotic, was famous among the Romans. Of other fruit-trees, the date-palm was the most common and valuable. The gardens resembled the fields, being watered in the same manner by irrigation. See GARDEN. VINEYARD. On the tenure of land much light is thrown by the story of Joseph. The farms or small holdings, or vineyards, were sacrificed by the rich to the landings of the poor; the rich family having few farms, the poor family having many lands. The Ramesseum, seen from the Colossi of Memnon, is a large and magnificent building, perhaps the tomb of the king. The remains are grand, and, as they have been used for other purposes, the building is in a state of decay. The materials of which it is constructed are well preserved. The building was erected during the reign of the last king of the 18th dynasty, and was used as a quarry for the materials. The materials of which it is constructed are well preserved. The building was erected during the reign of the last king of the 18th dynasty, and was used as a quarry for the materials. The materials of which it is constructed are well preserved. EGYPT

celebrated, was an artificial lake between Beni-Suef and Medinet el-Fayum. It was of use to irrigate the neighboring country, and its fisheries yielded a great revenue. It is now dried up. The canals are now far less numerous than of old, and many of them are choked and comparatively useless. The Bahri Yûrûf, or "river of Joseph"—not the patriarch, but the famous sultan Yusuf Salah-ed-din, who repaired it—is a long series of canals, near the desert on the west side of the river, extending northward from Farshut for about 350 miles to a little below Memphis. This was probably a work of very ancient times. There can be no doubt of the high antiquity of the canal of the Red Sea, upon which the Land and Coast was mainly depended for its fertility. It does not follow, however, that it originally connected the Nile and the Red Sea.

VIII. Botany.—The cultivable land of Egypt consists almost wholly of fields, in which are very few trees. There are no forests and few groves, except of date-palms, and in Lower Egypt a few of orange and lemon trees. There are some acacias, mulberry trees, and acacias, either planted on the sides of roads or standing singly in the fields. The Thelban palm grows in the Thebais, generally in clumps. All these, except, perhaps, the mulberry-tree, were anciently common in the country. The two kinds of palm are represented by the chief, and that by the acacia-wood are the materials of various objects made by the ancient inhabitants. The chief fruits are the date, grape, fig, sycamore-fig, pomegranate, banana, many kinds of melons, and the olive; and there are many others of little or no importance. There were also of old produced in the country. Anciently grapes seem to have received great attention, to have been elaborately drained, and well filled with trees and shrubs. Now horticulture is neglected, although the modern inhabitants are as fond of flowers as were their predecessors. The vegetables are of many kinds and excellent, and form the chief food of the common people. Anciently cattle seem to have been more numerous, and their meat, therefore, more usually eaten, but never as much as in colder climates. The Israelites in the desert, though they looked back to the time when they "ate the flesh of birds" (Exod. xvi, 3), seem as much to have regretted the vegetables and fruits, as the flesh and fish of Egypt. "Who shall give us flesh to eat? We remember the fish which we did eat in Egypt freely, the cucumbers, and the melons, and the leeks, and the onions, and the garlic" (Num. xi, 4, 5). The European vegetables now cultivated, and ails, of which an excellent thick potage is made (Gen. xxxiv, 34), leeks, onions, garlic, radishes, carrots, cabbages, gourds, cucumbers, the tomato, and the eggfruit. There are many besides these. The most important field-produce in ancient times was wheat; after it must be placed barley, millet, flax, and, among the vegetables, lentils, peas, and beans. At the present day the same is the case; but maize, rice, oats, clover, the sugar-cane, roses, the tobacco-plant, hemp, and cotton, must be added, some of which are not indigenous. Anciently fruits and four kinds of field-produce are mentioned—flax, barley, wheat, and "papyrus" (Exod. ix, 31, 32), which is variously rendered in the A. V. "ryo" (1 c.), "apellite" (Isa. xxxvii, 25), and "fitches" (Isa. xxxviii, 27). It is doubtless whether the last be a cereal or a leguminous product: we incline to the former opinion. See RYE.

It is clear from the evidence of the monuments and of ancient writers that, of old, reeds were far more common in Egypt than now. The byblis or papyrus is almost or quite unknown. Anciently it was a common and most important plant: boats were made of its stalks, and of their thin leaves the famous papyrus paper was manufactured. It appears to have been mentioned under two names in the Bible, neither of which, however, can be proved to be a peculiar designation for it. (1) The mother of Moses made נ' פראס "an ark" or "skiff" of papyrus," in which to put her child (Exod. ii, 3), and Isaiah tells of messengers sent apparently from farthest Ethiopia in נ"פראס, "vessels of papyrus" (xviii, 2), in both of which cases נ'פראס must mean papyrus, although it would seem in other places to signify "reed" generally. (2) Isaiah prophesies, "The papyrus-reeds (יארוני) in the river, and every thing growing [lit. sown] in the river shall be dried up, driven away [by the wind], and [shall] not be" (xix, 7). Gesenius renders יאַרוני a naked or bare place, here grassy places on the banks of the Nile. Apart from the fact that little grass grows on the banks of the Nile, in Egypt, and that little only during the cooler part of the year, instead of those sloping meadows that must have been in the European scholar's mind, this word must mean some product of the river which with the other water-plants should be dried up, and blown away, and utterly disappear. Like the fisheries and the flux mentioned with it, it ought to hold an important place in the commerce of ancient Egypt. In can therefore scarcely be reasonably held to intend anything but the papyrus. See PAPER REED.

The marine and fluvial product י.food, from which the Red Sea was called י.food, will be noticed under RED SEA. The lotus was anciently the favorite flower, and at feasts it took the place of the rose among the Greek and Romans; it is now very rare.

IX. Zoology. Anciently Egypt was more a pastoral country than at present. The cattle are still more excellent, but lean kine are more common among them than they seem to have been in the days of Joseph's Pharaoh (Gen. xii, 19). Sheep and goats have always been numerous. Anciently swine were kept, but not in great numbers; now there are none, or scarcely any, except a few in the houses of Copts and Francs. The Egyptian oxen were celebrated in the ancient world (Aristot. Hist. Anim. viii, 28),—Horses abounded (1 Kings x, 29); hence the use of war-chariots in battle (Isa. xxxi, 1; 11 Dods. Soc. x, 45), and the celebrity of Egyptian charioteers (Jer. xvi, 4; Ezek. xvii, 15). Under the Pharaohs the horses of the country were in repute among the neighboring nations, who purchased them as well as chariots out of Egypt. Thus it is commanded respecting a king of Isreal: He shall not multiply horses to himself, nor cause the people to return to Egypt, to the end that he should multiply horses: forasmuch as the Lord hath said unto you, I will henceforth return no more that way" (Deut. xvi, 16), which shows that the trade in horses was with Egypt, and would necessitate a close alliance. "Solomon had horses brought out of Egypt, and linen yarn: the king's merchants received the linen yarn at a price. And a chariot came up and went out of Egypt for six hundred shekels of silver, and a horse for a hundred and fifty: and so for all the king's horses of the Hittites and for the kings of Syria did they bring [them] out by their hand" (1 Kings x, 29). The number of horses kept by this king for chariots and cavalry was large (iv, 26; x, 26; 2 Chron. i, 14; ix, 25). Some of these horses came as yearly tribute from his vassals (1 Kings x, 25). In later times the people removed the people from the sea to be in the help of Egypt, and relying on the aid of her horses and chariots and horsemen, that is, probably, men in chariots, as we shall show in speaking of the Egyptian armies. The kings of the Hittites, mentioned in the passage quoted above, and in the account of the close of the siege of Samaria by Bethel, are referred to as "The Lord had made the host of the Syrians to hear a noise of chariots, and a noise of horses, [even] the noise of a great host: and they said one to another, Lo, the king of Israel hath hired against us the kings
of the Hittites and the kings of the Egyptians to come upon us" (2 Kings vii, 6)—these kings ruled the Hittites of the valley of the Orontes, who were called by the Egyptians SHETA or KHETA. The Pharaohs of the 18th, 19th, and 20th dynasties waged fierce wars with these Hittites, who were then ruled by a great king and many chiefs, and whose principal arm was a force of chariots, resembling those of the Egyptian arm. Asenath, the anciently numerous: the breed as the present time is excellent. Buffalo are common, and not wild. Dogs were formerly more prized than now; for, being held by most of the Moslems to be extremely unclean, they are only used to watch the herds of camels and cattle. Cattle are numerous, but less favored. The camel has nowhere been found mentioned in the inscriptions of Egypt, or represented on the monuments. In the Bible Abraham is spoken of as having camels when in Egypt, apparently as a gift from Pharaoh (Gen. xii, 6), and before the Exodus the camels of Pharaoh or his subjects were to be smitten by the murrain (Exod. ix, 3; comp. 6). Both these Pharaohs may have been shepherds. The Ishmaelites or Midianites who took Joseph into Egypt carried their merchandise on camels (Gen. xxxvii, 25, 28, 36), and the land traffic of the Arabs must have been a branch of the trade by caravans. It is probable that camels were not kept in Egypt, but only on the frontier. On the black obelisk from Nimrud, now in the British Museum, which is of Shalmaneser, king of Assyria, contemporary with Jehu and Hazael, c. 840-835 B.C., comes a representation presented as tribute by Egypt. They are of the two-humped sort, which, though perhaps then common in Assyria, has never, so far as is known, been kept in Egypt. The deserts have always abounded in wild animals, especially of the canine and antelope kinds. The wolf, fox, jackal, hyena, wild cat, weasel, ichneumon, jerboa, and hare, are also met with. Anciently the hippopotamus was found in the Egyptian Nile, and hunted. This is a fact of importance for those who suppose it to be the behemoth (q. v.) of the book of Job, especially as that book shows evidence of a knowledge of Egypt. Now this animal is rarely seen even in Lower Nubia. The elephant may have been, in the remotest historical period, an inhabitant of Egypt, and, as a land animal, have been driven further south than his brother pachyderm, for the name of the island of Elephantine, just below the Fish Gate, Cataract, in hieroglyphics, AB, "Elephant-land," seems to show that the animal was found there. Bats abound in the temples and tombs, filling the dark and desecrated chambers and passages with the unearthly whirr of their wings. Such description is represented by Isaiah when he says that a multitude of idols "is to the mountains and to the bats" (xi, 20). See each animal in its place.

The birds of Egypt are not remarkable for beauty of plumage: in so open a country this is natural. The Rupacas are numerous, but the most common are scavengers, as vultures and the kite. Eagles and falcons also are plentiful. Quails migrate to Egypt in great numbers. The Giraffes and Antelopes are found on the islands and sand-banks of the river, and in the sides of the mountains which approach or touch the stream. Among the reptiles, the crocodile (q. v.) must be especially mentioned. In the Bible it is usually called דָּרוֹן, דְּרוֹן, "dragon," a generic word of almost as wide a signification as "reptile," and is used as a symbol of the king of Egypt. Thus, in Ezekiel, "Be hold, against thee, Pharaoh, king of Egypt, the great dragon that is in the midst of the rivers, which hath said, My river is mine own, and I have made it for myself. But I will put hooks in thy jaws, and I will cause the fish of thy rivers to stick unto thy scales, and I will bring thee up out of the midst of thy rivers, and all the fish of thy rivers shall stick unto thy scales. And I will leave thee [thrown] into the wilderness, thee and all the fish of thy rivers. . . . I have given thee for meat to the beasts of the field and to the fowls of the heaven" (xxix, 3, 4, 5). Here there seems to be a retrospect of the Exodus (which is thus described in Isa. i, 9, 10, and 15), and with a more close resemblance in Psa. lxxxiv, 13, 14, "Thou didst divide the sea by thy strength: thou brakest the heads of the dragons ([ן], [ן]) in pieces, [and] guest [thou] to meat to the dwellers in the wilderness [in the wilderness, i.e. to the wild beasts; comp. Isa. xiii, 21). The last passage is important as indicating that whereas דָּרוֹן is the Hebrew generic name of reptiles, and therefore used for the greatest of them, the crocodile, דָּרוֹן is the special name of that animal. The description of leviathan in Job (xii) fully bears out this opinion, and it is doubtful if any passage can be adduced in which a wider signification of the latter word is required. In Job (xxvi, 12) also there is an apparent allusion to the Exodus in words similar to those in the 15th and 17th, and then a mention of the dragon. In this case the division of the sea and the smiting of Rahab, דָּרוֹן, the proud or insolent, are mentioned in connection with the wonders of creation (ver. 7-11, 13); so, too, in Isaiah (ver. 18, 15). The crossing of the Red Sea could be thus spoken of as a signal exercise of the divine power.—Frogs are very numerous in Egypt, and there is a constant croaking in the autumn in "the streams," מָצַּר, "the rivers," מַצָּר, "the ponds" or "marshes," מַצָּר (Exod. viii, i, A. V. V, 5), makes it difficult to picture the Plague of Frogs.—Serpents and snakes are also common, including the deadly crotalus and the cobra di capello; but the more venomous have their home in the desert (comp. Deut. viii, 15). The Nile and lakes have an abundance of fishes; and although the fisheries of Egypt have very greatly fallen away, their produce is still a common article of food. Among the insects the locusts must be mentioned, which sometimes come upon the cultivated land in a cloud, and, as in the plague, eat every herb, and fruit, and leaf where they alight; but they never, as then, overspread the whole land (Exod. x, 8-6, 12, 19). They disappear as suddenly as they come, and are carried away by the wind (ver. 19). As to the lice and flies, they are now plagues of Egypt, but it is not certain that the words מַצָּר and מַצָּר designate them (Exod. viii, 16-18). The danger arising from "crickets" is frequently met with. Beetles of various kinds are found, including the sacred scarabaeus. Bees and silk-worms are kept, but the honey is not very good, and the silk is inferior to that of Syria. X. Ancient Inhabitants. — The old inhabitants of Egypt appear from their monuments and the testimony of ancient writers to have occupied in race a place between the Negroes and the Caucasians. The constant immigrations of Arab settlers have greatly diminished the Negro characteristics in the generality of the modern Egyptians. The most recent inquiries have shown that the extreme limit at Philae was only of a political nature, for the natives of the country below it were of the same race as those who lived above that spot—a tribe which passed down into the fertile valley of the Nile from its original abode in the south. These Egyptian and the Ethiopians were considered as the same people, differing only in color. Their frame was slender, but of great strength. Their faces appear to have been oval in shape, and narrower in the man than in the women. The forehead was well-shaped, but small and retiring; the eyes were almond-shaped and mostly black; the hair was long, crisp, and generally black; the skin of the men

EGYPT 82
chap. vi. As early as the age of the 6th dynasty, a vulgar dialect was expressed in the demotic or enochri
dial writing. This dialect forms the link connecting the old language with the Coptic or Christian Egyptian,
the latest phase. The Coptic does not very great
ly differ from the monumental language, distinguished in the time of the 6th demotic, as the sacred dialect,
cept in the presence of many Greek words. See Coptic

Language.
The language of the ancient Egyptians was entirely
unknown until the discoveries made by Dr. Young
from the celebrated Rosetta stone, now preserved in
the British Museum. This stone is a slab of black
marble, which was found by the French in August,
1799, among the ruins of Port St. Julien, on the west-
ern bank, and near the mouth of the Rosetta branch
of the Nile. It contains a decree in three different
kinds of writing, referring to the coronation of Ptole-
my V (Ephiphanes), and is supposed to have been sculp-
tured B.C. cir. 195. As part of the inscription is in
Greek, it was easily deciphered, and was found to state
that the decree was ordered to be written in sacred,
enocharial, and Greek characters. Thence, by care-
fully comparing the three inscriptions, a key was
obained to the interpretation of the mysterious hieroglyphs.
The language which they express closely resembles
that which was afterwards called Coptic when the
people had become Christians. It is monosyllabic
in its roots, and abounds in vowels. There were at
least two distinct kinds of it, spoken equally in Upper
and Lower Egypt. See Rosetta Stone.

"The wisdom of Egypt" was a phrase which, at
an early period, passed into a proverb, so high was the
opinion entertained by antiquity of the knowledge and
skill of the ancient Egyptians (1 Kings iv, 80; Herod.
ii, 160; Josephus, Ant. v, 13); Acts vii, 22). But as
the sequel of this article will show, were there want-
ing substantial reasons for the current estimate. If,
however, antiquity did not on this point exceed the
bounds of moderation, very certain is it that men of
later ages are chargeable with the utmost extravag-
ance in the terms which they employed when speaking
on the subject. It was long thought that the hie-
roglyphical inscriptions on the monumental remains of
Egypt contained treasures of wisdom no less bound-
less than hidden; and, indeed, hieroglyphics were, in
the opinion of many, invented by the gods for the
people of the land, if not expressly to conceal their knowledge from
the profane vulgar, yet as a safe receptacle and con-
venient storehouse for their mysterious but invaluable
doctrines. Great, consequently, was the expectation
of the public when it was announced that a key had
been discovered which opened the portal to these long
concealed treasures. The result has not been altogether
more correspondent, especially with regard to the pre-
sumed secrets of ancient lore. Men of profound learn-
ing, great acuteness of mind, and distinguished reputa-
tion have engaged and persevered in the inquiry: it
is impossible to study without advantage the writings
of such persons as Zoege, Akerlaid, Young, Champol-
io, Spohn, Seyfthart, Rosegarten, Ruhle; and equal-
ly ungrateful would it be to affirm that no progress has been
made in the undertaking; but, after all, the
diverse and novel conclusions to which the disput
has been divided, and set forth are only in a few cases (comparatively)
finite and unimpeachable (Heeren, Iden, ii, 2; 4;
Quatremer, Recherches sur la langue et la litterature de l'Egypte). See Hieroglyphics. The results in point of
history and archaeology, as detailed by Lepsius,
Brugsch, and other late Egyptologists, are far more
important than in a purely scientific view. See below.

XII. Religion.—The basis of the religion was Nigeri-
tian fetishism, the lowest kind of nature-worship, dif-
fering in different parts of the country, and hence
obviously indigenous. Upon this was erected, first,

cosmic worship, mixed up with traces of primeval re-
velation, as in Babylonia; and then a system of per-
Egypt

sonifications of moral and intellectual abstractions. The incongruous character of the religion necessitates the supposition, and the case with which it admitted
extraneous additions in the historical period confirms it. There were, according to Herodotus, three orders of gods—the eight great gods, who were the most antient,
the twelve lesser, and the Osirian group. They were represented in human forms, sometimes having the sacred animals sacred to them, or bearing on
their heads cosmic or other objects of worship. The fetischism included, besides the worship of animals, that of
trees, rivers, and hills. Each of these creatures or objects was appropriated to a divinity. There was no
prominent hero-worship, although deceased kings and
other illustrious persons received divine honors—in one
case, that of Osiraen II, of the 12th dynasty, the old
Sesostris, of a very special character. The great
doctrines of the immortality of the soul, man's responsi-
bility, and future rewards and punishments, were
taught. Among the rest, circumcision is the most re-
markable; it is old as the age of the 4th dynasty.

Wilkinson gives us the following classification of
the Egyptian deities (Materia Hieroglyphica, p. 58,
modified by himself in Rawlinson's Herod. ii, 241 sq.)

I. FIRST ORDER.

1. Amen, or Amun-the king of all the gods."

2. Man, or Mut (Sanchoan. mod. the material principle,
sometimes as Buto (Latona))

3. Neph, or Nef, or Knefeh=Mercury.

4. Sithi=Juno.

5. Pibah, or Pibah, the creative power (a function assigned by
Seth to Knefeh)=Valcne.

7. Khen, the generative principle (phallicus).

8. Pash=Janna.

II. SECOND ORDER.

1. Ra, or Pibah, the Sun, father of many deities, often
seen with those of the other.

2. Seb, the Earth=Saturn, father of the infernal gods.

3. Neph, wife of Seb, the Sky, mother of gods=Neith.

4. Bubastis and Mani, the Moon=Hermes.

5. Anuro (Priest)=Vesta.

6. Atma (for Mat), Darkness, or Twilight.

7. Mut, or Shu, son of Re, Light (phallicus).

8. Taoureh (Daphne), or Tafnet, a lion-headed goddess.

9. Thoth, the Willless=Hermes and the Moon.

10. Sanak, or Sebak.

11. Athiata=Lucina.

12. Mandai, or Mumum=

III. THIRD ORDER.

1. Osiris, son and daughter of Seb and Neph.

2. Isis, also.

3. Anou, the elder Horus, son of Neph.

4. Seth, or Typhon, the destructive principle (Death).

5. Neph, or Nebank (Nebekh), lady of the house of the Horu.

6. Horus the younger, god of victory.

7. Harpoocrates, son of Osiris and Isis, emblem of Youth.

8. Anoua, son of Osiris.

IV. MISCELLANEOUS.

1. Themet, or Ma (Bruyi), goddess of Truth and Justice, head-
less.

2. Athor (at-Hor)=Venus, another daughter of Ra.

3. Nepthe-Athéa, perhaps a variation of Amoun above.

4. Hor-Ha, a winged globe, as (;ytoh).

5. Haktet, a lion-headed goddess.

7. Tert, a god connected with Pash.

8. Diam, perhaps a female Amun.

9. The, "the heavens." 

10. Hapi, or the god of Nile.

11. Rano, an ass-headed goddess, as (;ytoh).

12. Hermes Triumphant, a form of Thoth.

13. Apoplos, Neith, or Imoep, "son of Pash.

14. Sopf, the goddess of Speech.

Together with about 50 more, some of them local divin-
taxes and personifications of cities, besides deified an-
mals, etc.

Num, Nu, or Knefeh, was one of the most important
of the gods, corresponding to the "soul" or one of the
to whom was ascribed the creation of gods, men, and
animals, the world. He is represented as a man with a
head of a ram and curved horns. The chief
god of Thebes was Amen, or Amen-Ra, or Amen-Ra
Knefeh, also worshipped in the great oasis, and some-
times portrayed under the form of Knefeh. He was the
Jupiter Ammon of the classics. The goddess Mut,
or the "mother," is the companion of Amen, and is
represented as a female wearing the crowns of Upper
and Lower Egypt, and the vulture head-dress of a
typhon. Amen was the god by whom the productiv-
ity of nature was symbolized. His name reminds
us of the patriarch Ham. The Greeks identified him
with Pan, and called Chemnис, a city in the Thebais,
where he was worshipped, Panopolis. He is accom-
panied by a tree or a flower on the sculptures, which
may have been supposed to be caused by the sacred
or sacred grove spoken of in the Bible. Pibah was
the god of Memphis, and worshipped there under the form
of a pigmy or child; but, as his temples have been
destroyed, little is known of his worship. The goddess
Nef or Neith is often associated with Pibah. She was
wife of Seth, and mother of the god of Sais, the first
received divine honors—in one case, that of Osiraen II, of the 12th dynasty, the old
Sesostris, of a very special character. The great
doctrines of the immortality of the soul, man's responsi-
bility, and future rewards and punishments, were

Egypt

He was questioned by forty-two assessors as to
whether he had committed forty-two sins about which
they inquired. If guiltless, he took the form of Osiris,
apparently long after series of transformations and
many ordeals, and entangled into his dwelling among
the gods in perpetual day on the banks of the celestial
Nile. If guilty he was often changed into the form
of some base animal, and consigned to a fiery place
of punishment and perpetual night. From this abstract
it may be seen that the Egyptian religion is to be re-
ferred to various sources. There is a trace of some primeval revelation in it; also a strong Semitic element. (See a full discussion of the subject, with figures of the leading deities, in Kitto's "Biblical Dictionary," note on Deut. iv, 16.) A more favorable view of the ancient Egyptian theology is taken by Wilkinson in his "Ancient Egyptians" (see his summary in the abridged ed. of "The Manners and Customs of the Hebrews," p. 379). The author himself is the first to admit the connection of this religious system with the polytheism of the Greeks and Romans likewise, that the more learned and philosophical classes were able to spiritualize to some extent a religion which could have been to the populace nothing but a great mystery.

The Israelites in Egypt appear, during the oppression, to have adopted to some extent the Egyptian idolatry (Josh. xxiv, 14; Ezek. xx, 7, 8). The golden calf, or rather steer, בּáveis, was probably taken from the bull Apis, certainly from one of the sacred bulls. Rehemph and Chian were foreign divinities adopted into the Egyptian Pantheon, and called in the hieroglyphics REmpHU (probably pronounced Rempha) and REN. It can hardly be doubted that they were worshiped as the sun-bears; but there is no conclusive evidence that there was any separate foreign system of idolatry. See REMPHA. Ashtoreth was worshipped at Memphis, as is shown by a tablet of Amemoph II, B.C. cir. 1415, at the quarries of Turis, opposite that city (Voss's "Pyramid Inscriptions," iii, "Touarq tablet" 2), which is represented as the Egyptian goddess. The temple of the "Foreign Venus," in "the Tyrian camp" in Memphis (Hered. ii, 112), must have been sacred to her. Doubtless this worship was introduced by the Phoenician shepherds.

As there are prominent traces of primeval revelation in the ancient Egyptian religion, we cannot be surprised at finding certain resonances to the Mosaic law, apart from the probability that whatever was unobjectionable in common belief and usages would be retained. The points in which the Egyptian religion shows strong traces of truth are, however, doctrines of the very kind that the Law does not expressly teach. The Egyptian religion, in its reference to man, was a system of responsibility mainly depending on future rewards and punishments. The Law, in its reference to man, was a system of responsibility mainly depending on temporal rewards and punishments. All we learn, but this is of the utmost importance, is that every Israelite who came out of Egypt must have been fully acquainted with the universally recognized doctrines of the immortality of the soul, man's responsibility, and future rewards and punishments in a life which the ancient mind of course could not contradict. The idea that the Mosaic law was an Egyptian invention is one of the worst examples of modern reckless criticism.

XIII. Laws. — We have no complete account of the laws of the ancient Egyptians either in their own records or in works of ancient writers. The passages in the Bible which throw light upon the laws in force during the sojourn of the Israelites in Egypt most probably do not relate to purely native law, nor to law administered to natives, for during that whole period they may perhaps have been under shepherd rulers, and in any case it cannot be doubted that they would not be subject to absolutely the same system as the Egyptians. The paintings and sculptures of the monuments indicate a very high degree of personal safety, showing us that the people of all ranks commonly went unarmed, and without military protection. We may infer from the laws relating to the maintenance of order were sufficient and strictly enforced. The punishments seem to have been lighter than those of the Mosaic law, and very different in their relation to crime and in their nature. Capital punishment appears to have been almost restricted, in practice, to murder. Crimes of violence were more severely treated than offences against religion and morals. Popular feeling seems to have taken the duties of the judge upon itself in the case of impiety alone. That in early times the Egyptian populace acted with reference to any offence against its religion as it did under the Greeks and Romans, is evident from the answer of Moses when Pharaoh proposed that the Israelites sacrifice to the Hebrew gods but "and we will sacrifice the abomination of the Egyptians to the Lord our God: lo, shall we sacrifice the abomination of the Egyptians before their eyes, and will they not stone us?" (Exod. viii, 26.)

XIV. Government. — The rule was monarchical, but not of an absolute character. The sovereign was superior to the laws, and the priests had the power to check the undue exercise of his authority. The kings under whom the Israelites lived seem to have been absolute, but even Joseph's Pharaoh did not venture to touch the independence of the priests. Nomes and districts were governed by officers whom the Greeks called nomarchs and toparchs. There seems to have been no hereditary aristocracy, except perhaps at the earliest period, for indications of something of the kind occur in the inscriptions of the 4th and 12th dynasties. XV. Foreign Policy. — This must be largely related to the admission of foreigners into Egypt and to the treatment of tributary and allied nations. In the former aspect it was characterized by an exclusive spirit which sprang from a national hatred of the yellow and white races, and was maintained by the wisdom of foreign relations and the institutions of the country. The influence of the pirates of the Mediterranean and the Indian Ocean, and the robbers of the deserts. Hence the jealous exclusion of the Greeks from the northern ports until Naukratis was opened to them, and hence, too, the restriction of Semitic settlers in earlier times by the kings of Goshen, toward the south as part of Egypt. It may be remarked as a proof of the strictness of this policy that during the whole of the sojourn of the Israelites they appear to have been kept in Goshen. The key to the policy towards foreign nations, after making allowance for the hatred of the yellow and white races balanced by the regard for the red and black, is found in the position of the great Oriental rivals of Egypt. The supremacy or influence of the Pharaohs over the nations lying between the Nile and the Euphrates depended as much on wisdom in policy as on the arms. The Pharaohs of the 4th, 6th, and 15th dynasties appear to have uninter ruptedly held the peninsula of Sinai, where tablets record their conquest of Asiatic nomads. But with the 18th dynasty commences the period of Egyptian supremacy. Very soon after the accession of this powerful line most of the countries between the Red Sea and the Euphrates, and even Babylonia, were reduced to the condition of tributaries. The empire seems to have lasted for nearly three centuries, from about B.C. 1500 to about 1200. The chief opponents of the Egyptians were the Hittites of the valley of the Orontes, with whom the Pharaohs waged long and fierce wars. After this time the influence of Egypt declined; and until the reign of Shishak (B.C. cir. 990-967), it appears to have been confined to the western borders of Palestine. No doubt the rising greatness of Assyria caused the decline. The Hittite war, and above all the conquest of the Pharaoh Necho there was a constant struggle for the tractis lying between Egypt, and Assyria, and Babylonia, until the disastrous battle at Carchemish finally destroyed the supremacy of the Pharaohs. It is probable that during the period of the empire an Assyrian or Babylonian king generally supported the opponents of the native rulers of Egypt. Great aid from a powerful ally can indeed alone explain the strong resistance offered by the Hittites. The general policy of the Egyptians towards their eastern tributaries seems to have been marked by great moderation. The Pharaohs intermarried with them, and neither forced upon them
EGYPTIAN garrisons, except in some important positions, nor attempted those deportations that so marked a feature of Asiatic policy. In the case of those nations which never attacked them they do not appear to have even exacted tribute. So long as their general powers remained unimpaired they could not be unwise enough to make favorable or neutral powers their enemies. Of their relation to the Israelites we have for the earlier part of this period no direct information. The explicit account of the later part is fully consistent with what we have said of the general policy of the Pharaohs. If Solomon's rule were, as we believe, a kingdom of Egypt or a command of Egyptian forces, are the only exceptions in a series of friendly kings, and they were almost certainly of Assyrian or Babylonian extraction. One Pharaoh gave his daughter in marriage to Solomon, another appears to have been the ally of Jehoram, king of Israel (2 Kings vii. 6). So made a treaty with Hosea, Tirhakah aided Hezekiah, Pharaoh Necho fought Josiah against his will, and did not treat Judah with the severity of the Oriental kings, and his second success ruled by a treaty, the pact of allied Egypt, notwithstanding this break, as firmly as before, and, although filled in his endeavor to save Jerusalem from the Chaldeans, received the fugitives of Judah, who, like the fugitives of Israel at the capture of Samaria, took refuge in Egypt. It is probable that during the earlier part of the period of the friendly relations both parties were consulted. The Hebrew records of that time afford no distinct indication of hostility with Egypt, nor have the Egyptian lists of conquered nations and towns of the same age been found to contain any Israelitish name, whereas in Shishak's list the kingdom of Judah and some of its towns occur. The route of the earlier Pharaohs to the east seems always to have been along the Palestinian coast, then mainly held by the Phcenitins and Phenicians, both of whom they subdued, and across Syria northward of the territories occupied by the Hebrews. With respect to the African nations a different policy appears to have been pursued. The Rebu (Lebu) or Lubim, to the west of Egypt, on the north coast, were reduced to subjection, and probably employed, like the Sharytana or Cherethim, as mercenaries. Ethiopia was made a purely Egyptian province, ruled by a viceroy, the prince of all Cush (Cush), and the assimilation was so complete that Ethiopian sovereigns seem to have been received by the Egyptians as native rulers. Farther south the negroes were subject to predatory attacks like the slave-hunts of modern times, conducted not so much from motives of hostility as to obtain a supply of ivory. In the Bible we find African peoples, Lubim, Phut, Sukkilm, Cush, as mercenaries or supporters of Egypt, but not a single name that can be positively placed to the eastward of that country.

XVI. Army.—There are some notices of the Egyptian army in the O.T. They show, like the monuments, that its most important branch was the chariot-force. The Pharaoh of the Exodus led 600 chosen chariots, besides his whole chariot-force, in pursuit of the Israelites. The warriors fighting in chariots are praised as the "horse" mentioned in the relation of this event and elsewhere, for in Egypt they are called the "horse" or "cavalry." We have no subsequent indication in the Bible of the constitution of an Egyptian army until the time of the 22nd dynasty, when we find that Shishak's invading force was partly composed of tents, whether drawn by horses or asses cannot as yet be positively determined, although the monuments make it most probable that they were of the former character. The army of Necho, defeated at Carchemish, seems to have been similarly composed, although it probably contained Greek mercenaries, who soon afterwards became the most important foreign element in the Egyptian forces.

XVII. Customs, Science, and Art.—The sculptures and paintings of the tombs give us a very full insight into the domestic life of the ancient Egyptians, as may be seen in Sir G. Wilkinson's work. What most strikes us in their manners is the high position occupied by women, and the entire absence of the harem system. It is important to remark how rarely, if ever, the house." Marriage appears to have been universal, at least with the richer class; and if polygamy was tolerated it was rarely practised. Of marriage ceremonies no distinct account has been discovered, but there is evidence that something of the kind was usual in Egypt, as in the case of a priestess to whom they occasionally gave the name of Stile Egyptian, p. 53, 54). Consecration was allowed, the concubines taking the place of inferior wives. There were no castes, although great classes were very distinct, especially the priests, soldiers, artisans, and herdsmen, with laborers. A man of the upper classes, both hold a command in the army and be a priest; and therefore the caste-system cannot have strictly applied in the case of the subordinates. The general manner of life does not much illustrate that of the Israelites from its great essential of Egyptians. The Egyptians from the days of Abraham were a settled people, occupying a land which they held for centuries without question, except through the aggression of foreign invaders. The occupations of the higher class were the superintendence of their fields and gardens, their diversions, the chases, the pursuit of the pheasant, and the fishing. The tending of cattle was left to the most despised of the lower class. The Israelites, on the contrary, were from the very first a pastoral people: in time of war they lived within walls; when there was peace they "dwell in their tents" (2 Kings xii. 5). The case of feasts, and the dances, music and feasts which accompanied them for the diversion of the guests, as well as the common games, were probably introduced among the Hebrews in the most luxurious days of the kingdoms of Israel and Judah. The account of the nocturnal dinner of Joseph (Gen. xlix. 14, 31. 33) shows the influence of Egyptian festivals, and the table was sometimes covered with a cloth; and in great entertainments among the rich, each guest was furnished with a napkin. They sat on a carpet or mat upon the ground, or else on stools or chairs round the table, and did not recline at most like the Greeks and Romans. They were particularly fond of music and dancing. The most austere and scrupulous priest could not give a feast without a good band of musicians and dancers, as well as plenty of wine, costly perfumes and ointments, and a profusion of choice meats. But to the Egyptians, various persons skilled in feats of agility, were hired for the occasion, and the guests played at games of chance, at mora, and the game of latrunculi, resembling draughts. The latter was the favorite game of all ranks, and Ramessus III. is more than once represented among the players. The number of pieces for playing the game is not exactly known. They were of different colors on the opposite sides of the board, and were not flat as with us, but about an inch and a half or two inches high, and were moved like chessmen, with the thumb and finger.

The religious festivals were numerously kept and some of them were, in the days of Herodotus, kept with great merrymaking and license. His description of
EGYPT

of the goddess Bastabtes, kept at the city of Bastabtes, in the eastern part of the Delta, would well apply to some of the greatest Egyptian tombs now held in the country (ii, 59, 60). The feast which the Israelites celebrated when Aaron had made the golden calf seemed to have been very much of the same character: first offerings were presented, and then the people ate, and danced, and sang (Exod. xxxii., 5, 6, 17, 18, 19), and even, it seems, fasted themselves. This seems to have been more unusual at the popular ancient Egyptian festivals.

The funeral ceremonies were far more important than any events of the Egyptian life, as the tomb was regarded as the sanctuary of the deceased. The body of the deceased was embalmed in the form of Osiris, the judge of the dead, and conducted to the burial-place with great pomp and much display of lamentation. The mourning lasted seventy-two days or less. Both Jacob and Joseph were embalmed, and the mourning for the former lasted seventy days.

The Egyptians, for the most part, were accustomed to shave their heads; indeed, except among the soldiers, the practice was probably almost universal. They generally wore skull-caps. Otherwise they wore their own hair, or wigs falling to the shoulders in numerous styles and forms, and the costumes of the priests and pharaohs also showed their faces; kings, however, and other great personages had beards about three inches long and one inch broad, which were plaited. The crown of Upper Egypt was a short cap, with a tall point behind, which was worn over the other. The king often had the figure of an animal on it, such as the cobra just above his forehead. The common royal dress was a kilt which reached to the ankles; over it was a shirt, coming down to the knees, with wide sleeves as far as the elbows: both these were generally white, while the loincloth was sometimes worn around the neck, and on the person, armlets, bracelets, and necklaces. The upper and middle classes usually went barefoot; in other respects their dress was much the same as that of the king's, but of course inferior in costliness. The priests sometimes wore a leopard's skin, and even the shoulders, or like a shirt, with the fore legs for the sleeves. The queen had a particular head-dress, which was in the form of a vulture with expanded wings. The beak projected over the forehead, the wings fell on either side, and the tail hung down behind. She sometimes wore the ureaus or sash. The Egyptians were noted for the length of their hair, which was either curled or plaited, reaching about half way from the shoulders to the waist.

The Egyptians were a very literary people, and time has preserved to us, besides the inscriptions on their tombs and temples, many papyri of a religious or historical character, and one tale. They bear no resemblance to the books of the O.T., except such as arise from their sometimes enforcing moral truths in a manner not wholly different from that of the book of Proverbs. The moral and religious system is, however, essentially different in its principles and their application. Some have imagined a great similarity between the O.T. and Egyptian literature, and have given a show of reason to their idea by dressing up Egyptian documents in a garb of Hebrew phraseology, in which the same ideas are worded in, to wit, no one who had not prejudged the question could for a moment be deceived. We find frequent reference in the Bible to the magicians of Egypt. The Pharaoh of Joseph laid his dream before the magicians, who could not interpret it (Gen. xii, 8); the Pharaoh of the Exodus used them as opponents of Moses and Aaron, when, after what appears to have been a seeming success, they failed as before (Exod. vii, 11, 12, 22; viii, 18, 19; ix, 11; 2 Tim. iii, 8, 9). The monuments do not recognize any such art, and we must conclude that magic was secretly practised, not because it was thought to be unlawful, but in order to give it importance. See Magic; Jambres; Jannes.

In science, the Egyptian influence is discernible, and the country was distinctly traced in the Pentateuch. Moses was "learned in all the wisdom of the Egyptians" (Acts vii, 22), and probably derived from them the astronomical knowledge which was necessary for the calendar. His acquaintance with chemistry is shown in the manner of the destruction of the Red Sea (Exod. xv). The Egyptians were versed in the sciences of geometry and mechanics; the earlier books of the Bible, however, throw no light upon the degree in which Moses may have made use of this part of his knowledge. In medicine and surgery, the high proficiency of the Egyptians was probably of but little use to the Hebrews after the Exodus; anatomy, by the formers from the earliest ages, was repugnant to the feelings of Semites, and the simples of Egypt and of Palestine would be as different as the ordinary diseases of the country. In the arts of sculpture, architecture, and painting, the form of which was the chief, there seems to have been but a very slight and material influence. This was natural, for with the Egyptians architecture was a religious art, embodying in its principles their highest religious convictions, and mainly devoted to the service of religion. Durability was also an essential and prominent feature of the art, though soberly of character, they characterize their temples and tombs, the abodes of gods, and "homes" of men. To adopt such an architecture would have been to adopt the religion of Egypt, and the pastoral Israelites had no need of buildings. When they came into the Promised Land they found their art in a state of decay, and it was not until the days of Solomon that a temple took the place of the tent, which was the sanctuary of the pastoral people. Details of ornament were of course borrowed from Egypt; but, separated from the temple system, they lost all their material significance, and became harmless until modern scholars made them prominent in support of a theory which no mind capable of broad views can for a moment tolerate.

It is hardly possible to observe that the ancient Egyptians had attained to high degrees of civilization and mental culture. This is evidenced by many facts. For instance, the variation of the compass may even now be ascertained by observing the lateral direction of the pyramids, on account of their being placed so accurately north and south. This argues considerable acquaintance with the sciences of astronomy and mathematics, which they certainly possessed in a degree, and they were familiar with the duodecimal as well as the decimal scale of notation, and must therefore have made some progress in the study of mathematics. There is proof that the art of painting upon plaster and panel was practised by them more than 2000 years before Christ; and the sculptures furnish representation of inkstands that contained two colors, black and red; the latter being introduced at the beginning of a subject, and for the division of certain sentences, showing this custom to be as old as that of holding the pen behind the ear, which is often portrayed in the paintings of the tombs. Alabaster was a material much used for vases, and as ointment was generally kept in an alabaster box; the Greeks and Romans applied the name alabaster to all vases made for that purpose; and one of them found at Theben, and now in the museum at Alnwick Castle, which was perfectly preserved, though from the queen's name in the hieroglyphics it must be more than 3000 years old. In architecture they were very successful, as the magnificent temples yet remaining bear evident witness, though in ruins. The Doric order is supposed to have been derived from columns found at Beni-Hassan, and the arch is at least as old as the 16th century B.C. In medical science, we know from the evidence furnished by mummies found at Theben that the art of stopping teeth with gold, and probably cement, was known to the ancient Egyptians, and Cuvier found incursions le
proof that the fractured bone of an ibis had been set by them while the bird was alive.

Sacred music was much used in Egypt, and the sharp, lyre, flute, tambourine, cymbals, etc., were admitted in divers religious services, of which music constituted an important element. Sacred dancing was also common in religious ceremonies, as it seems to have been among the Jews (Psa. cxli, 8). Moses found the children of Israel dancing before the golden calf (Exod. xxxxi, 19), in imitation probably of rites they had witnessed in Egypt. Sacred dancing also held an important place in the occupations of the Egyptians. The women in fine drapery and the weavers of white linen are mentioned in a manner that shows they were among the chief contributors to the riches of the country (Isa. xix, 9). The fine linen of Egypt found its way to Palestine (Prov. vii, 16). That its celebrity was not without cause is proved by a piece found near Memphis, and by the paintings (comp. Gen. xii, 42; 2 Chron. i, 16, etc.). The looms of Egypt were also famed for their fine cotton and woolen fabrics, and many of these were adopted by the Babylonians, who became noted for their needle-work. Sir G. Wilkinson states that the secret of dyeing cloths of various colors by means of mordants was known to the Egyptians, as proved by the manner in which Pliny described the process, though he does not seem to have understood it. They were equally fond of variety of patterns on the walls and ceilings of their houses and tombs, and some of the oldest ceilings show that the chevron, the scroll, and the guilloche, though ascribed to the Greeks, were adopted in Egypt more than 2000 years before our era.

A gradual progress may be observed in their choice of fancy ornament. Beginning with simple imitations of real objects, as the lotus and other flowers, they adopted, by degrees, conventional representations of them, or purely imaginary devices; and it is remarkable that the oldest Greek and Etruscan vases have a similarly close imitation of the lotus and other real objects. The same patterns common on Greek vases had then been introduced on those in Egypt; whole ceilings and walls covered with these, and the vases themselves had often the same elegant forms we admire in the cixli and others afterwards made in Greece. They were of gold and silver, engraved and embossed; those made of porcelain were rich in color, and some of the former were inlaid or studded with precious stones, or enamelled in brilliant colors. Their knowledge of glass-blowing is shown by a glass bead inscribed with the name of a queen of the 18th dynasty, which proves it to be as old as 3200 years ago. Among their most beautiful achievements in this art were the colored-bottles and vases with lining wares, and their small inlaid mosaics. In these last the fineness of the work is so great that it must have required a strong magnifying power to put the parts together, especially the minute details, such as feathers, the hair, etc. "They were composed," says Sir G. Wilkinson, "of the finest or best glass (attenuated by drawing them when heated to a great length), which, having been selected according to their color, were placed upright side by side, as in an ordinary mosaic, in sufficient number to form a picture if the object intended. Others were then added until the whole had been composed; and when they had all been cemented together by a proper heat, the work was completed. Slices were then sawn off transversely, as in our Tunbridge ware, and each section presented the same picture on its upper and under side."

The more wealthy Egyptians had their large town-houses and spacious villas, in which the flower-garden and fruit-trees and vines and small ponds were to Joseph's consent features. Avenues of trees shaded the walks, and a great abundance of violets, roses, and other flowers was always to be had, even in winter, owing to the nature of their climate and the climate of their gardeners. A part also was assigned to vines and fruit-trees; the trellis-work, the vine, and the fruit-trees were so well trained, the leaves furnished standards. It is a curious fact that they were in the habit of employing monkeys, trained for the purpose, to climb the upper branches of the sycamore-trees, and to gather the figs from them. The houses generally consisted of two stories, and the second story was more than a storey high. They were often placed round an open court, in the centre of which was a fountain or small garden. Large houses had sometimes a porch with a flight of steps before the street door, over which latter was painted the name of the owner. The wealthy landed proprietors were grandees of the priestly and military classes (Mr. Birch and M. Ampère may be said to have proved the non-existence of castes, in the Indian sense, in Egypt); but those who tended cattle were looked down upon by the rest of the community. This contempt is often shown in the paintings and representations of the culture of the land, and those who dressed in the same covering of mats that were thrown over the beasts they tended. None would intermarry with swineherds. It was the custom for the men to milk, as it is still among some Arab tribes, who think it disgraceful for a woman to milk any animal.

Pottery was very numerous, and the wheel, the baking of cups, and the other processes of their art were prominent on the monuments. It is singular, as affording illustration of Scripture language, that the same idea of fashioning the clay was also applied to man's formation, and the best Psalms and Num., the creative agencies, are represented sitting at the potter's wheel turning the clay for the human creation. Pottery appears to have furnished employment to the Hebrews during the bondage (Psa. lxxx, 6; lxviii, 13; comp. Exod. i, 14). The Egyptians were familiar with the use of iron from a very remote period, and their skill in the manufacture of bronze was celebrated. They were acquainted also with the use of the forceps, the blow-pipe, the bellows, the syringe, and the siphon. Gold mines were wrought in Upper Egypt (Diod. Sic. iii, 12).

Leather was sometimes used for writing purposes, but more frequently paper made from the papyrus, which grew in the marsh-lands of the Delta. The mode of making it was by cutting the pith into thin slices lengthwise, which being laid on a table were covered with similar layers at right angles, and the two sets, being glued together and kept under pressure a proper time, formed a sheet. The dried flower-heads of the papyrus have been found in the tombs.

As illustrating Scripture, it may be mentioned that the gods are sometimes represented in the tombs holding the Tau or sign of life (ץ), which was adopted by some of the early Christians in lieu of the cross, and is mentioned by Ezek. ix, 4, 6, as the 'mark (Ταυ) set upon the eyes of the living' or on the 'face and on the head of the preserved alive. Christian inscriptions at the great oasis are headed by this symbol; it has been found on Christian monuments at Rome.

Egyptian edicts seem to have been issued in the form of a formis or written order; and from the word used by Pharaoh in general, and when according to thy word shall all people be ruled: Hebrew אַהֲרֹן, Gen. xlii, 40, alluding evidently to the
custom of kissing a female), we may infer that the people who received that order adopted the usual Eastern mode of acknowledging their obedience to the sovereign. Besides the custom of kissing the signature attached to these documents, the people were doubtless expected to "bow the knee" (Gen. xii. 43) in the presence of the monarch and chiefs of the nation, or even to prostrate themselves before them. The statues represented them thus bowing with the hand stretched out towards the knee.

The account of brick-making in Exod. v. 7-19 is illustrated in a remarkable degree by a painting in a tomb at Thebes, in which the hardness of the work, the tale of bricks, their measurement and the numbers set over foreign workmen, are vividly portrayed. The making of bricks was a monopoly of the crown, which accounts for the Jews and other captives being employed in such numbers to make bricks for the Pharaoh. See Brick.

Certain injunctions of the Mosaic law appear to be framed with particular reference to Egyptian practices, e.g. the fact of false witness being forbidden by a distinct and separate commandment, becomes the more significant when we bear in mind the number of witnesses the Egyptian law required for the execution of the most trifling contract. As many as sixteen names are appended to one for the sale of a part of certain properties, amounting only to 400 pieces of brass. It appears that bulls only, and not heifers, were killed by the Egyptians in sacrifice. Compare with this custom the Egyptian custom of commanding them to "bring a red heifer, without spot, wherein was no blemish." It was on this account that Moses proposed to go "three days' journey into the desert," lest the Egyptians should be enraged at seeing a heifer (Exod. viii. 20); and by this very opposition of a custom they were made unequivocally to denounce and separate themselves from the rites of Egypt. The Egyptian common name for Heliopolis was An, from which was derived the Hebrew On or Aon, pointed in Ezek. xxx. 17, 18, and translated by Bethsheanah (Jer. xiii. 19). So also the Pi-beseth of the same place in Ezekiel is from the Egyptian article Pi, prefixed to Baast, the name of the goddess there worshipped, and is equivalent to Bubastis, a city named after her, supposed to correspond to the Grecian Artemis. The Ta'panih of the Scripture (Jer. xxii. 8; Ezek. xxx. 18) was perhaps a place called Daphne, sixteen miles from Palmsium.

XVIII. Comparison with the Manners of the Modern Inhabitants. — The mode of life of the Egyptians has in all ages necessarily been more or less influenced by their trade, and at all times their commerce has been an important branch of industry. As far as the coast, as well as those who dwell on the marshy flat country in the Delta, have become shepherds, as their land does not admit of cultivation. The people who live along the Nile become fishermen and sailors. The cultivated part of the nation who live on the plains and over the surface of the country diligently and most successfully practise all the arts of life, and in former ages have left ever-during memorials of their proficiency and skill.

On this national diversity of pursuits, as well as on the diversity of blood—futile the mass and ruling race of Ethiopians there were anciently others who were of nomad origin—was early founded the institution of so-called castes, which Egypt had, although less marked than India, and which pervaded the entire life of the nation. These, according to Herodotus (i. 164), were seven in number (comp. Diod. Sic. i. 73). The priestly caste was the most honored and influential. It had in every large city a temple dedicated to the deity of the place, together with a high-priest, who stood next to the king and restricted his power. The priesthood possessed the finest portions of the country. They were the judges, physicians, astrologers, architects—in a word, they united in themselves all the highest culture and most distinguished offices of the land, while with them alone lay tradition, literature, and the sacred writings. This class exerted the most decided and extensive influence on the culture not only of their own country, but of the world; for during the brightest periods of Grecian history, when all knowledge in the arts and sciences was in the hands of men who have done much to form the character of after ages, such as Solon, Pythagoras, Archytas, Thales, Herodotus, Plato, and others (comp. Gen. xii, 8; Exod. vii, 11; viii, 11; xiii, 7; Josephus, Ant. ii, 9, 2).

The peculiarities of the ancient Egyptians of the lower castes, to have had their characteristics represented, at least in some particulars, by the Fellahs of the present day. These Fellahs discharge all the duties of tillage the country and gathering its rich abundance. They are a quiet, contented, and submissive race, always living, through an unjust government, on the edge of starvation, yet always happy, with no thought for the morrow, no care for, no interest in, political changes. "Of the Fellahs it may be said, as was said by Amorus of the ancient Egyptians, "they are bees always toiling, always toiling for others, not those of their own country and his Nile is an all-absorbing love. Remove him, and he perishes. He cannot live a year away from his village; his grave must be where his cradle was. But he is of all men most submissive; he will rather die than revolt; resignation is his primary virtue; it is the secret of his endurance." This latter fact is more especially true of the Egyptian, his nationology is blended into Egyptian, and they are most intense. Upon this race, the race of bright eyes and beautiful forms, it is impossible to look without deep interest: of all the gay, the gayest; of all the beings made for happiness, the most excitable. If day of peace and prosperity could be theirs, what songs, what music, what joys!" (Browne's Report, p. 7.)

The ruling class consists of Arabs intermingled with Turks, who have been in succession the conquerors of the land, and may be regarded as representing the priestly and military castes.

The only other tribe we have room to notice is that of the Copts, equally with the preceding indigenous. They are Christians by hereditary transmission, and have suffered centuries of cruel persecutions and humiliating, though now they seem to be rising in importance, and promise to fill an important page in the future history of Egypt. In character they are amiable, pacific, and intelligent, having, of course, the faults and vices of dissimulation, falsehood, and meanness, which slavery never fails to engender. In office they are the scribes, the scribes, the mathematicians, the measurers, the clergymen, in a word, the learned men of the country. The language which they use in their religious services is the ancient Egyptian, or Coptic, which, however, is translated into Arabic for the benefit of the laity (Browne's Report). See below, Egypt, Christian; and Indian.

XIX. Technical Chronology. — That the Egyptians used various periods of time, and made astronomical observations from a remote age, is equally attested by ancient writers and by their monuments. It is, however, very difficult to connect periods mentioned by the former with the indications of the same kind offered by the latter; and what we may term the recorded observations of the monuments cannot be used for the determination of chronology without a previous knowledge of Egyptian astronomy that we have not wholly attained. The testimony of ancient writers must, however, be carefully sifted, and we must not
take their statements as a positive basis without the strongest evidence of correctness. Without that testimony, however, we could not at present prosecute the inquiry. The Egyptians do not appear to have had any common era. Every document that bears the date of a year gives the year of the reigning sovereignty, commencing with the current year, and the year he came to the throne, which was called his first year. There is, therefore, no general means of testing deductions from the chronological indications of the monuments.

There appear to have been at least three years in use with the Egyptians before the Roman domination, the first called the Royal Year, the second called the Tropical Year, and the third called the Sothic Year; but it is not probable that more than two of these were employed at the same time. The Vague Year contained 365 days without any additional fraction, and therefore passed through all the seasons in about 1560 years. It was used both for civil and for religious purposes. Probably the Israelites adopted this year during the sojourn in Egypt, and that instituted at the Exodus appears to have been the current Vague Year fixed by the adoption of a method of intercalation. See Year. The Vague Year was divided into twelve months, each of thirty days, with five epagomenal, or intercalary, days, after the last month. One month was assigned to three seasons, each comprising four months, called respectively the 1st, 2d, 3d, and 4th of those seasons. The names by which the Egyptian months are commonly known, Thoth, Paophi, and Djed, refer to the divinities of the month with whom they were sacred. The seasons are called, according to our rendering, those of Vegetation, Manifestation, and the Waters, or the Inundation: the exact meaning of their names has, however, been much disputed. They evidently refer to the phenomena of a tropical year, and by the intercalation we infer that the Egyptians had, at least, in a remote period of their history.

If, as we believe, the third season represents the period of the inundation, its beginning must be dated about one month before the summer solstice, which would place the beginning of the year at the winter solstice, an especially fitting time in Egypt for the commencement of a tropical year. The Sothic Year was a supposed sidereal year of 365 1/4 days, commencing with the so-called heliacal rising of Sothis. The Vague Year, having no intercalation, constantly retreated through the Sothic Year, until a period of 1461 years of the former kind, and 1460 of the latter had elapsed from one occurrence of commencements to another.

The Egyptians are known to have used two great cycles, the Sothic Cycle and the Tropical Cycle. The former was a cycle of the coincidence of the Sothic and Tropical cycles, and the latter a cycle of the coincidence of the former kind. This cycle is mentioned by ancient writers, and two of its commencements recorded, the one, called the Era of Menophres, July 20, B.C. 1322, and the other on the same day, A.D. 139. Menophres is supposed to be the name of an Egyptian king, and this is most probable. The nearest name is Mem-phth, or Menophth, which is part of that of Sethi Memphth, a title that seems to have been in one form or another common to several of the first kings of the 12th dynasty. Chronological indications seem to be conclusive in favor of Sethi I. The Tropical Cycle is a cycle of the coincidence of the Tropical and Vague years. We do not know the exact length of the former year with the Egyptians, nor, indeed, that it was used in the monumental age; but from the mention of a period of 500 years, the third of the cycle, and the time during which the Vague Year would retrograde through one season, we cannot doubt that there was such a cycle, not to speak of its analogy with the Sothic Cycle. It has been supposed by M. Biot to have had a duration of 1565 years; but the length of 1560 Vague Years is preferable, since it contains a number of complete lunations, besides that the Egyptians could scarcely have been more exact, and that the period of 500 years is a subdivision of 1500. Ancient writers do not fix any commencements of this cycle. If the characteristics of the Tropical Years are what we suppose, the cycle would have begun B.C. 2005 and 507; two hieroglyphic inscriptions are thought to record the former of these epochs (Poole, "An Egypt. p. 12 sq., pl. I, Nos. 5, 6). The return of the Pharaoh was undoubtedly a chronological meaning. It has been supposed to refer to the period last mentioned, but Poole is of opinion that the Phoenix Cycle was of exactly the same character, and therefore length, as the Sothic, its commencement being marked by the rising of a star of the constellation BENNU HESAR, "the Phoenix of Osi- ris," which is placed in the astronomical ceiling of the Ramesium of El-Kurneh six months distant from Sothis. The monuments make mention of Panegyric Months, which can only, it is supposed, be periods of thirty years each, and divisions of a year of the same kind. Poole has computed the following as dates of commencements of these Panegyric Years, in accordance with which he has adjusted his chronology: 1st, B.C. 2717, 1st dynasty, era of Menees (not on monuments); 2d, B.C. 2355, 4th dynasty, Sophie I and II; 3rd, B.C. 1993, 5th dynasty, Menees; (monuments); the last-mentioned date being also, according to him, the beginning of a Phoenix Cycle, which he thinks comprised four of these Panegyric Years. The other important dates of the system of panegyric months occur three times which must be one of the years, in his scheme: B.C. 1462, 18th dynasty, queen Amen-em-nebt; and B.C. 1412, 18th dynasty, Thothmes III.

Certain phenomena recorded on the monuments have been calculated by M. Biot, who has obtained the following dates: Rising of Sothis in reign of Thothmes III, 18th dynasty, B.C. 1445; supposed vernal equinox, Thothmes III, B.C. circa 1441; rising of Sothis, Ramses II, 19th dynasty, B.C. 1301; star-rising, Rameses VI and IX (? Menees I and II), 20th dynasty, B.C. circa 1241. Some causes of uncertainty affect the exactness of these dates, and that of Rameses II is irreconcilable with the two of Thothmes III, unless we hold the calendar in which the inscription supposed to record it occurs to be a Sothic one, in which case no date could be obtained.

Egyptian technical chronology gives us no direct evidence in favor of the high antiquity which some assign to the beginning of the first kingdom, but the earliest record which all Egyptologists are agreed to regard as affording a date is of the fifteenth century B.C., and no one has alleged any such record to be of an earlier time than the twenty-fourth century B.C. The Egyptians accepted the year 1460 even at the beginning of the 1st dynasty in the twenty-eighth century B.C., but for determining this epoch there is no direct monumental evidence, and a comparison with Scripture does not favor quite so early a date. See CHRONOLOGY.

**XX. Historical Chronology.**—The materials for this are the monuments and the remains of the historical work of Manetho. Since the interpretation of hieroglyphics has been discovered the evidence of the monuments has been brought to bear on this subject, but as yet it has not been sufficiently full and explicit to enable us to form a definite conclusion. It is, however, the task of this chapter to state the evidence as far as it goes, and to point out the local elsewhere for a general framework, the details of which the monuments may fill up. The remains of Manetho are now generally held to supply this want. A comparison with the monuments has shown that he drew his information from original sources, the general authenticity of which is vindicated by minute points of agreement. The information Manetho gives us, in the present form of his work, is, however, by no means explicit, and it is only by a theoretical arrangement of the materials that they take a definite form. The remains of Manetho's historical work consist of a list of the Egyptian dynasties and two considerable frag-
The monuments do not justify any great extension of the period assigned in the table to the first seventeen dynasties. The last date, that of the commencement of the 18th dynasty, cannot be changed more than a few years. Some Egyptologists indeed place it much earlier (Bunsen, B.C. 1625; Böckh, 1555; Lepsius, 1684; Brugsch, 1706), but they do so in opposition to monumental evidence. The date of the beginning of the 1st dynasty, which Poole is disposed to place a little before B.C. 2700, is more doubtful, but a concurrence of ethnological evidence points to the twenty-fifth century. The interval between the two dates cannot therefore be greatly more or less than nine hundred years, and in accordance with the lengths of the dynasties according to the better text, if the arrangement here given be correct. Some have supposed a much greater antiquity for the commencement of Egyptian history (Bunsen, B.C. 3625; Lepsius, 3892; Brugsch, 4450; Böckh, 5670). Their system is based upon a passage in the astronomical work of Syncellus, which assigns a duration of 3555 years to the thirty dynasties (Chron., p. 51 n.). It is by no means certain that this number is given on the authority of Manetho, but apart from this, the whole statement is unmistakably not from the true Manetho, but from some one of the fabricators of chronology, among whom pseudo-Manetho held a prominent place (Encyc. Brit., 8th ed. passim; Egypt, p. 452; Quarterly Review, No. 210, p. 393-5). If this number be discarded as doubtful or spurious, there is nothing definite to support the extended system so confidently put forth by those who adopt it.

The importance of this ancient list of Egyptian kings—it being, in fact, the only completely connected line extant—requires a fuller exhibit than we usually give, and especially a somewhat minute examination of the monument and comparison of the names and dates with the latest archeological documents. The dates given by us are essentially those assigned by Wilkinson in Rawlinson's Herodotus, vol. ii, chap. viii. The identifications are in part made by Kenrick (Egypt under the Pharaohs, vol. ii). The names of Manetho exhibit many striking coincidences with the elementary records of the late discoveries and discoveries, especially Mariette's "Apis list" on the tablet of Sakkara, Dümichen's "Sethos list" on that of Abydos, and the "Turin papyrus," as these are given in detail by Unger (Chronologie des Mammeluk, Berlin, 1867), although we have not been able to adopt all the conclusions of this author, whose work is the most elaborate on the subject. The fact that the names in all these lists are in continuous order does not prove an unbroken succession of reigns, for such is the case in Manetho's list, although he expressly states that the several dynasties were of different localities. That the dynasties of the monumental lists likewise are not all consecutive is further proved by at least two conclusive circumstances: 1. The sum of the years of those 74 reigns, to which an explicit length is assigned in the Turin roll, is 1060; now if to this we add a corresponding number for the other 160 reigns whose duration is not specified in the same document, and also for the 10 subsequent names in the parallel lists down to Seth I (B.C. 1392), we obtain a total of 3464 years for the first eighteen dynasties, or a date for Menes of B.C. 4806; but this would be 2144 years before the Flood, even according to the latest reconstrual of the Biblical text. See Ages of the World.

Conquest of Egypt by Alexander the Great.

XXII. History.—I. Traditory Period.—We have first to notice the indications in the Bible which relate to the earliest period. In Gen. x we find the colonization of Egypt traced up to the immediate children of Noah, for it is there stated that Miriam was the second son of Ham, who was himself the second son of Noah. That Egypt was colonized by the descendants of Noah in a very remote age is further shown by the mention of the migration of the Philistines from Caphtor, which had taken place before the arrival of Abraham in Palestine (Gen. x. 14; compare Deut. i. 28; Amos ii. 9). Before this migration, the people of the Carthaginians and other Philistines have occupied Egypt for some time. Immediately after these genealogical statements, the sacred narrative (Gen. xii.) informs us that the patriarch Abraham, pressed by famine, went down (B.C. 2067) into Egypt, where it appears he found a monarch, a court, princes, and servants, and where he found also those supplies of food which the well-known fertility of the country had led him to seek there; for it is expressly stated that the favor which his wife had won in the reigning Pharaoh’s eyes procured him sheep and oxen, as well as horses, and men-servants, and maid-servants, and she-asses, and camels. A remarkable passage points to the knowledge of a date at which an ancient city of Egypt was founded: “Hebron was built seven years before Zoan in Egypt” (Num. xiii. 22). We find that Hebron was originally called Kirjath-sepher, and was a city of the Amakim (Josh. xiv. 15), and it is mentioned under that appellation in the history of Abraham (Gen. xxiii. 2): it has therefore been founded by the giant race before the days of patriarchal. In Gen. xxii, 9, mention is made in the case of Ishmael, the son of Hagar the Egyptian, whose mother took him a wife out of the land of Egypt (B.C. cir. 2065), of a mixed race between the Egyptians and the Chaldeans, a race which in after times became a great nation. From this mixture of races it has been supposed the Arabs (אַרְעָבָא, “mixed people”) had their name (Sharpe’s Early Hist. of Egypt, i. 11).

The evidence of the Egyptians as to the primeval history of their race and country is extremely indefinite. They seem to have separated mankind into two great stocks, and each of these again into two branches, for they appear to have represented themselves and the negroes as the red and black races, as the children of the god Horus, and the Semites and Europeans, the yellow and white races, as the children of the goddess Pesht (comp. Brugsch, Geogr. Juschr. ii. 90, 91). They seem, therefore, to have held a double origin of the species. The absence of any important traditional period is very remarkable in the fragments of Egyptian history. These commence with the divine dynasties, and pass abruptly to the human dynasties. The latest portion of the first may indeed be traditional, not mythical, and the earliest part of the second may be traditional and not historical, though this last conjecture we are hardly disposed to admit. In any case, however, there is a very short and extremely obscure time of tradition, and at no great distance from the earliest date at which it can be held to end we come upon the clear light of history in the days of the pyramid-midas.

There is no trace of the tradition of the Deluge which is found in almost every other country of the world. The
priests are indeed reported to have told Solon, when he spoke of one deluge, that many had occurred (Plat. Tim. 23), but the reference is more likely to have been to great floods of the Nile than to any extraordinary cataclysm. 2. Uncertain Period.—The history of the dynasties preceding the 18th is not told by any continuous series of monuments. Except the bare lists indicated in the above table, there are scarcely any records of the age left to the present day, and thence in a great measure arises the difficulty of determining the chronology of the period. From the time of Menes, the first king, until the Shepherd invasion, Egypt seems to have enjoyed perfect tranquillity. During this age the Memphite line was the most powerful, and by it, under the 4th dynasty, were the most famous pyramids raised. The Shepherds were Egyptians, who came from the east, and, in some manner unknown to Manetho, gained the rule of Egypt. Those whose kings composed the 15th dynasty were the first and most important. They appear to have been Phenicians, and it is probable that their migration into Egypt, and thence at last into Syria, was permitted whilst the menace to which the coming of the Phenicians from the Erythrean Sea, and the Philistines from Caphtor, belonged. It is not impossible that the war of the four kings—Chedorlaomer and his allies—was directed against the power of the kingship of the 15th dynasty. Most probably the Pharaoh of Abraham was of this line, which lived at Memphis, and at the great fort or camp of Avaris on the eastern frontier. The period of Egyptian history to which the Shepherd invasion should be assigned is a point of dispute. It is generally placed after the 12th dynasty, for it is argued that this powereful line could not have reigned at the same time as one or more Shepherd dynasties. Poole is of the opinion that this objection is not valid, and that the Shepherd invasion was anterior to the 12th dynasty. It is not certain that the foreigners were at the outset hostile; on the contrary, for they may have come in by marriage, and it is by no means unlikely that they may have long been in a position of secondary importance. The rule of the 12th dynasty, which was of the Thebans, lasting about 160 years, was a period of prosperity to Egypt, but after its close those calamities appeared to be threatened whilst the Pharaohs which succeeded the Phenicians were hated by the Egyptians. During the interval to the 18th dynasty there seems to have been no native line of any importance but that of the Thebans, and more than one Shepherd dynasty exercised a severe rule over the Egyptians. The paucity of the monuments proves the troubled nature of this period. See IV. rasos. Of these first seventeen dynasties, Menes, the first mortal king of Egypt, according to Manetho, Herodotus, Erastosthenes, and Diodorus, and preceded, according to the first, by gods, heroes, and Menes (?), winder, is accepted on all hands as a historical personage. His hieroglyphic name reads MEN or MENA, and is the first on the list of the Ramessseum of el-Kurneh. It is also met with in the hiearic of the Turin Papyrus of Kings. Strong reasons are given by Mr. Stuart Poole for the Restoration of the accession of Herodotus (p. 94–98); but even this date must be somewhat lowered, as it would precede that of the Flood (B.C. 2515); on the other hand, Unger (ut sup.) raises it to June 27, B.C. 6513. As one step in Poole's argument involves a very ingenious elucidation of a word. With Mr. Poole the Deluge of B.C. 5672 cannot be borne to mention. Herodotus says that, in the interval from the first king to Sothem, the priest of Hephastus, the priests told him that "the sun had four times moved from his wonted course, twice rising where he now sets, and twice setting where he now rises." It is evident, on this that the priests told Herodotus that great periods had elapsed since the time of Menes, the first king, and that, in the interval from his reign to that of Sothem, the solar risings of stars—that is to say, their manifestations—had twice fallen on those days of the Vague Year on which their settings fell in their time, and vice versa; and that, if the historian, by a natural mistake, supposed they spoke of the sun itself." Menes appears to have been a Thinite king, of the city of This, near Abydos, in Upper Egypt. Herodotus ascribes the building of the city of Memphis to him, while Manetho says that he made a foreign expedition and acquired the power, and that he was killed by a hippopotamus. Menes, after a long reign, was succeeded by his son Athothis, who was the second king of the first dynasty. Manetho says that he built the palace at Memphis, that he was a physi- cian, and left anatomical books; all of these statements implying that an age of science and learning the Egyptians were in a high state of civilization. About the time of Athothis, the 3d dynasty is supposed, according to the scheme which seems most reasonable, to have commenced, and Memphis to have become independent, giving its name to five dynasties of kings. The 5th, 6th, and 7th. The last Thinite dynasty probably lasted about two centuries and a half. Of the 2d very little has reached us; under one of the kings it was determined that women could hold the sovereign power; in the time of another it was for some time uncertain to whom the throne belonged. By the space of eleven days. The duration of this dynasty was probably between 300 and 400 years, and it seems to have come to a close at the time of the Shepherd invasion. The 3d (Memphite) dynasty, after having lasted about 200 years, was succeeded by the 4th, one of the most famous of the lines which ruled in Egypt; while the 5th dynasty of Elephanthine kings arose at the same time. This was emphatically the period of the pyramids, the earliest of which was probably the northern pyramid of Abu-Sir, supposed to be the tomb of Soris or Shur-ru, the successor of the 5th dynasty. But, the pyramid built by two kings of the name of Sphex, the first of whom, the Cheops of Herodotus, the Shpshn of the monuments, was probably the builder of the great pyramid. On these wonderful monuments we find traces at that remote period of the advanced state of civilization of later times. The stones, or the stones and the stones by the masons proves that writing had been long in common use. Many of the blocks brought from Syene are built together in the pyramids of Gih- zeh in a manner unrivalled at any period. The same manners and customs are portrayed on them as on the later monuments. The same boats and the same costume of the priests, the same trades, such as glass-making and cabinet-making. At the beginning of the 4th dynasty, moreover, the peninsula of Sinai was in the possession of the Egyptians, and its copper mines were worked by them. The duration of this dynasty probably exceeded two centuries, and it was followed by the 6th. The 6th dynasty of Elephantinite, as just remarked, began the same time as the 4th. The names of several of its kings occur in the Necropolis of Memphis. The most important of them is Se- phres, the Shphrea of the Monuments. The story of Herodotus, and Chephren of Diodorus. This dynasty lasted nearly 600 years. Of the 6th dynasty, which lasted about 150 years, the two most famous sovereigns are Piopi or Pepi and queen Nitocris. The former is said to have ruled for a hundred years. His name is written in the Monuments. With Pepi, all known records of Egyptian history break. Lower Egypt was invaded by the Shepherds, who entered the country from the north-east, about 700 years after Menes, and eventually drove the Memphites from the throne. Of the 7th and 8th dynasties nothing is known with certainty; they probably followed one another. Poole assigns a duration of 70 years, and 150 years to the latter. The 9th dynasty of Heracleopolitans, or,
more properly, of Hermonithes, as Sir G. Wilkinson has shown; the seat of power was in the 6th of the 10th and 12th dynasties, which together may have lasted nearly 600 years, ending at the time of the great Shepherd war of expulsion, which resulted in the overthrow of all the royal lines except the Diospolite or Tell-el-Amarna, which was destroyed by the 12th, 13th, 14th, and 17th dynasties, and which lasted about 130 years. The 12th dynasty, which lasted some 400 years, probably began before the close of the 12th. The kings of this dynasty were of little power, and probably tributary to the Shepherds. The Diospolites, indeed, did not recover their prosperity till the end of the 12th dynasty. With the 16th, 17th, and 18th dynas- ries, the Shepherds began to have a powerful influence in the land. The 18th dynasty, as we have seen, was the period of the Hyksos, who were the first to have subdued Egypt without a battle. The question of great uncertainty. Their name is called Hyksos by the Egyptians, who are variously interpreted to mean shepherd kings, or foreign shep- herds. They have been pronounced to have been As- syrians, Scythians, Ethiopians, Phoenicians, and Ar- abs. The kings of the 18th dynasty were the greatest of the foreign rulers. The kings of the 16th and 17th dynasties are very obscure. Mr. Poole says there are strong reasons for supposing that the kings of the 16th and 17th dynasties were god-kings, and that they may have been Assyrians. Having held possession of Egypt 511, or, according to the longest date, 652 years, the Shepherds were driven out by Amon, or Amosis, the first king of the 18th dynasty; and the whole country was then united under one king, who rightly claimed the title of Lord of the Two regions, or of Upper and Lower Egypt.

3. Period of the Hebrew Sojourn.—In Gen. xxxix begins the interesting story of Joseph's being carried down to Egypt, with all its important consequences for the great-grandchildren of Abraham. The produc- tiveness of the country is the alluring incentive to the impulse. Attendant circumstances show that Egypt was then famous also for its commercial pursuits; and the entire narrative gives the idea of a complex sys- tem of society (about B.C. 1890), and a well-constituted and developed form of government. The Shepherds, the leaders of the northern and western courts at later periods of history, elevated to high offices was marked and sudden. The slave Joseph is taken from prison and from impending death, and raised to the dignity of prime vizier, and is intrusted with making provision for an approaching dearth of food, which he had himself foreseen, during which he effects a favor of the ruling sovereign one of the greatest revolutions of property which history has re- corded. The high consideration in which the priestly order was held is apparent. Joseph himself marries a daughter of the priest of On. Out of respect towards, as well as by the direct influence of Joseph, the He- brews were well treated. The scriptural record, how- ever, distinctly states, xlvi, 21, 25, before the Exod of Israel and his sons "every shepherd was an abomination unto the Egyptians." The Heb- brews, whose trade had been about cattle, must have been odious in the eyes of the Egyptians, yet they are expressly permitted to dwell "in the best of the land" (Gen. xlv, 4), which is beside the land of Goshen, the place which the Israelites had prayed might be assigned to them, and which they obviously desired on account of the adaptation of its soil to their way of life as herdsmen. Having settled his father and family satisfactorily in the land, Joseph proceeded to supply the wants of his famine-stricken country at the same time converted the tenure of all property from freehold into tenancy-at-will, with a rent-charge of one fifth of the produce, leaving the priests' lands, however, in their own hands; and thus he gave an- other evidence of the greatness of his character.

The richness of Goshen was favorable, and the Is- raelites grew and multiplied exceeding, so that the land was filled with them. But Joseph was now dead; time had passed on, and there rose up a new king (probably one of a new dynasty) "which knew not Joseph." (Exod. i. 8) The law of Moses had not been heeded, and, if it be, in the service of his people; who, becoming jealous of the increase of the Hebrews, set about persecuting them with the avowed intention of diminishing their numbers and crippling their power. Severe task-masters are therefore set over them, severe tasks are imposed on them, and the laws are compelled to build "treasure cities, Pithom and Raamses." It is found, however, that they only in- crease the more. In consequence, their burdens are doubled and their lives made bitter with hard bondage (Exod. i. 14), in mortar and in brick, and in all manner of service in the field. See Br-Am. The firstborn males, moreover, are doomed to destruction the moment they come into being. The deepest heart- burnings ensue; hatred arises between the oppressor and the oppressed; the Israelites seek revenge in pri- vate and by stealth (Exod. ii. 19). At last a higher power interferes, and the afflicted race is permitted to quit Egypt (B.C. 1658). At this time Egypt appears to have been a well-peopled and well-cultivated country, with numerous cities, under a despotic monarch, surrounded by officers of his court and a life-guard. There was an army at some time, and officers of ranks, a state-prison, and a prime minister. Great buildings were carried on. There was set apart from the rest of the people an order of priests who probably filled offices in the civil government; the priest of Midian and the priest of On seem to have ruled over the people of these cities so named. There was in the general class of priests an order—wise men, sorcerers, and magi- cians—who had charge of a certain secret knowledge; there were physicians or embalmers of the dead; the royal army contained chosen captains, and horsemen, and chariots. The attention which the people at large paid to agriculture, and the fixed notions of property which they in consequence had, made them hold the shepherd or nomad tribes in abhorrence, as freeboot- ers only less dangerous than hunting-tribes. See PHARAOH.

According to the scheme of Biblical chronology, which we have adopted as the most probable, the whole sojourn in Egypt would belong to the period be- fore the 18th dynasty. The Israelites would have come in and gone forth during that obscure age, for the history of which we have little or no monumental evi- dence. This would explain the absence of any posi- tive mention of them on the Egyptian monuments. Some assert that they were an unimportant Arab tribe, and therefore would not be mentioned, and that the calamities attending their departure could not be com- memorated. These two propositions are contradictory, and the difficulties are unsolved. If, as Lepsius sup-
poses, the Israelites came in under the 18th dynasty, and went out under the 19th, or if, as Bunsen holds, they came in under the 12th, and (after a sojourn of 1454 years!) went out under the 19th, the oppression in both cases falling in a period of which we have abundant contemporary monuments, sometimes the record of every year. It is impossible that the movements should be wholly silent if the Biblical narrative is true. Let us examine the details of that narrative. At the time to which we should assign Joseph's rule, Egypt was under Shepherds, and Egyptian kings of no great strength. Since the Pharaoh of Joseph must have been a powerful ruler and held Lower Egypt, there can be no question that he was, if the dates be correct, a Shepherd of the 15th dynasty. How does the Biblical evidence affect this inference? Nothing is more striking throughout the ancient Egyptian inscriptions and writings than the fact that the Pharaohs, especially Egyptians, were constantly spoken of in the same terms as the inhabitants of the inferior regions, not alone when at war with the Pharaohs, but in time of peace and in the case of friendly nations. It is a feeling paralleled in our days by that of the Greeks towards the Chinese. The scope of this work, the whole history of the later period, abundantly confirm this estimate of the prejudice of the Egyptians against foreigners. It seems to us perfectly incredible that Joseph should be the minister of an Egyptian king, a Shepherd of Lower Egypt, and that the evidence is not less strong. The Pharaoh of Joseph is a despot, whose will is law, who kills and pardons at his pleasure; who not only raises a foreign slave to the head of his administration, but through his means makes all the Egyptians, except the priests, serfs of the crown. The Egyptian kings, on the contrary, were restrained by the laws, shared the public dislike of foreigners, and would have avoided the very policy Joseph followed, which would have weakened the attachment of their fellow-countrymen by the loosening of local ties and complete reducing to bondage of the population, although it would have greatly strengthened the power of an alien sovereign. Pharaoh's conduct towards Joseph's family points to the same conclusion. He gladly invites the strangers, and gives them leave to dwell, not among the Egyptians, but in Goshen, where his own castle seems to have been (Gen. xlix. 14, xlvi. 6). His acts indicate a fellow-feeling, and a desire to strengthen himself against the national party. See Joseph. The "new king," "which knew not Joseph," is generally thought by those who hold with us to the present date of the story, to have been an answering echo of the 18th dynasty. It seems at first sight extremely probable that the king who crushed, if he did not expel the Shepherds, would be the first oppressor of the nation which they protected. Plausible as this theory appears, a close examination of the Biblical narrative seems to us to overthrow it. We read of the new king that—"he said unto his people, Behold, the people of the children of Israel [are] more and mightier than we: come on, let us deal wisely with them, lest they multiply, and it come to pass, when there falleth out any war, that they join also unto our enemies, and fight against us, and so get them up out of the land" (Exod. i. 9, 10). The Israelites are therefore more and stronger than the people of the oppressor; the oppressor fears war in Egypt, and that the Israelites would join his enemies; he is not able at once to adopt open violence against them. In order that the population may be reduced by them as making them perform forced labor, and soon after takes the stronger measure of killing their male children. These conditions point to a divided country and a weak kingdom, and cannot, we think, apply to the time of the 18th and 19th dynasties. The whole narrative of subsequent events to the departure is consistent with this conclusion, to which the use of universal terms does not offer any real objection.

When all Egypt is spoken of, it is not necessary either in Hebrew or in Egyptian that we should suppose the entire country to be strictly intended. If we conclude, therefore, that the Exodus most probably occurred before the 18th dynasty, we have to ascertain, if possible, whether the Pharaohs of the oppression appear to have been the Egyptians or the Shepherds. The change of policy is in favor of their having been Egyptians, but is by no means conclusive, for there is no reason that all the foreigners should have had the same feeling towards the Israelites, and we have already ready an example of the effect of Egyptian foreigners in general in having been friendly to them throughout their history, and that the Egyptians were privileged by law, apparently on this account. It may be questioned whether the friendship of the two nations, even if merely a matter of policy, would have been maintained if it had been left to the Egyptians to look back on their conduct towards the Israelites as productive of great national calamities, or had the Israelites looked back upon the persecution as the work of the Egyptians. If the chronology be correct, we can only decide in favor of the Shepherds. During the whole period to which the story refers, there were no important lines but the Theban, and one or more of Shepherds. Lower Egypt, and especially its eastern part, must have been in the hands of the latter. The land of Goshen was in the eastern part of Lower Egypt, and was not, like the land of Shepherds, oppressed, whose capital or royal residence, at least in the case of the Pharaoh of the Exodus, lay very near to it. Manetho, according to the transcript of Africanus, speaks of three Shepherd dynasties, the 16th, 16th, and 17th, the last of which, according to the present text, was of Shepherds and Pharaohs, but this is probably incorrect, and the dynasty should rather be considered as of Shepherds alone. It is difficult to choose between these three: a passage in Isaiah, however, which has been strangely overlooked, seems to afford an indication which narrows the choice. "My people were brought into Egypt, to sojourn there, and the Assyrian oppressed them without cause" (Isa. xi. 19). This indicates that the oppressor was an Assyrian, and therefore not of the 16th dynasty, which, according to Manetho, in the epistles, was of Phoenicians, and opposed to the Assyrians (Josephus, Ant. i. 14). Among the names of kings of this period in the royal Turin papyrus (ed. Wilkinson) are two which appear to be Assyrian, so that we may reasonably suppose that some of the foreign rulers were of that race. Their exact date, however, is undetermined. It cannot be earlier than 1220 B.C. It cannot be later than 1000 B.C. It was only after the invasion of Egypt by Sais that the title Pharaoh was applied to the kings connected with the Israelites, and that they must therefore have been natives, for it is almost certain that at least some of the Shepherd kings were Egyptianized, like Joseph, who received an Egyptian name, and Moses, who was supposed by the daughters of Jethro to be an Egyptian (Exod. ii. 19). It has been urged by the opponents of the chronological schemes that place the Exodus before the later part of the fourteenth century B.C., that the conquests of the Pharaohs of the 18th, 19th, and 20th dynasties would have involved collisions with the Israelites that they were in those times already established in Palestine, whereas neither the Bible nor the monuments of Egypt indicate any such event. It has been overlooked by the advocates of the Rabbinical date of the Exodus evidence whether the Biblical evidence whether the Exodus occurred in the country or not. Shishak's list, on the contrary, presents several well-known names of towns in Palestine, be-
Egypt.

side that of the kingdom of Judah. The policy of the Pharaohs, as previously explained, is the key to their conduct towards the Israelites. At the same time, the character of the portions of the Bible relating to this period prevents our being sure that the Egyptians may not have passed through the country, and even entered into it, at a time later than that of the whole question under consideration that, in the most flourishing days of the sole kingdom of Israel, a Pharaoh should have marched unopposed into Palestine and captured the Canaanitic city Gezer, at no great distance from Jerusalem, and that this should be merely, as it is generally considered, as at a later time instead of being noticed in the regular course of the narrative (1 Kings ix. 15, 16). See EZEK.

4. Definite Period.—With the 18th dynasty, about B.C. 1520, a new and clearer epoch of Egyptian history begins, both as regards the numerous materials for reconstructing it, and also its great importance. In fact, the history of the 18th, 19th, and 20th dynasties is that of the Egyptian empire. Amosis, or Ahmose, the head of the first of these, overthrew the power of the Shepherd, and probably expelled them. No great monuments remain of the first king, but various edicts, containing districts, testify that he was a powerful king. During his reign we first find mention of the horse, and, as it is often called by the Semitic name azia, seems probable that it was introduced from Asia, and possibly by the Shepherds themselves. As they were without horses, the strength of their cavalry for their easy conquest of Egypt. It is certain that, while other animals are frequently depicted on the monuments, neither in the tombs near the pyramids, nor at Beni-Hasan, is there any appearance of the horse, and yet, subsequently, Egypt became the greatest and most prosperous of all the animal, inasmuch that in the time of Solomon they were regularly imported for him, and for “all the kings of the Hittites, and for the kings of Syria;” and when Israel was invaded by Sennacherib, it was on Egypt that they were said to put their trust for chariots and horses. Amenophis I., the next king (B.C. cir. 1498), was sufficiently powerful to make conquests in Ethiopia and in Asia. In his time we find that the Egyptians had adopted the five intercalary days, as well as the twelve hours of day and night. The arches of approaching stones also are found at Thebes, bearing his name on the bricks, and were in common use in his time. See ARCH. Some of the more ancient chambers in the temple of Amen-ra, or El-Karnak, at Thebes, were built by him. In the reign of his successor, Thothmes I. (B.C. cir. 1480), he is said to have discovered the land of Azania, or the land of “Naharayn;” by some Naharayn is identified with the Nairi, a people south-west of Armenia. Libya also was subject to his sway. A monument of his reign is still remaining in one of the two obelisks of red granite which he set up at El-Karnak, or Thebes. The name of Thothmes II. (B.C. cir. 1470) is found as far south as Napata, or Gebel Berkel, in Ethiopia. With him and his successor was associated a queen, Amose or Amen-numt, who seems to have received more honor than either. She is thought to have been a Semiramis, that name, like Sosoteis, probably means great goddess. She was apparently the only Amem-nent and Thothmes II and III are the earliest sovereigns of whom great monuments remain in the temple of El-Karnak, the chief sanctuary of Thebes. Thothmes III (B.C. cir. 1465) was one of the most remarkable of the Pharaohs. He married into a family as far as Niseveh, and reduced perhaps Bablyon also to his sway, receiving a large tribute from Asiatic nations over whom he had triumphed. This was a common mode of acknowledging the supremacy of a conqueror, and by no means implied that the territory was surrendered to him; on the contrary, he may only have defeated the army of the nation, and that beyond its own frontier. The Pun, a people of Arabia, the Shepseda, supposed to be of Cyprus, and the Raeten, a people of the Euphrates or Tigris, thus confessed the power of Thothmes; and the monuments at Thebes are rich in delineations of the elephants and bears, camelopards and asses, the eagle, ivory, gold, and silver, in which the Pharaohs of the Memphite period of Egyptian art, all the earlier time showing a gradual improvement, and all the later a gradual declension. In the reign of Thothmes IV. (B.C. cir. 1410), according to Manetho, the Shepherds took their final departure. The conquests of Amenophis III. (B.C. cir. 1400) were very extensive; traces of his power are found in various parts of Ethiopia; he states on scarabai, struck apparently to commemorate his marriage, that his northern boundary was in Mesopotamia, his southern in Kara (Cholod?). From his features, he seems to have been partly Ethiopian origin. His long reign of nearly forty years was marred by the construction of magnificent temples. Of these, the greatest were two at Thebes; one on the west bank, of which little remains but the two great colossal that stood on each side of the approach to it, and one on the east side of which is the vast temple of Amon. Also built, on the opposite bank, the great temple, now called that of El-Ukase, which Ramesses I. afterwards much enlarged. The tomb of this king yet remains at Thebes. For a period of about thirty years after the reign of Amenophis III, Egypt was disturbed by the rule of a strange people, who abandoned their old religion, and introduced a pure sun-worship. It is not known whence they came, but they were regarded by the Egyptians as usurpers, and the monuments of them are defaced or ruined by those who overthrew them. Sir G. Wilkinson supposes that Amenophis III. may have belonged to their race; but, if so, we must date the commencement of their rule from the end of his reign, as then began that change of the state religion which was the great peculiarity of the foreign domination. How or when the sun-worshippers were destroyed or expelled from Egypt does not appear. Horus, or Harem-heb, was thegod them (B.C. cir. 1367), was probably the prince by whom they were overthrown. He was a son of Amenophis III, and continued the line of Deltaic sovereigns. The records of his reign are not important; but the sculptures at a subsequent time at Sielilli commemorating his conduct towards the negroes. Horus was indirectly succeeded by Ramesses I., with whom substantially commences the 19th dynasty, about B.C. 1324. His tomb at Thebes marks the new dynasty, by being in a different locality from that of Amenophis III, and being the first in the valley the necropolis set apart as the necropolis of the Theban kings. After a short and unimportant reign, he was succeeded by his son Sethi I., or Sethos (B.C. 1322). He is known by the magnificent hypostyle hall in the great temple of El-Karnak, which he built, and on the outside of the north wall of which are sculptured the achievements of his reign. He was friendly to travellers, is the most beautiful in the Valley of the Kings, and shows that his reign must have been a long one, as the sepulchre of an Egyptian king was commenced about the time of his accession, and thus indicates the length of his reign. He conquered the Keta, or Hittites, and took their stronghold Ketesh, variously held to be at or near Emesa, on or near the Orontes, or Kadesh, or even Ashsharot. His son Ramesses II., who was probably for some time associated with him in the throne, became the most illustrious of the ancient kings of Egypt (B.C. cir. 1300). If he did not exceed all others in foreign conquests, he
Egypt. Chief campaign, as recorded on his numerous monuments, was against the Akhet or Hittites, and a great confederacy they had formed. He defeated them at Kadesh, and made them to conclude a treaty with him, though this last object does not seem to have been immediately attained. It is he who is generally intended by the Sensoatri of classic writers. He built the temple which is erroneously called the Memnonium, but properly the Ramesseum of El-Amarna, the largest in Egypt, theaci of the most beautiful of Egyptian monuments, and a great part of that of E1-Usofr, on the opposite bank, as well as additions to that of E1-Karnak. Through-out Egypt and Nubia are similar memorials of the power of Rameses II, one of the most beautiful temples of Ahum-Simbel, not far north of the second cataract. The temple of Ptah, at Memphis, was also adorned by this Pharaoh, and its site is chiefly marked by a very beautiful colossal statue of him, fallen on its face and partly mutilated through time. Under him the power of Egypt evidently declined, and towards the close of the dynasty the country seems to have fallen into anarchy, the high priests of Amen having usurped regal power at Thebes, and a Lower Egyptian dynasty, the 21st, arisen at Tanis. Of these, however, but few records remain. With the succession to this dynasty occurred the first defection of Nubia, or the Sceptre of the Nile, being divided against the Pharaoh. The last king of this dynasty was Tirhakah, or Tekh- rak (B.C. 690), who, probably while yet ruling over Ethiopia or Upper Egypt only, advanced against Sennacherib to protect Hezekiah, king of Judah, B.C. 718. It does not appear whether he met the Assyrian army, but it seems certain that its miraculous destruction occurred before any engagement had been fought between the rival forces. Perhaps Tirhakah availed himself of this opportunity to restore the supremacy of Egypt west of the Euphrates. See TirHAKA.

Egypt. Sculptured remains of the temples of Busbata; they were probably not of unmixed Egyptian origin, and may have been partly of Assyrian or Babylonian race. The 1st king was Sheshonk I (B.C. cir. 990), the contemporary of Solomon, and in his reign it was that "Jerobeam begat Abijah, and Abijah begat Rehoboam." He conquered, as king of Egypt, and was in Egypt until the death of Solomon" (I Kings xi, 40), B.C. 973. In the 5th year of Rehoboam, B.C. 969, Sheshonk invaded Judah with an army of which it is said "the people were without number that came with him out of Egypt, the Lubims, and the Emims which were in the eastern parts of the Libyans, and the Hittites, one of the most beautiful of Egyptian monuments, and a great part of that of El-Usofr, on the opposite bank, as well as additions to that of E1-Karnak. Through-out Egypt and Nubia are similar memorials of the power of Rameses II, one of the most beautiful temples of Ahum-Simbel, not far north of the second cataract. Perhaps Tirhakah availed himself of this opportunity to restore the supremacy of Egypt west of the Euphrates. See TirHAKA.
Egypt was governed by a Persian satrap till Persia itself was conquered by Alexander the Great, B.C. 332. When Alexander's army occupied Memphis, the numerous Greeks who had settled in Lower Egypt at this time found themselves ruled by a Greek king. Egypt had been once a Greek kingdom, and Alexander showed his wisdom in the regulations by which he guarded the prejudices and religion of the Egyptians, who were henceforth to be treated as inferior, and forbidden to enter the Holy City of Jerusalem. He founded Alexandria, the capital. On his death, his lieutenant Ptolemy made himself king of Egypt, being the first of a race of monarchs who governed for 300 years, and made it the second chief kingdom in the world, till it sunk under its own luxuries and vices and the rising power of Rome. The Ptolemies founded a large public library and a museum of learned men. See ALEXANDRIA.

After the time of the exile the Egyptian Ptolemies were for a long while (from B.C. 801 to about 180) masters of Palestine, and during this period Egypt became as of old the place of refuge for those who had suffered persecution, and many favors and privileges were conceded. This shelter seems not to have been for ages withdrawn (Matt. ii, 13). Yet it cannot be said that the Jews were held in esteem by the Egyptians (Philo, c. Apion, i, p. 521).

Indeed, it was from an Egyptian, Manetho (B.C. 3000), that the most defamatory misrepresentations of Jewish history were given to the world; and, in the days of Augustus, Charonem took special pains to make the Jewish people appear despicable (Josephus, Apion, i, 32; comp. Creuzer, Com. Herod. i, 270). See PTOLEMY.

In the reign of Ptolemy Philometor, Onias, whose father, the third high-priest of that name, had been murdered, fled into Egypt, and rose into high favor with the king and Cleopatra his queen. The high-priesthood of the Temple of Jerusalem, which belonged of right to his family, having passed from it to the family of the Hasmoneans, he now protested against to this office (B.C. 158), Onias used his influence with the court to procure the establishment of a temple and ritual in Egypt which should detach the Jews who lived there from their connection with the Temple at Jerusalem. The king complied with the request. To recover the Egyptian Jews to a second temple, Onias alleged Isa. xix. 18, 19. He chose for the purpose a ruined temple of Babastis, at Leontopolis, in the Heliopolitan nome, one hundred and fifty stadia from Memphis, which place he converted into a sort of miniature Jerusalem (Josephus, War ii, 1, 5), erecting an altar in imitation of that in the Temple, and
constituting himself high-priest. The king granted a tract of land around the temple for the maintenance of the worship, and it remained in existence till destroyed by Vespasian (Josephus, Ant. xiii, 3; xx, 9; War, vii, 11). The district in which this temple stood appears to have been, after Alexandria, the chief seat of the Jews in Egypt and that of the headquarters of the church, was called Oisou w5pa (Josephus, Ant. xiv, 8; Helon's Pilgrin. p. 328). See Omas, City of.

Under these Alexandria kings the native Egyptians still continued building their grand and massive temples, nearly in the style of those built by the kings of the New Empire. The temple of Phile, in the Great Oasis, at Latopolis, at Ombos, at Dendera, and at Thebes, prove that the Ptolemies had not wholly crushed the zeal and energy of the Egyptians. An Egyptian phalanx had been formed, armed, and disciplined like the Greeks. These soldiers rebelled unsuccessfully against Ephiphanes, and then Thebes rebelled against Soter II, but was so crushed that it never again held rank among cities. But while the Alexandrians were keeping down the Egyptians, they were themselves sinking under the Romans. Ephiphanes asked for Roman help; his two sons appealed to the senate to settle their quarrels and guard the kingdom from Syrian invasion. Alexander II was placed on the throne by the Romans, and Aurelius took to Rome to ask for help against his subjects. Lastly, the beautiful Cleopatra, the disgrace of her countrymen, was made a symbol of the weakness that had destroyed her power by surrendering her person, first to Julius Caesar, and then to Mark Antony. On the defeat of Mark Antony by Augustus, B.C. 30, Egypt became a province of Rome, and was governed by the emperors with jealous suspicion. It was still a Greek state, and the Ptolemaic dynasty, the chief seat of learning and science. Its library, which had been burned by Caesar's soldiers, had been replaced by that from Pergamus. The Egyptians yet continued building temples and covering them with hieroglyphics as of old; but on the spread of Christianity: 'I old superstitions lost their sway, the animals were no longer worshiped, and we find few hieroglyphic inscriptions after the reign of Commodus. On the division of the Roman empire, A.D. 387, Egypt fell to the lot of Constantineople. See Smith's Dict. of Class. Geogr., s. v. Egypt.

Ever since its first occupancy by the Romans Egypt has ceased to be an independent state, and its history is incorporated with that of its different conquerors and possessors. In A.D. 618 it fell under the power of the Persians, but in 649 it was transferred to the Sassanid Persians, and in 649 the name of Omar, under whose successors it continued till about 1171, when the Turkomans expelled the caliphs; these again were in their turn expelled in 1250 by the Mamelukes. The latter raised to the throne one of their own chiefs with the title of sultan, and this new dynasty reigned over Egypt till 1517, when the Mamelukes were totally defeated, and the last of their sultans put to death by the Turkish sultan Selim. This prince established the government of Egypt in twenty-four years, whose authority he subjected to a council of regency, supported by an immense standing army. The conqueror did not, however, entirely suppress the Mameluke government, who continued to be "the power behind the throne" until their massacre in 1811, which made the pacha virtually independent of the Sublime Porte. Great and rapid changes have taken place in the affairs of Egypt since the beginning of the last fifty years. The campaign of the French army in 1800, undertaken with a view to subdue Egypt, and so secure to the French an important share of the East Indian trade, though it resulted unsuccessfully, was attended with important consequences to the interests of science and learning. Mohammed Ali, the late viceroy, though a perfect despot, did much to elevate his dominions to a rank with civilized nations in arts, commerce, and industry. The works of internal improvement which he undertook, the extensive manufactures he established, and the encouragement he gave to literary institutions, have done much to change the political, if not the moral aspect of Egypt. His successors have followed out this policy by establishing railroads and opening out canals, which, while they increase the commerce of the country, greatly facilitate communication with India by what is called the overland route—by the Mediterranean, Egypt, and the Red Sea, to Bombay. See M'Culloch's Hist. of Econ. Letters, vol. ii. 322.

For the history of Christianity in Egypt, see Egypt, Christian. XXIII. Monumental Localities.—Of the towns on the northern coast the most western is Alexandria or El-Avendos of the Shepherds. B.C. 320 had a population of 140,000. But the most remarkable remains of the place were the walls built by the Greeks, of which the most remarkable is the great wall, which was about 28,000 inhabitants. The town of Alexandria, which is the site of Helium, the Sin of Scripture, and the ancient name of Egypt, towards Palestine. No important remains have been found here. Between this site and the Damietta branch are the mounds of Tanis, or Zaan, the famous city of the Delta. The modern town of the Delta, on the eastern bank of the river, is the site of the ancient Helipolis, or On, marked by a solitary obelisk, and the ruins of a massive brick wall. The Delta is the site of Osiris, or the head of the 12th dynasty. At a short distance south of the Helipolis stands El-Khirki, or the ancient city of Memphis, founded by Menes, stood on the western bank of the Nile, about ten miles above Cairo. The kings and people who dwelt there chose the nearest part of the desert as their burial-place, and built tombs on its rocky edge or excavated them in its sides. The kings raised pyramids, round which their subjects were buried in smaller sepulchres. The site of Memphis is marked by mounds in the cultivated tract. A few blocks of stone and a fine colossus of Rameses II are all that remains of the great temple of Pharaoh, the local deity. See MEMPHIS.

There is no space here for a detailed account of the pyramids; suffice it to say that the present perpendicular height of the great pyramid is 450 ft. 9 in., and its present base 746 ft. It is about 20 ft. lower than it was when first built. The upper part was covered with the last fifty years, but it has been set off and other man's violence. Like all the other pyramids, it faces the cardinal points. The surface presents a series of great steps, though when first built it was gabled, and smooth, and polished. The platform on the summit is about 22 ft. square. The pyramid is almost entirely solid, containing only a few chambers, so small as not to be worth of consideration in calcu-
EGYPT

It was built by Khufu (Cheops), or Shufu (Suphis). The second pyramid stands at a short distance south-west of the great pyramid, and is not of much smaller dimensions. It is chiefly remarkable for a great part of its casing having been preserved. It was built by Khafra or Shafra (Chephren), a king of the same period. The third pyramid is much smaller than either of the other two, though it is constructed in a more costly manner. It was built by Mycerinus or Mentcheres, the fourth ruler of the 4th dynasty. Near the three pyramids are six smaller ones; three of them are near the east side of the great pyramid, and three on the south side of the third pyramid. They are supposed to be the tombs of near relatives of the kings who founded the great pyramid. To the east of the second pyramid is the great sphinx, 188 feet in length, hewn out of a natural eminence in the solid rock, some defects of which are supplied by a partial stone casing, the legs being likewise added. See Pyramids.

In the tract between the pyramids of Sakkarah and Abu-Sir are the remains of the Serapeum, and the burial-place of the bulls Apis, excavated by M. Mariette. They are inclosed by a great wall, having been connected, for the Serapeum was the temple of Apis. The tomb is a great subterranean gallery, whence smaller passages branch off, and contains many sarcophagi in which the bulls were entombed. Serapis was a form of Osiris, his name being Osir-hapi, or Osiris Apis. In ascending the river we arrive at the ancient Abydos, supposed by some to be the Hanes of Isaiah, and about sixty miles above Cairo, at Beni-Suef, the port of the province of the Fayum. In this province are supposed to be the remains of the famous Labyrinth of Morris, probably Amenem-hus III, and not far off, also, may be traced the site of the Lake Morris, near the ancient Arsinoh, or Crocodilopolis, now represented by Medinet el-Fayum. The next objects of peculiar interest are the grottos of Beni-Hassan, which are monuments of the 18th dynasty, dating about B.C. 2000. Here are found two columns of an order which is believed to be the prototype of the Doric. On the walls of the tombs are depicted scenes of hunting, fishing, agriculture, etc. There is also an interesting representation of the arrival of certain foreigners, supposed to be Joseph’s brethren—at least illustrative of their arrival. In the town of Abydos, higher up the river, is seen the representative of the ancient Lycopolis. It was an important place 3500 years ago, and has thus outlived Thebes and Memphis, Tanis and Pelusium.

Further on, a few miles south-west of Girga, on the border of the Libyan desert, is the site of the sacred city of Abydos, a reputed burial-place of Osiris, near which, also, must have been situated the very ancient city of This, which gave its name to the 1st and 2nd dynasties. Not far from the temple of Abydos, near the same latitude, is the village of Denderah, famous for the remains of the temple of Aton, the Egyptian Venus, who presided over the town of Tentyra, the capital of the Theban nome. This temple dates from the time of the earlier Casars, and the names of the last Cleopatra, and Caesarion her son, are found in it. See Denderah.

About twenty miles still higher up the Nile than Denderah, and on the western bank, are the ruins of Thebes, the No-Amon of the Bible. In the hieroglyphic inscriptions the name of this place is written AP-T, or with the article prefixed T-AP, and AMEN-NAH, the abode of Amen. The Copts write the former name Taphe, which becomes in the Memphitic dialect Theba, and thus explains the origin of the Greek Oxyrhynchus. The time of its foundation is unknown, but remains have been found which are ascribed to the close of the 11th dynasty, and it probably dates from the commencement of that first Diopolite line of kings. Under the 18th and two following dynasties it attained its highest prosperity, and to this period its greatest monuments belong. The following is a description of this celebrated locality by Mr. Pocock:

“The monuments of Thebes, exclusive of its sepulchral grottos, occupy a space on both sides of the river, of which the extreme length from north to south is about two miles, and the extreme breadth from east to west about four. The city was on the eastern bank, where is the great temple, or, rather, collection of temples, called after El-Karnak, a modern village near by. The temple of El-Karnak is about half a mile from the river, in a cultivated tract. More than a mile to the south-west is the temple of El-Uksur, on the bank of the Nile. On the western bank was the suburb bearing the name Memnonia. The desert near the northernmost of the temples on this side almost reaches the river, but soon recedes, leaving a fertile plain generally more than a mile in breadth. Along the edge of the desert, besides the small temple just mentioned as the northernmost, are the remains of El-Kurnehe, and that of Medinet-Abbâ less than a mile farther to the south-west, and between them, with-in the cultivated land, the remains of the Amenophi-

A Restoration of the Propylon, or Gate of the Temple of El-Uksur, or Luxor.
Edifices rise the mountain, which here attains a height of about 1200 feet. It gradually recedes in a south-western direction, and is separated from the cultivated tract by a strip of desert in which are numerous tombs, partly excavated in two isolated hills, and two small temples. A tortuous valley, which commences not far from the northernmost of the temples on this bank, leads to those valleys in which are excavated the tumbi, or the king's highest part, of the mountain, which towers above them in bold and picturesque forms" (Encyclopedia Britannica, art. Egypt, p. 506).

At the entrance to the temple of El-Uksur stood two very fine obelisks of red granite, one of which is now in the centre of the Place de la Concorde, at Paris. The other portal was 20 feet in width, covered with sculptures of the highest interest, illustrating the time of Rameses II. Within is a magnificent avenue of 14 columns, having capitals of the bell-shaped flowers of the papyrus. They are 60 feet high, and elegantly sculptured. These are of the time of Ameenophis II. The temple of the great and little oasis, and the valley of the Netron lakes, containing four Coptic monasteries, the remains of the famous anchorite settlement of Nitria, recently noted for the discovery of various Coptic MSS. In the eastern part of the temple is a remarkable fulfilment. The visitor to the country needs not to be reminded of him; everywhere he is struck by the precision with which they have come to pass. We have already spoken of the physical changes which have verified to the letter the words of Isaiah. In like manner, the Egyptian experience, in the singular disappearance of the city of Memphis and its temples in a country where several primeval towns yet stand, and scarce an ancient site is unmarked by temples, the fulfilment of the words of Jeremiah: "Noph shall be waste and desolate without an inhabitant" (xiv, 19), and those of Ezekiel, "Thus saith the Lord God, I will also destroy the idols, and I will cause [their] images to cease out of Noph" (xxx, 15).

The principal passages relating to Egypt are as follows: Hesiod, Works and Days, iv, 290. Ovid, Metamorphoses, xxxix-xxix, inclusive. The course of what has been said, several allusions have been made to portions of these prophecies; and it may here be observed that the main reference in them seems to be to the period extending from the times of Nebuchadnezzar to those of the Persians, though it is not easy to elucidate them to any great extent from the history furnished by the monuments. Nebuchadnezzar appears to have invaded Egypt during the reign of Apries, and Sir G. Wilkinson thinks that the story of Amasis's rebellion was invented or used to conceal the fact that Pharaoh-Hophra was deposed by the Babylonians. It is not improbable that Amasis came to the throne by their intervention. The forty years' desolation of Egypt (Ezek. xxix, 10) is a point of great difficulty, owing chiefly to the statements of Herodotus (ii, 161, 177) as to the uncertainty of the prosperity of the state of Egypt and Amasis (B.C. 588-25), during which period in question must have fallen. That the Greek historian was misled by the accounts of the Egyptian priests, who wished to conceal the extent of the national humiliation by Nebuchadnezzar and Cambyses, is made evident by Browne (Oratio Sacrover, p. 191 sq.), who thus arranges the events: "Soon after B.C. 572, Nebuchadnezzar invades Egypt, conquers Apries, and puts him to death, and carries off the spoil of Egypt, together with its chief men, to some other part of his dominions: Amasis is appointed his viceroy."
EGYPT

about B.C. 532, "turns the captivity of Egypt," as he had before done that of the Jews. On his death Amasis revolted, and Cambyses invaded and finally subjugates all Egypt, B.C. 525." See EZEKIEL.

XXIV. Literature.—For a very full classified list of works on Egypt, see Jolowicz's Bibliotheca Aegyptiaca (Lpz. 1858, 8vo), with the Supplement thereto (ib. 1861). The following are some general works which are of especial value in connection with references to the modern history of Egypt: Description de l'Egypte (3d ed. Par. 1821-9); Encyclopedie Britannica (8th ed. art. Egypt). Description, Productions, and Topography: Abd-Allatif, Relation de l'Egypte (ed. Sylvestre, Par. 1810); D'Anville, Memoires sur l'Egypte (Par. 1766); Belzoni, Narrative de Operations (London, 1820); Brugsch, Geographische Inschriften der alt-ägyptischen Denkmäler (Lpz. 1857); Id., Reiseberichte aus Agypten (ib. 1855); Champollion le Jeune, L'Egypte sous les Pharaons (Par. 1814); Id., Lettres sur les conduits du voyage en Egypte (2d ed. Lpz. 1838); Ehrenberg and Hemsch, Naturlgeschichte der Reisender-Risien in Agypten, etc. (Lpz. 1829); Symonds, Palæstina-arabica (ib. 1773); Harris, Hieroglyphica Stendardis (London, 1822); Robert, Les de Bellonda, Memorie e Notizie (Par. 1843); Quatremère, Memoires Géographiques et Historiques (Paris, 1811); Russegger, Reisen (Lpz. 1848-1); Vyse and Perring, Pyramids of Gizeh (Lpz. 1839-45); Perring, 58 Large Views, etc., of the Pyramids of Gizeh (Lpd. 1841); Wilkinson, Modern Egypt and the Monuments of Pharaohs (Lpz. 1831-3); Id., More Egyptian Monuments (2d ed. Lpz. 1848); Id., Survey of Thebes (plan); on the Eastern Desert (in the Jour. Geogr. Soc. ii. 1832, p. 28 sq.); Hartmann, Naturgesch. der Niländer (Lpz. 1865); Kremer, Ägypten (modern), Lpz. 1865; Parthey, Erdk. der alten Ägypten (ib. 1860); Pothick, Egypt, etc. (London, 1861); Untersuchungen und hamollion le Jeune, Monuments (Par. 1829-47); Id. Notices descriptives (ib. 1844); Gliddon, Lectures (N. Y. 1843); Lepsius, Denkmäler (Lpz. 1849 sq.); Le Strange, Recueil des inscriptions grecques et latines d'Egypte (Par. 1843); Rosellini, Mon. Vaticani (Pia. 1822-44); Dümichen, Allägypt. Inschriften (in three series, Lpz. 1865-8); Brugsch, Recueil de Monuments Egyptiens (Par. 1862-63); Leemann, Monuments d'Egypte (ib. 1866); Rhind, Thebes, etc. (Lpd. 1862). Language: Brugsch, Grammaire Demotique (Berl. 1855); Id., Hier.-Demot. Wörterb. (Berl. 1862); Id., Zweite bibliographische Zeitschrift (1863); Birch, Dictionary of Hieroglyphics (in Bunsen, vol. v); Champollion le Jeune, Grammaire Egyptienne (Par. 1836-41); Dictionnaire Egyptien (ib. 1841); Encyclop. Brit. (8th ed. art. Hieroglyphics); Parthey, Vocabulaire Copto-Latin, etc. (Berl. 1844); Peyron, Grammaire Copte (Tunis 1841); Id., Lexicon (ib. 1885); Schwartz, Das Alte Agypten (Lpz. 1848). Ancient Chronology, History, and Manners: Bunsen, Egypt's Place (London, 1850-59); Cory, Ancient Fragments (2d ed. Lpz. 1882); Herodotus (ed. Rawlinson, vols. i-iii, Lond. and N. Y. 1861); Hengstenberg, Egypt and the Books of Moses (Lond. 1861); Id., Untersuchungen, etc. der Chronologie (Lpz. 1825); Leipsius, Chronologie der Aegypter (vol. i, Lpz. 1849); Id., Königsbuch der alten Aegypter (ib. 1858); Pocok, Horae Aegyptiacae (Lond. 1851); Wilkinson, Moose and Customs of the Ancient Egyptians (ib. 1887); Id., Popular Account of the Ancient Egyptians (Lond. and N. Y. 1855); Kenrick, Egypt under the Pharaois (Lond. and N. Y. 1852); Osborn, Monumental History (Lpd. 1854); Sharpe, Hist. of Egypt (Lpd. 1846); Brugsch, Histoire de l'Egypte (Paris, 1859 sq.); Hincks, Years of the Egyptians (Lond. 1852); Lauth, Geheimnisse der Mystikoi (Leipz. 1865); Unger, Chronologie des Manetho (Berlin, 1867). Ancient Religion: Herodotus; Diodorus of Sicily; Plutarch; Phorpyniamblichus, etc.; Jablonski, Punthon Aegypt. (Frank. 1795-82, 8 vols.); Schmidt, De ascens. et sacrific. Aegyptiorum (Tub. 1780); Hirt, C. d. Rihnd aegyptiaca Catholicae (1821); Champollion, Punthon Aegypt. (Paris, 1832); Haymann, Darstellung d. A.-M. (Bonn, 1887); Roth, Die ägypt. u. Zoroastrische Glaubenslehre (Mann. 1846); Beuregard, Les divinités Egyptiennes (Paris, 1866); Sharpe, Egyptian Mythology (Lond. 1863); Lepsius, D. Todtenbuch (Lpz. 1867); Rough, Ritual des Egyptischen (Paris, 1866); Birch, The Funeral Ritual (in Bunsen, vol. v). Religious aspects are also treated in the following works: Playfair, La religion des Egyptiens (Lpd. 1830); Id., Early Inhabitants: Lane, Modern Egyptians (3d ed. 1860); Id., Thousand and One Nights (2d ed., by Poole, Lpz. 1859); Mrs. Poole, Englishwoman in Egypt (Lpd. and N. Y. 1844). The periodicals of Great Britain, France, and Germany contain many articles and papers on Egyptian history and antiquities, by Dr. Hincks, Mr. G. M. de Rouge, and others. There is a monthly Egyptological Journal, edited by M. Brugsch, published at Berlin; and a society called the "Eg. Explor. Fund" of London, has published several Memoirs of new researches.

EGYPT, BROWK or RIVER OP. This is frequently mentioned as the southern limit of the Land of Promise (Gen. xv. 18; Deut. vii. 19; Num. xiii. 14; Josh. xiv. 4). See BROOK BEARER. Calmet is of opinion that this was the Nile, remarking that Joshua (xiii. 3) describes it by the name of Sihor, which is the true name of the Nile (Jer. ii. 18), "the muddy river," and that Amos (vi. 14) calls it the river of the wilderness, because the Israelites wandered therein after fleeing from the more perilous wilderness, in Hebrew Arabah, and watered the district by the Egyptians called Arabian. In answer to this, it is said that this stream was the limit of Judea toward Egypt, and that the Sept. (Isa. xxxvii. 12), "unto the river of Egypt," render it to "Rhinocorura," an interpretation which is adopted by Cellarius, Bochart, Wells, and others, although that is the name of a town certainly not adjacent to the Nile. See NILE. Besides, it is extremely dubious whether the power of the Hebrew nation extended at any time to the Nile, and, if it did, it was over a mere sandy desert. But, as this desert is unquestionably the natural boundary of the Syrian dominions, no reason can be given why the political boundary should exceed it. Most geographers, therefore, understand by "the River of Egypt," the modern Wady el-Aris, which drains the middle of the Sinaitic desert; a few, however, take it to be the brook Beare, between Gaza and Rihnocorura. (See Josh. xv. 47.) See EGYPT.

EGYPT, CHRISTIAN.—I. Church History. The first seeds of Christianity were undoubtedly scattered in Egypt at the time of the apostles. According to some ancient historians, Peter founded the Church of Alexandria and several other Egyptian churches. Mark the Evangelist is said by an old tradition, preserved by Eusebius (Eccles. Hist. li. 16), to have been "the bishop that was sent to Egypt, and first established churches at the city of Alexandria." See ALEXANDRIA. The testimony of Eusebius, that the first Christians of Egypt followed a rigidly ascetic school, is very doubtful, because Philo, to whom he refers, does not speak of Cassian or John the Baptist, etc. The hermits, and expressly mentions that they lived, not in Alexandria, but on Lake Moris. From Lower Egypt Christianity soon spread to Cyrene, Pentapolis, Libya, Central and Upper Egypt. There were at least twenty bishops in Egypt about the middle of the third century, for that number of bishops were assembled at a council in 235. Five councils of Egyptian bishops were held before 311; a great many in the fourth and following centuries. As Egypt had been in the times before Christ the seat of philosophy and mysticism, it is not surprising that the religious and intellectual life of the Christians was a good deal the same as the life of Christian literature. The Alexandrian school was the oldest of the higher class of institutions for Christian education. Jerome and others hold Mark the Evangelist to have been its founder, but the succession of catechists is differently stated. See ALEXANDRIAN SCHOOL. Among the scientific men whom it gave to
the Church were Clement, Athanasius, Origen, Cyril. Gnosticism found numerous adherents. Barildas, Valentinus, Heracleon, Ptolemaeus, Carcoprates, were Egyptians. The Ophites and Dositheus sprang up there; Sabellianism and Ariantism were also products of the region. The history of Egypt, the history of the Christian Church in Egypt has also had a considerable influence. In no other country of the East were hierarchical tendencies so early developed, for the patriarchs of Alexandria soon sought to obtain privileges which no other of the superior bishops enjoyed. The Church of Egypt, who first realized the name of Copts, became in Egypt the predominant Church, and gradually wrested nearly all the churches from the orthodox Christians, who, as early as the end of the sixth century, were reduced to a very insignificant condition. Their great ecclesiastical seat, Alexandria, was occupied almost exclusively by Monophysite (Jacobite) patriarchs, with the exception of Cosmas (elected about 726) and Eutychus (elected in 924). The orthodox (Greek) Christians received from their opponents the nickname Melchites (q. v.). In 615 Egypt was occupied by the Persians, but when few of the bishoprics were spared. The dominion of the Persians lasted only a few years, when the whole country, with the capital city of Alexandria, passed into the power of the Mohammedans in 643 (according to others in 640). Under them Christianity suffered incalculable injuries, and gradually declined, as to become despised and oppressed sect. See Copts. Better prospects for Christianity did not open till the beginning of the 19th century, when Egypt, under the reign of the enlightened Mehemet Ali, was brought under the influence of European civilization. Since then educated Egyptians have earnestly appreciated the superiority of European nations, especially of England and France; many young men of talent have been sent to European schools; the native Christian population begins to rise from its degradation and despoiled condition. A large body of Christendom in northern and central Mesopotamia and Cairo, are filling up with an intelligent and influential population of foreign-born Christians; Christian schools, and other religious and charitable institutions, are multiplying; and the signs of the times seem to indicate that the prospects of Christianity are at present the brightest in the East.

An attempt to establish a Protestant mission in Egypt was made by the Moravians in 1768. A missionary, Hocker, who previously had sought to open communication with the Abyssinian Church, but had been compelled to return to Europe in 1761, was in 1768 commissioned, together with a young man named Danke, a carpenter by trade, to return to Egypt, and await any opening that might present itself to penetrate into Abyssinia. "On March 5, 1769, they reached Cairo, Hocker earning a livelihood by practicing as a physician and Danke by working at his trade. They later moved to the coast, where Hocker made his living in Arabic, and when an assistant arrived for Hocker in the person of John Antes, a watchmaker, he set out on his first journey to the Copts, landing at Gizeh, in Upper Egypt. The state of the country at this time was exceedingly favorable. The British consul was in Egypt, and the province of the Copts against the Turkish government, and many of them being also at war with one another. Hocker had been summoned to attend members of the household of Ali Bey (for a time the chief in Egypt), and Danke's connection with the 'English physician,' as Hocker was called, brought him into favor with the officers and soldiers at Gizeh, who treated him with the greatest kindness. He met a number of Copts in this city, with whom he formed a very intimate friendship. At first several of them invited him to visit their native city, Behnese, the population of which was exclusively Coptic, but afterwards they endeavored to deter him by describing the danger to which he would expose himself. He wrote a history of the Copts, and the history of the Church, and was also a monograph of the Coptic language, which was published in 1780. He was also engaged in the printing of the Coptic version of the New Testament, which was published in 1785. His labors were by many eagerly accepted, by others they were viewed with suspicion or openly opposed. His testimony in favor of Christianity was not without effect, and many of the priests even became his firm supporters, and begged him to remain amongst them. On his third visit he caught a severe cold, upon which followed an attack of malignant fever. Notwithstanding the most careful nursing on the part of the Copts, the disease increased upon him, and on Oct. 6th, 1772, he died, aged only 38 years. By permission of the Greek patriarch, his body was interred in a vault of St. George's church, in the Old City of Cairo. In May, 1775, George Wimger arrived as Danke's successor. He was welcomed, and was allowed to reside at the Coptic monastery of St. Antony, where he labored zealously for the conversion of the Copts. In 1779, he was succeeded by his brother, who also labored for the conversion of the Copts.

In 1826, the "Church Missionary Society" of London sent out some German missionaries to labor among the Copts. After spending some time in studying the Arabic language, and in collecting the Bible and religious tracts, the missionaries fixed the location of the mission at Cairo, where they had two schools, attended by Greek, Coptic, Armenian, Roman Catholic, and even pure Mohammedan children. In 1838 a missionary school was established by the native Copts for the purpose of reading the Scriptures; that the patriarch had sanctioned both these meetings and a plan for the establishment of an institution in Egypt for the education of the Coptic clergy. In 1841, a pupil of the missionary school of Cairo was appointed by the patriarch Abuna, or head of the Coptic Church. Bishop Gobat, who visited Egypt in 1849, expressed in a letter dated Jan. 9, 1850, the opinion that the plan on which this mission had been established, to seek the friendship of the higher clergy of the Coptic church, and to induce them to reform their churches, had failed. The mission was subsequently abandoned.

A mission established by the American Missionary Association has also been again abandoned. The most successful of any of the Protestant missions has been the one that undertook the labor of saving the Copts from being lost to the Mohammedan religion. It organized a number of congregations and schools, and, through the liberality of the Maharajah Dhuleep Singh, who married a pupil of the mission school, it obtained a press, through which a large amount of useful reading has been scattered throughout the land. The growth of the Christian Church is encouraging the organization of the churches into the Presbyterian Church of Egypt, in connection with the General As-
The mission of the American United Presbyterian Church reported at the General Assembly for 1888 the following statistics: missionaries, 12; including one medical missionary; conversions, 24; organized out-stations, 85; communicants, 2307. The mission occupies seven central stations, the chief ones being at Alexandria, Cairo, Assiût, Fayûm, and Ghûdha. The theological school at Assiût had in 1888 20 theological students. The only church for boys was established at Alexandria, in connection with each of the five churches and at each of the out-stations. The distribution of the Bible is prosecuted by the agents of the British and Foreign Bible Society, by the American missionaries, by the Copts, and by others. There were, in 1889, three printing presses in Cairo and Alexandria, and the yearly sale of the Scriptures averaged from 7000 to 12,000 copies. The Copts, or Pilgrim mission, from Alexandria far into the heart of Abyssinia. Of these, the following stations were, in 1886, in active operation in Egypt: St. Matthew's in Alexandria; St. Mark's in Cairo; St. Peter's at Assouan, at the falls of the Nile; St. Thomas at Khartoum, at the junction of the White and Blue Niles; and St. Paul's at Massimmah, on the border of Abyssinia. The annual visitor's report for 1886 states that in nearly all the churches gratifying accessions have been made to the membership during the past year, and that during the persecution only four shrunk back, all of whom subsequently returned. The Presbytery have taken the proper steps for each native church to have a native pastor duly called, ordained, and installed. The churches of Ghûdha and Cairo have already called native pastors, and taken steps for providing the necessary salaries. The Presbytery of Egypt, in 1867, also adopted strong resolutions denouncing all attempts to proselytize the people, which is carried on in Egypt with the connivance of the government.

2. Statistics.—The large majority of the inhabitants are Mohammedans. The theological school connected with the mosque of Cairo is one of the most frequented schools of the Islam. All the elementary schools and educational institutions for Mohammedans are of a strictly religious character. Mehmet Ali established several schools after the European model, in which young Egyptians were to be educated, partly by European teachers, for civil and military offices. Such schools were the medical school at Abou-Zaide, the cadet school at Tiznit, the marine school at Alexandria, the school of engineers at Charka, the medical college of Casr-el-Ayin, the artillery school of Turrah, and the musical institute in the Citadel of Cairo. A special college for young Egyptians was also established in Paris. Several of these schools were, however, suppressed under the reign of Abbas Pasha. The most numerous body of Christians are the Copts, who have a patriarch, four metropolitan, and seven other bishops, and a population estimated from 130,000 to 250,000 souls. See COPRA. The number of the Copts, who recognize the authority of the Pope, is about 10,000. They have a vicar apostolic at Cairo. For the Latin Roman Catholics there is another vicar apostolic at Alexandria, who is at the same time delegate for the United Orientalis of other rites than the Coptic. According to letters of Roman Catholic missionaries, Alexandria had, in 1888, 7200 Latinis, 600 United Copts, 240 Maronites, 385 Melchites (United Greeks), 50 Syrians, 60 Armenians—together 8820. The Roman Catholic population of Cairo at the same time consisted of 4148 Latins, 200 Melchites, 800 Copts, 300 Maronites, 800 Armenians, 200 Syrians, 100 Chaldees. Since then the Roman Catholic population of these two cities has undoubtedly largely increased in consequence of the rapid growth of the total population of the two cities; but no later trustworthy statistics are known. There are Franciscans, Dominicans, and Jesuits in Cairo. There is also a Coptic seminary in Alexandria, which is independent of the diocese of Egypt, and is controlled by its own bishops. The heretics, or Coptic priests, are not allowed to ordain their own clergy. The Catholics are not allowed to ordain their own clergy.

3. Slander.—The Catholic and the Copts have been the chief objects of the Coptic writers. The Copts have been accused of being agents of the papal state, and of being the tools of the Papists in Egypt. The Copts have also been accused of being the agents of the French government in Egypt. The Copts have also been accused of being the agents of the French government in Egypt.

4. The sects in Egypt.—The sects in Egypt are the Copts, the Jacobites, the Nestorians, and the adherents of the Coptic and the Greek Church. The Copts are divided into two classes: the Copts of the East and the Copts of the West. The Copts of the East are divided into two classes: the Copts of the East and the Copts of the West.

5. The Church in Egypt.—The Church in Egypt is divided into two classes: the Church of the East and the Church of the West. The Church of the East is divided into two classes: the Church of the East and the Church of the West.
in the public services of the Copts, it was not known in Europe till Dr. Marshall, of Lincoln College, contributed some readings from it to bishop Fell's New Testament (Oxford, 1675). The Pentateuch has been published by Wilkins (London, 1731, 4to), by Faller (Paris, 1856, 8vo), and by Le Duc (Paris, 1867, 8vo); the Psalms at Rome (1744 and 1749) by the Propaganda Society. In 1837 Ideler published the Psalter more correctly; and in 1844 the best critical edition, by Schwartze, appeared. The twelve minor prophets were published by Tattam (Oxon. 1836, 8vo), and the major prophets by the same (1852). Bardelli published Daniel (Pisa, 1841). A few pieces of other books were printed at different times by Mangarelli, Quattremère, and Münter. The N. T., made from the original Greek, was published by Wilkins, with a Latin translation (Oxford, 1716). In 1846 a new and more correct edition, and very little in Schwartze, and continued, but in a different manner, after his death, by Bötticher (1852, etc.). In 1848-52, the "Society for promoting Christian Knowledge" published the N. T. in Memphitic and Arabic (London 2 vols. fol.). The text was revised by Lieder. The readings of this version were taken from the papyri, as far as it was possible, but the rest was made, coinciding with the Alexandrine family, and carefully compared with the Latin versions. Fortunately, the version has not yet been adequately edited. It belongs perhaps to the 1st century. See Davidson, in Horne's Introd., ii. 66.

2. The Theotic.—This version was also made from the Greek, both in the O. and N. T., and probably the 1st century. Only some fragments of the O.-T. part have been printed by Münther, Mangarelli, and Zœga. In the N. T. it agrees generally, though not uniformly, with the Alexandrine family. Not a few readings, however, are peculiar; and some harmonize with the Latin versions. Fragments of it have been published by Mangarelli, Giorgi, Münther, and Ford.

3. The Bashmoric, or Ammonim.—Only some fragments of such a version in the O. and N. T. have been published, and very little use is made of it. Scholars are not agreed as to the nature of the dialect in which it is written, some thinking that it does not deserve the name of a dialect, while others regard the Bashmoric as a kind of intermediate dialect between those spoken in Upper and Lower Egypt. Hug and De Wette are inclined to believe that it is merely the version of Upper Egypt transferred to the idiom of the particular place where the Bashmoric was spoken. The origin of this version belongs to the 3d or 4th century. See Tregelles, in Horne's Introd., 277—279, "Erasmij (or the Bible)."

E'bud (Heb. אֶבִּד, אֶבָּד, prob. a modified form of the name Ah'bi; Sept. Εὔβοιον, Vulg. Evbi). one of the "sons" of Benjamin (Gen. xlvii. 21), apparently the grandson of Aahram (q. v.) in Num. xxvi. 38 (from which the name is perhaps contracted). In the parallel passage (1 Chron. viii. 6) he seems to be called "Ehod (q. v.)."

E'bud (Heb. אֶבִּד, אֶבָּד, union), the name of two or three Benjamites, and apparently hereditary in that tribe, like Gera (q. v.)

1. (Sept. עֶבְד לְרֹקע אָוֹד). A descendant of Benjamin, progenitor of one of the clans of Geba that removed to Manahath (1 Chron. xiii. 10). The name is there written טָבַד, Ebud, either for טָבָד, as above, or altogether erroneously for טְבָד, Ech'bi, i.e. Ebi (q. v.), the grandson of Benjamin, which appears in the parallel list of Gen. xlvii. 21, and as a son of Bela by the daughter of the Seirite, verse 21 of that passage. He seems to be the same as Aab'ram, אָבָרָם, in the list in Num. xxvi. 38, and, if so, Aahram is probably the right name, as the family were called Aahramities. In 1 Chron. viii. 1, the same person seems to be called טְבַד, Aarah, and perhaps also טָבֵד, Ahoah, in
tation takes place in the summer-parlor (Σαλόνι)
In Judges the king exposes himself to the dagger by ris-
ning apparently in respect for the divine message which
Ehud professed to communicate (Patrick, ad loc.;)
In Josephus it is a dream which Ehud pretends to reveal,
and the king, in delighted anticipation, springs up
from his throne. The obesity of Eloquent, and the literary
conspicuousness of the writings of Josiah, are not
mentioned by Josephus (vid. Judg. iii. 17, 41, arietis,
Sept.; but "crassus," Vulg., and so Gesenius, LXX.)
The "quarries that were by Gilgal," to which Ehud
retired in the interval between the two interviews (iii.
29, 13), were in the region of Judah, as in Deut. viii.
25, "grave images" (Patrick, ad loc.; comp. Gesen.
"Σαλόνι" LXX. s. v. το βάπτισμα.) See ELO
After this destructive achievement Ehud repaired to
Seirah (improp., Seirath; see Gesen. LXX. s. v.)
in the mountains of Ephraim (iii. 26, 27), or Mount Ephraim
(Isoh. xix. 50). To this wild central region, com-
manding, as it did, the plains east and west, he
mobilized the Israelites by sound of horn (a national
custom according to Josephus; A.V. "a trumpet").
Descending from the hills they fell upon the Moabites,
dismayed and demoralized by the death of their king
(Josephus, not Judges). The greater number were
killed; only 2000 men made the transfer, with the
view of crossing into their own country.
The Israelites, however, had already seized the fort;
and not one of the unhappy fugitives escaped. As
a reward for his conduct Ehud was appointed judge (Jo-
sephus, not Judges). The Israelites continued to en-
joy for eighty years (B.C. 1939-1859) the independ-
ence obtained through this deed of Ehud (Judg. iii.

Eckach. See CARBUNCLE.

Eichhorn, Johann Gottfried, a celebrated
German Orientalist and theologian, was born Oct.
15, 1752, at Dörenzimmer, in the principality of Holen-
lohe-Erlangen. He received his education at the
monastery of Heilbronn, and at the University of
Göttingen, under Michaelis and Heyne. He became
professor of Oriental literature at Jena in 1775,
and was named court-councillor by the duke of
Saxe-Wei-
mar in 1788. In 1786 he succeeded Michaelis as pro-
fessor of philosophy at the University of Göttingen,
and in 1811 he was named professor of theology
there, which post he retained until his death, June 26,
1815. Eichhorn was a thoroughly industrious student
and a very voluminous writer. His first proof of
Oriental knowledge was given in his Geschichte des Ostindischen
Handels vor Mohammed (Gotha, 1773, 8vo.)
This was followed by Historiae Christianae ab Abraham
post Alb. Schultens, ab Arabe edidit, latina vertit, et
adnotavit. adiect. J. G. Eichhorn (Gotha, 1775, 8vo.)
—De rei nummariie opud Arabos imitata (Jena, 1776, 4to.)
At Jena he devoted himself to Biblical literature, and
established, as a sort of organ, a magazine entitled
Repertorium für biblische und morgenländische Literatur,
which lasted from 1777 to 1786 (Leipzig), and was
followed by the Allgemeine Bibliothek d. biblischen
Literatur (Leipzig. 1787-1808, 10 vols. 8vo.)
His professor
ship at Göttingen opened him to a wider field (1786)
after the death of J. D. Michaelis. He lectured not
only on Oriental literature, and on parts of the
O. and N. T., but also in the field of general history,
in which he soon appeared as an author. In 1790-38
appeared his Umgcrichtliche (Primitive History), edited
by Gabler from the Repertorium (Nurem. 8vo.)
His most important works, in addition to his
Kritisches Lexikon in Apocryphae (Gotha, 1791, 2 vols. 8vo.)
—Einleitung ins A.T.: Einleitung ins N.T. (also published
under the general title of Kritische Schriften, Leips.
1804-1814, 8vo, 7 vols.)
He also published a number of
historical writings, besides many essays, reviews,
etc.; and all this time his lectures were kept up in
the university. The zealous and continued indus-
ty of Eichhorn is one of the marvels of modern lit-
erature.
As an interpreter of the Bible, Eichhorn, following
Michaelis, transcended him in the boldness of his crit-
icism and in his far-reaching Rationalism. The re-
results of his criticism were that the Bible, as we have it,
has only formal and literary value over other
books. The primeval history attributed to Moses
was made up of ancient sagas, and gathered up, partly,
by Moses into the Pentateuch. His system of interpre-
tation multiplies paradoxes, and tends to uphold
the Christian revelation, as such, entirely. In his view
the Apocalypse is a prophetic drama, and he comments
on it as he would on a play of Aristophanes or Terence.
But his vast labors in Biblical literature retain great
part of their reputation, while his method of interpre-
tation is fast passing into oblivion, even in Germany.
—Saintes, History of Rationalism, chap. xi; Herzog,
Real-Encyklop. iii. 710.

Eichhorn, Karl Friedrich, son of Johann Gott-
fried Eichhorn (q. v.), was born at Jena in 1781.
After completing his studies at the University of Göt-
ingen, he became privatdocent of law at the University
of Jena. In 1805 he was appointed professor at the
University of Frankfurt am Oder, and in 1811 was
made ordentlicher Professor of Church Law in Berlin, where he
was editor, with Savigny, Glieder, and, later, with
Rusdorf, the Zeitschrift für geschieltliche Rechtsaenderung.
from 1817 to 1829 he was professor of Church law,
and other branches, at Göttingen; from 1831 to 1888 pro-
fessor at the University of Berlin. In 1889 he was
appointed a member of the supreme state council, and
subsequently filled some other high offices in the civil
administration. He was regarded as the head of
the historical school of German jurists. He died at
Berlin July 4, 1894. Besides a number of law books,
which still occupy a high rank in that literature, he
wrote a work on Church law (Grundriss des Kirchen-
rechts der kathol. u. evangel. Religionsparteien, Götting,
1831-1838).—Herzog, Real-Encyk. xi, 470.

Einhard. See EINHARD.

Einsiedeln (Marie-Einsiedeln, Diepaur Virgina
Eremus, Notre Dame des Ermites), a Benedictine mon-
astery in Switzerland, founded in the 9th century by
Meinrad of Soleure, who was murdered by robbers
A.D. 661. In 934, Eberhard, provost of the cathedral of
Strasburg, was named prior of a certain monastery, then
the church Otto, in 946, endowed with the free right
of election. The convent was to be consecrated Sep-
tember 14, 948, by the bishop of Constance, but the
latter claimed to have heard the preceding night the
song of angels, and to have seen Christ himself, at-
tended by angels and flying into the mass and church;
and when the next morning, he prepared to perform
the act of consecration, he was admonished by a
voice saying, "Hold on, brother, God himself has
dedicated the chapel." The story was believed, and
on the sole strength of it the annual pilgrim-
age to Einsiedeln on September 14, to commemora-
te the "Angelic Consecration" (Engel-Wihe), became,
and still is, one of the most famous pilgrimages in
the Church of Rome. The pilgrim is granted full absolu-
tion to all who went in pilgrimage to the church.
The congregation is made up of a majority of scions of noble fami-
lies, and the convent steadily increased in power and
riches. A new church was built in the beginning of
the last century on the model of the Lateran church,
and contains Meinrad's cell and the image of the Vir-
gin. In the time of the Reformation most of the
monks left the church, but it was subsequently recon-
organized by Ludwig Hilarer, a Benedictine monk of St.
Gall. In 1710 260,000 are said to have visited Ein-
siedeln, and in 1851 the number was over 200,000.
The vendors of blessed images, medals, etc., do a thrive-
ning business there, and at a large profit. Things
are at Einsiedeln confessional for the people of different
nations and languages, each bearing an inscription by which it is recognised. In 1867 the convent had 75 priests, and 6 clerical and 17 lay brothers. The "Stiftsschule" ("Gymnasium") and Lyceum numbered about 200 pupils. Until 1825 the convent had a second "gymnasium" in Villach, founded by the Bishops of Tar- sin, and in that year it was suppressed by the Liberal government of the canton. See Placidus, Documenta Archivi Seminarii Einsiedelensis (3 vols. folio); Annales Hieremi Desparae Matriae (Frib. Brug. 1612, fol.); Herzog, Real-Encyklop. iii, 742; Landolt, Urspruny u. erste Gestaitung d. Einseide-Wald-Monastery (Einsiedel 1845); Staudinger, Der heil. Meinrad u. die Wallfahrt von Einsiedeln (Einsiedeln, 1861).

EISENMENGER, JOHANN ANDREAS, a German Orientalist, was born at Mannheim in 1654, and studied at the University of Heidelberg, where, in 1700, he became a professor of Oriental languages. He died in 1764. His principal work is entitled Eudecktes Judenthum (Frankf. 1700). The Jews opposed its publication by all means in their power, and even obtained an imperial edict against it. At the time of his death nearly the whole edition of the work was under arrest. It was shortly before his death published 12,000 florins for the surrender of all the copies, but he asked 80,000. Friedrich I of Prussia appealed, in behalf of the heirs of Eisenmenger, to the emperors Leopold and Joseph for permission to publish the book, and, when this led to no result, had 12,000 florins spent in its publication and publication at the expense (Königsberg, 1711). Subsequently the Frankfort edition was also permitted to see the light. Eisenmenger also compiled a Lexicon Orientalis harmonicum, which has never been printed, and he published, conjointly with Leusden (q. v.), in 1694, an edition (without points) of the Heb. Bible,—He-erzog, Real-Encyklop. iii, 744; Hoe- fer, Biog. Genn. xv, 776; Wetscher u. Welte, Kirchen-Lex. xii, 811; Jost, Gesch. d. Juden, vol. vii. (J. H. W.)

E'kker (Heb. i. n. 720, a plant root up and transplanted, e. g. metaph. a resident foreigner, Lev. xxv, 47), the youngest of the three sons of Ram, the grandson of Horeon (1 Chron. ii, 27; Sept. Aesp, Vulg. Achar). B.C. post 1856.

Ekkehard, the name of several learned monks of St. Gall. The first of the name, about the middle of the 10th century, was the director of the convent school, and subsequently dean of the convent. He laid the foundation of the literary celebrity of St. Gall, wrote several ecclesiastical hymns, and is honored by mention in the earliest works of German literature. Another Ekke- hard, a nephew of the former, was also a director of the convent school, and subsequently a chaplain of emperor Otto II. He also composed ecclesiastical hymns, and is supposed to have been familiar with stone-ography. He died April 53, 950. A third Ekkehard, born about 890, was a pupil of Notker Laboe, and became distinguished for his knowledge of Latin, Greek, German, mathematics, astronomy, and music. Aribio, archbishop of Mentz, appointed him superior of the cathedral school of that city. He continued the An- nals of St. Gall, which a monk by the name of Rat- perius had begun and carried to the year 883. This work, Carus Monasterii Sancti Galli (printed in Monumenta Germaniae histor. Scriptor. ii, 74-163) is of great importance for the Church history of the 10th century. Ekkehard also compiled a collection of ecclesiastical hymns, under the title Liber Benedicthuom. He wrote a poem, De ornatu dictis, and translated a life of St. Gall, in German verses by Ratperius, into Latin. He died in 1036. A fourth Ekkehard, who lived at the beginning of the 12th century, wrote a Vita Sancti Not- kers.—Herzog, Real-Encyklop. iii, 742 (A. J. S.)

Ekleode (Ekleode): Pash. Ferabad; Vulg. omita; a point on the Caspian Sea, above Kios, on the creek which is on the brook Moochun; apparently somewhere in the hill country to the south-east of the Plain of Edesaion and of Dethain. The Syriac reading of the word points to the place Akrabbe, mentioned by Eusebius in the Onomasticon as the capital of a district called Akrabastes, and still standing as Akrabat, about six miles south-east of Nablus (Shechem), in the Wady Makauty, and close to the Jordan valley (Van de Velde, ii, 304, and Map). Though frequently mentioned by Josephus (War, i, 20, 4; iv, 3, 5, etc.), neither the place nor the district are named in the Bible, and they must not be confounded with those of the same name in the south of Judah. See AKRAMBE; ARA- BATTA; MAHALIM-AKRABRAM.

Ekal 'tron (Heb. Ekoron, 11 527, erodation; comp. Zeph. ii, 4, which apparently contains a play upon the word; Sept. [usually] and Josephus ὡρακοπεῖος, Vulg. Acorra), one of the five towns belonging to the lords of the Philistines, and the most northerly of the five (Josh. xiii, 3). Like the other Philistine cities, its situation was in the maritime plain. In the general distribution of territory (unconquered as well as conquered) Ekron was assigned to Judah, as being straight west of it (Josh. xv, 47, and Josh. xvi, 45; 2 Sam. xix, 48; Judg. i, 18; comp. Josephus, Ant. vi, 1, 22; v. 2, 4). But it mattered little to which tribe it nominally belonged, for after the monarchical government in full perfection had been established by the Philistines (1 Sam. v, 10). In Scripture Ekron is chiefly remarkable from the ark having been sent home from thence, upon a new cart drawn by two milch kine (1 Sam. v, 10; vi, 1-8). Ekron was the last place to which the ark was carried before its return to Israel, and the mortality there in consequence seems to have been greater than at either Ashdod or Gath. (The Sept. in both Mss., and Josephus [Ant. vi, 1, 1], substitute Ascalon for Ekron throughout this passage [1 Sam. v, 10-12]. In support of this it should be remarked that, according to the Hebrew text, the golden trespas-offerings were given for Ashkelon, though it is omitted from the detailed narrative of the journeyings of the ark. There are other important differences between the Sept. and Hebrew texts of this transaction. See especially v. 6.) From Ekron to Bethsberheq (q. v.) was the highway (Theoph. Land. med. Book ii, 309). After David's victory over Goliath, the Philistines were pursued as far as this place (1 Sam. xvii, 52). Henceforward Ekron appears to have remained uninterrupted in the hands of the Philistines (1 Sam. xvii, 52; 2 Kings i, 12, 16; Jer. xxv, 20). Except the site of a noted palace of the King of Samaria, Haz- zeal (q. v.) existing there (2 Kings i, 2, 3, 6, 16), there is nothing to distinguish Ekron from any other town of this district. In later days it is merely named with the other cities of the Philistines in the denunciations of the prophets against that people (der. xxv, 20; Amos i, 8; Zeph. ii, 4; Zech. ix, 5). The name occurs in the cuneiform inscriptions of the (q. v.) of the Assyrian monuments. In the Apocrypha it appears as Acoron (Ἀκορων, 1 Macc. x, 89, only), bestowed with its borders (ἲδον ὡρακοπεῖον) by Alexander Balas on Jannthini as a reward for his services. Eusebius and Jerome describe it (Onomast. s. v. Ἀκορών, Acaroun) as a large village of the Jews, be- tween Azotus and Jamnia towards the east, or east-ward a line drawn between these two places. The same name Acorum occurs incidentally in the his- torians of Alexander and Romulus of Carthage De rerum gestis (2500). The site of Ekron has lately been recognised by Dr. Robinson (Bib. Researches, iii, 24) in that of 'Akrur, in a situation corresponding to all that we know of Ekron. The radical letters of the Arabic name are the same as those of the Hebrew, and both the Chris- tians and Moslems of the neighbourhood call it by the same name, as that of the ancient Ekron. It is a considerable Moslem village, about five miles south-west of Ram-

El, mighty, since God, either Jehovah or a false deity; sometimes a hero or magistrate (see God) occurs as a prefix (and also as a suffix) to several Heb. names, e.g. El-Beth-El; El-Elon-Jishah, all of which see in their place. Compare Eli.

Elah (Heb. Elah, Vulg. Jolaman), one of the heads of the class of priests (2 Sam. v) who had taken foreign wives after the Babylonian exile (1 Esdr. ix, 27); evidently the Elam (q. v.) of the Heb. text (Ex. xx, 26). See also Elah.

Ela'dah (Heb. Eladah, מַעֲלָה, from God has put on, i.e. fills with himself; Sept. Ελαθάδ, V. Ελάθαδ, Vulg. Eladu), one of the sons (rather than grand- son or lesser descendant, as the text seems to state) of Ephraim (1 Chron. vii, 20), perhaps the same as Ekha (q. v.) of ver. 21, since several of the names (see Tahath) in the list appear to be repeated (compare Num. xxxvi, 36, where the only name is Ethan). See also Elah.

Elah (Heb. Elah, מַעֲלָה, terebinth or oak [q. v.]), the name of a place, and also of five men.

1. The VALLEY OF ELAH (מַעֲלָה, מָעָלָה, vale of the terebinth or oak; Sept. έλαζ άλας Ηλάς, but translated "Elath of the two rivers" in 1 Sam. vii, 2, 19; Vulg. Elagius), a valley in (not "by," as the A.V. has it) which the Israelites were encamped against the Philistines when David killed Goliath (1 Sam. vii, 2, 19; xii, 9). It lay somewhat near Shocho of Judah, and Azekah, and was nearer Ekron than any other Philistine town (1 Sam. vi, 17). Shocho, with a great probability identified with Shewihek, near Beit Netif, some 14 miles S.W. of Jerusalem, on the road to Beit Jibrin and Gaza, among the most western of the hills of Judah, not far from where they begin to descend into the great Philistine plain. The village stands on the south slopes of the wady el-Sam, or valley of the acoustic, which runs off in a N.W. direction across the plain to the sea just above Asdhood. Above Shewihek it branches into two other wadys, large, though inferior in size to itself, and the junction of the three forms a considerable open space of not less than a mile wide cultivated in fields of grain. In the centre is a wide torrent bed thickly strewn with round pebbles, and bordered by the acacia bushes from which the valley derives its present name. There seems to be no reason to doubt that this is the Valley of the Terebinth. It has changed its name and been identified after another kind of tree (the sumut, or acacia), but the terebinth (baum) appears to be plentiful in the neighborhood, and one of the largest specimens in Palestine still stands in the immediate neighborhood of the spot, in wady Sur, the southernmost of the branch wadys. For miles along the wadys, and along wady Masur, the other branch, is the khan and ruined site Akeb, which Van de Velde proposes to identify with Azekah. These identifications are confirmed by that of Ephraddim (q. v.), the site of the Philistine camp. Ekron is 17 miles, and Bethlehem 12 miles distant from Shocho. (For the valley, see Robinson, Researches, ii, 380; Van de Velde, Narrative, ii, 191; Porter, Handb. p. 109, 200, 204; Schwalbach, Paläst., p. 77.)

There is a point in the topographical indications of 1 Sam. xvii which it is very desirable should be carefully examined on the spot. The Philistines were between Shocho and Azekah, at Ephes-dammim, or Pas-dammim, on the mountain on the S. side of the wady, while the Israelites were in the "valley" (מָעָלָהפְּל) of the terebinth, or, rather, on the mountain on the N. side, and in the "valley" or "canyon" (מָעָלָהאֲנָשִּׁים) between the two armies (ver. 2, 3). Again (ver. 52), the Israelites pursued the Philistines "till you come to the ravine" (the same word). There is evidently a marked difference between the "valley" and the "ravine," and a little attention on the spot might lead to their identification. In the above location, the distance between the armies was about a mile, and the vale beneath is flat and rich. The ridge rises on each side to the height of about 500 feet, and have a uniform slope, so that the armies ranged along them could see the combat in the vale. The Philistines, when defeated, fled down the valley towards Gat and Ekron.

The traditional "valley of the Terebinth" is the wady Beiti-Hanoa, which lies about 4 miles to the N.W. of Jerusalem, and is crossed by the road to Nebi Samwil. The spot of David's conflict was marked out a little N. of the "Tombs of the Judges," close to the traces of the old paved road. In this valley olives and carob-trees now prevail, and terebinth-trees are few; but the brook is still indicated whence the youthful champion selected the "smooth stones" with which he smote the Philistine. The brook is dry in summer, but in winter it becomes a mighty torrent, which inundates the vale (Kitto, Pictorial Palest., p. 121). But this spot is in the tribe of Benjamin, and otherwise does not correspond with the narrative of the text (see Thenius, Sitzungsber. 1897, ii, 151).

2. (Sept. Ηλάς, but Ηλάς in Chron.; Vulg. Ela.) One of the Edomish "dukes" or chieftains in Mount Seir (Gen. xxxvi, 41; 1 Chron. i, 52). B.C. post 1563. By Knobel (Comment. ad Gen. in loc.) he is connected with Elath (q. v.) on the Red Sea.

3. (Sept. Ελάθ v. r. Αλάθ.) The middle one of the three sons of Caleb the son of Jephunneh (1 Chron. iv, 15), B.C. 1618. In that passage his sons are called Kenaz or Kznax, but the words may be taken as if Kenaz was, with Elath, a son of Caleb. It is a singular coincidence that the names of both Elath and Kenaz also appear among the Edomish "dukes."

4. (Properly Elah, Heb. Ela, מַעֲלָה, Sept. Ηλάς.) The father of Shimeon, Ela, Saul's commissariat officer in Benjamin (1 Kings iv, 18), B.C. 1013.

5. (Sept. Ηλάς, Josephus Ηλαναυς, Vulg. Eda.) The son and successor of Bashah, king of Israel (1 Kings viii, 9-10); his reign lasted for little more than a year (comp. verse 8 with verse 10). B.C. 928. He was killed while drunk by Zimri, in the house of his steward Arza, who was probably a confederate in the plot. This occurred, according to Josephus (Ant. viii, 12, 4), while his army and officers were absent at the siege of Gibeon. He was the last king of Bashah's line, and by this catastrophe the predictions of the prophet Jeshua were accomplished (1 Kings vii, 6, 7, 11-13).

6. (Sept. Ηλάς.) The father of Hoshia, last king of Israel (2 Kings xv, 38; xviii, 1), B.C. 729, or ante.

7. (Sept. Ηλάς v. r. Ηλάς, Vulg. Ela.) The father of Uzzi, and Hadad, and of the tribe of families who were taken into captivity (1 Chron. ix, 8), or rather, perhaps, returned from it. B.C. 536.

Ela. See Oak; Terebinth.

Elalah (Eläh), a Phoenician city mentioned by Dionysius (Periég. 910) and other ancient authors as
ELAM

ELAM (Heb. Elyon, Elion, corresponding to the Pehvī Airjana [see Gesenius, Thesaur. p. 101 c]), the name of a man and of the region settled by his posterity, also of several Hebrews, especially about the latter part of the Babylonian captivity.

1. (Sept. Δαράθα, Jos. Δαραθα; Ecclus. Anv. i. 6, 4; Vg. Elyon). Originally, like Abram, the name of a man—the son of Shem (Gen. x. 22; 1 Chron. i. 17). B.C. post 2514. Commonly, however, it is used as the appellation of a country (Gen. iv. 19, 1: Isa. xi. 11; xxi. 2; Jer. xxxv. 26; xlix. 34-39; Ezek. xxxix. 24; Dan. viii. 2). In Gen. xiv. 1, it is introduced along with the kingdom of Shinar in Babylon, and in Isa. xxi. 2, and Jer. xxxv. 25, it is connected with Media.

In Ezra iv. 9, the Elamites are described among the nations of the Persian empire; and in Dan. vii. 2, Susa is said to lie on the river Ulai (Elaeus or Choaspe), in the province of Elam. This river was the modern Karun (Layard, Nineteen and Bab. p. 146), and the capital of Elam was Shushan (q. v.), one of the most powerful and magnificent cities of the primeval world. The name Elam occurs in the cuneiform inscriptions (q. v.) found on the bulls in Sennacherib's palace at Nineveh. The country is called Na- vaiki, as we learn from the monuments of Khorsabad and Bavian (Layard, Nin. and Bab. p. 492).

The Elam of Scripture appears to be the province lying south of Assyria and east of Persia Proper, to which Herodotus gives the name of Cissia (iii. 91; v. 49, etc., and which is in part termed Susa or Susana by the geographers (Strab. xv. 8, § 12; Ptolem. vi. 8, etc.). It includes a portion of the mountainous country separating between the Mesopotamian plain and the high table-land of Iran, together with a fertile and valuable tract at the foot of the range, between it and the Tigres. The passages of Daniel (vi. 2) which places Shushan (Susa) in "the province of Elam," may be regarded as decisive of this identification, which is further confirmed by the frequent mention of Elamians in this district (Strab. xi. 15, § 6; xvi. 1, § 17; Ptolem. vi. 3; Plin. H. N. xiv. 28, etc.), and which is found in Scripture (see Gen. xiv. 1; Isa. xxii. 2; Ezek. xxxix. 24). It appears from Gen. x. 22, that this country was originally peopled by descendents of Shem, closely allied to the Ariameses (Syrians) and the Assyrians, and from Gen. x. 21-19, it is evident that before the time of Abraham a very important power had been built up in the same region. Not only is "Chedor-lazur, king of Elam," at the head of a settled government, and able to make war at a distance of two thousand miles from his own country, but he manly exercises a supremacy over a number of other kings, among whom we even find Amraphel, king of Shinar, or Babylon, or Babylon. It is plain, then, that at this early time the predominant power in Lower Mesopotamia was Elam, which for a while held the place possessed earlier by Babylon (Gen. x. 10), and later by Babylon or Assyria. Discoveries made in the country itself confirm this view. They exhibit to us Susa, the Elamite capital, as one of the most ancient cities of the East, and show that its monarchs maintained, throughout almost the whole period of Persian and Assyrian greatness, a quasi-independent position, and that it was the home of Chedor-lazur himself, whom some are inclined to identify with an early Babylonian monarch, who is called the "Ravager of the West," and whose name reads as Kudur-mapula. The Elamite empire established at this time was, however, but short in duration. Babylon and Assyria proved, on the whole, stronger powers, and Elam during the period of their greatness can only be regarded as the foremost of their feudatories. Like the other subject nations she retained her own monarchs, and from time to time, for a longer or a shorter space, asserted and maintained her independence. But generally she was content to acknowledge one or other of the two leading powers as her suzerain. Towards the close of the Assyrian period she is found allied with Babylon, and engaged in hostilities with Assyria; but she seems to have declined in strength after the Assyrian empire was destroyed, and the Median and Macedonian arose upon its ruins. It is commonly called a "province" of Persia, and was called Elam in Belshazzar's time (Dan. viii. 2), and we may presume that it had been subject to Babylon at least from the reign of Nebuchadnezzar. The desolation which Jeremiah (xlili. 30-34) and Ezekiel (xxxi. 24, 25) foresees was probably this conquest, which destroyed the last remnant of Elamite independence. Elam is uncertain at what time the Persians added Elam to their empire. Possibly it only fell under their dominion together with Babylon; but there is some reason to think that it may have revolted and joined the Persians before the city was besieged. The prophet Isaiah (xxiv. 1; xxxvii. 2; xxii. 6; xxvi. 18), in speaking of Elam as taking part in the destruction of Babylon, and, unless we are to regard him with our translators as using the word loosely for Persia, we must suppose that, on the advance of Cyrus and his investment of Babylon, the Chaldean capital, Elam made common cause with the assyrians, and the country became menace to the Persian empire, forming a distinct satrapy (Herod. iii. 91), and furnishing to the crown an annual tribute of 300 talents. Susa, her capital, was made the ordinary residence of the court, and the metropolis of the whole empire. This mark of favor did not, however, prevent revolts. Not only was the Magian revolution organized and carried out at Susa, but there seem to have been at least two Elamite revolts in the early part of the reign of Darius Hystaspis (Beist. Inv., col. i, par. 16, and col. ii, par. 5). After these futile efforts, Elam acquiesced in her subjection, and, as a Persian province, followed the fortunes of the empire. These historic facts illustrate the prophecy of Jeremiah (xlili. 38, 39), "And upon Elam will I bring the four winds from the four quarters of heaven, and I will scatter them towards all these winds." The situation of the country in two principal parts (xvi. 1) seems to speak to the Medes, and Babylonians; and it suffered from each in succession before it was finally embodied in the Persian empire. Then another part of the prophecy was also singularly fulfilled: "I will set my throne in the Elam, and will destroy that but the time of Abraham a very important power had been built up in the same region. Not only is "Chedor-lazur, king of Elam," at the head of a settled government, and able to make war at a distance of two thousand miles from his own country, but he manly exercises a supremacy over a number of other kings, among whom we even find Amraphel, king of Shinar, or Babylon, or Babylon. It is plain, then, that at this early time the predominant power in Lower Mesopotamia was Elam, which for a while held the place possessed earlier by Babylon (Gen. x. 10), and later by Babylon or Assyria. Discoveries made in the country itself confirm this view. They exhibit to us Susa, the Elamite capital, as one of the most ancient cities of the East, and show that its monarchs maintained, throughout almost the whole period of Persian and Assyrian greatness, a quasi-independent position, and that it was the home of Chedor-lazur himself, whom some are inclined to identify with an early Babylonian monarch, who is called the "Ravager of the West," and whose name reads as Kudur-mapula. The Elamite empire established at this time was, however, but short in duration. Babylon and Assyria proved, on the whole, stronger powers, and Elam during the period of their
often attached. They were a warlike people, trained to arms, and especially skilled in the use of the bow (I sa. xxi. 2; Jer. xlix, 55); they roamed abroad like the Bedawin, and like them, too, were addicted to plunder (Strabo, xi, 361). Josephus mentions a town called Elymais, which contained a famous temple dedicated to Diana, and rich in gifts and votive offerings (Ant. xii. 219). He says it was situated 100 miles N. of Susa (Bochart, Opp. i, 70 sq.). Antiochus Epiphanes attempted to plunder it, but was repulsed (1 Macc. vii). It is a remarkable fact that little image of the goddess, whose Assyrian name was Anatis, were discovered by Loftus in the mounds of Susa (Chaldec, p. 379). The Elamites who were in Jerusalem at the feast of the Pentecost were probably descendants of the captive tribes who had settled in Elam (Acts ii, 9).

It has been repeatedly observed above that Elam is called Cissia by Herodotus, and Susiana by the Greek and Roman geographers. The latter is a term formed artificially from the capital city, but the former is a genuine territorial title, and probably marks an important fact in the history of the country. The Elamites, a Semitic people, who were the primitive inhabitants (Gen. x, 22), appear to have been invaded and conquered by the Hittites early in the 16th century B.C. or earlier (Strabo and Plutarch). In Susa, which is called by its primitive title without reference to subsequent changes; in the Greek writers it takes its name from the conquerors. The Greek traditions of Memnon and his Ethiopian's are based upon this Cushite conquest, and rightly connect the Cissians or Cossians of Susiana with the Cushites inhabitants of the upper valley of the Nile.

The fullest account of Elam, its physical geography, ruins, and history, is given in Loftus's Chairdans and Susians (Lond. 1856; N. Y. 1857). The southern part of the country is flat, and towards the shore of the gulf marshy and desolate. In the north the mountain ranges of Bachtiari and Luristan rise gradually from the plain in a series of calcareous terraces, intersected by ravines of singular wildness and grandeur. Among these mountains are the sources of the Ulai (Loftus, p. 306). The chief towns of Elam are now Shuster ('little Shush') and Disful; but the greater part of the country is over-run by nomad Arabs. See ELMITE.

2. (Sept. Σεσμολοχία v. Σεσμολοχία, also 'Σεσμόλοχαι and 'Σεσμόλοχα; Vulg. Elam.) A Korhite Levite, fifth son of Meshheleunah, one of the Bnei-Asaph, and superintendent of the fifth division of Temple wardens in the time of king David (1 Chron. xxvi, 8). B.C. 1014.

3. Sept. Σραμολοχία v. Σραμολοχία, Vulg. Elam.) A chief man of the tribe of Benjamin, one of the sons of Shashak, resident at Jerusalem at the captivity or on the return (1 Chron. i, 50). B.C. 537.

4. (Sept. 'Aλημ, 'Ηλιος, Vulg. Elam.) "Children of Elam," Bene-Elam, to the number of 1254, returned with Zerubbabel from Babylon (Ezra ii, 7; Neh. vii, 12; 1 Esdr. v, 12), and a further detachment of 71 men with Ezra in the second caravan (Ezra vili, 7; 1 Esdr. viii, 30). It was one of this family, Shechaniiah, son of Jehiel, who encouraged Ezra in his efforts against the indiscriminate marriages of the people (Ezra x, 2, text בֵּיתָל, i.e. בֵּית עָלָם, Olam), and six of the Bene-Elam accordingly put away their foreign wives (Exx x, 26). The lists of Ezra ii and Neh. vii contain apparently an irregular mixture of the names of places and of persons. In the former, ver. 21-34, with one or two exceptions, are names of places; 3-12, on the other hand, are not known as names of places, and are probably of persons. No such place as Elam is mentioned as in Palestine, either in the Bible or in the Onomasticon of Eusebius, nor has since been discovered as existing in the country, although Schwarz endeavors (Polest. p. 143) to give the word a local reference to the grave of a Samaritan priest El, at a village named by him as אַרְיָם ben-Elam, on the bay, 8 miles N. of Damascus. See Harim. Most interpreters have therefore concluded that it was a person. B.C. ante 536. It is possible, however, that this and the following name have been borrowed from No. 1, perhaps as designating Jews who resided in that region of the Babylonian dominions during the captivity.

5. In the list of the Jews who were in Jerusalem at the feast of the Pentecost, were probably descendants of the captive tribes who had settled in Elam (Acts ii, 9).

The coincidence of the numbers is curious, and also suspicious, as arguing an accidental repetition of the foregoing name. B.C. ante 536.

6. (Sept. 'Aλημ, Vulg. Elam.) One of the sacerdotes or Levitical singers who accompanied Nehemiah at the dedication of the new wall of Jerusalem (Neh. xii, 42). B.C. 446.

7. (Sept. 'Aλημ, Vulg. Elam.) One of the chiefs of the people who signed the covenant with Nehemiah. (Neh. xii, 43). B.C. 446.

B'Elamaburishiah. Elam'ay, Elam'may, in the plural 'Elim'may, Gr. Elam'men, Strabo, Plutarch, or 'Ele'ma-ras, Acts ii, 9; Vulg. Elam'me.) This word is found in the O.T. only in Ezra iv, 9, and is omitted in that place by the Sept. translators, who probably regarded it as a gloss upon "Susanchites," which had occurred only a little before. The Elamites were the original inhabitants of the country called Elam; they were the descendents of them, and drew their name from an actual man, Elam (Gen. x, 22). It has been observed in the preceding article that the Elamites yielded before a Cossian or Cushite invasion. See ELAM. They appear to have been driven in part to the mountains, where Strabo places them (xii, 13, § 6; xvi, 1, § 17), in part to the coasts, where they are located by Penelomy (vi, 8). Little is known of their manners and customs, or of their ethnic character. (See Müller, in the Journal Asiatic, 1839, vii, 299; Wahl, Amm. p. 603; Mannert, Geogr. V, ii, 158; comp. Flattarch, Vit. Pomp. 36; Justin, xxxvi, 1; Tacit. Ann. vii, 44). Strabo says they were skillful archers (xv, 3, § 10; comp. Xenoph. Cyrop. iv, 1, 16; Livy, xxxvi, 48; Appian, Syr. 82), and with this agrees the notices both of Isaiah and Jeremiah, the latter of whom speaks of "the bow of Elam" (xlix, 35), while the former says that "Elam bare the quiver" (xxxi, 6). Isaiah also adds in this place that they fought both on horseback and on chariots. They appear to have retained their national with peculiar tenacity, for it is plain from the mention of them on the day of Pentecost (Acts ii, 9) that they still at that time kept their own language and dress. (B.C. 30 B.C.) They have been noticed by them as a people by Plutarch, as Elym'ians, and in 1 Macc. vi, 1, mention is made of a city Ely'maïs (q. v.).

B'el'asha'ah (some El'as'ah). (Heb. Elak'asăh, אֶלָכָּשׁ, whom God made; Vulg. Elasa). the name of four men (variously Anglicized in the A.V.). See also El'asha

1. (Sept. El'āshād.) The son of Helez, and father of Sisamah; one of the descendants of Judah, of the family of Hezron (1 Chron. ii, 52, A.V. "Eel'sahah"). B.C. post 1046.
2. (Sept. ‘Bekōn v. r. ’Ελαθ, A. V. "Elishah.") A son of Rapha or Rehbarah, and father of Azel; descendant of king Saul through Jonathan and Meribaal or Mephibosheth (1 Chron. viii. 37; ix. 43). B.C. considerably ante 588.

3. (Sept. Εἰλαθ, A. V. "Elishah.") The son of Shiphah; one of the two men who were sent from Bani to see the kingdom of Nechochadnazar at Babylon after the first deportation from Jerusalem, and who at the same time took charge of the letter of Jeremiah the prophet to the captives in Babylon (Jer. xxix. 3). B.C. 694.

4. (Sept. הֵלָת, A. V. "Elath.") One of the five sons of Helbah, whose name was pronounced to Nechochadnazar, the king of Babylon (Ezra x. 22). B.C. 458.

Elath (Heb. עֵילָת, ‘elāṭ, grow, perhaps of terebinth-trees; occurs in this form Deut. ii. 8; 2 Kings xiv. 22; xvi. 6; also in the plur. form יְלָת, ‘elāṯı̂m [q. v.], 1 Kings ix. 26; 2 Chron. viii. 17; xxvi. 6; "Elath.", 2 Kings xvi. 6; in the Sept. Αἰλάθ and Αλαμάω; in Joseph. [Ant. viii. 6, 4] Αλαμών; in Jerome, Αἰλάθ [who says that in his day it was called Αἰλάθ by all the kings]; also in other Greek authors; αἰλάθ in Arabic writings occurs; the name διακόπτει παλαιστίνας, ‘Elāth (Patol. v. 17, [Ἀλαμών Strabo, xvi. 708, comp. Pliny, v. 12; vi. 32]; in Arabic authors ‘Aila, a city of Idumea, having a port on the eastern arm or gulf of the Red Sea, of which the native name was given, Elatha or Elath of ‘Akabah. According to Eusebius (Onomast. s. v. Ἐλαδσ), it was ten miles east from Petra. It must have been situated at the extremity of the valley of El-Gbor, which runs at the bottom of two parallel ranges of hills, north and south, through Arabia Petraea, from the Dead Sea to the northern parts of the Eleanitic Gulf; but on which side of the valley it lay has been matter of dispute (see M’Culloch’s Geog. Dict. s. v. Akabah). In the geography of Arabia it forms the extreme northern limit of the province of the Hijaz (El-Makrizi, Khiat; and Marisid, s. v.; comp. Arabia), and is connected with some points of the history of the country. According to several native writers the district of Elath was in very ancient times peopled by the Sameyda, said to be a tribe of the Amalekites (the first Amalek). The town itself, however, is stated to have received its name from Eliezer, son of Midian (El-Makrizi, Khiat), or, by some (Caussin’s Essai sur l’histoire des Arabes, i. 23), from the Amalekites, if we may credit the writings of Arabic historians, passed in the earliest times from the neighborhood of the Persian Gulf through the peninsula (q. v.), and finally passed into Arabia Petraea. Future researches may trace in these fragments of primeval tradition the origin of the Phoenicians. Herodotus seems to strengthen such a supposition when he says that the latter people came from the Erythrean Sea. Were the Phoenicians a mixed Cushite settlement from the Persian Gulf, who carried with them the known maritime characteristics of the peoples of that stock, developed in the great commerce of Tyre, and in that of the Persian Gulf, and, as a link between their extreme eastern and western settlements, in the fleets that sailed from the Persian Gulf and of Elath, and from the southern ports of the Yemen? See Arabia; Capiton; Mizraim. It should be observed, however, that Tyrian sailors manned the fleets of Solomon and of Jehoshaphat (see Journ. Soc. Lit. Oct. 1851, p. 155, n.).

The first time that Elath is mentioned in Scripture is in Deut. ii. 8; in speaking of the journey of the Israelites towards the Promised Land: "When we passed by from our brethren the children of Esau, which dwelt in Seir, through the way of the plain from Elath, and from Ezion-geber." These two places are mentioned together again in 1 Kings ix. 26 (comp. 2 Chron. viii. 17), in such a manner as to show that Elath was more ancient than Ezion-geber, and was of so much repute as to be used for indicating the locality of other places: the passage also fixes the spot where Elath itself was to be found: "and king Solomon made a navy of ships in Ezion-geber, which is beside Elath, on the shore (Num. xxxii. 38) of the Red Sea, in the land of Edom." See Ezion-geber. Solomon discovered the vicinity of Elath shows that the country was at that time in his possession. Accordingly, in 2 Sam. vii. 14, we learn that he had previously made himself master of Idumea, and garrisoned its strong-holds with his own troops. Under Jo'zai'ah, however (2 Kings viii. 20), the Idumeans revolted from Judah, and made Elath a king over themselves. Joram thereupon assembled his forces, "and all the chariots with him," and, falling on the Idumeans by night, succeeded in defeating and scattering their army. The Hebrews, nevertheless, could not "Edom down, notwithstanding the hand of Judah unto this day;" thus exemplifying the striking language employed (Gen. xxvii. 40) by Isaac: "By thy sword shalt thou live, and shalt serve thy brother; and it shall come to pass, when thou shalt have the dominion, that thou shalt break his yoke from off thy neck." But so far as the Greek writers are concerned it appears that ‘Uzlah recovered Elath, and, having so regained and adorned the city as to be said to have built, that is, rebuilt it, he made it a part of his dominions. This connection was not of long continuance; for in chap. xvi. 6 of the same book, we find the Syrian king Rib‘a-i‘d, who captured Elath and drove out the Jews, and annexed the place to his Syrian kingdom, and "the Syrains came to Elath, and dwelt there unto this day." At a later period it fell under the power of the Romans, and was for a time guarded by the tenth legion in Syria, which afterwards was given to the King of Palæstina Tertia (Jerome, Onomast. s. v. Ailath; Strabo, xxi. 4, 4; Reland, Pallad. p. 556). It subsequently became the residence of a Christian bishop. Bishops of Elath were at the Council of Chalcedon (A.D. 451) and at that of Constantinople (A.D. 556). At the Council of Chalcedon, Beryclus thus wrote his designation as "bishop of Elath of Third Palestine" (Ἀρχιεπίς τῆς ἑπτάετῆς τριάδος). In the days of its prosperity it was much distinguished for commerce, which continued to flourish under the auspices of Christianity (Cellarius Notit. ii. 698 sq.). In the 6th century it is spoken of by Procopius as being inhabited by "Romans." From 329 A.D. the bishops of Elath were seated at successive times until the present century, Elath lay in the darkness of Islamism. It is merely mentioned by the supposed Ibn-Haukal (Engl. translation of D’Arvieux, Append. p. 535), perhaps in the 11th century; and, after the middle of the 12th, Edrisi describes it as a small town frequented by the Arabs, who were now its masters, and forming an important point in the route between Cairo and Medina. In A.D. 1118, King Baldwin of Jerusalem took possession of it. Again it was wrested from the hands of the Christians by Saladin I, A.D. 1157, and never again fully recovered by them, although the rock forming the site of Chalit-sūl, the site of Elath, was seized, and for a time held, the town. In Abuelfeda’s day, and before A.D. 1300, it was already deserted. He says, "In our day it is a fortress, to which a governor is sent from Egypt. It had a small castle in the middle of the town, but it was destroyed, and most of the houses were removed to the fortresses on the shore." Such as Elath was in the days of Abuelfeda, is Akabah now. Mounds of rubbish alone mark the site of the town, while a fortress, occupied by a governor and a small garrison under the pasha of Egypt, serves to keep the neighboring tribes of the desert in awe, and to minister the wants and protection of the annual Egyptian Hajj.
or pilgrim caravan. Under the Roman rule it lost its former importance with the transference of its trade to other ports, such as Berenice, Myos Hormos, and Arinna; but in Mohammedan times it again became a place of some note. It is now quite insignificant. It lies on the route of the Egyptian pilgrim-caravan, and the mountain-road or 'Akabah named after it was improved or reconstituted by Ahmad ibn-Tulun, who ruled Egypt from A.D. cir. 840 to 848. This place has always been an important station upon the route of the Egyptian Hajj. Such is the importance of this caravan of pilgrims from Cairo to Mecca, both in a religious and political point of view, that the rulers of Egypt, from the time of Suleiman, onwards, have given it special care and protection. For this purpose a line of fortresses similar to that of Akabah has been established at intervals along the route, with wells of water and supplies of provisions (Robinson's Biblical Researches, i, 250.). The first Frank who visited this place in meseen times was Rappell, in 1822 (Reise, p. 248 sq.). Labore (Journey through A rabia Petraea, London, 1836) was well received by the garrison and inhabitants of the castle of Akabah, of which he has given a view (i, 116). The fortress, he states, is built on a regular plan, and is in a pretty good condition, though such good habits have been suffered to fall. It has only two guns fit for service (Bartlett, Forty Days in the Desert, p. 99 sq.). The ancient name of the place is indicative of groves in the vicinity, and Strabo says it was the palm-woods of (xvi, 776), which appear still to subsist (Niebuhr, Baschir. p. 400; Schubert, ii, 379).

El-Bethel (Heb. El Beth-El, 'el béth-él, 'God of Bethel'; Sept. simply Baeth, Vulg. Domus Dei'), the name given by Jacob to the altar erected by him as a sanctuary (Gen. xxxv, 7), on the spot where he had formerly experienced the vision of the mystical ladder (chap. xxxi, 19; xxviii, 18). See Bethel.

Elcesaites. See Elkesaites.

El cia (Elcia), one of the forefathers of Judith, and therefore belonging to the tribe of Simeon (Judg. vii, 1); what Hebrew name the word represents is doubtful. Hilkiah is probably Chaldeans, two steps back in the genealogy. The Syriac version has Elkama. In the Vulgate the names are hopelessly altered.

El daih [some Eddah (Heb. Eddah, e'dah, whom God has loved; comp. Theophilos; Sept. Eddah), one of the seventy elders who had been appointed under Moses to assist in the administration of justice among the people. B.C. 1558. He is mentioned along with Medad, another elder, as having on a particular occasion received the gift of prophecy, which came upon them in the camp, while Moses and the rest of the elders were assembled around the door of the tabernacle. The spirit of prophecy was upon them all; and the simple peculiarity in the case of Eldad and Medad was that they did not lose their share in the gift, though they abode in the camp, but they prophesied there. It appeared, however, an irregularity to Joshua, the son of Nun, and seems to have suggested the idea that they were using the gift with a view to their own aggrandizement. He therefore ordained Moses to forbid them. But Moses, with characteristic magnanimity, replied, "Easiest thou for my sake? Would God that all the Lord's people were prophets, and that the Lord would put his spirit upon them!" (Num. x, 24-26).—Fairbairn, s. v. The great fact of the passage is the more general distribution of the spirit of prophecy, which had hitherto been concentrated in Moses; and the implied sanction of a tendency to separate the exercise of this gift from the service of the tabernacle, and to make it more generally available for the enlightenment and instruction of the Israelites, a tendency which afterwards led to the establishment of "schools of the prophets." The circumstance is in strict accordance with the Jewish tradition that all the prophetic inspiration arose originally from Moses, and was transmitted from him by a legitimate succession down to the time of the captivity. The mode of prophecy in the case of Eldad and Medad was probably the extempore production of hymns, chanted forth to the people (Hammond); comp. the case of Saul, 1 Sam. x, 11. From Num. x, 25, it appears that the gift was not merely intermittent, but a continuous energy, though only occasionally developed in action. See Prophecy.

ElDER (properly ἔλευθος, sakos; πρεσβύτερος, a term which is plainly the origin of our word "priest,; Sax.-on preos, and pret)e; then priest, High and Low Dutch priest, French prêtre and prêtre, Ital. prete, Span. presbítero, due to the origin of the words yuqawwā (a council of elders), senatus, alderman, etc.)

I. In the O. T.—The term elder was one of extensive use, as an official title, among the Hebrews and the surrounding nations. It applied to various offices; Eil-ezer, for instance, is described as the "elder of the house," i.e. the major-domo (Gen. xxiv, 2); the officers of Pharao's household (Gen. i, 7, and, at a later period, David's head servants (2 Sam. xii, 17) were so termed; while in Ezek. xxxiii, 3 the "old men of Gebal" are the master-servants. But the term "elder" appears to be also expressive of respect and reverence in general, as aigneur, seigneur, senator, etc. The word occurs in this sense in Gen. i, 7, "Joseph went up to bury his father, and with him went up all the servants of Pharao, the elders of his house, and all the elders of the land of Egypt. (See of the old ones, Vulg. et ren.) These elders of Egypt were probably the various state officers. As betokening a political office, it applied not only to the Hebrews and Egyptians, but also to the Moabites and Midianites (Num. xxii, 7). The elders of Israel, of whom such frequent mention is made, may be said, in early times, to have been the descendants of the patriarchs (Exod. xii, 21). To the elders Moses was directed to open his commission (Exod. iii, 16). They accompanied Moses in his first interview with Pharao, as the representatives of the Hebrew nation (ver. 16); through them Moses issued his communications and commands to the whole people (Exod. xix, 7; Deut. xxxi, 9); they were his immediate attendants in all great transactions in the wilderness (Exod. xvii, 5); seventy of their number were selected to attend Moses, Aaron, Nadab, and Abihu, at the giving of the law (Exod. xix, 7); on which occasion they are called the nobles (τὸν ἀνθρώπον, lit. deep-rooted, i.e. of high-born stock; Sept. ἀνθρώποι) of the children of Israel, who did eat and drink before God, in ratification of the covenant, as representatives of the nation (ver. 11). In Num. x, 16, 17, we meet with the appointment of seventy elders to bear the burden of the people along with Moses; and these were selected by Moses out of the whole number of the elders, and are described as being already officers over the children of Israel. It is the opinion of Michaelis that this council chosen to assist Moses should not be confounded with the Sanhedrim, which, he thinks, was not instituted till after the Babylonish captivity. See SASHEDOR. He ob
ELDER

See COURSIC. Thus they are associated sometimes with the chief priests (Matt. xxvii, 23), sometimes with the chief priests and the scribes (Matt. xvi, 21), or the council (Matt. xvi, 59), always taking an active part in the management of public affairs. Luke describes the whole order by the collective term πρεσβυτεροι, i.e. eldership (Luke xvi, 16; Acts xxii, 5). Like the scribes, they obtained their seat in the Sanhedrin by election, or nomination from the executive authority. See Acts.

II. In the New Testament and in the Apostolic Church. In the New Testament we find eldership (πρεσβυτερίον) which was planned and functions of the eldership in the N.T. and in the early Church are treated at some length, especially with regard to the question of the original identity of bishops and presbyters (or elders). Referring our readers to that discussion, we add here the following points.

1. Origin of the Office.—In the Apostolic Church, § 120. The origin of the eldership in the Christian Church is given in the N.T. "The demand for it arose, no doubt, very early; as, notwithstanding the wider diffusion of gifts not restricted to office, provision was to be made plainly for the regular and fixed instruction and conduct of the church, as also which were planned and functions of the leadership in the N.T. and in the early Church are treated at some length, especially with regard to the question of the original identity of bishops and presbyters (or elders). Referring our readers to that discussion, we add here the following points.

1. Origin of the Office.—In the Apostolic Church, § 120. The origin of the eldership in the Christian Church is given in the N.T. ELDER

of good behavior, given to hospitality, up to teach (ἐκτητὸς), etc.; so also Tit. i. 5, where it is required of a bishop that he shall 'hold fast the faithful word as he hath been taught (ἀντὶκρυμένων τοῦ καθ' ἐμν ζητῆσαι πνεύμονά λόγον), that he may be able by sound doctrine both to exhort and to convince the gainsayers. For the term may be used of a pastor, as well as of the persons mentioned in the three epistles of St. John. The word is applied to elders in the apostolic age who were not in their own persons dignified with the name of bishop. The churches would scarcely be able (as they were mostly poor) to provide stipends at first for their pastors' (Neander). Nevertheless, men specially called and fitted for the work, and devoted to it, were enrolled by the Christian law, as set forth by the apostles, to be supported by the people; but there was no distinction of rank, honor, or authority between those elders who had stipends and those who had none, unless, indeed, the latter, who, following Paul’s example, ‘worked with their own hands’ (1 Cor. xvi. 12), may not have been more highly favored in the arrangements of the primitive church. The principle of a full-time priestly title may stand apart from stipend is fully recognized in modern times in the system of local preachers (q.v.) in the Methodist Episcopate (see Steward, On Church Government, Lond. 1855, p. 128).

The term ‘elder’ is also used of the synagogues, as well as of the political administration of cities, which from of old was vested in the hands of a senate or college of decurions, every church had a number of preachers. We meet them everywhere in the plural and as a corporation: at Jerusalem, Acts xiii. 6; xvi. 16; xvi. 18; and Ephesus, ch. ii. 14, etc. In the Acta of Timothy, 1 Tim. iv. 14, where mention is made of the laying on of the hands of the presbytery; and in the churches to which James wrote, James v. 14: ‘Is any sick among you? let him call for the presbyters of the church, and let them pray over him,’ etc. The term ‘presbyter’ is imported by the New Testament (Acts xiv. 23) that Paul and Barnabas ordained elders for every church, several of them of course, and still more clearly by the direction given to Titus (Tit. i. 5) to ordain elders, that is, a presbytery of such officers, in every city of Crete. Some learned men, indeed, have imagined that the number named in the largest church and in several congregations, while, however, each of these had but one elder or bishop; that the principle of congregational polity thus from the beginning was neither democratic nor aristocratic, but monarchial. But this view is not sustained by any one of the primitive, theological, or scriptural texts, which the preachers appear as a college, as well as by the associative tendency which entered into the very life of Christians from the beginning. The household congregations (εἰκονὶς καὶ εἰκόνα), which are often mentioned and quoted (Rom. xvi. 4, 14, 15; 1 Cor. xvii. 20; Col. iv. 15; Phil. ii. 2), indicate merely the fact that where the Christians had become very numerous they were accustomed to meet for edification at different places, and by no means exclude the idea of their organized union as a whole, or of their being governed by a common body of preachers. Hence we find: (a) That the title presbyter applied also to elders never addressed to a separate part, an ecclesia in ecclesia, a conventicle, but always to the whole body of Christians at Rome, at Corinth, at Ephesus, at Philip- phi, at Thessalonica, etc., treating them in such case as a chargeable (ἐπικεφαλίσθησις) to the people themselves; (b) Col. i. 3; 2 Cor. i. 2; v. 1 sq. ; 2 Cor. i. 1, 28; ii. 1 sq. ; Col. iv. 16; Phil. i. 1, etc.). Whether a full parity reigned among these collegiate presbyters, or whether one, say the eldest, constantly presided over the rest, or whether, finally, one followed another in such presidency as presus inter presus by some certain rotation, cannot be distinctly determined from the N. T. The analogy of the Jewish synagogue leads here to no entirely sure result, since it is questionable whether a particular presidency belonged to its eldership as early as the time of Christ. Some sort of presidency, indeed, would seem to be almost indispensable for any well-organized government and the regular transaction of business in the church, even, sexuistically, the case of these primitive Christian presbyteries, only the particular form of it we have no means to determine’ (Schaaff, 1. c.).

III. In the Early Church (post-apostolic).—Very soon after the apostolic age the episcopacy arose, first in the smaller communities, after the congregation had lived in a synaxis. See EPISCOPACY. Until the full development of the latter, elders or presbyters were the highest order of ministers. No trace of ruling elders, in the modern sense, is to be found in the early Church. There was a class of seniores ecclesiæ in the African Church, who some writers have corresponded to the ruling elder; but Bingham clearly shows the contrary. The name occurs in the writings of Augustine and Optatus. In the Diocletian persecution, when Menasurius was compelled to leave his church, he committed the ornaments and utensils to a presbyter for safe keeping (Epist. 128). In the works of Optatus there is a tract called ‘the Purging of Felix and Cecilian,’ where is mention of these seniores. Augustine inscribes one of his epistles, Clera, seniores et universae ecclesiae (cfr. the clerk of the clergy and the whole people) (Epist. 187). According to Bingham, some of these seniores were the civil optimates (magistrates, aldermen); the Council of Carthage (A.D. 408) speaks of magistratus vel seniores locorum. Others were called seniores ecclesiastici, and had care of the church’s utensils, trusted with the education of children, and assigned to modern churchwardens or trustees (Bingham, Orig. Eccles. bk. ii. ch. xix., § 19; Hitchcock, in Amer. Presb. Review, April, 1868).

IV. In the Modern Church.—I. In the Roman Catholic Church, the Church of England, and the Protestant Episcopal Church, the word ‘priest’ is generally used instead of ‘presbyter’ or ‘elder’ to designate the second order of ministers (the three orders being bishops, priests, and deacons). See PRIEST; PŘESTY.

2. In the Methodist Episcopal Church but two orders of ministers are recognised, viz. elders and deacons, the bishop being chosen as primus inter pares, or superintend. See EPISCOPACY. For the election, ordination, duties, etc., of elders, see the Discipline of the Methodist Episcopal Church, pt. ii. ch. ii., § 15, and Appendix, ch. i. The presbyter, or presbytery, is appointed by the bishop, once in four years, to superintend a district. For the nature and functions of this office, see PRESENTING ELDERS.

3. Among Congregationalists, the only Church officers now known are elders (or ministers) and deacons. Ruling elders were first of all recognized in the Cambridge platform (q.v.), and their duties particularly pointed out; but neither the office itself nor the reasons by which it was supported were long approved. Ruling elders never were universal in Congregationalism, and the office was soon everywhere rejected (Upham, Ratio Disciplinæ, 184, 185, etc., Daedale, On Congregationalism, 43, etc.).

4. Among Presbyterian churches (i.e. all which adopt the Presbyterian form of government, whether designated by that name or not) there are generally two classes of elders, teaching and ruling elders. The teaching elders constitute the body of pastors; the ruling elders are laymen, who are set apart as assistants to the minister in the oversight and ruling of the flock. Together with the minister, they constitute the Session, the lowest judiciary in the Church. See PRESBYTERIAN CHURCH. They cannot administer the sacraments, but aid at the Lord’s Supper by distributing the elements to the communicants.
1. In Scotland, ruling elders constitute, with the ministers, the "Kirk Session." The Form of Government annexed to the Confession of Faith asserts that "as there were in the Jewish Church elders of the people, joined with the priests and Levites in the government of the Church, so in the Christian Church, besides the ministers of the Word, with gifts for government, and with commission to execute the same when called thereunto, who are to join with the minister in the government of the Church, which officers respect is commonly called "elders." Those elders are chosen from among the members, and are usually persons of tried character. After their acceptance of office, the minister, in the presence of the congregation, sets them apart to their office by prayer, and sometimes by imposition of hands, and concludes the ceremony of ordination by exhorting both elders and people to discharge their respective duties. They have no right to teach or to dispense the sacraments. 'They generally discharge the office, which originally belonged to the deacons, of attending to the interests of the poor and the sick, of making frequent visits among the members by the name "ruling elders;" for in every question of jurisdiction they are the spiritual court of which the minister is officially moderator, and in the presbytery—of which the pastors within the bounds are officially members—the elders sit as the representatives of the seven years of advancement, selected from the people to unite with the bishops in giving admonition, and exercising discipline. No other interpretation can be given of 'He that ruleth, let him do it with diligence' (Rom. xii, 8). . . . Now that this was not the regulation of a diocesan archbishop, it is not surprising. This passage, however, occurs first in the 8th edition of the Institutes, 1548; it is not found in the editions of 1568 or 1569. The office of lay elders had existed before among the Unitas Fratrum, who were supposed to have borrowed it from the Waldenses; but these lay elders were more in the way of being superintendents than elders. Calvin himself organized a lay eldership in Geneva, to be elected yearly, and seems afterwards to have sought a Scriptural warrant for it. In so doing he formed a novel theory, viz., that of a two-fold eldership. 'This cardinal assumption of a dual presbyterate was controverted by James Panton in his Presbyterian Churches (1838), and by Thomas Smyth in his Name, Nature, and Functions of Ruling Elders (1845). The drift of critical opinion is now decidedly in this direction. It is beginning to be conceded, even among Presbyterians of the staunchest sort, that Calvin was mistaken when he interpreted the expression 'two orders of presbyters' as meaning that two orders of presbyters are not there brought to view, but only one order, the difference referred to being simply that of service, and not of rank. And if this famous passage fails to justify the dual presbyterate, much less must it rely upon the ἐξουσία τῆς ἡττας, that ruleth with diligence' (1 Cor. xi, 28). Chapter xiii gives the rules for the election and ordination of ruling elders. Each congregation elects 'according to the mode most approved and in use in that congregation;' and the whole procedure is very similar to that of the U. F. Church rectified above. The order of ordination—"by the right hand of fellowship," not by imposition of hands. The office is perpetual. The elders, with the pastor, constitute the Session; one elder from each church is a member of Presbytery and Synod; and one for every twenty-four ministers in each presbytery is sent to the General Assembly. In the Reformed Church the elders are chosen for two years only, by the congregation or by the Consistory (Constitution of the Ref. Dutch Church, ch. i, art. iii). They are entitled to membership in Classis and Synod as delegates (Constitutions, 1849). There is a form given in the book for their ordination, without imposition of hands. So also in the new liturgy prepared for the German Reformed Church.

2. Ruling Elders.—The distinction between teaching and ruling elders originated with Calvin, and has diffused itself among the churches. The Reformed Churches adopt the Presbyterian form of government; and the authority of the N. T. is claimed for it (see above, 2) in the Presbyterian "Form of Government" (bk. i, ch. v); in the Reformed Church Form of Ordination (Constit. p. 118); in the Lutheran Church Formula of Concord (art. 64); and in the Congregationalists of New England admitted this distinction for a while (see above), but soon abandoned it.

Calvin (Institutes, bk. iv, chap. iii, § 8) seeks a Scriptural basis for lay eldership as follows: 'Governors (1 Cor. xii, 2) I apprehend to have been persons of advanced years, selected from the people to unite with the bishops in giving admonition, and exercising discipline. No other interpretation can be given of 'He that ruleth, let him do it with diligence' (Rom. xii, 8). . . . Now that this was not the regulation of a diocesan archbishop, it is not surprising. This passage, however, occurs first in the 8th edition of the Institutes, 1548; it is not found in the editions of 1568 or 1569. The office of lay elders had existed before among the Unitas Fratrum, who were supposed to have borrowed it from the Waldenses; but these lay elders were more in the way of being superintendents than elders. Calvin himself organized a lay eldership in Geneva, to be elected yearly, and seems afterwards to have sought a Scriptural warrant for it. In so doing he formed a novel theory, viz., that of a two-fold eldership. 'This cardinal assumption of a dual presbyterate was controverted by James Panton in his Presbyterian Churches (1838), and by Thomas Smyth in his Name, Nature, and Functions of Ruling Elders (1845). The drift of critical opinion is now decidedly in this direction. It is beginning to be conceded, even among Presbyterians of the staunchest sort, that Calvin was mistaken when he interpreted the expression 'two orders of presbyters' as meaning that two orders of presbyters are not there brought to view, but only one order, the difference referred to being simply that of service, and not of rank. And if this famous passage fails to justify the dual presbyterate, much less must it rely upon the ἐξουσία τῆς ἡττας, that ruleth with diligence' (1 Cor. xi, 28). In short, the pure divino theory of the lay eldership is
steadily losing ground. A better support is sought for it in the New-Testament recognition throughout of the right and propriety of lay participation in Church government; in the general right of the Church, as set forth by Hooker in his Ecclesiastical Polity, to govern itself by whatsoever forms it pleases, provided the great end and purpose be to elevate and in the proved fitness and efficiency of our present Presbyterian polity, as compared either with prelacy on the one side, or Congregationalism on the other’ (Hitchcock, in A. M. Presb. Rev. 1868, p. 253). Dr. Thornwell (Southern Presb. Review, 1863; Spirit of the XIXth Century, in A. M. Presb. Rev. 1863). July, 1867) sets forth a peculiar theory of the divine right of the ruling eldership, viz. that the ruling elder is the presbyter of the N.T., whose only function was to rule, while the preachers were generally selected from the class of elders. This view is also maintained by Breckinridge (Knowledge of God, subjectively considered, p. 629) and is refuted by Dr. Smyth, Princeton Review, vol. xxxiii (see also Princeton Review, xv, 319 sq.). Principal Campbell (Theory of Ruling Elderships, Edinburgh and London, 1866) aims to show that ‘elders’ in the N. T. always means pastor, and never ministerial leader, more than ‘ruling elder’ (see ibid., and For. Exam. Rev., Jan. 1866, p. 222). He shows that the Westminster Assembly, after a long discussion, refused to sanction Calvin’s view; but he seeks to find lay elders, under another name, in Rom. xii, 8; 1 Cor. xii, 28, also in early Church history. For a criticism of his view, and a luminous statement of the whole subject of lay eldership, with a conclusive proof that there is no trace of it in the N. T., see Dr. Hitchcock’s article in the American Presbyterian Review, April, 1868, p. 253 sq. See also an able critical and historical discussion of the subject in Dexter, Congregationalism (Boston, 1865), p. 120 sq. The scriptural right of lay elders is maintained in The divine Right of Church Government, with Dr. Owen’s Argument in Favor of Ruling Elders (New York, 1844, 12mo); in Miller, On Ruling Elders (Presb. Board, 16mo). See also King, Eldership in Christ’s Church (New York, 1865). H. Muhlenberg, On the Office of Ruling Elders; Kerferd, Office of Ruling Elders (London, 1846); Engles, Duties of Ruling Elders (Presb. Board); Smyth, Name, Nature, and Functions of Ruling Elders (N. T. 1845, 12mo); Bingham, Orig. Eccles. bk. ii, ch. xx, § 19; Gieseler, Church History, bk. ii, ch. xix, § 28; Stier, Elements of Church Training, bk. ii, c. vii; Davidson, Eccl. Polity of N. T.; Watson, Theol. Institutions, pt. iv, ch. i; Schaff, Apostolic Church, § 123, 132; Rothe, Anfänge d. christlichen Kirche, § 28, 29; Bilson, Perpetual Government of Christ’s Church, Owen, Works (Edinburgh, 1851), xvi, 504.

Belyad (Heb. Ekd, יִאַדָּא, whom God has appealed; Sept. Εὐθυς, Vulg. Eligens), a descendant of Ephraim (1 Chron. vii, 21), but whether through Shuthelah (v. q.), or a son of the patriarch (the second Shuthelah being taken as a repetition of the first, and Exer and Elyad as his brothers), is not determined (see Berthau, Comment on Chronicles, p. 82). B.C. ante 1356. Perhaps he is the same with ELADAH (q. v.) in the preceding verse, who appears to have survived, if identical with IADAN (Num. xxxvi, 36).

Eileath (Heb. אֵילָה, מֹּדְלָה, whither God has ascended, once Eile’t, אֵילֶּה, Num. xxxii, 37; Sept. Εἰλάθ), a place on the east of Jordan, in the pastoral country, taken possession of and rebuilt by the tribe of Asher (Josh. xiii, 31). We lose sight of it till the time of Isaiah and Jeremiah, by both of whom it is mentioned as a Moabitish town, and, as before, in close connection with Heshbon (Isa. xxv, 4; xvi, 9; Jer. xlviii, 34). It apparently lay close to the border of Reuben and Gad (Josh. xiii, 28). On the decline of Jewish power, Eileath, with the whole Mishor, fell into the hands of the Moabites, and is thus included in the woes pronounced by Isaiah on Moab (xvi, 9); “I will water thee with my tears, O Heshbon and Eleath: for the alarm is fallen upon thy summer fruits, and thy harvest.” Eileath was still a large village in the time of Eusebius and Jerome, one mile from Heshbon (Onomasticon, s. v. Εἰλαθ, Elelæa). The extensive and very nearly their ancient name, Εἰλαθ, though with a modern significance, “the high,” a little more than a mile north of Heshbon (Robinson, Researches, ii, 278). It stands on the summit of a rounded hill commanding a very extended view of the plain, and the whole of the southern Bexit (Burckhardt, Reise, ii, 365; Stee- zen, 1864, p. 407). The whole surrounding plain is now desolate. The statements of all travellers who have visited it show how fully the prophetic curses have been executed (Irby and Mangles, 1st ed. p. 471; Ritter, Pfl. and Syr. ii, 1172; G. Robinson’s Pseudo- and Syr. ii, 1180 sq.).

Elyas (Elias, Alex. MS. Αλέκας; Vulg. Elea-, a place at which Judas Maccabaeus encamped before the fatal battle with Baccichides, in which he lost his life (1 Macc. ix, 5). It was apparently not far from Azotus (comp. ver. 15). Josephus (Ant. xii, 11, 1) has Bethzeba (בֶּתֶזֶבָה), by which he elsewhere renders Baytzeba, and this may be but a corrupt writing of Bethzetra or Bethzeba, which is found in some MSS. for Barea in 1 Macc. ix, 4. Elsewhere (War, i, 1, 6), however, Josephus states that Judas lost his life in a battle with the generals of Antiochus Epiphat at Adaia (q. v.), which is probably the correct reading here, since Adaia was where Judas had encamped on a former memorable occasion (1 Macc. vii, 40). It is singular that Bethzetra should be mentioned in this connection also (see verse 19).

Elyasah [many E·layash], the name (in the A. V.) of two men (1 Chron. ii, 89; viii, 37; ix, 43), identical (in the Heb.) with that of two others (Jer. xxii, 5; Ezra x, 22), more properly Anglicized Elyasah (q. v.).

ELEATIC SCHOOL, the designation given to an early and brilliant sect of Greek philosophers. The name was bestowed in consequence of the residence or birth of the chiefs of the school at Elea or Vela, a town on the western coast of Italy, founded in 544 by the Phoceans, who abandoned their Ionian home rather than submit to the arms of Cyrus. The general characteristic of this type of speculation is the maintenance of a broad and irreconcilable distinction between the apparent and the intellectual universe—between transitory phenomena and eternal truth. It is thus contrasted with the earlier Ionic School, which was largely materialistic, and based its fundamental material principles as the origin of the world, and with the Pythagorean School, which assigned a mathematical basis for the creation. But it exhibited several points of contact with these more ancient doctrines, and hence both Empedocles and Democritus are sometimes enumerated among the Eleatics. In its wider acceptance, the Eleatic philosophy includes the pantheistic idealism of Xenophanes and Parmenides, and the sceptical materialism of Leucippus and Epicurus, embracing both extremes of metaphysical thought. It may thus be distributed into two main divisions:

1. The Eleatic School proper, which asserted a divine unity to be the origin and essence of all things, regarded multiplicity as only the manifestation of the incessant activity of this divine unity, considered all change as merely phenomenal, and all temporal facts as only the semblance of spiritual shows of things, believing that the only true existence was the one indiscernible divine Essence, which underlay, determined, animated, and enclosed the whole sensible and intelligible order of the universe.

2. The Atomistic or Epicurean School, which confused attention to the earthly and material side of the problem, not denying the immaterial and spiritual, but
renouncing it as unattainable. Its position may be appreciated by comparing it with the modern schemes of Molochott, Herbert Spencer, and Comte. It took note only of the temporal and perishable side of the universe, and adopted a sound basis for its reasons by supposing the eternity and indestructibility of the elementary constituents of matter.

Thus the two branches of the school, or the two schools, starting from the same point, but pursuing divergent courses, arrived at exactly opposite conclusions. The Eleatics disregarded the sensible, the Epicureans the divine element; the former contemplated the imperishable, the latter the perishable aspects of the universe. But one, neither denying what they denounced.

In the present article, the Eleatic School proper will alone be considered; for a notice of the other branch, reference is made to the title Epicurean Philosophy.

**History of the Eleatic Philosophy.**—The shadowy and impalpable character of the Eleatic doctrine renders it peculiarly difficult of determination, because it admits of many modifications, and of a great variety of explications and limitations. Another difficulty arises from the fact that the sources of our knowledge are confined to the uninitiated fragments of Xenophanes, Parmenides, to the statements of their adversaries, Plato and Aristotle, to Diogenes Laërtius, who is by no means a reliable witness, and to a few other relics of antiquity. There is, consequently, more uncertainty in regard to the tenets of this school, and to the interpretation given to them by their advocates, than in regard to any other of the Greek sects except the Pythagoreans. After all the diligence of Fulleborn, Brandis, Karsten, Cousin, and other inquirers, there is much doubt whether we are ascribing to the Eleatic leaders positions which they deliberately held, or are imposing our own conjectural interpretations upon their doctrines. The general complexion of the school is, however, readily recognized.

The Eleatic School is rather united by a common principle than by agreement in the application of the principle (as Aristotle, Metaphysics, i, v). Each distinguished philosopher of the sect creates his own scheme, and differs in procedure and in doctrine from the rest: hence it is impracticable to give any general exposition which will be true for its whole development, and it therefore becomes necessary to consider the peculiar modifications as they assumed in the hands of its successive teachers. The principal exponents of the Eleatic philosophy were Xenophanes, Parmenides, Zeno, and Melipus: the first of these was its founder. The period during which they flourished may be considered to extend over the century preceding the Ptolemaic Age. But the chronological data are confused and uncertain.

_Xenophanes._—Xenophanes of Colophon, in Asia Minor, an exile from his native land, migrated to Sicily, and may have resided in Elee, whose foundation he celebrated verse. The dates are uncertain; but Cousin, in an elaborate essay, fixes his birth in the 40th Olympiad (B.C. 620-616), and he lived nearly a century. His philosophy was presented in a metrical form in his poem On Nature, of which fragments remain, though they are too broken and obscure to give any conception of his tenets. His leading doctrines, as far as they can now be ascertained, appear to have constituted an indistinct, confused, and undeveloped idealism, remarkable at the period of their introduction, but requiring expansion and rectification before they could be arranged in any harmonious system. They are rather germs of thought than precise principles. They needed the acute logical intellect of Parmenides to give them consistency, as the Socratic speculations received definite form from Plato.

Parmenides probably deviated as far from the simple reveries of Xenophanes as Plato did from the practical maxims of Socrates. Xenophanes apparently adopted from Pythagoras, either directly or indirectly, the conclusion that there must be an ultimate term of being, which was not the sensible universe, but the divine intelligence. But Pythagoras distinguished between God and nature; while Xenophanes, by exaggerating, confused this distinction, and resolved everything into a single divine essence. He denied all beginning, and therefore that anything could have existed which had not always been. The doctrine ex nihilo nihil fit had with him a broader and deeper significance than it received from Epicurus, and his Roman expositor, Lucretius. If nothing commences and nothing becomes, then all things are eternal, and all things are one. The unity of the Godhead is this essential against polytheism; the individuality of the Deity against the dualism of conflicting forces. This antagonism to the current creed and prevalent speculations is developed in his attacks on Homer, Hesiod, and the whole Hellenic mythology, and by his earnest repudiation of the world as a mere dream. The possibility of the sensible world is necessarily rejected: God and the universe are identified, and a close approximation is made to Spinozaism, though not without essential differences. The only reality is the divine intelligibility; there is no God, no Spaced are (Diogenes Laërt, ix, x, six). Everything cognizable by the human senses represents merely the accidents and shows of things. The sensible world is in an unceasing flux, but the divine essence is unchanging, unchangeable, unmovable, incapable of being moved, impassive, eternal, infinite, though possessing spherical dimensions. It is uncomprehended, one (πᾶν ἀπόστροφος ἀπὸ δύναμιν—πάν ὁ ἄλογος—καταλαμβάνειν—καταλαμβάνειν—καταλαμβάνειν—καταλαμβάνειν—καταλαμβάνειν—καταλαμβάνειν—καταλαμβάνειν—καταλαμβάνειν—καταλαμβάνειν—καταλαμβά

De Xeno. i. 1: "unum esse omnia, neque id esse mutabile, et id esse Deum, neque natum unumquemque, et semper- num, cum tam multa spectantur quae sint in hac mundo, quam in aetatibus tuis." All change is but apparent—the restless play of colors on the surface of the immanent Existence—the incessant agitation of the waves on the bosom of the boundless and unalterable deep. There is no denial of the actuality of sensible facts and changes; there is a denial of all accidents which are the hindrances of the eternal, the mists and vapors that disguise and conceal the eternal infinite One.

Unquestionably there are contradictions involved in this scheme, but the acceptance of antinomies is one of the most striking characteristics of the doctrines of Xenophanes. Naturally and necessarily it is necessary to declare all things incomprehensible. Certain knowledge is thus impossible; all truth evaporates into opinion; scepticism is introduced—the scepticism which disregards the sensible as a delusion—the scepticism which excludes the eternal and the divine as unintelligible, or the scepticism which regards truth as unattainable. Thus the fundamental positions of the Eleatics prognosticate the age of the Sophists, and the theories of the Epicureans the Pyrrhonists and the Neo-Platonists. It is not easy to discover the exact mode in which Xenophanes interpreted the order of the sensible creation. The remarkable feature in his cosmogony is that he anticipated geology, and made it the basis of some of his deductions. He thus contributed to science the commencements of that marvellous investigation, and thus the contemplation of the ultimate, the geometrical harmonies of the universe, and divided the Copernican system. It may appear a remarkable incongruity that, after identifying God and the universe, and asserting the infinity, immutability, and eternity of the divine sensible world, the tenets of this school should both have held the periodicity of the destruction of the world—the former by water, the latter by fire. This conclusion may have been suggested
to the earlier philosopher by the fossil remains which he recognized as aqueous deposits; but it also results from the dogma that all things are in a perpetual flux except the one eternal existence. The phenomena change recurrently, the One remains unchanged.

Phenomenon philosophy, in its first eruption, was a crude idealism, an extravagant expression, in moderation in design. It was an anxious attempt to unite the operation of the omnipotence, omnipresence, and unity of the divine Intelligence with the recognition of its continual support and government of the creation. Inadequately, it tries to distinguish the individual abstractions, the materialistic tendencies, and the polytheistic creed of the Hellenic world; but in the endeavor to avoid popular and philosophical errors, it fell into the opposite extreme, and became in tendency, though not in purpose, distinctly pantheistic. It is impossible to estimate the influence between the Creator and the Creation—the distinction and the union of the intelligible and the sensible universe. To these heights the mind of man cannot soar. There is a truth of things sensible and a truth of things spiritual. Neither can be safely disregarded or more appreciated.

The world of matter, with all its changes, the world of mind, with all its intuitions and reasonings, are essentially real as the divine Being on whom they depend. But what the degree and mode of the dependence—when the dependence is interrupted and the laws imposed and put into motion is the hidden spring of natural forces, whom shall define? If Xenophanes ran into errors as hazardous as those which he resisted, he is entitled to indulgent censure when it is considered that he was the first, or among the first, to introduce into Greek speculation worthwhile, if inadequate, conceptions of the grandeur and glory, and ineffable sovereignty of the divine Intelligences.

Parmenides. The most illustrious name produced by the Eleatic School is that of Parmenides, the disciple, probably, of the founder of the sect. He was, by all accounts, a native of Elea (about 536 B.C.), and already from his childhood on, he was the chief cause for the designation habitually bestowed upon this type of philosophy. He is frequently represented as the founder of dialectics, though this distinction is given by Aristotle to his pupil Zeno. He is, however, entitled to the credit of having given a logical development to the views of his famous teacher. So far as any authoritative exposition of his doctrines is concerned, we are in nearly as unfortunate a position as in the case of his predecessor. Insufficient fragments of his philosophical poem are preserved, but the rest of our statements must be obtained in the caricatured, or the polemics of his adversaries, and from the statements of late compilers. He is commended by Aristotle for his perspicacity, and certainly gave greater coherence to the system expounded by him. In doing so he may have improved its form at the expense of its elevation. The divinity of the universal existence disappears; for his point of departure is not the all-embracing Intelligences, but the abstract conception of being. In the main he agrees with Xenophanes, though he presents his tenets in a different order and connection. He states precisely the antithesis of the judgment of the senses and the demonstration of the reason, but he leaves it undeveloped. This has been regarded as his most important addition to the Eleatic metaphysics, though the principle is latent and presupposed in the whole speculations of the earlier philosopher. The antithesis of existence to non-existence, eternal and unchangeable, is a condition of entity and nonentity. What is cannot be non-existent; what is non-existent is not. But everything that is, exists. Hence the universality and unity of existence must be admitted; and as nothing can spring from nothing; or proceed from non-existence to existence, all existence is eternal and unchangeable. There is nothing but being; therefore there is a plenum without any vacua; and all being is thought. Being is limited, but limited only by itself, and embodied in a perfect sphere. It is independent of time, space, and motion, all of which are denied to have any absolute existence. It is a state of everlasting repose. All changes and motions are apparent only; they are mere semblances. On this system being is indissoluble; a dogma which afterward was put upon us unexpectedly in the philosophy of Herbert Spencer, and those with whom he coincides. There is no loss or cessation of existence, only variation of species, or change of apparent condition. Everything is in constant conjunction, in indwelling union. What is involved in the existence by which it is revealed.

There is a singular accordance in the procedure of Parmenides and that of De Cartes. The highest speculations of man roll, like the world on which he dwells, in one self-repeating orbit around the centre of attraction, determined by a single force, precisely described, but never deviating so far as to destroy the uniformity of the course. Contrasted but connected schemes of thought succeed each other in each revolution like the seasons, and all lead up the golden path.

In the physical application of his principles Parmenides recurred, like Xenophanes, to the procedure of the Ionic and Pythagorean schools, admitting antagonistic elements and forces, whose collisions and conjunctions produced the phenomena of the universe. In all the circumstances of his system, the indwelling of the soul and the order and arrangement of the universe is the occupant and impalpability of abstract terms. We are at the mercy of the abracadabra with which the enchantments are attempted. The perplexity and hallucination resulting from loose and elastic phrases was of course most perilous, and least sanctioned before logical science arose, and before metaphysicians distinguished between rigorous thought and current expression.

Such defects exposed the doctrines of Parmenides to the attacks of acute contemporaries, and led to the recognition of the necessity of precision in statement, and to the consequent evolution of the strict import of terms and of the validity of arguments. Hence they furnished to his disciple the occasion of inaugurating logic.

Zeno. The relation of Zeno to Parmenides is the most certain fact connected with the formation of the Eleatic School. He was pupil, friend, companion, and apologist. He was the only prominent member of the sect who was unquestionably a native of Elea. He defended and explained the dogmas of his preceptor; but the mode of his exposition led to notable changes in the doctrine, especially in the sphere of the Socratic irony, the Platonic dialectics, the Or- ganon of Aristotle, and other developments scarcely less important. He became the inventor of regular dialectic procedure; but his claims in this respect are limited by the remarkable declaration of the Stagyrite in regard to his own labors, that his predecessors had only furnished examples of the forms of reasoning, while he had created the art (Sophist. Elench. sub fn.).

Increase of logical precision may give greater consistency and intelligibility to a philosophical system, but it renders its errors and dangers more prominent. This was what was done with Zeno in distinction of the views of Parmenides. In urging the unreliability of the senses, and of inferences from observation, he arrayed experience against reason, and denied the validity of the former. He acknowledged, at the same time, that in the purest science, there is no contradiction of the unity which was alone real existence, and thus invited scepticism and provoked the age of the Sophists.

Melissus. There is no reason for believing that Melissus of Samos was directly or consciously connected with the Eleatic family, but he is habitually included in their number in consequence of his knowledge of doctrine. He confined his attention almost exclusively to the negative aspects of the system, endeav-
ELEAZAR

(or to demonstrate the unreality of the phenomenal world, and the inconsistency of ascertaining time, motion, change, divisibility or limitation to the solitary Existence. In representing being as infinite, he recoiled from the position of Parmenides and Zeno, and in some degree also from Xenophanes. He differed from them also in asserting that we can have no knowledge of the gods; and, according to Aristotle, inclined to materialism in his conception of the universal One. The Elastic idealism was thus verging towards the form of doctrine propounded by Epicurus. It had completed this change in a manner slightly nearer to the opposite extreme from the point where it started.

Whatever extravagances may be justly charged upon this celebrated school, its services to speculation and to the cause of truth should be neither denied nor underrated. It was surely a splendid and meritorious office, forms a great step of systematic philosophy, to awaken the minds of men to the recognition of the vain and evanescent character of all temporal things; to protest against the delusions of Polytheism; to direct attention to a supreme and omnipresent Intelligence, perfect in all attributes; to fulfill the religious truth which is latent, but active, beneath all material and transitory forms; and to bring the reason of man into direct communion with the sovereign Power of the universe, in which and all things else, ‘lived, and moved, and had their being.’ In discharging this high and Elastic-promoted intellectual speculation, laid the foundations of logic, and perhaps of rhetoric, and introduced the argumentative dialogue which was employed with such consummate genius by Plato.

There is a most profound significance in the observation made by Aristotle in regard to Parmenides, that, “looking up to the whole heavens, he declared the one only Being to be God.” This seems to have been the distinctive purport of the Elastic School, though it was soon obscured, and ultimately discarded; but it propagated itself by a secret growth, and allied itself with other forms of speculation.

Literature.—Plato, Sophista; Parmenides; Aristotle, De Xenoephane, Zeno and Gorgias; Metaphysics, lib. i, cap. v.; Diogenes Laertius, Bayle, Dict. Hist. et Civit. s. v. Xenoephane; Roeschmann, Diss. Hist. Deputationes (Berol. 1846); Lewes, Hist. of Philosophy (London, 1867, i, 67 sq.); Ueberweg, Gesch. d. Philosophie, i, 47; and the various historians of Greek philosophy. (G. F. H.)

Eli’azar (Heb. Elazar), ‘‘El’azar, whom God has helped: Sept. and N. T. El’azar; from the Græcised form Ελαζαρ[ου found in Maccabees and Josephus], came by contraction the later name Αζαρ[ου, Αζα-]

r(a), a common name among the Hebrews, being borne by at least six persons mentioned in Scripture, besides several in the Apocrypha and Josephus. See also Eli’azar.

1. The third son of Aaron, by Elisheba, daughter of Amminadab, who was descended from Judah, through Pharez (Exod. vi, 23; xxxvii, 1; for his descent, see Gen. xxxvii, 29; xlvi, 12; Ruth iv, 18, 20). He married a daughter of Putiel, who bore him Phinehas (Exod. vi, 25). After the death of Nadab and Abihu without children (Lev. x, 1; Num. iii, 41), Eleazar was appointed chief over the principal Levites, to have the oversight of those who had charge of the sanctuary (Num. iii, 32). With his brother Ithamar he ministered as a priest during their father's lifetime, and immediately before the death of their father he was invested on Mount Hor with the sacred garments, as the successor of Aaron in the office of high-priest (Num. xx, 1-3). He died two years after the death of Moses (Exod. xxxv, 21), in conjunction with Moses, to superintend the census of the people (Num. xxvi, 3). He also assisted at the inauguration of Joshua, and at the division of spoil taken from the Midianites (Num. xxxvii, 22; xxxvi, 21). After the conquest of Canaan by Joshua, he took part in the distribution of the land (Josh. xiv, 1). The time of his death is not mentioned in Scripture; Josephus says it took place about the same time as Joshua’s, 25 years after the death of Moses. He is said to have been buried in “the hill of Phinehas” his son (Josh. xxiv, 33), where Josephus says his tomb existed (Ant. v, 1, 29), or possibly a town called Gibeath-Phinehas (Gesienithus, Theaur. p. 260, b). The high-priesthood is said to have remained in the family of Eleazar until the time of Eli, a descendant of Ithamar, into whose family, for some reason unknown, it passed until it was restored to the family of Eleazer in the person of Zadok (1 Sam. ii, 27; 1 Chron. vi, 8; xxiv, 3; Kings ii, 27; Josephus, Ant. viii, 1, 3). See High-

PRIEST.

2. An inhabitant of Kirjath-jearim, on the “hill” (פִּקְרֵי-יַרְיִם), who was set apart by his fellow-townsmen to attend upon the ark, while it remained under the roof of his father Abinadab, after it had been brought up to the Hezekians (1 Sam. i, 2). B.C. 1124. His service in this capacity was doubtless somewhat irregular, but justifiable under the circumstances; for there is no evidence that he belonged to the priestly order, although it is probable that he was of a Levitical family (who were not allowed to touch the ark, but had only the general charge of it, Num. iii, 31; iv, 15). He seems to have continued to exercise this sole care of the sacred deposit for the twenty years that intervened till the judgment of Samuel (1 Sam. vii, 1), although the ark remained in the same place much longer (1 Chron. xiii, 7).

3. A Levite, son of Mahli, and grandson of Merari. B.C. c. 1104. He is mentioned as having had only daughters, who were married by their “brethren” (i.e. their cousins) (1 Chron. xxiii, 21, 22; xxvii, 28).

4. The son of Dodo the Ahohite (עִבְרֵי-יַרְיִם), i.e. possibly a descendant of Ahohah, of the tribe of Benjamin (1 Chron. vii, 4); one of the three most eminent of David’s friends, who were distinguished by being very brave (1 Chron. xi, 12), who “fought till his hand was weary” in maintaining with David and the other two a daring stand against the Philistines after “the men of Israel had gone away.” He was also one of the same three whose bones broke through the Philistine host to gratify David’s longing for a drink of water from the well of his native Bethlehem (2 Sam. xxiii, 9, 10, 13). B.C. c. 1046. See David.

5. Son of Phinehas, and associated with the priests and Levites in taking charge of the sacred vessels restored to Jerusalem after the Exile (Ex. vii, 53). B.C. 450. He is probably the same with one of those who compassed the walls of Jerusalem on their completion (Neh. xii, 42). B.C. 446. It does not appear from these passages, however, that he was necessarily a priest or even a Levite.

6. One of the descendants (or citizens) of Paroch, or an Israelite of the laymen who renounced the Gentile wife whom he had married from Babylon (Ezra x, 25). B.C. 410. Possibly he is the same with No. 5.

7. The first-named of the “principal men and learned” sent for by Ezra to accompany him to Jerusalem (Ez. viii, 42), is evidently the Eli’azar (q. v.) of the Heb. text ( Ezra viii, 16).

8. According to Josephus, the Jewish high-priest,
ELEAZAR

brother and successor of Simon the Just, and son of Onias I, whose correspondence with Ptolemy Philadelphus resulted in the Septuagint translation being made (Am. xii, 5 sq.; 4, 4). See High Priest.

9. Surnamed Avatar (1 Mac. ii, 5, Αιβάραρ, or Αιβαρος, and so Josephus, Ant. xii, 6, 1; 9, 4. In 1 Macc. x, 18, the name is written Αιβαρος). This singular name is derived from the insertion of C by mistake after O, or from a false division of (Ελαζαρος Αιβαρος), the fourth son of Mattathias, who fell by a noble act of self-de
dedication in an engagement with Antiochus Epiphat, being crushed to death by the fall of an elephant which he had taken in the army in the time of the king, B.C. 164 (1 Mac. vi, 43 sq.; Josephus, Ant. xii, 19, 4; War, i, 1, 5; Ambrose, De offic. min. 40). In a former battle with Nicanor, Eleazar was appointed by Judas to read "the holy book" before the attack, and the watchword in the fight — the "help of God"—was his own name (2 Macc. vii, 29).

The surnamed "Avatar" is probably connected with Arab. καιραρ, "to pierce an animal behind" (Michaelis, s. v.). This derivation seems far better than that of Koldiger (Ebrach u. Gruber, s. v.) from Arabic καιραρ, "to choose, to select, to choose, to appoint." In either case the title is derived from his exploit.

10. A distinguished scribe (Ελαζαρος . . . των πρωτομεταφωνων γραμματιων, 2 Macc. vi, 18) of great age, who suffered martyrdom during the persecution of Antiochus Epiphanes (2 Macc. vi, 18-51). B.C. cir. 165. Eleazar, as he is generally called by Greek chroniclers, is the hero of the Jewish martyrology (Chrysost. Hom. 3 in Macc. init. Comp. Ambrose, De Jacobo, ii, 10). For the general credibility of the history comp. Grimm, Exerc. ubi 2 Macc. vi, 18-51, in Erg. Hund.; also Ewald, Gesch. 341, 582. See Maccabees.

The name Eleazar in 3 Macc. vii appears to have been borrowed from this Antiochian martyr, as belonging to one weighed down by age and suffering, and yet "helped by God."—Smith, s. v.

11. The father of Jason, ambassador from Judas Maccabeus to Rome (1 Macc. xiv, 6; 16, 61, 68). See Jason.

12. Son of Eliud and father of Matthathias, who last was the grandfather of Joseph, Christ's reputed father (Matt. i, 15). B.C. cir. 150. See Matthathias.

13. A priest mentioned by Josephus as having charge of the Temple treasures, who sought to divert Orarios from pillaging the sanctuary by the largess of a beam of gold (Am. xiv, 7, 1).

14. A son of Bothus, whom Archelaus put into the high-priesthood in place of his brother Joazar, but soon displaced by Jesus the son of Sie (Josephus, Ant. xvii, 18, 1).

15. Son of Ananus (or Anania), made high-priest in the room of Iasmeal (son of Phabi) by Gratus, who deposed him after one year in favor of Simon son of Camithus (Josephus, Ant. xvii, 2, 2). While a youth, his boldness led him, as precent of the Temple, to advice the Jews to refuse all foreign presents (Josephus, War, ii, 17, 5). He had been seized by the Sicarii as a hostage for ten prisoners of their own number (Ant. xx, 9, 3). He was one of the generals chosen by the Jews for Idumaea during the revolt under Cestius (War, ii, 20, 4).

16. Son of Dineus, a robber who for many years infested the mountains of Searama, whose troop was at length broken up by Cumanus (Josephus, Ant. xx, 6, 1). He was himself captured by stragglers and sent to Rome by Felix (xi, 8, 5). He seems to be the same with the notorious rebel commander of Massada, at whose instigation the desperate garrison committed suicide (War, vii, 8-9; comp. Ant. xx, 1, 1; War, ii, 13, 2).

17. A companion of Simon of Gerasa; sent by the latter to endeavor to persuade the garrison of Herodium to capitulate, but indignantly put to death by them (Josephus, War, iv, 9, 5).

18. A young Jew of great valor in the siege of Ma
cerous by Titus, he and his brothers, Rufus, but released by the Romans on condition of the surrender of the fortress (Josephus, War, vii, 6, 4).

19. A Jewish conjurer whom Josephus speaks of having seen exercise demons in the presence of Ves
pasian and his officers by means of a magical ring or charm (Ant. viii, 2, 10). B.C. 68.

20. A son of Sameas, and born in Saab in Galilee, who performed a heroic act of valor and self-devotion during the final siege of Jerusalem (Josephus, War, iii, 7, 21).

21. Son of Simon, and ringleader of the Zealots in the final convulsions of the Jewish nation (Josephus, War, iv, 4, 1). He first appears as possessor of a large amount of plunder from the Romans under Cestius, which gave him control of public affairs (ib. ii, 20, 3). During the siege by Titus he held the Temple against the flames for three days (ib. ii, 7), being supplied by the sacred stores of provisions (ib. 3), but after he formed a coalition with one of these opponents, John of Gischala, who occupied the remainder of the eastern part of the city (ib. v, 6, 1), having lost his vantage by a stratagem of the latter (ib. 3, 1). See the full account under Jerusalem.

Eleazar (in Armenian, Էլեազար), an Armenian patriotic, born at Anthab, in Syria. In 1650, David, the patriarch of Constantiopolis, was ejected from his seat, and Eleazar elected in his place. He held this position only for two years, for in 1652 Philip, the patriarch of Echmiadzin, and supreme head of the Church, arrived at Constantiopolis, expelled Eleazar, and consecrated John of Meghri, who, in turn, was soon ejected by the intrigues of Eleazar. The see then remained vacant for some time. Eleazar went to Jerusalem, in compliance with an invitation of the patriarch of that city, Azduzadzor, who wished his assistance in a quarrel with the Greeks, and promised to make him his successor. While residing in the convent of St. James, Eleazar discovered a treasure of 100,000 pieces of gold and 100,000 pieces of silver. After many troubles with Turkish officials and several imprisonments, he succeeded in obtaining possession of the constantiopolite Church, called after the residence of the chief patriarch of the Armenians, Echmiadzin, and caused himself to be elected independent patriarch of Jerusalem. He was expelled in 1654, and again, after having regained possession of the dignity, in 1668, when he was succeeded by a personal enemy, Martyr. The people, dissatisfied with this change, replaced Azduzadzor, after whose death Eleazar took forcible possession of the patriarchal see. He maintained himself in this position until 1680, when, after the death of James IV, the patriarch of Echmiadzin, he assumed the title of patriarch of all the Armenians. A subsequent election confirmed him in this position, and in 1682 he took up his residence in Echmiadzin. His chief aim as head of the Armenian Church was to put an end to internal dissensions. He died at Echmiadzin in 1691.—Hoefer, Nouv. Rev. Gen., 1891, p. 91.

Eleaza'tius (a strange rendering for Elieza'tes, Alex. MS. Ελειαζαθες, Vulg. Eliazaeath), one of the Leviti
can musicians who married a Gentile wife after the return from Babylon (1 Esdr. ix, 24); evidently the Elieza
thus (q. v.) of the Heb. text (Ezra x, 24).

Elect, a term sometimes applied in the ancient Church (1) to the whole body of baptized Christians, who were called Δισυς, i.e., δισυς, saini, elect; (2) to the highest class of catechumens elected to baptism;
ELECCION DE CLERGY

(3) at other times to the newly baptized, as especially admitted to the full privileges of their profession, and sometimes called the perfect.

As of the time being considered the most eminent of Christian professors, were called the elect of the elect, - Bingham, Orig. Eccles. bk. v, ch. ii, § 5. See Catechumenes.

Electa or Electa (ἐκλεκτά, Aut. Vera, "elect" lady). According to Grotius, Wetstein, and some other critics, this word is used as a proper name in the address of John's second epistle, ὁ Προφήτης ὁ Ἐκλεκτὸς τοῦ θεοῦ — "The Prophet to the Lady Electus." This word is also employed by the bishop of Dunstable in his treatise on the Doctrine of the Greek Article (2d edit. Cambridge, 1289, p. 626-629). He adds in support of it several epistolary inscriptions from Basil, in which the name precedes, and the rank or condition in life is subjoined, such as ἐκλεκτάς ἀδημότας νυμφαῖς — to ἐκλεκτοὶ νυμφαῖς — convict of those, however, are purely homiletic titles. To meet the objection that the sister of the person addressed is also called Electa in verse 13, he suggests that the words ᾳ των ἐκλεκτῶν are a gloss, explanatory of σωτῆς. But this is mere conjecture, unsupported by a single manuscript. He hints that such a gloss, if it occasionally (as bishop Middleton supposes) by the return to the singular number, would more naturally have been inserted after σωτῆς, in which position, however unnecessary, it would at least produce no ambiguity. Some writers, both ancient and modern, have adopted a mystical interpretation of the word, through contrast to the κακομονῆς, and to all apostolic usage, and suppose with Jerome that the term ἐκλεκτοὶ referred to the Church in general, or with Cassiodorus, to some particular congregation. The last-named writer (born A.D. 470, died 520), in his Commentaries in Epistles, etc. (London, 1722, p. 180), says, "Johannes — electa dominus esse, illi, quibus ejus, quae sacros fono generarent." Clemens Alexander, in a fragment of his Ἀδιαματαιαντατα, attempts to let the literal and the apocalyptic meanings—"Scripta vero est ad quandam Babyloniam Elec- ta publica, significat autem electum illam ecclesiam sanc- tam" (Opera, ed. Klots, iv, p. 66). The Archdeacon translates the words in question as "the elect lady," an interpretation approved by Castello, Beza, Mill-Wolf, Le Clerc, and Macknight. Most modern critics, however—Schleusner and Breitnerchold, in their lexicon (1831); Vater, in his Commentary, and Tischendorf (1841), in their editions of the N. Testament; Neander (Plating of the Church, ii, 71), De Wette (Lehrbuch, p. 389), and Rucke (Commentary on the Epistles of St. John, p. 314-320, Eng. transl.)—agree with the Syriac and Arabic versions in making θησους a proper name, and render the words "to the elect of the Church." (See Gruter Inscript, p. 1127.) Lardner has given a copious account of critical opinions in his History of the Apocryphal and Pseudoapocryphal, c. xx (Works, vi, 284-288). See also Heumann, De Cyria (Gotting, 1726); Rittmeyer, De Eclipsi Cuius (Hanet, 1780); Knauer, Uber Θησους και Θησους (in Der Theol. Zeitung, u. Krit. v, 452 sq.); Amer. Preb. Rec., Jan. 1867. See Zook (Third Epistle). 

Election of Clergy. How far the people had a right in the election of ministers in the early Church is a question that has been much disputed.

1. The account in Acts i, 15 of the choice of an apostle in place of Judas is cited as proof that even the apostles would not elect without the voice of the Church at Jerusalem. So in the choice of the deacons (Acts vi, 2), the "choice Stephen and set him before the apostles." On the other hand, the apostles themselves appointed elders, and St. Paul empowered Titus and Titus to do the same (Acts xiv, 23; 2 Tim. iii, 1; Tit. i, 5); though some interpret the word χωροφύλακαι, in these passages, as implying ordination only and not excluding a previous election by the people. Compare also Acts xv, 1; 1 Cor. xiv, 2; 2 Cor. viii, 19.

2. Clemens Romanus (+100) (Epist. ad Corinthiac, i, § 44) asserts that the apostles appointed bishops and deacons with the concurrence of the whole Church. It is cited as a statement, that in his time the Church had a share in the appointment of its ministers.

Cyprian (+256) testifies to the share of the people in the election of bishops and elders, calling it matter of divine authority that "sacerdos plebe presentat et omnium oculis deligatur, et dignus atque idoneus munus et pontifici vocatur. et testimonio communitatis jussus est" (Epist. 68). Bingham cites Lampadius (Vit. Alex. Socinus, c. 45) as stating that the emperor (A.D. 222-235) gave the people a negative vote in the appointment of procurator, on the express ground that "what the Christians did in the election of their priests and ministers, should certainly be allowed the people in the appointment of governors of provinces."

3. Even after the establishment of the hierarchy, it seems to have been usual for the clergy or presbytery, or the sitting bishop or presbyter, to nominate a person to fill the vacant office, and then for the suffrages of the people—not merely testimonial, but positive suffrages—to be taken. Bingham sums up the facts (Orig. Eccles. bk. iv, chap. ii) in substance as follows: 1. No bishop could be-obtruded upon an orthodox people against their consent (in case a majority were heterodox or schismatics, the case was otherwise provided for) when they agreed upon the person of the bishop, they were usually gratified in their choice. The emperor Valentinian III held it to be a crime in Hilary of Arles that "he ordained bishops against the consent and will of the people." 2. In many cases the voices of the people prevailed against the nominations of the bishops. 3. The modes of voting illustrate the power of the people in the elections; if they were unanimous for or against a man, they cried out "worthy" or "unworthy" (ἀξιός, ἄξιος; dignus, in dignus). If they were divided, they expressed their dissent in aund in tumultus. There are instances in which persons were brought by force to the bishop to be ordained, or were elected to the office by acclaimation. It was decided by the fourth Council of Carthage, that as the bishop might not elect clerics without the advice of his clergy, so likewise he should secure the consent, nomination, and tacit assent of the people. The popular elections, however, became scenes of great disorder and abuse. A remarkable passage from Chrysostom (De Sacerdotibus) has been frequently quoted, and applies more or less to such elections, not only in Constantinople, but also in Rome, Alexandria, Antioch, and other cities. He enforces the necessity of the people witnessing the proceedings at our public festivals, in which, more especially, according to established rule, the election of ecclesiastical officers take place. You will find there complaints raised against the minister as numerous and as various in their character as the multitude of those who are the subjects of the civil government. For all those in whom the right of election is vested split into factions. It is evident that there is no good understanding, either among themselves, or with the appointed president, or with the presbytery. One supposes, another another, and one another. The son of this is, that they all neglect to look at that point which they ought to consider, namely, the intellectual and moral qualifications of the person to be elected. There are other points by which their choice is determined. One, for instance, says, it is necessary to elect a person who is a good farmer, and another would choose a wealthy person, because he would not require to be supported out of the revenues of the Church. A third votes for a person who has come over from some opposite party. A fourth uses his influence in favor of a relative or friend, while another lends his influence to one who has won him by his own speeches and plausible pretensions. In order to
ELECTION OF GRACE 125

ELECTION OF GRACE

set aside these abuses, some bishops claimed an exclusive right of appointing to spiritual offices. In this way they gave offence to the people. In the Latin and African churches an attempt was made to secure greater simplicity in elections by introducing intercessors or "visitors." This did not, however, long continue. Another plan was to vest the election in municipal officials. This was attempted by J. A. a. v.; Riddle, Christan Antiquities, bk. iii, chap. xv.; Coleman, Christian Antiquities, chap. v. See Patronage.

Election of Grace.—On the history of the doctrine of Election, see ARMINIANISM; PREDESTINATION; LAW OF GOD; LAW OF GRACE in INDEX. I. A. a. v.; Riddle, Christian Antiquities, bk. iii, chap. xv.; Coleman, Christian Antiquities, chap. v. See Patronage.

Election from the Calvinistic or Calvinst point of view, by Rev. C. Hodge, D.D., of Princeton; II. A statement of the doctrine from the Methodist point of view; III. Some other conceptions of the doctrine.

1. Election from the Calvinst Point of View.—The Scriptures speak, 1st, of the election of individuals to office, or to positions of honor and privilege. Thus Abraham was chosen to be the father of the faithful, and the depositary of the promise of redemption. Thus Jacob was chosen, in preference to Esau, to be the progenitor of the chosen people. In like manner, Saul was chosen by God to be king over Israel, and subsequently David, and after him Solomon, were selected for the same high dignity. Thus also the prophets, and, under the new dispensation, the apostles, were chosen to take their places among the great assembly of Christ's followers. The Bible speaks of the election of nations to special privileges. The Hebrews were chosen from all the nations of the earth to be God's peculiar people. To them were committed the oracles of God. They were his inheritance. They received from him their laws and their religion, and were under his special guidance and protection. In Deut. vii, 6, it is said, "Thou art an holy people unto the Lord thy God: the Lord thy God hath chosen thee to be a special people unto himself, above all people that are upon the face of the earth." xxxii, 9, "The Lord's portion is his people; Jacob is his lot by inheritance;" or, Rom. ix, 4, "Who are Israelites; to whom pertaineth the adoption, and the glory, and the covenants, and the giving to the law, and the service of God, and the promises." 8d. Besides election of individuals and of nations to external advantages, the Scriptures speak of an election to salvation: 2 Thess. ii, 13, "We are bound to give thanks always to God for you, brethren, beloved of the Lord, because God hath from the beginning chosen you to salvation, through sanctification of the Spirit and belief of the truth." Of this election to eternal life all Augustinians teach, first, that its objects are not nations, nor communities, nor classes of persons, but individuals. 1. Because neither the nations nor communities, as such, are saved. God did not choose all the nation of the Jews to salvation. Neither does he choose the nations of Christendom to eternal life; nor any organized Church, whether Papal or Protestant. The heirs of salvation are individual men. 2. Because those chosen to salvation are chosen to "sanctification of the Spirit and belief of the truth. They are chosen "to be holy and without blame before him in love" (Eph. i, 4). They are elect according to the foreknowledge of God the Father, through the sanctification of the Spirit, unto obedience and sprinkling of the blood of Jesus Christ" (1 Pet. i, 2). But nations and communities are not sanctified, or obedient, or unblamable before God in love.

We accordingly find that the elect are always addressed as individuals. Paul, when writing to a number of persons residing in "the province of Macedonia and Thessalonica," hath chosen you to salvation." Writing to the Ephesians, he says, "God hath chosen us," "having predestinated us." Our Lord (John xiii, 18) says, "I speak not of you all; I know whom I have chosen;" and again (John vi, 37), "All that the Father giveth me shall come to me; and him that cometh to me I will in no wise cast out." John xvii, 3, "Thou hast given him power over all flesh, that he should give eternal life to as many as thou hast given him." Ver. 9, "I pray not for the world, but for those whom thou hast given me; I pray not that thou shouldest take them out of the world, but that thou shouldest keep them from the evil. Therefore, clearly teach that the elect are certain individuals chosen out of the world to be the heirs of salvation.

Secondly. Augustinians hold that the ground of this election is the good pleasure of God. That is, that the reason why one person and not another is chosen is found in the good pleasure of God, distinguishing him favorably from his fellow-men, but simply because so it seems good in the sight of God. All being equally guilty and unworthy, God, for the manifestation of his glory, and for the attainment of the highest ends, chooses some, and not others, to be vessels of mercy prepared beforehand unto glory.

That such is the doctrine of the Scriptures on this subject is argued, 1. Because the Bible expressly says that election is of grace and not of works. It is not of works means that it is not what a man does that determines whether he is to be one of the elect or not. The apostle, in Rom. xi, 11, teaches that the choice of Jacob instead of Esau was made and announced before their birth,"that the purpose of God, according to election, might stand, not of works, but of him that calleth." He was not not chosen, but was spoken of to be eternal life or to temporal advantages. The apostle refers to this incident in proof of God's sovereignty, and therefore be infers from it, "It is not of him that willleth, nor of him that runneth, but of God that showeth mercy" (ver. 16). In like manner, in ch. xi of the same epistle, he refers to the election made in the Old Test. to Elias: "I have reserved unto myself seven thousand men who have not bowed the knee to the image of Baal;" and adds, "Even so, then, at this present time there is a remnant according to the election of grace. And if by grace, then it is no more of works; otherwise grace is no more grace" (ver. 4-6). The mass of the Jews were cast off. A remnant was saved. That remnant consisted of those whom God chose. His choice was a sovereign one. It was of grace, and not of works. It was determined before the foundation of the world, and not by the good pleasure of God, or by the good pleasure of the objects of that choice had done. Paul himself belonged to that remnant. He was an illustrous example of the sovereignty of God in election. He had done nothing to secure the favor of God. He was chosen to eternal life because he repented and believed. He was converted not because he had faithfully used the means of securing a knowledge of Christ. On the contrary, he was converted in the midst of his wicked career of persecution. He was brought to faith and repentance because, as our Lord says, "He was a chosen vessel unto me, to bear my name before the Gentiles, and kings, and the children of Israel" (Acts ix,
Paul's experience, as well as the teaching of the Holy Spirit, impressed upon his mind a deep conviction of the sovereignty of God in the salvation of men. He knew he had been chosen not for, but notwithstanding, his previous character and conduct. And he knew that, had he not been thus chosen, he would have perished forever. It is not surprising, therefore, that he valued this doctrine, or that he so often refers to himself as a monument of the grace of God in the election and salvation of sinners. In his epistle to the Galatians, after reviewing the doctrine that he had "beyond measure persecuted the Church of God," he adds, "It pleased God, who separated me from my mother's womb, and called me by his grace, to reveal his Son in me" (Gal. 1:15). See also Acts xxii, 14; 1 Cor. xxv. 9; 1 Tim. i, 15, 16: "Jesus Christ came into the world to save sinners, of whom I am chief. Howbeit for this cause I obtained mercy, that in me first Jesus Christ might show forth all suffering, for a pattern to them which hereafter believe in him to life everlasting." Nothing could have pinned the apostle more than that one should attribute his own conversion to himself. His constant and grateful acknowledgment was, "By the grace of God I am what I am." The negative statement that election is "not of works," is often, as in the passages above cited, connected with the positive assertion that it is of grace, or due to the sovereignty of God. 

2. It is, however, merely in isolated passages that this doctrine is taught; it is elaborately proved and vindicated. Thus, in 1 Cor. i, 17-31, the opponents of Paul in Corinth had urged against him that he had never been chosen before the foundation of the world, to be holy and without blame before him in love (v. 4). He had thus chosen them to holiness, because he had, according to the good pleasure of his will, precedented them to the high dignity of sonship (v. 5). He had thus predestined them to be his sons, in order to glorify his grace or unmerited love (v. 6). In these few verses the whole Augustinian doctrine on this subject is stated with the utmost clearness and precision.

In the 8th chapter of the epistle to the Romans, the design of the apostle is to show the security of believers. Those who are in Christ shall never be condemned; because they are justified; because they have the principle of spiritual life through the indwelling of the Holy Ghost; because they are the children of God; because the Spirit makes intercession for them; because he thus predestinates, he effectually calls or renews, all whom he predestinates, he calls; whom he calls, he justifies: whom he justifies, he glorifies. This is a chain which cannot be broken. Those in whom he fixes his choice, he predestines, as said in the Ephe- sians, to be his sons and daughters; and those whom he thus predestinates, he effectually calls or renews, all whom he predestinates; he calls; whom he calls, he justifies; whom he justifies, he glorifies. All this the apostle confirms by a reference to the infinite and immutable love of God. "If God so loved us," he argues, "that he spared not his own Son, but delivered him up for us, how shall he not with him freely give us all things? Who shall lay anything to the charge of God's elect? It is God that justifieth. Who is he that condemneth? It is Christ that died, yea, rather, that is risen again, who is even at the right hand of God, who also maketh intercession for us." It was a natural objection to the apostle's doctrine that God was not in such a manner absolutely sovereign, but that God, in his mercy, must consider the will of man; that it involved a violation of his promise to the patriarch Abraham. To this objection he gives, in the ninth chapter of his epistle to the Romans, a twofold answer. The one is, that the promise of salvation pertained not to the natural, but to the spiritual children of Abraham; not to Abraham and his sons, but to the Iσραηλ επτὰ νήσιμα. The other is, that God acts as a sovereign in the dispensation both of temporal and of spiritual blessings. This he illustrates in the choice of Isaac instead of Ishmael, and of Jacob instead of Esau. Besides, he expressly claims this prerogative, saying to Moses, "He hath mercy on whom he will have mercy, and I will have compassion on whom I will have compassion." To the objection that it is unjust thus to dispense or withhold mercy at his own good pleasure, Paul's answer is, that any attribute which the Scriptures ascribe to God is inoperative with him but in his disposition; in those cases, we must admit rightfully to belong to him. If God, in his Word, claims this prerogative of having mercy on whom he will have mercy, and if he actually exercises it in his providence, and in the dispensation of his grace, it is the exercise of his freedom and justice, and men are not to complain or protest. The judge of all the earth must do right. Besides, as the inspired writer continues his argument, if the potter has the right of the same mass of clay to make one vessel to honor and another to dishonor, has not the infinite-God the same right over his fallen creatures, if he chooses to admit them to freedom, and to bless them, and to cast them away? If he does not destine his mercy, it saves some of the guilty children of men, and to manifest his justice he allows others to bear the just recompense of their sins? This is only doing what every good and wise human sovereign is expected and required to do.

It can be said, "He did not define the character of the apostle's doctrine is determined by the objections to it. Had he taught that God chooses as vessels of mercy those who he foresees will believe, and leaves to perish those who he foresees will reject the Gospel, there he would have answered the objections of the Jews. It was because he taught that God gave repentance and faith to some and not to others that his opponents charged him with teaching what was inconsistent with impartial justice on the part of God.

5. God is sovereign in the election of the heirs of salvation is plain, because men are chosen to holiness; faith and repentance are gifts of God, and fruits of his Spirit. If it is election to salvation which secures repentance and faith, repentance and faith cannot be the ground of election. The passages of Scripture already quoted distinctly assert that election precedes and is the exercise of faith. In Eph. i, 4, it is referred to "the mighty power of God," which wrought in Christ when he raised him from the dead. In 1 Pet. i, 2, it is said, we are elected, unto obedience and the sprinkling of the blood of Jesus Christ. Vocation, that is, regeneration, the fruits of which are faith and holiness, is taught in Rom. viii, 30, whom he did predestinate, them he also called." In a preceding verse of that chapter, it is said, we are predestinated
to be conformed to the image of his Son." But conformity to the image of Christ includes all that is good in us. Christ was exalted "to give repentance and forgiveness of sin" (Acts v. 31). "If God peradventure will give them repentance to the acknowledgment of the truth" (2 Tim. ii. 25).

Hearken, my beloved brethren, hath not God taken from the hand of this world to be rich in faith" (James ii. 5). "It is of him ye are in Christ Jesus" (1 Cor. i. 30). It is, however, unnecessary to multiply quotations. The Bible is full of the doctrine that regeneration is the gift of God; that the remission of sins is a free gift of his Spirit. All Christians recognize this truth in their prayers. They pray earnestly for the conversion of those dear to them. This takes for granted that God can and does change the heart; that all that pertains to salvation, the means as well as the end, are his gift, though not necessarily to enemies. It is mysterious love. It is compared to the instinctive love of a mother for her child, which is independent of its attractions. This is the most wonderful, and, perhaps, the most glorious of all the known attributes of God. It is distinctly told that the spiritual object of the redemption of man was the restoration of this divine perfection; it was for the manifestation "of the glory of the riches of his grace" (Eph. i, 6). He hath quickened us, raised us up, made us sit in heavenly places, "that in the ages to come he might show the exceeding riches of his grace in his kindness toward us through Christ Jesus" (Eph. ii. 6-7). Such being the design of redemption, it must, in all its stages, be a work of grace. It was a matter of grace that redemption was provided for man and not for angels; it was a matter of grace that God gave his Son for our salvation. To make the mission of the Son a matter of justice, something to which our fallen race had a righteous claim, would alter the whole character of the Bible. The incarnation, sufferings, and death of the Son of God are everywhere set forth as manifestations of the unmerited and infinite love of God. But if a man who from the beginning of the world is a child of men, it was a matter of grace that the knowledge of the plan of salvation was communicated to some and not to others—to the Jews and not to the Gentiles. It is of grace that any sinner is justified, that he is made a Saint by this act of God. Everything that is said of salvation is of grace. To introduce the element of works or merit into any part of the plan vitiates its character. It is expressly taught that regeneration or conversion, the fact that one man is converted and not another, is a matter of grace. This is what the apostle specially insists upon in the first chapter to the Corinthians, already referred to. He calls upon his readers to look at their calling, to see who among them were called. It was not the wise or the great, but the foolish and the insignificant, whom God chose, for the very purpose that no flesh should glory in his presence. It was necessary that riches should be of the kindred of Christ, that the move in which it reveals itself in the heart of the believer. His theory may be one thing, but his inward and, it may be added, his delightful consciousness is that he owes his salvation to the grace of God alone.

5. The New Testament Bible are not what it is often supposed that one of necessity implies others. If the Scriptures teach men, that since the Fall, born in a state of sin and condemnation, and are spiritually dead until renewed by the Holy Ghost; if this death in sin involves entire helplessness, or inability to any spiritually good; if regeneration, or effectual calling, is effected, not by the moral influence of the truth, or by those divine influences common to all who hear the Gospel, but "by the mighty power of God," then it is certain that the call and consequently the election of those who are saved is a matter of sovereignty. If Christ, when on earth, raised some from the dead and not others, it was not anything in the state of one dead body as distinguished from another; it was something which he deemed which should rise and which should remain in their respective states. This connection between doctrines exists, all the evidence which the Bible contains of one of the truths just mentioned is so much evidence in favor of the others.

6. The system of doctrine with which these views are connected is frequently designated as Pauline. But this is a misnomer. Although clearly taught by the apostle Paul, these views are far from being peculiar to his writings. They not only pervade the Scriptures, but were inculcated with greater solemnity, clearness, and frequency in the teaching of his beloved disciple, John, and in the teaching of any other of the messengers of God. He constantly addressed men as in a hopeless and helpless state of sin and misery, from which nothing but the almighty power of God could deliver them. Of the mass of mankind thus lying under the just displeasure of God, he speaks as having been delivered from their sins by the blood of Christ, given him, who should certainly come to him, and whom he would without fail bring into his heavenly kingdom. He constantly refers to the good pleasure of God as the only assignable reason why one is saved and not another.

At that time Jesus answered and said, I thank thee, O Father, Lord of heaven and earth, because thou hast hid these things from the wise and prudent, and hast revealed them unto babes. Even so, Father; for so it seemed good in thy sight" (Matt. xi. 25, 26). "To you it is given to know the mysteries of the kingdom of God; but to the sons in parables; that seeing they might not see, and hearing they might not understand" (Luke viii. 10). 

All that the Father hath given me shall come to me; and him that cometh to me I will in no wise cast out. And this is the Father's will which hath sent me, that of every one that seeth the Son and believeth on him the Father giveth him eternal life (John v. 24). "No man can come to me except the Father draw him; and I will raise him up at the last day" (v. 44). "No man can come to me except it were given unto him of my Father." (v. 66). "Ye are not of the world, but I have chosen you out of the world" (John xv. 19). "Ye believe not because ye are not of my sheep, as I said unto you. Your sheep hear my voice, and I know them, and they follow me: and I give unto them eternal life; and they shall never perish, neither shall any man pluck them out of my hand. My Father who hath given them is greater than all; and no man is able to pluck them out of my Father's hand. I and my Father are one" (John x, 28-29).

"Thine were they, and thou gavest them me" (v. 6). I pray not for the world, but for them which thou hast given me; for they are thine" (v. 9). "Holy Father, keep through thine own name those whom thou hast given me" (v. 11). "Father, I will that they also, whom thou hast given me, be with me in my glory." Our Lord thus teaches that those who are saved are certain persons chosen out of the world and given
ELECTION OF GRACE

To him by the Father; that those thus given to him certainly come to him; that this certainty is secured by the drawing of the Father; and that those thus given to him are certainly saved.

7. There is an intimate relation between truth and Christ, and the heart. The one concords with the other. What the Bible teaches of the sinfulness of man, the believer feels to be true concerning himself. What it teaches of the helplessness and dependence of the sinner, his own experience teaches him to be true; what is said of the nature and effects of faith answers to what he finds in his heart. He thus sees, that the Bible teaches that it is of God, and not of himself, that the believer is in Christ Jesus; that he, and not others, repent and believe; that he has been made to hear the divine voice, while others remain deaf—this will find a response in the heart of the experienced Christian. We consequently find all these truths impressed upon the common consciousness of the Church, as it finds expression in its liturgies, its prayers, praises, and confessions. "Not unto us, not unto us, O Lord, but unto thy name be the glory," is the spon- taneous cry of the Church. If we consider her history as experimental religion, in the theology of the heart, that the children of God differ, but in the form in which the understanding undertakes to reduce these facts of Scripture experience to logical consistency.

8. As there is this correspondence between the two, there is a great analogy between them. There is a like analogy between the providence of God and the dispensations of his grace. He is not more sovereign in the one than in the other. It is of him that we were born in a Christian land and not heathendom; among English instead of in Spain or Italy; of Christian parents and in the bosom of the Church instead of being the children of the irreligious and immoral. It is in the "Lord that maketh poor and maketh rich; he bringeth low and lifteth up" (1 Sam. ii. 7). "God putteth down one and setteth another" (Ps. 103. 17). "It is he that giveth power over to the rich" (Deut. viii. 18). "Be giveth wisdom to the wise, and knowledge to them who know understanding" (Dan. ii. 12). "The Most High ruleth in the kingdom of men, and giveth it to whomsoever he wills" (iv, 17). The Bible is full of this doctrine. God governs all his creatures and all their actions. "He worketh all things after the counsel of his own will" (Eph. i. 11). This is a truth of even natural religion; at least it is recognised by all Christians. They pray for favorable seasons, for protection from disease and accident, and from the machinations of their enemies. When the pestilence sweeps over the land, the Christian takes as an expression of heavenly will, what Solomon has said; if it be the Lord's will, he will show the judgment of God. All that Augustinians teach concerning election is, that God acts in the dispensation of grace as he does in his providential government of the world. If sovereignty be consistent with justice and goodness in the one case, it must be in the other.

The difficulty which is usually felt on this subject arises from looking at only one aspect of the case. It is true that God gives health, wisdom, riches, power, the knowledge of the truth, saving grace, and life everywhere. But in the good providence he exercises the prerogative of having mercy upon whom he will have mercy. It is true that in what fact occurs God intended to permit. Although he can, as all Christians admit, control the acts of free agents, he permits the fall of man. He permits the presence among of sin, and the presence of multitudes perish in their sins, it is undeniable that God intended, for wise reasons, to permit them to perish. While all this is true, it is no less true that he never interferes with the free agency of his rational creatures. He permits the acquisition of wealth the end of his life, he is perfectly free in forming that determination. If he determines by diligence and honesty to accomplish his object, or if he chooses to resort to deceit and fraud, he is in both cases free and responsible. On the other hand, if a man determines to make the salvation of his soul and the service of Christ the great end of his being, he also is perfectly free in the choice he makes. If God makes him willing, he does not act so as to make Paul was never more free in his life than when he made a complete surrender of himself to Christ, say- ing, "Lord, what wilt thou have me to do?" No man, we may well believe, ever sought Christ with the diligence and constancy, under the guidance of the Holy Spirit, that Paul did. In the Church, the world exhibits no failed of being saved. All who perish under the knowledge of the truth perish because they deliberately prefer the world to God.

The importance of the doctrine in question arises from the fact that it is the doctrine, as far as it can be gathered from the Bible, and as it is made known in the Church through the means of grace, the doctrine, as far as it can be gathered from the Bible, and as it is made known in the Church through the means of grace, the doctrine of the Spirit common to all who hear the Gospel, all would continue in their sins. Had not Christ by his condescension healed our external nature, we should have been sealed; had he not opened some sightless eyes, all the blind would have continued in darkness.

The practical effect of the doctrine that we are entirely helpless in our sin and guilt, lying at the mercy of God, is to lead us to cast ourselves at his feet, saying, "Not me, but you, Lord." Just as lumps of gold are hard to melt, so we have to melt and be disposed of by the fire. Blind and leprous, under a sense of helplessness and misery, crowded to Christ for healing, so souls burned with the leprosy of sin are constrained to look to him for help, and those who come to him he will in no wise cast out. (Cf. Par. in end.)

II. The Doctrine of Election from the Arminian Point of View. —I. John Wesley sums up his view of election as follows: "I believe it commonly means one of these two things: (1.) A divine appointment of some particular men to do some particular work in the world; (2.) The election I believe is to be not only personal, but absolute and unconditional. Thus Cyrus was elected to rebuild the Temple, and St. Paul, with the twelve, to preach the Gospel. But I do not find this to have any necessary connection with eternal happiness. Nay, it is plain it has not; for one who is elected to the office of a king is not elected to the counsel of his own will" (Ps. 45. 17). It is a truth of even natural religion; at least it is recognised by all Christians. This is a truth of even natural religion; at least it is recognised by all Christians. They pray for favorable seasons, for protection from disease and accident, and from the machinations of their enemies. When the pestilence sweeps over the land, the Christian takes as an expression of heavenly will, what Solomon has said: if it be the Lord's will, he will show the judgment of God. All that Augustinians teach concerning election is, that God acts in the dispensation of grace as he does in his providential government of the world. If sovereignty be consistent with justice and goodness in the one case, it must be in the other.

The difficulty which is usually felt on this subject arises from looking at only one aspect of the case. It is true that God gives health, wisdom, riches, power, the knowledge of the truth, saving grace, and life everywhere. But in the good providence he exercises the prerogative of having mercy upon whom he will have mercy. It is true that in what fact occurs God intended to permit. Although he can, as all Christians admit, control the acts of free agents, he permits the fall of man. He permits the presence among of sin, and the presence of multitudes perish in their sins, it is undeniable that God intended, for wise reasons, to permit them to perish. While all this is true, it is no less true that he never interferes with the free agency of his rational creatures. He permits the acquisition of wealth the end of his life, he is perfectly free in forming that determination. If he determines by diligence and honesty to accomplish his
or, as St. Peter expresses it, 'elect according to the
terms elect, chosen, and peculiar in the New Testa-
ment, when the apostles are writing to the churches.
This, however, does not explain fully the reason for
the use of these terms. The abrogation of the church-
state of the Jews and the acknowledgment of the
equality with Jews as the people of God, will account
for the adoption of this phraseology. The reason
of their peculiar existence as a nation ceased with
the coming of Christ, for he was a light to lighten the
Gentiles, as well as the glory of his people Israel.
There was no need to continue the distinction of
be composed of Jews, not by virtue of their natural
descent, but by faith in Christ ; and of Gentiles of all
nations, also believers, and placed on an equal ground
with the believing Jews (see Rom. xi). It is easy,
therefore, to see what is the import of the 'calling'
and 'election' of the Christian Church, as spoken of
in the New Testament. It was not the calling and
the electing of one nation in particular to succeed
the Jews, but it was the calling and the electing of believ-
ers in all nations; nowhere, the Gospel should be
preached, to be in reality, what it was technically;
and therefore in an inferior degree, had been—the vis-
ible Church of God, 'his people,' under Christ 'the
head;' with an authenticated revelation; with an ap-
pointed ministry, never to be lost; with authorized
worship; with holy days and festivals; with instituted
forms of initiation; and with special protection and
favor.

Now what were the effects of this election? (1.)
Plainly the ancient election of the Jews to be God's
peculiar people did not secure the salvation of every
Jew individually, nor did it exclude the non-elect
Gentiles from adequate means of salvation ; nay, the elec-
tion of the Jews was intended for the benefit of the
Gentiles—to restrain idolatry and diffuse spiritual
truth. (2.) As to the election of the Christian Church,
it does not infallibly secure the salvation of every
member thereof, nor prevent anything against the saving mercy of God being still extended
to those who are out of the Church; nay, the very
election of Christians (who are the 'salt' of the earth)
is intended to bring those who are still in 'the world'
to Christ.

This collective election is often confounded by Cal-
vinists with personal election. This is especially done in the interpretation of Paul's argument in Romans
xxi. But a just exegesis of these chapters shows that
they can be interpreted only of collective elec-
tion, not of personal election (see the full examin-
ation of this question, ii. 88.); personal election, the
apostle does, indeed, treat of unconditional election in
this discourse, but it is of unconditional collective
election.

The third kind is personal election of individuals
to be the children of God. Our Lord says, 'I have
chosen you out of the world.' St. Peter says, 'Elect
according to the foreknowledge of God the Father,
through sanctification of the Spirit, unto obedience and
sprinkling of the blood of Jesus Christ.' Then elec-
tion must take place in time, and must be subsequent
to the administration of the means of salvation. The
calling goes before the 'election,' and the 'sprink-
ling of the blood of Christ' before that 'sanctifica-
tion' through which they become the 'elect' of God.
In a word, 'the elect' are the body of true believers;
and personal election into the family of God is through
personal calling of all who truly believe; and all to whom the Gospel is sent have, through the
grace that accompanies it, the power to believe placed
within their reach; and all such might, therefore, at-
tain to the grace of personal election. The doctrine
of personal election is therefore brought down to its
true meaning. Actual election can never exist, neither
from eternity the elect were not actually chosen out
of the world, and from eternity they could not be
'sanctified unto obedience.' The phrases 'eternal
III. 1-5
ELECTION OF GRACE

ELECTION OF GRACE

the Arminian doctrine is that it "subverts grace!" How? Because "it is not an act of grace for the Most High to do justice!" Does this mean that God cannot be at once gracious and just? Grace, in this discussion, is not opposed to justice (this is the doctrine, but not that of grace), but by his own faithfulness, to offer salvation in Christ to all who fell in Adam. This is the doctrine of Arminians; this, too, is the doctrine of Scripture. The Gospel system is called by St. Paul the "grace of God, given to us in Christ Jesus." And he tells us that "the grace of God, which bringeth salvation to all men (ἡ γὰρ ἀνθρώπων πάνω καὶ άδιανθρώπων) hath appeared" (Tit. ii. 11); that the living God is the Saviour of all men, especially those that believe" (1 Tim. iv. 10); that he will have all men to be saved, and to come unto the knowledge of the truth" (1 Tim. ii. 4). According to the Gospel scheme, "As in Adam all die, so in Christ shall all be made alive." This ἀνέγνωσμα Θεος is his determinate counsel—a decree of his good pleasure. "Not, however, that it would have been better for them to have perished rather than to have come to this pass to perish; the divine goodness forbids such a supposition. The simple meaning is that no external necessity compelled him to it, and that it was his free grace, without desert or worthiness on the part of man." (Knapp, Theol. § 88). Were God bound, by any peremptory necessity in man, to restore from death the sacerdotal doctrine of the eternal salvation of infants; nor, finally, with the proper end of punitive justice, which is, to deter men from sin, and to add strength to the law of God.

b. As to the second branch of this doctrine, viz., that personal election is unconditional. (1) According to this doctrine, the Church of God is constituted on the principle of the divine purpose, not upon the basis of faith and obedience, which manifestly contradicts the Word of God, according to which Christ's Church is composed not merely of men, as Peter, James, and John, but of Peter, James, and John believing and obeying, while all who "believe and obey," and obey them are of the world, not of the chosen. (2) This doctrine of election without respect to faith contradicts the history of the commencement and first constitution of the Church of Christ. The first disciples became such as the Word of God, before God's men were required to believe, so that their actual election had respect to faith. (8) There is no such doctrine in Scripture as the election of individuals unto faith, and it is inconsistent with several passages which speak expressly of personal election, e.g. John xv. 19; 1 Pet. i. 2; 2 Thess. ii. 13. 14. (4) There is another class of texts in which the term election occurs, referring to believers, not personally, but as a body forming the Church of Christ, which texts, containing the word election, are ingeniously applied to the support of the doctrine of the unconditional personal election, when in fact they do not contain it. Such is Eph. i. 4, 5. Now in regard to this text, it might be shown (a) that if personal election were contained in it, the choice spoken of is not of men merely, but of believing men; but (b) it does not contain the doctrine of personal election, but conveys the idea that Christ had his Church in view, and desires that his name may be glorified in the church, and his Church have the honor and glory of the world. (3) It is, indeed, the doctrine of the elect unbeliefers (c) and how can the Spirit of truth convince such of sin and danger, when they are, in fact, in no danger? The fundamental objection made by Calvinists to
ELECTION OF GRACE

131

ELEMENTS

(1) from materialists) on the one hand, and of the various schemes of modified Augustinianism which have been proposed within the theocentric sphere as substitutes for extreme Calvinism, as Baxterianism, the so-called moderate Calvinism (q. v.) and the New-England Theology (q. v.).

1. Dr. Nevin (Mercer's Church Reviser, April, 1845, not with-drawn from the vineyard point of view) конструировал the New-Testament idea of election with the Calvinistic as follows: "Are the references to the idea of election in the New Testament such, as a general thing, that they may be fairly construed in the known and established sense of the Calvinistic dogma; or are they restricted to a condition of existence requisite to a true basis of the doctrine of election is given in the Lutheran doctrine of universal grace and conditional decrees" (§ 206-210).

2. Browne, bishop of Ely, in his Exposition of the Thirty-nine Articles (N. Y. 1865, Svo), gives a pretty full history of the doctrine of election and maintains, in substance, the theory of "ecclesiastical election," viz. that, as the "Jews of old were God's chosen people, so now is the Christian Church; that any baptized member of the Church is one of God's elect, and that this election is irrespective and unsearchable decree. Here, therefore, et cetera. The "special" privileges, not to final glory; and the elect are identical with the baptized; and the 'election' constitutes the Church" (p. 402). His conclusion, from an examination of the passages of Scripture bearing on the question, is that the question as to the right side, is given us concerns his will and purpose to gather together in Christ a Church chosen out of the world, and to that to Christ, and to every individual member of it, he gives the means of salvation. Thus, that attained, will be wholly due to the favor of God, which first chooses the elect soul to the blessings of the baptismal covenant, and afterwards endues it with power to live the life of faith. If, on the other hand, the proffered salvation be forfeited, it will be in consequence of the faults and wickedness of him that rejects it. Much is said in Scripture of God's will that all shall be saved, and of Christ's death as a sacrifice for all men; and we hear of none shut out from salvation but for their own faults and demerits. More than this, with certainty be inferred from Scripture, for it appears most probable that what we learn there is not that salvation is given us, but that we have no revelation concerning predestination to glory" (p. 442). See also, for views somewhat similar, Faber, Primitive Doctrine of Election (New York, 1840, Svo); Fry, Essay on Election (London, 1864). For further literature, see Arminianism; Predestination.

2. Martensen (Christian Dogmatik, Edinb. 1866), a modern Lutheran divine, remarks that Calvin "con-
that all boles consist of certain first, specific ingredients (στρογγυλικά), into which they are all resolvable, although different opinions prevailed respecting the number and nature of these primary constituents of things. Hesychius explains στρογγυλικά by πύρι, πυρίων, introducing also πολύμορφον, these being the elements of woods; also the elements, rudiments, or first principles of any art or science.

The word occurs in its primary sense, Wis. vii. 17, στρογγυλος κόσμον και ειπταρχοι στρογγυλικά, "the constitution of the world and the operation of the elements," also in Jer. ii. 18, στρογγυλα "the elements burning will be dissolved and melted." The Jews, in Peter's time, spoke of four elements (Josephus, Ant. iii. 1, 7).

The word occurs in a secondary sense in Gal. iv. 8-9, τοις γαρ στρογγυλικά και μεταξίωσαν, "the elements, rudiments of the world," which the apostle calls ανθρώπων και πυρίων στρογγυλικών, "weak and poor elements." He introduces the word to preserve the unity of his comparison of the law to a pedagogue (iii. 24), and of persons under it to children under tutors; and by the elements or rudiments of the world he evidently means that state of religious knowledge which had subsisted in the world, among Jews and Gentiles, before Christ; the weakness of which, among the Jews, may be seen in Heb. vii. 18, 19, x. 1; and among the Gentiles, in the apostle to the Romans, passim. The "elements of the world" occurs again, Col. ii. 8-20, in the same sense, as appears from the various allusions both to the terms used in Grecian philosophy, and the dogmas of the Judaizers in the subsequent verses; the phrase being possibly suggested to the apostle by his previous use of it to describe the elements of the world (Col. i. 18). The word occurs in Heb. vi. 12, is restricted, by the addition ταν αυτών τοις φύσει, to the rudiments of Christianity (see Rosenmüller and Benson on the passages).

11. In the Sacraments.—The materials used in the sacraments are called the elements. Water is the element of baptism and of purification. The word of ιερατείας, "sacred elements," is a word used in the Eucharist. "This use of the word 'elements' (στρογγυλικά) sprang from the philosophy of the school divines, and evidently had reference to the change supposed to take place after consecration. The Church of England has discarded the term in her services, and has substituted for it the word 'sacraments' ('Thinks thy creatures of bread and wine') in the communion service, though the word 'elements' is found in one of the rubrics of that office" (Eden). "In all the Jewish sacrifices of which the people were partakers, the viands or materials of the feast were first made God's by a pious oblation, and then afterwards eaten by the communicants, not as man's, but as God's provisions, who, by thus entertaining them at his own table, declared himself reconciled, and again in covenant with them. And therefore our blessed Savior, who had now consecrated the new sacrament with his own body and blood, first gave thanks and blessed the elements—that is, offered them up to God as Lord of the creatures, as the most ancient fathers expound that passage; who for that reason, whenever they celebrated the holy Eucharist, always offered the bread and wine for the same commended to God upon the altar by this or some short ejaculation: 'Lord, we offer thee thine own out of what thou hast bountifully given us'" (Bishop Patrick, cited by Hook, Church Dictionary, s. v.).

ELEPHANT. See JONATH.-ELEPH.-RECHO-KIN.

'Eleph (Heb. with the art. ha-'Eleph, ה'לֵּפ, Vulg. Eleph), one of the second group of towns allotted to Benjamin, and named between Zelah and Jerusalem (Josh. xviii. 28). It is possibly the ruined site marked as Kattana on Van de Velde's 'Map of the environs of Jerusalem,' about one mile S.W. of Jerusalem. The Sept. unites the preceding name with this, and under the latter the evidence mete, east, west, and air, of which bodies are formed. This, which is the simplest, may be called the primary sense of the word. A secondary use of the word relates to the organized parts of which anything is framed, as the letters of the alphabet (Hesychius gives also γυμνόμενοι), these being the elements of works; also the elements, rudiments, or first principles of any art or science.

The word occurs in its primary sense, Wis. vii. 17, στρογγυλος κόσμον και ειπταρχοι στρογγυλικά, "the constitution of the world and the operation of the elements," also in Jer. ii. 18, στρογγυλα "the elements burning will be dissolved and melted." The Jews, in Peter's time, spoke of four elements (Josephus, Ant. iii. 1, 7).

The word occurs in a secondary sense in Gal. iv. 8-9, τοις γαρ στρογγυλικά και μεταξίωσαν, "the elements, rudiments of the world," which the apostle calls ανθρώπων και πυρίων στρογγυλικών, "weak and poor elements." He introduces the word to preserve the unity of his comparison of the law to a pedagogue (iii. 24), and of persons under it to children under tutors; and by the elements or rudiments of the world he evidently means that state of religious knowledge which had subsisted in the world, among Jews and Gentiles, before Christ; the weakness of which, among the Jews, may be seen in Heb. vii. 18, 19, x. 1; and among the Gentiles, in the apostle to the Romans, passim. The "elements of the world" occurs again, Col. ii. 8-20, in the same sense, as appears from the various allusions both to the terms used in Grecian philosophy, and the dogmas of the Judaizers in the subsequent verses; the phrase being possibly suggested to the apostle by his previous use of it to describe the elements of the world (Col. i. 18). The word occurs in Heb. vi. 12, is restricted, by the addition ταν αυτών τοις φύσει, to the rudiments of Christianity (see Rosenmüller and Benson on the passages).

11. In the Sacraments.—The materials used in the sacraments are called the elements. Water is the element of baptism and of purification. The word of ιερατείας, "sacred elements," is a word used in the Eucharist. "This use of the word 'elements' (στρογγυλικά) sprang from the philosophy of the school divines, and evidently had reference to the change supposed to take place after consecration. The Church of England has discarded the term in her services, and has substituted for it the word 'sacraments' ('Thinks thy creatures of bread and wine') in the communion service, though the word 'elements' is found in one of the rubrics of that office" (Eden). "In all the Jewish sacrifices of which the people were partakers, the viands or materials of the feast were first made God's by a pious oblation, and then afterwards eaten by the communicants, not as man's, but as God's provisions, who, by thus entertaining them at his own table, declared himself reconciled, and again in covenant with them. And therefore our blessed Savior, who had now consecrated the new sacrament with his own body and blood, first gave thanks and blessed the elements—that is, offered them up to God as Lord of the creatures, as the most ancient fathers expound that passage; who for that reason, whenever they celebrated the holy Eucharist, always offered the bread and wine for the same commended to God upon the altar by this or some short ejaculation: 'Lord, we offer thee thine own out of what thou hast bountifully given us'" (Bishop Patrick, cited by Hook, Church Dictionary, s. v.).

Elephant (African) does not occur in the text of the canonical Scriptures of the A. V., except in the adj. λαχθατισμός, "of ivory," Rev. xviii. 12. But the animal is believed to be referred to in the Heb. בֵּיתוֹ, ορφέων, "elephant's tooth, i. e. "ivory," 1 Kings x. 22; 2 Chron. ix. 21. See IVORY. Some have also regarded it as identical with the בֵּיתוֹ, "house of ivory," as in the margin of Job x. 15, 15. Elephants, however, are repeatedly mentioned in the 1st and 20th books of Maccabees as being used in warfare. The way in which they were used in battle, and the method of exciting them to fight, is described in 1 Macc. vii. The essential syllable of the Greek (and modern) name seems to be derived from that which all the nations of the south and west of Asia have for many ages generally used, namely, φίλ, φιλ, phel, phil, βήλος: for we find it in the Chal. (בֵּיתוֹ, pîlu, Buxtorf, Lex. Talm. col. 1722), Syr. (תַּנִּי), Persian, Arabic, and Turkish, extending to the east far beyond the Ganges, where, nevertheless, in the indigenous tongues, anei, waranam, and katti are existing names. See (Cassel, Die reinr elefant, denomi- na. ttr. i. i. 136 sqq.; Zeichn. f. Kunde des Morgenl. i. iv. 12 sqq. It is well known that these animals were ancienly employed in battles, originally in India (Aristotle,
ELEPHANT

Asiat. elephant. The animals of this genus consist at present of two very distinct species, one a native of Southern Asia, once spread considerably to the westward of the Indus, and the other occupying southern and middle Africa to the edge of the great Sahara. In a fossil state, however, there are six more species clearly distinguished. The elephant is the largest of all terrestrial animals, sometimes attaining above eleven feet of vertical height at the shoulders, and weighing from five to seven thousand pounds: he is of a black or slatey-black color, and almost destitute of hair. The head, which is proportionally large, is provided with two broad pendulous ears, particularly in those of the African species, which are occasionally six feet in length. This species has also two molar teeth on each side of the jaw, both above and below, and only one toe-nail on each of the hind feet, whereas the Asiatic species is provided with only one tooth on each side above and below, and, though both have tusks or defences, the last mentioned has them confined solely to the males: they are never of more than 70 pounds in weight, often much less, and in some breeds even totally wanting; while in the African both sexes are armed with tusks, and in the males they have been known seven feet in length, and weighing above 150 pounds each. The forehead of the African is low, that of the Asiatic high; in both the eyes are comparatively small, with a malevolent expression, and on the temples are pores which exude a viscous humor; the tail is long, hanging nearly to the heels, and distichous at the end. But the most remarkable organ of the elephant, that which equally enables the animal to reach the ground and to grasp and to hold a trunk, is the proboscis or trunk—a cylindrical elastic instrument, in ordinary condition reaching nearly down to the ground, but contractile to two thirds of its usual length, and extensible to one third beyond it; provided with nearly 4000 muscles crossing each other in such a manner that the proboscis is flexible in every direction, and so abundantly supplied with nerves as to render the organ one of the most delicate in nature. Within is the double canal of the nostrils, and at the terminal opening a finger-like process, with which the animal can take up very minute objects and grasp others, even to a writing
pen, and mark paper with it. By means of the pro-
boscis the elephant has a power of suction capable of
raising nearly 200 pounds' weight; and with this in-
strument he gathers food from trees and from the
erth, draws up drink to squirt it down his throat,
draws corks, unties small knots, and performs num-
berless other minutes of service. There are two
 tears down branches of trees more than five inches in
diameter with no less dexterity than strength. The
gait of an elephant is an enormous stride, performed
with his high and ponderous legs, and sufficiently rap-
id to require brisk galloping on horseback to outstrip
him, though a great deal of foaming at the mouth
is incurred. In the presence of men these animals;
sociable among themselves, and ready to help each other;
gregarious in grassy plains, but more
inclined to frequent densely-wooded mountain gorges;
at times not unwilling to visit the more arid wastes,
but contrived to avoid it for, being easily washed
through mud and water among reeds and under the shade
of trees. They are most assuredly more sagacious than
observers, who, from a few visits to menageries, com-
pare them with dogs, are able to appreciate, for on this
question we must take into account, on the one hand, the
individual experience gained by an animal slow in
growth, and of a longevity exceeding a century, but
still placed in contact with man after a birth free in
every sense, where his powers expand without human
education; while, on the other hand, dogs are the off-
spring of a few years, and all the education of dogs
is fashioned to the will of a master, and consequently with
innate dispositions to acquire a certain education. In
Griffith's 'Cruiser' are found several anecdotes illustrating
the sagacity of these animals, to which we shall add only
a single one, related by the late Captain Hobson,
R. N., as observed by himself at Travancore, where
several of these animals were employed in stacking
teak-timber balks. They had scarcely any human aid
or direction, but each beam being successively noosed
and slung, they dragged it to the stack, raised one end
up, as contrived to show it forward, nicely watching
when, being poised by its own weight, the lower end
would rise, and then, placing their foreheads against
the butt end, they pushed it even on the stack; the
sling they unfastened and carried back to have it
fitted
again. In a wild state no other animal has the
ease with which they can carry heavy branches of
such forest trees, or use it as a fan, and use it as a brush to drive away flies.
The Asiatic species, carrying the head higher, has
more dignity of appearance, and is believed to have
more sagacity and courage than the African, which,
however, is not inferior in weight or bulk, and has
never been tamed. It is held only in the East Indies as
a native of the Indian Peninsula, and by the Indians
as the Mohauts, are who have acquired such
deep knowledge of the character of these beasts that
they make them submit to almost incredible opera-
tions; such, for example, as suffering patiently
the extraction of a decayed part of a tooth, a kind of
chisel
and mallet being the instrument used for the pur-
pose. Elephants walk under water as long as the end
of the proboscis can remain above the surface, but when
in greater depth they float with the head and back only
about a foot beneath it. In this manner they swim across the broadest streets, and guide themselves
by the sense of smelling till they reach footing to look
about them and land. They are steady, assiduous
workmen in many laborious tasks, often using discre-
tion when they require some dexterity and attention
in the performance. Good will is all man can trust to in
the process of enforcing correction beyond their patience; but flattery, good treatment,
kind words, promises, and rewards, even to the wear
of finery, have the desired effect. In history they ap-
pear most conspicuous as formidable elements of battle.
From the remotest ages they were trained for war by
the nations of India, and by their aid they no doubt acquired and long held possession of several regions of
High Asia westward of the Indus. They are noticed in
the ancient Mahabaraty. According to Sausti, the
relative force of elephants in an akshashami, or great
army corps, was one to each chariot of war, three horse-
men, and five foot soldiers, or, rather, archers mounted
on the animal's back within a defensible konaksh—
In the West Indies the elephant, on one hand, was a
symbol of war, the war elephant, one chariot, and three horsemen, formed a pattri
or squad of at most eleven men, and, if there were oth-
er bodies of infantry in the army, they are unnoticed.
This enumeration is sufficient to show that in India,
which furnished the elephants and the model of arm-
ment, the latter followed the former, and in the rest of
the world it has been with the elements of war
without the mohaut or driver, and that, consequently,
when the successors of Alexander introduced them in
their wars in Syria, Greece, and even Italy, they could
not be encumbered more than perhaps momentarily
with one of these and still be mobile, and for the
weight carried by a war-elephant is less than
that of one used for burden, which seldom equals 2000
pounds. In order to ascend his back when suddenly
required, the animal will hold out one of his hind legs
horizontally, allowing a person to step upon it until he
has grasped the hump or ridge, as the French
phrases, where they were considered for a time of great impor-
tance, no doubt the squad or escort was more consider-
able than in the East, and may have amounted to
thirty-two foot-soldiers, the number given, by some
mistake, as if actually mounted, in 1 Macc. vi.
7. Although we are ignorant of the exact use made of the
elephant in Egypt, it may be observed that the use of mulberry-juice or grapes must have been intended as an excitement to
their taste, for they are all fond of fruit. Wine, so as
to cause an approach to intoxication, would render
them ungovernable, and more dangerous than when in
a state of, for were only too frequent to urge them on in a modern battle, with all its flashes of
fire, smoke, and explosion; and red colors usually
employed for their trappings produce more of a satis-
factory feeling than rage. Judicious and long-con-
tinued training by the only good remedy against sud-
den surprises caused by objects not yet examined by
their acutely-judging senses, or connected with former
scenes of danger, which are alone apt to make them
turn. It is likely that the disciplined steadiness of
well-armed ranks frightened them by their novelty
more than the danger of the Macedonian tactics, for the
war elephant must have been feeble in the ears of elephants accu-
stoned to the roar of hundreds of thousands of Indians. It is probable that the Carthaginians made the
experiment of training African elephants in imitation of
Polyben Philelpidusus: they are noticed in their army
by Cato, and besides the discipline of the mode of managing them, there is reason to be-
lieve, as already noticed, that they were never so thor-
oughly subdued as the Indian elephants (see Penay
Cyclopedia, s. v.).
Eleusian Mysterys, the sacred rites with-
which the annual festival of Eleusis was celebrated
at Eleusis, a town in Attica, situated to the north-west
of Athens, and opposite the island of Salamis. They
were the most ancient and most venerated mysteries of
Greece, and were probably at first a national and
harvest festival instituted in thank Demeter for the
gift of fruit, to remember the barbaric times preceding
the introduction of agriculture, and to rejoice at the
progress made since. Both the founder of the myste-
ries and the time of their foundation are unknown. It
is probable that the first foundation of them was laid
by Thracians, who from Asia spread over Europe. In
the time of the Pisistratidae, and that they were farther developed by the
Athenians themselves, especially at the time of the
Pisistratidae. The place in which they were celebra-
ted was the temple of Demeter at Eleusis, a spacious,
almost circular, temenos, which had been erected by
the architect Iktinos, and was surrounded with a
double vestibule (peribolos). At the time when Her-
ELEUSINIAN MYSTERIES 135

ELEUThERPOLIS

acls came to Athens to be initiated into the mysteries it was not yet permitted to admit any foreign Greek. In fact, not until the death of the priestess, and, from being thus the most scrupulous secrecy. No initiated person might reveal what he had seen under pain of death, and no uninitiated person could take part in the ceremony under the same penalty. The priestesses were chosen from the sacred family of the Eumolpides, whose name means 'the most splendid' because of the splendid art of Ceres. The chief-priest was called the 'Hierophant,' or 'Mystagogue'; next in rank to him was the Daduchus, or Torch-bearer; after whom came the Hiero-Ceryx, or Sacred Herald, and the priest at the altar. Besides these were three assistants, one a multitude of inferior priests and servants' (Chambers, Cyclop. s. v.). It was undoubtedly one chief aim of these mysteries to spread among the educated classes of the people more elevated religious ideas than were held by the mass of the people, especially with regard to the immortality of the soul, the punishment of the wicked, and the rewards of the good. The initiated were supposed to be especially protected by the gods, and to be sure of the joys of the future life. See Ou- waroff, Envoi sur les mystères d'Eleusis (8d ed. Paris, 1816; Freiler, Denemer und Persepheme (Hamb. 1857); Memminger, Archaische Anhänger auf die städtischen Festen der Athen (Leipzig, 1864). (A. J. S.)

Eleutheropolis (Eleutheropolis, free city), a place not named in Scripture, but which was an episcopal city of such importance in the time of Eusebius and Jerome that they assume it as the point whence to estimate the distance and flocks of cattle were mentioned, in southern Palestine (Onomast. s. v. Esthene, Sephela, Jermus, etc.; see Reland, Polyst. p. 410, 411). It appears from these and many other notices that E-leutheropolis was the capital of a large province during the fourth and fifth centuries of our era. It was also an episcopal city of Palæstina Prima (St. Paul, Geogr. Sac. p. 306; Notitia Ecclesiastica, p. 6). Its site remained unknown for many centuries, though defined by several ancient writers with much minuteness. Eusebius states that the plain of Shephelah extends from Eleutheropolis westward and southward (Onomast. s. v. Sephela), and hence it must have stood at the southwestern base of the mountains of Judah. He also states that Bethabnem was ten miles distant from it, on the road to Nicopolis; and Jedna, six miles on the road to Hebron; and Sochoth, nine miles on the road to Jerusalem, within the territories of which the lines of road being traced and the distances measured, we find that the site indicated is Beit Jibrin (Robinson, Bib. Res. ii, 348, 369, 398, 404-420, 642-646). In the Acta Sanctorum Martyrum, published by Assemani in Syriac, Greek, and Latin, Peter Abelaama the martyr is said to have been born at Ana, which lies according to the Syriac version, in the district of Beth Gabrin, while both the Greek and Latin read in the district of Eleutheropolis (ib. p. 66). This establishes the identity of Beth Gabrin and Eleutheropolis. Josephus mentions a town in this neighborhood called Betarsis, which some copies read Byrabsas, and it appears to be the same place (War, iv, 8, 1). Under its ancient name Betogalab(h) (Barroyaabaph, i.e. house of Gabra or Gabriel), it is enumerated by Ptolemy among the cities of Palestine (v. 16), and it is also laid down as Beth Gabrin in the Itinerary of Ptolemy (Polyst. p. 421). The name Eleutheropolis first appears on coins of this city inscribed to Julia Donna, the wife of Septimus Severus, in A.D. 202-3 (Eckhel, lii, 488). The emperor had been in Syria about that time, and had conferred important privileges on various cities, among which was Bethogalab, which appears to have been then called Eleutheropolis, as being made a free city. Epiphanius, the well-known writer, was born in a village three miles from the city in the beginning of the 4th century, and is often called an Eleutheropolitan (Reland, p. 731, 732). In the year A.D. 706, little
more than a century and a half after the Sarmacian con-
quest, Eleutheropolis was razed to the ground, and left
completely desolate. The Greek language now gave place
to the Arabic, and this city lost its proud name and its prouder rank together (Reland, p. 967). Like
so many other cities, the old Aramic name, which had passed
down to the Byzantine country, was revived among
writers, and we thus find Beidgeliran, or some form
like it, constantly in use after the 8th century
(Reland, Palast. p. 222, 227; Gesta Dei per Francos,
p. 1044). In the 12th century the Crusaders found it
in ruins, and called by the Arabs Bethgelirion (doubt-
lessly the Arabic of Beidgeliran) which they built a
strong fortress on the old foundations to guard against
the incursions of the Moslems, the remains of which,
and the chapel connected with it, still exist. After
the battle of Hattin it fell into the hands of Saladin,
but was retaken by Richard of England. It was
finally captured by Gibars (see WilI. Tyr. xiv, 29; Jac-
de Vit. in Gestae Dei, p. 1070, 1071; Bohaeddin, Vit.
Salad. p. 229). It has since crumbled to ruin under the
blight of Mohammedan rule.

The modern village of Beit Jibrin is about twenty-
five miles from Jerusalem, on the road to Gaza. It
contains between two and three hundred inhabitants,
and is situated in a little nook or glen in the side of
a long green valley, which is shut in by low ridges of
limestone partially covered with dark cypess. The
ancient ruins are scattered around it, and are of con-
siderable interest. The principal one is a large irregu-
lar inclosure, formerly surrounded by a massive wall,
still in part standing, and containing the remains of
the Crusaders' castle. A great part of this outer wall
is completely ruined; but the north side, which skirts
the bank of the valley, is still several feet high. The
inclosure was about 600 feet in diameter, the fortress
is about 200 feet square, and is of a much later date
than the outer wall. In the castle, along the south
side, are portions of the walls and the groined roof
and clustered columns of a fine old chapel—the same,
doubtless, which was built by the Crusaders. An
Arabic inscription over the castle-gate bears the date
A.H. 958 = A.D. 1551—probably the time when it was
last repaired. A short distance eastward are other
massive ruins and a deep well; while about a mile up
the valley are the picturesque remains of the church
of St. Anne (Porter, Handbook for Synr. and Pal. p. 256
sqq.). Several curious tracts have been found in a "local
habitation" at Beit Jibrin. One place here the mi-
riculous fountain which sprang from the jaw-bone
Samson wielded with such success against the Philis-

 Beit Jibrin lies on the side of which the ruins of Eleu-
theropolis lie, runs up among the hills for two miles
or more south-by-east. On each side of it are low
ridges of soft limestone, which rises here and there in
white bare crowns over the dark shrubs. In these
ridges are some of the most remarkable caverns
and excavations in Palestine, rivalling in extent and in-
terest the catacombs of Rome and Malta. They are
altogether different in character from the rock-tombs
of Jerusalem and the grottos of Petra. They were
examined and described by Dr. Robinson, and they
have since been more fully explored by Mr. Porter.
They are for the most part in clusters in isolated subter-
anean villages. Some are rectangular, 100 feet and
more in length, with smooth walls and lofty arched
roofs. Others are bell-shaped—from 40 to 70 feet in
diameter, by nearly 60 feet in height—all connected
in many instances to other caverns of the same subter-
anean passage. A few are entirely dark, but most of
them are lighted by a circular aperture at the top.
They occur at short intervals along both sides of the
whole valley, and may also be seen at several other
neighboring villages. The origin and object of these
singular excavations are certainly ascertained. During
the Babyloan captivity the Edomites inhabited and
occupied the whole of southern Palestine, which is
therefore called by Josephus Idumea. Jerome calls
the Idumeans Horites, and says they inhabited the whole
country extending from Eleutheropolis to Petra and
Elah, and that they dwelt in caves—preferring them
both on account of their security and their coolness
from the summer heat (Cassius, ad obid. i). The original
inhabitants of Edom were the Moabites (2 Sm. xxv, 22;
Trogodytes, "dwellers in caves." The descendants
of Esau adopted the habits of their predecessors, and
when they took possession of southern Palestine exca-
vated rock dwellings wherever practicable (see Robin-
son's Biblical Research, p. 68 ed. ii, 28, 57 sq.; Yan do
Velde, Narrative, ii, 147 sq.; Thomson, Land and Rock,
i, 358 sq.).

Eleutherus or Eleutherus, a native of Nicop-
olis, elected bishop of Rome after the death of
Soter, May 3, 177. He is previously (186) mentioned as a
dean of bishop Anicetus of Rome. He opposed with
much bitterness the opinions of the Valentinians, and
in his epistles he reproves them for having the power of
his name inscribed on his seal. His epistles have been
published by U. C. C. (Rom. Acta, i, 25). He was
the founder of the Church of Rome, and is the first
mentioned in the Catacomb inscriptions. He died in
the year 206, and was succeeded by Cyprian.

His name is mentioned by Origen and by Eusebius,
and is found in the early Church fathers. He is also
mentioned by Cyprian, Africa, i, 4; and by the
Church fathers, and is found in the early Church fathers.

Eleutherus (Heb. Ekhoman), זיבק"מ, whom God has
graciously bestowed [compare Hamaneal, Hamanahamah,
Ekhoman, Phun, Honsalib; also Bok-hanam, etc.];
ELIHANAN

3. Elhanan is elsewhere called the son of Dodo of Bethlehem, one of "the thirty" of David’s guard, and named first on the list (2 Sam. xxiii, 24; 1 Chron. xi, 26). See Kennicott’s Dissertation, p. 179. Perhaps his father had both names. See Jair.

Elevation of the Host. See Host and MASS.

Eliezer. See ALFRIC.

Eli (Heb. Eli, יְלִי, l. q. יִלְי, recent; Sept. ʼHai [so N. T. see HÉLI], Josephus HâUi, Vulg. Heili), the high-priest of the Jews when the ark was in Shiloh (1 Sam. i, 3, 9). He was descended from Aaron through Ithamar, the youngest of his two surviving sons (Lev. x, 1, 2, 12), as appears from the fact that Abiathar, who was certainly a lineal descendant of Eli (1 Kings ii, 27), had a son Ahimelech, who is expressly stated to have been "the son of Elnathan, the Elnathan" (1 Chron. xxvi, 23; 2 Sam. viii, 17). With this accords the circumstance that the names of Eli and his successors in the high-priesthood up to and including Abiathar are not found in the genealogy of Eleazar (1 Chron. vi, 4–15; comp. Ezra vii, 1–6). As the history makes no mention of a lineal successor of Abiathar after David, Eli is generally supposed to have been the first of that line who held the office (Josephus, Ant. vii, 1, 9). From him, his sons having died before him, it appears to have passed to his grandson Ahitub (1 Sam. iv, 3; comp. however Josephus, Ant. iv, 11, 2), and it certainly remained in the family of Eli Abiathar, the judge of Abiathar, was "thrust out from being priest unto the Lord" by Solomon for his share in Adonijah’s rebellion (1 Kings ii, 26, 27; i, 7), and the high-priesthood passed back again to the family of Eleazar in the person of Zadok (1 Kings ii, 25). How the office ever came into the younger branch of the house of Aaron we are not informed; perhaps it was through the incapacity or minority of the then sole representative of the elder line, for it is very evident that it was no unauthorized usurpation on the part of Eli (1 Sam. ii, 27, 28, 29). See ITHAMAR. Eli also acted as regent, or civil judge of Israel after the death of Samuel, being the immediate predecessor of his pupil Samuel (1 Sam. vii, 6, 15–17), the last of the judges. This function, indeed, seems to have been intended, by the theocratic constitution, to devolve upon the high-priest, by virtue of his high-priesthood, and in the absence of a civil judge, actually appointed by the divine King to deliver and govern Israel. He is said to have judged Israel 40 years (1 Sam. iv, 18): the Septuagint makes it 20. It has been suggested, in explanation of the discrepancy, that he was sole judge for 20 years, and then co-judge for 20 (Actx xxiii, 20). But the probability is that the number 40 is correct, but that it comprehends only the period of his administration as judge; for not only does the whole tenor of the narrative imply that this immediately succeeded the judgeship of Samson (as indeed Josephus evidently understood it; a fact apparent not only from his history, but also from the summing up of his numbers as computed by himself, Ant. v, 9; xiii, 3; title to book v), but this view is evidently taken by Paul in his assign- ment of the period of 450 years to the judges (Acts xiii, 20), a number that immediately suggests adding together the items as given in the O.T. history, including Samson and Eli as continuous to the others. See JUDGES. As Eli died at the age of ninety-eight (1 Sam. iv, 15), the forty years (B.C. 1165–

Jerome, in his Quast. Heb., on both passages—he does not state whether from ancient tradition or not—translates Elhanan into A -δος, and adds φιλός σαι- τος. (B.C. 1125) must have commenced when he was fifty-eight years old. His Works, i, 53, 57, 60, fol. Lond. 1684; Selden, De Success. in Pontif. Heb., lib. i, cap. 4). See HIGH-PRIEST.

Eliezer seems to have been a religious man, and the only fault recorded of him was an excessive easiness of temper, most unbecoming in his position and of his official character. His son Hophni and Phine- has, whom he invested with authority, misconducted
themselves so outrageously as to excite deep disgust among the people, and render the services of the tabernacle odious in their eyes (1 Sam. ii. 27-36; 1 Kings ii. 27). This misconduct Eli had aware, but he contented himself with mild and ineffectual remonstrances (1 Sam. ii. 22-25), with his position being more secure and vigorous action (1 Sam. iii. 18). For this neglect the judgment of God was at length denounced upon his house, through the young Samuel (q. v.), who, under peculiar circumstances, had been attached from childhood to his person (1 Sam. ii. 29; iii. 18). Some years passed (1 Kings ii. 37), and Samuel anointed the young Saul as king. The public adulation of this denunciation, but it came at length in one terrible crash, by which the old man's heart was broken. The Philistines had gained the upper hand over Israel, and the ark of God was taken to the field, in the confidence of victory and safety from its presence. But in the battle which followed the ark itself was taken by the Philistines, and the two sons of Eli, who were in attendance upon it, were slain. The high-priest, then blind and age, sat by the wayside at Shiloh, awaiting tidings from the war, "for his heart trembled for the ark of God." A man of Benjamin, with his clothes rent, and earth upon his head, brought the fatal news; and Eli heard that Israel was defeated—that his sons were slain—that the ark of God was taken—at which last word he fell heavily from his seat, and died (1 Sam. iv.). According to Schwarzer (Pulivest, p. 142), and others, it is conjectured from his grave to an elegant building at the village Charim ben-Elime, eight miles N.N.E. of Jaffa, on the shore. The ultimate doom upon Eli's house was accomplished when Solomon removed Abiathar (the last high-priest of this line) from his office, and restored the line of Eleazar, in the person of Zadok (1 Kings ii. 37). See ABIAH. Another part of the same sentence (1 Sam. ii. 31-38) appears to have been taking effect in the reign of David, when we read that "there were more chief men found of the sons of Eleazar than of the sons of Ithamar."—sixteen of the former, and only eight of the latter (1 Chron. vi. 8). 

Eli (אֵלִי; for Heb. "אֵל" [Psa. xxi, 3], "el", my God, as it is immediately rendered), an exclamation used by our Saviour on the cross, in appeal to his heavenly Father (Matt. xxvii, 46). See AGONY. In the parallel passage (Mark xv, 34) it is written 'Elel (Eloï). 

Eli (אֵלִי), an old form of the "construct state" of הָיָה, the "Highest", i.e. Almighty, the usual vowl being used as in אֶלִי, אֵלִית, etc.) often occurs as the first element of proper names (comp. Elia, Elijah, and many others here following), and as referring to the highest notion of the Deity among the Semitic races. As such epithet it is sometimes interchangeable with בָּאָל (q. v.) (see 2 Sam. v, 16; 1 Chron. xiv, 7), or even גִּהוֹ (q. v.) (see 2 Kings xxiii, 34). This constructive form is also sometimes interchanged with the abbreviation of the simple הָיָה into הָיָה (1 Chron. iii. 8; 4: 5; comp. Exod. vi. 22; Num. iii. 30), or it even exchanges places with the other element of the name, e.g. Eliah (2 Sam. 3, 3) becomes Ammiel (1 Chron. iii, 5). As in the words beginning with Abi-, Abi-, etc., this element often melts into the other member, not strictly in a genitive sense, but as a sort of liturgical invocation or eulogium of the Deity, as is found to be the case with similar names used as religious formulae, especially among the ancient Phoenicians (see Elhanan). 

Eli'ab (אֱלִיָּב) [Heb. Eli'ab, אֱלִיָּב, to whom God is father; Sept. 'Eli'jāb, Vulg. Eliab], the name of seven men.

1. A Reubenite, son of Pallu or Phallu, whose family was one of the principal in the tribe and father or progenitor of Dathan and Abiram, the leaders in the revolt against Moses (Num. xxvi, 8, 9; xvi, 1, 12; Deut. xi, 6). B.C. post. 1586. Eliab had another son named Nemuil; and the record of Num. xxxvi is interrupted expressly to admit a statement regarding his sons.

2. A son of Helon, and phylarch of the tribe of Zebulun at the time of the census in the wilderness of Sinai (Num. i, 9; ii, 7; vii, 24, 29; x, 16). B.C. 1657.

3. An ancestor of Samuel (q. v.) the prophet, being a Kohathite Levite, son of Nahath and father of Jehoham (1 Chron. vi, 27 [12]). B.C. cir. 1250. In the other statements of the genealogy this name appears to be given as the ELI尤 (1 Sam. i, 1) and ELIEL (1 Chron. vi, 34 [19]).

4. The eldest son of Jesse and brother of David (1 Sam. xvi, 6; xvii, 15; 1 Chron. ii, 13). It was he that made the contemptuous enquiry, by which he sought to screen his own cowardice, when David proposed to fight Goliath, "With whom hast thou left those few sheep in the wilderness?" (1 Sam. xvii, 29.) B.C. 1063. His daughter Abigail married her second cousin Rehoboam, and bore him three children (2 Chron. xi, 18); although, taking into account the length of the reigns of David and Solomon, it is difficult not to suspect that the word "daughter" is here used in the most abstract sense of granddaughter or descendant. In 1 Chron. xxvii, 18, we find mention of "Elihu, of the brethren of David," as "ruler" (אֵלִיָּהוּ) or "prince" (אֵלִיָּהוּ) of the tribe of Judah. According to the ancient Hebrew tradition preserved by Jerome (Quaeest. Hebr. ad loc.), this Elihu was identical with Eliab. "Brethren is, however, often used in the sense of kinsman, e.g. 1 Chron. xii, 2.

5. The third of the Gadite heroes who joined David in his stronghold in the wilderness (1 Chron. xii, 9). B.C. 1061.

6. A Levite in the time of David, who was both a "porter" (מכהן, shebêr, i.e. a door-keeper) and a musician on the "psaltery" (1 Chron. xv, 18, 20; xvi, 5). B.C. 1013.

7. Son of Nathanael, one of the forefathers of Judah, and therefore belonging to the tribe of Simeon (Judith viii, 1).

Eli'ada (Ebl. El'ada), שְׁנַיִם, whom God has known, the name of three men.

1. (Sept., in Kings, 'El'aci, and repeated, בַּאֲלָדִית; in Chron. 'Ele'ad, v. r. 'Ele'da; Vulg. Eladá, Eladu, Eladu, Eladu). One of David's sons; according to the list, the youngest but one of the family born to him after his establishment in Jerusalem (2 Sam. v, 16; 1 Chron. iii, 8). B.C. post 1033. From the latter passage it appears that he was the son of a wife and not of a concubine. See 1 Chron. xiv, 7, the name appears in the form of רָעָל, רֵעָל (q. d. whom the Master has known); Birellada (q. d. whom the Master has known), and Zebina (p. 460, רָעָל being the Syriac form of רָעָל, Lord). This curious reading of the Masoretic text is not, however, indisputable; De Rossi's Cad. 186 (prima manu) reads רָעָל, the Sept. 'Elādi, and the Peshito Elīdā. On the strength of these authorities, De Rossi (after Dathanus, Lib. Hist. V. T. 664) pronounces in favor of assimilating this passage to the other two, and refers to the improbability of David's using the names רָעָל and רָעָל promiscuously (see De Rossi's Var. Lect. V. T. Hebrevi- cor, iv). We must note, however, the intensity of careful criticism, too hastily succumb to arguments of this kind. As to MSS, the four or five which Kennicott adduces all support the text of 1 Chron. xiv, 7; the authority of the Sept. is neutralized by Codex Alex. and Fral. August., the former of which has רָעָל and the latter רָעָל, evidently corroborating the Masoretic text, as does the Vulg. Baaladu. As to the difficulty of David's using a name which contained רָעָל for one of its elements, it is at
least very doubtful whether that word, which literally means *master, proprietor, luminary*, and is often used in the earlier Scriptures inoffensively (see Gesenius, Thes., p. 224), in David's time had acquired the bad sense which *baal*-worship in Israel afterwards imparted to it. It is much to the present point that in this very chapter (ver. 11) David does not object to employ the word *baal* in the same *baal*-punishment as a condemnation of a victory vouchsafed to him by the Lord (see 2 Sam. v. 20, where the naming of the place is ascribed to David himself). It is possible that this appellation of his son might itself have had reference to that signal victory. The name appears to be omitted by Josephus in his list of David's family (Ant. viii, 3, 3), unless he be there called Elon (Elyon).

2. (Sept. *Ela'nas, v. r.* *Ela'nus; Vulg. *Elidus*.) Apparently an Aramean of Zobah, the father of Rezon, which latter was captain of a marauding band that annoyed Solomon (1 Kings xi. 23, where the name is Anglicized "Elidah"). B.C. ante 976.

*El'idad* (1 Kings xi. 23), a less correct mode of Anglicizing the name of Elad (q. v.).

*El'idad* (Ela'das, Vulg. Elidus), one of "the sons of Zammoth" who divorced his Gentle wife after the restoration from Babylon (1 Esdr. ix. 28); evidently the Elnocati (q. v.) of the Heb. text ( Ezra x. 27).

*El'adun* (Ela'donas v. r. *Ela'donas, Vulg. omits*), a name given as that of the father of Joda, whose sons and brethren assisted in rebuilding the Temple after the return from Babylon (1 Esdr. v. 38); apparently a corruption for the Henadad (q. v.) of the Hebrew narrative (Ezra iii, 19).

*El'ah* (1 Chron. viii. 27; Ezra x. 26), a less correct mode of Anglicizing the name of Eliah (q. v.), but referring to others than the prophet.

1. The son of Meleah and father of Nathan, in the genealogy (q. v.) of David (Luke iii. 30), probably the grandson of Nathan, of the private line of David's descent (Strong's Harm. and Expos. p. 16). B.C. considerably post 1013.

2. Son of Hickish, and priest of the palace under king Hezekiah, who sent him to receive the message of the invading Assyrians, and report it to Isaiah (2 Kings xviii. 18; xix. 2; Isa. xxxvi. 3, 11, 22; xxvii. 2), B.C. 735. He succeeded Shebna in this office after the latter had been ejected from it (Grotius thinks by reason of his leprosy) as a punishment for his pride (Isa. xlii. 15-20). Elakim was a good man, as appears by the title emphatically applied to him by God, "my servant Elakim" (Isa. xlii. 20), and as was evinced by his conduct on the occasion of Sennacherib's invasion (2 Kings xvii. 37; xix. 1-15) and also in the discharge of the duties of his high station, in which he acted as a "father to the inhabitants of Jerusalem and to the house of Judah" (Isa. xxix. 21). It was as a special mark of the divine approbation of his character and conduct of which, however, no further details have been preserved to us, that he was raised to the post of authority and dignity which he was held at the time of the Assyrian invasion. What this office was has been a subject of some perplexity to commentators. The ancients, including the Sept. and Jerome, understood it of the priestly office, as appears by the rendering of שְׁכָר (Isa. xxii, 15; A. V. "treasurer") by πιστοφόρος, the "priest's chamber," by the former, and of כָּבָד (Isa. xxxvi, 9) by "pretpositor templi," by the latter. Hence Nicephorus, as well as the author of the Alexandrian Chronicle, includes in the list of high-priests Somnas or Sobnas (i.e. Shebna), and Elakim, identifying the latter with Shallum or Meshshullam. But it is certain from the description of the office in Isa. xxii, and especially from the expression in ver. 22, "The key of the house of David will I lay upon his shoulder," that it was the king's house, and not the house of God, of which Elakim was prefect, as Ahiah had been in the reign of Solomon (1 Kings iv, 6), and Azrikam in that of Ahaz (2 Chron. xxvii. 7). With this agrees both all that is said, and all that is not said, of Elakim's functions. The office seems to have been the highest under the king, as was the case in Egypt, when Pharaoh said to Joseph, "Thou shalt be over my house (יוֹרֵא בָּעַם) . . . only in the throne will I be greater than thou" (Gen. xli. 40; comp. xxix. 4). In 2 Chron. xxvii. 7, the officer is called "governor (יוֹרֵא בָּעַם) of the house." It is clear that the "scribe" was inferior to him, for Shebna, when degraded from the prefecture of the house, acted as scriba and scribe to Elakim (2 Kings xix. 14). The whole description of it too by Isaiah implies a place of great eminence and power. This description is transferred in a mystical or spiritual sense to Christ the son of David in Rev. iii. 7, thus making Eliakim in some sense typical of Christ. The true meaning of מָשְׁמַר, *watchman*, is very doubtful. "Friend," i.e. of the king, and not a general of the provost, is the most probable significations. See Treasurers. Elakim's career was a most honorable and splendid one. Most commentators agree that Isa. xxii. 25 does not apply to him, but to Shebna.

3. The original name of Jehoiakim (q. v.), king of Judah (2 Kings xxiii, 44; 2 Chron. xxxvi. 4).

4. Son of Abid, and father of Elal (q. v.); postorer of Zelseal (Matt. i. 35). He is probably identical with the Shechechiah (q. v.) of 1 Chron. iii. 21 (Strong's Harmony and Expos. of the Gospels, p. 11). See Genealogy of Christ.

5. A priest in the days of Nehemiah, who assisted at the dedication of the new wall of Jerusalem (Neh. xii. 41). B.C. 446.

*El'ali (Ela'li v. r. *Ela'li, Vulg. Diluas*), one of "the sons of Maanit" who divorced his gentle wife after the exile (1 Esdr. ix. 34); apparently a corruption for the Binnui (q. v.) of the Heb. text (Ezra x. 38).

*El'iam* [usually *El'iam*] (Heb. *El'iam*, *Elam*, God is [his] people, i.e. friend; Sept. *Ela'ios*, Vulg. *Ealem*), the father of Bathseba, the wife of Uriah and afterwards of David (2 Sam. xii. 8). In the list of 1 Chron. iii. 5, the names of both father and daughter are altered, the former to the equivalent Ammiel (q. v.), and the latter to Bathshua, both the latter names being also those of non-Israelite persons, while Uriah was a Hittite (comp. Gen. xxx, 12; 1 Chron. ii, 3; also 2 Sam. xvi. 27). The same name Elam also occurs as the father of Gilo, i.e. "shining one," of one of David's "thirty" warriors (2 Sam. xxiii, 34). It is omitted in the list of 1 Chron. xi. but is now probably discernible as "Ahabiah the Pelonite" (ver. 86) (see Kennicott, Dissertation, p. 207). The ancient Jewish tradition preserved by Josephus (Ant. xiv. 2 Sam. xi. 20; 1 Chron. xi. 5) is that the two Elims are the same person. An argument has been founded
on this account for the hospitality of Abithopel to king David, as having dishonored his house and caused the death of his son-in-law (Blunt, Coincidences, pt. ii, s.). But he would perhaps have rather been proud of this alliance with royalty. B.C. 1496.

Eli'az'ónias [many Elyazónias] (Elyazonzes, Vulg. Magulæon) included in the preceding list of the Ammonites and N.T. (Ecles. xviii. 1, 4, 12; 1 Matt. ii. 58; Matt. xi. 14, xvi. 14, xvii. 3, 4, 10, 11, 12; xxvii. 47, 49; Mark vi. 15; viii. 28; ix. 4, 5, 11, 12, 13; xv. 33, 35, 86; Luke i. 17; iv. 25, 26; ix. 8, 10, 30, 33, 84; John i. 21, 25; Rom. xi. 2; James v. 17). In Rom. xi. 2, the reference is not to the prophet, but to the portion of Scripture designated by his name, the words being Ιωακιων, "in Elias," not as in A.V. "of Elias."—Smith, s. v.

Eli'as Levita (properly Elyas the Levite, son of Asher), one of the greatest Jewish scholars of modern times, was born in the latter half of the fifteenth century, and the year and the place of his birth have been the subject of literary controversy. The former point seems to have been settled by the learned Rossi (see below), who showed that Elias was born in 1471 or 1472, not, as Hirt maintains, in 1469, or, as Nagel undertook to prove, in 1477. The second point is still a point of dispute, both Italians and Germans being desirous to claim this great writer for their country. The chief argument of the former is that Elias, in one of his works, speaks of Italy as "my country" and Venice as "my city;" the chief arguments of the Germans are that Elias, on the titlepages of several of his books, calls himself "Lacchermoru (לכְּכֶרֶמ), or "the German," and that, according to the express testimony of his friend and pupil, Sebastian Münster (q. v.), he was born at Neustadt, on the Aich, not far from Nuremberg. The marginal note of Neustadt expelled Elias, together with several other Jews, from that town. He then went to Italy, lived in several places as teacher of the Hebrew language, especially (from 1594) at Padua, where he lectured on the Hebrew grammar of Moses Kimchi, and wrote a commentary on it. When Padua, in 1509, was captured and plundered, Elias lost all his property and went to Venice, which city, in 1512, he again left for Rome. There he met with the very respectful reception of Cardinal Egidio of Viterbo, who even received him and his family into his own house. For many years Elias instructed the cardinal in the Hebrew language, who, in turn, made him better acquainted with the classical languages. Through Egidio, Elias entered into intimate relations with a number of other cardinals and bishops, who so warmly recommended him that he received an honorable call from king François I of France, which he, however, declined. When Rome, in 1527, was plundered by the troops of Karl V, Elias again lost his whole property. He again went to Venice, where he remained until 1540, when he accepted a call from Paul Fagius to assist him in the establishment of a new Hebrew printing-office, and in the publication of several Hebrew books, at Isny, in Swabia. He remained in Isny until 1545, when he returned to Venice, where he died in 1549. Elias rejected many of the Jewish traditions, and always spoke favorably of the Christians; but he expressly denied that he had secretly become a Christian, and averred that, "thanks to God, he was still a Jew despite his universally esteemed scholarship; only some fanatical Jews hated him, as they suspected his fidelity to Judaism. His celebrated works on Hebrew grammar procured him the surname of "the Grammarien" (הָלָךְּכֶרֶמ). His first work was a commentary on the Mo'asia (Mahaiah), or grammar of the rabbi Moses Kimchi, first published by a certain Benjamin who had stolen the MS. (at Pesaro, 1508; frequently reprinted, with a Latin translation by Sebastian Münster, Basel, 1527, 1531; and another by L'Empeureur, Leyd, 1681). This is a different work from his scholia on Kimchi's הָלָךְּכֶרֶמ (Pethach Debarray), or brief grammatical introduction, the text of which had appeared at Naples in 1492, and Levita's scholia on it at Pesaro in 1508, and later editions. At Rome he composed a grammar entitled "Lxegyprnix" (Buchner, Rome, 1518), and a work on "Composition" (הָלָךְּכֶרֶמ), in which he treats of the irregular words of the Bible. Both works were translated by Münster (the former first at Basel in 1518, and the latter in 1536). He also wrote a more extensive grammatical treatise in four parts, entitled הָלָךְּכֶרֶמ, "Elijah's Sections" (Soncino, 1520, and later elsewhere; trans. by Münster, Basel, 1527, and later). After his return to Venice he wrote a book on the accents הָלָךְּכֶרֶמ, Fáb Tomus (1509, and further editions, translated by Münster, Basel, 1539), and, the most celebrated of all his works, a critical book on the Biblical text and its authors הָלָךְּכֶרֶמ, Masorah ham-Masoroth (Venice, 1568, 1546; Basel, 1539 [with a Latin summary of the work by Münster; Sulzbach, 1769 and 1771]). This work, remarkable alike for literary merit, although it anticipated the judgments of the highest modern criticism, and the questions of which it treats, and although it was, in fact, the father of the great Buxtorf and Cappell controversy, which raged round the Hebrew Scriptures for more than a hundred years after Levita's death, had, until recently, never been actually translated either into Latin or any modern language. Nagel translated into Latin the three introductions (Alteldorf, 1757-1771); and there is a so-called German translation of Levita's book, published at Halle in 1772, and commonly known as Semler's. But Semler was not really, as indeed he did not profess to be, the translator of Levita. The translation, so-called, as it was, was executed by a young Jewish convert to Christianity of the name of Meyer, and all that Semler did was to supervise and annotate the German rendering. After all, the work was full of errors, and many valuable passages of the original are altogether overlooked or omitted, and a valuable edition, by exec-
ELIASHEB

1. Son of Renel or Deuel, and phyrarch of the tribe of Dan (Num. i, 14; ii, 14; vii, 42, 47; x, 20). B.C. 1635.

2. Son of Lael, and chief of the family of the Ger-somite Levites (Num. iii, 24). B.C. 1657.

Elish'ahib (Heb. Elishahib, אֵלִישָׁהִיב, whom God will restore; Sept. Ἑλισσαβ, Ἑλισάβ, Ἑλισάβει, Ἑλισαβει, etc.; Josephus Ἑλισσαβοῦ; Vulg. Eliasub, Eliasib), a common name of Israelites, especially at the later period of the O.T. history.

1. A priest in the time of king David; head of the eleventh "course" in the order of the "governors" (חָיוֹן) of the sanctuary (1 Chron. xxiv, 12). B.C. 1013.

2. A Levitical singer who repudiated his Gentile wife after the exile (Ezra x, 24). B.C. 458.

3. An Israelite of the lineage of Zattu, who did the same (Ezra x, 27). B.C. 458.

4. An Israelite of the lineage of Bani, who did the same (Ezra x, 36). B.C. 458.

5. The high-priest of the Jews in the time of Nehemiah (Neh. xii, 28). B.C. 446. With the assistance of his fellow-priests, he rebuilt the eastern city wall adjoining the Temple (Neh. iii, 1). His own extensive efforts avoided all doubtless instigated by the same vicinities, probably on the ridge Ophel (Neh. iii, 20, 21). See Jerusalem.

Elishahib was in some way allied (רַבְּשָׁם) near to Tobiah the Ammonite, for whom he had prepared an ante-room in the Temple, a desecration which excited the pious indignation of Nehemiah (Neh. xii, 4, 7). One of the grandsons of Elishahib also married the daughter of Sanballat the Horite (xiii, 28). There seems no reason to doubt that the same Elishahib is referred to in Ezra x, 6, as the father of Joahan, who occupied an apartment in the Temple (comp. Josephus, Ant. xi, 5, 4). He is evidently the same as the Joashin and father of Joiaah (Josephus, "Judas," Ant. x, 7, 1), in the succession of high-priests (Neh. xii, 10, 22). See High-priest.

Elish'ah (אֶלֶישָׁה, the Graced form for 1 Esdr. ix, 1) of the name of the high-priest Elishah (q. v.).

Elish'aa (אֶלֶישָׁא, אֶלֶישָׁא v. r. 'El'Ìshà'aa), a name given (1 Esdr. ix, 34) to one of the twelve houses of the tribe of Manasseh, who divorced their Gentile wives after the captivity, and corresponding in position to Mattenai (q. v.) of the Heb. list (Ezra x, 33); but probably a merely erroneous repetition of Emarib (q. v.) preceding in the same verse.

El'Ìthah (Heb. Êlitha'h, אֵלִיתָה, 1 Chron. xxxv, 4, or Êlithy'h, אֵלֶיתָּה, ver. 27, in whom God will come; Sept. Ἑλιθαία, T. Ἑλίθας, Vulg. Elathah), the eighth named of the fourteen sons of the Levite Heman, and a musician in the Temple in the time of king David (1 Chron. xxxv, 4), who, with twelve of his sons and brethren, had the twentieth division of the Temple-service (xxv, 27). B.C. 1013. In Jerome's Quest. Hebr. on ver. 27, the name is given as Elithah, and explained accordingly; but not so in the Vulgate.

Elilberis. See Elivra.

El'Ìd (Hebrew Eldad), אלִדָּה, whom God has loved; Sept. Ἑλιδᾶ, Vulg. Eldad), the son of Chilion, and phyrarch of the tribe of Benjamin, one of the commissioner appointed to portion out the promised land among the tribes (Num. xxxvi, 21). B.C. 1819.

El'Ìlei (Heb. Ἑλίλει, אֶלְיֵלֶה, to whom God is moist), the name of the ninth Israelite.

1. (Sept. Ὠτίλα.) A valiant phyrarch of the tribe of Manasseh east (1 Chron. vi, 24). B.C. post 1612.

2. (Sept. Ὠτίλα.) Son of Tash and father of Jerome, ancestors of Heman the singer and Levite (1 Chron. vi, 34); probably identical with the Eliab of Chron. vi, 34, and the Elihu of 1 Sam. i, 1. B.C. cir 1250. See Samuel.

3. (Sept. Ὠτίλα.) One of the descendants of Shimhi, and head of a Benjamite family in Jerusalem (1 Chron. viii, 20). B.C. between 1612 and 588.

4. (Sept. Ὠτίλα.) One of the descendants of Shashak, and likewise head of a Benjamite family at Jerusalem (1 Chron. viii, 22). B.C. eod.

5. (Sept. Ὠτίλα v. Ὠ. Ὠτίλα.) The seventh of the Gadite and head of Joseph, who joined David in his stronghold in the wilderness (1 Chron. xii, 11), possibly the same with No. 6 or 7. B.C. 1061.

6. (Sept. Ὠτίλα v. Ἑλικσαβ.) A Mahanite (q. v.), and one of David's distinguished warriors (1 Chron. xii, 46).

7. (Sept. Ὠτίλα v. Ἑλικσαβ.) Another of David's distinguished warriors (1 Chron. xi, 47). B.C. eod.

8. (Sept. Ὠτίλα.) Chief of the 68 Hebronite Levites assembled by David to assist in bringing the ark to Jerusalem (1 Chron. xv, 9, 11). B.C. 1048.

9. (Sept. Ὠτίλα.) One of the Levites appointed by Hezekiah to have charge of the offerings for the Temple services (2 Chron. xxxii, 13). B.C. 726.

Eliz'na'ì (Heb. Elizmyn, אֵלִיָּם, perh. contract ed for Elizma'ìn v. 5; Sept. Ἑλιζαμων, T. Ἑλιζαμων, Vulg. Elizeum), one of the Bene-Shimhi Benjamite families of heads of families resident at Jerusalem (1 Chron. viii, 20). B.C. between 1618 and 588.

Eliz'zer (Heb. אֵלִיֶּזֶר, God is his help, a modification of the name Eliezer (see Lazzarus); Sept. Ἑλιζαζαρ, T. Ἑλιζαζαρ, N. T. Ἑλίζηρ), the name of eleven men mentioned in the O.T.

1. "Elizer of Damascus," mentioned in Gen. xvii, 5, 23, apparently as a house-born domestic (see Slave) and steward of Abraham, and hence likely, in the absence of direct issue, to become the patriarch's heir. B.C. 2098. The Sept. interprets the title thus: "he of Damascus, my house-born slave, is this Elizer of Damascus." It appeared even early that the passage of Scripture in which the name of Elizer occurs is one of some difficulty. Abraham, being promised a son, says, "I go childless, and the steward of my house is this Elizer of Damascus (עֵלִיָּזֶר דָּמָכָא, he of Damascus, Elizer) . . . Behold, to me thou hast given no seed: and, one born in thy house is to be my heir." (Gen. xix, 2, 8). The common notion is that Elizer was Abraham's house-born slave, adopted as his heir, and meanwhile his chief and confidential servant, and the same who was afterwards sent into Mesopotamia to seek a wife for Isaac (q. v.). This last point we may dismiss with the remark that there is no less evident than his "elder servant of his house." (Gen. xxiv, 2), whom Abraham charged with this mission, was the same as Elizer. The obvious meaning is that Elizer was born in Damascus, and how this is compatible with the notion of his being Abraham's house-born slave, seeing that Abraham's household never was at Damascus? It is true that there is a tradition, quoted by Josephus from Nicolaus of Damascus (Ant. i, 7, 4), that Abraham "reigned in Damascus;" but the tradition was probably founded on this very passage, and has no claim on our belief. The Mohammedans call him Damasheb, or Damascusini, and believe him to have been a black slave given to Abraham by Nimrod, at the time when he saw him, by virtue of the name of God, walking out of the midst of the flames (Ur.), into which he had been cast by his orders. See Abraham, and the "steward of the house of the great house," in ver. 2. "elìth elìth, (2 note) the alliteration between the obscure term mesthet and Damasconet, literally translated, is "the son of possession of my house," i.e. one who shall possess my house, my property, after my death, and is therefore exactly the same as the phrase in the next verse, "the son of my house
Eliezer ben-Elias Aschenazi (i.e. son of Elia- 

jah, the Germain), a distinguished Rabbi, was born 
about the opening of the 16th century, and practiced 
medicine at Cremona. Obliged to leave that town, he 
went to Constantinople, and was intrusted with the 
care of the synagogue at Naxos, in the Archipelago. 
Finally he settled in Poland, and was made the chief 
Rabbi of the synagogue at Posen. His coreligionists 
regard him as one of the most learned men of the 16th 
century. He died at Cracow in 1586. He published 
רות ציון (Cremona, 1576, and often), a commentary 
on Esther: — תבישופ (Work of Jehováh), in which 
he describes the historical events of the Pentateuch 
(Venice, 1588; Cracow, 1584, and later), and one or 
two less important works. — Hoefer, Nouv. Bioogr. Géné- rale, xv, 827.

Eliezer ben-Hyrkânos, surmamed the Great, 
was born about the middle of the 1st century. He 
was of a good family, but his early education was 
very much neglected, and at the age of 28, urged by an 
awakened impulse after knowledge, he left his father's 
house and became a disciple of Johanan ben-Zachai. 
Eliezer soon repaired his deficiencies, and became one 
of the distinguished Rabbis of his age. Profound in the 
Cabala (q. v.), he made many practical acquisi- 		tions in magical science, and became the theamatur- 
gist of the whole country. During the controversies 
twixt Gamaliel (q. v.) and the rabbinc doctors, he 
formed a school at Lydda, where his teaching appears 
to have assumed so mystical a character as to involve 
him in difficulties with the rabbinical authorities. 
The Karaites regarded Eliezer as one of the defenders 
of their doctrines. He died about 79 A.D., at Cæsarea, 
in Palestine. His principal work is Pirke R. Eliezer 
edit. Prin. Hebræica. Venet. 1544, 4to, translated into 
Latin with notes by Vorstius (Leyd. 1614, 4to, ed. by 
Ab. Aaron Broda, with a Heb. commentary (Wilna, 
1808, 4to), and often republished. See Bornaisch 
R. Eliezer; by Leop. Zunz (Berlin, 1839), a critical ac-
tount of the work and its author. He is regarded also 
as the author of Orthochasism (The Way of Life), which 
has been often repriented. — Hoefer, Nouv. Bioagr. Géné-
rale, xv, 825–6; ETHIDGE, Intro. to Heb. Literature, p. 60 
Gräce, Allgem. Literaturgesch. i, 1108 sq. (J. H. W.)

Eliezer ben-Judah (sometimes called ELIKA- 
ZAAR garmiza, but apparently without good reason), 
of Worms, the son of Kalonymos of Mentor, was one of the 
most distinguished Rabbis of the 13th century. He 
was a pupil of Judah the Saint, and died in 1238. 
He wrote thirty works, of which only a few have been 
printed. The principal ones are: Yoreh Chatoim מדרש קביו- 
ין, "he will instruct sinners") a liturgical 
and ascetic formulary (Venice, 1569, 8vo, and often): — 
Yegam ha-Rebakh (מגדולה בדכ), "wine of epicycle", a 
cabalistic commentary on Canticles and Ruth (Lub- 
lin, 1606, 4to); — Sepher Rebakh (כלא ספירה, "spiced 
book"), on the fear of God and repentance (Pano, 
1506, fol. ; also often in smaller or larger 
commentary on the cabalistic book Joeloch (Mentor, 1562, 4to, and since) — תבישופ, etc., a cabalistic exposition 
of the Pentateuch (extracts in Azulai's יתנimentary 
Leghorn, 1800); — תבישופ, on angelology (in part, 
Amst. 1701, 4to). Several of his works in MS. are at 
the Bibliothèque de l'Oratoire at Paris. — Hoefer, 
ili, 521; Forst, Bibliotheca Judaeica, i, 228. (J. H. W.)

Eliezer ben-Nathan, sometimes also surmamed 
Metz, from his native place, was a contemporary of 
Rashi, and eminent in the cabalistic science. His 
renown is greatly due to a work on the Sefer ha-
ẓikhr, in which he composed in 1152, under the title לוחות 
יפלון (stone of help), printed at Prague in 1610. The 
Rabbin Jachia and Wolf ascribe to him also the author-
Elihu, son of Abimelech, was the youngest son of Mezhelemiah (v. 7), the Levite, of the time of David (1 Chron. xxxvi. 3, where the name is improperly Anglicized "Elioenai").

B.C. 1045-18.

Elihu's speech (Heb. Elishaphai, ʾešlāphay, "God is my righteousness"). The speech of Elihu is not in the right spirit. He does not appear to have offended God by his words.

B.C. 1012.

Elihu (Heb. Elīḥū, אֵלִיהוּ, [but abbreviated ʾelīḥū in Job xxxii, 4; xxxvi, 1; 1 Chron. xxxvi, 7; xxxvii, 18], whose God is Ie, i.e. Jehovah), the name of five men.

1. (Sept. ʾElophans v. r. ʾElophans.) The seventh and youngest son of Mezhelemiah (v. 7), the Levite, of the time of David (1 Chron. xxxvi. 3, where the name is improperly Anglicized "Elioenai").

B.C. 1045-18.

The speech of Elihu is not in the right spirit. He does not appear to have offended God by his words.

B.C. 1012.

2. (Sept. ‘Hānō‘). Son of Tobu, and grandfather of Elkanah, Samuel’s father (1 Sam. i, 1). In the statements of the genealogy of Samuel in 1 Chron. vi. the name ELIR (q.v.) occurs in the same position—son of Samuel, the town of Maon (vi. 19) and son of Phud (vi. 33); and, also ELIZ (vi. 27 [Heb. 12]), father of Jeroham, and grandson of Zophah. The general opinion is that ELI is the original name, and the two latter forms but etymologists’ variations of it.

3. (Sept. Eliov. v. r., ‘Eliyovê). One of the chieftains of Manasseh who joined David at Ziklag (1 Chron. xii, 20), after he had left the Philistine army on the eve of the battle of Gilboa, and who assisted him against the marauding band (יִתְנַג) of the Amalekites (comp. 1 Sam. xxx). B.C. 1083.

4. (Sept. Eliov. or Eliov. One of the eminently able-bodied members of the family of Obed-edom (apparently a grandson by Shemaijah), who were appointed porters of the Temple under David (1 Chron. xxvi, 7). B.C. 1043. Terms are applied to all these doorkeepers which appear to indicate that they were not only “strong men,” as in A.V., but also fighting men. (See ver. 6, 7, 5, 12, in which occur the words יתנ = army, and מבנים = warriors or heroes.)

5. (Sept. ‘Eliyau.) A chief of the tribe of Judah, slain by the brethren of David (1 Chron. xxvi, 18), and hence supposed by some to have been his oldest brother ELIH (1 Sam. vi, 6). B.C. 1013 or ante.

Elijah (Heb. Elîjah, אֱלִיָּהוּ, whose God is Jehovah, 2 Kings i, 3, 4, 8, 12; 1 Chron. viii, 27; Ezra x, 21, 26; Mal. iv, 5; elsewhere in the prolonged form Eliyahu, אֱלִיָּהֻו; Sept. ‘Hâôv. v. r., ‘Hâvîî; N.T. Ῠαῖων; Josephus, Ὅτης, Ant. viii, 13, 4; Vulg. Elias), the name of several men in the O.T., but the latter apparently all namesakes of the famous prophet.

1. ELIJAH THE TISHBI’, the “Eli” of the N.T., a character whose rare, sudden, and brief appearances, undaunted courage and fiery zeal—the brilliancy of whose triumphs—the pathos of whose despondency—the glory of whose departure, and the calm beauty of whose reappearance on the Mount of Transfiguration—throw such a halo of brightness around him as is equalled by none of his compatriots in the sacred story.

1. Origin. This wonder-working prophet is introduced to our notice like another Melchizedek (Gen. x, 17, 18; Ps. cxlii, 3), without any mention of his father or mother, or of the beginning of his days—as if he had dropped out of that cloudy chasit thatafter, his work was done on earth, conveyed him back to heaven.

“Eliah the Tishbi, of the inhabitants of Gilead,” is literally all that is given us to know of his parentage and locality (1 Kings xvii, 1). The Hebrew text is מנֶפֶּלֶת אֱלִיָּהֹו הַיָּשָּׁר הָיוּ שְׁתָּרָה. The third word may be pointed (1), as in the present Masoretic text, to mean “from the inhabitants of Gilead,” or (2) “from Tishbi of Gilead,” which, with a slight change in form, is what the Sept. has (ις θεωσιν θαυματουργος). The latter is followed by Ewald (Jer. Gesch. iii, 446, note), Lightfoot, or without giving his authority, that Elijah was from Jabez-Gilead. By Josephus he is said to have come from Theshbon—ις πόλις θεωσιον της Γαλααδιτος χωρας (Ant. viii, 13, 18, 2). Perhaps this may have been read as Heshbon, a city of the priests, and given rise to the statement of Eusebius that he was “of the tribe of Aaron and grandson of Zadok.” (See also the Chron. Pasch. in Fabricius, Cod. Pseudo. V. T. p.1070, etc.; and Querius, Elucid. ii, 605.) According to Jewish tradition—grounded on a certain similarity between the Hebrew and Greek names—Elijah is identified with Philip, the son of Eleazar the priest. He was also the angel of Jehovah who appeared in fire to Gideon (Lightfoot on John i, 21; Eisenmenger, i, 866). Arab-tradition places his birthplace at Gilgal (Jalid), a few miles north of es-Salt (Irby, p. 98), and his tomb near Damascus (Mislîn, i, 490). The common assumption—perhaps originating with Hiler (Onom. p. 947) or Reland (Pali. p. 1035)—is that he was born in the town of Tekoa, and that he joined the Tharbelites (vi. 19); and, not to insist on the fact that this Tharbe was not in Gilead, but in Naphtali, it is nearly certain that his name has no real existence in that passage, but arises from a mistaken translation of the same Hebrew word which is rendered “inhabitants” in 1 Kings xviii, 1. See Tishbi.

2. Personal Appearance. The mention of Gilead, however, is the key-note to much that is most characteristic in the story of the prophet. Gilead was the country on the further side of the Jordan—a country to this he occasionally wore the “mantle” (q.v.), or cape of shee-kine, which has supplied us with one of our most familiar figures of speech. In this mantle, in moments of emotion, he would hide his face (1 Kings xix, 13), or when excited would roll it up as into a kind of staff. On one occasion we find him bending his knees down upon the ground, and touching the ground between his knees. Such, so far as the scanty notices of the record will allow us to conceive it, was the general appearance of the great prophet—an appearance which has no reason to think was other than uncommon even at that time. The solitary life in which these examples had been, and the manners they had been nurtured that fierceness of zeal and that directness of address which so distinguished him. It was in the wild loneliness of the hills and ravines of Gilead that the knowledge of Jehovah, the living God of Israel, had been impressed on his mind, which was to form the subject of his mission to the idolatrous court and country of Israel.

3. History. The northern kingdom had at this time forsaken almost entirely the faith in Jehovah. The worship of the calves had been a departure from him, it was a violation of his covenants, a rejection of his remembrances; but still it would appear that even in the presence of the calves Jehovah was acknowledged, and they were at any rate a national institution, not directly imported from the idolatries of any of the surrounding countries. See CALF. They were announced by Jeroham as the observers of the nation during the great crisis of its existence: “Behold thy gods, O Israel, that brought thee up out of the land of Egypt” (1 Kings xii, 28). But the case was quite different when Ahah, not content with the calf-worship, introduced the image of the golden calf; and, when the ship containing the first calf-shaped image of the Jerobaal, the son of Nebat—married the daughter of the king of Sisôn, and introduced on the
most extensive scale (Josephus, Ant. ix, 6, 6) the foreign religion of his wife's family, the worship of the Proconsul. But to this the Chersonesians objected, and said that we are ignorant—doubtless it was of a gay, splendid, and festal character, and therefore very opposite to the grave, severe service of the Mosaic ritual. Attached to it and to the worship of Asherah (A. V. "Ashtaroth," and "the groves") were licentious and impure rites, which had been branded by the heaviest judgments on the nation (Num. xxxvi; Judg. ii, 13, 14; iii, 7, 8). But the most obnoxious and evil characteristic of the Baal religion was that it was the worship of power, of mere strength, as opposed to that of a God of righteousness and goodness—a foreign religion, imported from nations the hardy spirit of which was insculpted in every page of the law, as opposed to the religion of that God who had delivered the nation from the bondage of Egypt, had "driven out the heathen with his hand, and planted them in," and through whom their forefathers had "trodden down their ene-
""against these two evils that Elijah comes forward. (B.C. cir. 507.)

What we may call the first act in his life embraces between three and four years—three years and a half, according to the duration of the journey to Horeb and the return to Gilgal (1 Kings xvii, 1–xix, 21). His introduction is of the most startling description: he suddenly appears before Ahab. As the unrestricted preacher of Eastern manners he would have no difficulty in doing, and proclaims the vengeance of Jehovah for the apostasy of the king. This he does in the remarkable formula evidently characteristic of himself, and adopted after his departure by his follower Elias—a formula which includes everything that is said at this time and the king—the name of Jehovah—his being the God of Israel—the living God—Elijah being his messenger, and then—the special lesson of the event—that the god of power and of nature should be beaten at his own weapons. As Jehovah, God of Israel, liveth, before whom I stand, what constant servant I am, there shall be dew nor rain these years, but according to my word. Before, however, he spoke thus, it would seem that he had been warning this most wicked king as to the fatal consequences which must follow his apostasy and his departure from the inquisitive course he was then pursuing, and this may account for the apparent abruptness with which he opens his commission. What immediate action followed on this we are not told; but it is plain that Eli-
ghad to fly before some threatened vengeance, ei-
ther of the king, or more probably of the queen (comp. xix, 2). Perhaps it was at this juncture that Jezebel "cut off the prophets of Jehovah" (1 Kings xviii), 4). We can imagine Ahab and Jezebel being greatly incensed against Elijah for having foretold and prayed that such calamities might befall them. For some time they might attribute the drought under which the nation suffered to natural causes, and not to the interposition of the prophet; and, therefore, however they might despise him as a vain enthusiast, they would not proceed immediately to punish him. When, however, they saw the unequivocal prediction of Elijah taking effect far more extensively than had been anticipated, they would naturally seek to wreak their vengeance upon him as the cause of their sufferings. But we do not find him taking one step for his own preservation till the God whom he served interposed. He was di-
rected to the brook Cherith, either one of the torrents which cleave the high table-lands of his native hills, or on the west of Jordan, more in the neighborhood of Samaria, perhaps the present wady Kelt. See CHERITH. There, in the hollow of the torrent-bed, he remained, supported in the miraculous manner with which we are all familiar, till the failing of the brook obliged him to forsake it. How long he remained in the hollow is uncertain. In the Chersonesian inscriptions of the very time of which we are simply "at the end of days;" nor does Josephus afford us any more information. A vast deal of ingenuity has been devoted to explaining away Elijah's "ra-
vens." The Hebrew word, עַדָּגַב, osînîm, has been interpreted as "Arabians," as "merchants," as "in-
habitants of some neighboring town of Orôbo or Orôn. By others Elijah has been held to have plundered a raven's nest, and this twice a day regularly for several months! See RAVEN.

His next refuge, under the divine guidance (1 Kings xviii, 9), was at Zarephath, a Phoenician town lying between Tyre and Sidon, certainly the last place at which the enemy of Baal would be looked for. The widow woman in whose house he lived is thought, however, to have been an Israelite, and no Baal-wor-
shipper, by some who take her adoration by "Jeho-
vah thy God" as an indication. But the obvious cir-
cumstances of the case, and her mention by our Saviour (Luke iv, 26), imply her heathen character. Here Elijah performed the miracles of prolonging the oil and the meal, according to his power, and after he had fed the son of the widow to life after his sudden death. The traditional scene of his meet-
ning with the widow was in a wood to the south of the town (Mislin, i, 582, who, however, does not give his authority). In the time of Jerome the spot was marked by a town called Gaad. As a thank offering a church dedicated to the prophet was erected over the house of the widow, in which her chamber and her kneading-trough were shown (Anton. Martyr and Pho-
cas, in Relig., p. 985). This church was called Ρούχοιον (Acta Sermoeorum). The Jewish tradition, quoted by Jerome as a proof that the resurrected boy was the servant who afterwards accompanied Elijah, and finally became the prophet Jonah (Jerome, Pref. to Jonah; and see the citations from the Talmuds in Esen-
menger, i, 720).

The drought continued, and at last the full horrors of famine, caused by the failure of the crops, descended on Samaria. During this time the prophet was called upon passively to suffer God's will; now he must once again resume the more active duties of life; he must make one great public effort more to reclaim his coun-
try from apostasy and ruin. According to the word of the Lord, he returned to Israel; Ahab was yet alive, and the king, and the prophet Jezebel, and the queen and the princesses, and all the children of Ahab were still mad upon her idols; in a word, the prophets of Baal were prophecying lies, the priests were bearing rule by their means, and the people loved to have it so. The king and his chief domestic officer had divided between them the mournful duty of ascertaining that neither round the springs, which are so frequent a feature of central Palestine, nor in the nooks and crannies of the most shaded torrent-beds, was there any of the herba-
egage left, which in those countries is so certain an indi-
cation of the presence of moisture. No one short of the two chief persons of the realm could be trusted with this quest for life or death. "Ahab went one way by himself, and Obadiah went another way by him-
self." It is the moment for the reappearance of the prophet. Wishing not to tempt God by going unneces-
sarily into danger, he first presented himself to good Obadiah (1 Kings xviii, 7). The king, in his path, asked him and his master have been seeking for more than three years. Before the sudden apparition of that wild figure, and that stern, unbroken countenance, Obadiah could not but fall on his face. Elijah requested him to announce to Ahab that he had been looking for him. Obadiah, aware of the unkindness of this request, replied, "What have I sinned, that thou shouldest thus expose me to Ahab's rage, who will certainly slay me for not apprehending thee, for whom he has so long and so anxiously sought in all lands and in confederate countries, that they
should not harbor a traitor whom he looks upon as the author of the famine," etc. Moreover, he would delicately intimate to Elijah how he had actually jeopardized his own life in securing that one hundred of the Lord's prophets, and whom he had fed at his own expense, might perish by fire. Elijah spoke highly touching appeal, wherein he removed all his fears about the Spirit's carrying him away (as 2 Kings ii, 11-16; Ezek. iii, 4; Acts viii, 39), he resolves to be the prophet's messenger to Ahab. Intending to be revenged on him, or to inquire when rain might be expected, Ahab now sends for Elijah. He could not help it; he was charged with troubling Israel, i.e. with being the main cause of all the calamities which he and the nation had suffered. But Elijah flung back the charge upon himself, assigning the real cause to be his own sin of idolatry. Regarding, however, his magisterial position, while he reproved his sin, he requested him to execute his authority in summoning an assembly to Mount Carmel, that the controversy between them might be decided by a direct miracle from heaven (comp. Matt. xvi, 1). Whatever were his secret motives, however, Elijah's (xxvi, 20)—at the rain, and therefore was the element over which Baal was supposed to preside, the prophet proposes (wishing to give them every advantage), that, two bullocks being slain, and laid each upon a distinct altar, the one for Baal, the other for Je-hovah, whichever should be consumed by fire must prove the true God. Many of his opponents, however, were aware that it was their duty to serve. The people consented to this proposal, because, it may be, they were not altogether ignorant how God had formerly answered by fire (Gen. iv, 4; Lev. ix, 24; Judg. vi, 21; xiii, 20; 1 Chron. xxvi, 26; 2 Chron. vii, 1). Elijah will have summoned not only all the elders of Israel, but also the four hundred priests of Baal belonging to Jezebel's court, and the four hundred and fifty who were dispersed over the kingdom. The former, however, did not attend, being, perhaps, glad to shelter themselves under the plea that Jezebel would not allow them to do so. Why Mount Carmel, which we do not hear of until now, was chosen in preference to the nearer Eli or Gerizim, is not evident. Possibly Elijah thought it wise to remove the place of the meeting to a distance from Samaria. Possibly in the existence of the altar of Je-hovah (xxvi, 20)—in the rain, therefore was the element over which Baal was supposed to preside— we have an indication of an ancient sanctity attaching to the spot. On the question of the particular part of the ridge of Carmel which formed the site of the meeting, there cannot be much doubt. See Carmel.

There are fewer mundane stories in history than this. On the one hand the solitary servant of Jehovah, accompanied by his one attendant, with his wild shaggy hair, his scanty garb, and sheepskin cloak, but with calm dignity of demeanor, and the minutest regularity of procedure; on the other hand, the prophets of Baal and Asherah, doubleless in all the splendor of their vestments (2 Kings x, 22), with the wild din of their "vain repetitions" and the maddened fury of their disappointed hopes, and the silent people surrounding all—these things form a picture which brightens the whole evening every time we consider it. Having reconstructed an altar which had once belonged to God, with twelve stones—as if to declare that the twelve tribes of Israel should again be united in the service of Jehovah—and having laid thereon his bullock, and filled the trench by which it was surrounded with earth and water, lust of these people of Baal is due—decadence which the old prophet himself would not allow them to do so. Why Mount Carmel, which we do not hear of until now, was chosen in preference to the nearer Eli or Gerizim, is not evident. saying, that he was a man of like passions with us. His now altered state of mind would seem to have been less unmistakably that of what Moses centuries before, it was proclaimed that Jehovah was "merciful and gracious, long-suffering and abundant in goodness and truth." Elisha knew the call, and at once stepping forward and hiding his face in his mantle, stood waiting for the call to come to him, as the words as before, and so is his answer; but with what different force must the question have fallen on his ears, and the answer left his lips! "Before his entrance to the cave he was comparatively a novice; when he left it he was an initiated man. He had experienced the earthquake, and as the voice which would be the great witnesses of the Lord. But He was not in them; not they, but the still small voice had that awe in it which forced the prophet to cover his face with his mantle. What a conclusion of all the past history! What an interpretation of its meaning! (Maurice, "Prophecy and Kings," p. 156). Not in the peripetations of Ahab and Jezebel, nor in the slaughter of the prophets of Baal, but in the 7000 unknown worshippers who had not bowed the knees to Baal, was the assurance that Elisha was not alone as he had seemed to be.

Three commands were laid on him—three changes were to be made. Instead of Ben-hadad, Hazael was to be king of Syria; instead of Ahab, Jehu the son of Nimshi was to be king of Israel; and Elisha the son of Shaphat was to be his own successor. These persons shall receive God's quarrel: the one shall burn, another shall prosecute, and the third shall perfect the vengeance on Israel. Of these three commands, the first two were reserved for Elisha to accomplish; the last only was executed by Elisha himself. It would almost seem as if his late trials had awakened in him a yearning for that affection and compassion for which he had hitherto been denied him. His first search was for Elisha. Apparently he soon found him; we must conclude at his native place, Abel-meholah, probably somewhere about the centre of the Jordan valley. See ABEL-MEHOLAH. Elisha was ploughing at the time, and Elisha "passed over to him"—he turned the river—and, without uttering a word, cast his mantle, the well-known sheepskin cloak, upon him, as, by that familiar action (which was also a symbol of official investiture), claiming him for his son. A moment of hesitation—but the call was quickly accepted; and then came the long period that intervened between the interview which continued till Elisha's removal, and which after that time procured for Elisha one of his best titles to esteem and reverence—"Elisha the son of Shaphat, who poured water on the hands of Elisha." See ABEL-MEHOLAH.

(2.) For about six years from this calling of Elisha we find no notice in the sacred history of Elisha, till God sent him once again to pronounce sore judgments upon Ahab and Jezebel for the murder of unoffending Naboth (1 Kings xx1, 17, etc.). How he and his associate in the prophetic office employed themselves during this time we are not told. We may conceive, however, that they were much engaged in prayer for their country, and in imparting knowledge in the schools of the prophets, which were at Jericho and Bethel. Ahab and Jezebel now probably believed that their power had been so great and so long continued, that they had seen the last of their tormentor. At any rate, this may be inferred from the events of chaps. xx1. See AHAH. Foiled in his wish to acquire the ancestral plot of ground of Naboth by the refusal of that sturdy peasant to alienate the inheritance of his fathers, Ahab and Jezebel proceeded to possess themselves of it by main force, and by a degree of monstrous injustice which shows clearly enough how far the elders of Jeze- reel had forgotten the laws of Jehovah, how perfect was their submission to the will of their mistresses. At her orders Naboth is falsely accused of blaspheming
God and the king, is with his sons (2 Kings ix, 26; comp. Josh. vii, 24) stoned and killed, and his vineyard then—as having belonged to a criminal—becomes at once the property of the king. See Naboth.

Ahab loses no time in entering on his new acquisition. Apparently the very next day after the execution he hurried to the chariot to take possession of the covetous vineyard. Behind him—probably in the back part of the chariot—rose his two pages Jehu and Bidkar (2 Kings ix, 26). But the triumph was a short one. Elijah had received an intimation from Jehovah of what was taking place, and rapidly as the accusation of Naboth's sons had been heard over, he was there to meet his ancient enemy, and as an enemy he does meet him—as David went out to meet Goliath—on the very scene of his crime; suddenly, when least expected and least wished for, he confronting the miser, and fire had done. Ahab is now in terms fearful to any Orient—peculiarly terrible to a Jew, and most of all significant to a successor of the apostate princes of the northern kingdom—"I will take away thy posterity; I will cut off from thee even thy very dogs; I will make thy house like that of Jeroboam and Baasha: thy blood shall be shed in the same spot where the blood of thy victims was shed last night; thy wife and thy children shall be born in this very garden by the wild dogs of the city, or as common carrion devoured by the birds of the sky"—the large vultures which in Eastern climes are always wheeling aloft unheeded, and blue sky, and doubtless suggested this expression to the prophet. How tremendous was this scene we may gather from the fact that after the lapse of at least twenty years Jehu was able to recall the very words of the prophet's burden, to which he and his companion had listened as they stood behind the master in the chariot. The whole of Elijah's denunciation may possibly be recovered by putting together the words recalled by Jehu, 2 Kings ix, 26, 36, 7, and those given in 1 Kings xxii, 19-25. Fearing that these predictions would prove true, as those about the rain and fire had done, Ahab now assumes the manner of a penitent; and, though subsequent acts proved the insincerity of his repentance, yet God rewarded his temporary abasement by a temporary arrest of judgment. We see, however, in after parts of this sacred history, how the judgments denounced against him, his slain, destroyed court, and children took effect to the very letter. See jezebel.

(3.) A space of three or four years now elapses (comp. 1 Kings xxii, 1; xxii, 51; 2 Kings i, 17) before we again catch a glimpse of Elijah. The denunciations uttered in the vineyard of Naboth have been plain and striking; Ahab is dead, and his successor, Ahaziah, has met with a serious accident, after a troubled reign of less than two years (2 Kings i, 1, 2; 1 Kings xxii, 51). Fearing a fatal result, as if to prove himself a worthy son of an idolatrous parentage, he sends an oracle or shrine of Baal at the Philistine town of Ekron to ascertain the issue of his illness. But the oracle is nearer at hand than the distant Ekron. An intimation is conveyed to the prophet, probably at that time inhabiting one of the recesses of Carmel, and, as on the former occasions, he suddenly appears on the path of the messengers, without proof or inquiry uttering his message of death, and as rapidly disappears. The tone of his words is as national on this as on any former occasion, and, as before, they are authenticated by the name of Jehovah—"Thus saith Jehovah, is it because there is no God in Israel that ye send to inquire of Baal? In the same manner of the gods of the heathen ye have done, and ye will go down to Hades." That Joram began to reign during the lifetime of his father Jezebel is stated in 2 Kings viii, 16. According to one record (2 Kings i, 17), which immediately precedes the account of Elijah's last acts on earth, Joram was actually on the throne of Judah at the time the vision of the prophecy of Haggai, and he was, though this is modified by the statements of other
ELIJAH

places (2 Kings iii, 1; viii, 16), yet it is not invalidating, and the conclusion is almost inevitable that Joram ascended the throne as viceroy or associate some years before the death of his father. See Jo-
ram; Jehoshaphat; Judah. The ancient Jewish
commentators get over the apparent difficulty by say-
ing that the letter was written while Elijah was still on earth. (See Lightfoot, Chronicle, etc., "Jeho-
ram." Other theories will be found in Fabricius, Cod. Pseudoepigr. p. 1075, and Otho, Lex. Robb. p. 167.)

In its contents the letter bears a strong resemblance to the speeches of Elijah, while in the details of style, it is very peculiar, and quite different from the nar-
ration in which it is embedded (Bertheau, Chronic., ad loc.).

(5.) The prophet's warfare being now accomplished on earth, God, whom he had so long and so faithfully served, will translate him in a special manner to heav-
enly glory. Considering this, he determined on his last moment in imparting divine instruction to, and
pronouncing his last benediction upon, the students in the colleges of Bethel and Jericho; accordingly, he made a circuit in this region (2 Kings ii, 1, etc.). It was at Gilgal (q. v.)—probably not the ancient place of Joshua and Samuel, but another of the same name still surviving on the western edge of the hills of Ephraim
—that the prophet received the divine intimation that
his departure was at hand. He was at the time with Elisha, who seems now to have become his constant companion. Perhaps his old love of solitude returns upon him, perhaps he wished to spare his friend the pain of a too sudden parting, or perhaps he desired to test the affection of the latter; in either case he endeav-
ers to persuade Elisha to remain behind while he goes on an errand of Jehovah.

"Tarry here, I pray thee, for Jehovah hath sent me to Bethel." But Elisha will not so easily give up his master—"As Jehovah liveth, and as thy soul liveth, I will not leave thee.

They went together to Bethel. The event which was about to happen had apparently been communicated to the sons of the prophet at Bethel, and they inquire if Elisha knew of his impending departure. His answer shows how fully he was aware of it. "Yes," says he, with emphasis, "indeed I do know it (יִדְעָהוּ יִדְעָהוּ) : hold ye your peace." But, though unex-
pecting, it was not to happen that day. Again Elijah at-
tempts to escape to Jericho, and again Elisha protests that he will not be separated from him. Again, also, the sons of the prophet at Jericho make the same un-
necessary inquiries, and again he replies as emphatisch
ally as before. Elijah makes a final effort to avoid what they both so much dreaded. "Tarry here, I pray thee, for Jehovah hath sent me to the Jordan." But Elisha is not to be conquered, and the two set off across the undulating plain of burning sand to the dis-
tant river—Elijah in his mantle or cape of sheep-kin
Elisha in ordinary clothes (נָעַר נָעַר). Fifty men
of the sons of the prophets ascend the abrupt heights
behind the town—the same to which a late tradition
would attach the scene of our Lord's temptation—and
which command the plain below, to watch with the
clearness of Eastern vision what happens in the dis-
tance. Talking as they go, the two reach the river,
and stand on the shelving bank beside its swift current
not to stop, but to go on as if the aged Gileadite cannot rest till he again sets foot on his own side of the river. He rolls up (נָעַר נָעַר) his
mantle as into a staff, and with his old energy strikes
the waters as Moses had done before him—strikes
them as if they were an enemy (נָעַר נָעַר); and they are
divided hither and thither, and they two go over on dry ground. What follows is best told in the simple words of the narrative. "And it came to pass when they were gone over, that Elijah said to Elisha, 'Ask what I shall do for thee before I be taken away from thee.' And Elisha said, 'I pray thee let a double portion
of thy spirit be upon me.' And he said, "Surely thou hast asked a hard thing: if thou see me taken from thee, it shall be so unto thee; but if not, it shall not be so.

And it came to pass as they still went on and talked, that, behold, a chariot of fire and horses of fire, and parted them both asunder, and Elijah went up by the whirlwind into heaven. (The tempest (נָעַר נָעַר), which was an earthly substratum for the theophany, was accompanied by a fiery phenomenon, symbolizing the translation, which appeared to the eyes of Elisha as a chariot of fire with horses of fire, in which Elijah rode to heaven (Keil). Well might Elisha cry with bitterness (נָעַר נָעַר), "My father, my father." He had gone who, to the discerning eye and loving heart of his disciple, had been "the chariot of Israel and the horsemen thereof" for so many years; and Elisha was at last left alone to carry on a task to which he must often have looked forward, but to which in this moment of grief he may well have felt unequal. He saw him no more; but his mantle fell to him and this he took up. It was a personal relic and a symbol of the double portion of the spirit of Elijah with which he was to be clothed. Little could he have realized, had it been then presented to him, that he who was by his greatest claim to notice was that he had "poured water on the hands of Elijah," should hereafter possess an influence which had been
denied to his master—should, instead of the terror of kings and people, be their benefactor, adviser, and friend, and that over his death-bed a king of Israel should be found to lament with the same words that had just burst from him on the departure of his stern and silent master, "My father, my father, the chariot of Israel and the horsemen thereof!" (2 Kings xiii, 14).

4. Traditumary View and Character. —Elijah and Moses are the only men whose history does not terminate with their departure out of this world. Elijah appeared with Moses on Mount Hermon at the time of our Lord's transfiguration, and consequently respecting the latter's redemption which he was about to accomplish (Matt. xvii, 1-8). The author of the book of Ecclesiastes (ch. xlviii) justly describes him as a prophet "who stood up as a fire, and whose word burned as a lamp." But, with the exception of the sultonic crest that came to him and the 1 Macc. ii, 58, and the passing allusion in Luke ix, 54, none of the later references allude to his works of destruction or of portent. They all set forth a dif-
ferent side of his character from that brought out in the historical narrative. They speak of him as being a man of like passions with ourselves (James v, 17); of his kindness to the widow of Sarepta (Luke iv, 25); of his "restoring all things" (Matt. xxi, 11); "turning
the hearts of the fathers to the children, and the disobedient to the wisdom of the just" (Mal. iv, 5, 6; Luke i, 17). In the sternness and power of his re-
proaches, however, he was a striking type of John the Baptist, and the latter is therefore prophesied of under his name: "Behold, I will send you Elijah the prophet before the coming of the great and dreadful day of the Lord" (Mal. iv, 5, 6). Our Saviour also declares that Elijah is already "in some spirit and manner of John the Baptist." Many of the Jews in our Lord's time believed him to be Elijah, or that the soul of Eli-
jah had passed into his body (Luke ix, 8). See John the Baptist. How deep was the impression which he made on the mind of the nation may be: judged from the fixed belief in our mind centuries after, viz., that Jerusalem would never fall until Elijah would again appear for the relief
and restoration of his country. The prophecy of Mal
In the Mohammedan traditions Hajas is said to have drained of the Fountain of Life, "by virtue of which he still lives, and will live to the day of judgment." He is by some confounded with St. George, and with the mysterious St. Khid, one of the most remarkable of the Moslem saints (see Lane's Arabic Nights, Intro. note 2; also selections from the Kur'an, p. 221, 222). The Persian Sefa are said to trace themselves back to Eliaj (Fabricius, p. 1072); and he is even held to have been the teacher of Zoroaster (D'Herbelot, Bib. Or. s. v.).

Among other traditions, it must not be omitted that the words "Eyes hath not seen," etc., 1 Cor. ii, 9, which are without doubt quoted by the apostle from Isaiah lxiv, 4, were, according to an ancient belief, from the "Apocalypse, or mysteries of Elijah," râ Hâqiq ãrzûk (Ardor of the heart). The first mention of him is in the 10th book of the Chronicles (Hom. on Matt. xxvii, 9), and it is noticed with disapproval by Jerome, ad Pamelaum (see Fabricius, p. 1072).

By Ephesians, the words "Awake, thou that sleepest," etc., Eph. v, 14, are inadecately alleged to have been quoted "from Elijah," i.e. the portion of the O. T. containing his history—râqâ' râ Hâqiq (comp. Rom. xi, 2).

5. Literature.—On the general subject, Anon. Lectures on Elijah (London, 1685); Kitto, Daily Bible Illustrations, 2 vols. (London, 1826); Snaith, Corpus i. (1853); Syrus, In Elijah (Opp. iii, 240); Basil, In Elijah (Opp. p. 61); Ambrose, De Elia (Opp. i, 385); Chrysostom, In Hezalin (Opp. Spauri, vi, 108); Alexander, De Elia (Hist. Ecc. iii, 353); Zouch, Life of Elijah (Works, ii, 219); Robinson, Elijah (Script. Char. ii); Krummacher, Elijah the Tishbi (from the Germ., London, 1840); N. Y. 1847); Anderson, Discourses on Elijah (London, 1855); Evans, Elijah (Script. Biog. i); Williams, Elijah (Char. of O. T. p. 222); Fricshuth, De Elia (Críticas Sacri, ii); Camartus, Elias Theobos (Paris, 1631); Simpson, Lectures on Elijah (London, 1886); Brett, Notes sur Èlie (Nancy, 1766); Seez, Charactéristique de l'Elios de Syrie, 1792; Schwier, Der Oelcoronomus alumno (Wittenb. 1717); id. ib. 2. (Sept. Hiia v. r. Epias.) One of the "sons of Eimi" (q. v.), who divorced his gentle wife on returning from the exile (Exa x, 21, where the name is likewise wrongly Anglicized "Eliah"). B. C. post 1812.

3. (Sept. Hiia.) One of the "sons of Jeroham," and heads of Benjaminite families resident at Jerusalem (1 Chron. viii, 27, where the name is inaccurately Anglicized "Eliah"). B. C. post 1612.

4. (Elia.) Some of the "Eiia of Emmaus," (Heb. Eliai, of the rejeetor; Sept. Eliai v. r. Enea, Vulg. Eicoca), a Haradite (q. v.), one of David's thirty-seven distin-
Elilm. See Telmud.

Elilm (Heb. Elilm, פַּלְמָן), 121, 259, trees [so called from their strength; see OAK]; pers. herein palm-trees; Sept. Αλμα, a place mentioned in Esod. xxv, 27; Num. xxxiii, 9, as the second station where the Israelites encamped after crossing the Red Sea. (See Huldorich or Uhlich, De fontibus in Elim repetita, Brem, 1728). See also Beer-Elilm. It is distinguished as having "twelve wells (rather "fountains," פְּתָגִים) of water, three more, and ten palm-trees. (Geographical Commentary on Esod. xxv, 27) supposed wady Ueit to be Elilm, the second of four wadys lying between 29° 7' and 29° 30', which descend from the range of et-Th (here nearly parallel with the shore) towards the sea. The route of the Israelites, however, cannot be better mistaken. It evidently lay along the desert plain on the eastern shore of the Red Sea. Elilm must consequently have been in this plain, and not more than about fifty miles from the place of passage. With these data, and in a country where fountains are of such rare occurrence, it is not difficult to find Naby Elilm. Naby is, near the southeastern end of this plain, and not far from the base of Jebel Humram, the outpost of the great Sinai mountain-group, a charming vale, called wady Ghurneld, intersects the line of route. It is the first of the four wadys noticed above, and is, in fact, the western outlet of that region, and the only one in the vicinity containing water (Robinson, Researches, i, 100, 105). In the dry season it contains no stream, but in the rainy season it becomes the channel of a broad and powerful mountain current, being bounded by high ridges, and extending thence and ten palm-trees. Laborde, (Geographical Commentary on Esod. xxv, 27), supposed a "well," remaining, the others anciently existing being doubtless filled up. This principal fountain springs out at the foot of a sandstone rock, forming a pool of sparkling water, and sending out a tiny but perennial stream. This, in fact, is one part of that chief watering-places in the peninsula of Sinai (Bartlett, Forty Days in the Desert, p. 33 sq.). There are no palm-trees at present here, but the place is fringed with trees and shrubbery, stunted palms, with their hairy trunks and dishevelled branches; tamarisks, their feathery leaves dripping with what the Arabs call manna; and the acacia, with its gray foliage and white blossoms (Stanley, Palestine, p. 68). These supply the only verdure, which, however, in contrast with the naked desert, is quite refreshing (Ollin's Travels, i, 302). Well might such a wady, in the midst of a bare and treeless waste, be called emphatically Elilm, "the trees." Leupan takes another view, that Ghurneld is Mara, by others identified with Hotar (24 hours N.W. from Ghurneld, and reached by the Israelites, therefore, before it), and that Elilm is to be found in the last of the four above named, wady Shuketek (Travels, Berlin, 1845, p. 27 sq.). See EXODUS.

Elilmech (Heb. Elilmech, פַּלְמָן, God is his king; Sept. Αλμαλησ; Josephus, Antiquitaten, Ant. v, 9, 1), a man of the tribe of Judah, and of the family of the Hezronites and kinsman of Boaz, who dwelt in Bethlehem-Ephratah in the days of the judges. B.C. cir. 1368. In consequence of a great deal in the land he went with his wife Naomi, and his two sons, Mahlon and Chilion, to dwell in Moab, where he and his sons died without posterity (Ruth i, 2, 3; ii, 3; iv, 3, 9). See Ruth.

Elilo'sen (Hebr. Elilosan, פַּלְמָן, a contracted form of the name Elilosan), the name of several men.

3. (1 Chron. xxvi, 8.) See ELIHOMIAN.

4. (Sept. Elilmosan v. r. Elilosan, Vulg. Eliomian.) A priest of the posterity of Phashur, who had married a foreign wife after the return from Babylon, but who, at Ezra's instigation, put her away with the children born of her, and offered a ram for a trespass offering (Ezra x, 22). B.C. 458. He is perhaps the same mentioned in 1 Chron. xlii, 41, as one of the priests who accompanied Nehemiah with trumpets at the dedication of the wall of Jerusalem. B.C. 446.

6. (Sept. Elilmosan v. r. Elilosan, Vulg. Eliomian.) Eldest son of Meiriah, son of She-maiah, of the descendants of Zerubbabel; his family are the latest mentioned in the Old Test. (1 Chron. iii, 28, 24). B.C. ante 299. He appears to be the same with Eliel, the maternal ancestry of Christ (Luke iii, 29). (Calmet's History and Explanations of the Holy Bible, p. 16.) According to the present Heb. text he is in the seventh generation from Zerubbabel, or about contemporary with Alexander the Great; but lord Hervey thinks that She-maiah is identical with Shimeah (ver. 19). Zerubbabel is his brother (Geneal. of our Lord, p. 101-109, and c, viii).

Elionmous (Ἐλιονμός, doubtless a Greekized form of Eliomian), a high-priest of the Jews, who succeeded Matthias, son of Ananus (A.D. 42), and was the next year succeeded by Simon Cantharos (Josephus, Ant. xix, 8, 1). See HIGH-PRIEST.

Elios (Ἐλίος, the name of two men in the Apocalypse. 1. (Revel. iii, 12.) Elios, son of Adam, one of the sons of "Phaisur," who divorced his Gentile wife after the exile (1 Esdras ix, 22); evidently the ELIOMAN (q. v.) of the Heb. text (Ezra x, 22).

2. (Ελίος, Vulg. Nomeas.) One of the sons of "Anna," who did the same (1 Esd. i, 32); doubtless the ELIZEKER (q. v.) of the Heb. text.

Eliot, Andrew, D.D., a Congregational minister, was born in Boston Dec. 25, 1719 (O. S.), and graduated at Harvard College in 1737. In 1742 he was ordained pastor (as colleague with Mr. Webb) of the New North Church in Boston, in which service he remained until his death. In 1757 he was made D.D. by the University of Edinburgh. In 1773 he was elected president of Harvard College, but declined to leave his pastoral work. He died Sept. 13, 1778. Besides occasional sermons, he published a volume of Discourses (1774).—Sprague, Annales, i, 417.

Eliot, John, styled "the apostle of the Indians," was born in the county of Essex, England, in 1604, and studied at the University of Cambridge. Emigrating to New England in 1631, he joined the Church in Boston. He was settled over the Church in Roxbury Nov. 5, 1632. Here he studied the Indian language, with the view of converting the natives to Christianity. The first Indian Church, established by the labor of Protectors in America, was formed at Natick in 1660, after the manner of the Congregational churches in New England. Those who wished to be organized into a Christian body were strictly examined as to their faith and experience by a number of the neighboring ministers, and Mr. Eliot afterwards administered to them baptism and the Lord's Supper. Other Indian churches were planted in various parts of Massachusetts, and he frequently visited them; but his pastoral care was more particularly over that which he first established. He made every exertion to promote the welfare of the Indian tribes; he stimulated many servants of Jesus to engage in the missionary
work; and, although he mourned over the stupidity of many who preferred darkness to light, yet he lived to see twenty-four of the copper-colored aborigines fellow-preachers of the precious Gospel of Christ. In 1661 he published the New Testament in the Indian language, and a few years the whole Bible, and several other books best adapted for the instruction of the natives. When he reached the age of fourscore years he offered to give up his salary, and desired to be liberated from the labors of his office as a teacher of the Church at Roxbury. It was with joy that he resigned his post to his colleague. When he was bending under his infirmities, and could no longer visit the Indians, he persuaded a number of families to send their negro servants to him once a week, that he might instruct them in the truths of God. He died May 26, 1690, saying that all his labors were poor and small, and exhorting those who surrounded his bed to pray. His last words were, "Welcome joy!" (Allen). In 1649 Mr. Eliot published The glorious Progress of the Gospel among the Indians; in 1653, Tears of Repentance; in 1655, A further Manifestation of the Progress of the Gospel among the Indians; and in 1670, A Brief Narrative of the Progress of the Gospel. Baxter says, in one of his letters, "There was no man on earth whom I honored above him." A handsome memorial to the "Apostle of the Indians, and the pastor for fifty-eight years of the first church at Roxbury," has been erected in the Forest Hills Cemetery, Roxbury—Life and Death of John Eliot, by Cotton Mathur (1861); Mather's Magnalia, iii. 270; Francis, Life of John Eliot (Edinb. 1828); Sprague, Annals, ii, 18; Allen, American Biography.

Eliupandas, archbishop of Toledo in the 8th century. He shared the opinions of Felix, bishop of Urgel, regarding to the person of Christ. That, with respect to his human nature, he was only the adoptive Son of God, thus giving rise to the sect of Adoptianists. Eliupandas disseminated his views in Spain, France, and Germany. Adosinde, queen of Gallicia, induced bishop Eustachius of Ousma and the priest Beatus to write against him. They published against him two books, the originals of which are said to be still extant in Toledo. Eliupandas replied by several letters, but he was condemned at the council which Paulinus, patriarch of Aquileia, convened at Ciudad de Frilej in 799. The following year the edicts of Eliupandas and Felix were again condemned at a synod which Charlemagne held at Ratisbon. Pope Adrian confirmed the sentence, to which Felix submitted; but Eliupandas, and several other bishops of Spain, persisted in their views, and wrote against Felix. This letter was rejected, and condemned by aician in a council held in Italy, and in the Council of Frankfort in 794. Charlemagne himself wrote a letter (still extant) to Eliupandas urging him to submit; but the letter seemed to have had little effect, for shortly before his death (in 799) Eliupandas wrote a reply maintaining his views. See Hofer, Notiz. Biz. Gmex., xv. 389; Neander, Ch. Hist. iii, 156-158; Mosheim, Ch. Hist., bk. iii, c. viii. pt. ii, ch. v, § 3. See DOCTIAMTISM.

Eliphai (Heb. Uliphia), וֹלִפִּיה, God is his judge; Sept. "Eliaphai v. r. Eiphai, Vulg. Eliphaal", son of Ur (q. v.), and one of David's famous guards (1 Chron. xx, 35). B.C. 1046. In the parallel passage (2 Sam. xxiii, 34) he seems to be called "Eliphleth, the son of Ahabai (q. v.), the son of the Maachathite;" but the names are here greatly confused. See David.

Eliphaal (Eiphaiu, Vulg. Eliphalech), one of the sons of "Amo," who divorced his Gentile wife after the exile (1 Esd. ix, 28); evidently the Eliphalet (q. v.) of the Heb. text (Ezra x, 33).

Eliphelet (q. v.), son of "Amo," the less correct mode of expressing (2 Sam. xvi, 1; 1 Chron. xiv, 7) the name of Eliphalet (q. v.). It also occurs in the Apocalypse (Eiphalet v.) as the name of one of the sons of Adonias, who returned from the exile (1 Esdr. viii, 39); the Eliphelet of the Heb. text (Ezra vii, 18).

Eliphaz (Hebrew Eliphonas, טופח, God is his strength; Sept. "Elyphauz, but in Gen. Elyphas, Vulg. Elphaz), the name of two men.

1. The leading one of the "three friends" who came to comfort Job in his affliction (Job iv, 1), and who took a more remarkable discourse (chap. xii-xv), which occupies the book of Job. B.C. cir. 2290. He is called "the Temanite;" hence it is naturally inferred that he was of the region substantially known as Teman (q. v.), in Idumea; and as Eliphas, the son of Esaau, had a son called Teman, from whom the place took its name, not improbably concluded that this truth brought forth the descendant of the other Eliphas. Some, indeed, even go so far as to suppose that the Eliphas of Job was no other than the son of Esaau. This view is of course confined to those who refer the age of Job to the time of these patriarchs. But it is doubtful whether even this gives a date sufficiently early. See Job.

Eliphas is the first of the friends to take up the debate, in reply to Job's passionate complaints. He appears to have been the oldest of the speakers, from which circumstance, or from natural disposition, his arguments are bold and sedate than that of the other (see Eichler, De visione Eliphas (iv, 12-31), Lpex. 1781). He begins his orations with delicacy, and conducts his part of the controversy with considerable address (chap. iv, v, xxv, xxvi). On him falls the main burden of the argument, that God's retribution in this world is perfect and certain, and that consequently suffering must be a proof of previous sin. His words are distinguished from those of B jihad and Zophar by greater calmness and elaboration, and, in the first instance, by greater gentleness towards Job, although he ventures afterwards, apparently from conjecture, to impugn his moral conduct. The great truth brought out by him is the unapproachable majesty and purity of God (iv. 12-21; xv. 16). But still, with the other two friends, he is condemned for having, in defence of God's providence, spoken of him "the thing that was not right," i.e. by refusing to recognise the facts of human life, and particularly early. See Eliphas.

2. The son of Esaau by one of his first wives, Adah, and father of several Edomitis tribes (Gen. xxxvi, 1, 10, 11, 16; 1 Chron. i, 35, 36). B.C. post 1683.

Eliph'eleh (Heb. in the prolonged form Eliphele'- la, פֹּלָה עָלָה, God will distinguish him; Sept. "Elef'elai and 'Elfelely v. r. Eifeleia and 'Elfeleias, Vulg. Eliphelaeo), a Merarite Levite; one of the gatekeepers (םִירָשָׁה, A.V. porter) appointed by David to play on the harp "on the Shenmith," on the occasion of bringing up the ark to the city of David (1 Chron. xv. 18, 21). B.C. 1046.

Eliphe'let (Heb. Uliphel'et, יֹלֵפַי הֶלֶת, in pause Eliphel'et, יֹלֵפַי הֶלֶת, God is his deliverer), the name of several sons of David.

1. (Sept. "Elyphaleth v. r. 'Alyphaleth and 'Elphaleth, Vulg. Eliphelthes). One of David's distinguished warriors, styled "the son of Ahasai, the son of the Maachathite" (2 Sam. xxii, 34); but, by some error and abbreviation, Eliphael (q. v.), the son of Ur, [and] Hepher, the Maachathite," in the parallel passage (1 Chron. xi, 35, 36).

2. (Sept. "Elyphaleth v. r. 'Alyphaleth, Vulg. Elipha- leth). The third of the nine sons of David, born at Jerusalem, exclusive of those by Bathsheba (1 Chron. iii, 6; iv, 5, in which latter passage the name is written Eliphlet). B.C. post 1044.

3. (Sept. "Elyphaleth v. r. 'Alyphaleth, Vulg. Eliphalet). The ninth of the same (1 Chron. iii, 8; iv, 7; 2 Sam
v. 16, in which two latter passages the name is Anglicized "Eliphameet." It is believed that there were no two sons of this name, but David's eleven sons, and that the last two were born of concubines (Ant. vii. 3, 3). See David.

Elisabeth (Ελισαβήτα), wife of Zacharias or Zachariah, and mother of John the Baptist (Luke i, 5). She was a descendant of Aaron, or of the race of the priests; and of her and her husband this exalted character was engendered, that they were both righteous before God, walking in all the commandments and ordinances of the Lord blameless" (Luke i, 7, 15). Thy had remained childless till the decline of life, when an angel foretold to her husband Zachariah the birth of John, and Zachariah returning home, Elisabeth conceived. During five months she concealed the favor God had granted her; but the angel Gabriel discovered to the Virgin Mary this miraculous conception, as an assurance of the birth of the Messiah by herself. See Announcement. Mary visited Elisabeth, and when she saluted her, Elisabeth felt the quickening of her unborn child. When her child was circumcised she named him John, according to previous instructions from her husband (Luke i, 39-63). B.C. 7. See Zacharias.

The name in this precise shape does not occur in the Old Testament, where the names of few females are given. But it is a Hebrew name, the same in fact as Elisheba (q. v.). It is perhaps etymologically connected with Elis or Eliash, the Phoenician name of queen Dido (Virgil, Aen. iv, 335), whence the modern Elia, Elizabeth.

Elissous (Ελησσούς), the Gracian form of the name of Elissos (q. v.) in the N. T. (Luke iv. 27), and is also in Ephesians (Eph. v. 12, as well as Josephus (Ant. viii. 13, 7 etc.).

Elia (Ελία, ναζονιστής, ναζονιστής, God is his salvation; Sept. Ελιασθάνος or Ελιασθάνω, Josephus and N. T. Ελιασθάνως, Vulg. Elyasus, A. V. in N. T. and Apoc. "Elissus"), the son of Shaphat of Abel-meholah (1 Kings xix, 16-19), who became the attendant and disciple of Elijah (Josephus, Ant. viii. 13, 7), and his successor as prophet in the kingdom of Israel. See Elijah.

1. History. —The earliest mention of Elia's name is in the command to Elijah in the cave at Horeb (1 Kings xix, 16, 17). But our first introduction to the full person of the prophet is found in the fields of his native place (B.C. cir. 900). Abel-meholah—the "meadow of the dance"—was probably in the valley of the Jordan, and, as its name would seem to indicate, in a moist or watered situation. See Azel. Elijah, on his way from Sinai to Damascus, chose this native valley as his retreat, and lived there in the broken, arid fields of the valley, twelve yoke before him, i. e. probably eleven other ploughs preceding him along the same line (see Thomson, Land and Book, i, 288). To cross to him, to throw over his shoulders the rough mantle—a token at once of investiture with the prophet's office, and of adoption as a son—was to Elia, but the work of an instant, and the prophet strode on as if what he had done were nothing—Go back again, for what have I done to thee?" So sudden and weighty a call, involving the relinquishment of a position so substantial, and family ties so dear, might well have caused hesitation. But the parley was only momentary. To use a figure which we may almost believe to have been suggested by this very occurrence, Elijah was not a man, but a man, putting his hand to the plough, was likely to look back; he delayed merely to give the farewell kiss to his father and mother, and preside at a parting feast with his people, and then followed the great prophet on his northward road to the land of the second blessing, where in the east that Joshua had been to Moses. Of the nature of this connection we know hardly anything. "Elisha the son of Shaphat, who poured water on the hands of Elijah," is all that is told us. The characters of the two men were thoroughly dissimilar, but how far the lion-like daring and courage of the one had infused itself into the other, we can judge from the few occasions on which it blazed forth, while every line of the narrative of Elijah's last hours on earth bears evidence how deep was the personal affection which the stern, rough, revered master had engendered in his gentle and plant disciple.

Seven or eight years must have passed between the call of Elijah and the removal of his master, and during the whole of that time we hear nothing of him. But when that period had elapsed he reapplies, to become the prominent figure in the history of his country during at least part of his long life.

Being anxious, after his remarkable appointment on receiving the robe as a symbol of inheriting the prophetic spirit of his ascended master, to enter at once upon the duties of his sacred office, Elijah determined to visit the land of the prophets which were on the other side of the Jordan. Accordingly, returning to that river, and wishing that sensible evidence should be afforded, both to himself and others, of the spirit and power of his departed master residing upon him, he struck its waters with Elijah's mantle, when they parted and opened a way for him to pass over into dry land. Witnessing this miraculous transaction, the fifty sons of the prophets, who had seen from the opposite side Elijah's ascension, and who were awaiting Elijah's return, now, with becoming reverence, acknowledged his spirit as their spiritual leader. Being prophets as well, they must have felt full of reverence for Elijah than for zeal for Elijah: they saw the latter carried up in the air—they knew that this was not the first time of his miraculous removal. Imagining it therefore possible that the Spirit of God had cast him on some remote mountain in the valley, they ask him and seek him. Elijah, though fully aware that he was received up into glory, but yet fearful lest it should be conceived that he, from any unworthy motives, was not anxious to have him brought back, yielded to their request. The unavailing search confirmed Elijah's fame. (B.C. cir. 892.)

There are several considerations from which the incompleteness of the records of Elijah's life may be inferred: (a. ) The absence of marks by which to determine the dates of the various occurrences. The "king of Israel" is continually mentioned, but we are left to infer what kings it is that he has in view; (2 B.C. cir. 8, 9, 21, 26; vii, 2; viii, 3, 5, 6 etc.). This is the case even in the story of the important events of Naaman's cure, and the capture of the Syrian host at Dothan. The only exceptions are ill, 12 (comp. 6), and the narrations of the captive of Ruth and the eulogy of Ruth (i. vii. 12). The latter story is itself a proof of the disarrangement of these records, occurring as it does after the mention of the death of Jehoshaphat (13), and being followed by an account of occurrences in the reign of Jehoshaphat his father (ver. 22, 23). (6.) The absence of chronological sequence in the narratives. The story of the Souns-
mite embraces a lengthened period, from before the birth of the child till he was some years old. Gehazi's familiar communication with the king, and therefore the story which precedes it (vii, 1, 2), must have occurred before he was struck with leprosy, though placed long after the relation of that event (v, 27). (e) The different stories are not connected by the form of words usually employed in the consecutive narrative of these books. (See Keil, Comment. on Kings, p. 348, where other indications will be found.) The call of Elisha seems to have taken place about four years before the death of Ahab. He died in the reign of Joash, the great-grandson of Ahab, B.C. c. 855. However, the public career embraces a period of not less than 65 years, for certainly 55 of which he held the office of "prophet in Israel" (2 Kings v, 8).

(1.) After the departure of his master, Elisha returned to dwell (כנף) at Jericho (2 Kings ii, 18). The town had lately been rebuilt (1 Kings xvi, 54), and was a residence of the body of the "sons of the prophets" (2 Kings ii, 5, 8). Among the most prominent features of that place are still the two perennial springs which, rising at the base of the steep hills of Quarantania behind the town, send their streams across the plain towards the Jordan, scattering, even at the hottest season, the richest and most grateful vegetation over a country, which must be a land of sandy soil.

At the time in question, part, at least, of this charm was wanting. One of the springs was noxious — had some properties which rendered it unfit for drinking, and also prejudicial to the land (ii, 19, וַנָּתַן, bad, A. V., "naught"). At the request of the men of Jericho, Elisha remedied this evil. He took salt in a new vessel, and cast it into the water at its source in the name of Jehovah. From the time of Josephus (War, iv, 8, 8) to the present (Sawulf, Mod. Trans. p. 17), the tradition of the cave has been attached to the large spring W. of the present town, and which now bears, probably in reference to some later event, the name of Ain es-Sulaim (Robinson, Researches, iii, 588 sq.). See JERICHO.

(2.) We next meet with Elisha at Bethel, in the heart of the country, on his way from Jericho to Mount Carmel (2 Kings ii, 23). His last visit had been made in company with Elijah on their road down to the Jordan (ii, 5). Sons of the prophets resided there, but still it was the seat of the calf-worship; therefore a prophet of Jehovah might expect to meet with insult, especially if not so well known and so formidable as Elijah. The road to the town winds up the defile of the wady Suweinit, under the hill which still bears what are said to be the ruins of the city that was at the site of the town, at the site of which, even now retaining some traces was at that time deserted by a forest, thick, and the haunt of savage animals (comp. Amos v, 19). See BETHEL. Here the boys of the town were gathered, waiting, as they still wait at the entrance of the villages of Palestine, for the chance passer-by. In the scanty locks of Elisha, how were they to recognize the successor of the prophet, with whose shaggy hair streaming over his shoulders they were all familiar? So, with the license of the Eastern children, they scoff at the new-comer as he walks by — Go up (תַּהֲה, hardly承接, as if alluding to Elijah, but pass out on the way), bald-head (תַּהֲה), devoid of hair on the back of the head, as opposed to תַּהֲה, baid on the forehead):" For once Elisha assumed the sternness of his master. He turned upon them and censured them in the name of Jehovah. There was in their expressions an admixture of rudeness, in- fidelity, and impurity. But the inhabitants of Bethel were to know, from bitter experience, that to dishonor God's prophet was to dishonor himself, for Elisha was at the moment inspired to pronounce the judgment which at once took effect. God, who never wants for instruments to accomplish his purposes, caused two she-bears to emerge from the neighboring wood and punish the young delinquents. It is not said that they were actually killed (the expression is תַּהֲה, to rend, which is peculiarly applicable to the claws of the bear). This fate may indeed have befallen some of the party, but it is by no means probable in regard to the greater number.

Ehrenberg says that the bear is seen only on one part of the summit of Lebanon, called Mackmel, the other part being inhabited by strange, strange animals from these animals. The Syrian bear is more of a frugiverous habit than the brown bear (Ursus arctos), but when pressed with hunger it is known to attack men and animals; it is very fond of a kind of chick- pea (Cicer arietinum), fields of which are often laid waste by its devouring habits. Most recent writers are silent respecting any species of bear in Syria, such as Shaw, Volney, Hasselquist, Burckhardt, and Schult. Seetzen, however, notices a report of the existence of a bear in the province of Hasseibya, on Mount Hermon. Klaedt supposed this bear must be the Ursus arctos, for which opinion, however, he seems to have had no authority; and a recent writer, Dr. Thomson (Land and Book, ii, 373), says that the Syrian bear is still found on the higher mountains of this country, and that the inhabitants of Hermon stand in great fear of him. Heinrich von Stephan supposes that these bears form us that during the summer months these bears keep to the snowy parts of Lebanon, but descend in winter to the villages and gardens; it is probable, also, that at this period in former days they extended their visits to other parts of Palestine; for, though this species was in ancient times far more numerous than it is now, yet the snowy summits of Lebanon were probably always the summer home of these animals. It is not improbable, therefore, that the attack upon the forty-two children who mocked Elisha took place some time in the winter, when these animals inhabited the low lands of Lebanon. See BEAR.

(3.) Elisha extricates Jehoram, king of Israel, and the kings of Judah and Edom, from their difficulty in the campaign against Moab, arising from want of water (III, 4-27). The revolt of Moab occurred very shortly after the death of Ahab (III, 5; comp. i, 1), and the campaign, however, he seems to have been on another line (iii, 6; A. V., "through the latter part of the year")... The prophet was with the army according to Josephus (Ant. ix, 3, 8) he happened to be in a tent outside the camp of Israel." Joram he refuses to bear, except out of respect for Jehoshaphat, the servant of the true God; but a minstril is brought, and an instrument made the music of Jehoshaphat comes upon him, and he predicts a fall of rain, and advises a mode of procedure in connection therewith which results in the complete discomfiture of Moab. This incident probably took place at the S.E. end of the Dead Sea. See JEHORAM.

(4.) The widow of one of the sons of the prophet—according to Josephus, of Ondabilia, the steward of Ahab —is in debt, and her two sons are about to be taken from her and sold as slaves by her creditors, as by an extension of the law (Exod. xxi, 7, and Lev. xxv, 39), and by virtue of another (Exod. xxii, 5), they had the power to do; and against this heart-broken act she implores the prophet's assistance. God will not, without a cause, depart from the general laws of his administration: Elisha therefore inquires how far she herself had the power to avert the threatened calamity. She replies that the only thing of which she was possessed was one pot of oil. This Elisha causes to be filled (ii, 6) to the top (iii, 19), and he sends the widow of Elijah at Zarephath, until the widow has filled it with all the vessels which she could borrow, and thus procured the means of payment (2 Kings iv, 1-7). No place or date of the miracle is mentioned.

(5.) The next occurrence is at Shunem and Mount Carmel (iv, 8-27). The account consists of two parts—
ELISHA 155
ELISHA

[6.] After an interval of several years, the boy is old enough to accompany his father to the corn-field, when the harvest is proceeding. The first rays of the morning sun are too powerful for him, and (affected apparently by a sun-stroke) he is carried home to his mother only to die at noon. She says nothing of her loss to her husband, but depositing her child on the bed of the man of God, she, without a tear, went to Mount Carmel. The distance is fifteen or sixteen miles—at least four hours’ ride—but she is mounted on the best ass (תתא, the she-ass, such being noted for excellence), and she does not slacken rein.

Elisha is on one of the heights of Carmel commanding the road to Shunem, and from his position opposite to her (תתא) he recognises in the distance the figure of the regular attendant at the services which he holds here now new moon and sabbath” (comp. ver. 25). He sees Gehazi approach, and, thinking it is from a reason of her unexpected visit. But her distress is for the ear of the master, and not of the servant, and she presses on till she comes up to the place where Elisha himself is stationed (תתא, the mount, ver. 27, i. e. Carmel, ver. 25); then throwing herself down in her emotion, she clasps him by the feet. Misinterpreting this action, or perhaps with an ascetic feeling of the unholiness of a woman, Gehazi attempts to thrust her away. But the prophet is too profound a student of human nature to allow this. ‘‘Let her alone, for her soul is vexed within her, and Jehovah hath hid it from me, and hath walled mine eyes” (דסי), with the enigmatic form of Oriental speech—“Did I not cast thee out, a son of my lord? Did I not say, do not deceive me?” No explanation is needed to tell Elisha the exact state of the case. The heat of the season will allow of no delay in taking the necessary steps, and Gehazi is at once dispatched to run back to Shunem with the utmost speed. He takes the prophet’s walking-staff in his hand which he is to lay on the face of the child. The mother and Elisha follow in haste. Before they reach the village the sun of that long, anxious summer afternoon must have set. Gehazi meets them on the road, but he has no reassuring report to give: the placing of the staff on the face of the dead boy had called forth no sign of life. Then Elisha enters the house, goes up to his own chamber, “and he shut the door on them twain, and prayed unto Jehovah.” It was what Elijah had done on a similar occasion, and in this and his subsequent proceedings Elisha was probably following a method which he had had from his master. The child is restored to life, the mother is called in, and again falls at the feet of the prophet, though with what different emotions—“ and she took up her son and went out” (2 Kings iv, 18–37).

There is nothing in the narrative to fix its date with much accuracy. The events recorded by Nehemiah refer to the events of the days of Nehemiah, that is, to the time of Elisha’s successor Gehazi, the “servant” (“לד,” lad) of the man of God. It must of course have occurred before the events of viii, 1-6, and therefore before the cure of Naaman, when Gehazi became a leper.

(6.) The scene now changes to Gilgal, apparently at a time when Elisha was residing there (iv, 38–41). The sons of the prophets are sitting round him. It is a time of famine, possibly the same seven years’ scarcity which is mentioned in viii, 1, 2, and during which the Shunammite woman of the preceding story migrated to the Philistine country. The food of the party must consist of any herbs that can be found. The great caldron is put on at the command of Elisha, and one of the company brings his blanket (“לד,” not “lap”) as in A. V., as a gathering of vegetables as he has collected, and empties it into the caldron. The other men have they begun their meal than the taste betrays the presence of some noxious herb [see Gunn], and they cry out, “There is death in the pot, oh man of God!” In this case the cure was effected by meal which Elisha cast into the pot and the caldron (1 Kings iv, 39–40).

(7.) The next miracle in all probability belongs to the same time, and also to the same place as the preceding. A man from Baal-shalisha (q. v.) brings the man of God a present of the first-fruits, which under the law (Num. xviii, 8, 12; Deut. xviii, 3, 4) were the perquisite of the ministers of the sanctuary—20 sheaves of the new barley, and some small bundle of green grass, which is distinctly referred to. It is no longer disputed, but which seems most likely to have been roasted ears of corn not fully ripe (בֵּית), perhaps elliptically for בֵּית, comp. Lev. xxi, 4), brought with care in a sack or bag (זית, Sept. xiiii). This moderate provision is by the word of Jehovah rendered more than sufficient for a hundred men (2 Kings iv, 42–44). This is one of the instances in which Elisha is the first to anticipate in some measure the miracle of Christ.

(8.) The simple record of these domestic incidents amongst the sons of the prophets are now interrupted by an occurrence of a more important character (2 Kings v, 1–27). The chief captain of the army of Syria, to whom his country was indebted for some signal success (the tradition of the Jews is that it was Naaman who killed Absalom. 2 Sam. viii), was afflicted with leprosy, and that in its most malignant form, the white variety (ver. 27). In Israel this would have disqualified him from all employment and all intercourse (2 Kings xv, 5; 2 Chron. xxvi, 20, 21). But in Syria no such practice appears to have prevailed; Naaman was still a “great man with his master,” “a man of countenance.” One of the members of his establishment is an Israelitish girl, kidnapped by the marauders (וָתְנָה) of Syria in one of their forays over the border, and she brings into that Syrian household the fame of the name and skill of Elisha. “The prophet in Samaria,” who had raised the dead, would, if brought into the presence of (וָתְנָה) the patient, have no difficulty in curing even this dreadful leprosy. The Sennacherib communiqué of himself (וָתְנָה), not “one told” to the king. Benhadad had yet to learn the position and character of Elisha. He writes to the king of Israel a letter very characteristic of a military prince, and curiously recalling words uttered by another military man in reference to the cure of his sick servant many centuries later—“I say to this one, go, and he goeth, and to my servant, do...
ELISHA 156

ELISHA

this, and he doeth it." "And now"—so ran Benhadad's letter after the usual complimentary introduction had probably opened the communication—"and now, when this letter is come unto thee, behold, I have sent Naaman, my slave, to thee, that thou mayest recover him of his leprosy." With this letter, and with a present, in which the rich fabrics (☞22, i. e. a dress of ceremony) for which Damascus has always been in modern times so famous form a conspicuous feature, and the olive-wood articles of abundance (☞15, 23), Naaman p. proceeds to Samaria. The king of Israel—his name is not given, but it was probably Joram—is dismayed at the communication. He has but one idea, doubtless the result of too frequent experience—"Consider how this man seeketh a quarrel against me!" This occurrence soon reaches the ears of the prophet, and with a certain dignity he "sends" to the king—"Let him come to me, and he shall know that there is a prophet in Israel." To the house of Elisha Naaman goes with his whole cavalcade, the "horses and chariots" of the Syrian general fixing themselves particularly in the mind of the chronicler. Elisha still keeps in the background, and while Naaman stands at the doorway, contents himself with sending out a messenger with the simple direction to bathe seven times in the Jordan. The independent behavior of the prophet, and the simplicity of the prescription—only devoid of any ostentatious, but abundantly sufficient to the native of a city which boasted, as it still boasts, of the finest water-supply of any city of the East, all combined to enrage Naaman. His slaves, however, knew how to deal with the quick but not ungentoo temper of their master, and the result is that he goes down to the Jordan and dips himself seven times, and his flesh came again like the flesh of a little child, and he was clean." His first business after his cure is to thank his benefactor. He returns with his whole train (☞22, i. e. "host" or "camp"), and this time he will not be denied the presence of Elisha, but, making his way in, and standing before him, he gratefully acknowledges the power of the God of Israel, and entreats him to accept the present which he had brought from Damascus. But Elisha is firm, and refuses the offer, though repeated with the strongest adjuration. Naaman, having adopted Jehovah as his God, beegs to be allowed to take away some of the earth of his favored country, of which Bethel was the altar. He then invites Elisha on a difficulty which he foresees. How is he, a servant of Jehovah, to act when he accompanies the king to the temple of the Syrian god Rimmon? He must bow before the god; will Jehovah pardon this disloyalty? Elisha's answer is "Go in peace," and so this fierce war of words is ended. But Gehazi, the attendant of Elisha, cannot allow such treasures thus to escape him. "As Jehovah liveth," an expression, in the lips of this vulgar Israelite, exactly equivalent to the oft-repeated Wallah—"by God"—of the modern Arabs, "I will run after this Syrian and take something of him." So he frames a story by which the generosity of Naaman is made to send back with him to Elisha's house a considerable present in money and clothes. He then went in and stood before his master as if nothing had happened. But the prophet was not so deceiver. Rimmon had gone before him through the whole transaction, even to its minutest details, and he visits Gehazi with the tremendous punishment of the leprosy, from which he has just relieved Naaman. The date of the transaction must have been at least seven years after the raising of the Shunammite's son. This is in comparison with 1, 2, 3. Gehazi's familiar conversation with the king must have taken place before he was a leper. See Naaman. (9.) We now return to the sons of the prophets, but this time the scene appears to be changed, and is probably at Jericho, and during the residence of Elisha there. Whether from the increase of the scholars conversant on the estimation in which the master was held, or from some other cause, their habitation had become too small—"The place in which we sit before thee is too narrow for us." They will therefore move to the close neighborhood of the Jordan, and cutting down beams—each man one, as with curious minute—saw to the smallest details—make there a new dwelling-place. Why a man was selected can only be assumed. Possibly for its distance from the distractions of Jericho—possibly the spot was once sanctified by the crossing of Israel with the ark, or of Elijah, only a few years before. Urged by his disciples, the man of God consented and let them accompany him. When they reach the Jordan, descending to the level of the sea, all commence filling the trees (☞22) of the dense belt of wood in immediate contact with the water. See Jordan. As one of them was cutting at a tree overhanging the stream, the iron of his axe (a borrowed tool) flew off and sank into the water. His cry soon brought the man of God to his aid. The stream of the Jordan is deep up to the very bank, especially when the water is so low as to leave the wood dry, and is, moreover, so turbid that search would be useless. But the place at which the lost axe entered the water is shown to Elisha; he looses off (☞22) a stick and casts it into the stream, and the iron appears on the surface, and is recovered by its possessor (2 Kings vi. 1—7).

(10.) Elisha is now residing at Dothan, half way on the road between Samaria and Jerzeel. The incursions of the Syrian raiding bands (☞19, 20) still continue, but apparently with greater boldness, and pushed even into places which the king of Israel is accustomed to frequent (comp. Josephus, Ant. ix, 4, 3). But their manoeuvres are not hid from the man of God, and by his warnings he saves the king "not once nor twice." So baffled were the Syrians. He conducts them to beat failures as to make their king suspect treachery in his own camp. But the true explanation is given by one of his own people—possibly one of those who had witnessed the cure wrought on Naaman, and could conceive no power too great to ascribe to so gifted a person: "Elisha, the prophet in Israel, telleth the king of Israel the words that thou speakest in thy bed-chamber." So powerful a magician must be seized without delay, and a strong party with chariots is dispatched to effect his capture. They march by night, and before morning take up their stations on the base of the hill above which the ruins of Dothan still stand. Elisha's servant—not Gehazi, but apparently a new-comer, unacquainted with the powers of his master—is the first to discover the danger. But Elisha remains unmoved by his fears; and at his request the eyes of the youth are opened, which behold the spiritual guards which are protecting them, horses and chariots of fire filling the whole of the mountain. But this is not enough. Elisha again prays to Jehovah, and the whole of the Syrian warriors are struck blind. He then descends, and offers to lead them to the person and the place where they will find protection, and to Samaria. There, at the prayer of the prophet, their sight is restored, and they find themselves, not in a retired country village, but in the midst of the capital of Israel, and in the presence of the king and his troops. His enemies thus completely in his grasp, the king of Israel is enabled to exact from them—"Shalt thou say, I say, my father?" But the end of Elisha has been answered when he has shown the Syrians how futile are all their attempts against his superior power. "Thou shalt not say. Thou mayest say those whom thou hast taken captive in lawful fight, but not these literally. Are these the things that thou hast captured with thy sword and bow, that thou art smiting them?"

(See Benhadad.)

ELISHA

(11.) But the king of Syria could not rest under such dishonor. He abandoned his marauding system, and gathered a regular army, with which he lays siege to Samaria. The awful extremities to which the inhabitants of the place were driven need not here be recalled. The next night he had inflicted on his son a terrible punishment, and the next day he was placed in the place of his father, as the murderer of Ahimasek. The king, therefore, the Shunammite had recourse, as the widow of Tekoa on a former occasion to king David (2 Sam. xiv, 4). Thus occurred one of those rare coincidences which it is impossible not to ascribe to something more than mere chance. At the very moment of the entrance of the king, and her son, imitating the example of Oriental suppliants alone clamor (נֵשָׁפֶה), for her home and her land—"the king was listening to a recital by Gehazi of "all the great things which Elisha had done," the crowning feat of all being that which he was then actually relating—the restoration to life of the boy of Shunem. The woman was instantly recognized by Gehazi. "My lord, O king, this is the woman and this is her son whom Elisha restored to life." From her own mouth the king hears the repetition of the wonderful tale, and, whether from regard to Elisha, or struck by the extraordinary coincidence, orders her land to be restored, with the value of all its produce during her absence (2 Kings vili, 1-6).

(18.) Hitherto we have met with the prophet only in his own capacity. We now find him in that of a great statesman. (The traditional spot of his residence on this occasion is shown in the synagogue at Jobar (?) Holah, a village about two miles E. of Damascus. The name village, if not the same building, also contains the cave in which Elijah was fed by ravens and the tomb of Gezah (Stanley, Palæst. p. 89; Quaresmius, ii, 283; "cana et munducis Hebrorum"). He is there to carry out the command given to Elijah on Horeb to "anoint Hazael to be king over Syria." At the time of his arrival Benhadad was prostrate with his last illness. This marks the time of the visit as after the siege of Samaria, which was conducted by Benhadad in person (comp. vi, 24). The memory of the cure of Naaman, and of the subsequent disinterestedness of the prophet, were no doubt still fresh in Damascus; and no sooner does he enter the city than the intelligence of his arrival is spread abroad. "The man of God is come hither." The king's first desire is only to attain his own fate; and Hazael, who appears to have succeeded Naaman, is commissioned to be the bearer of a present to the prophet, and to ask the question on the part of his master, "Shall I recover of this disease?" The object is to hear the answer from the lips of Hazael, and learn from his own mouth the oracle. The caravan (of 40 camels, according to Josephus, Ant. ix, 4, 6) laden with the riches and luxuries which that wealthy city alone could furnish. The terms of Hazael's address show the respect in which the prophet was held even in this foreign and hostile country. They are identical with those in which Naaman was addressed by his slaves, and in which the king of Israel in a moment of the deepest gratitude and reverence addressed Elisha himself. "Thy servant Benhadad hath sent me to thee, saying, 'Shall I recover of this disease?" The reply, probably originally ambiguous, is doubly precious in the present doubtful state of the Hebrew text, but the general conclusion was unmistakable: "Jehovah hath showed me that he shall surely die." But this was not all that had been revealed to the prophet. If Benhadad died, who would be king in his stead but the man who had been anointed upon the land for seven years? and he had warned his friend the Shunammite of it that she might provide for her safety. Accordingly she had left Shunem with her family, and had taken refuge in the land of the Philistines, that is, in the rich corn-crowing plain on the coast of Judah, who, secure from want, she remained during the death. At the end of the seven years she returned to her native place, to find that during her absence her house with the field-land attached to it—the corn-fields of the former story—the corn-fields of the former story—had been appropriated by some other person. In Eastern countries kings are (or were) accessible to the complaints of the meanest subject, and their addresses were free intercourse to the inhabitants of the Western world. To the king, therefore, the Shunammite had recourse, as the widow of Tekoa on a former occasion to king David (2 Sam. xiv, 4). Thus occurred one of those rare coincidences which it is impossible not to ascribe to something more than mere chance. At the very moment of the entrance of the king, and her son, imitating the example of Oriental suppliants alone clamor (נֵשָׁפֶה), for her home and her land—"the king was listening to a recital by Gehazi of "all the great things which Elisha had done," the crowning feat of all being that which he was then actually relating—the restoration to life of the boy of Shunem. The woman was instantly recognized by Gehazi. "My lord, O king, this is the woman and this is her son whom Elisha restored to life." From her own mouth the king hears the repetition of the wonderful tale, and, whether from regard to Elisha, or struck by the extraordinary coincidence, orders her land to be restored, with the value of all its produce during her absence (2 Kings vili, 1-6).
press" and "cut Israel short," would "thrust Gillael with threshing instruments of iron," and "make them like the dust by threshing," as no former king of Syria had done, and that at a time when the prophet would be no longer alive to warn and to advise. At Hazael's request, he comes forth at the request of Omri, a "calm and deliberate" saint. But the cause of the prophet is one which has no sorrow for Hazael. How such a career presented itself to him may be inferred from his answer. His only doubt is the possibility of such good fortune for one so mean. "But what is thy slave, dog that he is (Matthew 27:29, Mark 15:29, Luke 23:22, Acts 28:22)? I am a servant of the Lord." "Thy Lord," he says, "will show me what thou wilt be king over Syria." "Returning to the king, Hazael tells him only half the dark saying of the man of God—"He told me that thou shouldest surely recover." But that was the last day of Benhadad's life. What were the circumstances attending his death, whether in the bath as has recently been suggested (Ewald, J. G., p. 532 note), is not clear, except that he seems to have been smothered. The general inference, in accordance with the account of Josephus, is that Hazael himself was the murderer, but the statement in the text does not necessarily bear an important interpretation (2 Samuel 8:15; 2 Kings 8:12). "This shall be rendered to thee (not of) hair-cloth," i.e., perhaps divan-mattress; and, indeed, from the mention of Hazael's name at the end of the passage, the conclusion is rather the reverse (2 Kings viii, 7-15). See HAZAEL.

(14.) Two of the injunctions laid on Elijah had now been carried out, but the third still remained. Hazael had slain King Benhadad of Syria. This attempt to recover the stronghold of Ramoth-Gilead (viii, 28), or Ramah, among the mountains on the east of Jordan. But the fortress was held by the kings of Israel and Judah in alliance, and, though the Syrians had wounded the king of Israel, they had not been able to capture the place (viii, 28; ix, 15). One of the captains of the Israelitish army in the garrison was Jehu, the son of Jehoshaphat, the son of Nimshi. At the time his name was mentioned to Elijah on Horeb he must have been a youth; now he is one of the boldest and best known of all the warriors of Israel. He had seen the great prophet once, when with his companion Bidkar he attended Ahab to take possession of the field of Naboth, and the scene of that day, and the words of the curse then pronounced, no subsequent adventure had been able to efface (ix, 25, 30). The thought of the curse of the fulness of the curse by his being anointed king over Israel. Elijah's personal share in the transaction was confined to giving directions to one of the sons of the prophets, and the detailed narrative may be found in 2 Kings ix (see MAURICE, Prophecies and Kings, serm. ix.). See JEHU.

(15.) Beyond this we have no record of Elijah's having taken any part in the revolution of Jehu, or the events which followed it. He does not again appear till we find him on his death-bed in his own house (xii, 14, 19). Joash, the grandson of Jehu, is now king, and he has come to weep over the approaching destruction of the great and good prophet. His words are the same as those of Elisha when Elijah was taken away—"My father! my father! the chariot of Israel and the horsemen thereof!" But it is not a time for weeping. One thought fills the mind of both king and prophet. The nation is the fierce enemy who is gradually destroying the country, and against Syria one final effort must be made before the aid of Elisha becomes unobtainable. What was the exact significance of the ceremonial employed, our ignorance of Jewish customs does not permit us to know, but it was evidently symbolic. The window is the symbol of the house of the king; the bow is pointed in the same direction, and the prophet laying his hands on the string as if to convey force to the shaft, the arrow of Jehovah's deliverance, the arrow of deliverance from Syria, is discharged. This done, the king takes up the bundle of arrows, and, at the command of Elisha, beats them on the ground. But he does it with no energy, and the successes of Israel, which might have been so prolonged as to make up for the years of famine, are limited to three victories. See JEHOOISH.

(16.) The power of the prophet, however, does not terminate with his death. Even in the tomb (Josephus embalishes the account by stating that he had a magnificent funeral, Ant. x. 8, 6) he restores the dead to life. Most had been recovered from the tremendous reverse inflicted on her by the three kings at the opening of Elisha's career (2 Kings iii), and her ravaging bands had again begun the work of deprestation which Syria so long pursued (2 Kings v, 2; vi, 20). The text perhaps infers that the spring—that is, when the early crops were ripening—was the usual period for these attacks; but be it as it may, on the present occasion they invaded the land "at the coming in of the year." A funeral was going on in the cemetery which contained the sepulchre of Elisha. Seeing the Moabithit spoilers in the distance, the friends of the king were afraid to conceal his corpse in the nearest hiding-place. They chose—whether by design or by accident is not said—the tomb of the prophet, and, as the body was pushed (2 Kings iii) into the cell which formed the receptacle for the corpse in Jewish tombs, it came in contact with his bones. The mere touch of those hallowed remains was enough to effect that which in his lifetime had cost Elisha both prayers and exertions—the man "revived and sat up on his feet." Other miracles of the prophet foreshadow, as we have remarked, the acts of power and goodness of our Saviour, but this may rather be said to recall the marvels of a later period—of the early ages of the Christian Church. It is in the story of Gerasenes and Possessed and Possessed (Matthew xiv, 30-41) that the likeness is seen. It is not in any occurrence in the life of our Lord or of the apostles, that we must look for a parallel to the last-recorded miracle of Elisha (2 Kings xiii, 20-22).

2. Characteristics and Traditional Views.—In almost every respect Elisha presents the most complete contrast to Elijah. The collection of his sayings and doings which are preserved in the 3d to the 9th chapter of the 2d book of Kings, though in many respects deficient in that remarkable vividness which we have noted in the records of Elijah, is yet full of testimonies to this contrast. Elijah was a true Bedouin, the child of the desert and the slave of the curse by his being anointed king over Israel. The detailed narrative may be found in 2 Kings ix (see MAURICE, Prophecies and Kings, serm. ix.). See JEHU.

2 Kings x, 18-20; xii, 17, 1; xiii, 1-20; xiv, 1-12; xv, 1-18; xvi, 1-20; xvii, 1-40; xviii, 1-18; xix, 1-20; xx, 1-19; xxi, 1-19; xxii, 1-40; xxiii, 1-29; xxiv, 1-25; xxv, 1-21; xxvi, 1-20; xxvii, 1-36; xxviii, 1-28; xxix, 1-20; xxx, 1-28; xxxi, 1-13. See also 1 Kings iv, 33-42. See also 1 Kings iv, 33-42. The flow of the narrative here is interrupted, but we can gather that his dress was the ordinary garment of an Israelite, the, probably similar in form to the long abbyr of the modern Syrians (2 Kings ii, 12), that his hair was worn short (if not naturally deficient) behind, in contrast with the long locks of Elisha (ii, 25), and that he was a wanderer, the kind ordinarily carried by slave or aged citizens (Zechariah viii, 4). What use made of the rough mantle of Elijah, which came into his possession at their
ELISHA

parting, does not anywhere appear, but there is no hint of his ever having worn it, Elisha was emphatically a destroyer. His mission was to slay and to demolish whatever opposed or interfered with the work of God. Scenes of death and destruction had been adopted as the emblem of power and force, and they were shown that he was feebleness itself compared with the God whom they had forsaken. But after Elisha the destroyer comes Elisha the healer. "There shall not be dew nor rain these years" is the earliest proclamation of the one. "There shall not be thine inheritance, of thee nor of thy father's" is the first miracle of the other. What may have been the disposition of Elisha when not engaged in the actual service of his mission we have unhappily no means of knowing. Like most men of strong, stern character, he probably had affections not less than Whiting. But it is impossible to conceive that he was accustomed to the practice of that beneficence which is so strikingly characteristic of Elisha, and which comes out at almost every step of his career. Still more impossible is it to conceive him exercising the tolerance towards the person and the religion of foreigners for which Elisha is remarkable—in communication, for example, with Naaman or Hazael; in the one case calming with a word of peace the scuffle of the new proselyte, anxious to recollect the due homage to Rimmon with his allegiance to Jehovah; in the other case contemning with tears, but still with tears only, the evil which the future king of Syria was to bring upon his country. That Baal-worship was prevalent in Israel even after the efforts of Elisha, and that Samaria was his chief seat, we have the evidence of the narrative of Jehu to ascribe unto (2 Kings x, 18, 19); but his mission is not so directly rebuke and punish it. In the eulogium of Elisha contained in the catalogue of Worthies of Eccles. xlviii., 12, 14—the only later mention of him save the passing allusion of Luke iv, 27—his special character is more strongly brought out than in the earlier narrative. Whilst he lived, he was in the presence of any prince, neither could any bring him into subjection. No word could overcome him, and after his death his body prophesied. He did wonders in his life, and at his death were his works marvelous.

This thaumaturgic view of Elisha is indeed the true key to his Biblical history, for he evidently appears in these records chiefly as a worker of prodigies, a predictor of future events, a revealer of secrets, and things happening out of sight or at a distance. The working of wonders was to be a natural exponent of false religions, and we may be sure that the Baal-worship of Samaria and Jezebel was not free from such arts. The story of 1 Kings xxii shows that even before Elisha's time the prophets had come to be looked upon as diviners, and were consulted, not on questions of truth and justice, nor even as depositaries of the purposes and will of the Deity, but as able to forecast how an adventure or a project was likely to turn out, whether it might be embarked in without personal danger or loss. But if this degradation is inherent in false worship, it is no less a principle in true religion to adjust itself to a state of things already existing, and out of the forms of the alien or the false to produce the power of the true. Thus Elisha appears to have met the habits of his fellow-countrymen. He wrought, without reward and without ceremonial, the cures and restorations for which the sons of Baalzebub at Ekron were consulted in vain: he came without the sovereign danger of the Syrians which the whole four hundred of his prophets had not succeeded in predicting to Ahab, and thus in one sense we may say that no less signally than Elisha he vanquished the false gods on their own field.

The frequency and unparalleled nature of his miracles also furnish perhaps the best explanation of Elisha's behest of "a double portion of his own spirit" upon Elisha (2 Kings ii, 9). The ordinary meaning put upon this phrase (see, for example, J. H. Newman, subi, of the Day, p. 191) is that Elisha possessed double the power of Elisha. This, though sanctioned by the renderings of the Vulgate and Luther, and adopted by a long series of commentators from Ephraem Syrus to Krummacher, would appear not to be the real force of the words. The expression is נַעֲרָה נַעֲרָה, literally "a mouth of two"—a double mouthful—the same phrase employed in Deut. xxxi, 17 to denote the amount of a father's goods which were the right and token of a first-born son. Thus the gift of the "double portion" of Elisha as a legitimate heir is the legitimate act of the act of adoption which began with the casting of the mantle at Abel-meholah years before. It was this which Elisha sought—not a gift of the spirit of prophecy twice as large as Elisha himself possessed. This carries improbable on the very face of it; for what property could a man be asked to leave as an inheritance to another double of what he himself possessed? Nor did Elisha get any such superlative endowment; his position as a prophet was altogether of a dependent and secondary nature as compared with Elisha's; and the attempts in the Christian period to make use of the relation of the one to the other, proceeds upon arbitrary and superficial considerations. Not less arbitrary is the view of Ewald, that the request of Elisha must be understood as indicating a wish for two thirds only of Elisha's spirit (Gesen, iii, 507)—a view that requires no refutation. The true explanation is, that Elisha regarded Elisha as the head of a great spiritual household, which included himself as the first-born and all who had since been added to the fraternity under the name of "the sons of the prophets"; and what he now sought was, that he might be constituted Elisha's heir in the spiritual inheritance, by getting the first-born's double portion, and therewith authority to continue the work. For a curious calculation by Peter Damianus that Elisha performed twelve miracles and Elisha twenty-four, see the Acta Sanctorum, July 20.

Elisha is canonized in the Greek Church; his day is the 14th of June. Under that date, his life, and a collection of the few traditions concerning him—few indeed when compared with those of Elisha—may be found in the Acta Sanctorum. In the time of Jerome a "mausoleum" containing his remains was shown at Samaria (Paterv. p. 990). In it were the bones of Elisha taken from their receptacle and burned. But, notwithstanding this, his relics are heard of subsequently, and the church of St. Apollinarius at Ravenna still boasts of possessing his head. The Carmelites have a special service in honor of Elisha.

Elisha (in Armenian Eghacel) one of the most celebrated Armenian (Hrachian, was born at the beginning of the 2nd century. He was a pupil of the patriarch St. Sahag (Isaac) and of St. Mesrob, by whom he was sent to the schools of Athens, Alexandria, and Constantinople. Subsequently he became almoner and secretary of prince Varten, who, in the religious war of the Armenians against the Seljuk chief commander of the Armenian army. He died in 480. Probably he is the same person with bishop Elisha of Amathunik, who in 449 was present at the Syn-
od of Artashat, at which the bishops of Armenia replied to the summons of the Persian ruler Yazdegerd II to adopt the faith of Zoroaster. This reply, to which was added a brief apology of the Christian religion, led to the religious war which is described by Elisha. So great was the reputation of this work that its author received the surname of the Armenian Xenophanes. Elisha’s account of the accession of Yazdegerd IV describes in full the schemes of persecution devised by the Persian king against the Armenians, the resistance of the Armenian bishops and princes, the “holy alliance” concluded by the latter, and its operation and fate until the unfortunate battle at the river Tchmutch, in the province of Artas, in 451, in consequence of which the leaders of the holy alliance and most of the bishops were captured and taken to Persia. The first edition of this work was printed at Constantinople in 1641 (new ed. 1833); other editions appeared at Nakhichevan (1764), Calcutta (1816), and Venice (1822 and 1836). The last Venice edition, which is the best, contains also commentaries to the books of Joshua and Judges, a recommendation of monastic life, an exposition of the Lord’s Prayer, several homilies, and a work on the ecclesiastical canons. An English translation of the work was published by F. Neumann (The History of Varion and the Battle of the Armenians, containing An Account of the Religious Wars between the Persians and Armenians, by Eliauseus, bishop of the Amadanians, etc., Lond. 1830). It has also been translated into French by abbé G. K. Garabed (Sous les règnes des rois de l’Arménie, 1844, 8vo), and into Italian by G. Capelletti (Veneti, 1841). Elisha is also the author of a history of Armenia, which, however, appears to be lost.—Wetzler u. Wele, Kirchen-Lex., iii, 540; Hoefcr, Nouv. Bibli. Génér., xxv, 884; Neumann, Vernach einer Gesch. der arm, Litter. p. 69, 70 (A. J. S.).

Elish‘ah (Heb. Elish‘, Ἠλίσσαρ, Ἱλίσσαρ, Elish‘a, Elish‘a, Elish‘a, Elish‘a; Vulg. Elish‘a), the eldest of the four sons of Javan (Gen. x. 4; 1 Chron. i. 7). B.C. cir. 2450. He seems to have given name to a region on the Mediterranean, “the isles (Ἐλίσσαρ, Ἱλίσσαρ, Ἱλίσσαρ, Ἱλίσσαρ, Elish‘a, Elish‘a, Elish‘a, Elish‘a) of Elish‘ah,” which are described as exporting fabrics of purple and scarlet to the markets of Tyre (Ezek. xxvii. 7). If the descendants of Javan peopled Greece, we may expect to find Elish‘ah in some province of that country. It is probable that the name Elish‘ah was attached to the purple dye as a mark of the purple suits the Peloponnesus, for the fish affording the purple dyed was caught at the mouth of the Eurotas, and the purple of Laconia was very celebrated. See PIRUS. The name seems kindred to Elish‘ah (Joarch, Phileg. iii. 4), which, in a wider sense, was applied to the whole Peloponnesus; and some identify Elish‘ah with Helias (Michaels, Spec. Lyc., i. 79).—Kitto, S. V. Josephus, however, identified the race of Elish‘ah with the Eolians (Ant. i. 6, 1. His view is adopted by Knobel (Völkerk., p. 81 sq.). It appears correct to treat it as the designation of a race rather than of a locality; and if Javan represents the Ionians, then Elish‘ah the Eolians, whose name presents considerable similarity (Διόλις, having possibly been Διόλις), and whose predilection for maritime situations quite accords with the expression in Ezekiel. In early times the Eolians were settled in various parts of Greece, Thrace, Scythia, Beotia, Etolia, Locris, Elis, and Messenia: from Greece they emigrated to Asia Minor, and in Ekelion’s age occupied the maritime district in the N.W. of that country, named after them Eolos, together with the islands Lesbos and Tenedos. This is the region in which the fish was found on this coast, especially at Abydos (Virgil, Georg. i. 207), Phocaea (Ovid, Metam. vi. 9), Sigeum and Lectum (Athenaeus, iii. 88). Not much, however, can be deduced from this as to the position of the “isles of Elish‘ah,” as that shell-fish was found in many parts of the Mediterranean, especially on the coast of Laconia (Pausan. iii. 21. 6). Schlothüser (Paradies, p. 284), without the slightest probability, argues in favor of a position on the western coast of Africa, on the ground of the resemblance to Elites as the Phoenician name of Cartage. See ETHNOLOGY.

Elish‘ah‘ana (Heb. Elish‘ah‘ana, Ἠλίσσαρ, Ἱλίσσαρ, whom God has heard), the name of several men.

1. (Sept. ‘Elysh‘a‘an v. r. in Chron. ‘Elysh‘a‘an.) Son of Amihud, and “prince” or “captain” (both Nôkel, i.e. phylarch) of the tribe of Ephraim at the Exode (Num. i. 10; ii. 18; vii. 46, 55; x. 22). B.C. 1658.

2. From the position of the chronicle (Num. vii. 25), we find that he was the grandfather of Joshua.

3. ‘Elysh‘a‘an v. r. ‘Elysh‘an.) The second of the nine sons of David born at Jerusalem, exclusive of those by Bathshuha (1 Chron. iii. 6); cæsed in the par alliel passages (2 Sam. v. 15; 1 Chron. xiv. 5) by apparently the more correct name Eliesheva (q. v.).

4. (Sept. ‘Elysh‘a‘an.) The seventh of the same series of sons (2 Sam. v. 16; 1 Chron. iii. 8; xiv. 7), being one of the thirteen, or, according to the record of Samuel, the eleven, sons born to David of his wives after his establishment in Jerusalem. B.C. post 1044. The list in Josephus (Ant. vii. 5, 9) has no similar name. See DAVID.

5. (Sept. ‘Elysh‘a‘an.) Son of Jekahim, a descendant of Judah (1 Chron. ii. 41). In the Jewish tradition preserved by Jerome (Qu. Habr, on 1 Chron. ii. 41) he appears to be identified with

6. (Sept. ‘Elysh‘a‘an v. r. in Jer. ‘Elysh‘an and ‘Elysh‘an.) A member of the 1 Chron. line of Judah; father of Nethaniah, and grandfather of Ishmael who slew Gedaliah, provisional governor of Jerusalem after its capture by the Babylonians (2 Kings xxv. 25; Jer. xil. 1). B.C. considerably ante 688.

7. (Sept. ‘Elysh‘a‘an.) A royal scriber in whose chamber the roll of Jeremiah was read to him and other assembled magnates, and afterwards deposited for a time (Jer. xxxvi. 12, 20, 21). B.C. 605.

Elish‘aph (Heb. Elish‘aph, ἦλίσσαρ, whom God has judged; Sept. ‘Elysh‘aph v. r. ‘Elysh‘aph, son of Zichri, and one of the “captains of hundreds” whom Jehoiacon associated with himself in the league to overthrow the usurpation of Ahtaliah (2 Chron. xxiii. 11). B.C. 877.

Elish‘e‘ba (Heb. Elish‘ba, ἦλίσσαρ, God is her oath, or she seears by God, i. e. worshipper of God, comp. Isa. xix. 8; Sept. ‘Elysh‘ē‘ber, Vulg. Elisabeth: as in Luke i. 7), the daughter of Amminadab, phylarch of the tribe of Judah, and sister of Nahshon, the captain of the Hebrew host (Num. ii. 5); she became the wife of Asron (q. v.), and hence the mother of the priestly family (Exod. vi. 23). B.C. 1658.

Elish‘ahu‘a (Heb. id. Elish‘ahu, God is his selection; Sept. ‘Elysh‘ahu v. r. ‘Elysh‘ahu and ‘Elysh‘ahu, Vulg. Eliesheva), one of the sons of David, born at Jerusalem (2 Sam. v. 15; 1 Chron. xiv. 5); called Elish‘ahma (q. v.) in the parallel passage (1 Chron. iii. 6). B.C. post 1044.

Elish‘im (Ἐλίσσαμος; Vulg. Lusamus), an Isra‘elite of the sons of Zamath, who divorced his Gentile wife after the exile (1 Esdr. ix. 28); evidently the Eliesheva (q. v.) of the Heb. text (Esth. x. 27).

Eli‘‘a (Ἑλίας, i.e. Eli‘‘a), one of the forefathers of Judith (Judg. viii. 1), and therefore of the tribe of Simon. See JUDITH.

Eli‘ud (Ἑλίδων, prob. for Heb. Ἠλίσσαρ, God is his praise, but not found in O. T.), son of Achim, and father of Eleazar, being the fifth in ascent in Christ’s paternal genealogy (Matt. i. 14, 15). B.C. cir. 290. See GENEALOGY OF CHRIST.
Elizabeth, queen of England, ascended the throne on the death of her sister, the bloody Mary, Nov. 17, 1558, and died March 24 (April 3, New Style), 1603. She was the daughter and only living child of Anne Boleyn and Henry VIII. She was born Sept. 7, 1533, and was therefore 4 years old when she came to the crown. Before she was three years of age her mother was beheaded by her father, who, according to his own declaration, "never spared man in his anger, nor woman in his lust." On the 8th of June of the same year, 1536, the Parliament declared the divorce between her father and Anne Boleyn illegal, and bastardized the issue of both marriages. The same decision had been previously pronounced by archbishop Cranmer in the Star-Chamber, and confirmed by the Convocation. The Parliament also empowered Henry to settle the succession by testamentary disposition. In 1544, Elizabeth was restored to the line of royal inheritance.

During the lifetime of her father her education was carefully encouraged, especially by queen Catharine Parr; and it was continued after his death. She was instructed in Latin and Greek by William Grindal and Roger Ascham. The latter commended her masculine powers of application, quick apprehension, and retentive memory. "She spoke French and Italian with facility, was elegant in her penmanship, and was skilful in music, though she did not delight in it." She seems also to have had some acquaintance with literature; she was as slow in her studies as ever, and rarely free from peril.

On the accession of her brother Edward VI she encountered other risks than those she had been previously exposed to. In her infancy her hand had been designed for the duchessa of Cleves, third son of Francis I; it was offered to the earl of Arran, and declined by him; it was then proposed for Philip of Spain. Under Edward VI, admiral Seymour, the brother of the lord protector, hesitated between seeking the hand of Mary, Elizabeth, or the lady Jane Grey. He finally accepted that of the queen-governess, but did not discontinue his amorous attentions, and renewed his addresses to the princess Elizabeth on his wife's death. Her fair fame was impeached by her encouragement of his devotions; and this furnished one of the charges against him which resulted in his execution.

The death of Edward VI contributed much to the death of her brother. Dudley, earl of Northumberland, father of the earl of Leicester, the subsequent favorite, had persuaded the boy-king, in his last illness, to set aside both his sisters on the ground of their illegitimacy, and to betake himself to the lady Jane Grey (great-niece of Henry VIII), who had recently been married to his fourth son, lord Guilford Dudley. Ridley, bishop of London, preached vehemently in favor of lady Jane, and against any supposed title of Mary and Elizabeth, both of whom were regarded as Roman Catholic, and favorable to the restoration of the old religion. Northumberland offered lands and money to Elizabeth to induce her to renounce her claims, but she adroitly evaded his proposals.

The legitimacy of Mary was declared by Parliament, which thus stigmatized anew the birth of Eliza- beth. She conformed to the rites of the Roman Catholic Church with some reluctance, but was viewed with suspicion. In 1554 she was implicated, in connection with her discontent suitor, Courtenay, earl of Devonshire, in Wyatt's conspiracy, and was confined to the Tower for three months. Her death was demanded; but before the 11th of May, Mary's husband was inbed, and she was put under surveillance at Woodstock. Philip proposed to bestow her upon Emanuel Philipp, duke of Savoy, who afterwards married, according to the provisions of the treaty of Cateau-Cambresis, Margaret of France. These plots may appear trivial in a rapid notice of the life and reign of Elizabeth, but they affected both the development of her character and the policy of her government. The death of queen Mary exposed her to untold difficulties, requiring discernment, resolution, and singular good fortune. Her accession to the throne was unchallenged in Parliament, and was heard with demonstration of joy by the populace of London. She herself, however, in her retirement at Hatfield, recognized the gravity of the occasion. She had been declared illegitimate and incapable of the crown by her father, by her brother, by the Star-Chamber, by the Convocation, and twice by act of Parliament. For the last ten years of Edward VI, England had been determined by royal edicts and parliamentary enactments. The majority of the people were Roman Catholic in consequence of the measures of the late reign. Elizabeth, in the presence of her dying sister, had "prayed God that the earth might open and swallow her alive if in her private chapel, and throughout her life, if Roman Catholicism remained the national creed, her tenure of the crown would be wholly precarious, as the illegitimacy of her birth would be inevitably and irreparably maintained. The superior title of Mary, queen of Scots, would prevail, perhaps, with the aid of French arms, which were on the way to England and were backed by Spanish support. Roman Catholic her government could not be; but, if she renounced Rome, she united the religious with the political enthusiasm of France, under the instigation of the Guises, against her reign, and alienated or provoked Philip II, then aspiring to universal power. She had some claims to the English throne, which were afterwards advanced. He had hastened to tender his widowed heart and hand to the new queen immediately on the death of her sister. Could she venture to reject it at once, while his party was still strong, and in possession of all places of influence in England—while her own throne was still uncertain? She temporized, she coquetted, she entertained his proposals till she could reject them. She did not fully renounce the old and lately restored religion. She retained the crucifix and lights in her private chapel, and throughout her life addressed prayers to the Virgin. But she gradually abolished the most distinctive practices of the Papal Church, and established by act of Parliament her ecclesiastical supremacy. Her own Protestantism was always political rather than religious; while the ramparts of her throne were strengthened by the submission of the people. Her first measures were very cautious, and were adroitly introduced by her great minister, Sir William Cecil, who guided her councils till his death, forty years after. So insecure was her hold upon the sceptre, the crown of the lady Jane Grey was deposed by pope Paul IV, and also by John Knox, who had written a diatribe against the intolerable regimen of women, and who at this time addressed a letter to the queen to persuade her to surrender her crown.

Nearly all omens were adverse. The state was divided into factions—all opposed to her. Foreign states were hostile or indifferent in interest and in sentiment. Her title was most questionable, if not utterly invalid. She had no support but her own brave heart, the patriotic antipathy of her people to foreign rule, the civil wars and discord prevailing or impending in the kingdoms around her, and the sagacity of the advisers whom she might choose. She had to knit together her own people into a nation, to win popular support by suppressing all factions at home, to avert foreign dangers by creating a party for herself, and to procure occupation for her enemies in the realms by which she was menaced. The character and conduct of Elizabeth present a most interesting, but most difficult moral and historical study. No hasty and sweeping censures, whether of praise or blame, can exhibit the complex intertexture of the threads of various material and hue in that strange fabric. All was not virtue, all was not vice. The virtues were obscured, soiled,
or dwarfed by supposed state necessities; the vices were darkened or deepened by ceaseless provocations and harassing perplexities. Never, perhaps, was an illustrious character composed of a more undistinguishable admixture of fine gold, and dross, and clay, and never was the one face calculated to invite and reward curious examination.

In the earlier years of her reign she could trust only to those political friends whose fortunes were indissolubly connected with her own, and to her relatives, princes by birth and blood—Prince Charles, the eldest son of Mary Boleyn. As her throne became more assured, she attracted to her court the young men of ancient gentry, of adventurous spirit, of chivalrous bearing, of great but restricted ambition, and of high physical and intellectual advantages. Gentle birth, great talents, if good looks were the passport to the favor of the court. She thus created supporters and officers for her crown. The old nobility she did not and could not trust. They were powers in the land which despised, envied, and menaced her own. She accumulated favors on Robert Dudley, earl of Leicester, from whom he sought the favor of the Protestant cause, and the regard for his courtly manners, perhaps for a tenderer feeling, which she deemed it unequal and unsafe to gratify. Leicester, like his father, was ever scheming for a crown. Essex she petted, indulged, spoiled, as a bright, petulant, promising youth, who was one of her trusty and capable relatives, and the chief hope of her lonely old age.

Her crown was at first held merely by the acquisitiveness of the nation; it was not confirmed by any parliamentary sanction till the fourteenth year of her reign. It was herself; it came simply by her father and bluge, and the Guexs in the Netherlands. She assisted all; she gave no decisive aid to any.

In the midst of perils and successes at home and abroad, she made head against the incessant revolts of the nobility and religious disorder desolated Scotland, France, and the Netherlands; she prevented such commissions in her own realm. She promptly suppressed the commencements of revolt; she arrested the numerous conspiracies against her life and throne before they had time to explode; and she left her people a united, a happy, prosperous, prosperous, powerful, independent, and free.

Menaced by the claims of Mary, and by their prospective advocacy by France or Spain, she placed herself at the head of the Protestant movement, and aided, openly or secretly, the Protestant lords in Scotland, the army in the Lowlands; she coaxed, she intrigued; she was the cause of the defection of the Earl of Northumberland. If Mary was innocent of the murder of her husband; if she was not involved in the Northern rebellion; if she did not beguile the duke of Norfolk; if she did not connive at Babington's conspiracy and other similar plots; if she did not instigate and promote the plot to wellhau murder her royal jailor; if she practised no collusion with Philip of Spain—all these things might have been readily credited by the English queen and her council, and such belief would remove the atrocity, if not the formal illegality, of their procedure. But if all, or most of these suspicions were well founded; if they have been confirmed by the most impassionate historians, and by the most recent and diligent investigations, the action of Elizabeth may still be illegal, but it ceases to be iniquitous. It should be remembered, too, that Elizabeth did not consent to the trial of Mary till after repeated and urgent demands from the lords and commons of England in Parliament assembled; that her signature of the death-warrant is by no means certain; that it was issued and carried into effect without her consent, and contrary to the orders; and that she doubted both the bitter agony and horror. This plea is, indeed, counterbalanced by the suspicion that she sought the removal of her royal captive by secret murder. Such a design is, of course, infamous, though in accordance with the spirit and practices of the age.

To these and other indirect procedures may be referred much of that matrimonial croquetting which furnished occasion for the malignant censure of hostile contemporaries. There was much female vanity in the fre-
more strongly than Elizabeth upon the imaginations and hearts of their people; few ever bestowed greater or more permanent benefits upon them; yet few have met with blind admiration or more undistinguished veneration. The presumptions are all adverse to this great queen. Contemporary slanders, designed for political purposes, cannot have made her entirely unworthy, degrading, or vicious, when they inspired the compliments of Sidney, and Raleigh, and Spenser, and Shakespeare, and Bacon. There is a fashion in language and manners as well as in dress, and the fashion must be regarded if we would interpret the times.

The supposition of a warmer attachment to Essex than the natural attachment of an aged relative for the hopeful representative of an almost extinct line has neither foundation nor probability. Just as little truth is there in the fancy that her life was overcast and her death hastened by the execution of Essex. The misguided Earl had been guilty of the grossest breach of trust and treachery at the head of the government and armies of Ireland; he had repeated his treason, and menaced her existence and crown, in the midst of her power. He had a solemn trial, and was inevitably condemned. He confessed his guilt, and the queen shortly after absolved the ambassador of Henry IV that she felt no scruples in regard to his punishment.

Whatever may be thought on these points, which will not affect the spiritual aspects, as the measures of Elizabeth encouraged and produced the most splendid outburst of national power and of varied abilities that any age has ever witnessed. Strong men surrounded her from the first—men of marked capacity as statesmen, of eminent qualities as princes of the Church, as the approaching splendor of William Cecil, Sir Nicholas Bacon, Sir Francis Walsingham, Sir Ralph Sadler, the earl of Sussex, and lord Sackville. But she had been a quarter of a century on the throne, more than half her reign was passed, and she was wearying to old age before the great names whichInstant to her time; composition of those achievements which have immortalized themselves. It was under the inspiration of her rule, and of the results attained by her rule, that the brilliant generation grew up which has left to all future admiration the names of Sir Francis Walsingham, and Sir Francis Walsingham, and Bacon—of Raleigh, and Vere, and Essex, and Grenville—of Hooker and Gilbert—the generation which confirmed the independence of England and of Europe, which invented new arts, extended and applied the principles of law and government, secured the Protestant faith, bestowed on the colonies, founded colonies, established and commercial commerce, glorified letters, discovered new sciences, and established the political eminence, the industrial wealth, and the intellectual empire of England.

The first twenty years of Elizabeth's reign were occupied in consolidating her throne, by averting foreign aggression through the encouragement given by her to the insurgents in each neighboring state, by suppressing disorder and divisions at home, and by promoting Protestant interests at home and abroad. The next twenty years, which terminated with the peace of Vervins, was a period of secret or open contention with Philip of Spain. The execution of the Mary, queen of Scots, 1587, and the defeat of the Spanish Armada, 1588, marked the culmination of this perilous struggle. It was closed by the death of the great minister, lord Burleigh. The last five years of her reign were free from serious apprehensions of foreign dangers, but they were distracted by the disturbances in Ireland, by the treacherous intrigues of the court, and by the ambitious designs of the reckless and unscrupulous Essex. Her whole life was one long succession of hazards, and after all her glories she died lonely, unfriended, and without friends.

Few sovereigns have ever impressed themselves
Pressburg in 1207. When only four years old she was destined by her father to become the wife of Ludwig, oldest son of landgrave Hermann of Thuringia. She was immediately sent to the court of the landgrave, at the Wartburg, where she received some education, and her betrothal was arranged with Ludwig. She early showed a remarkable inclination for ascetic exercises. Several efforts were made that account made to have sent her back to her father, but Ludwig, who in 1215 succeeded her father as landgrave, refused to dismiss her, and in 1221 married her. This marriage, however, did not improve her ascetic manners, and refused all the comforts of life. At the same time, she was indefatigable in all works of charity. She spun and sewed garments for the poor, and, at the time of a famine, fed as many as 300 people daily. Her court was open to all, and Konrad von Marburg, not only encouraged her asceticism, but made her vow absolute obedience, and that, in the case of her husband's death, she would not marry again. Ludwig died in 1227, at Otranto, while taking part in the crusade of emperor Friedrich II. In consequence of the opposition of her mother's family, as well as the courtiers generally, Elizabeth was deprived of the regency during the minority of her oldest son, and her brother-in-law, Heinrich Raspe, assumed the administration of the Landgraviate. Soon Elizabeth, with her son Hermann, and her daughter Agnes, was expelled from the Wartburg, and for a time had to beg in the streets of Eisenach for the necessities of life. At length she found a refuge at one of the castles of her maternal uncle, the bishop of Bamberg. Repeated offers of a second marriage (even from the emperor Friedrich), which were made to her she refused. When the knights who had accompanied her husband returned from the crusade, they compelled Heinrich Raspe to restore to Elizabeth the Wartburg, and the revenue to which she could lay claim as the widow of the landgrave daily. Her confessor, Konrad von Marburg, was appointed bishop of the town of Marburg, with a number of adjoining villages, and an annual income of 500 marks in silver. Elizabeth took up her residence at Marburg in 1229, and again devoted her whole time to asceticism and beneficence. Her confessor Konrad not only continued to be very severe, but several times was Sophen guilty of acts of great cruelty with regard to her. Nevertheless, she declined an invitation from her father to return to him. Exhausted by her ascetic life, she died in a hospital which had been erected by her, Nov. 19, 1231. The fame of her ascetic life had already pervaded all Europe, and a great number of people soon ascribed to her relics a number of miracles, about the details of which there is, however, the greatest discrepancy among the contemporaneous writers, showing how little they rested on careful investigation. No longer than four years after her death, in 1235, she was canonized by pope Gregory IX. In 1236 her relics were transferred with great solemnity to a new church (St. Elizabeth's) which landgrave Konrad erected at Marburg. The emperor Friedrich II placed a golden crown on the head of the saint, and an immense crowd of people, estimated at 200,000, came to see the relics while exhibited to public view. After the Reformation, landgrave Philip, in order not to countenance the veneration of relics, had them removed from the church; subsequently the Teutonic knights obtained permission to send them to various Roman Catholic churches. Her head had rested in the church of St. Elizabeth at Breslau.—See Herzog, Real-Encyklop. iii, 767; Wetter and Welte, Kirch.-Lex. iii, 511; Hoefer, Nouv. Biog. Générale, xv, 875; Justi, Elisabeth die Heilige (Zürich, 1797, 24 ed. Marb. 1836); Schwendener, in such case also professed the hands rested in the church of St. Elisabeth at Breslau.—See Herzog, Real-Encyklop. iii, 767; Wetter and Welte, Kirch.-Lex. iii, 511; Hoefer, Nouv. Biog. Générale, xv, 875; Justi, Elisabeth die Heilige (Zürich, 1797, 24 ed. Marb. 1836); Schwendener, in such case also. The remains of the church are shown in the Schloß. (1893); Montalembert, Vie de St. Elisabeth (Paris, 1845); Simon, Ludwig IV u. sei Gemahlin, die heil. Elisabeth. (Frankf. 1854); Kahnin, Die heil. Elis. in Zeitschrift für Histor. Theol. 1868. See Konrad von Marburg. (A. J. S.)

Elizabethines. (1.) Associations of women whose object it was to imitate the ascetic life and the benevolent zeal of Elizabeth (q. v.) of Thuringia. They did not retire from the world, and only met for prayer and religion for some ascetic education, and the her heretical was betrothed to Ludwig. She early showed a remarkable inclination for ascetic exercises. Several efforts were made on that account made to have sent her back to her father, but Ludwig, who in 1215 succeeded her father as landgrave, refused to dismiss her, and in 1221 married her. This marriage, however, did not improve her ascetic manners, and refused all the comforts of life. At the same time, she was indefatigable in all works of charity. She spun and sewed garments for the poor, and, at the time of a famine, fed as many as 300 people daily. Her confessor, Konrad von Marburg, not only encouraged her asceticism, but made her vow absolute obedience, and that, in the case of her husband's death, she would not marry again. Ludwig died in 1227, at Otranto, while taking part in the crusade of emperor Friedrich II. In consequence of the opposition of her mother's family, as well as the courtiers generally, Elizabeth was deprived of the regency during the minority of her oldest son, and her brother-in-law, Heinrich Raspe, assumed the administration of the Landgraviate. Soon Elizabeth, with her son Hermann, and her daughter Agnes, was expelled from the Wartburg, and for a time had to beg in the streets of Eisenach for the necessities of life. At length she found a refuge at one of the castles of her maternal uncle, the bishop of Bamberg. Repeated offers of a second marriage (even from the emperor Friedrich), which were made to her she refused. When the knights who had accompanied her husband returned from the crusade, they compelled Heinrich Raspe to restore to Elizabeth the Wartburg, and the revenue to which she could lay claim as the widow of the landgrave daily. Her confessor, Konrad von Marburg, was appointed bishop of the town of Marburg, with a number of adjoining villages, and an annual income of 500 marks in silver. Elizabeth took up her residence at Marburg in 1229, and again devoted her whole time to asceticism and beneficence. Her confessor Konrad not only continued to be very severe, but several times was Sophen guilty of acts of great cruelty with regard to her. Nevertheless, she declined an invitation from her father to return to him. Exhausted by her ascetic life, she died in a hospital which had been erected by her, Nov. 19, 1231. The fame of her ascetic life had already pervaded all Europe, and a great number of people soon ascribed to her relics a number of miracles, about the details of which there is, however, the greatest discrepancy among the contemporaneous writers, showing how little they rested on careful investigation. No longer than four years after her death, in 1235, she was canonized by pope Gregory IX. ELKESAITES

and his company died, "the children of Korah died not." See Korah. On the above view, this Elkana becomes the son of Annah (v. v.), grandson of Korah, and father of Elissaph (q. v.). B.C. cir. 1700. See Samuel. A writer in the *Journal of Sacred Lit.* (April, 1852, p. 200), however, proposes to reject both Assir and this first Elkana from the list in Chronicles.

2. Son of Shaul or Joel, being father of Amassai, and sixth in descent from Ebiasaph, son of the foregoing (1 Chron. vi. 25, 36). B.C. cir. 1415.

3. Son of Ahimoth or Mahuth, being father of Zuph or Zophai, and great-grandson of the one immediately mentioned (1 Chron. vi. 26, 35). B.C. cir. 1540. (See Hervey, *Genealogies*, p. 210, 214, note.)

4. Another Kohathite Levite, in the line of Heman the singer. B.C. cir. 1190. He was the fifth in descent from the foregoing, being son of Jeroham, and father of Samuel, the illustrious judge and prophet (1 Chron. vi. 27, 28, 30, 34). Josephus (Ant. v. 10, 2) calls him a man "of middle condition among his fellow-citizens" (τόν ιν μην σωλην). All that is known of him is contained in the above notices and in 1 Sam. i. 1, 4, 8, 19, 21, 23, and ii. 2, 20, where we learn that he was a of a Bethlehemite stock (an "Ephri-thite") of the Levitical tribe of Zebulon, but not being confirmed in the Levitical order, lived at Ramathaim-Zophim in Mount Ephraim, otherwise called Ramah; that he had two wives, Hannah and Peninnah, but had no children by the former, till the birth of Samuel in answer to Hannah's prayer. We also learn that he lived in the time of Eli the high-priest, and of his sons Hophni and Phinehas; that he was a pious man, who went up yearly from Ramathaim-Zophim to Shiloh, in the tribe of Ephraim, to worship and sacrifice at the tabernacle there; but it does not appear that he performed any sacred functions as a Levite. A circumstance quite in accordance with the account which ascribes to David the establishment of the priestly and Levitical courses for the Temple service. He seems to have been a man of some wealth from the nature of his yearly sacrifice, which enabled him to give portions out of it to all his family, and from the costly offering of three bullocks which Samuel brought to the house of the Lord at Shiloh. After the birth of Samuel, Elkana and Hannah continued to live at Ramah (where Samuel afterwards had his house, 1 Sam. vii. 7), and had three sons and two daughters. See Samuel.

5. Another man of the family of the Korhites who joined David while he was at Ziklag (1 Chron. xii. 6). B.C. 1054. From the terms of ver. 2, some have thought it doubtful whether this can be the well-known Levitical family of Korhites; but the distinction there seems merely to refer to residents within the tribe of Benjamin, which included the Levitical cities. Perhaps he was the same who was one of the two doorkeepers for the ark when it was brought to Jerusalem (1 Chron. xiv. 22). B.C. 1045.

6. An officer in the household of Ahaz, king of Judah, and slain by Zichri the Ephraimitie, when Pekah invaded Judah; apparently the second in command under the prefect of the palace (2 Chron. xxvii. 7). B.C. 879. Josephus says that he was the general of the troops of Judah, and that he was merely carried into captivity by "Amaziah," the Israelish general (Ant. ix. 12, 1). See Ahaz.

7. Father of one Ass, and head of a Levitical family resident in the "villages of the Netophathites" (1 Chron. ix. 16). B.C. long ante 596.

Elkaisaites, a sect of Jewish Christians, which sprang up in the 2d century. The origin of the name is uncertain. Delitzsch (in Rudolph u. Guericke, *Zeitschrift*, 1841) derives it from a hamlet, Elkeli, in Galilee. The Church fathers derived it from the name of a pretended founder, Elisia, which name, according to Epiphanius, denotes "a hidden power" (καταπελτής). Elisia is probably not the name of a person, but the name of a book which was the chief authority for this sect. Genselen thinks that the name signifies the Holy Ghost, which in Hom. Clem. xvii, 16, is called ἰδονας ἀνασκες, "the incorporeal power." At all events, the sect held as highest doctrinal authority a book which is brought into connection with Elisia. This book, which appears to have been the chief authority of all the Gnostic sects of Jewish Christians, was known to Origen (Euseb. Hist. Eccl. vi, 38), and the Syrian Alchibades of Apamea brought it with him to Rome. Epiphanius shows its influence among all sects of Jewish Christians. As Origen reports, this book was believed that you had fallen from heaven; according to an account in the *Philosophoumena*, it was revealed by an angel, who was the Son of God. Elisia is said to have received it from the Seri, in Parthia, in the third year of Trajan (A.D. 101), and its contents were communicated to no one except upon an oath of secrecy. Mitschi puts the origin of the book in the last third of the second century, while Uhlhorn thinks that it must have originated soon after the beginning of the second century, as it served as the basis of the doctrinal system of the Clementine Homilies, which were nearly completed about A.D. 150.

The third book of the apocryphon of the Elkai-saites is to be found in the *Philosophoumena*, and its main points are confirmed by the statements of Origen. Epiphanius, as usual, is somewhat confused in his exposition of the sect, and his report seems in many points to refer to a modified, and not the original system. According to that *Philosophoumena* was in the Elkaisaites system a pagan element of naturalism, mixed with Jewish and Christian elements. The pagan element shows itself in particular in the abominations. A remission of sins is proclaimed upon the ground of a new baptism, consisting without doubt in off-repeated abominations, which were also used against sickness, and were made in the name of the Father and the Son. In connection with these abominations appear seven witnesses—the five elements, and oil and salt (also bread), the latter two denoting baptism and the Lord's Supper. The same pagan elements are to be found in the use made by the Elkaisaites of astronomy and magic; even baptismal days were fixed in accordance with the position of the stars. The Jewish element appears in the obligatory character of the law, and in circumcision. They rejected, however, sacrifices, and also the Jewish calendar (the Old and New Testaments, the latter, the Pauline epistles). Their views of Christ seem not to have been settled. On the one hand, their Christ is described as an angel; on the other, they taught a repeated, continuous incarnation of Christ, although his birth of a virgin seems to have been retained. The Lord's Supper was celebrated without meat and salt; the eating of meat was forbidden; marriage was highly esteemed; renunciation of the faith in time of persecution was allowed. A prayer, which is preserved by Epiphanius (xix, 4), is entirely unintelligible.

The Elkaisaites doctrine probably arose among the Jewish Christians, who, in the neighborhood of the Dead Sea, consoled with the Essenese, and were to some extent influenced by Oriental paganism. Under bishop Callistus of Rome, a certain Alchibades of Apamea went to that city as an Elkaisaites missionary, in 274 Origen met a missionary of the sect at Cæsarea. These efforts appear, however, to have met with but little success. The Clementine Homilies contain a further development of Elkaisaites doctrines, with a stronger predominance of the Christian element. At the time of the emperor Constantius, Epiphanius found Elkaisaites in Caesarea, Tabulae, Itermus, and Mabitis. He calls them Σαραπίτον, who name he explains as ἱδονας, and therefore seems to have derived from καταπελτής, "sun." From the cir-
el'koshite (Heb. 'elkōši, אֵלַּקֹשִׁע, the regular patristic form; Sept. Ἔλκοσος, Vulg. Elcosus), an epiteth (Nah. i. 1) of the prophet Nahum (q. v.), apparently as an inhabitant of Elkosh (q. v.).

El'kasar (Heb. El'kasār, אֵלַּקָּסָר), a fortress in Assyria, whose king, Arioch, was one of the four who invaded Canaan in the time of Abraham (Gen. xiv. 1). The association of this king with those of Elam and Shinar indicates the vicinity of Babylonia and Elam in the region in which the kingdom of Assyria would but could not exist on the Hebrew map. But unless it be the same as Thelasar mentioned in 2 Kings xix. 12, the Telassar of Isa. xxxvii. 12, Sylmachus and the Vulg. understand Pontus. The Jerusalem Targum renders the name by Teleasar. The Assyro-Babylonian name of the king Arioch (q. v.) would seem to point to some province in Mesopotamia. (A.S.J.)

El'kōsh (אֵלַּקֹשִׁי, i.e. God is its box, see Fürst, Heb. Handb., i. v.) the birthplace of the prophet Nahum, hence called "the Elkoshite" (Nah. i. 1). Two wildly differing Jewish traditions assign as widely different localities to this place. In the time of Jerome it is said to exist in the village of Galilee. The ruins of some old buildings were pointed out by his guide as the remains of the ancient Elkōsh (Jerome, on Nah. i. 1). Cyril of Alexandria (Comm. on Nahum) says that the village of Elkosh was somewhere or other in the country of the Jews. Ps.-Ezechiel, Prophetikon (Le Vite prophetocorum; in his Opp. ii. 247) places Elkosh on the east of the Jordan, at Betharba (sic Bryloph, Chron. Pasch. p. 150, Cod. B, has sic Bætharba), where he says the prophet died in peace. According to Schwartz (Palestine, p. 188), the grave of Nahum is shown at Keis Tanchum, a village 23 English miles north of Tiberias. A village of the name Elkauzah is found about 24 hours S.W. of Tibnin, which seems to correspond with Jerome's notice. Another village of that name, also an ancient site, lies on a high hill rather more than 2 hours S. of Nablous (Van de Velde, Memoir, p. 309). But medieval tradition ascribes to it a consecration for the conveniences of the main Jewish, attached the name of the prophet's burial place to Elkouz, or Elkōsh, a village on the east bank of the Tigris, near the monastery of Rabban Hormuzd, and about two miles north of Mosul. It is situated on a low, fairly well drained land, and the village contains about 30 Greek Nestorians (London, July, 1852, p. 460). Benjamin of Tudela (p. 55, ed. Asher) speaks of the synagogues of Nahum, Obadiah, and Nahon at Assur, the modern Mosul. R. Petachia (p. 55, ed. Benisch) was the prophet's grave, at a distance of four parasangs from that of Baruch, the son of Neriah, which was itself distant a mile from the tomb of Ezekiel. It is mentioned in a letter of Masius, quoted by Asseman (Bibl. Orient. i. 325). Jews from the surrounding districts make a pilgrimage to it at certain seasons. The synagogue which is built over the tomb is described by Colonel Shiel, who visited it in his journey through Kurdistan (J. A. G. S. viii. 93). Rich evidently believed in the correctness of the tradition, considering the pilgrimage of the Jews as almost sufficient test (Kurdist. Bayle, p. 367). Nevertheless, however, he was not extremely confident (Vincke, i. 197). Gesenius doubts the genuineness of either locality (Theb. Heb. p. 1211 b). The tradition which assigns Elkōsh to Galilee is more in accordance with the internal evidence afforded by the prophecy, which gives no sign of having been written in Assyria (Kohn, Precis, ii. 299; Hitzig, Ez. Proph. p. 212; Edwards, in the Bibliotheca Sacra, Aug. 1848, p. 557 sq.) See Nahum.
ELLERIANS 167

ELLIS

her first marriage, believed this announcement, and the unfortunate woman was consequently subjected to the almost indescribable tribulations that her fate brought her. About six months, when death put an end to her sufferings. Almost immediately after her burial Eller married Anna von Buchel. His society was now deemed sufficiently strong to appear in public. Eller maintained, in union with the prophecies of Professor Horch in Marburg, the belief that his beloved Sardis would cease in 1729, and the Church of Philadelphia begin in 1730. The revelations and visions of his wife increased rapidly. What she announced as a new revelation was laid down in a writing, which was associated to the initiates under the name of the "Hirtenacle" ("The Shepherd's Bag"). The chief points of the new doctrines were, the Bible is the Word of God, but a new revelation has become necessary, and this is laid down in the Hirtenacle. Not only the ancient saints, but the Switzerland itself, will reappear upon earth. The person of the Father dwelt in Abraham, the person of the Son in Isaac, the person of the Holy Ghost in Sarah, but the fullness of the Deity in Eller. Moses, Elias, David, and Solomon were prototypes both of Christ and of Eller. The children of Anna were not the lawful children of Eller, but the works of God by himself. The faithful, whose number had largely increased, were divided into three classes. To the first class belonged those who expressed belief, but were not yet made acquainted with all doctrines and secrets; to the second those who, being initiated, were called in the "Parsons of the Saviours" ("Parsons von der Gesechenese"); to the third, the most trustworthy among the initiated, who had reached the temple, and were called "gifts" ("Geschenke"). The society believed that from Anna the Saviour would be born a second time, and there was some doubt as to whether her first child was a daughter. Her second child, born 1730, was a son, Benjamin, and he was believed by the sect to be the Saviour, manifested a second time in the flesh, but he died when only a year old. Eller, in the mean while, had sent out missionaries throughout Germany, Switzerland, and Scandinavia, but the investigations which in 1735 were made in Ellerfeld concerning the meetings held by him induced him to depart in 1737, with his family, for Ronsdorf, his native place. Many of his adherents followed him immediately, and fifty new houses arose in Ronsdorf in a short time. The money the sect had collected by Eller was now used to build the new church to be built in Ronsdorf, and in 1741 Schlieermacher was called as pastor. Eller himself was elected burgomaster, and soon established a theocratic despotism. His wife Anna died in 1744, in a mysterious manner, and Eller proclaimed that all the supernatural gifts which had been possessed by Anna had been transferred to him. But now Schlieermacher began to lose his faith and even to oppose Eller, who, however, to neutralize the sermons of Schlieermacher, caused one of his most fanatical adherents, Pastor Wulffing, of Solingen, to be called as second pastor. In 1749 Eller married the widow of a rich merchant at Ronsdorf, Besselmann, who had died under suspicious circumstances; and in the same year he procured the removal of Schlieermacher from his position of first pastor, and the election of Pastor Besselmann, of Rentingen, to succeed him. Schlieermacher, who had been a fanatical adherent of the sect, as his successor. Schlieermacher was, even after his departure from Ronsdorf, persecuted by Eller, who lodged with the government a formal charge of sorcery against him; and so great was still Eller's influence, that Schlieermacher determined it best to flee to Holland. Eller died on May 16, 1750, and soon after him died also Wulffing. After the death of these two men the sect seems to have soon become extinct. Schlieermacher's innocence was, chiefly owing to the efforts of his friend J. W. Knevel, fully established by the declarations of the theological faculties of Marburg and Herborn, and the Synod of Berg. This fanaticism singularly resembles that of the Buchanians (q.v.). See Herzog, Real-Encyklop., xx, 606; Knevel, Gräuel d. Verweisung an heil. Stätt. od. d. Geheimnisse der Ros- heit d. Rosendorfer Stekte (Frankf. 1750); Wulffing, Rosendorffscher Catachismus (Düsseldorf, 1750); Joh. Bolckhaus (step-son of Eller), Rosendorfs gerechte Sache (Düsseldorf, 1752); Den nachgelassenen Schriften (compiled by Wulffing, but edited by Bolckhaus, Mül-heim, 1761); Wulffing, Rosendorfs silberne Trompete (Mülheim, 1761); Engels, Versuch einer Gesch. d. reichs. Schröderner im ehemal. Herzogthum Berg (Schwein, 1825); Henglein, Flugblatt § 421. The Hirtenacle may be found in the Historie der sechs Religions (A. S. J.).

ELLERIANS. See Eller.

Elliott, Arthur W., a Methodist Episcopal minister, was born in Maryland in 1874; emigrated to Butler Co., Ohio, in 1880, and was converted in 1886. In 1818 he entered the itineracy, and rapidly rose to eminence and usefulness. He filled many important charges in his Conference until his health failed. He was supernumerary eight years, and superannuated seventeen during his ministry. In 1854 he removed to Paris, Ill., where he died in January, 1888. Mr. Elliott had a "wonderful power over the multitude, and thousands of souls will call him blessed in eternity." - Minutes of Conference, 1868, p. 310.

Elliott, Charles. See p. 1042 of this vol.

Elliott, John, D.D., a Congregational minister, was born at Killingworth, Conn., Aug. 24, 1768, graduated at Yale College 1786, entered the ministry 1791, and was installed pastor in East Guilford Nov. 2, 1791, in which place he remained until the close of his life, Dec. 17, 1844. Dr. Elliott was made fellow of Yale College 1812, and one of the prudential committee 1816. He published An Oration on the Death of Thomas Lewis (1804), and a few sermons.—Sprague, Annaled, ii, 521.

Elliott, Stephen, D.D., Protestant Episcopal bishop of the diocese of Georgia, was born in Beaufort, S. C., Aug. 8, 1806. At sixteen he entered the sophomore class at Harvard University, but returned during the junior year to South Carolina College, Columbia, where he graduated A.B. in 1826. In 1827 he engaged in the practice of law. "In 1832, under the pressure of a newly-awakened devotion to the cause of Christ, he abandoned the law, and became devoted to the work for holy orders. He was ordained by bishop Bowen in 1836, served as deacon one month in the church at Wilton, and was then elected professor of sacred literature and the evidences of Christianity in the South Carolina College. Five years later he was chosen first bishop of Georgia. He was consecrated bishop Feb. 21, 1841, removed to Savannah, and became rector of St. John's Church. In 1844 he became provisional bishop of Florida. In 1845 he removed to Montpellier, to direct in person the work of female education. Here he spent about seven years of his life, and, like many other bishops, expended his whole fortune in the noble effort. In 1853 he removed to Savannah, and took charge of Christ Church in that city as rector. This office he continued to hold, with the exception of one brief interval, till his death. His numerous home duties did not hinder his visitation of his diocese once each year, often much more frequently. But two hours before his decease he had returned, in cheerfulness and apparent health, from one of those long episcopal journeys. Instantly, not to him 'suddenly,' in the midst of his labors, and at the height of his power,' he received at Savannah, on Friday, April 16, 1866. — Amer. Quart. Church Review, April, 1867, and April, 1868.

Ellis, Reuben, an early Methodist Episcopal minister. The dates of his early life are wanting. He was a native of North Carolina, entered the itineracy in 1777, and died in Baltimore February, 1796. "His
was a man of very sure and solid parts, weighty and powerful in preaching, and full of simplicity and godly sincerity."—Minutes of Conferences, i, 67; Stevens, History of Methodist Episcopal Church, p. 59 et al.

Ellis, Robert Fulton, a Baptist minister, was born at Topsham, Me., Oct. 16, 1809; studied at Bowdoin College, and at Newton Theological Institution, where he graduated in 1838. He was pastor of the Second Baptist Church in Springfield, Mass., from 1838 to 1845. He then spent two and a half years in the State of Missouri, preaching, establishing Sunday-schools, and furnishing them with libraries. In 1847 he became pastor of the First Baptist Church of Alton, Ill., but, becoming associate editor of the Western Watchman, published at St. Louis, Mo., he again took an itinerant agency in that state, and, while thus employed, he died, July 24, 1854.—Sprague, Annals, vi, 827.

Elhora, a decayed town in the dominions of the Nizam, not far from the city of Dowlatabad, in lat. 20° 2' N., and long. 75° 18' E., which are in this respect the most noted even in India. It is celebrated for its wonderful rock-cut temples. Their number has not been precisely ascertained, but Erskine reckoned 19 large ones, partly of Hindu and partly of Buddhist origin. Some are cave-temples proper—i. e. chambers cut out in the interior of the rock—but others are vast buildings hewn out of the solid granite of the hills, having an exterior as well as an interior architecture, and being, in fact, magnificent monoliths. In executing the latter, the process was first to sink a great quadrangular trench or pit, leaving the central mass standing, and then to hew and excavate this mass into a temple. The most beautiful of these objects is the Hindu temple Kailasa. At its entrance the traveler passes into an antechamber 138 feet wide by 88 deep, adorned by numerous rows of pillars. Thence he proceeds along a colonnade over a bridge into a great rectangular court, which is 247 feet in length and 150 broad, in the centre of which stands the temple itself, a vast mass of rock richly hewn and carved. It is supported by four rows of pilasters, with colossal elephants beneath, and seems suspended in the air. The interior is about 138 feet long, 56 broad, and 17 high, but the entire exterior forms a pyramid 100 feet high, and is overlaid with sculpture. In the great court are numerous ponds, obelisks, colonnades, sphinaxes, and on the walls thousands of mythological figures of all kinds, from ten to twelve feet in height. Of the other temples, those of Indra and Dumarzeyna are little inferior to that of Kailasa. Regarding their antiquity and religious significance, authorities are not agreed; but at all events they must be subsequent to the epic poems Ramayana or Mahabharata, because they contain representations taken from these poems, and also to the cave-temples at Elephants, because they exhibit a richer and more advanced style of architecture.

Ellis, Anthony, bishop of St. David's, was born in 1638. He was educated at Clare Hall, Cambridge, where he took his master's degree in 1716. In 1724 he was presented to the vicarage of St. Olave, Jewry, and to the rectory of St. Martin's, Frommonger's Lane. In 1725 he obtained a prebend of Gloucester, and in 1728 was created D.D. at Cambridge. He was next promoted to the bishopric of St. David's, and died at Gloucester in 1761. His writings are as follows:—1. A Plea for the Sacramental Text:—2. Remarks on Hume's Essay concerning Miracles, and sermons preached on public occasions (4to):—3. Tracts on the Liberty, Spiritual and Temporal, of Protestants in England (1767, 4to):—4. Tracts on the Liberty, Spiritual and Temporal, of Subjects in England: the last-mentioned are collections of tracts, and form one great and elaborate work, which was the principal object of the bishop's life. They were published posthumously.—Hook, Eccles. Biography, vol. iv; Kippis, Biographia Britannica, v, 581.

Elm stands in the Auth. Ver., as the translation of אֶלֶחְ, elah', in Hos. iv, 13; elsewhere rendered "oak" (q. v.).

El'mo'dam ('Elμωδαμος; perhaps for Ἄλμωδας, Almodad, son of Er and father of Cosam; one of the ancestors of Christ, in the private line of David, and great-grandfather of Masseiah, the great-grandfather of Salathiel (Luke iii, 28). B.C. cir. 700. He is not mentioned in the Old Test.
Eln'ā'am [many El'na'am] (Heb. Elna'am, אֶלְנָאָם, in prose בְּנֵי הָיָם, God is his delight; Sept. 'Elā'ām v. r. 'Elādā, Vulgate Elainam) father of Jerahme and Joshua, two of David's distinguished warriors (1 Chron. xi, 46). B.C. 1044. In the Sept. the second son is said to be the son of the first, and Elnaam is given as himself a member of the guard.

Elnā'than [some El'nathan] (Heb. Ebnaathan, אֶבְנָאָתָן, 2 Chron. xi, 23, whom God has given; compare John, Theodore, Didimus), the name of four leading men.

1. An inhabitant of Jerusalem, father of Nehuha, the mother of King Jehoshachin (2 Kings xxiv, 6, Sept. 'Elānāv v. r. 'Elānāv, אֶלְנָאָב). B.C. 628. He was perhaps the same with the son of Achbor, sent by Jehoiakim to bring the prophet Urijah out of Egypt (Jer. xxvi, 22, Sept. 'Elānāv, אֶלְנָאָב), and in whose presence the roll of Jeremiah was read, for the preservation of which he interceded with the king (Jer. xxxvi, 12, 25, Sept. Naānāv יְנָאָב). B.C. 605.

2, 3, 4. (Sept. 'Elānāv, Naānāv, and 'Elānāv respectively.) Three of the Israelites, of established lineage and integrity, sent by Ezra to invite the priests and Levites to accompany him to Jerusalem (Ezra viii, 16). B.C. 459.

Elohim is the Heb. plural (Elohim, אֶלֹהִים), of which the sing. form, Eloah, אֱלֹהַ, is also employed to designate in general any deity, but likewise the true God. The word is derived, according to Gesenius (Thes. Heb. p. 94), from an obsolete root, gādāh, to recover, but is better referred by Fürst (Heb. Bande, p. 90) to the kindred Ŝā (see E'L), the name of God as mighty (from the extensive root Šār or Šār, to be firm), and has its equivalent in the Arabic Allah, 1. e. God. The plur. Elohim is sometimes used in its ordinary sense of gods, whether true or false (s. g. of the Egyptians. Exod. xii, 12; xxxii, 1, 4; Deut. xx, 18; xxxii, 17; including Jehovah, Psa. lxxxii, 8; Exod. xviii, 11; xxxii, 10; or distinctively of actual deity, Isa. xlv, 6; xlvi, 5, 14, 21; xlv, 1; 1 Chron. xiii, 9; once of kings (Psa. lxxxii, 1, 5); but Gesenius thinks not of angels (Psa. viii, 6; xcvii, 7; xcviii, 1), nor judges (Exod. xvi, 6; xxii, 7, 8). But it is especially spoken of one true God, i. e. Jehovah, and in this sense it is always construed as a sing., especially when it has the article prefixed (ה' אלהים). See Sach, Comment. theat. hist. (Bonn, 1821), 1; Reinhard, Allgemeine Bibelgeschichte, etc. (Viehm. 1772); Edward, Vitrvm 'Elohim' a Compendium of Sacred Antiquities (2d ed. 1806); Lind, Num Deus discort dum inae sinde (ib. 1723); Semnert, Excerpt. philol. (ib. 1678). Comp. God.

Elōhat, the name technically given in theology and sacred criticism to the assumed authors of those parts of the Pentateuch (q. v.) in which the Deity is styled Elohim rather than Jehovah (q. v.).

Elo'li (אֶלוֹלִי for Aramean אָלֹלִי, my God), an exclamation quoted thus by our Saviour (Mark xvii, 34) as the cry of a man from Psa. cxii, 2 (where the Sept. has 3 יָלִי, which is more literally Grecised ἐλιύ, Ely, by Matthew (xxvi, 46). E'lon, a name occurring in two forms in the Heb. (but both having the primitive sense of oak (q. v.), as that of a place, and also of three men.

1. (Heb. Elo'lon, אֶלוֹלָן, Sept. 'Elōlon.) A city of Dan, mentioned between Jethlah and Timnah (Josh. xix, 43); probably the same elsewhere (1 Kings iv, 9) more fully called Elnon-Beth-hanan (q. v.).

2. (Heb. Elo'lon, אֶלוֹלוֹן and יָלֹלָן, Sept. 'Elōlon and Ḥoli,) A Hittite father of Bashasham (Gen. xxxvi, 34) or Adah (Gen. xxxvi, 35), the first wife of Zasu (q. v.). B.C. ante 1653.

Elnos bēt-hānān [some Elnon- betha'man] (Heb. Elo'lon-beth-Ḥanan, אֶלוֹלָן בְּתֵי חָנָן, oak of Beth-hanan, i. e. of the house of Hanan; Sept. 'Elōlon v. r. 'Alōlonו is Βηθάναν, Vulg. Elon et in Beth-hanan), one of the Danite cities in the commodi- district of Ben-Dekar, the third of Solomon's survey- ors (1 Kings iv, 9). It is simply called Elon in Josh. xix, 42, being probably a site marked from early times by a particular tree (see Oak) of traditional fame. For "Beth-hanan" some Hebrew MSS. have "Ben- hanan," and some "and Beth-hanan;" the latter is followed by the Vulgate. To judge from the order of the list in Joshua, its situation must have been on the border of the territory of Ashbon and Elon, and the noun suggests (Exeg. Handbook., in loc.) that Beth-hanan can be no other than the village Beth-Hummus, in the rich plain near Gaza (Robinson, Researches, ii, 571); but this is entirely out of the region in question. Possibly it may be the modern Beih-Shub, a "small village, looking old and miserable," on a ridge near an ancient well, about half way between the sites of Niconopolis and Zorah (Robinson, Later Researches, p. 152).

E'lonite (Heb. with the art. and collectively, ha'Elomī, אֵלֹמִי; Sept. 'Elūlōn, the patronymic designation (Num. xxxvi, 29) of the descendants of Elnon (q. v.), the son of Zebulun.

Eloquence of the Pulpit. See Homiletics.

E'loth (Heb. Elo'loth, אֵלוֹלֹת, trees; Sept. 'Alōlōth, in Chron. Alōlōth), another (plur.) form (1 Kings ix, 26; 2 Chron. viii, 17), 2) of the name of the city Eloth (q. v.).

E'ilpa'al [many El'pa'el] (Heb. Epa'al, בֵּאוֹר, in pause בֵּאוֹר, God is his wages; Sept. 'Alpa'ath and 'Epa'ath), the second named of the two sons of Shabrah (a descendant of Benjamin residing in the region of Moab) by his wife Hushim, and progenitor of a numerous posterity (1 Chron. vii, 12, 18). B.C. cir. 1618. The Bene-Epaal appear to have lived in the neighborhood of Lydda (Lod), and on the outposts of the Benjaminite hills as far as Ajalon (viii, 12-18), near the Danite frontier.

E'lpa'let [many El'pa'let] (Heb. Elpa'lēt, אֶלֶפָלֶט, in pause Elpa'let, אֶלֶפָלֶט, God is his wages; Sept. 'Alpa'ath and 'Epa'ath), a contracted form (1 Chron. iv, 6) of the name Eliphaleth (q. v.).

E'ilpa'aran [many El'paran] (Hebrew Epa'aran, bgColor=

Eilahus. Eilahus, WILIAM, was born at Glasgow in 1481, studied in the university of that city, and obtain-
ed the rectory of Kirkmichael. He subsequently was professor of civil and canon law at Paris and Orleans for nine years, and on his return (1471) was appointed rector of the University of Glasgow. He afterwards became successively member of Parliament and of the Privy Council, ambassador of James III to France, and bishop of Ross, from whence he was transferred to Aberdeen in 1484. As bishop of Aberdeen he was twice sent on a diplomatic mission to England. In 1488 he was for several months lord chancellor of the kingdom, and subsequently, on returning from an embassy, was appointed to the office of lord privy seal. He secured the foundation of the University at Aberdeen, for which pope Alexander VI gave a bull dated Feb. 10, 1494. King's College was in consequence erected in 1506, and Elphinston contributed 10,000 pounds Scots towards it, and the building of a bridge over the Dee. He died October 26th, 1514, while negotiations were pending with the court of Rome for his elevation to the primacy of St. Andrew's. He wrote a book of canons, the lives of some Scottish saints, and a history of Scotland, which is preserved among Fairclay's MSS. in the Bodleian Library. - Biography, Eccles. Biography, vol. iv; Oudin, De Script. Eccles. iii, 2670.

Elphias ('Elyfias, hope'), one of the wives of Herod the Great, who had by her and another wife Pherada two daughters, Roxana and Salome (Josephus, Ant. xvii, 1, 8; War, i, 28, 4).

Elrington, the Right Rev. Thomas, lord bishop of Leighlin and Ferns, obtained a scholarship in the University of Dublin in 1778, and in 1781 was elected fellow. In 1784 he was appointed Donellan legateur at his alma mater; in 1796, professor of mathematics; and in 1806, rector of Atraloe, in the county of Tyrone. In 1811 he was raised to the highest literary rank in Ireland by appointment as provost of Trinity College. This position he held with high credit to himself until 1820, when he was consecrated bishop of Limerick. In 1822 he was transferred to the see of Leighlin and Ferns. He died in 1885. Besides editing several of the classics, he published his lectures delivered while Donellan lecturer: "The proof of Christianity derived from the miracles recorded in the New Testament," under the title, Sermon preached in the Chapel of Trinity College, etc. (Dublin, 1796, 8vo);-Reflections on the Appointment of Dr. Milner as the Political Agent of the Roman Catholic Clergy in Ireland (1809, 8vo);-The Clergy of the Church of England truly ordained (1809, 8vo);-Reflections on some polemical writings.- used Biblical and Ominary, xx (1886);-Darling, Cyclopaedica Bibliographica, p.1084-5.

Elzlar, Jacob, D.D., was born at Saulfield, Prussia, in March, 1692. He studied at the University of Könisberg, and in 1715 became "conrector" of the reformed school in that city. Two years later he visited Utrecht and Leyden. In 1729 he was appointed professor of theology and philology at Bingen; in 1722, rector and first professor of the Joachimsthal Gymnasium at Berlin. Subsequently he became pastor at one of the Berlin churches. From 1742 to 1744 he was director of the class of belles-lettres at the Royal Society. He died Oct. 6, 1750. His principal works are: Observationes sacrorum in novi testamenti libros (Trsl. 1720-1728, 2 vols. 8vo);-Comm. sacros philologici in evang. Mathaei (Zwolle, 1767-69, 2 vols. 4to);-Commentarius in evang. Marci (Trsl. 1788, 4to).-Darling, Cyclopaedica Bibliographica; Doering, the gelehrten Theolog. Deutschland, i, 866; Hoenfer, Neue. Bibl. Gén. viii, 319.

Eltekeh [some 'Elte'ka'] (Heb. 'Eltekeh), "God is it," i.e. object of awe; but 'Eltekeh' is used (Heb. 11, 23; Josh. xxii, 5; 1 Sam. x, 11; 1 Sam. xii, 12; Josh. xxii, 5; 1 Sam. x, 11; 1 Sam. xii, 12; Josh. xxii, 5; 1 Sam. x, 11; 1 Sam. xii, 12) and mentioned between Ezron and Gibeon (Josh. xii, 44).

With its "suburbs" it was assigned as a city of refuge and Levitical city to the Kohathites (Josh. xiii, 23); but it is omitted in the parallel list (1 Chron. vi). The site is possibly now represented by El-Mansurah ("the victorious"), "a miserable little village" near a copious spring, in the plain between Nazareth and Akir (Robinson, Researches, iii, 21). Schwartz (Palest. p. 111) confounds Eltekeh with Ellekon, and locates both at a village which he calls "Alhness, far from Bellin (Baalath)."

El'tekon [some 'El'tekon'] (Heb. Ellekon), "God is its foundation; Sept. 'El'tekon v. r. 'El'tekon and 'El'tekon, Vulg. Ellekon, a city of Judah, in the mountain-district, mentioned last in order after Maarah and Anah (Josh. xv, 59), being in the group north of Hebron (Keil, Comment. in loc.). See JEHAD. It is perhaps identical in site with the present Beit-Sakur al-'Akab, a little S.E. of Jerusalem. See ELTEKON. It is perhaps the Alaq mentioned in the Assyrian inscriptions. See EZRAH.

El'tolad [many 'El'tolad] (Heb. Eolah), "God is it," perhaps meaning God is its race or posterity; but, according to First (Hebr. Hamese. s. v.), whose God is Melech, the Phcenician deity (comp. MOLEDAH); Sept. 'El'tolad and 'El'tolad, r. 'Erahel and 'Erebel (Vulg. Eolah). A city in the south of Judah, mentioned between Azem and Cheesh (Josh. xv, 29), but afterwards assigned to Simeon, and mentioned between Azem and Bethul (Josh. xix, 4). It remained in possession of the latter tribe in the time of David (1 Chron. iv, 29, where it is called simply TOLAD). It is possibly the ruined site Tell-Melah, observed by Van de Velde (Memoir, p. 115) along the N branch of wady Sherah, which empties into the Mediterranean a little S of Gaza.

En'ul (Heb. Enhul), ' unh, Neh. vi, 15; Sept. 'Eolah, also in 1 Macc. xiv, 27; the Macedonian Eunamaios) is the name of that month which was the sixth of the ecclesiastical, and the twelfth of the civil year of the Jews, and which began with the new moon of our August or September, and consisted of 29 days. Several unsatisfactory attempts have been made to find a Syro-Arabian etymology for the word, as it occurs in a similar form in both these languages (see Gesenius, Thes. Hebr. p. 100); but the most recent derivation, that of Benfey, deduces it, through many communications and mutations, from an original Zend form Anamait (Monumenten, p. 126). According to the Talmud, the following are the days devoted to religious services. See CALENDAR.

1. The new month. The propitiatory prayers are commenced on the last day of the old month, and service after the new moon.

2. The festival of the dedication of the walls of Jerusalem by Nebuchadnezzar.

3. A fast because of the death of the spies who brought up the evil report of the Land of Promise (Num. xiv, 8, 35).

4. The festival of wood offering (Euphhorbia). According to others, this occurred during the previous month.

5. A fast in memory of the punishment of the wicked and incorrigible Israelites.

6. This is the last day of the month, on which the Jews reckoned up the beasts that had been born, the tenth of which belonged to the king. They chose to do this on the tenth, because the first day of the month Tirst was a festival, and therefore they could not kill a flock on that day.

El'tuna ("One", apparently for the Aramaic 'el'un) see Jerome, Comment. in Exa. xv, 4), an ancient city of Idumea, frequently mentioned by writers of the fourth and sixth centuries (see the citations in Reland, Palaeis, p. 755) as an episcopal city of the Third Palestine (Concil. Grœ. iii, 445); the Elsya of the Peutinger Table, 71 Roman miles S. of Jerusalem. (Bitter, Erdk. xiv, 120; recognised by Dr. Robinson (Bib. Rev. i, 296 sq.) as the present ruins el-Khalilwek, 5 hours S.S.W. of Hierapolis, on the way to Egypt, and consisting of walls, a fine well, and includes sufficient to have contained a population of 15,000 or 20,000.)
persons (see also Stewart, Tens & Kohn, p. 296). See also CHELSEA.

ELUZAI (Heb. Ēlûzây, "God is my praise," i.e. object of praise; Sept. Ἐλοὺζαί v. r. A'oz, Vulg. Eluza), one of the Benjamite warriors who joined David at Ziklag (1 Chron. XII, 6). B.C.

ELVIRA, COUNCIL OF (Concilia Elber równum or Êlberânim; town of Elvira (or Illiberi, Hiliber, or Liberi)), in the Spanish province of Béstica. The town, which no longer existed, was situated not far from the modern Granada. That it was not Illiberia, in Galilia Narbonensis, is shown by the fact that all the signers were Spanish bishops. The council was held at the bishop of Seville in the middle of the fourth century, but the year (308, 805, 809) is uncertain. Some of the early Protestant writers (as the authors of the MagdeburgCollections) inferred, from the resolutions concerning pictures and the lighting of candles, that the synod took place as late as the year 700; but this view was abandoned. The Synod of Elvira is the most ancient among those of which all the canons (eighty-one) are extant. It was attended by nineteen bishops, among them Hocius of Cordova, and twenty-six priests. Some of the canons of the council of Seville were probably also present.

ELVIRA: The Synod was strongly influenced by the influence of Novatian and Montanist principles. The most important of the resolutions were, 1. depriving of communion, i.e. of absolution, even in death, those who, after baptism, have voluntarily sacrificed to idols; 8, relaxing the penalty in canon 1 in favor of those who, after baptism, have voluntarily offered a present to the idol. It allows of admitting such to communion at the point of death, if they have undergone a course of penance; canons 6 and 7 forbid communion even at the point of death to those who have caused the death of another maliciously, and to adulterers, who have also undergone a course of penance; 12 and 13 forbid communion even in death to mothers who prostitute their own daughters, and to women who, after consecrating themselves in virginity to God, forsake that state; 15 prohibits the clergy from the use of marriages; 94 prohibits the lighting of candles during day but they are permitted at night; for the spirits of the saints must not be disturbed; 96 declares that pictures ought not to be in a church, lest the object of veneration and worship be depicted upon walls; 63 and 64 forbid communion even in death to adulterers, who have willfully destroyed their children, or who abide in a state of adultery up to the time of their last illness; 65 forbids communion even in death to one who has falsely accused of a crime a bishop, priest, or deacon. The canons may be found in Mansi, ii. 2 sq., and in Routh, Reliquiae, vol. iv. Special treatises on the canons were written by the bishop Ferdinand de Mendoza (De Confirmandis concil. Liberen- ricas, in Mansi, i. c.), and bishop Aubeespine of Orleans (Mansi, i. c.). The canons, together with some explanatory remarks, may also be found in the Tubingen Theol. Quartalsb., 1821, p. 1-44.—Hertog, Real-Encyclop. iii, 773; Wettstein, u. Weisbach, Bekenntnisse, iii, 548; Gams, Kirchenlexicon, in Spanien, Hefele, Concilien geschichte, i, 122 sq. (A. J. S.)

ELZAI, ELZARAI. See ELZAIATI.

ELY, EDEA STILES, D.D., a Presbyterian (O. S.), was born in Lebanon, Conn., June 18, 1786. At twelve years of age he made a profession of religion. He graduated at Yale College in 1803. His theological studies were pursued under his father, the Rev. Dr. Ely, who was ordained as pastor of the church in Colchester, Conn., which he left some time after to become chaplain in the New York City Hospital. In 1811 the Old Pine Street Church, Philadelphia, became vacant. Its pulpit had been filled by the most eloquent ministers of the day, and it was necessary to choose a man of commanding intellect and power. The choice fell most wisely upon Dr. Ely. He entered upon his field of labor with earnestness. He was the principal founder of the Jefferson Medical College. He was stated clerk and moderator of the General Assembly in 1825 and 1828, and was constantly engaged in works of charity and schemes of benevolence. In 1834 he conceived the plan of establishing a college and theological seminary in Missouri. He entered into this with great zeal, and for a while with success, but the crisis of 1837 made it a failure. In this enterprise he lost his large fortune, and returned to Philadelphia a poor man—his intellect and oratorical powers unimpaired—but failed to receive that degree of attention he commanded when in Illinois. He was a member of the board of the Ecumenical Church in Northern Liberties, Philadelphia, where he labored until prostrated by paralysis in 1851. He lingered ten years, his intellect being so impaired as to preclude activity of any kind. He died June 18, 1861. He published Memoir of the Rev. Z. Ely (his father);—Collatitarian Bible, or Key to the Holy Scriptures (in connection with Bedell and M'Corkle);—Ely's Journal:—Sermons on Faith;—Visits of Mercy. He was also editor of The Philadelphiaian.—Wilson, Prefx., Historical Almanac, 1862.

Ely, so called from a Saxon word, elag, an ool, or heel, a large town in the parish of Lynn in the ten country of Cambridgeshire called the Isle of Ely. Pop. about 6000.

Ely Cathedral.—About the year 673, Etheldreda, daughter of the king of East Anglia, and wife of Os- wy, king of Northumberland, founded a monastery here, and took on herself the government of it. A new church was built in 1061, which was consecrated into a cathedral, and the abbey erected into a see in 1109. The possessions of the abbey were divided between the bishop and the community. Among the celebrated names connected with Ely are abbots Thurstan, who died in 1088, and the master against Wilhelm the quor for seven years, and bishop Andrews. The bishops of Ely, like the bishops of Durham, formerly enjoyed a palatine jurisdiction, and appointed their own chief justice, etc., but this privilege was taken from them by the 6th and 7th William IV. The bishop of Ely is visitor to St. Peter's, St. John's, and Jesus colleges, Cambridge, of which last he also appoints the master. There is a grammar-school attached to the cathedral, founded by Henry VIII. The diocese of Ely belongs to the province of Canterbury, and embraces Cambridgeshire, Bedfordshire, Huntingdon- shire, and the archbishopric of Suffolk, in Sheffield. The income of the bishop is £5500. The present (1890) incumbent is Alwyne Compton. The diocese has 26 deaneries and 172,368 church seats. The whole population within the territory of the diocese was, in 1861, 480,716. —Chambers, Encyclop. s. v. —Churchman's Calendar for 1868.

ELYMAM'AM ('El'mam, the Gracised form (Judith i, 6) of the designation usually Anglicized ELMAM'T (q. v.).

ELYMAM'T (El'mam). a general designation (To- bit ii, 10) of that province of the Persian empire (see Smith, Dict. of Class. Geog. s. v.) termed Elam (q. v.) in the Bible. In 1 Macce vi, i, however, the word is used (in the more specific or local sense of some Persian city, as we are there informed that An- toichus Epiphanes, understanding there were very great treasures in the temple at Elymas, determined to plunder it; but the citizens resisted him success- fully). The town of Elam was also called Elam. This was called city Perisan, probably because it formerly had been the capital of Persia: for Persepolis and Elam were very different cities: the former situated on the Araxes, the latter on the Eulm- us. The temple which Antiochus designed to pillage was that of the goddess Nana, according to 2 Macce. i, 13: Appian says (Syr. p. 60) a temple of Venus (i. e.}
probably the goddess Aauhia); Polybius (xxxi, 11), Diodorus, Josephus (Ant. xii, 9, 1), and Jerome say a temple of Diana. See Antiochus (Ephiphanes).

El' ymas ('Elymaq), an appellative commonly derived from the Arabic *Abhmas* ("a wise man," see Pfeiffer, Dubia seu. p. 941; like the Turkish title Ulema, see Lakemacher, De Elymae Mago, in his Observant. ii, 126), which must be interpreted as a eponym, the Magus or sorcerer: it is applied to a Jew named Bar-Je'sus, who had attached himself to the proconsul of Cy- prus, Sergius Paulus, when Paul visited the island (Acts xiii, 6 sqq.). A.D. 44. On his attempting to dissuade the proconsul from embracing the Christian faith, he was struck with a miraculous blindness by the apostle (see Neander's History of First Planting of the Christian Church, i, 126). A very different but less probable derivation of the word is given by Lightfoot in his Hebrew and Talmudical Exercitations on the Acts (Works, viii, 461), and in his Sermon on Elymas the Sorcerer (Works, vii, 104). Chrysostom observes, in reference to the blindness inflicted by the apostle on Bar-Jesus, that the limiting clause, "for a season," shows that it was not intended so much for the punishment of the sorcerer as for the conversion of the people, Acts xiii. Apost. Homil. xxviii; Opera, ix, 241). On the same subject generally, there has been prevailing, in the decay of faith, of consulting Oriental impostors of this kind, see Combeyre and Howson, Life of St. Paul, i, 177-180, 2d ed. See Magic.

El'shabad [some El'zahbad] (Heb. El'zahbad, אֶלְׁזַחַבָּד, ḫwān, who prophesied God has bestowed, i. q. Theodore; Sept. 'El'zah- bad 'El'zahbad, v. r. 'El'zahād and 'El'zahād; that is, the name of a man).

1. The ninth of the eleven Gadite heroes who joined David in his fastness in the wilderness of Judah (1 Chron. xii, 12) B.C. 1061.

2. One of the able-bodied sons of Shemah, the son of Obed-edom the Levite; he served as a porter to the "house of Jehovah" under David (1 Chron. xxvi, 7).

B.C. 1014.

El'shap [some El'zaphan] (Heb. El'zaphan, אֶלְׁזָפָן, a contracted form (Exod. vi, 22; Lev. x, 4) of the name Elizabeth (q. v.).

Emanation (Latin emanatio, a flowing forth), a religious theory concerning the relation of the universe to the Deity, which lies at the basis of some of the Oriental religions, and from them found its way into several philosophical systems. Emanation denotes a doctrine concerning the introduction of all things in the universe by degrees from the Supreme Being, the universe constituting in general, as well as in particular, a chain of revelations, the individual rings of which lose the divine character the more the farther they are remote from the primary source, the Deity. A system of emanation is different from a system of evolution, because in the latter the revelation of the Deity in the universe has for the Deity itself the signification of a process of self-cognition which grows in a progressive ratio. Emanation was the basis of the religions of India, in the northern provinces of which country it developed from the original religion of nature even before the compilation of the Vedas. The cause of all things was found in a universal world-soul. See ANIMA MUNDI. The world-soul was identified with Brahma, and, viewed as the eternal spiritual unit, the mysterious source of all life. The ancient gods were explained as the first rays of Brahma, whom he had constituted the guardians of the world. The creation was an emanation from Brahma, which became the more gross, dense, materialized, the farther it removed from the primitive source. Those who give themselves up to the corporal world sink deeper and deeper, and only rise again upward when they have been purified by the fire of hell; but those who renounce all sensuality, and direct all their thoughts to the one divine substance, are gradually absorbed by it. The religion of the Parsees is also based upon emanation. From the Zeruane akherune (the uncreated one), Ormu- zard and Ahriman proceed as the highest revelations. From Ormuizd and Ahriman all other substances emanate, from the ministering angels down to the beings of the most inferior kind. The Parsees, like the Indians, a self-destruction of personality for the purpose of obtaining a reunion with the original unit; in the Parsee system the good is perfected and completed by overcoming the bad, and the series of the imperfect creations is closed by a depiction of Ab- ramin with Ormuizd. In the Western countries, Plato is the first in whose writings we find, though not yet distinctly, traces of the doctrine of emanation. More developed, it appears in the writings of Philo. It is a prominent feature of the Neoplatonic school, and through Valentinus (q. v.) it was introduced into the Gnostic schools. Finally, it is to be found in the philosophy of the Arabs, which was more or less an Aristotelianism mixed with Neoplatonic views.—Wetzer u. Weite, Kirchen-Lex., iii, 548; Möller, Gesch. der Kosmologie in der griech. Kirche bis auf Origenes (Halle, 1860); Neander, Ch. Hist. vol. i. (A. J.)

Emancipation. 1. In the Roman Church, Emancipatio means the raising of some member of a convent to an ecclesiastical dignity, by virtue of which he is no longer subject to his former superior. The Emancipatio canonica is the release of a young canon from the obligation of visiting the foundation school when about to receive a prebend. 2. The term is also used to denote the act whereby a government or Legislature delivers from a state of slavery, or sets at political liberty, any classes of persons who have previously been declared ineligible for certain offices or privileges, on account of their religious peculiarities, e. g. emancipation of Jews in Christian countries (see Jews); Roman Catholic emancipation in 1829 in England (see Tests). The freeing of slaves from bondage (see Slavery).

Embalming (Egyptian, i, to embalm, to embalm, to convert, to spice; hence spoken of the ripening of fruit, on account of its aromatic juice, improperly rendered "puttheth forth" in Cant. ii, 13), the process of preserving a corpse by means of aromatics (Gen. i, 2, 3, 26; Sept. iraporimōn, caper), this art was practised among the Egyptians from the earliest times, and arrived at great perfection in that country, where, however, it has now become lost, the practice apparently having gradually fallen into disuse in consequence of the change of customs affected by the influence of Christianity and the Christian empire. It is in connection with that country that the above instances occur, and later examples (2 Chron. xvi, 14; John ii, 39, 40) seem to have been in imitation of the Egyptian custom. The modern method of embalming is in essential points similar.

1. Egyptians.—The feeling which led the Egyptians to embalm the dead probably sprang from their belief in the future reunion of the soul with the body. Such a reunion is distinctly spoken of in the Book of the Dead, (Lepsius, Tod„enbuch, chap. 89 and passim), and Herodotus expressly mentions the Egyptian belief in the transmigration of souls (ii, 123). This latter idea may have led to the embalming of lower animals also, especially those deemed sacred, as the ox, the ibis, and the cat, mummies of which are frequent. The actual process is said to have been derived from "their flesh being buried with natron and other salts, which dried and preserved the body" (Rawlinson, Herod. ii, 122). Drugs and bitumen were of later introduction, the latter not being generally employed before the 18th dynasty. When the practice ceased entirely is uncertain.

2. Herodotus (ii, 86-89) describes how the Egyptians embalmed those who were in
tiated into the mysteries of the art by their ancestors. The most costly mode, which is estimated by Diodorus Siculus (i, 91) at a talent of silver (over $1,000), was said by the Egyptian priests to belong to him whose name in such a matter it was not lawful to mention, viz. Osiris. The embalmers first removed part of the brain through the nostrils by means of a crooked instrument, and again by cutting a slit in the cranium. An incision was then made along the flank with a sharp Ethiopian stone, and the whole of the intestines removed. The cavity was rinsed out with palm-wine, and afterwards scoured with pounded perfume. It was then filled with a pure myrrh, galbanum, cassia, and other aromatics, except frankincense. This done, the body was sewn up and steeped in natron for seventy days. When the seventy days were accomplished, the embalmers washed the corpse and sweated it in bandages of linen, cut in strips and smeared with gum. They then gave it to the relatives of the deceased, who provided for it a wooden case, made in the shape of a man, in which the dead was placed, and deposited in an erect position against the wall of the sepulchral chamber. Diodorus Siculus gives some particulars of the process which are omitted by Herodotus. When the body was taken out of the sarcophagus, one of the operators, called the scribe (γραπτητης), marked out the part of the left flank where the incision was to be made. The dissector (σφοδρηστης) then, with a sharp Ethiopian stone (λεβροτης ψαλινας, Herod. ii, 121), hastily cut through as much flesh as the law enjoined, and fled, pursued by curses and volleys of stones from the spectators. When all the embalmers (ταυστηρια) were assembled, one of them extracted the intestines, with the exception of the heart and kidneys; another cleansed them one by one, and rinsed them in palm-wine and perfumes. The body was then washed with oil of cedar, and other things worthy of notice, for more than thirty days (according to some MSS. forty), and afterwards sprinkled with myrrh, cinnamon, and other substances, which possess the property not only of preserving the body for a long period, but also of communicating to it an agreeable smell. This process was so effectual that the features of the dead could be recognised. It is remarkable that Diodorus omits all mention of the steeping in natron; Porphyrus (De Abst. iv, 10) supplies an omission of Herodotus, who neglects to mention what was done with the intestines after they were removed from the body. In the case of a person of respectable rank they were placed in a separate vessel and thrown into the river. This account is confirmed by Plutarch (Sept. Sec. Costis).

The second mode of embalming cost about 20 minas. In this case no incision was made in the body, nor were the intestines removed, but cedar-oil was injected into the stomach by the rectum. The oil was prevented from escaping, and the body was then steeped in natron for the appointed number of days. On the last day the oil was withdrawn, and carried off with it the stomach and intestines in a state of solution, while the flesh was consumed by the natron, and nothing was left but the skin and bones. The body in this state was weighed, to determine whether it was enlightened. The third mode, which was adopted by the poorer classes, and cost but little, consisted in rinsing out the intestines with syrinx, an infusion of senna and cassia (Pettigrew, Hist. of Mummies, p. 69), and steeping the body for the usual number of days in natron. Although the three modes of embalming are so precisely described by Herodotus, it has been found impossible to classify the mummies which have been discovered and examined under one or other of these heads. Pettigrew, from his own observations, confirms the truth of Herodotus's statement that the brain was removed through the nostrils. But in many instances, in which the body was carefully preserved and elaborately ornamented, the brain had not been removed at all, while in some mummies the cavities was found to be filled with resinous and bituminous matter. M. Rouyer, in his Notice sur les Embaumements des Anciens Egyptiens (Description de l'Egypte, p. 471), endeavored to class the mummies which he examined under the principal divisions, which were again subdivided in the following manner. When the incision was made in the ventral incision, preserved, 1, by bal- samic matter, and, 2, by natron. The first of these are filled with a mixture of resin and aromatics, and are of an olive color—the skin dry, flexible, and adhering to the bone, the flesh scarlet, red, and black, the phal- lus, and are black, the skin hard and shining. Those prepared with natron are also filled with resinous substances and bitumen. II. Mummies without the ventral incision. This class is again subdivided, according as the bodies were, 1, salted and filled with asphaltum, a compound of asphaltum and natron pitch; or, 2, salted only. The former are supposed to have been immersed in the pitch when in a liquid state. The medications employed in embalming were various. From a chemical analysis of the sub- stances found in mummies, M. Roselle detected three modes of preparation of the pitch: 1, the pitch, called also funeral gum, or gum of mummies; 2, with a mixture of asphaltum and cedars, the liquor distil- led from the cedar; 3, with this mixture, together with some resinous and aromatic ingredients. The asphaltum was mixed with the bituminous matter, but sprinkled into the cavities of the body. Pettigrew supposes that after the spicing "the body must have been subjected to a very considerable degree of heat; for the resinous and aromatic substances have penetrated even into the innermost strata of the carcass, an effect which could not have been produced without the aid of a high temperature, and which was absolutely necessary for the entire preservation of the body" (p. 62). M. Rouyer is of the same opinion (p. 471). The surface of the body was in one example covered with a coating of the dust of common and barnal, now less than one inch in thickness, which "had the smell of cinnamon or cassia" (Pettigrew, p. 62, 63). At this same stage plates of gold were sometimes applied to portions of the body, or even its whole surface. Before en- rapping, the body was painted, an effect which could not have been produced without the aid of a high temperature, and which was absolutely necessary for the entire preservation of the body."
ty of the bandaging has been the subject of great admiration. The strips were very closely bound, and all directions were adopted that could carry out this object. Pettigrew is of opinion that they were certainly applied wet. Various amulets and personal ornaments are found upon mummies and in their wrappings; the former were thought to be of use to the soul in its wanderings, and they were placed with the body from the belief in the relation between the two after death. With these matters, and the other particulars of Egyptian mummies, we have little to do, as our object is to show how far the Jewish burial-usages may have been derived from Egypt. The body in the cases of most of the richer mummies, when bandaged, has been covered with what has been termed by the French a cartouche, formed of layers of cloth, plastered with lime on the inside. The shape is that of a body of which the arms and legs are not distinguishable. In this shape every dead person who had, if we may believe Diodorus, been judged by a particular court to be worthy of the honor of burial, was considered to have the form of Osiris, and was called by his name. It seems more probable, however, that the tribunal spoken of was that of Ameni, "the hidden," the Egyptian Hades, and that the practice of embalming was universal. The cartouche of the more costly mummies is generally beautifully painted with subjects connected with Ameni. Mummies of this class are enclosed in one or even two wooden cases, either of sycamore, or, rarely, of cedar. The mummmies of royal and very wealthy persons were placed in an outer stone case, within which there was a wooden case, and, probably, sometimes two such cases. See MUMMY. It would seem that the features of the face, as well as the other parts of the body, were covered over with the bandage, and that it was only through this, and latterly through the coffin, which commonly took the form of the features, that these could be recognised.

II. Hebrew-Egyptian.—The records of the embalming of Jacob and Joseph are very brief. In the former case we read, "And Joseph commanded his servants the physicians to embalm his father: and the physicians embalmed Israel. And forty days were fulfilled for him; for so are fulfilled the days of embalming: and the Egyptians mourned for him three days and ten days" (Gen. I, 2, 3). Of Joseph we are only told that "they embalmed him, and he was put in a coffin in Egypt" (ver. 26). It should be remarked, that in Joseph's case the embalming must have been thorough, as Moses at the Exodus carried his body into Canaan. The motive of embalming in these instances was evidently that the strong desire of these patriarchs to be buried in the Land of Promise might be complied with, although, had this not been so, respect would probably have led to the same result. That the physicians were employed by Joseph to embalm his father may mean no more than the usual embalmers, who must have had medical and surgical knowledge, but it is not unlikely that the kings and high officers were embalmed by household physicians. The periods of forty days for embalming, and seventy for mourning, are not easily reconciled with the statement of Herodotus, who specifies seventy days as the time that the body remained in natron. Hengstenberg (History of the Books of Moses, p. 69) attempts to reconcile this discrepancy by supposing that the seventy days of Herodotus include the whole time of embalming, and not that of steeping in natron only. But the differences in detail which characterize the descriptions of Herodotus and Diodorus, and the impossibility of reconciling these descriptions in all points with the results of scientific observation, lead to the natural conclusion that, if these descriptions are correct in themselves, they do not include every method of embalming which was practised, and that, consequently, any discrepancies between them and the Biblical narrative cannot fairly be attributed to a want of accuracy in the latter. Perhaps the periods varied in different ages, or the forty days may not include the time of steeping in natron. Diodorus Siculus, who, having visited Egypt, is scarcely likely to have been in error in a matter necessarily well known, speaks of the anointing of the body at first with oil of cedar and other things for above thirty or forty days (Σὲ ἡμέρας πλαύον τῷ τρικαλεύτῳ; some MSS. τρικαλιστονέτων). This period would correspond very well with the forty days mentioned in Genesis, which are literally "the days of anointing," and indicate that the latter denoted the most essential period of embalming. Or, if the same period as the seventy days of Herodotus be meant by Diodorus, then there would appear to have been a change. It may be worth noticing, that Herodotus, when first mentioning the steeping in natron, speaks of seventy days as the extreme time to which it might be lawfully prolonged (ἡμέρας ἣδρομακτάτη · πλαύον ἐς τούτων αὐτὸν ἔξατο ταραχόν—
EMBALM

terms, which, however, was very different in all else that relates to the disposal of the corpse. See Buriyal.

Among the later Jews a sort of embalming by means of honey occurs (Josephus, Ant. xiv, 7, 4; see Strabo, xvi, 46; compare Pliny, xxxii, 50). Wax was and still is used by the ancient Persians (Herodotus, i, 140; comp. Cicero, Tusc. Quaest. i, 42; Xenophon, Hellas, v, 3, 19).

Embalming the Dead in the Christian Church.

It was the custom of the early Church to bestow the honor of embalming upon the bodies of martyrs at least. According to an intimation of Tertullian (Apol. cap. 49), the usage appears to have been generally adopted by Christians in burying their dead. One of the chief ingredients used was myrrh; in imitation of the Jewish custom, which was followed by Joseph of Arimathea and Nicodemus, who brought a mixture of myrrh and aloes, about a hundred pound [weight].

The body they wound “in linen clothes with the sweet spices, as the manner of the Jews is to prepare for burial” (John xix, 38, 40). Mark specifies that fine clothes were used (xxv, 45), and mentions that the women who came to the sepulchre on the morning of the resurrection had brought sweet spices, that they might come and anoint him (xvi, 1). Luke relates that the women went to see the sepulchre. “And they returned, and prepared sweet spices and ointments” (xxiii, 59). Immediately after the use of their “sweet spices which the women had prepared” (xxiv, 1) on the second day after our Lord himself referred to the use of ointment in burial-ceremonies (προς το πνευματικόν) “for the preparation for burial,” when he commended the piety of the woman who had anointed his head with “precious ointment” (Matt. xxvi, 6-18), and spoke in like manner in the similar case of Mary, the sister of Lazarus (John xii, 3-8).

The customs at this time would seem to have been to anoint the body and wrap it in fine linen, with spices and ointments in the folds, and afterwards to pour more ointment upon it, and perhaps also to burn spices. In the case of our Saviour, the hurried burial and the following of the Sabbath may have caused an unusual delay. Ordinarily everything was probably completed at once.

Herodotus and Diodorus Siculus speak of the use of myrrh in Egyptian embalming, but we do not find any mention of aloes. The wrapping in fine linen is rather contrary to the Egyptian practice than like it, when we remember that the coarser mummy-bandages are those which immediately enfold the body, and would be unnecessary if there were used only the finest.

The Jewish custom has therefore little in common with the Egyptian. It was, however, probably intended as a kind of embalming, although it is evident from what is mentioned in the case of Lazarus, who was regularly swathed (John xi, 44), that its effect was not preservation (ver. 50). The use of aromatic gums naturally have been a harmless relic of the Egyptian cus
Emblem, "a device or figure employed to represent some moral notion. There are various opinions as to the lawfulness and expediency of emblems in religious matters, some considering it to be both allowable and useful thus to represent spiritual ideas to the bodily eye; others, again, holding it to be both presumptuous and dangerous, if not superstitious, to use any emblems of sacred things not warranted and enjoined by Scripture. This, at least, is certain, that it is quite as likely to lead to idolatry (answering to that of the Hindoos, Egyptians, etc.) as pictures or images giving a simple resemblance. The golden calf was meant for an emblem, but it was the occasion of gross idolatry."

Emblems are to be distinguished from symbols. Symbols are generally intended to represent revealed doctrines; emblems are "arbitrary representations of an idea of human invention" (Walcott). Thus a sword is the emblem of St. Paul. A lion, as indicating solitude, was chosen as the emblem of Jerome as a recluse. See Idolatry; Image.

Embroider (אֶסְנָּדָה, ἐσσάνω, ἐσσάνα), to variegate, Exod. xxxv, 33; xxxvi, 28; elsewhere "needle-work," etc.; גָּלֶ֑ת, ἐκατωβά, to interweave, Exod. xxxviii, 39; "set," Exod. xxxviii, 20. See Broderied. If these passages are correctly rendered, the Israelites must have known the art of embroidery. In several passages, also, an equivalent expression is used—needle-work—and used so as to imply that not plain sewing, but ornamental work, was evidently meant (Exod. xxvi, 36; Judg. v, 30; Psalm xlv, 14, etc.). The Hebrew women were undoubtedly indebted to their residence in Egypt for that perfection of finish in embroidery which was displayed in the service of the tabernacle, and in the preparation of the sacerdotal robes directed to be worn by the high-priest (Exod. xxviii, 29). The colored figures in the cloth of the Hebrews are thought by most authors to have been partly the product of the weaver in colors, whose art appears the superior, and partly that of the embroiderer in colors. The notices of Egyptian history, confirmed by the monumental remains, give reason for believing that at a comparatively early period they had made wonderful attai-
EMURY

Embury, Philip, the first Methodist minister in America, was born in Ballygarvan, Ireland, Sept. 21, 1728 or 1729. His parents were Germans of the Palatinate, and he was educated at a school near Ballygarvan. In 1752 he was converted, and in 1758 he was entered upon the roll of the Irish Conference as a preacher. In 1790 he emigrated to America, but it is not known whether he preached or not during the first few years of his life in New York. In 1766, stimulated by the advice of Barbara Heck, a pious Methodist, he organized a class, and commenced preaching, first in his own house, then in a hired room, and soon after his own home. As a birth-place of Methodism in New York. A chapel became necessary, and in 1788 the pioneer Methodist church was erected on the site of the present John Street Church. New York at this time had a population of twenty thousand. Embury continued to serve the Church in this chapel gratuitously until the arrival of the first missionaries sent out by John Wesley in 1769, when he surrendered the charge, and, with a party of fellow-Methodists, emigrated to Washington County. He there continued his labors as a "local preacher," and formed a society, chiefly of his own countrymen, at Ashgrove, the first Methodist organization within the bounds of the present Troy Conference, now numbering twenty-five thousand communicants, and more than two hundred travelling preachers. Embury died suddenly in August, 1775, in consequence of an accident in moving. He was buried on a neighbor's farm, but in 1882 his remains were taken up and deposited in Ashgrove church-yard, with funeral ceremonies, and an address by John N. Mafitin. In 1866, the centenary year of American Methodism, his remains were transferred, by order of the Troy Conference, to the Woodland Cemetery, Cambridge, Washington County, N. Y., with impressive services, conducted by Bishop James and the Rev. S. D. Brown. See a good sketch of his life by Saxe, Ladies' Repository, May, 1856; also Bangs, History of the Methodist Episcopal Church, vol. I., Stevens, Memorials of Methodism, vol. II.; Wakeley, Heroes of Methodism; Stevens, History of the Methodist Episcopal Church, vol. I.; Wakeley, Lost Chapters.

Emesek. See Beth-Emesek; Kezile.

Emerald ( "% 50, n"6p'k6, of uncertain signif.; Sept. ˹i`8pₐ, N.T. and Apoc. ATABASE, a precious stone, named first in the second row on the breast-plate of the high-priest (Exod. xxviii, 18; xxxix, 11), imported to Tyre from Syria (Ezek. xxviii, 16), used as a seal or signet (Eccles. xxx, 8), as an ornament of clothing and bed of one of the foundations of Jerusalem (Rev. xxi, 19; Tob. xiii, 15). The rainbow round the throne is compared to emerald in Rev. iv, 6 (μάρσιος ὁ ἀσάμαρσιος ὁ ἀσάρσιος). The Sept., Josephus, and Jesus Targum understand by it the carbuncle. This name (in Greek denoting a live coal) the ancients gave to several glowing red stones resembling live coals (Pliny, Hist. Nat. xiii, 25; comp. Theophrast. De Lapid. 18), particularly rubies and garnets. See Carbuncle. The most valuable of the carbuncles seems, however, to have been the Oriental garnet, a transparent red stone, with a violet shade, and strong vitreous lustre. It was engraved upon (Theophrast. 31), and was probably not as hard as the ruby, which, indeed, is the most beautiful and costly of the precious stones of a red color, but is so hard that it cannot easily be subjected to the graving-tool. The Hebrew נָדָכ, in the breast-plate of the high-priest, was certainly an engraved stone; and there is no evidence that the ancients could engrave the ruby, although this has in modern times been accomplished (Rosenmüller, Biblical Mineralogy, p. 32, 33; Brauinius, De Test. Sacerdot. p. 523; Bellermann, Uber die Uran u. Thummel, p. 45). See Beryl.

The smaragdus of the New Test. was the generic name of twelve varieties of gems, some of which were probably true emeralds, while others seem to have been rather stones of the prasius or jasper kind, and still others nothing more than colored crystals and spars from copper mines. The statues, etc., of emerald mentioned by authors, as those of the Sibyls, appear to be made either of more or less transparent rock crystals, or even colored glass (Hill on Theophrast. de Lapid. 44; Moore's Anc. Mineral. p. 150). See Gem.

Emer. See Hemorrhois.

Emerson, John B., a Congregational minister and missionary, was born at Chester, N. H., in 1802; graduated at Dartmouth College in 1826, and studied theology at Andover. He had studied with special reference to the missionary work, and went, under the auspices of the American Board, to the Sandwich Islands, and was appointed to Waialua, Oahu, where he spent nearly the whole of his life, laboring with zeal and success. For four years he was professor in the Lahainaluna seminary, and while there he prepared (with other writers) an English-Hawaiian Dictionary. He died at Waialua March 23, 1867.—American Annual Cyclopaedia, vii, 559.

Emerson, Ralph, D.D., a Congregational divine and scholar, was born at Hollis, N. H., August 18, 1750, and was educated at Yale College, where he graduated in 1811 with the highest honors of his class. After studying theology at Andover until 1814, he was tutor at Yale for a short time, and in 1816 became pastor at Norfolk, Conn. In 1827 he was chosen professor of Church history and pastoral theology at Andover, which office he held until 1854. He lived for five years at Newportport, and then removed to Rockford, Illinois, where some of his children resided, and where he died, May 26, 1863. As a teacher, he maintained a high character during his long service at Andover.—Congregational Quarterly, July, 1868.

Emery, Jacques ANDRE, an eminent French Roman Catholic divine, was born at Gex, August 27, 1782, and studied in the Jesuits' College at Mâcon, and also at St. Sulpice, Paris. He was ordained in 1756; became professor of theology at Orleans 1759; and afterwards he held the chair of philosophy at Paris. In 1776, superintend of the seminary at Angers; 1784, head of the abbey of Boisragon, and also head of the congregation of St. Sulpice. In 1789 he founded a seminary of his congregation at Baltimore, Mary-land.

**'Emim** (Heb. *Eymim*, דֵּי-מִים, errors; Sept. *Oμαίοι* and *Oμίαι*; Auth. Vers. *Emim*s), a numerous and warlike tribe of the ancient Canaanites, of gigantism, who were defeated by Chedorlaomer in the plain of Kiriathaim; they occupied, in the time of Abraham, the country east of the Jordan, afterwards possessed by the Moabites (Gen. xiv, 5; Deut. ii, 10, 11). See CANAAN. An ingenious writer in the *Jour. of Soc. Lit.* (April, 1852, p. 55 sq.); Jan. 1853, p. 296 argues, but upon rather slender grounds, that their original title was *Shittim*, and identifies them with the Chetta so often referred to in the Egyptian inscriptions. It would appear, from a comparison of Gen. xiv, 5-7 with Deut. ii, 10-12, 20-23, that the whole country east of Jordan was, in primitive times, held by a race of giants, all probably of the same stock, comprehending the Rephaim on the north, next the Zuzim, after them the Emim, and then the Horim on the south; and that afterwards the kingdom of Bashan embraced the territories of the first; the country of the Ammonites, the second; that of the Moabites, the third; while Edom took in the mountains of the Horim. The whole of them were attacked and pillaged by the Eastern kings who destroyed Sodom and Gomorrah. See REPHAIM. The Emim were related to the Anakim, and were generally called by the same name; but the place of the Moabites, terrae Emim—that is, "Terrible men" (Deut. ii, 11)—most probably, on account of their fierce aspect. See ANAKIM.

**Eminence**, a title of the Romish cardinals, first given to them by Urban VIII, to endow them with a rank equal to that of the spiritual princes of Europe, and of the grand masters of the knights of St. John of Malta. See CARDINALS.

**Emlyn, Thomas**, an English Nonconformist theologian, born in May 1615, at Cilcohan, in the county of Cardigan; made chaplain 1688 by the countess of Donegal. In 1691 he became assistant to Mr. Boyce in the congregation of Nonconformists in Wood Street, Dublin. Having imbibed and preached Arian doctrines, he was deprived of his functions, and fined and imprisoned for two years. Restored to liberty, he continued to preach and to write in favor of Arianism until his death, July 30, 1748. His Works were collected and published in London, 1746 (3 vols. 8vo). Waterland notices Emlyn's writings frequently (see the Index to his works, 6 vols. 8vo). See also Dornier, *P Von Christ* (Edinburgh, trans.), div. ii, vol. iii, 357.

**Emmian-nili** ('Emonianthi), a Gracianized form (Matt. i, 23) of the name IMMANUEL (q. v.).

**Emmaus** ('Emmavios, prob. from דֵּי שָׂם,.hot batha, see Gen. xxxvi, 24), the name of three places in Palestine.

1. A village (כֹּ֫וָ֣מְא) 60 stadia (A. V. "furlong") or 74 miles from Jerusalem, noted for Lord's interview with two disciples on the day of his resurrection (Luke xxiv, 13). The same place is mentioned by Josephus (War, vii, 6, 6), and placed at the same distance from Jerusalem, in stating that Vespasian left 800 soldiers in Judas, to whom he gave the village of *Amemmis* (Ἀμμαθίας). The direction, however, is not given in either passage. Eusebius and Jerome (Onomast. s. v.) hold that it is identical with Nicopolis [see No. 2, below]; and they were followed by all geographers down to the commencement of the 14th century (Rudens, *Palæst.*, p. 578). Then, for some reason, it began to be supposed that the site of Emmaus was at the little village of Kubbeh, about 3 miles W. of Neby Sannwil, the eminence N.W. of Jerusalem (Maundeville, in *Early Travels in Palestine*, 1834, p. 176; Ludolf, *De Synchronia*, p. 179; Robinson, *Bib. Res*, iii, 66, note). Mr. Williams regards Keriat el-Enab as the true location (Journal of Philology, iv, 26), and Thomson inclines to the same position (Land and Book, ii, 808); but this view has little to recommend it, and the locality is otherwise appropriately the place of the miraculous multiplication of the loaves (John vi, 1—15). Eusebius does not mention it different from Nicopolis, and that it is mentioned in the Talmud as *Baruth Chapay* (בי"ת כפוא), i. e. "houses of the army" or Gibbor Chapay (בי"ת כפוא), i. e. heroes of the army, as being occupied by Roman veterans, a name that he finds in "some ruins which the Arabs call Barbaris, S. of Saris, 74 Eng. miles from Jerusalem" (Pallad. p. 117, 118); but no such name appears on Van de Velde's Map (which lays down Saris at 7 miles N. of W. from Jerusalem). In this uncertainty, the monkish identification with el-Kubeh ("the little dome") may for the present be acquitted in. This corresponds sufficiently in distance from Jerusalem (Rauner, *Palæst.*, p. 169), being 7800 paces (Cæsarea, p. 315), or 2h 40m to the N.W. (Van de Velde, *Memoriae*, p. 289, containing the ruins of the village, church and chapel (Tobler, *Topograph. von. Jerusalem*, ii, 340), although Dr. Robinson describes it (Bib. Res., ii, 394) as "a village built up by the government of Gaza on a stony, barren hill, without anything to mark it particularly as an ancient site." On the evangelical incident at this place there are treatises in Latin by Harenberg; in his *Ovia Gandersch*, p. 41-60; (Jub. 1774). Zachoko (Das neuest. Emmaus beleuchtet, Schafft, 1865) argues at length in favor of the modern traditional site; and the chief building on the spot, known as the "castrum Arnoldi," has lately been bought by some zealous Catholics as a "holy place" (Bibliotheca Sacra, July, 1886, p. 517).

2. **Emmaus** (Ἐμμαυε, 1 Macc. iii, 40, etc.; ἀμμαυε, Josephus, War, ii, 20, 4) or NICOPOLIS, a town in the plain of Philistia, at the foot of the mountains of Judah (Jerome, in *Deor.*, vii), 22 Roman miles from Jerusalem, and 10 from Lydda (Jos. Hieros. ed. Hassel, p. 600; Reland, *Palæst.*, p. 309). The name does not occur in the O. T.; but the town rose to importance during the later history of the Jews, and was a place of note in the wars of the Asmonaean. It was fortified by Beccabites, the general of Antiochus Epiphanes, who was engaged in the war with John Hyrcanus and Maccabæus (Josephus, Anti., xiii, 1, 8; 1 Macc. ix, 50). It was in the plain beside this city that Judas Maccabæus so signally defeated the Syrians with a mere handful of men, as related in 1 Macc. iii, 57; iv, 5; 5, 50. Under the Romans, Emmaus became the capital of a toparchy (Josephus, War, iii, 8, 8; Pliny, v, 14). It was burned by the Roman general Varus about A.D. 4. In the 8th century (about A.D. 220) it was rebuilt through the exertions of Julius Africanus, the well-known Christian writer, and then received the name Joppolo. Eusebius and Jerome frequently refer to it in defining the positions of neighboring towns and villages (Chron. Pales. ad A.C. 228; Reland, p. 759). Early writers mention a fountain at Emmaus, famous far and wide for its healing virtues (Sozomen, Hist. Eccl. v. 21); the cause of this Theophanes ascribes to the fact that the people made offerings of water in it (Chron. p. 41). The Crusaders still called it Nicopolis, but confounded it with a small fortress farther south, on the Jerusalem road, now called Latron (Will. Tyr. Hist. vii, 24). A small, miserable village called *Amade* still occupies the site of the ancient city. It stands on a small hill on the highest ground commanding the plain, and contains the ruins of an old church a little south of the village, also two copi-
was fountains, one of which is doubtless the ancient medicinal spring (Robinson, Researches, ii. 363; Later Res. p. 146, 147; Thomson, Land and Book, ii. 290).

Dr. Robinson has recently revived the old theory that the Emmaus of Lake is identical with Nicopolis, and has supported it with his wonted learning, but not with that assurance which befits it. (Rob. iii. 46; Later Res. p. 146). He endeavors to cast doubt on the accuracy of the reading Ἰερουσαὶ in Luke xxvii. 13, because several uncials MSS. and a few unimportant cursive MSS. insert Ἰεροῦ, thus making the distance 166 stadia, which would nearly connect the distance with that of Bethany. But the best MSS. have not this word, and the best critics regard it as an interpolation.

There is a strong probability that some copyist who was acquainted with the city, but not the village of Emmaus, tried thus to reconcile Scripture with his idea by borping a village of Galilee close to Jerusalem, and their followers, on a point such as this, are not of very great authority. When the name of any noted place agreed with one in the Bible they were not always careful to see whether the position corresponded in like manner. Emmaus-Nicopolis being a noted city in their day, they were led somewhat rashly to confound it with the Emmaus of the Gospel. The circumstances of the narrative are plainly opposed to the identity. The two disciples, having journeyed from Jerusalem to Emmaus in part of a day (Luke xxiv. 28, 29), left the latter again after the evening meal; the former at a village very red with wine (ver. 38, 42, 43). Now, if we take into account the distance, and the nature of the road, leading up a steep and difficult mountain, we must admit that such a journey could not be accomplished in less than from six to seven hours, so that they could not have arrived in Jerusalem till long after midnight. This fact seems conclusive against the identity of Nicopolis and the Emmaus of Luke (Reland, Palest. p. 427 sq.; Van de Velde, Memoir, p. 599).

3. The name Emmaus, or Ammaus (Ἀμμαώος), was also given by a village of Galilee close to Tiberias, probably the ancient Ἰμμαθ (q. v.), i.e. hot springs —of which name Emmaus was but a corruption. The hot springs still remained in the time of Josephus, and are mentioned by him as given name to the place (War, iv. 1, 5; Ant. xviii. 2, 8).

Emmaus or Emmaam, a bishop of Poitiers in the 7th century. He left his see for the purpose of missionary labours in Hungary, but is said to have stopped in Bavaria three years, at the request of duke Theodol, to purify the Christianitv of that duchy, where it was sadly mixed with paganisni. After this he continued his journey to Rome, and was waylaid and murdered by a son of the duke (Sept. 29, 602), because the daughter of the latter, Uta, claimed to have been dishonored by Emmaus. After his death, a clergyman, Wulfalsch by name, maintained the innocence of Emmeram, saying that the lord, shortly before his death, had told him he would help Uta, he had followed her to name him as seducer, though the real culprit was Sieghart, the son of a judge. This statement of Wulfalsch is said to have induced Theodol to bury him with great honors, and to exile his son to Hungary. Emmeram was soon venerated as a saint, and became one of the patron saints of the city and diocese of Lech. He is commemorated in the Church of Rome on the 23rd of September. On pictures he is represented as a bishop with a ladder. The accounts of Emmaus are very confused and conflicting; the best one is given by Athanasius, Lactantius, Cassiodorus, and Procopius. His feast is Sept. 29; Herzog, Real-Encyclop. iii. 779; Wetzer, Fl. Welle, Kirchen-Lez. iii. 558.

Emmeram, Nathanael, D.D., one of the founders of a new school in Calvinistic theology, was born April 20 (O. S.), 1745, at East Halden, Conn., a town which was also the birthplace of the missionary brothers David and John Brainerd, of President Edward Pierpont. Emmeram was the brother of George D. Griffin, Esq., of the lust Jeremiai Gault, Brainerd, and James Brainerd Taylor. He was the sixth son, and the twelfth and youngest child of his parents. He entered Yale College in 1768, and was graduated with honor in 1776. Among his classmates were Gov. John Treadwell, the poet John Trumbull, Judge Samuel Wiles, and Dr. Joseph Lyman, who, as long as they lived, exhibited a high degree of reverence for Dr. Emmeram. He studied theology first with Rev. Nathan Strong, of Coventry, Conn., and afterwards with Rev. Dr. John Smalley, of Berlin, Conn., a divinity who had been a pupil of Dr. Bellamy. He was more influence than perhaps any other man in shaping the theological opinions of young Emmerams. In 1769 Emmeram was appointed as a preacher, and on the 20th of April, 1773, was ordained pastor of the Congregational Church in Franklin, Mass. He remained sole pastor of the church twenty-four years, was the active member of it sixty-seven years and five months. Among the members of the council which ordained him were his two special friends, Rev. Dr. Hopkins, of Newport, R. I., and Rev. Dr. Hart, of Preston, Conn., a son-in-law of Dr. Bellamy. During his active pastorate he was honored at Franklin as a man of religion, one in 1784, one in 1794, and one in 1808-9. In the first of these revivals about seventy persons, in the second about thirty, and in the third about forty were thought to have consecrated themselves to Christ. One of his aphorisms was, "The seed of a faithful laborer soars is apt to be seen when he denies from the field;" and as soon as Dr. Emmeram was relieved of his sole pastorate at Franklin, he was gladdened by a fourth revival, in which thirty-six persons were added to his church, and after nine or ten years he rejoiced in a third of the fruit which he had planted. He lived to see nearly four hundred of his parishioners profess their faith in Christ. One of them, Rev. Dr. Blake, has recorded: "Hardly a case of defection from the truth has ever occurred among those who were turned unto God under Dr. Emmeram's ministry." His administration of candidates for ordination and of discipline were very rigid.—A large part of his influence on the churches has been exerted through his theological pupils. Between eighty-six and a hundred young men were guided by him in their studies preparatory to the Christian ministry. Of these pupils several have been successful as professors in seminaries and theological seminaries; many, as sound and strong preachers. Forty-six of them are noticed in the biographical dictionaries of eminent men. His impress upon them was decided and permanent. They were often called Emmeronians.—Although he was an adept in metaphysical abstractions, yet he aimed to be a practical man, not only in his influence on his pupils, but also in the general affairs of the Church and the State. He was the first president, and a father, if not the father of the Massachusetts Missionary Society, which was the parent of many philanthropic institutions. He was also one of the original editors of the Massachusetts Missionary Magazine, which was the gern of the present Missionary Herald. He was among the foremost in starting various trains of influence which have now become parts of our history. When the American Revolution took its rise, he was a zealous anti-mason. When anti-slavery was most generally denounced, he was an active abolitionist. It was often his lot to be an advocate of the weaker party. He was a decided Federalist in politics, and produced a great excitement in some of his political writings. He seldom visited his parishioners, still he was remarkable for his knowledge of their
EMMONS 180

EMPEROR (Eagwio v. r. Eqwio), a Grecized form (Acts vii, 16) of the name of HAMOR (q. v.), the father of Shechem (Gen. xxxiv, 2).

Emperor (Lat. imperator, general), a title common (in its Latin form) to all governors who had paramount jurisdiction within a given province (Smith, Dict. of Class. Ant. s. v. Imperator), but technically to a Roman general of the first rank, a Praetor Secundus, as a praenomen first by Julius Caesar (Sueton. Jul. 76), as affecting supreme power, and historically to his successors, the heads of the so-called Roman Empire (q. v.). They were also designated as Cesar (q. v.). We are here chiefly concerned with them as they came in contact with the Christian religion in the character of persecutors or patrons. See Persecution. (See Baldwin, Edicta veti. principum Roman. de Christianis, Hal. 1727 [also in Heinicci Jurispr. Rom. i, 1874 sq.]; Cruse, De Romanorum imperatorum historia, Ziz. 1754; Hebenustri, De priscis Christianis imperatoribus, Ziz. 1779; Heinecci, Historiae ministris Caesarum Christianis, Hal. 1772; also Hirt, De imperatorum ante Constant. eras Christianos favere, Jen. 1778; Keespe, De statu Christianorum sub imp. Berol. 1829.)

The following is a complete list of the Roman emperors, with their respective dates of accession. See each name of ecclesiastical interest in its alphabetical place.

Emory, John, D.D., a bishop of the Methodist Episcopal Church, was born in Queen Anne County, Maryland, April 11, 1789. After completing his academic education at Washington College, he studied law, and was admitted to the bar at nineteen years of age. His great ability was soon manifest; he came rapidly into practice, and had every prospect of early success. He passed through his religious experience before his admission to the bar, and soon after decided, in opposition to the will of his father, to enter the ministry. In 1810 he was received on trial in the Philadelphia Conference of the Methodist Episcopal Church. He soon established a reputation for pre-eminence in all the qualities of a true Christian minister. From 1813 to 1824 he filled the most important pastoral stations in the Methodist Connection in America, his appointments being as follows: 1811, Cambridge Circuit; 1812, Talbot Circuit; 1813-14, Elgin, Illinois; 1815, Wilmington Church; 1818-19, Philadelphia; 1820-21, Annapolis; 1822, Hagerstown; 1823, Baltimore. In 1816 he was elected to the General Conference, and he was a member of every subsequent General Conference until his death, except that of 1824. In 1826 he was sent by the General Conference to the British Conference, and discharged the delicate duties of his mission to the entire satisfaction of the churches. From 1824 to 1832 he was book-agent and editor for the Methodist Episcopal Church at New York. In this post his rare combination of intellectual power and culture with business habits was pre-eminent displayed. To none of the eminent men who have held this office is the Methodist Book Concern more indebted for its present greatness than to Dr. Emory. In the language of Bishop Vaughn, "The two great objects which Dr. Emory aimed to accomplish were, first, the exaltation of the debt from the rank and second, the actual sale of the stock on hand, and especially that part of it which was daily depreciating, because of the injuries which were constantly being sustained by it, in the scattered and exposed state in which most of it was found. The ability, skill, 1816-17, and perseverance which he displayed in the measures devised by him for the accomplishment of these objects have seldom been equaled, and perhaps never surpassed by the most practiced business man. His success was complete. Before the meeting of the General Conference in 1826 he sold all the obligation of the institution which had been so opportunely intrusted to his superintendence. He had greatly enlarged the annual dividends to an increased number of conferences. He had purchased several lots of ground for a more enlarged and eligible location of the establishment, and had erected a large four story brick building as a part of the improvements intended to be put on them, for the whole of which he had paid. It was his high honor, and also his enviable satisfaction, to report to the General Conference, for the first time, that its Book Concern was no longer in debt." He originated the "Publishing Fund" and "The Methodist Quarterly Review," and abolished entirely the sale of books on commission.

In 1822 he was elected a bishop of the Methodist Episcopal Church, and entered upon his duties at once, not only by attending the annual Conferences, but also by his influence in the interest of the Church. He was especially active with regard to education, and had a large share in the organization of Dickinson College. In addition to this, he drew up the outline of a plan for an education society in the Methodist Episcopal Church, which he designed to aid ministers and others in educating their sons. Soon after his election to the episcopacy Dr. Emory devised a course of study for candidates for deserts and elders, in which, with his usual discretion, he did not hazard everything by attempting too much. The Troy Conference of 1836 was the last which he attended. On the 16th of December in that year he was thrown from his carriage, about two miles from his own house (Reisterstown, Md.) by a team of five black A.M., and at half past seven in the evening he died.

Bishop Emory was a man of great talent and large cultivation. As a scholar, he was accurate and profound; as a preacher, he was clear and convincing; as an administrative officer, he hardly had a superior in any church. His conspicuous success was distinguished for logical directness and for fairness to his adversaries. In 1817 he published two pamphlets in reply to bishop White's 'Objectives against Personal Assurance by the Holy Spirit'; and in 1818, another, entitled 'The Divinity of Christ vindicated against the Comma of Mr. John Wright.' The period from 1818 to 1830 was one of great excitement in the Methodist Episcopal Church on various points of Church polity, and in all the controversy Dr. Emory bore a distinguished part. A large party wished to have the office of presiding elder held by the elect; he fell in that party, and, at the General Conference of 1820, he opposed vigorously a theory which gave the bishops a right to veto the acts of the General Conference. In the later conferences as to lay representation he was the principal writer, publishing, in 1824, The Defence of our Fathers, a three hundred and fifty-page volume, written with clearness and powerfully written after. After his death there appeared from his pen The Episcopalian Controversy Resolved (New York, 1888, 8vo), edited by his son, Robert Emory, from an unpublished manuscript; it is a luminous sketch, in reply to bishop Onderdonk's Episcopacy tested by Reason. Most of the original articles in the first two volumes of the Methodist Quarterly Review were written by him.-Life of Bishop Emory, by his eldest son (N. Y. 1840, 8vo); McClinton, in Methodist Quarterly Review, 1842, p. 62 sq.; Sprague, Annals, vii, 495; Stories and events, History of the Methodist Episcopal Church, vol. iv.

Emory, Robert, D.D., son of the preceding, an eminent Methodist minister and scholar, was born in Philadelphia, July 29, 1814. His early education was superintended by his father. In 1827 he entered Columbia College, where he was graduated in 1828 with the highest honors and medals of his class. He then entered upon the study of law, first in the law school of Yale College, and afterwards in the office of the Hon. Beverley Johnson, of Baltimore. In 1834 he was elected professor of ancient languages at Dickinson College, Carlisle, and entered upon his duties there with great zeal. In 1839 he was admitted on trial in the Baltimore Conference of the Methodist Episcopal Church; in 1841 he was appointed to the Baltimore city station; and in 1842 he was appointed acting president of Dickinson College, during the absence of the president (Dr. Durbin). In 1844 he was appointed president of Dickinson College, and in the same year the degree of D.D. was conferred upon him by Columbia College. In 1847 he attended the session of the Evangelical Alliance, and was in the front view of the deliberations of that body. His health showed signs of failure during this year, and he spent the winter following in the West Indies. But he continued to decline, and on his return homeward he died in Baltimore, May 18, 1848. Dr. Emory was one of those rare men in whom the human faculties, both moral and intellectual, seem to approach perfection, and to reach almost complete harmony of action. His classical scholarship was thorough and accurate; his mind was at once logical and comprehensive, and his general culture was wide and generous. His religious experience was, in many re-
spects, similar to that of President Edwards, and ripened into similar fulness and serenity. As a preacher he was luminous, earnest, and successful. As a college officer he was seldom rivaled. "His power of government was unsurpassed: he seemed born to command. In him prudence and independence met to form that rare combination so essential to one who rules. This remark finds its illustration and proof in his government of the college, to whose interests he devoted so much of his brief earthly life. While he shrank from no responsibility of his position, he was still careful to maintain that position by devising the best form of government. Responsibility he felt the weight of the sceptre in his hand, yet the conviction that it was wielded by a strong man, and in the fear of the Lord, conciliated esteem. As president of the college, as in every other position, he rose rapidly, both before the public and in the college; and the last year in which his name appeared in connection with that office was the most prosperous in the history of the institution. The students honored him even to reverence, and regarded him as standing on a moral and intellectual eminence toward which the indolent and unworthy must not even look, and to which the modestly backward, then ought to aspire." He died in 1841.

In 1841 he published A Life of the Rev. John Emory, D.D. (N. Y. 8vo); in 1843, an elaborate History of the Discipline of the Methodist Episcopal Church (N. Y. 12mo). He left unfinished an Analysis of Butler's Analogy, as recommended by G. R. Crooks, D. D. (N. Y. Harper, 1856, 8vo), and which is the best analysis of the Analogy that has ever appeared.—Minutes of Conferences, 1849; Sprague, Annual, vii, 828.

Emotion (emovere, to move out) is often used as synonymous with feeling. Strictly taken, it means a 'state of feeling which, while it does not spring directly from an affection of body, manifests its existence and character by some sensible effect upon the body.' An emotion differs from a sensation by its not originating in a state of body; and from a cognition, by its being pleasantly or unpleasantly felt. Emotions, like other states of feeling, imply knowledge. Something beautiful or deformed, sublime or ridiculous, is known and contemplated; and on the contemplation springs up the appropriate feeling, followed by the characteristic expression of countenance, or attitude, or manner. In itself, emotion may be called springs of action. 'The feelings of beauty, grandure, and whatever else is comprehended under the name of taste, do not lead to action, but terminate in delightful contemplation, which constitutes the essential distinction of the moral sense. To which, in some points of view, they may doubtless be likened' (MacKintosh, Discours, p. 288). Emotions tend rather, while they last, to fix attention on the objects or occurrences which have excited them. In many instances, however, emotions are succeeded by desires to obtain possession of the objects which awaken them, or to remove ourselves from the presence of such objects. When an emotion is thus succeeded by some degree of desire, it forms, according to Lord Kames, a passion, and becomes, according to its nature, a powerful and permanent spring of action. Emotions, then, are awakened through the medium of the intellect, and are varied and modified by the conception we form of the objects to which they refer. Emotions manifest their existence and character by sensible effects upon the body. Emotions, in themselves and by themselves, lead to quiescence and contemplation rather than activity; but they combine with springs of action, and give to them a character and a coloring. What is said to be done from surprise or shame has its proper spring—the surprise or shame being concomitant' (Dr. Chalmers, Sketches of Mental and Moral Philosophy, p. 86).

Empedocles, an ancient philosopher of Agrigentum, distinguished himself by his knowledge of natural history and medicine, and his talents for philosophical poetry. It is generally believed that he perished in the crater of Etna. Some suppose him to have been a disciple of Pythagoras or Archytas (Diog. Laert. viii, 54 sq.); others, of Parmenides. He cannot have been the speculative scholar of the first, inasmuch as Aristotle (Met., i, 3) represents him as conversant with, but younger than Anaxagoras, and because he appears to have been the master of Gorgias. His philosophy, which he described in a didactic poem, of which only fragments have come down to us, combines the doctrine of valvular blindness (which may have been approached by of Pythagoras and Heraclitus, but differing from the latter, principally, 1. Inasmuch as Empedocles more expressly recognizes four elements, earth, water, air, and fire: these elements (compare his system, in this respect, with that of Anaxagoras) he affirms not to be simple in their own, and signed the most important place to fire. Besides the principle of concord (μηδίαν, opposed to that of discord (φιλοκρίνης) (the one being the source of union and good, the other of their opposites), he admitted into his system necessity also, to explain existing phenomena. To the first principle, the third and fourth are as the original composition of the elements. The material world (εύφιλος, πολύ) he believed, as a whole, to be divine, but in the sublunar portion of it he detected a considerable admixture of evil and imperfection. He taught that at a certain period of time a cosmic change took place. He advanced a subtle and scarcely intelligible theory of the active and passive affections of things (comp. Plato, Menon, ed. Steph. p. 76, C. D.; Arist. De Gener. et Corr., i, 8; Fragm. op. Staur. v, 117), and drew a distinction between the world as presented to our senses (εἴδοσις), and that which he presumed to be the type of it, the intellectual world (εύφιλος νοημα). He looked for the principle of life in fire, admitting, at the same time, the existence of a Divine Being pervading the universe. From this superior intelligence he believed the demons to emanate, to whose nature the human soul is allied. Man is a fallen demon. There will be a return to unity, a transmigration of souls, and a change of forms. The soul he defined to consist in a combination of the four elements (because cognition depends upon the similarity of the subject and object), and to his seat he pronounced to be the pineal bone (Tennent's location is 'Tunica fibrosa: Pol. § 106). Lewes differs from all other historians respecting the place occupied by Empedocles, making his system to include elements from the Pythagorean, Eleatic, Heraclitic, and Anaxagorean systems (History of Philosophy, 1867, p. 310). Sturz, Empedocles Agrigentanus, De Vita et Philosophia eius expositor, Carinum Reliquias ex Antiquis Scriptoribus collegit, recensuit, illustravit Fr. Guili. Staur. (Lips. 1806, 8vo); J. G. Neumann Progr. de Empedocles Philo- sopho (Vieb. 1796, fol.); Lommatzsch, Die Weisheit des Empedocles. (Berlin, 1807); Stein, Empedocles. Aegypt. fragments (Bonn, 1852); Winnefeld, Die Philosophie des Empedocles. (Rastadt, 1857); Steinhart, in Ersch and Gruber, Allgm. Enzyklop. s. v. Empedocles.

Empiricism, Empirism, Empiric. Empiricism, in its primary meaning, signifies the method or habit of judging of facts, and it is generally supposed that one who forms his conclusions in this manner. Empiricism may thus be employed to denote either inductive reasoning, in which observation and experiment furnish the data for the conclusions drawn by the reason, or else a particular mode of procedure, which accepts the phenomena as they are presented, without analysis or accurate determination. In the former case the term is used in a good sense, and is equivalent to experimental science; in the latter it is used in a bad sense, and this is its ordinary employment.

The relation of experience to science, and to art
or practice, is precisely exhibited by Aristotle in the opening chapter of his Metaphysics; but the peculiar terseness of the Aristotelian phraseology renders expansion and restatement of his positions necessary, in order to adapt them to modern views.

Art, or systematic action, is founded upon observation, but upon observation reduced to theory, or to conclusions. That is to say, observation furnishes the facts, but they must be co-ordinated and interpreted in order to constitute valid knowledge (science), or a reliable rule of action (art). If the observations be indistinct or perplexed, or if they be not sufficiently numerous to establish a general conclusion, the argument by induction is deceptive, and obnoxious to the censure passed by Lord Bacon upon the simple enumeration of examples (New. Org. i, aph. lxxix. cv; Instaur. S. I. Int. tom. ix, p. 146; Distri. Op. p. 157, ed. Montague). The true nature of the induction required is briefly stated by Campanella: "Inducit est argumentatio a partibus suffusus enumeratissim ad sumum totam universale." What is a sufficient exposition of the particulars may be learned from the Second Book of the Novum Organum, or more satisfactorily from What is Called Induction by Francis Bacon, Comte's Political Philosophy, and Mill's Logic.

When the observations are sufficiently multiplied and varied, and when they have been analyzed and sifted so as to eliminate all illusions, and everything which does not bear distinctly upon the point under consideration, and in which the conclusion is to be found, then is the "multiplicatio et ventilenatio instaurarum" so strenuously urged by Lord Bacon. But, even in this case, the general experience authorizes a universal conclusion only by assuming a law latent under each of the concordant instances by which all are governed. In other words, the intermediate generalization is needed for the introduction of a purely rational element—if none other, at least the principle that nature acts uniformly, and that what is true of all observed instances is true of all similar phenomena. Thus theory is needed to permit and to complete induction, or inference from observation.

This accumulation, collation, and appreciation of instances is disregarded by undisciplined and impatient minds. A few recurrences loosely noted, or a single undigested observation, is made the foundation for a universal conclusion, with which more refined and rational principle. The designation derived from experience and inquiry is still retained, but, in consequence of want of validity in the process, and of method, reliability, and rationality in the corresponding practice, it receives an unfavorable import, and empiricism commonly denotes that mode of reasoning which is based upon hasty and inadequate observation, and which neglects scientific principle and scientific precision. This exposition of the derivation and deflection of the meaning is illustrated and confirmed by the history of the term. In the middle of the 18th century before Christ a revolution in medical practice was inaugurated by Philius of Cos and Serapion of Alexandria. They revolted against the maxims of the Dogmatics, and repudiated the course pursued by the Methodists of treating all cases of disease according to fixed theoretical rules. They observed the symptoms of disease and the effects of symptoms, and inquired into; they considered the idiosyncrasies of their patients as affected by climates and localities; and they employed the therapeutics which had been found effectual in analogous instances. They recognized three kinds of symptoms: some that do not admit of analysis, and which must be governed by the suggestions of unanalyzed experience, or there is a large discordance between the scientific conclusions and the observed facts. In these cases the indications of experience cannot be disregarded, and the procedure, to be adopted, must be in greater or less measure empirical. History, politics,
social organization, agriculture, and many of the applications of physical science to human requirements demand, in a greater or less degree, this subordination of scientific results to observed facts. But the insufficiency of the procedure should be recognized; for empiricism, even in its most favorable form, is tentative and problematical. It is the understanding of the guidance of the reason, and the acceptance of imperfectly or imperfectly-digested observation for the prescriptions of ascertained and immutable law. Empiricism is available only in consensum causae; and, as this exists, it is only when the observation runs into wild and pernicious fantasies when not illuminated by speculative discernment. The two must be combined and conciliated in order to afford any absolute confidence in the verdicts of its conclusions, and the procedure founded thereon. If they be separated, and the observation is made without due discernment, experience is valid only in matters of mere routine; theory or science is always required under novel combinations. Theory, unregulated by experience, is as arbitrary and capricious as experience unlightened by reason, and, unless hopelessly, but it never awakens any suspicion of the possibility of error. But theory, which systematizes the conclusions drawn from an adequate range and degree of observation, furnishes guidance under all changes of circumstance; while empiricism only misleads and betrays in every case when it is necessary to deviate in any respect from a procedure already adopted and approved.

Empiricism is thus at all times an irrational procedure, though it may furnish a practical rule within a very limited sphere. Theory may beguile, in consequence of its imperfect constitution or rash applications. The facts we have to investigate are of established law, and obedience to the immutable prescriptions of reason is capable of thorough scientific organisation. In these we must continue to be guided by empirical conclusions; but they are received, not because they are sufficient, but because nothing better is attainable. Empiricism is, therefore, always inadequate, and usually deceptive. It is only when theory is sustained by facts, and facts are explained by theory, that knowledge becomes entirely trustworthy. Many departments of practical knowledge are not yet, and may never be, admitted of thorough scientific organization. In these we must continue to be guided by empirical conclusions; but they are received, not because they are sufficient, but because nothing better is attainable. Empiricism is, therefore, always inadequate, and usually deceptive. It is only when theory is sustained by facts, and facts are explained by theory, that knowledge becomes entirely trustworthy. Many departments of practical knowledge are not yet, and may never be, admitted of thorough scientific organization. In these we must continue to be guided by empirical conclusions; but they are received, not because they are sufficient, but because nothing better is attainable. Empiricism is, therefore, always inadequate, and usually deceptive. It is only when theory is sustained by facts, and facts are explained by theory, that knowledge becomes entirely trustworthy. Many departments of practical knowledge are not yet, and may never be, admitted of thorough scientific organization. In these we must continue to be guided by empirical conclusions; but they are received, not because they are sufficient, but because nothing better is attainable. Empiricism is, therefore, always inadequate, and usually deceptive. It is only when theory is sustained by facts, and facts are explained by theory, that knowledge becomes entirely trustworthy. Empiricism is, therefore, always inadequate, and usually deceptive. It is only when theory is sustained by facts, and facts are explained by theory, that knowledge becomes entire
EMSER burned Emser's writings along with the papa
bull and the decreta. As Emser's works were al-
most wholly personal invectives, the interest in them
soon ceased, and in the history of the Reforma-
tion they are of little significance. As duke George for-
bade Luther's translation of the Bible, Emser, in 1527,
published another German translation made from the
Vulgata. Emser branded Luther's version as a horri-
bile corruption; but it present, even the Roman Cat-
olic writers of Germany acknowledge that Emser's
version is of no value, and, in a literary point of view,
greatly inferior to that of Luther. Emser died Nov.
8, 1527, where and how is not known. The titles of
the works of Emser were: "Adversus paupertatibus
hominum, Nachrichten von Emser's Leben und Schriften
(Ans-
pach, 1783). See Neudecker, in Herzog, Real-Encycl.
(A. J. S.)

En- (Heb. Egm. 'en*; constr. of 'en, a fountain), a
prefix to many names of places in Heb. (e. g. En-gedi,
En-gammin, En-dor, En-haddah, En-hazor, En-harod,
En-mishap, En-agaim, En-emesh, En-rogel, En-
tammin (Heb. 'i, En-tappah); all so called from a
living spring in the vicinity; and corresponding to
the Arabic prefix 'ain (Robinson, Researches, iii, 225),
in which language, as also in the Syriac and Ethiopic,
it has the same signification; in two instances (Joh.
xxii, 16; Num. xxxiv, 11) it stands alone as the name
of a place (q. v.); also in the dual, Enasa (q. v.), as,
and plural Atin (q. v.), the latter likewise in the
Aramaic form Enon (q. v.). See AIN.

Ena'm. See ENAM.

'Bnam (Heb. with the art. ha-Egmam', 'bn, doubltless a contraction for 'bn Egmam', the two springs; Sept. H'rais h. r. H'rais and Masaui, Vulg. Enam), a city in the lowlands of Judah, mentioned between Tappahn and Jarmuth (Josh. xv, 34). From its mention with towns (Jarmuth and Eshtol for instance) which are known to have been near Timnath, this is very probably the place in the "entrance of which (perhaps at a fork of the road) Tamar sat to intercept her father-in-law on his way to Timnath (Gen. xxxviii,
14, (24) הַבְּנָא, pe'tach Egm'im, i. e. doorway of
Enam, or the double spring; Sept. ai 'adon hivon, Vulg. bimium ibneria, A. V. "an open place"; comp. Reland, Paolo, p. 761), Eusebius and Jerome (Onom-
ast. n. 293) also make it a spring. The village Bethemim (Beth-evai) near the terebinth, "meaning probably "Abraham's oak." 22 miles S. of Jerusalem
(St. b. v. 'Amor, Arboc), near Hebron (Robinson, Res.
ii, 443). Schwarz in like manner identifies Enam with
the village Beth-Ami, distant 25 English miles
from Sardis, and the "eastern gate" of Jerusalem (p. 192); meaning apparently Beit-anur, which is laid down on Van de Velde's Map at
distance of S.W. of Bir es-Zafraneh, in the region
N.E. of Hebron. But this site is appropriated to
Beth-anoth (q. v.), with which the similarity of names
has doubtless caused these authors to confuse Enam.
The place in question lay in the group of cities situated
N.W. of Hebron, on the border of the tribe of Dan
(Keil, Comment, on Josh, in loc.). It is perhaps the present Deir el-Butun, with a well adjoining, laid down
by Van de Velde (Map) a little beyond Deir Dobbun,
N. of Hebron.

'Bnam (Heb. Egmam', 'bn, born at a fountain, q.
d. fontanus; Sept. Aivon), the father of Ahira, which
latter was phylarch of the tribe of Naphtali at the
Exile (Num. i, 15; ii, 29; vii, 78, 85; x, 27). B.C.
ante 1657. See also HAZAR-ENAN.

E'mansibus ('E'mansius, Vulgate Elissab), given (1
Esdri ix, 34) as the name of one of the "sons of Moan"
who had married a Gentile wife after the exile, in
place of the Eliathib (q. v.) of the Hebrew text (Exa-
2 x, 86).

Encaenia (E'kana). (1.) When beaten temple
were converted to Christian use, they were purified by a solemn dedication, called Encornia, and by the sign of the cross; they also received new and appropriate names (Riddle, Antiq. vi, 2). (2) At a later period encornia denoted festivals kept in memory of the dedication of churches. In the church of Jerusalem, built by Constantine on the site of Calvary in honor of the Saviour, it was customary to observe an anniversery festival which lasted eight days, during which divine service was performed. The practice was soon adopted by other churches. In England the first Saxon bishops allowed the people liberty on the annual fast of the dedication of their churches, to hold themselves booths round the church, and to entertain themselves with eating and drinking. In Germany such a feast is called Kirchweide, church consecration, whence the English name Church Wake. The ceremonies and solemnities instituted at Oxford in honor of colleges, and benefactors of colleges are called encornia.—Bingham, Orig. Eccles. bk. xx, ch. viii, § 1. See Dedication.

Encamp (אֵנְכִּם, channah, 'to decline, e. g. of the day, Judg. xix. 9, i. e. evening; hence to "pitch" a tent, Gen. xxvi, 17, especially to "camp" down at night, as often rendered), among the Hebrews, primarily denoted the resting of an army or company of travelers at night (Exod. xiii, 20; Num. i, 80; comp. Exod. xvi, 22, xxv, 21), and hence in a passive sense (מַנָּחַל, manaḥel, camp, once מַנְחָלָה, manchnoṭh, 2 Kings vi, 9) is applied to the army or caravan when on its march (Exod. xiv, 19; Josh. x, 5; xi, 4; Num. xxxii, 7, 8). See MAHANAIM. Sometimes the verb refers to the usual arrangement of a siege (Ps. xxix, 3) or campaign (1 Sam. iv, 1), and occasionally it is attached to the establishment of a permanent abode (Isa. xxiv, 1). Among nomadic tribes war never attained the dignity of a science, and their encampments were consequently devoid of all the appliances of more systematic warfare. See War.

1. The description of the camp of the Israelites, on their march from Egypt (Num. ii, iii), supplies the greatest amount of information on the subject: whatever else may be gleaned is scattered hints. The tabernacle, corresponding to the chieftain's tent of an ordinary encampment, was placed in the centre; and around and facing it (Num. iv, 1), arranged in four grand divisions, corresponding to the four points of the compass (but not necessarily in the strict quadrangular form usually represented, since modern Arab caravans are ranged at night in a nearly circular manner), lay the host of Israel, according to their standards (Num. xxvi, 2). In the east (Gen. xxvii, 1) were assigned to the tribe of Judah, and round its standard railed the tribe of Issachar and Zebulun, descendants of the sons of Leah. On the south lay Reuben and Simeon, the representatives of Leah, and the children of Gad, the son of her handmaid. Rachel's descendants were encamped on the western side of the tabernacle, the chief place being assigned to the tribe of Ephraim. To this position of Ephraim, Manasseh, and Benjamin, allusions are made in Judg. v, 14, and Ps. lxxix, 2. On the north were the tribes of Dan and Naphtali, the children of Joseph, and the tribe of Asher, Gad's younger brother. All these were encamped around their standards, each according to the ensign of the house of his fathers. In the centre, round the tabernacle, and with no standard but the cloudy or fiery pillar which rested over it, were the tents of the priests and Levites, the holy vessels of the sanctuary. The Gershonites were on the west, and when on the march carried the tabernacle and its lighter furniture; while the Merarites, who were encamped on the north, had charge of its heavier appurtenances. The order of encampment was preserved on the march (Num. ii, 17), the signal for which was given by a blast of the two silver trumpets (Num. x, 5). The details of this account supply Prof. Blunt with some striking illustrations of the undecided coincidences of the books of Moses ('Unetics. Cordial p. 208).

In this description of the order of the encampment no mention is made of sentinels, who, it is reasonable to suppose, were placed at the gates (Exod. xxxiii, 28, 27) in the four quarters of the camp. This was evidently the case in the camp of the Levites (comp. 1 Chron. v, 6). The sanitary regulations of the camp of the Israelites were enacted for the twofold purpose of preserving the health of the vast multitude, and the purity of the camp as the dwelling-place of God (Num. v, 3; Deut. xxiii, 14). With this object the dead were buried without the camp (Num. xxi, 19), and the camp for seven days (Exod. xxxiii, 19). Captives taken in war were compelled to remain for a while outside (Num. xxxi, 19; Josh. vi, 23). The ashes from the sacrifices were poured out without the camp at an appointed place, whither all uncleanness was removed (Deut. xxiii, 10), where the entrails, skins, horns, etc., and all that was not offered in sacrifice, were burnt (Lev. iv, 11, 12; vi, 11; viii, 17).

The execution of criminals took place without the camp (Lev. xxv, 14, 15; Num. xv, 35, 36; Josh. vii, 24), as did the burning of the young bullock for the sin-offering (Lev. iv, 12). These circumstances combined explain Heb. xiii, 12, and John xix, 17, 20.

2. The encampment of the Israelites in the desert left its traces in their subsequent history. The temple, so late as the time of Hezekiah, was still "the camp of Jehovah" (2 Chron. xxxii, 2; comp. Psalm lxviii, 26); and (Lev. x, 4, 5), where were excluded till their leprosy departed from them (Lev. xiii, 46; xiv, 3; Num. xii, 14, 15), as were all who were visited with loathsome diseases (Lev. xiv, 3). All who were defiled by contact with the dead, whether these were slain in battle or not, were kept within the camp for seven days (Num. xxxix, 19). Captives taken in war were compelled to remain for a while outside (Num. xxxi, 19; Josh. vi, 23). The ashes from the sacrifices were poured out without the camp at an appointed place, whither all uncleanness was removed (Deut. xxiii, 10), where the entrails, skins, horns, etc., and all that was not offered in sacrifice, were burnt (Lev. iv, 11, 12; vi, 11; viii, 17).

High ground appears to have been unirnaturally selected for the position of a camp, whether it were on a hill or mountain side, or in an inaccessible pass (Judg. vii, 16). So, in Judg. x, 17, the Ammonites encamped in Gilead, while Israel pitched in Mizpeh. The very names are significant. The camps of Saul and the Philistines were alternately in Gilead, the "height" of Benjamin, and the pass of Michmash (1 Sam. xiii, 20, 26; 16, 23), and the former (the host of Gilead) being on the east side, the contending armies were encamped on hills on either side of the valley of Elah (1 Sam. xvi, 8); and in the fatal battle of Gibeon Saul's position on the mountain was stormed by the Philistines who had pitched in Shunem (1 Sam. xxviii, 4), on the other side of the valley of Jezreel. The carelessness of the Midianites in encamping in the plain exposed them to the night surprise by Gideon, and resulted in their consequent discomfiture (Judg. vi, 33; vii, 8, 12). But another important consideration in fixing upon a position for a camp was the propinquity of water; hence it is found that in most desertic camps were pitched near spring or well (Judg. vii, 3; 1 Macce. ix, 38). The Israelites at Mount Gilboa pitched by the fountain in Jezreel (1 Sam. xxix, 1), while the Philistines encamped at Aphon, the name of which indicates the existence of water. In Canaan, where the rivers and lakes are numerous, it is not unreasonable to consider it a favorite place of encampment (1 Sam. iv, 1; 1 Kings xx, 26; 2 Kings xiii, 17). In his pursuit of the Amalekites David halted his men by the brook Besor, and there left a detachment with the camp furniture (1 Sam. xxx, 9). One of Joshua's decisive engagements with the nations of Canaan was fought on the banks of the waters of Merom, where he surprised the confederate camp (Josh. xi, 5, 7; comp. Judg. v, 19, 21).
on, before attacking the Midianites, encamped beside the well of Harod (Judg. vii. 1), and it was to draw water from the well at Bethlehem that David’s three mighty men cut their way through the host of the Philistines (2 Sam. xxii, 16).

The camp was surrounded by the הָּרָּרה, magalāh (1 Sam. xvii, 20), or הָּרָּרה, magal (1 Sam. xxvi, 5, 7), which some, and Thesius among them, explain as an earthwork thrown up round the encampment, others as the barrier formed by the baggage-wagons. The etymology of the word points more to the circular shape of the inclosure formed by the tents of the soldiers pitched around their chief, whose spear marked his resting-place (1 Sam. xxvi, 5, 7; see Thomson, Land and Book, ii, 20 sq.), and it might with propriety be used in either of the above senses, according as the camp was fixed or temporary. We know that, in the case of a siege, the attacking army, if possible, surrounded the place attacked (1 Macc. xiii, 48), and drew about it a line of circumvallation (םיִּה, dytek, 2 Kings xxv, 1), which was marked by a breastwork of earth (םיִּה, meseillah, Isa. xiii, 10; הָּרָּרה, sõdelah, Ezek. xxii, 27 [22]; comp. Job xix, 12), for the double purpose of preventing the escape of the besieged and of protecting the besiegers from their rallies. But there was not so much need of a formal intrenchment, as but few instances occur in which engagements were fought in the camps themselves, and these only when the attack was made at night. Gideon’s expedition against the Midianites took place in the early morning (Judg. vii, 19), the time selected by Saul for his attack upon Nahash (1 Sam. xi, 11), and by David for surprised the Amalekites (1 Sam. xxx, 17; comp. Judg. ix, 38). To guard against these night attacks, sentinels (םיִּה, skemerim) were posted (Judg. vii, 20; 1 Macc. xii, 27) round the camp, and the neglect of this precaution by Zelah and Zalmunna probably led to their capture by Gideon and the ultimate defeat of the Midianites (Judg. vi, 19).

The valley which separated the hostile camps was generally selected as the fighting ground (םיִּה, sadeh, "the battle-field," 1 Sam. iv, 2; xiv, 15; 2 Sam. xviii, 6), upon which the contest was decided, and hence the valleys of Palestine have played so conspicuous a part in its history (Josh. viii, 13; Judg. vi, 33; 2 Sam. v, 22; viii, 13, etc.). When the fighting men went forth to the place of marshaling (םיִּה, maazarakh, 1 Sam. xvii, 20), a detachment was left to protect the camp and baggage (1 Sam. xvii, 22; xxx, 24). The beasts of burden were probably tethered to the tent pegs (2 Kings vii, 10; Zech. xiv, 15).

The הָּרָּרה, machanēk, or movable encampment, is distinguished from the בּמָלְא, mastabah, or בּמָלְא, nasib (2 Sam. xxiii, 14; 1 Chron. xi, 16), which appears to have been a standing camp, like those which Jehoshaphat established throughout Judah (2 Chron. xvii, 2), or an advanced post in an enemy’s country (1 Sam. xiii, 17; 2 Sam. viii, 6), from which skirmishing parties made their predatory excursions and ravaged the crops. It was in resisting one of these expeditions that Shammah won himself a name among David’s heroes (2 Sam. xxiii, 12). Machanēk is still farther distinguished from הָּרָּרה, mithbar, "a fortress" or "walled town" (Num. xiii, 19).

Camps left behind them a memorial in the name of the place where they were situated, as among ourselves (comp. Chester, etc., from the Lat. castellum). Mahaneh-Dan (Judg. xiii, 25) was so called from the encampment of the D. nites mentioned in Judg. xviii, 12. The more important camps at Gilgal (Josh. v, 10; ix, 6) and Shiloh (Josh. xviii, 9; Judg. xxi, 12, 19) left no such impress; the military traditions of these places were eclipsed by the greater splendor of the religious associations which surrounded them. (See Ker Porter, Travels in Persia, ii, 147 sq., 396 sq.; Rhodes, Tent-Life and Encampment of Armies in ancient and modern Times, Lond. 1868.)

Among the Ancient Egyptians, "the field encampment was either a square or a parallelogram, with a principal entrance in one of the faces, and near the centre was the general’s tent and those of the principal officers. The general’s tent was sometimes surrounded by a double rampart or fosso inclosing two distinct areas, the outer one containing three tents, probably of the next in command, or of the officers on the staff; and the guards slept or watched in the open air. Other tents were pitched outside these inclosures; and near the external circuit a space was set apart for feeding horses and beasts of burden, and another for ranging the chariots and baggage. It was near the general’s tent, and within the same area, that the al..."
tars of the gods, or whatever related to religious matters, the standards, and the military chest, were kept; and the sacred emblems were deposited beneath a canopy within an inclosure similar to that of the general's tent" (Wilkinson, i, 409, abridg.).

Enchantment stands in the Auth. Vara. as the representative of several Heb. words: usually some form of נאכש, nakhash (2 Kings xvii, 17; xxvi, 6; 2 Chron. xxxiii, 6; Lev. xix, 26; Deut. xvii, 10; Num. xxiii, 28; xxxiv, 1), literally to whisper a spell, hence to practice divination in general; נקוח, nakhash (Eccles. x, 11), of cognate form and signification, especially incubation, כַּלַּתו, kalato, literally to muffle up, hence to use magic arts (Exod. vii, 11; 29; 7, 19); מָשַׁל, masal, literally to cover with a cloud, hence to practice sorcery (Jer. xxvii, 9); and רְכַּב, rakhab, to bind, i.e. with a spell, to charm (Isa. xlv, 9, 12). The following are the specific forms which the black art assumed among the Hebrews. See also Amulet; Divination.

1. מַלְכָּה, malcha, or מַלְּכָה, melka, Enam. vii, 12; viii, 7; Sept. אָמֵל אֶרֶב, amel'ere'eb; to cover; though others incorrectly connect it with מַלָּה, to cover, a flame, or the glittering blade of a sword, as though it implied a sort of dazzling charmequin which deceives spectators. Several versions render the word by whisperings, דִּנְשָׁרִיתוֹת, dinnashritohoth, but it is a mere guesswork. In general, it is interpreted as meaning various means (some of them no doubt of a quasi-scientific character) by which the Egyptian charitumim imposed on the credulous of Pharaoh. See MAGICIAN.

2. מַכָּה, makha, Enam; Sept. φαραγιαί, pharagia, (2 Kings ix, 22; Mic. v, 12; Nah. iii, 4); Vulg. renfista, maleficia; "malefic artes," "præstigiæ," "mutua sunt generalia; hence it is opposed by kriocin, incantations, as in Isa. lxv, 9, 12. The belief in the power of certain formulas was universal in the ancient world. Thus there were carminine to evoke the tutelary gods out of a city (Macrobi. Sat. mar. iii, 9), others to devote hostile armies (Id.), others to raise the dead (Maimon. De idol. xi, 15; Seneca. Epist. lxxxvii); or bind the gods (κυσανθοῖς) and men (Ephra. Fur. 331), and even influence the heavenly bodies (Ovid. Met. vii, 207 sq; xii, 263; "Te quoque Luna trahs," Virg. Eccl. vii; Ax. iv, 489; Hor. Epod. v, 43). They were a recognised part of ancient medicine, even among the Jews, who regarded certain sentences of the law as efficacious in healing. The Greeks used them as one of the five chief resources of pharmacy (Pind. Pbyk. iii, 8, 9; Soph. Af. 582), especially in obstetrics (Plat. Theat. p. 145) and mental diseases (Galen. De Suntacet. tornad. i, 8). Homer mentions them as used to check the flow of blood (Od. xix, 456), and Cato even gives a charm to cure a disjointed limb (De Re Rrut. 160; comp. Plin. H. N. xlviii, 3). The belief in charms is still all but universal in uncivilized nations; see Lane's Modern Egyptians, i, 300, 306, etc.; ii, 17; Oudem. Besbooter van Nieuw Neederland; Herder's Congo (in Pinkerton's Voyages, xvi, p. 221, 278); Huc's China, i, 223; ii, 92; Taylor's New Zealand, and Livingstone's Africa, passim, etc.; and hundreds of such remedies still exist, and are considered efficacious among the uneducated. See Incantation.

3. מֶשֶׁל, meshel (Exod. x, 11; Sept. Φαραγιαί, pharagias, is especially used of the charming of serpents, Ex. xvii, 9; comp. Ps. lvi, 5; Exclus. xii, 18; Ex. x, 11; Lu-can, ix, 901—"a parallel to "cantando rumpitur aruanu" and "Viperes rumpo verbis et carneae fauces," Op. Metem. i. c.). Maimonides (De idol. xi, 2) expressly defines an enchant as one "who use strange and magical words, order the spirits of the fily of the credulous. They say, for instance, that if one utter the words before a serpent or sorcery it will do no harm" (Carpenz. Annot. in Godsagymum, iv, 11). An account of the Marsi, who excelled in this art, is given by Augustine (ad Gen. ix, 9), and of the Pyalli by Arnobius (ad Nat. ii, 32); and they are alluded to by a host of other authorities (Pliny, vii, 2; xxvii, 6; Eus- a. E. A. i, 57; Virg. Eccl. vii, 759; Str. Ital. viii, 658. They were also practised, it is said, by the Blemmyes, understood in the East (Lane, i, 106). See Charm.

4. The word מֶשֶׁל, meshel, neckachai, is used of the enchantments sought by Balaam (Num. xxiv, 1). It properly alludes to ophiomancy, but in this place has a general meaning of endeavoring to gain omens (Sept. τοιούτους πυρηνάς νομεύειν). See SOOTHSAKER.

5. מַכָּה, makha, is used for magic (Isa. xlvii, 9, 12). It means generally the process of acquiring power over some distant object or person, but this word seems also to have been sometimes used expressively of serpent charms, for R. Sol. Jarchi, on Deut. xvii, 11, defines the מַכָּה עָלָיו to be one who congregates serpents and scorpions into one place. See Magic.

Any resort to these methods of imposture was strictly forbidden in Scripture (Lev. xix, 26; Isa. xlvii, 9, etc.), but to this is opposed the tendency to infantile credulity (2 Kings xvii, 17; 2 Chron. xxxiii, 6), and we find it still flourishing at the Christian era (Acts xiii, 8, 9; viii, 11, yeixia; Gal. v, 20; Rev. ix, 21). See Witchcraft.

The chief sacræmenta demoniacæ were a rod, a magic circle, dragon's eggs, certain herbs, or "insane roots," like the hembane, etc. The fancy of poets, both ancient and modern, has been exerted in giving lists of them (Ovid and Hor. l. c.; Shakespear's Macbeth, Act iv, 1; Kirke White's Gondoliers; Southey's Curse of Kehama, cant. iv, etc.). See Sorcery.

Enclusa. See Enclusa.

Enolopium. See Reliquary.

Enracites (Egyp. Papyri, Continentes), a name given by several Church fathers (Irenæus, Eusebius, Epiphanius, Jerome, Augustine, Theodoret) to a particular Gnostic sect, but which, in the opinion of most of the modern Church historians (Neander, Hase), either designates collectively several Gnostic sects, or, in general, the tendency of Gnostic asceticism in the ancient Church. The Enracites condemned marriage, forbade the eating of flesh or drinking of wine, and used even at the celebration of the Lord's Supper water instead of wine, on which account they were called κατάρισσαι, aquarii. They were, generally, prescriptionists, and even adopted the new heresies based upon the principle of Dualism, in opposition to the asceticism of the Ebionites, Montanists, and others which kept within the limits of the Church. The Church fathers who regarded the Enracites as one sect of Gnostics, called Tatian (q. v.) its founder; but it is certain that there were Enracites before Tatian, and that subsequently there were Enracites who in some points differed from Tatian. Prominent men among the Enracites were, besides Tatian, Saturninus, Marcion, Julianus, Cestianus, and Severus, who is called the author of the Gospels. He was the first who made himself known as a violent opponent of the apostle Paul and of the Pauline epistles. In the 12th century the name of the Enracites was used, together with the names of several other ancient heresies, to designate and condemn the Bogomiles. See Eusebius, Hist. Eccl. xxv; Mosheim, Ch. Hist. xiii, 149, 282; Mosheim, Comment. i, 482; Hase, Ch. Hist. p. 64, 83; Lea, Sacerdotal Celibacy, p. 42; Lardner, Works (10 vols. 8vo), ii, 148 sqq.; Schaff, Ch. Hist. i, 245; Herzog, Real-Encycl. iv, 67; Wetzer u. Welte, Kirch.-Lex. iii, 575. See SACCOURIOT; TATIAN.

Encyclia, Enyclic Letters (from the Gr. Εὐκλείης, euclheis, one which has to be on the rounds of a certain number of men—litera episcopis, litera episcopales), in the ancient Church, letters sent by bishops to
ENCyclopedia 189

all the churches of a particular circuit. At present the name is exclusively used for letters addressed by the Pope to all the bishops of the Roman Catholic world. In the encyclicals the Pope lays down his views of the general wants of the Church, or of some prevailing demands and sentiments; he warns against dangerous movements, and attempts to pull together all divided fragments of the Church from abroad. He urges the bishops to be watchful, and points to the proper antidotes for existing evils. Among modern encyclicals, none attracted greater attention than that issued by Pope Pius IX, in Dec., 1864, against modern civilization. Vettor and Welte, Kirche und Lehren, vi, 540. See LITERA ENCICLIC.

Encyclopedia of Theology, a branch of theological science of comparatively recent origin. Its aims are to furnish (1) a sketch of the different branches of theology in their organic connection and outline, and also to the fitness of the various branches to theological science as a whole, and the relative importance of these branches; and (2) a plan of theological study, showing the order in which the topics should be taken up, and indicating the best methods for the study of each and the helps of all the works. This second branch, including the practical application of encyclopaedia, is generally called Methodology, and the whole science taken together is called by the double name Encyclopedia and Methodology. Of these, Encyclopedia is the objective side, the outline of the science itself; Methodology is the subjective side, having reference to the work of the student of the science.

I. History of the Science. In form, this branch of science is modern. When theology as a science was in its infancy, theological encyclopaedias as such were impossible. But at an early period, when such were prepared, was the treatise by Chrysostom, De Sacerdotio, the De officiis ministrorum of Ambrose, De doctrina christiana of Augustine, and a work of the same kind as the latter, De disciplina scholasticorum, attributed to Boethius (525), but probably written after his time. Cassiodorus (562) wrote De Institutione Divinorum Literarum, an introduction to the profitable study of Scripture, for the use of monks. In the 7th century Isidor of Seville wrote a larger work, a kind of general encyclopaedia, wherein he places great stress on the study of Scripture and the use of books, but it is more in the shape of pastoral theology, as is the De institutione clericorum of Rabanus Maurus in the 9th century. The latter contains, however (vol. iii), a sketch of the different branches of information necessary to a minister. The Didascalia (c. 145), a kind of manual for clergy, was at this time a complete manual of the character of a theological encyclopaedia—its 1st, 2d, and 3d books treating on the preparatory studies, and the others, 4th to 9th, on the exposition of Scripture and the study of the fathers (Liebner, Hugo e. st. Victor, p. 96). In the 19th century, Vincent of Beauvais (1224) in his Speculum doctrinale, gave a scientific exposition of several subjects, including theology. After these we find the writings of Nicolas de Cléanges (De studio theologico, d'Achery, i, 473), and Jean Charlier Gerson (De reformaciones theologice, and Epistola de Reformatione Seminarys Novarum, quod et quilibet studere debeat novus theologica auditor). But the real origin of the theological encyclopaedia is to be found in the time when the Reformation, in the 16th century, breaking through the bonds of scholastic divinity, brought in a new era for science, particularly in the field of Law. The new movement was marked by his Ratio s. methodus compendio pernissandi ad erarn theologiam (1519-1522), giving to theological studies a solid philosophical foundation, promoting the study of the Scriptures, and requiring from the theologian a knowledge of natural sciences. In the Lutheran Church we find first Melanthon giving a short guide to theological studies in his Brevis ratio discentum Theologice (Opp., Bas., 1541, i., 297). This was followed by a work of his pupil, Theobald Thamer, Adhortatio ad theologica studia in academias Marburgens, 1548. After this we find the Oratio de studio theol. recte inchoando, 1577, and Regnum studiosi sermon seu de ratione discendi in philosophos subbus reticulis instituti, 1589, both by Dr. Chrysopulos, the Constitution of theologice studio recte constitutum (Nurem., 1665), by Hieronymus Weller, the pupil and friend of Luther; the systematicus Methodus studii theologici publicis promotionibus in academia Jenaensi a. 1611 exposita (1629, 1622, 1624), by John Gerhard; and also the works of Jacob Andreae, de Stud. Stor. Litt. (Lips., 1657); Nicholas Selmecker (Notitio de Stud. Theologici (Lips., 1659); and Abr. Calov (Ingoege ad Theologiam). First in the list of encyclopedic works of the Reformed Church stands Bullinger's Ratio studii theologici, and the latter in the Seminarium doctrinae universalem liber ultimus. But more important than either of these is the work of Andreas Gerhard of Ypern (Hyperus), professor at Marburg (1649), Theologi, seu de ratione studii theologici (Basel, 1572, 1582), in which we find a first attempt to arrange the matter of the Encyclopaedia, the arranging of departments, exegetical, dogmatical, historical, and practical, though the extent of limits of each are not yet well defined. The writers on dogmatics often prefixed an encyclopedic essay to their works, as did J. H. Alsted in his Methodus sacrosanctae Theologiae (Hannover, 1629), which contains the necessary books of the different departments of theology. From the school of Saumur came Steph. Gauvin's Dissertationes de studiis theologici ratione, (1678, 6th ed., by Rambach, Hal., 1726). Calixtus (1665) wrote a copious Apparatus Theologicus (Helmst., edited by his son, 1681); and Spener (1705) gave grave and exact advice and discriminations in several of his writings:

The term encyclopedia, in its present meaning, we find for the first time in the title of a work by the Reformed theologian S. Mursinna, Prima lineae ENCyclopedia THEOLOGIII (Basel, 1742). But this, like all the works heretofore mentioned, has now only a historical interest. Herder's Briefe u. d. Studium d. Theologie (1785, 4 vols.) is on the other hand, even now of value in this field. A new era in the history of the theological encyclopaedia was inaugurated by Schleiermacher's Divisionen des theologischen Verstehens (Berlin, 1811; but the full effect of the book was not felt until its 2d edition appeared in 1819, although Bertholdt (Theol. Wissenschaften) and Francke (Theol. Encyclopädie, 1819), and Danz (Encyclopädie u. Methodologie der Theologie, 1822) have largely been guided by Schleiermacher's remarkable sketch. The powerful grasp of the whole science, and the luminous statement of the relations of all the parts, given by Schleiermacher, gives his Darstellung the foremost place in this branch of science. (There is an English translation by Farrar, not very well done, under the title Brief Outline of the Study of Theology, Edinb. 1860, 12mo). Its practical fault lies in the divisions made of the whole science (see below). It was followed by Hagenbach's Encyclopädie u. Methodologie der Theologie (Leips., 1833, 8vo), a work of great practical value, which has maintained its position as the most useful manual on the subject (7th edition, Leips. 1864, 8vo). The Encyclopædia d. theol. Wissenschaften of K. Rosenkranz (Halle, 1845) is thoroughly speculative and Hegelian. Hartung's Encyclopädie d. Naturwissenschaften (in the new direction by his Ratio s. methodus compendio pernissandi ad eram theologiam (1519-1522), giving to theological studies a solid philosophical foundation, promoting the study of the Scriptures, and requiring from the theologian a knowledge of natural sciences. In the Lutheran Church we find first Melanthon giving a short guide to theological studies in his Brevis
ment, broad in range, and accurate in literature. Holland has produced a valuable compendium in Clarisse, Encyclopedie Theologica Episcopi (2d ed. Lugd. Bat. 1835, 8vo), which has a copious literature, especially full in reference to English books, a matter in which the German writers on the subject are all signal dy deficient.

Among Roman Catholic books in this field are to be mentioned Possesinus, Bibliotheca selecta de ritu ministrorum (Colom. 1697); Ellis of the Pin, Method for studier la theologie (1716), translated into several languages, by Gray, Donnelly, Geeritt (1764), Braun (1777), Brandmeier (1783), and specially Ochterth, labored in this field. The influence of the later Protestant writers is manifest in such works as Drey, Kurze Ein, in das Stud. d. Theologie (Tibingen. 1819); Roe, Encyclopaedia (Mains, 1822); and also the Domesticus der Theol. Wissenschaft von dem System d. gesammten Theol'ge (Menzt, 1834 1840); Gengler, D. Ihle d. Wissenschatz. o. d. Encyclopaedie d. Theologiae (Bamb. 1834); Buchner, Enc. u. Method. (Sulzb. 1887); A. von Sieger, De natura fidei et methodo theologica ad ecclesiasticos educanda (Wurzburg, 1844); and also the complete Encyclopaedia of the Church.

No book properly to be called Encyclopaedia of Theology has appeared in English, and no book is more needed, as the English theological literature is almost wholly neglected by the Germans. (We are glad to see, as this article goes to press, 1868, an Encyclopaedia and Manual of Practical Theology in print (by Dr. H. B. Smith.) But there are many excellent remarks in English books of practical theology on the best methods of study, and some special treatises which deserve notice. Among them are Dodwell, Advice on Theological Studies (Lond. 1861); Bennet, Directions for Students (Lond. 1827, 3d edit. 8vo); Cotton Mather, Menss in Ministerium (Boston, 1726, 12mo, republished, with additions, as Mather's Student and Preacher, by Ryland (Lond. 1781); Mason, Student and Pastor (Lond. 1755); Marsh, Course of Lectures on Divinity (Cambridge, 1808, 8vo), which gives good practical hints; and also attempts an encyclopaedic outline; Doddridge, Lectures (Works, Lond. 1803, 215 sq.); Bickersteth, Christian Student (Lond. 4th edit. 1844), contains much information and good advice, but is destitute of scientific form or spirit. There are many compendia, such as (Protestant) Theological Manual (1860), Smith's Compendium (1886), etc., which are superficial sketches of theology, designed to aid students in cramming rather than in thorough work. Many good hints are given in books of pastoral theology, for which see Practical Theology. There is also a list of books in Lowndes's British Librarian, p. 818 sq.

II. Method of Theological Encyclopaedia and Methodology.—1. Some writers hold that encyclopaedia should be treated entirely apart from methodology: so Kien- len, Encyclopaedia (Strass. 1842), confines the former to the exposition of the relation of the several branches of theology to the science as a whole; making methodology a separate work, aiming, not to set forth the science at all, but to show how it should be studied. This view is correct, if encyclopaedia be taken in its broadest sense, merely an introduction to the subject. taking the beginner by the hand at the portals of the science, and showing him the way to enter, and the plan of the edifice, but also as forming the conclusion of the course of study, in which all the branches are exhibit ed in their natural relations to the central trunk. But in the practical use, most of the recent writers blend methodology with encyclopaedia in one connect ed whole.

2. We give here the methods of the chief writers on the subject. (1.) Schleiermacher (§ 31) divides theology as science into three branches, Philosophical, Historical, and Practical. Philosophical theology includes, 1. Apologetics; 2. Polemics. Historical theology includes, 1. Exegetics, or the knowledge of primitive Christianity; 2. Church history, or the knowledge of the earthly career of Christianity; 3. the knowledge of the present condition of Christianity (a) as to doctrine (Dogmatic theology), (b) as to social condition and extension (Ecclesiastical statistics). Practical theology includes, 1. Liturgy (service in church, Homiletics, Pastoral care); 2. Church government. (2.) Hagenbach adopts the old and useful division of theology into four parts, Exegetical, Historical, Systematic, and Practical. Exegetical theology includes a knowledge of the sacred books, as the primary source of all the facts of the religion. Systematic theology gives an account of the general facts of the religion. This knowledge presumes a knowledge of the languages of the sacred books, and requires also an apparatus (1) of criticism; (2) of history, viz. archeology, geography, etc.; (3) of interpretation (hermeneutics). Historical theology includes Bible-history of Old and New Test: Bible, Church history, Doctrine history, Patristics, Symbolics, Archeology, Statistics. Systematic theology includes Dogmatics, Apologetics, Polemics, and Ethics. Practical theology embraces Catechetics, Worship, Homiletics, Pastoral care, Practical knowledge of the Church; the Church, (a) as its base, (b) as to its organization, (c) as to its active working.—Dr. W. F. War ren, of the Boston Theological Seminary, gives a philosophical but luminous outline in Joh. Partner. f. Deutschke Theologie (I. 1867, p. 218 sq.); Thomas (Bullet. Thol. Sept. 1868) proposes a scheme as follows: 1. Apologetics (historical and philosophical); 2. Historical theology (Biblical science, Church history, Statistics); 3. Systematic theology (Dogmatics, Polemics, Speculative theology); 4. Practical theology (the individual, the family, the church, the nation, the church, (a) as to its base, (b) as to its organization, (c) as to its active working.—Dr. W. F. Warren, of the Boston Theological Seminary, gives a philosophical but luminous outline in Joh. Partner. f. Deutschke Theologie (I. 1867, p. 218 sq.); Thomas (Bullet. Thol. Sept. 1868) proposes a scheme as follows: 1. Apologetics (historical and philosophical); 2. Historical theology (Biblical science, Church history, Statistics); 3. Systematic theology (Dogmatics, Polemics, Speculative theology); 4. Practical theology (the individual, the family, the church, the nation, the church, (a) as to its base, (b) as to its organization, (c) as to its active working.)
and carried through, in the midst of difficulties, chiefly by his indomitable industry and perseverance. The name of D'Alembert (q. v.) added lustre to the publication; and these two called to their aid all the sceptical and free-thinking talent of France. A great aim of the Encyclopédists was to establish what they called philosophy as a substitute for religion, and the intellectual spirit of France seemed to become thoroughly imbued with their views, social, moral, and political. The Encyclopédie was a product of the same causes which generated the Revolution, but the publication itself doubtless greatly hastened the catastrophe. It was only one among a host of the works of that revolution which commenced with Locke; expanded into the deism of England; and, crossing over to France, found a powerful advocate in Condillac. The progress of this development was very rapid. Among the Encyclopédists a single lifetime produced startling changes. Diderot, the editor and leading philosophic spirit of the Encyclopédie, "was at first only a doubter, next he became a deist, lastly an atheist. In the first stage he only translated English works, and even condemned some of the English deists. His views matured and hardened, probably under the influence of Voltaire's writings and of the infidel books smuggled into France, and he thenceforth assumed a tone bolder and marked by positive disbelief. Diderot's atheism is a still farther development of his unbelief. It is expressed in few of his writings, and pronounced so as not to inhibit; it seeks to invalidate the arguments for the being of God drawn from final causes" (Farrar, Critical History of Free Thought, p. 179). D'Alembert, the scientific editor of the Encyclopédie, was the author of the celebrated Discours Prélinaire des Éditeurs, which was issued in separate form and became the book of infidelity not only in France, but also in England. D'Alembert's reputation in the department of science was very great over the entire continent of Europe, and he gave to the Encyclopédie its high scientific character and value. (See ALEMBERT, n. v.) There has been much discussion as to whether the Encyclopédie proper really was issued in the interests of atheism. Many of the articles are entirely Christian in their tone and spirit. Others are as definitely atheistic, while the Discours Préalable can hardly be called so. One of its chief characters, Diderot, perhaps under the view seems to be that the Encyclopédists endeavored clandestinely to accomplish what more honest infidels had long attempted openly. They endeavored to undermine both religion and the state, while seeming to be in favor of them. Voltaire doubtless stands at the head of those who furnished the basis for the Encyclopédie, although he wrote little for it himself. More than any other man he was the educator of the Encyclopédists. His principles are too well known to need statement. Helvétius derived his philosophy from Locke. "He was the moralist of the sensational philosophy, one who applied the philosophy of Condillac to morals. His philosophy is expressed in two works: the one on the spirit, the other on man; the former a theoretical view of human nature, the latter a practical view of education and society. His primary position is, that man owes all his superiority over animals to superior organization, and that natural moral law is the only good, and self-interest the true ground of morals, and the frame-work of individual and political right" (Farrar, History of Free Thought, p. 180). Next come the authors of the Systeme de la Nature, a work issued by the Encyclopédists. It has been attributed to Baron d'Holbach, his tutor Lagrange, Diderot, Grimm, Helvétius, and Robinet. It was doubtless a joint work, and expressed the views of all these men, or was a compromise creed to which they could all subscribe, for they held widely different opinions in other respects. The great object of the System of Nature was to banish God from the universe. It is devoted to the boldest materialism. "There is, in fact, nothing but matter and motion, says this book. Both are inseparably connected. If matter is at rest, it is only because hindered in motion, for in its essence it is not a dead mass" (Schwegler, History of Philosophy). The first part of this work undertakes to disprove the existence of God, the second part is devoted against religion. This System of Nature was the boldest achievement of infidelity, a work which even Voltaire pronounced "Bilogetical in its deductions, absurd in its physics, and incomparable in its morality." To those already named we may add Rousseau, whose Poëtique has been a standard work in the literature of the Revolution. He did for the state what the others had done for the Church. Such, then, were the views of those who projected and carried forward the Encyclopédie. If in the Encyclopédie itself we find those views covered up, or at least offset by thoroughly Christian ones, we are justified in believing that they were, so to say, balanced and reconciled by contrary opinions only to make the Encyclopédie acceptable to the unthinking masses of the French nation. "The fact, as some hold, that the French nation was ripening for a revolution both in Church and State, and was under the influence of Voltaire's writings and of all the hazards, proves nothing respecting the motives of the encyclopédists; and the terrible quickening which their great popular work gave to infidelity is perhaps the best test by which to judge the purposes of its authors." Let us look more closely at the Encyclopédie itself, and its spirit can perhaps be best read from the Discours Préalable. D'Alembert was its author, although he probably secured both the approval and assistance of Diderot in its form and contents. The object of this Discours is to set forth the philosophy underlying the Encyclopédie, and this is a discussion of the sensationalism of Locke. D'Alembert declares that "all our abstract knowledge may be reduced to what we receive through our senses." Showing that this may be the case, he hence argues that it is so. Sensation: are the only things about which we can have knowledge. With regard to ethics, the following is his underlying principle. Our ideas of good and evil "arise from the oppression which, by nature, the stronger practices upon the weaker, and the latter bears more reluctantly the more violent it is, because he feels that there is no reason why he should submit to it; the evils which befall us through the vices of our fellow-men lead to the indirect knowledge of antagonistic virtues." These are the grounds upon which his philosophy is based. And yet this Discours is made infidelity more popular to the unthinking masses than the Encyclopédie itself. Helvétius, De la Mettrie, or Holbach had done. Such is the sensational materialism contained in the Discours Préalable, containing the ethical principle that we feel a sense of oppression only because we can see no reason why we should submit to it. And yet, by the side of this, the same Discours we find the following statement: "Nothing, therefore, is more necessary than a revealed religion, which instructs us concerning so many things. Designed for the completion of our natural knowledge, it shows us a portion of what was concealed from us; but confines itself to the individual. This is an useful and necessary thing, but it remains forever hidden. A few points of faith, and a small number of practical precepts, is all to which the revealed religion refers; yet, thanks to the light which it communicates to the world, since then the people are more firm and decided concerning a great number of interesting questions than the philosophers of any school ever were." In this way infidelity and religion were woven into the same system, religion being always held subordinate, a something to accomplish an end which science and philosophy could not quite reach. This being once admitted, it was not difficult to persuade the French people that, when philosophy
could accomplish all that is necessary, religion might be set aside.

In the body of the Encyclopedia itself, many of the articles upon religious subjects are apparently in full sympathy, and even harmony. For instance, the article "Trinité" defends the orthodox dogma from attacks of Socinians, Jews, and infidels of all kinds. In the article "Dieu" the arguments for the existence of God are ably summed up, and objections are refuted. Quotations are made from Christian writers and the writer of the work seems to have been in full harmony with the Christian view of the subject.

The existence of angels and devils is recognised. The article "Christiâme" pronounces Christianity the only true revealed religion, and the Old and New Testaments are recognised as divine. It declares that the severest criticism has not been able to invalidate their authenticity. Reason and philosophy must accord to them the honor of setting forth facts beyond their reach. The hand of God is seen in the style of the sacred writings. Articles on Protestantism contain nothing in derogation of divine trine; every departure from the established creeds of the various denominations. The errors of the Roman Church are pointed out and severely castigated. It is not necessary to suppose these articles written in a spirit of hypocrisie. Their authors doubtless held the view that it was the duty of men to examine the truth that it was not in their power to invalidate the opinion that the Encyclopedia was secretly issued in the interests of atheism. Its authors could well afford to give Christian men a voice within its pages, when there was so much to counteract all they might say. It was not that Christianity had no advocates in the Encyclopedia, but that it was allowed only a feeble defence, and was often defended on principles which directly tended to its overthrow. Its very defenders, in many cases, were its worst enemies, and only erected fortifications on the side of religion to super easily be carried away by infidelity. The defence is made chiefly to rest on these.

Christianity should be upheld because it brings us more good than any other system of religion. Whatever system is most advantageous for man in his worldly relations is the system to which he should adhere. Whatever men can be made to believe that Christianity fails to do this, then it must be set aside. For example, in the article "Christianisme," Christ is placed side by side with the other lawgivers, his only superiority being that, while they kept the useful in view, he aimed at the true as well as the useful. All the other things of life, earth, and heaven, were considered as necessary to be made happy in this world. In other places morality is preferred to faith, "because he who does good and makes himself useful to the world is in a better condition through moral than through faith without morality." This is better than atheism, because it is more advantageous for nationals to admit the existence of God than to reject it.

The work began to appear in 1751, and was concluded in 1765, in 17 vols. fol., besides 11 vols. of plates. A supplement, in 5 vols., appeared at Amsterdam, 1776-1777, under the title La Table des matières, in 2 vols., at Paris, in 1780. The publication was stopped before two or three times by the government, and the last volumes were distributed privately, though the king himself was one of the purchasers. Didon, the author of the work, endeavouring to please all, he had not "neither time nor means of being particular in the choice of his contributors, among whom some were excellent, but most of the rest were very inferior; moreover the contributors, being badly paid, worked carelessly; in short, it was a patch-work composed of very ill-sorted materials, some masterpieces by the side of school-boys' performances; and there was also considerable neglect in the arrangement of the articles, and especially in the references."

In spite of all its defects, the Encyclopedia was the pride of France, and is in many respects a very able production. See Le Porte, Esprit de l'Encyclopédie (Paris, 1788); Voltaire, Questions sur l'Encyclopédie (Paris, 1770); Van Millert, Boyle Lecture, 1, 578; Kurzt, Church History, 296; Farrer, Hist. of Roman Thought, p. 166-178; Tenennam, Manual Hist. Philosophy, p. 578; Schweger, Hist. Philosophy, translated by Seytée, p. 206; Chambers, Encyclopédia; Herzog, Real-Ency

End of the World. See ESCHATOLOGY.

Endeavor, Christian. See p. 1043 of this vol.

Bn'dor (Heb. Eyn'Dor; יְנֵבֹד fountain of Dor, i.e. of the age, I Sam. xxviii, 7, Sept. 'Ewâp v. r. Ayâv; but defectively יְנֶבָד in Josh. xxi, 11, Sept. דַּוַּא v. r. 'Ewâp; and יְנֶבָד in I Sam. xlviii, 10 [11], Sept. 'Ayâv; Josephus 'Ewâp, Ant. vi, 4, 12], a place which, with its daughter-towns (יְנֶבָד), was in the territory of Issachar, and yet possessed by the Philistines (Josh. xvi, 27). This was the case with five other places which lay partly in Asher, partly in Issachar, and seem to have formed a kind of district of their own, called "the three, or the triple Nepheh" (q. v.). The Israelites were unable to expel the Ca
nanites from it until a late period. Endor was long after the defeat of the Philistines (I Sam. xxviii, 7). Endor is not again mentioned in the Scriptures; but it was known to Eus
tebius and Jerome, who described it (by the same name, 'Ewâp and 'Ewâp, "Endor and Endor") as a large village in the plain of Jezeel or Edreelon, 4 miles S. of Tabor (Ouomant. s. v. 'Ewâp, "Endor"); near Nain and Sichonessa (Josh. xvi, 27). Tabor is the name given to the mound (Jer. iii, 19); Endor (v. r. 'Ewâp, Endor and Endor) seems to have been one of the villages recognized during the Crusades (Brocardus, c. vi, p. 176; Marin. Sanut. p. 248), but was then partially lost sight of till the 17th century (Doubdan, p. 580; Nau, p. 639; Maundrell, Apr. 19). On the bleak northern slope of Mount Hebel Da'aur ("Jeel Da"our of travellers) the name still lingers, attached to a desolate and deserted village (Burchardt, Trans. p. 342; Robinson, Res. iii, 218; Schwartz, Palest. p. 149). The rock of the mountain, on the slope of which Endor stands, is hollowed into caves, one of which, containing a little fountain, the entrance narrow, between rugged rocks, and partly covered with a fig-tree, may well have been the scene of the incantation of the witch (Van de Velde, Narratives, ii, 382). The distance from the slopes of Gilboa to Endor is 7 or 8 miles, over difficult ground (Porter, Άπατος, ii, 532).

B'n'ss. See Baca.

Enc-gla'lin (Heb. Eyn-egl'olin) [Heb. Eyn Egl-'ol
e'i-n, יְנַבְּאֹלִין fountain of two calxes, unless for יְנַבְּאֹלִין fountain of two pools; Sept. 'Ewâylâi'în v. r. Ewâylâlî'î, a place named by the Hebrews (xlvii, 10). This place is mentioned as on the Dead Sea, but wheth
er near to or far from Engedi, on the west or east side of the sea, it is impossible to ascertain from the text: "The fishes shall stand upon it from Engedi even to Enc-gla'lin: they shall be a place to spread forth nets." In his comment on the passage, Jerome places it at the extremity of the northern piece of the Dead Sea, opposite to the Jordan. M. de Saulcy thinks it identical with Aškâbâ, situated towards the northern point of the Dead Sea, between Jericho and the Jordan (Narratives, i,
ENMESSAR 193 ENFIELD

183). See BETH-HOGHLAM. En-eglam is probably another name for the Eglaim (q. v.) of Isa. xxv, 8.

Enemes sar (Ἐνημέσσαρ and Ἐνεμέσσαρος) is the name under which Shalmaneser (q. v.) appears in the book of Tobit (1, 2, 13, 15, 16). The change of the name is a corruption; the first syllable Skl̄ being dropped (therefore the Bpall̄, which represents Nibopolosar), and the order of the liquids as and being reversed. The author of Tobit makes Enemessar lead the children of Israel into captivity (1, 2), following the apparent narrative of the book of Kings (2 Kings xvii, 3-6; xviii, 9-11). He regards Sennacherib not only as his successor, but his son (1, 15), for which he has probably no authority beyond his own speculations upon the text of Scripture. See TOMB.

Ennisus (Ἐννίσος ν. ι. Εννίος, Valg. Enma-
siar), one of the leaders of the people who returned from captivity with Zorobabel (1 Esdr. v, 8); corresponding to the Naamani (q. v.) of Nehemiah (vii, 7).

Energici, a sect in Germany in the 16th century, so called because they held that the Eucharist was the energy of Jesus Christ—not his body; nor a representation thereof.—Buck, Theol. Dictionary, s. v.

Enercokomuans (ἐνερκομούνας), persons possessed, and, in the narrow sense and more strictly, persons possessed by an evil spirit. In the early Church such persons constituted a distinct class, bearing some relation to the catechumens and the faithful, but differing from them in this, that they were under the special care of exorcists, while they took part in some of the religious exercises of both classes. Catechumens were become disordered in mind during their term of probation were not baptized until thoroughly recovered, except in cases of sickness. Should any among the baptized become thus afflicted, they were excluded from the Christian assembly during the worst stages of their disease, being compelled to remain in the area of the church. From this circumstance they were called χειμοτόμοι, exposed to the weather. When partially recovered they were permitted to join in public worship, but were not permitted to partake of the Lord's Supper till they were properly restored, except in the immediate prospect of death.—Bingham, Orig. Eccl. bk. iii, ch. iv, § 8, 6.

Enfanti, BARTHÉLEMY PROSPER, more commonly called father Enfantin, one of the founders of Saint Simonism (q. v.), was born at Paris Feb. 8, 1796. He received his education at a lyceum, and subsequently (1812) entered the monastery of a Benedictine nun of the order. After a short time he engaged in commercial and industrial pursuits. Towards the close of the year 1825 Enfantin became intimately acquainted with Olinda Rodriguez, and through him with Saint Simon, who converted him to his theories of an industrial and religious reformation. He accepted from his dying master the mission to spread and develop his doctrines. The work was begun with the establishment of a journal called Le Producent (1825-26, 5 vols.), which closed its career with the celebrated epistle, The golden age, which a blind truth has here formerly placed in the past, is still before us. The Liberal party at first saw in this periodical the application of its own ideas to the material order, and supported it; but the support was withdrawn when Benjamin Constant denounced it as atheistic. In 1828 Enfantin had about a dozen collaborators, among whom were Blanqui, Duveyrier, Buchez (in 1848 president of the Constituent Assembly), and Pierre. The revolution of 1830 filled Enfantin with enthusiastic hopes. He signed, on the 30th of July, a proclamation, in which he demanded community of goods, abolition of inheritance, and the emancipation of workers. This was followed by a political agitation, Enfantin occupied himself only with ethics, art, religion, and social reform. He desired first of all to regulate individual relations, to emancipate woman and the pauper, and to sanctify the flesh by labor and pleasure. He expected to obtain by this system the dislocation of the structure of the state. In November, 1831, he issued a manifesto to the forty thousand adherents of the new doctrine in France, that Bazard and Rodrigues had separated from him, and that the new dogmas had become incarnate in him alone, as the living head of the messiahs. But his attempt to establish communitarian colonies failed, and the researches made for finding a female messiahs, to share with him the leadership of the communion, made the whole movement ridiculous. The Globe, which was gratuitously distributed, had to be discontinued.

In the recent government suppressed the sect of Saint Simonism; Enfantin, followed by about forty of his disciples, among whom were Michael Chevalier (subsequently a member of the senate), Duveyrier, and Gustave d'Eichtal, retired to an estate which he possessed on the coast of Menilmontant, and there organised a model communitarian society. There the new brothers, divided into groups of laborers, wore a peculiar garb, and passed the day in work, religious conferences, and mystical ceremonies. The "father" (Enfantin) had this name conspicuously inscribed upon his breast, superintended, preached, encouraged; he wrote articles for Le Peuple, addressed the Liévre Nouveau, composed mystical hymns, and developed some mystical pantheism. It cost him great efforts to refute the attacks of Carnot, J. Reynaut, and others. He was then summoned before the assises of the Seine, being charged with having held forbidden meetings, and outraged public morality, and was condemned to a year of imprisonment (August 28,1882). The Saint Simonians now dispersed. Enfantin, who after a few months was set at liberty, left with about a dozen of his disciples for Egypt. Most of them, turning Mohammedan, in 1846 published a tract on the principles of the Saint Simonians; but Enfantin refused to profess Mohammedanism, and after remaining in Egypt for two years, returned to France. He was for a time postmaster, and in 1841, through the influence of his friends, some of whom had obtained high offices, was appointed member of a commission to administer the finances of Napoleon. In 1848 he received the chief direction of the Lyons railroad. In November, 1848, Enfantin, conjointly with Duveyrier, established a daily paper, Le Crédit, which was continued until 1850. Subsequently Enfantin became connected with the administration of the railroad from Lyons to the Mediterranean. He died May 31, 1864. Shortly before his death he appointed Arles Dufour head of the sect.

Enfantin developed the socialist views of his master and his own in the works Economie politique et St. Simonienne (Paris, 1831) and Morale (Paris, 1832). The latter work has been translated into English as Cour d'amiéne. Another work of the same class, Le Liévre nouveau (completed in 1832), has never been printed. His philosophical and theological views were set forth at length in the Correspondance philosophique et religieuse (Paris, 1847), of which the Correspondance politique (Paris, 1838-39) has been a sequel. He was the Jesuit curat, father Rémi (L'Étoile du Père Rémi, Paris, 1856). His last work was La Vie Eternelle passée, présente, future (Paris, 1861; also republished in the Bibliothèque utile, Paris, 1864). In 1865 a collective edition of his socialist works was published at Tournai. The more important of his works were: Vapereau, Dictionnaire des idées et des mots; V.; Hocot, Nouv. Biogr. Génér. xxvi, 37. (A. J. S.)

ENFIELD, WILLIAM, LL.D., an English Dissenter.
and voluminous writer, was born at Sudbury March 29, 1741, and was educated at Daventry under Dr. Ashworth. On leaving the seminary he became pastor to a congregation at Liverpool. He afterwards became resident tutor and lecturer at Warrington Academy. In 1785 he became minister of the Unitarian Church at Norwich, where he died Nov. 8, 1787. Among his numerous publications were (1) A History of Philosophy, drawn up from Brucker (Lond. 1781, 2 vols. 8vo).(2) The Preachers' Directories (2 Eds. 1811, 1to),(3) Family Register (Lond. 1778, 2 vols. 12mo).(4) The English Preacher (Lond. 9 vols. 12mo). He was a frequent contributor to periodicals, and shared with Dr. Aikin in the preparation of the General Biographical Dictionary.

En-gaddî (in aiyîgalîs v. r. 'En-gaddî and in qaddî, or in qâdûs, Vulg. in Codex), Ecclus. xxiv. 14. See EN-GEDDI.

En-gamnim (Heb. Egm Gennim), "fountain of gardens," the name of several places in Palestine, for, besides those mentioned below, there was said, according to Eusebius and Jerome (Onomast. s. v. 'Hyaryvi, Engananim), then to be a third village called Engananim ('Hyaryvi, Enganami) near Gerasa, beyond the Jordan. (3) Sept. ('Hyaryvi v. r. unrecognizable; Vulg. Ecclus. xxiv.) A town in the plains of Judah, mentioned between Zanoah and Tappuah (Josh. xv. 84). Eusebius and Jerome state (Onomast. s. v. 'Hyaryvi, Engananim) that it was still extant in their day near Bethel; but there must have been some mistake in this, as the place in question lay in the group N.W. of Jerusalem (Keel, Comment. on Josh. in loc.), possibly at the site of the present agricultural village Rama, north of Eleutheropolis (Robinson, Researches, ii. 354). Schwartz, however, thinks (Pallast. p. 102) that "Engananim is certainly identical with the village of 'En-gamnim, 5 miles S.E. of Engananim," but this is not in the quarter indicated by the associated names, and is, moreover, with greater probability still connected to another ancient locality. See ZEAM.

2. A city on the border of Issachar (Josh. xix. 21; Sept. 'ewr eel TYpOyvi, Alex. 'ewr Garvii; Vulg. En-gamnim). To the south of this town is a few miles the village of Leje Levites (xxi. 29; Sept. Piwy 'yyryâwmu; Vulg. En-genanim); probably the same (see Roland, Palest. p. 812) as the Geansia (Ivania) or Geans (Iyaniav) of Josephus, on the borders of the great plain toward Samaria (Ant. xx, 5; 1 War, iii, 5, 4; comp. ii, 12, 9). According to the Bible, Josephus identifies the town with the present Jenin, a town 16 miles south of Mount Tabor, and which he and others describe as still a place of gardens and abundant water (Wilson, Land of Jhbeil, ii, 84; Van de Velde, Narratio, ii, 539; Schwartz, Pallast. p. 167). In the lists of Levitical cities in 1 Chron. vi, AENIK is substituted for Engananim, apparently by contraction. The position of Jenin is in striking agreement with the requirements of BTH-NA-GAN (A. V. "the garden-house;" Sept. BâthAvi) in the direction in which Ahaziah fledJehu (2 Kings ix, 27). The rough road of the ascent was probably too much for his chariot, and, keeping the more level ground, he made for Megiddo, where he died (Stanley, Palest. p. 842). The place is several times noticed by Arabian writers in connection with the march of Saladin, and has been visited by many modern travellers (Robinson, Researches, iii, 156). The only remains of the ancient town are a few walls close to the mosque of the present town (De Sauley, Narratio, i, 78, 79). The town is high enough to overlook the broad plain, and low enough to have its houses enclosed by its verdure. The hills rise steeply behind the town, and here and there are clothed with the sombre foliage of the olive. Rich gardens, hedged with prickly pear, extend along their base, and a few palm-trees give variety to the scene. The "fountain," from which the town took part of its Scripture name (En), is in the hills a few hundred yards distant; and its abundant waters flow over and fertilize the "gardens" (Gennim) from which the second and chief part of the name is derived. The leading road from Jerusalem goes north to Samaria, and Jerusalem passes Jenin. It contains about 2000 inhabitants, and is the capital of a large district (Porter, Handbook, p. 381; Thomson, Land and Book, ii, 189).

En-ge'dî [many En-gedi, some En-gedi'] (Heb. Egm Gedî, "fountain of the kid;" Sept. in Jos. 'Hyaryvi v. r. 'Ayânsh, in Sam. 'Eyânedî, in Chron. and Cant. 'Eyânedî v. r. 'Hyaryvi and in Pâdî, in Ezek. 'Eymnudî v. r. 'Iyshvîn, Apor. Engan- nimi; Josephus 'Eyânedî; Pulfey 'Ganami and Ayman; Stephanus Byx. 'Eyânedî, p. 383; Eusebius 'Hyaryvi, Onomast. s. v.; Pliny, Engaddi, Hist. Nat. v. 17), a town in the wilderness of Judah (Josh. xv, 62), on the western shore of the Dead Sea (Ezek. xlvii, 10), which gave its name to a part of the desert whither David withdrew with his followers (I Chron. xxi, 16; Josh. xvi, 1-4). Its more ancient name was Hazezon-Tamar (q. v.), and by that name it is mentioned before the destruction of Sodom, as being inhabited by the Amorites, and near the cities of the plain (Gen. xiv, 7); a title ("the pool of the palm") does not appear from the past-springs that surrounded it (Ecclus. xxiv, 14). It was immediately after an assault upon the "Amorites, that dwelt in Hazezon-tamar," that the five Mesopotamian kings were attacked by the rulers of the plain of Sodom (Gen. xiv, 7; comp. 2 Chron. xx, 2). Saul was told that David was in the "wilderness of En-gedi," and he took "3000 men, and went to seek David and his men upon the rocks of the wild goats" (1 Sam. xxiv, 1-4). These animals still frequent the cliffs above and around the fountain; the Arabs call them Badk. At a later period Engedi was the garrison referred the Moabites and Ammonites who went up against Jerusalem, and fell in the valley of Bersachah (2 Chron. xx, 2). It is remarkable that this is the usual route taken in the present day by such predatory bands from Moab as make incursions into Southern Palestine. They pass round the southern coast of the Dead Sea, 62 miles from the road along its western shore to the pass at Ain-Jidy ("the ascent by the cliff Ziz," 2 Chron. xx, 16), and thence toward Hebron, Tekoa, or Jerusalem, as the prospects of plunder seem most inviting. The vineyards of En-gedi were enriched by the Sidonian soil (Gen. xiv, 10); its name is summed by Josephus (Ant. ix, 1, 2). Stephanus of Byzantium places it near Sodom; Jerome at the south end of the Dead Sea (Commen. in Ezek. xlvii); but Josephus more correctly upon the Lake Asphaltites, at the distance of 800 stadia from Jerusalem (Ant. ix, 1, 2; comp. xvii, 14, 4; War, iii, 5, 5). In the time of Eusebius and Jerome, Engedi was still a large village on the shore of the Dead Sea, but it must have been abandoned very soon afterwards, for there is no subsequent reference to it in history, nor are there any traces of recent habitation (Porter's Handbook, p. 384). There is understood to mean the Mandrakes, or the Mandrake Tree, (Prov. 179), who says that the district between Jericho and the Dead Sea is the "land of Dangadda" (Fr. d'Engadda), and that the balm-trees were "still called vines of Gady." Engedi has always, until recently, been sought for at the south end of the Dead Sea (Roland, Palest. 449); but in 1806 Sutter rediscovered the ancient name in the Ain-Jidy of the Arabs, and lays it down in its map at a point on the western shore nearly equidistant from both extremities of the lake. This spot was visited by Dr. Robinson, and he confirms the idea that the village was ancient, but the site lies among the mountains, a considerable way down the descent to the shore. Here is a rich plain, half a mile square, sloping very gently from the base.
of the mountains to the water, and shut in on the north by a lofty promontory. About a mile up the western scarp, and at an elevation of some 400 feet above the plain, is the fountain of Ain-Jidy, bursting forth at once in a fine stream upon a sort of narrow terrace or shelf of the mountain, having an abrupt margin towards the lake. The water is sweet, but warm, and strongly impregnated with lime. The stream rushes down the steep descent of the mountain below, and its course is hidden by a luxuriant thicket of trees and shrubs belonging to a more southern clime. Near this fountain are the remains of several buildings, apparently ancient, although the main site of the town seems to have been farther below. The whole of the descent below seems to have been once terraced for tillage and gardens, and near the foot are the ruins of a town, exhibiting nothing of particular interest, and built mostly of unworked stone. This we may conclude was the town which took its name from the fountain. On reaching the plain, the brook crosses it in nearly a straight line to the sea. During a great part of the year it is absorbed in the thirsty soil. Its banks are now cultivated by a few families of Arabs, who generally pitch their tents near this spot. The soil is rich and fertile, and in the climate it might be made to produce the rarest fruits of tropical climates; but vineyards no longer clothe the mountainside, and neither palm-tree nor balsam is seen on the plain.

The Wilderness of En-Gedi is doubtless the immense peninsula of the wild region of the Dead Sea, which must be traversed to reach its shores. It was here that David and his men lived among the "rocks of the wild goats," and where the former cut off the skirts of Saul's robe in a cave (I Sam. xxi., 1-4). "On all sides," says Dr. Robinson, "the country is full of caverns, which might then serve as lurking-places for David and his men, as they do for outlaws at the present day." He adds that, as he came in sight of the ravine of the Gibraltar, a mountain-goat started up and bounded along the face of the rocks on the opposite side of the river (Revel. i., 209). M. de Saulcy imagines that he has identified the particular cave in question with one in that vicinity now called Bir el-Mahbikah (Narrative, i., 163).

Engelbert, abbot of Admont, of the Benedictine order in Styria, was born of noble parents about 1250. He became abbot of Admont about 1297, and died 1320, leaving a great number of works, of which the principal are: De oris, progressus et fine imperii Romani, published by Gaspar Brusche (Basle, 1568, 8vo; Mentz, 1609, 8vo); — Tractatus super passionem secundum Matthæum; de statu defensorum; de Providentia; de causis longinquitatis hominum ante biblæum; — Speculæum virtutum. Several of his works were published by the learned Benedictine monk Pes, partly in the Theaurus Anecdotorum Novissimorum (Augsb., 1721), partly in the Bibliotheca austriaca antiquo-nova (Ratisbon, 1729-25). A biography of Engelbert, and a complete list of all his works, are given by Puh, in an introductory essay in the 1st volume of the Theaurus, and in the preface to the 8th volume of the Bibliotheca.— Hoefn., Novae. Biog. Géner. xvi, 48; Wetzer u. Wettel, Kirchen-Lex. iii, 590. (A. J. S.)

Engelhardt, Saint, archbishop of Cologne, was a son of count Engelbert I of Berg-Geldern, and was born in 1185. When he was twenty-two years old the king of France offered him the archbishopric, but he declined it on the ground of youth and inexperience. In 1215 he was elected archbishop of Cologne. With great energy he reorganized the electorate, which, under the administration of his predecessors, had become quite disordered. He extinguished its debt, recovered those portions of its territory which had been lost, and acquired new ones. When the emperor Friedrich II was called to Italy, Engelbert was appointed head of the regency to which he was intrusted in the interest of the empire. As archbishop, Engelbert made the utmost endeavors to reform the corrupt habits of the clergy, and to repel the interference of the nobility in ecclesiastical affairs. The rigor with which he carried through his principles made him many enemies, and on the 19th of August, 1237, he was murdered at Gevelsburg by his nephew, count Friedrich von Isenburg. The murderer was captured and broken on the wheel; the bishops of Münster and Osnabrück, who were charged with complicity, were excommunicated; and Engelbert, on account of his zeal for ecclesiastical reform, was elevated to the rank of number of saints. A life of Engelbert, by Caesar of Heisterbach (q. v.), was, in 1680, edited by Gelenius, with many learned remarks and additions (Vindelius libertatis ecclesiæ et martyris St. Engelberthi, Colonie, 1630); see also Ficher, Engelbert der Heilige, Cologne, 1858; Wetzer u. Wettel, Kirchen-Lex. iii, 590. See also COLOGNE. (A. J. S.)

Engelbrecht, Johann, a visionary theologian, was born in Brunswick 1696. He was sickly from his youth, and suffered dreadfully from melancholy, caused by physical pain as well as by mental disturbance. He believed himself (after 1628) the subject of revelations and visions, and went from house to house preaching and narrating his supernatural acquisitions and knowledge of heaven and hell. Some preachers, like Paul Egard, in Holstein, gave very favorable testimonials of his character and his preaching; but the larger number took offence at his pretended revelations, and persecuted him. In Hamburg, where he spent several years, he was imprisoned, during the last years of his life he lived in great retirement in his native city. He died in 1644. Though unlettered, he wrote several books, especially a View of Heaven (Brunswick, 1618); and they were collected in 1640, and again in 1697, in editions of his Works and Offenbarungen (Brunsw. and Amsterd.). Some of his writings have been translated into French and English.—Hersch, Real-Encyklop., iv, 32.

Engelhardt, Johann Georg Veit, a German theologian, was born at Neustadt on the Aich, Nov. 12, 1791. After studying for three years at the University of Erlangen, and being for several years a tutor in his own family, he was, in 1815, consecrated deacon at a church in Erlangen and professor at the gymnasium. In 1820 he became lecturer at the University of Erlangen, and obtained the degree of doctor of divinity; the next year he was advanced to an extraordinary, and in 1822 to an ordinary professorship at the university. The latter position he held until his death, Sept. 13, 1855. For several years he held the office of university preacher, and five times he was elected rector of the university. From 1848 to 1848 he was a deputy of the university in the Bavarian diet. The king of Bavaria conferred upon him the title of ecclesiastical councillor and the order of St. Michael, and the city of Erlangen the right of honorary citizenship. In the history of theological literature, Engelhardt has secured a lasting place by his manuals of Church history and history of doctrines (Handbuch der Kirchengeschichte, 4 vols., Erlangen, 1838-34; Dogmengeschichte, 2 vols., Neustadt, 1889). He gave special attention to the study of the history of mystic theology. His intention to write a comprehensive history of this theology he did not find time to carry out. On Nov. 7, 1826, he was a witness at a deposed canoness on the subject. Among the most important of this class of his works are those on Dionysius Areopagita (Disertatio de Dionysio platonice, Erlangen, 1820; De origine scriptorum Areopagiticorum, Erlang. 1823; Die angehl. Schriften des Areopagitus, Liberar., 1829; Dionysius Areopagita, Erlang. 1829, 2 vols.); on Plotinus (Plotinii Enneades, libri, et mitt
were of much inferior strength. Darts varied similarly from small beams to large arrows, and the range they had exceeded a quarter of a mile, or about 450 yards. All these engines were constructed upon the principle of the sling, the bow, or the spring, the last

Roman Ballista.

Ancient Egyptian Testudo.

1. The Hebrew חשקון, chisshakhon (2 Chron. xxvi, 15), lit. invention (as in Eccles. vii, 29), is its counterpart in etymological meaning, each referring to the ingenuity (engine, from ingenium) displayed in the contrivance. The engines to which the term is applied in 2 Chron. were designed to propel various missiles from the walls of a besieged town; one, like the balista, was for stones, consisting probably of a strong spring and a tube to give the right direction to the stone; another, like the catapult, for arrows, an enormous stationary bow. The invention of these is ascribed to Uzziah's time—a statement which is supported both by the absence of such contrivances in the representations of Egyptian and Assyrian warfare, and by the traditional belief that the balista was invented in Syria (Pliny, vii, 56). Of the balista and catapult it may be proper to add that they were of various powers. For battering walls, those were some that threw stones of fifty, others of one hundred, and some of three hundred weight; in the field of battle they

Ancient Assyrian War-engine.

2. Another military engine with which the Hebrews were acquainted was the battering-ram, described in Ezek. xxvi, 9, as רכש כבל, rmksh' kobolo', lit. a beating of that which is in its front, hence a ram for striking walls; and still more precisely in Ezek. iv, 2, xxvi, 22 as רכש, r'mk, a ram. The use of this instrument was well known both to the Egyptians (Wilkinson, Anc. Eg. i, 339) and the Assyrians. The references in Ezekiel are to the one used by the latter people, consisting of a high and stoutly-built framework on four wheels, covered in at the sides in order to protect the men moving it, and armed with one or two pointed
England. Church of. The proper designation of this church since the Act of Union in 1801 is "The United Church of England and Ireland." The Reformed Church of England dates from the 16th century; but it is convenient to treat in this article of the rise of Christianity in England, and of its growth under the protection of the State. (The free churches of England are given under several of these titles in this work.)

I. HISTORY.—(1) Early Period (to the mission of Augustine, A.D. 596). 1. To the Saxon Invasion, A.D. 449. It is generally believed that Christianity was introduced into Britain before the end of the 2nd century. Tertullian (+ about 220) speaks of places in Britain not reached by the Romans, but yet subject to Christ (Britannorum inassae Romanis loca, Christo vero subditae). Eusebius, indeed, declares that some of the apostles preached in Britain (Act. xvi, 6; xxix, 24; Ezek. xxvi, 8) is incorrect. An engine for battering the wall is mentioned in the reign of King David (2 Sam. xx, 15); but the instrument itself for throwing it down may have been that above noticed, and not the battering-ram. The ram was, however, a simple machine, and capable of demolishing the strongest walls, provided access to the foot was practicable, for the mass of cast metal which formed the head could be fixed to a beam lengthened sufficiently to require between one and two hundred men to lift and impel it; and when it was still heavier and hung in the lower floor of a movable tower, or helopeista, it became a most formidable engine of war—one used in all great sieges from the time of Demetrius, about B.C. 306, till long after the invention of gunpowder. Towers of this kind were largely used at the destruction of Jerusalem (q. v.) by the Romans. See BATTERING-rams.

Little is accurately known of the real state of Christianity in this period. Pelagianism took root in Britain (the native country of Pelagius), and the British bishops called in Germanus and Lupus from Gaul, who refuted Pelagius at the conference of Verulam (A.D. 408). They were followed by a learned clergy from Llandaff, making Dubricius bishop, with extensive jurisdiction. The monastery of Bangor (Bangor), near Chester, was founded at about the same time.

2. From the Saxon Invasion, 449, to the Invasion of the Anglo-Saxons, 596. — Hengist and Horsa, retained by Vortigern as a war leader, were followed by those who survived the war, and whose language became the Scotch and Picts from Britain, remained in the island as conquerors. The greater part of Britain was again plunged into barbarism, and Christianity kept its ground only in Wales and Cornwall. (Its history in Ireland and Scotland is given in separate articles.) The patron of Wales, St. David (died 589), is said to have been consecrated a bishop at Jerusalem; he held a synod against Pelagianism at Brevy, and became archbishop of Caerleon (see David, St.). In Cornwall the British rites and usages were preserved until near the close of the 8th century. Iona, where Columba (q. v.) established his monastery in about 565, was a centre of light not only for Scotland, but also for north Britain (see Iona).

(II.) Middle Age: Era of Submission to the Popacy (6th to 12th century). — Up to the 6th century British Christians had been discontented with their ecclesiastical rulers. But at that time Gregory the Great determined to seek the conversion of the English Saxons to Christianity. Ethelbert, king of Kent, had married a Christian wife, Bertha, daughter of Chilbert, king of the Franks. She induced her husband to favor Christianity, and then persuaded the monarch to invite Augustine (sent by Gregory), who, with a number of monks, landed in 596. They converted Ethelbert, who was not only king of Kent, but Bretwalda, or chief of the Saxons. His example was soon followed by the kings of Essex and East Anglia, and gradually by the whole of England. It is said that 10,000 English were baptized within the year of Augustine's arrival. In 597 Augustine went over to Aries, in France, where he was consecrated by bishop virgilius, and on his return he became the first bishop of Canterbury, and was immediately endowed by king Ethelbert, who likewise established the dioceses of Rochester and London. Another portion of the Anglo-Saxons were converted by Aidan and other Scottish missionaries. But the ecclesiastical system set up by the Roman missionaries was entirely of the Roman type, and was in many cases introduced, if the term can be used, out of the Church of England. The old British Church in various points, e. g. the reckoning of Easter, the clerical tonsure, chasms, etc. More important were the questions of the marriage of the clergy and of the papal jurisdiction. Wherever the Roman influence prevailed, the Roman view of course was adopted. But Scottish and Irish missionaries were also at work in the kingdom, and up to the 7th century the converts of the latter were probably in the majority. In 664, king Oswy of Northumberland held a conference at Whithby, where Colman (q. v.) of Lindisfarne maintained the old British and Irish views, and Wilfrid the case for the mission of Augustine. The king was persuaded by Wilfrid (or perhaps by his queen, who was a Romanist), and went over to the Roman party. Colman and all his clergy then went to Ireland. In 686 the pope sent over Theodore to be priest of England, and under his administration (688-698) the Roman and British Churches (whence remained of them) were fused into one body. See Theodore. But for many ages we hear little of any exercise of jurisdiction by the popes in England: the English bishops and kings did not permit appeals to Rome. When Wilfrid, bishop of York, appealed, A.D. 680, against an English synod which had deposed him from his diocese, and obtained a decree in his favor from the pope, that decree was disregarded in England, even Theodore himself refusing to obey it. From this period England was in formal connection with the see of Rome up to the time of the Reformation. A few great names shine amid the general gloom, e. g. Bede (c. 720), Alfred, king of Wessex, the Anglo-Saxon, from the time of Alfred, grew more and more Romish. "At length, from the time of Gregory VII (A.D. 1073), the papal jurisdiction was pushed into England, as it was into other countries; legates made frequent visits, held councils, exacted taxes, and so on. All the other iniquities of papal usurpation, followed each other in rapid succession; and for four centuries no country in Europe suffered more, and with greater reluctance, than England. But the popes and the kings of England had, after much struggle, to yield the supremacy. The Church was their prey" (Palmer, Ch. History, ch. xxii).

The Norman Conquest took place A.D. 1066. From this period, for several centuries, the history of England is full of struggles between the ecclesiastical and royal power for supremacy. William the Conqueror refused to recognize the pope as spiritual ruler, and declared his right to retain in his own hands the investiture of bishops and abbots which the early Saxon kings had possessed. He prohibited the publishing of papal bulls and letters of advice till they were translated into English. He removed the ancient tithes and revenues of the Church, and declared him, deprived the clergy of the right of excommunication of any of his nobles except with his express permission. On the other hand, he confirmed by charter a law of Edward the Confessor, granting to the clergy tithe of cattle and profits, in addition to the ancient tithe of corn; and committed a still greater error in establishing ecclesiastical courts, to which alone clerical persons were thenceforth to be amenable. The "spiritual courts" became an enormous power in supporting the Roman domination. In 1075 celibacy was first made imperative on the English clergy. "Under Henry I., besides, a synod met at Westminster, 1102, which passed various reforming measures, the nature of which attests the existing depravity and degradation of the Church. This synod prohibited simony, and the pope ruled that lay investiture was simony; and on this question a rupture between the pope and the English king, and the latter's efforts to maintain the rights of investiture, which he had received with the crown, Henry felt himself compelled to relinquish them to the pope, and only got permission from the pope for bishops to do hagmace to ordain without him, but the latter was removed from their sees. None of the proposed measures of reform accomplished any result. The morals of the clergy were thoroughly relaxed; murder by a person in holy orders was quite a usual occurrence; against such offenders there was no resort to common law, and ecclesiastical courts rarely intercessed with them. A case of this kind gave rise to the protracted struggle between Thomas à Becket, archbishop of Canterbury, on the side of the pope, and Henry II. for himself and people" (Raddel, Cyclopedia, s. v.). The "Constitutions of Clarendon" (see Clarendon) were intended to prevent the power of the Church of England from growing to the extent of breathing the ecclesiastical power; but the resistance of Becket (q. v.), his murder, and the repentant fears of the king, caused their speedy revocation in all the points to which the pope objected. "It was not, however, till the reign of John, that England, and the king resigned his crown to the pope, that the papal encroachments rose to their height; and the weak reign of Henry III. which followed, did nothing to abate them. Edward I. gave a check to the power of the clergy, subjected them to taxation, and passed the statute of of provisions, which prohibited the transfer of land without the king's consent. There is little to be said as to innovations in doctrine
during these three centuries; but it may be noted that about the middle of this period, viz. 1218, the Council of St. John Lateran declared transubstantiation, or the bodily presence of Christ in the consecrated elements, to be a tenet of the Church" (Chambers, s. v.).

In 1380 the important statute of Provisions was passed. It was designed, so far as it could, to ensure that English benefices were reserved to the pope or to alien clergy, and it provided that the pope should confer no English benefice on any one without consent of the king. The statute of Provisions (1389; enlarged 1380) forbade any interference of the Church with the state. It was an act of the English civil courts to the pope. The statute of Mortmain (in Magna Charta), and the various amendments and additions to it, all aimed to prevent the accumulation of property in the Church. See Mortmain.

In the reign of Henry II certain German Church reformers found their way to England—probably Walensian Christians; and, though they were bitterly persecuted, all the good seed did not perish. In 1227 John Wycliffe was born. He preached against the supremacy of the pope, and against the doctrine of the sacraments. In 1371 he was arrested for heresy, but no harm came to him. His translation of the Scriptures, and other writings, made a great impression upon the more educated classes, but his labors had little effect upon the mass of the people. After his arrest he was imprisoned, and many of his followers were numerous enough to form a party and to get the designation of Lollards (q. v.), and for a century persecution for Lollardism was common in England.

"Henry IV thought it necessary to fortify his usurped position by assisting the bishops against the Lollards, and from this time to the Reformation there was an uninterrupted succession of confessors and martyrs. Sir John Oldcastle, lord Cobham, was the most illustrious of these sufferers. Fox gives a detailed account of nearly twenty individuals burned for heresy between the death of lord Cobham and 1509, when Henry VIII ascended the throne. To some extent, the blood of these martyrs was the seed of the Reformed Church; but we must not overlook the 'hidden seed,' which was growing secretly from the time that Wycliffe gave to his countrymen a translation of the Scriptures in their own tongue. There were many among them who entered the study of Greek, led to a better understanding of the sacred books, whilst the invention of printing (1442) caused a wider circulation of them" (Chambers, s. v.). See Wycliffe; Lollards.

(III.) From the Reformation to the present time. The Reformation, however, was not outwardly apparent fairly established in England at the time of the accession of Henry VIII in 1509 [see Henry VIII], and his minister, cardinal Wolsey, maintained the splendor of the Church to a degree unexampled in England. Nevertheless, the great edifice was already undermined. In view of the facts cited in the last paragraph, it is absurd to say, as Roman writers do, that the source of the English Reformation is to be found in the vices of Henry VIII. However, it was not till the reign of that monarch that the Reformation in England and France was pronounced. The Lutheran declaration of war against the pope, Henry wrote his treatise on the seven sacraments against Luther's book, Of the Common of Babylon, and was repaid by the pontiff with the title of "Defender of the Faith" (1521). The king had married his brother's widow, Catharine of Aragon, and for marrying her, and for her, he had divorced a divorce, "to revenge himself on Charles V for having disappointed him of the papacy; but after the king began to look with favor on Anne Boleyn, one of a house from whom Wolsey had everything to fear, he adopted a covert policy of opposition to the divorce he had suggested. When at last he was pressed on every side, with no open way before him, and his own ruin imminent, his course became tortuous, and was marked by a constant endeavor to procrastinate the proceedings, and delay any sentence being pronounced on this question by the pope. The issue was, in consequence of the advice of Cranmer, an appeal to the universities, and to the learned men of Christendom, for their opinion; and this was the only valuable service of the whole of Cranmer's history; and for the most part, of Henry. The disgrace of Wolsey followed thence. See WOLSEY. Henry's marrel with the pope daily became more palpable. Convocation was summoned in 1531, and charged with breaking the statutes of provisions and premonstrance. They had no effect upon the pope, for their diatribe was turned into a schism was made by this Convocation, but it was under the pressure of the court. They proclaimed the king of England 'only and supreme lord, and, as far as the law of Christ permits, even the supreme head of the Church of England.' In 1535, on the elevation of Cranmer, the see of Canterbury, he pronounced sentence of divorce between Henry VIII and Catharine; and the marriage of Anne Boleyn to Henry was publicly notified. The pope declared this illegal, and threatened, unless these doings were undone, that he would proceed to excommunicate the king. To prevent any such proceedings affecting the stability of his throne and his succession, in the following year Henry caused Parliament to abolish all papal authority in England, and to stop all payments to the Roman exchequer. After this came, under Thomas Cromwell, all the changes and rearrangements that were to be made. All the changes in England from which it never recovered—namely, first, a visitation, and then, as a consequence, the suppression of the monasteries, because 'they had long and notoriously been guilty of vicious and abominable living.' Among the bishops there were two parties; one whose sympathies were with Rome, and another with reform; to the former belonged Bonner and Gardiner, to the latter Cranmer and Latimer. But it was necessary to have some authoritative declaration of what the Church of England held since it had rejected the pope; and hence, in 1586, the king, as head of the Church, issued a declaration on this subject, and in 1589 Parliament passed an act for establishing the Creed, under the rather characteristic title, 'An act for abolishing diversity of opinions.' By this the doctrine of transubstantiation was taught, and the word of doctrine, burning with zeal on Henry's death, of it. All who stood out for the necessity of the communion in both kinds, or for the marriage of priests, or against the observance of vows of chastity, or the propriety of private masses, or the fitness of auricular confession; all priests who shall marry after having saving views of church renewal, with the pains of death as felons; and all those who maintain the same errors under any other manner may be imprisoned during the king's pleasure" (Mackintosh). Henry felt compelled to go on and increase the distance which separated him from Rome. There was in the Church a powerful party (Cranmer, Latimer, and many others of less note) that were of progressive tendencies, and to this party Thomas Cromwell, during his continuance in power, lent all his influence. His favor shown to the Protestant cause was one ground of his fall. About this time, two editions of the English Bible were printed and circulated with the permission of Henry. They were based upon Coverdale's translation. To Cranmer and Cromwell the permission to circulate them is due, and the command to place them in the cathedrals for public use, and for ministers to instruct these people in their reading. But the tide of political power now turned in favor of the Romanist party, and these permissions were withdrawn: the Bible became again for a time a prohibited book, and many who had received enlightened views of truth suffered bitter persecution. In 1640 Cranmer persuaded Henry to appoint a commission, of which he was made a member, to draw up a formal
confession. This appeared under the title, The Eru

dition of a Christian Man. It indicates some progress,
since it only recommends prayers for the dead as 'go
gods'; but became, I know, what condition departed souls are in, we ought only to
recommend them to the mercy of God.' It affirms
justification by faith, though it modifies this declara-
tion so far as to add, 'Yet man, prevented by grace,
is by his free consent and obedience a worker toward
the full realization of the justifications of God in the
worship of images, though it allows their use to excite
devotional feeling. It altered some minor matters
also in the service. Such was the character of the
Church of England's first confession. The Reformers
were gaining strength, and under Edward VI and the
Presbyterians were victors in both triumphs; in 1559, the
Thirty commissioners were sent through the country to
abolish superstitious practices. Cranmer drew up
thirteen homilies, which were appointed to be read in
the churches where the ministers could not preach.
This was one of the provisions made of the diffusion of
some religious knowledge. This step, and the ser-
mons themselves, elicited the unqualified approbation of
the Continental Reformers. Cranmer wrote also a
catechism, which was generally circulated. Such the-
ologians as Bucer and Peter Martyr were invited to
 come. COMMON PRAYERS. In 1549, at Cranmer's instigation, the
English universities, and the most strenuous exertions were made to provide preac-
ching; 'one sermon every quarter of the year at least'
in every church being imperative. But such was the
state of the Romish clergy that even this much they
could hardly accomplish. In 1547 Parliament repealed
the laws of Henry VIII and earlier reigns, levelling against the new opinions, as they are
often called. As Convocation was inclined in favor of
the Romish party, Parliament assumed to itself the task of reforming the Church. It passed that year
acts 'concerning the sacrament,' ordaining the com-
munion to be in both kinds, as undoubted, the
priest to communicate alone, and requiring him to
prepare the people for worthily communicating by an
exhortation on the day preceding its celebration. In
1548 there was a commission appointed for the revision
of the offices of public worship. While the first fruits
were a new communion service. Confession was no
longer made imperative. At the same time a new
liturgy was compiled. At the end of it occurs the peti-
tion—'From the tyranny of the bishop of Rome and
all his detestable enormities, good Lord, deliver us.' See
ARTICLES, THIRTY-NINE. The commission
appointed in 1532 to prepare a canon law, in con-
sequence of the death of Edward, was discontinued
before its work was done. Under his reign the pro-
gress of reformation had been rapid, but it was to be
sorely tried. Mary ascended the throne (1553) and re-
established Romanism. Bonner and Gardiner were
restored; the Book of Common Prayer and Catechism
were declared heretical; the king's authority was restored
to the see of Rome; a persecution of the chief reform-
ners commenced—Roger was burned at Smithfield,
Hooper at Gloucester, Saunders at Coventry, Taylor
at Hadley. The prisons were filled with 'heretics;'
many fled beyond sea; some purchased safety by an
outward show of submission. Latin was the language
they perished in the flames at Oxford. Cardinal Pole
was made primate. One benefit was conferred on the
Church by Mary—she surrendered all the Church
lands, as well as the first-fruits and tenth, which had
been seized by Henry. At last the death of Mary (1558),
with which that of the cardinal was all but simultaneous, delivered the Church from its oppress-
ors. Under Elizabeth (1558-1603) Protestantism was
again in the ascendant; and by the various measures
which were taken, the Reformation in England
was completed. The Convocation of 1562, besides drawing
up the Thirty-nine Articles, published two volumes of
Latin Commentaries, and Latimer and Nowell, dean of St. Paul's, to draw up a catechism for
general use. See NOWELL.

"About this time the more extreme reforming party
began to appear (see PURITANS), and to exert their in-
fluence specially in all the questions which arose about
the quality of the various services; and the extreme jealousy of her supreme authority often ob-
structed the plans for reform which the more zealous
clergy contrived—a jealousy which brought her into
collision with the primate himself, as on the subject of
'the prophecies.' The works of the great Conti-

the famous Savoy Conference (q. v.) met, with Baxter as leader of the Presbyterian party, and Sheldon as that of the bishops, to try, if possible, to unite both sides. As might have been expected, the plan failed. In 1662 the Act of Uniformity was passed; and, rather than take the test it prescribed, 1900 Puritan clergy left the Church, and were ordained. The boldest stroke of persecution, followed those persecuting acts, the Corporation, Convocative, and Five-Miles Acts. Still further grievances were inflicted by the Test Act of 1672. Next arose another school of divines—"Christian philosophers rather than divines." Their lives were moral, but their metaphysics were grossly stupid. It was characterized by the word "philosophy." When a plan for "comprehension" was revived in 1668, the House of Commons prohibited such a measure being introduced. When James, duke of York, professed Roman Catholicism, Charles at once proclaimed complete toleration. This was in 1672; but the Commons the year following denied him to withdraw his indulgence. Popery they were determined to resist. When James came into power he proclaimed similar indulgencies, and forbade preaching against Romanist errors; say, in defiance of the enactment, that he would not admit the office of Commis- sion. These measures the clergy resisted. In consequence of his resistance, the bishop of London was suspended for a time. The University of Cambridge came into collision with the king, and also Magdalen College, Oxford. Rather than do what might advanta- ge the Church and the State, the University of Cam- bridge resolved to resist. But James renewed his declaration, and commanded that it should be published in the churches. Eighteen out of twenty-five bishops refused to do so, and nearly all the clergy. The bishops were compelled to cite the recusants, but they refused. Seven of them—Lloyd, Ken, Turner, Lake, White, and Trelawney—even drew up a remonstrance, and, as a consequence, were sent to the Tower. Their committal to it had rather the appearance of a triumphal entry, from the enthusiasm displayed by the people on their behalf. They were tried at Westminster Hall, and the name of their acquittal was received with rapturous delight on all hands, for all felt that they were committed to a struggle against an insidious attempt to restore Popery. The royal career of James was now ending, and his further school of Puritanism was not created, four of razing years in his reign. The Prince of Orange landed (5th of November, 1688). One of William's earliest acts was the passing of a tolera- tion bill in 1689; but an act of comprehension was rejected in the Commons. In September of that year a commission was appointed to revise the liturgy and canon law of the Church. Protestant proposals were rejected by Convocation. Three of the seven bishops mentioned above refused the oath of allegiance to William and Mary. They headed the party known as the Nonjurors, which ceased to exist as an independent Episcopalian Church in 1780; but many of them became attached to the Scotch Episcopalians" (Chambers, s. v.). See NONJURORS.

During the period just described a school of divines was formed who, in seeking to avoid Puritanism on the one hand, and Romanism on the other, became Lateranists of a sort. They became Christian philosophers rather than divines; and in an occasional dissertation on the Trinity or a Whitsunday sermon, in which the work of the Holy Spirit was carefully guarded against mystical abuses, they scarcely interfered with matters of Christian doctrine. Still they were a new element in the Church, and in their learned age remarkable for pastoral diligence. Amongst the leaders were Whitchothe, Cudworth, Wilkins, and Worthington; some of these were known to be men of emi- nent piety, but it was more apparent in their lives (and, since their deaths, by their private diaries) than in their preaching. They were equally afraid of super- stition on the one hand, and enthusiasm on the other. They loved the constitution of the Church, and were well satisfied with the liturgy; but they did not think all other forms unlawful. They wished to see a spirit of greater moderation. They continued on good terms with Nonconformists, and allowed great freedoms, not only in philosophical speculations, but in religious doctrine. The most radical of them were content with the reasonableness, rather than the scriptural warrant of the truths of religion, led them to be regarded as Socinians. They were all zealous against Popery; and the Papists cried them down, in return, as Atheists, Deists, or, at best, Socinians, and men of no principle at all. The sect of the sect was called by those who opposed them Socinians. Patrick, Lloyd, and Stillingsfleet were the greatest divines of the next generation, but still with the faults of the school in which they had been educated. They received, and long bore, the title of the Latitudinarian divines; and, in the sense in which we have explained it, the charge was just. They attended a divorce between evangelical doctrine and Chris- tian practice. The former they at first neglected, and at length lost out of sight; the latter they displayed with admirable clearness, and, if any other principles than those of the Gospel concomitant to it, they would not have so completely failed. But the founders of the school made no deep impression in the days of Charles II., and their still more gifted pupils saw religion in the Church of England almost expiring in spite of all their efforts" (Marsden, Churches and Churchmen, 1706-1806, sect. I. 1802). But the birth to two noble philanthropic schemes—the Society for the Promotion of Christian Knowledge, which circulates Bibles, Prayer-books, and Tracts; and in 1701 the Society for the Propagation of the Gospel in Foreign Parts was chartered. In 1747 Convocation was dissolved.

"That the Church of England, after fighting for its very existence against Popery on the one hand, and against Puritanism on the other, should have sub- sided into inactivity during the dull reigns of the Georges, is less a matter of surprise than of regret. The minds of men, even in a God-forsaken, not to say infidel age, may easily account for, though it cannot excuse, her idleness. But that in the rise of John Wesley, 1730, she should have fail- ed to see a grand opportunity for herself, is a matter both of regret and blame. For if, with all her resources, she cannot hope that such another will ever present itself. See Methodism; Wesley. The ut- most that can be hoped is that she has seen her error. The next important event in the history of the Church is the Act of Union, which came into effect on the 1st of May, 1801, as between all their altars. The effects of the Union of England and Ireland in all matters of doctrine, worship, and discipline. The Reformation had made some progress in Ireland under Edward VI. Five Protestant bishops were appointed in 1559, and the English Bible and Liturgy were introduced in 1551; but, from a variety of causes, the Reformed doctrines have never found much acceptance with the native population, and, although a Protestant Church was established by law, it was and is the Church of the minority. See IRELAND. In 1635 the English Articles were received, and in 1662 the English Book of Common Prayer was adopted. Before the political union of the countries, the two churches were in full communion. By an act of the imperial Parliament in 1833, ten of the Irish bishops were suppressed, and the funds thus obtained were applied to the augmenta- tion of small livings, and the building and repair of churches (Chambers, Cyclopaedia, s. v.). It is now proposed (1868) to "disestablish" the Episcopal Church in Ireland, and the proposal will doubtless be carried into effect.

In the progress of the 19th century great changes have passed over the Church of England. The forma- tion of the Church Missionary Society (see Mi-
ROMAN SOCIETIES), of the Bible Society, etc., and especially the influence of Methodism, awakened the long dormant spirit of aggressive Christianity. Since 1800 more than 3000 churches have been erected. About 1890 several earnest young men in the Universities adopted as a profession the study of the Bible, and of deep interest in Church questions. In reaction, perhaps, from the latitudinarianism of the 18th century, their studies lay chiefly in the fathers and mediaval writers, and in 1838 they began the publication of the Oxford tracts, calling for a revival of obsolete usages, and bringing an end to what had been called rationalism in views in theology. A brief history o. this movement is given under PUSEYISM; it must suffice to say here that many young clergymen, as the result of the movement, went over to Rome; and those of the school who remained gave rise to modern PUSEYISM (q. v.), which tends to import the spirit, doctrines, and practices of the Church of Rome into the Church of England. In the autumn of 1867 a conference of bishops of the Church of England, and of the churches in communion with the English, was held at Lambeth. The object of this assembly was to establish a closer union between all branches of the Anglican Church. A resolution censuring bishop Colenso, of Natal, for his deviation from the doctrine of the Church, was adopted by all save three votes. The pastoral letter, signed by the bishops, warned the people against bishops who have not been of the same mind in the controversies within the Church. A Greek translation of the pastoral letter was officially transmitted by the archbishop of Canterbury to all the patriarchs and bishops of the Greek Church. See PAN-ANGLICAN SYMPOSIUM. In order to promote the interest of intelligent laymen in the affairs of the Church, a "Church Congress" was called in 1860, which from that time has held annual sessions. See CHURCH CONGRESS. Several attempts were made by the High-Church party to introduce monastic institutions. Thus the Rev. Mr. Mac- kenzie, in 1867, published apon Asphanit of the Holy Cross, of which he was the first master. But thus far (1868) all these attempts have met with but little success. See MONASTICISM. The High-Church party exhibited a great desire to bring on a closer union with the bishops of the Church of England, and the Eastern Church, and, as the result, the Eastern Church Association (see below, STATISTICS), was established to promote the cause, and the Convocations of Canterbury and York gave their official approval of the scheme. See EASTERN CHURCHES, GREEK CHURCH, AND PROTESTANT EPISCOPAL CHURCH. Official communications for the same purpose were also opened with the Church of Sweden, but this step was strenuously opposed by one portion of the High-Church party on the ground that the Swedish Church held some heretical doctrines.

Governments and Government.—1. Church and State.—The constitution of the Reformed Church of England is that of an authorized and paid establishment, which is not allowed to persecute those who dissent from it" (Short). The union of Church and State was completely secured by the statutes that followed the union up to the Reformation. The English Church constitution remained nearly unchanged by the Reformation, only that the crown took the place of the pope. The course of subsequent legislation brought in, however, many important modifications of detail. The old statutes, though rarely enforced by law, except provisions for the incorporation and excommunication of Dissenters, have been generally respected. One of the most important of these was the Provisors (see above). The statute 25 of Henry VIII (1534), ch. xxi, declares entire independence of Rome, and calls the king supreme head of the Church of England, according to the recognition of its prelates and clergy. This statute abolishes Peter's pence, and provides for the visitation of monasteries by royal commission.

During the reign of Mary Poerpy was restored, but all the statutes to that effect were repealed by stat. 1 of Elizabeth (1558-9), which transfers the headship of the Church from the pope to the English crown, and declares the royal supremacy perpetual. Every form of spiritual and ecclesiastical jurisdiction and preconocative is included in the declaration. The crown can exercise this authority through such officers as it may select, provided they be British subjects appointed by letters-patent. The act prescribes the oath of supremacy, to be taken by all civil and Spiritual officers. See OATH OR SWEAR TO THE CROWN. The coronation oath of Henry VIII (1559) restored the Common Prayer, and required the clergy to conform strictly to it. The statute 15 Eliz. c. 11 (1571), incorporated the 39 articles which had been agreed upon by the Convocation of 1562 into the law of the land. This act, with the laws of supremacy and state church and the coronation oath, gave a close control over the church, the government, the worship, and the doctrines of the Church. The queen, though subject to the Church order and doctrines, was invested with full power to govern the Church, and to fill the highest ecclesiastical offices. Church and State were fused together, for all citizens of the State were made members of the Church. The officers of the Church were officers of the State, and the head of the State was made head of the Church. The Revolution made several changes in the constitution of the Church. By stat. 1 William and Mary, c. vi (April, 1689), the coronation oath was modified. In it the king swore not merely to govern according to the old laws and customs, but also to maintain the laws of God and the true confession of the Gospel, and of the Protestant Reformed religion as by law established; and to "preserve unto the bishops and clergy of this realm and the churches committed to their charge, all such rights and privileges as by law do or shall appertain unto them." The 8th chapter substituted a new form of the oath of allegiance, in which the recognition of the king's ecclesiastical supremacy is left out, and in its place stands a promise to obey the king only in matters of the temporal government that princes excommunicated by the pope should be deposed and executed, and that a foreign potentate can have ecclesiastical authority within the realm. The same statute (ch. xviii) removed some penalties from the laws passed from Disenters, but considerably widened they took the oath of allegiance personally, or by proxy, in case of conscientious objection to taking the especial oaths of office. During the present century a number of acts have been passed annulling disabilities of Papists and Dissenters; and it is now the case that Dissenters and Romanists have religious freedom, are eligible to civil office, and are admitted to Parliament.

2. Government.—(1) The king is the supreme head of the Church of England on earth, in name and form. Formerly the clergy made the following subscription: "That the king of the Quean's) majesty, under God, is the only supreme governor of this realm, and of all other his highness' dominions and countries, as well in all spiritual or ecclesiastical things or causes as ter- rapolal, etc.; but by an act of Parliament of July 5, 1665 (26th and 27th Vict. cap. 48), by which those bishops, ordained deacons or priests are required (1) to make a "Declaration of Assent" to the Thirty-nine Articles of Religion and to the Book of Common Prayer, and to the Ordo of Bishops, Priests, and Deacons; (2) to take the Oath of Allegiance and Supremacy (21st and 22nd Vict. cap. 48) by which the bishop is to be faithful and bear true allegiance to the queen, and declare that no foreign prince, person, prelate, state, or potentate hath, or ought to have, any jurisdiction, power,
superiority, pre-eminence, or authority, ecclesiastical or spiritual, within this realm. "The highest Church offices are filled by the ministry in the name of the crown. The Privy Council, in which only temporals vote, is the highest court of appeal." (2.) The management of the Church is in the hands of a hierarchy of archbishops and bishops, subject to the authority of the King and Parliament. The United Church of England and Ireland is divided into four provinces: two English, Canterbury and York; two Irish, Armagh and Dublin. These are four mutually independent archbishops. The bishops, as well as the archbishops, are spiritual rulers. Excluding the bishop last consecrated, and the bishop of Sodor and Man, who does not sit in the House of Lords unless he happens to be a peer in his own right. Archbishops are chosen by the crown from among the bishops. The sovereign also nominates the archbishops. The Church is governed, "under her majesty, by archbishops, bishops, deans, archdeacons, and the rest that bear office in the same" (Can. vii.). Archbishops and bishops alone have the power to ordain clergy; and these ordinations take place, according to canon law, at "allotted certain times," and ordained in their dioceses. The following are "regulae, or constitutions of churches;" and are commonly called "Ember weeks." Candidates for the ministry are usually graduates of Cambridge or Oxford, or Trinity College, Dublin, or else of Durham, Lampeter, or St. Bees; but the bishops are not bound to restrict ordinations to graduates of the universities. Rejected and unproved candidates take "the oath of supremacy," sign a declaration that they will conform to the liturgy, and subscribe three articles: the first affirming the supremacy of the sovereign in the Church; the second assenting to the Thirty-nine Articles; the third, that there is nothing contrary to the word of God, and that the ordained person will use the form of the said book; and the third, that they hold all "the Thirty-nine Articles." The candidate is first ordained a deacon, and so continues for one year. At the expiration of this term he is examined by a court, and when this is satisfactory, he is admitted by the bishop to the order of priest, or presbyter. Several of the presbyters, as well as the bishop, lay their hands simultaneously on the head of every candidate, while the bishop repeats the form prescribed in the ordination service. When once ordained, the candidate is permitted to take any duty or to hold any preferment in the Church. (3.) The country is divided into parishes, and many of these have been of late years subdivided. See PARISH. The property of the Church of England is obtained through many different channels, and is very valuable: the total revenue as estimated being not under seven millions a year; and yet so unequal is the distribution, that there are, out of 10,500 benefices, not less than 6000 with incomes under £300 a year; and of these there are 3460 livings whose annual value is under £150. The curates have a very inadequate compensation, the ordinary pay ranging, in large towns, from £70 to £150. The total number of benefices in 1890 was 14,200. Of late some reforms have been effected by the Parliament. There is a special board of "ecclesiastical commissions for England, to administer the state patronage of ecclesiastical benefices. In their twenty-ninth report, issued in 1868, they state that in the current year they expect to complete the scheme which, in their report of 1864, they proposed to accomplish within five years. Every living with less income than £300 a year which then existed, and contained, according to the census of 1861, a population of 4000 persons, will, on the Ist of March, 1869, have had its income raised to £300 a year, except those cases in private patronage where the one half of the augmentation which the patrons were required to provide from non-ecclesiastical sources has not been forthcoming. In their report of 1853 the commissioners referred to an arrangement which had been entered into with the dean and chapter of York, whereby the caputal estates (subject to subsisting leases) had become vested in the commissioners, and in lieu thereof the dean and chapter were to receive an annuity until the commissioners should restore to them real estates in possession calculated to produce an income equal to such annuity; and it was estimated that the arrangement would at a future date yield a considerable surplus for the augmentation of small livings. At the close of 1832 the chapter of Carlisle effected a similar commutation with the archbishop. By this commutation it was agreed that all the improved revenue derived from the better management of caputal property should be appropriated to the augmentation of caputal incomes, and to the improvement of cathedral institutions. In 1856 a committee of the House of Commons sat to consider the proceedings of the ecclesiastical commissaries, and in their third report set out the details of the York chapter commutation, and obverse, Such agreements tend to facilitate enfranchisement, and to provide funds for the endowment of poor livings, as well as to afford a ready means of providing estates in possession for the augmentation of the clerical incomes following the reforms of 1845. The chapters of Peterborough and Chester; in 1855, the chapter of Gloucester; in 1856, St. Asaph; in 1857, Worcester; in 1860, Chichester; in 1861, Winchester and Salisbury; in 1862, Bristol, Canterbury, and Exeter; in 1865, Wells, Rochester, and St. David's; at the above dates. At the time, therefore, the chapter of York, the two largest in England, had been, or were in the process of, or had adopted, or were adopting, such arrangements. All these arrangements have been successively sanctioned by orders in council. Commutations have thus been effected with no fewer than eighteen chapters. Under these commutations the chapters gave up their ancient estates in consideration of annual money payments to be received by them, pending their re-endowment with real estates in possession; and in 1862 the permanent estate of the chapter of York; in 1863, that of Peterborough; in 1865, those of Carlisle and Chichester; in 1866, those of Chester, Gloucester, and Canterbury; and in 1867, that of Winchester, were reassigned. As a consequence, the commissioners, in the period between 1861 and 1868, considered the local claims of the parochial curates upon the estates of the chapters of York, Peterborough, Carlisle, Chester, and Chichester, as far as the value of the parochial curates would permit, the requisite grants were made to such parochial curates." See below, Patronage and Statistics. (4.) The only ecclesiastical assembly of the English Church is Convocation (q. v.), which is a convention of the clergy to discuss Church affairs in time of Parliament. As the church consists of two distinct houses, so does this Convocation; the one called the upper house, where the archbishops and bishops sit severally by themselves; the other the lower house, where the rest of the clergy are represented by their deputies. The power of the Convocation is limited by a statute of Henry VIII. They are not to make any canons or ecclesiastical laws without the royal license; nor, when permitted to make any, can they put them in execution but under severe restrictions. In the year 1661 the English Convocation granted a subsidy to the king Charles II., which in the state of the church was paid by the English clergy; for, by an arrangement made between archbishop Sheldon and lord chancellor Clarendon in 1664, the Convocation of the clergy thenceforward gave up the privilege of taxing themselves to the House of Commons, in consideration of being allowed to vote at the election of members of that house (Eden). Of late, the Convocations, both of Canterbury and York, have again been permitted to meet, talk, vote addresses to the crown, etc., but they have no real power. See Convocation. (5.) Comm.—In the Convocation which met at the time of the Parliament of 1601, the canons by which
the Church of England is still governed were passed. They are said to have been collected by Bancroft from the canons of the ancient Church, and the articles, inclusions, and acts of Convocation during the reigns of Edward and Elizabeth. They received the royal sanction, but were not carried through the two houses of Parliament, and are not, therefore, of the present day. They bind the clergy only, and by virtue of their promise of canonical obedience. Many of them have been virtually repealed by subsequent enactments, especially the Toleration Act. Many of those that remain look ill. Many wise and winsome members of the Church would gladly see them repealed. See Canons of the Church of England.

(6.) Patronage.—The theory of the Church of England is that whoever originally built a church is entitled to choose his minister in perpetuity—i.e. the patron of a living. What is inconsistent with this is from a Church of England writer (Marsden, Churches and Sects, i, 332): "In a few instances this right is still vested in the descendants of the original patron, but these must be rare. The right of patronage is now a salable commodity, transferred, or sold by auction; and the successor, like any other real property, and the patronage of the Church of England is consequently disposed wherever wealth has found its way: 1144 benefices are in the gift of the crown; 1853 in that of the bishops; 938 in that of cathedral chapters and other dignitaries: 770 in that of the universities; 695 in that of the deanery, and 631 in the different vicarages of perpetual curacies in the incumbent of the mother church. The good and evil of this system are so nearly balanced that thoughtful and wise men are to be met with every day who, as they look at this mutable order of things, like any other real property, are disposed to cherish it as the nearest approach that is ever likely to be made in practice to a perfect theory; or, on the other hand, to reject it as unjust and full of danger. Its evils lie upon the surface, and they are by no means slight. It has a tendency to promote a system of disputes among the clergy respecting the propriety of subscribing to any human formulary of religious sentiments. Parliament, in 1772, was applied to for the abolition of the subscription by certain clergymen and others, whose petition received the most ample discussion, but was rejected by a large majority. It is by no means an unusual fact that almost all Calvinists, both in and out of the Church, that the doctrinal parts of the articles are Calvinistic. This opinion, however, has been warmly controverted. It is no doubt nearer the truth to conclude that the articles are framed with comprehensive latitude, and that neither Calvinism nor Arminianism was in any way deliberately established (Watson, s. v. Church). See Fuller's Moderation of the Church of England considered, 1679 (new edit. Lond. 1843, 8vo); and also see Arminianism, vol. i, p. 416, 417; Articles Lambeth, vol. i, p. 441. The articles contain, however, what the Church of England holds to be a fair scriptural account of the leading doctrines of Christianity, together with a condemnation of what she considers to be the principal errors of the Church of Rome and of certain Protestant sects. As far as they go (and there are many things unnoted by them), they are a legal definition of the doctrines of the Church of England and Ireland, though the members of that communion look to the Prayer-book as well as to the articles for the genuine expression of her faith. The articles are far more thoroughly Protestant than the Prayer-book, taken as a whole. Although the articles expressly assert that the Church of Rome has erred, attempts have repeatedly been made by the High-Church party of the Church of England to show that there is no irreconcilable difference between the Thirty-nine Articles and the decrees of the Councils. Other methods of construing the articles and the Councils may be put upon them fully harmonizing them. To show this was, in particular, the object of
Dr. Newman's celebrated tract (Tracts for the Times, No. 90, Oxf. 1888), and more recently of Dr. Pusey's Eirenicus (Lond. 1865; N. Y. 1866). See also Christ. Remembrancer, Jan. 1866, art. vi.

(2.) For the preservation of doctrine and discipline in the Church of England, many provisions are made both by the common law. Whoever shall come to the possession of the crown of England shall join in communion with the Church of England, as by law established (12 and 13 Will. III, ch. ii, § 3). By the 1 Will. III, ch. vi, an oath shall be administered to every person who shall succeed to the imperial crown of this realm, at their coronation; to be administered by one of the archbishops or bishops; to be thereunto approved by such king or queen, that they will do the utmost in their power to maintain the laws of God, the true profession of the Gospel, and the laws. In prudential regulations, the diocesan rights and jurisdiction, and to the churches committed to their charge, all such rights and privileges as by law do or shall appertain unto them, or any of them. And by the 5 Anne, ch. v, the king, at his coronation, shall take and subscribe an oath to maintain and preserve the settlement of the Church of England, and the doctrine, worship, discipline, and government thereof, as by law established (§ 2).

(3.) In practice there is no definite creed or system of theology in the Church of England. The term "Liturgy" has always been divided into two parts. There has always been a Sacramentary party, approximating in doctrine to the teachings of Rome, though it has never had great influence since Laud's time until the recent rise of Puseyism (q. v.). And, on the other hand, there have never been strong objections to the doctrines of the Puritan or Evangelical school. The latter party finds its stronghold in the Articles, the former in the Liturgy. At present a division prevails into three great sections, which are styled High-Church, Low-Church (or Evangelical), and Broad-Church. The first party holds to apostolical representation, the disputed rights of episcopacy, and generally adheres to the sacramentarian view of the Church's life. The Puseyites have been drawn chiefly from this party. The Low-Church, or Evangelical party, holds, in general, that episcopacy is not essential to the being of the Church, though some hold it can add to its high estime. The Low-Churchmen recognize the claims of Presbyterians and dissenters as members of Christ's body. In doctrine they are chiefly Calvinists. The Broad-Church party, though of recent origin, is the number of the most cultured men in the Church, such as Kingsley, Moxon, Sterley, and, in fact, most of Dr. Arnold's pupils and sympathizers. The tendency of this party is towards what is called liberal Christianity.

At the present time (1868) the Church of England is agitated by proposals of change on many sides. Archbishop Wilberforce, who went over to Rome some years ago, issued an "explanation," in which he inquires how far the popular principle of subscription to the English formularies is compatible with the rule of Church authority. The system he believes to be altogether new, while it has not even the merit of being able to settle the differences which exist among individual churchmen. He says: "The difficulty becomes greater when it is considered that the clergy are divided into various parties, who are widely opposed to one another in almost every particular. It may be allowable, perhaps, to employ the method of a recent reviewer, who has distributed them into three classes, which he designates as High, Low, and Broad. The last may be expected to be comparatively inattentive to matters of doctrine, regarding the Church as a "societas literaria," designed merely to raise the standard of morals and ameliorate the manners of men. But the High and Low agree in one point, if in nothing else, that to contend for the truth is the first duty of Christians. They differ, however, respecting almost every point of doctrine. One believes the Church to be the body of Christ, inhabited by his Spirit; the other supposes it to be little more than a religious club. One believes in the re-generation and the real presence; the other speaks of the sacraments as if they were only acted services. One affirms Christ to speak by the voice of his priests, and that this sin requires absolution; the other affirms that the priest's words are no more effectual than those of the judge or clerk. The former, in the most unerring fashion, points to the word the Broad, who lie between them, subscribe to the same formularies, which they interpret avowedly in contradictory senses, and from which they deduce the most opposite results. If this all does not arise from the laxity of those who subscribe, but from the ingenuity of their lapses and from the certainty of the gospels, it is the most perfect instance of the sacrilegious expression whem the world has known." Subscription to the English formularies, he says, was originally imposed, and is still rendered by High-churchmen, on the principle that the Church's judgment should guide his conscience; and precisely the same spirit with which the Church of England has transferred the decision respecting doctrines to the civil power, and that the most opposite statements respecting matters of faith are taught under her sanction. See Goodwin Case.

There are also in England relations to the Church, "as the members of the same society," "five words of Declaration of Principles and Objects" we extract the following: "The members of this society are moved by such 'weighty and important considerations' as arise from the 'exigencies of these present times, to seek farther 'changes and alterations' in the Church-book, as of which, as the most necessary, they now proceed to specify: 1. The Rubric: the word priest to be changed. 2. The Ordination Service: words abused to the purposes of sacerdotal assumption to be altered. 3. The Visitation of the Sick: the absolution to be omitted or qualified. 4. The Baptismal Office: words asserting the spiritual regeneration of each recipient to be altered. 5. The Catechism to be revised. 6. The Burial Service: general language to be employed in expressing hope for the departed. 7. The Aethanasian Creed: the dammatory clauses to be omitted. 8. The Apocryphal Lessons to be substituted." Some of these changes have been adopted. It is chiefly the English Church and its constituent bodies which have been affected.

At present (1868) Romanizing tendencies are plainly on the increase in the Church of England, and there is apparent danger of a total separation of many ministers and members of this Church from the common faith of the reformed churches organized in the 16th century. The High-Church party has several schools, one of which (the Old School), while gladly conciliating in all efforts for widening the breach between the Church and the sects, yet continues in earnest opposition to the errors of Rome. Others, looking more at what is common to the Church of Rome and the Church of England, recognize the necessity of hoping that the Church of Rome, by means of an "Episcopal" movement, will gradually come over to the Anglican ground. This party builds great hopes especially upon the movements in Italy of such men as cardinal Andrea and Passaglia. There is, finally, an extreme party, which makes every other consideration subordinate to the desire to establish the union with Rome, and which has of late proceeded farther in this direction as a party than has ever been done before. It is this party which in 1867 sent a letter to cardinal Fischi asking for some form of union from Rome. It also aims at re-establishing monastic orders, and is specially conspicuous by its "Ritualistic"
innovations in divine worship, endeavoring to conform the service altogether to that of the Roman and Eastern churches. Until recently this party was more noted for zeal and fervor than for intelligence and ecclesiastical standing, but the conversion of 1866 afforded immense advantage by the open declaration of Dr. Pusey in their favor. In his Eirenicon (1866, 12mo) he explains away the chief doctrinal differences between the Articles and the Catechism of Trent, though, at the same time, he treats severely the personal infallibility of the Church of Rome; and the Methodists of this branch of the Roman Church. Dr. Pusey also advocates the confessional and monastic life. The latest development of this school is to be found in the series of volumes entitled The Church and the World (edited by the Rev. Orby Shipley).

On the other hand, there is a large party of Rationalists in the Church of England whose type of opinion is to be found in the Essays and Reviews (1860), and whose extreme representative is perhaps bishop Colenso, of Natal, who has published several volumes of so-called criticisms, in which the inspiration and infallibility of the Church of Rome are generally held to be so much in error. No power has been discovered, either in the Church of England or in the laws of the land, to deal with the Romanizers on the one hand, or the Rationalists on the other.

Eastเวรันนิชั่ม in 1799. Its work is chiefly among the natives of the countries in which its missions are established. Its Church income in 1866-67 was £13,927, and in 1868-69, £24,639. 18. The Colonial and Continental Church Society. Its leading object is to send clergymen, catechists, and teachers of the Church of England to settlers in the English colonies, and to British subjects in other parts of the world, at a yearly income for 1868-69 of £1,971, for 1867-68, £16,501. 14. The English Church Union was formed in 1859 for the purpose of "watching over the interests of the Church of England; of resisting, by a combination of its members, the attempts of dissenters and others to alienate the faith and injure the peace of the Church; and also for the purpose of developing its internal energies." It is intended to be the central organ of the High-Church party. The union is managed by a council of twenty-four elected and five ex-officio members, thirteen of these being clergymen and the remaining sixteen laymen. 15. The Association for the promotion of the Unity of Christendom was formed in 1857 for the purpose of uniting in a bond of intercessory prayer members both of the clergy and the laity of the Roman Catholic, Greek, and Anglican communions. The members promise to use daily a brief prayer for the peace and unity of the Church. In 1865 the association numbered 8,827 members, divided as follows: Roman Catholics, 1,271; Orientals, including Servians and Armenians, 360; uncertain or miscellaneous, 75; Anglicans, 7,121. 16. The Eastern Church Association was founded in 1857. Its object was stated to be to inform the English public as to the state and position of the Eastern Christians; to make known the principles and doctrines of the Anglican Church to the Christians of the East; to take advantage of all opportunities which the providence of God shall afford for intercommunication between the orthodox Church, and also for friendly intercourse with the other ancient churches of the East; to assist, as far as possible, the bishops of the orthodox Church in their efforts to promote the spiritual welfare and the education of their flocks. It counts among its members English, Scotch, American, colonial, and Greek bishops.

17. The Anglo-Continental Society has for its object to make the principles of the English Church known in the different countries of Europe and throughout the world, and to aid in the reformation of national churches and other religious communities. 18. The Church Association was established in 1868-69 as the central organization of Low-Churchmen. Its chief object is to counteract and prevent the spreading of High-Church and Romanizing tendencies in the Church. 19. The South American Missionary Society, established in 1859, is set to send missionaries to the native tribes of South America, to Englishmen in spiritual destitution there, and to take advantage of any opening for evangelization. Its means was in 1866-67, £7,431, and in 1867-68, £12,008. 20. Irish Church Missions to Roman Catholics. According to the nineteenth annual report, published in May, 1868, the income was £25,577. The year before was £22,501. 21. The London Society for promoting Christianity among the Jews, established in 1809. The officers must be members of the United Church of England and Ireland, and, if foreigners, of a Protestant Church. Its income was in 1866-67, £33,927, and in 1867-68, £33,925.

At the last official census taken in Great Britain in 1881, in England and Scotland no inquiries were made as to the creed of the inhabitants. For Ireland, the population was counted with the Established Church in 1861, according to the official census, 678,661. In England the Church herself makes no attempt to find out her statistics, nothing but estimates can be given on this point. As regards places of worship, number of sittings, and estimates of Church attendance, the statistics of the Established Church compared as follows with the aggregate statistics of all other religious bodies:

<table>
<thead>
<tr>
<th>Religious Bodies</th>
<th>Places of Worship</th>
<th>Number of Sittings</th>
<th>Estimate of Church Attendance</th>
</tr>
</thead>
<tbody>
<tr>
<td>Church of England</td>
<td>14,077</td>
<td>5,317,926</td>
<td>5,411,414</td>
</tr>
<tr>
<td>All other religious denominations</td>
<td>29,590</td>
<td>4,084,648</td>
<td>3,247,328</td>
</tr>
</tbody>
</table>

According to this table, of all the church settings, 51.9 per cent. belonged to the Church of England, and 48.1 per cent. to the other religious denominations; and of the church attendants, likewise about 52 per cent. to the Church of England, and 48 to the other denominations. Other statistics, as, for instance, the annual marriage statistics, give to the population connected with the Church of England from 65 to 70 per cent. of the population. The two statements may be reconciled by taking 52 per cent. as that portion of the total population which is practically and actively connected with the Church, while it is, on the other hand, probable that fully 65 per cent. sustain a nominal connection with the Church. Since the beginning of the present century, the progress of the Church of England in point of places of worship and church attendants has been less rapid than that of the other religious denominations taken together. For detailed comparative statistics, see GREAT BRITAIN.

Besides the national universities of Oxford and Cambridge, Durham University and King's College, London, the Church of England has its theological institutions: St. Bees (Cumberland), with 80 students, and St. Aidan's (Birkenhead), with 63 students; also a training department at Birmingham College, the London College of Divinity at St. John's Wood, and Lampeter College, Wales.

The following table gives the number of parishes and the number of clergy in each of the English dioceses; also the total population of the territory embraced in each diocese.

<table>

For further accounts of the statistics of the Church of England, see the annual Clergy List (which also contains a complete list of all the benefices, with names of patrons, etc.); Rivington's Ecclesiastical Year-book for 1865; Christian Year-book (London, 1867) and Church Schem, An English Ecclesiastical Year-book for 1859 (N. Y., 1860); and Amer. Eccles. Almanac for 1868 (N. Y., 1868).

V. Literature.—The early historians are Gildas (6th century), De Britannice excidio, etc. (transl. by Giles, Lond. 1841, 1842); Bede, Hist. Eccles. Anglorum (Opera, ed. Giles, 12 vols. 1843, vol. ii); Gildas Cambrensis,

Historians: Stillingfleet, Origines Britannica (1710; new edit. Oxford, 1842, 2 vols. 8vo); Usher, Brit. Ecclesiarum Antiquitatis (1586, 4to; Works, 16 vols. Dublin, 1725); Barlow, History of Britain (Lond. 1846, 12mo); Churton, Early English Church (Lond. 1858, 3d ed. 18mo); Soames, Anglo-Saxon Church (Lond. 1829, 2d edit. 8vo); ib. Doctrines of Anglo-Saxon Church (Hampton Lecture, 1830); ib. Latin Church during Anglo-Saxon Times (Lond. 1848, 8vo); ib. The English Religious History (Lond. 1834, 8vo); ib. Reformations (Lond. 1852-5, 4 vols. 8vo); Fuller, Church History of Great Britain (1655, fol.; new edit. Lond. 1837, 3 vols. 8vo; Warner, Ecclesiastical History of England (1763, 2 vols. fol.); Inett, Origines Anglicæ, History from 6th century to death of King John, 13 vols. fol. (new edit. Oxford, 1855, 3 vols. 8vo); Carwihen, History of the Church of England (Oxford, 1849, 2d edit. 2 vols. 12mo); Grant, Summary of the History of the English Church and of the Sects, etc. (Lond. 1811-1821, 4 vols. 8vo); Collier, Ecclesiastical History of Great Britain (1736, fol.; new ed. by Barber, Lond. 1840, 9 vols. 8vo); Arundel, Compendious History of the British Churches (Edinb. 1820, 2d edit. 1823, 2 vols. 8vo); Baxter, Church History of England (2d ed. Lond. 1849, 8vo); Short, Sketch of the History of the Church of England to 1688 (Lond. 1840, 3d edit. 8vo); Anderson, History of the Church of England in the Colonies (Lond. 1856, 2d edit. 3 vols. 8vo); Annual American Cyclopedia, 1863, and all the following volumes, art. Anglican Church.

On the history of the English Reformation, see REFORMATION. For general statistics of Christianity in the British islands, see GREAT BRITAIN; IRELAND; SCOTLAND.

Engles, Joseph Patterson, D.D., was born in Philadelphia Jan. 3, 1793. He was educated at the University of Pennsylvania, and graduated in July, 1811. In 1818 he was appointed co-master of the grammar-school in the same institution with Rev. Dr. S. B. How. In 1817, Rev. Dr. S. B. Wylie and Mr. Engles founded an academy, under the name of the Christian, at Mr. Dyer's, which Mr. Wylie rejoined until February, 1845, when he was elected publishing agent of the Presbyterian Board of Publication. He continued in this position until his death. Mr. Engles was a member and elder of the Scots Presbyterian Church, Philadelphia, having joined that church at the age of twenty, and very soon after having been chosen an elder of the same. Besides writing several smaller volumes for children and youth, he edited an edition of the Greek Testament, with various readings. He died suddenly on the night of April 14, 1861, of a disease of the heart from which he had been suffering for about a year.

Engles, William Morrison, D.D., a Presbyterian minister, was born in Philadelphia Oct. 12, 1797, and was educated at the University of Pennsylvania, where he graduated A.B. in 1815. After studying theology under the Rev. Dr. S. B. Wylie (q. v.), he was licensed to preach in 1818, and in 1820 became pastor of the Seventh Presbyterian Church in Philadelphia, which office he filled faithfully until his health failed in 1834, when he became editor of The Presbyterian. He edited that journal for over thirty years. In 1838 the Presbyterian Board of Publication made him their editor of books and tracts, and he continued in that work with great success till 1863. In one of their publications, it is stated that "the Board of Publication is probably more largely indebted to Dr. Engles than to any other one man for its existence and its usefulness, especially during the first twenty years of its history." Besides his constant editorial work, he wrote a number of small books on practical religion, many of which had a wide circulation. Of one of them, the Soldier's Pocket-book for Boys and Girls, is said to have been circulated among our soldiers during the civil war. He died in Philadelphia Nov. 27, 1867.—American Annual Cyclopaedia, vii. 296.

English Versions of the Bible. Passing over the Latin in the Roman Church, which, long struggling with the indifference or opposition of men in power, the religious condition of the people as calling for, or affected by, the appearance of the translation, the time, and place, and form of the successive editions by which the demand, when once created, was supplied—all of which is given under more appropriate titles—we shall here aim to give an account of the several versions as they appeared; to ascertain the qualifications of the translators for the work which they undertook, and the principles on which they acted; to form an estimate of the final result of their labours; and, in the account which we give of this, of the necessity or desirability of a new or revised translation; and, finally, to give such a survey of the literature of the subject as may help the reader to obtain a fuller knowledge for himself. In doing this we shall substantially adopt so much of Prof. Plumptre's A History and Character of English Translations, as relates to the subject. The present article has been carefully revised by the Rev. T. J. Conant, D.D., of Brooklyn.

1. Early Translators. — It was asserted by Sir Thomas More, in his dialogue with a point against Tyndal, that he had seen English translations of the Bible which had been made before Wylye, and that these were approved by the bishops, and were allowed by them to be read by laymen, and even by devout women (Dialogues, ch. vii.-xiv, col. 82). There seem good grounds, however, for denying the accuracy of this statement. No such translations—versions, i. e. of the entire Scriptures—are now extant. No traces of them appear in any contemporary writer. Wylye's great complaint is that there is no translation (Foshall and Madden, Wylye's Bible, Pref. p. xxii). The Constitution and Covenants (1648), which Arundel (A.D. 1408) mention two only, and these are Wylye's own, and the one based on his and completed after his death. More's statement must therefore be regarded either as a rhetorical exaggeration of the fact that parts of the Bible had been previously translated, or as arising out of a mistake as to the date of MSS. of the Wylye version. The history of the English Bible will therefore begin, as it has begun hitherto, with the work of the first great reformer. One glance, however, we may give, in passing, to the earlier history of the English Church, and connect some of its most important times with the great work of making the truths of Scripture, or parts of the books themselves, if not the Bible as a whole, accessible to the people. We may think of Cædmon as embodying the whole history of the Bible in the alliterative metre of Anglo-Saxon verse, Bede, Heliand, and Alcuin. Alnold, bishop of Sherborne, in the 7th century, as rendering the Psalter; and Bede, as translating in the last hours of his life the Gospel of John (Epist. Cuthberti); of Alfred, setting forth in his mother tongue, as the great ground-work of his legislation, the four chapters of Exodus (xx.-xxiii) that contained the first code of the laws of Israel (Paul's Life of Alfred, chap. v). The wishes of the great king extended further. He desired that "all the free-born youth of his kingdom should be able to read the English Scriptures" ("En- glish writt"), which, however, may merely denote English literature in general (Ebd.). Portions of the
Bible, some of the Psalms, and extracts from other books, were translated by him for his own use and the use of his family. A tradition of the time, not now generally believed, is that the translator was not watching over his work in the presence of his master, but that he was translating the whole Bible (ibid., supp. to chap. v). The work of translating was, however, carried on by others. One Anglo-Saxon version of the four gospels, made by the abbot of Jutlington, and known as the Durham book, is found in the Cottonian MSS. of the British Museum, and is referred to the 9th or 10th century. Another, known as the Rushworth Glos, and belonging to the same period, is in the Bodleian Library at Oxford. Another, of a somewhat later date, perhaps the best text of the whole book, is in a manuscript in the library of Corpus-Christi College, Cambridge. The name of Aldhelm, bishop of Sherborne, is connected with a version of the Psalms; that of Aelfric with an epitome of Scripture history, including a translation of many parts of the historical books of the Bible (Lewis, Hist. of Transl. pp. 363-376). The influence of the Norms, ecclesiastics, in the reigns that preceded and followed the Conquest, was probably adverse to the continuance of this work. They were too far removed from the practices of the Bible, and were less likely to educate in their own tongue. The spoken dialects of the English of that period would naturally seem to them too rude and uncouth to be the channel of divine truth. Pictures, mysteries, miracle plays, rather than books, were the instruments of education for the ignorant. The Norman and Norman, or Italian, superstition, devoted themselves to the study of theology or law. In the remoter parts of England, however, where their influence was less felt, or the national feeling was stronger, there were those who carried on the succession, and three versions of the Bible, the Latin of the Bodleian, the French of Cambidge, in the Bodleian, and in the British Museum, belonging to the 11th or 12th century, remain to attest their labors. The metrical paraphrase of the Gospel history known as the Ormulum, in alliterative English verse, ascribed to the latter half of the 12th century, is the next conspicuous monument, and may be looked upon as indicating a desire to place the facts of the Bible within reach of others than the clergy. The 13th century, a time in England, as throughout Europe, of religious revival, witnessed renewed attempts. A prose version of the Bible in the Latin of the French, circ. A.D. 1260, indicates a desire for devotional reading within the circle of the court, or of the wealthier merchants, or of convents for women of high rank. Farther signs of the same desire are found in three English versions of the Psalms—two—towards the opening of the 13th century; another by Scroby, in the O.T., and N.T., by Richard Rolle, of Hampole, circ. 1489; the last being accompanied by a devotional exposition— and in one of the Gospels of Mark and Luke, and of all Paul's epistles (the list includes the apocryphal epistle to the Laodicenes), in the library of Corpus-Christi College, Cambridge. The fact stated by archbishop Arundel in his funeral sermon on Anne of Bohemia, wife of Richard II, that she habitually read the Gospels in the vulgar tongue, with divers expositions, was probably true of many others of high rank. It is interesting to note that the facts may be distracting from the glory of the great reformer of the 14th century, but as showing that for himself also there had been a preparation; that what he supplied met a demand which had for many years been gathering strength. It is almost needless to add that these versions started from nothing better than the copies of the Vulgate, more or less accurate, which every translator had before him (Lewis, ch. i; Forshall and Madden, Preface). II. Wycliffe (born 1324, died 1384).—1. It is singular, and without significance, that the first translation from the Bible connected with the name of Wycliffe should have been that of part of the Apocalypse. The last argument for 'pre-Christian' or 'pure Christian' interpreters of the Gospel, with the comyn sentence of the old holie doc- tores' ('Preface'). Wycliffe, however, though the chief, was not the only laborer in the cause. The circle of English readers was becoming wider, and they were not content to have the book which they honored at Cambridge in a tongue that was not, that is, in a tongue of translation and commentary appear to have been made about the same time, in ignorance of Wycliffe's work, and for the 'manie widuw men that gladde would kon the Gospels, if it wer draughten into the English tong.' The fact that many MSS. of this period are extant, English in English, a Monmouthian, or Har- mony of the Gospels, accompanied by portions of the Epistles, or portions of the O.T., or an epitome of Scripture history, or the substance of Paul's epistles, or the Catholic Epistles at full length, with indications more or less of Wycliffe's interest, shows how widespread was the feeling that the time had come for an English Bible (Forshall and Madden, Pref. p. xiii-xvii). These preliminary labors were followed up by a complete translation of the N. T. by Wycliffe himself. The O.T. was undertaken by his coadjutor, Nicholas de Hereford, but the work was completed only by a citation to appear before archbishop Arundel in 1382, and ends abruptly (following so far the order of the Vulgate) in the middle of Baruch. Many of the MSS. of this version now extant present a different recession of the text, and it is probable that the work of Wycliffe was revised and expurgated by the hand of Purvey, circ. A.D. 1388. To him also is ascribed the interesting Prologue, in which the translator gives an account both of his purpose and his method (Forshall and Madden, Pref. p. xxv). 2. The former was one of Wycliffe that had been, to give an English Bible to the English people. He appeals to the authority of Bede, of Alfred, and of Gros- tete, to the examples of 'Frenshe, and Beemers (Boh- hemians), and Britons.' He answers the hypocritical objections that men were not holy enough for such a work; that 'it was not right for the great doctors of the Church had left undone. He hopes 'to make the sentence as trewe and open in Englishe as it is in Latine, or more trewe and open.' It need hardly be said, as regards the method of the translator, that the version was based upon the Vul- gate (comp. Gen. iii. 15: 'Ske she trede thy head'). If, in the previous century, scholars like Grostete and Roger Bacon, seeking knowledge in other lands, and from men of other races, had acquired, as they seem to have done, some knowledge both of Greek and He- brew, the succession had, at all events, not been per- petuated. The war to be waged at a later period with a different issue between scholastic philosophy and 'humanity' ended, in the first struggle, in the tri- umph of the former, and there was probably no one at Oxford among Wycliffe's contemporaries who could have helped him or Purvey in a translation from the original. Bearing in mind the complaint that 'learned doctors taken litle heed to the letter,' the recognition that the Vulgate was not all sufficient, that 'the texte of oure bokis' (he is speaking of the Psalter, and the difficulty of under- standing it) 'is discreet from much from the Ewren' (which knowledge is, however, at second hand, 'bi witness of Jerom, of Lire, and other expositurors'). The diffi- culty which was thus felt was increased by the state of the Vulgate text. The translator complained that what the Church had in view was not Jerome's ver-
sion, but a later and corrupt text; that "the common Latynne Bibles han more neede to be corrected as manie as I have seen in my life, than hath the English Bibo ble late translated." To remedy this he had recourse to collation. Many MSS. were compared, and out of this comparison the true reading ascertainment as far as possible. The next step was to consult the Glossa Ordinaria, the commentaries of Nicholas de Lyra, and others, as to the meaning of any difficult passages. After this (we recognise here, perhaps, a departure from the right order) grammars were consulted. Then came the actual translation, which he aimed at making idiomatic rather than literal. As he went on, he submitted his work to the judgment of others, and accepted their suggestions. It is interesting to trace these early strivings after the true excellence of a translator; yet more interesting to take note of the spirit in which the _Peregrine's Tudem Englished_ are put into the English, in which the work was done. Nowhere do we find the conditions of the work, intellectual and moral, more solemnly asserted. "A translator hath greate need to study well the sentence, both before and after," so that no equivocal words may mislead his readers or himself. He hath to make of the language of the country a clear medium of modern life, and be full devout in preiers, and have not his wit occupied about worldly things, that the Holy Spirity, author of all wisdom, and cunning, and truth, dresse (=train) him in his work, and suffer him not for to err" (Forshall and Madden, _Pr. p. 69_).

9. The quotation translated by this version may be estimated from the fact that, in spite of all the chances of time, and all the systematic efforts for its destruction made by archbishop Arundel and others, not less than 150 copies are known to be extant, some of them purposely made for persons of wealth and rank, others apparently for humbler readers. It is significant as bearing, either on the date of the two works or on the position of the writers, that while the quotations from Scripture in Langton's _Vision of Piers Plowman_ are uniformly given in Latin, those in Tyndale's are given in English, which for the most part agree substantially with Wycliffe's translation.

4. The following characteristics may be noticed as distinguishing this version: (1) The general holiness of its style. The language of the court or of scholars, as it then was, he hath not used and that of the people followed. In this respect the principle has been acted on by later translators. The style of Wycliffe is to that of Chaucer as Tyndale's is to Surrey's, or that of the A.V. to Ben Jonson's. (2) The substitution, in many cases, of English equivalents for quasi-sacred terms. We find instead of "Raca" (Matt. v. 22), "they were washed" in Matt. iii. 6; "richesse" for "mammon" (Luke xvi. 9, 11, 13); "bishop" for "high-priest" (papst). (3) The extreme literalness with which, in some instances, even at the cost of being unintelligible, the Vulgate text is followed, as in 2 Cor. i. 17-19.

III. TYNDALE.—The work of Wycliffe stands by itself. Whatever power it exercised in preparing the way for the Reformations of the 16th century, it had no perceptible influence on later translations. By the reign of Henry VI. its English was already obsolete, and the revival of classical Scholarship led men to feel dissatisfied with a version which had avowedly been made at second-hand, not from the original. With Tyndale, on the other hand, we enter on a continuous succession. He is the patriarch, in no remote ancestry. He was the first to introduce the Vernacular Version, unsuavating purpose, he devoted his whole life to this one work, and, through dangers and difficulties, amid enemies and treacherous friends, in exile and loneliness, accomplished it. More than Cranmer or Ridley, he is the true hero of the English Reformation. While they were slowly moving onwards, ballotting between two opinions, watching how the court-winds blew, or, at the best, making the most of opportunities, he set himself to the task without which, he felt sure, reform would be impossible, which, once accomplished, would render it inevitable. "Ere many years," he said, at the age of thirty-six (A.D. 1520), he would cause "a boy that driveth the plough" to know more of Scripture than the Latin clerics. The clergy then knew (Foxe, in Anderson's _Annals of English Bible_, i. 30). We are able to form a fairly accurate estimate of his fitness for the work to which he thus gave himself. The change which had come over the English Universities since the time of Wycliffe had affected those of England as it had been taught in Paris in 1458. The first Greek Gram mar, that of Constantine Lascaris, had been printed in 1476. It was followed in 1480 by Crastan's _Lexicon_. The more enterprising scholars of Oxford visited the universities for the sake of the new printed books. Grocyn (d. 1519), Linacre (d. 1524), Colet (d. 1519), had, in this way, from the Greeks whom the fall of Constantinople had scattered over Europe, or from their Italian pupils, learned enough to enter, in their turn, upon the work of teaching. When Erasmus visited Oxford in 1501 he found in it a clear network of University schools which even he could admire. Tyndale, who went to Oxford cir. 1500, must have been within the range of their teaching. His two great opponents, Sir Thomas More and bishop Tongstal, are known to have been among their pupils. It is significant enough that, after some time in Cambridgetyndale left Oxford to go to Cambridge. Such changes were, it is true, common enough. The fame of any great teacher would draw around him men from other universities, from many lands. In this instance, the reason of Tyndale's choice is probably not far to seek (Walker, _Bieg. Notice to Tyndale's Decretal Trecnsites_; Erasmus was in Cambridge from 1500 to 1514. All that we know of Tyndale's character and life, the fact especially that he had made translations of portions of the N.T. as early as 1502 (Offer, _Life of Tyndale_, p. 9), leads to the conclusion that the presence of one who was emphatically the scholar and philologist of Europe. It must be remembered, too, that the great scheme of cardinal Ximenes was just then beginning to interest the minds of all scholars. The publication of the Complutensian Bible, it is true, did not take place till 1514, but it was the means of stimulus, and other preparations for it began as early as 1504. In the mean time Erasmus himself, in 1516, brought out the first published edition of the Greek Testament, and it was thus made accessible to all scholars. Of the use made by Tyndale of these opportunities we have evidence by his correspondence; and there is no reason to doubt that in the vain hope of persuading Tongstal (known as a Greek scholar, an enlightened Humanist) to sanction his scheme of rendering the N.T. into English, and bringing a translation of one of the orations of Isocrates as a proof of his capacity for the work. The attempt was not successful. "At the last I understood not only that there was no room in my lord of London's palace to translate the N.T., but also that there was no place to do it in all England" (Prof. _Frc. Books of Moses_).
Roger Bacon knew enough to pass judgment on the Vulgate as incorrect and misleading. Then, however, came a period in which linguistic studies were thrown into the background, and Hebrew became an unknown speech even to the best-read scholars. The first signs of a revival meet us towards the close of the 15th century. The remarkable fact that a Hebrew Psalter was printed at Venice in 1472 (from Erasmus's Greek Testament), the Pentateuch in 1482, the Prophets in 1486, the whole of the O.T. in 1488, by which 1496 four editions had been published, and by 1596 not fewer than eleven (Whitaker, *Nat. and Crit. Inquiry*, p. 22), indicates a demand for Hebrew books in Christendom, especially in the Latin countries of Europe, not less than on that of the more learned Jews. Here also the progress of the Complutensian Bible would have attracted the notice of scholars.  

The cry raised by the "Trojans" of Oxford in 1519 (chiefly consisting of the friars, who from the time of Wycliffe had all but swamped the education of the place) against the first Greek lectures—that to study that language would make men pagans, that study Hebrew would make them Jews—shows that the latter study as well as the former was the object of their dislike and fear (Anderson, i, 24; Hallam, *Life* of Bacon, i, 26). Whether Tyndale had in this way gained any knowledge of Hebrew before he left England in 1524 may be uncertain. The fact that in 1530-31 he published a translation of Genesis, Deuteronomy, and Jonah (see a letter by the ven. lord Arthur Hervey to the Pope, sent by the Venetian legation) affords no evidence in his favor. His knowledge of Hebrew was acquired, it would seem, by means of the Spanish Bible, which he had very likely at his disposal in the monastery of St. Jerome in Amiens, and that he had come in contact with. As to the question whether Tyndale, the last prayer, "Lord, open the king of England's eyes," He was tied to the stake, then strangled to death, and finally burnt. (See O'far's memoir prefixed to his edition of Tyndale's *New Testament.*  

The work to which a life was thus nobly devoted was as much as the only thing which occupied the only one of having given the first example of a translation based on true principles, and the excellence of later versions has been almost in exact proportion as they followed his. Believing that every part of Scripture had its own meaning and significance, and that the whole of the writer (*Observations*, p. 304), he made it his work, using all philological helps that were accessible to attain that sense. Believing that the duty of a translator was to place his readers as nearly as possible on a level with those for whom the books were originally written, he looked on all the later theological discussions that had gathered round the words of the N. T. as hindrances rather than helps, and sought, as far as possible, to get rid of them. Not "grace," but "favor," even in John i, 17 (in edition of 1526); not "charity," but "love;" not "confessing," but "acknowledging," not "priest," but "senior" or "elders;" not "salvation," but "health;" not "church," but "congregation," are instances of the changes which were then looked on as startling and heretical innovations (Sir T. More, *l. c.*). Some of them we are now familiar with. In others the later versions bear traces of reaction in favor of the older phraseology. In this, as in other things, Tyndale was in advance, not only of his own age, but of the age that followed him. To him, however, it is owing that the versions of the English Church have been throughout both popular, and not sclerotic. The exquisite grace and simplicity which have adorned the A. V. to the men of the most opposite tempers and contrasted opinions—to J. H. Newman (*Dublin Review*, June, 1853) and J. A. Froude—is due mainly to his clear-sighted truthfulness. The testimony of a Roman Catholic collector is instructive: "In point of perspicacity and noble simplicity, propriety of idiom and purity of style, no English version has as yet surpassed it*" (Goddes, *Prospectus for a new Translation*, p. 89). The desire to make the Bible a people's book led Tyndale in one edition to something like a provincial rather than a national translation; but, on the other, it kept him free from the besetting danger of the time, that of writing for scholars, not for the people; of a version full of "in-khorn" phrases, not in the spoken language of the English nation. And throughout there is the pervading stamp, so often wanting in other like works, of the
most thorough truthfulness. No word has been altered to court a king's favor, or please bishops, or make out a case for or against a particular opinion. He is working freely, not in the fetters of prescribed rules. With the most entire sincerity he could say, "I call God to record, against the day we shall appear before our Maker, and there give an account of doing things, that I never altered one syllable of God's Word against my conscience, nor would this day, if all that is in the world, whether it be pleasure, honor, or riches, might be given me." (Anderson, i, 349).

2. A complete translation of the Bible, different from Tyndale's, bearing the name of Miles Coverdale, printed probably at Zürich, appeared in 1535. The undertaking itself, and the choice of Coverdale as the translator, were probably due to Cromwell. Coverdale's controversial treatises, and the polemical character of his prefaces and notes, has irritated the leading ecclesiastics, and embittered the mind of the king himself against him. All that he had written was publicly condemned. There was no hope of obtaining the king's sanction to anything that bore his name. But the idea of an English translation began to find favor among the secular, who, in the marriage with Anne Boleyn, had been so helpful to adopt what was urged upon him as the surest way of breaking forever the spell of the pope's authority. The bishops even began to think of the thing as possible. It was talked of in Convocation. They would take it in hands, and with the work did not meddle further, make much progress. The great preliminary question whether "venerable" words, such as hostia, penance, paschata, holocaust, and the like, should be retained, was still unsettled (Anderson, i, 414). Not till "the day after doomsday" (the words are Cranmer's) were the English people likely to get their English Bible from the bishops (ib. i, 577). Cromwell, it is probable, thought it better to lose no further time, and to strike while the iron was hot. A divine whom he had patronized, though not, like Tyndale, feeling himself called to that special work (Fred. Cosway, Note, p. 136), was willing to undertake it. To him accordingly it was intrusted. There was no stigma attached to his name, and, though a sincere Reformer, neither at that time nor afterwards did he occupy a sufficiently prominent position to become an object of special persecution.

3. This was the work which was thus executed, as might be expected, in a very different fashion from Tyndale's. Of the two men, one had made this the great object of his life; the other, in his own language, "sought it not, neither desired it," but accepted it as a task assigned him. One prepared himself for the work by years of labor in Greek and Hebrew; the other is content to make a translation at second hand "out of the Douche (Luther's German Version) and the Latinate." The one aims at a rendering which shall be the truest and most exact possible; the other loses himself in weak commonplaces as to the advantage of using many English words for one and the same word in the original, and in practice oscillates between "penance" and "repenance," "love" and "charity," "priests" and "elders," as though one set of words were as true and adequate as the other (Preface, p. 1). In spite of these faults, however, there is much to esteem in the spirit and temper of Coverdale. He is a second-rate man, laboring as such contentedly, not ambitious to appear other than he is. He thinks it a great sin that there should be a diversity of translations. He acknowledges, though he dare not name it, the existence of the excellence of Luther's version, and regrets the misfortune which left it incomplete. He states frankly that he had done his work with the assistance of that and of five others. The five were probably: (1) The Vulgate; (2) Luther's; (3) The German Swiss version of Zürich; (4) The Latin of Paganus; (5) Tyndale's. Others, however, have conjectured a German translation of the Vulgate earlier than Luther's, and a Dutch version from Luther (Whitaker, Hist. and Crit. Inquiry, p. 49). If the language of his dedication to the king, whom he compares to Moses, David, and Josiah, seems to be somewhat fulsome in its flattery, it is, at least, hardly more offensive than that of the Dedication of the A.V., and there was more to commend in the A.V. than in the coverdale.

3. An inspection of Coverdale's version serves to show the influence of the authorities he followed. The proper names of the O.T. appear for the most part in their Latin form, "Elia," "Eliseus," "Ochonias;" sometimes, as in "Essay" and "Jeremy," in which was famous a certain English. Some of the correspondences with Luther's version are not without interest. Thus "Cush," which in Wycliffe, Tyndale, and the A.V. is uniformly rendered "Ethiopia," is in Coverdale "Morians' land" (Ps. lxviii, 31; Acts xvii, 27, etc.), after the "Mohrenlande" of Luther, and appears in this form accordingly in the P.-B. version in the Psalms. The proper name Rabshekhah passes, as in Luther, into the "chief butler" (2 Kings xviii, 17; Isa. xxxvi, 11). In making the sons of David "priests" (2 Sam. viii, 18) he followed both his author and the Authorized Version, "Ebrews" and "memons" in Acts xx, 28 ("overseers" and "elders") and "Shiloh," in which the name of Gen. xxii, 10, becomes "the worthy," after Luther's "der Held." They "houghed oxen" takes the place of "they digged down a wall," in Gen. xlix, 6. The singular word "Lamia" is taken from the Vulg., as also "the land of Canaan" (Gen. xlv, 15) and "the land of Egypt" (Gen. xlvii, 6). In Isa. xxxvii, 14. The phrase "tabernacle of witness," where the A.V. has "congregation," shows the same influence. In spite of Tyndale, the Vulg. "plena gratia," in Luke i, 28, leads to "full of grace"; while we have, on the other hand, "congregation" throughout the N. T. for "ekklésia," and "love" instead of "charity" in 1 Cor. xiii. It was the result of the same indecision that his language as to the Apocrypha lacks the sharpness of that of the more zealous reformers. "Baruch" is placed with the canonical books, after "Lamentations." Of the rest he says that they are "placed apart," as "not held by ecclesiastical doctors in the same repute" as the other Scriptures, but this is only because there are "dark sayings" which seem to differ from the "open Scripture." He has no wish that they should be "deeped or little set by." "Patience and study would show that the two were agreed." 4. Wills, who thus exonerated Coverdale, does not make the claim which has sometimes been made for this version of Coverdale's, as though it had been made from the original text (Anderson, i, 564; Whitaker, Hist. and Crit. Inquiry, p. 58). It is not improbable, however, that as time went on he added to his knowledge. The letter addressed by him to Cromwell (Rem. p. 629; Parker Soc.) obviously asserts, somewhat ostentatiously, an acquaintance "not only with the standing text of the Hebrew, with the interpretation of the Chaldean and the Greek," but also with "the diversity of reading of all sects." He, at any rate, continued his work as a painstaking and accurate translator. Fresh editions of his Bible were published, keeping their ground in spite of rivals, in 1537, 1539, 1550, 1553. He was called in at a still later period to assist in the Geneva version. Among smaller facts connected with this edition may be mentioned the appearance of Hebrew letters—of the name Jehovah—in the title-page (1777), and again in the margin of the alphabetic poetry of the Psalms. The plural form "Biblia" is retained in the title-page, possibly, however, in its later use as a feminine singular (comp. Biblia). There are notes, no chapter-headings, no divisions into verses. The letters A, B, C, D in the margin, as in the early editions of Greek and Latin authors, are the only headings given in places. Many of the annotations point to parallel passages. The O.T., especially in Genesis, has the attraction of wood-cuts. Each book
ENGLISH VERSIONS

has a table of contents prefixed to it. A careful reprint, though not a fac-simile, of Coverdale's version has been published by Bagster (Lond. 1838).

V. MATTHEW.—1. In the year 1537, a large folio Bible appeared as edited and dedicated to the king, by Thomas Matthew. No one of that name appears at all prominently in the religious history of Henry VIII, and Matthew's relations, from his being a learned and pseudonymous, adopted to conceal the real translator. The tradition which connects this Matthew with John Rogers, the protomartyr of the Marian persecution, is all but undisputed. It rests (1) on the language of the preface and dedication, which describe him (Foxe, Acts of Matt., 1599, 1568; Chisholm, History of Rogers, p. 418-423) as Joannes Rogers, alias Matthew, as if it were a matter of notoriety; (2) the testimony of Foxe himself, as representing, if not personal knowledge, the current belief of his time; (3) the occurrence, at the close of a short exhortation to the study of Scripture in the preface, of the initials J. R.; (4) internal evidence. This last subdivides itself. (a) Rogers, who had graduated at Pembroke College, Cambridge, in 1525, and had sufficient fame to be invited to the new Cardinal's College at Oxford, accepted the invitation to go to Antwerp, and there became acquainted with Tyndale two years before the latter's death. Matthew's Bible, as might be expected, if this hypothesis were true, reproduces Tyndale's work, in the N. T. entirely, in the O. T. as far as 2 Chron., the rest being taken, with license and improvement, from the Gospels and Psalms. (b) In the language of the Dedication is that of one who has mixed much, as Rogers mixed, with foreign reformers—"the godlie in strange countries".

2. The printing of the book was begun apparently about, and was carried on as far as the end of Isaiah. At that period a new printer appeared, the name of one of the London printers, Grafton and Whitechurch, appears. The history of the book was probably something like this: Coverdale's translation had not given satisfaction—least of all were the more zealous and scholar-like reformers contented with it. As the only complete English Bible, it was, however, as yet, in possession of the field. Tyndale and Rogers, therefore, in the year preceding the imprisonment of the former, determined on another, to include O. T., N. T., and Apocrypha, but based throughout on the original. The work was carried on at the expense of the same Antwerp merchant who had assisted Tyndale (Poyntz), and thus got as far as Isaiah. The enterprising London printers, Grafton and Whitechurch, then came in (Chester, Life of Rogers, p. 29). It would be a good speculation to enter the market with this, and send out Coverdale's with the advantage in which they had no interest. They accordingly embarked a considerable capital, £500, and then came a stroke of policy which may be described as a miracle of audacity. The name of Rogers, known as the friend of Tyndale, is suppressed, and the surnames of Thomas as Matthew disarms suspicion. The book is sent by Grafton to Cranmer. He reads, approves, rejoices. He would rather have the news of its being licensed than a thousand pounds (Chester, p. 425-427). Application is then made both by Grafton and Cranmer to Cromwell. The king's license is granted, but the publisher wants more. Nothing less than a monopoly for five years will give him a fair margin of profit. Without this, he is sure to be undersold by piratical, inaccurate editions, badly printed on inferior paper. Failing this, he trusts that the king will order one copy to be bought by every incumbent, and six by every abbey. If this was too much, the king might, at least, impose that obligation on all the popish-inclined clergy. That will bring in something, besides the good it may possibly do them (Chester, p. 430). The application was to some extent successful. A copy was ordered, by royal proclamation, to be set up in every church, the cost being divided between the clergy and the parishioners. This was, therefore, the first Authorized Version. It is scarcely conceivable, however, that Henry could have read the book which he thus sanctioned, or known that it was substantially identical with what had been publicly stigmatized in his Acts of Parliament (cf. supra). What had before been given more or less to the bosom character of Tyndale's annotations, and here were notes bolder and more thorough still. Even the significant "W. T." does not appear to have attracted notice.

3. What has been said of Tyndale's version applies, of course to this. There are, however, a number of modern advanced technical words connected with the Psalms, Neginloth, Shiggaion, Sheminith, etc., are elaborately explained. Ps. xi. is printed as a dialogue. The names of the Hebrew letters are prefixed to the verses of Lamentations. Reference is made to the Chrest Pharsense (Job vii.), to Rabbi Abraham (Job xix.), to Kimchi (Psa. iii.). A like range of knowledge is shown in the N. T. Strabo is quoted to show that the magi were not kings, Macrobius as testifying to Herod's ferocity (Matt. ii.), Erasmus's Paraphrase on Matt. xviii., xv. The population of the peoples mentioned in Matt. iii. is given. "the woman that was a sinner" is discussed, and rejected (Luke x.). More noticeable even than in Tyndale is the boldness and fulness of the exegetical notes scattered throughout the book. Strong and earnest in asserting what he looked upon as the central truths of Christianity, the Gospel, as he believed it to be interpreted in other things which has not appeared again in any authorized translation or popular commentary. He guards his readers against looking on the narrative of Job i. as literally true. He recognizes a definite historical standpoint, for Ps. xlv. ("Jehovah praise Solomon for the beauty, eloquence, power, and nobleness, both of himself and of his wife"). Ps. xxxii. ("David declareth Christ's dejection . . . and all, under figure of himself"). And the Song of Solomon ("Solomon made this balade for himself and his wife, the daughter of Pharaoh, under the shadow of himself, scouring Christ, etc."). The chief duty of the Sabbath is "to minister the folder of the Word to simple souls," to be "pittif over the weariness of such neighbors as labored sore all the week long." "When such occasions come as turn our rest to occupation and our work to recreation, is not Christ Himself a new man made for man, and not man for the Sabbath?" (Jer. xvii.). He sees in the prophesia of the N. T. simply "exponents of Holy Scripture" (Acts xv.). To the man living in faith, "Peter's fishing after the resurrection, and all deeds of matrimony are pure spiritual," to those who are not, "learning, doctrine, temptation of high things, preaching, study of Scripture, founding of churches and abbeys, are works of the flesh" (Pref. to Romans). "Neither is outward circumcision or outward baptism worth a pin of themselves, save the thing put us in remembrance to keep the covenant" (1 Cor. iii.). "He that desireth honor gapest after luce . . . castles, parks, lordships . . . desireth not a work, much less a good work, and nothing less than a bishop's" (1 Tim. iii.). Ezek. xxxiv is said to be "against bishops and curates that despise the flock of Christ." The Psalm of the mercies of God and li. and lii appears (as in Tyndale) as "the messenger of the congregation." Strong proofs against Puritany are found in notes to Ezek. xviii and 1 Cor. iii., and in the "Table of Principal Matters" it is significantly stated under the word Puritany that "it is not above the Bible, but the purging and remission of our sins is made us by the abundant mercy of God." The Preface to the Apocrypha explains the name, and distinctly asserts the inferiority of these books. No notes are added to them, and the translation of them is taken from Coverdale, as if it had not been worth while to give much labor to it.
ENGLISH VERSIONS 214 ENGLISH VERSIONS

4. A few points of detail remain to be noticed. In the order of the books of the N. T. Rogers follows Tyndale, agreeing with the A. V. as far as the Epistle to Philemon. This is followed by the Epistles of John, then that to the Hebrews, then those of Peter, James, and Jude. Wood-cut, not very freely introduced elsewhere, is now given to every letter. The introduction of the "Table" mentioned above gives Rogers a claim to be the patriarch of Concl

VI. TAVERNER (1539).—1. The boldness of the pseudo-Matthew had, as has been said, frightened the ecclesiastical world from its propriety. Coverdale's version was, however, too inaccurate to keep its greater dullness stable; to find another, and at the same time to find a printer applied to Richard Taverner. But little is known of his life. The fact that, though a layman, he had been chosen as one of the canons of the Cardinal's College at Oxford indicates a reputation for scholarship which this is confirmed by the character of his translation. It proseizes, in the title-page, to be "newly recognized, with great diligence, after the most faithful exemplars." The editor acknowledges "the labors of others (i.e. Tyndale, Coverdale, and Matthew, though he does not name them) who have neither been toiled under, nor harmed, in their attempts to translate, or own that the work is not one that can be done "absolutely" (i.e. completely) by one or two persons, but requires "a deeper conferring of many learned wittes together, and also a juster time and longer leisure:" but the thing to be done; he had been asked to do it. He had "used his talent" as he could.

2. In most respects this may be described as an expurgated edition of Matthew's. There is a table of principal matters, and there are notes; but the notes are briefer and less polemical. The passages quoted above are, e. g. omitted wholly or in part. The epistle to the Hebrews is especially slighted.

VII. CRANMER.—1. In the same year as Taverner's, and coming from the same press, appeared an English Bible, in a more stately folio, printed with a more costly type, carrying a higher name than any previous edition. The title-page is ornamented with elaborate engraving, the spirit and power of which indicate the hand of Holbein. The king, seated on his throne, is giving the "Verbum Dei" to the bishops and doctors, and they distribute it to the people, while doctors and people are all joining in cries of "Vivat Rex!" It declares the book to be "truly translated after the verity of the Hebrew and Greek texts" by "divers excellent learned men, expert in the foresaid tongues." A preface, in April, 1540, with the initials "T. C.," implies the archbishop's sanction. In a later edition (Nov., 1549) his name appears on the title-page, and the name of Richard Tottel is confused with that of Thomas, bishop of Durham, and Nicholas (Sheath), bishop of Rochester; but this does not exclude the possibility of others having been employed for the first edition.

2. Cranmer's version presents, as might be expected, many points of interest. The prologue gives a more complete idea of what a translation ought to be than we have as yet seen. Words not in the original are to be printed in a different type. They are added, even when "not wanted by the sense," to satisfy those who have "missed them" in previous translations, i. e. they represent the various readings of the Vulgate where it differs from the Hebrew. The sign * indicates diversity in the Chaldee and Hebrew. It had been intended to give all these, but it was found that this would have taken too much time and space, and the editors purposed therefore to print them in a little volume by themselves. The frequent hands (\(\sigma\)) in the margin, in like manner, show an intention to give the "godly-learned in Christ Jesus." The preface, however, is cautious and, as there had not been time for the "king's council to settle them," they were omitted, and no help given to the reader beyond the marginal references. In the absence of notes, the lay-reader is to submit himself to the "godly-learned in Christ Jesus." The books of the Pentateuch have their Hebrew names given, Bereshith (Genesis), Vede Schemot (Exodus), and so on. 1 and 2 Chron. in like manner appear as Dibre Haizadin. In the edition of 1541, many proper names in the O. T. appear in the smaller Hebrew form, as e. g. Amaziah, Jeremiahu. In spite of this parade of learning, however, the edition of 1569 contains, perhaps, the most startling blunder that ever appeared under the sanction of an archbishop's name. The editors adopted the preface which, in Matthew's Bible, had been prefixed to the Psalms, and this is accompanied by a preface of the common traditional explanation of the name was concisely given. They appear, however, to have shrunk from offending the conservative party in the church by applying to the books in question so damnatory a term as Apocrypha. They were at last out for a word more neutral and respectful, and found one that appeared in some MSS. of Jerome so applied, though in strictness it belonged to an entirely different set of books. They accordingly substituted that word, leaving the preface in all other respects as it was and in the text of the book. The central character of Cranmer's policy, was doubtless that which enabled it to keep its ground during the changing moods of Henry's later years. It was reprinted again and again, and was the authorized version of the English Church until 1568. The translation folio of Matthew, the translation folio of Cranmer, the translation folio of Tyndale, and the translation folio of the Psalms, accordingly, were taken most, if not all, the portions of Scripture in the Prayer-books of 1549 and 1552. The Psalms as a whole, the quotations from Scripture in the Homilies, the sentences in the Communion services, and some phrases elsewhere, are "worthy fruits of penance," still preserve the remembrance of it. The oscillating character of the book is shewn in the use of "love" instead of "charity" in 1 Cor. xiii; and "congregation" instead of "church" generally, after Tyndale; while in 1 Tim. iv, 14, we have the singular rendering, as if to gain the favor of some, of "the body of Christ," instead of "the body of God," The plan of indicating doubtful texts by a smaller type was adhered to, and was applied, among other passages, to Ps. xiv. 5, 6, 7, and the more memorable text of 1 John v, 7. The translation of 1 Tim. iii, 16, "All Scripture given by inspiration of God," anticipated a construction of that text which has sometimes been boasted of, and sometimes attacked as an innovation. In this, however, Tyndale had led the way.

VIII. GENEVA.—1. The experimental translation of the Gospel of Matthew by Sir John Cheke into a purer English than before (Stype, Life of Cheke, vii,
ENGLISH VERSIONS

had so little influence on the versions that followed that it hardly calls for more than a passing notice, as showing that scholars were as yet unsatisfied. The reaction under Mary gave a check to the whole work, as far as England was concerned; but the exiles who fled to Geneva entered upon it with more vigor than ever. Cranmer's version did not come up to their ideal. Its size made it too costly. There were no explanatory or dogmatic notes. It followed Coverdale too closely; and where it deviated, did so, in some instances, in a retrograde direction. The Genevan refugees—among them Whittingham, Goodman, and Coverdale—were the chief promoters of a new version, "for two years or more, day and night." They entered on their "great and wonderful work" with much "fear and trembling." Their translation of the N. T. was "diligently revised by the most approved Greek examples" (MSS. or editions?) (Preface). The N. T., translated by Whittingham, was printed by Conrad Badius in 1557, the whole Bible in 1560.

2. In point of general correctness in expressing the true sense of the Hebrew and Greek Scriptures, the Geneva version shows a very marked advance on all that preceded it, and for more than sixty years it was the most regarded of the English translations. Large numbers were brought over from the Continent in the early years of Elizabeth, it was printed in England in 1561, and a patent of monopoly was given to James Bodley. This was transferred in 1576 to Barker, in whose family the right of printing Bible translations for upwards of a century. Not less than eight editions of the Bible were, in addition, reprinted between 1538 and 1611. It kept its ground for some time even against the later version of King James, and gave way, as it were, slowly and under protest. In the Soldiers' Pocket Bible, published in 1643, fifty verses of the 11th Psalm were the only selections of Scripture taken from the Geneva version. The causes of this general acceptance are not difficult to ascertain. The volume was, in most of its editions, cheaper and more portable—a small quarto, instead of the large folio of Cranmer's Great Bible. It was the first Bible which laid aside the adolescent black letter, and appeared in Roman type. It was the first which, following the Hebrew example, recognised the division into verses, so dear to the preachers or hearers of sermons. It was accompanied, in most of the editions after 1578, by a Bible Dictionary, and the Table of Contents was immensely helpful in dealing with the difficulties of Scripture, and were looked upon as spiritual and evangelical. It was accordingly the version specially adopted by the great Puritan party through the whole reign of Elizabeth. If a lesser person of that lineage of James might be expected, it was based on Tyndale's version, often returning to it where the intermediate renderings had had the character of a compromise.

3. Some peculiarities are worthy of special notice: (1) It professes a desire to restore the "true writing" of many Hebrew names, and we meet accordingly with forms like Izak (Isaak), Jakob, and the like. (2) It omits the name of Paul from the title of the Epistle to the Hebrews; and, in a short preface, leaves the authorship an open question. (3) It avows the principle of putting all words not in the original in italic. (4) It was the chief promoter of the practice of separating words by capital letters, something like a declaration of war against the established order of the Church's lessons, commemorating Scripture facts, and the deaths of the great reformers, but ignoring saints' days altogether. (5) It was the first English Bible which entirely omitted the Apocrypha. (6) The notes were characterized as different, almost as much an alien style, and almost as much a foreign accent, as the language of the Bible was as different, not only in their theology, but in their politics. They made allegiance to kings dependent upon the soundness of their faith, and in one instance (note on 2 Chron. xvi, 16) at least seemed, to the easily startled James I., to favor tyrannicides.

4. The circumstances of the early introduction of the Geneva version are worth mentioning, if only as showing in how different a spirit the great fathers of the English Reformation, the most conservative of Anglican theologians, acted from that which has too often animated their successors. Men talk now of different translations and various readings as likely to undermine the faith of the people. When the application was made to archbishop Parker, in 1565, to support the Bodleigh's application for a license to reprint the Geneva version in 12mo, he wrote to Cecil in its favor. He was at the time looking forward to the work he afterwards accomplished, of "one other special Bible for the church to be set forth," of the faculty who took the time and leisure should permit, "but in the mean time it would "nothing hinder, but rather do much good, to have diversity of translations and readings" (Strype, Life of Parker, iii, 6). Many of the later reprints, instead of the Geneva version from the Greek, have Tomson's translation of Beza's Latin version; and the notes are said to be taken from Joas. Cramer, P. Leeser, Villierus, and Fr. Junius. The Geneva version, as published by Barker, is that popularly known as the Breeches Bible, from its rendering of Gen. iii, 7.

It had, however, been preceded in this by Wycliffe's. The Vulgate and the Latin version will account for the wish of archbishop Parker, in spite of his liberal tolerance, to bring out another version which might establish its claims against that of Geneva. Great preparations were made. The correspondence of Parker with his suffragans presents the points of interest to us. The notes of the Vulgate were adopted the text as to the true theory of a translation. Thus, while Sands, bishop of Worcester, finds fault with the "common translation" (Geneva?), as "following Munster too much," and so "swerving much from the Hebrew," Gorse, bishop of Chester, and all the others, the Psalms, acted on the principle of translating them so as to agree with the N.-T. quotations, "for the avoiding of offence;" and Cox, bishop of Ely, while laying down the sensitive rule that "inkhorn terms were to be avoided," also went on to add "that the usual terms were to be retained so far forth as the Hebrew will well bear" (Strype, Parker, iii, 6). The principle of pious frauds, of distorting the truth for the sake of edification, has perhaps often been acted on by other translators. It has not often been so explicitly avowed as in the first of these suggestions.

2. The English Bible was read in number, together with some deans and professors, brought out the fruit of their labors in a magnificent folio (1568 and 1572). Everything had been done to make it attractive. A long erudite preface vindicated the right of the people to read the Scriptures, and (quoting the authority of bishop Fisher) admitted that the poet was as to be avoided, "also went on to add that "the usual terms were to be retained so far forth as the Hebrew will well bear" (Strype, Parker, iii, 6). The principle of pious frauds, of distorting the truth for the sake of edification, has perhaps often been acted on by other translators. It has not often been so explicitly avowed as in the first of these suggestions.

cere and True Translation, etc.). The charges are mostly of the same kind as those brought by Sir T. More against Tyndale. "The old time-honored words were discarded. The authority of the Septuagint and Vulgate was set at naught when the translator's view of the meaning of the Hebrew and the Latin text of all that he found in them." The new model translation was to avoid these faults. It was to command the respect at once of priests and people. After an incubation of some years, it was published at Rheims in 1582. Though Martin was competent to translate from the Greek, he was not able to be literalistic. There was not the same idea of the N.T. produced some rather curious combinations. The Gospels, the catholic Epistles, and those to Titus, Philemon, and the Hebrews, are grouped together as legal, St. Paul's other epistles as apocalyptic; the Acts appear as the one historical, the Revelation as the one prophetick book. (2) It is the only Bible in which many passages, sometimes nearly a whole chapter, have been marked for the express purpose of being omitted when the chapters were read in the public service of the Church. (3) In the editions of the Bible version, now the only being the one used in the Book of Common Prayer, the books not included therein were omitted altogether, and that of Cranmer is substituted in its place. (4) The initials of the translators were attached to the books which they had translated, and not merely the word of the work was done on the plan of limited, not joint liability. Here, as in the Genev, there is the attempt to give the Hebrew proper names more accurately, as e.g. in Heva, Isbace, Uziah, etc.

4. Of all the English versions, the Bishops' Bible had the least success. It did not command the respect of scholars, and its size and cost were far from meeting the wants of the people. Its circulation appears to have been practically limited to the churches which were ordered to be supplied with it. It had, however, at any rate, the right to boast of some good Hebrew learning. They only failed in all the versions of the Psalms, as, bishop Alley, had written a Hebrew Grammar; and, though vehemently attacked by Broughton (Townley, Literary History of the Bible, iii, 190), it was defended "as vigorously by Fulke, and, together with the A.V. received the praise of the best translation in the world" (Table Talk, Works, iii, 2009).

X. RHEMS AND DOUY.—1. The successive changes in the Protestant versions of the Scriptures were, as might be expected, matter of triumph to the controversialists of the Latin Church. Some saw in it an argument against any translation of Scripture into the spoken language of the people. Others pointed desirous to the want of unity which these changes displayed. There were some, however, who took the line which Sir T. More and Gardiner had taken under Henry VIII. They did not object to the principle of an English Bible. The only complaint was that the versions hitherto made with being false, corrupt, heretical. To this there was the ready retort that they had themselves done nothing; that their bishops in the reign of Henry had promised, but had not performed. It was felt to be necessary that they should take some steps which might enable them to turn the edge of this reproach. Accordingly, the English refugees who were settled at Rheims—Martin, Allen (afterwards cardinal), and Bristow—undertook the work. Gregory Martin, who had graduated at Cambridge, had signalized himself by an attack on the existing versions, and had been answered in an elaborate treatise by Fulke, master of Catharine Hall, Cambridge (A Defence of the Disput.
ENGLISH VERSIONS 217
ENGLISH VERSIONS
ten raised since. "If every man's humor were to be followed, there would be no end of translating" (Card-owell, Conferences, p. 188). Cranner's words seemed likely to be fulfilled again. Had it been left to the bishops, we might have waited for the A.V. "till the day after doomsday." Even when the translator was done, and the translator acknowledged that the Hampton Court Conference had been the starting-point of it, they could not resist the temptation of a fling at their opponents. The objections to the Bishops' Bible had, they said, been nothing more than a shift to justify the refusal of the Conference to adopt the Commonwealth's version without modification (Preface to A.V.). But the king disliked the politics of the Geneva Bible. Either repeating what he had heard from others, or exercising his own judgment, he declared that there was as yet no good translation, and that the Geneva was the worst of all. Nothing, however, was said at the Conference beyond the hope thus held out.

2. But the king was not forgetful of what he thought likely to be the glory of his reign. The work of organizing and superintending the arrangements for a new translation was one specially congenial to him, and he had no qualm about the decision. Accordingly The selection of the fifty-four scholars to whom it was intrusted seems, on the whole, to have been a wise and fair one. Andrews, Saravia, Overal, Montague, and Barlow represented the "higher" party in the Church; Broughton, Basset, and Bawdwin, the "puritanical" party. Scholarship unconnected with party was represented by Henry Savile and John Boys. One name, that of Broughton, is indeed conspicuous by its absence. The greatest Hebrew scholar of the age—the man who had, in a letter to Cecil (1593), urged this very plan of a joint translation—had already been related to the Commonwealth books of the O.T. (Job, Ecclesiastes, Daniel, Lamentations), was ignominiously excluded. This may have been, in part, owing to the dislike with which Whitgift and Bancroft had all along regarded him. But in part, also, it was owing to Broughton's own character. An unmanageable temper, showing itself in violent language, and the habit of stigmatizing those who differed from him, even on such questions as those connected with names and dates, as heretical and atheistic, must have made him thoroughly impracticable to one of the men whose presence throws a committee or conference into chaos. Only forty-seven names appear in the king's list (Burnet, Reform, Records). Seven may have died or declined to act; or it may have been intended that there should be a final committee of revision. A full list is given by Fuller (Ch. Hist. v. 154) for those who dwelt with the six puritanical scholars, by Todd and Anderson. The Puritan side was, however, weakened by the death of Reincle and Lively during the progress of the work.

3. What reward other than that of their own consciences and the judgment of posterity were the men thus chosen to expect for their long and laborious task? The king was not disposed to pay them out of his state revenue. Gold and silver were not always plentiful in the household of the English Solomon, and from him they received nothing (Heywood, State of Ash. Bibl. Revision). There remained, however, an ingenuous turn of thought which had the merit of being inexpensive. A king's letter was sent to the archbishops and bishops, to be transmitted by them to their chapters, commending all the translators to their favorable notice. They were exhorted to contribute in all 1000 pounds, which was to be informed of each man's liberality. If any livings in their gift, or in the gift of private persons, became vacant, the king was to be informed of it, that he might nominate some of the translators to the vacant preferment. Heads of colleges, in like manner, were enjoined to give free lodgings to such divines as were summoned from the country to labor in the great work (Strype, Winsof, iv.). That the king might take his place as director of the whole, a copy of fifteen instructions was sent to each translator, and apparently circulated freely in both universities.

4. The instructions thus given will be found in Fuller (ii. c.), and with a more accurate text in Burnet (Reform, Records). It will not be necessary to give them in detail here, but it will be a part of the duty which the translator has undertaken to note the bearing of each clause upon the work in hand, and its relation to previous versions. (1) The Bishops' Bible was to be followed, and as little altered as the original will permit. This was probably intended to be a check so as to quiet the misgivings of those who wished to view the new version a condemnation of that already existing. (2) The names of prophets and others were to be retained as nearly as may be in the form vulgarly used. This, however, was to guard against forms like Zabak, Jeremiah, etc., which had been introduced in some versions, and which was not thought to be more copiously. To it owe probably the forms Jeremy, Eliah, Osee, Core, in the N.T. (3) The old ecclesiastical words were to be kept, as the word "church" not to be translated "congregation." The rule was apparently given for the sake of this special application in I. Corinthians 12:28. An exception, however, due to it. The earlier versions, it will be remembered, had gone on the opposite principle. (4) When any word hath divers significations, that to be kept which hath been most commonly used by the most eminent fathers, both ancient and modern. This, like the former, tends to confound the functions of the preacher and the translator, and substitutes ecclesiastical tradition for philological accuracy. (5) The division of the chapters to be altered neither at all, or as little as possible. For after all, even several attempts to make a vernacular version in view than truth and accuracy, and the result is that divisions are perpetuated which are manifestly arbitrary and misleading. (6) No marginal notes to be affixed but only for the explanation of Hebrew and Greek words. This was obviously directed against the Geneva notes, as the special objects of the king's aversion. Practically, however, in whatever feeling it originated, we may be thankful that the A.V. came out as it did, without note or comment. The open Bible was placed in the hands of all readers. The work of interpretation was left free. Had an opposite course been pursued, we might have had the tremendous evil of a whole body of exegesis imposed upon the Church by authority, reflecting the Calvinism of the Synod of Dort, the absolutism of James, the highflying presacracy of Bancroft. (7) Such quotations of places to be given only as are sufficiently marked. (8) All power given to the reader to reference of one Scripture to another. The principle that Scripture is its own interpreter was thus recognised, but practically the marginal references of the A.V. of 1611 were somewhat scanty, most of those now printed having been added in later editions. (9) and (9) State plan of translation. Each company of translators is to take its own books; each person to bring his own corrections. The company to discuss them, and, having finished their work, to send it on to another company, and so on. (10) Provides for differences of opinion between two companies by referring them to the general meeting. (11) Gives power, in cases of difficulty, to consult any scholars. (12) Invites suggestions from any quarter. (13) Names the directors of the work: Andrews, dean of Westminister; Barlow, dean of Chester; and the regius professor of Hebrew at the University of Oxford. The names are to be followed when they agree more with the original than the Bishops' Bible, namely, Tyndale's, Coverdale's, Matthew's, Whitchurch's, (Cranner's), and Geneva. (15) Authorizes universities to appoint three or four overseers of the work.

5. It is not known that any of the men who were connected with this work, or any minute of the meetings for conference, is still extant. Nothing is more
striking than the silence with which the version that was to be the inheritance of the English people for at least two centuries and a half was ushered into the world. Here and there we get glimpses of scholars coming from their country livings to their old college haunts to work diligently at the task assigned them (Pusey, i. 15; 25). At the meet-
ing of translators, one man reading the chapter which he had been at work on, while the others listen, with the original, or Latin, or German, or Italian, or Spanish versions in their hands (Selden, Table Talk). We may represent to ourselves the differences of opinion, and the sometimes acrimonious spirit in which the translators worked, the strong overbearing temper of a man like Bancroft, the minority comforting themselves with the thought that it was no new thing for the truth to be outvoted (Gell, Essay towards Amendment of last English transl. of Bible, p. 321). Dogmatic interests were in some cases allowed to bias the translation; and the Calvinism of one party, the premillennial views of another, were both represented at the expense of accuracy (Gell, l. c.). The following passages are those commonly referred to in support of this charge: (1.) The rendering of "saved" is "saved" in Acts 47. (2.) The insertion of the words "any man" in Heb. x. 88 ("the just shall live by faith, but if any man draw back," etc.), to avoid an inference unfavorable to the doctrine of Final Perseverance. (3.) The use of "bishop," in Acts i. 20, of "oversight," in 1 Pet. v. 2, of "pastor," in Heb. iii. 1, etc., in the New Testament, rather than in Acts xx. 28, in order to avoid the identification of bishops and elders. (4.) The chapter-heading of Ps. cxlix in 1611 (since altered), "The prophet exhorteth to praise God for that power which he hath given the Church to bind the consciences of men." Blunt (Duties of a Parish Priest, lect. i.) appears, in this respect, on the side of the prosecution, Trench (On the A. V. of the N. T. chap. x) on that of the defence. The charge of an undue bias against Rome in 1 Cor. xi. 27; Gal. v. 6; Heb. xiii, 4, is one on which an acquisitive may be pronounced with little or no hesitation. For three years the work was on; on the separate companies comparing notes as directed. When the work drew towards its completion, it was necessary to place it under the care of a select few. Two from each of the three groups were accordingly selected, and the six met at London to superintend the publication. Now, for the first time, we find any more definite remuneration than the shadowy promise held out in the king's letter of a share in the 1000 marks which deans and chapters would not contribute. The matter had now reached its business stage, and the Company of Stationers was involved in it. Six editors had to be engaged, and in less than three months' work, thirty pounds each, in weekly payments, for their nine months' labour. The final correction, and the task of writing the arguments of the several books, was given to Bilson, bishop of Winchester, and Dr. Miles Smith, the latter of whom also wrote the Dedication and the Preface. Of these two documents, this is probably unfortunately familiar enough to us, and is chiefly conspicuous for its servile adulation. James I is "that sanctified person," "enriched with singular and extraordinary graces," that had appeared "as the sun in his strength." To those appeal against the judgment of those whom they describe, in somewhat peevish accents, as "popish persons or self-conceited brethren." The Preface to the Reader is more interesting, as throwing light upon the principles on which the translators acted. They "never thought that they should need to make a new translation, nor yet to make of a bad one a good one." Their "endeavor was to make a good one better, or out of many good ones, one principal good one." They claim credit for steering a middle course between the Puritans who "left the old ecclesiastical words," and the obscurity of the Papists "retaining foreign words of purpose to darken the sense." They vindicate the practice, in which they indulge very freely, of translating one word in the original by several English words, partly on the intelligible ground that it is not always possible to find one word that will express all the meanings of the Greek or Hebrew, partly on the somewhat childish plea that it would be unfair to choose some words for the high places and leave the uglier and clod-dered stones of God's truth, and to pass over others as unworthy.

7. The version thus published did not all at once supersede those already in possession. The fact that five editions were published in three years shows that there was a good demand. But the Bishops' Bible remained the English Bible in most places, and in many parishes he used his texts from it in preaching before the king as late as 1621), and the popularity of the Geneva version is shown by not less than thirteen reprints, in whole or in part, between 1611 and 1617. It is not easy to ascertain the impression which the A. V. made at the time it appeared. Probably, as in most new works, it was far less good for evil or threat than friends or foes expected. The Puritans, and the religious portion of the middle classes generally, missed the notes of the Geneva book (Fuller, Church History, x. 50, 51).

The Romanists spoke, as usual, of the unsettling effect of these frequent changes, and of the uncertainty in the writings of leaving men in doubt what was the truth of Scripture. Whitaker's answer, by anticipation, to this charge is worth quoting: "No inconvenience will follow if interpretations or versions of Scripture, when once established, are kept as they have been, and not afterwards changed or corrected" (Disser. on Script., p. 322, Parker Soc. ed.). The wiser divines of the English Church had not then learned to raise the cry of finality. One frantic cry was heard from Hugh Broughton, the rejected (Works, p. 651), who would "rather be torn in pieces the tide of conservative feeling. no book in the world has been so widely read as the Bible is, word for word, with no regard to the difference of idioms. This is well enough so long as scholars have to do with it, but when it comes among the common people, Lord! what gear do they make of it!" (Table Talk). The feeling of which this is a reflection led, even in the midst of the agitations of the Commonwealth, to proposals for another revision, which, after being brought forward in the Grand Committee of Religion in the House of Commons in January, 1656, was referred to a sub-committee, acting under Whitelocke, with powerful and positive results. Six editions of the manuscripts were accordingly held frequently at Whitelocke's house, at which we find, mingled with less illustrious names, those of Walton and Cudworth. Nothing, however, came of it (Whitelocke, Memorials, p. 564; Collier, Ch. Hist. ii. 9). No report was ever made; and with this all respect for the side of conservative feeling, in this as in other things, checked all plans of further alteration. Many had ceased to care for the Bible at all. Those who did care were content with the Bible as it was. Only here and there was a voice raised, in the R. G. fell reign, of the side of change. It was on the panegyric set in. It would be easy to put together a long catalogue of praises stretching from that time to this present. With many, of course, this has been only the routine repetition of a traditional boast. "Our unrivalled Translation" and "our incomparable Liturgy" have been equally praise of course. But there have been witnesses of a far higher weight. In pro-
pension as the English of the 18th century was infect-
ed with a Latinized or Gallicized style, did those who
had a purer taste look with reverence to the strength
and purity of a better time as represented in the A.V.
Thus Addison dwells on its ennobling the coldness of
modern languages with the glowing phrases of He-
brew (Spectator, No. 405), and Swift confesses that
"the translators of the Bible were masters of an Eng-
lish style which now is gone, wherever there is any
sense of the face of the earth and of the whole man.
The most solemn and tender of individual memories are,
for the most part, associated with it. Men leav-
ing the Church of England for the Church of Rome
turn regretfully with a yearning look at that noble
well of English undefiled which they are about to
exchange for the uncouth monstrosities of Rhelms
and Douay. In this case, too, as in so many others, the
position of the A.V. has been strengthened, less by the
skill of its defenders than by the weakness of its as-
sailants. While from time to time scholars and di-
vinity low, and according to the Lord's will (believed)
have admitted the necessity of a revision, those who
have attacked the present version and produced new
times have been, for the most part, men of narrow
knowledge and defective taste (Purver, Harwood, Bel-
lamy, Conquest, Sawyer), just able to pick out a few
obvious faults, and committing others equally glaring.
They have also generally entered on the work of trans-
slating or revising the whole Bible single-handed.
One memorable exception must not, however, be passed
over. Hallam (Lit. of Europe, iii, ch. ii, art. fin.)
remarks that "the most valuable work in the best of the
"enthusiastic praise" which has been lavished on this
translation. "It may, in the eyes of many, be a bet-
ter English, but it is not the English of Daniel, or
Raleigh, or Bacon... It abounds, in fact, espe-
cially in the O.T. with obsolete phraseology, and
with single words long since abandoned, or reserved
only in provincial use. The statement may, how-
ever, in some sense be accepted as an encomium. If
it had been altogether the English of the men of let-
ters of James's reign, would it have retained, as it has
done for two centuries and a half, its hold on the mind
of the memory, the affections of the English peo-
ple?

XII. Schemes for a Revision.—1. A notice of the at-
ttempts which have been made at various times to
bring about a revision of the A.V., though necessarily
brief in this place, may not be without its use for
future learners. The first half of the 18th century
was not favorable for such a work. An almost solitary
Essay for a New Translation by H. R. (Ross), 1702,
tracted little or no notice (Todd, Life of Walton, i,
184). A Greek Testament, with an English transla-
tion, singularly vulgar and offensive, was published
in 1729, of which extracts are given by Lewis (Hist.
of Trans. c. v). With the slight revival of learning among
the scholars of the latter half of that period the subject
was again mooted. Lowth in a visitation ser-
mon (1758), and Becker in a Latin speech intended for
Congress (1771) recommended it. Most Pitkin-
ton, in his Remarks (1759), and Dr. Thomas Brett, in an
Essay on Ancient Versions of the Bible (1760), dwell
on the importance of consulting them with reference to
the O.T. as well as the N.T., with a view to a more
approximation of that which was above the Masoretic
Hebrew, the former italing also on the obstacles which
are scattered in the A.V., and giving a useful alpha-
betic list of them. A folio new and literal translation
of the whole Bible by Anthony Purver, a Quaker
(1764), was a more ambitious attempt. He dwells at
some length on the "obsolete, uncouth, clownish" ex-
pressions which disfigure the A.V. He includes in
his list such words as "joyous," "solace," "lament," "day-ap-
"he hearkened to his voice;" "it eats" for "it eats" the "in
favor with" for "found" grace in the eyes of; "wise" for "angry" for his wrath was kindled. In spite of this defective taste, how-
ever, the work is considered by many of the best
scholars as a careful study of the original and of many of the best
commentators, and may be contrasted favorably with most of the
single-handled translations that have fol-
lowed. It was, at any rate, far above the depth of
degradation and folly which shone in Hazlitt's
Liturig Translations of the N.T. "with freedom, spirit,
and elegance" (1786). Here, again, a few samples are
enough to show the character of the whole. "The
Young lady is not dead" (Mark v, 35), "A gentleman of splendid family and opulent fortune had two sons" (Luke xv, 11). "The clergyman said, You have
given him the only right and proper answer" (Mark xii, 35). "We shall not pay the common debt
denature, but by a soft transition," etc. (1 Cor. xv, 51).

2. Biblical revision was happily not left entirely in
such hands as these. A translation by Worsley "ac-
nounced on the name of an expedient" (1770) was at least, less offensive. Durell (Preface to Job), Lowth (Pref. to Isaiah), Blayney (Pref. to Jere-
msia, 1784), were all strongly in favor of a new or re-
vised translation. Durell dwells most on the arbitra-
ary additions and omissions in the A.V. of Job, on the
total absence of all significations in the A.V., on the
"enthusiastic praise" which has been lavished on this
translation. "It may, in the eyes of many, be a bet-
ter English, but it is not the English of Daniel, or
Raleigh, or Bacon... It abounds, in fact, espe-
cially in the O.T. with obsolete phraseology, and
with single words long since abandoned, or reserved
only in provincial use. The statement may, how-
ever, in some sense be accepted as an encomium. If
it had been altogether the English of the men of let-
ters of James's reign, would it have retained, as it has
done for two centuries and a half, its hold on the mind
of the memory, the affections of the English peo-
ple?"

A more ambitious scheme was started by the Roman
Catholic Dr. Geddes, in his Prospectus for a New Transla-
tion (1786). His remarks on the history of English
translations, his candid acknowledgment of the excel-
len ces of the older and especially of the Masoretic
text, as perversing it, his critical notes on the true principles
of translation, on the A.V. as falling short of these,
may still be read with interest. He too, like Lowth,
finds fault with the superstitious adherence to the Ma-
soreic text, with the undue deference to lexicons, and
disregard of versions shown by our translators. The
proposal was well received by many Biblical scholars,
Lowth, Kennicott, and Barrington being foremost
among its patrons. The work was issued in parts,
according to the terms of the Prospectus, but did not get
further than 2 Chron. In 1793, when the death of the
translator was near, it was laid aside. Partly, perhaps, owing
to its incompleteness, but still more from the extreme
boldness of a Preface, anticipating the conclusions of
a later criticism, Dr. Geddes's translation fell rapidly
into disfavor. A sermon by White (famous for his
pamphlets) (1779), a pamphlet by Lord Stanhope (1779),
A. Symonds, professor of modern history at Cam-
bidge—the first on the Gospels and the Acts, in 1789;
The second on the Epistles, in 1794—though attacked
in an Apology for the Library and Church of England
(1790), helped to keep the discussion from oblivion.

3. The revision of the A.V., like many other edu-
siy reforms, was hindered by the French Revolution.
In 1792, archbishop Newcome had published an elabo-
rate defence of such a scheme, citing a host of author-
ties (Doddridge, Wesley, Campbell, in addition to those
already mentioned), and taking the same line as Lowth
Revised translations of the N.T. were published by Wakefield in 1795, by Newcome himself in 1796, by Scarlett in 1798. Campbell's version of the Gospels appeared in 1788, that of the Epistles by Macknight in 1795. But in 1786 the note of alarm was sounded. A few years earlier the French Revolution had begun. In the midst of its looming advance Bishop of Ely took the ground that "the present period was unfit," and from that time conservatism, pure and simple, was in the ascendancy. To suggest that the A.V. might be inaccurate was almost as bad as holding "French principles." There is a long interval, not a very great time, before controversialist, still more during this, between the establishment of the new prominence, and then there is a new school of critics in the Quarterly Review and elsewhere, ready to do battle vigorously for things as they are. The opening of the next campaign was an article in the Classical Journal (No. 86). The King's English, holding up to the people a new translation, followed soon afterwards by its publication under the patronage of the prince regent (1819).

The work was poor and unsatisfactory enough, and a tremendous battery was opened upon it in the Quarterly Review (Nos. 87 and 88), as afterwards (No. 46) Upward, an employee of the English Bible Society, who came forward with a pamphlet in its defence (Remarks in favour of a new Translation, 1819). The rash assertion of both Bellamy and Burgess that the A.V. had been made almost entirely from the Septuagint and Vulgate, and a general deficiency in all accurate scholar- ship, was anathema to many with a special interest. The natural elements of this controversy may well be passed over, but three less ephemeral works issued from it, which any future laborer in the same field will find worth consulting. Whitaker's Historical and Critical Inquiry was chiefly an able exposition of the exaggerated statement just mentioned. H. J. Todd, in his Notes on the Authorized Translation (1819), entered more fully than any previous writer had done into the history of the A.V., and gives many facts as to the lives and qualifications of the translators not easily to be met with elsewhere. The most masterly, helter-skelter, of the many criticisms against all change was a pamphlet (Remarks on the Critical Principles, etc., Oxford, 1820), published anonymously, but known to have been written by archbishop Laurence. The strength of the argument lies chiefly in a skilful display of all the difficulties of the text, and in the beautiful style. It is not a perfect restoration of the Hebrew of the O.T., or any settlement of the Greek of the N.T.; the expediency, therefore, of adhering to a Textus receptus in both. See Various Readings. The argument, if conclusive, would unsettle our confidence in the text of the Holy Scriptures altogether. It is thoroughly thought out. The last portion of the book is fully refuted by the archbishop's positions. But the scholarship and acuteness with which the subject is treated make the book instructive, and any one entering on the work of a translator ought at least to read it, that he may know what difficulties he has to face. About this period, also (1819), a new edition of Newcome's version was published by Belsham and other Unitarian ministers, and, like Bellamy's attempt on the O.T., the effort to stiffen the resistance of the great body of the clergy to all proposals for a revision, was at an end.

4. A correspondence between Herbert Marsh, bishop of Peterborough, and the Rev. H. Walter, in 1829, is the next link in the chain. Marsh had spoken (Lectures on Biblical Criticism, p. 258) with some contempt of the A.V. as based on Tyndale's, Tyndale's on Luther's, Luther's on Hebrews, Hebrews on the Vulgate itself, the Vulgate itself being based on the Vulgate. There was, therefore, on the view, no real translation from the Hebrew in any one of these. But it is evident that the Christian Hebraists of the period of the Reformation depended quite as much on the traditional learning of their Jewish teachers, often thoroughly so indeed, as the work of the earliest Christian tradition preserved in the Latin Vulgate, and that they followed, as far as they were able, the Masoretic punctuation, a much surer guide than the ancient versions, or the later rabbinic interpretation.

5. The last five-and-twenty years have seen the question of a revision from time to time gaining fresh prominence. If men of second-rate power have some- times been the originators of these times to come, the time to be, the time of the Roman Catholic Church (Dr. Barrow, Dr. Moberly, dean Alford, Mr. Humphry, and Dr. Ellicott) represents the same school of conservative progress, has the merit of adhering to the clear, pure English of the A.V., and does not deserve the censure which Dr. Beecher passes on it as "promising little and performing less" (p. 78). It includes only the Gospel of John, and the epistles to the Romans and Corinthians. The publications of
American Bible Union are signs that there also the same want has been felt. The translations given respectively by Alford, Stanley, Jewett, and Conybeare and Howson, in their respective commentaries, are in like manner at once admissions of the necessity of the work and contributions towards it. Mr. Sharpe (1840) and Mr. Godwin (1867) were the exception. The work of translations of the entire N.T. Mr. Sawyer (1858) has done the same, and proposes to continue the task over the whole Bible; but he lacks both the scholarship and the judgment necessary. Mr. Cooksey has published the Gospel of Matthew as Part I of a likewise undertaking. It might almost seem as if at last there was something like a consensus of scholars and divines on this question. That assumption would, however, be too hasty. Partly the via inertere, which, in a large body like the clergy of the Church, is always great, partly the fear of ulterior consequences, partly also the indifference of the majority of the laity, would probably, at the present moment, give at least a numerical majority to the opponents of a revision. Writers on this side are naturally less numerous, but the feeling of conservatism, pure and simple, has found utterance in recent revisions, especially as Newberry, and of different calibers—Mr. Scrivener (The N.T.: An English Version), Dr. McCaul (Reasons for holding fast the Authorized English Version), Mr. C. S. Malan (A Vestigial, etc.), and Dr. Cumming (Revision and Transliteration). A high American authority, Mr. Geo. P. Marsh, also has evinced a desire to weight his judgment into the scale against any revision at the present moment (Lectures on the English Language, lect. xxviii).

XII. Present State of the Question. 1. To take an accurate estimate of the extent to which the A.V. requires revision would call for nothing less than an examination of each single book, and would therefore involve an amount of detail incompatible with our present limits. To give a few instances only would practically fix attention on a part only of the evidence, and so would lead us to a false rather than a true estimate. No attempt, therefore, will be made to bring together individual passages as needing correction. A few remarks on the chief questions which must necessarily come before those who undertake a revision will not, perhaps, be out of place. Examples, classified under corresponding heads, will be found in the book by Dr. Trench already mentioned, and, scattered in the form of annotations, in that of professor Scholefield.

2. The translation of the N.T. is from a text confessedly imperfect. What editions were used are a matter of inference. Theprototype, however, was published with a Latin version by Beza between 1565 and 1598, and agreeing substantially with the Textus receptus of 1638. It is clear, on principle, that no revision ought to ignore the results of the textual criticism of the last hundred years. To shrink from noticing any variation, to go on prating as the inspired Word that which there is a preponderant reason for believing to be an interpolation or a mistake, is neither honest nor reverential. To do so for the sake of greater edification is simply to offer to God the unclean sacrifice of the A.V. at any rate, in favor of the practice of not noticing variations. In Matt. i. 11, xxvi, 26; Luke xvii, 36; John viii. 6; Acts xiii, 18; Ephes. vi, 9; Heb. ii, 4; James ii, 18; 1 John ii, 28; 1 Peter ii, 21; 2 Peter iii, 11, 18; 2 John, 8, different readings are given in the margin, or, as in 1 John ii, 28, indicated by a different type. In earlier versions, as has been mentioned, 1 John v. 7 was printed in smaller letters. The degree to which this should be done will, of course, require discernment. An apparatus like that in Tischendorf or Alford would obviously be out of place. Probably the useful Greek Testament edited by Mr. Scrivener might serve as an example of a middle course.

3. Still less had been done at the commencement of the 17th century for the text of the O.T. The Jewish teachers, from whom Protestant divines derived their knowledge, had given currency to the belief that in the Masoretic text were contained the ipostasia verbs of revelation, free from all risks of error, from all civil and casual corrections. The expression "the authentic Hebrew," "the Hebrew verity," were the expression of this undiscerning reverence. They refused to apply the same rules of judgment here which they applied to the text of the N.T. They assumed that the Masorites were infallible, and were reluctant to acknowledge that it was possible variations since. Even Walton did not escape being attacked as unsound by the great Puritan divine, Dr. John Owen, for having called attention to the fact of discrepancies (Proleg. ch. vi). The materials for a revised text are, of course, scantier than with the N.T.; but the labors of Kennicott, De Rossi, J. H. Michaelis, and Davidson have not been fruitless, and here, as there, the older versions must be admitted as at least evidence of variations which once existed, but which were suppressed by the rigorous uniformity of the later rabbis. Conformity to the later readings, such as are found in Ewald, have so freely suggested, ought to be ventured on in such places only as are quite unintelligible without them. See CRITICISM, BIBLICAL.

4. All scholars worthy of the name are now agreed that as little change as possible should be made in the Authorized Version. Dr. V. Hunger, who was assistant to an emasculated elegance such as might have infected a new version in the last century. The very fact of the admiration felt for the A.V., and the general vival of a taste for the literature of the Elizabethan period, are safeguards against any like tampering now. Some words, however, absolute or superfluous, are altogether obsolete; others, more numerous, have been slowly passing into a different, often into a lower or a narrower meaning, and are therefore no longer what they once were, adequate renderings of the original. The self-imposed law of fairness, which led the A.V. translators to admit as many English words as possible to the honor of representing one in the Hebrew or Greek text, has, as might be expected, marred the perfection of their work. Sometimes the effect is simply that the literal rendering is the true meaning of the word, as in the rendering of the repetion of the same word; sometimes it is more serious, and affects the meaning. While it would be simple pedantry to lay down unconditionally that but one and the same word should be used throughout for one in the original, there can be no doubt that such a limitation is not only unwarranted by the principle of the translation yet others to the contrary should be dealt with as exceptional necessities. Side by side with this fault there is another just the opposite of it. One English word appears for several Greek or Hebrew words, and thus shades of meaning, often of importance to the right understanding of a passage, are lost sight of. Taken together, the two forms of error, which meet us in well-nigh every chapter, make the use of an English Concordance absolutely misleading. Technical terms especially should be represented in as exact and uniform a manner as possible.

6. Grammatical inaccuracy must be noted as a defect pervading, more or less, the whole extent of the present version of the N.T. Instances will be found in abundance in Trench and Scholefield (passim), and in any of the better Commentaries. Such Gallicisms as "the Israel of God," "Amen is Babylon fallen," etc., to say nothing of outright French words, e. g. "bruit" for noise (Nah. iii, 19), have often escaped detection. The true force of tenses, cases, prepositions, articles, is continually lost, sometimes at the cost of the finer shades which give vividness and emphasis, but sometimes also entailing more serious errors. In justice to the translators of the N.T., it must be said that, situ-
ated as they were, such errors were almost inevitable. They learned Greek through the medium of Latin. Lexicons and grammars were alike in the universal language of scholars; and that language was poorer and less infected than the Greek, and failed utterly to represent, e.g., the force of its article, or the difference of its sorites. Thus the idea in a man of this nature as were used by the translators were necessarily based upon a far scantier induction, and were therefore more meagre and inaccurate than those which have been the fruit of the labors of later scholars. The scholar may in many things fall short of that of an earlier day, but he does not directly present the sense of the original, then there is no reason for treating them as if they were added at the discretion of the translators. If they go beyond that, they are of the nature of a gloss, altering the force of the original, and have no right to be there at all, while the fact that they appear as additions frees the translator from the sense of responsibility. (8.) Good as the principle of marginal references is, the margins of the A.V., as now printed, are somewhat inconveniently crowded, and the references, being often merely verbal, tend to obscure rather than to aid the reader weary of referring. They need, accordingly, a careful sifting; and though it would not be desirable to go back to the scanty number of the original edition of 1611, something intermediate between that and the present overabundance would be an improvement.

4. Many renderings, retaining this or that precise value of Hebrew words. The grammars, also in Latin, were defective. Little as Hebrew professors have, for the most part, done in the way of exegesis, any good commentary on the O.T. will show that here also these errors are serious as in the A.V. In one memorable case, the inattention, real or apparent, of the translators to the force of the Hiphil form of the verb (Lev. iv. 12) has led to a serious attack on the truthfulness of the whole narrative of the Pentateuch (Colenso, JEHOSHUA critically Examined, pt. i., ch. vii.).

5. The division into chapters and verses is a matter theVersions of which may be revised in any future revision. The former, it must be remembered, does not go back further than the 18th century. The latter, though answered, as far as the O.T. is concerned, to a long-standing Jewish arrangement, depends, in the N.T., upon the work of Robert Stephens. Neither in the O.T. nor in the N.T. did the verse-division appear in any earlier edition than that of Geneva. The inconvenience of changing both are probably too great to be risked. The habit of referring to chapter and verse is too deeply rooted to be got rid of. Yet the division, as it is, is not seldom artificial, and sometimes absolutely misleading. No one would think of printing any other book, in prose or poetry, in short clauses like the verses of our Bibles, and the tendency of such a division is to give a broken and discontinuous knowledge, to make men good textuaries but bad divines. An arrangement which is of the paragraph Bibles of our own time, with the verse and chapter divisions relegated to the margin, ought to form part of any authoritative revision.

6. Other points of detail remain to be noticed briefly: (1.) The chapter-headings of the A. V. often go beyond the limits, as the great majority do. If it is intended to give an authoritative commentary to the lay reader, let it be done thoroughly. But if that attempt is abandon-
ENGRAVE

ENMITY

with the high-priest's dress—the two onyx-stones, the twelve jewels, and the mitre-plate having inscriptions on them (Exod. xxviii, 11, 21, 36). The previous notices of signets (Gen. xxxix, 18; xii, 32) imply engraving. The art was widely spread throughout the kingdom of Egypt (Books of the Dead, xxvi, 32; xxvii, 40), particularly among the Egyptians (Diod. i, 78; Wilkinson, iii, 378), the Ethiopians (Her. vii, 69), and the Indians (Von Bohlen, Indien, ii, 122). See GRAVING.

En-had' dāh (Hebrew Eyn Cheddah), הָעֶבֶדָה, a city on the border of the tribe of Issachar, mentioned between Engannim and Mefid (Num. xxxii, xix, 30; Josh. xxvii, 15); its site is uncertain. Zefran, i, 815 and Thomson (Land and Book, ii, 248) would identify it with Ain-Houd, on the western brow of Carmel, and about two miles from the sea; but this is out of the limits of the tribe of Issachar. Its site is possibly to be sought in the formula of the ancient village Ain-Makhi, not far N.E. of Nazareth (Robinson, Researches, iii, 209).

En-hak' kōrē (Heb. Eyn hak-korē), הָעֶבֶדָה, fountain of the gather; Sept. ἡ πηγή τοῦ φυλακτοῦ, a name given by Samson to the spring that burst forth in answer to his prayer in a dell of Lehi, when he was exhausted with the slaughter of the Philistines (Judg. xv, 19). The word לִבְנַחַל, nakhal, which in the narrative denotes the "hollow place" (literally the "mortal" or "socket in the jaw", and also that for the "jaw" itself, lekhi, are both names of places. See LEXI. Van de Velde (Mém. p. 489) endeavors to identify Lehi with Tell el-Lekhiyeh, 4 miles N. of Beer-sheba, and En-hakkore with the large spring between the tell and Kheweldeh. But Samson's adventures appear to have been confined to a narrow circle, and there is no ground for extending them to a distance of some 50 miles from Gaza, which Lekiyeh is, even in a straight line. It appears to have been the same place later known (Neh. xi, 29) as En-Rimon (q. v.).

En-hā' rod (Heb. Eym Harod), הָעֶבֶדָה, fountain of Harod; Sept. τῆς πηγῆς Ὀρόπης, a spring in the vicinity of the town of Harod (Judg. vii, 1), where the name is translated "well of Harod". See HADAR.

En-hā' sōr (Heb. Eym Chatzer), הָעֶבֶדָה, fountain of Hazor; i. e. of the village; Sept. τῆς πηγῆς Ὁζορίου, a fortified city of the tribe of Naphtali, mentioned between Edrei and Iven (Josh. xix, 37), and distinguished from the older city of Hazor, the site of which is unknown (Exod. xiv, 7). It has been identified by Schwartz (Palest. p. 180) and Thomson (Land and Book, i, 515) with the Ain-Hosar not far N.W. of Tell-Hosar (between Rameh or Ramash and Yakub or Hukkob), which latter (being marked as a ruined site by Van de Velde, although Dr. Robinson, who visited it, denies that there are any traces of structures on the summit; Later Researches, p. 81), was probably the location of the city itself. See HAZOR.

Enlightenment. See ILLUMINATI.

En-mish’ pat (Heb. Eym Mishpat), הָעֶבֶדָה, fountain of judgment; Sept. ἡ πηγῆ τὸς στόχου, the earlier name (Gen. xiv, 7) for Kadesh (q. v.), in the borders of Idumea (comp. Num. xx, 13, 14). According to Schwartz (Palest. p. 216), there has been found, about 10 miles south of Petra, a large spring, still called tentatively by the Bedouins Ain-ul-Sufa, or spring of justice, which he holds to be the same as the ancient En-mishpat; but this would be very far south for the required locality [see EXOD.]; and the spot he names is doubtless the Ain-ul-Safaka marked on Robinson's Map as identical with the Zoqotha of the Roman post-routes (Re land, ii, 313).

Enmity: "opposition; very bitter, deep-rooted, irrecocilable hatred and variance. Such a constant enmity there is between the followers of Christ and
Satan; nay, there is some such enmity between mankind and some serpents (Gen. iii. 15). Friendship with this world, in its wicked members and lusts, is enmity with God—is opposed to the love of him, and amounts to an actual exerting of ourselves to diabolon and death. The word ἐνμίαν, is explained in 1 Cor. i. 29, 30. The carnal mind, or minding of fleshly and sinful things, is enmity against God—is opposed to his nature and will in the highest degree, and, though it may be removed, cannot be reconciled to him, nor he to it (Rom. vii. 8). The ceremonial law is called enmity. It marked God as enmity against sin by demanding atonement for it; it occasioned men's enmity against God by its burdensome services, and was an accidental source of standing variance between Jews and Gentiles: or perhaps the enmity here meant is the state of variance between God and men, whereby he justly loathed and hated them as sinful, and condemned them to punishment; and they wickedly hated him for his holy excellence, retributive justice, and sovereign goodness: both are slain and abolished by the death of Christ (Eph. ii. 15, 16).

Ennodius, Magnus Felix, one of the Latin fathers, was born about A.D. 473, at Arles (according to others at Milan), of a noble Gallic family, having such names as Germanicus and Boethius on his mother's side. His parents dying early, he was sent, on the invasion of the Visigoths, to an aunt in Milan, who took good care of his education. Soon after her death (A.D. 489) he married a rich wife, and lived very freely until a severe illness brought him to reflection; and on his restoration he was ordained deacon, and later became a nun. (One account says that he had been ordained deacon before, and lived a bad life as deacon. In 494 he accompanied Epiphanius of Pavia on a mission to Burgundy to ransom some Italian prisoners. In 496 he went to Rome, where he soon gained great reputation. In 502 he wrote in vindication of Pope Symmachus against his rival, Pope Laurentius. In this defence he first asserted that the bishop of Rome is subject to no earthly tribunal (Gieseler, i, § 115). He was the first to give the bishop of Rome exclusively the name of "Papa" (pope), and was, in general, very eager to enlarge the papal authority. After he had been chosen, about A.D. 511, to succeed Maximus as bishop of Pavia (Ticinium), he went, under direction of pope Hormisdas, on two missions (515 and 517) to the emperor Anastasius with reference to the union between the Eastern Greek and Western churches. Both missions failed. Ennodius died at Pavia July 17, 521. Among his writings are, Epistolae ad Dianum lib. iv.:—Liber alv. ev. fil., contra Symmodem scrivere præsumerunt, containing the defence of Symmachus named above; Vita Epiphanii Episcopi; Vita Antonii Monachiariumus:—Eucharistia in vitis mnis, an autobiography:—Præcursus didascalca ad Ambrosium et Beatum:—Orations:—Carmina. His writings were published in Basle, 1580, fol.; Tournay, 1610; and by Simond (best ed.), Paris, 1811. They are also in Migne, Patro. Lat. vol. 139. Eunapius wrote strongly in favor of free will, and has therefore styled a Semipelagian. — Cave, Hist. Lit. (Geneva, 1720), i, 322; Cellarius, Auctores Sacris (Paris, 1861), x, 473 sq.; Herzog, Real-Encyklop. iv, 68; Wetzer u. Wele, Kirch. Lex. iii, 595.

'Enoch (Heb. Chovack), לוח סינע, inscribed; according to Philo, De poet. Cans, i, 11, from יוחנן, with the suffix יוחנן (יווחנן), יוחנן, the name of several men. 1. Moses, the seventh son of Cain (Gen. iv. 17), who called the city which he built after his name (Gen. iv. 18). B.C. post 4041. It is there described as being east of Eden, in the land of Nod, to which Cain retired after the murder of his brother. See Nod. Ewald (Gesch. i, 356, note) fancies that there is a reference to the Phrygian Iconium, in which city a legend of Ἀνανος was preserved, evidently derived from the biblical account of the father of Methuselah (Gen. iv. 24, 25; Gen. vii. 4; Nivianis). Other places have been identified with the city of Enoch with little probability; e. g. Anaucht (Ptolemy, vi, 8, 5) in Susiana, the Hemochni (Ptolemy, v, 9, 25; Strabo, i, 492; Pliny, vi, 10, 12) in the Caucasus, etc. (Huetius, De Paranaico, c. 17; Hasso, Entdeckungen, ii, 35; Gotter, De Tenho opsalta, 1727, [of little value]; Sticht, De ber. Hemochni, Jen. 1727). 2. Another antediluvian patriarch, the son of Jared and father of Methuselah (Gen. v. 21 sq.; Luke iii, 28: in 1 Chron. i, 8, the name is Anglicized "He-noch"). B.C. 8550-3185. He was born when Jared was 162 years old, and after the birth of his eldest son in his 66th year he lived 800 years. From the period of 856 years assigned to his life, Ewald (ib. Gesch. i, 356), with very little probability, regards him as "the god of the new year," but the number may have been without influence on the later traditions which assigned to Enoch the discovery of the science of astronomy (ἀστρολογία, Σεισπολομασ, in Euseb. Prep. Ev. iv, 17, where he is identified with Atlas). After the birth of Methuselah it is said (Gen. v, 22-24) that Enoch "walked with God 300 years . . . and he was not; for God took him" (Nipsh). The phrase "walked with God" (δια αύτου ἀλληλούγησεν) is elsewhere only used of Noah (Gen. vi, 9; comp. Gen. xvi, 1, etc.), and is to be explained of a prophetic life spent in immediate converse with the spiritual world (Book of Enoch, xii, 2, "All his actions were with the holy ones, and with the watchers during his life"). There is no farther mention of Enoch in the O. T., but in Ecclesiastus (xlix, 14) he is brought forward as one of the peculiar glorys (οὐκ εἰς ἱεραρχίαν ἔριθος ἐς τῶν Ἰβραίων, he was taken up (ἀνεσχέθη, Alex. μεταφέρεται) for each second person. He pleased the Lord and was translated (Vulg. into Paradise), being a pattern of repentance" (Reclus. xlii, 14). In the Epistle to the Hebrews the spring and issue of Enoch's life are clearly marked. "By faith Enoch was translated (μεταφέρεται), that he should not see death . . . for before his translation (μεταφέρεται) he had this testimony, that he pleased God." The contrast to this divine judgment is found in the constrained words of Josephus: "Enoch departed to the Deity (ἰδρυμένος τῷ θεῷ) . . . whose (the sacred writers) have not recorded his death" (Awt. i, 5, 4). In the Epistle to the Hebrews (xv, 14) comp. Enoch, is described as the second from Adam; and the number is probably noticed as conveying the idea of divine completion and rest (comp. August. c. Faust. xii, 14), while Enoch was himself a type of perfected humanity, "a man raised to heaven by pleading God, whose angels fell to earth by transgression" (Irenaeus, iv. 16, 2). Elijah was in like manner translated; and thus was the doctrine of immortality palpably taught under the ancient dispensation.

The biblical notices of Enoch were a fruitful source of speculation among the ancients. Some theologians disputed with subtlety as to the place to which he was removed, whether it was to Paradise or to the immediate presence of God (comp. Feuardentius, ad Iren. v, 5), though others more wisely declined to discuss the question (Thilo, Cod. Apor. N. T. p. 746). On other points they fall into universal unanimity. Enoch and Greek fathers commonly couple Enoch and Elijah as historic witnesses of the possibility of a resurrection of the body and of a true human existence in glory (Iren. iv, 5, 1; Tertull. de Resurr. Carm. p. 58; Jos. c. Apoll. c. 11). The voice of early ecclesiastical tradition is almost unanimous in regarding them as "the two witnesses" (Rev. xi, 3 sq.) who should fall before "the beast," and afterwards be raised to heaven before the great

ous monsters, doubtless correctly Bekemok in the

Ethiopic.

ENOC, BOOK OF, one of the most important re-

mains of early apocryphal literature. The interest

that once attached to it has now partly subsided: yet

a document quoted, as is generally believed, by an

inspired apostle (Jude, ver. 14, 15), can never be wholly

devoid of importance or utility in sacred literature.

Concerning its vigorous style and wide range of specula-

tion, the book is well worthy of that attention which it re-

ceived in the first ages, and recent investigations have

still left many points for further inquiry.

I. History of the Book.—The first trace of its exis-
tence is generally found in the epistle of Jude (14, 15;

comp. Enoch, i. 9), but the words of the apostle leave

it as an unexplained allusion to the book he denied to

have derived from tradition (Hoffmann, Schriftenreise, i, 420) or from writ-

ring (Koepfler, ...). Enoch's liyam), though the

wide spread of the book in the 2nd century seems al-

most decisive in favor of the latter supposition. In

several of the fathers mention is made of Enoch as the

author, not only of a prophetical writing, but of various

productions. Some such work appears to have been

known to Tertullian (Apoc. ii, 3); to Eusebius (Hist. Ec-

cles. i. 16, 2), and Anatolius (Euseb. H. E. vii. 82). Clemen-

t of Alexandria (Hegel. p. 801) and Origen (yet comp. c.

Cels. v, p. 257, ed. Spenc.) both make use of it, and

numerous references occur to the "writing," "books," and

"words" of Enoch in the Testament of the XII Patri-

archs (Apoc. i. 16, 17). The authorship of the work is

belong to the latter part of the 1st century or the be-

ginning of the second, and which presents more or less

resemblance to passages in the present book (Fabrici

275 sq.). Tertullian (De cultu fem. i. 3; compare De

Idol. 4) expressly quotes the book. It was "not received by some, nor admitted into the Jewish

canon" (in armarium Judaeum, but defends it on ac-

count of its reference to Christ ("legimus omnem scripturam sedificiacionis habilem divinum inspirari").

Augustine (De Civ. xv. 20, 4) and an anonymous writ-

er, who speaks of the "first book of Enoch," refers to it

(Psalm. cxxxii. 2; compare H. ad Psalm. i. c.), were

both acquainted with it; but from their time till the

revival of letters it was known in the Jewish Church

only through the quotation in Jude (Dillmann, Zimm.

i, 327). In the 5th century, the Church of Alexandria

began to use it. In the 8th century, Georgius Syncellus, in a

work entitled Chronographia, that reaches from Adam
to Diodocian, made various extracts from "the first

book of Enoch." In the 9th century, Nicephorus, pa-

triarch of Constantinople, at the conclusion of his Chron-

ographe (Chronicarion); and in the early part of the

century, his "asconioul books, refers to the book of Enoch, and

assigns 4800 eiriouS as the extent of it. After this time

little or no mention appears to have been made of the

production until Scaliger printed the fragments of the

Syncellus regarding it, which he inserted in his notes to

the Chronicarion. In consequence of such extracts, the

book of Enoch excited much attention and awakened

great curiosity. At the beginning of the 17th century an idea prevailed that it ex-

isted in an Ethiopic translation. A Capuchin monk from Egypt assured Pierre that he had seen the book

in Ethiopic, and the then Patriarch, as a descendant of

the scholar of Pisa so much that he never rested until he obtained the tract. But when Job Ludolph

went afterwards to Paris to the Royal Library, he found it to be a fabulous and silly production. In conse-

quence of this disappointment, and securing in Ethiopia it was abandoned. At length, in 1778, Bruce brought home three copies of the book of Enoch from Abyssinia in MSS., containing the Ethi-

opic translation complete. "Amongst the articles," he states, "I consigned to the library at Paris was a very

beautiful and magnificent copy of the prophecies of Enoch in large quarto. Another is amongst the books of

Scripture which I brought home, standing immediately

before the book of Job, which is its proper place in the

Abyssinian Canon; and a third copy I have pre-

sented to the Bodleian Library at Oxford by the hands

of Dr. Johnes, of the University of Carlow." It is

known in England that such a present had been made to

the Royal Library at Paris by Dr. Wolde, librarian of the British Museum, set out for France with letters from

the secretary of state to the ambassador at that
court, desiring him to assist the merchant in pre-

paring the work. Dr. Wolf accordingly transcribed it, and brought back with him the copy to

England. The Parisian MS. was first publicly noticed by the eminent Orientalist De Sacy in 1800, who

translated into Latin ch. i, ii, iv, xvi; also xxii and

xxxvi. These also he published in the Mopnos Zeug-

clopideique (VI, i, 382 sq.). Mr. Murray, editor of
Bruce's Travels, gave some account of the book from the traveller's own MS. The Ethiopic text, however, was not published till the edition of archbishop Laurence from the Bodleian MS. in 1838 (Libri Enoch versionis Ethiopici ... Oxon.). But in the interval Laurence published an English translation, with an introduction and notes, which passed through three editions (The Book of Enoch, etc., by R. Laurence; Oxford, 1821, 1823, 1836). The translation of Laurence formed the basis of the German edition of Hoffmann (Das Buch Henoch ... A. E. Hoffmann, Jena, 1833-38); and Gfrörer, in 1840, gave a Latin translation constructed from the editions of Laurence and Hoffmann (Prophetae veteres Pseudepigrapphi ... ed. A. F. Gfrörer, Stuttgart, 1840). According to Angelo Mai, there is a MS. copy of the book of Enoch among the Ethiopic codices of the Vatican, which must have been brought to England by Erasmus in 1514. In 1834 Dr. Rüppell procured another MS. of Enoch from Abyssinia, from which Hoffmann made the second part of his German version. All these editions were superseded by those of Dillmann, who edited the Ethiopic text from five MSS. (Libri Henoch, Ethiopici, Lipsiae, 1853). He gave a German translation of the book with a good introduction and commentary (Das Buch Henoch ... von Dr. A. Dillmann, Leipzig, 1853). The work of Dillmann gave a fresh impulse to the study of the book. Among the essays which were called out by it, the most important were those of Reuss, who published a German translation of the book (Entstehung, etc., Göttingen, 1856) and Hilgenfeld (D. Jüdische Apokalypse, Jena, 1857). The older literature on the subject is reviewed by Fabrius (Cod. Pseudep. V. T., I, 199 sq.).

The Greek translation, in which it was known to the fathers, appears to be irrecoverably lost. There is no trace of it after the 8th century. The last remnant of it is preserved by Syncellus.

II. Identity of the extant forms.—There can be no doubt that the Ethiopic translation exhibits the identical book which, as most belles lettres of the Jews, they composed; their use of them in the original, not the Greek translation of the Septuagint; their Hebrew etymologies of names, especially the appellations of angels and archangels; the fact that all words and phrases can easily be rendered back into Hebrew and Aramaic; the obscure quipus, which can only be explained by the Hebrew שָׁמַע, הָעֵדַת, "the second is called the south, because the Most High there descends," i.e. שָׁמַע, הָעֵדַת (Dillmann, Das Buch Henoch, p. 235, 296). The names of the conductors of the month are also Hebrew (lxvixii, 13), as Murray (p. 46) and Hoffmann (p. 690) remark. See Joseph b-Lewi, in the Journal Asiatique, 1867, p. 302 sq.

At what time the Greek version was made from the original can only be conjectured. It could not have been long after the final redaction of the whole, probably about the time of Philo. Having appeared in Greek, it soon became widely circulated. The Ethiopic version was made from the Greek probably about the same time as the Ethiopic translation of the other parts of the Bible with which it was afterwards connected, or, in other words, towards the middle or close of the 4th century. See ETHIOPIAN VERSIONS.

V. Contents.—The book of Enoch is divided in the Ethiopic MSS. into twenty sections, which are subdivided into 108, and numbered, but copies of them have not seen a classification of chapters. Dillmann has properly departed from the MSS., and endeavored to make divisions of sections, chapters, and verses which may represent the text pretty nearly as it is preserved among the Abyssinians. In its present shape the book consists of a series of revelations supposed to have been given to Enoch and Noah, which extend to the most varied aspects of na-
tude and life, and are designed to offer a comprehensive vindication of the action of Providence. See Enoch.

It is divided into five parts. The first part (chaps. i.-xxxvi. Dillm.,) after a general introduction (characterizing the book to which it belongs as a revelation of the hidden wisdom and mystery of the world, and its results both towards the righteous and rebellious sinners, written to console the pious in the times of final tribulation), contains an account of the fall of the angels (Gen. vi, 1), and of the judgment to come upon them and upon the giants, the nations, and races of mankind. The second (xxvii.-liv.) describes the description of the journey of Enoch through the earth and lower heaven in company with an angel, who showed him many of the great mysteries of nature, the treasure-houses of the storms, and winds, and fires of heaven, the prison of the fallen, and the land of the dead (xxviii.-xxxv.). The third part (xxxvii.-xxxviii.) is styled "a vision of wisdom," and consists of three "parables," in which Enoch relates the revelations of the higher secrets of heaven and of the spiritual world which were given to him. The first parable (xxxviii.-xl.) gives chiefly a picture of the future bliss of the redeemed. The fourth part (xliv.-lv.) describes in splendid imagery the coming of Messiah, and the results which it should work among the "elect" and the gainers; the third (lviii.-lxix.) describes the vision of the "sacred things," of "the elect and holy," and the confusion and wretchedness of the sinful rulers of the world. The third part (lxxii.-lxxxiii.) is styled "the book of the course of the lights of heaven," and deals with the motions of the sun and moon, and the changes of the seasons; and with this the narrative of the revelations of the book of Enoch ends.

The fourth part (lxxxiv.-xxci.) is not distinguished by any special name, but contains the record of a dream which was granted to Enoch in his youth, in which he saw the history of the kingdoms of God and of the world up to the final establishment of the throne of Messiah. The visions of the great monarchies of the ancient world, as well as the nations of the church, are dwelt on as the prelude of the final kingdom of the Redeemer, which is the subject of the final book.

The fifth part (xxci.-xxxvi.i) contains the last address of Enoch to his children, in which the teaching of the former chapters is made the groundwork of earnest exhortation. The signs which attended the birth of Noah are next noticed (cvii.-cviii.); and another short "writing of Enoch" (cviii.) forms the close to the whole of the Apocryphal Book of Enoch. See Enoch.

VI. Design.—The leading object of the writer, who was manifestly imbued with deep piety, was to comfort and strengthen his contemporaries. He lived in times of great persecution, and his inspiring visions of the future promised peace for all who remained true to the religion oppressed the righteous. The outward circumstances of the godly were such as to excite doubts of the divine equity in their minds, or, at least, to prevent them from having that hold on their faith which was necessary to sustain them in the hour of trial. In accordance with this, the writer exhibits the reward of the righteous and the punishment of the wicked. To give greater authority to his affirmations, he puts them into the mouths of Enoch and Noah. Thus they have all the weight belonging to the character of an eminent prophet and saint. Various digressions are not without their bearing on the main argument there is a purpose hidden. The narrative of the fallen angels and their punishment, as also of the flood, exemplifies the retributive justice of Jehovah; while the Jewish history, continued down to a late period, exhibits the final triumph of God's people, notwithstanding all their vicissitudes. Doubtless the author lived amid a season of trial, and, looking abroad over the desolation, sought to cheer the sufferers by the consideration that they should be recompensed in the Messianic kingdom. As for their wicked oppressors, they were to experience terrible judgments. The writer occasionally delights in uttering dire anathemas against the wicked. It is plain that the book grew out of the times and circumstances by which he was surrounded. It gives us a glimpse not only of the religious opinions, but also of the general features which characterized the whole period. The book belongs to the apocalyptic literature of the period between the close of the Old Testament and the appearance of the Christian church. The Messianic ideas are described in the same class of composition as the fourth book of Esdras and the Jewish Sibyllines. The principal interest attaching to it arises from its contributing to our knowledge of the development of Jewish Messianic ideas subsequently to the writings of inspired prophets. In tracing the gradual development of these ideas among the Jewish people, we are the better prepared for the revelation of the N. T.

VII. Doctrines.—In the doctrine of the Book of Enoch exhibits a great advance of thought within the limits of revelation in each of the great divisions of knowledge.

The teaching combines and repeats the thoughts of the scattered images of the O. T. to a physical system. The view of society and man, of the temporary triumph and final discontinuance of the oppressors of God's people, carries out into elaborate detail the pregnant images of Daniel. The figure of the Messiah is invested with majestic dignity, and is described as "the Son of God" (cv, 2 only), "whose name was named before the sun was made" (xlvi. 8), and who existed "after the time in the presence of God" (lxii. 6; comp. Laurence, Prec. Dial. l sq.). At the same time, his human attributes are declared as "the Son of Man" (cxiv., 1 only), "the elect one," "the righteous one," "the anointed," are brought into conspicuous notice. The mysteries of the spiritual world, the connection of angels and men, the classes and ministries of the hosts of heaven, the power of Satan (xl. 7; lxxv. 6), and the legions of the dead, and the doctrine of retribution, and eternal punishment (xxxi.; comp. Dillm. p. xix.), are dwelt upon with growing earnestness as the horizon of speculation was extended by intercourse with Greece. But the message of the book is emphatically one of "faith and truth" (comp. Dillm. p. 52), and while the writer combats and repeats the thoughts of Scripture, he adds no new element to the teaching of the prophets. His errors spring from an undisciplined attempt to explain their words, and from a proud exultation in present success. For the great characteristic by which the book is distinguished from the later books of the Bible (see Esdras) is the tone of triumphant expectation by which it is pervaded. It seems to repeat in every form the great principle that the world, natural, moral, and spiritual, is under the immediate government of God. Hence it follows that the sternest terms are used for sinners, and the glorious kingdom prepared for the righteous, and Messiah is regarded as the divine mediator of this double issue (xc. xci.). Nor is it without a striking fitness that a patriarch translated from earth, and admitted to look upon the divine majesty, is chosen as "the herald of wisdom, righteousness, and judgment to a people who, even in suffering, saw in their tyrants only the victims of a coming vengeance."

As in the canonical prophecies of the O. T., so here, the final establishment of the Messianic kingdom is preceded by wars and desolations. In the eighth of the ten weeks in which the work of destruction divided, the sword executes judgment upon the wicked, at the end of which God's people have built a new temple, in which they are gathered together. The tenth week closes with the eternal judgment upon angels (xc. xci.). With respect to the doctrine of a general resurrection, it is certainly implied in the work, but the mode of the resurrection of the wicked and the righteous is differently presented. The spirits of the former are taken out of Sheol and thrown into the place of torment (xxvili. 3; ciii. 8; civil. 2.5); whereas the spirits of the righteous remain holy, dwell with their bodies, and share the blessedness of Messiah's kingdom on earth (lxii. 5; cxii. 10; xci. 3; c, 5). The
reunion of their bodies with their spirits appears a thing reserved for the righteous.

As various sects in Jerusalem were tolerably developed at the time of some of the writers, it has been a subject of inquiry whether the peculiar doctrines of any apostolic writer could be ascertained. According to Litt. (Zeitschrift der deutsch.-morgenländ. Gelehr., vii, 249), the work originated in the sphere of Esseniøm. We learn from Josephus that the Essenes preserved as sacred the names of the angels; and put up certain prayers before sunrise, as if they made supplication for that phenomenon. Now there is a very developed angel-doctrine in the work before us, and we also find the following passage: "When I went out from below and saw the heaven, and the sun rise in the east, and the moon go down in the west, a few stars, and everything as he has known it from the beginning, I praised the Lord of judgment and marveled him, because he has made the sun go forth from the windows of the east," etc., i.xxxiii, 11). This certainly reminds one of Esseniøm showing its influence on the mind of the writer. The 108th chapter is more plainly Esseniøm. The pious upholders of the Essenes, as described as having lived a life of purity, self-denial, and asceticism like that of the Essenes. Yet Dillmann appears disinclined to find any reflection of Esseniøm in 1 lixiii, 11, or elsewhere (Das Buch Henoch, Althrus. Eingebung, p. lll). We admit that the other parts of the Scripture have influence on the writer. It is obvious, however, that the writer did not belong to the school of the Pharisees. He was tolerably free from the sects of his people; rising above the narrow confines of their distinctive peculiarities, which were not then fully developed.

VIII. Style.—It is obvious that the author was a poet of no mean order. His inspiration was high, his ideas elevated and pure. He had a creative fancy which could body forth new forms and shapes. Speaking out of the midst of his own time, he could throw himself back into the past, and mould it suitably to his purpose. His language, too, has the living freshness of a companion with the book of Daniel, as is obvious from the spirit of his production.

Not that he was an imitator of that book—far from it; his mind was too powerful and independent. It is characteristic of him that he calls Jehovah Lord of Spirits, that he speaks of angels, spiritual beings that stand before God the four highest angels, Michael, Raphael, Gabriel, Phanuel; and the three highest hosts, the Cherubim, Seraphim, and Ophanim; that he speaks of the Elect by way of eminence, the Son of Man, i.e. the Messiah. The charm of the writing is so inscrutable that an inexperienced reader into the highest regions of the spiritual world. With a genuine glow of feeling, and the elevation of purest hope, he carries us away, till we are lost in wonder at the poetic inspiration of one living at a period comparatively so late. His work must have created a new branch of writing at the time, leading to numerous imitations.

IX. Authorship.—The general unity which the book possesses in its present form marks it, in the main, as the work of one man. The several parts, while they are complete in themselves, are still connected by the development of a central purpose. But formally, the work might have been divided in various ways. Each of the different fragments is as complete in itself as it could be made to appear; it is a case of the principle: "When a body is divided, it is divided into parts of itself." Thus a work of this kind is a collection of partial writings, and it is impossible to give a precise date for each.

The book of Enoch is a collection of many writings, some of which are of earlier date than the book itself, and some of which are later. The book is not a single composition, but a collection of various writings, some of which are more ancient than others. The book is divided into two parts: the first part is called "The Book of Enoch," and the second part is called "The Book of the Giants." The first part is a collection of sayings and visions of Enoch, the brother of Jubal, and the second part is a collection of sayings and visions of the Biblical patriarchs.

The book of Enoch is a collection of many writings, some of which are of earlier date than the book itself, and some of which are later. The book is not a single composition, but a collection of various writings, some of which are more ancient than others. The book is divided into two parts: the first part is called "The Book of Enoch," and the second part is called "The Book of the Giants." The first part is a collection of sayings and visions of Enoch, the brother of Jubal, and the second part is a collection of sayings and visions of the Biblical patriarchs.
because they occur in the Ethiopic O. T. as the representatives of Hebrew-Greek ones. All that can be truly deduced from the Christology is that it is highly developed, and very elevated in tone, yet fairly derivable from the O. T. in all its essential and individual features. Nor is there anything in the eschatology or angelology to bring any enlightening touch of the Johannine tradition. We allow that the Messiah is spoken of in very exalted terms. His dignity, character, and acts surpass the descriptions presented in other Jewish books. But they are alike in the main, colored by the highly poetical and majestic style of the writers with the sublimity and animation of their creations. We must therefore reject Stuart's opinion of a Jewish-Christian origin. All the arguments adduced on its behalf are easily dissipates, since Dillmann's editio and Ewald's criticisms have led to a better acquaintance with the text of the extant origin. Nor is Hagensfeld's attempt to show that the so-called first Enoch book (xxxvii-xxxiii) proceeded from Christian Gnostics more successful, as Dillmann has remarked (Pseudopigraphien der A. T. in Herzog's Encyclopädie, xii. 309, 310). Equally futile is Hoffmann's endeavor to show that the book did not appear till the completion of the construction of Jerusalem in the first century, when both Jude's epistle and the Apocalypse had been written (Zeitschr. d. morgenl. Gesellschaft, vi. 87 sq.). Not very dissimilar is Böttcher's view, that the book, like the Syllinic Apocalypse, was written in the second century after Christ of pieces belonging to different times (De Inferno, i. 500). Nothing is more certain than that the work belongs to an ante-Christian world; and therefore the only problem is how to distribute the different books incorporated, and when to date them collectively. Up to the apostolic age the prophecy had received no attention, yet who ever supposed that by such references he sanctions the productions from which his citations are made, or renders them of greater value? All that can be reasonably inferred from such a fact is, that if the inspired writer cites a particular sentiment with approval, it must be regarded as just and right, irrespective of the remainder of the book in which it is found. The apostle's sanction extends no farther than the passage to which he alludes. Other portions of the original document may exhibit the most absurd and superstitious notions. It has always been the current opinion that the work is the production of the first century, and there is nothing to disprove it. It is true that there is some variation between the quotation and its original, but this is usual even with the N. T. writers in citing the Old Testament.

The Place where it was written—The place where the author lived and wrote is Palestine. This alone seems to be the case. The book is, in fact, a work in which is largely pervaded by the spirit of persons whose power, religion, and independence had been overborne by foreign interference. Launoue, however, endeavors to show from the 27th chapter (71 lost lines) that the author of the book has the kingdom of the 12th of the various periods of the year is given, that the locality must have been between the 46th and 49th degrees of north latitude, in the northern districts of the Caspian and Euxine seas. Hence he conjectures that the writer was one of the Jews who had been carried away by Shalmaneser and did not return. After Krieger supposed (Brittrage, p. 53) that Enoch, the imaginary writer, drew from the astronomical traditions or writings of northern Asia, regardless of the difference of Palestine's geographical position. Murray has shown (p. 60 sq.) that one passage favors the idea that the author lived in Abydsinia; whence he sees that the production proceeded from, various persons belonging to countries removed from one another. But De Sacy has remarked that as the authors' astronomical system is partly imaginary, their geography may also be visioned. Neither Egypt, nor Chaldea, nor Palestine, suits the astronomy of the book. The scientific knowledge of the Israelites was imperfect. It is therefore idle to look for accuracy in geography or astronomy. The writer or writers systematized such knowledge as they had of natural phenomena after their own fashion, as the case of the 12th month and the thirty-five days, and the allusions to the Oriental theophany and the opinions of Zoroaster do not necessarily commend a Chaldean origin, at least of the astronomical part, since the images of fire, radiance, light, and other Oriental symbols may be rationally accounted for by the Jews' intercourse with other nations, and their residence there for a time. The Oriental philosophy of Middle Asia was evidently not unknown to the authors, and they are embodied in the work because Persian influences had been felt by the Israelites since the Babylonian captivity.

Did Jude really quote the Book of Enoch?—A simple comparison of the language of the apostle's text that found in the corresponding passage of the extant book seems to settle this question conclusively in the affirmative, especially as the Scripture citation is preceded with the direct acknowledgment of quotation: "And Enoch also, the seventh from Adam, prophesied of these things." The following are the words respectively:

EPISTLE OF JUDE, VER. 14, 15; BOOK OF ENOCH, CHAP. II; LAURENCE'S VERSION, LAURENCE'S VERSION.

"Behold, the Lord cometh with ten thousands of his thousands of saints, to execute judgment on all," etc. The language is so personal that the apostle's words are not ten thousand words to the same effect that are ungodly among them, reprove all the carnal for evils of all their ungodly deeds (which the sinful and wicked do) and they are ungodly have done, and all of their hard-milked against him." Speeches which ungodly sinners have condemned him."

Some, however, are most unwilling to believe that an inspired writer could cite an apocryphal production. Such an opinion destroys, in their view, the character of his writing, and reduces it to the level of an ordinary composition. But this is preposterous. The current opinion that the so-called apocryphal books are ungodly has been made without proof or clear rational evidence, and who ever supposed that by such references he sanctions the productions from which his citations are made, or renders them of greater value? All that can be reasonably inferred from such a fact is, that if the inspired writer cites a particular sentiment with approval, it must be regarded as just and right, irrespective of the remainder of the book in which it is found. The apostle's sanction extends no farther than the passage to which he alludes. Other portions of the original document may exhibit the most absurd and superstitious notions. It has always been the current opinion that the work is the production of the first century, and there is nothing to disprove it. It is true that there is some variation between the quotation and its original, but this is usual even with the N. T. writers in citing the Old Testament. The current opinion, Simon, Witsius, etc., suppose that Jude quoted a traditional prophecy or saying of Enoch, and we see no improbability in the assumption. Others, again, believe that the words apparently cited by Jude were suggested to him by the Holy Spirit. But surely this hypothesis is unnecessary. Until it can be shown that the book of Enoch did not exist in the time of Jude, or that his quoting it is unworthy of him, or that such knowledge was not handed down traditionally so as to be within his reach, we abide by the opinion that Jude really quoted the book. While there are probable grounds for believing that he might have become acquainted with the extremest ideas independently of inspiration, we ought not to have recourse to the hypothesis of immediate suggestion. On the whole, it is most likely that the book of Enoch existed before the time of Jude, and that he latter really quoted it, in accordance with the custom with which the prophecy ascribed to Enoch was truly ascribed to him in a question of no importance in this connection. See Jude.

ENOCH, CITY OF. See Enoch, i.

ENO. See Enoch.

E'non (Heb. Enoâth,Ν Ν, poct. a man. Sept. and N.T. Ewâth; Josephus ‘Ewōth, Ant. i, 8, 2), the son of Seth, and grandson of Adam (Gen. v, 6-11; Luke iii, 38). He lived 955 years (B.C. 3325-2370), and is remarkable on account of a singular expression used respecting him in Genesis iv, 26. "Then began men to call on the name of the Lord." This is not to be taken absolutely, as it would be absurd to suppose that none called on the name of the Lord before that time, and accordingly there are two interpretations given of the passage: one is the marginal reading of the A.V. "Then began men to call themselves by the name of the Lord," in order, it would seem, to distinguish themselves from those who were already idolaters, and were termed children of men; the other, "Then men profanely called on the gods of other nations, the name of the Lord," intimating that at that period idolatry began to be practised among men. The latter is the interpretation adopted by the Jewish expositors generally, but the former has more currency among Christian commentators. It may be observed that both unite in the common idea of the widening difference between the pious and the wicked. In either case the passage may be regarded as implying that divine worship which till that time had been confined to private families, now became public—and that is, religious services were held on fixed days and in public places. In Chron. 1, i, the name is Anglicized Enoch.

E'noth, a more correct mode of Anglicizing (1 Chron. i, 1) the name Enoch (q. v.).

En'rim'ōn (Heb. Eyn Rimmon, Ν Ν, fountain of Rimmon; Sept. iv Peopov υ Ν, iv Peopov, Val. MS. omits, Vulg. et in Erimmon), a place occupied by the descendants of Judah after the Exile (Neh. xi, 29). It appears from the associated places of Erimmon (Erimmon) and Rimmon near to it or originally from the non-Levitical Rimmon and indicated by a remarkable reservoir still extant in the vicinity. See RIMMON.

En-ro'gel (Heb. Eyn Rogel, Ν Ν, found of the river, q. d. foot-fountain; constructed by Furst, after the Targums, with the Arabic and Septuagint, "Fuller's Spring," because fullers trode the clothes in the water; but Gesenius renders "fountain of the eyes" Sept. πυγής Πύγας, Vulg. fontis Rogel), a spring which formed one of the landmarks on the boundary-line between Judah and Josh. xvi, 7) and Benjamin (xvii, 16). It was the point next to Jerusalem on this level, as is evident from the use of the words "ascended" and "descended" in these two passages. Here, apparently concealed from the view of the city, Jonathan and Abinadab remained, after the flight of David, awaiting intelligence from within the walls (2 Sam. xvii, 17), and here, by the stone Zoheleth, which is "close to it (293) En-rogel," Adonijah held the feast, which was the first and last act of his attempt on the crown (1 Kings i, 9). By Josephus, on the last occasion (Ant. vii, 14, 4), its situation is given as "without the city; it was not in the royal garden," and it is without doubt referred to the same garden, in the same connection, as the description of the earthquake which accompanied the sacretes of Uzziah (Ant. ix, 10, 4), and which, "at the place called Eroce" (Ἐρούς v. Eroûs), shook down a part of the Eastern hill, "so as to obstruct the roads, and the royal gardens." In more modern times, a tradition, apparently first recorded by Quatremère de Quincy, would make En-rogel identical with what is now called by the Franks the well of Nehemiah, and by the nates that of Job (Bir-Eqyôn). Robinson describes it as "a deep well situated just below the junction of the valley of Hinemon with that of Joppah and Bethhoraph. The small oblong plain there formed is covered with an olive-grove, and with the traces of former gardens extending down the valley from the present gardens of Siloam. Indeed, this whole spot is the prettiest and most fertile around Jerusalem. The well is very deep, of an irregular quadrilateral form, walled up with large squared stones, terminating above in an arch on one side, and apparently of great antiquity. There is a small rude building over it, furnished with one or two large troughs or reservoirs of stone, which are kept partially filled for the convenience of the people. The well measures 125 feet in depth, 50 feet of which is now full of water. The water is sweet, but not very cold, and is at the present day drawn up by the hand. In the rainy season the well becomes quite full, and sometimes overflows at the mouth. Usually, however, the water runs from the surface of the ground, and finds an outlet some forty yards below it; hence it is said to flow for sixty or seventy days in winter, and the stream is sometimes large" (Researches, i, 490).

In favor of this identification is the fact that in the Arabic version of Josh. xv, 7 the name of Ain-Fuž, "spring of Job," is given for En-rogel, and also that in an early Jewish Itinerary (Uri of BIEL, in Hottinger's Ciprii Hebraici, p. 48) the name is given as "well of Job," as retaining the memory of Job's connection with Adonijah—a name which it still retains in the province of the Greek Christians (Williams, Holy City, ii, 490). Against this general belief the following strong but not conclusive arguments are urged by Bonar in favor of identifying En-rogel with the present "Fountain of the Virgin," "Ain Ummed-Duray (spring of the mother of steps)—the perennial source of water which is supplied (Land of Promise, App. v). 1. The Bir-Eqyôn is well and not a spring (En), while, on the other hand, the "Fountain of the Virgin" is the only real spring close to Jerusalem. This objection, however, as the above description shows, but partially applies. 2. The situation of the fountain of the Virgin agrees somewhat better with the course of the boundary of Benjamin.
ENROLMENT

than that of the Bir Eyub, which is rather too far south. This objection, however, does not apply to the original boundary of Benjamin, which necessarily followed the valley of Sилоam. See Thrie. 3. Bir Eyub does not altogether suit the requirements of 2 Sam. xvii, 17. It is too far off from the city, and from the road over Olivet to the door of Sion, and is in full view of the city (Van de Velde, i, 475), which the other spot is not. But we may readily suppose that a more retired route and a secluded spot would have been chosen for concealment. 4. The martyrdom of St. John (Q. v.) was effected by casting him down from the temple wall into the valley of Kerdon, where he was finally killed by a fuller with his washing-stick (Eusebius, Hist. Eccl. ii, 23). The natural inference is that the martyrred apostle fell near where the fullers were at work. Now Bir Eyub is too far off from the site of the temple to allow of this, but it might very well have happened at the Fountain of the Virgin. (See Stanley's Sermons on the Apost. Age, p. 333-4). But this is too remote and indirect an agreement, and one based upon a vague tradition. 5. Dorey and Rogel are both from the same root, and therefore the modern names may be derived from the ancient one, even though at present it is taken to allude to the "steps" by which the reservoir of the fountain is reached. 6. The Fountain of the Virgin is still the great resort of the women of Jerusalem for washing and treading their clothes. 7. The basin of the king's gardens must have been the Bir Eyub, even when the water is at the mouth of the well, and it is generally seventy or eighty feet below; while they must have been lower than the Fountain of the Virgin, which thus might be used without difficulty to irrigate them. The last considerations, however, have little weight (see Thomson, Land and Book, ii, 695). See Jerusal.

Enrolment or ἀρισταγάγη (Luke ii, 1, "taxing"). See Census.

Ena is "either ena real or ena raticionis. Ena raticio is that which has no existence but in the idea which the mind forms of it, as a golden mountain. Ena real, in philosophical language, is taken latet et stricte, and is distinguished as ena potestale, or that which may exist, and ena actuale, or that which does exist. It is sometimes taken as the concrete of essentia, and signifies what has essence and may exist—as a rose in winter; sometimes as the participle of esse, and it then signifies what exists. Ena without intellect is ena a thing."—Fleming, Vocabulary of Philosop, s. v.

Enample. See Example.

En-a-shemesh ( Heb. En-a-shemesh אֶ-נָּ-שֶּה-מֶּשֶּׁזֶּ; kursh pa'ah, "fountain of the sun"); Sept. ἐν η ἤ κη χαλίου orη ἤ κη Χανί; Vulgate, Eunomias, id est, Ponta Solis, a spring which formed one of the landmarks on the north boundary of Judah (Jos. xv. 7) and the south boundary of Benjamin (xiv. 17). From these notices it appears to have been between the "ascent of Adummim,"—the road leading up from the Jordan valley south of the wady Kelt,—and the spring of En-rogel, in the valley of Kerdon. It was therefore east of Jerusalem and of the Mount of Olives. The only spring at present answering to this position is the Ain-Husayn or Ain-C红色 "Well of the Apostles"—about a mile below Bethany, the traveller's first halting-place on the road to Jericho (Tobler, Topog. von Jerus. ii, 400). The aspect of this spring is such that the rays of the sun are on it the whole day. This is not inappropriate in a fountain dedicated to that luminary. Dr. Robinson thinks that En-shemesh must have been either this spring or the fountain near St. Saba (Researches, i, 498).

Ensign is the rendering in the Auth. Vers. for two Hebrew words: פֶּרֶשׁ, oth (the flag of a single tribe, Num. ii, 2), a sign or token, as elsewhere rendered; פֶּרֶשׁ, a lofty signal, e. g. a "pole," Num. xxii, 8, 9), a ship's standard or flag ("sail," Isa. xxxiii, 25; Ezek. xxvii, 7), a beacon or signal on a hill, chiefly on the irrigation of an enemy, in order to point out to the people a place of rendezvous. There is a third and more emphatic word relating to the subject, namely, כְּפָדָה (from כְּפָדָה, to cover), which, however, is invariably rendered "standard" (except Cant. ii, 10. "banner"). The distinction between the Hebrew terms is sufficiently marked by their respective uses:

Nas is a signal; Doreg, a military standard for a large division of an army; and Orth, the same for a small one. Neither of them, however, expresses the idea which "standard" conveys to our minds, viz. a flag. The standards in use among the Hebrews probably resembled those of the Egyptians and Assyrians—a figure or device of some kind elevated on a pole.

1. The notices of the nas or "ensign" are most frequent; it consisted of some well-understood signal which was exhibited on the top of a pole from a mountain top (Isa. xiii, 7, xliii, 5)—the very emblem of conspicuous isolation (Isa. xxx, 17). Around it the inhabitants mustered, whether for the purpose of meeting an enemy (Isa. v, 26; xviii, 3; xxxi, 9), which was sometimes notified by the blast of a trumpet (Isa. xxv, 7); or as a token of rescue (Psa. lx, 4; Isa. xi, 10; Jer. iv, 6); or for a public proclamation (Jer. i, 2); or simply as a gathering point (Isa. xxxix, 22; lix, 10). The nature of the signal was we have no means of stating; it has been inferred from Isa. xxxiii, 28, and Ezek. xxxvi, 7, that it was not a wave, but if we do not observe a flag depicted either in Egyptian or Assyrian representations of vessels (Wilkinson, iii, 211; Bononi, p. 166, 167); but, in lieu of a flag, certain devices, such as the phoenix, flowers, etc., were embroidered on the sail, whence it appears that the device itself, and perhaps also the device bearing the device, was the nas or "ensign." It may have sometimes been the name of a leader, as in Michaelis (Suppl. p. 1686) suggests, a blazing torch. The impression points of it, however, to be a war cry, was that the nas was an occasional signal, and not a military standard, and that elevation and conspicuousness are implied in the use of the term: hence it is appropriately applied to the "pole" on which the brazen serpent hung (Num. xi, 4), which was indeed an "ensign" in varieties. (Ezek. i, 13-14); and again the censors of Korah and his company, which became a "sign" or beacon of warning to Israel (Num. xvi, 30). See Signal.

2. The term degel is used to describe the standards which were given to each of the four divisions of the Israelite army at the time of the Exodus (Num. i, 2); ii, 2 sq.; x, 14 sq.). Some doubt indeed exists as to its meaning in these passages, the Sept. and Vulgate regarding it not as the standard itself, but as a certain military division annexed to a standard, just as a seclud is sometimes used for a body of soldiers (Tacitus, Hist. v, 8). The sense of compact and martial array does certainly seem to lurk in the word; for in Cant. vi, 4, 10, the brilliant glances of the bride's eyes are compared to the destructive advance of a well-arrayed host, and a similar comparison is employed in reference to the bridegroom (Cant. v, 10); but, on the other hand, in Cant. ii, 4, no other sense than that of a "banner" will suit, and we therefore think the rendering in the A. V. correct. No reliance can be placed on the term in Psa. xx, 5, as both the sense and the text are matters of doubt (see Oehler and Hengstenberg, in loc.). A standard implies, of course, a banner; but the supposed notice to that officer in Isa. x, 18, is incorrect, the words meaning rather "as a sick man perished away;" in a somewhat
ENTABLATURE 232

ENTERTAINMENT

parallel passage (Isa. lix, 19) the marginal version is to be followed rather than the text. The character of the Hebrew military standards is quite a matter of conjecture; they probably resembled the Egyptian, which consisted of a sacred emblem, such as an animal, a boat, or the king’s name (Wilkinson, i, 284). Biblical writers state the devices to have been as follows: for the tribe of Judah, a lion; for Reuben, a man; for Ephraim, an ox; and for Dan, an eagle (Carpzov, Crit. Ap. p. 667); but no reliance can be placed on this. As each of the four divisions, consisting of three tribes, had its standard, so had each tribe its “sign” (odh) or “ensign,” probably in imitation of the Egyptians, among whom not only each battalion, but even each company, had its particular ensign (Wilkinson, l, c.).

We know nothing of its nature. The word occurs figuratively in Ps. lxxxiv, 4, apparently in reference to the images of idol gods. See Standard.

Various Forms of Ancient Egyptian Ensigns.

Entablature (Lat. Is, tabula), “the superstructure which lies horizontally upon the columns in classic architecture: it is divided into architrave, the part immediately above the column; frieze, the central space; and cornice, the upper projecting mouldings. Each of the orders has its appropriate entablature, of which both the general height and the subdivisions are regulated by a scale of proportions derived from the diameter of the column.”

En-Tannim (Heb. Eym hat-tannim, אֶנוֹת נְתָנִים, “fountain of the dragons or jackals; Sept. πηγὴ τῶν χασάθων”), a reservoir on the west side of Jerusalem ( Neh. ii, 13), probably the present upper pool of Gihon; Anglicized Dragon-well (q. v.).

En-tappuh (Heb. Eym Tappu’ach, אֶנוֹת תַּפָּעַח, “fountain of Tappuah; Sept. πηγὴ Αἰασσοῦ v. r. Ἀσσώς”), a spring near the city Tappuah (q. v.), put for that place in Josh. xvii, 7 (comp. ver. 8).

Entelechy (ιντελέχ, from ἰντελέχ, perfect; and ἱκλω, to have; in Latin perfectibilis). “In one of the books of the Pythagoreans, viz. Outila. Lucan, Παντι παντινος, the word συντάξεις is used in the same sense. Hence it has been thought that this was borrowed from the Pythagoreans” (Mombod- do, Ancient Mysteries, i, chap. v). Cicero (Tusc. Quest. lib. i, quest. 1) interprets it to mean quaedam quaestis continuatam motionem et perennem. Melancthon (Opera, xiii, 12-14, ed. 1846) gives two interpretations of entelechy, as he writes it. He says that ἰντελέχεις signifies continuas, and ἰντελεχομαι continuare. Translating, he gives it as synonymous with ἐνίκησις. Hence Cicero translated it by continuous movement or agitation. Argyropo- lus blames Cicero for this, and explains it as meaning: “interior perfection,” as if it were τὸ ἐνίκησις ῥημάτων. But Melancthon thinks Cicero’s translation in accordance with the philosophy of Aristotle. According to others, ἰντελέχεις means continuance, and is a totally different word from ἰντελεχομαι, which means actually (Arist. Metaph. Bohn’s Libr. p. 68, 301; Donaldson, New Cyclopædia, p. 339-344). According to Leibnitz, “entelechies ce qui sort apparentement from the Greek demos, which signifies perfect, and therefore the celebrated Hermolaus Barbarus expressed it in Latin, word for word, by perfectibilas, for act is the accomplishment of power; and he needed not to have consulted the devil, as he did, they say, to tell him this much (Leibnitz, Theodicee, W. ii, p. 97). You may give the name of entelechies to all simple substances or created monads, for they have in them a certain perfection (γνώσατο τὸ ἐντελεχέω) they have a sufficiency (ἀξιόμαχθα) which makes them the source of their internal actions, and, so to say, incorporal automatae” (Monadologie, § 18). He calls a soul an external automaton, or first entele- chies, having life and force in itself. “Entelechy is the opposite to potentiality, yet would be ill translated by that which we often oppose to potentiality, actuality. Εἶδος expresses the substance of each thing viewed in respect to its form or constitution: ἰντελεχία its substance, considered as active and generative; ἰντελεχεία seems to be the synthesis or harmony of these two ideas. The Effectio of Cicero, therefore, represents the most important side of it, but not the whole” (Maurice, Mor. and Metaphysics. Philoso phy, p. 191, note). ἰντελεχεία ce qui sort apparentement from the Greek demos, which signifies perfect, and therefore the celebrated Hermolaus Barbarus expressed it in Latin, word for word, by perfectibilas, for act is the accomplishment of power; and he needed not to have consulted the devil, as he did, they say, to tell him this much (Leibnitz, Theodicee, W. ii, p. 97). You may give the name of entelechies to all simple substances or created monads, for they have in them a certain perfection (γνώσατο τὸ ἐντελεχέω) they have a sufficiency (ἀξιόμαχθα) which makes them the source of their internal actions, and, so to say, incorporal automatae” (Monadologie, § 18). He calls a soul an external automaton, or first entele- chies, having life and force in itself. “Entelechy is the opposite to potentiality, yet would be ill translated by that which we often oppose to potentiality, actuality. Εἶδος expresses the substance of each thing viewed in respect to its form or constitution: ἰντελεχία its substance, considered as active and generative; ἰντελεχεία seems to be the synthesis or harmony of these two ideas. The Effectio of Cicero, therefore, represents the most important side of it, but not the whole” (Maurice, Mor. and Metaphysics. Philosophy, p. 191, note).

Entertainment (εντέλειωσ, a “festival,” comp. Εἰν- τέλειωσ, to “entertain” a stranger, Heb. xiii, 2), this took place among the Hebrews sometimes in connection with a public festival (Deut. xvi; Tob. ii, 1) and accompanied by offerings [see SACRIFICAL FESTIV- AL.] (1 Sam. ix, 18; xvi, 5; i Kings i, 9; iii, 15; in token of alliance, Gen. xxvi, 50; xxxii, 54); sometimes with domestic or local occurrences and, so considered, as the latter reference is concerned, they were chiefly held at the weaning of children (Gen. xxvi, 8; comp. Rosenmuiller, Morgen, vi, 243 sq.), at weddings (Gen. xxix, 22; Judg. xiv, 10; John ii, 1, sq.); on birthdays (Job i, 4; Jer. xxxvi, 10; Judg. xvii, 20 [2 Hos. vii, 2]; Matt. xix, 6; comp. Herod. i, 138; ix, 109; Lucian, Gall. 9; Athen. iv, 143; see Dougftz. Analcets, i, 44; ii, 58; Laurent, De notaibus, conviviable-
ENTHUSIASM

... 

FEAST

... 

Enthusiasm (ενθουσασμός, from ἐνθοῦς, inspired; God-poised; ἐνθεος) is used both in a good and a bad sense.

1. In the first, which springs from its derivation, it signifies divine inspiration in general; or, secondarily, any extraordinary mental or moral exaltation. "The raptures of the poet, the deep meditations of the philosopher, the heroism of the warrior, the devotedness of the martyr, and the ardor of the patriot, are so many different phases of enthusiasm." In this sense it "is almost a synonyme of genius; the moral life in the intellectual light, the will in the reason; and without it, says Seneca, nothing truly great was ever achieved." (Coleridge).

2. The bad sense of the word was formerly in much more common use than now. According to it, an enthusiast is one who substitutes his own fancies for reason and truth, especially in matters of religion. "Every enthusiasm is properly a madness; yet he is not an ordinary, but a religious madness. The enthusiast is generally talking of religion, of God, or of the things of God, but talking in such a manner that any reasonable Christian may discern the disorder of his mind. Such enthusiasm may be described, in general, as a religious madness, arising from some falsely imagined influence or inspiration of God; at least, from interpreting something to God which ought not to be imputed to him, or expecting something from God which ought not to be expected from him" (Wesley).

...
"enthusiasm, in the bad sense, is a subtle device of Satan upon ill-meaning or unmeaning instruments, making use of their ambition, self-admiration, or other weakness, to draw them by some plausible suggestions into a vain conceit that they have something within them either of equal authority with Scripture, or superior to the opinions of others. In this their term enthusiasm by worldly men to designate true Christian life, see Wesley's sermon above, and also Taylor, Natural Hist. of Enthusiasm (N. Y. 1844, 4th ed. 12mo).

Entity (ēnītis), "in the scholastic philosophy, was synonymous with essence or form. To all individuals of a species there is something in common—a nature which they all have, but individually, all, but only specifically, different from each other. The term entity by worldly men to designate true Christian life, see Wesley's sermon above, and also Taylor, Natural Hist. of Enthusiasm (N. Y. 1844, 4th ed. 12mo).

Entrance into the Church. Certain ceremonies are used as signs of the church on the part of Christians on entering the church building. They washed their hands and faces in the fountains or cisterns which were generally found in the atrium or court before the church; probably referring to the Psalmist's expression, "I will wash my hands in innocency:" so will I compass thine altar." Many took off their shoes or sandals, especially when they went to receive the Eucharist; interpreting as applicable to themselves the command to Moses, "Put off thy shoes from off thy feet, for the place whereon thou standest is holy ground." In some instances bowing towards the altar was practised; and when emperors or kings went into the house of God, they not only left their arms and guard, but also their crowns, behind them. It was also not uncommon for men to kiss the doors, threshold, or pillars in token of their love. The gurm of many of the absurd practices and ceremonies of the Roman Catholic Church may be found in these customs.—Farrar, Eccles. Dict. s. v.; Blingham, Orig. Eccles. bk. viii, ch. x, § 12.

Entwistle, Joseph, a Wesleyan Methodist minister, was born in Manchester, England, April 15, 1767. At sixteen he began to preach, and in 1769 Mr. Wesley called him to his ministry. He set himself to his work, studying theology, under many difficulties, and also the ancient languages. He filled acceptably a number of the most important appointments, and in 1812 was chosen president of the Conference. In 1844 he was made governor of the Wesleyan Theological Institution, in which office he remained until 1858, when his infirm health compelled him to retire. He died at Tadcaster in 1841. See Memoir of the Rev. Joseph Entwistle, by his Son (Lond. 1850, 12mo); Methodist Quarterly Review, April, 1851, p. 305.

Entsias (or Ensajas), Francisco de, a Spanish Protestant, was born at Burgos about 1590. He is commonly named Dryander, and also used the names Duchese, Van Eeyck, Ichschain, all of the same meaning (Οένιασ) as the Spanish name Entisias. After completing his academical studies in Italy, he went to Louvain, and studied there, and also spent some time with Melancthon at Wittemberg. Having wealthy relatives in the Netherlands, he fixed his abode there, and openly embraced the Reformed cause. He published a Spanish version of the N. T., dedicated to Count Cross. He was arrested and imprisoned at Brussels. He escaped in February, 1548, to Antwerp, thence to Germany and England (1548). He carried letters of commendation from Melancthon to Edward VI and to Cranmer, who received him warmly, and gave him a post at Oxford. After some time he returned to the Continent, and continued his literary labors at Strasburg, Basle, and Geneva. He died about 1570.—McCr. Reformation in Spain, ch. v; Hoefler, Nouv. Bih. Generaux, xiv, 379.

Ensias, Jayme de (or named John de Ensias, or eenius, qui vestituros est judicaut vieus et mortuos," and concluded, from the resemblance between the word Eunus and his own name, that he was the person who should judge the quick and the dead. His views seem to be connected with those of the Cathari. He is said to have taught that baptism was of no value only for believers; that the only true baptism was that of the Spirit by the imposition of hands; that the hierarchy had not been instituted by God; that the Church of Rome was not the true Church, because her priests did not lead a holy life. He denied the resurrection of the body, and rejected the sacrament. He went about preaching these doctrines, found many adherents, and was reported to possess the power of working miracles. In 1145 the cardinallegate Albericus came from Ostia to the Bretagne, and preached against Eon and his adherents at Nantes. He also induced archbishop Hugo of Rouen, to write a work against him, which is, however, rather a diffuse explanation of the doctrines of the Church of Rome than a refutation of Eon (Dogmatism Christianum fidei contro hereticos et temporaria libri tres; Bibl. Patrum Mar., tom. xxii). At the same time troops were sent out against these new sects, and in the county of Alet many were burned. Eon withdrew into the province of Guinée; in 1148 he repaired to Champagne, where his band was scattered, and he, together with some of his prominent adherents, was captured. He was taken before the council at Rheims, and asked whether he could believe what the Scripture and the ancient fathers said. The synod declared him to be insane, and charged the archbishop of Rheims to take care of him. Many of his followers were sentenced to be burned. After Eon's death the sect soon died out.—Schmidt, in Herzog's Real-Encyclopädie, 212; Weis- ter, Welte, Kirchen-Lex., iii, 602; Mosheim, CA. Hist. bk. iii, cent. xii, pt. iii, ch. v, § 16; Giesler, Ch. Hist. per. iii, div. iii, ch. vii, § 84. (A. J. S.)

Enon. See Gnosticism.

Enonian. See Eon.

Eoquinians, a sect of the 16th century; so called from one Equoquis, who taught that Christ did not die for the wicked, but for the faithful only.

Eopect. "in chronology, is the excess of the solar month over the lunar month in twelve months; or of the solar year above the lunar year of twelve synodical months; or of several solar months above as many synodical months; or of several solar years above as many periods, each consisting of 12 synodical months. The menstrual epact is the excess of the civil calendar month above the lunation month in the year of 51 days, this epact is 1 day 11 hours 15 minutes 57 seconds, if we suppose new moon to occur on the first day of the month. The annual epact is the excess of the
solar year above the lunar. As the Julian solar year is (nearly) 365 days, and the Julian lunar year is (nearly) 354 days, the annual epact is nearly 11 days. The epact for two Julian years is, therefore, nearly 22 days; for three years, 33 days; and so on. When, however, the epact passes 30 days, 30 falls to be deducted from it, making 0. For three years, then, the epact is properly 3; and for 4 years, adding 11 days, it is 14 days; and so on. Following the cycle, starting from a new moon on the 1st of January, we find that the epact becomes 0 or 0 in the 19th of February. The epact for the 20th year is again 11; and so on. These years in the cycle are marked by Roman numerals I, II, III, etc., called the Golden Numbers; and a table of the Julian epacts exhibits each year in the cycle with its golden number and epact. As the Gregorian year (see Calendar) differs from and is in advance of the Julian by 11 days (the number lost on the Julian account before the Gregorian computation of time was introduced in England), and as 11 is the difference between the solar and lunar years, it follows that the Gregorian epact for any year is the same with the Julian epact for the year preceding the Gregorian. Epænæus (Ἐπαναφόρος, commendable), a Christian resident at Rome when Paul wrote his epistle to the Church in that city, and one of the persons to whom he sent special salutations (Rom. xvi. 5). A.D. 55. In the received text he is spoken of as being "the first-fruits of Achaia" (ἀρχάγγελος Ἀχαίας); but "the first-fruits of Achaia" is not in the reading of the best MSS. (8 A B C D E F G 77), of the Syriac, Armenian, Ethiopic, Vulgate, the Latin fathers, and Origene (in Ep. ad Rom. Com. lib. x. Opera, v. p. 481; in Num. Com. xii. Opera, x. p. 109). This reading is preferred by Grotius, Mill, Bengel, Whitby, Koppe, Rosenmüller, Rückert, Oehlhausen, and Tholuck; and admitted into the text by Griesbach, Knepp, Tittmann, Scholz, Lachmann, and Tischendorf; also by Brucker, in his edition of Schmidt's Concordance, Lips. 1842. Dr. Bloomfield, who also adopts it in his Greek Testament (2d ed. 1886), remarks that "the very nature of the term ἀρχάγγελος suggests the idea of one person only (see 1 Cor. xv. 20), and, as in 1 Cor. xvi. 15, Stephanus is called the ἀρχάγγελος Ἀχαίας, Epænæus could have no claim to the name." With respect to the former part of this statement, the learned writer has strangely overlooked such passages as James i. 18, "that we should be a kind of first-fruits" (ἀρχαγγέλου τῆς ἰσχύος). These are quoted from among men, being the first-fruits (ἀρχάγγελοι) and as to the latter part, not Stephanus alone, but his house, is said to be the first-fruits, and to have addicted himself (ὑπομενόντα ἐθέλετε) to the ministry of the saint. Macknight's remark in favor of the received reading, that if Epænæus was one of that house, he was a part of the first-fruits of Achaia, seems somewhat what forced. The synopsis of the pseudo-Dorothaeus makes him first bishop of Carthage, but Justinian remarks that the African churches do not recognize him. Epænæus, Synod of Concilium Episcoporum or Episcoporum was a general synod of the Catholic bishops of Burgundy, held in 517. A great change in the relation of the Catholic Church of Burgundy to the state government took place in 516, when the new king Sigmond, son of the Arian king Gundobald, joined it. The Catholic Church thus became the State Church, though it is said that Sigmond gave no trouble to his kings of his times, aspired to exercise a controlling influence upon Church affairs. The Council of Epænæus, which established Church discipline in the new Catholic kingdom upon a permanent basis, was not called by the king, but by Avitus, bishop of Vienne, and Hermegild, bishop of Paris, and their letters to the bishops of both bishops are still extant. That of Viventius is addressed to all bishops, clergymen, lords, and notables of the land, complains of want of discipline among the clergy, and invites every one who has to bring charges against the moral conduct of any clergyman to appear before the council. The clergymen are commanded to be present, and the laymen are permitted to attend if they wish. The synod proceeded to the formation of what the bishops will decree. The letter of Avitus complains that the Church law ordering the holding of two synods every year had entirely fallen into disuse, and states that he had been censured by the Pope on this account, and had been commanded to assemble a synod in order to reform the Church laws, as far as they were still applicable, and to add, if necessary, new ones. As no such censure can be found in a letter of the Pope to Avitus, written in Feb. 517, nor in any other papal letter extant, it has been inferred (Vogel, in Herzog's Real-Encyklop. s. v.) that Avitus, in order to secure the meeting, used a papal authority to a greater extent than he was authorized to do. In compliance with the letters of invitation, 24 bishops appeared personally at Epænæus, and one sent representatives. Their deliberations were of but short duration, and on the 14th of July, 517, the bishops signed the acts upon which, "under divine inspiration," they had agreed. The acts consist of a brief preface and 40 canons which concern the conduct of bishops, clergymen, monks, secular authorities, and laymen, the intercourse with the Arian heretics, and the property of the Church. The canons and the Church laws concerning the heretics are of special importance. Catholic clergymen, under severe penalties, are forbidden to sit at table with heretics. With a Jew no layman shall dine, under penalty of being never admitted to a clergyman's table. Heretics who wish to join the church in order to marry the bishops persons are allowed when they are on the death-bed they may be received by a priest. The church edifices of the heretics are declared to be objects worthy of special horror, and their purification is declared impossible. The 50th canon forbids marriages with near relatives, in particular with the sisters of a deceased wife. This canon directed concerning a prominent officer at the royal court, Stephanus, who was married to his sister-in-law Palladia. The bishops seem to have anticipated trouble from the opposition of Stephanus, for, after the dissolution of the Council of Epænæus, eleven bishops, among whom was Apollinaris, bishop of Valence and brother of Avitus, went to Lyons, where, under the presidency of Viventius, they agreed upon a line of conduct for the enforcement of the canon, providing even for the case that the king should leave the Church, and appoint Arian bishops for some of the episcopal sees. A part of the canons of Epænæus remained in force in Southern France, as canons of the Council of Agde (Agathensés). This council had been held in 504, and established 47 canons, to which subsequently, for the purpose of obliging to a complete code of discipline, 24 canons of other councils were added; of these 24, 13 were taken from the Council of Epænæus. The site of the Council of Epænæus cannot be established with certainty. According to some, it is the little town of Yenne, now a monastery, on the left bank of the Rhone; according to others, a little village, Portas, about half way between Lyons and Vienne.—Herzog, Real-Encyklop. iv. 75; Wetsch und Weltge, Kirchen-Lex. iii. 603; Hefele, Concilien-Geschichte, ii. 680; Landon, Manual of Councils, p. 224; Manni, Coll. Conc. vili. 310; Labbe, Dissertations, de Conc. Ep. 4, 8. 18. Epænæus, Synod of Concilium Episcoporum, and Epænæus, usually considered a contraction of Epaphroditus, but the last syllable in this case is hardly regular), an eminent teacher in the Church at Colosse, denominated by Paul "his dear fellow-servant," and a "faithful minister of Christ" (Coloss. i. 7; iv. 12). A.D. 57. It has been inferred from Coloss. i., that he was the found-
er of the Colossian Church; and Dr. Neander supposes that the apostle terms him ἱντρη ἡμῶν δίκαιον· Ἰησοῦς Χριστός (a servant of Christ in our stead) because he committed to him the office of proclaiming the Gospel in the three Phrygian cities Colossae, Hierapolis, and Laodicea, as the head of the church himself (Hist. of Planting, 200, 873). This language might have no means decisive; yet most probably Epaphras was one of the earliest and most zealous instructors of the Colossian Church (see Alford's prolegomena to that epistle, 3r. Text. iii, 36 sq.). Lardner thinks that the expression represents his residence in Colossae (Hist. of the Apostles and Evangelists, c. xiv; Works, vi, 183). But in both cases the words in question seem intended simply to identify these individuals as the fellow-townsmen of the Colossians, and to distinguish them from others of the same name in Rome (see Macknight on Coloss. iv, 2). He was at that time with Paul at Rome (Coloss. iv, 12), and seems by the expression there used to have been at least a Colossian by birth. We find him again mentioned in the epistle to Philemon (ver. 28), which was sent at the same time as that to the Colossians. Paul there calls him ὁ συνίκητος μου, μνημονεύτω· μνημονεύτω μου, νώς φίλου μου; and somewhat the word there as only a tender and delicate expression of Epaphras' regard for the apostle was his imprisonment (comp. Rom. xvi, 13). The martyrlogies make Epaphras to have been first bishop of Colossae, and to have suffered martyrdom there. See ΕΠΑΦΡΟΔΙΤΟΣ.

Epaphroditus (Ἐπαφροδίτος, belonging to Aphrodite, or Venus), a messenger (ἀποστόλος) of the Church at Philippi to the apostle Paul during his imprisonment at Rome, who was intrusted with their contributions for his support (Phil. ii, 25; iv, 18). A.D. 57. Paul's high estimate of his character (see Evans, Script. Bibl. ii, 300) is shown by an accumulation of honorable epithets (τὸν ἄνθρωπον, καὶ σωτήρα, καὶ σωτηρίτην μου), and by fervent expressions of gratitude for his recovery from a dangerous illness brought on in part by a generous disregard of his personal welfare in ministering to the apostle (Phil. ii, 20). Epaphroditus, on his return to Philippi, was the bearer of the epistle which forms part of the canon. Grotius and some other critics conjecture that Epaphroditus was the same as the Epaphras mentioned in the epistle to the Colossians (see Sirk, De Epaphroditício Philippiniis epistola, Lips. 1741; Strobach, De Epaphroditía Colossenés, Lips. 1710). But, though the latter name is by some connected with the former; and the fact that Epaphras was most probably in prison at the time, sufficiently marks the distinction of the persons. The name Epaphroditus was by no means uncommon (see Tacit. Ann. xv, 55; Sueton. Domit. 14; Joseph. Life, 76), as Wetstein has shown (Nov. Test. Gr. ii, 279).

Eparach (Ἐπάραχος, ruler over a district), a commander (σ. g. of vessels, Eschyulus, Ag. 1227), hence prefect (comp. Ἱππαρχος, Acts xxiii, 24; xxv, 1); applied as a title to Sisines (q. v.), the Persian satrap of Syria (1 Eadtr. vii, 11, "governor"). See ΤΟΠΑΡΧΗ, etc.

Eparch (ἐπαρχης) was the official term of a province in the administration of the Roman empire. It consisted of a number of counties or districts, and a subdivision of a diocese (διοικεσία). In the organization of the Church, the ecclesiastical heads of communities were called bishops, those of the capitals of eparchies, metropolitans; those of the dioceses, patriarchs. The term eparch is thus used in the council of Nice, and by Macarius of Ancyra (Stuicer, Theaur, Eccl. s. v.). The meaning of the term was subsequently changed in the Greek Church, so as to denote, in general, the diocese of any bishop, archbishop, or metropolitan. In Russia the eparchies are divided into three classes, the first of which comprised in 1866 the four metropolitans of Petersburg, Moscow, Kiev, and Novgorod; the second twenty sees, the incumbents of which, with the exception of one, had the title archbishop; and the third, twenty-nine sees, of which had the title archbishop, while the others were merely bishops. Eparchies can be transferred at the pleasure of the czar from one class to the other.—Herzog, Real-Encyklop. iv, 80; Wetzler u. Welte, Kirchenlex. iii, 157 ff.; Beyer, Geschichte der Griech. Church. 1868. See GRK CHURCH AND RUSSIA. (A. J. S.)

Ephes, Charles Michel de L', born in Versailles Nov. 25, 1712, was distinguished for his labors in behalf of the deaf and dumb. He entered into orders as a Roman Catholic priest, but, having been interdicted from the exercise of his functions, he devoted himself to the care of deaf children. Two young girls, mute, had been under the care of Father Vanin, at whose death L'Epee took charge of them. From this time his talents, time, and property were all consecrated to this cause. He framed a series of signs (the basis of the system of the school) and arranged the instruction of the two girls, the acolyde de Penthèvre and others to aid him. He organized an asylum, which, after his death, was taken under the protection of the French government, and placed under Sicard (q. v.), the worthy successor of L'Epee. He died at Paris Dec. 28, 1789. His writings give full account of his system and method; among them are Institution des Sourds et des Muetts, 1774, 12mo; enlarged edition, 1776, 12mo, and again improved, 1784, 12mo. See especially his Art d'enseigner à parler aux Sourds-Muetts, with notes by Sicard, and the Jogo de L'Epee by M. Bebian (Paris, 1820, 8vo).—Hoefer, Nouv. Biog. des Gén. xxii, 329.

Ephesians, a Russian sect, followers of a monk of Kyiv, who was ordained bishop through forged letters of recommendation. He died in prison, but is esteemed a martyr by his followers. Their sentiments are nearly the same as the Starobrediai, or Old Ceremonialists.—Pinkerton's Greek Church, p. 804. See RUSSIA; RUSSIAN ECCLES.

Epe'etus. See ΕΠΑΝΕΤΕΥΣ.

Eph'ah (טבז, כֹּכֶב, gloom), the name of a tribe (including that of the founder), also of a woman of and of a man. 1. (Sept. Γεφάς v. r. in Chron. Γεφαῖ, Isa. Γεφά). The first in order of the five sons of Midian (Gen. xxxv, 4; 1 Chron. vi, 1); a Benjamite. B.C. 1688; a man of importance. He is mentioned in Isaiah in the following words: "The multitude of camels shall cover thee, the dromedaries of Midian and Ephah; all they from Sheba shall come; they shall bring gold and incense; and they shall show forth the praises of the Lord. All the flocks of Kedar shall be gathered together unto thee, the rams of Nebaioth shall minister unto thee: they shall come up with acceptance on mine altar, and I will glorify the house of my glory" (Isa. 1x, 6, 7). This passage clearly connects the descendants of Ephah with the Midianites, the Returashite Sheba, and the Ishmaelites, both in the position of their settlements and in their wandering habits, and shows that, as usual, they formed a tribe bearing his name. But no satisfactory identification of this tribe has been discovered. The Arabic word Orqeh, which has been supposed to be the same as Ephah, is the name of a town in the Mecelle, near Pelusium, or Bulbeys (the modern Bilbeys), a place in Egypt, in the province of Sharkiyeh, not far from Cairo; but the tradition that Ephah settled in Africa does not rest on sufficient authority. See MECHEL.

2. (Sept. Πεφάδος). A concubine of Caleb, of the tribe of Judah, by whom she had several sons (1 Chron. ii, 48). B.C. post 1856.
EPHESIANS

3. (Sept. Γεφις.) A son of Jahdai, who was apparently the grandson of the oldest of the former sons (1 Chron. ii. 47). B.C. long post 1566.

Ephah ( Heb. אפחה, rare Heb. אפוח, אפוחא), a measure of grain, containing "three shekels or ten omers," and equivalent in capacity to the bath for liquids (Exod. xvi. 36; 1 Sam. xxviii. 17; Zeph. v. 6; Judg. vi. 19; Ruth ii. 17; the "double ephah," Prov. xx. 10; Deut. xxv. 14; Amos v. 8), means two ephahs, the one just, the other false. According to Josephus (Ant. viii. 2, 9), the ephah contained 72 sextarii, equal to the Attic (liquid) metretes, or 1933.55 Paris cubic inches, about 183 bushels English (see Böckh, Metrolog. Untersuch., p. 259, 278). This is also confirmed by other sources, so that the latter ephah is an error in another passage of Josephus (Ant. vii. 9, 3), where the ephah seems to be equal to 96 sextarii, or the Attic medimnus. The origin of this word is to be sought in the Egyptian language, where it signifies a measure, especially of corn, from which comes the Sept. rendering avia (see Böckh, in Alph. Encyclop. s. v.; Gesenius, Thes. Ling. Hebr. in Appendix). See MEASURES.

Ephah (Heb. אפחה, נֹפָה; тαξ. כֹּפֶך לִפָה; סָפֶך לִפָה, О фехв, О фехв, Вулг. О фехв), a Netophathite, whose sons were among the "captains of the host" (I Chron. xx. 6) left in Judah after the deportation to Babylon, and who warned the Babylonian governor of the plots against him (Jer. xi. 8). B.C. 588. They submitted themselves to Gedaliah, the Babylonian governor, and were apparently massacred with him by Ishmael (all, 8; comp. xi. 15).

Ephah. See VIPER.

Epher (Heb. אפֶּר, the one of their number and his kinsman or kinswoman). The head of one of the families of Manasseh, the family of this tribe, and apparently of Caleb, the son of Jephunneh (1 Chron. iv. 17). B.C. cir. 1618.

(3.) Ephah (Heb. אפֶּר, Vulg. Ephra.) The head of one of the families of Manasseh cast, who were carried away by Tiglath-pileser (1 Chron. vi. 24). B.C. ante 740. The name may be compared with that of Ephrah (v.), the native place of Gideon, in Manasseh, on the west of Jordan.

Ephes-dammim (Heb. אפֶּס דָּמִים, תניִּפֶר, akk. boundary of blood; Sept. Εφεσδαμμι είς Αμοίων, Εφεσδαμμῖον, Vulg. fere Damnum), a place in the tribe of Judah between Shocoah and Azekah, where the Philistines were encamped when David fought with Goliath (1 Sam. xviii. 1). The similar, but more ancient passage (1 Chron. xvi. 18), has the shorter form Pas-Dammim. The name was probably derived from its being the scene of frequent sanguinary encounters between Israel and the Philistines. On his way from Beith-Jibrin to Jerusalem, Van de Velde was attacked and slain in high northward-looking brow of wady Musar, about one hour E. by S. of Beith-Netif, called "Khirbet Damun," which he has no doubt represents the ancient Ephes-Dammim, and "which fixes the place of the camp of Goliath just at its foot, where the valley contracts, and may, indeed, be called the pass [or extremity] of Dammim" (Memoir, p. 290). In that case the narrative of 1 Sam. xvii., becomes plain: "the gorge" (καταβαίνειν) between the battle-lines of the two armies (ver. 8), and along which the first rout and pursuit occurred (ver. 29), was no less than the wady Musar itself, which is so narrow immediately at this spot. See ELAH (VALLEY OF).

Ephes'sian (Εφησίας), a native or resident of the city of Ephesus (q. v.), in Asia Minor (Acts xix. 28, 34, 35; xx. 29). The similar adj. Ephesian (Εφησίας, "of Ephesus") also occurs (Rev. ii. 1).

EPHESIANS, EPISTLE TO, or Paul's letter addressed to the Christian Church at the ancient and fathers of the Church, and the elders of which he partook with such a warm-hearted and affectionate farewell (Acts xx. 18-35). See PAUL.

I. ADOPTION OF THE EPISTLE.

This epistle expressly claims to be the production of the apostle Paul (i. 1, iii. 1); and this claim the writer, in the latter of these passages, follows up by speaking of himself in language such as that apostle is accustomed to use in describing his own position as an ambassador of Christ (iii. 1, 3, 8, 9). The justness of this claim seems to have been generally acknowledged by the early Christians, and it is expressly sanctioned by several of the fathers and second and third centuries (Irenæus, adv. Haer. v. 2, 8; v. 14, 3; Clemens Alexandrin. Paedagog. i. 108; Protrept. i. 69, ed. Potter; Strom. iv. 6, p. 592; Origen, conf. Cels. iii. 20; iv. 21, ed. Spicq; Tertullian, Apol. v. 17; De Præser. Haer. ch. 86; Cyprian, Tetram. iii. 7, etc.); and after them the constant and persistent tradition of the ancient Church. Even Marcion did not deny that the epistle was written by Paul, nor did his critics refuse occasionally to cite it as confidingly due to him as its author (Irenæus, Haer. i. 8, 5; see Hug. Introd. Fodick's transal. p. 551; Hippolytus, Philos. Phænomena, vi. 54). In recent times, however, its genuineness has been somewhat vehemently called in question. The epistle is also cited as part of sacred Scripture by Jerome (Ep. ad Philipp. c. 1; c. 109), and it is probably to it that Ignatius refers in writing to the Ephesians (c. 12); compare Coteloriu Annot. in loc.; Pearson, Vind. Ignatium. pt. ii. p. 119; Lardner's Works, ii. 70, 8vo). De Wette has attempted, from internal evidence, to set aside this external proof of the Pauline auth. of the epistle; but this attempt has been so fully and satisfactorily answered by Schott (Ang. in N. T. p. 260), Guerike (Beiträge zur hist. crit. Einleitung ins N. T. p. 106), Hensen (Der Ap. Paulus, p. 180), Rückert (Der Br. Paul an die Epheser, p. 289), and others, that later De Wette himself, both in the introductory pages of his Commentary on this epistle (ed. 2, 1847), and in his Introduction to the N. T. (ed. 5, 1848), only labours to prove that it is a mere spirit: an expansion of the epistle to the Colossians, though compiled in the apostolic age. Schweiger (Nachst. Ztg. 382, 383; t. Paulus, p. 180), Ruyff (Paulus, p. 180), and others advance a step farther, and reject both epistles as of no higher antiquity than the age of Montanism and early Gnosticism. The objections adduced are chiefly the following: 1. The absence of any friendly greetings in this epistle, coupled with what are alleged to be indications of want of previous acquaintance on the part of the writer with the Ephesians, facts which, if it is asserted, are incompatible with the supposition that it was written by Paul, whose relations with the Ephesian Church were so intimate. 2. The occurrence of what are considered synonyms and other points indicate acquaintance with those Gnostic ideas which were familiar only at a period much later than that of
the apostle. 3. The close resemblance of this epistle to the epistle to the Colossians, suggesting that the former is only an enlargement of the latter. The first of these objections may be passed over here, as the allege-
gations on which it rests will be particularly consid-
ered when we come to the question of the destination
of this epistle; and, of the other two, the principal
remark of Reuss in reference to the unreasonableness
of such objections: "If Paul writes simple letters of
friendship, they are pronounced insignificant, and so
spurious, because there is a want of the didactic char-
acter of the others; and of the other he argues that
there is proof of the spuriousness of the writing in the
absence of the other. What! must both elements al-
ways be united according to some definite rule? is it
so with us? or are any two of Paul's epistles alike in
this respect?" (Die Geschicht. d. H. Schr., Neuen Text.
p. 104, ed.) The second of the two objections has
reference to such passages as i: 21; ii: 7; iii: 21,
where it is alleged the Gnostic doctrine of sexes is recog-
nised; and to the expression πληρωμα, i: 38, as con-
veying a purely Gnostic idea; and to such words as μορφος, σωφρον, γνώσις, φασις, συναίνεις, etc. On
this subject it may be observed that, as in other
things, the existence of Gnostic allusions in this epistle, that, on
the one hand, the objection assumes that, because
Gnostic schools and systems did not make their appear-
tance till after the age of the apostles, the ideas and
words used in the epistles were either antecedent at an
earlier period, a position which cannot be maintained
[see Gnostics]; and, on the other, that, because
the apostle uses phraseology which was employed also by
the Gnostics, he uses it in the same sense as they did,
which is purely gratuitous and indeed untrue, for to
confound the αἰωνιος and πληρωμα of the apostle with the
αἰωνιος and πληρωμα of the Gnostics, as Baur does,
only proves, as Lange has remarked, that "a man may
write whole books on Gnostics and Gnosticism without
detecting the characteristic difference between
the Christian principle and Gnosticism" (Apostol. Zeit-
ed. i, 124). With regard to the resemblance between
this epistle and that to the Colossians, it can surprise
no one that, written at the same time, they should in
many respects resemble each other (see Klöpper, De
origini Eph. ad Eph. et Col. Gryph. 1853); but it does
not require much penetration to discover the many
differences of difference between them, especially in
point of view from which the writer contemplates his
own subject, the Lord Jesus Christ, in each; in the
one as the prehistoric, pre-existent, supreme source of
all things; in the other as the incarnate, historical,
existent, social Saviour of the Church. But these things are subjected (comp. Eph. i: 30-33, with Col. i:
15-20; and Lange, Ap. Zeit., i, 118). As for the
above "copious expansion," that may be left to the
judgment of the reader, as ν.λ. is the counter notion of
Schneckenburger, that the epistle to the Colossians
is an epistle of that to the Ephesians made by Paul
himself. On such objections in general, we may say
with Reuss that "such hypotheses, whatever accept-
ance they may have received, tell by their deficiency or
strangeness, not against the epistle, but against them-
sevcls; and, in opposition to all, the many
traits which disprove the presence of the thoughts of a
deceptive imitation by a foreign hand stand as valid
arguments in its defence" (Gesch. p. 104). For a
detailed reply to the arguments of De Wette and Baur,
the student may be referred to Meyer, Einleitung, z. Eph.
p. 74 sqq.; at present it may be judged by the
handbook of the MSS., the cursive numbered 67, by Basil (expressly),
probable by Origen, and possibly by Tertullian. This,
combined with the somewhat noticeable omission of
all greetings to the members of a church with which
the apostle stood in such affectionate relation, and
some other internal objections, have suggested a doubt
whether these words really formed a part of the origi-
nal text. On the subject of the persons addressed,
therefore, two hypotheses have been entertained, the
first by Reuss, that the epistle is addressed to the
Church at Laodicea, and that there, in this epistle to that Church which is
commonly supposed to have been lost. The view of Gro-
tius, which has been followed by some scholars of emi-
nent name, gives no hint of any such tradition.
Veneza, Wetstein, and Paley, rests chiefly on two
grounds, viz. the testimony of Marcion, and the close
resemblance between this epistle and that to the Colos-
sians, taken in connection with Coloss. iv, 16.
With respect to the former of these grounds, it is alleged
by Wetstein, that, as Marcion was acquainted with
wifful falsehood in regard to the destination of this
epistle, he probably had the authority of the Church at
Laodicea, and, it may be, the tradition of the church-
es generally of Asia Minor, for the opinion which he
expressed in his Profeccion, etc., (Ad N. Test. p. 9, Oxon.
1702). But, without charging Marcion with designingly uttering what was false, we
can suppose that, like some critics of recent times,
this view was suggested to him by the apostle's allu-
sion, in Col. iv, 16, to an epistle addressed by him to
the Laodiceans or to Colossians. Nor is there the least ground for
supposing that Marcion spoke in this instance on the
authority of the Asiatic churches; on the contrary,
there is every reason to believe the opposite; for not
only do Origen and Clement of Alexandria, who were
fully acquainted with the views of the Eastern church-
ers on such matters, give no hint of any such tradition
being entertained by them, but Tertullian, to whom we
are indebted for our information respecting the
opinion of Marcion, expressly says that in that opin-
ion he opposed the tradition of the orthodox churches,
and imposed upon the epistle a false title, through
the conceit of his own superior diligence in exploring such
matters (adv. Marc. v, 17). With regard to the other
argument by which this view is advocated, admitting
the fact of a close resemblance between the epistle to
the Colossians and that before us, and the fact that
Paul has, in Col. i, addressed himself written one to the Church at Laodicea, which he
advises the Colossians to send for and read, how does it
follow from all this that the epistle to the Laodiceans
and that now under notice were one and the same?
It appears more probable that, seeing the two extant
epistles bear so close a resemblance to each other, had
the one now bearing the inscription "to the Ephes-
sians" been really the one addressed to the Laodic-
ians, the apostle would not have deemed it of so much
importance that the churches of Colossae and Laodicea
should interchange epistles. Such being the argu-
ments in favor of this hypothesis (for those which,
in addition, Wetstein alleges from a comparison of this
epistle with that to the Church at Laodicea, in the
Apocalypse, are not deserving of notice; see Michae-
iss., Introd. iv, 187), we may venture to set aside as
without foundation this argument also. It appears also,
that it seems incompatible with what the apostle
says, Col. iv, 15, where he enjoins the Church at Co-
lossae to send his greetings to the brethren at Laodi-
cea, etc. No one sends greetings by another except
when it is impossible to express them one's self. But
if Paul wrote to Laodicea before he addressed the
Colossae, and sent both letters by the same bearer, Tychi-
cus, there was manifestly no occasion whatever for his
EPHESIANS 239

EPISTLE TO EPHESIANS

reading his salutations to the latter of these churches through the medium of the former; it was obviously as easy, and much more natural, to send his salutations to the Church at Laodicea in the epistle addressed to themselves. This seems to prove that the epistle to the Laodiceans had been written some considerable time after that to the Colossians; and therefore, it could not have been the same with that now under notice. See Laodiceans (Epistle to).

2. The opinion that this epistle was not specially addressed to any one church, but was intended as a sort of circular letter for the use of several churches, was first advanced by Bishop Usher, and is confirmed by the explanation of it given by Bishop Lowth. (Eccles. Hist. i. 110. 111. and ii. 199.) The bishop also seems to have supposed that it was written some time before the other epistles to the Ephesians and Philemon. He supposes, that the epistle was written about the year 61 A.D. (Bibliotheca, p. 680, Bremes, 1686.) To this opinion the great majority of critics have given their suffrage; indeed, it may be regarded as the received opinion of Biblical scholars in the present day. This may make it appear presumptuous in us to call it in question; and yet it seems to us so ill supported by positive evidence, and exposed to so many objections, that we cannot yield assent to it. (1.) In the first place, it is to be observed that this is a hypothesis entirely of modern invention. No hint is furnished of any such notion having existed at any time concerning the destination of this epistle by the early Church. With the solitary exception of Mancion, so far as we know, all parties were unanimous in assigning Ephesus as the place to which this epistle was sent, and Mancion's view is as much opposed to the supposition of its being a circular letter, as to that of the universal designation of this epistle by the ancient Church (Mancion standing alone in his assertion that it was written to the Laodiceans) as an epistle to the Ephesians. (2.) The extreme difficulty in giving any satisfactory meaning to the isolated participle (σὺν αὐτῶν, to them together) and the additional charge (v. 2) that the epistle was written in the apostle's writings, can scarcely fail to be considered as the properity of removing the brackets in which these latter are enclosed in the 2d and later editions of Tischendorf, and of considering them an integral part of the original text. If called upon to supply an answer to, or an explanation of these objections, we must record the opinion that none on the whole seems so free from objection as that which regards the epistle as also designed for the benefit of churches either conterminous to, or dependent on that of Ephesus. The counter-arguments of Meyer, though adly urged, are not convincing. Nor can an appeal to the silence of writers of the ancient Church on this further destination be conceived to be of much weight, as their references are to the usual and stular designation of the epistle, and do not and are not intended to affect the question of its destination. (3.) The epistle to the Ephesians will be considered afterwards; at present the question is, How do they favor the hypothesis that this was a circular letter? Now, supposing them to be unquestionable, and admitting that they are not irreconcilable with this hypothesis, it must yet appear to be certain, that the evidence in favor of the primary evidence in its support. It is not one which grows naturally out of these facts, or is suggested by them; it is plainly of foreign birth, and suggested for them. But when it is remembered that the first of these alleged facts is (to say the least) very doubtful; that the second is made to depend on this hypothesis only by means of another as doubtful as itself, and that, were its services admitted, it would prove too much, for it would go to show that, to the Laodiceans, the apostle not only sent a peculiar epistle, mentioned Col. iv. 16, but gave them a share also in this circular epistle written some time after their own; and that the third and fourth are both either partially or wholly questionable, it must be admitted that this hypothesis stands upon a basis which is little better than none. (3.) Had the epistle been addressed to a particular circle of churches, some designations would have been given, by which it might have been known that churches they were to which this letter belonged. When it is argued that this must be a circular letter, because there is no church specified to which it is addressed, it is easily to be forgotten that the designation of a particular set of churches is as necessary for a circular epistle as the designation of one church is for an epistle specially addressed to it. If we must leave out the words iv. Epigr in chap. i. 1, what are we to put in their place? for if we take the passage as it stands without them, it will follow that the epistle was addressed to all Christians everywhere, which is more than the advocates of the hypothesis now under notice can contrive to do. There is however a blank, which is equally gratuitous, unreasonable, and unnecessary. (4.) In chap. vi. 21, 22, Paul mentions that he had sent to those for whom this epistle was destined Tychicus, who should make known to them all things, that they might know his affairs, and that he might comfort them. The case of all the Ephesians was not only the bearer of this letter, but that he was personally to visit, converse with, and comfort those to whom it was addressed. On the supposition that this was a circular letter, this could hardly have been the case. 8. We return, then, to the question of the genuine of the suspected words "at Ephesus," iv. Epigr. At first sight the doubts against them seem plausible; but when we oppose to these (a) the preponderating weight of diplomatic evidence for the insertion of the words (which are wanting in the oldest, and worst, of Paul's epistles); (b) the universal designation of this epistle by the ancient Church (Mancion standing alone in his assertion that it was written to the Laodiceans) as an epistle to the Ephesians; (d) the extreme difficulty in giving any satisfactory meaning to the isolated participle (σὺν αὐτῶν, to them together) and the additional charge that the epistle was written in the apostle's writings, we can scarcely fail to see as the properity of removing the brackets in which these words are enclosed in the 2d and later editions of Tischendorf, and of considering them an integral part of the original text. If called upon to supply an answer to, or an explanation of these objections, we must record the opinion that none on the whole seems so free from objection as that which regards the epistle as also designed for the benefit of churches either conterminous to, or dependent on that of Ephesus. The counter-arguments of Meyer, though adly urged, are not convincing. Nor can an appeal to the silence of writers of the ancient Church on this further destination be conceived to be of much weight, as their references are to the usual and stular designation of the epistle, and do not and are not intended to affect the question of its destination. If the epistle to the Ephesians will be considered afterwards; at present the question is, How do they favor the hypothesis that this was a circular letter? Now, supposing them to be unquestionable, and admitting that they are not irreconcilable with this hypothesis, it must yet appear to be certain, that the evidence in favor of the primary evidence in its support. It is not one which grows naturally out of these facts, or is suggested by them; it is plainly of foreign birth, and suggested for them. But when it is remembered that the first of these alleged facts is (to say the least) very doubtful; that the second is made to depend on this hypothesis only by means of another as doubtful as itself, and that, were its services admitted, it would prove too much, for it would go to show that, to the Laodiceans, the apostle not only sent a peculiar epistle, mentioned Col. iv. 16, but gave them a share also in this circular epistle written some time after their own; and that the third and fourth are both either partially or wholly questionable, it must be admitted that this hypothesis stands upon a basis which is little better than none.
mystic building of which Christ was the corner-stone, the apostles the foundations, and himself and his fellow-Christians portions of the august superstructure (ii, 19-22), must have spoken with a force, an appro\n\n\niv. Contents.—These easily admit of being divided into two portions, the first mainly doctrinal (i-iii), the second katory and practical.

1. The spiritual portion opens with a brief address to the saints in Ephesus, and rapidly passes into a sublime ascription of praise to God the Father, who has predestinated us to the adoption of sons, blessed and redeemed us in Christ, and made known to us his eternal purpose of uniting all in him (i, 3-14). This not unnaturally evokes a prayer from the apostle that his converts may be enlightened to know the hope of God's calling, the riches of his grace, and the magnitude of that power which was displayed in the resurrection and transcendent exaltation of Christ—the head of his body, the Church (i, 15-20). Then, with a more immediate address to the converts, the apostle appoints them how, dead as they had been in sin, God had quickened them, raised them, and even enronzed them with Christ; and how all was by grace, not by works (ii, 1-10). They were to remember, too, how Christ, having abolished in his flesh the enmity (v, 11-14), was reconciled to God by the sacrifice of himself, and was put back in the middle of the old man, not brought nigh in the blood of Christ; how he has as their Peace, how by him both they and the Jews had access to the Father, and how on him as the corner-stone they had been built into a spiritual temple to God (ii, 11-22).

On this account, having heard, as they must have done the profound mystery of this call of the Gentile world, they were not to faint at his troubles (iii, 1-18): nay, he prayed to the great Father of all to give them inward strength, to teach them the love of Christ, and fill them with the fulness of God (iii, 13-19). The prayer is concluded by an exhortation (iii, 29-40), which, as in 

2. This apostle commences by entreating them to walk worthy of this calling, and to keep the unity of the Spirit: there was but one body, one Spirit, one Lord, and one God (iv, 1-6). Each, too, had his portion of grace from God (iv, 7-10), who had appointed ministering orders in the Church, until all come to the unity of the faith, and grow up and become united with the living Head, even Christ (iv, 11-16). Surely, then, they were to walk no more as darkness, but as light (v, 1-8). They were not toiate the deeds of the past (v, 3-14). Thus were they to walk exactly, to be filled with joy, to sing, and to give thanks (v, 18-21). Wives were to be subject to their husbands, husbands to love and cleave the wives (v, 28-33); children to honor their parents, servants to obey their masters (vi, 1-4); and masters to work for each other their reciprocal duties (vi, 5-9). With a noble and vivid exhortation to arm themselves against their spiritual foes with the armor of God (vi, 10-18), this epistle closes. Timothy was not yet with Paul (i, 1); Paul was then a prisoner (iii, 1; iv, 1), but had been allowed to pre\n\n\n
Colossians iv, 7, 8). The question of order in time between this epistle and that to the Colossians is very difficult to adjust. On the whole, both internal and external considerations seem to point to the conclusion that the author of the Epistle to the Ephesians was the same person as the apostle to the Colossians.

VI. Commentaries, etc.—The following is a full list of separate exegetical helps on this epistle, the more important having an asterisk (*) prefixed:

V. William, in Mai's Script. Vet. 311, i, 87; Jerome, Commentarius (in Opp. viii, 577; also in Opp. Suppl. xi, 995). Chrysostom, Homilæ (in Opp. vi, 1;注脚 Error: 191). Claudius Tarrenius, Expositio (in Mabillon, Vet. Anal. 91); *Calvin, Commentarius (in Opp. ; also tr. into English, Lond. 1854, 4to). Also Servomen (tr. by Golding, Lond, 1577, 4to; Ridley, Commentary (in Richmond's Fathers, ii, 14). Megander, Commentarius (Basile, 1584, 8vo; Sancius, Adnotationes (Cfrk. 1541, 5vo); Major, Exegetico (1552, 8vo; Nilant, Exegetarum (Vene. 1554; Lond. 1570, 8vo); Weller, Commentarius (Norimb. 1598, 8vo); Vellerus, Exegetarum (Norimb. 1598, 8vo). Bucer, Prelectiones (Basil. 1562, fol.; Musculus, Commentarius (Basil. 1564, fol.; Calvin, 1566, fol.); Binem, Expositio (Lond. 1581, 4to); Anon., Exposition (Lond. 1681, 4to); Stewart, Commentarius (Ingolst. 1593, 4to); Rollock, Commentarius (Edinb. 1590, 4to; Gen. 1599, 8vo); Zanchius, Commentarius (Newstd. 1594, fol.;) Weinrich, Explicatio (Lips. 1618, 4to; also tr. and prefixed by De Quiros, Commentarius (Hisp. 1622, fol.; Ingst. 1628, 4to; Meelhueter, Commentarius (Norimb. 1628, 4to); Hanneken, Explicatio (4to, Marp. 1681; Lips, 1718; Jen. 1731); Tarnovius, Commentarius (Reut. 1636, 4to). Cocceius, Commentarius (in Opp. v); Althofer, Annotatio (Altem. 1684); C. H. Preffer, Commentarius (Cassel, 1642, 8vo); Bayne, Commentary (Lond. 1648, fol.); Wandelin, Paraphrasis (Sisew. 1650, 8vo); Boyd, Prelectiones (fol., London, 1552; Gen. 1650). Anon., Annotationes (8vo, Camb. 1635; Amst. 1703; also in the Commentaries of Fergusson, 1659, 8vo); Croll, Commentarius (in Opp. i, 4); Lagon, Commentario (Gryph. 1664, 4to); Schmidt, Paraphrasis (Arg. 1684, 1698, 4to); Du Busc, Sermonia (Fr., Rotterd. 1699, 9 vols, 8vo); Goodwin, Exposition (Strasb. 1699, 4to); Spener, Erklär. (Hal. 1706, 1730, 4to); Gerhard, Editionis (Strasb. 1673, 4to); Freyling, Dissertations (Arg. 1711, 8vo). gen (Berl. 1865, 8vo). See Epistles.

and country which the ancients from Attica had selected as their future abode surpassed, according to Herodotus (i, 142), all others in beauty and fertility; and, had the martial spirit of the Ionians corresponded to their natural advantages, they might have grown into a powerful independent nation. The softness, however, of the polite character of the people, the length of life, the necessities of life could be procured, transformed the hardy inhabitants of the rugged Attica into an indolent and voluptuous race; hence they fell successively under the power of the Lydians (B.C. 560) and the Persians (B.C. 557); and, though the revolt of His-
tiues and Aristogiton against the Persian power was for a time successful, the contest at length terminated in favor of the latter (Herod. vi, 7-22). The defeat of the Persians by the Greeks gave a temporary lib-
erty to the Ionian cities; but the battle of Mycale transferred the dominion of Athens. During the Peloponnesian war they paid tribute indifferently to either party, and the treaty of Antalcidas (B.C. 387) once more restored them to their old masters the Persians. They beheld with indiffer-
ence the exploits of Alexander and the disputes of his capulators, as if they were not conscious of the struggle for successive conquerors. Ephesus was included in the dominions of Lysimachus; but, after the defeat of Antiochus (B.C. 190), it was given by the Romans to the kings of Pergamus. In the year B.C. 129 the Romans formed their province of Asia. The fickle Ephesians took part with Mithridates against the Ro-
mans, and massacred the garrison; they had reason to be grateful for the unusual clemency of L. Cornelius
Sulla, who merely inflicted heavy fines upon the in-
habitants. Thenceforward the city formed part of the Roman empire. While, about the epoch of the intro-
duction of Christianity, the other cities of Asia Minor declined, Ephesus rose more and more. It owed its prominence to the richness of its trading prosperity, in which it vied with Tyre and Alexandria; to the wealthy town of Erythrai (also called Erythrepolis or Lysimachus named the city Arinœo in honor of his second wife, and Attalus Philadelphus furnished it with splendid wharves and docks; in part to the favor-
able position of the place, which naturally made it the emporium of Asia on this side the Taurus (Strabo, vii, 641, 692). Under the Romans, Ephesus was the capital not only of Ionia, but of the entire province of Asia, and bore the honorable title of the first and greatest metropolis of Asia (Böckh, Corp. Inscript. Græc. 2968-2992). The bishop of Ephesus in later times was the primate of the Asiatic dioceses, with the rights and privileges of a patriarch (Ep. Hist. Ec-
cles. iii, 6). Towards the end of the 11th century Ephesus experienced the same fate as Smyrna; and, after a brief occupation by the Greeks, it surrendered in 1088 to Sultan Saysan, who, to prevent future in-
surrections, sent most of the inhabitants to Tyri-
num, where they were massacred.

Early Silver Coin of Ephesus. From the British Museum. Actual Size. Weight 1753 grains.
natives of Asia (xx, 4), and the latter probably (2 Tim. iv, 12), the former certainly (Acts xxii, 29), natives of Ephesus. In the same connection we ought to mention Onesiphorus (2 Tim. i, 16-18) and his household (iv, 19). On the other hand must be noticed certain specified Ephesian antagonists of the apostle, the sons of Sceva and his party (Acts xix, 14), Hymeneus and Alexander (1 Tim. i, 20; 2 Tim. iv, 14), and Phygellus and Hermogenes (2 Tim. i, 15).

See Paul. Ephesus is also closely connected with the apostle John, not only as being the scene (Rev. i, 11; ii, 1) of the most remarkable of the churches of the Apocalypse, but also in the story of his later life as given by Eusebius (Hist. Eccl. iii, 23, etc.). According to a tradition which prevailed extensively in ancient times, John spent many years in Ephesus, where he employed himself most diligently for the spread of the Gospel, and where he died at a very old age, and was buried. See John (The Apostle). Possibly his Gospels and Epistles were written here. There is a tradition that the mother of our Lord was likewise buried at Ephesus, as also Timothy. Some make John bishop of the Ephesian communities, while others ascribe that honor to Timothy. In the book of Revelation (ii, 1) a favorable testimony is borne to the Christian churches at Ephesus. Ignatius addressed one of his epistles to the Church of this place (τῷ ἑξάησθιῳ τῷ ὑδάτινῳ, τῷ οὖν ἐν Ἑσυσίῳ τῷ Αἰγήι, Ἡσαῖ, Pat. Ancylii p. 164), which held a conspicuous position during the early ages of Christianity, and was, in fact, the metropolis of the churches of this part of Asia.

3. Location.—Ephesus lay on the Ægean coast, nearly opposite the island of Samos. 320 stadia from Smyrna (Strabo, xiv, 682). The ancient town seems to have been confined to the northern slope of Corfuus (Herod. i, 26), but in the lapse of time the inhabitants advanced farther into the plain, and thus a new town sprang up around the temple (Strabo, xiv, 640). All the cities of Ionia were remarkably well situated for the growth of commercial prosperity (Herod. i, 142), and none more than Ephesus. With a fertile neighborhood (Strabo, xiv, 657) and an excellent climate, it was also most conveniently placed for traffic with all the neighboring parts of the Levant. In the time of Augustus it was the great emporium of all the regions of Asia within the Taurus (Strabo, xiv, 960); its harbor (named Panormus), at the mouth of the Cayster, was elaborately constructed, though alluvial matter caused serious hindrances both in the time of Attalus and in Paul’s own time (Tacitus, Ann. xvi, 25). The apostle’s life alone furnishes illustrations of its mercantile relations with Achaea on the W., Macedonia on the N., and Syria on the E. At the close of his second missionary circuit, he sailed across from Corinth to Ephesus (Acts xviii, 18), when on his way to Syria (Acts xviii, 21, 22): some think that he once made the same short voyage over the Ægean, in the opposite direction, at a later period. See Corinthians, First Ep. to.

On the third missionary circuit, besides the notice of the journey from Ephesus to Macedonia (xix, 21; xx, 1), we have the coast voyage on the return to Syria given in detail (xx, xxxi), and the geographical relations of this city with the islands and neighboring parts of the coast minutely indicated (xx, 15-17). To these passages we must add 1 Tim. i, 3; 2 Tim. iv, 19, 20; though it is difficult to say confidently whether the journeys implied there were by land or by water. See likewise Acts xix, 27; xx, 1.

As to the relations of Ephesus to the inland regions of the continent, these also are prominently brought before us in the apostle’s travels. The “upper coasts” (ἐν δεξιάς τῆς ἀρχῆς, Acts xix, 1) through which he passed when about to take up his residence in the city, were the Phrygian table-lands of the interior; and it was probably in the same district that on a previous
occasion (Acts xvi, 6) he formed the unsuccessful project of preaching the Gospel in the district of Asia. Two great roads at least, in the Roman times, led eastward from Ephesus; one through the passes of Tmolus to Sardis (Rev. iii, 1), and thence to Galatia and the N.E., the other round the extremity of Pactya to Magnesia, and up the valley of the River to Ionia, whence the communication was direct to the Euphrates and to the Syrian Antioch. There seem to have been Sardian and Magnesian gates on the E. side of Ephesus corresponding to these roads respectively. There were also coast-roads leading northwards to the northeast, and southwards to the south. By the latter of these it is probable that the Ephesian elders travelled when summoned to meet Paul at the latter city (Acts xx, 17, 18). Part of the pavement of the Sardian road has been noticed by travellers under the cliffs of Galleus. (See Leake's *Asia Minor*, and *Map*.)

Among the more marked physical features of the peninsula are the two large rivers, Hermus and Meander, which flow from a remote part of the interior westward to the Archipelago, Smyrna (Rev. ii, 8) being near the mouth of one, and Miletus (Acts xx, 17) of the other. Not far from their valley lies a series of hills and plains where two of these rivers is the shorter stream and smaller basin of the Cayster, called by the Turks Kutschuk-Mendere, or the Little Meander. Its upper level (often called the Caystrian meadows) was closed to the westward by the gorge between Galleus and Palaemon, the latter of these mountains being a prolongation of the range of Messois, which bounds the valley of the Meander on the north, the former more remotely connected with the range of Tmolus, which bounds the valley of the Hermus on the south. Beyond the gorge and towards the sea the valley opens out again into the Myus Plain (Herod. ii. 10), with hills rising abruptly from it. The plain is now about 5 miles in breadth, but formerly it must have been smaller, and some of the hills were once probably islands. Here Ephesus stood, partly on the level ground and partly on the hills.

Of the hills, on which a large portion of the city was built, the two most important were Prion and Coreus, the latter on the S. of the plain, and being, in fact, almost a continuation of Pactya, the former being in front of Coreus and near it, though separated by a deep and defective valley. Further to the N.E. is another prominent eminence, known to us as Mount Yeleus (see generally Cellarius *Notit. ii, 80. 4. Government.—It is well known that Asia was a proconsular province; and in harmony with this fact we find proconsuls (ἀρχονταὶ, A.V. "deputies") specially mentioned (Acts xix, 38). Nor is it necessary to inquire here whether the plain in this passage is generic, or whether the governors of other provinces were present in Ephesus at the time. Again, we learn from Pliny (v, 81) that Ephesus was an assize-town (forum or conveniens); and in the N.T. narrative (Acts xix, 38) we find the count-days alluded to as actually being held (τὸ ἀρχαῖον ἄργον, A.V. "the law is open") during the uproar; though perhaps it is not absolutely necessary to give the expression this exact reference as to time (see Wordsworth in loc.). Ephesus itself was a "free city," and had its own assemblies and its own magistrates. The senate (Ἑλευσια, or Βουλή) is mentioned not only by Strabo, but by Josephus (Ant. xiv. 10, 25; xvi. 6, 4 and 7); and Luke, in the narrative before us, speaks of the δῆμος (ver. 30, 36, A.V. "the people") and of its customary assemblies (τοῦ χαιρετοῦ και ἐκκλησίαν, ver. 39, A.V. "a lawful assembly"). That the tumultuary meeting which was gathered on the occasion in question should take place in the theatre (ver. 29, 31) was nothing extraordinary. It was at a meeting in the theatre at Caesarea that Agrippa I received his death-stroke (Acts xii, 25), and in Greek cities this was often the place for large assemblies (Tacitus, *Hist.* ii. 80; *Val. Max.* ii, 2). We even find conspicuous mention made of one of the most important municipal officers of Ephesus, the "town-clerk" (q.v.) (γραμματικὴς), or keeper of the records, whom we know from other sources to have been a person of great influence and responsibility. It is remarkable how all these political and religious characteristics of Ephesus, which appear in the sacred narrative, are illustrated by inscriptions and coins. An ἀρχοντας, or state-paper office, is mentioned on an inscription in Chisilull. The γραμματικὴς frequently appears; so also the λαός και ἀνθρώποι. Sometimes these words are combined in the same inscription; see, for instance, Boeckh, *Corp. Insers.* 1299, 2294, 2296. The later coins of Ephesus are full of allusions to the worship of Diana in various aspects. The word *ἀριστος* (warrant, A.V. "woothkeeper") is of frequent occurrence. That which is given last below has also the word ἀνθρώποι (proconsul, A.V. "deputy"); it exhibits an image of the temple, and, bearing as it does the name and head of Nero, it must have been struck about the time of Paul's stay in Ephesus. The one immediately preceding it bears the name (Cusinius) of the acting γραμματικὴς ("town-clerk") at the time. The bronze coin of Ephesus. 5. The *Asiarchs*—Public games were connected with the worship of Diana at Ephesus. The month
of May was sacred to her. The uproar mentioned in the Acts very probably took place at this season. Paul was certainly at Ephesus about that time of the year (1 Cor. xvi. 8), and Demetrius might well be peculiarly sensitive if he found his trade failing at the time of greatest concourse. However the case, the Asiarchs (Ἀσιαρχοι, A. V. "chiefs of Asia") were present (Acts xix. 31). These were officers appointed, after the manner of the ediles at Rome, to preside over the games which were held in different parts of the province of Asia, just as other provinces had their Galatarchs, Lycatarchs, etc. Various circumstances would require the presence of these officers in turn. In the account of Polycarp's martyrdom at Smyrna (Hesefle, Pat. Apost. p. 286) an important part is played by the Asiarch Philip. It is a remarkable proof of the influence which Paul had gained at Ephesus that the Asiarch took his side in the disturbance. See Dr. Wordsworth's note on Acts xix. 31. Comp. Asiaarch.

6. Religion.—Conspicuous at the head of the harbor of Ephesus was the great temple of Diana or Artemis, the tutelary divinity of the city. She was worshipped under the name of Artemis. There was more than one divinity which went by the name of Artemis, as the Arcadian Artemis, the Taurian Artemis, as well as the Ephesian Artemis. (See Dougall in Anotlct. ii. 91; Münter, Relig. d. Krbaty. p. 53.) Her worship in this instance was said to have originated in an image that fell from heaven (Acts xiv. 15). See also Clem. Alex. Protrep. p. 14; Wetzstein in loc.), and believed to have been an object of reverence from the earliest times (Pliny, xvi. 79). The material of which it was composed is disputed, whether ebony, cedar, or otherwise (see Spanheim, ad Cudin. Dian. vers. 228). She was represented as many-headed (poluamaño, multiformia, see Gronovii Thesaur. vii; Zorn, Bibl. Antig. i. 439 sq.); Creuzer, Symbol. ii. 176 sq.), although different explanations are given of her figure in this respect. The following is the description given by Mr. Falsen (Ephesus, p. 266): "The statue of the Ephesian Diana now in the Naples Museum: 'The circle round her head denotes the nimbuses of her glory; the griffins inside of which express its brilliancy. In her breast are the twelve signs of the zodiac, of which those seen in front are the ram, bull, twins, crab, and lion; they are divided by the hours. Her necklace is composed of 27 corns, the primal food of man. Lions are on her arms to denote her power, and her hands are stretched out to show that she is ready to receive all who come to her. Her body is covered with various beasts and monsters, as serpents, sphinxes, and griffins, to show she is the source of nature, the mother of all things. Her head, hands, and feet are of bronze, while the rest of the statue is of alabaster, to denote the ever-varying light and shade of the moon's figure. The altar was the work of Praxiteles. The famous sculptor Scopas is said by Pliny to have chiseled one of the columns. Apelles, a native of the city, contributed his strength, ease, and grace, and whose delights were in the pursuits of the chase. See Diana.' Around the image of the goddess was erected, according to Callimachus (Hyymn. in Dian. 248), her large and splendid temple. This building was raised (about B.C. 500) on immense substructions, in consequence of the swampy nature of the ground. The earlier temple, which had been begun before the Persian war, was burnt down in the night when Alexander the Great was born (B.C. 355), by an obscure person of the name of Eratostratus, who thus sought to transmit his name to posterity (Strabo, xiv. 560; Plutarch, Alex. 3; Solin, 43; Cicero, De Nat. Deor. ii. 27); and, as it seemed somewhat unaccountable that the goddess should permit a place which redounded so much to her honor to be thus recklessly destroyed, it was given out that Diana was so engaged with Olympias in aiding to bring Alexander into the world that she had no time nor thought for any other concern. At a subsequent period Alexander made an offer to rebuild the temple, provided he were allowed to inscribe his name on the front, which the Ephesians refused. Aided, however, by the whole of Asia Minor, they succeeded in erecting a still more magnificent temple, which the ancients have lavishly praised and placed among the seven wonders of the world. It took two hundred and twenty years to complete. Pliny (Hist. Nat. xxxvi. 21), who has given a description of it, says it was 425 feet in length, 220 feet wide, 40 feet high, each of which had been contributed by some prince, and were 60 feet high; 36 of them were richly carved. Chersiphron, the architect, presided over the undertaking, and, being ready to lay violent hands on himself in consequence of his difficulties, was restrained by the command of the goddess, who appeared to him during the night, assuring him that she herself had accomplished that which had brought him to despair. The altar was the work of Praxiteles. The famous sculptor Scopas is said by Pliny to have chiseled one of the columns. Apelles, a native of the city, contributed his strength, ease, and grace, and whose delights were in the pursuits of the chase. See Diana. It will be seen, from the figure given, that this last differed materially from the Diana, sister of Apollo, whose attributes are the bow, the quiver, the girl-up robe, and the hound; whose person is a model of fem-
A splendid picture of Alexander the Great. The rights of sanctuary, to the extent of a stadium in all directions round the temple, were also conceded, which, in consequence of abuse, the emperor Tiberius abolished. The temple was built of cedar, cypress, white marble, and gold, and was 130 feet high. (Stich. Obser. in Hymn. in Dian. 333.) Costly and magnificent offerings of various kinds were made to the goddess and treasured in the temple, such as paintings, statues, etc., the value of which almost exceeded computation. The fame of the temple, of the goddess, and of the man with the new capital, was not only felt in Asia, but throughout the world, a celebrity which was enhanced and diffused the more readily because sacred games were practiced there, which called competitors and spectators from every country. In style, too, this famous structure constituted an epoch in Greek art (Vitr. iv. 1), since it was here first that the graceful Ionic order was perfected. The magnificence of this sanctuary was a proverb throughout the civilized world (Philo Byz. Spec. Mund. 7). All these circumstances give increased force to the architectural allegory in the great epistle which Paul wrote in this place (1 Cor. iii. 16-17), to the passage: "... the edifice of this kind is said in the epistles addressed to Ephesus (Eph. ii. 19-22; 1 Tim. iii. 15; vi. 19; 2 Tim. ii. 19, 20), and to the words spoken to the Ephesian elders at Miletus (Acts xx. 25). The temple was frequently used for the safe custody of sacred books. The character of the temple was the privilege which, in common with some other Greek temples, it enjoyed, as an asylum, within the limits of which criminals were safe from arrest (Strabo, xiv. 641; Plutarch, De sacr. c. 3; Apollon. Eph. epist. 65). By Alexander this asylum was extended to a stadium, and by Mithridates somewhat further. Mark Antony nearly doubled the distance; but the abuses hence arising became so mischievous, that Augustus was compelled to abolish the privilege, or at least restrict it to its ancient boundary. Among his other enormities, Nero is said to have despoiled the temple of Diana of much of its treasure. It continued to conciliate no small portion of respect till it was finally burnt by the Goths in the reign of Gallienus. (See Hirt, Der Tempel der Diana zu Ephesus, Berlin, 1809.)

The chief points connected with the upsurge at Ephesus in the case of Paul (Acts xix. 23-41) are mentioned in the articles Diana and Paul; but the following details must be added. In consequence of this devo- tion, the city of Ephesus was called ἴσημος (ver. 36) or "warden" of Diana (see Van Dale, Dissert. p. 309; Wolf, Ephes. ii. 16). The temple was the center of society; a recognized tithe was paid to it, and the books mentioned as being burned by its possessors in consequence of their teaching were doubtless books of magic. The temple was devoted to the worship of Diana and the cultus. The temple was regarded as a sanctuary by the people of Ephesus, and was visited by travelers from all parts of the world. In the time of Alexander the Great, the temple was a center of learning, and was visited by such famous scholars as Eratosthenes and Diodorus Siculus. (See Ephesus, 5.)

6. Magical Arts. Among the distinguished natives of Ephesus in the ancient world may be mentioned Apelles and Parrhasius, rivals in the art of painting. Heracleitus, the man-hating philosopher, Hippocrates, the satirical poet, Artemidorus, who wrote a history and description of the earth. The claims of Ephesus, however, to the praise of originality in the prosecution of the liberal arts about the temple of Diana must be content with the dubious reputation of having excelled in the refinements of a voluptuous and artificial civilization. With culture of this kind, a practical belief in and a constant use of those arts which pretend to lay open the secrets of nature, and arm the hand of man with the power of control, have been found conjoined. Accordingly, the Ephesian multitude were addicted to sorcery; indeed, in the age of Jesus and his apostles, adepts in the occult sciences were numerous: they travelled from country to country, and were found in great numbers in Asia, devoting the credulous multitude and profiting by their expectations. They were sometimes Jews, who referred their skill and even their forms of proceeding to Solomon, who is still regarded in the East as head or prince of magicians (Josephus, Ant. vili. 2, 3; Acts vili. 9, xili. 24, 3; xix. 14), nor is the reputation of magical arts (Ortolb. De Ephes. Libris context. Lib. 1708) this also comes conspicuously into view in Luke's narrative (Acts xix. 11-20). The peculiar character of Paul's miracles (ἐνεργεῖας αὐτοῦ τῆς ἱερατείας), ver. 11), would seem to have been intended as an antithesis to the practices of the books mentioned as being burned by their possessors in consequence of their teaching were doubtless books of magic. How extensively they were in use may be learned from the fact that "the price of them" was "fifty thousand pieces of silver" (more than $400,000). Very celebrated were the Ephesian letters (Επιστ. ἑπερατου), which appear to have been a sort of magical formula written on paper or parchment, designed to be fixed as amulets on different parts of the body, such as the hands and the head (Plut. Sym. viii; Luke. 336; Obser. viii. 336). Eusebius (Adom. Camb. ii. 576) says that they were certain signs or marks which rendered their possessor victorious in every thing. Eustathius (Adom. Odyss. x. 694) states an opinion that Creuses, when on his funeral pile, was very much benefitted by the use of them; and this when a Milesian and an Ephesian were wrestling in the Olympic games, the former could gain no advantage, as the latter had Ephesian letters bound round his heel; but, these being discovered and removed, he lost his superiority, and was thrown thirty times. The faith in these mystic syllabes continued, more or less, till the sixth century (see the Life of Alexander of Tralles, in Smith's Dict. of Class. Biog. v.). We should enter on doubtful ground if we were to speculate on the Gnostic and other errors which grew up at Ephesus in the later apostolic age, and which are foretold in the address at Miletus, and indicated in the epistles to the Ephesians, and more distinctly in the epistles to Timothy. See Curious Arts.
the plain are scattered fragments of masonry and detached ruins, but nothing can now be fixed upon as the great temple of Diana. There are some broken columns and capitals of the Corinthian order of white marble, there are also some ruins of a theatre, consisting of some circular seats and numerous arches, supposed to be the one in which Paul was preaching when interrupted by shouts of "Great is Diana of the Ephesians." The ruins of this theatre present a wreck of immense grandeur, and the original must have been of the largest and most magnificent kind. The form alone can now be spoken of, for every seat is removed, and the prosenium is a hill of ruins. A splendid circus (Fellow's Report, p. 275) or stadium remains tolerably entire, and there are numerous piles of buildings, seen at a distance like Pergamos and Troy as well as here, by some called gymnasia, by others temples; by others again, with more propriety, palaces. They all came with the Roman conquest. No one but a Roman emperor could have conceived such structures. In Italy they have parallels in Adrian's villa near Tivoli, and perhaps in the piles of the present mosque. Many other walls remain to show the extent of the buildings of the city, but no inscription or ornament is to be found, cities having been built out of this quarry of worked marble. The ruins of the adjoining town, which arose about four hundred years ago, are entirely composed of these materials. There are few huts within these ruins (about a mile and a half from Ephesus), which still retain the name of the present city, Asulak—a Turkish word, which is associated with the same idea as Ephesus, meaning the City of the Moon (Fellows). ANumerous holes dug in the sand to these is a temple dedicated to St. John is thought to have stood near it, not on the site of the present mosque. Arundel (Discoveries, ii, 258) conjectures that the gate, called the Gate of Persecution, and large masses of brick wall which lie beyond it, are parts of this celebrated church, which was fortified during the great Almainn war, and therefore before the tomb of St. John. There was in or under his church, and the Greeks have a tradition of a sacred dust arising every year, on his festival, from the tomb, possessed of miraculous virtues: this dust they term manna. Not far from the tomb of St. John was that of Timothy. The tomb of Mary and the Seven Sleepers are found in an adjoining hill. At the back of the mosque, on the hill, is the sunk ground-plan of a small church, still much venerated by the Greeks. The sites of two others are shown at Asulak. There is at the back of the building, called the Prison of St. Paul, constructed of large stones without cement. The situation of the temple is doubtful, but it probably stood where certain large masses remain on the low ground, full in view of the theatre. The disappearance of the temple may easily be accounted for, by the rising of the soil, and partly by the incessant use of its materials for medieval buildings. Some of its columns are said to be in St. Sophia at Constantinople, and even in the cathedrals of Italy.

Though Ephesus presents few traces of human life, and little but scattered and mutilated remains of its ancient grandeur, yet the environs, diversified as they are with hill and dale, and not scantily supplied with wood and water, present many features of great beauty. Arundel (ii, 244) enumerates a great variety of trees, which he saw in the neighborhood, among which may be specified groves of myrtle near Ephesus. He also found an abundance of wild berries, and saw there the common fern, which he met with in no other part of Asia Minor. Dr. Chandler (p. 150, 4to) gives a striking description of Ephesus, as he found it in his visit in 1764: "Its population consisted of a few Greek peasants, also a large number of Tetrachae, dependent, and insensible, the representatives of an illustrious people, and inhabiting the wreck of their greatness—some the substratum of the glorious edifices which they raised; some beneath the vaults of the stadium, once the crowded scene of their diversions; and some in the abrupt precipice, in the sepulchres which received their ashes. Such are the present citizens of Ephesus, and such is the condition to which the ruins of a grand city, and the temples which it was a ruinous place when the emperor Justinian filled Constantinople with its statues, and raised the church of St. Sophia on its columns. Its streets are obscured and overgrown. A herd of goats was driven to it for shelter from the sun at noon, and a noisy flight of crows from the tombs appalled my fancy. Its form alone can now be spoken of, for every seat is removed, and the prosenium is a hill of ruins. A splendid circus (Fellow's Report, p. 275) or stadium remains tolerably entire, and there are numerous piles of buildings, seen at a distance like Pergamos and Troy as well as here, by some called gymnasia, by others temples; by others again, with more propriety, palaces. They all came with the Roman conquest. No one but a Roman emperor could have conceived such structures. In Italy they have parallels in Adrian's villa near Tivoli, and perhaps in the piles of the present mosque. EPHESUS, GENERAL COUNCIL OF. The third
ecumenical council, convoked by the emperor Theo-
 DOSIUS II, was held at Ephesus in 431, upon the con-
 versery raised by Nestorius, bishop of Constantinople,
who had asserted that Jesus Christ had two natures, one
of God and one of man, and that each was of equal
importance. For the circumstances which led to the con-
 vocation of this council, see the articles Nestorius, Nestorianism, Pelagius. Cele-
 sionate, the pope, not seeing fit to attend in person, sent
three legates, Arcadius and Proclus, bishops, and Philippus, a presbyter, and six bishops from the
church of Alexandria, and accompanied by Ireneus, a nobleman, his
friend and protector. Cyril of Alexandria also,
and Juvenal of Jerusalem came, accompanied by about fifty
of the Egyptian bishops; Memnon of Ephesus had
brought together about forty of the bishops within his
jurisdiction; and altogether more than two hundred
bishops were present. Candidianus, the commander
of the forces in Ephesus, attended, by order of the
emperor, to keep peace and order; but by his conduct he
greatly discredited the party of Nestorius. The day ap-
pointed for the opening of the council was June 7th;
but John of Antioch, and the other bishops from Syria
and the East not having arrived, it was delayed till
the 22d of the same month. At the first session of the
council (June 22), before the Greek and Syrian bishops
had arrived, Cyril addressed the council in behalf of the
doctrines of Nestorius, and deposed and excommuni-
cated him. This sentence was signed by one hun-
dred and ninety-eight bishops, according to Tilmont,
and by more than two hundred according to Fleury; it
was afterwards made known to the emperor, and published in the public places. At the same time,
the sentence of it was sent to the clergy and people of Constanti-
nople, with a recommendation to them to secure the
property of the Church for the successor of the de-
prived Nestorius. As soon, however, as Nestorianism
had received notice of this sentence, he protested against it,
and all that had passed at the council, and forward-
ed to the emperor an account of what had been done,
setting forth that Cyril and Memnon, refusing to wait
for John and the other bishops, had hurried matters
on in a tumultuous and irregular way. On the 27th
of June, two bishops of Syria, a presbyter, and the
other bishops of the East, assembled, chose
John of Antioch for their president, and deposed Cyril
in their turn. In August, count John, who had been
sent by the emperor, arrived at Ephesus, and directed
the bishops of both synods to meet him on the follow-
ing day. Accordingly, John of Antioch and Nestorius
attended the council, and Cyril was deposed ortho-
dox; but immediately a dispute arose between them,
the latter contendirig that Nestorius should not be
present, while the former wished to exclude Cyril.
Upon this, the count, to quiet the dispute, gave both Cyril
and Nestorius the custody, and they endeavored,
but in vain, to reconcile the two parties. And thus
matters seemed as far as a settlement as ever.
The emperor at last permitted the fathers of the council to
send to him eight deputies, while the Orientals or Syri-
ans, on their part, sent as many. The place of meet-
ing was Chalcedon, whether the emperor proceeded,
and spent five days in listening to the arguments on
both sides; and here the Council of Ephesus may, in
fact, be said to have terminated. Nothing is known of
what passed at Chalcedon, but the event shows that
Theodosius sided with the Catholics, since upon his
return to Constantinople he ordered, by a letter, the
Catholic deputies to come there, and to proceed to con-
verse with the Nestorians in the presence of Cyril. He
had already ordered to leave Ephesus, and to confine himself to his monastery near Antioch. Afterwards
he directed that all the bishops at the council, includ-
ing Cyril and Memnon, should return to their respective
dioceses. The judgment of this council was at
once approved by the people of the Western Empire, especially
the greater part of the East, and was subsequently
confirmed by the Ecumenical Council of Chalcedon,
consisting of six hundred and thirty bishops. Even
John of Antioch and the Eastern bishops very soon
acknowledged it. But Nestorius protested to the last
that he regarded the sentence as anathema-
tized by the council. See NESTORIUS.

Of the other councils of Ephesus, the following are all that need be mentioned: 1, in 245 (?), against
the Patropannian Naosus; 2, in 400, under Chrysostom,
where Heraclius was consecrated bishop of Ephesus;
3, in 446, at which the emperor Theodosius, Zeno,
Justinian, and other emperors, in the presence of the
ROBER COUNCIL (see next article).—Landon, Manual

ier, iv, 49.

EPHESUS, ROBER COUNCIL OF (αυξόδοσις ηρωτα-
σεις, latrunculorum Ephesinum), the so-called second gen-
eral council, was held at Ephesus in 449, which
Flavianus, bishop of Constantinople, had in the
preceding year deposed on account of heretical opin-
ions, appealed to a general council, at which the patri-
archs of Rome, Alexandria, Jerusalem, Thessalonica,
and other heads of the Church should be present, and
prevailed upon the emperors to convene the council im-
mediately. Theodosius wrote to Dioccorus, bishop of
Alexandria, desiring him to attend at Ephesus on the
1st of August, with ten metropolitan as and as many
Egyptian bishops, and no more, in order to inquire
into a question of faith in dispute between Flavianus
and Eutyches, by which the latter had been removed from the Church by the favor-
ers of Nestorius. In the same manner he wrote to
other bishops, always fixing the same number of met-
ropolitans and bishops, and especially forbidding
Theodoret to leave his diocese. He sent his own offi-
cers, Elpidius and Eulogius, with authority to provide
such troops as they might deem necessary, in order to
carry into effect what might be required. The bish-
ops who had sat in judgment upon Eutyches at the
council held by Flavianus at Constantinople in 448
were present at the council, but were allowed to take
no part in the debates, and merely to take the lead in everything relating to the council. The council met August 8, and about 130 bishops at-
tended. Dioccorus and his party ruled throughout;
Eutyches was declared orthodox, and re-established in
his priesthood and office of abbot; and sentence of
deposition was pronounced against Flavianus. Flavia-
num appealed from this decision to the bishop of Rome,
whose legate, Hilary, boldly opposed the sentence; at
the same time many of the bishops on their knees im-
plored Dioccorus to reconsider the matter; but he, de-
termining to carry it through, cried out for the impe-
rial officers, upon which the proconsul Proculus entered,
followed by a band of soldiers, armed with swords and
sticks, and carrying chains, who by threats and blows
compelled the bishops to sign the sentence of deposition. This, at last, ninety-six of them did, many, however, being first severely wounded; Flavianus himself was treated with such excessive violence that he died of the injuries he had received within three days; it is said that Dioscorus jumped upon him as he lay upon the ground, and that Harsumas and the monks kicked him with the utmost brutality. To the condemnation of Flavianus that of Eusebius of Doryleum was added, which ended the first session; after which the legate Hilary, dreading fresh scenes of violence, fled secretly to Rome. In the following sessions Theodoret of Tyre was deposed, also Domnus of Antioch and Ibas of Edessa; after which Dioscorus departed, and the bishops withdrew from Ephesus. Thus ended the nivo stropics, as the Greeks justly named this disgraceful assembly, in which violence and injustice were carried on to the utmost excess. — Landon, Manual of Councils, p. 236; Mansi, Concilii, vi, 588 et al.; Neander, Ch. Kirch. Theo. 1858, p. 39. See Dioscorus.

Ephal (Heb. Ephod, ἐφόδος, judge), the father of Obad and of Tachath, of the lineage of Sheeshan, of Judah (1 Chron. ii, 57). B.C. post 1618.

Ephod (ἐφόδος [rarely ἐφόδος], ἐφόδος), twice [Exod. xxviii, 8; xxxix, 5] in the fem. ἐφόδος, ἐφόδουδας, something girt; ἐφόδους, ἐφόδους, Eucl. xlv, 8], a sacred vestment originally appropriate to the high-priest [Exod. xxviii, 4], but afterwards worn by ordinary priests (1 Sam. xxii, 18), and deemed characteristic of the office (1 Sam. ii, 28; xiv, 8; Hos. iii, 4). A kind of ephod was worn by Samuel (1 Sam. ii, 18), and by David when he brought the ark to Jerusalem (2 Sam. vi, 14; 1 Chron. xv, 27); it differed from the priestly ephod in material, being made of ordinary linen (ἐφόδος), whereas the other was of fine linen (ἐφόδος); it is noticeable that the Sept. does not give ἐφόδους or ἐφόδος in the passages last quoted, but terms of more general import, στολὴ Ἰακώβ, στολὴ Ἰουδα. Attached to the ephod of the high-priest was the breast-plate with the Urim and Thummim; this was the ephod by eminence, which Abiathar carried off (1 Sam. xxiii, 6) from the tabernacle at Nob (1 Sam. xxi, 9), and which David consulted (1 Sam. xxiii, 9, xxx, 7). The importance of the ephod as the receptacle of the breast-plate led to its adoption in the idolatrous forms of worship instituted in the time of the judges (Judg. vii, 27; viii, 5; xviii, 14 sq.). The amount of gold used by Gideon in making his ephod (Judg. viii, 26) has led Gessnerius (Theaur. p. 155), after Vatke (Jüd. Theol. i, 267), following the Peshto version, to give the word the meaning of an idol-image, as though that, and not the priest, was clothed with the ephod; but there is no evidence that the idol was so invested, nor does such an idea harmonize with the general use of the ephod. Idol's wood of ore were often thus overlaid with plates of gold or silver, and are probably alluded to in Judg. xvii, 5; xviii, 17-20; Hos. iii, 4; Isa. xxx, 22. The ephod itself, however, would require a considerable amount of gold (Exod. xxviii, 8 sq.; xxxix, 2 sq.), but certainly not so large a sum as stated to have been used by Gideon; may we not therefore assume that to make an ephod implied the introduction of a new system of

worship with its various accessories, such as the grave image, which seems, from the prominence assigned

The Sacraltotal Ephod, according to Braun (De re sacr. ii, 478).

a. a. The two shoulder-pieces (ταυρησίαμα). b. b. The belt (ταινία), or two bands for girding it on. c. c. The two golden rings (ταυρησίαμα) for fastening the bottom of the breast-plate.

d. d. The two bands or settings (ταυρησίαμα; A. V. "ouches"), each with its memorial gem (ταυρησίας, "onyx stone") engraved with six of the tribal names; serving also as clasps or buttons for fastening the shoulder-pieces together, and likewise as attachments for the gold chains on the upper corners of the breast-plate.

e. e. The vacant space, a span wide (τριγόνων ταυρησίαμα στενά), left for the insertion of the girded breast-plate, according to Josephus (Ant. ii, 13, 7).
ed to it in Judges xviii, 31, to represent the Urim and Thummim, the molten image, and the Teraphim (xxvii, 4, 5), and would require a large consumption of metal? The ephod was worn over the tunic and outer garment or pallium (Exod. xxviii, 31; xxix, 5), without sleeves, and divided below the arm pits into two parts or halves, of which one was in front, covering the breast and belly, and the other behind, covering the back. These were joined above on the shoulders by clasps or buckles of gold and precious stones, and reached down to the middle of the thighs; they were also made fast by a belt around the body (Exod. xxviii, 6-12). The ancient Egyptian priests appear to have been arrayed in white garments of the same materials. The hieroglyphs, or sacred scribe, especially wore, over the kilt or apron (corresponding to the Jewish sacerdotal "breaches" or drawers) which constituted the universal undergarment, a loose upper robe with full sleeves, which in all cases was of the finest linen, and was secured by a girdle round the loins. Sometimes a priest who offered incense was clad in like manner. At other times the priests wore, in addition to the apron, a shirt with short tight sleeves, over which was thrown a loose robe, leaving the right arm exposed (Wilkinson, Ancient Egypt, i, 354). See HIGH-PRIEST.

Ancient Egyptian Tunic. One of the two obtained by Gen. Regnier, when in Egypt with the French expedition, from the Arabs at Sakkarah, who said they had found them in a hole filled with sand. This is three feet square, shaped exactly like a modern shirt, but having patches of embroidery sewed upon the arms, shoulders, down the neck, and on the corners. The material is probably linen. The seams are covered with edging, the sleeves are bound, and the hole for the neck has strings for drawing it closer (Egyptian Antiq., ii. 119). Its resemblance to the Jewish ephod is very striking, especially if, as Josephus says (ib. supra), the latter had sleeves.

Eph'phatha (ἐφ'θα, a Gracized form of the Syro-Chaldaic imperative ἐπέθανεν or ἐπέθησα, strictly ἐπέθα, meaning be opened, as it is immediately interpreted), an exclamation uttered by Christ in curing the deaf-mute (Mark vii, 34).

Ephraem Manuscript (Codex Ephraemi, usually designated as C. of the New Test.), a very important uncial palimpsest, which derives its name from having been (about the 12th century) rewritten over with a portion of the Greek works of Ephraem the Syrian (see below). It seems to have been brought from the East by Andrew John Lascar, at whose death (A.D. 1535) it passed into the hands of Cardinal Bodel, and thence, through Pietro Strozzi, into the possession of Catharine de Medicis, who deposited it in the Royal Library at Paris, where it still remains (numbered Ms. 9). The old Greek writing, which is barely legible (having been partly effaced to make room for the later matter), contains portions of the Sept. version of the N. T., on 64 leaves, and fragments (enumerated in Scrivener's Introd., p. 94 note) of every part of the N. T. on 145 leaves. It is elegantly written, very much resembling in form and arrangement of the books and general appearance the Codex Alexandrinus, and has but one column on a page, containing from 40 to 46 lines. The characters vary in size, are somewhat elaborate, and have the characteristics of the Alexandrian recension, and of the 6th century. The Ammonian sections stand in the margin, but not the Eusebian canons; the latter, perhaps, having been washed out, as they were usually in red ink. There are no chapter initials, no notes, no glosses, and but few punctuation marks. Traces of at least three later correctors may be discovered; the first, perhaps, of the 6th century, inserted many acrostics, and the rough breathing; by him or the third hand (whose changes are but few), small crosses were interpolated as stops; the second, perhaps, not earlier than the 9th century, appears to have clumsily added the ecclesiastical notes in the margin. A chemical preparation, applied to the MS. at the instance of Fleck in 1884, though it revived much that was before illegible, has defaced the vellum with stains of various color. The older writing was first noticed by Peter Allix nearly two centuries ago; various readings extracted from it were communicated by Boivin to Kuster, who published them in his edition of Mill's N. T., 1711. A complete collation of the N. T. portion was first made by Wetstein in 1716, for
Bentley's projected edition, and used by Wetstein in his own Greek Test. of 1751-2. In 1845 Tischendorf published the N.-T. part fully, and the O.T. in 1845, in a splendid and accurate form, page for page and line for line, in capital but not fac-simile letters, with valuable prolog, and ten, etc. -Tregillus, in Huc's Introd. iv, 16 sq.; Christian Remembrancer, Oct. 1862; Tischendorf, Nov. Test. Gr. 7th edit. p. cxlix sq. See MANUSCRIPTS, BIBLICAL.

**Ephraim** (Heb. *Ephra‘îm*, עֵפְרָיָם, a dual form; Gesenius signifies רְעָם, רְעָעֶד, fruitful; Sept. *Ephayyμ*, the name of a man (including the tribe and named from him, with other kindred objects), and of one or two other places of doubtful authenticity and certainly of much less note.

1. (Josephus Grecian) *Eφαραμίος, Ephraymi, Ephraym*, Ant. ii, 7, 4.) The second son of Joseph by Asenath, the daughter of Potipherah (Gen. xlii. 10), born during the seven years of plenteousness (B.C. cir. 1878), and an allusion to this is presently liable in the name, though it may also allude to Joseph's increasing family: "The name of the second he called Ephraim (i.e. double fruitfulness), for God hath caused me to be fruitful ἐφραίμιοι, in the land of my affliction" (Gen. xlii. 62).

Josephus (Ant. ii, 6, 1) gives the derivation of the name somewhat differently — "Restorer, because he was restored to the freedom of his forefathers" (אֶפְרַעְיֶם, . . . כִּבְדִּי אֱלֹהִים). That the incident in Gen. xlii. 19, as well as that of his elder brother Manassesh, is the blessing of the grandchildren by Joseph, Gen. xlviii—a passage on the age and genuineness of which the severest criticism has cast no doubt (Tuch, Genesis, p. 546; Ewald, Gesch. Isr. i, 594, note). Like his own father, nephew, son and dissimilar, Jacob's eyes were dim so that he could not see (xlviii, 10; comp. xxxvii, 7). The intention of Joseph was evidently that the right hand of Jacob should convey his ampler blessing to the head of Manassesh, his first-born, and he had so arranged the young men. But the result was otherwise ordained. Jacob had been himself a younger brother, and his words show plainly that he had not forgotten this, and that his sympathies were still with the younger of his two grand-children. He recalls the time when he was flying with the birthright from the vengeance of Esau; the day when, as the head of a day laborer who had appeared to him at "Luz in the land of Canaan," and blessed him in words which foreshadowed the name of Ephraim ("I will make thee fruitful") וֹנָא, וֹנָא, ma-pheka, Gen. xlviii, 4; "Be thou fruitful," וֹנָא, pe-reh, XXXVIII, 11; both from the same root as the name Ephraim); the still later day when the name of Ephraim (comp. Ewald, Gesch. i, 498, n.) became bound up with the very trial of his life (xlvii; xxxvii, 16). See EPHRAIMITE. Thus, notwithstanding the pre-arrangement and the reminiscence of Joseph, for the second time in that family, the younger brother was made greater than the elder—Ephraim was set before Manassesh (xlviii, 19, 20). Ephraim would appear at that time to have been about twenty-one years old (comp. Gen. xlvii, 28). Before Joseph's death Ephraim's family had reached the third generation (Gen. i, 28), and it may have been about this time that the affray mentioned in 1 Chron. vii, 21, occurred, when some of the sons were killed on a plundering expedition along the sea-coast to rob the cattle of the men of Gath, and when Ephraim named a son Beriah, to perpetuate the memory of the disaster which had fallen on his house. See BERIAH. Obscure as is the interpretation of this fragment, it enables us to catch our last glimpse of the genius, interior and admirable, in the midst of the circle of his brethren, and at last commemo rating his loss in the name of the new child, who, unknown to him, was to be the progenitor of the most illustrious of all his descendants—Jehoshua, or Joshua, the son of Nun (1 Chron. vii, 27; see Ewald, i, 491). To this early period, too, has been referred the circumstance alluded to in Psa. lxviii, 9, when the "children of Ephraim, armed bowmen ἐφραίμιοι, A. V. "being armed [and] carrying bows," which Gesenius and others support, from the Sept. and the LXX., although Ewald strongly objects ("carrying slack bows"), turned back in the day of battle." Others, however, assign this defection to the failure of the tribe (in common with the rest of the Israelites) to expel the Canaanites (Judg. i, 29).

1. TRIBE OF EPHRAIM. This tribe, although, in accordance with the ancient laws of primogeniture, inferior, so to speak, yet receives an especial honor over that descended from the elder Manassesh by virtue of the blessing of Jacob (Gen. xii, 52; xvii, 11). That blessing was an adoptive act, whereby Ephraim and his brother Manassesh were counted as sons of Jacob, in the place of their father; the object long had been, through Joseph, through his sons, a double portion in the brilliant prospects of his house. Thus the descendants of Joseph formed two of the tribes of Israel, whereas every other of Jacob's sons counted but as one. There were thus, in fact, thirteen tribes of Israel; but as Joseph's tribe is usually regarded as either by excluding that of Levi (which had no territory) when Ephraim and Manassesh are separately named, or by counting these two together as the tribe of Joseph when Levi is included in the account. The intentions of Jacob were fulfilled, and Ephraim and Manassesh were counted as tribes of Israel at the departure from Egypt, and, as such, shared, in the territorial distribution of the Promised Land (Num. i, 38; Josh. xvii, 14; 1 Chron. vii, 20). The precise position of the immediate descendants of Joseph in Egypt might form an interesting subject for investigation. Blessing the sons of one in eminent place, and through their mother connected with high families in Egypt, their condition could not at once have been identified with that of the sojourners in Goshen; and perhaps they were not fully amalgamated with the rest of their countrymen until their famous sons, who knew not Joseph.

The numbers of the tribe did not at times correspond with the promise of the blessing of Jacob. At the census in the wilderness of Sinai (Num. i, 32, 38; ii, 19) its numbers were 40,500, placing it at the head of the children of Israel. Manassesh's number being 32,900, and Benjamin's 35,400. But forty years later, on the eve of the conquest (Num. xxvi, 37), without any apparent cause, while Manassesh had advanced to 52,700, and Benjamin to 45,000, Ephraim had decreased to 32,500, the only smaller number being that of Simon, 22,200. At the period the families of both the elder brother tribes are enumerated, and Manassess has pre ce dence over Ephraim in order of mention. It is very possible that these great fluctuations in numbers may, in part at least, have been owing to the various standards under which the "mixed multitude" (נַפְּלִים, naf'ilim), i.e. mongrel population of semi-Egyptian Egyptians that followed them in the emigration host has undergone itself in its fickleness at different times (Matt. Qua rt. Hebr. April, 1863, p. 306 sq.). During the march through the wilderness the position of the sons of Joseph and Benjamin was on the west side of the tabernacle (Num. ii, 18-24), and the prince of Ephraim was Eliabah, the son of Ammihud and Nefiah.

It is at the time of the sending of the spies that we are first introduced to the great hero to whom the tribe owed much of its subsequent greatness. The representative of Ephraim on this occasion was "Osbah, the son of Nun," whose name was at the termination of the list chosen by the priestly body of the nation, most probably in form in which it is familiar to us. As among the founders of the nation Abram had acquired the name of Abraham, and Jacob of Israel, so Osbah, "help,"
became Jehoehuah or Joshua, "the help of Jehovah" (EwA, ii. 306).

According to the arrangement of the records of the book of Joshua—the "Domesday book of Palestine"—the two great tribes of Judah and Joseph (Ephraim and Manasseh) first took their inheritance; and after them the seven other tribes entered on theirs (Josh. xv, xvi, xvii, xviii, 5). The boundaries of the portion of Ephraim are given in xvi, 1-10, and a part of it apparently in duplicate in vers. 6, 7. The south boundary was coincident for part of its length with the north boundary of Benjamin (q. v.), which latter, however, is somewhat more exactly stated in Josh. xviii, 12 sq. See TRIBE. Commencing at the Jordan, at the reservoir opposite Jericho (strictly Jordan of Jericho), נְדֵד נְדֵד, an expression that would lead us to locate the boundary at the point nearest that city, did not the necessity of including within Benjamin certain other pretty well identified places compel us to carry it somewhat farther up the river), it ran to the "water of Jericho," probably the vicinity of the Ras el-Ain; thence by one of the ravines, perhaps the wady Samiah, it ascended through the wilderness—Midbar, the uncultivated waste hills—to Mount Bethel and Luz; and thence by the Ataroth, "the Japhletite," Bethoron the lower, and Gezer (q. v.) two of which are known—along the northern boundary of Dan (q. v.) to the Mediterranean, probably about Joppa. This agrees with the enumeration in 1 Chron. vii, in which Bethel is given as the eastern, and Gezer—somewhere east of the present Ramleh—as the western limit. In Josh. xvi, 6, 8, we apparently have fragments of the northern boundary (compare xvii, 10), and at least three of the points along that line (Asher, Tappuah, and Janoah) are pretty well identified (see each name), we are tolerably safe in fixing the eastern extremity on the Jordan at about the mouth of wady Fasali, and the western, or the torrent Kanah, at the modern Nahr Fails, north of Apollonia. But it is possible that there never was a very definite subdivision of the territory assigned to the two brother tribes. Such an inference, at least, may be drawn from Josh. xvi, 14-18, in which the two are represented as complaining that only one portion had been allotted to them. Among the towns named as Manasseh's were Bethshean in the Jordan valley, Endor on the slopes of the "Little Hermon," Taanach on the north side of Carmel, and Dor on the sea-coast south of the same mountain. Ephraim thus occupied the very centre of Palestine, embracing an area about 49 miles in length from E. to W., and from 6 to 25 in breadth from N. to S. It extended from the Mediterranean on the W. to the Jordan on the E.; on the N. it had the half-tribe of Manasseh, and on the S. Benjamin and Dan (Josh. xvi, 5 sq.; xviii, 7 sq.). This fine country included most of what was afterwards called Samaria, as distinguished from Judaea on the one hand, and from Galilee on the other. See SAMARIA.

The following is a list of all the Biblical localities within this tribe, with the probable modern sites; those not identified by any modern traveller are inclosed in brackets:

Central Palestine consists of an elevated district which rises from the flat ranges of the wilderness on the south of Judah, and terminates on the north with the sea on which lie the ruins of ancient Ephraim. On the west a flat strip separates it from the sea, and on the east another flat strip forms the valley of the Jordan. Of this district the northern half was occupied by the great tribe we are now considering. This was the "Har-Edom," as Ephraim, a district which seems to extend as far south as Ramah and Bethel (1 Sam. i. 1; vii. 17; 2 Chron. xiii. 4, 19, compared with xx, 8), places but a few miles north of Jerusalem, and within the limits of Benjamin. (See below.) In structure it is limestone—rounded hills separated by valleys of denudation, but much less regular and monotonous than the part more to the south, about and below Jerusalem; with "wide plains in the heart of the mountains, streams of running water, and continuous tracts of vegetation" (Stanley, *Palast.* p. 295). All travellers bear testimony to the "general growing richness" and beauty of the country in going northwards from Jerusalem, the "immunerable fountains" and streamlets, the villages more thickly scattered than anywhere in the south, the continuous corn-fields and orchards, the moist, vapory atmosphere (Martineau, p. 516; Van de Velde, i, 886-8). These are the "precious things of the earth, and the fulness thereof," which are invoked on the "ten thousands of Ephraim" and the "thousands of Manasseh" in the blessing of Moses. These it is which, while Dan, Judah, and Benjamin are personified as quarrelling and weakening their strength by their prey among the barren rocks of the south, suggested to the lawgiver, as they had done to the patriarch before him, the patient "bullock" and the "bough by the spring, whose branches ran over the wall" as fitter images for Ephraim (Gen. xxii. 22; Deut. xxxii. 17). And centuries after, when great disasters had fallen on the kingdom of Israel, the same images recur to the prophets. The "flowers" are still there in the "olive valleys," "faded" though they be (Isa. xxviii. 1). The vine is an empty, unprofitable vine, whose very abundance is evil ( Hos. viii. 12); Ephraim is still the "bullock," now "unaccustomed to the yoke," but waiting a restoration to the "pleasant places" of his former "pasture" (Jer. xxxi. 18; Hos. ix. 13; iv. 16)—"the heifer that is taught and loveth to tread out the corn," the heifer with the "beautiful neck" (Hos. xi. 1); or the "kine of Bashan on the mountain of Samaria" (Amos iv. 1).

The wealth of their possession had not the same immediately energizing effect on this tribe that it had on some of its northern brethren, e.g. Asher (q.v.). Various causes may have helped to avert this evil. 1. The central situation of Ephraim in the highway of all communications from one part of the country to another. From north to south, from Jordan to the Sea—from Galilee, or still more distant Damascus, to Phœnicia and Egypt—these roads all lay more or less through Ephraim, and the constant traffic along them must have always tended to keep the district from sinking into stagnation. 2. The position of Shechem, the original settlement of Jacob, with his well and his "parc el" gardens, 1 with the two mountains of Ebal and Gerizim, the scene of the impressive and significant ceremonial of blessing and cursing; and the tomb and patrimony of Joshua, the great hero not only of Ephraim, but of the nation—the fact that all these localities had deep in the heart of the land, must have made it almost the resort of large numbers from all parts of the country—of larger numbers than any other place, until the establishment of Jerusalem by David. Moreover, the tabernacle and the ark were deposited within its limits, at Shiloh; and the possession of the sacerdotal establishment, which was a central object of attraction to all the other tribes, must, in no small degree, have enhanced its importance, and increased its wealth and population. It is, perhaps, to this fact that David alludes in Ps. cxxxix. 6, if by "Ephraim" this tribe is there meant. 3. But there was another cause, which to some extent took the place of the former. The tribe was not extinct, though both a cause and a consequence of these advantages of this position. That spirit, early domineering and haughty (Josh. xvii. 14), though sometimes taking the form of noble remonstrance and republication (2 Chron. xxviii. 20), usually manifested as the king of the nation the seat of the arch-arch-enemy, and some entailed on the tribe advantage or premium in the same one share. Why did ye despise us that our advantage should not have been the first, the first and the last thou searest us thus that thou calledst us not?" The unsettled state of the country in general, and of the interior of Ephraim in particular (Judg. ii.), and the continual incursions of foreigners, prevented the power of the tribe from manifesting itself in a more formidable manner than by these murmurs, during the time of the Judges and the first stage of the monarchy. Samuel, though a Levite, was a native of Ramah in Mount Ephraim, and Saul belonged to a tribe closely allied to the family of Joseph, so that during the priesthood of Deion and the reign of David, Ephraim was neither as strong as the tribe that had been under the supreme influence of Ephraim may be said to have been practically maintained. Certainly in neither case had any advantage been gained by their great rival in the south. But when the great tribe of Judah produced a king in the person of David, the pride and jealousy of Ephraim was a deadly traffic. A single man, less chiefly through their means that Abner was enabled for a time to uphold the house of Saul; for there are manifest indications that by this time Ephraim influenced the views and feelings of all the other tribes. They were at length driven by the force of circumstances to acknowledge David upon conditions; and they were probably not without hope that, as the king of the nation at large, he would establish his capital in their central portion of the land. Again, the brilliant successes of David, and his wide influence and religious zeal, kept matters smooth for another period, even in the face of the blow given to both Shechem and Shiloh by the concentration of the civil and ecclesiastical capitals at Jerusalem. Twenty thousand and eight hundred of the choice warriors of the tribe, "men of name throughout the house of their father," went as far as Hazeroth to make David king over all Israel (2 Chron. xili. 30). Among the officers of his court we find more than one Ephraimites (1 Chron. xxvii. 10, 14), and the attachment of the tribe to his person seems to have been great (2 Sam. xix. 41-43). But as he not only established his court at Jerusalem, but proceeded to remove the ark thither, making his native Judah the seat both of the theocratic and civil government, the
Ephraimites, as a tribe, became thoroughly alienated, and longed to establish their own ascendency. The building of the temple at Jerusalem, and other measures of Solomon, strengthened this desire; and although the minute organization and vigor of his government produced a long period of Judah’s prosperity, the son of this train was then laid, and the reign of Solomon, splendid in appearance but oppressive to the people, developed both the circumstances of revolt and the leader who was to turn them to account. Solomon saw through the crisis, and if he could have succeeded in killing Jeroboam, their rival, he would have done (1 Kings xi. 40), the disruption might have been postponed for another century. As it was, the outbreak was deferred for a time, but the irritation was not allayed, and the insane folly of his son brought the mischief to a head. Rehoboam probably selected Shechem—the old capital of the confederacy—for his capital, in the presence and the ceremonial might make a powerful impression, but in this he failed utterly, and the tumult which followed shows how complete was the breach. "To your tents, O Israel! now see to thine own house, Dathan and Korah were certainly not the last kings of Judah who were set as far as he was within his own dominion, and he was the last who, having come so far, returned unremolded to his own capital. Jehoshaphat escaped, in a manner short of miraculous, from the trap of the battle of Ramoth-Gilead. The fate of this monarch of Canaan, the king of the Hittites, when the Jews, while the Israelites, was meant, is the word is found, in the original (Deut. v. 9); when the people, mas. (Isa. vii. 8). Thus in two senses the history of Ephraim is the history of the kingdom of Israel, since not only did the tribe become a kingdom, but the kingdom embraced little besides the tribe. This is not surprising, and quite susceptible of explanation. North of Ephraim the country appears never to have been really taken possession of by the Israelites. Whether from want of energy on their part, or great stubbornness of resistance on that of the Canaanites, it is certain it was not included in the list of the six towns from which the original inhabitants were expelled, the great majority belonging to the northern tribes, Manasseh, Asher, Issachar, and Naphtali. In addition to this original defect there is much in the physical formation and circumstances of the upper portion of Palestine to explain why these tribes never took any active part in the kingdom. They were exposed to the inroads and seductions of their surrounding heathen neighbors—on one side the luxurious Phenicians, on the other the plundering Bedouins of the desert. They were more open to the attacks of Syria and Assyria from the north, and Egypt from the south, than any part of the central plain of Edom, which communicated more or less with all the northern tribes, was the natural outlet of the no less natural high roads of the maritime plain from Egypt, and the Jordan valley for the tribes of the north, and was an admirable base of operations for an invading army. But, on the other hand, the position of Ephraim was altogether different. It was one at once of great richness and security. Her fertile plains and well-watered valleys could only be reached by a laborious ascent through steep and narrow ravines, all but impassable for an army. There is no record of any attack on the central kingdom, either from the Jordan valley or the maritime plain.
But the statements of xxviii, 24, 26, and also the expression of xviii, 4, "That thou succor us out of the city," i.e. Mahanaim, allow no escape from the conclusion that the locality was on the east side of Jordan, though it was on a considerably lower level than the site of the city of Mahanaim. The wooded country must have lain several miles away from the stream, and on the higher ground above the Jordan valley. Is it not at least equally probable that the forest derived its name from this very battle? The growth of Ephraimites though mentioned in the transactions of Absalom's revolt, cannot fail to have taken the most conspicuous part in the affair, and the reverse was a more serious one than had overtaken the tribe for a very long time, and possibly combined with other circumstances to retard materially their rising into an independent kingdom. But others suppose that it was because the Ephraimites were in the habit of bringing their flocks into this quarter for pasture; for the Jews allege that the Ephraimites received from Joshua, who was of their tribe, permission to feed their flocks in the woodlands within the territory of the tribe of Judah, that if, as this forest lay near their territories on the other side the Jordan, they were wont to drive their flocks over to feed there (see Jarchi, Kimchi, Aburabanel, etc., on 2 Sam. xviii, 6). It is probably referred to under the name Ephraim (q. v.) in Psa. cxxxix, 6, where the other margin of the verse has "fields of the wood." Others, however, not unreasonably suppose this to be a different locality. See Forest.

2. In "Baal-hazor, which is 'by' Ephraim," was Absalom's sheep farm, at which place took the murder of Amnon, one of the earliest precursors of the great revolt (2 Sam. xiii, 28). The Hebrew particle 37 rendered above "by" (A. V. "beside"), always seems to imply actual proximity, and therefore we should conclude that Ephraim was not the tribe of that name, but a town. The cities of Dan and Asher are other instances of localities beyond the tribes, yet bearing their names; and the former suggests that the appellation may in all these cases have arisen by colonization. Ewald considers this to be a genuine addition, and to refer to Beth-horon, N.W. of Jerusalem, off the Nablus road, but the indication is surely too slight for such an inference. Any force it may have is against the identity of this Ephraim with that in John x, 54, which was probably in the direction N.E. of Jerusalem, where the question appears to refer to Absalom's Galilee. Baal-hazor was situated (2 Sam. xiii, 28; also with the city called Ephraim, near the wilderness in which our Lord lived for some time (John x, 54); and with Ephraim (37, 37), a city of Benjamin, apparently not far from Bethel (Josh. xviii, 28; comp. Josephus, War, iv, 9, 5) and which has been located by Dr. Robinson (Researches, new ed. i, 447), with much accuracy at the modern village of el-Tuqubah. (See Ewald, Gesch. iii, 219, 466; v. 365; Stanley, Palestine, p. 210.) See Ephraim 8. 

Ephratah [some Ephra'oth] [Heb. Ephra'oth, 37, 37, Gen. xxxv, 16, 19; xxvii, 7 twice; Psa. cxxxvi, 6; Mic. v, 1; 1 Chron. ii, 50; iv, 4; Sept. Es'opo or Esopo, Vulg. Ephra'ta, A. V. "Ephraim" in all but Gen. and the last-named passage of Chron., where it gives "Ephrath"), a prolonged or sometimes "directive" form of Eph'ra'th (Hebrew Ephra'ath), 37, 37, probably fruitful, 1 Chron. ii, 19; Sept. Ephra'atha, Vulg. Ephra'ta), the name of a woman and of one or two places.

1. The second wife of Caleb, the son of Hezron, mother of Hur, and grandmother of Caleb the spy, according to 1 Chron. ii, 19, 50, and probably 24 [see Caleb-Ephraim], and iv, 4, in which last passage Hur is apparently called "the father (i.e. founder) of Bethlehem" (see below). B.C. post 1565.
2. The ancient name of Bethlehem in Judah, as is manifest from Gen. xxxv, 16, 10; xxviii, 7, both which passages distinctly prove that it was called Ephrath or Ephrathah in Jacob's time, and use the regular formula for adding the modern name, הבחרת, which is Bethlehem (comp. e. g. Gen. xxiii, 2; xxxv, 27; Josh. xv, 10). It cannot, therefore, have derived its name from Ephrath, the mother of Hur, as the author of Qere, Deut., xxxiii, 12, says, and that might other- wise have supposed from the connection of her descendants, Salma and Hur, with Bethlehem, which is somewhat obscurely intimated in 1 Chron. ii, 50, 51; iv, 4. It seems obvious, therefore, to infer that, on the contrary, Ephrath, the mother of Hur, was so called from the town of her birth, and that probably was the owner of the town and district; in fact, that her name was really gentillicious. But if this be so, it would indicate more communication between the Israelites in Egypt and the Canaanites than is commonly supposed. It was probably impossible that a son of Hezron may have married a woman having property in Ephrathah. Another way of accounting for the connection between Ephrath's descendants and Bethlehem, is to suppose that the elder Caleb was not really the son of Hezron, but merely referred to as the head of a Hebrew house. He may in this case have been one of an Edomish or Horite tribe, an idea which is favored by the name of his son Hur [see Caleb], and have married an Ephrathite. Caleb the spy may have been their grandson. It is singular that 'Salma, the father of Bethlehem,' should have married a Canaan- itish woman. Could she have been of the kindred of Caleb in any way? If she were, and if Salma obtained the title, a portion of Hur's inheritance, in consequence, this would account for both Hur and Salma being called 'father of Bethlehem.' Another possi- bility, however, is that Ephrathah may have been the name given to some daughter of Benjamin to commemorate the circumstance of Rachel his mother having died close to Ephrath. This would receive some support from the son of Rachel's other son Joseph being called Ephrath, a word of identical etymology, as appears from the fact that בֵּית אֵפְרְטָה means indiscriminately an Ephrathite, i. e. Bethelhemite (Ruth i, 2, 2), or an Ephrathite (1 Sam. i, 1). It would not account for Ephrathah's descendants being settled at Bethlee- m. From Ruth i, 2, where the sons of Naomi are called 'Ephrathites of Bethlehem of Judah,' it would seem that Ephrath was the name of a district of which Bethlehem was the chief town; and the designation of Mic. iv, 2 as 'Bethlehem of Ephrath' 'is ren- dered in Matt. ii, 6, 'Bethlehem in the land [yiq] of Judah,' as if to distinguish it by adding the name of a district, although a larger one (Lange, Comment. on Matt. in loc.). At all events we should note that in Gen., and perhaps in Chron., it is called Ephrath or Ephrathah; in both cases in the text, but the inhabit- ants Ephrathites; in Michah, Bethlehem Ephrathah; in Matt. Bethleem in the land of Judah. The Sept. supply [Ἐφρασά (απο ιερ Βηθλε'] its omission among the cities of Judah in Josh. xv, 60 (see Reiniec- clus, Procr, on this point, Weissenfels, 1728). Jerome, and after him Kalisch, observe that Ephrathah, fruitful, has the same meaning as Bethlehem, house of bread, a view which is favored by the neighboring corn- fields. Ver howe has written monographs entitled Tabernaculi Dei in Ephratha [Psalm cxviii] (Coburg, 1739); In hia Bethlehemi (ib. 1728); also two entitled Futa Bethlehemi (both 16 eod.). See Beth- lehem.

3. Genesis and others think that in Psa. cxxii, 6, "Ephrathah" means Ephraim (q. v.). The meaning of that passage, however, is greatly disputed. The most obvious reference is to Bethlehem, which is else- where known by that name (see above), and may here be spoken of as the residence of David at the time when he offered the sacrifice of the first born of the sacred ark (see Hengstenberg, in loc.). Others consider the name as equivalent to the tribe Ephraim (comp. Ephrathite for Ephraimite, Judg. xx, 5), which contained Shiloh, the depository of Jehovah's early favor (so Good, in loc., as most interpreters; Delitzsch, Commentar. über d. Psal- ter, ii, 265, argues at length in favor of this view).

Perhaps the best explanation is that which refers the word to Mt. Ephraim (as a special designation of that part of the tribe which contained Shiloh), in parallel- ism with the other part of the verse alluding to the Forest. (loc. cit.), however, is merely a poetical term for fruitful field, e. g. Beth-se- mesh, the latter part of the verse alluding to Kirjath-jeearim as the "wood" (יִשְׁרַי, "yair").

Eph'rathite (Heb. 'Ephrathîthê, דָּנָשָׁת, "Ephrathite"), the designation of the inhabitants of two widely different local- ities.

1. Properly Bethlehe'mite, or citizen of Ephrah (q. v.) or Bethlehem (Ruth i, 2; 1 Sam. xvii, 12; 2 Sam. xiv, 25; 2 Kings iv, 25). He is, however, a merely poetical term for fruitful field, e. g. Beth-se- mesh, the latter part of the verse alluding to Kirjath-jeearim as the "wood" (דָּנָשָׁת, "yair").

Eph'rithites (Heb. 'Ephrāthîthê'im, רומא 'Ephrāthîthê'im, "Ephrathites"), the designation of the inhabitants of two widely different local- ities.

1. Properly Bethlehe'mite, or citizen of Ephrah (q. v.) or Bethlehem (Ruth i, 2; 1 Sam. xvii, 12; 2 Sam. xiv, 25; 2 Kings iv, 25). He is, however, a merely poetical term for fruitful field, e. g. Beth-se- mesh, the latter part of the verse alluding to Kirjath-jeearim as the "wood" (דָּנָשָׁת, "yair").

Eph'rithites (Heb. 'Ephrāthîthê'im, רומא 'Ephrāthîthê'im, "Ephrathites"), the designation of the inhabitants of two widely different local- ities.

1. Properly Bethlehe'mite, or citizen of Ephrah (q. v.) or Bethlehem (Ruth i, 2; 1 Sam. xvii, 12; 2 Sam. xiv, 25; 2 Kings iv, 25). He is, however, a merely poetical term for fruitful field, e. g. Beth-se- mesh, the latter part of the verse alluding to Kirjath-jeearim as the "wood" (דָּנָשָׁת, "yair").

Eph'rah'm, or Eph'rham (Jos. i, 32). An eminent Church- father, and the greatest light of the Syrian Church, was born at Nisibis (Soran. II, E. iii, 57), and became bishop of Edessa, and flourished A.D. 370. The accounts of his early life are variant and unreliable. His parents were heathen, according to one account, and drove him from home for becoming a Christian; but, according to another account, he was bred in a Christian family. Jacob of Nisibis took care of his education, and took him to the Council of Nicea, A.D. 325. In 388 Nisibis was closed by the emperor Jovin- ian to the Persians, and Ephraem went to Edessa, whither the most distinguished Syrians came to receive his instruction. Here he lived as a hermit, only coming from his seclusion to teach and preach. His repue for piety and learning became so great that he was elected bishop; but when he heard of it he rushed forth into the market-place, and acted in such a man- ner that the people thought he was out of his senses. 'He then ascended until another had been appointed to the office of bishop in his place. He now went to Cephalis in Cappadocia to see Basilius the Great, who formed the highest opinion of his learning and piety. Ephraem spent the greater part of his life in writing and preaching on devotional and moral subjects, and especially against the Arian heresy; but he was equal- ly energetic whenever there was any occasion to show by his acts that he really was the benevolent man that he appeared to be. This was especially manifest at the time when Edessa was suffering from famine; he gave his last money to be used for such as were the richest to help the poor, and he himself undertook the care of seeing that the poor received what was intend-
He was looked up to with admiration and reverence by his contemporaries, who distinguished him by the honorable designation of 'the prophet of the Syrians.' He died about 375, having ordered in his will that no one should praise him, according to the custom of the Syrian Church, not to dignify a body should not be wrapped up in costly robes, and that no monument should be erected on his tomb" (English Cyclopedia, s. v.). This "will" of Ephrem is, however, generally held to be spurious.

All accounts unite in testifying to the virtues of Ephrem. The Acts of the Fathers, 1 (126), 19 (ed. Eccl. iii, 16) tells the following story to illustrate his command of a naturally irascible temper. After a fast, his servant, presenting some food to him, let fall the dish on which it was placed. Ephrem, seeing him overwhelmed with shame and terror, said to him, 'Take courage; as the food has not come to us, we will go to it.' Whereupon Ephrem sat down on the floor, and ate the fragments left in the broken dish.

He was a voluminous author, writing commentaries, practical religious works, sermons, and numerous poems. The only works of his that are known are in Greek, and his other writings exist only in Greek and other versions.

It is doubtful whether he understood Greek; Sozomen (I. c.) expressly says that he knew only Syriac, but that his writings "were translated into Greek during his life, and preserved much of their original force; on the other hand, they are not so additional in Greek than in Syriac." One of the legends tells that in his visit to Basil both were miraculously enabled to speak the other's language—Basil the Syriac, and Ephrem the Greek. "His commentaries extended over the whole Bible," from the book of creation to the last book. "Gracien," according to Gregory of Nyssa, says: We have his commentaries on the historical and prophetical books of the Old Testament and the book of Job in Syriac, and his commentaries on the epistles of Paul in an Armenian translation. They have been but little used thus far by commentators. He does not interpret the text from the original Hebrew, but from the old Syriac translation, the Peshito, though he refers occasionally to the original. His sermons and homilies, of which, according to Photius, he composed more than a thousand, are partly expository, partly homiletical. They are a marked contrast between the Jews, and he is especially mentioned in the Church. He evinced a considerable degree of popular eloquence; they are full of pathos, exclamations, apostrophes, antitheses, illustrations, severe rebukes, and sweet comfort, according to the subject; but also full of exag- gerations, bombast, prolixity, and the superfluities of his age; and with the exception of his "Hymn on the Virgin Mary, the saints, and relics. Some of his sermons were publicly read after the Bible lesson in many Oriental, and even Occidental churches. His hymns were intended to counteract the influence of the heretical views of Bar- desanes and his son Harmonius, which spread widely by means of popular Syriac songs. "When Ephrem perceived," says Sozomen, "that the Syrians were charmed with the elegant diction and melodious veri- fication of Harmonius, he became apprehensive lest they should lose their own opuscula, and, therefore, although he was ignorant of Greek learning, he applied himself to the study of the metres of Harmonius, and composed similar poems in accordance with the doctrines of the Church, and sacred hymns in praise of holy men. From that period the Syrians sang the "simeon" no less than three hundred and thousand verses of "Harmonius." Theodoret gives a similar account, and says that the hymns of Ephrem combined harmony and melody with piety, and suberved all the purposes of valuable and efficacious medicine against the hereti- cal hymns of Harmonius. It is reported that he wrote no less than three hundred and thousand verses. But, with the exception of his commentaries, all his Syriac works are written in verse, i.e. in lines of an equal number of syllables, and with occasional rhyme and assonance, though without regular metre (Schaff, History of the Christian Church, iii, 932 sq.)."

The best edition of his collected works is Ephremi Syri Opera omnia, Gr., Syr., et Lat., edita cum profusio- timulis, cum lectionibus, et notis historico-criticis a Greg. et P. Benedetti (Rome, 1732-46, 6 vols. fol.). Before this edition, many of his writings had been collected and translated from Greek into Latin by Gerard Voss, who published them (3) at Rome, A.D. 1598-93-97; (2) at Cologne in 1608 and 1610; and (3) at Antwerp in 1613 (2 vols. fol.). The first three contain extracts of various treatises, partly on subjects solely theologici- cal, as the priesthood, prayer, fasting, etc., with others partly theological and partly moral, as truth, anger, obedience, envy. The second volume contains many epistles and addresses to monks, and a collection of Apostles' homilies and excerpts from homilies on parts of Scripture, and characters in the Old Testament, as Elijah, Daniel, the three children, Joseph, Noah. Photius gives a list of 49 homilies of Ephrem (Cod. 196), but which of these are included in the present work is impossible to ascertain, though it is certain that many are not" (Smith, Dictionary of Biog- raphy, s. v.).

Of separate works there are numerous editions, of which lists may be found in Hoffmann, Bibliographi- sches Lexicon, ii 3 sq., and in Fabricius, Bibliotheca Græca, ed. 171, vii, 317 sqq. The only Greek writings of Ephrem were published by Thwaites (Oxford, 1769), edited from 28 MSS. in the Bodleian Library. An English translation from the Syrian by J. B. Morris (Oxford, 1847) contains 13 pieces of verse on the Nativity, 1 against the Jews, and 80 of the martyrs; in the latter, H. Burgess has published Select metrical Hymns and Homilies of Ephraem Syrus, translated from the original Syriac, with an Introducti- on, and historical and philological notes (London, 1853). In his introduction Mr. Burgess mentions, as extant in Syriac verse, 41 exegetical expositions, more than a hundred homilies, and a similar number of sermons, and nearly as many practical homiletical homilies, all in poetry; four pieces on the freedom of the will, not only in metre, but the strophes arranged in alphabetical order, like the verses of the 119th Psalm; and he assures us that all these compositions show a high degree of poetical talent, and are distinguished for their 'sonorosity and grace,' and have 'a charm which no translation can express.' Indeed, almost all the three folios of St. Ephrem's printed works in Syriac are poetical. In this volume the author gives us translations of 35 of his principal hymns, and 147 of his principal homilies or sermons. They are illustrated by a learned introduction and very instructive notes. More than half the hymns relate to death and eternity, and the others are on various topics pertaining to the Chris- tian life. The subjects of the poetical sermons are the following: (1) Paradise; (2) Satan; (3) to the clergy, (4) the Trinity, (5) matter not eternal, (6) error counterfeits truth, (7) the Trinity, (8) two natures of Christ, (9) man ignorant of himself" (Bibl. Sacra, Oct. 1853, p. 386). M. Callau published a Latin version of Ephrem's hymns (Venice, 1802), forming vols. xxiv-xii. of the Patris Selecti, in which the following order is used: 1. Commentaries; 2. Exeget- ical homilies; 3. Sermons; 4. Epistles; 5. Prayers. The writings of Ephrem in Ephrem in Armenian were published at Venice, 4 vols. 8vo. 1866. Hahn und Sieffert's Christologia Syriaca (Leips. 1850-1860) contains 19 select hymns of Ephrem; see also Hahn, Barde- sanes Gnaoticus (Leips. 1819). A German version of many of his poems is given by Zingerle, Ausg. Schriften des hl. Ephraem (Innsbr. 1830-37, 6 vols.). His funeral sermons are translated into Italian (Stori funebri di S. Ephrem Siro, tradotti per la prima volta... per il serv. pad. P. Fa- sinio, Firenze, 1831). In 1858 J. Aslebone announced a complete edition of the Syriac works of Ephrem, in a
EPHRON

The Epicurean philosophy is based on the teachings of Epicurus, who founded the school in the 4th century BC. It emphasizes the pursuit of pleasure as a primary goal and the rejection of superstition and religious beliefs. The Epicureans believed in the atomistic theory of Democritus, which posited that the universe is composed of indivisible particles, or atoms, which move in a random fashion.

The Epicurean school was established in Athens and quickly gained popularity due to its emphasis on personal freedom and the pursuit of happiness. The school was known for its emphasis on simplicity and moderation, and its members were often described as serene and content. The Epicureans believed in an afterlife, but it was not one of torment or punishment, but rather a state of peace and tranquility.

The Epicureans also developed a system of ethics that emphasized living a simple and virtuous life. They believed in the importance of friendship and the pursuit of knowledge, and their philosophy was characterized by a sense of calm and detachment.

The Epicurean philosophy had a significant influence on later philosophers, including the Stoics and the Neoplatonists. It continues to be studied and explored today, and its ideas continue to be relevant in discussions of ethics and the nature of reality.
epicurean philosophy should exclude the notion of a divine architect. This

according to natural impulse becomes therefore the aim and the duty of a philosopher.

The Physics of Epicurus were devised as a means of escape from all divine authority and superintendence. They constitute the most elaborate, coherent, and original portion of the Epicurean system. Even here, however, there was little real originality. Epicurus was a man of little learning, of little logical perspicacity; but he was actuated by a distinct purpose, and possessed of a clear rather than a penetrating mind. He diligently availed himself of everything subservient to his aims in previous systems, and worked out what ever new plans into his plausible and superficial scheme, in which consistency was little regarded, and acceptability assured by addressing the natural inclinations of men. The Physical Theory of Epicurus acquired more reputation in antiquity from its connection with theology and ethics, and from its exposition of the Cretans and their daedalians, than from any estimation in which it was held by the real students of science. The object of Epicurus was to explain, like Des Cartes, how the universe might have been formed and perpetuated without any foreign agency, though he went further than the French philosopher in rejecting even a divine agency for its first creation.

The leading lines of his physical doctrine are that matter is uncreated and indestructible. Its primitive elements are indivisible particles—atoms—which are eternal and imperishable, passing through various combinations and permutations, assuming new forms and forms according to these mutable compositions. These atoms are infinite in number, and solid, though so small as to be imperceptible by the senses. They possess gravity, and move downwards in an infinite vacuum. Their descent, however, is not in a uniform line; they are deflected by a spontaneous impulse, due to mere contingency, and come into collision, conjunction, composition with each other. Thus worlds, infinite in number, and infinitely varied in their phenomena, are formed. These atoms are in a continual state of vibration or oscillation, and from their concretions and disolutions, the condition of translucent, and disintegrating, and disintegrates, and all the multitudinous changes of inorganic and organic nature are derived. All, however, are governed by chance alone; there is no compulsion, no necessity, no external law, no decree of fate. The cause of being is not external, nor involved in the process and act of being. No room is allowed for the operation of any conscious and ordaining intelligence; the world is nothing more than the curious result of uncomprehending, undiscovering accidents. It will be observed that this theory of Epicurus differs from the doctrines of Des Cartes in little else than in ascribing a steady, downward, but variable motion to the atoms in a vacuum, while Cartesianism assigns to them a gyration movement and denies a vacuum. The difference is more obvious between this system and the recent doctrine of evolution, but the logical principle is the same—the contraction and continuation of the universe by simple elements and simple forces generated within its own sphere, and independent of external determination. It is consequently not surprising that an attempt has been very recently made to bring the Epicurean Physics into harmony with modern science, whose present tendencies are in the direction of similar irrational self-sufficiency. A like attempt was made by Gassendi more legitimately, but without any permanent acceptance, in the 17th century; and it may be confidently asserted that, in an age of infidel appetites, there will always be a revival of the Epicurean philosophy and Epicurean proclivities.

Epicurean. See HAMATH.

Ephiphanius (Ἐφηφανῖος), bishop of Constantia, one of the church fathers, was born in Palestine, near Eleutheropolis, in the early part of the 4th century (between 310 and 320). His parents are said to have been Jews, but in his sixteenth year he embraced Christianity; it is only one of the rest of them were either converts from heathenism, or born of Christian parents. He went to Egypt, and there gave himself to ascetic life among the monks; one record also says that he imbibed Gnostic errors, from which he was reclaimed by the monkish discipline. He became a friend of monasticism, and founded a monastery near

Digitzed by Google
his native village, of which he became abbot. In 367 he was elected bishop of Constantin (Salamis), the metropolis of Cyprus. Here he remained thirty-six years, busy with the duties of his episcopate, and especially busy with his pen. He devoted himself to the study of Scripture, and to the writing of Fathers, but with temperate zeal and violence. He cherished a special hatred for Origen and his doctrines, and wrote, preached, and travelled in order to destroy their Influence in the Church. This hatred led him into a quarrel with John, bishop of Jerusalem. "A report then spread abroad in Palestine and Syria and Jerusalem, and sanctioned even by John, bishop of Jerusalem, excited Epiphanius to such a pitch that he left Cyprus (A.D. 394) to investigate the matter on the spot. At Jerusalem he preached so violent a sermon against any abettors of Origen's errors, and made such evident al-

that, if it should excite a popular insurrection, he would
be regarded as responsible for the outrages that might follow. By these arguments Epiphanius was induced to relinquish his designs." About this time the empress Eudoxia sent for Epiphanius to pray for her son Constantius II. Epiphanius learned that the emperor would recover provided she would not patronize the defenders of Origen. To this message the empress answered that Epiphanius had failed to save that of his own archdeacon, who had recently died. Finally, some of the Origenists had a conversation with Ep-

him, and they accused him of saying that he had acted rashly. Soon after (Sozomen, I. c.), he embarked for Cyprus, either because he recognized the futility of his journey to Constantinople, or because, as there is reason to believe, God had revealed to him the approaching death, for he died while on his voyage back to Cyprus. It is, and in critical distress, to the bishops who had accompanied him to the place of embarkation, "I leave you the city, the palace, and the stage, for I shall shortly depart." He died at sea, on his return to Cyprus, A.D. 408. He is commemo-
rated as a saint on March 6th.

Epiphanius was "a man of earnest monastic piety, and of sincere but illiberal zeal for orthodoxy. His good nature allowed him to be easily used as an instrument for the passions of others, and his zeal was not according to knowledge. He is the patriarch of the "heresy-house." He identified himself with the monastic piety and ecclesiastical orthodoxy, and consid-
ered it the great mission of his life to pursue the hydra of heresy into all its hiding-places. His learning was extensive, but ill digested. He understood five lan-
guages—Hebrew, Syriac, Egyptian, Greek, and a little Latin. Jerome, who knew but three languages, thought he knew these far better than Epiphanius, calls him χρυ-

no display of charity; none are admitted after their departure hence, nor can we then correct what was before amiss. There Lazarus goeth not to Dives, nor Dives to Lazarus; the garners are sealed, the combat finished, the crowns distributed. Those who have not yet encountered have no more opportunity, and those who have are not sent away. (Socrates, Hist. Eccl. vi, 80, 450.)

The extant writings of Epiphanius are the following, in the order in which they are given in the edition of his works by Petavius (Paris, 1622; Leipzig, 1685; and in Migne, Patrologia Graeca, vol. xii, xiii, xili):

1. Panarion (medicinal), a treatise against heresies. It was written at the request of two monks, named Paul and Acaicus, belonging to a monastery near Berea, in Lower Syria. Prefixed to the work is a letter to these monks, which serves as a preface. The whole work is divided into three books, which are subdivided into seven or more sections. The first book contains three of these subdivisions, and each of the others two. The whole includes an account of eighty heresies, twenty of which were before Christ: 1, the Barbarians, from Adam to Noah; 2, the Sceytians, from Noah to Terah; 3, the Hebrews, all paid divine honors to the catectare, including idolatry proper, and also the philosophical arts of Stoics, Platonists, Pythagoreans, Epicureans; 4, the Samaritans, arising from a mixture of Hellenism and Judaism, and including four sects; 5, the Mandaeans (exclusively Judaism), including seven sects of the Tobiad, Sadducees, Scribes, Pharisees, Heremobaptists, Nazarenes, Essenes, and Heroldians. Of Christian heresies he names the Simonians (followers of Simon Magus), the Basilidians, and other Gnostic sects. With the sixty-fourth heresy he begins his account of the heresies of his own age, Origenism. A critical work of great ability on the information given by Epiphanius has been published by Lippsius, Zur Quellenkritik des Epiphanius. It limits itself to heresies 13 to 57, which are mostly Gnostic systems. Lippsius shows that Epiphanius, Philaster, and Pseudo-Tertullian made use of the same source, and that this source was the work of Hippolytus against 52 heresies called euvyremma, which was still known to Photius.

2. 'Aγιουργος, Ancoratus (anchored), i. q. anchor or defence of the faith, especially of the doctrine of the Trinity; so called because Epiphanius, "I have collected, according to my slender abilities, all those passages of Scripture which are calculated to establish our faith; that this book may, like the anchor of a ship, establish believers in the orthodox faith, in the midst of the agitations and tempests of heresy."

3. Panarion (Migne, xii, 285), which is a summary or abridgment of the Panarion, the order of topics being somewhat varied.

4. Pαπιπατονων κατοικιων, De Mensuris et Ponderibus (of measures and weights), in which he gives an account of the weights and measures used in Scripture, a book still useful for Biblical archaeology.

5. Περὶ τῶν αὑτόκειων, de xii gemmae quam erant in veste Aaronis (on the 12 gems which were Aaron's breast-plate).

A Commentary on the Song of Songs, under the name of Epiphanius, was published by Foggini, in a Latin version (Rome, 1750, 4to; and the same was published [in Greek and Latin], Rome, 1772, 4to), by Giacomellius, who attributes it to Philo Carpusians. See Philo.

The complete edition of Epiphanius (by Petavius and Migne) have been named above. There is a new edition by Dindorf (Leips. 5 vols. 8vo, 1869-1863.)

The Panarion is given in vols. ii, iii, of Oehler, Corpus Hseresiologicum (Berlin, 1869-1882, 5 vols. 8vo). There is a German translation of portions of Epiphanius, with notes, by Rosler (1778, 8vo). His account of the Arians and Meleitian heresies was translated into English by Whiston, in his Collection of Ancient Monuments on the Trinity (London, 1713, 8vo). A separate life of Epiphanius was published by Gervaise (Paris, 1738, 4to).

See Sozomen, Hist. Eccl. vi, 82; viii, 15; Socrates, Hist. Eccl. vi, 10, 12, 14; Dione, Eccl. Writ. ii, 324; the account of the Bollandists, in Migne, Patrol. Græc. xili; Oudin, De Script. Eccl. i, 527; Cellier, Journal des Artistes chr. sept. (1800), vol. xvi, 268. The book was finished after we have departed hence" (Harr. 59).

Epiphanius, St., bishop of Pavia, was born in that city, of a noble family, in 439 (according to others 438). He received an education for the priesthood under the special superintendence of St. Crispin, bishop of Pavia. He was consecrated subdeacon in 456, deacon in 458, and on the death of Crispin in 466, he was unanimously chosen bishop by the clergy and people. He had long been noted for his rigid asceticism, and after his election his rigor greatly increased. He took only one meal a day, abstained altogether from wine and meat, never used a bath, and was present at divine service in his feet locked together. At that time the West Roman empire was falling to pieces, a prey to the incursions of northern tribes. During these disturbances, bishop Epiphanius seems to have gained to a high degree the esteem and the confidence of all the rulers. He mediated a peace between emperor Zeno and his son-in-law Justinian. In 474 he was sent by the emperor Næsus as envoy to Ethiopia, king of the Visigoths. In 476 king Odoacer conquered Pavia, and gave the city up to plundering, on which occasion the cathedral was destroyed. Epiphanius rebuilt the cathedral, and prevailed upon the king to exempt the city for five years from all taxes. During the war between Odoacer and Theodoric, king of the Ostrogoths, he gained the confidence of both parties. Theodoric, who in 493 became the master of Italy, granted, upon the intercession of Epiphanius, an amnesty to all who had borne arms against him. Theodosius the Great (492) sent Epiphanius on an embassy to Constantine, king of the Burgundians, to treat with him for the release of the Ligurian prisoners, who were to reproach the desolate districts of Italy. The mission was successful, and Theodoric subsequently remitted to the Burgundians the two thirds of the taxes. When Epiphanius died in Pavia, Jan. 21, 497. In 962 the emperor Otho had his relics transported to Hildesheim, in Germany. The Church of Rome commemorates him as a saint on Jan. 21.—Butler, Lives of Saints, i, 191; Acta Sanctorum, Jan. 21 (biography by his successor Eunuidius); Neander, Lighri in Dark Places (New York, 1833), p. 97; Hoefer, Nouv. Biogr. Générale, xvi, 161; Herzog, Real-Encyclop. iii, 100. (A. J. S.)

Epiphanius, Scholasticus, an ecclesiastical writer of the Latin Church, lived at the beginning of the 6th century, and is supposed to have been an Italian by birth. At the request of his friend Cassiodorus (q. v.) he translated from Greek into Latin the works of the Church historians Sozomen, Sozomen, and Theodoret. Cassiodorus revised the translation, and made out of the three works one, which, under the name of Historia Tripartita, remained throughout the Middle Ages one of the standard historical works. Likewise, at the request of Cassiodorus, Epiphanius translated several other works, as the Codece Encycloides (a collection of synodal epistles to the emperor Leo I in defense of the Council of Chalcedon); a Commentary on the Song of Songs; a Commentary of Didymus on the proton Didymus, of the ennae Megist., and of the cathol. episcopi (Rome, 1760, 4to); Hoefer, Nouv. Biogr. Générale, xvi, 162; Herzog, Real-Encyclop. iv, 100.

Epiphanius (ἐπιφανία, rá ipófáina, the "man-
faction" of Christ), one of the oldest festivals of the Christian Church, and questioned as such by Clement of Alexandria (Stromat, I, 1). Until the time of Chrysostom, it opened in the Eastern Church the cyclic of festivals. It denoted at first the baptism of Christ, which he was to come to choose for his church, and with greater sense than his birth, his real manifestation to men. A special festival of the birth of Christ arose later than the festival of Epiphany, and up to that time the commemoration of the birth of Christ was included in that of Epiphany. According to the testimony of Clement of Alexandria, the festival of Epiphany was celebrated in Alexandria by the Basilidians, but soon it was introduced into the orthodox Church also. Nearer thinks that it did not originate with the Basilidians, but that they derived it from Jewish Christians in Syria and Palestine. The first trace of the festival in the Latin Church is found in 369, when, as Ammianus Marcellinus (xxi, 2) mentions, the emperor Julian took part in a celebration of the festival at Vienne. In the Western Church it came early to denote the manifestation of Christ to the Gentiles, with especial reference to his appearance to the wise men. When and how the festival was introduced into the Jewish deities of the Magi, and what the Magi were called the Magi, is unknown. The story of the journey of the Three Wise Men from the East to Bethlehem is a Christian legend, but the custom of celebrating the festival on the first Sunday after Christmas continues to this day. The festival of Epiphany is the celebration of Christ as the King of the Gentiles, and as such it is observed in the Eastern Church and in the Catholic Church of the West. The festival is celebrated on the first Sunday after Christmas, and is observed with great solemnity. The festival is a time of rejoicing and thanksgiving for the manifestation of Christ to the Gentiles, and of praying for the extension of his kingdom to all nations. The festival is also a time of repentance and preparation for the reception of the Holy Spirit at the baptism of Christ. The festival of Epiphany is one of the most important and most ancient of the Christian festivals. It is a festival of light, a festival of joy, a festival of thanksgiving, a festival of repentance, and a festival of preparation. It is a festival of the manifestation of Christ to the Gentiles, and of the reception of the Holy Spirit at the baptism of Christ. It is a festival of the extension of the kingdom of Christ to all nations, and of the reception of the Holy Spirit at the baptism of Christ. It is a festival of the manifestation of Christ to the Gentiles, and of the reception of the Holy Spirit at the baptism of Christ. It is a festival of the extension of the kingdom of Christ to all nations, and of the reception of the Holy Spirit at the baptism of Christ. It is a festival of the manifestation of Christ to the Gentiles, and of the reception of the Holy Spirit at the baptism of Christ.
then, is that apostle with whose actions we are best acquainted seemingly aware that there would be continual occasion in the Christian Church for the exercise of that authority over pastors and teachers which the apostles had derived from the Lord Jesus; and by these two examples of a delegation, given during his lifetime, preparing the way for that dispensation that authority exercised by the successors of the apostles in all ages. Accordingly, the earliest Christian writers tell us that the apostles, to prevent contention, appointed bishops and deacons; giving orders, too, that upon their death other approved men should succeed in the work they had commenced in that part of the church; that these orders constituted their first-fruits, that is, their first disciples, after they had proved them by the Spirit. Bishops and deacons of those who were to believe; and that the apostle John, who survived the rest, after returning from Patmos, the place of his banishment, went about the neighboring nations, ordaining bishops, establishing whole churches, and setting apart particular persons for the ministry, as they were pointed out to him by the Spirit" (Watson, s.v.). In substance, the high Episcopalians claim that "after the ascension of our Lord, and before the death of the apostles, the church was divided into churches, and the church into the ministry—apostles, presbyters, and deacons; and these three orders have continued ever since. The name apostle, out of respect to the memory of the inspired apostles, was changed to bishop, while the office remained the same." The view above given, however satisfactory it may be to high Episcopalians, is not adopted by the more moderate writers on that side, nor by other denominations of Christians. The following brief account, from Neander's Introduction to Coleman's Apostolical and Primitive Church, is only verbal and imperfect; but the earliest constitution of the Church was modelled, for the most part, after that religious community with which it stood in closest connection, and to which it was most assimilated—the Jewish synagogue. This, however, was so modified as to conform to the nature of the Christian community, and to the new and peculiar spirit with which it was animated. Like the synagogue, the Church was governed by an associated body of men appointed for this purpose. The name of presbyter, which was appropriated to this body, was derived from the Jewish synagogue. But in the Gentile churches formed by those who took the name of εἰσισκούς, εὐσκούς, a term more significant of their office in the language generally spoken by the members of these churches. The name presbyter denoted the dignity of their office, while bishop was expressive of the nature of their office, εἰσισκούς τήν ἱερατίαν, to take the oversight of the Church. Most certainly no other distinction originally existed between them. But, in process of time, some one, in the ordinary course of events, would gradually obtain the pre-eminence over his colleagues, and, by reason of that peculiar oversight which he exercised over the whole community, might come to be designated by the name εἰσισκούς, bishop, which was originally applied to them all indiscriminately. The constant tumults, from within and from without, which agitated the Church in the time of the apostles, may have given it in such three-cornered doings an opportunity to exercise his influence the more efficiently; so that, at such a time, the controlling influence of one in this capacity may have been very salutary to the Church. This change in the relation of the presbyters to each other was not the same in all the churches, and varied according to their different circumstances. It may have been as early as the latter part of the life of John, when he was sole survivor of the other apostles, that one, as president of this body of presbyters, was distinguished by the name εἰσισκούς, bishop. There is, however, no evidence that the apostle himself introduced this change, much less that he authorized it as a perpetual ordinance for the future. Such an ordinance is in direct opposition to the spirit of that apostle. This change in the mode of administering the government of the Church, resulting from peculiar circumstances, may have been introduced as a salutary expedient, without implying any departure from the purer principles of Christianity. But, if so, the doctrine is, as it gradually gained currency in the third century—that the bishops are by divine right the head of the Church, and invested with the government of the same; that they are the successors of the apostles, and by this succession inherit apostolical authority; that the church is divided into distinct communities in respect of the succession of that ordination which they have received merely in an outward manner, the Holy Ghost, in all time to come, must be transmitted to the Church—when this becomes the doctrine of the Church, we certainly must perceive in these assumptions a great corruption of the Christian system. It is a carnal perversion of the true idea of the Christian Church. It is a falling back into the spirit of the Jewish religion. Instead of the Christian idea of a church, based on inward principles of communion, and extending itself by means of these, it presents us with the image of one like that of the Old Testament peoples, under the external ordinances, and seeking to promote the propagation of the kingdom of God by external rites. This entire perversion of the original view of the Christian Church was itself the origin of the whole system of the Roman Catholic Church, emerging from the profanity of the Dark Ages. We hold, indeed, no controversy with that class of Episcopalians who adhere to the Episcopal system as well adapted, in their opinion, to the exigencies of their Church. But the doctrine of the absolute necessity of the Episcopal as the only legitimate form of the government of the Church, of the Episcopal succession of bishops above mentioned in order to a participation in the gifts of the Spirit, we must regard as something foreign to the true idea of the Christian Church. It is in direct conflict with the spirit of Protestantism, and is the origin, not of the true catholicism of the apostle, but of that of the Roman Church. When, therefore, Episcopalians disown, as essentially deficient in their ecclesiastical organization, other Protestant churches which evidently have the spirit of Christ, it only remains for us to protest, in the strongest terms, against their setting up these standards for the Church real they be from us, who began with Luther in the Spirit, that we should now desire to be made perfect by the flesh (Gal. iii, 9)."

Bunyan gives the following view of the original character of the Episcopacy: "The episcopate was originally the government of the church and the presiding over the congregation, with the neighboring villages, having a body of elders attached to him. Where such a council can be formed there is a complete Church—a bishopric. The elders are teachers and administrators. If an individual happen to be engaged in either of these offices more exclusively than the other, it makes no real alteration in his position, for the presbytery of the ancient Church filled both situations. Their office was literally an office, not a rank. The country clergyman were most probably members of the ecclesiastical council of the city church, and they were the most prominent. They were members of the metropolitan presbytery" (Theopolitus and his Age, iii, 246).

Professor R.D. Hitchcock (American Presbyterian Review, Jan. 1867) gives a luminous sketch of the origin and growth of the Episcopal churches. The Episcopal system was in full force in the Church before the end of the third century, he shows clearly, nevertheless, that it was not of apostolic origin, but a later growth of ecclesiastical development, as follows: (1) The best Episcopal writers now admit that the Episcopal system was not to be found in the N.T. (2) The earliest witness, outside of the N.T., is Clem-
ant of Rome (about A.D. 100), in whose Epistle to the Corinthians the words bishop and presbyter are used interchangeably. Dr. Hitchcock analyzes the letters of Ignatius (1157) both in the Syriac version of his Epistle and in the thorniugreek version. Giving every passage in which Episcopacy occurs. His conclusions are that, (1.) Admitting the substantial integrity of the texts, the strong infusion of Episcopacy in them "is best explained by supposing it to be a new thing, which Ignatius was doing, always, everywhere, its ultimate results in every- special passage according to the text, the Episcopate of the Ignatian epistles is easily understood. (2.) The Ignatian Episcopacy is not diocesan, but Congregational. Each of the churches addressed had its own bishop, presbyters, and deacons. (3.) The apostolic succession (in Ignatu- tius) is not Episcopalian, but Presbyterian. The bishop is the representative of Christ, as Christ is of the Fa- ther; the presbyters are representatives of the apos- tles, and the deacons of the precept or commandment of Christ. In short, the Ignatian Episcopacy, instead of having the supremacy of the Bishop, rules by his clergy, and is a perfect submission to the apostles. (4.) In certain cited passages he uses "bishop" and "presby- ter" interchangeably, as Clement does. This wa- tering is indicative, not of apostolic tradi- tion, but of apostolic succession growing, and not yet completed."—Tertullian (1420 ?) draws the line distinctly between clergy and laity, and discrimi- nates clearly between bishops, priests, and deacons. In Cyprian (248-256), as has been remarked above, Episcopacy is fully matured. (See Church, III, 288.)

I. A recovery of the Roman Catholic Church. (1.) The theory of the Episcopacy according to Roman writers springs from the Romish doctrine of a visible Church. "An invisible Church" (Mohler, Symbolism, § 43) "needs only an inward, purely spiritual sacrifice, and a general priesthood," but the visible Church, in its very idea, according to the Romish view, requires an external sacrifice, and the consecration of especial priests to perform it. The priest is supposed to receive the internal consecration from God through the external consecration of the Church—that is to say, he receives it through the agency of the bishops. The stability of the visible Church is supposed to require, therefore, an ecclesiastical ordination, originating with Christ, and per- petuated in uninterrupted succession; so that, as the apostles were sent forth by Christ, they, in their turn, instituted bishops, and these have appointed their suc- cessors down to our days. But, if these bishops are to form a perpetual corporation, they need a centre and head connecting them firmly together, and exer- cising jurisdiction over them, and this head is found in this Pope. The Episcopacy, with the pope at its head, is revered in the Church of Rome as a divine in- stitution.

(2.) We say "with the pope at its head," for this point is essential to the Romish idea of an Episcopacy, fure diesin. The Roman Church has been divided on this question for ages. It formed one of the chief controverses in the Council of Trent, where many of the bishops earnestly endeavored to have their office pronounced to be of divine right apart from the pope, while the papal legates strenuously, but adroitly, re- claimed this claim, and managed to prevent its authori- zation by the council. The decree of Trent on the Episcopate is as follows (s.ess. xxiii, De Reformazione, ch. iv.): "The sacred and holy synod declares that, besides the other ecclesiastical degrees, bishops, who have succeeded unto the place of the apostles, princip-

ally belong to the (this) hierarchical order; that they are placed, as the apostle says, by the Holy Ghost to rule the Church of God (Acts xx, 28); that they are superior to priests; confer the sacrament of ordina- tion; ordain the bishop, and teach. The pope (same session, Can. vi) "If any one shall say that in the Catholic Church there is not a hierarchy instituted by divine ordination, consisting of bishops, priests, and ministers, let him be anathema." And also (Can. vii), "If any one shall say that bishops are not superior to priests, or that they have not the pow- er of confirming and ordaining, etc., let him be anath- ema." Nothing is said here of the divine right of the Episcopalian pope. But, in fact, it is not even called an order at all. In chapter ii of the same session (Touch- ing the seven orders) we have priests, deacons, sub- deacons, acolytes, exorcists, readers, and door-keepers, but not a word about bishops. So far as order is con- cerned, the bishops are simply priests. The Catechism of the Council of Trent declares that the order of priest- hood, though essentially one, has different degrees of dignity and power; unity of the presbyters; 2, bishops; 3, archbishops; 4, patriarchs; and, 5, superior to all, the sovereign pontiff. The history of the stormy 22d session of the council throws great light upon these de- crees. A canon was proposed concerning "the in- stitution of bishops," and the Spanish prelates de- manded that it be decided whether the bishop was to be of divine right. This question arose, in fact, in 1546, and was before the council, in some shape or other, until 1562 (sess. xxii), when it took the precise form, "Are bishops superior to priests by divine right, and inferior to the pope only by ecclesiastical right?" The pope knew that if it should be decided that the bishops held their power directly from God, there was no ground for the doctrine that they existed only through the pope, and feared that they would ultimately assert their entire independence. The dispute ended in drop- ping altogether the canon on the "institution of bish- ops," and substituting the vague decrees and opinion above cited.

(3.) Two theories, then, of the Episcopate exist in the Roman Church: 1, the so-called Papal system, ac- cording to which the pope is the sole bishop by divine right, and all other bishops exist and are ordained by him, and derive their superiority to presbyters solely from him; 2, the Episcopalian system, which asserts an inde- pendent divine right on the part of each bishop. The former is the ultramontane view, and it is now prev- alent throughout the Church, and the latter is the moderate or Gallican view. It holds that the bishops are the rightful governors of the Church, superior to presbyters by the direct appointment of God; and maintains that the pope is, with regard to other bishops, primus inter pares, appointed for the sake of keeping up the unity of the Church as a cor- porate body. The question, in fact, turns upon that of the primacy of the see of Rome. See Primacy.

The Episcopalian system was adopted by the Gallican clergy (see Gallicanism), by the Jansenists (q. v.), and by Fosheim (q. v.). The present tendency of the entire Roman Church, however, is to the ultra- montane theory.

The Romish Episcopacy, as a whole, is diocesan. See Dioeces. The clergy of the diocese are subject to the bishop, but his authority does not extend beyond the diocese. There are, besides the Roman bishops, bishops exsistentes, bishops in partibus, bishops territoriales, etc., for which distinctions, see Bishops. The division of the Church into dioceses may be viewed as a natural consequence of the institution of the office of bishop. The authority to exercise jurisdiction, when committed to them, may not extend or extend only within limits determined by church law, but the Church, and the Church, instead of being benefited by the appointment of governors, might be exposed to the
double calamity of an overplus of them in one district, and a total deficiency of them in another. Hence we find, so early as the New Testament history, some plain indications of the rise of the diocesan system in the cases respectively of James, bishop of Jerusalem; Timothy, bishop of Ephesus; Titus, bishop of Crete; the seven churches of Asia may be added the angels or bishops of the seven churches in Asia. These were placed in cities, and had jurisdiction over the churches and inferior clergy in those cities, and probably in the country adjacent. This first diocese was formed by planting a bishop in a city or considerable village, which the official authority, in the time of Christ, doubtless, and took the spiritual charge, not only of the city itself, but the suburbs, or region lying round about it, within the verge of its [civil] jurisdiction, which seems to be the plain reason of that great and visible difference which we find in the Church of the present day, so much larger, others very small, according as the civil government of each city happened to have a larger or lesser jurisdiction" (Hook). See Bingham, *Orig. Eccl. bk. ix. ch. ii.* The bishops are named from the principal city of the diocese, as Rome, Lyons, etc. There is vigorous rising holy stem, in regard to an 12th century (see Christian Remembrancer, Jan. 1855, p. 215). While the Romish bishops are independent of each other, they are all subordinate to the pope, and must make regular returns to him of the state of their dioceses. See Bingham.

III. (1.) *The Church of England and the Protestant Episcopal Church in the United States* hold that there are three orders of ministers in the Church, bishops, priests, and deacons, and that bishops are the successors of the apostles, and superior to priests and deacons. The High-Church theory maintains the divine right of Episcopacy, and its absolute necessity to the existence of the Church; the Low-Church party deny that there is any positive command upon the subject in Scripture, or that there is anything in the standards of the Church of England which makes episcopacy necessary. The High-Churchmen maintain, and the Low-Churchmen reject the theory of the "exclusive validity of episcopal orders." See Succession.

In the preface to the Ordinal of the Church of England, and of the Protestant Episcopal Church in the United States, it is declared as "evident unto all men who live under the government of the Church, bishops, priests, and deacons." The doctrine of those churches in general is, "That there is in the Church a superior order of ministers, the successor of the apostles, who possess in their own persons the right of ordination and jurisdiction, and who are called *priests*, being the overseers not only of the people, but also of the clergy; and an inferior order of ministers, called presbyters, the literal translation of the word *presbiteros*, which is rendered in our English Bibles elders, persons who receive from the ordination of the bishop power to preach and to administer the sacraments, who are set over the people, but are themselves under the government of the bishop, and have no right to convey to others the sacred office which he gives them authority to exercise for him." This is a phrase used by Charles I, who was by no means an unlearned defender of that form of government to which he was a martyr, the presbyters are *episcopi gregis* [bishops of the flock], but the bishops are *Episcopi gregis et pastores* [bishops of the flock and of the pastors]. The liberal writers, however, in the Church of England do not contend that this form of government is made so binding in the Church as not to be departed from and varied according to circumstances. It cannot be proved, says Dr. Paley, that any form of church government was laid down by the apostles as a rule to be followed in the Jewish Scriptures, with a view of fixing a constitution for succeeding ages. The truth seems to have been, that such offices were at first erected in the Christian III. — 96 Church as the good order, the instruction, and the exigencies of the society at that time required, without any intention, at least without any declared design of regulating the appointment, authority, or the distinction of Christian ministers under future circumstances. To this same effect, all Bishop Tilley's of the apostles, is not contended that the bishops, priests, and deacons of England are at present precisely the same that bishops, presbyters, and deacons were in Asia Minor seventeen hundred years ago. We only maintain that there have always been bishops, priests, and deacons in the Church of England, which, with different powers and functions, it is allowed, in different countries and at different periods; but the genera: principles and duties which have respectively characterized these clerical orders have been essentially the same in all times, and in all places, and in all situations which they have undergone have only been such as have ever belonged to all persons in public situations, whether civil or ecclesiastical, and which are, indeed, indispensable from every thing in which mankind are concerned in this transitory and fleeting world. And many other things were this general and universal in view of the ministerial office, and to make these observations upon the clerical orders subsisting in this kingdom, for the purpose of pointing out the foundation and principles of Church authority, and of showing that our ecclesiastical establishment is as nearly conventional, conformable to the circumstances of our nation, than the practice of the primitive Church. But, though I flatter myself that I have proved episcopacy to be an apostolical institution, yet I readily acknowledge that there is no precept in the New Testament which commands that every church should be governed by bishops. No church can exist without some government; but, though there must be rules and orders for the proper discharge of the offices of public worship, though there must be fixed regulations concerning the appointment of ministers, and though a subordination among them is prescribed in the highest degree, yet it does not follow that all these things must be precisely the same in every Christian country; they may vary with the other varying circumstances of human society, with the extent of a country, the manners of its inhabitants, the nature of its civil government, and many other things which are here not specified. As it has not pleased our Almighty Father to prescribe any particular form of civil government for the security of temporal comforts to his rational creatures, so neither has he prescribed any particular form of ecclesiastical polity as absolutely necessary to the attainment of divine ends. Yet in the most explicit terms, enjoined obedience to all governors, whether civil or ecclesiastical, and whatever may be their denomination, as essential to the character of a true Christian. Thus the Gospel only lays down general precepts, and leaves the application of them to men as free agents." Bishop Tomline, however, and the High-Episcopalians of the Church of England, contend for an original distinction in the office and order of bishops and presbyters; which notion is contradicted by the founder of the Church of England, Archbishop Whitgift, who distinguished, with a phrase of the phrase, the priests were at one time, and were not two things; but both one office in the beginning of Christ's religion" (Whitton). On the inconsistency of the position of that portion of the so-called evangelical Episcopalians which holds that bishops are real successors of the apostles, see an admirable article in the *Princeton Review*, January, 1856 (art. I). (2.) The episcopacy of the Church of England is diocesan, like that of the Church of Rome, and the bishops are named from the chief city of the diocese (London, York, etc.). In New England, the churches of the same are generally coterminal with the States of the Union, and the bishops are named accordingly (Delaware, Connecticut, etc.). The larger
EPISCOPACY

states are in some instances subdivided. "In the American Church the bishops are all of equal authority, each ruling his own diocese independently of the control of an ecclesiastical superior. No bishop is amenable to any central authority." There are no archbishops; but the bishop and the presbyters are authorized. See BISHOPS, and PROTESTANT EPISCOPAL CHURCH.

IV. Methodist Episcopal Church.—(1.) The episcopacy of the Methodist Episcopal Church is believed to be "in accordance to the apostolic model" in that of the churches which maintain the apostolic succession. Its simple idea is, that certain elders are chosen from the body of the presbyters to superintend the Church, and are called bishops or superintendents, both terms being used in the Methodist ritual. The bishops, in virtue of their functions, naturally stand above the brethren. With regard to the ordinary functions of the ministry, they do not differ from other ministers; but extraordinary functions, such as ordaining, pre- sideing in assemblies, and the like, are devolved upon them by the brethren, and exercised by them exclusively and of right—right not divine, but ecclesiastical and human, founded upon the will of the body of pastors. The primitive principle that bishops and presbyters are of equal rank in the N.T. is fully recognized; nor are bishops regarded as the successors of the apostles. As functions of a presbyter are more than one pastor, it is natural and necessary that one should preside over the rest, and that "certain functions should be reserved to him." (Bunyan, Council of Trent, bk. v. ch. ii.) It is not contrary to the essence of the ministry, but rather in harmony with its mission and pastoral aims, that the providence of the Church being limited to a particular diocese, while the jurisdiction of the apostles was extended to every part of the earth, whereverover their universal vocation to convert the nations and to found churches conducted them." (Church History, i. 226, Lond. 1845.) Under the Methodist system, a bishop has a pastoral and superintendental duty to presbyters in March in New York, in May in Illinois, in July in California, in October in China, and in December in Germany.

(3.) The Methodist episcopacy was instituted by Wesley. During the Revolution, most of the clergy of the Church of England left the country. Before the war, the American preachers, like those in England, had been forbidden to administer the sacraments: the people were sent to the clergy of the Church of England for baptism and the Lord's Supper. After the Revolution, they were without the ordinances, and were likely to be disband in consequence. After duly considering the exigency, Mr. Wesley (who had previously in vain urged the bishop of London to ordain preachers for America) determined to organize the American Methodists into an independent Episcopal Church, and ordained the Rev. Thomas Coke, L.L.D., as superintendent, and Richard Whatcoat and Thomas Vasey as elders. In 1784 the Rev. Francis Asbury was ordained by Dr. Coke, and the Methodist Episcopal Church was duly organized.—the first American Episcopal Church. See Marrionn, Mr. Wesley did not pretend to ordain bishops in any other sense than according to his view of primitive episcopacy, in which, as he maintained, bishops and presbyters are the same order. The grounds of his procedure in the case are stated in his "Letter to Dr. Coke and the Methodist Preachers in the United States." (See Marrion, p. 244.) An excellent sketch of the rise of the Methodist episcopacy is given by Stevens, History of Methodism, vol. ii. V. The Unitas Fratrum (Unitas Fratrum) holds to episcopacy. Their bishops, however, are not diocesan. The history of the preservation of the episcopate is given in De Schweinitz, The Moravian Episcopate (Bethlehem, 1865). See MORAVIANS.

The High-Episcopal view is taken, as that is the position that the teachers in the Philadelphians (Philadelphia, 1866, 12mo); the moderate, in Litton, The Church of Christ (London. 1851, 8vo; Philadelphia, 1883, 8vo).

Episcopalian, members of those churches which adopt the Episcopal form of Church government. See also Episcopal Church, Methodist Episcopal Church, Moravians, Lutheran Church, England, Church of, Protestant Episcopal Church.

Episcopius. SIMON (Dutch, Bisschop), an eminent and learned Arminian theologian, was born in January, 1558, at Amsterdam, where he received his school education. In 1600 he went to the University of Leyden, where he took his degree of M. A. in 1606. He thenceforward devoted himself to the study of theology. "Earnestly," says Currerellus (in his eulogy on Episcopius), "did he listen to the lectures of those very learned professors, Francis Gomar, Luke Triccatius, and James Arminius; and in the exercises of debates and harangues, which they commonly called these, he left many of his equals far in the distance, and was highly esteemed as one worthy of being called to the ministry of the divine word. But when, especially after the death of his esteemed teacher (Triccatius) and in consequence on predestination, which afterwards agitated all Holland, finally arose, and was not only secretly carried on between the two professors, but also broke forth into open violence, our Episcopius became favorably inclined towards the Arminian doctrines. For this reason he received little favor from the pastors on the opposite side of the controversy, so that when the very illustrious councils of the state of Amsterdam, to whom the singular learning and piety of Episcopius had become known, would have invited him to become their preacher, these pastors, by causing delays, entirely frustrated the plans of the council. Episcopius, disheartened at this affair, determined to leave the academy at Leyden, and in the year 1609 (in which year Arminius died) he betook himself to the Franeker Academy, belonging to the Friari, incited especially by the great Daniel Heinsius, the celebrated professor of the sacred language, John Drusius. But there he displayed, as youths of a bold mind are wont, such a zeal in the theological discussions, that he gave not a little offence to Sibrandus Lubbertus, a professor of that academy. Accordingly, a few months after, he departed and came into France, where, in a brief space of time he obtained so fair a mastery of the French language that he not only understood it, but could speak it with considerable ease and purity. Finally, in the year 1610, he returned to his native land, only to receive the same tokens of ill will." In that year he was ordained pastor of Bleywick, a village near Rotterdam. In 1611 a colloquy was held at the Hague, on order of the States General, with a view to ending the agitating controversy between the Government and Arminians, between six Remonstrant pastors and six Contra-Remonstrants. Episcopius, as one of the six Remonstrants, displayed so much learning and skill that his fame spread through all the country. In 1612 he was appointed Professor of Theology in the University of Leyden, as successor of Gomar. Here his pre-eminent talents had full scope, and his reputation grew rapidly. The Gomarist controversy, however, waxed hotter and hotter; the orthodoxy of Episcopius was called in question by his theological opponents; and the nearly suppressed publications he renewed in the same place even went so far as to threaten violence. In 1614 he went to Amsterdam to attend a baptism, and the minister, Heyden, having stigmatized him as a heretic, he was saved from stoning only by the zeal of his friends. One blacksmith once after him with a hot iron with the cry, "Stop the Armenian disturber of the Church," and would probably have murdered him but for the interference of bystanders.

The Synod of Dort was held in 1618. See Dort. Episcopius was the chief spokesman of the Arminians. At the 24th of February, 1618, he was elected to the presbytery, and took the power, which is to be found in his Works, in Limborch's Vita Episcopii, and in Calder's Life of Episcopius (N. Y. 1837, chap. x). The Synod condemned the Arminians, and by the aid of the civil government banished the Remonstrant ministers. Episcopius retired first to Antwerp, from where he wrote his Remonstrantische Verzet van Waddingijs Januas Epistolas (1621, on the Rule of Faith and on the Worship of Images); he celebratedConsistori Padri Remonstrantium (Remonstrants' Confession of Faith, 1622; Opera, vol. iii); Annidotum, sive gemina Declarationem sent. Synodi Dordracena (Opera, vol. ii, London, 1626). When the war between the United Provinces and the Netherlands was renewed, Episcopius took refuge in France, residing chiefly in Paris (1621-1626). Here he published Paraphrase in cap. vii-x Epist. ad Romans (Paraphrase on Romans viii-xl, Opera, vol. i); Bodechusin Inscriptis (Bodechus in the Return of the Remonstrants against the charge of Socialism, Examen theism J. Copelli (on the Calvinistic and Arminian Controversy in Belgium); Tractatus de Libero Arbitrio (opera, vol. i); Correspondence with John Cameron on Grace and Free Will (Opera, vol. i). On the death of his relative Maurice (1628), the influence of the Remonstrants slackened, and it became safe for Episcopius to return to his country in 1626, when he became minister to the Remonstrants of Rotterdam. Here he published Apologia pro Confessione, etc. (Apology for the Confession of the Remonstrants), and other controversial tracts (Opera, vol. iii). In 1648 he was made rector of the newly-established college of the Remonstrants at Amsterdam, where the rest of his life was spent in diligent and successful teaching, and in constant literary and pastoral activity. The fruits of his lectures appear in permanent form in his Institutiones Theologicae lib. iv, which, however, was left unfinished, and published posthumously (Opera, vol. i); and also in Responsa ad Quæstiones Theologicae vivae (Answers to 64 questions in theology proposed by students). He died April 4, 1648.
tale for controversy was of a very high order; but his Institutes shows that he also possessed the power of clear and luminous statement to a rare degree. The theology of Epicsurus is, in substance, that of Arminius. He has been charged with Socinianism, but his writings, controversial and other, sufficiently refute this charge. He sought not only against the charge of Socinianism in general. The charge was in part due to the fact that he held the ethical side of Christianity to be the best of communion rather than the doctrinal; holding that Christianity is not so much a doctrine as a life, and that it has its dignity from its bearing on life. He was one of the great champions of the doctrine of the Trinity in England, Waterland and Bull, both wrote against Epicsurus. Waterland (Importance of the Doctrine of the Trinity, Works, Oxford, 1638, liii, 440 sq.) states that Epicsurus holds the doctrine of the Trinity, as to the main substance of it, to be certain and clear, but yet not necessary to be believed in order to salvation," and adds that the doctrine is "taught in full and strong terms in the Confession of the Remonstrants," and in other places in the works of Epicsurus. He then goes on to say, "It was not necessary to show the error and danger of the unguarded statement of Epicsurus as to its importance. Bull's Judgment of the Catholic Church on the necessity of believing that our Lord Jesus Christ is very God (Works on the Trinity, Oxford, 1605, vol. iii.), was written expressly to refute the statement of Epicsurus (f., xxvii., iv. ch. 5) that, "in the primitive churches, during at least three centuries, the belief and profession of the special divine sonship of Christ was not judged necessary to salvation." It is hardly necessary to say that Bull makes out his case. He does not, however, charge Epicsurus with doctrinal errors, bow with too great and too dangerous liberality. He states also that, "although Epicsurus was a man of unquestionable great ability, and in many respects possessed learning of no ordinary kind, yet he but little consulted or regarded, nay, he actually despised the writings of the ancient fathers and doctors." But he does not, as he says himself, refer to the writings of his authors (cf. Life of Epicsurus, N. Y., ed. p. 215). After the death of Epicsurus, Jurieu charged him with Socinianism, which gave rise to a sharp letter from Clericus (Le Clerc) refuting the charge (see Bayle, s. v. Epicsurus). There were two editions of Epicsurus, one by Calvius, who published vol. i., Amst. 1650, with a sketch of the author's life; vol. ii., edited by Poelenburg, appeared in 1666. A second edition was published under the title S. Epicsurus operis omnium theologica, cum autographo collocata, at a mendis aliquot gravissimis repara, vol. 2, 1678, 2 vols. fol.). This was also written by Philip Limborch, first in Dutch, and afterwards enlarged in Latin (Hist. Vitae S. Epicsurus, etc., Amst. 1701). There is an English version of his Labarum Ponsius under the title Psalms Labyrinthus, or a Treatise on Infallibility (Lond. 1703). See also Calvin, Commentaries on Simon Epicsurus (New York, 1887, 12mo); Hepp, in Herszeg, Real-Encyclopedia, iv. 100; a translation of Curcellus's sketch, in the Mediatorial Quarterly Review, Oct. 1865, p. 612; Nichols, Calvinism and Arminianism compared (Lond. 1824, 2 vols. 8vo); Mortimer, The Church of the Remonstrants, 1849, 8vo); Schröder, Kirchengeschichte seit d. Reform. v, 229-296; and the articles ARMINIANS; DORT; REMONSTRANTS.

Epispocopus Episcoporum, bishop of bishops, a title assumed by the popes.

Episcopus in Partibus in Infidelium, see Bishop, vol. i, p. 821, col. 2.

Eupicopus Clunensis, O. Capuchin bishop, a title of the Patriarch of Constantinople.

Epistle (epistole), something sent, as a letter). The use of written letters implies, of course, considerable progress in the development of civilized life. There must be a recognised system of notation, phonic or symbolic; men must be taught to write, and have writing materials at hand. In the early nomadic stages of society accordingly, like those which mark the period of the patriarchs of the O.T., we find no traces of any but oral communications. In the Homeric age, where epic poetry was maintained, the written words were hieroglyphical letters is not unknown (Uli, vi). Messengers were sent instructed what to say from Jacob to Esau (Gen. xxxii, 8), from Balak to Balaam (Num. xxii, 5, 7, 16), bringing back in like manner a verbal, not a written answer (Num. xxiv, 12). See MESSENGER. The negations between the prophets and the king of the Ammonites (Judg. xi, 12, 13) were conducted in the same way. It was still the received practice in the time of Saul (1 Sam, xi, 7, 9). The reign of David, bringing the Israelites, as it did, into contact with the higher civilization of the Phoenicians, witnessed a change in this respect also. See AMABASADOR. The first recorded letter (אֶפֶֽסֶת = "book"; comp. use of בִּבְלָו, Herod. i, 123) in the history of the O.T. was that which "David wrote to Joab, and sent by the hand of Uriah" (2 Sam. xi, 14), and this must obviously, like the letters that came into another history of crime (in this case also in traceable connection with Phoenician influence, 1 Kings xxii, 8, 9), have been written with the king's seal, with the guarantee of their authority, and a safeguard against their being read by any but the persons to whom they were addressed. The material used for the impression of the seal was probably the "clay" of the robe xx, 13). The act of sending a letter, however, pre-eminently, if not exclusively, a kingship, where authority and secrecy were necessary. Hence they contained simply royal commands, and nothing is said of salutation or even address in connection with them. Joab, on the other hand, answers the letter of Absalom with the words, "he writes, as he will send him a letter, and receives a verbal message in return. The demand of Benhadad and Ahab's answer to it are conveyed in the same way (1 Kings xx, 2, 5). Jehu wrote letters, and sent them to Samaria to authorities, respecting Ahab's children, the form of which, or of the one transcribed, is the first instance in the Bible of anything like a formula. It begins, "Now as soon as this letter cometh to you," but ends without any like phrase. It was apparently replied to by a message, and Jehu wrote another letter, which, as given, has not the same peculiar character. That Jehu, who, though perhaps well born, was a rough soldier, should be a writer—and there is no ground for supposing that he used a scribe, but, from the extremely characteristic style, rather evidence against such an idea—indicates that letter-writing was then common (2 Kings x, 1-7). In this case secrecy may have been thought desirable, but the importance of the matter would have been a sufficient reason for writing. Written communications, however, become more frequent in the later history. The letter which the king of Syria, Benhadad, sent by Naaman to Jehoram, king of Israel, though to a sovereign with whom the writer was at peace, is in the same peremptory style, with no salutation (2 Kings v, 6, 6), from which we may conjecture that only the principal contents are given in this and like instances. The "writing" (טועב) to Jehoram, king of Judah, from Eliah (q. v.) must have been a written prophecy rather than a letter (2 Chron. xxii, 12-18); though it must be observed that such prophecies which are addressed to persons of high rank are of that character. Hezekiah, when he summoned the whole nation to keep the Passover, sent letters "from the king and his princes," as had been determined at a council held at Jerusalem by the king, the princes, and all the congregation. The contents of these letters are given, or the substance. The form is that of an exhortation, without, however, address. The
character is that of a religious proclamation (2 Chron. xxx, 1-9). Hezekiah, in fact, introduced a system of couriers like that afterwards so fully organized under the Persian kings (comp. Herod. vii, 38, and Esth. viii, 10, 14). The letter or letters of Sennacherib to Hezekiah have been wrongly supposed to have been written to his messengers, which were given to Hezekiah to show him that they had their master's authority. It is to be observed that the messengers were commanded, "Thus shall ye speak to Hezekiah," and that Hezekiah "received the letter" from them. What he received was probably a roll of parchments, as that which Jeroboam burnt seems to have been (Jer. xxxvi, 29), for when he took it to the Temple he "spread it before the Lord" (2 Kings xix, 9-14; Isa. xxxvi, 9-14; comp. 2 Chron. xxxii, 17). It does not appear to have been usual for the prophets to write letters. Generally they seem, when they did not go themselves to those whom they would address, either to have sent a messenger, or to have publicly proclaimed what they were commissioned to say, knowing that the report of it would be carried to those whom it specially concerned.

When we find naming of one of the people of Judah, we read how Jeremiah addressed them by a letter, which is a written exhortation and prophecy (xxix, 1-23). It can scarcely be said that here we perceive a positive distinction between the later prophets and the earlier, for Elijah sent a letter or "writing" to Jehoram, King of Israel, as already noticed. The distance of Babylonia from Jerusalem, and of Jerusalem from the kingdom which was the scene of Elijah's ministry, seems to afford the true explanation. That letters were not uncommon between the captives at Babylonia and those who remained at Jerusalem before it was destroyed, appears probable from the mention of letters to Zephaniah the priest, and to others from a false prophet Shemariah, at Babylon, in contradiction of Jeremiah's letter (24-29). Jeremiah was commanded to send to the captives in Babylon a confession of this man, and it is therefore probable that at least three letters passed on this occasion. Though with the little evidence we have we cannot speak positively, it seems as if the custom of letter-writing had become more common by degrees, although there is no ground for inferring any change in its character. Still we find naming of an address or signature. The letter seems to be always a document, generally a message written for greater security or to have full authority, and was probably rolled, tied up, and sealed with the writer's seal. See Letter.

Although no Hebrew letters are preserved of the time before David, it might be supposed that the form might have been derived from Egypt. We have papyri containing copies by Egyptian scribes of the kings of the Ramesses family about the 18th century B.C., of letters of their own correspondence. These show a regular epistolary style, the conventionalism of which at once removes us from all ideas of Semitic literature. There is an air of the monuments about it that strikes us in the descriptive character of certain of the formulas. Some letters, from a superior to an inferior, commence in the manner shown in the following example: "The chief librarian Amem-em-an, of the royal white house, says to the scribe Penta-en, Whereas, this letter is brought to you, saying—communication." A usual ending of such letters is, "Do thou consider this." Some begin with the words "Communication." The fuller form also seems to be an abbreviation. An inferior scribe, addressing his superior, thus begins: "The scribe Penta-en salutes your lord, the chief librarian, Amem-em-an, of the royal white house. This comes to inform my lord. Again I salute your lord. Whereas I learn to have been the commands imposed upon me by your lord, well and truly, completely and thoroughly? I have done no wrong. Again I salute your lord." He ends, "Behold, this message is to inform my lord." A more easy style is seen in a letter of a son to his father, which begins, "The scribe Amen-mesu salutes [his] father, captain of bowmen, Bek-en-phant," and ends "Farewell." A military officer writing to another, and a scribe writing to a militiaman, is very frequent; the latter saults the former, asks a prayer for the king before the formula "Communication." A royal or government letter is a mere written decree, without any formal introduction, and ending with an injunction to obey it. The contents of these letters are always addressed to the persons written to, the writer using the first person singular. The subject-matter is various, and perhaps gives us a better idea of the literary ability of the Egyptians, and their lively national character, than any other of their compositions (see Goodwin on the "Horaiie Papyri," in the Cambridge Essays, 1855, p. 226 sq.). Indeed in Egypt everything of importance was committed to writing (Wilkinson, Anc. Eg., ii, 176, alridg.,) and the monuments constantly depict scribes taking an inventory or check of all sorts of operations. See Egypt.

In the books of Scripture written after the return from Babylon, mention is made of letters of the enemies of the Jews to the kings of Persia, and of the kings to these persons, the Jews, or their officers, some of which are given. These are in an official style, with a greeting, and sometimes an address. The letter to Artaxerxes contains the form, "Be it known unto the king," "Be it known unto the king" ( Ezra iv, 11-16); and his answer thus begins, "Peace [or "welfare"], and so forth" (17-22), the expression "and so forth" occurring elsewhere in such a manner that it seems to be used by the transcriber for brevity's sake (10, 11; vii, 12). It must, therefore, not be compared to the common modern Arabic formula of commencement. After the [usual] salutations. The letter of the opponents of the Jews to Darius (Hystaspis) thus begins: "Unto Darius the king, all peace. Be it known unto the king" (6-17). The letter of Artaxerxes (Chosroes) to Ezra is a written decree, and not an ordinary letter, save in form (vii, 11, 26). Nehemiah asked for, and was granted, letters from the same king to the governors and the keeper of the king's forest (Neh, ii, 7, 9). When he was rebuilding Jerusalem, Sanballat sent him "an open letter" by his servant, repeating an invented rumor of the Jews' intention to rebel (vi, 5, 7): no doubt it was not sealed purposely, either in order that the rumor should be so spread as if by accident, or to show disrespect. At this time many letters passed between the nobles of Judah and Tobiah, and letter-writing seems to have been common (17; see also 19). In Esther we read of exactly the same custom as that spoken of in the case of Jezebel's letter, the authority
of writings with the king's name and seal, even if not written by him. It is related that Ahasuerus "took his signet to the north and gave it to Haman," who composed letters to be written containing a mandate: "In the name of king Ahasuerus was it written, and sealed with the king's signet" (Esth. iii. 10, 12, 18). In like manner, the same authority was given to Esther and Mordecai, and it is remarked, "For the writing which is written in the name of the king and signed with the king's signet, may not be revealed" (viii. 7, 8).

The influence of Persian, and yet more, perhaps, that of Greek civilization, led to the more frequent use of letters as a means of intercourse. Whatever doubts may be entertained as to the genuineness of the epistles of Esther and Mordecai, of James (i. 30; xii, 6, 30; xv, 1, 16; 2 Macc. xi. 16, 34), indicates that they were recognised as having altogether superseded the older plan of messages orally delivered. See LETTER.

The two stages of the history of the N.T. present in this respect a very striking contrast. The list of the canonical books shows how largely epistles were used in the expansion and organization of the Church. Those which have survived may be regarded as the representatives of many others that are lost. We are perhaps entitled to the belief that the absence of all mention of written letters from the Gospel history is just as noticeable. With the exception of the spurious letter to Abgarus (q. v.) of Edessa (Euseb. H. E., i. 18) there are no epistles of Jesus. The explanation of this is to be found partly in the circumstance of one who, known as the "carpenter's son," was training as his disciples those who, like himself, belonged to the class of laborers and peasants, partly in the fact that it was by personal rather than by written teaching that the work of the prophetic office, which he represented and perfected, was to be accomplished. See JESUS CHRIST.

In the Acts of the Apostles we have the short epistle addressed by the apostolic council held at Jerusalem to the Gentile converts in Antioch, Syria, and Cilicia (Acts xv. 23-24). There is also a letter from Claudius Lysias to Felix, which may be supposed to preserve the official style of the provinces. Both use the common Greek formulas, beginning, after the names of the writer and the person written to, with the salutation, and ending with the adieu. The epistles of the N.T. in their outward form as such might be expected from men who were brought into contact with the Roman civil and literary life and, of course, themselves belonging to a different race, and so reproducing the imported style with only partial accuracy. They begin (the Epistle to the Hebrews and 1 John excepted) with the names of the writer, and those to whom the epistle is addressed, putting the name of the writer first. In the case of salutation (analogous to the ἀγαθὰς ἱεράς ἑορτὰς of Greek, the S., S. D., or S. D. M., salutem, salutem dicit, salutem dici multam, of Latin correspondence)—generally in Paul's Epistles in some combination of the words "grace, mercy, and peace" (χάριν, ἀγάπην, εἰρήνην); in others, as in Acts xx, 23; James i, 1, with the closer equivalent of χάριν, "greeting," which last is never used by Paul. Then the letter itself commences in the first person, the singular and plural being used, as in the letters of Cicero, indiscriminately (comp. 1 Cor. i. 2; 2 Cor. i. 8, 15; 1 Thess. iii, 1, 2; and passim).

When the individual Epistles have been answered, questions answered, truths enforced, there come the individual messages, characteristic, in Paul's Epistles especially, of one who never allowed his personal affections to be swallowed up in the greatness of his work. They are all marked by a propriety modified by the fact that the letters were dictated to an amanuensis. When he had done his work, the apostle took up the pen o reed, and added, in his own large characters (Gal. vi, 11), the authenticating autograph, sometimes with special stress on the fact that this was his writing (1 Cor. xvi, 21; Gal. vi, 11; Col. iv, 18; 2 Thess. iii, 17), always with one of the closing formulae of salutation, "Grace be with thee"—the grace of our Lord Jesus Christ be with you.—In one instance, Rom. xvi, 22, the amanuensis in his own name adds his salutation. In the "farewell" (βαφτιστὶ of Acts xxiii, 38; βαφτιστὶ of Acts xv, 29) we have the equivalents to the sake, sále, which formed the customary conclusion of Roman letters. It need hardly be said that the fact that Paul used an amanuensis in this way accounts for many of their most striking peculiarities, the frequent digressions, the long parentheses, the vehemence and energy as of a man who is speaking strongly as his feelings prompt him rather than writing calmly. An allusion in 2 Cor. i, 9 brings before us the class of these letters which had been in frequent use in the early ages of the Christian Church, the ἱερατικὰ ὑπομνήματα, or letters of recommendation, by which travellers or teachers were commended by one church to the good offices of the others (there may be a reference to Apollo in Acts xvi, 27). Thus did it come to the Church of Corinth relying on these. Paul appeals to his converts as Christ's epistle (ἵππος τοῦ Χριστοῦ, 2 Cor. iii, 3), written, "not with ink, but with the spirit of the living God." For other particulars as to the matters and implements used for epistles, see WARRING.

EPISTLES, APOSTOLICAL. All the revelations of God to mankind rest upon history. Therefore in the Old, as well as in the New Testament, the history of the deeds of God stands first, as being the basis of holy instruction, and the developments of the theories of the prophets. In the case of the New Testament the themes of the apostles are the contents of the times of the New Testament; and at the conclusion of the New Testament stands its only prophetic book, the Revelation of John.

1. THE PAULINE epistles are thirteen in number, or fourteen, if we add to them the epistle to the Hebrews. Three of these are distinctly styled the Pastoral Epistles, namely, those to Timothy and Titus, as being chiefly on the duties of the pastors. Up to our days the genuineness of the first thirteen epistles of Paul has almost unanimously been recognized in Germany, with the exception only of the pastoral epistles, and more especially those to Titus and Philemon. It is less that the emendations and Beuer have attacked the genuineness of all the three pastoral epistles, and Schleiermacher that of the first epistle to Timothy. Indeed, the very peculiar character of the Pauline epistles is so striking to any reader, that it is hard to imagine that any one could read these epistles of Paul and fail to believe the personal character of the apostle may be most beautifully traced in his epistle to the Philippian and in that to Philemon. (On many peculiarities of the Pauline epistles, see Laurent, New Testament Studies, Gotha, 1886.) See PAUL.

All Pauline writings, except the one to the Romans, were called forth by circumstances and particular occasions in the affairs of the communities to which they were addressed. It is believed that all the apostolical epistles of Paul have been preserved; for the inference from 2 Cor. v. 9, 10 here can not be made out as the manuscripts. Eissfeldt in this case has been lost, but not warranted by the language and circumstances. See CORINTHIANS, FIRST EPISTLE TO. From Col. iv, 16, it has also been concluded—though probably erroneously, since there perhaps the letter to the Ephesians is referred to—that another letter to the community of Laodicea has like-
wise been lost. See Laodiceans, Epistles to and from. Presse of business usually compelled Paul—
as was, besides, not uncommon in those times—to use his companions as amanuenses. He mentions (Gal. vi, 3) that some private complaints that he had written this letter with his own hand. This circumstance may greatly have favored the temptation to forge letters in his name, because, since the period of Alexanderine literature, it was not unusual to indite spurious books, as is evident from Eusebius (Hist. Eccles. p. 23); and, accordingly, Eusebius has made complaints about the falsification of their letters. Paul alludes to this (2 Thess. ii, 2), and therefore writes the greeting (2 Thess. iii, 17) with his own hand. Paul himself exhorted the communities mutually to impart to each other his letters to that end, and read them aloud in their assemblies (Col. iv, 16). It is therefore probable that copies of these letters had been early made by the several communities, and deposited in the form of collections. So long, therefore, as the various communities transmitted the manuscripts to each other, no other letters, it is obvious, could controul or extinguish collections than to whose genuineness the communities to whom they were originally addressed bore witness. Even Peter (2 Pet. iii, 16) seems to have had before him a number of Paul's letters, as, about forty years later, a number of letters of Ignatius were transmitted by Polycarp to Sardis. Indeed, Paul's letter addressed to him directed them to him (Ep. Polyc. sub. fin.; Eus. Hist. Eccles. iii, 56). The Pauline collection, in contradiction to the Gospels, passed by the name of ἀπ' εὐαγγελον, or "The Apostle." The letters of Paul may be chronologically arranged as those written before his first Roman imprisonment, those written during it, and those written after it: thus, (a), beginning with his first letter to the Thessalonians, and concluding with that to the Romans, embracing an interval of about six years (A.D. 49-55); (b) Ephesians, Philippians, Colossians, and Philemon, about two years (A.D. 57-59); and (c), his letter to Titus and his second to Timothy, about two years (A.D. 63-64). See Acts (of the Apocalypse). In our Bibles, however, the letters are arranged according to the pre-eminent parts and stations of the communities to whom they were addressed, and conclude with the epistles to the two bishops and a private letter to Philudem. (See each in its proper place.)

That these epistles offered great difficulties was already felt in the earliest times (2 Peter iii, 16). In the Roman Church their true understanding was more particularly lost in the 12th century. It is understood by the law only the opus operatum of the ceremonial law; consequently the Roman Church could not comprehend justification by faith, and taught instead justification by works. As soon, therefore, as the true understanding of these epistles dawned upon Luther, his breach with the Roman Church was decided. See Justification.

2. The Catholic epistles. There is, in the first instance, a diversity of opinion respecting their name: some refer it to their writers (letters from all the other apostles who had entered the stage of authorship along with Paul); some, again, to their contents (letters of no special, but general Christian tenor); others, again, to the recipients (letters addressed to no community in particular). None of these views, however, is free from difficulties. The first and the second views—and more, indeed, as something of a circumstance to harmonize with the idiomatic expressions in the extant pages of the ancient writers; the second is, besides, contradicted by the fact that the letter of James is of a special tenor, while, on the contrary, that to the Romans is, as it were, a general letter as to that he had written "Catholic" or ἤλθεν τῇ ἁγ. (v.) in that sense. The third opinion is most delicately justified by passages from the ancient writers (Euseb. Hist. Eccles. v. 18; Clem. Alex. Strom. iv, 15, ed. Potter, p. 606; Orig. cf. Col. i, 63).

The Pauline epistles all had their particular directions, while the letters of Peter, James, John, and Jude were circular epistles. The epistles 2 and 3 John were subsequently added, and included on account of their shortness, and to this collection was given the name Catholic Letters, in contradiction to the Pauline, which were addressed to particular churches or individuals. The dates of nearly all of them are later than those of Paul, but their precise time is uncertain. See each in its order; also under Acts (or the Apostolic History) and Hebrews (q. v.).

3. Literature.—Besides the general Introductions (q. v.) to the N.T., or parts of it, and the Prolegomena in most modern commentaries on each epistle, there is a wide range of general discussion relating to them which cannot be here profitably reviewed. Special treatises only can be enumerated, and even those not exhaustively. On the autograph letters there are monographs in Latin by Ratzebus (Hannov. 1752) and Stoech (Guelph. 1751); on ecclesiastical letters in general, and their various descriptions, by Berg (Jen. 1666), Bucchin (Taurin. 1720), Breckel (Hafn. 1711-1712), Friederici (Gotha, 1754), Kleising (Lips. 1744), Muller (Stad. 1862), Peszold (Lips. 1868), Schmid (Helmt. 1718), Spies (Altorf. 1745); also Dodwell (Discert. Cyriq. Vox. 1864, p. 17 sqq.); Cassabrius (Not. Concil. Lugd. 1870, p. 275 sqq.); introductory in general, by Braun (Selecta Philol. Lugd. 1811-1812), Kiepert (Ueber den Apostol. 1799), Kohler (Germ. Lips. 1830); and of the catholic epistles specially, by Storr (Tub. 1789), Tiegel (Rost. 1807), Stãddker (Gott. 1790).

Special Commentaries on all the epistles of the N.T. are the following, or the works of which the latter are denoted by an asterisk (*): Casselendor: Compendium (ed. Chandler. Lond. 1722, 12mo); Card. Cajetan, Enarratio (Ven. 1581, Par. 1589, 1587, 1546, Antw. 1611, fol.; Paris, 1540, Lugd. 1566, 1549, Paris, 1501, 1505, 8vo; also in Opp. v.); Tittelmann, Erklärung (Antw. 1545, 8vo); Schottius, Erklärung (Lips. 1547, Lugd. 1558, 12mo); Bullinger, Commentarius (Tigur. 1587, 1549, 1558, 1582, 1863, 1803, fol.); Pellican, Commentarius (Tigurini, 1589, fol.); Gagnonius, Schölia (Par. 1543, 1547, 1550, 1663, 1629, 1838, 8vo); Politus (or Catharinius), Commentarius (Rom. 1546, Ven. 1551, Par. 1564, fol.; Bredy, Commentarius (Gotha, 1755, 12mo, fol.); Buonricci, Parâfrasi (Ven. 1665, 4to); Bexa, Erklärung (Genev. 1565, 1570, 8vo); Hemming, Commentarius (Lips. 1572, Vittemb. 1576, Fret. 1579, Argent. 1589, fol.); Arias Montanus, Erklärung (Antw. 1568, 8vo); Guazzoni, Hervisitulite (Tigur. 1597, 8vo); Eyrthomius, Erklärung (Gos. 1605, 8vo, 4 vols. 4to); *Lucins, Erklärungen (on nearly all the epistles) (Rost. 1610, 4to); *Esa, Commentarius (Duoci, 1614-6, Colon. 1631, Paris, 1638, 1640, 1658, 1660, 1667, 1679, fol.); Vorstius, Commentarius (on most of the epistles) (Amst. and Herder. 1631, 4to); Fabrichius, Acalypha (in Catenara, Lips. 1634, 1639, fol.); Gomarus, Erklärung (in Opp. 1644, fol.); Dickson, Commentarius (Glasg. 1645, 4to; in English, Lond. 1659, fol.); Trapp, Commentarius (Lond. 1647, 4to); Godeau, Paraphrases (Par. 1651, 6 vols. 1659, 1675, Lyons, 1663, 8 vols. 12mo); Vayron, Commentarius (Lov. 1658, Paris, 1674, fol.); Anon. Verklärung (Amst. 1679, 4to); *Whitby, Commentarius (London, 1700, fol., and since with others); Huhn, Commentarius (Yittemb. 1707, fol.); Joel Alexander, Commentarius (Rothm. 1710, 2 vols. 4to); Pyle, Paraphrases (London. 1725, 8vo); *Halle, 1726, 8vo; *Loed Pioneer, and Benson, Paraphrase (published separately, London, 1733-52, 3 vols. 4to; upon the same plan, and together forming a commentary on all the epistles); Dale, Analysis (London, 1737, 2 vols. 8vo); Weitenauer, Erklärung, etc. (Aug. Vind. 1747, 4to); *Leblanc, Erklärung (Leipzig, 1782-9, 3 vols. 8vo); Nibbit, Illustration (Lond. 1787, 1789; in Germ., Nürnberg, 1790, 8vo); Bahrdt, Erklärung (Berlin, 1787-9, 3 vols. 8vo); Prizovicus, Copitiation.
EPISTLES OF BARNABAS

(3:18, 19) Consequences of apostasy:
1. The apostate becomes an enemy of God and man.
2. He spreads false teaching and leads others astray.
3. His influence weakens the church and the spread of the gospel.

EPISTLES, SPURIOUS

(3:18, 19) The apostate's role in spreading heresy:
1. He distorts doctrine to fit his own agenda.
2. His teachings are characterized by a lack of respect for the authority of the apostles and the writings of Scripture.
3. The resulting confusion and division among believers can lead to spiritual harm.

EPISTLES OF BARNABAS

(3:18, 19) Barnabas's purpose:
1. To warn against false teaching and the dangers it poses to true doctrine.
2. To encourage a return to the simplicity and purity of the early church's faith.
3. To foster a spirit of unity and love among believers despite the challenges of heresy.

EPISTLES, SPURIOUS

(3:18, 19) The influence of false teaching:
1. It can erode the foundations of true faith.
2. It undermines the credibility of the church.
3. It can lead to moral and spiritual decay among believers.
It seems certain that those now extant are the same which were known to Jerome and Augustine. The genuineness of these letters has been maintained by some learned men, but by far the greater number rejects them as forgeries. Jerome conceives them to be a forgery of the fourth century, founded on Philip. iv. 22. Indeed, there are few persons mentioned in the New Testament as companions of the apostle who have not had some spurious piece or other fathered on them. See SEXTUS.

As among the apocryphal letters now universally rejected are the well-known Epistle of Leontius to the Roman senate, giving a description of the person of Christ (Ortodoxographia, p. 2, Basil. 1655; Fabricii Cod. Epigraphi, 1710), and some pretended epistles of the Virgin Mary. One of those is said to be written in Hebrew, and addressed to the Christians of Messina in Sicily, of which a Latin translation has been published, and its genuineness strongly vindicated (Veritas Vindicata, 1892, fol.). It is dated from Jerusalem, in the 4th year "of our Son," none of July, Lxxxv 17, Ferra quinque. The metropolitan church of our Lord of the Letter, at Messina, takes its name from the possession of this celebrated epistle, of which some have pretended that even the autograph still exists. An epistle of the Virgin to the Florentines has been also celebrated, and there is extant a pretended letter from the same to St. Ignatius. None of these, however, has received any general acceptance as genuine. In like manner, three of these spurious letters, see Fabricii, Cod. Apocryph. N. T. iv. 492. See JESUS CHRIST.

For other spurious epistles, see APOCRYPHA.

Epistola. When the ancient Christians were about to travel into a foreign country, they took with them letters of credence from their own bishop, in order that they might communicate with another church. These letters were of three kinds: first, the epistola communicatoria, given to persons of quality, or persons whose reputation had been called in question, or to the clergy who had occasion to travel into foreign countries; secondly, the epistola dicionaria, such as were given by the bishops to the clergy when removing from one diocese to another. All these were called epistola formatae, because they were written in a peculiar form, with certain marks, which served to distinguish them from counterfeits. — Farrar, Eccles. Dictionary, a. v.; Bingham, Orig. Eccl. bk. ii, ch. iv.

Epistola Obscurorum Virorum (Epistles of obscuri viri, Men), a celebrated collection of letters by anonymous persons, among them the one known as Prisca Euphrasii, and the Church of Rome in general, were castigated with pungent satire. The special occasion for the publication of these epistles was a bitter controversy between the learned Reuchlin (q. v.) on the one hand, and a converted Jew named Pfeifferkorn, and the Dominicans of Cologne (headed by Hochstraten [q. v.]), the inquisitor, and by Prior Ortuinus Gratius) on the other. The latter advocated the expulsion of all Jews from Germany, the burning of their books, and the forcible education of their children in the Christian religion. Reuchlin, being asked for his opinion, advised that only the writings of the Jews against Christianity should be burned. The bishop of Spires declared in favor of Reuchlin. Pope Leo X, who personally cared more about the friendship of the Humanists than about the Church, but who, as pope, dared not withstand the皇帝 (the emperor). The Humanists now organized themselves everywhere into a league, and flooded Germany with books against the fanatical monks. Among these books, the Epistola Obscurorum Virorum are the most celebrated. They survive in the following forms:

1. The type, which were of very poor quality, and abound in abbreviations, were a studious imitation of those used by Quintilius of Cologne, the publisher of Pfeifferkorn and the Dominicans. The name of Al-
three last-named editions. See, besides the authors already cited, Herzel, Real-Encyklop. iv, 111; Wetzer u. Weis, Kirchen-Lex. iii, 633.

Epistole Præstantium Víorum, a valuable collection of letters illustrating the history of the Ar-

menians and Nogarmans. See Præstantiarum

Státum ac Eruditorum Víorum Epistole Ecclesiásticas et

Theològicas varii argumenti, inter quos eminent or, quas o

Grotio, Casp. Barloso, conscripta sunt. (Amst. 1600, 5vo

2d ed. Amst. 1694, fol.).

Epistulae (plur. aris), a term used in Biblical

criticism (q. v.) to distinguish those MS. Lectionaries

(q. v.) or selections from the Greek Text, anciently

employed in Church service that contained selections from

the epistles only. See Manuscripts of the Bible.

Epistolarium. The office of the Holy Communion

was in the early ages of the Church contained in

four volumes, viz. the Antiphoner, the Lectionary, the

The second of these, the Lectionary, was the book of the

epistles read at mass (Du Cange, Glossarium, s. v. Le-

ctionarium), generally called the Epistolarium, also Co-

masium et Apostolorum.—Procter, On the Book of Common

Prayer, p. 9.

Epistaphia (επιστάφαι), funeral obsequies. It was

usual in the early Church to make funeral obsequies

(λυγοι επιστάφων) in praise of those who had been

distinguished during life by their virtues and merits.

Several of these are extant, as that of Eusebius at the

funeral of Constantine; those of Ambrose on the death

of Theodosius and Valentinian, and of his own brother

Satyrus; those of Gregory of Nazianzus upon his fa-

ther, his brother Cassarius, and his sister Gorgonia;

and that of Gregory of Nyssa upon the death of Melitius,

bishop of Antioch.—Riddle, Christ. Antiq. bk. viii, ch. iii.

Epoch. 1. The point of time, usually marked by

some important event, from which a series of years,

termed an era, is computed or dated; although

"epoch" and "era" are often used synonymously for

either a chronological period or date in general (see

Penny Cyclopaedia, s. v. Era). An era properly so

called the ancient Hebrews did not possess. Signal

events in human history have been made use of as points

date of which are mentioned. Moses, like Herodotus, reckoned

generations. The Exodus, as may be seen in Exod.

xii, 34, and noted in Prov. i. 27, probably also, the build-

ing of the first Temple (1 Kings ix, 10; 2 Chron. iii, 2),

were employed as starting-points to aid in assigning

events' position in historical succession. Also

the destruction of the first Temple, or the beginning

of the Babylonish captivity (in the summer of the year

B.C. 586), and the liberation of the Jews from the Syri-

an yoke by the valor of the Maccabees (in the autumn

of the year B.C. 145), were used as epochs from which

time was reckoned. After the manner of other na-

tions, the Hebrews computed time by the succession

of their princes, as may be seen throughout the books

of Kings and Chronicles. At a later period, and in

the first book of the Maccabees, what is termed the

Greek era, or that of the Seleucidae, began to be em-

ployed. This era, which is also called the era of the

Syro-Macedonians, commences from the year of Rome

444 (b.c. 198), or the death of Alexander, and

311 years and four months before the birth of the

Saviour. For the commencement of the

Fourth, the epoch of the first conquest of Seleucus Nica-

tor in that part of the West which afterwards com-

posed the immense empire of Syria (see Noris, Annae

et epocha Syro-Macdonum, Lips. 1696).

The Julian year is dated from Roman months after

July 1 of the year 46 BC, on which September 23, to

which the difference between the styles then amounted.

The alteration was effected in the month of September, the

day which would have been the third being called the

fourteenth. See Vulgar Era. 
EQUOVIATION.

The following summary shows the correspondence of the principal epochs, eras, and periods with that of the birth of Christ, or Christian era. (A valuable treatise on *Eras of ancient and modern Times* may be found in the *Companion to the Almanac*, 1880.) See also **Era**.

2. The term epoch is used by modern writers to denote *critical junctures in the development of history*; the creation of a new society was termed *torzai*, pauses or resting-places for contemplation. What exists at the epoch in the germ is developed to a more advanced stage, and thus afterwards becomes the Period. The former denotes the fountain-head, the latter the stream; their limits are where a new form of culture appears again in an epoch. The epochs are either critical and destructive, or creative and organizing. —Neander, *Hist. of Dogma*, i. 20.

**Epworth League.** See p. 1046 of this vol.

**Equiuitus, a lay abbey of many monasteries, both male and female, in the province of Valeria, who lived in the 6th century. The year both of his birth and death are unknown. He had not taken orders, but he nevertheless very active in preaching. He was therefore denounced at Rome, and the pope summoned him before his tribunal, but the great and general reputation of Equiuitus induced the pope to dismiss the case. Equiuitus led a very ascetic life, and is said to have always, during many travels, carried the Bible with him. According to Baronius, pope Gregory I was a monk according to the rule of St. Equiuitus, but this is denied by other writers. —Herzog, *Real-Encycl.* iv, 113; Wetzler u. Weiler, *Kirchen-Lexikon*, iii, 636. (A. J. S.)

**Equity** is that exact rule of righteousness or justice which is to be observed between man and man. Observe in this respect that, just as it is a sin to break a promise, it is a sin to break a promise. It is in these words: All things whatsoever ye would that men should do unto you, do ye even so to them, for this is the law and the prophets (Matt. vii, 12).

This golden rule, says Dr. Watts, has many excellent properties in it. 1. It is a rule that is easy to be understood, and easy to apply by the meanest and weakest understanding.2. It is a very short rule, but it is remembered that a weakest memory can retain it; and the meanest of mankind may carry this about with them, and have it ready at all occasions. 3. This excellent precept carries greater evidence to the conscience, and a stronger degree of conviction in it, than any other rule of moral virtue. 4. It is a precept fitted for practice, because it includes in it a powerful motive to stir us up to do what it enjoins. 5. It is such a rule as, if well applied, will always almost secure our neighbor from injury, and secure us from guilt if we should chance to hurt him. 6. It is a rule as much fitted to awaken us to sincere repentance as any. "The true creation of it as it is to direct us to our present duty. 7. It is a most extensive rule, with regard to all the stations, ranks, and characters of mankind, for it is perfectly suited to them all. 8. It is a most comprehensive rule with regard to all the actions and duties that concern our neighbors. It teaches us to regulate our temper and behavior, and promote tenderness, benevolence, gentleness, etc. 9. It is also a rule of the highest prudence with regard to ourselves, and promotes our own interest in the best manner. 10. This rule is fitted to make us altogether as happy as any other state of things will admit. See Watts, *Sermons*, serm. 33, vol. i; Evans, *Sermons*, serm. 28. See also for the principles of this rule. **Equivoication** (quæ, coqu, to use one word in different senses). How absolute the knife is! We must speak the same word, equity or equivocation will undo us. (Homer, act v, scene 1). In morals, to equivoicate is to offend against the truth by using language of double or double meaning, in one sense, with the intention of its being understood in another—or in either sense according to circumstances. The ancient oracles gave responses of ambiguous or double meaning. Scripture would mean, 'Edward of the covenant shall not the deed be good; but with it after notice, the meaning would be, 'Edward will not, to fear the deed is good.' Henry Garnet, who was tried for his participation in the Gunpowder Plot, thus expressed himself in a paper dated March 26, 1585-6: 'Concerning *equivoication*, it is my opinion: in moral affairs, and in the common intercourse of life, when the truth is asked among friends, it is not lawful to use *equivoication* for that would cause great mischief in society; wherefore, in such cases, there is no place for *equivoication*. Equiuitus —Bede where it becomes lawful to an individual for his defense, or for avoiding any injustice or loss, for obtaining any important advantage, without danger or mischief to any other person, then *equivoication is lawful* (Jardine, *Gunpowder Plot*, p. 225). Dr. Johnson would not allow his servant to say if the was not at home when he really was. 'A servant's strict regard for truth,' said he, 'must be weakened by such a practice. A philosopher may know that it is merely a form of denial, but few servants are such nice distinguishers. If I custom a servant to tell a lie for me, have I reason to apprehend that he will tell many lies for himself?' (Boswell, *Journal*.) There may be *equivoication* in sound as well as in sense. It is told that the queen of George III asked one of the dignitaries of the Church if ladies might *knot* on
Sunday. His reply was, Ladies may not; which, in no sense sound, is equivocal."—Flamsteed, Vocabularium Philosophiae, s. v.

Ere (Heb. id. "תַּחַלָּתָה," "watchful; Sept. and N. T. "חָלָה"); Vulg. Her.,) the name of three men. See also Ezr.

1. The eldest son of the patriarch Judah by Bath-Shuah (daughter of Shua), a Canaanite. His wife was Tamar, but he had no issue, and his widow eventually became the mother of Pharez and Zara by Judah. Er was wicked ("חָלָה," a paranomasia of "חָלָה") in the sight of the Lord, and the Lord slew him. (Gen. xxviii, 3-7; Num. xxxvi, 19). B.C. cir. 1896. It does not appear whether the nature of his sin was; but, from his Canaanitish birth on the mother's side, it was probably connected with the abominable idolatries of Canaan.

2. A son of Shelah (Judah's son), and "father" of Leah (1 Chron. iv. 21). B.C. prob. ante 1618.

E'tran (Heb. 'E'ran, "נְבָאָלָה,") Sept. 

E'rani (Heb. with the art. "ה-"Erawn, "נְבָאָלָה"): Vulg. Heresia, A. V. "the Eranatis"); a patronymic designation of the descendants of the Ephraimite Eran (Num. xxvi, 56).

Erasmus, Desiderius, was born at Rotterdam, October 28, 1467 (1600). His father's name was Gerhard, his mother's Margaret: she were never married. The boy was called Gerhardus Gerhardi, which he changed into the name Desiderius Erasmus (properly Erasmianus), having the same meaning in Latin and Greek (ερασμίος). The father went to Rome. Being informed that Margaretha was dead, he entered into a convent; but finding her alive, he changed her alms to the training of their son. At six he was a chorister in the cathedral at Utrecht. At nine he was sent to school at Deventer, where he had for school-fellow a youth who afterwards became pope, Calixtus V. He displayed great talent at Deventer that it was even then predicted that he would one day be the most learned man in Germany. After the death of his parents, when he was under fourteen, his guardians determined to make a monk of him; in order, it is said, that they might secure his patriotism for themselves. He refused to enter the monastic life; but his guardians placed him in the seminary at Herzogenbusch, where, as he says, he spent three useless and unhappy years. He was then put at the monastic house of Zion, near Delft, and finally he entered the Augustinian monastery of Emals, or Stein, near Gouda. Here, after sturdy resistance, he entered on his novitiate in 1486. His life at Stein was unhappy, except so far as it was relieved by study, to which he devoted all the time possible. His hatred of monkery increased with each year of his stay in the monastery. In 1493, the bishop of Cambray, desiring a capable Latinist as his secretary for a projected journey to Rome, obtained permission for Erasmus to leave the convent. The journey did not come off, and Erasmus (who was ordained priest in 1492) remained some years under the bishop of Cambray, who authorized him to proceed to Paris to continue his studies, instead of returning to the monastic life. At Paris, Erasmus barely supported himself by taking pupils, and he suffered greatly from sickness and poverty. He afterwards attributed his weakness of constitution to his wretched food and unwholesome lodgings in Paris. After a short visit to Cambray and to Rome, and for his health, he returned to Paris, where his pension from the bishop failed, and he taught for his bread. Among his pupils was Lord William Mountjoy, who ever after remained his friend and patron. For him he wrote the treatise De Hereditatibus.

Mountjoy offered him a pension to accompany him to England. Erasmus passed a year there (1498-9), chiefly at London, Oxford, and Cambridge, and became acquainted with many Englishmen distinguished for piety and learning. At Oxford he studied in St. Mary's College. He made many connections which were afterwards of use to him. Among his special friends were Colet, Grocyn, Latimer, and the celebrated chancellor Thomas More. From England Erasmus returned to Paris, where he again supported himself by pupils. In 1499 he returned to the Continent, and spent his time chiefly in studying Greek, and in translating Greek authors into Latin. He had no fixed abode; now he was in Paris, and again in the provinces of France or in Holland. The Adages and the Enchiridion Militis Christiani were published between 1500 and 1504. He began his Biblical studies also about this time, publishing in 1506 a new edition of the Remarks of Laundrenius Valli on the N. T. In 1505 he spent a short time in England, where he made the acquaintance of Archbishop Warham, to whom he dedicated his translation of the Hecateus. He relinquished his long-cherished desire of visiting Italy, where he succeeded in obtaining from Pope Julius II a dispensation from his monastic vows. At Tarin he was made D.D. (1506), and his time was divided between Bologna, Rome, Florence, and Paris. He published his Adagia (1500) under the instruction of the best Greek and Italian scholars. In 1517 he superintended, at Venice, a new edition of his Adagia, printed by the celebrated Aldus Manutius. "At Rome he met with a flattering reception, and promises of high advancement; but, having engaged to return to England, he did so in 1510, in the expectation that the recent accession of Henry VIII., with whom he had for some time maintained a correspondence, would insure to him an honorable provision." On the journey he wrote the work which gave him his greatest celebrity for the time, the Encomium Moriae (Panegyric on Folly), which he dedicated to Thomas More. He lived "for some time at Cambridge, where he was appointed Lady Margaret professor (in divinity), and also lectured on Greek. His lodging was in Queen's College, in the grounds of which Encausus, or the Walk, is still shown. In 1509, at the request of Colet, he published Copiis Verborum ac rerum, long in use as a school-book. He accepted an invitation from the archdeacon, afterwards Charles V., and went to Brabant in 1514, with the office of counsellor, and a salary of 290 florins. After this we find him resident sometimes in the Netherlands, sometimes at Basel, where the great work in which he had been
many years engaged, the first edition of the New Testament in Greek was published in 1516, accompanied by a new Latin translation. Some amusing specimens of the objections made to this undertaking by the ignorant clergy will be found in his 'Letters' (vi, 2) (Eng. Cyclop.). It was dedicated to pope Leo X. His fame had by this time spread all over Europe; he and Bucerius were called the Erasists. From that time period onward he resided chiefly at Basel, though his wandering habits were never entirely shaken off. The second edition of his N. T. appeared in 1519, and prefixed to it was his Ratio novi Methodus compendiose perniciænullius (also prefixed to the first, 1516, and together with his Paraphrases in N. T. (1594, fol., and 1596, fol.). The Paraphrases were so much esteemed in England that it was made the duty of every parish church, by an order in council (1547), to possess a copy of them. Erasmus's Latin translation of the New Testament (London, 1545, 12mo. fol., by Udall, Coverdale, and others; 2d edit. 1551) As Erasmus had decided to remain in the Church of Rome, his residence at Basel became an uneasy one when the Reformation got possession of that city. In 1529 he removed to Freiburg, in Breisgau, where he built himself a luxurious villa, called the Erasmus House, and his own residence (1535, fol.). This house was called the 'Erasmus' or the 'Erasists.' Erasmus's Latin translation of the New Testament during his whole life was prodigious. He early imbibed a love for the ancient classics, and contributed largely to increase the taste for ancient culture by his writings in praise of them, by his editions of classic authors, and by his attacks on the scholastic theologv. He had an almost religious contempt for the ignorance of the monks. He worked incessantly at various branches, and completed his works with great rapidity; he had not the patience to revise and polish them, and accordingly most of them were printed exactly as he threw them out; but this very circumstance rendered them universally acceptable; their great charm was that they communicated the trains of thought which passed through a rich, acute, witty, intrepid, and cultivated mind, just as they arose, and without any reservations. Who remarked the many errors which escaped him? His manner of narrating, which still rivets the attention, is so simple and so easy to follow away (Ranke, Reformation, by Austin, bk. ii, chap. i). His Ciceronius is an elegant and stinging satire on the folly of those pedants who, with a blind devotion, refused to use in their compositions any words or phrases not found in Cicero's works. His own Latin style is clear and elegant; not always strictly classical, but like that of one who spoke and wrote Latin as readily as his mother tongue. His 'Letters,' comprising those of many learned men to himself, form a most valuable and amusing collection to those who are interested in the manners and literary histories of the age in which they were written; and several of them in particular are highly valuable to Englishmen as containing a picture of the manners of the English of that day (Eng. Cyclop.). But, of all his writings, the only ones that are likely to retain a lasting place in literature are the Colloquies, and the Panegyric on Folly—writings of his comparative youth, and regarded by him rather as pastime. For neither as a wit nor as a poet was he perhaps even a bit of a poet, and in his Colloquies and Panegyric on Folly rank among master intellects; and in the other departments of literature no one has ventured to claim for him a more elevated station. His real glory is to have opened at once new channels of popular and of erudition knowledge, to have given a great impulse to the study of ancient history and literature, and to have lived and written for noble ends—to have been surpassed by none in the compass of his learning, or the collective value of his works—and to have prepared the way for a mighty revolution, which it required moral qualities far loftier than his to accomplish. For the soul of this great man did not partake of the energy of his intellectual faculties. He repeatedly confesses that he had none of the spirit of a martyr, and the acknowledgment is made in the tone of sarcasm rather than in that of regret. He belonged to that class of actors on the scene of life who only appear (most often) when the great social changes—men gifted with the power to discern and the hardihood to proclaim truths of which they want the courage to encounter the infallible results; who outstrung their generation in thought, but lag behind it in action; players at the statute book, as long as reforming appears at an indefinite distance; more ostentatious of their mental superiority than anxious for the well-being of mankind; dreaming that the dark page of history may hereafter become a fairy tale, in which enchantment will bring to pass a glorious catastrophe, unthought of by the public, and so supine, and suffering; and therefore overwhelmed with alarm when the edifice begins to totter, of which their own hands have hatched the foundation. He was a reformer until the Reformation became a fearful reality; a jester at the bullwarks of the papacy until they began to give way; a propagator of the Scriptures until men betook themselves to the study and the application of them; depreciating the mere outward forms of religion until they had come to be estimated at their real value; in short, a learned, ingenious, benevolent, amiable, direct, honest man, who, bearing the responsibility, and not assigned to others the greatest horror of this human mind from the bondage of a thousand years. The distance between his career and that of Luther was therefore continually enlarging, until they at length moved in opposite directions, and met each other with mutual animosity (Edinburgh Review, lxviii, 392).

The relations of Erasmus to the Reformation have been summarily stated in the paragraph just cited. He was the literary precursor of the Reformation. His exegetical writings prepared the way for later expositors, opened a new era in Biblical criticism, and also aided in giving the Bible its Protestant position as the rule of faith. His satires upon the monks, upon the scholastic theology, and upon Church abuses generally, contributed largely to prepare the minds of literary men throughout Europe for a rupture with Rome. He taught, in his perfect knowledge of Church knowledge should be drawn from the original sources, viz. the Scriptures, which he said should be translated into all tongues. In his Encomium Moriae, Folly is introduced as an interlocutor who turns into ridicule all the schemes and projects that are then going on, that all have lost themselves, the syllogisms with which they labor to sustain the Church as Atlas does the heavens, the intolerant zeal with which they persecute every different of opinion. She then comes to the ignorance, the dirt, the strange and ludicrous pursuits of the monks, their barbarous and obtrusive style of preaching; she attacks the bishops, who are more solicitous
ERASMUS

279

ERASTUS

for gold than for the safety of souls; who think they do enough if they dress themselves in the triclinial costume, and under the name of the most revered, most holy, and most beloved fathers in God, pronounce a blessing or a curse; and, lastly, boldly assails the court of Rome and the pope himself, who, she says, takes only the pleasures of his station, and leaves its duties to St. Peter and St. Paul. Among the curious works published are a Latin commentary on St. Luke's Epistle, with which the book was adorned, the pope appears with his triple crown. It produced an indescribable effect: twenty-seven editions appeared even during the lifetime of Erasmus; it was translated into all languages, and greatly contributed to confirm the age in the "new science" (Erkenntnis), but the personal character of Erasmus was not fitted for such storms as those of the Reformation. Intellectually, he was too many-sided and too undecided; morally, he was of too flaccid a fibre, too timid, and too fond of ease, to devote himself to a certain strife with very uncertain issues. Moreover, he never touched on religious convictions or experience. The monks, nevertheless, were right in a certain extent in their saying that "Erasmus laid the egg; Luther hatched it. At first Erasmus regarded Luther with favor as a confessor, in his attacks upon the ignorance of the monks, and the reforms of literature. But Luther saw the weakness and spiritual poverty of Erasmus, and expressed his fears in letters to Spalatin and Lange as early as 1517; while Erasmus, in letters to Zwingle, deprecated the haste and vehemence with which Luther was proceeding (March 28). Luther wrote: a friendly letter to Erasmus, who was in reply (April 30): "I hold myself aloof from the controversies of the times to devote my whole strength to literature. After all, more is to be gained by moderation than by passion; so Christ conquered the world. It is better to guide others than to abuse, or despise the authority of the papacy than against individual popes."

In 1520, Frederick, elector of Saxony, meeting Erasmus at Cogne, asked his opinion of Luther; his reply was, "Lutherus pessimi in divinis, nempe quod legitur coram populo pontificum et clericorum: Luther has committed two blunders; he has ventured to touch the crown of the pope and the bellies of the monks... but his language is too violent," etc. He expressed similar cautions in a letter to Justus Jonas at the time of the Diet of Worms (1521). The earnest Ulrich von Hohenheim, the most sincere of the early Protestants, side, but in vain. In 1522 Hutton published an Expositio cum Erasmo, abounding in bitter invective, to which Erasmus replied in Spongia adversus Hutteni expergientes (Basel, 1523) (see Gieseler, Church History, ed. by Smith, iv, § 8). Luther is said to have denounced both these pamphlets as disgraceful. Luther wrote (1524) to Erasmus an earnest letter, urging him, if he would not join the Reformers, at least to refrain from open opposition. "You might, indeed, have aided us much by your wit and your eloquence; but, since you have not the disposition and the courage for this, we would have you serve God in your own way. Only we feared, lest our adversaries should entice you to write against us, and that necessity should compel us to oppose you to your face. If you cannot, dear Erasmus, assert our opinions, be persuaded to let the same issue, and remain suited to your taste" (Bibl. Sacra, 1866, p. 129). "From this time Erasmus complains incessantly of the hostility of the Evangelicals. The haughty style in which Luther offered him peace (in the letter above cited) could only have the effect upon that ambitious man of giving him the larger weight to the required time, and reached him at the same time from England, that he would take revenge upon Luther for his attack upon the royal author (Henry VIII). And so, to assail the formidable Luther in the weakest part of his theological system, Erasmus wrote his treatise De Libero Arbitrio (Sept. 1524). Luther replied with his usual bitterness in his De Serro Arbitrio (Dec. 1523). Erasmus replied in like vein in his Hyperepistulae (1526). Thus the renowned Erasmus now passed over into the ranks of the enemies of the Reformation, though he did not cease to recommend conciliatory measures towards it" (Gieseler, l. c.).

The writings of Erasmus were collected and published by several hands, but much drawn together by his friend Leclerc, under the title Des Erasmi Opera Omnia, edenda et auctiora, etc. (L. Bat. 1708-9, 10 vols. in 11 fol.). He edited many of the fathers, viz. Origen, Ireneaus, Cyprian, Augustine, Chrysostom, Laetantius, and translations of selections from them are given in his Opera Omnia (1877). His most popular works (the Encomium, Adagogia, Colloquia, etc.) are very numerous. There are English versions of the following: Panegyric upon Folly (two translations: one by Chaloner, the other by Kennet; often printed); Colloquies (1671, and often, especially in selections); Erasmus the Philosopher (1838, and often); Christian's Manual (from the Excommunication Militia, London, 1816, 8vo); Ecclesiastes, or the Preacher (chiefly from Erasmus, London, 1787, small 8vo); De Contemptu Mundi (Lond. 1580, 16mo); De Immensis Dei Missione et Mercem (London, 1787, 2 vols. 12mo); Jocelin, Life of Erasmus (London, 1788, best ed. 1806, 8 vols. 8vo; abridged by Laycey, London, 1805, 8vo) Hues, Leben des Erasmus (Zurich, 1790); Butler, Life of Erasmus (London, 1825, 8vo); Niceat, in Studia et Monumen. (Paris, 1835); Müller, Leben des Erasmus (Hamburg, 1838, 8vo; reviewed by Ullmann, Studien u. Krit. 1829, p. 1); Glausi, On Erasms as Church Reformer (a crowned prize-essay in the Dutch Language, the Hague, 1850). See also Bayle, Dictionary (s. v. Erasmus); Dupin, Autour des Ecoles, tom. xiii; Waddington, History of the Reformation, 1841), ch. xxii; by Well, A Biographical History of the Reformations, vol. i; Hoefert, Nouv. Biogr. Générale, xvi, 207; Hallam, History of Literature (Harper's ed.), i, 154 sq.; Mackintosh, Miscellanea Works (London, 1851), i, 190 sq.; Christ. Examiner, xliii, 80; Christian Quarterly Review, April, 1861; and Theological Quarterly, Nov. 1850, p. 581; Bibliotheca Sacra, xix, 106; Brit. and For. Ec. Review, July, 1867, p. 577; H. Rogers, in Good Words, Feb. 1868.

Erasatism; the title generally given to "that system which would rest the government of the Church spiritual as well as civil altogether in the Christian magistrate." This, however, was far from being an invention of Erasmus, since in every kingdom of Europe the Roman claims had been in use on the like principles for centuries before he was born; the peculiarity of Erasmus's teaching lay rather in his refusing the right of excommunication to the Christian Church (see Oxf. Hooker, Ed. Pref. p. liii)" (Eden, Churchman's Dictionary, s. v.). Hardwick proposes "byzantinism" as the proper title for the theory named instead of "Erasitism" (History of the Reformation, chap. viii, p. 856). See also Nichols, Anecdotes of Bonny identifies his person, the Church of England and Erasitism (Lond. 1854); Hagenbach, History of Documents (Smith's ed.), ii, 296; Cunningham, Historical Theology, ii, 569; Orme, Life and Times of Baxter, i, 71; Christian Review, viii, 579; and the articles CHURCH; DISCIPLINE; ECCLESIASTICAL POLITY; ERASUS, THOMAS.

Eras'tus (Ἐράστος, bearded, an old Greek name, Diog. Laert. iii, 91), a Corinthian, and one of Paul's disciples, whose salutations he sends from Corinth to
ment or communion of the Lord's Supper—was not vice or immorality, but a difference in theological opinion with the church from which he sought the privilege. The church was to decide who were its members, and thereby entitled to partake in its privilege, but not those who were entitled to take upon itself the punish- ment of offences by withholding these privileges or by inflicting any other punishment on the ground of moral misconduct. Few authors so often referred to have been so little read as Erastus. The original theses are very rare. An English translation was published in 1857, and was received with approbation by Robert Lee in 1843. By some intractable exaggeration, it had become the popular view of the doctrines of Erastus that his leading principle was to maintain the authority of the civil magistrate over the conscience, and to subject all ecclesiastical bodies to his direction and control, both in their doctrine and their discipline. In the discussions in the Church of Scotland, of which the result was the secession of a large body of the clergy and people because it was found that the Church could not make a law to nullify the operation of lay patronage, those who maintained within the Church the principle of Erastus in its highest form, were branded by the Church as separatists, and Erastus as a term of reproach. As in all cases where such words as Socinian, Arian, Antinomian, etc., are used in polemical debates, the party rejected with disdain the name thus applied to it. But it is singular that this name should have been dropped, when one is thought of thinking that the controversy in which Erastus was engaged was about a totally different matter, and that only a few general and very vague remarks in his writings have given occasion for the supposition that he must have held the principle that all ecclesiastical authorities are subordinate to the civil. Erastus died at Basel on the 31st Dec., 1 Jan., 1588.

Bredt. Paulinus, a German Franciscan monk, professor of theology at the University of Freiburg, was born at Vertoch in 1787. He displayed much zeal in opposing infidelity, both by his translations from English and French as well as his own works. The most important of his works is Historia literaria theologica opuscula octodecim libris comprehensa, avus ad historiam literariam theologicae redditum; ad admirandissimam litterariae in urbe Augusta, 1785, 4 vols. 8vo. Eras died Dec. 16, 1800.

Brebinti, Village of (Ερμοσίνθος οικ. house of chick-peas), a place on the line of Titus's wall of circumvallation around Jerusalem during the final siege (Josephus, War, v, 12, 2); apparently on the brow of the hill opposite Mount Zion, on the west. See JERUSALEM. Eusebius speaks of a village Ermontika (Ερμοντικα, Onomast. s. v.), situated, however, in the south of Judea, which Reland thinks (Pallat. p. 766) is the same as the Betherebin (Βαιτερέβις) mentioned by Sozomen (Hist. Eccl. ix, 27).

E'rech (Heb. E'rech, אֶרֶךְ, length; Sept. Ὠραθ, Vulg. Arach), one of the cities which formed the beginning of Niniroth and the end of the plain of Carmel (Gen. x, 10). It is not said that he built these cities, but that he established his power over them; from which we may conclude that they previously existed. It was probably also the city of the ARCHSEVETS, who were among those who were transplanted to Samaria by the Exile (2 Chron. xxxiv, 20). Until recently, the received opinion, following the authority of St. Ephrem, Jerome, and the Targumists, identified Ereh with Edea or Calirhoe (now Urfa), a town in the north-west of Mesopotamia. This opinion is supported by Von Bohlen (Intro to Gen. p. 283), who connects the name Calirhoe with the Biblical Edessa as through the Syriac form Erothou, suggesting the Greek word ἔρος. This identification is, however, untenable: Edeasa was
probably built by Seleucus, and could not, therefore, have been in existence in Ezra's time (Ezra iv, 9), and the extent thus given to the land of Shinar presents a great advantage. Ezech must be sought in the neighborhood of Babylon. Geoemius (Theaur. p. 161), following Bochart (Philea, iv, 16), rather seeks the name in that of the Sidonians. Among the ancient accounts, which was on the Tigris, upon the borders of Babylonia and Susiana (Ptolemy, vi, β; Ammian. Marcell. xxiii, 6, 26). This was probably the same city which Herodotus (i, 185; vi, 119) calls Αρδήσσικα (Αρδησικας), i.e. Great Ezech. Rosenmüller happily conjectures (Atlen. iii, 22) that Ezech probably derived from Babylon than Aracca; and this has lately been confirmed by Col. Taylor, the British resident at Bagdad, who is disposed to find the site of the ancient Ezech in the great mounds of primitive ruins, indifferently called Irak, Iruk, Wurka, and Senedhak, by the nomad Arahs, and sometimes El-Akapi, "the place of pebbles" (Bonomi, Vincen. p. 40). These mounds, which are now surrounded by the almost perpetual marshes and inundations of the lower Euphrates, lie some miles east of that stream, about midway between the site of Babylon and the junction of the intestine. This is doubtless the same as Orchōs (Ορχος) 82 miles south, and 42 east of Babylon (Ptolemy, vi, 20, 7), the modern designations of the site bearing a considerable affinity to both the original names. It is likewise probable that the Αρειμίς (Αρειμις) described by Strabo as an aristocratic part of the Chaldees residing near Babylon (xxi, p. 739); in Ptolemy as a people of Arabia living near the Persian Gulf (v, 12, 2); and in Pliny as an agricultural population, who banked up the waters of the Euphrates, and compelled them to flow into the Tigris (vi, 27, 81), were really inhabitants of Orchōs and of the district surrounding it. This place appears to have been the necropolis of the Assyrian kings, the whole neighborhood being covered with mounds, and strewn with the remains of bricks and coffins. Some of the bricks bear a monogram of "the moon," and Col. Rawlinson surmises that the name Ezech may be nothing more than that of Της, the Heb. name for that luminary (Athenæum, 1854, No. 1377); but the orthography does not sustain this conjecture. Some have thought that the name of Ezech may be preserved in that of Irak (Irak-Arabi), which is given to the region inclosed by the two rivers in the lower part of their course. (See Chesney. Euphrates and Tigris, p. 178; Airisworth. Babyl. and Assyr. p. 178; Loftus, Chaldea, p. 160 sqq., where a full description is given.) For another Ezech, probably in Palestine, see Archi.

Eremite (ερείπιος, desert), one who lives in a wilderness, or other solitude, for purposes of religious contemplation. The name was given in the ancient Church to those Christians who fled from the persecutors of Christianity into the wilderness, and there, isolated from all other men, gave themselves up to life of rigid asceticism. Paul of Thebes is called the first eremite, and he soon found numerous followers. From the association of eremites the cenobites arose, who, in turn, form the transition to the monastic orders, which became in the Church of Rome and in the Eastern Church the most common form of organized asceticism. The name eremite remained, however, in use both for those who, in opposition to monastic association, preferred the eremitic life, and for a number of orders or branches of orders (orders of eremites), which either retained some customs in the life of the original eremites, or which made special provisions that their members might live in entire isolation from each other, meeting only for the celebration of divine service. Thus the proper name of the Augustinians (q. v.) was the community of St. Augustine, although they became, in fact, a regular order. There were also eremites belonging to the orders of Francisca (q. v.), Camaldulenses (q. v.), Celestines (q. v.), Hieronymites (q. v.), and Servites (q. v.). Among the other orders of the eremites were the Eremites of St. John the Baptist (see John the Baptist, Eremites of), and the Eremites of St. Paul. See Paul, St., Eremites of.

Eres. See Eder.

Erfurt, a city in the Prussian province of Saxony, with, in 1865, 84,308 inhabitants. In 741, Erfurt became the seat of a bishop, but St. Adalar was the last as well as the first bishop, the see being united with that of Mentz. In 1378 the city received permission from the pope residing at Avignon (Clement VII) to hold a diocesan synod, and the permission was confirmed in 1389 by the Roman pope Urban V. In 1892 the university was opened, being the fifth university of Germany. At the beginning of the 16th century, Luther was for some time one of its professors. Subsequently its reputation dwindled down, and it was abolished in 1818. —Wetzer u. Wetzel, Kirchen-Lexikon, iii, 661.

Erhard, Bishop. See Hildesl.

Eri (Heb. ἔριν, ἕριν, watchful), the fifth son of the patriarch Gad (Gen. xlvi, 16; Sept. ἄρογις, Vulg. Hērē), and progenitor (Num. xxvi, 16; Sept. Ἀττις, Vulg. Herē) of the Erites (q. v.). B.C. 1856.

Erio IX (according to some historians VIII), sursum, the saint, a king of Sweden. He was the son of Jedward, a "good and rich yeoman," as he is called in an old mediaeval chronicle, and of Cecilia, the sister of king Eric Arsal. Having become king of Sweden, his chief endavor was the Christianization of Sweden. He conquered southern Finland, and compelled the inhabitants to adopt the Christian religion. He also united Norway with Sweden. In the war against the Danish prince Magnús, he fell in a battle near the town of Upsala, May 18, 1160.—Hoefer, Nouv. Biogr. Gén. xvi, 243.

Erigena. See Scotus Erigena.

Erite (Heb. collect. with the art. הָרֵי, הָרֵית, Sept. [appar. everywhere in this name reading ה for ה] יָרֵית, Vulg. Herē, A. V. "the Erites"), a patronymic designation (Num. xxvi, 16) of the descendants of the Gadite Eri (q. v.).

Erizatay (Sargis or Sirges), a learned Armenian bishop, born towards the middle of the 13th century, at Eriza or Ardzandjan, a city of Armenia. In 1290, John the Catholic, brother of St. Hagop, called him to his court, and made him his secretary. In 1291 he was consecrated bishop of Ardzandjan, and, a short time after, the king of the Armenians of Cilicia (Hayton or Hethoum II) made him almoner of his palace. In 1306 he was present at the national council which was held at Sic, capital of Cilicia, and died a short time after. He wrote a treatise on The Hierarchic, and several other works, which remain in MS.—Hoefer, Nouv. Biogr. Gén. xvi, 258.

Erlangen, a city in Bavaria, with a population of 18,628 inhabitants, mostly Protestant. It is the seat of one of three universities of Bavaria, with a Lutheran theological faculty. The University was founded in 1742 by the margrave Friedrich of Brandenburg-Baireuth for his residence, but in 1743 transferred to Erlangen. The University has in modern times been a chief seat of the Confessional party in the Lutheran Church. (A. J. S.)

Ernestei, Johann August, an eminent critic and scholar, was born Aug. 4, 1707, at Tennstedt, in Thuringia. He completed his academic studies at Wittenberg and Leipsic. In 1712 he became professor of ancient literature at Leipsic, and in 1738 doctor and professor of theology there. He founded the two last named professorships together till 1740, when he gave up the former to his nephew, August Wilhelm. He...
died Sept. 11, 1781. He distinguished himself greatly by his philological and classical publications, and also by the new light which his theory of interpretation threw upon the sacred Scriptures. He adopted from Weisstein the grammatico-historical method of interpretation, and gave it its final development. Among the most important of his critical and philological writings are Opuscula philologico-critica (Amster. 1762, 8vo):—

Opuscula oratoria, orationes, prolusiones et eloquia (Leyd. 1767 and 1787, 8vo):—Archaeologia littariorum (Leips. 1773, 1 vol. 8vo). He also wrote Selecta epistolae sophronicae (Leips. 1786; 7th ed. 1783, 8vo). The style of this work, his adherents say, is the best known is his Proverbialem Arabicorum Centuria Due (Leyden, 1614)* (Chambers, s. v.).

ERROR. "Knowledge being to be had only of visible certain truth, error is not a fault of our knowledge, but of our judgment, giving assent to the which is true (Locke, Essay on Human Understanding, bk. iv, ch. xx). "The true," said Bossuet, after Augustine, "is that which is, the false is that which is not," To err is to fail of attaining to the true, which we do when we think that to be which is not, or think that not to be which is. Therefore to err is not in things which exist in the mind of him who errs, or judges not according to the truth. Our faculties, when employed within their proper sphere, are fitted to give us the knowledge of truth. We err by a wrong use of them. The causes of error are partly in objects of knowledge and partly in ourselves. It is only the truth that real which exists, it is only the true and real which can reveal itself. But it may not reveal itself fully, and man, taking a part for the whole, or partial evidence for complete evidence, falls into error. Hence it is that all error has some truth. To discover the relation which this partial truth bears on the whole truth is to discover the origin of the error. The causes in ourselves which lead to error arise from wrong views of our faculties and of the conditions under which they operate. Indolence, precipitation, passion, custom, authority, and education may also contribute to lead us into error (Bacon, Novum Organum, lib. i: Malebranche, Recherche de la Verité; Descartes, Of Method; Locke, Of Human Understanding, bk. vi, c. xx)."—Fleming, Vocabulary of Philosophy, pp. 166-167.

Erskine, Ebenezer, an eminent and pious Scotch divine, founder of the "Secession Church." He was born in the parish of the Bass Rock, June 22, 1680, and educated at the University of Edinburgh, where he acted for some time as tutor and chaplain in the family of the earl of Rothes, and became a licentiate in divinity in 1702. In 1708 he was chosen minister of Portmoak, in the shire of Kinross, and became a very popular preacher. He accepted a charge in Stirling in 1781. "Mr. Erskine's first difference with his colleague of the Church of Scotland was in his support of the principles of the 'Marrow of Modern Divinity,' a subject of great contention during the early part of the 18th century. He was one of several clergymen who, in connection with this subject, were 'rebuked and admonished' by the General Assembly. The secession of the body, headed by Mr. Erskine, was occasioned by the operation of the act of queen Anne's reign restoring lay patronage in the Church of Scotland, and, though not in all respects technically the same, it was virtually on the same ground as the late secession of 'The Free Church.' The Presbyterianism of Kinross, led by Erskine's brother Ralph, had refused to induct a presenter forced on an objecting congregation by the law of patronage. In 1792, the General Assembly enjoined the presbytery to receive the presenter. At the same time the latter had been ordered to regulate the patronage, which, as it tended to enforce the law of patronage, was offensive to Mr. Erskine, and he preached against it. After some discur...
sion, the General Assembly decided that he should be 'rebuked and admonished,' confirming a decision of the inferior ecclesiastical courts. Against this decision Mr. Erskine entered a 'protest,' in which he was joined by several of his brethren. He was afterwards suspended from his functions, but he functionally subsistently endeavored to smooth the way for his restoration, but he declined to take advantage of it, and he and his friends, including his brother Ralph, formally seceded in 1736. When the Secession was divided into the two sects of Burghers and anti-Burghers, Mr. Erskine and his brother went into the latter party. He died on the 2d of June, 1756. The Secession Church, reunited by the junction of the Burghers and anti-Burghers in 1820, remained a distinct body till 1847, when a union being effected with the Relief Synod (a body which arose from Mr. Gillespie's secession from the Established Church of Scotland in 1752), the congregations assumed the name of the United Presbyterian Church' ('English Cyclopedia). Erskine bore a very high reputation as a scholar. His writings are collected in The whole Works of Erskine, 2 volumes, Edinburgh, 1799. See Moreland, E.., 227 sqq. See Seeckers; Scotland, Church of; United Presbyterian Church.

Erskine, John, D.D., an eminent Scotch divine, was born in Edinburgh, June 2, 1721, and was educated at the University of Edinburgh. His father (author of the Institutes of the Laws of Scotland) wished him to devote himself to law, but finally yielded to his son's desire that he should study theology. At twenty he published an essay on The Law of Nature sufficiently propagating a blosom world, aiming to show that the ignorance and unbelief of the heathen is not due to want of evidence (Rom. i., 29). In 1743 he was licensed to preach by the presbytery of Dunblane, and in 1744 he became minister of Kirkintilloch. In 1748, Mr. Erskine, and other evangelical clergy of the Established Church, invited Whitefield into their pulpit. The animated discussion took place, in which Mr. Erskine triumphantly defended himself. Such a course required courage at a time when the character and doctrine of Whitefield, as well as his open-air preaching, were often assailed. In 1758, when his hospital was dissolved, he was appointed a chaplain in the army, and in the following year Mr. Erskine published An essay intended to promote the more frequent dispensation of the Lord's Supper. In 1758 he was translated to Cullross, and in 1758 to New Greyfriars' church, Edinburgh. Here he prepared his Theological Disquisitions (Lond. 1767), which, in the two succeeding volumes, he published as follows: one on the Covenant of Sinai, one on Sense Finding, and one on the Apostolic Churches. He also edited a new edition of Hervey's Theorem and Apologist, with a preface against John Wesley, written with some bitterness, which gave rise to some letters between Erskine and Wesley, in which the latter appears to have had the advantage (Wesley, Works, N. York ed. vi., 125 sq., 74). In 1779 he published anonymously a pamphlet under the title 'Shall I go to war with my American brethren?' to expose the impolicy of such a contest. On the occasion of the hostile visit of the American ambassador, he repulsed him with his name, following it up with another, entitled Reflections on the Rise, Progress, and probable Consequences of the present Controversies with the Colonies, in which he urged the duty of the mother country resorting to conciliatory measures. In 1776 he issued a third pamphlet, written in German, called Wider die Vermuthungen der Goernern in the Messures that have occasioned the American Revolt tried by the sacred Oracles. On this subject Erskine was one of the few clear-sighted men of the time in Great Britain. When nearly sixty he studied Dutch and German in order to read the Continental dunciad; the fruit of these studies appeared in Sketches and Hints of Church History and Theological Controversy, translated or abridged from foreign Writers (Edinburgh, 1790-97, 2 vols. 12mo). He died January 19, 1803. After his death appeared his Discourses (Edinburgh, 1818, 2 vols. 12mo).--Jamieson, Religious Biography, p. 139; Jones, Christian Biography, p. 191; Wellwood, Life of Erskine.

Erskine, Ralph, brother of Ebenzer, was born at Monilawa, Northumberland, March 18, 1805, and was educated at the University of Edinburgh. In 1729 he became minister at Dunfermline. In 1734 he joined his brother and others in their secession from the Church. See Seeckers. He died Nov. 6, 1752. He was a preacher of great popular abilities, devotional and zealous. His sermons are collected under the title Sermons and other practical Works, consisting of about 150 sermons, besides his poetic pieces, to which is prefixed an account of the author's life and writings (Falkirk, 2 vols. 12mo, 1794-96).--Darling, Cyclop. Bibliographica, i., 1808.

E'zar-had'don (Heb. Esar-haddon, בֶּשֶׁר אָדָדִּון, perhaps skin with Pers. Abro-daws, gift of fire; Sept. ἀραθοδών [in Exer ἀραθοδών] v. r. ἀραθοδών, in Tob. i., 31, ἀραθοδών; Josephus, Antiq. x., 1, 5, ἀραθοδώνα, the son and successor of Sennacherib (2 Kings xix., 20, etc.). Nothing is really known of Ezer-haddon until his succession (B.C. cir. 680; see Col. Rawlinson in the Lond. Aenemos, Aug. 22, 1865), which seems to have followed quietly and without difficulty on the murder of his father and the flight of his guilty brothers (2 Kings xix., 20; Isa. xxvii., 26). It may, perhaps, be concluded from this that he was at the death of his father the eldest son, Assaradadus, the Babylonian vicerey, having died previously. It is impossible to fix the length of Ezer-haddon's reign, or the order of the events which occurred in it. Little is known to us of his history but from his own record, and they have not come down to us in the shape of annals, but only in the form of a general summary (see them translated by H. F. Talbot, in the Jour. of Soc. Est. April, 1859, p. 68-79). That he reigned thirteen years at Babylon is certain from the Candace Tolomei, the Governor of Egypt, who had a shorter time in Assyria. He may, however, have reigned longer, for it is not improbable that after a while he felt sufficiently secure of the affections of the Babylonians to re-establish the old system of vice-regal government in their country. Saosudchumus may have been set up as an interlocutor in the matter of authority in B.C. 667, and he may have withdrawn to Nineveh, and continued to reign there for some time
longer. His many expeditions and his great works seem to indicate, if not even to require, a reign of some considerable duration. It has been conjectured that he died about B.C. 660, after occupying the throne for twenty years. He appears to have been succeeded by his son, Rezin, or, if not Rezin, then his son-in-law, Ser- dani-pal, or Saldua. Rezin is mentioned by the Chronicler as being the prince for whom he had built a palace in his own lifetime. No farther mention is made of this monarch in Scripture but that he settled certain colonists in Samaria (Ezra iv, 2). See ASAPH-PRIEST.

Ezra-Christ appears by his monuments to have been one of the most powerful, if not the most powerful of all the Assyrian monarchs. He carried his arms over all Asia between the Persian Gulf, the Armenian mountains, and the Mediterranean. Towards the east he engaged in wars with Median tribes "of which his father had never heard thiellim," towards the west he extended his influence over Cilicia and Cyprus; towards the south he claimed authority over Egypt and Ethiopia. In consequence of the disaffection of Babylon, and its frequent revolts from former Assyrian kings, Esar-haddon, having subdued the sons of all those kings who held sway in that country, introduced the new policy of substituting for the former government by viceroyes a direct dependence upon the Assyrian crown. He did not reduce Babylonia to a province, or attempt its actual absorption into the empire, but united it to his kingdom in the way that Hanun had united it to Judah until 1484, when he held both crowns himself, and residing now at one and now at the other capital. He is the only Assyrian monarch whom we find to have actually reigned at Babylon, where he built himself a palace, bricks from which have been recently recovered bearing his name. By his Babylonian reign lasted thirteen years, from B.C. 680 to B.C. 667, and it was undoubtedly within this space of time that Manasseh, king of Judah, having been seized by his captains at Jerusalem on a charge of rebellion, was brought before the Assyrian monarch or his captains (2 Chron. xxxvi, 11), and destined for a long time as prisoner there. This must therefore have been Esar-haddon, who, persuaded of his innocence, or excusing his guilt, eventually restored him to his throne (comp. ver. 13), thus giving a proof of clemency not very usual in an Oriental monarch. It seems not to have been in a spirit of compassion, according to the inscriptions, gave a territory upon the Persian Gulf to a son of Merodach-Baladan, who submitted to his authority and became a refugee at his court. As a builder of great works Esar-haddon is particularly distinguished. Besides his palace at Babylon, which he also has already mentioned, he had three others in different parts of his dominions, either for himself or his son, while in a single inscription he mentions the erection by the hands of no fewer than thirty temples in Assyria and Mesopotamia. His works appear to have possessed a peculiar magnificence. He describes his temples as "shining with silver and gold," and boasts of his Nineveh palace that it was "a building such as the kings his fathers who went before him had never made." The south-west palace at Nimrud is the best preserved of his constructions. This building, which had been excavated by the usual dull and dreary process, is remarkable for the carefulness of its plan as well as for the scale on which it is constructed. It corresponds in its general design almost exactly with the palace of Solomon (1 Kings vii, 1-12), but is of larger dimensions; the great hall being 220 feet long by 150 broad. See also Nimrod, Nim. and Babel, p. 50 (3rd edit.), and the porch or antechamber 160 feet by 60. It had the usual adornment of winged bulls, colossal sphinxes, and sculptured slabs, but has furnished less to our collections than many inferior buildings, from the circumstance that it had originally been destroyed by fire, by which the stones and alabaster were split and calcined. This is the more to be regretted as there is reason to believe that Phoenician and Greek artists took part in the ornamentation. See Bridge, Hist. of Esarhaddon (Lond. 1881). Comp. Assyria.

Eszau (Heb. Esau, ‘ez-z, hairy [see Gen. xxv, 25; his surname Edom was given him from the red potage, Gen. xxv, 30; Sept. and N. T. "Hebron"), the eldest son of "Isaac, Abraham's son" (Gen. xxv, 19) by Rebekah, "the daughter of Bethuel the Syrian, of Padan-aram, the sister to Laban the Syrian." The marriage remained for some time (about 19 years; comp. xxv, 20, 26) unproductive, Isaac entreated Jehovah, and Rebekah became pregnant. Led by peculiar feelings "to inquire of Jehovah," she was informed that she should give birth to twins, whose fate would be as diverse as their character, and, what in those days was strange still, that the elder should serve the younger. On occasion of her delivery, the child that was born first was "red, all over like a hairy garment; and they called his name Esau." Immediately afterwards Jacob was born. B.C. 2004. This was not the only remarkable circumstance connected with the birth of the infant. Even in the womb the twin brothers struggled together (xxv, 22). Esau was the first-born; but he was being issued into life, Jacob's hand grasped his heel. The bitter enmity of two brothers, and the increasing strife of two great nations, were thus foreshadowed as a fact (Gen. xxv, 26). From the attentive drawn to his hairy appearance, one would suppose that the name Esau (אֵזָעַ), or Essau, was intended to give expression to that quality. So have many learned men in recent as well as former times held, though they are obliged to resort to the Arabic for the etymological explanation; a word very similar in Arabic, signifying hairy. The elder Hebrew commentators, however, derived it from the root הָעַס, to make, and explained the word as signifying "made," "complete," "full-grown":-viewing the hair as an indication of premature manly vigor. But the Jews of the present day seem more disposed to fail in with the other derivation (for example, Raphall in loco). The unusual covering of hair, which not only distinguished Esau as a child, but kept pace with his growth, and in mature life gave his skin a kind of goat-like appearance (Gen. xxvii, 16), was undoubtedly meant to be indicative of the man; it was a natural sign, coeval with his very birth, by which his parents might desyer the future's fate, in whom they saw the future, and greatly preponderate over the moral and spiritual qualities of nature—a character of rough, self-willed, and untamed energy. From the word designating his hairy aspect, sear (אֶזְעַ), it is not improbable that the mountain-range which became the possession of his descendants was called Mount Sear, though it is also possible that the rough, wooded appearance of the mountain itself may have been the occasion of the name. See SEIR.

In process of time the different natural endowments of the two boys began to display their effects in dissimilar aptitudes and pursuits. While Jacob was led by his less robust make and quiet disposition to fulfill the duties of a shepherd's life, and pass his days in and around his tent, Esau was impelled, by the ardor and lofty spirit which agitated his bosom, to seek in the toils, adventures, and perils of the chase his occupation and sustenance; and, as is generally the case in such natures like his, his spirit was high repented by his bold and daring, which allied him to the martial exercises of the Canaanites (xxv, 27). He was, in fact, a thorough Beduine, a "son of the desert" (so we may translate פִּלְגָּל הַגָּלָה, man of the field), who delighted to roam free as the wind of heaven, and who was impatient of the restraints of civilized or settled life. His old father, by a caprice of affection not uncommon, loved his wildling, vagrant boy; and with hard words and coarse food being gratified by Esau's venison, he liked him all the better for his skill in hunting (xxv, 28).
In Gen. xxvi, 34, she is incorrectly called Bashemath, apparently by confusion with the name of his third wife, although her parentage is correctly given. Her only child was Eliphaz, who was therefore Esau's first-born (Gen. xxxvi, 10, 19; 1 Chron. i, 30). (2) Esau's second wife, the daughter of Aholibamah, as well as the accounts agree except that in Gen. xxvi, 34, where, by some error or variation of names, she is called Judith, the daughter of Beeri the Hittite. Thir Anah, in Gen. xxxvi, 2, 14, is called the daughter of Zilcaon, but from ver. 20, 24, and 35, in Gen. i, 30, it is evident that he was the brother of Ajah, and his only children a son Dishon and this daughter Abihaiamah. We may also remark that this Anah and this Dishon had each an uncle of the same name respectively (Gen. xxxvi, 20, 21), and the name of another Abilamaah (Gen. xxxvi, 15, 16) to be the chief-tain of an Edomite tribe (ver. 41). Zilcaon was a son of Seir, the original settler of the mountain which went by his name. His descendants were properly called Horites (Gen. xxxvi, 20, 29), but in ver. 20 he is called a Hivite, a term frequently interchangeable for heathen or Hittite. The latter name is twice used for the same purpose. This connection of Esau with the original inhabitants of Iduma will explain his subsequent removal to that region, and the eventual supremacy of his descendants there. His children by Aholibamah were Jashar, Jaalam, and Korah. In Gen. xxxvi, 15, 16, he is called Ẓebon (Companion Gen. xxxvi, p. 325), after Hengstemberg. These sons of Esau rose to the importance of sheikhs ("dukes") in their respective families (those by Aholibamah being especially so styled, Gen. xxxvi, 18) and this was naturally more emphatically the case with his descendant (Gen. xxxvi, 19), for the name Korah is an intercalation, and Amalek is reckoned along with the legitimate children of Eliphaz; comp. the parallel account in 1 Chron. i, 36, where the name Timna is in like manner intercalated), who were probably contemporaneous with the native sheiks mentioned in ver. 29, 30, or but little later. The gradual superiority of the Edomites over the Horites appearing from the fact that the heirs of the latter (ver. 22-28) are not named with this distinction (comp. ver. 20, 21). This double line of chief-tains of the respective tribes appears to have continued for a long time; for in the subsequent genealogy the kings (ver. 31-38) and heads of the Edomite part of the inhabitants (ver. 40, 48), coming down in parallel lines to about the time of the Exode (but from what point dated is uncertain), each appears to have regularly succeeded his predecessor, not by hereditary right indeed, but by that species of common consent, founded upon acknowledged pre-eminence, which is to this day recognised in the election of Arab emirs. See Edomites.

The time for the fulfillment of the compact between the brothers has at length arrived. Isaac is "sick unto death, as well as his father, as his dying was," and his father, on hearing of the death of his son, "was grieved." The present condition of Esau is remarkably changed; the feeling of jealousy which has been characteristic of him has now given place to deep affection, and he is now "sick unto death."
Isaac, however, had lost his sight—indeed, all his senses were dull and feeble. It was therefore not very difficult to pass off Jacob upon him as Esau. Rebekah takes her measures, and, notwithstanding Jacob's fears, succeeds. Isaac, indeed, is not without suspicion, but a falsehood comes to aid Jacob in his otherwise discreditable personation of Esau. The blessing is pronounced, and thus the coveted property and ascendancy are secured. The affectionate admonitions which pass between the deceivers and the abused old blind father stand in painful contrast with the base trickery by which the mother and the son accomplish their disgraceful end. Isaac is blind, but Jacob is still more painful than the former, as it fully brings out those bitter family rivalries and divisions which were all but universal in ancient times, and which are still a disgrace to Eastern society. Esau, in his extreme forgetfulness of the patriarchal blessing, pronounces a blessing upon Jacob. Isaac, who feels the decipied and sightless father, declaring who he is.

"And Isaac trembled very exceedingly, and said, Who? where is he that hath taken venison and brought it me, and I have eaten all of before thou camest, and have blessed him? yea, and he shall be blessed." On this the elder brother, the true eldest, pleads for himself—"Bless me, even me also, O my father." Urging this entreaty again and again, even with tears, Isaac at length said to him, "Behold, thy dwelling shall be the fatness of the earth, and of the dew of heaven from above; and by thy sword shalt thou live, and shalt serve thy brother; and when thou shalt have dominion, thou shalt break his yoke from off thy neck" (Gen. xxvii). Thus, deprived forever of his birthright, in virtue of the irrevocable blessing, Esau but too naturally conceived and entertained a bitter grudge against his brother Jacob, and vowed vengeance. But, fearing his aged father's patriarchal authority, he secretly congratulated himself: "The days of mourning for my father are at hand, then will I slay my brother Jacob" (Gen. xxvii). Thus he imagined that by one bloody deed he would regain all that had been taken from him by the means of his blind old father. He ought not to know a mother's watchful care. Not a sinister glance of his eyes, not a hasty expression of his tongue, escaped Rebekah. Words to the above effect which Esau let drop were repeated to his mother, who thereupon felt that the life of her darling son, whose gentle manner, whose graceful deportment, whose affection, was now in imminent peril; and she prevailed on her younger son to flee to his uncle Laban, who lived in Haran, there to remain until time, with its usual effect, should have mitigated Esau's wrath. B.C. 1957. The sins of both mother and child were visited upon the former. She herself died, and all her household in the attendant anxieties and dangers. By a characteristic piece of domestic policy, Rebekah succeeded both in exciting Isaac's anger against Esau, and obtaining his consent to Jacob's departure—"And Rebekah said to Isaac, I am weary of my life because of the daughters of Heth; if Jacob take a wife such as these, what good shall my life do me?" Her object was attained at once. The blessing was renewed to Jacob, and he received his father's commands to go to Padan-aram (Gen. xxvii, 46; xxviii, 1-5).

When Esau heard that his father had commanded Jacob to take a wife of the daughters of his kinsman Laban, he also resolved to try whether by a new alliance he could propitiate his parents. He accordingly married his cousin Mahalath, the daughter of Ishmael (xxviii, 9). This marriage appears to have brought him into the enmity of his brother Jacob. It was beyond the valley of Arhab. He soon afterwards established himself in Mount Seir; still retaining, however, some interest in his father's property in Southern Palestine. It is probable that his own habits, and the idolatrous practices of his wives and rising family, continued to excite and even increase the anger of his parents; and that he, consequently, considered it more prudent to remove his household to a distance. He was residing in Mount Seir when Jacob returned from Padan-aram, and had then become so rich and powerful that the impressions of his brother's early offences seem to have been almost completely effaced. Jacob, however, feared lest his elder brother might intercept him on his way, to take revenge for former injuries. He accordingly sent messengers to Esau, in order, if possible, to disarm his wrath. Esau appears to have announced in reply that he would proceed to meet his returning brother. When, therefore, Jacob was informed that Esau was on his way for this purpose with a band of forty men, he was greatly alarmed, in fear of that hostility which his conscience told him he had done something to deserve. What, then, must have been his surprise when he saw Esau running with extended arms to greet and embrace him? and Esau fell on his neck, kind and affectionate. Jacob had prepared a present for Esau, hoping thus to conciliate his favor; but, with the generous ardor which characterizes, and somewhat of the disinterestedness which adorns, natures like his, Esau at first courteously refused the gift: "I have enough, my brother; thou knowest my line." (Gen. xxvii, 9.) Jacob passed on to Damascus, and immediately after his departure turns westward across the Jordan (Gen. xxxii, 29, 30). He reached Seir (Gen. xxxiii, 18; xxxiv, 9; xxxv, 1); and took up his abode there, where he passed the remainder of his life. The whole of this encounter serves to show that, if Jacob had acquired riches, Esau had gained power and influence as well as property; and the homage which is paid to him indirectly and by implication, by Jacob, is a demonstration of the most marked and respectful manner, by the females and children of Jacob's family, leads to the supposition that he had made himself supreme in the surrounding country of Idumea. See EDOM.

It does not appear that the brothers again met until the death of their father, about twenty years afterwards. Mutual interests and mutual fear seem to have constrained them to act honestly, and even generously towards each other at this solemn interview. They united in laying Isaac's body in the cave of Machpelah. B.C. 1959. (See ROOT, Pri.Esau in property, Baal, Baal of. 1 Samuel, 1 and 2 Kings.) Then, after their parting, Jacob dwelt in the land of the Canaanites, and all his substance, which he had got in the land of Canaan—such, doubtless, as his father, with Jacob's consent, had assigned to him—and went into the country from the face of his brother Jacob" (xxxv, 29; xxxvi, 6). He now saw clearly that the covenant blessings bestowed upon his children, as that of Jacob, But God doubly allotted the land of Canaan to Jacob's posterity, and that it would be folly to strive against the divine will. He knew also that as Canaan was given to Jacob, Mount Seir was given to himself (comp. xxxv, 9; xxxvii, 8; and Deut. ii, 5), and he was therefore desirous, with his increased wealth and power, to enter into full possession of his country, and drive out its old inhabitants (Deut. ii, 12). Another circumstance may have influenced him in leaving Canaan. He "lived by his sword" (Gen. xxvii, 40), and he felt that the rocky fastnesses of Edom would be a safe and suitable abode for such as by their habits provoked the hostilities of neighboring tribes than the open plains of Southern Palestine. Esau is once more presented to us (Gen. xxxvi) in a genealogical table, in which a long line of illustrious descendants is referred to "Esau, the father of the Edomites" (Gen. xxxvi, 3, 4). The country to which Esau, with his innumerable flocks, retired, was the tract of Mount Seir, from which they gradually disposed of the thinly scattered population that preceded them in its occupancy, and which they continued to occupy. It was a region entirely suited to the nomadic and roving character of the race. But in regard to the rela-
tionship between them and the seed of Israel, the remote descendants of Esau proved less pliant or generous than their progenitor; for from the time that Israel left the land of Egypt, when the two families again came into contact, the posterity of Esau seemed to remember only the old quarrel between the respective heads of the races, and to forget the brotherly reconciliation. A spirit of keenest rivalry and spite characterized their procedure towards Israel; through many a bloody conflict they strove to regain the ascendency which the decree of heaven had destined in the earlier time, and in the time of Israel's backsliding and unfaithfulness they showed themselves already, according to the prophetic word of Isaac, "to break his yoke from off their neck," and to drive the evil to the uttermost. But it was a fruitless struggle; the purpose of Heaven stood fast; the dominion reasserted with the house of Jacob; and the course of the Maccaulanean wars the children of Esau finally lost their independent existence, and became substantially merged in the house of Israel. The decree of Heaven, as we have said, had so fixed it; but that decree did not realize itself arbitrarily; the preference for Israel and his seed was no senseless favoritism; from the first the qualities were there which inevitably carried along with them the superiority in might and blessing; while, on the other hand, in Esau's carnalism, sensuality, godlessness, the destiny of his race was already marked.

If the historical outline now given is supported by the scriptural narrative, the character of Esau has not ordinarily received justice at the hands of theologians. The injurious impression against him may be traced back to a very ancient period. The Targum of Jonathan (Gen. xxiv, 34) sanctified and spread, if it did not originate, the misjudgment by unwarrantable additions to the account given in Genesis. The reason, it states, why Esau did not at once slay his brother was lost, as happened in the case of Cain and Abel, another man-child might be born, and thus he should still be deprived of house and inheritance, and be therefore or solved to wait till the death of Isaac, when the murder of Jacob would leave him in safe and undisturbed possession. Representations made in the Talmud are of a similar tendency (Otho, Lex. Rabb. p. 207; Witwein, N. T. ii, 437; comp. Philo, Opp. i, 551; ii, 441, 475); and on the same principles, in the earlier fragments, the story of the hour, Hist. Orient. p. 53 sq.), Cedrenus gives (Hist. Eccl. p. 34) the story of his having been killed by an arrow discharged by Jacob. The fathers of the church, particularly Augustine, regard Esau as the representative of evil, as the type of one who, as that of the elect (see Stimpel, De saeculo Esau, Jena, 1678), basing these views upon an erroneous interpretation of such passages as Rom. xii, 16; ix, 13. (Shuckford's Connections, ii, 174; Clarke's Comment, on Gen. xxvii, xxviii; Kretzle's Daily Illustr. in loc. ; Niemeyer, Charact. ii, 153 sq.; Baumgarten, Alph. Welthlit. ii, 50 sq.; Bauer, Hbr. Gesch. I, 147; Hochhelter, Jnt. Orient. 1841. No. 35; Sherlock, Works, v; Dupin, Nouv. Bibl. iv; Evans, Script. Dog. i, Roberts, Sermons, p. 134; Puckel, Sermons, l, 96; Simeon, Works, l, 211; Alcock, Apologia for Exo, Plymouth, 1751; Townsend, Sermons [1798], p. 253; Goodwin, Paroch. Sermons, i, 1.) See JACOB.

E'SAU (Heb., Vulg. Sel), given (1 Esd. v, 29) as the name of the head of one of the families of "Temple servants" or Nethim that returned from the captivity; in place of the Zina (q. v.) of the Hebrew text (Ezra i, 40).

E'say (Hebajic, Vulg. Isaia, Isaias), the form in which the name of the prophet Isaiah (q. v.) constantly appears in the A. V. of the New Testament (Eccles. xlvi, 20; 22; 2 Esd. ii, 18). See ESAY.

Eschatology (a discussion of the last things, te-xo-xo), a branch of theology which treats of the doc-

trines concerning death, the condition of man after death, the end of this world period, resurrection, final judgment, and the final destiny of the good and the wicked. We treat it here.

I. In its Biblical aspects, especially as to the doctrine of the Bible concerning the end of the world, denoted by the title of "days," which is applied in the O. T. to the consummation of the Jewish economy by the introduction of the Messianic (Isa. ii, 2; Mic. iv, 1; comp. Acts iii, 1; Heb. i, 2), and in the N. T. is extended to the still expected developments of the first purpose respecting the Church (2 Tim. iii, 1; 2 Pet. iii, 3).

1. The Maccaullean Agr.—In the O. T. propheta the return from Babylon is often made a type of the incoming of the more glorious dispensation of the Gospel. This is the first, more obvious, and most literal of prophetic types, and particularly of Isaiah bearing upon it has therefore a double sense (q. v.) or twofold application. See Restoration of the Jews.

2. The Chaldaean Period.—This is the Christian, as the preceding was the Jewish view of the consummation of the Jewish kingdom and divine economy, so far as relates to the administration of this world. It will be treated under Millennium.

3. The Final Demise of all terrestrial Affair.—This whole branch of the subject is particularly exhibited in the Lord's discourse to his disciples upon the Mount of Olives (Matt. xxiv, xxv), in which are included two scenes of the retribution impending over Jerusalem, and the final judgment, are intimately associated together, in accordance with that almost constant practice in the Hebrew prophets by which one event is made the type and illustration of another much farther in the future. See hypostasis. This is emphatically exemplified in the vaticinations of Isaiah (q. v.), who perpetually refers to the coming glory of Christ under the figure of the nearer deliverance from Babylon, both these demises being projected upon the same plane of prophetic life, without any mention of the interval of time between; likewise in the visions of John in the Revela-

tion (q. v.), where the dr atraxiis personae are generic representations of certain principles constantly reaprearing in the history of the Church rather than confined to particular characters at one time only. Such often repeated views of the existing division of human races into "coming of the Son of Man" and its attendant phenomena, in the sketches or rather glimpses afforded us by the Scriptures into the future. See Sign of the Son of Man.

As a leading passage in Matthew, which forms the leading proof-text of eschatological treatises, the following expository hints will serve to clear up much of the obscurity and ambiguity which has been thrown around the text by the confused manner in which many interpreters have treated its predictions (see Strong's Harmony and Exposition of the Gospels, § 129; Stier, Words of Jesus, in loc.; Whedon, Commentary, in loc.; Nest, Commentary, in loc.).

(1.) The question of the apostles (Matt. xxiv, 3) relates to two distinct subjects, namely, the "coming of the Son of man" and the "end of the world." These two topics, therefore, are discussed by Christ in his reply. (More strictly, there are two questions concerning the first event, namely, "when," and "the sign." Mark and Luke evidently mean to confine their reports of this discourse to this former catastrophe, and therefore they do not mention the second inquiry as to the "end of the world," at all.) Yet, as the questioners apparently supposed that these two events would be simultaneous, or at least intimately connected (as the constant tenor of all former prophecies had naturally made them think), the answer also uses whatever language in treating the latter more in the style which their analogous nature peculiarly required. Still, the Great Teacher could not fail to give them...
true criteria by which to separate these two catastrophes, and for these we are to look in his language. That all the events pictured in Matthew's account as far as xxiv, 34 are connected with the former of these themes, namely, the demolition of Jerusalem and abolition of the Jewish polity, is certain from the declaration at that verse, that they should all occur within the then living generation; and the following verses are so intimately connected with these, as to suggest a continuity of idea and notes of simultaneity, that a disruption anywhere before ch. xxx, 31 would be very harsh and arbitrary. At this point, however, we discover clear intimations of a transition (easy indeed, as the sense is more hazardous, but the expression and metaphor would lead us to expect, yet a real and marked one) to the second subject, the general judgment. The change is introduced by the notes of time, "But [unwarrantably omitted in our translation] when . . . . then . . . ." and by the loftier tone of the style, besides the distinctive mention of "all nations" as the subjects of that adjudication (ver. 32). In the latter portion of Christ's discourse alone is employed the briefer and more general mode of prediction usual with the prophets in prefiguring far-distant events, and here only is the language all exclusively applicable to the final judgment. The expectation of the judgment at a point or intervals other than our Saviour's calculation at other points than those assumed above (xxiv, 55, and especially xxx, 31) will be noticed presently; it is sufficient here to say in general that, as the passages embraced within the medial portion (xxiv, 27-xxv, 53) are designed to be a link of connection between the two large sets of events so connected in character, they naturally assume a style that might be applied to either, borrowing some expressions in describing the former which otherwise would belong exclusively to the latter. See a similarly blended style in describing the ruin of the Thebes (the name of the place "Thebes," comp. with ii, 2; and comp. Matt. xvi, 27, 28.

Many places at the end of Matt. xxiv, 28 the transition to the final judgment; but it is difficult to extend the intimations of consequenteness that follow ("But [immediately after], But [in those days]" over such a change of style as true, the description ensuing in verses 29-31 is unusually allegorical for a prose discourse, but this is explained by the fact that it is evidently borrowed almost wholly from familiar poetic predictions of similar events. Many of these particulars, moreover, may refer, partly at least, in a literal sense, to the first catastrophe of which allusion is made in Luke xxii, 11; and in their utmost stretch of meaning they also hint at the collapse of nature in the general judgment. The objection of anachronism in this application of the "tribulation" of verse 29 as a subsequent event to "the beginning of sorrows," which refers to the incipient stages of the "tribulation" of verse 21, where the previous context shows that the distress of the first siege and preliminary campaigns are especially intended; Luke (verse 24) gives the personal incidents of the catastrophe itself as succeeding, with an allusion to the long desolation of the land that should follow; so that Christ here resumes the thread of prophetic history (which had been somewhat interrupted by the caution against the impostors who were so rife in the brief interim of the suspension of actual hostilities) by returning to the national consequences of the second end of the Heidel. The assignment of these events contained in the ensuing verses, as to take place "after the tribulation" (presumed to be that of the ace of the Jewish struggle), is the strongest argument of those who apply this whole following passage to the final judgment. But that theory overlooks the equal exclamation of "immediately after," and, moreover, fail to discriminate the precise date indicated by "that tribulation." This latter is made (in verse 21 of Matthew) simultaneous with the flight of the Christians, which could not have been practicable in the extremity of the siege, but is directed (in verse 15) to be made on the approach of the besiegers. The consummation intimated here, therefore, refers to the close of the siege (i.e. the end of itself), and the preceding rigors are those of its progress. It ought, moreover, to be considered that the fall of the capital was but the precursor of the extinction of the Jewish nationality (here typified by celestial prodigies); the utter subjugation of the country at large of course following that event. Another interpretation is, that the following passage refers to a second overthrow (the final extermination of the Jewish metropolis under the emperor Adrian in a subsequent war), as distinguished from the first under Titus; this is in fact hardly tenable by the style and language here employed, and would, moreover, require the limit "immediately" to be extended half a century farther, when the living "generation" must have entirely passed away. Nor at this later event could the "redemption" of the Christians properly be said to "draw nigh" (verse 28 of Luke), the Jews having then ceased to have any considerable power to persecute; compare the deliverance prophetically celebrated in Rev. xi, especially verses 8, 13.

(2) In the highly-wrought description of Matt. xxiv, 29; Luke xxxi, 25, 26 (which constitutes the transition point or interval), the desire of our Saviour's calculation at other points than those assumed above (xxiv, 55, and especially xxx, 31) will be noticed presently; it is sufficient here to say in general that, as the passages embraced within the medial portion (xxiv, 27-xxv, 53) are designed to be a link of connection between the two large sets of events so connected in character, they naturally assume a style that might be applied to either, borrowing some expressions in describing the former which otherwise would belong exclusively to the latter. See a similarly blended style in describing the ruin of the Thebes (the name of the place "Thebes," comp. with ii, 2; and comp. Matt. xvi, 27, 28.

Many place at the end of Matt. xxiv, 28 the transition to the final judgment; but it is difficult to extend the intimations of consequenteness that follow ("But [immediately after], But [in those days]" over such a change of style as true, the description ensuing in verses 29-31 is unusually allegorical for a prose discourse, but this is explained by the fact that it is evidently borrowed almost wholly from familiar poetic predictions of similar events. Many of these particulars, moreover, may refer, partly at least, in a literal sense, to the first catastrophe of which allusion is made in Luke xxii, 11; and in their utmost stretch of meaning they also hint at the collapse of nature in the general judgment. The objection of anachronism in this application of the "tribulation" of verse 29 as a subsequent event to "the beginning of sorrows," which refers to the incipient stages of the "tribulation" of verse 21, where the previous context shows that the distress of the first siege and preliminary campaigns are especially intended; Luke (verse 24) gives the personal incidents of the catastrophe itself as succeeding, with an allusion to the long desolation of the land that should follow; so that Christ here resumes the thread of prophetic history (which had been somewhat interrupted by the caution against the impostors who were so rife in the brief interim of the suspension of actual hostilities) by returning to the national consequences of the second end of the Heidel. The assignment of these events contained in the ensuing verses, as to take place "after the tribulation" (presumed to be that of the ace of the Jewish struggle), is the strongest argument of those who apply this whole following passage to the final judgment. But that theory overlooks the equal exclamation of "immediately after," and, moreover, fail to discriminate the precise date indicated by "that tribulation." This latter is made (in verse 21 of Matthew) simultaneous with the flight of the Christians, which could not have been practicable in the extremity of the siege, but is
ESCHATOLOGY

invaders), by which the Christians’ rescue from siege, sack, and especially persecution, was effected; and the ‘trumpet sound’ refers to the warning intimations which the belligerent preparations afforded them, thus giving them at once an assurance and a signal of deliverance. In the similar language of Matt. xii. 41, 49, the primary reference is to the general judgment. But in this passage as in the text it is to be gathered together his elect only, in distinction from the ‘all nations’ of Matt. xxv. 32.

At Matt. xxiv. 44 (comp. Luke xii. 41), the discourse, which previously had been slightly tinged with allusions to the second judicial coming of Christ (verses 29-30), is now almost entirely devoted to that event at its final stage, as the reply to Peter that follows indicates. Still, there is no mark that the transition to the last judgment is effected till ch. xxv. 31.

In the conclusion of the first topic of Christ’s discourse (Matt. xxv. 1-12); comp. Luke xii. 38-39; the parable in Matt. xxi. 33-40 is parallel with an earlier one of our Lord, Luke xix. 11 sq., the near antiquity of the second topic produces almost a double sense in this (and to a degree, in the preceding) parable, which is not so much the effect of direct design as the nature of the language. The treatment of the kindred subject, by the vivid presence to the mind of a sublime one which is soon to be introduced; and, indeed, scarcely any phraseology (especially in the far-reaching style of allegory) could have been consistently adopted which would not have been almost equally applicable to both events. Still, a comparison of verse 13 and ch. xxv. 36, 42 shows that the same occurrences (Jerusalem’s siege and fall) are here chiefly referred to.

3. The imaginative style of the representation of the judgment day (Matt. alone, xxv, 31-36), which is especially betrayed in the comparison with the shepherd, shepherds, their sheep and their desert, is desirable only for poetic ‘drapery,’ needed to portray the actuality of that scene of the invisible world; the body of reality couched under it consists in the fact of a universal disinhibition of mankind at a future set time by Christ in the capacity of judge, according to the eternal decree of God, which is the argument of a corresponding destiny of happiness or misery Comp. Rom. xiv, 10, 12; 2 Cor. v. 10; 1 Thess. iv. 16.

Hamb. 1789, 1784), Moldenhauer (ib. 1784, bis). See Kahle, Biblische Exegetik (Got. 1750).

II. THEOLOGICAL EXEGETICAL—A subdivision of systematic theology, and particularly of dogmatic theology. It generally constitutes the concluding part of systematic theology, as it treats of what constitutes both the individual Christian and for the Christian Church, as a whole, the completion of their destiny. As eschatology presupposes a belief in the immortality of the soul, some writers on dogmatic theology (as Hase) treats of it in connection with the doctrine of man, and before they treat of the Church. Others connect the doctrine of death with the doctrine of sin. On some points of eschatology, different views were held at an early period of the Church. Origen understood a passage in the Epistle to the Romans on the Apocalypse (q. v.) as meaning a final reconciliation and salvation of the wicked, and that the first will be found only at that period. See Restorationists. In modern times, some go so far as to deny all punishment after the present life, and asserting the immediate salvation of all men [see Universalists]; while others teach that mortality will be the lot of only the good, and that the wicked, after their death, will be annihilated. See Annihilationists. See also the articles Death, Intermediate State, Judgment, Heaven, Hell, Resurrection, Immortality. The Church of Rome developed the theory of a future state, different from heaven and hell, for which see the article Purgatory. No point connected with eschatology has from the earliest period of the Church been more productive of excited controversy than the doctrine of the second advent of Christ and of the Millennium. For the history of this doctrine, see the article Millennium. In German there are separate works on the eschatology of the Church and on the doctrine of the last things. H. W. Escobar y Mendones, Antonio, a Spanish Jesuit and noted casuist, was born at Valladolid in 1558, and took the vows of the order of Jesuits in 1564. He became very eminent as a preacher, and is said to have preached daily (sometimes twice a day) for fifty years. He was also a prolific writer, leaving more than forty folio volumes of ascetic divinity, sermons, casuistry, etc. His Liber Theologiae Moralis (Lyons, 1646, 7 vols. 8vo) passed through many (29 in Spain) editions, and was long the favorite text-book of the Jesuits. He also wrote Universe Theologiae Moralis problemata (Lyons, 1652, 2 vols. fol.); Universe Theol. Moralis receptores sententiae, etc. (Lyons 7 vols. fol.). Escobar had the best of Pascal’s complete edition of the letters, a fact which will carry his name to the latest posterity. His “liberality” in morals was so excessive that even some of the Jesuits was compelled to disavow some of his doctrines. His complete works fill 42 volumes. He died July 4, 1693.—Hoefler, Nouv. Biog. Générale, xvi, 375; Alemagno, Biblioth. Scriptorum Soc. Jesu (Louvain, 1851).

ESCURIAL, or Escurial, a city of Spain, twenty-four miles N.W. of Madrid, containing a celebrated convent palace generally called Escurial. The convent, built for 160 monks of the order of Jerome, was erected 1563-81, by Philip II, in fulfillment of a vow made at the battle of St. Quentin, fought on the anniversary of St. Lawrence. It stands in the valley of the Guadarrama, on a line of golden memorial of the martyrdom of the saint, and the king’s palace forms the handle. The buildings are 740 feet long, inclosing 20 courts, in which are 63 fountains; there are 17 cross paths, 890 doors, 1060 columns, 5600 windows, 6200 rooms and 32 churches surmounted by cupolas. A convent church with 48 altars in side chapels. The main altar is adorned by a statue of St. Lawrence in solid silver, weighing 450 pounds. Underneath is the costly burying vault of the king, of marble and Jasper. The library of the convent contains some 460 MSS., 1905 Arabic, and is the principal collection of Ori-
ental history and literature. Many of the MS. and other treasures were lost when the place was sacked by the French in 1808. Besides these, there are some 32,143 vols. of ancient authors, principally on history. The picture-gallerv contains some 405 original paintings. A park surrounds the king's palace, or Casa del Paço. —Penny Cyclopaedia; Herzog, Real-Encyklop. iv, 157.

Esdraela. See Jezerel.

Esdrael'lon. See Edraelon.

Edraē'lon [from v. r. "Edraē'lon"] (or rather Edraeleon, "Edraē'lon") is better "Edreke", or "Edreke", "Judith", viii, 5; "Edrekhe", Judith, viii, 3, where it is called "the great plain," as simply in Josephus everywhere, τὸ πάχυν πάνευ, the name of a valley or large bottom, a Greekized form derived from the old royal city of Jezerel, which occupied a commanding site, near the eastern extremity of the plateau, on a spur of Mount Gilboa. "The great plain of Edraeleon" extends across central Palestine from the Mediterranean to the Jordan, separating the mountain ranges of Carmel and Samaria from those of Galilee. The western section of it is the proper plain of Acre (modern Akka). The main body of this plain is a triangle. Its base on the east extends from Jenin (the ancient Engannim) to the foot of the hills below Nazareth, and is about 15 miles long; the north side, formed by the hills of Galilee, is about 12 miles long; and the south side, formed by the Samaria range, is about 15 miles. The apex on the west is a narrow pass opening into the plain of Akka. This vast expanse has a gently undulating surface—in spring all green with corn where cultivated, and rank weeds and grass where neglected—dotted with several low gray tells, and near the sides with a few olive groves. This is that valley of Megiddo (מגידב, מִגִּדְדָה, ro called from the city of Megiddo [q. v.], which stood on its southern border), where Barak triumphed, and where king Josiah was defeated and received his death-wound (Judg. vi, 2; Chron. xxxv). Probably, too, it was before the mind of the apostle John when he figuratively described the final conflict between the hosts of good and evil who were to gather to a place called Armageddon (Armageddon, from the Heb. יָרָּגָד, יָרָּגָד, that is, the city of Megiddo; Rev. xvi, 16). The river Kishon —"that ancient river"—so fatal to the army of Sisera (Judg. vi, 21)—drains the plain, and flows off through the pass westward to the Mediterranean.

From the base of this triangular plain three branch plains extend toward the sea, like fingers from a hand, divided by two bleak gray ridges, the one called by the familiar name of Mount Gilboa; the other called by Franks Little Hermon, but by natives Jebel ed-Duby. The northern branch has Tabor on the one side, and Little Hermon on the other; into it the troops of Barak descended from the heights of Tabor (Judg. iv, 6); and on its opposite side are the sites of Nain and Endor. The southern branch lies between Jenin and Gilboa, terminating in a point among the hills to the eastward; it was across it that Abaziah fled from Jebu (2 Kings ix, 27). The central branch is the richest as well as the most celebrated; it descends in green, fertile slopes to the banks of the Jordan, having Jezerel and Shunem on opposite sides at the western end, and Bethshean in its midst toward the east. This is the "valley of Jezerel" proper—the battle-field on which Gideon triumphed, and Saul and Jonathan were thrown (Judg. vii, 1 sq.; 1 Sam. xxix and xxxi). Indeed, a large part of the most sanguinary battles fought in Palestine in every age have been waged upon this eventful plain.

Two things are worthy of special notice in the plain of Edraeleon, our richnesse. Its untiring expanse of verdure contrasts strangely with the gray, bleak crowns of Gilboa, and the rugged ranges on the north and south. The gigantic thistles, the luxuriant grass, and the exuberance of the crops on the few cultivated spots, show the fertility of the soil. It was the frontier of Zebulun—"Rejoice, Zebulun, in thy going out" (Deut. xxxii, 18). But it was the special portion of Issachar—"And he saw that rest was good, and the land pleasant; and he is a goodly father to bear, and became a servant unto tribute" (Gen. xxiii, 15). 2. Its desolation.—If we except the eastern branches, there is not a single inhabited village on its whole surface, and not more than one sixteenth of its soil is cultivated. It is the home of the wild, wandering Bedouin, who has been driven by the pressure of population to seek its flocks and flocks—often in search of plunder; and when hard pressed can speedily remove their tents and flocks beyond the Jordan, and beyond the reach of a weak government. It has always been insecure since history began. The old bedouins fought victoriously through it in their iron chariots (Judg. iv, 6, 7); the nomad Midianites and Amalekites—those "children of the East," who were "as grasshoppers for multitude," whose "camels were without number"—devoured its rich pastures (Judg. vi, 1; vii, 11); the Philistines long held it, established their hold at Ekron (Judg. xix, 1, 4; xxxi, 10); and the Syrians frequently swept over it with their armies (1 Kings xx, 26; 2 Kings xiii, 17). In its condition, thus exposed to every hasty incursion and to every shock of war, we read the fortunes of that tribe which for the sake of its richness consented to aid in the destruction of the Bethshean state—"the famous Issachar, in thy tents Is; Issachar is a strong ass, crouching down between two burdens; and he saw that rest was good, and that the land was pleasant, and bowed his shoulder to bear, and became a servant unto tribute" (Gen. xlix, 14, 15; Deut. xxxiii, 16). Once only did this tribe shrink from the yoke—when under the heavy pressure of Sisera, "the chiefs of Issachar were with Deborah" (Judg. v, 15). Their exposed position and valuable possessions in this open plain made them anxious for the succession of David to the throne, as one under whose powerful protection they would enjoy that peace and rest which they loved; and they joined with their neighbors of Zebulun and Naphtali in sending to David presents of the richest productions of their rich country (1 Chron. xiii, 32, 40). See Issachar.

The whole borders of the plain of Edraeleon are dotted with ancient and historic and picturesque and romantic places. Here we group them together, while referring the reader for details to the separate articles. On the east we have Endor, Nain, and Shunem, ranged round the base of the "hill of Moreh;" then Bethshean in the centre of the plain where the Valley of Jezerel opens to the sea; then Tabor; then Gilboa; then the "well of Harod," and the ruins of Jezerel at its western base. On the south are Engannim, Tannach, and Megiddo. At the western apex, on the overhanging brow of Carmel, is the scene of Eliah's sacrifice; and close by the foot of the mountain below runs the Kishon, on whose banks the false prophets of Baal were slain.

On the north, among places of less note, are Nazareth and Tabor. The modern Syrians have forgotten the ancient name as they have forgotten the ancient history of Edraeleon, and it is now known among them only as Mery Amer, "the Plain of the Son of Amer." A graphic sketch of Edraeleon is given in Stanley's Syria and Pales. p. 327 sq.; see also Porter, Handbook for Syria and Palestine, p. 351 sq.; Jowett, Christian Researches, p. 146, 222; Robinson, Researches, new edition, ii, 215-30, 866; iii, 118 sq.; Thomson, Land and Book, ii, 216 sq.; Walfers, De Myraulōn τoν Παλαιστίνην (Lips. 1792). See Jezerel.

Eis'dra (Εἰσδρα; Vulg. Edraes), the Greekized form, used throughout the Apocalypse (1 Esd. viii, 3, 7, 7, 8, 11, 18, 19, 29, 35; 9, 1, 24; 10, 9, 46, 46; 2 Esd. i, 1; ii, 10, 38, 42; vi, 10; vii, 2, 25; vii, 19; xiv, 1, 36), of the name of the ebra.
(q. v.). In several manuscripts of the Latin Vulgate, as well as in all the printed editions anterior to the decree of the Council of Trent, and in many since that period, the Apocrypha is placed among the books of Ezra. Each of these books was divided into the two parts, the first part of which was the apocryphal books of Ezra and Nehemiah, and the second part of which was the subject of the articles below. The same are the same which are called 1st and 2d Ezra in the English Authorized Version. For these two parts the abbreviations of the canonical books, as in 1st and 2d Ezra, in d. Apos. p. 335 sq.; Hertzien, Gesch. d. Israel, p. 920 sq.; Ewald, Gesch. iv. 131 sq.; Keil, Erleid., s. d. 577 sq.; Davidson, Text of O. T. p. 587 sq. See APOCYPHTA.

ESDRAS, FIRST BOOK OF. This is the first of the apocryphal books in the English translations of the Bible (viz., Coverdale, Matthews, Taverner, the Geneva Bible, Cranmer's Bible, the Bishops' Bible, the A. V.), which followed closely the translations of the Zurich version, which were the first that separated the apocryphal from the canonical books. It must, however, be observed that Luther himself never translated the apocryphal portions of Ezra, because he regarded them as unworthy of a place among the apocrypha (see Apocrypha).

1. Title and Position.—This book has different titles. In some editions of the Sept. it is called Μετικης τον Ιερουσαλημ, the Priest (Cod. Alex.), which is equivalent to Ezra, who, by way of eminence, was styled "the priest" or "the scribe," in others it is designated Καλντος, Ezra, while in the Targum, the modern translation of the Sept., as well as in the old Latin and the Syriac, it is called "the first book of Ezra," and accordingly is placed before the canonical Ezra, which is called "the second book of Ezra," because the history it gives is in part anterior to that given in the canonical book. In the Vulgate, again, where Ezra and Nehemiah are respectively styled the first and second book of Ezra, this apocryphal book, which comes immediately after them, is called "the third book of Ezra." Others, again, call it the second book of Ezra (Isidore, Orig. vi. 2), because Ezra and Nehemiah, which it follows, were together styled the first book of Ezra, according to a very ancient practice among the Jews, who, by putting the two canonic books together, obtained the same number of books in the Scriptures as the letters in the Hebrew alphabet; and others call it Ezechiel, in contrast to the canonical Ezra, in which the name of Ezra is given to it in the A. V. is taken from the Geneva Bible; the older English translations (viz., Coverdale's Bible, Matthew's Bible, the Bishops' Bible), as well as the sixth article of the Church of England (1571), following Luther and the Zurich Bible, call it the third Ezra, according to the Vulgate, since the Council of Trent (1546), this book has been removed from its old position to the end of the volume in the Sixtine and Clementine editions of the Vulgate. In the list of revisers or translators of the Bishops' Bible, sent by Archbishop Parker to Sir William Cecil, with the portion revised by early Ezra, Ezra, Nehemiah, Esther, and the apocryphal books of Earsas seem to be all comprised under the one title of Earsas. Barlow, bishop of Chichester, was the translator, as also of the books of Judith, Tobit, and Sapientia (Corresp. of Archb. Parker, 1st edn. 1852, p. 110). See Apocrypha.

II. Design and Contents.—The object of this book, as far as its original portion is concerned (i. 1−6), is to excite the heathen rulers of Judaea to liberality and kindness towards the Jews, by depicting the good example of Darius, from whom Zerubbabeles obtained permission, by the aid of wisdom, to return with his brethren to Palestine, and to rebuild the city and the Temple. This design is worked out in the following attractive story. Darius, having given a sumptuous feast to all his subjects in the second year of his reign, retired to rest (iii. 1−3); when asleep, his three bodyguards, Zerubbabel being one of them, proposed each to write a maxim stating what he thought was the most powerful thing in the world, and the king rewarded the wisest writer (ver. 4−9). Accordingly, they all wrote: one said "Wine is the most powerful;" the other, "A king is the most powerful;" while Zerubbabel wrote, "Womcn are very powerful, but truth conquers all." The slips containing these maxims were put under the king's seal, and given to him when he awoke (ver. 10−12). When he had read them he immediately sent for all his magistrates, and, having read these maxims before them (ver. 13−15), called upon the three youths to explain their sayings (ver. 16, 17). The first one of the three undoubtedly, but laboriously, wrote about the power of wine, in which man made manifest in different ways (ver. 18−24): the second descended upon the unlimited power of royalty, illustrating it by various examples (iv. 1−12); while Zerubbabel discoursed upon the mighty influence of women, frequently contrasting the power of wine and monarchy, and then, in praise of truth so eloquently, that all present exclaimed, "Great is truth, and mightiest above all things" (ver. 13−41). Darius then offered to Zerubbabel anything he should ask (ver. 42), whereupon he reminded the king of his vow to rebuild Jerusalem and return the sacred vessels when he should fall into the hands of the Persians. When the king stood up, kissed Zerubbabel, wrote to all officials to convey him and all his brethren to Palestine, and to supply all the necessary materials for the rebuilding of the Temple (ver. 48−63).

This is proceeded and followed by descriptions of events which constitute the whole as one continuous narrative, relating in historical order the restoration of the Temple-service first under Josiah, then under Zerubbabel, and finally under Ezra, which are compiled from the records contained in the books of Chronicles, Ezra, and Nehemiah, as follows:

1. Chap. i. corresponds to Chron. xxxvi, 1, and xxxvi, giving an account of Josiah's magnificent celebration of the Passover-feast in the eighteenth month of his reign, and continuing the history till the Babylonian captivity.
2. Chap. ii. 1−15, corresponds to Ezra i. 1−11, recording the return of the Jews from Babylon under the guidance of Sana-basar in the year 538 B.C.
3. Chap. iii, 15−30, corresponds to Ezra iv, 7−34, giving an account of Artaxerxes' prohibition to build the Temple till the second year of Darius.
4. Chap. iii. 1−6, contains the original piece.
5. Chap. iv. corresponds to Ezra ii. 1−36, giving a list of the persons who returned with Zerubbabel, describing the commencement of the building of the Temple and the obstacles with which it was met, and lapsed "for the space of two years" until the reign of Darius.
6. Chap. vi. 1−11, 15, corresponds to Ezra v. 1−11, 22, giving an account of the rebuilding of the Temple by Zerubbabel in the reign of Darius, of its completion in the sixteenth year of this monarch's reign, and of the commencement of the Temple service.
7. Chap. vii. 1−24, corresponds to Ezra vii. 1−24, describing the return of Ezra with his colony, and the putting away of the strange wives.

The original piece around which all this clusters evidently was the cause of this transposition and remodelling of the narrative contained in the canonic book of Ezra. It has, however, been assumed that Zerubbabel returned to Jerusalem with a portion of his brethren in the second year of Darius, the compiler naturally placed Ezr a ii. 1−5, 5, which gives the list of those that returned, after the original piece, for it belongs to Zerubbabel's time, according to the original plan of the story, after Ezra iv. 7−24, because Ezra (Ezra iv. 24) led him to suppose that Artaxerxes reigned before Darius. Hence a twofold design in the compiler is discernible. One was to introduce and give scriptural sanction to the legend about Zerubbabel, which may or may not have a historical base, and may have been but a separate work; the other was to explain the grand obscurities of the piece of Ezra, and to present the narrative, as the author understood it, in historical order, in which, however, he has signaliy failed. For, not to advert to
ianumerable other contradictions, the introducing of the opposition of the heathen, as offered to Zerubbabel after he had been sent to Jerusalem in such triumph by Darius, and the describing of that opposition as lasting "until the reign of Darius" (v. 78), and as put down by an appeal to the decree of Cyrus, is such a palpable inconsistency as is alone sufficient quite to discredit the authority of this book. It is not in evidence that it is a forgery made up of scraps by several different hands. At all events, attempts to reconcile the different portions with each other, or with Scripture, is lost labor.

111. Unity and Original Language.—Th. ...ove and of its contents shows that the book gives us a consecutive history de templo restitutio, as the old Latin tersely expresses it. It is, however, not complete in its present state, as is evident from the abrupt manner in which it concludes with Neh. viii, 12. We may therefore legitimately presume that the compiler intended to add Neh. viii, 13-18, and perhaps also ch. ix. Josephus, who follows the history given in this book, continues to speak of the death of Ezra (Ant, xii, 5, 5), from which it may be concluded that it originally formed part of this narrative. More venturosor are the opinions of zoom, that the book is belon- gingly to this second book of Maccabees Gis. Vorträge, p. 29), and of Eichhorn, that 2 Chron. xxxiv followed the abrupt breaking off (Einleitung in d. Apokr. p. 345 sq.).

As to its original language, this compilation is undoubtedly made directly from the Hebrew, and not from the writings of the present compiler. He is in such evident from the rendering of אֻנָּה הָעִיר by יִזְכָּר עִיר (compare i, 11 with 2 Chron. xxxiv, 12), and of מִי יַעֲקֹבְּוּ by כֵּן נָעַץ יֶרֶךְ (reading הָעִיר) (comp. i, 53 with 2 Chron. xxxiv, 19; see also ii, 7-9 with Ezra i, 4, 6; ii, 17 with Ezra iv, 9; ii, 16 with Ezra iv, 7; ii, 24 with Ezra iv, 16; ix, 10 with Ezra x, 4), since these can only be accounted for on the supposition that the book was compiled and translated from the Hebrew The translator, however, did not aim so much as to be literal as to produce a version compatible with the Greek idiom. Hence he sometimes abbreviated the Hebrew (comp. i, 10 with 2 Chron. xxvii, 10-12; ii, 15, 16 with Ezra iv, 7-11; v, 7 with Ezra v, 6, 7; vi, 22 with Ezra v, 4; vii, 6 with Ezra vii, 6; viii with Ezra vii, 15; vii, 20 with Ezra vii, 22), and sometimes tried to make it more intelligible by adding some words (comp. i, 56 with 2 Chron. xxvi, 20; ii, 5 with Ezra i, 8; ii, 9 with Ezra i, 4; ii, 16 with Ezra iv, 6; ii, 18 with Ezra iv, 12; v, 40 with Ezra ii, 63; vii, 54 with Ezra vii, 5; v, 62 with Ezra iv, 1; vi, 41 with Ezra ii, 64; vi, 8 with Ezra vii, 14; vi, 9 with Ezra v, 8; vii, 9 with Ezra vi, 18). The original portion, too, is a Palestinian production, embellished to suit the Alexandrian taste. The Hebrew forms of it may be seen in Josephus (Ant, xii, 5, 1) and Joseph ben-Gonio (ib. c, 6, p. 47 sq., ed. Breithaupt).

IV. Author and Date.—As regards the time and place when the compilation was made, the original portion is that which alone affords much clue. This seems to indicate that the writer was thoroughly conversant with Hebrew, and not as contemporary with the events narrated, appears from the indiscriminate way in which he uses promiscuously the phrase Medes and Persians, or Persians and Medes, according as he happened to be imitating the language of Daniel or of the book of Esther. The allusion in iv, 23 to "sailing upon the sea and upon the riv- er," for the purpose of "robbing and stealing," seems to indicate a residence in Egypt, and an acquaintance with the lawlessness of Greek pirates there acquired. The phraseology of v, 78 savors also strongly of Greek rather than Hebrew. If, however, as seems very probable, the legend of Zerubbabel appeared first as a separate piece, and was afterwards incorporated into the narrative made up from the book of Ezra, this Greek element in the present text is not as to the language in which the original legend was written. The expressions in iv, 40, "She is strength, kingdom, power, and majesty of all ages," is very like the doxology found in some copies of the Lord's Prayer. This may be retained by us, "She is the king- dom, and the power and the glory forever." But Lightfoot says that the Jews in the Temple service, instead of saying Amen, used this antiphon, Blessed be the Name of the Glory of His Kingdom forever and ever (Works, vi, 427). Thus the resemblance may be accounted for by their being both taken from a common source.

Whoever the author was, he seems to have lived in Palestine (comp. v, 47), and certainly was a master of Greek, as is evident from his superior style, which resembles that of Symmachus, and from his success- ful presentation of the story as the main theme of this book (compare Ez. viii, 5 with Ezra vii, 17; ix, 18 with Ezra x, 14). The compiler must have lived at least a century before Christ, since Josephus follows his narrative of the times of Ezra and Nehemias (Ant, xii, 5; x, 43). The book must therefore have existed for some time, and the compiler must have had access to ch. v, which v. would not prove anything to the Jewish historian to prefer its description of those days to that of the canonical books.

V. Canonicity and Importance.—This book was never included in the Hebrew canon, nor is it to be found in the catalogue of the Hebrew Scriptures given by the early fathers, e.g., Melito, Origen, Eusebius, Athanasius, Gregory Nazianzen, Hilary of Poitiers, Cyril of Jerusalem, the Council of Laodicea, and many others; and St. Jerome emphatically warns us "not to take pleasure in the dreams of the 3d and 4th apocry- phal books of Ezra" (Pref. in Esdr. et Nehem.). The councils of Florence (1438) and Trent (1546) decided against its canonicity. The reason of this last exclusion seems to be that the Tridentine fathers were not aware that it existed in Greek; for it is not in the Complutensian edition (1515), nor in the Biblia Regia. Vatalinairst says, "I have never seen a Greek copy of this book, in the preface to the apocryphal books, speaks of it as only existing in some MSS. and printed Latin Bibles. Baduel also, a French Protestant divine (Bibl. Crut.) (about 1556), says that he knew of no one who ever seen a Greek copy. For this reason it seems it was excused from the Canon, though it has certainly quite as good a title to be admitted as Tobit, Judith, etc. It has indeed been stated (Bp. Marsh, Compar. View. ap. Soames, Hist. of Ref. ii, 608) that the Council of Trent, in excluding the two books of Esdras, allowed Augustine's Canon; but this is not true, for Augustine (de Doctr. Christ. Lib. ii, 15) distinctly mentions among the libri canonicí Esdra duo; and that one of these was our 1st Esdras is manifest from the quotation from it given in his De Civ. Dei. Hence it is also sure that it was included among those pronounced as canonical by the then orthodox in the 2d century, e.g. 268 or 418, where the same title is given. Esdra libri duo: here it is to be noticed by the way that Augustine and the Council of Carthage use the term canonical in a much broader sense than we do; and that the manifest ground of considering them canonical in any sense is their being found in the Greek copies of the Sept. in use at that time. Luther would not even translate it, "because there is nothing in it which is not better said by Esop in his Fables, or even in much more trivial books." (Vorrede auf den Baruch): the version given in the later editions of Luther's Bible is the work of Daniel Cranmer, and the Protestant
Church generally has treated it with great contempt, because it contradicts the canonical books of Ezra and Nehemiah. On the other hand, Josephus, as we have seen, regards it as a great authority, and it was treated with great reverence by the Greek and Latin fathers. St. Augustine mentions it among the canonical books (De Libr. Haer. iii. ii. 19), and quote it in the famous passage, "Truth is the strongest" (ch. iii. 12), as Ezra's prophecy respecting Christ (De Cæsariæ. Dei. xviii. 16); the same sentence is quoted as Scripture by Cyprian (Epist. lxxxiv.; comp. also Clemens Alexandrinus, Strom. i. 1; Athenæus, Deipn. Fab. Mixt. Art. xxii. 375; Justin Martyr, Dial. cum Tryph.); Modern criticism has justly taken the middle course between treating it with contempt and regarding it as canonical, and has recognised in it an important auxiliary to the settling of the text, and to the adjusting of the facts recorded. Consequently, Ezra, as Nehemiah, can safely be said to have been evidently made from a different recension of the Hebrew, and has some readings and divisions preferable to those contained in the canonical books (comp. v. 9 with Ezra ii. 12; ix. 12 with Ezra x. 6; ix. 16 with Ezra x. 16). Botth Bertheau in his commentary on Nehemiah, and Neumayer in his commentary (Handb. pt. xviii.), and Fritzsch in his commentary on the apocryphal Ezra (Ezech. Handb. s. d. Apokr. pt. i.), have shown the important services which the canonical and apocryphal records may render to each other.

VI. There are no separate commentaries on the first book of Esdras, and the literature pertaining to it is given under foregoing heads.

ESDRAS. SECOND BOOK or, I.e. the second in the order of the apocryphal books as given in the English translations of the Bible, which follow the Zurich Bible.

I. Title and Position.—The original designation of this book, which is also properly called the Greek Church, is Ἐσθραηιος Ἐσθραη, or παναθυνήν Εσθραη, the Revelation or Prophecy of Ezra (comp. Nicodorus, apud Fabric. Cod. Psalm. V. 7. ii. 176; Cod. Apocr. V. 7. i. 95 a.); Montfaucon, Antiqu. Codex, p. 194). The designation "1 Ezra," which it has in the Arabic and Ethiopic versions, arises from the fact that it was placed before the canonical Ezra because it begins a little earlier (i.e. B.C. 588) than the Hebrew Ezra. It is called "2 Ezra" in the Latin version because it follows the canonical books Ezra and Nehemiah, which were together styled the first Ezra, and it is still more generally (4 Ezra), a "name given to it by St. Jerome (comp. Prof. in Esdr. et Nehem.), because it is in most of the Latin MSS. the fourth book of their argument, 3 Ecclesiasticus, and it is placed in the following order: 1 Ezra, i.e. the canonical Ezra; 2 Ezra, i.e. Nehemiah; 3 Ezra, i.e. 1 apocryphal Ezra; and 4 Ezra, i.e. this book.

The name "4 Ezra" is retained by Luther, the Zurich Bible, Coverdale, Matthew's Bible, Cranmer's Bible, the Bishops' Bible, and in the 6th article of the Church of England (1571). The name "2 Esdras," given to it in the A.V., is taken from the Geneva Bible, and is the title given to it by the author himself (2 Esdr. i. 1). This book, like the former one, is placed at the end of the Vulgate, in the nintine and Clementine editions, because it has been excluded from the Canon by the Council of Trent.

II. Design and Plan.—The object of this book was to comfort the chosen people of God who were suffering under the grinding oppression of the heathen, by assuring them that the Messiah had appointed a time of deliverance when the oppressors shall be judged, and the ten tribes of Israel, in union with their brethren, shall return to the Holy Land to enjoy a glorious kingdom which shall be established in the days of the Messiah. This is gradually developed in an introduction, and several apocalyptic revelations, or visions, in which Ezra is instructed in the mysteries of the moral world, as follows:

1. Introduction (iii. 1-36, A. V.; or i. 1-36, Ethiopic Ver.).—When on his couch in Babylon, in the 30th year after the destruction of Jerusalem (B.C. 558), mourning over the depraved fate of his brethren (ver. 1-3), and recounting the dealings of God with mankind generally (ver. 4-15), and with his church in particular; in a sense of their sinful nature inherited from Adam (ver. 13-22), for which the Temple was destroyed and the city delivered into the hands of Gentiles (ver. 23-27), Ezra asked God why the heathen sinners of Babylon are spared, whilst the people of his covenant are so unsparingly punished (ver. 28-30)?

2. First Revelation (iv. 1-5, A. V.; ii. 1-iii. 23, Eth.).—In answer to this, the angel Uriel is sent, who, after cursing the presumptuousness of a short-sighted man in trying to fathom the unsearchable dealings of God in the history of his people, warns him to continue to pray and fast seven days (ver. 22-15).

3. Second Revelation (v. 16-21, 34, A. V.; iii. 24-iv. 37, Eth.).—Having fasted seven days according to the command of the angel, and against the advice of the heathen (ver. 16-21), Ezra again renders himself to God, asking why he does not punish his sinful people himself rather than give them over to the heathen (ver. 22-30)? Uriel, who appears a second time, after referring again to the inescapable judgments of God (ver. 31-36), reveals to Ezra, according to promise, more distinctly what shall be the signs of the latter days, saying that with Ezra (the Iudæamæ) the present world will terminate, and the world to come will begin with Jacob (vi. 1-10), whereupon the day of judgment will follow, and be announced by the blast of a trumpet (ver. 11-20); Enoch and Elias, the fore-runners of the Messiah, shall appear (ver. 20), and sin and corruption will be destroyed (ver. 27, 28); tells him to be comfortable, patient, and resigned, and that he shall hear something more if he will fast again seven days (ver. 29-34).

4. Third Revelation (vi. 35-ix. 25, A. V.; iv. 38-ix. 27, Eth.).—The fasting being over, Ezra again appeals to God, to know how it is that his chosen people, for whom this wonderful world was created, are deprived of their inheritance (ver. 35-39)? Whereupon Uriel appears a third time, tells him that it is because of their sin, (ver. 40-45), their rejection of their Messiah, the resurrection, the judgment, and the things which will come to pass, concluding with an admonition to Ezra to fast and pray again (ver. 26-ix. 25).

5. First Vision (ix. 26-x. 99, A. V.; ix. 28-xxx. 74, Eth.).—After appealing again to God in behalf of his brethren (ver. 26-37), Ezra suddenly saw a woman in the deepest mourning for her only son, who had been born to her after being married thirty years, and who died on the day of his nuptials (ver. 38-1), and she would not be comforted (ver. 2-4). He rebuked her for being so despondent about the loss of one son, when Sion was bereaved of all her children (ver. 4-14), and recommended her to submit to the dealings of God (ver. 15-24); her face speedily shone very brightly, and she disappeared (ver. 25-27); whereupon Uriel appeared to Ezra, and told him that the woman is the church of Sion (x. 1-24), and that in thirty years wherein no sacrifice was offered in her, her first-born is the Temple built by Solomon, his death on the day of his marriage is the destruction of Jerusalem, and the extraordinary brightness of the mother's face is the future glory of Sion (ver. 29-34).

6. Second Vision (xi. 1-58, A. V.; x. 1-111, 58, Eth.).—Ezra in a dream had a revelation of the latter days under the figure of an eagle coming up from the
sea with three heads and twelve wings, which afterwards produced eight smaller wings spread over all things, and reigning over all the world (ver. 1-7). These wings, beginning from the right side, according to a voice which proceeded from the body of the eagle, regained successively the whole world, and perished so that there remained six small wings (ver. 8-23), which, however, in attempting to rule, also perished, and the three heads only were left on the eagle's body (ver. 24-31). These now reigned, one after the other, and it so happened that a single head remained (ver. 25-30). A lion (the Messiah) declared to the eagle that all his wings and heads were destroyed because he ruled the earth wickedly (ver. 36-46); then the body and whatever was left of the eagle were burnt in fire (xii, 1, 2). Ezra awoke, and having prayed for the intercession of this vision (ver. 3-8), was told by the angel that the eagle was the fourth monarchy which Daniel saw, and was admonished again to fast and pray (ver. 10-51).

7. Third Vision (xiii, 1-58, A. V.; xili, 1-64, Eth.).—Ezra then had another dream, in which he saw a mighty angel coming with a great crowd; he was like a man, who destroyed all his enemies with the blast of his mouth, and gathered around him large multitudes (ver. 1-13). On awaking, Ezra was told by the angel that it was the Messiah, who shall gather together the ten tribes, lead them to their holy land, and give them Sion "prepared and built for them" (ver. 14-58).

8. Conclusion (xiv, 1-48, A. V.; xiv, 1-52, Eth.).—Three days later, the voice which spoke to Moses in the bush tells Ezra that the latter days are at hand (ver. 1-12), and his house in order, reproves those that are living (ver. 13-18), and writes down, for the benefit of those who are not yet born, ninety-four books, i.e., the twenty-four inspired books of the O. T. which have been burnt, and seventy books of divine mysteries, which he only did with the help of scribes (xv, 1-14). The angel, recovered Scriptures to be communicated to all, and the Caballistic books only to the aages (ver. 45-48).

The chief characteristics of the "three-headed eagle," which refer apparently to historic details, are "twelve feathered wings" (duodecem ale pennorum), "eight counter-feathers" (contrarius penes, "eight heads"); but, though the writer expressly interprets these of kings (xii, 14, 20) and "kingdoms" (xiii, 23), he is, perhaps intentionally, so obscure in his allusions that the interpretation only increases the difficulties of the text. It is, at least, not considered certain—the eagle can typify no other empire than Rome. Notwithstanding the identification of the eagle, the fourth empire of Daniel (comp. Barnabas, Epist. p. 4), it is impossible to suppose that it represents the Greek kingdom (Hilgenfeld; compare Volkmar, Dio- riet Bouch Euxor, p. 36 sq.). The power of the Ptolemies could scarcely have been described in language which may be rightly applied to Rome (xi, 2, 6, 40); and the succession of kings quoted by Hilgenfeld to represent "the twelve wings," preserves only a faint resemblance to the imagery of the vision. But then, if it is established that the interpretation of the vision is to be sought in the history of Rome, the chief difficulties of the problem begin. The second wing (i. e. king) rules twice as long as the other (xi, 17). This fact seems to point to Octavianus and the line of the Cæsars; but thus the line of "twelve" leads to no satisfactory conclusion. If it is supposed to close with Trajan (Lücke, 1st ed.), the "three heads" receive no satisfactory explanation. If, again, the "three heads" represent the three Flavii, then the "twelve" must be composed of the nine Cæsars (Jul. Cæsar—Vitellius—the three Flavii, Placentius, Vindex, and Nymphidius (Gfröer), who could scarcely have been brought within the range of a Jewish Apocalypse. Volkmar proposes a new interpretation, by which two wings are to represent one king, and argues that this symbol was chosen in order to conceal better from strange eyes the revelation of the seer. The twelve wings thus represent the six Cæsars (Cæsar—Nero); the eight "counter-feathers," the usurping emperors Vindol. and Otho, Vitellius, and Nero, and the three Flavii. This hypothesis offers many striking coincidences with the text, but at the same time it is directly opposed to the form of interpretation given by Ezra (xii, 14, regnantum . . . duodecem reges; v. 48, octo regnorum). Volkmar's hypothesis that the twelve and eight were marked in the original MS. in some way so as to suggest the notion of division, is extremely improbable. Van der Vis and Lücke, in his later edition, regard the twelve kings as only generally symbolic of the Roman power; and while they identify the three heads with the triple throne, they seek an explanation of the other details. All is evidently as yet vague and uncertain, and will probably remain so till some clearer light can be thrown upon Jewish thought and history during the critical period B.C. 100-A.D. 100.

In the first character, the Apocalypse of Ezra offers a striking contrast to that of Enoch (q. v.). Triumphant anticipations are overshadowed by gloomy forebodings of the destiny of the world: the idea of victory is lost in that of revenge. Future blessedness is reserved only for "a very few" (vii, 70; viii, 1, 52-55; viii, 11); the great question of the ungodly shall be punished, but how the righteous shall be saved, for whom the world is created "(ix, 18). The "voes of Messiah" are described with a terrible minuteness which approaches the despairing traditions of the Talmud (v; xiv, 10 sq.; ix, 16 sq.). For a reign of 400 years (vii, 28-33; the clause is wanting in Eth., v, 29), "Christ," it is said, "my Son, shall die (Arab. omitis), and all men that have breath: and the world shall be turned into the old silence seven days, like as in the first beginning, and so man shall reign main" (viii, 1 sq.). Then shall all ordinances and lastimg privileges (vii, 30), are plainly stated; and, on the other hand, the efficacy of good works (vii, 35), in conjunction with faith (ix, 7), is no less clearly affirmed.

111. Unity and Original Language.—For a long time this book of Ezra was known only by an old Latin version, which is preserved in some MSS. of the Vulgate. This version was used by Ambrose, and, like the other parts of the Vetus Latina, is probably older than the time of Tertullian. It is published in Walton's Polyglot, vol. iv. An Arabic text was discovered by Mr. Gregory, about the middle of the 17th century, but only in two MSS. In the text (Cod. Pseudo-Makki) the text was published by [archbishop] Laurence, with English and Latin translations (Primi Esebi libri, versio \textit{Ephesiana} . . . Latina \textit{Aegyptica} reddita, Oxon. 1820); likewise from a Bodleian MS. which had remained wholly disregarded, though quoted by Ludolf in his dictionary, and published by Ettinghausen, and by Gfröer, with the various readings of the Latin and Arabic (Prof. \textit{Pseudo}. Stuttg. 1840, p. 66 sq.). But the original Arabic text has not yet been published.
The three versions were all made directly from a Greek text. This is evidently the case with regard to the Latin (Lücke, *Versuch einer Rolst. Einleitung*, i, 149) and the Ethiopic (Van der Vlies, *Disputatio critica de Ezra lib. apocr. p. 75 sqq*), and apparently so with regard to the Arabic. A clear trace of a Greek text occupies the position of Ethnarch text (van der Vlies Ex. v, 5), but the other supposed references in the apostolic fathers are very uncertain (e.g., Clem. i, 20; Herm. *Pist. i, 1, 3, etc.*). The next witness to the Greek text is Clement of Alexandria, who expressly quotes the book as the work of "the prophet Ezra" (*Strom. iii, 150*). The opinion of the Church, however, has been raised whether the Greek text was not itself a translation from the Hebrew (Breitneider, in Henke's *Mus. iii, 478 sqq.*), ap. Lücke l. c.); but the arguments from language, by which the hypothesis of a Hebrew (Aramaic) original is supported in the fathers (see below, sect. 4), and, in default of direct evidence to the contrary, it must be supposed that the book was composed in Greek. This conclusion is farther strengthened by its internal character, which points to Egypt as the place of its composition.

The idea of a Hebrew original has now been pretty generally given up by scholars, despite the positive assertion of Galatinus (*De Aemol. Catholico Veritatis*) that a copy of it was reported to exist among the Jews at Constantinople in his day, and it is commonly believed that it was written in Greek. Although the Greek text can be traced in part to the old Latin version, through which alone this book has been known to us till lately, it was a translation from that language. This is evident from the fact that it imitates the Greek idiom in making the adjective in the comparative degree the genitive case, and not as in Latin, *an ablative, and introduces other Greekisms, which are barbarous, in the version (comp. ii, 24; v, 18, 26, 39; vi, 25, 31, 46, 57; vii, 5; viii, 7, 8, 38, 44; ix, 14; xi, 42). This is, moreover, corroborated by the Arabic and Ethiopic versions, as well as the quotation from this book in the fathers (see below, sect. 4), which prove the very early existence of it in Greek. It is, however, equally certain that many of the things contained in this book are of Palestinian origin, and are still to be found in Hebrew or Aramaic dispersed through the Talmud and Midrashim.

In the English version, which is followed in the English version, contains two important interpolations (ch. i, ii; xv, xvi) which are not found in the Arabic and Ethiopic versions, and are separated from the genuine Apocalypse in the best Latin MSS. Both of these passages are attributed by the Christian writers to the compiler of the book of the Christian Scriptures (e.g., i, 30, 33, 37; ii, 13, 26, 45 sqq.; x, 8, 35; xvi, 54), and still more they are pervaded by a passion and an anti-Jewish spirit. Thus, in the opening chapter, Ezra is commanded to reprove the Israelites for their own rebellions (1, 1-23), in consequence of which God threatens to cast them off (I, 24-32), and to "give their houses to a people that shall come." But, in spite of their desertion, God offers once more to receive them (ii, 1-32). The offer is rejected (iii, 85), and the heathen are called. Then Ezra sees "the Son of God," standing in the midst of a great multitude "wearing crowns and bearing palms in their hands" in token of their victorious confession of the truth. The last two chapters (xv, xvi) are different in character. They contain a stern prophecy of the woes which shall come upon Egypt, Babylon, Asia, and Syria, and upon the whole earth, with an exhortation to the chosen to guard their faith in the midst of all the trials with which they shall be visited (iii the Decian persecution; comp. Lücke, p. 186 sqq.). Another smaller interpolation occurs in the Latin version in vi, 28, where *Mfitu means in the Ethiopic "crown" in the Ethiopic language, and to "My Son Messiah" in the Arabic (comp. Lücke, p. 170, sqq.*). On the other hand, a long passage occurs in the Ethiopic and Arabic versions after vii, 35 which is not found in the Latin (Ethiop. c. vi), though it bears all the marks of genuineness, and was known to Ambrose (*De bone mort. x, xi*). In this case the omission was probably due to dogmatic causes. The chapter contains a strange description of the intermediate state, which, and a peremptory denial of the efficacy of human intercession after death. Vigilius appealed to the passage in support of his views, and called down upon himself by this the severe reproof of Jerome (*Lib. in Vigil. c. 7*). This circumstance, combined with the Jewish complexion of the narrative, probably led to its rejection in later times (comp. Lücke, p. 155 sqq.).

Despite the arbitrary division into chapters in our English version which sometimes interrupts a vision in the middle of a sentence, few readers will fail to see the intimate connection, and the bearing of these angelic revelations, and how every one of them forms an essential part in leading us farther and farther till we reach the climax of the apocalypse. It is owing to this remarkable unity which the whole work displays that the numerous interpolations made for dogmatic purposes have so easily been detected.

IV. Author and Date.—The greatest divergency of opinion prevails on this subject. The author has successively been described as a true prophet who lived B.C. 386; an impostor who flourished A.D. 106; a Jew, a Christian, a converted Jew, and a Montanist. The maternal connection of the Hebrew with the Latin version in-*Ezra* (vi, 1-17) in-*Esther* (iv, 5-12) inestimably shows that the author of it was a Jew. His personating Ezra, the contempt and vengeance which he breathes against the Gentiles (vi, 50, 57), the intense love he manifests for the Jews, who alone know the Lord and keep his precepts (vi, 30-36), indicating that for them alone was this world created (iv, 63, 66; vi, 55, 59; vii, 10, 11), and reserving all the blessings of salvation for them (vii, 1-13); his view of righteousness, which consists in doing the works of the law, and that the righteous are justified and rewarded for their good works (viii, 8, 36); the purport of his questions, referring exclusively to the interests of this people (iv, 35; vi, 59); the Haggadic legends about the Behemoth and Leviathan which are reserved for the great Messianic feast (vi, 49-52); the ten tribes (xiii, 49-57); the restoration of the Scriptures and the writing of the apocalypse which have been detected of Israel (xiv, 29, 37-47)—all this proves beyond doubt that the writer was a thorough Hebrew. Chapters i, ii, xv, xvi, which contain allusions to the N. T. (compare i, 30 with Matt. xxii, 37-39; ii, 11 with Matt. xix, 9; ii, 12 with Rev. xxii, 2; xv, 8 with Rev. vi, 10; xx, 25 with Matt. xxvi, 42-44 with 1 Cor. vii, 29), and especially the anti-Jewish spirit by which they are pervaded, as well as the name of *Jesus* in ch. vii, 28, which have been the cause why some have maintained that this book is the production of a Christian, are now generally acknowledged to be later interpolations made by some Christian. (See above, sect. iii.)

As to the date of the book, the limits within which opinions vary are narrower than in the case of the book of Enoch. Lücke (*Versuch einer Rolst. Einleitung*, etc., ed. 2, 1, 269) places it in the time of Caesar (C. L. van der Vlies (*Disput. crit. l. c.*) shortly after the death of Cæsar. Laurence (l. c.) brings it down somewhat lower, to B.C. 28-25, and Hilgenfeld (*Jub. Apokr. p. 221*) agrees with this conclusion, though he arrives at it by very different reasoning. On the other hand, Gfrorer (*Jub. d. 6 star.* i, 69 sqq.) assigns the book to the time of Domitian, and in this he is followed by Wieseler and by Bauer (Lücke, p. 189 sqq.), while Lücke, in his first edition, had regarded it as the work of a Hellenist of the time of Trajan. The interpretation of the details of the work of the evangel of the ancient Ethiopian tradition (for data for determining the time of its composition is extremely uncertain, from the difficulty of regarding the
and the last destruction of Jerusalem may have suggested Ezra as the medium of the new revelation. (Comp. Fabricius, Cod. Pseudoep. ii, p. 189 sq., and Lücke, p. 187, n. 1, sq., for a summary of the earlier opinions on the composition of the book.) But the book was not known at the commencement of the Christian era, and Messiah was a phrase which was written some time before to have obtained such general currency and acceptance; and 2. The minute description which the writer gives of the pre-existence and death of the Messiah (vii, 29; xiv, 7), such as no Jew would have given at the very outset of Christianity, to which we have already referred, shows how prominent at this period the stumbling-block to the ancient people, and formed the points of contest between Judaism and Christianity, thus showing that it must have been written before Christ. We may therefore safely assign it to about 150 B.C.

But, while the date of the book must be left undetermined, there can be no doubt that it is a genuine product of Jewish thought. Weisse (Evangelienfrage, p. 222) alone dissent from this point on the unanimous judgment of recent scholars (Hilgenfeld, p. 190 sq.); and even Whitworth voices the opinion that the style of the Christian interpolations and the remainder of the book is in itself sufficient to prove the fact. The Apocalypse was probably written in Egypt; the opening and closing chapters certainly were.

V. Canonically and Importance. By many of the fathers, Ezra was considered as canonical. The quotation from it in the epistle of Barnabas is described as the saying of a prophet (ch. xii); the quotation by Clemens Alexander in introduced in the same manner ("Gesch. u. gewöhn. leg., Strom. iii, 10; and Whitworth speaks of it as containing divine revelations ("De Bethra Morah, x, xii). The famous story about Ezra being inspired to write again the law, which was burned (xiv, 20-48), has been quoted by Ireneus (adv. Hær., iii, 21, 2); Tertullian (De Cael. iem., i. 3); Clemens Alexander (Stromat. i, 22); Chrysostom (Homil. viii in Hbr.), and many others. The Ethiopian Church regards it as canonical, which may be seen from the manner in which it is alluded to in the Book of Devotions called "The Organon of the blessed Virgin Mary" (written in A.D. 1240). "Open my mouth to praise the virginity of the mother of God. Then didst open the mouth of Ezra, who rested not for forty days until he had finished writing the words of the law and the prophecies, which Nebuchadnezzar, king of Babylon, had burnt" (Prayer for Monday; see also Prayer for Tuesday). St. Jerome was the first who denounced it. In reply to this objection, Aquinas, in his commentary, appealed to xii, 36-45, to prove that "one would venture to intercede for others in the day of judgment," this father, placing upon the name Vigilantius, remarked, "Tu vigilans dormis, et dormiens scribis, et propinans nihil li-

Es'eb'on, They are (oi 'Esēb'wīrūs v. r. oi 'Esēb'wūs, Vulg. Hebron), a Greekized form of the name of certain Canaanites beyond Jordan referred to in the Apocrypha: Esdras 2 v. 15 as having been destroyed by the Israelites; evidently the inhabitants of Heshbon (q. v.) of the O. T. (Num. xxii, 26).

Ese'bria (Εσεβρίων, Vulg. Sedebria), the first named of the ten priests separated with ten others by Ezra to transport the silver and gold from Babylon to Jerusalem (1 Esd. viii, 54); evidently the Sherheraz (q. v.) of the Heb. text ( Ezra viii, 24).

Ese'ek (Heb. id. ממער, scattered; Sept. and Vulg. translated 'Azaria, cameans, as if reading ממער), a well (ממער) containing a spring of water, which the herdsmen of Isaac dug in the valley of Gerar, and which received its name because the herdsmen of Gerar quarreled (נער חוכך, Junc. x. 16, Sept. 'h'ilvēr, Vulg. evasively, A. V. "strove": but different from the לַעֲמָה of the preceding clause, implyאנו היר, jurispr. find "strove") with him for the possession of it (Gen. xxvi, 20). Isaac seems to have therefore relinquished it. It appears not to have been one of those which Abraham had previously dug (ver. 18): the context there was a question of title, here of possession. There are still several wells in this vicinity. See Gerar.

Esh 'ba'al [some Es-h-ba'al] (Heb. 'Esba' el, בִּפּוּר בָּאָל, in pause בִּפּוּר בָּאָל, man of Baal; Sept. 'Esba' el, בִּפּוּר בָּאָל, Vulg. Buchol), the proper name of the fourth son of king Saul, according to the genealogy of 1 Chron. viii, 33 and ix. 39. He is doubtless the same person (see Num. xxxii, 2, compared with 2 Sam. ii, 8) as Itai-besheth (q. v.), since it was the practice to change the obnoxious name of Baal into Bosheth or Beesheth, as in the case of Jerub-besheth for Jerub-baal, and (in this very genealogy) of Marib-baal for Mephib-besheth; compare also Josh. ix, 10, where Bosheth (A. V. "shame") appears to be used as a synonym for Baal. See Baal.

Esh 'ban (Heb. Eshhon, אֵשִּׁחַ, man of considera-
tion; Sept. 'Eshebān and 'Eshebān v. r. 'Eshebān, Vulg. Eshcan), the second named of the four sons of Dishan (Gen. xxi, 26, A. V. "Dishon") or Dishon (1 Chron. i. 41), the son of Seir the Horite. B. C. post 1963.

Esh 'cool (Heb. Eshköl, אֵשְׁכֹּל, [twice plente ṣalḥ ָה, Num. xiii, 24; xxxiii, 9], a bunch of grapes), the name of a man and also of a place.

1. (Sept. Eshkol, young Josephus 'Esphol, Vulg. Eshcol.) A young Amoritish chieftain, who, with his brothers Mandre and Aner, being in alliance with Abraham, when the latter resided near Hebron, joined him in the recovery of Lot from the hands of Chedorlaomer and his confederates (Gen. xiv. 15, 24; comp. xiii, 18). B. C. post 1963. According to Josephus (Ant. i. 16, 2) he was the foremost of the three brothers, but the Biblical narrative leaves this quite uncertain (comp. ver. 13 with 24). Some have thought that the name of Eshkol remained attached to one of the fruitful valleys in that district till the arrival of the Israelites (Num. xiii. 24): this has not been interpreted, the appellation as signi-

ficient of the gigantic "cluster" (in Hebr. eschol) which they obtained there; but this does not accord with the independent origin of the latter name as as-

signed in the narrative (see below).

2. A-eady (رأ), winter-torrent; Sept. and Vulg. translating likewise the name itself φισσάρ, φισσαρ, φισσαρ, or [Num. xiii, 24] נָתַלְבָּה, A. V. "brook"

and "valley") in which the Hebrew spies obtained the fine cluster of grapes which they took back with them, borne "on a staff between two," as a specimen of the fruits of Canaan (Deut. x. 4). The cluster was doubtless large; but the fact that it was carried in this manner does not, as usually understood, imply that the bunch was as much as two men could carry, seeing that it was probably so carried to prevent its being bruised in the journey. See Grape. From the fact that the name had existed in this neighborhood centuries before, when Abraham lived there with the chiefs Aner, Eschol, and Mamre, not Hebrews, but Amorites (see Gen. xiv. 13), many have supposed that the appellation in this instance ("because of the cluster,") בּוּרְכַּס, Sept. בּוּרְכָּס, Vulg. torrens bovis) was merely the Hebrew way of appropriating the ancient name derived from the fruit itself — the conquerors, consistently with the paronomastic turns so much in favor at that time, and with a practice traces of which are deemed to appear elsewhere; but it is more probable that the same reason which led the Israelites to apply to the valley such a designation, had operated a similar change when the region became the possession of the Moabites. In that case the Amoritish chieftain may have been so called (that dialect being doubtless akin to the Hebr.) from his fertile region. From the terms of two of the notices of this transaction (Num. xxxii, 9; Deut. i, 24), it might be inferred that Eschol was the farthest point this valley penetrated and that it could contradict the express statement of Num. xiii, 21, that they went as far northward as Rehob. They must, therefore, either have carried the bunch of grapes this whole distance and back, or, as is more likely, they probably returned by a short cut (Num. xiii, 22), the valley in question seems to have been in the vicinity of Hebron. Accordingly, the val-

ley through which lies the commencement of the road from Hebron to Jerusalem is traditionally indicated as that of Eschol. This valley is now full of vine-

yards. See Eshkol. The Hebrew traveller Ha-Parchi speaks of it as north of the moun-
tain on which the (ancient) city of Hebron stood (Ben-
jamin of Tudela, ed. Asher, ii, 247); and here the name has apparently been preserved still attached to the mountain of remarkably fine water called 'Ain-Eschol, in a valley which crosses the Vale of Hebron north-east and south-west, and about two miles north of the town (Van de Velde, Narrativia, ii, 54). Dr. Rosen, however, still more recently, writes the name as Atin el-Eskukda (Zeitschr. d. morgenl. Gesellsch. 1856, p. 481).

Esh'-ekin [some Esh'ekin] (Heb. 'Eshek, אֵשֶּק, a prop; Sept. 'Esav v. r. 'Esav, Vulg. Esexum), a city in the mountains of Judah, mentioned between Dumah and Janum (Josh. xv, 52), situated in the group west by south of Hebron (Keil, Comment. in loc.). Van de Velde thinks (Memoire, p. 210, 211) the place may be the same as Ashan (q. v.); but this is inadmissible, partly because of the difference in the name (אֵשֶּק), and partly because the only Ashan mentioned in Scripture lay in the low country (Josh. xv, 42; comp. ver. 38), while Eshcan is expressly placed in the hill country of Judah (ver. 48, 52). To escape this last and fatal objection, Van de Velde follows Von Baumer (Paulist. p. 178) in supposing two Ashans, one in the mountains of Judah, and the other in the southern plain of Pales-
tine, belonging to Simeon; but that the Ashan of Ju-
dah and that of Simeon were one and the same, is evi-
dent from comparing Josh. xv, 42 and xix, 9, where
Either as appears in the vicinity of both, and Josh. xix, 7 with 1 Chron. iv, 32, where the same is the case with AIN-RIMMON. Still, although Eshekah cannot thus be identified with the Chor-aashan of 1 Sam. xxx, 80, we may perhaps adopt Van de Velde's location of the former at the ruins of Khuara (Robinson's Researches, iii, Appendix, p. 116), not far south-west of Hebron (Stewart, Temp., p. 224).

Eshhek (Heb. id. עַשְּקה, oppression; Sept. 'Eshal, Vulg. Esca), brother of Azel (q.v.), a Benjaminite. EMRIM, the father of seven sons, among them Ulam, was the father of several sons, among them Ulam, the founder of a large and not very famous story of archers, lit., "tressors of the bow" (1 Chron. viii, 89). B.C. ante 1150. They are omitted in the parallel list of 1 Chron. ix, 84-89.

Eshel. See TAMAR-KISH.

Esh'kalonite (Heb. collect. with the art. ha-Eshkalonite, מֵתֶּלֶת הַאֶשֶּׁקֶּלֹן, Sept. ὁ Ἐσχαλονίτης, Vulg. Eusalonite, A. V. "the Eshkalonites"), the patriotic designation (Josh. xili, 8) of the inhabitants of ASHEKALON (q.v.).

Esh'toāl (Heb. Eshthaol, עַשְׁתֹּאָל [but defectively עַשְׁתָּאֵל in Judg. xiiii, 20; xviii, 2, 8, 11], according to Fürst, narrow pass, but Gesenius suggests perhaps petition; Sept. Ἀσσαῦιας n. r. [in Judg. xiiii, 5] Σαυδόν, Vulg. Esthal or [in Josh. xvi, 33] Estabol), a town in the low country of Judah, the Shephelah or plain of the Philistines. It is the first of the first of groups of cities that had made ¥ur侯, with Zorah and Zorah, or Zorah, in company with which it is commonly mentioned. Zorah and Eshtaol were two of the towns allotted to the tribe of Dan out of Judah (Josh. xix, 41). Between them, and behind Zorah and Eshtaol, was situated MANAN-DAN, the camp or stronghold which formed the head-quarters of that little community during their constant encounters with the Philistines. Eshtaol was one of the great strongholds of the Danites, and its inhabitants, with those of Zorah, were noted for their daring. See Dan. The 600 men who captured and colonized Lachish were natives of these two towns (Judg. xviii). Here, among the old warriors of the tribe, Samson spent his boyhood, and experienced the first impulses of the Spirit of Jehovah; and, after his last exploit, his mangled body was brought, up the long slopes of the western ridge, to rest in the grave of Manoah his father (Judg. xiii, 25; xvi, 81, xviii, 2, 8, 11, 12). In the genealogical records of 1 Chron. the relationship between Eshtaol, Zorah, and Kirjath-jearim is still maintained (1 Chron. ii, 58). In the ONOMASTIC lists Eusebis and Jerome (q.v. 'Eshub' and 'Eschaton), Eshtaol is twice mentioned—(1) as ASHTOAL OF JUDAH, described as then existing between ASOTUS AND ASCALON under the name of ASTHO (Ashu); (2) AS ESHITAL OF DAN, TEN MILES NORTHERLY OF ELEUTHERopolis. The latter position is quite in accordance with the indications of the Bible. It is connected with Zorah, Zanoah, and Bethhemesh (Josh. xv, 33; xii, 41); and as these three places have been identified, we may conclude that Eshtaol was situated close to the foot of the mountains of Judah, and in or near wady Surar. Schwarz (Palest, p. 103) mentions a village called here, west of Zorah, but, Dan, the fact that this is corroborated by no other traveller and by no map, the situation is too far west to be "behind Kirjath-jearim" if the latter be Keryvet el-Enab. The village marked on the maps of Robinson and Van de Velde, as Yeshua, is added to by the former (Researches, new ed., iii, 35), who states that the name he pronounced Escharah, is nearer the requisite position. Yeshua lies at the extreme on the broad valley which runs up among the hills between Zorah and Bethhemesh. The mountains rise steep and rugged immediately behind it, but the valley is encompassed by fruitful fields and orchards. Zorah occupies the top of a conical hill scarcely two miles westward, and a lower ridge runs in the same direction as the main remains at Yeshua. Upon that ridge the permanent camp or gathering-place of Dan (Judg. xiii, 25) was probably fixed (Robinson, Later Res. p. 153 sq.). See MAHANAH-DEAN.

Esh'te'laite [many Esh'tile'ae] (Heb. collect. with the art. ha-Eshthalaui, מֵתֶלֶת הַאֶשֶּׁתָלָא), Sept. τοῦ Ἐσθαλαίου, Vulg. Eshthaliae, A. V. "the Eshtaulites," the descendants of Eshthaol (q.v.), who, with the Zaraithites, were at a later period among the families of Kirjath-jearim (1 Chron. li, 58).

Esh'temo'-a [many Esh'temo'of] (Heb. Eshtemo'a, עַשְׁתֵּמֹא [but defectively עַשְׁתֵּמֹא in 1 Chron.], obedience; Sept. in Josh. xxi, 14 ἐσθημίου, in 1 Sam. Es'wai, in 1 Chron. iv, 17, 19 ἐσθημών, in r. Es'wai, and Es'wai, in 1 Chron. vi, 57 [אֱשֶׁתֹמָא] Es'thama, Vulg. Esthemo, but ESTEMO in Josh., and ESTEMO in 1 Chron. vi) or Esh'temoh (Heb. Esh'temo'h, עַשְׁתֵּמָה), by interchange of final gutturals. Josh. xv, 59; Sept. ἐσθημίου, Vulg. Istemo, a town of Judah, in the mountains; mentioned between Jattir and Holon (Josh. xxi, 14; 1 Chron. vi, 57), and between ANAH and ANIM (Josh. xvi, 50). With its "suburbs" Eshtemo was allotted to the tribe of Judah (Josh. xxi, 14; 1 Chron. vi, 57). It was one of the places frequent in the Book of Judges and his followers during the long period of their wanderings; and to his friends there they sent presents of the spoil of the Amalekites (1 Sam. xxx, 28; 2 Sam. xii, 5-18; Ezr. iv, 9), and as the last station of the geographical, half topographical —of the descendants of Judah, Eshemo occurs as having been founded or rebuilt by an Exrraite called Ishbaal (1 Chron. iv, 17) (q.v.), perhaps the same with Naham of ver. 19 (see MAXED), where the place has the dubious epithet of "Maachath-sheva" (Heb. מָאַכְתּ יִשְׁבָּא), however, the Eshemoa there named as a PERSON from Maachab. Eusebis and Jerome simply mention the place as "a very large village" in the Daroma, in the province of Eleutheropolis (ONOMAST. s. v. Ἐσθημός, Eshemo). There is little doubt that it has been discovered by Dr. Robinson at Sema'da, a village seven or eight miles south of Hebron, on the great road from el-Milh, containing considerable ancient remains, and in the neighborhood of other villages still bearing the names of its companions in the list of Josh. xv: Debir, Socho, Jattir, etc., and other inhabited places described as "on the mountains," or "in the great desert" (Researches, ii, 194; comp. Schwarz, Palest, p. 105). It is a considerable village, situated on a low hill, with broad valleys round about; not susceptible of much tillage, but full of flocks and herds all in fine order. In several places there are remains of walls built of very large stones, bevelled, but left rough in the middle, several of them more than ten feet in length. There are the ruins of a castle at this place, with one tower tolerably perfect, but it is probably of Saracen origin (Robinson, Researches, ii, 627; Wilson, Lands of Bible, i, 354). A city Shema is also mentioned in the south of Judah (Josh. xv, 29); too far south, however, to correspond to Semua.

Esh'ton (Heb. Eshton, עַשְׁתּון, according to Ge. Eusausorius, according to Fürst careless; Sept. 'Asso'w, Vulg. Esthon), a son of Mehr, and grandson of Chelub, of the tribe of Judah (1 Chron. iv, 11). B.C. ante 1618. Among his four sons and one grandson enumerated (ver. 12) as the "men of Keach," two (Beth-rapha and Asebah) seem, however, to be rather names of places.

Es'kridge, Vernon, a minister of the Methodist Episcopal Church (South), was born in Westmoreland County, Va., Oct. 26, 1803. His early education was neglected, and on this account he hesitated to enter the ministry, to which he felt strong leanings; but on
The death of his young wife and child he besetted no longer, and in 1857 he began to preach as an itinerant minister. In this service he labored faithfully until 1857, when ill health compelled him to retire from the itinerancy, though he still preached diligently as his health would allow. In 1851 he was appointed chap- lain in the U.S. Navy, and during his service in the Cumberland in 1852 some twenty were converted, including captain Upahur. On his return to Portsmouth, Va., the yellow fever was raging there. He devoted himself night and day to the service of the sick, and on Sept. 4, 1853, he was taken with the disease, and died Sept. 11.—Sprague, Anm. vii. 735.

AEl ' (Ebel. v. r. 'Ebel), son of Naggat and father of Naum, of the maternal ancestors of Christ after the exile (Luke iii. 25); apparently identical with Eliog- nat, the son of Meariah and father of Johanan (1 Chron. iii. 23, 24). See Genealogy (of Christ).

Ele, Enea, or Esneh, "the hieroglyphic Sen, and the Greek Satopolis or Satopolis—the city of the Latin fish or Lat. Salapia from the fish there worshipped—is a small and badly-built town of Upper Egypt, and is situated on the left bank of the Nile, in lat. 25° 15' N. The central portion of Enea has edifices of colored brick. It contains about 4000 inhabi- tants, of whom 1500 are Copts, and has some manufactories of blue and red glass, and pottery. These are famous ruins at Enea, which consist of a sandstone temple, with a portico of four rows of six columns, which appears to have been founded by Thothmes III, whose name is seen on the jambs of a door. The temple, however, seems to have been restored or principally constructed by Ptolemy Euergetes (B.C. 246-222), and the pronaos was erected in the reign of the emperor Claudius (A.D. 41-54), and completed in that of Ves- pasian. The interior is of the date of Trajan, the Antoinnes, and Geta, whose name, erased or replaced by that of Trajan, there found. The great temple, which was dedicated to Chnum, Satius, and Har-Ihek. It has a zodiac like that of Denderah, formerly thought to be of the most remote antiquity, but now known to be no older than the Romans. A smaller temple with a zodiac, erected in the reign of Ptolemy Euergetes, formerly stood at or near the walls north of Enea, but is now destroyed. At Enea is also a stone quay, bearing the names of M. Aurelius. This city was the capital of a nome, and the coins struck in it in the reign of Hadrian (A.D. 127-138) represent the fish la- turia of the embalmed N. Not. Epigr. p. 263; Whobel, Arch. Relig., xvi. 261; Tocchon d'Annecky, Médailles.

Enag (or Enag, Enigo, Enag), one of the most prominent men of the Armenian Church. He was born in 397, at Gocup or Golop, a place near Mount Ararat, and was one of the pupils of the patriarc Isaac and of Saint Mesrop. As he was accu- mulated with the Syriac language, he was sent in 426, together with Joseph of Palin, to Edessa, in order to translate the writings of the Syriac Church fathers into Armenian. After finishing this work they went to Constantinople, learned the Greek language, and began the translation of Greek works. On returning home in 431 they took with them many writings of Greek fathers, the acts of the synods of Nice and Eph- eesus, and a correct copy of the Alexandrine version. From the latter the Armenian version of the Bible, in which Enag co-operated, was made. Many other the- ological works were translated by him, and he is one of the six learned Armenians to whom the honorary title "Targmaniatsch" (translators) was given. In 449 Enag was present at the national synod of Arta- chad, which replied to the Persian king's demand upon the Armenians to embrace the doctrine of Zoroaster. He died about 478. Son of Egin. Beside of the numerous translations of foreign works, Enag wrote an original work against heresies. It is divided into four books, of which the first is directed against the pagans, the second against the Parsees, the third against the Greek philosophers, and the fourth against the Marcionites and Manicheans. This work contains some valuable information on the Parsees and on the system of Marcion which was taken up by Paul of Tarsus as a source. It has been published at Smyrna (1762) and at Venice (1826), and a French translation has ap- peared by Le Vaillant de Florival (Reflections des dif- ferent Sectes des perses, Paris, 1838). Parts of it have been translated into German by Neumann (in Hesperia, xxxiii, and in Zeitschrift fur histor. Theologie, 1854) and by Dr. Windischmann (Jahrb. fur Assyriken, 1854), and into Latin by Dr. Petermann (in his grammat. ling. Arm. p. 44-48). A Latin translation of the whole work was promised by the distinguished Orientalist, Dr. Windischmann, but it has never appeared. An appendix to the Venice edition contains a "collection of sentences drawn from the Greek fathers, and in par- ticular from St. Nilus." In point of style, Enag is counted among the classics of Armenian literature.— Herzog, Real-Encyklop. iv. 183; Hoefer, Nouv. Biog. Gén. xvi. 886; Wietzer u. Wele, Kirchen-Lex. i. 711; Neumann, Versuch einer Gesch. der armen. Lit. (Tull. 1841).

Eso'a (properly Eso'a, Aisuph, Vulg. omita), a place fortified by the Jews on the approach of the Aes- sianyrian army under Holophernes (Judith iv. 4). The name may be the representative of the Hebrew word Hazor or Siborim (Simonis, Onom. N. T. p. 19). The Syrians residing in the neighborhood) suggests Beth-horob, which is not impossible.

Eoteric (Greek iotepweqoe), scientific as opposed to popular; applied, especially with regard to the an- cient mysteries, to doctrines taught only to the initi- ated, as distinguished from exoteric (i.e., without) doc- trines, which could be taught to the vulgar and unin- structed. If the philosophical temple of the Egyptian, like that of the other sects, was divided into the exoteric and the esoteric; the open, taught to all; and the se- cret, taught to a select number" (Warburton, Disc. Leg. bk. ii, note B). "According to Origen, Aulus Gel- lius, Porphyry, andambitious, the distinction of exo- teric and esoteric among the Egyptian was applied to the disciples, according to the degree of initiation to which they had attained, being fully admitted into the society, or being merely postulants (Ritter, Hist. Philos., French transl., i. 248). Plato is said to have had disciples both of the exoteric and of the esoteric doctrines which he taught only to a few, in secret. There is no allusion to such a distinction of doctrines in the writings of Plato. Aristotle (Physica, iv. 2) speaks of opinions of Plato which were not written. But it does not follow that these were secret. Aristo- tle himself frequently speaks of some of his writings as exoteric, and others as esoteric or exoteric. The former treat of the same subjects as the latter, but in a popular and elementary way, while the esoteric are more scientific in their form and matter (Ravaisson, Esaou sur la Metaph. d'Aristote, t. i. c. 1): Tucker, Lamps of Natural Philosophy, ii. ch. ii).—"Fleming, Vocabulary of Philosophy, a. v.

Esben, Zbor Bernhard van, one of the most cele- brated writers on the ecclesiastical law in the 18th century, was born at Louvain July 9, 1466. He studied theology and philosophy at the university of his native city, and after having been ordained priest in 1473, and living for 16 years later in the service of a doctor of law), and appointed professor of canonical law at the Collegium Adrianum at the University. He lived very retired, devoting his whole time to study; but such became soon his reputation that he was consulted by a number of princes, bishops, tribunals, and lay persons in his jurisprudence; but above all, ever, particularly on the Congregation of the Index, on dispensations, immunities, exemptions, the roya-
place, and the appeal from the ecclesiastical to civil power, were not favorable to the pretensions of the papists, and in 1704 and 1734 all his works were put on the Index. His defense of the consecration of a Jansenist archbishop at Utrecht caused in 1728 his suspension from office. He still firmly took his seat from his chair at the University. All demands made upon him by the archbishop of Malines to revoke his opinions he firmly refused. He fled to Amersfoort, a common refuge of Jansenist exiles, where he died Oct. 2, 1738, at the advanced age of 82 years. Van Essen is universally known as the last and ablest writer on ecclesiastical law, and even pope Benedict did not withdraw a recognition of his ability. The best edition of his works is the one published by Haven (Jus Ecclesiasticum Universum, 5 vols. Louvain, 1758-60; also Cologne, 1777, 5 vols.; Ments, 1731, 3 vols.). An abstract of this work was published by Oberhauer (Anleitung, 1785; Cill, 1791).—Wetzer u. Welte, Kirch.-Lex. iii, 711; Hoefner, Nova. Bio. Orig. xvi, 410; Herzog, Real-Encykl. iv, 164; G. du Pac de Bellegarde, Vie de Van Essen (Louvain, 1876).

(A. J. S.)

The compiler of the Jews this was the ceremony of betrothing, or coming under obligation for the purpose of marriage, and was a mutual agreement between the parties which usually preceded the marriage some time. The espousals frequently took place years before the parties were married. See BETRÖTHT.

2. In the early Christian Church espousals differed from marriage. The two terms are in early writers sponsalia and nuptiae. Certain preliminaries were necessary before persons could complete a marriage: they consisted in a mutual contract or agreement between the parties concerning their marriage to be performed within a certain limited time, which contract was confirmed by certain gifts or donations, called archo or arghabones, the earnest of marriage; as also by a ring, a kiss, a dowry, a writing or instrument of dowry, with a sufficient number of witnesses to attest it. The consent of parents or the archons concerned in their marriages was declared necessary by the old Roman law, which was confirmed by Diocletian, and inserted by Justinian in his code. When the contract was made, it was usual for the man to bestow presents on the woman: these were sometimes called sponasulki, espousals, and sometimes sponsalia donationes, espousal-gifts, or archo and pigmora, pledges of future marriage, because the giving and receiving them was a confirmation of the contract. These donations were publicly recorded. The ring was then presented to the woman as a further confirmation of her consent, but we do not appear to have been given in the actual solemnization of marriage. Bingham, in proof of this, quotes the words of pope Nicholas I, and also refers to Ambrose and Tertullian. The origin of the marriage-ring has been traced to the tenth century, and is supposed to have been introduced in imitation of the ring worn by bishops. Isidorus Hispalensis refers to the marriage-ring in this language: quod autem in nuptiis annulus a sponsa sponsam datur, id fit vel prosper mutuo dilectiorum signum, vel propter id nuptas ut hoc pignora corda eorum junctorit; unde et quarto digitu antiquus est, unde quaedam quaedam (ut fortunt) sambina ad cor usque perventit. "The reason why a ring is given by the bridgroom to the bride is either as a mark of mutual love, or rather a pledge of the union of their hearts; and the reason for its being placed on the fourth finger is that it should be a token of the union and of the adherence of the heart." The kiss was solemnly given, with the joining together of the hands of the betrothed. The dowry settled upon the woman was by a stipulation made in writing, or by public instruments under hand and seal. Chosen witnesses were present, the friends of each party, and their number was generally ten. Occasionally a ministerial benediction was used in espousals as well as in marriage. See MARRIAGE.

Espousal (properly ἐπαγωγή, 'araς, 2 Sam. iii, 14, to betroth, as elsewhere rendered; ἑρετικής, Matt. i, 18; Luke i, 27; ii, 5; less correctly for ἔπαγωγή, χαθανθακά, Cant. iii, 11, nuptialis; ἔρετος, keloth, Jer. ii, 2, the bridal state, i.e. condition of a bride before marriage; ἐρετικής,2 Cor. xi, 2, to cause to be married, i.e. to negotiate the match). Espousal was a ceremony of betrothing, or coming under obligation for the purpose of marriage, and was a mutual agreement between the two parties which usually preceded the marriage some considerable time. See MARRIAGE. The reader will do well carefully to attend to the distinction between espousals and marriage, as espousals in the East are frequently contracted years before the parties are married, and sometimes in very early youth. This custom is alluded to figuratively, as between God and his people (Jer. ii, 2, to whom he was a husband (xxii, 32), and the apostle says he acted as a kind of assistant (prosomalos) on such an occasion: "I have espoused you to Christ" (2 Cor. xi, 3); have drawn up the writings, settled the agreements, given pledges, etc., of your union (compare Isa. liv, 5; Matt. xxxv, 6; Rev. xix). See BETRÖTHT.

Esr'1 (Eszrā v. v. ʾEzrā, Vulg. omit.), one of the Israelites, "son of Osora," who divorced his Gentile wife after the exile (1 Eed. ix, 34); corresponding in position with the Shaarai (q.v.) of the Hebrew text (Exra x, 40), although the form is confused with that of Arsalus = Aarezel following it.

Esr'om (ʾEzrāû v. v. ʾEsrāû), a Grecianized form (Matt. i, 9; Luke iii, 85) of the name of Hesron (q.v.), the grandson of Judah (1 Chron. ii, 5).

Ess, Karl van, a Roman Catholic theologian of Germany, was born at Warburg, in Westphalia, Sept. 25, 1770. He entered the Benedictine order in 1788, and in 1801 became prior of the Abbey of Huyseburg, near Halberstadt. Together with his cousin, Leonard van Eas (q.v.), he published a German translation of the Bible (Brunswick, 1807, and a great many editions since), which had an immense circulation until it was forbidden by the pope. Being appointed in 1811, by the bishop of Paderborn, episcopal commissary, he abandoned his liberal views. He wrote a brief history of religion (Entwurf einer kurzen Geschichte der Religion, Halberstadt, 1817), which called forth several replies. He died Oct. 22, 1824,—Hersog, Real-Encykl. xix, 398.

Esa, Leander van, a Roman Catholic theologian of Germany, and cousin of the preceding one, was born at Warburg, in Westphalia, Feb. 15, 1772. At an early age he entered the Benedictine abbey of Marienmünster, in the diocese of Paderborn. In 1813 he was appointed pastor at Marburg, and extraordinary professor at the university of that city; and later he also became assistant director of the normal school. No priest in the Roman Catholic Church of the 19th century showed so great a zeal for the circulation of the Bible as Leander van Eas. Aided by his cousin Karl (q.v.), he prepared a German translation of the New Testament, and issued the British and American Bible Society in its circulation. A translation of the Old Testament he published in 1819 (Nuremberg). He also published an edition of the Vulgate (1822), and an edition of the Greek New Testament cut from the Vatican manuscript (1824). The pope was highly indifferent at first as to this undertaking (as it is said he was not anxious to have the notorious papal bulls against Bible societies), but Leander van Eas timely receded from his liberal position, but Leander bravely maintained it. He resigned his offices at Marburg, and devoted his time chiefly to a literary defence of his efforts in circulating the true Bible, "a selection from the works of Church fathers and other great Catholic writers concerning the necessary
and useful reading of the Bible" (Auslegung aus den heil. Vater, etc., Leips, 1868): a Latin treatise on the autho- rity of the original text of the Bible as compared with the Vulgate (Pragmatica doctorum Catholicores Tractati circut Vulgatum decreet senamus tridentinum his- toricorum, etc., Leips, 1810; in German 1824); and sev- eral other works urging a frequent reading of the Bi- ble by the people (Was war die Bibel der ersten Chris- ten? 1816; Gedanken über Bibel u. Bibellesen, 1816; Die Bibli nicht ein Buch war für Priester, 1818). He also wrote a book in defence of marriages between Protas- tants and Roman Catholics (Rückert's Gericht der gemisch. Ehem. 1821). He died Oct. 13, 1847. His very valu- able library, rich in manuscripts and incunabula, was purchased by the Union Theological Seminary in New York.—Herzog, Real-Enzyk., xix. 489.

Essence (essentia, from esses, the old participle of esse, to be), a term in philosophy corresponding to oivia in Greek, and sometimes to nature, sometimes to being or substance in English. Augustine (De Civ. Dei, xii, 11) derives it as follows: "Sicut ab eo quod est esse, vocatur substantia; sic ab eo quod esse est, vocatur essentia." Chaucin (Lex. Phil.) gives the definition: "Tutum illud per quod res est, est et id quod est." Locke (Essay, bk. iii, chap. iii., § 15) says: "Essence may be understood as the very being of anything, whereby it is what it is." Locke distinguishes the real and the nominal essence. "The nominal essence depends upon the real essence; thus the nominal essence of gold is that complex idea which the word 'gold' represents, viz., heavy, malleable, fusible, and fixed; but its real essence is the constitution of its insensible parts, on which these qualities and all its other properties depend, which is wholly unknown to us. The essence of things is made up of that common nature wherein it is founded, and of that distinctive nature which is formed. This last is commonly understood when we speak of the formality, or forma- lia ratio (the formal consideration) of things; and it is looked upon as being more peculiarly the essence of things, though it is certain that a triangle is as truly made up in part of figure, its common nature, as of the three lines and angles which are distinctive and peculiar to it." (Fleming, "Vocab. of Philosophy, s. v.")

With regard to the Trinity, the Greek writers (Athana- nias and others) distinguish oivia (essentia, substantia), which denotes what is common to the Father, the Son, and the Holy Spirit, from oivia (voula, pronoia), which denotes what is individual, distinctive, and pecu- liar to the three in one. Shedd ("History of Doc- trine," ii, 363) distinguishes the various scholastic terms carefully, and says of oivia, or essence, that it "denotes that which is common to Father, Son, and Spirit. It denominates the substance, or constitutional being of the Deity, which is possessed alike and equally by each of the personal distinctions. The essence is in its own nature one and indivisible, and hence the statement in the creed respecting it affirms simple unity; and warns against separation and division. The terms 'generation' and ' procession' do not apply to it." McCosh discusses the term and its uses in his "Intuitions of the Mind" (1866, 8vo, p. 152).

Essenes (Essenei, Josephus generally; Eesien, Pliny) or ESSENANS (Essenioi, Josephus, War, i, 3, 5, etc.; Philo), a Jewish sect of mystico-ascentic, which combined foreign elements, especially Oriental and Greek, with Jewish doctrines, and with certain pecul- iar views and practices of their own. They rejected most of the Jewish sacrifices, and made their fellow- ship an exclusive one.

1. Signification of the Name.—This has been very variably explained, as follows: 1. Philo (Quod omnis pears, p. 150) derives it from the Hebrew dos, holy. 2. Josephus, according to Jost ("Geschichte d. Juden- thums," i, 207), seems either to derive it from the Chal- dean NIN, to be quiet, to be mysterious, because he ren- dered the high-priest's breastplate, for which the Sept. has λευκών, by λαυκών, or directly from din, in the sense of λευκούς or λαυκών, endowed with the gift of prophecy.

2. Epiphanius (Her. xix) takes it to be the Hebrew יפוא היפֶּה יפוא יפוא, the stout race. 4. Suidas (s. v.) and Higlenfeld (Die jud. Apokal. p. 278) make it out to be the Aramaic form נפש, the people, and the latter maintains that this name was given to the sect because they pretended to see visions and to prophesy. 5. Joseph ben-Gorion (bib. iv, § 6, p. 274 and 276, ed. Breithaupt) takes it for the Heb. נפש, the souls, the pious, the puritans.

6. De Ascens (Moor Ebn. c. iii, Ofher, Philo, ii, 341), Dähne (Erich und Grundtvig, ii, 512, 1835), Nork (Revue de l'orient, v.), Herfeld (Geschichte d. V. Israel, ii, 895), and others, insist that it is the Aramaic נפש, the spiritual, or the physical cures they performed. 7. Aboth R. Nathan (c. xxxvi), and a writer in Jost's Annales (i, 145), derive it from נפש, to do, to perform; the latter says that it is the Aramaic from נפש, and that they were so called because of their endeavors to perform the law. 8. Rappaport (Erich Millin, p. 41) says that it is the Greek νοσήμα, an associate, a fellow of the fraternity. 9. Frankel (Zeitschr., 1846, p. 449 sq.) and others think that it is the Hebrew expression נפש, the retired.

10. Ewald (Geschichte d. V. Israel, iv, 420) says that it is the Rabbinic נפש, servant of God, and that the name was given to them because it was their only desire to be נפשי, the pious.

11. Grätz (Geschichte d. Juden, iii, 525) will have it that it is from the Aramaic נפש, to bathe, with Aleph prothetic, and that it is the shorter form for נפש, not נפש, התרמא, keremoph- tika, a name given to this sect because they baptized themselves early in the morning. 12. Dr. Low (Ben Chananja, i, 892) never doubts that they were called Essenes after their founder, whose name be tells us נפשי, or Jesus, the disciple of Joshua b. Perachia.

13. Others, again, say that it alludes to Jesus, the father of David. 14. Others, again, submit that it is derived from the town Eesah, or the place Yaad Qasa (compare Ewald, Geschichte d. V. Israel, iv, 420).

15. Dr. Adler (Volkst., vi, 60), again, derives it from the Hebrew נפש, the soul, נפש, התרמא, keremoph- tika, a name given to this sect because they baptized themselves early in the morning. 16. Dr. Cohen (Ben Chananja, iv, 374), again, derives it from the Hebrew נפשי, πνευμα, πνευμα, alluding to the נפש mentioned in the Talmud (Bechoroth, 80, a), i. e. the apon which the Essenes wore. 17. Others, again, derive it from a supposed form נפש, in the sense of pious, because it connects the Essenes with the Chuni- dim, from which they are thought to have originated. See ASIANNANS.

II. Tenets and Practices. — The cardinal doctrine of this sect was the sacredness of the inspired law of God. To this they adhered with such tenacity that they were led thereby to pay the greatest homage to Moses the lawgiver, and to consider blasphemy of his name a capital offence. They believed that they obeyed diligently the commandments of the Law, to lead a pure and holy life, to mortify the flesh and the lusts thereof, and to be meek and lowly in spirit, would
ESSENES

bring them in closer communion with their Creator, and make them the temples of the Holy Ghost, when they would be able to prophesy and perform miracles, and, like Elias, be ultimately the forerunners of the Messiah. This last stage of perfection, however, could only be attained by gradual growth in holiness, and by advancement from one degree to another. Thus, when once a man had attained the state of \textit{outward or bodily purity} by baptism (πρωτεύουσα, aprom, which, from its being used to dry one's self with after the baptism, was the symbol of purity, he attained, 1. To the state of \textit{outsider or bodily purity by baptisms (πρωτεύουσα, aprom). From bodily purity he progressed to that state which imposed abstinence from \textit{amanueld intercourses (πρωτεύουσα, aprom). From this stage, again, he attained to that of \textit{insider or spiri-}

ual purity (πρωτεύουσα, aprom). From this stage, again, he advanced to that which required the banishing of all anger and malice, and the cultivation of a meek and lowly spirit (πρωτεύουσα, aprom). 5. Thence he advanced to the stage of holi-

ness (πρωτεύουσα, aprom). 6. Thence, again, he advanced to that stage where he could perform miraculous cures and raise the dead (πρωτεύουσα, aprom); and, 7. Attained finally to the position of Elias, the forerunner of the Messiah (πρωτεύουσα, aprom). Comp. Jeru-

As contact with any one who did not practise their self-imposed Levitical laws of purity, or with anything belonging to such a one, rendered them impure, the Essenes, were, in the course of time, obliged to with-

draw altogether from general society, to form a separate society, and live apart from the world. Their manner of life and practices were most simple and self-

denying. They chiefly occupied themselves with till-

ing the ground, tending flocks, rearing bees, and mak-

ing the articles of food and dress required by the community (as it was contrary to their laws of Levitical purity to get anything from one who did not belong to the community), as well as with healing the sick, and study-

ing the mysteries of nature and revelation. Whatever they possessed was deposited in the general treasury, of which there were several managers, who, supplied from the wants of every one, so that they had all things in common; hence there were no distinctions amongst them of rich and poor, or of masters and servants. They repro-

bated slavery and war, and would not even manufac-

ture martial instruments. They rose before the sun, and did not talk about any worldly matters till they had all assembled together and offered up their national prayer for the renewal of the light of the day (ג"ה רואין), whereupon they dispersed to their respective engagements, according to the directions of the overseers, till the fifth hour, or eleven o'clock, when the labor of the forenoon terminated, and all re-

assembled, had a baptism in cold water, after which they put on their white garments, entered their refec-

tory with as much religious solemnity as if it were the holy Temple, sat down together in mysterious silence to a communal meal, which had the character of a sac-

rament—and may be the reason why the Essenes sacrificed in the Temple—the baker placed before each one a little loaf of bread, and the cook a dish of the most simple food, the priest invoked God's blessing upon the repast, and concluded with thanks to the Beneficent Suppeller of all our wants. This was the signal of their dismissal, when all withdrew, put of their sacred garments, and resumed their several employments till the evening, when they again partook of a common meal. Such was their manner of life during the week. On the Sabbath, which they observed with the utmost rigor, and on which they were more especially instructed in their distinctive ordi-
nances, Philo tells us, "They frequent the sacred places which are called synagogues, and there, according to their age, in classes, the younger sitting below the elder in becoming attire, and listening with eager attention. Then one takes up the holy volume and reads it, whilst another of the most experienced ones expounds, omitting that which is not generally known; for they philosophise on most things in sym-

bols, according to the ancient zeal" (\textit{Quod omnis prob. 49}, sec. xii). The study of logic and metaphysics they regarded as injurious to a devotional life. They were governed by a president, who was chosen by the whole body, and who also acted as judge. In cases of trial, however, the majority of the community, or at least a hundred members of it, were required to constitute the tribunal, and the brother who walked disorderly was excommunicated, yet he was not regarded as an en-

emy, but was admonished as a brother, and received back after due repentance.

As has already been remarked, the Essenes generally were celibates; their ranks had therefore to be recruited from the children of the Jewish community at large, whom they carefully trained for this holy and ascetic course. Previous to his final consecration the candidate for the order had to pass through a novitiate of two stages. Upon entering the first stage, which lasted twelve months, the novice (\textit{πρωτεύουσα, aprom}) had to cast in all his possessions into the common treasury, and received a \textit{robe} (\textit{εργασις, δυνάμενος} = νικ) to bury the excrement (compare Deut. xxiii, 12-15, \textit{aprom} (πρωτεύουσα, aprom), used at the baptisms, and a white robe to put on at meals, which were the symbols of purity, and, though still an outsider, he had to observe some of the ascetic rules of the society. If, at the close of this stage, the community found that he had properly acquitted himself during the probationary year, the novice was then admitted into the second stage, which lasted two years. During this period he was admitted to a closer fellowship with the brother-

hood, and shared in their lustral rites, but was still excluded from the common meals. Having passed satisfactorily through the second stage of probation, the novice was then fully received into the community (\textit{πρωτεύουσα, aprom}), and then also became a priest by a solemn oath on which he promised to follow his holy and ascetic life; that in the first place, he will exercise piety towards God; and then that he will observe justice towards all men; and that he will do no harm to any one, either of his own accord or by the command of others; that he will always hate the wicked, and help the right-

eous; that he will ever be faithful to all men, especi-

ally his rulers, for without God no one comes to be

ruler, and that if he should be ruler himself he will never be overbearing, nor endeavor to outshine those he rules either in his garments or in finery; that he will walk always in truth, and convince and go before those that lie; that he will keep his hand from stealing, and his soul clear from any unjust gain; that he will not conceal anything from the members of his society, nor communicate to any one their mysteries, not even if he should be forced to it at the point of death; and, finally, that he will never deliver the doc-

trines of the Essenes to any one in any other manner than he received them himself; that he will abstain from all species of robbery, and carefully preserve the books belonging to their sect and the names of the angels (\textit{War}, ii, 6, 7). This last expression was not made to the secrets of the Tetragrammaton (ס"כ ס"כ), and the other names of God and the angels comprised in the theosophy (ס"כ ס"כ, and to
from God; so the Pharisees (comp. War, ii, 8, 7, with Bar Kochba, 58, a).
12. An applicant for admission to the order of the Pharisees must pass through a novitiate of twelve months; so the *γρηγορία* among the Pharisees (compare War, ii, 8, 7, with Bacher, 30, b).
13. The novice among the Pharisees received an apron (περικοφή) the first year of his probation; so the scholar amongst the Essenes (compare War, ii, 8, 5, with Tobiæs Damay, c. ii; Jerusalem, Demay, ii, 3, 5; Bacher, 30, b).
14. The Pharisees delivered the ethical books, and the sacred names, to the members of their society; similarly the Essenes (comp. War, ii, 8, 7, with Chajgin, 7, a).

The real differences between the Essenes and the Pharisees developed themselves in the course of time, when the extreme rigor with which the former sought to perform the laws of Levitical purity made them withdraw from intercourse with their fellow-men, and led them, 1. To form an isolated order; 2. To keep from marriage, because of the perpetual pollutions to which women are subject in menstruation and childbirth, and because of its being a hindrance to a purely devotional state of mind; 3. To abstain from frequenting the Temple where the sacrificial sacrifices (compare Josephus Ant. xviii, 15, 5); and, 4. Though they firmly believed in the immortality of the soul, yet they did not believe in the resurrection of the body (War, ii, 8, 11).

To the Pharisees they stood nearly in the same relation as that in which the Pharisees themselves stood with regard to the mass of the people. The difference lay mainly in rigor of practice, and not in articles of belief. See Pharisee.

But the best among the Jews felt the peril of Esseneism as a system, and combined to discourage it. They shrank with an instinctive dread from the danger of connecting asceticism with spiritual purity, and cherished the great truth which lay in the saying, "Doctrine is not in heaven." The miraculous energy which was attributed to mystics was regarded by them rather as a source of suspicion than of respect, and theosophic speculations were condemned with equal strictness (Frankel, Monatsschrift, 1858, p. 62 sqq., 68, 71).

As to their connection with Christianity, there can be no difficulty in admitting that Christ and the apostles recognised those principles and practices of the Essenes which were true and useful. Though our Saviour does not mention them by the name of Essenes, which Philo and Josephus coined for the benefit of the Greeks, yet there can be no doubt that he referred to them in Matt. xix, 12, when he speaks of those "who abstain from marriage for the kingdom of heaven's sake," since they were the only section of Jews that voluntarily imposed upon themselves a state of celibacy in order that they might devote themselves more closely to the service of God. Also 1 Cor. vii can hardly be understood without bearing in mind the notions about marriage entertained by this God-fearing and self-denying order. As to other coincidences, Matt. v, v, etc., and James, x, 12, urge the abstinence from the use of oath which was especially taught by the Essenes. The manner in which Christ commanded his disciples to depart on their journey (Mark vi, 10), is the same which those pious men adopted when they started on a mission of work. The primitive Christians, like the Essenes, sold their land and houses, and brought the prices of the things to the apostles, and they had all things in common (Acts iv, 32-34). John the Baptist was a parallel to this holy order, as is evident from his ascetic life (Luke xi, 25); and when Christ pronounced him to be Elias (Matt. xi, 14), he may almost be said to have declared that the Baptist had really attained to that spirit and power which the Essenes strove to obtain in their highest stage of purity. From the nature of the case, however, Essenism, in its extreme form, could exercise very little direct influence...
ENCE on Christianity. In all its practical bearings it was diametrically opposed to the apostolic teaching. The dangers which it involved were far more clear to the eye of the Christian than they were to the Jewish doctors. The only real similarity between Essenes and Christianity lay in the common existence of a body of true Judaism; and there is little excuse for modern writers who follow the error of Eusebius, and confound the society of the Therapeutes with Christian brotherhoods. Nationally, however, the Essenes occupy the same position as that to which John the Baptist was personally called to mark the close of the Old and the advent of the New Testament. The Saviour and the ancient Jewish writers do not speak of them as a separate body. Josephus, however, speaks of them as existing in the days of Jonathan the Maccabean, B.C. 143 (Ant. xiii. 3, 5; 9): he then mentions Judas, an Essene, who delivered a prophecy in the reign of Aristobulus I., B.C. 116 (War, i. 3, 5; Ant. xiii. 11, 2). The second mention of their existence occurs in connection with Herod (Ant. xv. 10, 5). These accounts distinctly show that the Essenes at first lived amid the people, and did not refrain from frequenting the court, and that the Essenes was a friend of Herod, who was kindly disposed towards this order (ib.). This is, moreover, evident from the fact that there was a gate at Jerusalem which was named after them (EpwOwv Xvuk, War, v. 4, 2). When they ultimately withdrew themselves from the rest of the Jewish nation, the majority of them settled on the north-west shore of the Dead Sea (Pliny, Hist. Nat. v. 17; Eusebius, Hist. Eccles. ii. 17), and the rest lived in scattered communities throughout Palestine and other places. Their number is estimated both by Philo and Josephus (4000).

The obscurity of the Essenes as a distinct body arises from the fact that they represented originally a tendency rather than an organization. The communities which were formed out of them were a result of their practice, and not a necessary part of it. As a sect they were distinguished by an aspiration after ideal purity rather than by any special code of doctrines; and, like the Chasidim of earlier times, they were confounded in the popular estimation with the great body of the zealous observers of the law (Pharisees). The growth of Essenism was a natural result of the religious feeling which was awakened by the circumstances of the Greek dominion, and it was easy to trace the process by which it was matured. From the Maccabean age there was a continuous effort among the stricter Jews to attain an absolute standard of holiness. Each class of devotees was looked upon as practically inseparable by their rabbis from the laws of purity still further; and the Essenes stood at the extreme limit of the mystic asceticism which was thus gradually reduced to shape. The associations of the "Scribes and Pharisees" (X6X6X6, "the companions, the wise") gave place to others bound by a more rigid rule; and the rule of the Essenes was much more rigorous and stricter. Those who Josephus speaks of as allowing marriage has been supposed to have belonged to such bodies as had not yet withdrawn from intercourse with their fellow-men. But the practice of the extreme section was afterwards regarded as characteristic of the whole class, and the isolated communities of Essenes furnished the type which is preserved in the popular descriptions.

The changes of the Essenes limited its spread. Outside of Palestine, Levitical purity was impossible, for the very land was impure; and thus there is no trace of the sect in Babylonia. The case was different in Egypt, where Judaism assumed a new shape from its intimate connection with Greece. Here the original form in which the Essenes were represented did not by direct copies, but by analogous forms, and the tendency which gave birth to the Essenes found a fresh development in the pure speculation of the Therapeuten (q. v.). These Alexandrine mystics abolished the practical labor which rightly belonged to the Essenes, and gave themselves up to the study of the inner meaning of the Scriptures. The impossibility of fulfilling the law naturally led them to substitute a spiritual for a literal interpretation; and it was their object to ascertain its meaning by intense labor, and then to satisfy its requirements by absolute devotion. The "whole day, from morn to morn, was occupied in medita-
tional discipline." Bodily wants were often forgotten in the absorbing pursuit of wisdom, and "meat and drink" were at all times held to be unworthy of the light (Philo, De Vita cont. 3. 4).

According to the Deipneustikon of the Hellenistic Eumenides and Euhomites (in Winer's Zeitschr. i. ii-iii. 217 sq.), the Euhomites descended from the Essenes. Gräbe says (ib. p. 665) that the Therapeuten, who lived in Egypt (Fabricius, Bibl. Gr. ii. 135 sq., 725), were a class of the Essenes (see Böhl, Diss. Hellenist. Therapeutica ordinis, Upsal, 1746). According to Philo (De Abstinentia, p. 861) and Eusebius, the Egyptian philosopher, Josephus, Ant. xvi. 18, 15. Dr. Wise thinks that the founder of the Essenes must have been an Egyptian Jew who was acquainted with the mysticism of the order, and came to Palestine about B.C. 500; and says farther that the Therapeutae (founded about B.C. 170) of Egypt and elsewhere were in name and essence an imitation of the Essenes. He asserts also that no positive traces of their messianic views are left either by Josephus or Philo, even by the Talmudists. In consideration of their numerous similarities to the Egyptian Jews, they may be supposed to have entertained messianic hopes similar to the Egyptians (The Isis in Il, 1167).

V. Litterature.—The oldest accounts we have of the Essenes are those given by Josephus, War, ii. 6, 3; 5; Ant. xii. 5, 9; xv. 10, 4 sq.; xvii. 1, 2 sq.; Philo, Quod omnis probus sit, § 12 sq.; Pliny, Hist. Natur. v. c. xvi, vii; Solinus, Polyhist. c. xxxv; Porphyry, De Abstinentia, p. 861; Epheliphanus, de Sen. bib. i. ii. 4; Eusebius, Histor. Eccles. ii. c. xvii. Of modern productions we have Beilermann, Geschichtliche Nachrich-
ten aus dem Alterthum über Essener und Therapeutae (Berlin, 1821), who has studiously collected all the de-
scriptions of this order: Gfört, Philo and die jüdisch-
alexandrinische Theosophie (Stuttgart, 1885), p. 299 sq.; Frédeaux, Observations sur les op. et n. T. part ii, bk. v; Dähne, Geschichtliche Darstellung der jüdischen und
alexandrinischen Religionen Philosophie, i. 567 sq.; and by the same author, the article Essener, in Ersch and Gruber's Encyklopädie; Neander, History of the Church, ed. Bonn, vol. i. The Essays of Frankel, in his Zeitschrift für die Religion in Interessen der Judenchristen (Lpz. 1859), p. 441 sq.; and Monatschrift für Geschichtliche u. Wissen-
schaft der Judenchristen, ii. 80 sq., 61 sq., are most important, and may be considered as having created a new epoch in the treatment of the history of this order. Adopting the results of Frankel, and pursuing the same course still further, Grätz has given a masterly treat-
tise upon the Esseins in his Geschichte der Juden (Leip-
zig, 1816), ii, 364 sq.; treatise of great value are
also given by Josef, Geschichte des Judenthums und
seiner Staaten (Leipzig, 1857), p. 207 sq.; and Herzfeld,
Geschichte d. V. Israel (Nordhausen, 1857), ii, 368, 388
sq. The accounts given by Ewald, Geschichte d. Volker
Israel (Gottingen, 1822), iv, 420 sq.; and Hilgenfeld,
Die Geschicht des Volker Israel (Leipzig, 1823), ii, 386 sq.,
though based upon Philo and Josephus, are important contribu-
tions to the literature of the Esseins; that of the latter is interesting and ingenious, but essentially one-
sided and unservive to the writer's theory (compare Volkmar, Das vierte B. Esaro, p. 60). To these must be added
the following allusions in the historical religions of the
Esseins, published by Jellinek, with instructive notices by
See also Ginsburg, History and Doctrines of the Esse-
ins (London, 1864); Hermes, De Essenis (Hilal, 1729);

Esseins, ANDREW, or Dutch theologian, was born
at Bommen in February, 1618, and was educated at
Utrecht, where he became pastor in 1651. In 1653 he
was made professor of theology in the University of
Utrecht. He died May 18, 1677. Among his writings are
Triumphus Crucis (Amst. 1649) — De Mortalitate
(Salzburg 1650) — Controversiae Theol. Dogm. (1650) — Con-
Geschle, xvi, 441.
Essentia. See ESSENCE.
Establishment. This term is applied to the posi-
tion of that religious denomination in any country
which solely or peculiarly enjoys the patronage of
the state, and the clergy of which have, in consequence,
their several endowments and incomes especially settled
and maintained by the Legislature or government.
The general tendency of all the countries of the
New against established churches, and in favor of
the voluntary principle for the support of churches.
The subject is discussed at length, historically and other-
wise, in the article CHURCH AND STATE (ii, 329). We
present here a summary of the arguments on both
sides.
(1.) The partisans for religious establishments ob-
serve (1) that they have prevailed universally,
throughout every age and nation. The office of prophet, priest, and
king were united in the same patriarch (Gen. xvii, 19;
xvii and xxi; xiv, 18). The Jews enjoyed a religious
establishment dictated and ordained by God. In
turning our attention to the heathen nations, we shall find
the same incorporation of religious with civil govern-
ment (Gen. xlvii, 22; 2 Kings xii, 7, 29).
Every one who is at all acquainted with the history of Greece
and Rome knows that religion was altogether blended
with the policy of the state. The Roman may be
considered the general creed and code of all the
Mohammedan tribes. Among the Celts, or the origi-
nal inhabitants of Europe, the Druids were both their
priests and their judges, and their judgment was final.
Among the Hindoes the priests and sovereigns are of
different tribes or castes, but the priests are superior in
rank; and in another the emperor is the supreme ponti-
tiff, and presides in all public acts of religion.
(2) Again: it is said: that although there is no form
of Church government absolutely prescribed in the New
Testament, yet from the associating law, on which the
Gospel lays so much stress, by the respect for civil
government and consequently enjoins, is one which
followed and finally prevailed, Christians
cannot be said to disapprove, but to favor religious estab-
lishments. (3) Religious establishments also, it is ob-
served, are founded on the nature of man, and inter-
woven with all the constituent principles of human so-
 ciety: the knowledge and profession of Christianity
cannot be upheld without a clergy; a clergy cannot be
supported without a legal provision; and a legal pro-
vision for the clergy cannot be constituted without the
preference of one sect of Christians to the rest. An
established church is most likely to maintain its
respectability and usefulness by holding out a suitable
encouragement to young men to devote themselves
early to the service of the Church, and likewise ena-
bles them to obtain such knowledge as shall qualify
them for the important work.
(4.) There is a choice on the contrary side observe,
that (1) the patriarchs sustaining civil as well as
religious offices is no proof at all that religion was incor-
porated with the civil government in the sense above
referred to; nor is there the least hint of it in the sacred
Scriptures. That the case of the Jews can never be
considered as analogous, as they were not a theocracy
and a ceremonial dispensation that was to pass away,
and consequently not designed to be a model for Chris-
tian nations. That, whatever was the practice of
heathens in this respect, this forms no argument in fa-
vor of that system which is the very opposite to pagan-
ism. (2) The Church of Christ is of a spiritual na-
ture, and ought not, yet, cannot in fact be incorpo-
 rated with the state without sustaining material in-
jury. In the three first and purest ages of Chris-
tianity the Church was a stranger to any alliance with
temporal powers; and, so far from needing their aid,
religion never prospered to such a degree as when they
were combined to suppress it. (3) As to the support which
Christianity, when united to civil government, yields
to the peace and good order of society, it is observed
that this benefit will be derived from it in at least as
much extent as an establishment of religion is with
that. Religion, if it have any power, operates on the con-
science of men; and, resting solely on the belief of
invisible realities, it can derive no weight or solemnity
from human sanctions. Human establishments, it is
said, have been, and are, productive of the greatest
everlasting evil; and, as this case is requisite to give
preference to some particular system; and as the magistrate
is no better judge of religion than others, the chances
are as great of his lending his sanction to the false as
the true. The thousands that have been persecuted
and suffered in consequence of establishments will always form an argument against them. Under establishments religion would be all church-room for 10,000 inhabitants. Evidently the English church had failed to do this. It is a curious fact that the church of England should have been so slow to perceive the light of reason. Emolument must be attached to the national church, which may be a strong inducement to its ministers to defend it, be it ever so remote from the truth. Thus, also, error becomes permanent; and that set of opinions which prevails in a church in which the government is formed, continues, in spite of superior light and improvement, to be handed down, without alteration, from age to age. Hence the disagreement between the public creed of the Church and the private sentiments of its ministers. (4.) Finally, though all Christians should respect civil society in such a case, and all magistrates ought to encourage the Church, yet no civil magistrates have any power to establish any particular form of religious binding upon the consciences of the subject; nor are magistrates ever represented in Scripture as officers or rulers of the Church. As Mr. Coleridge observes, the Christian Church is not a kingdom, realm, or state of the world, nor is it an estate of any such kingdom, realm, or state; but it is the appointed opposite to them all collectively—the sustaining, correcting, befriending opposite of the world, society, and state. It is this distinction that makes the inevitable evils and defects of the state as a state, and without reference to its better or worse construction as a particular state; while, whatever is beneficent and humanizing in the aims, tendencies, and proper objects of the state, it collects in itself as in a focus all the bulwarks of a life which is to be changed, the metaphor, it completes and strengthens the edifice of the state, without interference or commixture, in the mere act of laying and securing its own foundations. And for these services the Church of Christ asks of the state neither wages nor dignities; she asks only protection, and to be let alone. These, indeed, she demands; but even these only on the ground that there is nothing in her constitution nor in her discipline inconsistent with the interests of the state; nothing resistant or impedimental to the state in the exercise of its rightful powers. In the fulfillment of its appropriate duties, or in the effectuation of its legitimate objects. (5.) As to the provision made for the clergy, this may be done without an establishment, as matter of fact shows in hundreds of instances in the Dissenting and Methodist churches in England, and in the United States also. The question is not the question of the value of the voluntary principle may be considered as finally settled by the experience of the English and American churches. In England, in 1855, the Established Church had church accommodation for 5,980,000, and all other denominations could seat 4,000,000, making the Church of England and all the rest together, 9,980,000 of the population. In the United States there were church accommodation in 1850 for 14,000,000, and it is computed by Dr. Baird (Religion in America) that there must be altogether far more than one minister for each 900 inhabitants. In England they have been accumulating edifices for worship the most costly and durable that the world knows, and yet the United States, without any aid from the government, seats a larger proportion of the inhabitants in houses of worship. Nor is this a matter of authority to kill them all, you and your sons and children, and take possession of all their property. The circumstance that Esther herself, though queen, seemed to be included in this doom of extirpation, enabled her to turn the royal indignation upon Haman, whose resentment against Mordecai had led him to obtain the king to order that all his friends and countrymen should be cast into the fiery furnace. And if the empire would not allow the king to recall a decree once uttered; but the Jews were authorized to stand on their defence; and this, with the known change in the intentions of the court, averted the worst consequences of the decree. The Jews established a yearly feast in memory of this deliverance, which is observed
8. Proposed Identifications with Personages in Profane History.—The question as to the identity of the Persia king referred to in connection with Esther is discussed under Ahasuerus, and the reasons there given lead to the conclusion that he was Xerxes, the son of Darius Hystaspis. (See, however, a contrary view in the Jour. of As. Lit. July, 1890, p. 400 sq.)

A second inquiry remains. Who, then, was Esther? Artaxerxes, Ahasuerus, and others are indeed excluded by the above decision; but are we to conclude, with Scaliger, that because Ahasuerus is Xerxes, therefore Esther is Amestris? Surely not. None of the historical particulars related by Herodotus concerning Amestris (Herod. iv. 136; comp. Ctesias, ap. Photius, Cod. 72, p. 57) make it possible to identify her with Esther. Amestris was the daughter of Otanes (Omphax in Ctesias), one of Xerxes’s generals, and brother to his father Darius (Herod. vii. 61, 82). Esther’s father and mother had been Jews. Amestris was wife to Xerxes before the Greek expedition (Herod. vii. 61), and her sons accompanied Xerxes to Greece (Herod. vii. 90), and had all three come to man’s estate at the death of Xerxes in the 30th year of his reign. Darius, the eldest, had married immediately after the return from Greece. Esther did not enter the king’s palace till his 7th year, just the time of Darius’s marriage. These objections are conclusive, without adding the difference of character of the two queens, which is truly evident. The truth is that a virtual marriage both about Vashti and Esther. Herodotus only happens to mention one of Xerxes’s wives; Scripture only mentions two, if indeed either of them were wives at all. But since we know that it was the custom of the Persian kings before Xerxes to have several wives, besides Xerxes, one surely that Cyrus (Herod. i. 3); that Cambyses had four whose names are mentioned, and others besides (iii. 31, 32, 68); that Smerdis had several (ib. 68, 69); and that Darius had six wives, whose names are mentioned (ib. passim), it is most improbable that Xerxes should have been content with one wife. Another strong objection to the idea of Esther being his one legitimate wife, and perhaps to her being strictly his wife at all, is that the Persian kings selected their wives not from the harem, but, if not foreign princesses, from the noblest Persian families and from their own countrymen, instead of from the seven great Persian houses. It seems therefore natural to conclude that Esther, a captive, and one of the harem, was not of the highest rank of wives, but that a special honor, with the name of queen, may have been given to her, as to Vashti before her, as the favorite companion of a favorite priest, whose offspring she would have over her, if she had any, would not have succeeded to the Persian throne. This view, which seems to be strictly in accordance with what we know of the manners of the Persian court, removes all difficulty in reconciling the history of Esther with the scanty allusions left us by prose authors of the reign of Xerxes.

It may be convenient to add that the 8th year of Xerxes, in which the banquet that was the occasion of Vashti’s divorce was held, was B.C. 488, his 7th, B.C. 473, and his 12th, B.C. 474 (Clinton, F. H.), and that the simultaneous battles of Platea and Mycale, which frightened Xerxes from Sardis (Diod. Sic. xi. 36) to Susa, happened, according to Ptolemy and Clinton, in September of his 7th year. For a fuller discussion of the identity of Esther, and different views of the history of Ptolemaic Egypt, see ii. 105, 106. In the case of the Iliad, Homer (Pettav. De doctr. temp. xii. 27, 28) makes Esther wife of Artaxerxes Longin., following Joseph. Ant. xi. 6, as he followed the Sept. and the apocryphal Esther; J. Scalig. (De emend. temp. vii. 591; Arm. Aesop. Euseb. p. 106) making Ahasuerus Xerxes; Ussher (Ant. 4, i. 1) making him Tim Darius Hystaspis, and not Darius Chaldaea, etc. Eusebius (Conon. Chron. 338, ed. Mediol.) rejects the hypothesis of Artaxerxes Longin. on the score of the silence of the books of Ezra and Nehemiah, and adopts that of Artaxerxes Mnemon, following the Jews, who make Darius Codomannus to be the same as Darius Hystaspis, and the son of Artaxerxes by Esther! It is most observable that all Petavius’s and Ptolemy’s arguments against Scaliger’s view apply solely to the statement that Esther is Amestris. See XERXES.

4. The character of Esther, as she appears in the Bible, is that of a woman of deep piety, faith, courage, patriotism, and caution, combined with resolution; a dutiful daughter to her adoptive father, docile and obedient to his counsels, and anxious to share the king’s favor with him for the good of the Jewish people. She is depicted as a virtuous woman, whose situation, when her situation made it possible, a good wife to the king, her continued influence over him for so long a time warrants us to infer. There must have been a singular grace and charm in her aspect and manners, since she “obtained favor in the sight of all that looked upon her” (iv. 15). That she was raised up as an instrument in the hands of God to avert the destruction of the
Jewish people, and to afford them protection, and for-
ward their wealth and peace in their captivity, is also
manifest from the Scripture account. But to impute
to her the sentiments put in her mouth by the apocry-
phal author of ch. xiv, or to accuse her of cruelty be-
coming the narrative death of Haman and his sons, and the sec-
cord day's slaughter of the Jews' enemies at Shushan,
is utterly to ignore the manners and feelings of her age
and nation, and to judge her by the standard of Chris-
tian morality in our own age and country instead.
In fact, the simplicity and truth to nature of the script-
ural narratives, and the striking contrast which with
forced and florid amplifications of the apocryphal ad-
ditions, and with the sentiments of some later com-
mentators. See Debesa, Historia Esther (in his Com-
ment. Allegor., vi); Anon. De Ansero (in the Crit. Sac.
Thes. Nov., i, 761); Robinson, Script. Char., ii; Hughes,
Esther and Ahasuerus (London, 1846); Juste, Histoire
d'Ahasverus en Esther (in Eichhorn's Repertor. xvi, 1
sq.); Tyrrhivt, Esther et Ahasverus (London, 1868,

ESTHER, Book of, or the last of the historical books
of the O. T., according to the arrangement in the Author-
ised Version (See Davidson, in Horne's Introd., new ed.,
i, 627 sq.).

I. Contents, Name, and Place in the Canon.—In this
book we have an account of certain events in the his-
tory of the Jews under the rule of the Persian king
Ahasuerus (Achashverosh), doubtless the Xerxes of
the Greek historians. The author of the writ-
er informs us of a severe persecution with which they
were threatened at the instigation of Haman, a favor-
ite of the king, that sought in this way to gratify his
jealousy and hatred of a Jew, Mordecai, who, though
in the service of the king, refused to render to Haman
the homage which the king had enjoined, and which
his other servants rendered; he describes in detail the
means by which this was averted through the influ-
ence of a Jewish maiden called "Hadassah, that is,
Esther," the cousin of Mordecai, who had been raised
to the rank of queen, along with the destruction of
Haman and the advancement of Mordecai; he tells
us how the Jews, under the sanction of the king, and
with the aid of his officers, rose up against their ene-
 mies, and slew them to the number of 75,000; and he
concludes by informing us that the festival of Purim
was publicly celebrated among the Jews in commemora-
tion of this remarkable passage in their history. —From
the important part played by Esther in this history, the
book bears her name. It is placed among the hagi-
ographies (q. v.) or Kethubim (קֶתְבַּים) by the Jews,
and in that first portion of them which they call the
cfive Megilloth (מגילהּ), rolls), or books read in the syn-
agogue on special festivals; the season appropriate to it
being the feast of Purim, held on the 14th and 15th
of the month Adar, of the origin of which it contains
the account. Hence it stands in the Hebrew Canon
after Kohileth or Ecclesiastes, according to the order
of time in which the Megilloth are read. By the Jew
it is called the Megillah, by way of eminence, either
from its great circumstance in its importance to its con-
tents, or from the circumstance that from a very early period
it came to be written on a special roll (תובלה) for use
in the synagogue (Hittigener, Thes. Phil., p. 494). In
the Sept. it appears with numerous additions, prefixed,
interspersed, and appended; many of which betray a
later origin, but which are so inwrought with the orig-
inal story as to make it as continuous and, on the
whole, harmonious narrative. By the Christian it has
been variously placed; the Vulgate places it be-
tween Tobit and Judith, and appends to it the apocry-
phal additions [see next article]; the Protestant ver-
sions commonly follow Luther in placing it at the end
of the book of Esther, in the Sept. and Curiel, and on the
whole, harmonious narrative. By the Christian it has
been variously placed; the Vulgate places it be-
tween Tobit and Judith, and appends to it the apocry-
phal additions [see next article]; the Protestant ver-
sions commonly follow Luther in placing it at the end
of the book of Esther, in the Sept. and Curiel, and on the

been variously placed; the Vulgate places it be-

Whilst apparently accepted without question by the churches of the West in the early centuries, the testimony of the Eastern Church concerning it is more fluctuating. It is omitted in the catalogue of Melito, an omission which is shared with Nehemiah, and which supports the suggestion by some that both these books were included by him under Ezra, a suggestion that may be admitted in reference to Nehemiah, but is less probable in reference to Esther. Origens inserts it, though not among the historical books, but after Job, which is supposed to indicate some doubt regarding it in the catalogue of the council of Laodicea, of the apostolical canons, of Cyril of Jerusalem, and of Epiphanius, it stands among the canonical books; by Gregory of Nazianzus it is omitted; in the Symposia, Str. Sac. It is mentioned as said by some of the ancients to be accepted by the Hebrews as canonical; and by Athanasius it is ranked among the ἀνεγίγνωσκόμενα, not among the canonical books. These differences undoubtedly indicate that this book did not occupy the same unquestioned place in general confidence as the other canonical books of the O. T.; but the force of this, as evidence, is greatly weakened by the fact that it was not on historical or critical grounds, but rather on grounds of a dogmatical nature, and of subjective feeling, that it was thus treated. On the same grounds, at a later period, it was subjected to doubt, even in the Latin Church (Junnilius, Pro. 30). At the time of the Reformation, Luther, on the same grounds, pronounced the book more worthy to be placed "extra canonem" than "in canonem" (De serv. arbitrio; comp. his Thes. 4, 408; Berlin ed. 1848), but in this he stood alone in the Protestant churches of his day; nor was it till a comparatively recent period that his opinion found and any advocates. The first who set himself systematically to impugn the claims of the book was Semler, and him Oeder, Corradi, Augusti, Bertholdt, De Wette, and Bleek have followed. Eichhorn with some qualifications, Jahn and Havernick unsparingly, have defended its claims. The objections urged against the canonicity of the book resolve themselves principally into these three:—1. That it breathes a spirit of narrow, selfish, national pride and vindictiveness, very much akin to that displayed by the later Jews, but wholly alien from the spirit of the acknowledged books of the O. T.; 2. That its unhistorical characteristic is manifested in the total omission in it of the name of God, and of any reference to the divine providence and care of Israel; and, 3. That many parts of it are so incredible as to give it no place rather of a mere piece of history than of the character of a true history (Bertholdt, De Wette, etc.). In regard to the first of these, whilst it must be admitted that the spirit and conduct of the Jews, of whom the author of this book writes, are not those which the religion of the O. T. sanctions, it remains to be seen whether, in what he narrates of them, he has not simply followed the requirements of historical fidelity: and it remains to be proved that he has in any way indicated that his own sympathies and convictions went along with theirs. There can be little doubt that among the Jews of whom he writes a very large state of religious and moral depravity prevailed from what belonged to their nation in the better days of the theocracy. The mere fact that they preferred remaining in the land of the heathen to going up with their brethren who availed themselves of the promise of the land, is no sufficient reason to suppose how little the true spirit of their nation remained with them. This being the case, the historian could do nothing else than place before us such a picture as that which this book presents; had he done otherwise he would not have narrated the truth. It does not follow from this, however, that he himself sympathized with those of whom he wrote, in their motives, feelings, and conduct, or that the spirit dominant in them is the spirit of his writing. It is true, occasions may frequently present themselves in the course of his narrative when he might have indulged in reflections of an ethical or didactic character on what he has narrated, but to do this may not have been in the plan and course of his work, and he may therefore have intentionally avoided it. Observations to the same effect may be made on the second objection. If the purpose of the author was to relate faithfully and without comment the actions and words of persons who were living without any vital contact with the observer, the critic, the circumstances of the council in the narrative will be sufficiently accounted for by this circumstance. If it be said, But a pious man would have spontaneously introduced some such reference, even though those of whom he wrote gave him no occasion to do so by their own modes of speech or acting, it may suffice to reply that, as we are ignorant of the reasons which moved the author to abstain from all remarks of his own on what he narrates, it is not competent for us to conclude from the omission in question that he was not himself a pious man. If again it be said, How can a book which so simply narrated many conduct of Jews who had to a great extent forgotten, if they had not renounced the worship of Jehovah, without teaching any moral lessons in connection with this, be supposed to have proceeded from a man under God's direction in what he wrote, it may be replied to this, that a man who is under God's direction will be full of important moral lessons, even though these are not formally announced in it. That it is so with the book of Esther may be seen from such a work as M'Crie's Lectures on this book, where the great lessons of the book are expounded with the skill of one whose mind has been for a long period in historical research. As the third objection above noticed rests on the alleged unhistorical character of the book, its force will be best estimated after we have considered the next head. 111. Credibility.—In relation to this point three opinions have been advanced: 1. That the book is wholly unhistorical, a mere legend or romance; 2. That it has a historical basis, and contains some true statements, but that with these much of a fabulous kind is intermixed; 3. That the narrative is throughout true history. Of the first it may be said that it has no support. It is obviously incompatible with the reception of the book into the Jewish canon; for, however late be the date assigned to the closing of the canon, it is incredible that what must have been known to be a mere fable, if it is one, could have found a place in the canon of the Mosaic law, if written by the Jews of the feast of Purim, instituted to commemorate the events recorded here (comp. 2 Macc. xv. 86); and it is rendered improbable by the minuteness of some of the details, such as the names of the seven eunuchs (i. 10), the seven officers of the king (i. 14), the ten sons of Haman (ix. 7-10), and the general accurate acquaintance with the manners, habits, and contemporary history of the Persian court which the author exhibits. (See the ample details on this head collected by Eichhorn and Havernick, Excld. 11, 1, 339-357). The reception of the book into the canon places a serious difficulty in the ear and opinion; for if those who determined this would not have inserted a book wholly fabulous, they would as little have inserted one in which fable and truth were indiscriminately mixed. It may be proper, however, to observe that the latter view is not altogether to be regarded for only thus can the objection be satisfactorily refuted. First, then, it is asked, How can it be believed that if the king had issued a decree all the Jews should be put to death, he would have published this twelve months before it was to take effect (iii. 12, 15)? But, if this seem incredible, the other view appears no less incredible to those for whom the book was written; and nothing can be more im-
probable than that a writer of any intelligence should by mistake have made a statement of this kind; indeed, a fiction of this sort is exactly what a fabulist would have been the most ready to have invented, and thus to have deprived the narrative of historical value.

xi, d. 4), who observes that the facts of the history are posterior to the time of Ezra, attributes it to some later but unknown author. Clemens Alexandrinus (Stromata, lib. i. p. 822; ad Polycarpum), and Maccabees to Mordecai. The pseudo-Philo (Chronographia) and Rabbi Azarias maintain that it was written at the desire of Mordecai by Jehokam, son of Joshua, who was high-priest in the 12th year of the reign of Ahasuerus. The Alexandrine version states that the epistle regarding the feast of Purim was brought by Dositheus into Egypt, under Ptolemy and Cleopatra (B.C. cir. 160); but it is well known that these subscriptions are of little authority. The authors of the Talmud say that it was written by Nehemiah and the memlim, or Great Synagogue of Jerusalem; and we may quote Ezekiel and the twelve Prophets. But the whole account of the Great Synagogue, said to have been instituted by Ezra, and concluded by Simon the Just, to whom it is said to have been committed, and whose death took place B.C. 292, is by some looked upon as a rabbinical fabrication. It is impossible to decide to what superscriptions the subscription to Mordecai seems the most probable.

The minute details given of the great banquet, of the names of the chamberlains and eunuchs, and of the women and sons, and of the customs and regulations of the court, point to the authorship of Shushan, and probably at court, while his less important remarks are in harmony with the private affairs both of Esther and Mordecai. The whole suits the hypothesis of the latter being himself the writer. It is also in itself probable that as Daniel, Ezra, and Nehemiah, who held high offices under the Persian monarchy, had an interest in the establishment of the nation, in which they took a leading part, so Mordecai should have had the transactions of the book of Esther likewise. The termination of the book with the mention of Mordecai's elevation and government agrees also with this view, which has the further sanction of many great names, as Aben Ezra, and most of the Jews, Yatazab, Carmezov, and many others. Those who ascribe it to Ezra, or the men of the Great Synagogue, may have merely meant that Ezra edited and added it to the canon of Scripture, which he probably did, bringing it, and perhaps the book of Daniel, with him from Persia. The transition is so smooth and natural that it is more probable than that German professors in the 19th century.

The casual way in which the author of 2 Macc. xv, 86 alludes to the feast of Purim, under the name of "Mardochaeus's day," as kept by the Jews in the time of Nicomed, is another strong testimony in its favor, and tends to justify the strong expression of Dr. Lee (quoted in Whitson's Josephus, xii, ch. vi), that "the truth of this history is demonstrated by the feast of Purim, kept up from that time to this very day."

The style of writing is remarkably chaste and simple, a style, like the simple and mind of the narrative of the story, free from declamation; and thus advantageously distinguished from the similar stories in the Apocrypha (Introduction, Parker's translation, Boston, 1845).

IV. Authorship and Date.—Augustine (De Civitate Dei) ascribes the book to Ezra. Eusebius (Chronic.

ESTHER. APOCRYPHAL ADDITIONS TO THE BOOK OF—Besides the many minor deviations from the He
brew, there are six important additions in the Septu
ginnes, and the other ancient versions of the book of Esther.

1. Title and Position.—In the Sept. and the Old Latin these additions are dispersed through the canonical
copy, forming with a well-adjusted whole, and having its own title. In Hebrew, however, separated them in his translation, and removed them to the end of the book, because they are not found in the Hebrew.

2. In the Vulgate and the English version, ch. xi. 2-17, 3.

3. Between ver. 19 and 14 of ch. vii. in the canonical

4. Before ver. 1 and 2 of ch. vi. in the canonical

5. Between ver. 16 and ch. viii. in the canonical

The whole book is closed with the following entry:
"In the fourth year of the reign of Ptolemaeus and Cleopatra, Dositheus, who said he was a priest and..."
Levite, and Ptolemy his son, brought this epistle of Pharim, which they said was the same, and that Ly- simachus, the son of Ptolemy, had written the same. This entry was apparently intended to give authority to this Greek version of Esther by pretending that it was a certified translation from the Hebrew original. Ptolemy Philometer, who is here meant, began to reign B.C. 181. He is the commander in the nation of the Jews (see John v. 45; 7: xi; 12; comp. Joseph. Ant. xiii. 4, 1 and 3, and Clinton, F. H. ii. 393). Doxistae seems to be a Greek version of Mattithiah; Ptolemy was also a common name for Jews at that time.

II. Origen, Historical Character, and Unity.—The passage which mentions the Jewish nation so fondly extolled upon the remarkable events and characters of by-gone days, and which gave rise to those beautiful legends preserved in their copious literature, scarcely ever had a better opportunity afforded to it for employing its richly inventive powers to magnify the great Jehovah, embalm the memory of the heroes, and brand the names of the enemies of Israel, than in the canonical book of Esther. Nothing could be more natural for a nation who "have a zeal of God" than to supply the name of God, and to point out more distinctly what was the case of the book, and, though recording their marvellous escape from destruction, had for some reasons omitted avowedly to acknowledge the Lord of Israel. Besides, the book implies and suggests far more than it records, and it cannot be doubted that there are many other things connected with the history it contains, which were well known at the time, and were transmitted to the nation. This is evident from the fact that Josephus (Ant. xi, 6, 6 sq.) gives the edict for the destruction of the Jews in the Persian empire, the prayers of Mordecai and Esther, and the second edict authorizing the Jews to destroy their enemies. (Comp. Conybeare, on the name of the eunuch's servant, a Jew, who betrayed the conspiracy to Mordecai, and citing other passages from the Persian chronicles read to Ahasuerus, besides that relating to Mordecai, and amplification of the king's speech to Haman, etc.; and that the second Targum, the Chaldean, published by De Rossi, and Josippon ben-Gorion (ed. Breithaupt, p. 74 sq.), give the dream of Mordecai, as well as his prayer and that of Esther.

The second addition which heads the canonical book, and in which Mordecai foresees in a dream both the dangers and the salvation of his people, is in accordance with the desire to give the whole a more religious tone. The second addition originated from the fact that ch. iii, 18 of the canonical book speaks of the royal edict, while the plain text speaks of the story of the said document; the same is the case with the third addition, which follows ch. iv, 17, and gives the prayers of Mordecai and Esther, for the said passage in the canonical volume relates that Esther ordered prayers to be offered. The fourth addition after ch. v, 1, giving a detailed account of Esther's interview with the king, originated from a desire to give more information upon the fact, which is simply alluded to in the canonical passage. The fifth addition, after ch. viii, 13, originated in the same manner as the second, viz. in a desire to supply a copy of the royal edict, while the sixth addition, however, which is followed by the interpretation of the dream with which the first addition commences the canonical volume. From this analysis it will be seen that these supplementary and embalming additions are systematically dispensed through the book, and that they are well-adjusted and continuous history. In the Vulgate, the days, obtained currency by the versions of the Reformers on the Continent and our English translations, where these additions are torn out of the proper connection and removed to a separate place, they are most incomprehensible.

IV. Author, Date, and Original Language.—From what has been remarked in the foregoing section, it will at once be apparent that these apocryphal additions were not only manufactured by the translators of the canonical Esther into Greek, nor are they the production of the Alexandrian nor of any other school or individual, but embody some of the numerous national stories connected with this marvellous deliverance of God's ancient people, the authorship of which is lost to us now, and is known to us only through these stories. All these stories are connected with the nucleus of the event itself, around which they cluster, and all of them grew up at first in the vernacular language of the people (i.e. in Hebrew or Aramaic), but afterwards assimilated the complex and language of the countries in which the Jews happened to settle down. Besides, the references given in the second section lead us to these conclusions, we also refer to the two Midrashim published by Jellinek in his Beith Ha-Midrash, i (L.P. 1858), 1 sq. In ch. iii. the pretended copy of Artaxerxes' decree for the destruction of the Jews is written in thorough Greek style; the prayer of Esther excurses her for being wife to the uncircumcised king, and denies her having eaten anything or drunk wine at the table of Haman; the pretended copy of Artaxerxes' letter for reversing the previous decree is also of manifestly Greek origin in ch. viii, in which Haman is called a Greek, and is accused of having plotted to transfer the empire from the Persians to the Macedonians, a palpable proof of this portion having been composed after the overthrow of the Persian empire by the Greeks.

V. Canonicity of these Additions.—It is of this Sept. version that the reference is made (Fest. p. 39, and Sem. p. 39, Oxf. translation) spoken when he ascribed the book of Esther to the non-canonical books; and this, also, is perhaps the reason why, in some of the lists of the canonical books, Esther is not named, as, e.g. in those of Melito of Sardis and Gregory Nazianzen (see Whittaker, Disput. on H. Scr. Park. Soc. p. 85, 58, and Neander, Gesch. der Scr. p. 49, 50), unless in these it is included under some other book, as Ruth or Esdras ("this book of Esther, or sixth of Esdras, as it is placed in some of the most ancient copies of the Vulgate," Lee's Dissert. on 2d Esdras, p. 25). The fathers, who regarded the Septuagint as containing the sacred scriptures of the O. T., believed in the canonicity of these additions. Even Origen, though admitting that they are not in the Hebrew, defended their canonicity (Ep. ad African. ed. West, p. 225), and the Council of Trent pronounced the whole book of Esther, with all its additions, to be canonical. These additions, however, were never included in the Hebrew canon, and the fact that Josephus quotes them only shows that he believed them to be historically true, but not inspired. St. Jerome, who knew better than any other his own country, as the earliest Jew included in their canon, most emphatically declares them to be apurivous ("Librum Esther varii translatiorum constat esse viiutam; quem ego de archivis Hbreorum relevans, verbum et verbio expressa transitari. Quem librum editio vulgatis lacunosis hinc inde verbum sinibas [al. funibus] trahit, addens ea quae ex tempore dici poterant et audiiri; sicut solius est scholaribus disciplinis summo thmate exegi- tare, quibus verbis uti potuit, qui injuriam passuis est, vel qui injuriam fecit," Prof. in 1 Esth.). Sixtus Se- nensis, in spite of the decision of the council, speaks of these additions as inserted by the Septuagint in the Hebrew, and censures hinc inde quorundam scriptorum temeritate inseratas", and thinks that they are chiefly derived from Josephus; but this last opinion is without probability. The manner and the order in which Josephus cites them (Ant. xi, vii) show that they and his days, obtained currency among the Hellenistic Jews as portions of the book of Esther, as we know from the way in which he cites other apocryphal books that they were current likewise, with others which are now lost; for it was probably from such that Josephus de- rived his stories about Moses, about Samballat, and the
ESTHER

EST, FAST OF (עָסָר הַיָּסֶר), so called from the fact that it was ordered by Esther to avert the impending destruction which at that time threatened the whole Jewish population of the Persian dominions (comp. Esther iv. 16, 17). The Jews to this day keep this fast on the 13th of Adar, the day which was appointed for the extermination, and which precedes the feast of Purim, because it was on this day that Esther and Mordecai, that it should continue a national fast, to be observed annually in commemoration of that eventful day (comp. Esther xix. 31). During the Macedonian period, and for some time afterwards, this fast was continued by a Royal Festival, which was instituted to celebrate the anniversary of the victory obtained by Judas Maccabeus over Nicanor on the 13th of Adar (comp. 1 Macc. v. 49; Josephus. Ant. xii. 10, 5; Megillah Tannith, c. xii; Joseph ben-Gorion, ii. 22, p. 244, ed. Breithaupt). But this festival has long since ceased to be celebrated, and as early as the ninth century of the Christian era we find that the fast of Esther was again duly observed (comp. Sheelothh of R. Achai, Purim 4), and it has continued ever since to be one of the fasts in the Jewish calendar. The Jew entirely abstains from drinking on this day, and introduce into the daily service penitential psalms, and offer prayers which have been composed especially for this occasion. If the 13th of Adar happens to be a Sabbath, this fast is kept on the Friday, because fasting is not allowed on the Sabbath day. Some Jews go so far as to fast three days, according to the example of Esther (comp. iv. 6). See CALENDAR, JEWISH.

Battenne. See STEPHENS.

Estius, Guilielmus (William Hesõlas van En), an eminent Roman Catholic theologian, was born at Gorcum, Holland, 1542, and studied at Utrecht and Louvain. He was for ten years professor at Louvain; in 1560 he became professor of divinity at Douai, and in 1603 chancellor of the University. Estius obtained great repute for learning and piety. Benedict XIV named him doctor fundamentis. He died at Douai Sept. 20, 1613. His principal writings are Commentarii in Epistolae Apostolicae (Douai, 1614-16; Col. 1631, 3 volumes, fol.); Exegetica ad locos sacros (in the Douai version, 2 vols., fol.); — in quat. libros sanctos commentarei (Par. 1638, fol.; Naples, 1720).—Ann. in praecipuus difficilli-"ris S. S. (Antw. 1621, fol.). His Commentary on the Epistles is extolled alike by Romanists and Protestants. He was made archbishop of Brindisi in the new edition, editor of Sausen (Mayence, 1841, 8vo).—Horae, Instr. Bib. Appendix, p. 134; Hoefer, Nouv. Bio. Générale, xxiv, 488.

ETRANGELIO. See SYRIAC LANGUAGE.

E'tam (Hebrew Eysam'), צָעִיר, i.e. place of ravenous birds; Sept. Ηρυμ in Judges, Αἰγύν in 1 Chron. iv. 3, elsewhere Αἰγυς; Josephus Αἰγυς in Ant. x. 8, 8, and in antiqu. 1701, 10, 3; Hərûm in 1 Sam. vii., 3; Vulg. Etam), the name apparently of two places in Palestine.

1. A village (גָּדָרָה) of the tribe of Simeon, specified only in the list in 1 Chron. iv. 82 (comp. Josh. xix., 7), but that it is intentionally introduced appears from the fact that the number of places is summed as five, though this table called four; this place (hence its name, q. d. eagle's nest) was probably situated a "rock" (צָעִיר, τίρπα, σίλκα) or cliff, into a cleft or chasm (צָעִיר, Α. V. "top") of which Samson retired after his slaughter of the Philistines, in revenge for their burning the Timnite woman who was to have been his wife (Judg. xv. 8, 11). This natural stronghold (τίρπα ἐν ἔραυν ἐξώπην, Josephus, Ant. x., 8, 8) was on the territory usually assigned to the tribe of Judah, yet not far from the Philistine border; and near it, probably at its foot, was Lehi or Ramath-lehi, and En-hakkore (xv. 9, 14, 17, 19). As Van de Velde has, with great probability, identified Lehi with Lekiyeh, on the road between Philistine plain S.E. of Gaza (Narrative, ii. 141), he is probably also right in identifying this Etam at tell Kheischel, a little north of it (Memoir, p. 811), in the immediate vicinity of tell Hara or En-hakkore (q. v.). Schwarz's location of Etam at Khudna (he says Geuna, i. e. Utma, Palest. p. 124) is without foundation.

2. A city in the tribe of Judah, fortified and garrisoned by Rehoboam (2 Chron. xi. 6). From its position in this list we may conclude that it was near Bethlehem and Tekoa; and in accordance with this is the mention of the name among the ten cities which the Sept. insert in the text of Josh. xvi. 50, "The city of Ephrathah, which is Bethlehem, Phagor and Etam (Airvav), etc." Here, according to the statements of the Talmudists, were the sources of the water from which Solomon's gardens and pleasure-grounds were fed, and Bethlehem and the Temple supplied. (See Lightfoot, on John v.) Hezekiah may perhaps be identified with that of Solomon's Pools at El-Buruk, near Bethlehem (see Schwarz, Palest. p. 268). See JERUSALEM; WATER. Josephus (Ant. viii., 7, 8) places it at fifty stadia (in some copies sixty) from Jerusalem and Bethania, and situates it on this river. He thus takes up the tradition of taking a morning drive to this favored spot in his chariot. It is thus probable that this was the site of one of Solomon's houses of pleasure, where he made him gardens and orchards, and pools of water (Ecc. ii, 5, 6). The same name occurs in the lists of Judah's descendants (1 Chron. iv. 8), but probably referring to the same place, Bethlem being mentioned in the following verse. See JEZEREKEL. 3. Dr. Robinson (Researches, i, 513; ii, 168) inclines to find Etam at a place about a mile and a half south of Bethlehem, where there is a ruined village called Cirus, at the bottom of a pleasant valley of the same name. Here there are traces of ancient ruins, and also a fountain, sending forth a copious supply of fine water, which forms a beautiful jearling roll along the bottom of the valley. This location is in accordance with all the foregoing notices. It was close to Solomon's Pools in common, Land and Book, ii, 431. Williams (Holy City, ii, 90) fully accredits the above Rabbinical account, and also states that the old name is perpetuated in a wady Etam, which is on the way to Hebron from Jerusalem, and that there are still connected with it the largest and most luxuriant gardens to be met with in the hilly region of Judaea.

Eternal is in general the rendering in the A. V. of the Heb. צָעִיר, Αἰγύς, and the Greek Αἰγύς or Αἰγύς (both frequently "everlasting," "ever," etc.).
ETERNAL LIFE

For the first indication on this point, Lev. xviii, 5; Ezek. xx. xi, xviii, 21; Habak. ii, 4 (comp. Gal. iii, 11, 12); Psa. xxxiv, 18 (comp. 1 Pet. iii, 10) are to be referred to.

2. In the N. T. it is of frequent occurrence. In the first three evangelists we find ζωή αἰώνιος (eternal life), or something like it; (life), reservoir of life, as the object and destiny of man, e. g. Matt. vii, 14; xviii, 8, 9; Luke x, 28; comp. ver. 25, and xviii, 18. The resurrection of the dead precedes it (Luke xiv, 14). It therefore comprises the whole future of the disciples, their full reward, and the idea is still connected with that of felicity (μετάνοια in τοις ορθοίς, reward in heaven, Matt. v, 12; reception into the άγια σκηνα, everlasting tabernacles, Luke xvi, 9).

In Matt. xix, xxix, 46; we find it opposed to κολασία αἰώνιος (eternal punishment).

Paul considers it as the dern, 1, 20; and the object of our faith (1 Tim. v, 16), and of saving grace (Rom. v, 21), and consequently also the object of our hope (5, 8, 9, 11, 12), and the purpose of the subject is to apply the only limitation is shown by the fact that while the term is used of God in the widest sense, both of the past and future (Gen. xxix, 38; Isa. xi, 28; Dan. xii, 7), it is also employed hyperbolically of Christ (John x, 28; Acts xxvii, 22, 24), in an apostle (Rom. xii, 14), especially in salutations and invocations (1 Kings i, 3); Neh. ii, 3). In all these significations and applications it is often used in the plural (σωτήρες), whether past (Isa. vi, 9; Dan. ix, 24; Eccles. i, 19 or future (I Kings i, 5; Ixvii, 6, 6), etc.), and this is sometimes a reduplicated form, like "ages of ages" (αιώνια) or "eternal life (αιώνιον). Peculiar is the Rabbinical usage (Buxtorf, Lex. Talm. col. 1690) for the world (so Greek αἰών), but only in Eccles. iii, 11.—Gesenius’s and First’s Heb. Lex. s. v.; Hommel, De vi ridicis βίβλοι (Wittgen.)

The Greek term αἰών corresponds remarkably to the Hebrew בֵּית (bed), near in all these senses, and is its usual rendering in the Sept. It is derived from αἰών, αἰωνιοῦσα, αἰωνιοῦσα (original αἰōn), αἰωνιοῦ, αἰωνιοῦσα itself an old dative from an obsoletē noun αἰῶνα or αἰῶνα = Lat. aera, probably derived from αἰών, and the same in the root with the English erer, and also, perhaps, aye), with the locative termination -ον appended to the root. The adjective αἰωνιώτατος, with which we here more directly concerned, follows almost the same principle. For the sense and conditions of the primitive. Its general import is enduring, perpetual.

In the N. T. it is spoken of the past in a restricted manner, in the sense of ancient or primeval (Rom. xvii, 2; 2 Tim. i, 2; Titus i, 2); or of the past and future absolutely (Rom. xvii, 26; Heb. ix, 14); elsewhere of the past, in an unlimited sense, endless (2 Cor. iv, 18; v, 1; Luke xvi, 9; Heb. xiii, 20; ix, 12; Rev. vii, 6; 1 Tim. vi, 16; Phil. ix, 15), as of the prospect of Christ’s kingdom (2 Pet. i, 11), but especially of the happy future of the saints in heaven (particularly in the phrase "life everlasting," Matt. xix, 16, xx, 46; and often), or the miserable fate of the wicked in hell (e. g. as punishment, Matt. xxvi, 46; condemnation, Mark iii, 29; judgment, Heb. vi, 2; destruction, 2 These, i, 9, or fire, Matt. viii, 11; xxv, 41; Judg. 7).—Robinson, Lex. of the N. T. s. v.; Leavitt, in the Christian Missionary, 10 (1837); Expositor, i, 29; x, 34, 166; xii, 97, 169; Stuart, in the Spirit of the Pilgrims, ii, 405; Cremer, Wörterbuch d. N. T. Grätz, p. 46.

Eternal Life (ζωή αἰώνιος).

1. Biblical Usage of the Terms.—I. In the O. T. we find this expression occurring only in Dan. xii, 2: Some shall awake in ζωή αἰώνιος, the others in διανοία αἰώνιον, Sept. εἰς ζωήν αἰώνιον, the others in διανοίαν αἰώνιον. For the first indication on this point, Lev. xviii, 5; Ezek. xx. xi, xviii, 21; Habak. ii, 4 (comp. Gal. iii, 11, 12); Psa. xxxiv, 18 (comp. 1 Pet. iii, 10) are to be referred to.

2. In the N. T. it is of frequent occurrence. In the first three evangelists we find ζωή αἰώνιος (eternal life), or something like it; (life), reservoir of life, as the object and destiny of man, e. g. Matt. vii, 14; xviii, 8, 9; Luke x, 28; comp. ver. 25, and xviii, 18. The resurrection of the dead precedes it (Luke xiv, 14). It therefore comprises the whole future of the disciples, their full reward, and the idea is still connected with that of felicity (μετάνοια in τοις ορθοίς, reward in heaven, Matt. v, 12; reception into the άγια σκηνα, everlasting tabernacles, Luke xvi, 9).

In Matt. xix, xxix, 46; we find it opposed to κολασία αἰώνιος (eternal punishment).

Paul considers it as the result of death, and in the resurrection of the original man (Rom. ii, 7; 1 Tim. vi, 19, 20), the result of continually walking in the holiness secured to us by Christ; the πίστις (Rom. vi, 22), the reward (Gal. vi, 8), as also the object of our faith (1 Tim. i, 16), and of saving grace (Rom. v, 21), and consequently also the object of our hope (5, 8, 9, 11, 12); and that this promise is discernible in the apocalyptic (promise of the life to come) (1 Tim. iv, 8), the receiving of the incorruptible crown of righteousness (1 Cor. ix, 25; 2 Tim. iv, 8), the preservation unto the heavenly kingdom (2 Tim. iv, 18), that is described as the αὐτοκτόνωσις, which consist in the αὐτοκτόνωσις, revealed as δοξα, and retained in heaven (1 Pet. i, 4, 9; v, 1, 10). James considers it as the promised crown of life and inheritance of the kingdom (Jas. i, 12, ii, 5). In the epistles to the Hebrews it is described as the Sabbath of the people of God (iv, 9; compare xii, 22 sq., etc.). While, however, life everlasting thus belongs to the future, we must not forget that, according to Paul’s exposition, it appears in its essence indissolubly connected with our present life. As our relation to God, as altered by sin, can but lead to death, so in the regeneration of the human nature there must necessarily, and, indeed, as an ethical religious principle, be ζωή (life) presented in the δικαιοσύνη, righteousness (Rom. v, 21; viii, 10; Gal. iii, 21); so that δικαιοσύνη, in its connection with ζωή (Rom. v, 16, δικαιοσύνη, justification of life), constitutes the very essence of the ρεγημα, imputed to the subject, even though in the Judaic epistles of the apostle the ζωή itself is dwelt upon more than the fundamental idea of the δικαιοσύνη. Christ is ζωή ζωής (our life); though yet concealed (Col. iii, 3, 4; Phil. iii, 10; Gal. ii, 15; Heb. xi, 40, 46), he is found in us (Gal. iv, 19): we have put him on, and become parts of his body (Eph. v, 30; Gal. iii, 27; Col. i, 18, etc.). From this it results that his life of glory must also become ours, which idea is presented to us in various ways (Rom. vi, 8; 2 Tim. ii, 11, 12; Rom. v, 17, 21; viii, 30; Eph. v, 5, 6).

The Spirit gives also the σωτήρ (Saviour, as the element of new life (Rom. viii, 2; comp. 2 Cor. iii, 17), the foundation of that life which overcomes that which is mortal (2 Cor. iv, 4, 5; Eph. i, 11); our mortal body is by it made alive (Rom. viii, 11); its results are peace and life (Rom. viii, 6, 10, 13). In this respect eternal life is the gift of God in Jesus Christ our Lord (Rom. vi, 23). As λόγος ζωῆς (the word of life) (Phil. ii, 16), Christ has destroyed death, and brought life and immortality to light through the Gospel (2 Tim. i, 10).

Aside from this evident connection between eternal life and the newness of life of the Christian derived from Christ (Rom. vi, 4), the ζωή αἰώνιος (eternal life) is still always considered in Paul’s writings as posterior to the mortal body, and the change of the corruptible for the incorruptible. The consequences of these premises in their full development are first presented to us, however, in the epistles.
ETERNAL LIFE

of John. Here we find the most important principle for the subject of the author of Christian Ethics, dr. mortuorum et viventium (he that believeth on the Son hath eternal life) (John iii, 36; iii, 15, 16; v, 24; vi, 47, 53-58; x, 28; xvii, 2, 3; xx, 31; John v, 12, 13). Having passed from death unto life, death has no longer dominion over him (John v, 24), and he is free to enjoy the spiritual gifts of the Holy Spirit, he becomes partaker of the fulness of salvation. On the contrary, those who do not hearken to the Son have not life, neither shall they see it, but the anger of God abides with them. Thus, while Paul distinguishes between the actual state of grace, with its accompanying hope and the future perfection of the object of our hope, John unites these in his conception of eternal life, and thus uses the expressions ζωή αἰωνίως (eternal life) and ζωή (life), which stand in the relation of form and contents, indiscriminately with or without the article (John iii, 36; v, 24; John iii, 14, 15; v, 11, 12, 13, etc.). The life of the faithful on the earth is inseparably connected with their eternal life, from the fact of their absolute deliverance from the sentence of death resulting from a state of estrangement from God (John vi, 55). It is a result of the birth of God's Spirit in John being His whose life is "in himself" (John vi, 57), and is Himself "eternal life" (1 John v, 20), the source of all life, yet the communication of life to the world, i.e. to mankind, has from the beginning, even before time began (John vii, 56), been irrevocably vested in the Son. He is the Logos (word) as well as the life and his relationship to God is in his relation to the world. He has received the fulness of divine life from the Father in such a manner that it belongs to him as thoroughly (John v, 26; John v, 11). Now, inasmuch as the Logos became flesh, the eternal life, which was of God, became manifested in him. It is, in the next place, the revealed light of faith. Christ, in his relation to the world, is therefore as well ὁ λόγος τῆς ζωῆς (Christ) (John i, 1, 2; John i, 3, 4; vi, 33; xv; 11; xv, 21; xvii, 19; vii, 35, 38, 63; vii, 58, 89). From this it is easily seen how eternal life is designated in the N.T. as the command of the Father, the knowledge of God and of Christ, or also as the commandment of Christ (John xii, 50; comp. xviii, 3; xviii, 3; John ii, 25; iii, 14; John v, 23). Confirmations of this view, by which the ζωή comes to occupy the first place in the plan of salvation in Christ, are to be found in numerous passages of the N.T. Christ is represented as the ever-living (Rev. i, 18), the ἀμφισβατήσις τῆς ζωής (Acts iii, 13), the λόγος ζωής, by virtue of whom those who follow him become λόγοι ζωῆς, living stones (1 Pet. ii, 4, 5). In 1 Pet. iii, 7 (comp. iv, 6) we read of a κλήμονον γεράτος (and in the apocryphal description of the heaven- en Jerusalem we still read of a ποταμός ἀληθείας (river of the water of life) which flows from the throne of God and of the Lamb (Rev. xvi, 7). ζωή (tree of life) by the shores of the stream (Rev. xvi, 1, 2, 14, 19, 7). See the different interpretations given to John's ζωή αἰωνίως in Kaeffer, De bibl. c. a. notion., p. 22.

11. History of the Doctrine. — 1. The Talmudists speak only of the נֵּפֶל נְבֵי, in which all Israelites have part, but nowhere of an eternal life; while the Targumists make use of the expression, for instance, in Lev. viii, 5.

2. It was long before even the Christian Church was able to understand the full scope of the idea. In the early time, a "eternal life" was represented only as future happiness, to be fully accomplished only after the resurrection and the judgment of the world. Irenaeus (adv. Haer. i, c. 10) states what the per universum orbem usque ad fines terrae seminata ecclesia (the Church dispersed throughout the earth) believes on this point, the redemption — ut justitiae et sanctitae — incorruptibilem statum lustrat et vitam aeternam tribuat (coming of Christ to confer eternal life upon the righteous and holy). So also Tertullian (De praec. Hæret. c. xiii). Augustine (De Sp. et. Op. c. xxiv) says: "Cum seminatus sit aeterno, et semina semina exsurgant: ut in aeternum semina semina: ut itum praeium, cuius promissio nae" (that is, the complete reward, in the promise of which we joy) (De morib. eccl. cath. p. 25; De Trin. i, 13; Enchir. § 29, etc. Basil (Enarr. Psalm xiv) connects it with the eternal dispensation of heaven. The Apostle's Creed and the Athanasian Creed end the enumeration of their articles of faith with the dogma concerning eternal life as emanating from God, the absolute cause, and represent it as the final object of all ordained development (Const. Apost. vii, 41). John xx, 28 says: "Iam quia, Domine, in te salvi sumus, et per te salvi sumus, et in te salvi sumus, et per te salvi sumus, et per te salvi sumus, et per te salvi sumus, et per te salvi sumus, et per te salvi sumus, et through the waters; and the fathers speak of Christ merely ζωή, Ή ἐκεῖνος ζωή, but not ζωή αἰωνίως. Yet occasionally they touch upon nearly all the questions connected with that point, without, however, arriving at any definite system of doctrine. In their description of the state of the blessed they mention as the most important points its endless duration, freedom from evil, and absolute satisfaction. The latter was sometimes defined as complete knowledge, perfect moral liberty, inner and outer peace, or immediate intercourse with God and the saints, together with personal reunion with those who have preceded us; or, again, as a life of perfect happiness colored by the permanent influence of all human desire, or as several of these different points together. The finis desideriorum nostrorum is God himself, qui sine fine videbitur, sine fatoque amabilior, sine factuatione amabilior (Justin, Apol. i, 8; Origen, De princip. c. 3; Cyril, Ep. 53; Hieron, De orig. Naz. Orat. xvi, 9, vii; xxvi, 24; Greg. Nys. Orat. de Placita et Orat. de Mortuis; Basil, Hom. vi in Hexamet. et Hom. in Ps. cxiv; August. De civ. Dei, xxvi, 23; Chrysost. Hom. xiv in Ep. ad Rom.; Ambros. in Gal. vi; Cassiodor. De anima, c. xxii). The idea of different degrees of felicity in future life, as differences of reward, was widely prevalent, however, in making it lose its character as gratia pro gra tia (grace for grace) (August. Tract. xiii in John; Theodoret on Rom. vi, 23, and in Cividicam I). According to the ζῆς (desert) of every one, there are παλαιοὶ θησαυροί (John iv, 14, 15, 20; ἐκτικαὶ σειρία (John i, 1, 2, 11; Greg. Naz. Orat. xxvii, 8; xvi, 5; xvi, 7; xxix, 38; Basil in Eunom. i, 3; August. De Civ. Dei, xxxii, 30, 2; Hieron. ad. Jos. 2). The fathers say also very positively that the joys of heaven cannot be described, which is the whole truth of the Christian imagination [an approximative idea of them]. So Greg. Nys. (Inrat. Catech. c. xi). "Bona vita aeterna tam multa sunt unt numerum, tam magna ut mensuram, tam preposita ut estimationem omnem excedant" (August. De trip. ha b. c. 1, Conf. Orth.). (3.) The divines of the Middle Ages brought to light new truths on this point, but assembled those
ETERNAL LIFE
