More, Hannah, one of the most brilliant female ornaments of Christian literature, was born at the village of Stapleton, in Gloucestershire, Feb. 2, 1746, and was the daughter of a clergyman. She was educated at Church of England, a man eminent for his classical attainments, at that time employed as a village schoolmaster in charge of a charity school. Some time after the birth of her daughter Hannah she removed to Bristol, where she kept a private school. There were other daughters, and the family soon began to be taken notice of as one in which there was a display of talent that was unusual; so that some exertions were made by persons to whom they were known, and the sisters became early in life established in a school for the education of girls, which continued for many years the most flourishing establishment of its kind in the West of England. More was from the beginning the most remarkable of the group. She wrote verse at a very early age, and though these compositions were highly thought of in the family circle, they were never allowed to go beyond the precincts of their own house. And yet, in ways and by circumstances almost unnoticed, the fame of her literary talent began to spread, and in 1772 she was prevailed upon to publish a pastoral drama, which was entitled The Search after Happiness. It was brought out under the direction of her pastor, Dr. Stonehouse, a learned clergyman of the Church of England. He it was also who introduced Hannah to the great literary. In 1774 she published a regular tragedy on the story of Regulus, and two tales in verse; and her turn being then thought by her friends to incline to the drama, means were taken to obtain an introduction for her to Garrick, by whom she was very kindly received. He, in turn, introduced her to Dr. Johnson, Burke, Sir Joshua Reynolds, and others. In other words, she was considered the best literary society of London. Her manners and conversation confirmed the good impression elicited by her talents, and the position in society originally conceded as a favor was soon acknowledged as a well-established right. During this period of her life she published The Graces (1769), and Falsehood (1779), and other poems. These attempts at dramatic composition, and the consequent connection with the stage, seem to indicate that she was then, in a great measure, if not altogether, a stranger to evangelical views of Christian duty. But the death of David (1779), to whom she had become very much attached, produced a great change in her character. Educated as she had been with a deep impression of the truths of the Christian religion, the life which she now led began to appear to her as unbefitting a creature with the glorious prospects which Christianity opens to man. She therefore determined on forsaking the drama and retiring from the gay circle of fashion and of literature, and even quitted London in order the better to devote herself to the life befitting, as she thought, a child of God and an heir of immortality. She established her residence at a little rural retreat in the vicinity of Bristol, named Cowdip Green, where she enjoyed a freshness of feeling and a sweet mental tranquility to which she had previously been a stranger. In her transitive state she had produced her Sacred Dramas (1782), a publication more favorably received perhaps than her former works. But she finally resolved to devote herself to a treatment of subjects
surer of good results, and to write with careful preparation. She felt obliged to confess, to quote her own words from the Preface of the third volume of her works, that she did not "consider the stage in its present state as being the appropriate one in the formation of a Christian; on which account she thought proper to renounce her dramatic productions in any other light than as mere poems." Having become sensible of the follies of the world and the reigning defects of modern society, she resolved to embody the results of her observations and experience in the form of earnest and solemn admonitions against them. The first in this series of contemplated works was of a didactic nature, and was entitled Essays to Young Ladies. This was almost immediately followed by Thoughts on the Manners of the Great, a little volume which was issued in 1786 anonymously; and the object of which was to expose, in order to amend, the low morality—the loose and licentious principles—of fashionable society. Having excited a considerable degree of interest and curiosity, the work was attributed to the pen of more than one person of official dignity in the Church as well as the State. But the real author was not long discovered, and the éclat which the discovery gave to her name encouraged her to persevere in the course of moral instruction she had contemplated. Almost every successive year brought out some new production from her pen; and such was the power as well as the charms of her eloquent composition that her works were universally applicative, being esteemed more by the vulgar than by those who could appreciate their faults many of them were designed to expose and censure. Thus, immediately after the last-mentioned popular work, appeared An Estimate of the Religion of the fashionable World (1791), and this enjoyed as great a measure of success as its predecessor. To counteract the principles of the French Revolution, which had unsettled every European nation, and introduced a wild and turbulent spirit among some classes even of Great Britain, she conferred an incalculable benefit on her country by publishing, first, Village Politics, by Will Chipp, and next a periodical work, "The Cheap Repository Tracts"—a series of admirable tales of a moral and religious nature for the common people, one of which is the well-known Shepherd of Salisbury Plain. The influence which both these publications had over the popular mind is almost beyond conception. They were circulated by hundreds of thousands in all parts of the United Kingdom, and were more than anything else the means of keeping in mind the case of order and of true religion against the torrent of infidel philosophy which had set in so strongly from France. The next work which came from her pen was entitled Structures on the Modern System of Female Education (1799). Exceptions were taken by some to the "high Calvinistic principles" of this work; but it amounted to little after all, for she was known to do so much good that the opposition soon died out. Testimony was borne to its merits by bishop Porteus, in that he recommended the authoress as a competent person to superintend the education of the young princess Charlotte; and although an appointment, perhaps, it was not a responsible office being held by any lady beneath the ranks of the aristocracy, she showed her fitness for the task by the publication of Hints towards Forming the Character of a Young Princess (1805). After the lapse of some years she published Cathie in Search of a Wife, one of the best novels in respect to principle and moral tendency; and this was followed by Practical Piety (1811), Christian Morals (1812), The Spirit of Prayer (1813), An Essay on the Character and Writings of St. Paul (1815), and Modern Sketches (1819). But though these literary labours demanded much of her time, she yet found a portion for philanthropic labor, and having built a pleasant home and received her sisters there, she devoted herself with them to the people of her vicinity, especially the poor, of whom there were many—it being a mining district—who "had grown up coarse, brutal, ferocious, utterly neglected by their clergy, without any means of education or hopes of improvement" (Perry). Determined to elevate these downtrodden and forlorn people, the three sisters attempted the appalling task of alleviating all suffering and of educating the laboring classes. They devised various schemes of benevolence and usefulness, not the least of which was the erection of schools, which, though at first confined to the children of their immediate surroundings, soon extended their operations over no less than ten parishes where there were no resident clergymen, and in which upwards of 1300 children were thus provided with the benefits of a moral and religious education. Miss Hannah More's numerous writings, which produced her upwards of $150,000, enabled her to do much, but she was by no means dependent upon her own resources. Her high character had impressed itself on her friends and associates, and these freely poured out their treasures for the promotion of the More schemes. Bibles were distributed, prayer-books given away, and instruction provided for all who came to study, whether adult or child. In short, so unremitting were they in their labors and measures that what had been a moral desert was changed into a garden, which brought forth in rich abundance the excellent fruits of wide-spread intelligence, of elevated morality, and genuine religion. But at last age came upon Hannah More, and brought along some of its infirmities. In 1828 she was moved therefore to quit Barleywood, the place in which many years had been spent, and she now took up her abode at Clifton. Here she continued amid a painful and protracted illness until relieved by death on the 7th of September, 1833, surrounded by many to honor her and many also to love her; who looked up to her as one of the great reformers of the manners of English society; one who had asserted very successfully the right of Christianity, or, in other words, the right of the Christian Scriptures to have a larger share than it had been the wont to allow them in forming the character and directing the course of human beings while in this state of their probation. She bequeathed $10,000 for pious and charitable purposes. The best edition of her works is in 11 vols. 16mo (Lond. 1858). See The Memoirs and Correspondence of Hannah More, by William Roberts (Lond. 1834, 4 vols. 8vo; N. Y. 1836, 2 vols. 12mo, abridged in Christian Family Library); Life, by Rev. H. Thompson (Lond. 1868, 9vo); Correspondence of Hannah More with Zachary Macaulay (Lond. 1860); Mrs. Hall's visit to Mrs. Hannah More in Pilgrimage to English Shrines; Lives of Bishop Wilberforce, Perry, Hist. Church of England, 111, 480 sq.; Clissold, Lamps of the Church (Lond. 1868, 12mo), p. 167 sq.; Jamieson, Cyclop. Religious Biog., s. v. ; and the literature appended to the excellent article in Allibone's Dictionary, and in J. L. Mackay, Hist. of Scott. Literature. See also More, Henry, an English Arminian divine and moralist, noted as a leader of that class of English philosophers who arose in the 17th century to excorise the spirit of Calvinism from the English high schools, was born at Grantham, Lincolnshire, Oct. 12, 1614.

MORE

educated at Eton, where, aside from his regular studies, he bestowed much time on the reading of the philosophical works of Aristotle, Julius Scaliger, etc., poring, immature as he was, over the doctrine of predestination. His parents were Calvinists, and they had reared him with like notions, but he early became dissatisfied with that which his mind was not subject to. In 1631 he went to Christ College, Cambridge, and graduated in 1635. More all his years at college was most diligently employed in metaphysical studies. He says himself, "I immersed myself over head and ears in the study of philosophy, promising a most wonderful happiness to myself in it." Disturbed with all other systems, he found his mind only when he came to the writings of the Platonic school; whence, as he tells us, he learned that something better and higher than the knowledge of human things constitutes the supreme happiness of man, and that this is attainable only through that purity of mind and divine illumination which raise man to a union with God. But yet, he adds himself, though the Platonic writings attracted and benefited him, there was "among all the writings of this kind none which so pierced and affected" him "as that golden little book with which Luther in his youth was so wonderfully moved." This book was the Logica Germanica. This book More prized next to the Bible, and studied it until he could say that he was free from all scepticism, and once more truly devoted to Christian interests. He had taken his M.A. in 1639, and had been made also a fellow of his college. With the same unpolished contempt for ceremony, he was thus, as Ripley well says, "a turning after righteousness, as he speaks, as well as a running after knowledge." More now actually came forward to demonstrate with great care the principles both of revealed and natural religion, and to recommend to all at the same time, with the greatest seriousness possible, the practice of morality and virtue; or, rather, what is justly called the Christian or divine life. "It would seem, therefore," adds his biographer, "that Henry More was a man of a special providence, who in those days of freedom, as a light to those that may be fitted or inclined to high speculations, and a general guide to all that want it, how they are to mix the Christian and philosophic genius together, and make them rightly to accord in one common end, viz. the glory of God with the highest felicity and perfection." The depth and originality of his metaphysical theories, and the remarkable combination of great argumentative abilities, extensive learning, and ardent piety with which he set them forth, occasioned his being looked up to as a person of an extraordinary character by the greatest and best of his contemporaries. Indeed, he himself admitted, with frankness and simplicity natural to his temper, that the talents and dispositions lavished upon him were such as brought him into singular responsibilities; that, to adopt his own expression, he had "as a fiery arrow been shot into the world, and he hoped that it had hit the mark." After his election to a fellowship by his college he took charge of several pupils, some of them persons of rank, whose studies he directed with great fidelity and application—his management of them being distinguished from that of ordinary tutors chiefly by unusual gentleness, and by the deep tone of piety with which he always surrounded them. He also held the opinion that "the exercise of love and goodness, of humanity and brotherly kindness, of prudence and discretion, of unfeigned religion and devotion, in the plain and undoubted duties thereof, is to the truly regenerate soul, a far greater pleasure than all the fine speculations imaginable." It was life, not notions, which he chiefly valued; and he preferred a "single-heartedness of temper beyond any theories. He had no ambition to play the part of a leader in society, and steadily declined every attack Calvar him to make. He was content in the youthful circle which he gathered about himself as private tutor, and preferred to address the masses by his pen. The deanship of Christ Church in Dublin, with the provostship of Trinity College, and also the deanship of St. Patrick's, were proposed for his acceptance, as the standard of the two bishops when a vacancy should occur; but he could not be persuaded to accept these preferments. It is said that after the failure of these attempts, a very good English bishopric was procured for him, and that his friends had actually brought him, on some pretence or other, as far as Whitehall, designing to introduce him to the king to kiss the hands of his royal master for the appointment; but when More understood on what business he had been brought thither, nothing could induce him to enter the royal grounds. Once, late in life (1670), he accepted a prebend in the cathedral of Dublin, however, but only for the benefit of a charity with the view of serving his friend, Dr. Fowler, afterwards bishop of that diocese, into whose hands, with the chancellor's permission, he resigned it, refusing at the same time repayment of the expenses he had incurred. In the same manner, he for a short time kept the rectory of St. Peter's, in Lincoln, which his father had purchased for him, and then presented it to several friends in succession. He had the satisfaction of providing in this way for his friend, Dr. Worthington, when that accomplished divine, in common with many other clergymen, lost his church in the fire of London. When the bishop of his college fell vacant, More was proposed to him, in preference to a worthy, as a piece of preferment likely, if any could do so, to suit his wishes; he declined it as he had done every thing else, "passing otherwise his time within those private walls, it may be as great a philosopher, physician, and divine as ever did or will hereafter visit them." In fact, he believed that by a life of contemplation, and by laying the results of it before the world in his writings, he followed the course appointed him by Providence as best suited to his disposition and abilities, and likely to be serviceable to that and succeeding generations. Yet so humble were his notions of what he was capable of doing by himself that even in his letters, which are in earnest pursuit of those august theories which filled his mind, that he would say he "had lived a harmless and childlike life in the world." His works, he remarked to a person who was speaking in commendation of them, "were such as might please some solitary men that loved their Creator." In his later years Dr. More was sorely tried by the separation of his friend and former pupil, lady Conway, from the communion of the Church which was his ideal in the form "as it existed before the times of disturbance—the Church of the Reformation and of Hooker." To popery in every form he was violently opposed, as is evinced by a work of his on the True Idea of Antichristianism (see below), and also to the sects he was opposed: "Both his reason and his love of quietness and order were opposed to what he considered the excesses of Puritanism—the dismal spectacle of an infinitesimal sect of schismatics." Yet it should not be thought that More loved the ecclesiastical organization of England rather than the cause of Christ. "His main concern," says his biographer, "is that neither one order of the Church government nor another usurp the place which only religion itself should hold. He is for the 'naked truth of Christianity,' and nothing more; he will not, indeed, as he said to a friend, be called a Puritan. Such was his liberality, and yet he sought earnestly to recall lady Conway to the Church communion. She had been a favorite of his in her girlish
days, and much of his time he had passed at Ragley, in Warwickshire, her country-seat after marriage to lord Conway. She was a person of enthusiastic piety and great accomplishments, and by her More and his opinions the Ragley ladies been held in high estimation. Indeed, her husband is said to have been hardly less enthusiastic, and to have treasured everything of More's "with as much reverence as if it were Socrates's." Among such friends it was but natural that More should frequently pass his time, and it was among the shades of Ragley that he began some of his writings, among them his Conjectura Cubilascica, his Philosophia Teutonica Censura, and his Divine Dialogues (see below). He often counselled with lady Conway, and is believed to have been urged into authorship by her. She was particularly attracted by his mystical studies. Her consultations with him ultimately led her to turn aside and make her life one of most intense mystical devotion. She thus came to admire the patient quietude of the Quakers, as well as the opinions of that sect, at that time flushed with all the fervor attendant on novelty, persecution, and success, and finally she was induced to join them. Perhaps the doctor was conscious that his own religious views, characterized as they are by a degree of subjectiveness which unifies them for general reception (when eagerly adopted by a person of her peculiar temperament, not fortified by the counteraction of those healthier and more robust attainments which prevented any very evil consequence) was, in fact, the very event that paved the way to this unfortunate result. At all events, he received the account of it with unfettered affliuion, and labored many years with all the earnestness of a friendly to reclaim the fair prospecte for the Church establishment of which he was a most devout adherent. He was thus led into a controversy with William Penn, both by writing and conversation. An admirable letter on Baptism and the Lord's Supper, addressed on this occasion to Penn, is printed in the appendix to his life. He encountered also George Fox, and has left a description of the interview on his own feelings little flattering to that ill-used religious enthusiast. More failed to reconvert his pupil, but he retained her friendship. He continued to spend much of his time, as before, at Ragley "and its woods," and there composed several of his books at lady Conway's "own desire and instigation." After her death he drew her portrait, and it has been said that the rigid Quaker would see everything they could wish in it, and yet the soberest Christian be entirely satisfied with it." At Ragley, More formed several valuable acquaintances; of these we shall come to speak hereafter. But it is only there that he was surrounded by all that was "paradise, as he called his home at Christ College, he lived very much alone. Yet if he thus kept himself retired from the world, this life of solitude greatly stimulated his productivity as an author.

More began authorship in 1560 by the publication of his Psychosost, or the First Part of the Song of the Soul, "An Epitome of the Platonic Dialogues of Life" (reprinted in 1647, and, together with some additional pieces, published under the title of Philosophical Poems). It was a most singular effort in the literary line, for it seeks to turn metaphysics into poetry. It is an early attempt on his part to express in verse the Platonic principles which he afterwards so clearly and forcibly expressed in prose. These poems are now hardly known. His first prose work was published in 1562—Antidote against Atheism (new ed. 1565; also in coll. of philo. writings, 1602). In the following year he sent forth Conjectura Cubilascica, or Attempt to Interpret the first three Chapters of Genesis in a Three-fold Manner—literal, philosophical, and mystical, or directly moral. His next work of importance appeared in 1569, being an essay on the Immortality of the Soul (also 1662), accompanied by a valuable preface on the general subject of his philosophy. The leading principle of More's ethical system is that "moral goodness is simple and absolute, and that right reason is the judge of its nature, essence, and truth; but its attractiveness is dimmed by a species of enigma, anima facultate, not unlike the moral sense of later writers. Therefore all moral goodness is properly termed intellectual and divine. To affect this as supreme gives supreme felicity. By the aid of reason we state the axioms or principles of ethics in definite propositions, and derive from the special laws of nature, morality. In his philosophical views More espouses Descartes in the main, stating at great length and with much minuteness the doctrine of innate ideas, and defending it against misconceptions and objections. He qualifies Descartes's opinion that the soul has its seat in the plexus ganglii, and contends for the extension or diffusion of the soul, at the same time arguing that this does not involve its discerptibility. He contends at times for the reality of space as an entity independent of God, and again makes space to be dependent on God (anticipating the argument of Samuel Clarke). He argues the existence of God from the moral nature of man. He also ably defends the doctrine of free-will as "the basis of morality." "Against the theological Necessitarians, who deny contingency, More argues clearly that God himself can alone know what events are necessary and what contingent. Prescience of such events either implies a contradiction or not. But to suppose a contradiction merely is to see that they are not of the divine. Contradictory objects cannot come within the sphere of the divine omniscience. And if there is no contradiction, we may recognise in this very fact that there is no inconsistency betwixt the divine prescience and free-will. Either way no solid argument can be drawn against moral liberty from the idea of divine prescience. Again, the whole force of the objections as to the will always following what appears for the moment best, More supposed to be met by the simple experience that the good we know we frequently do not do. Our works are not determined by our knowledge of what is best. We may have fine ideas of virtue, and yet never put them in practice. Our freedom in this sense is only real; and it is the very object of morality to bring the idea and the will into union, and so enlighten the one and discipline the other that they may attain to the highest good." Hobbes is said to have been "very hostile" to More's philosophical and theological views, and to have declared that if his own philosophy was not true, he knew none that he should sooner like than Henry More's, of Cambridge." In 1660, finally, More came out again, and this time with one of the ablest productions we have from his pen, being an essay of the Mysteries of the Mosaic Code, "written after an illness in which he had vowed, if spared, to write a book demonstrative of the truth of the Christian religion—so far as concerns the person and offices of Christ, he would attempt to construct the Christian theology after those subjective ethical relations and beliefs which were taught by Plato and Plutarch, at the same time showing the pastoral force of these ideas in the Christian history—to the confusion of fanatics and infidels alike." He here reverently discusses the incarnation of Christ in all its bearings, and illustrates it with many curious and interesting thoughts derived from philosophy and history. Notwithstanding the Platonic dress in which he has so loyally clothed his thought, More holds firmly and expounds reverently and lovingly all the great doctrines of Christianity. He protests most energetically against the tendency to spiritualize away the reality of the Gospel history. "That the human person of Christ," he says, "is not to be laid aside is evident from the whole tenor of the scriptures and the Hebrews. For he that there is said to be a high-priest forever is that very man who was crucified on the cross at Jerusalem." Again he says, "I have with earnestness and endeavor, and with undeniable clearness of
testimony from reason and Scripture, demonstrated the truth and necessity of both Christ within and Christ without." It would appear that he did not altogether relish the phrase "imputative righteousness," yet his view of justification was not really that of other divines of the period; but he was perhaps fonder of laying stress upon this, that "the end of the Gospel was to renovate the spirits of men in true and real inherent righteousness and holiness," and he spoke of the phrase in question as a "great scandal and effectual countrypilot against the power of the Gospel, the nullifying and despising of moral honesty by those that are great zealots and high pretenders of religion." "For what an easy thing it is," he exclaims, "for a man to fancy himself an Israelite, and then to circumvent his honest neighbors under the notion of Egyptians." As for the Roman Catholic Church, he says that the Church "naturally tends to the betraying of souls to eternal destruction;" but adds, nevertheless, "not that it is impossible for me (who cannot infallibly demonstrate to myself that all who lived under paganism are damned) to imagine that all who have gone under the name of papists have tumbled down into hell." The Mystery of Godliness enjoyed great popularity, and so did his In-qui-et into the Mystery of Iniquity, a work directed chiefly against popery. But of all his writings, the only one which can be said to have retained any lasting popularity, or to be commendable to the modern reader is his Divine Dialogues, which appeared during the last year of his life, in 1668, containing "Disquisitions concerning the Attributes and Providence of God." This is pronounced by Tulloch the period which "may be said to mark the apex of More's intellectual activity." Of the book itself, Dr. Blair speaks in his lectures on rhetoric (lect. xxxvi) as "one of the most remarkable in the English language." "Though the style," he adds, "be now in some measure obsolete, and the speakers be marked with the academic stiffness of those times, yet the dialogue is animated by a variety of character and a sprightliness of conversation beyond what are commonly met with in writings of this kind." What is recounted in the Dia-logues under the name of Bathymus is believed to be his own peculiar experience, and gives an admirable picture of his clear, confiding, and enthusiastic spirit. The third dialogue is regarded as the best, for it is strikingly illustrative of the dreamy ideal enthusiasm with which the author (in the latter part) pursues his inquiries. The Divine Dialogues are certainly, upon the whole, the most interesting and readable of all of More's works. They possess, moreover, the advantage of condensing his general views on philosophy and religion. More's authorship continued far beyond this time (to 1683), thirty-two years after his death, and he composed after this his Manual of Metaphysics (1671, 4to), and attacked both Jacob Böhme (in Philosophica Teutonica Censura [1670]), and Spinoza (Dua-rum praecipuarum Aethem Spinosiani columnarum subserio [1672]) in elaborate treatises. But the elasticity and temper of his philosophical genius are less buoyant in these efforts. His Metaphysics," says Tulloch, "elaborate though they be, are in the main only a systematic and somewhat desultory expansion of views regarding the nature and proof of incorporeal substances, which he had already more than once expressed; while his cabalistical and prophetic studies have acquired a stronger hold of his mind." Within the next ten years he issued no fewer than five publications taken up with mystical subjects—some of them of the most curious technical character—including a Cabal-istic Catechism. Two of these writings are addressed to John Knorr (q. v.), the learned German Orien-talist, who was the first to call attention to the more obscure and less familiar parts of the history of life which More himself; and in this way to the person and life of that great Jesuit of which he had spent all his time—What is good? and What is true?—were apparently as fresh and important with him at the end as at the beginning. He frequently in his last days expressed the hope that when he was called out of the present life his writings would
be of use to the Church of God and to the world. Shortly
before his death he expressed his view of what
awaited him by repeating the first words of Cicero's
famous exclamation, "O praeculum illum diei, etc.;
intimating, as he had also done before, his conviction
that at his release from this painful world he would be
admitted to converse with blessed and congenial spiri-
tuals, such as "salutati illum mortua." For, as he had, in
1671, 1677, and 1679, in a variety of his philosophical
writings in 1672, folio (4th ed. 1712); his theological
works in 1675, folio. An analytical catalogue of all his
works may be found in Cattermole's Literature of the
Church of England, and also in Tulloch's Rat. Theology,
from which we extract this view of More as a writer:
"More, more than Cutworth, repeats himself, adding
prefaces and corrigenda, and even adds with new zeal
written, and returning again and again upon the same
track of thought. The germ, in fact, of most of his
speculations may be traced in his early Philosophical
Poems. His genius in one sense was singularly fecund.
Work after work sprang with easy luxuriance from his
pen. But his writings do not exhibit any close system,
or growth of ideas, unfolding themselves gradually, and
maturing to a more comprehensive rationality.
This lack of method is more or less characteristic of the
school. Not only so, in his later productions there is
rather a decay than an increase and enrichment of the
character. He enters in with all the freshness of his
cabalistical studies, of his discovery of Cartesianism in
the first chapters of Genesis, and his favorite notion of
all true philosophers descending from Moses through
Pythagoras and Plato; and, still more, to touch his pro-
phetical theories—the divine science which he finds in
the dream of Ezekiel or the visions of the Apocalypse
would be labor thrown away, unless to illustrate the
weakness of human genius, or the singular absurdities
which beset the progress of knowledge, even in its most
favorable stages. The supposition that all higher wis-
dom and speculation were derived originally from Mo-
ese and the first chapters of Genesis is rather a spec-
atory both of the truth of Scripture and the results of
philosophy to make out this traditional connection,
was widely prevalent in the 17th century. It was
warmly supported and elaborately argued by some of
the most acute and learned intellects. Both Cutworth
and More profoundly believed in this combination.
But this was only one of many instances of their lack
of critical and historical judgment. Historical criticism,
in the modern sense, was not even then dreamed of; and
it is needless to consider forgotten delusions which have
perished, rather with the common growth of reason than
by the force of any special genius or discovery" (ii, 351-
358). More's work as a whole is admirably written,
Opera Omnia (1679); Ward, Life of Henry More (Lond.
1710, 8vo); Burnet, Hist. of his own Times; Tulloch,
Rational Theol. and Christian Philos. in England in the
17th Century (Lond. 1872, 2 vols. 8vo), ii, 503-409; Mul-
ingur, Cambridge Characters in the 17th Century
(Lond. 1667, 8vo), ch. iv; Temperman, Hist. Phil., p. 902,
321; Morell, Hist. Mod. Philos, p. 208, 211 sq.; Stought-
to Lit. (see Index in vol. ii, Harper's edition); Enfield,
Hist. Phil. bk. viii, ch. iii, sec. 3; Theodore Parker, in
Christian Examiner, vol. xxvi, art. i, 48 sq.; Ret-
rospective Rev., vol. v (1827).

More, Sir Thomas, the noted chancellor of King
Henry VIII of England, celebrated for the part he
played in the political and ecclesiastical history of his
country and for the philosophical views he espoused,
was the son of Sir John More, one of the justices of the
court of Common Pleas. The year of his birth has not
been fixed with precision; some say 1480 (some say 1479,
others again 1484), and was educated at St. Anthony's School in Threadneedle Street
about until his fifteenth year, when he was placed,
according to the custom of the times, in the house of
cardinal Morton, archbishop of Canterbury, where he
became known to Colet, dean of St. Paul's, who used to
say "there was but one wit in England, and that was young
Thomas More." In 1497 More went to Oxford. He had rooms in St. Mary's Hall, but carried on his studies at Canterbury College (afterwards Christ Church). Here he became intimately acquainted with Erasmus, who resided there during the greater part of 1497 and 1498, and formed a friendship which continued during life. It was also at Oxford that More composed the greater number of his English poems, which, though deficient in his native idiom, were commended by both Johnson and others as models of English literature. After More left Oxford he prosecuted the study of the law, and soon acquired great celebrity for his legal knowledge. He was appointed reader at Furnival's Inn, where he delivered lectures on law for three years; and about the same time he also wrote The Book of Good Women. He then went over the Old Jewry, on the west of St. Augustine, De Cividate Dei. It must be remembered that religion, morals, and law were then taught together without distinction; yet More, in his lectures, did not so much discuss the points of divinity as the precepts of moral philosophy and history. It is, however, well known that More also did delight to touch on questions of theology, for he was always fond of it, and for some time thought of taking orders. "He manifested," says Mackintosh, "a predilection for monastic life, and is said to have practiced some of those austerities and self-inflections which prevail among the ghoosem and ascetics of the monastic life, in Yeolombe, and was resolved indeed at one time to turn monk, and actually became a lay-brother of the Carthusian convent (the Charter-House) in London, where he is said to have passed several years. But he finally relinquished the ecclesiastical life, influenced perhaps by the general corruption of the priory orders, or, as Erasmus has it, he preferred to be a chaste husband rather than an impure priest. More was called to the bar, though at what time is uncertain. He appears to have acquired an extensive practice. He came to be generally regarded as one of the most eloquent speakers of his day; indeed, he was called in the year of the great tower of the latter part of the reign of Henry VII that it is said that there was no case of consequence before any court of law in which he was not engaged as counsel. About 1502 he first entered upon public office. He was then made an under-sheriff of London, an office at that time of great legal responsibility. Only two years later he was elected to Parliament, in which he opposed a subsidy which had been demanded by Henry VII for the marriage of his eldest daughter. In consequence of this opposition More incurred the displeasure of Henry VII, a prince who never forgave an injury; and had not the king died sooner, More would have been ordered to leave the country. Notwithstanding all opposition at court, More flourished, and gained constantly in reputation and friends. His graceful and varied learning was, as it was with sprightly, inexhaustible wit, so that Erasmus could write of him that "with More you might imagine yourself in the Academy of Plato," no doubt contributed in a large measure to his rapid advancement. "His professional practice became so considerable," says Mackintosh, "that about the accession of Henry VIII (1509) it produced £400 a year, probably equivalent to an annual income of £3000 in the present day." With the accession of Henry VIII to the English throne More's most auspicious days began. He became a favorite of his royal master, always so quick to detect in his surroundings whatever and whoever was likely to prove serviceable to him. King "Harry" remarked More's talents, and not only gladly consulted him in every state, but also sought him as the companion of his amusements and comforts. Erasmus, on the score of Emanus, the circle there collected must have been one of the most brilliant and engaging that the world has ever seen, and it was adorned by virtues which to other associations, high in intellect, have often been wanting. More was appointed to several important civil offices, and even employed as envoy on foreign missions. Thus, in 1514, he was sent to Flanders, to secure favors from the prince afterwards known as Charles V. He was also employed by his king on various public missions to France, and so interested did Henry VIII become in More that he ordered cardinal Wolsey, then his chancellor, to engage More in the service of the court. Accordingly More was made treasurer of the exchequer in 1520, and not only accepted the position, but so admirably performed his public functions, but also grew in popularity with the courtiers and the king, that it is said on account of his sweet temper and great conversational power. The king frequently met More, and enjoyed many hours with him, not only socially, but intellectually. Indeed, in 1521, when King Harry was working up his reply to the German Reformer, More assisted his monarch with his eloquent and not uncharacteristic Protestant effort into a proper method. It was published in 1521, under the title of Assertio septem sacramentorum adversus M. Lutherum, etc., and in 1520 More himself published Responsio ad comitit M. Lutheri comenta in Henricum regem Angliae. "In this Answer to Luther," says Attorney, "More has acquitted himself so as to throw out the greatest heap of nasty language that perhaps ever was put together; and that the book throughout is nothing but downright ribaldry, without a grain of reason to support it, and gave to the author no other reputation but that of having the best knack of making the devil dance in Latin, etc. The like censure do his English tracts against Tindal, Barnes, etc., deserve." Epistola Correspondence, ii, 452. And though this criticism is rather rash, it was yet in a large measure deserved (comp., however, More's Apology, in which he denies these charges of overseas against himself). In 1529 More was chosen speaker of the House of Commons, and now entered upon a career in which for a time he alienated both his royal master and the chancellor. The cardinal had taken the liberty of asking a greater subsidy for the king than he was entitled to, and when he declined to be generally lavish in his expenditures for the crown, as well as very unmindful of the ancient liberties and privileges of the house. More valiantly defended the people's cause, and hesitated not to speak out, though it endangered his popularity with the king. Indeed, More had never received himself as to the extent of his favor with the king, though his friend Erasmus had dared to assert that "the king could scarcely ever suffer the philosopher to quit him," and though Henry visited him uninvited at Chelsea, and walked with him by the hour in his garden, "holding his arm about his neck." More had a true insight into Henry's character, and clearly revealed this in an answer to a suggestion when comparing his son-in-law, Roper, on the king's favor: "If my head would win him a castle in France, when there was war between us, it should not fail to go." More's faithfulness, was, however, more lasting in More's case than it was wont to be, for he clung to him notwithstanding this, and only afterwards, after having been made more extraordinary as he was a layman, and it was wont to be the custom to invest an ecclesiastic with the office of lord chancellor. But it was afterwards revealed why this apparent warmth and fervor. Henry had simply advanced More to the chancellorship with the express design ad instigation of Erasmus, and marriage with Anne Boleyn, and no sooner had he been elevated to the high chancellorship than the king pressed him strongly for his opinion on the subject. But More was sincerely attached to the Roman Catholic Church; he looked with a certain degree of horror upon a project which was denounced by the pontifical head of
English Chancellor's Costume in Sir Thomas More's time.

the Church, and therefore begged Henry to excuse him from giving an opinion. This was granted for a time; but as it was evident that Henry had determined to effect the divorce, and would soon require the active cooperation of his chancellor, More, who determined not to be a party to the transaction, finally asked and obtained permission to retire from the office, May 16, 1529. From this time Henry, who never seems to have recollected any former friendship when his purposes were in the least degree thwarted, appears to have resolved upon the destruction of his old favorite. Anne Boleyn's coronation being fixed for May 8, 1533, all fair means were used to win him over; and when these proved ineffectual, recourse was had to threats and terrors. More was included in the bill of attainder which was passed against Elizabeth Barton, the celebrated nun of Kent, and her accomplices for treasonable practices, on the ground that he had encouraged Elizabeth; but his innocence in the case was made so clear that his name had to be withdrawn from the bill of accusation. He was then accused of other crimes, but with the same effect. Yet the court party soon found an opportunity of gratifying their vindictive master. By a law passed in the session of 1533-34 it was made high-treason, by writing, print, deed, or act, to do anything to the prejudice, &c., of the king's lawful marriage with queen Anne; and it was also provided that all persons should take an oath to maintain the whole contents of the statute. At the end of the session commissioners were appointed to administer the oath, and on April 15, 1534, More was summoned before them to take it. This More declined doing, but at the same time offered to swear that he would maintain the order of succession to the throne as established by Parliament. In consequence of his refusing to take this oath, More was committed to the Tower; and in the same year two statutes were passed to attain More and Fisher [see FISHER, JOHN] of misprision of treason, with the punishment of imprisonment and loss of goods. More remained in prison for thirteen months, during which time several efforts were made to induce him to take the oath, and also to subscribe to the king's ecclesiastical supremacy. His reputation and credit being very great in the kingdom, and much being apprehended from his conduct at that critical juncture, all arguments that could be devised were alleged to him by archbishop Cranmer and others to persuade him to a compliance, and many fair promises were made from the king to induce him thereto; but, as nothing could prevail, he was finally brought to trial for high-treason. He appears to have been indicted under the statute elucidated above, which made it treason to do any thing to the prejudice of Henry's lawful marriage with queen Anne, and also for refusing to admit the king's ecclesiastical supremacy; and although his evidence against him completely failed, he was found guilty and condemned to death. He was beheaded July 6, 1535, and met his fate with intrepidity and even cheerfulness. In the words of Addison: "The innocent mirth which had been so conspicuous in his life did not forsake him to the last. When he laid his head on the block, he desired the executioner to wait until he had removed his beard, 'for that had never offended his highness.' He did not look upon the severing of his head from his body as a circumstance which ought to produce any change in the disposition of his mind; and as he died in a fit of laughter, and ended his immortal days 'with any unusual degree of sorrow and concern improper' (Spectator, No. 349). His body was first interred in the Tower, but was afterwards begged and obtained by his daughter, Margaret Roper, and deposited in the chancel of the church at Chelsea, where a monument, with an inscription written by himself, had been soon the body before erected, and is still to be seen. His head was placed on London Bridge, but was taken down and preserved also by his daughter in a vault belonging to the Roper family, under a chapel adjoining St. Dunstan's church in Canterbury. The story of Margaret's tenderness and devotion to her father should live as long as the English language endures.

More was the author of many and various works, which were mostly in defence of Romanism, and directed against the revolutionary tendencies of the Church of his day. They have no value now as literary productions. There is, however, one work of his which deserves special notice. It is entitled De optimo rei publicae statu deque nova insula Utopia (Lovamni, 1516, 4to), the first communist writing by an English author. It criticises the English government and European politics, and is an account of an imaginary commonwealth on the island of Utopia, feigned to have been discovered and seen, by a certain gentleman named Rabelais, and from whom More learns the tale. Society is represented there as an ideal system, in which opinions are expressed with great boldness and originality, and especially favorable to freedom of inquiry even in religion. In it all its members would labor for the public good, all being equally obliged to contrive, and the only difference being in the nature of the labor; all its members would thus be on a footing of absolute equality, all property be in common, all forms of religion perfectly free, etc. "Many questions of the highest importance to the citizens," says Lieber, "are discussed in a spirit far in advance of anything we have in the United States. He requires every man to perform a certain amount of work, from his conscience, which was a thing absolutely unknown then, and for centuries afterwards" (Political Ethics, pt. i, p. 382). Of the work as a whole, lord Campbell says that "since the time of Plato there had been no composition given to the world which, for imagination, for philosophical discrimination of seen and unseen, and for felicity of expression, could be compared to the Utopia" (Lives of the Lord Chancellors; Life of Sir Thomas More). Hallam pronounces it "the only work of genius that England can boast in this age" (Lit. Hist. of Europe [4th ed. 1854], p. 276). Yet, though Sir Thomas advocated such lofty principles in his Utopia, he must be admitted that he was not himself altogether free from the religious bias of the times, being not only a most strenuous advocate of the power of the pope, but also a vehement opponent and persecutor of heretics. It is true Erasmus cites as proof of More's clemency "that he did confess that no man was a heretic who held against the liturgy for these pestilent dogmas;" but Froude contradicts this statement, and implicates Sir Thomas in the persecutions for conscience' sake. There is, however, a solemn declaration by the chancellor himself in his Apology (published in 1588), in which he expressly denies that he was guilty of any cruel treatment of the heretics. It was never contradicted in his own time, and there-
MOREA

fore should be well considered before Froude's statement is accepted. If now, from his works, we turn to the personal character of Thomas More, we find that he is generally acknowledged to have been, "for justice, contempt of money, humility, and a true generosity of mind, an example to the age in which he lived." His Christian temper, too, we may add, was such as made him an honor to the Christian cause in general. It is true he declared on the scaffold that he died in and for the faith of the Church of Rome, but any Church might have wished him theirs; and therefore that Church has placed him, not without reason, among the brightest of her martyrs. "More," says bishop Burnet, "was the glory of his age; and his advancement was the king's honour and happiness to whom he was his own human philosopher. He thought the cause of the king's divorce was just, and as long as it was prosecuted at the court of Rome, so long he favored it; but when he saw that a breach with that court was likely to follow, he left the post he was in with a superior greatness of mind. It was a fall great enough to retire from that into a private state of life, but the carrying matters so far against him as the king did was one of the justest reproaches of that reign. More's superstition seems indeed contemptible, but the constancy of his mind was truly wonderful" (Hist. Reformation, ii. 109). A British writer of the first rank, and who thus summarizes the "Toleration and liveliness of his sayings, his sweet temper and affectionate disposition, his blameless life, his learning and probity, combine to make a union of perfect simplicity with moral and intellectual greatness which will forever endear his memory to his countrymen of every sect and party." The English works of Sir Thomas More were collected and published at London in 1557, and his Latin works at Louvain in 1556. His letters to Erasmus areprinted in the collection of Eras- mus's letters published at London in 1642. His Utopia, which has been translated into many European languages, and has had a world-wide circulation, was given an English dress by Byromyn (London, 1551), by bishop Burnet, and more recently by Arthur Cayley (London, 1806). The Life of Sir Thomas More has been written by his son-in-law, Roper, who married his favorite daughter Margaret (London, 1520); by his great-grandson, T. More (1625); by Hoddesden (London, 1650); by James Merewether (1650); and by Sir James Mackintosh, in Lives of Eminent British Statesmen, published in Dr. Lardner's Cabinet Cyclopaedia, and in Miscell. Works (London, 1854, 18mo), i. 898 sq. See also lord Campbell, Lives of the Lord Chancellors: Froude, Hist. of Eng. vol. ii. ch. ix, reviewed in North American Review, 190, 191; Burnet, History of the Reformation, 197; Foreword, Eccles. Bk., 19 sq.; Soames, Reformed Ch. of Eng. vol. i and ii; Macaulay, Crit. and Hist. (1822), v. 293; North American Rev. v. 191; lxvi. 272; National Qu. Rev. June, 1863, art. iii.

MORDEA. See GRECIA, KINGDOM OF.

MOREA. Gabriel François, a French prelate, was born at Paris Sept. 24, 1721. Descended from a lawyer's family, he became council-scribe in the Parliament of Paris, and was in 1737 provided with a sinecure canonship in the metropolitan church, but rapidly rose to distinction, and in 1759 was made bishop of Venetia. In 1758 he was transferred to the see of Macon. After the concordat of 1801 he obtained the bishopric of Grenoble, and was made cardinal at the council of Con- sul (Napoleon Bonaparte) esteemed him highly, and demanded from the pope the cardinal's hat for him. His literary remaines, however, are scanty, consisting mainly of a few funeral sermons on distinguished individuals, viz. Oratio funebrae de Ferdinando VI et Marie de Por- tugal, roi et reine d'Espagne (1780), and Oratio funebrae de M. le Duc de Bourgogne (1761). See Hoefer, Neum. Biog. Générale, xxxvi, 479.

MOREAU, Jean, a French theologian, was born at Leval near the opening of the 16th century. He was educated in the University of Paris, and about 1540 was appointed professor of theology at the University of Paris. He next became canon at the cathedral of Meaux. He died about 1584. His work, Nomenclatura seu Legenda aurae pontificum Cenomanensis, ab anno Verbi incarnati 902 usque ad annum 1572, is still preserved.

MOREAU, Macê, a French martyr to Protestant Christianity, was born in the first half of the 16th century, and flourished at Troyes, in Champagne. He was reared in the Roman Catholic faith, but about 1547 accepted the Reformed faith, and went to Geneva to study theology. In 1550 he returned to France, going about the country distributing tracts that might turn men's attention from this world's affairs to spiritual things. While at Troyes he was entrapped by Romanists, and after a short imprisonment brought to trial before the Inquisition, and condemned to death at the stake unless he should recant. This he refused to do; and he continued steadfast even at the stake, "until he was smothered by the flames, and his voice on earth forever hushed." See Hurst, Martyrs to the True Cause (N. Y., 1872, 18mo), p. 111.

Môreh (Heb. מְרֶה, an archer, as in 1 Sam. xxxi, 3, etc., or teaching, as in Is. ix, 14), an old title that appears in the designation of two localities of central Palestine.

2. Apparently a Canaanite (perhaps a chief, like Maman), B.C. 800, owning or inhabiting the region south of Shechem, from whom the grove (הֵרֶך, oak [also in the plur.], Auth. Vers. "plain") of Moreh derived its name as early as the time of Abraham, who made this his first tarrying-place in the land (Gen. xii, 6, where the Sept. has יִרְכָּה יִרְכָּה יִרְכָּה יִרְכָּה יִרְכָּה יִרְכָּה יִרְכָּה יִרְכָּה יִרְכָּה יִרְכָּה יִרְכָּה יִרְכָּה יִרְכָּה יִרְכָּה יִרְכָּה יִרְכָּה יִרְכָּה יִרְכָּה יִרְכָּה יִרְכָּה יִרְכָּה יִרְכָּה יִרְכָּה יִרְכָּה יִרְכָּה יִרְכָּה יִרְכָּה יִרְכָּה יִרְכָּה יִרְכָּה יִרְכָּה יִרְכָּה יִרְכָּה יִרְכָּה יִרְכָּh, Vulg. concilia illustris), a designation that continued till the exode (Deut. xi, 20, Sept. יִרְכָּה יִרְכָּה יִרְכָּה יִרְכָּה יִרְכָּה יִרְכָּh, Vulg. rualis tendens et latens prope)—"the first of that long succession of sacred and venerable trees which dignified the chief places of Palestine, and formed not the least interesting link in the chain which so indissolubly united the land to the history of the nation. See OAK. Here Jehovah 'appeared to' Abraham, who here built the first of the 250 temple altars that may be found in the site of Abraham built altars, Isaac dug wells, Jacob erected stones) which marked the various spots of his residence in the Promised Land, and dedicated it to Jehovah, who appeared (מְרֶה, again, as if a play upon the name of the place) unto him" (Gen. xii, 7). It was at the 'place of Shechem' (ver. 6), close to (מְרֶה) the mountains of Ebai and Gerizim (Deut. xi, 30), where the Samar. Cod. adds 'over against Shechem.' Erasmi, l. 26 perhaps contains a play on the name Moreh—'that foolish people (הֵרֶךָה יִרְכָּה יִרְכָּה יִרְכָּה יִרְכָּה יִרְכָּה יִרְכָּה יִרְכָּה יִרְכָּה יִרְכָּh) who dwell in Si- chem.' If the pun existed in the Hebrew text, it may have been between Shechem and Sichor (drunken). A trace of this ancient name, curiously reappearing after many centuries, is probably to be found in Morthia, which seems to be a corruption of one of the names of Neapolis, i.e. Shechem, and by Pliny and Josephus as Mamortha or Mubortha (Ireland, Diss., III, § 8). The latter states (War, iv, 8, 1) that 'it was the name by which the place was called by the country people' (ἐπισκόποι), who thus kept alive the ancient appellation, as just as the peasants of Hebron did that of Kirjath-sepher to the date of Sir John Mandeville's visit." From the notices given, the grove of Moreh appears to have been a forest occupying the ridge afterwards known as the mountains of Ephraim. (The treatise of Chr. J. Grabener, De Allo Morod, Lips., 1737, vul. 1, is valueles.)

2. An eminence (hill of Moreh, מְרֶה יִרְכָּה יִרְכָּה יִרְכָּה יִרְכָּה יִרְכָּה יִרְכָּה יִרְכָּh, i. c.
teacher's hill; Sept. βουδόν τοῦ Ἀρμοῦ τ. Ῥ.Παθενο- 
Στεφανοῦ, Vulg. collis excelsum) in the valley of Jezreel, 
on the north side of the well of Harod, near which the 
Ancient Hebrews built a city called Beth-shan (Judg. vii, 1); probably identical with that known as Little Hermon, the modern Jebel ed-Dubay (see Ber- 
theau, Comment, ad loc.), or, rather, one of the lower 
southern spurs of this mountain (where ruins are still 
existent), since it is itself too lofty (1809 feet, Van de 
Velde loc. cit.). It was with the military genius of Gibeon 
(Judg. vii, 1) that the ancient Hebrews were connected. 
It is a bare gray ridge parallel to Mount Gilboa on the 
north, and between them lay the battle-field. No doubt 
—although the fact is not mentioned—the enemy kept 
near the foot of Mount Moreh, for the sake of some 
spring or springs which issued from its base, as the Ain- 
Cherith of Jer. iii, 18. It was near here, where the 
men of Judah urged him to disregard his creed and 
abjure his creed, and Feb. 16, 1559, was declared a her-
etic, expelled from the Church, and surrendered to the 
secular power. Four days later he was found dead 
in the Conciergerie—rumor reported poisoned. Like 
the condemned dying in prison, his body was buried 
the day following; but by order of the procurer-
general it was disinterred, brought back to the Con-
ciergerie, carried in a rubbish-cart to the area before 
the church of Notre Dame, and publicly burned, Feb. 
27, 1559.

Morel, Robert, a French Benedictine monk, was 
born in 1565 at La Chaise Dieu, in Auvergne. He took 
orders holy at the abbey of Saint Faron de Meaux in 
1671. After the death of Saint Germain, with whom he 
intended to finish his studies, and in 1680 became its librarian. He 
was afterwards appointed superior (prior) of a convent 
at Meulan, and at Saint Crepin de Soissons, and secretary 
to the visiting officer of France. Deafness, with which 
he became afflicted, obliged him to resign these offices, 
and he retired in 1699 to Saint Germain, near Paris, where 
he divided the rest of his life between pious religious 
exercises and the editing of several ascetic works. He 
died Aug. 19, 1731, in the odor of sanctity. He was a 
man of a clear, well-balanced, fertile mind; his words 
breathed charity and righteousness; but great modesty, 
joined to simplicity, served to conceal his talents. His 
publications are: Études de cœur, ou entretiens spiri-
tuels et affectifs d'une âme avec Dieu sur chaque verset 
des Psautiers et des Cantiques de l'Église (Paris, 1716)—
Méditations sur la règle de Saint-Édouard (Paris, 1717)—
Entretiens spirituels pour servir de préparation à la 
mort (Paris, 1721)—Imitation de Jésus-Christ, a trans-
lation, with additional pieces (Paris, 1729)—Méd- 
ditations Chrétiennes sur les Évangiles (Paris, 1726)— 
Du bonheur d'un simple Religieux et d'une simple 
Religion, qui attachent leur foi et leurs devoirs (Paris, 
1729)—De l'espérance Chrétienne (Paris, 1728)—Étui 
du cœur sur le Cantique des Cantiques (Paris, 
1730).

Morell, Samuel, an Irish Presbyterian minister, 
flourished in the second half of the 18th century. He 
was born about 1744, and was educated at Dublin. He 
was a young man of rare promise, and was very much 
liked as a minister. He began preaching at the age 
of twenty, and in 1768 was called to the chair at 
Tuam, in the Synod of Ulster, but during the civil disturbances 
of 1772 he was persecuted for the part he took in behalf 
of law and order, and in a riot which occurred on the 6th of March of that year he was shot down in the 
streets, and died from the effects of his injuries. He 
left behind his wife Ann, and two children, Sarah 
Reid and Kilian, Hist. Presb. Ch. in Ireland, iii, 370.

Morell, Thomas, D.D., an eminent English critic 
and lexicographer, was born at Eton in 1708. He 
studied first at Eton, then at Cambridge, where he became 
a fellow of King's College. He was noted, however, 
not as a theologian, but as a classical scholar. He pub-
lished valuable editions of Ainsworth's Latin Dictionary 
and Hedericus's Greek Lexicon, and was the author of 
Morelet, André, a celebrated French abbot, noted for his literary labors, was born at Lyons in 1727, and educated in the Sorbonne, at Paris. He became a friend of Voltaire, Rousseau, Diderot, and D'Alembert, to whose Encyclopédie he contributed. In a Law of 1768, and wrote several treatises on political economy, and many others, among which is "Mélanges de la Littérature et de la Philosophie du dix-huitième siècle" (Paris, 1781, 8 vols. 8vo). In 1785 he was admitted to the French Academy, and concealed its archives at the risk of his life during the reign of terror. He died in 1819. See Lemoynet, Éloge de Morelet, prefixed to Morelet's Mémoires (1821, 2 vols.); Nouv. Biogr. Générale, s. v.; "Morelet and his Contemporaries," in the North Amer. Rev. Oct. 1832, by A. H. Everett.

Morell, Cosimo, an Italian architect of considerable note among those of the last century, deserves a place in the history of his life-his labors were largely devoted to ecclesiastical architecture. He was born at Imola in 1732, and was the son of Domenico Morell (also an architect), and studied under Domenico Trifogli, who executed several works of merit at Imola. It was Cosimo's good fortune to obtain powerful patronage at the very outset of his professional career—first, that of Giovani-Carlo Bandi, bishop of Imola, for whom he made designs for rebuilding the cathedral of that city, and through him that of his nephew Giovanni Antonio Bracci, who was elevated to the papal throne in 1775, with the name of Pius VI. The new pontiff, who entertained a personal regard for Morell, obtained for him the appointment of cathedral architect at Cesena (the pope's native town), and various other commissions; he died, after a severe paralytic attack, in February, 1812. The principal structures executed by him in the line in which we are interested are the cathedral of Imola, the metropolitan church at Perno, the duomo at Macerata, and the conventual church at Fossombrone, St. Petronio at Castel Bolognese, a church at Barbiano, that of the nuns of St. Chiara at Imola, and St. Maria in regola in the same city, and another church at Lugo; also some alterations in the metropolitan church at Ravenna. See Tipografia Tipografici Italiani, Nuovi Venticinquenali. Cyclopaedia, s. v.; Biogra. Riv. dell'Arte, st. v. 38.

Morell, Giacomo, Abbé, an Italian ecclesiastic, noted for his antiquarian labors, and one of the most distinguished librarians of modern times, was born at Venice, April 14, 1745. He was the son of poor parents, who were unable to give him a liberal education. It was against their will that he resolved to enter the Church, although in all other respects he always showed the greatest deference to their wishes. He afterwards supplied the deficiencies of his education by private study, and the knowledge which he thus acquired was more substantial and extensive than that of any of his Italian contemporaries, though it was not till late in life that he became acquainted with the Greek and French languages. His love of independence induced him to refuse several very advantageous offers that were made to him both by the Church and by wealthy collectors of books at Venice, and he continued to live as a simple abbé. He formed, however, an intimate friendship with Vincenzo Farnetti, who, from his collection of MSS., he published a catalogue, under the title of Bibliotheca Manuscripta deli bili T. G. Farnetti (Venice, 1771-80, 2 vols. 12mo). While this work was in course of publication, he also wrote Dissertazione Storiche intorno alla Pubblica Biblioteca di d. Marco (Venice, 1774), in which he discussed and solved a great many questions connected with the history of literature. He then prepared a similar work on the history of the library of the academy at Padua, whither he had accompanied his patron Farnetti. Among his best sermons were also published; among these, one on the death of queen Caroline (1789, 8vo). He died in 1784.

Morelet, Ando[.], a celebrated French abbot, noted for his literary labors, was born at Lyons in 1727, and educated in the Sorbonne, at Paris. He became a friend of Voltaire, Rousseau, Diderot, and D'Alembert, to whose Encyclopédie he contributed. In 1767, and wrote several treatises on political economy, and many others, among which is "Mélanges de la Littérature et de la Philosophie du dix-huitième siècle" (Paris, 1781, 8 vols. 8vo). In 1785 he was admitted to the French Academy, and concealed its archives at the risk of his life during the reign of terror. He died in 1819. See Lemoynet, Éloge de Morelet, prefixed to Morelet's Mémoires (1821, 2 vols.); Nouv. Biogr. Générale, s. v.; "Morelet and his Contemporaries," in the North Amer. Rev. Oct. 1832, by A. H. Everett.

Morell, Cosimo, an Italian architect of considerable note among those of the last century, deserves a place in the history of his life-his labors were largely devoted to ecclesiastical architecture. He was born at Imola in 1732, and was the son of Domenico Morell (also an architect), and studied under Domenico Trifogli, who executed several works of merit at Imola. It was Cosimo's good fortune to obtain powerful patronage at the very outset of his professional career—first, that of Giovani-Carlo Bandi, bishop of Imola, for whom he made designs for rebuilding the cathedral of that city, and through him that of his nephew Giovanni Antonio Bracci, who was elevated to the papal throne in 1775, with the name of Pius VI. The new pontiff, who entertained a personal regard for Morell, obtained for him the appointment of cathedral architect at Cesena (the pope's native town), and various other commissions; he died, after a severe paralytic attack, in February, 1812. The principal structures executed by him in the line in which we are interested are the cathedral of Imola, the metropolitan church at Perno, the duomo at Macerata, and the conventual church at Fossombrone, St. Petronio at Castel Bolognese, a church at Barbiano, that of the nuns of St. Chiara at Imola, and St. Maria in regola in the same city, and another church at Lugo; also some alterations in the metropolitan church at Ravenna. See Tipografia Tipografici Italiani, Nuovi Venticinquenali. Cyclopaedia, s. v.; Biogra. Riv. dell'Arte, st. v. 38.

Morell, Giacomo, Abbé, an Italian ecclesiastic, noted for his antiquarian labors, and one of the most distinguished librarians of modern times, was born at Venice, April 14, 1745. He was the son of poor parents, who were unable to give him a liberal education. It was against their will that he resolved to enter the Church, although in all other respects he always showed the greatest deference to their wishes. He afterwards supplied the deficiencies of his education by private study, and the knowledge which he thus acquired was more substantial and extensive than that of any of his Italian contemporaries, though it was not till late in life that he became acquainted with the Greek and French languages. His love of independence induced him to refuse several very advantageous offers that were made to him both by the Church and by wealthy collectors of books at Venice, and he continued to live as a simple abbé. He formed, however, an intimate friendship with Vincenzo Farnetti, who, from his collection of MSS., he published a catalogue, under the title of Bibliotheca Manuscripta deli bili T. G. Farnetti (Venice, 1771-80, 2 vols. 12mo). While this work was in course of publication, he also wrote Dissertazione Storiche intorno alla Pubblica Biblioteca di d. Marco (Venice, 1774), in which he discussed and solved a great many
they are also represented on the banks of the Volga. There are a few at Moscow, St. Petersburg, Riga, Odessas, etc. They try to make proselytes in the army, but they are not very successful in their mission, and when they are discovered punish them most cruelly. The Russian government has endeavored to suppress them by means of very severe measures, but has thus far failed in doing so. See Mandsen, Hist. of Christian Churches and Sects, ii, 291, 323.

Mores (Lat. Moresi) (Lat. Moretus) (Mores) (Moretus) (Moreti) (Moretius) (Moretus) (Moretus). Jean Baptiste, a French Protestant divine, noted for his attempts to introduce into the Church a democratic organization such as it had in apostolic times, was born at Paris about 1510. But little is known of his early personal history. He suddenly became noted by his criticism of Calvin's 'Institutes' and his book of 'Christian institutions,' in an essay on ecclesiastical discipline, in which he tried to prove that the laity ought to have power to decide on all important questions of doctrine, morals, election of pastors, etc., privileges assigned by the Geneva Reformer to a Consistory, and fortified his theory by declarations of Scripture and the usages of the primitive Church. He submitted the same in manuscript to Calvin; but Calvin returned it with the excuse that he had not time to peruse so long a treatise on a subject already settled by the Word of God. Moretus then had it printed under the title, Traité de la discipline des églises évangéliques de Lyon, 1562. Without moderation, the force of argument, the clearness of exposition displayed in it found little countenance with the Calvinistic churches, and when in 1562 he presented it to the National Synod held at Orleans it was rejected. This condemnation appeared rather strange to a large number of the Reformers; among others, Soubise expressed himself strongly against this proceeding to Theodore de Beza, who, however, succeeded in quieting him. Moretus retired to Tours, where he found a violent adversary in the pastor of Saint-Germain, and thence to Geneva (Nov. 1562). Here he was long summoned before the Consistory, and asked to retract. This he refused to do, but proposed to submit the matter to the judgment of Farel, De Viret, and Calvin. The latter would not accept the part ofarbiter, saying he would not place himself above the synod, which had condemned his book. Even Moretus's request to give him permission to defend himself in writing was not granted; on the contrary, the Consistory treated him as an obstinate heretic, and (Aug. 31, 1563) excommunicated him; his book, referred to the council, was condemned to be burned (Sept. 17), and all bookstores were forbidden to expose it for sale, all citizens and inhabitants of Geneva warned not to purchase it for reading, and all who were connected to offices of state were ordered to abandon them, and those who knew where there were any, to denounce them within twenty-four hours at the risk of severe punishment in case of non-compliance. Moretus left Geneva, but the passion of the Calvinistic clergy ceased not to manifest itself against him. When in 1566 he acted as tutor to the son of Jeanne d'Albert, the Consistory did not rest satisfied until he was dismissed from that family. The National Synods of Paris (1565) and Nimes (1572) also condemned his Traité de la Discipline, as well as his Réponse, which he published against An Apology of the Calvinistic Doctrine, variously attributed to Jean de Viret. On the other hand, a goodly number of persons of rank, several churches of Languedoc, those of Sens, Meaux, and others, approved and shared his opinions concerning church organization, and demanded with him that the laity should have a vote in the election of elders, pastors, etc. Ramus, too, became interested, and associated upon that right the Christian church (i.e., the aggregate) in a general Council notified out of sight. He is supposed to have died towards the end of the 16th century in London, England. His plan of congregational lay representation in ecclesiastical government is now realized essentially in most Protestant churches, after three hundred years of controversy.

Besides the two principal works mentioned, two other publications are ascribed to him, viz. Verborum Latinorum cum Graecis et Scholiis Jacobi Breviarii Concise Collecta (1588); De ecclesiis decisi liberamanda (Lond. 1589); the latter was dedicated to Queen Elizabeth, and translated into German. See Bayle, Hist. Dict. s. v.; Haug, La France Protestante, s. v.; Nicéon, Mémoires, vol. xxxvi; Hoefer, Nouv. Biog. Générale, xxxvi, 546, 547.

Moreri, Louis, a French ecclesiastic noted for his literary labors, was born at Bargemont, in Provence, in 1648. He studied both the classics in the college at Aix, and finally theology at Lyons, and was then ordained for the priesthood. When only eighteen years of age he made himself noted as the author of an allegorical composition, and later by a collection of his poems. He applied himself diligently to the study of the Italian and Spanish languages, and translated Rodrigo's book on Christian Perfection, which he published under the title Pratique de la perfection Chrétienne et religieuse, traduite de l'Espagnol (Lyons, 1677, 3 vols. 8vo). Moreri preached for five years at Lyons with great success, and while there formed his plan for his Historical Dictionary. He so applied himself to this stupendous work, that of which the first edition appeared in 1682, that it appeared that his health was impaired and his strength exhausted. In 1680 appeared the first volume of the second edition. He died in the same year, July 10. But though Moreri had lived only so few years, he had yet accomplished the work of a common lifetime, and secured a place among posthumous careers. His Historical Dictionary contains whatever is curious and noteworthy in sacred and profane history; hence everybody was amazed to see so prodigious a work from so young a man.

He was at once, after the publication of the book in 1674, surrounded by the learned of his country, taken from his charge, and made welcome into the family of the bishop of Apt, in Provence, whom he attended the year following to Paris; he was there soon introduced to the prelates, who held their assembly in St. Germain en Laye, and the learned men in the metropolis. His friends also recommended him to M. de Pomponne, secretary of state, who invited him to his house in 1678; and he might have expected great advantages from the patronage of that minister had not his intense application cut short his life. Indeed, he may be said to have sacrificed both his fortune and his life for the public when he undertook so laborious an undertaking. The works above mentioned, with the Lives of the Saints into more elegant French, and added methodical tables for the use of preachers, with chronological tables; and in 1671 he published at Lyons the following book, Relations nouvelles du Levant, ou traité de la religion, du gouvernement, et des coutumes des Perses, des Arméniens, et des Grecs, connus par P. G. D. C. C. (that is, P. Gabriel du Chano, capuchin), et donnés au public par le sieur L. M. P. D. E. T. (that is, Louis Moreri, prêtre, Docteur en Théologie). The Historical Dictionary has passed through many editions, and has from one vol. fol. been extended constantly until in its 19th edition (Paris, 1758) it made 10 vols. 4to. The work is informed throughout, the whole having been written with great care. For various scholarly Du Pin have enlarged and enriched the work as its editors. See Gen. Biog. Dict. s. v.; Nicéon, Mémoires, s. v.; Hoefer, Nouv. Biog. Générale, s. v.; Pericand, Moréri à Lyon (Lyons, 1867, 8vo). (J. H. W.)

Mores, Edward Rowe, an English Roman Catholic noted for his antiquarian labors, was born of Protestant parents Jan. 13, 1780, at Tunstall, in Kent, when his father was tutor for a number of years. He was educated at Merchant Taylor's school and at Queen's College, Oxford. Even while yet a student at the university he was noted for his attainments, and assisted in antiquarian labors. Being intended for orders by his father, he took the degrees of B.A. May 12, 1756, and M.A. Jan. 16, 1758, before which time he had formed
considerable collections relative to the antiquities, etc., of Oxford, and particularly to those of his own college, whose archives he arranged, and made large extracts from, with a view to its history. He also gathered some manuscripts, for clearly distinguishes (them) (Mic. i. 19). See GATH; MICAH.

Moreto da Brescia, a distinguished Italian artist of Titian's school, and sometimes called Borsimiaco, was born, according to Lanzi, in 1514, and was the first to introduce Titian's style to his native district. His picture of St. Nicolo, painted for the Madonna de Miracoli, is in Titian’s best manner. He was mostly employed in his native province, distinguishing himself more by his delicacy than by his grandeur of handling. A fine specimen of this last qualification, however, may be seen in his terrific picture of Elia in the old cathedral. His picture of St. Lucia, in the church of St. Clement, is not so much studied as that of St. Catharine, and even this yields to his painting of the great altar, representing Our Lady in the air, with the titular and other saints seen below. An altar-piece, consisting of various saints, at St. Andrea, in Bergamo, another at St. Giorgio, in Verona, with the Fall of St. Paul, at Milan, all of the middle of the sixteenth century, was enriched with the Flagellation, in the Museo Toni at Brescia, is remarkably fine; also the Murder of the Innocents, in the church of St. Giovanni Evangelista at Brescia. The time of his death is unknown. See Lanzi, History of Painting (transl. by Roscoe), ii. 180; Mrs. Jameson and Eastlake's History of Art, ii. 313.

Morenas, a, a Baptist minister of some note, was born in Wales in 1637, emigrated to this country in 1711, and settled at Penmpek, Pa., where he preached until his death, Dec. 16, 1722. He was a good man, well beloved by his people, and did efficient service for the Christian cause among the Welsh who were settled in Pennsylvania, all of the month of December. He compiled a folio Concordance to the Welsh Bible, which was printed at Philadelphia, and also translated The Century Confession into Welsh, with original additions. See Benedict, Hist. Bapt., i. 583; Bapt. Quar. July, 1874, art. v.

Morgan, Asbury, a minister of the Methodist Episcopal Church, was born in Meecklenburg County, Va., Aug. 25, 1757; converted in 1775. He entered the South Carolina Conference in 1818; was stationed in Charleston in 1828, and died there, Sept. 25th of the same year, of the "strange fever." He was a good man, had been successful on former appointments, and promised usefulness to the Church. See Minutes of Conference, ii. 96.

Morgan, Cesar, D.D., an English divine of some note, was born about the second half of the sixteenth century, as canon of Ely. But little is known of his personal history. His works, however, show that he was a man of much erudition and a close student. He published several of his sermons (1780, 4to; 1781, 4to); also a work on Philology and Religion (1788, 8vo); and another, The Trinity of Plato and Philo-Judaus, etc. (1787, 8vo), universally esteemed as an able work from an orthodox standpoint. See Allibone's Dict. of Brit. and Amer. Authors, s. v.

Morgan, Erasmus B., a minister of the Methodist Episcopal Church, was born at Wilmington, Vt., in 1806. He was converted when about twenty-five years of age, and immediately began to preach. For two years he was employed by the presiding elder, and in 1833 joined the New Hampshire Conference. He was stationed successively at Athens, Putney, Claremont, Peterborough, Westmoreland, and Chesterfield, Keene, Landaff, East Haverhill, Lancaster, Canaan, and South Reading. In 1841 he was supernumerary, and in that year was employed in the supernumerary relation for seven years, after which, in 1843, he was stationed at Chesterfield, Mass., within the bounds of the New England Conference. Afterwards he was stationed at Palmer, Three Rivers, Brookfield, and Dudley. In 1857 he was supernumerary, after which time he never resumed an
MORGAN  606  MORGAN
effective relation. During 1871, while supplying the  
Church at North Blandford, his health failed, and he  
removed his residence to Williamsburg, Mass., where  
he died, June 10, 1872. Morgan was a man of strong,  
charitable spirit. He was a warm and unexampled  
civility in hostility to the powers of darkness, and in his  
avvocacy of every movement calculated to elevate hu-  
manity, and reneal more of the glory of Deity.” See  
Minutes of Conferences, 1872, p. 47.

Morgan, Gerard, a minister of the Methodist  
Episcopal Church, was born in Baltimore County, Md.,  
June 10, 1816, and was converted in 1829; entered the Bal-
timore Conference in 1846, and died March 17, 1846.  
He possessed a keen intellect, a penetrating judgment,  
and his life was equable, evangelical, and eminently  
useful. See Minutes of Conferences, iv, 10.

Morgan, Gilbert, D.D., a noted minister of the  
Southern Presbyterian Church, was born at Salem, N. Y.,  
May 25, 1791, received his college training at Union  
College, Schenectady, and pursued his theological  
studies at Princeton, N. J. At an early age he  
engaged in Central and Western New York in the  
foundations of churches and institutions of learning, one  
of his co-workers being Dr. Archibald G. Smith. In  
1836 Dr. Morgan became president of the Western Uni-
versity at Pittsburg, and at the invitation of the Legisla-
ture he entered upon a report, which finally  
was substantially introduced into the educational sys-

tem of Pennsylvania. He afterwards became connected  
with the Hampden Sidney College in Virginia, later  
removed to North Carolina, and finally made South Caro-

lia his permanent home, and there resided as a mem-

ber of the Southern Presbyterian Church. Failing  
health and advanced age finally induced his return  
North. He died in New York City May 27, 1875. Dr.  
Morgan was highly esteemed by his brethren, and  
greatly beloved among those to whom he ministered in  
spiritual things. Few men in the Church South could  
claim the superior scholarship to which he had attain-

ed. He was an ornament to his own denomination and to  
the Christian Church. (J. H. W.)

Morgan, Hector Davies, an English divine,  
noted for his sociological studies, was born in 1768,  
and was educated at Cambridge University. After taking  
bishop orders he at once rose to positions of prominence,  
and finally became canon of Trallong. In 1819 he had  
the honor to be selected Hampton lecturer, and his  
sermons preached that year were published (1819, 8vo).  
He also published several other theological treatises of  
minor value. But he is best known as the author of  
Doctrine and Laws of Marriage, Mating, and Divorce  
(Oxford, 1829, 2 vols. 8vo). This volume exhibits  
both a theological and practical view of the divine insti-
ution of marriage, the religious ratification of mar-
riage, the impediments which preclude and vitiate the  
contract of marriage, the reciprocal duties of husbands  
and wives, the sinful and criminal character of adultery,  
and the difficulties which embarrass the principle and  
practice of divorce, etc. See Lond. Gent. Mag. 1851, pt.  
i, p. 562; Allibone, Dict. of Brit. and Amer. Authors,  
vol. ii, s. v.

Morgan, Homer Bartlett, a missionary of the  
Presbyterian Church, was born at Watertown, N. Y.,  
May 31, 1827. He was educated at Hamilton College,  
N. Y., studied theology at Auburn Seminary, N. Y.,  
was licensed by Cayuga Presbytery, and ordained by Wat-
terton Presbytery in 1850. He entered upon the for-

gign missionary work under the American Board of  
Commissioners for Foreign Missions, and was by them,  
in 1851, sent to Salonica, in Greece, and afterwards  
traveled over a vast tract of land, usually described  
as the Christian part of Asia Minor, nearly fourteen years of missionary life, when it was de-

cided by the committee and the Central Turkish Mis-

tion to which he belonged that he should return with  
his family to this country. When they were about  
ready for their journey his youngest son sickened and  
died. This event, with his responsibility at his post,  
and official cares as treasurer of the mission, devoted  
upon him an amount of labor which brought on ty-
phoid fever, and after lingering on his sickbed for  
many months, as far as Smyrna he died, Aug. 25, 1865. Mr. Morgan, writes the Rev. Dr. Hamlin, then president of Robert College, Constantinople, “was a noble missionary, a man of right  
judgment, of executive power, and of self-denying de-

to- tion to his work. He has finished it early, but done it  

Morgan, Joseph, a minister of the (Dutch) Re-
formed Church, was born of Welsh parentage in 1674,  
and ordained in 1697 in Connecticut. After settle-
ments at East Chester, N. Y., from 1699 to 1704, and  
Greenwich, Conn., from 1704 to 1708, he became pastor  
at Freehold and Middletown, N. J., where he served both the Dutch and Presbyterian churches (1708-31).  
He gave to the former church about three fourths of his  
services, although he was a member of the Philadelphia  
Presbytery. A revival of religion followed his labors  
in 1721. His last settlement was at Hopewell and  
Maidenhead, N. J., where he preached from 1732 to 1737.  
Although his library was very small, he seems to have  
been a man of very considerable reading. He was a  
correspondent of Cotton Mather. One of his Latin  
letters to Mather, dated in 1721, is still preserved at  
Worcester, Mass. In addition to several printed ser-
mons, he published treatises on Baptism, Original Sin,  
Sin its own Punishment, Election, etc. His latter years  
were spent in that seclusion with which he was fitted  
by his profession. In 1738 he was charged with having  
practiced astrology, counte-

nanced promiscuous dancing, and transgressed in drink.”  
These charges were not proved. In 1736 he was sus-
pended from the ministry for intemperance, but was  
restored in 1738. He died in 1740. See Webster, Hist.  

Morgan, Morgan, a prominent lay-worker of the  
early days of the Protestant Episcopal Church, born at  
Orcelle, a native of Wales, but had come to this country while yet  
a youth, and settled in Pennsylvania. In 1726 he  
removed to the south of the Potomac, in Virginia, and  
there built in 1740 the first Episcopal church, now  
known as the Mill Creek Church, and situated in the  
parish of Winchester. He lived to an advanced age,  
pursuing to the last a course of ardent and active piety,  
which made him a light and a blessing to all within his  
influence. Under the direction also of the clergymen,  
whether present or absent, Morgan fulfilled the duties  
of lay-reader, which enabled him the more intimately  
know the people, and impart some of them to their own  
path of duty. In the exercise of these duties he was  
 succeeded by a son, who prosecuted them with the same  
affectionate, diligent, and humble spirit. See Episc.  
Record, vol. i, No. 5, quoted in Hawk's Eccles. Hist.  
p. 111-113.

Morgan, Nicholas J. B., D.D., a minister of the  
Methodist Episcopal Church of some note, was born  
in Bath County, Va., Nov. 28, 1811. He was the oldest  
son of the Rev. Gerald Morgan, also a preacher of the  
same body, who died in March, 1846, closing a forty-
years' ministerial service of honor and usefulness long  
to be remembered among those for whom he labored.  
Nicholas's early educational advantages were secured  
at the common school, and under private instruction at  
Harrisonburg, whither his parents removed when he  
was ten years old. He was converted in 1829, and  
shortly after believed himself called to preach. He  
taught school a while to prepare for the work before  
entering upon it, and in 1829 was admitted into the  
ministry. He was engaged in the field, and appointed to the Fincastle Circuit. After this he successively served in this  
Conference as follows: in 1830, Pendleton; 1831, Liberty;  
1832, Jefferson; 1833-34, Winchester Circuit; 1835-36,  
Warren; 1837, Loudon; 1838-39, East Baltimore  
Station; 1840-41, Harper's Ferry; 1842-45, Rocking-
Morgan, Thomas (2), a distinguished English deist, noted for his attempt to make moral excellence the only test of every system of religion, and for his rejection of a historic revelation of positive duties as inadmissible by the preachers. He seems to have practiced medicine among the Quakers at Bristol, but finally devoted himself entirely to literary labors, and died at London Jan. 14, 1748. (See Baumgarten, "History of Philosophy, 1, viii, 181.) Morgan published a number of works against the Holy Scriptures, the best known of which is The Moral Philosopher, in a Dialogue with Philotheus, a Christian Deist, and Theophaenes, a Christian Jew. (London 1737.) This work was supplemented by a second volume, Being a further Vindication of Moral Truth and Reason, in 1739, and by a third, Supremacy and Tyranny inconsistent with Theocracy, in 1740. This work elicited many answers, for a list of which see Lowndes, Brit. Lit. p. 1098; see also the references at the end of this article. Morgan acknowledges himself a firm believer in God as the almighty creator and ruler of the universe. He lays especial stress on God's continued presence, power, and agency. "God governs the Universe by the laws of his natural order. This power, presence, power, and incessant action upon both, and not by any such essential, inherent powers or properties in the things themselves as might set aside the continued presence, power, and agency of God as unnecessary, or as having nothing to do in the government of either the natural order (Moral Philosopher, 186). Like his predecessors, Hobbes (q. v.), Blunt (q. v.), and Toland (q. v.), Morgan refuses, however, to acknowledge any revelation of the divine will. He asserts the supremacy of reason, or, as bishop Van Mildert expresses it ("Goole Lectures", "Morgan allows the possibility and even the utility of revelation, but artfully destroys the effect of the admission by confounding revelation with man's natural reason.")

In his examination of Judaism, Morgan rejects its claims wholly on grounds similar to those explained by Chubb, as incompatible with the moral character of God. According to his view, there exists an irreconcilable conflict between the revealed idea of the God of the Christians, or, in other words, between the two religious systems—the Law and the Gospel. The O. T. and the N. T. he considered essentially antagonistic. The love and charity which are manifested in the Gospel of Christ he is unable to find in the O. T. He of course refers to Ovid or Homer, not to the O. T. (Moral Philosopher, i. 186.) Morgan does not spend much time in attacking the O. T., but rather that of a faithful and devoted man, endowed with more than ordinary capacity for work, and born to be a leader of his associates. "With strong intellectual endowments, there were blended in him those stanch moral qualities which made him the man he was. Mental power and moral character were united in him in perfect and on the Conference floor. As a preacher, he was a man of one work. To this he gave the study of life. See Minutes of Annual Conferences, 1873, p. 295; Dr. McAuley, in New York Methodist, May 18, 1875, p. 748.

Morgan, Thomas (1), a Scotch Presbyterian divine of the Unitarian cast, who flourished near and after the opening of this century as pastor of a congregation in London, is noted, in conjunction with some others of his persuasion, as the editor of a mutilated edition of Dr. Watts's psalms and hymns, which, from being Calvinistic, was adapted to the use of the congregation of Dr. Aikin in compiling the work entitled General Biography (1799-1814, 10 vols. 4to), and was besides editor of the New Annual Register after the demise of Dr. Kippis. See Dict. Lit. Auth. Gr. Britain and Ireland (London 1816, 8vo), s. v.
rality in its stead. Leland judges him thus (Deidetic Writers, p. 107): "By a prevarication and a disingenuousness which is not easily paralleled except among some of those that have appeared on the stage of human events and have done him the misfortune of making such a display as he hath covered [sic] as determined a malice against the honor and authority of the Christian revelation as any of those that have written before him." Morgan's writings all created quite a sensation, and called forth numerous refutations. Among his opponents were Hallet, Leland, Chapman, Cotton, and others, and he was provoked by Morgan to write his celebrated treatise, On the Divine Legality of Moses (1737-38). See Walch, Bibl. Theol. i, 773 sqq., 807-810; Mosheim, Ecc. Hist.; Leland, Deidetic Writers; Von Mildet, Boyle Lect.; Schlosser, Hist. of the 16th Cent. (Davison's transl.), i, 47; Lechler, Gesch. d. Englischen Desenauer, p. 389 sq.; Farrar, Crit. Hist. of Free Thought, p. 140 sq.

Morgan, William, a learned British prelate, was born at Gwiberin, in Carnarvonshire, Wales, in the second half of the 16th century, and was educated at St. John's College, Cambridge. We know but little of his progress in the Church, but we find that in 1555 he was elevated to the episcopate of Llandaff, and in 1581 was transferred to the see of St. Asaph. He died in 1604. Bishop Morgan is worthy of immortal honor as the author of the translation of the Scriptures into Welsh, published in 1588; also the translation of the Psalms in the same year. See Soames, Elizabethan Rel. Hist. p. 611.

Morgan, William N., a minister of the Methodist Episcopal Church, South, was born in Mecklenburg County, Va., June Ist, 1866. His early educational advantages were limited. In 1886, being impressed with a call to preach, he joined the Memphis Conference of the then Methodist Episcopal Church, and in 1844 went over with the Separateists into the Church South. He was actively engaged in the work for twenty years, preaching in Tennessee and Mississippi. For thirteen years he was the bishop of the Transylvania Conference, and finally died Oct. 18, 1869, in Sommerville, Tenn., where he had settled because of impaired health. He occupied an important position in the Conference. He was a good preacher, sound in doctrine, clear and practical in the exhibition of divine truth, and earnest and forcible in his appeals to the Church and to the world. Many gracious revivals were the result of his pastoral visitations of the people and the faithful preaching of the Word. See Minutes of Conf. of M. E. Ch., South, 1869, p. 344, 345.

Morganian marriage (Goth. morgenian, to curtail, limit), sometimes called left-handed marriage, a lower sort of matrimonial union, which, as a civil engagement, is completely binding, but fails to confer on the wife the title or fortune of her husband, and on the children the full status of legitimacy or right of succession. See Concurrence. The members of the German princely houses were for centuries in the practice of entering into marriages of this kind with their inferiors in rank. Out of this usage has gradually sprung a code of matrimonial law by which the union of princes with persons of lower rank in other than morganatic form involves serious consequences, especially towards the lady. In the 16th and 17th centuries a fashion began among German princes of taking a morganatic wife in addition to one who enjoyed the complete matrimonial status—landgrave Philip of Hesse setting the example, with a very qualified disapprobation on the part of the leading Reformers. In the present century Morganian marriages are on the decline among the German reigning houses. They are recognised not only among the princely families, but among the higher aristocracy of the empire; and in Prussia even the "Niedere Adel," or inferior gentry, may contract unions of this kind. There is, however, a strong public opinion against the practice, and as the people begin to enter into the control of state affairs, the practice is sure to be opposed by special legislation. No such alliance is now permitted to any one having another wife, and the State as well as the Church hold the parties as having entered into an illegal marriage. The case of left-handed or "hand-fastened" marriage was recognised in early times in the Highlands of Scotland and in Ireland: the hand-fastened bride could be put away, and a fresh union formed, with the full status of marriage. Unlike the case of German morganatic marriages, the issues of the marriage are accounted legitimate, even in the case of the children of the children of the marriage, and union that followed. The Royal Marriage Act, 12 Geo. III, c. 11, reduced to a position somewhat like that of morganatic unions every marriage in the royal family of Great Britain not previously approved by the sovereign under the Great Seal, provided the prince entering into it is under twenty-five, and every such marriage of a prince above twenty-five which is disapproved by Parliament. In the United States no such marriages are lawful. See Marriage.

Morghen, Raffaele Sanzio, Cavaliere, one of the most celebrated engravers of modern times, who devoted himself largely to sacred art, was born at Florence, Italy, June 19, 1758. His father, Filippo Morghen, was also an engraver, and instructed his son in the art. The boy at the age of twelve Raffaele could engrave a very tolerable plate. At twenty-five his father, believing his son's genius worthy a more cultivated master, sent him to the celebrated Volpato at Rome, whose daughter he afterwards married. In 1771 he engraved Raphael's allegorical figures of Poetry and Theology, from the Vatican. In 1792 the Neapolitan court, wishing him to reside in Naples, offered him a salary of 600 ducats; but he accepted in preference an invitation from the grand-duke of Tuscany to Florence, where he established himself in 1792, with a salary of 400 scudi and free apartments in the city, under the condition that he might found a public school for engraving, and the privilege of engraving what he desired fit, also retaining all his prints as his individual property. His first work in Florence was the Madonna della Seggiola. In 1795 he commenced the celebrated Madonna del Soccorso, after Andrea del Sarto, and Raphael's Transfiguration. The first picture is in Florence, but the Transfiguration he engraved from a drawing by Tofanelli; the latter was completed in 1812, and dedicated to Napoleon I, by whom Morghen was invited to Paris and honored with valuable presents. This print was originally sold at four guineas, or twenty scudi, but the price afterwards rose to some impressions to 200 and 300 francs, and £20 and £30. The engraving is a work of immense labor and great skill, and though not altogether satisfactory in the way of aerial perspective, being in parts hard and metallic, is highly valued as a work of art. Morghen's masterpiece, upon which he was engaged three years, is a copy of Leonardo da Vinci's Last Supper, the early impressions of which (1800) are among the most precious engravings of the work. He died at Florence April 8, 1833, having engraved, according to a list published by his pupil, Palmieri, 73 portraits, 47 Biblical and religious pieces, 44 historical and mythological pieces, 24 views of buildings, landscapes, and landscapes, and 246 great arts, Engl. Cyclop. s. v.; Spooner, Hist. of the Fine Arts, s. v.; Nagler, Künstler Lex. s. v.

Morgans, a Mohammedan sect, hold that faith without good works is sufficient to salvation. Gazali, a Mohammedan doctor, tells us that the Morgans expect that God will work everything in them, and affirm that sin does not hurt believers; works without faith signifying nothing. Shabi, another Mohammedan doctor, in his address to this sect, accuses his disciples to be afraid of the threatenings of God, and not to behave like those who defer doing anything that is good, and hope to be saved notwithstanding. See Broughton, Hist. of Religion, ii, 141; D'Herbelot, Biblio- theque Orientale, s. v.
MORGUES, MATTHIEU DE, Sieur de St. Germain, a noted French Roman Catholic pulpit orator of the 16th century, was born at Vellai, in Languedoc, in 1582, of no inconsiderable family. He turned Jesuit at first, and had several pupils at Avignon, in the Jesuits' college there, but afterwards got disgusted with the Jesuits and quitted the Society. He was in China under the secret instructions of Richelieu. Upon the imprisonment of Mary de Medicis he retired from court to his father's house, where Richelieu took measures to seize him. The commission bore "that they should take St. Germain dead or alive; that they should seize him without making an inventory of the papers they should find, and that they should send the said papers to bishop Beaucaire, while the prisoner should be conducted to Mande to be put into the bishop's hands. It is believed that Beaucaire, who had been a domestic of the cardinal, would have caused him to be quietly strangled, if secured. But fortunately he escaped and was appointed the design of his persecutors, and retired into the most uncultivated parts of France, where he lay concealed for six weeks under all the inconveniences his health could be exposed to. "What was the most insupportable circumstance," says he, "of this whole proceeding, was the uneasiness which the presence of the officer gave my father and mother, who were much advanced in years; for by this time I, the youngest of eight children, was beginning to have gray hairs." It is very probable that the cardinal, who had the weakness to be infinitely sensible of satire, was afraid of St. Germain's pen, and aware of the severities it would inflect; for we see that in all the negotiations for recalling the queen-mother, he made it a condition "that St. Germain, who by his defamatory libels had forgotten nothing to ruin his reputation, should be delivered up to the king."

Meanwhile the queen-mother, coming from Compiégne, and being desirous to publish an apology for herself, sent in quest of St. Germain, and ordered him to write an answer to a pamphlet entitled La Défense du Roi et des Ministres, whose author, it seems, had taken great freedom with that princess's honor. In 1631 he published an answer to the queen's satisfaction, but afterwards wrote several pieces against the creatures of Richelieu. This fact was sufficient to quirk the imagination of the cardinal; he left France, and he did not dare to return until after the death of the cardinal. Morgues died in 1670. He left in MS. a complete history of Louis XIII., by him entitled "the Just." See Gen. Biog. Dict. a. v.; Bayle, Hist. Dict. a. v.

Moria'h (Heb. Morag'h, מְרוֹאָה, 2 Chron. iii. 11; and מַרְאוֹא, Gen. xxii. 2, as to the etymology, Gesenius remarks [Thesaur. Heb. p. 819] that the sacred writers themselves derive it from מַרְאָה, to see, and understand it as for מַרְאָה, chosen or shown by Jehovah; but the form may be readily made as the part. fem. of מַרְאָה, to be bitter, i. e. obstrue, and thus signifying the rest,ing, i. q. castle, comp. Fuller, Masek. ii, 14; Sept. in Gen. 15:29, Vulg. vacivio; in Chron. Apost. v. t. Aposi Vulg. Moria'h, one of the hills of Jerusalem from which the Temple was built by Solomon, on the spot that had been occupied by the threshing-floor of Ornan the Jebusite (2 Chron. iii. 1). See Temple. The name seldom occurs (not even in 1 Kings vi. 1), being usually included in that of Zion, to the north-east of which it lay, and from which it was separated by the valley of Tema (Gen. 2:13).] See Robinson, Researches, i. 388, 416, 418. See Jerusalem. The land of Moriah, whatever Abraham went to offer up Isaac (Gen. xxii, 2), is generally supposed to denote the same place, and may at least be conceived as describing the surrounding district (comp. Josephus, Μοραίον πόλις, Ant. i, 18, 1). The Jews themselves believe that the altar of burnt-offerings in the Temple stood upon the very site of the altar on which the patriarch purposed to sacrifice his son (see Michaelis, Suppl. v, 1561; and Miniconi, op. cit. ii. 20, 1567; Beek, in the Theol. Stud. u. Krit. [1881], p. 590 sq.; comp. Hengstenberg, Pentateuch, ii, 195 sq.; Ewald, Israel, Gesch. i, 358; ii, 85). The force of the tradition is impaired by the mythical addition that here also Abel offered his first sacrifice, and Noah his thank-offering (Munster, Fagius, and Gronovius, ad loc.), without showing the disposition of certain disputed points. See Abraham. Before considering the geographical and other difficulties in the way of this identification, it is desirable to investigate the derivation of the word מְרוֹאָה. Various etymologies supplied by Jews all proceed on the supposition of the identity of the Moriah of Genesis with that on which the Temple was built. The oldest, that of Onkelos and Gerundius, supposes it to be derived from מַרְאָה, myrrh, as in Canticles iv. 6, "I will go to the mountains of myrrh." Fuller (in Miecz. Sacra, ii. 15) maintains that the מַרְאָה of Canticles was an abbreviation of מְרוֹאָה, and referred to the holy mount where the great king had just erected his Temple. Rabbi Solomon supposes it to be derived from מְרוֹאָה, instruction, because thence the voice of the Lord went forth into all Israel. Kalisch (Comment. on Gen. ad xxi. 2) approaches this interpretation by saying that it springs in all probability from מֵרוֹאָה, "Jehovah is my instructor," from מֵרוֹא, the root of the great derivative מְרוֹאָה. Jonathan derives it from מָרְאָה, fear or reverence, and imagines that the word was used anticipatory of the worship and fear of God there solemnized (Lightfoot, Opera, Descrip. Templi, i, 553). Fuller (Miecz. Sacra, ii. 15) maintains that the word represents an abbreviation of מְרוֹאָה, compiscitur Jehovah, because there eventually the Son of God would appear in human flesh. Knoebel insists that it is a compound of מָרְאָה (a dual form of מְרוֹאָה, to see) and מַרְאוֹא; and Hengstenberg (Disert, on Gen. of Pentateuch, ii. 159-163, Clark's transl.), Kurz (Old Covenant, i, 372), Gesenius (Thesaurus, p. 819), Friest (Lex.), all agree as to the presence in the word of the elements of the name of Jehovah. Vatke, Vater, Van Bohlen, the early opponents of the genuineness of the Pentateuch, even based a portion of their arguments upon the date of the book of Joshua. Van Bohlen (Pentateuch and Joshua, pt. ii, ch. ix. 1) labors to demolish the etymology, but without much success. The existence of a proper name Moriah would be a proof of the existence of the name and worship of Jehovah before some of the modern documentarians would find it at all satisfactory. Hengstenberg states that the word מְרוֹאָה is a compound of מָרְאָה, the Hophal participle of מָרְאָה, to see, and means that which is shown, or the appearance of Jehovah. Colenso objects to the sense of the interpretation, and maintains that there is no explanation of the disappearance of the characteristic radical N. Gesenius accounts for the form מְרוֹאָה by a combination of the Hophal participle of מָרְאָה and the ped-compagnia common in derivatives from verbs of the form of מָרְאָה. Thus מְרוֹאָה, combined with מַרְאוֹא, would suffer the following change, מְרוֹאָה = מַרְאוֹא, There is another proper name, derivable from the same root, which has lost its characteristic radical N.-viz. מָרְאָה, from מָרְאָה, beautiful to look upon (Ruth). But whatever may be the precise nature of the contraction, the obvious interpretation of the writer is given in ver. 8: מְרוֹאָה, which is the name given by Abraham to the place where Jehovah saw his agony and provided a
victim in place of his son. Here it was that the prov-
er was originated. "In the mountain Jehovah shall be
seen." Moriah was the name permanently attaching
itself to the place, just as יָשָׁב had been the abbrevi-
ation of Eve's exclamation, וַיְשָׁבֻּהָ. It was used
by the narrator 400 years afterwards to describe a
district, a land, a mountain which had always gone by
that name ever since the proverb had first been uttered,
and all the circumstances he was then proceeding to
describe. It would be presumptuous to assert to what
extent the knowledge and worship of Jehovah was dif-
fused, on the ground of the mere presence of the name
Jehovah in this proper name; still, there is nothing to
shake the conclusion. It is curious that the Sept. trans-
lates the יָשָׁב as if the verb יְשָׁב did not refer to
the Sept. reads בָּשׁ in my translation (see also Deut.
xi. 30). The translation of Aquila in Gen. xxii. 2, is רָשׁ in
the Sept. and רָשׁ in my translation; and Symmachus has רָשׁ
in his translation. The ideas of "high," "elevated," closely resembling the in ter-
ram visions of the Vulgate.

Dr. Davidson (in Introduction to the O. T. vol. i.) con-
juctures that Moreh was the original reading; but nei-
er Kennicott, De Rossi, nor Dr. Davidson himself (in
his Prized Text of the O. T.) give any diplomatic au-
thority for the reading. The translation of Aquila and
Symmachus may have originated with some reading
resembling that in the Samaritan text, יָשָׁב, and signifying "far seeing" or "conspicuous." But when
Josephus wrote (Ant. i. 13, 2), it is quite clear that the
reading in Gen. xxii. 2 and 2 Chron. iii. 1 must have been identical, as he speaks of the place of Abraham's sacrifice, וַיָּשָּׁב, "and he put the ax in his hand," as "the place of sacrifice pictured in the text of the Bible," and 2 Chron. iii. 1. He did not attempt to translate the proper name יָשָׁב, but writes וַיָּשָּׁב וַיְהוֹֽעֱַפָּה. It is true that there is no reference to the original manifestation of God on this
site to the patriarch, and express mention is made of
second and additional reasons for this hill being called
Moriah (see 1 Chron. xxvi. 16; xxvii. 1; 2 Sam. xxiv. 1;
2 Chron. iii. 1). This was in perfect harmony with the
law of God that forbade the offering of burnt sacrifices
in any place which the Lord had not consecrated by his
visible manifestation (Hengstenberg, Dis. ii. 32 sq.).
The geographical conditions supplied by the narrative
in Genesis are not inconsistent with the Samaritan tra-
tition (see Robinson, Biblical Researches, iii. 100) that
Geneva was the site of the sacrifice; but the sacred
mountains of Gerizim and Ebal, from their neighborhood
to Moreh, a spot well known to Abraham, were the
mountains in the land of Moriah (Colenso, pt. ii. ch. x).
They have led dean Stanley (Syr. and Pal. p. 250 sq.; Hist. of Jewish Church, i. 46, 49) to decide on Gerizim
as the scene of the event. His arguments are weighty,
but not conclusive. (1) The distance from Beer-sheba
to the plain of Sharon, from which Gerizim might be
seen "afar off," corresponds with the two-days' journey
of Abraham; while the third day, which would be oc-
cupied by the great event, would be sufficient for the
journey to the summit and the return. The same
thing, however, may be said with greater certainty
of Jerusalem itself. (2) Stanley objects that there is no
spot from which the "place" where the sacrifice was to
be offered could be seen from "afar off," that the hill
of Moriah is not visible at all until the traveller is close
upon it; at the southern edge of the valley of Hinnom,
from whence he looks down upon it, as on a lower emi-
nence. Now the narrative informs us that Abraham lift-
ed up his eyes and saw the place of which the Lord had
spoken to him. That "place" was the יָשָׁב יִשָּׁב, or, as Gesenius translates it, the land about Moriah, just
as יָשָׁב יִשָּׁב is the land about Ai. It is very possible
to see from the ridge Mar Elias the heights about Je-
rusalem, if not the hill of Moriah itself; and we are ex-
pressly told that Abraham did not see the place until
he was fairly within a walk of the spot, and could leave
the young men and the ass while he and Isaac proceed-
ed, personally laden with the material of the sacrifice.
"It may be urged by others that the fortress of Zion must at that
time have been occupied by the king of the Jebusites, some
former ruler of Adoni-
zedek, or by Melchizedek himself, and therefore Abra-
ham must have prepared to perform this awful sacrifice
under the walls of the city. To obviate the great ap-
pearance, it may be said that the fortress of Zion stood
sometimes outside of fenced cities—where a deep ravine
runs between the wall and the suburb—is often one of
the loneliest spots in the world. The name Moriah is
unquestionably given by the chronicler to the Temple
hill, but this passage is a solitary one. The more ordi-
nary name, even for the entire city of Jerusalem and
for the holy mountain, is Mount Zion, and various
psalms and prophecies speak of the dwelling-place of
Jehovah under this old and honored name. It cannot
be true that any writer of the time of Solomon com-
posed the narrative of Abraham's sacrifice to do honor
to the Jebusites, nor can it be suggested by Dr. Wette; for,
if that had been his intention, he would have called it
Zion, and not Moriah. Great stress has been laid by
bishop Colenso and by the writer in his Smith's Dictionary,
i. 428, on the absence of other reference besides that of
the chronicler to the name of Moriah as the site of the
Temple hill, and also on the impropriety of a name like
that, the name and career of Abraham so vitally with Je-
rusalem. In the same article, however, Jerusalem is
spoken of as the city of Molchizedek. For the shape of
Moriah, its relations with Bezeba and Acra, the bridge
that connected it with Zion across the valley of the Ty-
ropoon, see Jerusalem. Notwithstanding the various
and variously modified endeavors to disturb the old He-
brew tradition, it has not been proved necessary to deny
the identification of the two sites; nor to denounce the
old etymology; nor to cease perceiving the interesting
link of connection supplied by it between the sacrifice
of Isaac, the vision of God's judgment and mercy, the
erection of the Temple, and the offering up of God's
only-begotten Son. See Solomon.

Moriarty, Peter, an early and very useful minis-
ter of the Methodist Episcopal Church, was born in Bal-
timore Co., Md., April 27, 1758, and educated a paepist;
was converted through Methodist influence about 1776;
entered the itinerancy in Virginia in 1781, but subsequent
to 1787 his labors were mostly at the North, in the
south being still under the influence of his old schools
of ministry. He died at Hillsdale, N. Y., June 23, 1814.
Mr. Moriarty was one of the oldest and most widely known
ministers in the connection at the time of his death, a
man who had labored long and arduously in the work
of saving men. Although not eloquent, he was among
the most useful men and successful preachers of his
time, and an excellent presiding elder. Many souls
were converted through his labors, and he died honored
and beloved in all the churches. See Minutes of Annual
Conferences, i. 240; Stevens, Memorials of Method-
ism, vol. ii, ch. x. (G.L.T.)

Morce de Beaubois, Dom Pierre Hyacinthe, a French scholar, was born Oct. 25, 1658, at Quimperle, BassesVexin. He was of wealthy and noble family, and studied at the College of Rennes, and made his vows in 1718 at the abbey Saint Malaine, which belonged to the
Order of the Benedictines of Saint Maur, where he was
intrusted with several offices, and also with the instruc-
tion of novices. In 1731 he was called to Paris to elab-
orate the genealogy of the family Robertesque de Beaubois.

After the completion of this work, which pro-
cured for him a pension of 800 livres, he engaged, at
the solicitation of the authorities of Bretagne, on a new
MORID 611 MORIN

history of that province, but death surprised him at Paris, Oct. 14, 1750, before the entire publication of this work (afterwards revised and completed by Dom. Taylor). Morice edited Lobineau's Mémoire pour servir de preuves à l'Histoire ecclésiastique de Bretagne (Paris, 1742-45, 3 vols.), in which he furnished himself with abundant facts, antiquités et civile de Bretagne (Paris, 1750-56, 2 vols. fol.), which is considered superior to Lobineau's by the additions and explanations, as well as by its style and exactness of details, and very valuable to the French ecclesiastical student. A new edition of the two works in 20 vols. 8vo (Guin$amp, 1896-97) leaves much to wish for.

Morid is the Arabic name which the Mohammedans give to those who aspire to a life of uncommon spirituality and devotion, and for this purpose they are put under the direction of another, whom they call Morbid, that is "director." They have a famous book, entitled Abi el-Moridia, which treats of the qualifications those ought to have who put themselves under the direction of one of those spiritual guides. See Broughton, Hist. of Religion, ii, 142.

Morier, James, noted as the author of a series of novels descriptive of Eastern life and manners, and also for his accurate observations of the East as recorded in his books of travel, was born in England in 1780. When still very young he made an extensive tour through the East. He resided in this country during his Travels through Persia, Armenia, Asia Minor, to Constantiopolis (Lond. 1812). In 1810 he was appointed British envoy to the court of Persia, where he remained till 1816, and soon after his return he published A Second Journey through Persia, etc. (ibid. 1818). During his stay in the East Morier made great use of the opportunity of studying the character of the people, and the knowledge thus acquired was turned to excellent account in his Adventures of Huji Buba of Ippahan (1824-28, 5 vols.) (a species of Gil Blas, like Hope's Aventures, whose "adventures in England" he described in a second series (1824); Zohrab the Hospitable, Ayeeda, or the Maid of Kars; Abel Almutu; The Banished, etc.; in all of which, but especially in the first three, the manners, customs, and modes of thought prevalent in the East are portrayed with a liveliness, skill, and truthfulness to nature attained by few. He died in 1846. See the references in Allibone's Dict. of Brt. and Amer. Authors, ii, 1398-99, 1399.

Morigia, Jacobo Antonio de (1), an Italian monastic, noted as the founder of a religious order, was born in November, 1497, at Milan. Up to the age of twenty-five he indulged in all the pleasures of the world, but at that period experienced a change of heart, and enrolled himself directly in a brotherhood of penitents which existed in Milan under the name of "Brotherhood of Eternal Wisdom." Admitted into the Franciscan Order of the Minorites, he refused the rich abbey of San Victor, and performed ministerial functions of charity during the plague which in 1525 devastated Milan. A few years later he joined Antonio Maria Zacara (1461-1499), who had a similar experience, and together founded the Congregation of the Regular Clerics of St. Paul, so named after their first chapel, taking subsequently the appellation of Barnabites, from the church of San Barnabas. By a decree of Feb. 18, 1533, Clement VII approved the institution, and Morigia, after he had become formally a priest, was appointed its first provost, April 15, 1536. These regulars, established for missions and other sacerdotal functions, lived in their beginning only upon alms, and were not allowed any fixed revenues; but all this has since changed. Morigia undertook missions to Vicenza, Verona, and several other cities of Italy. He resigned his office in November, 1549, after he had governed wisely his congregation; but his colleagues re-elected him June 30, 1545, and on Oct. 20 following he took possession of the church of San Barnabas. He died April 14, 1546. At present the Barnabites have a general in Rome and a house at Paris, and are spread through almost all Roman Catholic countries. See Barnabites.

Morigia, Jacobo Antonio de (2), an Italian prelate of note, was born at Milan Feb. 23, 1682, entered the Order of the Barnabites when only seventeen years of age, taught philosophy at Macerata and at Milan, and preached with great success in the principal cathedrals of Italy. Cosimo III of Medici, grand-duke of Tuscany, chose him for theologian, and made him tutor of Ferdinando, his oldest son. The influence of this same prince procured for him in 1681 the bishopric of San Miniato, whence he was transferred, Jan. 11, 1688, to the archbishopric of Pisa, which he is said to have possessed till Dec. 11, 1695, when he was made cardinal "in petto" by pope Clement XII, but this nomination was not published until the Consistory of 1688, simultaneously with the declaration that Morigia should have precedence of all the cardinals created in 1685, because he had been reserved for that very purpose. Archpriest of the Basilica of St. Peter, he was the only person at the jubilee of 1698 who was charged to open the holy gate. Vastating his bishopric of Fosse every year, he refused in the same year, after the death of Federigo Cacca, the appointment as archbishop of Milan, became a titular official of two abbacy, and finally in 1697 bishop of Pisa, whence he died, Oct. 17, 1708. Literature relating to the life of Morigia funebre nelle obesi di Filippo Vis conte, vescovo di Cantavano (1664, 4to.):— I'etoni tributi resa alla grand anima di Filippo IV (Milan, 1666, 4to.):— L'Aquilla volante, orazione funebre, per la stessa occasione (Milan, 1666, 4to.):—Lettere pastorali al popolo di Vien (ibid.).

Morin, Étienne, a learned French Protestant, noted for his attainments in Orientalia, was born at Caen Jan. 1, 1625. His father, who was a merchant, died when he was only three years of age, and his mother, though designing him for trade, suffered his vehement inclination to books, until she found him so greatly drawn to study as to make any attempt for his conversion to trade futile. He went through the classics and philosophy at Caen, and then removed to the Huguenot seminary at Sedan, to study theology under Peter du Moulin, who conceived a great friendship for him. Morin afterwards continued his theological studies under Andrew Rivet, and joined to them of the Oriental tongues, in which he made a great proficiency under Julius. Returning to his country in 1649, Morin became a minister of two churches in the neighborhood of Caen. He was distinguished by uncommon tact and learning, and had several advantageous offers from abroad; but he did not care to sit from his own country. In 1664 he was chosen minister of Caen, and his merits soon connected him in friendship with several learned men who were then in that city, such as Huetius, Segrais, Bochart, and others. The revocation of the Edict of Nantes in 1685 obliging him to quit Caen, he retired with his family into Holland. He went first to Zutphen, and soon after to Leyden. In this latter city he was not only able to be professor of the Oriental tongues in the university there, to which employment was joined, two years after, that of minister in ordinary. He died May 5, 1700. Morin wrote considerably. His most important works are, Dissertationes octo, in gravis multa sacra et profana antiquitatum monumenta explicandarum (Geneva, 1678, 8vo; a 2d edit. of 1680, 8vo; and 3d ed. of 1700, 8vo):— Oratio inauguralis de lingua primoe vijque appendicibus (Utrecht, 1694, 4to.):— Dissertatio de paradisi terrae fidei et historiae on the part of Bochart's works, the 3d ed. of which was published at Utrecht in 1692, with Bochart's life by Morin prefixed) (Epistola duo, seu responsiones ad Ant. Van Dale de Pentateuco.
Morin, Frédéric, a French philosopher, was born at Lyons June 18, 1823. After preliminary studies he entered the Normal School in 1844; received a fellowship in philosophy in 1848, and lectured on this branch successively at the lyceums of Macon and Nancy, and at the Lycée Bonaparte. When, after the coup d'etat of 1852, he had refused the oath to the usurper, Louis Napoleon, he was considered as having resigned his professorship. He devoted himself henceforth to private instruction, and published works on religious philosophy, seeking to harmonize democratic principles with Christian beliefs. We have of him, Saint François d'Assise et les Franciscains (1853, 12mo) — De la Genèse et des Principes métaphysiques de la société moderne (1856, 8vo) — Dictionnaire de Philosophie et de Théologie scolastique (1857-58, 3 vols. large 8vo). Besides, he has furnished articles to the Journal L'Avenir, to the Correspondent de l'Education, to the Bulletin du Roi, to the Revue de l'Instruction publique, and to the Biographie Générale. He died in 1874.

Morin, Jean, a most learned French writer on the theological subjects, and a convert to the Romanists, was born at Blois in 1591. His parents were members of the Reformed faith, but at Leyden, where he was studying philosophy and theology, the violent discussions between Calvinists and Arminians estranged him for a time from his friends. Persecution, and falling under the influence of Romanists, accepted their creed, at Paris, under cardinal Perrone. Some time after his conversion to Romanism he entered into the Congregation of the Oratory, then but recently established, and began to make himself known by his learning and his works. In 1636 he published De Patriarcharum et Primatum Origenis (Paris, 4to), dedicating the work to pope Urban VIII. In 1628 he undertook an edition of the Septuagint Bible, with the version made by Nolius, supplying it with a preface, in which he treats of the authority of the Septuagint. He commends the edition of it that had been made at Rome by order of Sixtus V in 1587, which he followed, and maintained that we ought to prefer this version to the present Hebrew text, because that has been, he says, corrupted by the Jews. Having gone from the Protestant to the Roman fold, Morin very naturally, like all apostates, became a most enthusiastic adherent of Romanism, and therefore now engaged upon a systematic defence of those versions which the Church had approved by weakening the texts which passed for original (Simon, Einleitung, p. 522). Before this work was ready to appear, he published in 1629 Histoire de la délivrance de l'Eglise chrétienne, and Commentaire sur la grande et souveraine temporelle donnée à l'Eglise Romaine par les rois de France (Paris, fol.); but this book was not well received at Rome, and Morin was forced to promise that he would retract and correct it. Soon after he published Exorcisationes ecclesiasticæ in turgiçae Samaritani temporibus: libri tres (1631, fol.); an attempt to establish the integrity of the Hebrew text. As there was then preparing an edition of the Polyglot at Paris, Morin took upon himself the care of the Samaritan Pentateuch. His endeavors to extalt this ancient version to rank with the Greek and Latin Bible, at the expense of the Hebrew, made him very obnoxious to many savants, especially Hebrews; and he was attacked by Hottinger and Buxtorf in particu- lar. Simon and Kennicott, however, countenanced Morin's position. The opposition which Morin encountered only enhanced his merit at the court of Rome, insomuch that cardinal Barberini invited him thither by order of the pope, who received him very graciously, and intended to employ him in the communications that were then negociated with the Roman pontiff. But the young Pope, Alexius VIII., having a mind looking towards reunion. He was greatly caressed at Rome, and intimate with Holstenius, Allatius, and all the learned there. After having remained nine years at Rome, he was recalled by order of cardinal Richelieu to France, where he spent the remainder of his life in learning, and died at Paris in 1695. Morin's works are very numerous, and some of them much valued by Protestants as well as Romanists on account of the Oriental learning contained in them. The writer of a sketch of his life and labors in Kitto's Cyclopædia pronounces Morin "the restorer of the ancient Samaritan language," but takes exception, like most Hebraists, to "his anti-Masoretic zeal as not according to knowledge, as later investigations in the same field have abundantly proved." The most important works not yet mentioned are, Exorcisationes Bibliæ de Hebraicæ Oraculæ textus sinceritate (Paris, 1683, 4to), and published in 1686. It contains a number of letters, with a life of the author by father Constantine, of the Oratory. But also in positive theology Morin exercised himself as an author. Thus he wrote Commentarius historico-dogmaticus de sacris Ecclésiâs regiorum libellus, cum vero emendationibus, etc. (Paris, 1693, 8vo, 2 vols.); Commentarius historico-dogmaticus de sacris Ecclesiâs regiorum libellus, cum vero emendationibus, etc. (Paris, 1695, 2 vols.), whereof a new edition (1692, fol.; Bruxelles, 1687, fol.), a work on which he is said to have spent thirty years of hard mental labor, but which, nevertheless, failed to gain much admiration. He attacks in it both the Port Royalists and the Jesuits:—Commentarius historico-dogmaticus de sacris Ecclesiâs regiorum libellus, cum vero emendationibus, etc. (Paris, 1697, 8vo, 2 vols.). He also published, among his best efforts:—Opera posthuma de catechumenorum expiatione, de suavitate consonantia, etc., etc. (Paris, 1698, 8vo.); Quamvis, etc. (Paris, 1697, 8vo.), a treatise on the origin and meaning of Christian names; De utraque religionis legibus (1699, fol.); De utraque religionis legibus (1700, fol.); De utraque religionis legibus (1701, fol.). Finally, he published a number of works in the field of ecclesiastical antiquities as gleaned from his correspondence with the savans of Europe. Several of his works remain unedited and unpublished. Among these we notice De Sacramentis Mai- orum, an account of the liturgical and ceremonial of the Church, etc.; De vetustissimis Christianorum paschaliis ritualibus. See Nicéon, Mémoria, ix, 80-48; Du Pin, Bibli. des Auteurs Ecclésiastiques; Schröck, Kirchengesch. seit der Reformation, iv, 123 sq.; Marsh, Lekt. Düring; Wolf, Bibliotheca Hebraica, pt. iv, p. 7; pt. ii, p. 25 and 270. Simon's biography is a mere satire, and unworthy of credit. (J. H. W.)

Morin, Pierre, a French scholar, was born at Paris in December, 1531. He was a man of great attainments in languages, belles-lettres, and ecclesiastic antiquity. From France passing into Italy, he stopped at Venice, where Paulus Mammucius secured him for his printing establishment. He lectured as professor of Greek and cosmography at Vicenza and Ferrara. By recommendation of San Carlo Borromeo he went to Rome in 1575, and there popes Gregory XIII and Sixtus V employed him on the editions of the Septuagint and the Vulgate he translated from the Septuagint into Latin (Rome, 1591, 3 vols. fol.), the Decretals till Gregory VII (Rome, 1591, 3 vols. fol.), and on the collection of the general councils (Rome, 1608, 4 vols. fol.). He died before the completion of this his last work, some time in 1606. He was the author of a number of works of a theological and critical nature. Besides the works enumerated, we possess of him, Traité du bon Usage des Sciences, published with some others of his writings by Quétif in 1675; a
Latin translation from St. Basil's discourses on the forty martyrs, and of a dozen selected sermons of St. Chrysostom.

Morin, Simon, a celebrated French religious visionary and fanatic of the 12th century, was born at Richemont, near Aumale. He was a very illiterate person, yet notwithstanding the want of all educational facilities he entered the field of authorship, and gave the world his extreme views on religion and philosophy. He meddled much in spiritual matters, and fell into great error. The first book, which he caused to be privately printed in 1647, under the title of *Pensées de Morin dédiées au roy*, is a medley of conceit and ignorance, and contains the most remarkable errors, which were afterwards condemned in the Quietists; but Morin carries them to a greater length than any one else had done, for he affirms that "the most enormous sins do not remove a sinner from the state of grace, but serve, on the contrary, to humble the pride of man." He says "that in all sects and nations God has a number of the elect, true members of the Church; that there would soon be a general reformation, all nations being just about to be converted to the true faith; and that this great reformation was to be effected by the second coming of Jesus Christ, and Morin incorporated with him." About the middle of the 17th century Morin was civilly prosecuted and for a time incarcerated, but he was finally set at liberty as a visionary, and suffered to continue until 1741, when Des Marets, who though a visionary and fanatic himself, with intent to injure, entered, under pretence of accepting all the views of Morin, into his whole scheme, only to have him taken up. Marets, in his treachery and dissimulation, went so far as to acknowledge Morin as "the Son of Man risen again," and thereby so pleased Morin that he conferred upon him as a particular sign of grace the office of being his barbinger, calling him "a real John the Baptist revived." Then Des Marets impeached him and became his accuser, and Morin, after due trial, was condemned to be burned alive at Paris, March 14, 1663. He was burned, together with his book entitled *Pensées de Morin*, as also all his own papers and those of the trial. His ashes were thrown into the air, as a punishment for his having assumed the title of the "Son of God." His accomplices were obliged to assist at his execution, and then to serve in the galleys for life, after having been whipped and branded by the hangman. Morin's body, after having lain for two hours out of the fire, was again at the third day, which made many of the mob gather together at the place where he was burned. It is said that when De Lamoignon asked him whether it was written in any part of the Scriptures that the great prophet or new Messiah should pass through fire, he cited this text by way of answer, "I command you, therefore, not to ascend into the fire." (Mal. 1:6) Non est inventa in me inequa" (Thou hast tried me in the fire, and no wickedness has been found in me). See Nicéon, *Mémoires*, vol. xxvii: Bayle, *Hist. Dict. s.v.*: General *Biog. Dict. s.v.*: Hoefer, *Nouv. Biog. Générale*, s.v. (J. H.W.)

MORISON, John, D.D., a Scotch Presbyterian divine of some distinction, was born at Millasset, Aberdeen, and in 1737 received a license to teach in a theological history. He was for many years pastor of the Independent Chapel at Brompton, and in 1816 removed to London as pastor of Tower Chapel. In 1824 he was appointed editor of the *Evangelical Magazine*, and held this position for thirty-two years. He died July 18, 1869. He wrote an *Essay of the Epistle to the Colossians* (1829, 8vo):--- *Lectures on the Reciprocal Obligations of Life* (1822, 12mo), of a practical and useful character—Protestant...
by private parties connected with the movement in 1846, in Glasgow, and from it there are issued a weekly newspaper, 'Christian Witness,' which was commenced in 1846, and a small monthly magazine called The Day-Star, which was started the year preceding, and has a large circulation, besides other periodicals, and an immense number of tracts and minor treatises, exhibiting in various forms the distinctive tenets of the denomination.

Moritz, Johann Christian, a Jewish missionary of the Christian Church among his people, was born at Berlin, in Prussia, in 1717. He received a careful instruction according to the fashion of that time. The study at home of history, geography, poetry, and philosophy, more especially the works of Mendelssohn, greatly strengthened his mind. When sixteen years of age Moritz went to Berlin, where he was taken care of by his uncle. Here he met with free-thinking Jews, who, although they could not draw him into the fatal meshes of infidelity, yet exercised for a time a baneful influence upon his conversation and conduct. When Prussia suffered much humiliation in the wars of the first Napoleon, Moritz determined to go to England until the dawning of better days. With a letter of introduction to the chief rabbi of England of that time, Dr. Herschel, he reached London in July, 1807, and was kindly received by that divine. Moritz obtained a scanty living by teaching French and German, until the summer of 1808, when he made the acquaintance of Dr. Steinke, who, with his wife, Dr. and Mrs. Steinke, who was publicly baptized on the 31st of December, 1809, according to the forms of the Lutheran Church. He then laid aside his original Jewish name, Moses Treitel, and received the above Christian name, by which he has always since been known. In 1811 he went to Gottingen, where he married, and while there he stayed until 1817, when he visited Russia for a short time, and the way was opened for him to labor among his brethren in Russia. At St. Petersburg he met the Rev. Lewis Way, and formed a friendship which lasted for life. He labored in Russia under the sanction of the emperor Alexander, until by an official mandate he was compelled to abandon the labors of the last eight years. In May, 1820, Mr. Moritz was accepted by the London Society for Propagating Christianity among the Jews, which sent him to labor at Hamburg. He next labored at Copenhagen, Neuwill, Frankfort, and Stockholm, returning to Hamburg in 1824. He then removed to Distelburg, in Prussia, in 1825, his residence at three different places, at Gottingen, and Norway and Sweden assigned him for his field of labor. On Jan. 1, 1868, he retired from active service, after forty-two years' faithful labor for his Master in the society's ranks, and died on Feb. 17, at Gottingen, rich in peace and joyful in hope. See Jewish Intelligence, 1868. (B. R.)

Mörli, Gustav Philipp, a German theologian, was born at Nuremberg Dec. 26, 1873, and was educated first in the schools of his native place and then at the university in Altzburg, where he studied philosophy and philology from 1890 to 1892, when he was removed to Jena to study theology and the ancient languages. He travelled through Holland, and visited its most important universities. After his return home he was appointed assistant of the philosophical faculty at Halle, and in 1896 became professor and ecclesiastical inspector at Altzburg. He resigned this position in 1903, and was appointed dean of St. Sebald's church at Nuremberg. In 1906 he was appointed minister of the St. Agapitian church, and inspector of the gymnasium; in 1913 he was appointed minister of the gymnasium, and in 1922 he had the supervision of the ecclesiastical seminary. In 1924 he was appointed minister of the church of St. Sebald, superintendent of the consistory of Nuremberg, city librarian, and professor of divinity of the Aegidische gymnasium. He died May 7, 1950. Besides several dissertations in journals, he published Dis. de distinc-
the other preachers had been. Nevertheless he was nominated one of the assembly of divines at Westminster because of his strong leaning to Calvinism, but he never appeared among them; on the contrary, he always remained with the king, and did him what service he could. Dr. Morley also used his influence at Oxford University to incline its professors to opposition against the Presbyterians, which has been the imprisonment by the anti-royalists in Parliament; and as the Cromwellian party gained the ascendency he was marked out for punishment. In 1648, the Presbyterians having in the main time gained the control of state affairs, Dr. Morley was deprived of all his preferments, and imprisoned for some little time. The length of his imprisonment is not exactly known, but in 1649 we find him preparing to quit England to join his royal master in Holland. Dr. Morley met the king at the Hague, and was for some time a constant companion of Charles II. In 1650, when the king set out on his expedition to Scotland, Dr. Morley went first to the Hague and then to Antwerp, where he resided, together with his friend, Dr. John Earle, in the house of Sir Charles Cotterell, and a year later in the house of Sir Edward Hyde. While thus retired from home and public life, he yet remained a most faithful adherent of the royal and episcopal cause, and, as an advocate for the interests of his religion, once a week, and administered the communion once a month to all the English who would attend" (Hook). About 1654 he became chaplain to the queen of Bohemia at the Hague, but about 1656 he removed to Breda with the family of Sir Edward Hyde, and there continued the same practice as at Antwerp.

During the protectorate of Richard Cromwell, while the royalists were preparing for the Restoration, Charles employed Dr. Morley as a messenger to the Presbyterians. He quickly gained their confidence, because he was known to be a strong Calvinist. He was, moreover, a fit person to instil the Presbyterians with a desire to seek safety in and return to the church under the rule of the king. Thereafter, in 1657, he was in the treaty agreed to by Charles I in the Isle of Wight, which favored the Presbyterians in many respects. See PRESEC ultra. It is true Baxter did not very much like Dr. Morley, because, as he complains, Morley "talked of moderation in the general, but would come to no particular terms" (Autobiography, p. 218). Yet Morley himself must have been persuaded of the successful issue of his mission if we judge him by his letter of May 4, 1650, in which he writes: "I have reason to hope that they (i.e. the Presbyterians) will be persuaded to admit of and submit to episcopal government in time. The length of the imprisonment has been the chief reason against them, but they may be permitted, before and after their sermons, and upon occasional emergencies, to use such arbitrary forms as they themselves shall think fit, without mixing of anything prejudicial to the government of the Church and State as they shall be settled" (Clenendon, State Papers, vi, 738, 743). Upon the royalists, particularly, Dr. Morley had a good influence. They, as soon as they saw the approach of victory, manifested a too forward zeal, and made uncomfortable threatenings of revenge upon the republican party. Dr. Morley checked these evil tendencies, and thus softened down all opposition on both sides. Dr. Morley also, though incorrectly, represented the king's religious views, and refuted the statement that Charles II was a convert to popery. Of course Dr. Morley was duped by the king, and could never have served Charles had he known that man to have been a hypocrite. Morley was a diplomatist, seeking to gain the ascendency of the episcopal party in the English realm, but he was also an honest Christian, and would not have suffered himself to be the tool of an apostate. Indeed his position later in life against papists makes this plainer still. (See below.)

Upon the restoration of Charles II, Dr. Morley was restored to his former preferments and dignity, being restored to the bishopric, besides being restored to his canony, and appointed dean of Christ Church. He was consecrated bishop of Worcester in 1660. In 1661 bishop Morley played a prominent part in the Savoy Conference (q.v.), commissioned to bring about such changes in the liturgy as might enable the Presbyterian and Episcopalians to unite once more. Though the archbishop of York was present, Morley appeared as the chief speaker of the bishops, and was for the Episcopalians with whom he was in agreement. Morley puts Morley next to Sheldon, yet acknowledges that the latter acted chiefly as adviser, "taking little share in the viva-voce discussions," while Morley appeared constantly as leader in the debates (i, 163). In 1662 bishop Morley was made incumbent of the deanery of the royal chapel, and shortly after the see of Worcester to that of Winchester. In 1678, when the royalists made a desperate attempt to introduce severe measures against the Nonconformists, bishop Morley figured prominently in the effort, and thus brought reproach upon himself for intolerance and stubbornness. He especially favored the modification of the "Test Act" in such a manner that it became necessary for every English subject to be faithful to "the Protestant religion as established by law in the Church of England." Yet Morley's position at this time may be satisfactorily explained. "His main policy was to protect the minister, or, in other words, the Protestant conformity, against papists on the one hand, and dissenters on the other. He shared in the alarm which conversions to Rome and the encroachments of that Church inspired throughout England at the time; and partly from that cause he was induced to support the bill, . . . thinking by the new oath, which established the Church, to prevent an invasion by the enemy. . . . Strength was wasted by internecine warfare at a moment when Episcopalians and Presbyterians stood before a common foe. It was the story of the Crusaders repeated. Why not gather the forces of the Church and of the sects, and concentrate them upon the great enemy of the church, the world? . . . Even the sects, under the circumstances, were not unnatural in the mind of a man like Morley" (Stoughton, i, 439, 440).

In his old age Morley is reputed to have become more tolerant again, for it is related that he stopped proceedings against an ejected minister, and invited him to dinner, endeavoring to soften down the temper of nonconformity; but, better still, it is said that in Morley's last days he drank to an intermeddling country mayor in a cup of Canary, advising him to let dissenters live in quiet, "in many of whom, he was satisfied, there was the fear of God"—and be thought things were "not likely to be gained right away by severity." The bishop of 1662, John Burnet says that he "was in many respects a very eminent man, very zealous against popery, and also very zealous against dissent; considerably learned, with great vivacity of thought; soon provoked, and with little mastery over his temper" (i, 550). His zeal against the doctrines of popery is apparent in his writings, and not less so his zeal against dissent; in connection with his opposition to both, he avows the doctrine of passive obedience, declaring in terms the most unequivocal "the best and safest way for prince, state, and people is to profess, protect, cherish, and allow of that religion, and that only, which allows of no rising up against or resisting sovereign power—no, not in its own defence, nor upon any other account whatsoever" (Morley's Treatises, sermon before the king, p. 38). Indeed, he maintains, again and again, the principle of intolerance in the government of the Church, and the principle of despotism in the government of the State; holding the king to be sole sovereign, while Parliament is only a concurring power in making laws, and the bishops the only legitimate ecclesiastical rulers. Bishop Morley was a very generous man, and freely expended his income for the good of his benefices. He was a benefactor to his church, keeping a pensioner of £100 per annum, and by establishing several prizes at Pembroke and other colleges. He spent much money
in repairing the buildings in the see of Winchester, be
quainted a considerable sum to St. Paul’s, London, and
left £1000 to purchase lands for the support of small vic-
arages. The bishop also bore a high reputation for the
ological learning before the civil wars, as well as after
the establishment of the episcopacy, and was acknowled-
ged to be a learned man, and held in the highest estima-
tion, and in a formidable controversialist. He wrote A Sermon at the Coronation of Charles II, April 23, 1661.
In the dedication to the king, by whose command it was pub-
lished, he says that he was now past his great climax,
ter and this was the first time that ever he appeared in
public. — He is prefixed to the Be Laid Open by Himself of Mr. Baxter, or the Calumny, etc. (1665) — Epistolaphilopogica et pararamo-
tica ad theologum quemdam Belgiam scripta (1665; 4to; 
written at Breda, June, 1659; reprinted in 1683, under
this title, Epistola, etc., in qua utitur de seren. regis Cur. If erga reformata religionem affecta). In this
letter he attempts to clear Charles II from the imputa-
tion of popery, and urges the Dutch to lead their ut-
most assistance towards his restoration; but he was
mistaken in his master’s religion, and perhaps lived
long enough to know it. — The Sum of a Conference with
Darcey, a Jesuit, at Brussels (1648) — An Argument
drawn from the Evidence and Certainty of the Church of
against the Doctrine of Transubstantiation — Vindica-
tion of the Argument, etc. — Answer to Father Crespay’s Letter, writ-
ten about 1662 — Sermon before the King, Nov. 5, 1667;
— Answer to a Letter written by a Romish Priest (1670);
— Letter to Anne, duchess of York (1670). This lady,
the sister of the Catholic King of Spain and girl-friend in
the Protestant religion by our subject while he lived at
Antwerp, but she afterwards forsaking the faith of her
family, Dr. Morley wrote this defence of Protestantism:
— Ad Virum Janum Unitatem Epistolae duas de Invoca-
tionibus Sanctiorum (1659). All the above pieces, except
the first and second Appeal written at Breda, were
printed in 1663, under the title, — A Letter to the Earl of Anglesey concerning the Means
to keep out Popery, etc., printed at the end of A true
Account of the whole Proceedings betwixt James, duke of
Ormonde, and Arthur, earl of Anglesea (1688) — Vindi-
cation of himself from Mr. Baxter’s injurious Reflections,
etc. (1685) — he made also An Epistle for James I (1625),
which was printed at the end of Spottiswood’s
History of the Church of Scotland, and is said to have
been the author of A Character of King Charles II (1690,
in one sheet 4to). In his polemics against
Romanism bishop Morley discusses only three important
points. The treatment of these indicates deep learning and
theological knowledge. The first, a strong argument against
transubstantiation, “drawn from the evi-
dence and certainty of sense,” maintaining his con-
vincing argument with the dexterity of a practiced logician,
as so to parry most successfully all the objections of Ro-
man Catholic antagonists. He decidedly opposes the
papal doctrine of purgatory; but he vindicates prayers
for the dead in the way in which they were offered in
the early Church, and as by modern Anglicans they are
still encouraged to be offered; that is, for the rest of
the soul, the resurrection of the body, and the plenitude
of redemption at the last day. Whatever may be the
propriety of praying for the dead in such a qualified
sense as this, Morley contends there is no ground on
which to rest the doctrine of the invocation of saints.
That doctrine he overthrows by an appeal to Scripture;
and then he proceeds, after the Anglican method, to
examine the writings of the fathers, and to show that
they do and justify the papistical dogmas in unconnected
practices. The bishop enjoyed the association of some of
the most distinguished literati of his day. He was
an intimate friend of Falkland, and mixed much with
Ben Jonson and Edmund Waller. He was strict and
exemplary in his life, though much given to witticisms,
and was well beloved by the clergy and respectable
people, and was acknowledged by all as truly abstemious
and laborious in his habits. See Chamber's Magazine, viii,
69; Stoughton, Eccles. Hist. of England (Church of the
Restoration) (see Index in vol. ii); Perry, Eccles. Hist.
vol. ii (see Index in vol. iii); Wood, Athenae Oxoni;
Neal, Hist. Puritans (Harper's ed.), ii, 230; Burnet,
Hist. of his own Times, i, 590; Salmon, Lives of the English Bishops, p. 346. (J. H. W.)

Morley, Thomas, one of the most distinguished of England’s early composers of sacred and profane mu-
sic, and author of the first regular English treatise on the art of music as practised by the monastic or
middle of the 16th century, but the exact time is not determined.
All that is known of this eminent professor is gathered
from Wood, who, in his Athenae Oxoniensia, tells us that he
was a disciple of Bird, to whom he dedicated his
book in very reverential and affective terms; that he
obtained his degree of B.A. in 1588, and entered into his place as gentleman of the royal chapel in 1592.
He died, Dr. Burney supposes, in or near the year 1604.
Morley produced many compositions that are still well
known, among which are canzonets of different kinds,
particularly for two voices, madrigals for five voices,
two young and unexperienced, deciding the fine Feather
Service published in Dr. Boyce's collection, the first that
was set to the words of the Anglican Reformed Liturgy.
See Engl. Cyclop. s. v; Burney, Hist. of Music.

Mörlin, Joachim, a well-known German Lutheran
theologian, and one of the most zealous defenders of
the great German Reformer and his views, was born at
Wittenberg April 6, 1514. His father, Jodocus Mörlin,
professor of metaphysics at the Wittenberg University,
was himself of the University of Marburg, and was
strongly opposed to the new religion. Joachim a careful training intellectually and morally,
and in 1527 he entered the newly-founded University
of Marburg, but soon left for his native city, where,
under Luther’s and Melanchthon’s special guidance, he
devoted himself to the study of theology. When not
quite twenty years of age, he received the degree of
Doctor of a church at Wittenberg, and in 1539 accepted a
call to the church of Eisleben. At Luther’s request
he returned in the following year to Wittenberg; but,
hardly arrived, left it again for Arnstadt, whence he
had received a call as its first ecclesiastical superintendent.
He was now but twenty-six years old, and by far
more young and unexperienced, deciding the fine Feather
position. Zealous in his religion, and of rather coarse
and contentious disposition, he soon came into serious
difficulties with some powerful church members, who
persecuted him mercilessly. In 1548 he was deposed,
without having been allowed the benefit of a trial.
Though he was allowed to retain his retention, Mörlin
had to leave Arnstadt, and removed to Göttingen, where
he remained until 1549. About this time he, together
with many other Lutheran theologians, openly declared
against the Augsburg Interim, alleging that it re-establish-
ed popery; whereupon duke Erich was deposed and
Mörlin banished. A few months later he received a
pastoral call to Kneiphof, one of the main quarters of
Königsberg, in Prussia, which he accepted. Greatly
favored by duke Albrecht, Mörlin was at first universally
esteemed and beloved. But he soon became involved in
the Osiandrian controversy. See Osiander; Jusfifi-
cation. In his strict Lutheranism he opposed Osi-
ander’s views on the nature of justification and its relation
to sanctification. According to the manner of the times,
Osiander’s departure from the grand Lutheran doc-
trine of Justification (q. v.), and especially of views ap-
proximating the Roman Catholic doctrine, were there-
fore made the subject of severe condemnation. Mörlin
in a rather coarse and abusive way. The duke of Prussia,
anguished to restore peace between the contending parties,
issued an edict to all Prussian clergy and professors of
theology, in which slanderers and denouncers of their
respective opponents was threatened with severe bodily
punishments, and the whole manner of the proceedings
grew more and more bitter, and after Osiander’s death
Mörlin attacked and persecuted his followers.
Several of them, among them Johann Funk, were beheaded be-
cause they refused to recant. Uncharitable against all opponents, and of a naturally contentious and passionate disposition, Mörlin grew so violent and sarcastic in his language that he called the duel an edict of inspiration of the devil, to which he refused to submit. In consequence he was dismissed (1553), and, notwithstanding his numerous and influential followers, had to leave Königsberg. He went to Danzig, and lived there for some time in the society of the local Lutherans and Catholics, of which he endeared himself to the Königsberg friends, until he received a call to Brunswick as ecclesiastical superintendent and first city-preacher. Here, in connection with his friend, Martin Chemnitz, late librarian of duke Albrecht, Mörlin devoted himself to a closer study of the Bible and the fathers, and took a prominent part in all the theological controversies of the time. When in 1556 Albrecht Hardenberg attempted to introduce into the republic of Bremen Calvin's doctrine respecting the Lord's Supper, Mörlin, together with Chemnitz, opposed him most violently, and after his dismissal caused the issue of that bigoted Bremen edict (Oct. 6, 1561) "against the sacramental enthusiasts and Anabaptists" (Gegen die Sacraments- Sekhärmer u. Wiederläuter). At this occasion he published his Erklärung aus Gottes Wort u. kurzer Bericht d. Herren Theologen, and Von der Condemnation strenger Lehr (Magdeburg, 1563). These works are a not overulcious exposition of the old Lutheran theses, and form an all too inadequate right to the interpretation of these, and are far inferior to Chemnitz's work, Repetitio unam doctrinam de vera præsens corporis et sanguinis Domini in cibo sacro. In 1557 he went to Wittenberg, vainly endeavoring to put a stop to the Anabaptist controversies. He subsequently separated himself from Flacius, writing against him in his manual in a rude and violent style. He was also present at the Worms Council, which, like most such disputes, led to no result whatever. After the death of Melancthon, he grew, if possible, still more zealous in his strict Lutheranism, and became a formidable opponent of all the reformers. He published a number of works which he published about this time. We must refer to the works themselves for a detailed statement. These works are: O arte et Tract at on die Kirchen in Preussen; — Schedeswelen an den Völfen: — A polemic on the Württemberg Hessens, Anabaptisti Schwenkfuhr. Things meanwhile had changed materially in Prussia. Osianer and his followers were greatly suppressed, and duke Albrecht, yielding to the repeated appeals of the citizens, recalled Mörlin in 1556 to Königsberg, nominating him bishop of Samland. Chemnitz, who always had been a great favorite with the duke, accompanied Mörlin to Königsberg, and became associated with him in the preparation of the Corpus doctrina Prutenicum. As such he was a veritable champion of the Lutheran faith. His Disputation contra novum corruptionem, qua asseritur, operam presentium in actu justificationsi necessarium esse (Jena, 1567), and his Verantwortung wider die falschen Anfänge der neuen drei Wittenberger in ihrer Grundsat der Königl. Seelsorge. He died May 23, 1571, at Königsberg, before the Majoristic controversy was concluded. Besides the works already named, Mörlin wrote also Disputatio de communicacione idiomatum (1557) — Postilla — Präbender Predigten: — A neue Catechism (Eislenen, 1665) — Von Berufe der Prebend und Prebendi in der Staatskirche der Landes-Stiftungen. Mörlin was evidently a tenacious man, and born to be a polemic. His opponents charged him, and perhaps not unjustly, with assuming to be the guardian of the Church. He was evidently sincere and deeply in earnest, assenting that he became involved in these various controversies as a faithful servant of the Church, doing only what every one was bound to do, namely, guarding its

VI.—20*
MORMONS, the usual name of a religious sect which was founded in this country A.D. 1830, and claims to be called of God to gather within its fold the people of this universe, by authority of a new dispensation, which is to be the last given to man in his present existence. They style themselves "The Church of Jesus Christ of Latter-day Saints," or briefly, "Latter-day Saints," and object to being spoken of as Mormons. The word "Mormonism," derived from the name of one of their sacred books (i.e. The Book of Mormon), though this word is derived from the Greek (μορμωνίας), and literally signifies a lamia, ma- niola, female spectre (the mandrill for its ugliness was called Cynecephalus Mormonus), the Saints, according to Joseph Smith, the first prophet and founder of Mormonism, treat its etymological origin thus extravagantly: "We say from the Saxon good, the Dane god, the Goth goed, the German gut, the Dutch gut, the Latin bonus, the Greek καλός, the Hebrew בַּשָּׁל, and the Egyptian mom. Hence, with the addition of more, or the contraction mar, we have the word mormon, which means literally more good." According to anti-Mormons, the name Latter-day Saints was assumed in 1835 by the Mormons, at the suggestion of one of their leaders, Sidney Rigdon, and the word "Mormon" is more distasteful to them than is the word "Mohammedan" to the Muslim or "Jew" to the Hebrew. In accordance with our general practice to let each religious body speak for itself in these pages, we insert here the history of the organization of the church of the Latter-day Saints in its infancy, as derived by their apostle Orson Pratt, the eldest living exponent of Mormonism, and George A. Smith, the first counsellor of President Brigham Young.

I. History.—The Church of Jesus Christ of Latter-day Saints was founded by Joseph Smith, who was born in the town of Sharon, Windsor County, Vt., Dec. 23, 1805. When ten years old his parents, with their family, moved to Palmyra, N. Y., in the vicinity of which he resided for about eleven years, the latter part in the town of Manchester. He was a farmer by occupation. His advantages for acquiring scientific knowledge were exceedingly small, being limited to a slight acquaintance with two or three of the common branches of learning. He could read without much difficulty, and write a very imperfect hand, and had a very limited understanding of the elementary rules of arithmetic. These were his highest and only literary attainments, while the rest of those branches so universally taught in common schools throughout the United States were entirely unknown to him. When about fourteen or fifteen years old, he began seriously to reflect upon the necessity of being prepared for a future state of existence; but how or in what way to prepare himself was a question as yet undetermined in his own mind; he perceived that it was a question of infinite importance, and that the salvation of his soul depended upon a correct understanding of it. He saw that if he understood not the way, it would be impossible to walk in it except by chance, and the thought of resting his hopes of eternal life upon chance or uncertainty was more than he could endure. If he went to the wall to seek information, he was not satisfied himself, but he so spoke to its own particular tenets, saying, "This is the way—walk ye in it;" while at the same time the doctrines of each were in many respects in direct opposition to the rest. It also occurred to his mind that God was the author of but one doctrine, and therefore could acknowledge but one denomination as His Church, and that such denomination must be a people who believed more than one doctrine (which it may be) and build upon the same. He then reflected upon the immense number of doctrines now in the world, which had given rise to many hundreds of different denominations. The great question to be decided in his mind was, if any one of these denominations be the Church of Christ which one is it? Until he could become satisfied in relation to this question he could
MORMONS

not rest contented. To trust to the decisions of fal-
lible man, and build his hopes upon them, without any
knowledge of his own, would not satisfy the anxious
decisions that people. His present state, his present
condition, however, is such, that he cannot rely upon
any positive and definite evidence on which he could
rely upon a subject involving the future welfare of his
soul was revolting to his feelings. The only alternative
that seemed left to him was to read the Scriptures and
endeavor to follow their directions. He accordingly
began perusing the sacred pages of the Bible with au-
tority, believing the things that he read. His mind
soon caught hold of the following passage: "If any of
you lack wisdom, let him ask of God, that giveth to all
men liberally and upbraideth not, and it shall be given
him" (James i, 5). From this promise he learned that it
was the duty of one who desired to save his own soul,
with the sure and certain expectation of receiving
liberally, without being upbraided for so doing. This
was cheering information to him—tidings that gave him
great joy. It was like a light shining forth in a dark
place to guide him to the path in which he should walk.
He now saw that if he inquired of God, there was not
only a possibility but a probability, yes more, a cer-
tainty, that he should obtain a knowledge which of all
the doctrines was the doctrine of Christ, and which of
all the churches was the Church of Christ. He there-
fore retired to a secret place in a grove but a short dis-
tance from his home, and knelt down and began to call
upon the Lord. At first he was severely tempted by
the powers of darkness, which endeavored to over-
come him; but he continued to seek for deliverance
until darkness gave way from his mind, and he was en-
able to pray in fervency of the spirit and in faith; and
while thus pouring out his soul, anxiously desiring an
answer from God, he saw a very bright and glorious
light in the heavens above, which at first seemed to be
at a considerable distance. He continued praying, while
the light appeared to be gradually descending towards
him; and as it drew nearer it increased in brightness
and magnitude, so that by the time that it reached the
tops of the trees the whole wilderness, for some dis-
tance around, was illuminated in a most glorious and
brilliant manner. He expected to see the leaves and
boughs of the trees consumed as soon as the light came
in contact with them; but perceiving that it did not
produce that effect, he was encouraged with the hope
of being able to endure its presence. It continued de-
scending slowly until it rested upon the earth, and he
was enveloped in the midst of it. When it first came
upon him it produced a peculiar sensation throughout
his whole system, and immediately his mind was caught
away from the natural objects with which he was sur-
rounded, and he was elevated in the spirit, and saw two glorious personages who exactly resem-
bled each other in their features or likeness. He was
informed that his sins were forgiven. He was also in-
formed upon the subjects which had for some time pre-
viously agitated his mind, namely, that all religious
denominations were believing in incorrect doctrines
and, consequently, that none of them was acknowledged
of God as his Church and kingdom. He was ex-
pressly commanded not to go after them; and he re-
ceived a promise that the true doctrine—the fulness of
the Gospel—should at some future time be made known
to him; after which the vision withdrew, leaving his
mind in a state of calmness and peace indescribable.
Some time after having received this glorious manifes-
tation, being young, he was again entangled in the van-
tities of the world, of which he afterwards sincerely and
truly repented. It pleased God, on the evening of
Sept. 21, 1825, again to deliver him from this re-
sort; and he was filled with the most earnest desire
to "commune with some kind mes-
senger who could communicate to him the desired in-
fornation of his acceptance with God;" and also unfold
the principles of the doctrine of Christ, according to the
promise which he had received in the former vision.
While he thus continued to pour out his desires before
the Father of all good, endeavoring to exercise faith in
the latter's promises, "Voce a la Voz," or on a certain
day, only of a purer and far more glorious appearance
and brightness, burst into the room—indeed the first
sight was as if the house were filled with consum-
ning fire. This sudden appearance of a light so bright,
as must naturally be expected, occasioned a shock or
sensation that extended to the extremities of the body.
It was, however, followed with a calmness and serenity
of mind and an overwhelming rapture of joy that sur-
passed understanding, and in a moment a personage
stood before him." Notwithstanding the brightness of
the light which previously illuminated the room, "yet
it was not a light resembling an additional and asso-
ociating this personage, which shone with an in-
creased degree of brilliance, of which he was in the
midst; and though his countenance was as lightening,
Yet it was of a pleasing, innocent, and glorious appear-
ance—so much so that every fear was banished from
the heart, and nothing but calmness pervaded the soul.
"The stature of this personage was a little above the
common size of men in this age; his garment was per-
fectly white, and had the appearance of being without
seams." This glorious being declared himself to be an
angel of God, sent forth by commandment to communi-
cate to him that his sins were forgiven, and that his
prayers were heard, and also that the covenant which
God made with ancient Israel concerning their posterity
was at hand to be fulfilled—that the great preparatory
work for the second coming of the Messiah was speedily
to commence—that the time was at hand for the Gospel in its fulness to be preached in power to all nations, that a people
might be prepared with faith and righteousness for the
millennial reign of universal peace and joy. He was in-
formed that he was called and chosen to be an instru-
ment in the hands of God to bring about some of his
marvellous purposes in this glorious dispensation. It
was also made manifest to him that the "American In-
dians" were a remnant of Israel; that when they first
emigrated to America they were an enlightened people,
possessing a knowledge of the true God, enjoying his
favor and peculiar blessings from his hand; that the
prophets and inspired writers among them were required
to keep a sacred history of the events transpiring among
them, which history was handed down for many generations, till at length they fell into
great wickedness. The greatest part of them were de-
stroyed, and the records (by commandment of God to
one of the last prophets among them) were safely de-
stroyed from among them; and the sacred records de-
sired were preserved, and were delivered in the hands
of the God who sought to destroy them. He was informed that these records contained many sacred revelations per-
taining to the gospel of the kingdom, as well as proph-
ecies relating to the great events of the last days; and
that to fulfill his promises to the ancients who wrote the
records, and to accomplish his purposes in the restitu-
tion of their children, etc., they were to come forth to
the knowledge of the people. If faithful, he was to be
the instrument who should be thus highly favored in
bringing these sacred things to light. At the same
time he was expressly informed that it must be done with
an eye single to the glory of God—that no one could be
intrusted with those sacred writings who should en-
deavor to aggrandize himself by converting sacred
things to unrighteous and speculative purposes (see
Book of Mormon, ch. iv., § 2, p. 510). After giving him
many instructions concerning things past and to come,
which he was permitted to see, the personage
re
drew, leaving his mind in perfect peace, while a calm-
ness and serenity indescribable pervaded his soul.
But before morning the vision was twice renewed, instruct-
ing him further and still further concerning the great
work of God about to be performed on the earth. In

Digitized by Google
the morning he went out to his work as usual, but soon the vision was renewed—the angel again appeared, and having been informed by the previous visions of the night concerning the place where those records were deposited, he was instructed to go immediately and view them.

Accordingly he repaired to the place, a brief description of which was best given by Oliver Cowdery [Joseph Smith's scribe and first follower by baptism], who shortly after this event visited the spot:

"It was a broad, open road, named Palmyra, Wayne County, to Canaan, Ontario County, New York, before arriving at the little village of Manchester, about four miles further. As you pass along the road you are on the east side of the road. Why I say large is because it is as large, perhaps, as any in that country. The north end of the road was marked by a large, open field, and the line of the road trended more southerly extremity, and I think I may say an open road three-fourths of a mile long and three-fourths of a mile wide. If you pass towards Canaan it lessens gradually, until the surface assumes its common level, or is broken by other eminences, ridges, wate..."
MORMONS

621 MORMONS

The above quotation is an extract from a letter written to elder Oliver Cowdery, which was published in one of the numbers of the Latter-day Saints' Messenger and Advocate.

Although many more instructions were given by the mouth of the angel to Mr. Smith, for which we have not space here, yet the most important items are contained in the foregoing relation. During the period of the four following years he frequently received instructions from the mouth of the heavenly messenger. On the morning of the 8th of September, A.D. 1827, the angel of the Lord delivered the records into his hands. These records were engraved on plates which had the appearance of gold. Each plate was not far from seven by eight inches in width and length, being not quite as thick as common tin. They were filled on both sides with engravings in Egyptian characters (see Book of Mormon, Mormon, chap. iv, § 8, p. 515), and bound together in a volume as the leaves of a book, and fastened at one edge with three rings running through the whole. This volume was something near six inches in thickness, a part of which was sealed. The characters or letters upon the unsealed part were small and beautifully engraved. The whole book exhibited many marks of antiquity in its construction, as well as much skill in the art of engraving. With the records was found "a curious instrument, called by the ancients the Urim and Thummim, which consisted of two transparent stones, clear as crystal, set in the two rings of a bow. This was used in use in ancient times by persons called seers. It was an instrument by the use of which they received revelation of things distant or of things past or future." (See Biogr. Sketches, p. 101; Book of Mormon, Ether, ch. i, § 7-11, p. 529 sq. See also Neph. § 29, p. 5 sq.)

In the mean time Mr. Smith received inhabitants of that vicinity who had been informed that Mr. Smith had seen heavily visions; and that he had discovered sacred records, began to ridicule and mock at those things. After having obtained those sacred things, while proceeding home through the wilderness and fields, he was waylaid by two ruffians, who had seized themselves for the purpose of robbing him of the records. One of them struck him with a club before he perceived them; but being a strong man and large in stature, with great exertion he cleared himself from them and ran towards home, being closely pursued until he came near his house. With his companions he was eagerly detected, turned and fled the other way. Soon the news of his discoveries spread abroad throughout all those parts. False reports, misrepresentations, and base slander flowed as if upon the wings of the wind in every direction. The house was frequently beset by mob or evil-designing persons. Sometimes he was at home, at other times by escaping. Every device was used to get the plates away from him. Being continually in danger of his life from a gang of abandoned ruffians, he at length concluded to leave the place and go to Pennsylvania; and accordingly packed up his goods, putting the plates into a barrel of beans, and proceeded upon his journey. He had not gone far before he was overtaken by an officer with a search-warrant, who flattered himself with the idea that he should surely obtain the plates; after searching very diligently, he was sadly disappointed at not finding them. Mr. Smith then drove on, but before he got to his journey's end he was again overtaken by an officer on the same road he had previously traveled with his father-in-law residing. Having provided himself with a home, he commenced translating the record, as he himself tells us in his Autobiography, "by the gift and power of God, through the means of the Urim and Thummim;" and being a poor writer, he was under the necessity of employing a scribe to write the translation as it came from his mouth. (See, for criticism, editorial appendix below, and Stonehouse, p. 23.)

Mr. Smith continued the work of translation, as his pecuniary circumstances would permit, until he finished the unsealed part of the records. The part translated is entitled the Book of Mormon, which contains nearly as much reading as the Old Testament. This volume purports to be a history of ancient America, from its early settlement by a colony who came from the Tower of Babel, to the Christian era. By these records we are informed that America, in ancient times, was inhabited by two distinct races of people. The first, or more ancient race, came directly from the great Tower, being called Jaredites. The second race came indirectly from the city of Jerusalem, about six hundred years before Christ, being Israelites, principally the descendants of Joseph. The first nation, or Jaredites, were destroyed by the time that the Israelites came from Jerusalem, who succeeded them in the inheritance of the country. The principal nation of the second race fell in battle towards the close of the fourth century. The remaining remnant, having dwindled into an uncivilized state, still continue to inhabit the land, although divided into a multitude of nations, and are called by Europeans the "American Indians." We learn from the same history that at the confusion of languages the Lord scattered His people over the face of the earth, the Jaredites, being a righteous people, obtained favor in the sight of the Lord, and were not confounded. Because of their righteousness, the Lord miraculously led them from the Tower to the great ocean, where they were commanded to build vessels, in which they were more fully crowded, and brought across the great deep to the shores of North America. The Lord God promised to give them America, which was a very choice land in his sight, for an inheritance; and he swore unto them in his wrath that whoso should possess this land of promise, from that time henceforth and forever should serve him, the true and only God; or they should be swept off when the fulness of his wrath should come upon them, and they were fully ripened in iniquity. Moreover, he promised to make them a great and powerful nation, so that there should be no greater nation upon all the face of the earth. Accordingly in process of time they became a powerful people, occupying principally North America; building large cities in all quarters of the land, being a civilized and enlightened nation. Agriculture and machinery were carried on to a great extent. Commercial and manufacturing business flourished on every hand; yet, in consequence of wickedness, they were often visited by tempests and pestilence. Many of them fell by a mutual breaking up among them from generation to generation, who testified against the wickedness of the people, and prophesied of judgments and calamities which awaited them if they did not repent, etc. Sometimes they were visited by pestilence and plagues, and sometimes by famine and war, until at length the Lord had punished the land some fifteen or sixteen hundred years) their wickedness became so great that the Lord threatened by the mouth of his prophets to utterly destroy them from the face of the land. But they gave no heed to these warnings; therefore the word of the Lord was fulfilled, and they were entirely destroyed—leaving their houses, their cities, and their land desolate; and their sacred records also, which were kept on gold plates, were left by one of their last prophets, whose names was Ether, in such a situation that they were discovered by the remnant of Joseph, who soon afterwards were brought from Jerusalem to inherit the land. This remnant of Joseph were also led in a miraculous manner from Jerusalem, in the first year of the reign of Zedekiah, king of Judah. They were first led to the eastern borders of the Red Sea; then they journeyed for some time along the borders thereof, nearly in a south-east direc-
tion; after which they altered their course nearly eastward, until they came to the great waters, where, by the command of God, they built a vessel, in which they were safely brought across the great Pacific Ocean, and landed on the western coast of South America. In the eleventh year of the reign of Zedekiah, at the time the Jews were carried away captive into Babylon, another remnant were brought out of Jerusalem, some of whom were descendants of Judah. They landed in North America, soon after which they emigrated into the most elevated and beautiful parts of South America. And thus, long before they were discovered by the remnant of Joseph, something like four hundred years after. The same records inform us that this remnant of Joseph, soon after they landed, separated themselves into two distinct nations. This division was caused by a certain portion of their descendants being greatly persecuted, because of their righteousness, by the remainder. The persecuted nation emigrated to the northern parts of South America, leaving the wicked nation in possession of the middle and southern parts of the same. The former were called Nephites, being led by a prophet whose name was Nephi. The latter were called Lamanites, being led by a wicked man whose name was Laman. The Nephites had in their possession a copy of the Holy Scriptures, viz. the five books of Moses and the prophecies of the holy prophets down to Jeremiah, in whose days they left Jerusalem. These Scriptures were engraved on plates of brass in the Egyptian language, and the Lamanites also engraved their history after their landing, on which they began to engrave their own history, prophecies, visions, and revelations. All these sacred records were kept by holy and righteous men, who were inspired by the Holy Ghost, and were carefully preserved and handed down from generation to generation. The Lord gave them the whole continent for a land of promise, and he promised that they and their children after them should inherit it, on condition of their obedience to his commandments; but if they were disobedient they should be cut off from his presence. The Nephites began to prosper in the land, according to their righteousness; and they multiplied and spread forth to the east, and west, and north—building large villages, cities, synagogues, and temples, together with forts, towers, and fortifications to defend themselves against their enemies. They cultivated the earth, and raised various kinds of food in abundance. They also tamed and domesticated many valuable and useful animals; and became a very wealthy people, having in abundance gold, silver, copper, tin, iron, etc. Arts and sciences flourished to a great extent. Various kinds of machinery were in use. Clothes of various kinds were manufactured; swords, scimitars, axes, and various implements of war were made, together with head-shields, arm-shields, and breastplates to defend themselves in battle with their enemies. In the days of their righteousness they were a civilized, enlightened, and happy people. But on the other hand, the Lamanites, because of the harshness of their hearts, brought down many judgments upon them and their posterity. Nevertheless, the Nephites, through the medium of the gospel, were saved from the wrath to come upon their descendants in the latter times. The Nephites knew of the birth and crucifixion of Christ by certain celestial and terrestrial phenomena, which at those times were shown forth in fulfillment of the predictions of many of their prophets. Notwithstanding the various things they had received, they had fallen into great wickedness, and had cast out the saints and the prophets, and stored and killed them. Therefore at the time of the crucifixion of Christ they were visited in great judgment: thick darkness covered the whole continent—the earth was terribly convulsed. In the sea there was a great commotion, and this commotion was turned into broken fragments, and afterwards found in masses and cracks upon all the face of the land—mountains were sunk into valleys, and valleys raised into mountains—the highways and level roads were broken up.
and spoiled—many cities were laid in ruins; others were buried up in the depths of the earth, and mountains occupied their place; while others were sunk, and waters came up in their stead; and others still were burned by fire from heaven. Thus the predictions of their prophets were fulfilled upon their head. Thus in the midst of wicked part, both of the Nephites and Lamanites, were destroyed. Thus the Almighty executed vengeance and fury upon them, that the blood of the saints and prophets might no longer cry from the ground against them.

Those who survived these terrible judgments were favored with the personal ministry of Christ; for after he arose from the dead, finished his ministry at Jerusalem, and ascended to heaven, he descended in the presence of the Nephites, who were assembled round about their temple in the northern parts of South America. He exhibited to them his wounded hands, side, and feet; commanded the law of Moses to be abolished; introduced and established the Gospel in its stead; chose twelve disciples from among them to administer the same; instituted the sacrament; prayed for and blessed their little children; healed their sick, blind, lame, deaf; and those who were afflicted in any way; raised a man from the dead; showed them his transfiguration; and his ascension, and established his Scriptures, which had been given from the beginning down to that time; and made known unto them all things which should take place down until he should come in his glory, and from that time down to the end, when all people, nations, and languages should stand before God; and that the last shall be first, and the first last. Thus the Nephites should pass away, and there should be a new heaven and a new earth. These teachings of Jesus were engraven upon plates, some of which are contained in the Book of Mormon; but the greater part are not revealed in that book, but hereafter are to be made manifest to the Nephites. After Jesus had departed from the Nephites, he ascended into heaven; and the twelve disciples whom he had chosen went forth upon all the face of the land preaching the Gospel, baptizing those who repented for the remission of sins, after which they laid their hands upon them, that they might receive the Holy Ghost. Mighty miracles were wrought by them, and also by many of the Church. The Nephites and Lamanites were all converted unto the Lord, both in South and North America, and they dwelt in righteousness above three hundred years; but towards the close of the fourth century of the Christian era they had so far apostatized from God that he suffered great judgments to fall upon them. The Lamanites for a time dwelt in South America, and the Nephites in North America. A great and terrible war commenced between them, which lasted for many years, and resulted in the complete overthrow and destruction of the Nephites. This war commenced at the isthmus of Darien, and was very destructive to both nations for many years. At length the Nephites were driven before their enemies a great distance to the north and north-east; and having gathered their whole nation together, both men, women, and children, they encamped on and round about the hill Cumorah, where the records were found, which is in the State of New York, about two hundred miles west of the city of Albany. Here they were met by the numerous hosts of the Lamanites, and were slain, hewn down, and slaughtered, both male and female—the aged, middle-aged, and children. Hundreds of thousands were slain on both sides; and the nation of the Lamanites was destroyed. A few who had deserted over to the Lamanites, and a few who escaped into the south country, and a few who fell wounded, and were left by the Lamanites on the field of battle for dead, among whom were Mormon and his son Moroni, who were righteous men.

Then by a record which is an abridgment from the records of his forefathers upon plates, which abridgment he entitled the Book of Mormon; and (being commanded of God) he hid in the hill Cumorah all the sacred records of his forefathers which were in his possession, except the abridgment called the Book of Mormon, which he gave to his son Moroni to finish. Moroni survived his nation a few years, and continued the writings, in which he informs us that the Lamanites hunted those few Nephites who were left, with a great and tremendous battle of Cumorah until they were all destroyed, excepting those who were mingled with the Lamanites, and that he was left alone, and kept himself hid, for they sought to destroy every Nephite who would not deny the Christ. He furthermore states that the Lamanites were at war one with another, and that the whole face of the land was wasted by murder, burning, robbing, and plundering. He continued the history until the four hundred and twentieth year of the Christian era, when (by the commandment of God) he hid the records in the hill Cumorah, where they remained concealed until by the ministry of an angel they were discovered to Mr. Smith, who, by the gift and power of God, translated them into the English language by the means of the Urim and Thummim, as stated in the foregoing. (See editorial criticisms below.) After the book was translated the Lord raised up witnesses to bear testimony to the nations of its truth, among whom were the very persons who send forth their testimony, which reads as follows:

"Be it known unto all nations, kindreds, tongues, and people unto whom this work shall come, that we, through the grace of God stand and point to you, and have seen the plates which contain this record, which is a record of the people of Nephi, and also of the Lamanites, their brethren, and also of the Jaredites, who came from the Tower of which hath been spoken; and we also know that they have been translated by the gift and power of God; and we have beheld them; which, of course, we knew of a surety that the work is true. And we also testify that we have seen the engravings which are upon the plates; and we have shown unto us the power of God, and not of man. And we declare, with words of soberness, that an angel of God came down from heaven, and he beheld before him the Lord and his glory, and he beheld and saw the plates and the engravings thereupon; and we also know it is by the grace of God, and we also know, and our Lord Jesus Christ that we beheld and bear record that these things are true, and it is marvellous in our eyes; and we do bear record unto all the world that we beheld and saw it, and bear record of it. Therefore we declare, according to the commandments of our God, that we bear witness of these things. And we know that the Lord God doth manifest himself unto all those who are upon the face of the earth; yea, he saith that he will be a father to orphans, and he will plead the cause of widow, and the honor be to the Father, and to the Son, and to the Holy Ghost, which is one God. Amen."

DAVID WHITMER,  
JACOB WHITMER,  
PETER WHITMER, Jr.,  
JOSEPH SMITH, Sr.,  
HERMAN PAGE,  
JOSHUA SMITH,  
SAM. H. SMITH."

Then follows the testimony of eight witnesses:

"Be it known unto all nations, kindreds, tongues, and people unto whom this work shall come, that Joseph Smith, Jr., the translator of this work, has shown unto us the plates of which has been spoken, which have the appearance of gold; and as many of the leaves as the said Smith has translated we did handle with our hands; and we also saw the engravings thereon, all of which has the appearance of ancient work and of curious workmanship. And this we bear record with words of soberness, that the said Smith has shown unto us, for we have seen and beheld, and know of a surety that the said Smith has got the plates of which we have spoken. And we declare, according to the commandments of our God, that we bear witness of these things unto the world, to witness unto the world that which we have seen; and we lie not, God bearing witness of it."

HORACE SMITH, Sr.,  
SAM. H. SMITH."

In the year 1829, Mr. Smith and Mr. Cowdery, having learned the correct mode of baptism from the teachings of the Saviour to the ancient Nephites, as recorded in the Book of Mormon, had a vessel to be baptized; but knowing that no one had authority to administer that sacred ordinance in any denomination, they were at a loss to know how the authority was to be restored; and while calling upon the Lord with a
desire to be informed on the subject, a holy angel appeared and stood before them, and laid his hands upon their heads, and ordained them priests of the order of Aaron. The vineyard was given to Smith and to the other, which they accordingly did. In the year 1830 a large edition of the 
Book of Mormon first appeared in print. As some began to peruse its sacred pages, the spirit of the Lord bore record to them that it was true; and they were obedient to its requirements, by coming forth humbly repeating before the Lord, and of the inhabitants in water for the remission of sins, after which, by the commandment of God, hands were laid upon them in the name of the Lord for the gift of the Holy Spirit. And on the 6th of April, in the year of our Lord one thousand eight hundred and thirty, the 'Church of Jesus Christ of Latter-day Saints' was organized in the town of Kirtland, Summit County, State of New York, North America. Some few were called and ordained by the spirit of revelation and prophecy, and began to preach and bear testimony, as the spirit gave them utterance; and although they were the weak things of the earth, yet they were strengthened by the Holy Ghost, and gave forth their testimony in great power, by which means many were brought to repentance, and came forward with broken hearts and contrite spirits, and were immersed in water confessing their sins, and were filled with the Holy Ghost by the laying on of hands, and saw visions and prophesied. Devils were cast out, and great healings were wrought in many healings of the heart, and the laying on of hands. Thus was the word confirmed unto the faithful by the signs following. Thus the Lord raised up witnesses to bear testimony of his name, and laid the foundation of his kingdom in the last days. And thus the hearts of the saints were comforted and filled with great joy.

Editorial Appendix and Cricetians.—Mr. Pratt's account stops with the organization of the Saints as an ecclesiastical body. We supplement it with the later history.

Joseph Smith seems at first to have had vague and confused ideas as to the nature and design of the Church he was about to establish until he found a convert in Sidney Rigdon, an able Campbellite preacher, then residing in Ohio. He was inclined to teach Millennium-ism and bring his flock over to the new faith. This settled Smith, and together they worked out a sort of Millenarian faith, in which at that time Western New York was imbued. It was not until the Campbellites and the Church of Jesus Christ of Latter-day Saints met that the idea of the millennium was abandoned, and that America was to be the final gathering-place of the Saints, who were to assemble at New Zion or New Jerusalem, somewhere in the interior of the American Republic. In forming this Church, they based their text and authority, they began to preach this new gospel; and Smith's family and a few of his associates, together with some of Rigdon's former flock, were soon enough in numbers to constitute a Mormon Church, which, as we have learned from Mr. Pratt's account, was organized April 6, 1830, at Fayette, N. Y. Though exposed to ridicule and hostility, the Saints continued to gather disciples. The publication of the Book of Mormon, and some alleged miracles and prophecies, attracted the people to the preaching of Smith and his companions, and at the first Conference of the Church, June 1, 1839, held at Fayette, N. Y., thirty members were present. Missionaries were new set apart, and every member was utilized, and in consequence the Saints were soon met with everywhere. Their missionaries were full of zeal, and converts gathered rapidly. Among them were Brigham Young, the two brothers Pratt, and Sidney Rigdon, the Campbellite preacher, who all became most efficient workers in Mormonism. Churches also were established in Ohio, Pennsylvania, New York, and even so far west as Indiana and Illinois. But with their growth persecution intensified, and the Saints finally turned their eyes westward for a permanent home. In the beginning of 1831 they established their head-quarters at Kirtland, Ohio, and everything pointed to it as the seat of the 'New Jerusalem's and Smith had a claim to the position, which they accordingly did. In the year 1830 a large edition of the Book of Mormon first appeared in print. As some began to peruse its sacred pages, the spirit of the Lord bore record to them that it was true; and they were obedient to its requirements, by coming forth humbly repeating before the Lord, and of the inhabitants in water for the remission of sins, after which, by the commandment of God, hands were laid upon them in the name of the Lord for the gift of the Holy Spirit. And on the 6th of April, in the year of our Lord one thousand eight hundred and thirty, the 'Church of Jesus Christ of Latter-day Saints' was organized in the town of Kirtland, Summit County, State of New York, North America. Some few were called and ordained by the spirit of revelation and prophecy, and began to preach and bear testimony, as the spirit gave them utterance; and although they were the weak things of the earth, yet they were strengthened by the Holy Ghost, and gave forth their testimony in great power, by which means many were brought to repentance, and came forward with broken hearts and contrite spirits, and were immersed in water confessing their sins, and were filled with the Holy Ghost by the laying on of hands, and saw visions and prophesied. Devils were cast out, and great healings were wrought in many healings of the heart, and the laying on of hands. Thus was the word confirmed unto the faithful by the signs following. Thus the Lord raised up witnesses to bear testimony of his name, and laid the foundation of his kingdom in the last days. And thus the hearts of the saints were comforted and filled with great joy.

In the autumn of 1831 a successful work was inaugurated at Independence, Jackson County, Mo.; and shortly after the revelation came that 'it was appointed by the hand of the Lord' that a colony of the Saints should be established in that part of Missouri. It is 'the Westward path of promise and the place for the city of Zion.' In a very short time nearly 1200 persons gathered in the place "where Christ would shortly reign in person." Land was largely bought; preaching was vigorously carried on; a printing-press was established; a monthly periodical (The Morning and Evening Star) and a weekly newspaper (The Upper Missouri Advertiser) were started to propagate the doctrines of the new sect; and it is only fair to the Mormons to state that a spirit of industry, sobriety, order, and cleanliness was everywhere visible. Account for it how we may, the Mormons were industrious, in their religion as in all other respects, industriously, far in advance of their neighbors. Smith himself, with many of the Saints as preferred to stay in Ohio until forced from it, continued to reside there, though, as we shall presently see, he was by no means stationary there, and was now in Ohio, now in Missouri, as the state of affairs required. In 1838 unsuccessful financial speculations obliged the Prophet also to withdraw, after having besides encountered persecutions from mobs. In Missouri also the Mormons early engendered opposition. Secret societies were formed a short time after their settlement to expel them from that region, their periodicals were stopped, their printing-press confiscated, their ministers tarred and feathered, and numberless other outrages were committed. Finally, in 1833 the hapless Saints were compelled to flee across the Missouri River, and men, women, and children had to encamp in the open wilderness on a winter night (see Farley's History of the Latter-day Saints). But the cruelty with which they were treated is a disgraceful page in American colonization history, and every true man has reason to regret the outrages perpetrated against these religious. They subsequently settled in Clay County, in the same state. Smith, when in Missouri, had been forced to flee, and was now a fugitive, and now assumed, besides the role of "prophet, peer, revelator, and translator," that of military leader of his people. A lengthened revelation was given in February, 1834, to raise "the strength of the Lord's house," and go up to Missouri to redeem Zion, and the Prophet became, by the election of a council of elders, "commander-in-chief of the armies of Israel." With a band of 150 men, the "Prophet" set out from Kirtland for Missouri. By the time he reached Missouri the little band had increased to 205; but they were intercepted by the settlers before they could effect a junction with the Saints in Clay County, and were badly maltreated in their schemes that the few faithful ones who were left, together with the Prophet himself, gladly enough returned to their home at Kirtland. Here, while recruiting from the trials of this warfare, Smith determined upon a more perfect organization of his adherents. In 1833 he had published for their spiritual guidance The Book of Doctrine and Covenants, and in May, 1834, had adopted as the formal title of his ecclesiastical body "The Church of Jesus Christ of Latter-day Saints." He now instituted the hierarchical organization to which the Mormons owe so large a measure their
success and perpetuity. As heads of the Church he appointed a presidency of three (and this remains the practice of the Mormons), assigning to himself the first place, and associating with himself the Rigdon of whom we have had occasion to speak before, and one Fred- erick G. Authorities say that on Oct. 4, 1837, he declared that the sins of Rigdon and Williams were forgiven, "and that they were henceforth to be accounted as equals with Joseph Smith, jun., in, holding the keys of his last kingdom." His own superiority the Prophet had declared to his followers as early as 1830 by special revelation, "which, after appointing him, treacher- ing, and putting to death the "elder of the Church," also demands that "the Church shall give heed to all his words and commandments which he shall give unto you; for his word shall ye receive as if from my own mouth, in all patience and faith." On Feb. 4, 1835, Smith selected his high council of twelve, and delegated these his apostles "to go unto all nations, kindreds, tongues, and people, to preach the Gospel of the New Covenant." They departed into the Eastern States, and later into Europe; the first in 1837 to England, where the first Conference of converts was held at Pres- ton, Lancashire, on Dec. 29th of that year. Everywhere this was the case, the prophet predicted. When the Temple at Kirtland was dedicated, over 1000 Mor- mons were gathered in that little town to witness the "sacred ceremony," and "to receive great blessings." The year 1837 was most auspicious one for the Saints, though for a time threatened their very life as an ecclesi- astical people. It was the year of the financial and political support of their "Gentile" associates by the mismanage- ment of mercantile affairs, so that the Prophet laid him- self open to the suspicion of deceit, double-dealing, and fraud. They also sustained several important aposto- cies from their ranks, one seceder being one of Joseph's councillors, and the others apostates in the kingdom. But while these trials awaited them at their own "Zion," the New Covenant was rapidly spreading in England, under the preaching of the apostles Orson Hyde and Heber C. Kimball, and the Saints received large acco- m modations to their numbers, especially from the masses in the great manufacturing and commercial towns—Man- chester, Liverpool, Leeds, Birmingham, Glasgow: and above all from the mining districts of South Wales, where Mormonism, in some places, almost competed for popularity with Methodism itself. Since then they have extended their strange evangelization to the East In- dias, and to the Pacific, to Brazil, to Tunis, to Turkey, and almost every country on the continent of Europe. In 1838 Kirtland was finally altogether abandoned, for, luckily for the Prophet, just at the mo- ment of his indictment for availing, etc., a new "re- velation" ordered his immediate departure for Missouri, which he promptly obeyed, with all the more alacrity as internal disorders had partially manifested them- selves also in Missouri, resulting in the expulsion of several influential members, among them David Whiter- mer, the second witness to the Book of Mormon, and Oliver Cowdery, the first convert by baptism. Smith's presence soon healed all internal disorders, but the con- flict between the Saints and the other Mormons be- came daily fiercer. The organized politicians, though guilty of fanatical extravagance in their faith, were yet so perfectly united in all their material undertakings as to make their prosperity almost a necessity, and this success annoyed the other settlers to such a degree that a constant warfare was maintained. The rapid increase of the Saints made them, moreover, a subject of suspi- cion, especially as they had declared it to be their in- tention to take Missouri as their earthly portion for an "everlasting possession." The Prophet, it was said, declared that he would yet trample on the necks of his enemies, and these had therefore every reason to fear his growing strength. Besides, it was known that a band of men had secretly organized to defend the first presidency by any means, fair or foul; and it is therefore not to be wondered that there was constant quarrelling and fighting between Saints and Gentiles, until the contest amounted to civil war, and called for the interference of the state authorities. That such a step was really necessary became clearly apparent when, in the summer of 1838, Thomas B. Marsh, a presi- dent of the Mormon Apostolic College, and Orson Hyde, one of the twelve apostles, and now (1875) again a faithful "Saint," made before a justice of the peace in Ray County, Mo., an affidavit in which it is declared that "They (i.e. the Mormons under Smith) have among the members of the company consisting of all that are con- sidered true Mormons, many in the army of the state, and a few have taken an oath to support the heads of the Church in all things that they say or do, whether right or wrong. . . . The plan of said Smith, the Prophet, is to take this state; and he professes to his people to intend taking the United States, and ultimately the whole world. This is the belief of the Church, and my own (i.e. March's) opinion of the Prophet's plan and intentions. . . . The Prophet inculcates the notion, and it is believed by every true Mormon, that Smith's prophecies are su- perior to the law of the land. I have heard the Prophet say that he would yet tread down his enemies and walk over them in blood. In a later interview he told the temple at Kirtland was dedicated, over 1000 Mor- mons were gathered in that little town to witness the "sacred ceremony," and "to receive great blessings." The year 1837 was most auspicious one for the Saints, though for a time threatened their very life as an ecclesi- astical people. It was the year of the financial and political support of their "Gentile" associates by the mismanage- ment of mercantile affairs, so that the Prophet laid him- self open to the suspicion of deceit, double-dealing, and fraud. They also sustained several important aposto- cies from their ranks, one seceder being one of Joseph's councillors, and the others apostates in the kingdom. But while these trials awaited them at their own "Zion," the New Covenant was rapidly spreading in England, under the preaching of the apostles Orson Hyde and Heber C. Kimball, and the Saints received large acco- mmodations to their numbers, especially from the masses in the great manufacturing and commercial towns—Man- chester, Liverpool, Leeds, Birmingham, Glasgow: and above all from the mining districts of South Wales, where Mormonism, in some places, almost competed for popularity with Methodism itself. Since then they have extended their strange evangelization to the East In- dias, and to the Pacific, to Brazil, to Tunis, to Turkey, and almost every country on the continent of Europe. In 1838 Kirtland was finally altogether abandoned, for, luckily for the Prophet, just at the mo- ment of his indictment for availing, etc., a new "re- velation" ordered his immediate departure for Missouri, which he promptly obeyed, with all the more alacrity as internal disorders had partially manifested them- selves also in Missouri, resulting in the expulsion of several influential members, among them David Whiter- mer, the second witness to the Book of Mormon, and Oliver Cowdery, the first convert by baptism. Smith's presence soon healed all internal disorders, but the con- flict between the Saints and the other Mormons be- came daily fiercer. The organized politicians, though guilty of fanatical extravagance in their faith, were yet so perfectly united in all their material undertakings as to make their prosperity almost a necessity, and this success annoyed the other settlers to such a degree that a constant warfare was maintained. The rapid increase of the Saints made them, moreover, a subject of suspi- cion, especially as they had declared it to be their in- tention to take Missouri as their earthly portion for an "everlasting possession." The Prophet, it was said, declared that he would yet trample on the necks of his enemies, and these had therefore every reason to fear his growing strength. Besides, it was known that a band of men had secretly organized to defend the first presidency by any means, fair or foul; and it is therefore not to be wondered that there was constant quarrelling and fighting between Saints and Gentiles, until the contest amounted to civil war, and called for the interference of the state authorities. That such a step was really necessary became clearly apparent when, in the summer of 1838, Thomas B. Marsh, a presi- dent of the Mormon Apostolic College, and Orson Hyde, one of the twelve apostles, and now (1875) again a faithful "Saint," made before a justice of the peace in Ray County, Mo., an affidavit in which it is declared that "They (i.e. the Mormons under Smith) have among the members of the company consisting of all that are con- sidered true Mormons, many in the army of the state, and a few have taken an oath to support the heads of the Church in all things that they say or do, whether right or wrong. . . . The plan of said Smith, the Prophet, is to take this state; and he professes to his people to intend taking the United States, and ultimately the whole world. This is the belief of the Church, and my own (i.e. March's) opinion of the Prophet's plan and intentions. . . . The Prophet inculcates the notion, and it is believed by every true Mormon, that Smith's prophecies are su- perior to the law of the land. I have heard the Prophet say that he would yet tread down his enemies and walk over them in blood. In a later interview he told the
offices as gave him entire control of the place, and made him safe from all persecution of the Missourians, in case they should attempt to take him back into their own state for punishment. He enjoyed, moreover, making military displays. Thus, on April 6, 1841, when the cornerstone of the grand Temple was laid, the Prophet appeared at the head of his military legion, and in the local papers of that time is only spoken of in his military capacity. A special revelation had demanded the building of the Temple, which was to be on a far grander scale than the edifices in Ohio or Missouri (see Doctrines and Covenants, sec. 103). Another revelation had summoned all converts to Nauvoo, bringing with them "their gold, their silver, and their precious stones" (see Doctr. and Con., sec. 103). Still another revelation now ordered a mansion-house to be begun, where the Prophet and his family were to be lodged and maintained at the public cost. "Let it be built in my name, and let my servant Joseph Smith and his house have place therein from generation to generation, saith the Lord, and let the name of the house be called the Nauvoo House, and let it be a delightful habitation for man" (Docotr. and Con. sec. 103). Thus the spiritual and temporal power of Smith increased until he found himself absolute ruler of over 20,000 persons, besides having many spiritual adherents in the different parts of this vast country, and no less than 10,000 in Great Britain. Smith's head was so far turned by his success that in 1844 he offered himself as a candidate for the Presidency of the Union. Probably, however, this proceeding was only meant as a bravado. In Nauvoo itself he reigned supreme. The contributions of his votaries and the zeal of their obedience fed his appetite for riches and power. But opposition gradually sprung up; and though it was obliged to be itself for a while and could only be nourished secretly, it was yet growing, and it soon was rumored among the Saints that Smith failed to restrain himself from the indulgence of more sensual passions, which ease and indulgence had bred. As early as 1838 the Prophet, it is affirmed, had commenced to practically carry out his doctrine of that "Celestial Marriage" (see below, p. 627 sq.), or of a "Plurality of Wives:" but it was not till July, 1843, that he formally received a revelation on the subject authorizing polygamy. When the "revelation" became public, considerable indignation was felt even in Nauvoo, and serious disturbances took place. Several women whom Joseph and his apostles had taken a fancy to, and sought to win over under the new revelation, declined their proposals, and disclosed them to their relatives. These circumstances roused into activity a latent spirit of resistance which had for some time been secretly gathering force. The malcontents felt themselves strong enough to hear the lion in his own den; they denounced Mormonism, and even ventured to establish an opposition paper, called the Expositor, and published in its first number the affidavits of sixteen women, who alleged that Smith, Rigdon, Young, and others, had invited them to enter into a secret and illicit connection under the title of spiritual marriage. This open and dangerous rebellion was put down forthwith by the application of physical force. Joseph Smith ordered a body of his disciples to "abate the nuisance," and they razed the office of the Expositor to the ground. The proprietors fled for their lives, and when they reached a place of safety was cut out a writ from the legal authorities of Illinois against Joseph and Hyrum Smith as abettors of the riot. The execution of the warrant was resisted by the people and troops of Nauvoo, under the Prophet's authority. On this the governor of the state called out the militia to enforce the law; and the ultimate result was that the Prophet and his brother Hyrum were thrown into prison at Carthage. After a short time it began to be rumored, however, that the governor of the state was desirous of letting the two Smiths escape, and thereupon a band of "roughs," about 200 in number, broke into the jail, June 27, 1844, and shot them (see accounts of eye-witnesses in Burton, appendix iii; Mackay, p. 359 sq.). The sudden removal of their leader and the manner of his death caused great agitation among the Mormons, and they were much confused for a while. This status led the people of Illinois to the belief that the sect would rapidly be broken up. The opinion seemed at first reasonable. There was much disputing as to the successionship, and it seemed very likely that the Church would thus be shattered into fragments. There were four claimants, and it was doubted whether any one of them could be persuaded to yield. And yet order was soon brought out of all this chaos, and disaster as this termination of his career was to Smith himself, it proved a most fortunate thing for the system which he founded. "The blood of the martyr is the seed of the Church." A halo of solemn and tender glory now encircles the memory of one who, whatever were his virtues or vices, stood greatly in need of this spiritual transfiguration. As Burton tells us, the Saints came to revere the name of Smith beyond that of any other name. They speak of him "with a respectful veneration, sotto voce, as Christians name the founder of their faith." Brigham Young had been Joseph's favorite. He was known to have been such by the apostolic college, of which he was chairman, and he was therefore chosen Joseph's successor by a unanimous vote of that body. The choice made by the highest council, the Mormons had been taught, no one should gainsay.

Nauvoo Temple.
and consequently it was accepted by the great majority of the inhabitants of Nauvoo, and approved of by a general Council of the Church, summoned about six weeks after Joseph’s death. The other pretenders were excommunicated, and the council even ventured to “deliver over to Satan” the great Rigdon himself, one of the aspirants, although their sacred books declared him equal with the Prophet; who had, however, latterly shown a disposition to slight and humiliate him. The Mormons throughout the world acquiesced in all these decisions, and Brigham Young was established in the post of “seer, revelator, and president of the Latter-day Saints.”

This manifestation of complete organization aroused the people of Illinois once more to a sense of the danger of constant strife with the settlers at Nauvoo. In 1845 the state Legislature revoked the charter given to the city of Nauvoo, while the citizens banded together for possible contingencies. Open and severe hostility against the Mormons was frequent, and henceforward it was evident that while they continued to inhabit Nauvoo they must live in a perpetual state of siege, and till their fields with a plough in one hand and a rifle in the other. Moreover, experience had shown that elements of disunion existed even among themselves. So long as they were established in any of the settled states they could not exclude unbelievers from among them. There must always be Gentile strangers who would intrude among the Saints for Lucifer’s sake, and form a nucleus around which disappointed or traitorous members might rally and create internal conflict. This could only be avoided by the transplantation of the Mormon commonwealth beyond the reach of foreign contact. Actuated by these reasons, the leaders who met to deliberate on the steps demanded by the crisis came to a decision which, adventurous as it then seemed, has since proved no less wise than bold. They resolved to migrate in a body far beyond the boundaries of the United States, and to interpose a thousand miles of wilderness between themselves and the civilized world. In the fastnesses of the Rocky Mountains, the Alps of North America, they determined to seek that freedom, civil and religious, which was denied them by their countrymen. In a hymn composed for the occasion, they express this Mormon resolution as follows:

“We’ll burst off all our fetters, and break the Gentile yoke; For long it has beset us, but now it shall be broke. We shall bow Jacob’s bow in Extermination. Henceforth he shall be great and free In Upper California. Oh, that’s the land for me! Oh, that’s the land for me!” (Hymns, 305.)

Their decision was announced to the Saints throughout the world by a General Epistle, which bears date January 20, 1846. It was also communicated to their hostile neighbors, who agreed to allow the Mormons time to sell their property, on condition that they should leave Nauvoo before the ensuing summer. A pioneer party of sixteen hundred persons started before the conclusion of winter, in the hope of reaching their intended settlement in time to prepare a reception for the main body by the close of autumn. Agricultural operations were commenced almost the instant they reached the shores of the Salt Lake. “The cheerfulness, intelligence, and zeal exhibited on all sides,” it has been justly said, “were truly admirable. The world has never seen swifter, more active, more glad-hearted colonists than these singular Saints. It would be unfair to shut our eyes to such facts. In judging Mormonism, we must keep these constantly in view to prevent us from forming mere abstract and theoretical decisions, which will not in the least affect the future of Mormonism.” Brigham himself arrived in the valley July 24, 1847, and the main body of the Mormons in the autumn of 1848. The Salt Lake City was soon founded; public buildings, including a tabernacle, or temporary place for public worship, promptly built; manufactories and shops were also soon reared, an emigration fund established, and in a little while settlers poured in from all parts of Europe and America; and perhaps a greater amount of physical comfort was enjoyed here than in any part of the world. As early as March, 1849, a convention was held at Salt Lake City, and a state organized under the name of Deseret, a word understood by the Mormons to signify “the land of the honey-bee” (Ether, Book of Mormon, ch. i, § 8, p. 518). A Legislature was elected, and a Constitution framed and sent to Washington. Congress, however, refused to recognize the new state, and in September organized the country occupied by the Mormons into the Territory of Utah, of which Brigham Young was appointed governor by president Fillmore. District judges were also appointed by the federal government, but these were looked upon with great suspicion and mistrust by the Saints, who finally drove them out of the country in 1851, and openly defied and subverted the laws of the United States. In 1852 the “celestial law of marriage,” authorizing polygamy, was promulgated and at once acted upon, notwithstanding that in 1845 the heads of this self-same religious body had deemed it prudent to put forth a formal denial of any such phase of faith or practice in the following words: “Inasmuch as this Church of Christ has been reproached with the crimes of fornication and polygamy, we declare that we believe that one man should have but one wife, and one woman but one husband, except in the case of death, when either is at liberty to marry again.” In 1853 the corner-stone of the great Temple, the plan of which, with all its details, was “revealed” to president
Young, was laid, so sure felt the Mormons that they had finally reached a spot where they could defy all opposition, and enjoy unmolested their most extravagant religious or social notions. The United States government had no disposition to interfere with these, but it felt itself outraged in the removal of its officers, and in 1854 a United States colonel arrived at Salt Lake City to become the successor of president Young as governor of the territory. This officer, however, encountered so much opposition that he found it expedient, after wintering in Salt Lake City without receiving the governorship, to formally resign his post, and he removed with his battalion of troops to California. No wonder that Young declared in a sermon to his people, "I am and will be governor, and no power can hinder it until the Lord Almighty says, 'Brigham, you need not be governor or any longer.'" During the next three years the collisions between the United States officers and the Saints became more and more frequent, and in the spring of 1856 the whole of the former were forced to flee from the territory. A new appointment was finally made in 1857 by the Washington government, and the appointee, accompanied by 2500 picked United States troops, sent to enforce order and submission to the United States laws. The Mormons were greatly exasperated against the federal government by this action, but were finally overawed; and after a proclamation granting pardon to all Mormons guilty of treachery, etc., the Saints submitted, and permanent peace was established. In 1871 some of the Mormon leaders were indicted under the United States laws against bigamy, in order to force the Mormons to abandon the institution of polygamy. More recently president Young himself has been indicted, and mainly for the self-same purpose, though avowedly on a charge of conspiracy and murder, and has escaped trial only because of some informality or uncertainty respecting the constitution of the court. By the Saints this result is looked upon as of providential interference. The proposition, it is asserted, has been semi-officially made, as from him, to abandon polygamy, on condition that the United States government recognize the legitimacy of children heretofore born of polygamous marriages. This does not seem, however, in harmony with their printed declarations in very recent times. The Mormons in these assert their resolve to resist to the death all attempts to put down polygamy, and their firm belief that God will work miracles for them, as for his ancient saints, the Jews. (See Millennial Star, vol. xxxii, passim, esp. p. 328. Comp. Rae, Westward by Rail, p. 116.) Mr. T. H. H. Stenhouse, formerly a Mormon elder and missionary, and editor of a Mormon paper, has issued a history of Mormonism, whose revelations of the internal workings of Mormonism are made impressive by the calmness and moderation of his language, and the official and indisputable evidence which he has with assiduity gathered to sustain his revelations. He insists upon it that the Mormons are not really in favor of polygamy, and will gladly give it up if they can be made to see that it is not an essential religious ordinance. By others, however, equally well informed, it is rumored that Brigham Young is preparing for another exodus of the entire community to regions yet more remote from the incursion of civilization, which has so completely changed the character of Salt Lake City in the last five years. It will be borne in mind that in 1869 the Pacific Railroad opened up the country, so that it is no longer cut off from civilization. Gentiles take up their residence in Salt Lake City freely, and have not the fear of their lives which was formerly, justly or unjustly, entertained; missionaries are preaching the Gospel of Jesus Christ in the midst of the people, and there is no dread of any power able to stop them. MORMONS

eral Protestant Christian churches have been organized there (1872), and a recent movement among the Mormons themselves, began in 1889, and denominated as a body, the "Church of Zion," represents the religious movement, "the Liberal Institute," repudiates the authority of Brigham Young and the hierarchy; and though, like all reactions from priestly authority, its tendency is unmistakably towards flagrant infidelity, for it advocates freedom of thought and action, it is nevertheless a sign of the weakening of the entire system. See Kea, Wess- oued by Reed, p. 157 sq.; <i>Olive's Breeze from the Great Salt Lake</i>, p. 82-90; Stenhouse, ch. iv sq.

II. Sacred Writings of the Mormons.—(1). Their most important publication is of course the Book of Mormon, a work which, as it professes to be a new and more recent revelation than the Bible, is placed above the latter in the scale of value. Indeed, in its published form it is a duodecimo volume of 563 pages of small print. (The edition here referred to came to us from Mr. Young himself, and was printed at Salt Lake City in 1871.) It is divided, in imitation of the Old Testament, into fifteen books, of unequal length, bearing the names of their supposed authors—Nephi (comp. 2 Macc. 3, 30), Jacob, Enos, and the like—professing to have been written (see p. 619) at different periods, each book being divided into chapters and numbered paragraphs. We insert a list of contents for fuller information:

**First Book of Nephi**

**Second Book of Nephi**

**Book of Jacob**

More than one wife forbidden. Trees, waves, and mountains obey us. Jewels found beyond the mark. Olive tree. Nearest part of the vineyard. Fruit laid up against the season. Eunus, thy sins are forgiven.

**Book of Enos**

Records threatened by Lamanites. Lamanites eat raw meat.

**Book of Jarom**

Fortify cities. Plates delivered to Omri of Omri.

**Book of Alma**

Coriandrum discovered. His parents came from the Tower. Plates delivered to King Benjamin.

**False Christs and Prophecy**

Moabites made king, and received. The plates of brass, sword, and director. King Benjamin teacheth the people. Their tent-doors towards the temple. Coming of Christ foretold.

**Book of Zephaniah**

**Book of Alma**

MORMONS

by the aid of the "Urim and Thummim" the English version was obtained. According to the Mormon authority, the book was placed in Smith's hands in the reformed Egyptian language, and we are also told that the way in which Smith translated was as follows: He sat behind a blanket hung across the room to keep the sacred records from profane eyes, and read off, by the help of the Urim and Thummim," to Oliver Cowdery, of whom we have had occasion to speak before, who wrote down what the invisible "Prophet" gave as a translation, Smith himself being, as he confesses, but a "poor writer." A farmer by the name of Martin Harris supplied Smith with the necessary funds to get the work printed. But before he so supplied Smith he went to New York to consult the late Prof. Anthon regarding the correctness of the Prophet's translation, and took with him a copy of the characters on one of the plates. The Mormons assert that the professor declared the characters to be Egyptian, Chaldaic, Assyrian, and Arabic, and asked to see the original (Pearl of Great Price, p. 42). But, according to gentle authority, Prof. Anthon pronounced the extract furnished him to consist "of all kinds of crooked characters, disposed in columns, and evidently prepared by some person who had before him at the time a book containing various alphabets. Greek and Hebrew letters, crosses and flourishes, Roman letters, inverted or placed sideways, were arranged and placed in perpendicular columns, and the whole ended in a rude delineation of a circle divided into various compartments decked with various strange marks, and evidently copied after the Mexican calendar given by Humboldt, but copied in such a way as not to betray the source whence it was derived," and warned Harris against being the victim of roguery (Letter in Mackey, p. 32-34). A fac-simile, alleged to be identical with that shown to Prof. Anthon, is published in the Millennial Star (xxv, 540), and is here reproduced. It will be noticed by the philological student that these characters have no resemblance to any existing ones, and are like nothing else but the scratches made by children for amusement when they begin to learn writing. Harris, however, lost not his faith by Prof. Anthon's persuasions, and, returning to Smith, continued to assist the preparation of the English version of the Book of Mormon until about 116 pages had been completed. The MS. of these Harris one day took to his house to show to his wife, probably to satisfy her that the money which he was furnishing for Smith's support, and which he was expecting to supply for its publication, was well-spent. Herself a non-believer, she connived with others for the secret removal of the MS. On this the "Prophet" produced a "revelation" ordering him not to retranslate the portion lost in the English version, lest the wicked, finding the two translations to differ, should scoff at God's work (Doctr. and Cor. xxxvi, p. 178 sq.). Shortly after Harris was moreover succeeded in his position as scribe by Oliver Cowdery, but he remained faithful to Smith; and when the work was ready for publication he furnished, as we have stated, all needed pecuniary aid, having even, in obedience to a revelation (Doctr. and Cor. xlvii, 3, p. 194-5), sold his farm to procure means for this purpose. In 1830, finally, the Book of Mormon appeared, accompanied, as has been stated above by Mr. Pratt, with a declaration from eleven persons that they had seen the original plates from which this version had been prepared. This statement was necessary, as these were the only persons so privileged. No other human being has ever seen them. Like Macpherson's Ossianic MSS., they have nearly decayed, been corromposed, burned, spoiled, and of late years all knowledge of them has become traditional. The Mormons declare that no one else was allowed to see them; and Joseph himself informs us that after he had "accomplished by them what was required at his hand," ..., "according to arrangements, the messenger called for them, and he [the angel] has them in his charge until this day" (Autobiog, ch. xiv).

MORMONS

after the death of the last of these American seers (comp. Stenhouse, p. 538-545). Besides, Gentile polemics have brought forward evidence to show that, with the exception of certain illiterate and ungrammatical interpolations bearing on religious matters, the so-called Book of Mormon was really borrowed or copied nearly verbatim from a MS. romance written by an anonymous dead alien named Solomon Spaulding, who was born at Ashford, Conn., in 1761, and was educated at Dartmouth College (class of 1783), and who died in 1816 at Amity, Pa. It is unnecessary to go over the arguments pro and con. Suffice it to say, that anti-Mormons generally think them conclusive, while the "Saints" consider the whole story of Spaulding's romance a gratuitous and scandalous fabrication. There is unquestionable evidence that the said Spaulding did write something about the ancient inhabitants of America; that his MS. was intrusted for publication in 1812 to a bookseller named Paterson at Pittsburgh, Pa.; and that Spaulding dying before publication, the MS. remained in Pittsburgh, where a copy of it was made by Sidney Rigdon, then one of Paterson's composers, but afterwards the associate of Joseph Smith in the promulgation of Mormon doctrines; and it is furthermore asserted by one of Spaulding's brothers, from his recollection of portions of the MS., that it was identified by Sidney Rigdon as the "Book of Mormon," and that it was indeed the bona-fide work of his deceased brother; this statement being sustained by several of Mr. Spaulding's friends from their remembrance of the readings to which they had frequently listened. It is therefore conjured by anti-Mormons that Rigdon (into whose hands Spaulding's romance was supposed to have fallen for some time) gave it to his new associate to further his purposes when he joined him in 1829, and that the latter—in whose soul there may have been some rude and gross religious notions and feelings—devised the ungrammatical interpolations. This theory assumes some probability from the fact that these religious notions were in the fashion of the times, and that New England was the Mecca of folk-tales with their survivals of the practices of an ancient ritual, but to quite modern questions, such as interested the people of Western New York about 1830. Calvinism, Universalism, Methodism, Millenarianism, Roman Catholicism are discussed, if not in name, yet in reality. But those who accept such statements as the true solution of the origin of this book must necessarily conclude that Joseph Smith was "a deliberate falsifier and wilful impostor." The most incisive writer on this subject—John Hyde, jun. (Mormonism, its Leaders and Disciples), formerly a Mormon elder—unhesitatingly announces this as his own conviction. Yet there is another position if it is considered that the Book of Mormon was in preparation for publication when Smith first met Rigdon, and that he was already noted as the discoverer of the gold plates. We cite the comments on this great question by Mr. Stenhouse, who, as he was himself once a believer, is most likely to know whereof he speaks. He says:

"To conclude that there was 'wilful imposture in the origin of Mormonism, is, in an argumentative sense, to 'take arms against a sea of troubles' to white them is no limit. There is, however, an easy solution of the difficulty respecting the origin of the book—i.e., to admit honest credence in Joseph Smith, in those persons who 'witnessed the practices of a ritual of a primitive cult' to which his life was dedicated. It admits the claim of honesty in Joseph Smith and in his 'witnesses,' and equal honesty in those who have received the testimony of Joseph Smith, in those persons who 'witnessed his communications with the authority of absolute and divine truth, the acceptance or rejection of which was to be the salvation or damnation of the world,' it was simply the operation and assertion of that yet uncomprehended mystery that has always served to divide the good and bad men in all ages and in all countries within the historical ken of man. With the developments which have followed the advent of the Second Coming of Jesus Christ, the mystery has been somewhat understood. He was but the vehicle of 'spirit communication,' and the book was to show the need for the Second Coming, whether or deliberate fraud, but in the native honesty of his simple nature he believed too much. . . . It does not seem possible for him to have seen himself in the light of a criminal life of persecution, and have lived and died maintaining the truth of his story, if the book had been a fraud. . . . That summing up the whole indictment against Joseph Smith, the only essential and authentic object in the book, the plates and the tablets, and that they did so for a purpose—whatever that might be—is very possible. The relics of the book, the tablets, the sculptured masonry, the masks, the plate-graves, the other person's besides Joseph Smith have discovered in the ground similar specimens, bearing evidence of a great and extended life as time. Is it not probable that we may be many similar discoveries. There need be no difficulty, then, in accepting Joseph's story of finding the plates; it is what is claimed to be the contents of the plates that is incredible.

If even living person fabricated for Joseph Smith the Book of Mormon, and if Joseph did not use the manuscript of Solomon Spaulding, the Mormon may very properly ask, 'Who, then, was the author of the book?' To this query the Book of Enoch is the answer. See chapter 12 of the preceding chapter, the Prophets' 'translation' of the papus found with the Egyptian mummies is evidently true; yet were such an act as that, it was done by 'the gift of God,' believed he giving a truthful translation. The scientific says that the whole story is untrue; that the Book of Mormon is a forgery. The history of the romance; that the hieroglyphics had no more allusion to the Abrahamic than to the other tribes of Israel; that Abraham the martyred president of the United States. When Joseph Smith translated the Book of Mormon by the means of the divine power, the Book of Mormon 'Egyptian' was evidently not transformed before his eyes into the translated text, or the gift of God being used pecuniarily had English. He gazed upon the tables and Thummim until his mind became psychological, and the impressions that he received he dictated to his scribe. With such a conclusion, the bitterest enemies of Mormonism, the book, the quotations from the Old and New Testaments, and the language of modern preachers and writers are accounted for. There is no mark of any personal or human life as clairvoyance, in which persons are strangely operated by personal and public impressions. In his natural eye is a mirror; but it does not follow that the interpretation which any of them put upon their experience is itself true. They may be that they themselves are simply witnesses, dreams, the ministering of angels, and have heard the 'voice of God,' all witnessing to the truth of the divinity of Mormonism, for all this has been asserted again and again by very many others besides Joseph Smith—men, and women too, who have claimed to have received divine visions in those moments of exaltation. Also, there are tens of thousands of men and women—sober, reliable, and distinguished persons—persons who have been brought with unchangeable convictions as ever the Mormons had that they have personally experienced all these extraordinary and divine revelations and visions, and with all this class of believers is, not in what they have experienced, but the after-interpretation that they may have been given by the person or persons or classes of persons in the world who have believed and asserted that to them, and to them only. God gave visions, dreams, angel-writings, or god-writings for the use of 'evil devils,' and they have declared that these were proofs of the heavenly origin of the faith which they proclaimed, and this it is that has been the fundamental basis of the modern apostles to regard as special and particular to them, while the Mormons—by the exercise of their divine and religious experience of all the world, and is an evidence of nothing more than a certain condition of mind that rever- ences such 'visions and revelations,' and that it is naturally to receive them. . . . That Joseph thought Mo- roni and some of those ancient personages whom he mentions in his book to be the persons that they used him for their purposes Spiritualists all be-
MORMONS 633  MORMONS

and when the origin of some of the great religions of the world is considered, there is no such cause for wonder that those persons who have accepted Mormonism, with all its crudities, should have honestly believed it. Millions have accepted Mohammed and his visions; millions more have lived and died in the faith of Buddha; Confucius has swayed a spiritual empire from ages long before the Christian era; and by these and other founders of religious systems, and by many of their disciples, visions and revelations, gifts and miraculous powers, have all been claimed" (Rocky Mountain Saints, p. 566-566).

To this solution of the question we are disposed substantially to accede, with this exception, that we would refer the mental impression of visions, revelations, etc., to the hallucinations of an excited imagination rather than to clairvoyance or any other so-called spiritual influence or communication.

It may not be out of place here to add that Joseph Smith, while discredited among his own townsmen, elicited the testimony that from an early period he was regarded as a visionary and a fanatic. This fact is of the utmost importance as affording a clew to his real character, and an explanation of that otherwise unaccountable tenacity of purpose and moral heroism displayed in the midst of fierce persecution. A mere impostor—i.e., a person who did not, in some sense or other, partly believe in his own mission, but who, on the contrary, felt that he was simply the liar and cheat that people called him—would have broken down under such a tempest of opposition and hate as Smith's course excited.

(2.) The chief authority on Mormon doctrine is The Book of Doctrine and Covenants of the Church of Jesus Christ of Latter-day Saints, selected from the Revelations of God, by Joseph Smith, president. "This work is to the Mormon Bible," says Burton (p. 447 sq.), "what the Vedanta is to the Vedas, the Talmud to the O. T., the Traditions to the Gospel, and the Ahasis to the Koran—a necessary supplement of amplifications and explanations." The first edition, published in 1833, differs much from the later ones, and was subsequently suppressed. The work consists of two distinct parts: p. 1-54 contain seven lectures on faith, originally delivered before a class of elders at Kirtland, and it seems probable that they were written by Rigdon, who was really the theological founder, though he is only recognized as the literary assistant (Doctr. and Cov. sec. ii). In them are some very curious statements; and it is believed that whatever there is in it of materialism was introduced by Rigdon, and with it many other strange departures from the theology of the Book of Mormon, and that it is inferred in the Doctr. and Cov., from Heb. xi, 3, that faith is "the principle of power existing in the bosom of God by which the worlds were framed, and that if this principle or attribute were taken from the Deity, he would cease to exist" (Lect. i, 18-17, p. 5). Again: "When a man works by faith, he works by mental exertion instead of physical force. It is by words, instead of exerting his physical powers, with which every being works by faith" (Lect. vii, 3, p. 55). Many other peculiar doctrines are here set forth. The second part, entitled Covenants and Commandments, consists of the revelations given to Smith at various times, and is evidently by a different hand from the Lectures. The style and grammar betray the editor of the English version of the Book of Mormon. The Covenants and Commandments resemble in form the Koran: both works contain divine revelations; much in both is only of temporary interest, and both afford undesignated materials for the life of their authors. But all the merits of the Koran are absent and all its defects present in the work of Joseph Smith. The revelations were given to a great number of persons, but always through the medium of Joseph Smith. They refer to various subjects: the organization, worship, and hierarchy of the Church; instructions in faith and morals, prophecies, visions, parables, interpretations of Scripture, directions to individuals about their acts, preachings, journeys, for the promotion of the faith, and concerning the affairs and needs, spiritual and temporal, of the Church. There are also two addresses of the Prophet to the Saints in Nauvoo, delivered in writing only: minutes of the High Council (February 17, 1834), declarations of the Church on marriage and governments, and an account of the martyrdom of Joseph Smith and his brother. Those sections relating to the organization of the Church and the duties of the ministry are placed first, then the portions chiefly treating of faith and practice; lastly, those that relate mainly to individuals and to temporary circumstances.

(3.) Many other revelations, translations, prophecies, addresses, etc., of Smith were published in the periodicals of the sect, all of which are regarded as of authority. Some of these have been collected into a pamphlet, entitled The Pearl of Great Price, being a choice Selection from the Great Revelations, Translations, and Narrations of Joseph Smith (Liverpool, 1831). In this book is set forth the theory that Mormonism is the revival of the primitive religion revealed to Adam (see also Doctr. and Cov. Lect. i, p. 8 sq.; Covensants and Comm. iii, 18-29, p. 78). A similar theory is found in the Koran. There we find a translation, with facsimiles, of some Egyptian papyrus rolls, procured from a travelling showman. Smith declared these rolls to be written by Abraham, narrating his stay in Egypt. An eminent French Egyptologist, M. Deveria, of the Museum of the Louvre at Paris, before whom the facsimiles were laid, showed that they represent the

Interior of the Mormon Tabernacle.— (From Stenhouse.)
resurrection of Osiris, a funerary disk, and a painting from a funerary MS. This deviation of M. Deveria's translation from Smith's would naturally again lead to the supposition that the would-be prophet intentionally played off a fictitious translation as an exact rendering of the original papyri. This theory need not, however, be espoused, as has been well shown by Mr. Stenhouse:

"With the Prophet's story of the supposed Book of Abraham and its side work written in imitation of the papyrius by the scientist, the reader may possibly conclude that Joseph Smith imposed upon the credulity of the Saints, and hence that the claim throughout this work that Joseph was sincere is here unsupported. The author, notwithstanding, still clings to the assertion that Joseph believed sincerely that he was inspired, and the present volume is thus published to show that the world supports that conclusion. Had he ever doubted the correctness of his translation, he never would have given to the public the face-simile of the characters and his translation of them. Joseph Smith at this time was over thirty years of age, and had passed through too rough an experience to have risked his reputation upon anything about which he had the slightest doubt. If the translation of the scientist is correct, and it bears upon its face evidence to that effect, then Joseph was as much deceived as many others have been before he did upon a new claim to the possession of divine and supernatural powers and revelations."

Those who may be interested in these Egyptian antiquities and the variability of the two translators will do well to consult Stenhouse, p. 512 to 519. The Pearl of Great Price contains also two different accounts of the book, both made up of Gen. i. A translation is given of Matt. xxiii., 39, and xxiv, differing from the Authorized Version in containing additions to the extent of one third, entirely unsupported by any MS. or version. There are some other fragments, absurd but important, except as showing the audacity of the author. The "translators" are portions of a translation of the whole Bible, said to exist in MS. in the hands of the Mormon leaders. Some further extracts have appeared in periodicals; the text is altered to suit Mormon doctrines, and large additions made. It is asserted by the Mormons that the Authorized Version has been fraudulently corrupted, and that this "translation" alone represents the original and true form. Other revelations are also said to exist in MS., to be published when the world is ripe for them.

III. Mormon Doctrines. The creed of the Mormons would naturally be supposed to be embodied in the Book of Mormon. This is not the case, however. The theology of the book is of a different kind. It is more like the philosophy and ethics of the ancient Hebrews. Joseph Smith claims that his new translation is the real creed of the Latter-day Saints. Indeed, it is not an easy matter to set forth exactly and clearly the principles of Mormon theology. First, there is the theory of continuous revelation abiding in the Church (see Preface to Hymns—see "The Compendium of the Faith and Doctrines," p. 43-47). Secondly, Mormon theology abounds in such an extraordinary admixture of truth and superstition, of philosophy and fanaticism, that it is difficult to disentangle them and reduce them to anything like an orderly system. The only document at all resembling a creed is published in the Pearl of Great Price, p. 55 sq., and in the pamphlet entitled The Rise, Progress, and Travels of the Church of Jesus Christ of Latter-day Saints; being a series of Answers to Questions, by Bro. George A. Smith (Salt Lake City, 1872, 8vo), p. 40, 41. It is from the pen of Joseph Smith, and was compiled by him in 1842. We insert it here in full:

"First, We believe in God, the Eternal Father, and in his Only Begotten Son, Jesus Christ, and in the Holy Ghost; 2. We believe that the atonement of Christ all mankind may be saved by obedience to the laws and ordinances of the Gospel; 3. We believe that these ordnances 4. Faith in the Lord Jesus Christ; 5. Repentance; 6. Baptism by Imersion for the remission of sins; 7. Laying on of hands for the gift of the Holy Ghost; 8. That a man must be called of God, by prophecy, and by laying on of hands by those who are in authority, to preach the Gospel and administer in the ordinances of the Church; 9. We believe in the gift of tongues, prophecy, revelation, visions, healing, interpretation of tongues, etc.; 10. We believe that God gave to the world the gift of the Gospel as it is translated correctly: we also believe the Book of Mormon to be the Word of God; 11. We believe all that God has revealed, all that he does now reveal, and we believe that he will yet reveal many great and important things pertaining to the kingdom of God; 12. We believe in the literal gathering of Israel and the restoration of all things, material and immaterial, upon this continent; that Christ will reign personally upon the earth, and that the earth will be renewed and perfected; 13. We claim the privilege of worshipping Almighty God according to the dictates of our conscience, and allow all men to worship as they please; God, in his wisdom, will overrule and control all; 14. We believe in being honest, true, chaste, benevolent, virtuous, and in doing good to all men; indeed, we may say that we follow the admonition of Paul, 'We believe all men, because we believe all things'; we have no secrets that we hide, but all things, and hope to be able to endure all things. If there is anything virtuous, lovely, or of good report, or praiseworthy, we seek after those things."

A more perfect and complete copy is furnished by Mr. Orson Pratt, which we also insert, as it is now seldom to be reached in this detailed and explanatory form, and on many points clearly elucidates the strange views of these Saints. (See, however, Burton, p. 467-480.)

"We believe in God, the Eternal Father, and in his Son, Jesus Christ, and in the Holy Ghost, whom he sent to record of them, the same throughout all ages and forever."

"We believe that all mankind, by the transgression of their parents and their own, come under the curse and penalty of that transgression, which consigned them to an eternal banishment from the presence of God, and their bodies to an endless sleep in the dust, never more to rise, and their spirits to endless misery under the power of Satan; and that, in this awful condition of being lost and dead, they had no power of their own to extricate themselves therefrom."

"We believe that, through the sufferings, death, and atonement of Jesus Christ all mankind, without one exception, are to be completely and fully redeemed, both body and soul, and brought into a state of unending happiness and peace, to which they were consigned by Adam's transgression; and that this universal salvation and redemption of the whole human family from transgressions, and from endless punishment, is effected without any conditions whatever on their part: that is, that they are not required to believe, repent, be baptized, or do anything in order to be redeemed from that penalty; for whether they believe or disbelieve, whether they repent or remain impartial, whether they be baptized or not, or be excommunicated, or be kept the commandments or break them, whether they are righteous or unrighteous, it will make no difference in relation to their redemption, both soul and body, from the penalty of Adam's transgression. The most righteous man that ever lived, and in this earth, and the most wicked wretch of the whole human family, were both placed under the same curse without any transgression or agency of their own."

"We believe that the free gift of God is offered to all men; even so, by the righteousness of one, the free gift came upon all men unto the justification of life. This is the reason why all men are redeemed from the grave. This is the reason that the spirits of all men are restored to their bodies; and this is the reason that all men are deceased from their first baptism and restored into the presence of God. This is the reason that the Saviour said 'If I had not drawn all men unto me.' After this full, complete, and universal redemption, restoration, and salvation of the whole human family, through the atonement of the Lord Jesus Christ, without faith, repentance, baptism, or any other works, then all and every one of them will enjoy eternal happiness in the same manner that all mankind do, by being in the presence of God if they themselves have committed no sin; for the penalty of the original sin can have no more power over them than over Jesus Christ, the boy, who drank the bitter cup and broke the bands of the first death, and obtained the victory over the grave, and delivered all its captives, and
MORMONS 635 MORMONS

restored them from their banishment into the presence of
that Eternal Father. "I do not deny that they themselves are not found transgressors of some law.

"We believe that all mankind, in their infant state, are innocent. The time of becoming guilty of disobeying a law; and that therefore there is no law given to them, and that there is no law thereon on which... because of the reign of the Most High—the Church of the first-born—-the... in their pursuits. But when they... the names of all... their names are enrolled in the book of the names of the..."  

"They are then required to be humble, to be meek and lowly in heart, to watch and pray, to deal justly; and luminously to act for themselves, that they may not be hungry and clothe the naked, according to the dictates of wisdom and prudence: to comfort the afflicted, to bind up the broken heart, and to comfort those who mourn in their power; and, besides all these things, they are required to meet together as often as circumstances will admit, to break bread, to sing praises to the Lord of the broken body and shed blood of the Lord Jesus; and, in short, to continue faithful to the end in all the duties enjoined by the writings of the Holy Ghost and the Church.

"It is the duty and privilege of the saints thus organized upon the everlasting Gospel to believe in and enjoy all the gifts, powers, and blessings which flow from the Holy Spirit. Such, for instance, as the gifts of revelation, prophecy, visions, the ministry of angels, healing the sick by the laying on of hands, and by the administration of working of miracles, and, in short, all the gifts as mentioned in the New Testament, are necessary elements of the Church of Christ.

"We believe that there has been a general and awful apostasy from the religion of the New Testament, so that the power of the Holy Ghost has been removed from the Church of Christ among them; without a priesthood authorized of God to administer ordinances; that every one who has part of any of these powers must go his way and come in another. For instance, almost every Church has done away 'remission for sins' upon believing believers for the gift of the Holy Ghost. Those few who have practiced it for remission of sins have done away the ordinance of the 'laying on of hands' upon believing believers for the gift of the Holy Ghost. Some, again, have practiced the last ordinance to have perverted the first, or have done away the ancient arts, gifts, to which they attached the name of the Holy Spirit, or have said to inspired apostles and prophets, we have no need of you in the body of these days. Those few who have performed these perverted practices of the miraculous gifts and powers of the Holy Spirit have perverted the ordinances or done them away.

"We believe that there are a few sincere, honest, and humble persons who are striving to do according to the best of their understanding; but in many respects they err in doctrine because of false teachers and misconceptions of men; and that they will receive the fulness of the Gospel with gladness as soon as they hear it.

"This section is the same as that in the New Testament, and is revealed in great plainness, so that no one who reads it can misunderstand its principles; and thus, it is revealed by the Lord for the benefit of all nations; first to the Gentiles, and then to the Jews; and the Jews, before that, and thus fulfilling the vision of John, which he beheld on the Isle of Patmos (Rev. xiv. 6-8).

"Many of these prophetic gifts have been given to this (i.e. the Mormon) Church since its birth, which have been printed and sent forth to the world. These also contain the same information as the prophetic gifts; and are of infinite importance to the Saints. They also unfold the great events that await this generation; the terrible judgment to be poured forth upon the wicked, and the blessings and glories to be given to the righteous. We believe that God will continue to give revelations by visions, by the ministry of angels, and by the administration of the Holy Ghost, until the Saints are guided into all truth; and that in the dispensation of the fulness of times, we will have the gift of prophecy; that there is in existence, and are made perfect in knowledge. So long, therefore, as they are ignorant of anything past, present, or to come, they will be unable to enjoy the gift of revelation. And when in their immortal and perfect state—when they enjoy the measure of the stature of the fullness of Christ; when they are all one in Christ Jesus, and become like their Saviour, then they will be in possession of all knowledge, wisdom, and intelligence; and then shall be their glory to be as God, having the powers, thrones or dominions; and, in short, they will be filled with all the fulness of God. Then they will no longer require these revelations.

"We believe that wherever the people enjoy the religion of the New Testament, there they enjoy visions, revelations, and the administration of the Holy Ghost. They do not cease to enjoy these blessings cease to be enjoyed, there they also cease to enjoy the same. We believe that God has raised up this Church in order to prepare a people for his second coming in the Holy Ghost; to begin the work of dispersing the clouds that are on the earth; and to institute three preceding conditions. These are the first conditions of the Gospel. All who comply with them receive the forgiveness of sins and are made partakers of the Holy Ghost. They are also declared to be the sons and daughters of God. Through this process they are born again, first of water and then of the Spirit, and become the children of God; and the land of our possession, the land of the Most High—-the Church of the first-born—the elect people, and heirs to a celestial inheritance eternal in the nature of things. These conditions are necessary...
"We believe that great and terrible judgments shall await the nations of the wicked, and that after the message of the Book of Mormon has been sufficiently sounded in their ears, if they be disposed to seek peace, they will stand and the whole earth shall no longer be encumbered with them. New and unheard-of plagues will sweep through this land in the latter days among the wicked and learned physiologists, depopulating whole cities and towns, and carrying off millions of wrecked beings in every quadrant of the habitable earth. But the voice of the Spirit of God, which will cease striving in them, will rise against nations, till the whole earth, comparatively speaking, is filled only with righteous. Thrones and empires shall be cast down—new governments will be erected but to meet with the same fate. Peace shall be as war among the nations, and it shall happen as with the Papists so with the Protestants, as with their mother and her sister, who shall receive none: they shall all fall into the ditch and perish together because they reject the voice of the Lord from the heavens, and refuses to believe his servants whom he sent to testify against their wickedness and prepare the way of the Lord for his second coming.

"But the righteous shall escape, for the Lord shall gather them from all nations unto a land of peace, and his arms shall be stretched out over them, and his glory shall be upon them for a defence, and they shall be the only people under heaven that shall not be at war with one another, for thus hath the Lord spoken.

"We believe that in this generation a house of the Lord shall be built by the Saints upon Mount Zion, and a cloud of glory shall rest upon it by day and by night, a flaming fire by night, and that the face of the Lord will be unveiled, and the pure in heart shall see him live. Or, as the Prophet has said habitually, 'The house of the Lord shall be established as the tabernacle of the Most High.' Are you children? Many people shall come unto thee to be taught in the ways of the Lord and instructed in his path; and they shall proceed upon the work of perfection which shall establish righteousness in the earth.

"We believe that the ten tribes of Israel, with the dispensation of the Gospel, shall return in the last days, according to the covenants which God made with his ancient fathers, and that when this great work of reunion is accomplished, the Lord shall make manifest in signs and wonders, and mighty deeds of power, the same which took place in the exodus from Egypt to Jerusalem will be rebuilt, together with a glorious temple, and the Lord shall visit them also, as he did the ancients in Zion; one of the nations shall become great unto the ends of the earth, and all nations shall serve and obey him, for the wicked shall be destroyed.

"We believe that all persons who wish to escape the judgments of great Babylon must come out from among both the Papists and the Protestants, for they are the whore of all the earth, and have made the nations drunk with their abominations, and are to be burned by fire; therefore we owe unto man or woman that shall stand in connection with them, for the hour of their judgment in the fire.

"And we now bear testimony to all, both small and great, that the Lord of Hosts hath sent us with a message of peace and good will to all the earth, even our testimony to the nations, and prepare the way of his second coming. Therefore repent, O ye nations, both Gentiles and Jews, and turn to the Lord of Hosts and depart from evil deeds, for all your sins are with broken hearts and contrite spirits, and be baptized in water, in the name of the Father, Son, and Holy Ghost, for repentance and remission of sins; and ye shall receive the Holy Spirit, by the laying on of the hands of the apostles or elders of this Church; and signs shall follow them that believe, and if they continue faithful to the end they shall be saved. But woe unto them that hearken not to the message which God has now sent, for the day of vengeance and burning is at hand, and they shall not escape. Therefore remember, O reader, and perish not!"

The reader will notice that Mr. Pratt does not dwell at any length upon the first article, but simply restates in other words what is embodied in the Confession. Yet this very article has given rise to a most materialistic tendency in the minds of many of the Latter-day Saints.
MORMONS

Archangel, the Ancient of Days. He is our Father and our God, and the only God with whom we have to do (from Discourses of the Presidency, in vol. xv. p. 769, preached in the Tabernacle, April 9, 1852). It is curious to observe, from such examples, how easily the extremes of materialism and immaterialism may be made to meet. For here we have the rudest form of anthropomorphism connected with a theory of emanation which might be identified with that of some Gnostic and Oriental idealist. There can be no doubt that, under its present intellectual guise, Mormonism is rapidly passing into that form of practical atheism which is euphemistically termed pantheism. Thus we read in the Washington organ of the presidency that the only thing which has existed from eternity is “an infinite quantity of self-moving intelligent matter.” Every particle of matter which now exists existed in the infinite depths of past duration, and was then capable of self-motion” (Seer. i, 129). “There is no substance in the universe which feels and thinks, but what has eternally possessed that capacity” (ibid. p. 102). “Each individual of the vegetable and animal kingdom contains a living spirit, possessed of intelligent capacities” (ibid. p. 84). “Persons are only tabernacles, and truth is the God that dwells in them. When we speak of only one God, and state that he is eternal, etc., we have no reference to any particular person, but to truth dwelling in a vast variety of substances” (ibid. p. 25; comp. also Stenhouse, p. 464 sq.).

THE ETERNAL GOD.

Orson Hyde’s Diagram of the Celestial Kingdom. (From Stenhouse.)

Christ is the offspring of the “material” union, on the plains of Palestine, of God and the Virgin Mary—the latter being duly married after betrothal by the angel Gabriel. Yet he is believed to have had a previous existence, to have even made the universe out of “unformed chaotic matter as old as God,” and his worship is enjoined as Lord of all (Doct. and Cov. Lect. v. 2, p. 45, 47). The Paraclete is vaguely described. He is also a member of the Godhead, being the mind of the Father and the Son; but while the other two persons have bodies of flesh and bone, the Holy Ghost hath not, but is a personage of Spirit (Comp. p. 154). Yet his substance is material, and subject to the necessary laws which govern matter. He has therefore parts which are infinite and spread through all space, and so is he virtually omnipresent. The Father and the Son, as persons, are not omnipresent, but only through the Spirit (Comp. p. 140-149). He may properly be called God’s minister, to execute his will in immensity. He is therefore the worker of miracles, the source of grace, and even the cause of increase, being in every person upon the face of the earth; for the “elements that every individual is made of and lives in possess the Godhead” (Young, in Comp. p. 148). It would appear, however, that there is an older Trinity, that of Elohim, Jehovah, and Michael, which is Adam. Adam, again, is declared to be the “god” of Jesus Christ; Jesus Christ the god of Joseph Smith; and Joseph Smith is now the god of this generation; but the whole affair is a mass too wild and mystical to be explained intelligently. The human intellect is thus forced back into an era before the time of Noah, and even into the days of the biblical patriarchs, and sometimes back into more alchemical nonsense; all that can be definitely set before the mind is that Mormons believe that by faith, obedience, holiness, any man may rise to a deity, and acquire the power of making, peopling, and ruling a “world” forever! (See Stenhouse, p. 466.)

The third article, which teaches the universal salvation, is strangely elucidated regarding the future state. Thus, according to Mormon teaching, not only will the body, but all the habits, occupations, and necessities of life, be the same in the future world as in the present. One of their chief pillars tells us that “the future residence of the Saints is not an ideal thing. They will need houses for their persons and for their families as much in their resurrected condition as in their present state. In this identical world, where they have been robbed of houses and lands, and wife and children, they shall have a hundredfold” (Spencer, p. 174). Another “apostle” calculates the exact amount of landed property which may be expected by the “resurrected Saints.” Suppose that, out of the population of the earth, one in a hundred should be entitled to an inheritance upon the new earth, how much land would each receive? We answer, they would receive over a hundred and fifty acres, which would be quite enough to raise manna, and to build some splendid mansions. It would be large enough to have their flower gardens, and everything the agriculturist and the botanist want” (P. Pratt, in Milen. Stor. xiv, 663). They also venture directly to contradict the words of Christ himself, by affirming that, in the resurrection, men both marry and are given in marriage. Thus the author above quoted tells us that “Abraham and Sarah will continue to multiply, not only in this world, but in all worlds to come... Will the resurrection return to you a mere female incassate, that is not to be the wife of your bosom in eternity? No; God forbid. But it will restore you the wife of your bosom immortalized, who shall bear children from your own loins in all worlds to come” (see Spencer, p. 6; and compare Stenhouse, p. 480).

We desire to call special attention also to the Mormon doctrine regarding miraculous gifts, as embodied in the seventh article of their Confession. This doctrine of the discerning of spirits led Smith into a variety of curious speculations. He teaches that the soul of man was not created, but “coexistent” equal with God. “God,” he says in one of his sermons in 1838 (p. 62), “never did have power to create the spirit of man.” The very idea lessens man in my estimation. I know better.” He also holds to the transmigration of souls. Rebellious spirits descend into brutes tabernacles till they yield to “the law of the everlasting gospel.” The eighth article may be declared decidedly liberal; it expresses a belief that the Word of God is not only in the Bible and the Book of Mormon, but in “all other good books.” As for the contradictions that exist in the first, Smith admits them, but alleges that they are “corruptions,” and that they can be removed by his or any other prophet’s inspired explanations. It
MORMONS 638

MORMONS

is said that he has left an "inspired translation" of the whole Bible in MS.; but as it has never been published, we can judge it only by the occasional extracts which have been made by prophets and elders, and from these we have to form our opinions. The testimony of those in gathering at the Zion of the East, but at that New Zion on the Western continent which has been appointed under this new dispensation ushered in by Joseph Smith. And as the Jews were bitter to separate themselves from the Gentiles, and the early Christians (the ancient Saints) from the heathen, so the Latter-day Saints are now called forth from a wicked world, doomed to almost immediate destruction (before the close of this century), which is indeed already beginning, to the Zion of this continent. When the Gospel has been preached to all the world, and the elect have been assembled at Zion, then all unbelievers will be destroyed; the kingdom of heaven will be set up on the earth, and the formal reign of Christ commence in the Western Zion. Surely no one need wonder that Joseph Smith, when he first promulgated his new faith, maintained that "one of the grand fundamental principles of Mormonism is to receive truth, come what may, and hold to it, even if it means persecution for one moment. Indeed their faith, if we have but distinctly reached their true position, consists of a spontaneous agglomer- ation of tenets which, were its disciples of a more learned and philosophical body, would suggest extensive eclecticism. And Mr. Barton has well said that "the Mormons are like the Epicureans in their procreation, transmigration, and exaltation of souls; like the followers of Lucippus and Democritus in their atomic materialism; like the Epicureans in their pure atomic theories, their summum bonum, and their sensuous specula- tions; and like the Platonists and Gnostics in their belief of the Eon, of Ideas, and of moving principles in element. They are Fechichists in their ghostly fancies, their Aevstra, which became souls and spirits. They are Jews in their theocracy, their ideas of angels, their hatred for Gentiles, and their utter segregation from the great brotherhood of mankind. They are Christians, inasmuch as they do believe in the atonement of Christ, and hold to the divinity of Christ, the fall of man, the atone- ment, and the regeneration. They are Arians, inasmuch as they hold Christ to be the 'first of God's creatures; a perfect creature, but still a creature.' They are Mos- lems in their views of the inferior status of womenkind, in their abjuration of their natural rights, in their material body; like the followers of the Arabian Prophet, they hardly fear death, because they have elaborated 'continuation.' They take no leap in the dark—they spring from this sublunary stage into a known, not into an unknown world; hence also their worship is eminent- ly political and commercial, and—religion being with them not a thing of this life, but an operation and parcel of every-day life—the intervention of the Lord in their material affairs becomes natural and only to be expected. Their visions, prophecies, and miracles are those of the Illuminati, their mysticism that of the Druses, and their belief in the millennium is a completion of the dreams of the Apocalyptic sects. Masonry has entered into their scheme, the Demiurgus whom they worship is 'as good at mechanical inven- tions as at any other business.' With their later theo- ries, Methodism, Swedoborgianism especially in its view of the future state—and Transcendentalism are cur- rently intermingled. Finally, we can easily discern in their doctrine of affinity of minds and sympathy of souls the leaven of that faith which, beginning with Mesmer and progressing through the Rochester Rappers and the Poughkeepseee Seer, threatens to extend wherever the susceptible nervous temperament becomes the character- istic of the race."

The ethical teachings of Mormonism are not distin- guished by any other remarkable peculiarities than we have before pointed out. This, however, is not absolutely insisted upon, but is only urged as a "practise of wisdom." It was enforced by Joseph, but under the present head of the Church it is asserted that interpenetration is rapidly invading the Saints' households. The virtue of patriarchy is also a frequent theme of Mormon eloquence. The national colors are exhibited on every public occasion, and there seems to be every endeavor to refute the charges that Mormonism seeks secular power, and is antagonistic to the United States government, and that if statehood is ever secured to Utah, "Brigham Young's theocracy will be triumphant over the republic and the national laws." The practice of

IV. Ordinances and Practices.—1. The ordinances of the Mormon Gospel are five: (1) Faith, which is very strangely described in the Doctr. and Cov., as already quoted. What is really required is an "area of faith in this respect is "faith in Joseph and his successors;" and absolute acceptance of the Scriptures, i.e., the Bible and the Mormon writings, but a "reverence for them," and "absolute obedience" to the president and priesthood. (See V, below.) (2) Repentance, i.e. sorrow for sin and resolu- tion to lead a good life. (3) Baptism, which is adminis- tered by immersion, to none younger than eight years, that being regarded as the age at which responsibility begins (Doctr. and Cov. ch. xxii, § 4, p. 160). Infant bap- tism is declared to be a "solemn mockery, because little children have no sins to repent of, and are not under the law of the Gospel" (Doctr. and Cov. ch. viii, § 2, § 3, p. 557). The rite is administered as follows: "The person who is called of God, and has authority of Jesus Christ, shall go down into the water with the person who has presented him or herself for baptism, and shall say, calling him or her by name, 'Having been commis- sioned of the Holy Priest, I baptize you in the name of the Father, and of the Son, and of the Holy Ghost. Amen.' Then shall be immersed in or her in the water, and come forth again out of the water" (Book of Mormon: Nephi, ch. viii, § 5, p. 457; Doctr. and Cov. ch. ii, § 21, p. 73). The effect of baptism, when administered to and by a qualified person, is declared to be the giving of sins through the blood of the Holy Ghost, and a title of eternal life. It is regarded as absolutely necessary for salvation; without it neither repentance nor faith avail (Doctr. and Cov. ch. iv, § 12, p. 87). A most peculiar tenet of their creed is the necessity of baptism for the dead. To supply the deficiency of those who through ignorance or other involuntary defects have died without this ordinance, the Mormon faith, the practice of baptism for the dead was ordained at a very early period of Mormonism, and is incorporated as a necessary ordinance into the Book of Doctr. and Cov. (§ 105, 106). The faith is preached to the dead in Hades by departed Saints; and the benefit of baptism is obtained for them if not too late. Any be- liever may and should be baptized for his departed friends, relations, and ancestors to the most remote ages; and, in the perfect state, those for whom a person has been thus baptized will be added to his family and sub-
The chancellor of the University of Deseret informs us that "unless this is done for the dead they cannot be redeemed" (Spencer, p. 160). The same learned authority announces that "Peter tells how the devout and honorable dead may be saved, who never heard the Gospel on earth. Says he [St. Peter!], 'else why are they baptized for the dead?'" (Spencer here refers incorrectly to 1 Cor. xv. 29 as the work of St. Peter.) A careful record of the persons vicariously baptized is kept by duly appointed registrars. These records are the books spoken of by St. John (Rev. xx, 12), the Book of Life being a record kept in heaven to verify those kept on earth (Doctr. and Cov. ch. cvi, § 6, p. 819).

4. Laying on of hands for the gift of the Holy Ghost, sometimes called baptism by fire as distinguished from baptism by water. It is usually administered immediately after baptism, of which it is regarded as the completion. By it the spirit of prophecy, the gift of tongues, and the power to work miracles are given. There have been multitudes of persons in the world who have believed and asserted that to them, and to them only, God gave visions, dreams, angel-visits, the power of healing the sick and "casting out devils"; and they have declared that these were proofs of the heavenly origin of the faith which they proclaimed, and this it is that the Saints have been taught by the modern apostles to regard as special and particular to them, while it has been a peculiarity common to the religious experience of all the world. (The Sacrament of the Lord's Supper was originally administered in bread and wine, as Christ himself ordained when he appeared to the Nephites (Book of Mormon: Neph., ch. viii., § 6, p. 469). But in 1883 it was revealed to Smith that "strong drinks are not for the belly, but for the washing of your bodies," and that wine was only to be used in this ordinance if it was the pure juice of the grape, and made by Mormons (Doctr. and Cov. ch. lxxxi, § 1, p. 240). Water only, therefore, is now used. The rite is administered every Sunday. The water, having been blessed, is handed around in tin cans, together with the bread (Hae, p. 106)."

5. Marriage is not a civil contract with the Latter-day Saints, but a sacrament of the Church, and a sacred tenet of the faith. Matrimony, moreover, as practiced by the Mormons, is an institution so peculiar to themselves, they having introduced into the modern social system the polygamic system, that their marriage service is a most important rite. Mormons are in every possible way encouraged to be polygamists, and are reminded of the revelation given to the Prophet that "the rank and dignity given to the Saints in the other world is proportioned to the number of their wives and children. It is true that polygamy is not, as many suppose, essential to their religious system, yet it has entered so largely into the marital relations of the Latter-day Saints of Utah as to give them a most obnoxious record in the sight of all other Christian religious sects. As we have seen above, in their early history the Mormons clearly rebuked polygamy (Book of Mormon: Jacob, ch. ii, p. 118 sq.). From 1880 to 1843 they were monogamists; but in the latter half of those years, as we have also seen, Smith obtained a revelation permitting, and even recommending, a plurality of wives. (They reject the word "polygamy," and prefer the term pluralism.) Still, pluralism does not appear to have become the general practice among the Mormons till their journey across the prairies to the valley of the Salt Lake. Since then it has been openly avowed, and defended against other sects by an appeal to Scripture. Tracts, dialogues, and hymns are circulated in its behalf. Says Stenhouse, "Tens of thousands of sermons have been preached on its divine origin; voluminous treatises have been published in its exposition, and the Mormon press has teemed with articles in its defence" (p. 183). And even the "pluralistic" marriage ceremony has been published. To afford our readers a fuller understanding of the Mormon vice of "pluralism," we here insert in full the special "revelation" which they claim to have had.

CELESTIAL MARRIAGE:

"A REVELATION ON THE PATRIARCHIAL ORDER OF MARRIAGE, OR PLAURALITY OF WIVES.

Given to Joseph Smith, the Seer, in Nauvoo, July 12, 1842.

1. Verily, then saith the Lord unto you, my servant Joseph, that henceforth you have inquired of my hand to know and understand wherein I, the Lord, justified my servants Abraham, Isaac, and Jacob, as also Moses, David, and Solomon, my servants, as touching the principle and doctrine of their having many wives and concubines: Behold! and lo, I am the Lord thy God, and will answer thee as touching this matter: Therefore prepare thy heart to receive and obey the instructions which I am about to give unto you; for all those who have this law revealed unto them must obey the same; for behold! I reveal unto you a new and an everlasting covenant, and if ye abide not that covenant, then are ye damned: for no one can reject this covenant and be permitted to enter into my glory; for all who will have a blessing at my hands shall abide the law which was appointed for that blessing, and the conditions thereof, as was instituted from before the foundations of the world; and as pertaining to the new and everlasting covenant, it was instituted for the fulness of my glory; and he that receiveth a fulness thereof must and shall abide the law, or he shall be damned, saith the Lord God.

2. And verily I say unto you that the conditions of this law are these: All covenants, contracts, bonds, obligations, oaths, vows, performances, connections, associ-
MORMONS 640 MORMONS

ations, or expectations that are not made and entered into and sealed by the Holy Spirit of promise, of him who is an approved seer and prophet, and by me, declaring to you, and that, too, most holy, by revelation and commandment, through the medium of mine appointed, whom I have ap-
pointed unto me, and that I hereby send forth this command-
ment; that, if any one of you, my servant Joseph, shall be
pointed unto my servant Joseph to hold this power in the
land, and of their powers and of their priesthood and
on whom this power and the keys of the priesthood are
conferred, are of no efficacy, virtue, or force in and after
the time of their death; for I will raise up unto you, from
them that are dead, unto the buffets of Satan unto the day of redemption, salut the Lord God.

8. Behold! mine house is a house of order, saith the Lord God, and of order of confidence. I, the Lord, am an offer-
ing, saith the Lord, that is not made in my name? Or will I receive at your hands that which I have not appointed
unto me? Will I receive in my house that which I have not
appointed unto me? Will I receive of an offering, saith the Lord, that is not made in my name? Or will I receive at your hands that which I have not appointed unto me? Will I receive in my house that which I have not appointed unto me?

9. If any one of you shall come unto me, and shall call me Lord, and my Father before the world was, Abraham received all things, whatsoever he received, by revelation and command-
ment, even as you do by the Holy Spirit of promise, which entered into his exaltation and sitteth upon his throne.

10. Abraham received promises concerning his seed and of the fruit of his loins from whom were ye vix. my servant Joseph—which were to continue so long as they were in the world; and as touching Abraham and his seed, out of the world, they should continue, both in the world and out of the world and should continue as immovable as the stars; or if ye were to count the stars, and should count them, it would not exceed the number of my promises unto Abraham, and this is the mystery of the New Testament. This promise is yours also, because ye are of Abraham, and the promises are of the Father, which are the law and the commandments, and the law are the continuation of the works of my Father, wherein he glorifieth himself. Go ye, therefore, and do whatsoever the word of the Lord shall command you, and it shall be saved. But if ye enter not into my law, ye cannot receive the promises of my Father which he made unto Moses and unto my servant Joseph, and unto my servant Abraham.

11. God commanded Abraham, and Sarah gave Hagar to Abraham to wife. And why did she do it? Because the Lord God said unto Abraham, there shall not be another child born unto him. This, therefore, was fulfilling among other things, the promises. Was Abraham therefore, under condemnation? Verily, verily I say unto you, he was not condemned. Abraham was commanded to offer his son Isaac; and he was about to do it. God would not have permitted it, because he was not able to do it. Abraham, however, did not refuse, and it was accounted unto him for righteousness.

12. And Joseph and his wife concubines, and they bare him children, and it was accounted unto him for righteousness, because they were given unto him, and he abode in my law: as Isaac, also, and Jacob did none other things than that which they were commanded, and because they did none other things than that which they were commanded, they have entered into their exaltation, according to the promises, and sit upon thrones, and are not angels, but are gods. David also received many wives and concubines, as also Solomon, and Moses my servant, and also my servant Adam, and my servant Joseph, and my servant Saul, and my servant David, and the Lord my God will not weary of the world, whereby to shed innocent blood; and if ye abide in my covenant, and commit no murder whereby to shed innocent blood, it shall be done unto them in all things whatsoever my servant hath put upon them, in time and through all eternity. And they shall be of full force when they are out of the world; and they shall pass by the angels and the gods which are set there, to their exaltation and glory. And the Lord my God will not weary of the world, whereby to shed innocent blood, and which glory shall be a fulness and a continuation of the seeds forever and ever.

13. And you, the sons of God, because they have no end; therefore shall they be from everlasting to everlasting, because they are gods; the heavens shall be above all, because all things are subject unto them; they are gods, because they have all power, and the angels are subject unto them. Verily, verily I say unto you, except ye abide my law ye cannot attain to this glory; for strait is the gate and narrow is the way that leadeth to the exaltation and continuation of the lives, and few there be that find it, because ye receive me not in the world, neither do ye know me, neither doth the record of my words, even to this day, ye know me, and shall receive your exaltation, that where I am ye shall also be. This is eternal life, to know the only and true God, and Jesus Christ whom he hath sent. I am he. Receive ye, therefore, my law. Bread is the word of life, and is the way that leadeth to the exaltation and continuation of many there are that go in thereat; because they receive me not, neither do they abide in my law.

14. And, verily, I say unto you, if a man take a wife, according to my word, and they are sealed by the Holy Spirit of promise, according to mine appointment, and he doeth nothing iniquious, that man and his wife shall continue in the exaltation and resurrection and enter into their exaltation; but they shall not enter into that exaltation because of their own unrighteousness, but unto the buffets of Satan unto the day of redemption, saith the Lord God.

15. God will have a war against the Holy Ghost, which shall not be forgiven in the world nor out of the world, is that ye commit murder, wherein ye shed innocent blood; for I will have a war against the Holy Ghost, wherein I will destroy him; and in my new and everlasting covenant, saith the Lord God; and he that abideth not this law can in no wise enter into my rest, saith the Lord God.
...I say unto you, I will reveal more unto you hereafter: and the cause of this is the present. Behold, I am Alpha and Omega. Amen."
should not be considered irreligious for the faithful, who are called his children, to walk in the steps of their faith- ful teachers. Indeed, the Holy Prophet himself taught his holy prophets, should give more wives unto his servants, as he would give more servants, and would be of greater sin for them to refuse that which he gives. In such a case it would become a matter of conscience with them as it has been with us, and they would be bound to exercise their faith in this doctrine, and practice it, or be condemned; therefore Congress would have no power to pass a law prohibiting the exercise of this practice; neither would the states or territories have power, constitutionally, to pass a law "prohibiting the free exercise thereof." If Sultan Shuker believed it to be wrong for them to marry even one wife; it certainly would be unconstitutional for either the Congress of the United States, or any legislature of the states or territories, to prevent the exercise of their religion.

"From the foregoing revelation, given through Joseph the Smith, the Prophet, by which God has taught some of his servants to take more wives, and has pointed out certain duties in regard to the marriage ceremony, showing that they must be married for time and for all eternity, and showing the advantages to be derived in a future state by this eternal union, and showing still further that if they refused to obey this command, after having the law revealed to them, they should be damned. This revelation, then, makes it a matter of conscience with them as it has been with us, and they would be bound to obey it, as a part and portion of their religion, and verify believe that they cannot be saved, and that Congress has no power to pass laws "prohibiting the Church of Jesus Christ of Latter-day Saints 'the free exercise of this article of their religion," or "prohibiting the states or territories a constitutional right to pass laws 'prohibiting the free exercise of the religion' which the Church of the Saints solemnly and sincerely believe to be essential to their salvation? No; they have no such right."

"The Latter-day Saints have the most implicit confidence in the eternal purposes of God given through the Prophet; and they would much sooner lay down their lives and suffer martyrdom than to deny the least revelation that God has given in this dispensation, however much it may trouble or vexation. We will teach them how to read God raised up wise men and prophets to reveal his will; and the Constitution of our country, that the freedom of the people might be maintained, according to the free agency which he had given to them; that the Constitution established and set up a man, so far as religious doctrines and conscience are concerned. And the more we examine that sacred instrument framed by the wisdom of our infallible fathers, the more we are compelled to believe that an invincible power controlled, directed, and guided them in laying the foundation of liberty and freedom upon this great western hemisphere. To this land the Mohammedan, the Hindu, the Chinese can emigrate, and each bring with him his score of wives and his hundred children, and the glorious Constitution of our country will not interfere with the free exercise of the religion which he chooses to follow. The man of the Constitution, he is protected in all his family associations: none have a right to tear any of his wives or his children from his side; likewise, none have a right to bind those of the Constitution, the legislative assembly of the territory of Utah have the right to pass laws regulating their marriage, and for the protection of the children of such marriages, in the right of marrying one or many wives, as the case may be. If Congress should repeal those laws, they could not be abrogated by the states or territories of the United States. And even if Congress should repeal them, still there would be no law in Utah prohibiting the free exercise of that religious right; neither do the citizens of Utah feel disposed to pass such an unconstitutional act which would infringe upon that Which is a sacred right of conscience.

"Tradition and custom have great influence over nations. Long-established customs, whether right or wrong, because of their duration and general acceptance of the nations who have been accustomed from time immemorial to the practice of what is called polygamy would consider a law against it a violation of their ancient and venerated custom, and it is very likely that the mass of the people would be opposed to it; the very idea of being limited to the one-wife system would be considered not only oppressive and unjust, but ridiculous, and it would either be considered an innovation upon the long-established customary law of tribal nations; an innovation of the most dangerous character, calculated to destroy the most sacred rights and privileges holden for the information, and you will ever have the pleasing reflection that you have been the instruments in the hands of God to add to the happiness of your fellow-men, and to make the darkness which you may see enveloping their minds. Come, then, let us reason together, and try to discover what the law means. Take a look at the same legislation—tions of their fathers to abolish their restrictive laws, and to the people of the state, and according to the principle system. It is custom, then, is a law which forms the conscience of nations and individuals in regard to the marriage relationships. Custom causes four fifths of the population of the globe to decide that polygamy, as it is called, is a good and not an evil practice; custom causes millions of people in opposition to the great majority.

"It is only wise who have strength of mind suffi- cient to devest themselves entirely from the influence of the doctrine of a plurality of wives, and to think and act in a spirit of humility, and to hold the conclusion that it is a Doctrine of divine origin: that it was embraced and practiced under the divine sanction and approval of the Holy Prophet, and was approved by the Holy prophets and patriarchs, who were inspired by the Holy Ghost—who were enwrapped in the visions of the Al-mighty, and manifested the same by the sign of the face to face, and talked with him as a man talks with his friend—were 'polygamists,' that is, they had many wives, and were married to several women at the same time. Proved by the Holy Ghost, nor by angels, nor by the Al-mighty, inasmuch as it was a thing done in their conscience; on the contrary, each one of these 'polygamists' received by revelation promises and blessings for himself, for his wives, and for his family, and the blessing extended to his numerous wives. Moreover, the Lord himself gave revelation to different wives belonging to the same man, beveling to the great blessings which should rest upon their posterity; angels also were sent to comfort and bless them; and in no instance do we find them re- proved for having polygamy, or it being practiced by them. They have given laws to the different wives of the same man; and, furthermore, the Lord himself actually officiated in this practice, for he actually was married to more than one wife, too, when David already had several wives which he had previously taken: therefore, as the Lord did actually give revelation to two or more wives of the same man, he not only have sanctioned 'polygamy,' but established and instituted it upon a sure foundation by giving the wives to be married to a single man. And the law is as applicable to those who are completely divested from the influence of national customs, and who judge concerning this matter by the light of the word of God, as it is to those in states or territories to compel any individual to act in violation to the dictates of his own conscience; because one should be left in all matters of religion to his own choice, and thus become accountable to God, and not to his fellow-men.

"If the people of this country have generally formed different conclusions from us upon this subject, and if they have endeavored to restrain it in their own states and territory, it is not at all at variance with their minds to the religion of the Saints, we say to them that they are welcome to their own religious views: let them pursue their own religious paths in this field of religious freedom. If we cannot convince you by reason nor by the Word of God that your religion is wrong, we will endeavor to show you that the privileges guaranteed in the great charter of American liberty, which are given to all the people of this land, to the full extent of their civil and religious privileges, are as well applicable to you as to the rest of the citizens of the United States; and if you will obey and respect the rights and privileges of others, let it be also your own in this great charter of liberty. We have the power, in fact, to protect the people of this country in the exercise of their religious rights—convince us of our errors of doctrine, if we do any, by reason, by logical argument, or by the Word of God. All privileges are founded for the information, and you will ever have the pleasing reflection that you have been the instruments in the hands of God to add to the happiness of your fellow-men, and to make the darkness which you may see enveloping their minds. Come, then, let us reason together, and try to discover what the law means. Take a look at the same legislation—tions of their fathers to abolish their restrictive laws, and to
MORMONS

This document was not officially promulgated at Salt Lake City until August 29, 1852 (Némy, ii, 112-180), when it was given to a great conference, to be thereafter as a possession unto all the Saints (Stenhouse, p. 102 sq.), after a most searching inquiry, that Smith must have been the author, or the supposed "seen," of this "revelation.

Says Stenhouse: "The sons of the Prophet have been very restive under the imputation of polygamous practices being attributed to their father. They have labored indefatigably in decrying polygamy, and have devoted a large share of their time, talent, ink, andpaper in hostility to it, as they evidently believe it is both a great error and a great sin. But as the facts of Joseph's marital relations with 'sisters' who claim to be his 'wives,' in the Mormon sense, are overwhelming, the sons, in denying their sire's polygamy, are driven to the alternative of silently allowing the inevitable charge of practical 'free love,' 'adultery,' or whatever others may choose to call it. At the present time there are probably about a dozen 'sisters' in Utah who proudly acknowledge themselves to be the 'wives of Joseph,' and how many others there may have been who held that relationship, Mrs. Emma Smith, or any of her children may feel justified in denying that her husband was a polygamist; for she may neither assent to the use of the term nor acknowledge the principle. But there is to the author's mind the most satisfactory evidence that Joseph Smith had 'sealed' to him a large number of women some time before he died, many of whom have stated to the author that they were 'the wives of Joseph Smith;' that 'Mrs. Emma Smith was aware of the fact,' and that it was the trouble growing out of the discovery of such relationship that called forth the revelation" (p. 185-188).

We have not room here to quote further from the writings and sayings of the Saints on the subject of "pluralism." In the article on Polygamy the Mormon position will be carefully considered. Suffice it to say here that the practice of pluralism is now carried to great lengths among the Saints, their leading men having from fifteen to forty wives each. Mr. Young is known to have nineteen "real, living wives." He himself has from fifteen to forty wives. Mr. Stenhouse (Tell it All), it would be impossible to say. Probably he himself does not know their number. Late-ly, I believe, he has been making his will, and, if so, I suppose he has 'taken count of all.' He has besides in various parts of Utah many other wives, who are all more or less "married" to him by ceremony, and he seldom or never sees them. The nineteen whom I have named form his family at home, as I may say— are all under his own roof, or, at least, they live in Salt Lake City, and are known to every one of his "wives." (p. 290). The universal testimony of all travellers is that the Mormons have been corrupted in the morals and deteriorate the character of the people, it has certainly degraded their physical condition. It is believed that the women submit to a yoke which they abhor because they see no escape, or that they bend to it from a mistaken sense of duty. The wives generally live apart in some instances in separate houses. The first wife is practically recognised as the head, though not always the favorite of the husband.

We quote from Mr. Bowles' pages, who epitomises in a paragraph the common testimony of all observers against the polygamous practices of the Mormons of Utah: "Mr. B. has been denounced as a woman-dealer, as denouncing feelings and true instincts; it robs married life of all its sweet sentiment and companionship; and while it degrades woman, it brutalizes man, teaching him to despise and domineer over his wives, over all women. It breeds jealousy, distrust, and tempers to indulgence; but the police system of the Church and the community is so strict and constant that it is claimed and believed the latter vice is very rare. As I have said, we had little direct communication with the women of the Saints, but they were found to us in their minds, for the men's are tragic, heart-rendering. One woman, an educated, hand-some person, as yet a single wife, said, with bated breath and almost hissing fury, to one of our party in some aside discussion of the subject, 'Polygamy is tolerable enough for the men, but it is hell for the women!' Even stronger and more disheartening is the testimony of Mr. and Mrs. Stenhouse. The latter's book, Tell it All (Hartford, Conn., 1875, 12mo, pp. 628), gives the story of a woman's life experience in Mormondom in such detail that it really constitutes the fullest review of pluralistic life. Her husband's work is, however, more valuable to the inquirer, as it is written more impartially and considerately. And his picture of pluralism has enough to sadden the most cold-hearted. Says he: 'To assert that any true woman living in polygamy is in heart and soul satisfied and happy, is to simply libel her nature... The women are, however, not alone the sufferers by polygamy. The intelligent of the fair sex among the Mormons will readily admit this, and some even go so far as to pity their husbands, and to extend to them the genuine sympathy of their hearts, though polygamy has been their own curse. Whatever else it has achieved, polygamy has at least been impartial, while it is not so with the women, it has not failed to enslave the man... No man ever regained his senses after the act of sealing without feeling that he had fatally wounded the wife of his youth. It is a cruelty that he realizes as well as his wife, and he, the nominal but innocent cause of her wrong, seeks to assuage her sufferings by greater kindness and tender-ness. But no smooth words, nor the soothing affection of his eye, can heal the wound. It steals her life away, and in her true heart she curses the day she ever heard of Mormonism. For the man who realizes and shares the misery of his wife, the future life is but 'a living lie.' Were the man an angel, it would be impossible for him to act justly towards two or twenty wives, and divide to each the full measure of her rights. Polygamy may be the marital relation of the sexes in heaven; it may be the 'celestial law' of the gods —of that there is no discussion or dreaming; but one thing is certain, that it is not the true marital relation of the earth. The Church of the earth has been a practice under the most favorable circumstances have stamped it as a withering curse" (p. 584-588).

Pluralism, then, which has thus far failed to gain the hearty support of the more intelligent Mormons, if we may accept Mr. Stenhouse's statement, and there are many who seem to go out of their way to gain notice, and who speak against the Church of the Latter-day Saints, not only socially, but also numerically; for since the promulgation of this tenet many of its converts have deserted them, and their progress has been stayed in a great measure. Says Mr. Stenhouse: 'On the 1st of January, 1855, it was published in the Deseret News that the Church had been closed one after another, and the mission that was once the glory of the Mormon Church has withered and shrivelled into comparative insignificance. The outside world misjudges the Mormon people when it imagines that polygamy was ever a favorite doctrine. Doubtless to some few it was a personal passion, but it was denounced as a vice by the mass of the people, for they resisted it until they were compelled to yield their opposition, or else abandon the Church in which they had faith. The statistical reports of the mission in the British Islands (June 30, 1853) show that the enormous number of 1776 persons
were excommunicated there during the first six months of the preaching of polygamy. The entire Church then numbered, men, women, and children over eight years of age, 30,690. There were forty 'seventies' and eight 'high priests' (see § 51, 52, 53) all of these terms) from Utah in Britain at that time, carrying with them a powerful personal influence to help the Saints to tide over the introduction of this doctrine. These Utah missionaries were aided by a native priesthood of 2,578 elders, 1,854 priests, 1,416 teachers, 884 deacons, and 776 reapers, all of whom were excommunicated. That tells its own tale. That all these persons withdrew from the fellowship of the Mormon Church on account of polygamy would be an unfair inference. Still, doubtless polygamy was the great contributing cause of apostasy then, and more persons have left the Mormon communion on account of polygamy and Brigham's favorite deity, Adam (which he first preached in October of the same year), than all else put together. Few of the Mormon women have ever accepted polygamy from the assent of their judgments. They have first been led by their teachers to consider the doctrine true, and afterwards have been afraid to question it, even if they have come to their senses. . . . Brigham Young, with all the commanding influence of his position, could not silence the murmuring within his own domicile until he threatened to divorce all his wives, and told them that, if they despaired the order of heaven, he would pray that the curse of the Almighty might overtake them, and smite them with the day of snow and snows (Sermon, July 14, 1855, in the Bowery, Provo), and even all that violent language has not attained the end; their hearts revolt as much to-day, though they have schooled themselves into submission and silence' (p. 201, 202, 203, 206).

We spend the preparations and the wedding ceremony for a marriage in 'plurality' as sketched by the apostle Pratt:

"When the day set apart for the solemnization of the marriage ceremony has arrived, the bridegroom and his wife, and also the bride, together with their relatives and such other guests as may be invited, assemble at the place which they have appointed. The scribe then proceeds to take the names, ages, residence towns, counties, states, and other parts of the parties to be married, which be carefully enters on record. The priest, who is the prophet, seer, and revelator over the whole Church throughout the world, and who alone holds the keys of authority in this solemn ordinance (as recorded in the 3d and 4th par-agraphs, Section 5, of the revelations on Marriage and Divorce); the bridegroom and his wife to the bride and to the bridegroom, which they do, pronouncing the result of their own research and study, and declare the bride to be the bridegroom's wife forever and for all eternity? If you are, you will manifest it by placing her right hand upon her right hand in the presence of all the world. The right hands of the bridegroom and bride being thus joined, the wife takes her husband by the left arm, as if in the attitude of walking; the president then proceeds to ask the following question of the man; 'Do you, brother (calling him by name), take sister (calling her by name) by the right hand, to receive her unto yourself, to be your lawful and wedded wife, and you to be her lawful and wedded husband, for time and eternity, with their bountiful and faithful, and to hold and keep the laws, and ordinances pertaining to this holy matrimony in the new and everlasting kingdom of God, angels, and these witnesses, of your own free-will and choice? The bridegroom answers, 'Yes.' The president then asks the question to the bride: 'Do you, sister (calling her by name), take brother (calling him by name) by the right hand, and give yourself to him to be his lawful and wedded wife for time and eternity? If you are, you will manifest it by placing his right hand upon your right hand, and holding and keeping the laws, and ordinances pertaining to this holy matrimony in the new and everlasting kingdom of God, angels, and these witnesses, of your own free-will and choice? The bride answers, 'Yes.' The president then says: 'In the name of the Lord Jesus Christ, and by the authority of God, his holy prophet and apostles, I now pronounce you husband and wife for time and for all eternity.' And I seal upon you the blessings of the holy resur-
rection, with power to come forth in the morning of the first resurrection, clothed with glory, immortality, and power' (p. 554)."

"The reader will observe, that in this ordinance of polygamic sealing, the husband and the young bride are each asked the question, are you 'doing this in the presence of God, angels, and these witnesses, of your own free-will and choice,' while the question put to the wife is 'will carefully avoids the issue that would instantly arise between her wounded, bleeding heart and the falsehood that would be forced from her trembling lips if she essayed to utter that it was of her own free-will and choice.' That poor 'victim' is but asked if she has been subdued and is 'willing to give this woman to her husband' (Stenhouse, p. 567). It should be added that the Mormon president possesses the papal prerogative of annulling all marriages contracted under his sanction (Mrs. Stenhouse, p. 554 sq.) - a prerogative which cannot fail to prove a source of wealth and power to the one who exercises it. This authority, of course, they are ipso facto void, in foro conscientiae. Consequently either man or woman is at liberty to desert an unbelieving spouse and take another. Marriage, it may be stated here also, is allowed within near degrees; a man may marry two sisters, a niece, and mother and daughter, and even a half-sister.

8. Other Practices. - There appears to be no prescribed ritual for the burying of the dead, and there is but little of the true devotional element in any of the religious exercises of the Mormons. Their ordinary worship consists of prayers, with addresses, often of a very homely character, and hymns. The duties of private prayer, meditation, communion with God, self-examination, are seldom or never spoken of. "Every household," says Stenhouse, "is instructed to have morning and evening prayers. The father gathers his children around him, and all kneeling, he prays for revelation, the gifts of the Spirit for himself and family; then in turn comes every one of the family in turn and Brigham prays for himself; then may the heavens be opened unto him, angels visit and instruct him; clothe him with power to defend the thy people, and to overthrow all who rise up against him; bless him in his basket and in his store, multiply and increase him in wives, children, flocks and herds, houses and lands. -- make him very, very, etc. After Brigham has been properly remembered, then come his councillors, the apostles, the high-priests, the seventy, the elders, the priests, the teachers, the deacons, and the Church universal. Another divergence is made in remembrance of the president of the Conference, and the president of the stake, and of each branch of the Church, and every officer in it. All are prayed for - if the father does his duty. The power and the greatness of the 'kingdom' that is to roll on till it fills the whole earth, and subjegates all earthly and corrupt man-made governments, are specially urgent. All nations are to be made, cities and empires, to fall at his feet, or more of their prophets preach to them every Sabbath. "The gatherings and services," says Mr. Bowles, describing a service which he attended (Our New West, p. 248), "both in speaking and singing, reminded me of
the Methodist camp-meetings of fifteen or twenty years ago. The singing, as on the latter occasions, was the best part of the exercises—simple, sweet, and fervent. 'Daughter of Zion,' as sung by the large choir one Sunday morning, was prayer, sermon, song, and all. The preacher that day was apostle Richards; but beyond setting forth the superiority of the Mormon Church system, through its presidents, council, bishops, elders, and seventy, for the work made incumbent upon Christians, and claiming that its preachers were inspired like those of old, his discourse was a rambling, unimpressive exhortation. . . . The rite of the sacrament [of the Lord's Supper] is administered every Sunday, water being used instead of wine, and the distribution proceeds among the whole congregation, men, women, and children, numbering from three to five thousand, while the singing and the preaching are in progress. The prayers are few and simple, undistinguishable, except in these characteristics, from those heard in all Protestant churches, and the congregation all join in the Amen.” (Comp. Qu. Rev. cxiii, 486–488; Ollivant, p. 54, and Appendix A, p. 119, 147; Rae, p. 106 seq.) When the Temple is completed, as it is intended, as the founder ordered, to establish sacristies and every ordinance belonging to the priesthood as they existed prior to Moses’s day (Compend. p. 177). There are also some secret ceremonies, of which very different accounts have been given. The most important of these are the “mysteries of the Endowment House,” where the marriage ceremony is performed. Stenhouse tells us that “within its portals are performed all the rites and ceremonies that hold Mormonism together,” but he reveals nothing, probably because he is bound by oath to terrestrial secrecy. He indicates, however, that the importance of these secrets has been overestimated. Mrs. Stenhouse gives a detailed description of her own experience in the Endowment House, and it confirms the statement of an intelligent gentleman who, when interrogated shortly after passing through the house by one who had been there—“I went in expecting everything; I came out with nothing.” (Those desiring full details may consult Mrs. Stenhouse, Tell it All, ch. xxv.)

V. Hierarchical Organization.—Mormonism is a pure theocracy; its priesthood, who rule in matters temporal and ecclesiastical, make up about one fifth of the male members. They are recognized because of the declaration made by prophet Smith as “the channel through which the Almighty commenced revealing his glory at the beginning of the creation of this earth, and through which he has continued to reveal himself to the children of men to the present time, and through which he will make known his purposes to the end of time” (Compend. p. 170). They are divided into various orders. The highest is the First Presidency, composed of three, harmonious in representation upon the earth with “the Father, the Son, and the Holy Ghost” in heaven, and the successors of Peter, James, and John in

Design of Salt Lake Temple.—[From Stenhouse.]
the Gospel Church. Of these, the first is *primum inter pares* He is elected by the whole body of the Church, and possesses supreme authority. "Throughout all Mormonism," says Stenhouse, "the highest rank of the priesthood is in all countries, but side by side with this is the theory that a president is nearer to 'the throne' than his councillors, and that the latter may speak and diffuse their measure of light, at the moment the president is ready to decide what should be done, the 'Lord will give him direction'" (p. 560). The second office in point of dignity is that of Twelve, whose sole duty it is to administer blessings. He is appointed by the Church for life. Then follows the council of "The Twelve," whose functions are of great practical importance. They ordain all other officers, elders, priests, teachers, and deacons; they baptize, administer the sacraments, and take the lead in all meetings. Next come the Seventies (of whom there are many). They are under the direction of the "Twelve Apostles," and are the great propagandists, missionaries, and preachers of the body. The fifth order is that of High-priests, composed usually of men advanced in years. Their duty is to officiate in all the offices of the Church when there are no higher officers present. After these come the Stake-ops, who are "overseers" of the Church chiefly in secular matters, attending to the registration of births, marriages, and deaths, the support of "literary concerns" (such as newspapers and magazines), house-visiting, and the settlement of private grievances. The duties of the Secretary and Treasurer are much more specific and charged with the conduct of meetings, and exercise a general surveillance over the Priests, who correspond to the "fixed ministry" of other sects; i.e. they preach, exhort, and expound the Scriptures. The lowest orders are the Teachers and Deacons; the former are simply assistants to the elders and bishops, and act as catechists; the latter are Church-collectors, treasurers, etc. The whole priesthood is divided into two classes, the Melchizedek and the Aaronic. To the first belong the offices of apostle, seventy, patriarch, high-priest, and elder; to the second, those of bishop, priest, teacher, and deacon. The latter can be held only by "literal descendants of Aaron," who are pointed out by special revelation. Besides these office-bearers, there is also the Standing High Council, to settle difficulties among believers. This consists of eighteen (at first twelve) high-priests, appointed by ballot, with one or three presidents, being the first president alone, or with his assessors. All high-priests have been heard to be accused, and a certain number of councillors, from two to six, according to the gravity of the case, have spoken, the president gives his decision, and calls on the other members to sanction it. Sometimes a case is reheard; in special difficulties recourse is had to revelation. Every "stake" and separate church is governed by its own "High Council," with a similar constitution and procedure, and with an appeal to the Supreme High Council. General affairs are managed by Conferences, held April 6 in each year. At these, which sometimes last several days, the first presidency and other officers are elected in open balloting; unanimous, of the meetings; vacancies are filled, reports on various subjects are read, prayers are offered, addresses delivered, hymns and anthems sung, etc. (see Mill. Star, passion; Burton, p. 367 sq.; Qu. Rev. cxvii, 468). "This great net-work of priesthood, which covers everybody, and the influence of which permeates everything," says Stenhouse, "is the key to the power of their president over the Saints in Zion. Through the priesthood he can away them at his will. . . . As seen in all the Conference minutes, the people are, by their own free voting, made responsible for everything that is done; and when once they have (as they are obliged to do by fear of persecution or excommunication,) by uplifted hand before heaven, expressed their wish, it becomes their duty and obligation to sustain it" (p. 565). In theory, the Mormons recognize the right of private judgment; in fact, the attempt to exercise that right has always been hazardous. The whole duty of a Mormon consists in thinking and doing as he is told, even as regards his most private and personal affairs. The president may order a man to marry, a bishop may at any time enter any Mormon's house, and issue what orders he pleases. All Saints are compelled to deal only at the authorized shops and stores, which are managed on the co-operative system for the benefit of the Church. By means of a constant system of espionage, age any breach of rules is promptly noticed, and if it be persisted in the offender is cut off from the Church. Persons are even excommunicated without any reason assigned, and, on complaining, are told that their crime will in due time come to light; it being held that if any man fails in obedience to the priesthood in any respect he must have committed some great crime, whereby he has lost the Spirit of God (Ollivant, p. 86, 87). Indeed, all the arrangements at Utah are admirably suited to maintain obedience. Every means are adopted to prevent crime, and by that means keep the money; so that while a man can live from hand to mouth in some comfort, he cannot save anything. The majority, therefore, are virtually dependents in Utah (Ollivant, p. 47, 101). If any man secedes, or is cast out, all Mormons are forbidden to have any intercourse with him, even to give him shelter; and so times violence, even to death, has been used. All "Gentiles" are suspected, and every means are used to keep them away (see Rae, p. 118-120; Fraser's Mag. June, 1871, p. 692).

VI. Propagandism, etc.—Missions are a great feature of Mormonism. Any member of the priesthood is liable to be sent at the will of the president on a sudden impulse, at short notice to "preach the gospel to the Gentiles." "Joseph Smith, the prophet," says Pres. George A. Smith, "enjoined upon the twelve apostles that they should preach the gospel to all the nations of the earth, and wherever they could not go to send the same, that all duty is to be discharged for the propagation of the everlasting gospel in all its purity and fulness for the salvation of mankind, and the near advent of the Messiah, preparatory to the introduction of his reign of righteousness upon the earth" (Ans. to Questions, p. 30). The zeal and activity of these emissaries, though it has been much exaggerated, is still remarkable. The Mormon presidents are good judges of character, and it seems to be their plan to select the restless and enterprising spirits, who, perhaps, may threaten disturbance at home, and to utilize their fanaticism, while they fatter their vanity, by sending them as representatives of the Church to plant fields of influence in the world. In his twenties, says Stenhouse, "to the elder in hoary age, all the brethren are subject to be called on mission' at any time, and in such calls no personal conveniences are ever consulted. Should a merchant be wanted for a 'mission,' his business must be left in other hands; and his affairs must be conducted by a woman; so with the artisan, the mechanic, the farmer, and the ploughboy—they must in their way do the best they can. Seed-time or harvest, summer or winter, pleasure or important work—nothing in which they are engaged is allowed to stand in the way. If poor, and the family is dependent upon the big-footed ploughman, there shall be no hindrance—the mission is given, he has to go, and the family 'trusts in the Lord,' and in the tender mercies of the bishop!" (p. 568). Their method of establishing a mission in a foreign country is as follows...
Among their converts, taken at random from the mixed population of the Union, there are natives to be found of every nation in Europe. They select a native of the country to which they have removed for their teacher, and send him to the other emissaries whom they are about to despatch to the land of his birth. On arriving at their destination, the missionaries are supported by the funds of the Church till they can maintain themselves out of the offerings of their proselytes. Meanwhile they employ themselves in learning the language and circulating among the different tracts in defence of their creed, and then sit down to the weary task of translating the Book of Mormon. By this process they have formed churches in Great Britain, France, Denmark, Sweden, Norway, Iceland, Germany, Palestine, the Pacific Isles, Italy, Switzerland, Mexico, Canada, the West Indies, and the Sandwich Islands; and, besides these, they have also sent missionaries to Siam, Ceylon, China, Hindostan, the West Indies, Guiana, and Chili. The Book of Mormon has been published in French, German, Italian, Danish, Polynesian, and Welsh. Besides various tracts which are circulated by these missionaries, they have established regular periodicals in English, German, French, Welsh, and Danish. We should observe, however, that of the missions above enumerated, those to Great Britain, the Icelandic countries, and the Sandwich Islands have alone been really successful. In England they preached first in the summer of 1837, and at their April Conference in 1841 there was represented a total of 5184 persons baptized. Of these, 106 were ordained elders, 303 priests, 109 teachers, and 63 deacons. Besides these, 800 souls had emigrated to "build up Zion at Nauvoo." In Denmark, at the beginning of 1858, they possessed 1400 baptized converts, and had also dispatched 297 more to Utah. In the Sandwich Islands they baptized thousands before their mission had been established twenty months. These proselytes were all previously Christians, converted from heathenism. The other foreign missions have as yet only succeeded in making a very small number of proselytes. In Great Britain, as we have seen above, the promulgation of the doctrine of "plurality" has seriously checked the progress of Mormonism. Of the converts made from 1840 to 1854 in the different missions, 17,195 emigrated to this country to "strengthen Zion." Up to 1860 about 30,000 Mormons had come, and from that time to the present there have probably been 25,000 more, making a contribution to America of a round 55,000 souls. And yet these figures do not even distinctly convey the spread of Mormonism in Europe. The very sons of the apostles and prophets testify, on their return from Utah to European missions, that "they never knew what Mormonism was before," and that the Elders went among both these and all others in Europe, giving any seeking detailed information regarding Mormonism. See, however, especially, a Compendium of the Faith and Doctrines of the Church of Jesus Christ of Latter-day Saints (1857); Letters exhibiting the most prominent Doctrines of the Church, etc., by Elder Orson Spencer (5th ed. 1866); Sacred Hymns and Spiritual Songs for the Church, etc. (12th ed. 1863); Tracts, chiefly those by Orson Pratt; The Millennial Star, a periodical published for a while at Liverpool (15 vols. up to 1853); The Evening and Morning Star, edited by W. W. Phelps (1821, 1823); Times and Seasons, founded and published at Nauvoo (1843 sq.); The Seer, edited by Orson Pratt, and published at Washington; Desert News, published at Salt Lake City, being the official paper of Mormonism; Voice of Warning to all Nations, by Parley P. Pratt; Bennet, Mormonism Exposed (Boston, 1842); Kane, The Mormons (1850); Mackay, The Mormons (4th ed. Lond. 1851); Gifford, Two Months in the Land of the Prophet; is regarded by them as the true living head of the Church, and under his direction they have established themselves in the place pointed out by their founder as the site of the "New Zion." Their number, which is incomparable, will probably be largely increased soon, if polygamy is not abandoned in Utah, "Young Joseph" is peculiarly "favored" with "visions," and "visits of angels," and "gifts of tongues," "interpretations," and "powers of healing," and these gifts he has used in the establishment of his Church in all the ways of the Most High. Some of their elders and prophets have been in Utah, and there "added numbers to the New Church, and shook the faith of many more in Brigham" (Stonehouse, p. 629). Another branch of the Church has recently established itself at Independence, Mo., they regarding this place as the supposed site of the New Jerusalem. But this branch only counts an insignificant membership. The most powerful opposition to Mormonism came out of its own midst in the beginning of 1869, when a large number of influential Saints quit- ted the main body, and formed themselves into an independent Church in Utah, and the Middle City itself. They first assumed the name of "Church of Zion," and have been holding religious services in a hall built by Young for his own disciples, beginning Dec. 19, 1869. "Of all the apostasies from the Mormon Church," says Stonehouse, "this was the most formidable, and has done more damage to the Brigham Young than all of them put together. The preaching of the 'reformers' [as they were called] first shook the people's confidence in the Prophet; and, as they travelled further, it has led many of them out of Mormonism altogether" (p. 643; comp. p. 630 sq.). The "reformers," who were distinguished both as advocates of freedom of thought and action, as opposed to the despotism of the priesthood, have since become zealous propagators of spiritualistic views; but, as they are all of a superior class, they have had liberality enough not to seek to carry their companions with them, and, while the movement has been subject to more or less change since it first started, there still remains enough to characterize it as the beginning of a "liberal" Christian Church. The Church structure which they have erected, first christened "Church of Zion," has been changed to "The Liberal Institute," and there lecturers, male and female, of every shade of opinion in religion, politics, or science, can speak for the edification of Saint and sinner. "The Liberal Institute," says Stonehouse, "is the Fanueil Hall of Utah, and from its platform will go forth facts of history and science that will work in a few years a grander revolution among the Saints than would the presence of ten thousand sand troopers, or any other movement that could possibly be construed into persecution."

VII. Literature.—The publications of the Saints are very numerous. A pretty full account of their work in this direction is furnished by Mr. Stonehouse in an Appendix (ii) to his work, p. 741 sq. Mr. Burton has also compiled a similar list in the December numbers of both these periodicals. But as in the case of any seeking detailed information regarding Mormonism, see, however, especially, a Compendium of the Faith and Doctrines of the Church of Jesus Christ of Latter-day Saints (1857); Letters exhibiting the most prominent Doctrines of the Church, etc., by Elder Orson Spencer (5th ed. 1866); Sacred Hymns and Spiritual Songs for the Church, etc. (12th ed. 1863); Tracts, chiefly those by Orson Pratt; The Millennial Star, a periodical published for a while at Liverpool (15 vols. up to 1853); The Evening and Morning Star, edited by W. W. Phelps (1821, 1823); Times and Seasons, founded and published at Nauvoo (1843 sq.); The Seer, edited by Orson Pratt, and published at Washington; Desert News, published at Salt Lake City, being the official paper of Mormonism; Voice of Warning to all Nations, by Parley P. Pratt; Bennet, Mormonism Exposed (Boston, 1842); Kane, The Mormons (1850); Mackay, The Mormons (4th ed. Lond. 1851); Gifford, Two Months in the Land of the Prophet; is regarded by them as the true living head of the Church, and under his direction they have established themselves in the place pointed out by their founder as the site of the "New Zion." Their number, which is incomparable, will probably be largely increased soon, if polygamy is not abandoned in Utah,

MOROCCO (or MAROCO), called by the natives Maghrib-el-Asa, i.e. “the extreme west,” an empire or sultanate in the north-west of Africa, and lying about 2,000 miles west of the E. by Algeria, on the N. and W. by the Mediterranean Sea and Atlantic Ocean, and on the S. by a line which runs from Cape Nguni (Lat. 20° 45' 43" N.) in an easterly direction through the Sahara to the Algerian frontier, in long. 20° E. It includes at the present day the former kingdoms of Maghribi, Fes, and Tanger, covering 190,560 English square miles, with a population of about 6,000,000, according to Behm (Geographisches Jahrbuch, 1866).

The inhabitants, like those of Barbary (the entire country of North Africa, from Egypt to the Atlantic Ocean, and from the Mediterranean to the Great Atlantic), in general, consist of Moors, Berbers, Arabs, Negroes, and Jews, with various intermixtures between these races. The Berbarians, who have kept their identity notwithstanding the long period of time they have dwelt in the country, are mostly given to cultivation of the land; indeed, they are the only agriculturists of the country. They dwell mainly in the valleys. The Moors (q.v.) are the most numerous in the cities, and are the dominant race in Morocco, numbering about 4,000,000; next to them are the Berbarians, or Amazigh, who amount to about 3,000,000, and include the Berbers of the Subeiha and the Shilha of the Greater Atlas. Very few Europeans reside in Morocco. The state of civilization is very low, and many of the Amazigh are complete savages. Excepting the Jews and the few Europeans, the whole population is Mohammedan. The negroes, numbering only about 20,000, were generally brought into the country as slaves from Soudan, until the abolition of the African slave-trade.

The country is generally mountainous, the Atlas range traversing it in several parallel chains from the southwest to north-east, and sending numerous spurs to both the coast country and the desert. There are, however, many level tracts throughout Morocco, especially at its western extremity, and even extending in the extreme south of the desert. Morocco is divided into four territories—Fez, Morocco, Susa, and Tafilalet. For convenience of administration, the empire is subdivided into thirty-three governments or districts ("ammasa"), each under the superintendence of a "caid," whose chief duty it is to collect the imposts; but the several constituent tribes are ruled by their own chiefs, and scarcely acknowledge the authority of the sultan. The government is purely despotic, and in the absence of written laws the will of the sultan and his subordinates decides everything. The public officials excite their allowances by practising extortion on those under their charge, and are at times plundered by their superiors. The sovereignty of Morocco, called by Europeans emperor, is known among his subjects as sultan, and assumes the titles of Emir-ul-mumenin, or "Prince of the Believers," and Khuljiati-aliyah-f chakkhi, or "Viceroy of God upon Earth." They regard the sultan as the being who must necessarily descend to the eldest son. The revenue of the emperor consists of a tenth upon every article of consumption, as allowed by the Koran; an annual tax upon the Jews; custom-house and excise duties; tributes exacted from his own subjects, foreign states, and European merchants, in the form of presents; which last articles form the chief source of his income. The
duties and tributes are so frequently changed that it is
impossible to estimate their annual amount with any
degree of certainty.

Among the products of the country are wheat,
barley, rice, maize, durra, and sugar-cane; and among
fruits, the fig, pomegranate, lemon, orange, and date are
common; while cotton, tobacco, hemp, etc., are largely
produced both for home use and export. Morocco is
rich in mineral treasures; plentiful supplies of copper
are mined at Tifeltet, near the source of the As-
aker, and gold and silver occur in several places. Iron,
antimony, lead, tin, and rock-salt, the last three in
considerable quantity, are also found. Owing to the char-
acter of the country and its thin population (thirty-five
to the English square mile), the country is much infested
with wild animals. Hyenas, panthers, leopards, wolves,
and wild goats, deer, gazelles, etc., abound in suit-
able localities, and occasional devastations are com-
mitted by locusts. Ostriches are found in Tafilet.
The Moorish horses, formerly so famous, are now much de-
generated. The breeding of sheep, oxen, goats, camels,
mules, and asses forms an important item of national
industry. Oxen and bulls are chiefly employed in field
labor.

The only industrial arts prosecuted to any consider-
able extent are the manufacture of caps, fine silk, and
leather. In the production of the last article the Mor-
ocans far surpass Europeans. There is an important
carry trade between the coast and the interior, and
with Mecca and the Levant. The intercourse with Al-
giers has in very recent times become a source of great
trouble, and there is danger of war between France and
Morocco unless the emperor's subjects shall hereafter
prove more considerate of French interests. The Jews
of Algeria, who largely control the caravan trade, have
been very unkindly treated, and their complaints have
been made the subject of special diplomatic service, the
end of which is not yet (April, 1875). Education con-
stitutes in learning to read, write, and recite portions of
the Koran, and this quantum of education is pretty
generally diffused among the people; but the art of
printing is unknown, and the arts and sciences are at a
very low ebb.

The religion of Morocco was no doubt Christian unti-
l, in the 7th and 8th centuries, the Saracens overran
it, and made converts of the native population. See
ARABIA, in the article on this chapter, that Morocco
was henceforth faithful to the Moslem faith. Yet
tolerance is granted in some measure to any sect which
does not teach a plurality of gods; and on proper ap-
lication is permitted to appropriate a place for public
worship. There are Roman Catholic establishments in
Morocco, Mequines, Mogador, and Mogador, and in
the latter the community is as much as two hundred.
Protestants are scarcely known in the country, and thus
far no missionary efforts have been made in this part
of Africa. Until 1814 Christians were frequently held
as slaves, but since the power of France asserted its-
self on the African coast, this abuse has terminated.
Some of the practices of these natives are very peculiar.
Thus through all the country there are buildings of an
octagonal form called Zawiant, or sanctuaries, with an
unenclosed piece of ground attached to each for the
interment of the dead. In these places is a priest or
priestess, who superintends divine service and the burial
of the dead, who is often applied to an arbiter in disputes.
In these consecrated places the wealthy in-
habiting often deposit their treasures for security, and
criminals find protection against the hands of justice.
Polygamy is practiced in the country generally. The
emperor himself supports a large harem, but has one
superior wife, who is sultana, and three other wives, in
addition to his several concubines. Besides these he has a large number of concubines.
Many of these are Moorish women, as the Moors con-
sider it an honor to have their daughters in the harem;
some of them European slaves; several are negroes; in
all there are usually from sixty to one hundred,
besides their slaves and domestics. Priests, who are so far learned as to read and write, are employed to
prepare the younger part of the harem to repeat their
religion. The other religious institutions of the empire are so similar to those of most Moham-
medan countries as to render a separate account of them altogether superfluous. See MOHAMMEDAN.

The history of Morocco is, generally speaking, similar
to that of the rest of Northern Africa (q. v.), down to
the end of the 17th century. About that time it was
formed into a monarchy, and, notwithstanding internal
divisions, enjoyed considerable prosperity, and the con-
finement of the empire was extended as far as Timbucto.
This empire fell to pieces, and was succeeded in 1847
by that of the princes of Tafilet, who conquered both
Morocco Proper and Fez, and united the kingdom
under one government. This is the present ruling dy-
nasty. In the middle of the 17th century the empire of
Morocco embraced part of the present province of
Algeria, and extended south as far as Guinea, where it
came into collision with the Portuguese settlements.
Since the commencement of the 19th century the rebel-
ions of the wild mountain tribes, the disturbances in
Algeria, and difficulties with foreign states, caused by
the aggressions of the Riff pirates, have greatly retarded
the well-conceived measures of the various rulers for
the development of the resources and increase in the
aviation of the country. In the course of his reign
throughout Morocco. In 1844 Morocco took part in the
war of Abd-el-Kader against the French, in the course
of which Tangier was bombarded and Mogador occu-
pied; but peace was concluded in the same year. In
1851 and 1856 complications took place with France
concerning some French vessels which had been plun-
dered by the Riff pirates, but in each case compensation
was given by the sultan. In 1859 the Spanish govern-
ment, smarting under a series of similar outrages, de-
manded compensation, and also an apology for an insult
to the Spanish flag at Ceuta; and on the sultan’s dis-
claiming all responsibility for these acts, war was de-
clared by Spain Oct. 22, 1859. A short invasion brought
the sultan to terms on March 25, 1860, and a treaty was
accordingly signed April 27, 1860, by which the sultan
ceded great commercial and social advantages to Span-
iards. Christianity was by special treaty afforded
some security, but on the condition that the inhabitants
should be reconverted to Roman Catholics. As a conse-
quence of these treaties a mission-house was opened at Fez, which promises to
do something, but has as yet accomplished very little
for the conversion of natives to Christianity. See Spec-
chio geografico e statistico dell’ impero di Marocco (Ge-
sul, 1839); Arbeau, ‘Cours du culte des magiens et des esprits, hi-
torico, e politico del impero di Marruecos (Madrid, 1844);

mann’s Mittheilungen (1863-65).

MOROCCO, SAMUEL ISRAELI OF, a Jewish convert
to Christianity, and an author of considerable distinc-
tion, who lived at the close of the 11th century, is said
to have come to Toledo from Fez, in Africa, about the
year 1085, where he became a convert to Christianity.
Before his conversion was completed he addressed a let-
ter to rabbi Isaac, a Jew in the kingdom of Morocco,
in which he says, ‘I would fain learn of thee, out of the
testimony of the law and the prophets, and other Script-
ures, why the Jews are thus smitten. Is this a captivity
wherein we are, which we may be properly called the
perpetual captivity? It is the captivity of our forefathers, it
is now above a thousand years since we were carried cap-
tive by Titus? And yet our fathers, who worshipped
idols, killed the prophets, and cast the law behind their
back, were punished only with a seventy-years’ captiv-
ity, and then brought home again. But now there is
no end of our calamities, nor do the prophets promise
VI.-21*
any. This famous epistle, منام, which was originally written in Arabic, and gives in twenty-seven chapters an ample refutation of Jewish objections to the Christian faith, was translated from the Hebrew into the Latin by the Dominican Alonso de Buen Hombre in 1529, under the title, Tractatus malum usus ad con- victionem gentium, que sunt ad orientem, de evangelio de Messis aduersus venturo, et de observancis legis Moisieo, and often since, and has been inserted in the Bibliotheca Patrum, xviii, 1519; into Italian by G. A. Brunati (Tri- dent, 1712); into German by W. Link (Altenburg, 1524), and inserted in Luther's works, v, 567–583; and often since by J. Heinis and J. Reusner, 1763; by J. Stieh- lendorf (Trier, 1833); and into English by Th. Calvert, under the title, Demonstration of the true Messiah, by R. Sam- uel, a converted Jew (s. i.e. a). A Spanish translation of this letter still remains in MS. in the library of the Escorial. Soon after his conversion rabbi Samuel appears to have returned to Morocco, whence his surname, and there to have held a conference on religion with a learned Mohammedan, of which his account, still in MS., is also to be found in the library of the Escorial. Hebr. iii, 1190–1196; De Costa, Italia et Corsica, p. 911; Adams, History of the Jews, ii, 40. (B. P.)

Morone, Giovanni, an Italian prelate of considerable note for the illustrous part he took in the Reform- atory movement of the 16th century, and for the noble efforts he made to uphold the lustre of the Roman Cath- olic Church, was born at Milan, Jan. 25, 1509, and de- scended from a noble family. His father, count Giro- lamo Morone, is of historic celebrity from the efforts he made to free his country (Milan) from the yoke of Charles V, and for his subsequent devotion to imperial interests. During his younger years Giovanni Mor- one was carefully instructed at home, and afterwards sent to the University of Padua to pursue his more serious studies. There his talents and assiduous applica- tion procured him honors which enrolled his name among the chief philosophers and jurists. In 1529 Morone finally took orders, and, though yet a youth, his unusual attainments rapidly secured him friends and position, and in the year following he was elevated to the bishopric of Modena. He was also in the same year selected by Paul III as papal nuncio to the emperor Ferdinand, and in that capacity did most excellent service to the Roman cause. He was instrumental in pre- paring the way for a council of the German princes for a final settlement of all religious differences, and did everything possible to prevent the heresy of the Protest- ance. He was a most ardent enemy of heresy and dotage, and he was imbued with a devotion to the church of Rome. Yet it must not be inferred that he was so conciliatory as to ignore his own personal convictions. Determined to sustain the papal cause, he was yet in favor of reformatory measures, and succeeded in per- suading both parties to give him their confidence be- cause he acted conscientiously. He never feared to do or say what he thought right. Thus in 1540, when, on account of the plague, the Diet was to be removed from Spires to Hagenau, Morone hesitated not to make a most energetic protest, and in consequence was finally recalled to give an account of himself at Rome. His explanations must have been satisfactory to Paul III, for in 1541 Morone was again on his way to Germany to attend the Spires Diet, and in 1542 he attended the Diet at Ratisbon, where all hope of union between Protes- tants and Romanists was entirely extinguished. Yet, notwithstanding the failure of reconciliation, Morone's success for acknowledgment at Rome, and he was this same year selected as representative to the Church, was also sent, together with Parisio and Pole, as papal rep- resentative to the nominal opening of the Council of Trent (November, 1542). His consummate knowledge of affairs pointed to him as the proper person for papal envoy when, the Tridentine Council having failed to secure the support of the German princes and theologie- gians, another Diet was called at Spires by the em- peror in 1544. This was a most difficult task. Charles V, justly regarding Count Morone as so sagacious a man to perceive how the Protestant princes would take courage now, and move forward to a platform from which it would hereafter be difficult to dissolve them. He failed to influence the emperor as he desired, yet his faithfulness to the papal cause was universally acknowled- ged. When the council was returned to Rome, and Cardinal of Bologna, then become vacant by the death of Contarini (q. v.), was conferred on Morone. In 1540 he gave up the bishopric of Modena, that diocese having during his absence become greatly distracted by the spread of Re- forming opinions. Whatever secret modifications his own views had undergone, he was not to be moved, nor had he ever intended, to contaminate himself with the odious name of heretic; and therefore, rather than suffer his diocese to be spoken of as one alien to the faith, he promptly gave it up altogether. He had earnestly tried, immediately on his return from Germany, to rally his clerical and secular subjects to the firmest confidence in its inception and construction that all might endorse it; but he had failed to unite them by this measure. Several of the most learned theologians deserted the territory rather than perfure themselves in any manner. The academicians were specially remiss in submission, and Morone finally wrote to Rome for permission to withdraw the papal bull, "as they had assured him of the sincerity of their devotion to the Roman Catholic Church, and had entreated that suspicion might not be cast on their faith by obliging them to subscribe" (Life of Palestris, ii, 20). The papal answer proved unfavorable in more than one respect. The pope, thinking Morone too indulgent, which no doubt was true, for he himself believed the doctrine of justification as held by the Lutherans, had appointed six cardinals to examine the condition of this Italian diocese. Morone, naturally enough offered at such a want of confidence in his in- tegrity and competency, had almost then resolved to withdraw altogether from the service of the same; but the emperor's entreaties prevailed, and he was induced to con- tinue its spiritual head at least for a while longer. But the continued spread of Reformation opinions, and his own indisposition to punish men for conscience' sake, so long as they avowed obedience to the pope of Rome as the head of the church, finally led in the course of 1546, to the union of the diocese altogether, and Foscarrini, a Dominican friar, and a man of great talent and virtue, became his successor. The latter did not live to quit the diocese under such favorably auspices, but was taken from the episcopal mansion to the heretic's prison (Life of Palestris, ii, 40). Morone, however, lost nothing by forsaking the diocese of Modena, for he was by the duke of Milan presented with the bishopric of Novara. In 1549 Morone's friend at Rome, pope Paul III, died, and the next incumbent of the papal chair became Julius III. He was not warm- ly attached to our cardinal, yet at least esteemed him, and in 1555, when the Diet of Augsburg was to be convened to discuss important religious topics, Morone was select- ed as the representative of Rome. Scarcely, however, had the cardinal reached Augsburg when the news of the sudden death of his pope was brought him, and he was obliged to turn back to Rome. He was now instru- mental in elevating Marcello II, and hoped for reforma- tion and purification in the Church. But this good work lived only a short time, and again the papal concile was convened. The most prominent candidate was Ca- raffa, the inquisitor: a man of harshness of character, and not highly esteemed by Morone. The two had not been on very favorable terms for some time. Caraffa had
suspected Morone of heresy, and the cardinal, in turn, had thought the inquisition hypercritical and inhumane in the exercise of his official functions. Yet, moved by the sentiments of a generous mind, Morone, after all, cast his influence in the concave for Caraffa (believing thereby to disarm his enmity), and thus helped to create him a Paul IV. No sooner, however, was Caraffa elevated to the papal throne, than the inquisitors commenced a series of Morone's enemies, and the cardinal was accused of leaning to the doctrines of the Reformers, and imprisoned in San Angelo to pass examination on his religious opinions. The only proofs of the heretical opinions of Morone are to be found in the articles of accusation drawn up by Caraffa at the beginning of the year 1552, who had left Italy, published these articles, with scholia on each article. No one was better acquainted than Vergerio with the facts treated of under the several heads. Though this little book came out anonymously, it bears marks of its origin. Printing being then comparatively in its infancy, each printer and the place of his habitation were pretty well known by the form of his type. Vergerio lived a good deal at Tübingen after he left Italy, and it is thought that these articles were sent to him, and that he printed them in despite of the Church of Rome. (A copy of these articles may be found in the Life of Polemario, ii, 303 [12]). Notwithstanding the revanche of the inquisition of the inquisitors of Morone prevented their finding any proof against him of heresy, and he was declared innocent. But after the inquisitors had pronounced cardinal Morone free from all heretical taint, and Paul IV had given orders for his liberation, he refused to go out of prison unless the pope publicly declared he had been unjustly accused. This Paul could not be persuaded to do, and Morone remained in prison till the death of that pope in 1559. On this occasion, after some discussion among the cardinals, he was liberated, and allowed to sit in the conclave which elected cardinal De' Medici pope, who took the name of Pius IV. After the election of the new pope the papal chair Morone was reinstated in his former influential position. In 1562 the cardinal was sent as papal legate to the emperor Ferdinand, and in the year following Morone became the presiding officer of the Council of Trent, and continued as such during all the important sessions of this ecclesiastical council. From the very beginning of his work at Trent he played a most important part, and exerted a most salutary influence for the Roman cause. He was conciliatory in speech and action, and intimated to the council that he came by the order of the pope "to establish the articles of faith, correct the abuses of the church, and promote the peace of Christ, so far as was consistent with the dignity and authority of the Holy See." This position seems not to have been warranted, however, by the views entertained at Rome; for it is now quite clearly revealed that the pope was determined to refuse the reforms desired by the common clergy and the people of Germany, and that Pius IV was at the time more desirous of enjoying the promises of Spain's support in case Ferdinand ignored the papacy, and went over to the Protestants. Yet Morone must certainly have had the appearance of truth in his own dealings with the emperor, as that sovereign, in a meeting with Morone at Innsbruck in 1560, granted nearly all the favors he asked for, and even gave his sanction to an early discontinuance of the council, which was brought about this very year, Dec. 4. See Trent, Council of. Morone's services could not be too highly estimated at Rome. He had brought the council which threatened so much mischief to the papal cause to a close without any dispute or bloodshed, and authorized the pope to leave the Inquisition in a more enviable position than it had occupied previously. "All," says Ranke, "ended at last in a prosperous issue. That council which had been so vehemently called for and so long avoided; after being twice dissolved, shaken by so many of this world's storms, and when convened for the third time, anew set at peril, was now closed amid the general concord of the Roman Catholic world." On his return to the Eternal City the cardinal was therefore made dean of the cardinal college, and intrusted with diplomatic missions whenever the services of an acute and trustworthy messenger were needed. Upon the death of Pius IV, in 1566, Morone came very near being elected pope. Unfortunately for Italy, sternest counsels prevailed, and the pope, instead of Paul IV's, the inquisitor, was consecrated to the papal chair. We have no means of ascertaining what were Morone's feelings when he saw the power of the Inquisition, from which he had suffered so much, again seated on the papal throne. Morone died Dec. 1, 1580, at Rome, and was buried in the church of the Minerva. He spent much of his life in activity, and there remain from his pen only some letters to Alessandro Pole Cortese, and some of his orations. See Selchorn, Annalastes Literari, xii, 587 sq.; Tiraboschi, Lett. Ital. vii, 290; Young, Life and Times of Pole- lard (London, 1860, 2 vols. 8vo), ii, 807-314; Fisher, Hist. Morosino, Giulio (originally Samuel Nachmias), a Jewish convert to Romanism, was a native of Thessalonica. In Venice, where he settled, he first received a favorable impression of the truth of Christianity by being present at some public disputations on the nature of salvation, one of whom had renounced Judaism, respecting the accomplishment of Daniel's prophecy of the seventy weeks. In this dispute Simone Luzzatto (q. v.), the celebrated rabbi of Venice, was chosen arbitrator. Luzzato's explanation was, "I beseech you to permit us to be silent and shut up our books, but if we proceed to examine the prophecies any further we shall all become Christians. It cannot be denied that in the prophecy of Daniel the coming of the Messiah is so clearly manifested that the time of his appearance must be allowed to be already past; but whether Jesus of Nazareth be the person, I cannot determine." This speech closed the debate, and made such a deep impression upon Samuel and his brother Joseph that they both formed the design of renouncing Judaism. Grätz, the Jewish historian, says that Nachmias either misunderstood or perverted Luzzato's expression (sic!), but the fact is that a few months after, upon reconsidering the subject seriously and calmly, both brothers embraced Christianity, and were openly baptized Nov. 22, 1649, Nachmias assuming the name of Giulio Morosino, while his brother took the name of Ottavio. Ten years later he was called to Rome by pope Clement IX, who invested him with the office of librarian at the Vatican library, and this position he held until his death in 1657. Morosino wrote, Via delle fede monstrata a gli Ebrei (Rome, 1683), in which he appeals to the Jews no longer to be bound to observe the ceremonies, but to embrace the doctrines of the Gospel. See Kalkar, Israel u. d. Kirche (Hamburg, 1864, 4to), Furst, Geschichte d. Juden (Engl. trans. by Taylor), p. 725; Adams, History of the Jews, i, 76 sq. (Boston, 1812); Wolf, Bibl. Hebr. iii, 1128; Grätz, Gesch. d. Juden, iv, 164; Bartolocci, Biblioth. Rabbin. iii, 756; Fürst, Bibl. Jud. i, 981; iii, 8. (B. P.)

Moroesso, Giuseppe, an Italian prelate, descended from an ancient and noble family, was born in March, 1758, at Turin. Under the tuition of the abbot of Aligre, where he received his knowledge of the holy scriptures, he made doctor of theology in 1777, and finished his studies at Rome in the ecclesiastical college, where Litta, Caraccioli, Pacca, and Emmanuele de Gregori were his fellow-students. Pope Pius VI nominated him successively apostolic prothonotary, vice-legate of Bologna, governor of Perugia and Civitavecchia, Bishop of Volterra. He was one of the cardinals for the papal see in the conclave which resulted in the election of Pius VII, and after the accession of the new
pope was by him sent as ambassador to the King of Etruria. In 1802 Morozzo received the title of archbishop of Thebes in partibus, and was appointed secretary of the Congregation of Bishops. In 1808 he went to Paris with the difficult mission of adjusting the contentious points which had been raised between the pope and the emperor (Napoleon I); but, becoming aware that his efforts were futile, he retired to Turin. In 1816 he was created cardinal, and in 1817 made bishop of Novara. He died March 22, 1842. He published Statistiche del partito di S. Pietro (Rome, 1757); and a Eulogy on cardinal Bobis (Turin, 1759, 4to).

Morpurgo, SIMON BEN-JOSHUA-MORGES, a Jewish writer of note, was born at Gradiska in 1681; studied at Padua, and graduated as doctor of medicine in 1709. He was ordained by Leon Briele rabbi of Mantua, and in 1721 he was called to the rabbinate at Ancona, where he died in 1740. He wrote, in Hebrew and Arabic, a collection of legal decisions (2 parts, Venice, 1742, 1748)—תומאת בעניין הרמב"ם, The Tree of Knowledge, commentary on the ethical works of Maimonides, entitled Beshoat Olan (Venice, 1740)—an approbation to Isaac Norzi's הַמַּעֲמָכָה (ibid. 1715, 1717). Comp. Fürst, Bib. Jud. ii, 891; Wolf, Bibl. Hebr. iii, 1160; Jöcher, Allgen. Gliedern Lez. a. v.

Morrell, THOMAS, one of the fathers of that branch of American Methodism known as the Methodist Episcopal Church, was born at New York Nov. 22, 1747. His mother was a devout follower of Mr. Wesley, and a member of the pious band led by Philip Embury. Thomas lived in most exciting times, and when the war for freedom broke out he early took to arms for republican life. He held successively the commissions of captain and major, and gained honorable distinction on the field. In 1765 Thomas Morrell was deeply impressed with his relation to God and the Church, and determined to enter the ministry. He joined Conference in 1767, and was stationed at Trenton Circuit, N.J. In 1788 he was preacher in charge in New York, with Robert Cloud as associate, and the following year their labors were blessed with a great revival. The same year he was ordained elder, and continued in that city five years. He was sent to Philadelphia in 1783 to 5; there he took sick, and not entirely well until 1799; next to Baltimore for two years; and in 1802-3 stationed at New York for two years. After this Mr. Morrell was never stationed out of Elizabethtown, N.J., but continued to labor regularly sixteen years until 1822, when he preached usually every Sabbath, sometimes once a month. After this failing health obliged him to desist from pulpit labor, and he only preached occasionally. He died Aug. 9, 1838. Father Morrell was a man of vigorous mind, and well endowed naturally for the work to which he felt himself called. He had fine preaching talents, and discharged the duties of his office with great acceptability and success. He was bold, earnest, and scrupulously faithful in all things. His name, usefulness, and devotedness to Christ's Church are remembered and honored. See Meth. Quart. Rev. 1841, p. 322; Sprague, Annals of the Amer. Pulpit, vol. vii; New Jersey Conf. Memorial; Minutes Ann. Conf. ii, 698.

Morren, NATHANIEL, a Presbyterian divine, noted as the author of valuable Biblical works, flourished in the first half of our century, between London and Scotland. He was born in 1798, and died in 1847. Morren published, Annals of the Church of Scotland from 1739 to 1776 (Edinb., 1835, 3 vols. 8vo).—Biblical Theol., vol. i.—Rule of Faith (1833); and a translation of Rosenmüller's 'History of the Mission of Central Asia Minor, Persia, and Arabia' (1829) was published by him. After his death his Sermons were published with a Memoir (1848, 8vo). See Lowndes, Brit. Lib. p. 711; Allibone, Dict. of Brit. and Amer. Ath. a. v.

Morrill, DAVID LAWRENCE, a noted American phy-
Morrism, John G., D.D., an American Lutheran
divine of note, was born at York, Pa., in 1808, and was
educated at Dickinson College, Pa. (class of 1829); then
studied theology at Princeton Theological Seminary,
and was ordained the Lutheran pastor. He was
at one called as pastor to the First Lutheran Church
in Baltimore, and for six years (1859-65) of another
Lutheran Church in the same city. He was, the first
librarian of the Peabody Institute at Baltimore; he
founded a seminary for young ladies at Lutherville,
and was active in several other public enterprises.
He was editor of the Lutheran Observer from 1831 to
1832, and co-editor of the Year-book of the Reformation
(1844). He published several translations of
German theological works (1824-26), and wrote himself,
Popular Exposition of the Book of Genesis (2 vol., 8vo).
—Life of John Arndt (1858)— The Blind
Girl of Wittenberg (1856, 12mo)—Catharine de Bora;
or Social and Domestic Scenes in the House of Luther
(1856, 12mo), etc. Dr. Morris also gave much time to
studies in natural science, especially entomology, and
became quite prominent in this field. He was
acknowledged as an American authority, and was
honored in various ways by the Smithsonian Institute
and other associations. See Allibone, Dict. of Brit.
217. (J. H. W.)

Morrism, John Piper, a minister of the Methodist
Episcopal Church, South, was born in Devon, England,
Jan. 9, 1795. He was a special student under
the pastorate of Samuel R. Babbitt, his father, who was himself a local
minister of the Wesleyan Church. Young Morris
was converted at seventeen, and soon after became convinced that
he was called of God to preach. While preparing
for the ministry his health was impaired, and he was
advised to go South. After his arrival in Charleston
S. C. he entered at once to enter the ministry, and
supplied a vacancy in the village of Summerville. In
1862 he was received on trial in the South Carolina
Conference, and appointed to Aiiken. In 1867 he was
ordained deacon, and appointed to Darlington; but
his health failing, he was obliged to give up all work. He
died Jan. 24, 1869. See Min. of Ann. Conf. of the Meth.
Episcopal Church, South, 1868, p. 214.

Morrism, Joseph, an English Baptist divine, flour-
ished as pastor of a London congregation in the first
half of the eighteenth century. He is believed to have
been born about 1685. He died in 1755. Irving
speaks of him as "a sensible, pious, and learned man,
and that he was "in habit of intimacy in excellen-
table society," who esteemed him for his modesty and ability (History of the English Baptists). He
published several of his Sermons (Lond. 1722, 8vo; 1745,
8vo; 1757, 8vo), which were admired for their solidity,
and prove him to have been a man of more than ordi-
nary talent. His influence in the English metropolis
was considerable in his day and generation.

Morrism, Judah, a Jewish convert to Protestant
Christianity, was a native of Italy, and emigrated to
this country about 1835. He was for a time instructor
in Harvard University. He died in 1855. He publish-
ed a Hebrew Grammar, and some religious books.

Morrism, Samuel, a Presbyterian lay worker in
colonial days, flourished near the middle of last century
in Hanover, Va. He was a man of singularly earnest
and devoted spirit, and did much to advance the inter-
est of Presbyterianism in Virginia. His house was
a resort for those "who were dissatisfied with the preach-
ing of the parish incumbents, and anxious to enjoy the
privilege of listening on the Sabbath to the reading of
instructive and devotional works on religion. He was
known in and around the American establishment, but by
accident becoming acquainted with Presbyterian works
—among them Boston's Fourfold State—he embraced that
Calvinistic confession, and soon gathered about him
others who, like him, chose rather to subject them-
selves to the payment of the fines imposed by law than
to attend church where they felt that they could not be
profited. The little band of lay workers, as yet neither
under the instruction of a Presbyterian clergyman, nor
nevertheless greatly interested in Presbyterian doctrine, and
unconsciously its adherents even, first met every
Sabbath alternately at each other's houses to read and
pray. But as their number increased they regularly
gathered at Mr. Morris's house, until at length that
dwelling-house was too small to contain the people;
and it was determined "to build a meeting-house,"
"merely for reading," as Mr. Morris himself adds. This
house of worship was afterwards designated "Morris's
Reading-room," and was the starting-point of Presby-
eterianism in Virginia. From Hanover Mr. Morris was
frequent visitor in different parts of the State, and
struct the inquiring, and, complying with their invit-
ations, went out and spread the interest in distant parts.
As they increased in numbers the Established Church
made complaint against them to the governor, and they
were called up for trial, but they were promptly dis-
chargingly noble. It was found Englishman, bear the homestead of
the Kirk. See Presbyterianism. See also Gillott,
Hist. of the Presbyterian Church in the United States of
America, i, 111-120; Anderson, Hist. of the Colonial
Church, iii, 229 sq. (J. H. W.)

Morrism, Sarah, a Quaker preacher, the daughter of
Anthony Morris, himself a Quaker preacher, was
born at Philadelphia in 1704; preached in New Jersey,
New York, New England, and Virginia. She was married to
John in 1764; and travelled through Great Britain, preaching in
many places, in 1772-73. She died in Philadelphia
Oct. 24, 1775. Possessing a superior mind, combined
with a social and cheerful disposition, she proved an efficient help to her people.

Morrism, Susanna, a Quakeress noted as an effi-
cient preacher of the doctrines of her sect, was born
about 1682. But little is accessible to us regarding her
personal history. She labored in the work of the minis-
tery for nearly forty years both in this country and in
Europe, where she visited England, Ireland, and Scot-
land. She died April 28, 1755. She was a devout
Christian, and a firm adherent to her people, whom she
dearly loved. It was found Englishman, bear the homestead of
Friends, iii, 396.

Morrism, Thomas Asbury, D.D., a bishop of the
Methodist Episcopal Church, and for many years the
senior officer of the episcopal cabinet, a man of indom-
itatable energy and great love for the Christian cause, in
which he proved a most efficient workman, was born in
Kanawha County, Va., April 8, 1794. His parents,
while not of Quakers, were moved to the Western Reserve in
Va., and it was for some time his home. The educa-
tional facilities of that period, and especially of that
region, were extremely limited. It was the good for-
tune of the Morris family, however, to enjoy the advan-
tages of a good grammar-school, organized by William
Paine, and it was Englishman, bear the homestead of
when Thomas was about sixteen years of age. His old-
est brother, Edmund, held the clerkship of Cabell Coun-
ty, in which the family resided, and Thomas, at the
age of seventeen, became a deputy in the office, a pos-
tion which he held until he was about twenty years of
age. While discharging the duties of this office, and
when greatly broken down in health, and somewhat
depressed in spirits, he was drafted into a company of
militia, to perform a six-months' tour in the North
against the British and Indians. They met at the
court-house, shouldered their muskets, and took up
their line of march to join a regiment forming at Point
Pleasant. The regiment was ordered to join the main army near the Cana-
ada line. The father of Young Morris was so affected
by his son's frail and youthful appearance and his feeble
health that after the company had started he procured
a substitute, overtook the young soldiers their second
day out, and procured a discharge for his slender and
delicate boy. The early religious training of bishop Morris was in the Baptist Church, of which both his parents were pious and exemplary members. He grew up, however, without giving much thought to the subject of personal religion until he was about eighteen years of age. In his twentieth year he made a profession of religion, and at the same time began to ponder seriously the question whether Providence was not leading him into a religious life. He immediately went to the Methodists. Against this course many considerations pleaded powerfully, and he had been trained in another communion, his prejudices were deeply rooted, the Methodists in that region were feeble and persecuted, but the result of a careful comparison of their doctrines and polity, he determined which church he would join. This time was a fixed, unalterable determination to unite with them as the people of his choice. He was shortly after admission to membership in the Church licensed to preach, and was received as a travelling preacher into the Ohio Conference in 1816. In 1818 he was ordained deacon by bishop George, and elder in 1820 by bishop Roberts. Though in a large measure self-educated, because an affliction of the eye restricted his studies in early manhood, he yet labored most acceptably in the pastoral work in various parts of Kentucky, Tennessee, and Ohio till 1834, when he was deemed cultured enough to be intrusted with the literary management of the then newly-established Western Christian Advocate, a religious and literary weekly, which two years after its commencement numbered 8000 subscribers—certainly a successful enterprise for the times. In 1836 the General Conference, held that year at Cincinnati, where he resided, elected him to the episcopal office. He now really entered a field for which he was specially fitted, and gained a most enviable reputation not only in his own denomination, but throughout the Christian Church. In 1864 a declining health and the infirmities of age obliged him to ask for relief, and he was less heavily taxed. In 1898, at the General Conference in Chicago, he sought and obtained permission to be withdrawn from episcopal visitation duties, and led a rather quiet life until his death, Sept. 2, 1874. Only a few days before this he had addressed a loving missive to the members of the Cincinnati Conference (bearing date August 27), saying, among other noble Christian words, “I am no longer able to go in and out before you to sit in your councils and take part in your deliberations, yet my heart and sympathy are with you, and for Zion’s prosperity my tears shall fall and my prayers ascend until my release is signed, and I go to join the Church in glory, present in the skies, a man of great uniformity and simplicity. He was noted in his Church for the quiet power and prudent skill with which he discharged the episcopal duties. His death occurring about the same time as that of the bishop of Winchester—Dr. Charles Sumner (q. v.)—The New York Methodist took occasion to institute a comparison between the two bishops, and thus concludes in favor of bishop Morris: “This man had done more in his time for the extension of Christianity than a whole bench of English prelates. He had assigned to their places of labor not less than 30,000 ministers, had traversed this country to the outer edge of its civilization over and over again; had preached sermons innumerable, and only ceased to labor when labor became physically impossible. Nor was his pen idle. He was one of the founders of a great paper, which is still in existence. He issued volumes from the press, which are models of vigorous, idiomatic English. And all this fruitful labor was done in the most unostentatious way. Bishop Morris never thought of himself as a great actor in the world’s affairs, a great preacher, or a great writer. The beauty of his character was that he never appeared to think of himself at all; his work was before him, and he did it; and that was the end of the matter.” Bishop Morris’s only works of any special import are a volume of sermons, and a miscellany, consisting of essays, biographical sketches, and notes of travel. Of the former it is said that the copies were long sold; the latter have not been but sparsely circulated. “His style was epigrammatic, clear, and forcible. His printed sermons were characterized by simplicity, pith, directness, lucid arrangement, and earnest and practical enforcement of the truth. They have been useful and popular. As a preacher he was a model; he was quite noted in the prime of his life. His delightful full of scriptural discourses abounded in pithy sentences and gratified thousands of hearers as they fell from his lips. See Marlay, Life of Bishop Morris (N. Y. 1875, 12mo); Meth., Qu. Rev., July, 1875, art. iii; Minutes of Annual Conferences, 1874; N. Y. Christian Advocate, Sept., 1874; Men of the Time, a.v.; Drake, Dict. of Amer. Biog., a.v.

Morris-Dance, a peculiar and fantastic species of dance, constituting the chief enjoyment at parochial festivals in England, was commonly practiced in the Middle Ages, and continues to the present day among the country people in different parts of England. Its origin is ascribed to the Moors, though the genuine Morris Dance is said to have been of the present day in the times of King Richard II. It has a resemblance to it. The chief performer was the hobby-horse, so called from the light frame of wicker-work which was fastened around its body, and supplied with a pasteboard head and neck, so as to give it the appearance of a man on horseback. Bells were also attached to its ankles, and the great art consisted in so moving the feet as to produce a rude kind of concord. The other principal actors, after a fashion, personized the characters of Maid Marian, the Queen of the May, Robin Hood, Friar Tuck, the Fool, etc.; and the performance was accompanied by rude music and the clashing of swords and staves.

Morris, John, D.D., a Scotch divine, noted as a hymnologist also, was born in the County of Aberdeen in 1749. He studied for the ministry, and in 1780 entered upon his pastoral duties over the parish of Canisbay, Caithness-shire. He was one of the committee of the General Assembly for revising the Church Paraphrases, and himself contributed some of the best versions. In 1783, the 9th, “The Lord our God,” the 49th, “Come, let us to the Lord our God,” have been generally adopted by the churches. In his early life he contributed verses to the EdinburghWeekly Magazine, over the signature of “Musur.” He also published the second and fourth books of Virgil’s Aeneid, translated into English verse (1787). He died at Canisbay, June 12, 1798.

Morris, John W., a Presbyterian minister, was born in Chester County, South Carolina, in 1811; was educated in the Indiana University, Bloomington, Ind.; studied theology under the late Rev. Hugh MacMillan, of Xenia, Ohio, and was licensed and ordained in 1841, as pastor of a church in Thom Grove Presbyterian Church. In Bloom, Cook Co., Indiana, this was his only charge. At the close of twenty-five years of pastoral duty he resigned this position to accept the agency in behalf of the freedmen, feeling, as he expressed it, “that the education of that people was the work to which God now calls the Church and the nation.” He continued in labor as agent until he died, Jan. 15, 1877. Mr. Morris was a man of great integrity, of noble disposition, and of untiring effort in the service of Christ. He was an accurate classical scholar, a critical and profound expositor of Scripture, and an earnest and affectionate preacher. See Wilson, Presb. Hist. Almanac, 1898, p. 391.

Morris, Jonas S., a minister of the Methodist
MORRISON

Episcopal Church, was born in Plattsburg, N. Y., March 11, 1806; was converted at the age of sixteen years; li-
censed to preach in 1837, and in the same year joined the Southern Illinois Conference; was married to Miss Mary Jane Tait; and in 1841 he moved to Collinsville Circuit; next year he was stationed at Main Street, Alton City; and thereafter successively at Chester, Gillespie, two years; Litchfield, Brighton, Highland, Carlyle, two years; Greenville, Gil-

Morrison, Levi R., a Presbyterian minister, was
born in Mecklenburg County, North Carolina, July 3, 1803, and was educated at Princeton University. He was li-
tended to, and he had to struggle with poverty and its at-
tendant trials and perplexities. He studied his Bible and such books as he was able to secure, and exercised his gifts as a speaker; was licensed in 1831, and began his labors in Spring Creek and Smyrna churches, Ten-
nessee. After his marriage he was ordained, and pastored the
churches at Sparta and McMinnville, Tenn. He sub-
sequently labored at Mars Hill, Tenn., Glade Spring, Va., North Prairie and Springfield, Mo. His life was that of a toiling pastor and home missionary. He died Dec. 28, 1867. churches at Sparta and McMinnville, Tenn. He sub-
sequently labored at Mars Hill, Tenn., Glade Spring, Va., North Prairie and Springfield, Mo. His life was that of a toiling pastor and home missionary. He died Dec. 28, 1867. Mr. Morrison was a man of most amiable character, of strong and vigorous intellect, a very efficient preacher, a great lover and preserver of the
that he ever lost sight of the great missionary work in-
trusted to his charge while assuming so many other
engagements. He constantly preached, and in every
way possible, set the native church on its feet, and in
1814 was gratified with his first convert, Tse-ako, who
died in 1818. Believing that the Chinese could be
reached better through educational channels, he caused an
Anglo-Chinese college to be founded at Malacca; gave
£1000 for the erection of buildings, and £100 an-
nually for its support. In 1824 he visited England, and
remained home nearly two years. He was received ev-
everywhere with great distinction, and was even honored
with a reception by King George IV, to whom Morrison
presented a copy of the Scriptures in Chinese. He had
brought home with him a Chinese library of 10,000 vol-
umes, and labored eagerly to awaken among his countrymen
interest for Chinese literature. In this he modest-
crately succeeded. In 1826 he again set sail for China,
and now even more assiduously devoted himself to the
missionary work. His time he mainly occupied in
preaching, translating, and superintending the distribu-
tion of printed works for the conversion of the Chinese.
In 1832 he felt so encouraged with the prospects of an
early harvest for his many years of toil as to write to his
friends in England: "I have been twenty-five years in
China, and am beginning to see the work prosper.
By the press we have been able to scatter knowledge
far and wide." In the midst of these occupations Dr.
Morrison was called at Canton Aug. 1, 1833, to preside
unimpeached until death the consistency, efficiency, and
be-nevolence of the Christian missionary.
Dr. Morrison certainly achieved great things in Chi-
na. The compilation of his dictionary in the vernacular
language of that country was a Herculean task, which
none but a man of the greatest strength of intellect and
energy of purpose could have accomplished. Along
with that he completed a Chinese version of the Old
and New Testaments, which, in the opinion of all the
learned men of Europe, was deemed utterly beyond the
power of any single person. Nor were his exertions for
the Chinese confined solely to literary works. He went
about doing good. "He endeavored," says his biogra-
pher, "in the employment of such expedients as he
could command, to relieve the wants, to mitigate the
sufferings, and heal the diseases of the poor and suffer-
ing Chinese around him. In order to secure to the
nearest left the comfort of his people and his co-
educators, as well as to furnish facilities to foreigners to prosecute
the study of the Chinese language, he projected the es-
establishment of the Anglo-Chinese college." His whole
life and works show the activity and energy and com-
prehensiveness of his mental endowments, as well as the
Christian nature of his heart. His absence from his office was that of
only a pioneer who prepared the way for the evan-
gelization of China. But with the instruments which
his zeal and indefatigable industry put into the hands
of the Evangelical churches, the preliminary obstacles
have been removed, and the way prepared for carry-
ing on the work of direct Christian instruction. His co-
eductor, Dr. Milne, who died some time before, said of
Morrison that "his talents were rather of the solid
than the showy kind; adapted more to continued labor
than to astonish by sudden bursts of genius; and his
well-known caution fitted him for a station where one
false step at the beginning might have delayed the work
for ages." It may serve to give an idea of the exertions
of Dr. Morrison and his colleagues to state that from
1810 to 1836, 751,783 copies of works, consisting of
8,000,000 pages, were printed in the Chinese and Ma-
lay languages at Canton, Malacca, Batavia, Penang,
and Singapore. This includes 290 complete Chinese
Bibles, 257 New Testaments, and 31,000 separate por-
tions of Scripture in Chinese. See Memoirs of the Life
and Correspondence of Robert Morrison, D.D., compiled
by his Widow, to which is appended A Critical Essay on
the Literary Labors of Dr. Morrison, by the Rev. S.
Kidd, professor of Chinese in the University College
(Lond. 1839, 2 vols. 8vo); Altman, Cyclop. of Christian
missions, p. 102 sq.; Eclectic Review, 4th series, v. 176;
Philadelphia Museum, xxxvii, 94; Rémuat, in Journal
des savans, 1834, 91.
Morrison, Robert E., a minister of the Method-
ist Episcopal Church, was born in Lancaster County, Pa.,
Oct. 12, 1800. When seventeen years of age he united with
the Presbyterian Church; but eight years after-
wards, being brought into intimate relations with Meth-
odists, he united with the Methodist Episcopal Church.
He preached in the blessing elder for three years,
and in 1833 was received into the Philadelphia Con-
ference, and appointed to Chester Circuit, Pa., where he
labored very acceptably for two years. In 1835 he
was appointed to Tuckerton Circuit, N. J. The necessities
of the case requiring it, he was removed and appointed to
Haddonfield. In 1836-7 he travelled Swedesboro Circuit.
Here great success crowned his efforts. In 1838-9 he
labored in Pemberton; in 1840-1 in Long Branch; in 1842-3 in Pennington; in 1844-5 in Allen-
town; and in 1846 at Crosswicks. A throat difficulty
compelled him to take a supernumerary relation, and
locating at Hightstown, N.J., he became one of its most
respected citizens. For a number of years he was presi-
dent of Hightstown Bank. He died Aug. 30, 1873.
Mr. Morrison, being studious, acquired a large store of
knowledge, and became a good thinker. Though not a
graduate of any literary institution, he read Latin,
Greek, and Hebrew, and was quite at home in mathe-
ematics. He was also a thorough student of divinity.
See Minutes of Annual Conferences, 1874, p. 37.
Morrow ("vatchar, aŋkwaŋ). See Proces-
station.
Morrow-Mass Priest is the name of the priest
who said early mass, morrow being equivalent to morn-
ing.—Walcott, Sac. Archæol. a. v.
Mottow, Richard H., a Presbyterian minister,
was born in Huntington Co., Pa., Jan. 13, 1823. In
early youth he was hopelessly converted, and determined
to preach the Gospel. He obtained his preparatory ed-
cation in the academy at Academia, and graduated at
Jefferson College, Pa., in 1851, after which he engaged
for some time as teacher in the Millwood Academy at
Shade Gap, Pa. He studied theology at Allegheny
and Princeton seminaries, graduating at the latter in
1854; was licensed by the Presbytery of Huntingdon,
and in 1856 ordained and installed pastor of the church
at Celina, Pennsylvania, where he continued for three
years. After this period he was compelled by declining health to resign his charge,
April, 1859. He died June 10, 1859. Mr. Morrow was a
plain and practical preacher, his style giving evidence of fine culture. He was humble, consistent, devoted, pos-
sessing in an eminent degree the happy faculty of gain-
ing the friendship and esteem of all who knew him.
See Wilson, Presb. Hist. Almanac, 1861, p. 98.
Morse Peccatórum (the death of sins), an expres-
sion used by Tertullian and other writers to describe
the efficacy of baptism, in allusion to Rom. vii, 4; Col.
ii, 12.
Morse is the technical term for the clasps of a cope
or pectoral.
Morse, Abner, a Congregational minister, was
born at Medway, Mass., Sept. 5, 1728, and was educated
at Brown University, class of 1751. He was supplied to
the ministry, and sought further preparation for this
important work at Andover Seminary, where he gradu-
ated in 1819. He then became pastor at Nantucket,
Mass.; subsequently at Bowl Brook, N. J., and later
removed to Indiana, where he became a professor of
philosophy and mathematics and a department of this
science. Morse was greatly interested himself. He attained to considerable distinction as a scientist, and published several gene-
alogical works. He died at Sharon, Mass., May 16, 1865.
See New England Hist. and Genealog. Register, 21, 21:11:
Drake, Dict. of Amer. Biol. a. v.
Morse, Asa, a minister of the Baptist Church in America, who distinguished himself in the Revolutionary period of this country's history, was born in the north parish of New London, now called Montville, Connecticut, Jan. 14, 1761, son of a Baptist minister. He early received training from his father, Josiah Morse, also a minister, who preached in the vicinity where Asa was born until death cut short his ministerial labors in 1795. At nineteen Asa had progressed sufficiently in his studies to teach country schools and earn sufficient to defray the expenses of his education at more advanced institutions of learning. In 1792 he was converted, and decided to enter the ministry, feeling himself specially called to the work. He preached a while near his own home, then labored in Winsted. In 1802 the Baptist church in Stratfield, Conn., called him as their pastor, and he removed thither in 1803. In 1807 he accepted an appointment as missionary to the Upper Canada Indians, and while in this position endured many hardships. He was faithful to his task, and made converts not only among the Indians, but also among the white people of that region, and greatly strengthened his denomina-
tion there. In 1810 he was invited to preach at Suffield, Conn., one of the best Baptist churches in New England. But Mr. Morse by no means confined his labors to this church. He went much about the country, and everywhere endeavored to encourage religious life and to secure followers for the Baptist society. In 1815 he became pastor of the Second Baptist Church in Colebrook, Conn. In 1836 he returned to Suffield, and there died, June 10, 1838. During his illness he manifested the utmost confidence in the doctrines he had preached, and frequently said that he re-
lied upon Christ for salvation. See Baptist Memorial, iii (1844), 294 sq., 272 sq., 289 sq.

Morse, David Sanford, a Presbyterian minis-
ter, was born Oct. 18, 1732, but the year 1738. He first chose the legal profession, but was converted at the age of twenty-
ty-five, turned aside to the ministry, and devoted the remainder of his life to this sacred work. He died in Austerlitz, Columbia County, N.Y., Dec. 21, 1871. See Appleton's Annual Cyclop. 1871, p. 592.

Morse, Francis Currier, a minister of the Meth-
oodist Episcopal Church, was born in Hopkinton, N. H., Feb. 27, 1815. In 1818 he was sent to the Baptist College, Newbury, Mass., where he was graduated in 1822. He taught the necessary subjects in the society's school at Suffield, Conn. In 1826 he went to the college in Newberry, S. C., and was graduated in 1828. In 1830 he was licensed to preach, and in 1832 he was ordained to the ministry. He withdrew from the society in 1835, and in 1836 he entered the ministry of the Methodist Episcopal Church. He died in 1876.

Morse, Jedediah D., a Congregational minister of note, was born Aug. 23, 1761, in Woodstock, Conn. He graduated at Yale College in 1783, entered the ministry in 1785, and was chosen tutor in Yale in 1786. In October he changed places with the Rev. Abel Holmes, pastor in Midway, Ga., where he preached about six months, when he returned North, and, after preaching in several places, was ordained pastor of the First Congregational Church in Charlestown, Mass., April 30, 1789, and held this charge till 1800, when, having re-
ceived a commission from J. C. Calhoun, secretary of war, to visit several Indian tribes, he spent two winters in New Orleans. A report of which was published in 1822. He died in New Haven, June 9, 1826. Dr. Morse published the first American work on geography, in 1784 (passing through many editions in this country and abroad, and after his death it was enlarged and im-
proved by his son). He also wrote A Compendious History of New England, in company with E. Parish, D. D. (1804)—a pamphlet, "The True Reasons on which the Election of a Hollis Professor of Divinity in Har-
vard College was opposed at the Board of Overseers (1804)." He was one of the editors of the American Post, of New York, an interesting paper respecting the Revolution in Harvard College (1814); and a number of occasional sermons and addresses. From 1790 to 1821 he published twenty-five of his ser-
mons and addresses. Dr. Morse was also much occu-
pied in religious controversy; in upholding the orthodox faith of the New England churches against the as-
saults of Unitarianism, and was so earnest in these labors as to seriously impair his health. In 1804 he was active in enlarging the Massachusetts General As-
sociation of Congregational Ministers. He was also a prominent actor in the establishment of the theological seminary at Andover, especially by his successful efforts to prevent the threatened establishment of a rival insti-
tution at Newbury, projected by the Hopkinsians, and to effect a union between them and other Calvinists on their common symbol, the Assembly's Catechism. The articles of this union, which still constitute substantially the basis of the Andover Seminary, were signed in his own room in Chatsworth, in the night of January 1, 1817, by himself, Dr. Samuel Spring, and Dr. Eliphalet Pear-
son. Morse participated in the organization of the Park Street Church in Boston in 1808, when all the Congrega-
tional churches in the city, except the Old South Church, had abandoned the primitive faith of the fathers of the church. In 1818 he published a Discourse, entitled The Doctrines of the Scriptures, and in 1819 a magazine, The Ponoptis, of which he was the sole editor for five years. Dr. Morse was universally esteemed for his piety and learning, and is acknowledged to have been one of the most eminent ministers of his day in New England. He was distinguished alike for the ver-
satility of his powers and the pride of extent of his influ-
ence, and was almost equally well known on both sides of the Atlantic. See Sprague, Annals of the Amer. Pul-
pit, ii, 247; Allibone, Dict. of Brit. and Amer. Authors, e. v.

Morse, Joshua. See Morse, Asa

Morse, Richard Cary, an American Presbyterian-
ian, noted as a religious journalist, and son of Jedediah Morse, was born June 18, 1755, at Charleston, Mass. At the age of nine he was sent to Phillips' Academy, Andover, to prepare for admission to college, and entered Harvard College in 1804. He graduated in 1812, the youngest member of his class. The year im-
mediately following his graduation he spent in New Haven, being employed as the amanuensis of president Dwight, and living in his family, and thus enjoyed an association invaluable to any man, and by which, no doubt, Mr. Morse was greatly profited. In 1814 he en-
tered the theological seminary at Andover, and, having passed through the regular three-years' course, was li-
censed to preach in 1817. The winter immediately succeeding his licensure he spent in South Carolina as a supply of the Presbyterian church on John's Island. He became early impressed with the idea that he had not the requisite natural qualifications for the ministry, and therefore silently retired from it, though his whole life was a continued act of devotion to the objects which the ministry contemplates. On his re-
turn to New England he became associated with his fa-
ther for some time in a very successful geometrical enterprise; and in the spring of 1818 enlisted with his brother in another enterprise still more important—the establishing of the New York Observer, of which he was associate editor and proprietor for the remainder of his life, and during this long period contributed largely to its columns, specially by translations from the French and German. He died, while abroad on a visit to re-
cuperate his health, at Kissingen, Germany, Sept. 22, 1868. Under the ordering of a wise and gracious Providence, his circumstances from the very beginning of life acted upon him as a benign influence. What his
early training was may be inferred from his distin-
guished parentage, and his intimate association with Dr. Dwight. In his ap-pearance during his first years of his as-
sociations, whether viewed in respect to near relationship or general acquaintance, were fitted to develop and mature both the intellectual and moral man. His Chris-
tian character shone conspicuously in all his life. He not only had a strong conviction of the truth of the Gospel, but a high appreciation of the idea that he was a ge-
nological teacher. He became at an early period a com-
municant in the Church, and his whole subsequent life was worthy of his Christian profession. See New York Observer, Nov. 5, 1868; and the Jubilee Year-book of that paper for 1873. (J. H. W.)

Morse, Sidney Edwards, an American religious journalist, brother of the preceding, was born at Chilmark, mass., April 17, 1874, and was educated at Yale College, which he entered at eleven years of age, and was graduated at fourteen, with a class many of whom lived to a great age and became famous in various departments of professional life. He studied theology at Andover and law at Litchfield, but at sixteen began his apparently predestined life-work by writing for a Bos-
ton newspaper. Afterwards, when a number of clergymen about Boston, among them his own father, deter-
ned to try the experiment of a religious newspaper, and the Boston Recorder was projected, young Morse was chosen to conduct it. A few years later (in 1828) he was called upon to enter more directly in connection with his brother Richard, the New York Observer, which perhaps during the whole of Sidney E. Morse's administration as its senior editor, that is, till 1858, was the ablest religious paper in the country, as it was the pioneer of its class of periodicals. He died Dec. 23, 1871, at his residence in New York. Mr. Morse has a clear and logical mind, wide culture, and a tireless spirit of investigation. He was acknowled-
ged to be a man of broad and catholic views, though eminently conservative in his temperament, and of strong convictions, to which he rendered the most complete loyalty. He was uniformly calm and kind, and not without charity for those with whom he differed on many of the great moral movements of the age, and lived and died having faith in humanity and in God. Few men have had so long a career—for he was en-
gaged in public life sixty years—and fewer yet have ever enjoyed in so rich a measure the reverence of as-
sociates and the respect of the great public. He will be especially remembered in the coming time as the founder of the New York Observer, in the conduct of which he was for nearly forty years actively engaged. From his mind and spirit, probably more than from any other, the religious press of the present day has received its best characteristics, and if new papers now surpass their ven-
erable predecessor—indeed, but few do—their success in no small degree to the inspiration of his gen-
ius. Like his distinguished brother, Prof. S. F. B. Morse, he always took an active interest in science, and especially in those branches which relate to geography and exploration, and was engaged until interrupted by his last illness in perfecting an invention for exploring the depths of the ocean. He had been writing on this favorite subject until a late hour a week before his death. His best-known works are A New System of Modern Geography (1828), A North American Atlas, and a series of general maps. For several years the tales of the two first-mentioned works averaged 70,000 copies annually, and more than 500,000 copies of the first-named have been printed. See Appleton's Annual Cyclopaedia, 1871, p. 532; New York Observer, Dec. 1871; North American Rev. Jan. 1871, p. 178; 1871; Observer Jubilee Year-book, 1873. (J. H. W.)

Morsel (prop. ἕλη, a bit, especially of food, Ruth ii, 14, etc.; βρῶμον, Heb. xii, 16; in the pl. crumbs, Lev. ii, 6, etc.; and of a piece of ice or aub, Ps. cxlviii, 17; once [1 Sam. ii, 28] incorrectly for ἅπαξ, kikkar, a circle or "load of bread, as elsewhere). See Bread.

Mortal (or Deadly, as the Anglican theologians prefer to call it) sin is, according to Roman Catholicism, he sin which consists in the sin of adam, in sin, and recognising as moderate and pardonable sin, under the name of venial, all such acts of transgression as are not likely to bring eternal punishment on the sinner. According to Peter Dens, the eminent Roman Catholic theologian, whose dicta the Church has accept-
ed as authoritative, mortal sin (Lat. peccatum) is that which of itself brings spiritual death to the soul, inas-
much as of itself it deprives the soul of sanctifying grace and charity, in which the spiritual life of the soul consists; and venial sin (Lat. vitium) that which does not bring spiritual death to the soul, or that which does not strip away from the universe its ultimate end, or which is only slightly repugnant to the order of right reason. Protestants dissent from this view, and indeed visit it with their condemnation, on the ground that this distinc-
tion respecting sins tends to immorality and laxity of life. That sins differ in magnitude they concede to be the doctrine of the Scriptures (e. g. Christ declared the sin of Judas to be greater than that of Pilate. This appears also in the case of the servant who knew the will of his master and did it not. This difference, indeed, is conspicuous in the judgment of the degrees and expressions of anger in calling men Raca, "vain," or puipi, "fool," and also in Christ's comparing some sins to grunts and others to camel's; and in his mention of the "many stripes," and in the "greater condemna-
tion" spoken of by James). Yet the Scriptures also declare that "the wages of sin is death." Therefore, though Protestants, like the Christians of the apostolic and patriarchic Church, distinguish between greater and less sin (Greek: εὐξτέρα, δόξα, τάξις), and hold that a knowl-
g edge of this distinction is important in considering the discipline which the early Christians exercised, they yet hold that the early Church did not think any sins to be venial, but deemed all to be mortal (whenever we find the expressions remittit and mortali applied to sins by Augustine, we have to consider the appearance of the word, difference to such sins as require penance and such as do not); and therefore now maintain on this question that all sins are punishable as God may determine, even with everlasting destruction from the presence of God and the glory of his power. They assign for such view the following reasons: "(i) Every sin is an offence against God's law, and therefore is deadly and damnable on account of the claims of divine justice; for though sins may be divid-
ed into greater and less, yet their proportion to punish-
ment is not varied by their temporal or eternal conse-
quences, but by greater and less punishments.

(ii) The law of God never threatened, nor does the justice of God inflict, punishment on any except the transgressors of his law; but the smallest offences are not only threatened, but may be punished with death; therefore they are transgressions of divine law.

(iii) Even the smallest apparent transgression, is against charity, which is the end of the commandment.

(iv) When God appointed expiatory sacrifices for sin, though they were sufficient to show that there exist-
ed a difference in the degree of it, yet, because 'without shedding of blood there is no remission,' all manner of sin has rendered the offender guilty and liable to punish-
MORTALITY

MORTAR

ment; for 'burned is every one that continueth not in all things written in the book of the law to do them.' No sin was recognised as venial in the covenant which God entered into with our first parents, for there was no remission; and without the washing of death there could be none afterwards; therefore, if any sin be venial or pardonable, it is only through the death of Christ and the grace of God; and as God pardons all upon the condition of faith and repentance, and none otherwise, it must follow that, although sins differ in degree, they vary not in their essential character. The man who commits sin at all must die, if he repent not; and he who repents in time and effectually will be saved. 'The wages of sin is death;' of sin indefinitely, and consequently of all sin.' See Elliott, Delatt. of Roman Catholicism, p. 229.

There is, however, a class of Protestants who go so far as to teach that, "while mortal sins are punishable eternally, venial or deadly sins are punishable by God's fatherly chastisement in this life;" and in the same way, as regards the pardon of sin, that "while mortal sins are only forgiven through a direct act of absolution, venial sins are forgiven by renewal of grace (especially in the Excommunicate); each mode of pardon presupposing a degree of penitence conformable to the degree of sin." Such is the teaching of the High-Churchmen of the Anglican establishment, the Ritualists of the Protestant Episcopal Church, and the High Lutherans. See the articles SUFFRAGAN; SIN.

Mortality, as a sequel to death, is a term not only thus used, but signifies also a contagious disease which destroys great numbers of either men or beasts. Bills of mortality are accounts or registers specifying the numbers born, married, and buried in any parish, town, or district; and these are kept in Great Britain generally, and its colonial possessions. In general, they contain only these numbers; and even when thus limited are of great use, by showing the degrees of healthiness and fertility and the progress of population in the place where they are kept. They should become common also in this country, the clergy keeping really the only trustworthy account of a town's people.

Mortar [for building] stands in the Auth. Ver. for two Heb. words: צַח[ָה] (chother, prop. red "clay," as sometimes rendered), cement, of lime and sand (Gen. xi, 13; Exod. ii. 10; Isa. xvi. 14, 22; Nah. iii. 14); עַנָה (aphar), prob. whence "dust," as usually rendered, mud or clay, used as a cement in the walls of buildings (Lev. xiv. 42). In Ezek. xii. 10 the expression occurs, "One built up a wall, and lo, others daubed it with untempered mortar" (there is no word in the original answering to this last), which the Targums and the Vulgate seem to understand of plaster, but of the cement used in uniting the materials of a wall, rendering it "clay without straw," clay and straw, well mixed together, being understood to have been the ordinary cement of Egyptian buildings. There is no doubt that the Hebrews sometimes plastered their walls; and that kind of plaster now common in the East, is made with the same materials as the cob-walls, sun-dried bricks and mortar, namely, clay and straw mixed together, the straw as such as they give to their cattle, chopped and beaten small, and serving the same purpose as the ox-hair which our plasterers mix with their plaster. This requires to be well tempered, which is generally done by long-continued tredding or beating (Kitto, Pict. Bible, note ad loc.). See BIRK. Mr. Rich, speaking of the Birs Nimroud at Babylon, says, "The fire-burned bricks of which it is built have inscriptions on them, and so excellent is the cement, which appears to be lime-mortar, that it is nearly impossible to extract one whole." See DWELLING. "Omitting iron cramp, lead [see Handicraft] and the instances in which large stones are found in close apposition without cement, the various compacting substances used in Oriental buildings appear to be: (1) bitumen, as in the Babylonian structures; (2) common mud or moistened clay; (3) a very firm cement compounded of sand, ashes, and lime, in the proportions respectively of 1, 2, 3, well pounded, sometimes mixed and sometimes coated with oil, so as to form a surface almost impervious to wet or the weather. See PLASTER. In Assyrian, and also Egyptian brick buildings, stubble or straw, as hair or wool among ourselves, was added to increase the tenacity (Shaw, Trarr. p. 206; Volney, Trav. ii. 436; Char- din, Foy. iv. 116). If the materials were bad in themselves, as more mud would necessarily be, or insufficiently mixed, or, as the Vulgate seems to understand (Ezek. xiii. 10), if straw were omitted, the mortar or cob-wall would be liable to crumble under the influence of wet weather. (See Shaw, Trarr. p. 136, and Gesenius, Thesaur. p. 1515, n. v. מועד: a word connected with the Arabic safal, a substance resembling pipe-clay, believed by Burchhardt to be the detritus of the fossil of granite, and used for taking stains out of cloth; Burchhardt, Syria, p. 488; Mishna, Pesach, x. 2.) Wheels for grinding chalk or lime for mortar, closely resembling our own

Lime-grinding Mill at Cairo.

Machines for the same purpose, are in use in Egypt (Niebuhr, Voy. i. 122, pl. 17; Burchhardt, Navi, p. 82, 97, 102, 140; Hassequist, Trarr. p. 90). See MAISON. Modern Orientals have several materials for mortar superior to bitumen. These consist of three kinds of calcareous earth found abundantly in the desert west of the Euphrates. The first, called mura, is, in the present use, mixed with ashes, and employed as a coating for the lower parts of walls in baths and other places liable to dampness. Another, called by the Turks kurr, and by the Arabia jas, is also found in powder mixed with indurated pieces of the same substance and round pebbles. This forms even now the common cement of the country, and constitutes the mortar generally found in the burned brickwork of the most ancient remains. When good, the bricks cemented by it cannot well be detached without being broken, while those laid in bitumen can easily be separated. The third sort, called borak, is a substance resembling gypsum, and is found in large lumps of an earthy appearance, which, when burned, form an excellent plaster or whitewash. Pure clay or mud is also used as a cement; but this is exclusively with the sun-dried bricks (Kitto, Pict. Bible, note on Gen. xi. 8). See CLAY; Lime.

Mortar [for puttering] is the rendering of פָּרָשָׁה (medakok, nothing being for): see Fray, Num. xi. 8; also of פָּרָשָׁה (medakok, a pounder, applied also to a "hollow" or socket, e. g. of a tooth, Judg. xv. 19), Prov. xxvii. v, an instrument for comminuting grain or other substances, by means of a pestle, in place of the later invention or mill (q. v.). In the representation of the various processes of preparing bread on the paintings of the tombs of ancient Egypt, it will be found that the

Modern Oriental Mortar and Pestle. 

Land and Book, i, 134). Niebuhr describes one of a very simple kind which was used on board the vessel in which he went from Jidda to Loheia. Every afternoon one of the sailors had to take the durra, or millet, necessary for the day's consumption, and pound it 'upon a stone, of which the surface was a little curved, with another stone which was long and rounded' (Descr. de

out of the trunks of oak-trees (Syrac., p. 87, 88). The spicery for the Inns are said to have been prepared by the house of Abenes, a family set apart for the purpose, and the mortar which they used was, with other spoils of the Temple, after the destruction of Jerusalem by Titus, carried to Rome, where it remained till the time of Hadrian (Reggio, in Martini's Hebr. Chrest, p. 35). Buxtorf mentions a kind of mortar (Σφεκτή, Αρουτ) in which olives were slightly bruised before they were taken to the olive-presses (Lee, Talm. v. 272). From the same root as this last is derived the manitâk of Prov. xxvii, 22, which probably denotes a mortar of a larger kind in which corn was pounded: 'Though thou be the fool in the mortar among the bruised corn with the pestle, yet will not his folly depart from him.' Corn may be separated from its husk and all its good properties preserved by such an operation, but the fool's folly is so essential a part of himself that no analogous process can remove it from him. Such seems the natural interpretation of this remarkable proverb. The language is intentionally exaggerated, and there is no necessity for supposing an allusion to a mode of punishment by which criminals were put to death by being pounded in a mortar. A custom of this kind existed among the Turks, but there is no distinct trace of it among the Hebrews. The U emas, or body of lawyers, in Turkey had the distinguished privilege, according to De Tott (Mem. i, 28, Eng. tr.), of being put to death only by the pestle and the mortar. Such, however, is supposed to be the true reference in the proverb by Mr. Roberts, who illustrates
MORTAR

Mortar (mortar) is a term generally applied, in theological parlance, to certain voluntary infusions of pain or acts of self-denial, which are supposed by those who employ them to have a meritorious efficacy, or at least a salutary moral influence on the sufferer. Whenever these austerities have been practiced, it is easy to trace erroneous views of Christian truth. This is apparent in the system of monasticism and asceticism which at so early a period overspread the Church. Every religion of man's devising, or mixed and modified by man's corruptions, will be found to place religious excellence more in self-inflicted sufferings than in moral duties. The mortification which consists in voluntary endurance of pain and privation than that which consists in the habitual subjugation of sinful passions. It will ordinarily be found that the prevalence in any religion of general laxity of morals and of severe austerities will keep pace with the decline of morals and the growth of self-inflicted sufferings by certain devotees, the greater will be the indulgence for neglect of moral duties; and the stricter the requirement of fasts and mortifications at certain seasons, according to prescribed regulations, the less the general restraint at other times. The religion of Christ involves habitual self-control, as a readiness and firmness in the discharge of each appointed duty, however painful; which is a self-denial more difficult to the natural man than even habitual austerities. The mortification of sin in believers is a duty enjoined in the sacred Scriptures (Rom. viii, 13): "For if ye live after the flesh, ye shall die [μετὰ τοῦ φυσικοῦ]; but if ye through the Spirit do mortify [θυσίαν] the deeds of the body, ye shall live;" Col. ii, 5: "Mortify [νεκροφαγεῖτε] therefore your members which are upon the earth." It consists in breaking the league with sin, declaration of open hostility against it, and strong resistance to its appetites (Eph. vi, 10, etc. Gal. v, 19, etc., Col. ii, 23, etc.). The mortification of sin, in both sects, is a matter of practice which may only be exchanged for another, or it may be renounced because it is a gross sin, or there may not be an occasion to practice it; but if sin be mortified, we shall not yield to temptation; our minds will be more spiritual; we shall find more happiness in spiritual services, and bring forth all the fruits of the Spirit (Gal. v, 22, etc.). The death of Sin, and on the Holy Spirit, ch. viii, bk. 4: Charmock's Works, i., 1318; Bryan's Sermons on Rom. vii, p. 97, etc.; Farrar, Eccles. Dict. s. v. See SELF-DENIAL.

Mortification (2), in Scotch law, is a term used to denote lands given for charitable or other public uses. When lands are so given, they are in general formally conveyed to the trustees of the charity, to be held blench, or in fee. When mortification is given in general by a monarch, without naming particular trustees, they fall under the administration of the Court of Session. By the statute of 1633, c. 6, it was declared unlawful to alter any mortifications, and the managers were rendered liable to be called to account for malversation. Any person entitled to the benefits of the fund can pursue actions of this kind.
Mortimer, John Hamilton, an English artist of high repute in his day, who gave himself largely to ecclesiastical and antiquarian subjects, was born in 1741 of humble birth and was the youngest of four children. Having acquired a taste for drawing from an uncle who was an itinerant portrait-painter, he was at about the age of eighteen placed under Hudson, who had been the instructor of Reynolds. With him, however, he did not continue long; but, after having lived in the gallery of the duke of Richmond, Mortimer began to make himself known by his productions. One of his earliest works, founded on an incident in the life of Edward the Confessor, painted in competition with Romney, obtained from the Society for the Encouragement of Arts a premium of fifty guineas, and another, presented to the Duke of Buckingham, while Mortimer was in the service of the British, one hundred guineas. He was further distinguished by the notice and friendship of Reynolds, which friendship has been attributed, not to the sympathy, but to the opposition of their tastes in art. Mortimer was no colorist, and but an indifferent portrait-painter; although he produced many admirable heads and likenesses in black and white chalk. His talent lay in design, and in wild and fantastic quite as much as in historical subjects. He designed The Brazen Serpent in the great window of Salisbury Cathedral, and the cartoons for that in Brazenose College. He died Feb. 4, 1779, and was buried at High Wycombe Church, near the altar, where is his painting of St. Paul preaching to the Britons. See Engl. Cyclopedia, s. v.; Spooner, Dict. of the Fine Arts, s. v.

Mortimer, Thomas, D.D., an English divine, who was born near the opening of our century, flourished at London as minister of Gray's Inn, and died in 1849. He published Lectures on the Influence of the Holy Spirit (Lond. 1824, 8vo), which Bickersteth pronounces "evangelical and in every respect admirably written," and a collection of his Sermons (Lond. 1822, 8vo; 1825, 8vo). See Allibone, Dict. of Brit. and Amer. Auth. s. v.

"Mortmain" (from French mort, "dead," and main, "hand," which in turn from Latin mortas manus, i.e. in the dead hand) is the technical term of a series of Anglican statutes dealing with the lands of corporate bodies, especially ecclesiastical. The most probable origin of the term is that given by Coke, that "the lands were said to come to dead hands as to the lords, for that by alienation in mortmain they lost wholly their escheats, and in effect their knights' services, for the defence of the realm, wards, marriages, reliefs, and the like." and therefore was called a dead hand, for that a dead hand yieldeth no service." In the latter part of the Middle Ages many Roman Catholic Church, which had acquired a strong hold in England, came to own very largely the real estate of the country, until at one time owned fully one third of all the English landed estate, which thus paid no taxes. By 1215 it had obtained so large a part of the real estate that it practically disabled the government from raising the necessary means to pay its expenses. To put a stop to this evil, a clause was introduced into the Magna Charta forbidding gifts of land to religious houses. This was the first statute of mortmain, and declares "that if any one shall give land to a religious house, the grant shall be void and the land forfeited to the lord of the fee." But when the Roman Church, which had no interest in state affairs, saw itself thus suddenly cut short in its expansion of power and wealth, it found a way to evade the law by taking, instead of a fee-simple title to the land, leases for a thousand years. To meet this evasion of the intent of the law, the statute in the reign of Edward I. passed the statute De Religiosis, which restrained people at the time of their death, or otherwise, from giving or making over any lands or rents to churches or religious houses without the king's leave being first obtained. This was rendered extremely necessary by the fact that the king's exchequer had been impoverished to the utmost by the accumulation of landed property in the hands of ecclesiastical bodies, and protection of the state interests, especially in view of the evasions of the Church. Even this provision failed to meet the case. The wily churchmen found a way to evade compliance with this law by a collusive action brought in court for each piece of real estate the Church wished to get title to. In this way an individual entirely under control of the Church, who was in the title, would be appointed; while the Church, by a number of proceedings, would acquire from him, and from the state the property; then the religious corporation would bring a suit of ejectment against him, claiming that the title in the property was in the Church, and that he was illegally keeping the Church out of it. The tenant, being in collusion with the Church, would make no defence, and a decree of ouster would be taken, and the property transferred to the Church; then they would hold it by a decree of court called a recovery. Thus the statute of the 7 Edward I was completely evaded and the state circumvented. Another statute, the 15 Edward I, was passed, prohibiting religious corporations from taking either by gift, purchase, lease, or recovery. Priests iniquity, however, in a short time succeeded in meeting also this provision, and for its evasion introduced into England from the Roman law the doctrine of uses, by which the title of real estate would be in another; but he would hold it to the uses of a religious house, so that the religious corporation would get all the benefits of the real estate, and yet be known only in the individual. This practice was shielded under a royal charter of license, which (as e.g. by 17 Car. II, c. 38) enacted, "Every owner of any improvements, tithes, or portions of tithes, in any parish or chapelry, may give and annex the same, or any part thereof, unto the patronage or vicarage of the said parish church or chapel where the same do lie or arise; or settle the same in trust for the benefit of the said parsonage or vicarage, or of the curate or curates there successively, where the patronage is improper and no vicar endowed, without any license or mortmain." The evil became so oppressive that finally the 15 Richard II was enacted requiring the priests to swallow up all the fruits of the lands under their new doctrine imported from Italy of uses and trusts. But again priestcraft gained the upper hand, and by the 25 Henry VIII, c. 10, it was enacted, "That if any grants of lands or other hereditaments should be made in trust to the use of any churches, chapels, churchwardens, guilds, fraternities, etc., to have perpetual obits, or a continual service of a priest forever, or for sixty or eighty years, or to such like uses and intents, all such uses, intents, and purposes shall be void; they being no corporations, but erected either of devotion or else by the common consent of the people; and all such uses, intents, and purposes for the use or benefit of the Church shall be void, and the said statute shall be expounded most beneficially for the destruction of such uses as aforesaid." Even this provision failed to cover the case; and at last, in 1736, the celebrated statute of George II was passed, which effectually put an end to all evasions of ecclesiastical taxation. Perhaps even it would have been insufficient to cope with Romish cunning, but the dethronement of the Roman Catholics from their former predominance as an ecclesiastical body no doubt greatly contributed to a successful issue in the question. It was the confiscation of Church property in the reign of Henry VIII that paved the way for a successful issue of the provisions sought for in the statutes of mortmain. The statute of mortmain as enacted under George II, which is entitled, "An Act to restrain the Disposition of Lands, whereby the same become inalienable," is now the leading English act. It forbids the gift of money or lands by laymen to religious houses, it passed, or otherwise, immediately, and without power of revocation, formally executed and enrolled in chancery at least six months before the donor's death. This provision was made especially to prevent priests and others from importing a dying man to convey his land for charitable purposes. Hence, though a person can, in England, up to the last
hour of his life, if possessing sufficient knowledge of what he does, devise by will all his land to individuals absolutely, it is otherwise if he intend to give the land to the poor, or charity, or to any public benefaction, as a college, a hospital, or school, or hospital, the statute of mortmain, 9 George II, c. 86, reciting that public mischief had greatly increased by many large and improvident dispositions made by languishing and dying persons to charitable uses, to take place after their deaths, to the disinher- itance of their lawful heirs, enacts that in future no lands or sums of money to be laid out in land shall be given to any person or body, unless such gift or conveyance shall be made or executed in presence of two witnesses twelve months before the death of the donor or grantor, and be enrolled in the Court of Chancery within six months after the execution thereof. The law against the death-bed cannot in England give land, or money to buy land, for a charitable purpose. It can only be done in the life of the donor, at least twelve months before his death; and the property must be completely alienated, so that he has no further control over it. The deed must have a present operation, and must not re- serve any life-interest to the donor; it must be done at once and forever. The policy of this statute has sometimes been questioned, and several well-known modes of evading the statute have been adopted from time to time. The act has been held to apply only to land; and if not quite so strict, as if the land is situated in Scotland, or the colonies, or abroad, a will conveying it for charitable purposes will receive effect. In Scotland the mortmain act has no application; but the reason for this is that the common law of Scotland contains a similar check on the alienation of land on death-bed, and which, in some respects, has a universal application. Several acts have been passed since 9 George II, c. 86, as already stated, for exempting various bodies from the operation of that act. These acts chiefly apply to the Established Church. The statute 58 George III, c. 45, amended by 59 George III, c. 184, and 2 and 3 William IV, c. 61, is intended to promote the building of new churches in populous places in England and Wales. The law 43 George III, c. 107, was passed to exempt decrees and bequests to the governors of Queen Anne's Bounty. By 12 and 13 Victoria, c. 49, § 4, grants of land for sites of schools, not exceeding five acres, are voted; and there are other more recent modifications.

In the United States the English mortmain laws have not in general been adopted or recognised, except in Pennsylvania; and in that state, by an act passed in 1855, bequests, devises, or conveyances, for religious or charitable uses, may be valid if made by deed or will at least one calendar month before the death of the testa- tor. An act of 1848, by 1848, gifts to charitable corporations by will must be made two months before the testator's death; and by another enacted in 1860 any person having a husband, wife, child, or parent, is precluded from bequeathing more than one half of his clear estate to any society, association, or corporation. In Georgia, in like manner, a gift to charitable uses by will is made void if the tes- tator has a wife or issue living, unless made ninety days before his death. In other states the checks to the ac- quisition of real estate by corporate bodies are such as are imposed by their charters, or by the general laws under which they have become incorporated. These limit their property to an amount sufficient for their natural uses, and whenever corporations come into the possession of more than is thus demanded or authorized, a special act of legislation is necessary to legalize such possessions; excepting, however, the transfer of landed estates to religious or educational institutions. Yet the latter event took place, and when Bothwell became a noble of the nation, Morton was the great leader in opposition to him; and it was to the castle of his relative, the lady of Loch- leven, that Mary was conducted when she delivered herself up to Carberry Hill. When Mary was securely lodged in this place of confinement, the earl of Murray

Morton, Charles, an early New England divine, was born in Cornwall, England, in 1626; was educated at Oxford University, of which he was a fellow; entered holy orders, and was at first a Royalist, but becoming a Puritan, removed from England in 1662. He had established an academy at Newington Green, and continued at its head for twenty years. Among his pupils was Defoe, the author of Robinson Crusoe. Being much annoyed by the bishop's court, Morton felt obliged to leave the country, and in 1668 emigrated to New England, and settled in Charlestown, Mass., where he held a position till his death, which occurred April 11, 1698. He was well esteemed by his contemporaries, and acknowledged to be a man of eminent learning. He wrote a number of religious works, among which is The Ark, its Loss and Recovery. See Drake, Dict. of Amer. Biog. s. v.

Morton, James Douglas, Earl of, a Scotch no- bleman. He was a quite new and important figure, and as ecclesiastical history of his country, was the second son of Sir George Douglas of Pittendrie, and in 1658 succeeded, in right of his wife, Elizabeth, daughter of the third earl, to the title and estates of the earldom. His father was a most ardent adherent to the cause of the Roman Catholic party in early life and, also favoring the same cause, and was a friend of king Henry VIII in the designs of that monarch in reference to Scotland. His name, however, does not often appear in the public transactions of the period; and although in 1577 he was one of the original Lords of the Congregation, he seems yet to have been afraid of the consequences, in a per- sonal point of view, of casting off the queen-regent, from whom he had already received considerable favors, and therefore held a rather doubtful and irresolute course. It was for this reason that Sadler, the English envoy, describes Morton as "a simple and fearful man." The death of the queen-regent, however, completely changed the man. He now boldly came forward and avowed him- self unequivocally a Protestant. Sworn a privy coun- cillor in 1561, he was appointed lord high chancellor of Scotland, Jan. 7, 1568, in the place forfeited by the earl of Hunsley, who had been the great head of the Roman Catholic party in Scotland. He had, however, only in the office a few years when he was obliged to quit it; for, having been one of the chief conspirators against Rizzio, the Italian secretary of queen Mary, on his as- sassination, March 9, 1566, he fled with his associates to England, and remained there until, through the interest of the earl of Bothwell, he obtained his pardon from the queen. Bothwell, unprincipled as he was, no doubt helped Morton because he hoped, in turn, to be obliged; and no sooner was the earl reinstated in favor with the queen than Bothwell opened to him the plot which he meditated for the murder of Damley, expecting, of course, Morton's ready acquiescence. In this, however, Bothwell was disappointed. Morton had refused the request; but neither did he inform Damley of the plot, nor take any measures to prevent its being executed; and he was one of those who subscribed the famous bond to protect Bothwell against the charge of being concerned in the murder, and to use every endeavor to promote his mar- riage with the earl of Bothwell's daughter. Yet Morton was present at this latter event took place, and when Bothwell became a noble of the nation, Morton was the great leader in opposition to him; and it was to the castle of his relative, the lady of Loch- leven, that Mary was conducted when she delivered herself up to Carberry Hill. When Mary was securely lodged in this place of confinement, the earl of Murray

was made regent of the kingdom, and Morton reinstated in the office of lord chancellor. He continued in this situation during the regencies of Murray, Lennox, and Mar, and was indeed a principal actor in all matters of importance which took place in their time; and on Mar's death, at the end of the year 1572, Morton was himself appointed regent of the kingdom. While in the regency Morton played an important part for the ecclesiastics, for he was anxious to restore the Church and its properties to the Kirk. He was at this time involved in much controversy, because the former was bent upon the introduction of the episcopacy. The conflict had begun previous to the death of Knox (November, 1572), for the purpose of securing to the Church the revenues of the episcopal sees; and a conversation of superintendents and other ministers fa- vouring this purpose had been held by the Bishop of Ross in 1572, and had declared that the titles of bishop and archbishop should be restored, provided that with the restoration of titles no greater authority was delegated than was possessed by the superintendents, and that they be elected by the ministers of the respective dio- ceses. The primary object to see the property passing into the hands of the nobles and courtiers. But the General Assembly, which convened shortly after the convention, condemned the innovation, and hence arose a conflict with the regent, who favored the action of the convention which he had been instrumental in calling. He had himself an interest in the success or failure of this issue of the movement; he cared less for the Church's interest than he did for his own, his object being osten- sibly to place these bishops in positions to draw the in- come of the benefice, but really to secure for himself and other nobles a larger part of the revenues from those ecclesiastics whom he should help to elevate to such stations; and hence these episcopal incumbents were called tulchan bishops—a tulchan being a califkin stuffed with straw, which the country people set up be- side a cow to induce her to give her milk. The bishop, it was said, had the title, but my lord had the milk. This conflict between the tulchan episcopacy and the Church establishment, supported by legal enactments, continued until the close of the earl's regency, when it was brought to a successful termination for the Kirk's interests by the efforts of that worthy follower of John Knox, the learned and resolute and noble-souled Andrew Melville (q. v.).

Morton, John, an English cardinal and arch- bishop, one of the most noted characters of the history of England during the Middle Ages, figuring promi- nently in the political history of Europe, was eldest son of Richard Morton, of Milbourne St. Andrews, in Dor- setshire, and was born about 1428. He received his primary education at the Benedictine abbey of his native place, and thence went to Batiel College, Oxford, to study canon and civil law; and after having become master of arts, went to London, and practiced law in the Court of Arches, retaining, how- ever, all the time his connection with the university. In 1453 he was made principal of Peckwater Inn, hav- ing been previously ordained. In 1450 he was appointed subdean of Lincoln, and in 1458 he was collated to the prebend of Fordington with Writhlington, in the cathedral of Salisbury, which he resigned in 1476. In the same year he was made prebendary of Cog- hham, in the cathedral of Lincoln. In 1472 he was col- lated by archbishop Bourchier to the rectory of St. Dunstan's-in-the-East, London; and the same year also to the prebend of lacedon, in the cathedral of St. Paul, which he exchanged in the following year for that of Chwick. In 1473 he was appointed master of the rolls, and in 1474 archdeacon of Winchester and Chester. In the following year he became archdeacon of Huntington and prebendary of St. Decuman, in the cathedral of Wells. In April, 1476, he was installed prebendary of South Newbald, in the metropolitan church of York, and archdeacon of Berkshire; and in January, 1477, he was made dean of the city of Leicester. Rarely were appointments bestowed so liberally upon any one as upon Morton. But the reason is easily found. While yet practicing as an advocate in the Court of Arches, his eminent qualities were a mat- ter of general comment, and brought him to the notice of cardinal Bourchier, who, besides conferring many of the above preferments on him, had introduced him to Henry VI, by whom he was made one of the privy council. To this unfortunate prince Morton adhered with so much fidelity, while others deserted him, that even his successor, Edward IV, admired and recom- pensed his attachment, took him into his council, and was principally guided by his advice. He also in the same year, 1478, made him bishop of Ely and lord chan- cellor of England; and at his death he appointed him one of his executors. On this account, however, he was considered in no favorable light by the protector, after the murder of Henry VI. His life was one of usefulness, whose life was required to give peace to the sovereign. Accordingly, when Morton and others assembled in the Tower, June 18, 1483, to consult about the coronation of Edward V, the bishop, with archbishop Rothera and lord Stanley, were taken into custody, as known en- emies to the measures then in agitation. Morton's ex-
section was expected by everybody. His numerous friends, however, made bold, particularly those at the University of Oxford, and these learned men addressed a petition to the Pope, which, as their Latinity was capable of being万一 imprisoned and patron; and praised him and apologized with such success that the king relented so far as to direct his being sent to Breconwick, to be in charge of the duke of Buckingham" (Williams). He was accordingly sent to the castle of Breconwick, in which there was made his escape, to the Isle of Ely, and soon after, disguising himself, went to the Continent, to Henry, earl of Richmond. It is said that the plan of marrying Elizabeth, the eldest daughter of Edward IV, to Henry, and thus, by joining the white rose with the red, effecting a coalition between the houses of Lancaster and York, which was originally suggested by Morton. In 1465 the word came to Morton, then in Flanders, that his enemy had been dethroned, and with it an invitation for his attendance upon the coronation of the new king, afterwards Henry VII. He returned forthwith, easily got his attendance reversed, and was at once admitted into the confidence of his new royal master, who was no sooner seated on his throne than he made Morton one of his privy council; and on the death of cardinal Bourchier in 1486, secured his election to the archbishopric of Canterbury, a position which he honored, and in which he conducted himself so well that he was in good measure the means of the promotion of the interest of Williams thus sums up his official character and conduct (Letters of the English Cardinals. Lond. 1862, 2 vols. 8vo. ii. 167 sq.):

"In the performance of his ecclesiastical duties Morton took high ground. To a considerable extent he favored the pretensions of the papal court, but while doing so exercised a vigilant and vigilant spirit over the English clergy, maintaining a severe discipline. The objects with which the principal religious houses of a mixed character, and the order had been founded were usually lost sight of; and the great abbeys and priories throughout the kingdom were, with a few exceptions, becoming so notorious for the luxurious and depraved living of the fraternities, as to excite satirical attacks from both clergy and laity. The archbishop of Canterbury, knowing the scandalous practices that existed in his own diocese, as well as in others, was anxious to remedy so grave an evil. He heard the reports of various persons likely to be well informed on the subject, and then sent to Rome for instructions. He was well aware that without due support from the highest quarters no amendment of the disease, which he knew to be eating like a leprosy into the Church, could be effected. The immorality of the Religious Orders began to flag as the quarter of the fifteenth century that the primacy readily procured the pope's authority for a visitation, on the occasion of the visitation of abbots and abbesses, and laid the result before a provincial synod. His exposure of faults and his forceful procedures were so capable of being assemledly; admonitions and cautions were bestowed upon the great offenders, but the clamor of clerical roysterers, sportiveness, and debauchery of the high and mighty was characterized with judicially. The severest thing done was the sending around to religious houses a written address dictating on the scandalous lives that many priests were living, and exhorting them to reform.

"The state of things was atrocious enough apparently to have caused the house of the English pope to stir in his grave with indignation. Ample provocation had been given; and the same expedient which he had been the head of the Church thus disgraced and outraged; but archbishop Morton presently found that he had come upon a man so impudent that he had neither the courage to oppose. Probably he was made aware that the abbot William had influential friends in England as well as in Rome, as such deponents could always secure, and that his proper punishment was impossible; or discovered that St. Alban's was only one of the many establishments that he might visit, and in which he could produce no reforms, and which had become a byword in the opinion of right-minded Catholics. Severance of relations was therefore the more easily assenting to the extravagances of fashion adopted by the laity. Priests were prohibited wearing hoods, with far or gaiters, but only with stockings, or adopted them in short, tall, or having caited about the neck. They were not to array themselves with sword or dagger, or with decorated belts, but were to walk abroad in their proper crownings, and show their arms.

"A most remarkable document was the bull of Pope Innocent VIII, published in 1489, stating that the English king, considering the great harm done by the expulsion of the English pope from the Church, and giving authority to the primacy for their correction and reform. The latter was earned in the cause, for the pope at first took it as an act of contumely towards the sure and likely reformation of priests, clerks, and reformatory, and the uncleanness of a man of the incontinent living in their bodies, contrary to their order, and directed punishment to be awarded for such beatty. The pope was at Large, ii. 66. The king took special interest in this praiseworthy movement, and encouraged the primacy to proceed without infringing upon the authority of the pope, kingly, and Parliament, he increased his exactions, and proceeded with all the state he could assume, in accordance with his royal and episcopal dignity. A clause was to make visitation after visitation—at Rochester, Worcester, Windsor, Norwich, Lichfield and Coventry, Bath and Wells, Winchester, Lincoln, Durham, and Canterbury; to correct abuses, he collected money, as he found the offenders ready to

"spend for sins they were inclined to. By damming those they had no mind to."

That Morton found favor in the eyes of his king is evident, inasmuch as he made this archbishop also lord chancellor. In a council of his suffragans, which the archbishop held in February, 1486, at St. Paul's, in London, the convocations in the Anglican Church were further considered, and measures adopted to deepen the religious fervor of the people. It was also provided that "the first name of any person of every office and degree should be given on six masses to be said for the soul of a departed bishop, within a month from the time of their hearing of his death." Some measures adopted by this council were the subjects of attack. Among other arrangements it was provided that ecclesiastics should not preach against the papacy or against any ecclesiastical officers before the lay people. Morton's intent, no doubt, was to favor and please the papacy in so far as was at all consistent with the end he desired to attain. He certainly did not mean to check any reforms. Thus he provided that if any individual person behaved himself wickedly, the ordinary was to be informed; and if the ordinary did not correct such offender, the archbishop was to be appealed to; and, finally, if he did not punish the delinquent, then it was the said prelate's will that the preachers generally should declare against him.

In 1480 Morton, after repeated and urgent requests of the English king, was created a cardinal by pope Alexander VI. The few years that remained for him to live he employed in the work to which he had dedicated his life. He instituted and promoted reforms in the Church wherever his keen eye could detect their need. He also labored assiduously to advance the interests of his royal master, as far as they were consistent with the pope the canonization of Henry VI. He failed in this, but succeeded in securing the canonization of Anselm, which he had also desired. He died, according to the Canterbury Obituary, Tuesday, 16 kal. Oct.; but according to the Register of Ely, Sept. 15, 1590. Leland says that Morton was a remarkable man. He was cardinal of the church, and pope Alex- ander VI. He was cardinal of the church, and pope Alex-

"A cardinal Morton," says Williams, "has left solid claims on the respect of posterity; but more enduring than his benevolent bequests, and his useful buildings and improvements, have been
his labors to effect a reformation in the Church. They were not productive of much immediate result, but helped materially to bring about the vigorous movement which the appearance of his book (in 1562) followed. His investigations proved beyond the possibility of doubt that the evils of the papal system had nearly reached their limit" (p. 190). Cardinal Morton was the patron of Sir Thomas More, who eulogized him in his *Utopia*. The *Life of King Richard III*, sometimes attributed to More, is believed to have been written by More if Morton did not himself write it. The life seems to be clear that More (who was in early life a page in Morton's house) must have derived part of his information directly from the archbishop. See *Tanner, Bibl. Brit. Hist.,* p. 532, 533; *Bentham, Hist. of Ely (Cambr.* 1771), p. 179-181; *Budden, Life of Ely (Cambr.)*, p. 5; *Morton, Lives of the Archbishops of Canterbury*, vol. v.; *Williams, Lives of the English Cardinals*, vol. ii, chap. vii; *Collier, Eccles. Hist.* (see Index in vol. viii).

Morton, Nathaniel, an American writer on ecclesiastical history, and one of the Plymouth colonists, was born in England in 1612, and came to this country with his father in 1628. In 1645 he was made secretary of the colony, and continued to hold that office until his removal in June 1645. He was appointed as the author of *New England's Memorial, or a Brief Relation of the most memorable and remarkable Passages of the Provoc- ence of God manifested to the Planters of New England*, etc., compiled chiefly from the MSS. of his uncle, William Bradford, and the journals of Edward Winslow and including the period from 1609-1646. (By O'Briens, 1669, 4to; 2d ed. Boston, 1721, 12mo; 3d ed. Newport, 1727; 5th ed., with notes by Judge Davis, 1826; 6th ed., with notes by the Congregational Board, 1855, 8vo.) He also wrote in 1690 a brief *Eccles. Hist. of the Plymouth Church*, in its records, preserved in Ebenezar Hazard's collection. See *Chapman, Course of English Reading* (1856), p. 15; *North Amer. Rev.* xlvi, 481 sq.; *Winthrop, New England (1858)*, i 94; *Bacon, Genera of the New England Churches* (1875), p. 199, 475.

Morton, Thomas, an English prelate noted for his learning and prudence, was born at York in 1564. He was a relative of cardinal Morton, but a Protestant. In 1582 he was sent to St. John's College, Cambridge University, and after graduation was chosen a fellow (in 1589) where he remained for two years. He was attentive to a later order, and about 1599 became chaplain to the earl of Huntington, and made himself conspicuous in attempts for the recalling of such of the Protestants as had become recusants during the reign of bloody Mary. During the plague of 1602 also Morton distinguished himself in the way of charity to the sick. In 1606 he was abroad as chaplain to lord Eure, ambassador to Germany and Denmark, and while in those countries availed himself of the valuable literary advantages brought within his reach. In 1606 he was made chaplain to king James I, and given the prebend of the deanery of Winchester. He was also at this time made a fellow of the newly-established college at Chelsea, whose aim was to defend Protestantism from the assaults of the Romanists. In 1615 Morton was elevated to the episcopate, and given the see of Chester; was transferred to that of Lichfield and Coventry in 1618, and in 1628 to that of Durham, which he held with great reputation until the opening of the Long Parliament, when the strong prejudices against the episcopate vented themselves also against Morton, and he had to endure many annoyances and trials. He was finally deposed from his office when the bishops were dissolved, but was granted a pension of £600, which he never enjoyed. He removed to the house of the earl of Rutland, and later to the seat of Sir Henry Yelverton, at Easton Maudit, in Northamptonshire, and there he died, Sept. 22, 1659. His funeral sermon was preached by Dr. John Barwick, afterwards dean of St. Paul's, and printed at London in 1660, under the title *IBONIKHE*, or *The Fight, Victory, and Triumph of St. Paul, accommodated to the Right Rec. Father in God, Thomas, late Lord Bishop of Durham*. On this work the archbishop of Canterbury was a great friend and patron of the noted Swiss Savant Cassubon, who spent some time in England under king James. Shortly before his death, the bishop was engaged in a lively controversy on his position regarding the episcopal succession. In 1657 there had been published a book at Rome, entitled *A Treatise of the Nature of Catholic Faith and the Form of the Christian Faith in which* was annexed a confession: "In the beginning of the Long Parliament, when some Presbyterian lords presented to the upper house a certain book to prove that the Protestant bishops had no succession nor consecration, therefore were no bishops, and had no right to sit in Parliament; bishop Morton replied against the book in behalf of himself and his brethren, and endeavored to prove succession from the last Roman Catholic bishops, who ordained the first Protestant bishops at the Nag's Head in Cheapside." The bishop took exception to such a version, and insisted that he had no faith in the verity of the Nag's Head consecration, and preferred not to endorse it. See *Life of Thomas, bishop of Durham*, by Dr. John Barwick (1660, 4to); also Richard Baddiley and John Naylor, *Life of Thomas Morton* (1665, 8vo); *Biegr. Brit. s. v.*; *Gen. Biegr. Dict. s. v.*; *Soames, Ch. Hist. Elizabethan Period*; *Ferry, Ch. Hist.* (see Index in vol. iii.) (J. H. W.)

**Mortuarian.** See MORTUARY.

Mortuary (derived from *mors*, death), is, in British ecclesiastical law and usage, a gift which is offered to the minister upon the death of one of the parishioners. It was anciently the usage, Selden tells us, to bring the mortuary to the church with the corpse; whence the word mortuary, from morti facere, to provide for the soul. The custom now is, that the payment of the mortuary was once voluntary, though so early as in the reign of Henry III we find that the custom was established. The mortuary was given by way of compensation for the tithes and offerings which the deceased had failed to pay in his life-time, and for the salvation of his soul. In the reign of Henry VIII the custom was found to be the cause of great excations on the part of the clergy, and of expensive litigation. Accordingly the statute 21 Henry VIII, c. 6, was passed, by which it is enacted that mortuaries shall be taken in the following manner, unless where less or none is due by the custumary, viz.: for every person who does not lose goods to the value of ten marks, nothing; for every person who leaves goods to the value of ten marks and under thirty pounds, 3d. 4d.; if above thirty and under forty pounds, 6s. 8d.; if above forty pounds, of what value soever the goods may be, 10s., and no more. It is enacted further, that no mortuary shall be paid on the death of a married woman, nor for any child, nor for any one that is not a housekeeper, nor for any wayfarer man; but such wayfarer man's mortuary shall be paid in the parish to which he belonged. This is the statute which regulates mortuaries
MORUS was chiefly felt. His works are mostly posthu-
mos publications, issued under the editorship of men
who had been his pupils, one of whom fairly estimates
the position of Morus when he says that the science of
hermeneutics in the 16th century was 'recentissime
executa et diliciusius explicata.' He left valuable edi-
tions of various classical authors, commentaries on most
of the books of the N.T., and other books of value.
Among these, the most important are Vita J. J. Retiakii
(Leips. 1776, 8vo) — Episteme Theologica Christiana
(Leips. 1780, 8vo; trans. and ed. by Schneider, 1795).
This manual of theology went through several edi-
tions, and was long used as a text-book of dogmatics
in several universities. It is a work highly commended
by Hagenbach in his Hist. of Doctrines, ii, 888; and by
J. Fye Smith, First Lines of Christian Theology, p. 29
rev. — Commentarius exegetic-historicus in Mori Episco-
pios (Halle, 1797-98, 2 vols. 8vo), published after his
death by C. A. Hempel — Precletiones in Luce Evan-
gelium, ed. C. A. Donat (Leips. 1795, 8vo) — Recitationes
in Evangulium Joannis, ed. Th. J. Dindorf (Leips. 1808,
8vo) — Versio et explicatio Actorum Apostolorum, ed.
G. J. Dindorf (Leips. 1794) — Precletiones in Epistolam
Pauli ad Romam, ad Corinthios, ad Ephesios, ad
rumpum quorumdam N. T. difficiliorum interpretatione,
ed. I. T. T. Holzapfel (Leips. 1794, 8vo) — Accrescere
in Epistolos Paulinum ad Galatas et Ephesios (Leips.
1795) — Precletiones in Jacobi et Petri epistolam, ed. C.
A. Donat (Leips. 1794) — Precletiones exegetic in tres
Evanguliums, ed. J. V. Retiakii (Leips. 1796) — Opera
cura C. A. Hempel (Leips. 1797, 8vo) — Akademische
Vorlesungen über die theologische Moral (Leips. 1794-95,
3 vols. 8vo) Published by F. T. Voigt — Dissert. theo-
logico et philologico (Leips. 1787-94, 2 vols. 8vo; transal.
to German by Rüchsel, Leips. 1795-96) — Super her.
meneum Novi Testamenti (Leips. 1797-1802, 2 vols.
8vo) Published by H. K. A. Eich-
staelter. This work may be best described as lectures
upon the Institutes of Erasmi. A collection of his ser-
mons was published at Leipsic in 1786. See Autobi-
v, art. iii; Recitation de Marco, habita a Christiano
Dann, Reckis (Leips. 1792); Hösper, Uber dem Leben u.
und Verdienste der verehrten Morus (1783); Weisse, Mus
m für sächsische Gesch. i, 26 sq.; Kahnis, Hist. German
Protestantism; Schlittgrull, Nekrolog. d. Deutschen,

ites-Lexikon, s. v. (J. H. W.)

MORUS, THOMAS. See More, Sir Thomas.

MORILLIER, JEAN DE, a French prelate, was born of
noble and distinguished parentage at Blois Dec. 1, 1508,
He was educated to the holy orders and therefore
received careful training, and after filling various
minor positions, was made successively dean of Bourges
and Evrues, abbot of St. Pierre de Melun and Bourg-
Moyen, and was finally designated by king Henry II
for the bishopric of Orleans, and confirmed in this see
by the papal bull of April 21, 1552. This is, however, not
the complete list of his benefices; he possessed many
others, the functions of these being performed by vicars or
proxies. Entirely taken up with service to the king, he
appeared rarely even in his bishopric. One of his few visits
to Orleans gave occasion to a strange controversy; it was
in November, 1552. He was more of a gentleman than
of an ecclesiastic, and, according to court fashion, wore
a long beard. This exercised the canons of Orleans to
such an extent that in a chapter they resolved unanimous-
ly that the lord bishop must divest himself of this
uncannonicam ornament at the earliest moment possible.
He received the summons, but did not, however, submit
to it. Several new complaints, another refusal of obedience, judicial
pleadings, quotations from the common law, and great
tumult in Orleans. This grave and stormy dispute lasted
nearly four years. Finally, thinking that the cause of his beard was lost, he appealed to the king for

MORUS, SAMUEL Frederic Nathaniel, a distin-
guished German Lutheran divine, was born at Leips-
ich, in Upper Lusatia, Nov. 30, 1786. He received his first
education from his father, who was professor in the
grammar-school at Lauban, and in 1754 Samuel went
with his father to study philosophy and theology in the
University of Leipzig, where he was a devoted pupil of
Ernesti, and under the guidance of this celebrated master of exeg-
ected theology laid the foundations of his future usefulness
and renown. He soon distinguished himself by his
learning and his sound judgment, and became success-
ively at his alma mater professor of philosophy in 1748,
and of the Greek and Latin languages in 1771.
After the death of his beloved teacher, Ernesti, in 1783,
Morus was appointed to fill his place as professor of
theology. His learning, activity, and sound judgment ren-
dered him eminently fitted for that position, which he
retained until his death, Nov. 11, 1792. It was as a
teacher rather than as a writer that the influence of

MOSAISM

To detail the defects which called for this super-

sedure, we invite attention to another inference not so

far from that at which we arrived, viz. that the Jews,

with a vast array of ceremonial apparatus and parade.

Under the Christian economy. on the other hand, the

human man has sought to come directly to God for

pardon of its sins. Yet there is no better ground for

in the person of the Redeemer, who is at once Victim

and Intercessor. The practical influence, however,

of the recourse by the Jewish penitent to the Levitical

arrangements, with the necessity of a prescribed sacri-

fice, at a special place in a particular manner, and above

all by the instrumentality of a public functionary, must

have been immense in keeping out of the popular mind

the immediate responsibility of each human being to its

offended Maker and God. In this respect Romish and

Greek Catholicism has gone back to the "weak and

beggary elements" of Judaism, and the exaltation of

the Church as the only authorized channel of mystical

themes in the same direction. The apostle Paul everywhere

enters his most vigorous and emphatic protest against these

assumptions as a corruption of the whole evangelical

scheme. The Ephes. ii. 14, especially, is a

prolonged argument on this topic.

The ritual of the soul after the

dissolution of the body is not expressly taught in the

Old Testament, but it is continually implied, and not

obscurely intimated in the references to the spirits of

the departed (e.g. "gathered unto his fathers," i.e.

in the world of shades), and in the anticipation of meeting

in the other world (e.g. Matt. xxv., 31; 1 Thess. iv.

15; Rev., 4, 12), Jesus proved this point to the confusion of the Jewish

sceptics of his day (Matt. xxii., 22). But the doctrine of the

resurrection of the body likewise is so alluded to that it is

immaterial of the soul, that the later Jews appear to have inferred it from the few hints dropped

to that effect in their Scriptures (especially, perhaps,

from Job xix., 25-27; Ps. xvi., 10; Isa. xxvi., 19; Dan.

xii., 2), for the Pharisees and Talmudists entertained it

as a settled portion of the orthodox faith. Yet it was

so far reserved for Christ to establish and illustrate this

glorious truth by his own revival from the grave, and

by his explicit declarations (e.g. John xii., 24), that he may

justly be said to have "brought life and immortality to

light."

2. Socially and Politically.—Here, too, a few points

must suffice by way of characterization.

(1.) Marriage.—In no particular, perhaps, is modern

civilization more distinguished from the cultivated

nations of antiquity, as well as from the countries

of paganism and Mohammedanism, than in the

delicate regard for woman which it has enforced. But

this is chiefly due to the moral influence of Christianity, and is directly traceable to the

restoration by our Saviour of marriage to its

Christian principle and condition (Matt. xix., 8-12). Here

likewise the Gospel appears to have much to do with the

Mosaic law as the latter does to heathenism. The last

tolerated almost indiscriminate licentiousness, and the

mythologies of Greece and Rome added the example of

a profane religion with indescribable orgies. But

Mosaism, although it restrained, still did not abolish

concupiscence, and thus left the female sex measurably

enthrallled by traditional degradation. To its credit,

however, it must be said that it never (except in the

limited and late example of the Essenes) ran into the

morbid prurience of celibacy, which has entailed severe

evils upon corrupt forms of Christianity.

(2.) Exclusiveness.—The Jew was hereditarily a

bigot. Territorially, ecclesiastically, and commercially

his position by the Mosaic economy was an isolated

one, and that reserve and suspicion of foreigners which

was originally a safeguard against idolatry, became at

length a turbulent, odious, and anti-humanitarian trait

of national character. The Hebrew word for the

outside nations ("Str") acquired a sense of proscription, and

"Gentile" was regarded by the Israelite as nearly sy-

onymous with "dog." Christianity, on the contrary,

"broke down this middle wall of partition," and taught

that all men are brethren, alike made by the common
Father, and equally redeemed by the one Saviour. Zerubbabel encouraged sectarianism (Ezra iv, 9); Jesus rebuked it (Luke ix, 55). With the Hebrews circumcision was a test of caste, and is hence contrasted with the essence of Christianity (Gal. v, 2). So liberal is the genuine spirit of the latter, that no greater reproach or inconsistency, perhaps, in modern times is found among its professors than a similar refusal of fraternity under the ground of some ceremonial or ordnamental peculiarity.

(3.) Patriotism. This partook largely of the above danish feeling engendered by Mosaism. Rome was not more jealous of the rights of citizenship than was Judaism. "Thou shalt love thy fellow [Jew], and hate thy enemy [the Gentile]." was the interpretation put by the Israelites in general upon the Mosaic code. True, this was a perversion of its spirit, which repeatedly enjoins the largest charity towards aliens (Exod. xxxii, 9; Lev. xix, 33; Deut. xii, 18, etc.), but it was the natural result of the Hebrews' history and training. Hence the Jewish passion for independence, and hence, too, the ambition that nurtured a literal interpretation of the glowing pictures in the Old-Testament prophecies concerning the ultimate agrandeisement of the nation. Christianity, on the other hand, renounced at the outset all pretensions to political power (John xvii, 36), and enjoined an absolute subordination and submission to those who are appointed by God to lighten the world by changing its course and calculating to awaken patriarchic ardor. Indeed, the early Christians were compelled to regard themselves as "pilgrims and strangers on earth, and when they transferred to the Church and to heaven their former attachment to countrymen and fatherland. At the same time their philanthropy became both more intense and more cosmopolitan; and this depth as well as expansion of patriotism in the truest sense has ever since, with the most earnest Christians, refused to be limited to the accidents of birthplace. The essential brotherhood of all mankind is a principle with which Christianity is slowly revealing the world, and the millennium's glory will be but the universal realization of the idea.

3. Spiritually. The analogy between Mosaism and Christianity, as we have sketched it, has, it will be perceived, been gradually opening into contrast. This is most apparent in this the highest range of significance of either economy. It is here that the earlier structure intended to serve but as the scaffolding for the final edifice is seen to be but an obstruction that needed to be removed when the grand temple was finished. We name, as before, but a few leading particulars.

(1.) Regeneration. The absolute necessity of this comes out in several affirmations, when the people are told by our Lord to Nicodemus, as a prime condition at the very entrance of the Christian career, struck the Jewish ruler as a novelty, if not absurdity. Yet, as the Great Teacher's retort of equal surprise at his hearer's ignorance implies, there are intimations, neither few nor insignificant, of such a change in the next character (1 Sam. x, 6; Psa. lii, 10, etc.). Even the sense of divine adoption, attendant upon the new birth, is plainly indicated, though under a different name (Gen. v, 24; comp. Heb. xi, 5). Nevertheless there can be no doubt that the mass of saints under the Jewish economy knew little about the spiritual experience which is the privilege of every child of God since the fuller dispensation of the Holy Spirit (Matt. xi, 11). The improvement in the religious state and conduct of the apostles after the memorable Pentecost is of itself an evidence and exemplification of this. The highest possible difference in this respect is that now to be made by ourselves. This before this event is expressed by our Lord in one word as an advance from service to friendship (John xv, 15; comp. James ii, 23); thenceforth it was a transition to oneness (John i, 12), with all the perquisites of the immediate pledge (Gal. iv, 6), and the future reversion (Gal. vii, 16, 17). It is to be feared that too many professing Christians of the present day rest in the conclusion of liberalism (Rom. viii, 15), without rising to the privilege of spiritual liberty (Gal. iv, 7). A religion of forms, however sincere and consistent, without a generating power, is but a relapse to Mosaism (Gal. v, 1).

(2.) Worship. In nothing, perhaps, was the revolution from the Mosaic law to that of Christianity more striking than in the abandonment of the pompous ritual of the former for the simple devotion of the latter. True, there is a retention of the synagogue as the way for those of the Church, and indeed formed their model. But so strong a hold upon the imagination and the heart of the Jews had the Temple and its pageantry made, that even after the adoption of the Christian faith most of the Hebrew converts of the apostolic age retained this part of their former service and devotion to their new relation. The great axion propounded by our Lord at Jacob's well, that God's nature requires a spiritual worship (John iv, 24), struck the key-note of a fundamental reform in the very basis of all religion. Alas that this truth should ever have been again overlaid by the mummeries of form! The bane of life worship is formalism. Not alone amid the gorgeousness of Catholicism, or of semi-Romish ritualism, does this insidious influence display itself; the baleful tendency lurks likewise in the sanctimonious tones of Puritanism and the cant of Pietism, and even under the garb of the primitive and apostolic life is constantly required to keep from reverting to the deadness of the letter (Rom. vii, 6).

(3.) Holiness. This, the crowning purpose of both the Mosaic and the Christian schemes, was very differently expressed and effected by them respectively. In the former it meant simply an external and formal dedication (καταργεῖν) of a person or animal, or a valuable article, object, or undertaking, to Jehovah, in token of its separation and interdiction thenceforth from secular uses. In the latter it signified an internal and actual consecration (διά νοίας) of the human spirit, subjectively regarded, to the glory of God, but yet to be employed in all the legitimate words and works of useful life. There was thus a cardinal, if not radical distinction in the nature and manifestation of sanctity as sought and attained by the Jew and the Christian. No mere form of words, like a magical spell, no opus operatus, can avail to free the heart from the sense and love of sin (Heb. x, 1). Indeed, the Mosaic law provided no sacrifice as an atonement for spiritual offences, such as pride, anger, selfishness, lust, etc.; but only for outward intrusions of certain ceremonial prescriptions. It is a fact, very deeply understood, that willful and presumptuous sins have no remedy or means of expiation under the Levitical code. Heart sins, and even outbreaking crimes—violations, for instance, of any of the Ten Commandments—were purposely excluded from the category of compoundable misdemeanors. Hence, after David had committed adultery he did not offer a sacrifice for the case of his concubine sheared of her guilt (Psa. lii, 16, 17). There was no way in such cases for relief but by an extra-Mosaic recourse to the general mercy of God, directly dispensed to the penitent—in short, by an anticipation of the Gospel scheme of gratuitous pardon for the sake of Another (Psa. li, 1-8). In like manner, though it might be the case before the sinner by the removal, or even the control, of his depraved nature and wicked tendencies. This was too sacred a precipice for even the unsanctioned foot of the great lawgiver to venture upon. It was silently reserved as the province of the Holy Spirit, whose function, true, the services of the Synagogue had prepared for his own action (Psa. lii, 11). Yet with all this borrowed light added to the boasted vantage of the only written revelation hitherto vouchsafed to man (Rom. ii, 17-24; iii, 1, 2), Pharisaism and Rabbinism, the final twin offspring of Mosaism, were such a mockery of righteousness, though claiming superlatively saintly, as God himself could stir the gentle spirit of the Redeemer to indignant
MOSAISM 671 MOSAISM

protest (Matt. xvi, 8–14) and bitter invective (Matt. xxiii.
). The tender-hearted Revelator, too, found no
language to describe the central seat of its worship but as
a "cornerstone, the chief among stones; and all nations," in
Egypt" (Rev. xi, 8), and branded its expatriated sacri
sary as "the synagogue of Satan" (Rev. ii, 9; iii, 9).
Now men knew better by sad experience the hollowness of
its pretensions than the apostle who had been "a Hebrew of
the Hebrews" for amid the glare which its Sinatic flashes threw upon his national consciousness he
cried out in an agony which he called "O wretched man
Daniel! I am, who shall deliver me from this body of death?"
and he ever afterwards characterized it as "a yoke of
bondage," and applied to it not only severe reftuation,
but likewise caustic irony (e. g.: the concision," Phil.
ili, 2). Once more we are compelled to repeat the la
men of the apostle on their solemn character — that they
wrote much the same spurious sainthood and the same blind
trucking to an assumed oal law.
The 19th century of our Lord has witnessed the insane blasphemy of
a pseudo-infalibility as a culmination of abominations that
have emanated from the "mother of harlots." Drunk with the
color of the saints, she is the melancholy and shocking successor of the audacious apostasy
(Matt. xvi, 29) which was not content till it had en-
tailed upon itself (Matt. xxvii, 25) the guilt of the mur-
der of its greatest Benefactor. Such is the outcome of all
"Holliness" not grounded in a radical renewal of the
most important of all the gifts of Christ which first breathed
the conscious soul into man.
III. In Contrast with Heathenism. — In this aspect, which is the really just point of view, Mosaicism shines with its true lustre. We name under this head like
wise a few only of the most prominent particulars.
1. Monothelitism. — The whole Judaic system was a standing protest against polytheism, as the most stringent of its precepts were against the idolatry constantly associated with the heathen multiplication of deities. It may safely be averred that the doctrine of the unity of God was original with the Abrahamic, and specially the Jewish race. Mohammedanism, the only form of false faith that holds it, borrowed it directly from the
Jews. We have not space to develop the multiform influences growing out of this cardinal tenet of all true religion; some of them are specified below, and for oth
we refer to POLYTHEISM. See also MONOTHESM.
2. Freedom from Superstition. — As a result of this single eye to the glory of a supreme God, Mosaicism was
calculated to deliver its followers from those chimerial fears and godless doubts which continually haunt
the votaries of polytheism and demonism. The Jew was not distracted by uncertainty at which of many often
contradictory shrines he should pay his homage, nor any uncertainty as to whether his God was able or willing
to heed and answer his petition. No ghostly horrors veiled his cultus, nor mystic rites overshadowed his
introduction into the divine presence. There were no moral or religious questions, or any impossibilities of
swath the higher designs, nor any petty envy in the bosom of a jealous deity. True, there was Satan and his
host of fallen angels against him; but he believed that these were mere creature powers, tethered (Job i, 12;
ii, 6) by the Almighty with whom he was in cove
nance, and that he was in no wise危害 by the unholy allegiance. There was no people by his imagination of
every brook and dale and hill and wood with naids and
ynmps and fauns and satyrs of superhuman power and antihuman whim. There were for him no lucky
and unlucky days, no capricious auguries and enigmati
cic oracles, no conjuring spells and omen s of fortune. There was no blind fate, but everything was in the
hand of an all-wise, beneficent Creator, Upholder, and

3. Freedom from Superposition. — As a result of this single eye to the glory of a supreme God, Mosaicism was calculated to deliver its followers from those chimerial fears and godless doubts which continually haunt
the votaries of polytheism and demonism. The Jew was not distracted by uncertainty at which of many often
contradictory shrines he should pay his homage, nor any uncertainty as to whether his God was able or willing
to heed and answer his petition. No ghostly horrors veiled his cultus, nor mystic rites overshadowed his
introduction into the divine presence. There were no moral or religious questions, or any impossibilities of
swath the higher designs, nor any petty envy in the bosom of a jealous deity. True, there was Satan and his
host of fallen angels against him; but he believed that these were mere creature powers, tethered (Job i, 12;
ii, 6) by the Almighty with whom he was in cove
nance, and that he was in no wise危害 by the unholy allegiance. There was no people by his imagination of
every brook and dale and hill and wood with naids and
ynmps and fauns and satyrs of superhuman power and antihuman whim. There were for him no lucky
and unlucky days, no capricious auguries and enigmati
cic oracles, no conjuring spells and omen s of fortune. There was no blind fate, but everything was in the
hand of an all-wise, beneficent Creator, Upholder, and

Ruler. This gave a nobility, a magnanimity, an ex
pansiveness to his views of life and destiny, which raised
him out of the puerile calculations and belittling aspi
rations, the undelineated guesses and terrors that took up
so large a share of the heathen's time and attention. True, he had his festal and his fasting seasons, his rou
line of sacrifice and ceremony; but these were all fixed
and conclusive, and were grounded on some clear his
orical or prophetical principle, so that they enlited his
intelligent and pious mind. It was not his priva
ly that the heathen, but the Jew, with a view to the
ncies of the rabbits that induced bewildement of
and morals into the later Judaism. The driv
ng trash of the Talmud is an excrescence upon Mos
ism. Such fables and endless distinctions were a fash
ion worther of heathenism (Tit. iii, 9).

4. Sublime Visions of the Future World. — We have al

veiled as a distinguishing trait of the Hebrew nation. Above all they prized and clung to their creed and in
stitutions with a tenacious conviction that served them as a shield of unspotted and invulnerable. Few if any hea
then though endowed of their religions were ever so
cared enough for its sanctions to forego any considera
ble gratification in order to meet its prohibitions. The
Jew, on the contrary, gloried in martyrdom for his faith,
and submitted to the most onerous privations in the
observance of its requirements. The very stiffness of its unaesthetic simplicity, the coldness and sternness of its
behests, the multiplicity and minuteness of its enact
ments, and the rigidity of its penalties, schooled its vo
taries into a Puritanic conscientiousness, which, indeed,
often degenerated into morbid punctilio and pulling cas
istry, but in more robust and generous spirits has never
been without an appeal to moral heroism, as in the line of
fortitude (Heb. xi, 38–39).
Even amid the convulsive threes of their expiring commonwealth, sublime exam
les of daring and devotion, actuated by a mistaken but
intense zeal for their imperilled polity, are recorded by
Josephus. This esprit de corps, if we may so style it,
for which the adherents of Mosaicism have ever been
proverbial, differs from the mere bravery of heathen
dom in being sustained by a religious fervor based upon the
most earnest conviction that it was heaven's cause for
which they were contending. The paradox of a misguided but superlatively dominant conscience (Rom.
iv, 17) was not here. The task of saving the life of Christ which first breathed the conscious soul into man.

Digitized by Google
ready touched upon this theme, but for another purpose; its importance and pertinence here call for a special notice. To a thoughtful mind, the destiny of the soul is the greatest of all questions, and cannot be too often considered. Hence pagan philosophy has exercised its most earnest efforts to solve the problem, but in vain. The pall that covers the bier was to them an impenetrable veil. Socrates and his most spiritual disciples, Plato, and Cicero, could only conjecture the fate of the human spirit. True, all religions hold to a future retribution, and this implies a survival of the soul after death. Yet this view was so beclouded with mythical poetry and metaphysical speculation, that the passage into eternity was truly "a leap in the dark" even to the most cultivated heathen. The light of revelation alone could pierce the gloom that surrounded the soul as it passed away from consciousness and observation. The bare fact of immortality might indeed be guessed—or rather, perhaps, the surmise was a trace of the pristine truth of Eden. But the circumstances of that state, especially the possibility and conditions of happiness in the future world, were even a more absorbing question; for continued existence without this assurance would hardly be deemed a real boon. On this point it is evident that the Jew never had any doubt; and hence he was ready to meet death cheerfully and even gladly. We repeat that martyrs could not have been possible without the faith which the Bible—whether of the Old or the New Testament—inspired. In it, as we know, furnish the first written revelation of God's will to man, and the first authentic clue to man's origin, moral relations, and final destiny. This gave the believer in the Mosaic code, with its concomitants and sequents, an immense advantage over Gentile theosophists beyond the grave. A man deeply religious could not only walk more securely in the path well-pleasing to heaven, but he knew assuredly that it would, if persevered in, at length conduct him thither in everlasting bliss. Even the dawning beams of that celestial illumination enabled Enoch, Noah, Melchizedek, Job, and doubtless many other ante-Mosaic, but not extra-Hebraic saints to tread with firm and elastic step that sacred road, and Christianity is but the noontide blaze of the same effulgence from the one great Sun of Righteousness which shone with a clear and steady, but not yet full lustre, on the horizon of Mosaicism (Ps, lxxxiv, 12).

Moschus. See MOHAMMEDAN SCIETS, in this vol., p. 424.

Moschato, JUDEAH, a noted physician and rabbi at Mount Sion, where he died in the year 1580, is the author of an important commentary on the Kozari of the celebrated Jehudah ha-Levi ben-Samuel (q. v.), entitled הosophו, ת"כ, The Voice of Judah (Venice, 1594). He also wrote, under the title of ו"ל, The Dispersed of Judah, fifty-two lectures on diverse matters (Venice, 1589; republished at Venice, 1711). See First, Bibl. Jud. ii, 891 sq.; De Rossi, Dizionario storico degli autori Ebrei, s. v.; Zunz, Gottesdienstliche Vorträge (Berlin, 1832), p. 432.

Moschiana is the name of a Mohammedan sect, who believe that God is literally what the Koran describes him to be. They are a sort of Anthropomorphites. It is certain that the vulgar Mohammedans are ignorant enough to imagine that God has hands, feet, eyes, and ears; some of them even hold that he has a thick, black beard, with a great many other imaginary attributes. See Broughton, Bibliotheca Historico-Sacra, p. 143.

Moschop'ar, GROGJUS ((Yrovórj ÍO Mergyú- Jirá)), a noted Eastern ecclesiastic, flourished towards the end of the 6th century. He is both a contemporary and a critic of Paulus Diaconus, patriarch of Constantinople. Moschop'ar took a leading part in opposition to the doctrine of the Latin Church on the profession of the Holy Spirit, and to the distinguished advocate of that Church, Johannes Becius or Vecius. He seems, however, to have had little weight with his own party. He published several treatises in opposition to the Latin Church, in the latter end of his life; but neither the attacks of the one nor the answers of the other seem to have been preserved. There is a letter of Moschop'ar to his friend George of Cyprus, printed in the life of the latter, which was published by F. J. Bernard de Rubeis (Venice, 1758). See Phaciennerus, Hist., i., 8; Allatius, Crest. Critic. Eccl. iv. 9, 10; Fabricius, Bibl. Gr. iii, 447, comp. viii, 53, 54; Smith, Dict. of Greek and Roman Biogr. and Mythol. s. v. Moschis. See CALE-WORSHIP.

Moschus (Μοσχος), or, as Photius calls him, Joanne, the son of Moschus, surnamed Ευσεβικός, or, what appears to be a corruption rather than translation of that epithet, Ζήδας, was born about 590, and was perhaps the first monk in the monastery of St. Theodoreus of Jerusalem. He afterwards lived among the anchorites in the desert on the banks of the Jordan, and subsequently filled the office of canonarchus in the convent of St. Saba. After visiting a large number of monasteries in Syria and Egypt, he, together with his friend Sophronius, afterwards patriarch of Jerusalem, came to Alexandria, where they enjoyed the sincere friendship of John the Almsgiver (q. v.), one of the best of the patriarchs of the Eastern Church, who esteemed them as fathers in Christ, obeying them in all things. After preaching at Alexandria for some time, Moschus traveled to Cyprus, Samos, and finally to Rome, attacking everywhere the heresy of Severus Aethopius. At Rome he applied himself, in connection with his friend and collaborator, Sophronius, to the composition of a work giving an account of the life of the monks of that age down to the time of Heraclius. It is dedicated to Sophronius and John of Damascus; and Nicetophorus assigned Sophronius as the author, from which it has been supposed that it was in reality mainly his work, though the name of Joanne Moschus was allowed to stand as that of the writer. It is, however, more probable that Moschus and Sophronius were co-laborers in this work as well as in their missionary journeys. The work was entitled Αποκαλυπτηρ, or Νωτειοκολη, and is still better known under the title of Pratum Spirituale. In that edition it is divided into 219 chapters. Photius speaks of it as consisting of 304 εννοιας, but mentions that in other manuscripts it was divided into a larger number of chapters. In compiling it Moschus did not confine himself to giving the results of his own observations, but availed himself of the labors of his predecessors in the same field. His narrations contain a plentiful sprinkling of the marvellous. "The style of the work," as Photius says, "is mean and unpolished;" but nevertheless it contains some valuable facts in regard to the councils, history, discipline, and especially monachism of those times. Moschus died at Rome, and Bollandus gives A.D. 620 as the date of his decease. The above-mentioned work was first published in an Italian translation, and incorporated in several collections of lives of the saints. The Latin translation of Aloysius Lipozanneus (Venice, 1538). It appeared in Greek and Latin in the second volume of the Acta Aurea Bibl., Patrum Ducensam (Paris, 1644, 1654). See Smith, Dict. of Greek and Roman Biogr. and Mythol. s. v.; Fleury, Hist. Eccles. ad an. 614 sq.; Santagione, Digizted by Google
MOSCOW

MOSCOW, HIRKONYNUS, a Polish Unitarian writer of note, flourished towards the close of the 16th or about the opening of the 17th century. He was a nobleman; a busy worker in the cause of his beloved religion, to whose name we are indebted for having preserved to us the evidence of the part he played in the religious world. His book on the status of women, which was written in Latin and published in 1599, was a valuable contribution to the literature of the time. His other works, however, were not so well known, and his influence on the development of Unitarianism was limited. However, his contributions to the cause of religious freedom and tolerance were significant, and his legacy continues to inspire scholars and historians to this day.

MOSCOW, (RUSS. Moskva), the ancient capital of Russia, which for centuries has been a great commercial and cultural center, and is situated in a highly cultivated and fertile district. The city, 400 miles south-east of St. Petersburg, is not only "the very personification of the ecclesiastical history of Russia," as Stanley speaks of it (Kant. Ch. p. 424), but has acquired a stronger hold over the religious mind of a larger part of Christendom than is probably exercised by any other city except Jerusalem and Rome. It must, therefore, be briefly considered here. Just as the Jew delights to call Jerusalem "the holy Zion," the Russian points with pride to this central city of his empire as "our holy mother Moscow;" and the lower classes of the nation, even so far as to name the road which leads to it "the great road from Vladivostok to Moscow" (Hatzhausen, Researches in Russia, iii, 151). In one word, Moscow is a very Russian Rome. Not that Christianity was first proclaimed here for the Russians (this was done at Kiev), but because it is the ultimate and permanent seat of the Russian primates (since 1820), and contains within its walls the Kremlin (Russ. Kremel), "that fortress surrounded by its crusted towers and battlemented walls," in which are united all the elements of the ancient religious life of Russia. The city abounds in churches and convents. Of the former it is said to have 400, all of the rank in the Greek faith, with the two English and Roman chapels, a German and a French chapel, two or three Armenian convents, and a Turkish mosque. It has convents also by the hundreds, counting among the white clergy. See Schneidtzer, Moscow (St. Peters. and Par. 1804); Prime, The Athabom and Missionary Journal of the New York Missionary Society (N. Y. 1874, 1875); Sonning, Russia, Tartary, and Turkey (Aberd. 1847, 12mo), ch. iv-ix; Ackerman, Historical Sketch of Moscow; Harper's Monthly, vol. xxi; Blackwood's Magazine, 1855, Jan. p. 8. See Russia. (J. H. W.)

MOSCOW, COUNCIL or (Concilia Moscovitanae). Several of these were held in the interests of the Russian Church from time to time, ever since the estab-

lishment of the metropolitan see of Moscow in 1320. (See below.) Of these councils, the most important are the following:

I. Held about 1500, and presided over by the metropolitan of Moscow, which fixed the number of monasteries for men and for women should be separated, and that priests were forbidden to perform divine service, and widower clerks to consecrate the holy mysteries in the latter; unworthy clerks were sentenced to be degraded; and all payments on account of ordination were forbidden.

II. Held in 1512, under czar Ivan the Terrible. It was attended by all the Russian bishops, and the metropolitan of Moscow; Macarius presided. The czar himself opened the synod by a speech, in which he exhorted the bishops to use all the understanding, knowledge, and ability each one possessed in their deliberations; and promised that he would be ready to join and support them in correcting whatever was amiss, or in confirming what was well established, according as the Holy Spirit should direct them. He then put them in mind that in the year in which he was crowned he had charged all bishops and hegumens to collect the lives of the saints of their various dioceses or monasteries, and that twenty new names had been added to the church. It was ordered that they be treated as saints in the Church. The council then repeated and confirmed the decree, ordering that the memory of these saints should be celebrated in the Church. After this the czar required of the council a reply to various questions relating to the external and internal discipline of the Church; whereupon they delivered a long answer, divided into one hundred chapters, which caused this assembly to be known ever after by the name of "the Council of the Hundred Chapters." These chapters appear not to have been signed by any Russian bishop, nor to have been submitted to the ecumenical patriarch for approval; and in consequence Macarius himself, who presided at the council, makes no mention of it in his Books of the Genealogies, in which he relates the history of affairs both in Church and State. These chapters give countenance to some superstitious customs and local errors, which in after-years produced lamentable schisms. In this council, moreover, the correction of the Church books, which was afterwards actually performed by the patriarch Nikon, was first proposed.

III. Held in the palace of the czar at Moscow in 1655, by the czar Alexius; Nikon, the patriarch of Moscow, presiding over the council. The chief act of the council was the correction of the liturgy, etc., of the Russian Church. Nikon, soon after his appointment to the patriarchate, had his attention drawn to the great alterations which had crept into the service-books then in use, which in many places, and even in the creed itself, differed from the ancient Greek copies; he therefore induced the czar to convocate this council, at which the following metropolitan, Macarius of Novgorod, Cornelius of Kazan, Jonah of Rostoff, Silvester of the Steppes, and Michael of Servia, were present, together with three archbishops and one bishop. The unanimous decision of the council was that "the new books should be glorified by the old Slavonic and Greek MSS., and that the primitive rule of the Church should in all things be adhered to." This decision was confirmed in a council of Greek bishops, convened at Constantinople by the patriarch Piamus, whose judgment the Russian bishops had requested. Upon this the czar and the council procured an immense number of MSS. and books from Mount Athos, by means of which and other assistance the revision of the Russian service-books was completed.

IV. Held in 1677 to select a successor to Nikon, the patriarch, who, having by intrigue of his enemies fallen into disgrace, had formerly been his great friend and patron, had in a moment of irritation abruptly renounced the patriarchate, and by this step had given rise to such disorders in the Church that Alexius, in order to re-establish peace, was obliged to invite the Eastern patriarchs to form a court for his

VI.-22
trial, and if possible for his dismissal, in order to make legal the appointment of a new incumbent in the patri-archate. Besides the Eastern patriarchs, Macarius of Antioch and Paisius of Alexandria, there were present at this council four Russian metropolitans, viz. Pitirim of Novgorod, Laurentius of Kazan, Jonah of Rostov, and Paul of the Steppes; six Greek metropolitans, viz. those of Nicaea, Amasia, Iconium, Trebizond, Varna, and Scio; the metropolitans of Georgia and Servia; six Russian and two other archbishops; and, lastly, five bishops, and fifty archimandrites, hegumens, and arch-priests, besides monks and others. Before this council
Nikon was solemnly cited to appear, "and thus it came to pass," says Stanley, "that the most august assembly of divines which Russia had ever witnessed met for the consecration of the greatest man whom the Eastern hierarchy had ever produced. The sons of the Church, gathered in the hall of Nikon's own palace. He appeared before the council like a person having made every preparation as for death, yet would he not brook treatment as a cast-out, and went in his character of patriarch, with his cross borne before him; and finding no place prepared, he was elected to sit at a level with the heads of the Eastern patriarchs, he refused to sit at all, and during all his trial remaining standing. His accuasions was read, with tears, by Alexis himself; it was to the effect that he had, by his unlawful retirement and capricious conduct, been the cause of grievous evils and disorders in the Church. A week was spent in deliberating upon his case, and in searching for precedents which had occurred in the Church of Constantinople; after which Nikon was summoned before the council in its third session. Having heard his accusation read, sentence was passed upon him, to the effect that he should be degraded, retaining only the rank of a monk, and that he should pass the rest of his days in penance in a humble monastery. One voice only, that of an excellent bishop, Lazarus of Chernigov, was raised in opposition to this cruel judgment. See Blackmore's Mouravieff, Hist. of the Russian Church, p. 92, 108, 204, 227; Stanley, Lect. on the East Church, p. 480 sq.; Strahl, Rekzei zur Geschichte des Kiewer Kirchenges., vol. ii, and iv; Landon, Dict. of Councils, s.v. See Nikon.

MOSCOW, METROPOLITAN SEE OF, was established by St. Peter, the 25th metropolitan of Russia, in 1320. As early as 891 a metropolitan had been appointed to that country, and until 1240 their episcopal cenacle was at Kiev. But the terrible invasion of the Tartars, which burst over the country at the beginning of the 13th century, caused the metropolitan see to be established at Vladimir in 1299, whence its final removal to Moscow. All this time the metropolitan was confirmed by the Oriental Church; yet until the middle of the 16th century almost all the metropolitans of Moscow were members of the Church of Rome, and favorable towards a reunion of the Eastern and Western churches. Peter (1318-26), Theognotos (1292-58), and Alexis (1354-78) zealously laboured for this end. Indeed, Alexis was originally within the Roman communion, united himself with Peter, and formed a liturgy and formula of faith, which obtained the endorsement of the pope. In 1380, however, the metropolitan Pimen (called the pseudo-metropolitan) made strong efforts against the possibility of union with Rome, but failed to carry his point. His successor, Cyprian (1380-1406), than whom there was no more ardent friend of the Roman Church, took an oath to unite the whole Russian Church with Rome. He had several conferences with Jagello, the king of Poland, and Witout, the grand-duke of Lithuania, the result of which was the reunion of the Lithuanian church with the Roman Church. This reunion, however, never obtained the assent of the people of Russia, and was destined never again to be sought by the Russian Church. But grand-duke Witout and the bishops of Southern Russia opposed him energetically, and at a meeting of a synod (1414) they denounced him as a heretic, and nominated Gregory Jamblik metropolitan of Moscow. At this same time also the metropolitan see of Russia was divided into the metropolitanate of Kiev and of Moscow, Kiev ruling the southern episcopacies and Moscow the northern ones. The real reason for this division was the leasing of the Kiev party to Rome; and while in later years Moscow was decidedly opposed to the Church of Rome, Kiev was its warm friend and ally. This division was brought to an end in 1437, when Joseph, patriarch of Constantinople, consecrated the learned Iside of Thessalonica metropolitan of all Russia. Isidore is well known in Church history as one of the principal movers of the Council of Florence (1489), whose sole object was the reunion of the Greek with the Latin Church. He was highly esteemed by pope Eugenius IV, who created him cardinal of Russia in 1441. He returned to Moscow, but miserably failed in his zealous efforts of reunion. He was decisively the head of his party, the unenraged against him that the grand-duke Wasiil III had to imprison him. In 1443 he escaped and fled to Rome, where he died in 1468. This persecution of Isidore led to a new division between Kiev and Moscow, and the Roman Catholic bishops of Lithuania in 1474 formed another sect of Moscow. The power of Smolensk was the great successor of Kiev, and henceforth the two metropolitan sees remained intact. The northern part stood again under the metropolitan of Moscow, while the southern part belonged to the metropolitan of Kiev. They were, moreover, divided in sentiment, the former favoring strict adherence to the Eastern Church, the latter leaning strongly towards Rome; and thus matters remained until 1620, when the Kief party abandoned the hope of union with Rome. The seeds of dissension, however, took root in the Russian Church, and the fruits were manifest in the following century, finally resulting in the establishment of the independent metropolitanate. See Strahl, Russ. Kirchengesch., vol. ii; Landon, Dict. of Councils, s.v.; East. Ch. i, 55 sq.; 983 sq.; Stanley, Lect. on the East. Ch. p. 455 sq. Compare Russian Church.

Mosellanus, Peter, an eminent German scholar of the time of the Reformation, was born in the little village of Protz, on the Moselle, in 1438. His family name was Schade, but after the literary fashion of the age he changed it to Mosellanus. His parents were honest and pious, and in easy circumstances until 1520, when the Kief party abandoned the hope of union with Rome. His family was educated at Cologne, and distinguished himself by uncommonly precocious mind, and graduated as master of arts in 1514. In the following year he began to lecture at Freiberg, and published several learned works. He took rank at once among the very first Greek and Latin scholars of the age, and in 1517, after the death of Richard Crocius, was called to Leipsic as professor of Greek and Latin literature. The year following he applied to Luther and Spalatin for the then vacant professorship of Greek at the Wittenberg University, but Melanchthon was chosen in preference to him, and Mosellanus remained at Leipsic. With the study of Greek and Roman literature he combined a careful and reverent study of the Bible in the original. This, in connection with the influence of his friends, Luther, Came- rarius, Melanchthon, Hessus, and others, predisposed him favorably to the great movement of the Reformation. He was regarded as the most popular teacher in the university, and attracted students from every direction, and was twice chosen rector. At the personal request of prince George, he opened the Leipsic Disputation (1519) between Eck and Luther with a most excellent address—'Oratio de ratione disputandae, praeclarum in re theologica.' With the leaders of the Reformation he remained ever after in constant communication, and was greatly beloved by them for his scholarship and suavity of manners. Luther called him an Erasmian, because of his close application to classical studies notwithstanding the exciting the time of in which he flourished. These Labora, and beare, were well two. A full list of his philologica works may be found in Vitae Germanorum philosophorum, etc. Melchior Adamo (Franco, 1705), p. 26 sq. He died, while yet scarcely more than a youth in age, through the horror with learning. See See Hallam, Intro. to the Literature of Europe, i, 188; De Wette, Luther's Briefe, ii, 542; Vit. Lud. A. Schenckendorff: Commentarius historicus et apologet. de Lutherianismo (Leip. 1694, 1696); Luscher, Vollständige Reformations-Acta et Documenta (Leip. 1728), ii, 567 sq.

Müser, Justus, a great German statesman and author, whose writings have had much moral influence
Moser, Johann Jacob, a distinguished German Protestant minister, was noted for his efforts in behalf of the Church in her relation with the State, was born at Stuttgart, Jan. 18, 1701. He studied law in the University of Tübingen, where he graduated in 1729, and was the very same year appointed extraordinary professor. As he had, however, but a small audience there, he went in 1721 to Heidelberg. The emperor and the vice-chancellor, count of Schönborn, offered him a very prominent position on condition that he should abjure the Lutheran doctrines, but he steadfastly refused. On his return to his country, he was accused of having given to the emperor information concerning affairs which the duke of Württemberg desired should remain secret. In 1724 he returned to Vienna, and was still better received than the first time, the count of Schönborn presenting him a pension, and intrusting him with divers works concerning jurisprudence. Re-called to Stuttgart in 1726, Moser was appointed counsellor of the regent, and the following year professor of jurisprudence in the ducal college of Tübingen. Annoyed, however, by the jealousy of several of his colleagues, he resigned in 1732. In 1738, duke Charles Alexander taking the reins of government, he was again made counsellor. In 1786 the king of Prussia made Moser privy councillor and also represented the elector of Trèves in the long discussions which preceded the election of emperor Charles VII. In 1747, after refusing to approve the religious changes introduced by count Zinzendorf, he accepted the arch-chancellorship of Hesse-Homburg, on the condition that he should be allowed to carry out his liberal views concerning government and political economy; and when this privilege was subsequently taken from him, he resigned his office and settled at Hanau, where he founded, in 1749, a professional school for young men destined for administration service. He afterwards became the legal adviser of Würtemberg; and having in that capacity opposed the arbitrariness of the prince, he was expelled from his residence at Vaihingen on the Enz, July 12, 1759, and retained five years in prison, without judgment. Liberated by the Aulic Council in September, 1764, he resumed his functions, in which he continued six years longer, and then retired from official life. He died at Stuttgart Sept. 30, 1785. Among his most important works are: "De principiis" (4 toms; 1741-1747), "De immissione, covering, besides legal subjects, also the department of practical religion, especially hymnology, those of his writings deserve special mention which have more or less relation to ecclesiastical law and humanitarian objects; such are: Marktwürdigkeits Reichenförst Conclusio (Franck 1736, 8 vols.; 1736, 7 tomes); Marktwürdigkeits juris public (Stuttg. 1729-1734, 3 vols. 8vo); Miscelanea jurisprudentialis (Franck 1739-1730; 2 toms. 8vo); Grundzüge d. heutigen Staatssverfassung von Deutschland Tübing. (1731, 7 vols.; 6 editions since); - Einleitung in den Reichenförst-Thesen (Franck 1736-1737, 4 toms. 8vo); Syndromen der juristischen Schulen des 17. Jahrhunderts (Tübingen, 1735, 4to); - Corpus juris compositum politico-ecclesiasticum (Zell, 1737-1742, 2 toms. 4to); - Allt. deutscher Staatsrecht (Nuremberg, 1767-1765, 53 parts, 4to); - Allt. u. neue Reichenförst Conclusio in censio statiarum (Franck 1746-1746, 3 parts, 8vo); - Tractatus de reformatione Germaniae (Franck 1745, 4to); - Deutsches Staatsarchiv (Franck 1751-1757, 13 parts, 4to); - Neues deutsches Staatsrecht (Stuttg. 1766-1772, 20 vols. 4to, with 3 vols. of supplement [Franck 1781-1782, 3 vols. 4to], and an Index, 1775): - Fernseh Nückrichs v. reichsratschäftlichen Sachen
Moses

Moses'ra (Heb. Mosereth', מֹשֶרֶת, prob. i. n. מֹשֶרֶת, a band [but the final מ is not local, as it has the tone; it is apparently fem.]; Sept. Mostaphâ v. r. Mosetha), the thirtieth station of the Israelites in the desert, between Jakan and Gudgodah (Deut. x, 6; evidently at the foot of Mount Hor, since Aaron is said to have died there (comp. Num. xxxiii, 37, 38). The name appears in the plural form Moserethor, as an earlier station of the Israelites, in the inverse order (Num. xxxiii, 30, 81). See EXOD. It may probably be identified with the small fountain et-Tajibek, at the bottom of the pass er-Rahay, leading to the western ascent of Mount Hor (Robinson's Researches, ii, 583). This spring in the wady is quite choked with sand, but there is fine water in the ravines higher up the hill-side, where the Bedouin pitch their tents. Schwartz is entirely astray in locating it (Palaestina, p. 213) at Wady el-Muzerich, in the heart of the western desert (Robinson, i, 277). Burckhardt vaguely suggested Wady Muna, or the valley of Petra; but this has no probability. Rowlands, in Fairbairn's Dictionary, contends at length for Jebel Madannah, near in the middle of the desert plateau; but in this he is evidently influenced by his theory of the location of Kadesh.

Moses'roth (Heb. Mosereth', מֹשֶרֶת, prob. fem. plu. for מֹשֶרֶת, a band; Sept. Mostaphes), the thirty-first station of the Israelites, between Bashomannah and Bene-Jaknah (Num. xxxiii, 80, 81); doubtless the same elsewhere (Deut. x, 6) called Moserah (q. v.).

Moses, the great Jewish prophet and lawgiver, and the founder, we may say, under God, of the Hebrew nation and religion (Euseb. Prep. Eri, vii, 8; comp. Philo, V. Mos. i, 80). His importance in Biblical history justifies a somewhat extended biography here. In preparing it, we have to depend chiefly upon the Scriptural notices and references.

1. The Name. — This in Heb. is מֹשֶרֶת, Moseret', signifying, according to Exod. ii, 10, drawn out, i.e. from the water, as if from מָשְׁרָא, to draw out; but in that case the form would be active, drawing out; and it is hardly probable that the daughter of Pharaoh would have given him a Hebrew name. This, therefore (as in many other instances, Babel, etc.), is probably the Hebrew form given to a foreign word. Hence the Alexandrine Jews (Philo, V. Mos. 4, 8) assigned it an Egyptian origin, from μωτερ, μουταρ; (Cop. 81); and σωστη (Cop. 82), saved, i.e. water-saved; see Jablonski, Opusc. i, 152. This is the explanation given by Josephus (Ant. iii, 6: Apion, i, 91), and the method by which the Greek form of מֹשֶרֶת arose. The Sept. and other writers, and thence in the Vulgate. Brughel, however (L'Histoire d'Egypte, p. 157, 173), renders the name Mosas or Moseran=child, being that borne by one of the seines of Egypt under Rameses II. In the Arabic traditions the name is derived from his discovery in the water and among the trees; "for in the Egyptian language mos is the name of water, and se is that of a tree" (Jalaladdin, p. 807). Clem. Alex. (Strom. i, p. 545) derives the same name from Moses, and says that he was trained by Egyptian treatise on agriculture cited by Chwolson (Ueberreste, etc., p. 12, note) his name is given as Moses. For other etymologies, see Gesenius, Thes. Heb. p. 824. His original Hebrew name is said to have been Jacobia (Clem. Alex. Strom. i, p. 545). The Sept., Josephus, Philo, and the most ancient MSS. of N. T., give the Greek form as Moisias (declined Moisias, Moisior, Mousias or Mousias; Moisias or Mousias; Moisias or Mousias; Moisias or Mousias); other editions, however, have Mousias, as in Strabo, xvi, 780 sq. (see Winer, Grammat. N. T. p. 592); the Vulg. gives Moises (declined Moises, gen. and lat. : Moises, sac.); The Rec. Text of the N. T. and Protestant versions, Moses—Arabic, Mousias—Numenius (ap. Euseb. Prep. Eri. ix, 8, 27), Moseas—Arthapanus (ibid. 27), Mousias—Manetho (ap. Joseph. c. Ap. i, 36, 28, 81), Osaithl, i. e. (Osaithel?) "saved by Osiris" (Osborn, Monumental Egypt); Chremonon (ib. 32), Tischendorf. In Scripture he is entitled "the man of God" (Psa. xx. title; 1 Chron. xxiii, 14), "the slave of Jehovah" (Num. xiii, 7; Deut. xxxiv, 3; Josh. i, 1; Psa. cv, 26), "the chosen" (Psa. cxi, 23).

2. His Biography. — The materials for this are the following: a. The details preserved in the last four books of the Pentateuch. b. The allusions in the prophets after the exiles, which in some instances seem independent of the Pentateuch. c. The apocryphal books preserved in the N. T. (Acts vii, 20–38; 2 Tim. iii, 8, 9; Heb. xi, 23–28; Jude 9); and in Josephus (Ant. ii, iii, iv), Philo (Vita Moisias), and Clemens Alexander (Strom.). d. The heathen traditions of Manetho, Lyonschus, and Chremonon, preserved in Josephus (c. Ap. i, 26–32), of Artapanus and others in Eusebius (Prep. Eri. ix, 8, 26, 27), and of Heccateus in Dios. Sic. xxxi; Strabo, xvi, 2. e. The Mussulman traditions in the Koran (ii, vii, x, xxvii, xxviii, xxxi), and the Arabian legends, as given in Weil's Biblical Legends; D'Herbelot (s. v. Moses), and Lane's Selections, p. 182. f. The fragmentary apocryphal books of Moses (Fabricius, Cod. Pseu. T. i, 855): (1) Prayers of Moses, (2) Apocalypse of Moses, (3) Ascension of Moses. g. In modern times his career and legislation have been treated by Warburton, Michaelis, Ewald, Bunsen, and others.

The life of Moses, in the later period of the Jewish history, is divided into three equal portions of forty years each (Acts vii, 29, 30, 36). This agrees with the natural arrangement of his history into the three parts of his Egyptian training, his exile in Arabia, and his government of the Israelite nation in the wilderness and on the confines of Palestine.

1. His Parentage, Birth, and Education. — The immediate pedigree of Moses is as follows:

This genealogy, as in all the others given of the same period, there is an interval of four to six generations (Brown's, Ordo Sacerdotum, p. 301 sqq). In the Koran, by a strange confusion, the family of Moses is confounded with the Holy Family of Nazareth, chiefly through the identification of Mary and Miriam, and the third chapter, which refers to the second, bears the name of the "Family of Amram." Although little is known of the family except through its connection with this its most illustrious member, yet it was not without influence on his after-life. The fact that he was of the tribe of Levi no doubt contributed to the selection of

Digitized by Google
that tribe as the sacred caste. The tie that bound them to Moses was one of kinship, and they thus naturally rallied around him, which was the means of establishing (Exod. xxxii, 28) with an ardor which could not have been found elsewhere. His own eager devotion also is a quality, for good or evil, characteristic of the whole tribe. The Levitical parentage and Egyptian origin both appear in the family names. *Gershom, Eleazar,* are both repeated in the Hebrew traditions. Moses and Phinehas (see Brueghel, *Histoire de l'Egypte, i., 173) are Egyptian. The name of his mother, Jochebed, implies the knowledge of the name of Jehovah in the bosom of the family. It is its first distinct appearance in the sacred history. Miriam, who must have been considerably older than himself, and Aaron, who was probably older than he, were called her assistants (Exod. viii, 1), after the independence of position which their superior age would naturally give them.

Moses was born B.C. 1738, and, according to Manetho (Josephus, Ap. i., 26; ii., 2), at Heliopolis, in the time of the deepest depression of his nation in the Egyptian servitude. Hence the Jewish proverb, "When the tale of bricks is doubled, then comes Moses." His birth (according to Josephus, Ant. ii., 9, 2, 3, 4) had been foretold to Pharaoh by the Egyptian magicians, and to his father Amram by a dream—as respectively the future destroyer and deliverer. The pangs of his mother's labor were alleviated so as to enable her to escape out of Egypt (Exod. ii., 3), as midwives. The story of his birth is thoroughly Egyptian in its scene. The beauty of the new-born babe—

in the later versions of the story amplified into a beauty and size (Josephus, ib., i., 5) almost divine (αὐτὸς τῷ Ἱερουσαλήμ, Acts vii., 20; the word αὐτός is taken from the Sept., version of Exod. ii., 2, and is used again in Heb. xii, 23, and is applied to none but Moses in the N. T.)—induced the mother to make extraordinary efforts for its preservation from the general destruction of the male infants of Egypt. For three months the child was concealed in the house. Then his mother placed him in a small boat or basket of papyrus—perhaps from a current Egyptian belief that the plant is a protection from crocodiles (Plutarch, *Is. and Os., p. 338*)—closed against the water by bitumen. This was placed among the aquatic vegetation by the side of one of the canals of the Nile. See Nile. The mother departed as if unable to bear the sight. The sister lingered to watch her brother's fate. The basket (Josephus, ib. 4) floated down the stream. The Egyptian princess came down (after the custom of her country, which allowed more freedom to females than is now common in the East) to bathe in the sacred river, or (Josephus, Ant. ii., 9, 5) to play by its side. Her attendant slaves followed her (see Wilkens, *Biblische Briefe, ii., 266*) in the boat. She saw the flags, or (Josephus) borne down the stream, and dispatched divers after it. The divers, or one of the female slaves, brought it. It was opened, and the cry of the child moved the princess to compassion. She determined to rear it as her own. The child refused the milk of Egyptian nurses (Josephus). The sister was then at hand to recommend a Hebrew nurse. The child was brought up as the princess's son, and the memory of the incident was lost cherished in the name given to the foundling of the water's side—whether according to its Hebrew or Egyptian form. (See above.) The child was adopted by the princess. Tradition describes its beauty so great that passers-by stood fixed to look at it, and laborers left their work to steal a glance (Josephus, Ant. ii., 9, 6). His foster-mother (to whom the Jewish tradition gave the name of Thermuthis, Josephus, Ant. ii., 9, 5; Artapanus, *Prep. Ev. ix., 27,* the name of a magnificent place) Meroer, in the land of budde, in the land of the sand (Arab. Paddin, p. 887) was (according to Artapanus, Eusebius, *Prep. Ev. ix., 27*) the daughter of Palmamoths, who was reigning at Heliopolis, and the wife of Chenepheres, who was reigning at Memphis. In this tradition, and that of Philo (I. M., i, 4), she has no child, and hence her delight at finding one. Many attempts have been made in modern times to identify the Pharaoh into whose family Moses was thus introduced, but different Egyptologists have varied widely as to his relative position, according to their several chronological and historical schemes. See Evvyv. The latest and most plausible effort in this direction is that of Olsbourn (in *The Jour. of Sac. Lit., July, 1860,* p. 257 sq.), who argues from a number of striking coincidences with the life of Sethos II. But he has been met with the retort that Sethos II is much more remote than Sesostrius-Saemses, the famous architect of the great arch of the 19th dynasty, whose son Amenophis, dying soon after his accession, was succeeded by a sister, Thot- moris (in that case the foster-mother of Moses), who again, after a long reign, was succeeded by her nephew, Sethos II, the latter having already been associate king in the infancy of Sethos II. This interesting hypothesis, these precariously synchronisms, would be the Pharaoh of the exode (q. v.).

From this time for many years Moses must be considered as an Egyptian. In the Pentateuch this period is a blank, but in the N. T. he is represented as "educated (ἐκ των τηρητῶν) in all the wisdom of the Egyptians," and as "mighty in words and deeds" (Acts vii., 22). The following is a brief summary of the Jewish and Egyptian traditions which fill up the silence of the sacred writer. He was educated at Heliopolis (comp. Strabo, xvii., 1), and grew up there as a priest, under his Egyptian name of Meroer, according to Josephus, Ant., ii., 9, 5, or Tisithen (Cheremon, σ., 32). He was (according to these accounts) taught the whole range of Greek, Chaldean, and Assyrian literature. From the Egyptians especially he learned mathematics, to train his mind for the unprejudiced reception of truth (Phil., V. M., i, 3). "He invented boats and engines for building— instruments of war and of hydraulic—hieroglyphics—division of lands" (Artapanus, ap. Euseb. *Prep. Ev. xx., 27,*). He taught Orpheus, and was hence called by the Greeks *Museus,* and, by the Egyptians Hermes (θ.). He taught grammar to the Jews, whence it spread to Phcenious (I. M., ii., 38, 29, 31); Greece (Eupolemus, θ., Clem. Alexand., Strom., i., 31, 384). He was sent on an expedition against the Ethiopians. He got rid of the serpents of the country to be traversed by turning basketfuls of ibises upon them (Josephus, Ant. ii., 10, 2), and founded the city of Hermopolis to commemorate his victory (Artapanus, ap. Euseb. i., 27). He advanced to Saba, the capital of Ethiopia, and gave it the name of Sheba, from the adopted mother Merrhia, whom he buried there (θ.). Tharbis, the daughter of the king of Ethiopia, fell in love with him, and he returned in triumph to Egypt with her as his wife (Josephus, ib.). See D. N. Miller, *De Musibus philosophical,* 1787; Adami, *Exerc. comp.* p. 264. See *Bibl. Lat. & Hebr.* *Bibl. Lat. & Hebr.* p. 76; J. G. Walsh, *Observ. in N. T.* (Jen., 1727), p. 62 sq.

2. Period of Moses' Retirement. —The nurture of his mother is probably the unmentioned link which bound him to his own people, and the time had at last arrived when he was resolved to reclaim his nationality. Here again the N. T. preserves the tradition in a more distinct form than the account in the Pentateuch. "Moses, when he was come to years, refused to be called the son of Pharaoh's daughter; choosing rather to suffer affliction with the people of God than to enjoy the pleasures of sin for a season; esteeming the reproach of Christ greater riches than the treasures—the ancient accumulated treasure of Rhampanittus and the old kings—"of Egypt" (Heb. xi, 24—26). In his earliest infancy he was reported to have refused the milk of Egyptian nurses (Josephus, Ant. ii., 9, 5), and when three years old to have trampled under his feet the crown which Pharaoh's daughter had placed on his head. According to the Alexandrian representation of Philo (V. M., i, 6), he led an ascetic life, in order to pursue his high speculative speculations. According to the Egyptian tradition, although a priest of Heliopolis, he always performed his prayers, in conformity with the custom of his fathers, outside the walls of the city, in the open air.
turning towards the sun-rising (Josephus, Apion, ii, 27). The king was excited to hatred by the priests of Egypt, who foresaw their destroyer (ib.), or by his own envy (Aratapaus, ap. Euseb. Prep. Ec. ix, 27). Various plots of assassinating the king were laid against him, which failed. The last was after he had escaped across the Nile from Memphis, warned by his brother Aaron, and when pursued by the assassin he killed him (ib.). The same general account of conspiracies against his life appears in Josephus (Ant. ii, 10). All that remains of the narrative in the Mosaic account is the precise and natural incident that seeing an Israelite suffering the bastinado from an Egyptian, and thinking that they were alone, he slew the Egyptian (the later tradition, preserved by Clement of Alexandria, said, “with a word of his mouth”), and buried the corpse in the sand (the sand of the desert then, now, running close up to the cultivated tract). The fire of patriotism which thus turned him into a deliverer from the oppressors, turns him in the same story into the peace-maker of the oppressed. See J. F. Mayer, Utriusque Mosis Egyptiwm juste interficli (Vitae, 1685); Hoffmann, Mosis just. Egypti persecutor (Hal. 1776). It is characteristic of the faithfulness of the Jews that in their flight there is not the consolation rather by the malignity of his countrymen than by the enmity of the Egyptians. So in St. Stephen’s speech it is this part of the story which is drawn out at greater length than in the original, evidently with a view to showing the identity of the narrow spirit which is the avenger of all wrong, and the origin of the first and their last Deliverer (Acts vii, 25-35). But his spirit was yet too rash and vindictive to fit him for being the meek and patient instrument of the Divine purposes. The discovery, too, of the servile and treacherous temper of his own compatriots dishonoured him. He needed the bracing as well as the purifying discipline which years of calm reflection and peaceful self-culture alone could give in order to make him cool, firm, and independent leader of a popular movement.

Moses fled into Midian, B.C. 1638. Beyond the fact that it was in or near the peninsula of Sinai, its precise situation is unknown. Arabian tradition points to the country east of the Gulf of Akaba (see Laborder). Josephus (Ant. ii, 11, 1) makes it “by the Red Sea.” There was a famous well (“the well,” Exod. ii, 15) surrounded by tanks for watering the flocks of the Bedouin herds- men. By this well the fugitive seated himself at noon, and when the noon sun shone upon his back, the heat of the sun drove the sheep away from the water. The chivalrous spirit (if we may so apply a modern phrase) which had already broken forth in behalf of his oppressed countrymen, broke forth again in behalf of the poor shepherds. They returned unusually soon to their father, and told him of their adventure. Their father was a person of whom we know but little, but of whom that little shows how great an influence he exercised over the future career of Moses. It was Jethro, or Reuel, or Hobab, chief of the Midianite “Sheik” (exactly equivalent to the religious and political influence) of the Midianitish tribes. Moses, who up to this time had been “an Egyptian” (Exod. ii, 19), now became for a long period, indi- cated by the later tradition as forty years (Acts vii, 30), an Arabian. He married Zipporah, daughter of his host, to whom he also became the servant and shep- herd (Exod. i, 21; iii, 1). The blank which the stay in Egypt is filled up by Egyptian traditions can here only be supplied from indirect allusions in other parts of the O. T. The alliance between Israel and the Kenite branch of the Midianites, now first spoken of (see below), of which Jethro was a part, was brought about by his marriage to Zipporah. Jethro also became their guide through the desert. If from Egypt, as we have seen, was derived the secular and religious learning of Moses, and with this much of their outward ceremonial, so from Jethro was derived the organization of their judicial and social ar- rangements during their nomadic state (Exod. xviii, 21-28). Nor is the conjecture of Ewald (Geesch, ii, 59, 60) improbable, that in this pastoral and simple relation there is an indication of a wider concert than is directly stated between the king of Ethiopia, Egypt, and the Arabian tribes, who, under the name of “the shep- herds,” had recently been expelled. According to Ar- tapanus (Euseb. Prep. Ec. ix, 27), Reuel actually urged Moses to make war upon Egypt. Something of a joint action is implied in the visit of Aaron to the desert (Exod. iv, 27; comp. Aratapaus, at sup.); something also in the accredited story of Sinai, already recognized both by Israel and by the Arabs (Exod. viii, 27; comp. Jo- seph. Ant. ii, 12, 1). But the chief effect of this stay in Arabia was on Moses himself. It was in the seclusion and simplicity of his shepherd-life that he received his call as a proph- et. The traditional scene of this great event is in the valley of Shobei, or Hobah, on the north side of Jebel Musa. Its exact spot is marked by the convent of St. Catherine, of which the altar is said to stand on the site of the Burning Bush. The original indications are too slight to enable us to fix the spot with any certainty. To judge from the indications given in the Bible (Exod. iv, 27; Numb. x, 80), Jethro must have resided southeast of that mountain (Keil, ii, 325; Antonini Placent. Itinerar, c. 87; Acta Sact. Maj. ii, 22). It is remarkable that the time of the calling of Moses in the mount of God was contemporaneous with the extraordinary appearance of a bush burning in the midst of the desert (Exod. iv, 22). The call itself was at “the back” of “the wilderness” at Horeb (Exod. iii, 1); to which the Hebrew adds, while the Sept. omits, “the mountain of God.” Josephus further particularizes that it was the lowest of all the mountains in that region, and the best for pastureland, from the good pasturage and from the belief in its being inhabited by the Divinity, the shep- herds feared to approach it (Ant. ii, 12, 1). Philo (V. M., i, 12) adds that it was a “grove” or “glade.” Upon the mountain was a well-known briery shrub or tree (72 בעיר, the seneh, A. V. “a bush”—the definite article may indicate either “the particular celebrated tree,” sacred perhaps already, or “the tree” or “vegetation peculiar to the spot”), usually thought to have been the acacia or the thorn-tree of the desert, spreading out its tangled boughs of thickSET white thorns over the rocky ground; but perhaps only a bramble, or one of the bristly plants with which the desert abounds. Comp. Rechlin-Meldeg, Mos. Geesch. v. brunnenden Dorn- busch (Fried. 1831). See SHOTTIN; THOKIN. It was this bush which became the symbol of the divine Presence, in the form of the name of fire in the midst of it. The dry branches would naturally have crackled and burned in a moment, but which burned around it without consuming it. In Philo (V. M., i, 12) “the angel” is described as a strange but beautiful creature. Artapau- nas (Euseb. Pr. Ec. ix, 27) represents it as a fire suddenly bursting from the bare ground and feeding itself without fuel. But this is far less expressive than the Biblical image. Like all the visions of the divine Presence recorded in the O. T. as manifested at the outset of a pro- phetical career, this was exactly suited to the circum- stances of the tribe. It was the true likeness of the condition of Israel—in the furnace of affliction, yet not de- stroyed (comp. Philo, V. M., i, 12). The place too, in the desert solitude, was equally appropriate, as a sign that the divine protection was not confined either to the sanctu- aries of Egypt or to the Holy Land, but was to be found with any faithful worshipper, fugitive and solitary though he might be. The rocky ground at once became “holy,” and the shepherd’s tent was to be seen not only on the threshold of a palace or a temple. It is this feature of the incident on which St. Stephen dwells as a proof of the universality of the true religion (Acts vii, 29-33). The call or revelation was twofold—(1) The declaration of the Sacred Name expressed the eternal
self-existence of the one God. The name itself, as already mentioned, must have been known in the family of Aaron. But its grand significance was now first drawn out. See Jehovah. (2.) The mission was given to Moses to bring the Israelites out of the land of bondage, and the deliverance of them from the power of Pharaoh. (D'Herbolot). Hence "the white hand" is proverbial for the healing art.) In the transformation of his shepherd's staff is the glorification of the simple pastoral life, of which that staff was the symbol, into the great career which lay before it. The humble yet wonder-working crook is, in the history of Moses, as Ewald finely observes, what the desigited cross is in the first history of Christianity. In this call of Moses, as of the apostles afterwards, the man is swallowed up in the cause. Yet this is the passage in his history which, in any other, brings him out his external and domestic relations.

Moses returned to Egypt from his exile, B.C. 1658. His Arabian wife and her two infant sons were with him. She was seized with them on the ass (the ass was known as the animal peculiar to the Jewish people from Jacob down to David). He apparently walked by their side with his shepherd's staff. (The Sept. subscribes to Is. vii. 25; see Greek Testament.) A mysterious incident occurred back to Egypt a mysterious incident occurred in the family, which can only be explained with difficulty. The most probable explanation seems to be that at the caravanary Moses or Gershon (the context of the preceding verses [iv, 22, 23] rather points to the latter) was smitten with a sickness that seemed to be a mortal illness. In some way, not apparent to us, this illness was connected with Zipporah with the fact that her son had not been circumcised—whether in the general neglect of that rite among the Israelites in Egypt, or in consequence of his birth in Midian. She instantly performed the rite, and threw the sharp instrument, stained with the fresh blood, at the feet of her husband, exclaiming, in the agony of a mother's anxiety for the life of her child—"A bloody hand thou art, to cause the death of my son." Then, when the recovery from the illness took place (whether of Moses or Gershon), she explained the occurrence to her husband, her son not so as to cause the child's death, but only to bring about his circumcision." So Ewald explains the narrative (Gebrichte, vol. ii, pt. ii, p. 105), taking the sickness to have visited Moses. Rosenmuller makes Gershon the victim, and makes Zipporah address Jehovah, the husband, as "Ojeboon," "or "carriages" being a synonym for "circumcision." It is possible that on this story is founded the tradition of Artapanus (Euseb. Pr. Ev. ix. 27), that the Ethiopians derived circumcision from Moses. It would seem to have been in consequence of this event, whatever it was, that the wife and her children went back to Jethro, and remained with him till Moses joined them at Rephidim (Exod. xvii, 2-4), which is the last time that she is distinctly mentioned. In Numb. xii, 1 we hear of a Cushite wife who gave umbrage to Miriam and Aaron. This may be—(1) an Ethiopian (Cushite) wife, taken after Zipporah's death (Ewald, Ges. ii, 229); (2) the Ethiopian princess of Josephus (Ant. 1. 10, 5); but that whole story is probably only an inference from Numb. xii, 1; (3) Zipporah herself, which is rendered impossible by the juxtaposition of Cushan with Midian in Hab. iii, 7. The two sons also sink into obscurity. Their names, though of Le- vitical origin, relate to their foreign birthplace. Ger- sham, "the father of," El- eder, "God is my help," commemorated their father's exile and escape (Exod. xviii, 3, 4). Gershom was the father of the wandering Levite Jonathan (Judg. xviii. 30), and the ancestor of Shebuel, David's chief treasurer (1 Chron. xxiii, 16; xxiv, 20).

Eliezer had an only son, Rehabiah (1 Chron. xxiii, 17), who was the ancestor of a numerous but obscure progeny, whose representative in David's time—the last descendent of Moses known to us—was Shelomith, guard of the treasures in the temple (1 Chron. xxvi, 25-28).

After this parting Moses advanced into the desert, and at the same spot where he had had his vision encountered Aaron (Exod. iv, 27). From that meeting and co-operation we have the first distinct indication of Moses as a personal appearance and character. The traditional representations of him in some respects well agree with that which we derive from Michael Angelo's famous statue in the church of St. Pietro in Vincoli at Rome. Long, shaggy hair and beard is described as his characteristic equally by Josephus, Dionysius (i, p. 424), and Artapanus (apud Aegyptos, sp. om. Art.). To this Artapanus adds the curious touch that it was of a reddish hue, tinged with gray (γυψαίρης, πολιας). The traditions of his beauty and size as a child have already been mentioned. They are continued to his manhood in the Gentile descriptions. "Tall and dignified," says Artapanus (μοχύκος, διομοχύκος).—"Wise and beautiful as his father Joseph," with a curious confusion of genealogies, says Justin (xxxvi, 2). But beyond the slight glance at his infantine beauty, no hint of this grand personality is given in the Bible. What is described is rather the reverse. The only point there brought out is a singular and untoward infirmity: "One of the tribesmen of Benjamin, neither hirsute nor strong, yet since thou hast spoken to thy servant; but I am slow of speech and of a slow tongue. How shall Pharaoh hear me, which am of uncircumcised lips?" (i.e. slow, without words, stammering, besitating; Sept. ἕπαρπασθαι καὶ ἐπιγραυμάσθαι); his "speech contemptible," like St. Paul's—like the Evangelist, Cromwell (comp. Carlyle's Cromwell, ii. 319)—like the first efforts of the Greek Demosthenes. In the solution of this difficulty which Moses offers we read both the disinterestedness of which he is the most distinct trait of his personal character, and the future relation of the two brothers. "Send, I pray thee, by the hand of him whom thou wilt send" (i.e. "make any one thy apostle rather than me"). In outward appearance this prayer was granted. Aaron spoke and acted for Moses, and was the permanent inheritor of the sacred staff of power. But Moses was the inspiring soul behind; and so as time rolls on, Aaron, the prince, has a更好地, a more lasting, a more venerable, and Moses, the dumb, backward, disinterested prophet, is in appearance what he was in truth—the foremost leader of the chosen people.

3. Moses's Public Career.—Thus, after the solitude of pastoral life, where he was appointed to ripen gradually for his high calling, he was now unexpectedly and suddenly sent back among his people, in order to achieve their deliverance from Egyptian bondage. Overruled and encouraged by the above remarkable interview with Jehovah, he resumed his journey into Egypt, where neither the dispirited state of the Israelites nor the obstinate opposition and threatenings of Pharaoh were now able to prevent the onset of the victorious leader, Moses, and Aaron, and commissioned by God as his chosen instrument, proving, by a series of marvellous deeds, in the midst of heathenism, the God of Israel to be the only true God, Moses at last overcame the opposition of the Egyptians (Exod. x-xii). According to a divine decree, the people of Israel were to go out under the command of Moses, in a triumphant manner. The punishments of God were poured down upon the hostile people in an increasing ratio, terminating in the death of the pharaoh, as a sign that all had deserved death. See Dauber, Hebr. Myth. i, 274 sq.; and Au- führer, der alte Wundergeschichte, ii, 174 sq.; Rosenmuller, Morgenl. ii, 375 sq. and Schenkl, i, ii; J. Bryant, Observ. on the Plagues inflicted on the Egyptians (Lond. 1794); L. Bertholdt, Die rede a Moses in Egypt. (Erlang. 1795); Eichhorn, in the Comment. Soc. Gott.
reg. iv, 85 sq. The formidable power of paganism, in its conflict with the theocracy, was obliged to bow before the apparently weak people of the Lord. The Egyptians paid tribute to the emigrating Israelites (Ex. 10, 11 sq.), and a famous victory, which the Israelites gained over the Egyptians. See Hahnenberg, in the Biblioth. Brem. vii, 624 sq.; Kanne, Biblische Untersuchungen, ii, 267 sq.; Hengstenberg, Pent., ii, 590 sq.; Justi, Ueb. die des Agypten, abgenommenen Geräth (Freck, 1771); Augusti, Theol. Blätter, i, 516 sq.; Zeilich, Vorn. Beiträge, ii, i, 20 sq.; B.C. 1:30. The Israelites, by the strength of their purpose and their skill, destroyed the emigrants. Moses, firmly relying upon miraculous assistance from the Lord, led his people through the Red Sea into Arabia, while the host of Pharaoh perished in its waves (Exod. xii-xiii). See Red Sea, PASSAGE OF.

After this began the most important functions of Moses as the lawgiver of the Israelites, who were destined to enter into Canaan as the people of promise, upon whom rested the ancient blessings of the patriarchs. By the instrumentality of Moses, they were appointed to enter into intimate communion with God through a sacred covenant, and to be firmly bound to him by a new legislation. Moses, having victoriously repelled the attack of the Amalekites, marched to Mount Sinai, where he signally punished the defection of his people, and gave them the law as a testimony of divine justice and mercy. From Mount Sinai they proceeded northward, and, ascending the western slope of Canaan, explored the Land of Canaan (Numb. x-xiii). On this occasion also, Moses broke out a violent rebellion against the lawgiver, which, however, by divine assistance, energetically repressed (Numb. xiv-xvi). The Israelites frequently murmured, and were disobedient during about forty years. In the course of the conquest of Kadesh, which was called Zin, near the boundaries of the Edomites, the sister of Moses had died, and after even the new generation had, like their fathers, proved to be obstinate and despoothing, Moses fell into sin, and was on that account deprived of the privilege of introducing the people into Canaan (Numb. xix, 12). He was appointed to lead them only to the boundary of their country, to prepare all that was requisite for their entry into the land of promise, to admonish them impressively, and to bless them. It was according to God's appointment that the new generation also, to whom the occupation of the country had been promised, should arrive at their goal and be formed into a people. Even before they had reached the real boundaries of Canaan they were to be subjected to a heavy and purifying trial. It was important that a man like Moses should have been at the head of Israel during all these providential dispensations. His authority was a powerful preservative against despondency under heavy trials. Having in vain attempted to pass through the territory of the Edomites, the people marched around its boundaries by a circuitous and tedious route. Two powerful kings of the Amorites, Sihon and Og, were vanquished. Moses led the people into the fields of Moab over against Jericho, to the very throne of Sihon, the Amorite (Numb. xvi-xvii). The oracles of Balaam became, by the instrumentality of Moses, blessings to his people, because by them they were rendered conscious of the great importance of having the Lord on their side. Moses happily averted the danger which threatened the Israelites on the part of Midian (Numb. xxv-xxx). Hence he was enabled to grant to some of the tribes permanent dwellings in a considerable tract of country situated to the east of the River Jordan (Numb. xxxxi), and to give to his people a foretaste of that well-being which was in store for them. Moses made excellent preparations for the conquest and possession of Canaan (Deut. xiv). His public services with powerful adoptions and impressive benedictions, transferring his government to the hands of Joshua, who was not unworthy to become the successor of so great a man. B.C. 1618. For details of these incidents, see EGYPT; EXOD.; LAW; PASSOVER; PLAGUE; SINAI; WANDERINGS; WILDERNESS.

4. Moses's Death.—In exact conformity with his life is the account of his end. The book of Deuteronomy is here described as the, or perhaps, last book of Moses, in which is related his death. It took place on the first day of the eleventh month of the fortieth year of the wanderings, in the plains of Moab (Deut. i, 8, 5), in the palm-groves of Aila (Josephus, Ant. iv, 8, 1). See ABLER-SHITTIM. He is described as 120 years of age, but with his sight and strength unimpaired (Deut. xxxiv, 7). The address from ch. i to ch. xxxix contains the recapitulation of the law. Joshua was then appointed his successor. The law was written out, and ordered to be deposited in the ark (ch. xxxi). The song and the blessing of the tribes conclude the farewell (ch. xxxii, xxxiii).

Then came the mysterious close. As if to carry out to the last the idea that the prophet was to live not for himself, but for his people, he is told that he is to see the good land beyond the Jordan, but not to possess it himself. The sin for which this penalty was imposed on the prophet is difficult to ascertain clearly. It was because he and Aaron rebelled against Jehovah, and "believed himself not to sanctify him," in the murmuring at Kadesh (Numb. xx, 12; xxvii, 14; Deut. xxxii, 51), or, as it is expressed in the Psalms (cviii, 38), because he spoke unadvisedly with his lips. It seems to have been a feeling of distrust. "Can we (not, as often rendered, can we) bring water out of the cliff?" (Numb. xx, 10; Deut. viii, 3; Sept., μεσθήσαντες). The expression "unadvisedly" is by no means a term of art in the religious tradition, characteristically, makes the sin to be that he called the chosen people by the opprobrious name of "rebels." He ascends a mountain in the range which rises above the Jordan valley. Its name is specified so particularly that it must have been well known in ancient times, though, owing to the position of the eastern side of the Jordan, the exact location has until recently been unidentifiable. See NADIA. Hence it is called by the specific name of the Plegath (q. v.). It was one of those summits apparently dedicated to different divinities (Numb. xxiii, 14). Here Moses took his stand, and surveyed the four great masses of Palestine west of the Jordan—so far as it could be discerned from that height. The view has passed into a proverb for all nations. In two remarkable respects it illustrates the office and character of Moses. First, it was a view, in its full extent, to be imagined rather than as actual fact, to be comprehended only in words. Even before they had reached the real boundaries of Canaan they were to be subjected to a heavy and purifying trial. It was important that a man like Moses should have been at the head of Israel during all these providential dispensations. His authority was a powerful preservative against despondency under heavy trials. Having in vain attempted to pass through the territory of the Edomites, the people marched around its boundaries by a circuitous and tedious route. Two powerful kings of the Amorites, Sihon and Og, were vanquished. Moses led the people into the fields of Moab over against Jericho, to the very throne of Sihon, the Amorite (Numb. xvi-xvii). The oracles of Balaam became, by the instrumentality of Moses, blessings to his people, because by them they were rendered conscious of the great importance of having the Lord on their side. Moses happily averted the danger which threatened the Israelites on the part of Midian (Numb. xxv-xxx). Hence he was enabled to grant to some of the tribes permanent dwellings in a considerable tract of country situated to the east of the River Jordan (Numb. xxxxi), and to give to his people a foretaste of that well-being which was in store for them. Moses made excellent preparations for the conquest and possession of Canaan (Deut. xiv). His public services with powerful adoptions and impressive benedictions, transferring his government to the hands of Joshua, who was not unworthy to become the successor of so great a man. B.C. 1618. For details of these incidents, see EGYPT; EXOD.; LAW; PASSOVER; PLAGUE; SINAI; WANDERINGS; WILDERNESS.
year"—in the Arabic traditions, the 7th of Adar (Jalad-ladin, p. 888). After his death he is called "Melker" (Clem. Alex. Strom. I, p. 361, § 10). This, however, is incompatibility with the general tenor of the Scriptures, and is inconsistent with the common language in which he has been described by the Church in all ages. The frequent addresses of the Divinity to him no more contraerve his personal activity and intelligence than in the case of Elijah, Isaiah, or Paul. In the N.T. the Moses legislation is expressly ascribed to him: "Moses gave you the circumcision" (John vii, 22). "Moses, because of the hardness of your hearts, suffered you" (Matt. xix, 8). "Did not Moses give you the law?" (John vii, 19). "Moses accuses you" (John v, 45). Paul goes so far as to speak of him as the founder of the Jewish religion: "The Law, which was given by Moses, was expedient until the coming of faith; but faith cometh by hearing... The Scripture is constantly called a "prophecy." In the poetical language of the O.T. (Num. xxii, 18; Deut. xxxiii, 21), and in the popular language both of Jews and Christians, he is known as "the Lawgiver." The terms in which his legislation is described by Philo (V. M. ii, 1-4) are decisive as to the ancient Jewish view of the law. The author must be considered, like all the saints and heroes of the Bible, as a man of marvellous gifts, raised up by divine Providence for a special purpose; but as led, both by his own disposition and by the peculiarity of the revelation which he received, into a closer communion with the invisible world than was vouchsafed to any other in the Old Testament.

Such a marvellous character was not exempted from the most virulent attacks of that criticism called the Rationalismus vulgaris, which at one time threatened to devour every fragment of antiquity. The history of Moses was considered merely a tissue of contradictory statements, till Voltaire (in Questions sur l'Encyclopédie, § 127) boldly called his very existence in question. The exodus of Israel, of which Moses was the sole instrument, was deprived of its strictly historical basia. Goethe went far enough the forty years' wandering to two years. Most of the halting-places named in the books of Exodus and Numbers were deemed unhistorical, and the whole chain of events was said to be purely mythical. De Wette (Kritis der israelitischen Geschichts, Gramberg (Religionisamid), Vatke (Biblical Theology), von Bohlen (Commentary to the Buche Gesia), and George (Judaica Pera) combine to reduce the whole to a fable. Even the best substantiated acts of Moses—such as the construction of the tabernacle, the founding of an hereditary priesthood, the appointment of cities of refuge—were assumed to have been stripped of every vestige of historical veracity. The finding of the Law (2 Kings xxii, 8) was said to proceed from the popular belief in its mystic authenticity. Moses and Egyptian priests pretended to have become possessors of the books of Hermes in the same way. The tables of stone, as evidence of the historical activity of Moses, were said to be no evidence, because no mention is made of them at the revelation of the Decalogue (Exod. xx.), but only on a later occasion, in chap. xxxii. The testimony of their existence (1 Kings viii, 9) in the days of Solomon was thought not worthy to be depended upon, because the author lived after the destruction of Jerusalem! But such frivolous assertions Nork finds himself authorized (see Hebräisch-chaldeisch-russisches Wörterbuck) to resolve the character of Moses into a mythical personage; and to reduce the marvellous exodus, and the subsequent journey through the wilderness, to a level with the mythological conquests of Osiris or those of Bocchus, in each of whom personifications of the solar year were recognised. Moses is contrasted with a great ruler, whose expression of communion with the invisible world is in an ark and exposed him to the ocean (see J. J. Müller, De Moses in Bacchum converso (Jena, 1667)). The 600,000 fighting men in Israel are assumed to be so many stars, which ancient astronomers believed to exist. The wonder-working rod of Moses was considered to be as pure a fiction as the serpent-rod of Hermes.
MOSES

The passage of the Red Sea by Moses and his followers was regarded as a striking parallel to some of the details of Bacchus’s expedition to India (Nommix, xx, 208). Bacchus also smites the Hydaspes with a rod, and passes over it (Bacch. v, 708); to Bacchus smiting a rock—not indeed in his own person, but by the instrumentality of his priests, who wielded the thurys-rod—with a similar result of water flowing from it. The story thus gained a place in Greek history; or we may call it, perhaps, simply as literary curiosities, and they show by what methods it was thought possible to establish the mythical origin of the Jewish commonwealth. But as the historical veracity of the Gospel history can alone account for the existence and subsistence of Christianity, so the past and present influence of the Mosaic constitution can only be explained by the strictly historical character of its beginnings.

1. There are two main characters in which Moses appears, namely, as a Leader and as a Prophet. The two are more frequently combined in the East than in the West. Several remarkable instances occur in the history of Mohammedanism: Mohammed himself, Abd-el-Kader in Algeria, Shamyl in Circassia.

(a.) As a Leader his life divides itself into the three epochs of the march to Sinai, the march from Sinai to Kadesh, and the conquest of the transjordanic kingdom. Of his natural gifts in this capacity we have but few authentic information. The two periods of the narrative which he encountered were the reluctance of the people to submit to his guidance and the impracticable nature of the country which they had to traverse. The patience with which he bore their murmurs is often described—at the Red Sea, at the apostasy of the golden calf (the eccentrical: Beke contends that the idol was a cow, and not a calf. [The Idol in Hosea, Lond. 1871.]), at the rebellion of Korah, at the complaints of Aaron and Miriam (see below). The incidents with which his name was specially connected both in the sacred narrative and in the Jewish, Arabian, and heathen traditions were those of supplying water when most wanted. This is the only point in his life noted by Tacitus, who describes him as guided to a spring of water by a herd of wild asses (Hist. v, 9). In the Pentateuch these supplies of water take place at Marah, at Horeb, at Kadesh, and in the land of Moab. That at Marah is produced by the waters of Marah and by those that issue from the rock in the desert; those at Horeb and at Kadesh by the opening of a rift in the rock and in the “cliff” that in Moab by the united efforts, under his direction, of the chiefs and of the people (Numb. xxii, 18). (See Philo, V. M. i, 40.) An illustration of these passages is to be found in the representations of the Mosaic Law (contemporary with Moses), in like manner calling out water from the desert rocks (see Brugsch, Hist. del Epig. i, 158). Of the first three of these incidents, traditional sites, bearing his name, are shown in the desert at the present day, though most of them are rejected by modern tradition. The spring of water which Moses got from the hand of the Lord is called the spring of Moses, immediately south of Suez, which the tradition (probably from a confusion with Marah) ascribes to the rod of Moses. Of the water at Horeb, two memorials are shown: one is the Shuk Mûsâ, or “cleft of Moses,” in the side of Mount St. Catherine; and the other is the remarkable stone, first mentioned expressly in the Koran (ii, 57), which exhibits the twelve marks or mouths out of which the water is supposed to have issued for the twelve tribes (Stanley, Syr. and Pol. p. 46, 47; also Wolf, Travels, p. 122, 2d ed.). The fourth is the celebrated “Sîk,” or ravine, by which Petra is approached from the east, and which from its position on its extreme outcrop of mountainous rock has given its name to the Wady Mûsâ to the whole valley. The quails and the manna are less directly ascribed to the intercession of Moses. The brazen serpent that was lifted up as a sign of the divine protection against the snakes of the desert (Num. xxii, 8, 9) was directly connected with his name down to the latest times of the nation (2 Kings xviii, 4; John iii, 14). Of all the relics of his time, with the exception of the ark, it was the one longest preserved. See Numb. vii, 10. (See Comm. iv, 41.)

The route through the wilderness is described as having been made under his guidance. The particular spot of the encampment was fixed by the cloudy pillar; but the direction of the people, first to the Red Sea and then to Mount Sinai (where he had been before), was determined by the communication given by him. According to the tradition of Memphis, the passage of the Red Sea was effected through Moses’s knowledge of the movement of the tide (Euseb. Prep. Ev. ix, 27). In all the wanderings from Mount Sinai he is said to have had the assistance of Jethro. In the Mussulman legends, as if to avoid this appearance of human aid, the place of Jethro is taken by El Khudhy, the mysterious benefactor of mankind (D’Herbelot, s. v. Mooses).

On approaching Palestine the office of the leader becomes blended with that of the general or the conqueror. By Moses the spies were sent to explore the country. Against his advice took place the first disastrous battle at Horæa. To his guidance is ascribed the circuitous route by which the nation approached Palestine from the east, and to his generalship the two successive campaigns in which Sihon and Og were defeated. The narrative is told so shortly that we are in danger of forgetting that, at this last stage of his life, Moses must have been as much a conqueror and victorious soldier as Joshua.

(b.) His character as a Prophet is, from the nature of the case, more distinctly brought out. He is the first as he is the greatest example of a prophet in the O. T. The name is, indeed, applied to Abraham before (Gen. xxv, 24); so that, as not to enforce our attention. But in the case of Moses it is given with peculiar emphasis. In a certain sense he appears as the centre of a prophetic circle, now for the first time named. His brother and sister were both endowed with prophetic gifts. Aaron’s fluent speech enabled him to act the part of prophet for Moses in the first instance; and Miriam is expressly called “the Prophetess.” The seventy elders, and Eldad and Medad also, all “prophesied” (Numb. xi, 22-27). But Moses (at least after the exodus) rose high above all these. The others are spoken of as more or less inferior. Their communications were made in dreams and visions (Num. xii, 6). But “Moses was not so.” With him the divine revelations were made “mouth to mouth, even apparently, and not in dark speeches, and the similitude of Jehovah shall he behold” (Numb. xii, 8). In the Mussulman legends his surname is Krîm Allah, “the appellation of God.” Of Moses there are no more direct communications four great examples are given, corresponding to four critical epochs in his historical career, which help us in some degree to understand what is meant by these expressions in the sacred text. See PROPHET.

(1.) The scene of the divine Presence in the flaming scacia-tree has already been noticed. The usual pictorial representations of that scene—of a winged human form in the midst of the bush—belong to Philo (V. M. i, 12), not to the Bible. No form is described. “The angel” or “messenger” is spoken of as being “in the flame.” On this it was that Moses was afraid to look, and hid his face in order to hear the divine voice (Exod. iii, 2-6). See BURNING BUSH.

(2.) In the giving of the Law from Mount Sinai, the outward form of the revelation was a thick darkness, as of a thunder-cloud, out of which proceeded a voice (Exod. xix, 16). The voice speaking from the cloud was especially the name of Jehovah. Outside this cloud Moses himself remained on the mountain (Exod. xxiv, 1, 2, 15), and received the voice, as from the cloud, which revealed the Ten Commandments, and a short code of laws in addition (Exod. xx-xiii). On two
occasions he is described as having penetrated within the darkness, and remained there successively for two periods of forty days, spent in seclusion and fasting (Exod. xxiv. 18; xxxi. 12). On the second occasion he received instructions respecting the tabernacle, from "a pattern showed to him" (xxv, 9, 40; xxvi, xxvii), and respecting the priesthood (xxviii-xxx). Of the second occasion hardly anything is told us (see Ortoli, De Jejeuo Moses [Lips. 1702]). But each of these periods was necessarily occupied in the discharge of the two slabs or tables of granite containing the successive editions of the Ten Commandments (Exod. xxxii.15,16). On the first of the two occasions the ten moral commandments are undoubtedly those commonly so called (comp. Exod. xx. 1-17; xxx. 15; Deut. v. 6-22). On the second occasion some interpreters (taking the literal sense of Exod. xxxiv. 29) hold that Moses was the ten (chiefly) ceremonial commandments of Exod. xxxiv. 14-26; but they were evidently the same as before. The first are expressly said to have been the writing of God (Exod. xxxi. 18; xxxii. 16; Deut. v. 22); with respect to the second, the phraseology is ambiguous ("he wrote," Exod. xxxiv. 29), and hence some have held them to be merely the writing of Moses—contrary, however, to the language of Exod. xxxiv. 1. See Law of Moses.

(3) It was nearly at the close of those communications in the mountains of Sinai that an especial revelation was made to him, namely, that he had a share in some degree to that which first called him to his mission. In the despondency produced by the apostasy of the molten calf, he besought Jehovah to show him "his glory." The wish was thoroughly Egyptian. The same is recorded of Ammonoph, the Pharaoh preceding the exodus. But the divine answer is thoroughly Biblical. It announced that an actual vision of God was impossible, "Thou canst not see my face; for there shall no man see my face and live." He was commanded to come alone. Even the flocks and herds which fed in the neighboring valleys were to be removed out of the sight of the mountain (Exod. xxxiii. 8, 20; xxxiv. 1, 3). He took his place on a well-known or prominent rock ("the rock") (xxxiii, 21). The cloud passed by (xxxiii. 22; xxxiv. 5). A voice proclaimed the two immutable attributes of God, Justice and Love, in words which became part of the religious creed of Israel and of every people (xxxiv. 6, 7). The importance of this incident in the life of Moses is attested not merely by the place which it occupies in the sacred record, but by the deep hold that it has taken of the Mussulman traditions and the local legends of Mount Sinai. It is told, with some characteristic variations, in the Koran (vii, 109), and is commemorated in the Mussulman chapel erected upon the spot of the mountain and in the city of the incident (rather than from any other) has taken the name of the Mountain of Moses (Jebel Musa). A cavity is shown in the rock as produced by the pressure of the back of Moses when he shrank from the divine glory (Stanley, S. P. p. 30). See Stumer, De Mose Jehovam a tergo ridentes (Lips. 1720). See Sinai.

(4) The fourth mode of divine manifestation was that which is described as commencing at this juncture, and which continued with more or less uniformity through the rest of his career. Immediately after the catastrophe of the worship of the calf, and apparently in consequence of it, Moses removed the chief tent outside the camp, and invested it with a sacred character under the name of "the Tent or Tabernacle of the Congregation" (xxxiii, 7). This tent became henceforth the chief scene of his communications with God. He left the camp, and it is described how, as in the expectation of every event, all the people stood every man at his tent door, and looked—gazing after Moses until he disappeared within the tent. As he disappeared the entrance was closed behind him by the cloudy pillar, at the sight of which the people prostrated themselves (xxxiii, 10). The communications within the tent are described as being still more intimate than those on the mountain. "Jehovah spake unto Moses face to face, as a man speaketh unto his friend" (xxxiii, 11). He was frequently accompanied on these mysterious visits by his attendant Hoshai (or Joshua), who remained in the tent after his master had left it (xxxiii, 11). All the revelations contained in the books of Leviticus and Numbers seem to have been made in this manner (Lev. i, 1; Num. i, 1).

It was during these communications that a peculiarity is mentioned which apparently had not been seen before. It was on his final descent from Mount Sinai, after his second long seclusion, that a splendor shone on his face, as if from the glory of the divine Presence. It is from the Vulgate translation of "ray" ("ray") ,"coruscant habens faciem," that the conventional representation of the korn of Moses has arisen. See Ziebich, De radiante Mosis faste (Gera, 1764). The rest of the story is told so differently in the different versions that both must be given. (1) In the A.V. and most Protestant versions Moses is said to wear a veil in order to hide the splendor. In order to produce this sense, the A.V. of Exod. xxxiii, 44 reads, "and [unto] Moses had done speaking with them"—and other versions, "he had put on the veil." (2) In the Sept. and the Vulgate, on the other hand, he is said to put on the veil, not during, but after, the conversation with the people—in order to hide, not the splendor, but the glory of the splendor; and to have worn it till the moment of his return to the divine Presence in order to rekindle the light there. With this reading agrees the obvious meaning of the Hebrew words, and it is this rendering of the sense which is followed by Paul in 2 Cor. iii, 13, 14, where he contrasts the fearlessness of the apostolic teaching with the concealment of that of the O. T.: "We have no fear, as Moses had, that our glory will pass away." (5) There is another form of the prophetic gift in which Moses more nearly resembles the later prophets, namely, as a writer. We need not here determine (what is best considered under the several books which bear his name, Pentateuch, etc.) the extent of his authorship, or the period at which these books were put together in their present form. He is also traditionally connected with the first draft at least of the book of Job (q. v.). Eupelemus [Euseb. Porph. in Job, ix, 26] makes him the author. But the term term is merely general, and there is no evidence whatever that any of these books was written in the time of Moses. The poetical part of the Pentateuch, and two only of the actual crisi is ascribed to Moses: 1st, the second edition of the Ten Commandments (Exod. xxxiv. 28), 2d, the register of the stations in the wilderness (Num. xxxiii, 1). But it is evident that the prophetic office, as represented in the history of Moses, included the poetical form of composition which characterizes the Jewish prophecy generally. These poetical utterances, whether connected with Moses by scription or by actual authorship, enter so largely into the full Biblical conception of his character that they must here be mentioned.

[1] The song which Moses and the children of Israel sang" (after the passage of the Red Sea, Exod. xv, 1-19). It is unquestionably the earliest written account of that event; and, although it may have been in part, according to the conjectures of Ewald and Bunsen, adapted to the sanctuary of Tabor and Shiloh, yet the framework and ideas are essentially Mosaic. It is probably this song to which allusion is made in Rev. xv, 2, 3: They stand on the sea of glass mingled with fire . . . and sing the song of Moses, the servant of God.

"As the hand is on the throne of Jehovah,
So will Jehovah war with Amalek
From generation to generation."

[3] A fragment of a lyrical burst of indignation (Exod. xxv, 18):

"As a lion out of the thicket and a young lion from the mountains of Ephraim..."
"Not the voice of them that shout for mastery, 
Not the noise of them that make music, but the sullen noise of them that dig slugs I do hear." 

[4.] Probably, either from him or his immediate pro-
phetic followers, the fragments of war-songs in Numb.
xii, 14, 15, 27-30, preserved in the "book of the wars of Jehovah," Num. xii, 14; and the address to the 
worship, xii, 16, 17, 18.

[5.] The song of Moses (Deut. xxxiii, 1-49), setting 
forth the greatness and the failings of Israel. It is re-
markable as bringing out with much force the ideas of 
God as the Rock (xxxiii, 4, 15, 18, 30, 31, 37). The 
special allusions to the pastoral riches of Israel point to 
the transjordanic territory as the scene of its composition 
(xxxiii, 13, 14). 

The exalting of Moses on the tribes (Deut. xxxiii, 1-12). 
If there are some allusions in this psalm to circu-
cumstances only belonging to a later time (such as 
the migration of Dan, xxxiii, 22), yet there is no one in 
whose mouth it could be so appropriately placed as in 
that of the great leader on the eve of the final conquest 
of Palestine. This poem, combined with the similar 
blessing of Jacob (Gen. xlix.), embraces a complete col-
lective view of the characteristics of the tribes. See 
Vöck, Mosic canonicum eumnum (Nordl. 1861); 
Kampfl, Das Lied Moses erklärt (Leips. 1862).

[7.] The 50th Psalm, "A prayer of Moses, the man 
of God." The first words of the same psalm, with 
doubtful authority—and the psalm has often been re-
furred to a later author. But Ewald (Psalmen, p. 91) 
thinks that, even though this be the case, it still breathes 
the spirit of the venerable legislator. There is some-
thing extremely characteristic of Moses in the view 
taken, as from the summit or base of Sinai, of the et-
ernity of God, greater even than the eternity of moun-
tains, in contrast with the fleeting generations of man. 
One expression in the psalm, as to the limit of human 
life (seventy, or at most eighty years), in ver. 10, would 
if it be Mosaic, fix its date to the stay at Sinai. Jerome 
(A. D. Ruffin, i, 15); on the authority of Origen, 
the next eleven psalms to Moses. Coemar (Comm. v, 
222) supposes that it is by a younger Moses of the time 
of David.

How far the gradual development of these revelations 
or prophetical utterances had any connection with Moses's 
own character and history, the materials are not such as 
to justify any decisive judgment. His Egyptian educa-
cation must, on the one hand, have supplied him with 
much of the ritual of the Hebrew worship. The co-
incidences between the arrangements of the priesthood, 
the dress, the sacrifices, the ark, etc., in the two 
countries, are decisive. On the other hand, the proclamation 
of the Mosaic laws, the organization of the state, the 
idea of the king, the priesthood, the empire, the order 
and to the priestly order, but communicated to the whole 
nation, implies distinct antagonism, almost a conscious 
recollection against the Egyptian system. The absence of 
the doctrine of a future state (without adopting to its 
full extent the paradox of Warburton) proves at least 
a remarkable independence of the Egyptian theology, in 
which that great doctrine held so prominent a place. 
Some modern critics have supposed that the Levitical 
ritual was an after-growth of the Mosaic system, neces-
sitated or suggested by the incapacity of the Israelites 
to retain the higher and simpler doctrine of the divine 
unity—proved by their return to the worship of the 
Heliopolitan calf under the sanction of the brother of 
Moses himself. There is no direct statement of this con-
nection in the sacred narrative; but there are indirect 
indications of it sufficient to give some color to such an 
explanation. The event itself is described as a crisis in 
the life of Moses, and while the people are still in that 
he received his first call. In an agony of rage and disappoi-
ntment he destroyed the monument of his first reve-
lation (Exod. xxxii, 19). He threw up his sacred mis-
ion (ib. 32). He craved and he received a new and 
special revelation of the attributes of God to console him 
(ib. xxxiii, 18). A fresh start was made in his career 
(ib. xxxix, 29). His relation with his countrymen 
thereafter became more awful and mysterious (ib. 82- 
88). In point of fact, the greater part of the details of 
the Levitical ceremonies are subsequent to this cata-

The institution of the Levitical tribe grew direc-
tly out of it (xxxii, 26). The inferiority of this part 
of the system to the rest is expressly stated in the 
prophets, and expressly connected with the idolatrous 
tendencies of the nation. "Wherefore I gave them 
statutes that were not good, and judgments wherein 
they should not live" (Exek. xx, 25). "I spake not 
unto your fathers, nor commanded them in the day that 
I brought them out of the land of Egypt, concerning 
burnt-offerings or sacrifices" (Jer. vii, 22). Other por-
tions of the law, such as the regulations of slavery, of 
mixed marriages, of public and private fasts, have been 
taken, with the necessary modifications, from the cus-
toms of the desert-tribes. But the distinguishing fea-
tures of the law of Israel, which have remained to a 
considerable extent in Christendom, are peculiarly Mosaic— 
the Ten Commandments: and the general spirit of jus-
tice, humanity, and liberty that pervades even the more 
detailed and local observances is equally indicative of 
a new era in legislation.

The prophetic office of Moses, however, can only be 
fully considered in connection with his whole character 
and appearance. "By a prophet Jehovah brought Is-
rael out of Egypt"; by a prophet was he preserved 
( Hos. xii, 13). He was, in a sense peculiar to himself, 
the founder and representative of his people; and in 
accordance with this, complete identification of himself 
with his nation is the only strong personal trait with 
which we are able to gather from his history. "The man 
Moses was very meek, above all the men that were 
upon the face of the earth" (Num. xii, 3). The word 
"meek" is hardly an adequate reading of the Hebrew 
term $^\text{22}$, which should be rather "much enduring;" 
and, in fact, his onslaught on the Egyptian, and his sud-
den dashing of the tables on the ground, indicate rather 
the reverse of what we should call "meekness." It re-
resents what we should now designate by the word 
"dishonored." All that is told of him indicates a 
withdrawal of himself, a preference of the cause of his 
nation to his own interests, which makes him the most 
complete example of Jewish patriotism. He joins his 
countrymen in their desert service (Exod. ii, 11; 
v, 4). He forgets himself to avenge their wrongs (ii, 
14). He desires that his brother may take the lead 
instead of himself (Exod. iv, 18). He wishes that not 
only, but that all the nation were gifted alike: "En-
vie thou for my sake" (Num. xi, 29). When the offer is 
made to him to be king of his people, he overrules 
that he should be made a "great nation" (Exod. 
xxxii, 10), he prays that they may be forgiven—if not, blot 
me, I pray thee, out of thy book which thou hast writ-
ten" (xxxii, 32). His sons were not raised to honor. 
The leadership of the people passed, after his death, to 
another tribe. In the books which bear his name, Abra-
ham, and not himself, appears as the real father of the 
nation. In spite of his great pre-eminence, they are 
never "the children of Moses."

2. In the O.T. the name of Moses does not occur so 
frequently after the close of the Pentateuch as might 
be expected. In the Judges it occurs only once—in 
speaking of the wandering Levite Jonathan, his grand-
son. In the Hebrew copies, followed by the A. V., it 
have been superseded by "Manasseh," in order to avoid 
throwing discredit on the family of so great a man. 
See Manasses. 2. In the Psalms and the Prophets, 
however, he is frequently named as the chief of the 
prophets.

In the N.T. he is referred to partly as the represen-
tative of the law—as in the numerous passages cited 
above—and in the vision of the transfiguration, where 
he appears side by side with Elijah. It is possible that 
the peculiar word rendered "decease" ($\varepsilon \delta \iota \kappa \sigma \gamma \alpha$)—used
only in Luke ix. 31, and in 2 Pet. i. 15, where it may have been drawn from the context of the transfiguration—was suggested by the exodus of Moses. As the author of the Law, he is contrasted with Christ, the Author of the new law; as the scribe of the Law, he is contrasted with the shepherd of the people of God (John i. 17). The ambiguity and transitory nature of his glory is set against the permanence and clearness of Christianity (2 Cor. iii. 18–19), and his mediatorial character ("the law in the hand of a mediator") against the unbroken communication of God in Christ (Gal. iii. 19). His "service" of the Law was superseded with Acts vii. 38 and 53 (Heb. iii. 5, 6). But he is also spoken of as a likeness of Christ; and as this is a point of view which has been almost lost in the Church, compared with the more familiar comparisons of Christ to Adam, David, Joshua, and yet has as firm a basis in fact as any of them, it may be well to draw it out in detail.

[1.] Moses as, is, as it would seem, the only character of the O.T. to whom Christ expressly lends himself—"Moses wrote of me" (John v. 46). It is uncertain to what passage our Lord alludes, but the general opinion seems to be the true one—that it is the remarkable prediction in Deut. xviii. 15, 18, 19—"The Lord thy God will raise up unto thee a prophet from the midst of thee, from thy brethren, like unto me; unto him ye shall hearken." ... I will raise them up a prophet from among their brethren, like unto thee, and will put my words in his mouth; and he shall speak unto them all that I shall command him. And it shall come to pass that whosoever will not hearken unto my words which he shall speak in my name, I will require it of him." This passage is also expressly quoted by Stephen (Acts vii. 37), and it is probably in allusion to it "that at the transfiguration, in the presence of Moses and Elijah, the words were uttered, 'Hear ye him.' It suggests three main points of contact between the two.

(a.) Christ was, like Moses, the great Prophet of the people—the last, as Moses was the first. In greatness of position none came between them. Only Samuel and Elijah could by any possibility be thought to fill the place of Moses, and they only in a very secondary degree. Christ alone appears, like Moses, as the Revealer of a new name of God—of a new religious society on earth. The Israelites "were baptized unto Moses" (1 Cor. x. 2). The Christians were baptized unto Christ. There is no other name in the Bible that could be used in like manner. See Acts.

(b.) Christ was, like Moses, a great Lawgiver: "Him shall ye hear." His whole appearance as a Teacher, differing in much, besides has this in common with Moses, unlike the other prophets, that he lays down a code, a law, for his followers. The Sermon on the Mount almost inevitably suggests the parallel of Moses on Mount Sinai.

(c.) Christ was, like Moses, a Prophet out of the midst of the nation—from their brethren. As Moses was the entire representative of his people, feeling for them more than for himself, absorbed in their interests, hopes, and fears, so, with reverence be it said, was Christ. The last and greatest of the Jewish prophets, he was not only the lawgiver, as Moses, but the great Jewish descent is insinuated as an integral part of his mission. Two of the Gospels open with his genealogy. "Of the Israelites came Christ after the flesh" (Rom. ix. 5). He was received and loved by his country. He confined himself during his life to its needs. He was not sent "unto the lost sheep of the house of Israel" (Matt. xv. 24). It is true that his absorption into the Jewish nationality was but a symbol of his absorption into the far wider and deeper interests of all humanity. But it is only by understanding the one that we are able to understand the other; and the life of Moses is the best means of enable us to understand both.

[2.] In Heb. xii. 18–22; vii. 24–28; Acts viii. 33, 37, Christ is described, though more obscurely, as the Moses of the new dispensation—as the Apostle, or Messenger, or Mediator of God to the people—as the Controller and Leader of the flock or household of God. No other person in the O.T. could have furnished this parallel. In both the revelation was communicated partly through the life, partly through the teaching; but in both the prophet was incessantly united with the Guide, the Ruler, the Shepherd of his own people. (Heb. xii. 23.)

[5.] The details of their lives are sometimes, though not often, compared. Stephen (Acts vii, 24–35) dwells, evidently with this view, on the likeness of Moses in striving to act as a peacemaker, and in being misunderstood and rejected on that very account. The episode of the pollution of Moses especially described by Josephus (Ant. viii. 3, 9) immediately suggests the ascension of Christ; and the retardation of the rise of the Christian Church till after its founder was withdrawn gives a moral as well as a material resemblance. But this, though dwelt upon in the services of the Church, has not been expressly laid down in the Bible.

In Jude 9 is an allusion to an altercation between Michael and Satan over the body of Moses. It has been endeavored (by reading ἱσμὸνος for μυστικὸς) to refer this to Zech. iii. 2. But it probably refers to a lost apocryphal book, mentioned by Origen, called the "Ascension or Assumption of Moses." The substance of this book is given by Fabricius, Cod. Pseudopigraphus Vet. Test., i, 839–844. The "dispute of Michael and Satan" probably had reference to the concealment of the body to prevent idolatry. Gal. v. 6 is by several later writers said to be a quotation from the "Revelation of Moses" (Fabricius, ib., i, 886). See Revelations, Spurious.

In later history the name of Moses has not been forgotten. In the early Christian Church he appears in the Roman catacombs in the likeness of St. Peter, partly, doubtless, from his being the leader of the Jewish, as Peter of the Christian Church, partly from his connection with the rock. In this, as in the rock that he appears under Peter's name. In the Jewish, as in the Arabian nation, his name has in later years been more common than in former ages, though never occurring again (perhaps, as in the case of David, and of Peter in the apocrypha, from motives of reverence) in the earlier annals, as recorded in the Bible. Moses Ma'monides, Moses Mendelssohn, Músa the conqueror of Spain, are obvious instances. Of the first of these three a Jewish proverb testifies that "from Moses to Moses there was none like Moses." Numerous traditions, however, as might have been expected, and as has repeatedly been the case, have been brought about, by the way, to so celebrate a personage. Some of these were known to the ancient Jews, but most of them occur in later rabbinical writers (comp. Philo, De Vita Mosis, c. iii.; Joseph. Antiq. ii. 9 sq.; Bartolocci, Bibliotheca Robinsonica, iv, 115 sq.). The name of Moses is celebrated among the Arabs also, and the Municipales of a mass of legends (comp. Hottinger, Historia Orientalis, p. 80 sq.; Abulafia, Antiquités, p. 81). These Mussulman traditions are chiefly exaggrations of the O.T. accounts. But there are some stories independent of the Bible. One is the striking story (Koran, xviii, 65–80) on which is founded Parrot's "Histoire de saint Jean dans l'église de Bethléem" (comp. Sulpicius, Historia Ecclesiae, p. 80). The story of the extinction of God to the atheistic king (Chardin, x, 886, and in Fabricius, p. 886). The Greek and Roman classics repeatedly mention Moses (see Grotius, De re retailers, ed. i., 16; Hase, in the Bibliotheca Brem. vi. 769 sq.), but their accounts contain the authentic Biblical history in a greatly distorted form. See the collections of Meier, Judaeis, secundum Iren. Scripturæ praefatorum de Rebus Judaeis Fragmenta (Jen., 1832); also those from Tacitus, by Müller, in the Stud. u. Krit. 1843, p. 898–919. There are, likewise, as above intimated, traditionally ascribed to Moses several apocryphal books, as "an Apocalypse, or Little Genesis of Enoch," and the "Mysteries Books of Moses," supposed to have been fabricated in the early ages of Christianity (see Fabricius's Codex Pseudepigraphus Vetus Testamenti, and Whiston's Collection of Authentic Records, i, 449–65). Lauth (Moses der Ebräer.)
MOSES BEN-CANANOC

MS, Munich, 1859) thinks he has discovered traces of the history and name of Moses in two of the Leyden papyri written in the hieratic character (comp. Heath, The Exodus Poppy, Lond. 1856).

The authorship and life of Moses, compare also Warburton, On the Divine Legation of Moses; Hase, Geschichte Mohammed's (Zurich, 1778); Niemeyer, Charakteristik der Bibel, iii, 23 sq.; Hufnagel, Moses wie er sich selbst zeichnet (Freib. 1822); Nork, Isr. Rel. 1. (Lips. 1888); Ewald, Isr. Gesch. i, 32 sq.; Schreiber, Allgem. Religionskunde, ii, 166; Kitt, Die Bibel Illustrations, vol. ii; Hunter, Sacred Biography; T. Smith, History of Moses (Edinb. 1859); Breys, History of Moses (Lond. 1846); Townend, Character of Moses (Lond. 1813, 2 vols. 4to); Ross, Hist. of Moses (Edinb. 1837); Andameron, Life of Moses (Lond. 1834); Plumtree, Hist. of Moses (Lond. 1848); Drapeau, Comparaison Monti et Homeni (Vizeb. 1788); Haged, Apologie des Moses (Saulsbach, 1829); Moller, De Mosco Philohipho (Alt. 1701); Schumann, Vita Moshi (Lips. 1826); Reckendorf, Das Leben Moshi (Leipa. 1867); Clarke, Ten Great Religions (Bost. 1871), p. 409 sq.; also the dissertation referred to by Fürst, Bib. Jud. ii, 332 sq.

MOSES, ASCENSION OR ASSUMPTION OF. See Revelations, Spurious.

MOSES, BOOKS OF. See Pentateuch.

MOSES, LAW OF. See Law of Moses.

MOSES is the name of several patriarchs of the Armenian Church. — I., was born about 400 at Managerzand. After entering the service of the Church he rose rapidly in dignity, and in 457 he was chosen as patriarch of Armenia. He was very much disliked for his extreme abnegation of all patristic feelings, and complete submission to Feroze, king of Persia, who then ruled Armenia. Moses was severe upon those who took exception to his rule, and imprisoned many eclesiastics and episcopal dignitaries. He died in 462. II., 252, surrounded by adoration, after his native place, was born in 510. He also made his way rapidly to ecclesiastical distinctions after entering the service of the Church, and finally, in 551, mounted the throne of St. Gregory. He is the founder of a new calendar, which was used by the Armenians for several centuries. Nothing else of importance is to be noted during his rule of the Armenian Church. He died in 584 at Tovin. — 3, named Dathern, was born at Khodaran about 1580. In his youth he chose a seclusion life, and entered the monastery of Dathern, whence his surname. He was chosen to the patriarchate in 1629. He died in 1658 at Echmiadzin. See St. Martin, Armenian Mystique sur l'Arménie; Neale, Hist. of East. Church. (Armenia.)

Moses Albeida (called also Ben-Jacob), a Jewish theologian of some note, flourished in the beginning of the 16th century as rabbi of the Jews of Salonicca in Thessalonica. He wrote a number of works in the department of dogmatic and biblical theology, among which special mention is due to his בְּמַדָּה בְּמַדָּה, a homiletical Commentary on the Pentateuch, accompanied by several discourses (Ven. 1602). — מֵדָה מֵדָה, or Disquisitions on the Books of the Law, partly exegetical and partly philosophical (Ven. 1596, 1601, fol.).

Moses Botaroll (or Botarello), a Jewish writer of Spanish birth, who flourished in the 16th century, is the author of a commentary on the famous Book Je·zirah (q. v.), entitled דֹּפֵן הָיָה קָדְמָא, which he wrote for a Christian scholar, Maestro Juan, in 1409, and wherein he praises philosophy, speaks of Aristotle as of a prophet, and maintains that philosophy and the Kabballah propound exactly the same doctrines, and that they only differ in language and technical terms. In this connection Moses shows how, by fasting, abstinence, prayer, invocation and divine and angelic names a man may have such dreams as shall disclose to him the secrets of the future, and quotes in confirmation of his opinions such ancient authorities as Rab. Ashi, Saadia Gaon, Hai Gaon, etc., whom the Kabballah claims as its great pillars. Botaroll's commentary was first published with the text of the Book Jezira and other commentaries (Manuta, 1562; Zokiew, 1745; and in Grodno, 1806, 1820). Moses also wrote a work entitled יִשְׂרָאֵל, on astrology, redemption, and prophecies. See Furst, Bib. Jud. i, 128; Grätz, Gesch. d. Juden, viii, 100; Goldsmid, Bib. Jud., ii, 129 sq.; and F. and J. Graetz, Gesch. d. Juden. Vol. ii; J. Graetz, Geschichte d. Juden u. d. Welt, ii, 400; Dessauer, Ge-
Moses Cordovero BEN-JACOB (also called Remak בֵּן יַעֲקֹב, from the acronym of his name, רְמָאָק), a Jewish savant, was born at Cordova in 1522, studied the Cabala under his brother-in-law, Solomon Alkabari, and was soon afterwards distinguished as a Cabalist and author that his fame travelled to Italy, where his books were greedily bought. Cordovero represents the Cabala in its primitive state, since he is chiefly occupied with its scientific speculations, or the speculative Cabala (אֱלֹהֵי הֶלְחָכָה), as can be seen from the following specimen of his lucubrations on the nature of the Deity. "The knowledge of the Creator is different from that of the creature, since in the case of the latter knowledge and the thing known are distinct, thus leading to subjects which are again separate from him. This is described by the three expressions—cognition, the cognitator, and the cognitated object. Now the Creator is himself knowledge, knowing, and the known object. His knowledge does not consist in the fact that he directs his thoughts to things without him, since in comprehending and knowing himself he comprehends and knows everything which exists. There is nothing which is not united with him, and which he does not find in his own substance. He is the arbiter of anything which exists. And because of this he has the purest and most perfect form; so that the perfection of the creatures consists in the support whereby they are united to the primary source of his existence, and they sink down and fall from that perfect and lofty position in proportion to their separation from him (Parades i. 33, 155 sq.). He did not know works and words; he wrote an introduction to the Cabala, entitled A Sombre or Sweet Light, or יִתְנַהְרָא (first published in Venice, 1587, then in Cracow, 1647, and in Forth, 1701).—The Book of Retirement, or קְנֵי זְאוֹמָר, Cabalistic reflections and comments on ninety-nine passages of the Bible (Venice, 1548).—The Sacrifices of Peace, or יִתְנַהְרָא, a Cabalistic exposition of the Prayer-book (Lublin, 1618).—The Plant of Deborah, or יִתְנַהְרָא, ten chapters on ethics in the Cabalistic style (Venice, 1589; Livorno, 1734); but his principal work is the Garden of Pomegranates, or יִתְנַהְרָא, which consists of thirteen sections or gates (יִתְנַהְרָא), subdivided into chapters, and discusses the Sephirot, the divine names, the import and signification of the letters, etc. (Cracow, 1591). Excerpts of it have been translated into Latin by the Rabbin. Magnes (Theol. Nov., p. 84 sq.; Ethereidge, Introd. to Hebr. Literat., p. 859; Ginsburg, The Kabaloth, p. 182 sq. (London, 1865)); Finn, Sephardim, p. 307 sq.; Lindo, The Jews in Spain, p. 359; Bassein, Hist. of the Jews (taylors's transl.), p. 708; Zunz, Gesch. d. Juden in u. s. Selten, iii. 138 sq.; Gritz, Gesch. d. Juden, ix, 444; Zunz, Gesch. d. Juden, ii. 294; Die Monatsspiegel, p. 58 (Berlin, 1872). “(B. P.)

Moses de Coucy BEN-JACOB BEN-JACAT (hak-kohen ben-Chananel), the most celebrated Jewish preacher of the Middle Ages, was born at Coucy, not far from Soissons, c. A.D. 1200. He severely reprobated a custom then prevalent of marrying strange women. He often preached on that subject, and at last had the good fortune to be heard, for many went away the Gentile wives they had married. He travelled much in Spain and France, and taught the law, which seemed to have been neglected by a good many of his co-religionists. He died in 1260. Moses is the author of a very highly esteemed work, called The Major Book of the Commandments (יִתְנַהְרָא על הַשָּׁלֹשׁ עַצְמֵי הַבָּשָׂר), called also De Specialis, from its initials. This work on the command-
ments and prohibitions consists of sermons which he de-

Moses ha-Darshan

served him in his journeys through the south of France and
Spain (1255-1245), the design of which was to confirm
his brethren in the ancient faith, since the orthodox reli-
gion of Islam was professed in the south by the philosophy of
Maimonides. The work which propounds the six hundred and thirteen precepts was
first printed before 1480; then in Soncino, 1488; and in
Venice, 1522, 1547, etc. An abridgment of the Major
Book was made by Isaac de Coreibl, A.D. 1277, entitled
Minor Book of the Commandments, and is dated in the same year as the full
work. It was first published at Constantinople, 1510,
then at Cremona, 1556, with glosses, etc., and at Cracow,
1596, etc. See First., Bibl. Judais., i, 189 sq., 186; De
Rossi, Dizionario (German transl.), p. 172; Steinmeh-
egut, Catalogue Lit. Hebr. in Bibl. Bodleiana, coll. 1759-
1766, coll. 1105; Lindo, Hist. of the Jews in Spain, 80
(where the name is written "Mizzoci"); Basange, Hist.
of the Jews (Eng. transl.), p. 659; Ginsburg, in Levitas,
Massoret ha-Massoreth, p. 249 sq., note (London. 1867);

Gesch. d. Juden u. s. Sekten, iii, 33; Carmolty, La France
Juive (1215-1500), p. 95; Da Costa, Israel and the Gentiles,
226; Zuns, Zur Gesch. u. Literatur, p. 88, 127, 145. (F. P.)

Moses ha-Darshan (i.e. the Expositor) of Narbonne,
notes as a pupillar orator of more than usual influence and power as well as an exegete of the O.T. Scriptures, flourished in France in the sec-
dard half of the 12th century. He was the teacher of
Nathan the Jew, who is noted as another great light of
the Jewish pulpit, and wrote a number of valuable com-
mentaries, among which is a commentary on the Pent-
tateuch, resting largely on the Midrashic lore, is the most
widely circulated and esteemed. His greatest work is
a commentary on the Hebrew Scriptures, which is as-
ternately quoted by the respective names of רבי
Moses ha-Darshan, Expositions of R. Moses the Expositor,
the Great Berekiah, Berekiah Rabba Major, and Berekiah Rabba R. Moses ha-Darsham, and which has not as yet come to light. Copious and
numerous fragments of it, however, are given by Rashi in his commentaries on Gen. xxxv, 8; xlviii, 7; Num.,
xi, 16-25; xi, 20, 21, xxv, 14; xix, 22; xxvi, 24;
xviii, 19; xxxii, 42; xxxii, 1; Deut., xxxi, 14;
xviii, 24; Josh. v, 9; Psal., 2; ix, 4; ix, 12; xxiii,
17; xxxvi, 6; Prov., 12; xx, 10; Job, xxxxi, 1; by Raymond Martin in his Pugio Fidei (Paris, 1651; Leips.,
1657), both in the original Hebrew and in a Latin trans-
lation; by Porchef in his Historiae adversus impios
Hebraos (Paris, 1520); by Joshua Lorki, or Hieronymus
de Santa Fide, as he was called after embracing Chris-
tianity, in his Hebrewatoria (Frankfort-on-the-Main,
1629); and by Galatin in his De Arbitro Catholicae re-
sumatio (Basel, 1550). These fragments, which ex-
cessively contribute important helpings to the construc-
tion of interpretation in the Middle Ages, show that R. Moses strove to explain the words and the context, and that he interspersed his literal expositions with ancient
Haggadah, as well as with the interpretations of the rabbis
of olden days. See Zuns, Die Gottheitlichen Vorträge
des Mose ha-Darsham, S. 298; Ginsburg, (1857), p. 110;
17, vii, 24; xiv, 22; xxvi, 4; v.; Etheridge, Introd. to Hebrew Lit., p. 248; Jost, Gesch. d. Juden, u. s.

Moses Ibn-Ezra (b. Jacob of Granada), a Jewish
writer of note, was born in Spain about 1070, and was
descended from a family which once held noble rank in Jerusalem. He was equally celebrated as a lambent, profound, and eloquent preacher of the

celebrated rabbi Jehudah ben-Samuel ha-Levi (q. v.),
who bestowed due meed of praise upon him and some
other members of his noble and learned family. As a
poet, Moses Ibn-Ezra won the honor of being considered
one of the most finished Hebrew writers. His works are
remarkable not only for the intrinsic excellence of the
matter, but for the purity, sweetness, and aesthetic grace
of their style. Alexander von Humboldt, in his Cos-
mos, ii, 119, praises Moses Ibn-Ezra's sublime descrip-
tion of natural scenery. The Selichoth, or penitential
hymns, are greatly esteemed by the Jews, who give to
Ibn-Ezra the epithet of Ha-Eliah (היה הנשא), or "the
Selichoth poet" par excellence. He died about 1139. Mo-
es Ibn-Ezra wrote zwei Hymnen, Hymna zum Fest-
Tag der Leisegang, in the Sephardim Ritual. — Diramii R. M. ben-Izra, a collection in
lame and religious: מַעֲשֶׂה יִבְנֵי אֵזְרָא also מַעֲשֶׂה יִבְנֵי
Ibn-Ezra, a collection in
The Garden of Spices, on the philosophy of religion, in 7 parts:
Nisah, a penitential poet. He also wrote on elo-
quence and poetry, with an Arabic paraphrase; also a
philosophical treatise, still unprinted. Extensive spec-
men of his writings are given in L. Dukes's Moses Ibn
Ezra (Altona, 1839). See also Sachs, Religions Poesie
der Juden in Spanien, p. 69-82, 310-319; Kämpf,
Nichtchristliche Poesie anderledscher Dichter (Viy, 1858,
1859); Bagge, Synagogale Poesie, p. 21, 128;

ibor Radicum (ed. Bisenthel and Lebrecht, Berlin, 1847),
p. 36. (F. P.)

Moses ben-Jacob. See Moses Alba.

Moses de Leon (b. She昌-Tob), a Jewish philo-
sopher, poet, and theologian of repute, was born at
Leon about 1250, and died at Arevalo, A.D. 1305. He
is best known as the author of the Cabalistic book called
the Sokar, which he first published and sold as the pro-
duction of R. Simon b.-Jochai. We do not agree with
Erlicher, who states that "the opinion that accuses
it (viz. the Sokar) as a pseudo-fabrication to Moses de
Leon in the 18th century has, I imagine, but few believ-
ers among the learned on this subject in our own
day," for Moses's wife and daughter admitted that he
was the author of it, as will be seen from an account of
it in the Book of the Good Thief, p. 248; Ginsburg,
Kabbalah, London, 1857), which Ginsburg (Kabbalah,
p. 99) gives in the following abridged form: When Isac of
Akko, who escaped the massacre after the capture of this city
(A.D. 1291), came to Spain and there saw the Sokar, he
was anxious to ascertain whether it was genuine, since it
pretended to be a Palestine production. After he had
been born and brought up in the Holy Land, in constant
intercourse with the disciples of the celebrated Cabalist,
Nachmanides, had never heard a syllable about this
marvellous work. Now Moses de Leon, whom he met
in Valladolid, declared to him with a most solemn oath
that he had never heard of an authentic production of
the very autograph of Rabbi Simon ben-Jochai, and offered
to submit it to him to be tested. In the mean time,
however, Moses de Leon was taken ill on his journey
home, and died at Arevalo, A.D. 1805. But two distin-

Digitized by Google
guished men of Avila, David Rauen and Joseph de Avila, who were determined to sift the matter, ascertained the falsehood of this story from the widow and daughter of Moses de Leon. Being a rich man, and knowing that Moses de Leon had no family left, Joseph de Avila promised that if she would give him the original MS. of the \textit{Sohar} from which her husband had made the copies, his son should marry her daughter, and that he would give them a handsome dowry; whereupon the widow and daughter declared that they did not possess any such MS.; that Moses de Leon never sent the \textit{Sohar} from his own head, and wrote it with his own hand. Moreover, the widow candidly confessed that she had frequently asked her husband why he published the production of his own intellect under another man's name, and that he told her "that if he were to publish it under his own name nobody would buy it, whereas under the name of R. Simon ben-Jochai it yielded him a large revenue."

\textbf{Moses ben-Mocha of Palestine, or Tiberias, a Jewish writer of some note, flourished towards the close of the 6th century. He developed and amplified the interlinear system of vocalization (ייניעוץ ה Catherine)}, called the Tiberian (ייניעוץ ה Catherine), which has for centuries been adopted both by the Synagogue and the Church in all the pointed editions of the Hebrew Scriptures. Like his father, R. Moses also wrote Masmotic glosses both in the margin of the Codex, and in separate works, entitled יניעוץ ה Catherine.

\textbf{Moses ben-Nachman. See Nachmanides.}

\textbf{Moses the Punctuator (ייניעוץ ה Catherine)}, or the \textit{Cantor} (ייניעוץ ה Catherine), a Jewish exaggist, lived in London about the middle of the 18th century, and is noted as the last person who is known to have made the well-known \textit{Tractate enumerating the rules about the points of the Hebrew Literature}, called יניעוץ ה Catherine, also in the MSS. יניעוץ ה Catherine. Excepts of this treatise, made by Jacob ben-Chayim, were first printed with the Masmora in the \textit{Rabbinic Bible} (Venice, 1524-25), and since in all the editions of the \textit{Rabbinic Bible}. The treatise has also been published separately with a short commentary by Zebi ben-Menachem (Wilna, 1872), and with corrections and German notes by Frensdorff (Hanover, 1867). Observers of the Hebrew vowel-points and accents will find in this unprententious treatise a useful guide. R. Moses was thoroughly acquainted with and quotes the grammatical and exegetical writings of his predecessors, as Chayyug, Rashii, Ibn-Ganach, Ibn-Ezra, Parchom, etc. See Steinschneider, \textit{Bibliographisches Handbuch}, p. 95; Zunz, \textit{Zur Geschichte und Literatur}, p. 111; Ginsburg, in \textit{Kioto}, \textit{Bibl. Cyclop.} s. v.

\textbf{Moses of Satanow. See Satanow.}

\textbf{Moses ben-Shesheth, a Jewish interpreter of the Bible, who deserves to be ranked among the ablest exegetes of his people, flourished during the 12th century in France and Italy, but little is known of his personal history. His works, however, remain, and they are masterpieces, whether treating of Hebrew grammar, Old-Testament lexicography, or the Jewish Scriptures. His oldest and most valuable work, \textit{A Commentary upon the Books of Jeremiah and Ezekiel}, was published at England from a manuscript in the Bodleian Library, with an English translation and notes by S. R. Driver (London, 1872, cr. 8vo). In this work Moses ben-Shesheth confines himself almost exclusively to the discussion of grammatical and lexicographical difficulties, and avoids all haggadic exposition. His interpretations are mostly rational, sometimes unseasonal, and show throughout the independent thinker, guided only by grammatical rules. The great value of such old grammarians is now more and more appreciated; and the remark of Munk, "that the profound works of Genesis and Ewald may still be improved by the dicta of such a man as Ibn-Ga- nash, and still more by the works of Moses ben-Shesheth," appears to be just. The work before us consists rather of notes on the propheta, and seems to have been originally an extra-commentary to another more extended one, as many difficult passages and words in Jeremiah and Ezekiel are passed over without any remark, which could not have escaped the attention of rabbis. The author knew the works of Ibn-Ganash, R. Jehudah Chayyuyg, and Moses Kimchi, whom he often quotes; but he never alludes to R. David Kimchi, more celebrated than his brother Moses, nor to Rashi, although he frequently agree with them. It is to be hoped that Mr. Driver will continue the good work begun thus suspiciously, and so win the favor of other rabbis. Moses's works now buried in MS. form in the Bodleian Library. A sketch of his life also will be appreciated.

\textbf{Moshabbheities, or Asissimilutes, a heretical sect of the Mohammedans; so called because they hold to a resemblance between God and his creatures, supposing him to be a figure composed of members or parts, each spiritual part being capable of feeling, experiencing, coming into contact of ascent and descent, etc. Some of this sect believe that the divine nature may be united with the human in the same person, for they grant it possible that God may appear in a human form, as Gabriel did; and to confirm this opinion, they allege Mohammed's words 'that he appeared to the apostles in a most beautiful form, and Moses was talking with God face to face.' See Broughton, \textit{Bibliotheca Historico-Sacra}, ii, 144.

\textbf{Mosoheim, Johann Laurenz von}, a German theologian noted as an ecclesiastical historian of great merit, was born of a noble family at Lubeck, Oct. 9, 1614. He was educated at the Gymnasium of Lubeck and the University of Kiel, where, shortly after the completion of his studies in 1718, he succeeded Albert zum Felde as professor of philosophy in 1719. In 1725, at the invitation of the duke of Brunswick, he became professor of theology in the University of Helmst"adt, where he remained until 1747; when, after having at various times refused the offer of the professorships in Leipsic, Dantzic, Kiel, and others, he was appointed to the professorship of theology at G"ottenborg and the chancellorship of the university. Here his lectures on theology attracted all classes of students. He died September 9, 1755. He was thrice married. By his first wife he had two sons and an only daughter; by his second wife one daughter, afterwards the wife of Noielle. Mosoheim is regarded as the most learned Lutheran theologian of his time. With a superior classical education he combined a thorough knowledge of the English,
French, and Italian languages and their literature, and was such a master of the purest German that he was esteemed one of the founders of modern German pulp

French literature. His death occurred in 1731. His monument in St. Mark's church, Venice, is 161. He himself printed at Helmstädt in 1731 a cata
dogue rasiée de les works which he had brought out up to that time. Among his theological works, special attention is due to one on Bible morality, entitled Sitten

bucher der Heiligen Schrift (new ed. continued by J. P. Miller, Helmst., 1770-78, 3 vols., 4to). But his most im-
portant contributions to theological literature are his ec

clesiastical histories, of which his best known work is the Institutiones Historiae Ecclesiasticae, Antiquioris et Recentioris, libri III. It is written in Latin, and was first published in 2 vols., 12mo in 1726, and the en

larged and corrected edition, which is the one in which the original authorities, was published in 4to in 1755, just before his death. Another edition was published in 1764, with an account of Mosheim's writings by Miller, one of his pupils. It was translated into German by Von Einem and by J. R. Schlegel. Schlegel's transla
tion is the better, and is enriched with valuable notes. It has also been translated into French, Dutch, and English. The first English version was made in 1764 by Dr. Maclaine, but is very unfaithful. Dr. Maclaine's professed object was to improve Mosheim's style, by adding words and rounding off periods. His alterations and additions constantly express his own sentiments independently of Mosheim. The result is a curious example of authorship. (See, however, Maclaine.) In 1892 a faithful

translation, with valuable notes, was published by Dr. Murdock, of New Haven, Conn., of which there are many reprints; revised, N. Y. 1893. Mosheim's Ecclesiastical History extends from the birth of Christ to the beginning of the 16th century. Each century is treated sepa

dately, under the two heads of external and internal history. The internal history comprises "pros

perous events," or the extension of the Church by the efforts of its public rulers and private members, and "calamitous events," such as persecutions and in floods. The internal history includes the history, 1 of the Christian doctors; 2, of the doctrines and laws of the Church; 3, of its ceremonies and worship; 4, of heresies. This arrangement is open to several ob

jections, of which the chief are—that it is too artificial; that what Mosheim calls external and internal history constantly run into each other (and indeed it is not easy to understand how any part of the history of a community can be said to be "external") to it; and, lastly, it imposes on the historian the necessity of deciding what no human mind can decide, namely, what events are prosperous and what calamitous to the Church. But Mosheim's work is not of the kind which is likely to appeal to the modern historian. He has not treated his subject with the proper spirit of pious interest, though his own orthodoxy is undoubted. Nevertheless, his deep knowledge, his patient research, his general candor and impartiality, and his philosophi

cal spirit, entitle Mosheim to a place among the best Church historians. His works gave an impulse to the study of Church history in Germany, which has pro

duced, among other works, those of Paff, Baumgarten, Walch, Semler, Schröck, Henke, Schmidt, Neander, etc. Of these, that of Schröck, a pupil of Mosheim, is the fullest, extending to 45 vols. 8vo. "In his Ecclesiastical History," says Hagenbach—"certainly a most competent critic." Mosheim has labored with a candor which grants to all who differ from him an impartial presenta
tion of their views, and inspires justice to all; he has subjected their systems to a thoroughly scientific treat

ment, and in this he has been very happily likened to Mosheim. The greatest debt which the Church of the Palatinate owes to Mosheim seems to us to be that of Hase, who says: "Mosheim, conscious of historical talents, with a power of combination always bold, and sometimes extravagant, and an acquaintance with men in various and friendly relations, is universally acknowledged to have been a master of ecclesiastical historical writing" (Ch. Hist. p. 9). Mosheim's other important works on Church history are his tract, De Rebux Christianorum ante Constantinum (Helmut, 1758), and Institutiones Historiae Christianae Majoris (1778).—Of his works of the 18th century—: Dissertationes ad Hist. Ecclesiasticum perti

entes (new ed. Altona, 1767, 2 vols.); and Versuch einer umporsehrten Ketzergeschichte (Helmut, 1746-48, 2 vols.). Among his other works are a Latin translation, with notes, of Cudworth's Systems Intellectuale (Jena, 1785);—six volumes of Symmies (1747). Mosheim was so fluent in Latin, that several parts of his later works were written in that language. The treatises of Capitation are found in his Observationes Sacra (Amsterdam, 1721); his Cogitations in N. T. loc. select. (Hannover, 1726); his Erklärung der J. B. Dr. a. Codin

ther (1741, new ed. by Windheim, 1782); his Erk. d. legen Br. a. d. Timoth. (1756); and in his volumes of lectures at the university of Halle. His exegesis is usually broad and learned, and betokens a good sense of sound erudition. Mosheim was greatly distinguished as a preacher. His style was formed on the model of the English and French preachers, Tillotson and Watts, Saurin, Massillon, and Flechier. He has been compared to Fenelon for the graces of his style. His talents were of a very high order, his learning was immense, and his character was exemplary. Says one: "In depth of judgment, in ex

tent of learning, in purity of taste, in the passion of eloquence, and in a laborious application to all the vari

ous branches of erudition and philosophy, he had cer

tainly very few superiors." "Mosheim's noble charac

ter," says Wachter (German Reform. 1792), "was just as lovely as his learning was thorough and compre

hensive. There is almost no domain of theology which he did not live to adorn and bless. . . . In the study of moral he, for a time at least, created an epoch, and in the history of German pulpit eloquence a new period dates from him. He has been termed the German Tillotson, the German Bourdaloue. What Michaelis wanted in fine taste was largely present in Mosheim, and gave to all his learned works, as well as to his sermons, an in

describable charm. Mosheim in faith was thoroughly orthodox, yet mild and patient towards others, and in this respect really unlike many of that school." We think Hagenbach, however, goes too far when he calls Mosheim also "the father of modern Church history," as such no one deserves to be named except the learned and sainted Neander. He it was who first treated ec

clesiastical history as it should be treated. See Nean

der, Adam, Geschichte der reformirten Kirche, vol. iii. 19th yr., vol. ii and iv; Geenner, Memorials J. L. Mos

Mosheim, Ruprecht von, a German religious enthusiast, was born in the first half of the 16th century. He believed himself commissioned of God to unite the four systems of religion—Papacy, Lutheranism, Zwinglianism, and Anabaptism—prevalent during the Reformatory period, and to lay the foundation of a new Jerusalem. He rejected all prevailing creeds as anti

Christian, and prayed for another reformation move

ment that might unite all followers of Jesus. To fur

ther this end he also entered into negotiations with the evangelical theologians, Osian and Venatorius, in 1589. But these negotiations were soon broken off. On the part of Romanists he was disliked from the first, for he was severe upon the immoral conduct of the clergy, the withholding of the cup, and the sale of in

vestments. The pope and the emperor Ferdinand, to whose influence he had to submit, were also his weight. The emperor Ferdinand, in whose presence he hesitated not to deliver an oration against the papacy. He also went to Vienna to speak to the papal nuncio Morone, in order to get an interview with the pope; but instead of being afforded an opportunity to go to Rome, he was called by order of emperor Ferdinand before the authorities of
the convent at Hazenau, and accused of heresy. The prince elector of Mentz had his work De monarchia et renascencia Christianae fidei examined, and the ecclesiastical judge condemning him guilty of heresy, Mosheim was put in prison, and there died in 1544.

Mosher, Abraham, a minister of the Methodist Episcopal Church, was born in the early part of the present century. He was first employed in secular occupations, but after his conversion he preached for many years under the presiding elder, and in 1857 entered the Black River Conference, and was stationed at Antwerp; in 1858 and 1859, at De Peyster; in 1860-61, at Rensselaer Falls; in 1862-63, at Waddington; in 1864, at Richville; in 1865-66, at Redfield. In 1867, his health failing him, he was superannuated. He died in Hampden, Ohio, June 3, 1869. See Minutes of Annual Conferences, 1870, p. 136.

Mosel'lam (Mesor'alamos, Vulg. Bosoramus), a Graecized form (1 Esdr. ix, 14) of the Messhillam (q. v.) of the Heb. text ( Ezra x, 15).

Mosel'lamon (same as precedent. Mesor'alamos v. r. Messkolabuv, Vulg. Moselouas), a Graecized form (1 Esdr. viii, 44) of the Messhillam (q. v.) of the Heb. text ( Ezra viii, 16).

Mosque (Spanish mezquita, French mosquée, Arabic masjid, "a house of prayer," from sajadah, "to bend, bow, adore") is the name applied in English to any Mohammedan house of worship; the larger houses of worship are called by Moslem "jami" (places of assembling) or "culliayet" (cathedrals). The first mosque was founded by Mohammed at Medina, part of the work be-

ming done by his own hands. The site was a grave-yard shaded by date-trees, which was selected by the Prophet because his camel knelt opposite to it on his public entry into the city. The edifice was square and capacious, the walls of earth and brick, and the roof supported by the trunks of palm-trees and thatched with palm-leaves. It had three doors. A part of the building was assigned as a habitation to the poor among the faithful who had no other homes. In this mosque Mohammed was buried; and though the original edifice was long ago replaced by a larger structure, the temple still bears the name of Masjed el-Nabi, "the Mosque of the Prophet" (see Wellsted, City of the Caŭpha, i. 257 sq., 308 sq.).

The most sacred mosque is the great temple of El-Hamram at Mecca, enclosing the Ka'aba (q. v.). For many centuries the mosques were fashioned after this one. It consists of a large court enclosed by colonnades, with a fountain in the centre, where ablutions are made before prayer. On the side towards Mecca the colonnade is deeper. In the centre of this side is a niche (mihrah), surmounted by a vaulted arch; by the side of the which Mecca lies (see Kasamah) there is a niche (mihrah), towards which the faithful are required to pray. Opposite the pulpit there is generally a platform (ṣikkeb) surrounded by a parapet, with a desk bearing the Koran, from which portions are read to the congregation. In the imperial mosques at Constantinople there is a tribune (mawṣera), at the opposite side from the menber and the mihrah, reserved for the sole use of the Sultan. In front of the mihrah is often another tribune (khutab), from which the Imam (q. v.) pronounces prayer, and an elevated square platform (mastabah) from which criers repeat the calls to prayer. The imperial mosque of Achem in Constantinople is the only mosque that has six minarets, except the temple of El-Hamram in Mecca, to which Achem built a seventh minaret, to quiet the complaint that he was attempting to outvie that holy sanctuary. Many of the mosques are adorned with all the charms of the Saracenic and Moorish architecture, having texts and passages from the Koran interwoven among the delicate ornamentation, to lead the minds of the faithful
while waiting for the hour of public prayer. The Turkish mosques are generally quite plain in their interior ornamentation, though often very stately and grand in their exterior architectural effect. It is not customary for women to visit the mosques, and if they do they are separated from the male worshippers. The utmost solemnity and decorum are preserved during the service, although in the hours of the afternoon (when there is no worship) people are seen lounging, chatting, even engaged in their trade, in the interior of the sacred building. On entering the mosque, the Moslem takes off his shoes, carries them in his left hand, sole to sole, and puts his right foot first over the threshold; he then performs the necessary ablutions, and finishes by putting his shoes and any arms he may have with him upon the matting before him. The congregation generally arrange themselves in rows parallel to that side of the mosque in which is the niche, and facing that side. The chief officer of a mosque is the Nazir (q.v.), under whom are two imams. There are, further, many persons attached to a mosque in a lower capacity, as Mueldins (q.v.), Bowlaws (door-keepers), etc., all of whom are paid, not by contributions levied upon the people, but from the funds of the mosque itself. The revenues of mosques are derived from lands. With their treasures, the sacredness of the place alone being sufficient protection. The former rigor by which unbelievers were excluded from mosques under penalty of death has been of late years relaxed in some places.

The finest specimens extant of Moslem architecture are thought to be the mosque at Mecca, the mosque of Omar at Jerusalem (see Spencer's Egypt and the Holy Land, Letter X), and the mosque at Medina, which three are considered also as peculiarly holy. The Jami Masjed, or Great Mosque, at Delhi (see preceding page), built by Shah-Jehan in 1631-37, is generally considered the noblest building ever erected for Mohammedan worship. (G. F. C.)

Mosquito Territory (or Mosquitia). See NICARAGUA.

Moss, Charles, an Anglican prelate of some note, nephew of the following, flourished in the second half of the last century. He was educated at Caius College, Oxford, where he was afterwards fellow, and entered holy orders about the middle of last century. After filling many important livings, among them the rectory of St. James's and St. George's, London, the archdeaconry of Colchester, etc., he was finally elevated to the episcopate in 1766, and appointed to the see of St. David's, from which he was transferred to the see of Bath and Wells in 1774. He died in 1802. He wrote, Evidence of the Resurrection Cleared (Lond. 1744 and 1749, 8vo); and published many of his sermons in several series (Lond. 1750, 4to; 1756, 4to; 1764, 4to; 1769, 8vo; 1769, 4to; 1772, 4to; 1776, 4to). A son of his, of like name, also figured prominently in the Church. He was bishop of Oxford from 1807 until his death in 1811. He published only a First Sermon (Lond. 1758, 4to).

Moss, Robert, D.D., an English divine of distinction, was born of estimable parentage at Gillingham, in Norfolk, in 1666. He was educated first at Norwich school, then at Benet College, Cambridge, in 1682; made there B.A. and fellow in 1685, and B.D. in 1690; and entering holy orders, acquired great reputation both as a disputant and preacher. He was preacher to the Society of Gray's Inn, London, in 1698, and assistant preacher to Dr. Wake at St. James's, Westminster, in 1699. He was also sworn chaplain, in three succeeding reigns, to king William, queen Anne, and George I; and being one
of the chaplains in waiting when queen Anne visited
the University of Cambridge, April 5, 1705, he was then
created D.D. In 1708 he was invited by the parish-
ioners of the shire of Hertfordshire to the ordination of
dean Stanhope, to accept their Tuesday lecture, which he
held till 1727, and then resigned it on account of his
growing infirmities. In 1712, on the death of Dr. Rod-
erick, he was nominated by the queen to the deanery
of Ely, which was the highest but not the last promo-
tion he obtained in the Church; for in 1714 he was col-
rated by Robinson, bishop of London, to Gilstead, a small
rectory on the eastern side of Hertfordshire. The gout
deprived him of the use of his limbs for some of the last
years of his life, and he died March 26, 1725. His char-
acter may be seen in the preface to the eight volumes of
his Sermons, which has usually been attributed to Dr.
Snape, and has even been ascribed to him by Mr. Mas-
ters in his History of Benet College; but the credit of
it has lately been transferred to Dr. Zachary Grey, who
is now definitely known to have been the editor, and to
have also written a Life of the dean, which has, how-
ever, never been published. He left no works of inter-
est to us besides his sermons. He wrote a number of
poems, among which the best are, in dominoi Ser-
lloccil liberum editum de usu ac fine doni prophetici,
necnon praedictionum maxime memorabilia per contin-
uationem ab initio usque sacrarium seriem (1726); — A
brief inquiry into the nature of vipers and serpents.
Moses, Exodus, chaps. xx, from ver. 1 to ver. 20: — A Les-
Biog. s. v.; Nichols, Anecdotes of Bongey, p. 78; Longd.
Gentleman's Magazine, lxxiii, 1138. (J. H. W.)

Mossom, Robert, a learned Irish prelate, who
flourished in the second half of the 17th century, was
born about the opening of that era; entered holy or-
der, and being a staunch royalist, suffered much in the
civil wars; but on the Restoration was made dean of
Christ-church, Dublin, with which he held the bish-
opric of Londonderry, where he died in 1679. His works
are, The Preacher's Tripartite (Lond. 1657, 1657, 1685,
fol.); — Varia collegiendi Formulac. — Narrative of
George Wild, Bishop of Lerry (Lond. 1685, 4to): — Zion's
Prospect in its First View. He also published some of
his sermons, of which Bickersteth (Christian Student)
says that they are "spiritual and evangelical. See
Harry's Ware's Ireland.

Motælitites. See Theommedan Sæcts, in this
volume, p. 428, col. 2.

Mote (κόρός, something dry), any small dry par-
ticle, as of chaff, wood, etc. (Matt. vii, 5-6; Luke vi, 41, 42. Acts vii, 43). In others, through the magnifying medium of prejudice, are likened by our
Lord in these passages to a speck or splinter in the eye,
which the censorious are fond of detecting, though
guilty of more severe offences themselves, aptly com-
pared to a beam (κορίον) (see Winckler, in Animaniros.
PhiloL, iii, 903 sq.). The word was a familiar one
with the Hebrews (see Buxtorf, Lex. Rabb. col. 2900).
See EYE.

Motett, a term applied to two different forms
of Church musical composition. 1. A sacred cantata, con-
sisting of several unconnected movements, as a solo,
trio, chorus, fugue, etc. 2. A chorale composition, gen-
erally also of a sacred character, beginning with an
introduction in the form of a song, perhaps with figura-
tive accompaniment; after which follow several fugue
subjects, with their expositions, the whole ending either
with the exposition of the last subject, a repetition of
the introduction, or a special final subject. A motett
differs in this respect from a double or triple fugue, that
the voices appear at the same time, though simultaneously, but are intro-
duced one after the other. In one form of the motett, the successive phrases of an entire chorale are treated
as so many fugal subjects. The subject is taken from the
psalms or hymns of the Church. "Motett" seems to
have been originally synonymous with anthem, and was
then probably accompanied only by the organ, which
is now no longer the case in Roman Catholic churches, all
kinds of musical instruments being used in it.

Moth (βυτή, ask, so called from its causing garments
to fall in pieces, Job iv, 19; xiii, 28; xxvii, 18; Ps.
xviii, 11; Isa. li, 9; li, 8; Hos. v, 12; Sept. and Vulg.
the moth makes all vessels of Phœnix, where they have
dapôn, armena] render αἰχή, timea; like the N. T.,
Mat. vi, 19, 20; Luke xii, 23; with which may be
compared the Heb. עשת, from its looping, Isa. ii, 8; Sept.
αιή, Vulg. timea, Auth. Vern. "worm;" the word
αιή also occurs in the term ἐρυθρωτος, "moth-eaten,
Jas. v, 2), the name of a well-known insect, which,
in its caterpillar state, is very destructive to clothing.
The tribe of moths is called by naturalists Phalaeno,
and is said to contain more than 1500 species. Linnaeus,
under the order Lepidoptera, genus Phalaena, gives
the species of moths—Tinea tapetella, T. pellionella, and T.
recurvata saccella—as peculiarly destructive to wool-
en clothes, furs, etc. The egg of the moth, being de-
posit on the fur or cloth, produces a very small, shin-
ing insect, which immediately forms a house for itself
by cuttings from the cloth. It eats away the nap, weakens or destroys the thread, and finally ruins the
fabric. Moths fly abroad only in the evening and night,
differing in this respect from the tribe of butterflies,
which fly only by day. Some of the species of moths
feed on the leaves of plants. The "moth" par emi-
scence (see Lepidoptera) which has near four wings covered
with minute tessellated scales, and of the tribe Nocturna, in
which the antennae (or "horns") are drawn out to a fine point. The genus
Tinea in this division consists of small species, with the
fore-wings long and narrow, and the head covered with
coarse hairs. It includes a large number of species,
several of which are noted for their destructiveness to
clothes, woollen stuffs, furs, specimens of natural his-
tory in museums, and corn in granaries. The most
pertinacious are T. pellionella and T. tapetella,
which feed on cloth; and these, from their abun-
dance, and from their mutilation, which they are able
to penetrate into drawers and wardrobes, are but too
well known in every household. The identity of this with the Biblical insect is apparent from the terms by which it is rendered in the Sept.
(comp. Theophrast. Hist. plant. i, 16) and Vulg. (comp.
Pliny, Hist. nat. ii, 41). The following passage shows the
moth occur in Scripture—to its being produced in clothes: 'For from garments cometh a moth' (Eccles.
xiili, 13); to its well-known fragility: 'Mortal men are
broached before the moth' (Job iv, 19), which words
really mean (so the Sept.) 'Like as (κατα, comp. 1 Sam.
i, 10) the moth is crushed.' (comp. Plautus, Cistel.i, l, 73); but others take the phrase actively, 'As a moth
consumes clothing' (so the Vulg.). The allusion to
the house of the moth (Job xxvii, 18) seems to refer simply
to the silky, spindle-shaped case, covered with cater-
pillar hairs and particles of wool, made and inhabited by the larva of the Tinea sacceella; or to the felted case or
tunnel formed by the larva of the Tinea pellionella; or
to the arched gallery formed by eating through wool by
the larva of the Tinea tapetella. References occur to
the destructiveness of the clothes-moth: 'As a garment
may be eaten (Job xxi, 30); 'The moth shall eat them
up (Isa. i, 9); 'The moth shall eat them up like a garment' (li, 8); 'I will be to Ephraim as a moth,' i.e.
will secretly consume him (Hos. v, 12); comp. Matt.
vi, 19, 20; Luke xii, 33; Jas. v, 2 metaphorically; and
Ecclus. xix, 9-10. Moths and worms shall have him that
The Clothes-moth (Tinea Pellionella).

a. Larve in a case constructed out of the substance of which it is feeding.
b. Case exists at the side of the larve.
c. Case cut open by the larve for marring it.
d, e. The perfect larve.

remarkable discrimination in her instinct, the parent moth never deposits her eggs in garments frequently overlooked or kept clean. Indeed, the most remarkable of all proofs of animal intelligence is to be found in the larve of the water-moth, which get into straws, and adjust the weight of their case so that it can always float: when too heavy they add a piece of straw or wood, and when too light a bit of gravel (Transactions of the Royal Society of Edinburg, i, 42)." The Tinea pellionella, the larve of which constructs a portable case out of the substance on which it feeds, and is very partial to feathers, certainly occurs in Asia Minor, and we may safely conclude that it and biallacta (an abundant species often found in horse-hair linings of chairs) will be found in any old furniture warehouse at Jerusalem. A detailed account of the habits of these insects may be found in Remire's Insect Architecture (Lond., 1857), p. 230 sqq. See WORM.

Mothe, Pierre Lambert de la. See LAMOTHE.

Mothe le Vayer, François de la, a French sceptical philosopher, was born at Paris in 1686, was so well educated that he was a favorite of the great cardinal ministers Richelieu and Mazarin, and was appointed through their favor counselor of the state and tutor to the duke of Anjou, brother of king Louis XIV. La Mothe was a moral and temperate man — by no means a common case at the French court of that period. He became so interested in the study of history that he abandoned everything for it, and so generally esteemed was he that he was crowned with distinctions in all circles which he entered. In 1639 he was made a member of the Academy. La Mothe was nearly fifty years old before he published his first work; yet, once entered into the authors' lists, he contributed something regularly every year until his death in 1672. He fought with wit and satirical humor against the life led by the court, and the licentiousness to which the people of that century gave their sanction. In his philosophy he inclined to scepticism, applying the arguments of the ancient skeptics especially to theology, limiting the latter to the sphere of simple faith. He exemplified his views in his work De la Vertu des Pauvres, ou Cong discours faits à l'imitation des anciens par Horatius Turber (Mona, 1671, 12mo; 1675, 8vo), and a new edition, Observatoire contre le Pyrrhonisme par Mr. J. M. Kahle (Berlin, 1704, 2 vols. 8vo). In the first dialogue he defends scepticism in the style of Sextus with much show of learning. He treats of the variety and contradictions of human opinions, morals, and habits, wherefore the consequence is that of the doctrine that there is nothing certain, and for the welfare in common not even a common binding law of morals. In his second dialogue he speaks about the variety of nourishment and beverage, and the different customs at repasts; of the conception of love, and takes ground in favor of what would now amount to the doctrine of free love, which he calls his sacred and divine philosophy. He recommends in his third dialogue a philosophic solitary life. The fourth dialogue contains a satirical praise of the ass, aiming thus sarcastically to reprimand the folly of his century. His fifth dialogue treats of the several religions, and he comes therein to the conclusion that there be nothing certain obtained by it; but he speaks here only in regard to the religion of reason, and says that positive religion possesses the principles of faith in revelation, which can be only gotten by God's grace, and must ever be above all reason. Mr. Arnauld, the learned le Willughby, and M. de Maricourt in a tract entitled De la Necessité de la Foi en Jésus Christ, which ably refutes the foolish reasonings of La Mothe, and yet treats the author with great consideration, as he deserved. La Mothe died in 1672. The rest of his works are of very little importance; they were published by his son at Paris in 1653; 2d ed. 1669; 3d ed. (3 vols, folio) in 1684. This last edition is the most complete. Yet the best edition was got up in Germany at Dresden (1756-59, 14 vols. 8vo). See Étienné, Essai sur La Mothe le Vayer (1849); Bayle, Hist. Dict. s. v.; Hal- lam, Introd. to Est. Hist. (see Index in vol. ii, Harper's edition). (J. H.W.)

Mother (25 cm., a primitive word; Gr. πωρά; but mother-in-law is ψωρο, ψωρί: mother: once ψωρον, ψωροθε- mèth, Deut. xxvii, 29; Gr. ψωροθήκη). "The superiority of the Hebrew over all other contemporaneous systems of legislation and of morals is strongly shown in the higher estimation of the mother in the Jewish family, as contrasted with modern Oriental, as well as ancient Oriental and classical usage. See WOMAN. The king's mother, as appears in the case of Bathsheba, was treated with especial honor (1 Kings ii, 19; Exod. xx, 12; Lev. xix, 18; Deut. v, 16; xxvi, 18, 21; Prov. x, 1; xv, 20; xxii, 29; xxxi, 20, 30, 31; Jer. xxx, 4); and when the father had more than one wife, the son seems to have confined the title of 'mother' to his real mother, by which he distinguished her from the other wives of his father. Hence the source of Joseph's peculiar interest in Benjamin is indicated in Gen. xliii, 29 by his being 'his mother's son.' The other brothers were the sons of his father by other wives. Nevertheless, when this precision was not necessary, the step-mother was sometimes styled mother. Thus Jacob (Gen. xxxvii, 10) speaks of Leah as Joseph's mother, for his real mother had long been dead. The step-mother was, however, more properly distinguished from the wmbmother by the name of 'father's wife.' The word 'mother' was also, like father, brother, sister, employed by the Hebrews in a somewhat wider sense than is usual with us. It is used of a grandmother (1 Kings xx, 10), and even of any female ancestor (Gen. iii, 20); it comes to deduct (Deut. v, 7), and to express not distinct mate relationship (Job xvii, 14). In Hebrew, as in English, a nation is considered as a mother, and individuals as her children (Isa. I, 1; Jer. I, 12; Ezek. xix, 2; Hos. ii, 4; iv, 5): so our 'mother-country,' which is quite as good as 'father-land,' which we seem beginning to copy from the Germans. Large and important cities are also called mothers, i.e. 'mother-cities' (compare-
tropolis, from the Greek), with reference to the dependent towns and villages (2 Sam. xx, 19), or even to the inhabitants, who are called her children (Isa. iii, 12; xlii, 29). ‘The purpose of the way, at the head of two ways’ (Ezek. xi, 21), is in the Hebrew ‘the mother of the way,’ because out of it the two ways arise as daughters. In Job i, 21 the earth is indicated as the common ‘mother, to whose bosom all mankind must return.’ The term is also applied to a city as the parent or source of wickedness and abominations; as “Babylon the Great, the mother of harlots” (Rev. xvii, 5). The Church, as the Bride, is spoken of as the mother of believers (Isa. xi, 14-22; 111, 8-13; Ps. lxxxvii, 5, 6; Gal. iv, 22, 21); and the sentiment, at once so mild and tender, which uniting the mother and the child is often alluded to in the sacred volume to illustrate the love of God to his people (Isa. lxi, 1-8; 111, 6-14; 1 Cor. iii, 1, 2; 1 Thess. ii, 7; 2 Cor. xi, 2). See Child.

Mother-Church (Latin, Matris Ecclesiae) is a term which has been used in various significations. The ancient Christians used this denomination of a Church in different senses. First, they understood by it an original Church, planted immediately by some one of the apostles, and from which others were afterwards derived and propagated. In this sense the Church of Jerusalem is called the mother of all churches in the world by the second General Council of Constantinople; and Aries was the mother-church of France, because supposed to be planted by Trophimus, the apostle missionary, and first bishop of that place. Secondly, a mother-church denotes a metropolis, or the principal church of a single province; as in some of the African canons, where matrix is sometimes used for the prior's see, to which the other bishops were to have recourse for judgment and decision of controversies. But, thirdly, most commonly it signifies a cathedral, or bishop's church, which was usually termed the Great Church, the Catholic Church, and the Principal See, in opposition to the lesser titulari, or parish churches, committed to simple presbyters. Ecclesia matris, or mother-church, is opposed to dioecesana, or diocesan church; though by their ambiguity they are often confounded, and mistaken for one another. See Douthwaite, Bibliotheca Historico-Sacra, ii, 145.

Mother of God. The Virgin Mary is sometimes so styled by Christians of all denominations. There is, however, a dissipation to the use of this expression because Romanists have given to Mary a place which the Scriptures do not warrant us in assigning her. "The Virgin Mary," says Pearson (On the Creed), "is frequently styled the Mother of Jesus in the language of the evangelists, and by Elisabeth, particularly, the mother of her Lord, as also by the general consent of the Church, because he that was born of her was God (Deipara); which, being a compound title, begun in the Greek Church, was resolved into its parts by the Latin, and the Virgin was plainly named the Mother of God." Protestants admit that the Virgin Mary is the mother of God, but protest against the conclusion that she is on that account to be treated with peculiar honor, or to be worshipped; for this expression is used not to exalt her, but to assert unequivocally the divinity of her Son: he whom she brought forth was God, and therefore she is the bringer forth or mother of God. The term was first brought prominently forward at the Council of Ephesus, when it was deemed necessary by the Church to prevent giving Mary a station above that of her Son Jesus the Christ. In the Protestant world there is among the common people a hesitancy to the use of it, "because," as Hook has well put it, "by the subtility of the Romish controversialists, it has been so used, or rather misused, as to make it seem to confer peculiar honor and privileges upon the Virgin Mary. The primitive Christians, like ourselves, were contented with speaking of the Virgin as 'the mother of my Lord;' and this phrase sufficed until, as we have seen, heretics arose who understood the word Lord in an inferior sense, and then it became necessary to assert that God and Lord, as applied to our blessed Saviour, are synonymous terms. And sound theologians will still occasionally use the term Mother of God, lest Nestorianism should be held unconsciously by persons who wish to be orthodox; and people forget the great truth expressed by Paul that "God purchased the Church with his own blood; and that Christ is over all, God blessed forever." See, however, the article MARIOLA in this Cyclopaedia, vol. v.

Mother of God, Congregation of the, a monastic order instituted about 1574 at Luca, in Tuscany, by John Leonardi. Their purpose is to save the lost of all conditions by any and all spiritual means, as the preaching of the Gospel, catechetical instruction, and visiting. They especially aim to reach the sick and the dying; and make the hospitals their principal fields of labor. Their founder was particularly devoted to the mother of Christ, and he provided in the constitution of the order that every day at 1 P.M. the litanies of the Holy Virgin be recited, and other like religious devotions be paid to her memory. The order was approved by pope Clement VIII in 1593, and confirmed by pope Paul V. Pope Gregory XV, anxious to spread the order throughout Italy, permitted its members to take the three monastic vows. Their dress is very much like the common monastic garb. See Hist. du Clergé seculier et régulier (Amst. 1716), iii, 123-125.

Habit of a Monk of the "Congregation of the Mother of God."

Mother Goddess (Latin, Mater deo). The pagans gave the name of mother to certain goddesses of the first rank, particularly to Cybele, Ceres, Juno, and Vesta. Cicero speaks of a famous temple erected in the city of Engravia, in Sicily, to the Great Mother, or simply The Mother. Concerning this temple, the Engravians entertained a strange superstition. It was evidently affirmed that certain goddesses, called The Mothers, frequently appeared there. They relate a story of one Nicicus, a man of wit, and a considerable person of the city, who had frequently laughed at this pretended apparition. One day, as he was haranguing in public, he fell down, roared like a madman, and rest
MOTHERING SUNDAY 697

MOTIVE
to determine his will than it can be an argument to
determine his judgment." This is Aristotle's definition
(rive ove) of end or final cause; and as a synonyme
for end or final cause the term motive had been long
known in natural philosophy. (Sir I. Hamilton, Dr.
Reid's Essays on the Active Powers he says, "Every-
thing that can be called a motive is addressed either
to the animal or the rational part of our nature." Here
the word motive is applied objectively to those external
things which, when contemplated, affect our intelli-
gence for the benefit of our conduct. In the very
sentence he has said, "motive the of former kind are
common to us with the brutes." Here the word motive
is applied subjectively to those internal principles of
our nature—such as appetite, desire, passion, etc.—
which are excited by the contemplation of external objects,
adapted and addressed to us. But in order to a more
precise use of the term motive, let it be noted that,
in regard to it, there are three things clearly distin-
guishable, although it may not be common nor easy
always to speak of them distinctly. These are, the
external object, the internal principle, and the state or
affection of mind resulting from the one being addressed
to the other. For example, bread or food, may kind
is the external object, which is adapted to an internal
principle which is called appetite, and hunger or the
desire for food is the internal feeling, which is excited
or excited by, as the circumstances may be, the present-
moment of the external object to the internal principle.
In the same way, when a man is moved to commit
any one of these three; and it might be said that the
motive for such an action was bread, appetite, or hunger.
But, strictly speaking, the feeling of hunger was the
motive; it was that, in the preceding state of mind,
which disposed or inclined the agent to act in one way
rather than in any other. Thus, a man's mind may be
divided into three; and it might be said that the
motive of every kind. In every case there may be ob-
served the external object, the internal principle, and
the resultant state or affection of mind; and the term
motive may be applied, separately and successively, to
every one of them; but, speaking strictly, it should be
applied to the determining state or affection of mind
which arises from a principle of human nature having
been addressed by an object adapted to it; because it is
this state or affection of mind which prompts to action.
The motive of an agent, in some particular action, may
be said to have been injury, or resentment, or anger—
(both which are terms of complex motive) by Dr.
Reid. (Cf. Motive, "The view or apprehension of
the understanding, or perceiving faculty. Nothing can in-
duce or invite the mind to will or act anything any-
thing further than it is perceived, or in some way or other
in the mind's view; for what is wholly unperceived, and
perfectly out of the mind's view, cannot affect the mind
at all. Hence it has been common to distinguish mo-
tives as external or objective, and as internal or subjective.
Regarded objectively, motives are those external objects
or circumstances which, when contemplated, give rise
to views or feelings which prompt or influence the will.
Regarded subjectively, motives are the views or feelings
which arise on the contemplation of exter-
nal objects or circumstances. In common language, the
term motive is applied indiscriminately to the external
object and to the state of mind to which the apprehen-
sion or contemplation of it may give rise. The expla-
nation of his motives, as we have seen, is the chief task
of the biographer. In these cases the term motive is strictly applicable to the
terminating state or affection of mind which immedi-
ately precedes the volition or determination to act.
To the question, therefore, whether motive means some-
thing in the mind or out of it, it is replied that what
moves the will is something in the mind and affection
of mind. The state of mind may have reference to some-
thing out of the mind. But what is out of the mind
must be apprehended or contemplated—must be brought
within the view of the mind, before it can in any way
affect it. It is only in a secondary or remote sense,
therefore, that external objects or circumstances can
be called motives, or be said to move the will. Motives
are, strictly speaking, subjective—as they are internal
states or affections of mind in the agent. Motives may
be called subjective, not only in contradistinction to the
his clothes in pieces. Upon this he was thought
possessed by the furies, and every one acknowledged
the vengeance of the injured goddesses. However, it
was found afterwards that this was only a pretended
decree from Delphi, the hands of his persecutors, who had thought of
destroying
him, under pretense of punishing him for his im-
pety in denying the apparatus of The Mothers; for,
being suffered to go out of the city, he made his escape
to the Roman general Marcellus. In that temple were
then preserved a great number of weights and measures,
which made some believe that Marunès and Ulysses had
consecrated these to the goddesses sty led The Mothers.
See Broughton, Bibliotheca Historica-Sacra, ii, 145.

Mothering Sunday (or Midlent Sunday), supposed to be the day on which, in popish times, peo-
ple visited the mother-church and made their annual
offering. In more recent times children and servants
in England obtain leave to visit their parents on this
day. This custom, according to some, originated in
this Sunday being the Domsica Refectionis, or Sunday of Refreshment, the gospel for the day being the record
of the miraculous banquet to the five thousand in the
desert. On that day the guests used to eat frumenty,
consisting of whole grains of wheat, boiled in milk and,
sweetened and spiced.

Motive, that which moves, excites, or invites the mind
to volition. It may be one thing singly, or many
things together. The agent may act for motives
by which we pursue good and avoid evil. Aristotle de-
fines motive thus: "The deliberate preference by which
we are moved to act, and not the object for the sake
of which we act, is the principle of action; and desire
and reason, which is for the sake of something, is the origin
of deliberation as preference.

Kremer, p. 42. Kremer
distinguishes between the subjective principle of appre-
tition, which he calls the mobile or spring (die Trieb-
feder), and the objective principle of the will, which he
calls motive or determining reason (Beweggrund); hence
the difference between subjunctive ends, to which we are
pushed by natural disposition, and objective ends, which
are common to us with all beings endowed with reason
(Wil, Hist. de la Philosophie, Allemagne, i, 857).

This seems to be the difference expressed in French
between mobile and motive. "A motive is an agent so operating
upon the mind as to produce either desire or aversion—
(both which are terms of complex motive) by Dr.
Reid. (Cf. Motive, "The view or apprehension of
the understanding, or perceiving faculty. Nothing can in-
duce or invite the mind to will or act anything any-
thing further than it is perceived, or in some way or other
in the mind's view; for what is wholly unperceived, and
perfectly out of the mind's view, cannot affect the mind
at all. Hence it has been common to distinguish mo-
tives as external or objective, and as internal or subjective.
Regarded objectively, motives are those external objects
or circumstances which, when contemplated, give rise
to views or feelings which prompt or influence the will.
Regarded subjectively, motives are the views or feelings
which arise on the contemplation of exter-
nal objects or circumstances. In common language, the
term motive is applied indiscriminately to the external
object and to the state of mind to which the apprehen-
sion or contemplation of it may give rise. The expla-
nation of his motives, as we have seen, is the chief task
of the biographer. In these cases the term motive is strictly applicable to the
terminating state or affection of mind which immedi-
ately precedes the volition or determination to act.
To the question, therefore, whether motive means some-
thing in the mind or out of it, it is replied that what
moves the will is something in the mind and affection
of mind. The state of mind may have reference to some-
thing out of the mind. But what is out of the mind
must be apprehended or contemplated—must be brought
within the view of the mind, before it can in any way
affect it. It is only in a secondary or remote sense,
therefore, that external objects or circumstances can
be called motives, or be said to move the will. Motives
are, strictly speaking, subjective—as they are internal
states or affections of mind in the agent. Motives may
be called subjective, not only in contradistinction to the
external objects and circumstances which may be the occasion of them, but also in regard to the different effect which the same objects and circumstances may have on different individuals, or even on the same individual, at different times. A man of slow and narrow intellect is unable to perceive the value or importance of an object when presented to him, or the propriety and advantage of a course of conduct that may be pointed out to him, so clearly or so quickly as a man of large and generous intellect. The consequence will be, that, with the same motives (objectively considered) presented to them, the one may remain indifferent and indolent in reference to the advantage held out, while the other will at once apprehend and pursue it. A man of cold and dull affections will contemplate a spectacle of pain or want with a feeling and a conjecture to relieve it; while he whose sensibilities are more acute and lively will instantly be moved to the most active and generous efforts. An injury done to one man will rouse him at once to a frenzy of indignation, which will prompt him to the most extravagant measures of retaliation or revenge; while in another man it will only give rise to a moderate feeling of resentment. An action which will be contemplated with horror by a man of tender conscience will be done without compunction by him whose moral sense has not been sufficiently exercised to discover between good and evil. In short, anything exterior to the individual will be modified in its action, according to the constitution and training of the different minds within the view of which it may be brought. Not only may the same objects differently affect different minds, but also the same minds, at different times, or under different circumstances. He who is suffering the pain of hunger may be tempted to steal in order to satisfy his hunger, but he who has bread enough and to spare is under no such temptation. A sum of money which might be sufficient to bribe one man would be no trial to the honesty of another. Under the impulse of any violent passion, considerations of prudence and propriety have not the same weight as in calmer moments. The young are not so cautious, in circumstances of danger and difficulty, as those who have attained to greater age and experience. Objects appear to us in very different colors in health and in sickness, in prosperity and in adversity, in society and in solitude, in prospect and in possession. It would thus appear that motives and viciosities, as well as facts, in their influence individu- al, and in their issue variable.

There are two points which render this interesting topic of metaphysical philosophy or psychology also an important one in theology. See WILL.

1. The Extent to which Motives control Volition.—On this point there are essentially two theories. (a) That the will itself determines the force or prevalence of the motives. This is not done by any previous volution, but in the act of choosing among the various motives, i.e. in selecting between the different courses to which these motives prompt. This is the only theory that leaves the will absolutely free, and fully vindicates a moral character. For Cicero has long since observed that "if the things which move the will are not in our own power, then neither our actions nor our volitions are free, and there is no room for praise or blame." See LIBERTY. (b) That the motives control the will, so as to produce volitions according to their relative forces. This is argued, either (1) on the materialistic (i.e. physical or mechanical) ground alleged by Hobbes, Collins, and others, that there is a natural law regulating erringness and necessarily these processes, external and oftentimes independent of the subject himself; or (2) on the theory of a moral necessity, assumed by Edwards and his followers, whereby the actual mental condition of the subject (i.e. his desires, etc.) dictates the direction of the volitions. On the other hand, consciousness, no less than Scripture (e.g. especially Rom. vii. 15-29), most unequivocally declares that we are capa- ble of selecting a course contrary to our most urgent inclinations, and conscience pronounces us guilty because we suffer our evil passions to overcome our will. Did not our judgment (other than an affected consciousness or a moral sense) thus step in to cast a weight into the scale, and, moreover, were not the prevenient grace of God ever ready to aid us "both to will and to do" what is right, it might indeed remain doubtful whether the will of fallen creatures at least could freely determine in the absence of violent emotion or habitual predilec- tion. See ISJLABILITY.

The phrase "the strongest motive" contains an ambiguous which has led to great confusion in this controversy. For those who use it merely mean those inducements which are usually most efficacious in moving men, then it is irrelevant to the present issue, because some persons at all times, and all persons at some times, are proof against those influences which are most sure to incite other individuals or under other circumstances. So provably is this the case that human conduct is of all things the most uncertain to predict in particular cases. If, on the other hand, as is more exact, the phrase is employed to designate those considerations which are so peculiarly adapted to the mental state of the person at the time as to effect an inclination of the will accordingly, then there still remains this fallacy in the expression, namely, that the strength of the motives really depends upon the moral condition of the subject himself, as the condition (indeed a preponderating) element. Hence we term persons "obeisant," "stubborn," "headstrong," "self- willed," etc., or the reverse. See Volutio.

2. The doctrine that "the character of the motives deter- mines the moral quality of an act" would be more correctly stated thus: "The purpose of the actor determines his moral character in any given case." There is hardly any specific act (unless perhaps we except idolatry) which may not be praiseworthy performed under certain circumstances and for right ends. Thus homicide may be murder or execution in altered cases; sexual connection is the legitimate privilege of matri- mony or the illicit indulgence of licentiousness; the use of the name of God may be either a lawful oath, or de- vout prayer, or profanity, according to the intent of the invocation. Nor is this axiom tantamount to the maxim condemned in Scripture (Rom. iii. 8), and justly scouted under the popular name of "Jesus the Great and just." Not only the end in view, but all the means employed to accomplish that end, must be tested with the same scrupulous care by a comparison with the identical standard of rectitude, the revealed will of God, by which alone the moral quality of the motive of him who seeks to effect the one or make use of the other is justly and accurately determined. Thus while the intention of the party acting vindicates or condemns him in the act, the propriety of the act itself is to be tried by a more unerring external tribunal. Hence also a crime or good act meant, but (through unavoidable hindrance) not executed, is, in the eye of divine justice, accounted as guilt or virtue (Matt. x. 28; 2 Cor. iii. 12; 1 John iii. 15). See MORALS.

Mott, William F., an American philanthropist of some note, was born in New York City in 1818. Mr. Mott commenced life with moderate means, but, being honest and of frugal habits, amassed an ample fortune, which he spent for the relief of the poor and needy. He made large contributions to the various institutions of his native place; among them, to the City Dispen- sary, the House of Refuge, the Colored Orphan Asy- lum, and Woman's Hospital. He was an active mem- ber of the Society of Friends. He died in New York in 1867.
MOTZER, Daniel, a Presbyterian minister, was born in Perry County, Pa., Aug. 16, 1817. He graduated at Jefferson College, Pa.; studied theology in the Western Seminary, Alleghany, Pa.; was licensed by Carlisle Presbytery in 1848, and in 1849 was ordained and installed pastor of the church at Cold Spring, N. J. He subsequently served the churches of Madison and Adams's Mill, Muskingum County, Ohio, and near Warren, Fauquier County, Va., and lastly the Nealsville and Darnestown churches, in Montgomery County, Md. He died Nov. 1, 1864. Mr. Motzer was a scriptural and edifying preacher, an untiring and affectionate pastor, and a kind and true friend. He felt a deep interest in the mental and religious training of the young, and the interests of the parochial school were very dear to his heart. See Wilson, Prof. Hist. Almanac, 1866, p. 181.

Moulding, a general term applied to all the varieties of outline or contour given to the angles of the various subordinate parts and features of buildings, whether projections or cavities, such as cornices, capitals, bases, door and window jambs and heads, etc. The regular mouldings of Classical architecture are, the Fillis; or List; the Astrogal, or bead; the Cyma recta, or cyma; the Cyma reversa, or cyma recta; the Cuvette; the Ovolo; the Scotia, or trochilus; and the Torus: each of these admits of some variety of form, and there is considerable difference in the manner of working them between the Greeks and Romans. (See those terms.)

The mouldings in classical architecture are frequently enriched by being cut into leaves, eggs, and tongues, or other ornaments, and sometimes the larger members have running patterns of honeysuckle or other foliage carved on them in low relief; the upper moulding of cornices is occasionally ornamented with a series of projecting lions' heads.

In medieval architecture the diversities in the proportions and arrangements of the mouldings are very great, and it is scarcely possible to do more than point out a few of the leading and most characteristic varieties.

In the Norman style the plain mouldings consist al-

- Binham, Norfolk.

most entirely of rounds and hollows, variously combined, with an admixture of splayes, and a few fillets. The rich mouldings, however, are very various, one of the most marked being the constant recurrence of mouldings broken into zigzag lines, and forming what is called the Zigzag or Chevron moulding: it has not been very clearly ascertained at what period this kind of decoration was first introduced, but it was certainly not till in considerable time after the commencement of the style; when once adopted, it became more common than any other ornament. A series of grotesque heads placed in a hollow moulding, called Frize-heads, with their tongues or beaks lapping over a large bead or torus, was also very common. The Hutch moulding

- Westminster Hall, A.D. 1097.

is also not uncommon, and is found early in the style, as it can be cut conveniently without the aid of a chisel, with the pick only. The other favorite mouldings of the Norman style are the Billet mouldings, both square and round, the Loozage, the Nail-head, the Pellet, the Chair, the Cable, and the Rose, all of which illustrations are here given. There may also be mentioned the Star,
other members, but the rounds and hollows often ran together, as in the Early English style. The enrichments consist of leaves and flowers, either set separately or in running patterns, figures, heads, and animals, all of which are generally involved with greater truth than at any other period; but the ball-flower, which belongs especially to this style, and a variety of the four-leaved flower, are the commonest.

In the Perpendicular style the mouldings are generally flatter and less effective than at an earlier period. One of the most striking characteristics is the prevalence of very large and often shallow hollows; these sometimes occupied so large a space as to leave but little room for any other mouldings: the hollows and round members not frequently unite without any line of separation, but the other members are parted either by quirks or fillets. The most prevalent moulding is the ogee, but rounds, which are often so small as to be only beads, are very abundant; and it is very usual to find two oges in close contact, with the convex sides next each other. There is also an undulating moulding, which is common in the stoups and dripstones, peculiar to the Perpendicular style, especially the latter part of it; and another indicative of the same date, which is concave in the middle and round at each extremity, is occasionally used in door-jambis, etc. In Perpendicular work small fillets are not placed upon larger members, as in Decorated and Early English; spays also are much less frequent. The ornaments used in the mouldings are running patterns of foliage and flowers; detached leaves, flowers, and bunches of foliage; heads, animals, and figures, usually grotesque; shields, and various heraldic and fanciful devices; the large hollow mouldings, when used in arches or the jambs of doors and windows, sometimes contain statues with canopies over them.

Mouldy. The word נוֹרָּא, nikudim (Josh. ix, 6), refers, as Gesenius remarks, rather to crumbs of bread and, instead of, as in our version, “all the bread of their [the Gibeonites] provision was dry and mouldy,” he reads, “all the bread of their travelling provision was dry, and fell down in crumbs.” See BREAD.

Moulin (Lat. Molinnus). Charles du, a celebrated French lawyer, and a convert to Protestantism, was born of a noble family at Paris, in 1500, and studied at the University of Paris and at Poitiers and Orleans. He became advocate of Parliament in 1522. He embraced the Protestant religion, first as a Calvinist, and afterwards became a Lutheran. He was imprisoned at the instigation of the Jesuits, became equally obnoxious to the Calvinists, and ultimately returned to the communion of the Church of Rome. He died in 1566. His works were published in 5 vols. fol. (Paris, 1681); among them are Collatio et unio quattuor evangeliarum, eorum serie et ordine (1596, 4to).

Moulin (Lat. Molinans), Pierre du (1), a French Protestant divine of great note for his opposition to the

MOUNT

Romanists, especially the Jesuits, was born at Buhy, in the Vexin, Oct. 18, 1658. He studied first at the Protestant school in Sedan, and next at the English high school at Sedan. He was then removed, after a four-years' stay, to accept the professorship of philosophy at Leyden. This professorship he held for five or six years, and had several disciples who afterwards became famous; among the rest, Hugo Grotes. He read lectures upon Aristotle, and disciplined his scholars in the art of disputing, of which he made himself so great a master that he was always the scourge and terror of the papists. Scaliger was very much his patron, and when Du Moulin published his Logie at Leyden in 1596 was so gracious as to say of the epistle prefatory, "Nec epistolae non est hujus usus." In the division of property, Scaliger proved himself extremely well skilled, as appears from his book entitled Novitas Papismi, in which he exposes cardinal Perron's ignorance of that language. In 1599 he returned to France, and became minister at Charenton, near Paris, and chaplain to Catherine of Bourbon, the king's sister, and then the wife of Henry of Lorraine. It is generally believed that Catherine's faithfulness to the Protestant cause is due to Du Moulin's influence. On the assassination of Henry IV, Du Moulin charged the guilt of that detestable deed upon the Jesuits, which produced a violent controversy between him and some of that society. Cotton, it is said, then changed sides and vainly struggled to free the Society of Jesus from the imputation which had been generally placed upon it that Revillac had been incited by them and their doctrines to this bloody deed, and finally even published a book in defence of the order. Du Moulin, however, believing the Jesuits guilty, replied in his Anti-Coton, or a Refutation of Father Cotton, wherein is proved that the Jesuits were the real authors of that execrable parricide. In 1615, James I, who had long been in correspondence with Du Moulin by letters, invited him to England; but his Church would not suffer him to go till he had given a form of profession of his congregation that he would return to them at the end of three months. The king received him with great affection; took him to Cambridge at the time of the commencement, where he was honored with a doctor's degree; and at his departure from England presented him with a prebend in the church of Canterbury. On his return to France, Du Moulin had again innumerable disputes with the Jesuits; and when they found that nothing was to be done with him in this way, they made use of others. They tried to bring him over to them by the promise of great rewards; and they attempted more than once his life. He was obliged at last to have a guard. In 1617, when the United Provinces desired the Reformed churches of England, France, and Germany to send some of their ministers to the Synod of Dort, Du Moulin and three others were deputed by the Gallican Church, but were forbidden to go by the king upon pain of death. In 1620, he had an invitation from Leyden to fill the divinity chair, which was vacant, but he refused it. In 1620, when he was preparing to go to the National Synod of the Gallican Church, baron Herbert of Cherbury, then ambassador from Britain at the court of France, asked him to write to king James, and to urge him, if possible, to undertake the defence of his son-in-law, the king of Bohemia. Du Moulin declined the office; but the ambassador, knowing his interest with James, would not admit of any excuse. This brought him into trouble, for it was soon after decreed by an order of Parliament that he should be seized and imprisoned, for having solicited a foreign prince to take up arms for the Protestant church of the Augsburgs of this, he secretly betook himself to the ambassador Herbert, who, suspecting that his letters to the king were intercepted, advised him to fly, as the only means of providing for his safety. Du Moulin finally went to Sedan, and there accepted the divinity professorship and the ministry of the Church, both of which he held till the time of his death, which occurred March 10, 1658. In 1628, when cardinal Perron's book was published against king James, Du Moulin took a journey into England, and at the king's instance answered it in a work published at Sedan, after the death of James, under the title of Novitas Papismi, eine Perronis confutatio, regiae Jacobi, sed majis sacra veritatis defensor. A list of Du Moulin's works, to the number of seventy-five, is given by Aymon (Symblices de France, ii, 273). He also published many of his sermons. He was a violent opponent of Arminianism, and attacked Amyraldus (q. v.) bitterly in his De Moses Amyraldi Libro judiciis. His most important works are, The Buckler of the Faith, or a Defence of the Confession of the Reformed Churches in France against M. Arnaud, the Jesuit (3d ed. Lundii, 1631, 4to)—Le Combat des 2 arbres (Sedan 1656, 42mo). See Nicholls, Calvinism and Arminianism compared, i, 224; Bates, Vice, p. 897 sqq.; Sax, Oecumen. Icon, iv, 179; Haag, La France Protestante, iv, 420; Schweitzer, Centralbibliographien, ii, 225 sq., 564 sq.; Ebrard, Dogmatik, ii, 48; Vinet, Histoire de la Présic. parmi les Réformés en France au 17e siècle (Paris 1860).

MOULIN, Pierre du (2), son of the preceding, and noted as a most enthusiastic Calvinist, was born in 1600 at Paris, and graduated at Leyden; but going afterwards to England, obtained, like his father, a prebend at Canterbury, and was one of the chaplains to king Charles I. He was the author of The Peace of the Soul:—Clamor Regis Sanguinis, which, being anonymous, was attributed by Milton to Alexander More:—and A Defence of the Protestant Church. See Allibone, Dict. of Brit. and Amer. Authors, n. s.; Haag, La France Protestante, iv, 480.

MOULI.

See MULLAI.

Mound (Lat. manda) is a term in heraldry, designating a globe surmounted with a cross (generally) pattered. As a device, it is said to have been used by the emperor Justinian, and to have been intended to represent the ascendency of Christiani wheel over the world. The royal crown of England is surmounted by a mound, which first appears on the seal of William the Conqueror, though the globe without the cross was used earlier.

Heraldic Mound.

Mount or Mountain (properly מֵרָה, from its swelling form; with its cognate forms, מֵרָה, k'rer, and מֵרָה, karas; Gr. ἑράς; also Chald. תַּר, from their rocky nature, Dan. ii, 35, 45: but מְלַכְּל, selaẖ, "mount," Jer. vi, 6; xxxii, 92; xxxiii, 4; Ezek. iv, 2; xviii, 17; xxi, 22; xxvi, 8; Dan. x, 15; elsewhere "bank," 2 Sam. xx, 15; 2 Kings xix, 82; Isa. xxxvii, 88, is a mound or rampart, such as is thrown up by besiegers against a city; and מִשְׁרָב, mutab, "mount," in Isa. xxix, 3, is a station of troops or military post, as a place of bivouacking or encamping. W. A. K. — "In the New Testament the word mountain or mountain is confined almost exclusively to representing ἑρᾶς. In the Apocalypse the same usage prevails as in the N. T., the exception being in 1 Mac. xii, 36, where 'mountis' is put for ἑρᾶς, probably a mound, as we should say, an encampment, by which Simon cut off the communication between the citadel on the Temple mount and the town of Jerusalem. For this Josephus [Ant. xliii, 5, 11] has τὸ ἱερό, a wall [Smith]. See Fortification. Another term, designating an individual mountain, is מִשְׁרָב, bameẖ, a height or "high place;" generally a lesser eminence, like מֵרָה, gibb, a "hill," etc.). The term often occurs in connection with a proper name, or as the specific title of some particular mountain, e. g. Mount Sinai, Mount Tabor, Mount Lebanon,
Mount of Olives, etc., which see in their alphabetical order. The phrase "mountain of God" (יוֹם הַגֵּדֶשׁ) is spoken of Mount Sinai, as the place where the law was given (Exod. ii. 1; iv. 27; xviii. 6); of Mount Zion (Psa. xxxvii. 27; Is. xlii. 5), which is often called God's "mountains" (יוֹם הַגֵּדֶשׁ קָרֵב, "mountain of my sanctuary") (Isa. ix. 6; lv. 7; vii. 15; iii. 14; ii. 4; xlix. 1; xlvi. 14). See Adon. 16; Ezek. xxv. 40, more fully "mountain of the Lord's house" (Isa. ii. 2), of the mountain of God (Isa. ix. iv. 19, xlviii. 18), as being in the middle of the Land itself, as being generally mountainous (Isa. xiv. 25; xlix. 11; lxv. 9). See Zech. De deo Ebraorum montano (Gen. 476). The term is also used collectively, "mountains," i. q. mountainous region, e.g. of Seir (Josh. xiv. 12), of Judah (Josh. xv. 48), etc., and especially with the art. the "mountain, the mountain's rock," the highest mountain tract extending nearly through Palestine, between the plain on the sea-coast and the valley of the Jordan (Gen. xii. 8; Josh. ix. 1); or more specifically the "mountains of Judah," i.e. the same tract south of Jerusalem (Numb. xxvii. 29; Deut. i. 2); the "hill-country" of Luke i. 39; also the mountainous region east of the Dead Sea (xxxiv. 20, xlix. 17, 19, 20). See Macfarlane, Mountains of the Bible (Lond. 1848, 1856). See HILL.

Palestine is a hilly country (Deut. iii. 25; xi. 11; Ezek. xxxiv. 13; comp. Exod. xv. 17; 1 Kings xx. 23; see Hasselquist, Trav. p. 148), divided into two natural portions by the deep depression of the Jordan from north to south. The mountain ranges which overspread it are connected on the north with Lebanon. East of the Jordan, Antilebanon terminates with the spur called Jebel Heish, a fruitful hilly district extending westward thence to the abrupt margin of the Sea of Genesareth; while south of the intersection of the country from east to west by the river Hieromax the hills rear themselves afresh for several leagues, being traversed by wadys (water-courses) which run towards the Jordan, and interrupted by ravines and narrow passes, and continue in the form of moderately high, fertile plateaus, that do not clearly descend to a level till they reach the River Arnon, the boundary of the ancient transjordanic territory; southward of the deep, rocky vale of this stream, which was the key of Palestine in this region from the east, they still stretch away in connection with the mountains of Arabia Petraea, this entire chain sloping eastward, first into the fruitful meadows of the modern Hauran, and then south of the River Arnon turning eastward by rocky steeps along the Jordan (Voyney, Trav. i. 226). West of the Jordan, a mountainous region extends from Lebanon and Antilebanon far down south-westwardly into Galilee, where in the south-west, opposite Ptolemais, it ends in a ridge, terminating beyond the Ki- shin in the promontory of Carmel; while in the interior among the highlands it forms the high plain of Jezreel, and on the east descends by a series of terraces to the Sea of Genesareth: this portion contains its most fruitful districts, endowed with a rich Alpine vegetation, for although the northern and north-western parts are mostly inclement, and their cultivation almost impossible, especially in the rocky tracts, yet the south-western section is an alternation of fine valleys and choice pasture-lands (Hasselquist, p. 176). From the elevated plain of Jezreel, or Esdraelon, rises the almost isolated peak of Tabor, as a limit of the northern mountain-chain on this side, and looking southwardly to the Anti-Taabariyeh hills, which, in moderate heights and in directions only lately accurately investigated by Robinson, overspread the greater part of ancient Samaria; beyond this growing more precipitous and rocky (Maundrell, Trav. p. 86; Voyney, Trav. ii. 225 sq.), although they are everywhere interpersed with fruitful valleys and plains. The mount-
tain ranges, which only admit communication with the sea-side by means of the intersecting passes and ravines, extend over seven or ten miles north of Jerusalem, and cover the greater part of this division of Palestine, making the hills becoming higher south of the metropolis. Stretching towards the south-east, they terminate in steep walls near the Dead Sea, and so join the sides of the deep Arabah; but in the south-west they somewhat abruptly bound the (tolerably high) hilly plain el-Tib, which connects Palestine with Arabia Petraea. Over the mountains of middle and southern Palestine nowhere extend to the sea, but gently slope into plains, which grow continually wider farther south; towards the Jordan, however, they fall off ruggedly into the Ghor (Voyney, Trav. i. 226), only at Jericho leaving a hilly brink. Their greatest perpendicular distance from east to west is nowhere more than ten to fifteen miles, and in the vicinity of Hebron scarcely more than seven miles (Voyney, Trav. ii. 243). The principal composition of all the Palestinian hills is limestone (of the Jura formation), occasionally with strata of chalk (whence the numerous caves), and, as is a frequent accompaniment of this latter, the hilly levels, especially in the east, are strewed with flint stones (see Schubert, Reise, iii. 108). Only in the north-east, from the boundaries of the Lebanon formation to the Hieromax, extends a basaltic region (Seezten, xviii. 385), which has scattered its columns and blocks far as the western shore of the Sea of Genesareth (comp. Ritter, Erdk. ii. 315; Richter, Wallfahrt, p. 60; Schubert, Reise, ii. 222, 237, 260). At the southern extremity of the Dead Sea a salt-mountain uplifts itself, about three leagues in ex-
tent. The height of the mountains of Palestine is not great (Hasselquist, Trav. p. 148), but has only been measured by the barometer. The southern hills rise to a perpendicular elevation of about 2400 feet, and run at this elevation as far northward as Shechem; above these, they sink to about 1750 feet, and grow still more insignif-
icaent towards the plain of Jezreel. Northward of this, the land of Galilee becomes again more lofty, es-
pecially in comparison with the Sea of Genesareth, which lies 555 feet below the level of the Mediterranean (Schubert, iii. 231). The altitude of Lebanon is estimated at 10,000 feet. The mountains of Gilead are higher than the cisjordanic, being about 3000 to 4000 feet in height. (See Raumer, Beiträge z. b. bild. Geogr. p. 12 sq.; Rantzel, Palest. p. 840.) For particular hills, see CARMEL; EPHRAIM; LEBANON; OLIVET; TAB-
ror, etc. The mountainous regions of Palestine not only served the inhabitants as places of defence against hostile incursions and of refuge from oppressive masters, but the hills by careful cultivation and terracing nearly yielded the soil four or five times as much as the plains. See Cant. viii. 14; Jer. xxxi. 5; 2 Chron. xxxvi. 10; Ezek. xxxiv. 14; Job iii. 18, etc.; although quarries were but seldom opened in them for building-stone, and as it seems never mined for the supply of metals. See Pa-
lestine.

The frequent occurrence throughout the Scriptures of personification of the natural features of the country is very remarkable. With perhaps four exceptions, all these terms are used in our own language; but, in ad-
dition, we speak of the "crown," the "pent," the "foot," the "toe," and the "breast" or "bosom" of a mountain or hill. "Top" is perhaps only a corruption of topf, "head." Similarly we speak of the "mouth" and the "gorge" (i.e. the "throat" of a ravine, and a "tongue" of land. Compare, too, the word col, "neck," in French. The following are, it is believed, all the words used with this object in relation to mountains or hills:

1. Head, wāן, rosh, Gen. viii. 5; Exod. xix. 19; Deut. xxxii. 1; 1 Kings xviii. 42 (A.V. "top").
2. Ears, ṣīḥa, ṣīḥah in Azmuth-Tabor, Josh. xiv. 94; possibly in allusion to some projection on the top
of the mountain. The same word is perhaps found in Uzzen-Sheerah.

3. SHOULDER, נַחֲלָה, nakhlah, in Deut. xxiii, 12; Josh. xv, 8, and xviii, 16 ("side"); all referring to the hills on or among which Jerusalem is placed. Josh. xv, 10: "the side of Mount Jerim.

4. LION, נַחֲלָה, nakhlah, (see the word for the "side") of a man in 2 Sam. ix, 16; Ezek. iv, 4, etc.), used in reference to a mountain in 1 Sam. xxvi, 26; 2 Sam. xiii, 34.

5. LOINS or FLANKS, נַחֲלָה, nakhlah, in Chisloth-Tabor, Josh. xix, 12. It occurs also in the name of a village, probably situated on this part of the mountain, Hak-Keuelloth, הָקָהֵלֵלות, i.e. the "loins" (Josh. xix, 18). See CHELSULLOTH.

6. RIN, נַחֲלָה, nakhlah, only once used, in speaking of the Mount of Olives, 2 Sam. xvi, 18, and there translated "side," i.e. πλευράς τοῦ ὀροῦ.

7. BACK, זָבָה, zavah, probably the root of the name of the town Shechem, which may be derived from its situation, as it were on the back of Jerizim.

8. THIGH, נַחֲלָה, nakhlah, (see the word for the "thigh") of a man in Judg. iii, 16, 21), applied to Mount Ephraim, Eh, 2 Kings xiii, 23; Isa. xxxviii, 24, used also for the "side" of a cave, 1 Sam. xxiv, 3.

9. The word translated "covert" in 1 Sam. xxv, 20 is נַחֲלָה, nakhlah, from נַפֶּר, nafar, "to hide," and probably refers to the shrubbery or thicket through which Abigail's path lay. In this passage "hill" should be "mountain."

The Chaldee נַחֲלָה, nakhlah, is the same name still given to the Mount of Olives, the Jebel el-Tur.

See APPENDIX TO professor Stanley's Siani and Palestin., p. 23, also p. 249 and 388, note. See TARGUM.

In the symbolical language of Scripture, if the allegorical or figurative representation is taken from the heavens, the luminaries denote the governing body; if from an animal, the head or horns; if from the earth, a mountain or fortress—and in this case the capital city or residence of the governor is taken for the supreme power. (See WENMYS, Clark's Symbolica, p. 309-316.) When David says, "Lord, by thy favor thou hast made my mountain fort," Sam. xxx, 7, he means to express a sense of stability of his kingdom. The present king of the Messiah is described under the figure of a mountain (Isa. ii, 2: xi, 9; Dan. ii, 35), and its universality by its being the resort of all nations, and by its filling the whole earth. The mystic mountains in the Apocalypse denote kingdoms and states subverted to make room for the Messiah's kingdom (Rev. vi, 14; xvi, 20; comp. Ps. xlvii, 2). The Chaldaean monarchy is described as a mountain in Jer. ii, 25; Zech. iv, 7; and the Targum illustrates the idea by substituting the word "fortress" in the former text. In this view, then, a mountain is the symbol of a kingdom, or of a capital city with its domains, or of a king, which is the same. Mountains are frequently used to signify places of strength, of what kind soever, and to whatsoever use applied (Jer. iii, 23). Eminences were very commonly chosen for the sites of pagan temples: these became places of asylum, and were looked upon as the fortresses and defenders of the worshippers, by reason of the presence of the false deities in them. On this account mountains were the strongholds of paganism, and therefore in several parts of Scripture they signify idolatrous temples and places of worship (Jer. iii, 23; Ezek. vi, 2-6; Mic. iv, 1; comp. Deut. xii, 2; Jer. ii, 30-33; 3; Theseus also, who built fortified cities, or towers, as appears from Judg. ix, 16; xlviii, 49. (See Genesis, Comment. on Job, i, 816 sq.; Gramberg, Die Religionswesen der A. T. pref., p. xv sq.) See HIGH PLACE. For the various eminences or mountain districts to which the word "mount" is applied in the text, see Mount Sion, Mount Sion, Mount Sion, Mount Sion, Mount Sion, Mount of the Valley, Mount of the Valley, Mount of the Valley, Mount of the Valley, etc., distinguished, for his knowledge of primitive Christianity, was born at Dorney, Buckinghamshire, April 13, 1578, and was educated at Eton and at King's College, Cambridge University, of which he was afterwards a fellow. He took holy orders, and quickly rose to distinction. In 1617 he was made archdeacon of Hereford, in 1620 canon of Windsor, and in 1628 was elevated to the episcopate and made bishop of Chichester. In 1638 he was transferred to the see of Norwich. He was an ardent friend of archbishop Laud, and thus was led to write against the Puritans, and to defend the cause of the king and his sacred tole.
ion. He therefore became a favorite at court, and the transfer to Norwich is said to have been prompted by Laud, who wished to acknowledge the valuable services of the Savile family, by which the Savile was not only an opponent to Puritanism, but a leader towards Romanism; and it was even asserted by the moderate churchmen who opposed Laud's course that Montague was intending to carry the king, his court and his primate, bodily over to Rome, and to go there himself. He was also a devoted Arminianist, and thus the Calvinists likewise upheld him, and left no opportunity unimproved against him. He died at Norwich, April 15, 1641. Bishop Montague's literary labors are valuable, especially in the field of ecclesiastical antiquities. He assisted Savile in his edition of St. Chrysostom; edited Greville Tanworth's British Taverns of the Middle Ages, etc., also Photi Epistola, and Eusebius Demonstratio, and published several learned theological works and controversial tracts. Among the former are, Analecta Ecclesiasticarum Erecitationum (London. 1622.)—Apparatus ad Origines Ecclesiasticas (Oxf. 1635, fol.).—De Originalis Ecclesiasticarum, etc. (London. 1626, fol. 1641).—De Vita Christi (Origimen Ecclesiasticarum, pars posterior (1640):—The Acts and Monuments of the Church before Christ Incarnate (1642, fol.)—contains: State of the Church before Christ Incarnate; The Prophecies of Jacob and Daniel concerning Messiah; the Sibylls; Reign of Herod in Judaea; two Eulogies of John. In the Society of the High-priesthood; State of the Jews in Spirituals; their Heroes; the Ancestors and Parents of our Saviour. In 1841, 12mo, appeared bishop Montague's Articles of Inquiry, with a Memoir (q.v.). See Gen. Dict. s.v. Bible, Brt. s.v.; Fuller's Worthies and his Church Hist. s.v.; Heylin, Life of Archbishop Laud s.v.; Hakewill, History of James Somers s.v.; Hallam, Const. Hist. of Eng. (7th ed. 1845), ii, 62, 69, 70; Collier, Eccles. Hist. viii, 7 sq. (J. H. W.)

Mountain. See MOUNT.

Mountain, George Jehoshaphat, a noted American ecclesiastic, son of the following, was born in Norwich, England, July 27, 1759, and was educated at Trinity College, Cambridge, where he graduated in 1810. He entered holy orders in 1818, and was appointed evening lecturer in his father's cathedral. In 1814 he was nominated rector of Fredericton, New Brunswick, and in 1817 rector of Quebec and bishop's official. In 1821 he became archdeacon, and in 1825, during a mission to England, he received the degree of D.D. On his return, bishop Stuward appointed him his examining chaplain, and in 1830 he was sent to England on business connected with the question of giving the clergy reserves. While there he was appointed bishop of Montreal, and given the entire charge of the Episcopal Church in Lower Canada. He continued to administer the dioceses of Quebec and Montreal till 1830, when he assumed the title of bishop of Quebec. In 1844 he visited the missions on the Red River, and furnished a description of his journeys in Songs of the Wilderness (London 1846). He died in Quebec, Jan. 8, 1883. He was the founder of Bishop's College, Lennoxville, and of the Church Society, spending most of his income for these institutions and for charitable purposes. Some time before his death he declined the dignity of metropolitan of Canada. He published Sermons and Addresses, and a Journal of a North-west American Mission (London 1848). See Am. Church Rev. 1866, p. 156.

Mountain, Jacob, an Anglican prelate, was born in Norfolk, England, in 1750. He was a descendant of the celebrated Montaigne; his own grandfather was a great-grandson of the French essayist, and was exiled from France during the Revolution of the Edicts of Nantes. Mountain was educated at Causs College, Cambridge, class of 1774, became fellow in 1779, and, entering holy orders, held important livings in England, among them those of St. Andrew's, Norwich, of Buckden, and of Holbeach, as well as a stall in Lincoln Cathedr. Mr. Pitt was intimately acquainted with him, and that statesman interested himself in the ecclesiastical promotion of his friend, so that in 1786 Mr. Mountain was named bishop of Quebec. He is the first Protestant prelate in the Canadas. He died near Quebec, June 16, 1825. "Bishop Mountain promoted the formation of missions and the erection of churches in all the more populous towns, which he regularly visited—even when age and infirmity rendered so vast and fatiguing a circuit a most arduous and painful undertaking."

Mountain-Men. See Men, The; Scotland, Church of.

Mourges, Mathieu. See MOURGUES.

Mourguès, Michel, a French Jesuit noted for his profound erudition, was born at Avurgenne about 1642. He became royal professor of mathematics and rhetoric in the Academy of Toulouse, and died there in 1718. Among his best works are, "A Parallel between Christian Morality and that of the Ancient Philosophers."—A Explanation of the Theology of the Pythagoreans; and others of a secular character. See Feller, Dict. historique, s.v.; Moréris, Grand Dict. Hist. s.v.

Mourn (represented by numerous Heb. and several Gr. words). Orientals are much more demonstrative in the signs of grief than natives of Western countries, as is evidenced especially by two marked features: a. What men in large numbers publicly did, they careful observance of the prescribed ceremonies. Thus Abraham, after the death of Sarah, came, as it were in state, to mourn and weep for her (Gen. xxiii, 2). Job, after his misfortunes, "arose, and rent his mantle, and shaved his head, and fell down upon the ground on the earth three times" (Job 42, 6). Job, after his misfortunes, "rent every one his mantle, and sprinkled dust upon their heads, and sat down with him on the ground seven days and seven nights" without speaking (ii, 18). We read also of high places, streets, and house-tops as places especially chosen for mourning; not only by Jews, but by other nations (Isa. xv, 2; Jer. iii, 21; xlviii, 8; 1 Sam. xi, 4; xxx, 4; 2 Sam. xvi, 8). The comparative violence of Oriental mourning—oftentimes, indeed, assumed for effect, and even at times artificial or venal, is evident in several of the forms which Eastern grief assumes. Many of these acts, of course, as being natural, are common to all times and to other nations, but other forms are peculiar. Most of them are spontaneous, being simply the uncontrollable language of emotion; others are purely matters of habit. Yet both these classes of manifestation have their significance and uses, and are not therefore altogether arbitrary. It is not difficult, however, to ascertain the philosophic spirit in which those practices contrived that it consisted in reeling as much as possible from ordinary customs and manners, in token that an extraordinary event had happened, and observes that such is the diversity of human customs that the signs of mourning in some nations coincide with those of joy in others (Archaeologia Graec (London 1786) ii, 184, 185. Although, no doubt, many forms of mourning are conventional, and originated in caprice, yet there would seem to be physical reasons for certain forms which have so widely and permanently prevailed. We will endeavor to digest the information furnished on this subject by the Scriptures, and consider it well to modern writers referred to other articles for details on minor or collateral particulars. See Geier, De Ebraeorum Luctu (2d ed. Lips. 1666). Comp. Grief.

1. Occasions.—1. Instances of mourning for the dead are most numerous in Scripture. Abraham mourned for Sarah (Gen. xxiii, 2); Jacob for Rachel (Gen. xxx, 35); the Egyptians for Jacob (Gen. l, 3-10); the house of Israel for Aaron (Num. xx, 29), for Moses (Deut. xxxiv, 8), and for Samuel (1 Sam. xx, 1); David for Abner (2 Sam. iii, 35); Mary and Martha for their brother Lazarus (John xi); and "devout men"
2. Instances of mourning on account of calamities are mentioned in the Old Testament, under the multiplicity of afflications (Job i, 20; 21; ii. 8; Israel under the threatening of the divine displeasure (Exod. xxxiii, 4); the Ninevites in view of menaced destruction (Jonah iii, 5); the tribes of Israel when defeated by Benjamin (Judg. xx, 26), and many others. The Lamentations of Jeremiah are illustrative of this point.

In the New Testament it is illustrated by the case of the Ninevites added above; by the Israelites on the day of atonement, latterly called the fast (Lev. xxix, 27; Acts xxvi, 9), and under the faithful preaching of Samuel (1 Sam. vii, 6); by many references in the Psalms, and the predicted mourning in Zechariah (Zech. xi, 12). On the mourning for Adonias (Ezek. viii, 14), see TAMMUZ.

2. Modes—1. Weeping appears either as one chief expression of mourning, or as the general name for it. Hence when Deborah, Rebecca's nurse, was buried at Bethel under an oak, the tree was then at least called Allen-burch, the oak of weeping (Gen. xxxvi, 8). The children of Israel were heard to weep by Moses throughout their families, every man in the door of his tent (Num. xi, 10; comp. xiv, 1; xxv, 6). So numerous are the references to tears in the Scriptures as to give the impression that the Orientals had them nearly as common as command (comp. Prov. xxx. 5). The woman washed Lord's feet with her tears (Luke vii, 38; comp. Ecclus. xxxvii, 17). Men, as well as women, wept freely, and even aloud. "Lifted up his voice and wept" is an ordinary mode of expression. Giving vent to them is well known to be one of the physical alleviations of profound sorrow. It is so universal a sign of mourning that we need not detain the reader with further instances or illustrations, except to remark that the Egyptian monuments have not failed to depict the tears upon the faces of mourners. See WEeping.

2. Loud lamentation is usually and naturally associated with weeping as a sign of grief (Ruth i, 9; 1 Sam. ii, 4; 2 Sam. xi, 31; xiii, 36). Nor are Oriental sentiments with mere sobs: their excitation appears in howls for grief, even amid the solemnities of worship (Joel i, 18; Misc. i, 8, etc.). The Egyptians have ever been renowned for the vociferation of their grief; "there was a great cry in Egypt at the death of the first-born" (Exod. x, 28). As their attention from anguish of mind or body, and the value of moans and shrieks is well known in severe surgical operations. But in addition to the wall of woe by the immediate bereaved, hired performers were often engaged to swell the lamentation with screams and noisy lamentations. The first reference to professional mourners occurs in Eccles. xii, 5; "the mourners (םתסובות) go about the streets." (The root of this word, observes Gesenius, signifies "a mournful noise," and he adduces Mic. i, 8; Jer. xxii, 18; xxxiv, 5). They are certainly alluded to in Jer. ix, 17-20: "the mourning women" (probably widows; comp. Ps. lix, 64; 40 Acts ix, 89). Another reference to them occurs 2 Chron. xxiv, 25 (comp. Josephus, War, iii, 9). The mourners who accompanied the hearse were from Egypt were women, as in the modern East. Mourning for the dead in the East was conducted in a tumultuous manner (Mark v, 38). Even devout men made great lamentations (Acts vii, 2). Akin to this usage was the custom for friends or passers-by to join in the lamentations of mourners, and even to shed tears of compassion (John xi, 40; Job ii, 11; xxx, 25; xxvii, 15; Ps. lixxv, 64; Jer. ixx, 1; xxxii, 18; 1 Kings xiv, 13, 18; 1 Chron. vii, 22; 2 Chron. xxxiv, 24, 25; Zech. xii, 11; Luke vii, 12; John xli, 31; Acts vii, 2; ii, 89; Rom. xiii, 15). So also in times of general sorrow we find large numbers of persons joining in passionate expressions of grief (Judg. vii, 4; xx, 26; 1 Sam. xxviii, 8; xxx, 4; 2 Sam. i, 12; Ezra iii, 13; Ezek. vii, 16; and the like is mentioned of the priests—Joel ii, 17; Mal. iii, 18). Clamor in grief is referred to (Isa. xi, 7; xxv, 26): it is considered a wicked man's portion that his widow shall not weep at his death (xxvii, 15). Upon Job's recovery from his afflictions, all his relatives and acquaintances bemoan and comfort him concerning his past sufferings; which seems to have been a kind of congratulatory mourning, indulged in order to heighten the pleasures of prosperity by recalling associations of adversity (xiii, 11). See LAMMmATION.

3. Personal Disfigurement.—In all the other acts expressive of grief the idea of self-mortification seems to prevail, whether by injuries to the person or neglect of it, by mean clothing; by unusual and humiliating attitudes, or other marks of individual abasement, intended chiefly for the public eye. Some of the more violent forms have perhaps a natural, if not a remedial or alleviating character. Shaving the head may be a dictate of nature to relieve the excited brain. Plucking the hair is well calculated to assuage the action of some particular organs, to which the sensations of the individual may be a sufficient guide. Beating the breast may relieve the heart, oppressed with a tumultuous circulation. Cutting may be the effect of nature's indication of bleeding. Tearing and rending seem to pellate nervous irritation, etc. The greater part of the practical measures have the object of some supposed fitness to a state of grief. Among the particular forms observed the following may be mentioned:

a. Rending the clothes (Gen. xxxvii, 29, 34; xliii, 18; 2 Chron. xxxiv, 27; Isa. xxxvi, 22; Jer. xxxvi, 24 [where the absence of the form is to be noted]; xli, 5; 2 Sam. iii, 8; xv, 32; Josh. vii, 6; Joel ii, 18; Ezra ix, 5; 2 Kings v, 7; xii, 14; Matt. xxvi, 65; ἰπάρχων; Mark xxxiv, 63; γρυψίζω). See CLOTHING.

b. Dressing in sackcloth (Gen. xxxvii, 34; 2 Sam. iii, 10; xxi, 16; Psal. xxxvii, 13; Isa. xxxvi, 1; Joel i, 8, 18; Amos viii, 10; Jonah iii, 8, man and beast; Job xvii, 21; Esth. iv, 8, 4; Jer. vi, 26; Lam. ii, 10; 1 Kings xi, 27). See SACKCLOTH.

c. Ashe, dust, or earth sprinkled on the person (2 Sam. xiii, 19; xv, 32; Josh. vii, 6; Esth. iv, 1, 3; Jer. vi, 26; Job ii, 12; xvi, 15; xiii, 6; Isa. lxi, 3; Rev. xxiii, 16). See DUST.

d. Crying aloud, to the sad-colored garments (2 Sam. xvii, 2; Jer. vii, 21; Psal. xxxviii, 6; xliii, 9; xlii, 3; Mal. iii, 14, marg. See COLOR.

e. Removal of ornaments or neglect of person (Deut. xxi, 12, 18; Exod. xxxiii, 4; 2 Sam. xiv, 2; xiv, 24; Ezek. xxi, 16; Dan. x, 3; Matt. vi, 16, 17). See NATURAL ATTRACTIONS.

f. Shaving the head, plucking out the hair of the head or beard (Lev. v, 6; 2 Sam. xiv, 24; Ezr ix, 3; Job i, 20; Jer. vii, 29; xvi, 6). See HAIR.

g. Laying bare some part of the body: Isaiah himself naked and barefoot (Isa. xx, 2), the Egyptian and Ethiopian captions (ib. ver. 4; xliii, 2, 3; Jer. xiii, 22, 26; Nah. iii, 5; Mic. i, 11; Amos vii, 10). See NAKED.

a. Fasting or abstinence in meat and drink (2 Sam. i, 12; iii, 55; xii, 16, 22; 1 Sam. xxxi, 13; Ezra x, 6; Neh. iv, 4; Dan. x, 8; vi, 18; Joel i, 14; i, 12; Ezek. xxiv, 17; Zech. vii, 5; a periodical fast during captivity: 1 Kings xxi, 9, 12; Is. lvii, 3, 4, 6; xxix, 7, 5, 11; Mal. iii, 14; Jer. xxxix, 3; Jonah iii, 5, 7 [of Nineveh]: Judg. xx, 26; 2 Chron. xxx, 8; Ezra viii, 21; Matt. i, 14, 15). See FASTING.

b. In the same direction, diminution in offerings to God, and prohibition to partake in sacrificial food (Lev. vii, 20; Deut. xxxi, 14; Hos. ix, 4; Joel i, 9, 15, 10).

c. Cutting the upper lip, i.e. the lower part of the face, and sometimes the head, in token of silence; specially in the case of the leper (Lev. xiii, 45; 2 Sam. xv, 30; xix, 4; Jer. xiv, 4; Ezek. xxiv, 17; Mic. iii, 7). See CUTTING.

d. Cutting the flesh (Jer. vi, 6, 7; xii, 5). See CUTTING (in the flesh).
MOURN

706

MOURN

The sitting or lying posture in silence indicative of grief (Gen. xxiii, 3; Judg. xx, 26; 2 Sam. xii, 16; xiii, 31; Job i, 20; ii, 13; Ezra ix, 3; Lam. ii, 10; Isa. iii, 26) also bowing down the head (Lam. ii, 10), and lifting up the hands (Psalm xxiii, 2; Lam. i, 17; Ezra ix, 5). See MOURNING.

Some of these outward expressions of mourning were usual among the heathen, but forbidden to the Israelites, e.g. making cuttings in the flesh (Lev. xiv, 28), which seems to have been a custom of the votaries of Baal (1 Kings xviii, 28); “making baldness between the eyes for the dead” (Deut. xiv, 1), i.e. shaving the eyebrows and eyelids, and the fore-part of the head, which was, no doubt, an idolatrous custom. The priests were forbidden to “defile themselves for the dead” by any outward expression of mourning, except for their near relatives (Lev. xxvi, 1); and the high-priest even for these (Lev. xxvi, 10, 11), under which restriction Nazirites also came (Numb. vi, 7).

4. Formal Celebrations.—Besides and in connection with the funeral there were certain still more public usages indicative of grief, as noticed in the Scriptures:

(1) Mournings for the dead in the earliest times was confined to the relatives and friends of the deceased; but in later times hired mourners, both men and women, were employed. Thus we are told that the “singing men and singing women spoke of Josiah in their laments” (2 Chron. xxxv, 25). In accordance with this the Lord says to the Jews, when threatening heavy judgments for their sins—judgments calling for universal mourning: “Call for the mourning women that they may come, ... let them make haste, and take up a wailing for us” (Jer. lx, 17). At first, most probably, hired mourners were called in to help to swell the tide of real sorrow, but afterwards they became a mere formal pageant, demanded by pride and custom rather than sorrow. (See above.) Mourning for the dead became a profession, learned and paid for, like any other; and the practice of it often became very boisterous and tumultuous. Hence we read of the “minstrels and people making a noise” in the house of Jairus (Mark ix, 28), giving one the idea of a scene resembling an “Irish wake.” See MINSTRIL.

(2) On such occasions neighbors and friends provided food for the mourners (2 Sam. iii, 35; Jer. xvi, 7; comp. Ezek. xxiv, 17); this was called “the bread of bitterness” “the cup of consolation.” See Garman, De pane lagritum (Vitsemb, 1798). In later times the Jews had a custom of giving bread to the poor at funerals, and leaving it for their use at tombs, graves, etc., which resembles the Roman viaticum (Tobit iv, 17; Ecles. xxxi, 8). Women went to tombs to indulge their grief (John xi, 31).

There was a period of mourning varied. In the case of Jacob it was seventy days (Gen. i, 3); of Aaron (Num. xx, 29) and Moses (Deut. xxxiv, 8), thirty; a further period of seven days in Jacob’s case (Gen. ii, 10); seven days for Saul, which may have been an abridged period in time of national danger (1 Sam. xxvi, 18).

Exclusive grief in the case of an individual may be noticed in 2 Sam. iii, 16; Jer. xxxii, 15; and the same hypocritically in Jer. xii, 6.

The first complete description of mourning for the dead occurs in 2 Sam. iii, 31–35, where David commands Joab and all the people that were with him to rend their clothes, gird themselves with sackcloth, and m-un for Abner; and David himself followed the bier, and they buried Abner in Hebron; and the king lifted up his voice and wept at the grave of Abner, and all the people wept, and David fasted two days, and wrote a lamentation for the deceased. Elegies were composed by the prophets on several dissatistous occasions (Ezek. xxv, 1; 1 Thess. v, 1; Amos v, 1; etc.). The incident of Jephthah’s daughter is too uncertain to afford any index to the modes of mourning at that era. It appears that she was allowed two months to bewail her virginity with her companions, and that the Jewish women of that country went somewhere yearly to lament, or celebrate her (Judg. xi, 31–40). See JEHU.

III. Illustrations of these Scriptural Usages from Contemporary and Later Sources.—1. Similar practices are noticed in the Apocalyptic books:

a. Weeping, fasting, rendering clothes, sackcloth, ashes or earth on head (1 Mac. ii, 14; iii, 47; iv, 39; v, 14; xi, 71; xiii, 48; 2 Mac. iii, 19; x, 25; xiv, 15; Judith iv, 10, 11; v, 6; ix, 1; xiv, 19 [Assyrians]; x, 2, 3; 8 Mac. iv, 6; 2 Edadr. x, 4; Esth. xiv, 25);

b. Funeral feast with wailing (Bar. vi, 52; also Tob. iv, 17; see in reproof of the practice, Augustine, Civ. D. vii, 27);

c. Period of mourning (Judith viii, 6; Ecles. xxui, 12 [seven days, so also perhaps 2 Edadr. v, 20]; Bel and Dragon, ver. 40);

d. Priests ministering in sackcloth and ashes, the altar drest in sackcloth (Judith iv, 11, 14, 15);

e. Author with clothes rent, head and beard shorn, and bandages (Bar. vi, 51).

2. In Josephus’ writings, these notices are as much noticed in the main confirmed, and in some cases enlarged:

a. Mourning for the dead mentioned (Ant. xvi, 7, 5; xix, 8, 9);

b. Sackcloth and ashes (Ant. xx, 6, 1; xix, 8, 2; War, ii, 12, 5); clothes rent (11, 15, 4).

c. Seven days’ mourning for a father (Ant. xxx, 8; 4: War, ii, 1, 1); for thirty days (War, iii, 5, 9);

d. Those who met a funeral required to join it (Ap. ii, 26; see Luke vii, 12, and Rom. xiii, 15);

e. Flute-players at a funeral (War, iii, 5, 9).

4. The mourning prescribed in the Law was seven days’ mourning for a father, a mother, son, daughter, brother, sister, or wife (Bartenora, on Moad. Kat. iii, 7). Rendering garments is regularly graded according to the degree of relationship. For a father or mother the garment was to be rent, but not with an instrument, so as to show the breach; to be sewn up roughly after thirty days, but never closed. The same for one’s own teacher in the law, but for other relations a palm breadth of the upper garment to suffice, to be sewn up roughly after seven days and fully closed after thirty days (Moad. Kat. iii, 7; Shabb. xiii, 3; Carpozov, App. Bib, p. 650). Friendly mourners were to sit on the ground, not on the bed (see Lightfoot, Hor. Heb. on John xi, 19). On certain days the lamentation was to be only partial (Moad. Kat. c). For a wife there was to be at least one hired mourner and two pipers (Ketebôth, iv, 4).
4. When we turn to heathen writers we find similar usages prevailing among various nations of antiquity. Herodotus, speaking of the Egyptians, says, "When a man of any account dies, all the womankind among his relatives proceed to smear their heads and faces with much fat, and dress themselves in garments of black, and cover the city with their breasts exposed, beating themselves as they go, and in this they are joined by all the women belonging to the family. In like manner the men also meet them from opposite quarters, naked to the waist and beating themselves" (Herod. ii, 85). He also adds, the seven days, as the period of mourning, that the women cover the city with the breasts exposed, beating themselves as they go, and in this they are joined by all the women belonging to the family. In like manner the men also meet them from opposite quarters, naked to the waist and beating themselves" (ibid. 86). This doubtless includes the whole mourning period. Diodorus, speaking of a king's death, mentions rending of garments, suspension of sacrifices, heads smeared with clay, and breasts bare, and says men and women go about in companies of 200 or 300, making a wailing twice a day, στρίβουργα γεράσα. They abstain from flesh, wheat bread, wine, the bath, dainties, and in general all pleasure; do not lie on beds, but lament as for an only child during seventy-two days. On the last day a sort of trial was held of the merits of the deceased, and, according to the verdict pronounced by the assembly, the body was treated with funeral honors, or the contrary (Diod. Sic. i, 72). Similar usages prevailed in the case of private persons (ibid. 91, 92). The Egyptian paintings confirm these accounts as to the exposure of the person, the beating, and the throwing of clay or mud upon the head; and women are represented as likely to be hired mourners (Long. Ep. Aed. i, 154–159; Roman. Aed. i, 59). Herodotus also mentions the Persian custom of rending the garments with wailing, and also cutting off the hair on occasions of death or calamity. The last, he says, was also usual among the Scythians (Herod. ii, 66; viii, 99; ix, 24; iv, 71).

Lucian, in his discourse concerning Greek mourning, speaks of tearing the hair and flesh, and wailing, and beating the breast to the sound of a flute, burial of slaves, horses, and ornaments as likely to be useful to the deceased, and the practice for relatives to endeavor to persuade the parents of the deceased to partake of the funeral-feast (σαρκοφαγεία) by way of recruiting themselves after their three days' fast (De Luctu, i, 808, 305, 307, ed. Amsterdam). Plutarch mentions that the Greeks regarded all mourners as unclean, and that women in mourning cut their hair, but the men let it grow. Of the Romans, in carrying corpses of parents to the grave, the sons, brothers, and female members of the house, the daughters uncover them, contrary to their custom in each case (Quint. Rom. vii, 74, 82, ed. Reiske). Greeks and Romans both made use of hired mourners, praefaces, who accompanied the funeral procession with chants or songs (Horace, Ars Poet. 429). Flowers and perfumes were also thrown on the graves (Ovid, Fast. vi, 660; Trist. v, 147; Plato, Legg. vii, 9). The praefaces seem to be the predecessors of the "mutes" of modern funerals.

5. With the practices above mentioned, modern Oriental customs in great measure agree. D'Arvieux says Arab men are silent in grief, but the women scream, tear their hair, and cover their heads with their dresses. The older women wear a blue veil and an old abaya by way of mourning garments. They also sing the praises of the deceased (Truc. p. 283, 270). Niebuhr says both Mohammedans and Christians in Egypt hire wailing women, and call at stated times (Voy. i, 150). Burchardt says the women of Atharos in Syria, shave their heads on the death of their nearest relatives, a custom prevalent also among several of the peasant tribes of Upper Egypt. In Barby on a death they usually kill a sheep, a cow, or a camel. He also mentions wailing women, and a man in distress beseeching his face, the women, and then beat their breasts, and wail (ibid. 276, 226, 374). Speaking of the Arab tribes of Upper Egypt, he says, "I have seen the female relations of a deceased man dance before his house with sticks and lances in their hands, and behaving like furious soldiers" (Notes on Bed. i, 280). Shaw says of the Arabs of Barbary, after a funeral the female relations during the space of two or three months go once a week to weep over the grave and offer estables (see Esclus. xxx, 18). He also mentions mourning women (Truc. p. 230, 242). "In Yemen," he says, "the relation and female friends of the deceased women, but the females from the neighborhood assemble after a funeral and continue for eight days, from sunrise to sunset, to utter loud lamentations" (Truc. i, 216). In the Arabic Nigha are frequent allusions to similar practices, as rending clothes, throwing dust on the head, cutting off the hair, loud exclamations to the tomb, plucking the hair and beard (i, 65, 253, 297, 388, 518; ii, 237, 354, 409). They also mention ten days and forty days as periods of mourning (i, 427; ii, 409). Sir J. Chardin, speaking of Persia, says the tombs are visited periodically by women ( Voy. vi, 489). He speaks also of the tumult at a death (ibid. 482). Mourning lasts forty days: for eight days a fast is observed, and visits are paid by friends to the bereaved relatives; on the ninth day the men go to the bath, shave the head and beard, and return the visits, but the lamentation continues two or three times a week till the fourth day. The mourning garments are dark-colored, and the women dress in black (ibid. 481). Russell, speaking of the Turks at Aleppo, says, "The instant the death takes place, the women who are in the chamber give the alarm by shrieking as if distracted, and are joined by all the other females in the harem. This conclamation is termed the wulwali (Heb.  הָעֲלוֹת, דָּלָלָיו), an onomatopoetic word common to many languages: see Gesen. p. 506; Schoevel, Anul-CONST. p. 54; and Russell, vol. i, note 83, chiefly from Schultens): it is so shrill as to be heard, especially in the night, at a prodigious distance. The men disapprove of and take no share in it; they drop a few tears, assume a resigned silence, and retire in private. Some of the near female relations, when apprised of what has happened, repair to the house, and the wulwali, which had paused for some time, is renewed upon the entrance of each visitant into the harem" (Arco, i, 906). He also mentions professional mourners, visits to the grave on the third, seventh, and fortieth days, prayers at the tomb, flowers strewn, and food distributed to the poor. At these visits the shriek of wailing is renewed; the chief mourner appeals to the deceased, and reproaches him fondly for his departure. The men make no change in their dress; but the women, with their jewels, and all their ornaments, are in wailing garments, and wear on the head a handkerchief of a dusky color. They usually mourn twelve months for a husband and six for a father (ibid. 311, 312). Of the Jews he says the conclamation is practiced by the women, but hired mourners are seldom called in to assist at the wulwali. Both sexes make some altercation in dress by way of mourning. The women lay aside their jewels, the men make a small rent in their outer vestment (ibid. ii, 86, 87). Lane, speaking of the modern Egyptians, says, "After death the women of the family raise cries of lamentation called welweli or wulwali, uttering it with a loud shrill voice, and it is usual to call the name of the deceased, 'Oh, my master! Oh, my resource! Oh, my misery! Oh, my glory!'" (see Jer. xxii, 18). The females of the neighborhood come to join with them in this conclamation: generally, also, the family send for two or more neddekkas, or public wailing women. Each brings a tambourine, and in her hand a beaded necklace, and she claims, 'Alas, for him.' The female relatives, domestics, and friends, with their hair dishevelled, and sometimes with rent clothes, beating their faces, cry in like manner, 'Alas, for him!' These make no alteration in dress, but women, in some cases, dye their dress, head-veils, and head-garments, and handkerchiefs of a dusky color, and put on the plates of tombs at stated periods" (Med. Ev. III, 192, 171, 195). Wealthy families in Cairo have in the burial-grounds regularly furnished houses of mourning, to which the females repair at stated periods to bewail their dead.
The art of mourning is only to be acquired by long practice, and regular professors of it are usually hired on the occasion of a death by the wealthier classes (Mrs. Poole, Engl. m. in Egypt, ii, 100). Dr. Wolff mentions the waiting over the dead in Abyssinia (A lustrobus, ii, 273). Pietro della Valle remarks a practice among the Jews of burning perfumes at the site of Abraham's tomb at Hebron (see 2 Chron. xvi, 14; xxii, 19; Jer. xxxiv, 5; P. della Valle, Viaggi, i, 806).

The customs of the North American Indians also resemble those which have been described in many particular, as the howling and wailing, and sports which are the accompaniments of the practice of piercing the flesh with arrows or sharp stones, visits to the place of the dead (Carver, Travels, p. 401; Bancroft, Hist. of the United States, ii, 912; Cattin, N. A. Indians, i, 90). The former and present customs of the Welsh, Irish, and Highlanders at funerals may also be cited as similar in several respects, e. g. wailing and howling, watching with the corpse, funeral entertainments ("funeral baked meals"), flowers on the grave, days of visiting the grave (Brand, Pop. Antiq. ii, 128, etc.; Harmen, Obs. iii, 40).

One of the most remarkable instances of traditional customary lamentation is found in the weekly wailing of the Jews, who are known as a people at a spot as at a time as at a place as could be obtained. See Jerusalem. This custom, noticed by St. Jerome, is alluded to by Benjamin of Tudela, and exists to the present day. (Jerome, Ad Sophon. i, 15; Ad Paulum, Ep. xxxix; Early Tract. in Pal. p. 83; Baum, Pulchritudo, p. 230; Martineau, Easter, i, 47; Robinson, i, 267.) See FESTIVAL.

MOURN, CHRISTIAN.—Among the early Christians all immediate grief for the dead was considered inconsistent with Christian hope; and hence the custom which prevailed among the Jews and Romans of hiring women to make lamentation at funerals was severely reproved. There is not, however, the object of the sacrifice of human life, nor any proof that the body of the deceased was revenged by Christians. Strong disapproval of the practice of wearing black is expressed by some of the fathers; nevertheless it became prevalent, especially in the East. Some Christians imitated the heathen custom of repeating the mourning on the third, seventh, and ninth days, and some even added others. In the Apostolic Constitutions, the author takes notice of the repetition of this funeral-office on the third, ninth, and fortieth days; he says: "Let the third day be observed for the dead with psalms and lessons and prayers, because Christ on the third day rose again from the dead; and let the seventh be observed for the health of the living and the dead; and also the fortieth day, according to the ancient manner of the Israelites' mourning for Moses forty days." On the anniversary days of commemorating the dead they were accustomed to make a common feast or entertainment, inviting both clergy and people, but especially the poor, the widows and orphans, that it might not be only a memorial to the dead, but, according to Origen, "an odor of a sweet smell to God." See FUNERAL.

MOURNING-WEEPS, a particular dress worn during a certain period to express grief, especially for the decease of a friend. The usages in this respect have varied much at different times and in different countries. Among the Jews, the duration of mourning for the dead was generally seven, but sometimes protracted to thirty days; and the garments were torn or squalid, or consisted of sackcloth (q. v.). The Jews of our day observe mourning ceremonies to a very considerable extent prescribed by the traditions of the rabbinists. On the loss of a very near relative they seclude themselves from society for eight days, praying all waking hours for the safety of the soul of the departed friend, and every year the day of decease is observed as a day of prayer for the repose of the departed. Among the Greeks, the period was thirty days, except in Sparta, where it was limited to ten. The relatives of the deceased secluded themselves from the public eye, wore a coarse black dress, and in ancient times cut off their hair as a sign of grief. Among the Romans, the color of mourning for both sexes was black or dark blue under the republic; under the empire, the women wore white, black continuing to be the color for men, who did not cut off the hair or wear a black garment. Men wore their mourning only a few days; women a year, when for a husband or parent. The time of mourning was often shortened by a victory or other happy public event, the birth of a child, or the occurrence of a family festival. A public calamity, such as a defeat, or the death of an emperor or person of note, occasioned a public mourning; when a general or a total cessation of business, called Justitium. In modern Europe, the ordinary color for mourning is black; in Turkey, violet; in China, white; in Egypt, yellow; in Ethiopia, brown. It was white in Spain until 1498. White is supposed to denote purity; yellow, that death is the end of all human hopes, as leaves when they fall, and flowers when they fade, become yellow; brown denotes the earth, whither the dead return; black, the privation of life, as being the privation of light; blue expresses the happiness which it is hoped the deceased enjoys; and purple or violet, sorrow on the one side and hope on the other, as being the color of the Temple walls. Mourning is of different depth, and for different periods of time, according to the nearness of relationship of the deceased. On the death of a sovereign or member of the reigning house, a court mourning is ordered; and in many countries it is usual at the same time to recommend the adoption of a general mourning. In Italy, in the case of a bishop, whether solvent or insolvent, the will be entitled to a preferred payment out of the assets for mournings suitable to his rank. The same privilege applies to mournings for such of the children as are to assist at the funeral (Chambers). The propriety of following the customs prevalent on this point has been of late very extensively called in question by Christians. Many individuals and religious bodies have object ed against it: 1. that it is a useless ceremony; 2. that it involves needless expense, especially to the poor; 3. that the Burke of preparing it interferes with the moral and religious purposes of affliction. See GRIEF.

MOURNERS. See FLEETERS; PENITENTS.

MOUSE ("a"p"a", abber), according to Bochart, Hieroz. i, 1017, a compound of the Chald. "a"p"a", to devour, and "a"p, a field, from its ravages; but according to Gesenius, they are, p. 595, from Arabic, for swift esopon. (Aesop), by which name the field or the field-worm (Mina, Mad. Kouton, l, 4)—a species, on account of its voracity and rapid increase, very injurious to crops (Aristotle, Anim. vi, 37; Strabo, iii, 165; Alcian, Anim. vi, 41; Pliny, x, 50; comp. Aristotle, Aleppo, ii, 59)—appears to be designated in 1 Sam. vi, 4 sq. See H. monamon. It was an unclean animal (Lev. xi, 29), in which passage, however, all the species of the genus are an doubtful included (Bochart, Hieroz. ii, 429 sq.). In Isa. lxvi, 7, a different creature seems to be denoted, apparently some esculent species of gits, or dormouse (see Varn, R. ii, 19); or perhaps the leaping wax gits, mus scolus, or jerboa, which is disignated in Arabic by a name corresponding to the Heb. abber, although this animal has often been identified with the Heb. shaphon, or "coney." See also MOLK.

It is likely that the Hebrews extended the acceptation of the word abber in the same manner as was the familiar custom of the Greeks, and still more of the Romans, who included within their term mus insects of the genus sores, that is "shrews"; carnivora, among which was the Musculus erinus, "stoat" or "te- mine," their Mus pousicus; and in the systematic order Rodentia, the mus musculus, or bread mouse; Dipus Jaculus, or Egyptian jerboa; Mus, and mice properly so called, constituting several modern genera; and cricetus, or hamster, which includes
the marmot or Roman *Mus Alpina*. In the above texts, those in I Sam. vi apparently refer to the short-tailed field-mouse, which is still the most destructive animal to the harvests of Syria (see William of Tyre, *Guilaume de Tyre*, p. 823), and is most likely the species noticed in antiquity and during the crusades; for, had they been *Jerboas* in shape and resembled miniature kangaroos, we would expect William of Tyre to have mentioned the peculiar form of the destroyers, which was then known to Western Europe; whereas, they being of species or appearance common to the Latin nations, no particulars were required. But in Leviticus and Isaiah, where the mouse is declared an unclean animal, the species most accessible and likely to invite the appellation of nations who, like the Arabs, were apt to count all sorts of animals, even when expressly forbidden, were no doubt the hamster and the dormouse; and both are still eaten in common with the *Jerboa* by the Bedouins, who are but too often driven to extremity by actual want of food. The common field-rodent, often called the short-tailed field-mouse, is the mascot of the French, and the *Arenivora agrestis* of modern zoologists. It is about the size of the house-mouse, to which it bears a general resemblance, but is easily distinguished by its larger head, its short ears and tail, its stouter form, and its reddish color, no less than by its habits (Fairburm). "Of all the smaller rodentia which are injurious, both in the fields and in the woods, there is not," says Prof. Bell (*Hist. Brit.* Quod. p. 825), "one which produces such extensive destruction as this little animal, when its increase, as is sometimes the case, becomes multitudinose." The ancient writers frequently speak of the great ravages committed by mice. Herodotus (i, 141) describes the loss of Sennacherib's army to mice, which in the night-time gnawed through the bow-string and shield-strap. See generally Bochart, *Hieros*, ii, 448 sq.

**Mouskes**. *Philippus* (called also *Philippus Mus* and *Philippus Muschel*), a Belgian prelate and historian, was born about 1215 at Ghent, in East Flanders, and, after having taken holy orders, successively became canon (1242) and chancellor of the cathedral of Tournay, and in 1274 bishop of that city. He died at Tournay, Dec. 24, 1281 or 1283. *Mouskes* is the author of a rhymeable chronicle, containing in 81,396 French verses the whole history of France, from the elopement of the fabulous Greek Helen with the Trojan prince Paris (the then usual beginning of such a narrative) up to the year A.D. 1242. There is only one MS. of this poem known, and it is at present preserved in the National Library at Paris, marked as No. 9534, small folio, written on parchement in two columns. It was published at Brussels (1836-38, 2 vols. 4to) under the auspices of the baron De Reiffenberg, who enriched the work with an introduction, a commentary, and appendices, all of which show much research and scholarship.—*Hoefr, Nouv. Biog. Générale*, s. v.

**Mouskon, Ecclesiastical Council of (Concilium Mousconense).** Two such were held in the 10th century. The first, held Jan. 18, 948, was composed of Bishop Adalbert of Trèves, archbishop of Trèves, his suffragans, and some other bishops, who, when thus assembled, decreed that *As- taud should keep possession of the see of Rheims*; and that Hugo, who refused to appear at the council, as he had previously refused at Verdun, should be deprived of all of it unless he should appear at the succeeding general council (appointed to be held Aug. 1) and justify himself. See *Conc. Verdun*, 947; *Labbé, Conc. ix, 622*.

Another was held June 2, 955. It was called by Pope John XV, who was opposed at the deposition of Arnamphus and the election of Gerbert (afterwards pope Sylvester II) to the see of Rheims, and therefore sent Leo, abbot of St. Boniface, into France as his legate, who assembled this council. No other prelates, however, attended but the archbishop of Trèves, and the bishops of Verdun, Liege, and Münster, all of them from Germany. The legate took his seat in the midst of them, and archbishop Gerbert, being the party accused, was placed opposite to him. Gerbert defended himself with eloquence, and declared that he had been raised to the archbishopric without his own concurrence. The sentence of the council was that he should abstain from the exercise of his archiepiscopal and sacerdotal functions until he should have been solemnly ordered by the Synod of Rheims, convoked for the following July. It, however, was not held so early, and while Hugh Capet lived Gerbert remained archbishop, and Arnamphus a prisoner at Orleans. See *Labbé, Conc. ix, 747*.

**Mouth** (prop. *Pep, keph*, Gr. *òròn*), besides its ordinary applications, was used in the following idiomatic phrases by the Hebrews (see Gesenius, *Heb. Lex.* s. v.): "Heavy-mouthed," that is, slow of speech, and so translated in Exod. iv, 10; "smoothe mouth" (Ps. xxvi, 26), that is, a flattering mouth; so also "a mouth of deceit" (Ps. xix, 2). The following are also remarkable phrases: a mouth to bear, to speak; mouth to mouth, in person, without the intervention of an interpreter (Num. xii, 8; comp. 1 Kings xii, 15; Jer. xxxii, 4); "With one mouth," that is, with one voice or consent (Josh. ix, 2; 1 Kings xxii, 13, 17; 2 Chron. xviii, 12); "With the whole mouth," that is, with the utmost strength of voice (Job xix, 15; Ps. lxvi, 17); "To put words into one's mouth," that is, to suggest what one shall say (Exod. iv, 15; Num. xxii, 38; xxxii, 5, 12; 2 Sam. xiv, 19, etc.); "To be in one's mouth" is to be often spoken of, as a law, etc. (Exod. xiii, 9; comp. Ps. vi, 10; xxxvii, 10). The Hebrew also says, "upon the mouth," which is used out of the mouth, and is used over and over to covert in or into the mouth (e.g. Nah. iii, 12); that which is spoken is also said to be "upon the mouth," where we should say, "upon the lips" (as in 2 Sam. xxii, 32). "To lay the hand upon the mouth" is to be silent (Judg. xviii, 19; Job xxii, 5; xi, 4; comp. Prov. xxx, 32); just as we say the tongue on the mouth. "To write from the mouth of any one" is to do so from his dictation (Jer. xxxvi, 4, 27, 32; xiv, 1). The word of God, or, literally, "the word that proceeds out of his mouth," signifies the actions of God's providence, his commands, whereby he rules the world, and brings all things to his purpose (Ps. iv, 11). "To inquire at the mouth of the Lord" is to consult him (Josh. xix, 14). "To set their mouth against the heavens" is to speak arrogantly, insolently, and blasphemously of God (Ps. lxxii, 9). "Hq shall smite the earth with the rod of his mouth, and with the breath of his lips shall he slay the wicked," are expressions which denote the sovereign authority of God, and to the mouth brings forth (See Wemys, *Clavis Symbolica*, s. v.) The mouth, as the organ of speech, also signifies the words that proceed out of it, which in the sacred style are the same as commands and actions, because they imply the effects of the thoughts; words and commands being the means used to communicate decrees to those who are to exer-
MOTON 710 MOYA

cute them. Instances of this abound in Scripture, in various shades of application; but few of them are preserved; for, to speak the truth, the commandment of Pharaoh, is in the original, as a mouth of Pharaoh (comp., among numerous other examples, Num, iii, 16; Job xxxix, 27; Eccles, viii, 2). Hence, for a person or thing to come out of the mouth of another is to be constituted or confirmed. Thus (Gen. xiv, 13), "according to the superior power; this is frequent in the Apocalypse (Rev. xvi, 13, 14, 1; xvi, 4, 5, xii, 15, ix, 19). The term mouth is not only applied to a speech or words, but to the speaker (Exod. iv, 16; Jer. xv, 19), in which sense it has a near equivalent in our expression "mouth-piece."

Mouton, Jean, a French composer of Church music, flourished in the 16th century. He was first brought into notice about the opening of that age under the reign of Louis XII. Under Francis I he enjoyed royal protection and support, and as musical director of the royal chapel Mouton was encouraged to bring out his own compositions. He wrote considerably, and some of his productions were suffered dedication to Pope Leo X. His works are justly celebrated. Five of these were published by Petrucci in 1508. Several of his compositions are preserved at Rome and Munich. His motets and madrigals are also circulated. As a composer, Mouton possessed more than the usual attainments. He was master of music as a scientific artist; his compositions are simple and natural, and betray the hand of a skilful artist. See Burney, Gen. Hist. of Music; Forkel, Gesch. d. Musik; Fites, Biographie Universelle des Musiciens; Patria, Hist. de l'Art musical en France.

Mouton, Jean Baptiste Sylvain, a noted French ecclesiastic and devoted adherent to the Jansenist movement, was born in 1740 at Charolles-sur-Loire near getting the service of the church, he ardently devoted himself to bring about ecclesiastical reforms, and zealously embraced the Jansenistic cause as one sure result to favorably the purity of the Church. He was, however, persecuted on that account, and finally quit his native country and went over to Holland, and there labored with the Jansenists until his death, June 13, 1806, at Utrecht. He published Nouvelles Eclaircissements, first at Paris and afterwards at Utrecht. See Quierard, La France Litteraire, s. v.; Moreti, Dict. Hist. s. v.

Movable (and Immovable) Feasts. The feasts kept in the Christian Church are called movable and immovable, according as they fall, always on the same day of the week in each year, as a fixed day; or depend on other circumstances, as Easter, and the feasts calculated from Easter. The Book of Common Prayer contains several tables for calculating Easter, and the following rules to know when the movable feasts and holydays begin: Easter Day, on which the rest depend, is always the first Sunday after the full moon which happens upon or next after the twenty-first day of March; and if the full moon happens upon a Sunday, Easter Day is the Sunday after. Advent Sunday is always the nearest Sunday to the feast of St. Andrew, whether before or after.

Moyer, Franz Karl, a German Roman Catholic theologian and Orientalist, was born, of humble but honorable parentage, at Kœsfeld, Rheinius Prussia, July 17, 1806. Franz Karl studied Oriental and theology at Münster; was ordained priest; in 1830 became vicar at Rath, near Deutz; in 1833 priest at Berne, near Godebsberg, and there remained until 1869, when he was appointed professor of Old Testament theology in the Roman Catholic faculty of Breslaus University, which office he held till his death, Sept. 28, 1865. His principal work, Die Phämistier, presents a comprehensive view of Phrenicist history. The first volume (Breslaus, 1840) treats of the religion and the divinities of the Phrenicians; the second volume bears the title of Dis Phänischische Alterthum, and is divided into parts, embracing the political history (1849) and the colonial history (1850) of that nation. He further enriched this field of knowledge by the publication of two volumes of Phrenicist texts (1845-47), and wrote the article Phänistier for Encyclopädie der Evangelischen Kirche (8, vol. 4, 1861). Among his other works worth mentioning are, Kritische Untersuchungen ü. d. Attestamentliche Chronik (Bonn, 1854); —De utruiugis recensionibus sacrorum insularum Jermole inod et origine (Hamb. 1837); —Loci quidam historiae Veteris Testamenti illustrati (Breslaus 1845); —Zustand der katholisch-theol. Facultät aus der Universität Breslaus (1847). He was also a frequent and esteemed contributor to the periodical literature of Germany, especially the philosophical and theological quarters; among which that of his own Church, the Zeitschrift für Philosoph. u. Katholische Theologie, enjoyed a very large number of valuable articles. (J. H. W.)

Möwes, Heinrich, a Lutheran clergyman who flourished in Germany in the early part of this century, was noted for his writings on mythology and popular superstitions, which were written in German and marked by severe afflictions, which he bore with heroic faith. He died in 1831. He will be known to the English reader principally from his triumphant hymn, "Hallelujah! I believe," translated in Hymns from the Land of Luther.

Mowing (13, gen., vulg. tonario, Amos vii, 1; the Sept. reads γεωργία ἐν ἀβατήσει, either from a various reading or a confusion of the letters V and L), a word signifying also a sheaf, fritten, and rendered in Psa. lxxxi, 6, "mown grass." As the great heat of the climate in Palestine and other similarly situated countries soon dries up the herbage itself, hay-making in our sense of the term is not in use. The term "hay," therefore, in the Prayer-book version of Psa. cxxi, 20, for σκόβις, is incorrect; A. V. "grass." So also Prov. xxxvii, 25, and Isa. xvi, 5. The corn destined for forage is cut with a sickle. The term "γεωργία, A. V. "mower," Psa. cxxxix, 7, is most commonly in A. V. "reaper," and once, Jer. ix, 22, "harvestman." See Binning.

Mowing, the "mowings," Amos vii, 1, i.e. mown grass. Psa. lxxxi, 6, may perhaps refer to some royal right of early pasturage for the use of the cavalry. Comp. 1 Kings xviii, 5. See Shaw, Truv. p. 188; Wilkinson, Anc. Egy. Abridg. ii, 48, 50; Early Truv. p. 306; Pietro d. Valle, Viaggi, ii, 327; Charinus, Vogl. iii, 570; Layard, Nin. and Bab. ii, p. 380; Niebuhr, De ser. d'Etrusc. p. 182; Harmer, Obs. iv, 386; Burschward, Notes on 1 & 2. See Grass.

Moya, Don Mattheo, a Spanish theologian, was born in 1607 at Moral, in the diocese of Toledo. Admitted into the Society of Jesus, he taught theology in Alcala and Madrid, became confessor to the duke of Osuna, when the same was sent to Sicily, and received a charge over the Mary Anchorites, of the Abbey of Philip IV. He became somewhat notorious by his Opusculum singularia universae fere theologiarum morum comprehendens adversus quorumdam expositationes contra normanlta Jesuitorum opiniones morales (Palermo, 1635, 4to), published under the pseudonym of "Amaeus Contadina," in which he attempted to justify the Jesuits for the laxity of their morals. This treatise was subsequently reprinted in Valencia, Madrid, and Lyon (the latter edition, 1644, in 4to). The Sorbonne, Feb. 5, 1655, denounced it as shameful, scandalous, impudent, detestable, and as containing propositions which should be es
MOZAMBIQUE

MOYER, Lady Rebecca, is noted as the foundress of a course of lectures in defence of the orthodox view of the Trinity. See LECTURES, Moyer's. She was the wife of Sir Samuel Moyer, of the parish of St. Andrew, Honer, County of Monmouth, who died in 1716. Lady Moyer herself died about 1720, and the foundation of the lectures she thus provided for in her will:

"My now dwelling-house in Bedford Row, or Jockey Field, near the City, I give and bequeath to Eliza Moyer, that out of it may be paid twenty guineas a year to a able minister of God's Word, to preach eight sermons every year on the Trinity, and the blessedness of our national religion, beginning with the first Thursday in November, and to the first Thursday in the seven sequal months, in St. Paul's, if permitted there; or, if not, elsewhere, according to the discretion of my executrix, who will not think it any incumbrance to her house. I am sure it will bring a blessing on it, if that work be well and carefully carried on, which in this profane age is so neglected. If my said daughter leave no child by me, they should die before they come to age, then I give my said house to my niece, Lydia Moyer, now wife to Peter Hesp, Esq., and to her heirs after her, she always providing for that sermon, as I have begun, twenty guineas every year."

There is a list of the preachers of this lecture, down to the year 1740—1, at the end of Mr. John Berriman's Critical Dissertation on 1 Tim. iii, 16 (which is the substance of the lectures he preached), and it is regarded as the ablest in the course. There is also in a copy of that book in Sion College Library a continuation of the list in MS., by Mr. John Berriman, to the year 1748. In the year 1748 they were preached by Mr. William Clements, librarian of Sion College, but published them till 1797. In the year 1764, or thereabouts, the preacher was Benjamin Dawson, LL.D., who printed them under the title of An Illustration of several Texts of Scripture, particularly wherein the Logos occurs (1765). Dr. Thomas Morell, author of the Theaurus Graecae Fossilis, is supposed to have been the last. One of these lectures Dr. Morell published without his name in April, 1774. It was written against Lindsay, and entitled The Scripture Doctrine of the Trinity Justified. Mr. Watts, recently librarian of Sion College (to whom the reader is indebted for the information here given), says Hesp (C. Dict. s. v.) was the founder of these lectures in January, 1772. As we have already stated under LECTURES, the Moyer foundation was only supported for about half a century. (J. H. W.)

MOYNE, Lr. See LEMOINE.

MOYSEY, Charles Abel, an English divine quoted as an able defender of the Trinitarian doctrine, flourished in the first half of this century. He was archdeacon of Bath, and in November to March. The summer heat is very great, and the climate, which is fine in the elevated tracts, is unhealthy on the low shores and the swampy districts. Besides numerous fruits and vegetables, the grains are rice, millet, maize, and wheat. Fish and turtle are caught in great quantities on the islands and reefs; pearl-fishing is a source of considerable profit;
cattle, sheep, and goats are numerous, and the principal exports are grain, gold-dust, honey, tortoise-shell, cowries, gums, and amber. The natives of this country are mainly Makoaos or Makomos. They are an athletic and ugly race of people, of the most ferocious aspect and savage disposition. They are fond of tattooing their skins, and draw a stripe down the forehead along the nose to the chin, which is crossed in a direct angle by another line from ear to ear, so as to give the face a deformed aspect. The women file their teeth to a point, so as to resemble a coarse saw; and suspend ornaments of copper or bone from a hole in the gristle of the nose. Their upper lip protrudes in a very remarkable degree, and this they consider as so principal a point of beauty that they endeavor to make it still longer by introducing into the centre a small circular piece of ivory, wood, or iron. They dress their hair in a very fantastic manner, some shaving one side of the head, others both sides, leaving a kind of crest from the front to the nape of the neck, while a few of them wear simply a knot of hair on their foreheads. Their females greatly resemble the Hottentots, except in the curvature of the nose and more lusciousness of the hinder parts, and when past the prime of life are said to present the most disagreeable appearance that can be conceived. The natives are fond of music and dancing, but their tunes and motions are unvaried and monotonous. Their favorite instrument is called ambira, which is formed by a number of thin bars of iron of different lengths, highly tempered, and set in a row on a hollow case of wood, about four inches square, and closed on three sides. It is played upon with a piece of quill; and its notes, though simple, are sufficiently harmonious, sounding to the ear, when skillfully managed, like the changes upon bells. They are armed with spears, darts, and poisoned arrows, and possess also a considerable number of muskets, which they procure from the Arabs in the northern districts, and sometimes even from the Portuguese dealers. They are formidable enemies to the settlement, and have been rendered despotic and cruel by the unceasing wars of the traders who have gone among them to purchase slaves. There are also many Arabs in Mozambique, but they remain steadfast in their faith to the Koran and its Prophet.

This coast had been known to the Arabs, and its ports frequented by their traders, for centuries, its discovery by Europeans, and all the information possessed by the latter on the subject was chiefly drawn from the vague accounts of Ptolemy and the Periplus of the Erythrean sea. It was first discovered by the Portuguese in the year 1497, who found the whole of the coast in the possession of the Arabs; but the fame of its gold-mines and the convenience of its ports, as resting-places for the Indian trade, led them to attempt the expulsion of the original settlers. This the Portuguese easily accomplished by their superiority in arms; and in 1508 they had conquered Quilua, gained a footing in Sofala, and built the fort which still stands on the island of Mozambique. They gradually encroached on the Mohammedan possessions on the River Zambezi, and about the year 1569 they completely cleared that part of the river from Arabs by putting the whole of them to death. In their attempts to reach the gold-mines of the interior, the Portuguese were not very scrupulous as to the means which they employed, and have furnished, in the history of the East, a parallel to the atrocities of their Spanish neighbors in the West. But theirs was a harder task, and the natives of Africa maintained a nobler struggle for the independence of their country than the feebler South American race; and after nearly four centuries of possession the Portuguese content themselves with acting on the defensive, occupying the coast along the line of the River Zambezi, and maintaining their influence and influence against one another. The government of Mozambique is even now in a most inefficient state, being, in most places, more in the hands of native chiefs than of the Portuguese. In former times the slave-trade was carried on here extensively; and from 1846 to 1857 four governments-general were removed by their governments for countenancing, if not actively engaging in it. The principal settlements are Mozambique, Quelimane, Sena, and Tete. The colony is divided into six districts, and is ruled by the governor-general and his secretary, assisted by a junta. The country being in the hands of a King, the government is together with the Junta are supervised by about twelve Roman Catholic priests, and no Protestants are tolerated in the diffusion of their creeds. It is a matter of general comment that the morality of Mozambique is at the lowest ebb, and that the Romanists are responsible for this condition. In 1873 Sir Bartle Frere visited Mozambique and the adjoining countries, and negotiated for the suppression of the slave-trade (see Livingstone, Last Journeys).

Mozarabian Liturgy is the name of a Christian liturgy originally in use among those Christian inhabitants of Spain [see MOZARABES] who remained faithful to their religion after the Arab conquest. It is clear that not all, even among the Mozarabians, for if the word itself were a nickname, it is not at all likely that these Christians would themselves have adopted that byname. In all probability it was connected with it at a much later date than the original introduction of this liturgy itself into Spain. Walewski (Ceremoniologica, p. 393) thinks that "it received its present title possibly from the right being a concession within the Moorish pale." Its origin is traced by some to Isidore of Seville (q. v.). See LITURGY, in vol. v. p. 459 (3). Recent researches, however, would make it almost certain that it is of much more ancient origin, and that it was only compounded, or, at least, established, by him and the fathers of the fourth Council of Toledo (638). Roman Catholic writers go so far as to ascribe it to the apostles themselves who converted Spain (comp. Migne's Patrologia, vol. ix, 339 [Paris, 1830]). Though closely resembling the Gallican liturgy, it cannot be traced back to the hands of Cardinal Gaul, for there are differences between the two which could not be accounted for in such a case. It is consequently most likely that it originated among the Christians of Spain, but the name of its author cannot be ascertained. The uniformity of style and singleness of plan which characterizes its distinct, though a little uneven, character, was the work of one writer. This liturgy remained in use in Spain throughout the Middle Ages, to the exclusion of the Roman Catholic form, which liberty may be accounted for by the isolated, independent position of these communities, as otherwise they would soon have been brought to yield to the influence of Rome. As it was not ascertained in obtaining the admission of their liturgy by two popes—by John X in 918, and by Alexander II in 1064. About the same time, however, that the last recognition was secured at Rome the Mozarabic liturgy was silenced in Aragon to spread the Roman liturgy, and in 1074 it was suppressed for the same reason, by Sancho III of Navarre, who reigned, Castile, and Leon, to the great regret of the people, who consolde themselves characteristically with the proverb, "Quo volunt reges vadent leges" (Roderic, De Reb. Esp., vi. 26). From Rome the first authoritative word for the exclusion of the Mozarabic liturgy came in the pontificate of Gregory Y (11th century). He expelled all of the Spanish churches and convents to adopt the common uniform liturgy of the Roman Church. Six Mozarabic congregations, chiefly in Leon and Toledo were, however, permitted to retain their ancient ritual, and though it soon fell into disuse among them also, it
was yet preserved long enough to save it from final destruction; and when the learned cardinal Ximenes, for the correction of the liturgy then in use, consulted all the ancient books, the Breviary, the Canticles, and the scrolls, the Mozarabic also, he became so much interested in its preservation that he caused a careful copy to be made, and it was printed for the first time in 1500. Two years later a Breviary was prepared to complete it. Both works were printed at Toledo by a German, Peter Hagenbeck, and were approved by pope Julius II. The title of this compilation is, Miscell. Mystar secundum Regularum Beati Isidori Dictum Mozarabicum, which has, however, by some unfortunate accident, remained incomplete. A whole third of the Church-year is left entirely. Ximenes, in the mean time, the more surely to establish the liturgy, founded a chapel at Toledo, with a college of thirteen chaplains, whose duty he made it to say mass according to the Mozarabic manner. This institution is still in existence. The principal characteristics of the Mozarabic liturgy are:

1. Its festivals, which are different from those of the Roman Catholic Church; for instance, its Advent contains six Sundays, as in the ancient Milanese and in the Greek Church: this indicates a certain connection with these. There are two festivals of the Annunciation, one on March 24, as in the Roman Catholic liturgy, and the other on Dec. 8, which they designated as the principal festival of the name of "Sancta Maria de la Q," because at the close of this festival both clergy and laity "sine ordine voce clara O longum proferunt ad flagrana illud desiderium significandum, quod sancti omnes in limbo, in celo angeli totusque orbis tenentur navitativus Redemptoris" (see the Preface to Migne's Patrologia, p. 179, D).

2. With regard to the lessons, the evangelists in this liturgy are not entirely similar; thus the lesson containing the parable of the rich man and Lazarus is placed before Lent as a sort of admonition against the riotousness prevailing at that period. But a point of much greater importance is the fact that there were not only two lessons, namely, the epistle and gospel, appointed for each great festival, but three; a lesson from the Old Testament being read before the epistle. This was taken only not from the poetical and historical books, but even from Jesus Sireach. Another remarkable fact is that between Easter and Pentecost the lesson from the Old Testament was replaced by a psalm of Revelation, and that from the epistles by the Acts.

3. The principal characteristic of this missale is the strong homiletic element it contains besides the liturgical. Thus, after the three Biblical lessons, and before the real offering, there was always an address to the people, by the bishop for Easter and Pentecost. These addresses are short, their tone familiar, but at the same time exegetical (as when treating of the allegorical character of Lazarus's resurrection, on the third Sunday in Lent [Migne, p. 341]), while a certain rhetorical elegance (as in the mass for Easter and Ascension-day) bespeaks one who was familiar with homiletic expressions. On this point there is a resemblance to the Gallican liturgy; although the latter, as given in Millon's edition (Paris, 1759), contains no such elements, yet the peyer says (p. 29): "Et Salviano Malsiliae presbyter clarissimus homines episcopus faction, Sacramentorum vero, quantas nec recrocer, ait: Genadius, composuit. Quo in loco sacramentorum homi- linitz intelligitur vel sermones de mysterii sacrar, inter missarum solemnia quondam ex more Gallicanum recitari solidi; vel orationes seu praefationes ad missam." The part, moreover, which is especially called profatio, is, in the Mass of the Mozarabs,

4. Some parts of this liturgy recall the Eastern Church, as, for instance, the repetition of three Agios after the Benedicite, while in the Roman liturgy the word Sanctus precedes it (although the Greek word occurs also in the Roman hymnus of Palestrina); also the formula in the Communio Sancta Sancto; but particularly the division of the host into nine parts, which, like the leaves in the Greek rite, have special names and significations, and are also to be laid and used in a certain order. This custom is found also in the Gregorian chant. It is named the Eugenian chant, from its author, the third archbishop of Toledo, Eugene, who, in regard to hymnology, occupies the same place in the Mozarabic Church, in opposition to Gregory, as does Isidor in the liturgical part. Further, the division of the Breviaries into the various parts of the liturgical years was a natural outcome of the division of the Breviaries, would be out of place here; we will merely remark that, as a whole, the Mozarabic liturgy is one of the most precious monuments of ancient Christianity, and is not inferior to other any liturgy in point of rich illustrations from Scripture, liturgical application of passages, nobleness of thought, etc.

5. The Mozarabic chant has great similarity to the Gregorian, yet it is clear that here also the Spanish Church preserved some national characteristics, as is shown by the specimens contained in Migne's edition (Preface, p. xxxii-xxxvi). These indicate a greater tendency to melody and a figurative style than is found in the Gregorian chant. It is named the Eugenian chant, from its author, the third archbishop of Toledo, Eugene, who, in regard to hymnology, occupies the same place in the Mozarabic Church, in opposition to Gregory, as does Isidor in the liturgical part. Further, the division of the Breviaries into the various parts of the liturgical years was a natural outcome of the division of the Breviaries, would be out of place here; we will merely remark that, as a whole, the Mozarabic liturgy is one of the most precious monuments of ancient Christianity, and is not inferior to other any liturgy in point of rich illustrations from Scripture, liturgical application of passages, nobleness of thought, etc.

6. Mozart, Johannes Chrysostomus Wolfgang Amadeus, one of the greatest musical composers, if not the greatest, deserves a place here for his many and valuable contributions to sacred music. He was born at Salzburg (then a Bavarian province), but soon after transferred to Austria, where he died, 1756. For a while he had charge of Wolfgang evinced the strongest predilection for music, which induced his father, who was organist of the prince's chapel, to discontinue the instruction of others, in order to devote himself to his tuition and that of a sister about four years older. After studying the harpsichord during a year, the flutes of his genius were so rapid that he exercised his own invention in original composition at the age of only five, and attempted notation, which could hardly be deciphered. Only when six years of age, his performances were so remarkable that his father took him and his sister, who possessed similar gifts, to Munich and Vienna, where they obtained every kind of encouragement from the elector of Bavaria and the emperor Francis I. In 1768 the Mozart family visited Paris; and, though now only at the age of seven, Mozart surprised a party of musicians, including his father, by taking part, at sight, in a trio for string instruments. He also earned a great reputation as performer on the organ, and during his stay at Paris performed on the organ in the Chapelle du Roi before the whole court. While at the French capital Mozart also entered upon his career as a musical author, for he there published his first two works. From Paris the Mozart family went to London.
in 1764, and there, according to Holmes, "the boy exhibited his talents before the royal family, and underwent more severe trials than any to which he had been before subjected, through which he passed in a most triumphant manner. So much interest did he excite in that country that the Hon. Daines Barrington drew up an account of his extraordinary performances, which was read before the Royal Society, and declared by the council of that body to be sufficiently important to be printed in the Philosophical Transactions, in the 60th volume of which it appears." In the 69th volume of the same work Dr. Burney remarks: "Of Mozart's infant attempts at music I was unable to discover the traces from the conversation of his father, who, though the first opera for the carnival of 1771. At Bologna and Florence the reception he met with was equally flattering to the young musician. At Rome Mozart arrived in Passion Week, and on Wednesday went to the Capuchin Church where he held his first public performance before the celebrated Missarum, which was prohibited to be copied, or in any manner published, on pain of excommunication. On Good Friday the same Missarum was again performed, when Mozart was present with the MS. copy he had made from memory concealed in his hat, that no one might have any suspicion of his corrections. This circumstance created an immense excitement at Rome, because the peculiarities of the Missarum were thought impossible to be expressed by musical notation; and when young Mozart, in presence of some Sistine choristers, sang the composition in the very manner in which it was sung by those who had acquired it only after long practice, the professional singers expressed their astonishment in terms of unmeasured admiration. The fame of Mozart after this event was spread far and wide. His wonderful musical talents and power of performing on the organ were attributed to a charm which it was supposed he carried in his fingers. When only the year's first heard him perform he conferred upon him the order of the Golden Spur; and at Bologna he was unanimously elected a member of the Philharmonic Society, which was at that time an honor rarely conferred even upon the greatest musicians, but yet well earned by this marvellous youth, who, at the age of sixteen, was acknowledged the first in his time throughout the world, and had produced two requiems and a stabs-mater, numerous overtures, hymns, and motets, 4 operas, 2 cantatas, 13 symphonies, 24 piano-forte sonatas, not to speak of a vast number of concerted pieces. In 1775 Mozart produced, among numerous other works, two Masses for the chapel of the elector of Bavaria, etc. In 1776, at the desire of the archduke Maximilian, he composed the cantata Il Re Pastore; and from that period till the year 1779 he continued to labor with his pen, though but few of its products then obtained, or ever will obtain, a celebrity at all equal to that which his subsequent productions have so justly acquired. In 1775 his fame was so completely established and so widely known that he could have made choice of engagements in all the capitals of Europe. His father preferred Paris, and therefore, in 1777, he set out for a season in that city. In the course of the year he returned to Germany shortly after he had again produced a sensation by his compositions for the religious service, and for a trumpet concert at the dedication of the Orphan House Church in Vienna, himself conducting the music in presence of the imperial court. After this the Mozarts went home to Salzburg, and Wolfgang was afforded every advantage for his musical training. He devoted himself most assiduously to the study of his art, and evinced his mastery of the subject in 1788, when, at the request of the emperor Joseph II at Vienna, he composed music to the opera buffa La Finta Semplice, which, though never performed, was approved of by all the masters and cognoscenti of the period. In 1789 young Mozart was nominated concert-master to the archbishop of Salzburg, and thus gained a small compensation and a somewhat independent position. We do not know exactly what his salary was when first appointed, but in his twentieth year, we learn from his biographer, Mozart earned the trifling sum of $5 per annum. We do not wonder, therefore, that the artist occasionally strayed from home to earn a few additional dollars. Thus in the very year of his appointment we find him starting for Italy, where he was most rapturously welcomed. His first performance in Italy was given at Milan, where he was engaged to return and compose
fused to quit his emperor's side. His great opera of Idomeneo was composed in 1780, with a view to induce the family of Mademoiselle Constance Weber, afterwards his wife, to consent to the marriage, which they had declined on the ground that his reputation was not sufficiently established. This opera forms an epoch not in the composer's life, but in the history of music. In the production of Idomeneo, Mozart's genius exerted itself to an admirable respect, it was an enormous advance on all previous works of the kind, and established his reputation as the greatest musician whom the world had seen.

His other principal works, composed about and after this time, are Con Fis Tutti: — L'Endeavent du Séraut: — Nozze de Poppea: — Ester: — Idomeneo: — Clemenza di Tito: — and last, but not least, his world-renowned Requiem—one of the most perfect sacred musical compositions, if not the most perfect—in which, while the sacred character is maintained throughout, the airs have all the requisite grace and freedom, the instrumental all the resources of modern refinement, and the whole exhibits in a perfect manner the blending of the varied powers of the orchestra with the voice, without ever allowing the former to encroach on the latter. The story of his composing the Requiem deserves mentioning here. Mozart's intense application to the composition of his Requiem, he only undertook to write it, II, on account of the many papers that came to him showing "res angusta domi" (warrants for debt), had brought on a state of melancholy from which nothing could arouse him, and he was full of terror at his approaching end. One day, while plunged in a profound reverie, a stranger of dignified manners was announced, who communicated the wishes of some unknown person of exalted rank that he should compose a solemn mass for the repose of the soul of one tenderly beloved, whom he had just lost. An air of mystery pervaded the interview; the composer was exhorted to exercise all his genius, and his name, at any rate, which had won so much the world's esteem, when the stranger promised to return. He disappeared, and Mozart instantly commenced writing. Day and night were uninterrupted occupied; but he was consumed by gloomy pressages, and at length exclaimed abruptly to his wife, in great agitation, "Certainly I am composing this requiem for myself—it will serve for my own funeral." Though his strength continued to fail, his assiduity was unabated, and at length he was obliged to suspend the undertaking. At the appointed time the stranger returned. "I have found it impossible to keep my word," said Mozart; to which the stranger answered, "How can you speak of yourself as the person to whom I shall never pay the larger sum that you require?" Mozart replied, "Amor: c'est un mot de sa langue." The stranger now insisted on doubling the covenant price, which he had paid down at the outset, and retired. It was in vain that Mozart endeavoured to trace him, and this, conjoined with other circumstances, corroborated his belief that he was some supernatural being sent to announce the close of his mortal career. Nevertheless his labors were renewed, and the work at last was nearly completed within the stipulated period, when the mysterious stranger again returned; but Mozart was no more. He died Dec. 5, 1791. In the intervals of his greater works, Mozart composed the majority of the orchestral symphonies, quartets, and quintets which are an almost indispensable part of the programme of every concert in the present day, besides masses as familiar in England and America as in Catholic Europe, innumerable piano-forte concertos and sonatas and detached vocal compositions, all of which are the fruit of his own invention, and established his genius in music, says Hugford, "was sublime. By the number, variety, combination, and effect of his works he ranks in the highest class of modern masters. An air of delicacy and sentiment pervades the whole. Full and harmonious, they are altogether free from that coarseness and impassioned affectation which betray the sterility of invention too common among musicians. The taste which they exhibit shows that vulgar images were incompatible with his mind; it seems as if he knew that such a deformity is alike pernicious to science and the arts. . . . Mozart has been most successful in gloomy passages, or those of rising grandeur; they according better with the ordinary train of his feelings. On almost all occasions he is more serious than comic in endeavoring to portray the passions; he never approached them with so much sentimental sportive. However simple the theme, however intricate its variations, his return is always natural, and the finale appropriate. Perhaps the celebrity of Mozart's music partly arises from the skilful management of his finales, for they invariably leave an agreeable impression. No work is more accurately passed him in the suitable distribution of the parts of his concerted pieces; for, understanding the precise qualities of every different instrument, nothing is appointed to any which is inconsistent with its character." "No composer has ever combined genius and learning in such perfection, portions; none has ever been able to digest the lightest and tritest forms by such profound scholarship, or at the moment when he was drawing most largely on the resources of musical science, to appear so natural, so spontaneous, and so thoroughly at his ease." (Hullah). To Haydn Mozart always acknowledged his obligations; to Haydn the most convinced, but not the most comfortable of his great contemporaries. Haydn, though born twenty-four years earlier, survived Mozart eighteen years, and all his greatest works written after Mozart's death bear manifold traces of his influence. Mozart is the first composer in whose works all signs of the old tonality disappear; he is the father of the modern school. "Mozart," says Prof. J. K. Pinker, "is rightly considered as the universal master. This universality is not only evinced in his complete mastery of every form of music, from a song to a symphony, from a simple dance to a solemn requiem, but in the rare adaptation of the national peculiarities of style—Italian, French, English—so that he seemed to have made it his mission to unite harmoniously and beautifully these national elements. In his immortal works European music attained its concentration for the first and only time in history." (Lectures on Music, at the Boston University, in 1874.) In person Mozart did not exceed the middle size; he was thin and pale, and his health was always delicate. The expression of his countenance, without anything striking, was exceedingly variable, and rather that of an absent-minded man. His habits were awkward, and his hand had been accustomed so incessantly to the piano that they seemed incapable of application to anything requiring address. He was of a mild and cultivated turn, and his love of the delicate and cultivated, and the number of his works is a sufficient proof of his industry. His opinions of other composers were liberal, and he entertained the highest respect for Haydn in particular. "Believe me, sir," said he to an officious critic, who sought to demonstrate certain errors of that great master—"believe me, sir, you are very judicious and tritest forms by such profound scholarship, or at the moment when he was drawing most largely on the resources of musical science, to appear so natural, so spontaneous, and so thoroughly at his ease." (Hullah). To Haydn Mozart always acknowledged his obligations; to Haydn the most convinced, but not the most comfortable of his great contemporaries. Mucianus, or Mutianus, surnamed Schola-
ticus, an early ecclesiastic of some note, flourished near the middle of the 6th century A.D. He is cele-
brated as the translator of the 54 homilies of St. Chry-
sostom on the Epistle to the Hebrews, a task performed at the request of Pope Sisinnius and the Emperor Marcian. This was done, as he says, "in the heat of a disertissimus." This translation is still in existence; it was published for the first time at Cologne in 1580 (8vo), and has been inserted in the Latin editions of the works of St. Chrysostom, though in the Græco-Latin editions the translation by Heret is generally pre-
ferred. He is also supposed to have furnished the for-
mula of Gaudentius's Treatise on Music. See Fabri-
cius, Biblioth. Graecæ, viii, 558, 559; Cambiadoris, Dis-
cur. Lect. 8.

Mucker, a German epithet applied to Christian sects who make much outward display of piety, has come to be applied especially to a class of modern Ad-
namites (q. v.) who arose at Königsberg, East Prussia, about 1800. Their origin is attributed to the theosoph Johann Heinrich Schünhoer (born at Mainz, who died at Königsberg in 1826), who held dualistic and Gnostic views concerning the origin of the universe, teaching that it was caused by the mingling of two primordial beings of a spiritual and sensuous nature as Eloah. But Schünhoer was himself too good a man to stay in the world, and having caused the sect to become so fanatic and immoral as the Muckers, in truth, the philosophic fancy of this pious but eccentric student was taken hold of by two Königsberg Lutheran clergymen named Dietel and Ebel (q. v.), who, after making pro-
fession of the exclusive kind of Christianity, gathered a circle of like-minded fanatics, and introduced shameless mysteries under the color of piety. They elevated sexual connection into an act of worship, and designated it as the chief means of the sanctification of the flesh by which the paradisaic state was to be restored. Women of high standing in the community, some of noble birth, belonged to the Mucker circle. Three of them lived in Ebel's house, and were popularly regarded as his wives. Dixon (Spiritual Wives) tells us that Ebel held one to represent to him the principle of light (Licht-Natur), the second the principle of darkness (Finsterheits-Natur), and the third the principle of union (Um fusenung). The former was called the legal wife, but it was usually termed during a public trial of Ebel for the offence of immorality that she only held a subordinate place in his extra-
dinary household. This and like odious, licentious ex-
cesses were practiced by the Muckers generally, es-
specially in their religious meetings, and the scandal con-
cerning them became so great in Königsberg that a garden which they were wont to frequent acquired the name of the Serapha Grove. The subject was brought before the courts in 1839, and the result, in 1842, was that Ebel and Dietel were degraded from their offices; but upon appeal the higher court reversed the decision, and discharged the ease for want of clear proof against the clergymen. It is extraordinary how this cause was examined the whole evidence produced that the deci-
sions of the first court did not proceed upon a calm ju-
dicial inquiry, but were dictated by strong prejudice against the accused on account of their religious views and peculiar eccentricsities; and, in particular, that the evidence given no sufficient proof of the charge of licentiousness (comp. Kanitz, Aufklärung nach Astra, Quellen, etc., für Welt u. Kirchen gesch. [Basle and Lud-
wigsburg, 1862].) Mr. Dixon has directed attention to the similarity of the Mucker movement with that of the Princelets (q. v.) in England, and that of the Bible Communists or Persecutors (q. v.) in the United States, popularly known as Oneida Communitists; all of which took place about the same time and in connection with revival excitement, although it may almost be regarded as certain that the originators of these movements had
not even heard of each other. A class of religious enthusiasts who originated under Stephen in Saxon, and then emigrated to this country, will be treated in the article STEPHEN. See Zeitschrift für historische Theologie, vol. II, (1872), p. 647. Leont. Xxvi. (J. H. W.)

Mudge, Enoch, a Methodist Episcopal minister, and one of the pioneers of Methodism in New England, was born of religious parents at Lynn, Mass., June 21, 1776. He was converted at fifteen, under the ministry of Jesse Lee; entered the Itinerary in 1783, and labored assiduously; in 1786 he traveled, instead of the presiding elder, in Maine, New Hampshire, and New York. For several years he resided in Boston, and then moved to the Seaman's Bethel at New Bedford, and there labored with signal success until 1844, when he was obliged to retire from the active work of the ministry. He lived beloved at Lynn, and labored as his strength permitted until his death, April 2, 1850. He was the first white man from New England who came to the Hawaiian Islands, and his long and useful life was full of successful labor for God. He was an able and interesting preacher, and commanded universal respect and love. His published works are "a volume of excellent Sermons, and many poetical pieces of more than ordinary merit." See Minutes of Annual Conferences, 1834; Stevens, History of Methodism, vol. 1, ch. x, Sprague, A. M. a. M. Pulpit, vol. vii.

Mudge, John A., a minister of the Methodist Episcopal Church, was born in Ohio, Oct. 27, 1829. His parents being poor, his early education was greatly neglected. He was converted when quite young, and determined to enter the ministry. Feeling a need of a more thorough preparation, he studied a while at the college in Berea. He joined the North Ohio Conference in 1850, and held several important positions in that Conference. He was a man eloquent in the pulpit, clear in his judgment, and diligent in his studies. He was secretary of the Conference for some time, and a delegate to the General Conference in 1872. He died Oct. 27, 1873. See Minutes of Annual Conferences, 1874, p. 110.

Mudge, Thomas Hicks, a minister of the Methodist Episcopal Church, was born in Orrington, Me., Sept. 28, 1815. His parents removed to Lynn, Mass., in his childhood; and being early brought under religious influence, he was converted, and united with the Church in 1830. Soon after his conversion he was invited by a desire to preach the Gospel, and in order to qualify himself for this work prepared for college at Willbraham Academy. After going through the college course at the Wesleyan University in Middletown, Conn., where he graduated in 1845, and at the Union Theological Seminary in New York (formed in 1843), he joined the New England Conference, and remained a member of it till 1857, when he became professor of sacred literature at McKendree College, Lebanon, Ill. In 1859 he was transferred to the Missouri Conference, and stationed successively at Pilot Knob, Simpson Chapel, St. Louis, and Independence. At the outbreak of the rebellion he was obliged to leave the state, and sought refuge in Manhattan, Kan., where he filled an appointment for a year; but joining the Kansas Conference, at the earnest solicitation of the Church was sent to Baldwin City. His health, however, failed, and he died there, July 24, 1866. His last words, "I have paid the debt of this life," and "The Word of God, and possessed much critical knowledge of the sacred text. For the exposition and illustration of it he collected, from American and foreign publishers, one of the most valuable private libraries of sacred literature in this country. His preaching was rich in thought, and pervaded by a spirit of deep piety. Many of his brief expositions of the Scripture lessons, before his sermons, were of themselves pithy discourses of great value. He had devised large plans of usefulness through the agency of the Methodists in the territory of the Zulu and Xhosa tribes. He wrote several sermons on the Word of God, but the little he had written was never considered of sufficient importance for publication. See Minutes of Annual Conferences, 1863, p. 28.

Mudge, Zachary, an eminent clergyman and educator of the Anglican communion, was born near the close of the 17th century. About 1716 he became master of a free-school at Bidford, and about 1736 rector of St. Asaph's. He died in the churchyard of the church at the end of Exeter. He died in 1779. Mr. Mudge was an intimate friend of Dr. Johnson, and is highly spoken of as a scholar and clergyman. He published A Specimen of a New Translation of the Book of Psalms (1783, 4to):—Essay towards a new English Version of the Book of Psalms (1744, 4to); of these, Horne says, 'Stevens's notes are more ingenious than solid'—"Church Authority (a sermon, 1748, 4to), answered in The Claims of Church Authority considered (1749, 8vo)—and several others of his sermons (Lond. 1721, 8vo; 1739, 8vo). See Boswell, Life of Johnson (ed. 1848), p. 679, 688; Allibone, Dict. of Amer. Metr., 2d ed., 227.

Muditta, one of the five kinds of Bhava or meditation, in which the Buddhist priests are required to engage. The mudita is the meditation of joy, but it is not the joy arising from earthly possessions. It feels indifferent to individuals, and refers to all sentient beings. In the exercise of this mode of meditation the priest must express the wish, not that the good fortune of the world may pass away, but that each one receive his own appointed reward.

Mudo, el (the Muse), an eminent Spanish painter who attained great celebrity because of his masterly delineations of sacred subjects, was born at Logrono in 1526. His real name was Juan Fernandez Navarette, or Juan Fernandez Ximenese de Navarette. He was called "el Mudo," after he had acquired distinction as a painter, from his having been deaf and dumb from his infancy. He showed a talent for art early in life, and first studied under Foy Vicente de Santo Domingo, a monk of the Order of Geronomites, under whom he made such rapid progress, and exhibited so much genius, that on the advice of this master he was sent him to Italy to study with Titian, with whom he remained several years, and thoroughly imbibed his principles and manner of coloring, so that he was called by his countrymen the Spanish Titian. He remained in Italy twenty years, visiting all the principal cities—Rome, Florence, Naples, etc.—studying the works of the most eminent painters, who entertained for him the highest respect on account of his eminent abilities, perhaps heightened by his infirmity. He had already acquired a distinguished reputation in Italy when, in 1568, he was summoned to Madrid by Philip II to paint in the Escorial, and on his arrival he was appointed painter to the king, with a pension of two hundred ducats, in addition to the price of his works. He was naturally of a delicate constitution, and he had hardly commenced his labors when a severe malady compelled him to retire, with the permission of his royal patron, to his native place, Logrono, where he resided three years, during which time he painted four magnificent pictures, and carried them with him to Madrid in 1571. These were the Assumption of the Virgin, the Martyrdom of St. James the Great, a St. Philip, and a St. Jerome, which were placed in the Escorial, while the artist was in Rome, in the church of the convent of the Trappists, of which he was a member. The head of the Virgin in the Assumption is supposed to be a portrait of his mother, the Donna Catalina Ximenes, who in her youth was very beautiful. In 1575 he added four more pictures, the Nativity, Christ at the Pillar, the Holy Family, and St. John writing the
Apostolus, for which he received eight hundred ducats. In the Noticia El Mudo successfully overcame a formidable difficulty in painting—the introducing of three lights into the picture, as in the famous Notti of Correggio; one from the irradiation proceeding from the infant Jesus, another from a glory of angels above, and a third from a flaming torch. It is related that Fellegrino Tibaldi, on seeing it, exclaimed, "Oh, I bell pastori!" This exclamation gave name to the picture, and it continues to be known to this day as "The beautiful Shepherds." In 1576 he painted his famous piece of Abraham entertaining the three Angels, for which he received five hundred ducats. He now undertook a stupendous work, and was engaged to paint thirty-two pictures for the Escorial, twenty-seven of which were to be seven feet and a half in height and seven feet and a quarter in breadth, and the other five thirteen feet high and nine broad. He did not live to complete this vast undertaking; he painted eight, representing the apostles, the evangelists, and St. Paul and St. Barnabas; the others were finished by Alonso Sanchez Cillo and Luis de Caravajal. El Mudo died in 1579. His pictures are extremely inaccessible; except a small picture of the baptism of Christ in the museum at Madrid, they are buried in the royal solitude of the Escorial.

There were two other Spanish painters, of little note, called El Mudo—one Pedro el Mudo, and the other Diego Lopez, who must not be confounded with the illustrious Navarette.

Muëddin. See Muezzin.

Muezzin (Muëddin) is the Arabic name of the Mohammedan official attached to a mosque, whose duty it is to summon the faithful to prayer at five different times of day and night. Stationed on one of the minarets, he chants in a peculiar manner the form of proclamation. Before doing so, however, the muezzin ought to repeat the following prayer: "O my God! grant me majesty; purify me: thou alone hast the power. Thou art my benefactor and my master, O Lord. Thou art towards me as I desire; may I be towards thee as thou desires. My God! cause my interior to be better than my exterior. Direct all my actions to rectitude. O God! deign in thy mercy to direct my will towards that which is good. Grant me at the same time true honor and spiritual poverty, O thou, the most merciful of the merciful." His chant (Adam) consists of these words, repeated at intervals: "Allah is most great. I testify that there is no God but Allah. I testify that Mohammed is the apostle of Allah. Come to prayer. Come to security." ("Prayer is better than sleep" is added in the morning, at the Subh or Fagr.) "Allah is most great. There is no deity but Allah!" Besides these regular calls, two more are chanted during the night for those pious persons who wish to perform special nightly devotions. The first (Ulla) continues, after the usual Adam, in this manner: "There is no deity but Allah! He hath no companion—to him belongeth the dominion—to him belongeth praise. He giveth life, and causeth death. And he is living, and shall never die. In his hand is blessing, and he is almighty," etc. The second of these night-calls (Ebed) takes place at an hour before daybreak, and begins as follows: "I exalt the perfection of Allah, the Existing forever and ever: the perfection of Allah, the Desired, the Existing, the Single, the Supreme," etc. According to an Arab tradition, the office was instituted by Mohammed himself, and the words quoted for the morning prayers were added by the first muezzin on an occasion when the Prophet overheard himself. Mohammed approved of them, and they were ever afterwards retained in the morning call. The office of a muezzin is generally intrusted to blind men only; lest they might, from their elevation [see Muezzin], have too free a view over the surrounding terraces and harems. The harmonious and sonorous voices of the singers, together with the simplicity and solemnity of the melody, make a strikingly poetical impression upon the mind of the hearer in the daytime; much more, however, is this the case whenever the sacred chant resounds from the height of the mosque through the moonlight stillness of an Eastern night. See Travel, India under Moh. Rule (see Index).

Mufler (Mafl, ro'al, a reeling, as in Zech. xii, 2; Sept. and Vulg., undistinguishable), a term occurring in Isa. liii, 19, among articles of female apparel or ornament, and thought by Gesenius (Heb. Lex. s. v.) to signify a veil, from its tremulous motion, the corresponding Arabic word denoting a similar article of dress. See Veil. The margin of the Auth. Vers. has "spangled ornaments," a mere conjecture. Roberts explains the ornaments spoken of by reference to the costume of the women of India: "The 'chairs,' as consisting first of one most beautifully worked with a pendant ornament for the neck; there is also a profusion of others, which go round the same part, and rest on the bosom. In making curious chains, the goldsmiths of England do not surpass those of the East. The 'bracelets' are large ornaments for the wrists, in which are sometimes enclosed small bells. The 'mufflers' are, so far as I can judge, not for the face, but for the breasts." Kitto, however, accedes to the opinion of Gesenius that the last are a species of outdoor veil (see Daily Bible Illustr. ad loc.). See Attire.

Mufti (Arabic, expounder of the law) is the name of the chief of the Turkish ecclesiastical and judicial order. There is a mufti in every large town of the Ottoman empire. In his religious capacity he administers the property of the Church, and watches over the due observance and preservation of its rites and discipline. In his civil capacity he pronounces decisions in such matters of dispute as may be submitted to him. The Turkish grand mufti is the supreme head of the Cemans (servants of religion and law), and has, together with the grand vizir (Vizir Azim), the supreme guidance of the state, nominally ruled by the sultan. He is the chief spiritual authority, and in this capacity he is also denominated Sheik al-Islam (Lord of the Faith). The imams (priests), however, chosen from the body of the ulama, are, from the moment of their official appoint-
MUGTI are the teachers and expounders of the law, from among whom the mollahs and cadiis are elected. The Turkish laws have their basis in the Koran; the mufiit thus, as head of the judges, acquires a spiritual authority, and so great is the popular regard for the mufiit that even the sultan himself, if he will preserve any appearance of religion, cannot, without first hearing his opinion, put any person to death, or so much as inflict any corporal punishment. In all actions, especially criminal ones, his opinion is required by giving him a writing, in which the case is stated under signed names, which he subscribes with the word Olur or Olunus, i.e. he shall or shall not be punished, accompanied with these emphatic words, in which he repudiates all claims to infallibility, "God knows better." Such outward honor is paid to the grand mufiit that the grand seignior himself rises up before him, and advances seven steps towards him when he comes into his presence. He alone has the honor of kissing the sultan's left shoulder, while the prime vizir kisses only the hem of his garment. When the grand seignior addresses any writing to the grand mufiit, he gives him the following titles: "To the exed, the wisest of the wise; instructed in all knowledge; the most excellent of excellent; abstaining from things unlawful; the spring of virtue and true science; heir of the prophetical doctrines; resolver of the problems of faith; revealer of the orthodox articles; key of the treasures of truth; the light to doubtful allegories; strengthened with the grace of the Supreme Legislator of mankind. May the Most High God perpetuate thy favors." The election of the grand mufiit is vested solely in the sultan, who presents him with a vest of rich sables, and allows him a salary of a thousand ruppers a day, which is about five pounds sterling. Besides this, he has the disposal of certain benifices belonging to the royal mosques, which he makes no scruple of selling to the best advantage; and on his admission to his office he is complimented by the agents of the bazarah, who make him the usual presents, which generally amount to a very considerable sum. It is the grand mufiit's prerogative generally to gird the sultan with the sword at his ascension to the throne, a ceremony which takes place at the Mosque of Eyub, and which is equal to the ceremony of coronation. In modern days the position of much influence is bestowed upon the former of the imperial decrees, and the latter of the=fetwa, or decision, although attached to the imperial decrees, imparts to it but little additional weight. Nor is his own dictum in things spiritual always considered as finally binding. The only prerogative of mufis and ulmas which has hitherto remained untouched is their being exempt from bodily or otherwise degrading punishments; nor can their property ever be confiscated, but descends to their successors. Muggleton. See MUGGLETONIANS. MUGGLETONIANS, a sect that arose in England about the year 1651, and of which the founders were John Reeve and Ludovic Muggleton (the latter born 1607, died March 14, 1657), both until 1651 obscure men. The former's profession is not at all known, and he lived but a little while after their public declaration as religious men. Muggleton was a journeyman tailor, and is depicted by his contemporaries with long, thin hair, low forehead, protruding brow, broad high cheek-bones, and what physiognomists would call the aggressive nose. These men claimed to have the spirit of prophecy, and that they had been appointed by an audible voice from God as the last and greatest prophets of Jesus Christ, and affirmed that two such prophets were to be the "mouths" of the time. Muggleton professed to be the "mouth" of Reeve, as Aaron was of Moses. They asserted a right to bless all who favored and to curse all who opposed them, and did not hesitate to declare eternal damnation against their adversaries. They favored the world with a number of publications. In 1659 Muggleton published his first paper, in which it was asserted "that he was the chief judge in the world in passing sentence of eternal death and damnation upon the souls and bodies of men; that in obedience to his commission he had already cursed and damned many hundreds to all eternity; that in doing so by an oath and certain runnymes of the land do when they pass sentence according to law; and that no infinite Spirit of Christ, nor any God, could or should be able to deliver from his sentence and curse." In another paper, published later, he insisted "that he was as true an ambassador of God, and judge of all men's spiritual estate, as any ever was since the creation of the world." He also declared himself above ordinances of every kind, not excepting prayer and preaching, rejecting all creeds and Church discipline and authority. The most remarkable of his papers is the one particularly directed to the Parliament and commonwealth of England, and to his excellency the lord-general Cromwell, which was entitled A Remonstrance from the Eternal God. The consequence was that the prophets were declared "nuisances," and imprisoned in "Old Bridewell." Another remarkable publication was A general Epistle from the Holy Spirit, dated from "Great Trinity Lane, at a Chandler's shop, over against one Mr. Millis, a brown baker, near Bow Lane End, London." A pretty full exposition of their doctrines they furnished in 1656 in their publication entitled The divine Looking-glass of the Third Testament of our Lord Jesus Christ, which makes the chief articles of their creed to have been confused notions of Gnostic heresies. Thus they taught that God has the real body of a man; that the Trinity is only a variety of names of God; that God himself came down to earth, and was born as a man and suffered death; and that during this time Elias was his representative in heaven. They also held that God and man were not very subtly intelligible to each other, concerning angels and devils. The Evil One, they taught, became incarnate in Eve, and there is no devil at all without the body of man or woman; and that the devil is man's spirit of unclean reason and cursed imagination, and that this is the only devil we have now to fear." According to them, the soul of man is indissolubly united with the body, with which it dies and will rise
again. The works of Ludovic Muggleton, with his portrait prefixed, were published in 1756, and A complete Collection of the Works of Reeve and Muggleton, together with other Muggletonian Treatises, was published by some of their modern followers in 1832 (8 vols. 4to). A list of books and general index to Reeve's and Muggleton's works was published in 1846, royal 8vo. Among the works written against them are the following: The New Winesses proved Old Heresies, by William Penn (1672). A treatise representing their absurd and mischievous Principles of the Sect commonly known by the Name of Muggletonians (London, 1694, 4to). Muggleton succeeded in gathering a large number of followers, and at the time of his death (1697) the Muggletonians, as they called themselves, were largely scattered all over England. They were generally in good health till the end of the first quarter of this century; but the census of 1851 showed no trace of them, and they are supposed to be now well-nigh extinct. In 1868 one of the most eminent of the sect in modern times, Mr. Joseph Gander, died, and the London papers then announced that with him expired the Muggletonians. He had sustained a place of worship for a few of like mind with himself. Mr. Gander is spoken of as a "sincere member of the sect called Muggletonians for upwards of sixty years." Muggleton himself lies buried in Spinning-wheel Alley, Moorfields, with the following inscription over his tomb: "While mausoleum and large inscriptions give Muggleton literary glory, and grading death much potestive, It is enough briefly to write thy name. The deed is done, actus et rerum rerum. No foreign soil where Muggleton's not found." See Chamberlain, Present State of England (1702), p. 258; Transact. of the Liverpool Lit. and Phil. Society, 1868-70; Stoughton, Eccles. Hist. of England (Ch. of the Restor.), ii, 206; Evans, Dict. of Sects, etc.; Hunt, Religious Thought of England, i, 241.

Muhle (or Mahlus), Haxman, a German theologian, was born at Bremen, March 7, 1666. He was educated at the gymnasium of his native city, but went in 1686 to Hamburg to study ancient languages, and from there to the university at Giessen, where he studied theology. He then spent a year at Frankfort-on-the-Oder; in 1688 attended lectures at Kiel, in 1689 at Leipsic, and in 1690 at Wurzburg. In 1691 professor of the Greek and Oriental languages, of poetry and ecclesiastical eloquence, at the University of Kiel. In 1692 he made a voyage through England and Holland, and thus secured in 1695 the position of professor of theology and inspector of schools of Schleswig-Holstein. In 1697 he was appointed to the city church at Kiel; but as that place did not suit him, he accepted a call in 1698 as general superintendent, chief court-preacher, and provost at Gottorf, with the title of chief councilor of the Consistory, but had to resign this position on account of some difficulties at the court; he returned to Kiel, and was appointed in 1724 senior of the university. He died Dec. 7, 1738. Muhle had a dispute with the Danish superintendent-general Schwarz, who accused him of being a millenarian and a disciple of Coccia, who had tried to cause a schism in the Schleswig-Holstein Church. Muhle was even obliged to go into court, where he reprimanded Schwarz severely; but the dispute did not end until Schwarz died. His most important works are: De Missia sedente ad destram Dei; Dissertation philologico-theologica ad vindicandum locum Pat. cr., s. contra fideiwmum Judaeorum, sub modernum D. Clodi (Gisbe, 1687, 4to): —Buch der Gewissenserklärung der Gottholdischen und der allgemeinen Geschichts (Kibun, 1692, 8vo): —Daphnia, sive de obitu C. Alberti, boscati in sacris Diei Muggletae memoriae religioso, quam par est, affecta cultuque ductam (ibid, 1695, fol.): —Kurz An- seige der fopulen Beschlechungsmachen des Dr. Jonas Schwarz gegen ihn (Schleswig, 1702, 8vo): —Erörterung verschiedener, jetzter Zeit erregten Materien in drei Ordina- tionsreden Ehrlich abgehandelt, nebem einem Voperechts von D. Schmaraeus und einer kurzen Beispielen (Trntr., 1713, 4to).

Muhlenberg, Gotthilf Henry Ernest, D.D., the youngest son of Dr. H. M. Muhlenberg, was born at the Trappe, Pa., Nov. 17, 1758. He spent several years at the University of Halle in the prosecution of his studies for the sacred office. On his return to this country in 1770 he was ordained to the work of the ministry, and immediately became assistant to his father, and third min- ister of the United Lutheran churches in Philadelphia. He continued to occupy this position until the British obtained possession of the city. As he was threatened with the halter, because of his zealous attachment to the cause of the Revolution, he found it necessary to flee from the scene of danger. Disguised under a blanket, and with a rifle on his shoulder, he had nearly fallen into hostile hands through the treachery of a Tory innkeeper, who had intentionally directed him to take the road by which the British were approaching. He was pursued and nearly overtaken. However, he succeeded in making his escape and reached New Haven in safety. Re- lieved for a time from professional duties, he engaged with great zest in the study of botany, and acquired that love for this favorite pursuit which afterwards so strongly manifested itself. On the election of his broth- er to a civil office he succeeded him as pastor.
year 1780 he removed to Lancaster, where he labored in the ministry with great efficiency, enjoying the uninterrupted regard of his congregation, and exercising an influence in the community rarely thine privilege of the most highly favored to enjoy, until his death, which occurred May 23, 1815. He was a man of vigorous intellect and extensive attainments. He was an able theologian, a good linguist, and was distinguished as an Oriental scholar. His acquisitions in medicine, chemistry, and mineralogy were also considerable. As a botanist he had a European reputation, and was in correspondence with the most distinguished savans of the Continent. His Catalogus Plantarum and Descriptio Uterior Graminum are well known. His Flora Lancastriensis is still in manuscript, as well as some others which came the department of theology and ethics. (M. L. S.)

Muhlenberg, Henry Augustus, a minister of the Lutheran Church, noted, however, more as a statesman than as a theologian, was the son of the preceding, and was born at Lancaster, Pa., May 13, 1782. He was largely educated by his father; and, after studying theology, was ordained for the ministry, and became pastor at Reading, Pa., in 1802. Poor health obliged him to resign the pastoral charge in 1828, and he retired. He was, however, not suffered long to enjoy this life, for he was chosen member of Congress in 1829, and so continued until 1838, when he was made minister to Austria, a position which he held until 1840. He also held other political offices. He was a candidate for governor of Pennsylvania in 1853, and declined the office of secretary of the navy and the mission to Russia. He published the life of his uncle, Gen. Muhlenberg (Phila. 1819).

Muhlenberg, Henry Melchior, D.D., the patriarch of the Evangelical Lutheran Church in America, was born Sept. 6, 1771, at Einbeck, in Hanover, then a free city of Germany. He was the son of Nicolaus Muhlenberg, a Calvinist, and a native of Saxony, but who, like many of the earlier followers of the great Reformer, having suffered severely during the Thirty-years' War, which for a time threatened the extermination of the Protestant religion in Europe, emigrated to Hanover. His father was well known in the community, and highly esteemed. He was a member of the city council, and also held a judicial appointment, from which he derived the necessary means for the support of his family. His mother was the daughter of a retired officer, and is represented as a woman of sterling good-sense, great energy, and devoted piety. Henry was early dedicated to the study of the Christian scriptures, was carefully instructed by his parents in the principles and duties of the Christian religion. These influences were never effaced from his mind. In his youth he laid the foundation of that character which proved so valuable in his future life. In consequence of the death of his father his studies were interrupted, and he was thrown upon his own resources for a support; but his leisure hours were faithfully devoted to the acquirement of knowledge. Nothing could repress his love of study. His early life was years of privation and toil, yet without this preparatory discipline he would probably never have acquired those habits of self-reliance and systematic effort, that strength of purpose and heroic determination, which so prominently marked his subsequent career, and contributed so much to his usefulness in this Western World. From his twelfth till his twenty-first year young Muhlenberg toiled incessantly in his efforts to assist in the maintenance of the family, yet during the intervals of repose he improved every opportunity afforded him for mental culture. On reaching his manhood he secured the position of tutor in the school of Raphaelus at Zellerfeld, and the time not officially employed he devoted to study. In the spring of 1795 he entered the University of Göttingen, where he remained for three years, triumphing over all the difficulties he encountered, and winning the confidence of his instructors. The pious teachings of Dr. Oporin, who had kindly received him into his family and employed him as an amanuensis, exalted him. He early exerted himself to attain a knowledge of the Scriptures, and in him a deeper insight into his own character, and a clearer apprehension of the plan of salvation. "By his lectures," he says, "on the total depravity of nature I was much moved, and so convinced of my sinfulness that I loathed myself as an account of my folly. I was convinced by the Word of God that till this period my understanding in spiritual things was dark; that my will was disinclined to that new life which proceeds from God; that my memory had been employed only in collecting carnal things, my imagination in discovering sinful objects for the gratification of my perverted affections. I resolved to make members of him, and take arms against the chief of sin and Satan's weapons of unrighteousness. But as I learned to recognize sin as sin, then followed sorrow, repentance, and hatred of it—shame and humiliation on account of it—hunger and thirst for the righteousness of Jesus Christ. In this state of mind I was directed to the crucified Saviour; the merits of his death gave me courage; my heart was quenched by him, the Living Spring." From this period he became a most earnest Christian. He burned with an ardent desire to do good. On his graduation at Göttingen he repaired to Halle. There he continued his studies, and taught in the Orphan House. He lived in the most intimate terms with Dr. D. Oporin, Celarius, and Fabricius. By their advice he was led to prepare himself for the missionary work, and Bengal was the point selected as the field of his operations. While arrangements were making to send him to India, and just after he had been solemnly set apart to the work of the ministry, a most important application from congregations in Pennsylvania reached Germany for some one to supply the great spiritual destitution that existed. The attention of the faculty was immediately directed to Muhlenberg, then in his thirty-first year, as a most suitable person for the position. Cheerfully yielding to the call, and with unshaken assurance in God, he was ready to abandon the comforts of home and the society of friends, as well as the prospects of future distinction to which a mind so highly gifted might have aspired, and to settle in this remote and, at that time, wild and inhospitable region as a humble instrument for the advancement of Christ's kingdom. He reached this country in 1742. His arrival was an occasion of great joy and inexpressible gratitude to his German brethren. The Church he found in a most wretched condition; in his own language, it was not plantata, but plantenda. There had been numerous settlements in the country and the conversion of the Indians in a short time had been furnished with able and faithful ministers, but as a general thing the Lutheran population had been sadly neglected. Muhlenberg's advent therefore marks a new era in the history of the Lutheran Church in this country. Its character soon changed; its condition gradually improved; its position was at once strengthened, and permanence given to its operations. New and efficient auxiliaries were made to the ranks of the ministry—men educated at Halle, imbued with the spirit of their Master, and wholly devoted to their work, upon whose labors the blessing of Heaven signalized rested. Entering upon the discharge of his duties, Muhlenberg devoted his pastoral care to the associated churches of Philadelphia, New Hanover, and Providence, which had united in a call for a minister. These three congregations continued to form the more prominent scenes of his ministerial labors, although there was probably not an organized Lutheran church in his day in which he did not preach; and wherever the office of a minister was invoked, he was always invited, and seldom did he fail in reconciling differences and restoring concord. His duties, in many respects, resembled those of an itinerant bishop whose diocese extended over a large territory. Often he undertook distant and irksome journeys for the purpose of gathering together the scattered flock,
preaching the Word and administering the sacraments, introducing solitary discipline for the government of the churches, and performing other services in the interests of the nation. In the 17th century, Dr. Muhlenberg resided in Philadelphia; the next sixteen at Providence. In 1761 he returned to Philadelphia, and remained fifteen years, the condition of things in the congregation there requiring his presence. In 1776 he resumed his charge in the country. During the War of the American Revolution, because of his devotion to the principles involved in the struggle, he excited against him the most violent opposition, and his life was often exposed to imminent peril. He was warned and entreated to remove farther into the interior from the scene of hostilities, but he always refused. He was extensively known, and his relations to the Revolution were well understood. Many took advantage of his position, and persons of all classes resort ed to his house. "His home," says a contemporary, "was constantly filled with fugitives, acquaintances and strangers, with the poor and hungry, noble and common beings, and the grizzly lion went organ grinder, as he never felt the suffering of others." The last few years of his life Dr. Muhlenberg's health gradually declined. His mind, in prospect of death, was calm, sustained by a humble yet firm reliance upon the Saviour of sinners. When the summons came, with entire composure, and in confident expectation of a blissful intercourse with his God, he yielded up his spirit, and reposed in the bosom of the Lord of his life. His active and useful career terminated Oct. 7, 1787. His death was the occasion of wide-spread and unfeigned sorrow. The people grieved that they should no longer see his face and listen to his paternal counsel. He was the friend and father of all, and all regarded it as the greatest of their losses. His wife, his father, his friends, were not long left without a guide removed. In many places the bells were tolled, the churches enshrouded in mourning, and funeral sermons delivered, in grateful remembrance of the departed, and as testimonial of the respect his worth everywhere inspired. The honored remains of the patriarch peacefully rest near the church which was so long the scene of his earnest labors, and in which he so often dispensed the symbols of the Saviour's love among the people of God, and animated them in their Christian pilgrimage by the hopes and consolations of the Gospel. The history of Dr. Muhlenberg's life is the story of the War of the New World. His ministration to the needy was devoted to the study of the Scriptures, his learning, its affections, its influence, its energies, to all the interests of the Church and of humanity, to the glory and service of that Saviour who redeemed him with his own precious blood. He possessed a combination of qualities which peculiarly fitted him for the duties he was called to perform. Gifted by nature with the highest powers, which had been brought under the influence of the best culture; endowed with a noble heart, which had been sanctified by divine grace and disciplined in the school of affliction; and in the possession of a physical constitution which in early life had been marked to labor with an ardent, love piety, an earnest and enthusiastic devotion to the work, nothing seemed wanting for the successful accomplishment of his mission. He was the man kindly raised up by Providence for the particular emergency required at the time in this western hemisphere. The most sanguine expectations of his success were entertained by those who had been in the labor of the fields for anni for the colonists' instruction, and who were more than realized. His praise is deservedly in all the churches. He has left a name fragrant with the richest honor attainable in this life—that of a good man, sincere in his professions and upright in his conduct, widely esteemed and greatly beloved. His society was sought and his influence courted by the learned men of the day. By the special invitation of the faculty he attended the Commencement exercises of Princeton College, and, in the University of Pennsylvania, at which he received the doctorate in divinity, a distinction in those days rarely conferred, and only upon those whose claims to the honor were unquestionable. See Helmut, Denkmahl der Liebe u. Achtung, etc. (Philadelphia 1788); Stoever, Life of H. M. Muhlenberg (Philadelphia 1856); Erasmus Quaestiones, (London 1790), etc. Dr. John Peter Muhlenberg, a Lutheran minister, was the eldest son of Henry Melchior Muhlenberg, and was born at the Trappe, Montgomery County, Pa., Oct. 1, 1746. His early education was conducted by his father and Dr. Smith, of Philadelphia. In the sixteenth year of his age he, with his two brothers, was sent to Germany to be educated at the University of Halle. On his return to this country, in 1768, he was ordained a minister of the Lutheran Church, and was for a season pastor of churches in New Germantown and Bedminster, N. J. In 1772 he removed to Woodstock, Dunmore County (now Shenandoah), Va., where many Germans from the Middle States had settled, and, forming themselves into a congregation, requested Dr. Muhlenberg to send them his son as their rector. These Lutherans, in consequence of the laws then existing in Virginia on the subject of Church establishment, had formed themselves into a corporation for the support of a Lutheran Church, and in order that their minister might enforce the payment of tithes, it was necessary that he should be invested with episcopal ordination. Accordingly Mr. Muhlenberg repaired to England for the purpose, and in connection with Mr. White, afterward the venerable bishop of Pennsylvania, was ordained as priest by the lord bishop of London. He continued his labors in Virginia till 1775, when his ardent patriotism and military spirit induced him, at the solicitation of general Washington, with whom he was on the most intimate terms, to accept a colonel's commission in the army. It is said that after he had received the appointment he presented his resignation to his congregation, in the course of which he eloquently deplored the wrongs our country had suffered from Great Britain, and then added that "there was a time for all things; a time to preach and a time to pray; but there is also a time to fight, and that time has now come." Then, pronouncing the benediction, he deliberately laid aside his gown, which had thus far concealed his military uniform, and, proceeding to the door of the church, ordered the drums to beat for recruits. Nearly three hundred men enlisted under his banner, with whom he immediately marched to the protection of Charleston, where in the South Carolina militia he distinguished himself in the defense of Sullivan's Island, and performed a conspicuous part in all our Southern campaigns. Having been promoted in 1777 to the rank of brigadier-general, he held command in the battles of Brandywine and Germantown, and shared the dangers and responsibilities of Monmouth, Stony Point, and Yorktown. He continued in service until the close of the war, and was then promoted to the rank of major-general before the army was disbanded. After the war, under the old constitution of Pennsylvania, he was elected vice-president of the state, with Benjamin Franklin as president. He was chosen for a second term as a representative in Congress, and also served as a presidential elector. In 1801 he was selected by the Legislature of Pennsylvania as United States Senator. He was likewise honored with several executive appointments. Jefferson appointed him supervisor of the revenue for Pennsylvania, and afterwards collector of the port of Philadelphia, which office he held more than thirty years. For motives of public honor and duty he retained the confidence of the government till his death, and enjoyed the esteem of the community. He died at his residence near Gray's Ferry, Philadelphia, Oct. 1, 1807, and was buried by the side of his father at the Trappe. See Anderson, Hist. of the Colonial Churches of Great Britain, iii, 269. (M. L. S.)
Mulberry stands in the Author. Versa, as the rendering of the Heb. מַעֲרִיב (baka), regarded by Gesenius, Heb. lex. s. v., as if from מַעֲרִיב, to weep, or in the plural מַעֲרִיבים (bakiim); which occurs, the first in Ps. lxxix, 6, “Who passing through the valley of Baca make it a well; the rain also filleth the pools;” the second in 2 Sam. v, 23, 24, and in 1 Chron. xiv, 14, 15, where the Philistines having spread themselves in the valley of Rephaim, David was ordered to attack them from behind, “And let it be, when thou hearest the sound of a great noise of horsemen, and of chariots, and of a great tumult, in this valley, as the noise of Egypt, where art thou, David?” “In the forger of these passages the term is usually regarded as an appellative, i. q. “the valley of tears” (so the Sept. έλαδός τοῦ γλακύναρος, Vulg. vallis lacrymargorum; see Baca); but in the latter two it undoubtedly designates some tree or shrub (the Sept. has also έλαδός in 2 Sam., but δρυς in 1 Chron.; the Vulg. pars in both places). The Jewish rabbins, with several modern versions, understand the mulberry-tree; others retain the Hebrew word. Neither the mulberry nor the pear tree, however, satisfies translators and commentators, because they do not possess any characters particularly suitable to the above passages. With regard to the mulberry, Rosenmüller justly observes (Alberth. IV, 1, 247 sq.; Bibl. Bot. p. 256) that this interpretation “is countenanced neither by the ancient translators nor by the occurrence of any similar term in the cognate languages”—unless we adopt the opinion of Unger who (Diss. theol. III, 72) having in view the root of the word בזָכָה, “to weep,” identifies the name of the tree in question with the mulberry, “from the blood-like tears which the pressed berries pour forth.” The mulberry-tree, moreover, appears to have another name in Scripture, namely, the “sycamine.” Though there is no evidence to show that the mulberry-tree occurs in the Hebrew Bible, yet the fruit of this tree (γύπορος) is mentioned in 1 Mac. vi, 54 as having been, together with grape-juice, shewn to the enemy Ephraim, in order to persuade these animals and make them more formidable opponents to the army of the Jews. It is well known that many animals are enraged when they see blood or anything of the color of blood. See Sycamine.

Celsius (6, 389) quotes Abul Fadl’s description of a shrub of Mecca called baka, which abundant fruit, distilling a juice from its branches when cut (whence the name, i. e. teardrop, and of a warming property; apparently some species of Amyris or Balsamodendron. Most lexigraphers are satisfied with this explanation. That plant is probably the same with the one referred to by Forskål (p. 196) among the obscure plants that fluctuate from thence to Jiddah, and which he says was called baka, or elka, with a poisonous milky sap. If this be the same as the former, both are still unknown any further, and we cannot therefore determine whether they are found in Palestine or not. As to the tree of which Abul Fadl speaks, and which Sprengel (Hist. vet. herb. p. 12) identifies with Amyris Gikanidea, Lin., it is impossible that it can denote the baka of the Hebrew Bible, although there is an exact similarity in form between the Hebrew and Arabic terms; for the Amyrisaceae are tropical shrubs, and never could have grown in the valley of Rephaim, the scriptural locality of the baca.

“The tree alluded to in Scripture, whatever it is, must be common in Palestine, must grow in the neighborhood of water, have its leaves easily moved, and have a name in some of the cognate languages similar to the Hebrew baca. The only one answering to these conditions is that called bak by the Arabs, or rather shrub-bak—baka—that is, the fly or gnat tree. It seems to be so called from its seeds, when loosened from their capsular covering, floating about like gnats, in consequence of being covered with light, silk-like hairs, as is the case with those of the willow. In Richardson’s Arabic dictionary the bak-tree is considered to be the elm; but from a passage of Dioscorides, preserved by Piumius, the dirdar of the Abissins seems to be another kind of bak-tree, probably the arbor cucurbit (tree of gnats) of the Latin translators of Avicenna. Now in other Arabic authors the dirdar is said to be a kind of gourd, and the gourd is as- 

sociated with the poplar (Morosus, Lombardeus, Bibl. Bot. p. 244). As it seems therefore tolerably clear that the bak-tree is a kind of poplar, and as the Arabic bak is very similar to the Hebrew baka [but in the Hebr. the k in the name is 2, while in the Arabic it is which corresponds to p], so it is probable that one of the kinds of poplar may be intended in the above passages of Scripture. And it must be noted that the poplar is as appropriate as any tree can be for the elucidation of the passages in which the name occurs. For the poplar is well known to delight in moist situations, and bishop Horne, in his Comm. on Ps. lxxix, has inferred that in the valley of Baca the Israelites, on their way to Jeru-alem, were refreshed by plenty of water. It is not less appropriate in the passages in 2 Sam. and 1 Chron., as no tree is more remarkable than the poplar for the case with which its leaves are rustled by the slightest movement of the air; an effect which might be caused in a still night even by the movement of a body of men on the ground, when attacked in flank or while unpre- paired. That poplars are common in Palestine may be proved from Kitto’s Palestine, p. 114: ‘Of poplars we only know, with certainty, that the black poplar, the aspen, and the mespil are native to the Lebanon, and it is likely that the aspen, whose long leaf-stalks cause the leaves to tremble with every breath of wind, unites with the willow and the oak to overshadow the watercourses of the Lower Lebanon, and, with the oleander and the acacia, to adorn the ravines of Southern Palestine;” we do not know that the Lombardy poplar has been noticed but
by lord Lindsay, who describes it as growing with the walnut-tree and weeping-willow under the deep torrents of the Upper Lebanon." See FOLIAR.

Mulcaster, Richard, an English divine and teacher noted for his scholastic attainments, was a native of Hants, and a member of the family in which he was born. He received his earliest education on the foundation at Eton, under the celebrated Audel, whence, in 1548, he was elected scholar of King's College, Cambridge. From Cambridge he removed to Oxford, and in 1550 was chosen student of Christ Church. In the next year he was licensed to proceed in arts, and about the same time became known for his proficiency in Eastern literature. He began to teach in 1559; and on September 24, 1561, for his extraordinary attainments in philology, was appointed the first master of Merchant's. School in London, then just founded. Here he continued till 1568, when he resigned; and some time after he was appointed upper master of St. Paul's School. Here he remained twelve years, and then retired to the rectory of Stanford Rivers, in Essex, to which he was presented by the queen. He held this place until his death, April 15, 1611. Several of his smaller compositions, commendatory verses, etc., are prefixed to his works: contemporaries, such as Gaskoge, have printed some Latin verses of his composition which were spoken before the queen at Kenilworth in 1576. His separate works were his Positions, wherein those primitive circumstances be examined which are necessary for the training up of Children, either for skill in th'ire book or health in their bodies (London, 1567, 4to); into which a second part was promised:—The first part of the Elementary, which entreateth chiefly of the right writing of the English tongue (London, 158, 4to); a book which Warton (Hist. English Poetry) says contains many just criticisms and observations on the English language:—Catechismus Paulus de uxuro Scholae Paulinae continentur, ad formam parvi illius Anglici Catechismi qui peruers in communem Precum Anglicorum libro ediscendus propunitur (1601, 8vo). This is in long and short verse, and, though now forgotten, was once esteemed. Mulcaster was a firm adherent to the Reformed religion; a man of piety, and a "priest in his own house as well as in the temple." See Gentleman's Magazine, vol. xxxii.; Hook, Eccles. Bihg. vii., 389; English Cyclop. s. v.; Fuller, Worthies of England, s. v.

Muciliger (i. e. the Softener), a surname of Vulcan, the Roman god of fire. This euphemistic name of Muciliger is frequently applied to him by the Latin poets.

Mudcr, Israel, a Jewish writer of note, and celebrated also for his philanthropic labors among his people, flourished in Holland in recent times. He died at Amsterdam Dec. 29, 1862. He contributed largely for the dissemination of culture among his co-religionists, and did everything in his power to elevate the Jewish people in their literary life. He also wrote much himself, and among other works published a Hebrew-German dictionary and many essays on various subjects.

Mule (מִלֵּא, pê' red, 2 Sam. xiii, 29, and often elsewhere; fem. מִלָּה, pirâd, 1 Kings i, 38, 38, 44; so called from their quick pace, or from carrying loads; but מַלָּא, re'hash, Esth. viii, 10, 14, denotes a steed or nobler horse; "swift beast" in Mic. i, 10; "dromedary" in 1 Kings iv, 20, a hybrid animal, the offspring of a horse and a ass (comp. Varro, De rust. loc. 8; Pliny, viii, 69; Colum. vi, 86; Assop, Fob. 140; Eliân, Anim. xii, 16; Strabo, v, 212). Of this animal there are two kinds: one is the produce of a he-ass and a mare; the other the produce of a she-ass and a stallion. The former is the mule, commonly so called. That in respect to swiftness the hybrid between the ass and the mare is much superior to the hybrid between the horse and the she-ass is abundantly attested (Aristot. Rhetor. iii, 2; Pliny, Hist. Nat. viii, 44, etc.), which is in favor of Bochart's hypothesis that mules are meant by the יָהָנִיָּה (Yēhanīyāh) of Esth. viii, 10, 14. See CAMEL. A mule is smaller than a horse, and is a remarkably handy, patient, obstinate, sure-footed animal, living ordinarily about 15 years; it is twined with both horse and ass, and is said to be sterile; as distinct species of animals do not freely intermix their breed, and hybrid animals do not propagate their kind beyond at most a few very few generations, and no real hybrid races are perpetuated. The claim of Anah, son of Zibeon, to the discovery of breeding mules, as asserted in the Talmudic literature, is not founded on any expression of national vanity (see Bochart, Hieros. 1, 221 sq.; Douayl nat. ii, 41 sq.). It rests on Gen. xxiii, 24, where יָהָנִיָּה, 'is rendered mules; but it more probably means water—meaning the warm springs of Callirrhoe on the eastern shore of the Dead Sea. See ANAH. There is no probability that the Hebrews bred mules, because it was expressly forbidden by the Mosaic law to couple animals of different species (Lev. xix, 19). But they were not forbidden to use them (Phil. Opp. ii, 307); and we find under the monarchy that mules were in common among the Hebrews (see also Josephus, Life, 20), and they were probably known much earlier. Even the kings and most distinguished nobles were accustomed to ride upon mules (and apparently they only), although at first they used only male and female asses (Gen. xvi, 9; 1 Kings i, 14, 15; 2 Kings v, 17; 2 Chron. xii, 24; Ps. xxxii, 9). It is an interesting fact that we do not read of mules till the time of David (as to the yahaniyāh, A. V. 'mules', of Gen. xxxvi, 24, see above), just at the time when the Israelites were becoming well acquainted with horses. After this time horses and mules are in Scripture often mentioned together. After the death of David's reign, as Michaelis (Comment. on Loci of Moses, ii, 477) observes, they became all at once very common. In Ex. ii, 66, Neh. vii, 68, we read of two hundred and forty-five mules; in 2 Sam. xii, 29, 'all the king's sons arose, and every man gat him up upon his mule.' Absalom rode on a mule in the battle of the wood of Ephraim, at the time when the army went away from under him, and so caused his death. Mules were among the presents which were brought by year by year to Solomon (1 Kings x, 25). From the above-cited Levitical law we must suppose that the mules were imported, and less expensive than the horses, and that their possession by the members of the priestly families, as the custodians of the observance of the ceremonial injunctions, bred their mules. We learn from Ezekiel (xxvii, 14) that the Tyrians, after the time of Solomon, were supplied with both horses and mules from Armenia (Togarmah), which country was celebrated for its good horses (see Strabo, xi, 7, ed. Kramer; comp. also Xenoph.; Asher. iv, 5, 6; Herod. vii, 40). Michaelis conjectures that the Israelites first became acquainted with mules in the war which David carried on with the king of Nisibis (Zobah) (2 Sam. viii, 5, 4). In Solomon's time it is possible that mules from Egypt occasionally accompanied the horses of the court, and that the king of Israel obtained from that country; for though the mule is not of frequent occurrence on the monuments of Egypt (Wilkinson's Anc. Egypt, i, 386 [London, 1854]), yet it is not easy to believe that the Egyptians were not well acquainted with this animal. That a friendship existed between Solomon and Pharaoh is clear from 1 Sam. xi, 16, as well as from the fact of Solomon having married the daughter of the king of Egypt; but after Shishak came to the throne a very different spirit prevailed between the two kingdoms: perhaps, therefore, from this date mules were obtained from Armenia." In latter times (2 Kings xxv, 14) it is stated that 30,000 mules were to have obtained the more valuable mules from Assyria and Persia (Isa. lxvi, 20; Esth. viii, 10, 14; comp. Cæs. Pers. 44; see Host, Martzkh, p. 299). We read of mules of all kinds in the N. T.; perhaps, therefore, they had ceased to be imported. See Horses.
ly to the "focaria" and "concubina" of later times, as well as to the "agapeta" and "dilecta" of earlier date, and is by Protestants held to be simply an expression of the council against the improper female companionship of unmarried priests. Roman Catholics, however, interpret it to carry the desire for the separation from all female companionship, even the wife. See Lea, Historical Sketch of Sacerdotal Celibacy in the Christian Church, p. 51-58. See also CELIBACY.

Mullah (a title merely; see MULLAH) Fīrūz Beka-
Kawds, a modern Persian ecclesiastic, noted as a poet, was born at Bombay in 1739. When only a youth he accompanied his father to Persia, and became acquainted with the rich poetical literature of that country. He then conceived the idea of composing an epic poem like Ferdowsi's Šah-Nāmeh, taking, however, his subject from modern history. He called it Šah-Nāmeh. It treats of the conquest of the East Indies by the English, and elevates poor George III to the character of a hero. Containing 110,000 verses, it was to extend to the battle of Púnah (1816), but the author died in his native city in 1881 before he had completed it. His nephew, Mullah Rustem b. Kaškobad, published (Bombay, 1837, 4to) a part of the first volume, with a prospectus of the whole work. The poem has since appeared complete at Calcutta (1889, 3 vols, 4to). But these poetical labors did not only not interfere with the performance of Firuz's duties as high-priest of the Parsees, but he also devoted himself to ecclesiastical studies, and published an edition of the Desâtir, or sacred writings of the ancient Persian prophets in the original tongue, etc., together with an English translation of the Desâtir, and a commentary by M. Eraskine (Bombay, 1818, 2 vols, 8vo). He published two essays in response to Hacchem of Isfahan, to prove that the Persian intercalary era dates not from Zoroaster, but is of modern origin. They were both printed at Bombay, one in 1829 (1 vol, fol.), the other in 1832 (4to). All his books and manuscripts Mullah Fīrūz bequeathed to the grand library of the Parsees.

Mullens, William, a minister of the Methodist Episcopal Church, South, was born in Virginia in 1804. He removed with his parents to Bedford County, Tenn., when a youth, and settled on Duck River. He joined the Church in 1820, and was licensed to preach shortly afterwards. In 1822 he joined the Tennessee Conference, and labored two years in West Tennessee. He afterwards travelled Bigbee, Duck River, Bedford, Dickson, Chapel Hill, and Lynnville circuits. His health failing him, he located for a while; but he had no sooner re-engaged in his profession, than it was by health better than ever. He was again elected to the conference in 1880, and was granted a supernumerary relation, in which he continued until his death, March 18, 1870. "By nature he was a nobleman, and ever preserved his integrity of character. His sympathies were always with the afflicted, and his liberality in relieving the sufferings of others was proverbial." See Minutes of Conferences of the M. E. Church, South, 1870.

Müller, Adam Heinrich, a German statesman, noted for his efforts to give the secular laws a Christian basis, was born at Berlin June 30, 1779, and studied philosophy at the University of Göttingen, where in 1800 he spoke publicly against the French Revolution. In his journeys in later years he came to Vienna, where he turned Roman Catholic. He returned to Berlin; but not receiving an office there, he went again to Vienna, and entered the state service of Austria. He was intrusted with political missions. He went to Paris with Metternich, was afterwards consul-general in Leip-
sic, and was finally recalled to Vienna with the title of Counsellor of the Court. From his favoritism being the fathers of the Church, he tried to give to all political and secular relations a Christian coloring. He died Jan. 17, 1829. His works are, Vorlesungen über die deutsche Literatur und Wissenschaft (1807);—Von der Nothwendigkeit einer theologischen Grundlage der Staats-

Representations of Mules on the Monuments.

Fig. 1. Egyptian Mule (painting from Thebes in British Museum).—Fig. 2. Roman Mule carrying Nata, etc. (Scene in British Museum).

Mules are represented on some of the ancient Egyptian bas-reliefs; they are seen in procession, belonging to a captured people (Layer's Nicer, ii, 323, 324). They were also ridden in battle and by kings (ibid. 2d ser. p. 446, 449). There are various breeds of mules in Syria. Some very beautiful animals are produced from high-blood Arab mares, but they are few in number, and can only be possessed by the wealthy. Bárchard states that the breed of the Balahek mules is highly es-
teeemed, and that he had seen some which were worth from thirty to five-and-thirty pounds (Trav. i, 57). The more ordinary sort of mules, which are capable of carrying heavy loads, are employed in the caravans; and they are of great service for the mill and water-
wheelers. The domestic trade with the maritime towns and the mountains is not only carried on chiefly by mule caravans, but they are sent even to Erzerum, Constanti-
napole, and other remote towns (Russell, Aleppo, ii, 50 sq.). In these caravans the male travellers are mounted on mules lightly laden, generally the mere personal luggage of the rider. Persons of rank travel in a kind of litter, carried by two mules. Within the towns, and in short excursions, asses are generally pre-
ferred, and the mules bear the luggage. In modern times the breeding of mules in Southern Europe and Western Asia has been greatly increased. Those of Persia are described as of large size, and of amazing strength and power of endurance. They will travel the stony and steep roads over rocky mountains, day after day, at the rate of from twenty-five to fifty miles per diem, loaded with a weight of 300 pounds. They require more food than the horse. The muleteers never remove the pack-saddles from their backs, except when cleaning or currying them. If the men find that the back has been galled, they take away some of the stuffing from the pack-saddle, where it presses on the sore part, and then put the saddle on again, experience hav-
ing taught them that such sores, unless healed under the saddle, are apt to break out again. See Ugolino, De re rustica ilibr, in his Theusaur. xxix. pt. iv, 10; Bochart, Hieroz. i, 209 sq.; Robinson, Researches, passim. See Ass.

Müller—Subintroducta (γενος υπερσεκτορος) is a term which was used by the great Nicene Synod in a sense synonymous to the "femina extranea," and near-
MÜLLER

Müller, Andreas, a German divine and Oriental scholar, greatly distinguished for his labors in illustration of the Hebrew and Greek languages of the Pomeania, and was born in 1680. But little is known of his personal history. He assisted Walton in his Polyglott Bible and contributed to Castell's Lexicon. He also published a Treatise on Cuthay; Japanese Alphabet; Chinese Basilicon, and other works. He died in 1694.

Müller, Daniel, a German religious enthusiast of low origin and condition of life, was born in Nassau in 1716, the time of the Pietist movements, when various indications of an inward religious life made their appearance in Germany, and many opposing circumstances excited a longing for a new development of the Church. At first he attached himself to the secondary effects of Pietism, and busied himself with Jacob Böhme and other German mystics. He also engaged in historical studies, and his mysticism became connected with a historical scepticism. At this juncture also there was the commencement of a rationalistic reaction, especially hastened on by the appearance of the Wofenbietel Fragmente. But neither of the two parties—neither the Church nor the rationalistic—succeeded in wishing to maintain the authority of the Bible against the new scepticism, and to insist on its inspiration in the most unqualified sense. But, on the other hand, he was not satisfied with orthodoxy; he was led to a peculiar religious idealism, by which he wished to establish a harmony of all religions. An original revelation at the baptism of Christ, the symbols of which had been misunderstood. Everything in the Old Testament and the New was to be understood symbolically; it was the garb of God's inner revelation, and of the eternal revelation of the divine Logos. Everything historical, as such, is untrue; it is only the clothing of ideal truth. In this view of the life of Christ, although proceeding on quite different principles, he was the forerunner of the modern mythic school, and combat the belief in the historical miracles of Christ on grounds very similar to those brought forward by Strauss. If such miracles, he says, as feeding the five thousand had actually happened, all the Jews would have received Christ, and not have crucified him. Indeed, Müller went so far as to give any religion the authority for man's ultimate conversion to the state of eternal bliss, and Adam and Christ were to him simply the same human formation of all-pervading Deity, the same divinity pervading the sacred writings of all nations. Later in life Mr. Müller himself claimed to be an Elias, called to redeem the world from the yoke of the leader. He travelled through the whole northern part of Germany to announce that the external Church was about to be subverted; and although he died in 1782, under an impression that God had accepted him, he lived the last years of his life in Germany. They reject the historical Christ, look upon infidels as their brethren, and are expecting Müller's return to set up a universal kingdom. See Keller, Daniel Müller, Religionsgeschwärmer des Achtzehnten Jahrh. (Leipzig, 1834); Zeitschr. f. Hist. Theologie, 1854; Neander's Hist. Christan Dogmas, p. 584, 585; Hase, Ch. Hist. p. 508.

Müller, Friedrich Theodorus, a German theologian, born at Ilmenau, Sept. 10, 1716; was educated at the gymnasiurn at Zittau, and entered the University of Jena in 1735, where he studied theology, philosophy, and ancient languages. He was appointed in 1742 deacon of the Stadt Kirche at Jena; in 1746, assistant of the philosophical faculty; in 1754, assessor of the consistory; in 1754, professor of theology; and in 1755, architect of the university of Jena, where he died in 1766. He published in 1745 a novel on the barbacc auctori, in Latin. His most important works are, Dias, de memoria amplitudine et dieriscitae (Jena, 1753, 4to); — Dias. Specimen septemviri divinae ev nse nicipit. In Scrupula S. methodo demonstrativa (ibid. 1789, 4to); — Dias. In Probatione Hebraorum esse.nominis (ibid. 1740, 4to); — Dias. Theologia hebraica apud Hebrewum quod legati, vicarii et barones appellarisu conuerentur (ibid. 1745, 4to); — Progr. Animis humanae substantiae in completa argumentum pro resurrectione carnis expectanda (ibid. 1781, 4to).

Müller, Georg Christian, a German theologian, was born in 1769 in Mühlhausen; received his preparatory education at his native place, then went to the university at Halle, and became pastor at Neumark, near Zwickau, where he died about 1800. His most noteworthy works are, Entwurf einer philosophischen Religionlehre (Halle, 1798, 8vo); — Protestantismus und Religion; ein Versuch zur Durchleitung ihrer Verhältnissse (Leipzig, 1809, 8vo); — Uber Widersprünge in der Ethik. These appeared in vol. ii von Zeitgeschichte für Moraen. (Jena, 1818, 8vo).

Müller, Helmut (1), Pr. a noted German divine, was born Oct. 18, 1831, at Lubeck, where his parents were obliged to quit because of Wallenstein's hordes. His earliest religious impressions he received from his mother Elizabeth, to whom he was indebted, like Augustine to his mother Monica, or Chrysostom to Anthusa. Although of a feeble constitution, Müller made such progress in the school of his native place that when, in 1844, his parents returned to Rostock he was matriculated as a student of philosophy, though only thirteen years of age. For three years he attended the lectures of Littkeimann (q. v.), went in 1847 to Greifswaldie to study theology, and was honored with the degree of magister artium. Having travelled for some time in order to enrich his mind with knowledge, he returned in 1851 to Rostock, where he commenced a series of lectures, which were so highly spoken of that the magistrat appointed him archdeacon of St. Mary's Church when hardly twenty years of age. A year later the University of Helmstedt conferred upon him the degree of doctor in divinity, but the university not acknowledging him worthy until seven years afterwards. In 1859 he was appointed professor of Greek, in 1862 he became a member of the theological faculty and pastor; and in 1871 the whole clergy unanimously appointed him as their superintendent, and this position he has held to the present day. He is, however, one of the most influential men in the University. Müller belonged to those men whom Providence had called to sow the seed of a new and fresh evangelical life in a soil which was enriched with the blood of the Thirty-Ten years' War, Lutherian orthodoxy, which had become weakened through constant controversies, not being sufficiently strong to successfully supplant error by truth in life as well as in faith. Christianity was to Müller not a dogma, but life, and thus he may be regarded, in connection with Joh. Arndt (q. v.), Val. Andreas (q. v.), and Chr. Schriver, as the predecessor of Speer; and like the writings of Arndt and Schriver, his own writings are read by the German people up to this day. Müller was a voluminous writer, and wrote not only in German, but also in Latin. The best known of his works are, Apostolische Schlesische und Kurfürstlichen (Frankfort, 1833, and often); Evangelische Schlesische (ibid. 1879, and often); — Evangelischer Herzensapfel (Laubach, 1863); — Streeten/customer (ibid. 1866); — Kranz, Russ. ^V. Betheule (ibid. 1850, and often); — Geistliche Erquickungsstunden (ibid. 1868, and often); — Orator ecclesiasticus, etc. (ibid. 1859); — Conjugii clericorum patrocinium (ibid. 1865); — Harmonia Veteris Nove Test. chronologica (ibid. 1868); — Theologia scholastica (ibid. 1866). For a list of his writings, see Wirtz,

Müller, Heinrich (2), a German theologian, was born at Joel, near Flensburg, Feb. 25, 1769. He studied theology and philosophy at the University of Kiel, and was called in 1786 to the position of dean to the city church at Kiel. In 1789 he became also professor of theology and first teacher of the seminary. He finally resigned his position as minister, and became director of the seminary. He resigned the position as director of the seminary in 1806, and died Feb. 9, 1814. A monument by his scholars was erected in 1816 in the cemeteries of Kiel. His most important work is his monograph on Calvinism and Episcopacy, and集市 to the basis of the Verfassung der evangelisch-reformierten Kirche (5th ed., 1829, 2 vols. 8vo). See Döring, Gelehrte Theol., Deutschland, s. a.

Müller, Heinrich Daniel, a German theologian was born at Buchenau, in Hesse-Darmstadt, Sept. 24, 1712. He was educated at Giessen, Marburg, Halle, and Jena. In 1742 he was appointed city minister and director at Giessen, and in 1748 professor extraordinary of theology. In 1749 he became professor at the University of Halle, in Hesse-Darmstadt, as metropolitan minister, and became professor in 1777 inspector of the convene of the same place, and died March 22, 1797. His most important works are, Disc. de Christo Deo magno vero et beneficlo ad Tit. ii, 13; I Joh. x, 20; Rom. xiii, 5 (Jena, 1769, 4to); Disa. inaequal. de eremita, Dei et revelatioius ejusque criteris (Giessen, 1749, 3to); Disquisitiones philosophiae de qualitate (ibid., 1746, 4to); Theses philosophicae (ibid., 1746, 4to); Commentatio philosophica de harmonie pretiositate, qua composita quaternar, an liberta- tem tollit hoc systema? (ibid., 1746, 4to); Progr. de Philo. philosophico (ibid., 1748, 4to); Deo, theologica de instructione et adaptionis rectificatio decreto (ibid., 1749, 4to); De incredulitatis fini (ibid., 1749, 4to); Commenat. de Missae Doctoris iustitiae ad Joel ii, 23, qua exercitation diutatiorum cum selecta theologiae cultoribus latituendum significat (ibid., 1750, 4to). See Döring, Gelehr. Theol. Deutschland, i., 580 sq.

Müller, Johann Baptist, a celebrated German painter of sacred subjects, was born at Gerarstaden, Bavaria, and studied art at the Academy of Munich under Eberhard, and later under Hess. The latter he assisted in the fresco of the All Saints' Chapel, and painted independently The Baptism of Christ. From 1842 to 1849 he painted for the king of Prussia, and these works are now in the collections of the Royal Palace at Potsdam. Later he painted many sacred subjects on altars and church windows. He died at Munich in 1865.

Müller, Johann Caspar, a German Roman Catholic theologian, was born at Naumburg Feb. 26, 1749, and educated at Fritzlar. In 1766 he entered the gymnasium at Mentz, and afterwards studied philosophy and theology. After being admitted to the theological seminary, he was ordained, and appointed chaplain at Hoppenheim, and one year later professor at Worms, also prefect of the gymnasium, and vicar of the churches of St. Mary's and of the Holy Cross; assistant of the theological faculty, and minister of the court military hospital of Mentz, where he gave his time entirely to study and to the duties of the Church; but the French war compelled him to leave Mentz. He returned to Mentz after the Prussians had taken possession of that place. He, however, now resigned his ecclesiastical offices, only soon after to be appointed canon of the chapter of the church of St. Peter at Fritzlar, and also the dean of the John of the Amselburg. Later he was removed to Aschaffenburg, as principal of the gymnasium and provost of the prince-electoral grammar schools. In 1804 he was appointed professor extraordinary of ecclesiastical law at Marburg; in 1806 principal of the seminary for teachers of the three Christian confessions. He died November 3, 1810. Müller had a thorough knowledge of Church history, patristic theology, and exegesis, which he evidenced by his Dissertatio de Socinianis et Harmonie der vier Evangelisten, and similar works. He contributed often to the Mainz-Miscellanea, Scherboxes Journal zur Vertheidigung des Protestantismus, und Altenburger General-Anzeiger (4th ed., 1801, 6 vols. 8vo), and several other journals. His most important works are in the department of the classics. Among these are, Titl Litterarum litterarum prima et selecta quadam capitula, soluta Moguntinae adscripta (Mentz, 1798, 8vo); Evetropis Breviarium sive chronicon Moguntinum ad annum 1785, per Jacobum Lusinithi inuicat docentur adscripta (ibid., 1781, 8vo); Quinti Horatii Flacci Odea selecta, soluta Moguntiana editi (ibid., 1784, 8vo); Dis Mosae, historico-theologiae de orto, vero religiosis systemate, progressu, statu moderno secte Unitariorum seu Socinianum, ac de profmo secta Protes- tantantium ad illustres, et maxime lateribus uniformi corrigenda theologica selecta definita (ibid., 1784, 8vo; 2d edit. ibid., 1787, 8vo); M. T. Ciceronis orationes selectae et, soluta adscriptae. Editio secunda aucta et emendata (ibid., 1787, 8vo); Der Triumph der Philosophie im 16ten Jahrhundert (Frankf. a. M. 1808, 2 vols. 8vo); Geschichte der Römer, für studirende und gebildete Leser, aus den Quellen dargestellt. 1ste Abtheilung von Anfang des kleinen Staatst bis zum Ende der grossen Republik (ibid., 1805, 8vo). See Döring, Gelehr. Theol. Deutschland, s. a.

Müller, Johann Christian Friedrich Wilhelm, a noted German engraver of sacred subjects, was born at Stuttgart in 1762. He was carefully educated by his father, Johann Gotthard (see below), in all those branches of the arts which, by his own experience, he knew to be requisite to constitute an excellent engraver; and in 1802 went to complete his studies at Paris, where he spent some time. The most of his works as a collector of the Louvre. Here, in 1808, Müller engraved the St. John about to write his Revelation, after Domenichino, in which the eagle brings him his pen; and Adam and Eve under the Tree of Life, after Raphael. He was commissioned shortly after by Ritter, a printseller of Dresden, to engrave his last and greatest work, the Madonnina di San Sisto of Raphael, in the Dresden Gallery. He was wholly occupied for the remainder of his short life on this plate, which he just lived to complete, but he never saw a finished print from it. He removed to Dresden in 1814, and was appointed professor of engraving in the academy there. His existence seems almost to have been wrapped up in the execution of this plate: he was occupied with it day and night, and, at all times, a sickly constitution, the infallible result of such constant application and excitement soon made its appearance. He was, however, too desirous of benefiting from his work. He completed the plate and sent it to Paris to be printed; but with his plate the artificial emitment which supported him departed also; he had just strength enough left to admit of his being carried to the Sommesten, near Pirm, where he died in 1816, only
a few days before the proof of his plate arrived from Paris. It was suspended over the head of his bier as he lay dead, thus reminding one of the similar untimely death of the great master of the original, above whose head, as he lay in state, was hung also his last work, The Transfiguration. Muller engraved only eighteen plates, but the Madama di San Sisto is in itself a host, and exhibits him at least the equal of Raphael Morghen, to whose Transfiguration it serves as a good pendant. There are several lithographic copies of it. An index of his plates and those of his father was published by Andresen at Leipzig in 1865. At Harvard College there are nineteen fine copies of his plates in the "Gray Collection." See Nagler, Allgemeines Künstler-Lexikon, s. v.; Spooner, Biog. Hist. of the Fine Arts, s. v.

Müller, Johann Daniel, a German theologian, was born at Allendorf May 22, 1721, and was educated at Giessen, where he studied theology, philosophy, and ancient languages. In 1740 he was appointed rector at his native place, and acted at the same time as assistant minister of a church. In 1768 he took the position of professor of divinity at the University of Rinteln, and there died April 30, 1794. Besides numerous dissertations and tracts, he published several works of which the most important are, Diss. in qua immortalis anima ex principiis ratioenis, methodo mathematicorum demonstratur (Giessen, 1743, 4to)—der gebrachte und Missbrauch der Vernunft bei Geheimniss der Auffersetzung der Toden insbesondere (Frankf. a. M. 1747, 8vo)—Forser auf eine durch indirektes Denken zu erreichende principiis rationis exculta, methodo mathematicorum demonstrata, cum prefatione J. G. Canzii (Marburg, 1752, 8vo)—Diss. theol. de Providentia Dei ex confusione mundi demonstrata (Rinteln, 1771, 4to)—Endeckter Kunstgriff unserer Zeiten, die Religion durch die Bibel und die Historische Religion der Grazer Bruiser, 1777, 8vo)—Progr. de mutilatione Dei, Scripturae, mundi et animae violata rationis et revelationis testa (Rinteln, 1784, 4to). See Döring, Gelehr. Theol. Deutschlands, iv, 585-587.

Müller, Johann Georg, D.D., brother of the famous historian J. v. Müller, was born at Schaffhausen Sept. 3, 1759. His early religious as well as secular education he received from his father, who was the minister of that place. The writings of young and Lawyer impressed him so deeply that he decided to devote himself to the study of theology. To this end he first went to Zurich and afterwards to Göttingen, which latter place, however, he soon left on account of the then prevailing neological tendency. He longed for truth, but Göttingen church could not satisfy his thirst for it, and he sought for a teacher who could remove his doubts and ease his oppressed spirits. About this time Herder's name became known to the world, and Müller bestowed himself to Weimar, then celebrated as the Athens of Germany. Herder received Müller very kindly, and even took him into his house. In 1794 Müller returned to his native place, and accepted the professorship of the Greek and Hebrew languages at the collegium humanitatis, because of his feeble constitution, which prevented him from taking charge of a church. In the time of the revolution he held some high political positions, all of which he abandoned, only retaining his professorship until his death, Sept. 20, 1819. In him the church lost a true divine, a faithful witness, whose main object was to propagate principles akin to those of Herder, but in a more orthodox sense. His writings, which have mainly an apologetical value, are as follows, Philosophische Aufsätze (Weimar, 1789); Unterhaltungen mit einem Saemter (Unterthur, 1778-1803)—Bekenntnisse merkwiirdiger Manner von sich selbst (1791, 1795, 8 vols.)—Briefe uber das Studium der Wissenschaften, etc. (1798; 2d ed. 1807)—Theoph, Unterhaltungen uber die christl. Religion (1801), which treats of religion, mythology, revelation, the Old and New Testaments, and reading and explanation of the holy Scriptures:—Reliquien alter Zeiten, Sitten und Meinungen (1803-1806, 4 vols.)—Vom Glanzen des Christen (1816, 2 vols; 2d ed. 1820)—Bliicke in die Bibel (1816, 2 vols); Rekognoisement in Veyren, Herzog, Real-Encyclopedia, s. v.; Thiel, Universal-Lexikon, s. v.; Hurst's Hagenbuch, Hist. of the Church in the 18th and 19th Cent. ii, 22, 47, 409. (B. P.)

Müller, Johann Gottfried, a German theologian, was born in 1701 at Calbe, in Prussia. He was educated first at his native place, then at Klosterbergen, and at the University of Halle, where he studied theology. He was appointed minister at the monastery at Halle in 1727, but was discharged, as he would not sanction the union of the Lutheran and Reformed churches, which was brought about by king Frederick William I of Prussia. Müller now went to Leipzig, and became there bachelor of divinity and minister of the university church. In 1729 the chief consistory secured for him a place at the "Kreuze Kirche" at Suhl. In 1745 he was appointed superintendent at Schleswingen, also assessor of the consistory. In 1760 he was appointed eparchus of the gymnasium, and died August 16, 1767. Müller possessed a thorough knowledge of ancient languages, which shows in his programmes De schola purgatoriana (1761, 4to) and De animantibus apocalypsis s. emblematibus ministrorum Evangelii in scholis et cedicis (1771, 4to). One of his most important works is Progr. uram et Thalm. scholasticum (Schleswingen, 1748, 4to). See Döring, Gelehr. Theol. Deutschlands, s. v.

Müller, Johann Gottfried von, a celebrated German engraver of sacred subjects, was born at Bern, April 30, 1727, at Stuttgart, in 1747. His father, who was in an official situation under the government of his native country, wished to educate Müller for the Church, but the youth showed so much ability for art in the newly-established (1761) Academy of Fine Arts at Stuttgart that the prince himself urged him to follow art as his profession. Accordingly, in 1764, Müller, under the patronage, entered the school of the court-painter, Gui bal, who recommended him to follow engraving, which he pursued for six years (1770-76) at Paris with Wile, with such success that in 1776 he was elected a member of the French Academy. He was called home in the same year by duke Ludolf to found a school of art at Stuttgart, which, under his guidance, produced many excellent artists. In 1785 Müller was invited to return to Paris to engrave the portrait of Louis XVI, painted in 1774 by Duplessis. In 1802 Müller was made professor of engraving in the academy at Stuttgart where he directed a school of best engravers of Germany during the earlier part of the 19th century, among whom his own son, Christian Friedrich, is the foremost. He was elected successively a member of the principal German academies, was presented in 1808 by the king Frederick of Württemberg with the Order of Civil Merit, and in 1818 was made a Knight of the Württemberg Crown by Frederick's successor, King William. He died at Stuttgart in 1830, and in the same year a biography of him was published in the Schweizische Merkur, No. 71. Müller engraved only thirty-three plates—a small number—but some of them are large and elaborate works; they are, however, chiefly portraits. His principal work is the Madama della Seggion, for the Musée Français, engraved in 1804, by many considered superior to the print of the same subject by Raphael Morghen; a St. Catharine, with two Angels, after Leonardo da Vinci. See Nagler, Allgemeines Künstler-Lexikon, s. v.; Spooner, Biog. Hist. of the Fine Arts, s. v.

Müller, Johann Gottlieb, a German theologian, was largely educated at Wittenberg and the spreading of holiness among the rural population of Germany, was born at Waldorf, near Löbau, Oct. 30, 1760. He was educated at the University of Wittenberg. He was appointed in 1784 minister at Pedrosche, near Muskau; in 1802 minister at Jankendorf and Ullendorf, near Niesky; and in 1808 minister at New
MULLER

kirch, near Bautzen, where he died, Jan. 11, 1829. His most important works are, Ober die schrecklichen Folgen oder Wirkungen des Unfroh (Görlitz, 1788, 8vo); Oberchristliche Reformationsgeschichte (ibid. 1801, 8vo): Christum Protostolus, Leib und Seele, oder: Der Lammus als Christ, wie er sein soll und ist. Ein Christliches Sittenbuch für den leiblichen Bauernstand (ibid. 1808, 8vo). See Döring, Gelehrte Theol. Deutschlandc, iv, 590, 591.

Müller, Johann Stephan, a German theologian, was born at Smalobuch, in the Black Forest, July 20, 1730, and was educated at the gymnasium at Rudolstadt and the University of Jena. In 1756 he was ap- pointed an assistant of the philosophical faculty, and became a member of the Latin Society in 1752, and in 1758 assessor of the consistory at Rudolstadt. In 1759 he was appointed professor extraordinary of philo- sophy at Jena, and in 1763 he was made professor at Giessen. He became a member of the academies of sciences at Erfurt, Frankfort-on-the-Oder, and at Giesen. In 1758 he was honored with the superintendency of the diocese of Marburg, in which place he died, Oct. 24, 1768. His most important works are, Duborum utrique mod, quo procedent Theologi in explicatio- natione praeclarii Christiani amicus, 4to (ibid. 1756); Hypothese philosophicam posit vocari, et quo ostens, un illos probabilis doctrinae de simplicitate anima (ibid. 1754, 4to): Diss. philo- sophicam de hominis obligatio ad utendum medias res revocatione vel ante admissam illius veritatem dirimam (ibid. 1755, 4to): Diss. sententiarum Protestantiae juris naturae doctorum de lege naturali et utilisationibus cal. P. Desingani defensi (ibid. 1756, 4to); Diss. metaphysicarum sententiarum Philosophorum Christianorum de mundi et substantiarum origine nova quadam hypothese contra systemata Aristotelis defensi (ibid. 1757, 4to): Die Unzulässig Luther's in der Lehre von den Zuständen des Menschen, in seiner gegenwärtigen Verfassung, in unserem Tagen erregte Beschuldigung, als ob derselbe ein Seelenheiler gewesen sei, errettet (ibid. 1757, 4to): Dass Luther die Lehre vom Seelenheilke nie gelehrt habe, weiter und mit den stärksten Gründen erwiesen (ibid. 1759, 4to): Diss. Quod Reformati ab eo riz Pontificii defectant in doctrina de S. Caeo, quod offen- dart Reformati (ibid. 1776, 4to): De novis inter Regem Gallorum et Magistro dominationis quod micile velut- tur (ibid. 1766, 8vo). See Döring, Gelehrte Theol. Deutschlandc, v.

Müller, Karl Ottfried, one of the most distin- guished classical scholars of recent times, is noted for his labors in the department of comparative religion, hav- ing furnished works of great value on Greek and Scandinavian mythology and religion. He was born August 29, 1776, in Silesia, and received a careful education. He de- voted himself, at the universities of Breslau and Berlin, to philological and archaeological studies, and the first fruit of his learning was the publication of the "Ergän- zungskommentar Licher" (Berlin, 1817). Shortly after he received an appointment on the Magdalenian in Breslau, where his leisure hours were devoted to a grand attempt to analyze the whole circle of Greek mythology. In 1819 he obtained an archological chair in Göttingen, and to thoroughly prepare himself for it, visited the collections in Germany, France, and England. His great design was the compilation of the whole body of ancient art, politics, industry, religion, in one warm and vivid con- cep tion—in a word, to cover the skeletons of antiquity with flesh, and to make the dry bones live. With this view he lectured and wrote with a fine, earnest amas- sion, until the political troubles in Hanover made his position so insecure that he obtained permission to travel, and made tours in Greece and Italy, but unfor- tunately died of an intermittent fever at Athens, Aug. 1, 1840. Müller's literary and scholarly activity stretched over the whole field of Greek antiquity, furnishing many new and striking elucidations of the geography and to-ography, literature, grammar, mythology, manners and customs of the ancients. The work of special interest to us is his Prolegomena zu einer wissenschaftlichen My- thologie (Göttingen, 1825, 8vo; Engl. by Leitch, Lond. 1844, 8vo). His work on the Dorians is also valuable to the student of comparative religion, as well as his work on the Etruscans. "Muller," says a contemporary, "was a man of the most extensive and varied acquire- ments, and of a keen and penetrating judgment. He acquired a European reputation at a comparatively early age. His numerous works, however, are not all of equal merit, and the two faults most particularly to be no- ticed are his great haste in the composition of his works and a tendency to theorize and generalize on insufficient grounds. But in extent of knowledge and reading there scarcely ever was a scholar who surpassed him." See Neuer Kursus der Deutschen für 1841, Lütke, Erken- nungen an Karl Ottfried Müller (Göttingen, 1841, 8vo), which contains an admirable delineation of Müller's per- sonal character.

Müller, Petor Erasmus, a Dutch prelate, noted as a theological and antiquarian writer, was born at Copenhagen May 29, 1776. He studied at the university of that city, where in 1791 he passed his theologi- cal examination, and after a short stay in Italy, a visit of eight months to France and three to England. After his return he attended to eminence as a scholar, wrote numerous works, was appointed professor of theo- logy at the university in 1801, was raised to the rank of bishop, and in 1815 was appointed to the bishopric of Denmark, the highest ecclesiastical dignity in that country. He died Sept. 16, 1831. His theological works on the Christian Moral System (1808), on the Grounds for Belief in the Divinity of Christianity (1810), on the Creeds of the Christian Church (1817), all in Danish, are in high esteem, but his literary reputation is chiefly founded on his essays in the department of Danish and Norse antiquarian studies. Among these, his best are, On the Importance of the Icelandic Lan- guage:—On the Rise and Decline of Icelandic Histori- ography:—On the Authenticity of the Edus of Snorri:—Critical Examination of the Traditional History of Denmark and Norway:—Critical Examination of the last Seven Books of Saxo Grammaticus:—and, above all, his Saga-bibliothek, or Library of the Sagas (Copenhagen, 1817-20, 3 vols.). Bishop Müller was also the editor of a literary journal (Danske Litteratur Tidende) for many years. See Kraft og Nyrup, Atismindeleg Litteratur-Verens.}

Müller, Philipp Jacob, a noted German-French (Alsace) theologian and philosopher, was born at Stras- burg in March, 1782. He studied at the high school of his native place and at the celebrated German uni- versities. In 1782 he became professor of philosophy at his alma mater and canon of St. Thomas, as well as president of the assembly of Strasbourg pastors. He died in 1795. Müller was well versed in the Greek and Hebrew antiquities, and was a student of the exact sci- ences. His travels had extended his knowledge of men and things, and he therefore became a person of influence. His writings, which were mainly in the department of metaphysics, are chiefly interesting on account of their rep- utation secured. The most interesting of his writings are, De pluralitate mundorum (1759, 4to):—De commercio animi et corporis (1761, 4to):—Psychologia Pytha- gorica (1778):—De legibus naturae (1755).

Mullion or Monnay, the upright division be- tween the lights of windows, screens, etc, in Gothic ar- chitecture. Mullions are rarely met with in Norman architecture, but they become more frequent in the Early English style, and in the Decorated and Perpen- dicular are very common. They have sometimes small shafts attached to them, which carry the tracery of the upper part of the windows. In late domestic architec- ture they are usually plain. The cut shows mullions
Mumbo Jumbo

Mumbo Jumbo, a mysterious personage frightful to the whole race of African matrons. According to the description of Mr. Wilson, "he is a strong, athletic man disguised in dry plantain leaves, and bearing a rod in his hand, which he uses on proper occasions with the most unparrasing severity. When invoked by an injured husband, he appears about the outskirts of the village at dusk, and commences all sorts of pantomimes. After supper he ventures to the town-hall, where he commences his antics, and every grown person, male or female, must be present, or subject themselves to the suspicion of a guilty conscience. The performance is kept up until midnight, when Mumbo, with the agility of the tiger, suddenly springs upon the offender, and chastises her most savagely, amid the shouts and laughter of the multitude, in which the other women join more heartily than anybody else, with the view, no doubt, of raising themselves above the suspicion of such infidelity."

Mummy is a name derived from an Arabic word, mum, signifying wax, and is now applied not only to those dead bodies of men and animals in the preparation of which wax or some similar material was used, but to all those which are by any means preserved in a dry state from the process of putrefaction. The art of embalming, by which the greater part of the mummies now existing were prepared, was practiced by the Assyrians, Persians, Ethiopians, Egyptians, and to some extent also by the Hebrews, Greeks, Romans, and on this continent by the Mexicans and Peruvians. But with greatest skill it was practiced by the inhabitants of ancient Egypt, of whom whose generations still remain preserved from decay in the vast hypogea or catacombs in the neighborhood of Thebes and the other great cities of that country. It has been estimated that more than 400,000,000 human mummies were made in Egypt from the beginning of embalming until its discontinuance in the 1st century. The mummies which are filled with aromatics only are olive-colored; their skin is dry, flexible, and like tanned leather, and contracted; their features are distinct, and appear to be like those that existed in life; the resins which all their cavities contain are dry, light, brittle, and aromatic; the teeth, hair, and eyebrows are generally perfect; some of them are gilded all over the body, or on the most prominent parts. The mummies which are filled with bitumen are reddish; their skins are hard and polished, as if they had been varnished; they are dry, heavy, inodorous, and difficult to unroll; their features are but slightly altered; the hard, black, resinous substance with which they are filled possesses little odor, and they are scarcely alterable by exposure to the air. Those which have been salted, as well as thus prepared, differ little in their general appearance from those just described, but they are usually less perfect, the features being altered, and their hair having commonly fallen off. When they are uncovered and exposed to the air, a slight saline efflorescence forms upon them, which consists of different salts of soda. Those mummies which have been only salted and dried are even less perfect than the preceding. Their features are entirely destroyed; all their hair has fallen off; and both the body and the bandages by which it is enveloped fall in pieces when brought to the air, or may very easily be broken up. In many of these adipocere is formed; but in general they are hard, dry,
and whitish, like dirty parchment. The bandaging, to which all the Egyptian mummies were subjected, was one of the most remarkable parts of the process. Their envelopes are composed of numerous linen bands, each several feet long, and sometimes several dozen, each passed several times, in general, over thirty or twenty times, and surrounding first each limb and then the whole body. They are applied and interlaced so accurately that one might suppose they were intended to restore to the dry, shrivelled body its original form and size. The only difference in the bandages of the different classes of mummies is in the manner of their fineness of texture; they are applied on all in nearly the same manner. All the bandages and wrappings which have been examined with the microscope are of linen. The body is first covered by a narrow dress, laced at the back and tied at the throat, or it is all enveloped in one large bandage. The head is covered by a square piece of very fine linen, of which the centre forms a kind of mask over the features. Five or six such pieces are sometimes put one over the other, and the last is usually painted or gilt in representation of the embalmed person. Every part of the body is then separately enveloped with several bandages impregnated with a composition, which spread and extended side by side, and the arms, crossed over the chest, are fixed by other bandages which surround the whole body; and these last, which are commonly covered with hieroglyphics, are fixed by long, crossing, and very ingeniously applied bands, which complete the envelope. Most of the bodies have been examined in this state, and in the course of the rich only are enclosed in cases. The cases are usually double, the interior being composed of boards made of several portions of linen glued together, and the exterior cut from a piece of cedar or cypress wood. See "EMBALMING".

Mummy. The only, after being embalmed, was thus completely swathed with strips of linen (some think cotton) cloth, of various lengths and breadths, and was then enclosed in an envelope of coarse, or sometimes of fine, cloth. In Mr. Davidson's mummy, the weight of the bandages, including the outer sheet, was 29 lbs., and their total length 292 yards; and in another, Mr. Pettigrew's, the cloth weighed 85 lbs.; and the one examined at Leeds was in no part covered with less than forty thicknesses of the cloth. The mummy as prepared presents the appearance of a large mass of cloth, somewhat resembling the general outline of the human figure. The mummy was then prepared by being placed in this state consigned to the coffin-makers, who, in the first instance, enclosed it in a case of a strong but flexible kind of board, somewhat like papier-mâché, made by gumming well together several layers of hempen or linen cloth. This was formed into the shape of the swathed mummy, which was then inserted in a case of a longitudinal slit on the under side, reaching from the feet to the head, and stitched up after the insertion of the mummy. This case, in most instances, lined, and covered with a thin coating of plaster, with the representation of a human face on the upper part. This was then introduced into the sarcophagus of sarcophagum wood, made sometimes out of one piece of wood, and either plain or ornamented within and without with representations of sacred animals or mythological subjects. Besides this there is often yet another wooden coffin, still more highly ornamented, and covered with paintings secured by a strong varnish. The upper part of both these cases is made to represent a human figure, and the sex is clearly denoted by the character of the head-dress, and by the presence or absence of the beard. The last covering of all was a sarcophagus of stone, which, from its heavy additional expense, could only, it may be supposed, be used for kings and wealthy people. These stone coffins were often two stories high, in order to contain the body, formed of one piece of stone, open at the top, and a lid to fit the opening. Some of them are comparatively plain, while others—of which there are examples in the British Museum, and one, of alabaster, in the museum of Sir John Soane—are elaborately sculptured with hieroglyphics and figures of men and animals, forming not the least astonishing monuments which we possess of Egyptian industry and art. See Wilkinson, "Egypt," i, 323 sq.; Stackhouse, "Christian and Other Monuments," ii, 297; Blackwood's Magazine, 1870, ii, 229 sq., 817 sq. See COFFIN; MECHANIC.

Mumpelgarten, Colloquy of. A conference between Beza and Andreis, with a view to bring about the union of the Lutheran and Reformed churches, but which loses much of its importance from the fact that the two theologians acted here of their own accord, and not as representatives of the respective churches. The occasion of it was the incorporation of Mumpelgarten into the duchy of Wurttemberg by inheritance. Farel had preached the Gospel there as early as 1526, but had been driven away. In 1535 duke George of Wurttemberg had caused the Reformation to be introduced into Mumpelgarten by Tomanus, a French minister. The Wurttemberg authorities afterwards sought to introduce the Lutheran form of worship. But when, in consequence of persecution, many French Calvinists sought a refuge at Mumpelgarten, they found great difficulty in being allowed to take part in the Lord's Supper, and put at some expense to the amount of things demanded a colloquy. Neither of the two theologians appointed entertained much hope of the result. Beza had been forewarned that all such attempts had herebefore served only to embitter the strife, yet he did not consider himself free to reject the application of Andreis, which he felt was opposed to take part in a discussion presided over by a Lutheran prince. On the Lutheran side appeared Andreis and Lucas Osiander, assisted by the two political counsellors, Hans Wolf von Anweil and Frederick Schütz; on the part of the Reformed, Beza, Abraham Musculus (pastor at Berne), Anton Fäus (deacon at Geneva), Peter Hyben (professor of the Greek language at Berne), Claudius Alberius (professor of philosophy at Lausanne), and the two counselors, Samuel Meyer, of Berne, and Anton Murius, of Geneva. The colloquy took place at the castle of Mumpelgarten, March 21-25, 1586. Beza did not succeed in arranging that a protocol of the discussion should be drawn up, and the account of the proceedings led subsequently to a lengthy controversy. The points of the controversy were: 1. the Lord's Supper; 2. the person of Christ; 3. images and ceremonies; 4. baptism; 5. election. Beza, who had only intended to argue on the first point, was, in spite of all his efforts, obliged by the others to deal with all the last four. Beza, as he had foreseen, the possibility of a compromise was still less than on the others. He declared himself ready to yield on all these points if he could be shown by Scripture to be in the wrong. Andreis, it is said, declared from the first—that Luther at Marburg—that he would yield nothing, and that the pure doctrine was forever established by the Confession of Augsburg. Both parties afterwards gave different versions of the colloquy. The Lutherans published the Acta Colloquiis Montesbergianis (Tubingen, 1887), and also a German translation of it, and an Epitome colloquiis in 1588. Beza defended himself in the Discorsi del Conte di Wurttemberg ad Andreae et Claudium Alberium, Genevæ, 1587 and 1588; German, Heidelberg, 1888), etc. At this colloquy both parties gave each other their doctrines and principles in writing. See Schweizer, Gesch. der reformirten Centralzögmen, i, 402 sq., 501 sq.; Herzog, Real-Encyklopädie, s. 99. (J. N. P.)

Mumpisas. A nickname given to persons obstinate in heretical matters; used by Henry VIII. in Parliament, and founded on a story, related by Face, of a priest who refused to abandon the practice of saying "quod ore mumpsimus," on the plea that he could not give up the usage of thirty years for any correction.

Muncer. See Münzer.

Munda cor meum (cleanse my heart) is the
technical form designating a prayer said in the high mass of Roman Catholics, after the reading of the epistle and its accompaniment. The position of the priest before the altar celebrating solemn mass is seen in the engraving below. The upper part represents Christ before Pilate. See the article Mass, and for full description of the service at mass, Barnum's Romanism, ch. xiv.

Antique picture of "Munda oor Mensch."

**Munden, Christian,** a German Lutheran divine, was born at Burg, on the Isle of Fennem, Aug. 18, 1684. He was educated at the gymnasium of Lübeck; entered in 1701 the University of Kiel, where he studied theology, and returned home in 1704; but his desire for knowledge carried him in June, 1705, to Leipsic, where he was permitted to lecture. A rumor that Saxony might become the seat of war between Sweden and Poland drove him finally to Hanover, and he was appointed in 1708 teacher of Greek and Latin at the Gymnasium of Göttingen. In 1716 he got a position as pastor of the St. Nicholas Church in Göttingen. In 1725 he was appointed licentiate of theology at the University of Helmstedt, and in 1727 was made professor of theology at that high school. In 1731 he was called to the pastorate of the "Barfüßer Kirche" in Frankfort-on-the-Main, and there he died, Aug. 9, 1741. He greatly distinguished himself as a pulpit orator, but made many enemies by his opposition to the Reformed Church. He was also in constant warfare with the Roman Catholics, whom he greatly weakened at Frankfort by the frequent examination of their doctrines and practices. Munden's most important works are,

**Dias de Μύθου συν, sive de τω διαδεικτικο (Lipsiae, 1706, 4to)—Progr. de litteris Hebrewis et Graciaciusi habendi pretio (Göttingen, 1708, 4to)—De columna nabali et ignum commentatio in quas primum Mons de ex oraculis ex veris egescos sacra principiis papraceus, recens inuentae, modesté vindicatur, nec non varia Scriptura loca subinde illustrantur (Gotel, 1712, 8vo)—Regia et Electoralia Hanoveriensae Evangel. et Sacrist. **Munger, Philipp,** a minister of the Methodist Episcopal Church, was born at South Brimfield, Mass., Dec. 1790; was converted in 1796; entered the New England Conference in 1802; preached in the itinerancy thirty-four years; from 1836 to 1846 was either superintendent or superannuated, and died Oct. 19, 1846. He was a man of energy and method, very studious, and a gifted and successful preacher. He preached more than nine thousand sermons, and wrote considerably for the Church literature. He was for many years an active trustee of the Maine Conference Seminary; and as a man, Christian, and minister was in all respects very exemplary and useful. See Minutes of Conferences, iv, 150; Stevens, Memorials of Methodism, vol. i, ch. xv. (G. L. T.)

**Munl, a Sanscrit title, denoting a holy sage, and applied to a great number of distinguished personages, supposed to have acquired, by dint of austerities, more or less divine faculties.**

**Munich Manuscript.** (Coxex Monacensia, designated as X of the Gospels) is a valuable folio MS. of the end of the 9th or early in the 10th century, containing the four Gospels, with serious defects, and a commentary (chiefly from Chrysostom), surrounding and accompanying the text of all but John in early cursive letter. The very elegant uncials are small and upright; though some of them are compressed, they seem to be partial imitations of very early copies. Each page has two columns of about 45 lines each. There are no divisions by rho or sections. The ink of the MS. has much faded, and its general condition is bad. From a memorandum in the beginning we find that it came from Rome to Ingolstadt, and that it was at Innsbruck in 1757; from Ingolstadt it was taken to Landshut, thence to Munich. Griesbach obtained some extracts from it through Dobrovsky; Scholz first collated it, Tischendorf more thoroughly, and Trerellas completely. See Scrivener, Introd. to N. T., p. 118 sq.; Tregelles, in Horne's Introd. iv, 199 sq. See Manuscripts, Biblical.

**Muniment Chamber.** I.e. an Ecclesiastical Register-house or Treasury, is a room used for the preservation of charters, fabric and matriculation rolls, terriers, and registers. At Salisbury it is detached, on the south side of the cathedral. At Chichester it was over a chapel of the transept, dedicated to the Four Virgins, and at a later date next to the chapter-house, and furnished with a sliding panel. At Winchester and New College, Oxford, it is in a tower at St. Martin des champs, Clugny, and Vaux des Sermay. At Fontenelle it was over the church-porch, as now at Peterborough. Where there was a provost, that officer kept the muniments. See, as it were, the defences of Church property.

**Munition ("metrica, metad").** Isa. xxiii, 16; usually rendered "stronghold," a fortress on a rocky eminence, such as those to which David resorted for safety from Saul (1 Sam. xxiii, 14); especially a "castle" or scorpions, as of Mount Zion (1 Chron. xi, 7). See Fosr. In ancient times every city was located upon a natural strong position [see CITY; HILL], and served itself for
a stronghold (נָגָּה, נָגָה), yet in the period before the exile among the Hebrews particular strategic points, especially on the frontier and in low and level tracts, were more strongly and systematically fortified (1 Kings xv, 17, 22; 2 Chron. viii, 8; xi, 6 sq.; xiv, 6 sq.; xxvi, 6; xxvii, 4), in anticipation of sieges (2 Chron. xxvii, 4 sq.), which, after the anomalous warfare, still often took place in post-exilic times (see 1 Mac. iv, 51; xii, 35; xiii, 20, 41 sq.; xxiv, 33 sq. [xxv, 39]), when the residences of Palestine were distributed in citadels, walled towns, and open villages. First of all, strongholds were surrounded by one or more (2 Chron. xxxiii, 5) walls (וֹסָמָה), which were sometimes very thick (Jer. ii, 58), and were furnished with battlements (וֹסָמָה, 2 Chron. xxvi, 15; Zeph. i, 16 or וֹסָמָה, Isa. li, 24), parapets, and towers (גוֹרְמֵן, 2 Chron. xiv, 7; xxxiii, 5; 1 Mac. v, 65; comp. Ezek. xxvi, 4; xxxii, 11; Jer. li, 12; Zeph. ii, 14; Judith i, 3), and were closed by powerful (in Babylonian iron-bound, Isa. xiv, 2; Herod. i, 179) and strictly guarded (1 Kings iv, 18) gates (q. v.). Over these last were placed watch-towers (2 Sam. xiii, 34; xxiv, 23, 43, 24; 2 Kings xxv, 9; comp. Homer, Iliad, i, 145, 146). See generally, 2 Chron. xxvi, 15; comp. Ezek. xxvi, 4; xxxii, 11; Judg. xi, 3; Nah. iii, 8; 1 Kings xxvi, 28), apparently a most with a rampart, but according to Kinch a small outer wall (וֹסָמָה). See Trench. There were also watch-towers and forts (וֹסָמָה) in the open field (2 Kings xviii, 8; 2 Chron. xxvii, 4), as well as castles in and at the cities for a final refuge (Judg. ix, 51 sq.). The most important fortress of Palestine in all ancient times was Jerusalem (q. v.). Other strong castles, especially for the protection of the borders, were in the closing period of Jewish history. Alexander (Josephus, Ant. xiii, 16, 3), Maccabees, Masada, Herod (comp. Josephus, Ant. xiii, 16), Herod (b.c. 9, 4; War, i, 21, 10), etc. They were usually located on hills (2 Mac. iv, 6, 5). Caves and chambers in rocks were the first natural fastnesses (Judg. ix, 2). See CAVE. The reduction (comp. רָעָה, רָעָה) of strong places, to which the inhabitants retreated on the invasion of an enemy (Jer. viii, 14), began, after a demand to capitulate (Deut. xx, 10; comp. 2 Kings xviii, 17 sq.), with the demarcation of a line of circumsallation (וֹסָמָה, Eccles. xiv, 14; קְרֵם, 2 Kings xxv, 1; Jer. vi, 6; li, 4; Ezek. iv, 2; xvii, 17, etc.), and throwing up a bank (וֹסָמָה, 2 Sam. xx, 15; 2 Kings xii, 32; Isa. xxxvii, 33; Hab. i, 10; Jer. vi, 6; Ezek. iv, 2; xvii, 8; xxxvi, 8; 1 Mac. xx, 20; xiii, 45; comp. Josephus, Anti. xiii, 10, 2), and next proceeded by the employment of battering-engines (כֹּבָדָה, 1 Mac. x, 20, i. e. battering-rams, כֹּבָדֹת, Ezek. iv, 2; xxvi, 27; comp. Josephus, War, iii, 9; Vitruv., x, 19), with which a breach was effected (Ezek. xxv, 77). A description of the customary Roman machinae obserbatione, which Titus used—but for a long time in vain—in the siege of Jerusalem (Josephus, War, v, 6, 2 sq.; 9; vii, 2, 8, etc.), is given by Ammian. Marcell. xviii, 4. (On the Roman siege-works especially, see Josephus, War, vi, 7, 19.) A simpler operation was to set the fort on fire, and thus destroy it at once both it and the besieged (Judg. ix, 49). As an example of undermining the walls, Jer. ii, 58 is adduced only by a gloss in the Sept. and Vulg.; in later times this process becomes clearer (Josephus, War, ii, 17, 8; comp. Dio Cass. lxix, 12; Veget. Milt. iv, 24). The demolition of the aqueducts is once mentioned (Judith vii, 6). For defence the besieged were accustomed not only to shoot darts from the walls (2 Sam. x, 24), but also to hurl large stones and beams (Judg. ix, 52; 2 Sam. xi, 21; Josephus, War, v, 3, 3; 6, 6), and even to pour down boiling oil (Josephus, War, iii, 7, 28); in later times they used sapping-machines (כֹּבָדָה, 3 Chron. xxvi, 15; Dio Cass. lxvi, 41). Also by skilfully-managed sorties, which were disguised by mines (Josephus, Anti. xiv, 16, 2; War, v, 11, 4, etc.), they strove (especially by burning the siege-works) to break the siege. Thus in the siege of Jerusalem (Josephus, War, vi, 4), and for this purpose they watched the enemy by sentinels posted on the walls (Josephus, War, v, 2, 5). The Israelites were enjoined to spare fruit-trees when they laid siege to a city (Deut. xx, 19 sq.; see also 2 Kings iii, 25; comp. Michaelis, Mose Recht, i, 578 sq.). The beleauring of strongholds was sometimes carried on for a long time (so Hyrcanus was able to reduce Samaria only after an investment of a whole year, Josephus, Anti. xiii, 10, 8), and brought upon the besieged (even when they had provisioned themselves beforehand, 1 Mac. xiii, 3) so severe a famine (2 Kings vi, 26 sq.; 1 Mac. vi, 58 sq.—but of a lack of water in besieged places there is seldom any mention [see Josephus, War, vii, 7, 12; Anti. xiv, 14, 6], probably owing to the copious cisterns usually at hand) that they were often obliged to resort to very unusual (comp. Judith xi, 11) and even infamous means of subsistence (2 Kings vi, 25; 29; xxvii, 37; Lam. iv, 10; Josephus, Anti. xiii, 10, 8; vii, 9, 1; War, v, 8 sq.). The captives were expelled from the town (1 Mac. iv, 149, 488). But the garrison sometimes contrived ingeniously to conceal from the besiegers the food and provisions brought into the city (Josephus, War, iii, 7, 19). Obstructed forresses were taken by storm (comp. 1 Mac. xxv, 1), and the houses were razed to the ground (Judg. ix, 53; Anti. xiii, 16). In this siege, presump- sionally the plough was passed over the site of a captured town laid in ashes, Horace, Odes i, 16; 21; Senec. Clement. i, 20; but Mic. iii, 12 has no such allusion, the inhabitants massacred, manaced, and reduced to slavery (Judg. i, 29; 1 Mac. v, 52; comp. 2 Mac. vii, 18 sq.; Anti. xii, 28). On the other hand, the enemy usually spared such places as surrendered (1 Mac. xiii, 45 sq.). Citadels which had never been captured were called in Oriental phrase virginia (see Gesenius, Jes, i, 786). See FORTIFICATIONS.

Munk, SALOMON, a Jewish writer of great celebrity, one of the most famous Shemitic scholars and Orientalists of our century, was born at Gross-Glogau, in Prussian Silesia, probably in 1802, though some put it 1805 and 1807. When fifteen years of age he left his native place for Berlin, where he studied under the famous prof. and head of his university ( sooner or later). He was the "Gray Cloister," and then attended lectures at the univer- sity. From Berlin he went to Bonn, where the Arab scholar Freytag lectured, and under his guidance he took up the study of Arabic. In order to complete his studies he went in the autumn of 1829 to Paris, to attend the lectures of the celebrated A. de Sacy. Abel Rumor, Eugène Bouronvoff, and Chezy, who soon became his friends, and by whose assistance he completed his studies in the Arabic, Persian, and Sanscrit. In 1835 he visited Eng- land, and spent some time at the University of Oxford, collecting materials for an edition of Maimonides' celebrated work (Guide of the Perplexed). Some essays which he wrote for the Journal Asiatique and the Dictionnaire des Sciences philosophiques attracted the attention of the learned world, and in 1840 he was appointed deputy-keeper of the Oriental MSS. in the Royal Library of Paris. In the same year Munk was invited to accompany Sir Moses Montefiore and Cre- meux to the East, in behalf of the persecuted Jews of Damascus, to which he gladly consented, and secured while in Egypt many interesting MSS. in Arabic relating to the early literature of the Karaites, and other subjects of early Arabic literature. On his return he devoted himself so assiduously to his Arabic studies that he eventually lost his eyesight, and from 1852 was entirely blind. He had to relinquish his office in the lib- rary, and lived in retirement until 1865, when he suc- ceeded M. Rénaud as professor of Shemitic languages in the College of France. On Feb. 1 he delivered his in-
MUNHOUSE

augural address, *Cours de langues, Hébraïque, Chaldæique, et Syriquee.* All scholars of France were elated at the appointment, even those who regretted the depo-
sition of Rénan. The clergy also, Protestants as well as Roman Catholics, hailed the event.

Munster, well known for its ultramontane tendencies, which could hardly have been supposed to favor a Jew-
iah incumbent in the chair just made vacant by a Ra-
tionalist, thus commented: "A weak, blind man, who
only by the sense of touch can build up the world of his
thoughts, traverses the centuries of nations, cities, id-
oblations, and smooths out a spirit remnant! He is an em-

MUNSCHER

science, for he teaches the scholar how to love. France
possesses in him the greatest philologist, and though a
mysterious decision of a kind Providence has robbed
him of his physical light, the renown which he has

Muno, John, a Scotch minister, who did much to
advance the Reformed Church in Novar.* The interior
of the Free Church of Scotland, was born in Ross-shire, about 1768, of humble but honorable parentage. John's father died while he was yet a lad, and the care of a large house-
hold was his early prospect. His mother, a pious woman,
was anxious that John should follow his father's footsteps
in all Christian work, and therefore devoted much of her
time to his religious training. His secular educational
advantages were few, and he was early obliged to learn
a trade for his own and his family's support. When
working as a journeyman carpenter he conceived the
plan of entering the work of the holy ministry, and while
residing at Aberdeen he spent his evenings in study, ac-
quainting himself with the knowledge of the Holy Word.
He finally entered the university, and after going through a
course in literature and divinity was licensed to preach.
In 1806 he went to Caithness to take charge of the Achn
emy mission, at that time including the three preach-
ing stations of Achnery, Hallary, and Halladale, and ex-
tending over about twenty miles of hill country destined
of roads. He had labored here for ten years with great
success when he was called to the Edinburgh Gaelic
capel, and, accepting the place, he occupied it until
1826, when he was presented to the parish church of
Halkirk, and there he distinguished himself by great
devotion to his people and close application to pulpit
preparation, so that his sermons attracted all classes of
society, even the most cultured, notwithstanding the
deficiencies in his own culture for want of early advanta-
ges. Said one of his contemporaries: "His ministra-
tions were highly acceptable to his hearers. They could
not fail to recognise in them the instructions and exhor-
tations of a man of God, who knew and felt the truth
and loved their souls. He evidently spoke from the
heart—spoke what he believed—what his own soul
was full of, and was daily feeding on with delight." He
died April 1, 1847, at Thurso, while in attendance on
a member of the Committee of Caithness. He was
longed. "Munro in personal appearance was not above
the middle height, but of portly figure, and fair com-
plexioned, his countenance beaming with benevolence.
That his mental power—although not his predominant
feature—was uncommon was evident from the position,
weight, and influence which he attained in the ministerial
office." See Auld, Ministers and Men of the Far North

Münchensee, Wilhelm, an eminent German theolo-
gian, was born at Hersfeld March 11, 1766, where
his father was metropolitan and first preacher. After study-
ning in the gymnasia of his native city, he continued his
studies at Marburg. In 1785 he became his father's
assistant, and in 1789 succeeded him as preacher at
Hersfeld. In 1792 he was appointed rector of the theo-
logy at Marburg, and member of the consistory, which
positions he held for the remainder of his life. He
died July 28, 1814. Dr. Münchener was classed by his
countrymen with Michaelis, Döderlein, Planck, and others
who stood on middle ground between the ancient part
of Luther's church and the modern. He wrote, *Handbuch der christlich.
Dogmengeschichte* (1797, 4 vols.), which went through three editions, and was
republished under the editorship of Coln and Ne-
decker in 1832-38, at Cassel:—*Lieber der christlichen*

MUNSTER

Kirciegessch. (Marburg, 1804) : Abriis der Dogmengeschichte (1811, and often since; published also in this country in an English dress [New Haven, 1860]) : also numerous articles in the Journal of the American Historical Association, in Hildes Gedichte, in Hildes Beiträge, and Grabler's Journal: — Predigten (March, 1806) : Politische Predigten (March 1818). Munzher's great work (Dogmengeschichte) is thus spoken of by C. F. L. Simon, in his Continuation of Nissel's Guide to the Literature of Theology (§ 299) : "The author has happily combined the chronological order with that of the relations of the things; and his whole work is distin- guished alike for the persevering, learned, and critical industry manifested in collecting the materials, and for the solidity and independence of judgment with which they are methodically arranged and agreeably expressed." He adds, "The same commendation is due to the author's German Theological Dictionary," by Friedrich Stied- schneider, in his Entwicklung der Dogmatik (p. 99, 24 ed.), says of the Manual, "It is to be regarded as the best work on the subject." See Wachter, Ueb. Dr. Wil- helm Minuscher (Frankf. 1814); Christian Examiner and General Review, 1850 (iv), p. 182. (J. H. W.)

Munsey, Thomas K., a minister of the Methodist Episcopal Church, South, was born in Scioto County, Va., Sept. 7, 1816. He was converted and joined the Church when eighteen years old, and had a strong desire to enter the ministry at once, but his education was so lim- ited that he found it necessary to prepare himself for the great work. He spent one year in Emory and Henry college, and taught one year to pay his expenses. He was a four-year student at the Asbury College, and a member of the Asbury Conference, and continued an acceptable member till his death. His first charge was the Rogersville Circuits, which contained twenty-eight appointments. His labors continued for six years, when failing health compelled him to seek rest. From this time he became a sufferer, but whenever sufficiently strong he was found laboring in the cause he loved so well. While he was on the Athens District in 1867 his health gave way entirely, and he was obliged to give up all work. He held a superannuated relation to the Conference till his death, which occurred July 4, 1872. See Minutes of Am. Conference of the Methodist Episcopal Church, South, 1873.

Munzinger, Johann, a German theologian of the 14th century, is noted in ecclesiastical history on account of the part he took in the Saermentarian controversy of his time. He was rector of the school in Ulm in A.D. 1385, but was ejected because of his declara- tions, "Corpus Christi non est Deus. Nulla creatura est id est Substantia quae creaturae quae creaturam creaturamque creatur." He maintained further, "Hostia consecrata non est Deus; Deus est sub hostia consecrata, corpus ejus, saugus et anima;" namely, "per hostiam intelligi accidentia quae sunt in pane, rotundatatem videlicet, saugum et graviti- tatem." He denied the propriety of calling the hostia as Christ, "qua accidentia visa non sunt corpus Christi, licet intus sit corpus Christi;" Therefore it was better to say, "hic esse corpus Christi sub specie panis." Munzinger, it is seen then, only objected to considering the sub specie brevitatem vel Christ. He denied, but by no means denied that Christ should be prayed to, sub specie panis, and hence his propositions were ap- proved by both the universities, notwithstanding that the Dominicans had ousted him as a heretic. See Plas- cius, Catol. tract. veritas, No. 315, and elsewhere; Scheler, Catalog. Institutionum, p. 511; L. c. 23, 2292; Giesler, Eccles. Hist., iii. 136, note.

Munson, Eneas, M.D., a Christian physician, was born in New Haven June 24, 1734; graduated at Yale College in 1758; and, after having been a tutor, became a chaplain in the army in 1755 on Long Island. Illness induced him to study medicine. He practiced physic at Bedford in 1766, and removed in 1769 to New

Haven, where he died, June 16, 1826, in high repute as a physician. Of the medical society of Connecticut he was the president. He was a man of piety from an early period of his life. At the bedside of his patients he was accustomed to confound the dying to God in prayer. It was with joyous Christian hope that this venerable old man went down to the dead.

Munson, John, a Presbyterian minister, was born in New Jersey in 1788. But little is known of his early history, save that in 1808 the family removed west of the Allegheny Mountains, and settled near Greensburg, Westmoreland Co., Pa. In the academy of that place he received a fair education; studied theology privately; was licensed and ordained in 1817; and in 1818 installed pastor of the congregations of Plain Grove and Centre, Pa. In 1888 he was removed from the former, and gave all his attention to the latter charge, where he labored till 1839, when he resigned. He subsequently removed to London, Mercer Co., Pa., where he died, Dec. 18, 1866. Mr. Munson was a man of superior intellect. He was a great reader, especially of standard works, such as Bates, Edwards, etc. As a theologian he was able, being familiar with all the great questions in controversy between the Calvinists and Arminians. His preaching was mostly textual. See Wilson, Preb. Hist. Ailmaco, 1867, p. 163.

Munson, Samuel, a Congregational minister, was born March 23, 1804, at New Sharon, Me. He graduated at Bowdoin College in 1829; and having entered the ministry with the intention of becoming a mis- sionary, offered his services to the American Board. He was sent with the Rev. Henry Lyman to Sumatra and the neighboring isles. They sailed for Batavia June 10, 1838, in which place they remained until April, 1834, when they sailed to Nias, thence to Tappanoopy. Having obtained servants and guides, they started to visit the remote portions of the country, but were met with many hindrances. They left their agents at Nias, and arrived at the town of Bata, in December, 1834. See Sprayge, Annals Amer. Pul- pit, ii, 747; American Missionary Memorial, a. v.

Münster, Protestant Revolt at. See Ana- baptists.

Münster, Sebastian, a German theologian and Hebraist, who identified himself with the Reformers, but exerected an influence only as a scholar, was born in 1499 at Ingelheim, in the Palatinate. At sixteen years of age he was Studium Gregorii, and Adrianusbecame his teachers. He then joined the Order of the Franciscans; but, brought in contact with Luther, he quitted the convent and embraced Protestantism. He was elected professor of Hebrew and theology at the University of Heidelberg, and subsequently at that of Breslau, where he rendered useful services to the cause of the Reformation. Among the titles which he communicated to the Hebrew language, besides being an eminent Hebraist, he was also an excellent mathematician; yet his erudition is hardly more praised by his contemporaries than by his modesty. His tombstone bears the inscription, "Germanorun Emser hic Slaebocondui scrutator." He was a sweet-tempered, paci- fic, studious, retired man, who wrote a great number of books, but never meddled in controversy; all which considered, his going early over to Luther must seem somewhat extraordinary. And yet he was one of the first who attached himself to Luther; but he seems to have done it with little or none of that zeal which distin- guished the early Reformers, for he never concerned himself with their disputes, but shut himself up in his study, and busied himself in such pursuits as were most agreeable to his humor; and these were the Hebrew and other Oriental languages, the mathematics, and natural philosophy. His works are, Biblia Hebraica Commentatio in codicem Germanum in usum recepta, cum Latina planque Nova Translatatione, adfecta inaspar e Robbinorum Commentaria Annnotationibus, etc. (Basle, 1584-55, fol.; reprinted in 2 vols. fol. in 1546, with considerable additions and corrections). This version is considered much more faithful and ex- act than those of Faginus and Arias Montanus, and
his notes are generally approved, though he dwells a little too long upon the comments of the rabbins. For this version he received the appellation of "the German Rashi," or "the German Chaldee," from the Hebrew Dictiona-
rium Chaldaicum non tam ad Chaldaicos interpretes, quam ad Rubírones intelligendi Commentaria necessa-
rium (4to) — Dictionarium Trilingue (Latin, Greek, and Hebrew, fol.) — Captivitates Judeorum mortui aut
itores (Hebrew and Latin, 8vo) — Calendarium bibl. Heb. et Hebraizum philiarum editio — Hebraica, c. 
logica R. Simons, Latina versus — Institutiones Grammati-
cum in Heb. linguam — Grammatica Ebræa — In-
ab Hebrew sequentes et octodecim numerament, cum suc-
cipitationibus vindicatis, ad eumque apud établissements
etc. (Hebrew and Latin, 8vo) — Organum Uranicum, theo-
rica omnium planetarum motus, canones (fol.) — 
Cosmographia Universalis (1544, fol., translated into
German, French, Italian, English, Bohemian, and other
languages). It is one of the first universal geographies
published in modern times, and is remarkably well ex-
cuted considering the age in which it was written.
The author is most diffuse in treating of Germany and
Switzerland. He gives a description of the principal
towns, their history, the laws, manners, and arts of the
people; the remarkable animals of the country; the
productions of the soil, the mines, etc.; and the whole
is illustrated by wood-cuts, with a portrait of the author.
Münster mentions several learned men of his time who
furnished him with an account of their respective coun-
tries, of Sardinia, the Illyricum, etc. He also gives
specimens of several languages: — Rvidentia mathema-
tica in duos libros digesta : — Heidelbergia philolo-
ica in duos libros digesta : — Heidelbergia philolo-
ica in duos libros digesta : — Heidelbergia philolo-
ica in duos libros digesta.

Münster, SYND OP, is the name of an independ-
ent body of Irish Presbyterians, consisting of a few con-
gregations in Dublin and the south of Ireland, who se-
cede from the Synod of Ulster, and of that denomination
mainly Unitarians in creed. See Kilin's Hist. Presb. Ch.
in Ireland, iii, 498-9, 488.

Münster, Balmastor, a German theologian, noted
as a pupil orator and scholar, was born at Lubeck
March 24, 1735. He studied theology at Jena, was
for a time preacher at Gotha, and eventually became
celebrated as a pupil orator in the German Church of
Copenhagen, Denmark, where he removed in 1765, and
as the editor of the Bekehrungsgeschichte of count Stru-
eneck, whom he had attended on the scaffold (Copen-
hagen, 1772; English translation, entitled A Faithful
Narrative of the Conversion and Death of Count Struen-
ser, etc., by the Rev. Mr. Wendeborn [2d ed. Lond.
1772]), and wrote a series of hymns (1772 and
1774). He died in 1793.

Münster, Friedrich Christian Karl Hein-
rich, a theologian, Orientalist, and archaeologist who
 gained great celebrity in Denmark, which became his
country by adoption (see preceding article), was the
son of Balthasar, and born at Gotha, Germany, Oct.
14, 1761. He studied at Copenhagen and Göttingen,
and in 1786 went to Italy. After his return, towards
the end of 1788, he was appointed professor of theology
at Copenhagen. He became successively co-director of
the Orphan House in 1806 and bishop of Zealand in
1808. He died April 9, 1860. Münster wrote a number
of works of great interest to the student of ecclesiastical
archaeology, and yet he must be regarded really as more
important as a savant than as a theologian. He found-
ed the Museum of Northern Antiquities at Copenhagen,
and did much to promote Danish history, mythology, and
archaeological studies. He wrote, Metrische Uebersetzung der Offen-
barung Johannis (Copenhagen, 1784; 2d ed. 1806) — Nachrichten
von den Sáchsen (Danish, 1778; German, 1790, 2 vols.) — Die
Kirchlichen Alterthümer der Gnoother (Augsburg, 1790) :
— Magazin für Kirchengesch. u. Kirchenrecht des Nord-
ens (Altona, 1782-26, 3 vols.) — Statutenbuch d. Teuton-
ischen Bruderschaften v. der Kirchensch. (1795 ;) — Verzichte der Güter der Kirchensch.
(1798) — Handbuch der ältesten christlichen Dog-
mengeschichte (Göttingen, 1801; second ed., 2 vols. 1802) — Untersuchungen u. d. Persepolitan. Inscriften (1800,
1802) — Untersuch. u. d. Kalifeninser. Inscriften in Sicli-
(e. 1801) — Sprüren ägyptischen Alters (Halle, 1801) —
Prüven d. hebräischen Urspr. in Sicilien u. d. damal. inns (Leipsic, 1806) —
Religio d. Cæsarius (1816; 2d ed. 1821) —
Antiquaire Abhandlungen (Copenhagen, 1816) — Dis-
Cfilarer A. Hagemanns theologische et philologische argumenten (Copenhagen, 1816-25, 2 vols.) — Recherches sur l'origine de
l'ordre des chevaliers de Donnemare (Copenhagen, 1822) — Kirchengesch. v. Dänemark u. Norwegen (Leipsic, 1823-4, 3 vols.) — Stimmblatter u. Kunstvorträge d. alten Christen (Altona, 1825) — Der Stern der Weisen (Untersuchung
über das Geburtsh. Christi) (Copenhagen, 1827) — Religion d. Babylonier (Copenhagen, 1827). See his life by
iversal-Lex. xi, 544; Biblical Repos. iv, 583. (J. N. P.)

Münthe, Caspar Friedrich, a Danish scholar
or his researches in the original of the N. T. Scriptures, flourished as Copenhagen as professor of
Greek in the first half of the 18th century. He died in
1792. He wrote, Observationes philologice in Sacra
Novi Testamenti Libros, ed. Diodoro Siculo collecta (Copen-
hagen and Leipsic, 1755, 8vo).

Muntinghe, Herman, a Dutch theologian of some
note, flourished as professor of theology at the Uni-
versity of Groningen near the opening of this century. He
died April 24, 1624. He was for some time pastor of
the Reformed Church in Holland, but this is all we know
of his personal history. As an author, however, he
is well known by his Pars Theologiae Christianae Theo-
retica (Groning, 1801; 2d ed. 1818-22, 2 vols. 8vo).
The first volume contains a compendious system of theology:
The second a succinct account of the leading contro-
versies with regard to religious doctrine, with copious refer-
ences to the works of the leading Dutch, German, and
Danish commentators. Of Dr. Muntinghe's other works, it may be sufficient to
mention a Latin Outline of Church History, on the basis
of Schröckh's Compendium, and a voluminous History of
Mankind, to which frequent reference is made in his
Theology.

Munton, Anthony, an English divine, flourished
near the middle of the 18th century as curate of St.
Andrew's church, Newcastle. He died in 1755. He
was noted in his day as a pupil orator of great excellence
and power. "Some of his sermons," says a contempo-
rary,"would be pronounced truly excellent by every
dispassionate judge." A volume of Muntson's Sermons
was published shortly after his death (Newcastle, 1756,
8vo).
MUNUS CHRISTI

MUNZER, THOMAS, a religious enthusiast and fanati-
c-functional of the great Reformation period, was born at Stolberg, in the Harz, about 1486, and engaged in the study of law at the university, and at the University of Erfurt. He was excommunicated by the University of Erfurt in 1520, and afterwards became a student at the University of Marburg, where he was known as a religious enthusiast, and was excommunicated by the University of Marburg in 1521. He then went to Wittenberg, where he was received by Luther, and became one of his most ardent followers. He was the author of several works, including the "Protestantische Predigt," which was published in 1522, and the "Erlösungsgeschichte," which was published in 1523. He was excommunicated by the University of Marburg in 1524, and was afterwards excommunicated by the University of Wittenberg in 1525. He was the first preacher to substitute the German language for the Latin in the public prayers and singing, and composed a directory for worship, which was in harmony with his ideas of the Reformation. The quiet duties of a pastor at Saez.
MUNZER

Muratori

aspiring to Müntzer, and being desirous to contest with Luther the leadership in the reformational movement, Müntzer determined to use all means to destroy the latter's influence; but his conduct displeased the princes who feared his influence. Unusually, at the request of Frederick of Saxony and John of Weimar, Müntzer was obliged to leave Alstedt in 1524. He now went successively to Nuremberg, Schaffhausen, and finally to Mühlhausen in Thuringia. In the latter place he acquired great influence over the people, which he hoped to use to further his own purposes. He had adopted mystical views, and declaring against what he called the "servile, liberal, and half" measures of the Reformers, required a radical reformation both in Church and State, according to his "inward light." He resolved on recourse to violent means, and his cry became, "We must exterminate with the sword, like Joshua, the Canaanish nations." He caused the authorities of this place to be superseded, the convents and richest houses of the city to be plundered, and communism to be proclaimed.

"Münzer," Luther wrote to Amoldorf, April 11, 1525, "Münzer is king, and emperor of Mühlhausen, and no longer is pastor." The lowest classes ceased to work. If anyone wanted a piece of cloth or a supply of corn, he asked his richer neighbor; if the latter refused, the penalty was hanging. Mühlhausen being at that time a free town, Müntzer exercised his power unmolested. He was, moreover, encouraged in his course by being joined by another some time by another brother in Mühlhausen. This was that forty thousand peasants were arming in Franconia, decided Müntzer to go still further and make himself master of the situation by an appeal to the peasants of Thuringia, promising them the spoils taken from their lords. The revolt of the peasants of Southern Germany led him to increase his power. Müntzer had come to extend his new kingdom. He had cast some large guns in the convent of the Franciscans, and now exerted himself to raise the peasants and miners. "When will you shake off your slumberers," said he, in a fanatical address: "Arise and fight the battle of the Lord! The time is come—France, Germany, and Italy are up and doing. Up and at it!—Drum (at it!), drum, drum!—Heed not the cries of the ungodly. They will weep like children—but be ye pitiless.—Drum, drum, drum!—Fire burns—let your swords be ever tinged with blood!—Drum, drum, drum!—Work while it is day.

"The hour has been signed. Müntzer, Müntzer, the ungodly, or "Thomas Müntzer, with the sword of Gideon." Leaving Pfeiffer as governor at Mühlhausen, he marched towards Frankenhausen, and committed all manner of excesses in the country which he traversed. The country people, eager for plunder, flocked to his standard. Thus the bishops, princes, and rulers, who were the sons of Mansfeld, Stoiberg, Schwarzburg, Hesse, and Brunswick the peasants rose en masse. The convents of Michelstein, Ilsenburg, Wallenried, Roseneben, and many others in the neighborhood of the Hartz mountains or in the plains of Thuringia, were plundered. At Reinhardbrunn, the people were so dangerously surprised by Müntzer's army that some of their ancient landgravies were violated, and the library destroyed. Terror spread far and wide. Even at Wittenberg some anxiety began to be felt—the doctors who had not feared emperors or pope trembled in presence of the madman. Curiosity was all alive to the accounts of what was going on, and watched every step in the progress of the insurrection. Melanchthon wrote: "We are here in imminent danger. If Müntzer be successful, it is all over with us; unless Christ should appear for our deliverance. Müntzer's progress is marked by more than Scythian cruelty. His threats are more dreadful than men can tell you." The elector John, duke George of Saxony, and the landgrave Philip of Hesse, from whom Henry of Brunswick finally united their forces, and sent fifteen hundred horsemens and some companies of infantry against the rebels. Müntzer's men then numbered about eight thousand. A battle was fought May 15, 1525, and the insurgents were completely defeated; according to some accounts they lost five thousand men, according to others seven thousand. Frankenhausen was taken and plundered. Müntzer, discouraged, hid in a house feigning to be sick. He would have died if a soldier having found in his travelling-bag a letter by count Mansfeld, Müntzer was recognised and arrested. Being put to the torture, he revealed the names of his accomplices; was then taken to Mühlhausen, where Pfeiffer, who had sought to escape, was also a prisoner, and the two, together with twenty-four other rebels, were beheaded. His numerous writings, all of which are still extant, indicate a more than ordinary mind and will, but they betray also a great lack of sound judgment and a want of common-sense. His language is often forcibly eloquent, but all his utterances are tinged with coarseness and vulgarity. See Melan- thon, Die Historie v. Thomä Müntzer, etc. (1525); Christ. Guir. Aurbachbi Dissertationes oratoria de eloquentia imper- sa Thoma Muntzeri (Wittenberg: 1716); Lischer, Dis- sertatio de Muntseri doctrina et factis (Leips. 1708); Strobel, Leben, Schriften u. Lehren Thomä Müntzers (Nurnb. und Altdorf, 1735); id. loc. Revolution, p. 136, 141 sq.; 190; Blackwood's Magazine, Feb., 1847, p. 385 sq.; Zeitschr. f. Hist. Theologie, 1818, 1860. See also Peabody's Wahl.

Mupปีม (Heb. Mupปีม, มุปปีม, per. contrasted from ฉัมใน in the sense of flight; Sept. Μυπημ, v. ร่อภิม and Ὠμοψμ μοθμ, Vulg. Mupppem), a person named in Gen. xxvi, 21 as one of the sons of Benjamin born before the migration into Egypt; but really a grandson born much later, being a son of Becher (q. v.), as it would seem from parallel accounts. See Βεκα- μην. He is doubtless the same elsewhere called Shup- pem (Gen. xxvi, 15), Shuppem (Gen. xxxvii, 26), Shuppem (1 Chron. vii, 80), or Shuppem (1 Chron. viii, 12). See JACOB.

Muratori. LUNOVICO ANTONIO, a distinguished Italian theologian, archaeologist, and historian, was born at Vignola, near Modena, Oct. 21, 1672. His family being in moderate circumstances, his early education was neglected. In 1685, however, he entered the college of the Jesuits, where he distinguished himself for his studia and zeal for the reformation; and his predilection for historical and literary pursuits began to manifest itself; and having entered into holy orders in 1688, without, however, accepting any ecclesiastical office, his life was devoted partly to the literature of his profession, but mainly to researches in history, both sacred and profane, in his native country. He took the degree of doctor in 1692; and his reputation for learning attracting the notice of Joseph Orsi and Felix Mariggi, he was on their recommendation appointed by Charles Borromeo sub-librarian of the Ambrosian Library at Milan. In that collection Muratori discovered several manuscripts, which he made extracts from, and published them with notes and comments, under the titles of Ana- cedota Latina and Anaecedota Graeca (Milan, 1697-1713, 4 vols. fol.). Some years after he was recalled to Modena by the duke Rinaldo, who gave him the situation.
of librarian of the rich library of the house of Este, a place which he retained for the rest of his life. After this appointment Muratori devoted himself entirely to the study of the Italian records of the Middle Ages; and after many years of assiduous labor he produced his greatest work, the Scriptorum Christianorum ad 1500 (28 vols. fol.). The first volume of this immense collection was published at Milan in 1728, and the last appeared in 1751. Several princes and noblemen defrayed the expenses of the publication; sixteen of them contributed $4000 each. In this collection, Muratori has included all the chronicles of the Middle Ages which he could discover, most of which were inedited, and has accompanied them with valuable commentaries. Some of the texts had already been published by Guiraud in his Theaurus Antiquitatum et Historiarum Italic, but they were mostly confined to the last century or two of the period of a thousand years embraced by Muratori. While engaged in these prodigious labors, he also carried on an active literary correspondence with the scholars of the various countries of Europe, and contributed essays not unfrequently to the principal historical and literary academies, of most of which he was a member. Muratori, however, held opinions not always in harmony with those of his contemporaries, and became involved in a quarrel with several writers by an attack upon the learned institutions of the time, and by an advocacy of the plan of a republic of the learned in a series of letters printed at Venice in 1708, under the name of Lamindo Baglionesi. This也可被看作是莫拉托里对新路的追求。新路的方式是通过他的De ingeniosus moderatione in religione ne-gotio（first published at Paris, 1714; German, Cobolzect, 1837). It is in the interests of Hermeticism (see HEMITES, GEORGE), and was republished in Germany. Muratori endeavors to show in this work that freedom of thought in religion must be maintained, and that he himself is not always in harmony with those of his contemporaries, and became involved in a quarrel with several writers by an attack upon the learned institutions of the time, and by an advocacy of the plan of a republic of the learned in a series of letters printed at Venice in 1708, under the name of Lamindo Baglionesi. MURATORIAN FRAGMENT

MURDER

Muratorian Fragment, also spoken of as Can ones of Muratorii, is a treatise on Biblical MSS. of great importance in the history of the N.-T. canon. It is believed to have been composed shortly after the production of the Shepherd of Hermas (q. v.), and therefore belongs to the second half of the 2d century. It is important, first, because of its remote antiquity, and also as an evidence as to what writings passed for canonical in the Roman Church at that time. It contains, in such the Gospel of Luke (as the third, the two others being presupposed), the Gospel of John, the Acts of the Apostles, eighteen Pauline epistles, a letter of Jude, two epistles of John, the Apocalypse of John and Peter, the latter, however, with contradiction asserted. The Epistles of Jacob (James) and Peter are therein omitted, also the one to the Hebrews. The epistles to the Laodiceans and Alexandrians are rejected. The fragment was noticed by Muratori in his Antiq. Ital. mediæ aevi, iii, 584, and has been reprinted in the Introductions to the N. T. of Eichhorn and Guericke, also by Kirchhoff and Griesbach. An exhaustive treatment of the subject, with the original text, and a translation of it into Greek, by Hilgenfeld, is found in the Zeitschrift für wissenschaftliche Theologie, 1872, p. 560. See also Giese, in Studien u. Kritiken, 1847 and 1866; Hesse, Das Muratorische Fragment untersucht u. erklärt (Gieseuen, 1867); Westcott, Canon of N. T. (2d ed.), p. 184 sq.; Bapt. Quart. April, 1866, p. 292; Amer. Rev. Rev. J. 1869, p. 100.

Mucrot, Jons, an English divine of some note, was born near the opening of the 17th century, and was educated at the University of Oxford. He wrote largely, and yet but little is known of his personal history. He died in 1654. His most important writings were collected and published as Theolog. Treatises (1657, 4to). Wood, in his Athenæ Oxoniæ, speaks of Mucrot as characterized by "a forward, prating, and pragmatistical precision." Thomas Manton held him highly in esteem, and speaks of him thus as a preacher: "It was pity that the sermons coming from such a warm, affectionate spirit should die away with the breath in which they were blown out." As a fruit it remained (I hope) in the hearts of many that heard him, so is it wrapt up in these papers to preserve it from perishing and forgetfulness." See Allibone, Dict. Brit. and Amer. Auth. a. v.

Murder (properly בָּמַד, which, however, is rendered 'slaughter' in the Auth. Ver., from בָּמַד, to 'kill,' φονέω). The criminal law of the Israelites naturally recognized the distinction between wilful murder and accidental or justifiable homicide (Numb. xxvi, 16 sq.), although in the legislative language itself the word בָּמַד is used for both kinds of manslaughter (see especially Numb. xxvi, 26; Deut. xix, 5, etc.). Murder was invariably visited with capital punishment (Lev. xxiv, 17; comp. Gen. ix, 6), without the possibility of expiation. Mere homicide (the act of בָּמַד in Numb. xxxv, 15, or בָּמַד וּבָּמַד in Deut. iv, 42), was however, liable to a forfeiture of life according to all ancient national observances.—Wiinner, ii, 105. (See Ewald, Alterthümer des V. Israel. p. 146-154.) See Blood-revenge. The principle on which the act of taking the life of a human being was regarded by the Almighty as a capital offence is stated on its highest ground as an outrage—Philos calls it sacrilege of the blood of God (Gen. ix, 5). It was invariably visited with capital punishment (Gen. ix, 5; 6, 6), even when caused by an animal (Gen. ix, 5, 6, with Bertheau's note; see also John viii, 44; 1 John iii, 12, 18; Philo, De Spec. Leg. iii, 15, vol. ii, p. 318). Its secondary or social ground appears to be implied in the direction to replenish the earth which immediately follows (Gen. ix, 7). The exemption of Cain from capital punishment may thus be regarded by anticipation as founded on the social ground either of expiency (Gen. iv, 15), or of interest in the perpetuation of his race by God's command, enlarged and infringed by the practice of blood-revenge, which it seems to some extent to sanction, was limited by the Law of Moses, which, while it protected the accidental homicide, defined with additional strictness the crime of murder. It prohibited consuming the flesh of an unrepentant murder, his protection if he took refuge in the refuge-city, or even at the altar of Jehovah, a principle which finds an eminent illustration in the case of Joab (Exod. xxii, 12, 14; Lev. xxiv, 17, 21; Numb. xxxvi, 16, 18, 21, 23; Deut. xii, 11, 18; 2 Sam. xvii, 23; xx, 10; 1 Kings ii, 6, 5, 31; see Philo, L. c., Michaelis, On Laws of Moses, § 192). Bloodshed even in warfare was held to involve pollution (Numb. xxxvi, 8, 84; Deut. xxxi, 1, 9; 1 Chron. xxviii, 8). Philo says that the attempt to murder deserves punishment equal with actual perpetration; and the Mishna, that a mortal blow intended for another is punishable with death; but no express legislation on this point is found in the Law (Philo, L. c.; Mishna, Sanh. ix, 2).

No special mention is made in the Law (a) of child-murder, (b) of Patrick, nor (c) of taking life by poison, but its animus is sufficiently obvious in all these cases (Exod. xxii, 15, 17; 1 Tim. i, 9; Matt. xvii, 4), and the thing was expressly intended under the prohibition of witchcraft (Exod. xxix, 18; see Joseph. Ant. iv, 8, 48; Philo, De Spec. Leg. iii, 17, vol. ii, p. 315).

It is not certain whether a master who killed his slave was punished with death (Exod. xxxi, 20; Knobel, ad loc.). In Egypt the murder of a slave was punishable with death as an example a fortiori in the case of a freeman; and Patrick was punished with burning; but child-murder, though regarded as an odious crime, was not punished with death (Diod. Sic. i, 77). The Greeks also, or at least the Athenians, protected the life of the slave (Müller, Dörkis, iii, 8, 4; Wilkinson, Anc. Eng. ii, 298, 299).

No punishment is mentioned for suicide attempted (comp. 1 Sam. xxxi, 4 sq.; 1 Kings xvi, 18; Matt. xxvii, 5; see 2 Mac. xiv, 41 sq.), nor does any special restriction appear to have attached to the property of the suicide (2 Sam. xvii, 23); yet Josephus says (War, iii, 8, 3), that he was punished with death.

Striking a pregnant woman so as to cause abortion was punished by a fine; but if it caused her death it was punishable with death (Exod. xxxi, 23; Joseph. Ant. iv, 8, 3).

If an animal known to be vicious caused the death of any one, not only was the animal destroyed, but the owner also, if he had taken no steps to restrain it, was held guilty of murder (Exod. xxii, 29, 31; see Michaelis, 274, vol. iv, p. 234-254).

The duty of executing punishment on the murderer in the Law is expressly laid on the "revenger of blood;" but in the case of the murder of a man by a beast it is performed by the Levitical tribunal. A strong bar against the licence of private revenge was placed by the provision which required the concurrence of at least two witnesses in any capital question (Numb. xxxv, 19-30; Deut. xvii, 6-12; xix, 12, 17). In regal times the duty of execution of justice on the murderer seems to have been assumed by some extent by the sovereign, as the privilege of pardon (2 Sam. xiii, 39; xiv, 7, 11; 1 Kings ii, 54). During this period also the practice of assassination became frequent, especially in the kingdom of Israel. Among modes of effecting this object may be mentioned the murder of Benhaddad of Damascus by Hazael by means of a poisoned arrow (2 Kings iv, 27, 19, 9; 2 Kings viii, 15; see thenius, ad loc.: Jahn, Hist. i, 187; comp. 2 Kings x, 7; xi, 1, 16; xii, 20; xiv, 5; xv, 14, 25, 30).
It was lawful to kill a burglar taken at night in the act, but unlawful to do so after sunrise (Exod. xxiii, 2, 3). The Koran forbids child-murder, and allows blood-revenge, but permits money-compensation for bloodshed (li, 21; lv, 72; xvii, 290, ed. Sale).—See MANSLAY.

MURDER, CHRISTIAN LAWS CONCERNING. In civil law murder is termed the killing of a human being of malice aforethought, and the crime thus committed is in most countries punishable by death. In the United States there are several states in favor of life imprisonment, and in Sweden capital punishment is no longer meted out. Murder is defined by Coke thus: "When a person of sound memory and discretion unlawfully killeth any reasonable creature in being, and under the king's peace, with malice aforethought, either express or implied." Almost every word in this definition has been the subject of discussion in the numerous cases that have occurred in the law-courts. The murderer must be of sound memory or discretion; i.e. he must be at least fourteen years of age, and not a lunatic or idiot. The act must be done unlawfully, i.e. it must not be in self-defence, or from other justifiable cause. The person killed must be a reasonable creature, and hence killing a child in the womb is not murder, but is punishable in another way. See INFANTICIDE. The essential thing in murder is that it be done maliciously and deliberately; and hence in cases of hot blood, especially in disposing of the offspring of a marriage, only. Killing by duelling is thus murder, for it is deliberate. It is not necessary, in order to constitute murder, that the murderer kill the man he intended, provided he had a deliberate design to murder some one. Thus if one shoots at A and misses him, but kills B, this is murder, because the previous felonious intent, which the law transfers from one to the other. So if one lays poison for A, and B against whom the poisoner had no felonious intent, takes it and is killed, this is murder. The murderer is here regarded as hostis humani generis. "Anciently," Blackstone says, "the name of murder, as a crime, was applied only to the secret killing of another, which the word moeris signifies in the Teutonic language." Among the ancient Goths in Sweden and Denmark the whole vill or neighborhood was punished for the crime, if the murderer was not discovered. The Roman Catholic Church stands accused of encroaching on punishment for this crime. In England the statute for the "Benefit of Clergy" was only abolished by George IV (7 and 8, c. 28). The murder of heretics has frequently been encouraged in the Roman Church, as witness the slaughter of St. Bartholomew (q.v.). Pope Urban II stands accused beyond dispute of having encouraged murder; and in the 16th century, when the Roman Church were in charge of the Council of Florence and of Constance in vain to condemn the monstrous teachings of Jean Petet (see Montrelet, The Eight Principles of J. Petet, li, c. xxix), who in ambiguous writing had vindicated as just and lawful most foul and treacherous murder, and in this vindication laid down "principles utterly subversive of human society; principles which would let loose mankind upon each other, like wild beasts; principles in direct violation of one of the commandments of God, and in plain, bold opposition to every principle, and to the whole religion of Christ"—the council not only did not condemn these monstrous tenets, but declared them simply "moral and philosophical opinions, not of faith," and therefore out of the province of the Church and of the council (Milman, Hist. of Latin Christianity, vi, 508). In the 18th century inducements were freely granted the clergy for murder committed, and the price fixed at $20 to the dean, and $55 to a bishop or abbot (see Barnum, Romanism, p. 506). Statisticians have prepared comparative lists of the crime of murder committed in Roman Catholic and Protestant countries. We insert here one of these, as these statistics exhibit plainly the moral results of the Romish and Protestant systems. The Rev. M. Hobart Seymour gives in his "Evenings with the Romanists" an introductory chapter on "the moral results of the Romish system," which embodies various statistics respecting crime drawn directly from official returns in the several countries named. Thus the comparative numbers of committals (or trials) for murder as given by Mr. Seymour for each million of the population, according to the censuses next preceding 1864, were these:

<table>
<thead>
<tr>
<th>Country</th>
<th>Murder per Million</th>
</tr>
</thead>
<tbody>
<tr>
<td>Protestant</td>

</tbody>
</table>

The New-Englander for July, 1869, and January, 1870, contains some additional statistics and later statements on this subject from official returns. These give the following proportion of convictions for murder and attempted murder for infants, in England and France in the year 1865-6:—

<table>
<thead>

There were in the Papal States in 1867, according to official (French) returns, 186 murders to each million of the population. Mr. Seymour furnishes also various statistics showing the immorality of Roman Catholic cities and countries in Europe to be decidedly greater than that of similar Protestant cities and countries, and often twofold, or even treble, as in Naples, Genoa, and Venice. No Protestant city or city in Europe, and let its depths of vice and immorality be measured and named, and I will name a Roman Catholic city or city whose depths of vice and immorality are lower still." Mr. Seymour's statistics, though widely published, have generally been disregarded. In April, 1869, it is stated in The Catholic World attempted to break the force of his argument by citing the case of the Protestant Stockholm, which it alleged that Mr. Seymour willfully suppressed, and where, according to it, the rate of illegitimate births to the whole number of births "is over fifty to the hundred—equivalent to that of Vienna." To this the New-Englander of January, 1870, replies: "It seems to us sufficient to say, first, that the statement of the Catholic World is untrue. At the time of Mr. Seymour's statement the official return of illegitimacy in Stockholm was twenty-nine per cent., which is considerably less than 'over fifty to the hundred.' Secondly, that the following eleventh report of the Stockholm Board of Births is the notoriously worst of all Protestant cities: Paris, 33 per cent.; Brussels, 35; Munich, 48; Vienna, 51; Lai- bach, 88; Brunn, 42; Lintz, 46; Prague, 47; Lemberg, 47; Klagenfort, 56; Gratz, 65." The official statistics of Germany, as given in the New-Englander for January, 1870, show an average of 117 illegitimate births in every 1000 births in the Protestant provinces, and of 186 in 1000 in the Roman Catholic provinces; those of Austria gave for the Roman Catholic provinces in 1866 an average of 215 illegitimate births in every 1000 births,
and in the mixed provinces (containing 9 up to 85 per cent. of Roman Catholics, the remainder Protestants, Greeks and Jews) 30 in every 1000 births for the various nations of Europe is as follows:

\[
\text{Protestant, Roman Catholic.}

Taking the average birth-rate in Europe—1 a year for every 28 of the population—the returns in Italy show that more than one fourth of the births fail to be registered; and the official returns for Spain are notoriously untrustworthy. It has been said that the official returns for Ireland gave only 3.8 per cent. of illegitimate births, and most of this in the Protestant counties; but the registrar-general complains that many births and deaths are not registered; and the comparison of 1 birth only for every 42 of the population as returned, with the average European birth-rate of 1 in 28, would imply that nearly one third of the births in Ireland are unregistered. The percentage of illegitimate births in Italy, Spain, and Ireland may therefore be much larger than the imperfect official returns indicate, and is of course untrustworthy. Other statistics of immorality are also given in the New-Englanders, but we have no room to quote here further, and refer our readers interested in a comparative statement of the moral influences of Protestantism and Romanism to the periodicals cited.

Murdock, John D., a Presbyterian divinity student was born in the village of Bonhill, in Dumfriesshire, Scotland, in 1801. His father was a stone-cutter, who often labored with the friends of Hugh Miller. David possessed indomitable energy, and obtained for himself a thorough and accomplished education. He graduated at Glasgow University; studied theology in the theological school of the Scottish Independents; and was licensed and ordained in Glasgow, according to the forms of the Scottish Congregationalists, about the year 1831. His first charge was the parish of Cambusbarr, near Glasgow, a place memorable for the wonderful preaching of Whitefield. In 1834 he accepted an appointment from the Colonial Missionary Society as a missionary to Canada, and on his arrival in that country he resided principally at Bath, preaching as a supply to the destitute and feeble churches of that region. In 1837, about the time of the Patriot War, he left Canada, and was settled as the successor of Dr. McMaster at Ballston Centre, N. Y.; in 1842 he accepted a call to Catskill as successor to the Rev. Dr. Porter. In 1851 he accepted a call to the First Presbyterian Church in Elmira, N. Y., where he labored until his death, June 13, 1861. Dr. Murdock was emphatically a man of the people. In the pulpit, in the lecture-room, on the platform, he was in demand everywhere. He was a great reader, and especially a profound scholar in the scientific and literary departments of successful as an essayist. An article by him on Conning and Chalumers, in the Presb. Quart. Review, is one of power. See Wilson, Presb. Hist. Almanac, 1862, p. 189.

Murdock, James, D.D., one of the profoundest religious and ecclesiastical scholars of the United States, a brother of Dr. John D. Murdock, was born at Westbrook, Conn., Feb. 16, 1776, of Irish descent. He was left an orphan at the age of fourteen; but he struggled with his fate, and finally succeeded in making his way to Yale College, where he graduated in 1797. He then took up the study of theology under the well-known Congregational theologian, Dr. Timothy Dwight. Instead of entering at once the ministry, he decided to teach for a while, and became successively preceptor of Hopkins grammar school in New Haven, and of the Onei- cian Academy, now Hamilton College, at Clinton, N. Y. In January, 1801, he was admitted to the ministry, and June 23, 1802, was ordained pastor over the congregation at Princeton, Mass. In 1815 he removed from that place to become professor of languages in the University of Vermont. In 1819 he exchanged this position for that of professor of divinity and ecclesiastical history in the theological seminary at An- dover, Mass., and this post he held until 1822, when he removed to New Haven to devote himself altogether to special studies in ecclesiastical history and oriental literature, which he prosecuted with a youthful zest beyond his fourscore years. He died at Columbus, Mass., Aug. 10, 1856. Dr. Murdock did the literary world great service by his superior English version of Mosheim's Church History. He published likewise, with great acceptance, Mosheim's Commentaries on the Affairs of the Christians before Constantine. See Mosheim. Dr. Mur- dock published a translation of the Peshito of the Civil Code of N. T. (N. Y. 1851, 8vo). His miscellaneous productions were numerous and able. It was his temper to make fundamental researches, and to press his investigations into original sources. While at Andover he published Two Discourses on the Atonement. Later he brought out an Emended Edition of Milman's Elementary History of Rome (1830), and Sketches of Modern Philos. (1843). He also edited Milman's Hist. of Christianity (N. Y. 1841), and brought out a collection of his Sermons, one of which, on the onæmatron, attracted much attention. He was also a frequent contributor to periodicals, especially to the Church Review, and this well-known quarterly did itself the honor to ignore his denominational boundaries (Protestant Episcopal) and furnish a pretty full account of the doctor shortly after his decease (see below). Dr. Murdock was president of the "Connecticut Academy of Arts and Sciences," vice-president of the "Connecti- cut Philosophical Society," and one of the founders of the "American Oriental Society." See G. B. Moore, Memoirs of the Class of 1797 (Yale), by Thomas Day; Church Rev. Jan. 1857, art. ii.

Muretus (Muretus), Marc Anthony, a celebrated Roman Catholic scholar, best known by his philosophical writings, was born at Muret, a village near Limoges, in France, April 11, 1260, of a good family. But little be- yond this is known of his early life. When about eighteen we find him studying at Agena, under Scaliger, who interested himself in Muretus, and ever cherished the highest opinion of his pupil. In 1552 he delivered in the church of the Bernardine his first oration, De dignitate ac praestantia theologiae. He thereupon began teaching philosophy and law at Paris, but evidently leaning towards the sacred ministry. Accused of im- moral practices, he was finally obliged to quit Paris, and he led for some time a roaming life. He went to diff. places, everywhere commanding for a time the respect of his followers by his vast and varied erudition, but his immoral tendencies would ever compromise him, and he was soon ignored by his associates. About 1560 Muretus found employment under cardinal Este at Rome, and from that time he is believed to have led a more reg- ular life. In 1562 he attended his patron on a visit to Paris, and there remained, and was prevailed upon to lecture on Aristotle's Ethic, which he did with singular applause up to 1567. After that he taught civil law. In 1567 he entered holy orders, and is believed to have become both priest and Jesuit. He died June 4, 1585. He was made a citizen of Rome, probably by pope Greg- ory XIII. His works are still immemorial, because his theology is questioned, and he is believed to have cherished deistic views. See Nicéon, Mémoires, vol. xxvii, s. v.; Beze, Hist. Eccles. iv, 534; Vitrac, Éloge de Muret; New Gen. Biochron. Dict. (Lond. 1798), xi, 128, 141; Hallam, Introd. to the Literature of Europe (Harper's ed.), ii, 497, 498, 506; Fye Smith, Outlines of Theol. p. 111. (J. W.)
MURILLO

MURILLO, Bartolomé Esteban, the Titan of Spanish art, was born Jan. 1, 1618, at Pilas, a small hamlet about five leagues from Seville. Developing at an early age, and in his sixteens, he was placed under the instruction of his maternal uncle, Juan del Castillo, a distinguished historical painter of Seville, who was the preceptor of some of the greatest artists of the Spanish school. In 1642, Murillo, having heard of the fame of Diego Velasquez of Madrid, which at this period had reached its zenith, was filled with a desire to study under that master, and consequently journeyed to Madrid, where he presented himself before Velasquez, who, perceiving his merit, not only took Murillo into his academy, but procured for him the privilege of copying the masterpieces of Rubens, Titian, and the other great masters of the royal court. Murillo thus passed three years in hard study; and in 1645 he returned to Seville, where his first work was painted in fresco for the convent of St. Francis. It was a picture consisting of sixteen compartments, in one of which is his celebrated production of St. Thomas de Villanueva distributing Alms to the Sick and the Poor. At the principal altar of the same convent is a large picture of the Jubiets de la Porciuncula, representing Christ bearing his cross, and the Virgin interceding for the supplicants, with a group of angels of most extraordinary beauty. These pictures created so much enthusiasm among his countrymen that his fame was at once established, and he was elected President of the Academy of St. Luke, and received a commissariat from the Marquis de Villanuans to paint a series of five pictures from the life of David, the landscape backgrounds of which were to be executed by Ignacio Iriate, an eminent landscape-painter of Seville. There was a dispute between the two artists as to which part of the pictures should be first completed, Murillo holding very rightly, that the backgrounds should be first painted; to this Iriate demurred, and the consequence was Murillo undertook to do the whole himself, which he did, changing the life of David to that of Jacob, and producing the famous pictures now in the possession of the marquis de Santiago at Madrid. In the same collection are two others of his finest works, St. Francis Xavier, and St. Joseph with the young Saviour. The cathedral of Seville contains several of his great pictures, among which are St. Antonio with the Holy Infanta, a glory of angels and a remarkably fine architectural background, the Immaculate Conception, and portraits of several archbishops of Seville. From the St. Anthony picture the figure of the saint was cut in 1874, and brought for sale to this country; but, falling into the hands of a well-informed party, it was returned, and placed where it properly belongs. The Hospital of Charity contains three of his greatest works, Morning, Krishna feeding the five thousand, and one of St. John supporting a poor old man, aided by an angel, upon whom the saint looks with a beautiful expression of reverence and gratitude. The altar-piece of the Conception, in the church of San Felipe Neri at Cadiz, and a picture of St. Catharina at Seville, are not only noteworthy for their beauty, but the latter is considered by many as his finest work, although Murillo himself always preferred his St. Thomas de Villanueva at Seville. In the chapel of the Nuns of the Angel at Granada is one of his most celebrated pictures, representing the Good Shepherd. Space does not admit of a full list of Murillo's works, but as a painter of religious subjects he ranks hardly second to Raphael. His pictures of the Virgin, saints, Magdalens, and of Christ, are all so characteristically beautiful and refined, so pure and chaste, that he can be said to have followed no given style, though the coloring of his canvases, and his habit of painting with a kind of chiaroscuro, are so peculiar that in all Murillo's pictures of the Virgin he has never placed her feet, which in every instance are covered with almost faultless drapery, as if the charms of the holy Mother were too sacred to be made the subject of illustration. This can be said of no other religious painter, and enveneys a proof of the purity with which Murillo looked upon his art. In 1650 Murillo founded an academy of art in Seville, and was appointed its president, in which office he continued until April 8, 1654. After this period he lived in poverty, when he was relieved by a fall from a scaffold while engaged in painting the St. Catherine at Cadiz. In the National Gallery of Great Britain there is a Holy Family, and a St. John and the Lamb. Dulwich Gallery contains, among others, Christ with the Lamb; Mystery of the Immaculate Conception; Jacob and Rachel; Adoration of the Magi; Two Angels; and a small Immaculate Conception. The Louvre contains a considerable number; the Pinakothek of Munich has some, and in the United States there are supposed to be a few of his works also. See Eng. Cyclop. a. v.; Scott, Murillo and the Spanish School of Painting (Lond. 1873, 1 vol., 4to); Sidrach de la Cruz, Life of the Artists of Spain; Mrs. Jameson, Legends of the Madonna (Lond. 1857, 1 vol. 8vo), p. 34, 36, 43, 46, 49, etc.; Jameson and Eastlake, History of Our Lord (Lond. 1864, 2 vols. 8vo), 1, 188, 155, 156, 167, 273, 285, 292, etc.; ii, 93, 343, 380; Spooner, Biog. Hist. of the Fine Arts, a. v.; Davies, Life of B. E. Murillo, the Bishop of Seville, of Eminent Men from the 13th Century, vol. ii; Tyler (Miss), The Old Masters (Bost. 1874), p. 330; Fraser's Magazine, April, 1846; Blackwood's Magazine, 1845, ii, 420; 1849, i, 73, 184; 1853, ii, 108; 1870, ii, 133.

Murimuth (or Merrimuth), Adam, an English divine of note, flourished in the second half of the 14th century (about 1310-40). He was prior of a small priory on an island of music, which is entitled Speculum Musicum. An abridgment of this work was also published.

Muruming (मुरुंमिंग, Exod. xvi, 7 sq.; γύογγόμογο), a complaint made for wrong supposed to have been received. Paul forbids murmuring (1 Cor. x, 10), as did also the wise man in the Apocrypha (Wis. i, 11). God severely punished the Hebrews who murmured in the wilderness. They were thrown out of the camp, and many destroyed, and even of destroying them, had not Moses appeased his anger by earnest prayer (Numb. xi, 33, 34; xii, 4; xi, 34, 36, 37); Ps. lxxxiii, 30). See REIGNATION.

Murmuring, "as a sign of disapproval or pleasure," says Walcott, "was once common in British churches." Bishop Spratt, in his work on the life of Dr. John Spratt, says: "I knew a clergyman who would always murmur when preaching at St. Margaret's, Westminster. Bur net sat down and enjoyed it, rubbing his face with his handkerchief; but Spratt, stretching out his hand, cried, "Peace, peace; I pray you, peace." At Cambridge a witty preacher, in the time of queen Anne, addressed his congregation at St. Mary's as "Ham et histi auditores." At Hereford this unseemly practice, which greeted every person arriving late in the choir, was prohibited (Sacred Archology, p. 394).

Murther, Thomas, a noted German satirist and most decided opponent of the Reformation, was born in Strasbourg Dec. 24, 1475. He early entered a Franciscan monastery, and then studied at the principal universities of Europe, devoting himself particularly to theology and philosophy, and quickly gained a reputation for ability, marred, however, by a want of earnestness and a quarrelsome disposition. At Paris he acquired the degree of A.M., and in 1506 the emperor Maximilian visited him there, which occasioned his having been bade by him in a contaminating Latin school of Strasbourg by his invective against Wimpeling, and afterwards led an unsteady life, preaching for some time at Frankfurt-on-the-Main (1512). At this time he battled against the clerical crimes and abuses, generally incurring the displeasure of his congregation by the coarse personalities
of his sermons. He was successively expelled from Freiburg, Tübingen, and Venice. In 1512 he edited his Narrenbeschreibung, of which his Der Schelmens Zunft (Frankfort, 1512) may be considered a continuation. These works, which show considerable satirical talents, are remarkable imitations of Sebastian Brandt's celebrated poem, called Narrenschiff. In his Glückaussicht (Basil, 1519) he ridicules the effeminate manhood of some of his contemporaries; and in his Logica memorativa, or Nutzlicher logik, in der Landes studenten Freiburgiern geurt he preys himself a predecessor of the renowed pedagogue, Basdog, trying to show how logic and prosody may be studied to advantage at different games. In 1519 he seems to have resumed his functions in the conventual school of Strasbourg, and made himself conspicuous as one of the chief opponents of the Reformation. When Hedio and Capmany were frequent preachers at Strasburg, Murner opposed them violently (see Hottinger, Helvetische Kirchengesch. iii, 149). As ambassador of the bishop of Strasburg, he afterwards attended the Diet at Nuremberg to accuse the Council of Strasburg (Sleidan, vol. i). He opposed Luther's book, An denadel deutscher Nation, by a work of similar title, An den grossmächtigsten und durchschlagendsten Adel deutscher Nation, dass sie den christlichen Glauben beschirrnen wider den Zerstörer des Glaubens Christi, Martinum Luther, einen Verführer der einfältigsten Christen. Although he translated Luther's 'Letter against the Pope' into Latin, Basdog received no permission to preach from Latin into German, he rejected all his teachings entirely. He called Luther a Catilina, and received himself the name of Luthermonst. According to a letter to Luther to Briesmann, Murner left the monastery (De Wette, ii, 58). This statement, however, is incorrect. In 1533 Murner repaired to England, in compliance with an invitation from Henry VIII, but troubles in his convent compelled him to return. Some of his writings against the Reformation had already been burned by order of the Diet of Worms. To elude the vigilance of the authorities he established a press of his own, which, however, was destroyed by a mob, together with his house. He was compelled to flee to Switzerland, whence he was in time likewise expelled. His most celebrated satirical work is entitled Von dem grosen Lutherischen Narren (Strasburg, 1522; new edition 1545) which was answered by Murner's Mönchskind. He was also author of Gänsegänger. The latter part of his personal history is not known, although he is supposed to have lived in misery, and to have died at Heidelberg about 1556. See Waldau, Nachricht. v. Thom. Murner Leben und Schriften; Fanzer, Annales d. deutsch. Lit.; Ruchat, Histoire de la Reform. de la Suisse: Yung, Geschichte d. Reformations in der Schweiz, ii. 483 sqq.; Hagenbach, Kirchengesch. vol. iii; For. Qu. xx, 74.

Murphy, James D., a minister of the (Dutch) Reformed Church, was born near Rhinebeck, N. Y., in 1788; graduated at New Brunswick Theological Seminary, 1814; and was pastor of several Reformed churches, at Hamilton, N. J., and at Mohawk Valley of Otsego County, N. Y.; and died in 1857 at Frankfort, where he was then pastor. He was an evangelical preacher of superior abilities, fond of study, and particularly of classical and scientific pursuits. His volume entitled Geology consistent with the Bible is a creditable monument of Mr. Murphy's learning and accuracy. The subject was a matter of great interest, science, up to the period of his death. He was prominent in the councils of the Church, and for many years was an active trustee of Union College. (W. J. R. T.)

Murrain (mûr'ên), de'ber, destruction, especially by a "pestilenze, as the word is elsewhere rendered; plur. "plagues" in Hos. xiii, 14), the fifth plague with which the Egyptians were visited when they held the Hebrews in bondage (Exod. ix, 9). See Plagues of Egypt. This consisted in some distemper that resulted in a sudden and dreadful mortality among the cattle in the field, including horses, asses, camels, oxen, and sheep. It was, however, more destructive of the sheep, and to those that were in the field; for though the whole of the cattle of the Hebrews breathed the same air, and drank the same water, and fed in the same pastures, not a creature of theirs died (Exod. ix, 6). The Egyptian cattle that survived in the sheds, and were afterwards driven out to the meadows, were devoured by the succeeding storm of fire and hail. Wilkinson has observed (Ac. Ep. i, 48, 49) that the "custom of feeding some of their herds in sheds accords with the scriptural account of the preservation of the cattle which had been 'brought home' from the field; and explains the apparent contradiction of the destruction of 'all the cattle of Egypt' by the hail from the fact, that the subsequent destruction of the cattle by the hail (Exod. ix, 8, 19, 20); those which were in the field' alone having suffered from the previous plagues, and those in the stalls or 'houses' having been preserved." In the grievous murrain, and in the grievous hail, many, if not all, the war-horses must have escaped, as they were not in 'the field,' but in the 'stables or houses' (Exod. xiv, 27, 28; xv, 21).

See Stahl. In the Description de L'Egypte (xiv, 226), it is said that murrain breaks out from time to time in Egypt, with so much severity that they are compelled to send to Syria or the islands of the Archipelago for a new supply of oxen. It is impossible to say, but it may be, since about the year 1786 a disease very much diminished the number of oxen, they began to make use of the buffalo in their places for watering the fields, and the practice is continued in later times. See Pasture.
sequent progress was made comparatively easy. In the course of two years he obtained a bursary, or exhibition, in the University of Edinburgh; and never relaxing in his pursuit of knowledge, he soon made himself acquainted with all the European languages, and having formed the design of tracing up all the languages of mankind to one source, he began a work by which he was destined to distinguish himself in the literary world. This work is distinguished by profound and various learning, it is both imperfect and posthumous. It appeared under the auspices of the Rev. Dr. Scot of Corstorphine, and is entitled A History of the European Languages, or Researches into the Affinities of the Teutonic, Greek, Celtic, Sanscrit, and Indian Nations (1807). The work, however, in spite of this auspicious acquaintance with these languages convinced Murray that all the European languages were closely connect- ed; and in the work now named it was his object to show that they all derive from and may be traced to nine eponymous primitives, which primitives he states to be: ag, bag, dawg, swag, lag, mag, nag, rag, and swag.

"By the help of these nine words and their compounds," he says, "all the European languages have been formed." The work was, however, nothing but a most des- perate and unsuccessful attempt at generalization. Dr. Noah Webster says that "it presents one of the singular medleys of truth and error, of science and fancy, that have ever fallen under my (Webster's) notice" (Pref. to his Dict. [ed. 1852], p. lxxxiv). By the advice of his friends he prosecuted the studies necessary for the Church: was finally ordained; and in Dec., 1866, Murray was appointed assistant and successor to Dr. Muirhead, minister of Urr, in the stew- ardy of Kirkcudbright, a charge to which he in 1808 succeeded as full stipendiary. He still, however, con- tinued his philological pursuits. In 1811 an incident occurred which brought him into prominent notice as a linguist: on the recommendation of Mr. Salt, envoy to Abyssinia, he was applied to by the marquis Welles- ley as perhaps the only person in the British dominions qualified to translate a letter, written in Geez, from the governor of Tigré to his Britannic majesty; and he performed the task in the most satisfactory way.

The following year a vacancy occurred in the chair of Oriental languages in the University of Edinburgh, and, as suited to Murray's tastes and habits, he was invited to fill it in order to bring him to Edinburgh, where his literary labors could be both estimated and enjoyed. He was elected on the 8th of July, 1812; on the 16th the university conferred on him the degree of doctor in divinity; and on the 26th of August he was formally installed in the chair. He delivered his inaugural on the 31st of October following. Soon after that he published, for the use of his students, a small work entitled Outlines of Oriental Philology (1812), which is known to have been both composed and prepared for publication after his arrival in Edinburgh: the subject indeed was perfectly familiar to him. He continued to teach his class with little interruption till the end of February or the beginning of March, his health then failing him; and he lived but a little while to enjoy the distinctions which had just come in recognition of his industry and talent. He died April 15, 1818. His body was interred in the Grey Friars' church-yard at the north-west corner of the church. His acquire- ments as a linguist pointed him out to Constable, the well-known publisher, as a fit person to superintend a new edition of Bruce's Travels; and in the preparation of that work he was employed for about three years. On the 23rd of October, 1822, he died at his residence in time chiefly at Kinnaird House, where he had ac- ccess to the papers left by the traveller. He was also at different times employed in contributing to the Edinburgh Review, and other periodicals, evincing by his writings not only a superior linguistic knowledge, but also a large acquaintance in other departments of literature and science.

It has been well said that, laboring under so many diffi- culties in early life, his acquirements were simply pre-
soon after her marriage with the dauphin, and became almost immediately chief of the Protestant party in Scotland. His political history is connected with the fortunes of the queen, after whose imprisonment in Lochleven castle in 1567 he was proclaimed regent, and defeated her troops at the battle of Langside, March 13, 1568, in which she was killed. In chivalry, he was in the political, social, and religious history of Scotland during the eventful reign of queen Mary Stuart, has been noticed in our articles on Knox and Mary Stuart. See also Scotland. He was shot by James Hamilton, on the accusation that he had seduced (1570) his wife. But this accusation was never proved; and it is very reasonable to believe that Hamilton acted as the executioner of a doom pronounced on him (Murray) by his enemies in secret conclave. Earl Murray was beloved by the people, and acknowledged by his contemporaries as a pious and lofty character who labored to promote the interests of the Church, and especially of Protestantism. The Romanists, of course, hated him, and he was slandered. See also Scotland. He was shot by James Hamilton, on the accusation that he had seduced (1570) his wife. But this accusation was never proved; and it is very reasonable to believe that Hamilton acted as the executioner of a doom pronounced on him (Murray) by his enemies in secret conclave. Earl Murray was beloved by the people, and acknowledged by his contemporaries as a pious and lofty character who labored to promote the interests of the Church, and especially of Protestantism. The Romanists, of course, hated him, and he was slandered.

Murray, John (1), an eminent divine, regarded as the founder of the Universalist denomination of Christians, was born in England, December 10, 1741. He received the careful religious training of sincerely pious parents. When he was about eleven years of age, the family removed to Ireland, and settled near Cork. His father, a member of the Established Church, a Calvinist in sentiment, but an early convert to the religious views of John Wesley, infused his own sentiments and zeal into the mind of his child. His extreme anxiety for the spiritual welfare of his son—who, very young, became the subject of hopeful conversion—and his unwillingness to allow him to pass from under his immediate guardianship, led to a conflict revolving the opportunity to give him a liberal education. The earnestness, devotion, and ability of young Murray gave him, as he grew up, position and influence in religious circles, and he became an occasional preacher in Wesley's connection. At a later period, he formed an acquaintance with Mr. Whitefield—with whom he agreed touching the doctrine of election—and became greatly interested in his teachings. About the year 1760 Murray returned to England. Here his experiences were varied, trying, and sometimes humiliating. In a controversy with one who had embraced the religious views of James Relly, a teacher of Universalism, his own theological positions were exposed. At length, at his own request, he induced himself to read Rotty's "Union"; and entered upon a careful re-examination of the sacred Scriptures. He afterwards attended regularly upon Mr. Relly's preaching, and received joyfully the doctrines of Universalism as taught by him. His faith soon became decided that Christ died for all, and that every one for whom Christ died must finally be saved" (Life, new ed. 1870, p. 161). Excommunication from Mr. Whitefield's tabernacle in London naturally followed. Persecutions for opinion's sake, pecuniary embarrassments, and grief for the death of his wife and infant child, rendered him wretched. Having by a temporary devotion to business discharged all pecuniary obligations, he resolved to leave his native land and to seek retirement and relief in America. Yet on his first arrival in the New World, led, as he undoubtedly believed, by a superintending and special Providence, he was constrained to preach, and gave his first discourse in Newburyport, Massachusetts, September 10, 1770. The service was held in a small church in an obscure place—called "Good Luck"—in New Jersey. Thenceforward he regarded himself as called of God to teach the universal redemption of the human race through Christ, and gave himself devotedly to the work of his ministry. He labored first in New Jersey, and afterward in New York and New England. As he found opportunity, he preached—though often opposed and sometimes bitterly persecuted—in New-

MURRAY
enn, omnipresent Being" (Works, iii, 229). Its fundamental doctrine, as a Universalist, was that Christ literally put away the sin of the whole world by the sacrifice of himself (Works, ii, 249, 270). He distinguished carefully between universal salvation and universal redemption, believing that all were redeemed, and would finally be brought to Christ, this latter to the three stages of the Church, who died unconverted would continue unhappy wanderers till the general judgment and restitution of all things, when the fallen angels would be placed on the left hand, the world of mankind be judged, and after all were found guilty before God, the book of life would be opened, in which all the members of the Redeemer, that is, every individual of the human family, would be found written, and, as members of Christ's body, purged by him, as the sole means, from their sins. He taught, moreover, that an elect few embraced the truth before death, and, as saints of God, will surround the Redeemer at his second coming (Life, p. 400 sqq.). His published works consist of Letters and Sketches of Sermons (Bost. 1812, 3 vols.), and an Autobiography, with a continuation by Mrs. Judith Sargent Murray (1 vol, 18th edition, Bost. 1860). The first edition of the Life was published in Boston, 1816. The last and ninth, edited by Rev. G. L. Demarest, was issued in Boston offerings in 1870. Murray is described by a contemporary as a person of middling height, with a speaking countenance and masculine features, naturally rough and stern; as having a poetical imagination, a retentive memory, warm affections, a love for all mankind, but especially for those of a religious turn of mind. In his public discourses he was artless and unaffected, but spoke with great grace of oratory, with an astonishing volubility, a good choice of words, and a great variety of expression. He had a wonderful command of the feelings of his auditors; could arouse and animate them at pleasures, or depress them with a peculiar eloquence without tears (Life, new ed. p. 11). In private life he was genial and social. See Meth. Quart. Rev. Oct. 1874, art. v.; Univer. Quart. July, 1872, art. ii.; Oct. 1872, art. iv., vi. See Universalism. (J. P. W.)

Murray, John (2), an Irish Presbyterian minister, was born at Antrim May 22, 1742. He was educated at the university in Edinburgh, and then migrated to this country (1768), and settled first as pastor in Phila-

Murray, Lindley, an American writer on morals and education, who flourished near the opening of this century, was born at Swatara, Lancaster County, Pa., in 1743. He was educated at an academy of the Society of Friends, and on his father's removal to New York was placed in a counting-house, from which he escaped to a school in New Jersey. He then studied law, and was admitted to the bar at the age of twenty-one, and commenced a good practice. During the Revolutionary War he engaged in mercantile pursuits with such success as to accumulate a handsome fortune. His health failing, he went over to England and purchased the estate of Holdgate, near York, where he devoted himself to literary pursuits, chiefly the composition of books intended for the instruction of youth. In 1787 he published anonymously his Power of Religion on the Mind and Character, which passed through three editions, and was a selection of passages from various authors. In 1793 he issued a Grammar of the English Language, followed by English Exercises, the Key, the English Reader, In-

production and Sequel, and a Spelling-book. There can be no stronger indication how entirely the systematic study of the English language was, until recent years, neglected by scholars than the fact that Murray's Grammar was for half a century the standard text-book throughout Britain and America. Far better books are now available. See also Bost. Mag. Apr. 14, 1822, for a letter to the editor from Dr. Murray, in which he defends himself against the charge of neglecting the study of the Holy Scriptures. Mr. Murray wrote an autobiography to the year 1809, which was published after his death, which occurred at his residence, near York, England, Feb. 16, 1825. The friends thought much of Lindley Murray, for he devoted himself to their interests, and as a member of their body did all in his power to give influence and power to them. "The humility of his deportment, and the Christian spirit that breathed through his whole conduct, endeared him to the members of York Monthly Meeting, where he served in the station of an elder, and proved to be eminently useful. His charities, both public and private, but particularly the latter, were extensive. He was deeply interested in promoting the education of the poor and the elevation of the African race." See Jannay, Hist. of the Friends, iv. 55.

Bach, John L. (2), an American Presbyterian divine, was born in Armagh County, Ireland, Dec. 25, 1802. Both his parents and all his relatives were Roman Catholics; and trained up their families in that belief. His father dying while he was quite young, he lived with an aunt, and at eight years of age was sent to a school from home. While he was young he gained a proficiency in the rudiments of an English education were such that in his twelfth year he was apprenticed as a merchant's clerk. In 1815 he emigrated to America, where he entered the publishing house of Harper and Brothers, New York. In 1820 he was converted, and became a member of the church. He became the pastor of the Reformed Dutch Reformed Church near the pastoral care of the venerable Gardiner Spring, D.D. His pastor, attracted by Murray's intellectual superiority, soon suggested his studying for the ministry. This at first was not encouraged by Murray; but in 1821 he commenced to make preparation, though still in the employ of the Harpers, and, after due fitting for a higher course of study, entered Williams College, Mass.; there he graduated in 1826, and then accepted an agency from the American Tract Society in Washington Co., N. Y., which arrangement lasted for some time. Of his services at this period, Dr. Aydelotte says: "He was indefatigable in application to the duties of his office, perfectly methodical, rare in judgment, and yet simple in form and faithful to his convictions and the interests of the society. . . . The labors of the board were exceedingly lightened; indeed he left them little to do beyond approving his proceedings and measures." Dr. Aydelotte also speaks of his frequent manifestations of an anti-Bonar spirit. He next entered Princeton Theological Seminary, where he remained until he graduated. He was licensed in 1829, and began his labors at Norristown, Pa.; but afterwards accepted a commission from the Board of Domestic Missions for the valley of Wyming, Pa., where he labored until he was ordained and installed pastor of the united congregation of Wiltz, Barre and Kingston. His remarkable pulpit talents and his high promise attracted attention, and in 1838 he was given and accepted a call to the First Presbyterian Church, Elizabethown, N. J., and there he continued to perform his life-work, declining calls to New York, Brooklyn, Boston, Cincinnati, St. Louis, and Natchez, and rejecting offers of two theological professorships. During this time, with persistent and untiring industry, he wrote much for the press, among which was a series of articles for The New York Observer, under the signature of "Kirvan," constituting those famous letters to bishop of the Roman Catholic Church, that are attractive, polemic, which have made the name of "Kirvan," the nom-de-plume under which Murray wrote, a household word throughout the whole Protestant world, his
writings having been translated into nearly all the living languages of the day. They present the history of the writer's progress from Romanism to Protestantism, and examine the reasons for not adhering to the Church of Rome. They contain, as the judge says, 'a truth, not only uncover the evils of the Roman system, but present a perfectly impregnable defence of Protestantism. The vivacious style, the genial humor, biting sarcasm, anecdotes, incidents, illustration, argument, and appeals, are blended so harmoniously that they obtained a hold on the people at large, instead of being confined to the theological student, and thus enjoyed a circulation unparalleled in religious literature.

Bishop Hughes essayed to reply to the series, but broke down in the attempt, and never resumed the effort. See HUGHES, Dr. Murray died at Elizabethtown, N. J., Feb. 4, 1858. His lights, his smile, his name are, Notes, and shoulders Biographical, concerning Elizabethtown, N. J., its eminent Men, Churches, and Ministers (1844) — Letters to Bishop Hughes by Kirwan (1847-48); these have been translated into French, Spanish, Italian, German, and Tamil: — The Decline of Popery, and its Causes, pamphlet: — Romanists at Home—Letters to the Chief Justice R. Taney (1852) — Men and Things as I saw them in Europe (1851-53) — Parish and other Pencilings (1857) — The Happy Home (1858): a delineation of the moral training which is essential in a home: — Thoughts on Preachers and Preaching; a work which tends to elevate the standard both of preaching and hearing: — American Principles on National Prosperity; a Thanksgiving sermon preached in the First Presbyterian Church, Elizabethown, Nov. 28, 1854: — Dr. Murray's Dying Legacy to the People of his beloved Charge — Things Unseen and Eternal (1861). He also published many occasional sermons and addresses in early life contributed to The New York Literary and Theological Journal, The Christian Advocate, and other periodicals. Dr. Murray's intellect was decidedly of a marked character — clear, comprehensive, logical, and eminently practical. His style was luminous, simple, and in the highest degree sentiment. He reasoned with great power and admirable clearness. His influence pervaded the entire Presbyterian Church, and was felt especially in her various judicatories and boards, and in the theological seminary at Princeton, which he cherished with a filial affection. In 1849 he was elected moderator of the General Assembly, one of the highest offices in the Church; in 1857, his winning manner, rich stores of varied information, inhaustible fund of pertinent and striking anecdotes, and ability to accommodate himself to every variety of character, made him the master-spirit of the social circle. In person Dr. Murray was a model of manly virtues, his hair, his beard, his hands, his face, his voice, his manner, his bearing, his habits, — with a round, ruddy face, a broad, high forehead, and benevolent, pleasant expression of countenance, his appearance was at once attractive and commanding. As a pastor he was always at work, ready at every call; in the chamber of sickness, in the homes of the poor, among the young men wherever he was found, and always a welcome guest. His preparations for the pulpit were made with the greatest care, his sermons being completed as if for the press, and often far in advance of the time when they were to be delivered. His funeral was attended with every demonstration of respect and affection that could be paid to a national character. His remains were laid in the yard adjoining the church, in the midst of his children and his beloved flock. The Presbytery of which he was a member thus gave expression to its estimate of him whom they had come to look upon as its "father." His name, his character, and his influence are already on record with the utmost dignity of the Church at home and abroad. His greatness was not in one grace or one idea, but in the breadth of his heart and in the scope of his powers. He was a preacher and a pastor, a presbyter and a citizen, the patron of education, the ready advocate of benevolence, and the dread

Murray, Richard, D.D., an Irish divine of some note, flourished near the opening of this century at Dublin. He is the author of An Introduction to the Study of the Greek Language, first issued in 1766, and added a Discourse on Prophecy under this title, and a Prophetic History, from the Babylonsia Captivity to the Commencement of the 19th Century (Dublin, 1826, 8vo).

Murray, William, an English divine of Scottish parentage, was born in 1691, and received his education in Scotland, but then went to England, and studied for some time at the English high schools. He entered the Cambridge University and preached some time at the Boylston's Hall, whence he removed to Birmingham, where he became pastor of a dissenting congregation. He wrote several tracts in defence of the dissenters, and likewise against the deists; but his principal and best esteemed work is his Closet Devotions. He died in Birmingham in 1758.

Murchie, Peter de, See CELESTINE V. Muratnna, Samuel, a German theologian, was born at Stolie, in the province of Pomerania, East Prussia, Nov. 12, 1717. He received his preparatory training at Stolie; then studied in Berlin in the Joachimsthalische Gymnasium, and was also a member of the theological seminary combined with that institution; and then studied theology at Halde for three years. He never held the office of a tutor at any university, but was the year after appointed inspector of the seminary of the Joachimsthalische Gymnasium; in 1750 proctor of this institution; and in 1758 professor of divinity at the University of Halle, and died in that place Feb. 15, 1783. His most prominent works are, Diss. historico-critico de hebraismo gentilium in lingua gresca, quae Jacobo Pauli mutus Rectoria Gymnasia, quod Halae floreat, gratulatu Societatis amicorum litterariae (Berlin, 1747, 4to); — Polysemi stratagematum Libri vii recensens, Justi Vulgi versio familiaris, Latinam emendavisse et titulum Graecum adjecisse (ibid. 1756, 4to); — Diss. philhymnico-theologica de origine gentii humani (Halle, 1758, 4to); — Diss. ezeregetic de reeles, columna et firmamento veritatis, ad I Timoth. iii, 13 (ibid. 1768, 4to); — Prima linea Encyclopedia theologica (ibid. 1765, 4to); — Homiletica, s. de recta eloquentia ecclesiastica rurum Belisia (ibid. 1768, 4to); — Diss. de institutione scholastica ad diversos discursos theologicos accommodanda (ibid. 1767, 4to): — A lignem theologicae Bibliothec. 11" bis 14" Band (Mittau, 1778-1780, large 8vo; the first four volumes were published by C.F. Bahr; from the 6th to the 10th by J.C. Schulz): — Biographia selecta, s. Memoria aliquot virorum doctrinae, quae inter 1710 et 1770 ad notitiam publicam perdidisse huius aetatis, et historia literarium spectantes, edidit et praefatus est (Halle, 1782, large 8vo). See Döring, Geschichte Theol. Deutschlands, s. v.

Muriatia, or Museia Muratia, a surname of Venus at Rome, supposed to be identical with Mylrea, because the myrtle was consecrated to this goddess.
MUSÆUS. See MUSIUS.

MUSIUS, BENEDETTO DIOTREX BIEN - IMMANUEL, a Jewish savant, celebrated also as a physician, was born about 1619. He practiced medicine with great reputation at Hamburg and Glückstadt. As an author he is noted for his treatise on Potable Gold (מellan מים). He also made additions to the Hebrew Lexicon of Nathan ben-Jechiel (ק. ג.ע.), under the title of מילן מים. Besides, he compiled a dictionary entitled מילן מים, giving the Hebrew words in seven poems for all the days of the week (Amst. 1635; Wilna, 1686). He also wrote the disputes between R. Jacob Sassfortas and himself, entitled מילן מים, the Testamenty in Jacob (Amst. 1678). He journeyed to Jerusalem, Talmud, and studied a subject that was still more obscure and intricate, since he tried to explain the *Flux and Reflux of the Sea*, a treatise which he dedicated to King Christian IV of Denmark, under the title מילן מים (Epistola Regia de maris reciprocatione [Amst. 1642]). See Fürst, Bibl. Jud. ii. 408 sq.; Grätz, Gesch. d. Juden, x. 24, 26, 202, 227, 243, 244; Jost, Gesch. d. Juden u. d. Sektien, iii. 170; Jellinek, Geschichte der Juden in Portugal, p. 229; Liuido, *H. ist. des Jevs in Spain*, etc., p. 566; Bar Maul, *H. ist. of the Jews* (Taylor's transl.), p. 741; De Barrios, Vida de Ishac Usiel, p. 48; Cassel, *Leiflingen fur Jud. Geschichte u. Literatur*, p. 102; Steinschneider, Bibliog. Handbuch, p. 98; Delitzsch, Zur Gesch. d. Jud. Poesie (Leips., 1868), p. 70; Etheridge, *Introdc. to Heb. Literature* (Cambridge, 1882, p. xxxi).—(S.)

Musap Prayr (מעש בַּשָּׁר) is the name of the evening prayer of the Jewish liturgy. The sacerdotal office of the Jews is closely connected with sacrificial service. It is indeed regarded partly as its accomplishment, partly as its substitute during the exile. The sacrifices (קרבנות) which were offered twice a day find a correspondent usage in the morning and evening prayer. Already in the Old Testament this connection is clearly manifest, especially in the psalms dating from the exile, e.g., Ps. cxix, 2, "Let the lifting up of my hands be an evening sacrifice." As on festival days, besides the daily morning sacrifice, a particular one was offered for the feast, it was consequent that the matins of Sabbath and festival days in the ritual of prayers should be followed by such prayers as correspond to the special festivities. The Musaph prayer on the Saturday of Reconciliation (משמרות) is compared to the propitiatory service of the church officium. In the Musaph prayer of the ordinary Sabbath, express reference is made to the Mosaic ordinance regarding the special Sabbath sacrifice (see Arnhelm, Vollständiges Gebetbuch der Juden [Glogau, 1839], p. 205). The same applies to the Musaph prayer on the Day of Reconciliation (משמרות) (Machson von Heidenheim, Jim Kipurim [Sulz, 1842], p. 110). There the בַּשָּׁר are placed opposite to the מילן מים. Liturgical rules concerning the Musaph prayer are given in the tract *Sopherim*, c. 20; fol. xi, c. 2; farther in Orachat *Zedek*, viz., מילן מים (Sabbath); מילן מים (New-year), etc. See Machzor; Tephilla; Liturgy.

Musius, Johann, a Lutheran divine, was born at Langenwiesen, in Thuringia, February 7, 1613. His early education he received from his father, who was the minister of that place. Having been duly prepared at the gymnasium of Arnstadt, he went to Erfurt and Jena, where he first studied philosophy and humanitics, and afterwards theology. In 1642 he was appointed professor of history, and in 1646 professor of theology at Jena, which position he held until his death in 1661. Everywhere Musius was acknowledged as a very learned man, and the greatest Lutheran divinity of his century, after Gerhard (ק. ג.ע.) and Calixtus (ק. ג.ע.). He distinguished between theology and confession, and favored the liberty of scientific theological researches. On this account he withstood, in connection with the theologians of Jena, the pretensions of Calixtus (ק. ג.ע.) to subscribe the *Concessus Episcopii Silesiae* verse Lutheranes of 1655, but rather wrote against it. When he had finally yielded to the representations of the duke to abjure all and every syncretism (ק. ג.ע.) in 1680, he published his opinion against Calixtus (*Hist. Synm. p. 999—1088*), who in 1681 wrote a reply against his opponent. Musius's writings are all distinguished by a philosophical acumen, hence he was accused of magis philosophiqui, quam quod logyatur eloquio Dei. Besides his defence of Christianity against Herbert of Cherbury, under the title of De luminis naturae et ius naturalis theologicae insufficienciam ad solutum (Jena, 1667), and against Spinoza, Tractatus Theologicopolitici, etc., ad veritates lamen examinantum (ibid. 1674), he wrote Disputatio de cultu divino Enocisi (Erfurt, 1634; against the Jesuit G. Holzhausen): De barbarismis N. T. contra Gnomonem (Jena, 1642): De uno principiorum ratio in the Colloquy of Cassell in 1661. In 1668 he was appointed professor at Helmstaedt, and in 1665 accepted a call in the same capacity to the newly established University of Kiel. He died in 1671. See Witten, *Mem. theol.* p. 1840—1852; Chrysander, Professores acad. Jutiae, p. 187—189; Dotel, Leben und Schreibkunst der Professoren d. Theologie zu Rinteln, alter Professoren d. Theologie zu Rinteln, pt. ii, p. 275—296; Moller, Cimbrica literata, pt. ii, p. 565—578.

Musius, Simon, a Lutheran divine, great-grandfather of Johann Musius, was born in 1529. He studied at Frankfort and Nuremberg, and when twenty years of age he was called as pastor to Fürstenwalde, and three years later, in 1552, to Crossen, and in 1554 to Breslau. In the same year the University of Wittenberg conferred upon him the degree of doctor of divinity. In 1559 he was called as superintendent to Gotska, where he remained until 1651, when he was called as professor of theology to Jena, where, however, he did not stay long on account of his collisions with Victor Strigel. In 1562 we see him at Swinemünde, in 1566 at Gera and Thorn; in 1570 at Coburg, which place he had to leave because of his zeal against the Crypto-Calvinists. He died at Mansfeld, July 11, 1582. He wrote, Auslegung des *Paulus* (against Schwenkfeld) (Breslau, 1565);—Nützlicher Unterricht zu dem ersten Gebot (Erfurt, 1557);—Auslegung des 91 Psalms (ibid. 1655);—De Bremensi editione exactiata a Sacramentarisa veru narratio, etc. (1562);—Katechismus-Examen (Thorn, 1569);—Predigten von h. Ambrosius (1658);—116 Predigten über Genesis (Magdeburg, 1576);—Postille oder Auslegung der Epistel, etc. See Richter, Geschichte der deutschen Liturgien, pt. ti, p. 787; Stirrer, Nürnbergische Gelehrten-Lex. pt. ii, p. 700 sq.; Strieder, Hessische Gelehrten-Gesch. pt. ii, p. 321; Kurtz, Lehrbuch der Kirchengeschichte, ii, 112 sq.
MUSCULUS, Andreas, originally Muesel, a German theologian, was born in 1514 at Schneeburg, in Saxony. Having graduated in the gymnasium of his native place, he went to Leipzig, where he studied, besides the scholastics, the ancient languages and Hebrew. Here he became acquainted with the writings of the Reformers, and the study of these estranged him from his Church. Having completed his studies, he returned to his native place, where he openly declared himself for the Lutheran doctrine. In 1538 he went to Wittenberg, where he very closely joined Luther, for whose doctrine he soon adopted a great zeal. "For my part, I say it openly, there has never been a greater man on earth since the times of the apostles than Luther. In this one man all the gifts of God are concentrated. Whosoever will, let him put aside by sides the gifts, light, reason, and knowledge of the old teachers and those of Luther respecting spiritual things, and he will soon perceive that there is as much difference between the old teachers and Luther, as between the light of the sun and that of the moon." At the suggestion of Agricola (q.v.), the preacher to the elector of Brandenburg, he went to Frankfurt in 1546, where he lectured, preaching at the same time in the church which formerly belonged to the monastery. Two years afterward, in 1548 he was awarded with the title of pastor primarius and professor ordinarius, which positions he held until his death, September 26, 1561. He belonged to those theologians who in 1576 and a year later wrote the Torgau Book and the Concordia Formula (q.v.), and was one of the most orthodox on this point, as he was formerly one of the most zealous against those who did not strictly adhere to Luther's doctrines. Thus he had a bitter controversy with Stanius and Staphylus regarding the mediastorship of Christ, and especially with his colleague Pretorius, who rather followed Melancthon. He defended the doctrine "that the law is necessary for repentance before faith, but, unnecessary to him who is born again." Besides these theological controversies, which were rather necessitated by the circumstances of those times, he had a constant fight with the magistrate of Frankfurt. He published an extract of Luther's works, under the title Theolusarum (1573). Altogether we have of him about forty-six writings, which are all given by Speikez, Lebensgesch. des Andreas Musculus (Frankf.-on-the-Oder, 1858), p. 310. See Herzog, Real-Encyklop. s. v.; Supplement to Jocher's Gelehrten-Lex. by Rottermund, s. v.; Gieseler, Church Hist. (New York, 1863, Smith's transl.), iv, 489, 489 (B. F.)

Muscel, Wolfgang. See MUSEL.

MUSEIA, a festival with contests celebrated in honor of the Muse of every fifth year at Thespias, in Boeotia. See Gardiner, Folia of the World, p. 499.

MUSEI, an atheltical sect among the Mohammedans who endeavored to conceal all except the initiated their gross denial of the existence of a God. They attempted to account for the existence and growth of all things by referring to the inherent power of nature.

MUSEUM was the name employed to designate in the classic mythology those divinities originally included among the Nymphs, but afterwards regarded as quite distinct from them. To them was ascribed the power of inspiring song, and poets and musicians were therefore regarded as their pupils and favorites. They were first honored among the Thracians, and as Pieria around Olympus was the original seat of that people, it came to be considered as the native country of the Muse, were therefore called Piertides. In the earliest period their number was three, though Homer sometimes speaks of a single Muse, and once, at least, alludes to nine. This last is the number given by Hesiod in his Thogomy, who also mentions their names: Clio, Euterpe, Thaletae, Melpomene, Terpsichore, Erato, Calliope, Urania, and Polymnia. The origin is differently given, but the most widely-spread account represented them as the daughters of Zeus and Memoyne. Homer speaks of them as the goddesses of song, and as dwelling on the summit of Olympus. They are also often represented as the companions of Apollo, and as singing while he played upon the lyre and offered panquets of the immortals. In the most ancient works of art we find only three Muse, and their attributes are musical instruments, such as the flute, the lyre, or the bariton; it was not until the more modern ideal of Apollo Musagetes, in the garb of the Pythian musician, that the standard of the number was raised. It was first cultivated by several famous artists in regard to these virgins, who were in like manner clad for the most part in theatrical drapery, with fine intellectual countenances, distinguished from one another by expression, attributes, and sometimes also by attitudes. 1. Calliope, the Muse of epic poetry, is characterized by a tablet and stylos, and sometimes by a roll of papers. 2. Clio, the Muse of history, is represented either with an open roll of paper or an open chest of books. 3. Euterpe, the Muse of lyric poetry, is given a flute, and sometimes two flutes. 4. Melpomene, the Muse of tragedy, is characterized by a tragic mask, the club of Hercules, or a laurel branch. 5. Terpsichore, the Muse of choral dance and song, appears with the lyre and the scepter. 6. Erato, the Muse of erotic poetry and mimetic imitation, is also characterized by a lyre. 7. Polymnia, the Muse of the sublime hymn, is usually represented leaning in a pensive or meditating attitude. 8. Urania, the Muse of astronomy, bears a globe in her hand. 9. Thalia, the Muse of comedy and idyllic poetry, is characterized by a comic mask, a shepherd's staff, and a wreath of ivy. Various legends ascribed to them victories in musical competitions, particularly over the Sirens (q.v.), and they are sometimes represented with plumes on their heads, supposed to typify such victory. In the later classic times, particular provinces were assigned to the Muse in connection with different departments of literature, science, and the fine arts; but the invocations addressed to them appear to have been, as in the case of modern writers, merely formal imitations of the early poets. Their worship among the Romans was a mere imitation of the Greeks, and never became truly national or popular. Among the places sacred to them were the wells of Agrippia and Hippocrate on Mount Helicon, and the Grotto of the Muses on Mount Parnassus. See also Callimachus, Iasop, Aristocles, s. v.; Smith, Dict. Greek and Roman Biog. ii., 1124 sq; Westropp, Hand-book of Archaeology, p. 190 sqq. MUSEUM (Gr. mou'tioi), originally the name given by the ancients to a temple of the Muse, and afterwards to a building devoted to science, learning, and the fine arts. The first museum of this kind was the celebrated Alexandrian Museum. See ALEXANDRIA. After the revival of learning in Europe, the term museum was sometimes applied to the apartment in which any kind of philosophical apparatus was kept and used; but it has long been almost exclusively appropriated to collections of the monuments of antiquity, and of other things interesting to the scholar and man of science. In this sense it began to be first used in Italy, and probably in the case of the famous Florentine Museum, founded by Cosmo de' Medici, which soon became a great and most valuable collection of antiquities. Nothing analogous to the museum of modern times existed among the ancient Greeks, except as collections of statues and paintings which were made in the houses of wealthy Romans having been intended for splendor rather than for the promotion of art. The name soon ceased to be limited to collections of antiquities and sculptures and paintings; collections illustrative of natural history and
MUSGRAVE 751  MUSIC

other sciences now form a chief part of the treasures of many of the greatest museums, and there are museums devoted to particular branches of science. Of the museums of Britain, the British Museum is the greatest; that of Oxford, founded in 1679, is the oldest. The museum of the Vatican, in Rome, contains immense treasures in sculptures and paintings, and also in books and manuscripts. The museum of the Louvre, in Paris, that of St. Petersburg, and those of Dresden, Vienna, Munich, and Berlin, are among the greatest in the world. The usefulness of a museum depends not merely upon the amount of its treasures, but perhaps even in a greater degree upon their proper arrangement; and while great care in the chief is often of the utmost importance, and of incalculable importance to science, its interests are also likely to be much promoted by those local museums, still unhappily not numerous, which are devoted to the illustration of all that belongs to particular and limited districts. Museums appropriated to the illustration of the industrial arts—their raw material, their machines, and their products—and of everything economically valuable, are of recent origin, but their importance is unquestionably very great. Pre-eminent among institutions of this kind in Britain are the South Kensington Museum and the Industrial Museum in Edinburgh. In recent times missionary museums have been started in the United States. For the purpose of collecting all that is valuable for the proper interpretation of heathen religions, and to commemorate Christian victories over pagan idolatry.

Musgrave, Thomas, D.D., an English prelate of note, was the son of a draper in Cambridge, where he was born in 1788. After an elementary education he entered as student Trinity College, Cambridge, in 1806, and was afterwards a master with a high reputation. He was then elected a fellow of his college, which position he held up to 1827. He obtained the master's degree in 1813; became lord almoner's professor of Arabic in 1821; and was senior proctor in 1831. He was also incumbent of St. Mary's-Great, Cambridge, and bursar of his college. In 1837 Dr. Musgrave was appointed by the late viscount Melbourne bishop of Hereford, and on the death of the venerable Dr. Harcourt was translated to the archiepiscopal see of York, and thus became primate of England, a governor of the Charter-house and of King's College, Oxford, a commissioner for building churches, and elector of St. Augustine's College, Canterbury. In his patronage as archbishop were ninety-six livings, which he dispensed most impartially and with credit to his exalted position. Archbishop Musgrave died May 5, 1860, at his residence in London. He published only several of his Sermons (1839 and 1849, 8vo).

Mushki (Heb. Maschi, מַשְׁקִי, once [1 Chron. vi. 19] מַשְׁקֻי, receding; Sept. Ὁμορφεῖ, ὅμορφεῖ, ὁμορφότερα, the second of the two sons of Merari, son of Levi (Exod. vi. 19; Num. iii. 10, 11; 1 Chron. vi. 19, 47; xxxii. 21; xxiv, 26); he had three sons (1 Chron. xxii. 28; xxiv. 30), whose descendants were called in common Mushites (Num. iii. 33; xxxv. 58). B.C. post 1568.

Mushite (Heb. same as Mushki; Sept. Ὁμορφεῖ and ὅμορφον; Vulg., Musites et Musi), a descendant of the Levite Musi (Num. iii. 33; xxvi. 58).

Music [HARREW] (יוֹנָה), shir, singing, 1 Chron. xv, 16; 2 Chron. v, 11; vii, 6; xxxiv. 12; Eccles. xii, 4; Amos vi, 5; a song, as it is usually elsewhere rendered; Chal. ἀρτιόν, the striking of musical instruments, Dan. ii. 5, 7, 10, 15; Gr. στρογγύλος, symphony of sound, Luke xiv, 26; but ἀρτιον, neogal, Lam. v, 14, or ἀρτιον, ἄρωτος, maniachus, Lam. ii, 63, is a satirical "song," comp. Job xxx, 9. See Negochari.) This is the oldest and most natural of all the fine arts, and therefore is found among all nations, however ignorant of every other art. In elucidating the subject in this and a following article (that on MUSICAL INSTRUMENTS) we give a general treatment, referring to other heads for details on particular points.

The Hebrews were an eminently musical people. Their history is full of illustrations of this feature of their national character and life. Their literature is a monument of it; for a large portion of their poetry was conceived in the form of psalmody or sacred lyric song; and their law and traditions repeatedly referred to the time when their musical instruments and art attained among them, it cannot be doubted that their musical progress and attainments went much beyond the narrow limits which some eminent modern writers of the history of music have thought themselves warranted to assign.

1. Antiquity of Hebrew Music.—The Hebrew nation made no claim to the invention of music or musical instruments, but assigned to it an antiquity as remote as the antediluvian days of Jubal, who "was the father of all such as handle the harp and organ" (Gen. iv, 21). The invention of musical instruments, therefore, like the first poet and the first forger of idols, was a Cainite, Chardin relates that the Persians and Arabsians call musicians and singers Kayme, or "descendants from Cain." From the occurrence of the name Mahalahaleel, third in descent from Seth, which signifies "giving praise to God," Schneider concludes that vocal music in religious services was started at least as early as the Sethites (Bibliograph. Darstellung der Hebr. Musik, p. xi). It has been conjectured that Jubal's discovery may have been perpetuated by the pillars of the Sethites mentioned by Josephus (Ant. i, 2), and that in this way it was preserved till after the Flood; but such conjectures are worse than an honest confession of ignorance.

The first mention of music in the times after the Deluge is in the narrative of Laban's interview with Jacob. Moses has recorded words of Laban, the father-in-law of Jacob, from which it appears that instruments of various sorts were already in use among the ancient family beyond the Euphrates from which the Hebrews sprang: "Wherefore didst thou flee away secretly, and steal away from me, and didst not tell me, that I might have sent thee away with mirth and with songs, with tabret and with harp?" (Gen. xxxii, 27). Whatever else, then, the posterity of Jacob may have learned from "the wisdom of the Egyptians" during their long stay in Egypt—that ancient cradle of the arts and sciences—it may be assumed as certain that they were familiar with at least the rudiments of music before they went down to sojourn there, although it is reasonable to suppose that they were indebted to that ingenuity and inventiveness for some of their progress in the arts. It is a remarkable and interesting fact that their exodus from Egypt, which was their birthday as a nation, was an event celebrated by an outburst both of poetry and song. But whatever may have been its origin, and in whatever way it was preserved, the practice of music existed in the upland country of Syria; and one of the three possible kinds of musical instruments, two were known and employed to accompany the song. The three kinds are alluded to in Job xxxi, 12.

On the banks of the Red Sea, Moses and the children of Israel sang their triumphal song of deliverance from the hosts of Egypt; and Miriam, in celebration of the same event, exercised one of her functions as a prophetess by leading a procession of the women of the camp, chanting in chorus the burden to the song of Moses, "Sing ye to Jehovah, for he hath triumphed gloriously; the horse and his rider hath he thrown into the sea." The song was accompanied by timbrels and dances, or, as some take the latter word, by a musical instrument of which the shape is unknown, but which is supposed to have resembled the modern tambourine (see DANCE), and, like it, has been used as an accompaniment to dancing. The expression in the A. V. of Exod. xxv, 21, "and Miriam answered them," seems to indicate that the song was alternate, Miriam
MUSIC

leading off with the solo, while the women responded in full chorus. But it is probable that the Hebrew word, like the corresponding Arabic, has merely the sense of singing, which is retained in the A.V. of Exod. xxi, 18; Numb. xxii, 17; 1 Sam. xxix, 5; Ps. cxviii, 7; Hos. xi, 15. The same word is used for the shouting of soldiers in battle (Jer. li, 14), and the cry of wild beasts (Isa. xi, 12). In the case of the song of the Levite during the tabernacle service which accompanied the ark from the house of Obededom, the Levites, with Chenaniah at their head, who had acquired skill from previous training, played on psalteries, harps, and cymbals, to the words of the psalm of thanksgiving which David had composed for them (2 Sam. vi), and it is distinctly mentioned in the festivities which attended the erection of the golden calf. With this may be compared the musical service which accompanied the dedication of the golden image in the plains of Dura (Dan. iii), the commencement of which was to be the signal for the multitude to prostrate themselves in worship. The wild cries and shouts which reached the ears of Moses and Joshua as they came down from the mount sounded to the latter as the din of battle, the voices of victor and vanquished blending in one harmonious chorus. But the quicker sense of Moses discerned the rough music with which the people were occupied, and the atonal music which that brought them out of Egypt. Nothing could show more clearly than Joshua's mistake the rude character of the Hebrew music at this period (Exod. xxvii, 17, 18), as untrained and wild as the notes of their Syrian forefathers. Comp. Lam. ii, 7, where the war-cry of the enemy in the temple is likened to the noise of the multitude on a solemn feast-day: "They have made a noise in the house of Jehovah as in the day of a solemn feast." The silver trumpets made by the metal workers of the tabernacle, which were used to direct the movements of the camp, point to music of a very simple kind (Num. x, 1-10), and the long blast of the jubilee horns, with which the Tabernacle was sounded down on the sabbaths, which had probably nothing very musical about it (Josh. vi), any more than the rough concert with which the ears of the sleeping Midianites were saluted by Gideon's three hundred warriors (Judg. vii). The song of Deborah and Barak is cast in a distinctly metrical form, and was probably intended to be sung with a musical accompaniment as one of the people's songs, like that with which Jephthah's daughter and her companions met her father on his victorious return (Judg. xi).

2. Golden Age of Hebrew Music.—The period of Samuel, David, and Solomon forms a new era in Hebrew music, and the opening verse of the Psalms (Ps. cxlv, 1) is a commemoration über den Psalter, 1856-60). The simpler impromptus with which the women from the cities of Israel greeted David after the slaughter of the Philistine was apparently struck off on the spur of the moment, under the influence of the wild joy with which they welcomed their national champion, "the dancing of the songs of Israel." The accompaniment of timbrels and instruments of music must have been equally simple, and such that all could take part in it (1 Sam. xviii, 6, 7). Up to this time we meet with nothing like a systematic cultivation of music among the Hebrews, but the establishment of the schools of the prophets appears to have supplied this want. Whatever the students of these schools may have been taught, music was an essential part of their practice. At Bethel (1 Sam. x, 5) was a school of this kind, as well as at Naioth in Ramah (1 Sam. xix, 19, 20), at Jericho (2 Kings ii, 5, 7, 15), Gilgal (2 Kings iv, 88), and perhaps at Jerusalem (2 Kings). The private broadside music-walks of Solomon, which became attached to the court; and though Saul, a hardy warrior, had only at intervals recourse to the soothing influence of David's harp, yet David seems to have gathered around him "singing men and singing women," who could celebrate his victories and lend a charm to his hours of prayer (2 Sam. xix, 35). Solomon did the same (Eccles. ii, 8), adding to the luxury of his court by his patronage of art, and obtaining a reputation himself as no mean composer (1 Kings iv, 32).

But the Temple was the great school of music, and it was consecrated to its highest service in the worship of Jehovah. Before, however, the elaborate arrangements had been made by David for the Temple choir, there must have been a considerable body of musicians throughout the whole country. The period during which this connection of the Levitical district with the temple service, and the number of Levites who were thus employed, is not given, but it is certain that the Levites all along had practiced music, and that some musical service was part of the worship of the tabernacle; for unless this supposition be made, it is inconceivable that a body of trained singers and musicians should be found ready for an occasion like that on which they make their first appearance. The position which the tribe of Levi occupied among the other tribes naturally favored the cultivation of an art which is essentially characteristic of a leisurely and peaceful life. They were free from the hardships attending the struggle for conquest and afterwards for existence, which the Hebrews maintained with the nations of Canaan, and the Levites of foreign countries. According to the Levitical constitution, music was provided for by a national tax. Consequently they had ample leisure for the various ecclesiastical duties devolving upon them, and among others for the service of song, for which some of their families appear to have possessed a remarkable genius. The three great divisions of the tribe had each a representative family in the choir: Heman and his sons represented the Kohathites, Asaph the Gershonites, and Ethan or Jeduthun the Merarites (1 Chron. xv, 17; xxiii, 3; xxv, 1-6). Of the 38,000 who composed the tribe in the reign of David, 4000 are said to have been appointed for the service of song with the harps of the church (1 Chron. xiii, 8), and again by the Maccabean army after their great victory over Gorgias (1 Macc. iv, 24). Over this great body of musicians presided the sons of Asaph, Heman, and Jeduthun, twenty-four in number, as heads of the twenty-four courses of twelve into which the skilled ministrers were divided. These skilled or "cunning" (נבר, 1 Chron. xxxv, 6, 7) men were 288 in number, and under them appear to have been the scholars (נשם, 1 Chron. xxxv, 8) whom, perhaps, they trained, and who made up the full number of 4000. Supposing 4000 to be merely a round number, each course would consist of a full band of 166 musicians, presided over by a body of twelve skilled players, with one of the sons of Asaph, Heman, or Jeduthun as conductor. Asaph himself appears to have played on the cymbals (1 Chron. xvi, 5), and this was the case with the other leaders (1 Chron. xv, 19), perhaps to mark the time more distinctly, while the rest of the band played on psalteries and harps. The singers were distinct from both, as is evident in Ps. lxxiv, 25, "the singers went before, the players on instruments followed after, in the midst of the damsels playing with timbrels;" unless the singers in this case were the cymbalists, like Heman, Asaph, and Ethan, whose number became 288, 1 Chron. xvi, 19, are called "singers," and perhaps while giving the time with their cymbals led the choir with their voices. The "players on instruments" (נבר, nōgemim), as the word denotes, were the performers upon stringed instruments, like the psaltery and harp, who have been alluded to. The "players on instruments" (נבר, chōleēm), in Ps. lxxxvii, 7, were
different from those last, and were properly pipers or performers on perforated wind-instruments (see 1 Kings i, 40). "The damsel playing with timbrels" (comp. 1 Chron. xiii, 8) seem to indicate that women took part in the Temple choir; and among the family of Heman are specially mentioned three daughters, who, with their fourteen sons, were all "under the hands of their father for ministering in the house of God, even singing with harps, psalteries and harps of psalms, 10,000;" (1 Chron. xvi, 5). The enormous number of instruments and dresses for the Levites provided during the magnificent reign of Solomon would seem, if Josephus be correct (Ant. viii, 3, 8), to have been intended for all time. A thousand dresses for the high-priest; linen garments and girdles of purple for the priests, 30,000; 40,000 for the Levites; psalteries and harps of hemp, 40,000; all these were stored up in the Temple treasury. The costume of the Levitical singers at the dedication of the Temple was of fine linen (2 Chron. v, 12).

3. The Silver Age of Hebrew Music.—So we may perhaps fitly designate the period of the captivity and the restoration, as denoting that the national music was still preserved and cultivated by considerable numbers of the people, especially of the Levitical families, although much of its ancient glory and splendor had passed away. In the first anguish and dejection of their captivity, it was natural that the tribes should feel what is so touchingly expressed in Ps. cxlvii, 7, "When thou didst lead forth the people of Babylon they should hang their harps upon the willows; and that, when required by their captors to sing one of the songs of Zion, they should exclaim, with patriotic disdain, "How shall we sing the Lord's song in a strange land?" But by and by they would take down their harps again from the willow-boughs, and seek solace for the sorrows of their long exile in recalling the loved melodies of their native land, and the sacred psalmody of their desolated Temple. The Babylonians, besides, were a people fond of music as themselves. Many of their instruments are mentioned in the Bible (Ps. lxxxv, 8); the long period of seventy years the Hebrew exiles must have been able to enrich their own national music by many new ideas and new instruments. It is at least certain that when "the Lord turned again the captivity of Judah," there was a fresh inspiration and outburst of sacred poetry and song; "Then was our mouth filled with laughter and our tongue with singing" (Psa. cxxxvi, 2).

Not a few of the later parts of the Psalter are of that age, some of which are not much inferior to the best compositions of David himself; and in proof of the extent to which musical gifts were spread among the returning exiles, we have the appearance of a new reservoir, as it were, of the old songs, indicated in Neh. vii, 67, that "they had two hundred forty and five singing men and singing women," by whom we are no doubt to understand professional as distinguished from amateur performers. Nor were the musical traditions of the Temple forgotten, or their official deposits, nor the Levitical families of Asaph, Heman, and Jeduthun still numerous, and still devoted to their choral art and office. "The children of Asaph alone—the singers—were a hundred twenty and eight" (Ezra ii, 41). At the foundation of the second temple, "they set the priests in their apparel with trumpets, and the Levites, the sons of Asaph, with cymbals, to praise the Lord after the ordinance of David, king of Israel" (Ezra iii, 10); and when, after many intermissions, the house was at last finished and dedicated, the whole liturgical service of David's and Solomon's reigns was as far as possible restored. "They set the priests in their divisions and the Levites in their courses for the service of God which is at Jerusalem." (Ezra vii, 18).

In the apocryphal book of Ecclesiastis (ch. ii) we find an interesting reference to the musical service of the second temple in the days of Simon the high-priest, the son of Onias, "who in his life repaired the house again, and made it rich with the gifts of those that had sought to destroy it, and replenished all that was wanting in it." When Simon "finished the service of the altar, by stretching out his hand to the cup and pouring out the blood of the grape at the foot of the altar, a sweet-smelling savour," "then shouted the sons of Aaron, and sounded the silver trumpets, and made a great noise to be heard for a remembrance before the Most High. Then all the people together hasted and fell down to the earth upon their faces to worship their Lord God Almighty. The singers also sang praises with their various instruments of music, 10, and Talmid, vii, 3), consisted of only twelve performers, provided with nine lyres, two harps, and one cymbal, with the addition, on certain days, of flutes. These musicians were stationed upon the θῦρα (dukas), or the ascent of several steps which led from the outer court to the court of the priests, and were placed under the leadership of the chief musician, who gave the time with the loud-sounding cymbals. Below the steps, and at the foot of the Levites, stood the chorister boys of the same tribe who sang the refrain. The daily week-day psalm (יִשְׂרָאֵל יָשָׂע) was sung in nine parts or strophes, and the pauses were marked by the trumpet-blasts of the priests. The musical service of the Herodian temple was by no means the same as that of earlier times; and if the present accentuation of the Psalter be regarded as representing the manner in which the psalms were sung or cantillated in the time of Herod, it would not suffice to give us any notion of the usage which prevailed in the days of the first temple, before the exile.

Innovations upon ancient usage were from time to time introduced; and among these mention is made in the Talmud of the use of an instrument in the later temple, which would seem to have been of the nature of a wind-instrument; and its long and varied period of different kinds, and the power of which was such, according to Jerome, that it could be heard from Jerusalem to the Mount of Olives, and even farther. (See Saalschütz, 'Archologie,' i, 261-284; also Appendix to the same author's Geschichte und Würdigung der Musik bei den Hebräern.)

4. The Uses and Characteristics of Hebrew Music.—Sacred music, as in the above liturgical examples, was the most important application of the art among the Hebrews. The trumpets, which are mentioned among the instruments played before the ark (1 Chron. xiii, 8), may be supposed to have referred to the sounding of the horn, as in Ps. xxiv, 26; (vi, 6). As they were also used in royal proclamations (2 Kings xi, 14), they were probably intended to set forth by way of symbol the royalty of Jehovah, the theocratic king of his people, as well as to sound the alarm against his enemies (2 Chron. xiii, 12). A hundred and twenty priests blew the trumpets in harmony with the choir of Levites at the dedication of Solomon's temple (2 Chron. v, 12, 13; vii, 6), as in the restoration of the worship under Hezekiah, in the description of which we find an indication of one of the uses of the Temple music: "And Hezekiah commanded to offer the burnt-offering upon the altar. And when the burnt-offering began, the song of Jehovah began also, with the trumpets and with the instruments of David, king of Israel. And all the congregation worshipped, and the singers sang, and the trumpeters sounded; all until the burnt-offering was finished" (2 Chron. xxx, 14). The altar was covered with fine dust of Jehovah (Mal. i, 7), and the sacrifices were his feasts (Exod. xxxiii, 18); so the solemn music of the Levites corresponded to the melody by which the banquetts of earthly monarchs were accompanied. The Temple was Jehovah's palace, and as the Levite sentries watched and measured the gates by night they chanted the songs of David, and one of these it has been conjectured with probability is Psa. xxxviiv.
In the private as well as in the religious life of the Hebrews music held a prominent place. The kings had their court musicians (Eccles. ii, 8), who bewildered their death (2 Chron. xxxix, 25); and in the luxurious times of the later monarchy the effeminate gallants of Israel, reeking with perfumes and stretched upon their couches of ivory, were at their banquets to accompany the song with the tinkling of the psaltery or guitar (Amos vi, 4–6), and amused themselves with devising musical instruments while their nation was perishing, as Nero fiddled when Rome was in flames. Isaiah denounces a woe against those who sat at the mourning twilight and over their wine, to the sound of "the harp, and the viol, the tabret and pipe" (Isa. v, 11, 12). But while music was thus made to minister to debauchery and excess, it was the legitimate expression of mirth and gladness, and the indication of peace and prosperity. It was only when a curse was upon the land that the prophet could say, "The mirth of tabrets ceaseth, the noise of them that rejoice endeth, the joy of the harp ceaseth: they shall not drink wine with a song" (Isa. xxiv, 8, 9). In the sadness of captivity the harps hung upon the willows of Babylon, and the voices of the singers refused to sing the songs of Jehovah at their foreign captors' bidding (Psa. cxxxvii). The banquets of the ancient world were accompanied by music and song (Jer. vii, 34), and these ceased only when the land was desolate (Ezek. xxvi, 13). The high value attached to music at banquets is indicated in the description given in Eccles. xxxii of the festivities of the master of a feast. "The music and singing words were there, the harp, the tabret, the pipe, and the sound of a bowl of wine..." (Eccles. xii, 4), and who were present--the harlots who frequented the streets of great cities, and attracted notice by singing and playing the guitar (Isa. xxiii, 5, 16). (See below.)

There are two aspects in which music appears, and about which little that is satisfactory can be said: the mysterious influence which it had in driving out the evil spirit from persons, and its immediate connection with the religious and prophetical inspiration. Miriam "the prophetess" exercised her prophetical functions as the leader of the chorus of women who sang the song of triumph over the Egyptians (Exod. xv, 20). The company of prophets whom Saul met coming down from the hill of God had a psaltery, a tabret, a pipe, and a harp before them, and smitten with the same enthusiasm he "prophesied among them" (1 Sam. x, 5, 10). The priests of Baal, challenged by Elijah at Carmel, cried aloud, and cut themselves with knives, and prophesied till sunset (1 Kings xviii, 29). The sons of Asaph, Heman, and Jeduthun, set apart by David for the Temple choir, were to "prophesy with harps, with psalteries, and with cymbals" (1 Chron. xxv, 1): Jeduthun "prophesied with the harp" (1 Chron. xxv, 3), and in 2 Chron. xxxiv, 15 is called "the king's seer," a term which is applied to Heman (1 Chron. xxv, 5) and Asaph (2 Chron. xxix, 30) as well as to Jeduthun (1 Chron. xxiv, 11; 1 Chron. xxv, 29). The spirit of Jehovah came upon Jahaziel, a Levite of the sons of Asaph, in the reign of Jehoshaphat, and he foretold the success of the royal army (2 Chron. xx, 14). From all these instances it is evident that the same Hebrew root (M22) is used to denote the inspiration under which the prophets spoke and the minstrels sang. Gesenius assigns the later as a secondary meaning. In the case of Elisha, the minstrel and the prophet are distinct persons, but it is not till the minstrel has played that the hand of Jehovah comes upon the prophet (2 Kings iii, 15). This influence of music has been explained as follows by a learned divine of the Platonic school: "These divine enthusiasts were commonly wont to compose their songs and hymns in the manner of one musical instrument unto another, as we find it often suggested in the Psalms. So Plutarch ... describes the dictate of the oracle anciently, ... 'how that it was uttered in verse, in pomp of words, similitudes, and metaphor, at the sound of a pipe.' Thus we have Asaph, Heman, and Jeduthun set forth in this prophetical preparation (1 Chron. xxi, 19), as well as to the musical instrument they prophesied after the manner of Elisha.

And this sense of this place, I think, is much more genuine than that which a late author of our own would fasten upon it, viz., that this prophesying was nothing but the singing of psalms. For it is manifest that the people were not mere singers, but composers, and such
were truly called prophets or enthusiasts" (Smith, Select Discourses, vi. ch. 7, p. 288, 289 [ed. 1660]). All that can be safely concluded is, that in their enthusiastic manifestations of the spirit of Jehovah, the frenzy of Saul's madness (1 Sam. xviii, 10), and the religious enthusiasm of the prophets, whether of Saul or Jehovah, were so nearly alike as to be described by the same word. The case of Saul is the most difficult. We are not admitted to the secret of his dark malady. Two turning-points in his history are the two interviews with Samuel, the first and the last, if we except that dread encounter which the despairing monarch challenged before the fatal day of Gilboa. On the first of these Samuel foretold his meeting with the company of prophets with their ministrails, the external means by which the spirit of Jehovah should come upon him, and he could be exchanged into another man (1 Sam. x, 5). The last occasion of their meeting was the disobedience of Saul in sparing the Amalekites, for which he was rejected from being king (1 Sam. xvii, 20). Immediately after this we are told the Spirit of Jehovah departed from Saul, and an "evil spirit from Jehovah troubled him" (1 Sam. xvi, 14); and his attendants, who had perhaps witnessed the strange transformation wrought upon him by the music of the prophets, suggested that the same means should be employed for his restoration. "Let our lord now command thy servants before thee to seek out a man, a cunning player on the harp; and when the evil spirit from God is upon thee, that he shall play with his hand, and thou shalt be well. . . . And it came to pass when the spirit from God was upon Saul, that David took a harp and played with his hand. So Saul was refreshed, and was well, and the evil spirit departed from him." (1 Sam. xvi, 16, 23.) But on two occasions, when anger and jealousy supervened, the remedy which had soothed the frenzy of insanity had lost its charm (1 Sam. xviii, 10, 11; xix, 9, 10). It seems, therefore, that the passage of Seneca, which has often been quoted in explanation of this phenomenon, "Pythagoras perturbationes lyra componebat" (De Ira, iii, 9), is but generally applicable.

On the scientific character of Hebrew music much has been written, but to very little purpose, and with extremely meagre results. The truth is that no adequate data exist to enable us to arrive at any satisfactory conclusions upon it. The Hebrews never wrote anything resembling systematic treatises in which their musical traditions might have been fixed, and handed down to posterity; and in the absence of this it is hopeless to attempt to determine more than a very few points of a quite general kind. Several attempts, however, have been made by ingenious and learned men to clear this inanimate state of the art of converting the accentual system of the Psalmist into a musical notation. One of the earliest of these writers was Speidel (Unterwörfliche Spuren von der alten Deutschen Singkunst [1704]). Another was Anton (in Paulus's Neues Repertorium für böthisch, und morgen-länd. Literatur [1790-91]). The latest is Haupt (1846), who discovers in the accents viewed as marks of number, when combined with the arithmetical values of the Hebrew letters, all the notes of the diatonic scale, and sees in the series of notes thus indicated the original psalm-melodies. But however ingenious all these attempts may be, they all fail" (1 Delitzsch remarks, in self-illusion. For the accents, as Saalechutz urges, were not designed to serve any such musical use. "It is plain that the Masoretes had no other object in view in devising them than the preservation of the right pronunciation and understanding of the text. If the accents set forth a word, it was only the melody of declamation, which somehow approaches nearer to proper singing than among the northern peoples. It was not the Temple music which the accents set forth, the communication of which could have no interest to the Masoretes, who were mere linguists. It would have been strange, besides, if they had made use of so many musical notes as the accents, when seven might have sufficed. Of the Masons of ancient music nothing is known in the text of the Holy Scripture or anywhere else" (Saalschutz, Von der Form der Hebräischen Poesie, nebst einer Abhandlung über die Musik der Hebräer, 1835). Proceeding on the same false assumption that the poetical accents were of the nature of a musical notation, Forkel, the German historian of music, drew a conclusion very similar to that which the authors now referred to. He inferred from the manifest imperfection and inadequacy of such a musical language how extremely rude and imperfect must have been the musical science and art which it represented. He concluded, in fact, that the Hebrew music was nothing more than a species of cantillation or intoned recitation, and that he never was able to advance beyond this rudimentary stage (Geschichte der Musik, i, 148). This was an absurd extremity; for how is it conceivable that a people who made such splendid progress in the art of lyric poetry, i.e. of poetry expressly designed to be married to music—so music expressive of the same emotions which were expressed in the poetry—should have lagged so far behind the other nations of antiquity in the sister science and art? See Saalschutz. On such a subject it is not safe to argue from the practice of the modern Jews (Śhītā hog-gīth, ii); and as singing is sometimes, indeed, performed in the Synagogue, it is difficult to believe that in the solemn services of their religion they stopped at the point of cantillation (Ewald, Hebr. Poesie, p. 166).

The nature of the Hebrew music was doubtless of the same essential character as that of other ancient nations, and of all the Oriental nations; consisting not so much in harmony (in the modern sense of the term) as in unison or melody (Volney, Trav., ii, 325). This is the music of nature, and for a long time after the more ancient period was common among the Greeks and Romans. From the Hebrews themselves we have no definite accounts in reference to this subject; but the history of the art among other nations must here also serve as our guide. It was not the harmony of differing or dissonant sounds, but the voice formed after the tones of the lyre, that constituted the beauty of the ancient music (see Philo, opp. ii, p. 484 sq.). This so enraptured the Arabian servant of Nebiūr, in the time of the prophet, that he sang to the music, "By Allah, that is fine! God bless you!" (Reisbeschreib. nach Arabien, p. 176). The whole of antiquity is full of stories in praise of this music. By its means battles were won, cities conquered, mutinies quelled, diseases cured (Plutarch, De Musicis). Effects similar to those produced on the Jews by their music are not to be found in the Scriptures, and have already been indicated. The different parts which we now have are the invention of modern times. See ALAMOTH; GITTHITH; SHEMINITH, etc. Respecting the base, treble, etc., very few discriminating remarks had then been made. The old, the young, maidens, etc., appear to have sung one part. The beauty of their music consisted altogether in melody. The instruments by which, in singing, this melody was accompanied occupied the part of a sustained base; and, if we are disposed to apply in this case what Niebuhr has told us, the beauty of the concerts consisted in this, that other persons repeated the music which had just been sung three, four, or five notes higher.

Such, for instance, was the concert which Miriam held with her musical fellows, and to which the "toeph," or tabret, furnished the continued base; just as Niebuhr has also remarked of the Arabian women of the present day, "that when they dance or sing in their harem they always beat the corresponding note on their drum" (Reisbesch. i, 181). To this mode of performance belongs the 24th Psalm, which rests altogether upon the varied representation; in like manner, also, the 20th and 21st Psalms. This was all the change
it admitted; and although it is very possible that this monotonous, or rather unisonous music, might not be interesting to the human ear, still, from the fact of the musical, modal, minor, modulations, and cadences, there is something in it which the Orientals are well pleased. They love it for the very reason that it is monotonous or unisonous, and from Morocco to China we meet with no other. Even the cultivated Chinese, whose civilisation offers so much pleasure to the European ear by its transcendental Egyptian-like their own music, which consists entirely of melody, better than ours, although it is not wholly despised by them (Du Halde's China, iii, 216).

A music of this description could easily dispense with the compositions which mark the time by notes; and the Hebrews do not appear to have known anything of time measurement and melody, so that the song serves as a purpose which yet remains to be proved. At the best, the accent must have been a very imperfect means for this purpose, however high its antiquity. Europeans had not yet attained to musical notes in the 11th century, and the Orientals do not profess to have known them till the 17th. On the other hand, the word 'se'lah, which occurs in the Psalms and Habakkuk, may very possibly be a mark for the recitation of the melody a few tones higher, and, as some think, for an accompaniment or after-piece of entirely instrumental music (see De Wette, Comment. lib. d. Psa. p. 52 sq.; Saalschütz, Form der Hebr. Poésie, p. 653 sq.; Ewald, Hebr. Poésie, p. 175 sq.). See se'lah.

The Hebrew music is judged to have been of a shrill character (see Redelob, in Illgen's Zeitschr. 1858, ii, 1 sq.). It is accounted to result from the nature of the instruments—harp, flute, and cymbals—which were employed in the Temple service (comp. Maimon, Erach. ii, 5, 5, and 6).

The manner of singing single songs was, it seems, regulated by that of others in the same measure, and it is uncertain whether it is not true that many of the Psalms are intended to indicate the names of other songs according to which these were to be sung (see Vensky, in Mitziick's Musikal. Bibliothek, i, 666 sq.; Eichhorn, Enzyk. i, 245; Jahn, Enzy. i, 653; Gesenius, Gesch. d. Hebr. Spracherei, p. 220 sq.). See Psalms.

Engel (Music of the most Ancient Nations, particularly of the Assyrians, Egyptians, and Hebrews [1864]) observes that the Hebrews had various kinds of sacred and secular musical compositions, differing on the occasions to which they were employed. These he enumerates as follows: (a) Sacred music in divine worship, which was evidently regarded as of the highest importance; (b) Sacred songs, and instrumental compositions, which were performed also in family circles (Isa. xxx, 29; James v, 13); (c) Military music, sacred as well as secular (2 Chron. xxv, 21; xiii, 12, 14); (d) Triumphal songs (Exod. xv; Judges v; 2 Chron. xx, 27, 28); (e) Erotic songs, alluded to in title of Psal. xvi, "A song of love" (Isa. v, 1); (f) Music at bridal processes (Jer. vii, 84); (g) Funeral songs (2 Chron. xxxix, 25; Eccles. xii, 5; Amos vi, 16; 2 Sam. i, 19); (h) Popular secular songs, such as the songs of the victors (Isa. xvi, 10; Jer. xxvii, 38); (i) Convivial songs (Isa. xxix, 8; 9; Luke xv, 25; Isa. vi, 11, 12; Amos vi, 4, 6); (j) Performances of itinerant musicians (Isa. xxiii, 16, 18; Eccles. ix, 4).

For the literature of the subject, see Musical In.

Music, Christian. Music (from μουσa, a muse) is produced by the human voice, and by a variety of artificial instruments. For the application of the voice to musical purposes, see Singing. Musical instruments are classified as stringed instruments, wind instruments, and instruments of percussion. In some stringed instruments, as the piano-forte, the sounds are produced by striking the strings by keys; in others, as the harp and guitar, by drawing them from the position of rest. In a third class, including the violin, viola, violoncello, and double bass, the strings are put into vibration with a bow. In wind instruments the sound is produced by the agitation of an enclosed column of air, the flute, clarionet, oboe, bassoon, flageolet— instruments of wood, and the trumpet, horn, cornet-a-pistone, etc., of metal, are played by the breath; in others, as the organ, harmonium, and concertina, the wind is produced by other means. In the two last-named instruments the tone is produced by the friction of wind on free vibrating springs or reeds. Instruments of percussion are such as the drum, kettle-drum, cymbals, etc. Musical compositions are either for the voice, with or without instrumental accompaniment, or for instruments only. Instrumental music may be composed for one or for more instruments. The solo, the concerto, the sonata, etc., are the different forms of composition and melody. In addition to the latter, symphonies and overtures for an orchestra, and instrumental chamber music, including duets, trios, quartets, and other compositions for several instruments, where each takes the lead in turn, the other parts being accompaniments. Of vocal music, the principal forms may be considered as church music, chamber music, dramatic music, and popular or national music. Vocal chamber music includes cantatas, madrigals, and their modern successors, glees, as also recitativo, arias, duets, trios, quartets, choruses, and generally all forms, accompanied or unaccompanied, which are chiefly intended for the entertainment of the individual or in the smaller circles. The music of opera is a dramatic music united with scenic representation in a variety of ways, in the ballet, the melodrama, the vaudeville, and the opera, in which last music supplies the place of spoken dialogue. And finally we come to consider church music, with which alone we have to do here. It includes plain song, faux-bourdon, the chorale, the anthem, the sacred cantata, the mass and requiem of the Roman Catholic Church, and the oratorio.

Among all nations music has always formed a part of public worship. "Praise," it has been aptly said, "is the appropriate language of devotion. A fervent spirit of devotion instinctively seeks to express itself in song. In the strains of poetry joined with the melody of music, it finds an easy and natural utterance of its elevated emotions." Among the pagan nations of antiquity the singing of songs constituted indeed a great part of the religious worship. In all their religious festivals and in their temples they sang to the praise of the god. (comp. Gerber, Mosaische Musik, vol. i. Praef.; Burney, Hist. of Music). Yet no nation of antiquity made such extensive use of music in their worship as did the Hebrews (see the preceding article), especially in the time of their prosperity (Saalschütz, Geschichte d. u. Würdigung d. Tempel-Musik d. Hebäer [Berl. 1893]). Music was not only the form and medium of their songs and in their dwellings the Jews celebrated God with sacred hymns. See Psalm. From them the use of music and choral singing was adopted by the primitive Christians (see 1 Cor. xiv, 15, 26; Col. iii, 16). Says Coleman, "The singing of spiritual songs constituted from the beginning an interesting and important part of religious worship in the primitive Church" (Pref. and Richt. p. 321).

I. Early Christian Usages.—Grotius insists that we have in Acts iv, 24-30 an epitome of an early Christian hymn; and it would appear from a close examination of one of the N.-T. Scripture passages that when Christ himself, in his final interview with his disciples before his crucifixion, sung with them the customary paschal songs at the institution of the sacrament, and by his example sanctified the use of sacred songs in the Christian Church (Matt. xxvii, 58). In the opinion of Münzer, the eminent Biblical anthropologist, the gift of the Holy Spirit on the day of Pentecost was accorded, with their music, such an intense inspiration, to which the disciples gave utterance in the rhapsodies of spiritual songs (Acts ii, 4, 13, 47). There are also many other N.-T. passages which clearly indicate the use of religious songs in the worship of God. Paul and Silas, lacerated by the cruel scourging which
they had received, and in close confinement in the inner prison, prayed and sang praises to God at midnight (Acts xvi, 25). The use of psalms and hymns and spiritual songs is moreover directly enjoined upon the churches by the apostle as an essential part of religious duty (Eph. v, 19). The latter epistle was a circular letter to the Gentile churches of Asia, and therefore in connection with that to the Church at Colosse is explicit authority for the use of song in the religious worship of the apostolic churches (comp. Walch, De Hymnica Ecclesiae Apostolorum).

Eusebius speaks of the public worship of God in all churches by sacred song, so the N.-T. people also did not restrict these acts of devotion to their public places of worship. In their social circles and around their domestic altars they worshipped God in sacred song; and in their daily occupations they were wont to relieve their toil and refresh their spirits by renewing their favorite songs of Zion. Persecuted and afflicted—in solitary cells of the prison, in the more dismal abodes of the mines to which they were doomed, or as wandering exiles in foreign countries—they forgot not to sing the Lord's song in the prison or the mine or the strange lands to which they were driven. In connection with the apostolic minister, the epistle to the Ephesians, the epistle to the Colossians, the epistle to the Romans, the epistle to the Hebrews, the Didache, the Shepherd of Hermas, the Muratori canon, and others, are full of spiritual songs. The phraseology indicates, too, that they were not restricted to the use of the psalms of David, as in the Jewish worship, but were at liberty to employ others of appropriate religious character in their devotions. Says Coleman, "The Corinthians were accustomed to make use of spiritual songs composed for the occasion (1 Cor. iv, 26). And though the apostle had occasion to correct their disorderly proceedings, it does not appear that he forbade the use of such songs. On the contrary, there is the highest probability that the apostolic churches did not restrict themselves simply to the use of the Jewish Psalter. Grotius and others have supposed that some fragments of these early hymns are contained not only, as above mentioned, in Acts, but perhaps also in 1 Tim. iii, 16. Something like poetic antithesis they have imagined to be contained in James i, 17; 1 Tim. i, 1; 2 Tim. ii, 11-18. The expression in Eph. v, 20, "teaching and exhorting one another with psalms and hymns and spiritual songs," has been ascribed to the same origin, as has also Rev. iv, 8, together with the song of Moses and the Lamb (Rev. xv, 8), and the songs of the elders and the beasts (Rev. v, 9-14). Certain parts of the book itself have been supposed to be strictly poetical, and may have been used as such in Christian worship, such as Rev. i, 4-8; xi, 15-19; xv, 8, 4; xxi, 1-8; xxii, 10-18. But the argument is not conclusive; and all the learned criticism, the talent, and the taste that have been employed on this point leave us little else than uncertain conjecture on which to build an hypothesis" (p. 825).

The authentic record on this subject is the celebrated letter from Pliny to Trajan respecting the worship of the apostolic age (A.D. 108, 104). In the investigations which he instituted against the Christians of his period, he discovered, among other things, that they were accustomed to meet before day to offer praise to Christ (Epist. x, 97). The expression used is somewhat equivalent, and might refer to the ascription of praise in prayer or in song. But it appears that these Christians rehaersed their "carmen invicem alternatim, as if in responsive songs, according to the ancient custom of singing in the Jewish worship. Tertullian, only a century later, evidently understood the passage to be descriptive of this mode of worshiping God and Christ, for he says that Pliny intended to express nothing else than assemblies before the dawn of the morning for singing praise to Christ and to God (Apolog. c. 2). Eusebius also gives the passage a similar interpretation, saying that Pliny could find nothing against them save that, arising at the dawn of the morning, they sang hymns to Christ as God (Hist. Ecclesiast. iii, 32). Viewed in this light, in which it is now generally accepted, the passage becomes of considerable importance in Christian worship immediately subsequent to the age of the apostles (comp. Münster, Metriech. Offenbar. p. 25). Tertullian himself also distinctly testifies to the use of songs to the praise of God by the primitive Christians. Every one, he says, was invited in their common dissipation to contribute to the public worship, either from the Scriptures or from their own invention, "one inspired by himself," according to the interpretation of Münster. Whatever may be the meaning of this phrase, the passage clearly asserts the use of Christian psalmody in their religious worship. Again, he speaks of singing in connection with the reading of the Scriptures, exhortations, and prayer (De Àimma, c. 9). Justin Martyr also, who lived within half a century of the apostles, and is himself credited with being the author of a work on Christian Psalmody, mentions the songs and hymns of the Ephesian Christians: "We manifest our gratitude to him by worshipping him in spiritual song. If you would know how many, and in what liturgy, and how many psalms, and how many odes of the brethren there are, written from the beginning (jà ópipí) by believers, which offer praise to Christ as the Word of God, ascribing divinity to him" (Eccles. Hist., v, 28). Here we have not only testimony to the use of spiritual songs in the Christian Church from the remotest antiquity, but also that there were hymn writers in the apostolic Church, and that their songs were collected for use at a very early date of the Christian Church (comp. Fabricius, Bibloth. Graeca [ed. Harl.], vii, 67). These spiritual songs of the primitive Christians were almost exclusively of a doctrinal character. "In fact," says Augusti, "almost all the prayers, doxologies, and hymns of the ancient Church are nothing else than prayers and supplications to the triune God or to Jesus Christ. They were generally altogether doctrinal. The prayers and psalms, of merely a moral character, which the modern Church has introduced, are for the most part, "台词 together unknown" (Denkmäler. Gesch. v, 417; comp. Neander, Alttest., Kirchengesch. i, 528; Engl. ed. i, 804).

One such composition of the primitive Church—a hymn—has come down to us entire. It is found in the Padoyine of Clement of Alexandria, a work bearing date about one hundred and fifty years from the time of the apostles; but it is ascribed to another, and ascribed to an earlier origin. It is wanting in some of the manuscripts of Clement. It contains figurative language and forms of expression which were familiar to the Church at an earlier date; and, for various reasons, is regarded by Münster (Metriech. Offenbar., p. 62) and Billerbeck (Denkmäler Gesch. § 21) as a venerated relic of the early Church, which has escaped the ravages of time, and still remains a solitary remnant of the Christian psalmody of that early age. It is certainly very ancient, and the earliest that has been transmitted to us (see Hymnology, in vol. iv, p. 584, col. 2). A translation of it is furnished in Coleman's Ancient Christianitv, p. 384-385.

Sacred music must, in the primitive Church, have consisted only of a few simple airs which could easily be learned, and which, by frequent repetition, became familiar to all. An ornate and complicated style of music would have been out of place and at variance with the circumstances of these Christian worshippers and unacquainted with the simplicity of their primitive forms (comp. Augusti, Denkmäler, v, 288). In their
songs of Zion, both old and young, men and women, bore a part. Their psalmody was the joint act of the whole assembly in unison. Such is the testimony of Ignatius to the worship of the Church at Antioch. Art. 9. The psalmody of the Christian Church was in Pau. p. 176, c. 9, p. 49.) brooked no exceptions that the leaders of the apostolic assembly, for bidding women to speak in public, relates not to singing, nor it was an ancient custom, nor its laws it as it was with us, for all to come together and so gen-
edly to join in singing. The young and the old, rich and poor, male and female, bond and free, all join in one song. . . . All worldly distinctions here cease, and the whole congregation form one general chorus." (Hom. xi, vol. xlii, p. 349; Hom. xxxvi, in 1 Cor. vol. x, p. 340; comp. Gerbert, Musica Sacra, lib. ii, § 11, for other au-
thorities.) Each member was invited, at pleasure and according to his ability, to lead their devotions in a sacred song indited by himself. Such was the custom in the Cornithian Church. Such was still the custom in the age of Tertullian, to which reference has already been made. Augustine also refers to the same usage, and ascribes to divine inspiration the talent which was manifested in this extemporaneous psalmody.

Such was the character of the psalmody of the early Church, consisting in part of the psalms of David, and in part of hymns composed for the purpose of worship, and intended to raise the thoughts of God's people to Christ and the Father. (Neander, Allgem. Kirchengesch, i, 523; Engl. ed. i, 304.) Few in number, and sung to rude and simple airs, they yet had wonderful power over those primitive saints. The sacred song inspired their devotions both in the public and private worship of God. At their family board it quickened their gratitude to God, who gave them their daily bread. It enlivened their domestic and social intercourse; it relieved the weariness of their daily labor; it cheered them in solitude, comforted them in affliction, and supported them under persecution.

"Go where you will," says Jerome, "the ploughman at his plough sings his joyful hallelujahs, the busy mower regales himself with his psalms, and the vine-dresser is singing one of the songs of David. Such are our songs —our love-songs, as they are called —the solace of the shepherd in his solitude and of the husbandman in his toil." (Ep. xvi, ad Marcellum.) Fearless of reproach, of persecution, and of death, they continued in the face of their faith, when many who had sung sacred songs among the streets, market-places and at the martyr's stake. Eusebius declares himself an eye-witness to the fact that, under their persecutions in Thebaïs, "they continued to their latest breath to sing psalms and hymns and thank-
givings to the God of heaven." (Hist. Eccles, viii, 9; comp. Deutscher Verein für die Erforschung der Urkunden und Sammlungen, p. 28 sq.; Augusti, Denkwürdigkeiten, v, 296-
97; Coleman, Manual, p. 381-383.)

II. Innovations.—From the 4th century onward the Christian Church greatly modified the mode of performing this part of public worship.

1. The first innovation occurred in the Syrian churches, where responsive singing was introduced, probably very early in the 4th century. Soon after it became the practice of the Eastern churches generally, and was transferred to the West also by St. Ambrose of Milan (A.D. 370), and was called there the Ambrosian style of music. Some critics believe responsive singing has been practiced at a very early date. Thus it would seem from the epistle of Pliny that the Christians of whom he speaks sang alternately in responses. The ancient hymn from Clement, too, above mentioned, seems to be constructed with reference to this method of singing. There is besides an ancient and certainly genuine reference to singing in Socinian History, vi, 8) that Ignatius was the first to introduce this style of music in the Church of Antioch. It was certainly familiar to the Jews, who often sang responsively in the worship of the Temple. In some instances the same style of singing may have been practiced too in the primitive Church. But responsive singing is not generally allowed to have been in frequent use during the first 800 years of the Christian era. This mode of singing was introduced into the Church of the Gentiles, and for this reason was generally dis-

2. The appointment of singers as a distinct class of officants in the Church for this part of religious worship, and the consequent introduction of a professional music into the church, marks another alteration in the psalmody of the Church. These innovations were first made in the 4th century; and though the people continued for a century or more to enjoy their ancient privilege of all singing together, it is conceivable that gradually it was forced to die, as a promising assembly could not well unite in theatrical music which required in its perform-

ers a degree of skill altogether superior to that which all the members of a congregation could be expected to pos-

sess. An artificial, theatrical style of music, having no affinity with the worship of God, soon began to take the place of those solemn airs which before had inspired the devotions of his people. The music of the theatre was transferred to the church, which accordingly became the scene of theatrical pomp and display rather than the house of prayer and of praise, to inspire by its appropriate and solemn rites the spiritual worship of God's people. But the unbridled taste for secular music in the church was exhibited by Neander in the following extract: "We have to regret that both in the Eastern and Western Church their sacred music had already assumed an artificial and theat-

rical character, and was so far removed from its orig-

inal simplicity that even in the 4th century the abbot Pambo of Egypt complained that heathen melodies [accompanied as it seems with the action of the hands and the feet] had been introduced into their Church psalmody." (Kirchengesch, ii, 681; comp. Scriptores Ecclesiat., De Musico, i [1784], 3.) Isidore of Pelusium also complained of the theatrical singing, especially that of the women, which, instead of inducing penitence for sin, tended much more to awaken sinful desires (in Biblioth. Patr. vii, 548). Jerome also, in remarking upon Eph. v, 19, says: "May all hear it whose business it is to sing in the church. Not with the voice, but with the heart, we sing praises to God. Not like the heathen who when they met to offer up their songs to God, composed them in fountains, fountains, and market-places and at the martyr's stake. Eusebius declares himself an eye-witness to the fact that, under their persecutions in Thebaïs, "they continued to their latest breath to sing psalms and hymns and thank-
givings to the God of heaven." (Hist. Eccles, viii, 9; comp. Deutscher Verein für die Erforschung der Urkunden und Sammlungen, 7 Samml., p. 28 sq.; Augusti, Denkwürdigkeiten, v, 296-
97; Coleman, Manual, p. 381-383.)

3. Hebrews largely pervading the Church, and making rapid headway by incorporation into hymns which were the laity's property, various restrictions were from time to time laid upon the use of hymns of human com-

position. This distinction from the inspired word of David; and finally the Church authorities, in order more effectu-

ally to resist all encroachments of heathenism, were driven to the necessity either of cultivating and improving their own psalmody, or of opposing their authority to stay the
progress of this evil. The former was the expedient of
Amory Pope, Hillary, Gregory Trianian, Christopher As-
gratington. But the other alternative in turn was also
attempted. The churches by ecclesiastical authority
were restricted to the use of the Psalter and other can-
nonical songs of the Scriptures. All hymns of merely
human composition were prohibited as of a dangerous
tendency and likely to hinder the purposes of public wor-
ship. The Synod of Laodicea (A.D. 344–346, c. 59) felt
itself compelled to pass a decree to that effect. The
decree was not, however, fully enforced; the clergy
eventually claimed the right of performing the sacred
music as a privilege exclusively their own. And finally,
the more effectively to exclude the people, the singing
was considered unnecessary. Where this was not the
tongue, this rule was of necessity an effectual bar to
the participation of the people in this part of public
worship. Besides, the doctrine was industriously propa-
gated that the Latin was the appropriate language of
devotion, which became not the proper lute of the laity
in these religious solemnities, but only those of the
clergy, who had been consecrated to the service of the
sanctuary. This expedient shut out the people from
any participation in this delightful part of public wor-
ship. The Reformation again restored to the people
their ancient and inestimable right. At that time the
greater part of the music conducted in the Church was
sung to musical notes, and on the occasion of great fes-
tivals the choral service was performed with great pomp
by a numerous choir of men and boys. That abuses of
the most flagrant kind had found their way into this
department of Romish worship is beyond a doubt, as
the Council of Trent found it necessary to issue a decree
on the subject, in which they plainly state that in the
celebration of the mass, hymns, some of a profane and
others of a lascivious nature, had crept into the service,
and given great scandal to professors of the truth. But
by this decree the council, while it arranged the choral
service on a sound footing, freeing it from all exterior
novelties, gave choral music also a sanction which it
had hitherto wanted. From that time the Church of
Romish worship was able to display that profound veneration for
choral music which it has continued to manifest down
to the present day.

The Protestants at the Reformation differed on the
subject of sacred music. The Lutherans in great meas-
ure adopted the Roman ritual, and retained the choral
service. Some of the Reformed churches varied more
widely from Rome than others. Calvin introduced a
plain metrical psalmody, selecting for use in churches
the version of the Psalms by Marot, which he divided into
collections that were to be sung in unison. Others had been
triune, and a score of these were published by the same
author. This Psalter was bound up with the Geneva
Catechism. When the Reformation was introduced into
England, Henry VIII, himself a musician of considera-
celebrity, showed his partiality for the choral service by
retaining it. The cathedral musical service of the
Reformed Church of England was framed by John Mar-
beck of Windsor, in a form little different from that which
is at present in use. It is a curious fact that the
ancient foundations of conventual, collegiate, and cathe-
drinal churches make no provision for an organist, but
simply for canons, minor canons, and choristers. The
first Act of Uniformity, passed in the reign of Edward
VI, allowed the clergy either to adopt the plain metrical
psalmody or to preserve the use of the choral service.
The musical part of queen Elizabeth's liturgy is said to
have been arranged by Parker, archbishop of Canterbury.

The Puritans, however, objected strongly to the cathe-
dral music as the use of organs gave an advantage to
side to the other, as Cartwright sarcastically describes the
musical service; and it was regarded as inconsistent with
that beautiful simplicity which ought ever to char-
acterize the ordinance of divine worship. The assualts
made by Puritans upon the musical as well as other parts
of the cathedral service was answered with great
ability and power by Richard Hooker in his fa-
mous work on Ecclesiastical Polity, the first four books
of which appeared in 1584, and the fifth in 1597. From
the date of that masterly defence of the polity of the
Church of England down to the present day no mate-
rial change has taken place in the musical service of
that Church. The Lutheran and Episcopal churches,
both in Europe and America, have also a solemn service,
while the Reformed churches, the Presbyterian, and
Independent, have a plain selection of melodies to
which the metrical Psalms, Paraphrases, and Hymns
are set. There is almost universally a precentor or
leader of the sacred music in the congregation, and in
some cases a select choir or band of male and female
voices, to whom the more complex and choral compo-
sitions is left in this solemn part of the devotional exercises of
the sanctuary. For a number of years past, while Romish
churches in Europe and America have made a gorgeous
display of their musical service, which is still divided
between the chansons of the priests and the theatrical
performances of the choir, made up altogether, as a rule,
regularly trained musicians, vocal instrumentalists, who
have thus perverted most effectually the devotional
endeavors of sacred music, the Protestant churches have
aroused to a more careful training of their whole con-
gregation in the art of sacred music, that this interest-
ning and impressive part of divine worship may be con-
structed to the glory of God and the edification of his
people unto the Lord. See, however, for details, especially
on the innovations in the Protestant churches, the influence
of sacred song as exhibited in recent times in revivals,
the articles PSALMODY and REVIVAL.

III. Use of Instruments in the Church. The Greeks
as well as the Jews were wont to use instruments as ac-
companiments in their sacred songs. The converts to
Christianity accordingly must have been familiar with
this mode of singing; yet it is generally believed that
the primitive Christians failed to adopt the use of in-
strumental music in their religious worship. The word
.setStroke, which the apostle quotes in Eph. v, 18, has been
taken by some critics to indicate that they sang with
such accompaniments. The same is supposed by some
to be intimated by the golden harps which John, in the
Apocalypse, put into the hands of the four-and-twenty
electors. But if this be the correct inference, it is strange
indeed that neither Ambrose (in Ps. 4, Pref. p. 746), nor Bede
(in Ps. ci, vol. ii, p. 713), nor Jerome (Ps. ci, vol. v, p. 131), in the noble encomiums which they severally pronounce upon music, make any men-
tion of instrumental music. Basil, indeed, expressly
condemns it as ministering only to the deprecated pas-
sions of men (Hom. iv, vol. i, p. 38), and makes it
instituted in its stead the use of the harp. In the time
of Constantine the Great the Ambrosian chant (q. v.)
was introduced, consisting of hymns and psalms sung,
it is said, in the four first keys of the ancient Greek.
The tendency of this was to secularize the music of the
Church, and to encourage singing by a choir. The
general introduction of instrumental music can certain-
ly not be assigned to a date earlier than the 5th and 6th
centuries; yea, even Gregory the Great, who towards
the end of the 6th century added greatly to the existing
Church music, absolutely prohibited the use of instru-
ments. Several centuries later the introduction of the
organ was not accompanied with the use of musical
companiments for Christian song, and from that time to
this they have been freely used with few exceptions. The
first organ is believed to have been used in Church ser-
vice in the 13th century. Organs were, however, in use
before this in the theatre. They were never regarded with favor in the Eastern Church, and were venom-
ously opposed in some of the Western churches. In Scot-
land no organ is allowed to this day, except in a few Episcopal churches. See MUSIC, INSTRUMENTAL. In the English convocation held A.D. 1562, in queen Elizabeth's time, for settling the liturgy, the retaining of organs was carried only by a casting vote. See ORGANS, IV. SACRED MUSIC as a Science.—A certain sort of music seems to have existed in all countries and at all times. Even instrumental music is of a very early date; representations of musical instruments occur on the Egyptian obelisks and tombs. The Hindū, Chinese, and Japanese music is probably what it was thousands of years ago. The Chinese, whose course of life is practically unpleasant to refined ears, have some sweet-toned instruments, and a notation for the melodies played on them which is sufficiently clear. Their history and fables touching the art antedate by many centuries those of classic nations. The higher style of Oriental music, which has a limited degree of melodic merit, with rhythms logically and distinctly drawn from consociation with poetry as refined and liquid as the Italian, may be found in that of India, dating also from remotest antiquity. The poetical legends of Hindoo, and indeed of all Southern Asia, rival those of China and Greece in sacribing fabulous effects to music. The sacred art of music considered as a science from heaven, and while their inferior deities communicated other arts, it was Brahma himself who presented music to mortals. The music of the Hebrews is supposed to have had a defined rhythm and melody. The Greeks numbered music among the sciences, and studied the mathematical proportions of sounds. Their music, however, was but poetry sung, a sort of musical recitation or intoning, in which the melodic part was a mere accessory. The Romans borrowed their music from the Etruscans and Greeks, and had both stringed instruments and wind instruments.

The music of modern Europe is a new art, to which we shall have to return. We have to examine among the nations of antiquity. We look therefore to the early music of the Christian Church, to whose fostering influence during several centuries the preservation and progress of art was due, for the foundation upon which the modern system is built. The early music of the Christian Church was probably in part of Greek and in part of Hebrew origin. The choral was at first sung in odes and unisons. St. Ambrose and Gregory the Great (500-604) directed their attention to its improvement, and under them some sort of harmony or counterpoint seems to have found its way into the service of the Church. The hymn was the first contrapuntal chant, upon the broad foundation of which the music of the Church rested for several centuries. Further advances were made by Guido of Arezzo, to whom notation by lines and spaces is due; but the ecclesiastical music had still an uncertain tonality and an uncertain rhythm. Franco of Cologne, in the 12th century, first indicated the duration of notes by diversity of form. He and John of Muris in the following century contributed greatly to the more rapid progress of sacred music. It is during their period of Christian ecclesiastical life that modern music first attained the character of a distinct art. We are not without hints that music had feelings for its emotions. Its style was at that time serious, grand, and full of expression only when taken as a whole; and as the Church would not renounce the few melodies which had long been used, art could exert its power only on the harmonies by which they were embellished. The consequence was that many imitators adopted an artificial, dry, and learned kind of music, with no relation to all its life from some secular airs mingled with it. The Synod of Trent entreated the pope that he would devise some plan by which this state of things might be improved. Marcellus II accordingly disclosed his views to an enthusiastic young man, and soon after, under Julius II, under Paul IV, under Palestrina, the world his Missa Marcelli (1558). This was the commencement of a revolution in sacred music, which by his influence became simple, thoughtful, aspiring, sincere, and noble, but destitute of passion and tenderness. The most spiritual of all arts, it raised the heart into immediate communion with the Infinite, and, while celebrating the mystery of the divine sacrifice in the different parts of the mass, as if it was spiritually set, it found opportunity to express and to elevate, by its various combinations of sounds, every kind of Christian feeling. The centre of this school was the papal chapel, and its last creative master was Gregorio Allegri (1640), whose Missa pueri, composed for a double choir, expressed with wonderful simplicity all the calm and profound sufferings of a Christian heart beneath the Saviour's cross.

The invention of the organ, and its use in accompanying the choral, had a large share in the development of harmony. Along with the music of the Church, and independently of it, secular music was making gradual advances, guided more by the ear than by science; it seems to have had a more decided rhythm, though not indicated as yet by bars. The airs which have become national in different countries were developments of it, but it had its chief seat in Belgie Gaul; and the reconciliation of musical science with musical art, began to be considered, and the cultivation of the arts as a whole was completed in the 17th century by Palestrina and his school at Rome, and reacted eventually on the ecclesiastical style. "Medieval Church music," says Prof. Paine, "did not fulfil the entire mission of the art, for it failed to embrace within its scope of expression all the nature of man, leaving out an important element of artistic representation—his earthly acts and passions. It was reserved for secular music to supply this want. Music can also express outside of the Church the highest principles of religion and morality, as they influence the sentiments and actions of men. The Reformation of the 16th century was undoubtedly the means of giving to the secular and popular music of modern times, which previously had been ignored and held in contempt by the educated musicians and ecclesiastics; and in Germany the Reformation was also the source of a new style of sacred music of popular origin. During the absolute reign of medieval counterpoint the sense of melody which existed later in the songs of the troubadours and minnesingers, and other popular melodies of a very early date, was almost wholly lost, and consequently melody had to be discovered again, so to speak, about the year 1600. It was not the learned musicians, but mere dilettanti, who took these first steps on a new road of music. The incidental and immediate connection between music and art led to an ardent desire on the part of cultivated men to restore Greek tragedy. Enthusiasts painted its splendors in glowing colors. They believed that modern counterpoint could not compare with ancient music, either with respect to the simple beauty of the melody or the comprehensive clearness and literal expression of the words. This idea of restoring the ancient drama and music was first advocated at the meetings of a school of scholars and artists at Florence. The names of Vincenzo Galilei, Caccini, Cavaliere, and Peri have come down to us as associated with these efforts. The results were in the musical creation of the 17th. As the result of their efforts they unfolded a new element in music, the modern recitative, out of which the air was gradually developed. It is true the heavy and monotonous recitative which the Florentine dilettanti had introduced remained for a time a doubtful experiment; yet the love for dramatic representations helped to sustain the new form amid the forgetfulness of all the grand. As the new style spread the oratorio spread. The oratorio spread, and the world was agitated, as it was by the birth of the world's music. The opera, which thus appeared nearly con-
temporarily with the Reformation and revival of letters (about 1600), greatly enlarged the domain of music. Italy advanced in melody, and Germany in harmony. Instrumental music in this way came to occupy a more prominent place, and the influence of the organ began to be felt. The influence of the opera was very marked. It brought about the introduction of solo singing and instrumental accompaniment into sacred music, and in consequence the strict ecclesiastical style was greatly modified. In the course of the 18th century Italian Church music had wandered so far from the chastity of Palestrina as to lose its sacred style almost wholly. These innovations in the field of music brought about a conflict with the old ecclesiastical style, which struggled in Rome to maintain its ground. The consequence was that the school of music founded by Neri began to perform in the oratorium pieces relating to subjects from sacred history. In this way came into existence the oratorio, intermediate between the ancient and modern styles of music, and more distinctly expressive of precise characters and situations, more agreeable in its melodies, and richer in its instrumental accompaniments (comp. Hase, Ch. Hist., p. 465). Not only on the Continent, but also in England, this species of sacred music made its way. During the changes introduced there in ecclesiastical music at the Restoration the school of Purcell (q.v.) had arisen. This paved the way for the oratorio, and a little later England adopted the German Handel, who was the precursor of Haydn, Mozart, and Beethoven as the greatest of musical masters, though they exercised their gifts in almost every noble form of musical composition, dedicated their genius especially to the pure and sublime themes of religion. Handel's forty operas are almost forgotten; his long career as a dramatic composer, however, served as an excellent school for his oratorios, and his triumphs in the field of oratorio music were but the natural fruits of his previous discipline. Handel's strength of character and sincere faith rendered him fully worthy as a man, as well as an artist, to create such works as the Messiah and Israel in Egypt. These masterpieces are not mere lyric and dramatic works; they possess a grand objective and ideal character, comparable only to the greatest works of art; to the Greek drama or the Romantic tragedies of Shakespeare. But the oratorio we do not care to see regarded as the highest type and expression of modern Church music. As such the cantatas of Haydn (q.v.) and the oratorios of Bach can be better conceived and vividly than any other compositions a profound religious conviction. The Passion to St. Matthew has no rival in its special form. It is the most dramatic and vivid conception in art of the trial and death of Christ. Among hundreds of similar works, this is the only music that has such influence.

Here it may most appropriately be stated that all sacred music since the 16th century must be divided into two general divisions, choral and figurative music. Choral music is, in its original form, Church singing only, in which the melody is solemnly slow. It is devoid of ornament, and not bound to a strict observance of the text. The Psalms of David, the Latin and German Piae Noctes, pieces with accompaniment of instruments, and arose from the choral melodies arranged for four or more voices, and having for their theme hymns, psalms, or passages of Scripture. From the signs or figures used in the different parts, and which were not used in choral music, this style received the name of figurate. The organ was generally used in it to conduct and assist the voice, and subsequently stringed and wind instruments were gradually added. At first the instruments were used only to give the tone to the singers. At the Reformation the Calvinistic Church entirely rejected the use of instruments. The ancient Italian masters, such as Palestrina and Orlando di Lasso, composed no instrumental music. Yet Luther introduced the custom of having chorals executed by instrumentalists. The general use of the organ for accompaniment dates from about the year 1640. Figurate music and choir singing, as distinguished from congregational singing, appears already in the fugges and motets of the 14th century, in which, after one part had commenced the singing, it was taken up by the others. The organ was never finally taken up again by the first, and so on to the end. We find it also in many compositions of the times of the Reformation, as, for instance, in the festive songs of John Eccard († 1611). Hammerschmidt († 1675) gave to this style a fuller development, and entitled it by the name of modern organ music. In Italy in the 18th century, the appearance of the organ, as we have seen above, was not without influence on sacred music, which gradually acquired a more secular style. Besides, this also led to the use of musical instruments in the churches. From Italy the custom was introduced into Germany by John Prorius († 1621) and Henry Schütz († 1650), and thus gave rise to the concerto, in which John Sebastian Bach particularly distinguished himself, and of which we have spoken above. By all these innovations it is believed the old solemn style of sacred music lost ground, and the oratorio itself gradually turned more to the operas. Mozart and Beethoven wrote sacred music in precisely the same style as operas. On the other hand, the Roman clergy did not better the position by returning to the ante-Palestinian mode of chanting masses, and this was not without a certain influence again in making the sacred music of the Protestant churches more secular. The importance of instrumental music was also increased; overtures and sonatas were often played on the organ before and after service. It is only with the revival of evangelical piety that a change commenced to be perceptible in sacred music: it was brought about mainly by the efforts of such composers as C. F. Becker, J. C. H. Rik, C. W. Körner, and by the collection of classical pieces for the organ published by Kocher, Silcher, and Frech in 1851. The ancient figurate pieces were remodelled by such composers as Rück, A. W. Bach, C. G. Reissiger, Silcher, Frech, Palmer, etc. In this country Lowell Mason (q.v.) may be said to be the father of Christian Church music. He is certainly the founder of the American school of sacred song, though it should be borne in mind that our musicians, especially composers, are very largely influenced by European culture, particularly German. guments on the affirmative. Following so closely after the historical discussion furnished above, the inquiring student will be the better able to judge for himself whether the use of instruments may be used in Christian worship.

1. Against the use of instruments in Christian church-
can the following reasons may be urged:
    1. There is no warrant in the New Testament for their
use. (a) There is no example of such by Peter, Paul, John, James, or the Master himself, nor by any others in the apostolic age; nor have we any in the first three centuries; nor until the mystery of iniquity was strongly
ly at work. (b) We have no command either to make or to use them. It is claimed that ἡλοντος in Eph. v. 19 requires playing on strings; but that is expressly declared to be done in the heart. (See in a following paragraph.) (c) We find no directions, formal or inci-
dental, for theirs, while we have line upon line about singing—what to sing, when to sing, how to sing.

2. Instruments were not used in the worship of the anc-
tient synagogue. They belonged to the tabernacle and the Temple, especially the latter; but were never in the congregational assemblies of God's people. The trumpet and other loud instruments were used in the synagogue, not to accompany the psalm, but in cele-
brating certain feasts (Lev. xxviii; Numb. x, 10; Psal. lxxvi, 3). There was a feast of trumpets (Lev. xxiii, 24; Numb. xxiii, 1). They were used for proclamation, in going to war, in moving the camps, in assembling the congregations, as well as in triumphs, coronations, and other extraordinary occasions (Numb. x, 1–10; Lev.
xxxv, 9; 1 Kings i, 34; Joel ii, 1; Jer. vi, 1 et al.). Such celebrations resembled our day of Independence, but were much more devotional, and withal ceremonial in their meaning. Conrad Iken tells us that the Sabbath-
day was introduced with blowing trumpets at the syna-
gogues six times. At the first blast they dropped the instruments of husbandry, and returned home from the field. This was on Friday evening, as we call it. At the second blast they closed all offices, shops, and places of business. At the third blast pots were removed from the fire, and culinary occupation was suspended. The other three blowings were to designate the line be-
tween common and sacred time. All of these uses, though connected with the worship, were entirely dif-
ferent from the psalmody in which they were used at the Temple: but (a) No hint is given in Old Testament or New that instruments were ever used in the syna-
gogues, say the Talmud, Spinoza, and Jahn. (b) Apart from the organ or any other instrument in their syna-
gogues; only Reformed or Liberal Jews have introduced the or-
gan and many other innovations. (c) Archaeologists (Prideaux, Jahn, Calmet, Townsend, etc.) make no mention of instruments in the worship, while they de-
scribe the Temple as the forerunner of the Christian Church and Hahn particularly notices the singing of the doxologies, such as Psal. lxxvi, 18; lxxvi, 1; xevi, 6; and exiii, 1. Iken gives four doxologies for the Sabbath, but no or-
gan or harp.

3. The early Reformers, when they came out of Rome, renounced them as the monuments of idolatry. Luther called the organ an ensign of Baal; Calvin said that in-
strumental music was not fitter to be adopted into the Christian Church than the incense and the candlestick; Knox called the organ a kist [chest] of whistles. The Church of England revived them, against a very strong protest, and the English dissenters would not touch them.

4. The instruments of the former economy were cere-
monial. This is probably the chief reason for their use in the Temple. They were not merely figurative, like bread, water, wine, light; nor merely typical, like Isaac, David, Solomon, and the rest; but figurative, typical, and ceremonial, as appears thus: (a) They de-
pend on the priesthood. The trumpet was the leading instrument—master of the whole; this be-
longed exclusively to the priest (Numb. x, 9; xxxi, 6; Josh. vi, 4; 2 Chron. xxiii, 12, 14). The smaller in-
struments belonged to the Levites, whose station was adjoin-
ing the priests (1 Chron. xxiii, 28; xxxv, 1–8).

1. In the worship, as well as in celebrations, both were
used. It is interesting to note these uses: (pp. 35, 40; 1 Chron. xiv, 14–29; 2 Chron. v, 12, etc.). They were melodic on the priestly. (b) They were combined over the sacri-
fices (see especially Numb. x, 10; xxxix, 1, 2, etc.; 1 Chron. xv, 26; 2 Chron. vii, 5, 6; xxvi, 25–28; xxx, 21, etc.; Ezra iii, 4, 5, 10, 11; Neh. xii, 43; comp. ver.
27, 35, 36, 41, 43–47). (c) They belonged to the na-
tional worship of the people (Exod. xx, 29; 2 Sam. vi, 15): "All the house of Israel" (1 Chron. xiii, 5, 8; xv, 3, 28; 2 Kings iii, 13–15; Psal. lxviii, 25). So it had been arranged from the first (1 Chron. xxxv, 1–8), and so carried out to the last (Neh. xii, 45). Inciden-
tial events, as well as set forms, show the same connec-
tion: the "company" in 1 Sam. x, 5 were coming down from the high-place, and those in Isa. xxx, 29 are go-
ing up to it. David's individual harp was like his songs, a preparation for the Temple; and the incident of 2 Kings iii, 15 was a national affair. Hence (d), even when introduced as symbols in the Apocalypse, they are grouped with their usual ceremonial accom-
paniments. Trumpets are not there presented as part of
the music, though prominent for other uses. The
"harpers" have their "vials full of odors," stand with the Lamb that had been slain, are on the sea of glass, and sing the song of Moses and the Lamb. They have been called upon, and are in their place in their city of Je-
rusalem, their Temple and its pillars, their pillars of can-
dlesticks, ark of the covenant, altar of incense, golden
Censer, pot of manna, cherubim, white robes, palm-
branches, with other things which have passed away

5. Instrumental music is incompatible with directions
for singing given in the N. T. (a) Heb. xiii, 15: "Let

us offer the sacrifice of praise, that is, the fruit of
the lips." This exhortation is given in terms of the O. T.
(Psa. I, 14; lxxix, 30; cavi, 17; Hos. vii, 2, Sept.), yet the formal definition of praise makes it the produc-
tion of the mind, not the heart. (b) St. Paul, "be not drunk with words; but speaking the truth in love, let all utterance be such as
"Sing singing and making melody (ὑπολονετος, touching the chords) in the heart to the Lord." Praise requires more than the mere "talk of the lips" (Prov. xiv, 23); but the accompaniment is not an instrument in the hand, but a living organ of some sort. (c) Col. iii, 15: "Sing
with all your heart. And therefore every one of you, in your heart sing-give thanks to the Lord."
(d) The passage "grace" answers exactly to ἡλοντος—
touching the chords in the heart; both passages har-
monize in requiring something besides the voice, as do
many others. But that something is not a machine in
the hand.
What is it? What was symbolized by all these numbers of organs, harps, trumpets, without life giving sound? The general idea of Christian people is that they all were intended to repre-
sent grace in the heart—the working of a regenerated soul in gratitude to God. Hence the martyr's exclama-
tion, "O for a well-tuned harp!" and the prayers of godly people for their hearts to be put in the harp.
John Bunyan's account of Mr. Fearng, who was always play-
ing on the base, with many such allusions, chime in
exactly with the whole idea of acceptable worship (John iv, 24, "in spirit and in truth"; 1 Cor. xiv, 15, "I will sing with the spirit").

Until further considerations are supported by the following considerations:
(a) In the passages above cited "grace" in one

10. The smaller in-

2. In the following paragraph.

3. In the passages above cited "grace" in one

10. The smaller in-

MUSIC

that the vials of "odors" do to prayer. 1 Cor. xiv, 15:
"I will pray with the spirit" (Psa. exi. 2; Rev. v, 8;
iii, 3, 4). (d) They are eminently adapted to repre-
sent "grace" in a variety of aspects. Take the follow-
ing instances: (1) To the devout philosophy of the
no concern here, but with the instruments of praise): (1)
They represent grace as it deals with the deepest
motions of the affections, both in sorrow and joy. In
Isa. xv and xvi we have the workings of pity, even to
hopeless commission, winding up with this: "My
bowels shall sound like a harp for Moab," and like
expression in Isa. xvi, 7: ". . . for Moab; . . . the
margin; comp. Jer. xxxii, 4 with Job xvii, 6.
They combine the deepest mixture of sorrow and joy (Gen.
xxx, 27; Ezra iii, 10). The change of feeling is some-
times very sudden (Job xxx, 31; 1 Chron. xxiii, 8-11;
Rev. xviii, 19-22). The same sound will give sorrow
to one and joy to another at the same time (1 Sam.
xxvii, 6-9; Psa. cvi, 9-18; xxvii. 6-9, with Rev. i, 7).
(2) They represent the countless variety of gracious
experiences, with their wide range of degrees and im-
perfections, from Bunyan's "Mr. Fearing" up through
tenor, alto, and treble, with ledger-line above the clouds
(2 Tim. iv, 6-8) The combinations of musical notes
amount to millions of the harp. A harp of a thousand
strings is a low approximation to playing on the chords
of the heart to the Lord. (8) They represent grace es-
pecially in its pleasurable aspects—pleasing and being
pleased (Psa. xcviii, 1-4). Godly sorrow is real sorrow;
the other, though prompted by God, is not. Still the
power predominating, both in music and in grace, is joy
(Rev. xiv, 3; xv, 8). During the battle,
long before the triumph, the tabret and harp are heard
amid the din of war (Isa. xxx, 32). The believer is
sometimes a captive, and then he suspends his harp on
the pillow, because for sorrow he has no joy (Psa.
xxvii, 2). In every case short of this he can joyfully
touch the chords in the heart (Isa. xxxviii, 20; Hab.
iii, 17-19). (4) They represent all this grace in the
heart as something that has been put there (Psa. iv, 7).
The natural melody of the soul is lost in the fall—the
strings are broken: "Ye must be born again." The
Ethiopian treasurer, when born of water and of the
Spirit, went on his way rejoicing. Spiritual joy is not
natural, but gracious; neither is it unnatural, it fits the
place; it is supernatural, restoring the soul to its ori-
ignal, and with greater security (Isa. xxxiv, 10, "Ever-
lasting joy upon their heads"). Ezek. xxviii, 13 gives
soundings of the same (Ezek. xxviii, 13). There are
heavy tabrets and of pipes, etc. There is textual
difficulty here of any ordinary breach; but whether the
personage addressed be Ithobal, or Adam, or Abaddon, it
illustrates the case in hand; each had the power of
music concreted with him—especially Lucifer, son of the
morning. There was a time when the morning-stars
sang together, Apollyon with the rest. Such tabrets
and pipes must have been of a spiritual nature, as they
were of exquisitie "workmanship" (Eph. ii, 10, "We
are his workmanship, created in Christ Jesus unto good
works"); so also Gal. vi. 15; v. 6). The new creation
presents itself to us in the person of a human way of
life by the music of Moses and the Lamb (Psa. cxxix, 54; xl. 8;
Rom. vii. 22; Heb. x. 9). The renewed soul sings that
song which no other can learn. Such a one has the
melody belonging to instruments of very honorable
name (1 Chron. xvi, 42; 2 Chron. vii, 8; Rev. xv, 2;
Isa. xxxviii, 20; Hab. iii, 19; Psa. lxi, 7, "My heart
is prepared—I will sing and psallam," Sept.). (5) They
represent grace in its perfection—the sublimity of heav-
ily joy. Light has its own kind of sublimity; hence
we read of "the inheritance of the saints in light." Light
reveals objects at a distance; music carries us far;
Music is incomparable unless it be intermingled
Together. Ezekiel's mellifluous oratory could not be il-
ustrated by the one without the other (Ezek. xxxiii, 32).
The Temple music represented very fitly the joy of
that house where the sweet Singer will preside, the
glory of which eye hath not seen nor ear heard; it is
"reserved;" yet it is "prepared" for them that love
him; where song and harp and organ blend with sweet
odors; while they sweep the chords of the heart to the
LoRD.use 5

II. In favor of Instrumental Music for Churches, it may
be replied that the above considerations, however
plausible in general and often beautiful in sentiment,
are rather speculative than logical. But more particu-
larly, it is not sufficient to show that such performances
were not customary or known in the sacred services of
the primitive Christians if we would authoritatively
exclude them, it must be proved that the N. T. positi-
vely forbids, or by direct implication disentenches
them. There are many practices of modern times
which are perfectly lawful, proper, expedient, and edi-
ifying, which were not known in the earliest days of
Christianity. Such an argument would repudiate Sun-
day-schools and numerous well-approved institutions of
the present day. Our Saviour and his apostles pur-
pose left all these immaterial questions and detailed
arrangements discretionary with the Church, and it is
best they should so remain. Times change, and reli-
gious observation does not always follow without strict
prescription, but may even be necessary. A few cases
are not absolutely prescribed, must be modified accord-
ingly.

We might justly add, under this head, that there is
no positive proof, after all, that instrumental music did
not in any case accompany the songs of the early Chris-
tians. The evidence a saeclo is always insecure.
In no other ancient society has the Church been so
consistent on this very point. The presumption is cer-
tainly the other way, for it can hardly be presumed that
persons who had always been accustomed to associate instru-
mental music with the services of the sanctuary—as
was the case at least with the Hebrews, who formed the
nucleus of early Christianity—would have suddenly and
totally abjured this delightful and inspiring part of
divine worship under a new economy, unless there had
been some express prohibition or absolute incompatibility
respecting it. On the contrary, such an accomplishment has been found in all ages a de-
cided stimulus to devotion, and a powerful auxiliary to
the strains of vocal melody. It is so congenial with the
spirit of Christianity that the most remarkable and sub-
lime efforts of genius in this field have been those of
Christian composers and Christian performers.

Finally, therefore, to interdict these concomitants of
congregational worship is a mistake savouring of secti-
dom and intolerance. It is, more than all, an unaccord-
der, as well as an aesthetic degeneration. If the O-T.
saint could profitably employ instrumental music as a
means of grace, why should it be denied the Christian?
If David's soul took wing with celestial vigor as he
strung his lyre in accord with his devout lays, why may
not the modern saint refresh his soul with the ravishing
harmonies of the organ? The immortal productions of
Mozart and others require the full orchestra to bring out
their grandest effects, and even the ordinary songs of
the Church are greatly enhanced in their power over the
heart when properly accompanied from the choir. The
modern composer writes for one unaccompanied instru-
mant, and the experience of the first and purest believers in
ever age, whether in high or low condition, has attested
the healthful and edifying influence of instrumental
symphony, when duly subjected as a handmaid to sacred
lyrics and vocal execution.

Musical Instrumenta of the He B R E W S . The obscenity attac-
ings to this subject has long been felt and complained
of. The rabbins themselves know no more of this matter than other commentators who are
least acquainted with Jewish affairs. The older writ-
iers on the subject had no means of asking their
questions with modern science and actual instruments in use, either among the Hebrews
themselves or in the neighboring nations. But much
light has of late been thrown, by the discovery of
Egyptian and Asyrian monuments, upon the instru-

Digitized by Google
ments which were used by these two great peoples—the nearest neighbors of the Hebrews, and with whom, at different periods of their history, they came into close and long-continued contact; and we have now the advantage of being able to infer, with a high degree of probability, if not with absolute certainty, from these collateral examples what were the forms and powers of at least the principal instruments referred to in the Hebrew Scriptures. This recent enlargement of our knowledge, however, still leaves much room for further light, especially in regard to the precise instruments intended by particular Hebrew words. There is yet much difference of opinion among Hebrew scholars and antiquarians upon this point of primary importance; and indeed, in the absence of all direct means of identification, and of any clear and steady tradition among the Jews themselves upon the matter, it is hardly to be expected that the obscurity which still encumbers this part of the subject can ever be entirely removed. We see certain instruments different from our own in use among the modern Orientals, and we infer that the Hebrew instruments were probably not unlike these, because the Orientals change but little, and we recognise in them the peoples, and among them the habits and the manners described in the Bible. We find also many instruments presented in the sculptures of Greece and Rome, and we need not refuse to draw inferences from them, for they derived their origin from the East, and the Romans distinctly refer them to Syria (Juvénal, Sat. iii. 164; Livy, Hist. xxxix. 5). When, however, we endeavor to identify with these a particular instrument named by the Hebrews, our difficulty begins, because the Hebrew names are seldom to be recognised in those which they now bear, and because the Scriptures afford us little information respecting the form of the instruments which they mention.

I. Stringed Instruments.—We begin with these, because upon almost all occasions of the use of instrumental music, either in public or private, we find them occupying the principal place; while in point of antiquity of date they were not inferior apparently to other instruments of a simpler and ruder character chief varieties of this class of instruments may be arranged as follows:

1. The הָרִ֥זֵ֫ן, kihmôr, commonly translated in our version karp; in the Sept. κῆρος; Chald. קָרָ֩פָא; Dan. iii, 5, 10, וּשְׁרֵפָ֣א. This is the stringed instrument ascribed to the invention of Jubal, and the only one referred to by Laban in his remonstrance with Jacob (Gen. xxxi, 27). It is mentioned among the instruments used by the sons of the prophets in their schools (1 Sam. x, 5); and it was the favorite instrument of David, of which he became so celebrated a master. In the first ages the kinnor was consecrated to joy and exultation, hence the frequency of its use by David and others in praise of the divine Majesty. It is thought probable that the instrument received some improvements from David (comp. Amos vi, 5). In bringing back the ark of the covenant (1 Chron. xvi, 5), as well as afterwards at the consecration of the Temple, the kinnor was assigned to players of known eminence, chiefly of the family of Jeduthun (1 Chron. xxv, 5). Isaiah mentions it as used at festivals along with the nebél; he also describes it as carried round by Badiades from town to town (xxiii, 16), and as increasing by its presence the joy of vintage (xxiv, 8). When Jehoshaphat obtained his great victory over the Moabites, the triumphal entry into Jerusalem was accompanied by the nebél and the kinnor (2 Chron. xx, 27, 28). The sorrowing Jews of the captivity, far removed from their own land and the shadow of the sanctuary, hung their kinnors upon the willows by the waters of Babylon, and refused to sing the songs of Zion in a strange land (Psa. xxxviii, 2). Many other passages of similar purport might be adduced in order to fix the use of an instrument, the name of which occurs so often in the Hebrew Scriptures. They mostly indicate occasions of joy, such as jubilees and festivals. Of the instrument itself the Scripture affords us little further information than that it was composed of the sounding parts of good wood, and furnished with strings. David made it of the bôrkô wood, or cypress ("frû"): Solomon of the more costly algum (2 Sam. vi, 5; 2 Kings x, 12); and

Various forms of Egyptian Harps.—Rosellini.

(Gen. iv, 21). The common name for all such instruments in Hebrew is הָרִ֥זֵ֫ן (negimoth), from a root denoting to strike, like the Greek root φακτίζω, to strike, which yields in like manner φαλχίζων, with a like general meaning. But in this genus were included a great variety of species of stringed instruments, some of which are of constant occurrence in the Old Testament; while others are limited to those books which belong to the period of the Babylonish captivity, and are to be regarded rather as Babylonian than Hebrew instruments. Keeping this distinction in view, the

Josephus mentions some composed of the mixed metal called electrum. He also asserts that it was furnished with ten strings, and played with a plectrum (Ant. xi, 12, 5), which however is not understood to imply that it never had any other number of strings, or always played with the plectrum. David certainly played it with the hand (1 Sam. xvi, 28; xviii, 10; xix, 2), and it was probably used in both ways, according to its size.

Kitto (Pict. Bible, note on Psa. xili, 4) demurs to its being regarded as a karp, and argues at great length
in favor of its being a lyre; the chief difference of these two being that, while in the harp the strings were free on both sides throughout their whole length, in the lyre they were carried in part over the sound board, and could not, from the part of their length only being struck on one side with one of the hands. But it is obvious that a difference of this kind was only a modification of form, and did not involve any essential difference in the principles of construction. The main principle of construction was the same in both instruments, viz. the production of differences of sound by differences in the length of the strings, whatever modifications of form might be used in order to obtain this difference of length, and whatever modifications of size and shape might be called for, when the instrument was to vary in power, and according as it was to be employed either in solo or in choir. The lyre was only a modification of the harp. Even in Greek the words κιθάρα and λύρα were anciently used convertible, as Dr. Kitto admits; and it is highly improbable that the Hebrew word קסֹר did not originally include all instruments of the harp kind, whatever might be their differences in size or shape, or subordinate arrangement. Harps for solo use would usually be made portable and light. Those intended for choral performances in the Temple service would probably be made large and powerful, so as to stand upon the ground when played instead of being carried. Some would have a larger, some a smaller number of strings, according to the degree of perfection wanted. In fact all these varieties are actually to be found upon the Egyptian monuments, and we see no good reason why the same generic name might not be applied to them all. The most eminent musicians are clearly of this mind. While Gesenius defines קסֹר to be a species of harp, Winer gives it as the single word harp, Winer expresses himself in such a way as to indicate an opinion that the Hebrew instrument so named might be either harp, lyre, or lute. Engels leans to the same opinion as Dr. Kitto, but does not appear to have added anything to the arguments by which the latter has sought to support it. "It is uncertain," he thinks (p. 281), "which of the Hebrew names of the stringed instruments occurring in the Bible really designates the harp." Still he thinks also that the קסֹר, the favorite instrument of King David, was most likely a lyre; although he owns in answer to the question "can it be given in support" of this opinion "it is certainly far from conclusive." When he urges that the קסֹר was a light and very portable instrument, that king David, according to the rabbinical records, used to suspend it during the night over his pillow; and that all its uses mentioned in the Bible are especially applicable to the lyre rather than to the harp—these considerations are all such as have already been fully met in the observations made above; and it is answer enough to them to refer the reader to the accompanying monumental illustrations, which make plain and certain that the harps and harpists were extremely various in size and shape, and that some of these varieties were as light and portable as the lyre itself.

The approximate illustrations of the קסֹר, or harp, supplied by the Egyptian and Assyrian monuments are very copious and interesting, and we cannot err far in supposing the various modifications of the Hebrew instrument to have been substantially the same as those in use among their neighbors. The most ancient form of the קסֹר was probably the bent or curved form, agreeably to the etymology of the name, which according to Fürst (Hebräisches und Chaldäisches Handwörterbuch) is derived from a root signifying to make in the shape of a bow or curve. Egyptian harps of this shape are represented in the first of the accompanying illustrations (p. 764), and are remarkable for their differences of size, arrangement, and power, two of the specimens having as many as thirteen strings, one nine, and only three; while one is light and portable, and the rest so large and heavy as to require to rest on the ground. It was by a natural transition that the curved form gave way in many cases to the triangular, such as we see in our next series of illustrations. Nearly resembling these ancient Egyptian forms of the portable harp is the shape of the ancient Persian 창, and the Arabic junk of the present day; and we are disposed to agree with Engel that this triangular instrument is most likely the trigonon, or triangle, mentioned by several classical authors. "Burney," he remarks, "in his History of Music, gives a drawing of a trigonon with strings. He does as that it is called by Sophocles a Phrygian instrument, and that a certain musician, of the name of Alexander Alexandrinus, was so admirable a performer upon it, that when exhibiting his skill in Rome he created the greatest furor. Burney further remarks, 'The performer being a native of Alexandria, as his name implies, makes it probable that it was an Egyptian instrument upon which he gained his reputation at Rome'—an opinion which is corroborated by the discovery of the instrument shown in our engraving. The representations, it is true, of the Grecian trigonon, given in our histories of music, exhibit it in the shape of a Greek delta, with three bars. In the Egyptian instruments the third bar, it will be observed, is wanting; but no ancient examples have been produced of the trigonon with three bars, and the representations referred to are probably only imaginary." Perhaps we have a still nearer approximation to the Hebrew harp in the two triangular instruments from the Assyrian sculptures. These harps are of very frequent occurrence on these Oriental monuments, showing that this form of the instrument was a favorite one. One of the two represented on the following page has twenty-one strings, the other has twenty-two strings; and it is a remarkable difference of construction as compared with the Egyptian specimens that the sounding-board forms the upper part of the instrument instead of the lower, while the reader will also observe openings for the escape of the sound. The ancient harp was sometimes played with a plectrum; but in all the Egyptian and Assyrian specimens now given it will be noticed that no plectrum occurs, but the instruments are all played with the hands, as we always figure to ourselves David handling his favorite harp. This Assyrian harp is probably the nearest approximation to the harp of the royal psalmist which we shall ever be able to reach. Remembering that the קסֹר is one of the instruments mentioned by Lebon in common use in the country of Judah, we cannot but suppose that the harp which was used by the descendants of Jacob bore a closer resemblance to those which are figured upon the monuments of Mesopotamia than to those of the Egyptian monuments. See HAR.
2. The ἱβ, nebel, probably the Greek νηβλιον (νηβλα, νηβλη, νηβλα, or νηβλας) and the Latin nobilium (nobilum or nobilis). The word is rendered “psaltery” in the A. V., in imitation of the Sept. translation of the Psalms and Nehemiah, which renders it by παλτισαρ, with the exception of νηβλος in Psa. lxxvi, 22, and εἰδήρα in Psa. lxxxi, 2. The Septuagint in the other books in which the word occurs renders it by νηβλα or, with a different ending, νηβλον. The Greek rendering παλτισαρ evidently connects this instrument with the Chaldee יַיִשׁ (Dan. iii, 5, 7). The first mention of it is in the reign of Saul (1 Sam. x, 5), and from that time forward we continue to meet with it in the O.T. It is, however, not found in the 2d chapter of Daniel, where mention is made of so many instruments; whence we may infer either that it did not exist among the Babylonians, or was known among them by another name. It was played upon by several persons in the grand procession at the removal of the ark (1 Chron. xvi, 16; xvi, 5); and in the final organization of the Temple music it was intrusted to the families of Asaph, Heman, and Jeduthun (1 Chron. xxv, 1—7); Asaph, however, was only the overseer of the nebelists, as he himself played on a different instrument. Out of the worship of God it was employed at festivals and for luxurious purposes (Amos vi, 5). In the manufacture of this instrument a constant increase of splendor was exhibited. The first we meet with were made simply of the wood of the beroth (2 Sam. vi, 5; 1 Chron. xii, 8), others of the rarer adjus tree (1 Kings x, 12; 2 Chron. ix, 11), and some perhaps of metal (Josephus, Ant. i, 8, 3), unless the last is to be understood of particular parts of the instrument.

The nebel was an instrument apparently much resembling the kinnor in its nature and properties, though considerably different in form. According to Josephus (Ant. vii, 12, 18) it had twelve strings, which were played upon the hand. One variety of it had only ten strings, and was distinguished as νηβλος, and from an expression in Isa. xxii, 24 — ἱβ οὐκ ἔχειν, all manner of nebel instruments—we gather that the instrument, like the harp, was used in various sizes and shapes. What its distinctive form was—preserved, no doubt, in the main, in all its varieties—cannot be determined with certainty. The etymology of the name, like that of kinnor, suggests a curved shape like that of a leathern bottle; but whether it was so called because the whole instrument was of this shape—like the lyre, which is occasionally described by the Latin poets as the lyra curva—or because only a part of it was thus curved, viz. the sounding-board, as in the lute or guitar, it is impossible to decide. It is here we begin to feel the difficulty before referred to of identifying the Hebrew names with particular instruments. Kitto, as already noticed, pleads strongly for identifying it with the harp, while assigning the name kinnor to the lyre; but ancient authorities are opposed to this view, and he lands himself in the difficulty of being unable to find any Hebrew name at all for the lute or guitar, which he notwithstanding admits to have been in common use along with the lyre and harp. We cannot see, moreover, that anything is gained or any difficulty removed by adopting this opinion. We prefer to leave it a doubtful question whether the nebel was a lyre or a lute, or even some other form of stringed instrument, like that, for example, represented in the above illustration, derived from the Assyrian monuments. The only certain proof we possess of a lyre-like instrument having been in use among the Hebrews is the adjoining figure upon a coin of the times of the Maccabeeae. That either lutes or stringed instruments resembling the Assyrian ones just alluded to were employed by the Hebrews is a matter only of probable inference, from the fact that such instruments were in common use among the neighboring nations; we have no direct proof of it. Examples of lyres of various shapes and capabilities are shown on the monu-

Jewish Lyre. (British Museum.)

Egyptian Lyres: Fig. 1. Played with plectrum; 2. Played with fingers. (Paintings at Thebes.)
the East must have had some considerable differences in form and properties from either the classical lyre or lute, as it was known and distinguished among the Greeks and Romans by its Oriental name, which the Greeks slightly altered into νιμα or νιμανος, and the Romans into nymbium. See Psalms.3.

3. The נַסַּבָּת, sabbath, or "sackbut" of our version, is the third instrument in the list in Dan. iii, 5, 7. That this was a stringed instrument is certain, for the name passed over into Greek and Latin in the forms σαμβασκα and sambac, female performers on it from the East, called σαμβασκεα, sambacina, and sambacistria by the classical authors, visited the cities of Europe, and found their way as far as Rome; and the instrument is de-

scribeb by Athenaeus (iv, 175; xiv, 683) as a harp-like instrument of four or more strings, and of a triangular form. Now it is remarkable that one of the musical instruments most frequently occurring in the Assyrian sculptures answers very closely to this description. On comparing the instrument here represented with that

Sackbut. (Assyrian base-relief, British Museum.) exhibited in the procession above, a difference of structure will be observed, viz. that in the latter the strings seem to be carried over a "bridge," which is not the case with the former. In other respects the two forms are exactly the same; and the instrument was evidently a peculiarly Assyrian one, as there is nothing resembling it to be found on the Egyptian monuments or in the sculptures of Greece and Rome. This appears to us a decisive consideration in favor of identifying it with the sackbut of Dan. iii, 5, rather than with the צוֹפָה הַנִּ֖שָּׁמָה (symphonia) of the same list, the word translated dulcimer in our version. This latter name is evidently borrowed from the Greek, and as such was no doubt the name of a Greek and not a native instrument; whereas the name and the nature of the sackbut were both probably Oriental, as the instrument figured in these Assyrian sculptures indubitably was. What the symphonia itself was it is impossible to say. It is worth mentioning that one of the musicians performed upon what we David to the Temple thus presumes to have been the sackbut, is distinguished from the rest by a peculiar head-dress, which may probably have been a mark of distinction assigned to "the chief of the musicians" at the Assyrian court, an officer who was the counterpart of the Hebrew ישועו, such as Asaph or Jeduthun. See Sackbut.

4. The גיזתי, gittith, a word which occurs in the titles to Ps. vii, lxvii, lxviii, lxxiv, and is generally supposed to denote a musical instrument. From the name it has been supposed to be an instrument which David brought from Gath; and it has been inferred from Isa. xvi, 10 that it was in particular use at the vintage season. If an instrument of music, it is remarkable that it does not occur in the list of the instruments assigned to the Temple musicians; nor even in that list which appears in verset 1 and 2 of Ps. lxxxi, in the title of which it is found. The supposition of Gesenius, that it is a general name for a stringed instrument, obviates this difficulty. The Sept. renders the title by ἐσπιρα τοῦ χναφα, "upon the wine-press," and Carpzov, Pfeiffer, and others follow this in taking the word to denote a song composed for the vintage or for the Feast of Tabernacles (Carpzov, Obs. Philol. super Psalmos Tres ἑορτασμό [Helms. 1758]); Pfeiffer, Uber die Musik, p. 32. See GITTITI.

5. מִנָּמִין, minamim, which occurs in Ps. xiv, 3 and cl, 4, is supposed by some to denote a stringed instrument, but it seems merely a poetical allusion to the strings of any instrument. Thus in Ps. xiv, 8 we would read, "Out of the ivory palaces the strings (i.e. concerts of music) have made thee glad," and so in Ps. cl, 4, "Praise him with strings (stringed instruments) and ugaroh." See STRING.

6. מִנָּמִין, machaloth, which occurs in the titles of Ps. liii and lxxxvii, is supposed by Gesenius and others to denote a kind of lute or guitar, which instrument others find in the minamim above noticed. The preva-
MUSICAL INSTRUMENTS

MUSICAL INSTRUMENTS

Ancient Egyptians playing on the lute or guitar: 1 is dancing; 2 has the instrument slung across the shoulders; 3 has the instrument hung over the shoulder. The Egyptian guitar consisted of two parts: a long, flat neck or handle, and a hollow, oval body, composed wholly of wood, or covered with leather, whose upper surface was perforated with several holes to allow the sound to escape; over this body, and the whole length of the handle, extended three strings of catgut secured at the upper extremity. The length of the handle was sometimes twice, sometimes thrice that of the body, and the whole instrument seems to have measured three or four feet. It was struck with a plectrum, and the performers usually stood as they played. Both men and women used the guitar; some danced while they touched its strings (Wilkinson, Anc. Eg., 84-86, 123-125). See MAHALATH.

II. Wind Instruments.—1. The most ancient of these was the נֱֶבֶֽעֶשׁ, נֶבֶשׁ, mentioned along with the כָּנָֽנָר as the invention of Jubal (Gen. iv. 21). It is twice alluded to (Job xxxi, 12; xxx, 81), and in both cases in connections which show that it was used on occasions of domestic festivity and joy. The only other place where it occurs is in Psa. cl, 4, where it is referred to among other instruments suitable to be employed in the praises of God. Opinion has been, and is still, much divided as to the instrument denoted by the name. Winer and Levy (in Herzog's Real-Encyklopädie) favor the idea that it was a species of bagpipe; and in this view they are supported by the authority of Jerome, the Targums (דִּשָּׁא), and some rabbinical writers. The Septuagint varies in its translation of the word; in Genesis rendering it by καίρα, in Job by ψαλμός, and in Psa. cl by ὠψαλμός, the term adopted by the Vulgate, Syriac, Arabic, and most other versions, as well as by our own. But by ὠψαλμός we are by no means to understand the organ, which is an instrument of no great antiquity, even if we are to suppose, as some do, that there was a rudiment of the modern organ in use in the Temple of Jerusalem in the time of Christ, an invention of which strange and evidently fabulous things are told us by the Talmud, under the name of the פָּנָה הַמְּבָשֵׁה (מְבָשֵׁה). The organum meant by the word was as old as the days of Jubal; it must, therefore, have been of a rude and simple construction, and is best understood of the so-called Panpipe, formed by a combination of reed-pipes of different lengths and thicknesses. In support of this view is the fact that the Panpipe was an instrument of Syrian or Oriental origin, and that it was of such high antiquity that the profane writers do not know to whom to ascribe it. Some refer it to Pan (Virgil, Ecl. ii.), others to Mercury (Find. Od. xii, de Pallade), others to Marsyas and Silenus (Athenæus, iv, 182). This antiquity corresponds with the Scriptural intimation concerning the σάραξ, and justifies us in seeking for it among the oriental instruments of the Orientals, especially as it is still common in Western Asia. Niebuhr saw it in the hands of a peasant at Cairo (Reisebesch. i, 181); and Russell, in his Nat. Hist. of Aleppo (1, 155, 156), says that "the syrinx or Pan's pipe is still a festival instrument in Syria; it is known also in the city, but very few performers can sound it tolerably well. The higher notes are clear and pleasing, but the longer reeds are apt, like the divers flute, to make a hissing sound, though blown by a good player. The number of reeds of which the syrinx is composed varies in different instruments from five to twenty-three." The classical syrinx is usually said to have had seven reeds (Virg. Ecl. ii); but we find some on the monuments with a greater number, and the shepherd of Theocritus (Id. viii) had one of nine reeds. See ORGAN.

2. Of almost equal antiquity was the כָּנָֽנָר, koren, or horn, which sometimes, but not often, occurs as the name of a musical instrument (Joel, vi, 5; 1 Chron. xxv, 5; Dan. iii, 5, 7, 10, 15). Of natural horns, and of instruments in the shape of horns, the antiquity and general use are evinced by every extensive collection of antiquities. It is admitted that horns of animals were first used, and that they at length came to be imitated in metal, but were still called horns. See Horn. This use and application of the word are illustrated in our "cornet." It is generally conceived that rams' horns were the instruments used by the early Hebrews; and these are, indeed, expressly named in our own and many other versions as the instruments used at the noted siege of Jericho (Josh. vi, 5); and the horns of the ram are those which Josephus assigns to the soldiers of Gideon (Ant. v, 6, 5; comp. Judg. viii, 16). See also SHEBBANIM.

3. כָּנָֽנָר, קָנָֽנָנָה, which is a far more common word than koren, and is rendered "trumpet" in the Author. Ver. This word seems first, to denote horns of the straighter kind, including probably those of neat cattle, and all the instruments which were eventually made in imitation of and in improvement upon such horns. It is, how-
ever, difficult to draw a distinction between it and the kerem, seeing that the words are sometimes used synonymously. Thus that which is called "a jobel-horn" in Josh. vi, 5, is in the same chapter (ver. 4, 6, 8, 13) called "a jobel-horn trumpet" (shophar). See JUBILEES. Upon the whole, we may take the shophar, however distinguished from the kerem, to have been that kind of horn or horn-shaped trumpet which was best known to the Hebrews. The name shophar means bright or clear, and the instrument may be conceived to have been so called from its clear and shrill sound, just as we call an instrument a "clarion," and speak of a musical tone as "brilliant" or "clear." In the service of God this shophar or trumpet was only employed in making announcements, and for calling the people together in the time of the holy solemnities, of war, of rebellion, or of any other great occasion (Exod. xix, 19; Numb. x, 10; Judg. iii, 7; 1 Sam. xiii, 3; xv, 10; 2 Chron. xv, 14; Isa. xviii, 3). The strong sound of the instrument would have confounded a choir of singers rather than have elevated their music. At feasts and exhibitions of joy horns and trumpets were not forgotten (2 Sam. vi, 15; 1 Chron. xvi, 42). There is no reason to conclude that the trumpet was an instrument peculiar to the Levites, as some have supposed. If that were the case we should be unable to account for the three hundred trumpets with which Gideon's men were furnished (Judg. vii, 8), and for the use of trumpets in making signals by watchmen, who were not always Levites. See TRUMPET.

4. The רחוב, chatoteerdh, or straight trumpet, is occasionally mentioned along with the shophar, showing that these two kinds of trumpets were sometimes used together, as in Ps. xcviii, 6, "with trumpets and sound of cornet make a joyful noise before the Lord the King" (comp. 1 Chron. xv, 28; 2 Chron. xvi, 14). The two silver trumpets appointed by Moses to be made for the use of the priests of the tabernacle were of this construction, and were used for announcing to the people the advent of the different feasts, for signifying "the journeying of the camps," and for sounding alarms in time of war (Numb. x, 1-10). Their use in the sacrificial rites as a musical accompaniment was limited (ver. 10) to certain occasions, to "their solemn days, the beginnings of their months, and the day of their gladness;" but in the age of David and Solomon their sacrificial use was much extended, and the number provided for the use of the priests was correspondingly increased. At the dedication of the Temple as many as a hundred and twenty priests "sounded with trumpets;" and in the immensely developed ritual then introduced the part of the musical service assigned to the priests was to blow with the sacred trumpets during the offering of sacrifice, while the Levites accompanied on the other instruments of all kinds. There has been various speculation on the name; but we are disposed to asent to the conclusion of Grosenius that it is an onomatopoeic word, imitating the broken pulse-like sound of the trumpet, like the Latin taratantara, which this word would more resemble if pronounced as in Arabic, kadda-derah. By many it has been identified with the mod.
MUSICAL INSTRUMENTS

that in the time of Judas Maccaebus the Jews complained of "that joy was taken from Jacob, and the pipe with the harp (As3ippy) ceased" (1 Macc. iii. 45). It was particularly used to enliven the periodical journeys to Jerusalem to attend the great festivals (Isa. xxx., 29); and this custom of accompanying travelling in companies with music is common in the East at this day (Harmer, Observat. ii. 187; to which add Tournafort, Voyage du Levant, iii. 189). Athenaeus (iv. 174) tells of a plain pipe which was in use among the Phoenicians. This serves to illustrate Matt. ix. 23, where our Saviour, finding the flute-players with the dead daughter of the ruler, ordered them away, because the damsel was not dead; and in this we also recognize the regulation of the Jews that every one, however poor he might be, should have at least two pipes (יִשְׁלָט נַה) at the death of his wife (Lightfoot, Hor. Hebr. ad Matt. ix. 23). See MOURNING.

Asyrian Tambourine and Drums. (Bas-reliefs, British Museum.)

6. סָמְפּוֹנַגְּא, sumpongah, is evidently the Chalde. form of the Gr. συμφωνία, rendered "dulcimer" (Dan. iii. 5; x. 15). It is described by the rabbins as a bagpipe consisting of two shrill-toned flutes pressed through a leathern bag. Servius, in his Commentary on the Ἀνένδαλ, describes the symphonía as a sort of bagpipe, which agrees with the representations of Jewish writers. The bagpipe bore the same name among the Moors of Spain and it is still called in Italy sumpogna. The known antiquity of this instrument, together with its present existence in the East, appear to confirm the reference of the sumpongah to the bagpipe. The modern Oriental bagpipe is composed of a goat-skin, usually with the hair on, and in the natural form, but deprived of the head, the tail, and the feet. The pipes are usually made of reeds, terminated with tips of cows' horns, slightly curved. The entire instrument is primitive simple in its materials and construction. See DULCIMER.

7. There remains to be noticed a wind-instrument mentioned along with the others in Dan. iii. 5 — the מְשַׁרְכֶּה, mushrakeh, A.V. "flute." The etymology of the name indicates that it was an instrument of the pipe class; but whether a bagpipe, a Panathian pipe, or a flute-pipe, single or double, it is impossible to determine. All these identifications have found supporters, and some have even inclined to the opinion that it was of the nature of a rudimentary wind-instrument, such as was afterwards imitated and somewhat improved upon by the Temple organ before alluded to — the meprephokh of the Talmud. See FLUTE.

III. Instruments of Percussion and Agitation. — 1. The most ancient pulsatile instrument mentioned in the O. T. is the מַרְחָם, merham, consisting of a narrow circle or hoop of wood or metal covered with a tightened skin, and struck with the hand. The Sept. renders the word by γύμναμος, a drum. The "timbrel" of our own version is preferable, as there can be no doubt that the instrument intended was of the same nature and form as the timbrel or tambourine still in use in Oriental coun-

Ancient Egyptian Tambourines (1, angular; 2, circular) and Tabret-drum.

men (as in the brim of the ark, 1 Chron. xiii. 8; in worship, 1 Sam. x. 5; Psa. cxlix. 8; cl. 4), although this is by no means certain. It frequently occurs on the Egyptian monuments (Wilkinson, Anc. Egypt. ii, 240). There were three kinds, differing, no doubt, in sound as well as form: one was circular, another square or oblong, and the third consisted of two squares separated by a bar. They were all beaten by the hand, and often used as an accompaniment to the harp and other instruments. The imperfect manner of representation does not allow us to see whether the Egyptian tambourine had the same movable pieces of metal let into the wooden frame which we find in the tambourines of the present day. Their presence may, however, be inferred from the manner in which the tambourine is held up after being struck; and we know that the Greek instruments were furnished with balls of metal attached by short thongs to the circular rim (Wilkinson, Ancient Egypt. ii, 814). At mournings for the dead the tambourine was sometimes introduced among the Egyptians, and the "mournful song" was accompanied by its monotonous sound. This is still a custom of the East, and probably existed among the Jews. See MOURNING.

The merham was thus an instrument of the drum kind; and it is highly probable that, as other varieties of the drum,
some of them much resembling the drums of modern times, were in use among both the Assyrians and Egyptians, they were also introduced among the Hebrews. If so, they must be included under the general name of toph. The ancient Egyptians had a long drum, very similar to the tamtum of India. It was about two feet or two feet and a half in length, and was beaten with the hand. The skin was of wood or copper, covered at both ends with parchment or leather, and braced with cords extended diagonally over the exterior of the cylinder (figs. 1, 2). It was used chiefly in war. There was another larger drum, less unlike our own: it was about two feet and a half long by about two feet broad, and was shaped much like a sugar-cask (fig. 4). It was formed of copper, and covered at the ends with red leather, brazed by catgut strings passing through small holes in its broad margin. This kind of drum was beaten with sticks. It does not appear on the monuments, but an actual specimen was found in the excavations made by D’Athis in 1823, and is now in the museum at Paris. Another species of drum is represented in the Egyptian paintings, and is of the same kind which is still in use in Egypt and Arabia under the name of the tarabuka drum. It is made of parchment stretched over the top of a funnel-shaped case of metal, wood, or pottery. It is beaten with the hand, and when relaxed the parchment is braced by exposing it for a few moments to the sun or the warmth of a fire (fig. 5, above). This kind of drum claims particular attention from its being supposed to be represented on one of the coins ascribed to Simon Macca-baeus (fig. 5 of the second cut under No. 3, below). When closely examined, this instrument will appear to be the same in principle with our kettle-drum, which, indeed, has been confessedly derived from the East, where other instruments on the same principle are not wanting. One of them (fig. 4 of the second cut under No. 3, below) is just the same as the instrument we have derived from it; others are smaller in various degrees, are of different forms, and are tapped lightly with the fingers. Such drum-tabrets were not unknown to the ancient Egyptians (fig. 3 of the cut next but one preceding). The rabbins speak obscurely of a sort of drum, or magregah, which may have been of this kind. It stood, they say, in the Temple court, and was used to call the priests to prayer, the Levites to singing, and leprous persons to their purification. They ventured to add that its sound could be heard from Jerusalem to Jericho (Buxtorf, Lex. Rubin. s. v. תמרן). See Tabret.

2. פָּאָה, pāah. This name nowhere occurs but with reference to the small golden appendages to the robe of the high-priest (Exod. xxviii, 33; xxxix, 25), which all versions agree in rendering "bells," or "little bells." These bells were attached to the hem of the garment, and were separated from each other by golden knobs, shaped like pomegranates. They obviously produced their tinkling sound by striking against the golden knobs which were appended near them. There is no trace of bells among the ancient Egyptians or in classical times, and we call these such bells "a better term to describe sonorous pieces of metal used in this manner. See BELL.

3. The פּולָלָה, polalah, פּולָלָה, metatloth, or פּוֹלָלָה, metaalotym. In Zech. xiv, 20 only is this term rendered "bells"—the "bells of the horses." If the words, however, denote cymbals in other places, they cannot well denote a different thing here. It is true that camels, and sometimes horses, wear bells in the East at present, and it is probable that the Hebrews had something similar, in the shape of small cymbal-shaped pieces of metal, suspended under the necks of the animals, and which struck against each other with the motions of the animal. The Romans attached metallic pendants of this kind, called phalaereu, to their whips in order to produce a terrific effect when shaken by the rapid motions of the animals. These were certainly not bells, but might without any violent impropriety be called cymbals, from the manner in which they struck against each other. This name, being found only in the plural or dual forms, implies an instrument consisting of more parts than one and not more than two. It is accordingly interpreted by the Sept. to mean קַיְּמְלָלָה, or cymbals, and this is no doubt correct. Josephus describes the two parts of the instrument as Πασία καὶ μεγαλὰ χάλκεα (Ant. vii, 15, 3), which were held in either hand and dashed sharply together, yielding a powerful and penetrating metallic sound. They are first mentioned in 2 Sam. v, 5, as used by direction of David in the bringing up of the ark; and in 1 Chron. xv, 5 the remarkable fact is recorded that when David organized the musical service which was to be carried on before the ark when brought up to Mount Zion, and "appointed certain of the Levites to thank and praise the Lord God of Israel," while the rest performed their office "with psaltery and with harps," Asaph, the chief musician, or conductor of the choir, "made a sound with cymbals." It thus appears that this was the instrument by which the conductor beat time to the whole Levitical choir. It is further mentioned in Ps. cv, 8. Praise him upon the loud cymbal, praise him upon the high-sounding cymbals," that these cymbals, used in the service of praise, were of two kinds, although the difference between them is very imperfectly indicated in our version of the passage. The rendering, "Praise him with the clear cymbals, praise him with the resounding cymbals," would be a very fair equivalent for the Hebrew פּוֹלָלָה and פּוֹלָלָה; and the first cymbals alluded to were probably finger cymbals, or castanets, which were small round plates of metal fastened upon the thumb and middle finger, and struck against each other by a motion of the hand, yielding a clear and sharp, though not a loud sound; while the resounding cymbals were a much larger and more powerful sort, played with both hands; and this view is all the more likely to be correct as cymbals of both kinds are used among the Egyptians. It is worth noticing that the epithet applied by Paul to the cymbal in 1 Cor. xiii, 1 is αλαλάων ("without speech"), which is very happily selected, inasmuch as the music of such an instrument was necessarily more expressive than expressive. But our version, "tinkling," is a very poor equivalent for the
MUSICAL INSTRUMENTS

It suggests the sound of a small bell rather than the clanging resonance of the cymbals. It should have been rendered "clanging" or "clashing." The sound of these instruments is very sharp and piercing, but it does not belong to fine, speaking, expressive music. The Hebrew instruments were probably similar to those of the Egyptians. These were of mixed metal, apparently bronze, or a compound of copper and silver, and of a form exactly resembling those of modern times, though smaller, being only seven inches or five inches and a half in diameter. The same kind of instrument is still used by the modern inhabitants of Egypt, and from them, says Wilkinson, "have been borrowed the very small cymbals, played with the finger and thumb, which supply the place of castanets in the almeb dance" (Ancient Egyptians, ii. 255). The modern castanet, introduced into Spain by the Moors, is to be referred to the same source. See CYMBAL.

4. מַכְּכִיל, menaxim. This instrument is only once mentioned in Scripture (2 Sam. vi, 5), where it stands next before cymbals in an enumeration of several instruments, and is strangely translated "cornets" in our version. It is singular that the example of the Vulg., which renders by the Latin sistra, was not followed by our translators in this instance, especially as the etymology of the name (rad. שְׁנָה, to shake) suggests that it was an instrument of agitation which was denoted, the Greek στρήπτη, having an analogous derivation from στρίφω. It was generally from eight to sixteen or eighteen inches long, and entirely of bronze or copper; movable rings and bars of the same metal being inserted in the frame, by the sharp impact of which upon the frame, when shaken in the hand, a piercing metallic sound was produced. It was sometimes inlaid with silver, gilt, or otherwise ornamented, and the rings were frequently made to imitate snakes, or simply bent at each end to secure them from slipping through the holes. Several actual specimens of these instruments have been found, and are deposited in the British, Berlin, and other museums (Wilkinson, Anc. Egypt. i. 131-138). They are mostly furnished with sacred symbols, and were chiefly used by the priests and priestesses in the ceremonies of religion, particularly in those connected with the worship of Isai (Plut. De Isid. c. 69; Juven. xiii. 38; Jablonsky, Oropsis, i. 806). Instruments of the same rude principle, though different form, are still in use in the military music of some modern nations.

5. מַכְּכִיל, shalisim. This instrument is only once mentioned, viz. in 1 Sam. xviii. 6, where it is spoken of as used by the women of Israel when they came out to meet king Saul and David. Our translators render vaguely "instruments of music," but insert in the margin "three-stringed instruments." The word more probably denoted an instrument with three sides; and as some harps were of that shape, it may probably have meant such harps. (See above, under "shemirah.") We insert the name in this place because it is generally thought by recent scholars that it meant what is understood by a triangle, an instrument of percussion which Atheneus (Deipnosoph. iv. 175) says was derived from Syria. If so, it was possibly in use among the Hebrews, and may have been the instrument referred to in 1 Sam. xviii. 6. But, on the other hand, no figure of such an instrument of percussion has been found on any of the monuments either of Assyria, Egypt, or Greece. Like the cymbals and sistra, it is still in use in military music, especially in the Turkish army.

6. The word "dance" is used in the A.V. for the Hebrew term makkol, מַכְּכִיל, a musical instrument of percussion, supposed to have been used by the Hebrews at an early period of their history. Some modern lexicographers, who regard makkol as synonymous with rākōd, רָבָד (Eccles. iii. 4), restrict its meaning to the exercise or amusement of dancing; but according to many scholars it also signifies a musical instrument used for accompanying the dance, which the Hebrews therefore called by the same name as the dance itself. The Sept. generally renders makkol by γοργής, "dancing," occasionally, however, it gives a different meaning, as in Ps. xxx, 11 (Heb. Bible, ver. 12), where it is translated γοργή, "joy," and in Jer. xxxi. 4 and 14, where it is rendered שָׁמַע, "assembly." The Shemitic version of the O.T. almost invariably interpret the word as a musical instrument. Only the joyous occasion when the Israelites escaped from their Egyptian pursuers, and reached the Arabian shore of the Red Sea in safety, Miriam is represented as going forth striking the נַפָר, and followed by her sisters in faith, who join in with timbrels and dances" (Exod. xvi. 20). Here the sense of the passage seems to be, agreeably to the A.V., that the Hebrew women came forth to dance, and to accompany their
dance by a performance on timbrels; and this is the view adopted by the majority of the Latin and English commentators. Parkhurst and Adam Clarke do not share this opinion: according to the former, makōchol is "some fiddler's wind-instrument of music, with holes, as a flute, pipe, or fife, from שרת, to make a hole or open- ing;" and the latter says, "I know no place in the Bible where makōchol and makahaláth mean dance of any kind—they constantly signify some kind of pipe." The Tar- gumists very frequently render makōchol as a musical in- strument. In Exod. xv, 20, Onkelos gives for makahaláth the Aramaic word מוקחל, which is precisely the same employed by him in Gen. xxii, 27 for קָנָר (A. V. "harp"). The Arabic version has for makōchol in many places התבלון, pl. תבלון, translated by Freytag, in his Arabic Lexicon, "a drum with either one or two faces;" and the word מלקס (Judg. xi, 34, A. V. "and with dances") is rendered by iman, "songs." Gesenius, Fürst, and others adopt for the most part the Sept. rendering; but Rosenmüller, in his commentary on Exod. xvi, 20, observes that, on comparing the passages in Judg. xi, 24; 1 Sam. xviii, 6; and Jer. xxxix, 4, and assigning a rational exegesis to their contexts, makōchol must mean in these instances some musical instrument, probably of the flute kind, and principally played by women.

In the grand hallelujah psalm (el) which closes that magnificent collection, the sacred poet exhorts mankind to praise God in his sanctuaries by means of some kind of music; and among the instruments mentioned at the 3d, 4th, and 5th verses is found makōchol, which cannot here be consistently rendered in the sense of dancing. Joel Brill, whose second preface (יוֹסֶף הוֹכָלִים) to Mendelssohn's Psalms contains the best treatise extant on the musical instruments mentioned in the Hebrew Bible, remarks: "It is evident from the passage, 'Praise him with the timbrel and the psalter,' that makōchol must mean here some musical instrument, and this is the opinion of the majority of scholars." Mendelssohn derives makōchol from מַכֹּחֲלָה, "hollow," on account of its shape; and the author of Shilte Haggidbōrim denominates it מַכֹּחּלָה, which he probably intends for מַכֹּחָל, rather than מַכֹּחִית. Some modern critics consider makahaláth the same with makōchol. Gesenius, however, translates the latter "dancing," while the former he renders "a stringed instrument," from the root מַכֹּחֲלָה, "to sing."

The musical instrument used as an accompaniment to dancing is generally believed to have been made of metal, open like a ring: it had many small bells attached to its border, and was played at weddings and merry- makings by women, who accompanied it with the voice. According to the author of Shilte Haggidbōrim, the makōchol had tinkling metal plates fastened on wires, at intervals, within the circle that formed the instrument, like the modern tambourine; according to others, a similar instrument was formed of a circular piece of metal or wood, but furnished with a handle, which the performer might so manage as to set in motion several rings strung on a metal bar, passing from one side of the instrument to the other, the waving of which produced a loud, merry sound. See DANCE.

Musical instruments accompanying the dance. (Mendelssohn.)

IV. The following are general or miscellaneous terms: 1. מַכֹּחֲלָה, makahaláth, Chald., rendered "instruments of music" in Dan. vi, 18. The margin gives "or table, perhaps lit. concubines." The last-mentioned rendering is that approved by Gesenius, and seems most probable. The translation, "instruments of music," seems to have originated with the Jewish commentators, R. Nathan, R. Levi, and Aben-Ezra, among others, who represent the word by the Hebrew נזוןנ, that is, stringed instru- ments, which would appear to have been struck with the hand or the plectrum.

2. דֹּהֲנָם, shiddáth, is found only in one very obscure passage (Ecclesi. vi, 8), "I got me men-singers and women-singers, and the delights of the sons of men, musical instruments, and that of all sorts" (דֹּהֲנָם וְשִׁידְדוֹת). The words thus rendered have received a great variety of meanings. They are translated "drinking-vessels" by Aquila and the Vulgate; "cup-bearers" by the Sept., Peshito-Syrac., Jerome, and the Arabic versions; and "viols" by the English. Some, "musical instruments," by David Kimchi, followed by Luther and the A. V., as well as by many commentators. By others they are supposed to refer to the women of the royal harem. But the most probable interpretation to be put upon them is that suggested by the usage of the Talmud, where דֹּהֲנָם, shidah, denotes a "palanquin" or "litter" for women. The whole question is discussed in Gesenius's Thesaurus, p. 1865.

V. Literature.—On the general subject of the music and musical instruments of the Israelites, see Martini, Storia della Musica (Bologna, 1757), i, 4 sq.; Burney, General Hist. of Music (London, 1776), i, 217 sq.; Schröter, De Musica Davidica (Dresden, 1716); Hawkins, Hist. of Music; Forkel, Gesch. der Musik, i, 99 sq.; Calmet, Dissert. sur la Musique des Hébreux, annexed to his Comentary on the Psalms of David; Medford, Psalters of the Hebrews, English, Greek and Latin; (Bristol, 1706): Pfeiffer, Uber die Musik der Alten Hebr. Hist. of Aleppo; Lane, Modern Egyptians, ii, 69 sq.; Thomson, Loud and Book; Eng- gel, Music of the most Ancient Nations (London, 1864); Hutchinson, Music of the Bible (Bost. 1863).

Musician, CHIEF (מנחת, menachat'teh, i. e. the most conspicuous, i. q. leader), an officer indicated in the titles of many (35) of the Psalms and in Hab. iii, 10, and to be interpreted, according to Kimchi, Rashi, Aben-Ezra, and many other authorities, the precentor of the Levitical choir or orchestra in the Temple. In one late instance the name of this officer seems to be indi- cated (1 Chron. xxv, 1): but the first who he appears to have been Jeduthun, in connection with his three brothers (1 Chron. xvi, 41, etc.); and the office seems to have been hereditary in the family (1 Chron. xvi, 1, 3); or else the name Jeduthun became a patronymic title for the incumbents afterwards (2 Chron. xxxv, 15). Jeduthun's "office" was generally to preside over the music of the Temple ser- vice, consisting of the nebēl, or nablium, the kiwūr, or harp, and the cymbals, together with the human voice (the trumpets being confined to the priests). But his peculiar part, as well as that of his two colleagues, He-
MUSULMAN

man and Asaph, was 'to sound with cymbals of brass,' while the others played on the n账 and the harp.

This appointment to the office was by election of the

chiefs of the Levites (דַּבָּרָה) at David's command, each of the three divisions probably choosing one. The first occasion of Jeduthun's ministering was when David

brought up the ark to Jerusalem. He then took his place in the procession, and played on the cymbals. But when the division of the Levitical services took place, owing to the tabernacle being at Gideon and the ark at Jerusalem, while Asaph and his brethren were appointed to minister before the ark, it fell to Jeduthun and Heman to be located with Zadok the priest, to give thanks 'before the tabernacle of the Lord in the high-

place that was at Gideon,' still by playing the cymbals in conjunction, to the other musical instruments (comp. Psa. cl, 5).

In the account of Josiah's Passover in 2 Chron. xxxv reference is made to the singing as conducted in accordance with the arrangements made by David, and by persons representing Asaph, Heman, and Jeduthun, the king's seer (נַבֵּהַ יִרְשָׁא). See HEM-

MAN. Perhaps the phrase rather means the king's ad-

viser in matters connected with the musical service. The triple division of the Levitical musicians seems to have lasted as long as the Temple, and each appears to have been called after its respective leader. At the dedication of Solomon's Temple, 'the Levites which were the singers, all of them of Asaph, of Heman, of Jeduthun,' performed their proper part. In the reign of Josiah, the singers were, the sons of Heman, the sons of Jeduthun, taking part in purifying the Temple (2 Chron. xxix, 13, 14); they are mentioned in Josiah's reign, and so late as in Ne-

hemiah's time we still find descendants of Jeduthun employed about the singing (Neh. xi, 17)." See Jeduthun.

Musimoes, festivals celebrated in honor of the dead among the native tribes of Central Africa. See Gardner, Faiths of the World, p. 503.

Musius, Cornelius, an eminent Dutch scholar of Roman Catholic proclivities, was born at Delft in 1508. He flourished as pastor of St. Agatha during the contest between the prince of Orange and the Spanish throne for the possession of the Netherlands. He was equally esteemed for his learning and for his amiable qualities, when, on account of his religious faith, he was put to the torture, which caused his death in 1575, by De la Marck. The Romanists have charged the wicked deed to the prince of Orange and his Reformed friends. This, however, is cruel and unjust. The prince himself, who highly esteemed Musius, shielded many of his followers when he heard of the atrocious deed, and while the Estates of Holland were aroused to an indignation scarcely controlable, De la Marck was obliged to leave the coun-

try, notwithstanding his powerful connections. Musiu-

us wrote several religious poems, which are remarkable for their elegance and purity of style. See Brandt, Gesch. der Ref. x, 583-540; Hoofd, De Nederlandse Historie,

Musonius Rufus, Caicus, a Stoic philosopher of the 1st century of the Christian era, is mentioned with praise by Tacitus (Ann. xiv, 69), and also by Pliny the younger, Philostratus, Theophrastus, and others. He was a native of Volini, in Eturia, and belonged to the equestrian order. He was a friend of Thrascus Petaus, Barea Soranus, Rubellius Plautus, and other Stoics, who were the victims of Nero's suspicion and cruelty. Mus-

onius was banished to the island of Gyaros in A.D. 66, where he is said to have been visited by many Greeks for the purpose of listening to his lessons. Being re-

called by Gallus after Nero's death, he lived at Rome under Vespasian, who excepted him from the sentence of exile pronounced by that prince against the Stoic philosophers. This scanty information is all that we have concerning the biography of Musonius Rufus (Nieuwland, Dissertatio de Musonio Rufino, Philosopho Stoico). The time of his death is not mentioned, but he was not long after the reign of Trajan; and it is said, by Eusebius of Caesarea, that the elder Musonius speaks of his son, Artemidorus. Musonius wrote vari-

ous philosophical works, which are spoken of by Suidas as λόγιοι διάφορας φιλοσοφίας ἢ παρθένοι. He reduced philosophy to the simplest moral teachings. One of his finest sayings is: "If thou dost good painfully, then it is well, and if thou dost evil with pleasure, the pleasure will be transient, but the evil will endure." Fragments of his works are found in Stobaeus, and have been collected and pub-

lished, with the above dissertation and copious notes, under the title of C. Musonii Rufi, Philosophi Stoici, Religionis Appallognatae, cum Annotationibus, edidit T. Venhusien Peerlkamp, Corrector Cytataris Reip. Tab., Subsid. (Haarlem, 1822, 8vo). These fragments of Musonius are full of the purest morality and wisdom. See Fabri-

cius, Biblioth. Graecii, iii, 566 sq.; Ritter and Preller, Historia Philosophiae, p. 488-441; Ueberweg, Hist. Philosoph., i, 185, 190; English Cyclopedia, s. v.; Smith, Dict. of Gr. and Rom. Biog., and Mythol., s. v. Rufus; Lardner, Works (see Index in vol. x).

Musorites, a superstitious sect of Jews, who are said to have revered rats and mice. The origin of this peculiarity is said to be found in an event which is narrated in 1 Sam. vi. The Philistines had taken away the ark of the covenant and detained it in their country seven months, during which time the Lord in anger sent pestilence among their people. The ark was brought to the Philistines near the border of the ground. Under the dread inspired by this divine judgment upon their land they restored the ark, and by the advice of their priests and diviners they prepared as a trespass-offering to the God of Israel five golden emeralds and five golden mice. Fervently the solemn incident of O. T. history, the sect seems to have entertained a superstitious veneration for mice and rats.

Muspeil(1) or Muspeil(1)heim is, in Norse mythology, the world of light and heat, situated in the south part of the universe; Niflheim, the habi-

tation of mist and cold, being situated in the north. The inhabitants of this world are called "the sons of Muspell," among whom the Sun, Sturt, or Surtur is chief, and the ruler of Muspeilheim, who sits on its bor-

ders bearing a flaming falchion, and at the end of the world he shall issue forth to battle, and shall vanquish all the gods, and consume the universe with fire.

Musserin is the name given to a sect of atheists in Turkey. The word signifies those who keep a se-

cret, from the verb misseto, to conceal. Their secret is chiefly to deny the existence of the Trinity, the existence of the educated classes in Turkey are believed to be Musserin.

But mainly they are Christian renegades, who, having for pecuniary reasons abjured the faith of their fathers, seek refuge in blind atheism, under a public profession of Mohammedanism.

Musso, Cornelius, a famous Italian pulpitt orator, was born at Placentia in 1611, and, after entering holy orders, rose rapidly to distinction in the Church. He was made bishop of Bertonino, then of Bivona, towards the close of the 16th century. He distinguished him-

self at the Council of Trent, and seems to have enjoyed popular favor to an unusual degree, for medals were struck in his honor, and other distinctions of like char-

acter were paid him. He died at Rome Jan. 9, 1574. He is the author of Sermoni in the General Congregations, 4to. See Bayle, Hist. Dict. s. v.; Gen. Diog. Dict. xi, 154; Musso, Vita di Cornelio Musso (1586); Blackwood, 1869, 1, 211; Wesenberg, Die Grossen Kirchengenossen-

Musulman or Mosleman (from Arab. Salama), the proper term for a Mohammedan. The word is equivalent to Moslem (q. v.), of which it is properly
MUSTAPHA

speaking, the plural; used in Persian fashion for the singular. We need hardly add that this Arabic plural termination of "ān" has nothing whatever to do with our word man, and that a further English plural in men is both barbarous and absurd.

Mustapha (i. e. the chosen one) is the name by which Mohammedan tradition designates the greatest of their prophets. See Mohammed.

Mustard (Brassica, Matt. xiii. 31; xxi. 20; Mark iv. 31; Luke xii. 19; xvi. 6; in Talmudic Chaldee шаяддым, Shabb. xx. 2, from the Syriac شكرددی, a well-known pod-bearing shrub-like plant (genus Sinapis, of thirteen species, five of which are indigenous in Egypt; Descript. de Filippo, xix. 93) that sometimes grows wild, and at other times is raised from the seed, which is employed as a condiment, being usually of the two kinds, the black and the white (see Penny Cyclopaedia, a. v. Sinapis). The Jews likewise cultivated mustard in their gardens (Mishna, Maaser. iv. 6). The round kernels (Matt. xiii. 31; xxii. 20), which were used also by the ancients as a spice (Pliny, xix. 54), passed in Jewish phrase as an emblem for a small, insignificant object (Buxtorf, Lex. Talm. col. 892); being the smallest seed commonly gathered in Palestine, although not literally the most diminutive known.

"The Lord in his popular teaching," says Trench (Notes on Parables, p. 106), "adhered to the popular language" (see also the Koran, Sur. 31). The statements in Matt. xiii. 32, that when fully grown it is the greatest of plants, and becomes a tree under which the fowls may find shelter, has been supposed to indicate a larger growth than ordinary in Western countries (see Magrave, Hist. nat. Brazil, p. 291; Bashin, Hist. Plant. ii. 855); but is confirmed by the statements of the Talmudists, one of whom describes it as a tree of which the wood was sufficient to cover a potter's shed (Talm. Higra. Pesah, vii. 4), and another says that he was wont to climb into it, as men climb into a fig-tree (ib. Ketubbah, fol. iii. 8; comp. Rosenmuller, Alterth. iv. 105). Mr. Buckham (On the Mustard-tree of the Scriptures, 1829) cites the following from Alonso de Orvalho's Travels in Chili (as given in Awnshaw and Churchill's Collection): "The mustard-plant thrives so rapidly that it is as big as one's arm, and so high and thick that it looks like a tree. I have travelled many leagues through mustard-groves which were taller than horse and man; and the birds built their nests in them as the Gospel mentions." The statement of Iryb and Mangles has also been referred to (Lambert, in the Linncean Transactions, xvii. 450), that they found the mustard-plant (Sinapis nigra) growing wild between Beisan and Ajlun as high as their horses' heads. (See further in Celsius Hierobib. ii. 253 sq.; Billerbeck, Flora clasa. p. 172.) Prof. Hackett states that he was for a long time disappointed in his search for any specimens of the mustard answering to the requirements of the above texts of Scripture; but that while on his way across the plain of Akka, towards Carmel, he had the satisfaction of seeing a little forest-like field of these plants, in full blossom, from six to nine feet in height, with branches from each side of a trunk an inch or more thick; and that he actually witnessed the alighting of birds upon the stems (Illustra. of Script. p. 124). Dr. Thomson also (The Land and the Book, ii. 100) says that he has seen the wild mustard on the rich plain of Akkar as tall as the horse and the rider.

Even these descriptions, however, seem hardly to come up to the ancient accounts of the plant in question. Hence the conclusion of Dr. Royle (in a paper read before the Royal Asiatic Society, March 16, 1844) has been preferred, who shows that there is a plant still known in the East by the name of khardal (which corresponds to the rabbinical title, and is indeed the modern Arabic for "mustard"), growing near Jerusalem, but most abundantly on the banks of the Jordan and round the sea of Tiberias; its seed being employed as a substitute for mustard. The plant is the Salvadora Persica of Linnaeus (the Cissus arborea of Forskål), a large shrub, or tree of moderate size, a native of the hot and dry parts of India, of Persia, and of Arabia. Dr. Roxburgh (Flor. Ind. i. 388 sq.) describes the berries as much smaller than a grain of black pepper, having a strong aromatic smell, and a taste much like that of garden cresses. The plant has a small seed, which produces a large tree with numerous branches, in which the birds of the air may take shelter. It is probably the tree which Iryb and Mangles themselves suppose to be the mustard-tree of Scripture, rather than the ordinary shrub. They met with it while advancing towards Kerak, from the southern extremity of the Dead Sea. It bore its fruit in bunches resembling the currant; and the seeds had a pleasant, though strongly aromatic taste, nearly resembling mustard. A specimen of the tree had been brought home by Mr. W. Barker, and it had been ascertained by Messrs. Don and Lambert, to be the Salvadora Persica of botanists; but both had

Oriental Mustard (Sinapis Nigra).
MUSTARD 776  MUTH-LABBEN

written against its claim to be the mustard-tree of Scripture, while Mr. Frost, hearing a conversation on the subject, had supposed the tree to be a *Phytolacca*, and had hence maintained it to be the mustard-tree of Scripture, but without adducing proofs of any kind (*Remarks on the Mustard-tree of the N. T.* [Lond. 1827]; *Butterworth's Magazine*, May, 1829, p. 14; *Journal of the Royal Asiatic Society*, ut sup.).

On the other hand, "Hiller, Celsius, Rosenmüller, who all studied the botany of the Bible, and older writers, such as Erasmus, Zezerus, Grotius, are content to believe that some common mustard-plant is the plant of the parable. The interpretation commonly against any *Sinapis* is that the seed grew into a *tree* (*livadop*), or, as Luke has it, 'a great tree' (*livadop μυῖα*), in the branches of which the fowls of the air are said to come and lodge. Now, in answer to the above objection, it is urged with great truth that the expression is figurative and Oriental, and that in a proverbial simile no literal accuracy is to be expected; it is an error, for which the language of Scripture is not accountable, to assert, as Dr. Ryloe and some others have done, that the passage implies that birds 'built their nests in the tree'; the Greek word καρποφόρος has no such meaning, the word καρποφόρος means 'fruit-carrying' or 'fruit-laden' for a longer or shorter time; the birds came 'under the shade of the tree' and fed 'from the fruits of the tree'; as Hiller (*Historyph*., ii, 63) explains the phrase; nor is there any occasion to suppose that the expression 'fowls of the air' denotes any other than the smaller *insectivorous* kinds—lizards, finches, etc.—and not the 'aquatic fowls by the lake-side, or partridges and pigeons hovering over the rich plain of Genesareth' which Prof. Stanley (*S. and P.* p. 427) recognises as 'the birds that came and devoured the seed by the way-side—for the larger birds are wild and avoid the way-side—or as those which took refuge in the spreading branches of the mustard-tree.' Hiller's explanation is a very correct one; that the birds came and settled on the mustard-plant for the sake of the seed, of which they are very fond. Again, whatever the *oviari* may be, it is expressly said to be an herb, or, more properly, 'a garden herb' (Λάγκαριος, olis). As to the plant being called a 'tree' or a 'great tree,' the expression is not only an Oriental one, but it is clearly spoken with reference to some other thing; the *oviari*, with respect to the other *herbs* of the garden, may, considering the size to which it grows, justly be called 'a great tree,' though, of course, with respect to trees properly so named, it could not be called one at all. Now it is evident that the wild mustard was cultivated in our Lord's time, the seed a 'manna' and to be found in his field; Luke says, 'cast into his garden': if, then, the wild plant on the rich plain of Akkar grows as high as a man on horseback, it might attain to the same or a greater height when in a cultivated garden; and if, as lady Caldecott has observed, we take into account the very low plants and shrubs upon which birds often roost, it will readily be seen that some common mustard-plant is able to fulfil all the scriptural demands. As to the story of the rabbi Simeon ben-Calaapha having in his garden a mustard-plant into which he was accustomed to climb as men climb into a fig-tree, it can only be taken for what Talmudical statements generally are worth, and must be quite insufficient to afford grounds for any argument. But it may be asked, Why not accept the explanation that the *Salvadora Persica* is the tree denoted—a tree which will literally meet all the demands of the parable. Because, we answer, whereas the Israelites dwelt in booths, whereas the Jews had booths, having hedges, but the tree shown to be in full accordance with the scriptural allusions, there is no occasion to be dissatisfied with it; and again, because at present we know nothing certain of the occurrence of the *Salvadora Persica* in Palestine, except that it occurs in the small tropical low valley of Engedi, near the Dead Sea, the wild species, though it is frequently shown, but it is evidently of rare occurrence. Mr. Ampeyn says he had seen it all along the banks of the Jordan, near the lake of Tiberias and Damascus; but this statement is certainly erroneous. We know from Pliny, Dioscorides, and other Greek and Roman writers, that mustard-seeds were much valued, and were used as a condiment; but it is more probable that the Jews of our Lord's time were in the habit of making a similar preparation of some common mustard (Ursina) than that they used to plant in their gardens the seeds of a tree which certainly cannot fulfil the scriptural demand of being called 'a pot-herb.'" Dr. Tristram likewise (*Nat. Hist. of the Bible*, p. 472 sq.) takes strong ground in favor of the common black mustard (*Brassica nigra*). See *Bot. Bibl., note on Luke xxvii, 6.

*Mustiani* is the name of a small and obscure sect of Donatists, condemned by the three hundred and ten bishops of that schism who met at Bagai or Vaya in Numidia, A.D. 698. See Augustine, *Contra Epist. Perpertiani*, lib. iii, cap. 29.

*Musurus*, Marcus, a learned Italian ecclesiastic, was a native of the island of Candia; emigrated to Venice about the end of the 16th century, and taught in the University with great success. After he proceeded to Rome, where Leo X showed him great favor, and nominated him bishop of Epidauro, in the Morea. He had been just invested with this distinction when he died at Rome in 1517. He published the first edition of Atheneus, printed by the publisher *Pignatelli* (1644). See *Musurus*, Marcus, in *Etyiologiae Moysaei Graeci* (Venice, 1499, fol.); reprinted in 1549, in 1594, and in 1710, and some Greek epigrams and other poetry, among them a poem in praise of Plato, prefixed to his edition of that philosopher's works, and translated into Latin verse by Zambelo Acciaioli, *Carmen in Platonem* (Cambridge, 1797).

*Mutevel*, the president or chief ruler of a Moham- medan mosque in Turkey, into whose hands the reve- nue is regularly paid.

Muth, Placidus, a German Roman Catholic theo- logian, was born at Poppenhausen, near Schweinfurt, Dec. 30, 1758; received his education at Wurzburg and Erfurt; then entered, at the age of twenty-four, a con- vent near Erfurt, and was ordained to the priesthood in 1783. In 1754 he was elected abbot of Bischofsrode and Frankenrode, under the title of Placidus the Second, and also provost at Celle. In 1797, after introducing to the prince-elector of Meutz the idea of a more thorough education in convents, he was appointed archiepiscopal head of his order. He died 1798. He went, after the secularization of his convent, to Erfurt, where he was appointed chief counsellor of schools and government, and also director of the gymnasium at that place. He died in 1821. His most important works are: *Disquisitio historico-critica in bibliaugum Comitia de Glicenic, cunus monumentum est in ecclesia S. Petri Erfurdo*; *una cursum systematica theologica catholica synops* (Erfordis, 1788, 8vo)—Über die Verhältnisse der Philosophie und Theologie nach Kantischen Grundgedichten (ibid. 1791, 8vo).—Progr. de novis perantique Universi- sitati incrementa, de causis Thaursique, vulgaris Co- mitatit de Glicenic decuritum, nec non de pluribus insularum Universitatar litterarum Erfordiensis dono data. *Parti- cula i et ii* (ibid. 1812-18, 4to).—Gedächtnissierzur Befreiung Pius VIII. aus der Gefangenschaft zu Fomenti- bleau und seiner Rückkehr in seine Staaten (ibid, 1814, 8vo). See Döring, *Geschichte Theol. Deutschlands*, s. v.

Muth, Rufus. See *Mutianus*.

Muth-lab'ben (Hebrew, fully, *al muth labben*), יְּהַנְנֶה הָעָלָם, upon the death to the son; Sept. τινι τοις κρυφίνοις τοις νοοί; Vulg. pro occultis filiis; Ant. Ver. "upon Muth-labben", a phrase occurring only in *Deut.* ch. xxv., v. 10 of the Septuagint, and is probably the name of a specimen, that have been made regarding its import: 1. Perhaps the favorite opinion of modern critics, of Gesenius and De
Wettle among the rest, is to connect the Hebrew words so as to read 'alaloth labben, "with the voice of virgins [to be sung] by boys." But, granting the lawfulness of this critical effort, there is considerable difficulty in extracting the translation desiderated. The word 'alalonoth does occur in probably some such meaning (Psa. xlvii, title; 1 Chron. xv, 20); and it has been defended with much pertinacity by critics who modify the opinion now under consideration, to the extent of arriving at this word by altering the vowel-points as well as the division of the words. See Alaloth. Yet, after doing so, they have to face an awkward difficulty, arising from the absence of the preposition 'al upon which they require this little word to become the first syllable of their noun. It is evident that the Sept. and Vulgate must have read הַלְבֵּן (halben), "concerning the mysteries," and so the Arabic and Ethiopic versions. The Targum, Symmachus (τῷ ταυτῷ τοῖς νήσοις), and Jerome (super morte filiis), in his translation of the Hebrew, adhered to the received text, while Aquila (εἰς καὶ αὐτὸν τὸ δικαίωμα), retaining the consonants as they at present stand, read al-labben as one word, הַלְבֵּן, "youth," which would be the regular form of the abstract noun, though it does not occur in Biblical Hebrew. In support of the reading הַלְבֵּן as one word, we have Kennicott's MSA, and the assertion of Jarchi that he had seen it so written, as in Psa. xlviii, 14, in the Great Masorah. If the reading of the Vulgate and Sept. be correct with regard to the consonants, the words might be pointed thus, הַלְבֵּן, "upon Alaloth," as in the title of Psa. xlvii; and הַלְבֵּן is possibly a fragment of הַלְבֵּן, "the sons of Korah," which appears in the same title. 2. It has been very common to suppose that there is here the name of a person. The Jewish commentator Kimchi, according to Gesenius, mentions that some explained it, "upon the vessel, a person wholly unknown." But commonly the first syllable of labben has been taken to be the ordinary Hebrew preposition, "to, for, concerning." The Targum renders the title of the psalm, "On the death of the man who came forth from between (הַלְבֵּן the camps," alluding to Goliath, the Philistine champion (בִּשְׂמָהוֹ, 1 Sam. xvii, 4). That David composed the psalm as a triumphal song upon the slaughter of his gigantic adversary was a tradition which is mentioned by two writers of quite another age, and which is confirmed by the evidence of the inscription, while preserved at present by Furst, is that it should be translated "upon the death of Ben," who is named among the Levites appointed to preside over the music at the removal of the ark to its resting-place (1 Chron. xv, 18), while he is not named in the narrative of the actual removal; indeed, his place seems to be filled by another, Azaziah (ver. 20, 21); and we are reminded of another, sudden death of Uzzah, when the removal was attempted on an earlier occasion. Hengstenberg, however, has revived an old opinion of Grotius—originally mentioned, but not adopted, by Jarchi—that Labben is transposed for the sake of the rhyme, and so much with reference to the individual man, as with reference to "the folk," which is emphatically noticed as the meaning of his name; and he thinks the psalm refers a good deal to the end of the wicked. Donath supposes that Labben was the name of the man who warred with David in those days, and to whose reference is made as "the wicked" in verse 5. Arnaould quoted by Dr. Gill, and his Ezech., translates the Hebrew as "the companion," and renders him with Saul. Jarchi says that some regarded Labben as the name of a foreign prince who made war upon the Israelites, and upon whose overthrow this song of praise was composed. 3. The word ben being the common Hebrew word for "son," and so translated in this title by the reference is made as "the wicked" in verse 5, which has been objected against, "upon the death of the son," or "upon dying in reference to the son," viz. David's son Ab.
and as such contributed largely to prepare the minds of literary men throughout Germany for a rupture with Rome. The modest George Spalatin, jun., was an inti- mate friend and pupil of his; and when Spalatin was called to position in 1508, he dismissed him thus:

"Ito bona scribas dextra pede aliae fancio, Felix optatum carpe vitator liter."

Aula petat, Spalatine! tibi tribunator honoris, Ito precareae que nocturna putarum;

Mutianus came into intimate connection with the Er- furt humanists, and the Erfurt scholars visited him fre- quently (see C. Krause, Euvic. Condus. [Hannau, 1863]), esteeming him as their head and leader. He outran his generation in thought, but lagged behind it in action. He at first hailed Luther with joy, but in 1521 he with- drew his support from the Reformers. He decided to remain in the Church of Rome, and is said to have lived in such poverty that he was obliged to beg for bread. He died on Good-Friday, 1586. It has been well said that Mutianus was a Reformer until the Reformation became a fearful reality. He was a learned, ingenious, amiable, timid, irresolute man, whose soul did not partake of the energy of his intellectual faculties. See Strauss, Uebrig v. Huten, i, 42 sq.; ii, 336 sq.; Kampfschulte, Die Universität Erfurt in ihrem Verhältniss zu d. Humanismus und d. Reformat. (Trèves, 1858) i, 74 sq.; ii, 227 sq.

Mutianus, Scholaeticus. See Mucianus.

Mutilles de Runic. See Skopis.

Mutschelle, Sebastian, a German Roman Cath- olic theologian, was born Jan. 18, 1749, at Altershausen, Bavaria. He was educated at Munich, entered in 1755 the Order of Jesus, and completed his education at In- golstadt in 1776. He was then appointed vicar at Mat- tigkofen, and in 1779 canon of the convent of St. Veit at Freyengien, and ecclesiastical councillor to the consistory, and director of the community at the same place. Several difficulties into which he was drawn by publications of his made it agreeable to him to resign his clerical position, and he gave himself up to literary labors, es- pecially the preparation of several works. He also taught privately Latin, French, and the fine arts. In this pe- riod (1784-86) he published Geschichte Jesu aus den vier Evangelien, also Kommniss und Liebe des Schöpfers aus der Betrachtung der Geschöpf, and Bemerkungen über die sämtlichen Evangelien (of this a second edi- tion was published in 1790). In the midst of all his literary work he was surprised by the renouncement to his former positions by Max Fropp, count of Törting; but he yet found leisure time for literary work, and published in 1791 and 1792, Unterrichtung eines Vaters mit seinen Söhnen über die ersten Grundwahrheiten der christlichen Religion, and Christkatholischer Unterricht, wie man gut und seelig werden könne. The first fruit of his thorough knowledge of Kant was his work, Über das sittliche Gut (1786). But again his enemies were at work to get him out of his position, and found a good opportunity to work against him, as he asked the differ- ent convents for contributions towards a continuall fund for his remodelled schools. Mutschelle again resigned his position at Altershausen in 1789, but was appointed pastor at two Bauern kirchen, near Munich. This position afforded much leisure time, which he filled up by literary work. He then published Bemerkungen über die festtäglichen Evangelien; also Kristliche Beiträge zur Metaphysik. In 1799 he was also appointed professor at the university at Munich, and held the position of ordination: Was soll die Schule für die Welt sein? He died Nov. 28, 1800. He has published, besides the works already mentioned, Gebards und Jugendgeschichte Jesu (Munich, 1784, 4to) - Über das sittliche Gut (ibid. 1786, 2 vols. 4to) - Oratio ante electionem pro Episcopi ac Principis catholici in collationem (Munich, 1788, 3to). - Die heiligen Schriften des Neuen Testaments, übersetzt (Munich, 1789-90, 2 vols. large 4to). - Vermischte Schriften (ibid. 1793-98, 4 vols. sm. 8vo).

Mutter (מורתה, mahkim, mutterer), in Isa. viii, 19, refers to the murmuring or indistinct enunciation of wizards and soothsayers in uttering their spells. See DIVINATION.

Mutta, a sacred town of the Hinds, is the capital of a district of the same name, ninety-seven miles south- south-east of Delhi, on the right bank of the Jumna. Access is had to the river—which is considered by the Hindús as a special sanctity—by numerous embankments, ornamented with little temples: and its banks are every morning and evening crowded by devotees of all ages and both sexes to perform their religious exercises. In Hindú mythology it is regarded as the birthplace of Krishna (q. v.). In honor of the monkey-god Hanum- ana, it is much respected and adored, being allowed to swarm everywhere. There are also a great number of sacred bulls at large without owners.

Mutinus, a deity among the ancient Romans who averted evil from the city and commonwealth of Rome. He was identical with the Phallus or Priapus, who chiefly delivered from the power of demons. Mutinus had a temple inside the walls of Rome, which existed until the time of Augustus, when it was removed out- side.

Mutzenbecher, Erdras Heinrich, a German theologian, was born at Hamburg March 26, 1744. He was educated at Hamburg and Göttingen, then acted for a while as tutor of the children of the baron of Stein- berg. In 1774 he was appointed assistant of the eccle- siastical faculty and second minister of the university church of Oldenburg, while then assistant of the Philologische Bibliothek. In 1775 he was called as pas- tor to the evangelical church at the Hague, and in 1778 was appointed chief minister of all evangelical Luther- an congregations at Amsterdam, and in 1789 general superintendent and counsellor of the consistory of Ob- denburg, where he died, Dec. 21, 1801. His most im- portant works are, J. C. Ibel Nover Theaurus philolo- gicus sive Lexicon in lso alio interpretes et scripto- rum aporophaeos Veteris Testamenti (Hage Comium, 1779-80, 3 vols. large 8vo) - Gesammbuch der öffentlichen und häuslichen Anachter für das Herzogthum Oldenburg, mit einem Anhang von Gebeten (Oldenburg, 1791, 8vo). - Der kleine Katschmacher Dr. Martin Luther's work den fünf Hauptsätzen, mit kurzen Anmerkungen für Lehrer und Schüler (ibid. 1797, 12mo). - Gebete (Bremen, 1801, 8vo). See Döring, Gelehrte Theol. Deutsch- lands, s. v.

Musae, in-Noseil. See Spain.

Musiano, Giroldo, a distinguished Italian painter, was born at Acquafreda, near Brescia, in 1528. He painted number of Bibles and religious subjects, one of which, the Resurrection of Lazarus, was greatly admired by Michael Angelo, who pronounced him one of the greatest painters of his time. Musiano is chiefly
celebrated by his efforts to advance the art of working in mosaics, which, up to this period, was merely an ornamental art of inlaying stones, but which he perfected almost to a rivalry with painting. His commission by Gregory XIII, who employed him to paint a picture of St. Paul the hermit, and another of St. Anthony, for the church of St. Peter, Sixtus V also held Muzio in esteem, and intrusted to him the designs for the base-reliefs of the column of Trajan. At the instance of this artist, pope Gregory founded the Academy of St. Lukas, which Sixtus confirmed by a brief; and Muzio gave two houses to the institution. He also built the Capella Gregoriana at Rome. He died at Rome in 1590, and was buried in the church of Santa Maria Maggiore, near the spot where his picture of the Resurrection of Lazarus was placed. Many of his pictures have been engraved. His celebrated picture, Christ Washing the Feet of his Disciples, which is in the cathedral of Rheims, has been engraved by Despiau. See Lanci, Hist. of Painting, transl. by Roecke (Lond. 1847, 3 vols. 8vo), i. 417; ii. 184; Spooner, Biog. Hist. of the Fine Arts (N. Y. 1865, 2 vols. 8vo); Jameson and Eastlake, Hist. of Our Lord (Lond. 1864, 2 vols. 8vo), i. 361.

Muzio (or Mutio), Girolamo Muzio, an Italian writer, noted for his opposition to the Reformation and its adherents, and hence surnamed "Mallex Heraicorum," was born at Padua in 1496 and died in 1576. He wrote several polemical treatises against Luther, and various other works in prose and verse, none of which are of any value in our day except as literary curiosities. See Tiraboschi, Storia della Litteratura Italiana, s. v.

Muzzaireli, Alphonso, an Italian theologian, was born in 1749, and was educated at the college at Franto. He was then ordained, and entered the Order of Jesus, but was compelled to leave it five years after, as he was appointed canon at Ferrara; he was afterwards director of the college at Parma, and finally called by pope Pius VII to Rome to take the position as theologian of the Pontificia. He published while there several works against the irreligioseness of his time. He was in 1809 transported to Paris by the French, on account of his opposition to the Bonapartist party, and he died in 1815. His most important works are, Il buon uso della Logica in modo della Logica Aristotelica, written in French and Latin: — L'Emilio disingannato contro Rousseau: — Influenza de' Romani Punifici nel governo di Roma avanti Carlo Magno: — Memorie del Giacobboino: — Dissertationes selecte de tractatae Romani Punifici in Concilia Generalibus, etc.

Muzzle (dɔpt, chassam), to step the nostrils, as in Ezek. xxxix, 11). In the East grain is usually threshed by sheaves being spread out quite a level spot, over which oxen, cows, and younger cattle are driven, till by continued treading they press out the grain. One of the injunctions of the Mosaic code is, "Thou shalt not muddle the ox when he treadeth out the corn" (Deut. xxx, 4). From the monuments we learn that the ancient Egyptians likewise suffered the ox to tread out the corn unmuddled. The origin of this benevolent law," says Michaelis, "with regard to beasts, is seemingly deducible from certain moral feelings or sentiments prevalent among the people of the early ages. They thought it hard that a person should be employed in the collection of edible and savoury things, and have them continually before his eyes, without being permitted to take them; and there is in fact a degree of cruelty in placing a person in such a situation, for the sight of such dainties is tormenting, and the desire to partake of them increases with the risk of the prohibition. Add to this that, by prohibitions of this nature, the moral character of servants and day-laborers, to the certain injury of their masters' interests, seldom fails to become corrupted, for the provocation of appetite at the sight of forbidden gratification will, with the greater number, undoubtedly overpower all moral suggestions as to their duty. Therefore when Moses, in the terms of this benevolent custom, ordained that the ox was not to be muzzled while threshing, it would seem that it was not merely his intention to provide for the welfare of that animal, but to enjoin with the greater force and effect that a similar right should be allowed to human laborers. This applied to the ox as the lowest example, and what held good in reference to him was to be considered as so much the more obligatory in reference to man." Comp. Hos. x, 11; i Cor. ix, 9-11; 1 Tim. v, 18. This ancient Mosaic law, allowing the ox, as long as he is employed in threshing, to eat both the grain and the straw, is still observed in the East. Mr. Robinson, when at Jericho, in 1888, observed the process of threshing by oxen, cows, and younger cattle. He says, "The precept of Moses, 'Thou shalt not muddle the ox when he treadeth out the corn,' was not very well regarded by our Christian friends; many of their animals having their mouths tied up; while among the Mohammedans I do not remember ever to have seen an animal muzzled. This precept serves to show that of old, as well as at the present day, only neat cattle were usually employed to tread out the grain." See Threshing.

Mwetyi, a Great Spirit venerated by the Shekani and Bakale people in Southern Guiana. The following account of him is given by Mr. Wilson in his Western Africa: "He is supposed to dwell in the bowels of the earth, but comes to the surface of the ground at stated seasons, or when summoned on any special business. A large, flat house, of peculiar form, covered with dry plantain-leaves, is erected in the middle of the village for the temporary sojourn of this spirit, and it is from this building that he gives forth his oracular answers. The house is always kept perfectly dark, and no one is permitted to enter it except those who have been initiated into all the mysteries of the order, which includes, however, almost the whole of the adult male population of the village. Strange noises issue forth from this dark den, not unlike the growling of a tiger, which the knowing ones interpret to suit their various purposes. The women and children are kept in a state of constant trepidation; and, in all probability, the chief ends of the ceremonies connected with the visitation of this being is to keep the women and children in a state of subordination. He is the great African Bluebeard, whom every woman and child in the country holds in the utmost dread. Every boy, from the age of fourteen to eighteen, is initiated into all the secrets pertaining to this thing. The term of his sojourn is usually limited to a year or more; during which period they are subjected to a good deal of rough treatment—such, undoubtedly, as makes a lasting impression both upon their physical and mental natures, and prevents them from divulging the secrets of the order. At the time of matriculation a vow is imposed upon them, as refraining from a particular article of food or drink, and is binding for life. When Mwetyi is about to retire from a village where he has been discharging his manifold functions, the women and children, and any strangers who may be there at the time, are required to leave the village. What ceremonies are performed at this time is known, of course, only to the initiated. When a covenant is about to be performed among the different tribes, Mwetyi is always invoked as a witness, and is commissioned with the duty of visiting vengeance upon the party who shall violate the engagement. Without this their national treaties would be without force, and without any sanctions or guarantees for its observance. The Mpongwe people sometimes call in
MYCENAE

780

MYCLES

the Shekasis to aid them, through the agency of this Great Spirit, to give sanctity and authority to their laws."

Myciss, a surname of the goddess Demeter, or Ceres, derived from Mycelus, in Boeotia, where she was worshipped.

Myconius, Friedrich, an intimate friend of Luther, and one of the Reformers of the 16th century, was born at Lichtenfels, Franconia, Dec. 26, 1541, of religious parents, and was educated at Annaberg. He joined the Franciscans at that place in 1510. While in that body he vainly strove to satisfy the yearnings of his heart by diligent application to his mystical duties and the study of such works as Peter Lombard's Magister Sententiarum, the writings of Alexander of Hales, Bonaventura, Gabriel Biel, and even Lyra's Biblical commentaries. Finally, Luther's ninety-five theses fell into his hands. He at once adopted the principles therein contained. In the mean time he was successively sent to the convents of Leipsic and of Weimar in 1512, and was ordained priest in 1516. But, since he had openly declared himself in favor of the evangelical doctrines, he had to undergo all sorts of annoyances from his superiors. He remained steadfast, however, strengthening himself by secretly reading the works of Luther; consequently his asylum was sought by Vitzthum. Finally, his superiors contemplating his removal to Annaberg, he fled, and soon after (in 1524) appeared at Zwickau as an evangelical preacher. In the same year he was sent to Gotha by duke Johann to introduce the Reformation, and met with great success in this difficult task. He paid particular attention to the schools. In connection with Melanchthon, Justus Menius, Christopher von Planitz, Georg von Wagenheim, and Johann Cotta, he made two visitations to Thuringia, in 1528 and in 1538, to improve the organization of the churches and schools. He took part also in the conferences of Marburg (1529), Wittringen (1536), Smalcald (1537), Nuremberg, Frankfort (1538), and Hagenau (1540), in which he was often in contact with Melanchthon. He was attached as theologian to the embassy sent by the elector to king Henry VIII in 1538 for the purpose of introducing the Reformation into England. On the death of duke George, Myconius, together with Cruciger, Pfeiffer, and M. Balthasar, was intrusted with the mission of introducing the Reformation into Saxony, and particularly into Leipsic. Yet he always remained especially attached to Gotha and Thuringia. In the former city he found the afterwards celebrated gymnasium, and his efforts were very effectual in the reformation of the institutions of learning the necessary endowments. His health failing in 1541, he wrote to Luther that he was "sick, not unto death, but unto life." But he recovered, and, according to Luther's prayer, outlived him several months. He died April 7, 1546. Myconius was an active writer, but most of his productions were pamphlets and letters; his chronicle of Gotha was published by S. Cyprian under the title Fr. Myconis historia Reformata (1715). Biographies of Myconius are to be found in Melchior Adam, Vite Theologorum (Franck, 1705, vol. i); Sagittarii Historia Gothana (Jena, 1707); Junker, Bibliotheca Methodica (W. Handschin, Kirsch, and Kirchen- u. Schulestaat d. Herzogthum Gotha, 1758, i, i sq.); Lederbore, Myconius (Gotha, 1854); Herzog, Reel.-Encyklopädie, x, 137; Middleton, Evangel, Biog. i, 259; Hartwick, Church History, Reformation, p. 110, 114, 119. (J. N. P.)

Myconius (also known as Geisschäler, his name before he joined the Protestants), Oswald, a Swiss Protestant theologian, was born at Luzern in 1456 and was educated at Basle. He taught for a while, accepting first a call to Zurich as director of a school; but he was only three months there when he recalled to his native place to take charge of the high school. Taking a leading part in the new doctrine, which had made its appearance, he was in 1529 again discharged, and returned to Zurich to his old position. When Zwingli was killed at the battle of Kappel, and the citizens of Zurich inclined a further step towards a political conversion, Myconius was appointed deacon at St. Alban, chief minister of the city of Basle, and professor of the New Testament. He resigned the latter position in 1541, and died Oct. 14, 1562. Myconius was a true confessor of Zwingli's doctrine. He was largely instrumental in the publication of the Basle Confession, and for the sake of a union of all particles interests favored the Helvetian Confession of 1536. His tolerance towards Lutherans on their confutation doctrine subjected him to many trials from the Zwinglians, who, often, though unjustly, questioned his faithfulness to them. His most important works were: "De gratia obitus et de evangelico ordine," "De virtute et inercia," "De liberia rite educandis:" De crupula et christiana. See Melchior Adam, Vite Theolog. German. (Heidelberg, 1620, p. 229 sqq.; Merle d'Aubigné, Hist. of the Ref. in Switzerland; Kirchhofer, Leben u. Schriften d. Vater u. Begründer eines christl. Kirch. (Elberf, 1837, Svo), ii, 309-447. (J. H. W.)

Myers, Benjamin F., a minister of the Methodist Episcopal Church, was born in Chillicothe, Ohio, April 19, 1801. He was converted at the early age of nine years, and identified himself with the Methodists. In 1838 he was admitted into the Ohio Conference, and for ten years filled charges respectively in Wooster, Somersett, Cambridge, Newark, Granville, and Hebron. His health failing he returned from ministry in 1848, and became judge of Licking County, Ohio. In 1850 he migrated to California, and in 1857 joined the California Conference, where for the next twelve years he was actively engaged in Christian work in Sutter County, Weaverville, Jackson, Coloma, Cacheville, Bodega—Vallejo, Clear Lake, and Lithia. He was superannuated in 1869, and from that time until his death, which occurred in Stockton, Cal., July 18, 1874, gave himself to the work of re-examining the structures of the Christian Church against the attacks of infidelity and scientific research. See Minutes of Annual Conferences, 1874, p. 112.

Myers, Lewis, a minister of the Methodist Episcopal Church, was born in the vicinity of Indian Fields, Colleton District, S. C. He was of German extraction. He obtained his education in an academy near Washington, Ga., and became an itinerant preacher in 1799 in South Carolina, preaching on the Little PeeDee and Anson Circuit. In 1800 he was appointed to the Orangeburg Circuit; in 1808 he was appointed to the Bush River and Cheraw Circuits, had been superannuated in 1809, and was an elder and deacon by bishop Asbury. In 1802 he was stationed in the Broad River Circuit. In 1803 he was ordained elder, and changed to the Little River Circuit. In 1804 and 1805 he was respectively at Ogeechee and Bladen circuits. In 1806 he was at Charleston. In 1807, 1808, and 1809 he was presiding elder of the Solida District; in 1810, 1811, 1812, and 1815, of the Ogeechee District; and in 1814, 1815, 1816, and 1817, of the Oconee District. In 1818 and 1819 he was stationed at Charleston. In 1820, 1821, 1822, and 1823 he was presiding elder of the Edisto District. In 1824 he was stationed at Georgetown. Having labored incessantly for a quarter of a century, he was appointed in 1825 as superintendent on the Effingham Circuit, a spasmodic asthma rendering him unfit for more active work. He was finally made superannuated, and settled at Goshen, Effingham County, Ga., where he died, Nov. 16, 1851. From the time of his retirement from active service until his death he was busily engaged with a school, and occasionally preached. Lewis Myers was well known among the Methodists for his wise, pithy, and practical remarks. His style of preaching was direct and forcible, with very little ornament of gesture; his illustrations often bordered on the humorous, from the
quaintness with which the subject was represented. See Dr. James Osgood Andrew, in Sprague, Annals of the Amer. Pilgr., vii, 321 sq.

Myësis (μύησις, initiation), a designation of bap-
tism among the Greek fathers, because they considered it to be the admittance of men to all the sacred rites and mysteries of the Christian religion. This term, as well as the form of the word, is met with in the writ-
ings of Cyril of Jerusalem, was intimately connected with the secret discipline, and fell into disuse with the termination of that system.

Myiagros, a hero who was invoked at the festi-
val of Athens, celebrated at Aliphera, as the protector against flies.

Myles, John, a minister of the Anglican establish-
ment, who flourished during the colonial period of this country, was born in England about the latter half of the 17th century. He migrated to America, and in 1689 succeeded Mr. Redcliff as rector of the Episcopal church that is now known as King's Chapel, Boston. In 1692 he returned to England for aid for his people. In 1696 he again came to America, bringing with him much Church furniture, and several costly gifts from queen Mary and king William. He died about 1726. See also in Hist. of the Colonial Church, i, 681, 683; iii, 569, 580, 592, 594.

Myllita (perhaps מ"לכית, Myllitza, "who causes to bear"), a name which, according to Herodotus (i, 181), was given by the Assyrians to the goddess Aphro-
dite as the generative principle in nature. "She was apparently worshipped among the Babylonians, who gradually spread her worship through Assyria and Per-
sis. She was originally, like almost every other mytho-
logical deity, a cosmic symbol, and represented the fe-
male portion of the twofold principle through which all creation bursts into existence, and which alone, by its united active and passive powers, upholds it. My-
llita is to a certain degree the representative of Earth, the
mother, who conceives from the Sun Bel or Baal. Myllita and Baal together are considered the type of the Beneficent. Procreation thus being the basis of
Myllita's office in nature, the act itself became a kind of
worship to her, and was hallowed through and for her. Thus it came to pass that every Babylonian woman had once in her life to give herself up to a stranger, and thereby consecrate her person consecrated to the
great goddess. The sacrifice itself seems, especially in the early stage of its introduction among the divine rites of the primitive Babylonians, to have had much less of the repulsive nature, in which the eyes of highly-
cultivated nations, must be attached to it; and it was
only in later days that it gave rise to the proverbial
Babylonian lewdness. Herodotus's account of this sub-
ject must, like almost all his other stories, be received with great caution" (Chambers). In Babylonia this goddess was called Belis or Bilis, i. e. "the Lady." She is commonly represented as the wife of Bel Nimrud (Belus), and the mother of his son Nin, though she is also called the wife of her son Nin. She united the characteristics of the classical divinities Juno, Venus, and Diana. Myllita had temples at NInvech, Ur, Erech, Ninur, and Babylon. The Balsia of the Phoenicians was the same in name and character. The young women of Byllus, like those of Babylon, dressed in their service their virginity, and gave the price they received to the temple of the goddess. The
Derceto of Ascalon, the Ashera of the Hebrews, and the
Ishtar of the Babylonians were kindred deities. See Ashtoreth.

Mylius, Ernst Friedrich, a German theologian, was born at Lübe June 10, 1710. He was educated by his uncle Muschard, afterwards at the gymnasium at Bremen, and at the university at Helsinmünd, and finished his education in 1784 at Jena. He was appointed in 1788 minister at the "Johannes Kirche" inVerden, with which position the connectorship of the school was combined. He accepted in 1742 a call as minister of St. Peter's Church at Hamburg, where he died, Dec. 15, 1774. His most important works are, Entwurf heil-
samer Unterweisungen oder Dispositionen der Evangéli-
emen (Hamburg, 1745-74, 8vo) — Friedenspredigt (ibid. 1760, 4to) — Die Ruh des Gotts aus die Sünden (ibid. 1761, 4to) — Eine Bußpredigt (ibid. 1750, 4to) — Aussch. der Haupt-
sätze und Eintheilungen aus den Entwürfen heilsamer Unterweisungen für die Jahre 1745-59 (ibid. 1759, 8vo), See Döring, Gelehrte Theol. Deutschlands, n. v.

Mylius, Georg (1), a noted German Lutheran di-
vine, was born at Augsburg in 1568; studied at the uni-
versities of Strassburg, Marburg, and Tubingen, and in 1571 became pastor at Augsburg, and later was made superintendent and rector of the evangelical college. In 1584 his opposition to the Gregoryian calendar made him very unpopular, and he was finally driven from the place. He went to Ulm, where he was kindly received; but he remained there only a short time, accepting in 1585 a call to Wittenberg University as professor of theology. When the Philippians gained supremacy at that high school Mylius removed to Jena, soon, how-
ever, to turn back to Wittenberg, where he died, May 28, 1603. Mylius was an industrious student, and pre-
narred numerous exegetical works. See Adam, Vite Theol. Germ. (1820).

Mylius, Georg (2), a German Lutheran divine, flourished in the latter half of the 17th century as minister in Brandenburg, near Königsberg, East Prussia. He died in 1640. Mylius is noted as a German hymnolo-
gist. He was a true follower of the poetical school whose head was Dach (q. v.). Mylius is the author of the well-known German funeral dirge, "Herr, ich denk, an jene Zeiten," etc.

Myrion, Robert, an English architect, was born in 1724 at Edinburgh. His father was of the same pro-
session. He was studying at Rome he gained the chief architectural prize at the Academy of St. Luke. Of that academy, and of the academies of Florence and Bologna, he was chosen a member. Blackfriars's Bridge, which was begun in 1790, and completed in ten years, is his great work. He finally became surveyor of St. Paul's Cathedral, London. He died May 5, 1811.

Myntchery is the Saxon name for a nunney, nuns being called munkhe. See MYNCKEN.

Mynda (Μυδάς), a town on the coast of Caria,
between Miletus and Halicarnassus, the convenient po-
sition of which in regard to trade was probably the rea-
son why we find in 1 Mac. xx, 23 that it was the resi-
dence of a Jewish population. Its ships were well
known in very early times (Herod. v, 30), and its har-
bors is specially mentioned by Strabo (iv, 668). It was
originally a Dorian colony of Truscene, and was protect-
ed by strong walls (Pausan. ii, 60, 8), so that it success-
fully resisted Alexander the Great (Arrian, Alex. i, 21).
Its wine was famous as an aid to digestion (Athen, i, 32). Diogenes Laertius (vi, 2, 57) records a bon mot of Diogenes, the cynic, of which it is the theme. Seeing its huge galls while the city itself was but small, he ex-
claimed, "Men of Myndas, shut the gates, lest the city walk out of them!" The name still lingers in the modern Menteche, though the remains of the city are probably at Gumishli, where admiral Beaufour found an ancient pier and other ruins (Smith, Dict. of Class. Geog.,

Myntchery. See MYNCKEN.
Myrrh (Lat. myrrha, fem. of myron; allied to semolica) is the name of a class of Egyptian monasteries who flourished in 1009 and 1017, and were probably Benedictines. They differed from nuns in being of younger age, and under a rule more strict. See Walcot, Sacred Archaeology, s. v.; Lea, Sacrotemporal Celibacy, p. 179, note.

Mynster, Jacob Peder, a Danish theologian, was born at Copenhagen Nov. 8, 1775. He was educated at the university of his native city, was employed some time in teaching, and became in 1801 pastor in Seeland. In 1811 he was appointed assistant minister of the principal church of Copenhagen, in 1828 preacher to the court, and in 1830 to the royal family, and in 1834 bishop of Seeland. His writings comprise a great number of sermons, dissertations introductory to the study of the New Testament, and on other Biblical subjects, and several works on doctrinal theology. His admirable Ordination Sermons and other of his works have been translated in the course of his miscellaneous publications, Blandeke Schriften, begun in 1822, was completed in 6 vols. in 1866. He died in Copenhagen Jan. 30, 1864.

Myra (Modern Greek Μύρα), one of the chief towns of Lycia, in Asia Minor (Prot. v, 8, 6). It is "interesting to us as the place where Paul, on his voyage to Rome (Acts xxvii, 5), was removed from the Adramyttian ship which had brought him from Cæsarea, and entered the Alexandrian ship in which he was wrecked the coast of Malta. See Adramyttian. The travellers had availed themselves of the first of these vessels because their course to Italy necessarily took them past the coasts of the province of Proconsular Asia (ver. 3), expecting in some harbor on these coasts to find another vessel bound to the west. This expectation was fulfilled (ver. 6). It might be asked how it happened that an Alexandrian ship bound for Italy was so far out of her course as to be at Myra. This question is easily answered by those who have some acquaintance with the navigation of the Levant. Myra is nearly due north of Alexandria, the harbors in the neighborhood are numerous and good, the mountains high and easily seen, and the currents set along the coast to the westward (Smith's Voyage and Shipwreck of St. Paul). Moreover, to say nothing of the possibility of landing or taking in passengers or goods, the wind was blowing about this time continuously and violently from the N.W., and the same weather which impeded the Adramyttian ship (ver. 4) would be a hindrance to the Alexandrian (see ver. 7; Conybeare and Howson, Life and Epistles of St. Paul, ch. xxiii). Some unimportant MSS. having Νοτος in this passage, Grotius conjectured that the true reading might be Νοτος (Bentleii Critica Sacra [ed. A. A. Ellis]). This supposition, though ingenious, is quite unnecessary. Both Limyra and Myra were well known among the maritime cities of Lycia. The harbor of the latter was strictly Andrace, distinguished from it by two and three miles, but the river was navigable to the city (Appian, B. C. iv, 82)."

Myra lay about a league from the sea (in N. lat. 36° 18', E. long. 30°), upon rising ground, at the foot of which flowed a navigable river with an excellent harbor (Andrace) at its mouth (Strabo, xiv, p. 666; Pliny, Hist. Nat. xxxii, 8). In later times the emperor Theodosius raised it to the rank of the capital of Lycia (Hierot. p. 684). The town still exists, although in decay, and bears among the Greek inhabitants the ancient name of Myra; but the Turks call it Demre (see Vorbiger, in Trans. Inst. xii, 291). It is a poor village, and few of the fine remains of antiquity (Leake, Asia Minor, p. 183), which have been minutely described by Fellows (Discoveries in Lycia, p. 169 sq.) and Texier (Descrip. de l'Asie Mineure; comp. Spratt and Forbes, Travels in Lycia, i, 131 sq.). The tombs, enriched with ornament, and the grove of them having inscriptions in the ancient Lycian character, show that it must have been wealthy in early times. Its enormous theatre attests its considerable population in what may be called its Greek age. In the deep gorge which leads into the mountains is a large Byzantine church, a relic of the Christianity which may have begun with Paul's visit. It is reasonable to conjecture that this may have been a metropolis of a capital of the Roman province. In late times it was curiously called the port of the Asiatic, and visited by Anglo-Saxon travellers (Bohn's Early Travels in Palestine, p. 59, 1848). Legend says that the patron saint of the modern Greek sailors, was born at Patara, but the name of Patara is also Myra, and his supposed relics were taken to St. Petersburg by a Russian frigate during the Greek revolution. See Asia Minor).

Myrrh is the rendering in the Auth. Ver. of two Heb. and one гр. term. The following account is a collective view of the subject:

1. "Av or ين, mehr, apipha, doubtless from a Hebrew root (signifying to flow, or else from another expressive of its bitterness), though some of the ancients traced it to the mythical Myrrha, daughter of Cinyres, king of Cyprus, who fled to Arabia, and was changed into this tree (Ovid, Art. Am. i, 288). Myrrh formed an article of the earliest commerce, and was highly esteemed by the Egyptians and Jews, as well as by the Greeks and Romans (Pliny, xiii, 2; Athen. xxy, 688; Dioscor. i, 73), as it is still both in the East and in Europe. The earliest notice of it occurs in Exod. xxx, 23, "Take thou also unto thee principal spices, of pure myrrh five hundred shekels." It is afterwards mentioned in Esth. i, 12, as employed in the purification of women; in Ps. xiv, 8, as a perfume, "All thy garments smell of myrrh and aloes, and cassia," also in several passages of the Song of Solomon (vii, 7, 9). On the use of myrrh, and to the hill of frankincense" (iv, 6); "My hands dropped with myrrh, and my fingers with sweetness of myrrh" (v, 6); in which both passages, according to Rosenmuller, it is profuscmyrrh. We find it mentioned in Matt. ii, 11 among the gifts presented by the wise men of the East to the infant Jesus, "gold and frankincense and myrrh." It may be remarked as worthy of notice that myrrh and frankincense are frequently mentioned together. In Mark xv, 23 we learn that the Roman soldiers "gave him (Jesus) to drink wine mingled with myrrh, but he received it not.""

Colin of Myra.

Myrrh was employed as a perfume; it was used in the purification of women; and it was used in the preparation of the incense used in the temple. It was also used in the making of ointments and perfumes. The tree from which it was obtained was called Myrrha, and it was a common practice to plant trees near the temple of the goddess of myrrh. The tree was also used for its wood, which was prized for its fragrant odor and was used in the making of incense. The tree was also used for its oil, which was used for the anointing of the dead and for the purification of women. The tree was also used for its resin, which was used in the making of ointments and perfumes. The tree was also used for its fruit, which was used for the making of ointments and perfumes. The tree was also used for its wood, which was used in the making of incense. The tree was also used for its oil, which was used for the anointing of the dead and for the purification of women. The tree was also used for its resin, which was used in the making of ointments and perfumes. The tree was also used for its fruit, which was used for the making of ointments and perfumes. The tree was also used for its wood, which was used in the making of incense. The tree was also used for its oil, which was used for the anointing of the dead and for the purification of women. The tree was also used for its resin, which was used in the making of ointments and perfumes. The tree was also used for its fruit, which was used for the making of ointments and perfumes. The tree was also used for its wood, which was used in the making of incense. The tree was also used for its oil, which was used for the anointing of the dead and for the purification of women. The tree was also used for its resin, which was used in the making of ointments and perfumes. The tree was also used for its fruit, which was used for the making of ointments and perfumes. The tree was also used for its wood, which was used in the making of incense. The tree was also used for its oil, which was used for the anointing of the dead and for the purification of women. The tree was also used for its resin, which was used in the making of ointments and perfumes. The tree was also used for its fruit, which was used for the making of ointments and perfumes. The tree was also used for its wood, which was used in the making of incense. The tree was also used for its oil, which was used for the anointing of the dead and for the purification of women. The tree was also used for its resin, which was used in the making of ointments and perfumes. The tree was also used for its fruit, which was used for the making of ointments and perfumes. The tree was also used for its wood, which was used in the making of incense. The tree was also used for its oil, which was used for the anointing of the dead and for the purification of women. The tree was also used for its resin, which was used in the making of ointments and perfumes. The tree was also used for its fruit, which was used for the making of ointments and perfumes. The tree was also used for its wood, which was used in the making of incense. The tree was also used for its oil, which was used for the anointing of the dead and for the purification of women. The tree was also used for its resin, which was used in the making of ointments and perfumes. The tree was also used for its fruit, which was used for the making of ointments and perfumes. The tree was also used for its wood, which was used in the making of incense. The tree was also used for its oil, which was used for the anointing of the dead and for the purification of women. The tree was also used for its resin, which was used in the making of ointments and perfumes. The tree was also used for its fruit, which was used for the making of ointments and perfumes. The tree was also used for its wood, which was used in the making of incense. The tree was also used for its oil, which was used for the anointing of the dead and for the purification of women. The tree was also used for its resin, which was used in the making of ointments and perfumes. The tree was also used for its fruit, which was used for the making of ointments and perfumes. The tree was also used for its wood, which was used in the making of incense. The tree was also used for its oil, which was used for the anointing of the dead and for the purification of women. The tree was also used for its resin, which was used in the making of ointments and perfumes. The tree was also used for its fruit, which was used for the making of ointments and perfumes. The tree was also used for its wood, which was used in the making of incense. The tree was also used for its oil, which was used for the anointing of the dead and for the purification of women.
India, Ethiopia, Trogodytica, and Egypt; in which last country it was called bal (בָּל), according to Plutarch, De Iside et Osiride, p. 388 (Kircher, Prod. Copt. p. 175). Plutarch, however, was probably in error, and has confounded the Coptic ab, 'myrrh,' with bal, 'an eye' (Jebb's Texts, ed. 5, Te Water); accordingly bol is the name by which it is universally known throughout India in the present day; and the Sanscrit name is bala, which occurs at least before the Christian era, with several other names, showing that it was well known. But from the time of the ancients until that of Belzoni we were without any positive information respecting the tree yielding myrrh: he supposed it to be produced in Syria (so also Propercius i, 2, 8 and Oppian [Halieut. iii, 403]), and says (Obsequ. ii, 80) that near Rama he met with a thorny shrub with leaves resembling acacia, which he believed to be that producing myrrh (Mimoso agrestis, Spc). Similar to this is the information of the Arabian author, Abul-Fadl, quoted by Celsius, who says that nur is the Arabic name of a thorny tree resembling the acacia, from which flows a white juice, which thickens and becomes a gum. The Persian authors state that myrrh is the gum of a tree common in the Maghrib, that is, the West or Africa, in Zoon (a general name for the Turkish empire), and in Socotra. The Arabian and Persian authors probably only knew it as an article of commerce: it certainly is not produced in Socotra, but has undoubtedly long been exported from Africa into Arabia. It is reported that myrrh is obtained cheap and abundant on the Sumali coast. Bruce had indeed long previously stated that myrrh is produced in the country behind Azab. Mr. Johnson, in his Travels in Abyssinia (1, 249), mentions that 'Myrrh and mimosa trees abounded in this place' (Koranbedulah, in Adal). The former he describes as being 'a low thorny, taggar-looking tree, with bright green trifoliate leaves; the gum exudes from cracks in the bark of the trunk near the root, and flows freely upon the stones immediately underneath. Artificially it is obtained by bruises made with stones. The natives collect it principally in the hot months of July and August, but it is to be found, though in very small quantities, at other times of the year. It is collected in small kidskins and taken to Errur, whence the Hurrah merchants, on their way from Shoa, convey it to the great annual market at Berberah, whence great quantities are shipped for India and Arabia. When the Portuguese first entered these seas, gold dust, ivory, myrrh, and slaves formed the staple commerce of Adal. As early as the time of Arrian, in his Periplus of the Erythraean Sea, we find myrrh one of the articles of export, with frankincense, from the coast of Adal, styled Barbaria. The Periplus mentions the myrrh of this coast as the finest of its kind, and specifies the means of conveying it to Yemen, or Socotra. The first Greek navigators found it, and through their hands it was conveyed into Europe under the name of Sabaean myrrh. Though there is no doubt that the largest quantity of myrrh has always been obtained from Africa, yet it is equally certain that some is also procured in Arabia. This seems to be proved by Ehrenberg and Hempich, who found a small tree in Arabia, near Gison, on the borders of Arabia Felix, off which they collected pieces of myrrh, which, when brought home and analyzed, was acknowledged to be genuine (Nees v. Ehrenberg, Plant. offic. tab. 387). This is the Balsamodendron myrrhae of botanists, which produces the myrrh of commerce; it belongs to the natural order Terebinthaceae, and is a small tree found in Arabia Felix, allied to the Amygdales or incense-trees, and closely resembling the Amygdus Galeaesis, or Balsamodendron Gileadensis. See Balsam. Its stunted trunk is covered with a light gray bark, which flakes off in small flakes, emitting a sweet odor. The characteristic gum-resin exudes in small, tear-like drops, at first oily, but drying and hardening on the bark, and its flow is increased by winding the burned tree. When collected it is a brittle substance, trans-
have been proposed, as lotus (comp. Burchardt, Arab. Sprüchien, p. 394), chestnut, mastic, stacte, balsam, turpentine, pistachio nuts (Michaelis, desert. iv, 1294 sq.).

Junius and Tremellius render it ladanum, which is suitable, and appears to be correct, as an etymological connection may be traced between the words. Ladanum, or gum ladanum, as it is often called, was known to the Greeks as early as the times of Herodotus (iii, 112) and Dioscorides (i, 128), and bore the names of ledos and ledon (ληδός, λεδόνα), which are very closely allied to ladun, the Arabic name of the same drug. A Hebrew author, as quoted by Celsius (Herobot, i, 281), describes it as "an aromatic substance, flowing from the juice of a certain tree." Ladanum is described by Herodotus (iii, 112) as particularly fragrant, though gathered from the beards of goats, where it is found sticking. This is explained by referring to the description of Dioscorides (i, 128), from which we learn that goats, after browsing upon the leaves of the ladanum plants, necessarily have this viscid substance adhering to their hair and beards, whence it is afterwards scraped off. Tournefort, in modern times, has given a detailed description (Voyage, i, 79) of the mode of obtaining ladanum, and relates that it is now gathered by means of a kind of rake with whiplike thongs, which is passed over the plants. When these thongs are loaded with the odoriferous and sticky resin, they are scraped with a knife, and the substance rolled into a mass, in which state it is called ladanum or labdanum. It consists of resin and volatile oil, and is highly fragrant, and stimulative as a medicine, but is often adulterated with sand in commerce. The ladanum which is used in Europe is collected chiefly in the Greek isles, and also in continental Greece. It is yielded by the Cistus, known in Europe by the name of Rock Rose. It is a native of the south of Europe, the Mediterranean islands (especially Candia or Crete, whence the principal kind has derived its modern name), and the north of Africa. There are several species of Cistus, all of which are believed to yield the gum ladanum; but the species mentioned by Dioscorides is in all probability identical with the one which is found in Palestine, viz. the Cistus creticus (Strand, Flor. Palest. No. 289). The C. Creticus

Some authors have been of opinion that one species, the C. rosaceus, is more likely than any other to be the Rose of Sharon, as it is very common in that locality, while nothing like a true rose is to be found there. Ladanum seems to have been produced in Judea, according to writers in the Talmud (Cena. l. c. p. 286). It is said by Pliny (xii, 57), as long before by Herodotus (iii, 112), to be of a produce of Arabia, and this is probably meant by Syria (comp. Pliny, xxvi, 20), it was very likely to have been sent to Egypt both as a present and as merchandise. See Celcius, Herobot, i, 280 sq.; Rosenmuller, Bib. Bot, p. 156; Pococke, Morgenl. ii, 338 sq.; Penny Cyclopaedia, s. v. Ladanum.

Myrtle (Myrtus, kadis); so called, perhaps, from its "springing up rapidly" occurs in Is. xlii, 19; iv, 13; Neh. viii, 15; Zech. i, 8, 10, 11; and is identical with the Arabic kadis, which in the dialect of Arabia Felix signifies the myrtle-tree (Richardson, Pers. and Arabic Diet.). The myrtle is, moreover, known throughout Eastern countries under the name As, by which it is described in Arabic works; and its berries are sold in the bazaars of India under this name (Ullst. Himal. Bot. p. 217). The name Esther is supposed by Simon (Bibl. Cabinet, xi, 269) to be a compound of As and tur, as in Arab. turmes, turmus, and hurmus. The berries of this species appear to be very closely allied in significance to Hadasah, the original name of Esther. Almost all translators unite in considering the myrtle as intended in the above passages; the Sept. has ὅπωρ, and the Vulg. myrtus. The myrtle has from the earliest periods been highly esteemed in all the countries of the south of Europe, and is frequently mentioned by the poets (Virg. Ec. ii, 54). By the Greeks and Romans it was dedicated to Venus (Virg. Georg. iv, 124; Ovid, Met. ix, 384; xi, 252; Amor. i, 1, 29); and employed in making wreaths to crown lovers (Pliny, xv, 36; Dios. Sic. i, 17); but among the Jews it was the emblem of justice. The note of the Chaldee Targum on the name Esther, according to Dr. Harris, is, "they call her Hadassah because she was just, and those that are just are compared to myrtles." The repute which the myrtle enjoyed in ancient times it still retains, notwithstanding the great accession of ornamental shrubs and flowers which has been made to the gardens and greenhouses of Europe. This is justly due to the rich coloring of its dark-green and shining leaves, contrasted with the white stars and the clusters of its flowers, affording in hot countries a pleasant shade under its branches, and diffusing an agreeable odor from its flowers or bruised leaves. It is, however, most agreeable in appearance when in the state of a shrub, for when it grows into a tree, as it does in hot countries, the trunk is often under the cushion of leaves, but the branches and a multitude of small branches are seen deprived of their leaves by the crowding of the upper ones. This shrub is common in the southern provinces of Spain and France, as well as in Italy and Greece; and also on the northern coast of Africa, and in Syria. The poetical celebrity of this plant had, no doubt, some influence upon its reputation in medicine, and medicinal properties are ascribed to it by Dioscorides (i, 127). It is aromatic and astrigent, and hence, like many other such plants, forms a stimulating tonic, and is useful in a variety of complaints connected with debility. Its berries were formerly employed in Italy (Pliny, xv, 35); and still are so in Tuscany, as a substitute for spicery, now imported so plentifully from the far East. A wine was also prepared from them, which was called myrtidiam (Pliny, xv, 37); and their essential oil is possessed of excitant properties (Pliny, xxiii, 44). In many parts of Greece and Italy the leaves are employed in tanning leather. The myrtle, possessing so many remarkable qualities, was not likely to have escaped the notice of the sacred writers, as it is a well-known inhabitant of Judea. Hasselquist and Burckhardt both notice it as occurring on the hills around Jerusalem. It
MYSIA

is also found in the valley of Lebanon. Capt. Light, who visited the country of the Druzes in 1814, says he "again proceeded up the mountain by the side of a range of hills abounding with myrtles in full bloom, that spread their fragrance around," and, further on, "we crossed through thickets of myrtle." Irby and Mangles (p. 222) describe the rivers from Tripoli towards Gallilee as generally pretty, their banks covered with the myrtle, olive, wild vine, etc. Savary, as quoted by Dr. Harris, describing a scene at the end of the forest of Platanes, says, "Myrtles, intermixed with laurel-roses, grow in the valleys to the height of ten feet. Their snow-white flowers, bordered with a purple edging, appear to peculiar advantage under the verdant foliage. Each myrtle is loaded with them, and they emit perfumes more exquisite than those of the rose itself. They enchant every one, and the soul is filled with the softest sensations." When the Feast of Tabernacles was celebrated by the Jews on the return from Babylon, the people of Jerusalem were ordered to "go forth unto the mount and fetch olive branches, and pine branches, and myrtle branches, and to make booths." The prophet Isaiah foretells the coming golden age of Israel, when the Lord shall plant in the wilderness "the shittah-tree, and the myrtle-tree, and the oil-tree." The modern Jews still adorn with myrtle the booths and sheds at the Feast of Tabernacles. Myrtles (Myrtus communis) will grow either on hills or in valleys, the north-west angle of Asia Minor, and separated from Europe only by the Propontis and Hellespont; on the south it joined Eol(s), and was separated from the east by Bithynia by the river Ætopus. Latterly Eol(s) was included in Mysia, which was then separated from Lydia and opened to the river Ætopus, and the river of the lapis Asias, for the quarry of the lapis Asias (which had the power of decomposing dead bodies), and for its oyster beds. It was inhabited by various tribes, mostly barbarous, until, as a part of the kingdom of Pergamus, it was ceded to the Romans, by whom it was eventually formed into a province. Paul passed through this province, and embarked at its chief port, Troas, on his first voyage to Europe (Acts xvi, 7, 8). "They had then come κατὰ τὴν Μυσιαν, and they were directed to Troas, παραπόλεμος τῆς Μυσιας; which means either that they skirted its border, or that they passed through the district without staying there. In fact, the best description that can be given of Mysia at this time is that it was the region about the frontier of the provinces of Asia and Bithynia. The term is evidently used in an ethnological, not a political sense." See generally Rosenmüller, Bibl. Geogr. iii, 32; Smith's Dict. of Class. Geogr. s. v.; Magnet, Geogr. vi, iii, 403; Forbiger, Handb. ii, 110; Richter, Wallfahrten, p. 460; Cramer, Asia Minor, i, 80. See Asia Minor.

Mysia, a surname of the ancient Greek goddess Demeter, or Ceres, under which she was worshipped near Sparta. The term Mysia is also applied to a festival celebrated by the inhabitants of Pellene in honor of Demeter. This feast lasted for seven days. During the first two days the solemnities were observed by both men and women; on the third day the women alone performed certain mysterious rites throughout the night; and on the last two days the men returned to the festival, and the remainder of the time was passed in railery and merriment.

Mysore. See India.

Mystrae, those who were initiated into the lesser Eleusinian mysteries (q. v.).

Mystagogue (Gr. Μυσταγωγός, from μυστής, an initiated person, and ἀγωγός, to lead), the name in the Greek religious system of the priest whose duty it was to direct the preparations of the candidates for initiation in the several mysteries, as well as to conduct the ceremonial of initiation. It was sometimes applied by a sort of analogy to the class of professional ciceroni, who in ancient as in modern times undertook to show to strangers newly arrived in a city the noteworthy objects which it contained (Cicer, act. ii, In Verrem, liv, c. 59); but the former meaning is its primitive one, and formed the ground of the application of the same name in the Christian Church to the catechists or other clergy who prepared candidates for the Christian mysteries, or sacraments, of baptism, confirmation, and the eucharist, especially the last. In this sense the word is constantly used by the fathers of the 4th and 5th centuries; and in the well-known lectures of St. Cyril of Jerusalem, although they were addressed to candidates for the mysteries, some for baptism, and some for the eucharist, it is only to the lectures addressed to the latter that the name mystagogie is applied. This distinction was connected with the well-known Discipline of the Scoti; and is supposed to have had the origin of gradual disuse of that discipline. See Du Cange, Glossarium ad scriptores medii et infimi Graeciae, s. v.; Suicer, Theosaurus Ecclesiasticus, s. v.; see also Mystagogia.
MYSTAGOGY

MYSTAGOGY (μυσταγωγία, introduction to the mysteries) is a term used in the early Christian churches of the Orient to designate either the Lord's Supper or baptism. To the former it is particularly found in the writings of Cyril of Jerusalem and of Theodoret. It was intimately connected with the secret discipline, but fell into disuse with the termination of that system. See Riddle, Christian Antiquities, p. 485, 547; Bingham, Ant. of the Christian Church (see Index).

See also MYSTAGOGY.

Mysteries, Christian, otherwise called Miracles and Morailties, or simply "Miracle Plays," were shown in the Middle Ages representing in rude dramatic form scenes from the Scriptures and from the apocryphal gospels. They were performed first in churches, and next in church streets, and finally in the streets of the city itself. The actors were in the earliest times to which we can trace these shows generally monks, friars, and other ecclesiastics, and the aim was the religious instruction of the people by means of amusement. An examination of the inanimate fragments that remain to us of these plays is profitable only to those who can enter into the spirit of the age that called them forth. For it must be borne in mind by the intelligent inquirer that the coarse details in which they abounded, and which shocked our literary taste, were necessary to bring home to the people of those times the objects of their most serious and constant meditations—judgment, heaven, hell, the tribulations of their lives, and the future lot of the soul of man. Nor must it be forgotten that the Church of the Middle Ages was not the first religious body to plant and promote religious sentiments by these means. The theatre, though the fact be singular, has taken its rise, wherever we can trace its origin, in religious sentiment. In Greece, from the very earliest ages to the days of Solon, religious feasts were accompanied by dances and performances. In the early Christian Church there was no doubt a strong tendency to perpetuate the levity of the heathen practices; and to prevent the introduction of the pagan theatre in its entirety the Church may have felt itself forced to abdicate these relics of an abhorred practice by providing dramatic entertainment in which subjects derived from the Old or New Testament took the place of those of mythology—means less apparent than outspoken opposition, but then believed, no doubt, equally sure to effect its purpose. Accounts for this kind of entertainment which prevailed at an early date of the reading to the congregation in the time of Easter the narrative of Christ's passion, the various parts distributed among different parties. Later these readings came to be accompanied by dialogue and gestures, and probably the readers officiated in a suitable costume. Other festal days were gradually added to the list of performances of these representations. Indeed, some curious proofs of the transition from the narrative form of the Bible to the dramatic form of the mysteries are still extant. They consist of dialogues in verse between several speakers, bound together by a narration, also in verse, which formed a part analogous to the Greek chorus. These were evidently accompanied in some degree by music, for in most ancient manuscripts each line is surmounted by its musical notation.

In time ecclesiastical dramatic representations were separated from the divine offices, and, though still performed in churches, formed a distinct part of priestly teaching, and under the name of Mysteries were acted after the sermon. Mysteries were probably taken from Biblical, and miracle plays from legendary subjects; but this distinction in nomenclature was not always strictly adhered to. The general character of all early religious plays, whether called miracles or mysteries, was about the same. If any distinction was made, it was that miracles were distinguished as those which represented the miracles wrought by the holy confessors, and the sufferings by which the perseverance of the martyrs was manifested; of which the first specified by name is a scenic representation of the legend of St. Catherine. The mysteries, strictly so called, were representations often of great length, and requiring several days' performance, of the Scripture narrative, or of several parts of it, as, for instance, the life of the saints, by Roswitha, a nun of Gandersheim, in Saxony; these, though not very artistically constructed, possess considerable dramatic power and interest; they have been lately published at Paris, with a French translation. The performers were at first the clergy and choristers; afterwards any layman might participate. The earliest known written reference to a miracle play took place in England. Matthew Paris relates that Geoffrey, afterwards abbot of St. Albans, while a secular, exhibited at Dunstable the miracle play of St. Katharine, and borrowed copies from St. Albans to dress his characters. This must have been at the end of the 11th or beginning of the 12th century. Fitzstephen, in his Life of Thomas à Becket (A.D. 1183), describes with approval the representation in London of the sufferings of the saints and miracles of the confessors. Le Beuf gives an account of a mystery written in the middle of the 11th century, wherein Virgil is introduced among the prophets that came to adore the Savior. Another mystery, entitled the Jeu de St. Nicolas, also of like antiquity, belongs to Northern France. Fitzstephen, in the reign of Henry II of England (born 1133, died 1189), dwells on the sacred plays acted in London representing the miracles or passions of martyrs. These plays, according to M. Raynouard (Journal des Savans [1828], p. 297), were the earliest dramatic representations, and gave rise to the mysteries. This is not probable, however, as they were even then denominated mysteries or miracles both in England and on the Continent. The truth is, as Mr. Hallam has said, that "it is impossible to fix their first appearance with anything like precision" (sic) (83, 123). The fact is that in the 11th century these plays are found in favor within the walls of convents, and on public occasions and festivals, both in England and on the Continent. Thus, in the 11th century, Hilarius, a disciple of Abelard, substituted for the prose of the old religious drama of St. Richard the admirable and melodic rhyme, with refinements in the Languedoc. A monk of St. Bénou-sur-Loire, who flourished at a later period, treated the same history in simple Latin. Both these pieces were acted in the churches for nearly a century, when Jean Bodel, of Arras, founded upon them a drama, which was written entirely in French, and which was probably acted in the public squares of Arras, or in the hall of some large dwelling. This was, in all probability, the first instance of the emaniscation of the drama from the Church. The troubadours of the 13th century followed readily in the lead of Jean Bodel. Among others we may mention Adam de la Halle, the fellow-townsmen of Bodel, nicknamed Le Bosso d'Arras, and the witty enemy of the monks, the satirical Rutebeuf.

The clergy were soon altogether superseded by the laity, who formed themselves into companies and guilds to act these pieces, and every considerable town had a fraternal society to perform the service of mysteries. It is not necessary, however, to enter into the various proceedings and institutions, it should be stated, however, were established in a serious spirit of piety and beneficence, without any thought of antagonism to the Church; and that the Church failed to recognise any opposition is apparent in the fact that, on the establishment of the Corpus Christi festival by Pope Urban IV, in 1264, miracle
plays were made its adjuncta. The change from clergy to laity was very desirable, for one reason especially. Hitherto the plays had usually been written in Latin, and the greater part was made intelligible to the people only through pantomime. But as this was unsatisfactory, the idea of the French Confrérie de la Passion et Résurrection de notre Seigneur, which was composed of Paris citizens, master masons, locksmiths, and others. The first scene of their representations was the village of St. Maur, near Vernon. The provost of Paris refusing his license, the Confrérie applied to and received the authorization of Charles VI, who by letters patent, in 1402, gave permission to them to act "any mystery whatsoever either before the king or before his people, in any suitable place, either in the town of Paris itself or in its suburbs; but only on the feast of Ascension, the day on which Our Lord rose from the dead," provided that the Convention instituted to perform the representation was not less than a thousand francs. The Confrérie, which had its origin in the Hospital of the Holy Trinity, gladly let for them their spacious hall. The spectators sat unwearyed often until the night fell, and then the assembly broke up to meet again on the next Sunday. The city of Paris then was the most populous city in the world: the population of the capital was estimated at 60,000, which sometimes lasted for months at a time. The stage consisted of tiers of scaffolding raised one above another, the topmost tier, with its gilt balaustre, representing Paradise, and holding "chaire parde," which did duty as the throne of the Most High. In pomp of show they far excelled our English mysteries," says Hallam; and the mixture of tragedy and comedy in the poetry appealed powerfully to the quick susceptibilities of an impressionable nation, which delights in nothing so much as in extremes and contrasts.

We have said that the laity intended no opposition to the Church, and that the clergy recognised no such opposition, and did not attempt to curb it; but even before the end of the 13th century the laity had robbed the clergy of a great part of their influence, and in the course of the 14th became the means of paralyzing it entirely. The length, too, to which these persecutions were carried surprised credence. No subject was deemed too sacred to be chosen as a theme, no subject too holy to be represented. Heaven was depicted, in which the Father was surrounded by his holy angels. Hell was portrayed by a dark and yawning cavern, from which issued hideous howlings, as of tormented souls; but the entrance with a ghastly inscrutability, came the jester and buffoon of the sacred passenger. There were all the Scripture characters freely introduced, but angels, archangels, Lucifer, Satan, Beelzebub, Belial, and even the three persons of the Holy Trinity. Some of these dramatics lasted for a number of days, one of them covering the whole period of time from the creation of the world to the last judgment. No wonder, then, that these plays, which were originally designed as a means of instructing the people, and were performed in the churches, rapidly degenerated until they turned into a species of scandalously irreverent buffoonery. From being employed as a means of instruction, they were then employed as a means of amusement. The scenes were being enacted in the churches and by the clergy, they came to be performed by strolling and vagabond players on temporary and portable stages constructed on wheels. Thenceforth the theatre took a wider scope; it labored to supply the ever-increasing weakness of religious impressions; creations of the poet's fancy appeared side by side with scriptural characters; popular scenes became by degrees more common, and hence little by little arose the drama of our own day—a light amusement which is the delight of the people, whose delight in sensible objects is so intense, and societies for their performance were formed as in France. They were largely popular in the 15th century (comp. Rococo, Life of Lorenzo, i, 432; Hallam, Lit. i, 124, 125), and they have in some of their forms been continued for the edification and amusement of the populace quite down to our own times (Ticknor, Hist. of Spanish Lit. i, 229, footnote 3). In Spain they were likewise common, and their origin is so remote that "it can no longer be determined" (Ticknor, i, 290). There, however, the clergy were left to play these mysteries, as is apparent from the code of Alfonso X, which was prepared about 1260, and in which, after forbidding the clergy certain gross indulgences, the law goes on to say: "Neither ought they to be makers of buffoon plays, that people may come to see them; and if other men make them, clergymen should not come to see them, for such things do not belong to clergymen. Or, however, should such things be done in churches; but rather we say they should be cast out in diabonour, without punishment to those engaged in them; for the church of God was made for prayer, and not for buffoonery; as our Lord Jesus Christ declared in the Gospel that his house was called to be the house of prayer and ought not to be made a den of thieves. But exhibitions there be that clergymen may make, such as that of the birth of our Lord Jesus Christ, which shows how the angel came to the shepherds, and how he told them Jesus Christ was born; and, moreover, of his appearance when the three kings came to worship him, and of his resurrection, which shows how he was crucified and rose the third day. Such things as these, which move men to do well, may the clergy make, as well as to the end that man may have in remembrance that such things did truly happen. But this must they do decently, and in devotion; and in the great cities where there is an archbishop, the bishop shall hear the same, and order that the labors of others by them deputed, and not in villages, nor in small places, nor to gain money thereby. But though these earliest religious representations in Spain, whether pantomimic or in dialogue, were thus given, not only by churchmen, but by others, certainly before the middle of the 14th century, and probably much sooner, they passed entirely out of the control of those who intended them for religious and moral purposes, and though they were continued for several centuries afterwards, still no fragment of them, and no distinct account of them, now remain to us (see Ticknor, i, 291; and compare below). In England, on the contrary, they continued for four hundred years—a longer period than can be assigned to the English national drama as we now recognize it. Their height of popularity was in the 15th century. Of these mysteries, two complete series, which are supposed to belong to the 15th century (Hallam, Lit. i, 124 [165]), have been lately discovered, in ancient manuscripts, the Townley Mysteries, performed by the monks of Woodchurch, near Wakefield, and the different leading companies of that town: and the Coventry Mysteries, performed with like help of the trades in Coventry, by the Gray Friars of that ancient city. Both of these plays began with the Flood, and set forth the carry on the story in different pageants or scenes until the judgment-day. The first two have been published by the Shakespeare Society, and the other by the Surtees Society. The Townley mysteries are full of the
burlesque element, and contain many curious illustrations of contemporary manners. The Coventry mysteries were famous in England. Of these, Dugdale relates, in his History of Warwickehire, published in 1656, that "the Coventry pageants" were performed in the city every Christmas. The city was very famous for the pageants that were played therein, upon Corpus Christi day (one of their ancient fairs), which occurring very great confluence of people thither from far and near, was of no small benefit to them; which pageants being acted with mighty state and reverence, by the city's ancient friars, had theaters for the several scenes, very large and high, placed upon wheels, and drawn to all the eminent parts of the city, for the better advantage of spectators, and contain'd the story of the Old and New Testament, composed in the old English rhyme, as appeareth by an ancient MS. (in Bibl. Cotton. Vesp. D VIII), entitled, Ludus Corporis Christi, or Ludus Coventriae." The celebrity of the performances may be inferred from the rank of the audiences; for at the festival of Corpus Christi in 1483 Richard III visited Coventry to see the plays, and at the same season in 1492 they were attended by Henry VII and his queen, by whom they were highly commended. Of them it is said, "Every company had its pagiante, or part, which pagiante were a high scafolde with two rowmes, a higher and a lower, upon four wheels. In the lower they apperell'd themselves, in the higher rowme they played, being all open on the topes, that all behouders might heare and see them. These rowmes were made by the hand of masons, master workmen. They began first at the Abbey Gates, and when the pagiante was played, it was wheeled to the High Cross before the mayor, and so to every streete; and so every streete had a pagiante playing before them, till all the pagiante for the days appointed were played; and when one pagiante was by, the next ordered, and was brought into the streete to streete, that soe the might come in place thereof, exceeding orderly, and all the streetes had their pagiante afore them, all at one time, playing together, to see which playes was great resortes, and also scapholdes, and stages made in the streetes, in those places where they determined to play their pagiante." The first mystery performed in Scotland was at Aberdeen, in 1445, and was called the Holy Blade. One was called Candlemas Day, and another Mary Magda-lene. The records of the town council of Edinburgh, in 1554, contain an order to pay Walter Byrning for many of the mysteries, according to a list, which was brought into the streetes to streetes, that see the might come in place thereof, exceeding orderly, and all the streetes had their pagiante afore them, all at one time, playing together, to see which playes was great resortes, and also scapholdes, and stages made in the streetes, in those places where they determined to play their pagiante. The out of the mysteries and miracle plays sprang a third class of representations called Moralities. Moralities were allegorical personifications of the Virtues and Vices were introduced as dramatic personages. These personages at first only took part in the play along with the scriptural or legendary characters, but afterwards entirely superseded them. This change from mysteries to moralities corresponds with the remarkable modification of the public mind. Reason, or some new philosophy, had introduced ideas that had been substituted for the simple, unquestioning faith of the Middle Ages. Allegory, no longer the concrete and material rendering of undisputed facts, became a work of intelligence, abstraction, and analysis. Nature, her high and undying loveliness unguessed, appeared commonplace and insipid, and we need of the fictitious combinations of imagination. The mind of man having shaken itself free from its old trammels, sometimes in its pride and joy abused its new-found freedom. The moralities were perhaps best promulgated in France, where a guild was established by Philip the Fair about 1280, with special privileges for their representations. In one of such dramas, of which Democritus furnishes an extract, the gay boon companions Eat-all, Thirst, Drink-to-you, and Sana Water, are politely invited by the rich and splendid Bagnet. The ladies of the party are Doztiness, Gluttony, and Lust. The feast is all that can be desired, the guests are more than satisfied; when suddenly a band of enemies—Colc, Gout, Jaundice, Quinsy, and Dropsey—rush in and seize the assembled guests, and carry them off to some place of more interest than the case may be. Some are overwhelmed—some rush for succor to Sobriety, who calls Cure to help him. Ban-quet is condemned to death by the judge, Experience, and Diet is his executioner. The oldest-known English compositions of this kind are of the time of Henry VI; they are not miracles, but were rather the wine of the miracle plays. Moralities continued in fashion in England till the time of Elizabeth, and were there the immediate precursors of the regular drama. In France they were the precursors of the light play known as farce, which "may be reckoned a middle link between the extemporary effusions of the mimes and the legitimate drama" (Hallam, Lit. i, 26 [109]). And this seems the natural result of the two. From such pieces as the one of which we give a synopsis above the step to farces was but a short one. Moralities could not long enchant a people on whom refinement of satirical wit is generally thrown away. The mystery no longer moved them; they would not make them laugh, and farce was invented. In Germany, especially in the Alpine districts, they were composed and acted by the peasants. These peasant-plays had less regularity in their dramatic form, were often interspersed with songs and processions, and in their union with the church, the mystery plays were most characteristic of a people in whom the religious and dramatic element are both so largely developed. In the early part of the sixteenth century they began to partake in some degree of the comic character which has been their frequent tendency; and thus, although designed at first for the religious instruction of the people, they had long before the Reformation so far departed from their original character as to be mixed up in many instances with buffoonery and irreverence, intentional or unintentional, and to be the means of inducing contempt rather than respect for the Church and religion. It is a mistake to suppose that the hostility of the Reformers was what suppressed these popular exhibitions of sacred subjects. The fathers of the Reformation showed no unfriendly feeling towards them. Luther is reported to have said that they often did more good and produced more impression than sermons. The same is said of the performances of the two founders of the Swedish Protestant Church, and by the earlier Lutheran bishops, Swedish and Danish. The authorship of one drama of the kind is assigned to Grotius. In England, the earliest check they received was from the rise of the secular drama; yet they continued to be occasionally performed in the times of James I and Charles I, and it is well known that the first sketch of Milton's Paradise Lost was a sacred drama, in which the opening speech was Satan's address to the sun. A degenerate relic of the miracle play may yet be traced in some remote districts of England, where the custom is kept up at St. George's Day, the scene is a churchyard, and the idea is rudely represented by the peasantry. "In Spain," says Ticknor, "as late as 1840, something resembling a mystery of the earliest time was represented at Valencia during the shows of the Corpus Christi (comp. Lamacra, Teatro de Valencia, 1840, p. 11). This, I suppose, is the drama in the performance which Julius von Hertel witnessed in the Feast of the Sacramento at Valencia in 1858, and which he not only describes, but prints entire in the dialect of the country just as he heard it" (Hist. of Spanish Literature, iii, 347, foot-note). In Mexico, too, the mysteries have been kept up to this day. Thus Bayard Taylor, during his travels in that country, witnessed the performance of which he relates. But though the mysteries may still continue to be performed in Roman Catholic countries, it is nevertheless a fact that a Roman Catholic country struck the first blow for their extinction—this was done in the
Beneath Catholic sects of Germany, where these rites are still observed, the visible abomination of Solomonic, condemning their old religious character. They had been of a kind to prohibitive their performance on the ground of public expense; there was a tendency to bring them into disuse; but the frequent rude acts of the religious orders from more edifying modes of expediting elsewhere. In 1779, a manifesto was issued by Instruction, and the usual Baring from the experience...
of sacred subjects to the ridicule of free-thinkers. This ecclesiastical denunciation was followed by vigorous measures on the part of the civil authorities in Austria and Bavaria. The exception was made to the general suppression. In 1638 the villagers of Oberammergau, in the Bavarian highlands, on the cessation of a plague which desolated the surrounding country, had vowed to perform every tenth year Christ's passion, out of gratitude, and as a means of religious instruction—a vow which has ever since been regularly observed. The pleading of a deputation of Ammergau peasants with Max Joseph of Bavaria saved this mystery from a general condemnation, on condition of everything that could offend good taste being expunged. It was then and afterwards somewhat remodelled, and is perhaps the only mystery or miracle play which has survived to the present day. The last performance took place in 1870 (see its photographic representation in the Album of the Passion-play of Ober-Ammergau, by J. P. Jackson, Lond. and McM. 1873, 4to). The inhabitants of this secluded village, long noted for their skill in carving in wood and ivory, have a rare union of artistic cultivation with perfect simplicity. Their familiarity with sacred subjects is even beyond what is usual in the Alpine part of Germany, and the spectacle seems still to be looked on with feelings much like those with which it was originally conceived. What would elsewhere appear impious is to the Alpine peasants devout and edifying. The Passion of Christ constitutes part an act of religious worship; he and the other principal performers are said to be selected for their holy life, and consecrated to their work with prayer. The players, about five hundred in number, are exclusively the villagers, who, though they have no artistic instruction except from the parish priest, act their parts with no little dramatic power, and a delicate appreciation of character. The New-Testament narrative is strictly adhered to, the only legendary addition to it being the St. Veronica handkerchief. The acts alternate with tableaux from the Old Testament and choral odes. Many thousands of the peasantry are attracted by the spectacle from all parts of the Tyrol and Bavaria, among whom the same earnest and devout demeanour prevails as among the performers. The following are some of the principal scenes given by a late eye-witness: "1. The triumphal entry of Christ into Jerusalem; the children and people showed him honours and a crowning with laurel branches. This introduced the Saviour and the apostles, and formed in itself an admirable introduction to the whole. There were certainly no less than two hundred persons in the crowd, including seventy or eighty children. 2. The long and animated debates in the Sanhedrim, including the different evidence of the expelled money-changers, and later the interview with Jesus. 3. The last contract was ratified between him and the priests by the payment of the thirty pieces of silver. Nothing could be more characteristic, real, and unaffected than these. 3. The Last Supper, and the washing of the apostles' feet. Here the table was arranged on the model of the well-known picture of Leonardo da Vinci. 4. All the scenes in which Christ was brought successively before Annas, Caiphas, Pilate, and Herod; the 'Ecce Homo' (copied, it struck me, from Van Dyck), the scourging, etc. In some of these as many as two hundred and fifty persons were at once on the scene—infuriated mobs of priests, money-changers, Roman soldiers, etc.—and, violent as were the passions personified, there was not the least approach to rant, nor the slightest transgression into irreverence or improbability. In the course of these scenes a striking occurrence was the contrast of these—a brutal and squalid figure—with the noble form and countenance of the sacred sufferer—the latter formed more after the model of those of Albert Dürer than of any other painter; at least such was my impression. Both Pilate and Herod were admirably represented, but especially the former. 5. The whole long procession, at the slowest pace, from Pilate's house to Golgotha; our Lord and the thieves carrying their huge crosses; his interview with his mother and the other women of Jerusalem. This contained the most moving and touching features, including the parting of Christ's face by St. Veronica; but there was no attempt to show the miraculous impression of the sacred countenance on the handkerchief, which forms the point of the legend. 6. The last dreadful scene—the uprising of the, three crosses with their living burdens, and all the atrocities that proceed from the cruel and lingering death" (Eadie, Eccles. Cyclop. s. v.). "Plays of humble description, from subjects in legendary or sacred history, are not unfrequently got up by the villagers around Innsbruck, which show a certain rude dramatic talent, though not comparable to what is exhibited at Ammergau. Girls very generally represent both the male and female characters. See also an account of the first performance in the article, Onésime le Roy, Études sur les Mystères (Paris, 1837, 8vo), ch. 1; Edelstand der Merl, Origin. des Théâtre moderne (Paris, 1849, 8vo); Wright, Early Mysteries, etc. (Lond. 1888, 8vo); Collier, Hist. de l'Eng. Dramat. Poetry: Maguin, Les Origines du Théâtre moderne (Paris, 1889); Devrient, Geschichte der Schauspielkunst (Leipsic, 1848); Hone, English Mysteries (Lond. 1823); Marriott, English Miracle-plays (Bass, 1856). The libreto has been published (Lond. 1830, 8vo). For monographs, see Volbeding, Index Programmatum, p. 172. Mystery (μυστήριον), a term employed in the Bib- le for a religious ceremony, and as well as the latter term may denote a revealed secret. See Grossmann, De Judae- rum arcani disciplina [see Essexes] (Lips. 1833-4); and on the Christian "secret discipline," the monographs cited by Volbeding, Index Programmat. p. 138 sqq.

I. Etymology of the Word.—Some have thought to derive the Greek μυστήριον from which the English word mystery is plainly a transfer, from a Hebrew source, but sound philology forbids this. It is clearly a derivation, through μυστύς, an initiated person, from μυίδω, to initiate, and thus ultimately from μιοω, to close the eyes or mouth, i.e. to keep a secret. The derivative μεταρι- ποιο was always a reference to secrets of a religious character, and this sense is retained in the Bible.

II. Pagan Mysteries in general.—These were ceremonies in which only the initiated could participate. The practice may be obscurely traced to the early Orient, in the rites of Isis (q. v.) and Osiris (q. v.) in Egypt, in the ceremonies of Mithras, and the Greek festivals connected with the worship of Bacchus and Cybele, and may be even faintly recognised in our day is the ceremonies of freemasonry. They consisted in a general of rites of purification and expiation, of sacrifices and processions, of ecstatic or orgiastic songs and dances, of nocturnal festivals fit to impress the imagination, and such like, the whole design being to depurate the emotions—terror and trust, sorrow and joy, hope and despair. The celebration was chiefly by symbolical acts and spectacles; yet sacred mystical words, formulas, fragments of liturgies, or hymns, were also employed. There were likewise certain objects with which the initiates were associated, or which were used in the various ceremonies in the ascending scale of initiation. The sacred phrases, the ἄνεπρα, concerning which silence was imposed, were themselves symbolical legends, and probably not statements of speculative truths. The most diverse theories have been suggested concerning the origin, nature, and significance of the Hellenic mysteries. As Schönenmann remarks (Griechische Alterthümer, 3d ed., Berlin, 1873), the very fact that it was not permitted to reveal to the uninstructed wherein these cults consisted, what were the rites peculiar to them, for what the gods were invoked, or what were the names of the divinities worshipped, has been the cause of our extremely incomplete information in regard to them. The oldest of the Hellenic mysteries are believed to be the Cabbir, in Samothrace and Lemnos, which were renowned through the whole period of pagan antiquity.
Though they were only less august than the Eleusinian, nothing is certain concerning them, and even the names of the divinities are known to us only by the profana-
tion of Manasea. (See below.) *The Eleusinian* were
the most venerable of the mysteries. *"Happy," says
Ptochus, (250 B.C.)* held them as having descended
beneath the hollow earth; he knows the end, he knows
the divine origin of life.* They composed a long series
of ceremonies, concluding with complete initiation or
perfection. The fundamental legend on which the rit-
ual seems to have been based was the search of the
goddess Demeter, or Ceres, for her daughter Proserpine,
herself a goddess, who had been carried off by Plutos
and her return into the realm of light. The rites were
thought to prefigure the scenes of a future life. The
same symbol was the foundation of the Thesmophoria,
which were celebrated exclusively by married women,
rendering it probable that initiation was designed to
protect against the dangers of childbirth. (See below.)
The *Orphic*and*Dionysic* mysteries seem to have de-
signed a reformation of the popular religion. Founded
upon the worship of the Thracian Dionysus, or Bac-
chus, they tended to ascetic rather than orgiastic prac-
tices. Other mysteries were those of Zeus, or Jupiter,
in Athens; of Minerva, in Athens or Thebes; of Athena,
in Athens; or Minerva, in Athens; of Artemis, or Diana, in Arcadia; of Hector in Argia, and of Hefa in Phrygia.
The worship of the last, under different names, prevailed in
divers forms and places in Greece and the East, and
was associated with the orgiastic rites of the Corybantes.
*"The biggest event in the Persian mystery of Mithra,
which appeared in Rome about the beginning of the
2nd century of the Christian era. They were propagated
by Chaldean and Syrian priests. The austerity of the
dogma, the real perils of initiation which neophytes
were obliged to encounter, the title of soldier of Mithra
which was bestowed upon them, and the fact that they
were offered them after the combats preceding every
grade of advancement, were among the peculiarities
which gave to these rites a military and bellicose char-
acter; and Roman soldiers eagerly sought initiation
into them. The fundamental dogma of the Mithraic
doctrine was the transmigration of souls under the influ-
ence of the seven planets, over whose operations
Mithra presided. The whole fraternity of the initiated
was divided into seven classes or grades, which were
named successively soldiers, lions, hyenas, etc., after
animals sacred to Mithra. The sacrifice of the bull was
called Mithraic*; it was celebrated on the 24th of the
month of December. On the monuments which have
been found in Italy, the Tyre, and other parts of
Europe, inscribed *Deo Mithræ Soli Insepto, Mithra is
usually represented as a young man in a flowing robe,
surrounded with mystical figures, seated on a bull, which
he is pressing down, or into which he is plunging the
sacrificial knife. A dog, a serpent, a scorpion, and a
lion are arranged around him. Nothing is certain con-
cerning the signification of this scene. After the adop-
tion of some of the ideas connected with other religious
systems, as those of the Alexandrian Serapis, the Syr-
ian Baal, and the Greek Apollo, the Mithra worship
disappeared in the 5th or 6th century. See MITHRAI.

III. The Grecian Mysteries in particular.—These mysteries
were certainly always secret; but all Greeks,
without distinction of rank or education—nay, perhaps
even slaves—might be initiated (μυηταια); such was
the case, for instance, in the Eleusinian mysteries. It
was not the business of the archons to hold the
principal doctrines of each nation's religion were
made known, but among heathens, only to a chosen few,
but among the Jews to the people no less than to the
priests.* It appears that in many of these mysteries certain emblems
or symbols (thence called themselves mysteries) were
displayed either to the initiated, in the course of their
training, or to the people; and that the explanation of
these to the initiated was the mode in which they
were instructed.
The names by which mysteries or mystic festivals
were designated in Greece are μυηταια, τιτηται, or δραγον.
The name δραγον (from drage) originally sig-
nified only sacrifices accompanied by certain cere-
monies, but it was afterwards applied especially to the ceres-
monies observed in the worship of Bacchus, and at a
still later period to mysteries in general. Τιτηται sig-
nifies, in general, a religious festival, but more particu-
larly a lustration or ceremony performed in order to
purify, either in a private house or in an open place.
As the name μυηται signifies, properly speaking, the secret part of the
worship; but it was also used in the same sense as τε-
ληται, and for mystic worship in general.
These mysteries in brief may be defined as sacrifices
and ceremonies which took place at night or in secret
with some sanctity, which the initiates were not
allowed to enter. What was essential to them were
objects of worship, sacred utensils, and traditions with
their interpretation, which were withheld from all per-
sons not initiated.
The most celebrated mysteries in Greece were of three
kinds: the mysteries of the island of Samothrace, and
Eleusis, which may be briefly described as follows:
1. The Cabiri (καβειαων) were mysteries, festivals,
and orgies solemnized in all places in which the Pelas-
gian Cabiri were worshipped, but especially in Samo-
thrace, Imbrus, Leonnos, Thebes, Athedon, Pergamus,
and Berytus. Little is known respecting the rites ob-
erved in these mysteries, but no one was allowed to
divulge them. The most celebrated were those of the
island of Samothrace, which, if we may judge from those
of Leonnos, were solemnized every year, and lasted for
nine days. Persons on their admission seem to have
undergone a sort of examination respecting the life
they had led, and if they were found guilty of any of
their crimes, even if they had committed murder.
2. The Thesmophoria (θεσμωφοροι) were a great fest-
tival and mysteries, celebrated in honor of Ceres in va-
rious parts of Greece, and only by women, though some
ceremonies were also performed by maidens. It was
intended to commemorate the introduction of the laws
and regulations of civilized life, which was universally
ascribed to Ceres. The Attic thersmophoria probably
lasted only three days, and began on the 11th of Py-
apelion, which day was called ἀνεδοπο ακέδος, be-
cause the solemnities were opened by the women with
a procession from Athens to Eleusis. In this proces-
sion they carried on their heads sacred laws (νόμοις
βαιλος or Σταυροι), the introduction of which was as-
scribed to Ceres (θεσμωφοροι), and other symbols of
civilized life. The women spent the night at Eleusis
in celebrating the mysteries of the gods, the second
and last day, called Μυηται, was a day of mourning, during
which the women sat on the ground around the status
of Ceres, and took no other food than cakes made of
sesame and honey. On this day no meetings either of
the senate or the people were held. It was probably in
the afternoon of this day that the women, who had walked barefooted
behind a wagon, upon which baskets with mystical sym-
ols were conveyed to the theosphornion. The third
day called καλογίνης, from the circumstance that
Ceres was invoked under this name, was a day of merriment and balladry among the women themselves, in commemoration of Iambe, who was said to have made the goddess smile at their own grief.

3. But far more important, so much so indeed as almost to monopolize the term “mystery” among the Greeks, were the Eleusinian mysteries (Δαιμονια), a festival and mysteries, originally celebrated only at Eleusis in Attica, in honor of Ceres and Proserpina. The Eleusinian mysteries, or the mysteries, as they were sometimes called, were the holiest and most venerable of all that were celebrated in Greece. Various traditions were current among the Greeks respecting the author of these mysteries; for, while some considered Eumolpus or Museus to be their founder, others stated that they were introduced by the god Echtheus, who at a time of scarcity provided his country with corn from Egypt, and imported from the same quarter the sacred rites and mysteries of Eleusis. A third tradition attributed the institution to Ceres herself, who, when wandering about in search of her daughter, Proserpina, was believed to have come to Attica, in the reign of Echtheus, to have supplied its inhabitants with corn, and to have instituted the mysteries at Eleusis. This last opinion seems to have been the most common among the ancients, and in subsequent times a stone was shown near the well Callinicus at Eleusis on which the goddess, overwhelmed with gratitude, had placed a handkerchief. When the gods believed her arrival in Attica. All the accounts and allusions in ancient writers seem to warrant the conclusion that the legends concerning the introduction of the Eleusinia are descriptions of a period when the inhabitants of Attica were becoming acquainted with the benefits of agriculture and of a regularly constituted form of society. In the reign of Echtheus a war is said to have broken out between the Athenians and Eleusinians; and when the latter were defeated, they acknowledged the supremacy of Athens in everything except the mysteries, which they wished to conduct and regulate for themselves. Thus the superintendence remained with the descendants of Eumolpus, the daughters of the Eleusinian king Celcus, and a third class of priests, the Cercyces, who seem likewise to have been connected with the family of Eumolpus, though they themselves traced their origin to Mercurius. At the time when the local governments of the several townships of Attica were concentrated at Athens, the capital became also the center of religion, and several deities who had hitherto only enjoyed a local worship were now raised to the rank of national gods. This seems also to have been the case with the Eleusinian mysteries, for in the time of Diodorus we find mention of a temple at Athens called Eleusinian, probably the new and national sanctuary of Ceres. Her priests and priestesses now became naturally attached to the national temple of the capital, though her original place of worship at Eleusis, with which so many sacred associations were connected, still retained its importance and its special share in the celebration of the national solemnities.

We must distinguish between the greater Eleusinia, which were celebrated at Athens and Eleusis, and the lesser, which were held at Aegae on the Ilissus. The lesser Eleusinia were only a preparation (προετοιμασίας or προοιμία) for the real mysteries. They were held every year in the month of Anthesterion, and, according to some accounts, in honor of Proserpina alone. Those who were initiated in them bore the name of Mystes (μυστῆς), and had to wait at least another year before they could be admitted to the greater mysteries.

The principal rites of this first stage of initiation consisted in the sacrifice of a sow, which the mystae seem to have first washed in the Cantharus, and in the purification by a priest, who bore the name of Hydramus (Ὑδράμος). The mystae had also taken an oath of secrecy, which was administered to them by the Mystae-
of these vessels were on this day filled with water or wine, and the contents of the one thrown to the east, and those of the other to the west, while those who performed this rite uttered some mystic words.

The Eleusinian mysteries long survived the independence of Greece. Attempts to suppress them were made by the Roman emperors, particularly under Hadrian. But this feature does not seem to have been originally connected with these mysteries, and was probably added to them at the period which followed the opening of a regular intercourse between Greece and Egypt, when some of the speculative doctrines of the latter country and of the East may have been introduced into the mysteries, and hailed by the names of the venerable bards of the mythical age. This supposition would also account, in some measure, for the legend of their introduction from Egypt (Smith, Dict. of Class. Antiq. s.v.). It does seem, indeed, as if the vague speculations of modern times on the subject were an echo of the heathenism and the superstitions of the earlier volumes of mysteries given by the priests to the inquiring disciple—according to the lights of the former or the latter.

Some investigators, themselves not entirely free from certain mystic influences (like Creuzer and others), have held only to have been a kind of misty orb around a kernel of pure light, the bright rays of which were too strong for the eyes of the multitude; that, in fact, they hid under an outward garb of mummery a certain portion of the real and eternal truth of religion, the knowledge of which had been derived from some primeval, or, perhaps, the Mosaic revelation; if it could not be transmuted by the sages of the East, at least it could be so transmitted as to be accessible only to those who had attained by means of the revelations of the holy breath, the light and the lamp of mummery: to this kind of hazy talk, however (which we only mention because it is still repeated every now and then), the real and thorough investigations begun by Lobeck, and still pursued by many competent scholars in our own day, have or ought to have put an end. There cannot be anything more alien to the whole spirit of Greek and Roman antiquity than a hiding of abstract truths and occult wisdom under rites and formulas, songs and dances; and, in fact, the mysteries were anything but exclusive, either with respect to sex, age, or rank, in point of time or in place. When the various cults and habits of the different sects of the time, with the variations of worship, became more diffuse, it is certain that the mysteries took root in every place where a shadowy and allusive symbolical representation of a secret of some kind was in the present of the secret. It was in the place of the mysteries of the Sibyl in the Roman state, that we find the allegorical representations of the mysteries of the Egyptians and the Eleusinians, the mysteries of the Jewish Sibyls, of the Minoan and Egyptian deities, of the Cretan mysteries. The word is also used to denote anything whatever which is hidden or concealed, till it is explained. The Sept. uses it to express 'a secret synthesis of the troubles of the woman upon a scarlet-colored beast' (Rev. xvi, 3-6); 'will tell thee the mystery of the woman,' etc. (xviii, 7). When St. Paul, speaking of marriage, says 'this is a great mystery' (Eph. v, 22), he evidently treats the original institution of marriage as affording a figurative representation of the union between Christ and the Church (Campbell, ii, 10, pt. iii, § 8). The word is also used to denote anything whatever which is hidden or concealed, till it is explained. The Sept. uses it to express 'a secret' (Dan. xi, 18, 19, 27, 28, 29, 30, 47; iv, 6), in relation to Nebuchadnezzar's dream, which was a secret till Daniel explained it, and even from the king himself, for he had totally forgotten it (ver. 5, 9). Thus the word is used in the New Testament to denote those doctrines of Christianity, general or particular, which the Jews and the world at large did not understand till they were revealed by Christ and his apostles: 'Great is the mystery of godliness,' i.e. the Christian religion (1 Tim. iii, 16), the chief parts of which the apostle instantly proceeds to adduce—'God was manifest in the flesh, justified by the Spirit, seen of angels, etc.—facts which had not entered into the heart of man (1 Cor. ii, 9) until the Spirit, by the mouth of his holy prophets, had revealed them to the apostles by inspiration (ver. 10). The apostle is generally thought here to compare the Gospel with the greater Eleusinian mysteries (for which see Diod. Sic. iv, 25; Dem. xxix, xli, Xem. H. G. ii, 4, 14; or Leland's Advantage and Necessity of the Christian Revelation, pt. i, ch. ii, or Macknight's Analysis of the Ephesians, § 7). Thus also the Gospel in general is called 'the mystery of the faith,' which was to deceive the deacons should 'hold with a pure conscience' (1 Tim. iii, 9), and 'the mystery which from the beginning of the world had been hid with God, but which was now manifested to God's holy messengers' (1 Cor. i, 26). The Gospel then, not only made known the doctrine of the mystery of the Gospel which St. Paul desired 'to make known' (Eph. vi, 19); 'the mystery of God, and of the Father, and of Christ,' to the full apprehension and understanding of which (rather than 'the acknowledgment') he prayed that the Colossians might come (Col. ii, 2; comp. the use of the word ἀποκαλύφθης, 1 Tim. ii, 4; 2 Tim. iii, 7); which he desired the Colossians to pray that God would enable himself and his fellow-apostles 'to speak and to make manifest' (Col. iv, 3, 4); which he calls 'the revelation of the mystery that was kept secret since the world began, but now is made manifest and known to all nations' (Rom. xvi, 25); which, he says, 'we speak' (1 Cor. ix, 7), and of which the apostles were 'stewards' (1 Cor. iv, 1). The same word is used respecting certain particular doctrines of the Gospel, as, for instance, 'the partial and temporary blindness of Israel,' of which mystery 'the apostle would not have Christians' ignorant (Rom. xi, 25), and which he explains by the fact of the Gentiles being 'a mystery which in other ages was not made known unto the sons of men, as it is now revealed unto the holy apostles and prophets by the Spirit' (Eph. iii, 4-6; comp. 9, 5, 10, etc.). To this class we refer the well-known phrase, 'Behold, I show you a mystery (1 Cor. xv, 51) visiblement beacuite chang'e; and he gives an explanation of the change (ver. 55-55). Even in the case of a man speaking in an unknown tongue, in
the absence of an interpreter, and when, therefore, no man understood him, although “by the Spirit he was speaking mysteries,” yet the apostle supposes that the man so doing himself understood what he said (1 Cor. xiv, 2-4). In the prophectic portion of his writings, "mysteries" are either contrasted with "the things which are not" (1 Cor. ii, 7), or he speaks of it as being ultimately "revealed" (ver. 8). (See below.) Josephus applies nearly the same phrase, μυστήριον κακίας, a mystery of wickedness, to Antipater's crafty conduct to ensure and destroy his brother Alexander (War i, 24, 1); and to complete the proof that the word had the same sense in the sense of secrets, as in the papyrus, we add the words: “Though I understand all mysteries” (1 Cor. xiii, 2). The Greeks used the word in the same way. Thus Menander, μυστήριον σοι μη κατατίθην τη φρονοντιον, “Tell not your secret to a friend” (p. 274, line 671, ed. Clerici). Even when they apply the term to the greater and lesser Eleusinian mysteries, they are still inferior to those in which a person might be initiated, when they would, of course, cease to be mysteries to him. The word is used in the same sense throughout the Apocalypse as in the Sept. and New Testament (Tobit xii, 7; Judith ii, 2; Ecclus. xxii, 22; xxvii, 16, 17, 21; 2 Macc. xiii, 21); it is applied to divine or secret mysteries (Wisdom ii, 22), and to the ceremonies of false religions (Wisdom xiv, 15, 28). See Bibliotheca Sacra. Jan. 1867, p. 196; Whately, St. Paul, p. 176; Contemp. Rev. Jan. 1868, p. 182.

Y. Ecclesiastical Use of the Term.—The word “mysteries” is repeatedly applied to the Lord's Supper by Chrysostom. The eucharist was the most sacred and significant point of the secret discipline [see Arcani Discipline]; and the name which it received on this account was retained so long as the superstitious doctrine of the miraculous presence of the body and blood of Christ gained ground. By the usage of the Christian Church it denotes that incomprehensible in the sacrament of the inward and spiritual grace with the outward and visible sign. In the early Church the term derived a still greater force from the secrecy which was observed in the administration of those ordinances. See Sacrament.

MYSTERY OF INQUITY (το μυστήριον της ἀνοικτίας), an expression that occurs in Paul's description of the workings of an antichristian power in his own day (1 Thess. ii, 7), and the meaning of which is not clear. The attributive genitive (ἀνοικτίας) does not seem to be that of the agent (Theodoret), nor that of opposition (Lüttemann and Alford), but simply of definition, or of the characterizing quality, i. e. the mystery of which the man is the bearer, the active principle, was ἀνοικτία, or lawlessness—the antithesis of order and legality. This "mystery of iniquity" was no personality, i. e. Antichrist, or any real or assumed type of Antichrist (as Chrysostom), but all that mass of uncombined and, so to speak, unorganized lawlessness which, though as yet seen in detail and not revealed in its true proportions, was even then (ἰδαίτερα) aggregating and energizing, and would eventually (ἐν τῇ ἐναντίον καρπῳ) find its complete development and organization in the person and power of Antichrist (Elliot, note ad loc.). See See Antichrist.

Mystic Veils (απεισιπια, a folding door, because they opened in the middle) were hanging veils used in Eastern churches to conceal the entrance from the catechumens and unbelievers. They were also designed to conceal the eucharist at the time of consecration. As Christian churches were constructed after the type of the Jewish Temple, the ἀπεισιπια represents the veil which separated the holy of holies from other parts of the temple.

Mystical Interpretation, otherwise termed spiritual, figurative, is either tropological or analogical, i.e. according to it words having a distinct literal sense receive either a moral or heavenly reference. Some include the allegorical under the mystical. The mystical differs from the literal sense in this, that the meaning cannot at once be derived from the words; but the literal sense being assumed from it, and from the things signified by it, the meaning wrapped up in the words is disclosed.—Blunt, Dict. Doct. and Histr. Theol. For interpretations see New Testament, ed. of Tholuck; especially xi. 10. The "serpent" is either the heavenly Jerusalem, the habitation of the saints, i. e. the "serpent" is literally or naturally a venomous reptile, but mysteriously the devil, the old serpent, etc. See Interpretation.

Mystical Pantheism. See Pantheism.

Mystical Table, a name applied by Chrysostom to the communion-table (q. v.).

Mystical Theism. See Theism.

Mysticism (Gr. μυστικόν), according to the strict meaning of the word, signifies a special knowledge and understanding of the mysteries from which the uninitiated are excluded. It is the belief that God may be known face to face, without anything intermediate. It is a yielding to the sentiment awakened by the idea of the Infinite, and a summing up of all knowledge and all duty in the contemplation and love of him (Hist. de la Philos. 1st ser. vol. ii, leçon 9, 10). Mysticism, therefore, properly defined, is the system of supralight religious beliefs manifested in the body and in the order of visible things by equally supernatural effects. "Mysticism," as one has well said, "despairs of the regular process of science; it believes that we may attain directly, without the aid of the senses or reason, and by an immediate intuition, to the real and absolute writers of all truth, God. It finds God either in nature, and hence a physical and naturalistic mysticism; or in the soul, and hence a moral and metaphysical mysticism." Thus mysticism should be divided into two distinct branches: esoteric, or inner mysticism, and exoteric, or outward mysticism. The first is the study of this supernatural state of the human soul, such as it has been described by saints and mystics. The obscure, unintelligible, and even absurd descriptions given by Mystics of these phenomena, reproduced even by modern theological writers, make mysticism synonymous with quærismus (q. v.). The mysticism of the asceticism and the mysticism of the rationalists, etc. Thus Bretschneider says, "Mysticism is the belief in a continuous, immediate action of God on the soul, produced by special religious exercises, the effect of which is to enlighten, sanctify, and strengthen the soul. It is therefore the faith in an inward light, the neglect of the written revelation, contempt, contempt, etc. " Wegscheider considers enthusiasm as a branch of mysticism, differing only in degree from fainism: "Omnino mysticismum prae se fere dicuntur ii, qui neglectis aut repudiatis sane rationis legibus sensibus ac scietiae et phantasia ludibilis in religione describenda et colenda inducuntur in quo quantum res inexisteniam, in quo existentiamiam jam. Mysticismum haud rari ab inanitatem eromo." According to Hase, the common and principal defect of mysticism is its rejection from the domain of religious life of all human knowledge and general laws, by which indeed it does not lose its intensity of feeling, but its liberty, and, becoming liable to every kind of error, is gradually more inclined to superstition. Under the influence of the strange fancies of the imagination, it leads to enthusiasm; under that of a strong will, to fanaticism; and under that of the recognition of a spiritual sphere, apart from the medium of human experimental knowledge. The writings of mystics in the medieval and modern period give ample evidence of the confusion often made between mysticism and pietism. This error has in modern times been corrected, especially by the efforts
Mysticism, then, in the objective sense, is the divine element imparted to man by external or internal communication with the Higher. In the subjective, personal sense, mystical experience is special experience, visions, etc., subject to particular conditions and processes; for although man is by nature susceptible of and intended for the reception of divine communications, yet a certain conduct, sometimes an ascetic self-renunciation, an abstraction of partly the sensual and partly the spiritual identity, is requisite in order to render us capable of receiving and understanding these supernatural communications in this natural state of existence. It follows, that, strictly speaking, every religious person, as such, is a Mystic, etc. Says Mill, "Whether in the Vedas, in the Gospels, or in the Koran, the idea of the Deity is seen to be felt in no other or more nor less than ascribing objective existence to the subjective creations of our own faculties, to ideas or feelings of the mind; and believing that, by retaining and contemplating those ideas of its own making, it can read in them what takes place in the world without" (Logic, bk. v. ch. iii. § 5). The inner life of religion is always mystical. Mysticism is a one-sided manifestation of this force. Sack also, in his Polémik (p. 288), considers true mysticism as the inner portion of the Christian spiritual life, and fanatical mysticism as an exaggeration and a misconception of the reasonable views of the Church. We concede that mysticism in the inner life of religion, as far as the doctrine and practice of his personal and corporate existence is the essence of religion, is to be found in the mystery of revelation, and is in so far the very truth of religion. The soul's yearning for the invisible finds the object of its aspiration in a sacramental union with objects of its desire. Jacob's realization of the divine presence at Bethel was as the mystical ladder of communication on which the angels of God passed to and fro between earth and heaven. By a deeper generalization, Solomon saw in the wisdom of God the bond of union that connects the spirit of the universe with the Spirit of God. The religious idea had at that early date its obverse side of mystic impress. In the cognate theology of St. John the Word is the middle term between earth and heaven, and being God from the beginning, he is still the Light that lighteth every man that cometh into the world. Hence the mystic principle is inseparable from true religion, so far as it sets the Invisible before the eye of faith. Let us anticipate the future for which it was created. Hence, also, the less true forms of religion have one and all embodied the mystic principle as involving the very essence of religion. Therapeutical contemplation was the obverse of Mosaic ordinance: the Cabala refined upon the Talmud; and Persia, the Tao refined upon the Vedas, which were the religious letter. In the Church of the 6th century the pseudo-Dionysian mysticism was a reaction upon the dogmatic ruling forced upon the Church by heresy; much as the mysticism of the Aombrados, or Illuminati, of Spain in the 16th century was called forth by the rigid orthodoxy of the Inquisition, and Jansenistic and Quietistic tenets by Jesuitism. Mysticism has been the most usual form in which the examing flame of religion has flickered over from its embers.

We must not forget, however, that mysticism, as a special and historical religious manifestation, is an exceptional form of the inner religious life, even indicating a certain one-sided tendency in it, from which real mysticism is to be distinguished. If we consider the essence and life of religion in its general manifestation, we find it to appear as a healthy reciprocal action of the objective consciousness of the existence of God and of self-consciousness. Thus we give the name of mysticism to the predominating relation of subjective life to God revealing himself in it, and of piety to the predominating relation of God in the subjective life. The Mysticism aims at becoming absorbed in God by contemplation, the Piest at imparting the divine character to all his actions. In the former, the consciousness of moral personal

sonality is cast in the shade; in the latter, the rest in God, the solemn contemplation of his objective majesty, predominates. Hence the former inclines to pantheism, where the personal is not strongly felt, but great importance is attached to transcendent contemplation of God, man loses with the clear perception of his own personality that also of the personality of God. The other tendency, on the contrary, inclines to dualism, and even to polytheism, although never degenerating so far as the monotheistic is recognized. Where man reflects in a one-sided, methodical manner on the exhibition of the divine in its subjective action, instead of acting before God with a simple consciousness of God, he is led to a lasting disunion of his consciousness; i.e. to a distinction between the idea of the divine and his life. This particular individualism is manifested in giving the one side into mysticism, on the other into piety. The Mystic loses his clear self-consciousness in obscure, arbitrary, ascetic, and ecstatic conceptions, or rather in a passive experience of the divine; moral piety would be the remedy. Pietism, on the contrary, loses itself in self-made subjective religious laws and self-quotations; its natural remedy would be a healthy mysticism. The Mystic loses himself in God, and cherishes the desire to passively suffer God to act in him, instead of giving himself personally over to a personal God, and thus finding himself glorified; while the Pietist loses the inward presence of God because he does not liberate the feeling of his personal existence. The use of a mystic mixture of religious self-contemplation by subjecting it to the personality of God. Thus, dogmatically defined, mysticism would be religion with an excessive objective tendency, or religion in the form of a central life of feeling, of immediate thought, of contemplative and intuitive knowledge, which, accompanied by an ascetic tendency, seeks principally to lose itself cui negationis in the Deity. Compared with the religious and the ethical element in human life, or with the consciousness of night and that of day, mysticism is a leaning towards the first form of consciousness. "If we were required to define mysticism," says Stowell, "we should call it the setting up of personal thoughts and feelings as the standard of truth or as the rule of action. By mystical views of the spiritual life we understand such views of that life as are adjusted by this standard or ordered by this rule. The relation of such views to our present theme was in the first place seen in the inward standard of truth and rule of action to the direct inspiration of the Holy Spirit. The mystical views may be regarded under different aspects, as (1) speculative, (2) contemplative, (3) imaginative, or (4) practical. Speculative mysticism has found its place in the system of philosophy. Out of such philosophy the mysticism of the Bible has been the resource of the meditative, the tranquil, or the historical; imaginative mysticism deludes the visionary; practical mysticism mistakes the fanatic. For a historical development of mystical views, see Mystics. Mystics are religious who profess a pure and sublime devotion, accompanied with a disinterested love of God, free from selfish considerations; and who believe that the writings which reveal them to the story of the supernatural have a mystic and hidden sense, which must be sought after in order to comprehend their true import. Under this name some understand all those who profess to know how they are inwardly taught of God. Mystics have existed from the time when men's thoughts began to be turned inward upon themselves. "In all religious writings in which the affections come in," says a writer in the Saturday Review, "there must be, if it is real, an element more or less of what must be the name of mysticism. It is simply the same thing as saying that there cannot be poetry without feeling, or art without insight, or affection and friendship without warmth of heart." Yet as there are false poetry and false art, and extravagant and false affections, so there is a false and mistaken direction, as
well as a true and right one, of the religious affections; and it seems hardly saying too much to affirm that the mischief done to religion and to human society by the misdirected religious affections is incalculable. As far as we can see, out of all proportion greater than that done by intellectual error, and by the divisions created by what has been deemed intellectual error. Perhaps it is only to be paralleled in the mischief done by misdirected social affections. Intellectual error at least does not directly sap men's strength; and often, in the earnest conflict to which it leads, it provokes the force which is to overthrow it or keep it in check. But the disasters arising out of the misdirection of the religious affections have been of a more fatal nature. They include not merely all the train of evils attending on what is forced, unavailing, and the irreparable degradation, and weakness, and failure of tone, which succeeds the fever of minds wound up to overstated states of exaltation; the credulity, the mad self-conceit, and the perverse crookedness which never can be cured; and in opponents and lookers-on, influenced by the reaction of disgust, there result the scepticism, the hardness, the mocking and cruel temper, which the sight of folly, and possibly selfishness, clothing themselves with the most august claims and taking the holiest names in vain, must inevitably call forth and confirm.

Christian mysticism declares, in the language of Pascal, that the head has reasons of its own, and the reason knows nothing, or, in the words of Paul, that the wisdom of God is a mystery which the natural man receiveth not (1 Cor. ii. 6-16). In this general sense nearly all Christians now recognise an element of mysticism in the Gospel; i.e. they recognise that Christian experience has depth which the natural reason cannot sound; that there are truths which the spiritual sense perceives, but which the natural sense, or reason, cannot recognise or demonstrate, though it may perceive that they are consonant with, or at least not antagonistic to, reason. It will be readily seen, however, from what we have said above, that this doctrine is liable to perversion; and, historically, it has been perverted. In a historical survey of the Mystics, we find that they embrace various classes, from those who held the orthodox doctrines of the Church, but in the form of an experience rather than as a dogma or system of philosophy, to those who not only undervalue but actually repudiate all doctrinal theology, and reduce theology from a system of truth to a dream. Yet all of them, however widely apart in many respects, agree in this, that they seek to develop in the human heart disinterestedness of love, without other motives, and profess to feel, in the enjoyment of the temper itself, an abundant reward, which experience is the source of their religion to which they aspire. They lay little or no stress upon the outward ceremonies and ordinances of religion, but dwell chiefly upon the inward operations of the mind. It is not uncommon for them to allegorize certain passages of Scripture; at the same time they do not deny the literal sense as having an allusion to the inward experiences of believers. Thus, "according to them, the word Jerusalem, which is the name of the capital of Judæa, signifies, allegorically, the Church militant, morally, a believer, and, mysteriously, heaven." That sublime passage also in Genesis, "Let there be light, and there was light," which is, according to the letter, physical light, signifies, allegorically, the Messiah, morally, grace, and, mysteriously, beatitude, or the light of glory. All this appears to be harmless, yet we must be careful not to give way to the sallies of a lively imagination in interpreting Scripture. Thus Woolston is said to have been led to reject the Old Testament by spiritualizing and allegorizing the New. That among this class of devout men there was often genuine piety, with a living faith which realized Christ within them the hope of glory, is not to be doubted. But delusion soon sprang up, and men, given to mental interversion, mistook the dreams of their own distempered imagination for realities. Sudden impressions were cherished as the ellipse of the Spirit, and pictures of morbid fancy were hailed as exhibiting the odors, hues, and riches of a heavenly reality of which the senses are bereft.

The forms of thought and modes of action in which mysticism has been developed in different periods and among different nations are almost infinitely varied. Mysticism has appeared in the loftiest abstract speculation, and in the grossest and most sensuous idolatry. It has allied itself with atheism, atheism, and pantheism. Vaughan, in his Hours with the Mystics, divides Mystics into three classes: the Theopatic, the Thoepic, and the Theurgic. Under the first class, or the Theopatics, are included all those who resign themselves, in a passive or more or less absolute, to an imagined divine mania. The Theopatic self-perception, and not a self-perception, form a theory of God, or the works of God, which has not reason, but an inspiration of their own for its basis.

Finally, the Theurgists include all who claim supernaturals powers generally through converse with the word of spirits.

Minds predisposed to mysticism have been found in every age and in every country. The earliest mysticism, that of India, as exhibited in the Bhagavad Gita [see Hinduism], appears not in a rudimental and initial form, but fully developed, and as complete as it has ever manifested itself in modern Christendom. The Jewish Mystics are to be found at an early date in the calf of the Talmud. The Christian Mysticism is similar to the Essenes. "The soul of man," said they, "is divine, and his highest wisdom is to become as much as possible a stranger to the body, with its embarrassing appetites. God has breathed into man from heaven a portion of his own divinity. That which is divine is indivisible. It may be extended, but it is incapable of separation. Consider how vast is the range of our thought over the past and the future, the heavens and the earth. This alliance with an upper world of which we are conscious would be impossible were not the soul of man an indivisible portion of that divine and blessed Spirit. Contemplation of the Divine Essence is the noblest experience of man; it is the only means of attaining to the highest truth and virtue, and therein to behold God is the consummation of our happiness here," Jewish mysticism, combined with the profound philosophy of Plato, gave rise to the Neo-Platonic sect, which, as shown in the teachings of Plotinus, its founder, was thoroughly mystical. The Mystic, according to this sect, contemplates the divine perfections in himself; and in the ecstatic state, individuality, memory, time, space, phenomenal contradictions and logical distinctions, all vanish.

Mystics sprang up in its earliest days. They were to be met with in large numbers in the 3d and 4d centuries. But little is known of them historically. Their existence and influence, however, is manifest from the strange theological coloring of the writings of some Church fathers. The principles from which Christian mysticism sprang are more readily ascertained. We are enabled to trace it back to the allegorizing exegesis of the Alexandrian school of theology, the remote source of which may be found in the writings of Philo (q. v.). The historical treatises of this writer were evidently composed for Hellenistic readers, and set forth such facts of Jewish history as were known to every child under synagogue instruction, the allegorizing treatises were addressed to that particular phase of the Jewish mind which is dimly indicated in the Prophecies of Solomon, more clearly in the writings of the Son of Sirach, and which became a rule of life in the Theopatic of Alexandria. At Alexandria the literary Jews added to the study of Plato to the teachings of the Law, and learned to qualify the anthropomorphism of the latter by the transcendental notions of the Deity conveyed in the purest form of Greek philosophy. By a natural progression the anthropopoeic descriptions of the Sacred Book were spiritually interpreted as divine
allegory, and in time the whole letter of the Law was regarded only as a veil that screened deep mystical truths from the vulgar gaze; κακόν τά πάντα αληθωρίαν are the words of Philo. This is the true origin of the allegorizing school of exegesis that was developed in the second century B.C. by such writers as Philo, Origen, and continued elsewhere by Theophilus of Antioch, Hilary, Cyril of Alexandria, Epiphanius Syrus, and the elder Macarius.

The number of the Mystics was not large in the Church until the 6th century, when they rapidly increased, under the influence of the greatings of the period. Apion (q.v.), the ancient supposed and reputed disciple of St. Paul. It was at this time—that is, shortly after the Constantinopolitan Council of A.D. 553—that the Dionysian mystical views freely circulated, and made many converts. The Dionysians, by pretending to higher degrees of perfection than other Christians, and practising great austerities, rapidly advanced their cause, especially in the Eastern provinces. Dionysian opinions were set forth in the works entitled Mystical Theology, the Divine Names, the Heavenly Hierarchy, and the Ecclesiastical Hierarchy. The object of the author of these writings was to unfold the deep mysteries of the Christian faith, and to lead the soul on by contemplative energy to adoration with the Deity. The highest attainment in Christian philosophy he teaches is to behold in spirit and to become one with God, who is neither darkness nor light, neither negative nor positive, and who is not to be seen but only felt. The spirit is enlightened by the operation of the Deity, regards and participates in the mystic union; purification, illumination, and vision (ιστρεσία—terms adopted from the various grades of Eleusinian initiation (Plut. Demetr. 25). A more direct application of the terminology of heathen mysticism was made by this writer when he gave its title to the work De Mystico Theologia, a pretended works of Dionysius was sent by Balbus to Louis the Meek in the year 824, which kindled the flame of mysticism in the Western provinces, and, filling the Latins with the most enthusiastic admiration of these new opinions, considerably influenced the thought of the Western Church of the Middle Ages. John Scottus Eriugena translated the writings of Dionysius into Latin by the command of Charles the Bold, and left them as a model, of which the St. Victore schoolmen afterwards made use. We have seen in the article Dionysius that these writings are believed to be the work of the 5th or 6th century. Origen is the author of all this. A work on the souls (Contemp. Rev. May, 1867), attributes the authorship to some writer of the Eleusinean school at the latter end of the 5th or commencement of the 6th century. The immediate source of Dionysian mysticism was certainly the Symposium of Plato, in which the function of Eros is described as the medium of intimate communication between God and man, filling every void place throughout the universe, and binding together all its parts, celestial and mundane, in one compact body of love (Symposium, 202, E). Says one, the Mystics of the early Church, led on by Dionysius, proceeded upon the knowledge of the Platonic school, which was also adopted by Origen, and his disciples, and his school, as well as his body, is the new body of our soul, and the eternity of which is imaged in the body of the Deity. The soul (Col. Hier. iii, 1) as a divine order, science and energy standing in closest connection with the attributes of the Deity; it is, in fact, an exact reflex of these attributes. The works of Dionysius were explained as genuine in a commentary by Maximus, the monk of Constantinoople, who composed also an allegorizing work on the Liturgy, with the title of Mystagogia, very much in the spirit of the Dionysian views. This work still has a value as exhibiting the Liturgy of the Greek Church of the 7th century.

Maximus forms a middle term between the so-called Areopagite and Eriugena. We find in his Scholia on Gregory of Nazianzum the same transcendental notions of the Deity and of the divine immanence in the world of matter, which only is by virtue of that immanence.
As supra-substantial (ιστερόθεος), God has nothing in common with any known thing, but so far as the one is manifested in being it is multiform; and conversely, the multiform, by invocation, is substantially one. It anticipates the Spinoniast 'Alles ist Eins, und Eins ist Alles' ('All is One, and One is All'). As uniting in one the material and intellectual, he is a microcosmic representation of the universe; as the crowning effort of creation, he embodies in himself the future recapitulation of all things in God. Substantial union with the Deity is only possible in human nature; and it was made possible to all by the union of manhood and Godhead in Christ. Thereby man's spirit soars up to God through the energy of the will, and the incarnation of the Word is perpetuated in the individual. By means of his own free will man may be raised more and more above the trammels of the body, and be formed in God. As God is man by incarnation, so man through grace is divinely formed, and is one with God. God through love became man; man through love, and by virtue of the incarnation, becomes God. It is not once for all, but by an indeterminate continuance in all and through all, the whole mass of humanity, that the mystery of the incarnation is made effective. Those epics are not belatedly known only by their author. The writings of Maximus, with Eriugena's translation of Dionysius, circulated freely, and among the theologians of the West helped to raise scholastic thought from its dry dialectics, and to create a taste for spiritual contemplation. They even reached the secluded monks in their cells, and led them to speculate so boldly that the church fell into extravagance. One of the most favorable examples of this medieval monastic tendency is to be found in St. Bernard, of Clairvaux, who, in his deep appreciation of things unseen, stands forth in strong contrast with the materialism of Abelard and Gilbert de la Porée, for he went so far as to identify his own thoughts with the mind of God. Full of monastic prepossessions, Bernard spurned the flesh, and sought to rise by abstraction into the immediate vision of heavenly things. He denounced reason and the dialectics of the schools. Two canons of St. Victoire, selected apparently for their kinship to the earlier western mysticism—Hugh of Saxon, Richard of Irish extraction—did not, however, like St. Bernard, oppose scholasticism, but rather threw a fervor into the theology of the schools, the cold reasoning of which was seen by them to chill down religious warmth. The conception of Hugo on every other subject was "moulded by his theology, and that theology is throughout sacramental" (Maurice, Mediaeval Philosophy, iv, 74). Mysticism, as applied to this school, means a deep appreciation of the things of faith, a realization by the spirit of the unseen world, and is very far from implying the unintelligible musings of a private meditative society. The doctrine of any other realization of a later period" (Maurice, Mediaeae, Phil. iv, 41). Fuller, in his Church History, speaking of this period of mysticism, quaintly says: "The schoolmen principally employed themselves in knotty and thorny questions of divinity; indeed, as such who live in London and like populous places, having but little ground for their foundations to build houses on, may be said to enlarge the breadth of their houses in height, so the schoolmen of this age, lacking the latitude of general learning and language, thought to enlarge their active minds by mounting up, so improving their small bottom to the wider space of their opinions—the mystic mystical that might not, more of things difficult that could not, most of things curious that need not be known to us." Indeed, the schoolman and the Mystic were at this time generally regarded as formidable antagonists. Yet it is apparent now that the schoolman and the Mystic are not so constantly antagonistic as has been supposed, and are assuredly alike in one respect—for the buildings of the latter, with foundations both very small and very insufficient, rise into the very clouds. We too shall have to build our architecture in the theory of some contact further, and that a Theological and Scientific Building Act could forbid the erections of theories above a certain height without a proportionate solidity of foundation. At the head of the Mystics of this time stands Hugo. Yet it was not his but Walter's mysticism which was in direct antagonism with the school; the doctrine of the CONTRA quatuor Labynthinos Gallinum being a running incentive against the principles developed by the four principal Gallican schoolmen—Peter Abelard, Gilbert de la Porée, Peter Lombard, and Peter of Vootiers. Joachim & Floris opposed an apocalyptic mysticism to the dialectical theology of the church. In Bonaventure and Gerson the mystical and dialectic elements flowed on once more in harmonious action. In the 14th century the mystical tone given by the Hesychoist monks of Mount Athos to the Greek church was approved by three councils held on the subject at Constantinople—A.D. 1341, 1347, and 1350. They drew their inspiration from the writings of Maximus, the annotator of the Celestial Hierarchy. In the controversy that arose in the Greek church, Nicholas Cabasias (archbishop of Thessalonica, A.D. 1584) stood forth as the Hesychoist champion, and his Seven Discourses of Life in Christ is one of the most effective and most able works that has produced. The mysticism of St. Hildegard in the 12th century, of the Swedish saint Brigit and of Catharine de Sienna in the 14th, all form part of the same wave of thought. Paulicianism, the remote germ of the Waldensian and Albigensian sects, was rooted in a dualistic mysticism; and the Quietists of the 17th century were still true to the Alombrado stock from which they sprang. Asceticism, too, is not infrequently issued from the mystical religious life, its highest instances being that of St. Francis of Assisi, the founder of the Franciscan Order. The Fraticelli of the 13th century were an offshoot from this stock. The Beguine establishments, originally asylums for the widows and daughters of Crusaders, became convents of mystical devotees, with more or less of heretical tint. See BERGHARDS.

Mysticism, which had been training men in the West for a great religious revolution, sprang up and spread in the rest of the Islamic world. The doctrines of Islam have been proclaimed by the Arabian prophet as a class of Mystics appeared who revolted against the letter of the Koran in the name of the spirit, and boldly urged their claims to a supernatural intercourse with the Deity. For several centuries Persia was the chief seat of a body of Mohammedan Mystics, who are known by the name of Sufis; and the writings of their poets during the 13th and 14th centuries are deservedly admired by every student of Oriental literature. These Eastern Mystics sought, and in some cases claimed, an immediate knowledge of God by the direct exercise of the spirit. The mystics of the East, however, are less exalted than the Mystics of Islam. The doctrines of Islam are claimed identity with God, and denied all distinction between good and evil. They held the sins of the Sufi to be dearer to God than the obdurate of other men, and his impunity more acceptable than their faith. The Sufism of the East has continued to this day. The Mohammedan mystics—among whom are the mystical that might not, more of things difficult that could not, most of things curious that need not be known—to us. Indeed, the schoolman and the Mystic were at this time generally regarded as formidable antagonists.
MYSTICS

799

MYSTICS

mysticism before and since the Reformation period. In
the fellowshipships and spiritual associations which existed in
Germany and the Netherlands throughout the 15th century
and part of the 14th, mysticism was the predomi-
nating form of worship and life, in marked contrast to
theo-pneumatics. This, indeed, was the common basis of
the doctrine espoused on the Rhine, in the 15th century,
by the "Brotherhood of the Free Spirit." Their fundamen-
tal principle, that God is the Being of all beings, the
only real existence, unavoidably led them to consider
all things as products of this divine essence, even the
meanest creature as participant of the divine
nature and life. God is, however, chiefly present where
there is mind, and consequently in man. In the human
soul there is an uncreated and eternal principle, name-
ly, the intellect, in virtue of which he resembles and is
one with God. Such mystical doctrines are partially
revived in the inspiration and even the literature of the
Arians and of David of Dinanto, who elaborated the doctrines of the Bregards
into a regular speculative system. The following brief
epitome of his doctrines is given by Dr. Ullman in his
Reformers before the Reformation: "God is the Being,
that is, the solid, true, universal, and necessary Being.
He also exists, for God himself is also himself; he is
himself; all of him is semblance, and exists only in
as far as it is in God, or is God. The nature of God,
exalted above every relation or mode (aviero), and for
that reason unutterable and nameless, is not, however,
more abstract being (according to the doctrine of Amal-
ric) than be the name of Son, thinking, knowing and making itself known. The
properly most peculiar to God is thinking, and it is by
exercising it upon himself that he first becomes God;
then the Godhead—the hidden darkness—the simple
and silent basis of the Divine Being actually is God.
God proceeds out of himself, and this is the eternal
generation of the Son, and is necessarily founded in the
divine essence. In the Son, or creative Word, how-
ever, God also gives birth to all things, and as his
operation, being identical with his thinking, is without
time, so creation takes place in an 'everlasting now.'
God has no existence without the world, and the world,
being his existence in another mode, is eternal with
him. The creatures, although they be in a manner set
out of God, are yet not separated from him; for oth-
erwise God would be bounded by something external to
himself. Much more, the distinction in God is one
which is not the distinction of the Father from the Son
who is one with God, 'all things are in God,' and that
which is in God is God himself. In this manner it may
be affirmed that 'all things are God as truly as God
is all things.' In this sense also every created object,
as being in God, is good. According to this the whole
creation is the manifestation of the Father, or, as we
bear upon it a 'stain of the divine nature,' a reflection
of the eternal Godhead; indeed, every creature is full
of God. All that is divine, however, when extraneous
to the Divine Being, necessarily strives to return to
its source, to lay aside its finitude, and from a state
of participation in God. Such creatures have a deep and
painful yearning after union with God in untroubled rest. It is only when
God, after having, by the Son, passed out of him-
self into a different mode of existence, returns by love,
which is the Holy Spirit, into himself once more, that
the Divine Being is perfected in the Trinity, and he
rests with himself and with all the creatures.'

To this pantheistic mysticism was opposed a less nox-
ous kind of mysticism, which reared itself on the basis
of Christian theism. The chief representative of this
theistic mysticism is Ruysbroek, by whose efforts the
spirituality of the Church was definitively fixed in a
system, by a tissue of mystical applications of the
mystical theology of the preceding period, which
he invested with fantastic and visionary forms. He
adopted the view which led the schools so closely to
the verge of pantheism, namely, that all created nature is

as meaning that we become wholly identified with him,
and lose our own being as creatures, for that is an
impossibility. What it is to be understood as meaning is
that we are conscious of being wholly in God, and at
the same time that we are wholly in God, and yet united with God, and yet at the same time remain dif-
ferent from him. Man ought to be conformed to God,
and bear his likeness. But this he can only do in so
far as it is practicable, and it is practicable only in so
far as he does not cease to be himself and a creature.
For God is always a being; always a creature; the
creature is always a creature, and never loses its own
being as such. Man, when giving him-
self up with perfect love to God, is in union with him,
but he no sooner again acts than he feels his distinct-
ness from God, and that he is another being. Thus he
flows into God, and flows back again into himself.
The former state of oneness with a the latter state of dif-
ference from him are both enjoined by God, and be-
tween the two subsists that continual amification in
love which constitutes our felicity." Gerson, himself a
Mystic, attempted to involve Ruysbroek in the same
charge of pantheistic mysticism which attaches to
Henry Eckhart. The accuser speaks with authority for
the foundation. The mysticism of Ruysbroek, which had
the double advantage of being at once contemplative
and practical, was thoroughly theistical in its character,
and its influence was widely felt.

In the 14th century the pantheistic theory of J. Scottus was revived and successively
acquired by Eckhart, provincial of the Dominican Order in Saxony—the "Doctor Ec-
statics"—a man of unquestioned purity of life and
great earnestness of character. The boldest meta-
physical speculations were united in his system with a
severe asceticism. His was a period that particularly
favored the development of modern or spiritual theo-
logy. The distraction of partisan warfare in state matters,
the hostile attitude of the emperor towards the
court of Rome, and the increasing divergence of religious opin-
ion, gave an opportunity that was not thrown away by
this Mystic theologian. Without adopting any party
in particular, the Mystic devotee could combine his
higher spiritual aspirations with the most opposite po-
litical and religious theories, and gain a willing ear
from all. The whole heart of the people was open to him.
Hence the success of Tauler as a preacher in the 14th
century. He was termed "Doctor Illuminatus," as be-
cause he illumined his contemporaries with the living
faith in the pure Word of God, he said, was better than
mass attendance or bodily mortification; the sincerely
pious man alone was free, the friend of God, over whom
the pope had no spiritual power, for God had enfran-
chised and sanctified him to his free service; the spir-
itual and the temporal powers were separate and
neither, if the former was ever on ill terms with the
civil governor, had it authority to lay its subjects under
a ban. In Tauler the mystic principle was exhibited on its
most practical side, and in many of his views he was the
harbinger of that school of thought which brought about the
Reformation. This school, which was represented by Wycliffe in England, Huss in Bo-
hemia, Savonarola in Italy, and John Wessel in Hol-
land, more ubiquitously throughout the continent. See
FRIENDS OF GOD. With Tauler must be associated
the name of Henry Suso, his friend and ardent admirer, a
pupil of Eckhart (A.D. 1290-1365). The mysticism with
him was a matter of feeling rather than of speculation.
Wisdom as personified by Solomon was his theme, identified
at one time with Christ, at another with his Virgin Mo-
ther. To make himself worthy of the object of his adora-
tion, he practiced severe austerities, and claimed to be
sufficiently prepared for the reception of divine in-
struction, by a system, but a tissue of mystical
applications of the mystical theology of the preceding period, which
he invested with fantastic and visionary forms. He
adopted the view which led the schools so closely to
the verge of pantheism, namely, that all created nature is a
mirror in which Deity is reflected. Creation was eternally in God as the universal exemplar. No name can sufficiently declare the Deity. As basilisks termed the divine Principle oéé ó, chora, as Hecgel in modern times held the Deity in the same high position, so Suso shows that the Deity might with as great propriety be termed an eternal nothing as a self-existent entity. He is a circle whose centre is everywhere, whose circumference is nowhere. Imitation of Christ's sufferings is the true meaning of man's regeneration. Three principal steps lead on to union with the Deity: first, the purification of all earthly desire; illumination, which fills the soul with divine forms; and perfection, to which is accorded the fullest enjoyment of heavenly good. If Eckhart was the philosophic Mystic, and Tauler the more practical devotee, Suso was more poetical in his enthusiastic adoration of eternal Wisdom.

In all ages a yearning for more spiritual forms of religion has driven ardent spirits into mysticism. The period heralding the approach of the Reformation was by far the most fruitful for the propagation of mystic views and life. Greatest among the Mystics of those days was Thomas a Kempis (q. v.), who in his Hortus Rosarum, Vida de Liliorum, De Tribus Tobinaculis, and, above all, in his De Imitatione Christi, gives sufficient indication of the mystic spirit. Molinos de Saragosse, a resident of Rome from A.D. 1669, published Guida Spirituale (A.D. 1670), of a similarly mystic cast. Father Molinos, professor of philosophy and theologia moralis at the University of Coimbra, wrote under the notice of the pope as a production of a kindred spirit to the Begehards of the Netherlands or Spanish Alombrados, who laid the whole work of religion in silent prayer, to the neglect of external ritual. Sixty-eight heretical propositions were found in it, and the book was condemned by Innocent XI (A.D. 1677). Molinos, notwithstanding his confession of error, was confined in a Dominican cell under a tedious course of life-long penance. His followers were termed "Quietists," and as the "Tietism" of Germany was copied from them, they may be considered as a link of connection between Romanism and Protestantism. Pope Innocent, before the denunciation of pare La Chaise, had received much edification from the work of Molinos which he afterwards condemned. Fénélon also, archbishop of Cambrai (A.D. 1694), was more consistent in his appreciation of the mystical principle, as shown in his Reflections and Meditations on the Inner Life of the Christian. His relations with the Jesuits, connected with his metropolitan to the king, and the matter was referred to the court of Rome, where twenty-three propositions of doubtful character were declared to be erroneous. Fénélon submitted with humility to the papal decree; himself published the judicial bull, and prescribed his own writings. But there was nothing about him of the Protestant Fictor; one must be either Deist or Romanist, was rather his theory. There was also an unsuspected strain of mysticism about Pascal, the scourge of Jesuitism; for after his death an iron belt, rough with nails, was found to encircle his body, and a folded parchment sewn within it—probably—holding his confession of error which was the figure of the cross and the following writing: "In the year of grace 1654, Monday, Nov. 29th, feast of St. Clement, pope and martyr, and others of the martyrology; vigil of St. Chrysogonus, martyr, and others; from about half-past ten in the evening till about half-past twelve at night, fire; God of Abraham, God of Isaac, God of Jacob (Exod. iii, 6; Matt. xxxi, 32), not of wise men and philosophers. Certainty, certainty; feeling joy, peace. The God of Jesus Christ, 'My God and your God' (John xxii, 17). Thy God shall be my God (Rut. 1, 16). Forgetfulness of the world and of all besides. He is found of them that seek him, but of them that hunt after him is he not found. Righteous Father, the world hath not known thee, but I have known thee (John xvii, 25). Joy, joy, joy—tears of joy. I have separated myself from him. 'Derequirent me fontem aqua vivae' (Jer. ii, 13). O God, wilt thou forsake me? (Matt. xxvi, 46). May I not be separate eternally! 'This is true life, that they may know thee, the only true God, and Jesus Christ, whom thou hast sent.' Jesus Christ! Jesus Christ! I have loved thee, and thou hast loved me; I have trusted from the very first, renounced, sacrificed. May I never be separated from him. Safety is alone in the ways taught by the Gospel. Self-renunciation, total and sweet; total submission to Jesus Christ and my guide. Everlastingly in joy for one day of trial upon earth. 'Non obliviscar sermones tue' (Ps. cxxix, 16). Amen. If this be mystic, I may find a part between the expansion of a mortal desire; illumination, which fills the soul with divine forms; and perfection, to which is accorded the fullest enjoyment of heavenly good. If Eckhart was the philosophic Mystic, and Tauler the more practical devotee, Suso was more poetical in his enthusiastic adoration of eternal Wisdom.

The medieval mysticism, in its gradual progress from a mere poetical sentiment to a speculative system, and thence to a living, practical power, led men steadily forward towards the Reformation. In the view of scholasticism, Christianity was an objective phenomenon, but in the view of mysticism it was an inward life. The former pointed to the Church as the only possible means of salvation, but the latter pointed directly to God. The one had a never-ending craving to be en- sermed itself chiefly with a gorgeous hierarchy, outward forms, and necessarily efficacious sacraments; the other was mainly occupied with having Christ formed in the soul, the hope of glory. The Reformers therefore could not fail to sympathize far more deeply with the teachings of the Mystics than with those of the schoolmen. Though in a reformed class, the Mystics possessed, with all their extravagances, more of the truth of God than could be found within the wide domains of the Roman Church. But while Luther and his brother Reformers learned much from the Mystics, their theology went far beyond the doctrines of mysticism. During the 18th century, indeed, the Scripture element had gradually supplanted the mystical in the religion of the times. The Bible began to displace the schoolmen at the universities. Both in Germany and the Netherlands several able and orthodox divines had arisen, by whom the Word of God was brought into greater prominence than it had been by the schoolmen. The next prominent reformer was the great Protestant principle announced by Luther that the Scriptures are the sufficient standard of Christian truth than traditionalism and mysticism alike fell before it. Oral tradition and individual intuition were both of them rejected as infallible guides in an age of science. But even this reform of the state of mysticism among the Reformed, it broke forth in the most extravagant forms among the Zwickian prophets and the various sects of Anabaptists who appeared in the Low Countries and different parts of Germany. Thus, as Dr. Vaughan has well said, "By the mystic of the 14th century, the way of the Reformation was in a great measure prepared; by the mystic of the 16th century it was hindered and imperiled." The wild fanaticism of the Anabaptists was alleged to be a practical refutation of the asserted right of every man to the exercise of private judgment; and though Luther, Melancthon, Zwingli, and Bugenhagen exposed the fallacy of such an objection, yet for a time the work of reform was undoubtedly retarded thereby.

The "German Theology" had a great effect on the inner religious life of Germany at the time of the Reformation, and gave to it a mystic tone. It is the title of a lecture by G. W. Herder, in which he says that the influence of Luther, and published by him (A.D. 1518) as "e·yn edels Buchlein, von rechttem Verstand war Adam und Christus sey, und wie Adam zu uns sterben und Christus erschei- nen soll." Since that time it has frequently been translated and republished, and has been a great favorite in
Mystics 801

Lutheran Germany. All that is known of the author is that he was custos of the Deutsch Herren Haus at Frankfurt, or rather across the Main at Sachsenhausen, and a member of the society of "God's Friends," Romanista of mystical principles, who disappeared from the scene of the 15th century. See Friends of God.

The style of the book is quite similar to that of Tauler and Suso. The book inculcates the necessity of completely merging the will of man in the will of God, and of practicing the most complete self-denial and mortification of natural inclinations. It is self-will that stands as a wall of separation between man and God; it casts men into a multitude of devils, and is as the fire that never can be quenched; voluntary humiliation is its remedy. Of the high conceit and lax morals of the Brethren of the Free Spirit it speaks with much severity as the very spirit of Antichrist. Enlightenment, in which mysticism has always professed to initiate its votaries, is not to be attained by talk or study; but by steady acts of self-denial, and the practice of active virtue. Love, and no taint of self-seekings, must be the spring of all one's actions; and he can only hope to attain perfection who renounces as unworthy all wish for earthly reward. The same mind must be in him which was in Christ Jesus—self-denying and self-sacrificing. The tone of the book shows no symptom of disrespect for the Church; but its free application of Bible principles in a neoterizing spirit scarcely failed to prepare the way of the Reformation. In some respects it also exhibits the essential ideas of the Zwinglian party, though not in point of Kabbalism, which was always a great favorite with Luther, who freely owned himself to be under the deepest obligations to it. "Next to the Bible and St. Augustine," he says, "from no book which I have met with have I learned more of what God, Christ, man, and all things are." The sound theology which pervades the book would be clothed in a somewhat mystical garb, conveyed much light to the Reformer's mind. The fundamental thought which the book contains is thus described by Ulmian: "If the creature recognise itself in the immutable Good, and as one therewith, and live and act in this knowledge, then it is itself good and perfect. But, if, on the contrary, the creature revolt from that Good, it is then evil. All sin consists in apostatizing from the supreme and perfect Good, in making self an object, and in supposing that it is something, and that we derive from it any sort of benefit, such as existence, or life, or knowledge, or power, or beauty, or love; and it is precisely that which he fell. His presuming that he, too, was something, and that something was his, his 'I' and his 'me' and his 'my' and his 'mine,' were his apostasy and fall. In the self-same way Adam also fell. Eating the apple was not the cause of his fall, but his arrogating to self his 'I am' and 'mine.' But for the apple he had eaten seven apples, he would not have fallen. Because of it, however, he must have fallen although he had not tasted the one. So it is with every man, in whom the same thing is repeated a hundred times. But in what way may this apostasy and general fall be repaired? The way is first of all to come out of self (isolation in a case) and enter into God. Then do these two parties must concur, God and man. Man cannot do it without God, and God could not do it without man; and therefore it behoved God to take upon him human nature and to become man, in order that man might become God. This once took place in the most perfect way in Christ, and as every man should become by grace what Christ was by nature, it ought to be repeated in every man, and in myself among the rest; for were God to be humanized in all other men, and all others to be deified in him, and were this not to take place in me, my fall would not be repaired. In that case Christ restores what was lost by Adam. By Adam came self-consciousness, and with it disobedience, all evil, and corruption. By Christ, in virtue of his pure and divine life transmuting itself into men, came the annihilation of self-consciousness, obedience and union with God, and therein every good thing, peace, heaven, and blessedness." The Deutsche Theologie, which thus unfolded Protestant truth so clearly before the Reformation, has since 1621 been inscribed in the Romanish Index of prohibited books.,

At the Reformation period, Paracelsus (Theophrastus Bombast of Hohenheim, born A.D. 1493, d. 1541) was among the first to show a decided leaning to mysticism, though medicine, not theology, was his peculiar faculty. He was by no means a partisan of Luther, although he was himself a zealous Reformer. His theological mysticism was mixed up with mathematics, astronomy, astrology, alchemy, and natural history. From a similar medley Jacob Böhme, at a later date, extracted religious comfort. But the first of the Reformed party who gave to mysticism a definite shape was Valentine Weigel, minister of Ischopping, near Meissen, in Saxony; he died A.D. 1596. Mysticism has often made a close approach to pantheism, and so in his system he said that God had pity on himself in pitting man; for since the believer is by his act of faith raised above himself and abandons the soul to God, so God is conscious of his own being in man. Thus Spinoza declared that God is only self-consciousness, in the self-consciousness of man. Man is a microcosmal power, and in him the world is exhibited in miniature reflection. During his life Weigel had the worldly wisdom to keep his thoughts to himself, and subscribed the Formula Concordiae as a good Lutheran—really to avoid inconvenience, as stated in his own writing, and not from any conviction. In his Postille he complains earnestly of the sluggish spirit of the existing schools of theology; their bulky bodies of doctrine, their confession, their commonplaces and table-talk, as well as their far-famed Formula of Concord. All such beggarly elements of instruction blew away, and goad him on to improve the Word of God alone for light. Imputed righteousness was a doctrine, he said, that could only have been devised by Antichrist. Thus he also, though a professed Reformer, was in many points at direct antagonism with Luther and Melancthon.

The most unintelligible of Mystics, however, was Jacob Böhme (q. v.). Light, he declared, had been revealed to him that held him in a state of ecstatic rest; and thoughts were inspired by the revelation that he seems never to have had the power of communicating to others. After a silence of fifteen years he wrote the Aurora (A.D. 1612), which was followed by other works. His system, then, rests on the assumption of the interior nature of the naturalism afterwards developed by Schelling and the wider theosophy of the ancient Gnostics. Thus he affirmed God and nature to be essentially one; and this dualized principle, without which neither nature as a whole, nor any integral portion of it, can exist, is the 15th Article of Faith. But for the reason that he had eaten seven apples, he would not have fallen. Because of it, however, he must have fallen although he had not tasted the one. So it is with every man, in whom the same thing is repeated a hundred times. But in what way may this apostasy and general fall be repaired? The way is first of all to come out of self (isolation in a case) and enter into God. Then do these two parties must concur, God and man. Man cannot do it without God, and God could not do it without man; and therefore it behoved God to take upon him human nature and to become man, in order that man might become God. This once took place in the most perfect way in Christ, and as every man should become by grace what Christ was by nature, it ought to be repeated in every man, and in myself among the rest; for were God to be humanized in all other men, and all others to be deified in him, and were this not to take place in me, my fall would not be repaired. In that case Christ restores what was lost by Adam. By Adam came self-consciousness, and with it disobedience, all evil, and corruption. By Christ, in virtue of his pure and divine life transmuting itself into men, came the annihilation of self-consciousness, obedience and union with

MYSTICS

human lore; his only book was the book of nature, ever open before his soul. It is true he had learned much from the Theurgists who preceded him, particularly Cagliostro Agrippa, but these were sources of knowledge which he professed to communicate in his mystical writings was an inward illumination, which he claimed to have received from the Spirit of God, whereby he became minutely acquainted with the essences, properties, and uses of all the objects in nature. Schlegel has been careful to trace the affluence of a poetical mind of high order, and he does not scruple to rank Böhm with the master-minds that have taken their theme from the unseen world—Dante, Milton, and Klopstock. Hallam can see nothing in them—nothing better than the incoherence of madness (Literature of the Middle Ages, III, iii, 20). Boehm was followed in the same line of mysticism by the Rosicrucians and Freemasons, and by secret societies, which so abounded in the 16th century.

Of a very different stamp was Arndt's mysticism. It means a thoroughly spiritual religion. His principal works are the four books of True Christianity, and his devotional collection, the Paradise of Christian Virtues. They maintain their high character, and are still used in many households throughout Germany. But they encountered a vehement opposition when they first appeared, more especially from Osiander the younger, who managed to extract from them eight several gravamen to the doctrine of the Holy Spirit. The works of mystical school learning by his advocacy of practical piety, and of such "popish" Mystics as Thomas à Kempis and Tauler. Moreover, by his doctrine of the illumination and indwelling of the Holy Spirit he trenches upon the Lutheran theory of justification by faith alone and the orthodox doctrine of grace. J. Gerhard's Meditations Stavros (A.D. 1606), his Schola Pietatis and Poesis, are works of a similar tone of thought to Arndt's, and they met with similar reception at first; as Gerhard said, "If any writer upholds pious practical Christianity, and aims at something higher than mere theological learning, he is straightway branded as a Rosicrucian or Weigelin." J. Val. Andrei, grandson of Jacob Andrei, who took a prominent part in setting up the Lutheran Formula of Concord, was of the same school. In his younger years he accepted the Rosicrucian mystery (A.D. 1602), but more in jest than in earnest. His later writings (A.D. 1614, 1615, 1618) are a spirited defense of the Romish faith. His own evidently was to expose and put down the religious and political follies of the age, and uphold what he deemed to be spiritual Christianity. But he wrote in the spirit of Lucian; and it is often difficult to see where irony ends and earnest principle begins. His more liberal acceptance of the Popish errors, his defense of his own faith, his hatred of the high orthodox Lutherans. The Pietist Spener said of him: "If I could raise any from the dead for the good of the Church, it should be Valentine Andrei." It was owing to Arndt's influence that the mocking, scoffing spirit which seemed natural to Andrei was replaced by something higher and nobler of a Christian man.

But if Protestantism has had its Mystics, Romanism has not been altogether wanting in these religious enthusiasts. In France, in the 16th century, appeared St. Francis de Sales, and in Spain, St. Theresa and St. John of the Cross; all of them making their mystical doctrines subserve to the interests of the Mother Church. "Nowhere," says Mr. Vaughan, "is the duty of implicit self-surrender to the director or confessor more constantly inculcated than in the writings of Theresa and John of the Cross, and nowhere are the inadequacy and mischiefs of the principle more apparent. John warns the Mystic that his only safeguard against delusion lies in perpetual and unreserved appeal to his director. Theresa tells us that whenever our Lord commanded her in prayer to do anything, and her confessor ordered the opposite, the divine guide enjoined obedience to the human, and would influence the mind of the confessor afterwards, so that he was moved to counsel what he had before forbidden! Of course; for who knows what might come if it were to be resisted? But still, however, it is the lion-leaders of an Indian pagantery conduct their charge, holding a chain and administering opiates. The question between the orthodox and the heterodox mysticism of the 16th century was really one of theological doctrine. The question in the 17th century was simply one of ecclesiastical interests." According to the mystical doctrine of St. Theresa, there are four degrees of prayer: (1) simple mental prayer; (2) the prayer of quiet, called also pure contemplation; (3) the prayer of union, called also perfect contemplation; (4) the prayer of rapture or ecstasy. The raptures were found in the same sort of Romanism as the Rosicrucians and Freemasons, and by secret societies, which so abounded in the 16th century.

In the history of mysticism the 17th century was chiefly distinguished by the Quietist controversy. The most remarkable exhibition of Quietism is to be found in the writings of Madame Guyon. Thus, when describing her experience, she observes, "The soul passing out of itself by dying to itself necessarily passes into its divinity, and is in this the higher and the lower, it passes out of self, which is limited, and therefore is not God, and consequently is evil, it necessarily passes into the unlimited and universal, which is God, and therefore is the true good. My own experience seemed to me to be a verification of this. My spirit, disenchanted from self-love, became united and lost in God, its Sovereign, who attracted it more and more to himself. And this was so much the case that I could seem to see and know God only, and not myself. . . . It was thus that my soul was lost in God, who communicated to its qualities, having drawn it out of all that it had of its own. . . . O happy poverty, happy loss, happy nothing, which gives no less than God himself in his own immensity—no more circumscribed to the limited manner of the creation, but always drawing it out of that to plunge it wholly into his Divine Essence. Then the soul knows all the states of self-pleasing visions, of intellectual illuminations, of holy affections, which might have been, are now rather obstacles than advancements, and that they are not of service in the state of experience which is far above them, because the state which has props or supports, which is the case with the merely illuminated and ecstatic state, rests in them to some degree, and is not in the state of pure rest in God. But in the state of which I am now speaking without the loss of all such supports and helps. . . . The soul is then so submissive, and perhaps we may say so passive—that is to say, is so disposed equally to receive from the hand of God either good or evil—as is truly astonishing. It receives both one and the other without any selfish emotions, letting them flow and be lost as they came." This quotation contains the substance of the doctrine which pervades the mystical writings of Madame Guyon. The whole may be summed up in two words, "disinterested love," which she regarded as the perfection of holiness in the heart of man. A similar, if not wholly identical, doctrine was inculcated at the same period by Molinos in Italy, in a book entitled The Spiritual Guide. Quietist opinions were then evidently on the advance in the different countries of Europe, and among their supporters were some of the most illustrious men of the day, of whom it is sufficient to name Fénelon, archbishop of Cambrai. But the high character for piety and worth of the leading Quietistes made them all the more obnoxious to the Jesuits. Nor was the hostile spirit which was manifested towards the Quietistes limited to the Jesuits alone; the celebrated Bossuet,
MYSTICS

also, was one of the most bitter persecutors of Madame Guyon, and succeeded in procuring the public condemnation of her writings. For a time Colonel Joliot, Boussuet's opponent, Guyon was, for a time in England believing in the doctrines of pure love, of mysticism, and of perfection. The publication of this treatise gave rise to a lengthened and angry controversy. Boussuet sought to invoke the vengeance of the government upon his heretical brother, and he had even hoped to call down upon him the impositions of the pope. In the end, the authority of the society, the world was, for a time at least, disappointed. A war of pamphlets and treatises now raged at Paris, the chief combatants being Boussuet on the one side and Fénelon on the other. The Maximes were censured by the Sorbonne, and their author was persecuted by the king of France; but pope Innocent XII declined for a time to pronounce a sentence of condemnation upon Fénelon, of whom he had been accustomed to say that he had erred through an excess of love to God. At length, with the utmost reluctance, and in measured terms, he sent forth the much expected anathema, and Fénelon submitted to the decision of the Sacred College. Shortly after, Guyon, after a long life of persecution, thirty-seven years of which were spent in prison, died in 1717. Among the Quietists of the 17th century may be mentioned Madame Bourignon and her accomplished disciple, Peter Poiret; and among those of later times, the fascinating Mystics, Madame de Krüdener.

Vaughan, in his work, Hours with the Mystics, institutes a comparison between the Mystics of France and Germany up to this time, and is led thus to comment on the characteristics of these two exponents of mysticism: "Speaking generally, it may be said that France exhibits the mysticism of sentiment, Germany the mysticism of thought. The French love to generalize and classify. An arrangement which can be expressed by a word, a principle which can be crystallized into a sparkling maxim, they will applaud. But with them conventionalism reigns paramount—society is ever present to their mind; the individual, the particular, the ludicrous is exquisitely keen. The German loves abstractions for their own sake. To secure popularity for a visionary error in France, it must be lucid and elegant as the language—it must be at least an ingenious and intelligible falsehood; but in Germany the most grotesquely absurd, the most absurd and of thought, can be found no hindrance to its acceptability, and the most hopeless obscurity may be pronounced its highest merit. In this respect German philosophy sometimes resembles Lyceophron, who was so convinced that unintelligibility was grandeur as to swear he would hang himself if a man were found capable of understanding his play of Cassandra. Almost every later German Mystic has been a secluded student—almost every Mystic of modern France has been a brilliant conversationalist. The genius of mysticism rises in Germany in the clouds of the solitary pipe; in France it is a fashionable Ariel, whohover in the drawing-room, and hangs to the pendants of the glittering chandelier. If Jacob Böhme had appeared in France, he must have counted disciples by units, where in Germany he reckoned them by hundreds. If Madame Guyon had been born in Germany, rigid Lutheranism might have given her some annoyance; but her earnestness would have redeemed her as the noblest of her sex, and she would have lived and died the honored precursor of German Pietism."

The modern mysticism of Germany is chiefly remarkable for its excessive irreligiosity, and its close alliance with a congeries of metaphysical clouds, misnamed philosophy, which, by essaying to pass beyond the limits of the human faculties, turns day-dreams into logical systems, and resolves all truth and all religion into the discovery that there is no God, or that God is but a name for the universe. The indolence which in France expressed itself in a love of nature reveals itself in Germany in that of ribaldry and ridicule, assumed in Germany the garb of speculation and of sentimental feeling. To the speculations of Kant, of Fichte, and of Schelling, as well as to the claims of divine revelation, Friedrich Henry Jacobi, in his work on Divine Things, opposed that indolence and indifferency of mind, that loss of knowledge of divine things which he denominated faith, mental feeling, or reason, and which has acquired for his philosophy the name of mysticism. It is a revival of the reveries of Böhme, of the Gnostics, and of the Orientalists. Passing through such modifications as it could receive from the learned and speculative spirit of Schleiermacher, the critical acumen of Wette, the poetry of Novalis, and the picturesque genius of Carlyle, we now find it exciting to something like vitality the negative theology of Unitarianism in America and in England. By the side of these speculative Mystics we find also in modern times the imaginative Mystics, whose system is less the invention of something new and false than the perversion of what is old and true. To this branch of mysticism belongs the mystical interpretation of the Scriptures, the originator of which, as we have seen, is supposed to have been Philo the Jew, and the character of which pervaded the writings of Plotina and Celsus, Clemens, Tertullian, and Clement of Alexandria. Gregory of Nyssa, Ambrosius, Jerome, Augustine, Gregory the Great, Bede, Maurus, and Hugo de St. Caro.

In England we see it espoused in the spiritualizing of Solomon's Temple by Bunyan, and Brown's parallels of O.T. facts with the history of the Jews, etc. Mr. William Law (author of the Serious Call, etc.), and the very able opponent of bishop Hoadly, degenerated in the latter part of his life into all the singularities of mysticism; and some suppose that his extravagant notions were one means of driving the celebrated Gibbon into a state of infidelity. "Mr. Law," says Vaughan, "supposed that the material was the region which originally belonged to the fallen angels. At length the light and Spirit of God entered into the chaos, and turned the angels' ruined kingdom into a paradise on earth. God then created man, and placed him there. He was made in the image of the Triune God (whom, like the Hutchinsonians, he compares to 'fire, light, and spirit'), a living mind, a living soul, for communion with Father, Son, and Holy Ghost, and to live on earth as the angels do in heaven. He was endowed with immortality, so that the elements of this outward world could not have any power of acting on his body; but by his fall he changed the light, life, and spirit of the world, so that every man, in every relation, to all the influences and operations of the Spirit of God upon him, as we die to the influences of this world when the soul leaves the body; and all the influences and operations of the elements of this life were open to him, as they are in any animal, at his birth into this world; he became an earthly creature, subject to the domination of this outward world, and stood only in the highest rank of animals. But the goodness of God would not leave man in this condition: redemption from it was immediately granted; and the bruiser of the serpent brought the light, life, and spirit to once more into the human nature. And more in consequence of the redemption of Christ, have in them the first spark, or seed, of the divine life, as a treasure hid in the centre of our souls, to bring forth by degrees a new birth of that life which was lost in paradise. No man of Adam can be lost except by turning away from the Saviour, to sin, and to have only a religion which can save us must be that which can raise the light, life, and Spirit of God in our souls. Nothing can enter the vegetable kingdom till it have vegetable life in it, or be a member of the animal kingdom till it have the animal life. Thus all nature joins with the Gospel in affirming that no man can enter into the kingdom of
MYSTICS

...realm of meanings and possibilities... However, there is a need to balance this with a more inclusive and diverse approach to mysticism, one that recognizes the deep and profound experiences of individuals across different cultures and contexts.
form of teaching, is clear from the direct quotation of mythological stories by Jude (ver. 9, 14), and from the use of strictly analogous modes of conveying truth (allegory, fable, parable, etc.) in other parts of the Bible, as well as in the writings of all the wisest of mankind. It must have been, therefore, the doctrines involved, and not the "mythical" delivery of them, which awoke the indignation of the apostles; and if, as Tertullian thought (A Dut. Vindic. iii), and as is now generally believed, the "myth" alluded to were the Gnostic mythology of the "Sons," of which the seeds may have been beginning to develop themselves in the past ages of mankind, as was written, we can easily understand how they would appear to bear the stamp of "philosophy and vain deceit." 

Theodore, however, on Tit. i. 14, refers the "Jewish fables" to the Mishna (in the ina evaiiav kaloumenov eivtiwv, Alford, ad loc.).

No satisfactory definition of the word "myth" has ever been given, partly because of the manifold varieties of myths, and partly because the word has been used in several distinct senses. In Homer it is equivalent to λόγος (Il. xvi. 258), and Eustathius remarks that in later times it came to mean φαντάσμα λόγος (Il. a. 291), to which it was joined together with preconceived ideas and fancies, and which Plutarch, less accurately, confounds it with παλαιάς fiction (λόγος παλαιάς ἀκος λόγος), and in the Eptonomologos Magnum it is made, in its technical sense, to mean a veiled or enigmatic narration (μίμης σημαίνεται δώ). So far as we can trace the development of the myth, whether the etymology and the history of the word help at all, it is derived from μνήμη, to initiate, or μνέω, to shut, and archbishop Trench thinks that it must therefore have originally meant the word shut up in the mind, or muttered with the lips (Symon. of the N. T. (2d ser.) p. 174), though he admits that there is no trace of this in actual use, and at first, μνήμη means "word," we may even derive it from an onomatopeia of the simplest connotative utterance (m.). It is not until Pindar's time (O. I. 47; N. v. 84; v. 1), that it is used of that which is "mentally conceived, rather than historically true," and in Attic prose it assumes its normal later sense of any legend or tradition of the prehistoric times. If, however, we analyze the modern use of the word, we shall find that these historical myths, or amplified legends of the remote past, generally mingled with the marvellous, do not properly represent our notion of myths any more than the well-understood philosophy, or even the metaphysics, of which they are really a degradation. We must learn, too, to distinguish between the myths and the rationalistic explanations thrut in them by the critical knowledge of a later age. If we would understand the true nature, for instance, of the Greek myths, we must discard from them the timidly rationalistic suggestions of Hecataeus, the severely common-place views of Phalalaphus, and the unsympathizingly sceptical rashness of Eusebius, no less than the profound moral intentions which have so often been transferred to them by the speculative genius of a Bacon or a Coleridge.

Deeper, then, is neither a philosophy nor a legend. It is best described as a spontaneous product of the youthful imagination of mankind—the natural form under which an infant race expresses its conceptions and convictions about supernatural relations and prehistoric events. It is neither fiction, history, nor philosophy; it is a spoken poetry, an uncritical and childish habituated idea, and self-believing romance. It does not invent, but simply imagines and repeats; it may err, but it never lies. It is a narration, generally marvellous, which no one consciously or scientifically invents, and which every one unintentionally falsifies. "It is," says Mr. Grote, "the natural effusion of the unlettered imaginations, and believing man." It belongs to an age in which the understanding was credulous and confiding, the imagination full of vigor and vivacity, and the passions earnest and intense. Its very essence consists in the projection of thoughts into the sphere of facts ("der Grund- Trieb des Mythens das Gedachte in ein Geschehen umzusetzen" [Creuzer, Symbolik, p. 99]). It arises partly from the unconscious and gradual objectivating of the subjective, or confusing mental processes with external realities; and partly from inventing the object with the feelings of the subject—that is, from imaginatively attributing to external nature those feelings and qualities which only exist in the perceptive soul.

The myth, then, belongs to that period of human society in which the mind regards "history as all a fairy tale." Before the increase of knowledge, the dawn of science, and the general dissemination of books, men's fancies respecting the past, and the dim conjectures of nascent philosophy, could only be preserved by these traditional semi-poetic tales; to borrow the fine expression of Tacitus, "Eingang simul credentium." So far from being startled by the marvellous and the incredible, they expected and looked for it; while discrepancies and contradictions were accepted side by side, because the critical faculty was wholly undeveloped.

The "real and the ideal," says Mr. Grose, "were blended in the primitive conception of the world, passed unquestioned, from the fact of its currency, and from its harmony with existing sentiments and preconceptions" (Hist. of Greece, i. 610). To the intensity of a fresh imagination, and the necessary weakness of the youth of language, we can trace the origin of a vast number of myths. In those early days men looked at all things with large eyes of wonder and admiration. The majority of phenomena which they saw and enjoyed were incapable of other than a metaphorical or poetical description; and even if language had been more developed it would have responded less accurately to their thoughts, because they seriously transferred their own feelings and emotions to the world around them, and made themselves the measure of all things. Thus the hunter regarded the moon and stars which "glanced rapidly along the cloudy heaven" as a "beaming goddess with her nymphs;" and

"Sunbeams upon distant hills, Gilding space with shadows in their train, Might, with small help from fancy, be transferred Into fleet Oreads sporting visibly." Wordsworth, Excursion, bk. iv.

Thus the manifold aspects of nature, imaginatively conceived and metaphorically described, furnished at once the nec plus ultra of mythology; and when these elements were combined and arranged for the purpose of illustrating early scientific or theological conceptions, and were corrupted by numberless erroneous etymologies of words, whose true origin was forgotten, we have at once the materials for an extensive and sometimes inextricable mythology. In the early stage of the myth, confined to the period when everything is personified, it is as difficult to distinguish between what was regarded as fancy and what was believed as fact as it is to this day in the rude and grotesque legends of Poly-nesians and North American Indians. But in a later time, when these ideas were preserved in a systematized form, the poetical imaginative faculties had often well-nigh evaporated, and that which had originally been meant as half a metaphor was prosaically hardened into a real and marvellous fact. Thus in many myths, as they were finally preserved, we may see the mere misconceptions of a myth, and the guesses of a more imperfect etymology, mingling in two distinct streams with the original simple poetical tale. Any one who considers the evanescent "tradition" of untutored polytheism as it is displayed among modern savages, may watch, even at the present day, the ground and swift diffusion of myths; but we must look into various and distinguished periods of the history of Greece (especially into that of Greece) to see such myths first erroneously systematized into definite narratives, to be deliberately believed—then partially and timidly ra-
tionalized—next contemptuously rejected—and finally restored to their true rank as the most interesting relics of a primitive society, and the earnest teachings of a yet unsophisticated religious philosophy.

This subject would require a volume to explain it adequately; and, indeed, it has occupied many important volumes. All that we have here attempted is to remove the misunderstanding that has been generated by the word. Whether or not there be any myths in the Bible, and especially in the earlier books, is a question which must be settled purely on its own merits. See MYTHICAL THEORY. It is, however, undesirable that the mere word "myth" should be avoided by those who wish to retain some of the aspects of the word as containing mythical elements. Even men like Bunsen and Ewald bowed to popular prejudice in shunning the word; and of the English theologians, who rely so much on their authority, scarcely one (with the exception of Dr. Davidson) has ventured in this particular to express their guidance. Yet the word "myth" is far more reverent and far less objectionable than "fable," which some would substitute for it; and it is, as Dr. Davidson has pointed out, far more honest than circumlocations which mean the same thing (Intro. i, 146).

It will be observed that we are here giving no opinion whatever as to the fact of the existence of scriptural myths. We are stating that the phenomena of the word and the confuse who understand the true nature of myths, and, rightly or wrongly, believe that here and there in the Hebrew records a mythical element may be traced, should not hesitate to express their conviction by the term which is most suitable and most likely to secure for the subject a clear and fair discussion.

The following are a few of the more important books on the subject of myths: O. Müller, Prolegomena zu einer Wissenschaftlichen Mythologie (Götting, 1825 [transl. by J. Leitch, Lond. 1844]); Grimm, Deutsche Mythologie; Buttman, Mythologica; Hermann, Über das Wesen der Mythologie of all the several kinds; Lübeck, Aglaophamus; Creuzer, Symbolik and Mythologie of the Ancient Welt; Nitzsch, Helden-Sage der Griechen; Böttiger, Kunst-Mythologie d. Griechen; Kavanagh, Myths traced to their primary Sources through Language (1856).

The subject has of late years received three important contributions—Mr. Grote's History of Greece, vol. i; Prof. Max Müller's Essay on Greek Mythology (Oxford Essays, 1856); and Cox, Mythology of the Aryan Nations (Lond. 1878, 2 vols. 8vo). See MYTHOLOGY.

MYTHICAL THEORY, an attempt to destroy the sacred character of Scripture by considering its contents as the product of the nature and tradition of ancient mythology. It is the result of the theological systems of Kant, Hegel, Semler, Eichhorn, Woolston, and has found its fullest development in Strauss's Life of Jesus, and his Old Faith and New. The only question we can consider here is whether the sayings of the O. and N. T. can or cannot really be considered as myths. In the first place, it is worthy of remark that the word μῦθος, derived from μίω, to close the eyes, has the same root as μυστή and μυστικ, and points to the shadowy conceptions of the soul, the thoughts which find next an expression in words. Hence it represents not merely the expression, but also the narrative, especially such as finds its origin in the vague ancient times, and consequently fables and sayings undeserving of belief (1 Tim. iv, 7, γρατεὶς μυθοὺς παρακριτ., comp. 2 Tim. iv, 4, where it is opposed to the ἅλετρα; Tit. i, 14, ἑνδοκοι μυθῶν, and generally every tradition unworthy of being believed (1 Tim. i, 4, μῦθος σοφομον, 2 Pet. i, 16, μυθολογία, and generally every tradition unworthy of being believed (1 Tim. i, 4, μῦθωσ�ομον, 2 Pet. i, 16, μυθολογία, and generally every tradition unworthy of being believed (1 Tim. i, 4, μῦθωσ�ομον, 2 Pet. i, 16, μυθολογία, and generally every tradition unworthy of being believed (1 Tim. i, 4, μῦθωσ�ομον, 2 Pet. i, 16, μυθολογία, and generally every tradition unworthy of being believed (1 Tim. i, 4, μῦθωσ�ομον, 2 Pet. i, 16, μυθολογία, and generally every tradition unworthy of being believed (1 Tim. i, 4, μῦθωσ�ομον, 2 Pet. i, 16, μυθολογία, and generally every tradition unworthy of being believed (1 Tim. i, 4, μῦθωσ�ομον, 2 Pet. i, 16, μυθολογία, and generally every tradition unworthy of being believed (1 Tim. i, 4, μῦθωσ�ομον, 2 Pet. i, 16, μυθολογία, and generally every tradition unworthy of being believed (1 Tim. i, 4, μῦθωσ�ομον, 2 Pet. i, 16, μυθολογία, and generally every tradition unworthy of being believed (1 Tim. i, 4, μῦθωσ�ομον, 2 Pet. i, 16, μυθολογία, and generally every tradition unworthy of being believed (1 Tim. i, 4, μῦθωσ�ομον, 2 Pet. i, 16, μυθολογία, and generally every tradition unworthy of being believed (1 Tim. i, 4, μῦθωσ�ομον, 2 Pet. i, 16, μυθολογία, and generally every tradition unworthy of being believed (1 Tim. i, 4, μῦθωσ�ομον, 2 Pet. i, 16, μυθολογία, and generally every tradition unworthy of being believed (1 Tim. i, 4, μῦθωσ�ομον, 2 Pet. i, 16, μυθολογία, and generally every tradition unworthy of being believed (1 Tim. i, 4, μῦθωσ�ομον, 2 Pet. i, 16, μυθολογία, and generally every tradition unworthy of being believed (1 Tim. i, 4, μῦθωσ�ομον, 2 Pet. i, 16, μυθολογία, and generally every tradition unworthy of being believed (1 Tim. i, 4, μῦθωσ�ομον, 2 Pet. i, 16, μυθολογία, and generally every tradition unworthy of being believed (1 Tim. i, 4, μῦθωσ�ομον, 2 Pet. i, 16, μυθολογία, and generally every tradition unworthy of being believed (1 Tim. i, 4, μῦθωσ�ομον, 2 Pet. i, 16, μυθολογία, and generally every tradition unworthy of being believed (1 Tim. i, 4, μῦθωσ�ομον, 2 Pet. i, 16, μυθολογία, and generally every tradition unworthy of being believed (1 Tim. i, 4, μῦθωσ�ομον, 2 Pet. i, 16, μυθολογία, and generally every tradition unworthy of being believed (1 Tim. i, 4, μῦθωσ�ομον, 2 Pet. i, 16, μυθολογία, and generally every tradition unworthy of being believed (1 Tim. i, 4, μῦθωσ�ομον, 2 Pet. i, 16, μυθολογία, and generally every tradition unworthy of being believed (1 Tim. i, 4, μῦθωσ�ομον, 2 Pet. i, 16, μυθολογία, and generally every tradition unworthy of being believed (1 Tim. i, 4, μῦθωσ�ομον, 2 Pet. i, 16, μυθολογία, and generally every tradition unworthy of being believed (1 Tim. i, 4, μῦθωσ�ομον, 2 Pet. i, 16, μυθολογία, and generally every tradition unworthy of being believed (1 Tim. i, 4, μῦθωσ�ομον, 2 Pet. i, 16, μυθολογία, and generally every tradition unworthy of being believed (1 Tim. i, 4, μῦθωσ�ομον, 2 Pet. i, 16, μυθολογία, and generally every tradition unworthy of being believed (1 Tim. i, 4, μῦθωσ�ομον, 2 Pet. i, 16, μυθολογία, and generally every tradition unworthy of being believed (1 Tim. i, 4, μῦθωσ�ομον, 2 Pet. i, 16, μυθολογία, and generally every tradition unworthy of being believed (1 Tim. i, 4, μῦθωσ�ομον, 2 Pet. i, 16, μυθολογία, and generally every tradition unworthy of being believed (1 Tim. i, 4, μῦθωσ�ομον, 2 Pet. i, 16, μυθολογία, and generally every tradition unworthy of being believed (1 Tim. i, 4, μῦθωσ�ομον, 2 Pet. i, 16, μυθολογία, and generally every tradition unworthy of being believed (1 Tim. i, 4, μῦθωσ�ομον, 2 Pet. i, 16, μυθολογία, and generally every tradition unworthy of being believed (1 Tim. i, 4, μῦθωσ�ομον, 2 Pet. i, 16, μ}
not explain every case: some parts of the narratives were stubbornly unyielding, and new methods were demanded. But the gospel narrative did occupy the methodological text itself was not spared: this passage was doubtful, that was corrupt, a third was spurious. In short, "criticism" was at last able to make anything, and in a fair way to make nothing, out of the sacred records. But still the ra
titude of the text was not the only end of the editors. No one assenting that there was, at bottom, a basis of substantial truth in the narratives, was content to leave them as stand🔙ors to the way of truth and inspiration of the divine; and in, in, that there could be no medium between open infidelity and the admission of a supernatural revelation. During the first quarter of the present century the conflict was waged with aror on both sides, but with increasing energy on the side of truth; as every year weakened the forces of rationalism. Stil, the theological mind of Germany was to a considerable extent assuaged: its Tholuck and Henneberg still stood strong in the old position, but the more working-class, the closest logic to systematic theology; its Marheinecke and Dubs philosophized religiously; its Brehm and Eichendorff, and further, a few not a maintained the old rationalism, though with less and less of conviction, or at least of boldness.

It has been given to Germany to make the most astonishing and paradoxical application of the mythicist theory to the whole structure of the Bible. It is not that the text has been more or less infected with the mytho-mania since the new school of archologists have gone so deeply into the substantiation of the history in the Bible, and the abstinence from all rationalism, though with less and less of conviction, or at least of boldness.

"Beides the general impulse given by Strauss to the study of the four Gospels, his book has done a very good service. His book has given a deadly blow to ra
tionalism properly so called. Its pitiless criticism and beg
ggary into the Indian and Chinese religions seems factually dissected in his investigations of the differ
cut parts of the history and of the expositions that have a word, but it does not go beyond the outer cut of the field to make way for his myths; and Neander, Eberhard." Strauss's "New Life of Jesus" is a work of nothing remains but a return to the simple, truthful int

In his New Life of Jesus (authorized translation, Lond. 1865, 2 vols. 8vo) Strauss thus defines his modified and elaborates the theory, (p. 210), "I have, mainly in the consequence of Baumgarten's allowance, the Gospel narratives had almost gone before to the hypothesis of conscious and intentional fiction. This may properly be called myth as soon as it has gained belief and passed into the legend of a peo
pel or a religious sect; for its having done so invariably shows at the same time that it was formed by its author not merely upon notions of his own, but in connection with the consciousness of a majority." He therefore still maintains that "the myth, in its original form, is not the conscious and intentional invention of an indi
cidual, but a production of the common consciousness of a people or religious circle, which an individual does not indeed fabricate directly, but who, in every way, is the ver
ty that such individual is but the organ of this universal conviction" (p. 206); and he proceeds to explain how in this way arose the account of the birth of Jesus in Bethlehem, and the disappearance of his body from the tomb. Yet he adds, "But when we thus point out an unconscious invention of such acc
counts was possible far beyond the limits within which they are generally considered admissible, we do not mean to say that conscious fiction had no share at all in the evang
elical formation of myths. The narratives of the fourth Gospel especially are for the most part myths, but other parts of the Bible, if they are not historical, they can apparently only be considered as conscious and intentional inventions" (p. 208). Accordingly he discards the Gospel of John al
together as being purely fictitious. This is the suici
dal act of the mythological theorists; for once brought to the alienation of self-preserving or hermeneu
tic words as a simple question of sacristy, their battery is unmade, and the argument becomes one of bold inf

"As he has proved, long ago, that the N.-T. writers had no possible motive or opportunity for either self-deception or imposture."

Straus's "New Life of Jesus" was a criticism of the mystical and spiritual aspects of the Gospel narrative. By historical myths it is meant the admittance of actual facts by the imagination. Strauss, however, went further than this, and adopted what he calls the principles
of philosophical mythus, i.e. "the expression of an idea in the form of an imaginary biography." But the weak point in Strauss's system, at which it finally broke down, was that he did not assert the whole Gospel and the limits of the historical is contained in the N.T. histories as facts. Here, then, his system was as great a failure as any other. The very aim of his method was to exclude everything capricious or hypothetical; the result of its application was to leave the field as much open to caprice and hypothesis as before. Nor does his eventual denial of the truthfulness of John's Gospel mean a system; it only introduces a fresh element of discrimination and consequent perplexity. Late researches go much deeper into the idea of the myth and its application, particularly in the work of Schelling, Ueb. d. Mythen d. alttest. Welt (in Paulus, Menorabiiden); Creuzer; F. Baur, of Täbinger, Symbolik u. Mythologie, oder die Naturreligion d. Alterthums (Stuttgart, 1824-25, 8vo); Otfried Müller, of Göttingen, Prolegomena zu einer Wissenschaftlichen Mythologie (Göttingen, 1825); A. Batke, D. bibl. Theol. d. A. Test. (Berlin, 1833). In the O. T. they consider as mythical the history of creation and of the fall of Adam, the consequent punishment, the flood, the origin of the various nations, and the election of the Jewish people, as well as their covenant with Jehovah; the history of the patriarchs, the stay in Egypt of a family which grew into a nation (although, as shown by remaining monuments, this is based on a fact), their exodus from Egypt, the giving of the law at Sinai, the journey through the wilderness, the account of the manner in which the Israelites came into possession of the Promised Land. Then a great deal in the following books, as also in the later history of the people and of the kings, especially in the form as we find it in the Book of Chronicles, which we have made to proclaim the patriotic interest; the greater part of the history of the prophets, and even passages in the latest history of the people, as the apocryphal books, contain myths concerning the Maccabees. All through, tradition is connected with the myths which form an important element in these narratives, and both are in the whole history of the Israelites connected, in true Oriental style, with the historical element. These views, but often still more sweeping and exaggerated, were at that time advanced cautiously, and used to explain many passages in Scripture with some show of reason; the more as, all line of demarcation being destroyed by the generalization of some sense, the system of allegory came to the same standard. The abstractions of these views, and their impurity, called into existence an opposite party which rejected the assertion of any myths being contained in the canonical Scriptures; and the views of the latter have greatly prevailed among the more honest and careful, even of German critics. Traces, however, of this mythical theory in an obscure or sub-duded form are seen in Stanley's Lectures on the Hist. of the Jewish Church; having evidently come over from Ewald's destructive and arbitrary method of treating Jewish history in his Israelit. Volk. A sounder and soberer, but also more thorough, has been the restoration of the narratives of both the O. and the N. T. to their proper rank as genuine history. See RATIONALISM.

Mythology (from μύες, a tale, and λόγος, a word) is, according to Pococke (India in Greece, p. 2, note), intended strictly as a term synonymous with "invention," having no historical basis. Yet by usage the word is confined to fictions made in the early periods of a people's existence, for the purpose of presenting their religious belief, and generally their oldest traditions, in an attractive form. The tendency to create myths in this way seems inherent in every people; certainly there is no people so sunk into the brute as to be without them. And, what is more noteworthy, the systems of mythology have by no means ceased to exist even in our own day. They have only taken different shapes, and have been more widely diffused. The name is changed, while the essence remains. In losing their character of celestial reference they have become more earthly and less splendid and imposing, but their vitality is as great as ever. We might almost say of the legend of the vengeful gods that it has even reached the Romish Church, that the more they are divided the more they multiply. The mystery with which the popular fancy delights to envelop them serves instead of the immortal ambrosia which ministers to their heavenly life. "Nothing," says De Gubernatis, "clings to the earth more closely than a superstition. A scientific truth requires years and years before it can obtain general acceptance. The ancient myth gives us the germ of many existing traditions, and in the same manner the current popular legends often explain the enigma of the old celestial personifications" (Zoological Mythology, vol. i., Introd.). Myths may be divided into several classes. The most important is the moral and theological. The latter of these two is of course the more important; for it is in the myth that the oldest theology of all non-Christian nations is embodied. "Mythology," says one, "is not occupied merely or mainly with strange fancies and marvelous fictions; it is for the sake of amusement, but contains the fundamental ideas belonging to the moral and religious nature of man as they have been embodied by the imaginative faculty of the most favored races. It is this dominance of the imagination, so characteristic of the early stages of society, which gives those picturesque and descriptive features which form the popular creed of all nations with the character of a poetry of nature, of man, and of God." Hence arises the great importance of mythological study for the religious student, now so universally recognised.

Mythology, or, more strictly speaking, religious mythology, may be taken as a wider, and therefore a narrower sense. In its wider signification it includes all that was believed or might be affirmed concerning the gods of any polytheistic system—not only theology, or the doctrine concerning their nature, attributes, and operations, but their interferences in the history of the world. From the very nature of the case, the myth-producing faculty exercises itself with exclusiveness only under the polytheistic form of religion; for there only does a sufficient number of celestial personages exist whose attributes and actions may be clothed in a historical dress. There is nothing, however, to prevent even a monothetic people from exhibiting certain great ideas of their faith in a form that may be called mythic, and that may be found for literal historical facts. The first of these divisions answers to the doctrine concerning God found in the Scriptures; the other to the manifestation of God in the events of the world, and especially in Jewish history. Besides strictly theological myths, there are physical myths, that is, fictions representing the most striking appearances and changes of external nature in the form of poetical history; in which view the connection of legends about giants, chimeras, etc., with regions marked by peculiar volcanic phenomena, has often been observed. It is difficult indeed, in polytheistic religions, to draw a line between religious myths and fictions, as the divinity of all the operations of nature is the first postulate of polytheism, and every physical phenomenon becomes the manifestation of a god. Again, though it may appear a contradiction, there are historical myths; that is, marvellous legends about persons who may with probability be supposed to have actually existed. So intermingled, indeed, is fact with fancy in early times that there must always be a kind of debatable land between plain theological myth and recognised historical fact. The land is occupied by what are called the heroic myths; that is, legends about heroes, concerning whom it is often very doubtful whether they are merely a sort of inferior and more human-like gods, or only men of more than ordinary powers whom the popular imagination has elevated into demigods. Schelling, in his philosophy of mythology,
uses the word in a somewhat broad meaning. He says that "these (divine, or mythological) personalities are at the same time thought of both in certain natural and in certain historical relations to one another. Kronus is called a son of Uranus; this is a natural—when he emasculates and dethrones his father, this is a historical, not a natural, transformation. In the Veda, Christ, in the New Testament, or in other of some religions, which speaks of their birth and of their relations among themselves, aside from any manifestations to men or interferences in human affairs. But if we make a distinction between the doctrinal part of polytheism, or of any particular religion, as that of India or Greece, and the historical part from which and from its cultus the doctrinal part, or the religious faith, is ascertainment, we shall not be far out of the way. For the doctrinal part we refer to the article POLYTHEISM. For the sake of greater clearness, however, we shall, by way of preface, proceed to enumerate some of the principles ought to be borne in mind when we treat of mythology.

We mention (1) that the divine power or life-giving energy in nature was divided up in heathenism into many separate powers, which were personified, and even became to the heathen mind, personified, endowed with separate wills, desires, intelligences. (2) That these divine powers, or gods, cast off their connection with the natural object out of which they grew, so that the connection in the end was no longer obvious to the heathen mind. In this way they entered into various relations to a nation, a tribe, or a class of men; they acquiring special moral qualities or functions, and as such are the interests of society in all its subdivisions, all arts and employments, everything in the physical world and among men, was placed under their care. (3) They were conceived of as having human passions and desires; they had distinctions of sex—originally because social causes, as the sun, were aptly conceived of as masculine, and power, like the earth, as feminine; they had marriages among themselves, and as they assumed human or other shape at will, they could have connections with human beings also. (4) As objects of nature originally, and as many in number, they all had limited powers, and, while they were immortal, had a death, and changes of shape, and were at times possessed. (5) People, for instance—is a part of the cosmogony which in several religions of heathenism was devised—somewhat later than the rise of mythology—to explain the original condition of the world and the way the gods came into existence. As man comes into being by procreation, so in general the existence of the gods is in the same way accounted for. Matter itself is for the most part conceived of as eternal. (5) When the mythological process was in full activity, not only did powers of nature become persons before the imagination and faith of the polytheist, but moral powers or causes also, abstract and general causes of states of feeling, and the like, were turned into personified agents, or even into persons. Thus among the Greeks, Theismis, or justice, Nemesis, or retribution, the Moirai (shares, allotments, fates, Latin Parcas), became personified, and even assumed personal existence, together with a multitude of others. And so by the side of the gods, properly so called, a multitude of subordinate beings, who grew out of such personifications, were worshipped among the Greeks and Romans, and formed a portion of a very large class which may be called secondary divinities, consisting, among others, of representatives of the life of smaller objects, such as the earth, water, fire, wind, clouds, synths and spirits; or of demons attendant on higher gods, and of heroes, or the spirits of deceased men, as also of demigods, or men with a divine father or mother, who played a part second to no other in classical mythology. (6) The mythological age cannot, on account of our want of historical records, have any exact limits assigned to it. It began in the earliest infancy of nations. We see the mythological spirit in the Vedas, which point back to an age from 1500 to 3000 years anterior to the earliest records of Christ. Greek mythology fully mature in the age when the Homeric poems were written, and a rude philosophy working up its materials in the Heaedic poems. Centuries must have elapsed before Homer, during which men looked at nature and the world in this spirit. The poets collected the myths of various parts of Greece, and gave them a general Grecian stamp, but they did not originally invent them, nor were the gods imported from Egypt, the affirmation of Herodotus to the contrary notwithstanding. The end of this mythologizing spirit is also indefinite. Some few historical events are intermingled with myths, but the connection was later than the myth. To say that they ceased when history began is to say no more, properly speaking, than that for a time mythology and the historical spirit were in conflict, and that, as the result, mythology was looked on as the history of the past.

So far as actions and interferences of the gods form a part of mythology, it was in no sense a product of imposture. No priest or poets, or persons sustaining both characters, invented it. The poet and his hearers had the same faith, and their imaginations were in the same mythological condition: they honestly believed in the acts and powers of the gods. That the system of divine interference in the affairs of men, of which they introduced the particulars into their poetry. Otherwise they could have met with no responsive chord in the souls of the people; or, if unbelieving themselves, they would not have searched out and reproduced the myths. The myth was not the outcome of speculation about the myth; it was the outcome of the needs of the human mind. It was used for medicine, as a fable, as the epic poems of the Homeric period, and of the cyclical school afterwards, must have felt free to transform and work over and add to the myths which they received or gathered as their stock in trade. This is no more than Christian believers, such as Milton or Klopstock, have done, without the least suspicion that they were生产力 than that they were freer and more candidly tampering with sacred things. (2) The logographs or mythographs—the collectors of mythology into one corpus, the translators into prose of the epic sagas—these persons did allow themselves to make alterations; they may have invented connections between myths, so as to make them fit into their framework and form one whole; they may to some extent have given an improved version of one or another of the fables, under the conscious or unconscious influence of a rationalizing spirit. (3) The lyric poets in making use of the same materials went a little further. Final criticism is offend­ed by the immoral acts imputed to the gods, and thus we see that a higher moral standard is beginning to cause a conflict between religious myths and the moral sense. This is more evident afterwards, and was one of the causes of the scepticism of later Greece. We have on record a remarkable story relating to Stesichorus, one of the earliest lyric poets. In the beginning of an ode he had indulged in invectives against Helen, and, as a retribution for his evil speaking, lost his sight. He then composed his Helen, in which his version of her story was that she never went to Troy, but her phantom, or eidolos, took her place; thus his eyesight was restored. Euripides comments on this latter part of the story. (4) Euripides the argument of the drama of Helen. The nucleus of truth here is that the poet desired the received fable for another which was thought to be new
MYTHOLOGY

MYTHOLOGY 810

with him (Stesich. Frg. in Bergk, 29; Herm. Prog. in Eurip. Hel.; Bernhardy, Gesch. Griech. Lit. ii, 478). (4) The tragic poets indulged in still greater liberties. Ἐρασίλος and Sophocles, being religious believers, still respected the myths; while Euripides, an unbeliever, cared nothing for them. (5) In a still later age they were mere materials for works of poetry and art; and that a poet interwove them in his narrative is no proof that he received them as true. It must be observed, also, that in the mouth and recollection of the people myths could not remain exact copies. They changed from age to age—In the spot where the events were first reputed to happen had afterwards many competitors. The actors, especially the minor actors, varied. The poets chose what suited them best, or what first presented itself. Hence it happens that a more antique form of a myth is sometimes picked out of the fragments of some obscure writer, or of some modern author like Pausanias, who went about among the people, or had access to authorities now lost.

The main inquiry is, How did the myths arise, if neither priest nor poet, neither fraud nor conscious invention, was the source of the great myths among them? Whether we say that they were the power of the vague imagination looking at the world as being full of life, or by the mythologizing process, we say nothing. When we draw analogies from modern myths—as the story of Holland, or the Holy Grail, or the epic of Arthur and his Knights—or trace the marvelous alterations which the Greeks made of the Aesopian fables, or the creation of poems and prose narratives, to be found in all the languages of Europe and in some of those of Asia, we still fall short of the explanation (comp. Grote, Hist. of Greece, i, end). For in the first place there is in most of the modern myths a gem of fact, as, for instance, in the story of Helen and the Trojan War, the gods of the story relating to the god of the gods, had no intrinsic, but only physical, facts for their foundation. When we come to the myths of the heroic times of Greece, there must have been historical events in some shape, perhaps very much distorted, out of which they grew. The machinery in the epic stories founded on these myths—in other words, the interventions of the gods—were conformed to a belief of an age when the material was first chosen for the songs of the rhapsodists; but the difficulty still remains how the religious element of the myths became united with the rest. It is easy enough to see that a story like that of Helen and the Trojan War, a siege of the walls of Troy, can give rise to possessing the sources of interest for the national mind, should by and by grow in the multitude of its details, be worked over, be altered in the mouth of the people or by the poets—this is what happens on a small scale every day; but it is hard to account for the turning of celestial phenomena into events of history. This does not happen now. The power of doing it is lost. If, for instance, the passage of the sun through the signs of the Zodiac—a yearly occurrence—becomes, through some faith of the ancient mind and some power of the imagination, the series of labors of a demigod like Hercules, struggle against monsters on the earth, and doing his work in its particular scenes, and the same gods may say the mythology for this in the present state of the world. The world of physical nature and the world of history are separated now by fixed limits. How in the mythological age did a fact of nature turn into a fact of history? That is the great difficulty which we encounter when we speculate on mythology, and it meets us in all the fables concerning the gods of such a nation as Greece, India, or ancient Germany. Mythology must continue a mystery until this is explained.

In attempting a solution of a part of this problem, we must bear in mind the conception of the gods already spoken of, and the sway of the imagination looking out on the life of the world, and conceiving of it as directly originated by superhuman spiritual causes, and not as yet recognising, to the degree that we do, the control of secondary, physical laws. Take a single instance, that of Apollo. We assume here that Apollo was at first a sun-god; this, although no traces of such an identification appear in the poets before Ἐρασίλος, and although it has been denied by some writers on mythology, as, e.g., Maryon, Moret, Drösig, etc., and admitted by the later and best scholars, in whose hands the Greek religion has been cleared of many of its difficulties (as, e.g., Creuzer, Welcker, Frenell, and others). And it was the sun-god with a personality after the fashion of men, although the sun, Ἡλίος, still retained a place as a substantial person—in Greek-worship, the Sun God, Dimetere, the earth-goddess, entered into the events of the world by the side of Gea, earth, whose action was nearly confined to the myths of the cosmogony. The sun was thought to produce vegetation through the excessive heats of summer and autumn. Apollo therefore was conceived of as originating pestilential diseases. The sun's rays are naturally thought of as darted forth from the body of the sun itself. Apollo now became an archer, the god of the silver-bow; and when at the beginning of the Iliad evil disease was sent through the army by the arrow of Troy, it was because Apollo was angry at the treatment which his priest, Chryses, met with from Achilleus. Apollo was the god of healing, the protector of an injured suppliant, and relations which only a personal existence could assume. The god came down from Olympus—where we have a society of the upper gods under Zeus—he shot his arrow into the army, the mules and dogs first, then the men, were smitten. But the Great and good things are necessary, and can be propagated; he can turn away his darts and heal disease. Perhaps, however, too, a physical phenomenon may explain the attribute, that as the sun generates pestilence when there is an undue amount of moisture and heat, so his tempered rays bring health. But the heroism of the man, the heroism of the myth, may be more, it may be the arrestor of it; he is called Hekarispergos, he drives off, and in the Doric dialect Apollon, the averter, which in common Greek became Apollo. As an averter, he is the curer of disease—Peon or Pean, the healer. His connection with music and poetry is more accidental; and his relations to political and social life (which were so important that he became the leading divinity of Greece) must be explained on historical grounds. His name, Phoebus, the bright or pure, brings him again into connection with the sun and with purifying rites. He was a source of inspiration as well at Delphi as at Epidauros. This was the priestess in the temple of Apollo at Delphi, and the Pythian priestess received the prophecies from the Sybil. All this, however, does not reach the difficulty. It is quite conceivable that mythological divinities should thus arise, as well as that events which are of common occurrence should be attributed to a special god. But go beyond such events, and you get into deeper water. Take the story of Niobe, for instance, and its explanation by two of the principal mythologers, Welcker (Gr. Götter. iii) and Frenell (Gr. Mythol. ii, 288). Omitting details, Niobe, daughter of Tantalus, the mother of many children, exalted herself against Leto (Latona) because she had given birth to two children only, Apollo and Artemis. Accordingly the angry gods, who had been pleased at the manner of her conduct, shot down, and she wasted away in grief. She was turned into stone, and her stone image was shown on Mount Sipylos, not far from Magnesia, in Asia Minor. This is an Asiatic myth, naturalized in Greece proper, and it signifies the decay of the products of the earth. Niobe is the earth-mother, whose multitude of offspring, born in spring, are withered by the god of light in autumn; or, as Welcker explains it, the new or renewed nature (Niobe being from the root denoting new), losing her children by the solar heat, mourns for them like Rachel. What renders this fable very remarkable is the story or the tradition which many travellers describe (comp. Hamilton, Asia Minor, i, 49, 50) as having the resemblance of an image. Now, whether these or other explanations deserve the prefer-
once, we have an annually recurring event turned into a historical and personal event that happened once for all. Here the difficulty comes up again, and is coming up continually. The myth of Cybele and Attis, that of Adonis or Thamus, that of Osiris, in the same way probably arose out of annually recurring physical phenomena and came into his wife. Here the myth takes the form of a celebration of a bride, which can be traced in Greece, and even now is found in the practice of many tribes. In consequence of the protests and grief of Demeter, it was arranged that she should be on earth with her mother two thirds of the year, and one third below with her husband, Hades. This threefold division clearly point to the division of the season in the early times of Greece into spring, summer, and winter (literally, éar, early tinge; thees, hot time; and chisma, either most time, from a root existant in Samoët, or purging-time, rainy time). Thus the conversion of a recurrent physical phenomenon into a historical event which appears in it we find hard to explain. We may say the gods became persons: their attributes, before physical, are now personal attributes; what they do must have a historical quality, must be like human actions; so that anything that needs to be told does not seem to be insignificant with their personal, non-physical nature. But still this turning-point is dark to us, because we are other men than those of the mythological period; we have no longer the mythical faculty in its full exercise—nay, it is all but dead. The anthropomorphic tendency—which men cannot escape from in speaking of the God of the Scriptures whenever they are exalted in their feelings—sides the mythical process, as well as the desire to express an object of worship in human form. But this pertains rather to the article POLYTHESM, where it will be spoken of more at length.

Not all nations are equally mythological, and some which have historical myths to show are not rich at all in religious myths. The Aryan race had in most of its divisions, as among the Hindús, the Greeks, the Germans and Northmen, and the Slavonians, a great richness of conception and imagination in this respect; but so none is it given as to the Greeks to stamp the impress of beauty on their mythology, so that their art and poetry, although built on mythology, still charms the Christian world. The Romans were poor in the number of their religious myths, for which the reason may be that they were formal and conscientiously scrupulous in their worship rather than free and gay or possibly their myths may have been driven into oblivion by early culture derived from Greece. The Semitic nations and Egypt had also a poor mythology, copious as the pantheon of the last mentioned was. It is said that the myth of Isis, Osiris, and Typhon was their only one. Thus it must either have expelled others from circulation, or none ever existed. Probably there were other myths in remote times. The Persian religion was of Aryan origin, although in centering all interest on the lasting strife between Ormus and Ah- riman it seems to have somewhat chilled the mythic mind. Such a view is possible, but the evidence of the Arians was copious enough, but the grand moral idea swallowed up every other. Their myth-making faculty is exercised in their cosmogony and eschatology, but concerns itself little with special historical relations between man and the deities. The primitive tribes of this continent were far from wanting in this power, although the forms of their myths are like the imaginations of children. All this shows that mankind are much the same in all races, that resemblances do not necessarily prove copy from a race to another, and that the religions of nature, man being what he is, have a necessary existence. Again, the myths of a religious character, in which the gods enter into human history, show a craving on the part of man for intercourse with the gods. It was no strange thing that myths should arise where there was no revelation, or where a primitive revelation had been lost; it was equally not strange that a real revelation should take the historical form.

There are certain myths which narrate the origin of the world and the births of the gods. These cosmogonic and theogonic narratives are found alike among the Indians of this continent, among the Greeks, the Syrians, in the Teutonic race, and elsewhere. These of course can be, in great part, nothing else than early human speculations put into a religious myth shape. They are the rude, childish philosophy of early men, who are thus fables preserving to posterity without knowledge of law and of the world. We believe we may affirm it to be a general truth that no natural religion conceives of a creation out of nothing, and to a great extent the gods had no eternal existence. There was, then, a necessity of a primitive form or stuff out of which the life and thought of nature was evolved. In the Greek speculation on the first origin of things, the rudest shape of matter was the first, and the progress was towards the more perfect, until their thought reached the present condition of things. In Hesiod's theogony there is a strange mixture of true cosmogonic and theogonic mythical elements, one with another, a birth or evolution, runs through all except the first. Chaos came to be (Kybera), then the broad-breasted Earth, and Tartarus in the dark recesses of spacious Earth, and Eros (most beautiful among the immortal gods). From Chaos Erebos and Night were born (Erebos), then Night and the hours. From Erebos and Chaos the first bare star Uranus to cover her over on every side, with the Hills and the Pontus, without sexual love; then to Uranus she bore many children—the Titans, among whom was Kronos (Saturn), the Cyclops, and the hundred-handed one, Uranus hid his children as they were born, in a cavern, but Kronus mutilated him with the advice of Gea, and reigned in his stead. From Kronus and Rhea a new class of gods were born, whom the god swallowed, lest any of them should seize his throne, which Uranus and Gea forewarned him of as being his destiny. When, however, Zeus was born, he was privately conveyed away, and a stone wrapped up in an infant's clothing was swallowed in his stead by Kronus. These children, with the stone, Kronus was made to disgorge, and Zeus, overcoming his father and his Titans, took the throne. In this strange medley, where allegorical beings and such as never received divine honors are put among the gods, we find the Ti- tans playing a great part, who can have had no veneration as gods in the earliest Greek religion. We find also three dynasties: Uranus and Gea, Kronus and Rhea, and Zeus with Hera. Schelling, following an earlier writer, supposes this to be a tradition of three successive forms of worship, the first and second of which were dualistic. But there is no evidence within the Greek records worth anything going to show that Uran- nus was ever an object of worship. It is probable that the word itself is connected with Varuna, a highly honored Aryan deity of the Vedic times. The pre- vidence is, therefore, that a very wide difference in worship of Kronos (i.e. either of time personified, or of a divinity corresponding in part with the Roman Saturn- nus, and having also some Phoenician characteristics.
drawn from Moloch), prior to that of Zeus, cannot be made out. Nor is there any proof that the Greeks held to a dualism something like that of the Chinese. On the contrary, the Vedic gods, worshiped seven or eight centuries before Hesiod, show that in that early age a polytheistic people had already perceived the difference between life and death. So once before, the whole theology shows a philosopher with his materials before him, using the cement of his own reflections to unite them together in one structure. We do not mean to say that one man did all this, but that it was not popular tradition. This was necessarily so, as the popular mind knew nothing of a cosmogony. It had no facts to work upon, as it had in the forms and forces of the religions of nature as she appears in the present order of things. We might go on and speak of the cosmogonies of other nations, but the Greek system—the clearest of all—will show, we think, that the part of mythology in which this is treated of is neither popular nor of the very earliest origin.

It is a very interesting inquiry whether any primaeval traditions of mankind, facts pertaining to the general historical tradition of man and of the world, have mingled with the mythologies of heathenism. On the one hand, if there is a tradition of a great fact appearing with mankind, in the dawn of humanity, which is afterward assumed a local character, the universality is a proof of common origin, notwithstanding the variations; and the presumption is against its being propagated from one part of the world to another, since all things else in mythology seem confined to a particular race or continent. But if a myth is the expression of some interior conviction of human nature, as the sense of evil, or of a lapse of man from a better state, this may be explained on psychological grounds. To begin with the last kind of myths, the tradition of a former golden age can easily be accounted for on the principle that memory clings to what is in the past, and at its time hard to bear, so that the age of our fathers, our youth when we are old, the early history of a nation, are surrounded with a golden halo. As to traditions of a lapse, a departure from the idea of man, they are found in a number of mythologies, but they may all be the product of reflection. Let us take the Prometheus myth for a sample, as it appears in Hesiod. Omitting some of the details, we find that Prometheus—surnamed from his forethought, as his brother Epimetheus was from thinking after he acted—tried to cheat Zeus in respect to the offering of a victim. In revenge, he caused the men to have fire. Prometheus, however, who is really a fire-god or daemon, stole it out of heaven, carrying it in a hollow stalk, and thus again provoked the wrath of the god. The latter bound Prometheus in chains to a rock, and tormented him by sending an eagle to devour his liver, which daily as fast as it was eaten, until Hercules killed the bird and set the victim free. As a punishment to mankind for receiving the fire, a woman was fashioned, endowed with various gifts by the gods, and sent to Epimetheus. She brought with her as a kind of outfit a jar or cask, such as was used in housekeeping. Epimetheus was not satisfied, and gave her advice to the victor to reject the gift. The woman opened the jar, which was full of pains and death-bringing diseases, unknown before, and in consequence of this act they were scattered abroad. Only Hope stayed within the jar’s cover. To this we add from the Prometheus Bound of Eschylus the striking trait that a condition of the poet’s deliverance was that some god should suffer in his place (Hesiod, Theog. 507–516; Op. 43–104; Eschylus, Prom. 1027). There is no objection against finding a tradition of a fall in this myth arising from the fact that a state of misery, and not one of sin, is contemplated. The probability is that the difference between heathenism and revelation, that the former, although capable of great protection, finds it hard to come up to the idea of sin. The resemblances between this fable and the third chapter of Genesis are plain enough. Prometheus, the fire-bringer, the introducer of the arts into the world, may stand for the tree of knowledge, and Pandora may stand for Eve. "Our woe" came by a woman in both narratives. But the differences are still greater. There is in the fable no temptation of man to evil; he is quite passive, and the active power of the creator was necessary to this calamity. Woman does not lead him into sin, but is contented to express for his suffering. And, what adds to the awkwardness of the myth in its present form, the race of man was made, and had offered religious homage to the gods, before Pandora spread maladies over the world. It was no progenitor who entailed evil on his posterity, but the soul of man, which came up from the earth. We are disposed, therefore, to regard the story as a Greek invention, rather than as a distorted tradition of the primeval times. When the more recent form of the myth makes it the condition of the redemption of Prometheus that a god shall take his place of suffering, some have found in this particular an adumbration of the Christian doctrine of vicarious suffering; but to admit this would be to admit that heathen myths make as near an approach to the highest truths of the Gospel as is made by the Old Testament itself.

There is, however, another class of myths that have to be considered in order to understand the human and religious phenomena, happening here and there over the world, can account for, and which could not be originated by the reflecting or observing mind. Traditions of a flood are very numerous, and confined to no one or two races. According to a remark of Bunsen (in his Christianity and Rome, 146), there are a great many myths, the myths of the Taranian or Hamitic races, the tribes of Africa have retained but slender traces of a flood at the best; but in China, Hindostan, Persia, Greece, Babylonia, and the Eids, and through the tribes of North and South America, they present themselves to us as a part of the mythology. In many local traditions it is the land of the tribe which is visited with a deluge, but this is no objection against their common origin. In Greece there were fables of three deluges, one of which, Deucalion’s, was in Thessaly, that of Ogysges in Beotia or Attica, and one was localized in the island of Samothrace. Pindar’s simple story makes mention of the water overwhelming the earth, of its being forced back by the wisdom of Zeus, and then of Deucalion and Pyrrha coming down from Mount Parnassus to their home at Locrian Opus, where they had a postern of stones. The destruction of the men of the iron age, the building of an altar at the foot of a mountain, the copious rains bringing on a flood, the death of all men but a few who fled to the highest mountains, the floating of the ark nine days and nights until it struck on Parnassus, are particulars given by mythographers and later poets. The renewal of the human race by Deucalion and Pyrrha throwing stones behind their backs is a play of words between sickle, people, and sickle, stone, as Max Muller and others remark. This myth seems to have been known to Hesiod, and Deucalion is engraved into the genealogies of the Hellenic race. It is possible that some story imported from foreign parts as it was its function to do was the Arcturus, and as there was a different race, we find a tradition which repeats the story of the renewal of men in the time of Deucalion and Pyrrha. The Caribbean tribe of the Tamanakas, on the Orinoco, say that a man and a woman, the only persons saved in a deluge, threw the fruit of the Mau- yatia—over their heads because of their cruel churls (J. G. Millidge, New World, p. 229, and Humboldt there cited). We have only room to refer to two other traditions of a flood. One is that of India, which first appears in the Mahabharata, as an episode which Bopp has translated (Berlin, 1829). In this myth Manus, a rigidly ascetic prince, was on the bank of the Wirini, when a small fish called a Kuhu, one of a family of seven ones, and was put by him into a dish. The fish outlet the vessel, was then removed into a lake, then, again outgrowing its dwelling, into the Ganges, and
from the Ganges into the ocean. As it entered the ocean it told Manus that a great deluge was at hand, that he must build a ship with sails, go into it with the seven wise men, and provide himself with all the seeds known to the Brahmins. The fish promised to appear with a horn, to which Manus should tie his vessel, and so they set out. The fish took the bow and towed the ship of Manus over the fulness of waters. At length he gave orders to bind the ship to the highest point of Himavan (the Himalayas), which is, says the poet, "ship-fastening," Neubandhanam, until this day. Then the fish said to Manus, "I am the lord of the waters from Himavan; higher than me there is nothing." And he bade him renew the race of created things and the world, which by means of strict penance he was to accomplish. The deluge of Xisuthrus, which seems half borrowed from the narrative in the Scriptures, is reported by Berossus, who was born under Alexander the Great. Xisuthrus, king of Babylon, was warned by Saturn (Bel) that a flood would come upon the earth in which all men would perish, and was ordered to conceal his books in one of the cities called Helopolis, and to build a vessel into which he could go with his relations and friends, with birds, beasts, and quadrupeds of all sorts. He obeyed this strange command, and when the flood was abating he repeated the experiment of Noah, sending out birds, which twice returned, but the third time went their way. He then broke a hole in the vessel, and disappeared, being translated among the gods, with his wife, his son, and the ark-builder. Fragmentary legends of the same episode are related in Scythia, and several have been seen on a mountain in Armenia. The same story was known to Nicolaus of Damascus, a friend of Herod the Great. Josephus (Ant., I, 3, 6), who mentions this, says, that all who have recorded the history of barbarian nations have mentioned the deluge and the ark. The story which he relates, that the Ararat mountains is each year rising from the landing-place from the ark seems to have circulated in that country before it received Christianity (comp. Wiseman's Lect. p. 290, Amer. ed. of 1857). To this Babylonian flood myth can now be added an Assyrian one, discovered by George Smith, the decipherer of cuneiform records, who published two or three years before the date of Assurbanipal, one of the last Assyrian kings, and a contemporary of Manasseh, from the clay tablets recording his reign, and has since found new tablets made for the same king, on which the myth referred to is narrated. It is far more mythological than the Babylonian, and to be later in origin, but does not materially differ from the earlier account, while the name of the ark-builder, who is Sisit, is evidently identical with Xisuthrus. It is worthy of mention that M. Lenormant, in a memoir on this newly found Assyrian myth, with some plausibility, shows how the story passed from Assyria into India, and was not indigenous in the latter country. We might strengthen our position by the aid of other similar myths, but for this we have no space. What but a tradition of a great fact can have led men all over the world to have a common story of a deluge inwoven in their mythology, the very thing which they are so very great—point to a great antiquity of the story, as well as to its independent working up? We close the subject with some remarks of Prof. Welcker's (Griech. Götteri, i, 770) on the Greek myths relating to the flood. These, he says, were not inferences from observations of their own. "Only a great event, a covering of the earth with water over wide regions, was sufficient to make a deep impression on human memory, and to produce a story formed with such beautiful simplicity, and spread so widely among the original nations of Asia." See Deluge.

Nothing remains, according to our plan, but to say a few words on the explanations of the myths of heathendom, especially from the ancient to the modern times. Great uncertainties attend such explanations, because in very many cases the myths are not homogeneous, and because the minds that created them were in a condition unlike our own. To the Greeks especially this was a subject of deep interest, and a number of solutions were offered; most of which were unsuccessful, because the Greeks of a historic and philosophic age could not comprehend their own remote ancestors. The spirit to attempt such solutions began perhaps in scepticism, and especially from the Lyceum of the Academy. Xenophanes, the founder of the early Eleatic school, more than five hundred years before Christ, says, in an extant fragment of a poem, that "Homer and Hesiod ascribed everything to the gods that was shameful and blamable among men, as to steal, to commit adultery, and deceive one another; and, in another place, that "those who say the gods are born are equally impious with those who say that they die." He also inveighed against the anthropomorphisms of mythology, and rejected a plurality of gods (comp. Nigelsbach, Posidom. Theol. p. 420). Such utterances so the gods could not bear with impunity. The race was not ready to give up its faith in the only divinities known to it; some compromise was therefore necessary; and even the sceptics felt themselves bound to account for the series of events in the mythological times, and for the belief in the gods itself. One of the explanations which stood the test was that of the Phoebans (about B.C. 590) taught that the myth of Cerberus owed its origin to a poisonous snake lying by the great cavern of Tenerum, in Southern Laconia, which was accounted an opening into the subterrestrial world. Herodorus of Hereslea turned Asia into an astrologer and geographer, and Prometheus's seduction of the gods by a river glaring away, so to speak, the fat of his land by its floods, but was freed from the plague by Hercules changing the course of the stream. The river was called the Aetus, or eagle river, whence the fable of the eagle consuming the liver of Prometheus (see Lobeck, Agni thos, lii, 35). To Herodorus the story resembles a version of the story of Io, which made her the daughter of the king of Argos, whereas modern students of mythology regard her as one of the forms of the moon-goddess. This method reminds us of the older rationalists—Paulus, for instance—who nibbled at the supernatural without daring to deny it, and are now deservedly almost forgotten. The gods themselves, however, were not as yet explained away.

A new form of the historical interpretation appeared in the 8th century B.C., which is called, after the name of its founder, Euenus (Euenurus, Euenerus), a Si stylian poet, who enjoyed the favor of Sisyphus, king of Cassandria (ob. 296 B.C.). This man published a book called Sacred Records, which claimed to give authentic accounts of Zeus and other gods, drawn from sacred titles and inscriptions found in the most ancient temples, and especially in one of Zeus Triphyllus, on an Indian island called Panchaia. His theory was that the Greeks in the confusions of uncivilized life, being desirous of obtaining from the common mass of men greater admiration and respect, feigned that they had a certain extraordinary and divine power, on which account they were thought by the multitude to be gods. We defer to historical critics (Smith, Dictionaries of Asia, 7, p. 394, ed. Bekker). Lactantius (Inst. i, § 2) says that Euenus stated that Zeus lived on Mount Olympus, and was much resorted to for the settlement of disputes by those who had found out anything new and useful to society. The poet Euenus translated his book into Latin, and, although Cicero speaks of it (De Nat. Deor, i, 42, 118) as entirely overthrowing religion, it had great currency as a rational account of the religious system. It was accepted by some of the Christian fathers, and a theory of polytheism somewhat like it was advocated by some of the scholars two centuries ago. Lorenzini followed the words of Euenus, but removed the question; but the theory found favor (4) because some of the old fables spoke of the birth and reign of Zeus in Crete, and even of his death and burial, and so also of the death.
MYTHOLOGY

under less genial circumstances, and exercised no small influence both on Greek and Roman writers. This view was first prominently put forth by the Messenian Eumenes in the time of the first Ptolemyes, and consisted in the original treatment that the gods equally with the heroes, were originally marine and terrestrial, and that the human form were not given to them only human facts sublimed and elevated by the imagination of pious devotees. This view seemed to derive strong support from the known stories about the birth and death of the gods, especially of Jove in Crete; and the growing sceptical tendencies of the scientific school at Alexandria were of course unfavorable to the promulgation of such views. The work of Eumenes accordingly obtained a wide circulation; and having been translated into Latin, went to nourish that crude form of religious scepticism which was one of the most notable symptoms of the decline of Roman genius at the time of the emperors. Historians, like Diodorus, gladly adopted an interpretation of the popular mythology which promised to swell their stores of trustworthy material; the myths accordingly were coolly emptied of the poetic soul which inspired them, and the early traditions of the heroic ages were set forth as plain history, set forth in speech equally with the language of the modern scientist, natural piety, and good taste. In modern times, the Greek mythology has again formed the basis of much speculation on the character of myths and the general laws of mythical interpretation. The first tendency of modern Christian scholars, following the track of the old, has been the figurality of the mythological doctrine and history. Of this system of interpreting myths we have examples in Vossius, in the learned and fanciful works of Bryant and Faber, and very recently, though with more poised and poetic feeling, in Gladstone. But the Germans, who have taken the lead here, as in other regions of combinative and speculative, have long ago given up this ground as untenable, and have introduced the rational method of interpreting every system of myths, in the first place, according to the peculiar laws traceable in its own genius and growth. The Germand has been broken in this department by Heyne, whose views have been tested, corrected, and enlarged by a great number of learned, ingenious, and philosophical writers among his own countrymen, specially by Buttmann, Voss, Creuzer, Müller, Welcker, Gerhard, and Preller. The general tendency of the Germans is to start—as Wordsworth does in his Excursion, book iv.—from the ideal, to postulate the ideal as the object of the history, in which the myths originated, and to trace the working out of those ideas, in different places and at different times, with the most critical research and the most vivid reconstruction. If in this work they have given birth to a large mass of ingenious nonsense and brilliant guess-work, there has not been wanting among them abundance of sober judgment and sound sense to counteract such extravagances. It may be noticed, however, as characteristic of their over-spectacular intellect, that they have a tendency to bring the sway of theological and physical symbols down into a region of the most absurd and childish. Even the most serious myth学家 becomes a water-god, Pallas a mud-god, and the whole of the Hid, according to Forchhammer, a poetical geology of Thessaly and the Troad! Going to the opposite side from Eumenes, they have denied the existence even of deified heroes; all the heroes of Greek tradition, according to Uschold, are only degraded gods; and generally in German writers a preference for pure and simple narratives is notice.

Creuzer, some of whose views had been anticipated by Blackwell, in Scotland, is specially remarkable for the high ground of religious and philosophical conception on which he has placed the interpretation of myths; and he was also the first to discover the oriental element in Greek mythology—not, indeed, with sufficient discrimination in many cases, but to the great enrichment of mythological material, and
the enlargement of philosophical survey. In the most recent times, by uniting the expert method of Creuzer with the correction supplied by the more critical methods of Muller and Petit-Radet, the research of comparative mythology has been launched into existence; and especially the comparison of the earliest Greek mythology with the sacred legends of the Hindūs has been ably advocated by Max Muller in the Oxford Essays (1856). In France, the views of Eunuemerus were propounded by Baez (1789); and generally the French scholars, such as René Robert and Petis Radet, show a distinct national tendency to recognise as much of the historical element as possible in mythology. By the British scholars mythology is a field that has been very scantily cultivated. Besides those already named, Bulfinch and Goud have done something in gathering material, but Payne Knight, Mackay, Grote in the first volumes of his history, Kaigeley, and Freeman are the

only names of any note, and their works can in nowise compete in originality, extent of research, in discriminating criticism, or in largeness of view, with the productions of the German scholars. The best for common purposes is the most original, Payne Knight. In this country some service has been rendered to this department of recent study by Prof. Harley and Whitley, and by the Rev. James Freeman Clarke.

The charm which mythology threw over polytheism, its fascinations for the imaginative faculty, its connection with the human heart with its own appeals to the senses, the vantage-ground which it had in a life-struggle with a severe holy monotheism in more ways than one—those topics will be duly considered in the article on POLYTHEISM, to which we must refer the reader for a list of some of the best books on the heathen religious and mythological tendencies likely to be of special interest to the theological student. See NOSSE MYTHOLOGY. (T. D. W.)

N.

Na'am (Heb. נָאָם, nēʿām, pleasant, the name of two women and also of a place.

1. (Sept. נָאָמָה נָאָמָה, נָאָמָה; Sept. Naʿāmā, Naʿāma, v. r. Naʿāmā; Ant. ii, 2, 2.) The second of the sons of Caleb the son of Jephunneh (1 Chron. iv, 15). B.C. cir. 1618.

2. (Sept. נָאָמָה נָאָמָה, נָאָמָה; Josephus, Ναούμα; Ant. viii, 8, 9.) An Ammōnītes, the only one of the numerous wives of Solomon that he was to have borne him a son. She was the mother of Rehoboam (q. v.), and probably queen dowager (1 Kings xiv, 21, 31; 2 Chron. xii, 13). B.C. 978. She must consequently have been one of those foreign women whom Solomon took for wives and concubines, and among whom Ammōnites are expressly mentioned (1 Kings xi, 1). The Vatican copy of the Septuagint calls her "the daughter of Ana, the son of Nahash;" but this, besides being wanting in the Hebrew, is part of a long passage which is not found either in the Hebrew or in the Alexandrian copy of the Septuagint, and is therefore of no authority.

Naʿāma (Heb. נָאָמָא, nēʿāma, a city in the plain of Judah, mentioned between Beth-dagon and Makkehàth (Josh. xv, 41). The associated names indicate a locality much west of Hebron. See JUDAH, THIR. The requirements correspond tolerably well with that of a modern village marked by Van de Velde on his Map of Naʿamā, two miles E. of Acalon (2d. ed. Nābūk three miles); but Capt. Warren (in the Quarr. Statement of the "Pal. Explor. Fund," April, 1871, p. 91) suggests Naʿamā, six miles N.E. of Yebna (Van de Velde, Naʿamā, six miles N. by E.). See NaʿAMATHITE.

Naʿāman (Heb. נָאָמָן, nēʿāman, pleasantness, as in Isa. xvii, 10), the name of two men.

1. (Sept. Naʿamā; but in 1 Chron. Naʿamā and Naʿūma, v. r. Naʿūma.) The second of the sons of Bela the son of Benjamin (Gen. xii, 21), apparently exiled by his father (1 Chron. viii, 4, 7), and head of the family of the Naʿāmites (Num. xxxvi, 40); possibly the same elsewhere (1 Chron. vii, 7) called Uzzi. B.C. post 1856. See JACHIN.

2. (Sept. Naʿūmā, and so the best MSS. of the N. T., but Rec. Text Naʿūmā; Josephus, Ἀμωνός, Ant. viii, 15, 5.) The commander of the armies of Benhadad II, king of Damascene Syria, in the time of Joatham, king of Israel. B.C. cir. 885. Through his valor and abilities Naʿamān held a high place in the esteem of his king; and although he was attached with loyalty to the king, it seems that this did not, as among the Hebrews, operate as a disqualification for public employment. Nevertheless the condition of a leper could not but have been in his high place both affecting and painful; and when it was heard that a little Hebrew slave-girl, who waited upon Naʿāman's wife, had spoken of a prophet in Samaria who could cure her master of his leprosy, Benhadad furnished him with a letter to his traditional enemy king Joatham; but as this letter merely stated that Naʿāman had been sent for to cure him, the king of Israel sent his clothes, suspecting an intention to fix a quarrel on him. Elīsā, hearing of the affair, sent for Naʿāman, who came to the door of his house, but, as a leper, could not be admitted; nor did Elīsā come out to him, but sent him word by a servant to go and dip himself seven times in the Jordan, and that his leprosy would then pass from him. He was, however, by this time so much changed and disgusted by the apparent neglect of his country, that he could not longer be treated, that if his attendants had not prevailed upon him to obey the directions of the prophet, he would have returned home still a leper. But he went to the Jordan, and having bent himself seven times beneath its waters, rose from them clear from all leprous stain. He now returned to Elīsā, full of gratitude, swerving to his conviction that the God of Israel, through whom this marvellous deed had been wrought, was great beyond all gods; and declaring that henceforth he would worship him only. He asked permission to take with him two mules' burden of earth. His purpose in this has been disputed, but it was probably to set up in Damascus an altar to Jehovah. He might have heard that an altar of earth was necessary (Exod. xx, 24). The natural explanation is that, with a feeling akin to that which prompted the Pisan invaders to take away the earth of Aceïlam for the Campo Santo at Pisa, and in obedience to the pilgrimage to the pilgrims from the Holy Land, to bring back stones from that sacred territory, the grateful convert to Jehovah wished to take away some of the earth of his country, to form an altar for the burnt-offering and sacrifice which henceforth he intended to dedicate to Jehovah only, and which would be inappropriate if offered on the profane earth of the country of Rimmon.
or Hadad. We may compare this request with the custom which once prevailed among Christians of carrying away water from the holy river Jordan; and, perhaps more strongly, with the practice still practiced by many Jews of burying a portion of earth from Jerusalem with every one of their number who dies in a foreign land. It would seem, however, that Naaman’s faith extended no further than acknowledging the superiority of Jehovah to the gods of other nations so far as his personal case was concerned. This conviction, however, cannot be sustained. Nor is it needed to shield Elisha from the imputation of sanctioning the worship of Rimmon; for his words in the 19th verse are simply the usual Hebrew formula of farewell, and do not imply assent to Naaman’s request. See Stackhouse, *Hist. Bible*, iv, 869 sq.; Cotta, *Vindicis verbor. Naaman* (Tubingen, 1756). The grateful Syrian would gladly have pressed upon Elisha gifts of high value, but the holy man resolutely refused to take anything. His servant, Gehazi, was less scrupulous, and hastened with a lie in his mouth to ask in his master’s name for a portion of that which had been given him. The lie was found out, and the servant no sooner saw the man running after his chariot than he alighted to meet him, and happy to relieve himself in some degree under the sense of overwhelming obligation, he sent him back with more than he had ventured to ask. This narrative, containing all that is known of Naaman, is given in 2 Kings, ch. v. See ELSiHA. Naaman’s appearance throughout the occurrence is most characteristic and consistent. He is every inch a soldier, ready at once to resent what he considers as a slight cast either on himself or the natural glories of his country, and blazing out in a moment into sudden rage, but calmed as speedily by a few good-humored and sensible words from his dependants, and, after the cure has been effected, evincing a thankful and simple heart, whose gratitude knows no bounds and will listen to no refusal. See GEHazi. How long Naaman lived to continue the worship of Jehovah while assisting officially at that of Rimmon we are not told. When next we hear of Syria, another, Hazael, apparently held the position which Naaman formerly filled. But the reception which Elisha met with on this later occasion in Damascus probably implies that the fame of “the man of God,” and of the mighty Jehovah in whose name he wrought, had not been forgotten in the city of Damascus. By Jewish tradition, at least, as that of Josephus (Ant. viii, 15, 5), identifies him with the archer whose arrow, whether at random or not, struck Ahab with his mortal wound at Ramoth-Gilead (1 Kings xxii, 34). The expression is remarkable—“forasmuch as by him Jehovah had given delivery to Syria” (ver. 1). It seems, however, to point to services of a more important kind for Syria, though not related in Scripture. But inasmuch as the advantage they won for Syria, and the position they tended to acquire for Naaman, were incidentally to subserve the divine purposes towards Israel, they may perhaps on this account have been ascribed to Jehovah. Naaman himself, and partly by reason of the very greatness he had thus acquired, was to become all unwittingly an instrument of promoting the divine glory—in some sense even more than those who had directly to do with the cause and kingdom of Jehovah. It is singular that the narrative of this remarkable story is found only in the last book of Kings, and in that section of it which is not based on Josephus. Its absence makes the reference to him as the savior of Ahab, already mentioned, still more remarkable. It is quoted by our Lord (Luke iv, 27) as an instance of mercy exercised to one who was not of Israel, and it should not escape notice that the reference to this act of healing is recorded by none of the evangelists but Luke the physician. See KITTO, *Daily Bible*, ad loc.; RELL, *Comment. on Kings*, ad loc.; HANZ-SCHEL, *Naaman Syriae* (Brem. 1778); ROGERS, *Naaman* (Lond. 1861); BULLOCK, *The Syrian Lepor* (Lond. 1862).

Na’amathite (Heb. *Na‘amathî, Na‘amâthî*, a Gentile from some unknown place, *Naamah*; Sept. *Mavartos*, but in Job ii, 11, *Mavartos bašâurî; Vulg. *Naamathite*), the epithet applied to Zophar, one of the three friends of Job (Job ii, 11; xi, 1; xx, 1; xiii, 9). B.C. cir. 2200. Some commentators have thought that he was so named as being a resident of the above NAAm (q.v.), in the tribe of Judah (Josh. xv, 41); but this view is at variance from the locality and age of Job (see SPANHEIM, *Hist. Job*, xiv, 11). Job’s country, Uz, was in Arabia; his other two friends, Eliphas the *Temanite*, and Bildad the *Shihite*, were Arabian; and hence we may conclude that Naamah was likewise in Arabia (Collarius, *Geogr.* lib. ii, 298). See JOS. If we may judge from modern usage, several places so called probably existed on the Arabian borders of Syria. Thus in the Geographical Dictionary (*Marzdais el-Ittâlî*) *Naam*, a castle in the Yemen, and a place on the Euphrates; *Naamâ*, a place belonging to the Arabs; and *Naomi*, a valley in Tihmah. A! the name Naam (of unknown meaning) (3 Macc. iv, 23) is very uncommon. Bochart (*Phaleg, cap. xxiii*), as might be expected, seizes the Sept. reading, and in the ‘king of the Mœsius’ sees a confirmation to his theory respecting a Syrian, or northern Arabian settlement of that well-known people of classical antiquity. If the above Naam could be connected with the Naamathites, these latter might perhaps be identical with the Mehumin or Minuma, traces of whom are found on the south-western outskirts of Judah; one such at *Mœsius*, or el-Menuy, a few miles below Gaza. But this point is too hypothetical for acceptance.” See ZOPHAR.

Na‘amête (Heb. *Na‘amâ‘ethî*, *Na‘amâ‘etha‘*; Sept. *Naoyam*), a title of the family descended from Naaman (q.v.), the grandson of Benjamin (Num. xxv, 40). The name is a corruption, of a kind which does not often occur in Hebrew. Accordingly the Samaritan Codex presents it at length—“the Naamathites.”

Na‘arâh (Heb. *Na‘arâ‘ah*; *Na‘arâ‘a*, a girl; often, Sept. *Naaphô* v. r. [by interchange] *Gware‘a*), the second of the two wives of Ashur (q.v.), of the tribe of Judah, by whom he had four sons (1 Chron. iv, 5, 6). B.C. cir. 1618. See also NAARAN; NAARATH.

Na‘arâi (Heb. *Na‘arâ‘î*, youthful; Sept. *Naaphô* v. r. *Naaphô*), an Arbite, the son of Ezba‘i, a military chief in David’s army (1 Chron. xi, 67). B.C. cir. 1015; incorrectly called PAARAT in 2 Sam. xxiii, 35 (see KENIMCO, *Disser.* p. 209 sq.). See DAVID.

Na‘aran (Heb. *Na‘arâ‘an*, *Na‘arâ‘an*, bogîsh; Sept. *Naaphô* v. r. *Naaphâ‘a* and *Naaphô*), a town in the territory of Ephraim, on the south-eastern border, between Bethel and Jericho (1 Chron. vii, 26). In Josh. vii, 17 the name is NAARAN (q.v.).

In 1 Sam. vi, 21 the Peshito-Syriac and Arabic versions have respectively Naerin and Naaran for the Kirjath-jearim of the Hebrew and A.V. If this is anything more than an error, the Naaran to which it refers can hardly be that spoken of, but must have been situated much nearer to Beth-shemesh and the Philistine lowland.

Na‘arah, or rather Na‘arâh (Heb. *Na‘arâ‘ah*; *Na‘arâ‘ah*, girl, as in Naarah; with °l local *Na‘arâ‘ah*; Sept. *Naaphô* v. r. *Na‘erâ‘a*; Vulg. *Naerautha*, Auth. Ver. “to Naarah”), a town on the boundary between Benjamin and Ephraim, between Ataroth and Jericho (Josh. xvi, 7); elsewhere called NAARAN (1 Chron. vii, 29); probably the Naorath (Naorath) of Eusebius (*Onomast. s. v.*), five miles from Jericho, and according to
Nabal (Heb. נָבַל, 'foolish', as often [comp. 1 Sam. xxxvii, 23; Sept. Nazâlî]), one of the characters introduced to us in David's wanderings, apparently to give one detailed glimpse of his whole state of life at that time (1 Sam. xxxv). Nabal himself is remarkable as one of the few examples given to us of the private life of a Jewish citizen. His history, doubtless, might be paralleled by that of many a well-to-do Oriental of later times. He was a descendant of Caleb, who dwelt at Keon (probably the modern Keineh, seven miles S.E. of Hebron), when David, obeying the command of Gibeon, came to the house of Israel. With his adherents on the southern borders of Palestine. B.C. 1060. Some, however, understand that he was simply a resident of that part of the country which bore from its great conqueror the name of Caleb (1 Sam. xxxv, 3; xxx, 14; so the Vulgate, A.V., and Ewald). He was himself, according to Josephus (4. viii, 18, 6), a Ziphite, with his residence at Emmaus, a place of that name not otherwise known, on the southern Carmel, in the pasture-lands of Keon. (In the Sept. of xxxiv, 4 he is called "the Carmelite," and the Sept. reads "Keon" for "Pa- ran" in xxxv, 1.) With a usage of the word which reminds us of the like adaptation of similar words in modern times, he, like Barzillai, is styled "very great," evidently from his wealth. His wealth, as might be expected from his abode, consisted chiefly of sheep and goats, which, as in Palestine at the time of the Christian era (1 Sam. xxxv and at the present day, fed together. The tradition preserved in this case the exact number of each—8000 of the former, 1000 of the latter. It was the custom of the shepherds to drive them to the wild downs on the slopes of Carmel, in Judah, which lay in the lowlands to the south, and corresponded very much to the territory of the Jehalim Arabs. These Arabs have the same skill of possessions which the sacred narrative ascribes to Nabal; that is, numerous flocks of sheep and goats, but few cows (Robinson, Res. ii, 176-180; Wilson, Land of the Bible, ii, 710). It was while the shepherds were on one of these pastoral excursions that they met a band of outlaws, who showed them unexpected kindness, protecting them by day and night. Perhaps the result of this was the generosity of the acknowledged leader of the herdsmen, which had such far-reaching consequences (xxv, 7, 15, 16). Such protection is generally so highly valued in the East that a suitable present to the protecting party is understood as a matter of course; and in most instances the proprietor of the flocks is happy to bestow it cheerfully and liberally. Once a year there was a grand banquet on Carmel, when they brought back their sheep from the wilderness for shearing—with eating and drinking "like the feast of a king" (xxv, 2, 40). It was on one of these high occasions in the presence of the shepherd—that Nabal came across the path of the man to whom he owes his place in history. Ten youths were seen approaching the hill; in them the shepherds recognised the slaves or attendants of the chief of the freebooters who had defended them in the wilds of Canaan, who were unknown. They approached him with a triple salutation—enumerated the services of their master, and ended by claiming, with a mixture of courtesy and defiance characteristic of the East, "whatsoever cometh into thy hand for thy servants (the Sept. omits this—and has only the next words), and thy son Hanun great shame is his name; I am disposed to recognise this unexpected parental relation. He was a man notorious for his obstinacy (such seems the meaning of the word translated "churlish") and for his general low conduct (xxv, 8, "evil in his doings;" xxv, 17, "a man of Belial"). Josephus and the Sept., taking the word Caleb not as a proper name, but as a quality (to which the context certainly lends itself), add "of a disposition like a dog"—cynical—σκυλόφιλος. On hearing the demand of the ten petitioners, he sprang up (Sept. ἀναστὰς, and broke out into fury, "Who is David? and who is the son of Jesse?" What runaway she-, why should I enter into a controversy with my own posterity's arrangements?" (xxv, 10, 11). The moment that the messengers had gone, the shepherds that stood by perceived the danger which their master and themselves would incur. To Nabal himself they dared not speak (xxv, 17). But the sacred writer, with a tinge of the sentiment which such a contrast always suggests, proceeds to describe that this brutal ruffian was married to a wife as beautiful and as wise as he was the reverse (xxv, 8). See ABIGAIL. To her, as to the good angel of the household, one of the shepherds told the state of affairs. She, with the offerings usual on such occasions (xxv, 11; 2 Sam. xvi, 19), xxv, 10, xxv, 11) loaded the asses of Nabal's large establishment—herself mounted one of them, and, with her attendants running before her, rode down the hill towards David's encampment. David had already made the fatal vow of extermination, couched in the usual terms, of destroying the household of Nabal, so as not even to leave a dog behind (xxv, 22). In this, unquestionably, he erred; for whatever David might, on the score of reciprocity of kindness, have naturally thought himself justified in asking, he yet had no right to exact it as a debt, and still less to resent the refusal of it as an injury. (See also Robinson, Hamburgher, loc. cit., for a comparison of the feeling in the heat of passion, David did not allow his determination to slumber; he ordered four hundred of his men to gird on their armor and go with him to smite Nabal and his house with the edge of the sword. At this moment, as it would seem, Abigail appeared, threw herself on her face before him, and pressed forth her petition in language which both in form and expression almost assumes the tone of poetry —"Let thine handmaid, I pray thee, speak in thine audience, and hear the words of thine handmaid." Her main argument rests on the description of her husband's character, which she draws with the mixture x, 11; 2 Sam. xv, 22) above all things turns away wrath. His name here came to his rescue. "As his name is, so is he: Nabal [fool] is his name, and folly is with him" (xxv, 25; see also ver. 26). Furthermore, by the wise counsel she contrived to introduce into her address respecting the proper way of meeting opposition. She pleaded for Nabal's sake, and how much better it was to leave the work of retribution to him than to take it prematurely into one's own hand, she convinced David of sin in resolving to avenge himself on Nabal. Better thoughts now prevailed with him, and he said, "Blessed be the Lord God of Israel, which sent thee this day to meet me; and blessed be thy advice, and blessed be
NABARIAS 818 NABOTH

thou which hast kept me this day from coming to shed
blood. She returned with the news of David's recant-
ation of his vow. Nabal was then at the height of
his orgies. Like the revellers of Palestine in the later
times of the monarchy, he had drunk to excess, and his
wife dared not communicate to him either his danger or
his escape (xxv, 36). At break of day she told him
both. The stupid reveller was suddenly roused to a
sense of what that implied over him. "His heart
hied within him, and [he] became as a stone." It was
as if a stroke of apoplexy or paralysis had fallen upon
him. This seems, however, to have been only a tem-
porary recoil of feeling, from which he again recovered
—yet not to any proper sense of his past misconduct or
true amendment of life. Only as one would do to the
just, and the benefactors of Heaven, it is said of him that
"about ten days after, the Lord smote Nabal, that he
died" (xxx, 37, 38). The shock seems to have been the
exciting cause of a malady that carried him off about
ten days after. (See Wedel, Exeget. med. dec. ix, 10 sq.)
The suspicions entertained by theolog-
ians of the last century that there was a conspiracy
between David and Abigail to make away with Nabal
for their own alliance (see Winer, s. v. Nabal), have en-
tirely given place to the better spirit of modern crisi-
mism; and it is one of the many proofs of the reverential
as well as truthful appreciation of the sacred narrative
now inaugurated in Germany, that Ewald enters fully
into the feeling of the narrator, and closes his summary
of Nabai's death with the reflection that "it was not
without justice regarded as a divine judgment." Ac-
tording to the (not very probable) Sept. version of 2 Sam.
iii, 38, the recollection of Nabai's death lived afterwards
in David's memory to point the contrast of the death of
Abner—"Did Abner as Nabai died?" David, not long
after, evinced the favorable impression which the
good-sense and comeliness of Abigail had made upon him
by making her his wife. See Ewald, Her Gesch. ii, 556;
Stackhouse, Bibl. Hist. iv, 178 sq.; Niemeyer, Chron., iv, 156; O 1. Danie., De fideque et castitate
Dav. etro Nabaleae (Leips. 1729); Schöttgen, Moral-
tische Gedanken über D. und N. (F. ad Ò.1714). See
David.

Nabari'as (Naβαριας, Vulg. Nabarias), appar-
tly a corruption (1 E xdr. x, 44) for the Zechariah of
Neh. vii, 4.

Nabathæans (Nαβαρατιον [but Αβαρατιον, Ptol.
vi, 7; see below], Nabaotes), mentioned in Isa. i, 7, un-
der the name "Nabaoth," as a pastoral tribe of Arabia,
in connection with Kedar (comp. Pliny, v, 12), but with
no definite specification of locality. See NABAOYIN. In
the time of the Exile, the title of the Nabathæans of
Judas and Jonathan found the Nabathæans after press-
ing forward beyond the Jordan three days' journey
into the Arabian Desert (1 Macc. v, 24; ix, 35), and it
seems clear that they were then in the district adjoin-
ing Gilead, near the cities of Bozrah and Cernaim.
Josephus (Ant. i, 2, 4) and Ammianus Marcellinus (xiv.
8) calls the whole region between the Euphrates and the
Red Sea Nabatæae (Naβarτηνι); and the latter makes
the Nabathæans the immediate neighbors of
Roman Arabia, i.e. of the district containing Bozrah
and Philadelphia. Other writers, after the Christian
era, place this people on the Elatian gulf of the Red
Sea (Strabo, xvi, 777), but extend their territory far
into Arabia Petraea, and make Petra, in Wady Musa, their
capital city (Strabo, xvi, 777; xvii, 808; Pliny, v, 12;
vii, 32; Diod. Sic. ii, 48; iii, 48; xix, 94). The Na-
batheans were considered a rich people (Dionys. Perieg.
95), and their king, Naboth, is often mentioned in the
Bible, and his name appears in a list of the rulers pro-
ounced a regular and important carrying trade through
this district (Diod. Sic. xix, 94; Apul. Flor. i, 6). They
were governed by kings. Pompey, when in Syria, sent
an army against them and subdued them (Joseph. Ant.
xiv, 6, 5; xvi, 4). They submitted formally to the Roman
rule on the time of Trajan (Dio. Cass. lxvii, 14; Ammian.
Marcel. xiv, 8). The chief cities of the Nabathæans
may have stood in the vicinity of Bozrah (q. v.), in Edom;
and the accounts which Greek and Roman writers give respecting the Nabathæans do not perhaps refer exclusively to this particular tribe, but the name
with them may include other Arabian tribes, as the
Edomites; yet it is probable that a branch of the no-
madic Nabathæans at an early period wandered eastward
as far as the Euphrates, in the neighborhood of which
will lie the Nabatæan morsaees (Nabat., "paludes Nabathae-
orum"); Golius, cited by Forster, Geogr. of Arabia, i, 214,
note, comp. Strabo, xvi, 767. Ptolemy (vi, 7, 21) men-
a. v. p. 578), unless, with recent editions, we read in this
place "Abræiota," which, however, some suppose to be
simply a corruption of the name of a place called
Palæst., p. 90 sq.; Cless, in Pauly's Realeycy. 577 sq.). In
Genesis (xxv, 18; xxxviii, 9; xxxvi, 8; comp. 1 Chron.
i, 29) the Nabathæans are mentioned in genea-
logical connection with Nebaioth (q. v.), the first-born
son of Ishmael and brother of Kedar; and a son of Is-
mael named NabathOTH (q. v. (Abul-
fed. 'Ammal, i, 22), but not as the ancestor of this tribe,
who are said to be descended from another Nabat, a son
of Maab, and a descendant of Shem. On these traditions
the assumption has been based that the Nabathæans
were not Arabs, but Anarnena; and Beer believed
that their ancestors of Arabian blood were concealed in the inscriptions at Sinai (Robinson, Bibl. Re-
search, i, 544; comp. Quatremere, Mémores sur les Na-
baties, Par. 1885; Ritter, Erdk. xii, 111 sq.), but the un-
broken Biblical genealogy cannot be set aside on behalf
of the fragmentary and uncertain traditions of Arabia
(Winer, ii, 129). The name of the Nabathæans occurs
on the cuneiform inscriptions (q. v.). See Smith, Dict.
of Gr. and Rom. Geog. a. v. Nabatæi; the duke of Lunes-
se, in the Revue Numismatique (new series, Par. 1888,
vol. iii); the count de Vogüé, in the Mélanges d'Arch-
ologie Orientale (Par. 1886); Vincent, Commerce of the
Ancients in the Indian Ocean (Lon. 1807), ii, 275 sq.;
Nödclcke, in the Zeitschr. der deutsch. morgenl. Gesell-
schaft, xxv, 113 sq. See PETRA.

Nabathæas (Naβarâr, Navauros rion, Vaβar-
rior; Vulg. Nabathesi), another form (1 Macc. v, 25;
ix, 55) for the Nabathæans (q. v.).

Nabe is the ecclesiastical term for a stringed in-
strument with a triangular, sonorous box. It only dif-
fered from the psaltery in form and having shorter strings (Walcott, Sacred Arch. a. v.).

Naboût (Heb. 'Nabôût, "fruits, according to Genenius, but "perennis," according to Fritsch; Sept.
Par. "Nabatoth"). Nabazon (Heb. Naβarzôn, Naβarzôn;
Ant. viii, 37, 7), an Israëlite of the town of Jezreel
in the time of Ahab, king of Israel. B.C. crr. 897. "He
was the owner of a small portion of ground (2 Kings ix,
25, 26) that lay on the eastern slope of the hill of Jez-
reel. He also had a vineyard, of which the situation
is not quite certain. According to the Hebrew text (1
Kings xxi, 1) it was in Jezreel, but the Sept. renders
the whole clause differently, omitting the words 'which
was in Jezreel,' and reading instead of 'the palace,'
'the threshing-floor of Ahab, king of Samaria.' This
points to the view, certainly most consistent with the
subsequent narrative, that Naboth's vineyard was on
the hill of Samaria, close to the 'threshing-floor' (the
word translated in A. V. 'void place') which undoubt-
edly existed there, hard by the gate of the city (1 Kings
xxiv). The royal palace of Ahab was close upon the
city wall at Jezreel. According to both texts, it im-
plicated the invidious jealousy of Jezreel, which was no
less marked in the king, who offered an equivalent in
money, or another vineyard, in exchange for this. Naboth,
in the independent spirit of a Jewish landholder (comp. 2 Sam. xxiv; 1 Kings
xvii), refused. Perhaps the turn of his expression im-

NABOTH
819
NACHMANIDES

plifies that his oblation was mingled with a religious scruple at forwarding the acquisitions of a half-heathen king: 'Jehovah forbid it to me that I should give the inheritance of my fathers unto thee.' Ahab was cowed by this reply; but the present spirit of his wife, Jezebel, was roused. She and her husband went apparently on some great calamity. Naboth was 'set on high' in the public place of Samaria (the Heb. word which is rendered, here only, 'on high,' is more accurately 'at the head of,' or 'in the chiefest place among' [1 Sam. ix. 22]. The passage is obscured by our ignorance of the nature of the ceremonial in which Naboth was made to take part; but, in default of this knowledge, we may accept the explanation of Josephus, that an assembly [ἐκεκλησία] was convened, at the head of which Naboth, in virtue of his position, was placed, in order that the charge of blasphemy and the subsequent catastrophe might be more telling; two men of worthless character accused him of having 'cursed God and the king.' He and his children (2 Kings ix. 26), who else might have succeeded to his father's inheritance, were dragged out of the city and despatched the same night. The place of execution there, as he at Hebron (2 Sam. iii), was outside the city gate, on the ramp, or retaining wall, on the slope of the hill of Samaria, immediately outside the walls. The usual punishment for blasphemy was enforced (Lev. xxiv. 16; Num. xiv. 30). Naboth and his sons were stoned; their mangled remains were devoured by the dogs (and swine, Sept.) that prowled under the walls; and the black birds from their wounds ran down into the waters of the tank below, which was the common bathing-place of the prostitutes of the city (comp. 1 Kings xxi. 19; xxii. 38, Sept.). Josephus (Ant. viii. 15, 6) makes the execution to have been at Jezebel, where he also places the washing of Ahab's chariot. This narrative is remarkable as the only mention in the Scriptures of a woman as able to write, and some have inferred, but needlessly, that the letters mentioned in 1 Kings xxii, 8 must have been written by an amanuensis. The state of female education in the East has probably always, as now, been such that not one woman in ten could write. Coecae (in Lexicon Graecogoth. Sacrorum) thinks that the reason why the children of Naboth perished with him—being perhaps put to death by the creatures of Jezebel—was that otherwise the crime would have been useless, as the children would have been entitled to the father's heritage. But we know not that Naboth had any sons; and if he had sons, and they had been taken off, the estate might still have had an heir. It is not unlikely that a custom like that of coeacae in modern times obtained in Israel, giving to the crown the property of persons put to death for treason or blasphemy. On Naboth's death, accordingly, Ahab obtained possession of his inheritance. The history of this crime brought upon Ahab and Jezebel the severest maladies, which shortly after were carried into effect. The only tribunal to which he remained accountable pronounced his doom through a prophet. "This was the final step in Ahab's course of wickedness, and as he was in the act of taking possession, Elijah met him and announced the awful doom which awaited him and his queen and children. A kind of repentance on the part of the king led to another announcement of a certain modification of the retribution, which was not to come during Ahab's lifetime. But in that very plot of ground, and apparently in close connexion with his son, king and queen, was murdered by Jehu, who mortally wounded him with an arrow. The king sank dead in his chariot, and Jehu bade his attendant captain take up the body and cast it into the portion of the field of Naboth. As he was doing so he was reminded by Jehu that they both had been riding behind Ahab at the time when the Lord laid this burden upon him, "Surely I have seen yesterday (יִיָּדָע, yes, I have seen) the blood of Naboth and the blood of his sons, saith the Lord; and I will requite thee in this plat, saith the Lord" (2 Kings xix. 21-29). The minor king's action was to annul the instances which are not mentioned in the earlier history: that Naboth's sons were put to death as well as himself, and that Ahab took possession the very day after the judicial murder." The English version renders the words thus: "In the place where dogs licked the blood of Naboth, shall dogs lick my blood, even thine" (1 Kings xxii. 19). But the fulfilment is recorded as taking place in the pool of Samaria (xxii. 38), "And they washed out the chariot in the pool of Samaria, and the dogs licked up his blood." Kimchi explains this by saying that the water of this pool ran to Jezebel; but Schwarz (Palest. p. 165) identifies Jezebel with Serain, sixteen miles from Sebaste, where the pool stood, and on a higher level. Accordingly, he insists that the rendering "on the spot" is wrong, and that פְּלָקְשׁ should be rendered "in place of," i.e., "in punishment for" (comp. Hosea ii. 1). See Kittel, Daily Bible Illustr. ad loc. See Ahab; Elijah; Jezebel; Jezebel.

Nabuchodonosor's son (Nabucodonosos), the Grecian form in the Apocrypha (1 Esdr. i, 40, 41, 45, 46; Tob. xiv. 15; Jud. i, 6, 7, 11, 12; ii, 1, 4, 19; iii, 2, 8; iv. 1; vi, 2, 4; xi, 22: xiii, 18, 19) of the Babylonian king Nebuchadnezzar (q. v.).

Naccabian (Latin Nacchantis), Giacomo, an Italian prelate noted as a theologian, was born at Florence near the opening of the 16th century. He joined the Dominicans, and taught theology for some time at Rome. In 1484, he was named bishop of Chiosia, in the territory of Venice. In this capacity he attended the Council of Trent, and there distinguished himself by his scholarly and his liberality. He went so far as to condemn the position of those Romanists who desired equal recognition for the Church writings as for inspired. He declared that "the placing of Scripture and tradition on the same level was impious" (cf. Stari, f. 288; Mendham, Memoirs of the Council of Trent [ Lond. 1834], p. 59, 60). He died at Florence, April 24, 1469. We quote of his works, Scriptura sacra medulla (Venice, 1516, 4to):—Enarrationes in Epistolam Pauli ad Ephesios, in maximum pontificatum, etc. (Venice, 1570, 2 vols. 8vo.); Commentaries in Prælectiones de Temporalibus et Spirituallis (2 vols. fol.). See Hoon, Nouv. Biog. Générale, xxxvii, 108; Wessengen, Kirchen-Veranstaltungen, iii, 211; Ranke, Hist. of the Popacy, i, 151; Hardwick, Hist. of the Reformation, p. 282.

Naccus is the name of the richly embroidered red horse-blankets which ornament the horses of the papal court, especially at the coronation ceremonies of the pope.

Nachash. See SERPENT.

Nachtmanides (or Nachman) ben-Nachman, Moses (also called by the Jews Ramban, רַבְּנָן, from the initial letters רַבְּנָן), the Great Master (גרほう מֵאָסֶר), and by Christian writers此人 (Joseph Gerundovius), a Jewish writer of considerable note in the literary history of the Iberian peninsula, was born at Gerona, in Catalonia, about 1124. So extraordinary was his proficiency in the Biblical and Talmudic writings, that he wrote an elaborate Toguris on the Rights of Primogeniture and Vows (יהודי משנה בָּשָׂרָה) when he was scarcely fifteen years of age (1120), for which he obtained the title of "the Father of Knowledge," and composed his commentaries (מֵאָסֶר) on the greater part of the Talmud (1217-
1229) before he was thirty. His Talmudic learning was no doubt mainly acquired after study of the writings of Moses Maimonides, which Nachmanides got hold of while very young, and under the erudite instruction of the noted rabbi Jehudah the Pious, of Paris, whose pupil he was. About the year 1262, while practicing as a physician in his native place, he delivered, by request, a discourse in Saragossa before James I, king of Aragon, and the magnates of the Church and State, in defence of Judaism. The remnant of this discourse, written in Hebrew, with a short text in Arabic, p. xix, 9. "The law of the Lord is perfect," etc., and is an important contribution to Biblical exegesis, the Christology of the O. T., and the understanding of Judaism, was first published in 1582, with the title דרואת דריא עינא, wherever it commences; then at Prague, 1586; and with corrections and notes by the learned and industrious Adolph Jellinek (Leipsic, 1880). In the year 1263 king James I of Aragon issued a decree that, in order to put a stop to the daily disputes which took place between the Jews and the Dominican friars who had studied Arabic and Hebrew, a public disputation should be held at Barcelona. The Jews on their part nominated as their advocate Moses Nachmanides, while the Christians were represented by Christians and Jews. This disputation, which took place before the king and the court, lasted four days (July 20 - 24). As usual in similar cases, each party claimed the victory. Nachmanides circulated this disputation among his brethren, as Pablo Christiani and his friends gave an interpretation of it; and the people of Aragon, IV, was so incensed at it that he wrote to James I of Aragon, urging on his majesty to banish Nachmanides from his dominions. Thereupon the septuagenarian had to leave (1266) his native place, his two sons, his college with numerous disciples, and his friends. He went to the Holy Land, which he reached Aug. 12, 1267. The disputation referred to was first published, with additions and interpolations, and an exceedingly bad Latin translation, by Wagensell, in his Tela ignata Satanata (Altorf, 1651). It was then published in the collection of polemical writings entitled דרך רוחיールות, from the Greek, where it is the first of the series, and is called א"ז רחוי ליהולות, תיאכ The Discourse of Ramon with Fra Paolo (Constantinople, 1710); and recently again by the erudite Steinschneider, Nachmanides Disputatio publica pro fide Judaeos a. 1268, e cod. MSS. recognita (Berlin, 1868); in which the learned edifice was restored by the editor with Nachmanides's exposition of I. iii. In Palestine Nachmanides completed and revised his stupendous Commentary on the Pentateuch, an archaeological and mystical work which he had begun nearly twenty years before (1249-1268). "Physician by profession, thoroughly conversant not only with Hebrew, Chaldee, Syriac, and Arabic, but also with Greek, Latin, Spanish, etc., master of the whole cycle of Talmudic, Midrashic, and exegetical literature, and intimately acquainted with the manners, customs, and geography of the East, he frequently quotes medical works (א"ז רחוי ליהולות, and משלי רוחיירל), clears up medical difficulties (comp. comment. on Gen. xxx, 14; xlv, 26; xlv, 15; Lev. ii, 9; xi, 11; xii, 4; xiii, 4; Numb. xx, 9), explains difficult terms by comparing the Hebrew with other languages (comment. on Gen. xlith, 12, 20; Exod. xxx, 23; 34; xxi, 1; Lev. xi, 11; xiii, 29; xix, 20; Deut. xiii, 2, 4; xxxiii, 10), criticizes Christian versions (Gen. xli, 45; Numb. xi, 17), explains the customs and geography of the East (Gen. xx, xxxiv, 12; xxxviii, 14), and especially the obligations and spiritual views of Maimonides about miracles and revelation, and controversies and exposures, in unseparating language, Aben-Ezra's scepticism, concealed in unbelieving, mystical doctrines. See Aben-Ezra. Being a thorough believer in the Cabala, Nachmanides, though explaining the obvious sense of the Bible, yet maintains that each separate letter is imbued with a spiritual and religious potency, and forms a link in the grand chain of mysticism which has its root in the Cabala, the secrets of the Cabala can, by the combination of these letters, penetrate, more than ordinary readers, into the mysteries of Holy Writ. When it is remarked that no less than fifteen Jewish litterati, of different periods, have written super-commentaries on this remarkable production, the importance of this commentary, and the influence it exercised on Biblical exegesis and the Jewish literature, will easily be comprehended" (Ginsburg, in Kitto). This commentary, which is alternately denominatated דרואת דריא עינא, דרואת דריא עינא, and דרואת דריא עינא, was first published before 1460; then in Lisbon, 1498; Naples, 1490; Pesaro, 1514; Saloniakia, 1521; with the comments of Rashi, Aben-Ezra, etc. (Constantinople, 1522); with the Hebrew text of the Pentateuch, and the Five Megilloth, the Chaldee Paraphrase, the Comment of Rashi, and the super-commentary of Aboab on Nachmanides (Venice, 1548); and, besides many other editions, lately in the excellent Pentateuch and Five Megilloth, containing the Hebrew text, the Chaldee Paraphrases, the Commentaries of Rashi, Aben-Ezra, Rashbam, Sefero, etc., 5 vols. (Venice, 1612). A commentary on Job (תהלל דריא עינא), which was first published in Bomberg's Rabbinical Bible (Venice, 1517), and was incorporated in Frankforter's Great Rabbinical Bible (Amsterdam, 1724-27). See Frankforter. But that Nachmanides was not the author of this commentary has been proved by Dr. Frankel, in his Monatsschrift, 1868, p. 449 sq. The cabalistic commentary on the Song of Songs, which is ascribed to him, belongs to his teacher Asriel. Besides the works already mentioned, Nachmanides wrote a number of cabalistical, dogmatical, ethical, and religio-political works, as בראשית, on reward and punishment (Naples, 1490; latest edition, Warsaw, 1873); יומא הכותל, on the sanctity of marriage (Rome, 1456, and often since); ד"כ הכותל, a large cabalistic work on prayers, the natural law, the decalogue, the attributes of God, etc. (Venice, 1601; latest ed. Warsaw, 1873); יומא הכותל, a commentary on the book Jeziarah (q. v.), printed together with the book Jeziarah (Mantua, 1562, and often); יומא הכותל, on the redemption from captivity, in sections, of which the first part the second section was published by Asar de Romay in his Jewish Emancipation (Mantua, 1574, first ed. to this system. He also wrote some poems, of which one is especially beautiful, and is generally used in the synagogical service for the first day of the new-year—the נטורי ליהולות, in the division of the synagogues, caused by the writings of Maimonides (q. v.), he took the part of the latter, probably more on account of the esteem he felt for this great man than for any sympathy with his opinions. Maimonides intended to give Judaism a character of unity, but he produced the contrary. His aim was to harmonize philosophy and religion, but the result was a division in the synagogue, which gave birth to a philosopher called Cabala, and to this newly-born Cabala Nachmanides became converted, though he was born from this system. But one day the Cabalist who was most zealous to convert him was caught in a house of ill-fame, and condemned to death. He requested Nachmanides to visit him on the Sabbath, the day fixed for his execution. Nachmanides reproved him for his sins, but the Cabalist declared his innocence and that he would appear at his house on this very day after the execution, and partake with him the Sabbath meal. According to the story, he did as he promised, as by means of the cabalistic mysteries he effected his escape, and an ans was executed in his stead, and he himself was suddenly transported into Nachmanides's house! From that time
Nachmanides became a disciple of the Cabala, and was initiated into its mysteries, the tenets of which pervaded his numerous writings. Thus in the introduction to his Commentary on the Pentateuch he remarks, "We possess a faithal tradition that the whole Pentateuch contains the secret of the Cabala. One cannot separate the words, may be divided into sacred names in another sense, so that it is to be taken as an allegory. Thus the words "אַהֲרָן," in Gen. i. 1, may be divided into three other words, e.g. מִשְׁלֹשָׁה. In like manner is the whole Pentateuch, which consists of nothing but transpositions and numerals of divine names." Nachmanides died at Acre (Ptolemais) about 1270, leaving a number of disciples. See Giesberg, in Kittto, Cyclop. s. v.; Steinschneider, Catalogus Libr. Heb. in Biblioth. Bodleiana, col. 1447-65; First, Biblioth. Judaica, iii, 2-8; Perles, in Frankel's Monatschrift für Gesch. u. Wissenschaft d. Judenth., viii, 81 sq.; Gritz, Gesch. d. Juden, vii, 41-50, 54 sq., 78-80, 132-144, 417 sq.; De Rossi, Dizionario storico degli autori Ebrei, p. 236 sqq. (Germ. transl. by Hamburger), p. 199 sqq.; Bannage, Hist. of the Jews (Taylor's transl.), p. 655, 656 sqq., 660; Da Costa, Israel and the Gentiles (New York, 1855), p. 299 sqq.; Ginsberg, The Kabbalah, 2nd ed. (London, 1865), p. 329 sq.; Delitzsch, Gesch. d. Juden, 3rd ed. (Berlin, 1884), p. 132; Steinschneider, in revolution, ibid., p. 307 sqq.; Brunschweiger, Gesch. d. Juden in den Roman Staaten (Würzburg, 1865), p. 165, 181; Jost, Gesch. d. Judenth. u. s. Secten, iii, 37, 73; Ethenridge, Intro. to Heb. Literature, p. 251 sqq., 358, 408; Sachs, Religiose Poesie d. Juden in Spanien, p. 185 sqq. (1848); Delitzsch, Gesch. d. Juden, 2nd ed. (Berlin, 1865). Der Ausdruck "Aharon" was slain, for laying his hand upon the ark (2 Sam. vi, 6). It is doubted whether this be a proper name, denoting the owner of the floor, or merely an epithet applied to it, i.e. the prepared floor (so the Targum of Jonathan; comp. Buxtorf, Lex. Rabl, col. 2847). This floor could not be laid down in Jerusalem, and from Jerusalem, and must have nearly adjourned the house of Obededom, in which the ark was deposited. In the parallel text (1 Chron. xiii, 9) the place is called the floor of Chidon, which some suppose to be another name of the owner (Talm. Bab. Sotah, iii, fol. 85). See Chidon. Another method of identifying the two names is to regard Nachon as derived from נַחָו, to emit, because Jehovah smote Uzzah there; and Chidon as containing a figurative allusion to the divine javelin which smote him. In any case Perez-Uzazz (q. v.) afterwards became the local designation of the spot.

N'a'char, a more accurate form of the name Nahor (q. v.), meaning: (a) Abraham's grandfather (Luke iii, 34), (b) his brother (Josh. xxvii, 8),

Nachahon ben-Zadok, a Jewish writer of the early period in the development of post-Christian Judaism, was born at the academy of Sura or Sora, A.D. 890. He was the author of a great number of questions and answers (תלמוד בבלי, עניינים מסע), and wrote explanations of difficult passages in the Talmud, which explanations are repeated in the Responsum Gaonim (Beri. 1848), ed. Cassel. To Nachahon is also attributed the perpetual calendar (יָבֵן דְּרוּשָׁה Nachshaon), founded upon a period of nineteen years, which was proved to be not quite correct by the learned Spaniard Isaccis, of the 10th and 11th centuries, but was, nevertheless, made the foundation of calendar tables (יָבֵן דְּרוּשָׁה, from דְּרוּשָׁה, a table), by some later writers, as Jacob ben-Asher, at Toledo, and has retained a place in some works nearly to the present time. This same Nachahon is probably also the author of the chronicle entitled רַמְתָּא, a treatise upon the Tanaim and Amoraim, critically edited by Luzzatto in Kerem method (1839), iv. 184 sqq. See Gritz, Gesch. d. Juden, v, 280; Steinschneider, Catalogus Libr. Heb. in Biblioth. Bodleiana, p. 2029; Scaliger, De Emendatione Temporum, ii, 192 sqq.; Luzzatto, Calendarario Ebraico per venti secoli; Schwarz, Der Jüd. Kalender (Breslau, 1857), p. 78. (B. P.)

Nachtigall (Latin Luscinus), Ottomar, a Roman Catholic polemic, was born at Strasbourg about 1487. After having studied belles-lettres and jurisprudence at the universities of Paris, Louvain, Padua, and Vienna, he visited a large part of Europe, particularly Hungary and Italy, and even some parts of Asia. During this time he was in holy orders. On his return to Germany he preached in different places, among others at Augsburg, where he joined the famous Geller of Gaisenhofen, and from 1514 returned to his native city, where for several years he gave lessons in Greek, a language in which he excelled, in the convent of St. Ulric at Augsburg. In 1528 he was removed from his chair, on account of his sermons against the doctrines of Luther. The following year he established himself at Freiburg in Brisgovia, where he continued to preach against the Reformed doctrines. He died about 1535. Nachtigall was renowned among his contemporaries for his extensive and varied learning, and was very satirical, Erasmus and Hutten being the special subjects of his satire. The following are his works, Carmen heroicum Gracem quod G. Geller a Luscinio obitum decussat (Strasbourg, 1510, 4to); Institutiones musicae (Strasbourg, 1515 and 1536, 4to; Augsburg, 1542, 4to); Prognosticata Graeco litterarum (Strasbourg, 1517 and 1549, 4to); Grummius sophiatis, sive Pelygus humanam missionem, quo docet uritus natura ad virtutem et felicissimum propius accedit, hominum in bruti animalibus (Strasbourg, 1522, 8vo; see Schelhorn, Amicitiae litterariae, vol. x.); Evangelica Historia, e Graeco versa (Augsburg, 1523, 4to). Nachtigall himself finished a German translation of this version of the Gospels, which in some respects may be compared to a concordance, under the title Joci et aules (Augsburg, 1524, 8vo; see Schelhorn, Amicitiae litterariae, vol. x.); Nachahon, a more accurate form of the name Nahor (q. v.), meaning: (a) Abraham's grandfather (Luke iii, 34), (b) his brother (Josh. xxvii, 8), and wrote explanations of difficult passages in the Talmud, which explanations are repeated in the Responsum Gaonim (Beri. 1848), ed. Cassel. To Nachahon is also attributed the perpetual calendar (יָבֵן דְּרוּשָׁה Nachshaon), founded upon a period of nineteen years, which was

Nadab (Heb. Nadab), נַדָּב, liberal [see Simonis Onom. V. T. p. 409; Sept. Nadad], the name of four men.

1. (Josephus, Antiq. iii, 1, 8 and 7) The eldest (Exod. vi, 23; Numb. iii, 5) of the four sons of Aaron by Eliaheba, who were anointed, with their father, to be priests of Jehovah (Exod. xxviii, 1), B.C. 1637. He, his father and brother, and seventy old men of Israel, were left out from the middle of the assembly before the tabernacle (Exod. xxiv, 1), and were commanded to stay and worship God "afar off," below the lofty summit of Sinai, where Moses alone was to come near to the Lord. Subsequently he, with his brother Aihu, offered incense with strange or common fire to the Lord, instead of that which the Lord had appointed, and was immediately killed by a fire which they put promiscuously upon the altar of burnt offerings; and they were immediately consumed by a fire from the presence of God (Lev. x, 1, 2; Numb. iii, 4; xxvi, 61). They left no children (1 Chron. xxiv, 2). From the
injunction given (Lev. x, 9, 10) immediately after their death, it has been inferred (Rosenmüller, ad loc.) that the brethren were in a state of intoxication when they committed the offence. The spiritual meaning of the incident is drawn out at greater length by Origens, Hom. vii, in Levit. On this occasion, as if to mark more decidedly the divine displeasure with the offenders, Aaron and his surviving son were forbidden to go through the ordinary outward ceremonial of mourning for the dead. See J. D. Froboese, Grekken v. d. Sluys Naam van Otis in de Brieven van de Boed. Bijl. i. 4, p. 159 sq.; J. Medhurst, in the Bibl. Hugens. iv. 70-76; Bp. Hall, Contemplations ad loc.; Saurin, Discor. Historiques, ii, 554; Dissert. p. 531; A. Littleton, Sermons, p. 808; J. Dickson, Discourses, p. 183; C. Simeon, Works, i, 168; R. P. Buddicom, Christian Ecclesiæ, ii, 1. See Acts.

2. (Josephus, Ant. iii, 11, 4) Son and successor of Jerobeam on the throne of Israel (1 Kings xiv, 20). B.C. 951. He followed the deep-laid but criminal and dangerous policy of his father (xv, 26). In the latter part of his reign, "Gibbethon, in the territory of Dan (Josh. xix, 44), a Levitical town (xxii, 29) was occupied by the Philistines, who having been deserted by its lawful possessors in the general self-exile of the Levites from the polluted territory of Jerobeam. Nadab and all Israel went up and laid siege to this frontier town. A conspiracy broke out in the midst of the army, and the king was slain by Baasha, a man of the tribe of Issachar. Abijah, whose prophecy (1 Kings xiv, 10) had been literally fulfilled by the murderer, who proceeded to destroy the whole house of Jerobeam. So perished the first Israelitish dynasty. We are not told what events led to the siege of Gibbethon, or how it ended, or any other incident in Nadab's short reign. It does not appear whether he was a man of any great ability or prowess. He is not mentioned again in our records, and the name is not heard of until the reign of Rehoboam.

3. The first named of the two sons of Shammai, in the tribe of Judah, and the father of two sons (1 Chron. ii, 28, 30). B.C. post 1618.

Namabatha (Naamâbathâ v. r. Nâmâbâdæ; Syriac, Nobat; Vulg. Modaba), "a place from which the bride was conducted by the children of Jambri (q.v.) when Jonathan and Simon attacked them (1 Macc. ix, 67). Nadbach was occupied by t. 1, 4; gives the inhabitants (P'âna'âš). Jerome's conjecture (in the Vulgate) can hardly be admitted, because Medeba was the city of the Jambrites (see ver. 36) to which the bride was brought, not that from which she came. That Nabatath was on the east of Jordan is most probable; for though, even to the time of the Gospel narrative, by 'Chanaanites'—to which the bride in this case belonged—is signified Phenicians, yet we have the authority (such as it is) of the Book of Judith (v. 3) for attaching that name especially to the people of Moab and Ammon; and it is not probable that when the whole country was in such disorder a wedding party would travel for so great a distance as from Phoenicia to Medeba. On the east of Jordan the only two names that occur as possible are Nebo—by Eusebius and Jerome written Nabo and Nabon—and Nabathah. Compare the lists of places round es-Salt, in Robinson, 1st ed. iii, 157-70." See Gath.

Nadai, Bernard II, D.D., a distinguished minister of the Methodist Episcopal Church, was born in Talbot County, Md., March 27, 1812. He was converted in 1822; and after the necessary preparatory studies, which he prosecuted at Williams College, he was admitted to the ministry in the old Baltimore Conference in 1835. His subsequent fields of labor as a pastor were Luray Circuit, Va.; St. Mary's Circuit, Md.; Bladensburg, Md.; City Station, Baltimore; Lewistown, Pa.; Lexington, Va.; Columbus Street, Baltimore; Carlisle, Pa.; High Street, Baltimore; South Street Station, Baltimore; Findlay Church, Washington; Sands Street, Brooklyn; First Church, New Haven; Wesley Chapel, Washington; Trinity Church, Philadelphia. During his entire pastoral life he was a close student, and made up for the absence of an early college training by extraordinary application afterwards. In 1846, while stationed at Carlisle, Pa., he graduated at Dickinson College, having pursued his studies in the college in connection with his pastoral work. During a part of his pastorate in Carlisle he taught a class in the college. In 1849 he was appointed agent of Baltimore Female College; but as it was then the beginning of the year, he was sent at that time to the Manual Labor School of the agency, he consented to supply for that year the pulpit of an Independent Church in Baltimore. From 1854 to 1857 he was professor in Indiana Asbury University. In the latter year he returned to the Baltimore Conference, and became presiding elder of Roanoke District in Western North Carolina. He was one of those who felt the prevalent agitation on the subject of slavery was rolling fiercely over the Border States. Dr. Nadai entered vigorously into the contest, and boldly and successfully defended the position of his Church and Conference on the subject. By his sermons and addresses he exerted a marked influence in favor of the national government during the war of the Rebellion. He showed the friendship of President Lincoln, and forth from an able discourse his sorrow at his death. In 1867 he accepted the professorship of historical theology in the Drew Theological Seminary at Madison, and after the decease of Dr. McClintock (q. v.) he was also acting president of the institution; but he was removed by death shortly afterwards, June 20, 1870. Dr. Nadai was an able and forcible preacher, and maintained to the last a high rank in the pulpit. Many of his discourses on special occasions were printed and widely read, and exhibited a high order of pulpit eloquence. He was also well known as a voluminous writer, and contributed very largely to the periodical literature of his time. He was one of the editorial staff of The Methodist, whose editor, Dr. Crooks, said of him that "in writing he was almost without a peer in the American Methodist Church." Dr. Nadai's thorough scholarship, fine social qualities, and his ability to communicate instruction, made him an efficient and popular instructor, and his professional career in both the institutions which he served was marked by enthusiasm, energy, and success. A volume of his Sermons (entitled New Life Dauing, etc.) was published under the editorship of Prof. Butt, with a Memoir (N.Y. 1872), 12mo.

Naeda, Thomas, a Hungarian Protestant divine of some note, flourished during the Reformation movement of the 16th century. But little is known of his personal history. He was distinguished by unusual attainments, power, wealth, zeal, and generosity in supporting the cause of the Gospel. He died in 1558. Neada had been a strong pillar in the Church in a day when every man was with one hand building the walls of Zion and with the other holding a weapon." See Craig, Hist. of the Prot. Church in Hungary (Best. 1864), p. 92, 93.

Nenia (i.e. a dirge or lamentation, equivalent to the Greek ἔνοια); the term is used to describe the Roman funeral songs, uttered either by the relatives of
the deceased or by hired persons. At Rome Nenia
was personified and worshipped as a goddess, and
even had a chapel, which, however, as in the case of all
other gods in connection with the dead, was outside
the walls of the city, near the porta Viminalia. As Nenia
are compared with lullabies, and as they seem to have been
sung to lull the sleeper, it is possible that the word,
with the added окончательно, the object of this worship was probably to procure
rest and peace for the departed in the lower world. See
Augustine, De Cui. Dei, vi, 9; Arnoldus, Ad. Gent. iv, 7;
vii, 32; Horace, Carin., ii, 25, 16; Festus, p. 161, 168, ed.
Muller.

Naga (a Sanscrit word signifying snake) designates
in Hindu mythology a monster, regarded as a demigod,
and thought to have been one of the seven offspring of
the serpent, and the expanded neck of a cobra de capello.
The worship of the snake-gods is termed Naga Panchami.
These gods, of whom, among the Hindus, Vasuki is the
Lord and Manasa the queen, reside in regions imme-
diately under the earth, supposed to be the seat of ex-
haustless treasures, the blaze of which supplies the
absence of the solar radiance. The race of these beings
is said to have sprung from Kasyapa (q.v.), in order to
people the regions below the earth (Patala). The prin-
cipal Nagas, of which there are about a dozen, are pro-
pituated with offerings of milk and ghee. The fifth
lunar day of Svarana is held sacred to the Nagas. On
that day ablations are performed in the pool sacred to
Vasuki, the lord of the Nagas. By observing this cere-
monies the Nagas are pleased, and the votaries are
believed to rest free from the dread of serpents. See
Moor, Hindi Panchaon., s. v.; Coleman, Hindi Mythol. p. 254.

Nagara, Israel ben-Moses, a Jewish writer, was
a native of Spain, but flourished at Damascus near the
closing part of the 16th century. He was a celebrated
poet, and was wont to attend the mosques to collect
their musical tunes, to which he adapted Hebrew or
Chaldee verses. His works were, יַּבִּיא לִּבְּרָיִם, a collection of religious poems in three parts (Isaef, 1568;
Venice, 1606) — יַּבִּיא לִּבְּרָיִם, a metrical homily on
contempt for the world (Venice, 1580, 1599) — יַּבִּיא לִּבְּרָיִם, The Waters of Israel, a melange, poetic, epis-
tolary, and oratorical, arranged under six heads, desig-
nated by the waters mentioned in the Bible: יַּבִּיא לִּבְּרָיִם, Waters of Sibbok; 2. יַּבִּיא לִּבְּרָיִם, Waters of Qui-
este; 3. יַּבִּיא לִּבְּרָיִם, Waters of Sibbok; 4. יַּבִּיא לִּבְּרָיִם, Waters of Sibbok; 5. יַּבִּיא לִּבְּרָיִם, Bitter Waters (Venice, 1605). See Fürst,

Nagajaran or Nagesa, one of the most cel-
lebrated Buddhist teachers or patriarchs—the thir-
teenth—according to some to have taught about
500 years, according to others, about 500 years after the
death of the Buddha Sakyamuni (i.e. 143 or 43 B.C.).
He was the founder of the Mâdhâmyâika school, and its
principal disciples were Arambâva and Buddhâpallâna.
According to the traditions of the Buddhists, he was born
in the south of India, in a Brahminical family. Even as
a child he studied all the four Vedas; later he travelled
through various countries, and became proficient in astron-
omy, geography, and magical arts. By means of the
life he has several amorous adventures, which ended
in the death of three companions of his, but in his
own case, according to Kalâsa, fled as a mendicant,
in his conversion to Buddhism. Many mir-
acles are, of course, attributed to his career as propa-
gator of this doctrine, especially in the south of India,
and his life is said to have lasted 300 years. See F.
Burnouf, Introd. à l'Hist. du Bouddhisme Indien (Par.
1844); Sponcy Hardy, Manual of Buddhism (Lond.
1853).

Nagasaena. See Nagarjuna.

Nagadilah, Samuel b'n-Joseph, ha-Levi, was
named Ham-nagadilah (the prince or chief), a Jewish writer,
was born at Cordova in 983. He was a pupil of Chajug
(q.v.), a teacher of Hebrew and Greek, and in 1015 rabbi Chapo, under whose instruction he ac-
quired extensive Talmudical knowledge, died, R. Samuel
succeeded to the chief rabbinate of Spain, with the title
of prince (Nagadilah). Owing, however, to the intestine
wars between the rival Moorish chiefs for supremacy,
Samuel was compelled to leave Cordova, and joined
also Samuel ha-Levi, who went to Malaga, where he
kept a druggist's shop. His profound knowledge of
Arabian literature and his beautiful writing brought
him the notice of Alkas ben-Alarif, prime minister of
Habus Ibn-Moakan of Granada, who made him his sec-
cretry, and on his resignation recommended his sovereign
to be guided by him. In 1029 he was himself made
prime minister, and in 1027 secured the crown to Badis,
the eldest son of the deceased king, although the
grandees had sought to place Balian, the younger son, on
the throne of his father. Nagadilah zealously cultivated poe-
etry and science, in which he himself excelled, and to
the encouragement of which he devoted a large portion
of his wealth. He collected and purchased many copies
of the Talmud, Mishna, and other books, which, to dis-
seminate learning, he distributed gratuitously, and he was
indefatigable patron both of Spanish and foreign
authors. Besides a treatise which he wrote against
Ibn-Ganach in defence of his teacher Chajug, entitled
ביוותק, he is best known as the author of a
good treatise on the methodology of the Talmud, of
which a condensed German translation is given by Fin-
ner in his introduction to the treatise Berakoth; he
also wrote the Song of Proverbs, יביוותק (or parables),
consisting of poems which are represented as composed
and magnificent, and of which some pieces are given
by Dukes in his Robinissche Blumenlose. He is also
also a grammatical work consisting of twenty-two books, entitled
ביוותק, which Aben-Ezra praises above all similar efforts
which had preceded it, but which is also lost. Nagadilah
died in 1035. See Fürst, Bibl. Jud. iii, 14 sq.; De Rossi,

NAGGE [rather Nanjo] (Nayrjav i.v. Naydat; comp. Sept. Nayfor for Nogah, 1732, 1 Chron. iii, 7), one of the ancestors of Christ in the maternal line, the son of Maath (rather of Semai), and father of Eel (Luke iii, 25); corresponding to Neariah (q.v.), the son of She- mahiah, and father of Elioenai in the Davidean list (1 Chron. iii, 22, 28). B.C. 550.

Nagot, François-Charles, a French ascetic writer, was born at Tours, April 19, 1734. Admitted into the congregation of the priests of Saint-Sulpice, he was sent on the expulsion of the Jesuits in 1773. In 1779, he went to Naples. He was made superior of the house of the Robertson at Paris in 1769, afterwards of the small seminary of Saint-Sulpice, then director of the large seminary. The revolution decided him, in 1791, to come to this country and settle at Baltimore, where Pius VI had just created an episcopal see, comprising at that time all the territory of the United States. At the Monumental City he succeeded in establishing a seminary, and a college which still enjoys all the privileges of a university. He retained the management of these houses till the year 1810, when he was obliged by infirmities to resign. He died at Baltimore, April 9, 1816. His principal work is Éléments de la doctrine de quelques Protestants (1791, 1794, 12mo) — La Doctrine de l'Écriture sur les miracles (Paris, 1808, 3 vols. 12mo), a translation of an English work by George Hay — Vie de M. Oller, curé de Saint-Sulpice (1818, 8vo), in manuscript different translations of works of English piety. See Hoefer, Nouv. Diction. Générale, s. v.

Nagpur or Napeen, an extensive inland province of India. In belonging in its civil administration to the Bengal, and in its military to the Mahras presidency, extends immediately north-east of the Nizam's dominions, in lat. 17° 15'—23° 5' N, long. 78° 3'—89° 10', and has an area of 76,382 square miles, with a population of 4,650,000. The north part of the province is mountainous in character. The climate is not healthy, and is especially insidious in the extensive tracts of low, marshy land which abound in the province. The Gonds, supposed to be the aborigines, are the most remarkable class of the inhabitants. They rear fowls, swine, and buffaloes; but their country, forming the southern tracts —about one third of the whole—is covered with a dense forest, inhabited by tigers, elephants, and other wild beasts. There are favored districts, where the inhabitants are more industrious, rice, maize, flax, and other seeds and vegetables are extensively cultivated. The rajahs of Nagpur, sometimes called the rajahs of Bharar, ruled over a state formed out of a part of the great Mahatta kingdom. The province of Nagpur, however, divided out in 1839, and the territory came into possession of the British. The province has five divisions. Its capital, Nagpur, has a population of 115,000. Inclusive of its extensive suburbs, it is seven miles in circumference. It contains no important edifices. The great body of the inhabitants live in thatched mud tents, interspersed with trees, which prevent the circulation of air and scarce moisture, thus rendering the town unnecessarily unhealthy. Missions are sustained here by the Church of England and other Protestant bodies, but little progress has as yet been made in converting the natives.

Nag's-Head Consecration designates the questionable way in which Roman Catholics assert that the apostolical succession was preserved in the Church of England. They aver that on the passing of the first Act of Uniformity in the first year of queen Elizabeth's reign, fourteen bishops vacating their sees, and all the other sees excepting that of Llandaff being vacant, there was a difficulty in maintaining the hitherto unbroken succession of bishops from apostolic times; and that in 1568 the Bishop of Llandaff refused to officiate at Parker's consecration, the Protestant divines procured the help of Scory, a deified bishop of the reign of Edward VI, and all having met at the Nag's-Head tavern, in Cheapside, they kneel before Scory, who laid a Bible on their heads or shoulders, saying, "Take thou authority to preach the Word of God sincerely," and they rose up bishops of the New Church of England! The story, which was first told by a Jesuit, Sacro Bocco, or Holy Wood, died out after the event, and the Romanists themselves deny. Thus it is discredited by the Roman Catholic historian Lingard, and is carefully refuted by Strype in his life of Parker. The facts of the case are best stated in an archbishop Bramhall's account of the Nag's-Head bafe (Works, p. 486), and is the question still a topic of controversy. They say that archbishop Parker and the rest of the Protestant bishops in the beginning of queen Elizabeth's reign, or at least sundry of them, were consecrated at the Nag's Head, in Cheapside, together, by bishop Scory alone, or by him and bishop Barlow, without sermon, without sacrament, without solemnity, in the year 1559 (but they know not by what day, nor what public notaries), by a new, fantastic form. All this they maintain on the supposed voluntary report of Mr. Neale (a single malicious spy), in private to his own party, long after the business pretended to be done. We say that archbishop Parker was consecrated alone at Lambeth, in the presence of several bishops, archbishops, and other learned men, and that the commission under the great seal of England, with sermon, with sacrament, with due solemnities, on the 17th day of December, A.D. 1559, before four of the most eminent public notaries in England, and particularly the same public notary was principal actuary both at cardinal Pole's consecration and archbishop Parker's, and I add that the election took place in the chapter-house at Canterbury, and the confirmation at St. Mary-le-Bone's church in Cheapside. Scory, then elected to the see of Bedford; Barlow, formerly bishop of Wells, then elected to Chichester; Coventra, formerly of Exeter, and never reappointed to this see; and Hodgkin, suffragan of Hereford, were the episcopal officers who officiated at the consecration. The Nag's-Head story probably arose from the company having possibly gone from Bow church, after the confirmation, to take a dinner together at the tavern hard by, according to the prevailing custom. The due succession of bishops in the English Church it would seem the Nag's-Head's bafe has never proved to have broken. Prof. Dillingen, at the recent Congress of the Old Catholics at Bonn (August, 1875), held that there can be no controversy regarding the legitimacy of Anglican ordinances, which was questioned by the English. He said that there was no doubt of their succession. When, under queen Elizabeth, the present Episcopal Church was founded, those who disagreed were dismissed, and discussion turned on the legitimacy of archbishop Parker's nomination. Of this there was no doubt. It was proved by his journal, the Register, and by contemporary history. To doubt it would be like the doubting of the man who sought to show that Napoleon I was a myth. The succession of the Romish Church could be disputed. Things had occurred which would become formidable weapons if anybody cared to use them. But there was no room for doubt as to succession in the Anglican Church. See Council, iv, four acts of the Ordinances of England (Early Corfor, 1844, new ed.); Bailly, Ordre Anglicanorum de fendo (Lond. 1870); Soames, Hist. of the Reformation, iv, 691 sq. ; Wordsworth, Eccles. Biog. iii, 388, n.; Hardwick, Ch. Hist. of the Reformation, p. 226; Burnet, Hist. of the Reformation, ii, 624; Baxter, Ch. Hist. p. 481; Eng. Hist. vi, 198; Ch. Rev. 1859 (July), pp. 301; Meta. Quart. Rev. 1874 (Jan.), p. 159. See also Parker (archbishop).

Na'nhalal (Heb. Nahalal, 1 Sam. ii, 22; 1 Chron. xvi, 8; Sept. Naalallo v. n. Nabal), and even Edal (Vulg. Nabal); Auth. Vers. "Na'hahal," Josh. xix, 15, a city, in the tribe of Zebulun, on the border of Issachar (Josh. xix, 15), but inhabited by Canaanites tributary to Israel (Judg. i, 30, where the name is " Nahalal"), given
NAHALIEL

NAHAS

of two persons. For the city of Nahash (Auth. Vers. 1 Chron. iv. 12, marg.), see IR-NAHAS.

1. A king of the Ammonites, near the beginning of Saul's reign. B.C. 1092. A message came from the people of Jabesh seeking a king. It was against the fierce hostility of this Ammonite chief. He had apparently acquired a name for his military achievements before directing an assault against the city of Jabesh (see 1 Sam. xii, 12); for though it was a well-fortified place, and the largest town in the transjordanian territory of the Ammonites, the inhabitants had thought it a hopeless matter to contend against so formidable an adversary. They were ready to submit to his supremacy if he would enter into covenant with them on somewhat reasonable terms; but as he, in the pride and insolence of power, declared he would insist on plucking out all their right eyes, and casting it as a reproach on Israel, the inhabitants were obliged to appeal to their fellow-countrymen. The mutilating barbarity proposed to the inhabitants of Jabesh-gilead by Nahash is a practice that was formerly very common in the East. Mr. Hanway, in his Journey in Persia, gives several instances of it. See Ezra. Accordingly the inhabitants of Jabesh-gilead obtained a truce of seven days, and despatched messengers to Gibeon to inform Saul of their extremity (1 Sam. xi, 1-4). Saul felt the greatness of the emergency, and took prompt measures to relieve the place and discomfit the army of Nahash. See JABESH-GILEAD. In this narrative, Nahash, or near Nahash nor his people ventured any more to attack Israel during the reign of Saul. See SAUL. If we might rely on the testimony of Josephus (Ant. vi, 5, 3), Nahash himself fell in the rout that ensued. But of this the sacred narrative is entirely silent; and the probability is (for we have no reason to suppose Nahash to have had an official designation or a common name among the Ammonites) that the Nahash whom Saul discomfited was the same who afterwards showed kindness to David. How this kindness was exhibited, or at what particular time, we are not told; but we can have little doubt that it occurred some time during the fierce persecutions which David endured at the hands of Saul, when the king of Ammon, like the king of Gath, might deem it a stroke of policy, in respect to Saul, to befriend the man whom he was pursuing as an enemy. Jewish traditions affirm that it consisted in his having afforded protection to one of David's brothers, who had been taken captive when his fame was massacred by the treacherous king of Moab, to whose care they had been intrusted by David (1 Sam. xxiii, 3, 4), and who found an asylum with Nahash. (See the Midrash of R. Tanchum, as quoted by S. Jarchi on 2 Sam. x. 2.) See DAVID. David was not mindful of the kindness shown to him, and he had refused to come to him and was willing to make peaceful relations with his son and successor Hanun, he sent messengers to conciliate him on receiving intelligence of the death of Nahash (2 Sam. x. 2). By the folly of Hanun this well-meaning embassy turned into the occasion of a bloody war, which placed David for a time in some danger, but at last emerged completely triumphant. See HANUN.

Mention is made in the history of David's flight from the presence of Absalom of a "Shobi, the son of Nahash of Rabbah of the children of Ammon," coming along with others to David at Mahanaim, with food and refreshments (2 Sam. xvii, 57-59). It is probable that this was a son of Nahash, the former king, though it cannot be regarded as at all certain. That an Ammonite, however, should at such a time have so readily proffered his liberality to David is a striking proof that even after the terrible Ammonite war there still were bosoms among the children of Ammon left unscarred by the attacks of his father, and which were not affected to the person and the cause of David. See SMOOT.

2. A person mentioned once only (2 Sam. xviii, 20) in stating the parentage of Amasa, the commander-in-chief of Absalom's army. Amasa is there said to have been born with its "suburbs" to the Merarite Levites (Josh. xxi, 35). It is mentioned between Kithlah and Shimron. Eusebius erroneously locates it E of the Jordan (Onomast., s. v. Nephal.) "The Jerusalem Talmud (Megillah, chap. 1; Mekhilta, d. 24, chap. v., as quoted by Schwarz (Palest. Talmud, 172) and Reland (Palest. p. 717), asserts that Nahaliel (or Nahalal, as it is in some copies) was in post-Biblical times called Mahal; and this Schwarz identifies with the modern Malul, a village in the plain of the Estraeleon under the mountains which enclose the plain on the north, four miles west of Nahalal, and from Japhia; an identification contemplated in the Van de Velde (Memor. s. v.). One Hebrew MS. (30 Kennicott) lends countenance to it by reading Zimlish, i.e. Malul, in Josh. xxi, 35. If the town was in the great plain, we can understand why the Israelites were unable to drive out the Canaanites from it, since their chariots must have been extremely formidable as long as they remained on level or smooth ground." This site, however, has been appropriated by Porter to that of the ancient Maralah (q. v.).

Nahal'iel ( Heb. Nachal'iel, נחליאל, possession or valley of God; Sept. Nachal'iel v. e. Malul), the fifty-fourth encampment of the Israelites in the wilderness, between Hammath and Bannom (Num. xxi, 19), apparently in the northern part of the plain Ar Ramadam, south-east of Jebel Himeh, perhaps on the northern branch of Wady 'Aileh (Durehkat, i.e. Dureh, 635). See EDOM. It lay "beyond" the plains of the Arnon (ver. 18), and between Hammath and Bannom, the next after Bannom being Pisga. It does not occur in the catalogue of Num. xxi, 28, nor anywhere besides the passage quoted above. By Eusebius and Jerome (Onomast. s. v. Naaliel) it is mentioned as close to the Arnon. Mr. Grove, in Smith's Diet. suggests that "its name seems to imply that it was a stream or wady, and it is not improperly preserved in that of the Wady En-kechile, which runs into the Moab, the ancient Arnon, a short distance to the east of the place at which the road between Rabba and Aroer crosses the ravine of the latter name Augkechele, when written in Hebrew letters (ענמכא), is little more than בכרמא transposed." See, however, MATTANAH.

Nah'al (Josh. xix, 19). See NAHALAL.

Nah'al ( Heb. Nahal'ol, נחלאל, pasture; Sept. Nachal'ol v. Ewamān and Domān; Vulg. Nādlol), a slightly different orthography (Judg. i. 30) for the name NAHALAL (q. v.).

Nah'am ( Heb. Nach'am, נחם, consolation; Sept. Nāfāqū v. Nāfāqū, Nāfāqū, a brother of Hodiah, the second or Jewish wife of Meroz; and "father of Kelliah and Eshemoth (1 Chron. iv. 19). B.C. post 1612. He seems to have been the same called Ishbah (q. v.) in ver. 17. See MEXKH.

Nah'am'ani ( Heb. Nach'amani, נחמאני, repenting or compassionate; Sept. Nānāwî), one of the Jews who returned with Zerubbabel from the captivity (Neh. vii. 7). B.C. 536. His name is omitted in the parallel lists of Ezra ii. 2.

Nah'arai (others Nah'arai' or Nahara'it) (1 Chron. vi. 89). See NAHARAI.

Nahara'im. See ARAH-NAHARAIM.

Nah'hash ( Heb. Nach'hash, נחש, serpent, as often; Sept. Naasā; Joseph. Naārōs; Vulg. Nārōs), the name
The son (perhaps illegitimate) of a certain Ishra, by Abigail, "daughter of Nahash, and sister (Alex. Sept. brother) to Zeruiah." B.C. ante 1035. By the genealogy of 1 Chron. ii, 16 it appears that Zeruiah and Abigail were sisters of David and the other children of Jesse. The explanation then arises, How could Abigail have been at the same time daughter of Nahash and sister to the children of Jesse? To this four answers may be given:

1. The universal tradition of the rabbinis is that Nahash and Jesse were identical (see the citations from the Talmud in Meyer, Seder Olam, 569; also Jerome, Quast. Hebr. ad loc.). "Nahash," says Solomon Jacob (in his commentary on 2 Sam. xvii, 25), "was Jesse the father of David, because he died without sin, by the counsel of the Lord (nachash), i.e. by the infirmity of his fallen human nature only.

2. The explanation first put forth by Prof. Stanley (Hist. of the Jewish Church, ii, 50), that Nahash was the name of the king of the Ammonites, and that the same woman had first been his wife or concubine—i.e. in which capacity she had given birth to Abigail and Zeruiah—and afterwards wife to Jesse, and the mother of his children. In this manner Abigail and Zeruiah would be sisters to David, without being at the same time daughters of Jesse. This has in its favor the guarded statement of 1 Chron. ii, 16 that the two women were not themselves Jesse's children, but sisters of his children, and the improbability (otherwise extreme) of so close a connection between an Israelite and an Ammonitic king is alleviated by Jesse's known descent from a Moabite, and by the connection which has been shown above to have existed between David and Nahash of Ammon.

3. A third possible explanation is that Nahash was the name, not of Jesse, nor of a former husband of his wife, but of his wife herself. There is nothing in the name to prevent its being borne equally by either sex, and other instances may be quoted of women who are given in the genealogies as the sisters, not of their fathers, but of their mothers: e.g. Meholah, daughter of Matred, daughter of Mezahab. Still it seems very improbable that Jesse's wife would be suddenly intruded into the narrative, as she is if this hypothesis be adopted.

4. The most natural supposition under all the circumstances is that Abigail and Zeruiah were sisters of David merely on the mother's side; and that the mother, before she became the wife of Jesse, had been married to some person (apparently an Israelite, but otherwise unknown) named Nahash, to whom she had borne Abigail and Zeruiah. This seems to be countenanced by the peculiarities in which they are mentioned in the genealogy of Chronicles, not as Jesse's daughters, but as David's sisters—as if their relationship to him were what alone entitled them to a place in it.

Nahath (Heb. "Nakchath, רשת, rest, as often").

1. (Sept. Naxi, Gen. xxxvi, 13; Naxi, li. 17). Nahxi, 1 Chron. i, 57. The first named of the four sons of Reuel, the son of Esau, and a prince (A. V. "duke") among the Edomites (Gen. xxxvi, 13, 17). B.C. cir. 1850.

2. (Sept. Naxo, v. r. Naxo, Naxo). A Kohathite Levite, son of Zophai or Zuph, and ancestor of Samuel the prophet (1 Chron. vi, 25). B.C. cir. 1280. He is the same with Toah (1 Chron. vii, 34) and Tohu (1 Sam. i, 1).

Nahavendi, Benjamin ben-Moses (נַחֲבַדְנֶדָי בֶּן מְוָדָס), a celebrated Jewish commentator of the Karaitic sect, flourished about A.D. 800, and derived his name from his native place, Nahavend, in ancient Media. He not only immortalized his name by effecting a reformation and consolidation in the opinions of the Karaites, but by being next in importance to Anan, the founder of this sect, but he greatly distinguished himself as an expositor of the Hebrew Scriptures. He wrote (in Hebrew), A Commentary on the Pentateuch, in which he illustrates the Mosaic enactments by copious domestic examples and customary phrases (comp. Pinski, Liebne Kadmonioth, p. 72, Appendix)—A Commentary on Isaiah, in which he denies the supposed Messianic prophecies (comp. Jepheth on Isaiah lii)—A Commentary on the Book of Daniel, in which days (xii, 12) are made to mean years (comp. Pinski, Isid. p. 82, Appendix; Jepheth, at end of Daniel).—A Commentary on the Psalms—the Carthaginians, Romans, Ethiopian, Lydian, Samaritans, and Eclesiastes—interpreting the first and last of these allegorically. Pinski (ibid. p. 109–111, Appendix) gives a specimen of this commentary, the MS. of which exists in the Paris library:—A Book of Commands (הַמַּלְכִּים, הַמַּלְכִּים), in which he propounds the Karaitic mode of exposition of Scripture, in opposition to the Rabbinic expositions:—The Book of Legal Enactments (הַמַּלְכִּים, הַמַּלְכִּים), also called הַמַּלְכִּים, The Tribute of Benjamin, which treats exclusively of the penal and civil laws of the Mosaic code, as printed at Eupatoria, 1834. Besides these exegetical and practical works, Nahavendi seems also to have composed a dogmatic work, which contains speculations about God and creation and the soul. The soul, in his view, has no separate existence, but is only part of the body, and can expect no life and no retribution apart from its bodily connection. God comes into no immediate relation with the world. His creation and providence are all through mediators, secondary causes, spiritual forces (דַּנְאָמִים), words (לֹא), angels of various kinds and degrees. Nahavendi denied that God spoke directly to Moses, or that any word had come to patriarchs or prophets from one too exalted for all human intercourse, and would allow no anthropomorphic conceptions of the divine nature. In several minor points of practice he departed from the teaching of Anan, particularly as to the observance of the Sabbath, the killing of the paschal lamb, and the validity of the marriage bond. A lawful marriage, according to Nahavendi, requires more than purchase, contract, and cohabitation; it must have the preliminaries of betrothal, taking home, bridal presents, religious covenant, and the presence of witnesses, to be lawful. That the services which he rendered for the cause of his co-religionists were highly appreciated is clear from the fact that the prominence of his scriptural teaching they discarded the name Ananites, and henceforth called themselves Karaites (כֶּרְעִיתִים, i.e. Scripturality, or Bene-Mikra (בֵּן מִקְרָא), followers of the Bible, in contradistinction to the Baale-Kabalah (ebile-Kabalah), followers of tradition.

Nahb'î (Heb. "Nachbi," רַחֲבָּה, hidden; Sept. Nachi v. r. Nachi; Vulg. Nahobi), the son of Vaphis, of the tribe of Naphtali; one of the twelve spies sent by Moses to the land of Canaan (Num. xiii, 14). B.C. 1557.

probably inverted in the narrative; in which case Nahor, instead of being younger than Abraham, was really older. B.C. ante 2163. He married Milcah, the daughter of his brother Haran; and when Abraham and Lot migrated to Canaan, Nahor remained behind in the land of his birth, on the eastern side of the Euphrates—the boundary between the Old and the New World. He lived, early and gathered his family around him the sepulchre of his father (Gen. xi, 27-32; comp. 2 Sam. vii, 37). Coupling this with the statement of Judith v. 8 and the universal tradition of the East, that Terah's departure from Ur was a relinquishing of false worship, an additional force is given to the mention of "the two brothers," (Gen. xxiv, 1-2) and of Nahor's marriage, not from the God of Abraham's descendants. Two generations later Nahor's family were certainly living at Haran (Gen. xxviii, 10; xxix, 4). Like Jacob, and also like Ishmael, Nahor was the father of twelve sons; and further, as in the case of Jacob, eight of them were the children of his wife, and four of a concubine, Reumah (Gen. xxii, 21-24). Special care is taken in speaking of the legitimate branch to specify its descent from Milcah—"the son of Milcah, which she bare unto Nahor." It was to this pure and unsullied race that Abraham and Rebekah in turn had recourse for wives for their sons. But with Jacob's flight from Haran the intercourse ceased. The heap of stones which he and "Laban the Syrian" erected on Mount Gilead (Gen. xxxii, 46) may be said to have formed at once the tomb of their past connection and the barrier against its continuance. Even at that time a wide variation had taken place not only in their language (ver. 47), but, as it would seem, in the object of their worship. The "God of Nahor" appears as a distinct divinity from the "God of Abraham and the Fear of Isaac" (ver. 83). Doubtless this was one of the "other gods" which before the call of Abraham were worshipped in the family of Terah, whose images were in Rachel's possession during the conference on Gilead, and which had to be discarded before Jacob could go into the presence of the "God of Bethel" (Gen. xxxiv, 2; comp. xxxi, 13). Henceforward the line of distinction between the two families is most sharply drawn (as in the allusion of Josh. xxiv, 2), and the descendants of Nahor confine their communications to their own immediate kindred, or to the members of other non-Israelitish tribes, as in the case of Job the man of Uz, and his friends, Elish the Buzite of the kindred of Ram, Eliphaz the Temanite, and Bildad the Shuhite. Many centuries later David appears to have come into collision—sometimes friendly, sometimes the reverse—with one of them. The title of "Titheth" probably identical with Tebah and Maacah, are mentioned in the relation of his wars on the eastern frontier of Israel (1 Chron. xviii, 8; xix, 6); and the mother of Absalom either belonged to or was connected with the latter of the above nations.

No certain traces of the name of Nahor have been recognised in Mesopotamia. Ewald (Geschichte, i, 359) proposes Hadath, a town on the Euphrates just above Hit, and bearing the additional name of el-Na'ura; also another place, likewise called el-Na'ura, mentioned by some Arabian geographers as lying farther north; and

NAHUM

Nahash, which, however, seems to lie out of Mesopotamia. Others have mentioned Naarda, or Nahardea, a town or district in the neighborhood of the above, celebrated as the site of a college of the Jews (Smith, Dict. of Geog. s. v. Naarda).

Nahash (Heb. Nahashon, נַחֲשֹׁנָה, sorcerer; Sept. and N. T. Naasow, but Naasow, Numb. i, 7; A. V. "Naashon," Exod. vi, 23; "Naason," Matt. i, 4; Luke iii, 32), the son of Aminadab, and prince of the children of Judah (as he is styled in the genealogy of Judah, 1 Chron. ii, 10) at the time of the first numbering in the wilderness (Exod. vii, 25; Numb. i, 7, etc.). B.C. 1657. His sister, Eliabbas, was wife to Aaron, and his son, Sammon, was husband to Rahab after the taking of Jericho. From Eliabba being described as "sister of Naashon," we may infer that he was a person of considerable note and dignity, which his appointment as one of the twelve princes who assisted Moses and Aaron in taking the census, and who were all "renowned of the congregation, heads of thousands in Israel," shows him to have been. No less conspicuous for high rank and position does he appear in Numb. ii, 8; vii, 12; x, 14, where, in the encampment, in the offerings of the princes, and in the order of march, the first place is assigned to him as captain of the host of Judah. Indeed, on these three last-named occasions he appears as the first man in the state next to Moses and Aaron, whereas at the census he comes after the chiefs of the tribes of Reuben and Simeon. Nahashon died in the wilderness, according to Numb. xxvi, 64, 65, but no further particulars of his life are given. In the N. T. he occurs twice, viz. in Matt. i, 4, and Luke iii, 32, in the genealogy of Christ, where his lineage in the preceding and following descents is evidently copied from Ruth iv, 18-20; 1 Chron. ii, 10-12.

Na'hum (Heb. Na'ham, נָחַם, consolation; a name likewise found as ἄναμ in the Phcenician inscriptions, [Genesiuss, Monum. Phen. p. 134, 137]; and in the form Naamouc in a Greek inscription given by Böckh, Corp. Inscri. iv, 8; Sept. Na'am; comp. Luke iii, 25), the seventh of the minor prophets, according to the arrangement of both the Hebrew and Greek. (In this and the following article we give a copious exhibition of all the topics of interest relating to the whole subject). Of the author himself we have no more knowledge than is afforded us by the scanty title of his book, "the book of the vision of Nahum the Elkoshite," which gives no indication whatever of his date, and leaves his origin obscure. The site of Elkosh, his native place, is disputed, some placing it in Galilee, with Jerome, who was shown the ruins by his guide (Prarm, in Nah.); so Cyril (ad loc.). Cyprian, literally "village of Nahum," is supposed to have derived its name from the prophet. Schwarz
NAHUM

(Descr. of Pal. p. 188) mentions a Kafar Tanchum, or Nachum, close on Chinnereth, and two and a half English miles north of Tiberias. "They point out there the graves of Nahum the prophet, of ravens Tanchum and Nachum, and a well there, called Dossel, and they say that the ancient position of the village is easily known." Others (after Assemani, Bibl. Orient. i, 525; iii, 352) locate Nahum's birthplace in Assyria, where the tomb of the prophet is still visited as a sacred spot by Jews from all parts. Benjamin de Tudela (p. 55 Heb. text, ed. Asher) thus briefly alludes to it: "And in the city of Asshur (Mosul) is the synagogue of Obadiah, and the synagogue of Jonah the son of Amittai, and the synagogue of Nahum the Elkoshite." See ELKOH. Mr. Layard, who visited the place, says (Nineteenth, i, 197), "It is held in great reverence by Mohammedans and Christians, but especially by Jews, who keep the building—a modern one—in repair. The tomb is a simple plaster box, covered with green cloth, and standing at the upper end of a large chamber. There are no inscriptions nor fragments of any antiquity about the place; and I am not aware in what the tradition originated, nor how long it has attached to the village of Elkosh." Genesius regards both the above locations of Elkosh as very doubtful (Thesaurus, s. v.). Those who maintain the latter site assume that the prophet's parents were carried into captivity by Tiglath-pileser, and planted, with other exile colonists, in the province of Assyria, the modern Kuristan, and that the prophet was born at the village of Elkosh, the ancient Elath, in the upper valley of the Tigris, a few miles north of Mosul. (So Eichhorn, Einl. iv, 390; Ritter, Erdk. ix, 742; and others.) Ewald is of opinion that the prophecy was written at a time when Nineveh was threatened from without. Against this it may be urged that it does not appear that the exiles were carried into the province of Assyria proper, but into the newly-conquered districts, such as Mesopotamia, Babylonia, or Media. The arguments in favor of an Assyrian locality for the prophecy are supported by the occurrence of what are presumed to be Assyrian words: בֵּן, ii, 8; נִיר, ii, 17; and the strange form יַעַבְדָל in ii, 14, which is supposed to indicate a foreign influence. In addition to this is the internal evidence supplied by the vivid description of Nineveh, of whose splendors it is contended Nahum must have been an eye-witness; but Hitzig justly doubts whether a description of Nineveh and the great city as it must have been at its height, was not the result of a lively imagination, and such knowledge of a renowned city as might be possessed by any one in Anterior Asia. The Assyrian warriors were no strangers in Palestine, and that there was sufficient intercourse between the two countries is rendered probable by the history of the Book of Esther. There is nothing to indicate that Nahum of Nahum to indicate that it was written in the immediate neighborhood of Nineveh, and in full view of the scenes which are depicted, nor is the language that of an exile in an enemy's country. No allusion is made to the captivity; while, on the other hand, the imagery is of Levantine soil. Nahum, i, 4, to whom the rich pastures of Bashan, the vineyards of Carmel, and the blossoms of Lebanon were emblems of all that was luxuriant and fertile. The language employed in i, 5 and ii, 2 is appropriate to one who wrote for his countrymen in their native land. In fact, the sole origin of the theory that Nahum flourished and in Assyria is the name of the village Alkush, which contains his supposed tomb, and from its similarity to Elkosh was apparently selected by mediæval tradition as a shrine for pilgrims, with little probability to recommend it as exists in the case of Obadiah and Jephthah, whose burial-places are thus well shown in the same neighborhood. This supposition is more probable than that of any other which has been adopted in order to account for the existence of Nahum's tomb at a place the name of which so closely resembles that of his native town. Alkush, it is suggested, was founded by the Jewish settlers, and so named by them in memory of Elkosh in their own country. Tradition, as usual, has usurped the province of history. According to pseudo-EPHRAIMUS (De Vita Proph. in, opp. ii, 247), Nahum was of the stock of Obadiah, beyond the Jordan at Begabah (Bayya'a; Chron. Posch. i, 150 B. Byaan'a'bi), or Bethabara, where he died in peace and was buried. In the Roman Martyrology the 1st of December is consecrated to his memory. For the period in which he lived, see the discussion below as to the date of his prophecy.

NAHUM, BOOK OF. The same uncertainty and dispute have prevailed on many points affecting the prophecy as have been detailed above respecting the prophet.

1. Place of Writing. —This largely depends upon the location of his birthplace. Dr. Davidson, in his Introduction to the Old Testament, confesses that the testimonies in favor of the Galilean authorship are older and better; but still prefers to think that Nahum was an Assyrian by residence, "because the analogy of prophecy and internal phenomena favor this opinion." But Prof. Stühelin justly remarks that the absence of all references to the council of the popes exiles in Assyria, among whom the prophet is supposed, on this hypothesis, to have been born and brought up, is an "internal phenomenon" which is quite decisive against the supposition; and with regard to the alleged "analogy of prophecy" being opposed to the idea that a prophet is inspired, far from proving the utter predictions of so much circumspection against it, it is hard to see how such a statement can be reconciled with such circumstantial prophecies as those directed against Babylon by Isaiah and other certainly Palestinian prophets.

2. Date of the Prophecy. —This is even more uncertain than its place of writing. In the Seder Olam Rabbah (p. 55, ed. Meyer) Nahum is made contemporary with Joel and Habakkuk in the reign of Manasseh. Synge (Chron. p. 201 d) places him with Hosea, Amos, and Jonah in the reign of Josiah king of Israel, more than a century earlier; while according to Ezechiel (Ant. p. 252) he was contemporary with Haggai, Zechariah, and Malachi, and prophesied in the fifth year after the destruction of Jerusalem. Josephus (Ant. ix, 11,5) mentions him as living in the latter part of the reign of Judah. About this time was a certain famine which prevailed in the land, and by which the downfall of the Assyrians and of Nineveh, said thus, etc.; to which he adds, "and all that was foretold concerning Nineveh came to pass after one hundred and fifteen years." From this Carpozov concluded that Nahum prophesied in the beginning of the reign of Ahab about B.C. 742. More modern writers are divided in their suffrages. Bertholdt thinks it probable that the prophet escaped into Judah when the ten tribes were carried captive, and wrote in the reign of Hezekiah. Keil (Lehrb. d. Einl. in d. A. T.) places him in the latter half of Hezekiah's reign, after the invasion of Sennacherib. Ewald (Typ. Des. Prop. p. 57) was of the like opinion, and the same view is taken by De Wette (Einl. p. 328), who suggests that the rebellion of the Medes against the Assyrians (B.C. 710), and the election of their own king in the person of Darius, may have been present to the prophet's mind. But the history of Darius and his very existence are now generally believed to be much later than the event. This period was adopted by Knobel (Prop. ii, 207, etc.) as the date of the prophecy. He was guided to his conclusion by the same supposed facts, and the destruction of No Ammon, or Theba, of Upper Egypt, which he believed was effected by the Assyrian monarch Sargon (B.C. 717-710), and is referred to by Nahum (prop. 15) as a contemporary event. In this case the prophet would be a younger contemporary of Isaiah (comp. Is. xx, 1). Ewald, again, conceives that the siege of Nineveh by the Median king Cyrus (B.C. 680-625) may have suggested Nahum's
NAHUM

—prophecy of its destruction. The existence of Pharaohs at the period to which he is assigned is now believed to be an anachronism. See Mecca. Junius and Tre-mellius select the last years of Josiah as the period at which Nahum prophesied; but at this time not Nineveh, but Babylon is predominant. In the same year (B.C. 605) Nebuchadnezzar, king of the Chaldeans, overthrew the Babylonian dominions. The arguments by which Strauss (Nahum de Nino Va-tecnicunm, pro. c. 1, 8) endeavor to prove that the prophecy belongs to the time at which Manasseh was in captivity at Babylon, that is, between the years 686 and 667 B.C., are not convincing. Assuming that the position which King Josiah took on the approach of Nebuchadnez-zar and Habakkuk supplies, as the limits of his prophetic career, the reigns of Hezekiah and Josiah, he endeavors to show from certain apparent resemblances to the writings of the older prophets—Joel, Jonah, and Isaiah—that Nahum must have been familiar with their writings, and consequently later in point of time than any of them. But a careful examination of the passages by which this argument is maintained will show that the phrases and turns of expression upon which the resemblance is supposed to rest are in no way remarkable or characteristic, and might have been freely used by any one familiar with Oriental metaphor and imagery without connection with the earlier writers. The arguments are Nah. ii, 10, where a striking expression is used which only occurs besides in Joel ii, 6, and Nah. i, 15 (Heb. ii, 1), the first clause of which is nearly word for word the same as that of Is. iii, 7. But these passages, by themselves, would equally prove that Nahum was an unlearned, unenlightened man, and that the prophecy was copied by them. Other references which are supposed to indicate imitations of older writers, or, at least, familiarity with their writings, are Nah. i, 3 compared with Jon. iv, 2; Nah. i, 13 with Isa. x, 27; Nah. iii, 10 with Isa. xiii, 16; Nah. ii, 2 [1] with Isa. xxvi, 1; Nah. ii, 5 with Isa. xiv, 2; Nah. iii, 7, 10 with Nah. iii, 7 with Isa. li, 21. For the purpose of showing that Nahum preceded Jeremiah, Strauss quotes other passages in which the latter prophet is believed to have had in his mind expressions of his predecessor with which he was familiar. The most striking of these are Jer.x, 19 compared with Nah. iii, 19; Jer. xiii, 26 with Nah. iii, 5; Jer. i, 8, 10 with Nah. iii, 13. Words which are assumed by the same commentator to be peculiar to the times of Isaiah are appealed to by him as evidences of the date of the prophecy. But the only examples which he quotes prove nothing: נֶקַע, skelēk̄h (Nah. i, 8, A. V. "food"), occurs in Job, the Psalms, and in Proverbs, but not once in Isaiah; וַיִּמְסֹר, mētsōrāh (Nah. ii, 1 [2] A. V. "mutilation"), is found only once in Isaiah, though it occurs frequently in the Chronicles, and is not a word likely to be uncommon or peculiar, so that nothing can be inferred from it. Besides, all this would be as appropriate to the times of Hezekiah as to those of Manasseh. That the prophecy was written before the final downfall of Nineveh, and its capture by the Medes and Chaldians (cir. B.C. 625), will be admitted. The allusions to the Assyrian power imply that this was still unwoven (1, 12; ii, 13, 14, 15; iii, 13-17), the kingdom was at its brightest in the reign of Esarhaddon (B.C. 680-660), who for thirteen years made Babylon the seat of the empire; and this fact would incline us to fix the date of Nahum rather in the reign of his father Sennacherib, for Nineveh alone is contemplated in the destruction threatened to the Assyrian power, and no hint is given that its importance in the kingdom was diminished, as it necessarily would be, by the establishment of another capital. That Palestine was suffering from the effects of Assyrian invasion at the time of Nahum's writing seems probable from the allusions in 1, 1, 12, 13; ii, 2; and the vivid description of the As-syrian chariots, it is probable that such a time as this would be appropriate; and if i, 14 refers to the death of Sennacherib in the house of Nioach, it must have been written before that event. The capti-ure of No Ammon, or Thebes, has not been identified with anything like certainty. It is referred to as of recent occurrence, and it has been conjectured with probability that it was sacked by Sargon in the invasion of Egypt alluded to in Isa. xxi, 1. These circumstances seem to determine the period of the reign of Hezekiah (B.C. 722) as the period before which the prophecy of Nahum could not have been written. The condition of Assyria in the reign of Sennacherib would correspond with the state of things implied in the prophecy; and it is on all accounts most probable that the Assyrians flourished to determine the time of the prophecy. Nahum described the chariots of the Assyrian host, and "the flame of the sword and lightning of the spear" still flashed in the memory of the beleaguered citizens. The arguments in favor of this date, adduced by Eichhorn (in his Einleit.,) supporting the same conclusion reached by Vitringa (Typus Doctr. Proph. p. 37), have not been overthrown by Davidson in his late Introd. to the O. T.; and it may therefore be regarded as measurably acquired by the evidence of modern scholarship. As to the above attempt to fix the date of Nahum's prophecy by comparing parts of it with similar passages in the writings of Isaiah (viz., Nah. iii, 5 with Isa. xxvi, 2, 3; Nah. iii, 7, 10 with Isa. li, 19 sq.; Nah. ii, 1 with Isa. iii, 1, 7; Nah. ii, 9 with Isa. iii, 8), the reference is not clear in these passages, and the resemblance, if alleged, is too close that the one writer must have had the other before him when composing his own oracles; and as it is assumed that Nahum was the copier, and as Isaiah's writing must be placed in the latter part of the reign of Hezekiah, it is concluded that Nahum must have been writing towards the close of the reign or early in the following. But allowing the similarity of the passages, everything else in this argument is mere assumption, any part of which may be reversed with equal probability; and accordingly we find that while Keil and Otto Strauss hold Nahum for the borrower, Delitzsch and Naegelsbach attribute this to Isaiah. The supposed allusion to Sennacherib's invasion in i, 4 has been thought to find support from the words נִכָּה כָּל, which, joined as the accents direct with what precedes them, and rendered, "I will make it [the house of thy gods] thy grave," and may be viewed as referring to the slaughter of Sennacherib in the temple of his deity (Isa. xxxvi, 38). But to this much weight cannot be attached; for, on the one hand, the rendering in the A. V. is quite as likely to be the correct one as that suggested, and, on the other, it by no means follows that when a man's grave is said to be made in any place it means that in that place he is to be murdered.

The results of the above discussion may be briefly summed up thus: that Nahum was a native of Gali-lee; that upon the invasion and depopulation of the ten tribes he escaped into the territory of Judah, and probably to the city of Jerusalem, and witnessed the siege of the city by Sennacherib, and the destruction of the Assyrian host, in the reign of Hezekiah; and that probably soon after that memorable event, which proved "the beginning of the end" of the Assyrian power, and taking occasion from it, the Spirit of prophecy chose him to be the instrument of predicting the final overthrow and destruction of the Assyrian empire—an empire which had been built up by violence and cruel oppression, and which was justly doomed to perish by the extremities of fire and sword. Nahum was a contemporary of Isaiah and Micah.

3. Contents.—As the title "the burden of Nineveh" imports, the prophecy of Nahum is directed against that proud city, and falls into three parts. The first (i) contains the introduction (1-10) and the theme of the prophet's oracle (11-14). The second (ii) sets forth
the calamity which should come upon the Assyrian empire. The third (iii) recapitulates the reasons for the judgments that should be thus inflicted, and announces the certainty of their coming. The whole forms one continuous composition. There is no ground for the distinction which Huet, Kalinousky, Bertheau, and others have maintained, that the third parts of the book were produced at different times.

To descend to details, the prophecy commences with a declaration of the character of Jehovah, "a God jealous and avenging," as exhibited in his dealings with his enemies, and the style and terrible vengeance with which he would visit them (i, 5-6), while to those that trust in him he is "good, a stronghold in the day of trouble" (i, 7), in contrast with the overwhelming flood which shall sweep away his foes (i, 8). The language of the prophet now becomes more special, and points to the destruction which awaited the hosts of Assyria who had just gone up out of Judah (i, 9-11). In the verses that follow the intention of Jehovah is still more fully declared, and addressed first to Judah (i, 12, 13), and then to the monarch of Assyria (i, 14). And now the vision grows more distinct. The messenger of glad tidings, the news of Nineveh's downfall, treads the monarch of Assyria down about the head (i, 15), and proclaims to Judah the accomplishment of her prayers. But round the doomed city gather the destroying armies; "the breaker in pieces" has gone up, and Jehovah musters his hosts to the battle to avenge his people (ii, 1). The prophet's mind in vision sees the burning chariots of fire, the shield of the fierce九eks of the besieging army, the flashing steel scythes of their war-chariots as they are drawn up in battle array, and the quivering cypress-shafts of their spears (ii, 3). The Assyrians hasten to the defence: their chariots rush madly through the streets, and run to and fro like the lightning in the broad west, which glare with their bright armor like torches. But a panic has seized their mighty ones; their ranks are broken as they march, and they hurry to the wall only to see the covered battering-rams of the besiegers ready for the attack (ii, 4, 5). The crisis hastens on with terrible rapidity. The river-gates are broken in, and the royal palace is in the hands of the victors (ii, 6). And then comes the end; the city is taken and carried captive, and her maidens "mown as with the voice of doves," beating their breasts with sorrow (ii, 7). The flight becomes general, and the leaders in vain endeavor to stem the torrent of fugitives (ii, 8). The wealth of the city and its armaments, her treasures, Dr. O. would make them a terror, and the conquered suffer all the horrors that follow the assault and storm (ii, 9, 10). Over the charred and blackened ruins the prophet, as the mouthpiece of Jehovah, exclaims in triumph, "Where is the lair of the lions, the feeding place of the young lions, where walked lion, lioness, lion's whelp, and (i.e. male) [them] astray?" (ii, 11, 12). In reverse of this the downfall of Nineveh was certain, for "behold! I am against thee, saith Jehovah of Hosts" (ii, 13). The vision ends, and the prophet, recalled from the scenes of the future to the realities of the present, collects himself, as it were, for one final outburst of exultation in theiacal anunciation against the Assyrians, not now threatened by her Median and Chaldaean conquerors, but in the full tide of prosperity, the oppressor and corrupter of nations. Mingled with this woe there is no touch of sadness or compassion for her fate; she will fall unpitied and un lamented, and with terrible calmness the prophet pronounces her final doom: "All that hear the breath of thee shall clap the hands over thee; on whom upon whom hath not thy wickedness passed continually?" (iii, 19).

4. The genuineness of this prophecy has never been called in question. The words in the inscription, רָמָה רָמָה, have been subjected to suspicion by some on the ground that, as the proper commencement of the writing follows, they are probably a later addition; but, as Haverick remarks, there is nothing unfit in the arrangement which makes the announcement of the subject precede the announcement of the author, and therefore nothing improbable in the supposition that both parts of the inscription came from the same pen—

5. Style.—As a poet, Nahum occupies a high place in the first rank of Hebrew literature. In proof of this it is only necessary to refer to the opening verses of his prophecy (i, 2-6), and to the magnificent description of the siege and destruction of Nineveh in chap. ii. His style is clear and unadorned, though pregnant and forcible; his diction sonorous and rhythmical, his words re-echoing to the sense (comp. ii, 4; iii, 5). According to Eichhorn, the most striking characteristic of his style is the power of representing several phases of an idea in the briefest sentences, as in his description of God, the conquest of Nineveh, and the destruction of No Ammon. The variety in his manner of presenting ideas discovers much poetical talent in the prophet. The reader of taste and sensibility will be affected by the entire structure of the poem, by the agreeable manner in which the ideas are brought forward, by the flexibility of the expressions, the roundness of his turns, the exquisite outpouring of the fine poetic elegance and delicacy, and the expression of sympathy and greatness, which diffuse themselves over the whole subject.

Some words and forms of words are almost peculiar to Nahum; as, for example, לֵיתָנה לֵיתָנה, in i, 3, occurs only besides in Job ix, 17; יִלְּדוּ דַּעַת, in i, 2, is found only in Josh. xxiv, 19; יִפְּסָל יִפְּסָל, ii, 9 [10], is only found in Job xxiii, 8, and not in the same sense; יִפְּסָל יִפְּסָל, iii, 2, is only found in Judg. v, 22; רִבְּעָה דַּעַת, and יִפְּסָל יִפְּסָל, 3 [4], יִפְּסָל יִפְּסָל, 7 [8], רִבְּעָה דַּעַת, and יִפְּסָל יִפְּסָל, ii, 10 [11], יִפְּסָל יִפְּסָל, 17, and יִפְּסָל יִפְּסָל, iii, 19, do not occur elsewhere.

The unusual form of the pronoun suffix in יִפְּסָל יִפְּסָל, ii, 18 [14], יִפְּסָל יִפְּסָל, iii, 18, are peculiar to Nahum; יִפְּסָל יִפְּסָל, iii, 5, is also found in 1 Kings vii, 86; יִפְּסָל יִפְּסָל, iii, 17, occurs besides only in Amos vii, 1; and the foreign word יִפְּסָל יִפְּסָל, iii, 17, in the slightly different form יִפְּסָל יִפְּסָל, is found only in Jer. ii, 27.

6. Confirmation by History.—We should expect a prophecy so entirely occupied with the overthrow of Nineveh to admit of frequent and useful illustration from the recent literature of the Assyrian monuments. And our expectation is not disappointed. One of Nahum's latest and most accurate critics, Dr. O. shows the use of this newly-opened source in his work, published in 1858, Nahum de Nino Vaticinium explicatus, cx Arizona Monumenta illustrata, etc. His prolegomena, especially in the chapters "De rebus Assyriorum et De indolo Vaticini," are full of new and valuable matter; and in his commentary he frequently quotes and applies to the elucidation of the text the writings of Botta, Layard, Rawlinson, and Bonomi, and thus fully vindicates the truth of a remark made by the last-named author that in the sculptures of Khorsabad and Nimrud "we possess an authentic contemporary comment upon the prophecies." See also Vandercamp, Prophecies relating to Nineveh (Lond. 1867); Breiteneicher, Nineve und Nahum (Munich, 1861). The predictions of the prophet have been remarkably fulfilled.

The city of Nineveh was destroyed about 607 or 606 B.C., or about a century after the prophecy of Nahum was uttered. The recent researches of Dr. Layard in the ruins of Nineveh have shown that the prophecy of Nahum, denouncing, nearly 2500 years ago, the fall of Nineveh. We can but glance at a few of these, and compare them with the words of the prophet. The recently uncovered pavement at the gateway, marked with the rats of the chariot wheels, tallies exactly with Nahum, ii, 2. The celebrated "Prophecy of the woman" presents the man of God, rapt in future times, "the noise of the whip, and the noise of the rattling of the wheels,
NAHUM

and of the pruning horses, and of the bounding war-chariots." The "ivory ornaments, the metal bowls, vases, and scepters, most beautifully embossed and engraved, denoting by the style of sculpture a very advanced stage of civilization," tally with the prophet's description of the "store and glory of the pleasant furniture" (Nah. ii. 2, 3), that is, of mental and material wealth in general, fragile with rust," and their destination in their mutilated condition to the museums of modern nations, recall Nahum iii. 6 and 14: "I will cast my flail upon thee;" "I will make thy grave; I will set thee as a gazng-stock." See Nineveh.

7. Commentaries.—The following are the chief exegeses of this prophecy:

Theophylact, Commentarius (in Opp. vol. iv); Julian of Toledo, Commentarius (in the Bibl. Max. Patr. vol. iii); Biblical, Exegesis (Tigur. 1584, 8vo); Luther,ERNARRATIO (in Opp. iv, 475; also in German, ed. Agricola, 1556); De la Huerga, Commentarius (Lugd. 1568, 1611, 8vo); Chytreus, EXPLICATU (Vitberg. 1566, 8vo; also in Opp. ii, 841); Selenkner, Auslegung [incl. Jun. and Hab.]; (Leips. 1567, 4to); Pintus, Commentarius [incl. Dan. and Lam.]; (Corimb. 1582; Colon. 1582, 4to; Ven. 1583, 4to; Autun, 1595, 8vo, also in Opp.]; Drusius,LECTIONES [incl. Hab. etc.]; (Lugd. 1595, 4to); Gennar, Expositio (Vit. 1585, 4to); Cossio, Expositio (Ven. 1620, 1627, 12mo); Tarnovius, Commentarius (Rost. 1623, 4to); De Quirios, Commentarius [incl. Mal.]; (Hispali, 1623, fol.); Lud. 1623, 4to); Ursinus, Hypomnemata [incl. Obad.]; (Franct. 1652, 8vo); Hafenreffer, Commentarius [incl. Hab.]; (Stuttg. 1659, 4to); Abarban, Commentarius, ed. Preacher (Helms. 1705, 4to); Aben-Ezra, Comment. (Heb. and Lat., ed. Lund, Upsal, 1705, 4to; Lat. only, ed. Stenhagen, Upsal, 1703, 8vo); Van Hoecke, EXPLICATIO [five other minor prohp.]; (Ludig. Bat. 1709, 4to; also in Germ., Frkf. and Lpz. 1710, 4to); Wuld, Meditationes (Franct. 1712, 4to); Kalinski, Observationes in Prophetiam Hosiam, 1743, 4to); Dietrich, Observationes [incl. Jon.]; (Chemnitz, 1780, 8vo); Conz, Erklärung (in Stüdlin's Beiträge, Stuttg. 1786, p. 72 sq.); Allg, Observations (Upsal, 1788, 4to); Wahl, Ubersetzte (in his Magazin [Halle, 1790], iii, 62 sq.); Grimm, Erklärung (Düssel. 1790, 8vo); Greve, Interpretatio; (incl. Hab.); (Amst. 1793, 4to); Svanborg, Notes (Upsal. 1806, 4to); Frühni, CURA (Rost. 1807, 4to); Neumann, Anmerk. (Bresl. 1808, 8vo); Middendorp, Ubersetzte, with Anmerk. by Gurlitt (Hamb. 1808, 8vo); Kreenan, Expositio (Hardev. 1808, 4to); Björn, Vatica. Nah. [incl. Lam.]; (Hafn. 1814, 8vo); Justi, Erklärung (Fran. 1814, 8vo); Platen, Expositio; (Köln. 1817, 4to); Schröder, Anmerkungen [incl. Hab.]; (Hildesb. 1827, 8vo); Rosenmüller, Scholia (Lips. 1827, 8vo); Philipson, Uebers. [incl. Obs.]; (Halle, 1828, 8vo); Höfler, Illustratio (Lips. 1842, 8vo); Edwards, Notes in the Bibliothek, Sacra, 1849, p. 551 sq); Strauss, Nirvare, etc. (in Lat., Lpz. 1853); in Germ. (ib. 1858, 8vo); Breitenheicher, Nirvan und Nath. (Münch, 1861, 8vo); Heineke, Arch. Version. (Münch, 1867, 8vo). See Prophets, Minon.

NAHMON OF GIMSO (the present Jimnau, near Lydda), a rabbi noted for his great exegetical knowledge, was a disciple of Johanan ben-Zachai (q.v.), and one of the most eminent of the Tannaic scribes. He had a school of his own, and is reported as the hero of many wonderful adventures, and even the name of his native place was kagadically interpreted as having been his usual exclamation: "This also intends to benefit" (gar-su ël-lôba). He was severely tried, and, with rabbinical resignation, he viewed his trials as so many consequences of his own hardening the rich burden. Nahum had barely waited; but before he was at leisure to attend to him, the person who asked his help had sunk down from want and exhaustion. In grief for an unkindness which had caused the poor man's death, he invoked blindness upon his eyes, and paralysis upon his hands and feet. These imprecations were soon verified, and Nahum gladly suffered in order to expiate, as he thought, his sin. Accordingly, when his pupils, at the sight of his sufferings, exclaimed, "Alas! what a mental cripple, a spiritual cripple, are we," he replied, "Nay, rather, alas! if ye did not see me so suffering." In theology, Nahum was distinguished as an original thinker, and followed Hillel's (q.v.) method of Biblical interpretation. The latter had laid down a number of rules, the so-called ניסיון (= seven rules), according to which the meaning of the text was to be ascertained. To these exegetical principles Nahum added another, the importance of which, in the history of Rabbinism, called "the rule of extension and restriction" (Riûbûq u-ma'ût), according to which certain articles and prepositions in the text were now stated to serve not only a grammatical purpose, but also to indicate that the obvious meaning of the text required either to be enlarged or else restricted. See Geb. Hodiogenes in Michânah (Leips. 1859), p. 99. (B. P.)

NAÏADS (from Gr. νάιας, ναίας) is the name of the nymphs who figure in Greek and Roman mythology. They presided over fresh waters, and were supposed to inspire those who drank of them with oracular powers and the gift of poetry. They could also restore sick persons to health. They are represented in works of art as beautiful maidens, half-graced, with long hair.

NA'YDUS (Νάιδος, Vulg. Ranaeus), one of the priests, the "sons" of Pabath-Moab, who had taken foreign wives after the captivity (1 Esdr. ix, 31); evidently the Bekaitha (q.v.) of the Heb. text (Exa x, 80).

NAIGON, JACQUES ANDRÉ, a modern French infidel of note, was born at Paris or at Dijon in 1738. He was intended to be an artist, either painter or sculptor, and was afforded all the opportunities to secure him distinction in his profession. But brought in contact with the eminent philosophers of his time, especially with Diderot and Holbach, Naigon was inspired with a love for study, and he soon began to write for the public, at first under a nom-de-plume, and later under his own signature. He only defended superstition and the severe and just attacks of the theological and critical world. He was himself inclined to accept a more substantial philosophy than Diderot and Holbach taught, but by his defence of these wild thinkers he was led away, until he taught and thought as they did. Thus in his ThéoIogie Portative (Lond. and Amsterdam, 1768, 12mo) he defines the soul as an unknown substance, which in a certain way controls our body, but which we can never definitely know. Spirituality he defines as an occult quality, invented by Plato, perfected by Des Cartes, and changed into an article of faith by the theologians. Immortality is not much better treated: "It is essential for the Church that our soul be immortal; as without it we could not very well find employment for the ministers in churches—it would force the clergy to bankruptcy." In the same manner he treats the doctrine of Free Will, and all other theological dogmas. Engaged in the public discussion at Paris in the Encyclopédie Methodique (Dictionnaire des philosophes anciens et modernes [Par. 1791-94, 3 vols. 8vo]), he there incorporated his views, and laid down doctrines clearly evincing a philosophy of fatalism, materialism, and even atheism. He entered the political life, but was not very successful. His works are largely collections of ancient philosophers. He also edited the writings of his friends Dide-
rot and Holbach; and assisted in an edition of Rousseau's and Montaigne's works. See Damiron, Mémoires pour servir à l'histoire de la Philosophie au dix-huitième siècle, vol. ii, pt. viii; Dictionnaire des Sciences philosophiques, vol. iv, i, a. (J. H. W.)

Nail [for fastening] is the rendering of two Heb. words in the A. V.

1. דָּשַׁם, tashelh (from piercing), which usually denotes a (woden) peg, pin, or nail (of any material), as driven into a wall (Exod. xxv, 18; Isa. xxxvii, 18) or more especially a tent-pin driven into the earth by a mallet to fasten the tent (Exod. xxvii, 19; xxxv, 18; xxxvii, 81; Isa. xxxiii, 20; liv, 2). It was one of these pins which Jael used in fastening to the ground the temples of Sisera (Judg. i, 21, 22). Hence to drive a pin or to fasten a nail presents among the Hebrews an image of a fixed dwelling, a firm and stable abode (Isa. xxiii, 23).

This image is still frequent among the Arabs (see Març. p. 597; Beidav. Apud Stalium, p. 518). See Text.

In the passages in Exodus these tabernacle-pins are said to have been of copper (see Lightfoot, Bibl. in Exod. § 42; Joseph. Ant. v, 5, 4); in Judges the material is not mentioned; we should most naturally think of some metal, yet the Sept. uses פֶּסְאָלָאָו, which suggests that it was a wooden pin. A pin or nail is also, by a further application of the metaphor, applied to a prince, on whom the care and welfare of the state depends (Zech. x, 4), where the term פֶּסֶר, corner-stone, is applied to the same person denoted by the word nail. So also Exra ix, 8. All these allusions refer to large nails, or pins, or cramps, used in applications requiring great strength. See Thomas, Land and Book, iii, 149.

2. פָּשֵׁסָר, masamer (a point, only in the plur.; also פָּשֵׁסָר, a point), is applied to ornament and ornamental nails. There is in Eccles. xii, 11 a very significant proverbial application, "The words of the wise are as nails fastened," etc.; that is, "they sink deep into the heart of man." In this passage the figure is generally understood to refer to nails driven into a wall, but which Gibbon understands of the tent-pins above mentioned, whose use for holding fast is contrasted with the use of goads for driving cattle forward, the entire verse in his opinion having reference to pastoral life. The golden nails of the Temple are denoted by this word. We are told that David prepared iron for the nails to be used in building the temple; as the holy oil was plated with gold, the nails also for fastening the plates were probably of gold. Their weight is said to have been fifty shekels, equal to twenty-five ounces, a weight obviously so much too small, unless mere gilding be supposed, for the total weight required, that the Sept. and Vulg. render it as expressing that of each nail, which is equally excessive. To remedy this difficulty, Thienius suggests reading five hundred for fifty shekels (1 Chron. xxiii, 3; 2 Chron. iii, 9; Bertheau, On Chronicles, in Kurzgefl. Handschr.).

Nail, Vulg. palus, is the rendering of פֵּשָׁנָאָא in Ezek. xxvi, 11. In the N. T. we have φίλαξ καὶ παλα- πόσα in speaking of the nails of the Cross (John xxi, 22; Col. ii, 14). See Cross.

Nail [of the finger], פֵּשָׁנָא, teppora, so called from scraping), occurs in Deut. xxii, 12, in connection with the verb פָּשֵׁסָר, 'aazh, "to make," (Sept. περισσώος, Vulg. circumcicio, A. V. "pare," but in marg. "dress," "suffer to grow"), which Gesenius explains "make neat." Much controversy has arisen on the meaning of this passage; one set of interpreters, including Josephus and Philo, regarding the action as indicative of mourning, which other set refers to the deposition of the mourning dress. Some, who would thus belong to the latter class, refer it to the practice of staining the nails with henna. The word aazh, "make," is used both of "dressing," i.e. making clean the feet, and also of "trimming," i.e. combing and making neat the beard, in the case of Mephibosheth (2 Sam. xix, 24). It seems, therefore, on the whole to mean "make suitable" to the particular purpose intended, whatever that may be; unless, as Gesenius thinks, the passage refers to the completion of the female captive's month of seclusion, that purpose being evidently one of mourning—a month's mourning interposed for the purpose of preventing on the one hand too hasty an approach on the part of the captor, and on the other too sudden a transfer to normal feeling in the captive. Following this line of interpretation, the command will stand thus: The captive is to lay aside the "reignment of her captivity," viz. her ordinary dress in which she had been taken captive, and she is to remain in mourning retirement for a month with hair shortened and nails made suitable to the same purpose, thus presenting an appearance of woe to which the nails untrimmed and shortened hair would seem each in their way most suitable (see Job i, 20).

If, on the other hand, we suppose that the shaving the head, etc., indicate the time of retirement completed, we must suppose also a sort of Nazaritic initiation into her new condition, a supposition which is further confirmed by the nature of the command, which, besides the fact that the making, whether paring the nails or letting them grow, is nowhere mentioned as a Nazaritic ceremony, and also that the shaving the head at the end of the month would seem an altogether unsuitable introduction to the condition of a bride. We come, therefore, to the captive's being told that she might get her hair and nails in order at the commencement of the month, and that during that period her nails were to be allowed to grow in token of natural sorrow and consequent personal neglect. See Joseph. Ant. iv, 8-23; Philo, περιπατοῦσα, ch. 14, vol. ii, p. 394 (ed. Mangny); Clemen. Alex. Strom. ii, ch. 18, iii, ch. 11; vol. ii, p. 473 (ed. Potter); Calmet, Patrick, Crit. Sacr. on Deut. xxi, 12; Schleserus, Lex. V. T. περισσώος; Sedleien, De Jur. Nat. v, xiii, p. 644; Harmer, Obs. iv, 104; Wilkinson, Anc. Egi. ii, 845; Lane, M. E. i, 64; Gesenius, Thes. Heb. p. 1075; Michaelis, Laws of Moses, art. 88, vol. i, p. 464 (ed. Smith); Numib. vi, 2, 18. See Pare.

In Jer. xvii, 1 the same Heb. word occurs in the sense of the "point" of a stylus or metallic pen, which was often tidied with admonit or diamond (Pliny. Hist. Nat. xxxvi, 4, 15). See Pdn.

In Dan. iv, 33; vii, 19, the cognate Chald. דֵּשָׁנָא, occurs of the clauses of a bird or beast.

Nail, Nicholas, a French martyr to the Protestant cause, was born at Mains in the first quarter of the 16th century. He was of humble origin, and earned his daily bread on the shoemaker's bench. He was working in Lausanne, Switzerland, when the Reformed doctrines began to gain the ascendancy of the people, and Nail became himself interested, and finally embraced the new views. Determined that his countrymen should share the great blessing he had come to enjoy, he quitte Lausanne for Paris with a pack of books and tracts. In the French capital he was discovered circulating these heretical productions, and was seized by the police Feb. 15, 1562. He had previously confided his views to a few of his friends; but the people who were in circulation these books, because they contained the truth he espoused, he yet refused to make known his friends and assistants even after he had been put to the torture. Refusing also to point out the people who had bought his books or had become his disciples, he was finally tried, sentenced to death, and led to the Place Maubert, from which a crowd of witnesses had passed to heaven in the smoke and flames of the funeral pile. In order to prevent Nail from speaking to any one on the way, a new torture was devised. A large wooden gag was put into his mouth, by which his jaws were burst asunder, and it was forced to pass down his throat. Though his mouth was stopped, by gesticulations and motions, and by lifting his eye heavenward, he still made known his firm trust in the presence of his Saviour.
NAILLAC

383

NAIRONI

As he passed before a hospital on which an image of the Virgin was placed, an effort was made to compel him to show reverence to it by crossing himself and bowing his head, but he turned from it with indignation. This threw the rabble into a wild rage. Having arrived at the place of execution, Nalí was bound with a rope to a roller over the funeral pile, divested of his apparel, and his limbs were broken. Next the entire mass was set on fire with bundles of straw, so that his whole body began to burn. Then he was drawn up and down on the roller over the woodfire, which was burning under him. But he remained true to all his pledges, and was enabled to endure this punishment. In the meantime the executioners, who had been given a Ms. note of the order of the Lord after he began to burn, the string which tied the gag in his mouth having been burned, and his lacquered mouth being again set free. With prayers and praises his spirit passed, from his suffering body into the presence of the Lord. See Hurst, Martyrs to the Tragic Cause, p. 117, 118.

Naillac, Philibert de, the grand-master of the Order of the Knights of St. John of Jerusalem, was born about 1340 of a noble family. But little is known of his personal history. He became master of this order in 1376, and engaged in the Crusades, and was greatly distinguished by his valor and skill in warfare. He was prominently engaged in the battle of Nicopolis, and served the Christian interests by his treaties with the Saracen Emirs. In 1379 he concluded the peace of Egypt, which gave the Christians permission to enclose the Holy Sepulchre at Jerusalem with a wall; to maintain six knights of the Order of St. John within the city, free from all tribute, who should be permitted to carry on the hospitable duties of their profession in favor of all pilgrims led thither by devotion; that Christian slaves might be redeemed, either by purchase or by exchange with a Saracen; and that convents might be maintained in Jerusalem and in the other principal cities of the Holy Land. In 1415 internal dissension threatened the very existence of the Order of St. John. Naillac's wise counsels prevented all disgraceful proceedings; and when he died, in 1421, "he left the fraternity, at whose head he had been placed for so many years, at union with itself, at peace with its neighbors, and in a most flourishing state of prosperity."

See Boissat, Hist. des Chevaliers de St. Jean de Jerusalem; Porter, Knights of Malta, i, 294 sqq. 313. (J. H. W.)

Nails in the Crucifix. In the 13th century are found nails in the foot of the sacred image other without the hypopodium. James de Voragine first mentions the change, which Ayala, bishop of Galicia, attributes to the Albignian heretics. Benedict XIV pronounced the nail preserved in St. Cross, Rome, to be authentic. See Crucifix. On Irish crosses the Saviour's feet are represented tied with a cord, and his arms dropping (Walcott, Sacred Archæol. a v. Croce.

Nain (Gr. Náv; according to Simon, from Heb. נָפָל, nāfāl, 'green pastures'; so written in the Eastern versions of the N. T., but Schwabe, Palest. p. 169, writes נפל, as if from נָפָל, 'gracefulness'), a town (παλαια of Palestine, mentioned only in the N. T. as the place where Jesus raised the widow's son to life (Luke vii, 11-17). Josephus speaks of a Nain, but it was different from this, being situated in the south (War, iv, 9, 4). The site of Nain is described by Jerome as being two miles south of Tiberias, and near Endor (Onomast. s. v. Nain). Eusebius has twelve miles, but the error is probably that of a copyist writing β instead of β. Neither this number, however, nor that of Jerome, is accurate. Photus places it north of Tabor (see Reland, Palest. p. 904). As its name has always been preserved, it was repopulated by the rabbinical and medieval Arals and possibly by travellers up to the present day. It has now dwindled to a mean village called Nein (according to De

Stanley [Dead Sea, i, 75], Nainin, pronounced by the Arals exactly as Nain), which contains remains of very ancient buildings, with a fountain (Tristram, Land of Israel, p. 130). It stands on a bleak, rocky slope, on the northern declivity of Jebel ed-Duby (the "hill Morhe"

of Scripture, and the "Little Hermion" of modern travellers), directly facing Tabor, from which it is four and a half miles distant. It was in this direction our Lord approached, and probably to one or other of those very tombs they were bearing the corpse when he met and arrested the mournful procession (see Thom

son, Land and Book, ii, 158). The situation of Nain is extremely beautiful. At the foot of the slope on which it stands is the plain of Gadara, bounded on the north by the graceful wooded hills of Galilee, over which the snow-capped summits of Hermon and Lebanon appear. See Robinson, Bib. Res. ii, 361; Van de Velde, Syria and Palestine, ii, 382; Stanley, Sinai and Palæ

stine, p. 357; Porter, Hand-book to Syria, p. 358.

Nal'oth (Heb., margin, negahót, נַנְאוֹת; dwellings; text, Ne'ovalót; נְעַוָּלּוֹת, Sept. Na'oth, v. r. Na'oth và de'oth; Vulg. Najoœ); or, more fully, "Nainoth in Ram-

ah," a place in which Samuel and David took refuge together, after the latter had made his escape from the jealous fury of Saul (1 Sam. xix, 18, 19; xx, 22; xx, 1). "Naitoith" occurs both in Heb. and A. V. in 1 Sam. xix, 18 only. The Sept. supplies iv 'Pqad in that verse. The Vulg. adheres to the Hebrew. It is evident from ver. 18 that Naithoth was not actually in Ramah, Samuel's habitual residence, though from the sifl x it must have been near by. In the LXX. (ii, 66) "Naitoith in Kerith" (Kerith) the name becomes a mere appellation, and from an early date has been interpreted to mean the huts or dwellings of a school or college of prophets over which Samuel presided, as Elisha died over those at Gilgal and Jericho. This appears first in the Targum-Jonathan, where for Naithoth we find throughout γηράθων, "the house of instruction," the term which appears in later times to have been regularly applied to the schools of the rabbis. In Jerome, Lec. Palæst. p. 252, 3, and there ver. 20 is rendered, "And they saw the company of scribes singing praises, and Samuel teaching, standing over them," thus introducing the idea of Samuel as a teacher. Jerome, in his notice of this name in the Onomasticon (s. v. Nemoth), refers to his observations thereon in his Hebræorum quærumque gentium (i, 28, 3, 3), but, as we at present possess these books, they contain no reference to Naithoth. Josephus calls it "a certain place named Galbashoth" (Gamshádá), and distinguishes it from Ramah (Ant. vi, 11, 5). R. Isaiah and other Jewish commentators state that Ramah was the name of a hill, and Naithoth of the place upon it. See Ramah.

Naironi, Antonio-Fausto, a Maronite saint, was born about 1532 at Ban, on Mount Lebanon, and was a nephew of Abraham Eschelhenss. Naironi was educated at Parma; and after a voyage to Syria to procure works relative to his Protestant brethren, he became professor of the Syriac language in the College de Sa
dienne in 1666, and occupied this chair until 1694. He died at Rome on Nov. 3, 1707. We have of his works, Officia sanctorum juxta ritum ecclesiam Maronitarum (Rome, 1656, 1666, fol.),—De saluberrima potione catake seu cæte muncypata discursus (Rome, 1671, 12mo; translated into Italian by Fred. Veglini [Rome, 1671] and by Paul Boeck [Milan, 1679], and into French)—Discrétte de origine nonque rei de l'Eglise Maronita, etc. (Rome, 1679, 8vo; a work elucidated by the learned researches of Asseman)—Evocatio fidei catholicae Romana histori-
co-sagistration (Rome, 1694, 8vo), in which is found a large number of curious facts in the civil and religious history of the East. See Hoefer, Nouv. Biol. Gén. & s.v.

Naitore, CHARLES, a French painter and engraver, whose works were mostly on sacred subjects, was born at Niames in 1700. He studied under François-le Moine, and was employed to finish several works left incomplete at the death of that master. Little is recorded of the circumstances of his life. His chief merit seems to have consisted in the correctness of his design; his figures may be called noble and cold. The principal works of Naitore adorn the apartments of the first story of the Chateau Versailles, the Hotel de Soubise, and the chapel of les Enfans Trouvés, at Paris. In 1775 he was appointed director of the French Academy at Rome, which honorable office he filled until 1778. He died, according to Dumans, in 1777. There are a few etchings by Naitore executed from his own designs in a free and spirited manner. Among his works on sacred subjects are The Crucifixion, with Mary Magdalen at the foot of the Cross, The Adoration of the Magi, and the Martyrdom of St. Pered.

Nachman, SAMSON or SIMSON, a Jewish writer noted for his mastery of the Hebrew tongue, and hence surnamed "the Grammarians," flourished about 1240. He was familiar with all his works of the Spanish co-religionists, such as those of Chajug (q.v.), Jona ibn-Ganach (q.v.), Parchon (q.v.), Aben-Ezra (q.v.), and other grammarians, and is the author of a grammatical work entitled הבסטרון, or המִּשְׁמַשִׁים, which discusses the vowel-points and accents. Elias Levita refers to this work of Nachman Sonn in his Masoroth ha-Maasoret, but it has not yet as appeared in print. Excerpts of it, however, have been published in Abibich's Accents Heb'rex, etc. et novis illustr. (Leips. 1713); Deltzsch, in Gotenth. p. 16, 186, 192, 245, 252, comp. First, Bibl. Jud. iii. 16; De Rossi, Dictionarii (2nd transl.), p. 242; Wolf, Bibliotheca Hebraea, i., 1152; ii., 1160; iv., 1008; Geiger, Schismen ein Lexiconographia in Deutschland, in der Wissenschaft, Zeitschrift für Judische Theologie, v. 413-30; Ginsburg, in Levi's Masoroth le-Masoroth (Lon. 1887), p. 257; Kalisch, Hebr. Grammar (Lon. 1860), ii., 29; Zunz, Zur Geschicht u. Literatur, pp. 113, 114. (13.25)

Naked. The Hebrew word יָדוֹת, span, rendered "naked" in our Bibles, means absolute nakedness, such passages as Job 1:21; Eccles. v. 15; Mic. i. 8; Amos ii. 16; but in other places it means one who is ragged or poorly clad (John xxii. 7; Isa. xlvii. 7), in the same sense as γυναῖκες in James ii. 15, which does not indeed differ from a familiar application of the word "naked" among ourselves. A more peculiar and Oriental sense of the word is that in which it is applied to one who has laid aside his loose outer garment, and goes about in his tunic. When, therefore, Saul is described as having lain down "naked" (1 Sam. xix. 24), we are to understand that he had laid aside his flowing outer robe; and it was thus that Isaiah went "naked" and barefoot (xxvi. 19). The use of the word "undress," to denote simply a dress less than that which we consider full and complete, corresponds to this signification of the word. See Dress. This word is also used metaphorically to signify put to shame, stripped of resources, void of success, disdained. Thus in Jer. xlix. 20; they have made Esau bare," etc., signifies the destruction of the Edomites, God having exposed them defenceless to their invaders. The "nakedness of a land" (Gen. xlix. 9) signifies the weak and ruined parts of it where the country lies most open and exposed to danger. "Naked" is also put for discovered, known, manifest. So in Job xxxvi. 6; "Hell is naked before him," is the unseen state of the dead is open to the eyes of God. St. Paul says in the same sense, "Neither is there any creature that is not manifest in his sight; but all things are naked and laid open to the eyes of him with whom we have to do" (Heb. iv. 13). Nakedness also signifies sin or folly. Thus in Gen. iii. 7 it is indicative of sin in general; in Exod. xxxiii. 25; 2 Chron. xxviii. 19; Ezek. xvi, 86, it is put for idolatry; and elsewhere in the Scriptures for all kinds of vice, but idolatry in particular.

Nakir is the name of one of the angels or devouns who attend the dead at burial, according to the belief of the Indian Musulmans. Nokir and Moskir, i.e., these angels are called, attend the body soon after it is interred, set it upright in the grave, and question the soul, which it is believed they have power to recall to the corpse for the sake of examination. The question from the angels is, Who is thy Lord, and who is thy prophet, and what is thy religion? They who can answer in the orthodox formula, "There is no god but God, and Mohammed is his prophet," are dismissed with honor, and their rest is visited with sweet airs from paradise. The unbelievers are beaten with iron maces, and gnawed by dragons, till they fill the cellerries with howlings, which are audible alike to angels and jins, but merely with no end from men, whose nerves might be least equal to the sound, or their hearts more moved to compasion.

Nala is in Hindu mythology the name of a monkey chief, who, according to some authorities, built for Ramayana a bridge from continental India to the island of Ceylon.

Naldí, ANTONIO, an Italian theologian, was born at Faenza towards the close of the 16th century. He was of a noble family, and had embraced religious life among the Thésants, and was distinguished for his learning and piety. He died at Rome in 1645. We have of his works, Questiones praticas in foro inferi orum un frequentes (Bologne, 1610, 1624, 1646, 4to); Resolutions praticas causums conscientiae, in quibus practicae de justicia contractus vivi vulgo mucupaci, et de casibus agitare (Brescia, 1621, 4to); Adnotiones ad varia juris positifica loco (Rome, 1632, fol.; Lyons, 1671, fol.; and in the Corpus juris canonici, Lyons, 1661, 2 vols. 4to); Summa theologica moralia (Brescia, 1629; Bog.); Logica sacra in 4 Books, Parte, a. v.; Mittarelli, De Litteratura Forintana, p. 154.

Naldini, BATTISTA, an Italian painter who devoted himself to religious subjects, was born at Florence in 1587. He first studied under Jacopo Carrucci, called il Pontormo, and afterwards under Angiolo Bronzino. According to Baglioni, he visited Rome during the pontificate of Gregory XIII, and painted several altar-pieces for the churches, among which is a picture of the Bapstism of Christ in La Trinità de Monti, and the Martyrdom of St. John the Baptist in the church of that saint. On returning to Florence he was chosen by Vasari co-adjuror in his works in the Palazzo Vecchio, and retained by him about fourteen years. Vasari makes honorable mention of Naldini even when a young man, and declares him capable of painting indefatigably. Naldini painted many pictures at Florence, especially the Deposition from the Cross and the Purification at S. Maria Novella, praised by Borghini for their judicious composition, correct design, elegant attitudes, beautiful coloring, and excellent perspective. His sketches are criticized by Lanzi as having the knees joint too large, the eyes too widely opened, and generally marked with a certain fierceness; the coloring often characterized by changeable hues. In teaching his scholars, he followed the prevailing method of employing them to design after the chalk drawings of Michael Angelo, and giving them his own finished paintings to copy. He was living in 1590. See Speroni, Biog. Ital. of the Fine Arts, ii. 606.
NALSON

John, a clergyman of the English Church, was born about the year 1688. He became rector of Doddington, and afterwards prebend of Ely. He died in 1696. His chief writings were several historico-political works defending the action of Royalists in their treatment of King Charles I; the principal publication is *An Impartial Collection of the Great Affairs of State from the Beginning of the Scotch Rebellion in 1639 to the Murder of King Charles I*. This work is valuable because of its fairness and truthfulness, and is much used as a reference.

**Valentine**, an Anglican divine, was born in 1641. But little is known of his personal history. He was prebend of York near the opening of the 18th century, and died in 1724. He published shortly before his death *Twenty Sermons* (Lond. 1724, 8vo).

**James**, an English divine, flourished about the middle of the 17th century. He was expelled from the English Church and compelled to flee to Holland in 1622, on pretence of being implicated in what was called Love's Plot, but really because of his non-conformity. He published occasional sermons—1646, 1661, 1664—and is recommended by Baxter for his piety as well as learning. He died in the year 1692. Twenty of his sermons were published after his death (in 1677) by Matthew Poole (q. v.), who commended them highly. See *Gen. Bibb. Dict. s. v.*; *Allibone, Dict. of Brit. and Amer. Authors*, s. v.

**Namaqualand**, an African country lying south of the Orange River, and now absorbed in Cape Colony, is divided into the greater and the lesser. The former comprises all the region north of Cape Colony, extending from the Orange River, lat. 29° 30'; to Walvis Bay, lat. 29°, and stretching inland from the west coast to the Kalihari Desert, comprising an area of about 100,000 square miles. The Little Namaqualand is the territory south of the Orange River, and, though very rich in mineral resources, is a barren-looking country, and with only a few bays, notwithstanding it has a coastline of over one hundred miles. The native tribes perhaps number about 50,000 souls. They are mainly confined to the region called Great Namaqualand, north of the Gariep or Orange River, and the country a few miles south of it, as far as the Kamiesbergen. They are a pastoral people of rather predatory habits, and live under the rule of their chiefs, whose powers, however, are of a very limited nature. Differing from the Bosjesmen Hottentots, the Namaqua are a tall, well-made, active people, although presenting the usual peculiarities of the race, such as the light olive complexion, the oblique eye, and short tufted hair. Both men and women have remarkably small and neat hands and feet. The lower limbs of the women, however, are very thick and ungainly, especially as they advance in years, when they assume a droopish appearance. The Namaquas are less influenced by the surrounding civilization of Europeans and missionaries than the more energetic and civilized Bastard races, who, in point of civilization and appearance, are very little inferior to the ordinary Dutch Boer of Cape Colony. "The Namaquas," says Chapman, "are in many respects a strange people, and one hardly knows what to make of their character and feelings. The missionaries told me as a fact that when once a party were going out on a cattle-lifting expedition, they very innocently asked them to pray for their success" (i, 428). The Namaqua speak a dialect of the Hottentot language, which, however, differs considerably from that used by other tribes of that people. Mission stations of the Rheinisch and Wesleyan societies have been for many years established among them, and in a few localities, near Cape Colony, with considerable success; and the New Testament and some elementary works have been translated into the Namaqua dialect. Many of the southern Namaquas possess wagons and oxen, and are employed in the transport of copper ore from the mines of Little Namaqualand to the shipping port at Hondsckip Bay. A few of the peculiar customs of the Hottentot tribes, described by Kolben nearly 200 years ago, may still be traced among the more remote tribes of the Namaquas; but the constant contact with the Cape Coloniasts, and the efforts of the missionaries, have partially civilized this race, so that an ordinary Hottentot is quite as respectable a savage, or perhaps more so than his Betsouana or Amakosa brethren. Information on Namaqualand may be found in the travels of Moffat, Campbell, Chapman, and Le Vaillant. See *Africa*; *Hottentots*; *Nama*.

**Namaqua**. See *Namaqualand*.

**Name** (Heb. *shem*, W.; Gr. *sýma*). On the names of persons in Oriental countries, and especially in ancient Israel, the following particulars may be noticed. (See *Hauptmann, De Hebræor, Ævaguris Seetig* [Gera, 1757]; *Schwarz, De nominis. V. T. propriis* [Gotl. 1743].)

(1.) A name among the Hebrews was given to the male child at the time of its circumcision, but it is probable that previous to the introduction of that rite the name was given immediately after its birth. All Oriental proper names have a special significance which is more or less obvious, and generally may be ascertained. This meaning is often alluded to or explained in the Old Testament (Gen. xxvii, 86; I Sam. xxv, 25; *Ruth* i, 20). But some have attempted to show that the ex-
plantations given in the Pentateuch of the names of the patriarchs, etc., are not historically correct, on the ground that they are mutually inconsistent, or that they violate the analogies of the language; and refer them to a desire on the part of the writer to interweave the name significantly with the narratives (see Jer. ii. 14, 15; etc.). Though of modern composition, e.g. the English and Germans, have also their meaning, but it is more difficult to discover, as these languages do not preserve the roots in so pure a form as Oriental tongues. In early times they were conferred (by the mother, as Gen. iv. 1, 25; xix. 37 sq.; xxix. 32 sq.; xxx. 18, 20 sq.; Gen. iv. 1; Isa. lix. 19 sq.; etc.). Sometimes, as in Orientals, viii. 6; Eurip. Phoen. 57; yet also by the father. Gen. xvi. 15; xvii. 19; xxxi. 3; Exod. ii. 52; Hosea i. 4 sq.; see Tournem.: Voyage, ii, 434) sometimes in reference to remarkable circumstances preceding or attending the child’s birth, to peculiarities of its bodily constitution, to a wish connected with its future, or as an expression of designation; sometimes borrowed from religion, and in this case applied both as a pious reminiscence and an omen of good. Sometimes the name had a prophetic meaning (Isa. vii. 14; viii. 3; Hosea i. 4, 6, 5; Matt. i. 21; Luke i. 13, 60, 65). In these classes belong many compounded in Hebrew with גֶּזֶג (comp. Hengstengberg, Pent. i. 267 sq.) just as the Assyrian, Aramean, and Phoenician names with Nebu (Nebu), Bel, Baal; the German Gottlieb, Gottlieb; Ehegott, Christlieb, etc.; and the Tyrian names. Among the names in Jos. (in Javari, in Joshua, i. 18 (on which see Hamaker, Miscell. Phoen. p. 219; from Farnam, De cultus doorum ex οὐσοματοτησία ἢ ἐν οἶκῳ. [Aldorfe 1745]). For examples of the first class, see Gen. xxxv. 25 sq.; xxxix. 32 sq.; xxx. 6 sq.; xxxiv. 18; xlii. 51; 1 Sam. ii. 20; iv. 21; comp. Rosenmüller, Morgenl. ii. 191, 192; see also Farnam, in loc.); in Genesis, Com. in Jes. i. 308; Bohlen, Genes. p. 292. Such names take various forms among the Shemitic nations, following in each language the name it applies to God; e.g. Hannibal (חנניאל and John (יווה נ), and Abibal (אָבִי נ) and Abiah (אָבוֹ י) Ezrubal (אָזְרֵבַּל and Azriel (אָזְרִי). See Ludolf, Histor. Eth. iv. 3. See Baalim. The terms of designation are appropriated especially to girls, and are often taken from the names of valued animals and plants (venile, Rachel, a sheep: יֵלֶת, Tamar, palm-tree; יֵלֶת, Ziba, rose; יֵלֶת, Zipporah, sparrow; יֵלֶת, Keizah, cypress). Comp. Hartmann, Pentat. 276 sq. On the transfer of names from animals to children, see Bochart, Hieroz. i. 2, 45; Simons Onomast. p. 16, 280 sq. At a later period, when a sufficient number of words had become proper names by usage, a suitable choice was made among them, or the child took the father’s name (Tobit i. 9; Luke i. 59; Josephus, Ant. xiv. 1, 3; War, v. 13, 2; Euseb. H. E. i. 13, 5), or yet often the grandson of the grandfather’s (1 Sam. xxii. 9; xxiii. 6; xxx. 7; 2 Sam. viii. 17, 178. Euseb. Obscr. i. 176; Simons Onomast. V. T. p. 17; comp. Eustath. Ad Ilid. 581, 4). This was the case also with the Phoenicians (see Gesen. Momom. Phan. p. 100), and is still with the Egyptians (Descrip. de l’Egypte, xxii. 39 sq.), Frieslanders, and Danes. Sometimes that of a highly-esteemned kinsman was taken (comp. Luke i. 61; Lighthill, Hor. Hebr. ad loc.; Rosenmüller, Morgenl. v. 158). In the Roman period we meet with many persons who were named by prefixing Var, יאָר, son, after the Aramean custom, to the names of their fathers; as in the N. T. Bartholomew, Barthe- meus, Barjeseus, Barabba. Many of these were originally only surnames, as in Matt. xvi. 17, but by custom the personal name was entirely dropped (as in Arab., e.g. Barjeseus = Barjemis). In the German, at the birth of a son, put off their own names, and thenceforth bear that of the child, with the prefix Abu, fither, e.g. Abu-Nau- sel; comp. Avrieux, Nachr. ii. 292. According to Ge- nenius (Jo. i. 278), a person in earlier times was sometimes accosted or described as the son of this or that man, in order to disparage him, either because the father was obscure, or because the personal merit of the son thus would be questioned. But, besides, there are many Hebrew names which cannot be explained otherwise than through appellatives; the roots of which, however, have been preserved. These have received proper attention in modern Lexicons. (See Gesenius, Geschichte Hebr. Sprache. On the formation of Hebrew proper names, see Ewald, Ausführlehrb. dcr. Hebr. Spr. p. 491 sq.). It must further be observed that (a) among the later Jews and Jews of the Dispersion, as among the Christians, names were often altered, or otherwise modified in form; e.g. Lazarus for Lazar. This shortening of names in the N. T. has been examined by Winer (Gran. N. T. p. 113 sq. comp. besides J. C. Mylius, Diss. de varietat. V. T. p. 12; Simons Onomast. V. T. p. 12). Aramean names, also, had crept in among those of true Hebrew origin—as Martha, Tabitha, Cephas. (b) After the age of the Seleucidæ, Greek names came into circulation; as Lynicus, 2 Macc. iv. 29; Antipater, 1 Macc. xii. 16; Beremon, Herod (among these must be reckoned Andreu, see Joseph. Ant. xii. 2, 2; although Olshausen [Didd. Comment. i. 321] would refer it to the Hebrew הָרֶוד, to deli- kante); especially those Hebrew names which had been employed in the Greek version of the Bible, e.g. Isaac, דָּוִד, 2 Macc. xii. 19; or Theodotes, Θεόδωρος, 2 Macc. xiv. 19; 3 Macc. i. 4; comp. the Hebrew דַּוְּדֵד, דַּוְּדָד, Nicodemus or Nicolas, Никодим, Никодим, Νικόδημος, comp. דַּוְּדֵד and Menelaus, Μένελαος, comp. דַּוְּדֵד, Josephus, Ant. xii. 5, 1. Instead of these, a Greek name of somewhat similar form and meaning was sometimes used; as Αἰλέους (comp. דְּלְאָו, דְּלְאָו, Ιάσων, etc. Ιάσων, Jesus is also a Hebrew name, approaching a Greek form. See Jesus. (On Ονήσια, Σίμων, Hyrcanus, see Simons Onomast. N. T. p. 152.) The custom thus introduced was confirmed by increasing intercourse with the Greeks, and even some Latin names crept into Judea. The names Philip, Ptolemy, Alexander, etc., were not rare (comp. especially Joseph. Ant. xiv. 10, 22). Jews took their names in various occasions; some, for instance, on emancipation from Roman slavery. Among Egyptian Jews, Greek names were in use still earlier (comp. Philo, ii. 528). (c) Here we find in part the reason why, in later times, some of the Jews bore two names at once; e.g. Johannes Marcus, Jesus Joseph (Josephus, Ant. xii. 5, 1). Other occasions for names were: Bar was prefixed to the name of the father for a sur- name, as Joseph Barsaba; or it was acquired on some special occasion, as Simon Cephas or Peter, Joses Barnabas, Ιωάννης Ιάσων, etc. (comp. also Josephus, War, v. 11, 5), or given to distinguish persons of the same name in one family or neighborhood; a distinction usually made in the Talmud by adding the name of the father, or of a trade or profession; elsewhere by that of one’s residence or birthplace, as Mary Megiddœa, Judas Iscariot. A complete catalogue of all the proper names used by Jesus is given by Hiler, Onomast. Sacer (Tubing. 1700); J. Simon, Onomast. V. T. (Hal. 1741), in connection with his Onomast. N. T. et libri. V. T. poper- pha (ibid. 1762); comp. B. Michaelis, Observat. philol. de nomin. prop. Hebr. (Hal. 1792), and his Diss. nomens quendam pro prp. V. et N. T. ex eiriph. in maximum, etc., versus suorum testimoniis sexui (Hal. 1754); Potte, Syllog. vii, 26 sq. There is a useful catalogue of Phoenician and Carthaginian proper names in Gesenius, Monumenta Phoen. p. 395 sq. (2) The name was naturally given for the most part by the parents, but sometimes a number of their kins- persons (e.g. Barjosephus) would adopt the same name. After Ruth iv. 17; Luke i. 59. Not seldom in the course of life this was changed for a new name which was full of significance among those who gave it; or was at first.
added to the original name, and gradually took its place. The latter happened with Cephas (Peter) and Barnabas. But princes often changed their names on their accession to the throne, as the popes do now (2 Kings xxiii, 34; xxiv, 17); comp. Joseph. Ant. xvi, 9, 4; Jewish Sects, 250. But, Ludolf, Hist. Ezech., Paulsen, Regner. d. Morgenl. p. 78. This was done even in the case of private persons on entering upon public duties of importance. See Numb. xiii, 16; comp. John iv, 42; Acts iv, 36. This is still customary with monks on taking the vows of cloister life. To this head must be referred also the incident in 2 Sam. xii, 25, where the prophet Nathan, on assuming the charge of Solomon's education, gave him the name Jederiah. So in reference to important epochs in life (Gen. xxxiii, 28; comp. xvii, 5, 15; Judg. vi, 82). The appellation Bo- anerges, which Jesus gave to James and John (Matt. iii, 17), seems not to have been a permanent name, but simply the expression of an opinion as to their talents and disposition. In Gen. xli, 45; Dan. i, 7; v, 12, the change of name takes place, not so much in reference to the change of circumstances or occupation as because Joseph and Daniel were in lands where their former Hebrew names were not understood and not readily pronounced. On the change of Saul's name to Paul, see Paul. Comp. Harm. Observ. iii, 368; J. H. Sturt, De mutatione nomin. sacra et profana (Goth. 1785), iii; 4; Hackett, Illustr. Script. p. 88; Thomson, Land and Book, i, 179; Nödeke, Hebr. u. Arab. Eigennamen, in the Zeitschr. d. deutsch. morgenl. Gelehrth. 1861, p. 906. See Proper Names.

Name of God. By this term we are to understand, 1, God himself (Psa. xx, 1); 2, his titles peculiar to himself (Exod. iii, 13, 14); 3, his word (Psa. v, 11; Acts ix, 15); 4, his works (Psa. viii, 1); 5, his worship (Exod. xx, 24); 6, his perfections and excellences (Exod. xxxiv, 6; John xvii, 26). The properties or qualities of this name are, 1, an ever-existent, 2, an infinite, 3, a transcendent and incomparable (Rev. xix, 16); 4, powerful (Phil. ii, 10); 5, holy and revered (Psa. cxxi, 9); 5, awful to the wicked; 6, perpetual (Isa. iv, 13). See Hannam, Anal. Comp. p. 20.

Name. See LEOPARD.

Names, CHRISTIAN. The modern practice of giving names at baptism is most probably in accordance with primitive usage, and might have been adopted by the early Christians as a sign of their children when they circumcised them. No mention of such a practice is made by the writers of the New Testament, or by the church fathers, Justin Martyr, Tertullian, Origen, Cyprian, or by any of the early ecclesiastical writers. In fact, we find that many of these writers, and others, such as Cyprian, Ambrose, Augustine, and Gregory, retained their original names after they had received adult baptism. There are, however, numerous instances of persons receiving new names at their baptism; and it appears that it was customary to register the names of all candidates, when they were received as catechumens, in the register of the church, and those of their sponsors also. The Council of Elagabala giving its practice on James ii, 7, compared with 1 Peter iv, 15, required that the name of the person to be baptized should have some reference to the Christian religion, as some Christian virtue; and in accordance with such a purpose seems to have been the practice of the early Christians of Rome, whose names, as recorded on the marble slabs of the Catacombs, appear beautifully and designately expressive of Christian sentiment or character (see Withrow, Catacombs of Rome, p. 454, 457). St. Chrysostom advised the Christians of his day that the names ought to refer to some holy persons; and the Council of Trent, in its various provisions for baptism, advised that the name given to the baptized should be taken from some saint (Barnum's Romanisms, p. 450). The Council of Nice forbade the use of names of heathen gods (comp. Bate's Christ. Antiquities); and the Church of England, in the 16th century, forbade all names of heathen origin (Soames, Ethikathethm Religious History, p. 39). "Of old," says Hart (Excl. Records), "the bishop used to pronounce the person's name at the time of confirmation; and if it was desirable that the name given at baptism should be altered, it might be altered on the bishop pronouncing a new name when he administered the rite. This custom was continued in our reformed liturgy till the last revision in the time of king Charles II."

Names of CHRISTIANS, in early ages, are manifold, besides those found in the N. T. Thus the Church fathers used various appellations in describing Christians: Catholic, for while the Church remained one and undivided was properly called Catholicos, the Great, Eusebius, Hist. Ecclesiast., men of the Church; Dogmatists, men of the doctrine; Gnostics, men of knowledge. The names of pro- heretic and derision heaped upon Christians were almost endless. The following are of importance in illustrating the condition of the primitive Church: Jesus, for at first they were regarded merely as a Jewish sect; Naz- arenus, always used in a bad sense; Gallus, a name used by Julian the Apostate, who died with these words on his lips, "Victor, O Gallus;" Greeks, for the ancient Romans this was a term expressive of suspicion and contempt: Magicians, Sibyllists, from their being charged with interpreting the Heb. and Chal. proph- eties, from the fogots with which fires were kindled around martyrs at the stake: Semuza, from the stake to which they were bound; Parabolisti, from their being exposed to wild beasts; BisaSavaro, self-mur- derser, because of their fearlessness of death; Avar, atheistus; Neuartoi, new lights; Sarapostoloi, wor- shipers of the cross; Plautianos, praepositus homines, pastores, men of the race of Plautus, bakers (Plautus is said to have hired himself to a baker to grind in his mill); Anaxarii, worshipers of an ass; Abogetii, Cre- dulii, Patai, Hebreos,伊拉克, Imperiti, Lucifuge, Simulacra, Stulti, Stupendi, etc.

Namea (Nama). The last act of Antiochus Epiphanes was his attempt to plunder the temple of Namea at Elymais, which had been enriched by the gifts and trophies of Alexander the Great (1 Macc. vi, 1-4; 2 Macc. i, 13-16). The Persian god Namea, called also Amonitas (Avari), Strabo, xv, p. 785, is apparently the Moon goddess, of whom the Greek Arte- mia was the nearest representative in Polybius (quoted by Josephus, Ant. xii, 9). Beyer calls her the "Ely- maenus Venus" (ad Joh. Selden, etc. addit. p. 345), and some have identified Namea with Meni (q. v.), and both with the planet Venus, the star of luck, called by the Syrians Name, and in Zend Nakhid, or Anakht. See Diocletian, xx, found in 1852 near the Mesiani with the inscription NANAIA, and on the reverse a figure with nimbus and lotus-flower (Movers, Phron. i, 626). It is probable that Namea is identical with the deity named by Strabo (xi, p. 532) as the nu- men patrium of the Persians, who was also honored by the Medes, Armenians, and in many districts of Asia Minor. Other forms of the name are Arrai, given by Strabo, Aivai by Polybius, Aiaric by Plutarch, and Towsai by Clemens Alexandrinus, with which last the variations of some MSS. of Strabo correspond. In consequence of a confusion between the Greek and Eastern mythologies, Namea has been identified with Artemis and Aphrodite, the probability being that she corresponds with the Tauric or Ephesian Artemis, who was invested with the attributes of Aphrodite, and represented the productive power of nature. In this case some weight may be allowed to the conjecture that the desire of the Babylonians expressed in Dan. xi, 31, was the same as the goddess Namea. "This female deity," Stuart remarks, "under different names, was worshipped in Africa, Syria, Phoenicia, Cyprus, Greece, Rome, Babylon, Persia, and other countries. The Mylitta (= Heb. מֵלִיתָא, generatrix) of the East was the Venus of the West, the Neth of Egypt, the Astarte of the Syrians,
the Anais or Anaïta of the Armenians, all uniting in the worship of the power which represented maternal productiveness... Antiochus, it seems, paid little or no regard to this idol! (Commentary on Dan. ad loc.)

In 2 Macc. ix. 1, 2, there appears to be a different account of the same sacrilegious attempt of Antiochus, but the scene of the event is in the place of Peirepsia, "the city of the Persians," where there might well have been a temple to the national deity. But Grimm considers it far more probable that it was an Elamite temple which excited the cupidity of the king. See Genevius, Jesuïti, iii, 837, and Grimm's Commentar in the Kurgiyn: Handb. ad loc.

Nanni, John, an Anglican clergyman, flourished in the early part of this century. He was educated at Oxford, and became fellow of Worcester College. He then took holy orders, and was made rector of Old Romney. Later he became master of the grammar-school at Ashford, Kent. He died after 1816. He published Sermons on various subjects (1807, 8vo) — A Letter from a Country Clergyman to his Parishioners, on the Arguments and Practices of some of the Modern Dissenters (1809, 8vo) — An Address to the Members of the Church of England (1811, 8vo). See Dict. of Living Authors, s. v.

Nandi is in Hindî mythology the name of a white bull, regarded as the vehicle of Siva (q. v.).

Nanian Manuscript (Codex Nanianus, designated as U of the Gospels, now in the Library of St. Mark, Venice, where it is numbered I, viii), so called from a former possessor, is an uncial codex of the 9th or 10th century, containing the four Gospels, carefully and luxuriously written in two columns of twenty-one lines each on a 4to page, with ornaments in gold and colors. It has the Eusebian canons in the margin. It accords with the Alexandrine recension. Münter first sent some extracts from it to Birch, who used them for his edition. Tischendorf collated the MS. in 1845, and Tregelles in 1848, and they compared their work for mutual correction at Leipzig. See Scrivener, Introduct., p. 117; Tregelles, in Horne's Introduct. iv, 209. See Manuscripts, Biblical.

NANNI, Giovanni Maria, an Italian composer, was born about 1540 at Vallerano. He studied harmony in the school of Goudimel with Palestina. From 1571 to 1573 he was director of the chapel in the church of Sainte Mary, and in 1577 he entered the college of singers in the pontifical chapel. He was director of a school in composition, which was the first of its kind established at Rome by an Italian. According to M. Fétis, this master is to be regarded as one of the most learned men of the Roman school, and his productions deserve to be placed immediately after those of Palestina. Several of his motets are still sung, among others at Christmas matins a Hodie nobis colorum rex, which is truly beautiful. He died at Rome March 11, 1607. He published, Motetti (Venice, 1578, 4to, 2 books) — Madrigali a cinque voci (ibid. 1579-1586, 4 vols. 4to, 4 books) — Cansonnine a tre voci (ibid. 1587, 4to). Many fragments of his scattered through several collections are still known; and in manuscript there are fugues, litanies, masses, psalms, and a treatise on counterpoint. His second brother, Giovanni, who was confessor to Cardinal Gran- di, was also chapel-master at Rome. He was among the first to abandon the old style for new music with organ accompaniment. To him we owe, Magrignali (Venice and Rome, 1588-1612, 3 parts, 4to) — Motetti (Rome, 1608-1618, 4 parts, 4to) — Salmi (ibid. 1620, 4to). See Hoefer, Nouv. Biog. Générale, s. v.

Nanni di Baccio Bigio, a Florentine sculptor and architect, lived in the first part of the 16th century. He studied sculpture under Raffaella de Monteluphe, and produced the statue of pope Clement VII in the Minerva at Rome, and a good copy of Michael Angelo's Pietà, which he executed, it is said, under his direction for the church of the Madonna dell' Anima. After having studied architecture under Leonardo da Vinci, he was employed upon St. Peter's Church by Antonio de San-Gallo. It is known that Michael Angelo, succeeding San-Gallo, commenced by destroying all that his predecessor had done, discharging all those who had worked under his orders. Hence the hatred that Nanni bore to the prince of the Renaissance school. Dec. Gherini says, "The Duce has left no work of his own to assure him a distinguished place among the architects of his time, and perhaps he would have deserved one in the history of architecture if his rival, whom he twice overreached by intrigue, had not given him a kind of celebrity. Michael Angelo having been commissioned to restore the bridge Santa-Maria over the Tiber, Nanni took the work from him, and accomplished it so that at the first inundation the bridge was carried away. Afterwards he succeeded in joining Michael Angelo in the work upon St. Peter's. Michael Angelo protested with his usual vivacity, and proved the ignorance of Nanni, who says Vasari, was dismissed under disgrace. Several considerable edifices of Rome have been built after his designs, particularly the palaces Ricci and Salinari. See Hoefer, Nouv. Biog. Générale, s. v.

Nanni, Girolamo, a Roman painter of religious subjects, called "Il Poco e Buono," flourished about 1540. His talents were extraordinary, and he deserved little notice, except for his studious disposition and slowness of execution. He was employed by Sixtus V in several considerable works, and whenever requested by the director to hasten operations, he always answered "poco e buono" (little and good), which expression gained him his surname. There are a number of his pictures at Rome, among which are the Annunciation in the church of the Madonna dell' Anima, and two subjects from the life of St. Bonaventura in St. Bartolomeo dell' Isola.

NANOK or NAMUK, the founder of the sect of the Seikhs, which has now grown into a powerful nation, was originally a Hindî of the Khitore caste, and was born, in 1469, at Talawandy (now called Khuyvore), a small village of Lahore, Hindostan. He is said to have travelled through most of the countries in India, and even into Persia and Arabia, preaching his doctrines in peace, and preserving an unaffected and holy character. He died at Rawra, a village to the north of Lahore, in 1589. The unity, omniscience, and omnipotence of God were some of the principal tenets taught by Nanok. Not less than 100,000 persons in different countries adopted the tenets of Nanok before his decease, and considered him as their guide. See Seikhs.

Nantes, Council of. Two important ecclesiastical assemblies were held in the city of Nantes, France, besides those of the Huguenots (q. v.). The first Church council was held about the year 1127, under the count
Conon; Hildibrand, archbishop of Tours, presiding. It was ruled that children by an incestuous marriage should have no more rights than bastards and that the children of priests should not receive holy orders except they should first have taken monastic vows. Anathema was pronounced against those who plundered shipwrecked property (Conc. tom. x, p. 918). A second Council was held there in 1294; Vincent, archbishop of Tournai, presided. Simony and usury were regulated. The most important (5) forbids the number of monks in any priory or abbey to be diminished (5) to set more than two dikes before the bishop in visitation, and orders that if more have been prepared, (5) no one shall be given to the poor; (6) forbids pluralities; (7) forbids, save in extraordinary case, to demand toll of the clergy (Conc. tom. xi, p. 826).

Nantes, Edict of, is the name of a famous decree published by Henry IV of France, April 13, 1588, guaranteeing to his Protestant subjects the liberty of serving God according to the dictates of their conscience, and security for the enjoyment of their civil rights and privileges. The decree had been made necessary by many causes, the most important of which was Henry's own defection from the Protestant faith, and probable consequent alliance with the Romanists against those he once loved. See Huguenots. There can be no doubt that Henry IV simply left the Protestant fold to secure the protection of Rome and its allies for his throne and realm. His own political actions after apostasy revealed such a cause. (See, however, for a defense of this king's apostasy, Jervis, Hist. of the Church of France, 1, 199 sq.) Over a Romanist, he determined for the sake of pleasing the papal host to do all in his power to weaken the Huguenots, and thus indirectly largely assisted their persecution. Yet though Henry had quitted the Protestants in order to strengthen himself, he had still to learn that a great source of trouble and perplexity would come to him from those he had considered too weak to be worth his friendship or even notice. When suddenly forced to declare war against Spain, Henry found himself deprived of the support and aid of some of his most valuable citizens. They were Protestants, and after 1584, when the truce for hostilities had expired, and no guarantee as to their future had been granted them, they had declared themselves "a state within the state." They would only hold their own strongholds, and refused to take up arms in defence of a realm that failed to afford them the protection to which their citizenship entitled them. Even Romanists saw the folly of the king's course, and propositions were finally made to renew the edict of Nantes (1568). The old Grand Council (1591), which had never yet taken effect because of the opposition of Parliament. The Reformed demanded more. In 1597 a meeting was called at Loudun to effect a reconciliation. It failed to bring about the much-desired result. Another meeting was called at Vendôme, but it also failed; for the Protestants feared the direct influence of the court, which was in the immediate vicinity, and the meeting was adjourned to Saumur. By the close of 1597, however, the different parties came to an understanding. France had been successful. Spain was in favor of peace, and in the hour of prosperity Henry was inclined to grant favors. The result was an agreement for the edict; and on the same day on which the peace with Spain was settled by the signature of the king, the edict obtained the king's approval and hand and seal (May 2, 1598). It was in reality a new confirmation of former treaties between the French crown and the Protestants, and important clauses, including law and order, were recognized. The verdicts against them were erased from the rolls of the courts, and their unlimited liberty of conscience was recognized. The preamble to this most important document, the Magna Charta of Protestant liberty in France, specifies, curiously enough, as the royal motive for issuing it, the necessity of completely and securely re-establishing the Catholic religion in those localities where it had been abolished during the late troubles; viz. Béarn, La Rochelle, Nîmes, Montauban, etc. Now that it had been restored, the king felt it his duty to make provisions for the public worship and service of God among all classes of his subjects; and if it was impossible at present that all could be brought to agree in one and the same external form of worship, at all events they should be uniformly governed by what the church had decreed, and such regulations might be adopted as should obviate all danger of public disturbance or collision. Accordingly he had determined to enact and promulgate a law on this subject—universal, distinct, positive, and absolute—a perpetual and irrevocable edict; and he prayed God that his subjects, whom he desired to see in the same quiet, in the same guarantee of their union and tranquillity, and of the establishment of the French empire in its ancient power and splendor. Then follow the enacting clauses, comprised in ninety-two articles. Those who professed the so-called Reformed religion were to enjoy henceforth full and complete liberty of conscience in the exercise of their public worship throughout the realm of France, though not without certain restrictions. All seigneurs possessing the right of haute justice might assemble for worship with their families, their tenants, and others they chose to invite; landowners of a lower estate might hold meetings in their houses provided there were not more than thirty persons. Huguenots were to be freely admitted to all colleges, schools, and hospitals; they might found, endow, and maintain educational and charitable institutions; and their religious books might be published in all places where their worship was authorized. They were to be eligible to all public employments on equal terms with Catholics, and on accepting office were not to be bound to take any oaths, or to attend any ceremonies repugnant to their conscience. A new court, called the Chambre de l'Édit, was instituted in the Parliament of Paris, composed of a president and sixteen councillors, of whom one, or two at the most, were to be Protestants. Other similar courts were established in Guérande, Languedoc, and Dauphiné. These were to take cognizance of all cases arising between Protestants and Catholics. Besides the privilege granted to the holders of fiefs, the Reformed worship was legalized in one town or village in every bailiwick throughout France. In certain specified places, however, it was altogether prohibited: at the court or residence of the sovereign for the time being; at Paris, and within a radius of five leagues round the capital; and in all military camps, with the exception of the personal quarters of a Protestant general. It was also excluded from the towns of Châlons, Rheims, Beauvais, Vermandois, Compiègne, Beauvais, Soissons, Blois, Nevers, Bourges, Nîmes, Montpellier, Grenoble, Lectoure, Niort, etc. The expense of maintaining the Huguenot garrisons was to be defrayed by a royal grant of 80,000 crowns per annum. From this period the Reformers or Huguenots (who then counted 750 churches) had a legal existence in France. The edict was, however, crushed by the mighty despotism of Richelieu—
NAPHTALI

Gives it an allusion at once to the situation of the tribe at the very apex of the country, to the heroes who towered at the head of the tribe, and to the lofty mountains on which they dwelt. It is an epithet of underranged, patriarchal and republican, and to the interpretations of the best Jewish writers (Bochart, l.c.). The present reading, too, when thoughtfully considered, is as appropriate as the other. This, like the other blessings of the patriarch, was intended to shadow forth under poetical imagery the future character and destiny of the tribe, for the blessing is a kind of prayer—"and a gracious spirit,"—timid and distrustful of its own powers, swift of foot to elude its enemies; but when brought to bay fierce and strong to defend its life. These were the qualities shown by Naphtali. They left several of their cities in the hands of the Canaanites (Judg. i. 33). They were not confident to fight alone, but when assailed they made a noble defence (Judg. v. 18), and united with others in pursuit of a flying foe (v. 35). Their want of self-confidence was chiefly shown in the case of Barak; and then, too, they displayed in the end devotion and unrestrained love to God. (See Nahum, iii. 14.) In every sense this "gives goodly words." The tribe was to be famous for the beauty of its language. It probably possessed poets and writers whose names have not come down to us. We have one noble ode ascribed in part at least to a Naphtalite (Judg. v. 1. See Kalisch, On Gen. xlix. 21).

During the sojourn in Egypt Naphtali increased with wonderful rapidity. Four sons went down with their father and Jacob; and at the exodus the adult males numbered 53,400 (Numb. i. 46). It thus held exactly the middle position in the nation, having five above it in numbers, and six below. But when the borders of the Promised Land were reached its numbers were reduced to 45,400, with four only below it in the scale, one of the four being Ephraim (Numb. xxvi. 48-50; comp. 37). The leader of the tribe at Sinai was Ahira ben-Enan (Numb. ii. 29); and at Shiloh, Pedahel ben-Annihud (xxvi. 28, 29). Among the spies its representative was Nahbi ben-Yephbi (xiii. 14).

During the wilderness Naphtali occupied a position on the north of the sacred tent with Dan, and also with another tribe, which, though not originally so intimately connected, became afterwards his immediate neighbor—Asher (Numb. ii. 25-31). The three formed the "camp of Dan," and their children according to the tradition of the heathen were a serpent or basilisk, with the motto, "Return, O Jehovah, unto the many thousands of Israel" (Targ. Psuedojon. on Numb. ii. 25).

Jacob's blessing had special reference to the character and achievements of the tribe; that of Moses to the nature of its territory. O Naphthali is "dealt with favor, and full with the blessing of the Lord: possess thou the west and the south" (Deut. xxx. 23). A more literal and more accurate rendering of the Hebrew would be, "Naphthali, replete with favors, and full of the blessings of Jehovah; possess thou the sea and Doram." The word דָּרָם, which in the A. V. is translated "west," evidently means "the sea," that is, the sea of Galilee, which lay partly in the territory of Naphtali. The Hebrew term מְדָר, Doram, ("a circuit," from the root מַדַּר, מַדַּר, "to go round," see Gesenius, Todaerus, s. v.), is most probably a proper name equivalent to Galil ("a circuit," or Galilee, the name given in Josh. xx. 7, xxxi. 32, and elsewhere, to a district amid the mountains of Naphtali [see Galilee], of which Doram may have been the older appellation. "The sea and Doram" would thus

"Naphthali is a towering Terebinth: He hath a goodly crest, VI.—27*
singly the region by the Lake of Galilee and the mountains to the north of it. Both the Sept. and Vulgate render θαθον τον χελαθη (see also the Chaldean rabbi Salomon, Bochart, Ainsworth, Montanus, and others). The possession was allotted to Naphtali as described in Josh. xix, 32-39. "The lot of this tribe was not drawn till the last but one. The two portions then remaining unappropriated were the noble but remote district which lay between the strip of coast-land already allotted to Asher and the upper part of the Jordan, and the little canyon or corner, more central, but in every other respect far inferior, which projected from the territory of Judah into the country of the Philistines, and formed the "marches" between those two never-tiring combatants. Naphtali chose the former of these, leaving the latter to the Danites, a large number of whom shortly followed their relatives to their home in the more remote but undisturbed north, and thus testified to the wisdom of Naphtali's selection. The territory thus appropriated was enclosed on three sides by those of other tribes. It lay at the northeastern angle of Palestine. On the east the tribe was bounded by the Jordan and the lakes of Merom and Galilee; on the south by Zebalon; on the west by Asher, and on the north apparently by the river Leontes. Hammath was one of its cities, and it has been satisfactorily identified with the ruins around the warm springs a mile south of Tiberias. Consequently, to Naphtali belonged the whole western shore of the Sea of Galilee. See Tribe. Naphtali possessed a greater variety of soil, scenery, and climate than any of the other tribes. Its northern portions are the highlands of Palestine. The sublimes ravine of the Leontes separates its mountains from the chain of Lebanon, of which, however, they may be regarded as a prolongation. The scenery is here rich and beautiful. The summit of the range is broad, presenting an expanse of undulating table-land, ornamented with broad belts and irregular clumps of evergreen oak, and having here and there the little upland plains, covered with grasses, and bordered with thickets of arbutus and hawthorn. In the centre of this park-like region lie the ruined site of the sanctuary of the tribe, the northern city of refuge, Kadesh-Naphtali. The ridge rises gradually towards the south, and culminates at Safed, which has an elevation above the immediate foot of the hills of about 1,200 feet, a few miles westward, are one thousand feet higher, and are the loveliest points in Western Palestine (see Van de Velde, Memoir, p. 177). On the western brow of the ridge the tribes of Asher and Naphtali joined, the former having allotted to it the western slopes and the plain of Phœnicia (Josh. xix, 34-39); while on the east the mountains of Naphtali break abruptly down in gray cliffs and wooded slopes into the rich valley of the Jordan. On the north brow of these slopes stands the massive castle of Hethn, probably the ancient Beth-Rehob; and twelve miles south of it, commanding the waters of Merom, are the ruins of Kapheth, which may perhaps mark the site of the capital of the northern Canaanites—Hazor. The Jordan valley, though soft, and in places marshy, is extremely fertile. Here the people of Sidon established at an early period an agricultural colony to supply their city with grain and fruits. The region of "the circuit," around Kadesh was anciently called, a name subsequently extended to the whole of Northern Palestine; and as a large number of for- eigners settled among the mountains—descendants of the Canaanites, and others from Phœnicia and Syria—it was called "Galilee of the Gentiles." See GALLI- EE. According to Josephus (Ant. v, i, 29), the eastern side of the tribe reached as far as Damascus; but of this—though not impossible in the early times of the nation and before the rise of the Syrian monarchy—there is no indication in the Bible. The question was recently discussed in the Journal of Sacred and Classical Philology by Thrupe and Trevelyan (Nos. for 1855, 1856), who both agree that the area of a much greater extent than at present in that direction than has usually been supposed; but their arguments have not sufficed to convince Ewald, who reviews them in his eighth Jahrbuch, and who very justly thinks that the statement of Josephus ought not to be pressed. The southern section of Naphtali was the garden of Palestine. The little plains along the shore of the Sea of Galilee, and the vales that run up into the mountains, are of unrivilled fertility. Josephus describes the plain on the shore of the lake, then called Gennesaret, as an earthly paradise, where the choicest fruits grew luxuriantly, and where eternal spring reigned. His words are not much exaggerated; for now, though more a wilderness than a paradise, its surpassing richness is apparent. The shore is lined with a wide border of oleander; behind this is a tangled thicket of the lote tree; and here and there are clumps of dwarf palms. The plain beyond, except the few spots cultivated by the hermits, is covered with a great thicket of their purple thistles (Josephus, War, iii, 10, 8; Robinson, Bib. Ren. ii, 492). Thus Naphtali had a communication with the Sea of Galilee, the rich district of the Ard el-Huleh and the Merj Aytn, and all the splendidly watered country about Banias and Hasbaya, the springs of Jordan. But the capabilities of these plains and of the access to the lake, which at a later period raised Galilee and Gennesareth to so high a pitch of crowded and busy prosperity, were not destined to be developed while they were in the keeping of the tribe of Naphtali. It was the mountainous country ("Mount Naphtali," Josh. xx, 7), which formed the last house of their will, and never impressed or brought out the qualities for which Naphtali was remarkable at the one remarkable period of its history. This district, the modern Belad-Besharrah, or "land of good tidings," comprises some of the most beautiful scenery and some of the most fertile soil in Palestine (Porter, p. 288), forests surpassing those of the renowned Carmel itself (Van de Velde, i, 288); as

Map of the Tribe of Naphtali.
rich in noble and ever-varying prospects as any country in the world (ii, 407). As it is thus described by one of the few travellers who have crossed its mountains and descended into its ravines, so it was at that time of the Christian era, "the soil," says Josephus (War, iii, 3, 2), "universally rich and productive; full of plantations of trees of all sorts; so fertile as to invite the most slothful to cultivate it."

The following is a list of all the localities in the tribe, with their probable identification:

Three of the towns of Naphtali were allotted to the Gershonite Levites: Kadesh (already called Kedesh-in-Galilee), Hammath-dor, and Kartan. Of these, the first was a city of refuge (Josh. xv, 7; xxvi, 32). It should be observed that in the list of fortified towns at Josh. xix, 35-38 only sixteen cities are enumerated (or but thirteen if we join as one the names not connected by the conjunction), whereas the sum calls for nineteen. The difference is probably to be made up by including such of those mentioned in the preceding verses as lay within the territory of the tribe and had walls. The enumeration, like the rest in this and the adjoining chapters, is not exhaustive (see Kell, ad loc.).

Naphtali, on account of its position, was a great measure isolated from the Israelitish kingdoms. Yet it had its share in those incursions and molestations by the surrounding heathen which the common lot of all the tribes (Judah perhaps alone excepted) during the first centuries after the conquest. One of these, apparently the severest struggle of all, fell with special violence on the north of the country, and the leader by whom the invasion was repelled—Barak of Kedesh-Naphtali—was the one great hero whom Naphtali is recorded to have produced. How gigantic were the efforts by which these heroic mountain-savers saved their darling highlands from the swarms of Canaanites who followed Judah, and saved good the position which they achieved in the eyes of the whole nation, may be gathered from the narrative of the war in Judg. iv, and still more from the expressions of the triumphal song in which Deborah, the prophetess of Ephraim, immortalized the victors and branded their relentless countrymen with everlasting infamy. Gilead and Reuben lingered beyond the Jordan among their flocks; Dan and Asher preferred the luxurious calm of their hot lowlands to the free air and fierce strife of the mountains; Issachar, with characteristic sluggishness seems to have moved slowly if he moved at all; but Zebulun and Naphtali—and the cities of their nation, highlands, devoted themselves to death, even to an extravagant pitch of heroism and self-devotion (Judg. v, 18):

"Zebulun are a people that threw away their lives even unto death—And Naphtali, on the high places of the field."

Naphtali was one of Solomon's comissionariats districts, under the charge of his son-in-law Ahimaz; who with his wife Athaliah, was preserved in retirement at Philistia, not less enlivened that remote and rural locality by a minia-
ture of the court of his august father-in-law held at Safed or Kedesh, or wherever his residence may have been (1 Kings iv, 15). Here he doubtless watched the progress of the unwonted new district presented to Solomon by Hiram—twenty cities of Cabul, which seem to have been within the territory of Naphtali, perhaps the nucleus of the Galilee of later date. The ruler of the tribe (\textsuperscript{22})—a different dignity altogether from that of Ahimaz—was, in the reign of David, Jerimoth ben-Aziel (1 Chron. xxvii, 19). In later times the Naphalites appear to have resigned themselves to the intercourse with the heathen which was the bane of the northern tribes in general, and of which there are already indications in Judg. i, 35; comp. Isa. xi, 1. The location by Jeroboam within their territory of the great sanctuary for the northern part of his kingdom must have given an impulse to their nationality, and for a time have revived the connection with their brethren nearer the centre. Namely subject to Sa-
maria, was separated from it by the pass of Galcon, over which so often swept the devastating hordes of the "Children of the East," and the powerful armies of Syria. The usual route of the Syrian expeditions was the east base of Hermon, and across the Jordan at Jacob's bridge. The Naphalites in their mountain fastnesses generally escaped the predatory bands. But whenever the enemy marched through the valley of Coele-Syria, then Naphtali bore the first brunt of the on-
set. In the reigns of Baasha, king of Israel, and Asa, king of Judah, this tribe was the first to suffer from the invasion of Benhadad, king of Syria, who "sent the cap-
tains of the hosts which he had against the cities of Israel, and smote all Cinneroth, with all the land of Naphtali" (1 Kings xv, 20), especially "all its store cities" (2 Chron. xvi, 4). At length, in the reign of Pekah, king of Israel (cir. B.C. 780), Tiglath-pileser overran the whole of the north of Israel, swept off the population, and bore them away to Assyria (2 Kings xv, 29). It is perhaps worth while adding that Tobit belonged to Naphtali, for he tells us that "in the time of Enemesser (or Shalmaneser), king of the Assyrians, he was led captive out of Thisbe, which is at the right hand of that city which is called Kedesh of Naphtali, in Galilee, where the city is called "the common-
reyn to Nineveh, and that the Most High gave him grace and favor before Enemesser, who made him pur-
veyor to the palace (Tobit i, 5; vii, 8). But though the history of the tribe of Naphtali ends here, and the name is not mentioned again except in
NAPHTHARM

the well-known citation of Matthew (iv, 15), and the mystical references of Ezekiel (xlvi, 3, 4, 84), and of the writer of the Apocalypse (Rev. vii, 6), yet under the title of Galilee—apparently an ancient name, though now broken down—appears the principal Christian era—the district which they had formerly occupied was destined to become in every way far more important than it had ever before been. After the captivity the Israelites again settled largely in Naphthali, and its southern section became the most densely populated district in all Palestine. It became also one of our Lord's public labors. After his brethren at Nazareth rejected and sought to kill him, he "came down" (Luke iv, 31) from the uplands and dwelt in "Capernaum, which is upon the sea-coast, in the borders of Zabulon and Naphthali" (Matt. iv, 13). The new capital of Galilee had recently been built by Antipas, and called after the emperor, Tiberias. Other towns—Magdala, Capernaum, Chorazin, and Bethsaida—dotted the shore, which teemed with life and industry. Vast multitudoes followed Jesus wherever he went (Mark ii, 1-12; Matt. xiii, 1-23, etc.).

The greater number of his beautiful parables were spoken here (Matt. xii, 1-21), and here the people proper of the country beyond Jordan, Galilee of the Gentiles [called "Darom" in Deut. xxxii, 23]—the people that sat in darkness saw great light; and to them that sat in the region and shadow of deep death light is sprung up.

The details of this tribe's history, as well as the account of its sufferings and heroic resistance during the campaign of Titus and Vespasian prior to the destruction of Jerusalem, are given elsewhere. See PALESTINE.

Naphthali is now almost a desert. A mournful silence reigns along the shores of the Sea of Galilee. There are still a few populous villages among the mountains; but Safet and Tiberias are the only places of any importance within the boundaries of the tribe, and they are fast falling to ruin.

NAPHTALI, MOUNT (נֵּפֶר צֵי, Sept. נֵפֶר צֵּאלָא, Vulg. Moun Naphthali), the mountainous district which formed the main part of the inheritance of Naphthali (Josh. xx, 7), answering to "Mount Ephraim" in the centre and "Mount Judah" in the south of Palestine. See NAPHTALI.

Naphthar (נֵפֶר נָפֶתָר, Vulg. Nephthar), the name given by Nehemiah, according to the account in the Apocalypse, to the substance (not the place) as the Vulg. which after the return from Babylon was discovered in the dry pit where at the destruction of the Temple the sacred fire of the altar had been hidden (2 Macc. i, 36; comp. 19). The legend is a curious one; and it is plain, from the description of the substance—"thick water," which, being poured over the sacrificial and holy vessels, cleansed them with the holy fire, and then burned with an exceedingly bright and clear flame (ver. 32)—that it was either the same as or closely allied to the naphtha of modern commerce (petroleum). The narrative is not at all extravagant in its terms, and is very probably grounded on some actual occurrence. The only difficulty it presents is the explanation given of the name: "Naphthar, which is being interpreted, cleansing" (אָנָפֶלָר), and which has hitherto puzzled all the interpreters. It is perhaps due to some mistake in copying. A list of conjectures will be found in Grimm (Kurzgefa. Hanbl, ad loc.), and another in Robid's Diction. Ling. Pers. lexviii. The writer adds, "But many men call it Niphath." The identity of the names with naphtha is obvious. The place from which this combustible water was taken was enclosed by the "king of Persia" (Artaxerxes Longimanus), and converted into a sanctuary (such seems to be the force of הֵפֶר נוֹפֶתָר, ver. 34). In modern times it has been identified with the large well called by the Arabs Bir-eysib, situated beneath Jerusalem, at the confluence of the valleys of Kidron and Hinnom, and named "Naphthali" by some of the Arab writers, which name of which may be the name of Job or of Job, and which is usually identified with En-rogel, is also known to the Frank Christians as the "Well of Nehemiah." According to Dr. Robinson (Bib. Res. i. 332, note), the first trace of this name is in Quaresirmus (Elateidio, etc., ii, 270-4), who wrote in the early part of the 17th century (1616-25). He calls it "the well of Nehemiah and of fire," in words which seem to imply that such was at that time its recognised name: "Celebris ille et nominatus putesus, Nehemiae et ignis appella
tus." The valley which runs from it to the Dead Sea is called Wady es-Na'ar, "Valley of the Fire," but no stress can be laid on this, as the name may have in
tuated the tradition. A description of the Bir-eysib is given by Williams (History City, ii, 489-95, Barclay (City, etc., p. 513-16), and by the careful Tobler (Umgreifen, etc., p. 60). At present it would be an equally unsuitale spot either to store fire or seek for naphtha. One thing is plain, that it cannot have been called Naphthali (which was a living spring of water from the days of Joshua downwards) and a naphtha well also. See BITUMEN.

Naph'th'uh'm (Heb. נַפְרִת, נפְרִית, prob. of Egyptian origin, but of uncertain meaning [see below]; Sept. Ναφραία, Gen. x, 13; Ναφρία, 1 Chron. i, 11, v. τ. Ναφραία, Ναφρία; Vulg. Nephthum and Naphthiam), a tribe of the tribe of Naphtali (Gen. x, 18; 1 Chron. x, 11). The plural form of the name seems to indicate a tribe sprung from Naphthah. Jonathan (Chald. Chron) interprets it נַפְרִית, Pentas
tascheni, i.e. inhabitants of Pentashcania, a city in Lower Egypt, twenty Roman miles from Pelusium. Saadius renders it Curarami. Bochart (Phal. iv, 29) compares Naphthah, the name of an Egyptian goddess, sister of Apis, and wife of Osiris, which, according to Spicileg. (c. 265 sq.) understands the name to belong to the desert between Egypt and Asia, near the Sibornian lake, and to the Egyptians all the country round about the lake, called asaph or egyptoph. See also Jalsobnian, Opusc. i, 161; Schluchter, Paradies, p. 152. But Mias F. Corbaut ("Rephaim," in the Journ. of Soc. Lit. 1851, p. 181) identifies this tribe with the original Memphites, whose capital, "the dwelling of Pthah," Na-Ptah, is contracted in Hebrew into Naph (52). If we may judge from their position in the list of the Mazzarites, according to the Masonic text (in the Sept. in Gen. x. i. 18), they followed the same path as the Egyptians conquered the Amamim (אָנָמָאִים, "בָּנָמָאִים") immediately after the Lewhaim, who doubtless dwelt to the west of Egypt, and before the Pathrusim, who inhabited that country, the Naphthuim were probably settled at first, or at the time when Gen. x. was written, either in Egypt or im
dia or in some part of the land of the Philistines and the neighboring territory, which probably corre
tioned to the older Marcotic name, is called pipkhat or piphkait, a name composed of the word pḥaiit or pḥaith, of unknown meaning, with the plural definite article p prefixed. In hieroglyphics mention is made of a nation or confederation by the name of naphthali, which was conquered by the Egyptians called "the Nine Bows," a name which Cham
pollion read Nophi, or, as we should write it, NA-PETU, "the bows," though he called them "the Nine Bows" (or "nine peoples," Brugue, Geogr. Inacrr., ii, 20). It seems, however, more reasonable to suppose that we should read (ix) PEPUT, the "Nine Bows." It is also doubtful whether the Coptic name of Maresa contains the word "bow," which only is found in the forms pit (S. masc.) and phi (M. fem. "a rainbow"); but it is possible that the second part of the former may have
been originally the same as the latter. It is noteworthy that there should be two geographical names connected with the bow in historiography, the one of a country, MERU-PET, "the island of the bow," probably MEREO, and the other of a nation or confederacy, the Nine Bows, and that in the list of the Hamites there should be two similar names, Phut and Naphushin, beside many others of the same kind. There is no critical notice of the Nine Bows has been found in the Egyptian inscriptions: they are only spoken of in a general manner when the kings are said, in laudatory inscriptions, to have subdued great nations, such as the Ngees, or extensive countries, such as Kish, or Cush. Perhaps the name, in this case, is that of a confederacy or of a widely spread nation, of which the members or tribes are spoken of separately in records of a more particular character, treating of special conquests of the Pharaohs or enumerating their tributaries. 

"It appears more probable, however, to identify the Naphutlim with the city of Napatêka or Napatêa, the capital of an ancient Ethiopian kingdom, and one of the most splendid cities in Africa (Strabo, xvii, p. 820; Pliny, Hist. Nat. vi., 35; Ptolemy, iv, 7). Strabo states that Napatêa was the royal seat of queen Candace, a fact which may connect one of the most ancient tribes of the Old Testament with that district in Ethiopia (Acts viii, 27). The city and its territory lay upon the southern frontier of Masmâr, at the great bend of the Nile in Soudan, and having the desert of Bahiuta on the south. The ruins of the city on the banks of the river are extensive and splendid, consisting of pyramids, temples, sphinxes and sculptures. The modern name is Meren or Merowe; though some geographers do not adopt this view (Ritter, Erdkunde, i, 591). The connection of this city with Egypt is shown by the character of its ruins. There is a temple of Osiris and another of Ammon; and there is a necropolis on whose gaites are sculptured figures remarkable for the grace of the lower world. Two lions of red granite of beautiful workmanship were found here, and brought to England by lord Prudhoe, afterwards duke of Northumberland. They are at present in the British Museum (Hoskins, Travels, p. 161, 288; Layard, Nin. and Bab, p. 157; Kal- Kas, in Genius, p. 293; Smith, Dict. of Gr. and Rom. Giii, i, 390)."

Napier, Lord John, of Merchiston, Scotland, celebrated specially as a mathematician, but noted also as a religious writer, was born in 1550. He studied at the University of St. Andrews, Edinburgh, after which he travelled through France, Italy, and Germany. Upon his return home he applied himself especially to mathematics, in which he secured a great and lasting reputation. As a theologian, he is also distinguished. He had also devoted some time to the study of theology. His work on the Revelation indicates the most acute investigation. It is a most curious and learned work on the Apocalypse, and is entitled A Plaine Discovery of the whole Revelation of St. John, set down in two Treatises; wherein are amended certain Oracles of Sibylla (5th ed., corrected and amended, Edinb. 1645. 4to). In the dedication he gives some advice to kings James on religious matters, and on the propriety of reformation in his own "house, family, and court." It was translated into French, Dutch, and German. Napier, in his Treatise on the Art of Logart, he looked for an early consummation of the millennium. The date he believed to be about 1688. Napier died April 8, 1617. See Life, Writings, and Inventions of John Napier, by the Earl of Buchan and Walter Minto (1877). Mark Napier, Memoirs of J. Napier (1864); Chambers, Biog. Dict. of Scotchmen, s. v.; Darling, Cyclop. of Biblio, ii, 2192; Allibone, Dict. of Brit. and Amer. Authors, s. v.; Westminster Rev. July, 1835.

Napkin, the rendering in the A. V. of σωμάδιον. Vulg. sudarium in Luke xix, 20; John ii, 44; xx, 7; which, however, is rendered "handkerchief" in Acts xix, 12, where it is associated with aprons, συμμείσιν: they were clasped together, inasmuch as they refer to objects of a very similar character. Both words are of Latin origin: σωμάδιον = sudarium, from suado, "to sweat" (the Lutheran translation preserves the sense of "to rub up," in its rendering, erektenHO, τις ἐρέκτης, as σωματικὸν = semicinctum, i. e. "a half girdle.") Neither is much used by classical writers; the sudarium is referred to as used for wiping the face ("candido frontem sudario tergeret," Quintill. vi, 5) or hands ("sudario manus terges,

Naples, as a wrapper to fold up money (Luke xix, 20)—as a cloth bound about the head of a corpse (John xii, 44; xx, 7), being probably brought from the crown of the head under the chin—and, lastly, as an article of dress that could easily be removed (Acts xix, 12), probably a handkerchief worn on the head like the kepheis of the Bedouin. The semicinctus is noticed by Martial, xiv, epigr. 158, and by Petron. in Satyr. cap. 94. The distinction between the cinctus and the semicinctum corresponds exactly with that in Ildor. Or. 17. 5: the cinctus was riveted to the character of the συμμείσιν, the only inference from the passage in which it occurs (Acts xix, 12) is that it was easily removed from the person, and probably was worn next to the skin. According to Suidas, the distinction between the sudarium and the semicinctus was very small, for he explains the latter by the former, σωματικὸν = φακύλιον ή σωμάδιον, the φακύλιον being a species of head-dress: Hesychius likewise explains σωματικὸν = φακύλιον. According to the scholiast (in Cod. Steph.), as quoted by Schleusner (Lex. s. v. σωματικὸν), the distinction between the two terms is that the sudarium was worn on the head, and the semicinctus used as a handkerchief; the latter was probably not in the shape, but in the use of the article; we may conceive them to have been bands of linen of greater or less size, which might be adapted to many purposes, like the article now called lunga among the Arabs, which is applied sometimes as a girdle, at other times as a turban (Wallstedt, Travels, i, 321). See APHON: HANDKERCHIEF.

Napkins are used in some Christian churches, e. g. in those of the Romish communion, in the ministration of the Lord's Supper, and the custom is claimed to be of patristic or even apostolic origin. There is certainly evidence that linen and silk cloths were used as far back as the 6th century to cover the eucharistic elements and previous to consecration and administration. Oftentimes their "altar napkins," as they were usually called, were richly adorned, and very costly. There is notice of such practice in the pontificate of Vitalianus, in the 7th century. The emperor Constantius, when visiting at Rome the church of St. Peter; presented a piece of gold-embroidered altar cloth, "super altae pallium auro textile" (In Vitaliam, 135, 15). In the 8th century pope Zacharias presented to the same altar a napkin of the same make, enriched furthermore by precious jewels, and ornamented with a representation of Christ's nativity: "Fecit vestem super altae pallium aure tectorum per Dominum et missionem Jesu Christi et Salvatoris Jesu Christi, ornate et eam gemmam pretiose" (Anast. In Zach. 219, 5). The expressions "in altari," "super altae," to designate such altar-cloths, makes it plain that they were not used like altar-cloths in our day, but were napkins used as we see linen used in the communion service in the churches of to-day. The makers thinks that these cloths served the double purpose of altar-cloths and napkins, covering both altar and the elements consecrated thereon. See Martigny, Dict. des Antiquités Chrétientes, p. 427 sqq.
here as it was formerly an independent kingdom which, together with Sicily, constituted the territory known as the Two Sicilies, and, occupying the south end of the Italian peninsula, consisted of the continental territory of Naples, together with the island of Sicily. Extending over an area of 429 square miles, it consisted, in 1881, a population of 1,021,858 souls. The article Italy has already pointed out the part which this province has played in the history of the booted land, yet it may not be inappropriate to add here a few supplementary notes, to enable our readers a better resume of the historical data of Naples.

In ancient times this territory was divided into numerous petty states independent of each other, and its inhabitants were of various races. Many of the ancient Italian states arose from Greek colonies which had been founded previous to the 7th century B.C. The ancient historical importance of Naples is attested by the splendor of its cities and the warlike renown of its population. On its conquest by the Romans, the great Neapolitan cities severally adopted the municipal, federal, or colonistic form of government, and gradually assimilated their laws and customs to those of their conquerors. After the downfall of the Western Empire, Naples was seized by Odoacer, but soon afterwards (A.D. 490) it was subjected to the Goths, and in the following century by the Lombards, who established in it various independent dukedoms, as Benevento, Spoleto, Salerno, Capua, etc. Most of these were overthrown by Charles the Bald in 875, Saracen invasions, and Norman forays. While the last were yet in power, Sergius (A.D. 875), then duke of Naples, is accounted to have been in secret and friendly intercourse with the Saracens, and after direct interference on the part of the pope, a churchman secured for a time control of the country. He, however, fell into the same unhallowed policy as Sergius, and gave the papacy much trouble. Finally, the whole country was subdued by the Normans in the 11th century. They subsequently erected Naples and Sicily into a kingdom, and established a new political, ecclesiastical, and military system. To the Norman dynasty succeeded that of the Hohenstaufen, whose rule was marked by an immense intellectual and social advancement of the people; but the vindictive enmity with which the papal see regarded this dynasty, provoked by the independent policy pursued here by Frederick II (see Lea, Studies in Ch. Hist, p. 399, 192), led to the invasions by the armies of Anjou, of which the latter, withstanding the heroic resistance of king Manfred, at the battle of Benevento (1266) annihilated the power of the Hohenstaufen. The ascendency of Charles of Anjou was further effectually secured by the treacherous defeat and decapitation (1266) of Conradin, the last male heir to the throne. By the Sicilium Vesperum (q.v.), the island of Sicily was, however, wrested in 1282 from his grasp, and became an appanage of the Spanish crown. The predominance of the Neapolitan Guelph, or papal party, during the glorious reign of Robert I; the depraved licentiousness of his heiress and granddaughters, Joanna and Giovanna, and the formation of con federations of German mercenaries and by the plague; the futile attempts of the Anjou sovereigns to recover Sicily; and the envenomed feuds of rival claimants to the throne, are the leading features of the history of Naples during the rule of this dynasty, which expired with the profligate Joanna II in 1456, and was followed by that of Aragon, which had ruled Sicily from the time of the Sicilian Vespers. During the tenure of the Aragon race, various unsuccessful attempts were made by the house of Anjou to recover their lost sovereignty; and the country, especially near the coast, was repeatedly ravaged by the Turks (1480). In fact, after the death of the last ruler of the Aragon dynasty, the country groaned under a load of misery. Wars, defensive and offensive, were incessant; the country was impoverished; and a conspiracy of the nobles to remedy the condition of affairs was productive of the most lamentable results, both to the conspirators themselves and to the other influential Neapolitan families. In 1495 Charles VIII of France invaded Naples, and though he was compelled to withdraw in the same year, his successes had the true effect of increasing the power of Ferdinand (the Catholic) of Spain, succeeded in conquering the country in 1501. Two years afterwards the Spaniards under Gonzalo di Cordova drove out the French, and the country from this time became a province of Spain. Sicily had previously (1479) been annexed to the same kingdom. During the two centuries of Spanish rule in Naples, the perfidy which had existed from the time of the Normans fell into desuetude, the exercise of supreme authority devolved on viceroys; and to their ignorance, incapacity, and oppressive administration may safely be ascribed the unexampled misery and abasement of this period. But not only in secular affairs did the Spanish rule prove harmful to this Italian territory. Protestantism had early gained a footing here, and the Spaniards therefore worked zealously to introduce the Inquisition. The repugnance of the people caused it to be delayed for some time; but in the early part of 1564 the institution was finally and firmly established there, and the Inquisition went on working its mischief (see Cive de Naples, b. xxxii, ch. v, § 11). The severe persecutions which now threatened all who were not loyal to Rome caused many to quit their native country, and thus the misery of this unfortunate land was only intensified (see Baird, Protestantism in Italy, p. 87, 88; Spanish and Portuguese Catholics, p. 203, Pompianus, Storia d'Italia, t. i, p. 186). The Neapolitans rebelled and denounced their Spanish allegiance, but the Spaniards succeeded in quelling the rebellion. At the opening of last century Naples fell to Austria, and Sicily was secured by Savoy. In 1720, however, both Sicilies were reunited under the Austrian rule, and in 1735 were given to the Dauphin of France, afterwards Charles III, eldest son of Philip V of Spain, who ascended the throne as Charles I, and founded the Bourbon dynasty. His reign was marked by equity and moderation; great reforms were effected in the administration of public affairs, science and literature were encouraged, and splendid works of public utility were erected throughout the kingdom. It was during his reign that Pompeii and Herculanenum were discovered. His successor, Ferdinand IV, followed in the course of legislative reform; but on the proclamation of the French Republic (1798) his states were invaded by a French army, and the kingdom of Naples was occupied by the French. Ferdinand retired with his court to Sicily, and for a brief period enjoyed the restoration of his sovereign rights in Naples; but a second invasion by Napoleon (1806) ended in the proclamation of his brother, Joseph Bonaparte, as king of Naples; and on this latter assumption of the Spanish crown, in 1807, the kingdom of Naples was awarded to Joachim Murat, brother-in-law of Napoleon. After the defeat and execution of Murat in 1815, the Bourbon monarch, Ferdinand IV, was restored. The liberal insurrectionary movements in Naples in 1821 and 1830 were the forerunners of the Revolution of 1848; and in both cases the party of progress was com mitted by the respective kings with ruthless severity and pernicious concessions, to be cancelled and avenged with sanguinary fury when the disarmed and credulous patriots were at the mercy of the sovereigns. In 1859 the efforts of Garibaldi brought about the Italian war, which finally resulted in freeing Italian Italy from foreign rule, and thus Naples was incorporated as part of the newly-established Italian kingdom. See Italy. The city of Naples is noted as the place in which the liquefaction of the blood of St. Januarius (q.v.) takes place. See Napoléon, Giacoppo, a Roman prelate of great note, was the descendant of the distinguished Roman house of the Orsini, and flourished after the opening of the 14th century. He was the head and representative of the Italian cardinals at the time of the decease of pope Clement V in 1314, whom he had greatly disliked and
bitterly opposed in all his measures, and exerted himself in the elevation of James of Cahors as pope John XXII. Cardinal Napoleon was a great favorite with the Romans, and therefore enjoyed much influence at the papal court. He was the cardinal of St. Peter's, and known generally only as such. Upon the decease of pope Gregory XI in 1378, the papal conclavists threw off the stony mass, and were raising the next. The cardinal of St. Peter's aspired to the pontificate, and the Romans anxiously looked for his elevation; but the conclave considered him too old, and the archbishop of Bari was elevated as pope Urban VI. During the insurrection consequent upon the election of pope Innocent VII, the cardinal was killed in 1404. See Milman, Hist. Lit. Christianity, vii, 18, 477, 478.

NAPOLI (or Naupica or Nablus), a city of Palestine, supposed to be the ancient SHECHEM (now Nablus), and situated about thirty miles north of Jerusalem, is noted in ecclesiastical history as the seat of a Church council held there in 1129, which was convoked by the patriarch Guermondes and king Baldwin, and was attended by ten prelates and several distinguished secular princes. The canons published by this council are lost. Its object was reform in the Church. See Labbé, Conc. c. x. 884.

NAPOLI, CESARE DE', a Sicilian painter, flourished at Messina about 1685. According to Hackert, he studied in Venice, and in the Poloniae et Polonicae Legatio at Messina, and was one of his most distinguished disciples. He was a perfect imitator of his master's style, and executed some excellent works for the churches.

NARADA. See NARADA.

NARAKA, the hell of the Hindus, according to Manu (q.v.), is divided into twenty-one cells or apartments, each of them 10,000 yojanas in length, breadth, and height. The walls are said to be nine yojanas in thickness, and of so dazzling a brightness that they burst the eyes of those who look at them, even from the distance of 100 yojanas. Each hell is so enclosed that there is no possibility of escape from it. Manu, the celebrated Hindu Moses, gives a general description, dwelling with considerable detail on the tortures which await the impious in the other world. "They will be mangled (in these hells) by ravens and owls; they will swallow cakes boiling hot, walk over burning sands," etc. The Puráñas, of course, also furnish an account of Naraka, and they are indeed far more systematic. The Vishnú-Purána, for instance, not only names twenty-eight such hells, but distinctly assigns each of them to a particular class of sinners. Thus a man who bears false witness, or utters a falsehood, is condemned to the hell Rerurana (i.e. fearful); one who causes abortion, plunders a town, kills a cow, or strangles a man, goes to the hell Rodha (i.e. obstruction); the murderer of a Brahmin, stealer of gold, or drinker of wine, goes to the hell Sákara (i.e. wine); and so on. Besides these twenty-eight hells, however, which the Purána names, we are told of "hundreds and thousands of others in which sinners pay the penatls in the nether world." See HINDUISM.

NARASINGHA (a Sanscrit word from naras, "a man," and singha, "a lion," i.e. the man-lion) is the name, in Hindu mythology, of the fourth avatar of Vishnu. It is related that Hiranyakasipu, by his penances and sacrifices in honor of Brahma, had obtained as a boon from that deity that he should possess universal monarchy, and be wholly exempt from death or injury from every kind of earthly creature. Having nothing to fear, his arrogance and impiety became insufferable. He had, however, a son of a wholly different character, and remarkable for his piety and virtue. The son, reproving his father's wickedness, once said to him that the Deity was present everywhere. Is he in every street and house and temple, within and without, under the earth, or in the sky? And is the son. Thereupon Hiranyakasipu, in contempt, struck the pillar with his sword, when the stony mass fell asunder, and a being, half man and half lion, issuing from its centre, tore to pieces the impious wretch who had thus insulted and defied the divine Power. See Moor, Hindú Pantheon, p.17, 120; Coleman, Hindú Mythology, p.18 sq.

Narayana is a Sanscrit word of somewhat uncertain etymology, commonly supposed to signify moving upon the waters, and applied in the Hindu mythology to the universal divine Spirit, which existed before all worlds and conditions of being. This sense, however, may be regarded as another name for Brahma (q.v.), but it is also frequently used as one of the many appellations of Vishnú. See Moor, Hindú Pantheon, p. 102.

Narayani is the consort (or sakhi) of Narayana, considered as Vishnú, and hence a name of Lakshmi (q.v.).

NARBONNE, COUNCILS OF (Concilium Narbonense), were held from the 5th to the opening of the 17th century. Several of these have an important bearing on the ecclesiastical history of France, and were made the name of this old city famous. Narbonne is situated in Southern France, fifty-five miles from Montpellier, and was called by the Romans Narbo Martius. Being only eight miles from the sea, the place was an important commercial centre. It was the second settlement founded by the Romans in the South of France, and was made a bishopric by them an important acquisition, both for its strength and as the key to the road into Spain. Under Tiberius it flourished greatly; the arts and sciences being cultivated with success, and its schools rivalling for a long time those of Rome. There is reason to believe that Narbonne was known to the Greeks as Saphos B.C. After A.D. 309 it became the capital of Gallia Narbonensis, and contained among other buildings a cathedral, theatre, forum, aqueducts, triumphal arches, etc. It was taken in 719 by the Saracens, who planted there a Moslem colony, and destroyed the churches. In 859 it came into the hands of the Normans. During the 11th and 12th centuries it was a flourishing manufacturing city, but subsequently it fell into comparative decay, and is now entirely destitute of any monument of its former splendor. The first council was held there in 898, Migietius, archbishop of Toledo, presiding, and eight Gallican bishops attending. Its only important action was the confirmation of the acts of the Council of Toledo (389). The second and third council, held there in 791 and 1054 respectively, are of no special import. The fourth, however, was of great consequence, inasmuch as enactments were made against the spread of the Reformations, then beginning to extend to the Continent. The council was held in 1227, Pons, bishop of Narbonne, presiding; twenty canons were published. The second, third, and fourth relate to excommunicated persons and to the Jews: the latter, in canon 3, are directed to carry upon the bosom the figure of a wheel to distinguish them, and are forbidden to work on Sundays and festivals. Canon 4 orders them to pay yearly at Easter a certain sum for each family, as an offering to the parish church. Canons 13, 14, 15, and 16 are directed against heretics, and charge the bishops to station in every parish spies to make inquiry into heresies and notorious crimes, and to give in their report to them. Count Raymond, the count de Foié, the vicomt Besiers, the people of Toulouse, and all heretics and their abettors, were publicly excommunicated, and their persons and property given up to the attacks of the first aggressor (Labbé, Conc. xi, 304). The fifth council was held in 1235, and there the archbishops of Arles, Aix, and Narbonne, the other prelates, by the pope's command, drew up a grand rule concerning the penances, etc., which the preaching friars (lately appointed inquisitors in those parts) should impose upon heretics, i.e. upon those whom they had excommunicated from prison on account of prompt surrender within the stipulated time of 12 days, and to a voluntary confes- sion of sin and submission of themselves and others. They were directed to come to church every Sunday, bearing the
NARBONNI 848  NARCISUS
cross, and to present themselves to the curate between the singing of the epistle and the gospel, holding in their hands the rod with which to receive chasistainment; to do the same at all processions; to be present every Sunday at mass, and to sing and attend on their own expense in defence of the faith and of the Church against the Sarazens, etc. Those heretics who had not so rendered themselves, or who in any other way had rendered themselves unworthy of indulgence, but who nevertheless submitted to the Church, were ordered to be imprisoned for life; but as their number was so great that it was impossible to build prisons sufficient to contain them, the preaching friars were permitted toadero their imprisonment until they had received the pope's instructions. As for those who refused obedience, who would neither enter the prison nor remain there, they were allowed to carry the secular arms without further hearing, as were also the relapsed. The rest of these twenty-nine canons are conceived in the same cruel spirit—a spirit very contrary to that of the Church and of the early councils, and equally wanting in wisdom, mildness, and charity (Fleury, Hist. Ecclésiastique; Labbé, Conc. xvi., 487). A sixth council, held April 15, 1574, Peter, archbishop of Arles, presided, promising to resign his see, provided twenty-eight canons, aimed at the suppression of provincial councils and the preaching of laymen or excommunicated priests, encouraging heresy hunting, forbidden burial to the excommunicated, and granting an indulgence to those who pray for the pope (Labbé, Conc. Arles, iii., 96). A seventh council, held in Rodez, May 21, 1574, Alex. Zorbinet, vicar-general of the cardinal-archbishop of Narbonne, presiding, promulgated sixty-six canons, of which the first contains a confession of faith, made necessary by the spread of liberalism and the Reformation, and the second to the ninth relate to the qualifications of candidates for orders; the tenth forbids ordination of the diseased, maimed, or stutterers; the thirteenth to the twenty-fourth relate to the life, habits, etc., of the clergy; and betrays a great decline of Christianity in the priesthood, as there were canons passed against their frequenting of taverns, gambling, etc.; the fifty-second directs medical men to exhort their patients to confess to their priests (Labbé, Conc. xv., 5). An eighth council, held in 1607, archbishop Louis de Vervins of Narbonne presiding, and seven other bishops attending, published forty-nine canons of faith and discipline, similar to those enacted in most of the synods held after the Council of Trent. The most important is the second canon forbidding any person to translate the New Testament into their own language or into any other vernacular, save the Scriptures in the French version without the bishop's consent in writing. The thirty-ninth canon forbids dancing, and eating and buying and selling in churches; also forbids dogs in churches; orders cleanliness, etc. (Labbé, Conc. xv., 1574). See also Weissenberg, Gesch. der Kirchenverzammlungen, i., 29; Hefele, Concilien, Geschichte (see Index in vol.); Landon, Manual of Councils, s. v.

Narbonni, Moses (also called Mestre Vidal), a Jewish writer of note, was born about 1300. His father, Joshua of Narbonne, was a resident of Perpignan, and being deeply interested in the Jewish, i. e. Maimonidistic philosophy, instructed his son in that branch of science. Dual nature is also a great portion of the rabbinical beliefs, and admired likewise Averroes or Avicennion (q. v.), whose works he especially commented upon. His knowledge he enlarged by travelling from 1345 to 1362. He was obliged to leave his place when the populace massacred the Jews at the time of the "black death" was ravaging the country, and so far as he could, and property, but also, what was more painful to him, all his books. This, however, did not prevent him from finishing his great work at Soria—a commentary on Maimonides's More Nebuchim (latest edited by Goldenthal [Vienna, 1852]), which he commenced at Toledo in 1355, and which has been rendered into Latin by R. Solomon bar-Maimon, and published by Is. Euchel (Berlin, 1791; Wien, 1818; Sulzbach, 1828, etc.). Vidal also translater into Hebrew from the Arabic of Alzagi: 1, on the Unity of God: 2, on Divine Providence: 3, on the Utility of Logic. See also Ileczs, Die Geschichte der Juden in Spanien, iii., 17; Gritts, Gesch. d. Juden, vii., 535, 538 (Leipzig, 1770); Etheridge, Intro. to Hebr. Literat., p. 261; De Rossi, Dizionario (Germ. transl.), p. 242 sq.; Lindo, Histor. de las Hebras en España, p. 159; Finn, Sehkarzad, p. 394; Jost, Gesch. d. Judenheit, u. s. Sekt., iii., 84; Munk, Mâlêmon, p. 598; De Vries, Gesch. der Juden in Deutschland (Germ. transl. by B. Beer), § 28, 113 sq.; Zuna, Ezratim, zum Leipziger Katalog d. Hebr. cod. p. 325 sq. (B. P.)

Narcis'sus (Gr. Νάρκισσος, a well-known flower, comp. νάρκη, a Roman, among whosekinsmen (so Auth. Vers. in marg. renders τοῦτοι ἀναγόμενοι τούς Νάρκισσους, text has "household") or friends were Christians, whom Paul salutes (Rom. xvi., 11). A.D. 55. Neander (Ffenzian, i., 394) supposes him to be the same with Narcissus, freedman and prince of the emperor Claudius (Pliny H. N. xxxiii., 47; Sueton. Aug., 36), who exercised unbounded influence over that emperor, but was put to death on the accession of Nero, A.D. 54 (Taciust, Annal. xiii., i., 57, 65; Dio Cass. Ix., 34), but this is inconsistent with the probable date of the Epistle. "Die Casauss (Syr., 9) mentions another Narcissus, who probably lived at that time in Rome, and was regarded to some notoriety as an associate of Nero, and was put to an ignominious death with Helius, Patrobius, Locusta, and others, on the accession of Galba, A.D. 68. His name, however (see Reimart's note, ad loc.), was at that time too common in Rome to give any particular to the guess that he was the Narcissus mentioned by St. Paul. A late and improbable tradition (Pseudo-Hippolytus) makes Narcissus one of the seventy disciples, and bishop of Athens."

Narcissus, St., bishop of Jerusalem, was born about the year 98. One of the most worthy priests belonging to the clergy of Jerusalem, he was over eighty years old when he was elected to succeed Doliclianus, twenty-ninth bishop from the apostles. Notwithstanding his advanced age, he governed his Church with zeal and vigor of youth. He presided in 197 at the Council of Cesarea, in Palestine, where it was decided that the Passover should be celebrated on Sunday. Three evil-disposed Christians accused him of an atrocious crime, and sustained their false slanderers by oaths. Although the facts were against the faith of the Jews, they were still ready to profit by this circumstance to follow a long cherished desire to live in the desert. He left Jerusalem about 199, and no one could discover the place of his retreat. Divine justice, the story goes, soon overtook his persecutors: the first died with his family by the burning of his house; leprosy attacked the second, and the third became blind. Feeling himself called of God to resume the care of his Church, Narcissus left his solitude in 207; and on arriving at Jerusalem he found his see occupied by another bishop, named Gordius, who had been elected during his absence. Both of them, however, it is said, until the death of Gordius again left Narcissus sole pastor of his see. Extreme age having at last rendered him unfit for episcopal duties, he took as coadjutor Alexander, bishop of Flaviae, who about 212, with the approval of the clergy and the people, consented to take charge of the Church at Jerusalem. This is the first example of a bishop being transferred from one see to another, and given as coadjutor to a living bishop, although it is true Alexander was rather the successor of Narcissus, who had simply the honor of the episcopate. He is universally spoken of as a man of austere piety, verging on asceticism. A great number of miracles are attributed to St. Narcissus. He died in the year 230, and the day on which he is kept in his memory by the Roman Catholics. See Butler, Lives of the Saints, iv. 309-311; Jerome, De viris Illustribus, c. 73; Eusebius, Hist.
NARNI

Eccles. vi; x; Pressemsii, Hist. of the Martyrs and Apologists, p. 263, 264; Burton, Eccles. Hist. p. 449, 464, 478, 480. (J. H. W.)

Nard. See SPIKENARD.

Nardi, Angelo, an Italian painter of religious subjects, who, according to Palomino, passed the greater part of his life in Spain, flourished about 1645. He studied under Paolo Veronese, and imitated the style of that master in all his works. It is probable that Nardi attained a good degree of excellence, as Philip IV. is said to have painted to the court. There are a number of his pictures in the churches at Madrid, among which the most esteemed are the Annunciation, of the Society of S. Justo; the Nativity and Conception in the church of the Franciscans; the Guardian Angel, and St. Michael the Archangel, in the church of the Barefooted Carmelites; Nardi died at Madrid in 1659. See Spooner, Biog. Hist. of the Fine Arts, ii, 608.

Nardin, Jean de Brébats, an eminent French Protestant divine, was born at Montbeliard in 1687. He went to Germany after having acquired a thorough classical knowledge, and studied theology at the University of Tübingen. He then became successively pastor at Hericourt in 1714 and at Blamont in 1718. He died in 1728. In the unity of a discourse his sermons are models of composition; the arrangement is natural, the language pleasing, the thoughts original and instructive. A collection of his sermons was published under the title Le prédicantetz évangélique, ou Sermons (4th ed. Paris, 1714, 4 vols. 8vo). See Cyclop. Bibliograph. ii, 215; Allibone, Dict. of Brit. and Amer. Authors, s. v.; Dict. Living Authors, s. v.

Nareda (or Narada) is the name of a Hindú divinity, a son of Brahma and Suraswati. He was regarded as the messenger of the gods and the inventor of the vina, or Hindú lute. He is described not only as a wise legislator, but also as an astronomer, a musician, and a distinguished warrior. His name is frequently met with in Hindú mythology. See Coleman, Hindú Mythology, i, 7.

Nareg (or Naregatal), Gregory, an Armenian ascetic writer, was born in 951. He was placed while young in the convent of Nareg, of which one of his relatives was the abbot, and remained there until his death, which occurred Feb. 27, 1003. Gregory is now well known by the name of the place where he flourished and died. He enjoyed the favor of the great princes of his time, and his name has passed among the people as a saint among his countrymen. He left a Collection of pieces on mystical theology, which is too obscure through sublimity of style (the best editions are those of Constantinople, 1774, 12mo, and Venice, 1789, 12mo):—Homilies:—Hymns:—and A Commentary on the Canticles. See Houterman, Nomencl. Biog. Generale, s. v.

Nares, Edward, D.D., an English divine of note, was born of noble and distinguished parentage at London in 1762, and was educated at Westminster School, where he continued till the year 1779, and then removed to Christ Church, Oxford, under the tuition of Dr. Randolph, afterwards bishop of London. After taking his bachelor's degree, he was elected a fellow of MerTon College in 1784, but did not take his master's degree till the year following. In 1792 he entered into holy orders, and was soon afterwards presented to the cure of St. Peter's in the East by the college of which he was a member, and there he officiated for some years with great and deserved popularity. He vacated his fellowship in 1797, on his marriage, and soon after was presented with the rectory of Biddenden. In 1814 he was given the professorship of modern history at Oxford, on which occasion he took his degree of D.D. He flourished in this position until after 1816. He died at Biddenden, Kent, Aug. 20, 1841. His publications are, An Attempt to show how far the Philosophical Notion of a Plurality of Worlds is consistent with the Language of Scripture (1802, 8vo);—Sermons composed for Country Congregations (1803, 8vo):—A View of the Evidences of Christianity at the Close of the pretended Age of Reason (in eight sermons preached as Bampton Lectures, 1805, 8vo):—A Sermon preached at the Primary Visitation of the Archbishop of Canterbury at Ashford (1806, 4to):—A Letter to the Rev. F. Stone, M.A., in Reply to his Visitation Sermon (preached at Danbury, in Essex, 1807, 8vo);—The Evidence and Duty of the Right Divine Scriptural Interpretation of the Current Languages of the East (a sermon preached before the University of Oxford, 1807, 4to):—A Jubilee Sermon (preached Oct. 25, 1809, 8vo):—Remarks on the Version of the New Testament lately published by the Unitarians (1810, 8vo):—Thanks I to Myself (1811, 12mo; 9th ed. 1818):—A Sermon (preached at Oxford before the University on Commencement Sunday, and published at the request of the vice-chancellor, 1814, 8vo):—Discourses on the Three Creeds, etc., with a copious and distinct Appendix to each Set of Sermons (1819, 8vo):—Life of William Cecil, Earl of Exeter (ibid. 1822, 31, 8vo.). See Darling, Cyclop. Bibliogr. ii, 2155; Allibone, Dict. of Brit. and Amer. Authors, s. v.; Dict. Living Authors, s. v.

Nares, James, D.M., an eminent English composer of sacred music, was born at Stanwell, Middlesex, in 1715. He was educated as a chorister at King's Chapel, London. In 1734 he was appointed organist at York Cathedral, in 1756 organist and composer to king George II, and in 1762 was made master of the choristers in the royal chapel, which position he held until 1780. He died in 1788. He composed several anthems and services for the royal chapel and published Twenty Anthems in Score, which is still in constant use in the cathedrals of Great Britain. See Chappell, Hist. of Music in England, iv, 441, 442.

Nares, Robert, archdeacon of Stafford, a distinguished English divine, son of the preceding, was born in 1758, and was educated at Westminster School and at Christ Church, Oxford, where he was made M.A. in 1778. He entered into holy orders at once, and became successively rector of Sharmford, Leicestershire, preacher of Lincoln's Inn, and assistant librarian at the British Museum. Appointed archdeacon of Stafford in 1792, he became also prebendary of Lincoln, rector of St. Mary's, Reading, canon of Lichfield, and rector of All-Hallows, London Wall. Dr. Nares was editor of the first series of the British Critic, a High-Church literary review. He died in 1829. Among his works we notice, Dáies:—Courses preaches before the House of Commons (Lond. 1794, 8vo):—A connected and chronological View of the Prophecies relating to the Christian Church (in twelve sermons, preached 1800 to 1804 at the Lecture founded by the Right Rev. W. Warburton, bishop of Gloucester (Lond. 1805, 8vo)):—Essays and other occasional Compositions (Lond. 1810, 2 vols. 8vo):—On the Influence of Sectaries, and the Stability of the Church (Lond. 1815, 8vo):—The Veracity of the Evangelists demonstrated (1815):—Sermons on Faith and other Subjects (Lond. 1825, 8vo). See Darling, Cyclop. Bibliogr. ii, 2156; Allibone, Dict. of Brit. and Amer. Authors, s. v.

Narni, Girolamo de', a celebrated Capuchin preacher, one of the most noted of Italian pulpit orators, flourished at Rome in the early part of the 17th century. Very little is accessible to us of his personal history; but we know that he was one of the principal promoters of the scheme to support and enlarge the Propaganda (q. v.), and that as a man and preacher he was highly esteemed among Romanists. "He commanded," says Ranke, "general reverence by a life which procured for him the reputation of a saint, and in the pulpit he displayed a fulness of thought, solidity of expression, and majesty of delivery which captivated everybody. Bellarmine, on one occasion, as he came from hearing Narni preach, said he thought that no soul in the Bor- tanine's three wishes had been granted to him, that, namely, of hearing St. Paul preach" (Hist. of the Pa- pacy in the 16th and 17th Centuries, ii, 69, 244).
NARZYSZEWSKI, ADAM STANISLAUS, an eminent Polish prelate, noted especially as a historical writer, and surname the Tactus of his country, was born in Lithuania in 1733. He entered the Order of Jesuits in 1748; travelled through Germany, France, and Italy; was appointed professor at Nazan, and Provincial of the Order at Warsaw, 1773, and became bishop of Lublin 1779. He died at Janowicz, in Galicia, in 1796. His most important work is a History of Poland (Warsaw, 1780 sq., 8 vols.).

Narthex (Gr. ναρθηξ, signifying a plant with a long stalk, but applied by the Greeks to any oblong figure) is the technical term used in ecclesiastical architecture to designate that part of the early Christian churches which formed an outer division, and may be properly looked on as an "ante-church," or ante-chapel, distinct from the rest of the church, yet separate from the rest by a railing or screen, and being the part to which catechumens and penitents were admitted. See CHURCH. The term narthex is supposed to have been given to it on account of its oblong shape, in this respect resembling a rod or staff (feasula). It was the long and narrow part extending along the front of the church. Here were usually three entrances: one on the west side, another on the south, and another on the north. The chief entrance or great door was at the west, opposite the altar: it was called, after the corresponding gate in the Jewish Temple, the beautiful or royal gate. The gates and doors consisted of two folding leaves. The doors leading from this part into the nave were appropriated to the various classes of the members, and named accordingly, "the priest's door," "the men's door," etc. In the vestibule, or προναος, in the stricter sense, the catechumens and audi- ences had their station. Here also heretics and unbap- tized stood. In the προναος, or portico, funerals were performed; in large churches meetings for ecclesiastical purposes were held there, and in later times the water-font was also placed there, instead of being, as formerly, outside the walls of the church—in the εξω- δωρο, or buildings adjoining the church. In this foun- tain persons entering were accustomed to wash their hands and face. See FONT. See Ferrar, Eccles. Dict. s. v.; Martigny, Dict. des Antiquités, s. v.; Colman, Christian Antiquities, p. 723-25; Bingham, Christian Antiquities, ii, 286-290; Siegel, Christl. Alterthümer, ii, 876; Riddle, Christian Antiquities; Walcott, Sacred Architecture, s. v.; Neal, History of the Eastern Church (Intro.).

NARY, CORNELIUS, an Irish Roman Catholic divine noted for his scholarly attainments, was born in the county of Kildare in 1660, and was educated at Kilken- ny, where he graduated in 1684 and took holy orders; he then went to Paris to continue his studies at the Irish College in the French capital, and was there six or seven years, studying the principal works of the institution. In 1695 he was honored with the doctorate in philosophy by the University of Cambrai, and was made preceptor of count Antrim. A little later he was ap- pointed to one of the large churches in Dublin, and he died in that city March 6, 1758. Nary wielded an able pen, and wrote much in defense of his faith (1705, 1729, 1730, 3 vols.). His other and more important works are, The New Testament translated, with Marginal Notes (London, 1705; Dublin, 1748, 8vo)—The Holy Bible, with Notes (Dublin, 1719)—A New History of the World (Dublin, 1720, fol.). For an estimate of Nary's Scripture knowledge, see Lee, Hist. of Engl. Transl. p. 366—368 (8vo ed.).

NASAFI, AL, an Arabian theologian and poet, was born at Nasakteh or Nasaf in 1695. He was of the Hanefite sect, and has written more than a hundred works, as many in prose as in verse, upon all branches of Mussulman tradition and law. He died at Samar- cas, and was buried near the mosque. The following is a work in verse upon all disputed points among the dif- ferent Mussulman sects. It exists in manuscript in the Royal Library at Paris, No. 1985, and in the Bodleian

Library at Oxford, No. 1294. The Manuscript has been commented upon, in 1275, by Mahmud ben-Daud, surname Allalui al-Bokhari Aluflanji. This commentary is likewise found in manuscript in the Royal Library at Paris, No. 1985. Another is in the library at Leyden, No. 3675, in manuscript. Archibald withers in his FIELD, a brief treatise on Moslem doctrine (manuscript, No. 407, in the Royal Library, Paris). There is a commentary of the Aqaid by Saeddin Masud ben-Omar al-Taftazani, which has in its turn been commented upon by Turkish mullassis. We have, lastly, from Nasafi a work on the science of the distribution of the vanity of this life. The verses of each stanza turn upon the same rhyme, and this runs successively through all the letters of the alphabet. This poem is found in manu- script in the Royal Library at Paris, No. 1418.

NASAFFI, Awhadeddin (or Awhudeddin), At, an Arabian doctor, who flourished at Shiraz towards the close of the 18th century. The particulars of his life are not known. He wrote a curious poem, in seventy-six verses, upon the principal dogmas of the Sunnites, or Latin orthodoxy, by J. Uri, under the title Carmen Arabinum, vel verba doctoris al Nasafi de religionis suniticis principiorum vero synopsis (Oxford, 1770, 4to., London).

NASALLI, IGNACE, an Italian cardinal, was born at Parma Oct. 7, 1750. Early entering the ecclesiastical career, he opened the name of the Society of Jesus; when Clement XIV was obliged to suppress this order, Pius VII made him successively prefect of his house, re- ferendary of the two signatures, civil lieutenant of the tribunal of the cardinal-vicar, and one of the mem- bers of the ecclesiastical immunity. In 1815 he was sent to Spain to conciliate the people, and to confer with Ferdinand VII upon different communications that this prince had sent to the pope; but on arriving at Madrid he was told he could not proceed further on his route to Madrid without an express permission from the court. This was one consequence of the notices made in the name of Ferdinand VII on the publication of the pope's bulls in Spain. Nasalli returned to Parma, where he was charged with affairs from the court of Rome. In November, 1818, he became apostolic nuncio to the Helvetic Confederation, and Dec. 27, 1819, was declared archbishop of Tyre in partibus. Nominated in July, 1822, minister plenipotentiary to the court of the Neth- erlands, two months after he was sent to that of Prus- sia to conclude an agreement between these two govern- ments; he succeeded in this mission to Brussels as well as to Berlin. As a reward for his services, Leo XII created him cardinal of the title of Saint-Anges without the walls, in the consistory of June 25, 1827. Nasalli, who in 1814 had powerfully contributed to the restoration of the Jesuits, in whose favor he had formerly published several articles, continued in his new position to feel the greatest interest. He died at Rome Dec. 2, 1831. See Hoefer, Nouv. Biog. Générale, s. v.; Nicollini, History of the Jesuits; Steinmetz, History of the Jesuitical Order (see Index in vol. ii). (J. H. W.)

NAS'BA (Nabas, Nub. Nabath), the nephew of Tobit who came with Achiaharus to the wedding of Tobias (Tob. x, 18). Grotius considers him the same as the Nathanael of the Targum. The name was familiar among the pagans, being so common as to be applied to the Vulgate where they were brothers. The margin of the A. V. gives "Junius" as the equivalent of Nasb.
Nascio, the name of a Roman divinity, who presided over the birth of children, and was accordingly a goddess assisting Lucina in her functions, and analogous to the Greek Eileithyia. She had a sanctuary in the neighborhood of Ardea.

Naselli, Francesco, a distinguished Italian painter, and a very famous arabesque painter. He was by himself largely a painter of noble birth, and flourished at Ferrara about the opening of the 17th century. Lanzi says he practiced drawing from the naked model with assiduity, and studied and copied the works of Caracci and Guercino. By such practice he formed an excellent style of his own on a large scale, soft with vigorous coloring and rich execution, in which he used to show his flesh to a sunburned hue. He made many excellent copies of the works of those masters which are in the churches of his native place and in private cabinets. Among these is his Communion of St. Jerome, from Agostino Caracci. He was exceedingly industrious and persevering, although in easy circumstances and of noble rank. He painted at the Scala in competition with one of the Caracci, Bonone, and Scarsellino; and, according to Lanzi, was deemed not unworthy of those eminent artists. Among his principal works are the Nativity, in the cathedral; the Assumption, in Bologna; and, in the chapel of the Last Supper, in private institutions. He died at Ferrara in 1630.

Nash, Frederick K., a Presbyterian minister, was born at Hillsborough, N. C., Feb. 14, 1813. He was a child of the covenant, and many of his relatives were ministers of the Gospel. With such associations and counsellors, he soon identified himself with God's people. During his college course at the University of North Carolina he became converted, and on returning he united himself with the Hillsborough Church. Though young, he was soon after elected a ruling elder. He studied law in his father's office; was admitted to the bar, but while practicing he was led to consider the claims of the ministry. Convinced that it was his duty thus to serve God, he placed himself under the care of Orange Presbytery, N. C., April 24, 1833, and immediately commenced his studies in the Union Theological Seminary at Prince Edward, Va. In 1837 he was licensed, and in 1838 was ordained pastor of Unity Church. This relation was dissolved in 1842. In 1845 he was without any regular charge. During 1844-45 he labored as stated supply for Rutherford and Little Britain churches, in the bounds of Concord Presbytery. In 1846 he began preaching in Centre Church, and there he labored until his death, Dec. 15, 1861. He was an active member of the presbytery and synod. He was chairman of the committee to prepare the resolutions adopted by his presbytery when they seceded from the General Assembly of the Presbyterian Church. He was also appointed as a commissioner to the Southern Assembly. As a preacher he was clear, practical, and pungent, with the special ability of saying the right word at the right time. See Wilson, Prefab. Hist. Al- mumac, 1863, p. 193.

Nash, Michael, a Wesleyan preacher noted as a writer on dogmatic theology, flourished near the close of last century. But little is known of his personal history. He wrote, however, several works of value to this day. He wrote an able defence of the Christian truths against the attacks of modern infidelity in his Paine's Age of Reason measured by the Standard of Truth (1794, 8vo). See Dict. of Living Authors (Lond. 1816, 8vo), s. v.

Nash, Treadway Russell, an English divine noted for his missionary labors, was born near the opening of last century. He was educated at Worcester College, Oxford, where he took his degree of D.D. in 1758. He was a man of fortune, and died at his seat in Worcestershire in 1811. Dr. Nash published collections for a history of Worcestershire (2 vols. fol.)—a splendid edition of Hudibras (3 vols. 4to)—and some papers in the Archæologia. See Allibone, Dict. of Brit. and Amer. Auth. a. v.

Nasi, Abraham, ben-Chijia, surnamed the Astronomer, a Jewish savant of note (in Marseilles), was born in 1565, and died in 1616. He held the office of Zachah and was professedly a sefarim lubbanus, and was much esteemed for his proficiency in astronomy. His writings are highly valued. He wrote—I, a description of the form of the earth, the arrangement of the firmament, and revolutions of the planets (مهندس宇ما و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و و and—2, a highly moral work, entitled Meditazioni di un Penitent Soul, on reaching the Gates of Repentance (عذر و و و و و و و و و و و و و و و و و و و و و و و و and), with an essay by S. L. Rapaport, by E. Freimann (Leips. 1680), in four parts: (a) on man's origin and wondrous nature; (b) on the duties of life; (c) on the return to God by penitence; (d) on dying well, and on the close of this life. A third work, on the resurrection and the intercalation—4, another on the planets, the two spheres, and the Greek, Roman, and Mohammedan calendars—5, a work on geometry, with an explanation of spherical triangles, and the conversion of angles and circles (ميكانك حا-ميكانك, the first geometrical work edited in the Hebrew language by Steinschneider [Berl. 1864])—6, a treatise on music, and on سقنينا حا-سقنينا, the volume of the Revealer, on the redemption of Israel, the resurrection of the dead, and the advent of Messiah, the date of which he ventured to predict by an astronomical computation (comp. his في نيرق دار in the mathematical and technical chronology of the Hebrew, Nazarites, Mohammedans, etc. Printed for the first time and edited by H. Filipowski [Lodz, 1851]), and which should have taken place, according to him, in the year 5118 of the world = A.D. 1538. See Grätz, Hist. of the Jews, vi, 110; Braunschweiger, Gesch. d Juden in den roman. Staaten, p. 59 sq.; First, Bibl. Judaica, i, 8; De Rossi, Dizionario, s. v. (Geram. transl.), p. 81; Lindo, Hist. of the Jews in Spain, p. 58; Finn, Sephardim, p. 189. (B. P.)

Nasi, Jehudah. See HAKODESHEH

Naštěh (ناسته), Moses ben-Isaak, a Jewish writer who flourished some time during the Middle Ages in England. When and where he was born is difficult to say. All that is known of him is that he wrote a grammar entitled ير اين ٣ ير اين ٣, the preface of which has been published by L. Dukes in L. b. Ori- ents, 1844, c. 518, 519. Later he wrote a dictionary under the title ير اين ٣ ير اين ٣, in 180 sections, with an elaborate introduction, entitled ير اين ٣ ير اين ٣, which, based on the labors of Ibn-Chajug (q. v.), Ibn-Ganach (q. v.), and especially Parchon, endeavors to surpass them in completeness and logical arrangement—First, Eid. Jud. iii, 18; Kalisch, Hebrew Grammar (Lond. 1863), ii, 28; L. Dukes, Ausführliche Notiz über Moses ibn-Nasi, wie auch Anzüge aus seinen Werken, reprinted in the Jewish Chronicle, 1849, No. 37, 41-48, 46, 48. (B. P.)

Naśni, Giuseppe Niccolo, an Italian painter who devoted himself largely to religious art, was born at Siena, according to Della Valle, in 1604. He first studied under the great Francesco Solimena, who devoted himself to the grand fresco works. At the request of his patron, Grand Duke of Tuscany, he was employed by the grand-duke of Tuscany to paint in the Palazzo Pitti, from the designs of P. da Cortona, the Four Ages of Man, in emblematic subjects, which he finished to the satisfaction of his em-
There are many of his subjects at Siena, Foligno, and Florence, among which his masterpiece is supposed to be the St. Leonardo, in Madonna del Pianto, at Foligno. At Rome he was commissioned to paint the ceiling of the Capella Bracciana, the church de SS. Apostoli, and the large Prophets of the Lateran Cathedral, competing with Luti and the first artists then at Rome. Bartich mentions a print by Nasini, representing the Virgin and the Infants Jesus and John in a landscape, with cherubs flying in the air; designed in 1619, engraved by G. Ferreri, and engraved with great delicacy, in the manner of P. S. Baroli. Nasini died in 1736.

Nasini, Isaac, a famous Jewish philosopher devoted to Cabalism, who flourished about 1100, is the author of a cabalistic work entitled חָמַשְׁמָא כַּלְלֶבֶּשׁ, the Treatise on the Emotions, in which he introduces the prophetic Elijah as speaking and teaching under the four names of Elia ben-Joseph, Jereias ben-Joseph, Zechariah ben-Joseph, and Jeroham ben-Joseph, and propounding the system of the Cabala (q. v.). This remarkable treatise was first published by R. Abraham, (Vienna, 1802); it was then reprinted, with all its faults, in Lemberg, 1850; and in 1853 by Dr. Jellinek, in his Auszwahl Kabalistischer Mystik (part i, הָעָשָׂאָל קָבָּלָסִיְסִית מִיסְטִיָּק and p. 109). See Ginsburg, The Kabbalah, p. 109, where an analysis of this treatise is given; First, Bibl. Jud. ii, p. 19, (B. P.)

Nash, Nathaniel, a Temple servants' whose posterity returned from Babylon (1 Esdr. v, 92); evidently the Neziah (q. v.) of the text. (Exod. ii, 54).

Nash, William, a Scottish philanthropist, born of respectable parents at Glasgow March 21, 1739, was distinguished for his zeal in promoting religious and benevolent associations. He founded in 1826 the Glasgow City Mission, and having subsequently visited England, Ireland, France, and the United States of America, he established missions in their principal cities. The London City Mission, which began its operations in 1855 with four missionaries, numbered in 1856 upwards of three hundred. Nasmith also founded the London Female Mission, the Adult School Society, and other similar institutions. He died in 1839. See English Cyclopaedia, s. v.; Thomas, Dict. of Biography, and Mythology, p. 112.

Nasmith, James, an English divine, was born at Norwich in 1746; and was educated at Benet College, Cambridge. He took the degree of D.D. in 1777; and his last preferment was the rectory of Leverington, in the Isle of Ely, where he died in 1808. Dr. Nasmith published A Catalogue of Benet College Library:—an edition of the Itineraries of Simon and William of Worcester (8vo):—a new edition of Tanner's Notitia Monastica, etc. See Allibone, Dict. of Brit. and Amer. Authors, s. v.

Nasor, The Plain of (to πεδίο Νασὼν; Vulg. campus Aesor), the scene of an action between Jonathan the Maccabee and the forces of Demetrius (1 Macc. xi, 67; comp. 63). It was near Cades (Kadesh-Naphthali) on the one side, and the water of Gennesare (Lake of Gennesareth) on the other, and therefore it is safely identified with the Habor which came so renowned in the history of the conquest for the victories of Joshua and Barak. In fact the name is the same, except that through the error of a transcriber the N from the preceding Greek word has become attached to it. Josephus (Ant. xiii, 5, 7) gives it correctly as Ἄμωρ.

Nassar, or Nosaire, a Mohammedan sect of the Shiite party, formed in the two hundred and seventy-first year of the Hegira, received its name from Nasaar, in the environs of Kufa, the birthplace of its founder. These religiousists occupy a strip of Mount Lebanon, and are tributary to the Turks. They have about eight hundred villages, and the chief town is Nasai, eight leagues from Tripoli. Here their sheik resides. Their manners are rude, and corrupted by remnant of heathenish customs, which remind us of the Lingam worshipers. They are regarded as friendly to Christians, and observe some of their festivals and ceremonies, but without understanding their meaning. A spiritual head, sheik khali, directs their religious concerns, and travels among them as a prophet. The opinion, formerly current, that this sect were Syrian Sabians, or disciples of St. John, has been entirely exploded by Niebuhr, and by the accounts of Rousseau, the French consul at Aleppo. See D'Herbelot, Bibliotheque Orientale, s. v. See Christians of St. John.

Nassau, until the recent re-establishment of the German Empire an independent duchy of Germany, but now constituting the southwestern part of the Prussian province of Hesse-Cassel, is situated between 50° 50' and 50° 20' N. lat., and 7° 30' and 8° 15' E. long. It is bounded on the west and south by the Main and the Rhine, the Rhine-Hessian province, and the former grand-duchy of Hesse; on the east by the extinct Hesse and Frankfort territories; and on the north by the province of Westphalia. It covers an area of 967 square miles, with a population of 668,511 in 1866. The country possesses very great physical advantages. In its southern districts, nearly the whole of its area is occupied by the Taunus Mountains, whose highest point, the Great Feldberg, attains an elevation of about 3750 feet. This range includes within its boundaries the fertile valleys known as the Rheingau. The northern part of the duchy includes the barren highlands of the Westerwald, whose most considerable peak, the Saltburger Head, is nearly 2000 feet high. Besides the Rhine and the Main, which are the boundary rivers, Nassau is traversed from east to west by the Lahn, which becomes navigable at Weilburg, and is augmented by the confluence of numerous other streams, as the Weil, Emms, Aar, Dill, Elbe. The productivity of the soil is proved by the excellent quality of the numerous vegetable products, which include corn, hemp, flax, tobacco, hops, etc. The fruits, especially grapes, and the berries are abundant. The manufacture of wine is one of the chief industries. In the more mountainous districts, iron, lead, copper, and some silver are obtained, also much good building-stone, marble, and coal; the chief mineral wealth is, however, derived from the numerous springs which, directly and indirectly, bring the province a clear annual gain of nearly 100,000,000 dollars. The most noted of these springs, of which there are more than one hundred, are Wiesbaden, Weilbich, Langen-Schwalbach, Schlangenbad, Emms, Fachingen, Selters, Soden, and Geinlau.

In tracing the history of Nassau to its earliest origin, we find that we are now known by that name were anciently occupied by the Allemanns, and that the subjugation of the latter people by the Franks became incorporated first with the Frankish, and next with the German Empire. Among the various chiefs who raised themselves to independent power in this portion of the Frankish territories, one of the most influential was Otto of Nassau, brother of Count Conrad, and father of two distinct line of princes. The heads of these lines were Walram and Otto, the sons of count Henry I, who, in 1225, divided the land between them. Walram II, the elder, was the progenitor of the house of Laurenburg, which, towards the close of the 12th century, assumed its present designation from the name of its chief stronghold; while Otto, the younger, by his marriage with the heiress of Gelders, founded the line of Nassau-Gelders, whose last male representative died in 1428, but which still survives through a
female branch in the family now occupying the throne of the Netherlands. This junior branch of the house of Nassau, by inheritance from a collateral representative, acquired possession, in 1544, of the principality of Orange; and since that period the representatives of the Orange House have been known as princes of Orange (q.v.). The Walram line, which in 1292 gave an emperor to Germany in the person of Adolf of Nassau, was subdivided by the descendants of that prince into several branches, until, by the successive extinction of the other lines, the Nassau-Weilburg family, which last reigned with the duchy, was left, in 1816, the sole heir and representative of the Walram dynasty in Germany. Nassau was declared a duchy in 1806, and in 1817 duke William granted a new constitution; but during the first sittings of the assembly dissensions arose between the ducal government and the people's representatives, which resulted in an estrangement of ruler and ruled, and were not quieted until 1834. In 1836 Nassau joined the German Zollverein, and its material prosperity thereafter rapidly developed. In 1839 the last duke of Nassau came to the throne in the person of Adolphus William. He experienced the revolutionary days of 1848, but remained in possession of his territory until 1866, when Prussia deposed him because of his alliance with Austria. He is now a pensioner of the Prussian government.

Christianity was introduced among the people of Nassau at a very early date, probably during the period of Roman occupation, when the emperors had become Christianizers. The presbyter Lucretius, who flourished in the 4th century, preached in these domains; but no stronghold was made for Christianity until the days of Boniface in the 8th century, about 739. In the 10th and 11th centuries many churches were built and Christianity was fortified by schools. The people, however, were but poorly educated, and at the dawn of the Reformation this country was far behind other German territories. About 1530 Nassau declared for the new faith, and in 1534 joined the Smaldal league. At first decided Lutherans, the Nassau Protestants gradually turned over to the views of the Reformed Church, and in 1582 the theologians of Nassau, protesting against the monster Ubiquity in the Form of Concord, were induced to adopt the Heidelberg Catechism, and in consequence of its relation to the house of Orange, Nassau was brought to accept the ecclesiastical system which prevailed in the Netherlands. (See Staubing, Kirchenleben in den Herzogtümern Westfalen; Oranien-Nassau. Ländle [hadam, 1841]; Hase, Ch. Hist., p. 413.) In 1817 the Protestants of Nassau constituted an Evangelical United Church, and a theological seminary is supported at Herborn, where all who look towards the ministry are obliged to spend one year after finishing a university curriculum. Nearly half the population of Nassau belong to the Roman Catholic Church, which is under the ecclesiastical jurisdiction of the bishop of Limburg, who is assisted by a board of commissioners, located at Elbville, the British. There are also about 8000 persons who belong to the Jewish and other persuasions. Ample provisions are made in the territory for popular education, in furtherance of which there are upwards of 700 elementary schools, with about 1000 teachers, 10 normal schools, a gymnasium, various training, polytechnic, military, and other educational institutions. See Vogel, Beschreibung d. Herzogth. Nassau (Wiesbaden, 1843-44); Schiebhabke, Gesch. v. Nassau (ib. 1864-70, 3 vols. 8vo).

Natal, a British colony, and noted seat of an Anglican bishopric, is situated on the south-east coast of Africa, about 800 miles east-north-east of the Cape of Good Hope, between the 29th and 31st parallels of south latitude. Its north-eastern boundary is the Tugela, or Buffalo, River, which divides it from Zululand, and its south-western boundary is the Umzimbulu, separating it from Kaffraria proper. A lofty and rugged range of mountains, called the Quathiambas, or Drakenberg, divides it from the Free State and Basutoland, and it contains a well-defined area of about 16,146 square miles, according to the British parliamentary accounts of 1872, with a population of 250,352, of whom 17,821 are whites, and 5227 Indian coolies, the remainder being natives of the soil, called Zulus, or Zulu-Kaffirs (see KAFFIRS), remnants of the different tribes which originally occupied the territory, but by persecution and warfare were dispersed, and only came together again since the British occupation of Natal.

History.—The region now forming the colony of Natal derives its name (Natalia Juba) from its being discovered by the Portuguese on Christmas-day, 1497. It was visited and favorably reported upon towards the close of the 17th century, and later by Dampier, Woods Rogers, and several Dutch navigators. Subsequently a Dutch expedition purchased the territory from some native chiefs. Its colonization was not fairly projected, however, until about 1822, when it was visited by several white traders from the Cape, who found the country in possession of the Zulu chief Chaka, who ruled in a most sanguinary manner over all the tribes, from the Umzimbulu to the St. Lucia River. He was killed and succeeded by his brother Dingaan in 1838; but the latter having treacherously murdered a party of emigrant Dutch Boers, who had paid him a friendly visit by invitation to buy land, he was attacked and finally destroyed by the Boers, who at that time had emigrated from Cape Colony in large numbers, and who made his brother Panda paramount chief in his stead, and then settled themselves down in the country as his lords and masters. The British government, however, now interfered; and after a severe struggle on the part of the Boers, the country was formally proclaimed a British colony on May 12, 1843, since which time it has progressed very satisfactorily, and bids fair to become one of the most valuable dependencies of the British crown on the African continent. Natal is governed by a lieutenant-governor, nominally subordinate to, although really independent of, the governor of the Cape, and has recently received a constitution somewhat similar to that of Cape Colony. Municipal institutions have been granted to the principal towns.

Climate, etc.—The coast region, extending about twenty-five miles inland, is highly fertile, and has a climate almost tropical, though perfectly healthy. Sugar, cof-
fe3, indigo, arrow-root, ginger, tobacco, and cotton thrive amazingly, and the pine-apple ripens in the open air with very little cultivation. The midland terrace is more fit for the cereals and usual European crops, while on the higher plateau, along the foot of the mountains, are immense tracts of the finest pasturage for cattle and sheep. Coal, copper, iron, and other minerals are found in several places; and there is no doubt when the great mountain-range is properly explored that it will be found very rich in mineral wealth. Since the discovery of diamonds near the Vaal River, large and valuable gems of this class have been exported through Natal.

The climate is very salubrious; the thermometer ranges between 50° and 38°, but the heat, even in summer, is seldom oppressive. The mean temperature at Pietermaritzburg, the capital, is 5.5° above that of Cape Town. The winter begins in April and ends in September; the average number of rainy days being thirteen. In the summer season the thunder-storms are very frequent and severe. The annual rainfall on the coast is about thirty-two inches. Inland, it varies a good deal in different districts, and is greatest in summer. The southeast is the prevailing wind here in the summer months, as in Cape Colony. Occasionally the snow from the north-west is felt, which generally terminates in a thunder-storm.

The natives of Natal, belonging to the same ethnological family as the Kaffirs, are split up into numerous petty tribes, each tribe having a chief of its own, who, however, is amenable to British authority. Constant jealousies and animosities exist among these tribes, and nothing but fear of the British government prevents them from destroying each other. The greater part of the natives in this colony dwell on locations assigned them by government, and over each location is placed a white magistrate, to keep order, to collect the annual tax, which is seven shillings per hut, settle their numerous disputes, etc. When cases presented by the natives are not satisfactorily settled by the magistrates, they have the privilege of appealing to the lieutenant-governor of the colony. These Zulus of Natal are a pastoral people, and discimined to agricultural pursuits, yet under the influence of the British they have extensively engaged in them, and are fast developing the resources of the country. They are trusted by the Europeans, and even favored, except by the Boers.

Evangelization.—Much has been done for the civilization of the natives of Natal. As early as 1835 missionaries of the American Board for Home Missions commenced to preach to them, but the severe persecutions which all Europeans suffered until the British made Natal a colonial possession prevented all successful propagation of the Christian faith for a long time. After the colonial establishment of Natal the Wesleyans went out in force, and greatly promoted the work inaugurated by the American Missionary Society. The missionaries who continued their labors with renewed vigor, and to this day remain in that field. In 1845 the Norwegian Missionary Society sent their missionaries to this territory, and in 1847 Berlin missionaries augmented the already strong force of Christian workers. Another German missionary society, that of Hermannsburg, in Hanover, sent helpers in 1854, and soon found several stations wherein to preach Christ. Still more recent missions in Natal were founded by the Anglican establishment, through the agency of the now world-renowned rationalist, bishop Colenso, in 1856. His efforts secured much interest for Natal, and caused it to be made a diocese, and he himself became its superintendent in 1855. His departure from the orthodox faith caused his removal; but he still continues his interest in colonial missionary labors, however inconsistent his efforts for the propagation of the Christian faith may seem with his avowed theory of Scripture. The Scripturist and Bible Society of the Reformed Church of Holland has established several stations, and it is also meeting with much success in spreading Christianity among the Zulus. The American mission, which is served chiefly by Presbyterian and Congregational ministers, in 1870 maintained nineteen stations and out-stations, with twelve churches, and about five hundred native members. The Roman Catholics also labor in Natal in force, and maintain a bishopric. Aside from conversions which have been effected, the natives are not only benefited, at least indirectly, in their morals, but their mental cultivation has been greatly improved. Schools are numerous and well patronized. In 1870 there were seventy-nine schools sustained by the British colonial government, with an average attendance of 1797 pupils, besides a large number of excellent schools maintained by the missionaries in different parts of the country, prominent among which are the American mission schools in the coast range, and those of the Church of England, of the Wesleyans, and of the Free-Church of Scotland. The colonial schools are under the control of a superintendent of education, and Natal, it is said by those who are competent eye-witnesses, boasts a superior school system. See Mann, The Colony of Natal (Lond. 1860); Muir, The British Col. of Natal (1863); Great, Zululand, or Life among the Zulu-Kaffirs of Natal and Zululand (Phila. 1865, 12mo), especially valuable on mission work up to 1860; Chapman, Travels in the Interior of South Africa (Lond. 1868, 2 vols. 8vo), vol. i, ch. i sq.; Grundemann, Missions-Atlas, pt. i, § 15: Newcomb, Geographical a. v.; The Quarterly Review (London), vol. lviii, art. i.

Natal days, a name applied in early ecclesiastical language, especially in martyrologies and funerary inscriptions, not only to the natural, but also to the spiritual birth. See NATALITIA. The term was also used in many ways, thus: (1) Natalae episcopalis, the day of a bishop's ordination, observed as an annual festival. (2) Natalis Christi, day of our Lord's birth (Christmas). See CHRISTIAN. (3) Natalae martyrum, anniversaries of the martyrs; their sufferings and death being called their nativity. (Commemorations of martyrs may be traced back to an early date. The feast days of the innocents and of the Maccabees were celebrated before the time of Chrysostom. See MARTYRS, FESTIVALS OF.) (4) Natalae urbium, the two annual days kept in memory of the foundation of the two great cities.
NATALIS

Rome and Constantinople. (5) Natalis genuinis, in memory of the emperor's birthday, and (6) Natalus insep- ritae, in memory of his landowners. Both birthdays were forbidden to be celebrated in Lent. (7) Natalis calicus, the Thursday of Easter. (8) The day of baptism was also called Natalis spirituus. See Esdrie, Eccles. Cyclop. s. v.; Bingham, Antiquities of the Chris- tian Church, ii. 158, 1124, 1170; Aeschbach, Kirchen-Lex. iv., 921. There is a Latin Encomium Anon., attributed to Sie- gel, Christi. Alterthümer (see Index in vol. iv.); Marti- nigny, Dictionnaire des Antiquités, s. v. Natalis.

Natale (Latin Natalis), E. Simon, a Spanish Jesu- uit, was born at Majorca in 1507. An intimate friend of Ignatius Loyola, he entered the Society of Jesus in October, 1545. After having executed several commissions at the Council of Trent, in Africa, and in Sicily, he established at Messina a college, in which he taught theology and Hebrew from 1552. He was afterwards charged by the founder of his order to pro- moulgate in Sicily, Portugal, and Spain the constitutions of the society. Nov. 1, 1584, he was made vicar-gen- eral to Ignatius Loyola. Pope Julius III designated Natalis in the following year to accompany cardinal Morone, legate of the holy chair, to the Diet of Augsb- urg. June 19, 1558, after having declined the chief command of the society, which was given to Lainez, he was nominated assistant for Germany and France, and undertook in the interest of the order several missions to Spain under the nomination of Phillip II. In March, 1566, he exe- cuted the mission which was begun at the Diet of Augsburg the rights of the Church and of the holy chair, and on his return to Rome solicited, as vicar-general of Francis Borgia, the confirmation of the Order of Ignatius from Gregory XIII. At last he spent several years in Fland- ers, where he was consecrated bishop and the head of the work by whomever he is principally known, and which is much sought after by amateurs for the engravings with which it is ornamented. He died at Rome April 3, 1580. His principal work is, Annotationes et meditaciones in Evangelia qui sa sacrosancto missae sacrificio tota anno le- quatur, cum eorumdam Evangeliorum commentaria histori- ria integritat sufficiens. Accessit et index historiarum ipsarum Evangelicorum in ordinem temporis vicis Christi distributa (Antw. 1594, fol., engraved title, 595 pages).

This work, of which the price is still very high, is ornam- ented with 153 plates engraved upon copper by Je- rome brother, Wiertz, and Colaut, from designs by Martin de Vos and Bernardin Passeri. These engravings, copied and engraved upon steel, have served to illustrate a Vie de Jésus Christ, by abbot Bispot (Paris, 1858, 2 vols. fol.), at the head of which is found a no- tice of Natalis and an explanation of the engravings:—Scoliorum in Constitutiones et Declarationes sancet Patri- nominis sive passiones sive miracula sive superstitions (preserved in MS, form in the library of the Jesuits at Rome). See Hoefer, Nouv. Biog. Générale, s. v.

Natali, Carlo, called II Guardolino, an Italian painter and architect who devoted himself largely to sacred subjects, was born at Cremona about 1590. He studied successively under Andrea Mainardi and Giuseppe Maria Cresci, and subsequently resided in a number of years at Rome and Genoa, observing all that was most valuable, and exerting his own tal- ents in the art. Among his best paintings is his St. Francesca Romana, in the church of S. Gimignano at Cremona, which Lanzi ranks above mediocrity. Natali did not execute many works in painting being principally devoted to architecture. His edif- ices are principally at Genoa and Cremona; but none of them are mentioned. He was living in 1688.

Natali Francesco, a painter who devoted him- self mostly to sacred art, was the brother of Giu- seppe, whose style he adopted, and whom he nearly approach in his compositions in dignity. He exe- cuted many works on a large scale, for churches in Lombardy and Tuscany. He was also much em- ployed at the courts of the dukes of Massa, Mode- rno, and Parma, in which latter city he died in 1728.

Natali, Gio. Battista, an Italian painter and architect, the son of Carlo Natali, devoted himself to secular and religious subjects. He was born at Cremona about 1630, and was instructed in both arts by his fa- ther, and afterwards went to Rome for improvement, where he pursued his studies under P. da Cortona. On returning to Cremona he was employed for the church- es, and established a school of painting upon the prin- ciples of Cortona, although without many followers. There is a large painting by him in the Predicatori dis- playing some skill, representing the Holy Patriarch burning heretical books, which Lanzi says is not un- worthy of a follower of Cortona. As an architect, none of his works are mentioned. He died about 1700.

Natali, Giuseppe, an eminent painter of sacred and secular art, was born at Casal Maggiore, in the Cremonese territory, in 1652. According to Zaist, poss- essing a natural genius for the art, he went to Rome, notwithstanding the opposition of his father; and from thence to the North, where he was admitted to the works of Domenico, Colonna, and Mitelli, the most fa- mous popular and architectural painters of the age. He flourish precisely at the period when the archi- tectural painters consider the happiest for their art. Lanzi says, "He formed a style at once praiseworthy for the grandeur and beauty of the architecture, and the elegance of the ornamental parts judiciously in- troduced. He grante the eye by presenting those views which are the most charming, and gives it repose by distributing them at just distances. In his grotesques he retains much of the antique, shun- ning all useless exhibitions of modern fagades, and varying the forms to follow the nature of the landscape. The softness and harmony of his tints elicited great commendation." Natali found abundant employment, and decorated many churches and public edifices. He also executed a great many oil paintings, which were in the highest repute. He died in 1722.

Natalis, a term used in the early Church for the days on which martyrdom was suffered by some of her number, as if they were birthdays; and just as the heathens used to have festivities on memorable days, so these early Christians used to celebrate annually such birthdays of martyrs into the kingdom of God. The graves of the departed were visited, and after a time festivities were observed. See Hase, Ch. History, p. 69. See also Natalitii.

Natalis thc Theodotian. See Theodotius.

Natalis (Norli), Alexander, a distinguished Ro- man Catholic theologian, was born at Rouen Jan. 19, 1639. He studied at first in the Dominican school of his native city, and joined that order in May, 1655. His talents having attracted the attention of his superiors, he was sent to Paris, where he first studied, then taught, the- ology, and received the degree of D.D. in 1657. Col- bert appointed him to write a history of the Church, and in consequence he published in 1677 the first vol- ume of his Selecta historiae ecclesiasticae capitai e loca gisund insignia dissertationes historico, criticas, dog- maticas, the twenty-fourth and last volume of which appeared in 1688. It extends down to the close of the Council of Trent. It is written in Latin, and is valuable in Gal- licanism, learnedly, but in a dry, scholastic style. This was followed by the Historia ecclesiastica Veteris No- rigne Testamenti (Paris, 1699; Luca, 1754; Bingen-on-the-Rhine, 1785-90), one of the most important works of the Gallican school, but the character of which is more dogmatic than historical, and than the first. The same spirit of this work caused it to be condemned by pope
NATANAL

Innocent XI, who by a bull of July 13, 1684, forbade the reading of Natalis’s works under penalty of excommunication, Natalis, however, did not retract, but defended his provincial of his order. His sight began to fail him in 1712, and, becoming entirely blind, he was obliged to discharge his duties. He died in the possession of the Jacobins at Paris, Aug. 21, 1724. His principal works, besides the above, are, "Theologia dogmatica et moralis" (Paris, 1693, 1708, 1743, 1768) — "Propter et regae ad predicatores verbi divini informandos: Expositio litteralis et moralis" (S. S. Evangeliorum, etc., edition nova, fol. 1758, S. 406); "Real-Encyclopedia, x, 222 sq.; Mosheim, Eccles. Hist. vol. ii; Hase, Ch. Hist. p. 8; Schaff, Hist. Christian Ch. i, 28; Hagenbach, Hist. Doct. ii, 199, 206; Ch. Remembrancer, 1865, p. 36; Bibliotheca Sacra, viii, 59. (J. H. W.)

Natalis, Cecilia, is the name of the person who maintains the cause of paganism in the dialogue of Minucius Felix entitled "Octavia." See Minucius. Various conjectures have been made as to who this Natalis was, but there are no sufficient data for deciding the question.

Natalis, Michael, a Flemish engraver and student of sacred art, was born at Liege about 1689. After acquiring the elements of design under Joachim Sandrart, he went to Antwerp, and studied engraving under Charles Mallery. From thence he went to Rome, and adopted the style of Cornelius Bloemert, which he followed with some success. He engraved a number of plates after the great Italian masters; also a part of the plates in the Giustiniani Gallery, in concert with Regnier Perny, Theodore Matham, and others. On returning to Flanders he was invited to Paris, where he resided some time. His plates are executed with the graver in a free, open style, but are deficient in taste. His drawing is frequently incorrect, and the effect is usually cold and heavy, but his strokes are clear and regular, and he handled the burin with great facility. His portraits are his best productions. A list of his principal plates is given in Spooner's "Bibl. Hist. of the Fine Arts," ii, 609.

Natalitius, i.e. natal days of the saints. Tertullian and other ancient writers use the words "natalitias" and "natales" in speaking of martyrs, not meaning their natural birth, but their nativity to a glorious crown in the kingdom of heaven. See above, NATAE DAYS. In this context, Tertullian says St. Paul and St. Peter had no new nativity at Rome, because he suffered martyrdom there. He explains it on the ground that the death of a martyr is not properly a death, but an endless life; for the sake of which all things are to be endured, and death itself to be despised. See: Tertullian, De Cor. Mil. cap. 3; Oblationes pro defunctis, pro natalitiis, annum de jucunda; Conc. Lat. can. 51, Μαρτυρίων γενέθλια; Ambrose, Hom. 70; Bingham, Antiquities of the Christian Church, ii, 1161; Walcott, Sacred Archaeology, s. v.

Natsanosh, Joseph Saul, a rabbi of note, was born in the year 1808. He received a strictly religious education in conformity with the traditions of his family; and even as a youth showed great mental ability and rare diligence. When hardly nineteen years of age he composed, together with his brother-in-law, the deceased Marcus Wolf Ellinger, a learned work entitled בֵּי מַטְנָה (Wilna, 1839); — יִשְׂרְאֵל, comments upon the Orach Chajim (the Jewish ritual), in two parts (Lemberg, 1832-37): — הָאְדָמָה, critical notes on the Talmud, to be found in the edition of the Talmud (Slubota, 1824-30; Vienna, 1832-46): — הַדֶּבֶשׁ, comments upon Alfas's Sefer ha-Nakachoth, published with Alfas's work and commentaries (Presburg, 1839). From the year 1840 religion began to gain in the Jewish community of Lemberg, he sided with the conservatives, but when the strife became more intense and reckless, he withdrew from all participation in the matter, and devoted his time to study. From all parts of the world the most difficult questions were sent to him. Being considered the highest authority in ritual questions, his opinions were always deferred to. In the year 1858 Natsanosh was appointed to the rabbinship of Lemberg, which position he held until his death, March 5, 1875. See Fürst, Bibl. Jud. iii, 25 sq.; Jewish Messenger, New York, 1875. (B. F.)

Nataph. See STACZ.

Nataratorium (a swimming-place), a term used by some writers when describing the baptistery. Farrar, Eccles. Dict.; Bingham, Antiquities of the Christian Church, ii, 310.

Nathan (Heb. Nathan; נָתָן, i. e. by God; Sept.Ναθανίας, but in the later books Ναθανίας, and so Josephus; Ναζανίων, and so Paul the apostle, Acts vii, 4, 5, etc.), the name of five or six men.

1. The eleventh in descent from Judah, being the son of Attai and father of Zabad (1 Chron. ii, 86). B.C. post 1612.

2. An eminent Hebrew prophet in the reign of David and Solomon. If the expression "first and last," in 2 Chron. ix, 29, is to be taken literally, he must have lived late into the life of Solomon, in which case he must have been considerably younger than David. At any rate he seems to have been the younger of the two prophets who accompanied him, and may be considered as the principal representative of the prophetic school of Samuel. A Jewish tradition mentioned by Jerome (Qu. Heb. on 1 Sam. xvii, 12) identifies him with the eighth son of Jesse (2 Sam. v, 14); but of this there is no probable. He first appears in the consultation with David about the building of the Temple. B.C. cir. 1048. He begins by advising it, and then, after a vision, withdraws his advice, on the ground that the time had not yet come (2 Sam. vii, 2, 3, 17). See Ewald, Israel, Gesch. ii, 592. He next comes forward as the reprover of David for the sin with Bathsheba; and his famous apostrophe on the rich man and the ewe lamb, which is the only direct example of his prophetic power, is addressed by him; at the same time he has a word of warning (2 Sam. xi, 12—12). B.C. 1055. There is an indiscernable trace of his appearing also at the time of the plague which fell on Jerusalem in accordance with the warning of God. "An angel," says Eusebius (Euseb. Prep. Ev. ix, 30), "pointed him to the place where the Temple was to be, but forbade him to build it, as being stained with blood, and having fought many wars. His name was Diannah." This was probably occasioned by some confusion of the Greek version, ἀνάθεμα, with the parallel passage of 1 Chron. xxii, 8, where the blood-stained life of David is given as a reason against the building; but where Nathan is not named. B.C. cir. 1017. On the birth of Solomon he was either specially charged with giving him his name, Jedidah, or else with his education, according as the words of 2 Sam. xii, 25, "He sent [or "sent him"] by [or "unto"] the hand of Nathan," are understood. B.C. cir. 1004. At any rate, in the last verse of that chapter he is called the son of David, who, by taking the side of Solomon, turned the scale in his favor. He advised Bathsheba; he himself ventured to enter the royal presence with a remonstrance against the king's apathy; and at David's request he assisted in the inauguration of Solomon (1 Kings i, 8, 10, 11, 22, 24, 25, 29, 38, 40). B.C. cir. 1013. His son Zabud occupied the post of "king's friend," perhaps succeeding Nathan (2 Sam.
NATHAN BEN-JECHIEL

3. A native of Zobah, in Syria; the father of Igul, one of David's mighty men (2 Sam. xxii, 36; 1 Chron. xi, 38). B.C. cir. 1040.

4. A son of David (2 Sam. v, 14; 1 Chron. xiv, 4), from whom the evangelist Luke has reckoned the genealogy of Jesus, the mother of Jesus (Luke iii, 31). B.C. cir. 1092. See GENEALOGY. In 1 Chron. iii, 5 Nathan is said to have been "the son of David by Bathshua," i.e. Bathsheba, but the rendering has been questioned. To him must probably be referred the words of Zech. xii, 12 (see Henderson, Min. Proph. ad loc.), though some have interpreted it as the house of the prophet Nathan standing for the family of the prophets. See DAVID.

5. One of the head men who returned from Babylon with Ezra on his second expedition, and whom he dispatched from his encampment at the River Ahava to the colony of the Jews at Casiphia, to obtain thence some Levites and Nethinim for the Temple service (Ezra viii, 16). B.C. 458. "That Nathan and those mentioned with him were laymen appears evident from the concluding words of the preceding verse, and therefore it is not impossible that he may be the same with the son of Bani, who was obliged to relinquish his foreign wife (Ezra x, 29); though on the other hand these marriages seem rather to have been contracted by those who had been longer in Jerusalem than he, who had so lately arrived from Babylon, could be." B.C. 458.

Nathan ben-Jechiel, also called Aruk (אֲרָעִק), or Baal ha-Aruk (בָּאָל הַ-אֲרָעִק), from the fact that he is the author of the celebrated lexicon denominating Aruk, a distinguished Jewish lexicographer, was born in Rome about 1030, where, like his ancestors before him and his descendants after him, he was held in the highest estimation for his extraordinary learning, and it was said of him, "pertinens omnium generis scientiarum fusae." Though busily engaged in faithfully discharging the responsible duties devolving upon him as rabbi of the Jewish community in the Eternal City, and in attending to the Hebrew sanctuary at Rome, where he was the president, R. Nathan devoted all his spare time for the greater part of his life to the writing of that important lexicon which has obtained such a world-wide celebrity. From the words of the epilogue which R. Nathan himself appended to it (his lexicon was completed on Tuesday, the nineteenth day of the month on which the Temple was destroyed by the despised one [i.e. Ab= end of July], 4861 after the creation [=A.D. 1101], 1032 after the destruction of the burned Temple, 1413 of the Seleucid era), it will be seen that he finished this lexicon the year 1101. According to Mr. Etheridge, the work was completed in the year 4865, answering to A.D. 1106; it may be that he read הָעָרְקָא הָדָא вместо הָעָרְקָא instead of הָעָרְקָא. Five years after the completion of the work Jechiel died, A.D. 1106. The lexicon is distinguished Aruk (אֲרָעִק), to arrange, to set in order), i.e. arrangement of the words in alphabetical order, and extends over the Mishna, both the Gemara, the Midrashim, and all the Chaldee paraphrases. It has been said of him—A life of Solomon (2 Chron. xxix, 22), and a life of Solomon (2 Chron. ix, 29). The last of these may have been incomplete, as we cannot be sure that he outlived Solomon. The consideration in which he was held at the time is indicated by the solemn announcement of his death in the inner court of the Temple (Ezra i, 29). The peculiar affix of "the prophet," as distinguished from "the seer," given to Samuel and Gad (1 Chron. xxix, 29), shows his identification with the later view of the prophetic office indicated in 1 Sam. ix, 9. His grave is shown at Bialul near Hebron (see Robinson, Bib. Res. i, 216, note). was published at Fiesaui, 1515, and often afterwards. An edition was published at Amsterdam in 1655, with the additions of B-Mussafia (q.v.), which edition was republished by M. I. Landau with his own notes, in 5 vols., under the title H. D. V. or Rabinische-Aramäische-Deutschs Worterbuch zur Kenntniss des Talmud, der Targumim und Midrashim, etc. (Praha, 1813-19). A convenient edition of the Aruk, with the supplements of the Talmud, is published at Lomano, and Berlin, has been published by H. Sperling (Leipzig, 1857); still later annotations to the Aruk, with emendations and critical notes, appeared by R. Lindermann, under the title הָעָרְקָא הָדָא (Bert. 1864; see Frankel, Monatschrift, 1865, p. 398 sq.); and a still later edition was published by Lomano and Berlin (Leipzig, 1865), and the latest edition is that of Lomano (1874, 2 vols.). To the honor of R. Nathan be it said—though it does not redound to the glory of modern scholarship—that his Aruk is still the only clew to the ancient Jewish writings which are so important to Biblical literature and exegesis. See the masterly biography of R. Nathan by Rajaport in the Hebrew periodical "Hebraica," v. 4, 1882, etc. For R. Nathan, see H. D. V. (xii, 1-79; xi (fidi, 1890). 81-90; Geiger, in Zeitschrift der Deutschen Morgenländischen Gesellschaft, xii, 142 sq., 357 sq.; vi, 818 sq.; Steinschneider, Catalogus Libr. Hebr. in Biblioth. Nathan ha-Babli, one of the most distinguished Mishnaic doctors, was a native of Babylon. In consequence of his high birth, as his father was the prince of the captivity in Babylon, and his marvellous knowledge of the law, both divine and human, which he acquired as a student in the country of his adoption, he was created vicar (י"ע הָעָרְקָא) of the patriarch Simon II ben-Gammaliel II, A.D. 149-158. In the Talmud he is often quoted as a profound scholar of the law (Talmud, 13 b; Boba Jamma, 23 a; Bab. Bava, 117 b), and he materially contributed to the com-
pilation of the Mishna, as he himself compiled a Mish-

na, which is referred to as Mishnah de Rabbi Nathan (מishnah דרבי נתן), and which Jechudah the Holy (q.v.)
made use of in the redaction of the present Mishna. 

Besides this corpus juris, he is also the author of, 1, the 
Abodh of R. Nathan (_ajax רבי נתן), being a com-
pilation of the apothegms and moral sayings of the 
Jewish fathers (יניות), interspersed with traditional 

explanations of divers texts of Scripture, consisting of 
forty-one chapters. Both the historian and moral 

philosopher will find this work an important contribu-
tion to the literary and philosophical history of antiquity. 

Its character is different from the different tractate 

Yeboamoth, and has also been published sepa-

ateously with various commentaries (Venice, 1622; 

Amsterdam, 1778), and with two excellent commentaries 

(Wilna, 1838), translated into Latin, with notes, by 

Francis Taylor (London, 1654), under the title of R. 

Nathan's Tractatus de Patriarcarum Legibus cum notis, but 
in its present form contains later interpolations. —2, of the 

Fifty-nine Rules (ה老爸 עשרת העוסות), a work of 

mathematical import, and which Geiger thinks 

was written by a later author of the same name. See 

Fürst, Bib. Jud. iii, 19 sq.; Kultur- 

Litteraturgesch., der Juden in Asien (Leips. 1849), p. 16 sq.; Zunt, Die 

Gottesdienstlichen Vorträge der Juden (Berl. 1882), p.

part in Smith's Dict. of the Bible (Amer. ed.), iv, 2778, note. 

(B.P.)

Nathan, Isaac, Ben-Kalonymos, a Jewish writer of 
great celebrity, flourished near the opening of the 

16th century. The exact date of either the birth or 
death of this author of the first Hebrew concordance, 

who traces his lineage to the royal family of David, 

has not as yet been ascertained. All that we know 

certainty is that he lived at Avignon, Montpellier, 

or Arles in the time of Benedict XIII, and that his 

writings were called forth by the conduct of this antipope 
towards his people. He was as well known as his 
pupil, Peter de Luna by name, who was declared a schismatic, 
heretic, and perjurer, and who was deposed by the Con-
cil of Pisa (1409), but was still recognised on the 

Pyrenean peninsula, thought that he would secure 

the general recognition of his claims to St. Peter's chair if 

he could bring about the conversion of the Spanish 

Jews. He therefore issued a summons (1412), with 

the sanction of his patron, Ferdinand the Just, king of Ar-

agon, to all the learned rabbins to hold a public contro-

versy at Tortosia, and appointed the learned Jewish 

physician, Joshua Lorqui—or Geromino de Santa Fé, as 

he was called after his conversion—to prove to them 

from the Talmud and other Jewish writings that the 

Messiah, whose advent the Jews were daily expecting, 

had already come in the person of Jesus Christ. To 

escape the threatening dangers, sixty of the most cele-

brated Jewish litterats of Aragon answered the 

summons. They were haled before by don Bidal ben-Beneveniti, Ibn 

Laib of Saragossa, Joseph Albo, the famous author of the 

Hakrin, Sechariah ha-Levi Saladin, Aseric Levi, Bo-

nastruc Desmaitha, Ibn-Joseph, Ibn-Jachja, etc., and 

this most famous controversy of Tortosia lasted twenty-

one months (from February, 1418, to November, 1414). 

Benedict XIII presided over the meeting, which was held 

February 7, 1418, thus addressed the Jews: "Ye learned Hebrews, know that I have not 
come here to discuss which religion is true, yours or 
ours. I am certain mine is the true. Your law was 

formerly the only true law, but it is now abrogated. 

You are connived here solely by Geromino, who has 

engaged to prove to you that the Messiah has come by 

the evidence of your Talmud, which was composed long 
since before your superior to your custom; therefore 

be careful of your arguments." Two treatises were 

prepared for this controversy by Joshua Lorqui, 
or Geromino de Santa Fé, the antipope's champion, 
titled Tractatus contra perfidius Judaeorum et contra 

Talmud, printed in the Bibliotheca Maxima Patrum, 

under the title Iudaeorum et Talmud, tractatus (Frib. 

m. X., 1602). It was in reply to these treatises that 

R. Nathan wrote the work entitled Tractatus contra 

Correction of the Misguided, which has not as yet been 
published. To the same cause is to be ascribed his 

Hebrew concordance, entitled הדרת רבי נתן, or 

דודר רבי נתן, which was designed to enable his brethren to 

rebate the attacks on Judaism, by helping them to find 
easily the passages of the O. T. quoted in support of 

the Messiahsch of Jesus of Nazareth, and by aiding 
them to see that what legitimate construction can be put 
on these passages in accordance with the context in 

which they are found, concordance, to those who have 

denied the plan of the Messiah at least eight years of his life (1437-1445), and in 

which he adopted the plan of the Latin concordance 

of Arlotti, general of the order of Minorites (cir. 1290), 

first appeared with an elaborate introduction (דהרי 

בלייה זכריה) in Venice, 1523, then again, with 

the introduction castrated by the Inquisition (ibid. 

1564, and Basle, 1581). The great value of this work can be 

best ascertained from what Jacob ben-Chajim, who carried 

through the press the Rabbinic Bible (1524-25) in 

Bomberg's printing-establishment, where the concordance 

appears to have been used, saw of it in a manuscript previous to 

his celebrated introduction (transl. by Ginsburg, Lond. 

1867): "But for a certain book, called Concordance, 

the author of which is the learned R. Isaac Nathan, who 

lived some forty years ago, published in our printing-

office at Venice, I could not have corrected the verses. 

This is a precious work; it embrases the points of 

the Holy Bible, and explains all the sacred Scriptures 

by stating all nouns and verbs, with their analogous 

forms, and giving at the heading of every noun and 

verb an explanation, saying the meaning of the word is 

so and so, and branches out in such and such a manner, 

and comments upon each one separately. It also marks 

the text of the original Hebrew, and mentions the 

variations in every prophetical book, and tells in which 

chapter and verse every word occurs. The advantage 

to be derived from this book is indescribable; without it 

there is no way of examining the references of the Massorah, 

since one who studies the Massorah must look into 

the verses which the Massorah quotes, and which, without 

a concordance, would take a very long time to find, as 
you might not know in which propheth the passage referred 
to occurs, and if you knew the prophet, you still might 

not know the chapter and verse. Besides, all the world 
is not so learned in the Scriptures. Whosoever has 

this concordance does not require any more the lexicon 

of Kimchi, for it contains all the roots, whereunto is 

added an index of all the verses in the Bible; none of 

them is wanted. In conclusion, without it I could not 
have done the work which I have done." Nathan's 

concordance was also translated into Latin by Keuch- 

lin (Basle, 1609) and was reissued by the Monas-

tria di Calasio, in his four-volume concordance (Rome, 

1622). It is the basis both of Buxtorf's and Furst's 

concordances. See Steinschneider, Catalogus Librorum 

Hebr. in Bibliotheca Bodleiana, col. 1141-1143; id.

Nathanael (Nathan, but Nathanael in 1 Esdr. ix, 22; for the Heb. NATHAN, gives of God, i. q.
thanaton; comp. Nathana, the name of three men in the Apocalypse and one in the N. T. See also
Nathaniel.

1. A brother of Samuel the Levite, in the time of Jesus (1 Esdr. i, 8); evidently the Nathanael (q. v.)
of the Heb. text (2 Chron. xxix, 9).
2. One of the "sons of Phaисsa" who renounced their Gentile wives after the captivity (1 Esdr. xi, 82);
evidently the Nathanael (q. v.) of the Heb. text (Esdr. x, 22).

3. Son of Samael and father of Eliab among the an-
cestry of Judith (Judg. viii, 1), and therefore a Simeonite (ix, 2). See Judith.

4. One of the earliest disciples of our Lord, concern-
ing whom that name at least, we learn from Scripture little more than his birthplace, Cana of Galil-
ee (John xxi, 2), and his simple, truthful character (John i, 47). We have no particulars of his life.
Indeed the name does not occur in the first three Gospels. We learn, however, from the evangelist John that Je-
sus was called attentively for our number. The scene of his temptation to that of his baptism, having
been proclaimed by the Baptist as the "Lamb of God," was
minded to go into Galilee. He first then called
Philip to follow him, but Philip could not set forth on
his journey without communicating to Nathanael the
wonderful intelligence that he had received from his
master the Baptist, namely, that the Messiah so long
foretold by Moses and the prophets had at last ap-
ppeared. Nathanael, who seems to have heard the an-
nouncement at first with some distrust, as doubting
whether anything good could come out of so small and
inconsiderable a place as Nazareth—a place nowhere
mentioned in the Old Testament—yet readily accepted
Philip's invitation to go and satisfy himself by his own
personal observation (John i, 46). What follows is a
testimonial to the humility, simplicity, and sincerity of
his own character from One who could read his heart,
such as is recorded of hardly any other person in the Bible.
Nathanael is described by his master as "an Israelite indeed, in whom there is no guile"—a true child of Abraham, and not simply ac-
cording to the flesh. So little, however, did he expect any such distinctive praise, that he could not refrain
from asking how it was that he had become known to Jesus.
The answer, before that Philip called thee, when thou wast under the fig-tree, I saw thee," appears
to have satisfied him that the speaker was more than
man—that he must have read his secret thoughts, and
heard his unuttered prayer at a time when he was
slyly screening himself from public observation, as
was, under that glorious sight, his very pious Jews (Tholuck, Comment on John, ad loc.).
The conclusion was inevitable. Nathanael at once confessed. "Rabbī, thou art the Son of God; thou art the King of Israel" (John i, 49).

B.C. 25. The name of Nathanael occurs but once again in
the Gospel narrative, and then simply as one of the
small company of disciples to whom Jesus addressed
himself at the Sea of Tiberias after his resurrection.
B.C. 29. On that occasion we may fairly suppose that he
joined his brethren in their night's venture on the lake
—that, having been a sharer of their fruitless toil, he
was a witness with them of the miraculous draught of
fishes the next morning, and that he afterwards part-
took of the meal, to which, without daring to ask, the
disciples felt assured in their hearts that he who had
called them was the Lord (John xxi, 12). Once there-
fore at the beginning of our Saviour's ministry, and once
after his resurrection, does the name of Nathanael oc-
cur in the sacred record.

This scantly notice of one who was intimately asso-
ciated with the very choicest apostles, and was himself
the object of our Lord's most emphatic commendation,
has not unnaturally provoked the inquiry whether he
may not be identified with another of the well-known
disciples of Jesus. It is indeed very commonly be-
lieved that Nathanael and Bartholomew are the same
person. The evidence for that belief is as follows:
John, who twice mentions Nathanael, never introduces
the name of Bartholomew at all. Matt. x, 3; Mark iii,
18; and Luke vi, 14, all speak of Bartholomew, but
never of Nathanael. It may be, however, that Nath-
anael was the proper name, and Bartholomew (son of
Thomai) the surname of the same disciple, just as
Simon was called Bar-Jona, and Joses, Barnabas. It
was Philip who first brought Nathanael to Jesus, just
as Andrew had brought his brother Simon, and Bar-
tholomew is named by each of the first three evan-
geists immediately after Philip; while by Luke he is
coupled with Philip precisely in the same way as Simon
with his brother Andrew, and James with his brother
John. It should be observed, however, that the other
disciples mentioned in the first chapter of John became
apostles of Christ, it is difficult to suppose that one
who had been so singularly commended by Jesus, and
who in his turn had so promptly and so fully confessed
him to be the Son of God, should be excluded from the
number of the Twelve. But Nathanael, who was at the
final twelve, is inferred with much probability from his
not being proposed as one of the candidates to fill the
place of Judas. Still we must be careful to distinguish
conjecture, however well founded, from proof. To
the argument based upon the fact that in John's enumera-
tion of the disciples to whom the Messiah showed himself
at the Sea of Tiberias Nathanael stands before the sons
of Zebedee, it is replied that this was to be expected, as
the writer was himself a son of Zebedee; and, further,
that Nathanael is placed after Thomas in this list, while
Bartholomew comes before Thomas in Matthew, Mark,
the two names, putting Thomas first and Barthol-
omew second, we cannot attach much weight to this
argument. St. Augustine not only denies the claim of
Nathanael to be one of the Twelve, but assigns as a
reason for his opinion that whereas Nathanael was most
likely a learned man in the law of Moses, it is St. Paul
who tells us (Gal. iv, 20) that "Christ chose his wise-
ness of the foolish men to confound the wise (in
Joh. En. ch. i, § 17).

St. Gregory adopts the same
view (on John i, 38, ch. 16, B). In a dissertation on
John i, 46, to be found in Theor. theol. ii, 370, the
author, J. Kindler, maintains (Nath. v. eire Israelites [Vitche, 1893]) that Bartholomew and Nathanael are
different persons.

There is a tradition that Nathanael was the bride-
groom at the marriage of Cana (Calmer), and Epipha-
nus (Aed. H. i, § 228) implies his belief that of the
two disciples whose names appear on the road to En-
masus Nathanael was one.

The two monographs are extant: Lange, Nath. confessio (Lips. 1756); Pignatelli, De Apostolatu Nath. Barth. (Par. 1560); Robert, Nathanael Barth (Dub., 1815); Hart-
mann, Examen Jo. 41, 47 (Abbon, 1735). See Barthol-
omew.

Nathanael (NaSa'aim), one of the "sons of Ma-
oni," who renounced their Gentile wives taken after the return from Babylon (1 Esdr. iii, 34); evidently the
Nathan (q. v.) of the Heb. text (Ezra x, 39).

Nathanael, called in Arabic Abu-Barkat Hikb Allah bar-Malki, was one of the medical coryphaei of the
Mohammedan dominions in the 12th century, and
was also distinguished as a philosopher and Hebraist,
upon which he was designated Wachkidi-Zemon, i. e.
"the only one of his time." He tried his skill on the
Book of Ecclesiastes (Koheleth), but his commentary, which is written in Arabic, has never been published; the MS. is in the Bodleian Library at Oxford. Isaac ben-Ezra, son of the great commentator, celebrated Abul-Barkat's commentary on Koheleth in a poem (see Dukain, 274). He died in 1048, and his son declares that this Solomonic book will henceforth (A.D. 1143) go by the name of him who has so successfully unlocked its meaning. Comp. Gritz, Geschichte d. Juden, vi, 280 sq.; Zeitschrift der Morgenländischen Gesellschaft, 1859, p. 711 sq.; Ginsburg, Historical and Critical Commentary on the Book of Ecclesiastes, p. 88; Pocock, Notes Miscellaneae ad Portum Mosis (London, 1740), i, 196, where a specimen of this commentary is given. (B. P.)

Nathan-Melech (Hebrew, Nathan-'Melek, נַתְּתָן מְלֵךְ), i.e. Nathan of the king; Sept. Ναθανίας βασιλεύς, a name (A. V. "chamberlain") in the court of Josiah, by whose chamber at the entrance to the Temple were the horses which the kings of Judah had dedicated to the sun (2 Kings xxi, 31). B.C. 626.

Nathan, Fabian, a German divine, flourished in Bohemia during the anti-Reformation period of the 16th century. But little is known of his personal history. He was preaching at Prague, holding at the same time the professorship of Oriental languages at the university of the Bohemian capital, when the victories of Ferdinand II subjected Bohemia to Roman rule and to Jesuitic interferences. Up to 1615 the Bohemians had been favored with Protestant preaching in the German tongue, out of respect for theuctor of Saxoncy and at his intercession; but the Jesuits, determined that all Protestant ideas should be crushed, caused the States to pass an edict forbidding even preaching in German, and consequently brought about also the dismissal of those who had preached in the German; and on Oct. 29, 1622, the last four Lutheran clergymen who had remained in the country were obliged to leave. Among these was Nathan. He went to Brunswick, Germany, and there died about 1640. Nathan was an able defender and propagator of the Reformed doctrines, and deserves to be ranked among those who suffered martyrdom for conscience' sake. Although he did not die at the stake, he yet suffered expulsion from the field of his labor and separation from the flock which deeply loved him. See Pescheck, Reformation and Anti-Reformation in Bohemia (London, 1845, 2 vols. 8vo), ii, 32-33, 414. (J. H. W.)

Nation. This word in the Author. Ver. generally represents the Heb. "בִּשָּׁלֹם, l. the nation as a body politic; in pl. וּמָשָׁל, esp. of foreign nations, the Gentiles (q. v.); usually in the Sept. אֲנָשָׁן, Vulg. gens, gens. Sometimes it represents the Heb. הָעַם, which means esp. the people (q. v.), Sept. λαός; in poetry, עַמָּה, עַמִּים; and in Chald. Aramaic. It means sometimes all the inhabitants of a particular country (Deut. iv, 34), the country or kingdom itself (Exod. xxxvi, 10; Rev. vii, 9); sometimes countrymen, natives of the same stock (Acts xxvi, 4); sometimes the father, head, or original of a people (Gen. xxv, 33). In the prophets the term "nations" is often used as a general name for the heathen or Gentiles (Isa. ix, 2; comp. Matt. iv, 10). See ETHNOS.

National Church. See CHURCH AND STATE.

National Covenant. See COVENANT.

National Deities. See MYTHOLOGY; POLYTHEISM.

National Synods. Provincial and national synods have, by immemorial practice of the Roman Catholic Church, the right of condemning heresies and errors, and of correcting abuses of all kinds in particular churches. Paul of Samosata, Photinus, Sabellius, Arius, Eustathius, Apollinaris, the Donastists, Pelagians, etc., were all condemned in particular councils in the first instance. The particular councils of Arles, Orange, Carthage, Toledo, Gangra, etc., pronounced judgments in controversies of faith; not to speak of more recent decisions of the same kind. The objection of Bossuet, Variations: Fleurty, Hist. 1, 142; Palmer, On the Bible, 3, 417; Walcott, Sacred Archd., s. v.; Aschbach, Kirchen-Lezikon, s. v., National Synoden. See SYNODS. (J. N. P.)

Native tree is probably the meaning of the Heb. word פָּרָשָׁה, ےדָּךְ (Sept. κυδὸς τοῦ Ἁλβάτφυ, Vulg. cedrus Lebanon), in Psa. xxxvii, 35. It is difficult to see upon what grounds the translators of the A. V. have understood it to signify a "bay-tree:" such a rendering is entirely unsupported by any kind of evidence. Most of the Jewish doctors understand by the term ےדָּךְ a tree which grows in its own soil—one that has never been transplanted; which is the interpretation given in the margin of the A. V. Some versions, as the Vulg. and the Arabic, follow the Sept., which reads "cedar of Lebanon," mistaking the Hebrew word for one of somewhat similar form. Celsus (Hierob. i, 194) agrees with the author of the sixth Greek edition of the Christian spurious.TEXT (Eusebius, Adv. Haer., iii, 14, "indigens," or "natural," "one whose "home" or "land") as the meaning of the Hebrew word: with this view rabbi Solomon and Hammond (Comment. on Ps. xxviii) coincide. Dr. Royle (Kitto's Cyc. Bibl. Lit. art. "Errach") suggests the Arabic Ashvak, which he says is described in Arabic works on materia medica as a tree having leaves resembling the gaf or "bay-tree." This opinion must be rejected as unsupported by any authority. Perhaps no specified tree is intended by the word ےדָּךְ, which occurs in several passages of the Hebrew Bible, and signifies "a native," in contradistinction to a "stranger" or "a foreigner." Comp. Lev. xvi, 29: "Ye shall afflict your souls... whether it be one of your own country (כִּי יִהְיֶה בְּבָרָכָם), or a stranger that sojourneth among you (כִּי יִהְיֶה בֵּיהוּדָא)." The word 'yashen, or more properly יִשְׁרָעַי, has been observed, by no means the only meaning of the Hebrew word; for the same word occurs in Dan. iv, 4, where Nebuchadnezzar uses it of himself—"I was flourishing in my palace." In all other passages where the word 'erach occurs it is evidently spoken of a man (Cels. Hierob. i, 196). In support of this view we may observe that the Hebrew word is generally translated "a tree," and is more literally signifies "to be formidable," or "to cause terror," and that the word which the A. V. translates "spreading himself," more properly means to "make bare." The passage then might be thus paraphrased: "I have seen the wicked a terror to others, and behaving with barefaced audacity, just as some proud native of the land." In the Levitical law the oppression of the stranger was strongly forbidden, perhaps therefore some reference to such acts of oppression is made in these words of the Psalmist. See BAY-TREE.

Nativité, Jeanne Le Royer, de la, a French female fanatic, was born at La Chapelle Janson, near Fougeres (Brittany), Jan. 24, 1782. Received as lay sister in Sainte-Catherine de Sienne, and in 1813, when she had been admitted as a domestic at the convent of eighteen, this girl, without education, believed she had divine visions and revelations. Her successive confessors, to whom she related them, sought to calm her troubled imagination; but one of them, less enlightened or more credulous, confirmed the sister in her pious reveries. The abbé Comte, who had the satisfaction which his countrymen have since had to have seen or heard; and on the death of this ecclesiastic, which occurred in 1817, the manuscripts that he possessed were sold to a bookseller, who published them under the title of Vie et Révélations de la sœur de la
NATIVITY OF CHRIST

(Nativity (1817, 8 vol. 12mo). In it are found numerous and extraordinary revelations, in which she predicts many things concerning the Church and the end of the world. A new edition of this in 12mo, which was 40 volumes. The first volume, supplementary, was dictated by the sister to some nun who enjoyed her confidence; like the others, it contains details which might be severely criticized. The author of L'Ami de la religion et du roi gave an analysis and an extract from this work, warning his readers "that not all the revelations of the sister are to be believed as implicitly true, but that some of them are to rest from their ordinary labors, as on the Sabbath and the Lord's day. This is particularly mentioned by the author of the Apostolical Constitutions (Constit. lib. 8, cap. 83): "Let servants rest from their labor on the day of Christ's nativity, because on this day an unexpected blessing was given unto men, in the absence of the Church, the day of the Lord's birth of God, since the Virgin Mary for the salvation of the world." All fasting was as strictly prohibited on this festival, as on the Lord's day; and no one, without suspicion of some impious heresy, could go against this rule, as appears from what pope Leo says of the Priscillians, that they dishonored the day of Christ's nativity and the Lord's day by fasting, which they pretended they did only for the exercise of devotion in an ascetic life; but in reality, it was to affront the days of his nativity and resurrection, because with Cerdon, and Marcion, and the Manichæans, they neither believed the truth of the Gospel. For when the Saviour was born, in opposition to these and such like heresies, the Church was always very jealous of anyone who pretended to make a fast of the nativity of Christ. Finally, to show all possible honor to this day, the Church obliged all persons to frequent religious assemblies in the city churches, and not to go to any of the lesser churches in the country, except some necessity of sickness or infirmity compelled them so to do (Conse. Aurelian. i, can. 27). The laws of the state prohibited all public games and shows on this day as on the Lord's day.

Some students of ecclesiastical antiquity hold the observance of Christ's nativity to be derived from the Encensia, or feast of dedication of churches; others suppose, as is stated in the article CHRISTMAS, that it was designed to supersede the Saturnalia. It is, however, most natural to conclude that, in an age when the clergy were disposed to multiply festivals, the analogy of other events in the Saviour's history suggested the propriety of marking his nativity with a distinct celebration. It was at first observed on the 6th of January; but towards the end of the fourth century we have two distinct festivals, namely, that of the nativity of Christ, on December 25th, and that of the baptism, probably on January 6th.

The festival of the nativity is in the Roman Catholic Church not only distinguished by the advent, but by the observance of three saints' days immediately after it. Wheately gives this singular reason for the colloca- tion of these days: "None are thought fitter attendants on Christ's nativity than those blessed martyrs who have not scrupled to lay down their lives for him, from whose birth they received life eternal." He says, "Accordingly, we may observe three kinds of martyr- dom: the first, both in will and deed, which is the highest; the second, in will, but not in deed; the third, in deed, but not in will. See the Church on what account they suffered, yet it is certain they suffered for the sake of Christ, seeing it was on account of his birth that their lives were taken away." (Commentary on the Book of Common Prayer, sec. iv, p. 200).

Other fanciful reasons have been assigned. It is uncertain at what date without a solemn communion; for Chrysostom, in this very place, invites his people to the holy table, telling them "that if they came with faith, they might lay aside all contention as to the manner in which the place of the manger; the body of the Lord of the holy table, not as before, wrapped in swaddling clothes, but invested on every side with the Holy Spirit." (Chrysostom, Hom. 31, de Philogonio, i, 399). And that the solemnity might be more universally observed, Chrysostom was given credit on this wise, he also scheduled the time when the Virgin Mary for the salvation of the world." All fasting was as strictly prohibited on this festival as on the Lord's day; and no one, without suspicion of some impious heresy, could go against this rule, as appears from what pope Leo says of the Priscillians, that they dishonored the day of Christ's nativity and the Lord's day by fasting, which they pretended they did only for the exercise of devotion in an ascetic life; but in reality, it was to affront the days of his nativity and resurrection, because with Cerdon, and Marcion, and the Manichæans, they neither believed the truth of the Gospel. For when the Saviour was born, in opposition to these and such like heresies, the Church was always very jealous of anyone who pretended to make a fast of the nativity of Christ. Finally, to show all possible honor to this day, the Church obliged all persons to frequent religious assemblies in the city churches, and not to go to any of the lesser churches in the country, except some necessity of sickness or infirmity compelled them so to do (Conse. Aurelian. i, can. 27). The laws of the state prohibited all public games and shows on this day as on the Lord's day.

Some students of ecclesiastical antiquity hold the observance of Christ's nativity to be derived from the Encensia, or feast of dedication of churches; others suppose, as is stated in the article CHRISTMAS, that it was designed to supersede the Saturnalia. It is, however, most natural to conclude that, in an age when the clergy were disposed to multiply festivals, the analogy of other events in the Saviour's history suggested the propriety of marking his nativity with a distinct celebration. It was at first observed on the 6th of January; but towards the end of the fourth century we have two distinct festivals, namely, that of the nativity of Christ, on December 25th, and that of the baptism, probably on January 6th.

The festival of the nativity is in the Roman Catholic Church not only distinguished by the advent, but by the observance of three saints' days immediately after it. Wheately gives this singular reason for the colloca- tion of these days: "None are thought fitter attendants on Christ's nativity than those blessed martyrs who have not scrupled to lay down their lives for him, from whose birth they received life eternal." He says, "Accordingly, we may observe three kinds of martyr- dom: the first, both in will and deed, which is the highest; the second, in will, but not in deed; the third, in deed, but not in will. See the Church on what account they suffered, yet it is certain they suffered for the sake of Christ, seeing it was on account of his birth that their lives were taken away" (Commentary on the Book of Common Prayer, sec. iv, p. 200).

Other fanciful reasons have been assigned. It is uncertain at what
time these festivals began to be observed in connection with that of the nativity. Some Roman Catholic divines in the Middle Ages represented the nativity on the stage. See MARYMASS. Thus St. Francis, about three years before his death, with papal permission, celebrated Christ's nativity. "A manger was prepared by his di-
rection, and the whole scene of the miraculous birth represented. The mass was interpolated before the prayers. St. Francis preached on 'the Nativity. The
angels' choir were heard; a c., ring discipl-declared that he saw a beautiful, reposing in the
manger (Milman, Lat. Christianity, v. 260). The nativ-
ity of Christ has been the frequent subject of students of sacred art. The engraver and the painter have in
all ages since the birth of the Saviour been busy in the
treatment of this historic event on stone and on canvas.
We insert here illustrations of several engravings on
stone and glass which are regarded as superior speci-
mens of sacred art by Christian archæologists. See
Ginsburg, in Loeb's Masorah. A ha-Masoreh, p. 44 sq.;
Fürst, Gesch. d. Karth. u. am. i, 114, 173. (B.F.)
Natta, Jacob, a Christian convert from Judaism, of
whose whole life nothing is known but that he flourished
in the 17th century, and is the author of a treatise written in Italian, Raggioionamento della venuta del Messia contro la dureza ed ostinazione d'Ebrai, i.e., a
dissertation on the advent of the Messiah against the
hardness and pertinacity of the Jews (Venice, 1629; 
Milan, 1644). From his treatise we may assume that
he was an Italian Jew by birth. See Wolf, Bibl. Hebr.
ii, 518; Jöcher, Allgemeine Gesch. d. Lehren, s. v.;
Natural is the rendering in the A. V. of the N. T.
for two Greek words of somewhat kindred significiation:
1, as opposed to artificial, φυσικός, applied only to the
animal nature of men (Rom. i. 25, 27; Jude x) or beasts
(2 Pet. ii. 12); 2, as opposed to spiritual, σπíτικος, ap-
plied to inanimate objects (1 Cor. xv. 44, 46), and to
men in their unconverted state (1 Cor. ii. 14), or as de-
praved (James iii. 15; Jude xix). See Carnal.

Natural Laws. See NATURE, LAWS OF.
Natural Religion. See RELIGION.
Natural Theology is that department of study which
considers the existence and attributes of God as
revealed to us in the natural world. Since no book can
answer as it is compiled from many sources until we
have proof of the existence of such a being, natural
theology is to us the foundation of all revealed religion.
Even if we infer the existence of the being and his
character from the character of the book itself, the proc-
ess is the same in kind as inferring his existence and
character from any other work, so that the proof that we
have from the Bible of the existence of God cannot
be higher in kind than that which we have from nature.
1. Method of Proof. — Natural theology sets out
with the assumption that every event must have a cause,
and that there may be such relations between causes
and effects—such a natural system of matter and force—in
producing specific results, that the existence of a De-
signer may be inferred, and his attributes and character
may thus be revealed. Until these positions are grant-
ed, no step can be taken in this science. If they are
not to be accepted, then a science of natural theology is
impossible. Let the truth of these positions be itself
found in the intuitive beliefs of the human mind.
Natural theology now claims as its field of investiga-
tion not only the whole natural world, but also the
physical, intellectual, and moral nature of man.
2. Claims as a Science. — It being now conceded by
all that the present order of things had a beginning—in
NATURAL THEOLOGY

this sense, at least, that th. was a time when not a single species of plants or anima... now upon the earth had an existence, in fact that there was a time when there was no living thing upon the earth— it is a fair question to ask. How came all these animals and plants here, with all their complex relations for the continuance of the species? How came man here? The hypothesis that living species have always existed as they now are, and that these species have been produced in the most possible: (1) That animals and plants have been produced as the resultants of forces eternally inherent in matter; (2) That they have been produced by the design and organizing power of a personal being. Both of these hypotheses have their supporters, though those who accept the latter by no means agree as to the source of the designating or organizing power, which is manifested in the production of species. It is certain that the large majority of students of nature have seen, in its various different departments, such combinations to produce specific results, such likeness to the works of man—contrivances differing from his only in their grandeur and perfection—that they have believed in a being who has originated, by some method, all the living things upon the earth. The existence of man is taken as proof of the existence of a being like him in the elements of personality, though infinitely above him in wisdom and power. It is claimed that belief in the existence of a personal being is reached by the same process of thought, by which every science has been built up, and by which all the conclusions in common life are reached; that the necessary principles of belief, careful investigation, and sound induction all aid in proving the existence of a personal Creator from the works of nature. It is claimed that scientific process has been more legitimate, and no inference in actual life more in accordance with the common-sense wisdom of the world, than the investigations and the results reached in natural theology. This claim, therefore, a place among the sciences, relying upon the nature of the processes by which its conclusions are reached. The proof of the existence of a personal Creator is, admitted by a large majority of the ablest students of nature and of man.

That natural theology, as it has now been defined, has any just claim to scientific rank is utterly denied by a class of philosophers, positivists, who seek to limit all investigation to observed phenomena, ignoring or denying both efficient and final causes; and also by those who, without denying the abstract doctrine of final causes, affirm that we have no evidence of final cause in the works of nature. They regard the adaptation which we see in nature simply as the result of material means, without any notion of a Supreme Being; and it is asserted that deaf mutes are in the same condition till they are instructed. Granting all the facts stated, the conclusions may be fairly questioned. It does not follow that there is no idea of God present in the mind because it has not formerly come up into language, or because it cannot be detected in the condition of undeveloped savages and uneducated mutts. So constantly has the notion of a God appeared in all ages, that it has been claimed by some that the idea of God is innate. This doctrine, at the present time, is accepted only in this modified form, if at all, that the capabilities of the human mind are such that in its perfect development the idea of God is surely reached in the study of nature and man.

An a priori proof of the existence of God has been accepted by some from the supposed power of the human mind to form a conception of a perfect being. The inference is made from such a power of the mind that a being must exist to correspond to the conceptions of it. This argument in some of its forms has been accepted as proof by such as Paley, Clarke, and other philosophers. As it involves subtle metaphysical...nations, it is certainly not fitted to impress the popular mind; and it has failed to satisfy such acute metaphysicians as Reid and Stewart, who surely could not be charged with undue scepticism.

The idea of a personal Creator has been made to include the study of nature and the study of man as a physical, intellectual, and moral being. It is simple in form, readily apprehended, and has been enforced among thinking men in all ages. Socrates and Cicero are well known among the ancients for their arguments on this subject. The Bible appeals to nature for illustrations of the power and goodness of God. His existence is taken for granted in the first verse of Genesis, on the ground that there is in nature proof of the existence of such a being. In the New Testament we have the testimony of Paul to the fullness and value of this proof (Rom. i, 19-20), and among the fathers there have been many who have dwelt on this subject. The name of Paley, whose name is best known of all those who have entered this field, writers in large numbers have appeared, who have written treatises professively on this subject, or have treated it indirectly in connection with scientific discussions. Some of the ablest arguments have been made in this way; and of late years great additions have been made, directly and indirectly, to such writings (see literature below).

It has been objected to the argument from design that, at best, it only proves the existence of a worker, or world-builder; that it is only in man that we have evidence of the existence of a personal being. The proof of the existence of the creator is added that the creator of man is not necessarily the self-existent God. But the existence of man's creator proves that there must be a self-existent, personal God.

After we reach the proof that our Creator is a personal being, loving justice and truth, we must wait for him to declare whether he is the Almighty or not—whether he shall swear by himself or one greater. Thus we join natural theology to revelation. Natural theology declares a Creator of man, of the heavens and the earth. He declares himself to be the Almighty, which we know from the laws of our belief must exist. We seek for the God who we seek to find ourselves and find one adequate and necessarily eternal.

4. Counter Tendencies of the Present Day.—As already intimate, the positive philosophy, of which Comte is the father, would render the science of natural theology impossible. This science assumes the existence of efficient causes, as a proof, upon final and necessary. Both efficient and final causes positive philosophy forbids us to name as having any relation to science. If they exist, they are to be to us as though they were not.

The doctrine of evolution, which, in some of its forms, is now accepted by many scientific men, is supposed by some to weaken or destroy the proof for the existence of a Creator. This result is claimed by some who hold the doctrine, and denied by others of the same school.

For one who accepts the doctrine of causality, belief in the existence and wisdom of a designer will not be affected at all by the time required or the secondary agencies employed in producing it. Questions which could arise would be in reference to power. When a certain effect is reached, as the production of a tree or animal, with all their complex relations, such an effect demands belief in a cause adequate to produce such a result; and if there is evidence of wisdom and skill in it, the evidence is there irrespective of the time or secondary agencies concerned in its production. The
beliefs that a being of low rank can be raised to a higher rank by any process of development or natural selection, without the same kind in the same way as would be required to produce the being of high rank directly, can arise only by ignoring the plainest principles of causality. Whatever may be the final conclusions of science in regard to the origin of species, they cannot affect the argument for design in the creation of species, nor materially influence the teachings of the Bible. If any difficulty arises, it will be found in harmonizing the teachings of science with the Bible account of creation as to the mode in which the creative power was manifested.

Naturalism is the name given to those systems of the philosophy of nature which explain the phe- nomena by a blind force acting necessarily. This doctrine is to be found in Lucretius, and was held by Leucippus and Epicurus. The Systeme de la Nature d'Holbach, the Encyclopédie, the Principles of Robert, and the Encyclopédie de la Nature of Delia de Sales, also contain it. In the theology the term naturalism is applied to all those forms of belief or speculation which deny the doctrine of a personal God as the author and governor of the universe; being thus opposed to Theism (q. v.). See Literature for a complete survey. See Naturalists.

Naturalists. This name, which has now become nearly obsolete, is used to designate two sections of the antichristian school which rejects belief in supernatural causes or operations. (1) The name has been mostly used by German writers for those who identify God with nature, but who are more generally known as Panteists. (2) By English writers it is generally taken as signifying those who consider natural religion to be sufficient for man's guidance and happi- ness without any supernatural revelation. But these latter may be subdivided also into two classes, the first being those who resist the name of "Philosophi- cal Naturalists," who accept revelation as containing truth, but as being at the best only a reduplication of natural religion, and so unnecessary. The name is rarely found in works written later than the 18th century, when it was used by Kant in Germany and by Boyle in England; and the school formerly known as Naturalists are now called Panteists and Rational- ists.

Nature. I. New.-Text. Usage of the Word.—In

James 1, 23; iii, 6, the Greek is γενέσις, γεν.; elsewhere, as Rom. i, 26, φύσις. It is variously used for, 1, the laws of the natural or moral world (Rom. iii, 14; xi, 24); 2, birth, origin, or natural descent: "Jews by nature" (Gal. ii, 15; Rom. ii, 27); "Which by nature are no gods" (Gal. iv, 8); 3, Gentus, kind: "For every kind (marg. 'nature') of beasts," etc., "is tamed, and hath been tamed of mankind" (marg. "nature of" "beasts"). 4, the natural or naturalized feeling, acting, as unlightened and unanswared by the Holy Spirit: "The natural man receiveth not the things of the Spirit of God" (1 Cor. ii, 14; comp. Eph. ii, 3). 5. Nature also denotes a customary sense of pro- priety: "Doth not nature itself teach you that, if a man have long hair, it is a shame unto him?" (1 Cor. xvi, 14).

In this work we will use the Hebrews and Greeks for men to wear the hair short.

II. Philosophical Importance of the Word.—The term nature is used sometimes in a wider, sometimes in a narrower extension. When employed in its most ex- tensive meaning, it embraces the two worlds of mind and matter. When employed in its more restricted signification, it is a synonyme for the latter only, and is then used in contradistinction to the former. In the Greek philosophy, the word φύσις was central in its meaning; and the great branch of philosophy, styled 'physical or physiological,' included under it not only the sciences of matter, but all the rest. With us, the term nature is more vaguely extensive than the terms physics, physical, physiology, physiological, or even than the adjective natural; whereas, in the philosophy of Germany, natur and its correlatives, whether of Greek or Latin derivation, are in general expressive of the world of matter in contrast to the world of Intel- ligence" (Sir W. Hamilton, Reid's Works, p. 216, note).

"The word nature has been used in two senses, viz., actively and passively; energetic (=forma formans), and material (=forma formata). In the first it signifies the inward principle of whatever is requisite for the reality of a thing as existent; while the essence, or essential property, signifies the inner principle of all that appertains to the possibility of a thing. Hence, in accu- rate language, we say the essence of a mathematical circle or geometrical figure, not the nature, because in the conception of forms, purely geometrical, there is no expression or implication of their real existence. In the second or material sense of the word nature, we mean by it the sum total of all things, as far as they are objects of our senses, and consequently of possible experience—the aggregate of phenomena, whether exist- ing for our outer senses or for our inner sense. The doctrine of nature would therefore be that which, with the physiology being both ambiguous in itself, and already otherwise appropriated) be more properly entitled phe- nomenology, distinguished into its two grand divisions, somatology and psychology." (Corderidge, Friend, p. 410).

Nature, Human. See Body; Image of God; Soul; Spirit.

Nature, Laws of. In the question raised under this title the following points must be considered: (1) the substance itself of nature; (2) the forces working in and through it; and (3) their production always of identical results under identical circumstances. This immutable connection is intuitively considered as an inherent necessity, the result of experience as assumed by reason. On the other hand all the known laws of nature are sometimes considered as a whole, terms of which the forces of nature, the virtue of the law, the power of the force, the force of nature, forcibly working, and by the combination of all its inherent forces, gives rise to all effects. In this sense, however, natural law can only be fully appreciated by contrast. This is afforded in two ways by theology, in which it gives rise to theories that have attained at times undue preponderance. We find it first in the do-
NATURE, LAWS OF

main of apologetics and dogmatism, where natural law requires the creative power of the living God to explain not only the creation, but also the preservation of the universe. We find it next in the province of morals, where the distinction between the causality of the natural and the moral law is, in short, between natural law and moral law, to be established. In both instances the laws of nature are opposed to the effects of freedom; but in dogmatism it is the freedom of the Creator as the absolute master of his creation, while in ethics it is the freedom of man as the member of a society. Hence the universality of the moral law of God, and therefore of man, to be absolute and binding, the absolute necessity of freedom and the freedom of man, in and through natural and moral law, is to be established.

I. In Dogmatism, the first point which arises is to ascertain whether the laws of nature, inherent in the creature and in the world, admit or exclude the co-operation of God; and in the latter case whether, according to the pantheistic idea, nature itself is God; or whether, according to the deistic theory, God, after creating the universe, left it to the exclusive guidance of natural laws. The answer to these questions settles also that of the admissibility of miracles. It is well known that Schleiermacher, and still more emphatically Strauss, have denied the existence of miracles from the standpoint of materialism. It was pointed out by Glaube, § 46) that religious consciousness, as a simple feeling of dependence, is identical with the knowledge that all which afflicts or influences us is caused by and results from natural causes; and (§ 47) that the interests of piety can never give rise to the necessity of miracles: in other words, that their origin is in intelligence, in such immediate dependence from God as to deny its taking its source in the general laws of nature. Every absolute miracle disturbs the whole order of nature, both negatively as regards the past, as the miracle contradicts all previous observations, and thus appears to supress the laws of nature, and positively with respect to the future, in which everything is changed at once from what it would have been had not the miracle occurred, so that every miracle not only disturbs forever the whole connection of the original organization, but every new miracle also annuls the preceding, in so far as they have come to be counted among the working agencies.” See MIRACLES. It will be sufficient for our present purpose to refer to K. Rothe’s answer to the views of Schleiermacher in the (Studien u. Kritiken, 1859, i, 27-40): “If the course of the universe is an arithmetical sum, the factors of which, innumerable as they are, always move in free motion, whether in the world of nature, the free motion of the universe is something like the clock-work of a music-box, in which the melodies to be played were from all eternity pinned in the cylinder, then, certainly, there can be no room in the universe for miracles. These have for their basis a positive independence with respect to God, although not interfering with absolute dependence upon him; there is a real distinction and separation between the divine causality and that of the creature, and also in the operation of freedom in the world. . . I respect the laws of nature, and rejoice at every advance we make in their knowledge. God himself has subjected to them the forces of nature, but he has not subjected to them his liberty or his almighty will. He has retained undisturbed his absolute liberty, and his sovereignty in the universe he has created. Miracles prove that the laws of nature, while they are the greatest power in the world, are yet subject to the government of him who created them, the everliving God.” Thus the laws of nature are the work of the eternal Law-giver and loving Governor.

II. In Ethics we have to consider the connection between inanimate and unreasonable creation and person- alities, or, in other words, the relation between natural and moral law. The distinction is generally drawn by the definition that natural law implies a state of being, moral law a volition. The first belongs to the domain of necessity, the latter to the province of free-will.

Schieirmacher has, indeed, sought to lessen and even to destroy this distinction of the phenomena and noumena of Kant and Fichte, i.e., of a theoretical and a practical reason of an object and a subject; and for that purpose has resorted to Schelling’s philosophy of identity. This system upholds the doctrine that the human will, as the seat of spirit, and points to the “will” ever arising from dead nature. Thus in his interesting treatise, Über u. Unt- erschied zwischen Natur- und Sittenes. (in his Sämmt- liche Werke, III, iii, 897-417), he seeks to equalize them. According to the common view (p. 400), the natural law must contain a general expression of what really occurs in and through nature, and the moral law of what should occur in and through reason in her domain. Yet here we find again the obligation of the moral law based upon the existence of the mind, and of the respect for the law to which its observance relates. On the other hand (p. 409, 410) the natural law is also connected with an obligation, implying that all does not fully and perfectly proceed according to the law. Thus monstrosities and diseases stand in the same relation to the laws of nature, in whose domain they occur, as immorality and disobedience do to the moral law. Among the elementary forces and processes of nature we find, as in the organization of vegetable and animal life, (§ 43), that in nature, are not the effects of a new principle; they are only a deficiency of those of vegetation and animalization. So also “in the domain of spiritual life we find deviations corresponding to its nature, which we find in that of vegetation and animalization. We even find deviations for which, after having found their original in intelligence and wisdom, in such immediate dependence from God as to deny its taking its source in the general laws of nature.” Every absolute miracle disturbs the whole order of nature, both negatively as regards the past, as the miracle contradicts all previous observations, and thus appears to supress the laws of nature, and positively with respect to the future, in which everything is changed at once from what it would have been had not the miracle occurred, so that every miracle not only disturbs forever the whole connection of the original organization, but every new miracle also annuls the preceding, in so far as they have come to be counted among the working agencies.” See MIRACLES. It will be sufficient for our present purpose to refer to K. Rothe’s answer to the views of Schleiermacher in the (Studien u. Kritiken, 1859, i, 27-40): “If the course of the universe is an arithmetical sum, the factors of which, innumerable as they are, always move in free motion, whether in the world of nature, the free motion of the universe is something like the clock-work of a music-box, in which the melodies to be played were from all eternity pinned in the cylinder, then, certainly, there can be no room in the universe for miracles. These have for their basis a positive independence with respect to God, although not interfering with absolute dependence upon him; there is a real distinction and separation between the divine causality and that of the creature, and also in the operation of freedom in the world. . . I respect the laws of nature, and rejoice at every advance we make in their knowledge. God himself has subjected to them the forces of nature, but he has not subjected to them his liberty or his almighty will. He has retained undisturbed his absolute liberty, and his sovereignty in the universe he has created. Miracles prove that the laws of nature, while they are the greatest power in the world, are yet subject to the government of him who created them, the everliving God.” Thus the laws of nature are the work of the eternal Law-giver and loving Governor.

Nau, Michel, a French missionary, was born at Paris in 1651, of distinguished, noble parentage. He joined the Society in 1656, and, as his superior had been intrusted to him the direction of the studies of the two princes De Longueville, appointed him to the missions in the East. He travelled over Mesopotamia,
Syria, Persia, and Armenia, where his zeal, and the conversions that he wrought, more than once excited the Musulmans against him. Exhausted in strength, he returned to France in 1602, and died at Paris March 8, 1605. He have of his works, Voyage noumnes contre la Terre Sainte, enrichi de plusieurs remarques servans à l'intelligence de la Sainte Écriture (Paris, 1679 and 1702, 12mo; a book at the same time curious, edifying, and useful)—Ecclesia Romana Graecoue vera effigies et consensum, ex variis tum recevissimorum tun antiquissimorum monumentum. Aces referre Christi, et de la Que de la Vente de la Bibliothèque du Cardinal Mazariis, 1592). On receiving an invitation from queen Christina of Sweden to be her librarian, Naudé went to Stockholm in 1622, where he was very well received. The climate of Sweden not agreeing with his health, he set out to return to Paris, but on his way home died suddenly in 1553. Naudé was a decided opponent of the Huguenots, and urged severe measures for their extinction. He claimed that France suffered by permitting Protestantism to spread in its borders. Protestant writers are wont to claim, and that of course justly, that the stagnation of trade in France was consequent upon the removal of the Huguenots; but Naudé claims that "had all the heretics in France been cut off, the country would afterwards have enjoyed perfect tranquillity." Yet to his credit it must be said that, however self-opinionated and paradoxical, Naudé was a man of irreproachable character, and a truly learned man. Many are the eulogies and epitaphs which have been written in his honor. See Jacob, Gabrielle Naudé Tumulus (1659); Sainte-Beuve, Portraits littéraires (1865).

Naučí is the name of a bull which the Hindus regard as sacred because he is the rham of Nabadwara, near Sitapur, and his form is that of the soul of Osiris (q. v.). The Egyptians believed that when Apis ate out of the hands of those who went to consult him the answer was favorable. "The Hindūs," says Bartholomew, "place rice and other articles before their doors as the animal passes along in their procession, and if he do not stop to taste them, consider it as a fortunate event. This, at least, he is very prone to do, to the serious injury of the Hindū shopkeepers, as he wanders, not in his most sacred capacity, through the streets of Calcutta and other towns." Naudé is held in great reverence among the Hindus, and is one of the most sacred emblems of Siva. Naudé is by some described as the emblem of justice. See Coleman, Mythology of the Hindus, p. 64.

Naudi, Angelo, an Italian painter of religious subjects, flourished in the 16th century. He was a pupil and imitator of Paul Veronese. Naudi went to Spain, where, according to Palomino, he passed the greater part of his life, and executed many works for the churches at Madrid, which are highly commended by the author of Lives of the Painters. He was once appointed to the service of king Philip, in whose service he continued a long time. See Spooner, Biog. Hist. of the Fine Arts, ii, 610.

Naushewär, a name among the Hindus for a subordinate incarnation of their god Vishnu (q. v.), described as having taken place at Alemdy, near Poonah, about, as some state, 700, or, according to others, 200 years ago. Naushewar is stated to have been a religious or political leader who has been buried in a temple at the place where his tomb is seen under a splendid temple, and where he yet appears (for, although buried, he is not dead) to pious, if at the same time wealthy visitors. See Coleman, Mythology of the Hindus, p. 390.

Na’ūm (Gr. Naoúy, for the Heb. Nachum, q. v.), the son of Elish and father of Amos, in the maternal ancestry of Christ (Luke iii, 25); apparently the same with Joah (q. v.), son of Amiel (1 Chron. iii, 24). See Genealogies of Christ.

Naumann, Johann Gottlieb, a noted German composer of music, both sacred and profane, was born of very humble parentage near Dresden, Saxony, in 1741. Though Naumann had to struggle against poverty and hardships, his industry never relaxed. He pursued his studies until he made himself one of the
first musicians of his age. In 1765 he was appointed composer to the elector of Saxony. He died of apoplexy in the year 1801. His compositions, which were very large in number, were of all kinds—symphonies, concerto-arias, sonatas, cantatas, odes, compositions for the pianoforte, symphonies, etc. For the last years of his life he devoted himself altogether to the composition of sacred music, and left many valuable works in the library of the chapel of Dresden.

The Augsburg Confession was a meeting of German evangelical rulers and states, held at Naumburg-on-the-Saale from January 20 to February 8, 1561, with a view to harmonizing the evangelical parties in Germany by subscribing anew the Augsburg Confession of 1530. The Protestant German Church was sadly divided on dogmatic grounds; the Council of Trent was to meet again, and the desire of the princes who met at Augsburg was to give by their subscription of the Augsburg Confession, not only a uniform Confession to the Church, which might bring about the long-desired peace between the dissenting parties, but also to present to the council a harmonious body and union within the Protestant Church. Since the beginning of the Reformation, theGerman as well as the Swiss Protestant Church had been not only in a constant fight with the Romish Church, but also with each other, which since Luther’s death had not diminished, but rather increased. The new edition of the Augsburg Confession, which Melanchthon published in 1540, made him the mark of those zealots who adhered to the dead letter of Luther, and who attacked and charged him with apostasy, while his adherents the “Philippists,” as they were called, were charged in connection with their master with “crypto-Calvinism.” Besides the Calvinistic and crypto-Calvinistic controversies, the Intermittent (q.v.), Adiaphoriastic (q.v.), Majoritarian (q.v.), Orientalian, Stanavian, Synergistic, and Flaccian controversies disturbed the peace of the Protestant Church. All attempts of the Protestants to have peace among themselves and with the Church of Rome were in vain; but this object was never lost sight of whenever a good opportunity offered itself. Thus in 1557, Feb. 11, a colloquy was held at Worms for this purpose, but Flaccian frustrated it. Another effort was made in the following year, when the Roman king Ferdinand was to be proclaimed emperor at Frankfurt-on-the-Main; some of the protestant princes, among them the Bavarian Landgrave Charles of Baden, landgrave Philip of Hesse, count William of Hohenstein in behalf of the elector of Brandenburg, and Sebastian Glaser in behalf of the count of Henneberg. Some of the delegates and princes, however, especially duke Ulrich of Mecklenburg and John Frederick of Saxony, induced by Flaccian theologians, refused to subscribe the preface, because it was not severe enough in condemning the Lutheran doctrine. The latter even left Naumburg at the fifteenth session, February 5, thus frustrating the union among the Protestants, which was almost achieved, and causing the discord to appear more conspicuous. On the same day the imperial and papal delegates made their appearance, and presented the breve of pope Pius IV, which invited the Protestants to the council; they were especially loud in their praises of the forthcoming council, as the best means of settling all the pending questions. The rulers and states promised to take the matter into consideration; the result of it was that they not only returned the breve in which they were addressed as “obedient sons,” against which address they protested, since they wished neither the pope to be their father nor them to be his sons; but they also refused to attend the council, as in no way would it meet their demands. Finally, they also addressed a letter to the kings of France and of Spain, that they, in favor of the emperor, would not in France, accompanying the same with a copy of the newly-subscribed Augsburg Confession; they also sent a copy to England, Scotland, and Sweden. After having delivered to the imperial delegates a letter for the emperor, the convention was closed on Feb. 8, 1561. See Calilchn, Der Naumburger Fürstantag (Gotha, 1870);

Nauplia, or Napoli di Romania, a seaport town of Greece, and capital of an eparchy of its own name, situated fifty-eight miles south-west of Athens, with a population of 8548 in 1870, was the seat of the Greek government after the independent establishment of the modern kingdom in 1829, and is noted in ecclesiastical history as the place of a national synod held there July 15 to 27, 1883, for the purpose of regenerating the Greek Church. The synod was convened by the then ministers of public worship and of education, instead of the patriarch, who resided at Constantinople, and was subject to Turkish influence. There were many causes for the convocation of the Nauplia Synod, not the least of which was the placing of a papal legate among them, many of them having been consecrated during the war of freedom, and being therefore without patriarchal ordination. At the time of the calling of the Nauplia Synod there were in the Church of Greece twenty-two canonical, or regularly consecrated prelates, and twelve uncanonical episcopoi, i.e., such as had not patriarchal ordination; and besides these some twenty ex-bishops, deprived of their sees by the troubles of the times. The council was therefore called to settle the following two propositions, and they were approved by the twenty-six prelates who attended the synod:

1. The Eastern Orthodox and Apostolic Church of Greece, from the time of the Christian faith Jesus Christ our Lord, is dependent on no external authority, while she preserves unbroken doughty union with all the Eastern orthodox churches. With respect to the administration of the Church which pertains to the canon, she acknowledges the see of Athens as her supreme head, as is in nothing contrary to the holy canons. The divisions of the dioceses of the kingdom followed next. Their number was definitely fixed at ten; and it was decided that each of these see might constitute a diocese, which should bear the name of the province, and that the city which was the principal seat of the bishopry should be the capital of the province. Since, however, by degrees fifty-three Greek bishops came forward who all needed some provision, forty provincial sees were erected for such of them as were still able to superintend a diocese; the remainder were provided for in some other manner. The names of the definitive sees were as follows, the provisional bishoprics we have not thought worth while to insert:

Cordith and Argolis. See of Cordith.
Achalas and Eilis. See of Achalas.
Arcadia. See of Arcadia.
Laconia and Euboea. See of Laconia.
Acarnania and Etolia. See of Acarnania.
Phocis and Lucris. See of Phocis.
Attica and Boeotia. See of Attica.
Euboea. See of Euboea.

It was further arranged that in case of any vacancy of the provincial sees it should not be filled up, but the see should pass to the principal see of the province, whose bishop had his seat in its capital; but this arrangement has not altogether been carried out. The synod is composed of a president, four members who must be bishops, a secretary, a royal commissioner, and supernumerary members. See Neale, Introd. Hist. of the Holy Ercut. Ca. p. i, vol. i, p. 50-61.

Nauta, Elias Elkinden, a Danish divine and educator, noted, however, mainly as a hymnologist, flourished in the early part of the last century. He was a pupil of the late Dr. Oehlenschlager, and died in 1728. He is known by us simply as the author of the Danish hymn translated by Sabine Barney Gould, "When my tongue can no more." See Miller, Singers and Songs of the Church.

Naussa, Friedrich, a German theologian and ecclesiastical diplomatist, was born about 1540 at Bleichfeld, or as some write, Weihenstephan, near Würzburg. After having studied the canon law, he became preacher in the cathedral of Mayence in 1556, and a short time after secretary of cardinal Campeggio; in 1534 he was called to Vienna as preacher of the imperial court, and in 1541 was promoted to the bishopric of that city. He assisted at the Conference of Spire, and was sent to the Council of Trent as amassador of the Roman emperors. Although a declared adversary of the Protestants, he counselled to employ no violence against them, but to have recourse in discussion, in which he excelled. He died at Trent Feb. 6, 1550. He was renowned as one of the first preachers of his time. He was the first to call the Emperor Maximilian's attention to the errors of Erasmus, and published a Controversia in Erasmi communi sensibus intus (Vienna, 1524, 4to):—Ad Carolum I, pro sedendo plebis in Germania tumultu (Vienna, 1525, 8vo):—Miscellaneorum libri ii, prior pro caris canonici, aliter pro missa apologuctica (Mayence, 1527, 4to):—Homiliarum centuriae tres (Colonge, 1590; ibid: 1589, 2to):—Ordinatio Dei in regno Mortis (Mayence, 1531, 4to; Colonge, 1592, 4to: contains details of several extraordinary events of the time):—Predigten über alle Evangeli (Mayence, 1555, 4to):—Sermones quadraginales (Colonge, 1583, 4to):—In Evangenum remodeling (Colonge, 1586, 8vo):—De pueri literis instituendo consilium (Colonge, 1586):—Ad Pannum 111 rurum consistat libri vi (Leipic, 1588, 4to):—Liber i responsorum ad aliquot Germanico nationis adversus sedem apostolicam gravamina (Colonge, 1588, 4to):—De Antichristo (Vienna, 1550, 4to):—De novissima mortuorum reasone (Vienna, 1551, 4to; Colonge, 1555, 8vo):—In consummatione kyias auctri (Colonge, 1550, 8vo):—Libri iii methodi de ratione oncmonici (printed several times):—sermons, funeral orations, works of controversy, etc. Naussa had himself given, in 1547, a catalogue of his writings, published and in manuscript, which is found in the series of Epistolae missarum ad Fr. Naussam: printed and published at the house of De Wolff in 1525 (see Hummel, Neue Bibliothek von seltem Büchern, 6th part). The Werke complete of Naussa have been collected in one volume folio (Colonge, 1616). See Hoefcr, Now. Biog. Générale, s. v.

Nausiphanes, a Greek philospher, was attached to the teachings of Democritus, and, according to Sextus Empiricus, expressed a disharmony of the soul. He had a large number of pupils, and was particularly famous as a rhetorician. Epicurus was at one time one of his hearers, and as the latter could not deny this, although he was anxious to be considered a self-taught man, he was obliged to content himself by abusing him, and maintaining that he had learned nothing from him. See Smith, Dict. of Gr. and Rom. Myth., and Diels, Die Fragmente der Vorsokratiker, 4th ed., vol. ii, 1888.

Nautza (Nautza, Nautar) was the name sometimes given in the early Church to the presbyters (q. v.), just as by similitude the catechumens were sometimes called ναυτόλογος, or ναυστολογος, with reference to the well-known comparison of the Church with a ship, and to the circumstance that the catechumens took their staves and were led to the Bishop at the end of the procession, as the Christian Antiquities, p. 461. See also NAUTOLOGI.

Nautologoi (Nauτολογοι, collecting passengers), a name frequently given to catechists in the early Church. In some authors it was usual to compare the Church to a ship. See Nautæ. The bishop was (ο πρωτάρης) the pilot, the presbyters (οι ναυρες) the mariners, the deacons (οι τρωγεροι) the chief stewards, the catechists (οι...
NAUTOLOGOI

those who were to admit passengers into the ship, and to contract with them for their fare. This was properly the catechist’s duty, to show the catechumens the conditions on which they were to be admitted into the Christian ship.

NAUTOLOGOI. See NAUTOLOGI.

NAVARO. See MORMON.

Navagero, Bernardo, an Italian cardinal, was born at Venice in 1507. He was called to the most important positions of trust in the gift of the republic, being successively sent from home as ambassador to Dalmatia, Constantinople, France, Rome, and the court of the emperor. The doge, Pierre Landu, sought his alliance, and caused him to marry Istriana Landu, his granddaughter, who died some years after her marriage with Bernardo. The latter sought consolation in study and religion, and chose the ecclesiastical career. Pope Pius IV, judging that the place of a man so distinguished was in the sacred college, created him cardinal Feb. 26, 1561, and gave him the bishopric of Verona. He was afterwards sent as legate to Trent, where he assisted at the closing of the council. He died at Verona May 27, 1565. We have by this cardinal Adresses, and the Life of Pope Pius IV. Augustin Valerio has given the life of Bernardo Navagero in his book entitled De cautione addenda in eidem libris (Padus, 1719, 4to, p. 61-98). See Mannin, Elogio del Cardinale Navagero (1814); Aubery, Hist. des Cardinaux.

Navarre, Henry of. See HUGUENOTS.

Navarrette, Alonso, a Spanish missionary, who was decapitated in Japan, June 1, 1617. He joined the Dominicans of Valladolid, and was sent as missionary to Japan. He departed with several of his colleagues in 1594, and made many proselytes. His success troubled the Japanese priests, who denounced him to the coco. Navarrette was brought to trial. It was proved that the missionaries were seeking to produce a change in the state; and the first of his order, Navarrette, was condemned to be beheaded. We have of his works, Epistola ad fratres ordinis in Japonia, and several other letters to the Dominican missionaries in Japan. See Hoeber, Nouv. Biog. Générale, s. v.

Navarrette, Domingo Fernandez, a noted Spanish missionary, born at Peñafiel, Old Castle, in 1610; joined the Dominican Order, and in 1647 was sent to the Philippine Islands, and became professor of theology at Manila. Later he went to China, and penetrated beyond the precincts where Europeans were then tolerated. He was made superior of his order, and rendered efficient service for the cause of Christian missions; but during a time of persecution he was driven from the country, and reached home, barely saving his life, in 1678. He went to Rome, and strongly protested before the authorities against the Jesuitical accommodation theory as tending to delay the Christianizing of China. That his honesty and piety were appreciated is apparent in his appointment to the see of Santo Domingo in 1678. He died in Santo Domingo in Dec., 1689. He wrote Tratados históricos, políticos, éticos, y religiosos de la monarquía de China (Madrid, 1676, fol.); the second volume was suppressed by the Inquisition, and the third never printed. The volume published contains an excellent account of the political and religious condition of the Chinese in his times. See Churchill, Collection of Voyages and Travels.

Navarrete, Juan Fernandez, surnamed El Medo (i. e. the mute), a Spanish artist of sacred subjects, was born at Logroño in 1526. Losing both his power of speech and sense of hearing, he studied painting in the monastery of the Hieronymites at Estrela, and afterwards in Italy as a pupil of Titian. He died about 1575. All his works are on sacred subjects, and nearly all of them are preserved in the Escorial.

Navarre, Juan Simon, a Spanish painter who devoted himself mostly to sacred art, flourished at Madrid about 1650. He attained considerable distinction. There is a Holy Family by him, which is well colored, but inferior. In a convent of the Carmelites at Madrid there are two of his pictures, representing a Nativity and an Epiphany.

Nave (Greek ναῦς) is the technical term applied to the part of a church ecclesiastically constructed west-
ward of the choir in which the general congregation assembles; in large buildings it consists of a central division or body, with two or more aisles, and there is sometimes a series of small chapels at the sides beyond the aisles; in smaller buildings it is often without aisles, but has frequently two or more, and sometimes one. In the cathedrals and conventual churches the nave was generally separated from the choir by a screen, which in most instances still remains; on the western side of this, next the nave, one or more altars were occasionally placed; one is recorded, for instance, to have stood thus at Canterbury Cathedral previous to the fire in 1174; the same arrangement appears also to have been formerly common in France, though, with but very few exceptions, the old screens have been removed to make way for light, open partitions. Previous to the Reformation the pulpit was always placed in the nave, as it still is at Ely and Chichester, and always in Roman Catholic churches on the continent; the font also stood there, usually near the west end, sometimes in the middle, and now and then in an aisle, or adjoining one of the pillars. We occasionally find the word nave applied instead of nave; but there is no relation between the words, since nave is from the Greek word ναός, a ship, and nave from ναός, a temple. Other names were sometimes descriptive of its uses, such as oratorio laici, ecclesia, the assembly, quadratum populi, in allusion to the square form of this part, as distinguished from the semicircular chancel. In some of our old writers the word is written nef. The reader will find a full description of the various parts of an ancient church under the word CHURCH. See Farrar, Ecclesi. Hist. s. v.; Riddle, Christian Antiquities (see Index); Wolcott, Sacred Archæol. s. v.; Parker, Gloss. of Archæol. s. v.; Neale, Hist. East. Ch. (Intro.).

**Nave** (2), gab, anything convex or arched, as the back of an animal, Ezra x, 12; boss of a shield, Job xv, 26), the rim or arch of a wheel. The word occurs in describing the wheels of the ten bases of brass, upon which the levers stood, in the court of Solomon's Temple (1 Kings vii, 38). See LAVEN.

**Nave** (Lat. Narvæ), Joseph de, a Belgian theologian, was born at Vossem, near Liege, in 1651. He was professor of philosophy at Louvain, and in the Seminary of Liege. He was provided with a prebend in the cathedral of St. Paul, but resigned his benefice on account of feeble health. His connections with Opus Dei were close; and the publication of several of his works, and the last having addressed to him a letter some days before his death, he requested it to be placed in his coffin with a New Testament. He died at Liege April 10, 1705. We have of his works, Memoire containing Reasons for not withdrawing the Seminary of Liege from the Control of the Secular Theologians. This memoir, written in Latin, offers details as curious as piquant. It was translated into French by P. Quezel, but it did not have the effect that Nave expected. The Jesuits took possession of the seminarium, which gave occasion for another article, Deux Lettres d'un ecclésiastique de Liege (1698, 4to and 12mo):—Lettres de la Compagnie de Jesus à la Compagnie des Chrétiens Liegeois (Liege, 1705, 12mo). See Hoefer, Nouv. Biog. Générale, s.v.

**Nave** (Lat. Narvæ), Mathias de, a Belgian theologian, was born at Warnant, in Hesbaye, about 1590. He was received into the University of Douai as doctor of theology, and became in 1620 curate of the collegiate church of St. Peter in that town; some years after prebendary of the church of Secillin; and lastly, July 13, 1633, canon of the cathedral of Tournay, where the censorship of books published in the diocese was intrusted to him. He died at Tournay in 1660. His principal works are, Annotationes in summa theologica et sacra Scripturae principum difficuldades, ibi duo sermones de sanctorum (Tournay, 1634, 4to);—Prædictio theologica in festa
Navawī, Pierre, a French martyr to the cause of the Reformation doctrines, flourished near the middle of the 16th century. In 1552 Navawī finished his theological studies at the seminarium in Lausanne, under the eminent theologians Beza and Viret. Navawī returned in this year to France, probably to his native place, Limoges. On the way he was seized and imprisoned for his Reformed opinions, and after due trial for heresy was, with four other students from Lausanne, condemned to death. An appeal to the king delayed the execution, and the sentence of death was suspended till this time they were kept in prison. Pierre Navawī had become a Protestant against the protestations and entreaties of his parents, who now used every effort to save his life, and therefore urged him to renounce his principles. His uncle went to Lyons, and implored him with bitter tears to recant. But the young man continued steadfast. In a letter to his father he wrote:

"Our Saviour tells us that we must leave father and mother, and wife and children, and follow him. I am confident of eternal life, because I have been cleansed by the blood of Christ from all my sins. Now, my dearest friends, I tell you in bitterness of heart. My time will not be long, although I have now been in chains a year and a day. My dark, damp prison is far more pleasant to me than your elaborately ornamented parlors. The jailer's keys sound more sweetly to my ears than all the music of your splendid instruments. I am happy in the shades of death, for I am ready to lay aside this mortality and enter into God's rest. Now I ask you, Do you have such joys as these? Are your large revenues, your grand equipages, and the music of your singers able to give you the peace which I have?" All efforts for his retraction of the unorthodox doctrines having proved fruitless, and the intervention of the Swiss authorities even having failed to stay the execution of the sentence, Navawī was finally executed, May 16, 1558. Previous to his execution he had published a confession of his faith, which for some time was widely circulated and read among the people of France, and exerted a powerful influence for the Protestant cause. See Hure, Martyrs of the Tract Cause, 136 sq.

Navawī, Mohammād Abū-Zakariyyā Yahanī, an Arab historian and doctor, was born in 1253 at Nawāwī, a borough near Damascus, in which city he died in 1277. He belonged to the Sofite sect of the Mohammedians. Nawawī composed a Commentary on the Koran; Critical Rules for History, etc. These writings, however, still remain in manuscript. The principal
NAYLOR, JAMES, an English religious enthusiast, noted for his fanatical excesses, was born at Ardsley, near Wakefield, in Yorkshire, about the year 1616. His father was humble but honorable parentage, with a limited education, started out in life, and married and settled in Wakefield parish about 1638. In 1641 he became a private soldier in the Parliamentary army, in which he was afterwards made a quartermaster, but quit it on account of sickness in 1649. After his return home he was converted under the preaching of the Quaker George Fox (1651), and became so enthusiastic a religious man that the next year he believed himself divinely required to quit his relations and go abroad to preach Quakerism. Though poor, he started out unheedingingly, relying on that divine aid which he believed himself specially endowed with. He was, after some trials, a natural preacher, parts, and acquit itself so well, both in word and writing, that many joined his society through his ministry. He came to London towards the beginning of 1655, in which city a meeting of Quakers had been established by the ministry of Edward Burrough and Francis Howgill, two eminent Quakers from Westmoreland. Here Naylor preached with so much applause that the distinction which he acquired occasioned his fall; for some inconsiderate women, setting him up in their esteem above Howgill and Burrough, went so far as to disturb them in their preaching. These men, besides giving him a name as a women's man, became a reproved churchman of part with Naylor. But he, instead of passing censure, suffered himself to be wrought upon by the reiterated and passionate complaints of the inconsiderate women, especially one Martha Simmons (the chief engine of the mischief), and became estranged from the leading Quakers, who would not suffer him to give ear to the flatterers of such misadvised adherents. In the year 1656 he suffered imprisonment in Exeter; and about this time several deluded persons addressed him by letter in terms of great extravagance. He was called "the everlasting Son of Righteousness," "Prince of Peace," "the only begotten of the Father," etc., and during his confinement in Exeter jail some women knelt before him and kissed his feet. About this time George Fox, returning from the West, where he had himself suffered a rigorous imprisonment, called on James Naylor in the Exeter prison and reproached him for his defection and excesses. Naylor repaired to Bristol, where his followers formed a procession, and led him into that city in a manner which they intended to resemble the entrance of Christ into Jerusalem. His Quaker friends turned away from him disheartened, and the British authorities, displeased with such exhibitions of religious extravagance, brought him soon to trial, and he was declared guilty of blasphemy by Parliament, and sentenced to a double whipping at different times, branding, boring of the tongue with a hot iron, and imprisonment and hard labor during pleasure. This sentence, though illegal and barbarous, was as wide from the mark of good-souledness, was such execution of a man, as was doing the unhappy man, who, when the delirium of fanaticism was over, humbly acknowledged and lamented the delusion under which he had labored. He wrote while in prison at Bridewell to his friends, regretting his past conduct. After his confinement, which lasted for two years, he again held fellowship with the Quakers, and enjoyed their confidence and esteem. He died in 1661.

The severe measures of Parliament against Naylor have been frequently condemned. It is urged by Newmarch and other reformists that the punishment was inflicted in order to prove a terror to all Quakers, who were greatly hated at that time in England. The probability is that Naylor was not in his right mind when he perpetrated those wild, fanatical excesses; at least so judges Southey, who says (Macclesfield Memoirs, vol. i., p. 235), "He (i.e. Naylor) recovered both from his madness and his sufferings, and his after-life was a reproach to those who, in the hardness of their hearts and the blindness of their understandings, had treated insanity like guilt." Naylor's writings were collected into an octavo volume, and several of his sermons and temperate theological treatises, which bear dates from 1658 to 1656, some were reprinted in the year 1827, by others by Ellis Bradshaw, Enoch Hewitt, Richard Baxter, Thomas Moore, Jeremy Ives, Thomas Collier, etc. A relation of his Life, Conversion, Examination, Confession, and Sentence was published in 1657 (4to). A Memorial of his Life, Ministry, Trial, and Sufferings, brought out in 1719 (5to); and more recently his Life has been published by the eminent Quaker apostate, Joseph Gurney Bevan. See Bibl. Brit. s. v.; Sewel, Hist. of the Quakers; Watts, Bibl. Brit. s. v.; Gen. Bibl. Dict. s. v.;Neal, Hist. of the Puritans, vol. iii (Supplement); Burton, Puritans Diary, 46, 173; Baxter, Ch. Hist. s. v.; Whittaker, and Whitother, in the Democratic Review, March, 1846.

NAZARETH is the name of a Jewish sect mentioned by Ephesians (Her. xviii). The name is probably derived from netser, a branch (Ephesians also writes it Nazarens and Nazassetine), and, if we are right in identifying this sect with the Genizette (q. v.), signifies a branch of the true stock. The sect aimed at a patriarchal religion in place of a Mosaic Judaism. They canonicized patriarchs, and included more than Moses and Joshua since that society. They allowed that a law was given to Moses, but asserted that this law was lost, and that the Pentateuch is corrupt or supposititious. They practiced circumcision, kept the Sabbath and the Jewish festivals, rejected the sacrifice of animals, and ate no flesh. It follows from this that they rejected the history of Genesis as well as the laws of Moses; but whether they professed to found their doctrine on tradition or on a new revelation is not told. They were found in Galaaditis, Basanitis, and other parts beyond Jordan. See NAZARENES.

NAZARENE, an epithet given to our Lord. There are two Greek words for this designation—Ναζωραίος (Acts xxix. 36; Luke x. 20) and Ναζαρηνής (Acts xix. 26)—both derived from Nahzor, Nazareth of Galilee, the place of the Saviour's childhood and education. These two Greek words occur in the New Testament nineteen times; twice only are they rendered Nazarene (Matthew ii. 23; Acts xxiv., 5); everywhere else by the word "Nazareth," as in Matt. xix. 11. This appellative is found in the New Testament applied to Jesus by the demons in the synagogue at Capernaum (Mark i. 24; Luke iv. 34); by the people, who so describe him to Bartimeus (Mark x, 47; Luke xviii, 57); by the soldiers who arrested Jesus (John xiv., 28); by the servants at his trial (Matt. xxvii., 71; Mark xiv., 67); by Pilate in the inscription on the cross (John xix., 19); by the disciples on the way to Emmaus (Luke xxiv., 19); by Peter (Acts ii., 22; iii., 6; iv., 10); by Stephen, as reported by the false witnesses (Acts vi., 14); by the ascended Jesus (Acts xxii., 6); and by Paul (Acts xxvi., 6). At first it was applied to Jesus by his opponents in Galilee; we may infer, as was the case with the misnomers, that this epithet was given to him, not as a title of honor, but as a distinction. In process of time, however, other influences came into operation. Galilee was held in disesteem for several reasons: its dialect was provincial, rough, and strange (Buxtorf., Lex. Talmud; Mark xiv., 70); its population was impure, containing not only provincial Jews, but also heathen, as Egyptians, Arabsians, Phoenicians (Sta-
NAZARENE

bo, Geog. xvi, 523) ; its people were sedulous (Josephus, as cited in Schleicher, s. v. Παλαμάδων) ; whence also the point of the accusation made against Paul, as "ring-leader of the sect of Nazarenes" (Acts xxiv, 5). Nazareth was a despised part even of Galilee, being a small, obscure place. Accordingly its inhabitants were held in little consideration everywhere. Hence the name Nazarene (Κανανέα, in Matt. ii. 23). The Church of the Nazarene (in Phil., Eph., in Matt. ii, 23, 26, 71), and as such, as well as a mere epithet of description, it is used in the New Testament. "The name still exists in Arabic as the ordinary designation of Christians, and the recent revolt in India was connected with a pretended ancient prophecy that the Nazarenes, after holding power for four hundred years, would be expelled." See Nazareth.

In Matt. ii, 23, it is said of Jesus, "And he came and dwelt in a city called Nazareth; that it might be fulfilled which was spoken by the prophets, He shall be called a Nazarene." This citation has received the following explanations (Spanheim,.Apiiti Evangelica, i, 538-648; Wolf, Curia Philologica, i, 46-48; Hengstenberg, Christology of the O. T. ii, 106-112) : 1. It is generally thought that the evangelist does not limit himself to a quotation from any single prophetic, but alludes to the several passages of the prophets where the Messiah is called a "Nazarene," without attempting to fix the accounts for the statement in Isa. liii. (See Paulus, Rosenmüller, Kuinol, Van der Palm, Gerdersd, Ohlahsen, Ebrard, Davidson, Lange, and others, ad loc.) But many (as Bauer, Gieseler, in the Stud. u. Krit, 1831, p. 586 sqq; De Wette, Brem-schneider, 8d ed.) find here an allusion to the passages where the Messiah is called "Næser, a branch or sprout (Isa. xi, 1; see Hengstenberg, Christol. ii, 1 sq.)," this explanation, which Jerome mentions as that given by learned (Christian) Jews in his day, was adopted by Surenhusen, Fritzschke, Krabbe (Luben Jen, Drexhelach (on Isa. xi, 1), Schilzla (N. T. Wörterb.), Robinson (N. T. Lex.,) and Meyer. It is confirmed by the following considerations: (1) Næser, as Hengstenberg, after De Dieu and others, has shown, was the proper Hebrew name of Nazareth. (2) The reference to the etymological signification of the word is entirely in keeping with Matt. ii, 21-23. (3) The Messiah is expressly called a Næser in Isa. xi, 1. (4) The same thought, and under the same image, although expressed by a different word, is found in Jer. xxiii, 5; xxxiii, 15; Zechar. vii, 13, which shows that the point of the prophecy of Matthew that this prediction was uttered 'by the prophets' in the plural." It seems, however, rather refined for so general a quotation; nor does it after all point especially to any particular passage of the Old Testament as being cited. Moreover, the Καναναίων cannot correspond to 2, but to 1 (see Ohlausen, ad loc.; so Bengel, who derives the word from "Ναζαρε, a crown). 3. Others have supposed a direct quotation from some lost prophetic book, as the Theophylact, Clericius, et al., or from some apocryphal book (Ewald), or that it is a traditional prophecy (Calvinius, Alexander, Connexion and Harmony of the Old and New Testaments), all which suppositions are refuted by the fact that the phrase "by the prophets," in the New Testament, refers exclusively to the canonical books of the Old Testament. Nor is there anything of the sort in any of the places where of such a source. 4. Many would make Ναζαρε = Ναζαρία, ο. e. one especially consecrated as devoted to God (Judg. xxiii, 5); but this does not at all accord with our Saviour's character (see Matt. xi, 19, etc.), nor with the Sept. mode of spelling the word, which is generally Ναζαρεος, and never Ναζαρος (See, Matthew's "Less. to L. & T," 502). See Nazareth. 5. "Recently a suggestion, which Wengenroth, by reason of its account, has been revived by Zuschlag and Riggenbach, that the true word is Ναζαρε or Ναζαρες, my Saviour, with reference to Jesus as the Saviour of the world, but without much success (Zuschlag, in the Zeitschrift für die Lutherische Theologie, 1856, p. 417-446; Riggenbach in the Stud. u. Krit. 1855, p. 588, 612)." See Jesus. Nazarenes is the name of a Jewish Christian sect whose members continued to observe all the obligations and ceremonies of the law of Moses after the mother church had separated from them. They were attached to the Pella branch of the Jerusalem Church, which did not join in the change made on the appointment of Marcus, the first Jerusalem bishop of the uncircumcision. See Judaizing Christians. The Nazarenes are not named by the earlier historians and fathers of the Church; Jesus, Hippolytus, Irenaeus, Origen, Clemens, and Eusebius all silent regarding their existence. The accounts and notices which we have of them are furnished by Epiphanius, Augustine, Theodoret, Philaster, Jerome, and Iaiost ; but from these it is clearly apparent, as we shall presently show, that the Nazarenes and Ebionites were identical, and that the former, as has been supposed by some Unitarian scholars, was really composed only of such primitive Christian converts from Judaism who retained their Jewish prejudices despite their conversion; and that their faith respecting Jesus Christ, which is unjustly claimed to have been Socinian — i.e. that Jesus was a mere man—is not to be taken as an ill-defined, ill-evidenced document of the early Church. For the sake of clearing up this question we append a full examination of the early writers of the Church who have furnished us any clue regarding the Nazarenes and their relation to the early orthodox Church. See Nazarens.

I. Of the Church fathers who wrote regarding the Nazarenes, the earliest, Epiphanius, states that the Nazarenes flourished principally in Beroea, in Celse-Syria, in Decapolis at Pella, and in Basanithia, and that from thence, after the retreat from Jerusalem, the sect had its beginning. Epiphanius adds that he could not ascertain the year of the sect's appearance; he adduces the Simmonians, Corinthians, and others—a statement which points to a sect not formed by one leader whose date could not be ascertained, but to a party gradually separating from the Church. Jerome speaks (Catol, Scriptur, Eccles. s. v. Mathus) of the Nazarenes who dwelt at Beroea using St. Matthew's Hebrew Gospel, and this implies an early formation of the party. Epiphanius, in his prefatory index, defines the Nazarenes as confessing Jesus to be Christ and the Son of God, but as living in all things according to the law. Augustine (Heres, ix) describes them as confessing Christ to be the Son of God, in things which they were taught to keep, not carnally, but spiritually. From all this it is clear that the Nazarenes were Jewish Christians, forming themselves into a party in Pella and its neighborhood after the retreat from Jerusalem, and passing by degrees into a distinct sect. But there were two classes of Jewish Christians—the one apostolic and orthodox, who did not impose the observance of the law as necessary to salvation, who acknowledged the mission of St. Paul, and recognised the communion of the Gentiles; the other Pharisaic and sectarian, who maintained the universal obligation of the law, and denounced St. Paul as a transgressor. In inquiring to which of these two classes the Nazarenes belonged, it must be noticed, in the first place, that the community at Pella was composed of those converts who joined the Church of Jerusalem in her exilo, of those Hellenistic fugitives whose national feelings and love of their city was not so strong as in the native Jews, and of those native Jews who had formed a new residence which overshadowed their national feelings. It was a community predisposed to accept in the spirit as well as the letter the decree of the Council of Jerusalem. In the next place the Ebionites and the Nazarenes are contrasted. But it was the Ebionites (q. v.) who held the universal obligation of the law. When, therefore, we read in Jerome (in Isa. i. t. 3, p. 4 [ed. 1616]),
NAZARENES

"Audiant Ebionei, qui post passionem abilotam legem putant esse servandam. Audiant Ebionitarum socii, qui Judaeum tantum, et de stirpe Israelitici generis hece customehumanum hanc acceptavit, quod in eis "Ebionitarum socii" sunt the Nazarenes. This sect is thus identified as, in its origin at least, a branch of the orthodox Church of Jerusalem. The Church of Jerusalem had been under the apostles of the circumcision, and at the time of the retreat to Pella had a "literature consisting, on the one hand, of most of the New Testament, except the Gospel of St. John, and on the other of works treating of the much-studied old Halachah and Haggadah law, and others largely dependent on poetic fancy." "with rites wherein Jewish and Christian practices are still found side by side, circumcision and the use of the Sabbath, the Lord's Day, Passover, perhaps, and Eucharist." These are the surroundings amid which we place the sects of the Nazarenes and its origin (Sinker, Testamenta xii Patriarcharum [Camb. 1866], p. 124). The last-made quotation, the words of which were used with reference to the author of the Testamenta of the twelve patriarchs, leads us to a remarkable book which proceeded from the school, and probably from the very sect under consideration. This book and the writings of the Ebionite school have been much studied of late, and in the hands of German scholars have thrown considerable light on the history of the Ebionites. Noticing, for example, the theology of the Nazarenes, it must be remembered that we are entirely ignorant of its author, of the position he held in the Judaoc-Christian Church, and of the degree of acceptance his book met with. In short, we are entitled to assume that it is a representative book. But it is known from other authority that the author was of the Nazarene school, and we are thus entitled to gather from his book the broad and distinctive characters of the school. Finer shades of doctrine, and doctrines that are not distinctive, must be referred to the standard formed by the teaching of the apostles as supervening upon the tenets of the Jewish Church. Lardner's summary of the writer's doctrine may be first given. The writer speaks of the nativity of Christ, the meekness and unblamableness of his life, his crucifixion at the instigation of the Jewish priests, the wonderful concomitants of his death, his resurrection, and ascension. He represents the character of the Messiah as God and man, the Most High God among men eating and drinking with them; the Saviour of the world, of the Gentiles and Israel, as eternal High-Priest and King. He likewise speaks of the effusion of the Holy Spirit upon the Messiah, attended with a voice from heaven; his unrighteous treatment by the Jews, and their depositions and slanders upon him and his followers. Temple's call of the Gentiles; the illuminating of them generally with new light; the effusion of the Spirit upon believers, but especially and in a more abundant measure upon the Gentiles. Here little notice is taken of Christ's miracles; however, he speaks of the Messiah as a "man who reneweth the law in the power of the Most High," in which expressions the working of miracles seems to be implied. Here are also passages which seem to contain allusions to the Gospels of St. Matthew, St. Luke, and St. John, the Acts of the Apostles, the Epistle to the Ephesians, the First to the Thessalonians, the First to Timothy, the Epistle to the Hebrews, the First Epistle of St. John, and the Book of Revelation. As far as was consistent with his assumed character, the author declares the canonical authority of the Acts of the Apostles and the Epistles of St. Paul (Credibility, etc. ii. 363). Here the recognition of St. John's Gospels, especially of and of St. Paul's Epistles, shows that the Nazarenes, at the latest period of the sect, knew without the teaching of full catholic Christianity. The question will arise again, with regard to a still later period, "What was Nazarene doctrine respecting the divinity of our Lord?" At the period we have now before us it is just to the Nazarenes, as Jewish Christians, to assimilate their confession, that Jesus is Christ and the Son of God, with St. Peter's confession, without attributing to them any limited meanings of the term, and which were not typical as "Israelitish and Jewish" in existence in Divinities. The Nazarenes may be seen quoted and commented upon in the third chapter of Sinker's work, in which Dörner's remark is quoted, "that the words," from Levi, xviii., "imply that the relation of Christ to the Father is as close as is that of a human son to his father." Christ's birth of a virgin is inferred in Joseph, xix.; his pre-existence in David, Satan, x; Simœon, vi. On these points we may believe the Nazarenes to have been orthodox. The ethics of the "Testaments" are sufficiently characterized in the remark, "that the view held as to the law of God is the same which we find in St. James' Epistle, the old Mosaic Law having been held dear in the Church, the Sabbath, Passover, however, and Eucharist." These are the surroundings amid which we place the sects of the Nazarenes, and its origin (Sinker, Testamenta xii Patriarcharum [Camb. 1866], p. 124). The last-made quotation, the words of which were used with reference to the author of the Testamenta of the twelve patriarchs, leads us to a remarkable book which proceeded from the school, and probably from the very sect under consideration. This book and the writings of the Ebionite school have been much studied of late, and in the hands of German scholars have thrown considerable light on the history of the Ebionites. Noticing, for example, the theology of the Nazarenes, it must be remembered that we are entirely ignorant of its author, of the position he held in the Judaoc-Christian Church, and of the degree of acceptance his book met with. In short, we are entitled to assume that it is a representative book. But it is known from other authority that the author was of the Nazarene school, and we are thus entitled to gather from his book the broad and distinctive characters of the school. Finer shades of doctrine, and doctrines that are not distinctive, must be referred to the standard formed by the teaching of the apostles as supervening upon the tenets of the Jewish Church. Lardner's summary of the writer's doctrine may be first given. The writer speaks of the nativity of Christ, the meekness and unblamableness of his life, his crucifixion at the instigation of the Jewish priests, the wonderful concomitants of his death, his resurrection, and ascension. He represents the character of the Messiah as God and man, the Most High God among men eating and drinking with them; the Saviour of the world, of the Gentiles and Israel, as eternal High-Priest and King. He likewise speaks of the effusion of the Holy Spirit upon the Messiah, attended with a voice from heaven; his unrighteous treatment by the Jews, and their depositions and slanders upon him and his followers. Temple's call of the Gentiles; the illuminating of them generally with new light; the effusion of the Spirit upon believers, but especially and in a more abundant measure upon the Gentiles. Here little notice is taken of Christ's miracles; however, he speaks of the Messiah as a "man who reneweth the law in the power of the Most High," in which expressions the working of miracles seems to be implied. Here are also passages which seem to contain allusions to the Gospels of St. Matthew, St. Luke, and St. John, the Acts of the Apostles, the Epistle to the Ephesians, the First to the Thessalonians, the First to Timothy, the Epistle to the Hebrews, the First Epistle of St. John, and the Book of Revelation. As far as was consistent with his assumed character, the author declares the canonical authority of the Acts of the Apostles and the Epistles of St. Paul (Credibility, etc. ii. 363). Here the recognition of St. John's Gospels, especially of and of St. Paul's Epistles, shows that the Nazarenes, at the latest period of the sect, knew without the teaching of full catholic Christianity. As far as was consistent with his assumed character, the author declares the canonical authority of the Acts of the Apostles and the Epistles of St. Paul (Credibility, etc. ii. 363). Here the recognition of St. John's Gospels, especially of and of St. Paul's Epistles, shows that the Nazarenes, at the latest period of the sect, knew without the teaching of full catholic Christianity. The question will arise again, with regard to a still later period, "What was Nazarene doctrine respecting the divinity of our Lord?" At the period we have now before us it is just to the Nazarenes, as Jewish Christians,
NAZARÉNES

sūc śawra vā msgq. The ethnic type is the priesthood of Melchisedek. A passage in Theophilus of Antioch makes this designation easier: “Melchisedek was the first priest of all the priests of the Most High God. From his time priests were found in all the earth” (To Autol. ii, cap. 31). This new priesthood shall set in order all the priestly orders of the past, including the Levitical judges, and scribes; i.e. priests in ministering, judges in discipline, scribes in teaching. The only objection which can be made to this description is that the Christian ministry is made to descend from Levi. If the newness of their priesthood were lost sight of, the Christian ministry would be at once identified with the Aaronic priesthood.

From this affiliation of the ministers of the Gospel to Levi we are inclined to contend, supposing that the “Testaments” justly represent the belief of the Jewish Christians, that the lower or spurious sacerdotism which has found place in the Church is of Judaic, not of Gentile, origin. That the Hebrews found a difficulty in appreciating a true import of the history of Melchisedek is clear from the Epistle to the Hebrews. A sense of this difficulty may have led the author of the “Testaments” to refrain from an explicit mention of Melchisedek. Of another author of this school, Aristio of Pella, there is a strongly formed believe in the Aaronic Levitical, p. 93-97). One fragment is important. Aristio speaks of Jesus as the Son of God, the Creator of the world (see Wescott, On the Canon, p. 105-107; and Prof. Lightfoot, St. Paul and the Three, p. 294, n. 2).

II. It may next be inquired whether the Nazarenes in the following references to the Law. Augustinian Communities form only of Judaism (De Hæres. ix.; Contra Faust. xix. 4; Contr. Crescon. I. xxxi. 36; Epist. ad Hieron. lxiiii.; ii. 16; De Bap. contr. Donat. vii. 1). Epiphanius having briefly defined them in the prefatory index as Judaizers, begins in the work itself (Hæres. xxxix.) with stating the views that held the same opinions as the Christianists, but in his seventh chapter develops the inability to say whether they did or did not hold orthodox doctrine regarding Christ. This quite sets aside his previous statement, which may be referred to his well-known proneness to make charges of heresy. In his Commentary on Isaiah Jerome calls the Nazarenes the Hebrews who believe in Christ (in Jev. cap. ix. 6, 8, p. 38 [ed. 1616]), giving the Nazarene explanation of the prophecy that Christ's doctrine delivered the land of Zebulon and Naphtali from... Jewish traditions, that by St. Paul's preaching the Gospel shone among the Gentiles, and at length the whole world saw the clear light of the Gospel (De missionibus, xxvii. 3). The question is fairly argued (p. 266 [ed. 1616]). Accordingly Lardner writes, "It might easily be shown that the Nazarene Christians did not reject St. John's Gospel; nor hold any principles that oblige them to reject or dislike it" (Jewish Testimonies, cap. i, vol. vi. p. 867 [Kippis's ed. 1861]). On the other hand, Theodoret (De Hæres. ii. 2) accuses the Nazarenes of denying Christ's divinity; but the later authority of Theodoret cannot outweigh the mass of earlier testimony in their favor.

III. Adopting, then, the conclusion that the Nazarenes retained their orthodox creed, it remains to be asked whether they retained their position in the Church, or whether, while free from heretical error, they were yet sectarian. There is no historical information to enable us to answer this question; but there does not appear to be any sufficient reason why the Church of Jerusalem, when it renounced Judaism, should exclude the Church of Pella from communion simply for its retention of national customs; and certainly there was no reason why the Church of Pella should renounce communion with Jerusalem.

The general observance for some centuries of the decree of the Council of Jerusalem (Judaizers), enforcing on Gentiles abstinence from things strangled and wine, etc., is implied in the fact that Augustinians allowed a liberty to the Jews to continue in the observance of their national law; while canons intended to prevent Gentile churches from adopting Jewish customs do not apply to the Nazarenes. On the other hand, the strong condemnations of the Nazarenes as heretics by Epiphanius and Augustine can be fully explained only on the supposition that the Nazarenes had become the authors of a schism by renouncing communion with the Church. Augustine states in several places that the Nazarenes were called the Symmachiones (Contra Symmac. epic.). Von den Nazarern u. Eriamon (in Sklinthin u. Tschirn-ner's Archiv, vol. iv, st. 2); Schweger, Das Nach- apostolische Zeitalter, p. 179 sq.; Schliemann, Die Cle- mentinen nebst d. verwandten Schriften, etc. (Hamb. 1844); Haag, Historie des dogmes Christi, i, 109; ii, 22; Tischler, Hippolytus and the Early Christian Church, p. 70; Hagenbach, History of Doctrines, i, 55, 170; ii, 328, 344; Schaff, History of the Christian Church, i, 212; Mosheim, Eccles. Hist. ii, 222, 400; Riddle, Christian Antiquities, p. 182, 185; Neander, Ch. Hist. i, 494 et passim; Pressemé, Haresy and Christian Doctrine, p. 78; Church Rev. vol. xx.; and especially the article in Blunt, Dict. of Sects, Heresies, etc., s. v.

NAZARETH (γ ναζαρής or ναζαρής; usually thought to be a Grecized derivative from τάξις, a spring, Aram. τάγαξ, see Hengstenberg, Christi, i, 1 sq. comp. Keim, Gesch. Jesu (Zur. 1867), i, 318; but Hitzig, in the Heidelb. Jahrbücher, 1870, p. 50, conjectures somewhat wildly an original form, τάγαξ, with the signif., "godess of success"), the place of residence (but not the birthplace) of our Lord. In the following account of Nazareth the known respecting this interesting locality. See Jesus.

1. Scripture Mention.—Nazareth was the town of Joseph and Mary, to which they returned with the infant Jesus (και τήν τινα λαοῖν λαυρίων) after the accomplishment of the events connected with his birth and earlier infancy (Mat. ii. 22). Was this the place of the abode of our Lord unknown to history. In Old Testament Scripture it is never once named, though a town could hardly have failed to exist on so eligible a spot from early times. Josephus, though personally familiar with the whole district in which it lies, it is equally silent regarding it. The secluded nature of the spot where it stands, together with its own insignificance, probably combined to shroud it in that obscurity on account of which it would seem to have been divinely chosen for the resting of God's incarnate Son. As his forerunner, John the Baptist, "was in the desert," unnoticed and unknown, "till the voice of one crying in the wilderness, 'The Lord is near,'" (Mat. iii. 1). That great Messiah himself, till his public ministry began, was hidden from the world among the Galilean hills.

The other passages of Scripture which refer expressly to Nazareth, though not numerous, are suggestive and deserve to be recalled here. It was the home of Joseph and Mary (Luke ii. 39). The angel announced to the Virgin there the birth of the Messiah (Luke i., 26-28). The holy family returned thither after the flight into Egypt (Matt. ii. 23). Nazareth is called the native country (τάρτης αυτός) of Jesus: he grew up there from infancy to manhood (Luke iv. 15). It was "the house of Nazareth" (John ii. 19). Previous to that publication to the persecuting Saul (Acts xxii. 8). The place has given name to his followers in all ages and all lands, a name which will never cease to be one of honor and reprobation. See NAZARENE.

The origin of the diacritical difference which Nazareth stood (John i. 45) is not certainly known. All the inhabitants of Galilee were looked upon with contempt by the people of Judea because they spoke a ruder dialect, were less cultivated, and were more exposed by their
position to contact with the heathen. But Nazareth labored under a special opprobrium, for it was a Galilean and not a southern Jew who asked the reproachful question, whether “any good thing” could come from that source. The term “good” (d雅λόν), having more common a metaphorical sense, it has been suggested that the inhabitants of Nazareth may have had a bad name among their neighbors for irreligion or some laxity of morals. The supposition receives support from the disposition which they manifested towards the person and ministry of our Lord. They attempted to kill him; they expelled him twice (for Luke iv, 16-29 and Matt. xiii, 54-58 relate probably to different occurrences) from their borders; they were so wilful and unbelieving that he performed not many miracles among them (Matt. xiii, 58); and, finally, they compelled him to turn his back upon them and reside at Capernaum (Matt. iv, 13).

2. Location. — Nazareth is a moderate journey of three days from Jerusalem, seven hours, or about twenty miles, from Akka or Ptolemais (Acts xxi, 7), five or six hours, or eighteen miles, from the Sea of Galilee, six miles west from Mount Tabor, two hours from Cana, and two or three from Endor and Nain. It is situated among the hills which constitute the south ridges of Lebanon, just before they sink down into the plain of Esdraelon. The traveller, coming from the south, ascends the mountain range by a steep and rugged path, which, winding onwards and upwards through the hills, brings him suddenly into a small sequestered hollow among their summits; and here, nestling in at the base of the loftiest of the encircling heights, he beholds — what must ever be to the Christian one of the most profoundly interesting scenes on the face of this earth — the home for thirty years of the Saviour of the world. The surrounding heights vary in altitude; some of them rise to 400 or 500 feet. They have rounded tops, are composed of the glittering limestone which is so common in that country, and, though on the whole sterile and unattractive in appearance, present not an unpleasing aspect, diversified as they are with the foliage of fig-trees and wild shrubs, and with the verdure of occasional fields of grain. Our familiar hollyhock is one of the gay flowers which grow wild there. The enclosed valley is peculiarly rich and well cultivated: it is filled with cornfields, with gardens, hedges of cactus, and clusters of fruit-bearing trees. Being so sheltered by hills, Nazareth enjoys a mild atmosphere and climate. Hence all the fruits of the country — as pomegranates, oranges, figs, olives — ripen early and attain a rare perfection.

In speaking of the precise position of Nazareth, there is some discrepancy among travellers: Stanley says, “The village stands on the steep slope of the south-western side of the valley” (Sinai and Palestine, p. 365). Wilson (Lands of the Bible, ii, 92) observes that “the village of Násírah, or Nazareth, stands on the eastern side of the basin in which it is situated.” Thomson (Land and Book, ii, 101) seems to place it on the western side. Dr. Porter (Hand-book for Syria and Palestine, ii, 359) has described Nazareth as lying at the bottom of “the hill on the north side” of the little plain. An inspection of the accompanying plan shows that it lies at the foot and partly up the slope on the north-western angle of the valley.

Of the identification of the ancient site there can be no doubt. The name of the present village is en-Naζārēth, the same, therefore, as of old; it is formed on a hill or mountain (Luke iv, 29); it is within the limits of the province of Galilee (Mark i, 9); it is near Cana (whether we assume Kana on the east or Kāna on the north-east as the scene of the first miracle), according to the implication in John ii, 1; 2; 11; a precipice exists in the neighborhood (Luke iv, 29); and, finally, a series of testimonies (Reland, Polem., p. 905) reach back to Eusebius, the father of Church history, which represent the place as having occupied an invariable position.

3. History. — Of the condition of Nazareth during the earlier centuries of the Christian era next to nothing is known. Eusebius, in his Onomasticon, alludes to it as a village near Mount Tabor. Epiphanius speaks of it as formerly a town, but in his day only a village. Heleda, the mother of Constantine, is related to have built the first church of the Annunciation here. In the time of the Crusaders, the episcopal see of Bethan was transferred there. The birthplace of Christianity was lost to the Christians by their defeat at Hattin in 1183, and was laid utterly in ruins by sultan Birens in 1263. Ages passed away before it rose again from this prostration. In 1620 the Franciscans rebuilt the church of the Annunciation, and connected a cloister with it. In 1799 the Turks assaulted the French general Junot at Nazareth; and shortly after 2100 French, under Kleber and Napoleon, defeated a Turkish army of 25,000 at the foot of Mount Tabor. Napoleon himself, after that battle, spent a few hours at Nazareth, and reached there the
northern limit of his Eastern expedition. The earthquake which destroyed Safed in 1837, injured also Nazareth. No Jews reside there at present, which may be ascribed perhaps as much to the hostility of the Christian sects as to their own hatred of the prophet who was born there.

4. Traditionary Localities.—Epiphanius, in his book against heresies, written in the latter half of the 4th century, states that, from times prior to those of Josephus, onward to the reign of the elder Constantine, none but Jews were allowed to live in it. Being himself a native of Judea, it is believed, of Jewish parentage, his information on such points as these is not likely to have been incorrect. If so, it effectually overturns all confidence in those many monkish traditions of which the modern Nazareth is full. If several centuries elapsed before Christians resorted to it, or dwelt in it at all, it must needs have been utterly impossible to identify, as those traditions pretend to do, the precise locality of any one of the memorable incidents from which it derives its undying fame.

In the 6th century, although, so far as appears, no trace had been found of either the house of Joseph and Mary, and the place where Christ dwelt, the Christians, who traded in discoveries of that kind were then already at work. Antoninus Martyr, who in the course of that century went from Tyre to visit Nazareth, found there a synagogue, in which, as he was told, "had stood the very bench on which, along with the children of the place, Mary taught her son. " If this be true, then, we have to keep it out of the hands of the Christians, the Jews had carried off" (De urbibus et vicis Palestine). In the immediately succeeding century, however, almost everything of which tradition boasts at the present day in Nazareth had become an accepted and firmly-established belief of that superstitious age. Here, among the holy places in the 7th century, Adamnanus expressly mentions one great church as having been built over the site of the house in which our Lord was brought up; and another on the spot where the angel Gabriel appeared to the Virgin, to announce to her that divine mystery which has made her blessed among women.

Phoca, a writer of the 12th century, alludes to the same traditions, as still sturdily cherished; and specially notes the fountain, in a small cave beneath a splendid church, as that at which Mary was wont to drink, and where the angel appeared to her; and also to the house of the Virgin, and the remains of the holy places of Christ's birth. "It is a true place of Christian worship. Tradition, however, is not always sufficiently careful of its own consistency. For it would have us to believe that this house of Joseph, which in the 12th century had been so transmuted, was, in its original form of Joseph's dwelling, carried away by the waves of the sea, along with the house of angels, and set down on the hill above Fiume, at the head of the Adriatic Gulf; and that from thence, after a short stay in the plain below, it was conveyed across the sea to the eastern slope of the Apennines, where, as the sancta casa, within the magnificent church of Our Lady of Loreto, it appears to this day. We can imagine that most familiar and venerable place being packed and honored of all the holy places in the world!" Those who are able to get over all the other difficulties connected with this marvellous story, will not be much embarrassed by the fact that, while the actual house of Joseph, wherever it stood, was no doubt built of the grayish-white limestone of which the whole country around Nazareth is formed, the sancta casa at Loreto is built of a dark-red stone, to which there is nothing like in all the land of Judea. Although the miraculous transportation of the holy house took place, according to the tradition regarding it, about the close of the 13th century, and the church of Loreto was built on the site of this tradition itself till near the end of the 15th century. That this monstrous fable should have been formally recited and canonized in a bull of the lettered and luxurious see, pope Leo X, serves only to show that there is no delusion too gross for the Papal Church to practice on human credulity and superstition. There can be little doubt that Nazareth itself had nothing whatever to do with the originating of a story which tended so directly to injure its own renown by robbing it of one of its most precious treasures. The theory of its invention suggests itself at all events, but it is one which history will not receive. "Nazareth was taken by sultan Khalil in 1291, when he stormed the last refuge of the Crusaders in the neighboring city of Acre. From that time not Nazareth only, but the whole of Palestine was closed to the devotions of Europe. The Crusaders were expelled from Asia, and in Europe the spirit of the crusades was extinct. But the natural longing to see the scenes of the events of the sacred history—the superstitious craving to win, for prayer, the favor of consecrated places—did not expire with the crusades. Can we wonder that, under such circumstances, there should have arisen the feeling, the desire, the belief that if Mohammed would not go to the mountain, the mountain must come to Mohammed? The house of Loretto is the petrification, so to speak, of the last sigh of the crusades!" (Sisini and Palestine, p. 448, 449.) The existence of this purely European tradition has proved a source of considerable perplexity to the modern Church, which, while the pope's bull and the infallibility of their Church compel them to receive it, find it somewhat puzzling to harmonize it with what they have to show, and to contend for, within the walls of their own convent. To illustrate this awkward conflict of incommensurable principles in practice, the monks, at the time of the subject, diagrams of the ground-plan of the holy house at Loretto and of the site of the same pretended house at Nazareth—plans which by no possibility can be made to agree.

The extensive edifice which now occupies the place on the mountains above Nazareth where by the Crusaders was begun in the early part of the 17th century, that of the Crusaders having lain in ruins for more than 300 years. The modern structure has been gradually enlarged, and now constitutes, with its numerous conventual buildings, by much the most imposing object that meets the traveller's eye as he comes in sight of Nazareth. It is the Latin convent, and included within its high-walled enclosure the church already spoken of, the Church of the Annunciation. The church itself is nearly a square of seventy feet, divided, by four massive piers which support the vaulted roof, into nave, choir, and aisles. Of these, the pillars and arches of the nave are vases hanging, painted, in imitation of tapestry, with Scriptural scenes. The sacred grotto, the true holy place, is beneath the floor of the church, and is entered by a broad flight of fifteen steps which lead down into it. Here there is first a vestibule of twenty-five feet by ten, from which a low-arched opening admits the visitor into an inner chamber of the same size—the veritable shrine, according to the tradition of the Latin Church, of the ever-memorable Annunciation. Within this sanctum, and directly opposite the entrance into it, is a marble altar; and beneath it on the floor a marble slab, with a cross in the centre. This is the place where the Virgin stood when she received the message from on high. On the marble pavement of the grotto is this inscription: Hic Verbum caro factum est. From the roof of this grotto the fragment of a granite column hangs, and beneath it the lower part of what the monks allege to be the same pillar that remains inserted in the column; the middle part of the column, they say, having been broken in pieces by the Saracen infidels in order to bring down the roof. Unfortunately the two parts of the column are of different kinds of stone—the one being of grey granite, the other ofapolis limestone. The appellation of the Church of Nazareth being due to the contrivance has been executed. In another chamber, above and behind the altar, there is an apocryphal picture which claims to represent the vera imago Salvatoris nostris, Domini Jesu Christi, ad Regem Abgarum missa.
At some distance from the Latin convent is a modern church, also belonging to the Latina, within which is shown a piece of an old wall—part, as their tradition would have it believed, of Joseph's workshop. In another chapel is the mensa Christi, a large table-shaped fragment of solid rock, rising about three feet above the floor, on which, it is told, our Lord ate with his disciples both before and after his resurrection. Finally there is the synagogue from which Jesus was dragged by the multitude to the brow of the hill on which the city stood, with the design of casting him down.

Such are the "chief sights" in Nazareth which the Latin Church has to show, and in which it glories. The Greek Church, also, has something to exhibit, for she too has her Church of the Annunciation. It is located over a fountain, said to be that mentioned in one of the apocryphal gospels as adorning the scene of that event. It is at a short distance from the present public fountain, and is sometimes distinctively called the Chapel of the Angel Gabriel.

Two localities possess, though in different ways, a certain interest which no one will fail to recognize. One of these is the "Fountain of the Virgin," situated at the north-eastern extremity of the town, where, according to one tradition, the mother of Jesus received the angel's salute (Luke i., 38). "Though we may attach no importance to this latter belief, we must, on other accounts, regard the spring with a feeling akin to that of religious veneration. It derives its name from the fact that Mary, during her life at Nazareth, no doubt accompanied often by "the child Jesus," must have been accustomed to repair to this fountain for water, as is the practice of the women of that village at the present day. Certainly, as Dr. Clarke observes ("Travel", ii., 427), "if there be a spot throughout the Holy Land that was undoubtedly honored by her presence, we may consider this to have been the place; because the situation of a copious spring is not liable to change, and because the custom of repairing thither to draw water has been continued among the female inhabitants of Nazareth from the earliest period of its history." The well-worn path which leads thither from the town has been trodden by the feet of almost count

less generations. It presents at all hours a busy scene, from the number of those, hurrying to and fro, engaged in the labor of water-carrying. (See the cut, vol. iii., p. 882, of this "Cyclopaedia.")

The other place is that of the attempted Precipitation. We are directed to the true scene of this occurrence, not so much by any tradition as by internal indications in the Gospel history itself. A prevalent opinion of the country has transferred the event to a hill about two miles south-east of the town. But there is no evidence that Nazareth ever occupied a different site from the present one; and that a mob, whose determination was to put to death the object of their rage, should repair to so distant a place for that purpose is entirely incredible. The present village, as already stated, lies along the hill-side, but much nearer the base than the summit. Above the bulk of the town are several rocky ledges over which a person could not be thrown without almost certain destruction. But there is one very remarkable precipice, almost perpendicular and forty or fifty feet high, near the Maronite church, which may well be supposed to be the identical one over which the infuriated townsman of Jesus attempted to hurl him. The singular precision with which the narrative relates the transaction deserves a remark or two. Casual readers would understand from the account that Nazareth was situated on the summit, and that the people brought Jesus down thence to the brow of the hill as if it were between the town and the valley. If these inferences were correct, the narrative and the locality would then be at variance with each other. Even Re-land ("Palæst", p. 905) says: "NazÆphs—urbs edificata super rupem, unde Christianum precipitare constat respondere." But the language of the evangelist, when more closely examined, is found neither to require the inferences in question on the one hand, nor to exclude them on the other. What he asserts is that the incensed crowd "rose up and cast Jesus out of the city, and brought him to the brow of the hill on which the city was built, that they might cast him down headlong." It will be remarked here, in the first place, that it is not said that the people either went up or descended in order to reach the precipice, but simply that they took
denoting a crown or diadem, which binds the head; the hair (Jer. viii. 29), which forms a natural crown; and consecration to God as a nazar, which is a separation from certain things that symbolize all that separates or hinders from union with God. The concrete נזר occurs sixteen times in the Old Testament. It denotes, in the main, what is separated from the presence of God and unto others, and so distinguished from other persons, and consecrated unto God. In two passages (Gen. xiii. 26; Deut. xxxiii. 16) it appears in the phrase נזר והerdale, one separated from his brethren, a touching description of Joseph, as he was in the providence of God separated from his brethren by their jealous cruelty for twenty years, and at the same time exalted above them. It is no more than to God that the Israelites were separated from the heathen nations during the latter period of his life. In two others (Lev. xxxv. 5, 11) it denotes that which is separated from common use. It is applied to the vine, while it remained untouched during the sabbatical and jubilee years. "That which growth of its own accord of thy harvest thou shalt not reap, neither of the grapes of thy nazar (ver. 5), that is, of thy vine in the year of its separation from common use. "A jubilee shall that fiftieth year be unto you; ye shall not sow, neither reap that which growth of itself in it, nor gather its nazar (ver. 11), that is, the vines of the jubilee year, in which year they are hereafter to be devoted to the Lord; the vine is not pruned, and its spontaneous produce is not gathered for consumption. It is remarkable that Joseph, in the context of Gen. xiii. 26, is figuratively represented as a "fruitful bough, even a fruitful bough by a well, whose branches run over the wall" (ver. 22). In other words, a young shoot from a fruitful tree, spreading forth its richly-laden branches in all the unrestrained luxuriance of nature. The verb נזר (nazar) is found in ten passages, two of which precede the Book of Numbers. In Lev. xvi. 13 we read, "Thus shall ye separate the children of Israel from their uncleanliness;" and in Lev. xxii. 2, "Speak unto Aaron and to his sons, that they separate themselves from the holy things of the children of Israel," namely, when they themselves are in their uncleanliness, as is explained in the next verse. In these cases the separation is between the holy and the profane; and this usage naturally leads to the special meaning of the term nazar in the other twelve places in which it occurs.

According to others the word נזר, a diadem, contains the original idea of נזר, which will then signify to crown the head, and is regarded as a crown to the person. The Nazarite in this view is the crowned one, because as we are told in Num. vi. 7, he has "the crown of God upon his head" (יִשְׁרוּ אֵלֶּה יְקַנֵּהוּ), evidently referring to his distinguishing badge of the freely growing and profuse mass of hair, which was considered an ornament (2 Sam. xiv. 25, 26), and which he was not allowed to cut off (Num. vi. 5), because there existed a contract between himself and Jehovah. This is confirmed by Num. vi. 9, where it is said, "If he defiled his head diadem (יִשְׁרוּ אֵלֶּה יְקַנֵּהוּ), he is to shave his head." Hence also the signification of נזר, ornamental hair, long hair (Jer. vii. 29 with Num. vi. 19); while the vine again, laden with fruit, is called Nazirite, or more probably Nazir, i.e. the crowned (Lev. xxxv. 5, 11); because in its uncult state, when its head is covered with grapes and foliage, it is as much adorned with a diadem as the head of the Nazarite with the abundant hair, just as we call the foliage of a tree its crown. Besides the vine, hills rising in the different parts of Palestine, and resembling heads covered with hair, may have suggested this figure to the Oriental mind, since the summits of mountains are called their heads (יִשְׁרוּ אֵלֶּה) in Hebrew (Gen. viii. 5; Exod. xvii. 9, 10; xix. 20; Amos i. 2), and the foliage is not infrequently compared to the hair or wool (יִשְׁרוּ אֵלֶּה) of animals (Ezek. xvii. 8, 22;
2. Origin of the Custom.—The germ of the custom now under consideration reach farther back than the sojourn in the wilderness. The manner in which the text in Leviticus and Numbers is treated in the Book of Deuteronomy and in Isaiah (Isa. viii. 20) indicates that the nazir was not unfamiliar to the minds of the Israelites. The application of the term to the undressed vine of the sabbatical year in a previous book (Leviticus) tends to the same conclusion. A custom of this kind might have readily grown up during the long sojourn in Egypt, and have there served as a protest against the prevalent idolatry. Cyril of Alexandria considered that letting the hair grow, the most characteristic feature in the vow, was taken from the Egyptians. This notion has been substantially adopted by Fagius, Spencer, Michaelis, Hengstenberg, and some other critics. Hengstenberg affirms that the Egyptians and the Hebrews were distinguished among ancient nations by cutting their hair as a matter of social propriety; and thus the marked significance of long hair must have been common to them both. The arguments of Bähr, however, to show that the wearing of long hair in Egypt might have been another meaning opposed to the idea of the Nazarite vow, seem to be conclusive. The head of the Nazarite was perhaps considered as adorned with its growth of hair (Lampe, in Miscell. Græc. iv., 107 sq.), which, as a kind of crown, showed his consecration, and the touch of a knife or razor was a profanation of that which belonged to God. In our own time, a nation may be great, especially in times of danger, the offering of the head of the nation, or even of a head, and sometimes the hair was offered without a vow, especially by married women. (Compare Spencer, Legg. rit. iii, 6, 1; Doughttie, Antiqu. i, 97.) So among the Egyptians (Diod. Sic. i, 18, 83 sq.), the Bactrians (Lucian, Syrtes, c. 80), the Greeks (Homer, Iliad, xxii, 41 sq.; Plut. Thes. c. 5; Theodor. Quest. in Lev. 28; Wachsmuth, Hellen. Alterthum, ii, 558), the Romans (Suet. Ner. i, 11; Martialis, ix, 17, 3 sq.), and the Arabians (see Koran, ii, 192; Hamas, p. 2 sq.). But the most striking resemblance to the Jewish custom is found that by Morier among the modern Persians. "It frequently happens after the birth of a son, that if the parent be in distress or the child be sick, or that there be any other cause of grief, the mother makes a vow that no razor shall come upon the child's head for a certain period of time, and sometimes for all time. If the child recover from the cause of grief be removed, and if the vow be but for a time, so that the mother's vow be fulfilled, then she shaves her head at the end of the time prescribed, makes a small entertainment, collects money and other things from her relations and her friends, which are sent as reses (offerings) to the mosque at Kerbelah, and are there consecrated" (Second Journey, p. 109). The abstinence of priests among the ancient Egyptians from certain kinds of food, as a token of peculiar sanctity, is a kindred ordinance (Porphyry, Apôtin. iv, 7); and some have supposed that the Nazarite vow had an Egyptian origin and was simply modified by the Hebrews to accord with their system (Spencer, Legg. Rit. iii, 6, 1; Michaelis, Mos. R. iii, 27); but the resemblances cited from the Egyptian priesthood are too fragmentary to support the theory. Indeed, the abstinence of the priests was not in the nature of a vow, but was a qualification for their sacred office. And although they were required to practice celibacy, we do not find that wine was forbidden to them. Besides, each feature of the Nazarite vow is so intimately associated with Hebrew ideas and practices that the search for a foreign origin is wholly unnecessary. The reflections of Ewald (I. a. Gech. ii, 408 sq.) on this subject are too elaborate. Without reading, some, especially Roman Catholic writers, have thought that the first traces of monachism were to be found in this institution. See G. Less, Super leg. Mos. de Nazaritibus, prima eoque antiquissima vitæ Nazarit, improbatione (Göttingen, 1789). Comp. Michaelis, Orient. Biblioth. vii, 235 sq. The only resemblance is in the general purpose, there is none in the nature of the vow. See Damoan, Vota Nazarit, et Nazarinarum inter alia colossata. (Kilb. 1708); comp. Carpoforo, Appar. 151 sq., 739; Coxe, Amurath, xiv. 19; Ledaby, Symbol, vii, 430 sq.; G. F. Meinhardt, de Nazaribus (Jenae, 1678); Zunz, in Miscell. Leips. Nov. iv, 426 sq. See Halle.

3. What constituted a Nazarite.—The special vow whereby one bound himself to be a Nazarite (נַצָּר) involved the following three things: (a) He is to abstain from wine and strong drink—or as Onkelos renders דְּרֶשׁ שִׁתי כַּלָּה שִׁתי כַּלָּה נְזָר (nazar) שֵׁשֶׁת יָיִשׁ, and the ancient Jewish canons will have it, from old and new wine—vigne made of wine or strong drink; liquor of grapes and grapes either moist or dried; and, in fine, every production of the vine—even from the very stones and skin of the vine. According to the Jewish canons, however, "strong drink made of dates, or such like, is lawful for the Nazarite" (Maimonides, Hilkhoth Neziruth, v, 1). (b) He must refrain from cutting the hair off his head during the whole period of his Nazaritish. (c) He must avoid every contact with the dead, even if his parents or brothers or sisters were to die during his Nazaritish. If he was accidentally defiled by death suddenly occurring on his premises, he was obliged to observe the law of seven days (compare Lev. xi. 14); cut off his hair on the seventh day—which in this case was not burned, but buried (Mishna, Temura, vi, 4; and Maimonides, ad loc.); bring on the eighth day two turtledoves or two young pigeons to the priest—one for a sin-offering and the other for a burnt-offering; bow in his head, offer a lamb of the first year as a trespass-offering, renew his vow, and begin again his Nazaritish, as the days which had passed since the commencement of his vow were lost through this interruption (Numb. vi, 1-13). His desecration by a dead body is alone mentioned, because it might happen without his will; whereas the other two conditions of his vow were in his own power, and, it was presumed, would not be violated. According to the later penalties of the Talmud, men and women who, after taking the Nazaritish vow, cut their hair or plucked it off with their hands, or defiled themselves by willfully coming in contact with dead bodies, were regarded as violators of the vow, reckoned as Nazarites (Nazar, iv, 3; Maimonides, Hilkhoth Nezir, v, 2, 6, 8, 11). So rigid were the regulations that the Nazarite was not allowed to comb his hair lest some of it might be torn out, but he was permitted to smooth it with his hands (Nazar, vi, 8).

As the Mosaic law says nothing about the formality of the Nazaritish vow, and as all other declarations were binding wherever and whenever made (Deut. xxiii, 24), we may accept the ancient Jewish canons that the vow was made in private, and that it was binding even if a man or woman simply said, "Behold, I am a Nazarite!" (נַצָּר), or repeated, "I also become one," when hearing any one else make this declaration (Mishna, Nazar, i, 2; iii, 1; iv, 1). A father could make a vow for his son, if he was thirteen years of age, but not a mother for hers (Numb. xxx, 8; Soto, iii, 8; Nazar, iii, 6). A man had the power to annul his wife's vow (Nazar, iv, 1; Maimonides, Hilkhoth Neziruth, ii, 17), but not his slave's, and in case he did prohibit him to perform it, he was bound to fulfil it as soon as he was able (Nazar, ix, 19).

The vow seems to have been resorted to, like prayer, by pious people, under extraordinary exigencies, such as in cases of sickness (Josephus, War, ii, 15), or when starting on a long journey (Mishna, Nazar, i, 6), or when wishing for children (ib. ii, 7; ix, 2).

A completion of the words of Nazar, v, 1, and the Offerings connected therewith.—When the time of his Nazaritish was accomplished, the Nazarite had to present himself before the door of the sanctuary with three sac-
NAZARITE

rifices, corresponding to the three prohibitions of Nazari-
ritism — (a) a he-lamb of the first year for a burn-ning;
(b) a ewe-lamb also of the first year for a sin-
offering; and (c) a ram for a peace-offering. With the
latter rite there was an accompanying oblation of a
tenth-deal of flour, from which were baked twenty
cakes, viz., ten unleavened cakes and ten unleavened
wafers. These twenty cakes were anointed with a
fourth part of a log of oil, as fixed by a law of Moses
from Sinai, and were all brought in one vessel" (Maim-
inoide, Hıd orchestrated, viii, 1). Besides these extra-
ordinary cakes and wafers, he had to bring the ordinary
meal-offering and drink-offering appointed for all sacri-
fices (comp. Numb. xxviii). These three sacrifices
were designed both as an atonement for the sins which the
Nazarite unconsciously committed during his Nazarite-
ship, and as an expression of his thanksgiving to Him
by whose grace he had happily fulfilled the time of his vow.
After the priest had offered these sacrifices—sin-offer-
ing first, burnt-offering second, and peace-offering third
(Maimonides, Hıd orchestrated, viii, 8)—the Nazarite
cut off his Nazar head (יהוהוני לא), i.e. the hair which
was his Nazaritish pledge—at the door, threw it into
the fire under the peace-offering, or, as the ancient
Jewish canons have it, under the caldron in which the
peace-offering was boiled (Mishna, Nazir, vi, 8). Thereupon
the priest took the boiled shoulder of the ram, and, after
unleavened cakes, partakes of one of the unleavened wafers,
laid them on the Nazarite’s hand, put his hands under those of
the owner, and waved it all before the Lord" (Mishna, Nazir, vi, 9).

5. Duration of the Nazaritish Vow.—As the Bible says
nothing about the duration of the Nazaritish vow, but
leaves every one who takes it to fix his own time, the
administrators of the Mosaic law were obliged to specify
a certain number of days as the lowest period for Nazar-
iteship, since it did not unfrequently happen that some
took the vow without mentioning any definite time
whatever, while others, if they could take it for a few
days, would vow too often, and thereby diminish its sol-
lemn character. Hence the Jewish canons determined that
if any one says, I will be a Nazarite, without mentioning
expressly how long, he cannot be a Nazarite
less than thirty days; and even if he says, I take
upon myself to be a Nazarite with an exceedingly great
Nazariteship, it is not to be more than thirty days,
because he expressed no time. If he mentions less than
thirty days, e.g. if he says I am a Nazarite for one
day or ten days, he is not necessarily a Nazarite for
thirty days, for there is no Nazariteship for less than
thirty days. This is a law transmitted by tradi-
tion. But if he mentions a time more than thirty days,
e.g. if he says thirty-one days, or forty, or a hundred
days, he must be a Nazarite during the said period, neither less nor more. Maimonides,
Hıd orchestrated, iii, 1-8; Mishna, Nazir, i, 3; iii, i; vi, 8; Joseph. War, ii, 15, 1). The ancient expositors
connect the fixing of the indefinite vow at thirty days,
with the words, he shall be holy (Kıd miqra, Numb.
v, 5), by the exegetical rule called Geomatria (גומטריה)
where דואק (10+5+10+5+80)
means thirty (comp. Siphri, ad loc.). It will
be seen from this that there were some who took the Nazar-
itish vow for life. These are called נזרין ארוך ימים
(Nazarı natiı), perpetual Nazarites, in contradistinc-
tion from those who took the vow for a limited period

Nazarı voties), and are therefore called נזרין רעים, or Nazarites
for a certain number of days, or דוק א地區
Nazarı vebib or Nazarites for a short time. The Bible mentions
three Nazarites for life: Samson, Samuel, and John
the Baptist. Fathers, and mothers with the consent of their
husbands, could devote their prospective children to
perpetual Nazarism (1 Sam. i, 11; Mishna, Nazir, ix, 5), in which case the mother abstained during her preg-
nancy from wine and strong drink and unclean things
(Judg. xii, 3; Luke i, 15). These life-long Nazarites
were afterwards divided into two classes, viz.
Nazarı תוארי, ordinary perpetual Nazarites, and
Nazarı תוארי, Samson-Nazarites, and the distinction between the two
was that the former were allowed to diminish their hair
when it became too heavy, if they were willing to bring
the three appointed sacrifices, and were obliged to bring
a sacrifice in case they became defiled; while the latter
were not allowed to diminish their hair, however heavy
it became, but were not required to bring a sacrifice in case they
became defiled (Mishna, Nazir, i, 2), because Samson
brought no sacrifice after he was defiled by contact with the
jaw-bone of a dead ass (Judg. xv, 16). Of course,
any one who wished to become a Samson-Nazarı had
Jewish law distinctly to say so (יוסף דת אלניאר)
when he took the vow. One instance is related of Helena, queen of Adla-
NAZARITE

bene (of whom some particulars are given by Josephus, Ant. xx, 2), who, with the zeal of a new convert, took a vow for seven years in order to obtain the divine favor on a military expedition which her son was about to undertake. It is said that the period of seven years was appointed because she had visited Jerusalem, and was there informed by the doctors of the school of Hillel that a vow taken in another country must be repeated whenever the Nazarite might visit the Holy Land. She accordingly continued a Nazarite for a second seven years, and happening to touch a dead body just as the time was about to expire, she was obliged to renew her vow, according to the law in Numb. vi, 9, etc. She thus continued a Nazarite for twenty-one years (Nazar, iii, 6).

5. The meaning of this interesting ordinance has been largely discussed by Philo Judaeus, Maimonides, Abur- banel, and other Jewish writers. The following theories have been maintained by them and by modern writers:

(1) Some consider it as a symbolical expression of the divine nature working in man, and deny that it involved anything of a strictly ascetic character. Several of the Jewish writers have taken this view more or less completely. Aburbanel imagined that the hair represents the intellectual power, the power belonging to the head, which the wise man was not to suffer to be diminished or to be interfered with by drinking wine or by any other indulgence; and that the separation from other men which characterizes it was appointed to bear witness to the eternity of the divine nature. Of modern critics, Bähr appears to have most completely trodden in the same track. While he denies that the life of the Nazarite was, in the proper sense, ascetic, he contends that his abstinence from wine, and his not being allowed to approach the dead, figured the separation from other men which characterizes the consecrated servant of the Lord; and that his long hair signified his holiness. The hair, according to his theory, as being the bloom of manhood, is the symbol of growth in the vegetable as well as the animal kingdom, and therefore of the operation of the divine power.

(2) Others see in Nazaritism the principle of stoicism, and imagine that it was intended to cultivate and bear witness to the sovereignty of the will over the lower tendencies of human nature. The philosophical Jewish doctors, for the most part, seem to have preferred this view. Thus Bechai speaks of the Nazarite as a conquering ascetic, free from all the temptations with which his long hair as a crown, "quod ipsa rex sit cepitdivitatis imperans praeter morer relinquumorum, qui cu-

(3) Many regard it wholly in the light of a sacrifice of the person to God. Philo has taken this view of the subject. In his work, On Animals, he gives a long dissertation on the heathen labors and calls it εὐχὰριστον. According to him the Nazarite did not sacrifice merely his possessions, but his person, and the act of sacrifice was to be performed in the completest manner. The outward observances enjoined upon them were to be the genuine expressions of his spiritual devotion. To represent spotless purity within, he was to shun defilement from the dead, at the expense even of the obligation of the closest family ties. As no spiritual state or act can be signified by any single symbol, he was to identify himself with each one of the three victims which he had to offer as often as he broke his vow, and not only in the person, or what he called his vow, came to an end. He was to realize in himself the ideas of the whole burnt-offering, the sin-offering, and the peace-offering. That no mistake might be made in regard to the three sacrifices being shadows of one and the same substance, it was ordained that the victim time should be individuals of one and the same species of animal. The shorn hair was put on the fire of the altar in that order that, although the divine law did not permit the offering of human blood, something might be offered as a gift to him and as a votive offering. Ewald, following in the same line of thought, has treated the vow of the Nazarite as an act of self-sacrifice; but he looks on the preservation of the hair as signifying that the Nazarite is set apart for God that no change or diminution should be made in any part of his person, offered as a gift to him and as the world for a visible token of his peculiar consecration to Jehovah.

(4) In all such disquisitions there is a basis of truth, combined with an element of error derived from the speculations of the age or of the individual. From a review of all the particulars of this institute, it is to be inferred that it was a typical representation of a holy life, forming, in the case of individuals, prominent examples of that fidelity to covenant engagements, for the interests of righteousness, which should have been found in the whole community of Israel. It exhibits to the view a practical symbol of that separation from sin which is coincident with dedication to God. It is a part of that system of teaching by figures which was adapted to a comparatively unsophisticated age. It was not in itself a principle or law for the regulation of conduct, as stoicism or asceticism, but a divinely appointed emblem of a duly regulated life. The symbol of the Nazarite, then, was an institution for the public and private constitution. It was not incumbent upon any individual or order of men, and therefore possessed no inherent moral obligation. In its ordinary form it lasted only thirty, or, at most, one hundred days. It prohibited not merely intoxicating drink, but every product of the vine, whereas for purely moral purposes the Scripture simply enjoins temperance in the use of the things which bear the name of the vine. The intoxicating quality of the juice of the grape, by which reason is clouded and unbalanced, is laid hold of as the fit representative of sin, which darkens the intellect and corrupts the will. And every part of the vine is prohibited, not because it was the forbidden fruit, as was Jewish dogma of this sort (Isa. xliii, 8; Luke i, 15; Magee, On the Atonement, illust. xxxviii), but because this symbolistic act conveys the obvious lesson to refrain from sin in every shape and of every degree, since the slightest deviation from rectitude indicates a depraved nature as truly as the most enormous transgression does, so that to abstain from a single part of the vine is a mark of manhood; and the unshorn locks present a striking display of the unrestrained luxuriants of corporeal growth and beauty. They are therefore emblematic of power, liberty, and beauty, and of the unreserved exertion of all our faculties in the service of our Maker and Saviour. The determinate choice of that which is right and good is the principle of a holy life, and the coming forth of that choice into full effect is the beauty of holiness. The flowing locks are equally expressible of childlike simplicity and feminine grace, and therefore of that confiding dependence and yielding devotedness which are the special character of the service of his God. This thought is well brought out by Fairbairn (Typol. ii, 419), in harmony with Ainsworth and Baumgarten. But the softness of a faithful heart must be combined with the energy of a valiant spirit, to constitute the perfection of the godly or Christian character. Samson,
NAZARITE

Samuel, and John the Baptist were no less distinguished for manly fortitude than for humble deference to the will of God. Defilement by a dead body is the third thing to be avoided. The dead body is the victim of death; the penalty of sin. It has, therefore, been the seat of that moral corruption, contact with which conveys ceremonial defilement.

6. Relation of Nazaritenism to the Levitical Economy.—As the priestly office presupposed that purity of life of which the Nazarite was an emblem, it is natural that there should be points of correspondence. Thus the priests were to abstain from wine or strong drink when they went into the tabernacle of the congregation to perform their official functions (Lev. x, 9). But this was obviously a salutary precaution against their being disqualified in mind or body for the proper discharge of their duties. Hence they were not prohibited from other products of the vine; and when not officiating they were under no restraint but the ordinary one of temperance. The high-priest, also, upon whom was "the crown (§.2) of the anointing oil of his God," was not to touch any dead body, or defile himself for his father or his mother (Lev. xxi, 11, 12).
But the ordinary priests were not placed under the same restraint, plainly because a substitute could in that case be found for one who was under a temporary defilement. Maimonides (More Nebuchim, iii, 48) speaks of the dignity of the Nazarite, in regard to his sanctity, as being equal to that of a high-priest. The wine enjoined upon the high-priest on behalf of all the priests when they were to enter upon their ministrations, is an obvious but perhaps not such an important point in the comparison. There is a passage in the account given by Hegesippus of St. James the Just (Rusbeius, Hist. Eccl. ii, 23), which, if we may assume it to represent a genuine tradition, is worth a notice, and seems to show that Nazarites were permitted even to enter into the Holy of Holies. He says that St. James was consecrated from his birth neither to eat meat, to drink wine, nor, to indulge in the use of the bath, and that to him alone it was not permitted (צֹּ֣בָּה μִֽצְוָּה לִֽית) to enter the sanctuary. Perhaps it would not be unreasonable to suppose that the half-sacerdotal character of Samuel might have been connected with his prerogative as a Nazarite. Many of the fathers designate him as a priest, although St. Jerome, on the other hand, regards his discourse, as an angelic and not a sacerdotal rank (see Ortol. Thea. Nov. Theol.-Philol. i, 587).

The Nazir did not sequester himself from the engagements or enjoyments of domestic or social life. His vow usually lasted, not for life, but for a number of days determined by himself. He did not therefore form a fraternity, but continued as an individual to participate in the ordinary affairs of every-day life. This vow merely afforded to persons of a certain temperament, in a peculiar state of religious feeling, or in entering on a particular enterprise, a course of typical observance, in which the higher tone of a devout imagination might find a definite and legitimate scope. Such a mode of action, when undertaken with a proper sense of its symbolic import, in accordance with the sanction of the Deity, was well calculated to cultivate pure desires and promote holy tempers in the devotee himself, and at the same time to convey useful and impressing lessons to those who were intelligent and respectful witnesses of his conduct during the time of his separation.

7. Later Notices.—The Nazarite vow was practiced with more, or less frequency during all periods of the Old Testament history. Ewald supposes that Nazaritenism for a time prevailed in the in, despite the fact that they multiplied in periods of great political and religious excitement. We have already found traces of its observance in Judges and 1 Samuel. Amos introduces the Lord exhorting the people, because, when he had raised up young men for Nazarites, they had given them wine to drink (Amos ii, 11, 12). Jeremiah laments the miserable change that had come over the Nazarites (princes, Geen, Blayney) in consequence of the desolations of the holy city and land (Lam. iv, 7, 8). This is the result of the unnatural consequence of the national defection. The Nazarite vow then sprang from an earnest heart as a solemn protest against the formality of the times. It was a cry from some one who had not bowed the knee to the Baal of the age—a welcome ray of hope amid the darkness that overshadowed the Church. It was the protest of the days of apostasy and peril. Individual piety and personal circumstances might bring it forth in all conditions of the Church militant.

In the time of Judas Maccabæus we find the devout Jews, when they were bringing their gifts to the priests, stirring up the Nazarites of days who had completed the time of their consecration to make the accustomed offerings (1 Macc. iii, 49). From this incident, in connection with what has been related of the liberality of Alexander Jannæus and Herod Agrippa, we may infer that the number of Nazarites must have been very considerable during the two centuries and a half which preceded the destruction of Jerusalem. The instance of St. John the Baptist and that of St. James the Just (if we accept the traditional account) show that the Nazarite for life retained his original character till later times; and the act of St. Paul in joining himself with the four Nazarites at Jerusalem seems to prove that the vow still continued in the course of the days. We may trace the practice in its important features. The case of Helena, queen of Adiabene, has already been cited. Græc. Gesch. der Juden, iii, 80 compares Nazarites and Essenes (q. v.).

8. Literature.—In addition to the works repeatedly cited above, especially the Talmudic treatise Nazar, and the commentary called Shiphri, we may mention Michaelis, Laws of Moses, ii, 284 sq.; Bähr, Symbolik des Mos. Cultus, i, 864; ii, 416, 480; Ewald, Auctthetiam, p. 96 sq.; Critics Sacri ad Loc. Num.; Hengstenberg, Egypt and Moses, p. 190; Kell, Bibl. Archæolog. i, 322; and on Paul's vows the monograph of Reinuccius, De Paulo Naustro (Weissent. 1720). Others are cited by Volbeding, Index, p. 45, 168; and by Dans, Wörterb. p. 689.

Nazarites, a Christian sect in Russia and Hungary. Originally they were only known in the neighborhood of Sezgedin, but more recently they have spread over the greater part of Hungary. Between the Danube and the Theiss they now number 80,000. The most of their adherents are in the Magyar districts. They profess to derive their religion from a New Testament passage (Tit. iii, 14). They hold God to be one in essence, but three in person—Father, Son, and Spirit. Their sacraments are two—Baptism and the Lord's Supper; adults only being baptized, and that by immersion by any male member in good standing, and baptism being essential to salvation. They have no ministers, consider marriage a civil ceremony, recognize no Sabbath—for which they find no injunction in the New Testament, though they worship on that day for convenience' sake—are singularly charitable and moral in their daily lives, refuse to take oats or to bear arms, and take no part in political affairs. In order to escape from the care of the parishioners in case of the inability of the parishes, hire substitutes for them.

Nazarus, St., a martyr of the first ages of the Church, was put to death at Milan, and is still celebrated in Britain. Son of a superior Roman and pagan officer, and a Christian mother, whom the Church honors under the name of St. Perpetua, he adopted the maternal faith, renounced the employment of his father, and devoted himself to preaching. He was put to death at Milan, and his body was conveyed by St. Cæcilia (vulg. called Cecilia), and put to death under some pretext not well known. Their bodies, buried in the environs of Milan, were found about 856 by St. Ambrose, bishop of that city, and carried to the Church of the Apostles, which this prelate had built. "Many relics of St. Nazarius are
distributed," say fathers Richard and Giraud, "so that it
can scarcely be told which are the true ones." The
Church celebrates the fête of St. Nazarius and St. Celestus

Nazarey, Allvan, an African bishop of the colored
British Methodist Episcopal Church in Canada, was
born about 1820. He entered the ministry in 1850, and
preached for some time in Canada, gaining friends ev-
everywhere by his consistent Christian walk and work.
He labored zealously for the promotion of the Gospel
cause among his African brethren, and was finally se-
lected by them as their bishop after the separation of
the Canadian Church from the Methodist Episcopal
Church of the United States. Besides the responsible
work of the episcopacy, bishop Nazarey had charge of the
Missioner, the Canadian paper of the colored Meth-
odists. Bishop Nazarey died in August, 1875, at She-
burne, N.S.

Nazzari, Bartolomeo, an Italian painter who
devoted himself to sacred and secular art, was born,
according to Tassi, in the territory of Trusane, in the
Burnese, in 1609. After studying at Venice under An-
gelo Trevianni, he went to Rome, and finished his course
under Benedetto Luti and Francesco Trevianni. He
settled in France, and became an excellent landscap-
ery and portrait artist. He visited various capitals of
different German and Italian states, and gained a great
reputation for his portraits of princes and of their cur-
tors, also for his heads of youths and old men, drawn
from life, very fancifully dressed and decorated. Among
his productions is a Holy Family with St. Anne, at Pontremoli.
He died in 1750. See Spooner, Biog. Hist. of the Fine Arts, ii, 610.

Nazzari, Francesco, an Italian ecclesiastical sa-
vant, was born about 1684 near Bergamo. He was
still young when he was given a philosopher's chair
in the College of Sapience at Rome. Following the
advice of Michel-Angle Ricci, afterwards cardinal, he
undertook in 1689, to establish a college and journal in
Italy, for which the Journal des Savans, which ap-
ppeared a short time before in Paris, served him as a
model. His associates, Ricci, J. Lucio, Salvador and
Francesco Serra, Tommaso de Giuli, J. Pastrizi, and
Ciampini, agreed to furnish him with extracts from
works in foreign languages. He took upon himself the
analysis of the French books, and the revision of all the
articles which should be sent to him. He issued this
journal, entitled Giornale de letterati, until the month
of March, 1675, from the office of Tinassi; but forced,
in consequence of a difference with the latter, to yield
his duties to Ciampini, he formed a new society, and
published, under the same title, a continuation, which
was printed at the office of Cerrara until the end of
1679. After having been attached as secretary to Jean
Lucio, a Dalmatian savant, he accompanied, in 1686,
the geographer Auzott to France, and it is said was
very useful to him in the observation of eclipses and
celestial revolutions. He died at Rome Oct. 19, 1714.
By his will he left his wealth and his library to the
Church of the Bergamasques, and founded at Rome a
college for the scholars of his province. Besides the
journal that he has edited, and which has been reprint-
ed by his successors, with additions, we owe to Nazarey an
Italian version of the Exposition de la doctrine de l'Eglise
catholique, by Bossuet (Rome, 1678, 8vo), and an edition of
the Lettre discursive de Dumeide Borghezi (Rome, 1701, 4to).

Nâđa is a religious name, or a religious secret association
among the people of Southern Guineas, in West Africa.
It is confined to the adult male population, and is thus
described by Mr. Wilson, who, from his long residence
in the country, acquired an intimate acquaintance with
its peculiar customs: "It [i.e. the association] is head-
ed by a spirit of this name, who dwells in the woods,
and appears only when summoned by some unusual
event—at the death of a person connected with the or-
der, at the birth of twins, or at the inauguration of some
one into office. His voice is never heard except at
night, and after the people have retired to rest. He en-
ters the village, and is borne up in dry plantain leaves
that no one would suspect him of belonging to the
human species. He is always ac-
companied by a train of young men, and the party
dance to a peculiar and somewhat plaintive air on a
flute-like instrument as they parade through the streets.
As is well known that he has entered the village, the
women and children run away to their rooms to hide
themselves. If they should have the misfortune to see
Nâđa, or should be discovered peeping at him through
the cracks of the houses, they would be thrashed at-
most to death. Perhaps no woman has ever had the
temptation to cast eyes upon this mysterious being. Nâđa
frequently sits in front of the dwelling of a man who
is known to have rum in his possession, and exacts a bot-
tle, in default of which his property would be injured.
The leading men of the village show the utmost de-
ference to his authority, no doubt for the purpose of
making a stronger impression upon the minds of the
women and children. If a distinguished person dies,
Nâđa affects great rage, and comes the following night
with a large posse of men to seize the property of the
villagers without discrimination. He is sure to lay
hands on as many sheep and goats as are necessary to
make a grand feast, and no man has any right to com-
plain of the propriety of his conduct. He takes all the
fowls, and other live stock in their dwelling-houses the
night before, and in this way alone can they escape the rava-
ges of this monster of the woods, who is sure to commit
depredations somewhat in proportion to the importance
and rank of the man who has died. The institution of
Nâđa, like that of Mafreti, is intended to keep the wom-
en, children, and slaves in subjection. I once heard a
man who belonged to the order acknowledge that there
was no such spirit; 'but how,' said he, 'shall we govern
our women and our slaves if we do away with the
impression that there is such a being?'

Nâđengi, the highest and principal deity wor-
shipped by the Fiji Islanders. Ndengi is to them an
impersonation of the abstract idea of eternal existence.
He is subject to no emotion or sensation, nor to any
appetite except hunger. They believe that this god
manifests himself in a variety of forms from age to age,
but he is always seen represented in the shape of a
serpent. According to the Fijians, Ndengi possesses a
monstrous existence in a gloomy cavity—the hollow
of an inland rock near the north-east end of Viti Leou;
evincing no interest in any one but his attendant Uto,
and giving no signs of life beyond eating, answering
his name, and assuming his position in a manner similar
to the other. There are points in this description which
remind one of the Chronos of Greek mythology. The
word Ndengi is supposed by some to be a corruption of
the first part of the name Tangasoa, or great Tanga,
the chief deity of Polynesia; but whether this idea be
well founded or not, great veneration is entertained for
Ndengi, as they believe that to this deity the spirit
goes immediately after death, either to be purified or
to receive sentence. All spirits, however, are not allowed
to reach the judgment-seat of Ndengi, for the road is
obstructed by an enormous giant wielding a large axe,
with which he attacks all who pass him, and those who
are wounded dare not present themselves to Ndengi,
and are obliged to wander about in the mountains. "At
Rawa," says captain Wilkes, of the American exploring
expedition, "it is believed that the spirits first repair
to the residence of Ndengi, who allots some of them to
the destruction of mankind, and sends the rest to Makaul, a
small island off Rawa, where they reside until the ap-
pointed day, after which they are all doomed to annihila-
tion. The judgments thus attributed to Ndengi seem
to be ascribed rather to his caprice than to any desert
of the departed soul." See Williams, Fiji and the Fij-
ians, ed. by Rowe (Lond. 1867, 12mo), ch. viii. (J. H. W.)
NEAL, Daniel, an English dissenting divine and ecclesiastical writer of considerable eminence, was born in London Dec. 14, 1678. His early education was received at Merchant Taylors' School. About 1696 or 1697 he was admitted a student at St. John's College, Oxford; but feeling that he could not conscientiously meet the religious demands involved in his acceptance, he went to a dissenters' academy, conducted by the celebrated Rev. Thomas Rowe, to whom Dr. Watts addressed his animated odes, called Free Philosophy. After three years' study in this school, he went abroad and studied in the Dutch universities of Utrecht and Leyden. Near the close of 1708 Neal returned to England, enjoying at this time the society of the afterwards celebrated Dr. Lardner. Shortly after his return home he was ordained minister of the Independent body, and became assistant, the latter year, of the congregation in Aldergate Street; and at the death of the latter was chosen as successor. He continued in this position until within a year of his death, which occurred April 4, 1748. As a pastor, Mr. Neal met with more than usual success; even as a young man, while yet the assistant of Dr. Singleton, men of all stations came to hear him preach; and so largely did his congregation increase that when he ministered to his people as sole pastor a new church had to be secured. He was known far beyond the pale of his own congregation, and frequently invited to lecture in the interests of Christianity and on Protestant polemics. Mr. Neal had an easy, agreeable manner, both in the style and in the delivery of his sermons, free from affectation. In conversation, he knew how to mix grave and prudent instruction or advice with a becoming cheerfulness, which made his company pleasing and profitable. Yet, notwithstanding the callings and duties of his profession, for which he was eminently faithful, he found leisure for valuable literary labors; and the name of Daniel Neal will for some time to come figure prominently in English ecclesiastical history. His chief work is the History of the Puritans, which is written with great masterly skill, and though it is serious and often unjustly on the English establishments, and frequently palliates the errors of the Puritans. It was originally published in 4 vols. 8vo, the first of which appeared in 1732, and the second, third, and fourth in 1733, 1736, and 1738 respectively. It has since passed through many editions (Amer. ed. revised, corrected, and enlarged with additional notes by John D. Charles, A.M. [N. Y. 1844]), 2 vols. 8vo, and often since). The first volume was reviewed by Dr. Maddox, bishop of St. Asaph, and the remaining volumes by Dr. Zachary Grey. To the former Neal himself replied; and an answer was given to the latter by Dr. Toulmin, in an edition of Neal's History published in 1789-7. Various opinions have been expressed on the character and value of Neal's History, yet no English critic has ever questioned Neal's honesty. Bishop Warburton considered it grossly unjust to the Anglican establishment, but he never engaged Neal's integrity. Bickersteth, himself of the subject ofNeal's History, writes: "It is valuable and instructive, with a strong bias in favor of his subjects, but an upright mind." (Christian Student, p. 814). The truth is, Neal is about as far from the mark, as a historian, as Heylin; and Disraeli has well said that "Heylin, in his History of the Presbyterian, blackened them as so many political devils; and Neal, in his History of the Puritans, blames them into a sweet and almond whiteness." (Miscell. of Lit. ed. 1840, p. 298; comp. p. 807, 908). Neal's other published works are: A Course of Sermons, 1722, 1723, 1726, 1727, 1737, (nine are in a collection of Lectures by several divines, 1732, 2 vols. 8vo).--A Solemn Prayer against the Plague, 1721;--three Tracts in vindication of his History of the Puritans, 1720, 1724, 1739; and the following works: 1. History of New England: containing an account of the civil and religious affairs of that country to the year 1700; to which is added an Appendix, containing their charter, their ecclesiastical discipline, and their municipal laws (Lond. 1720, 2 vols. 8vo; again, 1747, 2 vols. 8vo; see Dr. Watts's Letter to Dr. Cotton Mather, 1720, in Mass. Hist. Coll. vol. iv.). 2. Narratives of the Methodist and Spiritual Movements in New England, by Mr. Benjamin Colman, etc. 1722, 8vo. See Life by Dr. Toulmin, in Neal's History of the Puritans; Wilson's Hist. of Dissenting Churches; Bogle and Bennett's Hist. of Dissenters, 1747; Funeral Sermon on Neal, by Jennings; Skeats, Hist. Free Churches of England, p. 267, 268, 306, 307; Prof. Dissent. Mag. vol. i.; Smyth's Lecta in Mod. Hist. Lecta, xi, xviii; Mosheim's Eccles. Hist.; Thomas Moore's Memoirs (1785), iv, 159; Lowndes Bibl. Mamm. 1829; Watts's Bibl. Brit. &c. Darlington, Cyclop. Bibl. ii, 2109; Lond. Quar. Rev. x, 60 (by Robert Southey); Wilberforce, Rev. xii, 195 (by J. North); Essays and Reviews, i, 205; Math. Rev. Rev. 54 (by D. Belcher); Princeton Rev. xvii, 1; Christian Rev. viii, 481; Christian Examin. xxxviii, 126 (by A. Lamson); Church Rev. vol. ix; Amer. Presb. Theol. Rev. Jan. 1867. (J. H. W.)

Neale, John Mason, a noted English divine, celebrated as a hymnologist and writer of ecclesiastical history, and as a successful educator, was born in London Jan. 24, 1818, and was educated at Cambridge University, Trinity College, class of 1840, where he took the members' prize in 1838, and the Seatonian prize for a sacred poem nine times between 1843-61. Neale entered into holy orders in 1845, and became incumbent of Crawley, in Sussex, which position he held until 1846, when he was appointed warden of the Sackville College, East Grinstead. He died at East Grinstead, Aug. 6, 1866. Of High-Church proclivities, he identified himself with the various movements of the Ritualists, and in 1865 was invited to be founderd of the Oxford Movement. Neale was a voluminous writer, his publications being some seventy in number. His most important work is his History of the Holy Eastern Church, vols. i and ii forming a general introduction (London, 1850, 8vo); vols. iii and iv covering the Patriarchate of Alexandria (ibid., 1866, 8vo), and the Church of the East (ibid., 1874, 8vo). This work is highly esteemed by all students of Oriental Church history. It is a learned and laborious work, and in the parts of which it treats forms a valuable compend. Based as it is on the original sources, it is an invaluable contribution to ecclesiastical history; and it is to be regretted that Mr. Neale did not live to complete it. See Edinb. Review, evii, 322 sq. Other valuable works by Mr. Neale are, Sequelae ex missalibus Germanicis (1852) Med. Pseu. Lec. and Med. Preface (1867); History of the so-called Jansenist Church of Holland (1863); The Liturgies and Church History (1865); The Liturgies (in Greek) of St. Mark, St. James, St. Clement, St. Chrysostom, and St. Basil (1865). Dr. Neale figures as a hymnologist substantially, as in so many other departments of Christian labor, not so much because of his original contributions as for his attitude toward the study of ancient and medieval hymns. His most valued translation is that of the celebrated poem of Bernard of Cluny, entitled De Contemptu Mundi, portions of which are found in many of our best hymn-books in the three hymns, "Brieif life is here our portion," "For thee, O dear, country,"
and “Jerusalem the golden.” Among his contributions to hymnology, besides those already mentioned, are: *Medieval Hymns, Sequences, etc.* (1861; also a second edition, 1881); *Hymns for Chil-
dren* (sixth edition, 1864); —*Hymns for the Sick*; —*Hymns of the Eastern Church* (1863; new edition, with introduction, 1871); —*Carols for Christmas-Tide* (1858).

Several of his hymns have become the common prop-
erty of English-speaking people. Dr. Schaff has in-
corporated two of them in his *Christ in Song*, p. 126, 396. (*J. H. W.*)

**Neale, Leonard, D.D., an American Roman Cath-
ic prelate, was born in the state of Maryland in 1746, and was educated at the Roman Catholic college in Baltimore. He entered holy orders after he had en-
joyed further superior educational advantages at home and abroad, and rapidly rose to distinction. In 1802, he was consecrated coadjutor to archbishop Carroll of Baltimore, and in 1815 became his successor in the archiepiscopate. Archbishop Neale died at George-
town, D. C., June 18, 1817. He was highly respected by the Protostyrians of this country for his Christian zeal and his broad views on religious toleration.**

**Neale, Samuel, a highly-esteemed Quaker preach-
er, was born in Ireland, in Dublin, in 1742. He began
preaching at the age of twenty-two years, and travelled in England, Holland, and Germany, everywhere preach-
ing the Gospel of Christ. In 1738 he returned from this journey, and settled within the compass of Eden-
berry and Rathangan. He died about 1780. See Jey-
ney, *Hist. of Friends*, iii, 282.**

**Neander, Christoph Friedrich, a German theologian and hymnologist, was born at Eksa in 1724, and was educated at Halle from 1740 to 1743. He en-
tered the ministry, and became pastor at Kubillen, in a place in the German province of West Russia; in 1755 at Grünhof, in the same vicinity; in 1776 at Doblenbach; and in 1785 was honored with the superintendentcy of the whole province. He died in 1791. In 1785 he wrote many Christian songs, of which a collection was pub-
lished at Riga in 1772, and so extensive was the cir-
culation that several editions were reached. The third edition was brought out in 1779. He also prepared a hymn-book for the province. See E. von der Recke, *Leben des Christoph Friedrich Neander*, herausgegeben von Tiedge (Berlin, 1804, 8vo).**

**Neander, Daniel Amadeus, a German Protet-
dant prelate of distinction, was born at Lengenfeld, in Saxony, Nov. 17, 1775, and was educated at the Univer-
sity of Leipsic. He entered the ministry, and became pas-
tor at the little village of Flemmingen, near Naumburg; in 1808 he was made pastor and superintendent at Merse-
burg, in 1817, he was consecrated coadjutor, and a little later coun-
trol to the minister of culture and pastor of St. Peter’s at Ber-
in; in 1829 first general superintendent of the prov-
ince of Brandenburg, and director of the Consistory; and finally, in 1830, bishop of the Evangelical Church. In 1855, by his own request, he was granted a supernu-
merary relation, and after 1856, when he was relieved of all ecclesiastical duties, he lived quietly in retirement until his death, Nov. 18, 1869. The bishop enjoyed the confidence and esteem of the Prussian Church, to which he rendered great service in 1829 by settling the contro-
versy which then agitated it, because of the intended in-
troduction of the king’s agenda for the communion ser-
vice into the liturgy. “This difficult controversy was
finally settled principally by an arrangement proposed by
bishop Neander, according to which a new revision of
the liturgy was to be made by the ecclesiastical authori-
ties, with special reference to the most important objec-
tions (1829). As this presented to the worshippers a choice of several forms, and paid respect to provincial usages, and as the rights of the Church were preserved and were duly honored by the government, it was ac-
cepted without difficulty. Accordingly, since 1880, the
agenda has possessed the authority of law, and buttonega
evangelical national Church has been known in Prussia
erste merkwürdige Geistererscheuung des 19. Jahr-
k.’ (Dresden, 1864): — *Das freie evangelische Gemeinde-
leben* (Berlin, 1826, 2 vols.); and edited with Breitsecheld u. Gold-
horn the *Journal für Prediger* (J. H. W.).**

**Neander, Joachim, a German Reformed minis-
ter, noted as the first and the best of the hymn-writers
of the Reformed Church, and also as a participant in the controversy, was born at Bremen, probably about 1650. He studied theology in the high-
school of Bremen, where he became acquainted with and
adopted the principles of Unification. In his early career
as a student he was wild and careless, and much given to juggling about religious matters. Thus one day he
and two of his comrades went into St. Martin’s Church, and, in order to get the better of the presbytery and
the sermon touched his conscience so deeply that he de-
determined to visit the preacher in private, and from that
time he began to lead a more circumspect life. His
love of the chase, however, still clung to him; and on
one occasion he followed his game on foot so far that
night came on and he utterly lost his way among rocky
and woody hills, where the climbing was difficult even
in daylight. He wandered about for some time, and
suddenly discovered that he was in a most dangerous
position, and that one step forward would have thrown
him over a precipice. A feeling of horror came over him and he was obliged to stop and procure him of the path. In this extremity he prayed earnestly to God for help, vowing an entire devotion of himself to his ser-
vice in the future. All at once Neander’s courage re-
turned; he felt as if a hand were leading him, and, fol-
lowing the path thus indicated, he at length reached
his home in safety. From that day he kept his vow,
and a complete change took place in his mode of life.
From Bremen Neander went to continue his studies for
the ministry at Heidelberg; and upon the completion
of his university course visited with classmates at Frank-
fort-on-the-Main, where he made the acquaintance of
the Pietists who flourished there at that time under
the leadership of the noted Spener, with whom Nean-
der formed a warm friendship which lasted through life.
In 1674 Neander was made rector of the Latin school at
Dusseldorf, and he distinguished himself greatly by his
success both as a teacher and a preacher. His zeal and his
ardent endeavors, however, carried him too far, and
in 1676 he was dismissed from the school as well as
forbidden to preach until he should make reparation.
As he refused to comply with the demand of the school
authorities he was obliged to quit the town, and though
his pupils loved him so dearly that he could have held
his place by encouraging them to insubordinate mea-
sures, yet they had no choice but to obey the authorities.
It was summer time, and, feeling himself utterly friendless,
he wandered out to a deep and beautiful glen near
Mettmann on the Rhine, and there he lived for some
months in a cavern which is still known by the name of
“Neander’s Cave.” It was during the period of this
retreat that the greater part of his hymns were written.
Finally, on Feb. 17, 1677, he signed a confession of his
errors, condemning the schism of the Labadists, and
all reunion held without the participation of the minis-
ters and elders. He rose at once in popular favor, and
shortly after his return to Bremen, in 1679, was made
third pastor of St. Martin’s—the very church he had once
entered in mockery; but he only preached there one
year, and died at Easter in 1680. Neander’s hymns, 71
in number, appeared for the first time in 1679, under
aufgemert durch ein führende Bündnissk. u. Dankgesell-
 ubiquitous, etc. Some of them were first introduced in
the Darmstadt Hymn-book in 1698, and approved of after-
wards in the synods of Julich, Cleve, and Berg in 1721,
and of Mark in 1784. Some of them had been set to mu-
scopic composition by Neander himself. Neander’s style in
his hymns is unequal; occasional harshness contrasts with

fine musical lines, but there is a glow, a sweetness, and a depth about his hymns that have made many of them justly and lastingly popular among the German people. See Max Gobel, Geschichte d. chr. Lehens i. Asien; v. Fichtenau, 'Kriege im Kirchenraum,' Kirchenchronik; Schmeidler, Neander, s. Herkommern u. s. Geburtstahre, in the Reform. Kirchenzeitung (1866); Reitz, Historic d. Wiedergereboren; Winterfeld, Evangelischer Kirchengesang; Koch, Ges. des Kirchen-Lieder; Winkworth, Christen Singers of Germany, p. 284-288; Saunders, Evenings with the Hymns of the Church.

Neander, Johann August Wilhelm, universally conceded to be far the greatest of ecclesiastical historians, and surnamed the father of modern Church history, was born in the university town of Göttingen, Germany, January 15, 1789, a time memorable as introducing the fearful drama of the French Revolution, when, the moral atmosphere was infected with deadly poisons, and black and thickening clouds were spread over the political and religious horizon. He was the son of a Jewish merchant, Mendel, by name, who at one time had been prominent in commercial circles; but, reduced by reverses, was now travelling in little out-of-the-way German towns, selling goods and books he could easily carry about, and would find a ready market among the poorer classes. Mendel was honorably connected by blood-ties with some of the best of German Jewish families, among them the Mendelssohns. He was a pious Jew, and David, as the boy was named at circumcision, was brought up in the Jewish faith. At the age of 9, he was permitted to attend the Reformed Church, and study the Bible. At the age of 12, he was sent to the Gymnasium at Hamburg, which his parents had removed. At this place the Jewish boy enjoyed the friendship and daily association of Varnhagen von Ense, Chamisso, the poet, Wilhelm Neumann, the composer, etc. Already the abstract, lofty, and pure genius of Neander was beginning to show itself. It is related that a bookseller in the town was struck with the frequent visits to his shop of a bashful, ungainly boy, who used to steal in and seize upon some erudite volume that no one else would touch, and utterly lose himself for hours together in study. This was no other than our David Mendel. Plato and Plutarch were his favorite classics; and many a spare hour out of school not spent in that old book-stall was devoted to the study of these ancient masters of wisdom. The modern writers also engaged his attention; and through the translation of Germaine, the son of the famous schoolmaster, with whom he became acquainted, he became acquainted with some of the famous work of Schleiermacher entitled Discourses on Religion, which appeared in 1799, addressed to the cultivated despisers of religion, and aiming to show the evils arising in society out of indifference to the Christian faith and the practices which it demands. Being brought up as a Jew, Neander, who had the reasonable demands made of humanity by a self-sacrificing Saviour; was convinced that he who taught such ethics and demanded of his followers such a life was more than man. Long was the struggle between a faithful adherence to what his parents, especially his pious mother, had taught him; but finally, convinced of his false position, no obstacles could hold him back, and in 1806 he publicly renounced Judaism, and was baptized, adopting, in allusion to the religious change which he had experienced, the name of Neander (from the Greek ναός νεον, s. neo man), and as his Christian or baptismal names those of his Christian teacher, Johann Gurlitt, then principal of the Johanneum, and of his friends August Varnhagen and Wilhelm Neumann. Neander's sisters and brothers, and later his mother also, followed his example. In the year of his admission into the Christian Church he went to Halle as a student of theology, and in 1812 was licentiate and took success to his task. Neander's favorite professor was he whose work had caused the Jew to embrace Christ as the Messiah, and Schleiermacher in turn greatly interested himself in his convert and student. But much more intimate was Neander's relation to Prof. Knapp, then the only Pietistic representative at Halle. The sudden defeat of the Prussians at Jena, Oct. 14, 1806, threw Halle open to the French invaders, and three days later the students of that high school were forced to leave it, as it was ordered to quit the city. Consequently Neander went to Göttingen, and there he studied for three years under Planck, then in the zenith of his reputation as a Church historian; he next returned to Hamburg, expecting to enter the ministry, but was prevented in this step by a call as lecturer to the University of Heidelberg. He had been his whole life only a scholar when he was appointed extraordinary professor of theology, so great was his success as a lecturer. In 1813 the then newly-established University of Berlin needed a professor of Church history. Neander had created considerable sensation by his monograph on Julian and his Times, and the well-informed king of Prussia selected Neander for the vacant chair. Schleiermacher, De Wette, and Marheineke were already engaged, and Neander was chosen as prominently as any of his colleagues. For the remainder of his life he was ardently at work for the advancement of Christianity and in the interests of the university. He especially enjoyed immense celebrity as a lecturer. Even Schleiermacher had a limited circle of auditors compared with the throngs who went to hear Neander. Students flocked to him not only from all parts of Germany, but from the most distant Protestant countries. Many Roman Catholics, even, were among his auditors; but that there was a great preacher in Germany who is not more or less penetrated with his ideas. Perhaps no professor was ever so much loved by his students as Neander. He used to give the poorer ones tickets to his lectures, and to supply them with clothes and money. In 1822-3 Möhler, the distinguished Roman polemicist, was one of Neander's hearers; and after paying a tribute to the different celebrated theologians of the university, he alludes in these highly eulogistic terms to the noted Church historian: 'Neander embraces everything, even to the most profound. What study of original authorities, what judgment, what deep religiousness, what earnestness, what clearness and precision in the representation; how living, how attractive is the picture of the times which Neander delineates! In how masterly a manner does he know how to describe the men who were the ruling spirits of their time; with what undeviating justice does he apportion praise or blame to each! He has a biographer's taste, and a poet's faculty of telling all that he knows; he perfects his knowledge by his own personal observations; he is a friend to the persons but his professional colleagues; but Origen, Terrullian, Augustine, Chrysostom, St. Bernard, the letters of Boniface, and so on—he knows these profoundly. His demeanor is, on account of its total want of polish, laudable, but no one laugh at him for it; unboundless is the reverence with which his colleagues, the regard which his colleagues, the regard which the government, show towards him' (Wörner, Joh. A. Möhler, ein Lebensbild [Regensburg, 1856], p. 72-74).
NEANDER

The hearse was surrounded by students bearing lighted candles; in front of the body, Neander's Bible and Greek Testament were carried. The carriages of the king and queen were at the head of the procession; and at the grave a solemn choral was sung by a thousand voices, and a discourse was pronounced by his friend, the noted Dr. Krumpmacher.

In his outward appearance Dr. Neander was a real curiosity, especially in the lecture-room. Dr. Schaff thus described him in his "Sketches of German Divines," as foreign correspondent of the New York Evangelist: "Think of a man of middle size, slender frame, homely, though a good-natured and benevolent face, dark and strongly Jewish complexion, deep-seated but sparkling eyes, overshadowed with an unusually strong, but not coarse, but black hair that shone with a combed profusion over the forehead, an old-fashioned coat, a white cravat carelessly tied—as often behind or on one side of the neck as in front—a shabby hat set askant, jack-boots reaching above the knees; think of him either sitting at home, surrounded by books on the shelves, the table, the few chairs, and all over the floor, or walking Unter den Linden and in the Thie.garten of Berlin, leaning on the arm of his sister Hanneken or a faithful student, his eyes shut or looking half-way up to heaven, talking theology in the midst of the noise and fashion of the city, and presenting altogether a most singular and interesting combination of the remaining life and the after life. He stared at, smiled at, wondered at, yet respectfully greeted by all who knew him; or, finally, standing on the rostrum, playing with a couple of goose-quills which his amanuensis had always to provide, constantly crossing and recrossing his feet, bent forward, frequently sinking his head and discharging a morbid flow of spirit, and then again suddenly throwing it on high, especially when roused to polemic zeal against pantheism and dead formalism, at times fairly threatening to overturn the desk, and yet all the while pouring forth with the greatest earnestness and enthusiasm, without any other help than that of some illegible notes, an uninterrupted flow of learning and thought from the deep and pure fountain of the inner life, and thus, with all the oddity of the outside, at once commanding the veneration and confidence of every hearer: and you have a picture of Neander, the most original phenomenon in the literary world of this 19th century" (reprinted in his Germany—Its Universities, Theology, and Religion, p. 269, 270).

Neander was never married, and belonged to those exceptions where celibacy is a necessity and duty, and a means of greater usefulness in the kingdom of God. A congenial sister kept house for Neander, and attended to his wants with the most tender care. The childlike affection of this sister on the one hand was tenderly touching. He was almost as helpless as a child in matters of dress, and the story runs he once started off for the lecture-room in his morning gown and sans culottes, but was happily overtaken by the watchful sister; also, that once, in trying a new pair of pantaloons, he kept on the old ones, drew the left half over the right leg, and cut the other off with a pair of scissors as superfluous! *Si non e vero, e ben trovato.* His clothing was of the most simple sort, and hardly fit for a gentleman. His moderation in eating and drinking reminded one of the self-denial of old ascetics, like St. Anthony of Egypt, who ate only once every three days, and then felt ashamed, as an immortal spirit, to be in need of earthly food. Yet Neander was extremely hospitable, and invited his friends often to dinner, and while they were enjoying the provisions of the table he talked to them theology and religion, or branched out occasionally upon local events, and even upon the current topics of the day, as far as they came to his notice. His heart was open to friendship, and his faithful memory seldom forgot one who once had made an impression upon him, though he were only a transient visitor. Every stranger with proper recommendations was cordially welcome in his study at the fixed hour of conver-
but twenty-two years of age, Julian the Apostate (Leips., 1812; transl. by G. V. Cox, N. Y., 1850, 12mo), was the beginning of a series which to monographers designed to shake off the traditions of the individual, and to point out great crises in the religious life of man. He subsequently produced St. Bernard (Berl. 1813):—

Gnosticism (1818):—St. Chrysostom (1821, 2 vols.):

Denkwürdigkeiten aus der Geschichte des Christentums und des gesetzlichen Lebens (1822, 2 vols.; 3d ed. 1846); in an English dress, entitled The History of the Christian Religion and Church during the first Three Centuries, transl. by Henry John Rose (2d ed. Lond. 1842, 2 vols. 8vo):

—Wissenschaftliche Abhandlungen, published by Jacoby (Berl. 1851):—Geschichte der christlichen Dogmen, also published by Jacoby (1856); in English entitled Lectures on the History of Christian Dogma (Lond. 1857, 2 vols. 12mo). To these may be added a few practical commentaries and essays. By far the most important of these works is his Life of Christ, which has a polemic aim against Strauss. This is, however, only a small part of its merits; and but for the notes an ordinary reader would not detect any such specific tendency. It unfolds the life of the Saviour from the record with great clearness and skill; it invests the outlines thus obtained with the fresh colors of life, without resorting to forced constructions and vain imaginings; and, above all, it seeks, with childlike humility and reverence, to learn and exhibit the mind of the Spirit. The characteristic feature of the part especially of the Johannine writings of the great writer, is especially prominent here. None, we think, can read the book without becoming not merely acquainted with the facts of the life of Christ, but more anxious than ever to drink in its spirit. Nor let us forget, in our judgment of what may appear to us even grave errors of opinion in the book, that its author has fought for every step of ground that has been gained of late years by spiritual religion in Germany; and while we lament the "dimness" which this great man confuses with such Christianlike humility, let us acknowledge the grandeur of his idea of the kingdom of God, and the wisdom of his aim at its attainment. His starting-point and many of his paths are different from ours; it must therefore gradden one's heart, and may perhaps confirm one's faith, to see that Neander reaches, after all, the general results of evangelical theoloy.

Neander's greatest literary treasure to the world has proved to be, however, his Allgemeine Geschichte der christlichen Religion und Kirche (Hamb. 1825—52; 3d ed. 1851—56, 6 vols. 8vo), which treats of the history of the Church from the apostolic age to the Council of Basle in 1449. It is accessible to English readers in the excellent translation of Prof. Joseph Torrey, under the title of General History of the Christian Religion and Church (from the second and improved edition [Boston, 1847, 5 vols. 8vo]; and reprinted at Edinburgh and London). Neander sets out in this work with the idea that Christianity is a life-giving spirit, awakened in the mind by the influence of divine truth on the heart; that it recognizes no distinction of degree but progress," no holy days, and no ordinances in the technical sense of the word; although it naturally assumes forms accommodated to the circumstances of the times, and adapts itself to every stage in human culture. This Christianity is a leaven that takes hold of whatsoever is divine in man, quickening it, struggling with the contrary elements—with Judaism, with heathenism, with all the worldly and sinful propensities of the soul—founding or modifying or converting them, depending eventually to fulfill the whole mind of our race. The history of its workings, developments, and manifestations in these respects is the history of the Christian religion and Church. He exhibits extraordinary talent in bringing out, in a generic way, the hidden life of Christianity, and representing it as a living power that pervades and sanctifies society from within. He thus restores the religious and practical element to its due prominence in opposition to the coldly intellectual and critical method of rationalistic historians; yet without thereby wronging in the least the claims of science, or running into narrow, literal, extremes, or into an overZeal for the abstract.

Says Dr. Hurst: "The various influences hitherto employed against rationalism had proceeded as far towards its extinction as it was possible for them to go. Philosophy and doctrinal theology had spent their efforts. The history of the Church having always been treated mechanically, it was now necessary, in the presence and agency of Christ with his people should be carefully portrayed. The progress of the Church needed to be represented as more than growth from natural causes, such as the force of civilization and education. It was necessary to show that a high spiritual tending toward excellence, were directed to overcoming difficulties, and leading it through persecution and blood to ultimate triumph. Neander rendered this important service. He directed the vision of the theologian to a new field, and became the father of the best Church historians of the nineteenth century" (Hist. of Rationalism, p. 292, 293). Neander no doubt sometimes went too far in his liberality; and by trying to do full justice even to heretics and sectarians, he was in danger sometimes—like Arnold and Millner, although of course in a far less degree—of doing injustice to the champions of orthodoxy and the Church. The cry is therefore, on the part especially of Churchmen, who would call for the objectivity of the Church a like import with the objectivity of the Gospel, that there is in Neander a want of the proper appreciation of the objective, realistic element in Church history. Now it is true that Neander is more the historian of the invisible kingdom of Christ in the hearts of its individual members than of the visible Church in its great conflict and contact with a wicked world. Yet one need but turn to Neander's pages for a delineation of eclecticism in the Middle Ages—the time when objectiveness was most vigorous in the Church—to be convinced that Neander well understands how to value this realism, as a part of the natural formative life of the Christian Church. The internal and most personal were certainly of more importance to him than anything else. Says Jacob, Neander's pupil and devoted follower: "When the predominant Christian power was connected with the objective forms of the Church, as in the time of Abelard, he regarded their ascendency as warranted, without justifying its contemporary suppression of the germs of truth, and the reprehensible means which were employed in particular cases. And is it not confirmed by the experience of all ages that there is no fault to which the traditional Church party is more prone than suspicion of every deviation, and suppression of even such dissent as is legitimate? If in modern times individualism has increased to a bewildering excess, has it not been one principal reason why the rights of individuals to form their own views of the gospel were not acknowledged as they deserved, either in the Middle Ages or in the later decennia of the Reformation? Is it nothing to have experienced a flourishing period of Protestant orthodoxy? Would Dr. Kurtz be willing to defend the manner in which Wickliffe, Huss, and John Arndt were treated in the name of orthodoxy; and how, according to his notions, would Luther have been justified in setting himself against the objectivity of the Church, unless, with
Neander and Luther himself, he holds higher still the objectivity of the Gospel? It was not Neander's wish to set aside the objectivity of the Church, or to subordinate it to the individual, but to contract its sphere, in order to give the latter liberty of action, and that the pious members of the Church might testify of the Gospel against the Church. But it is not easy to perceive what more precisely the main idea of the Neanderian objectivity of the Church, especially in the department of historical study, if not a word is to be said for the other factor of [Christian] life... We know not why it should be a matter of reproach to Neander that he more or less contrasts what belongs to Christianity generally, what belongs to the Church, and what belongs to the individual. Is there an ecclesiastical communion which dare maintain that its system, taken as a whole, is in every particular a pure expression of the Gospel? Is it, therefore, a fact that these two—the Christian and the ecclesiastical—are everywhere striving at a reconciliation not yet completed, and therefore must be regarded more or less in contrast, relatively, and according to the stage of the Church's development?" (Preface to Lectures on Dogma by Neander, i, 9, 10). It must be confused, too, that Neander's theology in many respects falls short of the proper standard of orthodoxy. He did not admit the binding authority of the symbolical books. His views on the justification of the sinner and the eternal life of the just, and even on the Trinity, are somewhat loose and latitudinarian. His best disciples in this respect have gone beyond his position and become more churchly. Then but it must be considered, 1st, that he rose in an age of universal rationalism, and was one of the earliest pioneers of evangelical faith and theology in Germany; 2d, that this very liberalism and, if we choose to call it, latitudinarianism, served as a bridge for many who could not otherwise have been rescued from the bonds of scepticism; 3d, that these defects did not weaken his general conviction of the divine character of Christianity and of its power and, 4th, that his arguments are not without a certain charm to the modern mind. Many of his pupils and followers may surpass him in orthodoxy, but few can be found in any age in whom doctrine was to the same extent life and power, in whom theoletic conviction had so fully passed over into flesh and blood, in whom the love of Christ and man glowed with so warm and pure a flame, as in the truly great and good Neander. Any defects, if Neander's work can really be said to have defects, cannot blind any one to their real excellences and immortal merits. He is emphatically the evangelical regenerator of this branch of theology, and has made it a running commentary on Christian preaching; 2d, that he lived in a time when the Church, to meet the demands of a world that was coming to maturity under the influence of the most powerful religious system, was of course in a state of crisis, and to meet this crisis the Church had to give up a large number of its ancient forms and institutions; 3d, that the Church had to give up its old, its external, its formal methods of working, and had to seek a new path for its own salvation. Thus Church history becomes to the intelligent reader a book of devotion as well as useful and interesting information, or to use Neander's own words in the preface to the first volume of his large work, "a living witness for the divine power of Christianity, a school of Christian experience, a voice of edification, instruction, and warning, sounding through all ages for all who will hear." He everywhere follows the footsteps of the Saviour in his march through the various ages of the Church, and kisses them reverently wherever he finds them. He traces them in the writings of an Origen and a Tertullian, a Chrysostom and an Augustine, a Bernard and a Thomas Aquinas, a Luther and a Melanchthon, a Calvin and a Fénélon. Christ is to him the divine harmony of all the discords of confessions and sects, or as he liked to repeat after Pascal, "En Jésus Christ toutes les erreurs ne peuvent affecter son amour infatigable." Neander, it must be conceded, is not a model as a writer of Church history. His style is too monotonous and diffuse, without any picturesque alteration of light and shade, flowing like a quiet stream over an unbroken plain. Yet did he so enrich the department of Church history with material contributions gained by a thorough mastery, independent investigation, and scrupulously conscientious use of the sources, and present a so much more methodical treatment of the subject as to gain for himself the approval of all, and he has come to be universally acknowledged the father of modern Church history, marking by his efforts in this field of sacred learning an epoch as clearly as Flaccus (q.v.) did in the 16th, Arnold (q.v.) in the 17th, or Mosheim in the 18th century. All glory yet remains, on the whole, beyond doubt the greatest Church historian thus far of the 19th century. Great, too, especially in this, that he never suffered his renown to obscure at all his sense of the sinfulness and weakness of every human work in this world. With all his moral perception of the latter, he trusted regarded humanity, as, among many others, nearly a forerunner of a new creative epoch of ever-young Christianity; and towards that time he gladly stretched his vision, with the prophetic gaze of faith and hope, from amid the errors and confusion around him. 'We stand,' says he, 'on the line between an old and a new, about to be called into being by the ever-fresh energy of the Gospel. For the fourth time an epoch in the life of our race is in preparation by means of Christianity. We, therefore, can furnish, in every respect, but pioneer work for the period of the new creation, when life and science shall be regenerated, and the wonderful works of God proclaimed with new strength and power, long after the day of the apostles. (Apostol. Ch. p. 106). A complete edition of Neander's writings has been brought out in recent years (Gotha, 1862-66, 13 vols. 8vo); and his name will go down to future generations as the philanthropic founder of a home for little wanderers called the 'Neander Haus.' An American institution of learning, the Eclectic Theological Seminary, prides itself on the possession of his library. See Farrall, Memorial of A. Neander (1851); Krabbe, August Neander, ein Beitrag z. dessen Charakteristik (Hamb. 1802); Kling, Dr. August Neander, ein Beitrag z. d. Lebensbildnis, in "Stud. u. Krit." (1851, 2d, 36, 37); and D. Rev., Feb. 1851.

Neapolis (Νεάπολις, New City), a frequent name in Greco-Roman times, like Newtown with us; see below), the place in Northern Greece where Paul and his associates first landed in Europe (Acts xvi. 11); where, no doubt, he landed also on his second visit to Macedonia (Acts xx. 1), and whence certainly he embarked on his last journey through that province to Troas and Jerusalem (Acts xx. 6). Philippus being an inland town, Neapolis was evidently the port; and hence it is accounted for that Luke leaves the verb which describes the voyage from Troas to Neapolis (ἐκδύναμον) to be described in the course of the journey into Macedonia, Philippi. The distance from Philippi was ten miles (Strab. vii. 380; Appian, Bel. Civil. iv. 106; Ptolemy, iii. 18, 9; Pliny, iv. 11). It was probably the same place with Datum (Δαύτων), famous for its gold mines (Herod. i, 78; comp. Böckh's Paph. Econ. Athens, p. 8, 229). The town of Neapolis was within the bounds of the province of Thrace (Pliny, N. H. iv. 18), but the empor of Ven-

NEAPOLIS

pasian attached it to Macedonia (Suetonius, Vesp. 8); and hence, while Pnyx locates it in Thrace, Polieus (Geog. i. 3) and Strabo (viii. 8) place it in Macedonia. During the great battle of Philip the Great at Brutae, Cassius lay in the bay of Neapolis (Appian, Bel. Cir. iv. 106), which Appian states was nine miles distant from their camp at Philippi. Neapolis, therefore, like the present Kavala, which occupies this position, was on a high rocky promontory jutting out into the Aegean, and the entrance and half a mile broad, lies on the west side. The indifferent roadstead on the east should not be called a harbor. Symbolom, 1670 feet high, with a de- file which leads into the plain of Philippi, comes down near to the coast a little to the west of the town. In winter, the sea presses more closely to the western shore as early as four o'clock P.M. The land along the eastern shore is low, and otherwise unmarked by any peculiarities. The island of Thasos bears a little to the S.E., twelve or fifteen miles distant. Plane-trees just beyond the walls, not less than four or five hundred years old, cast their shade over the road which Paul followed on his way to Philippopolis. The shore of the mainland in this part is low, but the mountains rise to a considerable height behind. To the west of the channel, which separates it from Thasos, the coast recedes and forms a bay, within which, on a promontory with a town on it, on the south side, the town of Phaliartos (Howe, Life and Ep. of St. Paul, i. 368). From the time that Paul visited this place Christianity has, to a greater or less extent, existed in it. In the 6th and 7th centuries it was a bishop's seat, but it is now represented by a small seaport (Leake, Northern Greece, iii. 180). It has a population of five or six thousand, nine tenths of Musulmans, and the rest Greeks. For fuller or supplementary information, see Smith, Dict. of Class. Geog. ii. 411; comp. PHILIPPI.

The following arguments on the identity of the place are of interest to students: Cnossus (Voyage dans la Macédoine) and Tafel (De Via Militari Romanorum Egnatia, etc.) maintain, against the common opinion, that Lake's Neapolis was not at Kavala, the inhabited town of that name, but at a deserted harbor ten or twelve miles farther west, known as Eski, or Old Kavala. Most of those who contend for the other identification cast their shoe over the road which Paul followed, as if it had been the road to the ancient Kavala to be regarded as the ancient Neapolis, in opposition to those which are urged in favor of the other harbor. The Roman road and Cnossus prove that a port existed there in ancient times. Neapolis, wherever it was, formed the port of contact between Neapolis and Thrace, and Asiatic goods and commercial activity, and would be expected to have left vestiges of its former importance. The antiquities found at Eski, and the entire absence of any of these which are lost in the town of Kavala, and the slope of Symbolom. It is built on two tiers of arches, a hundred feet long and eighty feet high, and is carried over the sea from the port to the promontory and the mainland. The upper part of the work is modern, but the substructions are evidently Roman, as seen from the size of the stones. The decorative character, and the style of the masonry. Just out of the western gate are two marble sarcophagi, used as water-tanks. Josephus (Antiq. xvi. 216) inscriptions, and a Latin inscription of Claudius. Columnus with chapels of elegant Ionic workmanship, blocks of marble, fragments of hewn stone, evidently antique, are numerous both in the town and the suburbs. On some of these are inscriptions, mostly in Latin, concerning public works. In Kavala the formation of new homes the walls of ancient ones are often brought to light, and sometimes tablets with sculptured figures, which would be common products of the Corinth. For fuller details, see Bibliotheca Sacra, Oct. 1860. On the contrary, no ruins have been found at Eski Kavala, or Neapolis, as it is also called. Any argument is, I think, unanswerably anstakten. No remains of walls, no inscriptions, and no indications of any thoroughgoing leading through the ancient town, is, I think, unanswerably anstakten. No remains of walls, no inscriptions, and no indications of any thoroughgoing leading through the ancient town, is, I think, unanswerably anstakten. given during the Roman age to the ancient city of Sichem. The change appears to have taken place during the reign of David in Jerusalem, as upon the coins of that reign we first find the inscription, "Flavia Neapolis," the former title taken from Flavius Vespasian (Echkel, "Doctr. Nummor., iii., 433). Josephus generally calls the city Sichem; but he has Neapolis in War, iv., 8, 1; and the words of Epiphanius afford sufficient proof of the identity of the ancient city with the Neapolis which is now known as Sichem.

b. Neapolis was also the name of an ancient episcopal city of Arabia, whose bishops were present at the councils held in the 3rd century. A Consensitum of 311, which has been discovered at Sibota, and covered an inscription at the ruined town of Sultem, at the western base of Jebel Hauran, near the ancient Kenath, which shows that Neapolis is the episcopal Neapolis (Porter's "Damascus," ii., 86; Reland, "Palast." p. 217; S. Paulo, Geogr. Sac. p. 256).

Neʾarīth (Heb. נֵעְרִית, נֵעַרִית, servant of Jehovah; Sept. Ναυαία, v. r. Naapia and Naipa; Vulg. Naariah), the name of two men.

2. The second named is a son of Laban, captain of the cattle of Laban that were in the reign of King Hezekiah of Judah, who drove the Amalekites from Mount Seir, and settled there (1 Chron. iv., 41-43). B.C. cir. 715.

b. The fourth named is the son of Shemaiah, father of Elieohem, Hezekiah, and Aziram, a descendant of David (1 Chron. iii., 22, 23). B.C. cir. 550. He is mentioned in the genealogical list of the Naphatites (q.v.) in the genealogy (q.v.) of Christ (Luke iii., 25).

Noʿbai (Heb. נובאי, נוֹבָאִי, fruitful; text: נוּבָאִי, Sept. Naβai; v. r. Naβā; Vulg. Nebai), one of the chief of the people who sealed the covenant with Nehemiah (Neh. x., 19). B.C. cir. 410.

Nebraʾith (Heb. נבראֵית, נבֹּרֶאת, Gen. xxvii. 9; xxvii., 3; 1 Chron. i., 29; elsewhere defectively, Nevaʾith, Neβai, Neβai, נבראֵית; Sept. Naβai'a, Naβai'as, but in Gen. xxvii., 15 v. r. Naβai'as; in xxvii., 9 v. r. Naβai'sa; in Isa. xii., 7 v. r. Naβai'as; Vulg. Nabaiot; A. V. "Nebaioth" in 1 Chron. i., 29; Isa. ix., 7; elsewhere "Nebaioth"), the name of a man and of a people after him.

1. The first-born son of Ishmael (Gen. xxv., 13; 1 Chron. i., 29), and the prince or sheik (סֵיהֶק, rendered by Jerome φαλαρχός) of one of the twelve Ishmaelitish tribes, which, as well as the territory they occupied, continued to bear his name in after-times (Gen. xxv., 16; comp. ch. xvii., 20). B.C. cir. 1900. One of Esau's wives, the daughter of Elsheshua the Beth-Elite, is expressly designated as "the sister of Nebaioth" (Gen. xxvii., 9; xxviii., 3); and by a singular coincidence the land of Esau, or Edom, was ultimately possessed by the posterity of Nebaioth. See below. See Nebaioth.

2. A tribe of Ishmaelitians, descendants of the abode who, in common with the other Ishmaelites, first settled in the wilderness "before" (i.e. to the east of) the other descendants of Abraham; i.e. in the great desert lying to the east and east-south of Palestine (Gen. xxv., 18; xxii., 21; xvi., 12; and see Arabia). In Gen. xxv., 16 the English Version speaks of the Ishmaelitish "towns and castles," but the former word in the original signifies "a movable village of tents" (the hordė of the Tartars), and the latter seems to denote folds for cattle and sheep. Both expressions thus point to a nomadic life, which the tribe of Nebaioth seem to have followed for ages afterwards, inasmuch as in the days of Isaiah the "tribe of Nebaioth are mentioned (Isa. ix., 7) as gifts which the Bedouin, or "Men of the Desert," would consecrate to the service of Jehovah. The territory at first occupied by Nebaioth appears to have been on the south-east of Palestine, in and around the mountains of Edom. There Esau met and became allied with them. As their numbers and their flocks increased, they were forced to wander more into the south and east so as to secure pasturage; and they were brought into connection with the tribes of Edom, with whom they finally merged. The name of Nehemiah associates them (Isa. x., 7). It is somewhat remarkable that this celebrated Arab tribe is so seldom mentioned in the Bible. Three times the name occurs in Genesis, once in the genealogies of Chronicles (i., 29), and once in Isaiah; after his age we hear no more of them. See Bel. After the close of the O.T. canon, both Jewish and heathen writers frequently mention an Arabian tribe called Nubataei, or Nubathanaei, as the most influential and numerous of all the tribes of that country. Josephus says regarding the descendants of Nebaioth that "the Nabataeans are the most immoderate of all the barbarians, and are more ready to attack the devout with all sorts of deceptions to lead them to live according to the ways of the Red Sea, and called it Nabatene (Ναβατηνα), Am. i., 18, 4). He regards the Nabataei as descendents of Nebaioth. Jerome affirms that Nebaioth gave his name to all the region from the Euphrates to the Red Sea (Comm. in Gen. xxv., 13). Arabic writers mention the tribe of Nebaioth, but the name is written Naboth (O'Herberet, Bih. Orient., s. v. Nabat; Pococke's Spec. Hist. Arab. p. 46, 268). The question of their identity depends upon particulars which we here present:

From the works of Arab authors M. Quartemere (Mémoire sur les Nabatéens, Paris, 1853, reprinted from the L'Arabie, sous le Calife Haroun, 1809, March, 1820) states that the existence of a nation called Nabat or Nabbit, pl. Abnâd (Sttidh and Kômda), reputed to be of ancient origin, of whom there are several indications in an Arab text, and the remains of a few castles of the Flight. The Nabat, in the days of their early prosperity, inhabited the country chiefly between the Euphrates and the Persian Gulf, and extended their influence from the Persian Gulf to the Euphrates and the Tigris. The Nabathans were known as the Sabaeans and the Nabatene (the latter being the plural of the former). The Arabian geographers say that the Nabataean tribe was never called Nabatai, or Nabataei, as is usually supposed; and that the best jurist of the Sabaeans, Umayr ibn Mas'ud, in his "Tribes of the Sabaeans," says, "the 'Sabeans are the same as the Nabathans (Nabat). . . . The Nimrudos were the kings of the Syrian whom the Arabs call Nabateans... The Chaldæans are the same as the Syrians, otherwise called Nabat (Kūbat et-Temābil). The Nabathans. . . . founded the city of Babylon. . . . The inhabitants of Nineveh were part of those whom we call Nabat or Syriacs, who form one nation and speak one language, that of the Nabat differs only in a small number of letters; but the foundation of the language is identical" (Kūbat Mot). They say that, and many other fragmentary passages sufficiently prove the existence of a great Arabian people called Nabat, celebrated among the Arabs for their knowledge of agriculture, and of the arts of science, medicine, and science (so called) generally. But we have stronger evidence to this effect. Quartemere introduces a number of the learned works of the Arab historians, and other important relics of that people's literature, a treatise on Nabat agriculture. A study of an imperfect copy of that work, which with much labour he could not transcribe, induced him to date it about the time of Nebuchadnezzar, B.C. cir. 600. M. Chwolson, professor of Oriental languages at St. Petersburg, who had shown himself fitted for the inquiry by his treatise on the Sabians and their religion (Orienterkunde, iv.), has since made that book a subject of special study; and in his Remains of ancient Babylonian literature in Arabic translations (Uebersetzungen der babylonischen Literatur in Arabischen Uebersetzungen, St. Petersburg, 1859), he has published the results of his inquiry. Thore states, while they have not yet found the exact date of the existence of the Nabat, that M. Chwolson has more especially devoted himself to respecting the existence of the Nabat, go far beyond him both in the antiquity and the importance which M. Chwolson claims for that people. Evelyn, however, in 1687, stated some grave causes for doubting this antiquity, and again in 1698, but in the latter work (his Tracts of Asia) repeated moderately but decidedly his misgivings. M. Réan followed on the same side (Journ. de l'Institut, 1859, 160, 172, 180, and more recently M. de Giuss'chmidt (Zeitschrift für deutsche morgenländische Geschicht. xv, 1-100) has attacked the whole theory in a lengthy thesis, 1851, as being founded on a mixture of history. He contains this remarkable inquiry, as far as they relate to the subject of the article.

The question of the literature of the Nabat consists of four works, one of them a fragment: the "Book of Nabat Agriculture" (already mentioned), the "Book of the Secrets of Solomon the Babylonian" and the "Book of the Secrets of the Sun and Moon" (Chwolson, Uebers. p. 10, 11). They purport to have been
translated, in the year 904, by Aba-Bekr Ahmad Ibn-All, the Chaiiddeh of Kishla, or Keist, better known as Ibn-Wahshiyeh. The "Book of Nabat Agriculture" was, ac-
cording to M. L. Poujoulat, a document of the second centuries, or
continuing by Yandboxah, and completed by Kalthimi. Chwolson,
disregarding the dates assigned to these au-
torities, states that the first edition was
before the year 500 B.C., the second some 300 or 400 years later,
and so on. A number of copies of this work (Ibn-Wahshiyeh says he was little more than editor), at
the earliest under the sixth king of a Causalian dynasty named
Mahommed, and at the latest under the same dynasty with
Buneen—makes as the same (the fifth or Arabian) dynast
of Berossus (Chwolson, Uberbeute, p. 65; : Buneen, E
yptische historiographie, p. 60), or the 15th century B.C. It will thus be seen
that he rejects most of M. Quatremére's reasons for placing
the location of the Bible in Bible, the evidence that he
ble that that king is not mentioned, and the author or authors
were, it is argued by Chwolson, ignorant not only of the
inhabitants of Palestine, but also of the history, art, and
faith of Israel. While these and other reasons, if
granted, strengthen M. Chwolson's case for the antiquity of the
work, on the other hand it is urged that even neg-
lecting the difficulties attending an Arab's translating so
ancient a writing (and we reject altogether the sup-
position that it was modernized, being without a parallel,
at least in Arabic literature), and conceding that he was
of Chaldean or Nabat race—we encounter formidable in-
tinsic difficulties. The book contains mention of per-
sonages bearing names closely resembling those of Adam,
Seth, Enoch, Abraham, Isaac, Jacob, and Joseph, and
when they are compared with the names of the heroes of
Arabic literature, Chwolson himself is forced to confess that the partic-
ulars relating to them are in some respects similar to those
recurring in the Bible. That the Bible contains an instrumen
proves insurmountable, it shows that the author borrowed
from the Bible, and that he, in a manner of speaking, is
the writer of an extreme antiquity. Other apparent evidences of
the same kind are not wanting. Such is the mention of the
Nabathaeans (Psalms 83:8; Yamin, Ama-
nuz (Adonis), and Yaman (Ioniae). It is even a ques-
tion whether the work should not be dated several centu-
ries after the commencement of our era. Anachronisms
it is asserted, abound—geographical, linguistic (the use
of late words and phrases), historical, and religious (such
as the traces of Islam are not always in the mention of
Hermes, etc., and influences to be ascribed to Neopto-
latism). The Chaldean style is said to be modern, wanting the
vogue of old. It is shown that the work is not
other than a legend, as it is not to be tried only by the
rigorous scholarship. And what is more, it is the first
"Book of Nabat Agriculture" B.C. 2500, and the "Book of Tenkëloeha"
in the 1st century A.D. at the latest (p. 186). Reina asserts
that the two are so similar as to preclude the notion of
their being separated by any great interval of time (Journal
of the Institute).

Although Quatremère recovered the broad outlines of the
religion and language of the Nabat, a more extended
knowledge of these points hangs mainly on the geographi-
atical conjectures of his work (pp. 105, 106), which,
Chwolson's theory be correct, that people present to us one of the greatest problems of modern philology. In his writings we can trace the origin and rise of the Nabat, the
roots of the complicated families, and the names of the
may be described with the sole, which abounded in the old seats of the
Arabian race. At present we may conclude that they were Nabatian (Sahat-
cum, Kishla, Kishla). In later times the Nabatian kingdom succeeded the old
religion, and their doctrines seem to have been transmitted (how nearly a further knowledge of these obscure subjects will show) those of the Mendesites,
Nabrates, or Nestorians. Their language presents similar difficul-
ties; according to M. Chwolson it is the ancient
language of Babylonian. A cautious criticism would (it is
we know more) assign it a place as a comparatively modern
dialect of Syro-Chaldean (comp. Quatremère, Mém. p. 106). Thus,
if M. Chwolson's results are accepted, the "Book
of Nabat Agriculture" indicates, as the
identification, before that of the Greeks, and at least as old as
that of the Egyptians, of a great and powerful nation of
the east, of whose name we have but scarce traces; hitherto unknown, and with the religions and sciences
they either founded or advanced; and throwing a flood of
light on the knowledge which have beared pages of the world's history. But until the original text of the "Book of Nabat Agriculture," we must withhold our accept ance of facts so startling, and
the same ascribed to it even by Quatremère as extremely doubtful. It
stands as the key to the whole chronology of the Nabat, an
impor tant facts advanced by the latter—the most important
when regarded by sober criticism—are supported by the
reasoning of M. Chwolson, and can be trusted. It remains for us to state the grounds for connecting
the Nabat with the Nabathaeans.

While the inhabitants of the peninsula were comparative strangers to the classical writers, and very little
was known of the further-removed peoples of Chaldea and Mesopotamia, they were known in some measure
continued Egyptian and Syrian provinces. The nation was famous
for their wealth and commerce. Even when, by the decline of its power, it was surpassed by the
empire, the Nabathaean Petra is still mentioned as a centre of the trade both of the
Syrians and the Egyptians during the time of Josephus and the Garamantes on the Persian Gulf.
It is this extension across the desert that most clearly connects the Nabathae-
an collection of towns in the highlands of Arabia.

The famous trade of Petra across the well- trodden des-
ert-road to the Persian Gulf is sufficient to account for
the present-day value of the caravan routes, and for the
moral and physical characteristics of the Arabian peoples (see DABAN, etc.) are found, demonstrably, on the
shores of that sea on the east, and on the borders of Pal-
estine. While it is true that traces of this trade, and that
the Arabian peninsula remains of the caravan stations still exist.
Nothing is certain more than the existence of this great trade route. To commerce, to culture, to
the opening of the Egyptian route gradually destroyed it. (Josephus pt. 1, ch. 4) speaks of Nabatian (Nabataean, Nabatu, Sebait, Nabath, Nobera) as embracing the country from the Euphrates to the Red Sea, or Petra and all the
desert east of it. The Nabat, be they Nabathaeans or Nabathians,
are described as fomned for agriculture and science; in these respects offering a contrast to the Nabathaeans of
Petra, who were found by the expedition sent by Antigoo-
cus (B.C. 219) to be dwellers in tents, pastoral, and con-
ducting the trade of the desert; but in the Red Sea again
they were on the same level, and by some they are still
referred to as a non-Semitic character.

We agree with M. Quatremère (Mém. p. 81), while rejec-
ting some of his premises, that the civilization of the Nabath-
ians of Petra, far advanced on that of the surrounding
Arabia, was founded and maintained by a people
and customs, and language, and by which they are to be
distinguished from the non-Semitic character.

"We agree with M. Quatremère (Mém. p. 81), while rejec-
ting some of his premises, that the civilization of the Nabath-
ians of Petra, far advanced on that of the surrounding
Arabia, was founded and maintained by a people
and customs, and language, and by which they are to be
distinguished from the non-Semitic character."

From most of these and other considerations we think there
is no reasonable doubt that the Nabathaeans of Ara-
bia Petra were the same people as the Nabat or Nab-
thalis; though at what ancient epoch the western settlement
was founded by the Nabathaeans, and the development of
any importance until after the captivity appears from the
notices of the inhabitants of Edom in the canonical books, and the Nabathaeans were a people of
several towns of the Nabathaeans, which are scientific
and industrial, are not such as are found in the writings
of prophet and kings, as Semean (Semeia, p. 227) has well observed; and he points, as we
have above, to a foreign ("Conschite," or partly Ni-
gritian) settlement in Babylonia. It is noteworthy that
Abel's-Jacobs (at the end of the fourth section of his first book, or treatise—see De Lacy's ed.) likens the Copic
in Egypt (a mixed race) to the Nabathaeans in Arabia.

Thus, if M. Chwolson's results are accepted, the "Book
of Nabat Agriculture" indicates, as the
identification, before that of the Greeks, and at least as old as
that of the Egyptians, of a great and powerful nation of
the east, of whose name we have but scarce traces; hitherto unknown, and with the religions and sciences
they either founded or advanced; and throwing a flood of
light on the knowledge which have beared pages of the world's history. But until the original text of the "Book of Nabat Agriculture," we must withhold our accept ance of facts so startling, and
the same ascribed to it even by Quatremère as extremely doubtful. It
stands as the key to the whole chronology of the Nabat, an
impor tant facts advanced by the latter—the most important
when regarded by sober criticism—are supported by the
reasoning of M. Chwolson, and can be trusted. It remains for us to state the grounds for connecting
the Nabat with the Nabathaeans.

Last of the Nabathaeans, or Nabat, derive their
name, and were they in part descended, from Nebaioth, son of Ishmael (Joseph) says that Nebaioth was
inhabitator of the twelve sons of Ishmael); and Jerome, "Ne-
baioth omnis regio ab Euphrate usque ad Mare Rubrum Nabathaeus usque hoe dictus, quae paras Arabie et" (Comment. in Gen. xxv, 15). Quatremère rejects the identifi-
cation for an etymological reason—the change of th to
but this change is not usual in Arabic words, Arabized from the Greek the like change of + genitive. Reina, on the other hand, accept it, regarding Neba-
both as a name of a chief, a chief and its people, or a place connected with Biblical history. The Arab call Nebaioth, and do not connect him with the Nabat, to whom they say he was a brother, but they give him a country. Some genealogies come from late Jews, and are utterly un-
trustworthy. When we remember the darkness that en-
shrouds the whole history of the Nabat, it is possible that Nebaioth went to the far east, to the country
of his great-grandchildren, the Nabathaeans, and gave birth to a mixed race, the Nabat. Instance of ancient tribes adopting the name of more modern ones
is not uncommon. This is the case with many of the names we have here. We are not to look for any connection in the history of the Arabs (see MIBAN); but we think it is also admissible to hold that Nebaioth was so named by the sacred writers because he is otherwise unknown.

It is, however, safest to leave unsettled the identification of Nebaioth and Nebat until another link be added to the connection of the Arabian stock.

We have not entered into the subject of the language
of the Nabataeans. The little that is known of it tends to strengthen the theory of the Chaldaean origin of that people. As the principal town of Herod's satrapy, mentioned in the latter in the *Revue Numismatique* (new series, vol. iii, 1868), adduces facts to show that they called themselves Nabat, \( \text{X} \text{XX} \text{X} \). It is remarkable that while remnants of the Nabat are mentioned by trustworthy Arab writers as existing in their own day, no Arab record connecting that people with Petra has been found. Caesarius believes that the Nabatians emigrated from the northern parts of the Nabat, and their corruption of Arabic (Essai sur l'Hist. des Arabes avant l'Islamisme, i, 88). It is thus doubtless true that a tribe called Nabat existed at a comparatively early period in Mesopotamia; but may they not have migrated thither, as sections of the great tribes of Arabia are wont to do now—for instance, the Shummar, whose home is Jebel Shummar, in Central Arabia, where they have villages and settlements—but long sections of the tribe have long been naturalized among the rich pastures of Mesopotamia. In fact, there are few of the great Arabian tribes which do not make periodical visits to the banks of the Euphrates and Tigris, and which have not branches established there. So it probably was with the tribe of Nabat. They visited Mesopotamia, attracted by the wealth of the place; north of them of Petra (Mainz-en-Rex), and they may have had a taste for their literature, and may have in part adopted their language and their habits of life; and at length, when driven out of Central Asia by the rising power of the Assyrians, Medes, andPersians, they carried these back among their brethren in Arabia. Such, at least, is a probable solution of a difficult question. There can be no doubt that the descendants of Nabat settled originally in and around Edom; that in the time of Isaiah they were an influential tribe living in Western Arabia beside the children of Kedar; that the Nabatians occupied the same region as their biblical forefathers; and that the later Edomites, according to Josephus, identically the same as Nabatians, were known as Edomians, and that therefore Nabataeans, B.C. cir. 161; comp. 1 Macc. ix. 34-37; Josephus, *Ant.* xii, 8, 8; and that Josephus considered these Nabataeans to be the descendants of Ishmael. From these facts it may be fairly inferred that the Nabataeans of the classic authors, the tribe Nabat of the sacred authors, and the *Heni-Nabat* of the Arabs, were identical (Forster, *Geogr.* of Arabia, i, 209 sq.; Kalschis, *On Gen.* p. 481; Jerome, *Comment. in Isaiam*, lxv, 7). It would appear that the descendants of Esau, having at first sought an alliance with the Ishmaelites among the mountains of Edom, afterwards succeeded in forcing their way into the south, and in making lands and cities the prey of Arabia. After a long interval the Ishmaelites returned, and, having expelled the Edomites (or Ithmaerans), took possession of their ancient country. The date of this conquest is unknown; but it was probably about the time of the second captivity, for then the Persians were all-powerful in Central Asia, and would naturally drive back the Arab tribes that had settled there (comp. *Diod. Sic.* ii, 48); and then we know that the Ithmaerans, as if driven from their own mountains, settled in Southern Palestine. But be this as it may, we learn that about B.C. 312 Antigonus, one of the successors of Alexander the Great, sent an army against the Nabataeans of Petra; the city was taken and plundered in the absence of the men, who were at the time attending a great fair in another locality; on the retreat of the army, however, with their booty, they were attacked and cut to pieces by the Nabataeans. Another expedition was sent, but was unsuccessful (Diod. Sic. xii, 104-110). At this period the Nabataeans, like their forefathers, were rich in flocks and herds; they were also, like the Ishmaelites in the time of Jaoob, the carriers of spics and merchandise between Arabia and Egypt; and for the protection of their wealth and interests they had built up a chain of fortified strong cities in the interior of their country, Edom, and on the shores of the Eelatitic Gulf, IDumea Propor, or Edom, now became the centre of their influence and power. They gradually advanced in civilization and commercial enterprise, until nearly the whole traffic of Western Asia was in their hands (Diod. Sic. ii, 48-50; iii, 42-48). From their capital, Petra, caravans roads radiated in all directions—eastward to the Persian Gulf and Mesopotamia; northward to Perea, Damascus, and Palmyra; north of Petra and Elat to Palestine; and southward to the seaports on the Eelatitic Gulf and Red Sea, and to Egypt (see *Tabula Peutingeriana*; *Tab. Theodossiana*; Strabo, xvi, 775-780; *Forster, Geogr. of Arabia*, i, 222). When a new route for commerce between the East and the West was opened through Egypt, the Nabataeans became more and more determined to control it. They built war-galleys and plundered the merchant fleets in the Red Sea; and they also attacked and pillaged such caravans as ventured to convey the spices of Arabia and the merchandise of Persia and Syria by any other way than their own (Diod. Sic. iii, 48; Strabo, xvi, 771; *Arrian, Periplo*).

During the height of their power the country of the Nabataeans embraced the whole of Edom, the eastern shore of the Eelatitic Gulf and the Red Sea to the parallel of the city of Medineh, the desert plain of Arabia to the mountains of Nejd; while on the north-west and north they extended over the eastern part of Syria (strabo, xvi, 767, 771, 779; 1 Macc. v. 25-28; ix, 35; Diod. Sic. ii, 48; *Ephiphan.* *Ado. Haeres.* p. 142). It is true Josephus and Jerome state that the Nabataeans occupied the whole country between Egypt and the Euphrates; but by Nabataeans they seem to have meant all the descendants of Ishmael (comp. *Roland, Pales.* p. 90; Kalschis, *On Gen.* p. 482). It is not known at what time the Nabataeans gave up the patriarchal form of government and elected a king. The first mention of a king is about B.C. 166, in the reign of Antiochus Epiphanes (2 Macc. v. 8). All their kings appear to have been called either *Aretas or Obodas,* and the kingdom was known as *Arabia Petraea* or *Arabia Deserta.* Sometimes writing *Arabia,* sometimes taking the addition *Petraea,* apparently from the capital city Petra. Alexander Janneus was defeated by Obodas, king of Arabia (Josephus, *Ant.* xiii, 13, 5); and a few years later Antiochus Dionysius of Syria was killed in battle against the Arabians, and *Aretas* their king seized Damascus (xiii, 15, 1, 2; *War*, iv, 7, 8). The kings of Arabia are often mentioned in connection with the conquest and occupation of the province of Syria by the Romans (Josephus, *Ant.* xiv, 5, 1; xv, 6, 2; *War*, vii, 8). A few years before the Christian era a Roman expedition under the command of *Zulus* sent into Arabia deserta, and on his return the commander of the expedition was severely punished for some incompetence. After the Roman conquest of Persia, Arabia was conquered by Domitian (xiii, 10, 1, 2; *War*, iv, 7, 8). The Nabataean king, Obodas, received him with professions of friendship, and appointed his minister Sylleus to guide the army. By his treachery it was conducted through arid deserts until it was almost destroyed by thirst and disease (Strabo, xvi, 780). The Stoic philosopher Athenodorus spent some time in Petra, and related to Strabo with admiration how the inhabitants of the entire country of the Nabataeans submitted to the good government and excellent laws. Pliny also repeatedly speaks of the Nabataeans (*Hist. Nat.* v, 11; vi, 28; xii, 27); and classes along with them the Beduin, exactly as Kedar and Nebaioth are placed together in *Isa. ix, 7.* Herod Antipas married a daughter of Aretas, king of the Nabataeans (Matt. xiv, 8, 4); and it appears to have been the same Aretas who captured Damascus, and governed it by an ethnarch at the time of Paul's conversion (Acts ix, 25; 2 Cor. xi, 32). The kingdom of the Nabataeans was overthrown in A.D. 105 by Cornelius Palma, governor of Syria, and was annexed to the Roman empire (Dion Cassius, lxx, 39; *Ephiphan.* *Ado. Haeres.* p. 142).

The Nabataeans had, as we have seen, early applied themselves to commerce, especially as carriers of the products of Arabia, India, and the far-distant East,
which, as we learn from Strabo, were transported on camels from the above-mentioned Leuké Kômbe to Pe-trá, and thence to Rhinocoeura (El 'Ariash) and elsewhere. But under the Roman dominion the trade of these regions appears to have been widely extended. The passage of merchants and caravans was now made more rapid by military posts. On the one side, or Ahliah, one great road had its direction northwards to the rich and central Petrá; thence it divided and led on one side to Jerusalem, Gaza, and other ports on the Mediterranean; and on the other side to Damascus. Another road appears to have led directly from Ahliáh along the other to Jerusalem. Traces of these roads are still visible in many parts. These facts are derived from the specifications of the celebrated Tabula Theo-dosiana, or Peutingeriana, compiled in the 4th century. According to this, a line of small fortresses was drawn along the eastern frontier of Arabia Petrána towards the desert, some of which became the sites of towns and cities, whose names are still extant. But as the power of Rome fell into decay, the Arabs of the desert again acquired the ascendency. They plundered the cities, but did not destroy them; and hence those regions are still full of uninhabited yet splendid ruins. Even Petrá, the rich and impregnable metropolis, was subjected to the same fate; and now exists, in its almost inaccessible loneliness, only to excite the curiosity of the scholar and the wonder of the traveller by the singularity of its site, its ruins, and its fortunes.

In the course of the 4th century this region came to be occupied by the general name "Shamam," and what was called Paološiana Tértia, or Salatatia. It became the diocese of a metropolitan, whose seat was at Petrá, and who was afterwards placed under the patriarch of Jerusalem. With the Mohammedan conquest in the 7th century its commercial prosperity disappeared. Lying between the three rival empires of Arabia, Egypt, and Persia, it lost its ancient independence; the course of trade was diverted into new channels; its great routes were abandoned; and at length the entire country was quietly yielded up to the Bedouin of the surrounding wilderness, whose descendants still claim it as their domain. During the 12th century it was partially occupied by the Crusaders, who gave it the name of Arabia Tertia, or Syria Sobát. From that period it remained unvisited by Europeans, and had almost disappeared from their maps, until it was partially explored, first by Settebon in 1807, and more fully by Burchhardt in 1812; and now the wonders of the Wady Masaá are familiarly known (see Petra).

Nebo (Gen. xxv, 13; xxxviii, 9; xxxvi, 8). See Nebajoth.

Nebal'at (Heb. 'Neballât, נבֹלַת; Gesenius, hidden wickedness; Fürst, firm soil; Dietrich, projection; Sept. נֹבַלָּאָר [but most copies omit it], a town (probably of Dan) occupied by the tribe of Benjamin (Neh. xi, 34). It is identified by Schwarz (Palaest., p. 134) with the large village Bál-Nebád, five English miles north-east of Ramleh (Van de Velde, Memoir, p. 336).

Ne'bôt (Heb. 'Nabôt, נבֹּט; Gesenius, sight; Fürst, cultivation; Sept. נֶבֹּטְרָא), the father of Jeroboam (q.v.), king of Israel, in connection with whom he is always mentioned as a descendant of Ephraim, living in Zare-da, a city of Manasseh (1 Kings xi, 26, etc.; 2 Chron. ix, 29, etc.). B.C. cir. 1000. The Jewish tradition pre-

Nebajoth, a reputed Italian painter, whose works were mostly of a religious character, was born at Orvieto about 1556. He studied under Girola-mo Muziano, whose style he adopted, and assisted him in the important works he executed for Gregory XIII in the Vatican and the Capella Gregoriana. Assisted by Gio Guerra da Modena, Nebbia superintended the works projected by Sixtus V, intrusting the completion of his designs to the younger painters. They were ex-
tensively employed during the five years' reign of that pontiff in the chapel of St. Maria Maggiore, the library of the Vatican, the Scala Santa, and the Lateran and Quirinal palaces. Nebbia was much inferior to Muzi-
ano in dignity and grandeur, but possessed a fertile in-
tent and great facility of execution. Lanzi says there are some beautiful pictures by him finely colored, as the Ephiphan, quite in Muziano's style, in the church of St. Peter in Rome. In his chief work of painting his principal works at Rome, Baglioni mentions the Coronation of the Virgin in St. Maria de Monti, and the Resurrection in S. Giacomo degli Spagnuoli. He died in Rome at 1614.

Nebbia, Galetto, an old Italian painter much devoted to sacred subjects, was a native of Castellaccio, near Alessandria, and flourished at Genoa about 1490. In the church of the Brigid in that city are two altar pieces by him which are esteemed for their antiquity and originality. The first represents the Archangels, and the second St. Pantaleone and other Martyrs. Lanzi says they are remarkably well executed for the time: the figures represented on a gold ground, the dra-
peries extremely rich, with skulls and other pieces loaned to him, though not borrowed from any other school. The grado, or step, is ornamented with minute histories—somewhat crude, but displaying much diligence and care in finishing.

Nebenrost, George, a Bohemian Protestant di-
vine, who was obliged to quit his native land during the Anti-Reformation movement at the close of the 16th century, was born at Arnstadt, in 1577. After having, by due preparation, fitted himself for the ministry, he preached for two years at Dobritzschi and Neszwitz; was then exiled, and resided three years at Pressnitz and Annaberg; and was then again a minister of the Protestant doctrines at Jihlásth, where he suffered much during the Thirty Years' War. He died in 1627, on the same day on which he had, fifty-eight years before, begun his clerical duties in Bohemia. See Peschke, The Ref. and Anti-Ref. in Bohemia, ii, 405.

Nebo (Heb. נֶבֹּה, נבֹּבּ; prob. of Chaldean origin, see below, No. 1), the name of a heathen deity, and of three places in or around Palestine. In treating of them we give a general description with references to col-
lateral heads for further details. 

1. (Sept. Nažôô, v. n. Nažôô [and in Isaa. even דָּגָוֹ; Vulg. Naêôô). The title of a Chaldean idol or god which occurs both in Isaiah (xvii, 1) and Jeremiah (xlviii, 1), being the name of a well-known deity of the Babylonians and Assyrians. The original native name was, in Hamitic Babylonian, Nabôô; in Semitic Baby-

lonian and Assyrian, Nabôô. It is reasonably con-
jectured to be connected with the Hebrew נבֹּה, "to prophesy" (see Gesenius, Thes. Heb., p. 841), whence the common word נבֹּבּ, "prophet" (Arab. Nabôô). Nebo was the god who presided over learning and letters. He is called "the far-hearing," "he who possesses in-
telligence," "he who teaches or instructs." Generally, however, he enjoys the high-sounding titles of "Lord of Lords," "father of the seers of men," and "the beloved of Layard thinks the name is derived from the Egyptian Neb, "Lord" (Nineveh and Bab, p. 77). The wedge or arrow-head—the essential element of cuneiform writing —appears to have been his emblem; and hence he bore
the name of Tir, which signifies "a shaft or arrow." His general character corre-
responds to that of the Egyptian Thoth, the form of the Greek Hermes, and the Latin Mercury. Astronomically he is identified with the planet nearest the sun, called Nebo also by the Mende-
aus, and Tir by the ancient Persians. Nebo was of Babylonian rather than of Assyrian origin. In the early Assyrian Pantheon he occupies a very inferior position, being either omitted from the lists altogether, or occurring as the last of the minor gods. The king supposed to be Yul first brings him prominently forward in Assyria, and then apparently in consequence of some pecu-
niar connection which he himself had with Babylon. A statue of Nebo was set up by this monarch at Cal-
lah (Nimrud), which is now in the British Mu-
seum. It has a long inscription, written across the body, and consisting chiefly of the god's various epi-
thets. In Babylonian Nebo held a prominent place from an early time. The ancient town of Borsippa was expected to afford its protection, and the great temple there (the modern Birs-Nimrud) was dedicated to him from a very remote era. See Barèl, Tower of.

2. (Sept. Naß/B.; Vulg. Nebó.) A name of the moun-
tain (Tir) from which Moses took his first and last view of the Promised Land (Deut. xxxii, 49; xxxiv, 1). It is so minutely described that it would seem impossible not to recognise it: in the land of Moab; facing Jericho; the head or summit of a mountain called "the Pisgah," which again seems to have formed a portion of the general range of the "mountains of Abarim." Its po-
sition is further denoted by the Jerehoc and the valley (or perhaps more correctly the ravine) in which Moses was buried, and which was apparently one of the cliffs of the mount itself (xxxii, 50)—"the ravine in the land of Moab facing Beth-Pee" (xxxiv, 6). Josephus, speaking of the death of Moses, says of Abarim, "It is a very high mountain opposite Jericho and one that affords a prospect of the greater part of Canaan" (Ant. iv, 8, 48). Eusebius and Jerome say that Nebo is a mountain "over the Jordan opposite Jericho in Moab, . . . and until this day it is shown in the sixth mile west of Heshbon" (Onomast. a. v. Nabau). In another place they locate it between Heshbon and Livias (Ibid. a. v. Abarim). Gesenius derives the name Nebo from the root ㈜, "to project," and hence 𝗮*
would signify a projection (Thesaurus, p. 841). Others trace the name to the heathen deity Nebo, and suppose that there was an ancient high place on the peak where that deity was worshipped (Stanley, p. 294). For fuller information, see Ritter, Pal. and Syr. ii, 1176 sq., 1186 sq.; Porter, Hand-book, p. 299; Drew, Scripture Lands, p. 96; Poland, Palast, p. 342, 496.

Yet, notwithstanding the minuteness of the scriptural descriptions, till lately no one succeeded in pointing out any spot which answers to Nebo. Viewed from the western side of Jordan (the nearest point at which most travellers are able to view them) the mountains of Moab present the appearance of a wall or cliff, of the upper line of which is almost straight and horizontal. "There is no peak or point perceptibly higher than the rest; but all is one apparently level line of summit without peaks or gaps" (Robinson, Bib. Res. i, 570). "On ne distingue pas un sommet, pas la moindre cime; seulement on apporte aux yeux une impression vague et vague de montagne. "La ligne du peintre qui a tracé cette ligne horizontale sur le ciel est tramblée dans quelques endroits" (Chateaubriand, Itinéraire, part 3). "Possibly," continues Robinson, "on travelling among these mountains, some isolated point or summit might be found answering to the position and character of Nebo." Three such points have been named.

1. Seetzen (March 17, 1806; Reise, i, 408) seems to have been the first to suggest the Jebel Attarīs (be-
tween the Wady Zirkā main and the Arnon, three miles below the former, and ten or twelve south of Heshbon) as the Nebē of Moses. In fact, it has been (probably without any communication) by Burchhardt (July 14, 1812), who mentions it as the highest point in that locality, and therefore probably "Mount Nebo of the Scripture." This is adopted by Irby and Mangles, though with hesitation (Travels, June 6, 1818).

2. Another elevation above the general summits of these highlands is the Jebel 'Osha, or Ausha', or Jebel el-Jiftād, "the highest point in all the eastern moun-
tains," "overtopping the whole of the Belka, and rising about 3000 feet above the Ghôr" (Burchhardt, July 2, 1812; Robinson, i, 327 note, 570). It has been (without references) a likely point where in one of the essential of the Nebē of the Scripture, which is stated to have been "facing Jericho," words which in the wid-
est interpretation must imply that it was "some elevation immediately over the last stage of the Jordan," while 'Osha and Attarīs are equally remote in oppo-
site directions, the one fifteen miles south, the other fifteen miles south of a line drawn eastward from Jericho. Another requisite for the identification is that a view should be obtainable from the summit, corresponding to that prospect over the whole land which Moses is said to have had from Mount Nebo. The view from Jebel Jiftād has briefly been described by Dr. Porter (Homm. book, p. 303), though without reference to the possibility of its being Nebo. Of that from Jebel Attarīs no description is extant, for, almost incredible as it seems, none of the travellers above named, although they believed it to be Nebo, appear to have made any attempt to de-
viate so far from their route as to ascend an eminence where a correct position, must be the most inter-
esting spot in the world.

3. De Saulcy is the first traveller who discovered the name still extant in Jebel Nebbāk, an eminence on the eastern shore of the Dead Sea, not far from its northern end (Voyage en Terre Sainte, i, 289 sq.). The due de Langle, however, appears to have been first (though ac-
tually visit and accurately locate the summit (Voyage, under April 18, 1864). Mr. Tristram next visited it, and
he graphically describes the outlook from its top (Land of Israel, p. 386 sq.; comp. also his Land of Moab, p. 388 sq.). The place in question lies nearly four miles south-west of Hebron. Prof. Faine, of the American Exploring Party, carefully examined the spot, and sent an account of his researches and conclusions (in the "Third Statement" of the Am. Pal. Exploration Soc., N. Y. Jan. 1875), in which, while admitting the identity of the modern and ancient names and localities, he enters into a minute argument to prove that Pskhah was a specific title of the ancient Macht, which loses since rather than a general name of the entire range, as usually held. See Pskhah.

3. (Sept. Naḥšôb; Vulg. Nebó, Nabo.) A town on the eastern side of Jordan, situated in the pastoral country (Numb. xxxiii, 3), one of those which were taken possession of and rebuilt by the tribe of Reuben (ver. 30). In these lists it is associated with Kirjathaim and Baal-meon or Beon; and in another record (1 Chron. v, 8) with Arer, as marking one extremity, possibly the west, of a principal part of the tribe. In the remarkable prophecy uttered by Isaiah (xxv, 2) and Jeremiah (xlii, i, 29) concerning Moab, Nebo is mentioned in the same connection as before, though no longer an Israelitish town, but in the hands of Moab. It does not occur in the catalogue of the towns of Reuben in Joshua (xiii, 15-23); but whether this is an accidental omission, or whether it appears under another name—according to the statement of Numb. xxxiii, 38, that the Israelites dwelt in the cities they retained in this district—is uncertain. In the case of Nebo, which was doubtless called after the deity of that name, there would be a double reason for such a change (see Josh. xxiii, 7). There is nothing positive except the name to show that there was a connection between Nebo the town and Mount Nebo. The notices of Eusebius and Jerome (Onomast.) are confused, but they rather denote that the two were distinct, and distant from each other. The town (Naḥšōb, Nabo) they identify with Nobah and Kenath, and locate it eight miles south of Heshbon, where the ruins of el-Habâi appear to stand at present; while the mountain (Naḥšôb, Nabao) is stated to be six miles east (Jer.) or west (Euseb.) from the same spot. But the former statement is certainly an error; and hence we may presume that the town and the mountain were not distinct, especially as we find the associated towns (Medeba and Baal-meon) in the same list of Reuben's possessions. In the list of places south of the Salt given by Dr. Robinson (Bibl. Res. iii, App. p. 170) one occurs named Nebo, which may be identical with Nebo. It perhaps indicates the ruins now extant on the present Jebel Nebkâh, or Mount Nebo (above). See Nebuchadnezzer's name in cuneiform. (From Ménant, Grammaire Assyrienne, p. 321.)

Naḥšôb; Vulg. Nebó.) The children of Nebo (Bene-Nebo), to the number of fifty-two, are mentioned in the catalogue of the men of Judah and Benjamin who returned from Babylon with Zerubbabel (Ezra ii, 29; Neh. vii, 68; in the latter passage, "the other Nebo," for some reason obviates identical names). The inhabitants of Nebi-Nebo were usually called the Ezra, and were situated on the west by west of Jerusalem, eight from Lydda, and close to Yalo; apparently the place mentioned by Jerome (Onomast.) And and Anob; and Epeh. Paulus, § 8) as Nob the city of the priests (though that identification is hardly admissible), and both in his and later times known as Bethkosmakh or Betroumâle. It became cele-
NEBUCADNEZZAR

proved, that he was the leader of a Babylonian contin-
gent which accompanied Cynxares in his Lydian war
[see MEDES], by whose interposition, on the occasion
of an eclipse, that war was brought to a close, B.C. 616.
(Hebrews, 10: 15-16; see also Ezra x, 7; 1 Sam. xii, 11),
which does not rightly render the Babylonian Nabu-
cudur-uzur, but does render another Babylonian name,
Nabu-nakh.
Nabopolassar may have had a son of this name;
or the Labyrinthus of Herod. i, 74 may be Nabu-
opolassar himself.) At any rate, a few years later, he
was placed by the Babylonian chief Babylonian
and sent by his father, who was now old and infirm, to
chastise the insolence of Pharaoh-Necho, king of Egypt.
This prince had recently invaded Syria, defeated Josiah,
king of Judah, at Megiddo, and reduced the whole tract, from
Egypt to Carchemish on the upper Euphrates [see Carch-
emish], which in the partition of the Assyrian territo-
cies on the destruction of Nineveh had been assigned to
Babylon (2 Kings xxiii, 29, 30; Beros. ap. Josephus,
c. Ap. i, 19). Necho had held possession of these coun-
tries for about three years, when (B.C. 606) Nebuchad-
nezzar led an army against him, defeated him at Car-
chemish in a great battle (Jer. xlvi, 2-12), recovered
Czele-Syria, Phoenicia, and Palestine, took Jerusalem
(Dan. i, 1, 2), pressed forward to Egypt, and was en-
gaged in that country or upon its borders when intelli-
gence arrived which recalled him hastily to Babylon.
Nabopolassar, after reigning twenty-one years, had died,
but his son, Necho, had yet to face, as the only son to
think, Nebuchadnezzar, since he appears to be the
"king of Babylon" to the Jews, had really been associ-
ated with his father (Jer. iv, 1; Dan. i, 1). In some
alarm, however, about the succession, he hurried back to
the capital, accompanied only by his light troops; and
crossing the desert, probably by way of Taemor or Pal-
myra, reached Babylon before any disturbance had ar-
isen, and entered peaceably on his kingdom (B.C.
604). The bulk of the army, with the captives—Pho-
nicians, Syrians, Egyptians, and Jews—returned by the
ordinary route, which skirted instead of crossing the
desert. It was at this time that Daniel and his com-
panions were brought to Babylon, where they presently
grew into favor with Nebuchadnezzar, and became per-
sons of very considerable influence (Dan. i, 3-20). See
DANIEL.
The sacred vessels taken from Jehovah's house were transferred by Nebuchadnezzar to his tem-
ple at Babylon (Isa. xxxix, 2; Chron. xxxvi, 6, 7). See B.C. 606.
Within a few years after Nebuchadnezzar's first ex-
pedition into Syria and Palestine, disaffection again
showed itself in those countries. Jehoiakim—who, al-
though threatened at first with captivity (2 Chron.
xxxvi, 6), had been finally maintained on the throne as a
familiar of the king—was seized after three years, and
rebelled against his suzerain, probably trusting to be
supported by Egypt (2 Kings xxiv, 1). Not long
afterwards Phoenicia seems to have broken into revolt;
and the Chaldæan monarch, who had previously en-
deavored to subdue the disaffected by his generals and
allies (2 Sam. x, 6), had now to encounter, on his
return, a formidable enemy, the Chaldæans, who had
marched first of all against Tyre. Having in-
vested that city in the seventh year of his reign (Joes-
phus, c. Ap. i, 21), and left a portion of his army there
to continue the siege, he proceeded against Jerusalem,
which submitted without a struggle (B.C. 598). Ac-
cording to Josephus, who is here our chief authority,
Nebuchadnezzar punished Jehoiakim with death (Ant.
x, 6, 3; comp. Jer. xxii, 18, 19, and xxxvi, 30), but
placed his son Jehoiachin upon the throne. Jehoiachin
reigned only three months; for, on his showing symp-
toms of disaffection, Nebuchadnezzar came up against
Jerusalem for the third time, deposed the young prince
(whom he made king of Babylon, took a large portion
of the population of the city, and the chief of the
Temple treasures), and made his uncle, Zedekiah,
king in his place. Tyre still held out; and it was not
the tenth year from the time of its first invest-
ment that the city of merchants fell (B.C. 585). Before
this happened, Jerusalem had been totally destroyed.
This consummation was owing to the folly of Zedekiah,
who, despite the warnings of Jeremiah, made a treaty
with Necho, king of Egypt (who had been defeated by
the Babylonians, 605), and on the strength of this alliance renounced his alle-
giance to the king of Babylon. Nebuchadnezzar com-
menced the final siege of Jerusalem in the ninth year
of Zedekiah—his own sixteenth year (early in B.C.
589)—and it took nearly two years later (latter part of
B.C. 587) the enormous efforts of the besiegers to
have been made by Apries. An Egyptian army crossed
the frontier, and began its march towards Jerusalem;
upon which Nebuchadnezzar raised the siege, and set
off to meet the new foe. According to Josephus (Ant.
x, 7, 3) a battle was fought, in which Apries was com-
pletely defeated; but the scriptural account seems rather
to imply that the Egyptians retired on the advance of
Nebuchadnezzar, and recrossed the frontier without
risking an engagement (Jer. xxxvii, 5-8). At any rate,
the attempt failed, and was not repeated; the "broken
reed, Egypt," proved a treacherous support, and after an
eighteen months' siege Jerusalem fell. Zedekiah es-
ca ped from the city, he was captured and put to death (Jer.
xxxix, 5), and brought to Nebuchadnezzar at Riblah in
the territory of Hamath, where his eyes were put out
by the king's order, while his sons and his chief nobles
were slain. Nebuchadnezzar then returned to Babylon
with Zedekiah, whom he imprisoned for the remainder
of his days, put his son upon the throne for a while, to
his guard, to complete the destruction of the city and the
pacification of Judæa. Gedaliah, a Jew, was appointed
governor, but he was shortly murdered, and the rest of
the Jews either fled to Egypt or were carried by Ne-
bu zar-adan to Babylon (B.C. 586).
The military successes of Nebuchadnezzar cannot be
 traced minutely beyond this point. His own annals
have not come down to us; and the historical allusions
which we find in his extant inscriptions are of the most
vague and general character. It may be gathered from
the prophetic Scriptures and from Josephus that the
conquest of Jerusalem was rapidly followed by the fall
of Tyre and the complete submission of Phoenicia (Ezra
xxvi—xxviii; Joseph. c. Ap. i, 21); after which the
Babylonians carried their arms into Egypt, and inflicted
severe injuries on that fertile country (Jer. xlv, 13-26;
Ezra xxxiii, 20-21; xxx, 6; Joseph. Ant. x, 9, 7). But
we have no knowledge of the campaigns of which we can
depend. Josephus adds that Megasthenes, in his fourth
book, refers to the same subject, and thereby endeavors
to show that Nebuchadnezzar exceeded Hercules, and
conquered a great part of Africa and Spain. Strabo adds
that "Sesostris, king of Egypt, and Tearcon, king of Ethiopia," extended the limits of their turn of mis-
fortune, but that Navokodrosor, who is venerated by the Chal-
dees more than Hercules by the Greeks, . . . marched
through Spain to Greece and Pontus." Our remaining
notices of Nebuchadnezzar present him to us as a mag-
nificent prince and beneficent ruler rather than a war-
rior; and the evidence which has already been adduced
as to his character and the nations among the Eastern nations depends rather on his buildings and other grand constructions than on any victories or conquests ascribed to him.
2. We are told by Berosus that the first care of
Nebuchadnezzar, on obtaining quiet possession of his king-
dom after the Syrian expedition, was to rebuild the
temple at Jerusalem, which had been burned and desoli-
ted by Nebuchadnezzar, to the east of the town of
Hercoduch (B.C. 577), and to have erected there the
new palace out of the spoils of the Syrian war (ap. Joseph. Ant. x, 11, 1). He next proceeded to strengthen and beautify the city, which he renovated throughout, and surrounded with several lines of fortification, himself adding one entirely new quarter. Having finished the walls and adorned the gates magnificently, he set up a splendid new palace, adjoining the old residence of his father—a superb edifi-
c which he completed in fifteen days! In the grounds
of this palace he formed the celebrated "hanging gar-
den," which was a pleasure, built up with huge stones
to imitate the varied surface of mountains, and planted with trees and shrubs of every kind. Diodorus, probably following Ctesias, describes this marvel as a square, *pólestra* (four hundred feet) each way, and fifty cubits high, the four sides being equal, and the whole height being at one point. The lines had been laid out on an outline map, and supported on a series of arched galleries increasing in height from the base to the summit. In these galleries were various pleasant chambers; and one of them contained the engines by which water was raised from the river to the surface of the mound. This custom of raising water from the Ganges is found among the seven wonders of the world, was said to have been built by Nebuchadnezzar for the gratification of his wife, Amuilia, who, having been brought up among the Median mountains, desired something to remind her of them. Possibly, however, one object was to obtain a pleasure-ground at a height above that to which the mosquitoes are accustomed to rise. This complete renovation of Babylon by Nebuchadnezzar, which Berosus asserts, is confirmed to us in every possible way. The Standard Inscription of the king relates at length the construction of the whole series of works, and appears to have been the authority from which Berosus drew. The text is corrupt, and in nine tenths of the bricks in *situ* are stamped with Nebuchadnezzar's name. Scripture also adds an indirect but important testimony in the exclamation of Nebuchadnezzar recorded by Daniel, "Is not this great Babylon which I have built?" (Dan. iv. 30).

8. Nebuchadnezzar must not be understood to have devoted all his efforts to the ornamentation and improvement of his capital. Throughout the empire, at Borsippa, Sippara, Cutha, Chilmad, Durab, Teredon, and a multitude of other places, he built or rebuilt cities, repaired temples, constructed quays, reservoirs, canals, and aqueducts, on a scale of grandeur and magnificence surpassing everything of the kind recorded in history, unless it be the constructions of one or two of the greatest Egyptian monarchs. "I have examined," says Sir H. Rawlinson, "the bricks in *situ*, belonging perhaps to a hundred different towns and cities in the neighborhood of Bagdad, and I never found any other legend than that of Nebuchadnezzar, son of Nabopolassar, king of Babylon" (Com. on the Inscri. of Assyria and Babylonia, p. 76, 77).

"Nebuchadnezzar," says Abydenus, "on succeeding to the throne, fortified Babylon with three lines of walls. He dug the Nahar Malka, or Royal River, which supplies the city with fresh stream of water, and also the Acracanus. He likewise made the great reservoir above the city of Sippara, which was thirty parangs (ninety miles) in circumference, and twenty fathoms (one hundred and twenty feet) deep. Here he placed sluices or flood-gates, which enabled him to irrigate the low country round about the city. He built the tower along the shore of the Red Sea (Persian Gulf), and founded the city of Teredon on the borders of Arabia." It is reasonably concluded from these statements that an extensive system of irrigation was devised by this monarch, to whom the Babylonians were probably indebted for the great portion of that vast network of canals which covered the whole alluvial tract between the Euphrates and Tigris, and extended on the right bank of the Euphrates to the extreme verge of the stony desert. On that side the principal work was a canal of the largest dimensions, still to be traced, which left the Euphrates at Hit, and skirting the desert ran south-east, a distance of about four hundred miles to the Persian Gulf, where it emptied itself into the bay of Gar.

The wealth, greatness, and general prosperity of Nebuchadnezzar are strikingly placed before us in the Book of Daniel. "The God of heaven" gave him, not a kingdom only, but "power, strength, and glory" (Dan. ii. 37). His cities were by the image of gold, sixty cubits in height, which he set up in the plain of Dura (Dan. iii. 1). The grandeur and careful organization of his kingdom appear from the long list of his officers, "princes, governors, captains, judges, treasurers, counsellors, sheriffs, and rulers of provinces," of whom we have repeated mention (ver. 2, 3, 27). We see the existence of a species of hierarchy in the "magicians, astrologers, sorcerers," over whom Daniel was set (ii. 11). The imposing height of the image, and the height thereof reached unto the heavens, and the sight thereof to the end of all the earth; the leaves whereof were fair, and the fruit much, and in which was food for all; under which the beasts of the field had shadow, and the fowls of heaven dwelt in the branches thereof; and all flesh was fed of it (iv. 10-12), is the fitting type of a kingdom at once so flourishing and so extensive. It has been thought by some (De Wette, Th. Parker, etc.) that the Book of Daniel represents the satrapal system of government ("Satrapen-Einrichtung") as established throughout the whole empire; but this conclusion is not justified by a close examination of that document. Nebuchadnezzar, like his Assyrian predecessors (Isa. x. 8), is represented as a "king of kings" (Dan. ii. 37); and the officers enumerated in chap. ii are probably the authorities of Babylonia proper, rather than the governors of remoter regions, who could not be all spared at once from their obligations. The instance of Gedaliah (Jer. xlix. 2; 2 Kings xxxv. 22) is not that of a satrap. He was a Jew; and it may be doubted whether he stood really in any different relation to the Babylonians from Zechariah or Jehoachin; although, as he was not of the seed of David, the Jews considered him to be a "governor" rather than a satrap.

3. Towards the close of his reign the glory of Nebuchadnezzar suffered a temporary eclipse. As a punishment for his pride and vanity, that strange form of madness was sent upon him which the Greeks called lycanthropy (λυκάνθρωπος); wherein the sufferer imagines himself a beast, and quitting the habit of men, insists on leading the life of a beast (Dan. iv. 33). Berosus, with the pardonable tenderness of a native, anxious for the good fame of his country's greatest king, suppressed this fact; and it may be doubted whether Herodotus in his Babylonian travels, which fell only about a century after the time, obtained any knowledge of it. Nebuchadnezzar himself, however, which grew, in his great inscription appears to allude to it, although in a studied ambiguity of phrase which renders the passage very difficult of translation. After describing the construction of the most important of his great works, he appears to say, "For four years (,) the seat of power was rejected by you, the king who is of Israel, I let all my dominions I did not build a high place of power, the precious treasures of my kingdom I did not lay up. In Babylon, buildings for myself and for the honor of my kingdom I did not lay out. In the worship of Merodach, my lord, the joy of my heart, in Babylon the city of his sovereignty, and the seat of my empire, I did not sing his praises. I did not furnish his altars with victims, nor did I clear out the canals" (Rawlinson's Herod. i. 586). Other negative clauses follow. It is plain that we have here narrated a suspension—apparently for four years—of all those works and occupations which filled the king's court, his temples, palace, worship, offerings, and works of irrigation; and though the cause of the suspension is not stated, we can scarcely imagine anything that would account for it but some such extraordinary malady as that recorded in Daniel. It has often been remarked that Herodotus ascribes to a queen, Nitocris, several of the important works, which other writers (Berosus, Abydenus) assign to Nebuchadnezzar. The conjecture naturally arises that Nitocris was Nebuchadnezzar's queen, and that, as she carried on his constructions during his incapacity, they were ascribed to her; but this argument is rendered null by the fact that Nebuchadnezzar's wife was a Median princess, not an Egyptian (as Nitocris must have been from her name), and that she was called, not Nitocris, but Amytis or Amylia; for Nebuchadnezzar, who
married Amyitis in B.C. 625, and who lived after this marriage more than sixty years, may easily have married again after the decease of his first wife, and his second queen may have been an Egyptian. His later relations with the glory of his kingdom from his house have been forgotten; and it is remarkable that the name Nitoeris, which belonged to very primitive Egyptian history, had in fact been resuscitated about this time, and is found on the Egyptian monuments to have been borne by a princess belonging to the family of the Ptolemarchs.

The name of Nebuchadnezzar's disease and recovery has been much debated. Origen strangely allegorizes the story (ap. Hieron. in Dan.) as a representation of the fall of Lucifer. Bodin (in Demonol.) maintains that Nebuchadnezzar underwent an actual metamorphosis of soul and body; a similar instance of which is given by Cuvier (Append. ad Epist. Habil.) on the testimony of an eye-witness. Tertullian (De Punit.) confines the transformation to the body only, but without loss of reason, of which kind of metamorphosis St. Augustine (De Civ. Dei, xviii, 18) reports some instances said to have taken place in Italy, to which he himself attaches little credit; but Gaspard Peucer asserts that the transformation of men into wolves was very common in Lycia. Some Jewish rabbins have asserted that the soul of Nebuchadnezzar, by a real transmigration, changed places with that of an ox (Medina, De recta in Deum fuli); while others have supposed not a real, but an apparent change, of which there is a case recorded by Philo, in which a young woman having been persuaded that their daughter had been transformed into a mare. The most generally received opinion, however, is that Nebuchadnezzar laboured under that species of hypochondriac monomania which leads the patient to fancy himself changed into an animal or other substance, the habits of which he adopts. Jerome probably leaned to this opinion: "Who does not see," he observes, "that madmen live like brute beasts" (in Dan. iv, 4). To this disease of the imagination physicians have given the name of Lycanthropy, Zoanthropy, or Insania Canina. See Disease. In Dan. iv, 15 (iv, 12, according to the Latin) there seems to be an allusion to some species of insanity in the expression, "Even with a band of iron and brass" (colliget vinculo ferreo et aereo, Vulg.); and the loss and return of reason is very clearly intimated in ver. 34, "Mine understanding returned to me, and I blessed the Most High." (See also Dan. iv, 10; v, 11, 18; Jer. xliii. 2; Zech. ii. 8; Perven. in loc.; p. 65; B. Reckenberger, De Nebuclad. ob hominibus ex pulao, Jen. 1738; Bertholdt, Daniel, i, 290; Heinroth, Schedelstor, i, 65; Ader, De aegrotis in Evangel. p. 81, etc.; Meade, Med. Soc.; Müller, De Nebuchad. meta-morpha, Lips. 1747.)

The story of Nebuchadnezzar has been revived in modern times, especially by De Wette (Einleitung, p. 257.), who considers the accounts in Daniel too improbable, if literally understood, although he admits that they may have been founded on historical traditions. He considers the whole of the narrative in Daniel as referring to Antiochus Epiphanes, who he asserts is also signified by Bel-shamin, the name assumed by Boe of Daniel is spurious, contrary to the New Testament and other ancient testimony (Hengstenberg, Authentic. des Dan. p. 100 sq.). See Daniel.

Some have fancied that there was an allusion to the disease of Nebuchadnezzar in the passage of Deroeus quoted by Joseph (c. Apion, i, 320): "A Nabuchodonosor, after he had commenced the aforesaid wall, falling into a sickness, died." Abydunus (ap. Eusebius, Praep. Evangel. ix, 41), having cited the passage from Megasthenes already referred to, adds, upon the authority of the same writer, a speech of Nabuchodonosor, where in, having been struck by some god, he foretold the destruction of Babylon by a "Persian mule," assisted by a Mede, the former boast of Assyria, after which he instantly vanished. A reference has been supposed to exist in these words to Nebuchadnezzar's madness and consequent disappearance, but there is at most, as De Wette observes, only a traditional connection between them. Jahn (Hebrew Commonwealth) conceives the whole to be a tradition made up from his prophetic revelations, and from Daniel's explanation of the well-known handwriting in the banquetting-hall of Belzazzar.

After an interval of four, or probably seven years (Dan. iv, 16), Nebuchadnezzar's malady left him. As we are told in Scripture that "his reason returned, and his heart was like the heart of a child," and that he "was established in his kingdom, and excellent majesty was added to him" (Dan. iv, 36), so we find in the Standard Inscription that he resumed his great works after a period of suspension, and added fresh "wonders" in his old age to the marvelous constructions of his manhood. He died in the second year B.C. 561, at an advanced age (88 or 84), having reigned forty-three years. A son, Evil-Merodach (q. v.), succeeded him.

4. The character of Nebuchadnezzar must be gathered principally from Scripture. There is a conventional formality in the cutenorm inscriptions, which deprives them of almost all value for the illustration of individual mind and temper. Ostentation and vainglory are characteristics of the entire series, each king seeking to magnify above all others his own exploits. We can only observe as peculiar to Nebuchadnezzar a disposition to rest his fame on his great works rather than on his temperance, the East, and his piety. The latter, manifesting itself especially in a devotion, which is almost exclusive, to one particular god. Though his own tutelary deity and that of his father was Nebu (Mercury), yet his worship, his ascriptions of praise, his thanksgivings, have in almost every case for their object the god Merodach. Under his reign his son, Evil-Merodach, Merodach is "his lord," "his great lord," "the joy of his heart," "the great lord who has appointed him to the empire of the world, and has confided to his care the far-spread people of the earth," "the great lord who has established him in strength," etc. One of the first of his own titles is, "He who pays homage to Merodach." Even when restoring the examples of other deities, he ascribes the work to the suggestions of Merodach, and places it under his protection. We may hence explain the appearance of a sort of monotheism (Dan. i, 2, iv, 21, 22, 84, 87), mixed with polytheism, as in Dan. iv, 18, and in the scriptural notices of him. While admitting a qualified divinity in Nebu, Nana, and other deities of his country, Nebuchadnezzar maintained the real monarchy of Bel-Merodach. This deity was to him the supreme chief of the gods, the "most ancient," the "king of the heavens and the earth," all the other deities are all applied to Merodach by Nebuchadnezzar in his inscriptions. It was a name, age, or symbol, undoubtedly, which was "set up" to be worshipped in the "plain of Dura" (iii, 1), and his "house" in which the sacred vessels from the Temple were treasured (i, 2). Nebuchadnezzar seems at some times to have identified this, his supreme god, with the God of the Jews (ch. iv), and at other times the Jewish God as one of the local and inferior deities (ch. iii) over whom Merodach ruled.

The genius and grandeur which characterized Nebuchadnezzar, and which have handed down his name among the few ancient personages known generally throughout the East and West, is also displayed, and indeed in all the accounts of his reign and actions. Without perhaps any strong military turn, he must have possessed a fair amount of such talent to have held his own in the east against the ambitious Medes, and in the west against the Egyptians. Necho and Apries were both princes of good stock. Yet, both of them is some credit to have defeated. The prolonged siege of Tyre is a proof of the determination with which he prosecuted his military enterprises. But his greatness lay especially in the arts of peace. He saw in the natural
NEBUCHADNEZZAR 901 NEBUCHADNEZZAR

fertility of Babylonia, and its ample wealth of waters, the foundation of national prosperity, and so of power. Hence his vast canals and elaborate system of irrigation, which made the whole country a garden; and this must have been a main cause of the full treasury, from which alone his palaces and temples can have received their magnificence. The forced labor of captives may have raised the immense wealth, but the fine woodwork, the gold and silver plating, the hangings and curtains, had to be bought; and the enormous expenditure of this monarch, which does not appear to have exhausted the country, and which cannot have been very largely supported by tribute, must have been raised by private acquisition. This was the system under which he took so much pains to develop. We may gather from the productiveness of Babylonia under the Persians (Herod. i, 192, 193; iii, 92), after a conquest and two (three?) revolts, some idea of its flourishing condition in the period of independence, for which (according to the consentient testimony of the monuments and the best authors) it was indebted to this king.

The moral character of Nebuchadnezzar is not such as entitles him to our approval. Besides the overweening pride which brought upon him so terrible a chastisement, we note a violence and fury (Dan. ii, 12; iii, 19) commensurate enough among Oriental monarchs of the weaker kind, but from which the greatest of them have usually been free; while at the same time we observe a cold and relentless cruelty which is particularly revolting. The blinding of Zedekiah perhaps may be justified as an ordinary Eastern practice, though it is the earliest case of the kind on record; but the refinement of cruelty by which he was made to witness his sons' execution before his eyes were put out (2 Kings xxv, 7) is worthier of a Dionsusius or a Domitian than of a really great king. Again, the detention of Jehoiachin in prison for thirty-six years for an offence committed at the age of eighteen (2 Kings xxiv, 8), is a severity surpassing Oriental law, and not justified by the case of any of them. He was nothing to set, unless it be a feeble trait of magnanimity in the pardon accorded to Shadrach, Meshach, and Abednego when he found that he was without power to punish them (Dan. iii, 26).

It has been thought remarkable that to a man of this character God should have vouchsafed a revelation of the future by means of visions (Dan. ii, 29; iv, 2). But the circumstance, however it may disturb our preconceived notions, is not really at variance with the general laws of God's providence as revealed to us in Scripture. God has a right to his natural, so with his supernatural gifts, they are not exclusive of each other, as is sometimes supposed. Moreover, Christianity, miraculous powers were sometimes possessed by those who made an ill use of them (1 Cor. xiv, 23). And God, it is plain, did not leave the old heathen world without some supernatural aid, but made his presence felt from time to time in visions, through prophets, or even by a voice from heaven. It is only necessary to refer to the histories of Pharaoh (Gen. xli, 1-7, 28), Abimelech (xx, 3), Job (Job iv, 13; xxxviii, 1, 1; xl, 6; comp. Dan. iv, 31), and Balaam (Num. xxii, xxiv), in order to establish the parity of Nebuchadnezzar's visions with other facts recorded in the Bible. He was warranted, and the nations over which he ruled were warned through him, God leaving not himself "without witness" even in those dark times. In conclusion, we may notice that a heathen writer (Abydesus), who generally draws his inspirations from Berosus, ascribes to Nebuchadnezzar a miraculous speech just before the fall of the fabric; and the Berosian account of the Babylonian destruction body coming of the "Persian mile," who with the help of the Medes would enslave Babylon (Abyd. ap. Euseb. Prep!. Ev. 14, 41).

5. The Canon of Poliomy the mathematician, who flourished about the commencement of the Christian era, and who is supposed to have taken the order, of the kings of Babylon, commencing with Nabonassar, who reigned B.C. 747, and ending with Nabonassar, who died B.C. 556. According to this catalogue, Nabopolassar (NaBolOlaars), who died B.C. 625, was succeeded by Nabonolassar (NaBolOlaars), B.C. 605. This Nabopolassar is therefore presumed to be the Nebuchadnezzar of Scripture (for the Canon of Poliomy, see Table Chronologique des Regnes, etc., p.16, Abbé Haury, Paris, 1919). Nabopolassar, the father of Nabonassar, who is supposed to have built the temple of Babylon, and to have dismounted it from the Assyrian empire, of which it had hitherto formed a part (John's Hebrew Commenneallith). According to a fragment of Alexander Polyhistor, reported by Syncellus in his Chronographia, it was this sovereign who destroyed the city of Nineveh, B.C. 612, which the Chaldeans (Chron. p. 46), he effected in conjunction with Astyages, the eldest son of Cyaxares, king of the Medes (see also Tobit xiv, 15, where the latter is named Assuerus). The following extract, preserved by Josephus, from the lost Chaldaean history of Berossus, priest of the temple of Bel (B.C. 286), will be found to throw considerable light on the Scripture narrative: "When his father Nabuchodonosor heard that the governor whom he had set over Egypt and the places about Cœle-Syria and Phœnicia had revolted from him, while he was not himself able any longer to undergo hardships, he committed to his son, who was then in Egypt, the care of the greater parts of his army, and sent him against the enemy. So when Nabuchodonosor had given him battle, and fought with the rebel, he overcame him, and reduced the country from under his subjection and made it a branch of his own kingdom. But about that time it happened that his father Nabuchodonosor fell ill, and ended his life in the city of Babylon, when he had reigned twenty-one years; and when he learned that his father Nabuchodonosor was dead—having settled the affairs of Egypt and the other countries, and also those that concerned the captive Jews, and the Phœnicians, Syrians, and Egyptians, and having obtained a further promise from the Chaldean king to come to his aid, he hastily crossed the desert, with a few companions, into Babylon. So he took upon him the management of public affairs, and of the kingdom which had been kept for him by one of the chief Chaldeans, and he received the entire dominions of his father, and ordered when the captives came they should be placed in colonies in the most proper places of Babylonia "(Ant. x, 11; see also Apion. i, 19; Euseb. Chron. Armen. i, 59; Volney, Recherch. Nouv. sur l'Hist. Ancienn, iii, 101 sq.). It will be observed that both Nebuchadnezzar (styled by some the Great) and his father are here equally styled Nebuchadnezzar. The narrative of this king from Berosus by Josephus (c. Apion. i, 19) the father of Nebuchadnezzar is called Nabolassar (NaBoLaars), corresponding nearly with the Nabopolassar of Poliomy; which has induced some to suppose the name Nebuchadnezzar in the former citation to be an error of transcription. Some consider the Nebuchadnezzar of the Book of Judith to be the same with the Saoducin of Poliomy, who was contemporary with Manasseh. Some foundation has thus been afforded for considering Nebuchadnezzar as a general name for Babylonian sovereigns (Prideaux, Connect.); this, however, is considered by Whiston as a groundless misapprehension (Whiston's Josephus, note on ch. ix). The similarity of the two names may have led to their being sometimes confounded. The conqueror of Nineveh is also called by the name of Nebuchadnezzar in Tobit xiv, 15 (in the Greek, for the Latin ends with ver. 14), and is on this account supposed to be the same as Nebuchadnezzar the First, a designation first applied to him by rabbi David Ganz, in the age of the world 3285. According to Poliomy's Canon, the reign of Nabopolassar is made to commence two years later than that of the Nebuchadnezzar of Scripture. Probably the first capture of Babylon was not till the last years of the reign of Nabopolassar, in the expedition mentioned by Berosus (ut sup.), but the Canon of
Ptolemy dates the commencement of his reign from the death of his father, when he became sole king of Babylon (De Wette’s *Introductio,* § 253, note). See Chronology.

Although Herodotus does not name Nebuchadnezzar, he is supposed to have alluded to the expedition of Pharaoh Necho I into Babylon, when Nebuchadnezzar was child. Necho, after an engagement at Magdolus in Egypt, took Cadytis, a great city of Syria. It is conjectured that he may have confounded Migdol, in Egypt, with Megiddo, and that Cadytis was the same with Jerusalem (El Kadosh, “the holy city”) (Jahn’s *Hebrew Common Monuments*, pp. 218, 219).

6. One other point in the life of Nebuchadnezzar, connecting it with Scripture, may be glanced at. In the Book of Daniel (ch. iii) there is abruptly introduced an account of a golden image which Nebuchadnezzar set up in the plain of Dura, its inauguration being heralded in solemn pomp to all parts of the kingdom. The image was probably one of his patron-god, Bel-Merodach; and no less the dedication of such a statue is in perfect keeping with his intense religiousness, which is apparent from his numerous and cordial inscriptions of thanks and homage to the same divinity, after whom also he named his son and successor. The adoration paid to the image was also a test of loyalty. This image and the king’s gird sim- ply at the king’s command was such a spectacle of national conformity as an Oriental despot would naturally delight in. Some have supposed that the image represented the king himself, who, in this way, claimed divine honors—an insinuation found in Persian, Egyptian, and Seleucid monarchs—in the Grecian Alexander and the Roman Caligula. This is not a likely conjecture. The Jews as a body, it would seem, were not invited to the festival, being aliens and captives. But it is said that the image itself was not of all shape—sixty cubits high, and only six cubits broad—that is, in the proportion of twenty. Now it is evident in the story that its height was for the sake of its being visible to an immense concourse gathered on a plain, and it is therefore probable that a tall pedestal is included in the measurement; or it may have been an obelisk with a bust on the summit of it (Münter, *Relig. d. Bab.* p. 59; Hengstenberg, *On Daniel*). Diodorus Siculus (lib. ii) informs us that one of the images of massy gold found by Xerxes in the temple of Bel measured forty feet in height, which would have been fairly proportioned to a breadth of six feet, measured at the shoulders. PRI- deaux supposes that this may have been the identical statue erected by Nebuchadnezzar, which, however, Jahn considers to have been only a model, and that the image of gold could scarcely have been safe from robbers in the plain of Dura; but this conjecture of Jahn seems by no means necessary. Dür—Dura—signifies a plain, and in such a plain, yet vulgarly called Dowaiv, to the south-east of Babylon, M. Oppert found the pedestal of what must have been a colossal statue. There is no hint that the image was of solid gold, as some objectors imagine. Anything plated with gold was, in popular phrase, called golden (comp. Exod. xxx. 1-3; xxxix. 8, etc.). The description of the process of forging idols in Isa. xli. 19 shows us the plating of the figures. Herodotus mentions a large golden statue of Bel, and then refers to another and much smaller one, which, in contrast, he says, was of “solid gold.” The grand demonstration, and the assemblage of “princes, governors, captains, judges, treasurers, counsellors, sheriffs, and all the rulers of the provinces,” must have marked some imperial action as a notable and signal event. The despotism of the great monarchs of the East, worked, followed by such prosperity and repose as is indicated by the phrase, “I Nebuchadnezzar was at rest in mine house, and flourishing in my palace.” It is a strange rationalistic freak on the part of Lengerke, Bleek, and De Wette to regard all this chapter of Daniel as an interpolation, and only pluck out the cruelties and idolatries of Antiochus Epiphanes.

Jerusalem was destroyed. See Moan. Thence he pro-
ceded to Egypt (Joseph. Ibd.), and, either on the way 
thither or on the return, Nebuzardan again passed 
through the country and carried off seven hundred and 
forty, 20000 virgins, in captivity.iii. 90.

The name, like Nebu-chadnezzar and Nebu-abshan, 
contains that of Nebu the Babylonian deity. The other 
portion of the word is less certain. Gesenius (Thee, p. 
839 b) translates by Mercurius dux dominus, taking the "
χιν as εριν, "prince," and 755 as 7774, "lord."

First, on the other hand (Handb. s. v.), treats it as 
equivalent in meaning to the Hebrew rbb-tabbakkhim, 
which usually follows it, and sometimes occurs by itself 
(2 Kings xxi, 16; Jer. xii, 2, 5). To obtain this 
meaning, however, it is necessary to substitute a Sans 
circo, "chief," as Gesenius; but considers the last mem-
ber of the name to be the Sansc. dhana, from dā, "to cut 
off." Gesenius also takes saradon as identical with the 
first element in the name of Sardan-apalus. But this 
latter name is now explained by Sir H. Rawlinson as 
Asur-dan-i-pal (Rawlinson's Herod. i, 400).

Neceres is the name which the Turks give to a 
clan of people inhabiting the mountains about Jebil, 
in Syria, who are of a very strange and singular char-
acter. It is the principle of the mountains to adhere to 
no certain religion; chameleon like, they put on the 
color of religion, whatever it be, which is reflected upon 
them by the persons with whom they happen to con-
verse. The Turks have great respect for the Neceres 
Necitians; with Turks, they are good Mussulmans; with 
Jews, they pass for Jews; being such Proteuses in re-
ligion that nobody was ever able to discover what shape 
standard or their consciences are really of. See Brough-
ton, Biblioth. Hist. Sacra, ii, s. v. See NASSARIANS.

Necesstarians. See NECESSITARIANS.

Necessary Doctrine and Erudition (for 
your Christian man) is the title of a book which the Eng-
lish people received from their sovereign, Henry VIII, 
in the year 1543, in connection with the legal prohibi-
tion of reading the Scriptures. In contradistinction to 
the Institution of a Christian Man (q. v.), which was 
called the "Bishops' Book," the present formulary was 
called the "King's Book." The Necessary Doctrine 
was not, like the other, sanctioned by the authority of 
Convocation, but was composed by a committees origi-
nated by Act of Parliament end their consciences receiv-
ing the stamp of his personal approval. Henry him-
self had a considerable share in the execution of the 
work, the chief part of which was corrected by his own 
hand; and evidence still remains of the diligence with 
which he had collected and compared the opinions of 
his bishops and divines on the different points of dis-
cussion. The Preface was probably written by himself, 
and, among other matter, contains a vindication of the 
late prohibition of the Bible. Cramer also wrote a 
portion of it—that concerning faith. But while it was 
evangelical in doctrine, it was popish in other things, 
averting trinity doctrine, calling marriage a sacrava-
ment, and maintaining the seven sacraments of Roman-
ism. As an authorized formula it retained authority 
till the king's death. This work has occasioned in the 
present day much discussion and dispute, arising from 
the prejudices of its readers. One party has confidently 
appealed to it as a criterion of the opinions of the Re-
formed church as to the position the Church from which they had 
separated; another party has condemned it in the most unqualified terms, as lean-
ing even in doctrine towards popery rather than Prot-
estarianism. For a full account of the plan and contents 
of this work, see Carwhiten, Hist. of the Church of Eng-
land, Vol. i. ch. 23; see also Palcope, On the Church, i, 
Dict.; Farrar, Eccles. Dict.; Burnet, Ref. i, 455, 586; 
iii, 624; Amer. Theol. Rev. Feb. 1860, p. 172; Bib. Sacra, 
1865, p. 580; 1863, p. 891.

Necessitarians, an appellation which may be 
given to all who maintain that moral agents act from 
necessity. See the article NECESSITARIAN. Some object 
not only to the name, but to the dispute on a subject so 
important and intricate as the explanation of the most consistent 
mode of divine government, and insisted that the theme 
should be left entirely to the future sphere, where even 
the truth, according to Milton, has never yet dawned.

Says the poet:

"Others apart sat on a hill retired, 
In man more erudite, and reason's hallowed
Of providence, foreknowledge, will and fate.
Fixed fate, free-will, foreknowledge absolute;
And found no end—in wandering masses lost!"

Dr. Watts thinks it probable that the discussion of this 
subject may be the source of some of the same employments of the blessed 
in the heavenly world.

Necessity, DOCTRINE OF. I. Definition.—In meta-
physics, according to the common statement, "neces-
sity" is that quality of a thing by which it cannot but 
be, or whereby it cannot be otherwise. When in a 
proposition which affirms anything to be true there is 
a fixed invariable connection between the subject and 
the predicate, then that thing is understood to be neces-
sary. Necessity is opposed to chance, accident, con-
tingency, and to whatever involves the idea of uncer-
tainty and of possible variation. It is usually dis-
tinguished in philosophy and theology into physical, 
metaphysical or logical, and moral.

1. Physical necessity has to do with the established 
order and laws of the material universe. It is founded 
in the relation of cause and effect, and implies that 
where certain causes or forces are present certain effects 
must uniformly and inevitably follow. "By natural 
[or physical] necessity, as applied to men," says Ed-
wards, "I mean not only necessity, but men are under through 
the force of natural causes. Thus men placed in cer-
tain circumstances are the subjects of particular sensa-
tions by necessity; they feel pain when their bodies 
are wounded; they see the objects presented before 
them in a clear light when their eyes are opened; so 
by a natural necessity men's bodies move downwards 
when there is nothing to support them" (Works, ii, 18, 
Cartier's ed.).

2. Metaphysical or logical necessity expresses "the 
nature of our belief in certain fundamental truths, 
such as the reality of a material world, the law of causation, 
and the truth of the mathematica," etc. Logical necessity is 
characteristic of truths or ideas, as physical necessity 
is of events or phenomena in the material world. "It is 
alleged by some philosophers that the truths held by 
us as most certain are the result of experience. Others 
contend that such first principles as the axioms of 
mathematics are not only true, but necessarily true; we 
not only do believe them, but we must believe them. 
Such necessity, it is argued, cannot come from mere 
experience, and therefore implies an innate or intuitive 
source. Hence the theory of necessary truth is only 
another name for the theory of intuitive truth." This 
necessity, as characteristic of certain truths, may be 
grounded in the impossibility of conceiving them 
not to be true. Thus Dr. Whewell, in his Philosophy 
of the Inductive Sciences (i, 54, 55), teaches that necessary 
truths are those in which we not only learn that the 
proposition is true, but see that it must be true; in 
which the negation of the truth is not only false, but 
impossible. That these truths are necessary it cannot 
be doubted. We may take, for example, all relations of 
number. We cannot, by any freak of thought, imagine 
two and two to make seven. John Stuart Mill, in his 
System of Logic, argues against the theory of neces-
sary truths, especially that the common mathematical 
axioms are such truths. Dr. Thomas has made his 
argument for the existence of God, reasons from a be-
lief in the existence of the Divine Being being necessary 
in this sense. "So," says Edwards, "the eternal exist-
ence of being, generally considered, is necessary in it-
self, because it would be in itself the greatest absurdity to deny the existence of being in general, or to say there was absolute and universal nothing" (Works, i, 11). This idea is supported by the statement that in connection with intuitive, or a priori truths, the truth of a statement is sometimes said to be necessary by reason of its being implied in another. "Thus if we say that all the apocryphal books are not only books of Christ, but also books of Moses, this is not because the authority of Christ is greater than that of Moses, but because the former is true, the latter is false." (II, p. 155.)

3. Moral necessity has reference to the volitions and actions of rational agents, and is intended to express the connection between these volitions and actions and certain moral causes, as inclinations, desires, or motives generally. Whether there be any connection which, strictly speaking, may be termed necessary between such motives and the volitions and actions of men, or whether independent of them, the will has a self-determining power, is an inquiry which has always largely engaged the attention of both philosophers and theologians. See Will. The term which stands opposed to necessity in the Aristotelian and metaphysical literature of the subject is liberty, or freedom. See Liberty.

The consciousness of mankind in general, the Christian consciousness especially, has always asserted the fact of freedom, even in connection often with theories that have been called theories of necessity. The freedom of the will was strongly and almost universally affirmed, with little or no qualification or psychological analysis, as the doctrine of the Church during the ante-Nicene period. "All the Greek fathers, as well as the apologists Justin Martyr, Tatian, and Athanasius, and also the theologians of the Alexandrian school, Clement and Origen, exalt the autonomy, self-determination (συνέστησις) of the human soul with the freshness of youth and a tincture of Hellenistic idealism, but also influenced by a practical Christian interest" (Hagenbach, Hist. of Doc. i, 155). With this the Platonistic and Aristotelian philosophy was in harmony. Its ethics presupposes freedom in which the so-called necessity appears in the early history of philosophy, and in the popular sentiment of the first Christian centuries, are those of materialism and fatalism.

II. Historical Development of the Necessitarian Idea. — 1. In the early Greek philosophy we find all things—the concepts and objects—to a materialistic necessity, of which the concepts and objects, or the materialistic philosophy of the present day are in some measure a reproduction. Heraclitus (about B.C. 500) "assumes as the substanceal principle of things eternal fire," identifies it with the Divine Spirit, the ζύγον, or the eternal all-embracing order, which is according to him immanent, as the universal principle of the constant flux of all things. Democritus, with his theory of atoms, according to which "the soul consists of fire, smooth and round atoms, which are also atoms of fire," held that the motion or rest of the atoms is not due to "an all-ruiling Mind," but to natural necessity. The Stoics reproduced the doctrine of Heraclitus, affirming matter and force as two ultimate principles, that the working force in the universe is God, "that the rise and decay of the world are controlled by an absolute necessity; this necessity is at once fate (σχολήναι) and the providence (προοίμιον) which governs all things. In the human soul, which is a part of the Deity, or an emanation from the same, is a governing force (τὸ γύρομαυντον), to which belong representation, desires, and understanding." As the attention of these philosophers was directed mainly to the universe of nature instead of man, making their philosophy cosmological rather than anthropological, they seem not to have attempted any special explanation of the phenomena of volition, or any logically rigorous application of their doctrines of necessity to the working of the latter from necessity in connection with intuitive, or a priori truths, the truth of a statement is sometimes said to be necessary by reason of its being implied in another. "Thus if we say that all the apocryphal books are Jews, it follows necessarily that Peter was a Jew." Here is involved the general assumption, that intuitive reasoning is that which is true of a whole class is true of each individual, which axiom may be itself an intuitive or necessary truth. But each particular proposition or conclusion from premises is necessary, because it is implied in the premises, or because "to withhold assent from it would be to violate the above axiom." This is more strictly, logical necessity.

In the more special and systematic treatment of Christian doctrines following the Council of Nice, the theologians undertook to harmonize the doctrines of the freedom of the will and divine predetermination and foreknowledge. The heathen philosophy already noticed, in attempting to be theological, had so conceived of the Divine Being in relation to the world as to bring both men and things under a necessity, physical or fatalistic. Christianitv, much more decidedly theological, now unfolded a philosophical and theological conception of God and man, and the relation of the two. In the controversy on the freedom of the will between Augustine and the Pelagians, the point of dispute was the relation of the will in its activity to the grace of God. Freedom was affirmed on both sides, each asserting that its own was the true idea of freedom. The differences consist in the manner and manner of influence upon the soul ascribed to divine grace. The views of Augustine are historically of much importance in the presentation of this subject, as they have formed the basis of the Calvinistic view in modern times. "This general view has been designated a theory of necessity, though its adherents object to the term as ambiguous and misleading. Augustine looked upon grace as the active principle of life, generating as an abiding good that freedom of the will which is entirely lost in the natural man." Pelagius admitted that man stands in need of divine aid; "but he supposed this grace of God to be something external, and sufficient to make the effect for both his will and power." He had the conception of a life unfolding itself; he only recognises the mechanical concatenation of single acts. Augustine "recognises in the grace of God an inspiration of love (inspiratio dilectionis), and considers this the source of everything. It was not the view of Augustine that man could not exist without grace or without the grace of God, or without the grace of God he could not act; grace is working only in the sphere of freedom." (Hagenbach, Hist. of Doc. i, 301, 302.) In accordance with the idea and definition of the will and its freedom, which distinguishes the Latin from the Greek anthropologists (comp. Shed., Hist. of Doc. i, 61), Augustine's idea of freedom is self-determination, as distinguished from indetermination. In his view the activity of the will proceeds purely from within the man himself, and this is freedom. In all the conditions in which he contemplates man—namely, as unfallen, as fallen, and as renewed—there is self-determination, that is, the "human will is self-determined towards a proposed end by its own self-motion." The will is free in evil, even when by virtue of the moral condition of the man it can will nothing else but evil, because it delights in evil. Hence in the will of Adam, as created, there was an inclination to holiness, but at the same time, united with it, the possibility of sinning (posibilitas peccandi). In the fallen Adam, the activity of the will is inclination to sin, "the unfree, free, self-originating, self-moving energy of the creature." It is freedom in sin, but at the same time a necessity or certainty of sinning. In the renewed, or in those whom
NECESSITY

there is any holy activity, the motion or determination of the will from the very beginning is conditioned upon natural necessity. This is the true freedom, and its highest development consists in the non posses pecurrir, the fellez necessita boni. This grace Augustine designates as irresistible, in that the agent wills what he acted upon voluntarily or by compulsion, but that the divine grace is able to overcome the utmost obstinacy of the human spirit" (Shedd, Hist. of Doct., I, 78). Augustine's idea and explanation of the activity of the will are from the theological point of view rather than the psychological.

In the scholastic period, as two representatives of its views, we may mention Thomas Aquinas on the one hand, and Duns Scotus on the other. Aquinas held that "the will depends upon the understanding; that which appears good is necessarily sought after; but necessity arising from internal causes, and reposing on knowledge, is freedom." The will is not subject to the necessity of compulsion, but to that necessity which does not destroy freedom—the necessity of striving after ends. Duns Scotus maintained, on the contrary, that "the human will is not determined by the understanding, but has power to choose with no determining grace."

In the German mysticism, which grew up in the 13th and 14th centuries out of scholasticism, the will was treated as subordinate to the knowing faculty, and extreme emphasis was laid on the presence in the divine nature of the element of natural necessity. "True union with God takes place in cognition; knowledge, which is God's action in man, is the foundation of all essence, the ground of love, the determining power of the will."

3. With the decline of scholasticism, and the rise of the spirit of the Reformation, the views of the phenomena of volition are modified by the fact that philosophy becomes more independent of the current theology in its interpretation of the universe of nature and mind. But in their views and methods they largely influence each other. Des Cartes emphasized human freedom; but, as according to his theory the will has no power of itself over the body, his disciples, as Malebranche, introduced the doctrine of Occasionalism—that God by his direct agency moves the body in accordance with our will. Spinoza, developing and transforming the Cartesian dualism into a pantheism, making God the immanent cause of the totality of finite things, holds that God works according to the inner necessity of his nature, and that he produces, not through free will, all finite effects only indirectly through finite causes; that there is no such thing as human freedom independent of causality, but that all events, including all acts of volition, are determined by God, through finite causes, and not immediately. In the seventh definition of his Ethics he defines freedom and necessity as follows: "That thing is called free which exists by the sole necessity of its nature, and the determining cause of whose activity is in itself alone. But that is called necessary, or rather constrained, which owes its existence to another, and whose activity is the result of fixed and determined causes." Spinoza's idea of free agency differs but little from that of Augustine, as being self-determination; and he "rightly seeks for the proper opposite of freedom, not in necessity taken generally, but in a distinct kind of necessity, namely, constraint, which is to be defined as necessity having its source, not in the nature of the agent, but in another necessary condition which is foreign to that nature (whether in the internal or external world), and overruling the endeavors to which that nature itself gives rise" (Ueberweg, Hist. of Phil., II, 68). Leibnitz, whose philosophy, like that of Des Cartes and Spinoza, was fundamentally theistic, maintained the power of the human will is not as an exemption from law, but as the power of determining for one's self according to known law, belongs to the essence of the human spirit," but in place of the natural necessity, the bare necessity of the divine hidden way ("interna et oculata, mirabilis ac ineffabilis potestate") to produce voluntary action in holiness. This is the true freedom, and its highest development consists in the non posses pecurrir, the fellez necessita boni. This grace Augustine designates as irresistible, in that the agent wills what he acted upon voluntarily or by compulsion, but that the divine grace is able to overcome the utmost obstinacy of the human spirit" (Shedd, Hist. of Doct., I, 78). Augustine's idea and explanation of the activity of the will are from the theological point of view rather than the psychological.

In the scholastic period, as two representatives of its views, we may mention Thomas Aquinas on the one hand, and Duns Scotus on the other. Aquinas held that "the will depends upon the understanding; that which appears good is necessarily sought after; but necessity arising from internal causes, and reposing on knowledge, is freedom." The will is not subject to the necessity of compulsion, but to that necessity which does not destroy freedom—the necessity of striving after ends. Duns Scotus maintained, on the contrary, that "the human will is not determined by the understanding, but has power to choose with no determining grace."

In the German mysticism, which grew up in the 13th and 14th centuries out of scholasticism, the will was treated as subordinate to the knowing faculty, and extreme emphasis was laid on the presence in the divine nature of the element of natural necessity. "True union with God takes place in cognition; knowledge, which is God's action in man, is the foundation of all essence, the ground of love, the determining power of the will."

3. With the decline of scholasticism, and the rise of the spirit of the Reformation, the views of the phenomena of volition are modified by the fact that philosophy becomes more independent of the current theology in its interpretation of the universe of nature and mind. But in their views and methods they largely influence each other. Des Cartes emphasized human freedom; but, as according to his theory the will has no power of itself over the body, his disciples, as Malebranche, introduced the doctrine of Occasionalism—that God by his direct agency moves the body in accordance with our will. Spinoza, developing and transforming the Cartesian dualism into a pantheism, making God the immanent cause of the totality of finite things, holds that God works according to the inner necessity of his nature, and that he produces, not through free will, all finite effects only indirectly through finite causes; that there is no such thing as human freedom independent of causality, but that all events, including all acts of volition, are determined by God, through finite causes, and not immediately. In the seventh definition of his Ethics he defines freedom and necessity as follows: "That thing is called free which exists by the sole necessity of its nature, and the determining cause of whose activity is in itself alone. But that is called necessary, or rather constrained, which owes its existence to another, and whose activity is the result of fixed and determined causes." Spinoza's idea of free agency differs but little from that of Augustine, as being self-determination; and he "rightly seeks for the proper opposite of freedom, not in necessity taken generally, but in a distinct kind of necessity, namely, constraint, which is to be defined as necessity having its source, not in the nature of the agent, but in another necessary condition which is foreign to that nature (whether in the internal or external world), and overruling the endeavors to which that nature itself gives rise" (Ueberweg, Hist. of Phil., II, 68). Leibnitz, whose philosophy, like that of Des Cartes and Spinoza, was fundamentally theistic, maintained the power of the human will is not as an exemption from law, but as the power of determining for one's self according to known law, belongs to the essence of the human spirit," but in place of the natural necessity, the bare necessity of the divine hidden way ("interna et oculata, mirabilis ac ineffabilis potestate") to produce voluntary action in holiness. This is the true freedom, and its highest development consists in the non posses pecurrir, the fellez necessita boni. This grace Augustine designates as irresistible, in that the agent wills what he acted upon voluntarily or by compulsion, but that the divine grace is able to overcome the utmost obstinacy of the human spirit" (Shedd, Hist. of Doct., I, 78). Augustine's idea and explanation of the activity of the will are from the theological point of view rather than the psychological.
NECESSITY

or in accordance with, reasons, motives, principles, desires, feelings, judgments, or, in general, certain prevelous conditions.

In England as on the Continent the impulse accompanying the Reformation occasioned a freer and more prolific discussion of the freedom of the will among other theological and philosophical topics. In the empirical method of Bacon, and its decided direction of the attention of the Age, we have the foundation of the tendency of which was to reduce the phenomena of volition to some law either analogous to the law of cause and effect observed in physical phenomena, or identical with it, and a part of it, giving a physical or materialistic necessity. Hobbes plainly declares that the activity of the will is from necessary causes, and that we are deprived of the necessity from anything physical cause. See Liberty. Locke, in the first edition of his Essay, asserts the necessitarianism of Hobbes. "In later editions a power to suspend the determinations of the will is accorded." "That which immediately determines the will from time to time," he says, "to every voluntary act is the unceasing of desire, fixed on some absent good." In 1715 appeared Anthony Collins's argument for necessity. He states his view thus: "First, though I deny liberty in a certain meaning of the word, yet I contend for liberty as it signifies a power in man to do as he wills or pleases. Secondly, when I affirm necessity, I mean not only necessary consequences from the laws of nature, but by that man, who is an intelligent and sensible being, is determined by his reason and his senses; and I deny man to be subject to such necessity as is in clocks, watches, and such other things, which for want of sensation and intelligence are subject to an absolute physical or mechanical necessity." Dr. Samuel Clarke replied to Collins, affirming "that all proper action of the soul is ipso facto free action; that the laws which determine the judgment of the understanding next preceding any activity are diverse from those which pertain to the production of the action itself." Hartley followed. In his theory of the will, modifying it, however, by his peculiar doctrine of medullary vibrations, and the action of the soul dependent upon them by association. He thus in a measure anticipated the physiological and associationist psychology of James Mill, John Stuart Mill, Bain, and Herbert Spencer. The necessitarians found their most effective champion in Priestley, who took up the materialistic theories and deduced from them their logical consequence, which he called a "philosophical" necessity. According to John Stuart Mill, "the law of causality applies in the same strict sense to human actions as to other phenomena," while his opponents, he says, "the doctrine of Philosophical Necessity is simply that the things which are present to an individual's mind, and given likewise the character and disposition of the individual, the manner in which he will act may be unerringly inferred." (System of Logic, ii, 405, 406). He allows at the same time a power in the mind to co-operate in the formation of its own character, and complains of the application of the term necessity to the doctrine of cause and effect in human character as improper. But causation with him means "nothing but invariably, certain, and unconditional sequence," with no "mysterious constraint or compulsion" in the cause over the effect. Alexander Bain considers the will as "a collective term for all the impulses to motion or action. It is absurd to ask whether such a power is free." Dr. Reid (1710-1796), in opposition to the various forms of necessity, denies that every action is performed with some view or from some motive. Dugald Stewart, however, conceives of human actions in a broad sense, but maintains that "liberty as opposed to necessity means that the connection between motives and actions is not a necessary connection like that between cause and effect." "The question," he says, "is not concerning the influence of motives, but concerning the nature of that influence. This is most truly the pivotal point of the whole controversy. For the opinions of Hamilton and Mansel, see Liberty."

I. In this country a fresh theological importance was given to this subject by Jonathan Edwards, who based his theory of voluntary action on the doctrine of moral necessity, taking pains to distinguish it from natural or physical necessity. See Liberty. His treatise was directed against the doctrine of the self-determining soul, the power of personal freedom, and endeavoring to prove at the same time that this necessity was not inconsistent with liberty. This moral necessity he defines as "that necessity of connection and consequence which arises from such moral causes as the strength of inclinations or motives, and the connection of them in the mind, which fixes the mind upon certain volitions and actions" (Works, i, 18). One great purpose in his work was to reply to the objection that the Calvinistic notions of God's moral government are contrary to the common-sense of mankind. Freedom, as involving the self-determining power of the Arminians, he argued, would involve contingency and the absence of certainty. This would exclude foreknowledge. The views of Edwards have been modified, and controverted even, by Calvinistic theologians. The term moral necessity is still used to characterize the theories of those who affirm that the will is determined or determines itself under the influence of motives, as distinguished from the theories of those who affirm "the power to the contrary," or "the power or immunity to put forth in the same circumstances either of several volitions," or such an independence of motives as to make the action of the agent contingent and uncertain, and not necessarily or necessarily determined by them. It is applied also to the theories of those who hold to Augustinian and Calvinistic views of the operation of divine grace upon the will. In general they object, and it is acknowledged with justice in some respects, to the term necessity as confusing, and in its associations implying ideas which they disown, since they assert the freedom of the will as the condition of moral obligation and moral divine government. Some, as Dr. Hodge, propose and use the term certainty, as distinguished from necessity on the one hand and contingency on the other. Dr. Hodge teaches that freedom consists in the fact that a man's volitions are truly and properly his own, determined by nothing out of himself, but proceeding from his own views, feelings, will, and utmost dispositions, so that they are the real, intelligent, and conscious expression of his character, or of what is in his mind. "We hold," says Dr. McCosh, "that the principle of cause and effect reigns in mind as in matter. But there is an important difference between the manner in which the same kind of universal necessity works in the human spirit. In all proper mental operations the causes and the effects lie both within the mind. Mind is self-acting. We hold that the true determining cause of every given volition is not any mere anterior incitement, but the very soul itself by its inherent power of will."

III. Objections to this Theory.—The anti-necessitarians notwithstanding allege that the doctrine of necessity, in the light of the various interpretations of Calvinistic theologians, "charges God as the author of sin; that it takes away the freedom of the will; renders man unaccountable to his Maker; makes sin to be no evil, by diminishing the moral or virtue of sin to be good; and that it precludes the use of means, and is of the most gloomy tendency. The necessitarians, on the other hand, deny these to be legitimate consequences of their doctrine, which they declare to be the most consistent mode of explaining the divine will and action, and that they preclude acts no more immorally in deceiving vicious actions than in permitting all those irregularities which he could so easily have prevented. All necessity, say they, does not take away freedom. "The actions of a man may be at one and the same time both free and necessary. Thus it was infallibly certain that Judas would
NECESSITY

NECHAM

betrays Christ, yet he did it voluntarily; Jesus Christ necessarily became a man, and died, yet he acted freely. A good man does naturally and necessarily love his children, yet voluntarily. They insist that necessity does not render actions less morally good; for, if necessary, an act cannot be morally bad. It only follows that God himself is not a moral being, because he is a necessary one [i.e. necessarily such; rather by nature]; and the obedience of Christ cannot be good, because it was necessary?]. Further, say they, necessity does not preclude the use of means; for means are so less appointed than the end. It was damned that Christ should be delivered up to death; but he could not have been betrayed without a betrayer, nor crucified without crucifiers. That it is not a gloomy doctrine, they allege, because nothing can be more consolatory than to believe that all things are under the direction of an all-wise Being, that his kingdom ruleth over all, and that he doeth all things well. They also urge that to deny necessity is to deny the foreknowledge of God, and to wrest the sceptre from the hand of the Creator, and to place that capricious and undeniable principle, the self-determining power of man, upon the throne of the universe. In those statements there is obviously only a desire to perpetuate the use of actions perhaps under necessity by the divine decrees. Activity and self-determining powers are the foundation of all morality; and to prove that such powers belong to man, it is urged that we ourselves are conscious of possessing them. We blame and commend ourselves when we do amiss; but guilt, and in particular, praise is not merely a reflection of the act itself, but on the product of free will, and of our feelings which are inconsistent with the scheme of necessity. It is also agreed that some actions deserve praise, and afford an inward satisfaction; but for this there would be no foundation, if we were invincibly determined in every volition: so that approbation and blame are consequent on free actions only. Nor is the matter at all relieved by bringing in a chain of circumstances as motives necessarily to determine the will. This comes to the same result in sound argument as if there was an immediate co-action of omnipotent power compelling one kind of volitions only; which is utterly irreconcilable to all just notions of the nature and operations of will, and to all accountability. Necessity, in the sense of irresistible control, and the doctrine of Scripture, cannot co-exist.”

IV. Roman Catholic theologians recognize also two kinds of necessity, namely, a necessity of means and a necessity of precept. Baptism they consider as a necessity of means, or absolute necessity, because it is the only means of salvation instituted by Christ; so that no one can be saved who has not been baptized, whether it be by his own fault or not. Communion is only a necessity of precept. If a man voluntarily refuses to participate in the Lord’s Supper, he is deserving of condemnation; but if he was only involuntarily deprived of participating in it, he is not guilty.

Necham, Neckham, or Nequam, Alexander, an English monk, noted as a university scholar, a proponent in the whole of the orthodox science, including law, medicine, and theology, was born at St. Albans in 1157; lived and studied at Paris, and after his return to his native country was made abbot of Cirencester, and
died in 1217. He is the author of a great variety of works remaining in MS. But the most important of all his productions, including many theological and philosophical works, is his De Natura Rerum, which is believed to have been written during his lifetime. It is considered one of the greatest works of the 12th century. It has recently been edited and published by the noted English antiquarian, Thomas Wright, who has written much about Necham in the Biogr. Brit. Lit. (Anglo-Norman Period), p. 449-50. The De Natura Rerum (Lond. 1883) aims to interest the student of nature in the Antiquity of the Universe. It is iconoclastic in tendency, and rejects the aid of art in religious ceremonies. See, besides Wright, Biogr. Brit. Lit., Piper, Einleitung in die Monumentale Theologie, p. 557-59; Cave, Historia Literaria, s. v.

Necho (Heb. Ne'ko, נֵכֹה, an Egyptian name; Sept. and Josephus, Νεξάου; fully נְכַּוֵּד, Prashkov-Necho, 2 Kings xxiii, 29, 38, 34, 35, etc.; once Heb. נֶכֶה, Nechoh, Jer. xvi, 2; Herodotus, Nexos; on the twofold appellation of this king on the monuments, see Rosellini, Monum. Stor. ii, 181 sq., tab. 9), an Egyptian king, son and successor (according to Herodotus, ii, 158) of Psammetichus, and contemporary of the Jewish king Josiah (B.C. 609). The wars and successes of Pharaoh-Necho in Syria are recorded by sacred as well as profane writers. According to Herodotus (iii, 596), the king was in the twenty-sixth dynasty, successor of Psammetichus, and as there had been another of the same name, he was properly Necho the Second. The period of his reign was, according to Manetho, six, according to Diodorus, nine years, according to Herodotus (iii, 596). See Larcher, Ad Herod. ii, 158 sq.; iv, 45; Diod. i, 83, and Wess. ad loc.; Strabo, i, 56; Heeren, African Nat. ii, 374, 389; Bunsen, Ägyptens Stelle in der Welt-Geschichte, iii, 141 sq. Nechunjah Ben-Ha-Kannah, a famous rabbin at Jannin, who, like his contemporary Nahum of Ginos (qq. v.), had a method of his own, was a disciple of Hillel (q. v.), and a contemporary and equal colleague of Jochanan ben-Zachai (q. v.). Nechunjah strictly adhered to his teacher's method of Biblical interpretation, and decidedly opposed Nahum's additional rule of "extension and restriction." He was of a mild and compliant character, and is said to have chiefly occupied himself with rabbinic theology. So much was this the case, that later tradition ascribed the composition of the oldest cabalistic works to him or to his father, viz., the books Bahir (בahir, "from the mouth") and Pehnah (פֶּהֶנָּה, "mouth of the river"), which, however, belong to a later time. Like his colleague, Jochanan ben-Zachai, Nechunjah reached a good old age. Himself a living protest against the supposed worldliness of some of his contemporaries, he recorded with indignation that "every one who takes to himself the yoke of the law is set free from the yoke of the kingdom and the yoke of conformity to the world; but to every one who discards the yoke of the law shall be given the yoke of the kingdom and the yoke of the fashions of this world" (Abath, iii, 5). It is interesting to note that he himself, in answer to a request of his disciple on the subject, wrote short prayers both when entering the college and again when leaving it. He assigned the following reasons for this unusual practice: "When I entered," he said, "I pray that I may not be the occasion of error; and when I leave I bless the Lord for my calling" (Barenfiscy, iv, 19). He himself, in answer to a request of his disciple on the subject, wrote short prayers both when entering the college and again when leaving it. He assigned the following reasons for this unusual practice: "When I entered," he said, "I pray that I may not be the occasion of error; and when I leave I bless the Lord for my calling" (Barenfiscy, iv, 19). He himself, in answer to a request of his disciple on the subject, wrote short prayers both when entering the college and again when leaving it. He assigned the following reasons for this unusual practice: "When I entered," he said, "I pray that I may not be the occasion of error; and when I leave I bless the Lord for my calling" (Barenfiscy, iv, 19).
Neck (usually נֶפֶךְ, o'peh, as Gen. xlix, 8; Lev. v, 8; often נֶפֶךְ, te'rach', as Gen. xxvii, 16; and same in Chald., as Dan. vii, 7; once the plur. cognate נֶפֶךְ, Cant. iv, 9; also נְפֵךְ, gar'ôn', prop. throat, Isa. iii, 16; or the plur. cognate נְפֵךְ, Prov. iii, 22; once נֶפֶךְ, mor-photh, 1 Sam. iv, 18; Gr. ραχὺν), a part of the human frame used by the sacred writers with considerable variety and freedom in figurative expressions, though seldom in such a way as to occasion difficulty to a modern reader. With reference to the graceful ornament which a fine neck gives, especially to the female form, it is said of the spouse in the Canticles, "Thy neck is like the tower of David, built for an armory" (iv, 4); or, as it is again, "like a tower of ivory" (vii, 4). The neck, however, being that part of the body through which in man, and still more in the lower animals, the life is frequently destroyed, it is sometimes taken as the representative of the animal life; hence "to lay down the neck" (Rom. xvi, 4) is a strong expression for hazarding one's life; to "give one the necks of one's enemies" (2 Sam. xxix, 41) was to surrender their life into his hands; also "to reach even to the neck," or "to the midst of the neck" (Isa. viii, 8; xxx, 28), was to approach the point of overwhelming destruction, which, in Hab. iii, 13, takes the peculiar form of "discovering the foundation to the neck."—the illusion in the last passage being to the foundation of a house, which is like the neck upon which the head rests. But by much the most common reference was to beasts of burden, which bore upon their neck the yoke whereby they did service, and as such were viewed as emblems of men in their relation either to a good or a bad, to a true or a false service. Christ invites all to "take up his yoke" (upon their neck understood), in other words, to yield themselves obediently to his authority (Matt. xi, 29); and a stiff or hardened neck is a familiar expression for an unpliant, rebellious spirit. In the contrary direction, many passages in the propheta convoy threatenings of coming judgment by the hands of enemies under the form of laying bands or yokes upon the people's necks (Deut. xxviii, 48; Isa. x, 27; Jer. xvii, 2). Hence putting the feet on the neck is a usual expres-

Ancient Egyptian treading the Conquered under Feet.

sion in the East for triumphing over a fallen foe. In the numerous battle-scenes depicted on the monuments of ancient Egypt and Assyria, we see the monarchs frequently represented treading on the necks of their enemies; and a similar practice obtained among the Hebrews. When Joshua had conquered the five kings, he "said unto the captains of the men of war which went with him, Come near, put your feet upon the necks of these kings. And they came near, and put their feet upon the necks of them" (Josh. x, 24; comp. 2 Sam. xxii, 41). In India, when people are disputing, should one be a little pressed, and the other begin to triumph, the former will say, "I will tread upon thy neck, and after that beat thee." A low caste man insulting one who is high is sure to hear some one say to the offended individual, "Put your feet on his neck." Nor was this custom peculiar to the East: Quintus Curtius, relating the particulars of a single combat between Dioxippus, an Athenian, and Horratus, a Macedonian, says that, in the end, the former, closing with the latter, struck up his heels, and threw him with great violence on the ground; then after taking his sword from him, he set his foot upon his neck, and was about to dash out his brains, when the king (Alexander) interposed his authority to prevent him. See Triumph.

Necker, Jacques, an eminent financier and religious statesman, father of the noted French female writer, Madame de Staël, was born of distinguished parentage Sept. 30, 1732. He was sent to Paris in his youth, and was employed in the house of Thellusson, the great bank-er, who, after a time, took him into partnership. Necker realized a very large fortune, and retired from business at forty years of age. He now began to aspire to official situations, and wrote several works on financial affairs, which made him favorably known. One of these works, a memoir upon the French finances, suggesting the means of making up the deficiency, in the revenue, and forwarded to the minister Maurepas, the president of the council of finances, so delighted this French statesman that he obtained for the author, from Louis XVI, after some hesitation, as Necker was an alien and a Protestant, the appointment of director of the treasury in 1776. Necker was appointed director-general of finances in June, 1777, but without a seat in the council; being aversive to imposing new taxes, he endeavored to make up the national income by economy and loans. In 1781 he published his Compte Rendu, which disclosed for the first time the state of the revenue and expenditure of France, and made him numerous enemies, and he resigned in May, 1781. He withdrew to Switzerland, where he purchased an estate at Copet, on the banks of the Leman Lake, and there he wrote his work Sur l'Administration des Finances, 1784. In 1787 Necker returned to Paris, where he wrote against Calonne, who had just been dismissed from his office of comptroller-general of the finances, and he was in consequence banished from the capital, but was soon after recalled. In the following year (August, 1788), on the resignation of Brienne, and at the suggestion of that minister, Louis XVI appointed Necker director-general of finances, as the only man capable of restoring order
NECKER

in the administration. The king had already promised the convocation of the states-general, and Necker urged him to keep his promise. But he failed as a statesman in not arranging beforehand a plan for the sittings of those states, so as to prevent the collision that took place on their first meeting. In fact Necker was a financier, but not a statesman; he was a philosopher and a man of letters, but not a jurist or a legislator, and he was thus considered by a man well qualified to judge of these matters. His second ministry was short. Unable to check or direct the popular storm, and not enjoying the confidence of the court, Necker, unwilling to become the reproach of the agitators, quit his place and the kingdom. On the 11th of July, 1789, he set off for Switzerland. After the taking of the Bastille, the National Assembly demanded the recall of Necker, and Louis complied. Necker was received in triumph, but his popularity was short-lived. He did not go far enough to please the movement-men. In December of the following year, 1790, he gave in his resignation to the National Assembly, which received it with cool indifference. He spent the remainder of his life in Switzerland, in retirement and study, and wrote several political tracts. He had written, several years before, a work, De l' Importance des Opinions Religieuses (translated into English under the title Of the Importance of Religious Opinions [London, 1788, 8vo]). This work is eminently able and serviceable to Christianity. In 1800 he published his last and greatest work on the religious view of morality. This work is highly esteemed, and secured a prominent rank for Necker as a moralist. He died April 9, 1804. His works were collected and published by his accomplished daughter in 15 vols. 8vo (1821). See Madame de Staal, Vie privée de M. Jacques Necker (1804-1821); Lanjuinais, Études biograph. sur Antoine Arnauld, P. Nicole, et J. Necker (1823); Sainte-Beuve, Cœursiers du Lundi, vii, 329 sq.; Edinb. Rev. Jan. 1803; Engl. Cyclop. s. v.; Darling, Cyclop. Bibl., ii, 2166.

Necker, Made, née SUSANAH CURCHOD, a noted French philanthropist, was born in 1739, in the mountain village of Grassy, situated between the Pays de Vaud and Franche-Comté. Her father, a pastor of the Swiss Church, was a man of considerable talents; her mother was descended from an ancient family of Provence, who had fled to Switzerland on the revo-
cution of the Edict of Nantes. She was the wife of minister Necker, and she greatly distinguished herself during his terms of office in every possible form of benevolence. She erected a hospital in Paris with her own money, was a great reformer of prison abuses, and surrounded herself with the most distinguished men of the time, among them Buffon, Diderot, D'Alembert, who offered her the homage due to her great learning and her rare goodness of heart. She died in 1785, the year after publishing her Réflexions sur le Divorce (Lausanne, 1794, 8vo), an elaborate plea for the indissolubility of marriage. Her complete writings were published by her husband in 5 vols. 8vo (1788-1801). See Gibbon, Memoirs; Marmontel, Mémoires; Barrère de Vieuzac, Esprit de Madame Necker (Paris, 1808, 8vo).

Neckere, LEO DE, D.D., an American Roman Catho-
lic prelate who flourished in the first half of this cen-
tury, was born about the close of the last century, and after taking holy orders rose rapidly to the most dis-
tinguished offices in the gift of the Church. He was consecrated bishop of New Orleans in 1829, and died September 4, 1838.

Necklace is a word that does not occur in the A.V. of the Bible, but represents a piece of personal ornament anciently, as well as still very commonly, worn by both sexes in Oriental countries. It seems to be specially denoted in Heb. by תֶּבָּרִ, rab'bit (so called from binding the neck), a collar or ornamental "chain" for the neck (Gen. xii, 42; Ezek. xvi, 11). See CHAIN. Necklaces, we learn from the Scripture, were made sometimes of silver and gold, sometimes of a series of jewels, sometimes of coral (Exod. xxxix, 22; Numb. xxxii, 50). Three neck-
laces were commonly worn, one reaching lower than the other; from the one that was suspended to the waist there was hung a bottle of perfume, filled with amber and musk, called יֶבָּרֵי, ובערני naphesh, "boue of the soul" (Isa. iii, 20, margin). See Armaments. Among the ancient Egyptians handsome and richly ornamented necklaces were a principal part of the dress, both of men and women; and some idea may be formed of the number of jewels they wore, from those borrowed by the Israelites at the time of the Exodus, and by the paint-
ings of Thebes. They consisted of gold, or of beads of various qualities and shapes, disposed according to fancy, generally with a large drop or figure in the centre, Scarabei, gold, and carnelian bottles, or the emblems of Goodness and Stability, lotus flowers in enamel, ame-
thysts, pearls, false stones, imitations of fishes, frogs, lions, and various quadrupeds, birds, reptiles, flies, and other insects, shells and leaves, with numerous figures and devices, were strung in all the variety which their taste could suggest; and the museum of Leyden possesses an infinite assortment of those objects, which were once the pride of the ladies of Thebes. Some wore

Modern Egyptian Necklaces (each one half the real size).
simple gold chains in imitation of string, to which a stone scarabaeus, set in the same precious metal, was appended; but these probably belonged to men, like the torques of the Romans. A set of small cups, or covered saucers, of bronze gilt, hanging from a chain of the same materials, were sometimes worn by women, a necklace of which has been found belonging to a Theban lady—offering a striking contrast in their simplicity to the gold leaves inlaid with lapis lazuli, red and green stones, of another she wore, which served, with many more in her possession, to excite the admiration of her friends (Wilkinson, Anc. Egyptian, i, 339 sq.). The modern Egyptian ladies are equally fond of wearing necklaces, often of the richest description; the Arabic term for them is edd, and the Egyptians have a great variety; but almost all of them are similar in the following particulars: 1. The beads, etc., of which they are composed are altogether, not more than ten inches in length; so that they would not entirely encircle the neck if tied quite tight, which is never done: the string extends about six or seven inches beyond each extremity of the series of beads; and when the necklace is tied in the usual manner there is generally a space of three inches or more between these extremities; but the plaits of hair conceal these parts of the string. 2. There is generally, in the centre, one bead or other ornament (and sometimes there are three or five), and seven or seven, varying in size, form, material, or color from the others. The necklaces mostly worn by ladies are of diamonds or pearls. In the annexed engraving (p. 910), the first necklace is of diamonds set in gold. The second consists of several strings of pearls, with a pierced flattish emerald in the centre. Most of the pearl necklaces are of this description. The third is called dibeh. It is composed of hollow gold beads, with a bead of a different kind (sometimes of a precious stone, and sometimes of coral) in the centre. This and the following are seldom worn by any but females of the middle and lower orders. The fourth is called, from its peculiar form, askir (which signifies "barley"). It is composed of hollow gold. We give a side view (A) and a back view (B) of one of the appendages of this necklace. There is also a long kind of necklace, reaching to the girdle, and composed of diamonds or other precious stones, which is called kildah. Some women form a long necklace of this kind with Venetian sequins, or Turkish or Egyptian gold coins (Lane, Modern Egyptians, ii, 405). The Arab females of Palestine at the present day are especially given to wearing necklaces composed of strings of gold coin, which are their own property, and cannot be taken even for debt (Thomson, Land and Book, i, 186). See Ornament.

Necodan (Necodan, Vulg. Necodamus), given (1 Esdr. v, 37) as the name of the head of one of the Israelitish families who had lost their pedigree in Babylon; in place of the Nekoda (q. v.) of the Heb. text (Ezra ii, 60).

Necrodeipnon (Gr. νεκρός, dead, and δείπνον, a meal) was the name of a funeral feast among the an-
Necrology (from Gr. νεκρός, dead, and λόγος, discourse, or enumeration) is the name given in the Roman Catholic Church to a book or catalogue of ecclesiastics, abbots, and monasteries, wherein were registered the names of benefactors of such establishments, the time of their death, and the days of their commemoration; as also the deaths of the priors, abbots, religious canons, etc. This record was also called Calendar and Obituary. The name of Necrology was anciently given specially to what is now generally called Martyrology (q.v.).

When the diptychs fell into desuetude, necrologies, obituaries, books of the dead, books of annals or anniversaries, and books of life took their place as records in cathedrals and collegiate churches and ministers of the names of the deceased. The Benedicites adapted them at the beginning of the 6th century. When an abbot or distinguished monk died, a messenger, carrying a brief or roll, a kind of encyclical letter, rode to the various associated abbots or churches to apprise them of his death, and left a schedule containing his own name and that of the dead, and the day of his obit. The Benedicite was then presented in the several obituaries. These were read after the martyrology at prime, but in a monastery after the rule. The names were recited on their several anniversaries, and in the case of a benefactor the De profundis and a special prayer were sung. The abbots were commemorated by the words, "The deposition of lord abbots X." All others had the simple suffix "obit," i. e. he died. First were read out the names of abbots, then monks, provosts, preceptors, and in succession those of seculars, bishops, priests, sovereigns, and soldiers. Saints were also included; and for convenience a single volume generally comprised the monastic rule, the martyrology, and obituary. The names of benefactors were often recited; but sometimes only a general commemoration of all brethren and favorites or the order was made, followed by the words, "Requiescat in pace"—may he rest in peace—uttered by the president, and closed by an "amen" chanted by the whole chapter. Cowell says that at the prayer of the prothesis the Greeks had their names inscribed in the catalogue, and deposited a present in money, which formed a considerable portion of a country priest's income. See Walcott, Sacred Archaeology, p. 396, 397; Martigny, Dictionnaire des Anciêts Christiennes, p. 432, 433; Martineau, De Antiq. Monach. illustr. vol. i, pt. 1, ch. 2, sect. 3.

Necromancer (Hebr. נָשֵׁא אָדָם, one who inquires of the dead; Sept. ἁραπτόν τοῦ νεκροῦ). In many ancient nations there were jugglers who professed to be able by incantations to call up the dead from the under world, chiefly to consult them on the mysteries of the present or future. Already in Homer's time this practice is noticed (see Odys. xi, 24 sq.). The belief in such enchantments, notwithstanding the mockery of the better instructed few (Cicero, Tus. i, 16, 37), kept its ground among the common people in pagan lands down to the latest times (comp. Plin. xxx, 5 sq.; Herodian, iv, 12, 8; Dio Cass. lxvii, 15; Tertullian, Apol. xxii; De Anima, iv, 10). Particularly in Italy and North Africa were they commonly supposed to be, as it were, entrances to Orcus (μοναχόν την θανάσα), where, on invocation, the shades would actually appear; for example, at Lake Aormos in Epirus and Lake Avrenus in Lower Italy (Cicero, Tus. ut sup.; Heyne, Esch. ii. 24, vid. En. xvi. 24), and at Heraclea in the Propontis (Herc. rodr. v. 99, 7; Dion. Sic., lxxvii. 32; Plut. Dem. 90, 8; Flut. Cim. vi; Strabo, v. 244). The Eastern Magi were especially famed for necromantic skill (Herodian, ut sup.; comp. Strabo, xvii, 762). Necromancy (ἡμέρα; see Othonis Lex. Rubb. p. 171) had also found an entrance among the Israelites, especially when idolaters were on the throne (2 Kings xxii, 6; 2 Chron. xxxiii, 6; Is. viii. 19; xxix, 4, comp. xii, 9, where the Egyptian enchantments are mentioned). In the Law the consultation of these men was forbidden and a death sentence imposed (Lev. xix, 31), and they who disobeyed were threatened with death (Lev. xxx, 6; Deut. viii, 11). Saul, in his distress, caused the shade of Samuel to be summoned from Sheol by an enchantress (1 Sam. xxviii, 7 sq.; comp. J. C. Harnburg in Iren. Nor. Thesaur. i. 689 sq.; E. F. Schmer- sen, Not. Erld. Catalogus Gothicorum n. 7780; Hemert, Enz. des h. B. Sam. p. 88 sqq.; Ezeq. Handbuch. A. T. iv, 261 sqq.; Böttcher, De Inferis, i. 111 sq.). Dathe believed in the actual appearance of Samuel by a miracle (comp. Döderlein, TheoL. Biblioth. iii, 381), and the conception the people formed of this apparition, which was in some way altered by the poets and prophets, afforded a very natural basis for such superstitions. To the spirits thus evoked the enchanter lent a low, soft, almost whispering voice (Isa. viii, 19; comp. xii, 9), as seemed natural for such shades; just as the Greeks and Romans also applied the words πρόκειναι, πρόκειτο, (Hind, xxxiii, 101; Ovid, Met. vii, 374; Plut. Black, Si. 68; Strab. xiii, 365; Plin. H. N. xiv, 202; Stridere (Statius, Theb. vii, 770; Claudian, In Rufina, i, 126; Petronius, Sat. xxxii, 17; comp. Virgil, Æn. iii, 39 sq.) to the returning names. It is by no means proved that the necromancers practiced this muttering and whispering by ventriloquium, although the Septuagint usually renders the Hebrew נָשֵׁא by the Greek ἱπποφανομέαν (according to Galen, the ἱπποφανομέαν are so called because, speaking with the mouth closed, they seem to speak from the belly; comp. Josephus Ant. vi, 14, 2). The meaning of the word has been much discussed (see Theinios, On 1 Sam. xxxvii, 8; Knobel, Prophet. de Hebr. i, 241 sqq.; Böttcher, De Inferis, i. 101 sq.). Ventriloquism was certainly one of the arts of ancient jugglers (Aristoph. Fesp. 1619 sq.). See also Leo Allat. De Eugeniosvnoa, also in the Tractat. Bibl. des de Christi Sacri, vi, 381 sqq.; Dickinnson, Delph. Phaneris, p. 91 sqq.; Gesenius, Comment. on Matt. i, 005 sqq.; Van Dale, De Idolat. p. 608 sqq.; Millii Hesych. Schl. No. 12, also in Ugoilini Thesaurarii. xxiii; Tjeenk, in the Commentat. Societ. Scient. Vla. n. 44, 1797; Green, Greek Archaelog. i, 758; Heyne, Esch. i, ad Virg. Æn. vii). See also Dem. Sosevra. In most parts of Greece, necromancy was practiced by priests or consecrated persons in the temples; in Thessaly, it was the profession of a distinct class of persons called Psychagogoi ("Evolvers of Spirits"). The practice was in that manner connected with many horrid rites, in which human blood, half-burned portions of bodies from funeral piles, the immature fetus cut out of the womb, etc., were employed; sometimes human beings were slain, that their spirits might be consulted ere they finally passed into the lower world. The Christianity under Constantine caused necromancy to be placed under the ban of the Church. There are evident traces of necromancy in some of the older Norse and Teutonic poems. The mediæval belief in the evocation of spirits belongs rather to sorcery than to necromancy. See also Comm. Commentariorum de praecipuis diu- nitione divinarum rerum (Zerbst, 1591); N. A. Recess, xxv, 512. See Divination - Magic.

A species of necromancy, called Rochester knockings, from Rochester, N. Y., where it originated, and spiritualisations, from the ropes by which departed spirits are said to give their responses, has recently become very prevalent, and produced no small amount of fanaticism and infidelity. See Brit. Quar. Rev. Oct. 1875, art. vi. See also Mesmerism - Spiritualism.

Necropolis (νεκρόπολις, πόλις τοῦ νεκροῦ), a term applied to the cemeteries in the vicinity of ancient cities. It occurs in classical antiquity only as applied to a suburb.

Digitized by Google
of Alexandria, lying to the west of that city, having many gardens and places suitable for the reception of the dead. The corpses were received and embalmed in it. Here Cleopatra, the last of the Ptolemies, applied the poison to her breast, so that she was immediately con- jured triumph by Augustus. The site of the necropolis of ancient Alexandria seems to have been where are now the catacombs, consisting of galleries and tombs hollowed out of the soft calcareous stone of which the city is built, and lying at the extremity of the city. See Alexandria. The necropolis is now, how- ever, used in a much more extended sense, and applied to all the cemeteries of the ancient world. These con- sisted either of tombs constructed in the shape of houses and temples, and arranged in streets, like a city of the dead; or else of chambers hollowed in the rock, and ornamented with façades, to imitate houses and temples. Such cemeteries are to be distinguished from the colum- baria, or subterraneous chambers of the Romans, in which their urns were deposited; or the rows of tombs along the Via Appia; or the cemeteries of the Chris- tians, whose bodies were deposited in the ground. See Catacombs. The most remarkable necropoleis are at Thbes, in Egypt, situated in a place called Kerne, on the left bank of the Nile, capable of hold- ing three thousand persons, and which it is calculated must at least have contained five thousand mummies; those of El-Kab, or Elleithiya; of Beni-Hassan, of the Speos Artemidos; and of Madfouf, or Abydos; of Siwa, on the coast of Cyrene. In the time of the Roman necropolis of Cyrene is also extensive; and those of Vulci, Corneto, Tarquinii, and Capua are distinguished for their painted tombs [see Tomb], and the numerous vases and other objects of ancient art which have been exhumed from them. Large necropoleis have also been found in Lycia, Sicily, and elsewhere. See Strabo, xviii, p. 795-799; Plutarch, Vit. Anton.; Le- tronnes, Journal des Savans (1826), p. 108; Dennis, Cities and Cemeteries of Etruria, i, 412; ii, 276-358. See Cemeteries.

In this connection we may notice that consoling or inhab- ited graveyards, preferring the proximity and association of corpses with which they had no tie to the cheerfulness and comfort of home; and there is recorded one notorious case, in which a gentleman, although on bad terms with his family, carried his corpse back to his birthplace and told him through India, scandalizing the natives, and outraging the feelings of all, by placing the coffin under his bed. This hideous tendency may enter into certain developments of cannibalism, where the feast is celebrated in memory of a departed friend rather than in triumph of a family. Among the Arabs the ghouls are fairies that are supposed to feed on human flesh. Symptoms of this necrophilia may be traced in the Gidarene manias of the Gospels (Matt. vii, 28, etc.). See Daemoniac.

Necrothætæ (Gr. μηροφόροι, dead, and σέφυρα, to bury) is one of the names by which the ancient Greeks called the undertakers at funerals. Among the Romans they were called Libesinaris, from the goddess Libesina, who presided over funerals (Livy, vii, c. 19; Plutarch, Quæst. Romani).

Nectar was the drink of the immortal gods, according to the early Greek poets, and was served around to them by the hands of Hebe or Gymnede. It is con- founded by some of the ancient writers with ambrosia, the food of the gods. Thus Sappho and Alcam make nectar the food of the gods, and ambrosia their drink. The name was not, however, given by Homer, Hesiod, Pindar, and the Greek poets generally, and by the Romans, the beverage of the gods. Homer describes nectar as resembling red wine, and represents its continued use as causing immortality. By the later poets, nectar and ambrosia are represented as of most delicious odor; and sprinkling with nectar, or anointing with ambrosia, is spoken of as conferring perpetual youth, and these acts are assumed as the symbols of everything most delight- ful to the taste.

Nectarius is the name of a celebrated deaconess in the early Christian Church. She flourished in the lat- ter half of the 4th century, and was the cause of the deposition of her relative, the Bishop Eulippus, by that same bishop, as he had ordained her for an office of which she proved herself unworthy by breaches of confidence and perjury. See Sozomen, Historia Ecclesiastica, bk. iv, ch. 24.

Nectarius is the name of two patriarchs of the Eastern Church who figure prominently in ecclesiastical history.

1. The first, who is most widely known, was a native of Tarsus, and with the assistance of the emperor Theodos- ius became patriarch of Constantinople after the de- position of Gregory (q. v.) Nazianzen, and immediately before Chrysostom. Nectarius's occupancy of the episco- pal chair between two such men would have required extraordinary merit to make him conspicuous. But, in truth, though he does not seem to merit the epithet distinguished, he certainly does not deserve the imputation "the indolent Nect- uarius," the fact of his having been appointed at all is the most remarkable feature in his personal history. When Gregory Nazianzen (q. v.) resigned his office (A.D. 381), it was during the meeting of the second ecumenical council at Constantinople. Nectarius, a senator of the highest rank, was, in the time intending to visit his native place, and previously waited on Diodorus, the bishop of Tarsus, who was in Constantinople as a member of the council. Diodorus, along with the other bishops, was perplexed as to whom they should nominate to the vacant see. Struck by the majestic appearance of Nectarius, and taking for granted that he was a Christian and had been baptized, Diodorus requested Nectarius to postpone his departure, and recommended him to Flavius, bishop of Antioch, as a fit person to succeed Greg- ory. Flavius laughed at the strange proposal; but, to oblige his friend, put Nectarius's name last on the list, and together with the other bishops presented it to the em- peror. To the astonishment of all, Theodosius selected Nectarius, and persisted in his choice, even when it was ascertained that this candidate for episcopal "honor had not yet been baptized, and had never proposed publicly to the Church. The bishop, however, readily conformed to the wishes of the monarch who had so rigidly opposed the Arians, while the people, attracted probably by his gentle manners and the venerable appearance of the man, presenting as he did every way a strong contrast to Gregory, loudly applauded the choice. Nectarius was baptized, and, before he had time to put off the white robes of a neophyte, he was declared bishop of Constantinople. Most important matters came under the consideration of the council over which, it is prob- able, he was now called to preside. He showed his dis- creetion by putting himself under the tuition of Cyrilicus, bishop of Alexandria, but we can hardly believe that Nectarius took any active part in the theological question which was discussed. It is doubtful whether the canons that were enacted under the name of the second ecumenical council were not passed at two different sessions, a sec- ond taking place in 882. But this does not matter much, as they all bear the name of this council. The princip- al business transacted in the council, concerning in a theological point of view, related to the conforming and extending of the Nicene Creed, mainly to meet the opinions of the Macedonians. The creed thus enlarged is such as was used at the mass of the Roman Catholic Church. Other controversies on the line, the restriction of the authority of each bishop to his own diocese, and the restoration of penitent heretics. The most important article of all, however, historically considered, was one which was conceded not more on account of the natural propriety of the arrangement than the personal favor
which the emperor bore to Nectarius. It was decreed that as Constantineopolis was New Rome, the bishop should be next in dignity to the bishop of Rome, and hold the first place among the Eastern prelates. This, which at first was ignored by 385, was finally, in 393, the result of the powerful embroilment of Constantineopolis with Rome, and was pregnant with all those circumstances that have marked this important schism. Nectarius was the first who held the dignity of ex officio head of Eastern bishops as patriarch of Constantinople. These canons were signed during his 385, 393. The case of Theodosius in the extirpation of Arianism led to the summoning of a council (not ocumenical) at Constantinople in July, 388. There assembled the chiefs of all the sects. By the advice of Sisinnius, afterwards a Novatian bishop, given through Nectarius, the emperor encouraged his opponents into an approval of the writings of the early fathers. He then required of each sect a confession of its faith, which, having read and considered, he condemned them all, and followed up this condemnation by the most stringent laws, for the purpose of entirely rooting them out. As might have been expected, Nectarius was obnoxious to the Ariains; and we find that in 388, while the emperor Theodosius was absent in Italy opposing Maximus, a rumor that had falsely spread the death and death of the prince excited their hopes, and they broke out in riot, in the course of which they set fire to the house of Nectarius. The most important act of his office occurred in 390, when Nectarius, although his residence in Constantinople was not by the seduction of a woman of quality by a deacon, abolished the practice of confession which had been introduced into the Eastern Church—a penitential priest, who had fallen into sin after baptism, and was thus excused by the confession of one who had fallen into sin after baptism. As a result of this, the Church of the East, to which the Latin churches as a form of worship and Church government in the 20th century. To the third, by proving the alteration of the symbols in the Roman Church. Admitting the fourth, in principle, he was willing to remain an orthodox Christian; but if he, or his church, is to be regarded as the Church of Christ, there can be no other body, but naturally an aristocratic organization. He also wrote a work in Greek against the doctrines of Luther and Calvin, which he translated into Latin by Renanot, who published it, together with Gemmadi's Histories on the Eucharist, in 1870 or 1871. Nectarius' life has also been written a history of the Egyptian empire down to the fall of the Roman Empire. To the second, he replies by historical documents showing that, though identical in point of doctrine, the Greek and the Latin churches differed in their form of worship and Church government in the 20th century. To the third, he answers by proving the alteration of the symbols in the Roman Church. Admitting the fourth, in principle, he was willing to remain an orthodox Christian; but if he, or his church, is to be regarded as the Church of Christ, there can be no other body, but naturally an aristocratic organization. He also wrote a work in Greek against the doctrines of Luther and Calvin, which he translated into Latin by Renanot, who published it, together with Gemmadi's Histories on the Eucharist, in 1870 or 1871. Nectarius' life has also been written a history of the Egyptian empire down to the fall of the Roman Empire.

Necessia (necessia), a name for the ontings among the ancient Greeks and Romans on the anniversary of the day of the birth of a relative. According to some the Necessia were the same as the *Genesia.*

Nedarim. See Talmud.

Nedusia is a surname of Athene, derived from the river Nedon, on the banks of which she was worshipped. See Minerva.

Needham, John, an English dissenting minister who flourished in the first half of the last century, was for some years pastor of the Baptist Church at Hitchin, Suffolk, and afterwards removed to Bristol (in 1746), where he remained until 1787. He is of interest principally as the author of the pleasant harvest hymn, "To praise the ever-bounteous Lord," found in many of our best collections of hymns.

Needham, John Turberville, an English Roman Catholic divine, noted as a scientist, was born in London in 1718, and educated at the College of Douai. He afterwards removed to Brussels, where he died in 1781. Mr. Needham wrote observations inserted in Buffon's Natural History: Inquiries concerning Nature and Religion: De la nature, ou esprit général du système physique et métaphysique sur la génération, etc. See his life, by abbe Mann, in the memoirs of the Royal Academy of Sciences at Brussels; Lond. Monthly Review, vol. lix. London, Mathematical and Philos. Dic. v. v
NEEDLEWORK

Needle (Gr. ῥίφη, ῥήφης) occurs in the Bible only in the proverb “to pass through a needle’s eye” (ῥιφήμα) (Matt. xix, 24; Mark x, 25; Luke xviii, 25), for which see CAMI. Among the ancient Egyptians some needles were of bronze, from three to three and a half inches in length; but as few have been found, we are not able to form any opinion respecting their general size and quality, particularly of those used for fine work, which must have been of a very minute kind (Wilkinson, Anc. Eg., ii, 245). See NEEDLEWORK. The use of the needle as

to chosheb, or the “cunning workman,” who added the figures. But if “embroidery” be strictly confined to the work of the needle, we doubt whether it can be applied to either, for the simple addition of gold thread, or of a figure, does not involve the use of the needle. The patterns may have been worked into the stuff by the loom, as appears to have been the case in Egypt (Wilkinson, iii, 128; comp. Her. l.c.), where the Hebrews learned the art, and as is stated by Josephus (Antiq. i, 7, 2). The distinction, as given by the Talmudists, and which has been adopted by Gesenius (Thesaur. p. 1511) and Bähr (Symbolik, i, 256), is this, that rîmchû, or “needlework,” was where a pattern was attached to the stuff by being sewn to it on one side, and the work of the chosheb when the pattern was worked into the stuff by the loom, and so appeared on both sides. This view appears to be entirely inconsistent with the statements of the Bible, and with the sense of the word rîmchû elsewhere. The absence of the figure or the gold thread in the one, and its presence in the other, constitutes the essence of the distinction. In support of this view we call attention to the passages in which the expressions are contrasted. Rîmchû consisted of the following materials, “blue, purple, scarlet, and fine twined linen” (Exod. xxi, 20; xxvii, 18; xxxvi, 37; xxxviii, 18; xxxix, 28). The work of the chosheb was either “fine twined linen, blue, purple, and scarlet, with chenubim” (Exod. xxi, 1, 31; xxxvi, 8, 35), or “gold, blue, purple, scarlet, and fine twined linen” (xxviii, 6, 15; xxxix, 2, 5, 8). Again, looking at the general sense of the words, we shall find that chosheb involves the idea of invention, or designing patterns; rîmchû, the idea of texture as well as variegated color. The former is applied to other arts which demanded the exercise of inventive genius, as in the construction of engines of war (2 Chron. xxxii, 15); the latter is applied to other substances, the texture of which is remarkable, as the human body (Psa. cxxxix, 15). Further than this, rîmchû involves the idea of a regular disposition of colors, which demanded no inventive genius. Beyond the instances already adduced, it is applied to tessellated pavement (1 Chron. xxiii, 5), to the eagle’s plumage (Ezek. xvii, 9), and, in the Targums, to the leopard’s spotted skin (Jer. xiii, 23). In the same sense it is applied to the colored sails of the Egyptian vessels (Ezek. xxvii, 16), which were either checkered or worked according to a regularly recurring pattern (Wilkinson, iii, 221). Gesenius considers this passage as conclusive for his view of the distinction, but it is hardly conceivable that the patterns were on one side of the sail only, nor does there appear any ground to infer a departure from the usual custom of working the colors by the loom. The ancient versions do not contribute much to the elucidation of the point. The Sept. varies between ρηφημα καὶ σολομονικης, as representing rîmchû, and τουαλητης καὶ ψιφθατης for chosheb, combining the two terms in each case for the work itself—τοιαυτα του ραβδου για πρεσβυτος for the first, ψιγνων ψιφθατων τουατιτων for

Ancient Egyptian Needle. (In the Museum of Alnwick Castle.)

Ancient Egyptian Needle-Needles. 1, of wood; 2, head of another of bronze.

Needlework occurs in the Auth. Ver. twice (Judg. v, 30; Psa. xl, 14) as a translation of the Heb. נְפַף, rîmchû, properly variegated work (elsewhere “brodered work”); and also of the cognate סֶנֶשׁ, roken, (Exod. xxvi, 36; xxxvi, 16; xxxviii, 39; xxxvi, 37; xxxviii, 18), properly an embroilerer (as elsewhere rendered). In Exodus the embroiderer is contrasted with the “cunning workman,” chosheb (מעינ). And the consideration of one of these terms involves that of the other. Various explanations have been offered as to the distinction between them, but most of these overlook the distinction marked in the Bible itself, viz., that the roken wore simply a variegated texture, without gold thread or figures, and that the chosheb interwove gold thread or figures into the variegated texture. We conceive that the use of the gold thread was for delineating figures, as is implied in the description of the corselet of Amsais (Herod. iii, 47), and that the notices of gold thread in some instances and of figures in others were but different methods of describing the same thing. It follows, then, that the application of the term “embroiderer” to roken is false; if it belong to either it is

2

Ancient Egyptian Embroidered Dresses. (From Champlain, Monumenta de l'Egypte.)
pianist who mostly confined himself to the cultivation of ecclesiastical art, was born at Antwerp in 1570. He was a disciple of the elder Henry Steenwyck, whose manner he closely imitated. He painted views of churches and convents, especially interiors, preferring those in the Gothic style of architecture. He possessed a profound knowledge of perspectives, and placed his subjects, with all their rich ornaments and every architectural member, with strict truth, and yet without betraying the appearance of anxious labor. Every object is marked with minute precision, and finished with an exquisite touch and a light pencil. His bright, clear pictures, in which he avoided through his brown coloring sometimes observable in the works of his master Steenwyck, are the most esteemed. Being an indifferent designer of figures, he often got F. Francks, Van Thulden, Velvet Breughel, or Teniers to paint the figures; those of the last two being the most esteemed of the pictures of Neefs. He died in 1651. His son, Peter Martin (called the Young), painted in the same style, and chose the same subjects as his father, but was by no means equal to him.

Neely, Philip P., a minister of the Methodist Episcopal Church, South, was born in Rutherford County, Tenn., Sept. 9, 1819. He was converted in 1856, and in 1867 was appointed district superintendent and advanced to the position of a presiding elder. He was appointed junior preacher on Jackson Circuit, West Tennessee. On the division of the conference he became a member of the Memphis Conference, and was stationed at Holly Springs, Miss., in 1841. During the two years following he was stationed in Huntsville, Ala.; in 1844 he was appointed president of the Columbia Female Seminary; in 1846 travelled as agent of the Transylvania University. In 1846 he was transferred to the Alabama Conference, and labored in its boundaries until his death at Mobile, Ala., Nov. 9, 1868. See Min. Ann. Conf. M. E. Church, South, p. 233.

Neofius (Nyssius v. Nyssow), the Graecised form (Eucius, alxii. 10; 2 Mac. i. 18, 20, 21, 23, 31, 36; ii. 19) of the name of the painter of the pictures of Neefs. He died in 1651. His son, Peter Martin (called the Young), painted in the same style, and chose the same subjects as his father, but was by no means equal to him.

Neef or Neefs, James, a Flemish engraver who devoted himself mostly to sacred and secular art, was born at Antwerp, according to Nagler, about 1610. There are various dates assigned for his birth, but Nagler is probably correct, as there are prints by Neef extant dated 1621 and 1633. His last print recorded is dated 1645. He engraved a number of subjects after Rubens, Vandyck, and other celebrated Flemish painters. His drawing is correct, but stiff and mannered, and his heads often have an extravagant expression; but his prints are much esteemed. They are executed entirely with the graver, which he handled with great facility. An engraving of his is to be seen in The Folly of the Anglers. The Meeting of Abraham and Melchizedek; The Crucifixion, with the Virgin and St. John; St. Augustine: The Martyrdom of St. Thomas: The Judgment of Paris: The Triumph of Galatea (these all are after Rubens): Christ and his Six Pences: Job and his Wife: The Martyrdom of St. Lierin: Christ's offering to Magdalen (all these after Gerard Segers): Christ brought before Pilate, after J. Jordains: St. Roch interceding for the Persons attacked by the Plague, after Erasmus Quellinus.

Neef, Jean, a Belgian ascetic writer, was born at Mechlin in 1576. He belonged to the Order of the Hermits of St. Augustine, in which he filled the office of superior. In 1608 he was joined to the Tertiary of the same order, and occupied himself in the care of the elderly religious in the several monasteries of the province of Flanders and Cologne. He died at Mechlin, June 28, 1656. His works are, Vita sanctae Monicae (Antwerp, 1628): Horologium monasticorum perfectionis (Louvain, 1628): De terciaire ordinis Sancti Augustini (Antwerp, 1635): -Eremon Augustinianorum floribus honoria et sanctitatis vermes (Louvain, 1636, 4to), in which is found the life of St. Augustine, and a great number of lives of the remarkable personages of his order: - Le Nouveau Testament, in Flemish. See André, Bibl. Belgica, ii, 700.

Neefs, Peter, called the Old, an eminent Flemish
NEGES

Neesing (an obsolete word for "measuring") is found only in Job xii, 10, as a rendering of מְשָׁמֶשׁ, məšəməš (which occurs only there), from an otherwise unused root signifying to measure (q. v.).

Nefasti, Dina, i.e. unwilling days, a term among the ancient Romans for those days of which neither celebration, nor some other public festival held; afterwards they were dedicated chiefly to the worship of the gods. Numa Pompilius is said to have been the originator of the dies nefasti.

Neff, Felix, a philanthropic Swiss Protestant divine, was born in 1798 at a small village near Geneva. While yet a youth he enlisted as a soldier in the Genevan service, where his excellent conduct and superior qualifications soon procured him advancement. But he became obnoxious to his brother-officers by the unbending principles and the high-toned purity of his life, the result of the careful teachings of his widowed and pious mother. He was advised to leave the army for the pulpit, and finally resolving to follow this advice, he resigned his commission in 1818. He then offered himself for the work of a catechist or parish missionary, and labored for two years in that capacity in several of the Swiss cantons, and afterwards for six months at Grenoble. But when he desired to be ordained, he found that religious scruples prevented his connecting himself with the newly united Church of Geneva, while from his being a foreigner he could not hope to receive ordination through the Protestant Church of France. He was therefore advised to repair to England, where he was ordained, May 19, 1823, in Mr. Clayton's chapel in the Poultry; and a few days afterwards left London to return to the scene of his former labors at Mena. How ever gratifying his reception among that attached people, his benevolent mind fixed on another place, in a wild and sequestered portion of the High Alps, as more urgently in need of his services. The constiuty of the Protestant churches permitting, he entered on his pastoral charge in 1824. Thus this devoted minister, who might have enjoyed comfort and leisure in the beautiful and fertile vales of Languedoc, chose to settle in a poor and wildly extending Alpine district, comprising not less than seventeen isolated villages within a circuit of eighty miles. There was one part of his parish, the Val Frasnière, where the inhabitants were so lowly clad, and so uneducated in the most common arts of life, as to be scarcely removed in many respects above the condition of barbarism. Neff perceived that his first step must be to supply the want of education, and, unable to pay a teacher, he joined the duties of a schoolmaster to those he already bore. Having at length succeeded in interesting the people in his efforts, he induced them to build a school-house, he directing the workmen, and acting at once as architect and master. But such excessive labor exhausted his constitution, and he died April 12, 1829, leaving a name entitled to be ranked among the best benefactors of his country. See Gilley, Memoirs of Neff, one of his Labors among the French Protestants of Dauphine, a Remnant of the Primitive Christians of Gaul (Lond. 1832, 8vo); Boist, Life of Felix Neff (Lond. 1855); Jamieson, Cyclop. of Relig. Biog. p. 549; Darling, Cyclop. Bibl. ii, 2166; The London Quarterly Review, April, 1833. (J. N. F.)

Negam. See Talmud.

Negation is in philosophical parlance the absence of that which does not naturally belong to the thing we affirm, as well as being necessary to the denial of, or necessity to be present with; as when we say a stone is inanimate or blind or deaf, i.e. it has no life, sight, or hearing (Watts, Logic, pt. i, ch. ii, § 6). According to the scholastic theologian, Thomas Aquinas (Summa theolog. pt. i, qu. 48, art. V), "simple negation denies to a thing some certain realities which do not belong to the nature of the same. Privation, on the contrary, is deficiency in some reality which belongs to the nature of the being." See PRIVATION. In simple apprehension there is no negation of affirmation; so that, strictly speaking, there are no negative ideas, notions, or conceptions. In truth, some that are so called represent the most positive nullities; as infinity, immortality, etc. But in some ideas, as in that of blindness, deafness, insensibility, there is, as it were, a taking away of something from the object of which the idea is entertained. This is, however, privation (privatio) rather than negation (necatio), and in general it may be said that negation implies some anterior conception of the objects of the negation is made. Absolute negation is impossible. We have no idea of nothing—it is but a word. "Nihilism, or nothingness," says Clarke, "is that of which everything can truly be denied, and nothing can be truly affirmed. So that the idea of nothing (if I may so speak) is absolutely the negation of all ideas. The idea, therefore, either of a finite or infinite nothing is a contradiction in terms" (An Ansver to Seventh Letter). Nothing, taken positively, is what does not but may exist, as a river of milk; taken negatively, it is that which does not or cannot exist, as a square circle, a mountain without a valley. Nothing positively is non exist. Nothing negatively is non esse. See Krauth's Fleming, Vocabulary of Phils. p. 545, 546.

Negob. See South Country.

Neges (or more commonly Canusius) is the name of an order of Japanese monks or secular priests who officiate in the maez or temples. They are either maintained by the endowment money of the maez to which they may happen to belong, or by a pension from the Dairi; but their principal support is derived from the voluntary contributions of the devotees. The Canusius wear, as a badge of their office, either a white or yellow robe over their ordinary dress. Their cap, which is made in the shape of a boat, is tied under the chin with silk cord. Upon this cap are tassels with fringes to them, which are longer or shorter according to the rank of the person who wears them. Their beards are close shaven, but their hair is very long; the superiors, however, wear it curled up under a piece of black gauze. At each ear is a long piece of silk, which comes forward over the lower part of the face. The order of the Can usius consists of two suborders, the spiritual and the lay, the decision of the Dairi, and with regard to temporal matters they are subject, like all other ecclesiastics, to the authority of the judge of the temple, who is appointed by the secular monarch. The superiors of the Canusius are remarkable for their pride and contempt of the common people. They are to be seen scattered throughout all the provinces and cities of the empire. The leading monks reside at Miao; but, though invested with great authority and influence over the people, they are always subject to the imperial authority, which punishes ecclesiastical delinquents with death. The Canusius, in their discourse to the people, dwell chiefly on points of moral ity. They preach from a rostrum or pulpit, and alongside of them is placed the tutelar idol of the sect or order to which they belong, and to this the devotees present their free-will offerings. On each side of the pulpit there is a lighted lamp suspended from the canopy, and a little below it is a desk or pen for the younger priests, where some of them sit and others stand. The preacher wears a bat upon his head shaped like an umbrella, and holds a fan in his hand. Before commencing his sermon he appears to meditate for a little, then rings a small bell by way of enjoining silence upon his audience; and after a short quiet pause he sits down upon a little matted cushion before him, containing the moral precepts and fundamental principles of the religion of his sect. Having chosen his text, he delivers his discourse, which is usually clear and vigorous in its language, and strictly methodical in its arrangement. The peroration very
often consists of a high-flown eulogium upon the order to which the preacher belongs. The audience are called upon, by the ringing of a little bell, to kneel down and say their prayers, sometimes before and sometimes after the singing. In the last appeal for the dead, the Japanese priests, as well as monks, sing the Namahata to the sound of little bells for the repose of their deceased friends. See Macfarlane, Japan (Loud. 1852, 8vo), bk. iv.

**Neginah**, properly **Neginath** (נוֹגִיתָה, nògi'tah), occurs in the title of Psal. lix., to "the chief musician upon Neginah." If the present reading be correct, the former reading was probably the corruption of what is called (Psal. liii.). But the Sept. (בגית, yôgin) and Vulg. (in hymnis) evidently read "Neginoth" in the plural, which occurs in the titles of five Psalms, and is perhaps the true reading. Whether the word be singular or plural, it is the general term by which all stringed instruments are described (Smith). In the singular it has the derived sense of the music of stringed instruments (1 Sam. xvi. 16; Isa. xxxviii. 20), and of songs to be accompanied with stringed instruments (Psa. lxxvii. 7), especially a song of deliverance (Job xxx. 9). See **Neginoth**.

**Neginoth** (נְגִיהות, nògi'oth), songs with instrumental accompaniment, see **Neginah**; Sept. yôgin; vulg. hymnis) is found in the titles of Psal. iv, vi, lixiv, lxvi, lxxvi; the meaning of the title is "Hymn," "song," "suitable instrument," "stringed instruments," and there seems but little doubt that it is the general term denoting all stringed instruments whatsoever, whether played with the hand, like the harp and guitar, or with a plectrum. It thus includes all those instruments which in the A. V. are denoted by the special terms "harp," "psaltery," or "viol," "sackbut," etc., as also by the general descriptive "stringed instruments" (Psa. cl, 4), "instruments of music" (1 Sam. viii. 6), or, as the margin gives it, "three-stringed instruments," and the "instrument of ten strings" (Psa. xxxii. 2; xxcl, 6; xxcliv, 9). "The chief musician on Neginoth" was therefore the conductor of that portion of the Temple choir who played upon the stringed instruments, and who are mentioned in Psa. lxviii, 25 (נְגִיָהוֹת, nògi'oth), from which the word is derived occurs in 1 Sam. xvi, 16, 17, 18, 23; xviii, 10; xix, 9; Isa. xxxviii. 20, and a comparison of these passages confirms what has been said with regard to its meaning. The author of the Shille Haggigborim, quoted by Kircher (Museipig, i, 4, p. 468) explains Neginoth as including "all stringed" instruments, long and round, pierced with several apertures, and having three strings of gut stretched across them, which were played with a bow of horsehair. It is extremely doubtful, however, whether the Hebrews were acquainted with anything so closely resembling the modern violin and its music. See **MUSICAL INSTRUMENTS; PSALMS**.

**Nego**. See **Abednego**.

Negombo, **Negosi**, and **Nepindi** are the names by which the African negroes of Congo, Angola, etc., designate three of their priests.

1. The **Negombo** is looked upon both as a priest and a prophet. He not only professes to foretell future events, but he ascribes to himself likewise an innate virtue of healing all manner of diseases. He is always sufficiently provided with a vast variety of medicaments, the virtues whereof are so deeply impressed on the minds of the negroes that the failure of Negombo's prescriptions is always imputed to the patient.

2. The **Negosi** must take to himself eleven wives, and, as is usual among African tribes, he also acts the part of a magician. When any native medicine is used over him, he investigates the cause of his failure to the community, and, if he discover any slight negligence or some lack of discipline on the part of his priest, he thinks he is able to interpret the dreams of the enemy, and all his possessions and kin.

3. The **Nepindi** styles himself master of the elements, and pretends to control thunder, lightning, and storms. To manifest his power, he raises large heaps of earth contiguous to his habitation. After he has finished the usual priestly service, he ascends the mountain, where, with other numerous others, they devote themselves to the worship of the gods and the performance of religious ceremonies; the second employ themselves in military affairs, and the third in the preparation of weapons of war. The Negros, as a body, are so numerous and influential that the emperor finds it necessary to secure their favor. They are scrupulously careful about the lives of inferior animals, but their quarrels with each other often end in bloodshed. See Gardner, Faiths of the World, ii, 524; Broughton, Bibliotheca Histor. Sacra, ii, 4, v.

**Negosi**. See **Negombo**.

**Negri** (or **Negro**), Francesco, an Italian Reformer noted for his philological attainments, was born in 1510 of a noble Tuscan family. He taught children in the free territory, in 1500. Gifted with an active and penetrating mind, he became an excellent student. He entered the Order of Benedictines. The principles of the Reformation preached in Germany and Switzerland penetrating Italy at this time, Negri came forward as one of the first to adopt the new doctrines, and promptly abondoned his order, he went to Germany, joined Zwingli, and accompanied the great Swiss Reformer to the conferences of Marburg in 1529, and assisted at the Diet of Augsburg in 1530. Negri defended with eloquence the famous Protestant profession of faith known under the name of the Confession of Augsburg. He afterwards returned to Italy; but that country offering no security to the preachers of the Reformed doctrines, he went back to Germany. He stopped some time at Strasbourg, then at Geneva, and finally settled at Chiavenna, a small village of the Grisons, where he married, and became the teacher of a school. His small salary scarcely sufficed to support his family. It appears that he attempted to better his position by going again to Geneva; but he was not more fortunate than before, and he returned to Chiavenna, where he died some time posterior to 1558. In his last years Negri departed from the theological platform of his old teachers, Luther and Zwingli, and embraced Socinianism. We have of his works, Turcicum rum commentariwm (Paris, 1588, 8vo), translated by Paul Giovo:—Rudimenta grammaticae, ex auctoribus collecta (Milan, 1541), reprinted under the title of Canones grammaticales (Pesciario, 1555, 8vo);—Ordid Metamorphosis in epistomen Phalenic versibus redacta (Zurich, 1542; Basle, 1544).—Tragodia de libero arbitrio (Geneva, 1546, 4to, enlarged 1556, with additions). This singular dramatic allegory upon one of the most disputed questions between the Catholics and the Reformers is rare and recherché; the denouement of the piece is the triumph of Justifying Grace over king Free-Will, who is beheaded, and over the pope, who is recognised as Anti-christ. The drama was translated into French under the title La tragédie du roy Franc-Arbicpte (Villefranche [Geneva], 1559, 8vo). We also have of Negri's works, De Fanini Facentini ac Dominici Basanenii morte, qui super ob Christum in Italia Romanam posthac jussu implo octo sunt, brevis historia (Chiavenna, 1540, 8vo), one of his treatises on and various books:—Hisoria Francisci Spierio circitutulam qui quod suscepit semel Evangelico versitatius professionem obgasset, in horrendum incidit desperationem (Tubingen, 1550, 8vo). See Roberto, Notizia storico-critiche della
Negril, Girolamo, an Italian humanist, was born at Venice in 1494. After having been vicar of the bishops of Constance, Vienne, and Vicenza, he became bishop of cardinal Cornaro, and later of cardinal Contarini. Negril obtained afterwards a canonicate at Padua. He died at Padua in 1577. According to the judgment of Sadoleto, he wrote Latin with purity and great elegance. We have of his works, Epistole et Orationes (Padua, 1554; 4to); il Massarino della sua vita, 1773. At the head of this last edition is found a biography of Negril, written by abbé Costanzi. See Foscarini, Storia della letteratura Veneziana.

Negril, Salomon (Arabic, Soleiman Alezdi), a Greek philosopher, was born at Damascus in the latter part of the 17th century. Instructed by the Jesuit missionaries in the Greek and Latin languages, he came to Paris, and continued his studies at the Sorbonne. He afterwards went to London, and in 1701 to Halle, where he remained four years, giving lessons in Arabic, among others to the celebrated Michaelis. The climate of Germany being injurious to his health, he went to Italy, and afterwards established himself at Constantinople, where he was ordained priest of the Greek Church. The war brought him again to Italy. He sought, but without success, to found at Venice, and later at Rome, a school where he would have taught Arabic, Syriac, and Turkish. He then returned to Halle, where he again passed sixteen months; and finally settled in London, and there obtained employment as interpreter of the Oriental languages. He died there in 1729. Negril has given Arabic translations of the Psalms and the New Testament, published under the auspices of the British and Foreign Bible Society. The Psalms appeared in 1725 (8vo); the New Testament in 1727 (4to). These two versions have been severely criticized by Beikse (see Baumgarten, Nachrichten von merkwürdigen Büchern, iii, 283). We have likewise a Latin translation of the Vie de Gabriel Battishania (in the Opera of Frein). Lastly, he has published in the Freundsblies Heilige Gespräche et Conversations which he had in Constantinople with a Turkish mollah. See Memoria Negriana (Halle, 1764, 4to). Rotermund, Supplement zu Jäger, Gelichten-Lexikon, & c.; Hoefer, Nov. Biog. Générale, xxxvii, 616.

Negril, Virginia - Angélica - Paula - Antonia, an Italian nun, was born in 1508 at Milan. She early left the world to enter the new monastery of the Angelicas of St. Paul, to the foundation of which she had contributed, and became teacher of the novices. Full of zeal for the propagation of the faith, she traveled over Vicenza, Udine, Padua, Verona, Brescia, preaching everywhere repentance and purity of life. The sick and the poor also became the object of her care, and several hospitals owe their foundation to her. Among the number of conversions that she made, we mention that of Alphonse, marquis of Guaste, governor of the Milanese, whom she comforted by religious counsels on his death-bed. Many of her converts entered the congregation of the Clerics of St. Paul. Calumny did not spare her; and her enemies, seeking to prove her a visionary, found the means to immure her in the convent of the Clarissas. John of Salazar, an Italian priest, then archbishop of Luciano, was named to examine her conduct, and recognised the falsity of the accusations. A woman of superior mind, she wrote well. She was well versed in Latin. She died at Milan April 4, 1555. We have of her works, Lettere spirituali delle Angeliche Pauline in Angelicae Paulinae Angelicae et Angélicae Negril (Venice, 1547, 4to); Milan, 1568, 8vo). Another edition, published at Rome (1576, 12mo), is preceded by the life of Virginia Negri by J. B. Fontana de Conti. The spiritual letters, to the number of seventy-two, are divided into three parts, and for union and piety offer some resemblance to those of Saint Catharine of Sienna. There is also attributed to Negri, Esercizio particolare d'un sermo del Signore (Brescia, 1577, 12mo). See Bibliothek, mediz. scriptorium, ii, 955; Arias, Cremona libera; Augustinius, Ab Ecclesia, Teatro delle dote letterate, p. 271.

Negrillos or Negritos (Spanish, diminutive of Negritos) is the name given by the Spaniards to certain Negro-like tribes inhabiting the interior of some of the Philippine Islands, and differing essentially both in features and manners from the Malay inhabitants of the Eastern archipelago. Among the planters and villagers of the plains they bear the name of Itas or Aetas (pronounced Aetus). They are also called by the Spaniards Negritos del Monte, from their inhabiting the mountainous districts for the most part; and one of the islands where they are most numerous bears the name of Iula de los Negros. These Negritos are also known by the names Aetas, Aijeta, Ite, Harpin, and Ipolote or Igurote. They bear a very strong resemblance to the Negroes of Guinea, but are much smaller in size, averaging it height not more than four feet eight inches, whence their appellation. They are described as a short, small, but well-made and active people, the lower part of the face projecting like that of the African Negroes, the hair either woolly or frizzled, and the complexion exceedingly dark, but not quite so black as that of the Negroes. The Spaniards describe them as small, more slightly built, less black, and less ugly than the Negroes — Menos Negros y menos feos. All writers concur in speaking of them as sunk in the lowest depths of savagery, wandering in the woods and mountains, without any fixed dwellings, and with only a strip of bark to cover their nakedness; sleeping in the branches of the trees, or among the ashes of the fires at which they had cooked their food. Their only weapons are the bow and arrow; and they live upon roots, wild fruits, and any sort of animals that they can surprise in their haunts or conquer in the chase. By the Malays they are known as Yakan.

Negrillos of Luzon.
NEGRILLOS 920 NEGRO

despised and hated; and the buffalo-hunters in the woods, when they meet with them, do not scruple to shoot them down like wild beasts or game. "It has not come to my knowledge," says Mallat, "that a family of Negritos ever took up a domicile in a village. If the Mohammedan inhabitants make slaves of them, they will rather submit to be beaten to death than undergo any bodily fatigue; and it is impossible, either by force or persuasion, to bring them to labor. . . ."

Prompted by an irresistible instinct to return to the place of their origin, they order a sacrifice of all the chiefs of civilization. It has occurred that individuals, who have taken Negroes during their infancy, and made sacrifices to give them an education, have found themselves suddenly abandoned by them" (ii, 95). The same writer, an ecclesiastic, speaks of them as gentle and inoffensive in their manners, whenever he himself came in contact with them; and although informed that some of them were cannibals, he was not inclined to believe the report.

Dr. Carl Scherzer, the historian of the circumnavigation of the Novara, when at Manila, had an opportunity of seeing a Negrito girl whom he thus describes: "This was a girl of about twelve or fourteen years of age, of dwarf-like figure, with woolly hair, broad nostrils, but without the dark skin and wide everted lips which characterize the Negro type. This pleasing-looking, symptomically-formed girl had been brought up in the house of a Spaniard, apparently with the pious object of rescuing her soul from heathenism. The Spaniards had called her by her own mother-tongue, besides a very little Tagal, so that we had considerable difficulty in understanding each other." According to Spanish statements, the Negritos are found only in five of the Philippine Islands, viz. Luzon, Mindoro, Panay, Negros, and Mindanao, and are estimated at about 25,000 souls. A few exist, however, in the interior of some of the other islands in the Eastern archipelago; and they are scattered also, though in small numbers, through certain islands of Polynesia. They are altogether an island people, and are hence treated of by Frichard under the designation of Pala
gian Negroes. By Dr. Pickering they are regarded as a distinct race, resembling the Papuan, but differing from it in the diminutive stature, the general absence of a beard, the projecting of the lower part of the face or the inclined profile, and the exaggerated Negro features. The hair, also, is more woolly than that of the Papuans, though it has none of the glossiness of that of the Negroes in knotty closeness. By Latham the Negritos are described as forming a subdivision of "Oceanic Mongoloids, C," which subdivision is further modified by him into the designation of "Amphineans" and "Kelenonians." Müller, in his Allgemeine Ethnographie (Vienna, 1878), classifies them among the Papuans of the pure type, but Wallace considers them a totally distinct race and, connecting them with the inhabitants of the Andaman Islands, in the Bay of Bengal, is of opinion that they are probably of Asiatic rather than of Polynesian origin; and Pechel, in his Volkerkunde (2d ed. Leipzig, 1875), prefers to call them "asian Papuans," in distinction from Australian Papuans. The Negritos are found on the Philippine Islands for the most part in the islands embraced under the latter designation, as New Guinea, New Ireland, Solomon's Isles, Loua aide, New Caledonia, and Tasmania or Van Diemen's Land. Except in the last-mentioned island, however, the Negritos, strictly speaking—that is, the hairy, woolly-haired—do not preponderate over the other native tribes less strongly marked with Negro features; while in Tasmania itself the race has almost entirely disappeared, amounting at present to not more than two or three dozen souls. Dr. Pickering is of opinion that "the Negrito race once occupied more space than it does at this time, and that it has in many instances preceded the dissemination of other races." We conclude with a description of a Negrito native of Erromango (the island where the missionary Williams was murdered), supplied to Dr. Pickering by Horatio Hales, his associate in the United States exploring expedition. "He was about five feet high," says Mr. Hales, "slender and long limbed; he had close woolly hair, and retreating arched forehead, short thick fingers and toes, a small nose, wide lips (especially the upper), a retreating chin, and that projection of the jaws and lower part of the face which is one of the distinctive characteristics of the Negro race. . . . Placed in a crowd of African blacks, there was nothing about him by which he could have been distin

guished from the rest. . . ."

The Negritos have no religion, and adore no star. It appears, however, that they have transmitted to the Sanguinaries (a brown race inhabiting the neighborhood), or have learned from the latter, the practice of worship

ing for a day a rock or the trunk of a tree in which they find a resemblance to some animal or other. Then they leave it, and think no more about it until they meet with some other fantastic form, which becomes a new object of an equally frivolous worship. Living in a state altogether primitive, these savages possess no instruments of music; and their language, which resem

bles the chirruping of birds, contains only a few words which would be useful to a kinsman who tries to learn them. They are faithful in marriage, and have only one wife. When a young man has made his choice, his friends or parents ask the consent of the girl. It is never refused. The day is chosen, and in the morning, before sunrise, the girl is sent into the quarters of her fiance. She is covered only with her own

inclination towards her suitor. An hour afterwards the young man is sent to seek her; and if he has the good luck to find her, and bring her back to her friends before sunset, the marriage is consummated, and she is his wife forever. But if, on the contrary, he returns without her, he must give further claim. Old age is very much respected among the Negritos, and it is always one of the eldest who governs their assem

blies. All the savages of this race live in great families of sixty or eighty, and stray in the forests without any fixed residence. They hold the dead in great venera

tion. For several years they resort to their graves for the purpose of depositing a little tobacco and betel upon them. The bow and arrows of the deceased are suspend

ed over his grave on the day of interment, and, accord

ing to their belief, he emerges every night from the grave to go hunting. They do not always wait for the death of the afflicted before burying them. Immediately after a death, they bury the dead, and when necessary, according to their usages, that the death should be avenged. The hunters of the tribe go out with their lances and arrows to kill the first living creature they meet with, whether a man, a stag, a wild hog, or a buffalo. When on a journey in search of a victim, they take the precaution of breaking off the young shoots of the shrubs they pass by, leaving the ends hanging in the direction of their route, in order to warn neighbours and travellers to avoid the path they are taking in search of a man or a beast to be offered up; for if one of their own people fall into their hands, even he is treated as a beast, as we showed in the case of the Les Phili

pinnes, etc. (Paris, 1846, 2 vols. Svo), ii, 94 sq.; De la Gironiè

ère, Vingt Ans aux Philippines (Paris, 1858), p. 293 sq.; Carl, Native Races of the Indian Archipelago (London, 1853), ch. vii, viii; Semper, Die Phili

pinnes u. ihre Bewohner (Würzburg, 1869).

Negro (from Latin niger, black) is a name generally applied to the African natives. This is, however, an incorrect use of the word, for Negro races inhabit only portions of the African continent, principally between lat. 10° N. and 20° S. The Negro has no connection, at least not intimately, with the races inhab

iting Western Africa, such as the Hausas, Mandingos, Amhara, Abyssinians, Nubi.

The southern extremi

ties of Africa, too, are comparatively free from Negroes; they are inhabited by the Hottentots (q.v.). The Kaffirs (q.v.) are sometimes classed with the Negroes.
In some of the border countries a strict classification of their inhabitants is difficult, as they have considerably intermixed. The Negro, too, is not at all confined to the African continent, but is found in various parts of Asia and its islands, and throughout America and the West Indies. He is found in the lowland of the Congo, Madagascar, the West Coast of Africa, Sumatra, the Moluccas, the Philippines, New Guinea, New Zealand, and the West Indies. He is also found in the Lowlands of the Nile, and in the Mississippi Valley. In Blumenbach's fivefold division of mankind the Negroes occupy the first place under the variety Ethopian, which likewise embraces the Kaffirs, Hottentots, Australians, Alfrians, and Oceanic Negroes. In Latham's threefold division they are placed among the mongolians, and in the latter part of the eighteenth century, in the classification of the New Atlantis, in that author's classification: while in Picking's elevenfold division they occupy the last place in his enumeration of the races of mankind. Physically the Negro is distinguished by a soft and silky skin, dull cherry-red in the infant, and growing black very soon; it differs from that of the whites principally in the greater amount of pigment cells in the Ret. Malpighii (the epidermis being uncolored), and in the greater number of cutaneous glands. His hair is generally called woolly, though improperly, for it differs but little from that of the other races except in color, and in its curled and twisted form, and is rather harsh than soft. Some think that his hair is the result of his face prognathic, or projecting like a muzzle. His skull, which is very thick and solid, is long and narrow, with a depressed forehead, prominent occiput and jaws, a facial angle of 70° to 65°. According to Camper's lateral admeasurement, the head of the Negro shows an average difference of 10°, or 1 inch, between the occiput and the front of the skull, which is more than in the skull of the Negro and that of the European. But says Dr. Prichard, 'I have carefully examined the situation of the foramen magnum in many Negro skulls; in all of them its position may be accurately described as being exactly behind the transverse line bisecting the antero-posterior diameter of the basis cranii. This is precisely the place which Owen has pointed out as the general position of the occipital hole in the human skull. In those Negro skulls which have the alveolar process very protuberant, the anterior half of the line above described is lengthened in a slight degree by this circumstance. It is a considerable difference to exist between the position of the foramen magnum in the skull of the Negro and that of the European. The voice in the males is hoarse and not powerful, and in the females high and shrill. They are fond of music, and have many ingeniously contrived musical instruments, generally of a noisy character; they have a keen sense of the ridiculous, and are of a cheerful disposition; they have a great contempt for the white man, and give little value to human life; they are not given to affectionate attachments of any kind; they are hospitable to strangers, and communicative of their joys and sorrows; the females are remarkably affectionate as mothers and children, and as attendants on the sick, even to foreigners. They are poor in their persons and dwellings than most other barbarous races. They are ready to receive instruction, and to profit by it to a certain point; quick to perceive the beauty of goodness, they generally appreciate the service of the missionaries in their behalf, and were not their teachings counteracted by the intoxicating drink brought by traders, they would probably in time, in outward appearance and manners, be not out of place in the midst of semi-Christian communities. The custom of polygamy prevails among all the Negro tribes, and where these are constituted into nations or kingdoms, as in Dahomey, the sovereign has often as many as two or three thousand wives, whom he occasionally disposes of as presents to his chief officers and favorites. In those parts of Africa where the slave-trade has flourished the Negro is lowest in the stage of civilized life. In other parts he shows a capacity for practicing the arts of life. Negroes are ingenious in the construction of their dwellings and in the manufacture of their weapons; they have some knowledge of metals and of other metals; they manufacture arms, dress and prepare the skins of animals, weave cloth, and fabricate numerous useful household utensils. Neither are they altogether
deficient in a knowledge of agriculture. These marks of civilization are, for the most part, apparent in the districts either wholly or partially converted to Mohammedanism. Mungo Park, in his account of Sego, the capital of Benin, says, it is a town that the city of 50,000 inhabitants, with houses of two stories high, having flat roofs, mosques in every quarter, and ferries conveying men and horses over the Niger. "The view of this extensive city," he says, "the numerous canoes upon the river, the crowded population, and the cultivated state of the surrounding country, formed altogether a prospect of those nations and nations which I little expected to find in the bosom of Africa."

The languages of the various nations and tribes of Negroes are very numerous. Vocabularies of nearly 200 languages have been brought from Africa by the Rev. Dr. Koelle. "A slight examination of these vocabularies," says Mr. Edwin Norris, "seems to show that there are among the Negro idioms a dozen or more classes of languages, differing from each other at least as much as the more remote Indo-Germanic languages do." To these Negro idioms Dr. Krafft has given the name of "Negro-Hamitic Languages." These may perhaps have affinities with some of the other African tongues, but none with any of the great well-defined families of languages. For further information upon this subject, as well as upon the classification of the different Negro races, we must content ourselves with referring to Dr. Pritchard's "Natural History of Man," and especially to a learned essay upon the Negroes in the "Transactions of the American Philosophical Society." (p. 323.) It has been said that no Negro nation ever possessed a literature, or had the ingenuity to invent an alphabet, and until recently this was probably true; but Christian missionaries have discovered a tribe in Western Africa, named Vé, which possess a well-constructed written language, with books, the invention of one of their number, a living person, who presents a case as remarkable as that of the invention of the Cherokee alphabet. Among the Negro race there is a great variety, greater, perhaps, than among any other family, yet while the several tribes have these clearly distinctive peculiarities, they yet bear a strong general resemblance to each other, not only in their physical appearance, but in their intellectual capacities, moral instincts, customs, and manners.

The religion of the Negroes is but a debased fetish worship [see Fetishism, except where Mohammedanism has made them acquainted with an ethical religion. Their religion is analogous to that of many of the low nations, with whom it is supposed they have been the original of the Koran (q.v.), who make fetishes of serpents, elephants' teeth, tigers' claws, and other parts of animals, at the dictation of their fetish man, or priest. They also manufacture idols of wood and stone, which they worship; and yet, under all this, they have some idea of a Supreme Being. They believe in good and evil spirits, and are perpetually practising incantations to ward off the baneful influence of their spiritual enemies. In Eastern Africa, Speke (Discovery of the Source of the Nile, p. 248) mentions that on one occasion, "as there was a partial eclipse of the moon, all the Wangana [a Negro race] marched up into a wood, and after some Roman Catholic huts, singing and beating our tin cooking-pots to frighten off the spirit of the sun from consuming entirely the chief object of their reverence, the moon." Lander (Niger Expedition, i, 180, 183) mentions that at Boussa, in Central Africa, an eclipse was attributed to an attack made by the sun on the moon. During the whole time the eclipse lasted the natives made as much noise as possible, "in the hope of being able to frighten away the sun to his proper sphere, and leave the moon to enlighten the world as at other times." They make prayers and offerings to their idols, and have sacred seasons, and ceremonies at which they have priests and holy men, who are also magicians and doctors. They believe generally in an after-life (see Lubbock, p. 139, 140), without, however, any distinctive idea of retribution, and some tribes hold the

transmigration of the human soul into a gorilla, or other beast, bird, reptile, or fish; they are very superstitious, and have great fear of ghosts and apparitions. Their religion, in fact, is one altogether of fear; and as this leads eventually to cruelty, we find this for the most part indifferent to the sacrifice of human life. They sacrifice animals, and in some parts they even offer up human victims to propitiate their deities. They are cruel to their enemies and prisoners, and often shed blood for the mere savage delight they experience in seeing it flow from their victims. They need only allude to the inhuma
dent to the sacrifice of human life. They sacrifice animals, and in some parts they even offer up human victims to propitiate their deities. The Negroes are frequently influenced by the teachings of ethical religions, and the converts made for Mohammedanism are believed to be very numerous [see Mohammedanism]; Christian missionaries have met with success also. The Romanists were early workers among them, but in recent years the Protestants have been most successful in propagating Christianity among them. For further details regarding the civil, social, and religious condition of the Negroes, and of missions among them, see the articles NIGER; AFRICA; KABINDO; LIBRELLA; MANDINGO; PO; FERNANDO; YOMBA. Of the condition and prospects of the Negroes in the various countries into which they have been imported during the prevalence of the slave-trade we have no room to speak here, but refer to the article SLAVERY. They are found in all the West Indies, in Brazil, in the United States, Brazil, Peru, and other parts of South America; also in the Cape de Verde Islands, Arabia, Morocco, etc. In the British West India Islands they were emancipated from slavery in 1834, and in those belonging to France in 1848. Indeed, slavery now exists nowhere in the West Indies, with the exception of Cuba and Porto Rico. In the United States the Negroes amount to about 6,700,000; they are now liberated, and enjoy civil rights, and some occupy prominent positions in ecclesiastical and political life, and in all the other walks of life many are rising to influence and power.

The Negroes figure in history from very ancient date. They were not much known by the Hebrews and the Homeric Greeks, to judge from the writings at our command, but the Egyptians became acquainted with Negroes, about B.C. 2800, through the conquests of their rulers, and we find Negroes represented on Egyptian monuments as far back as B.C. 1500. In the last five centuries the type has remained unchanged in Egypt. The Greeks first knew them in the 7th century B.C., their Ethiopians being merely any people darker than the Hellenic, like the Arabs, Egyptian, Libyans, or Carthaginians, none of whom are Negroes. The typical Negro of the Guinea coast are generally rude and nearly naked savages, of a deep black color and ugly features; in the interior many of the tribes, like the Fan, and others visited since 1855 by Paul du Chaillu and Winwood Reade, are fierce cannibals, but fine-looking, warlike, ingenious, and skilful in the work of war, and among the most degraded, selling their neighbors to slave-dealers. In the vast region explored by Livingstone, Barth, Du Chaillu, Burton, Speke, Baker, Schweinfurth, and other recent travellers, there are many tribes more or less savage, for an account of which the reader is referred to the respective special notices in this work, and chiefly to the narratives of these explorers.

The father of English ethnology, Dr. Pritchard, thought that the original pair must have been Negroes, and that mankind descended from them. His words are: "It must be concluded that the process of nature has probably been the same among the characters of the Negro into those of the European, or the evolution of the white varieties in black races of men. We have seen that there are causes existing which are capable of producing such an alteration, but we have no
facts which induce us to suppose that the reverse of this change could in any circumstances be effected. This leads us to the inference that the primitive stock of men were Negroes, which has every appearance of truth" (Researches, p. 233).

It is not a little remarkable that although Blumenbach and Prichard were both advocates for the unity of man, they materially differed in their views. The former always maintained a great diversity of mankind nothing but degeneracy from some ideal perfect type. Prichard, on the contrary, could imagine no arguments, or knew of any facts, to support such a conclusion. Prichard, however, was not alone in this supposition. For Pallas, Lacépède, Hunter, Dors- nik, and Linnck were all agreed in the same view. See Humboldt, "Essai sur les Membres de l'Académie Royale de Sciences et Belles Lettres de Berlin;" and Huxley, "On the Mammalia of the American Museum of Natural History, vol. i, art. ii; Professor Agassiz, "On the Mammalia of the British Museum, vol. i, art. ii; Prichard, "Researches into the Phys., Hist. of the Black Tribes of South Africa, vol. i, art. ii; see also in these memoirs, same vol., art. ii, 1814, 1815."

The word "Nehemiah" also probably contains a play on the "dreams" (cherem) and "dreamer," whom Jeremiah is never wearied of denouncing (see ch. xxii, xxvii, xxix, xxx). For, first, however, (Heb. lez. s. v.) there is an allusion to the failure of an inheritance of the Sabaks, as threatened. The Targum gives the name as Chelam, כְּלָם. A place of this name (see He- lament 5:27) lay somewhere between the Jordan and the Euphrates.

Nehem'ah (Heb. נְהֵמָא, נְהֵמָא), comforted by Jehoah; Sept. Ἰακοπιν, r. ν. Νεήμας; Josephus, Ν- ἤμασ; Ant. xi, 5), the name of three men.

1. The second name of the "children of the province," who were carried away by Nebuchadnezzar, and lived to return with Zerubbabel to Judea (Ezra ii, 2; Neh. vii. 7). B.C. 536. He was not the same as 15.

2. Son of Azbuk, of the tribe of Judah; ruler in half the town of Bethzur, in the mountains of Judah, who took a leading part in rebuilding the wall of Jerusalem (Neh. iii. 16). B.C. 445.

3. The son of Ichahallah (Neh. i, 1) and brother of Zannah (Neh. vii. 7). He was apparently of the tribe of Judah, since his fathers were buried at Jerusalem, and Hanani his kinsman seems to have been of that tribe (Neh. i, 2; ii, 3, vii. 2). Some think he was of priestly descent, because his name appears at the head of a list of priests in Neh. x, 1-8; but it is obvious, from Neh. ix. 9, that he stands there as a prince, and not as a priest—that he heads the list because he was head of the tribe of the nation. The Vulgate, in 2 Macc. i, 21, calls him "sacerdos Nehemia." (comp. Ramsbach, "Proef. in Neh. p. 112; Carpzov, "Intro. i, 338"; but this is a false version of the Greek, which has εἰκαστός των θερετάς Νεήμας, and not θερετάς, which the Latin would require. The Syriac agrees with the Greek; see Dacier, "Hier. Lex.," art. Ναήμας, i, 38. The Greek text, in 18, that Nehemiah "offered sacrifice," implies no more than that he provided the sacrifices. Others, with some probability, infer, from his station at the Persian court and the high commission he received, that he was, like Zerubbabel, of the tribe of Judah and of the house of David. For, in the Haggadah introduced by the Samaritans into their Tohoroth in the 18th century, Nehemiah is called the "priest of the seed of David.")

Nehem'ah was cupbearer in the royal palace at Shushan, in the twenty-ninth year of Artaxerxes Longimanus (q.v.), or B.C. 447, learning the mournful and desolate condition of the returned colony in Judea (Neh. i, 2 sq.; comp. Klaernt, in the "Dörpf. Beiträ." i, 248 sq.), he obtained permission of the king to make a journey to Jerusalem, and there to act as lieutenant or governor (Heb. נְהֵמָא, Neh. vii, 14. On the title of honor given to Nehemiah [Neh. vii, 2; x, 1], Tirshatha, תִּרְשָׁחָה, נְהֵמָא, see Gesen. Thesaur. s. v.; Beneyf, Montammat, s. 196, identifies it with the Zend irvarēstā, "commander." But in Neh. vii, 65, 70, this title denotes not Nehem'ah, but Zerubbabel, as being co-equal with Ezra ii, 63, 70). Being furnished with this high commission, which included letters to the satraps and subordinates, and enjoying the protection of a military escort (ii, 9), Nehemiah reached Jerusalem in the year B.C. 446, and remained there till B.C. 434, being actively engaged for twelve years in promoting the public good (v, 14).

It is certain that Nehemiah was the founder of the future political and ecclesiastical prosperity of the
Jewish nation of this great achievement of their patriotic governor. How low the community of the Palestine Jews had fallen is apparent from the fact that from the 6th year of Darius to the 7th of Artaxerxes there is no history of them whatsoever; and that even after Ezra's commission, and the ample grants made by Artaxerxes in his 16th year, and the Persian conquest of Babylon still continued, both in wealth and numbers, which Ezra's government brought to them, they were in a state of abject afflication and reproach in the 20th of Artaxerxes: their country pillaged, their citizens kidnapped and made slaves of by their heathen neighbors, robbery and murder rife in their very capital, Jerusalem almost desolated. This was a thing which any which returned from captivity were welcome. Nehemiah refused to receive his lawful allowance as governor from the people, in consideration of their poverty, during the whole twelve years that he was in office, but to the nation changing a table, of which any who returned from captivity were welcome. Nehemiah returned to Persia B.C. 434, but soon heard of new abuses creeping in among the Jews, and he determined to visit Judea again. The time of this second journey is indeterminately stated as "after some days" (xiii, 6, 7), which many have understood as meaning a single year; but this is not long enough to account for such abuses as would require Nehemiah's presence. Prideaux (Connection, i. 520 sq.; comp. Jahn, Archdol. ii, i. 272 sq.; Einleitung, ii. 288 sq.) has shown sufficient reason for referring it to the second half of the reign of Darius Nothus, say B.C. 410. But Hävernick, Einleitung, p. 584, has certainly shown that in this visit B.C. 424. See further, Michaelis on Nehemiah xiii; Clericus, ad 10em; Petavius, Doctrina Temp. xii, 23; Cellarius, Dissertation. p. 130; Journ. of Sac. Lit. Jan. 1862, 446). See SEVENTY WEEKS. After his return to the government of Judea, Nehemiah enforced the separation of all the mixed multitude from Israel (Neh. xiii, 1-3), and accordingly expelled Tobiah the Ammonite from the chamber which the high-priest, Eliashib, had prepared for him in the temple (xiii, 4-9). Better arrangements were also made for the support of the temple service (xiii, 10-14), and for the rigid observance of the sabbath (xiii, 15 and 16). The last acts of his government was an effort to put an end to mixed marriages, which led him to “chase away” a son of Joiada, the high-priest, because he was son-in-law to Sanballat the Horonite (xiii, 23-29). It is not unlikely that Nehemiah remained at his post till about the year B.C. 405, towards the close of the reign of Darius Nothus, who is mentioned in xiii, 22. See DARIUS. At this time Nehemiah would be between sixty and seventy years old, if we suppose him to have been only between twenty and thirty when he first went to Jerusalem. That he lived to be an old man is thus quite probable, from his descendants, and the age declared by Josephus, who (Ant. xi, 5, 6) states that he died at an advanced age. Of the place and year of his death nothing is known. “On reviewing the character of Nehemiah, we seem unable to find a single fault (unless it be a slightly Ciceronian egotism) to counterbalance his many and great virtues. For pure and disinterested patriotism he stands unrivalled. The man whom the account of the misery and ruin of his native country, and the perils with which his countrymen were beset prompted to leave his splendid residence, and a post of wealth, power, and influence, in the first court in the world, that he might share and alleviate the sorrows of his native land, must have been pre-eminently a patriot. Every act of his during his government bespeaks one who had no selfishness in his nature. All he did was noble, generous, high-minded, courageous, and to the highest degree upright. But to stern integrity he united great humility and kindness, and a perfect impartiality, a rationalized patriotism, bin forethought, prudence, and sagacity in counsel, with vigor, promptitude, and decision in action. In dealing with the enemies of his country he was wary, penetrating, and bold. In directing the internal economy of the state, he took a comprehensive view of the whole, and administered the message he had been called to promote it. In dealing both with friend and foe, he was utterly free from favor or fear, con-
spicuous for the simplicity with which he aimed only at
doing what was right, without respect of persons. But
in nothing was he more remarkable than for his piety,
and the singleness of eye with which he walked before
God. Evidences of this are found in the dependance upon God, with prayer for his blessing and
guidance, and to have sought his reward only from
God." See Randall, Nehemiah the Tirshatha (Lond.
1874).
NEHEMIAH, BOOK OF, the latest of all the his-
torical books of Scripture, both as to the time of its
composition and the scope of its narrative in general,
and as to the supplementary matter of ch. xii in par-
ticular, which reaches down to the time of Alexander
the Great.
1. Authorship.—This book, which bears the title
NEHEMIAH'S Words, was anciently con-
ected with Ezra, as if formed part of the same work
(Eichhorn, Einleitung, ii, 627). This connection is
indicated by its first word, "And it came to pass," as
Ezra, though we might expect some from ch. ii, 7, 8,
9, and ch. vi, 5; and here also the writer discovers a
species of egotism never manifested by Ezra (Neh.
v, 14, 15; Eichhorn, Einleitung zu A. Test., ii, 619).
While the book as a whole is considered to have come
from Nehemiah, it consists in part of compilation.
He doubtless wrote the greater part himself, but some
portions he evidently took from other works. It is
allowed by all that he is, in the strictest sense, the author of the
narrative from ch. i to ch. vii, 5 (Hävernick, Einlei-
tung, ii, 99). The words and sentences which are so closely com-
piled, for he says in ver. 5, "I found a register," etc.
This register we find also in Ezra i, 1-70; hence
it might be thought that our author borrowed this part
from Ezra; but it is more likely that they both copied
from public documents, such as "the Book of the Chroni-
cles" (2 Ki. xxvii, 8-12), mentioned in Neh. xx, 19. Had
Nehemiah himself been Ezra he could not have so
agreed, if not identity, in the contents; but the two
records vary much in details, and are only reconciled
with difficulty. "The second part (ch. viii, ix, x)
is said to be marked by a strong Levitical or priestly bias,
different from the tone of the rest of the book, whose
inspiration will still tend in the main to be derived by
different words and phrases, and by the use of the
third person, instead of the first, when speaking of
Nehemiah. Hence critics differ in their opinions, some
ascribing these chapters to Ezra, some making them the
composition of an unknown author in a later age. The
third portion (ch. ix, xii, xiii) is again pronounced to
be the work of Nehemiah, though with certain ad-
ditions, which (in the estimation of these critics) are
seen to be excrescences, or which betray a different
authorship, chiefly on account of chronological facts
which are irreconcilable with the supposition that Ne-
hemiah could have appeared so late.
"The most of the supposed difficulties vanish, or rath-
er give place to a conviction of the unity of the book,
as soon as we take the proper position for looking at
the events narrated, as they would appear to Nehemiah, the
narrator of his own feelings and transactions. Such
a person does not write exactly in the order of time; nor
does he seem to be in the same proportion to each other in
his eyes and in the eyes of many of his readers. This
is notorious to every reader of memoirs and biographies,
particularly autobiographies. If at times there be
something peculiar in the arrangements of this book of
Nehemiah, as we have indicated that there is also in
Ezra, this ought to be admitted as a consequence of the
writer's own state of mind or circumstances. Certainly
those who have written later than the date of these
books have endeavored to arrange their details in a differ-
ent order, to serve their own purposes, have effected little as to the point of con-
secutiveness. This is seen in the case of the tolerably
respectable compiler of the third Book of Esdras, which is
preserved in the Apocrypha.
"On this other hand, the book appears from the course
of the life of Nehemiah (see below) to be a continuous
record, written in a lively, distinct, and energetic man-
er, such as is admitted by every one to be very suit-
able to the circumstances in which it is said to have
been composed. This is a fact which strikes us in reading
all the accounts—the building of the ruins, the
earlier and later reforms, and the sacred services at the
feast of tabernacles. Of course such different sub-
jects are not described in the self-same words or style; and
this diversity illustrates the working of Nehemiah's
mind as that of a man deeply interested in the affairs
in which he took an active part. It is only a perverted
ingenuity which would make these differences an evi-
dence that ch. vii, ix, x have come from a different
author. Those who wish to go into the particulars of a
verbal criticism may find the materials in Keil's In-
roduction to the Old Testament. He shows how the
difference in the use of the names of God is suitable to
the different circumstances in which he is used; how the
language of the Levites in prayer is naturally more akin
to the language of the law of Moses and of the
Psalms than to that of plain history; how the ex-
pression, 'the nobles and the rulers,' which is frequent
elsewhere, is wanting in this section; while instead of
it we once meet with the Mosaic term, 'chief of
the fathers,' or rather, 'heads of the fathers' houses' (ch.
vi, 18); though he might have mentioned that still
a different expression is found in this disputed section,
and in a passage which is confessedly genuine (ch. x,
29, and iii, 5); and that Ezra is not named among those
who signed the covenant, because he acted the part of
'mediator' in the transaction, as Moses had done before.
This pre-eminent position assigned to Ezra necessarily
threw even Nehemiah somewhat into the background,
and led him to speak of himself in the third person in-
stead of in the first, as in the rest of his book. Indeed
indeed, this was the more natural and more distinct, be-
cause the first person plural, 'we,' 'our,' is used throughout
the account of the sealing (ch. ix, x), which sufficiently
marks the writer as an eye-witness and party in the
transaction, yet one who wished not to appear singled
out from his countrymen, except where this was un-
avoidable. The general subject of his book is that in
which God does so mention himself it is with the addition, 'the
Tirshatha,' a peculiar word, of uncertain origin and
meaning, though unmistakably an attributive title of
the governor. Perhaps he may have used this title rather
than another, in these descriptions of ecclesiastic
affairs, because of the title being given to Zerub-
babel. The present form of the name, which has so
greatly honored the restoration of the church, while it occurs nowhere else.'

The mention of Jaddua as a high-priest (ch. xii, 11,
22) has occasioned much perplexity. This Jaddua ap-
pears to have been in office in B.C. 332, when Alex-
ander the Great came to Jerusalem (Joseph. Ant. xi, 8);
how then could he be named by Nehemiah? Some
(e.g. Vitriuga, Rambach) suppose the 10th and 11th
verses to be a later addition, which seems to be the
only reasonable solution; others (Hävernick, Keil) en-
deavor to show that Nehemiah wrote it, supposing that
he set down what he lived as if he were writing in the
year B.C. 780; and that Jaddua had at that time entered
on his office, so that he filled it for about forty years,
i.e. till B.C. 332 (see especially Hävernick's Einleitung,
ii, 530-534). But this Davidson rightly thinks im-
probable (see Horn's Introd. ii, 694). Some finally
Nehemiah, Book of 926

NEHEMIAH, BOOK OF

resort to the belief that Jaddua is only mentioned here as having been born, but not as yet an incumbent of high-priesthood. It is difficult in that case to see why he is named as all, as the writer could not have foreseen that an excommunication of the Maccabees by Nehemiah would follow. A similar addition by a still later hand, probably some member of the so-called "Great Sanhedrin," perhaps Simon the Just, its president, has evidently been made in the list of the Davidic line (1 Chron. iii, 23-24), which comes down to the 8th century B.C. See Geneal.

2. As to the date of the book, it is not likely that it came from Nehemiah's hand till near the close of his life. Certainly it could not have been written all before the expulsion of the priest recorded in ch. xiii, 3, 18—29, which took place about the year B.C. 415. The canonical character of Nehemiah's work is established by very ancient testimony. It should be noticed, however, that this book is not expressly named by Melito of Sardis (A.D. 170) in his account of the sacred writings; but this creates no difficulty, since he does mention Ezra, of which Nehemiah was then considered but a part (Eichhorn, Einleitung, ii, 627). Thus the Book of Nehemiah has always had an undisputed place in the Canon, being included by the Hebrews under the Law, as part of the Prophets, and by the Greeks, Jerome tells us in the Prolog. Gal. by the Greeks and Latins under the name of the second Book of Ezra. See Esdras, First Book of. "There is no quotation from it in the N.T., and it has been comparatively neglected by both the Greek and Latin fathers, perhaps on account of its simple character, and the absence of anything supernatural, prophetic, or mystical in its contents. St. Jerome (ad Paulinum) does indeed suggest that the account of the building of the walls, and the return of the people, the description of the priest, Levites, Israelites, and proselytes, and the division of the labor among the different families, have a hidden meaning; and also hints that Nehemiah's name, which he interprets conservator a Domini, points to a mystical sense. But the book does not easily lend itself to such applications, which are so manifestly forced and strained that even Augustine says of the whole Book of Ezra that it is "worse than the humanistic or prophetic De Civit. Dei, xvii, 86." Those however who believe in "nathan" as the original title of Ezra, Jerome's hint elaborately carried out may refer to the Ven. Bede's Alchorragia Expositio in Librum Nehemias, qui et Exer Secundum, as well as to the preface to his exposition of Ezra; and, in another sense, to Bp. Pilkington's Exposition upon Nehemiah, and John Fox's Preface (Park Soc.). It may be added that Bede describes both Ezra and Nehemiah as prophetae, which is the head under which Josephus includes them in his description of the sacred books (C. Ap. 1, 83).

4. The contents of the book have been specified above in the biography of the author. The work can scarcely be considered an itinerary, or rather a collection of notices of some important transactions that happened during the first year of his government, with a few scraps from his later history. The contents appear to be arranged in chronological order, with the exception perhaps of ch. xii, 27-43, where the account of the dedication of the wall seems out of its proper place: we might expect it rather after ch. vii, 1-4, where the completion of the wall is mentioned. The whole narrative gives us a graphic and interesting account of the state of Jerusalem and the returned captives in the writer's time, and, incidentally, of the nature of the Persian government and the condition of its remote provinces. The documents appended to it also give some further information as to the times of Zerubbabel on the one hand, and as to the continuation of the genealogical registers and the succession of the high-priesthood to the close of the Persian empire on the other. The view given of the rise of two factions among the Jews—the one the strict religious party, adhering with uncompromising faithfulness to the Mosaic laws, and the other by Nehemiah's advice, forming a tolerating party, ever imitating heathen customs, and making heathen connections, headed, or at least encouraged by the high-priest Eliaziabi and his family—sets before us the germ of much that we meet with in a more developed state in later Jewish history from the commence ment of the Maccabees to the final destruction of Jerusalem. Again, in this history as well as in the Book of Ezra, we see the bitter enmity between the Jews and Samaritans acquiring strength and definitive form on both religious and political grounds. It would seem from iv, 1, 2, 8 (A. V.), and vi, 2, 6, etc., that the depression of Jerusalem was a fixed part of the policy of Sanballat, and that he had the design of raising Samaria as the head of Palestine, upon the ruin of Jerusalem, a design which seems to have been entertained by the Samaritans in later times. The book also throws much light upon the domestic institutions of the Jews. We learn incidentally the prevalence of the sanctity of the sabbath, and of slavery as its consequence, the frequent and burdensome oppressions of the governors (v, 15), the judicial use of corporal punishment (xiii, 25), the tininess of false prophets as an engine of policy, as in the days of the kings of Judah (vi, 7, 12, 14), the restitution of the Mosaic provision for the maintenance of the daily sacrifices and the firstfruits of the Temple service (xiii, 10-3), the more free promulgation of the Holy Scriptures by the public reading of them (viii, 1); i x, 3; xiii, 1), and the more general acquaintance with them arising from their collection into one volume, and the multiplication of copies of them by the people. It is not improbable that the care of Ezra is the wrile and the handwriting himself (2 Mac. ii, 13), as well as from the stimulus given to the art of reading among the Jewish people during their residence in Babylon [see Hilkiah]; the mixed form of political government still surviving the ruin of their independence (v, 17; x), the reviving trade with Tyre (xiii, 16), the agricultural pursuits and wealth of the Jews (v, 11; xiii, 15), the tendency to take heathen wives, indicating, possibly, a disproportion in the number of Jewish males and females among the returned captives (x, 80; xiii, 3, 28), the danger the Jewish language was in of being corrupted (xiii, 24), with other details which only the narrative of such a writer as Nehemiah have preserved. All these details give us incidentally information of great historical importance.

(a) The account of the building and dedication of the wall (iii, xii) contains the most valuable materials for settling the topography of Jerusalem to be found in Scripture. See Jerusalem.

(b) The list of returned captives who came under different leaders from the time of Zerubbabel to that of Nehemiah (amounting in all to over 42,500 adult males, and 7387 servants), which is given in ch. vii, conveys a faithful picture of the political weakness of the Jewish nation as compared with the times when Judah alone stood out as a fighting nation. (2) The number of Jews enumerated in Nehemiah is rather a collection of notices of some important transactions that happened during the first year of his government, with a few scraps from his later history. The contents appear to be arranged in chronological order, with the exception perhaps of ch. xii, 27-43, where the account of the dedication of the wall seems out of its proper place: we might expect it rather after ch. vii, 1-4, where the completion of the wall is mentioned. The whole narrative gives us a graphic and interesting account of the state of Jerusalem and the returned captives in the writer's time, and, incidentally, of the nature of the Persian government and the condition of its remote provinces. The documents appended to it also give some further information as to the times of Zerubbabel on the one hand, and as to the continuation of the genealogical registers and the succession of the
NEHEMIAH, BOOK OF

' the men of the people of Israel.' The enumeration of twenty-one and twenty-two, or, if Zidkiah stands for the head of the house of Zadok, twenty-three chief priests in x, 1-8, xii, 1-7, of whom nine bear the names of those who were heads of courses of David's time (1 Chron. xxiv) [see JERUSALEM], shows how, even in their wasted and reduced numbers, they struggled to preserve these ancient institutions, and also supplies the reason of the mention of these particular twenty-two or twenty-three names.

(3.) Miscellaneous information contained in this book embraces the hereditary crafts practiced by certain priestly families, e.g. the apothecaries, or makers of the sacred ointments and incense (iii, 8), and the goldsmiths, whose business it probably was to repair the sacred vessels (iii, 8), and who may have been the ancestors, so to speak, of the money-changers in the Temple (John ii, 14, 15); the situation of the garden of the kings of Judah by which Zedekiah escaped (2 Kings xxiv, 4), as seen in iii, 10; and statistics, reminding one of Domesday-Book, concerning not only the cities and families of the returned captives, but the number of their horses, mules, camels, and ass (ch. vii.): to which more might be added.

5. In respect to language and style, this book is very similar to the Chronicles of Ezra. Nehemiah has, it is true, quite his own manner, and, as De Wette has observed, certain phrases and modes of expression peculiar to himself. He has also some few words and forms not found elsewhere in Scripture; but the general Hebrew style is exactly that of the books purporting to be of the same age. Some words, as נֶדֶשׁ or נֶדֶשׁ, "cymbals," occur in Chronicles, Ezra, and Neh., but nowhere else. סֹבֶּס occurs frequently in the same three books, but only twice (in Judg. v) besides. רָכָּב or רָכָּב, "a letter," is common only to Neh., Esther, Ezra, and Chronicles. רָכָּב, and its Chaldee equivalent, אָסָב, whether spoken of the palace at Susa or of the Temple at Jerusalem, are common only to Neh., Esther, Esther, Dan., and Chronicles. לָשׁהַ נָּבִיא, שֵׁנָבִיא, and its Chaldee equivalent, אֶת הָגָם, "the God of Heaven's", are common to Ezra, Neh., and Daniel.

6. Commentaries.—The special exegetical helps on the Book of Nehemiah are not numerous: Beie, In Nehemia allegoricorum expositio (in Opp. iii; and Works, by Giles, i, 1); Brez, Comment. in Nehemia (in Opp. iii); Wolphuis, In Nehemia libros commentarium (Tigur. 1570, fol.); Strigel, Argumentum et Scholia (Lips. 1571, 1572, 8vo); Pikeltoft, Expositio on certain chapters (Lond. 1665, 4to); also in Works, p. 273; Pempel, Explantatio [included. Ezra and Dan.] (in Works, Lond. 1585); Rabani, Adnotationes (in his work on the O. T. iii, 107); Sanctius, Commentarius [included. Ruth, etc.] (Lugd. 1629, fol.); Fersus, Eklavyangy (Mayence, 1619, 8vo); Commius, In historia, Nehemiae, etc. [included other books] (Lugd. 1640, fol.); 4to); In Ezra, [included. Ezra and Dan.] (Par. 1648, fol.); Trapp, Commentary [included. Ezra, etc.] (Lond. 1666, fol.); Jackson, Explanation [included. Ezra and Esth.] (Lond. 1657, 4to); De Oliva, Commentarius [included. other books] (Lugd. 1664, 1673, 2 vols. fol.); Bertheau, Commentary [included. Ezra and Esth.] (in the English edition. Leip. 1682, 8vo); Barde, Étude critique et exeégétique (Tbingen, 1861, 8vo); also, Lange's and Keil and Delitzsch's Bible-works. See Commentary.

Nehemia [Nehemiah = Nehemiah, the Grecized form (retained in the A. V. of the Apocalypse) of the name Nehemiah (q. v.), namely, (a) The contemporary of Zerubbabel and Jeshua (1 Esdr. v. 8); (b) The governor, son of Hachaliah (1 Esdr. v. 40).]

Ne'LiLOTH (Heb. נֵלְיָלוֹת, נֵלְיָלוֹת; with the art., the plur. of נֵלָיָל, which, however, is not found), occurs only in the title of Ps. v. where the A. V. renders "upon Ne'liloth" (נֵלְיָלוֹת). The Sept., Aquila, Symmachus, and Theodotion translate ἐν ἑλιήμων, and the Vulgate, "pro eo quae heredita- tain consequitur," by which Augustine understands the Church. The origin of their error was a mistaken etymology, by which Ne'liloth is derived from ליל, nachal, "to inherit." Hengstenberg maintains that the title with this derivation has a mystical or spiritual meaning, "for the inheritance," or "upon the lot," i.e. of the righteous and the wicked. Other etymologies have been proposed which are equally unsound. In Chaldee לילא, nachil, signifies "a swarm of bees," and hence Jarchi attributes to Ne'liloth the notion of multitude, the psalm being sung by the whole people of Israel. R. Hai, quoted by Kimchi, adopting the same origin for the word, explains it as an instrument, the sound of which was like the hum of bees, a wind instrument, according to Sonntag (De tit. Petr. p. 430), which had a rough tone. Michaelis (Suppl. ad Lec. Heb. p. 1629) suggests, with not unreasonable timidity, that the root is to be found in the Arab. nachalo, "to winnow," and hence to separate and select the better part, indicating that the psalm, in the title of which Ne'liloth occurs, was "an ode to be chanted by the purified and better portion of the people." It is most likely, as Gesenius and others explain, that it is derived (instead of לילא) from the root לילא, chali, "to bore, perforate," whence לילא, lila, a flute or pipe (1 Sam. x, 5; 1...
NEIHE

Kings i, 40), so that Neheloth is the general term for perforated wind-instruments of all kinds, as Neginoth denotes all manner of stringed instruments. The title of Ps. v is therefore addressed to the conductor of the Temple choir 'who played upon flutes and the like, and these are directly alluded to in Ps. lxxxvi, 7 (דָּלֵד, הֶלֶד) the players upon instruments' who are associated with the singers are properly "pipers" or "flute-players." See FLUTE. Others, like Aben-Ezra among rabbinical commentators, and Hizig among living scholars, understand it to be the name of an air to which the psalm was sung; "after, or according to, the instruction." First of all, Neheloth was a musical choir, having their chief seat at a town which bore a cognate name, perhaps Hilen (1 Chron. vi, 58; comp. his explanation of Neginoth). The use of the preposition בּ in this connection does not justify the rendering "upon," but requires us to understand that the psalm under consideration was to be chanted in imitation or in the style of (בּ) the air or musical instrument in question. See PSALMS.

Ne'hushtan (Heb. Ne'hasha'tan, נֶחֶשְׁתַּנְתָן), δίσφωστος, if genuine, i. e. Naxaçth, as it is called by Empêxus, is a jocular misnomer, and a contemptuous title given to the copper ('bronze') serpent which Moses had made during the plague in the wilderness (Num. xxix, 8 sq.), and which the Israelis worshiped (2 Kings xviii, 4). See BRAZEN SERPENT. 'One of the first acts of Hezekiah, upon coming to the throne of Judah, was to destroy all traces of the idolatrous rites which had gained such a fast hold upon the people during the reign of his father Ahaz. Among other objects of superstitious reverence and worship was this singular metallic effigy, which was preserved throughout the wanderings of the Israelites, probably as a memorial of their deliverance, and according to a late tradition was placed in the Temple. The lapse of nearly a thousand years from the act of Hezekiah to the present relic of a mysterious sanctuary which easily degenerated into idolatrous reverence, and at the time of Hezekiah's accession it had evidently been lost an object of worship, for unto those days the children of Israel did burn incense to it; or as the Hebrew more fully implies, 'had been in the habit of burning incense to it' (נֶחֶשְׁתַּנְתָן, כָּלָא, had been incense-burners). The expression points to a settled practice. See also ABEN-HEZRA rendering, 'And he called it Nehushtan,' understood with many commentators that the subject of the sentence is Hezekiah, and that when he destroyed the brazen serpent he gave it the name Nehushtan, 'a brazen thing,' in token of his utter contempt, and to impress upon the people the idea of its worthlessness. This rendering has the support of the Sept. and Vulgate, Junius and Tremellius, Munster, Clericus, and others; but it is better to understand the Hebrew as referring to the name by which the serpent was generally known, the subject of the verb being indefinite—and one called it 'Nehesh'tan.' Such a construction is common, and instances of it may be found in Gen. xxvi, 20; xxxii, 29, 30, where our translators correctly render 'his name was called,' and in Gen. xlviii, 1, 2. This was the view taken in the Targ. Jon. and in the Peshito-Syrac. 'And they called it Nushesh'tan,' which Buxtorf approves (Hist. Serr. À. cap. vi). It has the support of Luther, Pfeiffer (Dah. Verz. cent. 3, loc. 5), J. D. Michaelis (Biblia füri Ungeli), and Bunsen (Biblischer), as well as of Ewald (Gesch. iii, 622), Keil, Thenius, and most modern commentators. It would, however, have been better had the preservation of the brazen serpent till the time of Hezekiah is, as Bunsen remarks, a sufficient guarantee not only for the historical truth of the narrative in Numbers, but also for the religious significance of the symbol; for had it been, as some have supposed, an empty and imaginary thing, it would not have been suffered by David or Solomon to remain (Biblischer, v, 217). The fact also that it is referred to by our Lord, as in some sense resembling him (John iii, 14, 15), not only vouches for the same thing, but further imposes on us the duty of seeking in it a deeper significance than that which the mere narrative of Moses would lead us to attach to it. We may, therefore, dismiss at once all the attempts of rationalists to resolve the facts of the Mosaic narrative into mere ordinary occurrences; such as that of Bauer, who finds in the cure of the Israelites by looking at the brazen serpent only an instance of the curative power of the imagination (Hebr. Gesch. ii, 320), or that of Puller, which holds that the brazen serpent was so far from being at some distance from the camp, and the sight of it moving the Israelite who had been bitten to walk to it, the motion thereby produced served to work off the effects of the poison, and so tended to a cure (Comment. iv, 4, 188 sq.); or that of Hofmann, who ingeniously suggests that the story of the brazen serpent was the title given to the volume in which medicine and doctors were to be found by those who had faith to go for them. It is said to see a man like Bunsen falling back on the old exploded rationalistic explanation of this occurrence. 'The fixing of the gaze on the image brought the mind to a state of repose, and to moderate the cure of the poison' (Bunsen, v, 217), as if this were all! We may pass over also the notion of Marham, according to whom the serpent of brass was an implement of magic or incantation borrowed from the Egyptians, who he says 'imprimis μαγικ τίθειν ὑπόθεσιν ου σερπιντον ιντιματον εκλεξεναιτο' (Canón. Chron. p. 149); for this is so purely gratuitous, and so opposed to the narrative of Moses, as well as the religious principles and feelings which he sought to inculcate (comp. Lev. xix, 26), that it must be at once rejected (see Deyling, Obs. Sac. ii, 210 sq.). The traditional belief of the ancient Jews is that the bronze serpent was the symbol of salvation, and that the Israelites were saved thereby, not as the result of his faith in God, who had appointed this method of cure.' See Schachan, DE SERPENTI A MATAE SIGNIFICATIONE (Labed. 1718); Nötting, DE SERP. AM. SERVATORIA TYPO (1678); Huth, SERPENS EXALTATUS NON CONTRADITIO sed contenevit imago (Erlang. 1786). See SERPENT.

Ne'el (many Ne'el') (Heb. נֵאֵל, נֵא'ל, נֵא'ל כֶּלֶב, dwelling-place of God; Sept. Νανά, r. Ανα, Ιανά, Vulg. Neiel), a town in the territory of Asher, near the southern or south-eastern border (Josh. xix, 27). Eusebius and Jerome (who call it the 'village Beatoana, Beato-avaiac') place it in the mountain (Carmel), sixteen miles east (N.?) of Caesarea Palestina. Where medicinal springs were found (Onomast. a. v. Aniel, Ανάιαν, the reading of the Alexand. MS. of the Sept. in the above passage) a position which exactly agrees with that of modern village Bitam, adjoining the spring of Athlit, a short distance east of Athlit (Van de Velde, Map). The description of the boundary is quite indistinct at this point [see TURKH]; and if we regard merely the associated names Jiphatath-el (the present Jefat) and Cabul (now Kabul), we might locate Neiel at the modern Nisr (supposedly the 'ring'), a village strategically situated half-way between them (Robinson, New Res. iii, 87, 103); although Beth-emek (q. v.) is mentioned immediately before Neiel, and lies much farther interior (at Amkah). Keil (Comment. on
NEIGH

Josh, ad loc.), thinks that the statement of the text as
signs both these latter places a position south of the
border and within Zebulun; while Knobel (Commentary,
ad loc. Josh.) is inclined to identify Neiile with the
Crst of Josh. xix, 15, which, however, lay too far east.

For other views, see Rosenmuller, Scholia, ad loc.

Neiile (τηταλ, τεταλ', prop. to be clear or bright;
hd. to emit a sharp sound, as of a sk#: so often; apud
G. W. B. Gray, Suggestion of a Theory of Ancient
Scripture, i. 15, 8; II. 1, 5, 8) and the bellowing of a
bull (Jer. i, 11); but in both cases as indicative of lustful
desire.

Neighbor (usually τηλεις, elsewhere "friend;", παλιος, one's nearest dweller). This word in its gen-
eral sense signifies a person near, and one connected with
us by the bonds of humanity, and whom charity re-
duire us that we should consider as a friend and relation
(Deut. v, 20). At the time of the review Saviour, the Phar-
isees had restrained the meaning of the word neighbor
to those of their own nation or to their own friends,
holding that to hate their enemy was not forbidden by
the law (Matt. v, 43). But our Saviour informed them
that the whole world were neighbors; that they ought
not to do to another what they would not have done to
themselves; and that this was the sum of his instruction
of enemies. The beautiful parable of the Good Samaritan
is set forth to illustrate this principle (Luke x, 29-37).

See Charity.

Neil, John, a Presbyterian minister, was born in
1804 in Antrim Co., Ireland. His parents, emigrating to
the United States, settled upon a farm in Washington
Co., Pa. He was early taught the great truths of the
Bible, and the way of salvation according to the faith
and practice of the Associate Reformed Presbyterian
Church. He was educated at Washington College,
Washington, Pa.; studied theology at the Associate Re-
formed Seminary at Alleghany City, Pa.; was licensed in
1836, and in 1838 was ordained pastor of the three
congregations of Mount Jackson, Centre, and Mahoning,
Pa. In 1849, after laboring earnestly and faithfully for
eleven years, he was released from Mahoning congre-
gation; in 1857, on account of failing health, he also
resigned Centre congregation, continuing thereafter his
labors with the Mount Jackson congregation until 1860,
when he became unable to preach and retired from the
ministry. He died in 1861. Mr. Neil was a close stu-
dent of the Scriptures. As a preacher he was more in-
trusive than attractive. He always endeavored to
make thorough pulpit preparation, and often wrote his
sermons a second time before delivery. See Wilson,
Pioneer Preachers, 1882, p. 361.

Nelle, John, D.D., an English divine, flourished in
the reign of king James II as dean of Ripon. He
was born about the beginning of the 17th century,
and was noted among his contemporaries. See Stoughton,

Nelle, Richard, D.D., an English prelate of con-
siderable note, flourished in the reign of king James I,
i.e. some time about the opening of the 17th century.
He was one of the learned of this age, and after due
educational training became a school-teacher, but
afterwards took holy orders, and rapidly rose to posi-
tions of influence. He was finally elevated to the epis-
copate, and successively held the sees of Rochester,
Lichfield and Coventry, Lincoln, Durham, and Win-
chester, and was then made archbishop of York, preten-
sions which are said to have been secured by Nelle by
most lase and unchristian conduct. He was subser-
vient to the interests of king James at the expense of
his own manhood, and is generally spoken of as the
ecclesiastical courtier of king James's reign. Says Perry
(Eccles. Hist., i, 208, "If we were to write down against
this prelate all that is deliberately said of him by his
metropolitan, archbishop Abbot (Collect's State Trials,
vol. ii), his character (i.e. Nelle's) would be by no
means a flattering one." Abbot was bid to beware of
him, for that "he was ever and in all things naught.
That he did all the worst offices that ever he could, and
was still stirring the coals to procure to himself a repu-
tation." "I know not," said another, "what the bishop of
Lichfield does among you, but he hath made a shift to
be in your graces, and generally well known in your
book. Though the friend and ally of Lord, he was yet far
his inferior, and Neile is universally spoken of as "neither conspic-
uous for learning nor for diligence in his office. He
did not preach once in twelve years, . . . but knew how
to please both James and Charles. He was one of a
class of prelates whom the Church of England can never
be proud." Archbishop Nelle died in 1640. See Perry,
Hist. of the Ch. of Eng., i, 191 sq.

Neill, Hugh, an American divine of the colonial
period, came to this country about the opening of the
last century, and labored in Pennsylvania and New
Jersey. In the mother country he was a Nonconformist,
and labored for years as Presbyterian minister both in
England and in New Jersey, where he greatly disting-
ushed himself. He was appointed to holy orders in the
Anglican establishment in 1749 by the bishop of
London, and was at once appointed to missionary work.
During the following fifteen years—the extent of his
work in this country—his sympathies were especially
directed to the negro race, whose love and confidence he
granted an early recognition. See the Life of Neill, in
the Ch. of Eng. in the Colonies and foreign Dependenc-
ies of the British Empire, iii, 379-81, 457; Hawkins, Eccles.
Hist. p. 126 sq.

Neill, William, D.D., an eminent Presbyterian
divine, was born near McKeesport, Alleghany Co., Pa.,
in 1778. His parents were killed by Indians while he
was yet a child, so that he was raised by friends. He
was engaged in a store at Canonsburg, Pa., when the
question of the Rev. Dr. Neill came to his notice, and he
soon decided upon the ministry. He pursued his
preparatory studies in the Old Academy, which after-
wards became Jefferson College, Pa.; graduated at
Princeton College in 1803, and acted as tutor there,
during which time he studied theology. In 1805 he
was licensed by the New Brunswick Presbytery; in 1805
was ordained pastor of a Church at Cooperstown, N. J.;
in 1809, of the First Church, Albany, N. Y.; in 1816, of
the Sixth Church, Philadelphia, where he continued to
labor until 1824, when he was called to the presidenc
of Dickinson College, at Carlisle, Pa., then under the
control of the Presbyterian Board of Education. There Dr. Neill labored for five
years, when long-continued difficulties, which could
not be controlled, prompted him to resign, and by the
action of the trustees the college passed into the hands
of the Methodists. On leaving Carlisle, in 1829, he
became secretary and general agent for the Board of
Education, which office he held for two years. In speak-

...
Ephesians (1850):—The Divine Origin and Authority of the Christian Religion (1854):—A Discourse reviewing a Ministry of Fifty Years (1857). He also for some years edited the Presbyterian Magazine, and contributed papers to several of the religious periodicals. After his death there was published a volume of Sermons, with his Autobiography and a Commemorative Discourse by the Rev. Dr. J. H. Jones. See Wilson, Freib. Hist. Almanac, 1861, p. 102; Allibone's Dict. of Authors, n. s.; 'Ameriean Presbyterian Reunion Memorial Volume, 1857-1871, p. 128-133. (J. L. S.)

Neilson, John, a Scotch martyr to religious liberty, was a nobleman of considerable influence in Galloway. He had enjoyed superior educational advantages, was by nature quite talented, and enjoyed an unblemished character. But he was a Covenanter, and consequently subjected to severe persecutions on the part of the Anglican clergy. When the people of Galloway rose in self-defence, he joined them; and, notwithstanding the cruel treatment which he and his family had received from Turner, Mr. Neilson argued strenuously and successfully against the proposal of some to put the oppressor to death. As the prelates could not conceive that the persecuted Presbyterians would have dared to rise in self-defence unless there had been a widely extended conspiracy, they determined to extort a confession of the nature and extent of this plot from such of the prisoners as were certain to be acquainted with it if it existed. For this reason they resolved to put Neilson to the torture of the boot. In vain did they crush his leg in this fearful engine of torture; shrinking nature attested his agony, but his soul was clear of the guilt whereby he was charged, and he would not blacken it by making a false acknowledgment of a crime of which he was innocent. When the persecutors found that they could extort nothing from him but groans and anguish, they condemned him to suffer, along with his guiltless friends, the shorter pang of death. See Hetherington, Hist. of the Church of Scotland, p. 280; Wodrow, ii, 53.

Neilson Brothers. See Moravians.

Neith is the name of the female divinity of wisdom among the ancient Egyptians. Her name, which means "I came from myself," leads to the supposition that she was an impersonation of nature. She was chiefly worshipped in the Delta, where a city was built bearing her name. Her temple, the largest in Egypt, was at Asis, the king of which could not raise his head. It was open to the sky, and bore an inscription, "I am all that was, and is, and to be; no mortal has lifted up my veil, and the fruit which I brought forth is the sun." Ranking next to Ptah, the most exalted of Egyptian divinities, she is to the female deity what Ptah (q.v.) is to the male; and indeed so close are the functions of the two conceived or confounded in some representations of them that Neith may be briefly defined as the female counterpart of the great demigod. Ptah is the primary material element in nature, Neith the primary conceptive element. He is the father of the sun, she is the mother of the same luminary, and one of her titles is consequently "the great con- engenderer of the sun" (Bunsen, i, 386; Kenrick, i, 390). Ptah is the primordial fire, while Neith is the primordial space or chaos, self-producing, co-existent with him, and co-equal; or, in other words, "manifest or invisible" everywhere diffused as the material basis of all forms of created existence. Neith is called also Muth, the universal mother and queen of heaven. Neith wears the red crown of Lower Egypt, indicating the proper seat of her worship; but her monuments are found in the upper region also. By reversing her hieroglyphic signs NT (i.e. by reading them in the European instead of the Asiatic manner), may have been formed Athena in Greek and Astarte in Hebrew, each of which is supposed to have been founded from Sinai. The owl, her favorite bird, is also found upon the coinage of the Delta; but the virgin mother of Egypt seems to have had little else in common with the Minerva who sprang full armed from the brain of Jupiter. See Mmova. A statue of Neith is said to be in the Egyptian Room of the British Museum. Neith is generally represented in green, a sign that she was connected with the under world, and invisible to mortals; a festival of "Burning Lamps" was held in her honor. See Bunsen, Egypt's Place in History, vol. i; Kenrick, Anc. Egypt under the Pharaohs, vol. i; Rouge, in Revue Archéologique (huitième année), p. 40 sq.; Hardwick, Christ and other Matters, ii, 248 sq.; Baur, Symbolik and Mythologie, vol. ii, pt. 1, p. 43; Trevor, Ancient Egypt, p. 134, 187, 162.

Neith is the name of a Celtic divinity who was superstitiously revered even in Christian Scotland. The primitive significance of the name is to wash or purify with water, and the name was probably given to this divinity because of the presence of the water element. She was the goddess of fountains, to which this day are regarded with particular veneration over every part of the Highlands. "The sick, who resort to them for health," says Brand (Popular Antiquities of Great Britain, ii, 376), "address their vows to the presiding powers and offer presents to gain their favor. The presents generally consist of a small pile of money or a few fragrant flowers." See the article HOLY WELL.

Nekam, a Mohammedan martyr to the Christian cause, flourished near the middle of the 11th century. He was of an influential family, but, convinced of the errors of Mohammedanism, he embraced Christianity and became a Jacobite. His parents and friends forsook him, and he consequently retired to the church of St. Michael at Moctara, where, after a short stay, he was urged by the monks to retreat with them to the convent of St. Macarius. He refused to join them, on the ground of his obligation to publicly confessing Christ, especially to the pagans, which caused him much suffering. He became Christ's servants on earth. He went to Cairo, and there boldly presenting himself in the public streets, was imprisoned and condemned to death, because of his apostasy. All efforts to reclaim him, or to feign madness in order that his life might be saved, he refused as improper means, and he was consequently beheaded. The corpse was given up to his friends and buried near the church of Moctara, but the patriarch Abd-el-Mesiah removed it within the building, and erected an altar in honor of the noble martyr. See Neal's Hist. Holy East. Ch. (Patriarchate of Alexandria, ii, 215, 716).

Ne'kob (Heb. id., but only with the art., נְכֹב; Sept. καὶ Νάφσω, v. r. Νάφσω, Ναβεί; Vulg. quis est Necho), given in our version as one of the towns on the boundary of Naphtali (Josh. xix, 33 only), apparently between Adami and Jabneh. A great number of commentators, from Jonathas to Targum, and Jerome (Vulgata as above) to Keil (Jordan, ad loc.), have taken this name as being connected with the preceding—Adami-han-Nekob (i.e. Adami [of] the Caravans) (so Jumius and Tremellius, "Adamei fossae"); and indeed this is the force of the accentuation of the present Hebrew and Syriac, as well as the Arabic and Persian, the two as distinct, and in the Talmud the post-biblical names of each are given, that of han-Nekob being Tisad-dathā (תִּסָדָתָה), Gemara Hieros. Cod. Megilla, in Holland, Pallest. p. 545, 717, 817; also Schwarcz, Palestina,
NEKODA 891

NELLO

p. 181). Of this more modern name Schwartz suggests that a trace is to be found in "Heshdî, three English miles N. from al-Chatti." Hackett suggests Necker, near Ramah, on the road to Akka (Illustr. of Script. p. 244). But these suggestions, however, are superfluous.

See ADAM.

Neko'da (Heb. Neke'da), distinguished Sept. Neke'da, v. n. Neko'da and Neke'dauv, the head of the family of the "Temple servants" who returned with Zerubbabel from Babylon ( Ezra ii. 48; Neh. vii. 50). B.C. 535. A man of the same name is mentioned in Ezra ii. 60; Neh. vii. 62, as the progenitor of certain persons who on the return from Babylon reoccupied the temple. It would seem that they claimed to be Israelites; but as the Nethinim are mentioned immediately before, and neither of the associated names occurs again, we may presume that they were finally determined to be descendants of the above-named non-

ISRAELITE (see Keil, ad loc.). See NETHINIM.

Nekoth. See SPIRITS.

Néla's, CORNILLE FRANÇOIS DE, a learned Belgian priest, was born in Bruges on June 5, 1786. He was educated at the University of Louvain, and took the degree of licentiate May 6, 1760. Almost immediately he became principal of the College of Mechlin, and, in addition, the management of the library of the Academy was intrusted to him. He made himself advantageous-knowledge in his literary work by studies taken up on various points of history and philosophy. He was nominated canon of Tournay in 1755, and in 1767 vicar-general of that city; he also held for a time the vicari-ate-general over the province of Tournaisis. Upon the exclusion of the Society of Jesus from the country in 1773, he was designated as a member of the royal mission sent to examine the studies instituted at Brussels. The arch-bishop Maximilian, afterwards elector of Cologne, having appreciated his merit in a visit that Néla made to the Belgian provinces, signified him to the emperor Joseph II, who nominated Néla to the bishopric of Antwerp, Oct. 25, 1784. Although he owed his elevation to the house of Austria, his conscience was greatly alarmed by the religious innovations that the emperor Joseph II wished to introduce; and as early as May 22, 1786, he addressed remonstrances to the government concerning the order of publishing from the pulpits the proclamations of the police and others, and several days after representations upward the suppression of societies, processions, and upon impediments that invalidate marriage. The same year he opposed the imperial edict which instituted a new form of concourse for conferring benefices; later he wrote against the suppression of episcopal seminaries. The death of Joseph II brought some changes, and on July 15, 1789, Néla, who had shown himself one of the most ardent enemies of France, wrote to the emperor Francis II to justify and excise his conduct during the Braban-

fome revolution. The 21st of April following he went to Brussels, where the states were convened, and was cordially welcomed by the emperor. But the revolution advanced rapidly, and at the approach of the French army Néla, who had everything to fear, fled in haste from Antwerp, June 28, 1794. He sought first an asylum at Breda, but could not long remain in that town, and made his way to Rotterdam, and in 1795 went over into Germany. After having sojourned several months at Göttingen and at Osnabrück, then in Switzerland at Zurich, near Basel, of whom he was an intimate friend, he passed to Bavaria, and shortly after to Italy, where he dwelt successively at Florence, Parma, Bologna, Rome, and Naples. He found at last a welcome hospitality in a convent of Camaldulenses near Florence (1797). He died, according to Heber (August 26, 1798), among the works of this prelate, Éloge funèbre de l'Empereur François I (Louvain, 1765, 4to, in Latin; Brus-

sels, 1766, 4to, in Latin and French):—Éloge funèbre de Marie-Thérèse (Brussels, 1780, 4to and 8vo). This eulogy, written in French, is considered much superior to the one composed by the abbé de Boismont:—Belgicorum rerum Prodromus, sive historia Belgica ejusque scriptoribus præcipui commentatio (Paris, 1735, 8vo).

M. de Neißenberg paid it the greatest éloge in his edition of the catalogue of the Bibliothèque de la Monarchie, ou revue des écoles philosophiques (1789, 1798, 2 vols. 8vo; enlarged edition, Parma, 1795, 8vo; Rome, 1797, 4to). In the collections of the Academ-emy of Brussels, 1777, and following year, are found the following, by Néla: Mémoire sur l'action Brabant; sur les exigés et facilitations de nos laïques; sur la paix Brunehaut dans le Tournaïs; sur la constitution municipale et sur les privilèges accordés aux villes des Pays-

Bas; sur les écoles et sur les études d'humanités. We also have from Néla numerous Mandements and Lettres pastorales, either in Flemish or in French. Among the manuscripts that he has especially a carbon-

interest, Questionum Camaldulensium libri quattuor, et Europae futa, mores, disciplina, ab inaevo seculo XV usque ad finem seculi XVIII. These two works were on the point of being published when death removed their author, who bequested them to the convent of the Canons Regular of the Camaldoli, where he had found asylum. So: Synopsis actuum ecclesie Antwerpiaensis, etc., by De Ram; Mémoire de l'Académie des Sciences de Bruxelles, passim; Documents particuliers.—Hoefr, Nieuw Bijlüg. Générale, s. v.

Néllor, GEOFFREY CHRISTOFF, Count, a German can-

nonist, was born at Aurb (bishopric of Würzburg) in 1710. He entered holy orders in 1748, was nominated professor of the Chroniques in the University of Tübingen, where he received a carbon-

icate; he next became counsellor of the elector of Trèves, and was then elevated to the dignity of count palatine. He died at Trèves in 1788. We have of his works, Principia juris publici ecclesiasticorum Catholicorum et statum Germaniae accommodata (Frankfort, 1748 and 1768, 8vo); De Concordia Germaniae (Augsburg, 1790):—De Jus Jurisprudentiae Trevisorum sub Romanis (ibid., 1752):—De Jus Jurisprudentiae Trevisorum Belgica (ibid., 1752):—Jus Jurisprudentiae Trevisorum ante-Romanas, sub Romanis, sub Francius et sub Germanias, in the Prodomus historiae Trevisanae of Montheim;—Kurzer Unterricht von den alt-völsich und dem heutigen Niederdeutschen Pfeffen und Hellen (ibid., 1763):—Disse-

sertatio in Dogoberti diploma Horrense (ibid., 1770):—many juridical dissertations, united in one collection, published at Trèves in 1776 (4to). See Meusel, Lex-

ikon, s. v.; Weidlich, Nachrichten, vol. ii and iv.

Nell, Nello, an Italian painter of Pisa, who flourished in the last quarter of the 13th century. He is remembered as the author of a Madonna painted on panel in the old church of Tripale at Pisa, signed Neullus Nellas de Pisa me pictau, 1299. See Spoerer, Böck. Hist. of the Fine Arts, ii, 616.

Nell, NUCRlla PLATELLA, an Italian painter of a noble family, who devoted herself to religious as well as to secular art, was born at Florence in 1329. She be-

came a nun in the Dominican Convent of St. Catherine at Florence, and without other assistance than a collection of designs by Fra. Bartolomeo di S. Marco, she at-

tained considerable excellence in painting. Her pro-

ductions are generally in the style of that artist, although she also imitated other masters. Among them are a picture of the Crucifixion, with a number of small fig-

ures finished; a Descent from the Cross, said to be after a design by Andrea del Sarto in the church of her order at Florence; and an Adoration of the Magi, of her own composition, possessing great merit. She died in 1357.

Nello, BERNARDO DI GIO FALCONI, an old painter of Pisa, whose works were mostly of a religious character, flourished about 1380. He was a distinguished artist in his time, and Lanzi says he still merits consideration. He painted many pictures in the Cathedral at Pisa. He is supposed to be the same as Nello di Vanni, who with other Pisan artists painted in the Campo Santo in the

Nelson, David, M.D., an American Presbyterian minister and educator, was born near Jonesborough, in East Tennessee, Sept. 24, 1738. He was educated at Washington College, and after graduating in Philadelphia, returned to Kentucky at the age of nineteen, intending to practice medicine; but the war of 1812 having commenced, he joined a Kentucky regiment as surgeon, and proceeded to Canada. He afterwards accompanied the army of generals Jackson and Coffee to Alabama and Florida, and after the establishment of peace settled in Jonesborough, where he resumed his medical practice with great success. While away at war he became estranged from his early religious convictions, and in part at least espoused infidel theories. He now became more seriously convinced of his dependence on God, and, reawakened and converted, he determined to forsake a lucrative professional career for the purpose of entering the ministry, and was licensed to preach in April, 1825. He preached for some three years in Tennessee, where he was at the same time connected with the Culverinist Magazine, published at Rogersville. In 1828 he became pastor of the church of Danville, Kentucky, where he established his successful school. In 1830 he removed to Missouri, and was chiefly instrumental in establishing Marion College, of which he became the first president. In 1836 Dr. Nelson, who was a warm emancipationist, owing to a disturbance growing out of the slavery question, removed to Illinois, and at Oakland, near Quincy, established an institute for the education of young men, especially for such as were preparing to become missionaries. Here he exhausted his pecuniary means, and died Oct. 17, 1844. His most remarkable work is his Cause and Cure of Infidelity (1836 and often). The manuscript of Wealth and Honor, which he left incomplete, was lost, it is said, furnished from his hands. He also wrote many occasional articles on missions, baptism, etc., which appeared in the New York Observer and other papers of the day. See Sprague, Annals of the American Pulpit, iv, 677; Hist. of Presbyterianism in Kentucky, p. 830. (J. H. W.)

Nelson, John (1), an eminent Methodist lay preacher, was one of the ablest of the assistants of the Wesleys in their evangelical movements in the last century. He is supposed to have acknowledged the chief founder of Methodism in Yorkshire, a portion of England in which it has had signal success down to our day. Nelson was born near the close of the 17th century. He was the descendant of humble but honorable parentage, and was early apprenticed to a stone-mason, a trade at which he became conspicuous, which was the occupation of his life, even in the midst of his evangelizing labors. He was converted under the preaching of John Wesley in 1711, at Moorfieids. Nelson's home was in Bristol. He had led an upright life from his youth, and had at the time of his conversion an humble but a happy home, a good wife, good wages, good health, and a stout English heart. He had long been disturbed by the sense of moral wants which his life failed to meet until the light came under the preaching of Wesley. The sad and trying days of Nelson are thus narrated by his biographer: "Something he believed there must be at the great gates of heaven, that other wise man is more unfortunate than the brute that perishes. Absorbed in such meditations, this untutored mechanic wandered in the fields after the work of the day, discussing to himself questions which had employed and emboldened the thoughts of Plato in the groves of the Cabbasis, and agitated by the anxieties that otherwise man is more unfortunate than the brute that perishes. He smiled at the impossibility of drinking with the queller of the Quaker worship could not quiet the voice that spoke through his conscience, and the splendor of the Roman ritual soon became but, irksome pomp to him. He tried, he tells us, all but the Jews, and hoping for nothing from them, resolved to adhere steadfastly to the Church, regulating his life with strictness, spending his leisure in reading, prayer, and leaving his final fate unsolved. Whitefield's eloquence at Moorfields, however, attracted him thither, but it did not meet his wants. He loved the great orator, he tells us, and was willing to fight for him against the mob, but his mind only sank deeper into perplexity. He became mortally despondent; he slept little, and often awoke from his horrible dreams dripping with sweat and shivering with terror. Wesley came to Moorfields; Nelson gazed upon him with inexpres sible interest as he ascended the platform, struck back his hair, and cast his eye directly upon him. 'Oh, my soul,' he said, 'how like the person of Christ, when he spoke I thought his whole discourse was aimed at me.' 'This man,' he said to himself, 'can tell the secrets of my heart; he has shown me the remedy for my wretchedness, even the blood of Christ.' He now became more than ever devoted to religious duties, and soon found the peace of mind he had so long been seeking. The records with dramatic interest the discussions and efforts of his acquaintances to prevent him from going too far in religion. They seem to have been mostly an honest, simple class like himself; they thought he would become unfit for business, and that poverty and distress would fall upon his family. They wished he had never heard Wesley, who, they predicted, would be 'the ruin of him.' He told them that he had reason to bless God that Wesley was ever born, for by hearing him he had become sensible that his business in this world was to get well out of it. The family with whom he lodged were disposed to expel him from the house after a while, but he offered to set his example on either themselves or him from 'so much praying and fuss as he made about religion.' He procured money and went to pay them what he owed them, and take his leave; but they would not let him escape; 'What if John is right, and we wrong?' was a natural question among his friends, 'and who would then stand for you anything more than for us, show us how we may find the same mercy,' asked one of them. He was soon leading them to hear Wesley at Moorfieids. One of them was made partaker of the same grace, and he expressed the hope of meeting both in heaven. With much simplicity, but true English determination, he adhered to his religious principles at any risk. His employer required work to be done during the Sabbath on the exchange building, declaring that the king's business required haste, and that it was usual in such cases to work on Sunday for his majesty. Nelson replied that he would not work on the Sabbath, for an angel in England, except to quench fire, or something that required the same immediate help. His employer threatened him with the loss of his business. He replied that he would rather starve than offend God. 'What hast thou done that thou makest such ado about religion?' asked the foreman. 'I ask you, sir,' replied Nelson, 'if you are English, and would cut thee with five hundred pounds. 'So you might,' replied the sturdy Methodist, 'and not have lost one penny by me.' 'But I have a worse opinion of thee now than ever,' resumed the employer. 'Master,' replied Nelson, 'I have the odds of you there, for I have a much worse opinion of myself than you can
have." The honest man was not dismissed, nor again asked to work on Sunday, nor were any of his fellow-workmen. Immediately after his conversion he wrote to his new superiors. Ere long his friends were con" verted, and he held meetings in his house, reading, ex" horting, and praying with such of his neighbors as would come to hear him. The number soon increased so considerably that he was obliged to stand in his door in order to reach all who were within the house and in the yard. In a short time the church and the commu"nity began to change; ale-houses were deserted, and six or seven converts made weekly. But not only the people had changed, Nelson himself had become another man; his sermons from being quite private had become public; indeed, he had become a preacher, and one of such power that Wesley, when hearing of the success attending Nelson's modest labors, set out at once to visit and direct him. Nelson was made one of Wesley's helpers, and the band of rustic followers one of his united societies. Thus Methodism started in Yorkshire, and thus opened the career of one of the ablest lay-preachers of the 18th century. Nelson was more successful that Wesley invited him to leave his home and assist in spreading Methodism in other parts of England, and so soon he became almost as abundant in labors and sufferings as the Wesleys, and his influence over the working classes equal to that of John Wesley himself. Not even Whitefield possessed more power over the common people. Indeed, "without Nelson and similar lay-preachers, Methodism could not have been sustained as it was. The souls which the lead" ers of the movement saved, were by those more care" fully matured" (Skeats, p. 372, 373). Nelson's good" sense, cool courage, sound piety, and apt speech secured him success wherever he went. He spread Methodism not only in Yorkshire, but in Cornwall, Lincolnshire, Lancashire, and other counties. He was a man of such genuine spirit and popular tact that his worst opponents usually became his best friends. Like Wesley and Whitefield, he was persecuted and annoyed by the es" tablished clergy and their hirelings. His house at Bristol was pulled down; at Nottingham squibs were thrown in his face; at Grimsby the rector headed a mob to the beat of the town drum, and, after supplying them with beer, called upon them to "fight for the Church." Figh" ting for the Church meant the demolition of the house in which Nelson lived and its contents, and the fighting on foot" with pulled down and the furniture destroyed (Nelson's "Journal, p. 92). But the preaching of the Yorkshire mason soon stopped all such proceedings. The drum" mer of Grimsby, who had been hired by the rector to beat down Nelson's preaching on the day after the riot, was one of the witnesses of its power. After beating for three quarters of an hour the food and drink of the house and then the tears of penitence were seen rolling down his cheeks. Such was Nelson's power over his audience. The clergy, determined to stay his influence, finally caused him to be impressed into the army, on his return to Bristol, as a vagrant, without visible means of living. Though he protested and tried to prove this charge un" just, he was yet taken and made a soldier. But even in his bonds Nelson did not cease to preach; and when he was forcibly compelled to wear the uniform, he boldly declared that he despised war, and that no one could ever compel him to enter any other service than that of the Prince of Peace, to whom he had dedicated himself. He remained a preacher even amid the din of arms, ad" mired his comrades against cursing and other sins, distributed tracts among them, and appointed prayer" meetings. All this involved him in new sufferings and persecutions, and he finally sank in the midst of this ill" treatment; and when, in order to save his life, it became necessary to dismiss him in 1744, he again resumed evangelizing labors, but died before the close of that year. Nelson's "Journal, i, 176, 178, 205, 227, 249; ii, 158; Southey, Life of Wesley, chap. xiv; Skeats, Hist. of the Free Churches of Eng. p. 378; Hurst's Hagenbach, Ch. Hist. of the 18th and 19th Cen" turies, i, 453 sq.; Porter, Compendium of Methodism, p. 48 sq. See also his own Journal.

Nelson, John (2), D.D., an American Congrega" tional minister, was born at Worcester, Mass., in 1765, and graduated at Williams College. In 1818 he re" mained pastor of the Congregational Church in Leicester, where his whole ministerial life, extending over a period of fifty-eight years, was passed. He died Dec. 6, 1871. From 1844 he had a colleague, and for eighteen years previous to his death it was an invalid. See Appleton's Annual Cyclopaedia, 1871, p. 591.

Nelson, Joseph, L.L.D., an American educator, was born about 1794, and was educated at Rutgers Col" lege, New Brunswick, N. J., class of 1815. He was made professor of languages in 1826, but resigned this position in 1829. He was a distinguished classical scholar and teacher. During his professorship in Rutgers College he was especially thorough in his studies and so capable as an instructor that he was enabled to perform the duties of his chair with great acceptance. His other senses were remarkably acute. It is said that he could accurately tell the size of a room by the sound of the stamp of his foot upon the floor. He retired from active service at the close of his professorship, and died in the city of New York in 1830. (W. J. R. T.)

Nelson, Matthew, a minister of the Methodist Protestant Church, was born in Prince Edward County, Va., April 7, 1781. In 1796 his father, colonel Ambrose Nelson, a descendant of the "old Scotch Tom," removed to Danville, Ky. Together with his brother Thomas, who was born in 1775, Matthew was converted in 1801. He removed to Bourbon County where he lived for a while upon their knees in the Kentucky River. They exhibited such interest in the promotion of holy living that they were shortly after licensed to exhort by the Methodist Episcopal Church which they had joined, and in a very brief period were made preachers and ad" mitted into the Kentucky Conference by bishop McKen" dree. Thomas preached for several years in Ohio, Mis" sissippi, Louisiana, Kentucky, and Tennessee, when his health failed, and he was placed on the supernumerary list. He then went South, and the time and place of his death are not known. Matthew preached until 1816, when he located. When the question of lay-repre" sentation first agitated the Methodist Episcopal Church, he took sides for the reform, and was elected delegate for Kentucky to the Baltimore Convention. He was a member of that body when it formed the constitution of the Methodist Protestant Church, and thereafter his membership was in that branch of Methodism. He made, however, no distinction in his treatment of Meth" odists, and his house was the home of Methodist preachers generally. In 1837 he removed to Rutherford Co., Tenn., and there continued to be the same zealous pro" moter of Methodism. He died in 1856. His children joined the Methodist Episcopal Church without any opposition on his part. See McFerrin, Methodism in Tennessee, ii, 184-187.

Nelson, Robert, a pious and learned English divine, noted as the author of various works in practic" al divinity which have long been held in very high estimation, was born at London June 22, 1656. He studied at Christ's College, Cambridge, and was a young man elected a Fellow of the Royal Society. He was intimate with Halley, with whom he travelled in France and Italy. While at Rome he met with and married in 1682 Lady Theophila Lucy, widow of a baronet, and daughter of the earl of Berkeley. This lady, under the
influence of the celebrated French Romanist, Bossuet—an intimate friend of Nelson; some time after their marriage became a Roman Catholic, to his great grief. Nelson's mind had been much occupied with the consideration of both the practical and controversial points in divinity, and his chief friends were eminent divines in the English Church, particularly Bull, Hickes, Lloyd, and Tillotson—the last was one of his most valued associates. Nelson not only gave place in his powers of persuasion, both verbal and literary, but called in the aid of his friend, archbishop Tillotson; both were, however, unsuccessful, the lady continuing in the Roman communion till her death. His first work, Transubstantiation contrary to Scripture, or the Protestant's Answer to Mr. Oldham's (1683), appears to be the substance of his considerations on this subject. He was strongly attached to king James II. He was the zealous proctor of all works of charity, having the ability as well as the disposition to give what true benevolence prompted. In helping to build churches, found schools, disseminate useful books, and enforce the laws against crime, he worked most effectually. At the Revolution he scurped to take the oaths to king William, and remained a nonjuror till the year 1709, when on the death of Dr. Lloyd, the last survivor of the deprived nonjurors bishops, except Dr. Keen, he by Dr. Keen's advice returned to the Church of England as then established. He died Jan. 16, 1715, at Kensington, and was buried in the cemetery of St. George the Martyr by the Foundling Hospital. Robert Nelson wrote A Companion for the Festivals and Fastes of the Church of England, etc. (16th ed. Lond. 1736, 8vo). It is still one of the best works of the kind; several abridgments of it have appeared. Bickersteth praises it, but deplores the "great want of evangelical principles and uction" (Christian Student, p. 429), probably because Nelson espouses Bull's views on justification:—The Practice of true Devotion in Relation to the Vows of the Church and Religion, etc. (7th ed. Lond. 1726, 12mo) — The great Duty of Frequenting the Christian Sacrifice, and the Nature of the Preparation required (5th ed. Lond. 1714, 12mo) — An Address to Persons of Quality and Estate (Lond. 1715, 8vo): — The whole Duty of a Christian, by way of Question and Answer (6th ed. Lond. 1727, 12mo) — Instructions for them that come to be Conformed (Lond. 1829, 12mo). He published also a Life of Bishop Bull, together with the latter's works (Lond. 1714, 3 vols. 8vo; see Debary, History of the Ch. of England, 1685-1717, p. 846 sq.), and the works of Kettellwol (Lond. 1719, 2 vols. fol.). See Secretan, Life of Nelson; Perry, Hist. of the Church of Scotland, iii. 69; Palen, Hist. of the Church of England, 1689, p. 221, 236 sq.; Eng. Cyclop. s. v.; Darling, Cyclop. Biblio. ii, 2166.

Nelson, Stephen Smith, an American Baptist minister, was born in Middletborough, Mass. Oct. 5, 1772, graduated at Brown University in 1794, and was licensed to preach in 1796. After supplying the Church at Hartford for two years, he was ordained pastor there in 1798, occasionally preaching in the neighborhood, particularly at Middletown. While in Hartford he took an active part in preparing "the Baptist Petition," an address to the Legislature on the subject of the grievances of "Dissenters" from the "Standing Order," which finally succeeded, in Connecticut at least, the union between Church and State in 1818. He was also appointed to prepare and forward a congratulatory address to Mr. Jefferson on his election as president of the United States. In 1801 he resigned his charge in Middletown, and became principal of a large academy at Sing Sing (Mount Pleasant), but in consequence of the war with Great Britain he removed in 1815 to Attleborough, Mass., where his labors were very successful, and he afterward held for a while charge successively of the churches in Plymouth, Mansfield, and Canton, Conn. In 1825 he removed to Amherst, Mass., where he continued preaching occasionally until his death, Dec. 8, 1855. See Sprague, Annals of the Amer. Pulpit, vi, 366.

Nelson, Lady Theophila. See Nelson, Robert.

Nelson, Thomas. See Nelson, Matthew.

Nemean Games, one of the four great festivals of ancient Greece, deriving its name from Nemea, where it was celebrated; as it was tells us, in honor of Zeus. The games consisted of horse-racing, wrestling, boxing, throwing the spear, running, wrestling, boxing, throwing the spear, and after the bow, and other warlike exercises. The victors were crowned with a chaplet of olive, and after wards of green parsley. The Nemean games were regularly celebrated twice in the course of every Olympiad. They appear to have been discontinued soon after the reign of the Roman emperor Hadrian. See Nemean Games.

Nemalh. See Ant.

Nemar. See Lepopardi.

Nemelius was a frequent surname of Zeus, and under it he was worshipped at Nemesis, where games were celebrated in his honor. See Nemean Games.

Nemesiāci was the name which was given to the officers of the goddess Nemesis, who presided over good fortune, and was the dispenser of faith. See Nemesis.

Nemōnēs (Nemōn, remene), a female Greek divinity, is mentioned in the Homeric Hymn to Dionysus (Ode 25) as a daughter of Night, though some call her a daughter of Erebos (Hygin. F. p. 92.) or of Oceanus (Tzetz. Ad. Lyce. 88; Pausan. i, 33, 3; vii, 5, 1). Nemesis was a per- sonification of the moral reversion for law, of the natural fear of committing a culpable action, and hence of conscience, and for this reason she was mentioned together with Aīōs, or Shame. In course of time, when an enlarged experience convinced men that a divine will found room for its activity amid the little occurrences of human life, she came to be considered as the personification of the righteous anger of the gods, and as the power who rationally preserves or restores the moral equilibrium of earthly affairs—preventing mortals from reaching that excessive prosperity which would lead them to forget the reverence due to the immortal gods, or visiting them with wholesome calamities in the midst of their happiness. Hence originated the latest and loveliest conception of Nemesis as the being to whom was intrusted the execution of the decrees of a strict retributive providence—the awful and mysterious avenger of wrong, punishing and humbling evil-doers in particular. Nemesis was thus regarded as allied to Antē and the Eumenesides. She is represented as the regulator of human affairs, disburshing at pleasure happiness or unhappiness, the goods and ills of men (Proclus. Hist. philosoph. iii. 2). She looked upon as an avenging deity, and as inflexibly severe to the proud and insolent (Pausan. i, 33, 2). There was a celebrated temple sacred to her at Rhammus, in Attica, about sixty stadia distant from Marathon; hence Nemesis was sometimes called also Rhamnusia or Rhamnomena. In this temple there was a statue of the goddess, made from a block of Parian marble, which the Persians had brought thither to erect a trophy of their expected victory at Marathon. Pausanias says that this statue was the work of Phidias (Pausan. i, 33, 2, 5), but Pliny ascribes it to Agoracrites, and adds that it was preferred by M. Varro to all other statues which existed (Hist. Nat. xxxvi, 4, 3). A fragment, supposed by some to be the head of this statue, was found in the temple of Rhamnus, and was presented to the British Museum in 1820 (Egin. & Phihsolem Mar- bles, i, 120; ii, 120). She was represented in the older times as resembling Venus; in later times as clothed with the tunic and petasus, sometimes with swords in her hands and a wheel at her foot, a griffin also having his right paw upon the wheel; sometimes in a chariot drawn by griffins. Nemesis is a frequent figure on coins and gems. The practice of representing the statues of Nemesis with wings was first
introduced after the time of Alexander the Great by the inhabitants of Smyrna, who worshipped several goddesses under this name (Pausan. vii, 5; i, 55, 2). According to a myth preserved by Pausanias, Nemesis was the mother of Helena, the beloved of Achilles; and the mother of Helena, was only her nurse (Pausan. i, 58, 7); but this myth seems to have been invented in later times to represent the divine vengeance which was inflicted on the Greeks and Trojans through the instrumentality of Helena. There was also a statue of Nemesis in the temple of Argos, though it is possible that this goddess had no name in Latin (Vol. Hist. Nat. xxviii, 5). See Smith, Dict. of Greek and Roman Biog. and Myth. s. v.; Vollmer, Mythologisches Wörterbuch, s. v.; Westcott, Handbook of Arch. p. 194, 195.

Nemesis, an ancient Christian philosopher of the Greek Church, noted as the author of a work entitled Πρὸς φίλους ἀνδρὶς, was, according to the title of the work, bishop of Emisa or Emesa, in Phoenicia, and he is also mentioned as such by Anastasius Niceneus (Quast. in S. Script. Apol. Patrum, vi, 157 [ed. Paris, 1575]). The time in which he lived cannot be determined with much exactness, as the only ancient writers by whom he is quoted or mentioned are probably Anastasius and Moses bar-Cepha (De Paralud. i, 20, p. 55 [ed. Antw. 1569]). He has sometimes been confounded with the heathen prefect of Cappadocia, Nemesis, praised by Gregory Nazianzen, who corresponded with him. It would seem, however, from the fact that he is mentioned in the calendar of the 5th century, that he was a contemporaneous of the second half of this century, that Dion Apollinaris and Eunomius, that he lived some time in the 5th century; Ritter opines about the middle of that century, as the expressions he uses concerning the union of the Logos and the human nature (p. 60, ed. Antw.) resemble the views sanctioned by the Council of Chalcedon. But there is no express reference to Nesorius and Eutychius, nor to the standing term of the two natures. At the same time there are evident references to the christology of Theodory of Mopsuestia, so that we may place the work at about the close of the first decade of the 5th century. The work was formerly attributed to Gregory of Nyssa, an error arising probably by a confounding of this treatise with that entitled Πρὸς καταφυγόνειν ἡμᾶς. This mistake occurred the more readily from the great similarity of the views of the two writers. Yet in Nemesis the philosophical argument appears only occasionally in close connection with the dogmatic points, while his method is more study than science as decisive. He defended the theory of the freedom of the will against the doctrine of fatalism, and also held fast to some of the ancient philosophical views concerning the nature of the soul, pre-existence, and, in a certain sense, metempsychosis, while the Church rejected the doctrine of Origen (Cyril, Contra Pagan. i, ed. Hieronym. p. 20 [ed. Oxon. 1671]). After Christian theology had experienced the influence of philosophy (and especially of the eclectic Platonism of the 2d century), and thus received a scientific character, philosophy became absorbed in it without ceasing to influence it. Augustinianism, as in the case of Augustine renowned both as philosophers and as theologians. But as dogmatists only attained the form of a traditional system in the 4th century, under the influence of Greek theology, there arose, besides theology, a sort of neutral ground, given up to special philosophical questions. Plato and Aristotle came again into honor, Nemesis, at least as regards method, sought to imitate the latter, but had not his power. His investigations are chiefly of a psychological nature. For him, as for Plato, the soul is an immaterial substance, involved in incessant and self-produced motion. The soul existed before it entered the body; it is a principle sui generis. It is not true that new souls are constantly coming into existence, whether by generation or by direct creation. The opinion is also false that the world is destined to be destroyed when the number of souls shall have been completed; God will not destroy what has been well put together. Nemesis rejects, nevertheless, the doctrine of a world-soul, and of the migration of the human soul through the bodies of animals. In considering the separate faculties of the soul, and also in his doctrine of the freedom of the will, Nemesis largely follows Aristotle. Every species of animal, he says, possesses definite instincts, by which alone its actions are determined; but the actions of man are infinitely varied. Placed midway between the sensillo and the suprasensible worlds, man's business is to decide by means of his reason in which direction he will turn — this is his freedom. The work was extensively used by J. Philoponus, John of Damascus, Elias Cretenses, etc. The first Greek edition was published by Nicetas Ellebodius (Antv. 1655, 8vo), with a Latin translation; the next by bishop Fell (Oxon. 1671, 8vo), and the last and best by C. F. Matthaeus (Halle, 1807, 8vo). It is also published in Migne's Patrologia Graeca. It was translated into English by George Wither (Lond. 1636, 12mo), into German by Osterhammer (Salzburg, 1819, 8vo), into French by J. B. Thibault (Paris, 1844, 8vo), and into Italian by Domin. Pizzimenti (8vo). See Ritter, Gesch. des christ. Phil. ii, 461 sq.; Fabricius, Biblioth. Graec. vii, 549 sq.; Bayle, Dict. Hist. et Crit. s. v.; Brucker, Hist. Crit. Philosoph.; Ueberweg, Hist. der Philos. i, 247, 449; Alzog, Patrologie, § 57; Haller, Bibl. Annot.; Smith, Dict. of Greek and Roman Biog. and Mythol, vol. ii, s. v.; Haag, Hist. des Dogmes Chrét. i, 245, 170.

Nemrud, a name, a noted Walensian prelate, flourished in the first half of the 15th century in Bohemia. He was consecrated priest in the convent of the Bohemian capital, Sept. 4, 1438, by bishop Nicholas Philibert, a legate of the Council of Basle. In 1439 Nemrez, together with another priest, also a Walensian, and consecrated at the same time with himself, was sent to Basle, where the council was at open variance with the pope; and in full convention of the clergy they were consecrated bishops by prelates of the Church of Rome. It was done at the instance of the Calixtines [see HUSITES], whom the council was anxious to propitiate and please. Thus the Walensians in Bohemia secured the episcopal succession. Nemrez died near the middle of the 15th century. See Butler, Ch. Hist. ii, 349.

Nemrénd Contradictore, or Nem. Con., is a term used in ecclesiastical councils to indicate that there is no opposition to a given measure proposed.

Nemrénd Dissentiente, or Nem. Dint., "No one dissenting." This term also is very often found in journals of conventions, and other documents containing business communications.

Nem'ei [according to analogy Nem'ei] (Heb. נעימ, נִעְיָמ, spread of God, or perhaps for Jemuel; Sept. Nauph, Vulg. Nemuel), the name of two Hebrews.

1. The first named of the five sons of Simeon (1 Chron. iv, 24), and progenitor of the Nemuelites (Num. xxvi, 12). He is elsewhere (Gen. xlii, 10) called Jemuel (q. v.).

2. The second son of Eliah, of the tribe of Reuben, and brother of Dathan and Abiram (Num. xxvi, 12). B.C. cir. 1619.

Nem'uelites (Heb. נֶעֱיָמִּים, נִעְיָמִיס, Gentile appellation from נִעְיָמ, Nemuel; Sept. Nauph, Vulg. Nemuelitae), a family in the tribe of Simeon, descended from his first-born (Num. xxvi, 12). See Nemuel.

Nemrius, of Bangor, in Wales, a noted British monarch, flourished in the first half of the 9th century (comp. De Historia Latina). Nemrius (De Historia Latina) says that he lived in the early part of the 7th century, but he assigns no authority for this assertion. In the history of the Welsh states he asserts himself to have been a Briton, and not a Saxon, and a disciple of the holy bishop Ebodus, or Elvodug. He wrote a history of
NEO-ARIANS

Neolit (Euglogian Britonum, or, as it is sometimes styled, Euglogiam Britannaic, which, he says at the beginning, he compiled from all he could find—"from the Roman annals and the chronicles of the fathers, as well as from the writings of the Scots and the Anglo, and from the traditions of our ancestors," the history begins with a fabulous genealogy of Brutus, grandson of Ezana, who reigned in Britain. The author afterwards relates the arrival of the Picts in North Britain, and of the Scots in Ireland; and, after a brief and confused narrative of the Roman conquest and empire in Britain, he comes to the Saxon invasion and gradual subjugation of the country. The manuscript of Nennius was mutilated and interpolated by a transcriber, who signs himself "Samuel," and a "disciple of Beularius Presbyter," and who acknowledges that he left out what he thought useless in Nennius's work, and added what he gathered from other writers concerning the towns and wonders of Britain; see end of ch. lxxv of Nennius Banchoriensis Euglogiam Britannaic, edited by C. Bertram, and published together with Gildas and Richard, the Monk of Westminster (Copenhagen, 1757, 8vo). Such is the common account of Nennius; but it is, to say the least, doubtful whether such a person ever existed, and whether the history ascribed to him was not the fabrication of a much later age. Though the work existed earlier, the name of Nennius is not mentioned in connection with it earlier than the 18th century. It is in any case of little value, but even that little is of course greatly reduced if it be the production of an age much later than that of the Saxons. The question was foundfully discussed in Mr. Wright's Biographia Britannica Literaria (Anglo-Saxon period), p. 137-142; the introduction to Mr. Stevenson's valuable variorum edition of the Historia Britonum; Schoell, Diss. de Eccles. Britonum Scriptorumq. Historia Fontibus, p. 29-57. A translation of the text is given by the Rev. W. Gunn, was published in London (1819, 8vo), and reprinted in the Six Old English Chronicles, published as a volume in Bohn's "Antiquarian Library" (1848). (J. N. P.)

Neo-Arians. See Arians; Socinians; Unitarians.

Neo-Cæsaræ, Council of (Concilium Neocæsaræ), was held at Neo-Cæsaræ, in Pontus, about the year 314, shortly after the Council of Ançaya. It was composed, for the most part, of the same bishops who assembled at the Council of Etaples, under Vitalis, and believed to have presided. Fifteen canons of discipline were published. The most important acts are: 1, enjoining the degradation of priests who marry after ordination—a very important measure, and of interest to the inquiring student into the history of celibacy (see Lea, Hist. of Sacred Orders, p. 48, 49); 5, deprivation of communion, through life, women who, having married two brothers, refuse to divorce the marriage; 6, permitting to baptize women with child whenever they will; 7, forbidding priests to be present at the second marriage of any person; 8, forbidding to confer holy orders upon a layman whose wife has committed adultery; ordaining that if she has committed adultery after her ordination he shall put her away, and declares that if he shall continue to live with her he cannot retain the ministry committed to him; 11, forbidding to admit any one, however well qualified, to the priesthood under thirty years of age, because the Lord Jesus Christ at that age began his ministry; 13, directing that, where both are present, the city priests shall celebrate the holy eucharist in preference to those from the country; 14, declaring that the Choréepiscopi are after the pattern of the Seventy, and permitting them to offer; 15, ordering that the deaths of such persons as have received several canons in the year of the council be approved by the book of Acts. See Labbé, Conc. 1, 1489; Landau, Manual of Councils, p. 420, 421; Neander, Ch. hist. ii, 147, 156, 318.

Neocori (vaexeopos, temple-sweepers) is the title which the officers bore who were attached to the pagan temples in ancient Greece. Their office was originally to sweep the temple, and perform other menial services connected with it. In course of time these duties were intrusted to slaves, and the Neocori came to occupy a higher position, superintending the temples, guarding the treasures, and regulating the sacred rites. In some cases the temple-sweepers, perhaps under the influence of the office, having considerable honor attached to it, was sought by persons even of high rank. In the time of the emperors and nations and cities eagerly sought the title of Neocori, and counted it a special privilege to have the charge of a temple. Thus in the Acts of the Apostles we learn that the city of Ephesus was rich in Neocori to the great goddess Diana. See Gardner, Fides of the World, p. 525; Broughton, Bibiloth. Historiae Sacrae, s. v. See DIAE.

Neology (from νοησ, new, and άγον, doctrine), a term synonymous with καινοδοξία, καινοτομία, is expressive of a tendency to novelty, not from a feeling of superiority, but simply on account of its newness. The word is not classical in use, yet vaexyia would not be contrary to the analogy of language, and would be equivalent to the nomina mutare (as Cicero, De Fis. iii, 5, says of Zeno: "Non tam rerum inventor fuit, quam novorum verborum"). Neology, then, is an unnecessary innovation in language, thought, or usage, and is said to be so far as it disturbs the current of thought it is the result of fancy. In theology the term is used especially to designate the rationalistic theories opposed to revealed religion which have obtained such success among certain German and English theologians. These resort to the novel expedient of reducing the standard of the doctrine and facts of Scripture to the level of unsanctified human reason. See RATIONALISM. (J. H. W.)

Neo-Manicheans was the name of a Christian sect which, like the Priscillianists and Paulicians, denied the resurrection of the flesh; and, like the Quakers and Swedenborgians of our own day, thought that after death the soul became the inhabitant of a spiritual body. In other respects the Neo-Manicheans held the views of the Manichees (q. v.).

Neomennia or Noemennia (Gra. neo moom), a festival, was instituted at the beginning of every lunar month, which was (as the name imports) observed upon the day of new moon in honor of all the gods, but especially of Apollo, who was called Νομένιος, because the sun is the first author of all light, and whatever distinction of times and seasons may be taken from other places, is drawn altogether to his glory, both spiritual and material, and of those borrowed rays by which they shine. This festival was observed with games and public entertainments made by the richer class, to whose tables the poor flocked in great numbers. The Athenians at these times offered solemn prayers and sacrifices for the prosperity of their country during the ensuing month in Erechtheum's temple, in the Acropolis, which was kept by a dragon, to which they gave a cake made of honey. The Jews had their Neomennia, or feast of the new moon, on which peculiar sacrifices were appointed. They made on this day a sort of family entertainment and rejoicing. Thus David tells Jonathan, "Behold, to-morrow is the new moon, and I should not fail to sit with the king at meat," etc; and Saul, we find, took it amiss that he did not attend. The most celebrated Neomennia of all others was that at the beginning of the civil year, or first day of the month Tisri. No servile labor was performed on that day; and they offered particular burnt sacrifices, and sounded the trumpets of the Temple. The modern Jews keep the Neomennia only as a feast of devotion, which any one may observe or not, as he pleases. In the prayers of the synagogue they read from Ps. exii. to cxv. They bring forth the pure loaves of oil, and read the liturgy, which contains prayers to the persons. They call to remembrance the sacrifice that used to be offered on this day in the Temple. See New Moon.
NEOIONISMS

NEIONISMS (from the Greek νέος, new, and νοσος, law) is the appellation of those Christians who regard Christianity as a new law, mitigated in its requisitions for the sake of Christ. Neoionism has many modifications, and has been held by Arminians as well as Calvinists—persons very greatly differing from each other in the conclusions which we shall consider, yet in the principles from which they deduce it. One opinion is that the new covenant of grace which, through the medium of Christ’s death, the Father made with men consists, according to this system, not in our being justified by faith, as it apprehends the righteousness of Christ, nor in any exacting of perfect legal obedience, but in acceptances of faith itself, and the imperfect obedience of faith instead of the perfect obedience of the law, and graciously accounts them worthy of the reward of eternal life.

Towards the close of the 17th century a controversy was agitated in England about the side which was partial to the one side (who were partial to the writings of Dr. Crip) were charged with antinomianism, and the other (who favored those of Mr. Baxter) were accused of neoionism. Dr. Daniel Williams was a principal writer on what was called the neoionism side. He teaches as follows:

1. God has eternally elected a certain definite number of men whom he will infallibly save by Christ in the way prescribed by the Gospel.
2. These very elect are not perfect in this present life, and so in this life may and do offend God and others;
3. By the ministry of the Gospel they are taught the terms of the covenant, and so taught that they may believe this covenant, and of themselves set up to him, but they remain condemned while unconverted to Christ.
4. By the ministry of the Gospel they are taught the terms of the covenant, and so taught that they may believe this covenant, and so believe it, and be saved.
5. The law of nature and the law of grace is the covenant of works, and the covenant of grace itself.
6. Believe this covenant, and of themselves set up to him, but they remain condemned while unconverted to Christ.
7. By the ministry of the Gospel they are taught the terms of the covenant, and so taught that they may believe this covenant, and so believe it, and be saved.
8. Believe this covenant, and of themselves set up to him, but they remain condemned while unconverted to Christ.
9. By the ministry of the Gospel they are taught the terms of the covenant, and so taught that they may believe this covenant, and so believe it, and be saved.
10. By the ministry of the Gospel they are taught the terms of the covenant, and so taught that they may believe this covenant, and so believe it, and be saved.

It does not appear to have been a question in this controversy whether God in his Word commands sinners to repent and believe, nor whether he promises life to believers and threatens death to unbelievers; but whether it be the Gospel under the form of a new law that thus commands or threatens, or the moral law on its behalf, and whether its promises to believing render such believing a condition of the thing promised. If this can be answered, then, by the way, the controversy, having no reference towards among the same people, in the Assembly of 1720, it became a question whether God did by his Word, call it law or Gospel, command unregenerate sinners to repent and believe in Christ, or do anything else which is spiritually good. Of those who took the affirmative side of this question one party maintained it on the ground of the Gospel being a new law, consisting of commands, promises, and threatenings, the terms or conditions of which were repentance, faith, and sincere obedience. But those who first engaged in the controversy, though they allowed the encouragement of repentance, yet concluded it was not an essential thing which was to be insisted upon in the Gospel, yet considered the formal obligation to do so as arising merely from the moral law, which, requiring supreme love to God, requires acquisitiveness in every revelation which he shall at any time make known. The Hopkinsians of America are believed in their teachings to espouse the same views. Not only do they fearlessly set forth the extent, spirituality, and unflinching demands of the law; they think it necessary also to urge upon sinners the legal dispensation, if we may so speak, of the Gospel. See Watson, Dict. of Theology, s. v.; Hagenbach, Hist. of Doctrines, ii. 431; Chauncey, Neonomianism; Hetherington, Hist. of the Church of Scotland; Certification; Hetherington, Hist. of the Church of Scotland, p. 841 (on the anti-Neoionian side). See Mod. Eras.
NEO-PATRONISM

Neophyte (from νεώς, new, and φυτόν, a plant), i.e. newly planted, was a word used in the Eusebian and other mysteries to designate a person recently initiated. In the early Church it was the name given to converts to Christianity who had just received baptism. Although they were professedly Christians for eight days, from Easter eve until the Sunday after Easter, which was hence called Dominica in albis, i.e. the Sunday in white. (These garments were usually made of white linen, but sometimes of more costly materials.) They were also subject to a strict discipline or probation for a long period. At first they were considered unfit for the priestly office, on the grounds of 1 Tim. iii, 6, where the word is rendered “novice,” and explained by Gregory the Great to have been used in allusion to “their being newly planted in the faith” (App. 6; Ep. 51). Neophytes differed from catechumens (q.v.), inasmuch as the persons were supposed to have not only embraced the doctrines of the Church, but also to have received baptism. Paul, in the passage referred to, directs Timothy not to promote a neophyte to the episcopate; and this prohibition was generally maintained. The duration of this exclusion was left for a time to the discretion of bishops, but several of the ancient councils fixed it at four years. The First Council of Aries (524) and the third of Orange (388) fix a year as the least limit of probation. Ecclesiastical history offers, however, a few instances in which this rule was departed from, as in the appointment of Ambrosius as bishop; but these exceptions were not frequent. In the Roman Catholic Church a neophyte and catechumen are regarded as different. The former is the name of a person who is a neophyte, and who has not yet received baptism, and the Church grants them numerous privileges in order to induce others to follow their example (see Ferrari, Biblioth. canonica, s. v. Neophytus, No. 3). Gregory XIII established at Rome a special college for young neophytes, where they are instructed to become afterwards missionaries in their own countries; it is called the College of the Propaganda, and is one of the most richly endowed and privileged seminaries of the Roman Church. The name neophyte is also applied in Roman usage to newly-ordained priests, and sometimes, though more rarely, to the members of a religious order. (See Ordinarii, s. v. Dict. de l'Église, s. v. Théologie, s. v.; Martigny, Dict. des Antiquités, p. 483-485; Siegel, Christliche Alterthümer, iii, 17 sq.; Riddle, Christian Antiquities, p. 318, 522; Walcott, Sacred Archæology, s. v.

Neophytus. A short but curious tract, published by Cotelier, in his Eclogae Graecæ Monumen.., ii, 457-462, bears this title: Νεώφυτον τραπεζημοῦν μαναχῆ καὶ ιερονύμου πολλῶν κατὰ χώραν Κύπρου Κύπριων. Neophyti Fregiheri Monachi et Inclusi de Calamitatis Buspi Cuprii. It gives a brief account of the usurpation of the island by Isaac Cornimass, its conquest, and the imprisonment of Richard. He was Richard of Cornimass, King of England, and the sale of the island to the Latin Empire (the writer represents the transaction) by Richard. The writer was contemporary with these transactions, and therefore lived about the close of the 12th century. He was a resident and probably a native of Cyprus. There are several MSS. in the different European libraries bearing the name of Neophytus. One of them is in the Colbertine Library at Paris, the only other MS. being in the Library of the Cabinet des Estampes in Paris, and the latter, as well as the former, are more or less copies of a MS. in the Colleton Library at Paris, so called Orationes, evidently by this Neophytus; a Catena in Canticum, and some others on theological subjects, are of more dubious authorship, but they may be by the same hand. The MSS. bear the title of Démocratie de Plutarco, and one or two chemical treatises, by another Neophytus, named Promodore; and Definitions et Divisiones Summaria totius Aristotelis Philosophie, and Epitome in Porphyrj guinge voces et in Aristotelis Organon, are apparently by a third writer of the same name. See Cotelier, L. c., and notes in col. 678, 679; Du Cange, Glossariun Med. et Infi. Græcæst.; Index Authorum, p. 29; Fabricius, Bibliotheca Graeca, v, 738; viii, 661, 662; xi, 355, et.; Cave, Hist. Lit. ad ann. 1190, ii, 251 (ed. Oxford, 1615); Smith, Dict. Greec and Roman. Blog. and Mythol. s. v.

Neo-Patronism, an eclectic philosophy nearly coeval in origin with Christianity, but developed in an anti-Christian and pantheistic direction. The term, taken in the widest sense, may be defined as that form or method of philosophizing which recognizes or claims Plato as leader, incorporated with his views other, especially Oriental, conceptions, and sought by means of such composite or eclectic philosophical results to harmonize or, at the least, to reconcile the teachings of the various ancient schools of philosophy; in the narrow, and perhaps the more common acceptation, it is applied to the doctrinal system of the philosophical school founded at Alexandria, in Egypt, by Ammonius Saccas, in the first half of the 3d century after Christ, and continued by his pupils and successors not only in the city of its origin, but also in other places. Platonus, one of the earliest and most important masters of the school, was taught at Rome; and the term Romano-Alexandrinum is sometimes applied to it.

Many of the early Christian writers advocated the employment of the philosophical methods to elucidate and establish the doctrines of the Gospel, and were, consequently, to a greater or less extent imbued with the spirit of the schools. The problems of the schools which became the names of the Neo-Patristians, i.e. the conciliation of philosophy and religion; but the pagan school, especially during its later history, was characterized by an intense hostility to Christianity, as well as by theosophical views and theurgic practices. The influence of this form of philosophy did not disappear entirely with the disappearance of its schools by Theodosius in the 6th century, but traces of it may be seen even in the scholasticism of the Middle Ages (notably in the writings of Erigena, who flourished in the 9th century); and after the revival of literature, in what are styled the modern times, the impress of this type of Platonism appears more or less distinctively in the philosophical systems of Plotho, Ficinus, Paracelsus, and others of the 15th and 16th centuries, as well as, subsequently, in those of Galen and Cudworth, and in the speculations of Schelling and his school in regard to the identity of subject and object. In fact, the spirit of Plato has been impressed upon the philosophy of our times, whether as philosophical thought in such a way and to such an extent as to make a careful examination of its history and doctrines an object worthy of the serious attention of those minds who are anxious to distinguish the truth which saves from the error which misleads and destroys.

I. History.—The rise and development of this philosophy may, for our present purpose, be sufficiently exhibited by, first, an outline of the causes tending to produce it, followed, secondly, by a brief sketch of the lives and opinions of only the most prominent characters who either, as precursors, prepared the way, or actually directed the development, of the system; or as founders and disciples of the school, expounded and defended its doctrines. To this we shall add a summary of its general principles (mainly abridged from Schwegler) and some observations on its relations to Christianity; and, Lastly, such a list of works on the subject as will enable any one so desiring to inform him the more fully.

1. Subjective Causes.—Aside from the very great influence manifestly exerted by Oriental ideas in shaping the character and tendencies of the philosophy of the period in which Neo-Platonism had its birth, there were internal causes at work, growing out of the unsatisfactory results of the philosophy of the age and the want felt, especially by earnest and thoughtful spirits, of something different—something which gave better promise of satisfying the longings of the human
race for a solution of the problem of its origin and des-
tiny. Instead of giving clearer light and purer life to man, and kindling in his breasts the flame of love to
himself, the development of the old philosophies had ended in scepticism and moral debasement. This
result was disappointing and disheartening. Scepticism promised contentment of spirit, but, instead, produced
only the opposite, viz. the necessity for an unceasing opposition to all positive assertions; and in place of the
hopeless struggle for, it gave only an unappeasable dispute, which, in turn, begat a yearning for a condition abso-
lutely satisfying and removed from all sceptical objec-
tions. This longing for something absolutely certain
found historical expression in Neo-Platonism.

6. Objective Causes. The conquests of Alexander
the Great, extending from the Mediterranean to the Indus,
broached relations between the Orient and the Occident,
and the civilizations into nearer relations with each other, and there-
by opened up new fields for philosophical research to
the active and inquiring Hellenic race on one side, while,
on the other side, the disciples of Zoroaster and the
gymnosophists of India were, in like manner, made
acquainted with the opinions and speculations of the
Greek philosophers. The Hebrew, whose home lay
between these extremes, contributed also his share to the
common stock, and enlarged thereby the common fund
of relatively new ideas. The succession of the Romans to
the empire of the civilized world still further increased
this mutual intercourse on all the various spheres of
activity. The results of this mutual action and re-
action of the East and the West upon each other were
made more permanent by Alexander's policy of plant-
ing colonies and founding cities among the nations
brought under his sway. The city in Lower Egypt
founded by and named after him, and with, masterly foresight,
located on the pathway of the commercial intercourse
of nations for that and succeeding ages, be-
came naturally also the great central point of philo-
sophical intercourse and reciprocal culture. At this
focus of the intellectual activity as well as of emporium
of the civilized world, in the centuries of the common
era, representatives of various races met together, and discussed and compared
philosophies and faiths. Here was the soil where once
flourished the ancient wisdom and learning of Egypt,
the origin of whose civilization was referred by a proud
priesthood far back into the shadows of unhistorical
eras. Here were found advocates of the Greek poly-
themism, with its poetic conceptions of deities peopling
mountain and dale, forest and stream, land and sea,
and with a cultus adjusted to the mercurial temperament
of that race. Here also were Roman representatives of
the statelier and graver character of a nation notable
for its deep religious sentiment. Here, too, the Jewish
scribe, proud of the antiquity of his people and of their
divinely-given law, upheld the doctrine of the unity
of God taught in his sacred books, and pointed to their
purer teachings and sublimar truths. The Persian dis-
covered of his master Zoroaster, of the two principles,
the Good and the Evil, evil of all things belonging to the matter
of the world, and of the magical knowledge possessed
by the priests and philosophers of his land. The Brah-
min, wandering from the far Ganges, brought with him
his ascetic mysticism and pride of caste, the doctrine
of a quiescent supreme divinity, in whose repose puri-
fied all, stripped of all the mummery and superstition
of the world, and the truth of the religious ideas of
the forces or emancations therefrom—the Creator, the pre-
server, the destroyer. Here too, in the appointed time,
appeared the heralds of a new and diviner philosophy,
whose roots, planted in the soil of man's primate home,
and kindled and kindling by his devotion, endurance and
bravery, the development of the old philosophies had
ended in scepticism and moral debasement. This re-
result was disappointing and disheartening. Scepticism promised contentment of spirit, but, instead, produced
only the opposite, viz. the necessity for an unceasing opposition to all positive assertions; and in place of the
hopeless struggle for, it gave only an unappeasable dispute, which, in turn, begat a yearning for a condition abso-
lutely satisfying and removed from all sceptical objec-
tions. This longing for something absolutely certain
found historical expression in Neo-Platonism.

2. Objective Causes. The conquests of Alexander the
Great, extending from the Mediterranean to the Indus,
broached relations between the Orient and the Occident,
and the civilizations into nearer relations with each other, and there-
by opened up new fields for philosophical research to
the active and inquiring Hellenic race on one side, while,
on the other side, the disciples of Zoroaster and the
gymnosophists of India were, in like manner, made
acquainted with the opinions and speculations of the
Greek philosophers. The Hebrew, whose home lay
between these extremes, contributed also his share to the
common stock, and enlarged thereby the common fund
of relatively new ideas. The succession of the Romans to
the empire of the civilized world still further increased
this mutual intercourse on all the various spheres of
activity. The results of this mutual action and re-
action of the East and the West upon each other were
made more permanent by Alexander's policy of plant-
ing colonies and founding cities among the nations
brought under his sway. The city in Lower Egypt
founded by and named after him, and with, masterly foresight,
located on the pathway of the commercial intercourse
of nations for that and succeeding ages, be-
came naturally also the great central point of philo-
sophical intercourse and reciprocal culture. At this
focus of the intellectual activity as well as of emporium
of the civilized world, in the centuries of the common
era, representatives of various races met together, and discussed and compared
philosophies and faiths. Here was the soil where once
flourished the ancient wisdom and learning of Egypt,
the origin of whose civilization was referred by a proud
priesthood far back into the shadows of unhistorical
eras. Here were found advocates of the Greek poly-
themism, with its poetic conceptions of deities peopling
mountain and dale, forest and stream, land and sea,
and with a cultus adjusted to the mercurial temperament
of that race. Here also were Roman representatives of
the statelier and graver character of a nation notable
for its deep religious sentiment. Here, too, the Jewish
scribe, proud of the antiquity of his people and of their
divinely-given law, upheld the doctrine of the unity
of God taught in his sacred books, and pointed to their
purer teachings and sublimar truths. The Persian dis-
covered of his master Zoroaster, of the two principles,
the Good and the Evil, evil of all things belonging to the matter
of the world, and of the magical knowledge possessed
by the priests and philosophers of his land. The Brah-
min, wandering from the far Ganges, brought with him
his ascetic mysticism and pride of caste, the doctrine
of a quiescent supreme divinity, in whose repose puri-
fied all, stripped of all the mummery and superstition
of the world, and the truth of the religious ideas of
the forces or emancations therefrom—the Creator, the pre-
server, the destroyer. Here too, in the appointed time,
be worshipped as a personal being, yet conceived of as the most general of existences: τὸ γενεάτον ἵκαλι ἵ τις (Legis Alleg. vol. ii). He is τὸ ὁν, the existing; is above all human knowledge and virtue, and even "above the idea of the Good" (κριτήριον τὸ ἡ ἀριθμ σκιτήριον ἡ καταστάσιν, καὶ καταστάσιν ἡ τοῦ παλαιοῦ και τοῦ νεούρου), that what he received from the Divinity, a form and a life. In creation, Deity, unwilling to come into contact with impure matter, employed as his instruments its incorporeal potencies or ideas, the highest of which, the creative one (σωματικόκ), is in Scripture named God (Σελος); the second, the ruling one (αυπνεκ), is called Lord (κυριαξ); these potencies are conceived of as independent personal beings who have appeared to men. "The highest of all the divine forces is the Logos," in which the world of ideas finds its place. The Logos is the image of God, and the type after which the whole world is formed, and the manifestation of the Deity, making and ruling the world, and serving as the mediator between God and Man. The conception of the incarnate Logos was, however, impossible to Philo, who regarded matter as impure. This conception forms one of the fundamental doctrines which separate Christianity from the Alexandrian theosophy. Philo refers the doctrine of ideas to Moses (Mωυσειοι ἵκαλι τὸ ἐντόλα βοῦτο, καὶ ἑμεῖς), and has given to it a character, arising from his own religious conceptions, which has so transformed the Platonic theory as to interfere "with the correct historical comprehension of Platonism even down to our own times" (Ueberweg). Sharpe (Hist. of Egypt, 111) thinks that the writings of Philo "explain how Platonism came to the Jews, and how we trace the point of agreement between the New Platonists and the Platonic Christians." (2.) Of the Greeks who may be classed among the forerunners in the movement tending to harmonize the doctrines of Plato with the speculations of Oriental philosophy we can notice only (i) Thrasyllus of Mendes (died A.D. 86), who arranged all the works of Plato admitted by him to be genuine into nine tetralogies, and combined with Platonism certain mystical Neo-Pythagorean speculations founded on numbers and the Chaldean astrology; and (ii) Plutarch of Chaeronea (born about A.D. 45). He was the author of the well-known biographies. He was a pupil of Ammonius of Alexandria (not Saccas), and taught at Athens during the reigns of Nero and Vespasian. Plutarch's doctrines deviate less from pure Platonism than those taught by the Neo-Platonists proper of the school of Alexandria, yet he is regarded by some as standing "next to Philo both in age and character as a representative of Oriental tendencies in Greek philosophy." So far as the Grecian systems are concerned, while holding mainly to Plato and controverting the views of the Stoics and Epicureans, he evinced little regard for the dialectics of Jerosostomos, and was a strong believer in the Stoic doctrine of a Providence. In regard to Oriental doctrines, while profoundly reverence of the ancient cults of his country, and opposed to the introduction of foreign superstitions and Jewish and Syrian rites, he, from the Greek point of view, sought to reconcile the philosophy of religion with the true interpretation of the worship of Isis and Osiris. He thus other inferred (as did Philo) between an absolute God whose essence is unknown to us and a creating power of energy which formed the world. Isis corresponds to the latter, and connects the creation with Osiris, the supreme and immediate god. In the region of the world, the offering of two distinct principles, one inherently good, and the other inherently evil (the dualism of Zoroaster), which battle-ground is the soul of man. Besides one supreme God, Plutarch recognised the divisions of the popular faiths as well as the existence of demons, some good, some evil, as necessary mediators between the divine and human.

(3.) L. Apuleius (born about A.D. 180), a teacher of the Platonic and Aristotelian philosophies at Medesa, in Numidia, was a Latin representative of the then prevalent Greek philosophy, who taught in Alexandria, and reached not by demonstration (λόγον ἐνέδειξιν), but by clear insight (νοορίη). Divinity and matter are the two principal, existing from eternity: the Divinity is "being, real, infinite, immovable, incomprehensible to human understanding" (ὁσίος); matter is "non-existing (μὴ ἔχον), having received from the Divinity a form and a life." In creation, Deity, unwilling to come into contact with impure matter, employed as his instruments its incorporeal potencies or ideas, the highest of which, the creative one (σωματικόκ), is in Scripture named God (Σελος); the second, the ruling one (αυπνεκ), is called Lord (κυριαξ); these potencies are conceived of as independent personal beings who have appeared to men. "The highest of all the divine forces is the Logos," in which the world of ideas finds its place. The Logos is the image of God, and the type after which the whole world is formed, and the manifestation of the Deity, making and ruling the world, and serving as the mediator between God and Man. The conception of the incarnate Logos was, however, impossible to Philo, who regarded matter as impure. This conception forms one of the fundamental doctrines which separate Christianity from the Alexandrian theosophy. Philo refers the doctrine of ideas to Moses (Mωυσειοι ἵκαλι τὸ ἐντόλα βοῦτο, καὶ ἑμεῖς), and has given to it a character, arising from his own religious conceptions, which has so transformed the Platonic theory as to interfere "with the correct historical comprehension of Platonism even down to our own times" (Ueberweg). Sharpe (Hist. of Egypt, 111) thinks that the writings of Philo "explain how Platonism came to the Jews, and how we trace the point of agreement between the New Platonists and the Platonic Christians.

(4.) Numenius of Apamena, in Syria, who flourished in the latter half of the second century after Christ, showed in his writings (of which fragments only have come down to us) even a stronger tendency towards Oriental ideas, and referred the origin of Greek philosophy to Jewish, Egyptian, Magian, and Brahmanical sources. Suidas (s.v. φιλο) quotes him as styling Plato the Athanagoras, Mithra, and the Magian (Μαγιαίτας). So highly was he regarded by the Neo-Platonists during the following periods that some authors regard him as the real founder of the Alexandrian school, an honor denied him by the Alexandrians themselves because of his Syrian origin and non-residence in their midst. He further developed the conception of a trinity in the Divine Being, who was incorporeal, by distinguishing therein, 1st, a perfectly intelligent, immovable, eternal, supreme God; 2d, a world-maker, or demiurgus; and, 3d, the world. These he terms father, son, and grand- son (πατέρας, γεύς, ναύκροκ), and ascribes the doctrine to both Plato and his master, Socrates. Numenius was the first of the Neo-Platonists to separate the soul from the body, and that its descent into the body from its former incorporeal state implies previous moral delinquency—a conception indicating an acquaintance with Jewish and Christian doctrines on the fall of man. Cronius, described by Porphyry as a friend of Numenius, and who shared his opinions, was the author of some works (s.v. Θεονομος), the author of writings studied by the Christian Origen.

(5.) Some of the writings popularly attributed to the mythical Hermes Trismegistus treat of religious and philosophical subjects in the style and from the standpoint of Plato, and were probably written about A.D. 130, by Gnostics, who claimed them as the productions of the Egyptian Platonists. The reputed author was the Egyptian Thot or Thoth, identified with the Greek Hermes, who, as the failed author of all the discoveries and productions of the human mind, the source of all knowledge and thought, the embodied Logos, was dignified with the title of θεός Μυστήριος, Θεός greatest (may there not be in this name a reference to the Neo-Platonic trinity?). Some of these writings "belonged to the school of Philo, and were known to Plutarch; others are of a much later date, and not unaffected by the influence of Christianity." The Positgregator, one of the largest and most important of these works still extant, seems to have been composed in imitation of the Pastor of Hermas. It gives views of nature, the world, God, and the human soul quite in the spirit of Neo-Platonism, but with such occasional admixture of Oriental, Jewish, and Christian ideas as to show the syncretism peculiar to the philosophy of the time.

(6.) Ammonius, called Saccas from his vocation of corn- porter (lived from about A.D. 175 to 250), is usually regarded as the founder of the Alexandria-Roman school of Neo-Platonism. He was born of Christian parents, and by them trained in the principles of their faith, but finding that the soul when it emerges from the body absorbed in the study of heathen philosophy. Though of humble origin, and destitute of the advantages of
early culture, his enthusiastic love of knowledge and his great natural abilities enabled him to overcome the disadvantages surrounding him, and to found a school of philosophy, and to attract to it pupils whose subsequent fame as philosophers made the name of their master famous. Of the chief of these pupils the most famous were Plotinus, the two Origens, the philologist Longinus, and Herennius. Ammonius left no written record of his opinions, and we are indebted to his disciples, especially Plotinus, for what knowledge we possess of his doctrines. His aim in general was to show the agreement, if not the substantial identity, of the systems of Plato and Aristotle.

(7.) Plotinus was the first to develop and systematize in written form the Neo-Platonic doctrines. He was born at Lycore, a city of Upper Egypt, A.D. 205, and was so delicate and sickly as to prevent his early training; consequently he was twenty-eight years of age before he had so far completed his preparatory education as to be able to turn his attention to philosophy. After he had tried several teachers without satisfaction, a companion took him to hear Ammonius lecture, and so pleased was Plotinus that he exclaimed, "This is the man of whom I was in search." He attended upon the teaching of Ammonius for eleven years, when, desirous of visiting the Brahmans and the Magi to learn their philosophy, he joined the ill-fated expedition of the emperor Gordian against the Persians. After the death of that emperor Plotinus with difficulty escaped to Antioch, the only city of Rome left in Asia. For forty years he established himself as a teacher of philosophy, and remained in Italy until his death, A.D. 270. According to the statement of Porphyry (Vita Plotini, ch. ii.), he had agreed with his fellow-disciples, Herennius and Origen, not to divulge the doctrines of that master, until he came to Rome and had been there forty years. After his departure he retired to Sardis and, according to Suidas (s.v.), was a native of Apamea, in Syria, but according to Porphyry (whose opinion is the more probable one), of Armenia or Melitina, in Cappadocia. Led by the study of the works of Numenius, whom he greatly admired, to embrace the principles of the Alexandrian philosophy, his mind became a regular attendant on the lectures of Plotinus at Rome, and was the means of converting Porphyry to the doctrines of Plotinus, and afterwards, in conjunction with him, of inducing Plotinus to publish his writings. His principal work aimed to show the differences between Numenius and Plotinus, and that the latter could not justly be charged with plagiarism of the former's doctrines. If he did not himself eventually become a Christian, he appears to have highly approved of St. John's definition of the Logos, and is supposed to be the Platonist referred to by St. Augustine as having declared that the beginning of the Gospel by St. John ought to be written in letters of fire, that the Logos is present in every church. After the death of his master, Plotinus retired to Apamea, in Syria, and died there. According to Ueberweg, "he distinguished in the three hypostases, which he styled three demiurges, or three kings: το άνερ, το γονήων, το οσκων. Of these, the second participated in the real being of the first, and the third in the being of the second, enjoying at the same time the vision of the first (Procli, in Plat. Tim. 88 d.)." Amielius maintained the theory (opposed by Plotinus) of the unity of all souls in the world-Soul (Jamblichus. Ap. Stob. Ed. p. 886, 887, 898). (8.) Amielius (whose true name was Gentilius) flourished in the second half of the third century after Christ, and, according to Suidas (s.v.), was a native of Apamea, in Syria, but according to Porphyry (whose opinion is the more probable one), of Armenia or Melitina, in Cappadocia. The greatest of the disciples of Plotinus, and the famous opponent of Christianity, was born, according to some accounts, at Batanea (the Bashan of Scripture), in Syria, according to others, at Tyre, A.D. 223, and died about A.D. 304, probably at Rome. His proper name was Malchus (same as the Semitic Melef, a king), which his friend Amielius changed to correspond to the corresponding Greek form, Basilus, for which latter term his master, Longinus, substituted the adjective Porphyrian (Πορφιρικός), "clad in purple." He was first a pupil of Origene at Caesarea, then of Longinus at Athens, and finally, at the age of thirty, he joined the school of Plotinus at Rome. He wrote a book in opposition to the doctrines of his teacher, to which Amielius replied, and, having convinced Porphyry of his errors, secured a formal recantation of them. Porphyry henceforth was an ardent supporter of Plotinus' views, and gained
so fully his confidence and esteem that he was selected by him to execute the delicate and responsible task of arranging and publishing his writings. He also wrote a bia philosophical number, which is the most characteristic of all our knowledge of the life of that philosopher. His claims to consideration as a philosopher rest less on any originality of thought and research than on his ability and earnestness as an expounder and defender of Plotinian doctrines, on a perspicacity of style rare in that age, and also on the extent of his learning. His brooding was in its character more practical and religious than that of Plotinus. The end of philosophizing, according to him, is the salvation of the soul. His Syrian origin and Oriental training, as well as his temperament, made him more inclined than Plotinus to the tenets of the Jewish philosophers, and the Maccabees. He has shown whether he sincerely believed in it or not. His views on these matters, however, appear to have been modified in his later years. While probably he had little faith in the old Greek polytheism, he bitterly opposed Christianity, and wrote a work in fifteen books against its doctrines, and especially against the divinity of Christ. This work, which excited vigorous opposition, and called forth numerous replies from Christian writers, was destroyed publicly by the order of the emperor Theodosius, A.D. 435. We are consequently indebted for our knowledge of its nature and merits to the notices and arguments of its opponents. From these we know that Porphyry was an enemy of Christianity. It seemed to him to be contradictions in the Scriptures, which he claimed were therefore not inapplicable; in the third he treated of the interpretation of Scripture, repudiating Origen's allegorical fancies; in the fourth he opposed the narrative of Sanchoniatho to the Mosaic history; and in the twelfth and thirteenth he maintained that the prophecies of Daniel were written after the events predicted, thus seeking to nullify their force as proofs of the inspiration of the Jewish Scriptures. It is much to be regretted by the Christian world that this work, written by one of the most learned and earnest opposers of Christianity in the age of the Council of Nice, has not been preserved. It would doubtless throw much light on the social and religious condition of the times, and give us a clearer insight into the causes then at work to promote the triumph of Christianity over paganism. Socrates (Hist. Eccles. i. 28) asserts that Porphyry was deposed from the chair of philosophy, on which a fantastical theology was favored. He made use of philosophy merely to confirm polytheistic worship, and strove to justify superstition on speculative grounds. His system was elastic enough to include all the classical and Oriental divinities except the Christian, together with those of Plotinus, and many others created by his own fancy. Miracles were attributed to him by some of his disciples, who even spoke of him as "the divine," or "most divine." However, he was in fact far inferior to his master, Porphyry, and cannot be commended either for originality of thought or grace of style. The exaggerated estimate of him by the emperor Julian, viz., that he was inferior to Plato only in the age in which he lived, can be accounted for only on the ground of that emperor's partiality for those who advocated the principles of paganism. The theology of Jamblichus rests, as did that of Plotinus and Porphyry, on the principle of the multiplicity of the hypostases in the unity of the divine nature (Simon), but he assumed an absolutely first One, above the One of Plotinus, and wholly without attributes—an ineffable first essence (Ω παντιν ἀπορρος δοχή). Next to this stands the Plotinian One. From this latter is produced the intelligible world, consisting of three elements; and from this in turn emanates the intellectual world, consisting also of three members, the Nous, Power, and the Demiurge (subdivided into seven, a favorite Pythagorean idea). In this national system, the numbers also were applied to the sphere of psychology. He carried to "a great length the mysticism and extravagances of his age," and determined and arranged, according to a fantastical numerical scheme, the number and order of the polytheistic gods, angels, demons, and heroes recognised by him. The sensible world夸ires the last place in it. He maintained the doctrine of a union with God (γεγονησκεν ἄνωθεν), not through the ecstasy, as did the earlier Neoplatonists, but by means of theurgical rites and ceremonies. Of his writings only a few are extant. The most important are [1] Προσκληρύναι δίδωσιν, On the Secret Sources; and [2] Περὶ Μυστήριων, where, in the character of an Egyptian priest named Abammon, he replies to Porphyry's letter to Anebo, and "endeavors to refute various doubts respecting the truth and purity of the Egyptian religion and worship, and to prove the divine origin of the Egyptian and Chaldaean theology, as well as that mon, through theurgical rites, may come with the Deity" (Smith, v. a.). Jambichius had many followers, some of whom, however, rejected the belief in magic and theurgy. One of his immediate disciples, Theodorus of Asine, drew up a still more complicated triadic system, and thus assisted in the transition to the doctrines of Neoplatonism. Not Porphyry but Jamblichus was the most learned of the later Neoplatonists. (11.) The next important character whom we have space in this sketch to mention is the emperor Julian, commonly styled "the Apostle," because, having renounced the Christian faith, in which he had been trained, he became one of its most virulent and dangerous foes, and an earnest and influential friend and patron of Neo-Platonism and the old heathen cultus. Julian (born A.D. 331; died of a wound received in battle with the Persians, A.D. 363) was a nephew of Constantine the Great, and succeeded Constantius. A.D. 361. It appears that he had secretly apostatized from Christianity some years before ascending the throne; and after that event he publicly avowed himself a convert to paganism, and put forth his best efforts to re-establish its doctrines and worship throughout the empire over which he reigned. Aware, however, of the strong foothold which Christianity had obtained, and of the failure in the past of open persecution to break its power over the mass of men, he at first preferred to adopt other methods, and to clothe his purpose in the garb of humanity and freedom of conscience. He accordingly proclaimed entire toleration for all parties, while he gave the whole influence of his position and patronage to the adherents of his own faith. As his favoring of the pagans was decided, however, by the old supporters of paganism and whatever proselytes he could attract to it. Without adopting fully either the unfavorable accounts of his conduct and motives given by Christian writers, or the fulsome laudations of him by heathen authors, it may justly be said that "his talents, his principles, and his deeds were alike extraordinary." Boasting of a philosophy which affected to look with complacent contempt upon Christians as ignorant worshipers of "a dead Jew," he was himself, in fact, so superstitious as to attach supreme importance to the mystic rites and juggleries of polytheistic worship. Scorning all evidence of the miracles of Christ, he lent a ready ear to the absurdest heretical fables. How little of sincerity there was in his pretensions to impartial fairness towards all the subjects and faiths of his empire was shown by his treatment of the Christians, not stopping in the end even short of open persecution. How little reliance for success over the doctrines of the Galileans, as he contemptuously styled the Christians, he really placed upon the inherent superiority of his vaunted philosophy may be seen from the admissions of a modern writer, deemed to be a not unfriendly critic of his character and aims. Gibbon says:
NEO-PLATONISM

"A prince, who had studied human nature, and who possessed the treasures of the Roman empire, could adapt his arguments, his promises, and his rewards to every order of Christians, and the merit of a reasonable conversation was allowed to supply the defects of a candidate's reverence or his eloquence. As a general, the governor of the army is the most forcible engine of absolute power. Julian applied himself with peculiar diligence to corrupt the religion of his troops. . . . The holy name of Christ was erased from the Librarium; and the symbols of war, of majesty, and of pagan superstition were so deliberately blended that the faithful subject incurred the guilt of idolatry when he respectfully saluted the person or image of his sovereign. The soldiers passed successively in review; and each of them, before he received from the hand of Julian a liberal donation, proportioned to his rank and services, was required to cast a few grains of incense into the flame which burned upon the altar. . . . By the frequent repetition of these arts, and at the expense of sums which would have purchased the service of half the nations of Scythia, Julian gradually acquired for his troops the imaginary protection of the gods, and for himself the firm and effectual support of the Roman legislations. The plans and purposes of Julian's false faith were contrived by him who is Master alike of philosophy and history. Later tradition reports of him that, gathering into his hand the blood flowing from his wound, he cast it into the air, with the words, Νεμέσεσα Γαλατίας, 'Thou hast conquered, O Gallæan.' Julian's successor, Jovian, proclaimed emperor on the field, received and distributed the acclamations of the troops by declaring himself a Christian, and that he "could not hope for divine protection, or the success of their arms, were he to take the command of men trained up in the principles of the late emperor Julian." The soldiers replied, "You shall command Christians. The oldest of us were trained by Constantine, the next by Constantius, and the reign of Julian has been too short to bind any men among us to his persuasions." Jovian soon issued an edict which "placed the Christian religion on a legal basis," and put an end to the persecution of its followers. Thus imperial power, princely learning, and the religious sentiments of the whole country were thrown into one system, and the people who had been so long separated and divided in the opinion of philosophy and of action, were united in the same principles of faith and practice."}

(12.) "In practical life Neo-Platonic philosophy was unable to vie with Christianity; its mission was simply the preservation of the old learning, science, and art." When, therefore, the political direction given to it during the reign of Julian had failed to renovate "the ancient cultus and the ancient faith," its representatives applied themselves anew to scientific pursuits, especially to the study and exegesis of Plato and Aristotle. The "philosophy became again a mere matter of the school," which the canonists of Alexandria illustrated. At Ephesus, the son of Nestorius (born about A.D. 380, and died 438), taught. This Plutarch was styled by the later Neo-Platonists "the Great," to distinguish him from the historian and Platonist who lived in the reign of Trajan. He appears to have been a Syncratist, and to have maintained, after Jamblichus, the efficacy of theurgy for uniting man with God. According to Proclus, he "distinguished between the One, the Nous, the Soul, the forms immanent in material things and matter." Syrusian, his pupil and a teacher of Proclus, wrote a commentary on the metaphysics of Aristotle, whose philosophy he considered as a stepping-stone to that of Plato. (18.) Proclus (A.D. 411-485), surnamed Διδάγωγος, "the Successor," was by far the most celebrated of the later Neo-Platonists, the Scholastic among the Greek philosophers. He was born at Byzantium, spent his youth at Xanthus, studied at Alexandria, and subsequently at Athens under Plutarch and his daughter, Asclepiogenes, and Syrusian. During his travels he was initiated into the mysteries and arcana of theology, and it is related that he was unmasked to the gods of the mysteries, and had a dream that he was the last link of the Hermaic chain (στερητού Ἑρμαίου), i.e. of the men consecrated by Hermes to preserve by perpetual tradition the esoteric doctrines of the mysteries. His biographer, Marinus, tells of his wonderful precocity, his quick comprehension, and extraordinary precocity in the mysteries; of his ascetic virtues, his scrupulous observance of the mystic rites, his fastings, vigils, his profound knowledge of the Orphic and Chaldæan mysteries; and says that in several instances the gods appeared to him. In philosophy his aim was to combine, according to the principles of dialectics, the mass of transmitted philosophy, enlarged by additions of his own, into a rigidly scientific form. His theology rests on the same general principles as that of Plotinus, with the same hypostases in the same order, but differing in the particular that each hypostasis is divided into a new triad. There is but one real principle of things, from which all things emanate, a triad of reality being subject to this triadic development. That which is produced is at once like and unlike its cause; so far as it is like it is immanent in the cause, and so far as it is unlike, it is separated from it. The development is a descending one, from the higher to the lower. All things tend to return to their source, unity. Out of this first unity a plural world is extricated, above being, life, reason, and our power of knowledge, that operate in the world, and are the agents of Providence, the gods." After the unities follow the triad of the intelligible, intelligible-intellect, and intellectual essences, of which the second participates in the first, and the third in the second. The intelligible or Being (θεός) includes three triads. The intelligible-intellectual sphere contains female divinities, and is subdivided into inferior triads. The intellectual essences are arranged according to the number seven, by a sevenfold division of which Proclus makes up seven hebdomads of intellectual essences. Souls emanate from the intellectual, are by nature eternal, are divine, of demons and of men. The human soul possesses freedom of will, and is therefore responsible. Matter is neither good nor evil, but is the source of natural necessity. (14.) Among the adherents and teachers of Neo-Platonicism in the 5th century, who were the most celebrated was the celebrated female philosopher Hypatia, whose life, genius, learning, beauty, accomplishments, and untimely fate have been made, by a writer of distinction recently deceased, the groundwork of an interesting and vivid picture of the social condition, the philosophical conflicts, and the religious anemities of that age (Hypatia, or Old Foes with a New Face, by Charles Kingsley, Lond. 1872, cr. 8vo). She was the daughter of Theon, and by him was taught philosophy and mathematics. Her learning and eloquence were such as to entitle her to the honor of presiding over the Neo-Platonic school at Alexandria. At the lecture which she was giving, and which incurred the enmity of some ignorant bigots among the Christian populace of that city, she was one day seized in the street, dragged from her carriage into one of the churches, and most cruelly murdered by a mob of fanatics headed by one Peter, a reader of one of the churches. Her tragic death is the theme of the most beautiful among the pagans, while the spirit and conduct of her murderers merit the execration of Christians, whose principles were thereby grossly violated. (16.) Boethius, the author of the Consolation, a work which was the most influential medium for the transmission of philosophical thought to the West in the early part of the Middle Ages, was one of the last Neo-Platonists of antiquity. Other less conspicuous names follow in the history of the school, whose doctrines continued to be taught publicly until, in the year A.D. 529,
the emperor Justinian by an edict forbade the teaching of philosophy at Athens, and confiscated the property of the Platonic school. In consequence of this edict, Damascius, Simplicius, and other teachers of the hea-
tthe Christian Church, fled to the protection of Choraeus, king of Persia; but, disappointed in their hopes of gaining new life and honors for their philosophy, they were glad to avail themselves of the terms of peace between the Persians and the Romans to return to their country again in A.D. 583. Thus ended as organized system of doctrines this type of Christian philosophy, which a
recent author refers to as "a progressive evolution out of the combined action of Platonism, Judaism, and mys-
ticism before the Christian era, completed by the additional forces of Christianity and Aristotelianism in the 1st and 2nd centuries of the Christian era, and thus the result of seven centuries of growth and conflict in hu-
man thought" (American Cyclopedia).

II. Résumé of General Principles. — 1. Viewed from the stand-point of doctrine regarding the number of first principles, Neo-Platonism was a monism, as it traced all things back ultimately to the Absolute One, but its conceptions of the Deity as manifested were not mono-
theistic in the Jewish and Christian sense, but panthe-
istic. It rejected the Biblical idea of an objective reve-
lation of man's relations to God, and of the means by which mortal man could attain to a saving knowledge of him, and claimed to unite man with the Deity by a subjec-
tive intuition, called the ecstasy, wherein the subject, man, the object, the Absolute One, and the Absolute
identity were intimately united as to lose their separate identity. This unification with God is attainable by asceticism and profound contemplation, and, according to some later Neo-Platonists, by theurgy and magic rites. This conception of mystic blending, so to speak, of the hu-
man with the divine gave to Neo-Platonism its pecu-
nar character, in contrast with the purely Grecian systems of philosophy.

2. Closely connected with this theory of the ecstasy stands the doctrine of the three cosmical principles, the Neo-Platonic trinity. To the two hitherto admitted ones, viz. the reason and the soul, they added a third one, as the ultimate uniter of all distinctions, the primal One. This One is inexpressible and inconceivable. All things are derived from it not by division, which would diminish it, but by a radiation or flowing forth, as rays of light from the sun. This conception of the first as primum movens, in conformity to the second, gives a basis for their doctrine of emanations.

3. The Neo-Platonic doctrine of emanations represen-
tes the world as outflowing from God in such a man-
er that each remotest emanation is possessed of a lower degree of perfection than its principle. Fire gives forth heat, snow causes coldness, odorous substances exhale odors, and every organism, so soon as it has reached its full development, begets something like itself. So the perfect and eternal One, in the overflow of his perfec-
tions, allows to proceed from himself (but without him-
self being weakened or diminished thereby) that which is also ever-enduring and, next to himself, the best, viz.
the second, and so on, by a series of evolution, reflection and image. The Reason is, next to the pri-
mal One, the most perfect, and contains in itself the world of ideas.

As the Reason emanates from the primal One, so the
World-Soul flows forth from the Reason as its image, and in turn gives rise to sensible matter, the last and lowest of the emanations. In this way is the World-
Soul the plastic artist of the visible universe, which closes the series of emanations. The aim of the ema-
nation theory is attained in a continuous process from God to the sensible world. Individual souls, like the World-Soul, partake of the life of the Reason and of the Sensible, just as a sun-ray touches alike the sun and the earth. From the world of reason, their original and proper home, they have descended, each in its allotted time, not voluntarily, but following an inherent

necessity, into the corporeal world, yet without entirely forsaking the world of ideas. The soul's true vocation, therefore, is to seek to regain its proper home, to free itself from participation in the corporeal, in order that it may return to the second, the world of ideas, and reac-
timate all of its desires and efforts, immediate union with God through the ecstatic vision of the primal One, into whom it sinks unconscious and loses itself.

III. Concluding Observations. — Neo-Platonism and Christianity, though opposing forces in the religious movement of the age, indirectly influenced the doc-
trinal developments of each other. This fact is appar-
ent not only from an examination of individual writers, but much more from a comparison of the parallel history of each. The works of Justin Martyr, Clement of
Alexandria, Origen, Augustine, and other Christian
writers of the early ages of the Church, abound in evi-
dences of the influence of the philosophic spirit. On the other hand, a glance at the historical development of Neo-Platonism reveals a corresponding action of Christian ideas on it. Their opposition to each other arose naturally from the relative positions occupied by each. Neo-Platonism was a merely human religio-philosophy, lacking the divinity and holiness of the re-
ligion under the form of a philosophy which readily
accepted the religious conceptions of all nations, and
called to select the wheat from the chaff of all pre-
vious systems. Christianity, as a system of revealed
truth, was of necessity exclusive. It could accept no
mixture of dogmatics, but was open in communion with differing creeds. Neo-Platonism was the creed of
philosophers lifted, in their conceit, above the vulgar
crowd, and despising the illiterate. Christianity was
open to all grades and conditions of men. In her fold the
learned and the unlearned were alike welcomed as
redeemed by the blood of her Martyrs. The one
made a fruitless effort to revive the life and vigor of
the heasten past; the other labored, and not in vain, for
the future, wherein Christ shall see of the travails of
his soul, and shall be satisfied. The one seemed to hold
itself aloof from contact with the suffering, and made
go effort to elevate the lowly; the other sought all the
rich and the poor, relieved the suffering, comforted the
sorrowing, and encouraged the weak by the hope of
rest from their labors. From the fires of persecution the
one came forth purified as gold tried in the furnace,
the other vanished as the stubble. Neo-Platonism,
thought to be eclectically distasteful to the men of modern
philosophy. Christianity with its
"mighty and all-embracing message," and its exhibit-
on love and self-sacrifice, welded together the hearts
of men better than the force of power or the cold ab-
stractions of the intellect, proving that the foolishness
of the Gospel is wiser than the wisdom (philosophy) of
men, and that the weak things of God are stronger than

IV. Literature. — The original sources of information embrace the works of Philo-Judaeus, Plutarch, Apuleius, Plotinus, Porphyry, Jamblichus, Julian, Eunapius (Bios
philosofov kai soygnavov), Sallustius (Pert Sei kai
paterepetheis), Eusebius (Hieron, Hist. eccl. Patro-
fathers, and the Church historians—Eusebius, Soc-
rates, Sozomen, Theoret, and Evagrius. To these
may be added among modern or secondary sources,
several of which have been freely used in the prepara-
tion of this article, and often without special acknowledg-
ment: Ritter, History of Ancient Philosophy (Franz.
ii). Müller, Hist. of the Literature of Ancient Greece (con-
tinued by Donaldson, Lond. 1858, 3 vols. 8vo), see Index

Neostadiensium Admonition Christiana de Libro Concordie, quem vocant, a quibusdam theologis nomine quorumdam ordinam Augustanae confessionis edidit (Neostad, in Palatinatu, 1851). Under this title the reduced theologians assembled by Johann Cas-

mir Neostad published a work against the Lutheran Formula of Concord. Most of these are allegorists, and were driven out of Heidelberg by elector Ludwig, who sided with the Lutheran party, but were well received by the zealous Calvinist John Casimir. He appointed a number of them to the gymnasia at Neustadt, which remained a Reformed seminary as long as Heidelberg con-
tinued to be a Catholic life. This was the second edition of the Admonition, composed by Ursinus, and therefore also contained in the Ursina Opera (ii, 486 sq. [Heidel. 1612]), is the most important of the Lutheran protestations against the Formula of Concord, and closely connected with the Historia der Augsburger Confession (published at Neust-

adt in 1580). It consists of a lengthy introduction on the evils of party feeling, the unfruitfulness of doc-

trinal differences, etc., and of twelve chapters, treating, 1, on the person of Christ and restoration of the true doctrine; 2, same concerning the Eucharist; 3, reply to the false accusations against our Church on account of certain dogmas; 4, on the authority of the Confession of Augsburg; 5, on the true meaning of that confession; 6, of the authority of Luther; 7, of the unjust judgment passed on our doctrine in the Book of Concord; 8, of the false assertions contained in that work; 9, of the contradictions contained in it; 10, of the conduct of the theologians concerning the Formula of Concord, and of the duty of the Church state in ecclesiastical controversy; 11, of the evils attending the carrying out of the Formula of Concord; 12, exposition of the true and correct manner of establishing unity in the Christian Church. It is a remarkable work. Thus on page 115 we read:

"The importance of the Confession of Augsburg is great; so much so, as when any one who departs even from the letter of it is a heretic. Besides, we do not dissent from its real meaning. The Anabaptists, Independents, etc., have all the same doctrine and the same meaning. All other works on doctrine may indeed possess ecclesiastical authority, but not divine, and can only be received as received agree with one another. Among them are ecclesiastical works which no one has a right of his private authority to alter, while there are others which are only opinions which are observed, as one can be a member of the Universal Church without endowing them, and because other churches have the same right of drawing up particular confessions according to their requirements. They do not abolish the decision of the Church; nor do they decide on what is truth or what error, but only on what does or does not agree with the doctrines of their Church. They therefore do not bind, but are looked on as the Church has attempted to be done concerning the Confession of Augs-

burg and the Formula of Concord, which would then be obliged to follow them. It is neither perspicuous nor advisable to impose on all churches the same formula; for it is therefore better to allow every Church liberty to draw up its own confession according to its requirements and to the necessities of controversy, provided they all hold fast to the fundamental truths of Christianity. This is the case with several confessions of the present time, which are all necessary, and the Confession of Augsburg has no privilege over any other, however good it may be in itself. Neither of it or of any other can it be said that whatsoever rejects it is a heretic. It was framed in the early years of the Reformation, when, after the long struggle against papal obstruction, and many points were yet imperfectly defined. It was both too liberal to forbid freedom of conscience, and yet the limitations of the framers of the confession themselves, from making the doctrines profit by their increased experience, or even now, which is a thing impossible in a cabalistic and blink-sighted manner. Besides, this confession is only the work of a few, and the framers of it are in such circumstances as the Perturbed Diet, consequently under fear of danger, and the necessity of dealing most gently with papal abuses. It is therefore, within this full well the explicit confessio which many would desire, and requires subsequent improvements."

This extract suffices to show that the Admonition Neost, is yet worthy of a careful perusal. The chapter on the authority of Luther is especially remarkable for its true evangelical character, but it is least read by those who would benefit most. The original work against the Formula of Concord attacked the Admonition, and it was defended by the opponents of the formula, particularly by Ursinus himself (Opp. vol. ii). See Herzog, Real-

Encyclopädie, x, 205 sq.; Krauth, The Conservative Reformation and its Theology, p. 288 sq.
kinman king Alfred, who held him in the highest re-
spect, and he urged his royal relative to turn his mind
from the vanities of the world. It is pretended that it
was by his advice that Alfred re-endowed the English
society, and especially they set the seal of their approval
on his influence with the pope procured for Alfred many
apostolic favors. Some writers of very suspicious au-
thority have gone still further, and asserted that not
only did St. Neot originate the idea of the foundation
of the University of Oxford, which they affirm was
first laid by Alfred, but that he and Gildas were the
first two professors there. If we can put any faith in
the stories told by the biographers, Neot must have died
in or a little before the year 877; but all our information
relating to him is extremely uncertain. His festival was
kept on the 51st of July. He was buried at St. Neot's
in Cornwall, where his bones remained in peace until
974, when they were carried away by stealth to the
newly-founded monastery of St. Neot's in Huntingdon-
shire, and were there deposited in a handsome chapel.
The old bibliographers (Bale, Plts, etc.) attribute to
Neot several writings, as Amala of the Earlier Part of
Alfred's Reign.---_Sermons and Exhortations.---_A Letter
to Pope Martin on the Subject of the English at Rome:
---and a book of Exhortations to King Alfred. We
may observe that there is less authority for making him
the author of these writings than for making him professor
at Oxford. St. Neot is described as "humble to all, af-
iable in conversation, wise in transacting business, ven-
erable in aspect, severe in countenance, mild in char
in his walk, upright, calm, temperate, and charitable.
Two towns in England bear his name. His attributes
are the pilgrim's staff and wallet. He is commemorated
by the Church of Rome October 29th. There are sev-
eral lives extant of St. Neot, but they are all filled more
or less with legendary wonder. The one on which the
others were probably based was composed towards the
beginning of the 11th century. The most ancient of
the lives now extant is a sketch in Anglo-Saxon, which
has been printed in the Rev. G. C. Gorham's History
and Antiquities of Eynsford and St. Neot's (Lond. 1850-
1894, 2 vols. 8vo). This is the most valuable of any re-
ains regarding St. Neot. See also Wright, Biogra-
381-383; Clement, Hand-book of Legendary and Mytho-
logical Art, p. 283. (J. H. W.)

Nepa(u), an independent kingdom of India, com-
prising a large portion of the south-eastern coast of the
Hindustan, bounded on the N. by the Bhootan, on the S.
and by British India, and on the E. by Sikkim, a protected state, is
situated in long. 80° 15'-88° 15' E. It is 500 miles in
length by about 100 miles in average breadth, covers an
area of 50,000 square miles, and has a population esti-
mate at 2,000,000. The kingdom is separated from
the plains of India by the long, narrow and steep range
resembling an English down, but unhealthy, called the
Terai, which extends along the whole southern border.
North of this, and running parallel with it, is the great
forest of Nepal, from eight to ten miles broad. North
of this strip is a tract of hilly country, and above that
are two tracts, the greater of which may be called moun-
tains, while the second might appropriately be called Alpine, if it did not comprise
among its mountains peaks which, like Mount Everest
and Dhaulagiri, attain almost twice the elevation of
Mount Blanc. The principal rivers are the Kurnal, the
Rapti, the Gandaki with its great tributaries, and the
Sun Kosi. The climate, most unhealthy in the
Terai, is healthy and pleasant in the hilly and moun-
tainous districts, suggesting that of Southern Europe.
In the Valley of Nepal—the district surrounding the
capital—the heat of Bengal, which is felt in the
hollows, may be exchanged for that of Russia by ascending
the slopes of the hills which enclose it. The soil is ex-
tremely rich and fruitful. Barley, millet, rice, maize,
wheel, cotton, tobacco, sugar-cane, pine-apple, and vari-
ous tropical plants are cultivated. Gold has not been
found, but iron and copper mines are worked. The
capital of the country is Katmandu. The inhabitants
consist of a variety of races, but the dominant people are
the Gurkas, a tribe of Mongol origin, Hindus in reli-
gion, who conquered the country about the close of the
18th century. Their chief occupation is war. Many
Hindus from Chiton settled in Nepal at the time of
the Mohammedan invasion, and some of them have pre-
served their blood pure to the present time, while others
have intermarried with Chinese and Tartars. The
Hindus are found chiefly in the west; the east is
populated by aboriginal tribes, among which are the
Newars, Magars, Gurungs, Jariyas, Dhenwars, Boteas,
Mhanjas, and Bhaukas. The most important of these
are the Newars, who constitute the agriculturists and
 artisans of the country. They are ingenious and peace-
able, though excessively diry; of middle size and great
strength, with round flat faces, small eyes, broad noses,
and open countenances. They are Buddhists, but have
a priesthood of their own, and reject the Thibetan model
of Buddhism as it prevails among the other aboriginals
of Nepal. They as well as others of the aborigines
practice polyandry to some extent. Thirteen dialects
are spoken in Nepal, but only two of the dialects pos-
sess any literature, and they are the dialects of the two
most prominent tribes—the Newars and Gurkas.

Of the history of Nepal little is known until the in-
vasion of the Gurkas (1768); it seems never to have
been subject to the Mogul or any other great Asiatic
conquerors. A war in which it became involved with
Thibet in 1790 led to hostilities with the emperor of
China, who, regarding himself as the protector of the
lamas, in 1792 sent an army of 70,000 men against the
Nepalese, and checked the extension of their territory
to the northward. A treaty of commerce was concluded
with the British in 1792, and from 1802 to 1804 Kat-
mandu was the residence of a representative of the Brit-
ish government. Repeated encroachments of the rajah
upon the East India Company's territories led the Brit-
ish to declare war in 1814, and they consequently in-
vaded the country on the western frontier, where their
troops met repeated losses, and their commander, Gen.
Gillespie, was slain. In the following year, however,
the campaign under Sir David Ochterlony was attended
with very different results. The victory of Malome, the
capitulation of the famous Nepalese commander
Amir Singh, and finally the rapid advance of the victor
wards Katmandu, obliged the Nepalese monarch to
make peace, and a treaty in March, 1816. Throughout

Natives of Nepal.
the mutiny of 1857 the Nepuluese cultivated the friendship of the British, and the prime minister, Jung Baha-
dür, defeated the last remnant of the rebels in December,
1859. The policy of the government towards for-
eigners, however, is exceedingly exclusive. Much val-
uable information concerning the country is contained
in the work on Nepaul and Tibet, by H. H. Hodgson,
formerly British minister at Kautmanda (1874). See
also Oliphant, A Journey to Kautmanda (1852); Col.
Kirpatrick, Account of the Kingdom of Nepaul (Lond-
1811); Edinburgh Review, July, 1840, art. i.; Black-
wood's Magazine, 1852, pt. ii., p. 58; 1860, pt. i., p. 599;
and the article Gorhas in the American Cyclope-
dedia.

Nepenthè (from Gr. νῆπθός, ὁ ναῦς, and πόντος, γρίφος), is
the name of a magic potion mentioned both by Greek
and Roman poets, which was supposed to make persons
forget their sorrows and misfortunes. It was the juice
or infusion of a plant now unknown. Homer says it grew
in Egypt, and that Helen learned its use from the Egypt-
tians. According to Theodorus Siculus the Thelian
women also knew the secret of making it.

Nephalia (Gr. νήφαλος, σεβέρ) were festivals and
sacrifices of the ancient Greeks, but more especially of
the Athenians, and received their name from the cir-
sumstance that no wine was offered, but only milk,
mead, and other milk liquors. The vine, the fig-tree,
and the mulberry were prohibited from being used in
the sacrifices on this account. This custom was long
continued as a symbol of drunkenness. See Broughton,
Bibliotheca Historica Sacra, ii., 162.

Nepheg (Heb. id. יְפֶהִי, יָפָע; Sept. Νέπεθ, Exod.
vi, 21; Νηφήγη, 2 Sam. v, 15; Νηφήγη, 1 Chron. iii, 7;
Νηφήγη ν. Νηφήγος, 1 Chron. xiv, 6), the name of two
Hebrews.

1. The second named son of Ishar, a Kohathite of the
tribe of Levi (Exod. vi, 21). B.C. cir. 1790.

2. The ninth-named son of David, born at Jerusalem
(2 Sam. v, 15; 1 Chron. iii, 7; xiv, 6). B.C. cir. 1020.

Nepheh, a word occurring only in the phrase
נֵפֶח נֶפֶל, three of the height, i.e. the triple height
(Josh. xvii, 11). The name seems to refer to the three
places just mentioned—Endor, Taanach, and Megiddo—which
were elevated above the plain; comp. Tricollis;
Tremont (Genesius, a. v.). But the Targum renders
trees round; "three countries," which is explained by the
Author. The Latin (after the sept. τρισόλα τοῦ Ναẓ̃h̃oφ̃ῆ) has tertia pars urbis Nopheth,"the third
city of the part of city Nopheth," and is followed by Luther.
Schwarz (Palest, p. 149), with less probability, gives "the three Nepheth, meaning three places of the same
name in the neighborhood of Dor," and finds a village
Naphatha two miles and a half south-east of Dor
(comp. Josh. xii, 25). See Keil, ad loc.

Nephew is used in the old English sense of grand-
son as a rendering of נָעֵב (naked, Job xviii, 19; Isa. xiv,
22; progeny, especially a "son's son," as rendered in
Gen. xxv, 14; and יִשְׁעָנָה, a descendant (1 Tim. v, 4). See KINDRED.

Nephē (Νηφής, v. Νηφῆς; Vulg. Nepēh), the name given by many
(παρά τοις πολλάκις) to the sub-
stance otherwise called (2 Mac. i, 36) Nēphētār (q. v.).

Nephēlēm (νήφελη) occurs only in the plural
form, and in the two passages (Gen. vi, 4; Numb. xii, 33)
where it is rendered in the English version "giantes." This
meaning is given by all the old versions (Sept. γίγαντες;
Aquila, ιτιστίποτες; Symm. θανάτου; Vulg.
giantsam, Osch. οὐκιούσας; Luther, tygeren); and is
demanded by the latter passage. "The word is derived
either from נָעַב or נָעְב (= 'marvellous'), or, as is
usually believed, from נعناية, either in the sense to
make tall, or in הָעִי (i. e. angels, archangels); comp.
Isa. xiv, 12; Luke x, 18), or meaning אוֹנָא, trunca-
tes (Gesen.), or collopa (by euphemism, Böttcher, De
Inferis, p. 92); but certainly not 'because men fell from
terror of them' (as R. Kimchi). That the word means
'giants' is clear from Numb. xiii, 32, 38, and is confirmed
by נָעָב, the Chaldee name for 'the very great' giant
(Job ix, 9; xxxviii, 31; Isa. xiii, 10, 12, 15; 1 Kings, 2)
(see Gias). This name is given to the colossus (of the
Gen. of Earth, p. 35). We now come to the remark-
able conjectures about the origin of these Nephēlēm in
Gen. vi, 1-4. (An immense amount has been written on
this passage. See Kurz, Die Ehen der Söhne Gottes,
etc. [Berlin, 1857]; Ewald, Jahrb. 1854, p. 128; Goyets's
Les Jacobites d'Israël; Faber, Many Memorable Facts of the
Sac. Lit. Oct. 1858, etc.) We are told that 'there were
Nephēlēm in the earth,' and that afterward (Sept.
καί αἱ μεγίσται) the 'sons of God' mingling with the
beautiful 'daughters of men' produced a race of violent
and insolent Gibborim (Σαμήγαρ). This latter word is
also rendered by the Sept. γιγάντας, but its meaning
is more general. It is clear, however, that no statement
is made that the Nephēlēm themselves sprang from this
unhallowed union. Who, then, were they? Taking
the usual derivation (נָעַב), and explaining it to mean
'fallen spirits,' the Nephēlēm seem to be identical with
the 'sons of God,' but the verse before us militates
against this notion as much as against that which
makes the Nephēlēm the same as the Gibborim, viz.
the descendants of angels. The latter position
cannot be accepted if we admit either (1) that
there were two kinds of Nephēlēm—those who existed
before the unequal intercourse, and those produced
by it (Heidelberg, Hist. Patr. xi), or (2) by following the
Vulgate rendering, postquam enim ingressi sunt, etc.
But the common rendering seems to be correct, nor is
there much probability in Aben-Ezra's explanation that
לָעַב ('after that') means לָעַב יָבִיב ('i.e. after
the deluge'), and is an allusion to the Anakims.

We may remark, however, that the Hebrew word Nephēlēm
may rather be taken in an active sense those who fall
upon others, i.e. the violent tyrants of those days (Aqui-
la, ιτιστίποτες); and this agrees with the evident
lawlessness of the times. See Antediluvians.

Nēphēs (Νηφῆς, v. Νηφῆς, Ψηφῖς; Vulg. Lipta),
given (1 Enoch, v, 21) as one of the heads of the families
that returned from Babylon, in place of Neeo (q. v.) in
the Heb. list (Ezra ii, 28), perhaps by some confusion with
the Magobh following.

Nephēsh (1 Chron. v, 19). See Naphish.

Nepheh'esēim (Neh. vii, 52). See Nephehím.

Neph'tali (Tob. i, 2, 4, 5). See Naph'tal.

Neph'thalim (Tob. vii, 3; Matt. iv, 15, 18; Rev.
vii, 6). See Naph'tal.

Nephythys, the sister and wife of Typhon, the evil
god of the ancient Egyptians. To Oaritis she bore
NEPHTOAH

Anubis, who is represented with the head of a dog. Nephtoah belongs to the third order of deities, as classified by Sir J. G. Wilkinson in his Materia Hieroglyphica. In Egyptian theology she personified the unfruitfulness and want of fertility. Nephtoah also represented the ocean, and hence it is possible that the god of the classic nations, Neptune, was derived from the Egyptians.

Nephtoah [some Nephtoah] (Heb. נֵפֶתֹאָה, nēpēthō'āh, opened; Sept. Νηφθαθ v. r. Νηφθαθו; Vulg. Nephtoah), the name of a spring (עֵין, A. V. a fountain; "well"), and apparently a streamlet (יָצָר, A. V. water; "waters") issuing from it (or perhaps a watering-place for cattle), on the border between Judah and Benjamin. Its position is described with considerable minuteness. From the valley of Hinnom the northern boundary of Judah was drawn to the top of the hill on the west, that is, in the direction of the Convent of the Cross; and the border was drawn from the top of the hill unto the fount of the water of Nephtoah, and thence to Kirjath-jearim (Josh. xv, 8, 9). A similar description of the southern boundary of Benjamin is given in Josh. xviii, 14-16; and the name is not again mentioned in Scripture. Its site appears to have been unknown to Jerome and Eusebius; they do not mention it in their Onomastica. In from the air the passage therefore can be inferred that the waters of Nephtoah lay somewhere in or near a direct line between Jerusalem and Kirjath-jearim. Nephtoah was formerly identified with various springs, especially Ain Karim, or Fountain of the Virgin of mediæval times (Dobdan, Voyage, p. 187; see also the citations of Tobioler, Topographia, p. 135; and Sandys, iii, 184), and even the so-called Well of Joab in the Kidron valley (Mishn, li, 155); but these, especially the last, are unsuitable in their situation as respects Jerusalem and Kirjath-jearim, and have the additional drawback that the features of the country there are not such as to permit a boundary-line to be traced along it. In Schwarz (Palest. p. 268 sq.) finds a large spring near the castle of Al-Burak, the water of which was once carried by an aqueduct to Jerusalem, in which openings were made in order that passers-by might draw water; and that it was thence called Mé Nephtoach, מֶ פֶּטֹאָח, the open water. But this is fanciful. Recent geographers have pretty generally agreed to identify Nephtoah with a fountain on the eastern slope of that name, two and a half miles north-west of Jerusalem (Barclay, City of the Great King, p. 544; Tobioler, Dritte Wanderung, p. 202; comp. Topographia, p. 343 sq.; Stewart, Tent and Khan, p. 349). The spring — of which it is given by Dr. Barclay — is very abundant, and is a watering-place in a considerable stream into the valley below. This, however, cannot be reconciled with the statement in 1 Sam. x, 2, that Rachel's sepulchre lay near the border of Benjamin, and it is nearly three miles south of the valley of Hinnom. Consequently, from the top of the hill on the west of Hinnom the border must have turned southward (see Tarsus), and we must look for the waters of Nephtoah on the south or south-west of Jerusalem. About a mile and a half from Jerusalem, on the road to Rachel's tomb, and close to the convent of Mar-Elias, is an old well, which some have identified with Nephtoah (Narrative of Mission to Jesus, June 15). It is, however, a mere well. A much more probable site is Ain Tul, in Wady el-Ward, three miles south-west of the city. It is a small fountain, whose waters flow into a large pool, and are drawn off to irrigate some gardens. Its water is esteemed at Jerusalem, whither it is conveyed in skins on the backs of donkeys (Porter, Hand-book, p. 321; Robinson, Bib. Res., iii, 262). In front of the fountain are some ruins. There is another larger and much more beautiful fountain a mile farther down the valley, called Ain Hamoeg, said by tradition to be the fountain in which Philip baptized the eunuch (Barclay, p. 548). It is ornamented with a niched façade and Corinthian pilasters. See Porter, Handbook for Palestine.

Nephusim (Heb. נֵפֶתָיוֹם, nêphētā'ōm, mercies; Sept. Νηφσοτια v. r. Νηφσοτιαν; Vulg. Nephusim), the head of a family of "Temple servants" who returned from Babylon with Zerubbabel (Ezra ii, 50). His cleros ( Neh. vi, 23) must be interpreted as "the very few" (as correctly, it would seem) NEPHUSHEIM (Heb. נַפְשַׁוֹתִים, naphṣōthim, mercies; Sept. Νηφσωταὶ, v. r. Νηφσωταῖ; Vulg. Nephusiim). See NEPHISHIM.

Nepiendii. See NEGOUMO.

Nepomuk. John. See John of NEMUK.

Nepos, an Egyptian bishop, who flourished in the first half of the 4th century, was a believer in Chiliasm and in the literal interpretation of Scripture, and consequently an opponent of Origen's system. He wrote a work, Εὐκαρπος ἀλληγορωτηριον, now lost, which was at the time considered by his party in Egypt as an unanswerable argument in favor of Christ's earthly kingdom. This, like all similar works, was undoubtedly based on the Apocalypse, but we possess no particulars as to the manner in which he represented the millennium. Gennadius says that he separated the resurrection of the just from that of the unjust, which is to occur only in the millennium, and according to all the circumstances described in Rev. xx, probably because he everywhere understood it in a literal sense. Bishop Dionysius of Alexandria complained that many neglected the Scriptures for this work of Nepos, in which they believed they discovered great secrets. He found himself even obliged, after the death of Nepos, to convene at Arisino an assembly of presbyters and teachers for the purpose of examining into the doctrines of the work. The meeting lasted three days, and ended in all renouncing the Chiliasm doctrine. Still Dionysius, in view of the reputation of Nepos and of his work, thought it necessary to refute the doctrines therein contained, and he wrote for that purpose his Προ εἰρηναῖον, which, from its being a general refutation of Chiliasm, was by Jerome considered as directed against fianceus, and by Theodoret as against Cerinthus. The fragments of this work contained in Eusebius are the sources of our knowledge concerning Nepos and his doctrine. Nepos wrote the work in a very gentle manner, and in nowise justifies the representation that Nepos was formally condemned, as has been asserted in later times (Labb. synod. in Mansi, Coll. conc. i, 1017). According to Fulgentius (in Piat. Arian, c. 2, who also considers Nepos a heretic, his party still counted adherents in the 6th century). See also: Bшир, Hist. Eccles. vii, 24 sq.; Gennadius, De Doct. Eccles. c. 55; Tillemont, Mem. iv, 261 sq. (ed. Venet.); Walach, Ketzarhistor; vol. ii; Schurart, De Chilismi Neposae (Giesen, 1724); Walach, Einleitung in die Religionsstrangerei der letzten Kirche, ii, 535; Neander, Church Hist, i, 652; Guerick, Ancient Church Hist, p. 196. (I. N. P.)

Nepotism is a word invented in ecclesiastical language to express a peculiar characteristic of many high ecclesiastics in Roman Catholic countries, and more particularly of popes, a propensity, namely, to aggrandize their family by exorbitant grants and favors conferred on members of it; in a literal sense, also on nephews (Latin nepotes). Many of the highest and wealthiest families of the Roman nobility owe their elevation entirely to this species of patronage. Nepotism was first practiced, and that to a very considerable degree, by pope Nicholas III (q. v.), towards the close of the 13th century; reapprochement in the papal family. In the 15th century it found most prominent practice under Sixtus IV (q. v.), and he may be said to have carried nepotism to its highest pitch, and to have given rise to much scandal in the Romish Church. Alexander VI
Neptunalia is the name of a festival anciently celebrated at Rome in honor of Neptune (q.v.) on the 23d of July. Little information is accessible as to the manner in which this festival was kept, but it would appear that huts were wont to be erected with the branches and foliage of trees, where people probably feasted and amused themselves in various ways.

Neptune, an ancient Roman god of the water. It is doubtful whether he was originally a marine deity, for the old Italians were the very opposite of a maritime people, yet his name is commonly connected with water, to swim; hence at an earlier period he may have borne another designation, afterwards forgotten. When the Romans became a maritime power, and had grown acquainted with Greek mythology, they, in accordance with their usual practice, identified him with the Greek god Poseidon whom he most resembled. This was Poseidon, also Poteidan (connected with πώρος, a drink; πώρος, the sea; and μονο-μ, a river). Poseidon appears in his most primitive mythological form as the god of water in general, or the fluid elements, and he was the son of Cronos (Saturn) and Rhea, and a brother of Jupiter. On the partition of the universe among the sons of Cronos, he obtained the sea as his portion, in the depths of which he had his palace near Ægæ, in Euboa. Here also he kept his brazen-hoofed and golden-maned steeds, in a chariot drawn by which he rode over the waves, which grew calm at his approach, while the monsters of the deep, recognising their lord, made sportive hommage round his watery path. But he sometimes presented himself at the assembly of the gods on Olympus, and in conjunction with Apollo built the walls of Troy. In the Trojan war he sided with the Greeks; nevertheless he subsequently showed himself friendly to the great sea-wanderer Ulysses, who had blinded his son Polyphemus. He was also believed to have created the horse, and taught men its use. The symbol of his power was a trident, with which he raised and stilled storms, broke rocks, etc. According to Herodotus, the name and worship of Poseidon came to the Greeks from Libya. He was worshipped in all parts of Greece and Southern Italy, especially in the seaport towns. The Isthmian games were held in his honor. Black and white bulls, boars, and rams were offered in sacrifice to him. Neptune was commonly represented with a trident, and with horses or dolphins, often along with Amphitrite, in a chariot drawn by dolphins, and surrounded by tritons and other sea-monsters. As befitted the fluctuating element over which he reigns, he is sometimes figured asleep or reposing, and sometimes in a state of violent agitation. See Vollmer, Mythologisches Wörterbuch, a. v.; Westcott, Hand-book of Archæol, p. 166, 167.

Nepveu, François, a French ascetic author, was born April 28, 1689, at St. Malo. Admitted in 1654 into the Society of Jesus, he was professor of the humanities, rhetoric, and philosophy, and afterwards occupied different positions; at the time of his death, which occurred in February, 1708, he was rector of the college of Rennes. All his works treat of practical religion or morality; they have frequently been reprinted even in our day, and translated into several languages. The principal are, De l'Amour de Jésus-Christ (Nantes, 1684, 12mo); 5th ed. Paris, 1755, 12mo)—Exercices intérieurs pour honorer les mystères de Jésus-Christ (Paris, 1791, 2 vols. 12mo); Lyons, 1836, 12mo)—Retraite selon l'esprit et la méthode de St. Ignace (Paris, 1867, 12mo)—Maîtrise de se préparer à la mort (Paris, 1695, 1697, 12mo)—Pensées et Réflexions Christiennes pour tous les jours de l'année (Paris, 1696, 4 vols. 8vo, and 1850, 8vo); transal. twice into Latin (Ingolstadt, 1727, and Heidelberg, 1774, 4 vols. 8vo); into Flemish (1837, 1839, 4 vols. 4to); twice into German (1752 and 1829); and twice into Italian (1715 and 1842)—L'Esprit du Christianisme, ou la conformité du Christien avec Jésus-Christ (Paris, 1700, 12mo)—Conduite Chrétienne (Paris, 1754, 12mo)—Retraite spirituelle (Paris, 1788, 12mo). Nepveu is also the author of the philosophical theses maintained in 1679 by Louis de la Tour d'Auvergne, prince de Turenne, and remarkable not only for their extent and solidity, but still more because they are ornamented with symbols, inscription, and vignettes, due to the good taste of J. Charles de la Rue. See Moréri, Grand Dictionnaire Historique, s. v.; Hoefer, Nouv. Bioire. Générale, s. v.

Nequiti is the name of a secret association among the natives of Congo, who celebrate their mysteries in dark and sequestered places, where none but the initiated are allowed to enter.

Ner (Heb. ód, "light; Sept. Nóp), a Benjamite, according to 1 Chron. vii, 58, father of Kish and Abner, and grandfather of king Saul. R. C. cir. 1140. Abner was, therefore, uncle to Saul, as is expressly stated in 1 Sam. xiv, 50. But some confusion has arisen from the statement in 1 Chron. ix, 36, that Kish and Ner were both sons of Jehiel, whence it has been concluded that they were brothers, and consequently that Abner and Saul were first cousins. The explanation of this, however, is that there was an elder Kish, uncle of Saul's father, or, rather, Ner's grandfather. See Saul. "The name Ner, combined with that of his son Abner, may be compared with Nadab in ver. 36, and Abinadab, ver. 39; with Jessie, 1 Chron. ii, 13, and Abiah, ver. 16; and with Judah, Luke iii, 26, and Ahiah, Matt. i, 13." Gesenius, misled by 1 Sam. ix, 1, gives the following genealogy (Theexur. p. 9):
NEREIDS (νερείδες) was the name of the Greek sea-nymphs. They were fifty in number, and were daughters of Nereus, the old man of the sea. They were generally represented as very beautiful maidens, and sometimes as half woman and half fish. The Nereids were regarded as favorable to sailors. They were worshiped in several parts of Greece, but more especially in sea-port towns.

Figure of a Nereid.

Nereus (Gr. Νερείς), a marine divinity in classic mythology, was represented as a wise and prophetic old man, and was believed to dwell at the bottom of the sea with his beautiful daughters the Nereids. He was regarded as ruling principally over the Aegean Sea, and was believed occasionally to appear to men in different shapes, predicting what should befall them in the future. The poets feigned that he could assume various forms like Proteus, and would only reveal the future when, having exhausted his powers of transformation, he was reduced to his original shape. Nereus yielded his place to Poseidon, and gave him his daughter Amphitrite. His attribute was the trident. He frequently appears in ancient works of art.

Nereus (Νερεύς), a Christian at Rome to whom, with his sister, the apostle Paul sent his salutation (Rom. xvi, 15). A.D. 55. "The name may be of Hebrew origin, יֵז or זע; or it may be, as Grotius suggests, from the Sabine Nervio, a word, according to Julius Gallius, signifying 'virtus et fortitudo' (N. X. xiii, 22), and with which Nero and Nerienes, the wife of Mars, stand allied." "Origin conjectures that he belonged to the household of Philologus and Julia. Es-tius suggests that he may be identified with a Nereus who is said to have been baptized at Rome by St. Peter. A legendary account of his life is given in Bolland, Acta Sanctorum, May 12; from which, in the opinion of Tillemont (H. E. ii, 180), may be gathered the fact that he was beheaded at Terracina, probably in the reign of Nerva. His ashes are said to be deposited in the ancient church of SS. Nereo ed Achilleo at Rome. There is a reference to his legendary history in bishop Jeremy Taylor's sermon, The Marriage-ring, pt. 1.

Nereus, St., a martyr of the early Christian Church, was a eunuch and servant of St. Domitilla (q. v.). Refusing to abjure his faith, he was, with his mistress, banished by Domitian into a little island on the coast of Terracina, called Pontia. Afterwards, amid the persecutions under Trajan, Nereus suffered martyrdom with his mistress. The ancient Church kept a festival in memory of these faithful ones, and St. Gregory the Great thus alludes to the great solemnity: "These saints, before whose tomb we are assembled, despised the world and trampled upon their feet, when peace, plenty, riches, and health gave it charms." St. Nereus is commemorated in the Church of Rome May 12. See Butler, Lives of the Saints, ii, 911, 912.

Ner'gal (Heb. נֶרֶגָל', נֶרֶגָל, in pause נֶרֶגָל, Sept. Νηργάλ, v. Nηργάλ, Vulg. Nerigel), one of the chief Assyrian and Babylonian deities (2 Kings xvii, 30), seems to have corresponded closely to the classical Mars. He was of Babylonian origin, and various derivations of the name have been suggested. First traces it to נֶשֶל, to break in pieces, 11 added; Gesenius identifies it with the Sabian Nerig, the I being appended as the mark of a diminutive, which was a sign of endearment; Von Bohlen compares the Sanscrit Nrigal, with तित, to make a strong fire, or, to bring on a fierce war; it is, however, not a word corresponding to Merodach; and Rawlinson says the name, "is evidently compounded of the two Hamitic roots—air, a man, and gula, great; so that he is the great man, or the great hero" (Ancient Monarchies, i, 171; ii, 256).

"His monumental titles are—'the storm-ruler,' 'the king of heaven, the champion of the gods,' 'the main principle' (or 'the strong begetter'), 'the tutelar god of Babylon,' and 'the god of the chase.' Of this last he is the god pre-eminently; another deity, Nin, disputing with him the presidio over war and battles. It is conjectured that he may represent the deified Nimrod—'the mighty hunter before the Lord'—from whom the kings both of Babylon and Nineveh were likely to claim descent. See Nimrod. The city peculiarly dedicated to his worship is found in the inscriptions to be Cutha or Tiggaba, which is in Arabian tradition the special city of Nimrod. The only express mention of Nergal contained in sacred Scripture is in the above mentioned verse, in which the city of Cutha, placed one of the cities of Samaria by a king of Assyria (Eas-haddon?), are said to have 'made Nergal their god' when transplanted to their new country—a fact in close accordance with the frequent notices in the inscriptions, which mark him as the tutelar god of that city. Nergal's name occurs as the initial element in Nergal-shar-erit (Gen. xxxix, 3 and 13); and is also found, under a contracted form, in the name of a comparatively late king—the Abennerigus of Josephus (Ant. xx, 2, 1). Nergal appears to have been worshipped under the symbol of the Man-Lion.' The Semitic name for the god of Cutha was Ar'ia, a word which signifies 'lion' both in Hebrew and Syriac. Ner, the first element of the god's name, is capable of the same signification. Perhaps the habits of the lion as a hunter of beasts were known, and he was thus regarded as the most fitting symbol of the god who presided over the chase. It is in connection with their hunting excursions that the Assyrian kings make most frequent mention of this deity. As early as B.C. 1150, Tiglath-pileser I speaks of him as furnishing the arrows with which he slaughtered the wild animals. Aszur-dan-pal (Sardanapalus), the son and successor of Eas-haddon, never fails to invoke his aid, and ascribes all his hunting achievements to his influence. The Palmyrenes of old, in whose land Nergal and Sennacherib built him a temple in the city of Tarbisia, near Nineveh; but in general he was not much worshipped either by the earlier or the later kings (see the Essay of Sir H. Rawlinson in Rawlinson's Herodotus, i, 631-634). The rabbinical commentaries believe that this idol was in the form of a cock, since the somewhat similar word, ינניוגא, tar'negol, in the Talmud, means a cock (Seder Din, Tzefir, ii, 8, p. 317 sq.; Schwartz, Palest. p. 80). In curious coincidence with this tradition Layard gives two figures of a cock on Babylonian remains, showing its ancient worship by that people (Nineveh and Babylon, p. 158). Nor- berg, Gesenius, and other inquirers into the astralurgy of the Assyrians and Chaldeans, conclude that Nergal is the same as the Sabian name for the planet Mars. Both among the Sabians and Arabs it means 'sick,' 'poisoned'; and it was by no means peculiar to the mythology of the West to make it the symbol of bloodshed and war. The Sabian Mars was typified as a man holding in one hand a drawn sword, and in the other a human head just cut off; his garments were also red, no doubt from the hue which the body of the planet presents to the
Cylinder in the British Museum.

eye. Among the southern Arabs his temple was painted red; and they offered to him garments stained with blood, and a warrior (probably a prisoner), who was cast into a pool. It is related of the caliph Hakin that in the last night of his life, as he saw the planet Mars rise, he exclaimed, "What dost thou ascend, thou accursed shedder of blood? then is my hour come!" and at that moment the assassins sprang upon him from their hiding-place (Mohammed Abu-Taleb, ap. Norberg, Onomast, p. 105; Bar-Hebræus, p. 220). See Gesenius, Theaur., p. 913, and Comment. ad Jesus, ii, 344; Nork. Bibl. Mythol., i, 60; Labri. ann. 769 and 770. See also Dr. Lardner, Introd. to the Life of S. Cuth., p. 284; Wichmanhausen, Diss. de Nergal, Cath. Idol. (Viteb. 1707).

Nergal-sharezer (Hebrew Nergal-Sharretzer, r), Sept. Νηργαλδασάα, Vat. Νεργαλδασά, v. r. Μαργανάα, Μαργαναά, Νηργαλδασά, Ναγγαγά v. r. Νηργιλ, all in Jer. xxxix, 3; also Νηργιλ και Σαρσαρά, ver. 18; Vulg. Nergel et Ste-rezer), the name apparently of two persons among the "princes of the king of Babylon," who accompanied Nebuchadnezzar on his last expedition against Jerusalem, B.C. 588. The first part of the name is the god Nergal (q.v.), and Sharezer is supposed from the Zend tv mean prince of fire (Sasan.).

1. The first of these is mentioned only in Jer. xxxix, 8, without any other designation or notice.

2. The second has the honorable action of Rab-mag (2Sam. 20), and it is to him alone that any particular interest attaches (Jer. xxxix, 8). In sacred Scripture he appears among the persons who, by command of Nebuchadnezzar, released Jeremiah from prison (Jer. xxxix, 13); profane history gives us reason to believe that he was a personage of great importance, who not long afterwards mounted the Babylonian throne. This identification depends in part upon the exact resemblance of name which is found on Babylonian bricks in the form of Nergal-shar-uzur; but mainly it rests upon the title Rubu-enga, or Rab-mag, which this king bears in his inscriptions, and on the improbability of there having been, towards the close of the Babylonian period — when the monumental monarch must have lived — two persons of exactly the same name holding this office. See Rab-mag. Assuming on these grounds the identity of the scriptural 'Nergal-Sharezer, Rab-mag,' with the monumental 'Nergal-shar-uzur, Rab-enga,' we may learn something of the prince in question from profane authors. There cannot be a doubt that he was the monarch called Nergilissar or Nergilissor by Roscoe (Josephus, c. Ap. i, 89), who murdered Evil-Merodach, the son of Nebuchadnezzar, and succeeded him upon the throne. This prince was married to a daughter of Nebuchadnezzar, and was thus the brother-in-law of his predecessor, whom he put to death. His reign lasted between three and four years. He appears to have died a natural death, and certainly left his crown to a young son, Laboroosarchod, who was murdered after a reign of nine months. In the Canon of Ptolemy he appears, under the designation of Nergilassarosar,
NERI 952

NERIAS

1551, was ordained priest in the church of the Lateran. The year previous to his admission into the priesthood he had exerted himself for the conversion of several associates of his, and he succeeded with Salvati, a brother of the cardinal of that name, and Tarugio, who afterwards became a cardinal, and Baronius, so celebrated in ecclesiastical literature. Merit, in 1555, to 1560, they soon had their zeal been enlisted in the interests of the Church than he banded them together in a confederacy for the care of poor pilgrims visiting Rome, and other houseless persons, as well as of the sick generally, which still subsists, and which has numbered among its associates many distinguished members of the Roman Catholic Church. This confederacy is noteworthy, moreover, as having been the germ of the far more celebrated Congregation of the Oratory (q. v.), which was founded by St. Philip in concert with these friends. Besides the general objects above indicated, and the spiritual duties designed for the personal sanctification of the members, the main object of this association was the moral instruction and religious training of the young and uneducated, who were assembled in chapels or oratories, for prayer and for religious and moral instruction. The personal character of Neri, the unselfish devotedness of his life, his unaffected piety, his genuine kindness of heart, his kindliness and easy manners, his tact and sagacity, and, perhaps, as much as any of the rest, a certain quaint humor, and a tinge of what may almost be called drollery which pervaded many of his sayings and doings, contributed to popularize his institute. Besides being a man of education and general information, he could readily enter into the spirit of the respective pursuits of all whom he sought out for his assistance, and thus so greatly endeared himself to every one who was brought in contact with him. Many and peculiar were the means he used to further his purpose. Thus, e.g., indirectly Neri became the founder of the Oratorios (q. v.). As a man of education and of a poetical turn of mind, he drew young people to himself by his amusements, sacred musical entertainments (thence called by the name of oratorio) were held in the oratory, at first consisting solely of hymns, but afterwards partaking of the nature of sacred operas or dramas, some of which were written by distinguished writers, such as Zeno and Metastasio, except that they did not admit the scenic or dramatic accompaniments of these more secular compositions; the parts were sung, like those of an opera, with this difference, that the singers were stationed in a gallery of the chapel. The chapel being called in Italian "Oratorio," i.e., a place of prayer, became afterwards the scene of performances of sacred or secular congre- gation or order constituted by Neri hence took the name of Fathers of the Oratory. Besides the musical entertainments, religious and literary lectures also formed part of his plan, and it was in the lectures originally prepared for the Oratory that, at the instance of Neri, the gigantic Church History of Baronius had its origin. But though Neri's great characteristics were simply charity and a cheerful piety, the people, who greatly revered him, believed him to be a more than commonly endowed saint, and he was by them said to have the power of working miracles and curing possession. He had no doubt won the large number in former possession of evil spirits, for, as he himself said, the idea of being possessed of evil spirits was not to be too readily received, and its best remedy is cheerfulness, as it often arises only from melancholy. These precepts he carried into practice to such an extent that, having been accused of allowing and even encouraging worldly pleasures, such as dancing, etc., among his disciples, he was suspended from his functions as confessor and preacher; he was even complained of to the pope as trying to found a new sect. The accusation, however, did not prevail, and he was soon after restored. In 1570 the monks of the Oratory were expressly forbidden by the Council of Trent to extend, either by means of charitable or educational purposes, as above spoken of, were made the ground of new accusations, yet he became the more confirmed in his peculiar views. Some have ac- cused him of triviality, but it is more likely that he meant his practices as a check to the sanctimonious, pharisaical gravity and decorousness which prevailed in Rome after 1600. Though pressed on several occasions to accept the office of cardinal, he steadily declined. Theiner relates that when Henry IV. of France, joined the Oratory in 1589, Neri, hearing of his conversion, was about to revoke the excommunication pronounced against the prince; a total separation of the French from the Rom- man Church seemed unavoidable, but Baronius having occasion to confess the pope, Neri forbade his granting him the absolution unless he promised to grant it in pursuance of the wish. This plan succeeded, and Henry IV. rewarded the order by munificent donations. The Brotherhood of the Oratory was regularly organized by the pope in 1575; according to its regulation the mem- bers are all equal, and have to perform in turn all the menial duties necessary in the community. (They show yet an inscription said to have been traced by the hand of the great Church historian: "Casus. Baroniius, cocus perpetuum.") All the affairs of the communities were to be decided by the majority of votes. Neri, more prudent than other founders of ecclesiastic organizations, did not suffer the members of the Oratory to bind themselves by perpetual vows as to the monks, preferring that they should in the first place be disposed about, and for this end each member had to pay a monthly fee for the expense of the house, as the lodg- ings alone were free. The institution was approved by Gregory XIII in 1575, and it soon spread over Italy, France, and other countries. The congregation "De l'Oratoire" has produced many distinguished men, Baro- nius and Massillon among others. Study, preaching, and the education of youth are the chief occupations of its members. Being bound by no vows, any member of the Oratory can at any time withdraw with all his property. The present Oratory, Sia Maria at Valli- nesi, Rome, was founded by Neri after 1595. It has a good library, and the oratorios continue to be performed, especially on All-saints' Day (Nov. 3d) to Palm Sunday. Neri resigned the office of superior of the community in favor of Baronius, and died a few years afterwards, May 25, 1595. He was canonized in 1662 by Gregory XV. Some of his letters, and his Ricordi, or advice to youth, have been published, as well as two sonnets out of many which he composed. The regulations he left for the guidance of his order were published in 1612. Neri was an amiable, virtuous, and religious man, and his example had a great in- fluence on the character of many young priests. He was the author of "De Pulmo Neri," (Rome, 1600); Vita Fil. Neri, Munich, 1610; Vida e Hechos de S. Filipe Neri (1613); Bacci, Vida di S. Filippo Neri (1622); Vasquez, S. Filipe Neri Epistole de sua Vida (1651); Manni, Ragionamenti sulla vita di F. Neri (1786); Vie de St. Philippe de Neri (1847); Ruber, Spirit and Genius of St. Philip Neri (1850); Ranke, Hist. of the Papacy, i, 323-367 sq.; Hase, Ch. Hist. p. 462. See also ORATORY, CONGREG- GATION OF THE.

Ner'iah (Heb. Nesia'ehicles, נסייא'ה, Jehoreah is my lamp, or lamp of Jehoreah, also [Jer. xxxvi, 14, 52; xiii, 6] in the prolonged form Ner'iyahu', נריה'י), Sept. Nypia'c [v. r. Nyni in Jer. xliii, 8]; Vulg. Nerias, but Neri in Jer. xxii, 12), the son of Masseiah, and father of Serahiah and Baruch (Jer. xxxii, 12, 16; xxxvi, 4, 14, 82; xiii, 8; xiv, 1). He appears to be the same with Neriah (q. v.) in our Lord's maternal ancestry (Luke iii, 27, 28; see Strong's Harmony and Expos. of the Gospels, p. 17). B.C. cir. 820.

Ner'ias (Nypia'ches), the Grecized form (Bar. i, 1) of the name of Neriah (q. v.), the father of Serahiah and Baruch (Jer. xiv, 1; lxi, 9). Another, the residence of his? Neria is mentioned by Josephus (Ant. x, 9, 6), and also by the Jewish record Seder Olam, as a high-priest, son of Uriah and father of Odeas or
HERODIAS; but the reference is probably to AARONIAI, 15
(2 Chron. xxxii, 10). See HIGH-PRIEST.
Nero, a Roman emperor, celebrated in the history of the world as a tyrant and a debauchee, figures in ecclesiastical history as the father of the church's persecution spirit which he manifested towards the followers of Jesus in the Eternal City. His full name was \textit{Nero Claudius Caesar Drusus Germanicus (originally Lucius Domitius Ahenobarbus).} He was the son of Domitius Ahenobarbus and of Agrippina, daughter of Germanicus, and was born on April 27 37 A.D. during the marriage of his mother, in third nuptials, with her uncle, the emperor Claudius. Nero was adopted by that prince, and Nero's name changed as above given. His education was carefully looked after. He was placed under the tuition of the philosopher Seneca (q. v.), and appeared to have improved his opportunities. He is said to have persevered in his studies, and to have made great progress especially in the Greek language, of which he exhibited a specimen in his sixteenth year by pleading in that tongue the rights or privileges of the Rhodians and of the inhabitants of Illyria; but he possessed little oratorical skill (Suetonius, Nero, c. 7; Tacitus, \textit{Annals}, xii, 58). Nero was so much trusted by Claudius that he finally married him to his daughter Octavia. When he was about seventeen years of age Nero's abandoned mother poisoned her husband, Claudius, and by means of her criminal favors succeeded in raising her son to the throne (A.D. 64), over whom she exerted such influence as to make him worship himself shortly after disposed of the rightful heir, Britannicus, by poison, and thus became sole and undisputed ruler. For the first few years his public conduct, under the control of Burrhus and Seneca, was unexceptionable; in private, however, he disgraced himself with the most odious vices, and his mother endeavored to retain her influence by shamefully complying with his inclinations. But after a time, even with all her efforts, she perceived her hold to slacken, and noticed how he disregarded her advice and refused her requests. Gradually the two became estranged from each other. Nero was accused of criminal love for Poppaea, a woman of low birth, and of improper relations with Poppaea, the wife of Otho, who succeeded Nero on the throne. This maddened his mother, and she frequently abused him with the most contemptuous language; reminded him that he owed his elevation to her, and threatened that she would tell the world that in the interval in which Claudius had met his death. Nero was thus kept in constant dread of revolt and assassination, and finally, in A.D. 69, he caused this detestable woman to be murdered. Now, fearing no rival in power, he gave full scope to the darkest traits of his character. The low apoplexy into which the Roman senate had sunk at this time may be estimated from the fact that it actually issued an address congratulating the hateful matricide on the death of Agrippina. Nero himself, on the other hand, confessed that he was ever haunted by the ghost of his murdered mother. The affairs of the empire were as bad as the man. In July of A.D. 68 a rebellion broke out in Britain under queen Boadicea, which was, however, suppressed by Suetonius Paulinus. The following year saw an unsuccessful war against the Parthians in Armenia. At home matters were not much better. The emperor was lapped in verse; the senate and priesthood, alike venal, were satirized by audacious malcontents; his most valued friend Burrhus died; and Seneca, disgusted with the licentiousness of the court, had quitted the capital. And the worst was yet to come. In June, A.D. 64, a terrible conflagration broke out in Rome, and for six days and seven nights burnt with conflagration; and after it was supposed extinguished it broke forth again and continued for two days longer. A vast territory experienced the results of this conflagration. Out of the fourteen districts into which the city was divided, three were totally destroyed, and in seven of the others it left only a few half-ruined houses. Not only the temples and public buildings, as well as private houses, but also monuments of all kinds, masterpieces of art, and libraries were destroyed, and a great number of individuals perished through the early part of the conflagration, and only returned to Rome when the fire approached his palace, the people generally accused him of having purposely set fire to the city, and preventing its being put out, in order to build up a finer one on its ruins. In compliance with his wishes the work of the great buildings and other edifices such as built again were aided by the state; but this did not allay the general suspicion, as he was said to have ascended the tower of Macenas during the fire, and there recited verses on the downfall of Troy. All the processions and sacrifices which he commanded for the purpose of appeasing the gods, as well as the vast sums he squandered among the people, did not allay the suspicion. Indeed Dion and Suetonius expressly accuse him, but these writers, it is well known, were always inclined to favorably receive any scandal. Tacitus (\textit{Ann.} xx, 36) thinks the matter doubtful, or at least all his efforts to determine Nero's part in the case failed to convince of guilt. So doubtful was Nero's character that the belief of his guilt was general at the time, and ever since the world has been inclined to judge him the perpetrator of the crime. Church historians thus treat him. Even the liberal-minded Réan, who in his \textit{L'Antichité} (Paris, 1873) has furnished the latest, fullest, and most impartial account of the events connected with Nero and his time, believes this emperor to have caused the conflagration, in order to rebuild the city in greater splendor and more artistic form, and thus give renown to his reign. Says Réan: "Rome, above all things, preoccupied his \{i.e. Nero's\} thoughts. His project was to rebuild it from top to bottom, and to name it aresch—Neropolis. For a century past it had been one of the wonders of the world. In size it rivalled the ancient capitals of Asia, and its edifices were, fine, strong, and solid. But its streets appeared mean to the taste of the day: for that taste tended more and more to vulgar and decorative construction, it aspired to broad effects such as rejoice the heart of gaping sightseers, and it condescended to a thousand tricks unknown to the ancient Greeks. At the head of the whole movement was Nero. The new Rome which he imagined was something like the Paris of our own day—one of the creations of which those who build our modern cities wish to erect the greatest of all the indestructible cities. The great point aimed at is to catch the admiration of visitors from the country and of foreigners", (p. 136-148). To remove all suspicion from himself, Nero spread the report that the Romans should regard the Christians as the authors of the fire—that mysterious sect who, like the Jews, were known for their sacrilegious practices and the cause of all otherwise inexplicable calamities; and, as if Nero himself believed them guilty of this crime, he now inaugurated a series of persecutions which have made his name a byword for cruelty and inhumanity. See 

NERO's PERSECUTION. But while busy persecuting the Christians, Nero continued to regard his scheme for the embellishment of Rome. He rebuilt in great magnificence the burned districts, and reared for himself on the Palantine Hill a splendid palace, called, from the immense profusion of its golden ornaments, the \textit{Aurea Domus}, or Golden House; and in order to provide for this expenditure, and for the gratification of the Roman populace by spectacles and distributions of corn, Italy and the provinces were unspARINGLY plundered. In A.D. 65 a powerful conspiracy was formed for the purpose of placing Piso upon the throne, but it was discovered by Nero, and the principal conspirators were put to death. In the same year, when Nero was not otherwise occupied, were Lucan and Seneca; but the guilt of the latter is doubtful. In the same year Poppaea died, in consequence of a kick which she received from her husband while she was in an advanced state of pregnancy. On the death of Poppaea Nero wished to marry Antonia,
daughter of the emperor Claudius, and his sister by adoption, but she refused, and was in consequence put to death. He however married Statilla Messalina, having first caused her husband Vespasian to be killed. Nero also treacherously murdered many persons highly distinguished for integrity and virtue. His vanity led him to seek distinction as a poet, a philosopher, an actor, a musician, and a charioteer, and he received sophronic applause, not only in Italy, but in Greece, to which, upon invitation of the Greek cities, he made a visit in 67. But in 68 the Gallic and Spanish legions, and after them the Pretorian Guards, rose against him to make Galba emperor, and Nero was obliged to flee from the city and conceal himself in the house of a freedman, Phaon, about four miles distant. The senate, which had hitherto been most subservient, declared him an enemy of his country, and the tyrant ended his life by suicide, June 11, 68, just as the Roman soldiers were approaching his hiding-place (Dion. Cass. Ixxi. 33; Tacit. Ann. xiii. 35; Sueton. Nero). Nero was a lover of arts and letters. The Apollo Belvedere is supposed by Thiiersch (Epochen der bildenden Kunst unter den Grie- chen, p. 812) and some other writers to have been made for this emperor. He also possessed much taste as a poet and dramatic performer. But he was, notwithstanding these accomplishments, a licentious voluptuary, and scrupled not to commit any crime that would tend to gratify his lust or strengthen his power. Yet, as Renan has well observed, "one cannot absolutely say that the wretch was without a heart, nor deficient in a certain sentiment of the good and the beautiful. So far from being incapable of friendship, he often showed himself a good comrade; and it was precisely this that rendered him cruel. He was determined to be loved and admired for his own sake; and was irritated against those who did not manifest towards him these feelings." (p. 126-132.) The words of Suetonius, "Elatus infatuque tantas velut successibus, negavit quernquam Principum scisse quid sibi liceret" (Nero, § 87), we think, sum up in most admirable conciseness the character and work of this strange ruler. It was during Nero's reign that the war commenced between the Jews and Romans which terminated subsequently in the destruction of Jerusalem by Titus, and the overthrow of the Jewish polity. According to the persons given by Renan (L' Antiquite, p. 178), "Nero had a bad face: low, sunken eyes, blue curls, chestnut hair dressed in rows of curls, a terrible lip, and the air (wicked and stupid at the same time) as of a great silly doll, supremely self-satisfied, puffed up with vanity." Although repeatedly alluded to, he is not expressly named in the text of the New Testament (see Acts xxv, 11, etc.; Phil. I. 1, 12; iv. 22); but in the subscription (probably spurious) to the Second Epistle to Timothy he is called Cæsar Nero (Kaiarap Nipow). Many authors refer to Nero the prophecy by John (Rev. xiii, 11-18) of the beast with two horns, and interpret the 18th verse as referring to the Hebrew name of Nero, נָבְרָע נְבֵרָע, which amounts numerically to 666, the number there given; since, written more nearly in Roman style, נָבְרָע נְבֵרָע, it amounts to 616, which Ireneus testifies was the number found in many manuscripts in his day (see Stuart, Apoc. ii. 457 sq.; Benary, Zeitschrift fur Speculative Theolo- gie, 1886, vol. i, pt. ii; Bibliotheca Sacra, 1845, p. 382 sq.; 1844, p. 84 sq.). See REVELATION, BOOK OF. Nero was the emperor before whom Paul was brought on his first imprisonment at Rome, A.D. 56-58; and in the prescript of the Epistle to the Ephesians B.C. A.D. 64 the apostles Peter and Paul are supposed to have suffered martyrdom. All the authorities furnishing facts in Nero's life are collected by Tillemont (Hist. des Empereurs, vol. i). See the monographs cited by Vollmer, Index Programmatum, p. 96, 97; and compare also Renan's L'Antiquite, and the original authors quoted there; Heldt, Wunder der Romer, Hist. des Wunder- der des Empire; Didner, Fasciculi sur les Regnes de Claude et de Neron; and the Church historians quoted in the article on NERONIAN PERSECUTIONS. (J. H. W.)

Neroli, Tobilja, ka-Kohen, was born at Metz in 1692. After the death of his father, who had held the office of rabbi, in 1629, Neroli went to Worms, thence to Padua, and finally to Constantinople, where he was introduced as physician to the sultan Achmet III. At the beginning of the 18th century Neroli went to Venice, thence to Palestine, and died at Jerusalem in 1729. He is the author of an encyclopedic work entitled מַעְרָק הַשֵּׂגֵרָה, divided into three parts: the first part, which is called יִשְׂגֵּרָה הַנִּירָן, treats of metaphysics, physical sciences, astronomy, and natural philosophy; the second part, which is called יִשְׂגֵּרָה הַכְּנֹסִית, treats of geography, physiology, pathology, therapeutics, anatomy, and surgery; the third part, which is called יִשְׂגֵּרָה הַכְּנֹסִית, treats of the different diseases. This valuable work was first published at Venice in 1707, and often since. See Firrito, Bibl. Jud. iii, 1699; Carmoly, Histoire des Medecins Juifs, i, 247; 251; L. B. d. Orients (1830), p. 573; Leiniger, Acta Eruditorum (1721), p. 583; Unschuldige Nachrichten zum Jahre (1722), p. 531. (B. P.)

Neroni, Bartolomeo, called Maestro Riccio, a distin- guished Italian painter, who devoted himself especially to sacred art, flourished about 1578. He studied under Giovanni Antonio Razzi, whom he assisted in his works, and whose daughter he married. Lanzi says that Neroni, after the death of the four great pillars of the Siene school, sustained its reputation and probably educated one of its restorers. His pictures unite the style of Razzi with a certain resemblance to the manner of Vasari in the distribution of his tints. He had excellent abilities in perspective, especially in representing scenery; Andreani has engraved a study of the artist's works. He was also greatly skilled in architecture, and had a pension from the magistrates of Lucca for his assistance in the public works. In Siena, at the Observants, is a Crucifixion by him, with a great num- ber of figures; and in the church of the Delereta a Descend from the Cross entirely in the style of Razzi.
NERONIAN PERSECUTIONS

See Spooner, Biographical History of the Fine Arts, ii, 614.

Neronian Persecutions were really the first severe trials which the Christians of Rome had to endure. The Roman Jews with 64,000 were burnt alive by Nero (q. v.) himself. Although we possess no positive information as to the manner in which the first Christian community was established at Rome, it appears certain that it was not originally instituted by the apostles. It is more probable that the frequent intercourse of the Romans with Jews, partly on their own account, partly concerning the person and coming of Christ, led at an early time to the introduction of the new doctrines, the believers still remaining connected with the synagogues. They became gradually more numerous; and the frequent controversies which here, as in other cities, arose among the Jews, partly on their own tenets, partly concerning the person and coming of Christ, led at last to open disturbances, and gave occasion to the emperor Claudius to publish in 41 a strict edict banishing all the Jews, including those who acknowledged Christ. The edict, however, did not receive a very severe execution, only the leaders, such as Aquila, whom we find mentioned in the N.T., being banished. As to the others, there was probably some alleviation made in the decree; but while allowed to remain at Rome, they were not permitted to assemble in the synagogues until a new edict, promulgated about the end of the same year, again restored them this privilege also, and guaranteed the Jewish religious liberty throughout the empire. This testimony of the inscriptions of the synagogues in Rome to Christians to organize places of worship for themselves, and to form an independent community. Their number now increased so rapidly that St. Paul, who had been informed of their position by Aquila at Corinth, expressed in his Epistle to the Romans the desire to visit them, which he fulfilled three years later, when he was a prisoner from Caesarea to Rome, remaining there a while, and laboring for the new religion with such success that Tacitus speaks of the Christians of Rome as "an immense multitude." The rapid increase of the Christians made them of course unpopular at Rome. Suetonius, in his Nero (chap. xvi), speaks of them as a "dangerous sect." They were mistrusted because they abstained from participation in the sacrifices and other heathen ceremonies, and were hated because they were believed secretly at work against the peace of Roman citizens. They were accused of misanthropy; and were suspected of treason. Even open plots to persecute them manifested itself until Nero ordered ceremonies after the great fire, and the Christians failed to participate. They were now accused as the authors of the conflagration; first, probably, by friends of the court, in order to turn public animosity from Nero, who was by then notorious for his treatment of the people of Rome. See Nero. The emperor himself took up the public rumor, and acted upon it as a verity. "He indicted," says Tacitus, "the most exquisite tortures on those men, who, under the vulgar appellation of Christians, were already branded with deserved infamy; and a vast multitude, or as Tacitus himself says, a thousand, were put to death in the most shocking manner. Indeed, it appears from the detailed accounts of Tacitus that Nero's proceedings were quite different from mere capital executions according to the Roman law; for the Christian martyrs were not simply put to death, but their execution was made to gratify the bloodthirstiness of the tyrant, and to serve as an amusement to the people. Says Sénècan:"

"Though persuaded that the confabulation was the crime of Nero, many serious Romans saw in this coup a means of putting to death in a short time, without the inconvenience of an inquiry, and without the possibility of any appeal to the merits of the prisoners, a number of Châuci who at Rome, and that not to the old but to the new, to the partisans of a new and mischievous superstition. Yet these punishments were something absolutely frightful. Nero would never consent to any such, even under the smallest pretext. Almost All the Christians who were arrested were of the humble class; and the usual punishment of such unhastened, when treason or sacrilege was put to their charge, they were burned alive in the amphitheatre, with an addition of cruel scourgings. One of the most hideous characteristics of Roman punishments was that the victims were thrown into a fæta, and public executions into a public entertainment. Yet the Flavian emperor, Vespasian, who was not averse to having used frightful forms of torture; and on more than one occasion had tasted a sombre kind of pleasure in inflicting the shameful punishments to which the culprit had been consigned; these horrors had been made a public diversion, a subject for peals of laughter and applause. The amphitheatres of Rome made it a regular custom for the tribunes of justice to furnish materials for the sport. The roads that converged to Rome were crowded with the criminals brought to be tormented, to the no small effect of the circus and amusement for the populace. . . . But this time, to the barbarity of the executioner was added a touch of the most revolting horror. The victims were set at liberty, and to which (no doubt) an expectatory character was attached. . . ." (Nero and his Reign, 38-68.)

The ludus matutinus, usually devoted to combat of animals, saw to-day an unheard-of procession. The condemned persons, sewn up in skins of wild beasts, were thrust out into the arena to be torn by dogs; others were crucified; others again were clothed in tunics dipped in them, as part of the ceremonies. It had become an enactment, and reserved to illuminate the nocturnal festivities. When dusk came on, these living torches were set on fire. Nero sat in and the traffic of the acrobatic world thronged beyond the Tiber, on the site of the modern Borgo and in the precincts of the Church of St. Peter" (p. 165-166).

But physical suffering was not enough to satisfy the infernal destinies of the heathen world. The poor and patient servants of the Crucified One. Moral tortures, mental anguish, brutal and Satanic invasions of all that a Christian holds most sacred and most inviolable, must be undergone by them ere the baptism of blood was complete, ere the infant Church could be (like her Master) "made perfect through sufferings." The pen almost fails me in my efforts to depict the brain almost refuses to conceive, the atrocities which followed. The heart and conscience of the reader can do no more, even now at the distance of 1800 years, than cry to heaven, with the souls of the slain under the Apocalyptic altar, "How long, O Lord, holy and true, dost thou not judge and avenge blood on them that dwell on the earth?" (Rev. vi, 10).

"Women, and even virgins, were mixed up with these horrible sports: and nameless indignities were inflicted on them, as part of the ceremonies. It had become an established usage under Nero to force condemned persons to play in the amphitheatre, in the same. Following an oracle, he decreed that the games should be held such attempts been suggested to her, to supply athenes with the most ingenious means of attention. Thus, the unhappy wretch was introduced into the arena richly dressed as a god or a hero destined to death. He then represented in the stage before the multitude, the ruined myth, consecrated by the works of poets and sculptors. Sometimes it was Hercules, frantic and burning on Mount Etna, and sometimes the same from his fiery chariot in a frightful pitch. Sometimes it was Orpheus torn in pieces by a bear, Deucalion thrown from heaven and devoured by beasts, Pasiphae undergoing the attacks of the bull, or Atys put to death. . . . Nero, no doubt, was present at these spectacles. As he was nearsighted, he used to wear a concave emerald in his eye to serve as an eye-glass for watching the combats of gladiators. He loved to make a parade of his knowledge of the works of art, and liked to be considered as a connoisseur like him must have been the plastic forms and the colors presented by a human frame pulsating under the teeth of the beasts which were about to rend him. He often asked the gestures veiling her nudity, and then tossed by a bull and torn in pieces on the pegs of the arena! Yes, he was there, in the front rank, on the pediment, supported by vestals and curule magistrates" (p. 167-168).

So great were the sufferings of the tormented that even the pagan historian is forced to confess that "pity arose for the guilty, though they deserved the severest punishment, since they were put to death, not for the public good, but for the sport of the tyrants." (Tacitus, annales, xx, 44.) But even the cruelty of Nero is not generally adjudged sufficient ground for all these executions, and it is believed by some that the powerful Poppea Sabina, proved by Josephus (Ant. xx, 8) to have been a convert to Judaism, mainly instigated the severity of this persecution. It is thought by some that the apostle
NERONIAN PERSECUTIONS 956

Paul lost his life on this occasion. Wieseler (Chronol. Synopses der vier Evangelien [1843], p. 581) places the execution of Paul in the beginning of the year 64, and the crucifixion of Peter in the Neronian persecution, though these events came later. Tradition places the death of both apostles in the Neronian persecution, and some witnesses, as Jerome and Gelasius, put both martyrs on the same day; but others, as Arator, Cedrenus, Augustine, separate them by an interval of one year or less. That Paul suffered first, before the outbreak of the Jewish commotion, seems to be indicated by the easier mode and the locality of his death; for in the persecution itself his Roman citizenship would hardly have been respected; and the scene of that persecution was not the Ostian Way, but the Vatican across the Tiber, where Nero's gardens and the circus lay (comp. Tacitus, Ann. xiv. 14; and Bunsen, Beschreibung der Stadt Rom, ii, p. 13 sq.). At the same time, this persecution, notwithstanding the statement of Orosius, does not seem to have extended through all the provinces, but rather to have been restricted to Rome and the surrounding country.

Shortly after the death of Nero, July 11, 68, the bishop succeeded in gaining adherents among the people that he was not dead. They expected him to return from the East as a great conqueror, and this induced several adventurers to assume his name and create imitations. As for the Christians, the remembrance of that terrible persecution, their manner of interpreting the historic traditions, and the emulation of the Sibylline Oracles, led them for several centuries to believe that Nero was still living, and even that he would appear at the latter day as the Antichrist or with him. Says Schaff: "The report arose first among the heathen that Nero was not really dead, and would come forth again from his coffin soon;" according to Tacitus (Hist. ii, 8), "Sub idem tempus Achaja atque Asia falsa exterterte, velut Nero adventaret, vario super exitu ejus rumore, eoque pluribus vivere eum fingenter cognitibus.

Among the Christians this rumor took the form that Nero would return as Antichrist, or (according to Lactantius) as the forerunner of Antichrist. That such an expectation arose, at least afterwards, in the Church, though merely as the private opinion of individuals, is plain from Augustine, De cielate Dei, lib. xx, cap. 19, where he says that by the "mystery of iniquity" (2 Thess. ii, 7) some understood Nero, and then personified the evil principle (Nero) as a tyrannical sovereign in rerum et futurum Antichristus sussicantur. Alii vero nec occum possent, sed substractum potius, ut putaretur occisum; et vivum occultati in vigore ipso atatis, in qua fuit, quum eredater extincitus, doneo suo tempore reveletur et restituetur in regnum. Sed multum multum mihi est opinione quae apud Lactantium in eis que sunt, ante annum 364, monstratur, et sive in anuro tumans, unde Lactantius mentions a similar opinion (De mort. persec. c. 2) with a reference to a passage in the Sibylline Oracles (lib. iv, p. 525, ed. Ser. Galleus), which, however, refers not at all to Antichrist, but probably to the appearance of the pseudo-Nero in the time of Titus (comp. Tacitus, Hist. ii, 2) as to a person like him, as Theophylact has shown (Kritik der N.-Test. Schriften, 1845, p. 410 sq.) against Bleek. Altogether erroneous is the view of Ewald, Litke, and others, who charge this superstition respecting Nero as the future Antichrist upon the author of the Apocalypse: taking the beast, which "was, and is not, and yet is" (xvii, 8, 11), to be Nero. This betrays an extraordinary unworldly view of his holy book (Hist. Apostol. Ch. p. 347). Yet very recently this "low and unworthy view" of the Apocalypse has found general favor in England, and in France also. Not only has the rationalistic Reimann espoused it, but several of the British conservative reviews, in notices of L'Antichrist, commend Mr. Reimann's researches as to the authorship and object of the Apocalypse. The name of the Antichrist is believed by Reimann to be found in chap. xiii, 18, which (number of the beast) amounts to precisely 666, and signifies, if to each Hebrew letter is given its numerical value, ἡ Νίκας καθαρός, or ἡ Ἰουδαία, well known in that form by sight to all the provincials on their coin and standards and inscriptions (comp. Edinburgh Revists, Oct. 1874, art. viii; and see under Nero, above). See Paul, Reut-Encyclopädie u. Klass. Allerthums- athesien, p. 154; Korthals, De religione eociuriae praevaeurum sub imperatore Nicom (Kilun, 1869); Walch, De Romanorum in tolerandia diversa religiositatis discipline publica (in the Not. NERES is the name of three great dignitaries who have become much distinguished in the history of the Armenian Church.

1. NERES I, THE GREAT, was a grandson of Gregory the Illuminator, the first bishop of the Armenian Church and was born at Vagharschad about 310. In the year 364 he was elected bishop, and in 366, at the Council of Valleracapet, the clergy of the country appointed him as their catholicos, or patriarch. At that time it was also decided that in future the patriarchs of Armenia should no more be consecrated by the archbishop of Caesarea, but that their own bishops should appoint and consecrate them. In his position as patriarch Neres exhibited his great talents, especially with regard to Church discipline, his care for the poor, and other matters pertaining to his office. Twice Neres went to Constantinople in behalf of the Armenian king Artes, who had revolted against the emperors Valentinian and Valens. He succeeded in appeasing the former, while the latter banned him. Theodosius the Great, Valens' successor, recalled Neres from his banishment, and retained him a short time at Constantinople, in order to be present at the second ecumenical council in the year 381. After the death of Valens, Armenia fell into division, in 384, being poisoned by the young king, Para. His son was Sahak the Great (q. v.). See Lequien, Orient Christianus, i, 1575.

2. NERES KLAJETS, i. e. Klajem (called also Neress IV, catholics of Armenia, and Shmokhri, i. e. "the Pleasant," because of his oratorical talent), was born between 1098 and 1100. He was the son of an Armenian prince, who destined him for the clerical order. In connection with his brother Gregory he was at first educated by the catholics Gregory W Kazacs, i. e. aaravocatologos, and afterwards by Stephenus, the abbot of Surb Haqapet. When, not long after, Neres was ready to enter into holy orders, consecrated him as deacon, and shortly afterwards as priest. By the unanimous desire of the clergy, Neres accepted in 1166 the high dignity of bishop, in which position he remained until his death in 1175. When, in 1168, he suddenly met death, the Emperor Manuel Comnenus (q. v.), he took the opportunity to address a letter to the emperor, in which he showed that there was not real dogmatical difference between the Armenian and Greek churches, and that the Armenian Church, when speaking of one nature of Christ, takes the word in the sense of person; the same also can be said of liturgical and ritual differences in both churches. This letter gave rise to a correspondence between the two churches, which aimed at the union of both. The emperor sent the philosopher The-
orians, who held a dispute with the Armenian abbot, John Uthman, the result of which was a mutual acknowledgment of their agreement in dogmatic as well as liturgical and ritual points. This disputation was first published by John Leucalivius (Basle, 1578), in Greek and Latin, and republished more fully by Angelo May in his Scripturam veteram nunc collectio (Rome, 1582), wherein he received the consent of all the Armenian bishops to those points which the emperor, in a letter dated December, 1172, had made the basis of the union, viz., 1, to communicate all those who accept one nature in Christ—Eutyches, Dioscorus, Severus, Timothy the hunch-backed, and the like; 2, that they should acknowledge two natures in Christ, as well as two wills and two energies (ivipvasos), but one person; 3, they should omit the words qui crucifixus es in the Tersactus: 4, to celebrate the Greek festivals—the annunciation of Mary, March 25; the birth of Jesus, Dec. 25; his circumcision on the 1st and his baptism on the 6th of January; his presentation in the Temple, Feb. 2; and all the festivals of the Lord, the Blessed Virgin, of John the Baptist, the holy apostles, etc.; 5, the myron should be prepared with olive-oil; 6, to use at the communion leavened bread, and wine mixed with water; 7, to allow the laity as well as the clergy to partake of the bread and wine during divine service and communion to remain in the church; 8, to acknowledge the fourth, fifth, sixth, and seventh ocumenical councils; and, 9, that the catholicos should only be appointed by the Greek emperor. Nerses was a fruitful writer and a learned theologian. Of great importance for the history of the Church and doctrines are his epistles, which he wrote as bishop and catholicos with reference to theological disputes and ecclesiastical questions, and which were published at Constanti- nople (1825) and Venice (1868), where also (in 1838) a Latin translation by Capellati was published. Nerses excelled, too, as a poet, and he is said to have inspired Tigran, king of Armenia, to build the famous Nersesian cathedrals and regard him as their Homer. His greatest poem in Jesus the Son, a poetical epitome of the Old and New Testaments in 3825 verses; and the Word of Faith, an epitome of the four Gospels in 1002 verses. His spiritual songs are found in the hymn-books of the Armenian Church. In 1824 an edition of his poems and works was published at Venice. See Monike, in Igen's Zeitschrift für hist. Theologie, i, 87 sqq.; Lequien, Orient Christianus, i, 1899; Galanus, Conciliatio, vol. i, ch. xix.

3. Nerses LAMBORONENIS (originally Sembar), a relative of Nerses IV, and son of the duke of Lamboron, was born, according to the like; 2, they should acknowledge two natures in Christ, as well as two wills and two energies (ivipvasos), but one person; 3, they should omit the words qui crucifixus es in the Tersactus: 4, to celebrate the Greek festivals—the annunciation of Mary, March 25; the birth of Jesus, Dec. 25; his circumcision on the 1st and his baptism on the 6th of January; his presentation in the Temple, Feb. 2; and all the festivals of the Lord, the Blessed Virgin, of John the Baptist, the holy apostles, etc.; 5, the myron should be prepared with olive-oil; 6, to use at the communion leavened bread, and wine mixed with water; 7, to allow the laity as well as the clergy to partake of the bread and wine during divine service and communion to remain in the church; 8, to acknowledge the fourth, fifth, sixth, and seventh ocumenical councils; and, 9, that the catholicos should only be appointed by the Greek emperor. Nerses was a fruitful writer and a learned theologian. Of great importance for the history of the Church and doctrines are his epistles, which he wrote as bishop and catholicos with reference to theological disputes and ecclesiastical questions, and which were published at Constanti- nople (1825) and Venice (1868), where also (in 1838) a Latin translation by Capellati was published. Nerses excelled, too, as a poet, and he is said to have inspired Tigran, king of Armenia, to build the famous Nersesian cathedrals and regard him as their Homer. His greatest poem in Jesus the Son, a poetical epitome of the Old and New Testaments in 3825 verses; and the Word of Faith, an epitome of the four Gospels in 1002 verses. His spiritual songs are found in the hymn-books of the Armenian Church. In 1824 an edition of his poems and works was published at Venice. See Monike, in Igen's Zeitschrift für hist. Theologie, i, 87 sqq.; Lequien, Orient Christianus, i, 1899; Galanus, Conciliatio, vol. i, ch. xix.

NERVA, Marcus Cocceius, the thirteenth Roman emperor, noted for his kindness to the early Christians, was born at Narnia, in Umbria, in A.D. 27, according to Eutropius (viii, 1), or in A.D. 32, according to Dion (lviii, 4). His family originally came from Crete; but several of his ancestors rose to the highest dignities in the Roman state. His grandfather, Cocceius Nerva, was tribune of the knights, who in A.D. 29 was given by the young emperor Tibcrius, and was one of the most celebrated jurists of his age. We learn from Tacitus that he put an end to his own life (Ann. vii, 28). Marcus Cocceius Nerva is first mentioned as a favorite of Nero, who bestowed upon him triunphal honors in A.D. 66, when he was a private citizen. The poetry of Nerva, which is noticed with praise by Pliny and Martial, appears to have recommended him to the favor of Nero. Nerva was employed in offices of trust and honor during the reigns of Vespasian and Titus, but he incurred the suspicion of Domitian, and was banished by him to Tarentum. On the assassination of Domitian, Sept. 18, A.D. 96, Nerva succeeded to the sovereign power, chiefly through the influence of Petronius Secundus, commander of the Praetorian cohorts, and of Part.henius, the chamberlain of the palace. The mild and equable administration of Nerva is acknowledged and praised by all, and he is considered by some as the sanguinary rule of his predecessor. He discouraged all informers, recalled the exiles from banishment, relieved the people from some oppressive taxes, and granted toleration to the Christians. Many instances of his clemency and liberality are recorded by his contemporaries, Tacitus and Suetonius, who declare him to be put to death during his reign, and practiced the greatest economy in order to relieve the wants of
NERVET

the poorer citizens. But his impartial administration of justice met with little favor from the Pretorian cohorts, who had been allowed by Domitian to indulge in excesses of every kind. Enraged at the loss of their benefactor and favorite, they compelled Nerva to deliver into their hands Parthenius and their own commander Petronius, both of whom they put to death. The excesses of his guards convinced Nerva that the government of the Roman empire required greater energy both of body and mind than he possessed; and he accordingly adopted Trajan, who possessed both vigor and ability to direct public affairs, as his successor, and associated him with himself in the government. By this action Nerva evinced clearly that he possessed good sense and a noble character. He died Jan. 27, A.D. 98, after a reign of sixteen months and nine days (Dion, ix, viii, 4). Though he had set at liberty those who had been condemned under the intolerant reign of Domitian because they had apostatized from the pagan faith and adopted the new religion, Nerva yet failed to secure to his Christian subjects any lasting benefits, since their religion was not recognised by any public act as a religio licita, and hence the severe persecutions under Trajan may easily be explained. Christianity having been diffused peacefully under Nerva, had spread considerably; no sooner was Trajan on the throne than the fury of its enemies, which had been held in check, broke forth with increased violence. See the article Trajan. See Scaith, Ch. Hist. i, 165; Hase, Ch. Hist. p. 38; Neander, Ch. Hist. i, 96; Gibbon, Decline and Fall of the Roman Empire (Harper's ed., Index in vol. vi); Burton, Eccles. Hist. p. 279, 294, 298, 299; Hagenbach, Kirchengesch. d. ersten drei Jahrhunderte, ch. vii; Tillemont, Hist. des Empereurs, vol. ii; Smith, Dict. of Greek and Roman Biog. and Mythol. vol. ii, s. v. (J. H. W.)

Coin of the Emperor Nerva.

Nervet, Jean, a French prelate, was born in 1442 at Evreux. He early joined the Order of St. Augustine. Louis XI, having found talent in Nervet, attached him to his person in the capacity of almoner (1474), and selected him afterwards for confessors. His virtues and his rare prudence attracted towards him many people of consideration at the court, where he remained until the accession of Charles III. Nervet became subsequently prior of Saints-Catherine-la-Couture of Paris, counselor of state, abbe of Jullly, and bishop of Megara in partibus. He was educated at the University of Paris, and cultivated letters; he was one of the protectors of the Hellenist Chéradame. Nervet died November 2, 1529, and was buried in the cloister of Jullly. See Desfontaines, Jugement sur les écrits nouveaux, viii, 168; Archon, Hist. ecleés. de la chapelle des Rois de France, ii, 416; Dom Toussaint du Plessis, Catalogue des abbés de Jullly; Gallia Christiana, iv, 787, and viii, 1677.

Nescher. See Eagle.

Nesmond, François de. See Nesmond, Henri de.

Nesmond, Henri de, a French prelate and academician, was born at Bordeaux about 1645. He descended from a family originally from Ireland, and was the son of a president in the Parliament of Bordeaux. Henri was afforded superior educational advantages, and early entered upon an ecclesiastical career. The success of his preaching caused him to be made successively abbé of Chécy (May 26, 1689) and bishop of Montauban (Sept. 3, 1687). The differences which existed between the court of France and the holy chair delayed the papal bulls of his appointment until Oct. 13, 1692; but, after their delivery, he proceeded to Rome, where he was received as counsellor in the Parliament of Toulouse April 26, 1685, was transferred to the archbishopric of Alby Aug. 15, 1703, and became abbe of the Mas-Garnier in 1715, and archbishop of Toulouse Nov. 5, 1719. In this capacity he was called upon to address Louis XIV and Louis XV in the name of the province of Languedoc. The former of these princes loved to hear him, and called him the finest of the kings of France. M. de Maupertuis succeeded Flicheur in the French Academy June 30, 1710, Nesmond died at Toulouse, May 27, 1727. All his wealth he left to the poor and to the hospitals. His Discourses and Sermons, etc., were collected and published (Paris, 1734, 12mo). One of his cousins, François de Nesmond, who made him his heir, was born at Paris, Sept. 21, 1629, and became bishop of Bayeux Aug. 9, 1661, and died June 16, 1715, dean of the bishops of France, in his diocese, where his memory is held in great veneration through the benefits which he has conferred. See D'Alembert, Hist. des membres de l'Acad. Frang. iv, 847; Gallia Christiana vol. xliii.

Nessa is the name of an intercolusary month introduced by the ancientarians in bringing the lunar, every third year, into conformity with the solar year. The use of this month was forbidden by Mohammed in the Koran.

Nesse, Christopher, an English divine, was born December 26, 1621, at North Cowes (Yorkshire), and was educated at St. John's College, University of Cambridge. He took holy orders, and obtained a benefice at Cottingham, in the vicinities of Hall, as well as the lecturership in the parish of Leeds. Rejected by the established Church for non-conformity in 1662, he went to London, and took charge of a dissenting congregation in Salisbury Court, Fleet Street, with which he remained connected for thirty years. He died there November 10, 1705. He published a large number of theological and other works: he has made himself known principally by the work entitled History and Mystery of the Old and New Testaments, logically discussed and theologically improved (Lond. 1690-91, 4 vols. fol.); to this work Matthew Henry is thought to owe much of his most valuable material for his famous works. The most characteristic work of Nesse's value are: The Christian's Walk and Work on Earth:—The Christian's Crown and Glory:—Church History, from Adam:—Antidote against Popery:—A Divine Legacy:—A Discovery of the Person and Period of Antichrist (Lond. 1678, 8vo);—The Reign of Tithes (1681, 4to);—Life of Pope Innocent XI. Many of these books were written for him, and that the whole impression was sold in a fortnight. See Wilson, Hist. of Dissenting Churches; Granger, Biog. Hist. of England, v. 78 sqq.; Allibone, Dict. of Brit. and Amer. Authors, ii, 1408; Hook, Eccles. Biography, vii, 400. (J. H. W.)

Nescus, the god of a river in Thrace which bore the same name.

Nest (της. ken, from της, to build; κατασκευής, lit. a tent-dwelling). The law in Deut. xxii, 6, 7 directs that if one falls in with a bird's-nest with eggs or young, he shall allow the dam to escape, and not take her as well as the nest. The reason Maimonides (Mek. Ne-buchim) gives for this is, "The eggs on which the dam is sitting, or the young ones which have need of her, are not, in general, permitted to be eaten; and when the dam is allowed to escape she is not distressed by seeing her young ones carried off. It thus frequently happens
that all are untouched, because that which might be taken may not be lawfully eaten.” He adds, “If the law, then, be thus careful to prevent birds and beasts (for he had been alluding to the instances of this humanity of the law) from suffering pain and grief, how much more mankind!” See Law of Moses.

The equipment of birds, as constructed, its perfect adaptation to its intended purpose, its compactness, its hollow form, its warmth, the different materials of which it is composed, its lining, the industry and perseverance with which it is collected and put together, the art with which it is concealed—all these and others render it impossible to look on these elaborate specimens of birds’-nests without strong admiration. It is true there are very numerous gradations in the perfection of what we may call art in these structures—from the shallow cavity scratched in the ground by the partridge, to the purse of the oriole, exquisitely woven of horse-hair, and suspended from a twig, or the tiny cup of the humming-bird compactly felted of silk-cotton, and ornamented with lichens; but this endless variety is only the more admirable, because we see that each form is perfect in its kind, and answers its own purpose better than any other could have done. Various as are the materials selected by birds for the formation of their nests, none are generally chosen for one prominent quality, namely, the warmth of the young (Job xxix., 18).

The eagle is remarkable for the jealousy with which its domestic economy is removed far from human intrusion. Jehovah alludes to this in his contest with his servant Job (xxxix, 27, 28): “Both the eagle mount up at thy command, and make her nest on high? She dwelleth and abideth on the rock, upon the crag of the rock, and the strong place: from thence she seethethe prey, and her eyes behold afar off.” The loftiness of the eagle’s nest was proverbial, it was “among the stars” (Isa. lviii. 14); and to this the story of the eagle was a phrase by which the prophets reproved the pride and ambition of man (Jer. xxxii, 16; Hab. ii, 9). See Eagle.

Another bird remarkable for the inaccessible localities in which it incubates is the rock dove. See Dove. Clefts in lofty precipices, deep holes in beetle-infested cliffs, and shelves in dark caverns, are chosen by this bird. The narrow passage between towering rocks that cleave the elevated region on both sides of the Dead Sea are perforated with clefts and caves, which are numerously tenanted by blue rock-doves. The prophet Jeremiah takes occasion from this display to exhume Moab, in the prospect of his desolation by the Chaldæan king, to imitate the rock-dove: “O ye that dwell in Moab, leave the cities, and dwell in the rock, and be like the dove that maketh her nest in the sides of the hole’s mouth” (Jer. lxxiii, 26). It was doubtless the resemblance in habit between the rock-dwelling inhabitants of Idumea and the rock-dove, both of whom were probably full in view from the summit of Pisgah, that suggested the metaphor which Balaam used of the Kenite, “Strong is thy dwelling-place, and thou puttest thy nest in a rock” (Num. xxiv, 21). See Kenite.

The guillemot usually lay their eggs in great numbers, often in a nest carelessly made on the ground, and with very little precaution against accidents or interferences from others of the same species. Hence they frequently fail in incubation, or even desert their nest. This seems to be the point of the allusion of the prophet Jeremiah: “As the partridge sitteth on eggs, and hatcheth not, but what she layeth is dead and she knoweth not, and what she hideth doth perish not by right, shall them leave in the midst of his days, and at end shall be a fool” (Jer. xvii, 11). Such a nest we may suppose to have been in the mind of the prophet Isaiah, in the self-gratulatory soliloquy which he puts into the mouth of the conquering king of Assyria: “And my banner shall be as the nest of the rich children of the people; and as one gathereth eggs that are left, have I gathered all the earth: and there was none that moved the wing, or opened the mouth, or peeped (pipped)” (Isa. x, 14). A nest on the ground, containing many eggs, from which the chicks emerge actues and fledged, and in which they can utter their feeble piping, is the figure here, and suits some gallinaceous species.

Most birds, however, resort to trees for the fabrica- tion of their nests. In Palestine the thick foliage of the cedars would afford peculiar advantages of shelter and concealment. The dominion exercised over the surrounding nations by the great empire of Assyria is symbolized by Ezekiel under the figure of a lofty and far-spreading cedar in Lebanon, in whose boughs all the birds of heaven made their nests (Ezek. xxxii, 3-9), and a parallel comparison is indicated to Nebuchadnezzar his royal power (Dan. iv, 21). Jeremiah apostrophizes the inhabitants of Lebanon, as “making their nests in the cedars” (xxiii, 9); and in the beautiful picture of nature in Psa. lix, the cedars of Lebanon which God hath planted are brought before us as the place “where the birds make their nests,” while “as for the stork, the fir-trees are her house” (ver. 17); perhaps the flat summits of old trees, a more exposed situation than in the cedar forest. See Stork.

The propensity of the swallow to affix its nest to human edifices, and of the sparrow to bring up its young in the haunts of man, are generally depicted by the Psalmist, when he contrasts their familiarity with his own exile from the sanctuary (Psa. lxxiv, 2, 8). See Bird.

Nesterfield, Ecclesiastical Council of (Concilium Nesterfeldense), was held about the year 703, under Bertwald, archbishop of Canterbury, in which Wilfred of York was a second time deposed: he appealed to Rome; his case, it is said, was considered in a council held there in that year. See Inset, Orig. Anglicanæ, i, 133. See also Wilfred of York.

Nestor, or Letopis Nesterova, the Russian Ver- enable Bede, the most revered name in the whole compass of his country’s literature, was born in 1056. At the age of seventeen he entered the convent of Pectrice- rich, at Kiew, where he remained until his death, about 1118. But little is known of his personal history. In the Pakerion of his contemporary there is this beautiful testimony to his life: “Nestor labored industriously on his annals, thought of eternity, served and pleased his Creator, and died at a good old age peacefully.” His Chronicle of Russia, which is his life-work, comes down to 1118; it has been continued by Sylvester, a monk of Kiew, and later by another monk of Kiew, and others, to 1206. There are several manuscript copies of it, and they differ somewhat from each other, so that they have become the subject of many interesting investigations both to Russian and foreign historians. They were published by Radzivill or Königsberg at St. Petersberg (1757, 4to), from a manuscript found at Königsberg, and considered by the critics as the most trustworthy extant. The first critical edition, however, was published in Germany, with a German translation by Schlozer (Gott. 1802-1809, 3 vols. 8vo), carrying the work up to the year 980; a German translation of the whole work was brought out at Lipsig in 1774, but it is faulty. The latest and best edition, entitled Chronicon Nestoria textus, versus Latina et glosarium (ed. Mikelaisch), was brought out at Vienna (1860 sq.). This Chronicle is highly prized by the Russians as the oldest annals of their history. Nestor wrote also a Paterikon Pecercrucum, which is a book of biography of pious men, and some of the most poetic and noble, and very valuable as the oldest document treating of Russian ecclesiastical history. Though interspersed with many absurdities and superstitions, it was first published in 1661, and has been reproduced since in divers forms. Nestor was a very learned man in his time. He studied perfectly the Latin, Greek, and Hebrew languages, and read the Byzantine historians, from whom he translated many passages, and inserted them in his Chrono-
There are some other monasteries in Persia, the most considerable of which is that near Tauria. They have about twenty double convents, that is, both for monks and nuns, who have separate habitations, though but one common church. While the monks are employed in bodily labor the nuns prepare their victuals. The monks celebrate the liturgy of the Church; the nuns, drink and sing their Lents are six in number; viz., the grand Lent of the universal Church; that of the Apostles, which begins fifteen days before the festival of St. Peter; that of the Assumption of Our Lady; that of the Exaltation of the Holy Cross, each of fifteen days; that of Elias, or the Holy Prophet, which lasts three days; and that of the Nativity, which continues twenty-five days. The Nestorian monks are habited in a black gown tied with a leather girdle. They wear, instead of a capuche, a blue turban. The nuns are habited after the same manner, excepting that they tie a kind of black veil about their heads and under their chins. They must be forty years old before they take the monastic habit. If a monk desires to quit his convent to marry, he asks leave of the pasha, and the bishop is obliged to consent to it for fear the monk might turn Mohammedan.

Nestorians, a sect of early Christians, so called after Nestorius (q.v.), are generally regarded as the Prot- estants in Eastern Christianity, they having always opposed the regard for Mary as more than woman, and having in many other respects preserved the orthodox doctrines and authorized usages of the early Church of Christ. As a sect they claim to be of earlier origin than the age of Nestorius, and date their conversion back to the preaching of the apostle Thomas, hence some of them are called Thomas Christians (see below). There is besides a tradition prevalent among the Nestorians which makes them of Jewish descent, and claims for their Church the Chaldea and Assyria. Hence they are called Chaldaens (see below). But though these claims may have no foundation, it is yet to be conceded that the Nestorians are probably the oldest, as they certainly are the purest, of the Oriental churches, although, as we shall presently see, they are quite as much or less Christo- logical heresy, and hold some absurd superstitions, and maintain, as a sect, a service which is little more than mere formalism.

I. Doctrinal Position.—In the article NESTORIUS is set forth the controversy which agitated the Eastern Church in the fifth and sixth centuries regarding the person and nature of Christ, arising out of the use of ambiguous terms—υστάσιας and πρώσων [see HYPOSTASY]—and how peace was finally restored between the Syrian and Egyptian churches by the confession drawn up by Theodoret. It remains now to point out how the opposition organized in order to sustain Nestorius in his cause, after deposition from the patriarchate, finally developed such strength as to prove a formidable antagonism to the Cyrillics, making necessary further action on the part of the emperor, who finally caused the expulsion of all Nestorians from the Roman empire, and by this action only gave development to Nestorianism in the East, by an independent and new sect, as is generally believed in the West, or by auxiliarying an already existing sect of like tendency, as the Nestorians of to-day generally claim.

It will be seen in the article on Nestorius that, notwithstanding his deposition, his devotion and persistent adherence to the doctrines Nestorius had taught. Including the diocesan synods and the schismatic assemblies, there were not less than nineteen or twenty meetings during the first twenty years of the controversy. Mercator gives them in order: he makes out that there were four at Rome, at Alexandria, and Constantinople; two at Ephesus; two at least held by the Oriental, and others at Antioch, Beros, and elsewhere. Most of these we treat under their respective titles. The second at Con-
Nestorians, held Oct. 25, 481, was for the election of Max-
imin in succession to Nestorius; and the third, which was rather a consultation of bishops with the emperor, was for considering the best means of re-establishing the patriarchate of Antioch. The Council of Ephesus, which had been held in A.D. 431 (see Acts 19.34), was assembled to condemn the opposite heresy, that of Eutyches. It not only did so, but incidentally confirmed the decision of the Council of Ephesus, and expressly adapted the term Σωτηριακός. Two years later a council at Constantinople, among other things, con-
demned a letter of the bishop of Edessa which had introduced the term Σωτηριακός. Gelasius, bishop of Rome (A.D. 492-496), also synodically condemned the Nestorians. But whatever their favor or condemnation at papal Rome, so troublesome did these faithful Nestorians be-
come to the government that the emperor saw himself obliged to second the efforts of the special Church coun-
cil which he had called, to settle this great Christology-
ical question advisedly and finally by the expulsion from his dominions of all who failed to accept the Ephesian decision. It was thus that Nestorianism was transplanted to Assyria, and especially to Persia, where it has ever since maintained its ground, finding immediately upon its appearance there powerful and enthusiastic adherents. From the government such favors being prompted, probably, by political oppo-
sition to Constantinople.

This colonization of Nestorianism, however, was not begun by the emperor's illiberal policy. It had taken rise much earlier. Presbyter Ibas (q. v.), for the simple principle of putting orthodoxy against Christology, was exiled from his see; the account of the controversy, had written a letter to Mares, bishop of Hardosia, in Persia, shortly after the union of the patriarchs John of Antioch and of Cyril, in which he clearly established the merits of the controversy, con-
demning what was amias in Cyril, and condemning only what he had himself distinguished from hisAMYIAS. In this account, he himself, but yet evincing greater sympathy for the latter. So much moderation did Ibas exhibit in his letter, and so earnestly did he plead for peace in the Church, that the missive was not without influence. He had besides furnished Syriac translations of the works of Diodorus of Tarsus and of Theodore of Mopsuestia; and thus having an opportunity to examine for themselves into the merits of the controversy, the Assyrian and Persian Christians were numerous won over to Nestorius. Further strength was given to Nestorianism, especially in Persia, by the expulsion of the teachers from Edessa, which had found willing and enthusiastic exponents. Among those whom the Persians gained over for their own Church by this intolerant policy of bishop Rabulas of Edessa we notice partic-
ularly Barsumas, who, as bishop or metropolitan of Nisibis (A.D. 436-489), contributed in no small degree to the propagation of Nestorianism in Persia. He engraved on the REDUCTION OF THE CYRILLIC. Supported by Nerses (q. v.) the leper, also driven out of Edessa, Barsumas founded a new theological school at Nisibis. He also used his in-
fluence with the king of Persia to have him confirm the Persian Christians in their aversion to the Cyrillian Coun-
cil of Ephesus, and in their adherence to the teaching of Cyril, as a substitute for that of the Arians. He even so far controlled king Peroz that this monarch expelled those Chris-
tians who had espoused the Cyrillian views, and set Nestorians in their place, putting them in possession of theprincipal seat of ecclesiastical authority in Persia, the see of Seleucia, which from that time to our own day has always been filled by the patriarchs of the Nestorians. Indeed, such was the zeal and success of Bar-
sumas that the Nestorians who still remain in Chaldea, Persia, Assyria, and the adjacent countries, consider him really their parent and founder. He certainly contrib-
uted much, not only to the upbuilding of Nestorianism in Persia, but to its spread into Egypt, Syria, Persia, India, Tartary, and China, whence went his theological students from the school at Nisibis. "The Nestorians," says Mosheim (Eccles. Hist. i. 98), "after they had ob-
tained a fixed residence in Persia, and had located the
head of their sect at Seleucia, were as successful as they
were industrious in disseminating their doctrines in the
countries lying without the Roman empire. It appears
from unquestionable documents, still existing, that there
were Nestorian settlements in all parts of Asia, in
India, in Armenia, in Arabia, in Syria, and in other coun-
tries, under the jurisdiction of the patriarch of Seleucia
during this (the 6th century)." Of the 7th century he says
(ibid. i. 499), "The Christian religion was in this cen-
tury diffused beyond its former bounds, both in the East-
ern and in the western quarters of the empire. In the East, the Nestorians, with incredible industry and perseverance, labored to
propagate it from Persia, Syria, and India among the
barbarous and savage nations inhabiting the deserts and
the remotest shores of Asia. In particular, the vast empire
of China was enlightened by their zeal and in-
dustry with the light of Christianity." In A.D. 498 a
Church council convened at Seleucia, and by this body
the Nestorian doctrine was made the faith of the Per-
sian Church. The dogmas then adopted amount to
what follows: 1. That in the Saviour of the world there were two hypostases, or persons, of which the one was
divine, or the Eternal Word, and the other human, or
the man Jesus Christ; 2. That the man Jesus Christ has only one outward appearance; 3. That the union
between the Son of God and the Son of Man was formed in the moment of the Virgin's conception, and is never to be dissolved; 4. That this union was not of nature or
person, but of will and affection; 5. That Christ was to
be regarded as consisting of two persons, but not as in a temple; 6. That Mary was to be called the mother of Christ (XPOROIOÇ), and not the mother of God (ευσωτηριακός).
How far Nestorius himself main-
tained these views will never clearly appear, as his own
expositions of Christology are only extant in fragments, and they even full of contradictions; but certainly
the doctrine as here laid down by the Council of Seleu-
cia involves a denial of the unity of Christ's character.
"The Nestorian Christ," says Dr. Shedd, in his History of Christion Doctrine, "is two persons—one divine, and one human. The important distinction between a 'nat-
ure' and a 'person' is not observed, and the consequence
is that there are two separate and diverse selves in Jesus Christ. Instead of a blending of the two natures into one self, the Nestorian scheme places two selves side by side, and allows only a moral and sympathetic union between them. The result is that the acts of each nature are done by a character distinct from the other. There is no divine humiliation, because the hu-
manity is confessedly the seat of humiliation, and the
humanity is by itself, unbanded in the unity of a com-
mon self-consciousness. And there is no exaltation of
the humanity, because the divinity is confessedly the
source of the exaltation; and this also is isolated and
isolated for the same reason. There is God, and there
is man; but there is no God-man."

II. Ecclesiastical History.—When the Sassanides, by
restoring the Zoroastrian mode of worship, had over-
thrown the empire of the Parthians, the previous good
understanding between the two powers came to an end. They appeared to be not only the predominant, but the only
religion of the empire. Yet the later rulers of this dynasty ap-
pear to have cared more for politics than for religion, and
the Christians, i. e. the Nestorians, were left in peace,
except in times of war against the Greek emperors.
Peroz (or Peroz or Peroz), as has been said above,
had been well disposed to the Nestorians in favor of the
Nestorians, but he had bitterly opposed the Roman Catho-
lics, and persecuted them. Cavades, or Cobad, his suc-
cessor (448-531), after he came back from the land of
the Huns, whither he had fled out of prison, commenced
against the Greek empire a war which lasted for years,
and which led to a persecution of the Christians. (He
had commanded the community of women. This led to
an insurrection of the nobility, and Cavades was thrown
into prison, whence his sister managed to help him es-
ap from, and fle the country. His brother, Jampes, who

---V.31---
was appointed in his place, recalled the obnoxious law; and as it had probably had also a demoralizing effect on the Christians, Badeus, then patriarch of the Nestorians, with the assent of this new and more liberal ruler, held a synod to remedy the evil. According to Barhebrueus (1645), the Nestorian Church in control of the Chris- tians of Persia, the Christians removed the Church with the aid of the Greeks, and sought to force the Nestorians to unite again with the Romish Church. This, however, does not appear trustworthy. About the end of Cavades's reign a schism took place among the Nestorians, which is said to have lasted twelve years, and during this time the patriarchy of Nestorius and Elieus, with elders appointed by the opposing parties, each of which in turn appointed bishops from among his followers. After Narses had died in prison and Elieus had been deposed by a synod, the bishops elected Paulus, who however filled the office but a few months, and was succeeded by Mar Aba I, or "the Great" (588-602), a Magian convert to Christianity. He translated the Iturian of the Nestorians from the Greek into Syriac; and this version continues in use at the present day among the Nestorians. Mar Aba I showed also great activity in restoring order and discipline in the Church, visiting the different dioceses, sending pastoral addresses to distant dioceses, and collecting Moultonian doctrine, which it was declared that neither patriarchs nor bishops should thereon be allowed to marry—a regulation which has ever since been observed in the Nestorian Church. He also confirmed the former canons, and ordered that, while adhering strictly to the Nicene Creed, the system of Monophysitism should form the basis of the Syriac exegesis. On account of the previously mentioned schism, when there were often two bishops appointed to the same see, Mar Aba I deposed the unworthy dignitaries; and in cases where two equally deserving filled the office, he retained the oldest, and the other had to return to his own diocese. Under this regulation the office became vacant again. Patriarch Ezechiel (577-580), as soon as he entered into office, held a synod (Feb., 577), whose principal result was the promulgation of an edict against the Monophysites. As the Monophysites had made great progress in Persia under Cavades, and especially under Chosroes I (531-579) [see Kiossor], Jacob Baradeus appointed as ecclesiastical metropolitans, in the place of the imprisoned patriarch, a metropolitan of the East, Achudemes, whom Barhebrueus considers as the first maniphian (q.v.) of the East. Chosroes, according to his popular tradition, became a Christian in the latter part of his life, and recommended his successors to avoid war with the Christians. As for himself, he seems to have been often at war with that country, and to have on those occasions persecuted the Christians. His son, Hormuz IV, as also Chosroes II, proved more friendly to the Nestorians, especially the latter, who compelled all Christians in the empire to join them. He afterwards, however, persecuted them on account of their having elected Gregorius as patriarch against his will; and after Gregorius's death, in 608, he forbad their appointing another. The office remained vacant for twenty years, until Shirujo (Silores), the son of Chosroes II, ascended the throne. He proved favorable to the Christians of all denominations. The edict of Chosroes also left them in peace, being too weak and too much occupied in preserving their position and life to do otherwise. Under the caliphs the Nestorians were seldom persecuted; on the contrary, they claim that they received several charters, the authenticity of some of which, however, is doubted. The first, they say, was obtained by patriarch Jesub of Gadula (629-647), who saw the last Persian kings. He went himself to Mohammed, and asked him for it. It was printed by Gabriel Si- nita (Paris, 1630). Indeed, Mohammed is supposed to owe his imperfection of the orthodox Church of Nesto- rian monk, Sergius; and it is therefore but natural to suppose that from him the sect received many privi- leges, so that it obtained great consideration among the Arabians, and exerted an influence upon their culture, and thus upon the development of philosophy and science in general. The words of the world's savant, Alexander von Humboldt, in the second volume of his Kosmos (Stuttgart and Tubing, 1847, p. 247 sq.), on the connection of the Nestorians with the development of the physical science of the Arabians, are worthy of note here: "It was one of the wondrous arrangements in the system of things that the Christian sect of the Nestorians, which has exerted a very important influence on the geographical extension of knowledge, was of service even to the Arabians before the fourth century; while the work of learned and disputatious Alexandria; that Christian Nestorianism, in fact, under the protection of the arms of Islam, was able to penetrate far into Eastern Asia. The Arabians, in other words, gained their first acquaintance with Greek literature through the Syrians, a kin- dred Semitic race; while the Syrians themselves, scarcely a century and a half before, had first received the knowledge of Greek literature through the ana- thematized Nestorians. Physicians who had been educated in the institutions of the Greeks, and at the celebrated medical school founded by the Nestorian Christians at Edessa, in Mesopotamia, were, as early as the times of Chosroes I and the Prophet Mahomet, known by the name of the Moslems Moslem, or Mecca. Jesubal also obtained another charter from Omar, together with complete exemption from taxes for himself, his brothers, servants, and followers, which it is said lasted until the beginning of the 14th century. All gave Mareses, a follower of Jesubal, then bishop of Nisibis, once considerable aid in his having supplied an army with food, a recommendation for all his followers to spare the Christians. Similar services were given to their patriarchs by Muktedir-billah, Kader-billah, and their successors, and Jesubal of Adiabene (650-660) was able to write to Simeon, metropolitan of Persia, that the Arabians were the only Christians who were able to render him any help, and he was held in high respect, showing great regard to the priests and people, and even supporting the churches and convents. As the Nestorians were distinguished for their learning and activity, many of them held high official positions. They were especially renowned, as we have already learned from Humboldt, as physicians and as secretaries to the caliphs, and so highly and favorably were these regarded that no election of patriarchs or other important ecclesiastical event took place without their being consulted. In this manner the Nestorians acquired great preponderance over the other Christian sects, and the caliphs Kajim-beamz-illah and Muktedir-billah, in their descent to the Arab monarchs, Sabarsjeus (surnamed Zanburr) and Ebedjeus should have authority not only over the Nestorians, but also over the Roman Catholics, or Melchites (q.v.), and the Jacobites (q.v.). With the exception of a short persecution under Harun-al-Raschid, we find but two during that entire period: the first, chiefly directed against the Nestorians, by Muteukkell, was occasioned by his phy- sician, Bochjeus, having displeased him; the second, by Hakim-beamz-illah, was directed with great vigor against all Christians, and even against the Jews, but it of course did not extend beyond his own dominions of Syria, Palestine, and Edessa, his subjects, his physicians and secretaries also proved injurious at length, as they went so far as to arbitrarily appoint and depose patriarchs, making the caliphs confirm their action. (Christianity, it may be stated here, had been introduced into Arabia at a very early period. Both the Nestorians and the Jacobites sought this field to propagate their own doctrines, and the former proved successful in that undertaking. Under the caliphs they spread not only in Arabia, but through Syria and Palestine, and under Mar Aba I [patriarch 742-752] a bishop had to be appointed for the Nestorians distributed throughout Syra, Lycia, Maghreb, and Syria. This was Job (Job- nob; in later times they had also a metropolitan of Egypt. The bishops of the different parts of Arabia were at first subject to the metropolitans of Persia, to
NESTORIANS

NESTORIANS

whose diocese belonged also the East Indies, the western shores of which, at least, were still Christian in the early part of the 7th century.)

After Bagdad had been built and become the abode of the caliphs, the patriarchs selected it also as their residence, between the years 670 and 700. They were determined at Seleucia. Ananiasse II was the first patriarch elected at Bagdad. The patriarch was called yazaki,

î.e. catholicos, and in the 15th century the yazakî had no less than twenty-five metropolitan prejudices under his supervision. Says an ecclesiastical historian: "The Nestorians of the East have been considered as the most learned and the most industrious people in the whole empire. They occupied, almost to the exclusion of other Christian sects, the region which forms the modern kingdom of Persia, in all parts of which they had churches. They were numerous in Armenia, Mesopotamia, and Arabia. They had churches in Syria and in the island of Cyprus. They had churches among the mountains of Malabar in India. They had numerous churches in the vast regions of Tartary, from the Caspian Sea to Mount Imaus, and beyond, through the greater part of what is now known as Chinese Tartary, and even in China itself. The names of twenty-five metropolitan sees are on record, which of course embraced a far greater extent of territory, and were not all the more numerous societies or churches." Mar Aba II resided at Wasit, and after the building of Sermeura by Mutasim, in the year 220 of the Hegira, some of the patriarchs chose it as their residence. When Hulagu Khan took Bagdad, in 1258, patriarch Machiaca caused the Christians of all sects to assemble in his church, and was given by him the stratagem from the hands of the Mongols. Hulagu and most of his followers were not badly disposed towards the Christians, and particularly towards the Nestorians, partly because of a common enmity against the Mohammedans, and partly because their religion, Buddhism, had borrowed much from its form from Nestorianism, and also because a large number of their wives were at least nominal Christians, and some of their leaders too. This was especially the case in the land of the Keriit, or Krite-Tartars, where, according to divers accounts, Nestorianism had been flourishing since the 11th century, and whose rulers seem to have embraced it. Their title, Ung(b), or Bang Khan, could readily be derived from a perversion of the name John, and thus have given rise to the tradition of the presbyter or priest John [see John, Presbyter] being a mighty king, which afterwards, when its fictitious character was recognized, was transferred to the title then used by Nestorian kings. [see Gould, Myth of the Mid Ages, p. 30 sqq.; Mosheus, Historia Tartuorum Eccles. (Helmst. 1741); Neander, Kirchengesch. 84 sqq.]. Zenghis Khan himself took to wife a daughter of his vanquished enemy Bang Khan, Toghrul, and his son Juggatai, according to Marco Polo, became a Christian. The family of the Bang Khan of Tschingis had also been allied to the imperial family down to the days of Marco Polo; and the chief of the Minorities, John of Monte Corvino, succeeded in inducing a prince of that country, successor of the Bang Khan, whom he calls George, together with a large number of his followers, to become a convert to Christian Romanism in 1292. This union, however, was of but short duration, as his son in 1299, with all his adherents, returned to Nestorianism. The same John of Monte Corvino (q. v.) built the first Christian church at Peking, with the assistance of Kublai Khan, and baptized six thousand people, for which he was by the pope appointed Archbishop of Cambodinensis. Asemamai gives the names of a number of Christian princes or rulers of the family of Zenghis Khan. Arghun Khan, who reigned after the return of the family to Mohammedanism, promised to become a Christian after taking Jerusalem. Kaijata, son of Arghun, was a Christian, according to Haytho. Casamir was at first in favor of the Mohammedans, who had aided him in ascending the throne, and his general, Nurez, persecuted the Christians, but he changed after

wards, and greatly favored them. Chodabende, second son of Arghun, called by the Tartars Oldshaltai, was led by his mother to become a Christian, like her, and was baptized under the name of Nicholas, but after her death he returned to Islamism, and took the name of Khatem-Asal-Haytho. His successor was called Sargis, and named Behadur Khan, was probably of the same religion, as were also his followers, under whom the empire was divided between several dynasties. It remained thus divided until Timur reunited it. After him the Turcomans ruled over Mesopotamia, Chaldea, Media, Persia, and India. His successor was the greatest of all the Mongol empire in India and the Turkish empire in Western Asia.

The long and uninterrupted peace enjoyed by the Christians under the rule of the Arabs and Mongols had led to a great expansion of Nestorianism in Eastern Asia. Hulagu had (according to Haytho) given to Christians the command of camps and of whole states, and appointed a palace in Bagdad for the residence of patriarch Machiaca. Abaga Khan confirmed this gift, but Machiaca was obliged to leave the town on account of a disturbance he had himself occasioned (by causing a Christian renegade to be thrown into the Tigris), and retired to Arbela. The return of Achem Khan, Chose, to the same place, 1270, was not without the favor of the Christians, but we find no evidence of their being really oppressed until the reign of Timur, who persecuted both Christians and Mohammedans. Communications with the distant East were now broken up, and the churches there gradually died out. Islamism was everywhere victorious, and gained even among the Christians by the active efforts of the Christian communities in Tartary and India. The same was subsequently done in Persia by the fanatical Shiiites, and in other parts of Asia by the Mohammedan dynasties. To these causes must be added the popes, especially since the appearance of the Mongols, who showed themselves to be their friends; and also the Christians, who maintained an active correspondence with their princes, and sent missionaries who opposed the Nestorians, till, with the single exception of a few communities scattered through India, and now known as Thomas Christians, they were almost entirely confined to the wild mountains and the valleys of Kurdistan and Armenia. Here, under the Turkish dominion, they remain to this day, with a separate patriarch, who from 1550 till the 17th century resided at Mosul, but has since dwelt in an almost inaccessible valley on the borders of Turkey and Persia. They are very ignorant and poor, and have been much reduced by war, persecution, disease, and want.

III. Nestorians of the Church of Rome.—A portion of the Nestorians, especially those in cities, united from time to time, under the name of Chaldeans, with the Roman Church, subject to a patriarch of their own. He resided first at Bagdad, and afterwards at Mosul; but a division arising among them, in 1551 the patriarchate became divided, at least for a time, and a new patriarch was consecrated by pope Innocent IX, whose successors fixed their residence in the city of Ormuz, in the mountainous parts of Persia, where they still continue, distinguished by the name of Stichaleans, under a patriarch of their own, and were determined the early relation of the Christians of Persia to the see of Rome, yet without a brief review of their early history it is not well possible to understand the progress of Romanism in the Nestorian country, and we therefore insert here much as is essential for the purpose of affording the reader a complete history of Nestorianism. It is very likely that Christi-anity was introduced into Persia as early as the days of the apostles, but the whole history of the empire at that time is so uncertain that it is impossible to arrive at any definite statements as to its progress. Under the Avasciades, who were thoroughly indifferent in religious matters, it is likely that Christianity was permitted to spread unmolested, and Barhebrues and others only mention one persecution of short duration. Trajan, however, persecuted the Christians as far as his power extended.
across the provinces during his wars. The bishop of the chief town of Seleucia-Ctesiphon gradually became the head of the Christian Church in Persia and the more remote Eastern countries. Yet when Pana, bishop of Seleucia, wrote to the emperor and to the Council of Nice (A.D. 325), we still find a John, bishop of Persia, sent also to the same assembly as representative of the churches of Persia and the East Indies. And although Jabalalla, archbishop of Seleucia, in the synod of A.D. 420, invited the bishops of Persia with the office of metropolitanans, it is only Joseph of Aniáne (640–690), his pupil and successor (Georgius (660–690)), or, finally, Timotheus (778–820), who brought them into absolute subjection to the see of Seleucia. But as the frequent wars with the Romans rendered the journey difficult and sometimes impossible, it was at last neglected, and Shachlupa, who died in 182 (according to Amru in 244; see Assemani, Bibl. Or. iv. 42), was the first who was ordained at Seleucia. They thus acquired a certain degree of independence. Pana, the successor of Shachlupa, received the title of archbishop; subsequent ones took that of patriarch, and claimed the same rank as those of the Western patriarchs. This Assemani states (Bibl. Or. iii. 427; iv. 80), was first done by Babesus (498–563) at a synod held in 499. He calls him the first Nestorian bishop of Seleucia, and asserts that his three predecessors—Desdemon, Babesus, and Acaci—remained true to the Roman Catholic doctrine, and to their obedience to the Pope. This is contrary to the statement of the Synod of 431 (430–465), in which it was declared that no complaints or accusations could ever be brought against the bishop of Seleucia, to whom all owed unquestioning obedience. In the Arabic Sodico and Nemocan it is further stated that it is not allowable to complain of him to the Western patriarchs, who are to refer them from him to the decisions: this is by Assemani considered as a later Nestorian interpolation. But Babesus and Acaci must have been weak prelates, for it appears from the canons of the times that the manners of the clergy became very lax under their rule; and Acaci, who formerly belonged to the school of Eusebius, and therefore held the Nestorian doctrines, being sent to Constantinople as Persian ambassador, joined there in anathematizing Nestorius, but after his return never acted against the Nestorians. He complained also, according to Barhebræus (see Assemani, Bibl. Or. iii. 388, note), that Xenias, monophysite bishop of Mabou (Hierapolis), known by that name only, had an adversus against every of the N.T. into Syriac called him, denounced him and his adherents "Nestorians," while he had no knowledge whatever of Nestorius nor of his heresy (!). This seems, then, to be the origin of the name. They called themselves "Chaldæans," a name which now is used only for the Nestorians reconciled with the Romish Church; they claim that the appellation of Nestorians is wrong, as Nestorius never was their patriarch; and they do not even understand his language, and that, moreover, he is posterior to them. Although these early patriarchs did not venture to break openly with the see of Rome, Babesus, a member of the Illuminated party, who filled the see of Seleucia after a two-years' vacancy, was the first to act towards it in a fearless manner. He held a synod in which it was declared, 1, that all that had passed between Barsumas and Acacius (who had excommunicated each other) should be forgotten, and their correspondence destroyed; 2, that the patriarch, bishops, priests, and monks should be allowed to marry one wife (not several, as had previously been sometimes the case; see Assemani, De catholico seu patriarchia Chaldaeorum et Nestoriorum Commentarius [Rome, 1775, 4to., p. 18]; 3, that the patriarch of Seleucia was entitled to the title of "Chaldean" also. This synod should meet every two years instead of yearly, and the patriarch every four instead of every two years, to consider Church matters, and that in the month of October, the patriarch having the privilege of calling the meeting earlier. Barhebræus says, in reference to the second canon, that Babesus commanded his successors to marry under penalty of interdict, and ordered also the bishops and presbyters to marry again and again. This is not only an erroneous statement (see Bibl. Or. p. 429). His successors were of the same opinion: all the episcopal sees were filled by Nestorian bishops, and they all sought to increase their party. Besides them there labored also for the same object a number of writers, and particularly the monks of numerous convents which they established in Assyria, and among these most of the most ancient and most renowned were of Nisibis. They produced not only learned theologians and efficient priests, but also distinguished physicians and philosophers; they translated the Greek classics, namely, Aristotle, Hippocrates, and Galen; they were in that age of darkness the only depositaries of learning, and the teachers of the surrounding barbarians. They had schools in many parts of the country. Besides the school at Nisibis, there was founded at about the same time, by Aecius, also from Edessa, a school at Seleucia. It was revived in 500, and was in existence as late as 605. A school was also established at Dyrrhachium in A.D. 585. At Bagdad were two schools in 382, and two others were in its neighborhood. Schools existed besides at Terhana, Mahuza, Maraga, and Adiabene, in Assyria, and at Maraga, in Aderbijan. There were also schools in Elam, Persia, Kassan, and Arabia. The school at Nisibis was probably the largest at that time. It was of very great importance to the church, and even, to a great extent, was theological; but to the study of the Bible there was added in the schools generally the study of grammar, rhetoric, poetry, dialectics, arithmetic, geometry, music, astronomy, medicine, etc. (comp. Anderson, Oriental Churches, i. 169).

The first among the Nestorians who embraced Roman Catholicism was the metropolitan Sahaduna, who was sent by Siroes, king of Persia, as ambassador to the court of Byzantium, together with the newly-elected patriarch, Jesuab of Gadala, in 628. Shortly afterwards king Heraclius took a journey to Assyria, and invited many Nestorians and Monophysites to join the Romish Church. Sahaduna, declared free by patriarch Marenas, was excommunicated by his successor Jesuab of Adiabene for having three times openly professed Nestorianism, and as often recanted again. Their second reunion with the Romish Church was merely fictitious. Pope Innocent IV had sent some bishops with the legate Arnaud de Châtillon as exarch, to the three sees of the N.T. into Syria called him, denounced him and his adherents "Nestorian," as Raynaldus has it), who was a Nestorian. Arnaud answered with true Oriental devotion in 1247, and recommended to the pope the archbishop of Jerusalem and his brethren in Syria, adding to it a confession of faith drawn up by the archbishop of Nisibis, and signed by two other archbishops and three bishops, in which Mary was designated as μητέρα τοῦ Ἰησοῦ. This is also the nature of the works of the Jacobite patriarch Ignatius, and of the maphrian John. Pope Nicholas IV, in 1288, sent an address, together with a confession of faith, to patriarch Jabalah (1281–1317), to which his successor, Pope Martin V, added an epistle to the same effect. The Church of Rome is called the mother and teacher of all others, and the pope the head pastor of Christianity. From these expressions, and from the accompanying apparently orthodox confession of faith, Assemani concludes that Jabalah connected himself with the Romish Church. However true this is, in the same time may have been of Jabalah's individual opinions, they certainly exercised no influence over his followers. At the beginning of the 14th century the pope John XXII made a vigorous effort for the total suppression of the Nestorians. He sent letters to the patriarch of Jerusalem on the subject, and to the Copts, and to the Jews and to the Jacobites (who held the Euchyian heresy that there was but one nature in Christ) had exclusive establishments. In the pope's letter it is stated that both these sects "habentem ille distinctas ecclesias, in quibus
eriores et harenae hujusmodi, non sine magnis marum et muttornum allorum animarum periculis publice dogmatis." The patriarch is accordingly urged to exterminate them. On the other hand, during the pontificate of Eugenius IV, in 1445, a number of Nestorians residing in the island of Cyprus, together with their mother church of Aphrodus, received an invitation from the missionary archbishop Andreas to join the Romish Church. A more enduring reunion took place in the 16th century; the Nestorians were already greatly reduced in numbers, and, with the exception of the Christians of St. Thomas in India, were all restricted again within the limits of the mountains of Kurdistan. In the patriarchate had become hereditary, the nephew succeeding the uncle in that office. At the death of patriarch Simeon in 1551, his nephew, Bar Mana, with the aid of the only remaining metropolitan, Anaujesus, assumed the office. The three remaining bishops of Arbeta, Salma, and Adherijan (which in themselves were sufficient to elect a patriarch), assembled a number of priests, monks, etc., at Mosul, and elected John Sulaca, monk or abbot of the convent of Hormuzd, as patriarch. In order to give their patriarch an advantage over Simeon Denha Bar Mana, they sent him a letter from Baghdad, making him prisoner in Amid (Diarbekir), at the instigation of his rival, according to Assenani, and killed in prison. Another was at once appointed in his place, and matters continued thus for about one hundred years. Simeon Denha, however, sustained by those Nestorians who had remained true to their Church, did not surrender his office, but retained it until his death in 1559, when his adherents appointed another, who, as well as his successors after him, took the name of Elias. Among them was one who, at the request of pope Paul V, sent, in 1607 and 1609, orthodox confessions of faith to Rome, and in a synod held a short time before his death at Ain Karim, which took place between the three patriarchs. The union which resulted was, however, disturbed again by his successors. At last, in 1684, pope Innocent XI appointed a patriarch, who resided in Amid (Diarbekir), as his successors afterwards did, and took the name of Joseph, which they have retained. Since then there is a patriarch of the Chaldeans (Nestorians who have united with the Church of Rome) who is named Joseph, and resides at El-Kushmur, Mosul (in the convent of St. Hormisdas); while there is another for the Nestorians, called Simeon, who claims also to be the "patriarch of the Chaldeans." He resides in the mountains of Kirdestan, near Judith the Martyr, in the site of the ancient city of the Assyrians. He is the head of the Chaldean Catholic Church in the East—composed of converts from the Nestorians to the papacy—may be set down as not exceeding 20,000 souls, scattered from Diarbekir to the frontiers of Persia, and from the borders of Tyari to Bagdad—a district which once contained a vast Nestorian population. Many of these "Chaldeans" were at first a reform in their Church. The Chaldean portion of the Nestorians, i.e. the Romanized Nestorians, are governed by a patriarch and six bishops, but these have lately been pensioned by the Propaganda, the patriarch receiving a yearly salary of 20,000 piastres, or £200, and the bishops some varying from 2000 to 5000 piastres each. Through the influence of the French embassy in 1845, Mar Zeyda obtained a firman from Constantinople acknowledging him as patriarch of the Chaldeans. This was the first recognition by the Ottoman Porte of the new community. But the patriarch soon discovered that his functions were virtually exercised by the Propaganda. He grew weary of the interference of the Latin missionaries, and resisted their demands. Various charges were brought against him in consequence, and he was summoned to Rome to answer for himself. He chose rather to resign his office, and was succeeded in 1846 by Mar Yusef. In effect, the patriarchate of these Nestorians became no longer than a titular existence. They are a section of the Romish Church, their connection with which, while on the one hand it has introduced among them schools and education after the European manner, has on the other infected them with deeper superstitions; and the only benefit which they have derived from a change of name and communion is the promise of political protection from Rome, with occasional presents of ecclesiastical vestments, pictures of saints, and rosaries—"Gifts," says Mr. Badger, "which are not homemade, but brought down by the Mission to learn." It is worthy of note that, notwithstanding the number of the Church rituals, and the extent of country over which they are scattered, there is a striking uniformity in all the copies now in use both among the Nestorians and "Chaldeans," except where these latter have omitted parts of the original text, or altered it to suit their present conformity with Rome. The only way of accounting for this coincidence is afforded by the operation of that canon which made it obligatory upon all the metropolitans and bishops to appear in person or by proxy to testify of their faith and obedience before the catholicoe—that is, the patriarch. Yet it appears that there is no standard confession of faith—nothing entitled to be considered a symbol of the doctrines held by this community. See Chaldeans; Nestorian Monastics.

IV. The Christians of St. Thomas, in East India, are the Jews of Egypt; and their ancestry is the apostle Thomas, who is supposed to have preached the Christian Gospel in that country. It is probable also that during the persecution in Persia a number of Christians emigrated to India. A bishop and priest, it is said, went in 345 from Jerusalem to Malabar. Cosmas Indicopleustes in the 6th century, about 580 speaks of a Church in Malabar. At Calicuta there was a bishop ordained in Persia, and in the island of Ceylon a Church with a presbyter, deacon etc., also ordained in Persia, but these served simply for the Persian merchants in the island, the inhabitants not being Christians. About 570 Bud, the presbyter, visited the churches of India as a member of the sacred synod of the Patriarch of Constantinople; others who visited the Christians in this region, and who wrote, are Jerome, chief of the Nestorian missionaries; see Assen, Bibl. Or., iii, 219), but Jesusab of Adiabene (patriarch, 800-860) complained in his letters to Simeon, the metropolitan of Persia, that through his fault and that of his predecessors the churches of India were in a very bad state (it was patriarch Timothaeus who first gave them a metropolitan see below)), and that Christianity had almost died out in Korsassan. He commanded the readers no longer to obey their bishop, who was deposed by a synod of Seleucia, and to elect a new one to be sent to him for ordination. It is probable that Christianity spread thence into China, and a Chinese patriarch of the Chaldean church in the East is mentioned. The Nestorians of the East—composed of converts from the Nestorians to the papacy—may be set down as not exceeding 20,000 souls, scattered from Diarbekir to the frontiers of Persia, and from the borders of Tyari to Bagdad—a district which once contained a vast Nestorian population. Many of these "Chaldeans" were at first a reform in their Church. The Chaldean portion of the Nestorians, i.e. the Romanized Nestorians, are governed by a patriarch and six bishops, but these have lately been pensioned by the Propaganda, the patriarch receiving a yearly salary of 20,000 piastres, or £200, and the bishops some varying from 2000 to 5000 piastres each. Through the influence of the French embassy in 1845, Mar Zeyda obtained a firman from Constantinople acknowledging him as patriarch of the Chaldeans. This was the first recognition by the Ottoman Porte of the new community. But the patriarch soon discovered that his functions were virtually exercised by the Propaganda. He grew weary of the interference of the Latin missionaries, and resisted their demands. Various charges were brought against him in consequence, and he was summoned to Rome to answer for himself. He chose rather to resign his office, and was succeeded in 1846 by Mar Yusef. In effect, the patriarchate of these Nestorians became no longer than a titular existence. They are a section of the Romish Church, their connection with which, while on the one hand it has introduced among them schools and education after the European manner, has on the other infected them with deeper superstitions; and the only benefit which they have derived from a change of name and communion is the promise of political protection from Rome, with occasional presents of ecclesiastical vestments, pictures of saints, and rosaries—"Gifts," says Mr. Badger, "which are not homemade, but brought down by the Mission to learn." It is worthy of note that, notwithstanding the number of the Church rituals, and the extent of country over which they are scattered, there is a striking uniformity in all the copies now in use both among the Nestorians and "Chaldeans," except where these latter have omitted parts of the original text, or altered it to suit their present conformity with Rome. The only way of accounting for this coincidence is afforded by the operation of that canon which made it obligatory upon all the metropolitans and bishops to appear in person or by proxy to testify of their faith and obedience before the catholicoe—that is, the patriarch. Yet it appears that there is no standard confession of faith—nothing entitled to be considered a symbol of the doctrines held by this community. See Chaldeans; Nestorian Monastics.

But to return to the Nestorians of St. Thomas. They first attainted to a metropolitaneate in the 8th century. The first incumbent of the office was patriarch Timothaeus (A.D. 775-820), and since the patriarchs have been immediately appointed by the patriarchs. They secured from the different governments great privileges, which date chiefly from the beginning of the 9th century. This and their great increase in numbers led them to establish a state and to elect a king; after the death of which their little kingdom fell into subjection to the emperor of Cochin-China. In consequence of the quarrels of the Indian princes with each other—quarrels of which the Mohammedans knew how to take advantage—they were gradually much oppressed, and in 1602 they were induced to offer the crown to the repressive power of the Portuguese, who succeeded in obtaining it. Their connection with the patriarch of the Nestorians appears to have soon come to an end. About 1120-1180 their spiritual chief is said to have gone to Constantin
nople for the purpose of being made bishop, and thence to Rome. In after-times the Indian churches were reduced to a very small number, only one deacon remaining, who held all ecclesiastical offices. On this account Georgius and Josephus were sent in 1490 to the Nestorian patriarch Simeon of Rome, in order to give them two bishops. They were both ordained priests, and the two monks, Thomas and John, sent back with them as bishops. John remained in India, settling at Cranganor, but Thomas soon went back again. Patriarch Elias (+ 1502) instituted three monks, Jaballah as the metropolitan, Jacob and Denha as bishops, and sent them with Thomas to India. They found Mar John still alive, and stated that they discovered 30,000 Christian families, distributed in twenty provinces; later Portuguese authorities restrict the number to 16,000 families. These gradually declined, being oppressed in many ways, and were thus led to place themselves under the protection of Portugal, offering to recognize king Emmanuel as their only ruler. This led to their ruin, for they were then treated worse than ever by the native princes, and afterwards oppressed by the Portuguese. Papal emissaries—namely, Jesuits—were sent to them, who sought to subject them to the pope by violence and cunning. The archbishop of Goa, Alexis Menes (q. v.), obliged them to recognize the decisions of the synod held in 1599 at Diamper, so that but few communities, and those lost in the mountains, remained true to the faith of their forefathers (comp. Marsden, Hist. of Christian Churches and Sects, p. 99).

Two centuries had elapsed without any particular information concerning the Nestorian Christians in the interior of India. It was doubted by many if they were still in existence, when they were visited by Dr. Claudius Buchanan in 1807. He found in the neighborhood of Travancore the Syrian metropolitan and his clergy. They were much depressed, but they still numbered fifty-five churches. They made use of the liturgy of Antioch, in the Syrian language. They had many old and valuable copies of the Scriptures. One of these, a Syrian manuscript of high antiquity, they presented to Dr. Buchanan, by whom it was placed in the university library at Cambridge. He describes the doctrines of the Syrian Christians as few in number, but pure, and agreeing in essential points with those of the Church of England. There were then, he computed, 200,000 Syrian Christians in the south of India, besides the Indians who speak the Malabar language, and are subject to the Church of Rome. Dr. Buchanan thus describes the appearance of Mar Dionysius the metropolitan: "He was dressed in a vestment of dark-red silk, a large golden cross hung from his neck, and his venerable beard reached below his girdle. On public occasions he wears the episcopal mitre, and a muslin robe is thrown over his under garments; and in his hand he bears the crozier or pastoral staff. He is a man of highly respectable character in his Church; eminent for his piety, and for the attention he devotes to his sacred functions." Later visitors speak in less glowing terms of this interesting people. Their general ignorance seems to have been much greater than Dr. Buchanan was led to suppose, and they observe superstitions with which he does not appear to have been made acquainted. But in 1853, almost simultaneously with the restoration of the patriarchate of the Chaldeans, those subject to the Romish Church threw off the yoke out of hatred towards the Jesuits. The barefooted Barmenites have, in recent times, been trying with more zeal than success to bring them again into the Romish communion. The Christians of St. Thomas are still considered to number about 70,000, forming an independent state under the protectorate of Great Britain, and governed by their priests and elders. They honor the memory of St. Thomas and Nestorius in their Syrian liturgy, and adhere to the Nestorian patriarch. See CHURCH OF ST. THOMAS.

Besides these Nestorians, there are yet some 50,000 Jacobites around the coasts of Malabar and Travancore. These appear to have gone there only since the 16th century, perhaps on account of the above-mentioned reaction against Romishism. The Jacobite patriarch sent Gregory of Jerusalem as metropolitan to India; the office of metropolitan was afterwards held successively by Andreas, Basilius, John, and Thomas, who in 1769 and 1770 wrote to the Jacobite patriarch Ignatius. In his last letter, among other information, he states that in 1708 rasteril of Nincheri, who was sent to him as metropolitan by patriarch Elias, and whom he received because he recognised two natures and two persons in Christ, had since been discovered by him to be a heretic (Nestorian). Anterior conversions to Jacobitism as well as the existence of anterior Jacobite communities in India appear doubtful. To this must be added that there are said to be four Jacobite bishops in India, one of whom resides in Cochin-China. See JACOBITES.

V. We now return to the Nestorians of Persia and the neighboring countries. Like the Christians of St. Thomas, these too had perished from the knowledge of European Christendom, and their existence had been almost forgotten when the missionary enterprise of the
American Protestant churches again brought them into notice. Attention was particularly called to them in 1830 by Messrs. Smith and Dwight, missionaries of the American Board of Commissioners for Foreign Missions, who, while on an exploring missionary tour, visited the Nestorians. They embodied their observations in a publication entitled "Researches. From this source and other works of Badger (below quoted), and Dwight ("Researches", 1830), we derive the following statements: Dividing the Turkish from the Persian empire is a wild range of mountains, now called Kūrdoistan, which includes within its boundaries portions of the ancient Assyria, Media, and Armenia. In the most inaccessible parts of this district the Nestorians dwell, about 100,000 strong. They are still governed by "meliks," or kings, chosen from their own people by the popular voice irregularly expressed. The office of these chiefs is usually hereditary in the same family. The Turkish government, however, is making vigorous efforts, through the agency of the neighboring Kurds, to reduce these independent Nestorians to a state of vassalage. Dwelling in these mountainous recesses, their independence is dearly purchased; they find it difficult to obtain a bare subsistence, and many of them are miserably poor; numbers travel abroad and beg as a profession. Their fare is coarse and their manners rude. During the summer many of them descend to the plains of Orlūmah, at the foot of the Kūrdoistan range, and here a considerable body of Nestorian Christians, estimated at about 40,000, have fixed their residence. They have a tradition that their ancestors came down from the mountains to live on the plain five or six hundred years ago. It is probable that they were entirely swept away from this province during the devastations of Timurids, but there are monuments of their residence here at an earlier period. The oldest mosque in the city of Orlūmah was once a Christian church. The Nestorians of the plain partake in their manner of the majority of the Persians, and they themselves denominate their fellow-Christians, the mountainers, wild men. Though suffering oppression and extortion from the Mohammedans, their circumstances are tolerable for a people in bondage. The country is fertile, and the produce among them is surrounded with plenty. Their character is bold, generous, kind, and artless. Oppression has not broken their spirit; they are still brave and restless, and, so far as a subject people can be, independent. The Nestorians of the mountains, with all their rudeness and even ferocity, possess the same traits of kindness and generosity. The hungry man will divide his last morsel of bread with a stranger, or even with a foe. The Nestorians of the plain, as a matter of calculation, lay in liberal stores for their poor countrymen of Kūrdoistan, when, pinched with want, they come down in the winter to seek subsistence. In their language, as in Arabic, the missionaries found no word for idleness, and there is no need of it, for the thing itself is wanting. The house consists of one large room, and is generally occupied by several generations. In that one room all the work of the family is performed. There they eat, and there they sleep. The beds consist of three articles—a thick comforter filled with wool or cotton beneath, a pillow, and one heavy quilt for covering. On rising they "take up their beds" and pile them on a wooden frame, and spread them down again at night. The room is lighted by an opening in the roof, which also serves for a chimney; though, of course, in a very imperfect manner, as the inside of every dwelling that has stood for any length of time bears witness. The upper part of the walls and the under surface of the roof—we can hardly call it ceiling—fairly glitter, as if they had been painted black and varnished, and all articles of clothing, books, and household utensils are saturated with the smell of creosote. The floor, like the walls, is of earth, covered in part with coarse straw mats and pieces of carpeting; and the flat roof, of the same material, rests on a layer of sticks, supported by large beams; the mass above, however, often sinks through, and sometimes during a heavy rain assumes the form of a shower of mud. Bad as all this may seem, the houses are still worse in the mountain districts, such as Gawai. There they are half under ground, made of cobble stones laid up against the slanting sides of the excavation, and covered by a conical roof with a hole in the centre. They contain, besides the family, all the implements of husbandry, the cattle, and the flocks. These last occupy "the sides of the house" (1 Sam. xxiv, 3), and stand facing the "decanas," or raised place in the centre, which is devoted to the family. As wood is scarce in the mountains, and the climate severe, the animal heat of the cattle is a substitute for fuel, except as sun-baked cakes of manure are used once a day for cooking, as is the practice also on the plain. In such houses the buffaloes sometimes break loose and fight furiously, and instances are not rare when they knock down the posts on which the roof rests, and thus bury all in one common ruin. The influence of such family arrangements, even in the most favored villages of the plain, on manners and morality need not be told. It is equally evident that in such circumstances personal tidiness is impossible, though few in our favored land have any idea of the extent of such untidiness. The total number of the Nestorian Christians, exclusive of the Jacobites or monophysite Syrians, and the Chaldeans or converts to the Roman faith, was computed by the American missionaries, in
The patriarch of the Nestorian Church (who is always chosen from the same family, and invariably takes the name of Shamun or Simon) resides at Diz, a village in one of the most inaccessible parts of the Kürdish mountains. In early times, as we have seen, the patriarch resided at Seleucia; after A.D. 752 at Bagdad; later he established himself at Elkash. Since the quarrel of the rival candidates and the defection of the Chaldeans to Rome, about the close of the 16th century, the patriarch has taken refuge in the mountains. He professes only to wield spiritual power, but among the mountaineers his word is law, both in matters spiritual and temporal. Among the Nestorians of Ourūmiah his power is more limited; he seldom ventures to come among them; and being beyond the reach of the full exercise of his authority, the people have become lax in their regard for his spiritual prerogatives; still they look up to him with respect and veneration. The patriarch does not receive the imposition of hands at his consecration, since it cannot be performed by his inferiors; but all orders of the clergy, from the deacon to the metropolitan, are ordained by him with the imposition of hands. Under the Nestorian patriarch are eighteen bishops, four of whom reside in the province of Ourūmiah. A diocese varies in size from a single village to twenty or thirty. The bishops ordain the inferior clergy, make annual visitations, and superintend the diocese. Besides deacons and priests, there are archdeacons, subdeacons, and readers. The office of metran, or metropolitan, is distinct from that of the patriarch, although, it is true, they are often united in the same person. The canons of the Nestorian Church require celibacy, but only of the episcopal orders. They also demand from these higher ecclesiastical orders abstinence from animal food, even from their infancy. The mother of the candidate for the episcopate or patriarchate must observe the same abstinence while she nurses the infant. The Nestorian bishops do not defend these practices from Scripture, but only as matters of propriety (this restriction, however, is not always observed, and was violated only recently by bishop Mar Yohann in 1859). Neither celibacy nor abstinence from animal food are required of the inferior clergy, nor do monasteries or convents exist among the Nestorians proper. The clergy are usually poor. They cultivate the ground, or teach a few scholars, or gain a small pitance by marriage fees and small contributions. It can be no matter of surprise that some of them can scarcely read. When visiting the American missionaries in 1863, a majority of them could merely chant their devotions in the ancient Syriac, and even some of the bishops were in the same predicament. The Syriac Bible has since been distributed freely among them, and the state of general knowledge is improved. The patriarch receives an annual contribution, collected for him by the bishops; it seldom exceeds three hundred dollars. The Romish agents leave no measures untried, of force or fraud, to seduce the Nestorian Church and even its patriarchs. A few years ago a Jesuit offered to the Nestorian patriarch ten thousand dollars, it is said, on condition that he would enjoin on the people the celebration of the Mass. The answer in the words that Simon Peter once addressed to Simon Magnus, "Thy money perish with thee." A more adroit overture was made afterwards, though with as little success, in the offer to canonize Nestorius.

Religion, in the proper sense, is in a low condition. The vice of lying is almost universal among clergy and laity; intemperance is very prevalent. The Sunday is to a great extent regarded only as a holiday, and profligacy and some other vices are very common. Still a venerable remnant exists of a primitive Church, founded, as they invariably maintain, not by Nestorius, but in apostolic times by Thomas the Apostle (q.v.). It is beset with dangers on every side. The artifices of the Jesuits are unceasing and sometimes successful. Recently a patriarch was brought over by violence to the Church of Rome. On the other hand, the Mohammedans attempt to proselyte. Nestorian girls are occasionally kidnapped or decoyed away, and become the wives of the followers of the false prophet. Some hardened culprits apostatize for the sake of escaping punishment, but these are all the triumphs of which the Mohammedans can boast.

The sword of the Moslem has not spared the Nestorians. They are grievously oppressed and ground down with taxes and impositions. The Nestorians are taxed without aike by religion and nationality as victims of oppression. However great their wrongs, they can hope for little redress, for a distant court shares in the plunder taken from them, and believes its own officials rather than the despised rayahs whom they oppress. Even when foreign intervention favors some edict in their favor, these same officials, in distant Ourūmiah, are at no loss to evade its demands. The Nestorian is not allowed a place in the bazaar; he cannot engage in commerce. And in the mechanic arts he cannot aspire higher than the position of a mason or carpenter, which, of course, is not to be compared to the standing of the same trades among us. When our missionaries went to Ourūmiah a decent garment on a Nestorian was safe only as it had an outer covering of rage to hide it. The lofty spirit of the mountaineers in 1848 ventured to rebel, and an indiscriminate massacre was the penalty. "What can we do?" said they to the Washingtonians who incited the cause of their rebellion; "if we descend into the plains, build villages, plant vineyards, and till the barren soil, we are so overwhelmed with taxation and impositions of every kind that our labor, though blessed of God, is of no profit to ourselves. If we take refuge in the mountains, even here we are lia-
NELSIEI. 969 NESTORIANS

ble every year to be hunted like partridges. Such is our lot; but God is merciful." Mr. Badger, who visited the Kûrûs, on behalf of the Society for Promoting Christian Knowledge, relates that as he passed through Mar- deh, which is situated on the summit of the mountain range, in 1848, he saw in the marketplace several human heads rolling in the dust which had been brought in as trophies by the soldiers of Mohammed Pasha. "The next day," he says, "I saw a large number of horses, asses, mules, and even cows, laden with booty taken from the same people, the Kûrûs of a neighboring district. Among these there were loads of human heads, and a number of prisoners, some of whom were to be impaled on the morrow. The collector of taxes in the district had embezzled a sum of money, and the Kûrûs were ordered to make good the deficiency. As they were unable or unwilling to comply, a troop of Albanians was sent against them, who, finding the refractory villages, massacred about a hundred and fifty persons, and committed other excesses too horrible to relate. Such is Ottoman rule."

The creed and practice of the Nestorians are more simple and more scriptural than those of the Greek or any other Oriental Church. They entertain the deepest abhorrence of image worship, surricular confession, and purgatory. Their doctrinal tenets lie under suspicion; yet the American missionaries do not hesitate to vouch for their correctness. Mr. Perkins was sent out by the American Board of Foreign Missions, and lived among them for some years in 1848. He says: "On the momentous subject of the divinity of Christ," he says, "in relation to which the charge of heresy is so violently thrown upon them by the papal and other Oriental sects, their belief is orthodox and scriptural." Mr. Badger also judges favorably of their orthodoxy. He thinks that, "though not always disposed with respect to the language in which they express their belief with regard to the second person in the Trinity, the Nestorians hold, nevertheless, in effect the true Catholic doctrine as it is revealed in Holy Scripture, and as it was set forth by the Council of Ephesus."

Several writers have lately made English translations of the Nestorian rituals. These are so overlaid with Oriental figure and sentiment that to ascertain their exact meaning on the points at issue is, however, by no means an easy task. We make a single extract from a service for the Holy Nativity: "Blessed art thou, O Virgin, daughter of David. Since in thee all the prophecies of the ancients have been fulfilled and in the race of prophecy has found rest; for after a wonderful manner thou didst conceive as a virgin without marriage, and in a wonderful way thou didst bring forth the Messiah, the Son of God; as it is written, the Holy Spirit formed him in thee, and the Word dwelt in him by union, without conversion or confusion, the natures continuing to subsist unchanged, and the persons also, by their essential attributes, the divinity and humanity subsisting in one person of filiation. For the Lord is one, the power is one, the denomination ruling over all is one, and he is the ruler and disposer of all. And he who is the object of our desire, and we ought ever to thank and worship, saying, Blessed is the righteous One who clothed himself with Adam's [humanity], and made him Lord in heaven and earth." (Badger, ii, 34). But though the ritual does not clearly develop the Christological dogmas, it is certain that the Nestorian Church is the only body outside of Protestantism (excepting the Moravians and Waldensians) which acknowledges, as do the churches which appeared at the Reformation, or came out of these, the supreme authority of the Holy Scriptures, and holds no doctrine or practice essential to salvation which may not be proved from Holy Writ. Indeed, the renowned in which the Nestorians hold the inspired volume has made them the fortunate possessors of some of the most ancient and valuable MSS. in existence. Their ancient language was the Syriac, of which the modern vernacular is a dialect, corrupted by contractions and inversions and a great number of Persian and Turkish words. Among their books are some very ancient copies of the Scriptures in Syriac. Several of these are at least six hundred years old. They also possess a copy of the N.T. in Syriac which is to be reckoned very ancient. These copies are regarded by them with much veneration, and are used with great care; they are wrapped in several covers, and when taken into the hands are as reverently kissed as the Jews do their MSS. of the O.T. used for synagogal service. It must not be supposed, however, that the Nestorian missions have large numbers of MSS. Dr. Grant found in the library of the patriarch not more than sixty volumes, all in manuscript, and a part of these were duplicates. Indeed, they have no works of value, except on devotion- al subjects. Once an educated people, the Nestorians are now perfectly illiterate. Very little attempt has been made to reduce the vernacular language to writing, and the printing-press was unknown to them until the advent of the American missionaries. The only books they possess are the Church rituals; to be able to read these, and to write fairly, is considered a high education, and is all that is desired, even from candidates for holy orders. Except the priests, few or none can read; and even of these few but few do more than merely repeat their devotions in an unknown tongue, while neither they nor their hearers know anything of the meaning. The N. T. is read in the old ecclesiastical offices conducted in the Syriac. "Of course," says Mr. Badger, "the use of the common language in the services conducted in the church is unknown, and it is read withal in such a manner as to be almost unintelligible. The laity are regular in attendance at church, where they hear a liturgy of great beauty, partly chanted and partly mumbled. Certain prayers are familiar to all ranks, and persons de- claredly interested are often sent to a corner of the church to pray in secret. There is no sermon to arouse reflection or to sustain faith, by impressing the conscience and the understanding; no lecture to ex- pound the difficulties of Scripture. Thus the main body of the Nestorians are only nominal Christians, and such they must probably remain until more favored nations come to their relief. True, their religious principles are more simple and scriptural than those of other Ori- ental churches, and they are not guilty of so many corrupt practices as the Papal and Greek churches. But the life and power of Christianity are departed in a large measure, and scarcely a symptom of spiritual vi- gour is to be found. And when the Nestorians first met them. The existence of such a people for seventeen hundred years, among hostile nations and circumstances so disastrous, is a matter of astonish- ment; and their own preservation, too, of so much of the pure doctrine of the Gospel as they still retain is remarkable. Their liturgical books recognize seven sacraments, but confession is infrequent, if not altogether disused. Marriage is dissoluble by the sentence of the patriarch; communion is administered in both kinds; and although the language of the liturgy plainly implies the belief of transubstantiation, yet it is said not to the people of God, but to Christ alone. And when first met them." (Badger, ii, 34). But though the ritual does not clearly develop the Christological dogmas, it is certain that the Nestorian Church is the only body outside of Protestantism (excepting the Moravians and Waldensians) which acknowledges, as do the churches which appeared at the Reformation, or came out of these, the supreme authority of the Holy Scriptures, and holds no doctrine or practice essential to salvation which may not be proved from Holy Writ. Indeed, the renovation in which the Nestorians hold the inspired volume has made them the fortunate possessors of some of the most ancient and valuable MSS. in existence. Their ancient language was the Syriac, of which the modern vernacular

VI.—81*
priests carry with them a small silver cross, which is
often kissed by the people. They are very scrupulous
respecting their religious ceremonies and fasts. Many
Nestorians would rather die than violate their peri-
dodical fasts, yet are they very far from Protestant in
their ideas concerning the mystery of life; even their most in-
eligent ecclesiastics seem to have hardly any idea of
the meaning of regeneration. Indeed, the Nestorians, take
them as a whole class, are ignorant and superstitious;
lying, profanity, and intemperance are common vices.

VI. Missions among the Nestorians.— Probably no
Christian mission in modern times has been so satis-
factorily conducted, or so decidedly happy in its in-
fluences and results, as that among the Nestorians, in
all its branches. British and American missionaries
have labored among the Nestorians since the year 1638.
The missionaries sent forth by the American Board of
Commissioners for Foreign Missions were the first of
Protestant missionaries to occupy the field, and it is
generally conceded that their labors have met thus
far with a success beyond the most sanguine expecta-
tions, proving clearly that these efforts for the evangeli-
zation of the Nestorians are owned and blessed by the
great Head of the Church. The first missionary of the
American Board of Commissioners for Foreign Missions
was Mr. Justin Perkins, who was taken from Amherst
College, where he was teaching at the time of this ap-
pointment. In the instructions given to him the main
object of the mission was defined to be to bring about a
change in the religious views of the Nestorians through
the grace of God, to exert a commanding influence
in the spiritual regeneration of Asia.” Con-
sidering the past history of Nestorianism, its present
state, and the character of the people attached to it, it
was hoped that, brought again to a fuller knowledge of
the truth, and to feel the regenerating and sanctifying
power of truth in the spirit of the people, the members of
that belief would again become, not only themselves true disciples of Christ and heirs of
life, but efficient laborers in the great work of building up
Christ’s kingdom throughout the world. Mrs. Perkins
joined in the work, and together they studied the lan-
guage and customs of the people whom they were to serve
until, in 1835, Dr. Grant, a physician, of Ulicca, N. Y.,
joined them. Dr. Grant’s professional character served
to secure the favor of the Persian governor, and the Nesto-
rian bishops and priests at once gave them their cor-
dial co-operation in the prosecution of their missionary
labors. On the return of the missionary, as well as on the
arrival of his friends in America, he was stationed with
them in a necessary work of instruction and impro-
vement among the people. The first thing which
these excellent men attempted, after having obtained a
mastery of the language, ancient and modern, was to
commence the establishment of schools. One, for boys,
was opened in 1836; it began in a cellar, with seven
pupils. A school for girls was opened in 1838. It com-
enced with four scholars, taught by Mrs. Dr. Grant.
As the result of her exertions, it is said that “hers was
the privilege of creating such a public sentiment in
favor of the education of woman that her successors
have her as Head of the Church. The first missionary of the
American Board of Commissioners for Foreign Mis-

preached over by the late excellent professor Stoddard
for several years, has been blessed in an extraordinary
manner. Of the many young men who may be con-
sidered as graduates, more than two hundred and thir-
teen left the seminary hopefully thorough, and the only
other who did not complete a full course of studies
not a few left it giving good evidence of piety; and
better than all, many of the young men who left the
seminary are now faithful preachers of the Gospel, effi-
cient teachers in the village schools, or otherwise useful
Christians.

In 1840 the first printing-press was set up in Orm-
iah by the ingenious and efficient missionary printer,
Mr. Breath, who died in 1861. The Nestorians, who
formerly had not printed copies of the sacred Scriptures,
or any part of them, now have the Bible in both the
ancient and vernacular languages, printed in parallel
columns. Through the exertions of the missionaries
they now have also quite a literature, embracing many
volumes of religious books and tracts, together with
spelling-books, geographies, arithmetics, etc. A month-
ly periodical, called The Rays of Light, is published,
and read with much delight by the people; and there
are now publishing two medical periodicals, entitled
Night of Toll and Signet Ring. In all, eleven thou-
sand volumes have been printed at the mission press.
Native printers and bookbinders have been so well
trained that since the death of Mr. Breath they have
progressed without American help in this direction.

The work of laborers is a great deal more than the
good work of imparting the Gospel by oral in-
struction in Ormiah, and in the villages far and wide.
Until 1868 all plans for the forming of separate church-
es were opposed; the missionaries therefore formed no
churches, wisely preferring to promote the regenera-
tion of the national church—a good object and noble
in the Spirit, with little or no thought of the
injury done by this movement to the American mission
work is the delay which it has caused in bringing the
independent societies into self-supporting condition.
There are no doubt many others who are truly pious,
though they receive the sacraments in the national
churches. Indeed, the missionaries preach much in the
national churches, and enjoy the confidence of the pa-
triarch and of many priests. It can certainly be assert-
ed that the Gospel is now preached among the Nestorian
people not by the missionaries only. When the mission
was commenced the ecclesiastics were not preachers,
but were employed in making arrangements with the
inhabitants. The present work has been to introduce
services. But bishops and priests have been pupils in the
schools, and bishops and priests have felt the force
of truth—have become new creatures in Christ Jesus,
and are now, in some cases, zealous and impressive
preachers. And some young men who have been edu-
cated at the seminary, who have been devoted to
the Gospel, and are now, in the mountain districts, as zealous
and able evangelists. Take all it in all, the influence of the mission upon the
NESTORIANS

condition and morals of the people has been most salu-
tary. They have readily imbibed the spirit of Chris-
tian civilization, and faithfully observed all the precepts of
the Gospel. The influence of spiritual religion upon
the pupils and their friends is manifest in daily
walks in life, and their example is making a deep
impression on those who have not yet been made objects
of religious instruction. The schools that have been
organized in the villages now help to support them-
2 selves; the mission having made it a rule to furnish no
teacher, except in new villages, where a part of the
support was not assumed by the people. In the year
1861 upwards of five hundred dollars were contributed
for the support of missions, and since then the sum has
considerably increased. The missionary zeal is grow-
ing constantly, and the Nestorians are anxious to be-
come the bearers of the truth to other Asiatic peoples.
At the annual convention of helpers and representatives
of the Nestorian churches held in Oct., 1867, a demand
was made for special mission fields; and in 1870 the
mission resolved that they considered it a duty urged
upon them to embrace at once within their efforts the
Armenians and the Musulman sects of Central Persia;
and they expressed the hope that the Board would
heartily endorse their action, and help them to carry it
out without delay. The Board approving such a step,
the Nestorians have since labored among the Armenians
in Russia, and the same people at Tabriz, Hamadan (the
ancient Ezbatana), Teheran, Ispahan, in Persia, and the
numerous villages in the intervening regions—descend-
ants, to a great extent, of Armenians carried captive,
in 1606, from the regions of Ararat by shah Abbas the
Great.

Since the autumn of 1870 the Nestorian mission has
passed from the control of the American Board of Com-
misions for Foreign Missions to the care of the Pres-
byterian Board of Foreign Missions, and it is expected
that the work so gloriously begun will be prosecuted by
that body with equal zeal and success. This mission,
being on the western borders of Persia and the eastern
borders of Turkey, in the very heart of the Moham-
medan world, and on the dividing line of its two great
sects, the Sânis and Shítis, certainly occupies a position
of transcendant importance. We insert below a table
from Dr. Anderson's work on Oriental Missions (ii,
498-9), showing the laborers employed, etc.

VII. Probable Origin of the Nestorian People.—We
have seen above that the Nestorians claim to have

MISSION TO THE NESTORIANS.

The asterisk (*) placed before a name denotes that the person is deceased. When placed before a date, in the right hand column, it denotes that the person died at the time there indicated, and in the field.
been early instructed in Christian truths. Dr. Grant, a
learned American missionary, has recently put forth an
argument to show that the Nestorians are the descen-
dants of the lost tribes of Israel. He cites as proof of his
theory their Scriptural connection, and also the frequecy
of the prophetic names which occur in the Old Testament,
the peculiarities of their customs, and other points of re-
ssemblance. His proofs are not regarded as satisfactory
by his co-missionaries, nor by Mr. Badger, who contests
his facts. It is a question, however, of detail and re-
search, and we can only hope that the subject may receive
a thorough defence in a book, and we are glad to refer to
Dr. Grant's and Mr. Badger's writings. One service of
the Nestorian Church certainly partsakes much more of
a Jewish than a Christian character; this is a commemo-
ration for the dead celebrated in all the mountain vil-
lages once a year, on some Saturday in the month of
October. For some days previous to the festival each
family prepares its offerings. These consist of lambs
and bread, which are carried into the church-yard. Af-
ter the people have partaken of the holy eucharist, the
priest goes out, cuts several locks of wool off the fleas,
and throws them into a censer. While a deacon swings
this and frо in the presence of the priest the priest
recites an anthem, in which the obligation is offered to
the Lord, and prayers are made both for the living and
the dead. The service concluded, the lambs and the
bread are divided among the company. Many come from
distant villages to join in the commemoration.

to a lamb and some bread as well as
other provisions among the poor, after the death
of their relations, hoping that the offerings will, in
some way, profit the souls of the departed. Dr. Grant men-
tion another sacrifice which is offered occasionally as a
thank-offering for blessings received. A lamb is slain
before the door, and when the first drop of the blood is
put on the door and lintel; the right shoulder of the
beast belong to the officiating priest, and the skin is
also given to the priest as was required in the law of
burnt offerings (Lev. vii); but these strange customs
may have been derived from the Mohammedans, who often
sacrifice a lamb with the same intention at the doors of
their shrines throughout Turkey, and sprinkle the
building with the blood, after which the animal is
distributed among the people of the village. As might be
expected in a people so ignorant, the Nestorians are
superstitious. They observe many fasts. Their ritual
contains offices for the purification of those who have
touched dead bodies, and a special service for the purifi-
cation of unclean cisterns and fountains, some parts of
which are extremely beautiful. The Nestorians
place a high value on charms and talismans, and the
clergy are generally the authors of these profane and
abusive effusions which they transcribe and sell to the
people.

VIII. Literature.—The works extant on the history of
Nestorianism are very numerous. In Malcom's The-
ocological Index is a long list of such works; the most im-
portant are, Doucin, Histoire du Nestorianisme (1689);
Frauzius (Northolti), Dissertationes: Le Quien, Oriens Chrestomathia; Silloton, Histoire des Nestorians. In
the foregoing account, besides the usual materials, the
Breviarium of Liberatus, who was archdeacon of Carthage, writ cit. A.D. 564, and
the works of Marius Mercator, already referred to under Nestorius (q.v.), have been largely relied upon.
On the Nestorian side the nearest approach to a work
of Euthély is Assemani, De Syria Nestorica, in his Bibliotheca Orientalis (Rom. 1719-1728 sq.), tom. iii,
pt. ii (quoted by Dr. Hey, bk. iv, art. ii, § 9), gives a catalogue of
198 writers, with more in an appendix, which are called
Syrian Nestorian writers: "but the New Testament is
our book so reckoned, and Repomologicus the author."

513; Meth. Quart. Rev. July, 1854, p. 462; 1848, p. 479;
1849, p. 467.

Nestorius, a celebrated theologian of the 5th cen-
tury, noted as the founder of the Nestorians (q. v.)—an
important and early sect of Christians—was born,
according to the ecclesiastical historian Socrates, who
has written his life, at Germainica, a city in Northern
Syria, in the time of the closing of the 5th century. He
received his theological education, it is supposed under
the Monophysite Theodore of Mopsuestia. Nestorius
was ordained to the priesthood at Antioch, where he
was made a presbyter, and where he "esteemed and
celebrated," says Neander, "on account of the rigid
austerity of his life and the impressive fervor of his
preaching." The popularity of his pulpit gifts attrac-
ted to him large and attentive audiences, and he be-
came a great favorite with the people generally.
The Church—which was then greatly divided on the
doctrine of the motherhood of Mary, some holding her to
be the mother of God, others regarding her simply in
the human character, and the latter regarding the very
as the man eminently fit by his sound, practical judg-
ment and his vast theological learning for a clearing
process in this mystifying dogma; and so general was
the opinion that Nestorius could unite all Christian
believers of the East that the people hailed with great
satisfaction and joy his elevation (A.D. 428) to the
archbishopric of Constantinople, which had been sought
for by more prominent ecclesiastics, whom the emperor
had passed by because of their rivalry. In Constan-
tinople Nestorius was looked to as a second Chrysost-
tom, and a restorer of the honor of his great predecessor
against the Church of Rome. But Nestorius, however,
seemed to have been Nestorius promoted to this elevated
and responsible position than he began to display an intem-
perate zeal, which partook more of the bigotry of the
monk than the general tolerant spirit which was be-
coming his character and position as a minister of
Christ. His very antagonists afterward directed their
charges were directed towards the extinction of heretics, among Arians and Novatians, Quarto-
decimans and Macedonians, who at that time abounded
in the capital of the East and its subordinate dioceses.
Indeed Nestorius's course had been foreshadowed in his
inaugural discourse, in which, addressing the emperor
Theodosius, he gave expression to these violent expres-
sions: "Give me a country purged of all these heretics, and in exchange for it I will give
you heaven. Help me to subdue the heretics, and I

Digitized by Google
will help you to conquer the Persians." Nor did his fury against the heretics find vent only in words; he proceeded to deeds of persecution which, by exciting tumult among the people, led to the effusion of blood. The Pelagians alone, with whose doctrine of free-will (but not of original sin) he sympathized, he treated indifferently, indeed, as others treated himself. Cæcilius and other banished leaders of that party, interceding for them in 429 with the emperor and with the pope Celestine, though, on account of the very unfavorable reports concerning Pelagianism which were spread by the layman Marius Mercator, then living in Constantinople, his friends in Italy and in Constantinople (Schaaff, Ch. Hist. iii, 716). While thus lustily engaged in the persecution of others, Nestorius raised up even among the orthodox party in the Church a numerous host of enemies, who were not long in accusing him also of heresy. Having been trained in the strict Antiochian doctrine as to the clear distinction between the divine and human natures of Christ, he and his friend Anastasius, whom he had brought with him from Antioch, could not fail to disapprove of some expressions then current in the Church, which evidently proceeded upon confused notions in respect to the two natures of Christ. One expression in particular, the inclusion of the term of Virgin of the Virgin Mary, more especially taken in connection with the excessive veneration of the Virgin which had begun to prevail, called forth the strongest reprobation on the part of Nestorius. Along with his friend Anastasius he took occasion in his public discourses to state, in the most emphatic manner, his objections to the certainly very bold and equivocal expression mother of God, which had already been sometimes applied to the Virgin Mary by Origen, Alexander of Alexandria, Athanasius, Basil, and others, and which, after the Arian controversy, and with the growth of the worship of Mary, had acquired special legal and popular sanction (comp. Schaaff, Ch. Hist. iii, 716, also 589, 588). The sense, or monstrous nonsense, of this term of course was not that the creature bore the Creator, or that the eternal Deity took its beginning from Mary, which would be the most absurd and the most wicked of all heresies, and a shocking blasphemy; but the expression was intended only to denote the indissoluble union of the divine and human natures in Christ, and the genuine incarnation of the Logos, who took the human nature from the body of Mary, came forth God-Man from her womb, and as God-Man suffered on the cross. For Christ was born as man, the Logos, and the human personality in Christ resided in his divinity, not in his humanity. So, in fact, the reasonable soul of man, which is the centre of the human personality, participates in the suffering and the death-struggle of the body, though the soul itself does not and cannot die. The Antiochian theology, however, could not conceive a human nature without a human personality, and this is distinctly separated from the divine Logos. Therefore Theodorus of Mopsuestia had already disputed the term theotokos with all earnestness. "Mary," he says, "bore Jesus, not the Logos, for the Logos was, and continues to be, omnipresent, though he dwelt in Jesus in a special manner from the beginning. Therefore Mary is strictly the mother of Christ, not the mother of God. Only in a figure, per anaphoram, can she be called also the mother of God, because God was in a peculiar sense in Christ. Properly speaking, she gave birth to a man in whom the union with the Logos had begun, but was still so incomparably weaker, that she had to express herself as a mother who is to be called the Son of God." He even declared it "insane" to say that God was born of the Virgin; "not God, but the temple in which God dwelt, was born of Mary." In a similar strain Nestorius and his friend Anastasius argued from the pulpit against the theotokos. Nestorius' protest in the middle express of a mother of Christ (Χριστοτόκος), because Christ was at the same time God and man. He delivered several discourses on this disputed point. "You ask," he says in his first sermon, "whether Mary may be called mother of God. Has God, then, a mother? If so, heathenism is excusable in assigning mothers to its gods; but then Paul is a liar, for he said of the deity of Christ that it was without father, without mother, and without daughter (Rom. i, 3, 4). No, my dear sir, Mary did not bear God; ... the creature bore not the uncreated Creator, but the man who is the instrument of the Godhead; the Holy Ghost conceived not the Logos, but formed for him, out of the virgin, a temple which he might inhabit (John ii, 21). The impression was very strong, but did not quicken him in whom he was made flesh. This view, however, was not used, I honor on account of the God which was covered therein and inseparable therefore; ... I separate the natures, but I unite the worship. Consider what this must mean. He who was formed in the womb of Mary was not himself God, but God assumed him (αναποιμεν, i.e. clothed himself with humanity), and of account of him who was assumed, he who was assumed is also called God." A controversy now ensued in which the enemies of Nestorius, not comprehending the danger which he saw to be involved in the use of the word theotokos, charged him most unjustly with holding the Phoebist position, of regarding Christ as the son of a mere man; or, in other words, they accused him of denying the divinity of Christ. The question was very keenly agitated, both among the clergy and laity, whether Mary was entitled to be called the mother of God. In this dispute Nestorius took an active part, adhering firmly to the doctrine of the school of Antioch. Dupin (Bibliotheque, i, 442, ed. 1722)thus summarizes his views as expounded by himself: 1. He expressly rejected the error of those who said that Christ was a mere man, as Ebon, Paul of Samosata, Photinus. 2. He maintained that the Word was united to the human nature of Jesus, and that the two persons were one, intimate and strict. 3. He maintained that these two natures made one Christ, one Son, one Person. And that this Person may have either divine or human properties attributed to him. But his words contradicted this formal enunciation of his doctrine. His illustrations proved that he did not allow the hypothesis of a union, but admitted a moral union only. A contemporary writer (Marius Mercator, Opera (Paris, 1673, ed. Garnier), who lived in the first half of the fifth century, says that Nestorius was sound in most of the Catholic truths on this question taken seriatim. He was sound also "in proposing to make the second person of the Trinity of the same substance and attribute and consubstantial with the Son, and also "de tempore, quo primum existit unio;" all these positions being demonstrated by extracts from extant sermons and other writings of Nestorius. But he was unsound "de genere unionis." He certainly allowed only a moral union, "Deus et homo unum tantum moraliter." Hence the incarnation according to him was "иванен, христиан, иевангель синтетес." There were two natures in Christ, and the properties in each should be very carefully distinguished—"due in Christio repias hypotheseis; succernendul singulorum idiomata." Nor would he allow human attributes to be predicated of the divine nature of Christ: "Nec unum tribus una alteri, nisi res, i.e., νομοθετησεν, vel sicutius." Rogers (Parker Soc. p. 55) quotes an opposite passage in this connection: Φαγη γαρ ιωνισι των θως λογον τη εκ Μαριας αδητως, ωστι τι της φιλο σιων ιδαι δια εχθρονο ποιητο (Nicephorus, xviii, 48). He denied therefore that God the Son was to manifest; he spoke of Christ's humanity being united to the experiences, and he necessarily rejected, according to the above view, the term Θεοτόκος, and proposed Χριστοτοκος as an alternative. There is abundant proof from his works of his denial of the hypothetic union. He compared the union of the two natures in Christ to the making of a bundle of mathematics. He compared Christ to the temple of his divinity habit, the temple of his divinity. He said that Thomas had touched him that was risen again, and honored him.
that raised him up. He believed "hominem Deifica-
tum, et non verbum carmen factum," that Christ became God by merit and not by nature. At some meetings at Ephesus, preliminary to the council, Nestorius said he would not be an enemy to the council in person, but would not yield; and when the bishop of Melitana, at the council said that he had heard a bishop of the party of Nestorius say "that he that suffered for us was a distinct person from the Word" (Dopin, i, 640). Nestorius proposed an alteration of phraseology in order to overcome this difficulty. He suggested that there would be no danger if we said the divine Jesus Christ knew men's thoughts, the human Jesus Christ was hungry, and the like (see Dr. Hey's Lect. iv. He speaks of the cruelty of the persecution of Nestorius, and does not scruple to say that the Council of Ephesus erred in treating Nestorius with too great severity"). Practically it became evident that his doctrine amounted to teaching that there were two persons in Christ, and it was so felt at the time. See HYPOTHETICAL UNION. Thus the word theokos became the watchword of the orthodox party in the Nestorian controversy, as the term hominosus had been in the Arian; opposition to the word θεοκος meant denial of the mystery of the incarnation, or of the true union of the divine and human natures in Christ. Unquestionably the Antiochian Christology, which was represented by Nestorius, did not make the Logos truly became man. It asserted indeed, rightly, the duality of the natures, and the continued distinction between the Logos and that which was human, and the true union of the divine and human natures in Christ. This man, having, on one occasion, been called to preach in the presence of his patriarch, took occasion, in the course of his sermon, to extol the Virgin Mary as the mother of God, and charged all who refused to acknowledge her as such with being believers in a deified man. This man, Proclus, in the course of his discourse, praised Mary as "the spotless treasure-house of virginity: the spiritual paradise of the second Adam; the workshop in which the two natures were annealed together; the bridal chamber in which the Word welded the flesh; the living bush of nature, which was unharmed by the fire of the divine birth; the light cloud which bore him who sat between the cherubim; the stainless fleeces, bathed in the dews of heaven, with which the Shepherd clothed his sheep; the handmaid and the mother, the Virgin and Heaven." The sermon was received with loud applause, and Nestorius found it necessary to defend his own doctrine against the misrepresentations of the council. In the first place, a gracious concession on the part of God ( Ihvav 4vov), whereby the Logos makes the man an object of the divine pleasure, and in the second place an elevation of the man to higher dignity and to sonship with God (Iovv avdv xai νίκτωρ, καν νικνόντα), whereby the Logos makes the man an object of the divine pleasure, and in the second place an elevation of the man to higher dignity and to sonship with God (Iovv avdv xai νικτωρ, καν νικνόντα). By virtue of the concession there arises, in the third place, a practical fellowship of operation (Iovv avdv xai νικτωρ, καν νικνόντα), in which the humanity becomes the instrument and temple of the Deity and the Iovv αφετηρία culminates. Theodore of Mopsuestia, the able founder of the Antiochian Christology, set forth the elevation of the man to sonship with God (starting from Luke ii, 52) as follows: [passage removed]. The elevation made it dependent on the progressive virtue and meritoriousness of Jesus, which were completed in the resurrection, and earned for him the unchangeableness of the divine life as a reward for his voluntary victory for virtue. The Antiochian and Nestorian theory amounts therefore, at bottom, to a duality of persons in Christ, though without clearly avowing it. It cannot conceive the reality of the two natures without a personal independence for each. With the theanthropic unity of the person of Christ it denies also the theanthropic unity of his work, especially of his sufferings and death; and in the same measure it enfeebles the reality of redemption. From this point of view Mary, of course, could be nothing more than mother of the man Jesus, and the predicate theokos, strictly understood, must appear absurd or blasphemous. Nestorius would admit no more than that God passed through (transit) the womb of Mary. Cyril charges upon Nestorius (Epist. ad Celse) that he does not say the Son of God died and rose again, but always the man Jesus died and rose. Nestorius himself says (in his sermon against the Arians) (4vov xai νικτωρ, καν νικνόντα): "It may be said that the Son of God, in the wider sense, died, but not that God died. Moreover the Scripture, in speaking of the birth, passion, and death, never say God, but Christ, or Jesus, or the Lord—all of them names which suit both natures. A born, dead, and risen Christ cannot beωροθνος ( epiphany);" he says in another sermon, "did not crucify the Godhead, but the clothing of the Godhead, and Joseph of Arimathæa did not shroud and bury the Logos" (In Mar. Merc. p. 761 sq.).

Nestorius by this controversy had opened a question which went beyond the usual theological arena. The sentiment of venerating Mary had spread so greatly among the people that it touched the most vehement passions, and he was, therefore, not only resisted by theologians of the opposite camp, viz., the Alexandrians, but by the people, and was rejected in public by some of his own clergy even. He accordingly, enraged at the unbridled attacks made on his person, made a confession of faith in the Council of Ephesus, in which he indignantly declared that he never had said that there were two persons in Christ, but that there were two natures.
of the divine and human he was in the right, though he himself pressed to the verge of the opposite error of mixing or confusing the two natures in Christ. (Comp. in particular his assertion of an ἱερός θρόνος in the third chapter of On the Incarnation of the Word, as opposed to the common view of the Eastern Church. [Conciliorum, ii, 155], however, understands by this not a ἱερός ποιεῖν ἔσορον, but only a real union in οὐκ εἶναι, οὐκ εἰσιν. Cyril, as if to blind the eyes of his antagonists, opened the controversy by mild and apparently suave measures. He simply wrote to Nestorius, and doubtless to the bishop of Constantinople, patriarch Cyril published two letters addressed to Egyptian monks, in which he assailed the opinions of Nestorius, without, however, alluding to or once mentioning his name. The appearance of these writings excited no light sensation in the East, and grave great offence to Nestorius, against whom they were so plainly levelled. Cyril followed this up by a solemn protest, and finally launched out by vehement and bitter denunciations of Nestorius and his doctrine, declaring the latter at variance with the very essence of Christianity. An epistolary altercation now took place between the two patriarchs, which continued for some time, with considerable bitterness on both sides. To bring about Nestorius's removal from the patriarchate, Cyril addressed the emperor, the empress Eudocia, and the emperor's sister Pulcheria, who took a lively interest in Church affairs; and when these efforts failed to bring about the much desired result, he finally determined to seek himself the removal of Nestorius. He devised the sermon of that patriarch to be translated and sent to Rome; and at the same time urged his holy¬ness to take summary measures for the vindication of pure doctrine. Celestine, moved by orthodoxy instinct, and flattered by the appeal to his authority, summoned a synod to meet at Rome, and with their sanction decided that the clergy excommuni¬cated by Nestorius should be restored to the fellowship of the Church; and, further, that if within ten days after receiving the sentence pronounced at Rome, Nestorius should not give a written recantation of his errors, he should be forthwith deposed from his office as patriarch and excommuni¬cated, "ab universali ecclesiae catholice communione dejectus." Cyril having thus found at last the opportu¬nity of humbling his rival, took it upon himself to execute the sentence of the Roman synod. Summoning a synod of Egyptian bishops at Alexandria, Cyril de¬clared Nestorius's sentence pronounced at Rome, and in the name of Nestorius, in which, conformably to the sentence pro¬nounced at Rome, he called upon him to recant, and concluded with twelve anathemas against his presumed errors, thus formally setting forward the Egyptian creed in opposition to the Antiokinian system, as expressed by "Theodore of Mopsuestia." The controversy now com¬pletely altered its aspect, being converted from a personal into a doctrinal dispute. By orders of John, patri¬arch of Antioch, a refutation of the Egyptian anath¬emas was published by Theodoret, bishop of Cyrus, a town on the Euphrates; and this refutation, which was written with much spirit and warmth, elicited a violent and eloquent reply from the pen of Cyril. Nestorius, on his part, treated the deputies sent from Celestine and Cyril with the utmost contempt, and answered the anathemas of Cyril by sending twelve counter anathemas, in which he accused his opponents of the heresy of Apollinarius (q.v.).

The controversy had now become so general and critical that it was thought to be absolutely necessary to summon a general council, and therefore the emperor, Theodosius II, in connection with his Western colleague, Valentinian III, issued a proclamation to all the bishops of the empire summoning them to an ecumenical council at Ephesus about Pentecost of the following year. Cyril and Nestorius arrived at Ephesus at the ap¬pointed time, the former authorized temporarily to repres¬ent the pope, Celestine, and accompanied by a great number of Egyptian bishops, who came to act as his devoted tools. The bishop of the city in which the council was assembled was the friend of Cyril, and such was the extent of influence arrayed against Nestorius that he found it necessary to solicit from the imperial curia the commission to be sent to the bishop of the house in which he resided. A number of the Syrian bishops were prevented from reaching Ephesus in time for the opening of the council, and having waited six¬teen days beyond the time appointed by the emperor, Cyril insisted on commencing proceedings, and accord¬ingly, on the 8th of November, he opened the council of 200 bishops. The bishop of Hippo, St. Augustine, was to have presided at the Council of Ephesus, but he died in the latter part of the year 430. Nestorius refused to attend till all the bishops had assembled, and having been formally invited three several times to appear and answer the various charges,oral and written, laid against him, his refusals to obey the summons of the synod were construed as an admission on his own part of his guilt, and it therefore proceeded to his condem¬nation. The bishops unanimously cried, "Whoever does not anathematize Nestorius, let himself be anath¬emæ; the true faith anathematizes him, the holy ecclesia anathematizes him. Whoever has his fellowship with Nestorius, let him be anathema. We all anathematize the letter and the doctrines of Nestorius. We all anathematize Nestorius and his followers, and his ungodly faith, and his ungodly doctrine. We all anath¬ematize Nestorius," etc. (Mansi, iv, 1170 sq.; Hefele, ii, 169.) The proceedings of the council were read in the presence of the earlier fathers and several passages from the writings of Nestorius were read, and at the close of the first session, which lasted till late in the night, the synod, in which, says Schaff, "an uncharitable, violent, and passionate spirit ruled the transactions," after many tears, as its members declared, restrained by the laws of the Church, and by the letter of the Roman bishop, Celestine, pronounced sentence in the following terms: "The Lord Jesus Christ, by Nestorius blasphemed, has ordained by this most holy synod that the Nestorius above named be excluded from the episcopal dignity, and from sacrestal fellowship" (Mansi, iv, 1211; Hefele, ii, 172). This sentence was no sooner passed than, by orders of Cyril, it was publicly proclaimed by her¬alds throughout the whole city. It was also formally an¬nounced to the emperor. Meanwhile John, bishop of Antioch, with about thirty Syrian bishops, arrived at Ephesus, and after the proceedings, when the council had met and deposed Nestorius, and, on learning what had been done, they declared the proceedings of that council null and void, proceeded to form a new coun¬cil, or conciliarium — yielding nothing to the heat¬ed violence of the other —in the dwelling of the cele¬brated Theodore of Mopsuestia (q.v.). The conciliarium now pronounced sentence on the imperial counsellor and a body-guard, and declared itself to be the only regular one. The conciliarium, in turn, now deposed Cyril and Mennemon, bishop of Ephesus, and communicated the other members who had taken part in the proceedings of the Cyrilian councils until they should be suspended from the episcopate of Cyril and anath¬ematized of Cyril (Mansi, iv, 1250 sq.; Hefele, ii, 178 sq.). The sentence against the two bishops was made known throughout the city, and formally communicated to the emperor. In the midst of this conflict of councils the deputies of the Roman bishop appeared at Ephesus, and, according to their instructions, gave the formal sanction to all the proceedings of Cyril and his council. The emperor, however, on hearing the report of his commissioner, lost no time in despatching a letter to Ephesus by the hands of an imperial officer, conveying his royal pleasure that the disputed question should be referred to the council, and not by the pope or the bishop of Antioch, but by the whole council in common, and until this was done no one of the bishops could be permitted to re¬turn to his diocese or to visit the court. Cyril and his party, seeing the evident leaning of the emperor in fa¬vor of Nestorius, resorted to various expedients for the
purpose of enlisting the influence of the court for themselves, and at length they succeeded in prevailing upon the Emperor, the son of the Emperor Constantine, who had been in the inter
vention of Theophilus's sister, to confirm the deposition of Nestorius, although he had agreed to withdraw his objection to the word "theotokos," mother of God. Thus, finally forsaken by the court, which had so long protected him against his numerous and powerful ene
mies, Nestorius saw himself deserted by the very personages whom he had supported and defended; and a number of the Eastern bishops stood firm for a time, John and Cyril were ultimately brought to an agree
ment, and both retained their sees. The compromise which was effected between the two prelates and the emperor was brought about mainly by the following steps, which are described in a letter to the emperor, and in a
Emessa a messenger to Alexandria with a creed which he had already, in a shorter form, laid before the em
peror, and which broke the doctrinal antagonism by asserting the duality of the natures against Cyril, and the predicte mother of God against Nestorius (Manu, v. 203; Hefele, i, 246; Gieseler, i, ii, 150). "We cou
fess," says this symbol, which was composed by Theodo
res, "that our Lord Jesus Christ, the only-begotten Son of God, is perfect God and perfect man, of a reason
able soul and body subsisting (ζωόν τιναν και δύναμι
ν τινα ήμιν κατά την άνθρωπότητα. Here homounios, at least in the second clause, evidently does not imply numerical unity, but only generic unity); for two natures are united with one another (ζωο γ είς
σωμασίων γένος, in opposition to the μια φύσις of Cyril). Therefore we confess one Christ, one Lord, and one God. By reason of this union, which is yet indistinctly coupled (κατά ταύτα κατά την άνθρωποτηταν) against Cyril έν ισόω σωμασίαν), we also confess that the holy Virgin is mother of God, because God the Logos was made flesh and man, and united with himself the temple [humanity] even from the conception; which temple he took from the Virgin. But concerning the words of the Gospel of John, Epistle respecting Christ, we know that theologians apply some which refer to the one person to the two natures in common, but separate others as referring to the two natures, and assign the expressions which become God to the Godhead of Christ, but the expressions of humiliation to his manhood (κατά την άνθρωποτηταν κατά την άνθρωποτηταν του ανθρωπου νομοσχηματος). This compromise of principle with which John of Antioch was thus made chargeable roused a large party in his own diocese, and many of the Syrian bishops withdrew from all fellowship with him. A schism followed in various parts of the Eastern Church. Nestorius, on the other hand, at his own request, was assigned to his former cloister at Antioch, and on Oct. 25, 431, Maximian was nominated as his successor in Constantinople. Upon the death of this patriarch in A.D. 435, however, a large party at Constantinople de
manded the restoration of Nestorius, threatening that if their wish was refused they would set fire to the pa
triarchal church; but so strong was the influence exer
cised by the opponents of the deposed patriarch that the vacant dignity was conferred upon his early ad
versary, Proclus. Cyril, seeing the strength of Nestorius's friendship in the East, and not wishing to be pronounced his enemy for ever removed beyond the possibility of exercising any longer any influence in the Church; and the Anti
cochians, having saved the doctrine of two natures, were gradually won over by persuasives in various forms to consent to the sacrifice of the person of Nestorius for the sake of the unity of the Church. Finally, in A.D. 435, an imperial edict appeared which condemned Nestorius to perpetual banishment in the Greater Oasis of Upper Egypt, and Euphrasius, Bishop of Cyprus, was consecrated by Cyril, "was now dragged from the stillness of his for
mer cloister of Euporpius, before the gates of Antioch, in which he had enjoyed four years of repose, from one place of exile to another—first to Arabia, then to Egypt— and was compelled to drink the bitter cup of persecu
tion which he himself, in the days of his power, had forced upon the heretics." To his credit, be it said, he bore his sufferings with resignation and independ
ence. In his exile Nestorius busied himself by the writing of several theological works. Thus he wrote a history of his life and of his theological controversy, in which he sought to vindicate himself against the re
proaches of his enemies, and to show both friends and foes, significantly entitled a Tragedy. (Fragmenta in Evagrius, Hist. Eccles. i, 7, and in the Symeonode adversus Traegadiam Irenaei, c. 6.) That the book bore the name of the Tragedy is stated by Eusebius, a Nestorian metropolitan. The imperial com
missioner, Irenaeus, afterwards bishop of Tyre, a friend of Nestorius, composed a work against this, and the ecclesiastical history of his time, likewise under the title of Tragedy, fragments of which, in a Latin translation, are preserved in the so-called Symeonides, in Manas, v, 431 sq.) Various accounts are given of the circumstances which led to his death, but in one thing all are agreed, that he died, after thirty-five years of exile, in the years 450, under the severe acts of harsh and cruel persecution. The precise time or place of his death has not been ascertained, but he is believed to have died previous to A.D. 450, when the Eutychian controversy began to attract notice. The account given by Evagrius, that Nestorius's death was caused by a disease in which his tongue was eaten by worms, rests, according to Evagrius himself, on a single and unnamed authority. The more probably authentic narratives ascribe his death to the effects of a fall. He was still living A.D. 439, when Socrates wrote his history (Hist. Eccles. vii, 84). The Monophysite Jacobites are accustomed from the year 438 to regard Nestorius as the author of the supposed grave in Upper Egypt, and have spread the tradition that it has never been moistened by the rain of heaven, which yet falls upon the evil and the good. The emperor, who had formerly favored him, but was now turned entirely against him, caused all his writ
ings to be burned, and his followers to be named after him as "Nestorians," and the followers of John of Antioch received the title of "Eutychians." Although this be his memory in the East, in the West the sad fate and upright character of Nestorius, after having been long abhorred, has in modern times, since Luther, found much sympathy; while Cyril, by his vio
lent conduct, has incurred much censure. Wahlg (Ket
nischen Kirche, p. 373) has shown that the Nestorian and Monophysite sects have been chargeable with the crimes of Gieseler and Neander take the part of Nestorius against Cyril, and think that he was unjustly condemned. So also Milman, who would rather meet the justice of the divine Redeemer loaded with the errors of Nestorius than with the barbarities of Cyril, but does not enter into the theological merits of the controversy (Hist. of Latia Christianty, i, 210). Petavius, Bur, Hefele, and Eb
nard, on the contrary, vindicate Cyril against Nestorius, not as to his personal conduct, which was anything but Christian, but in regard to the particular matter in question, viz., the defence of the unity of Christ against the division of his personality. Dörner (ii, 81 sq.) justly distributes the right and wrong, truth and error, on both sides, and considers Nestorius and Cyril representatives of two equally one-sided conceptions, which com
plement each other. Cyril's strength lay on the relig
ious and speculative side of Christology, that of Nesto
rius on the historical; and his mind's instinctive tendency (ii, 86) gives a similar judgment. Perhaps it is near
est the truth to concede that Nestorius was possessed of an honest and pious zeal, but was wanting in that pru
dence and moderation by which zeal should have been controlled.

Literature.—On the sources are to be consulted.—(J.)
numerous: it was selected as an appropriate image of the subtle devices of the enemies of God on the one hand (e.g. Ps. ix, 15; xxvi, 15; xxxi, 4), and of the unavertable vengeance of God on the other (Lam. i, 10; Ezek. xiii, 13; Hos. vii, 12). See **Snare**.

1. **Fishing-nets.**—We have no direct information concerning the fish-nets of the Hebrews, but suppose that they were not materially different from those of the ancient Egyptians, concerning which we now possess very good information, and which are more than once mentioned in Scripture (Isa. xix, 8). The Egyptians constructed their nets of flax-string: the netting-needle was made of wood, and in shape closely resembled our own (Wilkinson, *Anc. Egypt.*, ii, 96). See **Net**. The usual fishing-net among this people was of a long form, like the common drag-net, with wooden floats on the upper and leads on the lower side. The leads were occasionally of an elongated shape, hanging from the outer cord or border of the net; but they were most usually flat, and, being folded round the cord, the opposite sides were beaten together; and this method continues to be adopted by the modern Egyptians. The net was sometimes let down from a boat, but those who pulled it usually stood on the shore, and landed the fish on a shelving bank. This mode, however, was more adapted to rivers than to lake fishing; and hence in all the detailed examples of fishing in the New Testament the net is cast from and drawn into boats, excepting in one case where, the draught being too great to take into the boat, the fishers dragged the net after their boats to the shore (John xxxi, 6, 8). Sometimes in shallow water a smaller net was used.
furnished with a pole on either side, to which it was attached; and the fisherman, holding one of the poles in each hand, thrust it below the surface of the water, and awaited the moment when a shoal of fish passed over it.

The bait that stood in the centre of the bar was touched, slipped aside, and allowed the two flaps to collapse, and thus secured the bird. Another kind, which was square, appears to have closed in the same manner; but its construction was different, the framework running across the centre, and not, as in others, round the edges of the trap. So skilful were they in making traps that they were strong enough to hold the hyena; and in the one which caught the robber in the treasury of Khampsinitus the power of the spring or the mechanism of the catch was so perfect that his brother was unable to open it or release him. Similar in ingenuity, though not in strength, were the nets made by the convicts banished to Rhinocolura by Actiades, which, though made of split straws, were yet capable of catching many of the numerous quails that frequented that desert region at a particular period of the year. The clap-net was of different forms, though on the same general principle as the traps. The larger ones consisted, like the smaller ones above, of two sides or frames, over which the network was strained (see next page); at one end was a short rope, which they fastened to a bush or a cluster of reeds, and at the other was one of considerable length, which, as soon as the birds were seen feeding in the area within the net, was pulled by the fowlers, causing the two sides to collapse. As soon as they had selected a convenient spot for laying down the net, in a field or on the surface of a pond, the known resident of numerous wild fowl, they spread open the two sides or flaps, and secured them in such a manner that they remained flat upon the ground until pulled by the rope. A man, crouched behind some reeds growing at a convenient distance from the spot, from which he could observe the birds as they came down, watched the net, and, enjoining silence by placing his hand over his mouth, beckoned to those holding the rope to keep themselves in readiness till he saw them assembled in sufficient numbers, when a wave of his hand gave the signal for closing the net (Wilkinson, Ancient Egyptians, ii, 181 sq.).

"Birds formed an article of food among the Hebrews (Lev. xvii, 18), and much skill was exercised in catching them. The following were the most approved methods: (1) The trap (נֹע), which consisted of two parts—a net, strained over a frame, and a stick to support it, but so placed that it should give way at the slightest touch; the stick or spring was termed פּוֹד (Amos iii, 5; 'gin'; Psa. lixii, 22, 'trap'); this was the most usual method (Job xviii, 9; Eccles. ix, 12; Prov. vii, 28). (2) The snare (בּוֹק), from בּוֹק, to bridle; Job xviii, 9, A. V. 'robbert), consisting of a cord (בּוֹק, Job xviii, 10; comp. Psa. xcviii, 5; cxvi, 8; cxl, 5) so set as to catch the bird by the leg. (3) The net, as above. (4) The decoy, to which reference is made in Jer. v, 26, 27—a cage of peculiar construction (בּוֹק) was filled with birds, which acted as decoys; the door of the cage was left open by a piece of stick acting as a spring (ןָבּוֹק), and closed suddenly with a clap (whence perhaps the term sellah) on the birds as they came out of the cage: the partridge appears to have been used as a decoy (Eccles. xi, 80)." See Fowling.

5. Fishing-nets.—These, as has already been seen, were
of universal use among the Hebrews. "The objects for which hunting is practiced indicate the various conditions of society and the progress of civilization. Hunting, as a matter of necessity, whether for the extermination of dangerous beasts or for procuring sustenance, betokens a rude and semi-civilized state; as an amusement, it betokens an advanced state. In the former, personal prowess and physical strength are the qualities which elevate a man above his fellows and fit him for dominion, and hence one of the greatest heroes of antiquity is described as a 'mighty hunter before the Lord' (Gen. x, 9), while Ishmael, the progenitor of a wild race, was famed as an archer (Gen. xxi, 20), and Esau, holding a similar position, was 'a cunning hunter, a man of the field' (Gen. xxv, 27). The latter state may be exemplified, not indeed from Scripture itself, but from contemporary records. Among the accomplishments of Herod, his skill in the chase is particularly noticed; he kept a regular stud and a huntsman (Josephus, Ant. xvi, 10, 3), followed up the sport in a wild country (Ant. xv, 7, 7) which abounded with stags, wild asses, and bears, and is said to have killed as many as forty head in a day (War, i, 21, 118). The wealthy in Egypt and Assyria followed the sports of the field with great zest; they had their preserves for the express purpose of keeping and hunting game (Wilkinson's Anc. Egyptians, i, 215; Xen. Cyrop. i, 4, 5, 14), and drew from hunting scenes subjects for decorating the walls of their buildings, and even the robes they wore on state occasions. The Hebrews, as a pastoral and agricultural people, were not given to the sports of the field; the density of the population, the earnestness of their character, and the tendency of their ritual regulations, particularly those affecting food, all combined to discourage the practice of hunting; and perhaps the examples of Ishmael and Esau were recorded with the same object. There was no lack of game in Palestine; on their entrance into the land the wild beasts were so numerous as to be dangerous (Exod. xxiii, 29); the utter destruction of them was guarded against by the provisions of the Mosaic law (Exod. xxiii, 11; Lev. xxv, 7). Some of the fiercer animals survived to a late period, as lions (Judg. xiv, v; 1 Sam. xvii, 84; 2 Sam. xxiii, 20; 1 Kings xii, 24; xx, 36) and bears (1 Sam. xvii, 34; 2 Kings ii, 24); jackals (Judg. xiv, 4) and foxes (Cant. ii, 16) were also numerous; hart, roebuck, and fallow deer (Deut. xii, 15; 1 Kings iv, 23) formed a regular source of sustenance, and were possibly preserved in enclosures. The manner of catching these animals was either by digging a pitfall (סער), which was the usual manner with the larger animals, as the lion (2 Sam. xxiii, 20; Ezek. xix, 4, 8); or, secondly, by a trap (ים), which was set under ground (Job xviii, 10), in the run of the animal (Prov. xxii, 5), and caught it by the leg (Job xviii, 9); or, lastly, by the use of the net, of which there were various kinds, as for the gazelle (?) (Isa. ii, 20, A.V. 'wild bull'), and other animals of that class. The game selected was generally such as was adapted for food (Prov. xvi, 27), and care was taken to pour out the blood of these as well as of tame animals (Lev. xvii, 13)." All this is admirably and fully illustrated on the Egyptian monuments. Among the ancient Egyptians, in hunting, a space of considerable size was sometimes enclosed with nets, into which the animals were driven. The spots thus enclosed were usually in the vicinity of the water brooks to which they were in the habit of repairing in the morning and evening; and having awaited the time when they went to drink, the hunters disposed their nets, occupied proper positions for observing them unseen, and gradually
closed in upon them. The usages of the Egyptians, and, so far as can be ascertained, of other Oriental nations, in this respect, correspond with the intimations of Julius Pollux (Onomast. v, 4), who states that two kinds of nets were employed in this mode of hunting. One, a long net, called by the Greeks διστον, was furnished with several ropes, and was supported on forked poles, varying in length to correspond with the inequalities of the ground over which it extended. The others were smaller nets, called υσθα, for stopping gaps. These practices are obviously alluded to in such passages as Job xix, 6; Ps. cxli, 5; Isa. li. 20. The method in which the net was applied is familiar to us from the descriptions in Virgil (Æn. iv, 121, 151 sq.; x, 707 sq.); it was placed across a ravine or narrow valley, frequented by the agra, for the sake of water, and the game was driven by the hunters, and then despatched either with bow and arrow or spears (comp. Wilkinson, i, 214). The Assyrian monuments likewise confirm this method of taking game. See Hunting.

Netchaef, Innocent, a Russian prelate and writer, was born in 1722, and was educated for the Church; and, after filling various offices of distinction, was made archbishop of Pskov and of Riga. He died at St. Petersburg, Jan. 25, 1800. His best known work is De several sera Ptarians, published by the holy synod in 1775, to be read in the pulpit; and by the following works: Of the Manner of Confessing Children (Moscow, 1769 and 1796, 8vo)---Conversations of a Bishop to a Priest (St. Petersburg, 1792 and 1795)---Preparations for Death (St. Petersburg, 1797). The celebrated poet Derjavin has composed the epitaph of Netchaef's tomb, which may be seen in a cell of St. Alexander-Nevski. See Dictionnaire historique des ecritures ecclésiastiques de l'Église Grèco-russe, a. v.

Nethaneel (Heb. Nethan'iel, בֶּן נְאָו, given of God; Sept. Νασαονία, the name of ten Hebrews. See also NATHANIEL.

1. A son of Zuar and phylarch of Issachar at the time of the exode (Num. i, 8; ii, 5; vii, 15, 28; x, 15). B.C. 1657.

2. The fourth son of Jesse, and brother of king Da-vid (1 Chron. xi, 14). B.C. cir. 1070.

3. A priest who blew a trumpet before the ark when David brought it from Kirjath-Jearim to Jerusalem (1 Chron. xiii, 29). B.C. 1050.

4. A Levite, father of the scribe Shemiah (1 Chron. xxiv, 6). B.C. ante 1014.

6. One of five "princes" who were commanded by Jehoshaphat, on his accession, to teach the law from the book, in connection with priests and Levites, through the cities of Judah (2 Chron. xxvii, 7). B.C. 912.

7. A chief Levite, brother of Conaniah and Shemiah, who gave offerings when Josiah renewed the observance of the passover in Jerusalem (2 Chron. xxxv, 5). B.C. 629.

8. Fourth named of six sons of Pashur, of the "sons of the priests," who were found by Ezra to have taken idolatrous wives (Ezra x, 22). B.C. 458.

9. A priest, "son" of Jediael, "chief of the fathers," in the days of the high-priest Joakim (Neh. xii, 21). B.C. cir. 446.

10. A priest's son, and brother of Zechariah, who bore a trumpet at the dedication of the walls of Jerusa-lem (Neh. xii, 86). B.C. 446. Possibly he was identical with 9.

Nethan'iah (Heb. Nethan'éyahu, נְתַנְאֶה יָה, also in the prolonged form Nethanyahu, נְתַנְאֵה יָאוֹ, 1 Chron. xxv, 12; 2 Chron. xvii, 8; Jer. xxxvi, 14; xi, 8; xii, 9; given of Jehoiakim; Sept. Naasianiacus, v. r. in 2 Kings xxv, 23 Mosassesianum), the name of four Hebrews.

1. Third named of four sons of Asaph, who were ap-

pointed by order of David to minister in the Temple. He was chief of the fifth division of sacred musicians (1 Chron. xxv, 2, 12). B.C. cir. 1015.

2. A Levite who was called "prince" and, on the accession of Jehoshaphat, to teach the law through the cities of Judah (2 Chron. xviii, 8). B.C. cir. 912.

4. Son of Eliakim (q. v.) of the royal family of Judah, and father of Jehu (q. v.) who murdered Gedaliah (2 Kings xxv, 25; Jer. xi, 8, 14, 15; xli, 1, 2; 6, 7, 9, 10, 11, 12, 15, 16, 18). B.C. cir. 620.

Neth'rinim (Heb. Nakthrinim, נְתִרִינִי, is the name given in the post-exilian books of the Hebrew Scriptures to the hereditary Temple servants who were assigned to the Levites to do the subordinate and menial work.

1. Name and Signification.—The name נְתִרִי, which is the plural of נֵר, passive adjective from נר, to give, "to set apart, to denote," properly denotes given, "the devoted," i.e. to do the menial work of the sanctu ary for the Levites, and, like other terms of office, has become the apppellative of that class of men who were thus selected (as hereditary Temple servants) to attend the Levites. Hence they are called נְתִרִים by Josephus (Ant. xi, 5, 6), while the Vulg. (Nathanaei), the Chaldee (Nethrinim), the Zurich Bible, Coverdale, Matthew's Bible, the Geneva Version, the Bishop's Bible, and the A. V. uniformly retain the original in all the seventeen passages in which it occurs, except that the A. V., following the example of the preceding Eng-lish versions, improperly translates the plural נְתִרִים ("Nethrinim") to the Hebrew נר, which is already plural, as it does in "cherubins." The Sept., however, is inconsistent both in its spelling and rendering of it. Thus, in nine places out of the seventeen it has נֵרִים, Alex. Naasoriva, Ezra ii, 70; vii, 7, 24; viii, 20 [twice]; Neh. iii, 26; vii, 46, 76, 78; x, 28; in three of Νασαονία, [Vat. Naasoriva], Ezra ii, 68; Neh. xii, 21); in two of Νασαονία [Vat. Naasoriva], Ezra ii, 58; Neh. vii, 60; in one ΑΣαονία (Ezra viii, 17); in another it takes נְסא תַר ה for one word, and substitutes for it Ναסאονία (Neh. iii, 81); and in another place again it translates נרִים by oi δήδινοι (1 Chron. ix, 2). Theodoret's explanation of Νασαονία, δύνας ιαυα, ρουσιπ, τοι ουρος θεου (Quast. in i. Paralipom.), which is also that of Bochart, "deditione appellavit, quod se sponte dede- lictionem" (Palseg, lib. ii, cap. 1, Opp. 1, ed. Lug-duni, 1692), is both contrary to the grammatical mean-
ing of the word, which, as "gift partake," can only be those given, and not who voluntarily gave themselves, and at variance with facts.

2. Origin and Duties of the Nethrinim.—It is the unan-

nous voice both of Jewish tradition (comp. Jebomoth, 7; 2 Sam. ix, 27) and the best Jewish commentators (comp. Rashi and Aben-Ezra on Ezra ii, 43; Kimchi on Josh. ix, 20) that the Gibeonites whom Joshua consigned forever to be the herdmen of wood and the drawers of water, i.e. the perpetual menial servants (נתרין נרה) of the sanctuary (Josh. ix, 21-27), are the original caste denominated Nethrinim in the post-exilian period; and there is no valid reason for regarding this ancient tradition. As these Gibeon-ites or sanctuary slaves were greatly diminished by the bloody persecutions of Saul, and in the massacre at Nob (2 Sam. xxii, 1-19), and moreover, as the reorganization and extension of the sanctuary service effected by the royal Psalmsim both rendered the work of the Levites
very laborious and demanded an increase of the exist-
ing staff of menial servants, "David and the princes [after him] gave (יִדְתּוּ) the Nethinim (or these given ones, נְתֵנִים) for the service of the Levites" (Ezra viii, 20).

From the ancient practice of consigning aliens and captives of war to do both the menial work of the people at large and of the priests and Levites (Numb. xxxi, 26-47; xxxiv, 23-29; Deut. x, 10), with which both the Syrians, Phoenicians, the Greeks, and other nations of antiquity, and which still obtains among the Arabs, who devote slaves to the service of the Kaaba at Mecca and to the sepulchre of the Prophet at Medina (Burchhardt, Travels in Arabia, i, 288, etc.; ii, 166, etc., 174, 181), there can be little doubt that the thinned ranks were re-
cruited from such captives, and that the other part of the captives taken in battle. Indeed, their foreign names given in the catalogue of those who returned from Babylon (Ezra ii, 43-58) fully confirm this view. As this newly-increased and reorganized staff, founded upon the rem-
ant of the aboriginal Gibeonites, was now formally and ex-
compactly given by David to the Levites (Ezra viii, 20), just as the Levites themselves, by the command of God, were given to the priests (Numb. viii, 19; xviii, 2-6), their primitive name was no more applicable to them, because the new accession, constituting the majority, were no Gibeonites, and because they were no more the servants of the sanctuary at large, but were a gift to the Levites. It was for this reason that they were hence-
forth called Nethinim (נְתֵנִים), the given ones, i.e. to the Levites, the expression used with regard to the Levites when they in their turn were given to the priests. See Levite. Being thus given to them, the Nethinim had to relieve the Levites of every menial and laborious work connected with the sanctuary. They had to draw and carry the water, Hew and fetch the wood, and attend to everything which the Levites ordered them to do; and they were entirely at the disposal of the Levites, therefore the Bible prescribes no special duties for the Nethinim.

3. Number of the Nethinim, their Locality, Revenues, and Social Position.—We must not forget that the Le-
vites were given to Aaron and his sons, i.e. to the priests as a body, and were accordingly the first Nethinim (נְתֵנִים), Numb. iii, 9; vii, 19. At first they were the only attendants, and their work must have been labor-
ious enough. The first time that a Levite, they brought them their share of the captive slaves of the Amalekites, and 220 were given to them as having charge of the Tabernacle (Numb. xxxiv, 47), while 32 only were as-
signed specially to the priests. This disposition to de-
vote the more laborious offices of their ritual upon slaves of another race showed itself again in the treatment of the Gibeonites. They, too, were given (A. V. "maiden") to be "hewers of wood and drawers of water" for the house of God (Josh. ix, 27), and the addition of so large a number (the population of five cities) must have re-
lieved the Levites from much that had before been bur-
ding work and in which they knew little or nothing as to their treat-
ment. It was a matter of necessity that the whole should be circumcised (Exod. xii, 48) and conform to the re-
ligion of their conquerors, and this might at first seem hard enough. On the other hand, it must be remembered that they presented themselves as recognising the su-
premacy of Jehovah (Josh. ix, 9), and that for many generations the remembrance of the solemn covenant entered into with them made men look with horror on the shedding of Gibeonite blood (2 Sam. xxi, 9), and protected them from much outrage. No addition to the number thus employed appears to have been made during the period of the Judges, and they continued to be known by their old name (נְתֵנִים) until the end of the period of the divided kingdom. The want of a further supply was, however, felt when the re-
organization of worship commenced under David. Either the massacre at Nob had involved the Gibeonites as well as the priests (1 Sam. xxii, 19), or else they had fallen victims to some other outbreak of Saul's fury, and, though there were survivors (2 Sam. xxi, 2), the number was likely to be quite inadequate for the greater stateliness of the new worship at Jerusalem. It is to this period accordingly that the origin of the class bearing this name, and to the time when those whom David and the princes appointed (Heb. gave) for the service of the Levites (Ezra viii, 20). Though their number is nowhere given up to the time of the Babylonian captivity, yet the fact that the ab-
original Hierodulai, i.e. the Gibeonites, consisted of the population of five cities when the sanctuary in their sanctu-
ary was not so imposing makes it pretty certain that the Nethinim with whom David and the other princes replenished the thinned ranks at the time when the Temple worship required a large staff of menial servants must have counted their thousands. As a matter of convenience, they most probably lived within the pre-
cincts and in the immediate neighborhood of the Tem-
ple, and must have been supported by the contributions of the people. We have more decided information about them in the post-exilic records. Only 612 Nethinim returned from Babylon—392 with Zerubbabel (Ezra ii, 58; Neh. vii, 69), and 220 with Ezra (Ezra viii, 20)—under the leadership of Zerubba-
bel and Gidea (Neh. xi, 21), who, as their foreign names indicate, were of the Nethinim. But even this small number had to be coaxed in order to get them to return from exile, as is evident from Ezra vii, 17, where they are addressed as brethren of Idod, a chief of the Levites. It is evident from the whole context (Ezra viii, 15-19), which speaks of se-
curing Idod's interests to procure Levites as well as Nethinim, that he was not a Nethinim, but a distinguished Levite who had great influence both among his own Le-
vitical brethren and the Nethinim who were under his control. Some of them lived in Ophel, which they helped to rebuild (Neh. iii, 26; xi, 26), because of its proximity to the temple; while others, as in the pre-
exilic period, dwelt within the Levitical cities (Ezra ii, 70). They were under the control of a chief of their own body (Ezra ii, 43; Neh. vii, 46). Belonging to the Temple, they, like the other sacred min-
isters, were exempted from taxation by the Persian sa-
traps (Ezra vii, 24), and were maintained from the Tem-
ple treasury and the כִּנּוֹת the second tithes (Jebu-
na, 11; Jerusalem, Maspero, v, 15; Jerusalem Sotra, ix, 11; see Horovitz, Geschichtest der Völker Is-
rael, i, 188-140). Though they conformed to the Jud-
iah religion (Exod. xii, 48; Deut. xxix, 11; Josh. ix, 9; Neh. x, 28), they occupied a very low position, and were even ranged below the Manzer (מעzar), or illegal off-
spring, as may be seen from the following order of pre-
cedence given in the Mishna: "A priest is before a Levi, a Levi before an Israelite, an Israelite before a Manzer, a Manzer before a Nethin, a Nethin before a proselyte, and a proselyte before a manumitted slave" (Horijoth, iii, 4). The Nethinim were restricted to in-
termarriage among themselves, and if a Jew or Jewess married one of them, though all the valid ceremonies were performed, the issue shared in all the degrading disqualifications of the Nethinim (Mishna, Kiddushin, iii, 12; iv; 4; Jehamat, ii, 4); and they were even ex-
cluded from the privileges of being exempt from military service, allotted to newly-married people and to those who were faint-hearted (Deut. xxv, 7, 8, with Mishna, Sota, viii, 3-6). If a woman was suspected of being de-
flowered by any one, or if she had an illegitimate child, it was ascribed to a Nethin, and the offspring took the degraded position of the Nethin, notwithstanding the as-
sertion of the mother. The child was, however, only a priest, unless she could adduce proof to support her as-
sertion (Mishna, Ketuboth, i, 8, 9). If a court of jus-
tice (יִדְתּוּ) gave a decision, and one of the mem-
bers of the court was found to be a Nethin, the judg-
ment was invalid, inasmuch as he was not regarded as
Nefet or Nutpe, an Egyptian female deity, is apostate mother to the Sun, wife of Seb, and mother of Typhon, the god of evil among the ancient Egyptians. According to a myth, she was represented as seated on the tree of life, and sprinkling healthful water upon the souls of men. In one form she personifies the abyss of heaven, represented as a female figure, astride the sacred vultures, with her arms and legs enclosing the earth. She was thought to be the Rheaa of the Greeks. See Trevor, Ancient Egypt, p. 147, 149.

Nets. See Hawk.

Neter, Thomas of Waden (generally known as Thomas Waldensis), an eminent English Roman Catholic Church historian of the early part of the 16th century, was born at Waden, Essex. He joined the Carmelites, and rose in course of time to primacy in his order in England. He was placed first in London, and afterwards at Oxford, where he became a professor, first of philosophy and then of divinity. He zealously contested the opinions of Wickliffe both in the schools and in the pulpit; was elected provincial of his order; and eventually attended the Council of Pisa in 1409. By Henry V he was appointed privy councillor and confessor, and sent to the Council of Constance, where he distinguished himself by his speeches against the Wickliffites and Hussites. He likewise possessed the favor of Henry VI, and went to France with the intention of seeing present at his coronation at Paris, but he died on his journey at Rouen in 1430. He wrote a number of works: the Bodleian Library at Oxford possesses numerous MSS. of his, for instance, a list of all the heresies, under the title of Cataloga Esteriorum. But his only published work is his Historical work, entitled Venetiæ catholiciæ (Paris, 1521, 1523, 1538; 2d ed. Salamanca, 1566; 3d ed. Venice, 1571), with notes by Carmelite monk named Rubeo; 4th ed. Venice, 1575, with notes by Bianciotti. The work is divided into six books: i. of God and Christ; ii. of the body of Christ, the church, and its

Neto-phathii (Neh. xii, 28) or Neto-phathite (so A. V. in the text appears in Vers. 1), or “Neto-phathites,” hebrew נָטָוּפָאָה, or Neto-phath, the form corresponding to “Netophathite” and “Netophathites,” always with the article הַנָּטָוּפָאָה, a Gentile from Netophah; Chron. [plene] נָטָוָפָאָה; Sept. Νετοφαθις, as 1 Chron. ii, 54, etc., but Netophatori, 2 Sam. xxiii, 28; Neto-phathii, 2 Kings xxvi, 28; Netophath, 1 Chron. xxvii, 15; Netophath, 1 Chron. xxviii, 13; Netophathii, Jer. xl, 8; with v. r. Netophath, once mistakenly rendered ἀστρονομος, Neh. xii, 28), an inhabitant of Netophah (v. q.). The Netophathites are called sons of Salma (1 Chron. ii, 54), probably the founder of the village (2 Sam. xxiii, 28, 29; Jer. xl, 8).

Netovtahin, a sect of Russian dissenters who are described by Dr. Pinkerton in his account of the Greek Church in Russia as very ignorant and much divided in opinion. They go under the general name of Sporists, or Sporists of the Greek Church. Their leading tenet is that Antichrist has come and begun his ruin of the Church, and has put an end to everything good, and that a gradual extinction of all holiness is now going on. The Netovtahin appear to be an offshoot of the Pomeranians (q. v.). See Platov’s Present View of the Russian Church.

Neton, a legal number of the congregation (1122) specified in Lev. iv, 13; Num. xxxv, 24 (Mishna, Horojotch, iii, 1). Eventually they seem to have been merged in the mass of the Jewish population, as no allusion to them occurs in the Apocrypha or New Testament. Numbers, Deuteronomy, the very title, are sufficient, for the service of the Temple; whence, as Josephus tells us (War, ii, 17, 6), a festival, called Χελοφορευσis (Xylophoria), was established, in which, the people to supply the deficiency, were obliged to bring a certain quantity of wood to the Temple for the use of the altar of burnt-offering. De Nethobath, Marth, 1719; Will, De Nethobathseorum familiarum (Alderton, 1745); Lamb, in Miscell. Grecian., i, 483 sq., 589 sq.; Pfeiffer in Ugolio, Theaur. vol. xiii. See Gibbonite; Temple Neton. Macrobius, in his Saturnalia, mentions that the Acclan, an Iberian tribe, worshipped under the name of Neton a statue of Mars adorned with rays of light.

Neto-phath (Heb. Netophah, נָטָוָאָה, distillation; Sept. Νετοφαθις in Ezra, v. τ. Νετοφαθις but Ανεσσωφαι in Neh., v. r. Ανεσσωφαι; Vag. Netophath), a town in Palestine, fifty-six of whose people returned from captivity with Zerubabel (Ezra ii, 22; Neh. vii, 26). Two of David’s guard, Maharai and Heleb or Hildai, leaders also of two of the monthly courses (1 Chron. xxvii, 13, 15), were Netophathites, and it was the native place of at least three of the captains who remained under arms near Jerusalem after its destruction in 587 B.C. They were probably the “villages of the Netophathites” the residence of the Levites (1 Chron. ix, 16), a fact which shows that they did not confine themselves to the places named in the catalogues of Josh. xxii and 1 Chron. vi. From another notice we learn that the particular Levites who inhabited these villages were singers (Neh. xii, 28). That Netophath belonged to Judah appears from the fact that the two heroes above mentioned belonged, the one to the Zarithites—that is, the great family of Zerah, one of the chief houses of the tribe—and the other to Othniel, the son-in-law of Caleb. To judge from Neh. vii, 26, it was in the neighborhood of, or closely connected with, Bethelhem, which is also implied by 1 Chron. ii, 54, though the precise force of the latter statement cannot now be made out. From the number of Netophathites who returned from captivity, the place was probably only a small village, which indeed may account for its having escaped mention in the lists of Joshua. The Netophathites seem to have been a warlike race, if we may judge from the fact that one of the great military leaders of the Jews during the rule of the viceroy Gedaliah was Sacrahiah from that place (2 Kings xxv, 31; Jer. xli, 8). A remarkable tradition, of which there is no trace in the Bible, but which, nevertheless, is not improbable authentic, is preserved by the Jewish authors, to the effect that the Netophathites slew the guards which had been placed by Jeroboam on the roads leading to Jerusalem to stop the passage of the first-fruits from the country villages to the city. It was in the neighborhood of, and in the way to, the town of Beth-Nettif, which stands on the edge of the great valley of the Wady es-Sumti (Robinson, Bib. Res. ii, 16, 17; Porter, Hand-book, p. 248), but can hardly be the Netophah of the Bible, since it is not near Beth-lehem, but in quite another direction. It may, however, be the place mentioned (as above) by the rabbi Maimonides (Vayesha, p. 650, 909). The only name in the neighborhood of Bethlehem suggestive of Netophah is Vane de Velde’s map (1588) as Anathib, and in Tohler (Dritte Wandt, p. 80) as Un-Tib, attached to a half-ruined village about two miles north-east of Bethlehem and a wady which falls therefrom into the Wady en-Nar, or Kidron. See Netophath.
Nettle

Neubrigensia

members; iii, of monachism; iv, of the begging monks and monastic property; v, of the sacraments; vi, of other parish matters. These were wisely considered in Freiherr Theatrum Vir. Erud. Clar. Moreri. See Lechler, Wielcz u. d. Lollarden (1874,1875); Niederer: Zeitschrift f. histor. Theologie, 1853, 569-572; Hook, Eccles. Bibl. iv, 401; Hardwick, Oh. Hist. Mid. Ages, p. 393, n. 6; p. 394, n. 3. (J. F. N.)

Nettle is the rendering in the Author. Ver. of two Hebrew words. See also Thorn.

1. Charul (from its prickling or burning; Sept. "qay'ava ἐρυτα; Vulg. senex, witric, and spina), occurs in three places in Scripture. Thus in Prov. xxix, 30, 31, "I went by the field of the slothful, etc., and, lo, it was all grown over with thorns, and nettles (charullah, בְּרֵשְׁנָה) had covered the face thereof." So in Job xxx, 7 it is stated that he was insulted by the children of those whom he would formerly have disinherited and employed, and who were so abject and destitute that "among the bushes they traversed, as among the nettles they were gathered together." and in Zeph. ii, 9, "Surely Moab shall be as Sodom, and the children of Ammon as Gomorrah, even the breeding of nettles, and salt-pits, and a perpetual desolation." Considerable difficulty has been experienced in determining the plant which is alluded to in the above passages, which, as Celsius says, "has been sparingly mentioned, and not minutely described by the sacred writers." The majority of translators and commentators have thought that some thorny or prickly plant is intended by charul, on account of the other plants which are mentioned with it. However, the bursagrostis, the wild thistles, etc., have been severally selected; but nettles have had the greatest number of supporters. Celsius, however, prefers the Zygiphus Polihurus, or the plant called Christi thor, as best suited to the context. The cactus, or prickly pear, would be a very suitable representative, in many respects, as it is largely used in Palestine for a hedge or fence, grows to the height of eight or ten feet. But there is this great objection to many of the plants proposed, that they are of too slow growth to suit the passage in Proverbs, which implies a rapid and general intrusion of the plant in question. All these determinations, however, amount to nothing more than conjectures, because, as Rosenmüller says, the cognate languages have not this word, and also because "the Greek translators of Alexander in the first and last of the three places in which the Hebrew word occurs entirely deviate from our present Hebrew text; but in Job they translate charul by wild shrub. It does not appear that a thorny plant is necessarily meant by the term. All that is implied is that neglected fields will become covered with weeds, and that these will be of a kind such as idlers may take shelter under. This passage, indeed, seems to preclude any thorny plant or nettle, as no one would voluntarily resort to such a situation; and Bar-Babili, under the name of Celsius (ii, 162), considers peser, or rather vetica, to be intended. Moreover, it is worthy of remark that there is an Arabic word not unlike charul which is applied to plants apparently suitable to all the above passages. The word kharual applies to different species of thorny plants which, while they serve the same purposes as mustard. Some of the wild kinds of mustard spring up in corn-fields, and become very troublesome. One of these, indeed, sinapis arvensis, is abundant in corn-fields, where it is a pernicious weed, and also in waste ground when newly disturbed. Kharul is that indigenous in Asia. Some of the species are found in Syria and Palestine; and Russell mentions the above (sinapis arvensis), or charlock, as common in the neighborhood of Aleppo. It is also widely diffused in Europe. Decandolle, Syst. Natural., ii, 611). See Mustard.

2. Kinmosah, קינְמָשָׁה, kinmockh, and kmamdamah, קְנָמַדָּה, occur, the first in Isa. xxxix, 13, the second in Hosea ix, 6, and the third in Prov. xxiv, 31, where it is mentioned along with charul, which we believe to indicate charlock. The field of the slothful is there described as being grown over with thorns (charalluah, מַרְדָּה), and "covered over with nettles and thistles. In Isaiah it is said, "And thorns (choakkh) shall come up in the palaces, nettles (kimosah) and brambles in the fortresses thereof." Hosea ix, 6, "The pleasant places for their silver, nettles (kimosah) shall possess them; thorns (choakkh) shall be in their tabernacles." Though different interpretations have been given of this word (Sept. "אֻקְשֵׂה אֲלָה, אֲשָׁר, אֲשָׁר, וּרְכָצָה; Vulg. ritterus, as thorns, thistles, wild camomile, etc., the greatest number of authors have united in adopting nettles, chiefly in consequence of the authority of Jewish writers. Thus, Rosenmüller says, Rabbi Tanchum, on Hosea ix, 6, explains kmosah by the common nettle, in Poocke's Commentary on Hosea. So Rabbi Elia on Isaiah. As quoted and translated by Celsius (Hierobol., ii, 267), speaks of it as a kind of nettle, commonly called urtic. Nettles spring up rapidly in deserted as in inhabited places, in fields, ditches, and road-sides, especially where there is some moisture in the soil or climate. They are found in the most improbable situations as well as in the most arid climates, but the springing up of nettles in desert places is rather a European than an Oriental idea. See Thorn.

Nettleton, Abshar, D.D., a Congregational minister of note, was born April 21, 1785, at North Killingworth, Conn. He graduated at Yale College in 1809; entered the ministry May 6, 1811; was to the church in 1834; from 1812 to 1822 travelled as an evangelist through Connecticut and parts of Massachusetts and New York. He had originally intended to become a missionary; but his preaching was attended with such great success, hundreds being converted by his labors, that he concluded to stay at home and continue in this work. In 1822 his health failed, and he almost ceased preaching for two years, but afterwards resumed the work, spending his winters in the South, and visiting England, Scotland, and Ireland in 1831. On his return, in 1832, he was appointed professor of pastoral theology in the then newly-organized theological seminary at East Windsor; but he did not accept the offer, and in 1843 resigned his professorship to the young men in the place and lectured occasionally to the students. He died May 16, 1844. Dr. Nettleton was a decided opponent to the New Haven theology, and in sermons and addresses took frequent opportunity to combat it. His only publication was a compilation, The Village Hymnæa (1832). After the doctor's death there was published Remains of the late Rev. A. Nettleton, D.D., consisting of Sermons, Outlines and Plans of Sermons, Brief Observations on Texts of Scripture, and Miscellaneous Remarks (edited by Bennet Tyler, D.D. [Hartford, 1845, 12mo]), of which the Christian Review (Oct. 1846, p. 170) spoke in terms of high commendation. The "Remains" was remodelled in some parts, and brought out by Bonar in 1854. See, besides this and the review referred to, Sprague, Annals of the Amer. Pulpit, i, 524; Drake, Dictionary of American Biography, s. v. (J. H. W.)

Neubrigensia, William (called also Petit or Parmany), a philosopher and divine, was born at Newbury in 1136. He gave early promise of great talent, and was on that account educated in the convent. At the request of the superiors of a neighboring convent he wrote a commentary on Solomon's Song, and afterwards a Historia Humana Anglicana, which he dedicated to Earl, abbot of Rivaulx.
This history, divided into five parts, embraces the period from William I to 1197. The first book, in which he mainly follows Henry of Huntingdon, extends to the time of Stephen, and is merely an introduction to the later part of the work which treats of the history of his own times, and is the best chronicle of that period. He evinces, for his age, remarkable critical acumen, a great spirit of observation, and fine discrimination. Although not completely free from the prejudices of the Middle Ages, the author is worthy of respect. The work was first published at Antwerp in 1567, then at Heidelberg in 1587, Paris in 1610-1632, and at Oxford (by Hearne) in 1719. The best edition is one corrected from two MSS. of the 18th century by H. C. Hamilton, for the English Historical Society (1856). Neueran is believed to have died about 1390. See Herzog, Real-Encyklopädie, x, 298; Cave, Hist. Lit. ii, 238.

Neuenar (Lat. Neueranarius or Neueranarius), Hermann, Count, a learned German prelate, was born in 1491 in the town of Julich. He entered into holy orders; became provost of the College Church of Aix-la-Chapelle, afterwards of the Cathedral of Cologne; and lastly, in 1524, chancellor of the high school in that city. He was known to Reuchlin against the attacks of the Dominicans of Cologne. In agreement with Hutten and Camerarius upon literary questions, he separated himself from them upon the subject of religious reform, and voted against the innovators at the Diets of Augsburg. He died at Augsburg in 1542, and was buried in the church of St. Peter. His most important work is the Compendium Furtwangenius pro Carolo Romanorum rege recens electo (Frankfort, 1519, and Hanover, 1611, fol.); —Oratio gratulatoria ad Carolum V (1519), reprinted, as well as the preceding piece, in the third volume of the Scriptores of Freiberger: Epistolae ad Carolum V (Scheelestadt, 1610, 4to), written to engage that prince to favor classical studies: —Epistulae, orationes et sodalibus Francorum (Cologne, 1521, 4to; Anvers, 1585); in this work, reprinted with others in vol. i. of the Scriptores of Du-chesne, the author is among the first to combat the erroneous opinion regarding the Trojan origin of the Franks: —De Morbo seu Febribus sudoratoria, vulgo sudore Britannico recta (Cologne, 1529, 4to): —Carmina (Leipzic, 1529): —Annationes aliquot herbarum, in vol. iii. of the Herbarium Brunsfeldi (Basle, 1540); —De Gallia Belgica commentariorum (Anvers, 1584, 4to). Neuenar also gave the first edition of the Vie de Chretienmagne and of the Anales of Eginoard (Colmberg, 1514). Neuenar was not a Catholic in the sense of the word. He was a great Voëgson (Basle, 1528, 4to); he also translated into Latin several Greek epigrams in the collection of Soter, published at Cologne in 1528; his translation of the Paulina and other fragments from the Bible are found in the Paulini published (Hagegen, 1592, 8vo) by one of his nephews, who has placed at the beginning of it a Vita de Neuenar, reproduced in the Noctes academicae of J. Fr. Christ; his Poem on the Death of the Saviour is inserted in the Hymni sacri of G. Fabricius; finally, several letters of Neuenar are found in the correspondance of Reuchlin. See Burckhardt, Amulet, and De ficta et veris Litteris, pp. 287; Hartzbach, Bib. Colinum, 6: Buschhain, Volum humanitatis; Paquet, Memoires, vol. xvi.

Neufchâtel. See Switzerland.

Neufchâtel, Berthold de, a Swiss prelate, was born in the latter part of the 11th century, of noble origin. After filling several important ecclesiastical offices, he was elected bishop of Basle in 1122. He followed the custom of the prelates of noble birth, and went to join the holy war, part of which was a flight from the king and neglect of the affairs of his diocese. We find him at Strasbourg in 1128; in 1124 he was a member of the assembly of Mayence, where he favored the pretensions of Philip of Swabia, aspiring to the empire after the death of Henry V. But the majority of votes was in favor of Lothaire, and

Lothaire, proclaimed emperor, commenced by treating Berthold as an enemy. Berthold had some difficulty with the monks of Saint-Blaise. The emperor wished to bear the cause, and declared himself in favor of the monks. Berthold was restored to the good graces of the emperor in the year 1130; but a few years later, in 1134, he was obliged to abdicate, and died not long after. The motive of this abdication is not well known. It is believed, however, to have been enjoined upon him by Innocent II. See Boselles Securo, p. 191; Monumenta historiae Helvetiae chronicorum, ed. de Bâle, published by M. Trouillat, passim.

Neufchâtel, Charles de, a French prelate, who lived in the latter part of the 15th century, was the son of Jean de Neufchâtel (q. v.). Charles was chief singer in the Cathedral of Besançon when Quentin Ménart governed that church. When the latter died, the age of Charles did not permit the canons to confer upon him the vacant title by vote of election; they could simply make him a candidate, and this they did. Charles had for competitor the celebrated cardinal of Arras, Jean Jouffroy. Yet the credit of his family prevailed over the power of the cardinal; after having been made a candidate by the canons of Besançon, he was nominated by the Bishop of Besançon; under this nomination, the facile and benevolent character of Charles giving it hope that his administration would be peaceful. He met their expectations, and even wished, in the year 1471, to efface the last trace of the discord which had troubled the government of his predecessor; he submitted then to the destruction of the Château de Bréillette, newly rebuilt, and the citizens pledged their lives, through gratitude to him, to pay 600 florins in gold. In the mean time, the civil tumults being appeased, the city and church of Besançon were desolated by foreign war. After the death of Charles the Bold, the French, united to the Lorrainers, invaded the Franche-Comté, and made great ravages. Charles de Neufchâtel at first resisted the enemy's forces; but Louis XI was a very skilful prince, who knew how to intimidate and corrupt. The duke Maximilian, learning that Charles de Neufchâtel had taken sides with France, declared he had forfeited his office, and even obliged him to leave his archiepiscopal palace. Charles then retired, and enjoyed the society and protection of king Louis, who, as the story goes, assigned him a pension of 4000 livres. Charles de Neufchâtel was at the court of France in the year 1480, when Louis, bishop of Bayeux, died. The king immediately nominated Neufchâtel archbishop of this church, for the archbishopric of Paris was then vacant. He could not, indeed institute as bishop a confirmed archbishop; he could simply, by a sort of incarclation, place him over the government of a vacant bishopric. Thus the canons of Besançon, deprived of their living archbishop, had not the right to give him a successor. Charles received for some years the revenues from his archbishopric, which, joined to his pension and his salary as administrator, made him one of the richest prelates of the kingdom. Neufchâtel died towards the close of the 15th century. His body was transported to Bayeux, his heart to Besançon. See Gallia Christ. etas, vol. i.; Du Bellay, Historia de besancon, p. 1; L'Abbé Richard, Hist. des Dion, de Besancon et de S. Claude.

Neufchâtel, Henri de, another Swiss prelate, flourished in the first part of the 18th century. His father, Ulric III, was count of Neufchâtel. At first provost of the church of Basle, and coadjutor to bishop Berthold of Ferrette, he established himself upon the episcopal seat in 1292. He was a man prudent of his own accord, and would yield to no one, not even the sovereign princes. From the first he engaged in an armed warfare with Rudolph of Hapsburg, his relative. They quarrelled about the castles of Brisach and of Neuenburg. The two armies had for chiefs the count and the bishop, and took as many strong places, and desolated as many
NEUMANN  
NEUMAN

with an ophthalmic complaint, at one time almost amounting to deprivation of sight, but he partially recovered from it. See Petits, Biographie Universelle des Musiciens, s. v.; English Cyclopedia, s. v.; Enzyklopädie der Stigmazidum Konnen par lui même, in La Maitrise (Paris, 1859).

Neumann, Johann Georg, a German theologian, was born in 1661 at Hertz, near Merseburg. He was educated at the University of Wittenberg, and became in 1830 professor of poetry and librarian in his alma mater, and in 1892 obtained a theologian's chair; he was called later to the dignity of provost of the court chapel. His death occurred in 1709. Neumann was one of the principal adversaries of Spener. He wrote more than a hundred and twenty dissertations upon theological, historical, and literary subjects, most of which are collected in his Promissione (Wittenberg, 1700, 1707, and 1716, 8vo), and in his Programmata academica (ibid. 1707 and 1722, 4to). He also published the biographies of several theologians; among them Huldin, Hutter, Runge, etc. See Schobäch, Vita Neumanni (1716, 8vo); Raaff, Leben der Gottesäule (1723, 4to); and Richter von der Schloss-Kirche zu Wittenberg; Gass, Dogmengesch. iii, 57; Erdmann, Biographien der Propheten zu Wittenberg.

Neumann, John Nepomucæus, D.D., a Roman Catholic prelate, was born in Bohemia, March 28, 1811, and came to this country upon the completion of his university course at the high school in Prague. He took his degree of doctor of divinity, 1856, at the University of Munich, and entered the Order of the Most Holy Redeemer. After leaving several appointments as priest, he was consecrated bishop of Philadelphia March 28, 1852, and he held that episcopal see until his decease, Jan. 5, 1860. Bishop Neumann was generally esteemed and much beloved by his people. He was a man of more than ordinary ability.

Neumann, Carl Friedrich, a distinguished German Orientalist, ethnographer, and historian, was born, of Jewish parents, Dec. 22, 1798, at Reimannsdorf, near Bamberg. With no means, but by hard study and diligence, he was enabled in the year 1817 to go to Heidelberg to attend the lectures there. In 1825 he joined the Christian Church, taking instead of his former name, Bamberger, that of Neumann, under which he became known to the literary world. Upon the completion of his studies at Heidelberg and Munich, he was appointed in 1821 as professor at the Gymnasium of Speier, but on account of his liberal views he had to give up his position in 1825. He then went to Van, where he studied the Armenian language with the Mechitarian in the monastery of St. Lazarus; he then continued his Oriental studies at Paris and London; and in 1840 he went to India and China, with a view to becoming thoroughly acquainted with the Chinese language and literature. He there collected a library of about 12,000 volumes, chiefly on Chinese literature; and after his return he was appointed, in 1833, professor at Munich, where he lectured on the Chinese and Armenian languages and literature, on ethnography, universal and German history, until the year 1852, when he was discharged, for his liberal religious and political views. He settled at Berlin in 1853, and there he remained until his death, which occurred March 17, 1870. He was a close student of political and philosophical phases in history, and was greatly devoted to republican institutions. The American government he admired, and warmed at every American who had occasion to see. He was a diligent minger of Jahren in Berlin, and was much sought after by all literature-loving strangers in the German capital. He wrote, Memoirs sur la vie et les œuvres de David, philosophe Arménien (Paris, 1829)----Catechismus der Shamaa (from the Chinese, 1831)----Pflegröffrathen buddhistischer Priestere aus China nach Indien (Leipsic, 1833)----Lehralt der Mittelreiche (Munich, 1836)----Verzeichn der Geschichte der armenischen Literatur (Leipsic, 1856)----Translations und Sagen der armenischen Bibel, with Notes and Illustrations (London, 1889)----Geschichte der Armenischen Reiche in Armen (Leipsic, 1857, 2 vols.)----Geschichte der Vereinigten Staaten von Amerika (Berlin, 1863-1866, 3 vols), besides a number of essays, which were published in the Zeitchrift der German Oriental Society (4, 91-125, 177); iv, 38-40, 223-246; vii, 141-155; viii, 299; A translation of his Russian Discovery of America by Buddhist Monks in the 6th Century, was published at London in 1874. See Kalkar, Israel u. die Kirche (Hamburg, 1869), p. 128; Literarischer Handwéser, 1870, p. 488 sqq.; Kurz, Gesch. d. deutschen Literature (iv, 867, 929; For. Quar. Rev. xxxi, 126, 255. (J. H. W.)

Neumann, Caspar, a German theologian, noted as a Hebraist, was born at Breslia, in Silesia, Sept. 14, 1648. After graduating at the Gymnasium of St. Magdalena, he went in 1667 to Jena to study theology. Three years later he published his dissertation on the Roman Catholic Church (Dissertatio de Ecclesia Catholicó), and the university conferred on him the title of "magister." He soon commenced lecturing on Church history, and his lectures were attended by a great number of students. At the recommendation of the divines of Jena, duke Ernest the Fious, of Gotha, appointed him as the fellow-traveller of his son, prince Christian, with whom Neumann went through Germany, Switzerland, Southern France, Savoy, and Upper Italy. In 1678 he was appointed superintendent of the Lutheran schools in Altenburg. A year later the authorities of his native place appointed him to the diaconate of St. Mary Magdalena, and in 1689 as pastor of the same church and assessor of the consistory. In 1697 he became superintendent of the evangelical churches and schools, pastor of St. Elizabeth, and first professor of theology at the gymnasium. He died Jan. 27, 1718. Besides devotional works, he wrote Psałmim.people, Gnesinus lingua sancta Vetus Test. (Norim. 1696)----Exodus lingua sancte e capitulata Babylon, tractus in Lexico etymologico Hebraobibliico (ibid. 1697-1700)----Hallelujah, Janua ad significatiom hieroglyphicam literarum Ebraorarium, etc. pt. iii (Breslau, 1712)----De punctis vocitibus (ibid. 1715). Possessed of great learning, he was likewise a very pious and saintly man, full of love for humanity. He is also the author of thirty-nine hymns, which are yet to be found in many hymn-books. The best known is his Herr, auf Erden muss ich leben (English translation in Choral-book for England, No. 66, "Lord, on earth I dwell sad-hearted"). See Tacken, Life of M. Caspar Neumann (Breslau and Leipzig, 1714); Koch, Gesch. d. deutschen Kirchenleides, v, 456 sqq.; Jüger, Griesheim, Lexicon, iii, 881; supplement by Rottermund, v, 265; Knapp, Evangelischer Liederbuch, p. 1393, s. v.; First, Biblioth. Judeaica, iii, 30; Steinmuller, Biblioth. Handbuch, p. 101; Bleek, Einleitung, in das A. Test. p. 132; Keil, Introduction to the Old Testament, ii, 176. (B.P.)

Neumann, Joachim, a noted German educator and Hebraist, was born at Brody, in Austrian Poland, in the year 1778 or 1775, of Jewish parentage. Up to his thirteenth year he received his education in the house of his father, who then left for Posen, where he was enabled to satisfy his thirst for knowledge. Towards the end of the last century he obtained an appointment as teacher in a celebrated Jewish school at Dessau, where he remained until the year 1807. During his residence there he published a Hebrew grammar, and a Hebrew dictionary. During the last year of his life he published a second Hebrew and a translation of the twelve minor prophets, which was accompanied by a Hebrew commentary. At that time a great change had taken place among the Jews living in different parts of Prussia with regard to their social position. About the year 1790 the king of Prussia granted the Jews who had obtained permission
to live in Breslaus an exemption from the taxes which had formerly been imposed on them when obtaining such permission, on the condition that they should establish a school for the poor children of their community. This permission was granted by the University of Wilna in 1759, and in 1807 Neumann was invited to become the head master and inspector of that school. For about nineteen years he had charge of that institution, i.e. from 1807 to 1826. During his connection with this school Neumann had been on terms of the most intimate friendship with professors Strobel and Schmelzer, who were the means of bringing him to the knowledge of the truth as it is in Christ. Satisfied of the necessity of accepting Christ as the Messiah, he was baptized on April 16, 1826, together with his wife and three sons, in the parish church of St. Elizabeth, by professor Schmeilzer, having accompanied the sponsors professor Branissi, of the University of Breslaus, his brother-in-law. Neumann was now engaged as a teacher of Hebrew in the university, in which, besides professor Branissi, professor Fischer, professor of chemistry—another brother-in-law of his—were distinguishing themselves. Neumann died suddenly, March 3, 1863. His second son is now professor of medicine in the University of Breslaus. Neunmann wrote besides his Commentary on Amos, Nahum, Hosea, Zechariah, and Malachi, which was published at Dessau in 1805, under the title, "בישההה הים הים הים הים הים הים הים הים הים הים הים הים הים הים הים הים הים הים הים הים הים הים הים הים הים הים הים הים הים הים הים H", a Hebrew Chrestomathy in 2 vols. (Breslaus, 1821). See Fürst, Bibl. Jud., iii, 30; Steinheisser, Bibliographisches Handbuch (Leipsic, 1859), p. 101; Jewish Intellectuals, 1865. (B. F.)

**Neumatic, Georg**, a German musician and author of a great number of sacred songs, commonly heard in the churches of Hungary, was born in Thuringia about the year 1621. His parents, who were poor, soon after went to reside at Mullhouse, in France, which accounts for his having often been considered a native of that city. In 1648 he went to study law at the University of Königsberg, where Simon Dach, the centre of the Königsberg school of poetry, was professor of poetry and poet-laureate. Dach was also a great musician. Under the influence of the young law student became, like the professor, a musician and a poet. When a student Neumatic frequently suffered for want of food. In 1651 he went to live at Hamburg. There his poverty was so great that he was obliged to pawn his violino and several stringed instruments to a Jew, upon which he played very skillfully. In the midst of his sufferings he refused every unworthy method of seeking a livelihood, and preserved his simplicity of life and his trust in God. An attendant of the Swedish ambassador being greatly moved by a hymn which Neumatic had sung in his Latin upon his violin, which the Jew, pawnbroker had permitted him to use, sought him out, learned his story, and afterwards repeated it to his master. The result was the young poet was appointed secretary of the ambassador. His first act on receiving the joyful news of his appointment was to redeem his violin. Then, as an expression of the way in which his faith had been justified by the issue, he composed his most famous hymn, *Wer nur den lieben Gott läst wolten*, translated into our tongue by the Lyra Germanica of Susanna Winckworth as "Leave God to order all thy ways." In 1651 he settled at Weimar, where he was appointed by duke William IV librarian of the royal archives. He lived a life of cheerful confidence in God, often giving expression to his pious sentiments in Christian hymns, and died at Weimar, July 8, 1681. Besides his numerous poetical productions, which were often published, Neumatic wrote also some historical essays in Latin, such as *De transitu et bellis Siculi orientals*. — _Compendium de Collate et Lynæus_, etc. a history of the successful society to which he belonged.—_Hochprophetender poetischer Palmsbaum_ (Nuremberg, 1670). The American Tract Society has published an English version of his hymns. See Miller's _Singers and Songs of the Church_; Koch, _Gesch. des Kirchenleides_, vol. i, ii, and iv; Herzog, _Real-Encyclop. x, 300._

**Neumann, Jehuda Löb** (Ben-David), of Ha- naui, a Jewish writer of note, flourished near the opening of the 18th century. He died April 5, 1729. Jahn, in his *M. H.*, mentions Neumann in the preface to his *Biblia Hebraica cum notis Hebraicis* (Berlin, 1699) as the author of a Hebrew Grammar, entitled *יִנְוָמֵן הַגְּנָב* (Frankfort-on-the-Main, 1683), which was long used and valued. In the preface to this grammar Neumann gives a history of the best Hebrew grammarians, and criticises very sharply the neglect of Hebrew philology. See Friedlaender, _Jahrbücher_, iii, 31; De Rossi, _Dizionario_, vol. II, p. 245 (Germaine Kalsi, _Hebr. Grammar_, ii, 55; Steinsheisser, Bibliographisches Handbuch, p. 101; Catalogus Libr. Hebr. in Bibl. Bodleiana, p. 1364; Zunz, Monatsblatt des Kalend.-jahreshefts, p. 18 (Berlin, 1872); Eng. transl. by the Rev. B. Pick in _Jewish Messenger_, New York, 1874. (B. F.)

**Neumeister, Erdmann**, a German Protestant divine and author of numerous hymns, was born at Uebritz, near Weisenfels, May 12, 1671. He studied first at the school of Pforz, and afterwards at the University of Leipzig. In 1697 he became pastor at Bibra, in Thuringia, and filled successively the same office at Eckartsberg, Weisenfels, Sorau, and Hamburg, where he died March 28, 1758. He was one of the most active of pietists and of chiliasm, and held fast to the old orthodoxy. Neumeister is best known by his hymns, of which he wrote about 700; some of them are truly excellent, and still in use. Among these we notice; "Gott macht ein grosses Aeusser- macht," etc.; "Jesus nimmt die Stiinde an," etc. (Engl. transl. in _Mill's Horse_ Germannic., p. 73, "This man sinners doth receive"); "Wie Gott will!" also "Will ich sagen" (Engl. transl. in _Hymns from the Land of Luther_, p. 155, as "Thou will, my God, I ever say"); and "Lass irische Geschafte stehn," etc. He wrote also a Specimen dissertationes historico-critica de poetis Germanicis. His poetical works are, _Fünfische Kirchen- undachten_ (1716 and 1717):—Fortgepflegte Fünfische Kirchen- undachten (1726):—_Evangelischer Nachklang_ (1718-1729):—_Zugang zum Gnadenstuhl_. See Herzog, _Real-Encyclopädie_, x, 301; Koch, _Gesch. des deutschen Kirchenleides_, v, 371 sq.; _Döring, Die Deutschen Kanzelreden 1295-1650_, p. 1389 sq. (J. H. W.)

**Neuser, Adam**, a German Socinian theologian, was born in Swabia in the 16th century. Educated in Lutheranism by his parents, who belonged to that communion, he entered the Reformed Church, after having finished his studies, probably because he sought greater liberty of thought than he could find in the Lutheran Church. He then established himself in the Palatinate, and soon gained the good-will of the elector, who appointed him pastor of St. Peter's Church of Heidelberg, and who even formed the project of giving him a professor's chair in the university of that city. But this project, wishing in 1639 to introduce into his state the ecclesiastical discipline of the Church of Geneva, Neuuser strongly resisted the innovation, perhaps not so much because it departed from the civil power as because this discipline, by an excessive rigor, would have caused an intolerable weight of ecclesiastical despotism over the Reformed Church of the Palatinate. The general opposition deprived him of the good graces of the elector, and he was dismissed from the pastorate. Neuser now openly espoused Socinianism, to which he had long inclined, and he exerted himself to spread its principles among his friends. Sylvanus, pastor at Ludenbourg, joined him in this effort. Neuser went to the bishop of Breslau, physician of the viceroy of Transylvania, and to some other ministers who possessed the Socinian opinions. It is related that Neuser and Sylvanus sought to assure themselves of the protection of the sultan Selim, but that they were betrayed
by the ambassador of the valdey of Transylvania, whom they had charged with this negotiation, and that the ambassador was detained. Whatever may be the true history of it, they were certainly arrested, and conducted to Amburg. Sylvanus was decapitated in 1572; Neuser succeeded in escaping from his prison, and, after having wandered over the country for some time, arrived in Constantinople, where he died, as Jehiel Judah, in the 40th year of the Babylonian Captivity, Oct. 11, 1576. As might be expected, the memory of this restless and adventurous man has not been spared. He has been accused, though without apparent ground, of all vices, among others of drunkenness. It is just to add that those who have painted him in black colors recognize, however, by a singular contradiction, that there never was anything to reprimand in his conduct except his departure from orthodoxy, and this, of course, must be regretted. We are assured that he obtained a great ascendency over the people of the Palatinate, and that he owed this extraordinary consideration as well to his religious zeal as to his eloquence. It is a pity that a man of his ability should have suffered himself to be led away from his moorings to land finally in Mohammedanism. The biographical Lexicon of Jocher assures us that he has left no printed work; the Biographie Universelle, on the contrary, pretends that his writings are numerous, and that they have been collected by the Societian, the Bibliothèque des Anti-Trailaisen, which calls him Neuser, quotes but one—Scopus Septimus Capituli ad Romanos (Inngoldstadt, 1583, 8vo). His letter to Selm, if it be authentic, is found in the collection of Mieg—Monumenta pietatis et litterarum (Frankfort, 1702, 4to), p. 1, p. 318; vol. iii. of the Mélanges tiris de la Bibliothèque de Wolfenbüttel has another letter of Neuser, containing the apology for his conduct, dated at Constantinople the Wednesday before Easter of the year 1574. See Jocher, Gelehrten-Lexicon, s. v.; Hoefer, Nouv. Bioq. Générale, s. v.; Gaub, Dogmengesch. ii. 21. (J. H. W.)

**Neuss, Heinrich Georg, D.D., a German Lutheran theologian,** was born, March 11, 1654, at Eblingroda, in the duchy of Brunswick. He received his early education at Osterwick, Quellenburg, and Halberstadt. Being very poor, he accepted the private tutorship in the house of Dr. Reecius, in Wernigerode, a position which he held for three years, until, in 1677, he was enabled to go to Erfurt, where he studied theology. In 1693 he was appointed preacher at Blankenburg, and in the year 1696 was promoted to the chair of Re. Chr. Schmidt in Wolfenbüttel, and then deacon at the church of St. Henri. Here he became intimately connected with two other pious ministers, who commenced to hold private meetings for devotional purposes. Soon, however, these meetings were openly spoken against, especially under the lead of Fr. Urs. Calixt, of Helmstedt, who wrote against chiliasm, and the result was that in 1692 an edict was issued which forbade such pietism as heresy. These three men then left Wolfenbüttel. Neuss was called to Heldigsburg, and three years later, in 1656, the duke Rudolph Augustus appointed him superintendent in Remlingen. He died in 1661, and in 1656 count Ernest von Stolberg called him to Wernigerode as pastor principis at St. Sylvester and George, and superintendent and councillor of the consistory. Neuss died there Sept. 30, 1716. Besides some theological works, he also published a collection of 154 hymns which are celebrated in the Hymnology of the best-known of his hymns is his "Ein reines Herz, Herr schaff in mir" (Engl. transl. by E. Cox, in Hymns from the German, p. 176, "A new and contrive heart create"). Comp. Koch, Gesch. d. deutsch. Kirchenliedes, iv. 425 sq.; v. 579 sq.; Jocher, Gelehrten-Lexicon, iii. 888; supplement by Rottmann, v. 599 sq.; Jesal, Hymnology (Herrnstadt, 1721), ii. 240 sq.; Winterfeld, Der zwang. Kirchengesang (Leips. 1814), ii. 522-533. (B. P.)

**Neustadt, Bible of,** is the title of a revision of Luther's version of the Scriptures made at Neustadt in 1538 by the Reformed Church to express more clearly the Calvinistic notions of that body. The master spirit in this revision was David Pareus, who died in 1560. The work, Herbornia, was brought out by the Reformed body, and it met with less opposition. See, however, the articles Pareus (David) and Sigwart.

**Neuville, Charles Frey de, a French pupil orator, brother of the following, was born in the diocese of Coutances, Dec. 28, 1633. He was educated in the college of the Jesuits, who, recognising his ability, initiated him into their order in 1710. He taught belles-lettres and philosophy for eighteen years, when he made his debut in the pupil, where he had great success (1726). After the dissolution of his society, his presence, quite inoffensive, was tolerated in France, and, under the protection of the king and queen, he lived unmolested but retired. His death occurred July 13, 1774, in St. Germain-en-Laye. We have of his works, Oraison funèbre de M. le Cardinal de Fleury, etc. (Paris, 1743, 4to, and often)—Oraison de très-haut, très-puissant seigneur Charles-Auguste Fouquet de Belle- Isle, duc de Gaule, pair et maréchal de France, etc. (Paris, 1761, 4to); —Jérémie, Paris, 1755, 8 vols. (S. C.); Lyons, 1778, 8 vols. (12mo). These sermons have been translated into German by J. B. Dili (Vienna, 1777-80, 8 vols. 8vo) and by Priest Joh. Buchmann (Augustburg, 1841, 12mo); into Spanish by Juan-Antonio Pellicer, Juan Ceron, and Fontela (Madrid, 1784); and into Italian (Venice, 1776, 8 vols. 12mo). Neuville has collected three volumes of Observations hist. et crit., but the fear of wrong interpretations and of compromising his editors determined him, some days before his death, to throw his manuscript into the fire. Biographers have often confused this ecclesiastical orator with his brother, and with Anne Joseph de la Neuville. See Caballero, Bibliotheca scriptorum Societatis Jesu (Rome, 1814-16, 4to); Aloys and Alphonse de Backer, Bibl. des ecrivains de la Compagnie de Jesus, 1st series, p. 519, 520.

**Neuville, Pierre-Claude Frey de,** a French theologian, was born at Grandville, Sept. 5, 1622. His family were originally from the canton of Bassle, and went for some unknown cause to dwell in Britain. Neuville entered, Sept. 12, 1710, the Society of Jesus, where he occupied honorable and responsible positions. Twice he was provincial. He was a good preacher. When his order was threatened with dissolution (1768), he died quietly in his belongs; but in Paris, where he died in August, 1775. We have of his works, Sermons (Rouen, 1778, 2 vols. 12mo)—Observations sur l'institut de la Sociéte de Jesus (Avignon, 1761, 2 vols. 1711, 12mo)—Lettre d'un ami de la vérité à ceux qui ne laissent pas la lumière, ou réflexions critiques sur les reproches faits à la Sâbrité de Jesus, parallèle à la doctrine (1790). See Raymond Diodata Caballero, Bibliotheca scriptorum Societatis Jesu (1814-16, 4to); Feller, Supplement de la France littéraire; Noveau appel à la raison des écrivains libelles publiés par la passion contre les Jésuites de France (Brussels, 1761, 12mo); Alphonse de Backer, Bibl. des ecrivains de la Compagnie de Jesus; Barthez, Dict. des Anonymes, No. 9643; Catalogue paroxymique et officierorum provinciae Francia societatis Jesu, ann. 1759, p. 8.

**Neuville (de Plessis-Bardou), Roland de,** a noted French prelate, was born in 1530. He was abbé of St. James of Montfort when, in 1562, he was nominated bishop of the see of Poitiers (1565, 8 vols. 12mo); the duke d'Étampes, in the place of Roland de Chauvigné. Though he may have assisted at the Council of Tours (1568), and may have subscribed to the edicts of toleration published in 1569, Neuville showed himself none the less a violent persecutor of the Protestants; he boasted of not having left a single heretic in his diocese. He died in Rennes, Feb. 2,
1618, after fifty years' episcopate. The library of Lyons possesses, No. 41, a very beautiful Missale ecclesiae Galliciae,folio, written in many Gothic characters and illuminated with excellent vignettes, which appears to have been the property of Roland de Neuville.

Nevey, John, a noted Scotch Presbyterian minister, who flourished in the days of the English Revolution as pastor of Newmillis, in the parish of London, was identified with the struggle for the independence of the Kirk, and in 1647 gained unequivocal notoriety by the severe measures which he counselled general Leslie to adopt against the British soldier. But, though severe with his opponents in religion, Mr. Nevey cannot be said to have lacked in religious devotion and Christian zeal. He is commemorated by contemporaries and contemporaries of the Kirk for soundness in the faith, shewing plenty in conversation, and great diligence in attending all the parts of his ministerial functions, particularly church judicatories; one who was always very zealous in contending against steps of defection contrary to the work of reformation carried on in that period. See Sraits Worthies, p. 267.

Neve, Francois de, a Flemish painter of sacred subjects, was born at Antwerp, according to Balkinga, in 1625. He studied for some time in Rome, and afterwards visited Rome for improvement, where he resided several years. On returning to Flanders he painted a number of good historical works which gained him considerable reputation; but he afterwards painted several religious landscapes with subjects from history or fable, in which he shewed great facility of invention and refinement of taste. Bartsch mentions fourteen etchings by this artist, executed in a slight but very masterly style, embellished with figures correctly drawn and ingeniously grouped. Neve died in 1681. See Spooner, Blog. Hist. of the Fine Arts, ii, 615.

Neve, Timothy (1), D.D., an English divine, was born at Wotton, in Shropshire, in 1694, and was educated at St. John's College, Cambridge University. After graduation he taught for a while at Spalding, and was made minor canon of Peterborough; while there he was a joint-founder of "The Gentleman's Society," of which he was for a long time secretary. He was afterwards successively prebendary of Lincoln, archdeacon of Huntington, and rector of Alwalton, in Huntingdonshire, where he died in 1755. Dr. Neve was chaplain to the bishop of Lincoln, Dr. Thomas, and is spoken of by his contemporaries as a worthy man and a close student. He published one sermon, entitled Preaching with Authority (Oxf. 1747). He also published several astronomical papers which have been republished in this country in the Philosophical Transactions; also an essay on the Invention of Printing.

Neve, Timothy (2), D.D., an eminent English divine, son of the preceding, was born at Spalding in 1724. He studied at Corpus Christi College, Oxford, of which he was elected fellow in 1747. He became successively chaplain of Merton College, rector of Geddington (in 1762) and of Middleton Stoney was a suggered by Margaret of divinity at Oxford, and installed prebendary of Worcester in 1783. He died in 1798. He was an able theologian and scholar. He published a sermon preached before the earl of Westminster, chancellor of the University of Oxford, July 8, 1789, and entitled The Comparative Blessing of Christianity—Eight Sermons preached in 1781, at the Lecture founded by the Rev. John Bougton (Oxf. 1781, 8vo);—Seventeen Sermons on various Subjects (ibid. 1798, 8vo);—Compare the Views of Life of Cardinal Pole (ibid. 1766, 8vo). See Darling, Cyclop. Bibliographica, i, 2169; Gen. Biog. Dict., s. v.; Hook, Biog. Dict., s. v.

Neilde, Thomas, D.D., an English theologian of the Elizabethan period, noted for his strict adherence to the Calvinistic doctrines in a sharp and decisive form, was born at Canterbury, educated at the University of Cambridge, and became a fellow of Pembroke Hall, Cambridge, in 1576. Ten years after we find him presiding over the university in Oxford, and in 1582 was connected to the mastership of Magdalene College. In 1590 he was promoted by the queen to the deanery of Peterborough. In 1593 he was appointed to the mastership of Trinity College, and in March, 1594, resigned the rectory of Doddington, on being presented to that of Teversham, near Cambridge. In 1595 he was connected with the controversy which originated at Cambridge from the public declaration of William Barret, fellow of Caius College, against the doctrine of predestination and falling from grace. On these points, the general persuasion being then favorable to the system of Calvin, Barret was called before the Court of the Church, and compelled to retract his Arminian opinions. This transaction, however, which was referred by both parties to archbishop Whitgift, occasioned the well-known conference of the divines at Lambeth (1595), where they agreed on certain propositions, in conformity with Calvin's principles, commonly called the Lambeth Articles (q. v.). Dr. Neve and his brethren soon after had to complain of Dr. Barret, lady Margaret professor of divinity, for maintaining some doctrines respecting universal salvation diametrically opposite to those of the Lambeth Articles, in consequence of which he was removed from his station in the Church. For a full account of this, see the life of Peter Barret (q. v.). Collart, Biog., Hist., vol. ii, p. 211; Bishop, Historical Essays, Annals, iv, 322.) In 1597 Neve was promoted to the deanery of Canterbury. He was in this position on the accession of king James to the throne of England, and was by archbishop Whitgift, in his own name and of all the bishops and clergy, sent into Scotland to give his majesty assurance of their unfeigned duty and loyalty, and to know what commands he had for them to observe concerning ecclesiastical causes; recommending also the Church of England to his favor and protection. The Puritans had always hoped much for the Presbyterian cause from this king, and the Anglican clergy were therefore greatly anxious as to the result of this mission, which was evidently intended to win him over to the support of the Anglican establishment. It proved that Dr. Neve was the right man for this mission. He impressed the king favorably, and was given the assurance that he (i.e. James) would uphold the government and discipline which he left it. This answer was quite in conformity with king James's actions in Scotland (see the article James I in vol. iv). He was inclined to Romanism, but fearful to offend by such an extreme departure, he halted in the Anglican camp, and from henceforth favored Episcopalanism. Neve himself afterwards became a prominent recipient of king James's favor. Thus the king, when on his visit to Canterbury in 1615, accepted the hospitality of Dr. Neve, then at Trinity College. Dr. Neve died in 1615, shortly after king James had visited him. By his munificence to Trinity College Dr. Neve has secured to himself the gratitude and admiration of posterity. He expended more than £3000 in rebuilding that fine quadrangle which to this day retains the name of Neve's Court. He was also a contributor to the library of the college, and a benefactor to Eastbridge Hospital in his native city. See Hook, Eccles. Biog. vii, 402-404; Stoughton, Eccles. Hist. i, 19; Somers, Elizabethan Religious History, p. 454, 471-473, 517; Froude, Hist. of Eng. (see Index in vol. xii). (J. H. W.)

Nevin, Thomas, an Irish Presbyterian divine, flourished after the opening of the 18th century as pastor of a church in Downpatrick. This church belonged at this time to the synod of Ulster, which was then greatly agitated by the question whether the Presbyterian ministers could refuse to sign a confession on the ground that by such an act they gave up the right of private judgment. Mr. Nevin belonged to the party who at the synod of 1721 refused to subscribe to the Westminster Confession, and were therefore named
Non-Subscribers. They were open to much suspicion; and after the synod of 1728, when the controversy regarding the propriety of intercommunion among the subscribers and non-subscribers had become general, Mr. Nevin, having carelessly expressed himself on the Trinitarian doctrine, was forthwith accused of heresy, and brought to trial in the synod of 1724; and though "satisfactory proofs were laid before the synod of Mr. Nevin's orthodoxy in this cardinal point of the Saviour's Deity, . . . the synod, disregarding these testimonies, and fully aware of Mr. Nevin's determination not to clear himself, under existing circumstances, by any declaration or subscription, resolved not to inquire further into the truth or relevancy of this accusation, but simply to require of him an immediate declaration of his belief in the Supreme Deity of Christ. With this demand, as was to be expected, he refused to comply, as the principle so frequently avowed by the non-subscribers that to clear himself by any such method was directly sinful; but he added that his refusal did not proceed from any disbelief of the doctrine of the Supreme Deity of Christ. Nothing, therefore, could be held to be proved against him, beyond the fact of his being a non-subscriber, like the rest of his party. Yet it was moved that, as Mr. Nevin had refused to make the declaration required of him, the synod should hold no further ministerial communion with him, nor proceed any further in his trial. This motion was carried." By the peculiar nature of the sentence passed on him, Mr. Nevin, though deprived of ministerial communion with the synod, was yet suffered to enjoy his ministerial character, and he therefore remained pastor of Downpatrick. He died about 1730. See Killen's Relit, History of the Presbyterian Church in Ireland, iii, 206 sq., 219 sq.

Nevins, William, D.D., a noted Presbyterian minister, was born in Norwich, Conn., Oct. 13, 1797. After a mercantile education, he entered Yale College in 1812, and graduated in 1816. He then became a member of the Princeton Theological Seminary, and was licensed to preach at Lisbon, Conn., in September, 1819. On Oct. 19, 1820, he was ordained and installed pastor of the First Presbyterian Church in Baltimore. His health having become impaired, he went for some time to St. Croix to try the effects of a milder climate. Not deriving any benefit from it, however, he returned to Baltimore, and there died, Sept. 14, 1835. Dr. Nevins published two sermons in the National Preacher, and five tracts through the American Tract Society. Shortly after his death there was published a selection of his manuscripts, entitled Select Remains, with a memoir by Rev. William S. Plumer, D.D. His contributions to the N.Y. Observer were published about the same time in two small volumes, entitled Thoughts on Popery and Practical Thoughts. A volume of Sermons, selected by himself, was printed in 1837. All of his publications were most acceptable at the time of their appearance, and have continued to exert an influence for good to this time. As a pastor and preacher Dr. Nevins was deservedly popular. See, besides the memoir already referred to, Sprague, Journal, iv, 629.

Nevis, a small but beautiful and fertile island of the West Indies, belonging to Great Britain, forms one of the group of the Lesser Antilles, and lies immediately south-east of St. Christopher, from which it is separated by a strait called the Narrows, two miles wide. It is circular in form, rises in a central peak to the height of about 2500 feet, and has an area of 45 square miles. Population (1871), 11,755, of whom only a small proportion, not more than one fifth, is white. Charles-town, a seaport, with a tolerable roadstead, situated on the south-west shore of the island, is the seat of government, consisting of a government council and general assembly. The principal products are sugar, molasses, and rum. Nevis was colonized by English emigrants from St. Christopher in 1628, was taken by the French in 1760, and restored by the peace of Utrecht; it was taken again by the French in 1782, but restored by the peace of 1783. The Romanists have many adherents in Nevis. The Wesleyans, who were the first Protestant missionaries to preach in the West Indies, established a station at Gingerland, and are laboring there with some appearance of ultimate success. At Charlestown the United Presbyterian Mission is pushing the work of evangelization, especially among the blacks.

Additional Note on the Mormons.—Since our article on this subject was written, the collision between the Mormon authorities and the United States government—which is still the supreme and sole general civil administration in the territory, Congress having steadily refused to admit Utah as a State in the Union without such stipulations on the subject of polygamy, and especially safeguards to loyalty, as the Mormons are unwilling to accept—has resulted in the federal court taking possession of the Mormon premises in Salt Lake City, practically confiscating, or at least occupying and controlling, them, on the ground of treason; and it is said that the Mormons are secretly preparing for another migration, this time to Mexico, where they have purchased a large tract of land, so as to be beyond our jurisdiction. The temple is nearly completed, although likewise in the hands of the general government; but it is not to be used by the Mormons as a place of worship, for which indeed its interior construction is not adapted, but for purposes of ecclesiastical ceremony and general office work. The denunciatory tone of Mormonism is now greatly moderated; and although the old style of declamation on the subject of civil power is still maintained, its tone is greatly softened, and all talk of open or forcible rebellion is abandoned. Criminal suits have been instituted, and are still pending before the U. S. courts, also against many leading Mormons for bigamy, adultery, and other unchaste practices, and in consequence polygamy is generally abandoned, at least in public, by the sect as a whole. The general aspect of the situation points to a speedy disruption of the Mormon community in Utah, especially as the influx of non-Mormon immigrants is gradually but surely overcrowning them.
