Shali'isha (some Shall'isha) (Heb. *Shalishah*, שַׁלִישָה, πρίγκιπας triangle; Sept. *Σαλασσα* v. *Σαλάσσα*), a district (γῆς, "land") traversed by Saul when in search of the asses of Kish (1 Sam. x, 4). It apparently lay between the "Mount Ephraim" and the "land of Shallum," a specification which, with all its evident preciseness, is irreconcilable, because the extent of Mount Ephraim is so uncertain; and Shallum, though probably near Tiyibiah, is not yet definitely fixed there. The difficulty is increased by locating Shallishah at *Sâhir* or *Khâbîr* Sâhir, a village a few miles west of Jerusalem, southeast of *Ophel* (Tobler, *Ortlin.* p. 178), which some have proposed. If the land of Shallishah contained, as it did not, the village called Shallishah (2 Kings iv, 22), which, according to the testimony of Eusebius and Jerome (*Onom.* s. v. "Beth Shallishah"), lay fifteen Romanas (or twelve English) miles north of Lydda, then the whole disposition of Saul's route would be changed. The poetae Lugubri *Shallim* in Jer. xxvii, 34 (A. V. "a heifer of three years old") are some translators rendered as if denoting a place named Shallishah. But even if this be correct, it is obvious that the Shallishah of the prophet was on the coast of the Dead Sea, and therefore by no means appropriately for that of Saul. Lieut. Conder proposes (*Test Work in *Palest.*, ii, 339) to identify Shallishah with *Kefer Thilb*, a ruined village on the western slope of Mount Ephraim, situated on the south side of Wady Azzun, which runs into the river Kanah (Robinson, *Later Researches*, p. 156, note); but there is nothing special to recommend the site or the name Shallishah with any considerable correspondence in the names. See RANAHS.

Shal'leceth (some Shallecheth) (Heb. *Shalleketh*, שׁלְלֶכֶת, overthrow; Sept. ἀπορροφῶ, the gate on the west of Solomon's temple, which fell to the lot of the porters Shuppim and Hosah (1 Chron. xxvi, 16). As it led to Mount Zion by the "causeway" (farther the bridge), it probably was that called *Kippom* (Coponius) in the Talmud (*Middoth*, i, 3). It is probably also identical with the gate *Sur* (2 Kings xi, 6) or that of the "Foundation" (2 Chron. xxvii, 5). If, however, the causeway be the same as that by which the water is now conveyed to the Haram, the gate in question may be the present Bab Sidleh, much farther north. See TEMPLE.

Shal'mon (Heb. *Shallum*, שַׁלּוּם, retribution; Sept. usually Σαλλούμ, the name of at least twelve Hebrews.

1. The youngest son of Naphtali (1 Chron. vii, 18), called also SLILM (Gen. xlii, 24). B.C. 1674.

2. The third in descent from Simeon, son of Shal and father of Mibsam (1 Chron. iv, 25). B.C. ante 1618.

4. Chief and chief of the porters of the sanctuary in David's time (1 Chron. ix, 17 sqq.). B.C. cir. 1050. He seems to be the same Shallum whose descendants returned from captivity (Ezra ii, 42; x, 24). Neh. viii, 45. He is apparently elsewhere called *Mehullem* (xxii, 25), *Mehullemiah* (1 Chron. xxvi, i), and *Shelumiah* (ver. 14). He was perhaps also the same with the "father" of Maaseiah in Jer. xxxi, 4.

5. Son of Zadok and father of Hilkiah, a high-priest (1 Chron. vi, 12, 13; ix, 11), and an ancestor of Ezra the scribe (Ezra viii, 2). B.C. post 900. He is called Sallum by Josephus (Σαλλούμας, Ant. x, 8, 6). He is the Meshullam of 1 Chron. ix, 11; Neh. xi, 11. See HICKEL.

6. The sixteenth king of Israel. His father's name was Jabesh. In the troubled times which followed the death of Jeroboam II (B.C. 781), the latter's son Zecariah was slain in the presence of the people by Shallum (B.C. 769), who by this act extinguished the dynasty of Jehu, as was predicted (2 Kings x, 14). Shallum then made the throne his, but occupied it only one month, being opposed and slain by Menahem, who ascended the throne thus vacated (xxv, 10-15). See ISRAEL, KINGDOM OF.

7. The father of Jehijkiah, which latter was one of the leading Ephraimites in the time of Azah and Pekah (2 Chron. xxviii, 12). B.C. ante 740.

8. The son of Tikvah and husband of the prophetess
SHALLUN

Huldah (2 Kings xxii, 14). B.C. cir. 680. He appears to have been the custodian of the sacerdotal wardrobe (2 Chron. xxi, 22). He was probably the same as Jeremiah's uncle (Jer. xxxiii, 7).

9. King of Judah, son of Josiah (Jer. xxiii, 11), better known as Jehoahaz II (q.v.). Hengstenberg (Christology of the Old Test. ii, 400, Eng. transl.) regards the name as symbolical, "the recompensed one," and given to him in view of his father's death, and of the recompense according to his deserts. This would be plausible enough if it were only found in the prophecy; but a genealogical table is the last place where we should expect to find a symbolical name, and Shallum is more probably the original name of the king, which was changed to Jehoahaz when he came to the crown. It is quite possible the area of the reign of Shallum or Shalash and Zedekiah, it is evident that of the two last Zedekiah must have been the younger, and therefore that the shallum was the third, not the fourth, son of Josiah, as stated in 1 Chron. iii, 15.

10. A priest of the descendants of Beni, who had taken a strange (i.e. idolatrous) wife, and was compelled by Ezra to put her away (Ezra x, 24). B.C. 457.

11. One of the Levitical porters who did the same (Ezra x, 24). B.C. 457.

12. Son of Halohesh and "ruler of the half part of Jerusalem," who, with his daughters, aided in building the walls (Neh. iii, 12). B.C. 444.

Shal’iun (Heb. Shal’iun, שַׁלְיָן, another form of Shallum, retribution; Sept. Σαλαμιος), son of Col-ho-sa, and ruler of a district of the Gophars, the assigned tribe of Nehemiah in repairing the spring gate and "the wall of the pool of Has-shelah" (A.V. "Siloah") belonging to the king's garden, "even up to the stairs that go down from the city of David" (Neh. iii, 15). B.C. 445.

Shal’mai (Heb. margin in Ezra Shalma, שַׁלְמָי, my thanks; text Shalma, שַׁלְמַי; Sept. Σαλμαί; in Neh. Shalma, שַׁלְמָא, my garments; Sept. Σαλμαὶ), one of the head Nethinim whose descendants returned with Zerubbabel from Babylon (Ezra ii, 46; Neh. vii, 49). B.C. ante 536.

Shal’man (Heb. Shalman, שֶׁלֹמֵן, perhaps Persian Salmān; Sept. Σαλμαν; Vulg. Salmone), a name occurring but once (Hos. x, 14, "as Shalman spoiled Beth-arbel in the day of battle"). It appears to be an abbreviated form of Shalmaneser (q.v.). Ewald, however, speaks of Shalman as an unknown king, but probably the predecessor of Pul (Die Propheten, 1, 157; see Simson, Der Prophet Hosen, p. 287). The Sept. rendering יְסַלְמַי, "as he spoiled," renders ἀς Σαλμων and the Syr. שֶׁלְמָן, which the Zalmunna of Judges (ch. viii) gives, from another misreading, a dono eiius qui judicavit (Baal), so that Newcome ventures to translate "Like the destruction of Zalmunna by the hand of Jerubbaal" (Gideon). Indeed, the Vatican edition of the Sept. has ἐκ τοῦ διὸν τοῦ ἱππόβαστου, and the Alexandrian has ἐκ τοῦ εἰκόν τοῦ θεοῦ μεταφρασάν, the readings of the Sept. Beth-arbel. The Targum of Jonathan and Phishit-Syrac give both "Shalman;" the former for סֶלֶם נֶבֶן reading בֶּן "by an ambash," the latter בֶּן, "Beth-el." The Chaldee translator seems to have caught only the first letters of the word ""Arbel," while the Syrian only saw the last two. The Targum possibly regards "Shalman" as an appellative, "the peaceable," following in this the traditional interpretation of the verse recorded by Rashi, which states the same; but: "As spoilers that come upon a people dwelling in peace, suddenly by means of an ambush, who have not been warned against them to flee before them, and destroy all." See Beth-arbel.

Shalmaneser (Heb. id. שֶׁלֹמֵן, signifi. uncertain [according to von Bohlen, fire-worshipper, with which Gesenius agrees]; on the monuments Salmanuzur, or Salman-siar; Sept. Σαλμοναιαςαπρος, but in Tobit "σαλμοναιαςαπρος by some error; Josephus, Σαλμοναςαπρος; Vulg. Salmaneser) was the Assyrian king who besieged and took Sargon before Sargon had immediately after Tiglath-pileser. He was the fourth Assyrian monarch of the same name (Rawlinson, Ancient Monarchies, ii, 135 sq.). Very little is known of him, since Sargon, his successor, who was of a different family, and most likely a rebel against his authority, seems to have had none of his history handed down to literary with So of Egypt (2 Kings xvii, 4). He can scarcely have ascended the throne earlier than B.C. 730, and may possibly not have done so till a few years later. See Tiglath-pileser. It must have been soon after his accession that he led the forces of Assyria into Palestine, where Hosea, the last king of Israel, had revolted against him (verses 5-9). He had come then Hosea submitted, acknowledged himself a "servant" of the great king, and consented to pay him a fixed tribute annually. Shalmaneser upon this returned home; but soon afterwards he "found conspiracy in Hosea," who had concluded an alliance with the king of Egypt, and withheld his tribute in consequence. In B.C. 728 Shalmaneser invaded Palestine for the second time, and, as Hosea refused to submit, laid siege to Samaria. The siege lasted to the third year (B.C. 720), when the Assyrian arms prevailed; Samaria fell; Hosea was taken captive and shut up in prison, and the vast resources of the coasts of the Mediterranean were transported from the other country to Upper Mesopotamia (ver. 4-6; xviii. 9-11). It is uncertain whether Shalmaneser conducted the siege to its close, or whether he did not lose his crown to Sargon before the city was taken. Sargon claims the capture as his own exploit in his first year; and Scripture, it will be found, avoids saying that Shalmaneser took the place. In xvi. 6, the expression is simply "the king of Assyria took it." In xvi. 9, 10, we find, still more remarkably, "Shalmaneser, king of Assyria, came up against Samaria and besieged it; and at the end of three years they took it." Perhaps Shalmaneser died before Samaria, or perhaps, hearing of Sargon's revolt, he left his troops, or a part of them, to continue the siege, and returned to Assyria, where he was defeated and deposed (or murdered) by his enemy. According to Josephus, who professes to follow the Phoenician history of Manander of Ephesus, Shalmaneser engaged in an important war with Phoenicia in defence of Cyprus, B.C. 725. It is possible that the event has been put away; we have no other evidence of the fact; but it is perhaps more probable that Josephus or Manander made some confusion between him and Sargon, who certainly warred with Phoenicia and set up a memorial in Cyprus. Ewald (Ir. Gesch. iii, 310) supposes that the report was to have proceeded from either Sargon's alliance with Egypt, but this is improbable (Knobel, Isra. p. 139 sq.). According to Layard (Nineveh and Babylon, p. 48), he was perhaps the same with Sargon, but this is doubtful. It may yet turn out, however, that he was a deputy, or vicerey, and in that case the discrepancies in this part of the history will receive a ready solution. The Shalman, Shalmut, of the first mention of the two sons of Solomon, who were valiant captains in the body-guard of David (1 Chron. xi, 44). B.C. cir. 1020. See David.

Shamana, in Hindu mythology, is the surname of the god of the underworld, signifying "the stream of hell." Shamanism (a corruption of Sanscr. pramanam) is the ancient religion of the Tartar, and of some of the other Asiatic tribes, and is one of the earliest phases of religious life. It is a belief in sorcery, and a proposition of evil demons by sacrifices and terrific gestures. The adherents of this religion acknowledge the existence of a supreme God, but do not offer him any worship. Indeed, they worship gods of no description, but only demons, whom they suppose to be cruel, revengeful,
SHAMANS 614 SHAMIR

Shamans, a Hindu name given to pious persons among the worshippers of Buddha; a term which passed over from them to the Tartars and inhabitants of Siberia, and became the title of their priests, magicians, and physicians. Hence Shanism is the name given to the religion of most of the tribes of Northern Asia, from Tartary to Kamchatka. By means of enchantments they professed to be able to cure diseases, avert calamities, and acquaint people with the purposes, etc., of the demons. By these arts they acquired a great ascendancy over the people. See SHANISM.

Shamari'ah (2 Chron. xi, 19). See SHMARAIH.

Shambles (םַבָּלָם, from the Lat. macellum, a meat-market). Markets for the sale of meat appear to have been unknown in Judea previous to the Roman conquest. We learn from the Talmud that most of the public butchers under the Romans were Gentiles, and that the Jews were forbidden to deal with them because they exposed the flesh of unclean beasts for sale. Hence Paul, dissuading the Corinthian converts from adopting Jewish scruples, says, "Whatsoever is sold in the shambles, that eat, asking no questions for conscience' sake" (1 Cor. x, 23). See ALISEGEMA.

Shame (עָנִי, nôgin), a painful sensation, occasioned by the quick apprehension that reputation and character are in danger, or by the perception that they are lost. It may arise, says Dr. Cogan, from the immediate detection, or the fear of detection, in something ignominious. It may also arise from native difficulty in young and ingenuous minds, when surprised into situations where they attract the especial attention of their superiors. The glow of shame indicates, in the first instance, that the mind is not totally abandoned; in the last, it manifests a nice sense of honor and delicate feelings, united with innocence and ignorance of the world. See MODESTY.

Shamed, or rather Shimmer (Heb. She'mer, נֶשֶם, in "paused" She'mer, פֶּשֶם, keeper [but some copies have פֶּשֶנ]; Sept. Σπνημώς v. r. Σπνημών and Σπνημω, Vulg. Stamed), the third named of the three sons of Elpaal, and builder of Ono and Lod. He was of the tribe of Benjamin (1 Chron. viii, 12). B.C. post 1618.

Shamel, in Hindu mythology, is the angel who bears the prayers of men to God.

Sha'mer (Heb. She'mer, נֶשֶם, "in pause" She'mer, פֶּשֶם, keeper; Sept. Σπνημώς v. r. Σπνημών and Σπνημω respectively), the name of several men. See also SHAMED; SHEMIR.

1. The second named of four children of Heber (1 Chron. vii, 32), and father of Ahl and others (ver. 34). B.C. perhaps ante 1658. In the first of these passages he is called Shomer (q. v.).

2. The father of Ahi and father of Bani, of the tribe of Levi (1 Chron. vi, 46). B.C. perhaps cir. 1658.

Sham'gar (Heb. Shaggar, שָׂמָּגָר, possibly record [comp. Samgar;] Sept. Σπνημώς, Josèphus Σαμαγος, son of Anath, and third judge of Israel. B.C. 1429. It is possible, from his patronymic, that Shamgar may have been of the tribe of Naphthali, since Bethanath is in that tribe (Judg. i, 35). Ewald conjectures that he was of Dan—an opinion in which Bertheau (On Judg. iii, 31) does not concur. Since the tribe of Naphthali bore a chief part in the war against Abinad and Sisera (Judg. iv, 6, 10; v, 18), we seem to have a point of contact between Shamgar and Barak. It is not known whether the only exploit recorded of him was that by which his authority was acquired. It is said that he saved the Philistines six hundred men with an ox goad" (iii, 31). It is supposed he was laboring in the field, without any other weapon than the long staff armed with a strong point used in urging and guiding the cattle yoked in the plough [see Goad], when he perceived a party of the Philistines, whom, with the aid of the husbandmen and neighbors, he repulsed with much slaughter. The date and duration of his government are not stated in Scripture (Josephus [Ant., v, 4, 3] says it lasted less than one year), but may be probably assigned to the end of that long period of reposé which followed the deliverance under Ehud. He is not expressly called a judge, nor does he appear to have effected more than a very partial and transient relaxation of the Philistine oppression under which Israel groaned; and the next period of Israel's declension is dated, not from Shamgar's, but from Ehud's ascendency (Judg. iv, 1); as if the agency of Shamgar were too occasional to form an epoch in the history. The heroism and vigilance of him was probably a solitary effort, prompted by an impulse of the moment, and failing of any permanent result from not being followed up either on his own part or that of his countrymen. In Shamgar's time, as the Song of Deborah informs us (v, 6), the condition of the people was so desperately insecure that the highways were forsaken, and travelers feared the night. But, and for the same reason, the villages were abandoned for the walled towns. Their arms were apparently taken from them, by the same policy as was adopted later by the same people (iii, 31; v, 8; comp. with 1 Sam. xiii, 19-22). From the position of "the Philistines" in 1 Sam. xii, 9, between "Moab" and "Amon," the allusion seems to be to the time of Shamgar. See JUDGES.

Shamhusai, in Hindu mythology, is an angel who resisted the creation of man, and was therefore cast out from God.

Sham'huth (Heb. Shammuth, שָׂמָּת, prob. desolation; Sept. Σαμαότ v. r. Σαμάωτ; Vulg. Samaouth), the fifth captain for the fifth month in David's arrangement of his army (1 Chron. xxvii, 8). B.C. 1020. His designation יָתוֹר, koy-tyr'or, i. e. the Yizrach, is perhaps for יִירָץ, hiz-sar'chi, the Zarzith, or descendant of Zerah, the son of Judah. From a comparison of the lists in 1 Chron. xxi, xxvii, it would seem that Shamhuth is the same as Shammoth (q. v.) the Harorite.

Shamir. See BRIER, DIAMOND.

Sha'mir (Heb. Shemir, נֶשֶם, a sharp point, as of
SHAMIR 615 SHAMMAH

a thorn [text in Chron. Shamur, הָרֹס, tried]; Sept. סַמיָר, v. r. in Josh.] סַמיָר, [in Judg.] סַמָּרָתָא, [in Chron.] סַמָּרָתִי, the name of two places of a man and of a

1. A town in the mountain district of Judah (Josh. xv, 48), where it is named in connection with Jattir and Shema, at the latter in the extreme south of the tribe, west of south from Hebron. Keil (Comment. ad loc.) suggests that it may be the ruined site Um Shawarmerah mentioned by Robinson (Bib. Res. 1st ed., Append. p. 115), which is perhaps the Somarush suggested by Lienert. Conder (Travels in Palestine, ii, 399), although the position of this place is exactly indicated, does not consider it as the fort of Sama, the son of Jeholada, and gave a chain on which was inscribed the name Shammar (or Shammaroth, or Shamma- mat), and a ring upon which was also inscribed the name, and a little wool and wine. When Benashil had come to the fields of the Philistines, he made the water run off, and stopped the hole with the wool. He then made a pit above the first, poured some wine into it, and covered it with earth. When Asmodues came back, examined his seal, and opened the pit and found the wine, he said, It is written (Prov. xx, 1) 'Wine is a mocker, strong drink is raging; and whosoever is deceived thereby is not wise;' and it is also written (Prov. iv, 11) 'Wine profaned and wine and new wine take away the heart;' and did not drink. But being very dry, he could not restrain himself, drank, became drunk, lay down and died. And Benashil took the tree, put the chain around him and fastened it. When Asmodues woke up, he was almost raging, but Benashil said, The name of thy Lord upon thee, the name of thy Lord upon thee! After this the two set out on their way to a date-tree, which Asmodues broke; and then to a hawthorn, which he also broke. Benashil took the cottage, which he would have destroyed also, were it not for the poor woman that came out and entreated him. When he came to the other side of the world, he told it, and said, So it is written (Prov. xxv, 15). A soft tongue breaks a bone. When they had come to the palace, he was not brought before the king for three days. On the first day Asmodues asked why the king did not let him come before. They said, He has been drink ing too much. At this the king took the brick and the world, and they went to Solomon and told him what Asmodues had done. They were comforted, and gave him the king. On the second day he asked again why he was not brought before the king. They answered, because he had eaten too much. Then he took the brick and the world, and set them on the ground. When the king heard this, he told the servants to give him little to eat. On the third day Asmodues was brought before the king, took a measure, melted out four cubits, threw it away, and said to the king, When thou diest, thou wilt have but four cubits in the world. Thou hast conquered the world, and art not satisfied till thou hast subdued me also. Solomon repeated, I want nothing of thee; I will build the Temple, and build thee a house. Asmodues said, I am not mine, but belongs to the chief of the sea, which he daily gives. He then took the seed of trees, threw it there, and a dwelling-place is prepared: hence he is called a mountain architect (simeka). When they set up the walls of the wild cock containing young ones, they covered the nest with glass. When the parent bird came and could not get in, he went and fetched the Shamir and put it on the glass. But Benashil shouted so loud that the bird dropped the Shamir, which Benashil then took. The bird went away and hunged himself for having violated the oath.

(B. P.)

SHAMMAH (Heb. Shamma, שַׁמָּה, astonishment or desolation; Sept. סַמָּה v. r. סַמָּה and סַמָּה), the eighth name of the eleven tribes of Zophah of the tribe of Asher (1 Chron. vii, 37). B.C. post 1658.

1. (Sept. סַמָּה v. r. in Chron. 7, 18, 1; 1 Chron. i, 37). B.C. ante 1650.

2. (Sept. סַמָּה v. r. סַמָּה). The third son of Jesse and brother of king of David (1 Sam. xvi, 9; xvii, 13). From these two passages we learn that he was present at David's anointing by Samuel, and that with his two elephants he led the Philistines out of the valley of Elah to fight with the Philistines. B.C. 1068. He is elsewhere, by a slight change in the name, called Shimea (q. v.) (1 Chron. xx, 7), Shimeah (2 Sam. xi, 3, 32), and Shamma (1 Chron. ii, 19).
the Great (q.v.), with whom he is closely associated in Jewish history as are the names of Castor and Pollux in Greek and Roman mythology. But comparatively little is known of him. Though of his maxim was "Let the study of the law be fixed, say little and do much, and receive every one with the aspect of a fair countenance" (Aboth, i, 15), yet he is said to have been a man of a forbidding and uncompromising temper, and in this respect, as in others, the counterpart of his illustrious companion, though of whom very little is known. A multitude of Rabbinical questions, he was, as we may say, the antithesis. This antithesis is especially shown in the famous controversy carried on between Hillel and Shammay concerning the egg laid on the Sabbath, and which lent its title, Bein, i.e., the egg, to a whole Talmudic treatise of 73 pages. Very graphically does deen Shammay describe the disputes of both these sages, in the following words: "The disputes between Hillel and Shammay turn, for the most part, on points so infinitely little that the small controversies of ritual and dogms which have vexed the soul of Christendom seem great in comparison. They are worth recording only as accounting for the obscurity into which they have fallen, and also because churches of all ages and creeds may be instructed by the reflection that questions of the modes of eating and cooking and sitting seemed as important to the teachers of Israel—on the eve of their nation's destruction, and the greatest religious instruction that the world has seen—as the questions of dress or furniture, or modes of appointment, or verbal formulas have seemed to contending schools of Christian theology" (Jewish Church, iii, 501). Though each gave often a decision the reverse of the other, yet, by a sort of fiction in the practice of schools, these contrary decisions were held to be co-ordinate in authority, and we may believe the Talmud, were confirmed as of like authority by a Bath-Kol (or voice from heaven); or, at least, while a certain conclusion of Hillel's was affirmed, it was revealed that the opposite one of Shammay was not to be denied as heretical.

Both these and these speak the words of the living God." This saying passed for law, and the contradictory sayings both of these rabbis have been interpreted in the Talmud to this day. And although both were rabbinically one, yet their disciples formed two irreconcilable parties, like the Scotch and Thesmotes of the Middle Ages, whose mutual dissertations manifested itself not only in the strife of words, but also in that of glows, and all the passion that goes with a rivalry of that sort. So great was the antagonism between them that it was said, "Elijah the Tishbite would never be able to reconcile the disciples of Shammay and Hillel." Even in Jerome's time this antagonism between these two schools lasted, for he reports (Comment. in Enam, viii, 14) that the Jews regarded them with little favor, for Shammay's school they called the "Scatterer," and Hillel's the "Provan," because they deteriorated and corrupted the law with their inventions. See Just, Gesch. des Judenthums, i, 259 sq.; Gritz, Gesch. d. Judenth. iii, 178, 186, 205; Eidersheim, Hist. of the Jewish Nation, p. 187; Rule, Hist. of the Karaites Jews, p. 98 sq.; Bartolocci, Bibliotheca hebraica, s. v.; a. Pick, The Scruples Before and in the Time of Christ (Lutheran Quarterly, Gettyburg, 1878), p. 272. (B. P.)

Shammay, in Laismism, is the name of three chiefs of the sect of Red-bonnetts among the worshippers of the Lama, nearly equal to the Dalai-Lama in exalted dignity. The first of them lived in a large convent at Tas-sieuloo, the capital of Bootan. A numerous clergy are subordinated to these princes of the Church, all of whose members are divided into different grades, conceivably numerous and widely extended, as well as highly venerated. The instruction of the young is altogether in their hands. Their convents are very numerous, Lhassa, the capital of Thibet, alone containing 3000.—Vollmeter, Worterb. d. Mythol. s. v.
SHANMMATA

SHANMMATA (शम्मत, शममत), the highest form of excommunication among the Jews. See ANATHEMA.

Sham'moth (Heb. Sham'moth, חַמְמוֹת, devotion; Sept. Σαμμώθ, v. r. Σαμμᾶ, Σαμμᾶθα), the name of a person entitled "the Harorite," one of David's guards (1 Chron. xi. 27); apparently the same with "Shammah the Harorite" (2 Sam. xxiii, 25), and with "Sham-huth" (1 Chron. xxvii. 8).

Shammu'ah (Heb. id. בִּלְגָּה, renounced; Sept. Σαμουη'α, in Numb. xxxii. 4; Σαμουανοῦ in 2 Sam. v. 14; Σαμουα in 1 Chron. xiv, 4; v. r. Σαμαία; Σαμαία in Neh. xi, 17; v. r. Σαμουιο), the name of four men.

1. The son of Zaccur and the representative of the tribe of Levi among those first sent by Moses to explore Canaan (Num. xiii. 4). B.C. 1657.

2. One of the sons of David, by his wife Bathsheba, born to him in Jerusalem (1 Chron. xiv. 4); B.C. cir. 1045. In the A. V. of 2 Sam. v. 14 the same Heb. name is Anglicized "Shammah," and in 1 Chron. iii. 5 he is called Simeon (q. v.). In all the lists he is placed first among the four sons of Bathsheba; but this can hardly have been the chronological order, since Solomon appears to have been born next to the infant which was the fruit of her criminal connection with David (2 Sam. xii. 24).

3. A Levite, the grandson of Jeduthun, son of Gadal, and father of Abja (Neh. xi. 17). B.C. ante 450. He is the same as Sheemiah the father of Obadiah (1 Chron. ix. 16).

4. The representative of the priestly family of Bilgah, or Bilgai, in the days of the high-priest Joiakim (Neh. xii. 18). B.C. cir. 500.

Shammu'ah (2 Sam. v. 14). See SHAMMUA.

Sham'sherai [usually Shamshera'i] (Heb. Sham-sherai, שַׁמְשֶרָאִי, sunlike; Sept. Σαμσαραία v. r. Σαμσαραῖο), the first name of six sons of Jeroham, of the tribe of Benjamin, resident at Jerusalem (1 Chron. viii. 20). B.C. post 1500.

Shamly, or Schamly (I. e. Samuel), a celebrated leader of the Caspian, was born at Auris-Himiry, in Northern Daghestan. He belonged to a wealthy Leshgian family of rank, and early became a zealous disciple of Kasi-Mollah, the great apostle of Muridism, who brought together the various Caucasian tribes, and led them against the heretical Russians. After the assassination of Hamzad Bey, the successor of Kasi-Mollah (1884), Shamly was unanimously elected imam; and being absolute temporal and spiritual chief of the tribes which acknowledged his authority, he made numerical changes in their religious creed and political administration. His military tactics, consisting of surprise, ambush, etc., brought numerous successes to the mountaineers. In 1887 he defeated general Ivelitch; but in 1889 the Russians succeeded in hemming Shamly into Akulgo, in Daghestan, took the fortress by storm, and it was supposed that he perished, as the defenders were put to the sword. But he suddenly reappeared, preaching more vigorously than ever the "holy war against the heretics." In 1893 he conquered all Avaras, besieged Moodozk, foilled the Russians in their subsequent campaign, and gained over to his side the Caucasian tribes which had hitherto favored Russia. In 1894 he completed the organization of his government, made Dargo his capital, and established a code of laws and a system of the internal communication. The fortunes of war changed till 1852, when Bariatsinsky compelled Shamly to assume the defensive, and deprived him of his victorious prestige. Religious indifference and political dissensions began to undermine his power, and at the close of the Crimean War Russia again attacked him, and expelled the Caucasian tribes. For three years Shamly bravely held out, although for several months he was a mere guerilla chief, hunted from fastness to fastness. At last (Sept. 6, 1859), he was sur-

prised on the plateau of Gubin, and, after a desperate resistance, was taken prisoner. His wife and treasure were spared to him, and he was taken to St. Petersburg, where he met with a gracious reception from Alexander II. After a short stay, he was assigned to Kaluga, receiving a pension of 10,000 rubles. From here he was removed (December, 1868) to Kief, and in January, 1870, to Mecca, remaining a parolee prisoner of the Russian government. He died in Medina, Arabia, in March, 1871.

Shan. See BETH-SHAN.

Shane, John Dabney, a Presbyterian minister, was born in Cincinnati, O., in 1812. He graduated at Hampden-Sydney College, Prince Edward, and studied theology at the Union Theological Seminary in that state. He was licensed by the Cincinnati Presbytery on May 31, 1842, and shortly after ordained by the Western Lexington Presbytery, laboring between 1855 at North Middleton, Ky., and with other churches in that region of country. He returned to Cincinnati in 1857, and afterwards preached as occasion presented in the bounds of the Cincinnati Presbytery. He died Feb. 7, 1884. Mr. Shane, from his earliest years, revealed a power for collecting and hoarding everything that had any direct or indirect bearing upon the planting and history of the Presbyterian Church in the Mississippi valley. He was as great an object of his wife, he declined the pastoral office, as he had that of the family relation, so that he could roam untrammelled over that broad land. After his death, his collections were sold at auction, and realized about $3000. A large portion of them were secured through the attention of Mr. Samuel Agnew, of Philadelphia, for the Presbyterian Historical Society. See Wilson, Preb. Hist. Almanac, 1865, p. 119. (J. L. S.)

Shane, Joseph, a minister of the Methodist Episcopal Church, was born in Jefferson County, O., April 9, 1854, and united with the Church when about seventeen years old. He was licensed as a local preacher April 25, 1857, and in 1859 was received into the Pittsburgh Conference. In the spring of 1865 he was compelled to resign his charge, and after a few months of illness, died in Apollo, Armstrong Co., Pa., Jan. 16, 1866. See Minutes of Annual Conferences, 1866, p. 21.

Shang-té, a deity of the Chinese, often spoken of in terms which seem to point him out as, in their view, the Supreme Being, the only true God. This is, however, by no means the case. To him especially is devoted the present law, order, and intelligence. By these writers Shang-té is believed to be nothing more than a great "Anima mundi,"
SHANI 618 SHARA MALACHAI

merging everywhere in all the processes of nature, and binding all the parts together in one mighty organism.

Shani. See Crenson; Scarlet.

Shank, JOSEPH, a minister of the Methodist Episcopal Church, was born in Schoharie, N.Y., about 1818, and professed conversion at the age of twenty. He was licensed to preach in 1841, and soon after joined the Oueida Conference. In 1864 he was transferred to the Detroit Conference, but his health failed him in 1866.

After a trip to the sea-coast, he returned to Pontotoc, Mich., where he died Sept. 30, 1867. See Minutes of Annual Conferences, 1866, p. 174.

Shanks, ABURY H., a minister of the Methodist Episcopal Church, South, was born in South Carolina in 1808. He joined the Church in 1830, and entered the itinerant ministry in 1831. His ordination of deacon was received in 1833, and that of elder in 1850. After fourteen years of labor, he located, studied law, and graduated from the law department of the Transylvania University. In 1849 he went to Texas, and engaged in the practice of his profession. He was admitted into the East Texas Conference in 1858, but owing to ill-health was obliged to superannuate in 1859, and held that relation until his death, Oct. 20, 1868. He was regarded as a preacher of great powers, fond of theological study, and in the practice of law never compromised his ministerial character. See Minutes of Annual Conferences of M. E. Ch. South, 1866, p. 283.

Sha'pham (Heb. Shaphham, שפוח, bold [Gezen.], or vigorous [Furst.], Sept. ספָּחָם וְּרֵם ספָּחָץ), the chief second in authority among the Gadites in the days of Joatham (1 Chron. v. 12). B.C. cir. 750.

Sha'phan (Heb. Shaphan, שפָּחָן, coney; Sept. ספָּחָן וְּרֵמ ספָּחָץ, and סנפָּף in 2 Kings xxiii., i. 2; 2 Chron. xxxiv., vii., 18; 2 Chron. xxxiv., 8), father of Ahikam (2 Kings xxii., 12; 2 Chron. xxxiv., 20), Elasar (Jer. xxii., 3, 8; and Gemariah (xxxvi., 10—12), and grandfather of Gedaliah (xxxvi., 14; xi. 5. 9, 11; xii. 2; xiii. 6, 6), Michaiah (xxxvi., 11), and probably of Jazaniah (Ezek. viii., 11). There seems to be no sufficient evidence for supposing, as some have done, that Shaphan the father of Ahikam, and Shaphan the scribe, were different persons. The history of Shaphan brings out some points with regard to the office of scribe which he held. He appears on an equality with the governor of the city and the royal recorder, with whom he was sent to Bishnah to take an account of the money which had been collected by the Levites for the repair of the Temple and to pay the workmen (2 Kings xxii. 4; 2 Chron. xxxiv., 9; comp. 2 Kings xii. 10). Ewald calls him minister of finance (Geiss. iii. 697). It was on this occasion that Hilkiah communicated his discovery of a copy of the law, which he had probably found while making preparations for the repair of the Temple. Shaphan was intrusted to deliver it to the king. Whatever may have been the portion of the Pentateuch thus discovered, the manner of its discovery, and the conduct of the king upon hearing it read by Shaphan, prove that for many years it must have been lost and its contents forgotten. The part read was apparently from Deuteronomy, and when Shaphan ended, the king sent him with the high-priest Hilkiah, and other men of high rank, to consult Huldah the prophetess. Her answer moved Josiah deeply, and the work which began with the restoration of the decayed fabric of the Temple quickly took the form of a thorough reformation of religion and revival of the Levitical services, while all traces of idolatry were for a time swept away. Shaphan was then probably an old man, for his son Ahikam must have been in a position of importance, and his grandson Gedaliah was already born—as we may infer from the fact that thirty-five years afterwards he was made governor of the country by the Chaldeans, an office which would hardly be given to a very young man. Be this as it may, Shaphan disappears from the scene, and probably died before the fifth year of Jehoiakim, eighteen years later, when we find Elishama was scribe (Jer. xxxvi., 12). There is just one point in the narrative of the burning of the roll of Jeremiah's prophecies by the order of the king which seems to identify Shaphan the father of Ahikam with Shaphan the scribe. It is well known that Ahikam was Jeremiah's great friend and protector at court, and it was therefore consistent with this friendship of his brother for the prophet that Jeremiah the prophet should write on Jeremiah and Baruch to hide themselves, and should intercede with the king for the preservation of the roll (xxxvi., 12, 19, 25).

Shaphan. See Coney.

Sha'phat (Heb. Shaphat, שַׁפְּחַת, judge; Sept. סָפָחָה, v. r. סָפָחָה, סָפָךְ, etc.), the name of five men.

1. The son of Hori and spy from the tribe of Simeon on the first exploration of Canaan (Num. xxxi., 5). B.C. 1657.

3. The father of Elisha the prophet (1 Kings xix., 16, 19; 2 Kings iii., 11; vi, 31). B.C. ante 900.

5. One of the descendants of king David, through the royal line (1 Chron. ii., 22). He seems to have lived as last as B.C. 599, for he was the brother of Neariah (q. v.).

Sha'pher (Heb. Shapher, שַׁפְּר, brightness, as in Gen. xlix., 21; always occurring "in pause" Sha'pher', שַׁפְרֵה; Sept. סָפָךְ דָּרֵמ סָפָךְ, the name of a mountain at which the Israelites encamped during their sentence of extermination in the desert; situated between Kehelathah and Haradah (Num. xxxii., 23, 24). Hitzig (Philast. p. 173) regards it as identical with Mount Halak (Josh. xii, 16); but the latter appears to have lain farther north-east. It is, perhaps, the present Arav' en-Nabah, about in the middle of the upper portion of the plateau E't-Tith. See EXODE. For a different identification, see WANDERINGS IN THE WILDERNESS.

Shapira Manuscript is the name given by Bär and Delitzsch to a Hebrew codex which Jacob Shapira or Sappir, a Jewish rabbi from Jerusalem, brought from Arabia, and sold to the public library at Paris in 1866. It is written on parchment, and, according to Delitzsch in his preface to his edition of the book of Isaiah in connection with S. Bär (Leips. 1872), "it is pervetusum, integrum et omnino eximum." This codex contains some very valuable readings, of which we note e. g. the following:

1 Kings xx, 83, it reads in the text וַיָּאֵם וַיָּאֵם (Bär), 'and in the margin in the Keri וַיָּאֵם וַיָּאֵם', and in the margin in the Keri וַיָּאֵם וַיָּאֵם.'

Isa. x. 16, מַטְבִּיעָה וַיבָּרָר (Van der Hooght, מַטְבִּיעָה וַיבָּרָר), which is also supported by a great many MSS. and printed editions, as the Complut. Venice, 1518, 1521; Münster's, 1554, 1566; Stephen's, Hutter's, 1567; Venice, 1575, 1580, 1580, 1780; and Sebastian, 1742, etc.

Isa. xvi. 2, יֶרְבָּר (Van der Hooght, יֶרְבָּר), which is in agreement with the Masorah, and which is also found in Jer. xxviii., 51.

Isa. xxii. 11, רָבָר (Van der Hooght, רָבָר), so many MSS. and editions.

Psa. lxxviii., 51, וַיָּאֵם (V. d. Hooght, וַיָּאֵם), which is also found in 2 codd. Kermel (No. 91, 135).

(B. P.)

Shara Malachi (Yellow-bomets), the party of Lamaites who reject the Bogdo-Lama (chief of the Red-bomets) and recognise the Dalai-Lama alone as an infallible spiritual head.
SHARAB

Sharab. See Mirage.

Sh‘ara‘i [many Shara‘at, some Shara‘at] (Heb. Sha‘ara‘, "the reed," reed; Sept. Σαρα‘ων v. Σαρα‘ων), one of the "sons of Bani, who had married strange wives after the captivity (Ezra x, 40). B.C. cir. 457.

Shara‘im (Josh. xv, 30). See Shalaham.

Shara‘rab (Heb. Sha‘ara‘ab, ". . . strong; Sept. Σαρα‘ων v. Σαρα‘ων), the father of Ahiam the Hararite, one of David's mighty men (2 Sam. xxiii, 33). B.C. cir. 1400. In the parallel passage (1 Chron. xi, 35) he is called Sacar, which is, perhaps, the better reading (Kennicott, Dissert., p. 208). See David.

Sharasantha, in Hindù mythology, was a powerful king who ruled over the entire southern part of India, and the most dangerous enemy of Krishna, with whom he disputed the sovereignty in seventeen battles and in a duel.

Share is the rendering in 1 Sam. xiii, 20 of מֶשֶׁר (“mesher” from מָשֵּר, to scratch or cut), an agricultural instrument required to be sharpened; probably some sort of plow, and essentially corresponding to a modern hoe. See MARTSH.

Share‘zer (Heb. Share‘zer, מֶשֶׁר, Persian for prince of fire; Sept. Σαρανθάς v. Σαρανθάς), the name of two men.

1. A son of Sennacherib (q. v.), who, with his brother Adrammelech, murdered their father in the house of the god Nisroch (2 Kings ix, 37; Isa. xxxvii, 38. B.C. post 711). "Moses of Choreme calls him Simasar, and supposed he was favorably received by the Armenian king to whom he fled, and given a tract of country on the Aseryan frontier, where his descendants became very numerous (Hist. Armen. i, 22). He is not mentioned as engaged in the murder, either by Polybius or Abydenus, who both speak of Adrammelech."

2. A messenger sent along with Regem-melech (q. v.), in the fourth year of Darius, by the people who had returned from the captivity to inquire concerning fasting in the fifth month (Zech. vii, 2, A.V. "Sherezer"). B.C. 519.

Shariver, in Persian mythology, is one of the seven good spirits created by Ormuzd to make war on Ahirwan, and who had control over metals.

Sh·ar·on (Heb. Sharon, שָׂרׁוֹן, a plain; Sept. usually Σαρων [comp. Acts ix, 4, SXRO], the name, apparently, of three places in Palestine. See also Sh-edron. In the treatment of these we adduce the elucidations of modern critical and archaeological research.

1. The district along the Mediterranean is that commonly referred to under this distinctive title. See also Sharon.

1. The Name.—This has invariably, when referring to this locality (1 Chron. xxvii, 29; Cant. ii, 1; Isa. xxxiii, 9, xxxvi, 2; lx, 10), the definite article, הַשָּׂרֹון, hash-Sharon; and this is represented, likewise, in the Sept. renderings ὁ Σαρών, ὁ Ἀρών, τὸ πτεύον. Two singular variations of this are found in the Vat. MS. (Mai), viz. 1 Chron. v, 16, Σαρώνια and xxvii, 29, Σαρωνία, where the A is a remnant of the Hebrew definite article. It is worthy of remark that a more decided trace of the Hebrew article appears in Acts ix, 35, where some MSS. have Ἀσσαρωνία. The Lasharon (q. v.) of Josh. xii, 18, which some scholars consider to be Sharon with a preposition prefixed, appears to be more probably correctly given by the A.V. It may be symbolic, or be indicative of a peculiar place, like the "Arabah," "the Shephelah," "the Cicer," "the Pisgah," etc. See TOPOGRAPHICAL TERMS.

Sharon is derived by Gesenius (Thesaurus, p. 642) from צָרָה (zarah), to be straight or even—the root, also, of Mishor, the name of a district east of Jordan. The application to it, however, by the Sept., by Josephus (Ant. xv, 13, 3; War,
Edraelon, Sharon is very much, we might say entirely, deserted. Around Jaffer, indeed, it is very cultivated, and as you move northward from that town you are encompassed with groves of orange, olive, fig, lemon, pomegranate, and palm; the fragrance is delicious, almost oppressive. But farther north, save in a few rich spots, you find but little cultivation. Yet over all the undulating waste your eye is refreshed by the profusion of wild flowers everywhere. Like many of the spots famed anciently for beauty and fertility, it only gives indications of what it might become (see Porter, Hand-book for Pal. p. 380).

2. The Sharon of 1 Chron. v, 16 is distinguished from the western plain by not having the article attached to its name. It is also apparent from the passage itself that it was the district on the east side of the neighborhood of Gilead and Bashan (see Bachie, ii, iii, 283). Reland objects to this (Palaez, p. 371), but on insufficient grounds. The expression "suburbs" (ἐπανορθία) is in itself remarkable. The name has not been met with in that direction, and the only approach to an explanation of it is that of Prof. Stanley (Sinai and Pal. App. § 7), that Sharon may here be a synonym for the Marginon, i.e., a region roofed over and described with some of the same characteristics and attached to the pastoral plains east of the Jordan.

3. Another Sharon is pointed out by Eusebius (ut supr.) in North Palestine, between Tabor and the Sea of Tiberias; and Diöke would understand this to be meant in Matt. ii, 1, because this book so often refers in the northern Jordan of the region. But this is very doubtful.

Sharonite (Heb. Sharoni, שָׁרוֹן; Sept. Σαρωνίτης), a Gentle adj. from Sharon; Sept. Σαρωνίτης, the designation (1 Chron. xxvii, 29) of Shitrim, David's chief herdsman in the plain of Sharon, where he of course resided.

Sharp, Daniel, D.D., a Baptist preacher, was born at Huddersfield, Yorkshire, England, Dec. 25, 1738. He was the son of a Baptist preacher and received early religious training. He originally joined an Independent Church, but subsequently, as the result of inquiry and conviction, became a Baptist. Engaged in a large commercial house in Yorkshire, he came to the United States as their agent, arriving in New York Oct. 4, 1805. He soon decided to enter the ministry, and began his theological studies under Rev. Dr. Stoughton, of Philadelphia. He was set apart as pastor of the Baptist Church at Newark, N. J., May 17, 1809; and was publicly recognized as pastor of the Third Church, Boston, April 20, 1812. He became an active member of the Massachusetts Baptist Missionary Society; was for several years associate editor of the American Baptist Magazine; and upon the formation of the \Society for the Propagation of the Gospel in India, he, as its secretary, conducted the correspondence. For many years he was president of the acting board of the General Convention of the Baptist denomination; and in 1814 was one of the originators of an association which resulted in the Northern Baptist Education Society. He was closely identified with the origin of the New York Theological Seminary, and was for eighteen years president of its board of trustees. In 1828 he was chosen a fellow of Brown University, and held the office till the close of his life. He received his degree of D.D. from Harvard University in 1823, of whose board of officers he was a member, and died in Baltimore, June 23, 1852. Mr. Sharp published seven Sermons and Discourses (1824-52);—also Recognition of Friends in Heaten (4 editions);—and a Tribute of Respect to Mr. Ensam Lincoln (1822). See Sprague, Annals of the Amer. Pulpit, vi, 365.

Sharp, David, a minister of the Methodist Episcopal Church, was born in New Jersey Sept. 5, 1787, and removed with his parents to Virginia, and in 1800 to Logan County, O. Of Quaker parentage, he united with the Methodist Episcopal Church in 1807, and in 1810 he was licensed to preach. He was a delegate to the Conference in September, 1815, and in 1819 was transferred to the Missouri Conference, where he served five years as presiding elder. In 1825 he was transferred to the newly organized Pittsburgh Conference, in which he labored twenty-four years; and was then (1849) transferred back to the Missouri Conference, where he fell into the Cincinnati Conference, and in 1860 received a supernumerary relation. He died April 21, 1865. Mr. Sharp was an efficient, acceptable, and successful minister. See Minutes of Annual Conferences, 1865, p. 162.

Sharp, Elias C., a Presbyterian minister, was born in Wilmington, Conn., March 18, 1814. He was left an orphan in early years, but by patient effort was able to attend Amherst College, where he graduated; studied divinity in the Western Reserve Theological Seminary, Hudson, O.; was licensed by Cleveland Presbytery Sept. 1, 1840; and ordained by Portage Presbytery, June 1, 1842, as pastor of the First Congregational Church of Atwater, Portage Co., O. This was his only charge. Here he died of consumption, May 5, 1867. Mr. Sharp possessed ability, both natural and acquired. As a minister he was eminently successful; and while pastor of his only charge, nearly two hundred connected themselves with the Church of God. See Wilson, Presb. Hist. Almanac, 1868, p. 228. (J. L. S.)

Sharp, Granville, a Christian philanthropist and writer, was born in 1784. He was educated for the bar, but, leaving the legal profession, he obtained a place in the Ordnance Office, which he resigned at the commencement of the American war, the principles of which he did not approve. He then took chambers in the Temple, and devoted himself to a life of study. He first became known to the public by his interest in a poor and friendless negro brought from the West Indies, and turned out in the streets of London to be sold. Sharp befriended the negro, not only feeding him and securing him a situation, but also defending him against his master, who wished to reclaim him as a runaway slave. But the decision of the full bench was with Sharp, that the negro was under the protection of English law, and no longer the property of his former owner. Thus Sharp emancipated forever the blacks from slavery while on British soil, and, in fact, banished slavery from Great Britain. He now collected a number of other negroes found wandering about the streets of London and sent them back to the West Indies, where they formed the colony of Sierra Leone. He was one of those of the "Eighty-one" who held the editors of the Slave-trade." Sharp was led to oppose the practice of marine impressment; and on one occasion obtained a writ of habeas corpus from the Court of King's Bench to bring back an impressed citizen from a vessel at the Nore, and by his arguments obliged the court to liberate him. He became the warm advocate of "parliamentary reform," arguing the people's natural right to a share in the legislature. Warmly attached to the Established Church, he was led to recommend an Episcopal Church in America, and introduced the first bishops from this country to the archbishop of Canterbury for consecration. Sharp died July 6, 1819. He was an able linguist, deeply read in theology, pious and devout. He published sixty-one works, principally pamphlets upon theological and political subjects and the evils of slavery. The following are the most important: Remarks on a Printed Paper entitled a Catalogue of the Restored or restored Copies of the Bible (Lond. 1765, 1775, 8vo)—Remarks on Several Very Important Prophecies (1768, 1775, 8vo, 5 parts) Slavery in England (1769, 8vo; with appendix, 1772, 8vo) —Declaration of the People's Natural Rights, etc. (1774, 1775, 8vo) —Remarks on the Uses of the Definite Article in the Greek Text of the New Testament (Durham, 1798,
SHARP 621 SHARPE

8vo; 2d ed. with an appendix on Christ's divinity, 1802, 12mo).—On Babylon (1805, 12mo).—Case of Saul (1807, 12mo).—Jerusalem (1808, 8vo). See Hoare, Memoirs of Dr. John Sharp's [p. 456]—Granville Sharp (1832, 8vo).—4to ed. 1828, 2 vols. 8vo).—Stuart, Memoirs of Granville Sharp (N. Y. 1836, 12mo).

Sharp, James, archbishop of St. Andrew's, was the son of William Sharp, sheriff-clerk of Banffshire, and was born in the castle of Banff, May, 1618. He was educated for the Church at the University of Aberdeen, but on account of the Scottish Covenant retired to England in 1638. Returning to Scotland, he was appointed professor of philosophy at St. Andrew's, through the influence of the earl of Rothes, and soon after minister of Crail. In 1656 he was chosen by the moderate party in the Church to plead their cause before the Protector against the Rev. James Guthrie, a bitter of the extreme section (the Protestants, or Remonstrants). Upon the eve of the Restoration Sharp was appointed by the moderate party to act as its representative in the negotiations opened up with Monk and the king. In this matter he is believed to have acted with partiality, receiving as a compensation, after the overthrow of Presbyterian government by Parliament, the archiepiscopal dignity of St. Andrews, which was formally consecrated at London by the bishop of London and three other prelates. His government of the Scottish Church was tyrannical and oppressive, and, in consequence, he became an object of hatred and contempt. He had a servant, one Carmichael, who by his cruelty had rendered himself particularly offensive to the Presbyterians. Nine men formed the resolution of waylaying the servant in Magus Muir, about three miles from St. Andrew's. While they were waiting, Sharp appeared in a coach with his daughter, and was immediately despatched despite her tears and entreaties. Much of the defence of St. Andrew's that has been most extolled cannot be said is that he was simply an ambitious ecclesiastic who had no belief in the "divine right" of Presbyterianity, and who thought that if England were resolved to remain Episcopalian it would be very much better if Scotland would adopt the same form of Church government.

Sharp, John, D.D., an English prelate, was born at Bradford, Berkshire, 1644. He was admitted at Cambridge, Cambridge, from which he graduated in December, 1663. In 1667 he took the degree of M.A., was ordained both deacon and priest, and became domestic chaplain to Sir Henage Finch, through whose influence he was appointed, in 1672, archdeacon of Berkshire. Three years later he was preferred to a prebend of St. Bartholomew's, Royal Exchange, London, and to the rectory of St. Giles in the Fields. In 1679 he took the degree of D.D. and accepted the lectureship at St. Lawrence Jury, which he resigned in 1688. He was promoted by Sir H. Finch to the deanship of Norwich in 1681. Because of the firm position he took, May 2, 1686, against popery, he was suspended, but was reinstated in January, 1687. He was installed dean of Canterbury, Nov. 25, 1689, and was consecrated archbishop of York, July 5, 1691. On the accession of Queen Anne, Mr. Sharp became a member of her privy council and her lord almoner. He died at Bath, Feb. 2, 1714. Bishop Sharp was a man of amiable disposition and unassuming integrity, a faithful and vigilant governor. He published a number of separate sermons which were collected into 7 vols. 8vo, 1709; also 1715, 1728, 1729, 1735, 1749, and in 7 vols. 12mo in 1754 and 1756. They were republished under the title of Works (Oxford, 1829, 5 vols. 8vo), by Thomas Sharp, D.D. (Lond. 1825, 2 vols. 8vo).

Sharp, John M'Clure, a minister of the Methodist Episcopal Church, was born in Rush County, Ind., 1825, and united with the Church in 1841. He received license to preach in 1854, and was admitted into the South-eastern Indiana Conference in 1860. In 1865 he was obliged to retire from the work, and Sept. 15, 1866, he died. See Minutes of Annual Conferences, 1866, p. 204.

Sharp, Lionel, D.D., an English clergyman, was chaplain to Henry, Prince of Wales; also rector of Malpas, minister of Tiverton, and in 1605 archdeacon of Berks. He died in 1630. His published works are, Oratio Funeris in Hon. Hen. Wall. Princip. (Lond. 1612, 4to);—Novum Fidei Symbolum, sive de Notis (1612, 4to); Speculum Popae, etc. (1612, 4to); Nos. 3 and 5 were translated into English and published under the title of A Looking-glass for the Pope (1628, 4to). He also published a Sermon (1609, 8vo);—and other sermons. See Bliss's Wood's Fasti Oxon, i, 385; also Allibone, Dict. of Brit. and Amer. Authors, s. v.

Sharp, Samuel M., a missionary of the Presbyterian Church, was born in West Middletown, Pa., Nov. 23, 1884. He received a thorough Christian training and, on the毕业, graduated at Jefferson College, Pa., in 1856, and at the Western Theological Seminary at Allegheny City, Pa., in 1858, was licensed and ordained as an evangelist in the spring of the same year, and sailed for Bogotá, South America, June 18, 1858. Arriving there July 20, he at once commenced his great life-work. His wife (being the daughter of Rev. Jeremiah Build, one of the latest converts of the Indians) was his helpmeet and adviser, and their prospects for eminent usefulness were indeed bright; but in the midst of their labors he was taken ill with fever, and died at the mission-house in Bogotá, Oct. 30, 1860. Mr. Sharp was a good man and a devoted missionary, of earnest and consistent piety. See Wilson, Pred. Hist. Almanac, 1862, p. 117. (J. L. S.)

Sharp, Solomon, a minister of the Methodist Episcopal Church, was born in Carolina County, Md., April 6, 1771. His parents were pioneer Methodists. In 1791, when about twenty years old, he began to travel "under the presiding elder." In 1792 he was admitted to the conference and sent to Milford Circuit, Del.; and he continued in the service, occupying almost all important appointmenct in New Jersey, Delaware, and Pennsylvania down to 1835, when he was reported superannuated. He died at Smyrna, Del., March 13, 1836. Mr. Sharp was an original, an eccentric, but a mighty man. "His sermons were powerful, and delivered with a singular tone of authority, as if he were conscious of his divine origin. He was not a systematist, and it is believed that he was hardly capable of feeling fear. See Minutes of Conferences, ii, 409; Stevens, Hist. of the M. E. Church, iii, 413—415; Sprague, Annals of the Amer. Pulpit, vii, 217; Manship, Thirteen Years in the Itinerancy, p. 49; Simpson, Cyclopedia of Methodism, s. v. (J. L. S.)

Sharp, Thomas, a younger son of John Sharp (q. v.), an English prelate, was born in Berkshire, entered Trinity College, Cambridge, 1709, and took his B.A. in 1712 and M.A. in 1716. He was a fellow of the college, and took the degree of D.D. in 1729. At first chaplain to archbishop Dawes, he was, July, 1720, collated to the rectory of Rothbury, Northumberland. He held the prebend of Southwell, and afterwards that of Wistow, in York Cathedral, and in 1722 he became archdeacon of Northumberland. In 1755 he succeeded Dr. Mangey in the officiality of the dean and chapter. He died March 6, 1758, and was interred in Durham Cathedral. He published a Concio ad Clerum when he took his doctor's degree:—The Rubric in the Book of Common Prayer (1737) and Annotations (1738), and Historical Inser tations on the Hebrew Words Ezekiel and Jerimoth (1751, 8vo).

Sharpe, Gregory, D.D., an English clergyman, was born in Yorkshire, in 1713, and, after passing some time at the grammar-school of Hull, went to Westminster, where he studied under Dr. Freind; but in 1731 he was settled
SHARPNESS OF DEATH 622

SHAVEH

with principal Blackwell in Aberdeen. Here he remained until he had finished his studies, when he returned to England, and in a few years entered into orders. He was appointed minister of the Broadway chapel, in which he continued till the death of Dr. Nicholls of the Temple, when he was declared the doctor's successor, and in this station he continued until his own death, which occurred at the Temple Church on Jan. 8, 1771. His works were, A Defence of the late Dr. Samuel Clarke (Lond. 1774, 8vo);—two Dissertations: Upon the Origin, etc., of Languages; and Upon the Original Powers of Letters (ibid. 1751, 8vo);—two Arguments in Defence of Christianity (ibid. 1755–62, 8vo):—The Rise and Fall of the Holy City and Temple of Jerusalem (ibid. 1758–66, 8vo);—besides various Letters and Sermons.

Sharpness of Death, in the Te Deum, the pains and agonies suffered by the Redeemer on the cross, but which he overcame at his resurrection, God having raised him up, "having loosed the pains of death, because it was not possible that he should be holden of it" (Acts ii. 24).

Sharrock, Robert, an English clergyman, was born at Ashwood, in Buckinghamshire, in the 17th century, and was sent from Winchester School to New College, Oxford, where he was admitted perpetual fellow in 1649. In 1660 he took the degree of doctor of civil law, was prebendary and archdeacon of Winchester, and rector of Bishop's Waltham, in Hampshire. He died July 11, 1684, having the character of a good divine, civilian, and lawyer. His works are, History of the Propagation, etc., of Vegetables, etc. (Oxon. 1666 and 1672, 8vo);—Hypothesis De Officiis secondum Humanae Rationis Dictata, etc. (ibid. 1669, 8vo, and 1682);—also ten sermons on the Ends of the Christian Religion (1640).

Sharu'hen [some Shar'hen' (Heb. Shar'henchen), 'refuge of grace', Sept. 'apoyai alev [probably reading פֶּּלֶּשֶׁנָּה], a town originally in Judah, afterwards set off to Simeon (Josh. xix. 6); hence in the Negeb, or "south country". See JUDAH. It seems to be the same elsewhere called Shilhim (Josh. xv. 32), or Sharaaim (1 Chron. iv. 31), but probably by erroneous transcription, in the latter case at least. Knobel (Ezeyg. Historical Supplement, 1832) suggests, as a probable identification, Tell Sherib'ah, about ten miles west of Bir-es-Seba, at the head of Wady Sherib'ah (the "watering-place"). Wilton locates it near Ruhaibah (Rehoboth), but his reasons are unceremonial (The Negeb, p. 217 sq.). See SIMEON.

Sha'habigna, in Hindit mythology, is a surname of Buddha, denoting "the possessor of the six sciences.

Sha'ahai [many Sha'ahai, some Sha'ahai' (Heb. Shasha'ah, פֶּּלֶּשֶׁנָּה, 'refuge of grace'; Sept. εὐαγγέλων; or nolle [Tirm.; Sept. Σωτηρ], one of the "sons" of Dani who divorced his gentle wife after the captivity (Ezra x, 40). B.C. 457. See SHESHAH.

Sha'ahak (Heb. Shaahak, פֶּּלֶּשֶׁנָּה, "longing"; Sept. Σωτηρ), a Benjamite, son of Beriah, descendant of Eliphael, and father of Ishpan and many others (1 Chron. viii, 14, 25). B.C. post 1618.

Shaastamuni, in Hindit mythology, is a surname of Buddha, signifying "the instructor of the Munias."

Shaastava, in Hindit mythology, is a surname of Siva, denoting "the avenger."

Shastras, or Shaasters, The Great (from the Sanscrit śāstra, "to teach"), the sacred books of the Hindús. They are all of them written in the Sanscrit language, and believed to be of divine inspiration. They are usually reduced to four classes, which again are subdivided into eighteen heads. The first class consists of the four Vedas, which are accounted the most ancient and the most sacred compositions. The second class consists of the four Upa-vedas, or sub-Scriptures, and the third class of the six Ved-angas, or bodies of learning. The fourth class consists of the four Up-angas, or appended bodies of learning. The first of these embraces the eighteen Puránas, or sacred poems. Besides the Puránas, the first Up-anga comprises the Ramâyana and Mahabharata. The second and third Up-angas consist of the principal works on logic and metaphysics. The fourth and last Up-anga consists of the body of law, in eighteen books, compiled by Manu, the son of Brahma, and other sacred personages.

Shatrani, in Hindit mythology, was the wife of the man Shurti, or Kahteri, whom Brahma formed out of his right arm, and who became the ancestor of the Kahteri, or warrior caste. Shatrani was created by Brahma out of his left arm.

Sha'ul (Heb. Sha'ul, פֶּּלֶּשֶׁנָּה; Sept. Σωτηρ), the name of three men thus designated in the A. V. For others, see Saul.

1. The son of Simeon by a Canaanitish woman (Gen. xlvii. 10; Exod. vi. 15; Num. xxvi. 13; 1 Chron. iv. 24), and founder of the family of the Shaultites. B.C. cir. 1880. The Jewish traditions identify him with Zimri, "who did the work of the Canaanites in Shittim" (Targ. Ps.-Ezera' on Gen. xlvii.).

2. Shaul of Rabbah, slain by the river was one of the kings of Edom, and successor of Samlah (1 Chron. i. 48, 49). In the A. V. of Gen. xxxvi. 37 he is less accurately called Saul (q. v.).

Sha'ulite (Heb. Sha'ul'ite, פֶּּלֶּשֶׁנָּה; Sept. Σωτηρ), a designation of the descendants of Shaul (1 Num. xxvi. 13).

Sha'veys (Heb. Shaveh', פֶּּלֶּשֶׁנָּה; plain; Sept. Σωτηρ v. zavev and Sovev; Vulg. Salve), a name found thus alone in Gen. xlv. 17 only, as that of a place where the king of Sodom met Abraham. It occurs also in the name Shavehkithriathim (q. v.), which is the Samar. Codex inserts the article, פֶּּלֶּשֶׁנָּה; but the Samaritan Version has שָׁבֵעַ. The Targum of Onkelos gives the same equivalent, but with a curious addition, "the plain of Mejano, which is the king's place of racing," recalling the ἔλυδονος σος so strangely inserted by the Sept. in Gen. xlviii. 7. It is one of those archaic names with which this venerable chapter abounds—such as Bala, En-mishpat, Ham, Hazecon-tamar—so archaic that many of them have been elucidated by the insertion of their more modern equivalents in the body of the document by a later but still very ancient hand. If the signification of Shaveh be "valley," as both Susius and Thrus assert, then its extreme antiquity is involved in the very expression "the Emek-shaveh," which shows that the word had ceased to be intelligible to the writer, who added to it a modern word of the same meaning with itself. It is equivalent to such names as "Puente de Aelantara," the Greessen Steps, etc., where the one part of the name is a mere repetition or translation of the other, and which cannot exist till the meaning of the older term is obsolete. In the present case the explanation does not throw any very definite light upon the locality of Shaveh: "The valley of Shaveh, that is the valley of the king" (xiv. 17). True, the "valley of the king" is mentioned again in 2 Sam. xviii, 18 as the site of a pillar set up by Ab-salom; but this passage again conveys no clear indication of its position, and it is by no means certain that the two passages refer to the same spot. The extreme obscurity in which the whole account of Abraham's route from Damascus is involved has already been noticed under Salem. A notion has long been prevalent that the pillar of Ab-salom is the well-known pyramidal structure which forms the northern member of the group of monuments at the western foot of Olivet. This is apparently first mentioned by Benjamin of Tudela (A.D. 1190), and next by Maundevile (1230), and is perhaps originally founded on the statement of Josephus
Modern Orientals shave the head alone, and that only in the case of settled residents in towns (Van Lennep, Bible and God, p. 209). But, while the structure of the so-called "Absalom's tomb" agrees either with this description or with the terms of 2 Sam. xviii, 18. The "valley of the king" was an *Emek*—that is, a broad, open valley, having few or no features in common with the deep, rugged ravine of the Keiron, which may be compared V. AYLEY. The pillar of Absalom—where it is called "Absalom's hand"—was set up, erected (2 Sm 18), according to Josephus, in marble, while the lower existing part of the monument (which alone has any pretension to great antiquity) is a monolith not erected, but excavated out of the ordinary limestone of the hill, and almost exactly similar to the so-called "tomb of Zechariah," the second from us on the south. Yet even this cannot claim any very great age, since its Ionic capitals and the ornaments of the frieze speak with unflattering voice of Roman art. Nevertheless, in the absence of any better indication, we are perhaps warranted in holding this traditional location. See King's *Dale*.

*Sha'veh-kiriath'im* (Heb. Shaveh Kirjath-yim, שַׁעְיָה כִּרְיָתָּיִם, plain of the double city; Sept. *Sara* ὁ πολιός), a plain at or near the city of Kirjathaim, occupied by the Israelites at the time of Caleb's inheritance in the days of Judah (Josh. xv, 10). This place is mentioned as a city near to which the Ark was carried by Paschah, debouching from the desert into the plains of Judah (Josh. x, 10). It is now known as the modern *Saraieh*. See KirJATHAIM.

*Shaving* (properly שָׁעֵי, Šā'vei), the ancient Egyptians were the only Oriental nation who objected to wearing the beard. Hence, when Pharaoh sent to summon Joseph from his dungeon, he find it recorded that the patriarch "shaved himself" (Gen. xli, 14). Shaving was therefore a remarkable custom of the Egyptians, in which they were distinguished from other Oriental nations, who carefully cherished the beard, and regarded the loss of it as a deep disgrace. That this was the feeling of the Hebrews is obvious from many passages (see especially 2 Sam. x, 4); but here Joseph shaves himself in conformity with an Egyptian usage, of which this passage conveys the earliest intimation, but which was by no means confined to Egypt. The frequent allusions of the Levites to the day of their consecration, and the lepers at their purification, shaved all the hair on their bodies (Num. viii, 7; Lev. xiv, 8, 9). A woman taken prisoner in war, when she married a Jew, shaved the hair off her head (Deut. xxii, 12), and the Hebrews generally, and also the nations bordering on Palestine, shaved themselves when they mourned, and in times of great calamity, whether public or private (Isa. vii, 20; xx, 2; Jer. xii, 5; xlviii, 37; Bar. vi, 90). God commanded the priests not to cut their hair or beards in their mourning (Lev. xxvi, 5). It may be proper to observe, that among the most degrading of punishments for women is the loss of their hair; and the apostle hints at this (1 Cor. xi, 6): "If it be a shame for a woman to be shorn or shaven," etc. See HAIH.

*Shaving* (properly שָׁעֵי, Šā'vei), the ancient Egyptians were the only Oriental nation who objected to wearing the beard. Hence, when Pharaoh sent to summon Joseph from his dungeon, he find it recorded that the patriarch "shaved himself" (Gen. xli, 14). Shaving was therefore a remarkable custom of the Egyptians, in which they were distinguished from other Oriental nations, who carefully cherished the beard, and regarded the loss of it as a deep disgrace. That this was the feeling of the Hebrews is obvious from many passages (see especially 2 Sam. x, 4); but here Joseph shaves himself in conformity with an Egyptian usage, of which this passage conveys the earliest intimation, but which was by no means confined to Egypt. The frequent allusions of the Levites to the day of their consecration, and the lepers at their purification, shaved all the hair on their bodies (Num. viii, 7; Lev. xiv, 8, 9). A woman taken prisoner in war, when she married a Jew, shaved the hair off her head (Deut. xxii, 12), and the Hebrews generally, and also the nations bordering on Palestine, shaved themselves when they mourned, and in times of great calamity, whether public or private (Isa. vii, 20; xx, 2; Jer. xii, 5; xlviii, 37; Bar. vi, 90). God commanded the priests not to cut their hair or beards in their mourning (Lev. xxvi, 5). It may be proper to observe, that among the most degrading of punishments for women is the loss of their hair; and the apostle hints at this (1 Cor. xi, 6): "If it be a shame for a woman to be shorn or shaven," etc. See HAIH.

*Shaving-man* (Heb. *Shavsha'a*, שַׁוַּשָּׁא, nobility [Furst]; Sept. *Sosia* v. r. *Sophia*, and even *Igrapou*), the royal secretary in the reign of David (1 Chron. xviii, 16). He is apparently the same with *Sekalath* (2 Sam. viii, 17), who is called *Shaveah* (Amos iv, 4), and *Saria* in the Vat. MS. of the Sept. *Shishai* is the reading of two MSS. of the and of the Targum of 1 Chron. xviii, 16. In 2 Sam. xx, 25 he is called *Shivah*, and in 1 Kings iv, 3 Shisheh.

*Shaw, Addison C.*, a minister of the Methodist Episcopal Church, was born about 1814, and united with the Church when fourteen years of age. He was licensed as a local preacher at twenty-four years of age, and joined the Michigan Conference, becoming a member of the Detroit Conference at its formation. He died at Ypsilanti, Dec. 21, 1875. See Minutes of Annual Conferences, 1876, p. 100.

*Shaw, John (1)*, an English clergyman, was born at Bedlington, Durhamshire, and entered Brownstone College, Oxford, in 1826, aged fifteen years. He was instituted rector of Whalton, Northumberland, in 1845, but was not admitted until 1861. In the interval he served the church of Bolton, Craven, Yorkshire. He died in 1895. His works are, *No Reformation of the Established Reformation* (Lond. 1866, 8vo.); *Portraiture of the Demonic Spirit* (ibid. 1867, 4to); *Origo Protetantism* (ibid. 1867, 4to).
SHAW

624

SHAW

Croix Circuit, in 1829 to Bethel, and in 1824 to Buxton, where he died, Aug. 20, 1825. He was a man of uniform piety, strong in his attachment to the cause of God, and his praise as a preacher was in all the circuits where he labored. See Minutes of Conference, i, 546; Bangs, Hist. of the M.E. Church, iii, 559.

Shaw, John (3), a minister of the Methodist Episcopal Church, was born at Bristol, Ontario Co., N. Y., July 11, 1807, and united with the Church at the age of eighteen. He was received into the Genesee Conference in 1831, and ordained deacon in 1833 and elder in 1835. He spent thirty-six years in the effective ministry, was superannuated in 1869, and died Jan. 16 of the same year at Hiram, Yates Co., N. Y. See Minutes of Annual Conferences, 1869, p. 5.

Shaw, John B., a Presbyterian minister, was born in Rutland, Vt., May 23, 1798. He graduated at Middlebury College, Vt., studied theology with Rev. Charles Walker, and was licensed by the Rutland Congregational Association. In 1824 he was ordained by Troy Presbytery, and installed pastor of the Congregational Church at South Hartford, Washington Co., N. Y., and subsequently preached as follows: North Granville, Washington Co., N. Y.; Bethel; Utica, N. Y., Congregational Church, Rome, Mich.; Norwalk, Conn.; a second time at South Hartford, N. Y.; Presbyterian Church, Fort Ann, N. Y., as a missionary; Congregational Church, Fair Haven, N. Y.; the Dutch Reformed Dutch Church, Bushkill's Bridge, N. Y.; and the Presbyterian Church at Stephentown, Rensselaer Co., N. Y. He died May 8, 1865. Mr. Shaw was a man of unusual Christian devotedness. "His highly evangelical mode of expressing truth, his eminently successful pastoral qualifications, and his Christian gentleness of spirit made him an exceedingly useful man in his day." See Wilson, Presb. Hist. Almanac, 1866, p. 224. (J. L. S.)

Shaw, John D., a minister of the Methodist Episcopal Church, was born in Londonderry County, Ireland, about 1833, but he emigrated to this country, and joined the Methodist Church at Jackson, La., in February, 1851. He studied at Centenary College, Jackson, entered the ministry about 1853 or 1854, and died in Bolivar County, Miss., Oct. 30, 1866. See Minutes of Annual Conferences of M.E. Church, South, 1866, p. 47.

Shaw, John Knox, a minister of the Methodist Episcopal Church, was born in Ireland, April 12, 1800, but while an infant was brought to Washington County, N. Y. He was licensed to preach Nov. 19, 1824, and was received on trial in the Philadelphia Conference in 1825. For the rest of his ministerial life lasting until 1858, during which he occupied many important stations, and also served as presiding elder. At the division of the Philadelphia Conference, he became a member of the Newark Conference. He took an active part in the founding of the Pennington Seminary, Pennington, N. J., of which he was a trustee at the time of his death. He died at Newark, N. J., Oct. 4, 1858. See Minutes of Annual Conferences, 1859; Simpson, Cyclop. of Methodism, s. v.

Shaw, Joseph, LL.D., a minister of the Associate Church of America, was born in the parish of Kattray, Aberdeenshire, Scotland, Dec. 6, 1778. He received his preparatory education in his native village, and entered the University of Edinburgh a little before he had completed his thirteenth year. He graduated in 1794, and immediately entered the Associate Divinity Hall at Whitburn, where he remained five years, and in 1799 was licensed to preach. Application being made by the Class of Religion in Philadelphia, Mr. Shaw was appointed to the place. He accepted the appointment, and commenced to serve that people in the fall of 1803. In 1809 his lungs became affected, and in 1810 he terminated his ministry in Philadelphia. In 1813 he became professor of languages in Dickinson College, and in 1815 accepted the similar professorship in the Albany Academy. In 1821 he was honored with the degree of LL.D. from Union College. He died in August, 1824. He published a sermon preached before the Albany Bible Society in 1820 (8vo); and his last sermon, The Gospel Call, was published shortly after his death, with a brief biographical notice. See Sprague, Annals of the Amer. Pulpit, ix, 85.

Shaw, Levi, a minister of the Methodist Episcopal Church, was born at Frankfort, Me., Sept. 4, 1822. He received his preliminary education at Bates College, and was graduated in 1847. He was licensed to preach in 1849, and was received into the Presbytery of the State, and afterwards into the Church of the Discipline of the Southern Church. He was ordained to the ministry in 1853. He died at his home in Newburyport, Mass., Aug. 17, 1867. After he had become superannuated, he still continued to labor for the Church during periods upon different charges, and also served as a delegate of the Christian Commission. See Minutes of Annual Conferences, 1868, p. 142.

Shaw, Samuel, a learned Nonconformist, was born at Repton, Derbyshire, England, in 1655. At the age of fourteen he entered St. John's College, Cambridge. He was master of the Free School at Tarnwore in 1656, and in 1658 obtained a presentation from Cromwell to the rectory of Long Whatton, which he was deprived of in 1661 by a vote of the House of Commons. He refused it afterwards on the condition of reordination, as he would not declare his Presbyterian ordination invalid. In 1666 he was chosen master of the Free School at Ashby-de-la-Zouch, which position he retained until his death, Jan. 22, 1696. His works are, Immortal, or a Discovery of Truth in Christ (1667, 12mo); another edition, with memoir, etc. (Leeds, 1804); Words Made Visible, or Grammar and Rhetoric (1679, 8vo); also several religious Tracts.

Shaw, Samuel F., a minister of the Methodist Episcopal Church, was born in New Jersey, Nov. 6, 1798, but was taken to Ohio when a child, his parents settling in Hamilton County. He was licensed to preach when about twenty years old, and in 1825 was received on trial into the Ohio Conference, afterwards becoming a member of the North Ohio Conference. For several years he was a missionary among the Wyandots at Upper Sandusky, and also served as presiding elder on several districts. He retired from the pastoral work several years before his death, which occurred near Bucyrus, Ohio, Nov. 15, 1875. See Minutes of Annual Conferences, 1875, p. 104.

Shaw, Thomas, an English clergyman and traveller, was born at Kendal, Westmoreland, about 1692, and entered Queen's College, Oxford, Oct. 5, 1711. He took his degree of bachelor of arts July 5, 1716, was made master of arts Jan. 16, 1719, went into orders, and became chaplain to the English factory at Algiers. Here he remained several years, spending much of his time in travelling. He was chosen fellow of his college March 16, 1727, and on his return to England (1738), took the degree of doctor of divinity. In 1740 he became principal of St. Edmund's Hall, and received also the living of Bramley, Hants. He was regius professor of Greek at Oxford, a fellow of Oriel College, and died, with the degree of D.D., at Oxford, Aug. 15, 1751. Mr. Shaw published, Travels, etc., in Barbary and the Levant (Oxf. 1738);—Vindication of the Abores (Lond. 1757, 4to), with supplement. See Allibone, Dict. of Brit. and Amer. Authors, s. v.; Chalmers, Biog. Dict. s. v.

Shaw, William C., a minister of the Methodist Episcopal Church, was born in Vevay, Ind., Oct. 2, 1833. He became a Christian when seventeen, and three years later entered Asbury College. In 1854 he was licensed to preach, and in 1857 was received into the South-eastern Indiana Conference; but in 1859 he went to Minnesota, and entered the Minnesota Conference. In 1863 he was superannuated, but in 1864 resumed work, was again superannuated in 1872, made effective in 1873, and appointed to Reed's and Walashaw, his last appointment. He died at Reed's Landing,
Shawm. In the Prayer-book version of Ps. cviii, 7, "with trumpets also and shawm" is the rendering of what stands in the A. V. "with trumpets and sound of cornet." The Hebrew word translated "cornet" will be found treated under that head. The "shawm" was a musical instrument resembling the clarionet. The word occurs in the forms shalm, shalme, and is connected with the German Schalmeie, a reed-pipe.

"With shawmes and trumpets, and with clarions sweet."—Spenser, F. Q. i, xii, 13.

"Even from the shrillest shawm unto the cornet."—Wright, vol. iv, p. 396.

Mr. Chappell says (Pop. Mus. i, 35, note b), "The modern clarionet is an improvement upon the shawm, which was played with a reed like the wayte, or hautboy, but, being a bass instrument, with all the compass of an octave, had probably more the tone of a bassoon." In the same note he quotes one of the "proverbs" written about the time of Henry VII on the walls of the Manor House at Leckfield, near Beverley, Yorkshire.

"A shawme maketh a sweete sounde, for he tuneth the basset.
It mounteth not to ayde, but kepeth till space. Yete it is blowne with to vehement a wynde. It maketh it to mycysorwe out of his kinde."

From a passage quoted by Nares (Glossary), it appears that the shawm was a musical instrument of a very ancient origin.

"He that never wants a Gillied full of balm For his elect, shall turn thy woful shalme Into the merry pipe."—G. Toeke, Beidies, p. 18.

Shayith. See THORN.

Sheaf is the rendering in the A. V. of the following words in the original: 1. כְּעָפָר, lehemad, prop. a bundle ("sheaf"); Gen. xxvi, 7; Ps. cxxxix, 6; 2. כְּעַפַּר, amir, prop. a handful (as rendered in Jer. ix, 29); hence a sheaf (Amos ii, 13; Mic. iv, 12; Zechar. xii, 6); and the equivalent כְּעַפַּר, שָׁמָר ("sheaf"), Lev. xxxvii, 10, 11, 12, 15; Deut. xxiv, 19; Ruth ii, 7, 18; Job xxix, 10), as well as the cognate verb כְּעַפַּר, to bind sheaves (Ps. cxxxix, 7, etc.); hence a sheaf (as rendered in Neh. iii, 15; improperly "heap" in Cam. vii, 2). The Mosaic statutes contained two prescriptions respecting the sheaves of harvest. 1. One accidentally dropped or left upon the field was not to be taken up, but remained for the benefit of the poor (Deut. xxiv, 19). See Glean. 2. The day after the feast of the Passover, the Hebrews brought into the Temple a sheaf of corn as the first-fruits of the barley-harvest, with accompanying ceremonies (Lev. xviii, 10-12). On the fifteenth of Nisan, in the evening, when the feast of the first day of the Passover was ended and the second day begun, the house of judgment decreed three men to go in solemnity and gather the sheaf of barley. The inhabitants of the neighboring cities assembled to witness the ceremony, and the barley was gathered into the territory of Jerusalem. The deputies demanded three times if the sun were set, and they were as often answered. It is. They afterwards demanded as many times if they might have leave to cut the sheaf, and leave was as often granted. Then they reaped it out of three different fields with three different sickles, and put the ears into three boxes to carry them to the Temple. The sheaf, or rather the three sheaves, being brought into the Temple, were threshed in the court. From this they took a full omer, that is, about three pints of the grain; and after it had been well winnowed, parched, and bruised, they sprinkled over it a log of oil, to which they added a handful of incense; and the priest who received this offering waved it before the Lord, towards the four quarters of the world, and cast part of it on the altar. After this every one might begin his harvest. See Passover.

She'al (Heb. שָׁאֵל, ֹשָׁאֵל, asking; Sept. Σαίλου π. ρ. Σαλωμία), one of the "sons" of Bani, who divorced their foreign wives after the captivity (Ezra x, 29). B.C. 457.

She'altiel (Heb. שָׁאֵלִיתֵל, ֹשָׁאֵלִיתֵל, asked of God; Anglicized thus in the A. V. at Ezra iii, 2, 8; v, 2; Neh. xii, 1; Hag. i, 1; but "Salathiel" at 1 Chron. iii, 17; also in the contracted form Shaltiel, שָׁלָהִיטֵל), "Shealtiel," Hag. i, 12, 14; ii, 2; Sept., Apocrypha, Josephus, and N. Test., Σαλομία; "Salathiel," 1 Esdr. v, 5, 48, 56; vi, 2; 2 Esdr. v, 16; Matt. i, 12; Luke iii, 27), the son of Jechoniah, or Jehoiachin, King of Judah, and father of Zorobabel, according to Matt. i, 15; but son of Neri (Neriah) and father of Zerubbabel (Zerubbabel) according to Luke iii, 27; while the genealogy in 1 Chron. iii, 17-19 leaves it doubtful whether he is the son of Assir or Jechoniah, and makes Zerubbabel his nephew. The truth seems to be that he was the son of the captive prince Jechoniah, or the Prophet (for the prophecy of this man in Jer. xxii, 30 seems only to mean that he should have no successor on the throne), by a daughter of Neri, or Neriah, of the private line of David; and that having himself no heir, he adopted his nephew Zerubbabel, or perhaps was the father of this last by his deceased brother's widow. B.C. cir. 586. See Genealogy of Christ.

Shear'ah (Heb. שֵׁעָרָה, קְרָשָׁה, raval of Je'orang; Sept. Σαῦρα v. r. Σαῦρα), the fourth named of the six sons of Azel of the descendants of Saul (1 Chron. viii, 38; ix, 44). B.C. long post 1000.

Shearings-house (Heb. מַשְׂקָר, מַשְׂקָר, Beqch E'k'd h'a-Roin; Sept. Vαισκάκακ [v. Vαισκάκακ] τῶν προμοιον; Vulg. Camera pastorum), a place on the road between Jezreel and Samaria, at which Jehu, on his way to the latter, encountered forty-two members of the royal family of Judah, whom he slaughtered at the well or pit attached to the place (2 Kings x, 13, 14). The translators of our version have given in the margin the literal meaning of the name—the house of binding of the shepherds, and in the text an interpretation perhaps accepted from Jos. Kimchi. Binding, however, is but a subordinate part of the operation of shearing, and the word aked is not anywhere used in the Bible in connection therewith. See SHEEP-SHEARER. The interpretation of the name of the place by the Arabians, and by Rashi, viz. "house of the meeting of shepherds," is accepted by Simonia (Onomast. p. 186) and Gesenius (Theaur. p. 195 b). Other renderings are given by Aquila and Symmachus. None of them, however, seem satisfactory, and it is probable that the original meaning has escaped. By the Sept., Eusebius, and Jerome it is treated as a proper name, as they also treat the "garden-house" of ix, 26. Eusebius (Onomast. s. v.) mentions it as a village of Samaria "in the great plain [of Esdraelon] fifteen miles from Legeon." It is remarkable that at a distance of precisely fifteen Roman miles from Lejjan the name of Beth-Ked appears in Van de Velde's map (see also Robinson, Bib. Is. ii, 316); but this place, though coincident in point of distance, is not on the plain, nor can it either belong to Samaria or be on the road from Jezreel thither, being behind (south of) Mount Gilboa. The slaughter at the well recalls the massacre of the pilgrims by Ishmael ben-Nethaniah at Mizpah, and the recent tragedy at Cawnpore. See BETH-HIKED.

Sh'ar ja'shub (Heb. שֶׁרֶשׁ יָשָׁבּ, יָשָׁבּ שֶׁרֶשׁ, a remnant shall return; Sept. οὗ καταλαμβάνει τοὺς Ισραήλ), son of the prophet Isaiah, who accompanied his father when he proceeded to deliver to king Ahaz the celebrated prophecy contained in Isa. vii (see ver. 3). B.C. cir. 735. As the sons of Isaiah sometimes stood for sigus
in Israel (Isa. viii, 18), and the name of Maher-shalal-
hash-baz was given to one of them by way of prophetic
intimation, it has been conjectured that the somewhat
remarkable name of Shear-jashub intimated that the
people who had then retired within the walls of Jerusa-
lem should return in peace to their fields and villages
(comp. Isa. x, 20-22). Fairbairn's theory that these
events occurred only in visions (On Prophecy, i, v, 2)
is in violation of the plain import of the language.

Sheath (Heb. צֶּחָה, nāḏān, 1 Chron. xxxi, 27; נָּחַל,
tātar, 1 Sam. xvii, 51; 2 Sam. xx, 8; Ezek. xxx. 3, 4, 5,
30; "scabbard," Jer. xlvii, 6; מַשָּׁבַח, John xviii, 11),
the case in which a dagger or sword blade is carried.
See KNIFE; SWORD.

She'ba, the name of several men and places in the
Bible, but occurring in two forms in the original: (a)
Heb. Sheba', יְשֵׁבָה (of uncertain etymology, see below),
which is the name of three fathers of tribes in the early
genealogy of Genesis, often referred to in the sacred
books, one of them located in Ethiopia (No. 1, below),
and the other two in Arabia (Nos. 2 and 3 respective-
ly); (b) Heb. She-va, יְשֵׁב, an oath, or seven, which is the
name of two men, and also of a place (Nos. 4, 5, and
6, below). See also BERY-SHEBA.

1. (Sept. סֵאָ֑בָת v. סַאָבָ֑ת).—First named of the
two sons of Raamah, son of Cush (Gen. x, 7; 1 Chron.
1, 9). B.C. post 2150. This Sheba settled somewhere on
the shores of the Persian Gulf in the Medes or Persians
(s.v.), or there is found an identification which appears to
be satisfactory—that on the island of Awal (one of the
"Bahrain Islands") are the ruins of an ancient city
called Seba. Viewed in connection with Raamah, and
the other facts which we know respecting Sheba, traces of
his settlements ought to be found on or near the shores
of the gulf. It was this Sheba that carried on the
great Indian traffic with Palestine in conjunction
with, as we hold, the other sheba, son of Kothlan son of
Keturah, who, like Dedan, appears to have formed with
the Cushite of the same name one tribe—the Cush-
ites dwelling on the shores of the Persian Gulf, and
carrying on the desert trade thence to Palestine in con-
junction with the nomad Keturahite tribes, whose past-
urages were mostly on the western frontier. The trade
is mentioned by Ezek. xxvii, 22, 23, in an unmistakable
manner, and possibly by Isa. lx, 6, and Jer. vi, 20, but
these latter, we think, rather refer to the Joktanite
Sheba, whose lands of the Sabaeans are mentioned in
Job i, 15, and vi, 19, in a manner that recalls the forays
of modern Bedawin (comp. Joel iii, 8)—
Smith. See ARABIA; DEDAN, etc.

2. (Sept. סֵאָ֑בָת v. סְאָ֑בָת and סֵאָ֑בָת).—Tenth
named of the thirteen sons of Joktan son of the patriarch
Eber (Gen. x, 28; 1 Chron. i, 22). B.C. cir. 2500. It
seems to have been the founder and eponymous head of
the Sabaeans (q.v.), and to have given his name to Sheba
or (q. v.), a district in Arabia Felix abounding in
frankincense, spices, gold, and precious stones (Isa. ix, 6,
Jer. vi, 30; Psa. lxxxi, 15). From this region came the
queen of Sheba, and it is converse with Solomon (1 Kings,
1-13; 2 Chron. i, 1-12; Matt. xii, 42; Luke xi, 31).
The Sabaeans were celebrated for their great trade (Psa.
Ixxxi, 10; Ezek. xxvii, 22; Joel iii, 8) and for plundering
(Job i, 15; vi, 19; comp. Strabo, xvi, 768-780; Abulfeda,
p. 36). In the following detailed treatment of this name
we make use of illustrations of it from modern ethnolog-
ical, geographical, and archaeological points of view.

It has been shown, in the art. ARABIA and other arti-
cles, that the Joktanites were among the early colonists
of Southern Arabia, and that the kingdom which they
there founded was, for many centuries, called the king-
dom of Sheba, after one of the sons of Joktan. They ap-
ppear to have been founded by an aboriginal race, which
the Arabian historians describe as a people of gigantic
stature, who cultivated the land and peopled the deserts
dike, living with the Jinn in the "deserted quarter,"
or, like the tribe of Thamud, dwelling in caves. This
people correspond, in their traditions, to the aborigi-
nal races of whom remains are found wherever a civiliza-
tion has presupposed and dispossessed the ruder
race. But, besides these extinct tribes, there are the
 evidences of Cushite settlers, who appear to have
passed along the south coast from west to east, and who,
probably, preceded the Joktanites and mixed with them
when they arrived in the country.

Sheba seems to have been the name of the great
South Arabian kingdom and the peoples which composed
it, until that of Himyar took its place in later times.
On this point much obscurity remains; but the Sabaeans
are mentioned by Diod. Sic., who refers to the historical
books of the kings of Egypt in the Alexandrian library,
and by Eratosthenes, as well as Artemidorus, or Aga-
tharchides (ii, 36, 46), who in Szabo's chief authority;
and the Homerite or Himyarites are first mentioned by
Strabo in the expedition of Aelius Gallus (B.C. 24).
Nowhere earlier, in sacred or profane records, are the lat-
ter people mentioned, except by the Arabian historians
themselves, who place Himyar very high in their list,
and pay it great importance to his family from the early
date. We have therefore, on other points, to consider
reasons for supposing that in this very name of Himyar
we have the Red Man and the origin of Erythraea,
Erythean Sea, Phoenicians, etc. See ARABIA; RED SEA.
The apparent difficulties of the case are reconciled by
supposing, as M. Caussin de Perceval (Essais, i, 54, 55)
haves done, that the name of the city which came to
be called Sheba (Arabic, Saba), but that its chief and
sometimes reigning family or tribe was that of Himyar;
and that an old name was thus preserved until the foun-
dation of the modern kingdom of Himyar or the Tih-
baa, which M. Caussin is inclined to place (but there is
much uncertainty about the matter) two centuries before
our era, when the two great rival families of Him-
yard and Kahlan, together with smaller tribes, were unit-
ed under the former. In support of the view that the
name of Sheba applied to the kingdom and its people
as a generic or national name, we find in the Kumba
the "name of Sheba comprises the tribes of the Yemen in
common" (s.v. "Sebii"); and this was written long after
the later kingdom of Himyar had flourished and fallen.
And, further, as Himyar meant the "Red Man," so, prob-
ably, did Seb. In Arabic the verb sabā—said of the
sun, or of a journey, or of a fever—means "it altered" a
man, i.e., by turning him red; the noun sebā, as well as
sabā, in this sense, is found in the passage (Gen. iii, 14) The
Arabian wine was red; for we read "kumait is a name of
wine, because there is in it blackness and red-
ness" (Sihâk MS.). It appears, then, that in Seba we
very possibly have the oldest name of the Red Man,
whence came the Adj. Himyar, Erythraea.

We have assumed the identity of the Arabic Saba
with Sheba (יוֹשֵׁב). The plur. form יָשְׁבִּים corre-
sponds with the Gr. Σαβαῖοι and the Lat. Sabii.
Genius compares the Heb. with Ethiopic Saba, "man." The
Hebrew Sâbîn is, in all, by far the greater number of instances,
Sîn in Arabic [see GENEN.]; and the historical, ethnolo-
gical, and geographical circumstances of the case all
require the identification.

In the Bible the Joktanite Sheba, mentioned geogra-
phically in Gen. x, 28, recurs as a kingdom, in the ac-
count of the visit of the queen of Sheba to king Solo-
mon, when she heard of his fame concerning the name
of the God of Israel, and came to Jerusalem with a great
train, with camels that bare spices, and very
much gold, and precious stones" (ver. 2). Again, "She
gave him an hundred and twenty talents of gold,
and of spices very great store, and precious stones: there
was never such abundance of gold and silver; and the
king of Sheba gave to king Solomon" (ver. 10). She
was attracted by the fame of Solomon's wisdom,
which she had heard in her own land; but the dedic-
tion of the Temple had recently been solemnized, and, no
double, the people of Arabia were desirous to see this fa-
mous house. That the queen was of Sheba in Arabia, and
not of theEthiopian or Arabian nation, the Cushite
kingdom of Ethiopia, or the Arabian kingdom, is
unquestionable. Josephus and some of the Rabbinical
writers perversely, as usual, refer her to the latter; and
the Ethiop (or Abyssinian) Church has a convenient
tradition to the same effect (comp. Josephus, Ant. viii, 6,
5; Ludolf, Hist. Ethiop. ii, 3; Harris, Abyssinia, ii, 105).
Able-Exra (on Dan. xii, 6), however, remarks that the
queen of Sheba came from the Yemen, for she spoke an
Inhametic, or rather a Semitic, language. The Arabs
call her Bilktis (or Yelkamah or Balkamah; Ibn-Khal-
dún), a queen of the later Himyeries, who, if M. Caus-
sin's chronological adjustments of the early history of
the Yemen are correct, was the last queen of that
ynervous in the queen's visit of the Yemen, the
na (Exod. i, 75, etc.); and an edifice at Ma-rrib (Maria-
ba) still bears her name, while M. Fresnel read the name
of "Almacah" or "Balmacah" in many of the Himyere-
itic inscriptions. The Arab story of this queen is, in
the present state of our knowledge, altogether unhisto-
rical and unworthy of credit; but the attempt to make
her a queen seems to point to the Cushite M. Caus-
Sin conjectures, from the latter being mentioned in the
Koran without any name, and the commentators adopt-
ing Bilktis as the most ancient queen of Sheba in the
lists of the Yemen. The Koran, as usual, contains a
very poor version of the Biblical narrative, diluted with
nothing that is even interesting. The following (from
Jo. vi. 6, etc.) gives the whole of this historical story.

The other passages in the Bible which seem to refer
to the Joktanite Sheba occur in Isa. lx, 6, where we
read "All they from Sheba shall come: they shall bring
gold and incense," in conjunction with Midian, Ephah,
Kedar, and Nebaito. Here reference is made to the
commerce that took the road from Sheba along the
western borders of Arabia (unless, as is possible, the
Cushite or Keturahite Sheba be meant); and again in
Jer. vi. 20, it is written "To what purpose cometh there
to me incense from Sheba, and the sweet cane from a
far country?" (but comp. Ezek. xxvii, 22, 23, and see
below). On the other hand, in Psa. xlvii, 10, the Joktan-
ite Sheba is undoubtedly meant; for the kingdoms of
Sheba and Seba are named together, and in vers. 16 the
gold of Sheba is mentioned. In Job i, 15; vi, 19, the
predatory habits of the Keturahite Sabaeans have been
thought to be referred to, but these were later than our
date of that book. We prefer to assign that passage, as
well as the incident of the rock in Ez. iii, 21, to the
terror of the penitents, to the Joktanite tribe, with which
the other seems to have coalesced. The fact of the chief
and best-
ascertained settlement of the Sheba tribe being in
the extreme south of the Arabian peninsula sufficiently
explains the language used of the queen who came from
there to hear the wisdom of Solomon, that she was a
queen of "the south," and "came from the uttermost
parts of the earth," i.e. from the extremities of the
then known world (Matt. xii, 42; Luke xi, 31). The
distance in a straight line could scarcely be under
a thousand miles. On the other hand, the fact that this
queen seems to point to the Cushite Sabaeans, or the
Merotic, the sovereigns of which are well known to have
been chiefly or exclusively females. Later essays on
the queen of Sheba's merit have been written by Rost
(Bautz. 1789), Zelich (Viteb. 1774), Schultens (Lugd.
1740), Norberg (Lonl. and Goth. 1777). See CANDACE.
The kingdom of Sheba embraced the greater part of
the Yemen, or Arabia Felix. Its chief cities, and proba-
ble successors, were Sebh, San'a (Uzal), and Zafar (Sephar).
Seba was probably the name of the city, and generally of the
country and nation; but the statements of the Arabian writers are conflicting on
this point, and they are not made clearer by the ac-
counts of the classical geographers. In the old Greek
name, the word "seba" would perhaps mean "city" or
other name of the city, or of the fortress or royal palace in
it: "Seba is a city known by the name of Ma-rrib,
three nights' journey from San'a" (Ex-Zeljaj, in the
Taj-el-Arba MS.). Again, "Seba was the city of Ma-
rib (Mushtarab, s. v.), or the country in the Yemen,
of which the city was Ma-rrib" (Marisas, s. v.). Near
Seba was founded the city of El-Jebr, the kingdom of
a nation that had been destroyed by Lutikum the Adite, to store
the water for the inhabitants of the place, and to avert the
descent of the mountain torrents. The catastrophe of
the rupture of this dike is an important point in Arab
history, and marks the dispersion in the 2d century of
the Joktanite tribes. This, like all we know of Seba,
points irresistibly to the great importance of the city as
the ancient centre of Joktanite power. Although Usul
(which is said to be the existing San'a) has been sup-
pposed to be of earlier foundation, and Zafar (Sephar)
was a royal residence, we cannot doubt that Seba was
the most important of these chief towns of the Yemen.
Its value to the decay of the old dynasties, is shown by
their struggles to obtain and hold it; and it is narrated
that it passed several times into the hands, alternate-
ly, of the so called Himyeries and the people of Ha-
dramaut (Hazarmaveth). Eratosthenes, Artemidorus,
Strabo, and Pliny speak of Mariaiba; Diodorus, Aga-
tharchides, Stephanus Byzant. of Sabena (Zagre Eye.
Steph. Byzant.); Zezag [Aga.]; Polenev (vi, 7, § 30, 42),
and Pliny (vi, 23, § 34) mention Zagrb. But the first
all say that Mariaiba was the metropolis of the Sa-
bait; and we may conclude that both names applied to
the same place—one the city, the other its palace or
fortress (though probably these writers were not aware
of the existence of the latter). The name is also found
by the following variants Sabatha, Sobatela, etc.) of Pliny (H. N.
28, § 32) have reference to Shidam, capital of Hadramaut,
and the name, also, of another celebrated city, of which
the Arabian writers (Marisas, s. v.) give curious ac-
counts. The classics are generally agreed in ac-
scribing to the Sabaei the chief riches, the best territory, and
the greatest numbers of the four principal peoples of
the Arabia which they—namely the Sabaei, Attramite (= Ha-
dramaut), Katabani (= Kahtan—Joktan), and Minei
(for which see Diklah). See Bochart (Phalag. xxvii),
and Muller (Geo. Min.), p. 186 sq.

The history of the Sabaeans has been examined by M.
Caussin de Perceval (Eesai sur I'Hist. des Arabes); but
much remains to be adjusted before its details can be
received as trustworthy, the earliest safe chronological
point being about the commencement of our era.
An examination of the existing remains of Sabean and Him-
yeritic cities and buildings will, it cannot be doubted,
add more information to our knowledge of these peoples,
and the acquaintance with the language, from inscriptions aid-
ed, as M. Fresnel believes, by an existing dialect, will
probably give us some safe grounds for placing the
building or era of the dike. In the art. ARABIA it is stated
that there are dates on the ruins of the dike, and the
conclusions are given which De Saed and Caussin have
drawn from those dates and other indications respecting
the date of the rupture of the dike, which forms, then,
an important point in Arabian history; but it must be
placed in the 2d century of our era, and the older era
of the building is altogether unfixed, or, indeed, any date
before the migration of the Zillus Gecri further, our
knowledge of these buildings, the wall-masonry, and ejen-
vently of Cushite workmanship or origin. Later temples and
palace-temples, of which the Arabs give us descriptions,
were probably of less massive character; but Sabean art
is an almost unknown and interesting subject of in-
quiry. The religion celebrated in these temples was
worship of a deity known to us, but to which we are
known to admit of discussion in this place. It may be
necessary to observe that whatever connection there
was in religion between the Sabaeans and the Sabians,
there was none in name or in race. Respecting the lat-
ter the reader may consult Chwolson's Sabbir, a work
that may be regarded as the conclusion of that study, and
the same author's Nabatean Agriculture. See NA-
BATH. Some curious papers have also appeared in the
Journal of the German Oriental Society of Leipzig,
by Dr. Osander.
3. (Sept. סָדָא v. r. סָדָא and סָדָא) Eliezer of the two sons of Jokshan, one of Abraham’s sons by Keturah (Gen. xvi. 12, 13; Gen. xxi. 32). He evidently settled somewhere in Arabia, probably on the eastern shore of the Arabian Gulf, where his posterity appear to have become incorporated with the earlier Sabaeans of the Joktanite branch.

4. (Sept. סָדָא v. r. אֱלִיָּהוּ; Josephus Σαδαρίων, Ant. vii. 14, 4, v. r. of Bichri, a Benjamite from the mountains of Ephraim (2 Sam. xx. 1-22), the last chief of the Absalom insurrection. B.C. 1023. He is described as a “man of Belial,” which seems [see SHEMI] to have been the usual term of invective cast to and fro between the two parties. But he must have been a person of some consequence, from the immense effect his providence appeared to have. It was, in fact, all but an anticipation of the revolt of Jeroboam. It was not, as in the case of Absalom, a mere conflict between two factions in the court of Judah, but a struggle, arising out of that conflict, on the part of the tribe of Benjamin to recover its lost ascendency—a struggle of which some indications had already been manifested in the excessive bitterness of the Benjamite Shimei. The occasion seized by Sheba was the emolument, as if from loyalty, between the northern and southern tribes on David’s return. Through the ancient custom he summoned all the tribes “to their tents;” and then and afterwards Judah remained faithful to the house of David (ver. 1, 2). The king might well say “Sheba the son of Bichri shall do us more harm than did Absalom” (ver. 6). What he feared was Sheba’s occupation of the fortified cities. This fear was justified by the result. Sheba traversed the whole of Palestine, apparently rousing the population, Joab following him in full pursuit, and so deeply impressed with the gravity of the occasion that the murder even of the great Amasa was but a passing incident in the campaign. He stayed but for the moment of the deed, and “purused after Sheba the son of Bichri.” The mass of the army halted for an instant by the bloody corpse, and then they also “went on after Joab to pursue after Sheba the son of Bichri.” It seems to have been his intention to establish himself in the fortress of Abel-Beth-maacah—in the northermost extremity of Palestine—possibly allided to the cause of Absalom through his mother, Maacah, and famous for its prudence of its inhabitants (ver. 18). That prudent was put to the test on the next occasion, Joab’s return to the head of the insurgent chief. A woman of the place undertook the mission to her city, and proposed the execution to her fellow-citizens. The head of Sheba was thrown over the wall and the insurrection ended. See DAVID.

6. (Sept. סָעָדָא v. r. סָדָא) One of the towns of the allotment of Simeon (Jos. ix. 2). It occurs between Beer-sheba and Moladah. In the list of the cities of the south of Judah, out of which those of Simeon were selected, no Sheba appears apart from Beer-sheba; but there is a Shema (xxv. 36), which stands next to Moladah and which is probably the Sheba in question. This suggestion is supported by the reading of the Vatican copy of the Sept. The change from ב to מ is a easy one both in speaking and in writing, and in their other letters the words are identical. Some have supposed that the name Sheba is a mere repetition of the latter portion of the preceding name, Beer-sheba—by the common error called homonoelolenon—and this is supported by the facts that the number of names given in xiv. 3-6 is, including Sheba, fourteen, though the number stated is thirteen; and that in the list of Simeon of 1 Chron. iv. 23, there is entirely omitted. Ge-

Sheb'nah (Heb. שְׁבַנָּה). Sheb'nah, שְׁבַנָּה, fem. of Sheba, i. e. seen or an oath; Sept. according to LXX, "εὐβαπτισμός," Vulg. translates less well "abundancia," the famous well which gave its name to the city of Beer-sheba (Gen. xxvi. 33). According to this version of the occurrence, it was the fourth of the series of wells dug by Isaac's people, and received its name from him, apparently in allusion to the oaths (ver. 31, יָבַתָּה יִבֶּלֶת, yebelathah) which had passed between himself and the Philistine chieftains the day before. It should not be overlooked that according to the narrative of an earlier chapter the well overturned its existence and its name to Isaac's father (xxvi. 25). Indeed, its previous existence may be said to be implied in the narrative now directly under consideration (xxvi. 25). The two transactions are curiously identical in many of their circumstances—the rank and names of the Philistine chieftains, the strife between the substrates on either side, the complaint, the adjurations, the city that took its name from the well. They differ alone in the fact that the chief figure in the one case is Abraham, in the other Isaac. Some commentators, as Katich (Genesis, p. 500), looking to the fact that there are two large wells at Bir es-Sheba, propose to consider the two transactions as distinguished, and as belonging to the one well, the other to the other. Others see in the two narratives merely two versions of the circumstance under which this renowned well was first dug. Certainly in the analogy of the early history of other nations, and in the very close correspondence between the details of the two accounts, there is much to support this. The various plays on the meaning of the סָעָדָא, interpreting it as "seven," as an "oath," as "abundance" (so Jerome, as if reading רָשָׁי, as a line (such is the meaning of the modern Arabic Saba)—are all so many direct testimonies to the remote date and archaic form of this most venerable name, and to the fact that the narratives of the early history of the He-brews are under the control of the same laws which regulate the early history of other nations in the East. In explanation of the repetition of the names of these wells, it should be noted that the sacred text expressly states that Isaac, after reopening them, "called their names after the names which his father had called them" (Gen. xxvi. 18). A minute description of the wells and vicinity of Beer-sheba is given by Lieut. Conder in his "Survey of the Temple of the "State of the Fund" for Jan. 1875, p. 28 sq. See Beer-sheba; Well.

Sheb'am (Heb. שֶׁבֶם, שֵׁבֶם, 'fragrance; Sept. סַעֱמָדָא, and so the Samar. Cod. סַעֱמָדָא, one of the towns in the pastoral district on the east of Jordan—the "land of Jazzar and the land of Gilead"—demanded, and finally ceded to the tribes of Reuben and Gad (Numb. xxxii. 3), it is named between Elieelath and Nebi, and is probably the same which, in a subsequent verse of the chapter and on later occasions, appears in the altered forms of Shemihah and Shimah (q.v.).

Sheban'ah (Heb. Shebaynag, שֶׁבֶנָּה, 'increased of Jehovah; once [1 Chron. xiv. 24] in the prolonged form Shebanyag ha', שֶׁבֶנָּה, the name of four Hebrews.

1. (Sept. סָעָדָא v. r. סָעָדָא and סָעָדָא). One of the Levites resident on the return of the exiles from the house of Obadiah to Jerusalem (1 Chron. xxiv. 24). B.C. 1043.

2. (Sept. סָעָדָא and סָעָדָא, v. r. סָעָדָא, סָעָדָא, etc.). One of Ezra's Levitical attendants, who stood upon the steps and uttered the prayer of confession and thanksgiving (Neh. ix. 4, 6), and joined in the sacred song (Neh. xii. 48). 1 Scronym. 490.

4. (Sept. סָעָדָא, סָעָדָא). A priest who did the same (Neh. xix. 4, xii. 14). B.C. 459. He had a son

p. 1855 a, where other suggestions are cited). See SHEBA.
named Joseph (ver. 14). He is apparently the same elsewhere (ver. 3) called Shechaniah (q. v.).

Sheb'arim (Heb. with the art., hash-Sheb'arim', the breaches, as often elsewhere rendered; Sept. σωτηριαν; Vulg. Sebargam) is given in the A. V. as the name of a place to which the Israelites retreated in the first attack of Ai (Josh. vii, 5). "The root of the word has the force of 'dividing' or 'breaking,' and it is therefore suggested that the name was attached to a spot where there were fissures or rents in the soil, gradually deepening till they ended in a sheer precipice or precipice to the ravine by which the Israelites had come from Gilgal—'the going down' (てしまった; see ver. 5 and the margin of the A. V.). The ground around the site of Ai, on any hypothesis of its locality, was very much of this character. Keil (Jost, ad loc.) interprets Sheb'arim by 'stone quarries;' but this does not appear to be supported by other commentators or by lexicographers. The ancient interpreters (Sept., Targ., and Syr.) usually discard it as a proper name, and render it 'till they were broken up,' etc.—Smith. But this is opposed both to the use of the art. here—which seems to indicate a well-known specific locality—and to the fact that few of the Hebrews were slain there. A minute examination of the locality would doubtless reveal some clue to the name. See Al.

Shebat. See Shebat.

Sheb'er (Heb. id. רֵעָה, breaking; Sept. Σαβίπ v. r. Σαβισίπ), first named of the sons of Caleb (son of Hur) by his concubine Maachah (1 Chron. ii. 43). B.C. post 1856.

Shebith. See Talmod.

Sheb'na (Heb. Sheb'na, שִׁבְנָה; occasionally Sheb'nah, שִׁבְנָה, 2 Kings xviii, 18, 26; xix, 2), etio; Sept. Συμβάς v. r. Συμβίς; Josephus, Σωμβανος [ant. i, 1, 11], a person of high position in Hezekiah's court, holding at one time, the office of prefect of the palace (Isa. xxii, 15), but subsequently the subordinate office of secretary (xxxvi, 8; 2 Kings xix, 2), his former post being given to Eliakim, B.C. 718. This change appears to have been effected by Isaiah's interposition; for Shebna had incurred the prophet's extreme displeasure, partly on account of his pride (Isa. xxii, 16), his luxury (ver. 18), and his tyranny (as implied in the title of "father" bestowed on him, ver. 21), and partly (as appears from his successor being termed a "servant of Jehovah," ver. 20) on account of his belonging to the political party which was opposed to the theocracy and in favor of the Egyptian alliance. From the omission of the usual notice of his father's name, he has been conjectured to be a sonsome homo. Winer thinks, from the Aramaean form of his name, that he was a foreigner. He is also mentioned in 2 Kings xviii, 37, Isa. xxxvi, 11, 22, xxvii, 2.

Shedo. See Agate.

Shebu'el [many Sheb'uel] (Heb. Shebuel', שֵׂבּוֹל, captive [or removen] of God; Sept. Σώζωβελ; Vulg. Subebul), the name of two Levites.

1. A leading descendant of Gershom, the son of Moses (1 Chron. xxii, 16), who was ruler of the treasures of the house of God (xxiv 24); called also Subuel (xxiv, 20). B.C. 1018. "The Targum of 1 Chron. xxiv, 24 has a strange piece of confusion: 'And Shebuel, that is, Jonathan the son of Gershon the son of Moses, returned to the fear of Jehovah, and when David saw that he was skilful in money matters he appointed him chief over the treasures.' He is the last descendant of Moses of which there is any trace." (Taylor)

2. One of the fourteen sons of Heman the minstrel, and chief of the thirteenth band of twelve in the temple choir (1 Chron. xxv, 4); also called Shu'abel (ver. 20). B.C. 1018.

Shebuth. See Talmod.

Shecani'ah (1 Chron. xxiv, 11; 2 Chron. xxxix, 15), the same name usually Anglicized Shechaniah (q. v.).

Shechaniah (Heb. Shekanay'ah, שֵׁחָנָיָה, dweller [i. e. intimate] with Jehovah, twice in the prolonged form Shekany'ahu, שֵׁחָנָיָהוּ [1 Chron. xxiv, 11; 2 Chron. xxxix, 15], which is always Anglicized "Shechaniah" in the A. V.; Sept. Σχανηίας, but Σχανηίας in 2 Chron. xxvi, 15; Ezra viii, 5; Σχανηίας in ver. 8; Σχανηίας in Neh. xii, 8; Vulg. Shecanias, but Schenianis in xii, 3), the name of several men, chiefly during the post-exilic period.

1. One of the tenth division of priests according to the arrangement under David (1 Chron. xxiv, 11, "Shechaniah"). B.C. 1014.

2. Last named of the priests appointed by Hezekiah to distribute the daily services among the sacerdotal order (2 Chron. xxxix, 15, "Shechaniah"). B.C. 736.

3. One of the "priests and Levites" (i.e. to which of those orders he belonged does not certainly appear, probably the former, however) who returned from Babylon with Zerubbabel (Neh. xii, 3). B.C. 536. In ver. 14 (and perhaps x) he is apparently called Shechaniah (q. v.). But he is not the same with the Shechaniah who was tenth in order in the reign of David; his name is not found in the lists of Nehemiah his unit continuity occurs in the seventh or eighth place (see Keil, ad loc.).

4. A person apparently mentioned as one of the "sons of Phanah (i.e. Parosh), and father or progenitor of a Zechariah who returned from the exile in the time of Artaxerxes (Ezra viii, 8). B.C. ante 450. As the phraseology, however, is here peculiar, many connect the clause containing this name with the preceding verse (as in the Sept. and 1 Esdr.; but contrary to the Masoretic punctuation), so as to read, "Hattush of the sons of Shechaniah;" thus identifying this person with No. 9. The clause containing this name is perhaps an interpolation from ver. 5. See Hattush.

5. Another person similarly mentioned in the same list (Ezra viii, 6) as progenitor of "the son of Hazael," who likewise returned from Babylon with Ezra; but as the name Shechaniah itself is not found in the parallel list of Ezra ii, it is evident that Hazael is scarcely a sufficient designation, we may conjecture (comp. ver. 10) that a name (actually supplied in the Zathos of the Sept. and 1 Esdr.; evidently the Zattu of Ezra ii, 8) has dropped out of the Heb. text before "Shechaniah" (Bertheau, Kursgepf. Handb. ad loc.). This individual of Shechaniah, will then appear (in conformity with the phraseology of the adjoining enumerations) as the son of the Zechariah in question, and himself one of the returned exiles. B.C. 459. See Zattu.

6. A son of Jehiel, of the "sons of Elam," and the one who proposed to Ezra the repudiation of the Gentile wives taken after the return from Babylon (Ezra x, 2). B.C. 438.

7. The father of Shemaiah, which latter was "keeper of the east gate," and repaired part of the wall of Jerusalem under Nehemiah (Neh. iii, 29). B.C. ante 446. He was perhaps identical with No. 3.

8. The son of Arah and father-in-law of Tobiah, the Jews' chief of the restoration of Jerusalem (Neh. vi, 18). B.C. cir. 434.

9. A descendant of the Davidaic line, father of Shechina, and apparently the son of Obadiah (1 Chron. iii, 21, 22). B.C. cir. 410. He may also have been the ELIASIM (Matt. i, 19) or Joseph (Luke iii, 26) of our Savior's ancestral line (Strong, Tharm, and Expos. p. 16, 17). See Nos. 4 and 7.

Shechem (Heb. Shechem', שֵׁכֶם, "in pause" She'kem, שֶׁכֶם, both as a common noun (Psa. xxxi, 18) and as a proper name (Num. xxxvi, 31; Josh. xvii, 2, 1 Chron. vii, 19), a shoulder; Sept. Σχηχῆμ), the name of three men and one place in the Bible.

1. The son of Hamor, prince of the country or district of Shechem in which Jacob formed his camp on
his return from Mesopotamia. B.C. 1906. This young man, having seen Jacob’s daughter Dinah, was smitten with her beauty, and deflowered her. This wrong was terribly and cruelly avenged by the damsel’s unrighteous brothers, Shimeon and Levi, who were joined by Dinah. It seems likely that the town of Shechem, even if of recent origin, must have existed before the birth of a man so young as Hamor’s son appears to have been; and we may therefore suppose it a name preserved in the family, and which both the town and the princes inherited. See No. 4 below. Shechem’s name is always connected with that of his father, Hamor (Gen. xxi. 19; xxxiv. 2; Judg. ix. 27; Acts vii. 16). See JACOB.

2. A son of Gilead, of the tribe of Manasseh, and head of the family of the Shechemites (Num. xxvi. 51). B.C. post 1856. His family are again mentioned as the Josh.-Sihon (xxi. 26).

3. In the lists of 1 Chron. another Shechem is named among the Gileadites as a son of Shimihad, a younger member of the family of the foregoing (vii. 19). B.C. post 1856. It must have been the recollection of one of these two Gileadites which led Cyril of Alexandria into his strange fancy (quoted by Rendall, Palæst., p. 1067, from his Gen. xvi. 29) of placing the city of Shechem on the eastern side of the Jordan.

4. An ancient and important city of Central Palestine, which still subsists, although under a later designation. In our account of it we introduce thecopious information by modern authors.

1. The Name. The Hebrew word, as above seen, means a “shoulder,” or, more correctly, the upper part of the back, just below the neck, like the Latin dorsum, a ridge (Gesenius, s. v.). The origin of this name is doubtful. Some have supposed it was given to the town from its position on the water-shed lying between the valley of the Jordan, on the east, and the Mediterranean, on the west. But this is not altogether correct, for the water-shed is more than half-way from the city to the entrance of the valley; and, had it been otherwise, the elevation at that point is so slight that it would neither suggest nor justify this as a distinctive title. It has also been made a question whether the place was so called from Shechem, the son of Hamor, head of their tribe in the time of Jacob (Gen. xxxiii. 18 sq.), or whether he received his name from the city. The import of the name favours, certainly, the latter supposition, since its evident significance as an appellative, in which the Hebrew idea prevails, is an instance such as a name; and the name, having been thus introduced, would be likely to appear again and again in the family of the hereditary rulers of the city or region. The name, too, if first given to the city in the time of Hamor, would have been taken, according to historical analogy, from the father rather than the son. Some interpret Gen. xxxiii. 18, 19 as showing that Shechem in that passage may have been called also Shalem. But this opinion has no support except from that passage; and the meaning even there more naturally is that Jacob came in safety to Shechem (שְׁכֵם, as an adjective, safe; comp. Gen. xxviii. 21); or (as recognised in the English Bible) that Shalem belonged to Shechem as a dependent tributary village. See SHELEM. The name is also given in the A.V. in the form of Sichem (Gen. xii. 6) and Sychem (Acts vii. 16), to which, as well as Shechem (John iv. 5), the reader is referred. In the Sept., as above stated, it is (as in the New Test. above) usually designated by סיכם, but also סיכום in 1 Kings xi. 25; and סיכום, as in Josh. xxiv. 22, which is a more generally used term and stands in the O.T. (in the O.T.). But the place has also been known by very different names from these variations of the ancient Shechem. To say nothing of Mabortha (מַבָּרֹת, or מַבָּרָה), which Josephus says (War, iv, 8, 1) it was called by the people of the country (הָרָה, the thoroughfare or gorge), and which also appears, with a slight variation (Mamortha) in Pliny (Hist. Nat. v, 13), Josephus (ibid) calls it Neopolis (Νεοπόλιτ, “New Town”), from its having been rebuilt by Vespasian after the Roman war in Palestine; and this name is found on coins still extant (Encke, Doctr. Num. iii. 438). It seems that last name it has still retained in the Arab Nabli, and is one of the very few instances throughout the country where the comparatively modern name has supplanted the original.

Coil of Neopolis in Palestine.

II. Location. The scriptural indications of its locality are not numerous. Joshua places it in Mount Ephraim (xx, 7; see also 1 Kings xii, 25). Sihon was "on the east side of the highway that goeth up from Bethel to Shechem" (Josh. xxii. 19); hence Shechem must have been farther north than Sihon. The story of Jotham is it more precisely located under Mount Gerizim (ix, 7); which corresponds with the more full and exact description of Josephus, who places it between Gerizim and Ebal (Ant. iv, 8, 44). Further, Shechem, as we learned from the history (Gen. xxvii, 12, etc.), must have been near Dothan; and, assuming it as more than the place of that name a few miles north-east of Nahil, Shechem must have been among the same mountains, not far distant. So too, as the Socari in John iv, 5 was probably the ancient Shechem, that town must have been near Mount Gerizim, to which the Samaritans went up at stated periods to be present by the wall at its foot. The collateral evidences in support of this opinion we may briefly state. 1. The city is not built on an elevated position, as almost all the towns of Palestine are, but at the foot of Gerizim and along the valley, indicating a date anterior to the warlike and unsettled state of the country which led the inhabitants to select a more secure and defensive site for their towns; as also the unwillingness of the people through future generations to change the site of their ancient and renowned city. 2. The advantage which it affords of a good supply of running water—a most important consideration in that climate especially, the spot in this favored locality has such an abundance as the city itself. 3. The road which has connected the valley with the summit of Mount Gerizim through all past ages is the one ascending behind the present town. It is true that there is another path leading up from the valley about half-way between the city and the east end of the valley; but this has never been more than a kind of by-path, used by few except shepherds. 4. The antiquities in and around the city. These are neither numerous nor important in themselves, but as evidence on the subject in question they are of considerable value. They consist of portions of walls, remains, asplendid tombs, and remains of dwellings. These remains from pottery and tombs, and in great variety of such, all of early date, and some evidently of Hebrew origin. These being either within the walls of the present city, or in its immediate vicinity, and none to be met with in any other part of the valley, seem to be a pretty conclusive proof that the present site is the original one. 5. As Jotham’s parable to the people of Shechem clearly indicates the same spot (Judg. ix, 7-21). He would have stood on one of those large projections of Gerizim that overlook the city; and in no other spot in the valley would the whole story tally so well. Josephus, in relating Jotham’s exploit, confirms this beyond all dispute. His words are from Sichem went up to the mountains of Gilboa which overhangs the city (Ant. v, 7, 2). We may remark that Josephus usually retains the old name Shechem when speaking of the city, but occasionally adopts the new name, Neopolis (War, iv, 8, 1); and
thus clearly identifies Shechem with Nablus. This was the common Jewish opinion, as we read in Midrash Rabbah that "Shechem in Mount Ephraim is Nablus." So, also, the early Christians Epiphanius (Adv. Haer. iii, 1055) and Jerome (Epist. Paulin.). The only ancient author that makes a distinction between Shechem and Nablus is Eusebius, if indeed he means to assert the fact, which seems doubtful from his mode of expression (Onomastik. s. v. "Troglodyk", S. xxvii, 5). But his contemporary, the Bordeaux Pilgrim, who visited the place in A.D. 333, not only identifies the two, but also never calls the city by its new name, Neapolis, but only its ancient name, Shechem; and most likely he thus only expressed the general and probably universal opinion that then prevailed among both Jews and Christians.

The ancient town, in its most flourishing age, may have filled a wider circuit than its modern representative. It could easily have extended further up the side of Gerizim, and eastward nearer to the opening into the valley from the plain. But any great change in this respect, certainly the idea of an altogether different position, the natural conditions of the locality render doubtful. That the suburbs of the town, in the age of Christ, approached nearer than at present to the entrance into the valley between Gerizim and Ebal may be inferred from the implied vicinity of Jacob's well to Sychar (John iv). The narrative (John iv) where Jesus made there on the reader is that the people could be readily seen as they came forth from the town to repair to Jesus at the well; whereas Nablus is more than a mile distant, and not visible from that point. The present inhabitants have a belief or tradition that Shechem occupied a portion of the valley on the east beyond the limits of the modern town; and certain travelers speak of ruins there, which they regard as evidence of the same fact. The statement of Eusebius that Sychar lay east of Neapolis may be explained by the circumstance that the part of Neapolis in that quarter had fallen into such a state of ruin when he lived as to be mistaken for the site of a separate town (see Heiland, "Palestine," p. 1004). The portion of the town on the edge of the plain was more exposed than that in the recess of the valley, and, in the natural course of things, would be destroyed first, or be left to desertion and decay. Josephus says that more than ten thousand Samarians were slain in the battle; and the city was destroyed by the Romans on one occasion (War, iii, 7, 32). The population, therefore, must have been much greater than Nablus, with its present dimensions, would contain.

III. History.—The allusions to Shechem in the Bible are numerous, and show how important the place was in the early days of the nation, and in the time of Abraham. But we have the same expression used of cities or towns in other instances (xvii, 24; xix, 12; xxix, 22); and it may have been interchanged here, without any difference of meaning, with the phrase, "city of Shechem," which occurs in xxxiii, 18. A possession affording such natural advantages would hardly fail to be occupied as soon as any population existed in the country. The narrative shows incontestably that at the time of Jacob's arrival here, after his sojourn in Mesopotamia (ver. 18; ch. xxxiv), Shechem was a Hivite city, of which Hamor, the father of Shechem, was the head man. It was at this time that the patriarch purchased from that chieftain "the parcel of the field," which he subsequently bequeathed, as a special patriony, to his son Joseph (xxii, 22; Josh. xxi, 23; John iv, 5). The field lay undoubtedly on the rich plain of the Makhreth, and its value was the greater on account of the well which Jacob had dug there so as to be independent on his neighbors for a supply of water. The delillement of Dinah, Jacob's daughter, and the capture of Shechem and massacre of all the male inhabitants by Simeon and Levi, are events that belong to this period (Gen. xxxix, iv, 1 sq.). As this bloody act, which Jacob so entirely condemned (ver. 90) and reproved with his dying breath (xxxix, 7), is ascribed to two persons, and urge that as evidence of the very insignificant character of the town at the time of that transaction. But the argument is by no means decisive. Those sons of Jacob were already at the head of households of their own, and may have had the support, in that achievement, of their numerous relatives and retainers in the manner of a commander as taking this or that city when we mean that it was done under his leadership. The oak under which Abraham had worshipped survived to Jacob's time; and the latter, as he was about to remove to Beth-el, collected the images and amulets which some of his family had brought with them from Padan-aram and buried them "under the oak which was by Shechem" (xxxv. 1-4). The "oak of the monument" (if we adopt Gunkel's rendering of "b sells" (Judg. xvi, 35)) where the Shechemites made Abimelech's kingdom marked, perhaps, the veneration with which the Hebrews looked back to these earliest footsteps (the melakukana gentia) of the patriarchs in the Holy Land. See MOEONEM. During Jacob's sojourn at Hebron his sons, in the course of their pastoral wanderings, drove their flocks to Shechem, and at Dorothan, in that neighborhood, Joseph, who had been sent to look after their welfare, was seized and sold to the Ishmaelites (Gen. xxxviii, 12, 29). In the distribution of the land after its conquest by the Hebrews, Shechem fell to the lot of Ephraim (Josh. xx, 7), but was assigned to the Levites, and became a city of refuge (xxi, 20, 21). It acquired new importance as the scene of the renewed promulgation of the law, when its blessings were heard from Gerizim and its curses from Ebal, and the people bowed their heads and acknowledged Jehovah as their king and ruler (Deut. xxxi, 11; Josh. ix, 32-35). It was here Joshua assembled the people, shortly before his death, and delivered to them his last counsel (xxiv, 1, 20). After the death of Gideon, Abimelech, his bastard son, induced the Shechemites to revolt from their allegiance to Gideon, and they were defeated and put to flight by his relative, Jotham, as king (Judg. ix). It was to denote this act of usurpation and treason that Jotham delivered his parable of the trees to the men of Shechem from the top of Gerizim, as recorded at length in Judg. ix, 22 sq. The picturesque traits of the allegory, as Prof. Stanley suggests (Hos. v, 17), are "sinister and significant" (xxv, 1-6), and are strikingly appropriate to the diversified foliage of the region. In revenge for his expulsion, after a reign of three years, Abimelech destroyed the city, and, as an emblem of the fate to which he would consign it, sowed the ground with salt (Judg. ix, 34-45). It was soon restored; however, for we are told in 1 Kings xii that all Israel assembled to Shechem, and in the days of Solomon's successor, went thither to be inaugurated as king. Its central position made it convenient for such assemblies; its history was fraught with recollections which would give the sanctions of religion as well as of patriotism to the vows of sovereignty and people. The new king's obsequia made him incontinent of Shechem, and his influence. Here, at this same place, the ten tribes renounced the house of David and transferred their allegiance to Jerobeam (ver. 16), under whom Shechem became for a time the capital of his kingdom. We come next to the epoch of the exile. The people of Shechem doubtless shared the fate of the other inhabitants of Canaan, who at least, carried into captivity (2 Kings xvii, 5, 6; xviii, 9 sq.). But Shalmanezer, the conqueror, sent colonies from Babylonia to occupy the place of the exiles (xxvii, 24). It would seem that there was another influx of strangers, at a later period, under Esar-haddon (Ezra iv, 2).
The "certain men from Shechem" mentioned in Jer. xii, 5, who were slain on their way to Jerusalem, were possibly Cuthites, i.e. Babylonian immigrants who had become proselytes or worshippers of Jehovah (see Hit- zig, Der Proph. Jer., p. 331). These Babylonian settlers in the land, intermixed, no doubt, to some extent with the old inhabitants, were the Samaritans (see Exod. xxiii, 29; Deut. xxviii, 19; and Jer. xlii, 2). They were divided into two branches, the one of whom and the Jews a bitter hostility existed for so long a time (Josephus, Ant. xii, i, i., xii, 3, 4). The Son of Sirach (1, 26) says that "a foolish people," i.e. the Samaritans, "dwelt at Shechem" (тά Σικεωμα). From its vicinity to their place of worship, it became the seat of the Samaritan (though it has been maintained at least till the destruction of their temple, about B.C. 129, a period of nearly two hundred years (ibid. xiii, 9, 1; War, i, 2, 6). From the time of the origin of the Samaritans the history of Shechem blends itself with that of this people and of their sacred mount, Gerizim; and the reader will find the proper information on this part of the subject under those headings. The city was taken and the temple destroyed by John Hyrcanus, B.C. 129 (Ant. xiii, 9, 1; War, i, 2, 6).

As already intimated, Shechem reappears in the New Test. It is probably the Sychar of John iv, 5, near which the Saviour conversed with the Samaritan woman at Jacob's well. Συχαρ, as the place is termed there (Συχαρυς, v. 5), and Sychar (in v. 15) certainly in that passage, was no doubt current among the Jews in the age of Christ, and was either a term of reproach (τὸ Συχαρύς, 'a lie') with reference to the Samaritan faith and worship, or, possibly, a provincial mispronunciation of that period (see Lücke, Comm. ιουναα, i, 577). The Saviour, with his disciples, remained two days at Sychar on his journey from Judæa to Galilee. He preached the Word there, and many of the people believed on him (John iv, 35, 40). In Acts vii, 16, Stephen reminds his hearers of the certain of the patriarchs (note to Josephus, as we see in Josh. xxiv, 32, and following, perhaps, some tradition as to Jacob's other sons) were buried at Sychem. Jerome, who lived so long hardly more than a day's journey from Shechem, says that the tombs of the twelve patriarchs were to be seen there in his day. The anonymous city in Acts viii, 5, where Philip preached with such effect, may have been Sychem, though many would refer that narrative to Samaria, the capital of the province.

We have seen that not long after the times of the New Test. the place received the name of Neapolis, which was given to the town by the Arabian tribe of Nabathaeans, being one of the few names imposed by the Romans in Palestine which have survived to the present day. It had probably suffered much, if it was not completely destroyed, in the war with the Romans (see Rambach, De Urbe Sichem Sita Compara (Hals. 173)), and would seem to have been restored or rebuilt by Vespasian, and then to have taken this new name; for all the coins of the city, of which there are many, all bear the inscription Flavia Neapolis — the former epithe without doubt derived from Flavius Vespasian (Mionnet, Méd. Antiq. v, 499).

The name occurs first in Josephus (War, iv, 8, 1), and then in Fliny (Hist. Nat. v, 14), Front. (Front., v, 10). As intimated above, there had already been developed on its walls the Christian faith at this place under our Saviour, and it is probable that a Church had been gathered there by the apostles (John iv, 30-42; Acts vii., 25; iv. 31; xv, 3). Justin Martyr was a native of Neapolis (Apolig. ii, 41). The name of Neapolis, however, occurs in A.D. 314; and other bishops continue to be mentioned down to A.D. 536, when the bishop John signed his name at the synod of Jerusalem (Eulogia, Palest. p. 1099). When the Moslems invaded Palestine, Neapolis and other small towns in the neighborhood were subdued while the siege of Jerusalem was going on (Abulfeda, Annals, i, 220), and after the taking of Jerusalem by the Crusaders, Neapolis and other towns in the mountains of Samaria tendered their submission, and Tancred took possession of them without resistance (Will. Tiry, x, 20). Neapolis was last visited by the Saracens in A.D. 1113; but a few years after (A.D. 1120) a council was held here by king Baldwin II to consult upon the state of the country (Fulcher, p. 424; Will. Tiry, xii, 13). Neapolis was not now inhabited; the site was given over to that of Samaria, and the property of it was assigned to the abbot and canons of the Holy Sepulchre (Jacc. de Vitriac, ch. iviii). After some disasters in the unquiet times which ensued, and after some circumstances which show its remaining importance, the place was finally taken from the Saracens in A.D. 1242 by Abu Ali, the colleague of sultan Bibras, and has remained in Moslem hands ever since.

IV. Description.—1. The natural features of the neighborhood are the two mountains Gerizim and Ebal, standing in front of each other like two giants, with the little valley running between, and on the eastern side the noble plain of Moab reaching from north to south. The two mountains run in parallel ranges from east to west — Ebal on the north and Gerizim on the south — and both reach an elevation of some 2500 feet above the level of the Mediterranean, and 800 feet above the valley itself. The town stands to the western opening of the valley, a distance of about a mile and a half, where the two mountain ranges have their starting-points, and to which parts the names of Gerizim and Ebal are confined, both mountains rise immediately from the valley in steep and mostly precipitous declivities to the height stated; and both, as seen from the valley, are equally naked and sterile. But immediately behind the city, and there only, Gerizim has the advantage, owing to a copious stream that flows through a small ravine at the west side of the town. Here are several orchards and gardens, producing abundantly. On Ebal also, opposite the town, there are several gardens and cultivated plots — some on the summit, but the majority of late plantings, all in a comparatively thriving condition, but these cannot equal those on the Gerizim side on account of the deficiency of water. The valley itself stands at an elevation of some 1700 feet above the Mediterranean, running from east to west, and extending from the eastern abutments of the two mountains as far as Sebaste (Samaria) westward. A portion of this only belongs to our present notice, namely, from its eastern opening to the town of Nablus, a distance of about a mile and a half. Its width varies. At its commencement it measures somewhat more than half a mile; but near half-way to the town it is about a mile and a half, and then we proceed towards the city the mountains again recede, and the valley widens to its former width; but again, at the city, contracts to its narrowest dimension. It is hardly in any part a flat level, but rather a gradual slope of the two mountains, until they dovetail into each other. Just at the commencement of the valley, on either side, are Jacob's Well and Joseph's tomb. (See below.) A little farther on, and near the centre of the valley, stands the hamlet Balata, the remains of a town of the same name mentioned by Parchi (Kaphat va-Phe- rach), but of no historical importance. Near half-way up the valley is the highest ground, forming the watershed between the valley of the Jordan and the Mediterranean. The valley thus far is almost without trees of any kind, but the part nearest the town is well wooded. The principal kind of tree is the olive, as it seems to have been in the days of Joatham (Judg. ix, 8). The town itself is surrounded by orchards and gardens, where pears, apples, pomegranates, oranges, apricots, and other fruit grow luxuriantly. One of the great and peculiar features of this valley is the abundance of water. Dr. Rosen says that the inhabitants boast of the existence of not less than eighty springs of water within and around the city. He gives the names of twenty-seven of the principal of them. Within some two miles' radius from thirty to forty
copious springs exist. But within the area now under notice they are more copious than numerous. There is not a single spring on the Ebal side till we have passed the city for some distance. On the Gerizim side, outside the city, there are three. The first, rising near the water-shed, dries up in summer. The next, Ain Dafna (the Δάφνη of the Roman period of the city), a very large stream, issues out near the road and runs in an open channel past Jacob's well, turning a mill on its way, and emptying itself to water the plain. Ain Balata, named from the little village whence it flows, is the other, issuing from a subterranean chamber supported by three pillars, and sufficiently copious to supply a large population. Within the city itself the principal supply is derived from a stream descending from a ravine on the western side of the town, which is made to flow in abundance along the channels of some of the streets. The fountains are numerous. The most remarkable, Ain el-Kerun, is under a vaulted dome, and is reached by a flight of steps. The water is conveyed hence by conduits to two of the principal mosques and some private houses, and afterwards serves to water the gardens below. The various streams run on the northern side of the town into one channel, which serves to turn a corn-mill that is kept going summer and winter.

On the eastern side of the valley, as already mentioned, lies the extensive plain of the Mukhna, stretching for many miles from north to south, and hemmed in on both sides by mountain chains, the slopes of which support several villages and hamlets. In Scripture it is called Sadeh (סדה), a smooth or level cultivated open land (Gen. xxxiii. 19), to which our Saviour pointed when he said, "Say ye not, There are yet four months, and then cometh harvest?" etc. (John iv. 35).

The situation of the town is one of surpassing beauty. "The land of Syria," said Mohammed, "is beloved by Allah beyond all lands, and the part of Syria which he loveth most is the district of Jerusalem, and the place which he loveth most in the district of Jerusalem is the mountain of Nablus" (Fumag. des Orient., ii. 139). Its appearance has called forth the admiration of all travellers who have any sensibility to the charms of nature. It lies in a sheltered valley, protected by Gerizim on the south and Ebal on the north. The feet of these mountains, where they rise from the town, are not more than five hundred yards apart. The bottom of the valley is about 1800 feet above the level of the sea, and the top of Gerizim 800 feet higher still. Those who have been to Heidelberg will assent to Von Richter's remark that the scenery, as viewed from the foot of the hills, is not unlike that of the beautiful German town. The site of the present city, which we believe to have been also that of the Hebrew city, occurs exactly on the water-summit; and streams issuing from the numerous springs there flow down the opposite slopes of the valley, spreading verdure and fertility in every direction. Travellers vie with each other in the language which they employ to describe the scene that bursts here so suddenly upon them on arriving in spring or early summer at this paradise of the Holy Land. The somewhat sterile aspect of the adjacent mountains becomes itself a foil, as it were, to set off the effect of the verdant fields and orchards which fill up the valley. "There is nothing finer in all Palestine," says Dr. Clarke, "than a view of Nablus from the heights around it. As the traveller descends towards it from the hills, it appears luxuriantly embosomed in the most delightful and fragrant bowers, half concealed by rich gardens and by stately trees collected into groves, all around the bold and beautiful valley in which it stands." "The whole valley," says Dr. Robinson, "was filled with gardens of vegetables and orchards of all kinds of fruits, watered by fountains which burst forth in various parts and flow westward in refreshing streams. It came upon us suddenly, like a scene of fairy enchantment. We saw nothing to compare with it in all Palestine. Here, beneath the shadow of an immense mulberry-tree, by the side of a purling rill, we pitched our tent for the remainder of the day and the night... We rose early, awakened by the songs of nightingales and other birds, of which the gardens around us were full." "There is no wilderness here," says Van de Velde (i. 386), "there are no wild thickets, yet there is always verdure, always shade, not of the oak, the terebinth, and the caroube-tree, but of the olive-grove, so soft in color, so picturesque in form, that, for its sake, we can willingly dispense with all other wood. There is a singularity about the Vale of Shechem, and that is the peculiar coloring which objects assume in it. You know that wherever there is water the air becomes charged with watery particles,
and that distant objects beheld through that medium seem to be enveloped in a pale-blue or gray mist, such as contributes not a little to give a charm to the landscape. But it is precisely those atmospheric tints that we miss so much in Palestine. Fiery tints are to be seen both in the morning and the evening, and glittering violet or purple-colored hues where the light falls next to the long deep shadows; but there is an absence of coloring, and of that charming dusky hue in which objects assume such softly blended forms, and in which also the transition in color from the foreground to the farthest distance loses the hardness of outline peculiar to the perfect transparency of an Eastern sky. It is otherwise in the vale of Shechem, at least in the morning and the evening. Here the exhalations remain hovering among the branches and leaves of the olive-trees, and hence that lovely bluish haze. The valley is far from broad, not exceeding in some places a few hundred feet. This you find generally enclosed on all sides; here, likewise, the vapors are condensed. And so you advance under the shade of the foliage, along the living waters, and charmed by the melody of a host of singing birds—for they, too, know where to find their best quarters—while the perspective fades away and is lost in the damp, vapory atmosphere.” Apart entirely from the historic interest of the place, such are the natural attractions of this favorite resort of the patriarchs of old, such the beauty of the scenery, and the indescribable air of tranquility and repose which hangs over the scene, that the traveler, anxious as he may be to hasten forward in his journey, feels that he would gladly linger, and could pass here days and weeks without impatience.

2. The modern city, as already observed, is situated in the valley, about a mile and a half from its eastern opening. It stands at the foot of Gerizim, and stretches from east to west in an irregular form. Just where the city stands there is scarcely any flat ground, the gradual slopes of the two mountains dovetailing into each other. The roads leading to the town from all parts are in the commonest and wretchedly conducted, and the town itself is surrounded by all kinds of thil. The city is encompassed by a wall of very common structure, and in a most dilapidated condition. The two principal gates—one in the eastern and the other in the western end of the town—are in keeping with the walls, and would be much troubled to have as much as in the time of Abimelech. Notwithstanding, they are of no small importance in the economy of the town. Here we still find a faint emblem of what gates were in ancient times—the great emporiums where all the public affairs of the city were transacted. The gates of Nablus retain their importance in part. At the western gate the revenue department is still located, and all who pass through with any commodities to sell, and purchasers, are charged a certain toll according to the value of the articles. The main street, following the line of the valley from east to west, runs almost in a straight line the whole length of the town, connecting the two gates. Most of the other streets cross this quite irregularly, and are, almost without exception, narrow and dirty. Nearly all of them have a channel along the centre, in which runs a stream of water. In the winter season these streams are full, but diminish during the summer months, and several are dried up. This arrangement of the water causes the town to be very damp during the winter; and, however pleasant it may be in summer, it certainly forms anything but a good element in the sanitary condition of the place. This state of the streets, together with the fact of some of them being arched, makes the town uncommonly sombre and dull. But when we speak of streets, our readers must not imagine them to be similar to European streets, formed by the front of lines of houses, private or public; but the streets of Nablus, like those of other Oriental towns, are only passages between dead walls, except where the bazaars break the monotony. These are the Eastern shops or market-places—a kind of recesses in the walls—and are comparatively numerous in Nablus. They are grouped according to the merchandise they contain, and are situated principally in the main street.

With regard to the buildings, we may remark that all the houses are built of stone, and are heavy and sombre. They are entered from the street through a ponderous strong door, barred on the inside (2 Sam. xiii, 18); a large iron knocker is attached, and two or three blows with this will suffice to bring one of the inmates to ask, “Who is there?” (Acts xii, 13). From the inside it will be found that each house stands detached from its neighbor, and consists of detached vaulted rooms, all built of stone, and all opening into the court, which is uncovered, but screened from the observation of all but the inmates by the high walls of the house on all sides. Every house has one dome or more; but the roof is flat, with battlements surrounding it, to prevent any one falling into the street or court (Deut. xxii, 8). In the better sort of houses a kind of family saloon is built on a portion of the roof of the house, much more spacious and airy than the other rooms, and preserved principally for the entertainment of guests who are to be treated with marked respect.

This is the aliyah, נַעְלוּיָה, of the Old Test. (1 Kings xvii, 19), and the “larger upper room” (םיָ֣אוֹט פִּיָּאָ֑ה) of the New (Mark xiv, 15). The windows of the houses are sometimes only square holes in the wall (Acts xx, 9); but generally finished with lattice-work as of old (Judg. v, 28; Cant. ii, 9).

There are no public buildings worth mentioning. The Kenish, or synagogue of the Samaritans, is a small edifice, in the interior of which there is nothing remarkable, unless it be an alcove, screened by a curtain,
in which their sacred writings are kept. The structure may be three or four centuries old. A description and sketch plan of it are given in Mr. Grove's paper On the Modern Samaritans, in Vacation Tourists for 1861. Nathalia has five mosques, two of which, according to a tradition in which Mohammedans, Christians, and Samaritans agree, were originally churches. One of them, it is said, was dedicated to John the Baptist; its eastern portal, still well preserved, shows the European taste of its founders. The domes of the houses and the minarets, as they showed from above, screen the luxuriant vegetation which surrounds them, present a striking view to the traveller approaching from the east or the west.

There are a few small portions of the town remaining, in all probability, from ancient times. The arches passage in the Samaritan quarter seems to be partly of this class, comprising levelled stones of Jewish style. Similar ones are in other parts of the town. The marble troughs used at the principal streams are probably Israelitish remains. These are in five number, dug up in the plain on the eastern side of Gerizim, and originally the sarcophagi of the dead. Rosen, during his stay at the city, 

[Note: The text is cut off here.]

3. To complete our survey of Shechem and its neighborhood, we must take a brief glance at the traditional memorials of the people. As before, the subject is a difficult one, and its treatment here is as far as possible a sketchy one. The Well of Jacob and the Tomb of Joseph stand at the eastern opening of the valley, the former near the foot of Gerizim, and the latter near the foot of Ebal, as if keeping guard over the parcel of field bought by the patriarch of the children of Hamor.

[Note: The text is cut off here.]
well, and sent his disciples to the city situated in the narrow valley, intending, on their return, to proceed along the plain on his way to Galilee, without himself visiting the city. All this corresponds exactly to the present character of the ground. As the well, top, and Jacob's Well, of high antiquity, a known and venerated spot, which, after having already lived for so many ages in tradition, would not be likely to be forgotten in the two and a half centuries intervening between John and Eusebius."

It is understood that the well, and the site around it, have lately been purchased by the Russian Church, not, it is to be hoped, with the intention of erecting a Church over it, and thus forever destroying the reality and the sentiment of the place. A special fund has recently been raised in England for the purpose of surveying the precincts and cleaning out the well. See Jacob's Well."

(2.) The second of the spots alluded to is the Tomb of Joseph. It lies about a quarter of a mile north of the well, exactly in the centre of the opening of the valley between Gerizim and Ebal. It is a small square enclosure of high whitewashed walls, surrounding a tomb of the ordinary kind, but with the peculiarity that it is placed diagonally to the walls, and not in the parallel, as usual. A rough pillar used as an altar, and black with the traces of fire, is at the head, and another at the foot of the tomb. In the left-hand corner as you enter is a vine, whose branches "run over the wall," recalling exactly the metaphor of Jacob's blessing of his favorite son (Gen. 49:10), and the pure Hebrew inscriptions. One of these is given by Dr. Wilson (Lands, etc. ii. 61), and the interior is almost covered with the names of pilgrims in Hebrew, Arabic, and Samaritan. Beyond this there is nothing to remark in the structure itself. It purports to cover the tomb of Joseph, but there is no "parcel of ground," which his father bequeathed especially to him as his favorite son, and in which his bones were deposited after the conquest of the country was completed (Josh. xxiv. 32).

The local tradition of the tomb, like that of the well, is as old as the beginning of the 4th century. Both Eusebius (Onomast., Σερίκα) and the Bordeaux Pilgrim mention its existence. So do Benjamine of Tudeala (1160-79) and Maundeville (1322), and so—to pass over intermediate travellers—does Maundrell (1697). All that is wanting in these accounts is to fix the tomb which they mention to the present spot. But this is difficult. The name of the Pillar, so-called from a Mussulman saint, this saint, however, is only a modern invention of the Mohammedans. By the Samaritans the place is simply called El-A'mud, the Pillar, their tradition identifying it with the pillar of stone set up by Joshua, as noticed above. They also believe that the celebrated oak of Moreh stood on the same spot. The Mohammedans come here occasionally to pray, but no great honor is paid to the place if we may judge from its present dilapidated state.

(4.) About one third of the way up the side of Mount Ebal, in front of the town, is a bold perpendicular rock, some sixty feet high, called the Pillar of Moreh. The site of the Samaritan Tabernacle, and the supposed place of the celebration of the Passover, while the Israelites were in the wilderness. The place is now occupied by a building house, consisting of four chambers, and a well for prayer, but all in a dilapidated state. This part of the mountain is called by the saint's name.

(5.) A little farther westward, and about midway to the summit, stands the only edifice now remaining on Mount Ebal. This is called Imad ed-Din—the Colonnade of Religion. According to the current tradition, this building was erected over the tomb of a Mohammedan saint, honored by the above name (and the building, of course, receiving its name from the saint), who flourished some five hundred years ago. The building has been sufficiently described by the several Christians who say that originally it was a Christian church. It consists of two apartments, the floor of the first still partly paved with fragments of very beautiful mosaic-work, wrought in marble of red, blue, and white. On the middle of the inner room stands a large wooden lampstand in imitation of a tree, with a goody number of branches, on which a number of oil-lamps are hanging, together with a formidable array of filthy rags placed there by pilgrims in honor of the saint, whose tomb, they say, is in the northern wall, indicated by a marble slab placed against it. This part of the mount is frequented by the natives after the saint, 'Imad ed-Din.

4. The present inhabitants of Nablus, with very few exceptions, are Arabs. It is difficult to say with exactness what is the number of its population, inasmuch as no census has been taken. About 10,000 is near the mark. Of these there are about 100 Jews, 130 Samaritans, from 500 to 600 native Christians; the remaining 9400 are Mohammedans—the most-bigoted and unruly, perhaps, in Palestine. The enmity between the Samaritans and Jews is as inveterate still as it was in the days of Christ.
of a comparative luxury to be found in very few of the inland Oriental cities. It produces, in its own manufactories, many of the coarser woollens, as well as silk, chiffon, of camel’s hair, and especially soap, of which last commodity large quantities, after supplying the immediate country, are sent to Egypt and other parts of the East. The ashes and other sediments thrown out of the city, as the result of the soap manufacture, have grown to the size of hills, and give to the environs a singularly barren and deserted appearance. The olive, in the days when Jobah delivered his famous parable, is still the principal tree. Figs, almonds, walnuts, mulberries, grapes, oranges, apricots, pomegranates, are abundant. The valley of the Nile itself hardly surpasses Nablus in the production of vegetables of every sort.

She'chémite (Heb. with the art. and collectively hash-Shékhemīm, a patronymic, Sept. Σκηκμηῖς), a family designation of the descendants of Shehem (q. v.), the son of Shemidah of the tribe of Manasseh (1 Chron. vii. 19).

Shech'ınah (some Shech'ınah; also written She'chinah) (in Chaldee and Ne-Hebrew Sheqinah, מְשַׁקְנָה, strictly residence, l. e. of God, his visible presence, from מִשָּׁקָה, to dwell), a word not found in the Bible, but used by the later Jews, and borrowed by Christians from them, to express the visible presence of the Divine Presence, especially when resting or dwelling between the cherubim on the mercy-seat in the tabernacle and in the Temple of Solomon; but not in Zerubbabel’s temple, for it was one of the five particular which the Jews reckon to have been wanting in the second Temple (Curtius, Lecic, s. v.; Peirce, Conybeare, 1820, p. 327).

1. Shech’ınah (Sheqinah).—The word of the term is first found in the Targums, where it forms a frequent paraphrase for God, considered as dwelling among the children of Israel, and is thus used, especially by Onkelos, to avoid ascribing corporeity to God himself, as Castell tells us, and may be compared to the analogous paraphrase in the Targum of the word שַׁכִּינָה, Word of the Lord. Many Christian writers have thought that this threefold expression for the Deity—the Lord, the Word of the Lord, and the Shechinah—indicates the knowledge of a trinity of persons in the Godhead, and accordingly, following some Rabbinical writers, identify the Shechinah with the Holy Spirit. Others, however, deny this (Calmet, Dict. of the Bible; Saubert [Joh.], On the Logos, § xix, in Critic. Sacr.; Glass, Philolog. Sacr. v. i., vii., etc.).

Without stopping to discuss this question, it must conduct to give an accurate knowledge of the use of the term Shechinah by the Jews themselves if we produce a few of the most striking passages in the Targums where it occurs. In Exod. xxvii, 8, where the Hebrew has “Let them make me a sanctuary that I may dwell (הַשְׁכִּינָה) among them,” Onkelos has “I will make my Shechinah to dwell among them.” In xxix, 45, 46, for the Hebrew “I will dwell among the children of Israel,” Onkelos has “I will make my Shechinah to dwell,” etc. In Psa. cxlix, 2, for “this Mount Zion wherein thou hast dwelt” the Targum has “wherein thy Shechinah hath dwelt.” In the description of the dedication of Solomon’s Temple (1 Kings viii, 12, 13) the Targum of Jonathan runs thus: “The Lord is pleased to make his Shechinah dwell in Jerusalem.”

have built the house of the sanctuary for the house of thy Shechinah forever,” where it should be noticed that in ver. 18 the Hebrew הַשְׁכִּינָה is not used, but השְׁכִּינָה and הַשְׁכָּנָה. In 1 Kings vi, 18, for the Hebrew “I will dwell among the children of Israel,” Onkelos has “I will make my Shechinah dwell,” etc. In Isa. vi, 5 he has the combination “the glory of the Shechinah of the King of ages, the Lord of hosts,” and in the next verse he paraphrases “from off the altar” by “from before his Shechinah on the throne of glory in the lofty heavens that are above the altar” (comp. also Numb. v. 17; xxxiv, 9, 11, 12, 15; Joel iii, 17, 21, and numerous other passages).

On the other hand, it should be noticed that the Targums never render the word שלש or the word הַשְׁכִּינָה by Shechinah, but by נַפֶּל and נַפֶּל, and that even in such passages as Exod. xxiv, 16, 17; Numb. ix, 17, 18, 22; x, 12, neither the mention of the cloud nor the constant use of the word נַפֶּל in the Hebrew provokes any reference to the Shechinah. Hence, as regards the use of the word Shechinah in the Targums, it may be defined as a paraphrase for God, wherever he is said to dwell and be present among Zion or Israel, or between the cherubim, or on the Ark, or, in general, as before said, to avoid the slightest approach to materialism. Far more frequently this term is introduced when the word שלש occurs in the Hebrew text; but occasionally, as in some of the above-cited instances, where it does not, but where the paraphrast wished to interpose an abstraction corresponding to presence to break the bolder anthropomorphism of the Hebrew writers.

Our view of the Targumistic notion of the Shechinah would not be complete if we did not add that, though, as we have seen, the Jews reckoned the Shechinah among the marks of the divine favor which were wanting to the second Temple, they manifestly expected the return of the Shechinah. In the days of the Maccabees Thus Hag. i, 8, “Build the house, and I will take pleasure in it, and I will be glorified, saith the Lord” is paraphrased by Jonathan “I will cause my Shechinah to dwell in it in glory.” Zech. ii, 10, “Lo, I come, and I will dwell in the midst of thee, saith the Lord” is paraphrased “I will be revealed, and will cause my Shechinah to dwell in the midst of thee:” and viii, 5, “I am returned unto Zion, and will dwell in the midst of Jerusalem,” is paraphrased “I will make my Shechinah dwell in the midst of Jerusalem;” and, lastly, in Ezek. xlvii, 7, 9, in the vision of the return of God to the Temple, Jonathan paraphrases thus: “Son of man, write concerning this word, the vision of the Shechinah of my glory, and thus is the place of the house of the dwelling of my Shechinah, where I will make my Shechinah dwell in the midst of children of Israel forever. . . . Now let them cast away their idols, . . . and I will make my Shechinah dwell in the midst of them forever” (comp. Isa. iv, 5, where the return of the pillar of cloud by day and fire by night is foretold as to take place in the days of the Messiah). The rabbins affirm that the Shechinah first resided in the tabernacle prepared by Moses in the wilderness, into which it descended on the day of its consecration in the figure of a cloud. It passed thence into the sanctuary of Solomon’s Temple on the day of its dedication by this prince, where it continued till the destruction of Jerusalem and the Temple by the Chaldeans, and was not afterwards seen there.

2. Biblical History.—As regards the visible manifestation of the Divine Presence dwelling among the Israelites, there is no mention in the text of the Shechinah by itself, the idea which the different accounts in Scripture convey is that of a most brilliant and glorious light enveloped in a cloud, and usually concealed by the cloud so that the cloud itself was for the most part alone visible; but on particular occasions the glory (Gen. 1. 7, 6; Num. 10. 36) appeared. Thus, at the
Exodus, the Lord went before the Israelites by day in a pillar of cloud, and by night in a pillar of fire to give them light. Again, we read that this pillar was a cloud and darkness to the Egyptians, "but it gave light by night" to the Israelites. But in the morning watch the Lord looked upon the host of the Egyptians through the pillar of fire and of the cloud, and troubled the host of the Egyptians"—i.e., as Philo (quoting Numbers ii, 18), the "apparition of the Deity shone forth from the cloud," and by its amazing brightness confounded them. So, too, in the Pirke Eliezer it is said, "The blessed God appeared in his glory upon the sea, and it fled back," with which Patrick compares Psalms lxix, 16, "The waters saw thee, O God; the deeps feared thee, to the very full." And the Targum has "They saw thy Shechinah in the midst of the waters." In Exodus, xix, 9, "The Lord said to Moses, Lo, I come unto thee in a thick cloud, and accordingly in ver. 16 we read that "a thick cloud" rested upon the mountain, and in ver. 18 that "Mount Sinai was altogether on a smoke, because the Lord descended and stood upon it." This is further explained in xxiv, 16, where we read that "the glory of the Lord abode upon Mount Sinai, and the cloud covered it (i.e., as Aben-Ezra explains it, the glory) six days." But upon the seventh day, when the Lord called "unto Moses out of the midst of the cloud," there was a breaking-forth of the glory through the cloud, for "the mount of the Lord was like devouring fire on the top of the mount in the eyes of the children of Israel" (ver. 17).

So, again, when God, as it were, took possession of the Tabernacle at its first completion (xi, 34, 35), "the cloud covered the tent of the congregation (externally), and the glory of the Lord filled the tabernacle (within), and Moses was not able to enter into the tent of the congregation" (rather, of meeting): just as at the dedication of Solomon's Temple (1 Kings viii, 10, 11) "the cloud filled the house of the Lord so that the priests could not stand to minister because of the cloud, for the glory of the Lord had filled the house of the Lord." In the tabernacle, however, as in the Temple, there was only a temporary state of things, for throughout the books of Leviticus and Numbers we find Moses constantly entering into the tabernacle. When he did so, the cloud which rested over it externally, dark by day and luminous at night (Num. xix, 15, 16), came down and stood at the door of the tabernacle, and he walked with Moses inside, "face to face, as a man walketh with his friend" (Exodus, xxxiii, 7-11). It was on such occasions that Moses heard the voice of one speaking unto him from off the mercy-seat that was upon the ark of testimony, from between the two cherubim (Num. vii, 89), in accordance with Exodus xxv, 22; Lev. xvi, 2. But it does not appear that the glory was habitually seen either by Moses or the people. Occasionally, however, it flashed forth from the cloud which concealed it, as Exodus, xvi, 7, 10; Lev. vii, 6, 23, when "the glory of the Lord appeared unto all the people" according to a previous promise, or as Numbers xiv, 10; xvi, 19, 42; xx, 8; xxii, 6, when it appeared in the cloud by day, and in the vision. The last occasion on which the glory of the Lord appeared was that mentioned in xx, 6, when they were in Kadesh in the fortieth year of the Exodus, and murmured for want of water; and the last express mention of the cloud as visibly present over the tabernacle is in Deuteronomy, xxiii, 15, just before the death of Moses. The cloud was over the camp that day, so far as we can see, for the second year of the Exodus (Numbers x, 11; dix; xii, 10; but as the description in ix, 15-23; Exod. x, 38, relates to the whole time of their wanderings in the wilderness, we may conclude that, at all events, the cloud visibly accompanied them through all the migrations mentioned in Numbers x to xxxvi and in the story of the death of Moses and till Moses died. From this time we have no mention whatever in the history either of the cloud, or of the glory, or of the voice from between the cherubim, till the dedication of Solomon's Temple. But since it is certain that the ark was still the special symbol of God's presence and glory in the Temple (Josh. iii, 10; 1 Sam. iv; 1 Sam. xlviii, 1 sq.; comp. with Numbers x, 35; Psalms xxxiv, 7; xxxv, 1, xcix, 1), and since such passages as 1 Samuel iv, 21, 22; 2 Samuel vi, 2; Psalms cxix, 7; 2 Kings xix, 15, seem to imply the continued manifestation of God's presence in the cloud between the cherubim, and inasmuch as Lev. xvi, 2 seemed to promise so much, and as more general expressions, such as Psalms xix, 11; xxxiii, 8; xxxviii, 13, 14; lxvi, 2; Isaiah viii, 18, etc., thus acquire much more point, we may perhaps conclude that the cloud did continue, though with shorter or longer interruptions, to dwell between "the cherubim of glory shadowing the mercy-seat" until the destruction of the Temple by Nebuchadnezzar.

Theusions, however, as in the Temple, there was only a temporary state of things, for throughout the books of Leviticus and Numbers we find Moses constantly entering into the tabernacle. When he did so, the cloud which rested over it externally, dark by day and luminous at night (Num. xix, 15, 16), came down and stood at the door of the tabernacle, and he walked with Moses inside, "face to face, as a man walketh with his friend" (Exodus, xxxiii, 7-11). It was on such occasions that Moses heard the voice of one speaking unto him from off the mercy-seat that was upon the ark of testimony, from between the two cherubim (Num. vii, 89), in accordance with Exodus xxv, 22; Lev. xvi, 2. But it does not appear that the glory was habitually seen either by Moses or the people. Occasionally, however, it flashed forth from the cloud which concealed it, as Exodus, xvi, 7, 10; Lev. vii, 6, 23, when "the glory of the Lord appeared unto all the people" according to a previous promise, or as Numbers xiv, 10; xvi, 19, 42; xx, 8; xxii, 6, when it appeared in the cloud by day, and in the vision. The last occasion on which the glory of the Lord appeared was that mentioned in xx, 6, when they were in Kadesh in the fortieth year of the Exodus, and murmured for want of water; and the last express mention of the cloud as visibly present over the tabernacle is in Deuteronomy, xxiii, 15, just before the death of Moses. The cloud was over the camp that day, so far as we can see, for the second year of the Exodus (Numbers x, 11; dix; xii, 10; but as the description in ix, 15-23; Exod. x, 38, relates to the whole time of their wanderings in the wilderness, we may conclude that, at all events, the cloud visibly accompanied them through all the migrations mentioned in Numbers x to xxxvi and in the story of the death of Moses and till Moses died. From this time we have no mention whatever in the history either of the cloud, or of the glory, or of the voice from between the cherubim, till the dedication of Solomon's Temple. But since it is

5. From the tenor of these texts it is evident that the Most High, whose essence no man hath seen or can see, was pleased ancienly to manifest himself to the eyes of men by an external visible symbol. As to the
precise nature of the phenomenon thus exhibited we can only say that it appears to have been a concentrated glowing brightness, a preternatural splendor, an effulgence of manifestation, it is said that "he is light" and that "he dwelleth in light unapproachable, and full of glory." The presence of such a sensible representation of Jehovah seems to be absolutely necessary in order to harmonize what is frequently said of "seeing God" with the truth of his nature as an incorporeal and invisible spirit. In the Lord's presence men are torn in one place that "no man hath seen God at any time," where we are elsewhere informed that Moses and Aaron and the seventy elders "saw the God of Israel" when called up to the summit of the holy mount. So, also, Isaiah says of himself (vi, 1, 5) that "in the year that king Uzziah died he saw the Lord sitting upon his throne," and that, in consequence, he cried out, "I am undone; for mine eyes have seen the Lord of hosts." In these cases it is obvious that the object seen was not God in his essence, but some external, visible symbol which, because it stood for God, is called by his name.

But of all these ancient recorded theophanies the most significant was undoubtedly that which was vouchsafed in the pillar of cloud that guided the march of the children of Israel through the wilderness on their way to Canaan. A correct view of this subject clothes it at once with a sanctity and grandeur which seldom appear from the naked letter of the narrative. There can be little doubt that the columnar cloud was the seat of the Shechinah. We have already seen that the term shechinizing is applied to the abiding of the cloud on the summit of the mountain (Exod. xxiv, 16). Within the towering aerial mass, we suppose, was enfolded the inner effulgient brightness to which the appellation "glory of the Lord" more properly belonged, and which was only occasionally disclosed. In several instances in which God would indicate his anger to his people it is said that they looked to the cloud and beheld the "glory of the Lord" (Num. xiv, 10; xvi, 19, 42). So when he would inspire a trembling awe of his majesty at the giving of the law, it is said that "the Lord appeared as a devouring fire" on the summit of the mount. Nor must the fact be forgotten in this connection that when Nadab and Abihu, the two sons of Aaron, offended by strange fire in their offerings, a fatal flash from the cloudy pillar instantaneously extinguished their lives. The evidence would seem, then, to be conclusive that this wondrous pillar-cloud was the seat or throne of the Shechinah, the visible representative of Jehovah dwelling in the midst of his people.

Shedd, William, a Congregational minister, was born at Mount Vernon, N. H., in 1798, graduated at Dartmouth College in 1819, and ordained an evangelist in 1829. He was minister for one year at Springfield, Mass., where he died in 1830. He wrote Letters to W. E. Channing on the Existence and Agency of Fullness of Spirit, by Canonists (Boston, 1829, 8vo).

Shedd, Samuel Sharon, D.D., a Presbyterian minister, was born in Northumberland County, Pa., Sept. 13, 1810. His ancestors came from Scotland and settled on the Susquehanna River in that county, where the homestead of his family remains. He was prepared for college in the Milton Academy, Pa. He entered Jefferson College in 1830, and graduated therefrom in two years. He afterwards pursued his theological studies in Princeton Seminary, and was licensed to preach in the fall of 1834. The first fifteen years of his ministry were spent in connection with the churches of Williamsport, Murray, and Warrior Run, the latter place being the home of Dr. Shedd's childhood. His father and grandfather were ruling elders in this church. From Warrior Run he was unanimously called to the pastorate of the First Presbyterian Church of Rahway, N. J. The life of Dr. Shedd was a most laborious and useful one. During his ministry at Warrior Run he united the office of teacher with that of pastor, and, by unremitting toil, carried on successfully both his school and his church. From among the young men he prepared for college, more than a dozen became ministers of the Gospel. He was a wise counsellor and warm friend of the young men studying for the ministry. He was eminently judicious as an adviser in the matter of new church enterprises in the bounds of the Presbytery of Elizabeth, and his services will be held in grateful remembrance.

Dr. Shedd remained as pastor of the Rahway Church twenty-two years. The position he held among his ministerial brethren in the community where he labored and throughout the State of New Jersey is shown by the profound impression produced by his death, and the tribute of respect paid to his memory by the synod then in session, which appointed a committee to attend his funeral. He was for several years one of the directors of the Princeton Theological Seminary. He died in Rahway, N. J., Oct. 18, 1874. (W. F. S.)

Shedd'eir (Heb. שְׁכֶדֶאֵר, darter of light; Sept. Σχέδαστη, v. r. Σχέδαστη, father of Eliza, which latter was chief of the tribe of Reuben at the time of the Exode (Num. i, 5; ii, 10; vii, 30, 35; x, 18). B.C. ante 1658.

Sheep. The following Hebrew words occur as the names of sheep: נָעַם, taim (varieties נָעָם, te'om, נָעָא, te'om, or נָעָע, te'meh), a collective noun to denote "a flock of sheep or goats," which is opposed the noun of union, יֵֽעָה, a "sheep" or a "goat," joined to a masculine where "rams" or "he-goats" are signified, and with a feminine when "ewes" or "she-goats are meant, though even in this case sometimes to a masculine (as in Gen. xxxi, 10): הָעָה, ayil, "a ram:" פַּרְעֶה, rachël, "a ewe:" יְבָעַב, kibbe, or בַּעַב, kib'e (fem. הָבֻּכָּה, kib'khah), "a lamb," or rather "a sheep of a year old above," opposed to הָעַב, tal'ah, "a sucking or very young lamb;" לַב, kar, is another term applied to a lamb as it skips (לַב) in the pastures. The Chal'd. לַב, imad (Ezra vi, 9, 17; vii, 17), is a later word, apparently indicating lamba intended for sacrifice, while לַב, atidăd, rendered "ram" in Gen. xxxi, signifies a he-goat. See Ew., Lamb; Ram.

The term רַעָה, keštah (literally something weighed out, A. V. "piece of money," Gen. xxxiii, 19; Job xli, 11; "piece of silver," Josh. xxiv, 32), has been supposed by many to denote a coin stamped with the figure of a lamb; but Gesenius suggests (Thesaur. p. 1241) that specimens of that sort are probably only those of Cyprus, which bore that mark. See Kestah.
This well-known domestic animal has, from the earliest period, contributed to the wants of mankind. Sheep were an indispensable part of the possession of the ancient Hebrews and of Eastern nations generally. The first mention of sheep occurs in Gen. iv. 2. The following are the principal Biblical allusions to these animals. They were used in the sacrificial offerings, both the adult animal (Exod. xx. 24; 1 Kings viii. 63; 2 Chron. xxix. 38) and the lamb, נמר, i.e. "a male from one to three years old," but young lambs of the first year were more generally used in the offerings (Exod. xxix. 38; Lev. ix. 3; xii. 6; Num. xxviii. 9, etc.). No lamb under eight days old was allowed to be offered (Lev. xxvii. 27). A very young lamb was called רֶנֶם, talēh (see 1 Sam. vii. 9; Isa. lxv. 25). Sheep and lambs formed an important article of food (1 Sam. xxv. 18; 1 Kings i. 19; iv. 20; Psal. lxvii. 11, etc.), and ewe's milk is associated with that of the doe (Isa. vii. 21; 25). The wool was used as clothing (Lev. xiii. 47; Deut. xxix. 11; Prov. xxxi. 13; Job xxxi. 20, etc.). See WOOL. Trumpets may have been made of the horns of rams (Josh. vi. 4), though the rendering of the A.V. in this passage is generally thought to be incorrect. "Rams' skins dyed red" were used as a covering for the tabernacle (Exod. xxv. 4). Sheep and lambs are sometimes paid as tribute (2 Kings iii. 4). It is very striking to notice the immense numbers of sheep that were reared in Palestine in Biblical times: see, for instance, 1 Chron. v. 21; 2 Chron. xv. 11; xxx. 24; 2 Kings iii. 4; Job xiii. 12. Especial mention is made of the sheep of Bozrah (Mic. ii. 12; Isa. xxxiv. 6), in the land of Edom, a district well suited for pasturing sheep. "Bashan and Gilgal" are also mentioned as pastures (Mic. vii. 14). "Large parts of Carmel, Bashan, and Gilgal," says Thomson (Land and Book, i. 304), "are at their proper seasons alive with countless flocks" (see also p. 381). "The flocks of Kedar and the rams of Nebaioth," two sons of Ishmael (Gen. xxv. 13) that settled in Arabia, are referred to in Isa. lx. 7. Sheep-shearing is alluded to in Gen. xxxvi. 19; xxxviii. 13; Deut. xv. 19; 1 Sam. xxxv. 4; Isa. lii. 7; etc. Sheep-dogs were employed in Biblical times, as is evident from Job xxx. 1, "the dogs of my flock." From the manner in which they are spoken of by the patriarch it is clear, as Thomson (ibid. i. 301) well observes, that the Oriental shepherd-dogs were very different animals from the sheep-dogs of our own land. The existing breed are described as being "a mean, sinister, ill-conditioned generation, which are kept at a distance, kicked about, and half starved, with nothing noble or attractive about them." They were, however, without doubt, useful to the shepherds, more especially at night, in keeping off the wild beasts that prowled about the hills and valleys (comp. Theocr. Id. v. 106). Shepherds in Palestine and the East generally go before their flocks, which they induce to follow by calling to them (comp. John x. 4; Isa. lxviii. 7; Job xxxi. 1), though they also drove them (Gen. xxxiii. 13). See SHEPHERD. It was usual among the ancient Jews to give names to sheep and goats, as we do to our dairy cattle (see John x. 3). This practice prevailed among the ancient Greeks (see Theocr. Id. v. 108): ἡ δὲ κυριά τοῖς πτω σται τοίς σταῖσαι ἡ γένεσις, καὶ γενεσία.

The following quotation from Hartley (Researches in Greece and the East, p. 321) is so striking and expressive of the allusions in John x. 1-16 that we cannot do better than quote it: "Having had my attention directed last night to the words in John x. 3, I asked my man if it was usual in Greece to give names to the sheep. He informed me that it was, and that the sheep obeyed the shepherd when called to them by their names. This morning I had an opportunity of verifying the truth of this remark. Passing by a flock of sheep, I asked the shepherd the same question which I had put to the servant, and he gave me the same answer. I then bade him call one of his sheep; he did so, and it instantly left its passagure and its companions and ran up to the hands of the shepherd with signs of pleasure and with a prompt obedience which I had never before observed in any other animal. It is also true in this country that a stranger will they not follow, but will flee from him." The shepherd told me that many of his sheep were said wild, that they had not yet learned their names, but that by teaching them they would all learn them." See also Thomson (i. 301): "The shepherd calls sharply from time to time to remind the sheep of his presence. They know his voice and follow on; but if a stranger call, they stop short, lift up their heads in alarm, and if it is repeated they turn and flee, because they know not the voice of a stranger." Henderson, in Iceland, notices a shepherdess with a flock of fifty sheep, every one of which she professed to know by name (Iceland, i. 189).

Domestic sheep, although commonly regarded as the progeny of one particular wild species, are probably an instance, among many similar, where the wisdom of Providence has provided subsistence for man in different regions by bestowing the domesticating and submissive instincts upon the different species of animals which the human family might find in their wanderings; for it is certain that even the American argali can be rendered tractable, and that the Corsican moumou will breed with the common sheep. The normal animal, from which all or the greater part of the Western domestic races are assumed to be descended, is still found wild in the high mountain regions of Persia, and is readily distinguished from two other wild species bordering on the same region. What breeds the earliest shepherd tribes reared in and about Palestine can now be only inferred from negative characters; yet they are sufficient to show that they were the same, or nearly so, as the common horned variety of Egypt and continental Europe: in general white, and occasionally black, although there was on the Upper Nile a speckled race; and so early as the time of Aristotle the Arabsians possessed a rufous breed, another with a very long tail, and, above all, a broad-tailed sheep, which at present is commonly denominated the Syrian. These three varieties are said to be of African origin, the red hairy in particular having all the characteristics to mark its descent from the wild Ovis tragelaphus or barbatus, or kebbeh of the Arabian and Egyptian mountains. Flocks of the ancient breed bred, derived from the Bedawin, are now extant in Syria, with little or no change in external characters, chiefly the broad-tailed and the common horned white, often with black and white about the face and feet, the tail somewhat thicker and longer than the European.

The sheep of Syria and Palestine are the broad-tailed (Ovis laticaudata), and a variety of the common sheep of this country (Ovis aries) called the Bedouin, accord-
pecudum imaginamenti tantum fuisse causam adjuvantem, ac plus in loco negotio divinam tribuendum esse virtuti, que suo concursu sic debilem causa secundum saepe effluerebas. Nec est enim aliquis, qui subito et ornatos et vestitatos pecora non valeret ilid divina beneficione supra naturam prestataret;" and then Nitschmann cites the passage in Gen. xxxi, 5-13, where Jacob expressly states that his success was due to divine interference; for it is hard to believe that Jacob is here uttering nothing but a tissue of falsehoods (Hist. et Crit. Comment, Gen. xxx and xxiii), who represents the patriarch as "unblushingly executing frauds suggested by his fertile invention, and then abusing the authority of God in covering or justifying them." We are aware that a still graver difficulty in the minds of some persons remains, if the above explanation be adopted; but we have no other alternative, for, as Patrick has observed, "let any shepherd now try this device, and he will not find it do what it did then by a divine operation." The greater difficulty alluded to is the supposing that God would have directly interfered to help Jacob to act fraudulently towards his unknown enemy. But this is quite sure that he who can offer a fraud fairly called such in the matter? Had Jacob not been thus aided, he might have remained the dupe of Laban's niggardly conduct all his days. He had served his money-loving uncle faithfully for fourteen years; Laban confesses his cattle had increased considerably under Jacob, but as he refused to return a tithe. So Jacob, with a fair treatment and a constant desire on the part of Laban to strike a hard bargain with him (Gen. xxxi, 7). God vouchsafed to deliver Jacob out of the hands of his hard master, and to punish Laban for his cruelty, which he did by pointing out to Jacob how he could secure to himself large flocks and abundant cattle. God was only helping Jacob to obtain that which justly belonged to him, but which Laban's rapacity refused to grant. "Were it lawful," says Stockhouse, "for any private person to make reprisals, the injurious treatment Jacob had received from Laban, both in imposing a wife upon him and prolonging his servitude without wages, was enough to give him both the provocation and the privilege to do so. God Almighty, however, was pleased to take the determination of the whole matter into his own hands." This seems to us a very good way of understanding this disputed subject.

The relation of the sheep to man, in a pastoral country, gave rise to a great many superstitions and accompanying illustrations. Jehovah was the shepherd of his people, and Israel was his flock (Psa. xxxii, 11; xxxv, 11; xxxix, 18; Isa. xxi, 11; Jer. xliii, 1, 2; Ezek. xxxiv, and often elsewhere); the apostasy of sinners from God is the straying of a lost sheep (Psa. cxix, 176; Isa. lii, 6; Jer. i, 6); and the ever-blessed Son of God coming down to our world is a shepherd seeking his sheep which were lost (Luke xv, 4-6). He is the only shepherd; all who do not own him are thieves and robbers (John x, 8); wolves in sheep's clothing (Matt. vii, 15). He is the good shepherd, who gave his life for the sheep (John x, 11); and now he gives them his own life in resurrection, and life everlasting (ver. 28), and even the life (ver. 12). As the sheep is an emblem of meekness, patience, and submission, it is expressly mentioned as typifying these qualities in the person of our blessed Lord (Isa. lii, 7; Acts vii, 32, etc.).

In the vision of the prophet Daniel, recorded in ch. vii, the Medo-Persian monarchy is seen under the figure of a ram with two unequal horns, which was overthrown by a one-horned he-goat, representing the Macedonian power. We have already remarked on the propriety of the latter symbol (see Goat), and the former is no less correct. There is abundant evidence that the ram was accepted as the national emblem by the Persian people, as may be seen from reading the後ianus Marcellinus states that the king of Persia wore a ram's head of gold set with precious stones, instead of a diadem. The type of a ram is seen on ancient Persian
Oriental Sheepfold of Stone.

coins, as on one of undoubted genuineness in Hunter's collection, in which the obverse is a ram's head and the reverse a ram couchant. Rams' heads, with horns of unequal height, are still to be seen sculptured on the pillars of Persepolis.

Sheepcote (or Sheepfold) is designated by several Heb. terms. נֵגֶר, nargé (a habitation or dwelling-place, as usually rendered, “sheepcote,” 2 Sam. vii, 8; 1 Chron. xxi, 1; “fold,” Isa. lxv, 10; Jer. xxiii, 3; Ezek. xxxiv, 14; “stable,” xxv, 5), means, in a general sense, a place where flocks repose and feed; and, as the Orientals do not usually fold their flocks at night, it must be left to the context to determine whether we are to understand “pastures” or “sheepfolds.” A more distinctive term is נֵגָר, gedérah, an enclosure, “cote” (1 Sam. xxix, 3; “fold,” Num. xxxii, 16, 24, 36; Zeph. ii, 6; elsewhere “hedge” or “wall”), which means a built pen or safe structure, such as adjoins buildings, and used for cattle as well as sheep. Special terms are נִקָד, nikadah (a pen for flocks; “fold,” Ps. 1, 9; Ixxxviii, 70; Hab. iii, 17), and מִשּׁאָה, mishaphâhôn (the dual form of which indicates double rows, as of stalls for cattle or sheep; “sheepfolds,” Judg. v, 16; “two burdens,” Gen. xl, 14). It is to be observed that the Oriental flocks, when they belong to nomads, are constantly kept in the open country, without being folded at night. This is also the case when the flocks belonging to a settled people are sent out to feed, to a distance of perhaps one, two, or three days' journey, in the deserts or waste lands, where they possess or claim a right of pasturage. This seems to have been the case with the flocks fed by David. As such flocks are particularly exposed to the depredatory attacks of the regular nomads, who consider the flocks of a settled people as more than even usually fair prey, and contest their right to pasture in the deserts, the shepherds, when they are in a district particularly liable to danger from this cause, or from the attacks of wild beasts, and doubt whether themselves and their dogs can afford adequate protection, drive their flocks at night into caves, or, where there are none, into uncovered enclosures, which have been erected for the purpose at suitable distances. These are generally of rude construction, but are sometimes high and well-built enclosures or towers (generally round), which are impregnable to any force of the depredators when once the flock is within them. Such towers also occur in districts where there are only small dispersed settlements and villages, and serve the inhabitants not only for the protection of their flocks, but as fortresses in times of danger, in which they deposit their property, and, perhaps, when the danger is imminent, their females and children. When no danger is apprehended, or none from which the protection of the shepherds and dogs is not sufficient, the flocks are only folded when collected to be shorn. They are then kept in a walled, but still uncovered, enclosure, partly to keep them together, but still more under the impression that the sweating and evaporation which result from their being crowded together previously to shearing improve the quality of the wool. Those poor villagers who have no large flocks to send out to the wilderness pastures, with a proper appointment of shepherds, but possess a few sheep and cattle, which feed during the day in the neighboring commons, under the care of children or women, and who cannot provide the necessary watch and protection for them at night, drive them home, and either fold them in a common enclosure, such as we have mentioned, in or near the village, or pen them separately near their own dwellings. Pens or cotes of this class serve also for the lambs and calves, while too young to be kept out with the flocks or to be trusted in a common enclosure. They usually are near the dwellings, which are merely huts made of mats on a framework of palm-branches; these we conceive to answer well to the “tabernacles” (booths), “shepherds’ cottages,” and other humbler habitations noticed in Scripture. Such villages are of a class belonging to a people (Arabs) who, like the Israelites, have relinquished the migratory life, but who still give their principal attention to pasturage, and do some little matter in the way of culture. It is possible that the villages of the He-
bbrews, when they first began to settle in Palestine, were a very similar description. See Kitto, Pict. Bible, note at 1 Chron. xvii. 2.  

Sheepgate (מִשְׂפֵּת, Maresh, or Manes; Sept. ἑτερ χέρας, Vulg. Porta gregis), one of the gates of Jerusalem as rebuilt by Nehemiah (Neh. iii, i, 12; xii, 39). It stood between the tower of Meah and the chamber of the corner (iii, i, 32) or gate of the guard-house (xii, 39, A.V. "prison-gate"). It is probably the same with the μπατζέτικ (στ. πόλις) of John v, 2; A.V. inaccurately, "sheep-market."  

Bertheau (Erzeg. Handbuch, on Nehemiah, p. 144) is right in placing it on the east side of the city, but is wrong in placing it at the present St. Stephen's Gate (so also Keil, after Tabor), since no wall existed north of the Temple enclosure nearly so far to the east as the present till after the death of Christ. See Jerusalem. Barclay locates it in a presumed outer wall beyond the precincts of the Temple on the east (City of the Great King, p. 116); but it is doubtful whether any such separate wall existed. The adjoining localities would seem to fit it in the eastern wall of Ophel, opposite the present Fountain of the Virgin. See Jerusalem.  

Sheep-market (יוֹר, ים, properly a shepherds; (q. v.) or sheep-breed (2 Kings iii, 4); hence a herd-man in general (Amos i, 1).  

Sheepshanks, William, a learned English clergyman, was born at Linton, Craven, Yorkshire, March 18, 1740. Educated in the grammar-school of his own parish, he was admitted in 1761 to St. John's College, Cambridge. He took the degree of B.A. in January, 1766, and in 1767 was elected fellow and took the degree of M.A. In 1771 and 1772 he served the university in the office of moderator. He accepted the rectory of Ovington, Norfolk, in 1773, and, having settled in Grassington, he received a limited number of pupils into his house. In 1777 he was presented to the living of Seberham, Cumberland, in 1783 was appointed to the vicarage of St. John's, Leeds; and in 1792 was collated to a prebend in Lincoln, which he exchanged in 1794 or 1795 for a much more valuable stall at Carlisle. He died at Leeds, July 26, 1810, and was interred in his own church.  

Sheep-shearers (יוֹר, גזֶכֶס, 2 Sam. xiiii, 23, 24, fully with רֶאשׁ, løn, added, Gen. xxviii, 12). The time of sheep-shearers was, among the Hebrews, a season of great festivity (xvii, 11; 8, 9; 26, 2 Sam. xiiii, 23-28; 2 Kings x, 12, 14; Isa. liii. 7).  

Sheer-Thursday (spelled also Chare, Shere, or Shoir) is also known as Mawday (q. v.) or Shīrīf Thursday. These are names given in England to the Thursday of Passion Week. It is known in the Romish Church as Quinta Feria Dominicæ in Romæ Palmarum, and its institution is attributed to Leo II about 682. But the day is observed as the 5th day of the 5th century by the celebration of the Lord's supper in connection with the washing of feet. It has had several appellations in allusion to events commemorated or ceremonies observed, such as Dies Cerne Dominica, the Day of the Lord's Supper; Dies Natalis Eucharistiae, the Birthday of the Eucharist; Natalis Calasianæ the Thirteenth of the Cup; Dies Paschæ, the Day of Easter; Dies Luctæ, the Day of Light, with allusion perhaps to the lights used at the Lord's supper: Dies Viridium, a title of doubtful meaning. It was also called Capitationarium, because the heads (capita) of catechumens were washed that day preparatory to baptism. The name given to it in England was derived from the custom of men polluting their beards on this day as a token of grief for our Lord's betrayal; "for that in old times the people would that day shew their beards, and clypp theye bordes, and pool theyre heedes, and make them honest eynter Easter-day." In Saxony it is called Good-Thursday, and in the north of England Kiss-Thursday, in allusion to the Judas kiss. Among the observances of the day were the silence of all bells from this day to the following; the admission of penitents who had been excluded from religious services at the beginning of Lent; and the consecration of the elements by the pope below the altar of the Lateran. Oil for extreme unction, for chrism, and for baptism was consecrated on this day. After vespers on this day two acolytes strip the altars of all their ornaments, and cover them with black trimmings, while in many places the altars are washed with wine and water, and rubbed with herbs.  

Sheet stands in the A. V. for the Heb. שד, sodin (Judg. xiv, 12, 13; "fine linen," Prov. xxxii, 24, Isa. iii, 23; comp. σάκχαρα), and the Gr. σωκυν (Acts x, 11, xi, 5), which both mean properly a linen cloth; hence the former a shirt (as in the marg.), and the latter a sail. See Linen.  

Sheegog, William A., a minister of the Methodist Episcopal Church, South, was born in Rutherford County, N. C., Nov. 8, 1821. He professed religion in 1843, was licensed to preach about 1850, and in 1853 was admitted into the Alabama Conference. He located in 1857; was readmitted into the Alabama Conference in 1859, and in 1860 entered upon the Texas Conference. He labored in Texas until shortly before his death, April 28, 1864. See Minutes of Annual Conference of M. E. Ch. South, 1864, p. 525.  

Shehri'ah (Heb. Shehrayith, שֶׁרְיָה, dauning of Jehovah; Sept. Σεραφιας, v. Σεραφία and Σεραφια, second named of the six sons of Jeroham, Benjamines resident in Jerusalem at the captivity (1 Chron. viii, 26); B.C. 508.  

Sheki (Shek, Shekih, Sheky, She'k, Shekkih, Shekiih, for elder), a title of reverence, applied chiefly to a learned man or a reputed saint, but also sometimes as an ordinary title of respect, like the European Mr., Herr, etc., before the name. It is, however, only given to a Moslem. The term is also applied to heads of Mohammedan monasteries, and to the higher order of religious preachers. The sheik of Mecca, by virtue of being the custodian of the holy places, is a kind of trustee on all the pilgrims to the Kaaba.  

Sheik Al-Geral (Ancient of the Mountain) is the name of the prince of the Assassins, or those Ismaelites of Irak who undertook to assassinate all those whom their chief would pronounce to be his enemies.  

Sheik El-Islam, one of the titles of the grand-mufti of Constantinople, who is president of the Ulema, or College of the Professors of the Mohammedan Law. The title is supposed to have been assumed first by Mohammed II in 1458, when Constantinople became the seat of his empire.  

Sheiril, tutelary spirits of the Caribs, who are the protectors of the male sex among men.  

Shekalm. See Talmud.  

She'kel (many shek'el) (Heb. shikel, שֶׁקֶל, from שָׁקֵל, to weigh out), the Hebrew standard of valuation, as the cubit was of measurement. See Metreology.  

I. Scriptural Description.—The shekel was properly a certain weight according to which the quantity and price of things were determined; e. g. bread (Ezek. iv, 10); hair (1 Sam. xiv, 26), especially metals, as brass, iron, silver, gold; and articles made of metal, as arms.
vessels, etc. (Exod. xxxviii, 24, 25, 29; Num. viii, 18 sq.; xxxi, 52; 1 Sam. vii, 5, 7; Josh. vii, 21; 1 Chron. iii, 9). Especially did the Hebrews use silver weighed by the shekel as money, and often it was actually weighed out, although they may early have had pieces or bars of silver weighed by the shekel (Lev. xxiii, 15; xxvii, 32; 2 Sam. xvii, 24; Jer. xxxii, 9, 10; Ezek. xxi, 32). From the common shekel is distinguished the sacred shekel (םֵיקֶלָה חַכַּיִם), "shekel of the sanctuary", somewhat heavier, it would seem, or at least of just full weight, according to which all contributions and tribute for sacred purposes were to be reckoned (Exod. xxx, 13; xxxviii, 24; Lev. v, 15; xxvii, 25, 33; Num. iii, 47; xvii, 16; Ezek. xlv, 12). More to the purpose is the specification of the rabbis that the shekel was equal to the barley grain, and for this reason it is accorded tolerably well with the actual weight of the Maccabean shekel still preserved. In the time of the Maccabees (1 Macc. xv, 6) silver coins were struck, each weighing one shekel, and stamped with the words לֵוֵיקֶל אֶלֶף, a shekel of Israel (see Bayer, De Nummis Hebræo-Samaritaniis [Valent. 1781, 4to], p. 171 sq.; Echhel, Doctr. Numor. Vet. I, iii, 465 sq.). Some of the specimens still extant, though worn by age, weigh 266 or 270 Paris grains; so that the full Maccabean shekel must have been at least about 274 grains, and thus equivalent to the didrachm of Egypt. Hence the Sept. renders the word sometimes σταδίως, and sometimes διδράχμων or διδραχμία. But Josephus and later writers give the value of one shekel as 26 or 27 shekels (Ant. xiii, 16, 1; Hesych. s. v.; Jerome, Ad Exch. p. 48, ed. Pallars.). In their time, however, the Attic drachma had depreciated, and was reckoned as equal to the Roman denarius, i.e. 7½ stater, or 15 cents (Pliny, Hist. Nat. xxi, 109). The Maccabean shekel, therefore, may be estimated at 2½ drachmae, or 60 cents. (See Bochb., Metrol. Unterricht, p. 55-57, 62, 63, 299; Smith, Dict. of Class. Antiq. s. v. "Denarius"). Hence the half-shekel, which was to be paid yearly to the Temple (Exod. xxxviii, 26), is called צֵירָ֖ךְ גֵּֽרֶנֶּֽאָּשָּׁ֑ס in Matt. xxvii, 24. Some suppose that the earlier common shekel was less than the Maccabean one half (Bochb., sup. p. 63; Berthel, Antw. p. 26, ed. 1839), which is entitled the "small shekel" of profane, according to Alexander Eutolmos (ap. Macrobr. Sat. v. 22). Some understand such a coin in 1 Chron. xxi, 25; but the words imply rather weight.

In silver shekels were paid the contributions to the Temple (Exod. xxx, 19), the fines for offences (xxii, xxiiii, 19, 29; Lev. v, 15), taxes exacted by kings or governors (2 Kings xv, 20; Neh. v, 15), the price of articles (2 Sam. xxiv, 24; 2 Kings vii, 1), etc. In some cases large sums were weighed together (Gen. xxiii, 16, Jer. xxxii, 9), though it is certain that there were pieces of different denominations—both half and quarter shekels (Exod. xxx, 13, 15; 1 Sam. ix, 8, 9), etc. In many instances relating to purchases, a word is omitted in the Hebrew, and the rendering is always "a thousand," or the like, "of silver." The term "pieces" has been supplied in the A. V., but there is not much doubt that "shekels" is the word understood in all cases. See Siph. Deut. xxi, 19, 29; Neh. x, 15). (See also Exon.). 5½ city shekels of silver paid to the governors, and probably these shekels may have been the silver coin circulating in Persia called σταδίως. This coin has generally been considered a kind of shekel; but as, according to Xenophon (Anb. i, 5, 6), it was equal to 7½ Attic drachmae, it seems not to have been of the common usage (1 Sam. vii, 5; 1 Kin. i, 37, 51), giving a Persian silver coin of 84 grains, it is clear that the σταδίως can have no connection with the σταδίως (weighing 220 grains), except in name. (See Leake, Num. Hell. Europe, p. 21; Madden [F. W.], Hist. Jer. Coin, p. 20.) But at this time there were coins also current in Persia of the same standard as the shekel (Mionnet, Descr. de Med. v, 445, Nos. 30-40; ivii, 426, No. 29-33). See also Schichardt, De Numis Hebr. p. 15; Mayer, Geschichte der Vorderbeyl (Lips. 1667); Isaeling, De Sceptrum Hebræorvm (Basil. 1798). For further information on this question, consult the remarks of the abbé Cave- doni (Le Prince, Quest. rigoranti la Num. Genà, De- finitor, Decrœc [Modena, 1804]), Madden (Num. Chron. xix, 191), and Plumptre (Biblia Educator, iii, 96 sq.). See Cony.

11. Amt Specimens.—1. Rabbinical Notices.—Our attention is, in the first place, directed to the early notices of these shekels in Rabbinical writers. It might be supposed that in the Mishna, where one of the treatises bears the title of "Shekalim," or Sheshalim, we should find some information on the subject. But this treatise, being devoted to the consideration of the money relating to the payment of the half-shekel for the Temple, is of course useless for our purpose.

Some references are given to the works of Rashi and Maimonides (contemporary writers of the 12th century) for information relative to shekels and the forms of Hebrew bushels at different times; but the Rabbinical quotation given by Bayer is that from Rambam, i.e. Rabbi Moses Bar-Nachman, who lived about the commencement of the 13th century. He describes a shkel which he had seen, and of which the Cuthæans read the inscription with ease. The explanation which he gave of the inscription was, on one side "Shekel," and on the other, "Jerusalem the Holy." The former was doubtless a misinterpretation of the usual inscription, "The Shekel of Israel," but the latter corresponds with the inscription on our shekels (Bayer, De Numism., p. 11). In the 16th century R. Abraham Bar Hiyya states that R. Moses Basula had arranged a Cuthæan, i.e. Samaritan, alphabet from coins, and R. Moses Alasakar (of whom little is known) is quoted by Bayer as having read on some Samaritan coins "in such a year of the consolatio of Israel, in such a year of such a king." The same R. Azarias de Rossi (or de Adumim, as he is called by Bar- tolocchi, Bibl. Rabb. iv, 158), in his בָּּּיִּּּוּּּיּּּ, "The Light of the Eyes" (not Fons Occulorum, as Bayer translates it, which would require בָּּּיִּּּוּּּיּּּ, does not consider the Translucial or Samaritan letters, and describes the above characters as "the alphabet of Israel, which determines the weight, which he makes about half an ounce.

We find, therefore, that in early times shekels were known to the Jewish rabbins with Samaritan inscriptions corresponding with those now found (except in one point, which is probably an error), and corresponding with them in weight. These are important considerations in tracing the history of this coinage.

2. Later Notices.—We pass on now to the earliest mention of these shekels by Christian writers. We believe that W. Postell is the first Christian writer who saw and described a shekel. He was a Parisian traveler who visited Jerusalem early in the 16th century. In a curious manuscript, the "Phasbatum Duodecim Linguarum," the following passage occurs. After stating that the Samaritan alphabet was the original form of the Hebrew, he proceeds thus:

"I draw this inference from silver coins of great antiquity which I found among the Jews. They set such store by them that I counted out one of them (not otherwise worth a guineact for two gold pieces. The Jews say they are of the time of Solomon, and they added that, hating these burdens, as they do, who were always speaking to them, nothing endures these coins so much to them as the consideration that these characters were once in their common usage, and were, yearning after the things of old. They say that at Jeru- salem, now called Ciny or Chasederwisch, in the monastery and in the deepest part of the ruins, these coins are dug up daily."

Postell gives a very bad wood-cut of one of these shekels,
but the inscription is correct. He was unable to explain the letters over the vase, which soon became the subject of a discussion among the learned men of Europe, that lasted for nearly two centuries. Their attempts to explain them are enumerated by Bayer in his treatise De *Nummis Hebraeo-Samaritanis*, which may be considered as the first work where the learned Orientalist of that period, George G. Tychsen, *De Nummis Hebraicis Divisi, qua simul ad Nuperas ill. F. P. Bayerii Objectiones Respondentur* (Rostochii, 1784). His first position is, that (1) either all the coins, whether with Hebrew or Samaritan inscriptions, are false; or (2) if any are genuine, they belong to Bar-coceba (p. 6). This he modifies slightly in a subsequent part of the treatise (p. 52, 53), where he states it to be his conclusion (1) that the Jews had no coined money before the time of our Saviour; (2) that during the period of Bar-Coceba, no Samaritan money was coined either by the Samaritans to please the Jews, or by the Jews to please the Samaritans, and that the Samaritan letters were used in order to make the coins desirable as amulets; and (3) that the coins attributed to Simon Maccebaeus belong to this period. Tychsen has quoted some curious passages, but his arguments are wholly untenable. In the first place, no numismatist can doubt the genuineness of the shekels attributed to Simon Maccebaeus, or believe that they belong to the same epoch as the coins of Bar-coceba. But as Tychsen never saw a shekel, he was not a competent judge. There is another consideration, which, if further demonstration were needed, would supply a very strong argument. These coins were first made known to Europe through Postell, who does not appear to have been aware of the description given of them in Rabbinical writers. The correspondence of the newly found coins with the earlier description is almost demonstrative. But they bear such undoubted marks of genuineness that no judge of ancient coins could doubt them for a moment. Postell quotes, e.g., the following passage from the Jerusalem Talmud: *יִהְיֶה חֲרֶסֶת מַעְנָר (Samaritans) money, like that of Ben-Coziba, does not defile.* The meaning of this is not very obvious, nor does Tychsen's explanation appear quite satisfactory. He adds: *does not defile if used as an amulet.* We should rather inquire whether the expression may not have some relation to that of *defiling the hands,* as applied to the canonical books of the Old Test. (see Ginsburg, *Commentary on the Song of Songs*, p. 3). The word for polluting is different, but the expressions may be analogous. But, on the other hand, these coins are often perforated, which gives countenance to the idea that they were used as amulets. The passage is from the division of the Jerusalem Tal- mud entitled *יִהְיֶה חֲרֶסֶת מַעְנָר,* or *The Second Tithe.*

It may here be desirable to mention that although some shekels are found with Hebrew letters instead of Samaritan, these are undoubtedly all forgeries. It is the more needful to make this statement, as in some books, e.g., *Polybot,* by Valenstein, the Samaritan shekels are engraved as if they were genuine. It is hardly necessary to suggest the reasons which may have led to this series of forgeries. But the difference between the two is not confined to the letters only; the Hebrew shekels are much larger and thinner than the Samaritan, so that a person might distinguish them merely by the touch, even under a covering. The char-

acter nearly resembles that of Samaritan MSS., although it is not quite identical with it. The Hebrew and Sam- maritan alphabets appear to be divergent representatives of some older form, as may be inferred from several of the letters. Thus the *Bet* and several other letters are evident modifications in their origin. Also the *Shin* (Samaritan) does not resemble the same letter of the Samaritan: for if we make the two middle strokes of the Samaritan letter coalesce, it takes the Hebrew form. We may add that Postell appears to have arranged his Samaritan alphabet from the coins which he describes.

In the course of 1802 a work of considerable importance was published at Breslau by Dr. M. A. Levy, entitled *Geschichte der Juden im Lande Israel.* It is likely to be useful in the elucidation of the questions relating to the Jewish coinage which have been touched upon in the present article. There are one or two points on which it is desirable to state the views of the author, especially as he quotes coins which have only become known to us in the *Revue Numismatique* (1860, p. 269 sq.), to which the name of Eleazar coins has been given. A coin was published some time ago by Dr Sauly which is supposed by that author to be a counterfeit. It is scarcely legible, but it appears to contain the name Eleazar on one side, and that of Simon on the other. During the troubles which preceded the final destruction of Jerusalem, Eleazar (the son of Simon), who was a priest, and Simon ben-Giora, were at the head of large factions. It is suggested by Dr. Levy that money may have been struck which bore the names of both these leaders; but it seems scarcely probable, as they do not appear to have acted in concert. Yet a copper coin has been published in the *Revue Numismatique* which undoubtedly bears the inscription of *Eleazar the priest.* Its types are—

**Obverse.** A vase with one handle and the inscription אֵלֶּזָּר הַפֹּרִים, "Eleazar the Priest," in Samaritan letters.

**Reverse.** A bunch of grapes with the inscription בֵּית הָעֵדֶּדֶד, "Year one of the Redemption of Israel."

Some silver coins also, first published by Reichardt, bear the same inscription on the obverse, under a palm-tree, but the letters run from left to right. The reverse bears the same type and inscription as the copper coins. These coins, as well as some that bear the name of Simon or Simeon, are attributed by Dr. Levy to the period of this first rebellion. It is quite certain, however, that some of them are of a similar period. It appears, therefore, that the period of Bar-coceba's rebellion (or Barcoceba's, as the name is often spelled) under Hadrian, because they are stamped upon denari of Trajan, his predecessor. The work of Dr. Levy will be found very useful, as collecting together notices of all these coins, and throwing out very useful suggestions as to their attribution; but we must still look to further researches and fresh collections of these coins for full satisfaction on many points. The attribution of the shekels and half-shekels to Simon Maccebaeus may be considered as well established, and several of the other coins described in the article Moxov offer no grounds for hesitation or doubt. But still this series is very much isolated from other classes of coins, and the nature of the work hardly corresponds in some cases with the periods to which we are constrained, from the existing evidence, to attribute the coins. We must therefore still look for further light from future researches. The symbols found on this series of coins is one which is considered to represent that which was called *Lulub* by the Jews. This term was applied (see Maïmonides on the section of the Mishna called *Rosh Hashonah,* or
SHEKEL

Commencement of the Year, vii, 1, and the Mishna itself in Succoth, דבעך, or Booths, iii, 1, both of which passages are quoted by Bayer, De Num. p. 129) to the branches of the three trees mentioned in Lev. xxviii, 40, which are thought to be the palm, the myrtle, and the willow. These, which were to be carried by the Israelites at the Feast of Tabernacles, were usually accompanied by the fruit of the citron, which is also found in this representation. Sometimes two of these Lulabs are found together. At least such is the explanation given by some authors of the symbols called in the article Mo'or or by the name of Shevres. The subject is involved in much difficulty and obscurity, and we speak, therefore, with some hesitation and difience, especially as experienced numismatists differ in their views. This explanation is, however, adopted by Bayer (De Num. p. 128, 219, etc.), and by Cavalloni (Bibli. Num. p. 31, 32, of the German translation), who adds references to 1 Mac. iv, 59, John x. 22, as the considers that the Lulab was in use at the Feast of the Dedication on the twenty-fifth day of the ninth month as well as at that of Tabernacles. He also refers to 2 Mac. i, 18; x, 6, 7, where the celebration of the Feast of Tabernacles is described, and the branches carried by the worshipers are specified. The symbol on the reverse of the shekels, representing a twig with three buds, appears to bear more resemblance to the buds of the pomegranate than to any other plant.

The following list is substantially that given by Cavalloni (p. 11 of the German translation) as an enumeration of all the coins which can be attributed with any certainty to Simon Maccabaeus. See NUMISMATICS. 1. Silver. 1. Shekels of three years, with the inscription "שקל ישראלי", Shekel Israel, "Shekel of Israel"); on the obverse, with a vase, over which appears (1) an α, Aleph (first year); (2) the letter ש, Shin (for שנות, She'nath, "year"); with a ב, Beth (year 2); (3) the letter ש, Shin, with a ג, Gimel (year 3).

On the reverse is the twig with three buds, and the inscription יָשָׁרְתָּם, יָשָׁרְתָּם (Jerusalem the Holy of Holies, or יָשָׁרְתָּם, יָשָׁרְתָּם (Jerusalem the Holy) The spelling varies with the year. The shekel of the first year has only יָשָׁרְתָּם, יָשָׁרְתָּם, while those of the second and third years have the fuller form יָשָׁרְתָּם, יָשָׁרְתָּם. The second יָשָׁרְתָּם, יָשָׁרְתָּם, יָשָׁרְתָּם of the Jerusalem is important, as showing that both modes of spelling were in use at the same time.

Silver Shekel of Simon Maccabaeus. (From the British Museum.)

II. The same as above, only half the weight, which is indicated by the word "ג' התש"א, a half. These occur only in the first and second years.

Silver Half-shekels of Simon Maccabaeus. (From the British Museum.)

SHIELD

B. Copper I. I. "Lulabath Twim, "Of the Liberation of Zion." The vase as on the silver shekel and half-shekel.

On the reverse, "赎回 שלמה", She'nah Arba, "The Fourth Year." Lulab between two citrons.

Copper Shekel of Simon Maccabaeus. (From Mr. Wigan's collection.)

Obverse. Vase, with legend "Of the Liberation of Zion.

II. Copper I. I. "Lulabath Twim, "Of the Liberation of Zion." A palm-tree between two baskets of fruit.
III. Copper I. I. "Shemath Arba, Rebi'a, "The Fourth Year, a Fruit. "Two Lulabs."

On the reverse, "赎回 שלמה," as before. Citron-fruit.

Copper Quarter-shekel of Simon Maccabaeus. (From Mr. Wigan's collection.)

Obverse. Two shekels [1], with the legend "Year four, a Quarter.
Reverso. A fruit, with the legend "Of the Liberation of Zion.

Shekina, a name given to Buddha (q. v.) among the Chinese. He is also called Fo.

Shekinah. See SHEKHINAH.

She-kings, one of the sacred books of the Chinese. It contains 311 odes and other lyrics, chiefly of a moral tone and character, including several pieces which were probably composed twelve centuries before Christ. It is believed to be a selection from a larger number which were extant in the time of Confucius, and by him collected and published.

She'lah (Heb. She'lah, מֵלָה, a petition, as in 1 Sam. i, 17, or rather perhaps peace, i. q. Shlosh; Sept. Σχλός or Σχλόν v. r. Σχλός), the youngest son of Judah by the daughter of Shunah the Canaanite (Gen. xxxviii, 5, 11, 14, 26; xlvii, 12, 1 Chron. ii, 3). B.C. ante 1875. His descendants, some of whom are enumerated in 1 Chron. iv, 21, 23, were called (Numb. xxxvi, 20) Sheledites (q. v.). For Sheloch (A. V. "Shelah," 1 Chron. i, 18), the son of Atrophaxad, see SKILA.

She'lanite (Heb. collectively in the song, and with the art., אָשָׁר-שֵׁלָה, מֵלָה, an irregular patronymic from Shelah, as if Shelon [comp. Shilo, Shilonite]; cf. Sept. שֵׁלְהָה] a designation of the descendants of Shelah (q. v.), the son of Judah (Numb. xxvi, 20).

Shelden, Francis E., a Methodist Episcopal minister, was born in Monroe County, N. Y., March 16, 1814, admitted on trial by the Indiana Conference in 1840, and filled the following appointments: Noblesville, Franklin, Versailles, Greenfield, Belleville, Springville, and Leesville. In 1848, owing to declining health, he received a superintendent relation, and died Jan. 16, 1850. Mr. Shelden was a good English scholar, possessed an investigating mind, and was a fluent preacher. See Minutes of Annual Conferences, iv, 533.
Sheldon, Gilbert, archbishop of Canterbury, was the youngest son of Roger Sheldon, of Stanton, in Staffordshire, England, and was born there July 19, 1598. He was admitted a scholar of Trinity College, Oxford, in 1613; was made Bachelor of Arts Nov. 27, 1617, and Master of Arts May 20, 1620; was elected fellow of All-Souls College in 1622; and about the same time entered his orders. He became domestic chaplain of the lord keeper of Coventry, where he gave him a prebend of Gloucester. He was some time rector of Ickford, in Bucks, and was presented to the rectory of Newton by archbishop Laud. He received the degree of Bachelor of Divinity Nov. 11, 1628, and was presented by the king to the vicarage of Hackney, in Middlesex. On June 25, 1634, he was made Doctor of Divinity, and in March, 1635, was elected warden of All-Souls. Dr. Sheldon became chaplain in ordinary to Charles I, and was afterwards clerk of the closet. During the rebellion, he adhered to the royal cause, and in February, 1644, was sent to attend the king's commissioners at the treaty of Uxbridge. In April, 1646, he attended the king at Oxford, and was witness to the vow made by him to restore to the Church all impropriations, lands, etc., if it pleased God to re-establish his throne. While the king was at Newmarket in 1647, Dr. Sheldon attended him in one of his chaplains. He was ejected from his wardenship by the Parliament visitors on March 30, 1647 (or 1648), and imprisoned. He was set at liberty on Oct. 24, 1648, and retired to Shenstone, in Derbyshire. Soon after the king's return, he was made dean of the Royal Chapel, and on Oct. 28, 1660, was consecrated bishop of London. The Savoy Convention (q. v.) was held (1661) at his lodgings. He was elected to the see of Canterbury, Aug. 11, 1668, and on Dec. 20, 1667, chancellor of Oxford, but resigned that office July 31, 1669. He died at Lambeth, Nov. 9, 1677.

Shelemi'ah (Heb. Shelemy'ahu, שלםיהו, re-pud of Jehovah; Sept. Σελεμία or Σελεμία), the name of nine Hebrews.

1. A Levite appointed to guard the east entrance to the tabernacle under David, while his son Zechariah had the northern gate (1 Chron. xxvi. 14). B.C. 1048.

2. In 1 Chron. ix. 21; xxv, 2, 1, he is called Meshellemi'ah; in Neh. xii, 35, Meshullam; and in 1 Chron. xxv. 1, 31, Shallum.

2. Son of Cushl and father of Nethaniah, which latter was one of the sons of the princes sent to Babylon with an invitation to receive Jeremiah's roll to them (Jer. xxxvi. 14). B.C. much ante 605.

3. Father of Jehucal or Jucal, which latter Zechariah ordered to request Jeremiah to intercede for the city (Jer. xxxvii. 11). B.C. ante 589.

4. He was a Hananiah and father of Irijah, which latter arrested Jeremiah as he was leaving the city (Jer. xxxvii. 15), B.C. ante 589.

5. Son of Addeel and one of those ordered to apprehend Baruch and Jeremiah (Jer. xxxix. 26). B.C. 604.

6. One of the "sons" of Bani who renounced their Gentile wives after the captivity (Ezra xix. 39). B.C. 438.

7. Another of the "sons" of Bani who did the same (Ezra x. 41). B.C. 458.

8. Father of the Hananiah who repaired part of the walls of Jerusalem (Neh. iii. 30). B.C. ante 446. He is perhaps as much as "one of the apothecaries," e. m., manufacturer of one of his sacred incense, who is mentioned in Neb. iii. 8 as the father of Hananiah.

She'leh'ph (Heb. id. יתל, but always occurring "in pause" as Sleholders, סלחל, סלקל, a drawing-forth; Sept. Σηληφ, v. Σηλης, etc.), the second named of the thirteen sons of Joktan (Gen. xvi, 26; 1 Chron. i, 39). B.C. much post 2515. The tribe which sprang from him has been satisfactorily identified, both in modern and classical times, as well as the district of the Yemen named after him. It has been shown in other articles [see Arabia; Joktan, etc.] that the evidence of Joktan's colonization of Southern Arabia is indisputably proved, and that it has received ample confirmation from Semitic sciences. He should expect to meet with him, in the district (Mikhlaf, as the ancient divisions of the Yemen are called by the Arabs) of Salaf (Murraini, s. v.), which appears to be the same as Nebiru's Suba (Descr. p. 215), written in his map Selma, with the vowels, probably, "Salufer." The word, which signifies "[or] Grand daughter" in the "language de pays" vernaculare per sept. sessucis. It is situated in N. lat. 14° 30', and about sixty miles nearly south of San'a. Besides this geographical trace of Sheleph, we have the tribe of Sleph, or Saluf, of which the first notice appeared in the Zeitschrift d. deutschen morgenländischen Gesellschaft, xi, 155, by Dr. Odander, and to which we are indebted for the following information. Yakôt, in the Moajam, s. v., says, "Es-Selif or Es-Sulaf is an ancient tribe of the region of Yemen; Hisam Ibn-Mohammed says they are the children of Yuktan [Joktan], and Yuktan was the son of Eber the son of Salah the son of Eber the son of Shem, and the son of him the son of Noah. . . . And a district in El-Yemen is named for them. El-Kalkasander (in the British Museum Library) says, "Es-Sulaf, called also Benies-Silfan, a tribe of the descendants of Kahtan [Joktan]. . . . The name of their father has remained with them, and they are called Es-Sulaf; they are children of Es-Sulaf, son of Yuktan, who is Kahtan. . . . Es-Sulaf originally signifies one of the little ones of the partridge, and Es-Silfan is its plural; the tribe was named after that on account of translation." Yakôt also says (s. v. "Muntabik") that El-Muntabik was an idol belonging to Es-Sulaf. Finally, according to the Komâsa (and the Lubel-el-Lubâb, cited in the Muraini, s. v.), Es-Sulaf was a branch of the Danakil of Djibuti, and the "Kilâa [a Hymenitic family or tribe (Causson, Essou, i, 118), not to be confounded with the later king, or Tub-bas of that name]. This identification is conclusively satisfactory, especially when we recall that Hazarmaveth (Hiramruth), Sheba (Seba), and other Joktanic names are in the immediate neighborhood. It is strengthened, if further evidence were required, by the classical mention of the Σαλαπηριος, Salapeni, also written Ἀλαπηρίῳ, Alapeni (Ptolemy, vi, 7). Bohart puts forward this people with rare brevity (Opera, i, 99). The more recent researches in Arabic MSS. have, as we have shown, confirmed in this instance his theory; for we do not find the people of the Salaf, or at least the Salapeni are placed by him in N. lat. 22°. Smith: Forster endeavors (Geogr. of Arabia, i, 109) to identify the descendants of Sheleph with the Meteir tribe, whose chief residence is in Kasin, in the province of Nadj (Burckhardt, Bedouin, p. 298); but for this there appears to be no sufficient evidence.

She'les (Heb. id. ילבש, trial [Genosus], or might [First]; Sept. Σηλεσ v. Συλησ), third named of the four sons of Helem the brother of Shamer, or Shomer, an Asherite (1 Chron. vii. 30). B.C. apparently cir. 1015.

Shel'omi (some Shele'mi) (Heb. Shelom'ri, peaceful; Sept. Σηλομι, father of Ahilud, which latter was the Asherite commissioner to distribute the land east of the Jordan (Numb. xxxiv. 27). B.C. ante 1618.

Shel'omoth (some Shele'moth) (Heb. Shelom'oth, peaceful; or [Ezra viii, 10] יָשֶׁלֶםוֹת, peacefull [strictly a fem. form of Shele'moth]; twice Shememoth, יָשֶׁמֶתоֹת [1 Chron. xxiii. 9; xxv. 25], in both which places, however, the Keri has יָשֶׁמֶתוֹת [ver. 26]), the name of four or five persons, and two or three Hebrewesses.

1. (Sept. Σηλομια') A Demite female, daughter of Dibri, wife of an Egyptian, and mother of the man who
was stoned for blasphemy (Lev. xxiv, 11). B.C. ante 1638. The Jewish rabbis have overlaid these few simple facts with a mass of characteristic fable. "They say that Sholomith was a very handsome and virtuous woman, who was solicited and tempted to crim-inal conversation by an Egyptian, an overseer of the Hebrews' labors, without complying with him. He at last found an opportunity, by night, of slipping into the house and bed of Sholomith, in the absence of her hus-band, and abused her simplicity. The day following, when this woman discovered the injury, she bitterly complained to her husband when he returned. He at first thought of putting her away, but kept her some time to see if she should prove with child by the Egyp-tian. After some months, her pregnancy becoming evi-dent, she sent her away, and with words he assaulted the officer who had done this outrage. The Egyptian abused him still further, both by words and blows. Moses, coming hither by chance and hearing of this injury done by the Egyptian to the Israelite, took up his defence, killed the Egyptian, and buried him in the sand. The brethren of Sholomith, seeing their sister put away like a adulteress, pretended to call her hus-band to account for it and to make him take her again. He refused, and they came to blows. Moses happened to be there again, and wished to reconcile them; but the husband of Sholomith asked him what he had to do in the matter? who had made him a judge over them? and whether he had a mind to kill him also, as yesterday he killed the Egyptian? Moses, hearing this, fled from Egypt into the country of Midian. The blasphemers stoned in the wilderness (Lev. xxiv, 10, 11) was, say the Jews, the son of Sholomith and this Egyptian. The officer who inspected the Hebrews' labor is he of whom Moses speaks in Exod. ii, 11, 12; and the husband of Sholomith is intimated in the same place (ver. 13, 14).

2. (Sept. Σαλομωνίας v. r. Σαλομώας.) A Levite, chief of the sons of Ishah in the time of David (1 Chron. xxii, 18). B.C. 1018. He is elsewhere (xxiv, 22, 23) called Shelmomoth (q. v.).

4. (Sept. Σαλομώας v. r. Άσισθίμ.) First named of the three sons of Shimei, chief of the Gershonites in the time of David (1 Chron. xxiii, 9). B.C. 1013. In ver. 10 his name should probably be read instead of Shimei (q. v.).

5. (Sept. Σαλομώας.) The last named of the three children of Rehoboam by his second wife, Maachah, but whether a son or a daughter is uncertain (2 Chron. xi, 20). B.C. cir. 970.

6. (Sept. Σαλομώας v. r. Σαλομώας.) A daughter of Zerubbabel (1 Chron. iii, 19). B.C. post 536.

7. (Sept. Σαλομώας v. r. Σαλομώας.) According to the present text of Ezra viii, 10, the sons of Shelmith, with the son of Josiphath at their head, returned from Babylon with Ezra to the number of eighty males, B.C. ante 445. There appears, however, to be an amenu-sation which may have been supplied from the Sept. and the true reading is probably "Of the sons of Bani, Shelo-mith the son of Josiphath." See also 1 Esdr. viii, 36, where he is called "Assialmoth son of Josiphath." See Keil, ad loc.

Shelomoh. See Solomon.

Shel'momoth [some Shel'moth] (Heb. Shelhomoth, שֵׁלְמוֹת, peaceful; strictly a plur. fem. of בַּלִּים, peace; Sept. Σαλομώας), one of the descendants of Izhar the grandson of Levi (1 Chron. xxiv, 22, 23); elsewhere (xxiii, 18) called Shelmith (q. v.).

Shelpher, CHARLES, a minister of the Methodist Episcopal Church, was born in Hovenden, kingdom of Hanover, Jan. 16, 1800. In 1866 he emigrated to the United States, and settled in Wheeling, W. Va. The following year he was converted and joined the Church. Soon after he entered the travelling ministry, among his countrymen. He labored until April, 1866, when he had a paralytic stroke. His five relations to the Conference then ceased. In March, 1865, he had a second paralytic stroke, and in July a third stroke followed. He died Sept. 4, 1865, being at the time a member of the Central German Conference. See Minutes of the Annual Conferences, 1866, p. 181.

Shelton, PHILo, an Episcopal clergyman, was born at Ripton (now Huntington), Conn, May 5, 1754. He graduated at Yale College in 1776, and studied theology, probably with Rev. James C. Soville, of Waterbury. He was ordained deacon Aug. 3, 1755, and priest on Sept. 16. On February 24 preceding, he received a call from Fairfield, North Fairfield, and Stratfield, which he accepted. Here he labored until he entered into rest, Feb. 22, 1825. Mr. Shelton "was distinguished for simplicity, integrity, and an honest and earnest devotion to the interests of pure and undefiled religion." He was one of the clergymen who were instrumental in securing a charter for Trinity College, Hartford, which was accomplished by a union with a political party, then in the minority. See Sprague, Annals of the Amer. Pulpit, v. 349.

Shelmiel [Heb. Shelumiel], הַשֶּׁלְמוּאֵל, friend of God; Sept. Σαλομώατα, son of Zurishaddai (Numb. ii, 12) and phylarch of Simeon (x, 19), appointed to number his people (Exod. i, 16), and lived to the 70th year (ver. 7). B.C. 1057. He made his of-fering for the tabernacle like the rest (vii, 36, 41).

Shem (Heb. שֵׁם, name; Sept. [and New Test. Luke iii, 8] Σήμων, Josephus Σῆμακαν [Ant. i, 4, 1]; Vulg. Sem), the son of Noah, born (Gen. v, 32) when his father had attained the age of 500 years. B.C. 2613. He was 98 years old, married, and childless, at the time of the flood. After it he, with his father, brothers, sisters-in-law, and wife, received the blessing of God (ix, 1), and entered into the covenant. Two years afterwards he became the father of Arphaxad (xi, 10), and other children were born to him subsequently. With the help of his brother Japheth he covered the nakedness of their father, which Canaan and Ham did not care to hide. In the prophecy of Noah which is connected with this incident (ix, 17), the first blessing is placed on Shem. He died at the age of 600 years. B.C. 213.

Assuming that the years ascribed to the patriarchs in the present copies of the Hebrew Bible are correct, it appears that Methuselah, who in his first 243 years was contemporary with Adam, had still nearly 100 years of his long life to run after Shem was born. Again, when Shem died Abraham was 148 years old, and Isaac had been nine years married. There are, therefore, but two links—Methuselah and Shem—between Adam and Isaac. Thus the early records of the creation and the fall of man which came down to Isaac, would challenge (apart from their inspiration) the same confidence which is readily yielded to a tale that reaches the hearer through two well-known persons between himself and the original chief actor in the events related. See LONGEVITY.

There is, indeed, no chronological improbability in that ancient Jewish tradition which brings Shem and Abra-ham into personal conference. See ELMHIZEDEK.

The portion of the earth which the descendants of Shem (Gen. x, 21-31) intersects the portions of Japheth and Ham, and stretches in an uninterrupted line from the Mediterranean Sea to the Indian Ocean. Beginning at its north-western extremity with Lydia (ac-cording to all ancient authorities, though doubted by Michaelis, De orig. gent. ii, 3, 27; Seznon, p. 457), it includes Syria (Arab), Chaldea, (Arphaxad), parts of Assyria (Assur), of Persia (Elam), and of the Arabian peninsula (Joktan). See ETHNOLOGY; SEMITIC LANGUAGES. The servitude of Canaan under Shem, predicted by
Noah (Gen. ix, 25), was fulfilled primarily in the subjugation of the people of Palestine (Josh. xxiii, 4; 2 Chron. vii, 3), and which view evidently refers to the oldest, or the heir, only, as the foregoing comparisons show; in any other sense the assertion would be irrelevant or absurd.

(II) Grammatical Considerations.—On this point most later commentators and translators seem content to follow implicitly the views of Rosenmüller (Schol. ad loc.):

"In this clause the word יִֽשְׁתָּבֵב, 'the elder,' is ambiguous as to whether it should be joined with Japheth, thus indicating him as the elder son with Shem. The former has seemed to many interpreters probable chiefly because, inasmuch as Noah is said to have begotten the first of his sons who survived the flood in the one hundredth year before the flood (Gen. v, 32), and Shem is said to have lived his one hundredth year two years after the flood (xi, 10), therefore the latter could not have been the first-born. But since it is not at all likely that Noah begot in one and the same year the three sons mentioned in v, 32, it is credible that in that passage round numbers only are named, as often occurs, and that the five hundredth year is set down in the same connection instead of the five hundred and second, as that in which Noah began to be a father. Hence it does not appear from this passage that Japheth was the oldest son. On the contrary, since in the preceding context the sons of Noah are six times mentioned in such order that Shem is set in the first place, Ham in the second, and Japheth in the third (v, 32; vi, 10; vii, 5; ix, 16; 25; and x, 26), it is very clear that no doubt—it follows that in the present passage likewise the term 'the elder' is to be joined to שְׁתָּבֵב, 'the brother of,' so as to make Shem the oldest. But there is also another grammatical reason. If the writer in this place had wished to say that Japheth was the oldest son of Noah, he would doubtless have written יִֽשְׁתָּבֵב יִנְנָא, the older son of Noah; for יִֽשְׁתָּבֵב, 'the elder,' thus placed nude, nowhere else occurs (with reference to a person's age), but is always joined either with ישן, 'son,' or with ישן, 'brother.' All this has been fully set forth by J. F. Schelling in his monograph entitled über die Geburtsfolge der Söhne Noah, at the beginning of part xvii of his Repertorium Bibliicum et Orientalia Literaturae. These points, however, are not well taken; for

1. It is not usual for the sacred writers to employ round numbers in chronological accounts. In this Cyclopaedia we have thoroughly examined every date in the Bible, and find no such instance. Each definite number is susceptible of explanation as being precisely correct, except a variety of cases where the passage of time is alluded to, particularly, all the leading chronologers—from Usher, Jackson, Hales, and Clinton down to Browne and the author of Palomni—to take the date as being exact. It is a superficial evasion of a difficulty to resort to this slurr upon the accuracy of Scripture chronology.

2. The sacred writer might indeed have said, if he had chosen, 'the brother of Japheth the elder son of Noah;' but this is a tedious and awkward phrase, and would have been just as ambiguous as the one he has employed, its sense entirely depending upon the interpolation.

3. יִנְנָא does occur in as "nude a form" as here in at least one passage (Ezek. xxii, 14 [Heb. 19]), as noticed below. It is true the adj. there does not refer to comparative age, but that makes no difference in the grammatical construction. The assertion that יִנְנָא does not occur (in the sense of age) without the addition of ישן or ישן expressed is not true, as may be seen from Gen. xxix, 16; xlyv, 2, and other instances where one of these nouns is merely implied, precisely as in the case before us. In fine, the adj. is not here "nude" or independent at all; it regularly belongs to the second noun, "brother of the elder Japheth."

4. The argument from the order of the names is
amply refuted (as above) by the analogous cases of
Arphaxad (Gen. xi, 22), Abraham (ver. 27), and, indeed,
almost every other patriarch. They were arranged in
the order of proximity and importance to the Hebrews.
Among the arguments on the other side, we may note—
a. The chronological point is irrefragable, except by
the argument from individual.
b. The position of the words, although ambiguous,
certainly allows the construction of the Authorized Ver-
sion. We append a few instances of the same adj.
qualifying a noun after a construction:
Numb. xxxv, 28, bin עֲבֹדֶה הָאָדָם הַשֶּׁמֶן֙, Josh. xx, 6 עֲבֹדֶה הָאָדָם הַשֶּׁמֶן֙ — the same.
Isa. xxxvi, 15 עֲבֹדֶה הָאָדָם הַשֶּׁמֶן֙, Ezek. xlvii, 9 עֲבֹדֶ­ֶֶה הָאָדָם הַשֶּׁמֶן֙.
Dan. x, 4 עֲבֹדֶה הָאָדָם הַשֶּׁמֶן֙.

Had the word בִּשְׁמָאִים preceding the qualifying adj. in the
passage in question not been a proper name, it would
have taken the article, as in these instances, and thus
all ambiguity would have been avoided. An instance
strictly parallel is Ezek. xxi, 14 (Heb. 19), בִּשְׁמָאִים
where the adj. being masc., must belong to the
second noun, though neither has the art. Others simi-
lar doubtless occur, if not with בִּשְׁמָאִים, yet with other
adjectives.
c. Had the sacred writer intended the adj. in the
passage in question to apply to the last noun, he could
scarcely have expressed his meaning in any other way
than he has. On the other hand, had it meant to
c. refer to the former, he would undoubtedly have added
masculine, as in Judges ii, 13; i, 9 (יוֹדְעָה הָאָדָם
which are the only strictly parallel cases of usage un-
der that view (the adj. being בִּשְׁמָאִים); however, instead of
בִּשְׁמָאִים). Judges ix, 5 (יוֹדְעָה הָאָדָם
is not a case in
point, as there could be no ambiguity there.
d. The Masoretic accents are clearly for the old
rendering. In all the above instances the adj. is con-
nected by a conjunctive with the noun immediately
preceding, and the first noun (though in the construct)
is separated by a disjunctive. In cases of the other con-
struction the reverse interposition prevails invariably,
so far as we have examined. The authority of the
Masorites counterpoints that of all modern scholars, most
of whom seem to have given the subject but a cursory
examination. The criticism of Keil (Commentary on
the Pentateuch, l, 156, Clarke’s ed.) is particularly lame.
Josephus (Ant. vi, 6, 4) calls “Shem the third son of Noah,”
but elsewhere names him as the first. He maintains the
difference, order, of that of familiarity (“Shem and Japheth
and Ham”). As to the other ancient versions, as above
noted, the Sept. (the translator of which in this part
was a good Hebraist) refers the adj. to Japheth, al-
though some printed editions have it otherwise; in order
to correspond with the Vulgate, which reflects the Jewish
national pride. The Samaritan, Syriac, and Arabic of
course follow the Vulgate, but the Targum of Onkelos
has “the brother of Japheth the great.” Schelling,
whom Rosenmuller (as above) refers to (Repertorium,
etc. [1780], xvi, 8 sq.), thinks that the lists in Gen. only
mean that Japheth had passed five hundred years
before he had any heir, since in any case the three sons
could not have been all born in the same year, to which
they are all equably assigned, and that therefore only
the round number or approximate date is given” (p. 20).
e. The reason why the sacred writer adds the epithet
“the brother of Japheth” in this place, is precisely to
prevent the inference that would otherwise naturally
be drawn from the continual mention of Shem first in
the lists elsewhere, that he was the oldest son, and to
explain why the names are here inverted. In the pres-
cent chapter, however, as usual in detailed genealogies
(1 Chron. i, 29 sq. ii, 1 sq., 42 iii, 1 sq. etc.), the strict
order of Primogeniture is observed. Had Shem been
the oldest, there seems to be no good reason why this
pedigree the same order should not have been observed
elsewhere. Rosenmuller’s remark that this was done
“in order that the transition from the lineage of Shem
to the history of Abraham might be more easy,” does
not apply; for the next chapter begins with an account
of the Tower of Babel, which is neither Abrahamite nor
the chronology peculiar, but generally Jewish (Gen.
ver. 10); so that this list of Shem’s descendants is thrust
in between two portions of Ham’s history—not arbi-
trarily, unless for the sake of chronological order.

She’ma (Heb. in three forms, Shema’, שֶׁמֶּאָה, Josh.
xv, 26; She’má, שֶׁמֶת; elsewhere, except “in pause.”
Shema’a, שֶׁמֶת, 1 Chron. i, 43—all meaning דֶּעֶּרֶּה; Sept.
עַמָּה, ν, Σαμαία, Σαλαία, Σαμαία, etc.), the name of four
men and of one place.
1. Last named of the four sons of Hebron, and father
of Raham, descendants of Caleb, great-grandson of Judah
(1 Chron. ii, 43, 44). B.C. ante 1658.
2. A Benjamin, son of Elpaal, and one of the heads
of the fathers of the inhabitants of Aijalon, who drove
out the inhabitants of Gath (1 Chron. viii, 18). B.C.
priest 1618. He is probably the same as Shimeh (ver. 21).
3. Son of Joel and father of Azaz, among the Reu-
benites (Josh. xiv, 8). B.C. ante 1450. He is the same
with Shemaiah (q. v. of ver. 4). See Jok. 2.
4. One of those (apparently laymen) who stood
at Ezra’s right hand while he read the law to the people
(Neh. viii, 4). B.C. 468.
5. A town in the south of Judah, named between
Amam and Beeroth (Josh. xv, 26). The place seems
to have no connection with No. 1 above (see Keil, ad loc.
Chron. In the parallel list of towns set off from Judah
to Simeon (Josh. xix, 2), the name appears as Sheba
(q. v.), which is perhaps the more correct, as Shema
never elsewhere appears as the appellation of a town.
Nobelman and Robinson give it as eeg. Hamma; exeget.
Trench, however, argues that it may be the present ruins Someh,
between Milh and Beer-sheba (Van de Velde, Syria, ii, 148).

She’ma. Of the many prayers now constituting the
Jewish ritual, the Shema, so called from the first word,
_push., i.e. hear, occurring in it, was the only really fixed
form of daily prayer which is mentioned at an early
period. Being a kind of confession of faith, every Is-
raeelite was to repeat it morning and evening.
The Shema is composed of three passages from the Persi-
teuch: 1. Shema Israel (Deut. vi, 4–9); 2. Vehayah im
shamoa (xi, 13–21); and 3, Vagomer Jehovah el Mshekh
(Numb. xiv, 57–41). In the morning it was preceded by
two and succeeded by one, and in the evening both pre-
ceded and succeeded by two prayers, which, although
considerably enlarged, are still in use. We quote them
omitting all other additions), as probably in use at the
time of our Lord:

Before the Shema, Morning and Evening.—“Blessed art
thou, O Lord, King of the world, who fortest the light
and greatest darkness, who makest peace and creaseth
everything; who in mercy givest light to the earth and
to those who dwell upon it, and in thy goodness renew-
est day by day, and continually, the works of creation.
Blessed be the Lord our God for the glory of his handi-
works; and for the light-giving lights which he hath made
for his people, Selah! Blessed be the Lord who formed
the lights!”

Subjecting the second prayer to the same criticism, we
read it:

“With great love thou hast loved us, O Lord our God;
and with thy great kindness thou didst magnify us and
bless us and give us a heritage of pity on us. O our Father! our King! for the sake of our fathers who boasted in thee, to whom thou didst teach the wisdom of life, who committed on us, and enlighten our
eyes in thy law, and blind our hearts in thy command-
ments. O with our heart we have love and fear thy name,
that we may not be abashed for evermore. For thou art
a God who preparst salvation, and us hast thou chosen
from among all peoples and tongues, and thus in truth
brought us near to thy great name, Selah, in order that
in love we may praise thee and praise thy unity. Blessed
be the Lord who love those his people Israel.”

Then follows the Shema:

“Hear, O Israel: the Lord thy God is one Lord. And
SHEMAAH 651 SHEMAAH

thou shalt love the Lord thy God with all thine heart, and with all thy soul, and with all thy might, and these words, which I command thee this day, shall be in thine heart.

And thou shalt diligently train thy children, and shalt talk of them when thou sittest in thine house, and when thou walkest by the way, and when thou liest down, and when thou risest up.

And it shall come to pass, if ye shall hearken diligently unto my commandments which I command you this day, to love the Lord your God, and to serve him with all your heart and with all your soul, that I will give you the rain of your land in its season, and the fruitful flush of the earth.

And I will send grass in thy fields for thy cattle, that they may bring forth their young, and be multiplied. And thou shalt be fruitful and multiply. And the Lord thy God shall bless thee in the land which the Lord hath given thee.

The morning prayers concluded with the following, now in use:

"It is true that thou art the Lord our God, and the God of our fathers: our Redeemer, and the Redeemers of our fathers; our Rock, and the Rock of our salvation.

Our Redeemer and Deliverer: this is thy name from everlasting; and the days of our children, in the land which the Lord shall make by the hand of the heathen to give to them, as the days of heaven upon the earth." (Deut. xi. 21, 22)

"Speak unto the children of Israel, and bid them that they make them fringes in the borders of their garments throughout their generations, and put them upon the fringes of the borders a ribbon of blue: and it shall be unto you for a fringe, that ye may look upon it, and remember all the commandments of the Lord, to do them, and that ye seek not after your own heart and your own eyes, after which your heart is set, to go astray; for the Lord your God is of a truth a jealous God; and with an avenger doth he visit the children of them that forsake him.

I am the Lord your God: which brought you out of the land of Egypt, to be your God: I am the Lord your God." (Num. xv. 37-41).

An addition dating from the 2d century inserts before the words "A new song," etc., a particular record of God's past dealings. The additional prayer for the evening is as follows:

"O Lord our God! cause us to lie down in peace, and raise us up, O our King! to a happy life. Oh spread thy pavilion of peace over us, and direct us with good counsel, and correct us with judgment, in the name. Oh shield us, and remove from us the stroke of the enemy, the pestilence, sword, famine, and sorrow: and remove the adversary from before and behind us, and conceal us under the shadow of thy wings; for thou, O God! art our Guardian and Deliverer; and thou, O God! art a merciful and gracious King. Oh guard us at our going out and coming in, with a happy and peaceable life throughout the days of our years, and for evermore."

Although these prayers were sometimes lengthened or shortened, they were at a very early period in general use among the Hebrews. Like many other things, these prayers were made the subject of casuistic discussions, and the very first pages of the Talmud are crowded with questions and answers as to "how" and "what" the Shema' is to be read (see treatise Berachoth).

Women and servants and little children, or those under twelve years, are exempted by the Mishna from this obligation. See Zunz, Gottes, Vorträge der Juden, p. 367, 369-371; Schurer, Lehrbuch der neuentstammten. Zeitschichte, p. 690 sqq.; Frideaux, Connexion (Wheeler's translation), I, 4; Eder, Geschichte, I, 4; Eder, Jewish Literature, p. 98 sqq.; Edersheim, History of the Jewish Church, p. 360 sqq. See Philology.

Shem'aḥ (Heb. with the art, hashem'aḥ, הַשֵּׁמֶאָ֗ה, the prayer; Sept. 'Aṣmā' v. r. 'Aṣma'), a Ben-

jamite of Gibeah, and father of Ahizezer and Joash, who joined David at Ziklag (1 Chron. xii. 8). B.C. ante 1054.

Shemachoth. See Talmud.

Shem'ay'ah (Heb. Shemay'yāh, שֶׁמֶאָ֖yah, hear [or rumor] of Jehovah [twice in the prolonged form, Shemay'yāh, שֶׁמֶאָ֖yah], 2 Chron. xi. 2; Jer. xxxix. 24); Sept. 'Aṣmā' v. r. 'Aṣma', 'Aṣma', etc.), the name of a large number of Hebrews.

1. A Reubenite, son of Joel and father of Gog (1 Chron. v. 4). B.C. post 1747. He was perhaps the same as the Shema (q. v.) of ver. 8.

2. Son of Ephraim, and chief of his house (of two hundred and thirty thousand men enrolled in the army) under King David, who took part in the ceremonial with which the king brought the ark from the house of Obed-edom (1 Chron. x. 8, 11). B.C. 1043.

3. A Levite, son of Nethaneel, and also a scribe in the time of David, who registered the divisions of the priests by lot into twenty-four orders (1 Chron. xxxiv. 6). B.C. 1014.

4. Edeset of the eight sons of Obed-edom the Levite. He and his four valiant sons and other relatives, to the number of sixty-two, were gate-keepers of the Temple (1 Chron. xxxiv. 6, 7). B.C. 1014.

5. A prophet in the reign of Rehoboam, who, when the king of Israel had gathered an army of 90,000 men, confronted Rehoboam of Judah to reconquer the northern kingdom after its revolt, was commissioned to charge them to return to their homes and not to war against their brethren (1 Kings xii. 22; 2 Chron. xii. 2). B.C. 972. His second and last appearance upon the stage was upon the occasion of the invasion of Judah and siege of Jerusalem by Shishak, king of Egypt (B.C. 969). His message was then one of comfort, to assure the princes of Judah that the punishment of their idolatry should not come by the hand of Shishak (xii. 7). From the circumstance that in ver. 1 the people of Rehoboam are called "Isra-ael," whereas in ver. 5, 6 the princes are called indifferently "the princes of Judah," and "princes of Israel," this text has been plausiblyarranted that the latter event occurred before the disruption of the kingdom. Shemayah wrote a chronicle containing the events of Rehoboam's reign (ver. 15).

6. One of the Levites who in the third year of Jehoshaphat accompanied two priests and some of the princes of Judah to teach the people the book of the law (2 Chron. xvii. 8). B.C. 909.

7. Father of Shimri and ancestor of Ziza, which last was a chief of the tribe of Simeon (1 Chron. iv. 37). B.C. long ante 726. He was perhaps the same with the Shimae (q. v.) of ver. 26, 27.

8. A chief of Judah the singer who lived in the reign of Hezekiah. He assisted in the purification of the Temple and the reformation of the service, and with Uzziel represented his family on that occasion (2 Chron. xxxix. 14). B.C. 726. (See No. 9.)

9. One of the Levites in the reign of Hezekiah who were placed in the cities of the priests to distribute the tithes among their brethren (2 Chron. xxxxi. 15). B.C. 726. He was perhaps identical with No. 8.

10. A chief Levite in the reign of Josiah who, with his brethren Conaniah and Nethaneel, contributed sacrifices for the Passover (2 Chron. xxxix. 9). B.C. 698.

12. Father of Deliah, which latter was one of the princes who heard Baruch's roll (Jer. xxxvi. 12). B.C. ante 605.

13. A Nezalemites and a false prophet in the time of Jeremiah. B.C. 696. He prophesied to the people of the captivity in the name of Jehovah, and attempted to counteract the influence of Jeremiah's advice, that they should settle quietly in the land of their exile, build houses, plant vineyards, and wait patiently for the period of their return at the end of seventy years. His animosity to Jeremiah exhibited itself in the more active form of a letter to the high-priest Zephaniah, urging him to exercise the functions of his office and lay
the prophet in prison and in the stocks. The letter was read by Zephaniah to Jeremiah, who instantly pronounced the message of doom against Shemariah for his presumption that he should have none of his family to dwell among the people, and that himself should not live to see their return from captivity (Jer. xxix, 24—29). Shemariah

14. A chief priest who returned from Babylon with Zerubbabel (Neh. xii, 6, 18). B.C. 586. He lived to sign the sacred covenant with Nehemiah (x, 8). B.C. 410.

15. One of the three “last sons” (i.e. supplementary heads of families) of Adonikam who returned with sixty males from Babylon with Ezra (Ezra xii, 18). B.C. 458.

16. One of the “heads” of the Jewish families whom Ezra sent for to his camp by the river of Ahava, for the purpose of obtaining Levites and ministers for the Temple from the “place Casipha” (Ezra viii, 16). B.C. 418.

17. One of the priests of the “sons of Harim” who renounced their Gentile wives after the captivity (Ezra x, 21). B.C. 438. (Comp. No. 18).

18. An Israelite of the “sons of Harim” who divorced his Gentile wife after the captivity (Ezra x, 31). B.C. 458. (See No. 17.)

19. A priest, son of Mattaniah (q.v.) and father of Jonathan in the lineage of “Asaph” (Neh. xii, 35). B.C. ante 446.

20. Son of Galal and father of the Levite Obadiah (or Abda) who “dwelt in the villages of the Netophathites” after the return from Babylon (1 Chron. ix, 16). B.C. ante 446. He is elsewhere (Neh. xi, 17) called Shaxmeu (q.v.).

21. Son of Shecaniah and keeper of the east gate at Jerusalem, who assisted in repairing the wall after the captivity (Neh. iii, 29). B.C. 446.

22. Son of Delaiah the son of Mehetabel, a prophet in the time of Nehemiah who was bribed by Sanballat and his confederates to frighten the Jews from their task of building the Wall, and to persuade Nehemiah in fear. In his assessment terror, he appears to have shut up his house and to have proposed that all should retire into the Temple and close the doors (Neh. vi, 10). B.C. 446.

23. Son of Hasehub, a Merarite Levite who lived in Jerusalem after the captivity (1 Chron. xi, 14), and one of those who had oversight of the outward business of the house of God (Neh. xi, 18). B.C. 446.

24. One of the princes of Judah who was in the procession that went towards the south when the two thanksgiving companies celebrated the solemn dedication of the wall of Jerusalem (Neh. xii, 34). B.C. 446.

25. One of the choir who took part in the procession with the dedication of the new wall of Jerusalem by Ezra was accompanied (Neh. xii, 36). B.C. 446. He appears to have been a Gershonite Levite, and descendant of Asaph, for reasons which are given under Mattaniah 8.

26. One of the priests who blew with trumpets in the procession upon the newly completed walls of Jerusalem after the captivity (Neh. xi, 42). B.C. 446.

27. The son of Shecaniah and father of five sons among the descendants of Zerubbabel (1 Chron. iii, 22). He was possibly the same with No. 21. Lord Hervey (Geneal. p. 107) uncritically proposes to omit the words at the beginning of 1 Chron. iii, 22 as spurious, and to consider Shemariah mentioned with Shimea (q.v.), the brother of Zerubbabel (ver. 19). This Shemariah seems to be the same as the Semei of Luke iii, 26. B.C. cir. 380. See Genealogy of Christ.

Shemaria'iah (Heb. Shemarjah, שֶׁמֶרְיָה, kept of Jehovah; or, in the prolonged form [1 Chron. xii, 5], Shemar'jah, שֶׁמֶרְיָה), Sept. Ἰάμαρια, v. r. Ἰάμαρια, Ἰάμαρια, Ἰαμωρία), the name of four Hebrews.

1. Of the valiant Benjaminites who joined David at Ziklag (1 Chron. xii, 5). B.C. 1054.

2. Middle name of the three sons of Rehoboam by his second wife, Abigail (2 Chron. xi, 19, A.V. “Shamarriah”). B.C. cir. 973.
transliteration of the translation by the bishop Paul of Telas, they found in many places the Hebrew name of God, which otherwise is expressed by the Greek θεός and the Syriac ܐܝܘ &= ܠܐ, represented by 上帝. It was, however, more surprising that in the main manuscript of this version in the celebrated Codex Syro-Hexaplaion Ambrosianus at Milan, in the notes on Isaiah, instead of the word יָּהָּשֶׁר was found. The connection between the Greek ΙΙΙΙ and this יָּהָּשֶׁר was soon perceived, but not in a correct manner, so that in 1885 Middeldorf, in his edition of Codex Syro-Hexaplaion, could but explain it as "it is in the Novum librarium, Cod. Syr. Hexapraer describens, sed sensum Grecii illius ΙΙΙΙΙ hand perspicuus Grecium characterem II loco Hebraici υ οισιν omne opinarere, quod modum I loco Hebr. υ ideoque Syriaco יָּהָּשֶׁר scribaret." Bernstein, in reviewing Middeldorf’s edition, quoted a school of Bar-Hebraeus, which gives us the following interesting notice: “The Hebrews call the glorious name of God יָּהָּשֶׁר, which is יָּהָּשֶׁר (יָּהָּשֶׁר), and dare not to pronounce it with their lips, but read and speak instead, to those who listen, יָּהָּשֶׁר. Since the seven interpreters retained the Hebrew name, the Greeks fell into an error and believed that these two letters were Greek, and read it from the left to the right, and the name ΙΙΙΙΙ was formed, and thus יָּהָּשֶׁר (יָּהָּשֶׁר), which designates the Eternal Being, was changed into ΙΙΙΙΙ, which yields no sense at all. The Yod of the Hebrews is like the Yod (יוד) of the Greeks, and ΙΙΙΙ of the Hebrews has the form of the Greek Π (Π). Hence, in the Syriac copies of the Sept. we find everywhere the name יָּהָּשֶׁר (יָּהָּשֶׁר, i.e. where יָּהָּשֶׁר stands for יָּהָּשֶׁר). With יָּהָּשֶׁר written above.” On this scholiast Bernstein remarks that רָוָּשֶׁר corresponds to the Rabbinic יָּהָּשֶׁר, שֵּם hammelephorash. In his lexicon, Bernstein writes: "יָּהָּשֶׁר is one who separates, discerns, hence יָּהָּשֶׁר in a discerning, separating, or especial name, as בָּאָרָם חַּרְטָב, secretum, occultum. Schroeter, in his edition of Bar-Hebraeus, explains יָּהָּשֶׁר by novem distinctum, singularare. But Bar-Hebraeus tells us only what he found in Jacob of Edessa, who has a whole scholion entitled "Scholion on the Singular and Distinct Name (הָּשֶׁר) which is found in the Syriac Holy Writings translated from the Greek, and which is called among the Jews יָּהָּשֶׁר כְּחָרְסָא. From this scholion, which Nestle published in the Zeitchrift der deutschen neuerländischen Gesellschaft, 1878, xxxii, 465 sq., and which purports to give what Jewish tradition believed concerning this name, we see that it means the separated, i.e. singular name of God—a view also adopted by Nestle himself. But a review of the different opinions will show that there is a great difference as to what the meaning of the word יָּהָּשֶׁר is. Some translate it by novem explicitum, others by novem separatum (comp. Buxtorf, Lex. Talm. s. v.); Petrus Galatinus, De Aenima Catholico Veritatis, ii, 18, by separatum, i.e. "sejunctum et distinctum ab alios omnibus Dei nominibus, et soli Deo proprio conveniens." Reuchlin, in the third book of De Arte Cabaliistica, explains it by novem explicitum; Munck, the novum distinctum and in the Lexicon, 1737, and 1808, he calls יָּהָּשֶׁר, the deutlich ausgeprägte Name; Levy, de deutlich ausgeprägte Name. In setting the question all must depend on the meaning of יָּהָּשֶׁר, whether it means only "to separate," or whether it occurs also in the sense of "to pronounce distinctively." In the latter sense it occurs very often, especially in the Targum and Talmud, as Dr. Frut has shown against Dr. Nestle in Z. d. d. d. 1879, xxxii, 297, stating that יָּהָּשֶׁר is only the Aramaic form for וַָּהָּשֶׁר, "to pronounce distinctly the name of God." In the Mishna (Yoma, vi, 2) we are told that both the priests and people, when they heard, on the Day of Atonement, the וַָּהָּשֶׁר and נַחֲלָה, fell to the ground; and we are also told that the voice of the high-priest, when he pronounced the name, on the Day of Atonement, was heard as far as Jericho. What is the name יָּהָּשֶׁר be it, the name of a deity, or of a philosophical point of view, Jewish tradition ascribed to it great power. By means of the שֵּם hammelephorash Christ is said to have performed his miracles; Moses is said to have slain the Egyptian by the same means. Any one interested in these and other sily stories will find them in Eisenberger, Nennemerkurz, p. 569 sq. See, besides the essays of Nestle and Fürst already quoted, also Buxtorf, Lex. Talm. (ed. Fischer), p. 1205 sq.; Geiger, Uebersicht der Bibel, p. 263 sq. See JEHovah. (B. P.) Practically, שֵּם hammelephorash is a cabalistic word among the Rabbinical Jews, who reckon it as of such importance that Moses spent forty days on Mount Sinai in learning it from the angel Samael. It is not, however, the real word of power, but a representation of it. The rabbins differ as to whether the genuine word consisted of twelve, or forty-two, or seventy-two letters, and try by their gematria, or cabalistic arithmetic, to reconstruct it. It is supposed to have been written on the Temple, and by its means was enabled to perform many wonderful works. It is now lost, and hence, according to the rabbins, the lack of power in the prayers of Israel. They declare that if any one were able rightly and devoutly to pronounce it, he would by this means be able to create a world. It is alleged, indeed, that two letters of the word inscribed by a cabalist on a tablet and thrown into the sea raised the storm which, A.D. 1542, destroyed the fleet of Charles V. They say, further, that if you write this name on the person of a prince, you are sure of his abiding favor. The rationale of its virtue is thus described by Mr. Alfred Vaughan in his Hours with the Mystica: "The Divine Being was supposed to have commenced the word of creation by concentrating on certain points the primal, universal Light. Within the region of these was the appointed place of our world. Out of the remaining luminous points, or foci, he constructed certain letters—a heavenly alphabet. These characters he again combined into certain creative words, whose secret potency produced the forms of the material world. The word שֵּם hammelephorash contains the sum of these celestial letters, with all their inherent virtue, in its mightiest combination." Shemi'da (Heb. Shemida), יָּהָּשֶׁר, name of knowing, i.e. wise; Sept. Συμπόδιον, v. r. Συμίπαρην, Συμίπαρην, etc., one of the sons of Gilead (Josh. xvi, 2), fifth named among the six, and progenitor of the family of the She- midites (Num. xxvi, 32). His three "sons" are mentioned (1 Chron. vii, 19, A. V., "Shemidah"). B.C. post 1856. Shemi'dah (1 Chron. vii, 19). See Shemida. Shemi'daithe (Heb. with the art. in the sing. used collectively, hash-Shemidaithe, יָּהָּשֶׁר, patronymic from Shemidah; Sept. Συμίπαρην, a designation (Num. xxvi, 32) of the descendants of Shemidah (q. v.), the son of Gilead, who obtained their inheritance among the male posterity of Manasseh (Josh. xvi, 2, where they are called "children of Shemidah"). Shemimith (Heb. with the art., hash-Shemimith, יָּהָּשֶׁר, fem. sing. of יָּהָּשֶׁר, eighth.) The title of Psa. vi contains a direction to the leader of the stringed instruments of the Temple choir concerning the manner in which the psalm was to be sung. To the chief musician upon Shemimith, "Sing praises to God, as the margin of the A. V. has it, and as the same word is elsewhere rendered (Lev. xxx, 32, etc.). A similar direction is found in the title of Psa. xii. The Sept. in both passages renders מְלֹא כָּלָּו יֵשָׁר, and the Vulg.
pro octaev. The Geneva Version gives "upon the eighth tune." Referring to 1 Chron. xv. 21, we find that certain notes of this mode are written "with harps on the Sheminith," which the Vulgate renders as above, and the Sept. by ḳαναρία, which is merely a corruption of the Hebrew. The Geneva version explains in the margin "which was the eighth tune, over the which he that was the most excellent had charge." As we know nothing whatever of the music of the Hebrews, all conjectures as to the meaning of their musical terms are necessarily vague and contradictory. With respect to Sheminith, most Rabbinical writers, as Rashi and Aben-Ezra, follow the Targum on the Psalms in regarding it as a harp with eight strings; but this has no foundation, and depends upon a misconstrual of 1 Chron. xv. 21. Gesenius (Theeaur. s. v. פֶלַס) says it denotes the bass, in opposition to Alamoth (1 Chron. xv. 20), which signifies the treble. But as the meaning of Alamoth itself is very obscure, we cannot make use of it for determining the meaning of a term which, though distinct from, is not necessarily contrasted with it. Others, with the author of Shilte Haggilobin, interpret the "sheminith" as the octaevo; but there is no evidence that the ancient Hebrews were acquainted with this octave as understood by ourselves. On comparing the manner in which the word occurs in the titles of the two psalms already mentioned with the position of the terms Ajeleth Shahar, Jonath-elm-rechomik, etc, in other psalms, which are generally regarded as indicating the melody to be employed by the singers, it seems probable that the first is of the same kind, and denotes a certain air known as the eighth, or a certain key in which the psalm was to be sung. Maurer (Comm. in Ps. vi) regards Sheminith as an instrument of deep tone like the violincello, while Alamoth he compares with the violin; and such, also, appears to be the view taken by Junius and Tremellius. See Psalms.

Sheminith (Heb. Sheiminith', שָּׂמָּיתָה, name of heights, i. e. Jehovah; Sept. Συμμαζάς, v. g. Σύμφωνας, Σαμμαζάς, etc,) the name of two Levites.

1. A musician of the "second degree" in the arrangement of the choral services by David (1 Chron. xv. 18), playing "with psalteries on Alamoth" (ver. 20), and harps (xvi. 5). B.C. 1048.

2. One of those sent by Jehoshaphat to teach the law throughout the land (2 Chron. xvii. 8). B.C. 909.

Shemitic Languages. 1. Name.—Among the peoples of Hither Asia lay the root-stem of those languages which are now denominated "Shemitic," or "Semitic" according to the French, which is supposed to have been spoken by the descendants of Shem. The ordinary denomination of these languages, in earlier times, was "the Oriental languages." This was employed by Jerome, and is still used to some extent in modern times. As long as the other languages of the East, which do not belong to the Semitic stock, were not known in the West, this term was perfectly satisfactory, and the more so when Hebrew was viewed as the mother of all languages. But with the introduction of Arabo-Islamic languages, Eastern languages is more developed, and a scientific study of them has spread so widely and extended itself, especially in the academies, not only to the Persian, but also to the Egyptian, Chinese, Armenian, and especially the Indian (Sanskrit), it naturally follows that all these languages belonging to different stems are comprehended under the name "Oriental," so that this has now become an unsuitable term. The necessity arose to find a proper appellation which would distinguish that stem, forming now the Shemitic languages, from the other Oriental languages; and thus different suggestions were made. Leibnitz, e. g., suggested "Arabic." Hupfeld (Hep. Gram. p. 2) proposed "Hither-Asiatic" languages; Renn thinks that, in analogy to Indo-European, "Le véritable nom des langues qui nous occupent serait Syro-arabes." Neither of these suggestions prevailed; but the term "Shemitic," proposed by Schlözer in 1781, and recommended by Eichhorn (Algem. Bibl. der Spr. der Bibl. Litt. viii. 693, 694), is now general. This latter term is based on the fact that in Gen. x. 21—22 the Hebrews, together with the other tribes belonging to this stem, are derived from Shem. But, like the former terms, the latter was also opposed, especially by Stange in his Theol. Synmikata (1802), pt. i. p. 1—39. "And, indeed," says Bleek, "it must be acknowledged that if we regard the Semitic languages as forming a distinct stem, there is no quite so much to be said in favor of it. We there read (Gen. x. 22) 'The children of Shem: Elam, and Assur, and Arphaxad, and Lud, and Aram.' Of these, Arphaxad is described as the grandfather of Eber, and Eber as the father of Peleg and Joktan, the latter of whom is described as the father of the following names, the names of many Arab tribes; while Peleg is spoken of in ch. xi as the great-grandfather of Terah, the father of Abraham, so that Arphaxad may be regarded as the progenitor of the Hebrews and of other tribes related to them by language. Aram, also, as the progenitor of the Arameans, would belong to this language-stem. On the other hand, Elam certainly does not belong to it, but to the same stem as the Persians; the same may probably be said of Assur and also of Lud, who may, with Josephus, regard as the parent of the Lydians. On the other side, however, we find the Canaanites and Phoenicians (x. 15—19), the Ethiopians (Cush or Ethiopia), the Arabian, and Median (Eve, and Javan) rising up to Ham, although there is no doubt that so far as language is concerned they belong to the same stem as the Hebrews and Arameans." From Bleek's statement it will be seen that the term "Shemitic" does not serve all purposes. True as this is, yet, in default of a better term, the term "Shemitic" languages has been retained, and is now current, with the distinct understanding of its being a false and merely conventional expression.

II. Division.—Viewing the Shemitic languages from a geographical point of view, they may be divided into three principal branches. Thus we have: (a) The Northern or North-eastern branch, the Aramaic; (b) The Southern, among which the Arabic is the chief dialect, and with which the Ethiopic is also connected: (c) The Middle, the Hebrew, with which the Canaanitish and Phoenician (Punic) nearly coincide. With this division, Renan says, corresponds the one which we may call the historical, according to which the Hebrew would acquire an independent place, external to that of the other languages, in the history of the world, and in the development of languages. But the true history of languages, as known to us, is contained in the history of the consonants (Histoire des Lang. Sem., p. 108). The writer of the art. Shemitic Languages in Kitto's Cyclopaedia, Mr.
Not the less do we find in the whole grammatical construction, as well as in particular instances of grammatical formation and structure, the greatest and most surprising agreement between the various Semitic languages or dialects; thus we have but two genders, and these are also distinguished in the second and third persons of the verb. In the inflection of verbs they have only two moods (commonly considered to be tenses); but these are strongly contrasted by the position of the persons at the end or at the beginning: the so-called perfect for the completed or actual, and the imperfect for the incomplete or hypothetical, without decidedly giving expression to the tenses by peculiar forms. Nouns are not declined by means of case-endings, but the genitive is expressed by closely combining two words, and other cases by using prepositions, while the pronouns have mere suffices for the oblique cases. Finally, they are characterized by poverty in the particles, and consequently they have their clauses formed with extreme simplicity; and they are defective in the structure of sentences, at least if they are judged by the standard of the Latin and the German languages. Considering all these facts, they plainly show “that one original language lies at the foundation of them all; that in early times—antiquity, however, to all our historical knowledge of them—these nations certainly all spoke one language, which has in later periods, as they separated one from the other, developed into these various dialects” (Bleek).

IV. Comparison of the Semitic Languages with One Another.—When we enter on the consideration of the mutual relation, we find that by far the richest and most developed of the Semitic languages is that of the South, known to us as

1. The Arabic.—Referring the reader to the Arabic Language in this Cyclopaedia, we will only make a few general remarks. Before the time of Mohammed it was confined to Arabia, and scarcely cultivated except in poetry; but along with Islam it has spread itself over the greater part of Asia and Africa, and has unfolded its great wealth in a very comprehensive literature, which extends to almost all the domains of knowledge. Even in the earliest times it is possible that this dialect was separated from those with which it is allied, though the traces of this are few. The most marked is the form יִבְּרָנָה (Gen. x, 26), the designation of a district of Arabian Felix, having the article prefixed, which has also been preserved elsewhere in some Hebrew documents, as in Prov. xxx, 31, דִּבְּרָנָה; Josh. xv,
The father spoke audibly to him from the heavens. Thus consecrated, it became a celestial language, a holy tongue, a chosen vehicle which conveyed the thoughts of God and the purposes of eternal love to the sons of men.

The Aramaic language may be said, in general terms, to have been distinguished into the Eastern and Western Aramaic. Of these a full account is given in this Cyclopedia under the respective heads of CHALDÆA, LATE, Aramaic, Development. But the present writer was won over by a prominent authority (London, 1836) to the theory that the Aramaic dialects were not two, but three. The Eastern Aramaic was written in a square alphabet, and the Western in a cursive or Semitic alphabet. The latter is the form in which the ancient language is still spoken in Syria (see Syrian Grammar, by E. R. Young). The traditional description of the Aramaic language is not without its difficulties. The term "Aramaic" is used in two senses: (1) as a designation of the language written in square letters, and (2) as a term applied to the language written in cursive letters. The latter usage is the more common.

(1) The Samaritan.—This dialect occupies an intermediate position with reference to Hebrew and Aramaic, and is particularly characterized by changes in the guttural, also by containing many non-Semitic (Cathartic) words. The Samaritans have no means of distinguishing between the Hebrew letters ו and ש; they have no final or dative forms, like the Hebrews, for any of the letters, but use the same form under all circumstances. The character used is the most ancient of the Semitic characters, which the Samaritans retained when the Hebrews adopted the square character. Few remains of this dialect are extant (comp. the articles Samaritan Language, Literature, etc.).

(2) The Subian or Nazarean.—This language, known as yet only from the Codex Nazarensis, also called The Book of Adam (edited by M. Norberg, Göttlingen, 1812), and the Bucher (Ludw. and Braun., 1879), occupies a place between the Syrian and Chaldean, makes frequent changes in gutturals and other letters, is in general incorrect in spelling and grammar, and has adopted many Persian words. The MSS. are written in a peculiar character; the letters are formed like those of the Nestorian Syrian, and the vowels are inserted as letters in the text.

(3) The Palmyrene.—Of this dialect no specimen is now extant, except some scanty fragments as are contained in the Palmyrene inscriptions, for an account of which see D. S. Langdon, Palmyrene Inscriptions, ibid. (Lond. 1753), interpreted independently by Barthelmy in Paris, and better by Swinton in Oxford. Some more specimens were given by Eichhorn, Marmora Palmyrenena Explicata (Göttingen, 1827, 4to). The inscriptions are chiefly bilingual—i.e., in Aramaic which is much like the common dialect, and in Greek—of the earliest being A.D. 49, but most of them being in the 2d and 3d centuries.

(4) The Old Phoenician, together with Punic.—A document of some size in the old Phoenician was first discovered in 1855, communicated by Dr. Thomson, of Beirut, and purchased by the duc du Lysnes for the Louvre. Rödiger, S. Hitzig, Schneider, Deroy, Ewald, and Munk endeavored to interpret it. More recent is the sacrificial tablet discovered at Marseilles, explained by Movers (Breslau, 1847), Ewald, and A. C. Judas. Of chief importance for the Punic are the Punic passages in the Phænix of Plautus, illustrated by Movers and Ewald. The rest of the Phoenician and Punic inscriptions (Belutsch, etc.) have been collected and illustrated by Gesenius in his Mon. Ling. Phen. (Lips. 1837, 3 vol.), to which must be added forty-five inscriptions by the abbe Bourguet (Paris, 1852, fol.), deciphered by the abbe Bäreg. See PHENICIA.

Linguistic Literature.—A. Chaldean. A confusion over the modern form will only give some of the modern.

I. Grammarians. — Harris (W. E. Elements of the Chaldean Language, etc., Lond. 1822); Nolde, An Introduction to Chaldean Grammar, etc. (ibid. 1821); Rigge (E. L.), Manual of the Chaldean Grammar, etc. (ibid. 1840); Luzzatto and Kriger, Grammatik der biblisch-chaldäischen Sprache (Leips. 1871); Chaldean Grammar, with a Grammatical Praxis, etc. (Lond. ed. Ragger). II. Lexicography. — In this department the Thesaurus is the greatest work: (Butler, Lexicon Chaldæum; Hitzig, Der Budaemische, et Rabbinische Basal (1810); new ed. by Fiecher, Leips. 1866). Ss.; Schuol, Aramäisch-rabinisches Worterbuch (Leips. 1842); Dietrich, Aramäisch-rabinisches Wörterbuch über die Targumim (Leips. 1867); id. Seb. und chald. Worterbuch (ibid.), now in course of publication.

IX. Syria. — I. Grammarians. — Cowper (B. H.), The Principles of the Aramaic Grammar (London, 1850); Grammatica Syriaca (Halé, 1687-91); Nolan (F.), An Introduction to the Syriac Language, etc. (Lond. 1891); Phillips (C.), Syria Grammatica (N. Y., 1885); Schier (J.), Aramäische Grammatik, etc. (Bonn, 1886); Schier and Rämmer-Hüttchening, Syriac Grammar (N. Y., 1886); Syriac Reading-Lessons, etc. (Lond. ed. Bagster). II. Lexicography. — Lassen, Lexicon Syriacum (Leips., 1693); Gubitz (A.), Lexicon Syriacum, contres omnes N. T. Sacra, Dogmata et Particularia, etc. (Hamb. 1667): a neat and improved edition by Realp, and an improved edition by Böckle (Leips., 1836); Hefner (J. H.), Lexicon Syriacum, etc. (Leips., 1878). See also the following chemical affinities. C. Samaritans.—See Samaritan Language, Literature, etc. D. The Sabian or Nazarean.—Norberg (M.), Onomastica Codicis Nazaræi (Lond. 1817, 2 vols.); id. Lexicon Codicis Nazaræi (ibid. 1816). E. The Pheonicians.—Barthelmy, Réflexions sur l'Alphabet et sur la Langue dont on se servit autrefois à Palmyre, in the Memoires de l'Académie des Inscriptions, tom. xxvi. F. The Pheonicians.—Levy (D. M.), Lettres de Bartheberch (Leips., 1864); Schröder (F.), Grammatische Untersuchungen über die philistische Sprache, etc. (Halé, 1869); Wottek (H.), Einleitung zu Ezechiel, in the Zeitschrift, d. deutschen Morgen. Gelehrtenb. (1867), xi. 75. 3. The third main branch of the Semitic, the Middle-Semitic, is not so well known to us as the Hebrew language (q. v.). As this is the most important to the student of Sacred Writ, we will give a short outline of the same, following its history through the different stages, till, like the Arabic, it became an object of philological study. (1) Name and Origin.—The Hebrew language takes its name from the name of its descending people, who are ethnographically called Hebrews, and who spoke this language while they were an independent people. In the Old Testament, it is poetically called the Language of Canaan (תַּעַבְּדָה, Ἰαβηλίς, or Ἰαβηλίς, Isa. xix. 18, "emphatically the language of the holy land consecrated to Jehovah, as contrasted with that of the profane Egypt," as Havernick expresses it), and also the Jeus' language (יוֹרָה, אֶמֶּשׁ, 2 Kings xviii. 26; Isa. xxxv. 19, 10; Jer. xix. 23, 4); from the kingdom of Israel. The name of the Hebrew language now occurs in the Old Testament, since in general there is rarely anything said of the language of the Israelites; it appears in the Dialogue to Esclus, Εβραῖος, and in Josephus (Ant. i. 1, 2), "אֲבֵרָבֶּא, καὶ αὐτὸν Ἰαβηλίαν." In the New Testament, Ἑβραῖος (John v. 2; xix. 17, etc.) and Ἑβραϊκός (Acts xx. 40; xxi. 12, 36; xxxi. 14) denote the Aramaic, which was spoken at the country at the time. In later Jewish writers (as in the Targumists) the Hebrew language is called אֲבֵרָבֶּא (the sacred tongue), in contrast with the חָוֵי (the ordinary language).

(2) Antiquity of the Hebrew Language.—On this point, and the question whether the Hebrew was the primitive language, there is a great diversity of opinion. "It is clear," says Havernick (Intro. p. 128), "that this question can be satisfactorily answered only by those who regard the Biblical narrative (viz. Genesis, xi, 1 sqq.) as true history. Those who, like the mass of recent interpreters, look at it from a mythical point of view cannot possibly obtain any results. Gesenius says that, as respects the antiquity and origin of the Hebrew language, if we do not take this mythical ac-
count, we find ourselves totally undeserved by the historian.

Returning, then, to the ancient view of this pas-
sage, we find that most of the rabbis, the fathers, the
older theologians—Buxtorf [John], the son (Disser.Phil.
Theol. [Basil. 1662]. Diss. 1), Walton (Proleg. iii, 3 sq.),
Pfeiffer [A.], (Decas Select. Exercit. Bibl. in his Dubia
tra. in Liceo]. 1, 2, 3), Carpozzi (Rit. Scrr. p. 174 sq.), among the moderns—and,
with some limitation, Pareau, Hiërvnick, Von Gerlach,
Baumgarten, and others, believe that Hebrew was the
primitive language of mankind, while some contend that
if any of the Asiatic tongues may claim the honor of
being the language of our race, the same should be
given to the Sanscrit. Between these two opinions
the question now rests, and “it is astonishing,” says
Prof. Müller (Science of Language, i, 133), “what
an amount of real learning and ingenuity was wasted on
this question during the 17th and 18th centuries, ...

It might have been natural for theologians in the 4th
and 5th centuries, many of whom knew neither Hebrew
nor any language except their own, to take it for grant-
ed that Hebrew was the source of all languages; but
there is neither in the Old nor in the New Test, a single
word to necessitate this view. Of the language of Adam
we know nothing; but if Hebrew, as we know it, was
our language, it could not have arisen from the
languages of our race; it should be considered a
language of Adam, or of the whole earth ‘when the whole
earth was still of one speech.’ The first who really
conquered the prejudice that Hebrew was the source of
all language was Leibnitz, the contemporary and rival
of Newton. There is as much reason,” he said, “for
supposing Hebrew to have been the primitive language
of mankind as there is for adopting the view of Sera-
pius, who published a work at Antwerp, in 1550, to prove
that Dutch was the language spoken in Paradise.”

In a letter to Tenzel, Leibnitz writes: “To call Hebrew
the primitive language is like calling the branches of
trees a primitive branch, or like imagining that in some
country bewn trunks would grow instead of trees. Such
ideas may be conceived, but they do not agree with the
laws of nature and with the harmony of the universe—
that is to say, with the Divine Wisdom.”

(3.) Character and Development of the Hebrew Lan-
guage.—It is a natural characteristic of the Semitic
languages, the Hebrew, whether regarded as the primitive
language or not, has for the most part retained the stamp of high
antiquity, originality, and greater simplicity and purity
of forms. In its earliest written state it exhibits, in
the writings of Moses, a perfection of structure which was
never surpassed. As it had, no doubt, been modified be-
 tween the time of Abraham and Moses by the Egyptian
and Arabic, so in the period between Moses and Solomon
it was influenced by the Phoenician, and, down to the time
of Ezra, continued to receive an accession of exotic terms
which, though tending to enlarge its capabilities as a
spoken and written tongue, materially affected the primi-
tive simplicity and purity of a language compared with
which none may be said to have been so poor, and yet
none so rich. But with the period of the captivity there
arose an entirely new literature, strikingly different from
the earlier, and this is to be traced to the influence ex-
certed by the Aramaic tongue upon the Hebrew, which
had previously been developing itself within restricted
and limited limits. This was the introduction to its gradual
decay, which did not fully manifest, however, until the
commencement of the Chaldaean period. Not only did
the intrusion of this powerful Aramaic element greatly
vastish the purity of the Hebrew words and their gram-
matical formation, older ones having been altered and
supplanted by newer ones, which are Aramaic for the
most part;” It also became the medium for the teaching
of the old language, and it enfeebled its instinctive operations,
until at length it stifled them. The consequence was
that the capacity of observing grammatical niceties in the
pure Hebrew was entirely lost; partly the distinc-
tion of prose and poetical diction was forgotten; partly
the standard of purity was lowered; partly the
Hebrew and other compositions, many elements
which had already died out of the language were repro-
duced as archaism.

(4.) Decay of the Hebrew Language.—But the great
crisis of the language occurs at the time of the captivi-
ty of Babylon. Then, as a spoken tongue, it became
depthly tinged with Aramaic. The Biblical Hebrew,
aviding in the imperishable writings of the prophets,
continued to be the study of the learned; it was heard
on the lips of the priest in the services of religion, and
was the vehicle of written instruction: but as the me-
edium of common conversation it was extensively affect-
ed, and, in the case of multitudes, superseded, by the
idiom of the nation among whom Providence had cast
their lot. So an Aramaized Hebrew, or a Hebraized
Aramaean, continued to be spoken by such of them as
resettled in Palestine under Ezra and Nehemiah, while
the yet greater number who preferred the uninterrupted
establishment of their families in Babylonia fell enti-
early into the use of Aramaic.

This decline of the popular knowledge of pure He-

* This is especially seen in the coinage of new words for abstract
ideas, where the means of prefixed letters added, as בִּלְעַבַּד for בֵּית (Psa. cvi. 12): יָשָׁבַע for יִשָּׁבַע (Ezek. xvi. 18, 30): יָשָׁבַע (Ezra I. 6; Esth. v. 8, 7, 5), etc.
† This is shown by the increasing use of the scriptio plena,
as בֵּית for בֵּית (1 Chron. iii. 12), for בֵּית (2 Sam. vi. 9); the reduction of the dagesh forte in sharpen-
ed syllables by inserting a vowel, as הֶמְשָׁכָה for הֶמְשָׁכָה (xviii. 5, 6).
‡ This is of great value as the sign of the accussative, and as meaning "with"—for instance, Jer. i. 16; xii. 10; xx. 11, etc.; the use of ש to mark the accussative of the
drive (1 Chron. v. 96; xvi. 87; xxix. 20, 29, etc.); the use of דְּ for דָּבָר instead of דָּבָר; the use of Aramaic forms of infec-
tion, as בָּשָׁל for בָּשָׁל (Jer. iv. 30): בָּשָׁל for בָּשָׁל (ii. 33, iv. 5; iv. 19, etc.); the
Comp. בָּשָׁל (Pl.), "to be afraid" (Ezra iv. 4, elsewhere only the substan
tive בָּשָׁל in poetry); בָּשָׁל, "to reject with loathing" (1 Chron. xxvii. 9; 1 Chron. xiv. 16, xix. 11, earlier and later in Gen. xxxviii. 18, 20, etc.); בָּשָׁל, "to act cunning-
ly" (Mal. i. 4; Ps. cxv. 25, from Gen. xxviii. 18 or Num. xxv. 16, etc.)

** "And all the inhabitants of the earth were of one
language, and of one speech; and they spake the holy
language by which the world was created at the
beginning! (Targum on Gen. xi. 1; comp. also Rashii
and Aboth Eruvin, ed loc.)

The former of the Church have never expressed any
doubt on this point. Jerome (d. 420), in one of his epis-
tles to Damasius, writes, "The whole of antiquity (an-
nerwege) affirms that Hebrew, in which the Old
Testament is written, was the beginning of all human speech;" and in his Comm. in Soph. c. 3, he says, "Linguam He-
brum Abrahae ago, non ab urbe, sed ab urbe sem-
plurum eorum gentium, etiam genere mercenarii (Virges
in 254), in his eleventh homily on the book of Numbers, ex-
presses his belief that the Hebrew language, originally giv-
en through Adam, remained in that part of the world which
was the chosen portion of God; not left, like the rest, to
one of his angels. Chrysostom (d. 404) says, "God left in
Zerubabel’s house the original language as a perpetual memory of his
judgment" (ὅτε οἱ ἐδώρ ἔμεν τῇ άκτῃ εὖ καὶ διδαχῇ, πο-
ὺς ἔβλεπες καὶ δῷν αὐτῷ ἀλήθειαν καὶ δόξαν ἐν κατα-
δοχέας [Hom. xxx. in Gen. p. 800, ed. Monti.], and Au-
guineus (d. 480), in his De Civitate Dei, xvi. 11, "Quin
linguam Dei, in qua nulli non immersi sunt, ipsi 2, non
communi, delinquere Hebrae non euntescan" (i.e. his fam-
ily [Hebrew’s] preserved that language which is not un-
referenced; they are not of the common race; they are
not an imperishable: comm. delinquere Hebrae non eun-
tescan)." (I.e. his family [Hebrew’s] preserved that language which is not un-
reverenced; they are not of the common race; they are
not an imperishable; comm.)
brew gave occasion to the appointment of an order of interpreters (neturegmadin) in the synagogue for the explication of the Scriptures in this more current dialect, as can be seen from Neh. viii. 8, where we read, "They [the priests and Levites] read in the book, in the law of God in the vernacular tongue, and appended thereto the sense, and caused them to understand the reading," where the words in the vernacular tongue are given in an interpretation added, with an explanation in Chaldean, the vulgar tongue, as appears from the context and by a comparison of Ezra iv, 18 and verse 7. Accordingly, the Talmudists have already completely explained our passage סננה וּלך וְלִכְיָא הוּא, and so also Clericus, Dathe, etc. See Targum.

But while these changes were taking place in the vernacular speech, the Hebrew language itself still maintained its existence. It is a great mistake to call Hebrew a dead language. It has never died. In the days to which we are now referring, it was still loved and revered by the Jewish people as the "holy tongue" of their patriarchs and prophets. Not only the Talmudic sayings and canonical Scriptures, but the prayers and hymns of the Temple and synagogue, were, for the most part, written in it, and even the inscriptions of the coinage retained both the language and the more antique characters, in preference to those more recently introduced by Ezra.

(5.) The Western Hebrew.—About the time when the language underwent this internal change, it was also changed externally. That we have not the original Hebrew characters in MS. and printed texts of the Bible is evident from a tradition we have in the Talmud that "at first the law was given to Israel in the Hebrew writing and the holy tongue, and again it was given to them in the days of Ezra in the Assyrian writing and the Syrian tongue. They chose for the Israelites the Assyrian writing and the holy tongue, and left to the Talmud (i.e. the Samaritans) the Hebrew writing and the Syrian tongue. . . . And although the law was not given by Ezra's hand, yet the writing and language were called the Assyrian" (Sanhedr. xxii. 2; xxii. 3). This Assyrian writing (גַּדְלָה בְּלָבָא), called "square writing" (גַּדְלָה בְּלָבָא), "correct writing" (גַּדְלָה בְּלָבָא), and by the Samaritans "Ezrah's writing" (גַּדְלָה בְּלָבָא). We must suppose that the square character, which came into use after the exile, only gradually superseded the earlier characters; in the Maccabean coinage the ancient Hebrew character was used, and while we may trace back the origin of the new characters nearly to the times of Ezra, certain it is that at a later time it was perfected in its present form, and long before the time of the Talmud, since there we find directions given concerning the writing of the alphabet, of which we will speak farther on.

(6.) Tradition; Period of the Hebrew Language.—It is chiefly among the Jews of Palestine that we are to seek the preservation of the knowledge of the Hebrew language. Though the Hebrew ceased to be even a written language, yet it preserved for practical use the usages of worship and study of the old Hebrew documents became for them an indispensable duty, for the affinity of the language they used had offered them peculiar facilities. Hence, as early as the book of Sirach (Ecclesiastics), which was probably written between B.C. 250 and 300, mention is made of the study of Scripture in the vernacular tongue, and the use and fairness of its words and of its "light and pleasant" language.

The more erudite study of Hebrew Scripture was prosecuted in Palestine and Babylonia from the days of Ezra, not only by individuals such as Ezra, but also in formal schools and academies, the academies of Jerusalem and Samaria (cf. Targum Jonathan et Hebreorum characters fuerint). See also Jerem on, in Ezra ix, 4; Pss. ii (iii, 530), and also ḫrēmathai, which were established there before the time of Christ. The chief seat of these at first was principally at Jerusalem, then after the destruction of this city by the Romans it was transferred to Jamnia or Jabneh, under Johanan ben-Zachai (q. v.), till under Gamaniel III ben-Jehudah I (A.D. 180-220) Tiberias became the seat of learning. Among the teachers of Tiberias, rabbi Jehudah the Holy, or hak-Kodesh (q. v.), the compiler of the Mishna, obtained a remarkable reputation in the latter half of the 2d century. After his death, the seat of this scriptural erudition was once more transferred to Babylonia, where, with reference to this incident, we read of the Euphrates—Sora, Pumbadithas, and Nahardea—attained pre-eminent to high esteem. Still, along with these, the Palestinian schools subsisted uninterruptedly, especially the school at Tiberias, and to the labors of these schools are due in part the Targums, but principally the Talmud and the Masora.

The activity of these schools took different shapes at different periods, and into four of these periods it may be divided: 1. The period of the more ancient Sopherm (scribes, סופרمين), from the close of the canonical to the ruin of the Jewish commonwealth. They settled fixedly the external and internal form of the sacred text (תונְסֶרְם), the correct writing and reading, the arrangement of the books and their sections, the numbering of the verses, words, and letters, etc. 2. The period of the Talmudists, from the 2d to the 6th century of the Christian era. 3. The period of the Masora, from the 6th to the 9th century. 4. The period of the Grammarians and Expositors, from the 9th to the 16th century. Following the example of the Arabians, they endeavored to lay a scientific foundation for Hebrew philology and for understanding the text of the Bible, by means of various labors in grammar and lexicography, including the comparison of the Aramaic and Arabic dialects.

For the history of the philological study of the Hebrew language, the reader is referred to the art. Hebrew Language in this Cyclopaedia, where he will also find more details.

V. Relation of the Semitic Languages to the Indo-European Languages.—One of the most vexed questions of comparative philology is that of the relation of the Semitic family to that of the Indo-European. As early as the year 1778 Nathaniel Brahis釜ed, in his Grammar of the Bengali Language, said, "I have been astonished to find the similitude of Sanscrit words with those in the Semitic..." The Semitic languages are connected in technical and metaphysical terms, which the mutualisation of refined arts and improved manners might have occasionally introduced, but in the main groundwork of language, in monosyllables, in the names of numbers, and the application of such things as would be first discriminated in the immediate days of civilization. When the Sanscrit became better known in Europe, scholars like Adelung, Klaproth, Bopp, etc., in their studies on comparative philology, undertook to trace out the affinity between these two families. Unable as were their theories, yet they paved the way. With greater precaution Gesenius entered upon the arena of comparative philology. Being persuaded that the Hebrew has no relation with the Indo-European languages, the main object of his comparisons was to find out analogies, while in such words as appeared to him to have some similarity with the oldest original languages of Eastern Asia, as סֵבִּית, seven, Sanscrit, saptā, "seven, a youth, Sanscrit, nar, etc., he either perceived marks of early borrowings or a play of accident. First, however, we shall further consider the unhappy idea of a Sanscrito-Semitic stem, which divides itself into the Sanscrit, Medo-Persian, Semitic, Greco-Latin, Germanic, and Slavic families. But the
advancement in the science of the Indo-European languages has shown that there is no connection whatever between these two languages; and even Delitzsch's endeavor has not been able to prove the contrary, although he must be admitted that he has first of all brought about (in his Jersu'el se Isgqo in Grammatica et Lexigraphiaph Erabrac [Grimes, 1887]) some system and method in the comparison of these languages. Of still less value is the endeavor of E. Meier, who, in his 1. Wurzelworterbuch (Mannheim, 1840), seeks to trace back the Semitic triliteral stems to the Semitic triliteral roots and from their fundamental meanings to derive the meanings of our Hebrew words in their various modifications. "This," as Bleek remarks, "is an attempt which merits attention, although he certainly brings forward many things which are uncertain, and even improbable."

Without enlarging any further upon this question, which is to this very day a matter of dispute, we will only mention those who made the subject a matter of investigation. Among those who believe in a relation between the Semitic and Indo-European languages we mention Ewald ("Austl. Lern. der hebr. Sprache" [8th ed. 1857, p. 76], "Austl. Lern. der hebr. Sprache" [6th ed. 1863, p. 75]), Lassen ("Indische Alterthumskunde" [2nd ed., I, 637 sq.], Lepsius, Schwartzew, Benfey, and Bunsen, who, with the help of the Egyptians, tried to bring about the result; M. Müller and Steinhals, who believe not only in the possibility, but also in the probability, of such connections; Eugene Burnouf and Pictet, who admit it with some reserve. To these we may add the names of Ascoli, R. V. Rümmer, and Renan, and more especially of that of Friedrich Delitzsch, who, in his work (the latest, so far as we know) Studien über indogermanisch-semitische Wurzelverwandtschaft (Leipsig, 1875), has not only given a résumé of the labors of his predecessors and a list of their works, but has also taken up the subject of the relation between these two languages and between their respective heads, which is the subject of this Cyclopaedia and which I have attempted to give in this article. The more recent will be found in Friederic's Bibliotheca Orientalis (London, 1876–78).

VI. Literatur.——See, besides the articles "Semitic Languages" in Kitto's Cyclop., and Smith's Dictionary of the Bible, the introductions to the Hebrew grammars of Gesenius, Böttcher, Presswerk, and Bickell (Engl. trans. by Curtiss [Leipsig, 1877]). The literature of the Semitic languages is very rich, and the respective heads in this Cyclopaedia and in this article are most abundantly referred to.

Shemenah Esebh is a collection of fourteen editorials, called Tepushlah, or prayer k'ri'k'uph, which every Israelite is bound to say every day. They constitute a very important part of the Jewish liturgy, and in their present form must have originated about A.D. 100, although many parts belong to the pre-Christian period. In the present form they are divided into two parts, one having been added by Samuel the Little (q.v.) against the Sadducees, the so-called پیتیت hid listed or کرکر یہ, i.e. the prayer against the Minim, a name applied to Christians. These benedictions are as follows.

1. "Blessed art thou, O Lord our God, and the God of our fathers, the God of Abraham, the God of Isaac, and the God of Jacob, the great God! powerful and triumphant in the midst of his holiness, full of loving kindness and of saving benefits; the Creator of all things; who, remembering the piety of the fathers, will send a redeemer to thy people Israel, the most holy, the just, and the God of mercies, to save us unto life, O King! thou who delightest in life, and write us in the book of life for thy sake, O God of life. O King, thou art our Supporter, Saviour, and Protector. Blessed art thou, O Lord! the shield of Abraham."
for we trust in thee. Blessed art thou, O Lord! who art the support and confidence of the just."

14. "Oh, be mercifully pleased to return to Jerusalem, thy city; and dwell therein, as thou hast promised. Oh, rebuild it shortly, even in our days, a structure of everlasteth; fame, and establish the throne of David thereon. Blessed art thou, O Lord! who rebuildest Jerusalem."

15. "Oh, cause the offspring of thy servant David speedily to flourish, and let his horn be exalted in thy salvation; for we daily hope for thy salvation. Blessed art thou, O Lord! who causeth the horn of salvation to flourish."

16. "Hear our voice, O Lord our God! Oh, have compassion and mercy upon us, and accept our meekness, and our sacrifices and oblations, and all our offerings upon thy altar. Let our hearts be changed into thy heart, and let us worship thy people Israel in mercy. Blessed art thou, O Lord! who hearkenest unto prayers."

17. "Graciously accept, O Lord our God! thy people Israel, and have regard unto their prayers. Restore the service to the inner part of thine house; and accept of the burnt-offerings of Israel, and their prayers with love and favor. And may the service of Israel, thy people, be ever pleasing to thee. Oh that our eyes may behold thy return to Zion with mercy. Blessed art thou, O Lord! who restoreth thy divine presence unto Zion."

18. "We bow down before thee, because thou hast heard us, O Lord our God, and the God of our fathers for ever, and ever. The Rock of our lives, the Shield of our salvation art thou, from generation to generation. We bless thee, O Lord, with thy praise; because of thy love, which are in thy hand, and for our souls, which we commit to thee, and for thy wondrous works, which we witness with our eyes. Thou dost crown us with mercies at all times—everlasting, morning, and noon. Graciously God! because thy mercies are not with us, merciful Lord! because thy kindnesses are never done, we trust in thee to all eternity."

19. "Oh, grant peace, happiness, and blessing, grace, favor, and mercy unto us, and all thy people; let not all of us be utterly destroyed. O Lord our God, with the light of thy countenance; for by the light of thy countenance hast thou given us, O Lord our God, the light of life, benevolence love, righteousness, blessing, mercy, life, and peace; and may it please thee to bless thy people Israel at all times, and thy peace."

In the prayer-books of the so-called Reformed Jews, these benedictions and all such as allude to the bringing back to Jerusalem and to the Messiah have undergone very great changes. The first and last three are considered to be the most ancient. They are undoubtedly of the Sophistic age, and probably belong to the time of Solomon. The second is to be found in five of the six editions, extending over a period of three hundred years. The benedictions are mentioned in the Mishna: Rosh hash-Shanah, c. iv.; Berachoth, iv. 3.; Tosiphta Berachoth, c. iii.; Jerusalem Berachoth, c. ii.; Megillah, 17 a. See Zunz, Gottesdienstliche Vorträge der Juden, p. 367 sq.; Schürer, Lehrbuch der neustamentlichen Zeitgeschichte, p. 499 sq. (B. F.)

Shem-Tob (שמיהוֹ, i.e. good name), a name common to many Jewish writers, of whom we mention the following:

1. BEN-ABRAHAM IBN-GAON, a famous Cabalist, born 1283, died about 1392, the author of many Cabalistic works.

2. BEN-SHEM-TOB, who died in 1430, is the author of Ben Shem-Tob, the Book of Faithfulness, in which he attacks the Jewish philosophers Aben-Ezra, Maimonides, Levi ben-Gershom, etc., and denounces the students of philosophy as heretics, maintaining, however, that the salvation of Israel depends upon the Cabala. He also wrote "תֵּיכוֹנָךְ לַאַדָּם," or homilies on the Pentateuch, the feasts and fasts, etc., in which the Cabalistic doctrines are fully propounded.

3. ISAAC SHAPRUT, a native of Tudela. He was a celebrated philosopher, physician, and Talmudist, and wrote, under the title of "The Touchstone," a polemical work against Christianity, inveighing bitterly against the doctrines of the Trinity, incarnation, transsubstantiation, etc. One portion of the book consists of a translation of Matthew's Gospel into Hebrew, said to be so unfairly performed that, among other faults, the names in the genealogy are grossly misspelled, and are therefore of no avail for comparison with the Old Test. To each chapter are subjoined questions for Christians to answer. An appendix to the work is called "Replies to Alfonso the Apologist." The MS. is very rare. It was dated at Toulouse, Old Castle, 1340. He also wrote Remarks on Aben-Ezra's Commentary on the Law under the title "The Garden of Pomegranates, " explaining the allegories of the Talmud.

Shemul'ei (שֵׁם לוֹאֵי, heard of God, the same as Samuel [q. v.]), the name of three Hebrews.

1. (Sept. אֱלֹהִי תִּם). Son of Ammihid and commissioneer from the tribe of Simeon, among those appointed by Moses to divide Palestine (Num. xxxiv. 20). B.C. 1018.

2. (Sept. מְעֹנָה). A more correct Anglicism (1 Chron. vi. 38) of the name of the prophet Samuel (q. v.).

3. (Sept. מְעֹנָה). A descendant of Tola, the son of Issachar, one of the chiefs of that tribe in David's time (1 Chron. vii. 2). B.C. 1014.

Shen (Heb. with the art., hash-Shen, שֶׁן, the tooth; Sept. ἀσθέναῖα, Vulg. Seni), a place mentioned only in 1 Sam. vii. 12, defining the spot at which Samuel set up the stone, called the Millo, between the Philistines. The pasture had extended to "below Bethcar" and the stone was erected "between the Mizpah and between the Shen." The Targum has Shinama. The Pehothi-Syria and Arabic versions render both Bethcar and Shen by Beiti-Jason, evidently following the Sept., which appears to have read תִּמְעֹנָה, yashan, i.e. old. The name indicates not a village, but merely a sharp rock or large rock in the vicinity, like Seneah (1 Sam. xiv. 4). See EBEREHEL.

Shen'azar (שֶׁנֶּאֶזֶר, bright tooth [Gesenius], or splendid leader [Forst.); Sept. יִבְשָׂר, v. r. יִבְשָׂר, fourth named of the seven sons of King Jonniah, or Jehokrin, born during his captivity (1 Chron. iii. 18). B.C. post 606.

Shen'ir (Heb. Shenir). [So in Deut. iii. 9; Cant. iv. 8, but in 1 Chron. v. 28, Ezek. xxvii. 5, Senir, צְנֶר], Gesenius, "coat of mail, or cataract." Forst., "either a projecting mountain-peak or snow-mountain;" Sept. חֵינוֹ, v. r. חֵינוֹ, the Amorithian name for the mountain in the north of Palestine (Deut. iii. 9; Ezek. xxvii) which the Hebrews called Hermon, and the Phoenicians Galilea; apparently it was a name denoting the mountain than the whole. In 1 Chron. vi. 33, and Cant. iv. 8, Hermon and it is mentioned as distinct. Abulfeda (ed. Köhler, p. 146, quoted by Gesenius) reports that the part of Antilebanon north of Damascus—that usually denominated Jebel est-Shuriyk, "the Fast Mountain"—was in his day called Senir. The use of the word in Ezekiel is singular. In describing Tyre we should naturally expect to find the Phoenician name (Sirion) of the mountain employed, if the ordinary Israelitish name (Hermon) were discarded. That it is not so may show that in the time of Ezekiel the name of the mountain was by its original significance as an Amorith name, and was employed without that restriction. The Targum of Joseph on 1 Chron. vi. 25 (ed. Beck) renders Senir by תִּמְעֹנָה, of which the
most probable translation is "the mountain of the plains of the Perizites." In the edition of Wilkins the text is altered to "mountain which corrupts fruit" in agreement with the Targums on Deut. iii, 9, though it is there given as the mountain of Sirion. Which of these is the original is it perhaps impossible now to decide. The former has the slight consideration in its favor that the Hivites are specially mentioned as "under Mount Hermon," and thus may have been connected or confounded with the Perizites; or the reading may have arisen from mere carelessness, as that of the Samaritan version of Deut. iii, 9 appears to have done. See ANTILIBANUS.

Sheöl, שְׁאֵולָּה. This Hebrew name for "the place of departed spirits," and the "state of the dead," is used in a variety of senses by the writers of the Old. Test., which it is desirable to investigate, referring to the articles HELL, HADES, etc., for the general opinions of the Jews respecting the continuance of existence after death.

I. Signification of the Word.—The word is usually said to be derived from שְׁאֵל, sheol, "to ask or seek," and may be supposed to have the same metaphorical signification as the orcus rapax of the Latins, or the inanimate sepulcher of English writers. This etymology, however, is rather uncertain, and no aid can be obtained from the cognate Semitic languages, for, though the word occurs in Syriac and Ethiopic, its use is too indeterminate to afford any clue to its origin. We are therefore left to determine its meaning from the context of the most remarkable passages in which it occurs.

The first is (Gen. xxxvii, 35): "And (Jacob) said, I will go down into the grave (יִשָּׁהֶל, shehel) unto my son mourning." The meaning of this passage is obviously given in the translation. There is rather more difficulty in Numb. xvi, 30, where Moses declares that Korah and his company shall go down alive into sheol (תֶּהֶל, shehol), and in ver. 33, which describes the fulfillment of the prophecy. But on referring to Deut. xxxiii, 22, we find that sheol is used to signify "the underworld." "For a fire is kindled in mine anger, and it shall burn to the lowest hell (הַר נֵבֶל, ha-ner nebhel), sheol techithithi); to which the sequel gives the following parallelism: "It shall set on fire the foundations of the mountains;" that is, after that, in the description of Korah's punishment, sheol simply means the interior of the earth, and does not imply a place of torment. In 2 Sam. xxii, 6 the English version stands thus: "The sorrows of hell compassed me about; the snares of death prevented me." The English word "hell" (from the Saxon helde, "to conceal") does not here mean a place of torment, as will at once appear from a literal translation of the passage in which the parallelism of the Hebrew is preserved. "The snares of sheol (יֵשַּׁלְעֵב, shelol veel) encompassed me;" "The nets of death (יֵשַּׁל, yeshol) mokedhash mader) came upon me." Thus viewed, it appears that "the snares of sheol" are precisely equivalent to "the nets of death." In Job xi, 8, there seems to be an allusion to a belief—common among ancient nations—that there is a deep and dark abyss beneath the surface of the earth, tenanted by departed spirits, but not necessarily a place of torment:

Caust thou explore the deep things of God? Canst thou comprehend the whole power of the Almighty? Higher than heaven, and deeper than hell? Deeper than sheol! What canst thou know?

Again (xxxvi, 5, 6), in the description of God's omnipotence:

Sheol is open before him, and there is no covering for the region of the dead.

In Isa. xiv, 9, "sheol from beneath is moved for thee to meet thee at thy coming," the meaning of the prophet is, that when the king of Babylon, whose miserable fate he is predicting, should go down into the underworld, or sheol, the ghosts of the dead would there rise up to meet him with cries and insults. Our English version in this passage renders sheol "hell;" but clearly, the place of torment cannot be meant, for it is said in ver. 18 that all the kings of the nations repose in glory there—that is, "rest in their sepulchers, surrounded by all the ensigns of splendor which the Eastern nations were accustomed to place around the bodies of deceased kings."

These and many other passages which might be quoted sufficiently prove that a belief in futurity of existence was familiar to the Hebrews, but that it was unixed and indeterminate. It is difficult, and in some cases impossible, to determine whether the term sheol, when used in a menacing form, referred to the idea of future punishment or premature death. Hence, while we are led to conclude, with the Articles of the Church of England, that "the old fathers did not look merely to transitory promises," we see that only through the Gospel were "life and immortality brought to light."

II. Is Sheol a Place?—According to the notions of the Jews, sheol was a vast receptacle where the souls of the dead existed in a separate state until the resurrection of their bodies. The region of the blessed during this interval, or the inferior paradise, they supposed to be in the upper part of this receptacle; while beneath, in the depths was Gehenna, in which the souls of the wicked were subjected to punishment.

The question whether this is or is not the doctrine of the Scriptures is one of much importance, and has, first and last, excited no small amount of discussion. It is a doctrine received by a large portion of the nominal Christian Church; and it forms the foundation of the Roman Catholic doctrine of Purgatory, for which there would be no ground but for this interpretation of the word Hades.

The question, therefore, rests entirely upon the interpretation of this latter word. At the first view the classical signification would seem to support the sense above indicated. On further consideration, however, we are referred back to the Hebrew sheol. In the Christian term did not come to the Hebrews from any classical source or with any classical meanings, but through the Sept. as a translation of their own word; and whether correctly translating it or not is a matter of critical opinion. The word Hades is, therefore, in no wise binding upon us; nor can any satisfactory explanation be given of it. The real question, therefore, is, what is the meaning which sheol bears in the Old Test., and Hades in the New? A careful examination of the passages in which these words occur will probably lead to the conclusion that they afford no real sanction to the notion of an intermediate place of state the idea of, but are used by the inspired writers to denote the grave—the resting-place of the bodies both of the righteous and the wicked; and that they are also used to signify hell, the abode of miserable spirits. But it would be difficult to produce any instance in which they can be shown to signify the abode of the spirits of just men made perfect, either before or after the resurrection.

As already seen, in the great majority of instances sheol is, in the Old Test., used to signify the grave, and in most of these cases is so translated in the A. V. It can have no other meaning in the following texts as Gen. xxxvii, 35; xlii, 38; 1 Sam. ii, 6; 1 Kings ii, 6; Job xiv, 13; xvii, 16; and in numerous other passages in the writings of David, Solomon, and the prophets. But as the grave is regarded by most persons, and was more especially so by the ancients, with awe and dread as being the very region of horror and darkness, so the word denoting it so soon came to be applied to the deep and gloomy world which was to be the abiding-place of the miserable. Where our translators supposed the word to have this sense, they rendered it by "hell." Some of the passages in which this has been done may
be doubtful, but there are others of which a question can scarcely be entertained. Such are those as Job xii, 8; Psa. cxxxix, 8; Amos ix, 3) in which the word denotes the opposite of heaven, which cannot be the grave nor the general region or the state of the dead, but hell. Still more decisive are such passages as Psa. ix, 17; Prov. xxiii, 9, in which the fire cannot mean any place, in this world or the next, to which the righteous as well as the wicked are sent, but the penal abode of the wicked as distinguished from and opposed to the righteous. The only case in which such passages could by any possibility be supposed to mean the grave would be if the grave—that is, extinction—were the final doom of the unrighteous.

In the New Test. the word 3γνσδ is used in much the same sense as ξνδευ in the Old, except that in a less proportion of cases can it be construed to signify "the grave." There are still, however, instances in which it is used in this sense, as in Acts ii, 31; I Cor. xv, 55; but in general the Hades of the New Test. appears to be no other than the world of future punishments (a. g. Matt. xi, 23; xvi, 18; Luke xvi, 23). The principal arguments for the intermediate Hades as deduced from Scripture are founded on those passages in which things "under the earth" are described as rendering homage to God and the Saviour (Phil. ii, 10; Rev. v, 13, etc.). If such passages, however, be compared with others (as with Rom. xiv, 10, 11, etc.), it will appear that they are to be referred to the judgment, in which every creature will render some sort of homage to the Saviour; but then the bodies of the saints will have been already raised, and the intermediate region, if there be any, will have been deserted.

One of the seemingly strongest arguments for the opinion that the consideration is founded on 1 Pet. iii, 19, in which Christ is said to have gone and "preached to the spirits in prison." These spirits in prison are supposed to be the holy dead—perhaps the virtuous heathen—in prison in the intermediate place, into which the soul of the Saviour went at death that he might preach to them the Gospel. This passage must be allowed to present great difficulties. The most intelligible meaning suggested by the context is, however, that Christ by his spirit preached to those who in the time of Noah, while the ark was preparing, were disobedient, and whose spirits were thus in prison awaiting the general deluge. Even if that prison were Hades, yet what could meaning be attached to these passages of Scripture; and, whether it is the grave or hell, it is still a prison for those who yet await the judgment-day. This interpretation is in unison with other passages of Scripture, whereas the other is conjunctively deduced from this single text. See Spartus in Bursus. Another argument is deduced from Rev. xx, 14, which describes "death and Hades" as "cast into the lake of fire" at the close of the general judgment—meaning, according to the advocates of the doctrine in question, that Hades should then cease as an intermediate place. But this is also true if understood of the grave, or of the intermediate place. It is evident, however, that the spirits of the redeemed ascend to heaven and continue there till the resurrection, it is very possible that their happiness shall be incomplete until they have received their glorified bodies from the tomb and entered upon the full rewards of eternity.

On this subject, see Dr. Enoch Pond, On the Intermediate Place in American Biblical Repositories, for April, 1841, whom we have here chiefly followed; comp. Knapp, Christian Theology, § 104; Meyer, De Notione Orcli op. Hebræos (Lud. 1793); Behrens, Freimüthige Unterla. über d. Orklau d. Hebräer. (Halle, 1786); Witte, De Purgatorio Judororum (Heims. 1704); Journ. Soc. Lit. Obst., xi, 246. Shepherd, David A., a minister of the Methodist Episcopal Church, was born in Augusta, Oneida Co., N. Y., June 2, 1802. He professed conversion in his sixteenth year, and received license as a local preacher when twenty. In 1824 he was admitted on trial in the Genesee Conference. During his active ministry he served as presiding elder on the Chenango, Cayuga, Susquehanna, and Wyoming districts; and also five years as chaplain to Auburn state-prison. In 1873 he took a supernumerary relation, which he held until his death, at Washington, D. C., Oct. 8, 1876. He was for some time previous a member of the Wyoming Conference. See Minutes of Annual Conferences, 1871, p. 59.

Shepard, Hiram, a minister of the Methodist Episcopal Church, was born in Turin, Oneida Co., N. Y., July 8, 1804, and at the age of eighteen he made a profession of religion. In 1830 he was licensed to preach, and was admitted into the Black River Conference. He continued to be actively engaged in preaching until his death, which occurred at Malone, N. Y., May 25, 1863. He was an able defender of the truth and an impulsive preacher. See Minutes of Annual Conferences, 1869, p. 115.

Shepard, Lewis Morris, a Presbyterian minister, was born in Potsdam, St. Lawrence Co., N. Y., in 1810. He was converted at the age of sixteen; was educated at the Oneida Institute at Whitesborough, N. Y.; studied theology privately; was licensed to preach by Watervliet Presbytery, Aug. 29, 1838, and ordained and installed by the same body at Theresa, Jefferson Co., N. Y., in February, 1839. In that vicinity he preached for twelve years, occupying different localities, at Theresa and Piesic, then at Champion, Smithville, and North Adams. In 1850 he united with the Albany Presbytery, and supplied the Church at Trojmanville till 1852, when he removed to Montana, Fairchild Co., Conn., where he labored until 1858, when he became pastor of the Church in Huron, Wayne Co., N. Y. In every place where he labored he had more or less evidence that his work was owned by the Master of the vineyard. He died Oct. 16, 1865. Mr. Shepard was an earnest and faithful, and self-denying minister. See Wilson, Presb. Hist. Almanac, 1865, p. 170. (J. L. S.)

Shepard, Mase, a Congregational minister, was born May 28, 1759. When about twenty-one years of age he was led to Christ, and immediately his thoughts were turned towards the ministry. He prepared for college under the direction of the Rev. William Conant, of Lyme, N. H., entered Dartmouth College in 1774, and graduated in 1785. He then studied theology with Rev. Ephraim Jusdon, of Taunton, and on Sept. 19, 1787, was settled at Little Compton, R. I. He died in perfect calmness after a short illness, Feb. 14, 1821. See Sprague, Annals of the Amer. Pulpit, ii, 205.

Shepard, Samuel (1), M.D., a Baptist minister, was born in Salisbury, Mass., June 22, 1730. He studied medicine, settled a practicing at Charlestown, Mass., N. H., and soon became distinguished in his profession. He then turned his attention to preaching, and in 1771 became pastor of three churches, at Stratham, Brentwood, and Nottingham, which he had formed. He was one of the most active and honored ministers of his denomination, and continued until his death, Nov. 4, 1815. He published a number of tracts and pamphlets. See Sprague, Annals of the Amer. Pulpit, vi, 135.
Shepard, Samuel (2), D.D., a Congregational minister, was born in Portland, Conn., November, 1772. He graduated at Yale College in 1793, and was ordained, April 30, 1795, pastor in Lenox, Mass., where he remained until the close of his life. He was a member of the corporations of Middlebury and Williams colleges and vice-president of the latter until his death, Jan. 1, 1851. He died a few weeks after a long and severe struggle, found peace in Christ. He took the degree of B.A. in 1823, and completed his course of study in 1825. In 1827, after receiving his M.A., he was appointed lecturer in Earl's Colne, Essex. He remained, laboring with great success, for three years and six months. On Dec. 16, 1830, he was summoned to London to answer before bishop Land for alleged irregular conduct, and was by him forbidden to exercise any ministerial function in his diocese. Examining the various usages and ceremonies to which he was required to conform, he was less disposed to adhere to the Establishment than ever. Summoned a second time before bishop Land, he was required to be immediately dismissed from the place. He then became the pastor of Sir Richard Darley, in Yorkshire, as chaplain, where he remained about a year, and then accepted an invitation to Heddon, Northumberland, where he also remained about a year. Owing to his Nonconformist principles, he was greatly persecuted, with difficulty avoiding arrest, until Aug. 10, 1835, when he and his family emigrated for America. He arrived in Boston Oct. 2, 1835, and took up his residence in Newton (now Cambridge), Mass. Here he became pastor of a newly organized church, Feb. 1, 1836, of which he continued to be the pastor until his death. Mr. Shepard soon became involved in the famous Antinomian controversy, and was one of the most active members of the noted synod by which the storm was finally quelled. There is also good reason to believe that he had an important agency in originating and carrying forward the measures resulting in the establishment of Harvard College. He essayed to explain the New Testament, and is quoted by Johnson as "the apostle of the gracious, sweet, heavenly-minded, and soul-ravishing minister," which testimony is supported by that of many others. Among the following are some of his works: New England's Lamentation for Old England's Errors (London, 1845, 4to)—Thebes Subalitine (ibid., 1849)—Of Liturgies, etc. (1858)—Parable of the Ten Virgin Opened and Applied (1859, fol.). A collective edition of his works, with a memoir, was published by the Doctoral Tract and Book Society (Boston, 1853, 3 vols. 12mo). For a full list of his works, see Allibone, Dict. of Brit. and Amer. Authors, s. v.; Sprague, Annals of the Amer. Pulpit, ii, 59.

Sheph'ham (Heb. Sheph'ham, שֶׁפֶחְמָן, fruitful [Geza.], or bare [Frits.]; Sept. Σεφαμα [runnning it on into the following word, with the π τ directive], a place mentioned only in the specificity by Moses of the eastern boundary of the Promised Land (Num. xxxiv. 10, 11), the first landmark from Hazer-enun, at which the northern boundary terminated, and lying between it and Riblah. The ancient interpreters (Targ. Pseudo-Jon., Saadia) render the name by Apameia; but it seems uncertain whether by this they intend the Greek city of that name on the Orintes, fifty miles below Antioch, or whether they use it as a synonym of Banias or Dan, as Schwartz affirms (Palesit, p. 27). No trace of the name appears, however, in that direction. Porter (Damasuscus, ii, 554) would fix Hazer-enun at Kyrene, seventy miles east—northeast of Damascu,
dently does not denote the region referred to above, but the plains surrounding the mountains of Ephraim. In each of the above passages, however, the word is treated in the A. V. not as a proper name, analogous to the Compagna, the Volvo, the Curse, but as a mere appellative, and rendered "the vale," "the valley of the plain," "the low plains," and "the low country." How destructive this is to the force of the narrative may be realized by imagining what confusion would be caused in the translation of an English historical work into a foreign tongue if such a name as "the Downs" were rendered by "the valleys," "the valley of the plain," and the like. "The plains," therefore, to which the writer refers in the days of Simeon, and the district in the country of similar formation. Fortunately the book of Maccabees has redeemed our version from the charge of having entirely suppressed this interesting name. In I Macc. xii, 38, the name Sepheph is found, though even here stripped of the article, which was attached to it in Hebrew, and still accompanies it in the Greek of the passage. Whether the name is given in the Hebrew Scriptures in the shape in which the Israelites encountered it on entering the country, or modified so as to conform to it the Hebrew root שָפֵה, shaphēh, "to be low," and thus (according to the constant tendency of language) bring it into a form intelligible to Hebrews, we shall probably never know. The root to which it is related is in common use both in Hebrew and Arabic. In the latter it has originated more than one proper name—as Mesphile, now known as Kryajik; el-Mesphile, one of the quarters of the city of Maca (he Arabic, i., 29, 294); and Sefile, originally H-spheil, probably so called from its wide plains (Arias Montano, in Ford, Hand-book for Spain). The name Sepheph is retained in the old versions, even those of the Samaritans, and rabbi Joseph on Chronicles (probably as late as the 11th century). It was actually in use in the time of Eusebius, and after him Jerome (Quomart. s. v. "Sepheph," and Comm. on Obad.), distinctly states that "the region round Eleutheropola on the north and west was so called." In his comment on Obadiah, Jerome appears to extend it to Lydda and Emmaus-Nicopolis; and, at the same time, to extend Sharon so far south as to include the Philistine cities. A careful investigation might not improbably discover the name still lingering about its ancient home even at the present day. See PLAN.

No definite limits are mentioned to the Sephephlah, nor is it probable that there were any. In the list of Judea, "Sephephlah" is followed by "temple cities," as well as the hamlets and temporary villages dependent on them. Of these, far as our knowledge avails us, the most northern was Ekron, the most southern Gaza, and the most eastern Nezib (about seven miles north-northwest of Hebron). A large number of these towns, however, were situated not in the plain, nor even on the western slopes of the central mountains, but in the mountains themselves. See JARBUKH; KEILAH; NEZIN, etc. This seems to show either that, on the ancient principle of dividing territory, one district might include into the limits of another, or, which is more probable, that, as already suggested, the name Sephephlah did not originally mean a lowland, as it came to do in its accommodated Hebrew form. The Sephephlah was, and is, one of the most productive regions in the Holy Land. Sloping, as it does, gently to the sea, it receives every year a fresh dressing from the materials washed down from the mountains behind it by the frequent rains of winter. This natural manure, aided by the great heat of its climate, is sufficient to enable it to reward the rude husbandry of its inhabitants, year after year, with crops of corn which are described by travellers as prodigious. Thus it was in ancient times the corn-field of Syria, and as such the constant subsistence of the Philistines, and the refuge of the latter when the harvests in the central country were ruined by drought (2 Kings vii, 1-3). But it was also, from its evenness, and from its situation on the road between Egypt and Assyria, exposed to continual visits from foreign armies, visits which at last led to the destruction of the Israelitic kingdom. In the earlier history of the country the Israelites were compelled to look upon the plain of Sephephlah, but to have awaited the approach of their enemies from thence. Under the Maccabees, however, their tactics were changed, and it became the field where some of the most hardly contested and successful of their battles were fought. These conditions have not merely altered in modern times, but the invasion of Palestine must take place through the maritime plain, the natural and only road to the highlands. It did so in Napoleon's case. The Sephephlah is still one vast cornfield, but the contests which take place on it are now reduced to those between the oppressed peasants and the insolent and rapacious officials of the Turkish government, who are gradually putting down the old exactions to all the industry of this district, and driving active and willing hands to better-governed regions.—Smith. See JUDAH, TRIBE OF.

This tract, as above intimated, comprises not so much the mere maritime plain, but rather the lower range or spur of the range on the south of the Mediterranean. It consists, in fact, of low hills, about five hundred feet above the sea, of white, soft limestone, with great bands of beautiful brown quartz running between the strata. The broad valleys among these hills, forming the entrance to the hill-country proper, produce fine crops of corn, and on the hills olive-groves flourish better than in either of the adjoining districts. This part of the country is also the most thickly populated, and ancient wells, and occasionally fine springs, occur throughout. The villages are partly of stone, partly of mud; the ruins are so thickly spread over hill and valley that in some parts there are so many as three ancient sites to two square miles. All along the base of these hills, commanding the passes to the mountains, important places are to be found, such as Gath and Gezer, Emmaus and Beth-horon, and no part of the country is more rich in Biblical sites or more famous in Bible history (Conder, Tent Work in Palestine, i, 10). See TOPOGRAPHICAL TERMS.

Shepherd (usually רֶהֶב, roeh, a feeder, τροφέας; but substantially denoted also by רְהֵב, roheb, a "herdman," Amos vii, 14; and by רְכֵב, rokeb, a "sheep-mast- er," 2 Kings iii, 4; "herdman," Amos i, 1). In a now-madric state, the term is given to one, not merely to the slave, is more or less a shepherd. As many regions in the East are adapted solely to pastoral pursuits, the institution of the nomad life, with its appliances of tents and camp equipage, was regarded as one of the most memorable inventions (Gen. iv, 20). The progenitors of the Jews in the patriarchal age were nomads, and their history is rich in scenes of pastoral life. The occupation of tending the flocks was undertaken, not only by the sons of wealthy chiefs (xxxx, 29 sq.; xxxvi, 12 sq.), but even by their daughters (xxxxix, 6 sq.; Exod. ii, 19). The Egyptian captivity did much to implant a love of settled abode, and consequently we find one class of Israelites which still retained a taste for the hard life selecting their own quarters apart from their brethren in the Transjordanic district (Numb. xxxiii, 1 sq.). Henceforward in Palestine proper the shepherd held a subordinate position; the increase of agriculture involved the decrease of pasturage; and though large flocks were still maintained, they were the possessions of the richer classes of the wilderness of Judah, as about Carmel (1 Sam. xxv, 2), Bethlehem (xvi, 11; Luke ii, 8), Tekoa (Amos i, 1), and, more to the south, at Gedor (1 Chron. iv, 39), the nomad life was practically extinct, and the shepherd became one of many classes of the laboring population. The change of the pastoral to the agricultural state is strongly exhibited in those passages which allude to the presence of the shep-
SHEPHERD 606 SHEPHERD

herd's tent as a token of desolation (e.g. Ezek. xxv, 4; Zeph. ii, 6). The humble position of the shepherd at the same period is implied in the notices of David's wondrous elevation (2 Sam. vii, 8; Psa. lxvii, 70), and again in the self-applauding confession of Amos (vii, 14). The frequent and beautiful allusions to the shepherd's office in the poetical portions of the Bible (e.g. Psa. xxivii; Isa. xi, 11; xlix, 9, 10; Jer. xxiii, 3, 4; Ezek. xxxiv, 11, 12, 23), rather bespeak a period when the shepherd had become an ideal character, such as the Roman poets painted in their accounts of Arcadia.

The office of the Eastern shepherd, as described in the Bible, was attended with much hardship and even danger. He was exposed to the extremes of heat and cold (Gen. xxxi, 40); his food frequently consisted of the precarious supplies afforded by nature, such as the fruit of the "sycamore," or Egyptian fig (Amos vii, 14), the "huksa" of the carob-tree (Luke xv, 16), or perchance the locusts and wild honey which supported the Baptist (Matt. iii, 4); he had to encounter the attacks of wild beasts, occasionally of the larger species, such as lions, wolves, panthers, and bears (1 Sam. xvii, 34; Isa. xxxi, 4); he often was not safe from the risk of robbers or predatory hordes (Gen. xxxi, 39). To meet these various foes the shepherd's equipment consisted of the following articles: a mantle, made probably of sheep's-skin with the fleece on, which he turned inside out in cold weather, as implied in the comparison in Jer. xlviii, 12 (comp. Juv. xiv, 167); a small wallet, containing only a small amount of food (1 Sam. xvii, 40; Porter, DANMACU, ii, 100); a sling, which is still the favorite weapon of the Bedawi shepherd (1 Sam. xvii, 40; Burckhardt, Notes, i, 57); and, lastly, a staff, which served the double purpose of a weapon against foes and a crook for the management of the flock (1 Sam. xvii, 40; Luke x, 4). If he were at a distance from his home, he was provided with a light tent (Cant. i, 8; Jer. xxxvii, 7), the removal of which was easily effected (Isa. xxxviii, 12). In certain localities, moreover, towers were erected for the double purpose of spying an enemy at a distance and protecting the flock; such towers were erected by Uzziiah and Jotham (2 Chron. xxvi, 10; xxvii, 4), while their existence in earlier times is testified by the name Migdal-Edor (Gen. xxxv, 21, A. V. "tower of Edar;" Micah iv, 8, A. V. "tower of the flock"). See Tower.

The routine of the shepherd's duties appears to have been as follows: in the morning he led forth his flock from the fold (John x, 4), which he did by going before them and calling to them, as is still usual in the East; arrived at the pastureage, he watched the flock with the assistance of dogs (Job xxx, 1), and, should any sheep stray, he had to search for it until he found it (Ezek. xxxi, 12; Luke xi, 4); he supplied them with water, either at a running stream or at troughs attached to wells (Gen. xxix, 7; xxx, 38; Exod. iii, 16; Psal. xcvii, 2); at evening he brought them back to the fold, and reckoned them to see that none were missing, by passing them "under the rod" (Gen. xxxvi, 3; Lev. xxvii, 32; Ezek. xxxi, 37), checking each sheep as it passed by a motion of the hand (Jer. xxxiii, 13); and, finally, he watched the entrance of the fold throughout the night, acting as porter (John x, 3). We need not assume that the same person was on duty both by night and by day; indeed, this is asserted of himself (Gen. xxxi, 40), but it would be more probable that the shepherds took it by turns, or that they kept watch for a portion only of the night, as may possibly be implied in the expression in Luke ii, 8, rendered in the A. V. "keeping watch," rather " Zeving the watches" (συνεκρόω, φωλάζω). The shepherd's office thus required great watchfulness, particularly by night (Luke ii, 8; comp. Nah. iii, 18). It also required tenderness towards the young and

Sheep-milking and Butter-making in Egypt.
SHEPHERD OF HERMAS

SHEPHERD-KINGS

sacrifice (Herod, ii, 42), the only district where they were offered being about the Natron lakes (Strabo, xvii, 803). It may have been increased by the memory of the shepherd invasion (Herod, ii, 128). Abundant confessions of the faith of this heretic are supplied by the low position which all heretics hold in the castes of Egypt, and by the caricatures of them in Egyptian paintings (Wilkinson, ii, 169). See Hyksos.

The term "shepherd" is applied in a metaphorical sense to princes (Isa. xliv, 26; Jer. ii, 8; iii, 15; xxii, 22; Ezek. xxxiv, 3, etc.), prophets (Zech. xi, 5, 8, 10), teachers (1 Tim. iv, 11; and the book of Eph., i, 11); and to Jehovah himself (Gen. xxiv, 24; Ps. xxxiiii, 1, lxxxv, 1); to the same effect are the references to "feeding" in Gen. xlvi, 13; Ps. xxxviii, 9; Hos. iv, 16. The prophets often inveigh against the shepherds of Israel, against the kings who feed themselves and neglect their flocks; who distress, ill-treat, seduce, and lead them astray (see Ezek. xxxiv, 11 sq.; Num. xxvii, 17; I Kings xxii, 17; Isa. xi, 11; xliv, 28; Judith xi, 15). See Pastor.

Shepherd of Hermas. A book entitled The Shepherd, ascribed to Hermas, who is mentioned by Paul in his Epistle to the Romans, became generally known about the middle of the 2nd century. For an account of its contents, credibility, etc., see Hermary.

Queen of the Copts. The "Sisters of Our Lady of Charity," or "Evilist Sisters," were founded at Caen, in Normandy, in 1641, by abbot Jean Eudes. In 1838 a modification of the rule enabled them to take charge of penitent women introduced at Angers, the establishment there becoming known as the "House of the Good Shepherd." They were introduced into the United States in 1849. The "Sisters of Our Lady of the Good Shepherd," and "Sisters of the Good Shepherd," and "Religious of the Good Shepherd," are apparently of the same congregation, which, under one or the other of these names, is reported from fourteen establishments in nine states. These are in New York, Buffalo, and Brooklyn, N.Y.; two in Philadelphia, Pa.; Baltimore, Md.; New Orleans, La.; Cincinnati, Cleveland, and Franklin, O.; Louisville, Ky.; St. Louis, Mo.; Chicago, Ill.; St. Paul, Minn. They have Magdalene asylums for maidens, industrial schools for reclaiming young traitless girls, protectories for young girls, reformatory schools, and orphanages. The number of sisters, nuns, brothers, and lay workers, has increased from 350 to 400, with 2500 more penitents and girls under their charge. The "Third Order of St. Teresa, composed of reformed penitents who remain for life," and reported in New York and St. Louis, appears to be under the supervision and patronage of this community. See Conference of Sisters, etc., p. 119.

Shepherd, Jacob R., a Methodist Episcopal minister, was born near Halifax, Pa., April 3, 1788. He was converted in 1814, admitted into the itinerancy in the Baltimore Conference in 1821, and served the church effectively until 1830, when his health gave way, and he took a superannuated relation. As his strength permitted, he was about doing good. He died Sept. 4, 1846. Mr. Shepherd possessed powers of mind above mediocrity, was a good and useful preacher, and died in the faith. See Minutes of Annual Conferences, iv, 100.

Shepherd, James, a minister of the Methodist Episcopal Church, was born in Westfield, Mass., Dec. 14, 1802. In 1833 he was received on trial into the New England Conference, was ordained deacon in 1835, and elder in 1837. He continued to labor without interruption until seized with an illness which terminated his life, May 22, 1855. See Minutes of Annual Conferences, 1856, p. 41.

Shepherd, John, a minister of the Methodist Episcopal Church, was born in Pennsylvania Nov. 7, 1789. He was licensed to preach in Illinois about 1820, and received on trial into the Illinois Conference in 1826. His health failed, however, and in 1836 he was transferred to the Southern Illinois Conference granted him a superannuated relation. He died about twenty days after, in November, 1860. He was a "faithful minister, remarkable for his punctuality, and greatly beloved." See Minutes of Annual Conferences, 1861, p. 217.

Shepherd, Moses, a minister of the Methodist Episcopal Church, was admitted into the Illinois Conference in 1831. Of frail health, he married his powers, and was taught to be somehow to be of some use to his brethren. He died (while presiding elder of the Jonesborough District, Southern Illinois Conference) Sept. 20, 1862. See Minutes of Annual Conferences, 1862, p. 211.

Shepherd, Vincent, a Methodist Episcopal minister, was born in Wantage, Sussex Co., N. J., October, 1808. He was licensed to exhort Nov. 4, 1828; and as local preacher, Feb. 23, 1835. In the same year he was received on trial in the Philadelphia Conference, and appointed to Milford Circuit; in 1834 to Evesham; in 1835 to Rockaway, in 1836 to Easton, and in 1837 ordained elder and appointed to Smyrna. In 1838-39 he was transferred to the New Jersey Conference, and stationed in Plainfield; in 1840, Belvidere; in 1841, N. B. Wick; in 1842-45, Jersey City; and in 1844-45, Rahway, where he soothed and healed, and his preaching gained an ecumenical relation. He died July 1, 1848. Mr. Shepherd was a good preacher, a diligent student, and a faithful pastor. See Minutes of Annual Conferences, iv, 320.

Shepherd-kings, a series of foreign rulers in Egypt, whose dominion must have occurred about the season of the sojourn of the Hebrews there. The relation of these two classes to each other, and to the other Egyptians, is so involved that now even the Bible does not intimate, especially to the Biblical student, that our treatment of the subject under EGYPT and HYKSOS requires a somewhat fuller consideration of this topic. The discussion of it began as early as the days of Josephus, who, in fact, gives us, in two controversial passages, nearly all the information we possess. He quotes the exact words of Manetho, and says, in substance (Apion, i, 14, 15), that the Hyksos (a name which he etymologically interprets as meaning "shepherd-kings") were an ignoble people, who invaded Egypt from the East (evidently meaning that they were Arabs) during the reign of Timeus (a king nowhere else mentioned), and eventually established one of themselves, named Saites, king at Memphis, who founded a city on the Babastic arm of the Nile, called Avaris, as a barrier against the Assyrians; but that after a domination of 511 years these people were attacked by "the kings of Theba's and the other parts of Egypt" (language which removes the erroneous assumption of Manetho's at least), who, under a king named Alisphragmuthosis, subdued them, and that his son Thumesmos finally drove them out of the country. The extract from Manetho further states that these refugees were the builders of Jerusalem, a statement with which Josephus joins issue, as identifying them with the Hebrews; but the language may, perhaps, be referred to the Canaanites who fortified Jebus in the interval between the Exodus and the time of David. Josephus then proceeds to recount the kings of Egypt after the expulsion of the Hyksos, beginning with Tenthosis; and the list is evidently that of Manetho's eighteenth dynasty beginning with Amosis. In the other passage (ibid. 26), Josephus cites a story from Manetho to the effect that the Jewish lawyer, Moses, was the same as a priest, Osirapis of Heliopolis, whom a degraded leprous cast of the Egyptians made their ruler in an insurrection, and invited the escaped Shepherds back to Egypt, who, enraged at the sacrilege and committed all sorts of atrocities. The Egyptian king under whom this revolt occurred is given as Amenophis, the father of Sethos-Rames, and the son of Rhamphes, names which clearly point to Menephtah I, of the nineteenth dynasty. The narrative goes on to state, however, that Amosef, and in any case that the outbreak was absent in Ethiopia, returned with his army, he totally defeated and expelled the rebels. This
account, of course, Josephus violently controverts; but there is no occasion to doubt its accuracy except as to the evidently malicious and arbitrary identification of the Hebrews with the Hyksos and Pharaohs. In connection with the more casual reader cannot fail, as Josephus intimates, to note the contradiction in Manetho, if he meant to make out an identity of the Jews with both the Hyksos and the rebels, since the Shepherds had been totally expelled long before the date of the Iepers, and the Hebrews were not even in Egypt. The most casual reader cannot fail, as Josephus intimates, to note the contradiction in Manetho, if he meant to make out an identity of the Jews with both the Hyksos and the rebels, since the Shepherds had been totally expelled long before the date of the Iepers, and the Hebrews were not even in Egypt. Our only object is to ascertain, if possible, its chronological position with reference to the Exodus. We know of no positive method for doing this but by a direct comparison of the dates of the two events, as nearly as they can be historically, or rather chronologically, determined. Unfortunately the uncertainty of many of the fragments that enter into the settlement and this early portion of both the Egyptian and the Biblical chronology forbids any absolute satisfaction on this point. If, however, we may trust to the accuracy of the conclusions recently arrived at, we may, with tolerable safety, set down the sojourn of the Hebrews in Egypt at or about 1448 B.C. (Exod. 17:14-15), or perhaps a little after, the Hyksos as lasting B.C. 2003-1470; in other words, the entire period of 216 years during which the Hebrews were in Egypt was contemporaneous with that of the Hyksos, and about the middle of the latter. Some writers have claimed (Birch, Egypt, p. 151) that the name Ramses (or Ramesses), one of the "treasure cities," built by the Israelites in their period of bondage (Exod. i, 11), is conclusive proof that the oppression took place under the Rameside (nineteenth dynasty, B.C. 1302); but this is inconsistent with the fact that Goshen is called "the land of Ramesses" (Gen. xlii, 11) in the time of Joseph (B.C. 1874).

The only information we have of the Hyksos from other ancient writers on Egypt consists of such slight notices in the fragments of Manetho as the following by Africanus: "Fifteenth dynasty—six foreign Phoenician kings, who also took Memphis. They likewise founded a city in the Saithe nome, named from among which the Egyptians put the "subject" kings: "Sixteenth dynasty—thirty-three Shepherd-kings; "Seventeenth dynasty—forty-three Shepherd-kings, and forty-three Theban Dioskopoi altogether." Instead of this Eusebius has simply "Seventeenth dynasty—four foreign Phoenician Shepherd-kings (brothers), who also took Memphis, . They founded a city in the Saithe nome, advancing from which they subverted Egypt." There are a few indications in the Biblical records which have been mostly overlooked in this discussion, but which to our mind go far towards confirming this relative position of the two periods. In the first place, we are expressly told that in the time of Joseph "every shepherd was an abomination unto the Egyptians" (Gen. xlii. 34). This shows that the Shepherd invasion had occurred before that date, as it seems to be the only reasonable explanation of so deep an abhorrence. In the second place, however, it is clear, not only from the entire narrative, but especially from the fact that the Israelites were placed in Goshen, evidently as a break-water against these foreign irruptions, that the Hyksos had not yet gained the upper-hand, at least in Memphis, where the capital of Joseph's Pharaoh seems to have been located; and this accords with the language of Josephus above, which he says comes from the capital of Memphis. The Shepherds had no occur till an advanced period in the Shepherd line, perhaps the beginning of the sixteenth dynasty. It is true, Josephus seems to locate the first Shepherd-king at Memphis, but he betrays the inaccuracy of this expression by adding immediately that the king in question built Avaris as his capital; and the tale of dynasties shows that the Memphitic dynasty continued (like the Hyksos) under the control of the Hyksos in the twenty-first or second part of the sixteenth dynasty. Indeed, the change in the policy of the Egyptians towards the Hebrews (Exod. i. 8, 9), which took place B.C. 1738, singularly agrees with the revolution in Lower Egypt at the end of the eighteenth dynasty (B.C. 1740), or the beginning of the sixteenth dynasty (B.C. 1720). Finally, the remark incidentally dropped as a reason by the "new king" for oppressing the Israelites, "Lest, when there falleth out any war, they join themselves unto our enemies, and fight against us, and so get them up out of the land," which at first sight seems most appropriate in the mouth of one of the native sovereigns—when more closely examined, strongly in the opposite way. So far as joining the enemy is concerned, there could be little difference: the Shepherds are supposed by some to have been naturally friendly towards their neighbors and fellow-shepherds the Hebrews; but, on the other hand, we know the Hebrews were closely in alliance with the long-established and apparently legitimate native sovereigns—had been so, in fact, ever since the days of Abraham (Gen. xii, 16); and since the Hebrews had been located, as we have seen above, in Goshen expressly for a purpose adverse to the Hyksos, we can hardly suppose that they had condescended in sympathy with the designs of the new "king," for a league of the arms of the Hebrews, for they were certainly not formidable soldiers, but rather lest they should seize the opportunity of the existing civil convulsion to escape from Egypt. He was not alarmed, it seems, at the prospect of their increasing as an invading force, such as they were to the Hyksos, but only lessening growing numbers being a reason why they were not formidable, and that a little more careful protection was needed. This implies that they had already experienced ill-treatment or dissatisfaction. From what source could this have arisen? They had the best possible land for their vocation (Gen. xvi. 6); they had enjoyed royal patronage to the full; they had never hitherto been oppressed by government. They had always been peaceable and loyal citizens. Why should they now be suspected and distrusted? The jealousy, if on the part of the native régime, seems inexplicable; and we may add that such a rigorous and illegitimate policy was not in accordance with what we otherwise know of the policy of the native sovereigns of ancient Egypt. We cannot but suspect that bickerings, rivalries, and animosity had long existed between the Hebrews and the lawless, uncultivated Hyksos on their frontier; and raids such as the Israelites afterwards experienced from their Bedawin neighbours in Palestine had, doubtless, often been made upon the quiet domain by these Bene-Kedem, as Josephus virtually styles them. It was this annoyance that had tempted the Hebrews to long for a less exposed situation; and when they saw these freebooters installed as lords, they might well think it high time to decamp. The whole conduct of the Hyksos, as revealed by Josephus, shows them to have been of this domineering, foraging, semi-savage character. They were, in fact, congeners of the Canaanites, with whom the Israelites had henceforth a perpetual enmity, despite the traditional comity of earlier days. No genuine Egyptian monarch seems capable of such brutal and barbarous conduct of the Exodus; but the atrocities which Josephus states that the Hyksos perpetrated in their later invasion justify the belief that it was they who, in the days of their power, made Egypt known as "the house of bondage." The irritation and vexation caused by this system of petty predation, during the long contact of the Israelites with the Hyksos in Egypt, as well as disclosed the early purpose of the former to return to the land of their forefathers (Gen. I, 25), and had been predicted of old (xx, 13); but it was not till the domination of the latter had made it galling to an
SHEPHERD-KINGS 669

SHERIDAN
tolerable degree that the resolution ripened into a fixed
determination. Sectional jealousies and tribal ani-
macations were, however, strong, and were
are peculiarly inveterate in the East, where they are
so liable to be aggravated by blood-feuds. We can
trace distinct evidences of such a national grudge in this
case from the time when the son of the Egyptian bond-
woman—who was, doubtless, no other than a captive
from the desert—was married to an Egyptian. When Egypt
was expelled from the Hebrew homesteads for mock-
ing the son of the free-woman (Gen. xxvi, 9), till Moses slew
the Egyptian task-master (Exod. ii, 12). Hagar nat-
urally retired to the 'wilderness of Beersheba' (Gen.
xxvi, 14), which was part of what was known by the
more general name of the desert of Paran, where her
children went up to Mount Sinai. A few years later she
entered a marriage for her son among her kindred tribes,
called even then part of the land of Egypt (xxvi, 21).
His descendants, the notorious Ishmaelites, who roved as
brigands over the region between Egypt and Ca-
naan, intensified the cannibal variance, which became
still more sharply defined between the cavallery Esau
and the puritan Jacob in the next generation. These
two representative characters, indeed, both went under
the common title of shepherds or herdsmen, for
flocks and herds constituted the staple of the property
of each (xxxii, 9); but the 'cunning hunter of the field'
with his 'simple tent-dwelling' brother as a Fellah (xxxv, 27
sq.). The collisions between the Philistine herdmen
and Jacob's (ver. 17-22) seem to belong to the same
line of difference, and may serve to remind us that
Philistia, as the intermediate battle-ground of the ex-
pelled Hyksos in later times, retained in its military
prowess and panegyic champions traces of their war-
like encounters with the arms of Egypt. The iron
war-chariots of the Canaanites are especially traceable
to the Egyptian use of cavalry, and these could only
deploy successfully in the level sea-coast and its
connected plains. The fear of encountering these disci-
plined foes on the part of the Israelites in their de-
parture from Egypt betrays the hereditary hostility
between them. The Amalekites who attacked the He-
brews in the desert (Exod. xvii, 8) were evidently a
branch of the same roving race of Arabs in the north-
ern part of the peninsula of Sinai, and they repeated
the same treachery in the southern border incursions (Num.
xxiv, 45). The ban of eventual extermination against
them (Exod. xvii, 16) was but the renewal of the old
enmity. It was a caravan of these gypsy traders (in-
differently called Ishmaelites or Midianites, Gen. xxxvii,
28) who purchased Joseph and carried him to their
comrades in the land of Egypt. The second irruption of the Hyk-
sos into Egypt, as narrated by Josephus, manifestly
was, when stripped of its apocryphal exaggerations,
merely one of the forays which characterized, or rather
constituted, the guerilla system seen on various occasi-
on to have prevailed on the southern border of Pal-
estine, such as Saul's raid against Amalek (1 Sam. xv, 
3). David expelled the last remnants of the Amalekites from Ziklag (xviii, 8), and the
later marauds of the Simeonites (1 Chron. v, 18-22).
The date assigned to it by Josephus would be about
B.C. 1170-50, or during the troubled judgeship of Eli,
when the Philistines and other aborigines had every-
thing pretty much their own way. This was some
three centuries after the close of the Shepherd rule in
Egypt, which ended about B.C. 1492, or during the
judgeship of Ehud. As the routine of the invading and
retreating hordes was, of course, along the sea-coast,
they may have marched and countermarched freely at
any time prior to David's reign without disturbing in the
least the system of Hebrew annals, which at that
period are confined to the mountain backside of the
country and the Jordan valley.

The Shunem (whose name seems to be identical with
the last syllable of Hyksos), with whom the monuments
represent the Ramesside as warring, were the Shemites
or Arabs of this period. They sometimes appear in
connection with the Kheta or Mittites, i.e. Syrians.
An interesting development of this chronological
position of the Hebrew transmigration is found in the fact
that horse does not appear on the Egyptian monuments pri-
or to the eighteenth dynasty (Wilkinson, Ancient Egy-
prians [Amer. ed.], p. 386), having, in all probability, been
introduced by the Bedawin Hyksos, of whom, however,
there was, if any, pictorial representation of horses remains.
According-
ly, at the removal of the Israelites to Egypt, in the
early part of the Shepherd rule, we read only of asses
and wagons for transportation (Gen. xiv, 19-23)—the
latter, no doubt, for oxen, like those employed in the
desert (Numb. vii, 3); but at the Exode, in the latter
part of the Shepherd rule, the cavalry, consisting exclu-
sively of horsemen, formed an important arm of the mili-
tary service (Exod. xiv, 7). The incidental mention of
horses, however, in Gen. xlvii, 17, as a part of the Egyptian
farm-stock in Joseph's day, shows that they were
not unknown in domestic relations at that date.

Shepherd (French insurgents). See PAST-
TOUR-BAUX.

Shephel (Heb. Shephel, "barren", hence a na-
ked hill; Sept. Σωφρι v. Σωφρα), the fourth named
of the five sons of Shobal the son of the aboriginal Seir of
Edom (1 Chron. i, 40), called in the parallel passage
( Gen. xxxvi, 23) Shepho (Heb. Shepho, "of the same
signification; Sept. Σωφρα), which Bunting (Genealogies,
49) regards as the preferable reading. B.C. c. 1290.

Shephelah. See ADLER.

Shepho (Gen. xxxvi, 23). See SHEPHI.

Shephuphan (Heb. Shephuphan, "of an
adder; Sept. Σωφρα v. Σωφρα), next to the last
named of the sons of Bela oldest son of Benjamin
(1 Chron. viii, 5), elsewhere called (perhaps more properly)
Shephupham (Numb. xvi, 39, A. V. "Shaphum"), Shup-
pim (1 Chron. vii, 12, 15), and Muppim (Gen. xlii, 21).
See JACOB.

She'rah (Heb. Sheerah', "relationship, i.
.of kinwoman [as in Lev. xviii, 17]; Sept. Σωφρα v. Σωφρα),
a "daughter" of Ephrath and foundress of the
two Beth-horons and also of a town called, after her, Uz-

Sherah (Isa. xxx, 14; Ezek. xxiii, 34). See POTT-
SHRIB.

Sherebi'ah (Heb. Sheerbehah', "beauti-
ed [First, sprout] of Jehovah; Sept. Σωφρα, v. Σωφρα,
Σωφρα', Σωφρα, etc.), a prominent Levite of the
family of Mahli the Merarite, who, with his sons and
brethren (eighteen in all), joined Ezra's party of return-
ing colonists at the river Ahava (Ezra viii, 18), and
who along with Hashabiah and ten others was commis-
sioned to carry the treasures to Jerusalem (ver. 24, where
they are vaguely called "chief of the priests"). B.C. 459.
He also assisted Ezra in reading the law to the people
(Neh. viii, 7), took part in the psalm of confession and
thanksgiving which was sung at the solemn fast
after the Feast of Tabernacles (xv, 4, 5), and signed the
covenant with Nehemiah (x, 12). He is again men-
tioned as among the chief of the Levites who belonged
to the choir (xii, 8, 24).

She'resh (Heb. id. שרש, but occurring only "in
pause," Shāresh', שרש, root [First, union]; Sept. Σω-
φρα v. Σωφρα), second of the two sons of Machir by
Maachah, and father of Ulam and Rakeem (1 Chron. vii, 16).
B.C. ante 1658.

Sherets. See CREEPING THING.

Sherез (Zech. vii, 2). See SHAREZER 2.

Sheridan, Andrew J., a minister of the Metho-
dist Episcopal Church, was born in Butler County, O.,
Feb. 7, 1825, but emigrated early to Indiana. He was
converted and joined the Church in 1841, and licensed to preach in 1852. He was admitted on trial into the North-west Indiana Conference in 1853, after spending four years in the Asbury University. In 1860 he received a superannuated relation, which he changed to that of effective in 1865. He was then appointed to Mechanicsburg Circuit, where he died, Jan. 10, 1867. See Minutes of Annual Conferences, 1867, p. 100.

Sheridan, Thomas, D.D., was an Irish clergyman, born in the County of Cavan about 1884. By the help of friends he was educated at Trinity College, Dublin. He afterwards entered into orders, and was named chaplain to the lord-lieutenant. He lost his fellowship by marriage, and set up a school in Dublin, which was at first successful, but was afterwards ruined by a combination of the boarders. He was married to Miss Swift procured him a living in the south of Ireland in 1725, worth about £150; but he lost his chaplaincy and all hope of rising by preaching a sermon on the king's birthday from the text "Sufficient unto the day is the evil thereof. He exchanged his living for that of Dunboyne, but gave it up for the free school of Cavan. He soon sold the school for about £400, spent the money rapidly, lost his health, and died Sept. 10, 1738. He was a good-natured, improvident man, continuing to the last to be a punster, a quibbler, a fodder, and a wit.

Sheridan, William, D.D., an English prelate of the latter part of the 17th century, was bishop of Kilmore in 1660, and died in 1681. He was in 1691 for not taking the oath at the Revolution. His works consist of Sermons, etc., published in 1665, 4to; 1685, 4to; 1704, 1705, 1706, 3 vols. 8vo; 1720, 3 vols. (of vol. 1, 2d ed.) 8vo. See Allibone, Dict. of Brit. and Amer. Authors, s. v.

Sherif (Arab. for noble) designates, among Moslems, a descendant of Mohammed through his daughter Fatima and Ali. The title is inherited both from the maternal and paternal side; and thus the number of members of this aristocracy is very large. The men have the privilege of wearing the green turban, the women the green veil; and they mostly avail themselves of this outward badge of nobility (the prophet's color), while that of the other Moslem's turbans is white. Many of these sheikhs founded dynasties in Africa, and the line which now rules in Fez and Morocco still boasts of that proud designation.

Sherif occurs only in Dan. iii, 2, 3, as a rendering in the A. V. of the Chal. "עפר, tightay" (according to Furst "a derivation from the old Persic atipash = supreme master [Sterner, Monatsschr. p. 190].") Sept. "fravarow; Vulg. profectus," one of the classes of court officials at Babylon, probably lawyers or jurists, like the present Mohammedan mufti, who decides points of law in the Turkish courts.

Sheringham, Robert, a learned fellow of Gonville and Caius College, Cambridge, who was ejected during the Commonwealth and retired to Holland, but was restored in 1662. His works were, Jomos: Codex Tolimaensis Sacrificiorum, etc. (London, 1648, 4to); -- Frangueou, etc. (ibid. 1690, 8vo); -- The King's Supremacy Asserted (ibid. 1660, 1682, 4to); -- De Anglorum Orimine, etc. (Cantab. 1670, 8vo); -- also Sermons. See Allibone, Dict. of Brit. and Amer. Authors, s. v.

Sherlock, Martin, was an Irish divine and chaplain to the earl of Bristol during the latter part of the last century. He left the following inscription, etc. (Lond. 1754): ad un Giovane Poeta (composer to a young poet) (Naples, 1777, 8vo); --Letters d'un Voyageur Anglais (Geneva, 1779; Neuchâtel, 1781, 8vo; in English [not by the author]. Lond. 1780, 4to); -- Letters, on various subjects (1781, 2 vols. 12mo); --New Letters from an English Traveller (1791, 8vo). See Allibone, Dict. of Brit. and Amer. Authors, s. v.

Sherlock, Richard, D.D., an English clergyman, was born at Oxton, Cheshire, in 1613; and was educated at Magdalen Hall, Oxford, and Trinity College, Dublin. He was minister of several parishes in Ireland, and afterwards became rector of Winnick, England. He died in 1699. His works are, Answer to the Quakers' Dissertation to Ministers (Lond. 1656, 4to); -- The Quakers' Writs Queried Answered (Lond. 1659, 12mo); -- Mercurius Christianus, or The Prophetic Christian (phil. 1673, 8vo); -- and Sermons, etc. See Allibone, Dict. of Brit. and Amer. Authors, s. v.

Sherlock, Thomas, an English prelate, was the son of Sir William Sherlock (q. v.), and was born in London in 1678. He early went to Eton, from which (about 1693) he was removed to Cambridge, and was admitted into Catherine Hall. He took his degree of Bachelor of Arts in 1697, and that of Master of Arts in 1701. Between these dates he entered the ministry, and was appointed to the mastership of the Temple in 1704, which he held until 1753. In 1714 he took his degree of Doctor of Divinity, became master of Catherine Hall and vice-chancellor of the University of Cambridge, and in 1716 was created dean of Chichester. He was created bishop of Bangor in 1728, of Salisbury in 1734; and in 1749 the see of Canterbury was offered to him, but he declined it on account of ill-health. The following year he accepted the see of London. He died 1761, Bishop Sherlock, published, in opposition to Dr. Hoadly in the Bangorian Controversy, The Use and Intent of Prophecy: -- Trial of the Witnesses of the Resurrection of Jesus: -- and a collection of his Discourses. The first complete edition of his works was published (Lond. 1830) in 5 vols. 8vo.

Sherlock, William, D.D., a learned English divine, was born in Southwark, London, in 1641, educated at Eton, and thence removed to Peter House, Cambridge, in May, 1657. He was made rector of St. George's, Botolph Lane, London, in 1669. In 1680 he received the degree of Doctor of Divinity, and in 1681 was collated to a prebend of St. Paul's. He was master of the Temple in 1684, and had the rectory of Thetford, Hertfordshire. Refusing to take the oaths at the Revolution, he was suspended; but complying in 1690, he was restored, and became dean of St. Paul's in the following year. He died at Hampstead, June 19, 1707, and was interred in St. Paul's Cathedral. More than sixty of his publications are given, of which the following are of especial note: -- The Knowledge of Jesus Christ, etc. (Lond. 1674, 8vo); -- Defence and Continuation of the same (ibid. 1675, 8vo); -- The Case of Resistance to the Supremacy Powers Stated, etc. (ibid. 1684, 8vo).

Sherman, Charles, a Methodist Episcopal minister, was born in Woodbury, Conn., Oct. 20, 1803. He was converted in his seventeenth year, licensed as a local preacher in 1823, and admitted into the itinerancy in 1830, laboring successively in Stratford and Burlington in the New York Conference, and Albany and Troy in the Troy Conference, to which he was transferred in 1834. In 1838 he was appointed presiding elder in Albany District, in which he labored four years. In 1842, owing to failing health, he was appointed to Johnstown, a small station in Saratoga County, N. Y.; in 1843 to Troy, where he died, March 10, 1844. Mr. Sherman was an excellent preacher, clear in his method, and forcible in his manner of address. See Minutes of Annual Conferences, iii, 582; Sprague, Annals of the Amer. Pulpit, vii, 675.

Sherman, John (1), a Congregational minister, was born in Westfield, Mass., Dec. 26, 1815. He was educated at Amherst College, Cambridge, and came to New England in 1834, preached a short time at Watertown, and moved to New Haven, where he was made a magistrate and lived until 1844, when he accepted an invitation to become pastor at Watertown. There he labored until his death, Aug. 8, 1865. See Sprague, Annals of the Amer. Pulpit, i, 44.
Sherman, John (2), a Unitarian minister, was born in New Haven, Conn., June 30, 1772, entered Yale Col-
lege when not far from sixteen years of age, and gradu-
ated in 1792. He studied theology partly under pres-
ident Dwight, but mainly under Rev. David Austin, of
Elizabeth, N. J. He was licensed to preach by the New
Haven Association in 1796, and was ordained and in-
scribed a pastor at South Church, New London, Conn.,
Nov. 15, 1797. Not long after his settlement he began to
doubt the doctrines he had been accustomed to believe
and preach, especially that of the Trinity. On Oct. 23,
1805, he received a dismissal from a council called for
the purpose, and became pastor of the Reformed Chris-
tians (Unitarian) at Old Lyme (Trenton Village), N. J.,
March 9, 1806. After preaching a short
time, he established an academy in the neighborhood,
which occupied his attention for many years. In 1822
he built a hotel at Trenton Falls, into which he removed
the next year. He died Aug. 2, 1826. He published,
One God in One Person Only, etc. (1805, 8vo), the first
formal and elaborate defence of Unitarianism that ever
appeared in New England:—A View of Ecclesiastical
Proceedings in the County of Windon, Conn. (1806, 8vo):
—Philosophy of Language Illustrated (Trenton Falls,
1825, 12mo):—Description of Trenton Falls (Utica,
1827, 16mo). See Sprague, Annals of the Amer. Pulpit,
vol. viii, 326.

Sherill, Edwin Jenner, a Congregational minis-
ter, was born in Shrewsbury, Vt., Oct. 23, 1836. His
preparatory studies were completed in Middlebury, after
which he entered Hamilton College, N. Y., whence he
was graduated in 1852. He spent two years of study in
Yale Theological Seminary, Mass., and one year at
Andover Seminary. He was ordained at Eaton, Que-
bec, June 13, 1858, and continued in the pastoral charge
of that church until November, 1875. Though not for-
mally dismissed, he removed to Lee, Mass., in 1875. He
died in the city of New York, June 18, 1877. (W. P. S.)

Sherwood, Mary Martha, an English authoress,
was born at Stanford, Worcestershire, July 6, 1775.
In 1803 she married her cousin, Henry Sherwood, and ac-
companied him in 1804 to India, where she instructed
the children of his regiment. In 1818 they returned to
England, and in 1821 settled at Wickwar, county of
Gloucester, where they resided for the next twenty-
seven years. Mrs. Sherwood's works number ninety
volumes, of which mention is made of the follow-
ing: Chronology of Ancient History:—Dictionary of
Scripture Types. The remainder are largely works
of fiction.

Sheesh. See LINEN; MARBLE; SILK.

She'shach (Heb. Sheksam; שֶׁשַּׁח, probably an artifi-
cial word; Sept. Σεκανείς v. r. Σεκανας), a term occurring only
in Jeremiah (xxvi. 26; li. 41), which evidently uses it as
a synonym either for Babylon or for Babylonia. Accord-
ing to the Jewish interpreters, followed by Jerome, it
represents בֶּשַׁח, "Babel," on a Caballistic principle called
"athbash" well known to the later Jews—the substitu-
tion of letters according to their position in the alpha-
et, counting backwards from the last letter, for those
which hold the same numerical position counting in the
ordinary way. See CASALA. Thus ב מ represents נ,
מ represents ר, ר represents ב, and so on. It may well
be doubted, however, whether this fanciful practice was
so old as Jewish "athbash," and preserved that way that it
was the case, why should he use this obscure term here, when
Babylon is called by its proper name in the same verse?
C. B. Michaelis conjectures that נ comes from
שֶׁשַּׁח, "to overlay with iron or other plates," so
that it might designate Babylon as χαλάκτοναζ. Von
Bohlen thinks the word synonymous with the Per-
ian Shik-shak, i. e. "house of the prince;" but it is
doubtful whether, at so early a period as the age of Jeru-
miah, Babylon could have received a Persian name that
would be known in Judea. Sir H. Rawlinson has
observed that the name of the moon-god, which was
identical, or nearly so, with that of the city of Abraham,
Ur (or Hur), "might have been read in one of the an-
cient dialects of Babylon as Shikshak," and that con-
sequently "a possible explanation is thus obtained of the
Sheshach of Scripture" (Herod. ii. 610). Sheeshach may
stand for Ur; or itself, the old capital, being taken (as
Babel, the new capital, constantly) to represent the
country.

She'shaim (Heb. Shešhā'ī, שֵׁשְּחָי, whish [Genen.]
or noble [First]; Sept. Ἐξαρη, v. r. Σου, Σουαρα, Σαμη,
eetc.), the second named of the three sons of Anak who
dwelt in Hebron (Num. xiii. 22), and were driven
there and slain by Caleb at the head of the children of
Judah (Josh. xv. 14; Judg. i. 10). B.C. 1512.

She'shaim (Heb. Shešhān, שֵׁשֶׁחַ, illy [Genen.]
or noble [First]; Sept. Ἀσανίς v. r. Σαμη, a "son of
fashi and father of Ahlai or Altai, among the descend-
ents of Jerahmeel the son of Hezon; being a representa-
tive of one of the chief families of Judah, who, in con-
sequence of the failure of male issue, gave his daughter
in marriage to Jarha (v. q.), his Egyptian slave, and
through this union the line was perpetuated (1 Chron.
ii, 81, 94, 95). B.C. post 1656.

Sheshbazzar (Heb. Sheshbazzātār, שֶׁשֶּׁבֶזָצָאָר), from the Per-
sis for worshipper of fire [Von Bohlen], or the Sans-
crit word for "illumination," as "sheshbazzar," Shesh-
bas, Sept. Zerathes v. r. Σαρασάσα, etc., the Chaldaen
or Persian name given to Zerubbabel (q. v.) in Ezra
i, 8, 11; v, 14, 16, after the analogy of Shadrach, Meshech,
Abednego, Belteshazzar, and Esther. In like manner,
also, Joseph received the name of Zaphnath-paneah, and
we learn from Manetho, as quoted by Josephus
(Apion, i. 29), that Necho, the Egyptian name was Osar-
saph. The change of name in the case of Jchoikiam and
Zedekiah (2 Kings xxii. 34; xxiv. 17) may also be
compared. That Sheshbazzar means Zerubbabel is
proved by his being called the prince (נְחֵ֥בִ֥שְׁבֶּזֶ֖שׁ) of Judah,
and governor (נְחֵ֥בִ֥שְׁבֶּזֶ֖שׁ), the former term marking him as
the head of the tribe in the Jewish sense (Num. vii, 2,
10, 11, etc.), and the latter as the Persian governor ap-
pointed by Cyrus, both which Zerubbabel was; and
yet more distinctly by the assertion (Ezra v. 16) that
"Sheshbazzar laid the foundation of the house of God
which is in Jerusalem," compared with the promise to
Zerubbabel (Zech. iv. 9), "the hands of Zerubbabel have
laid the foundation of this house, his hands shall also
finish it." It is also apparent from the mere compari-
sions which Ezra vii, i, 2, makes, that the whole history of the returned exiles, the Jewish tradi-
tion that Sheshbazzar is Daniel is utterly without
weight.

Sheshmonuge, in Hindit mythology, is the wife of
Waisha, second son of the first man (Puru), from
whom the mercantile caste is descended. She was cre-
ated by Brahma in the lands of the South.

Sheth (Heb. פֵּשְׁט, the), of the form two names,
more accurate than that elsewhere, the other doubtful.
1. The patriarch Seth (1 Chron. i. 1).
2. In the A. V. of Num. xxvit, 17, פֵּשְׁט is ren-
dered as a proper name, but there is reason to regard it as
an appellative, and to translate, instead of "the sons of
Sheth," "the sons of tumult," the wild warriors of
Moab, for in the parallel passage (Jer. xlvii, 45) פֵּשְׁט
shakān, "tumult," occupies the place of בֶּשַּׁח, פֵּשְׁט, is
thus equivalent to בֶּשַּׁח, בֵּשַּׁח, as in Lami. iii, 47.
Ewald proposes, very unnecessarily, to read פֵּשְׁט פֵּשְׁט =
פֵּשְׁט, and to translate "the sons of haughtiness," (Hoch-
muthshöhne). Rashi takes the word as a proper name,
and refers it to Seth the son of Adam; and this seems to
have been the view taken by Onkelos, who renders "he
shall rule all the sons of men." The Jerusalem Targum
gives "all the sons of the East:" the Targum of Jonathan ben-Uzziel retains the Hebrew word Sheth, and explains it "of the armies of Gog who were to set themselves in battle array against Israel."

She'athar (Heb. She'athar, שְׁאָתָר, Persic for star, like aστήρ [Gesen.], or Zend shathādā = "commander" [Furne;] Sept. Σαράσαθαι v. r. Σαρασάθαι, etc.), second named of the seven princes of Persia and Media, who had access to the king's presence, and were the first men in the kingdom, in the third year of Xerxes (Esth. i, 14). B.C. 488. Comp. Ezra vii, 14 and the ιέρα τῶν Παρωνίων ἤττησαν of Ctesias (14), and the statement of Herodotus (iii, 84) with regard to the seven noble Persians who slew Smerdis, that it was given them as a privilege, and they have access to the king's presence at all times, without being sent for, except when he was with the women; and that the king might only take a wife from one of these seven families. See CASHHENA; ESTHEK.

She'athar-boz'na'i (Chald. Shethar Bozenay, שֶׁתֶּחָר בּוֹזְנַי, Persic = shining star [comp. Oppert, Jour. Asiatique, 1851, p. 400;] Sept. Σαραζαβοναία v. r. Σαραζαβοναί v. r. Σαραζαβοναί, etc.), a Persian officer of rank, having a command in the province "on this side the river" under Tatten (q. v.) the satrap (תַּתָּן), in the reign of Darius Hyystaspis (Ezra v, 3; 6; vi, 6, 15). B.C. 520. He joined with Tatten and the Aparnarchies in trying to obstruct the progress of the Temple in the time of Ezra (Ezra vi, 3). He writing a letter to Darius, of which a copy is preserved in Ezra v, in which they reported that "the house of the great God" in Judaea was in process of being built with great stones, and that the work was going on fast, on the alleged authority of a decree from Cyrus. They requested that search might be made in the book of the law (ki'lešet) which was such a decree given, and asked for the king's pleasure in the matter. The decree was found at Ecbatana, and a letter was sent to Tatten and She'athar-bozna'i from Darius, ordering them no more to obstruct, but, on the contrary, to aid, the elders of the Jews in rebuilding the Temple by supplying them both with money and with beasts, corn, salt, wine, and oil, for the sacrifices. She'athar-bozna'i after the receipt of this decree offered no further obstruction to the Jews. The account of the Jewish prosperity in vi, 14-22 would indicate that the Persian governors acted fully up to the spirit of their instructions from the king. See EZRA.

Words the name She'athar-bozna'i, it seems to be certain Persian. The first element of it appears as the name She'athar, one of the seven Persian princes in Esth. i, 14. It is perhaps also contained in the name Ḩarmaz-zathra (Herod. vii, 65); and the whole name is not unlike Sattu-barsūm, a Persian in the time of Artaxerxes Mmunon (Csesa., 57). If the names of the Persian officers mentioned in the book of Ezra could be identified in any inscriptions or other records of the reigns of Darius, Xerxes, and Artaxerxes, it would be of immense value in clearing up the difficulties of that book. "The Persian alliteration of the name in cuneiform characters was probably Chitrobaranah, a word which the Greeks would have most properly rendered by Σχιτροβαράνα (comp. the Σχιτροβαραναυδος of the Sept.). Chitrobaranah would be formed from χίτρα, "race," "family," and barsha, a cognate form with the Zend barsha, "splendid" ("Speaker's Commentary, ad loc.).

She'va (Heb. text She'ga, שֵׁגָּה, margin She'va, שֵׁגָּה in Sam.), name of two Hebrews. 1. (Sept. Σααόῦ v. r. Σασάοῦ; Vulg. Sue.) Last named of the four sons of Caleb ben-Hezron by his concubine Maachah. He was the "father," i. e. founder or chief, of Machbenah and Gilbe (1 Chron ii, 40). B.C. cir. 1612. 2. (Sept. Σουα v. r. Σουα; Vulg. Sue.) The scribe or royal secretary of David (2 Sam. xx, 25); elsewhere called Seraim (2 Sam. viii, 17), Shisha (1 Kings iv, 3), and Shavasha (1 Chron. xvi, 18).

She'w-bread. See SHOW-BREAD.

Shijahs. See SHITES.

Shib'boleth (Heb. שִׁבְבֹלֶת, shib'boleth),After Jephthah had beaten the Ammonites, the men of Ephraim were jealous of the advantage obtained by the tribes beyond Jordan, and complained loudly that they had not been called to that expedition. Jephthah answered with much moderation; but that did not prevent the Ephraimites from using contemptuous language towards the4 men of Gilead. They were not from the family of Ephraim, being only fugitives from Ephraim and Manasseh, a kind of bastards that belonged to neither of the two tribes. A war ensued, and the men of Gilead killed a great number of Ephraimites; after which they set guards at all the passes of Jordan, and when an Ephraimite who had escaped came to the river-side and desired to pass over they asked him if he were not an Ephraimites? If he said No, they had him pronounce Shibboleth; but he pronouncing it Siboloth (q. v.), sustaining ע or א for א, according to the dictum of the Ephraimites, they killed him. In this way they fell 42,000 Ephraimites (Judg. xii). See JEPHTHAH.

The word Shibboleth, which has now a second life in the English language in a new signification, has two meanings in Hebrew: (1) an ear of corn (Gen. xli, etc.); (2) a stream or flood: and it was, perhaps, in the latter sense that this particular word suggested itself to the Gileadites, the Jordan being a rapid river. The word, in the latter sense, is used twice in Ps. lxxxix, in verses 2 and 15, where the translation of the A. V. is "the floods overflow me," and "let not the water-flood overflow me," also in Isa. xxxvii, 12 ("channel"); Zech. iv, 12 ("branch"). If in English the word retained its original reference, after passage might be translated "let not a shibboleth of waters drown me." There is no mystery in this particular word. Any word beginning with the sound sš would have answered equally well as a test.

The above incident should not be passed over without observing that it affords proof of dialectical variations among the tribes of the same nation, and speaking the same language, in those early days. There can be no wonder, therefore, if we find in later ages the same word written different ways, according to the pronunciation of different tribes, or of different colonies or residents on opposite sides of a river; when, for instance, the Hebrews, etc. That this continued is evident from the peculiarities of the Galilean dialect, by which Peter was discovered to be of that district (Mark xiv, 70). Before the introduction of vowel-points (which took place not earlier than the 6th century A.D.) there was nothing in Hebrew to distinguish the letters Shin and Sin, so it could not be known by the eye in reading when sš was to be sounded after š, just as now in English there is nothing to show that it should be sounded in the words sugar, Asia, Perú; or in German, according to the most common pronunciation, after s in the words Sprach, Spiel, Storm, Stiefel, and a large class of similar words. It is to be noted that the sound sš is unknown to the Greek language, as the English th is unknown to so many modern languages. Hence in the Sept. proper names commence simply with s which in Hebrew commence with sh; and one result has been that, through the Sept. and the Vulg., some of these names, such as Samsim, Samson, Simon, Solomon, having become altered in the Greek form in the English language, have been retained in this form in the English version of the Old Testament. Hence, likewise, it is a singularity of the Sept. version that in the passage in Judg. xii, 6 the translator could not introduce the word "Shibboleth" and has substituted one of its translations, σχιψος, "an ear of corn," which tells the
original story by analogy. It is not impossible that this word may have been ingeniously preferred to any Greek word signifying "stream," or "flood," from its first letters being rather harsh-sounding, independently of its containing a guttural. See Günther, De Dialect. Tribuum Judaic. Ephraim. et Benjamín (Lips. 1714). See Hebrew Language.

Shib’mah (Numb. xxxii. 38). See SHIBMAH.

Shi’uron [some Shik’ron] (Heb. Shikron, שִׁכְרוֹן, drunkennes [as in Ezek. xxiii. 33; xxxix. 19; but Fürst says fruitfulness]; Sept. Σιχωρός v. τ’ Ακαρώνι [imitating the π directive], a town near the western end of the northern boundary of Judah, between Ekron and Mt. Baalah towards Jabneel (Josh. xvi. 11). It seems to have been in Dan, as it is not enumerated among the cities of Judah (ver. 21-63). The Targum gives it as Shikron, and with this agrees Eusebius (Onomast. s. v. Σιχωρός), though no knowledge of the locality of the place is to be gained from his notice. Neither Schwarz (Palest. p. 98) nor Porter (Handb. for Pal. p. 275) has discovered any trace of it. It is, perhaps, the present ruined village Beit Shit, about half-way between Ekron and Ashdod.

Shidders, in Hindó, mythology, is a class of good genii, or dectes, not to be identified with the dervs of the Persians, which are evil genii.

Shield is the rendering in the A. V. of the four following Hebrew words, of which the first two are the most usual and important; likewise of one Greek word.

1. The tsinadh ( Heb. צִנָּד, from צָנָד, to protect) was the large shield, encompassing (Psa. v. 12) and forming a protection for the whole person. When not in actual conflict, the tsinadh was carried before the warrior (1 Sam. xvii. 7, 41). The definite article in the former passage (the shield, not "a shield") as in the A. V.) denotes the importance of the weapon. The word is used with "spear," rómach (1 Chron. xii. 8, 14; 2 Chron. xii. 92, etc.), and châmád (1 Chron. xii. 94) as a formula for weapons generally.

2. Of smaller dimensions was the magén ( Heb. מגון, from מגן, to cover), a buckler or target, probably for use in hand-to-hand fight. The difference in size between this and the tsinadh is evident from 1 Kings x. 16, 17; 2 Chron. ix. 15, 16, where a much larger quantity of gold is named as being used for the latter than for the former. The portability of the magén may be inferred from the notice in xii. 9, 10; and perhaps also from 2 Sam. i. 21. The word is a favorite one with the poets of the Bible (see Job x. 26; Psa. iii. 3; xviii. 2, etc.). Like tsinadh, it occurs in the formulated expressions for weapons of war, but usually coupled with light weapons, the bow (2 Chron. xiv. 8; xvii. 7), darts, חומץ (xxxii. 5).

Ancient Egyptian Phalanx. (From the monuments.)

3. What kind of arm the skélét ( Heb. שֵׁלֶט) was is impossible to determine. By some translators it is rendered a "quiver," by some "weapons" generally, by others a "shield." Whether either or none of these is correct, it is clear that the word had a very individual sense at the time; it denoted certain special weapons taken by David from Hadadezer, king of Zobah (2 Sam. vii. 7; 1 Chron. xviii. 7), and dedicated in the temple, where they did service on the memorable occasion of Joash's proclamation (2 Kings xi. 10; 2 Chron. xxiii. 9), and where their remembrance long lingered (Cant. iv. 4). From the fact that these arms were of gold, it would seem that they cannot have been for offence. In the two other passages of its occurrence (Jer. ii. 11; Ezek. xxvii. 11) the word has the force of a foreign arm.

4. In two passages (1 Sam. xvii. 45; Job xxxix. 23) kítim ( הָרֵד), a dart, is thus erroneously rendered. To these we may add socherád ( שֶׁכֶרֶד), "buckler," a poetical term, occurring only in Psa. xci. 4.

Finally, in Greek, σπόνιος (probably a door, hence a large shield) occurs metaphorically once (Eph. vi. 16).

Among the Hebrews the ordinary shield consisted of a framework of wood covered with leather; it thus admitted of being burned (Ezek. xxxix. 9). The magén was frequently cased with metal, either brass or copper; its appearance in this case resembled gold, when the sun shone on it (1 Macc. vi. 39), and to this rather than to the practice of smearing blood on the shield we may refer the redness noticed by Nahum (ii. 3). The surface of the shield was kept bright by the application of oil, as implied in Isa. xxvi. 5; hence, Saul's shield is described as "not anointed with oil," i.e. dusty and gory (2 Sam. i. 21). Oil would be as useful for the metal as for the leather shield. In order to preserve it from the effects of weather, the shield was kept covered except in actual conflict (Isa. xxvi. 6; comp. Cæsar, B. G. ii. 21; Cicero, Nat. Deor. ii. 14). The shield was worn on the left arm, to which it was attached by a strap. It was used not only in the field, but also in besieging towns, when it served for the protection of the head, the combined shields of the besiegers forming a kind of testudo (Ezek. xxxvi. 8). Shields of state were covered with
Modern Oriental Shields and Spears.
a, large Arabic shield; b, small do.; c, side view of the same; d, large Turkish shield; e, Mameluke shield; f, Arabian spear; g, Turkish; h, Mameluke.

beaten gold. Solomon made such for use in religious processions (1 Kings x, 16, 17); when these were carried off they were replaced by shields of brass, which, as being less valuable, were kept in the guard-room (xiv, 27), while the former had been suspended in the palace for ornament. A large golden shield was sent as a present to the Romans when the treaty with them was renewed by Simon Maccabaeus (1 Macc. xiv, 24; xv, 18); it was intended as a token of alliance (σύμβολον της συμμαχίας, Josephus, Antiq. xiv, 8, 5); but whether any symbolic significance was attached to the shield in particular as being the weapon of protection is uncertain. Other instances of a similar present occur (Suett’s Cat. II. 16), as well as of complimentary presents of a different kind on the part of allies (Cicero, Verr. 2 Act. iv, 29, 67). Shields were suspended about public buildings for ornamental purposes (1 Kings x, 17; 1 Macc. iv, 57; vi, 2). This was particularly the case with the shields (assuming shield to have this meaning) which David took from Hadadezer (2 Sam. viii, 7; Cant. iv, 4), and which were afterwards turned to practical account (2 Kings xi, 19; 2 Chron. xxiii, 9). The Gammadim similarly suspended them about their towers (Ezek. xxvii, 11). See GAMADIM. In the metaphorical language of the Bible the shield generally represents the protection of God (e.g. Ps. iii, 3; xxxii, 7); but in xviii, 9 it is applied to earthly rulers, and in Eph. vi, 16 to faith.

The large shield (ἄρματος, dípeus) of the Greeks and Romans was originally of a circular form, and in the Homeric times was large enough to cover the whole body. It was made sometimes of osiers twisted together, sometimes of wood, covered with ox-hides several folds thick. On the centre was a projection called διανέκτος, umbo, or blunted end, which sometimes terminated in a spike. After the Roman soldier received pay, the clipeus was discontinued for the scutum, ármaí, of oval or oblong form, and adapted to the shape of the body. Significant pieces on shields are of great antiquity. Each Roman soldier had his name inscribed on his shield. Paul (Eph. vi, 16) uses the word šúpó and ármaí, because he is describing the armor of a Roman soldier. See KITTO, Pict. Bible, note at Jude, 9. See ARMOR.

Shields, Alexander, was an English clergyman and minister of St. Andrew’s. He was chaplain to the Cameronian Regiment in 1689. In August, 1699, he accompanied the second Darien expedition, and died, “worn out and heart-broken,” in Jamaica (see Macaulay, Hist. of Eng. [1861], VII, xxiv). His published works are, A Hind Let Loose; or, A Historical Representation of the Church of Scotland (1687, 8vo)—History of the Scotch Presbytery (1691, 4to), an epitome of the foregoing—An Inquiry into Church Communion (2d ed. Edinb. 1747, sm. 8vo);—The Scotch Inquisition (1749, sm. 8vo);—also Sermons. See Allibone, Dict. of Brit. and Amer. Authors, s. v.; Darling, Cyclop. Bibliog. s. v.

Shields, Hugh K., a Presbyterian minister, was born near Elk Ridge Church, Giles County, Tenn., Dec. 10, 1806. He was converted to God in his seventeenth year, and, feeling his call to the work of the ministry, he entered upon a course of study with that object in view. He graduated at an academy near Elk Ridge, then at Jackson College, Columbia, Tenn., studied theology privately, and was licensed by West Tennessee Presbytery in 1836, and ordained by the same in 1837. He subsequently preached at the following places: Bethbeere, Hopewell, Savannah, Elk Ridge, Cornersville, Richland, Campbellsville, and Lynnville—all in Tenn. His active ministry lasted twenty-seven years: two years before his death, Sept. 15, 1865, he was disabled from work by a severe accident. Mr. Shields was a zealous and faithful minister of the Gospel, exhibiting to a high degree the characteristics of one who walked with God. See Wilson, Presb. Hist. Almanac, 1866, p. 367. (J. L. S.)

Shields, James, a Presbyterian minister, was born in Pittsburgh, Pa., Dec. 11, 1812. He graduated at the Western University of Pennsylvania, at Pittsburgh, in 1830, studied theology four years under the instruction of Revs. Mungo Dick and John Presley, D.D., was licensed April 2, 1834, by the Associate Reformed Presbytery of Monongahela, and ordained in 1835 as pastor of the congregations of Fernanagh and Tuscarora, Juniata County, Pa. Here he labored with varied success until the spring of 1859, when, on account of failing health, he ceased to preach in the Tuscarora branch of his charge, and gave all his time to the Fernanagh congregation. He died Aug. 19, 1862. Mr. Shields pos-

sed a mind of more than ordinary power, and his ex-

ercises were always of a high order. See Wilson, Presb. His. Almanac, 1864, p. 334. (J. L. S.)

SHIER-THURSDAY. See SHIER-THURSDAY.

Shie-tshih, gods of the land and grain among the

Chinese. There is an altar to these deities in Peking, which is square, and only ten feet high, being divid-
ed into five feet by five feet of a side, the square measures fifty-eight feet. The

emperor alone has the privilege of worshipping at this

altar, and it is not lawful to erect a similar one in

any part of the empire for the use of any of his sub-

jects.

Shigga'n (Heb. Shigga'ón, יִשְׁגַּגוֹן, Sept. θηλύς, Vulg. Psalmus [Psa. vii, 1]), a particular kind of

psalm, the specific character of which is not now known.

In the singular number the word occurs nowhere in Hebre

w except in the inscription of the above psalm; and

there seems to be nothing peculiar in that psalm to

distinguish it from numerous others in which the au-

thor gives utterance to his feelings against his enemies

and implores the assistance of Jehovah against them,

so that the contents of the psalm justify no conclusive

inference as to the manner of its writing. In the in-
scription to the ode of the prophet Habakkuk (iii, 1),

the word occurs in the plural number; but the phrase in

which it stands, al shigga'ónah, is deemed almost unani-

mously, as it would seem, by modern Hebrew scholars, to

mean "after the manner of the shigga'ón," and to

be merely a direction as to the kind of musical meas-

ures by which the ode was to be accompanied. This

being so, the ode is no real help in ascertaining the mean-

ing of shigga'ón; for the ode itself is not so called, though

t it is directed to be sung according to the measures of

the shigga'ón. Indeed, if it were called a shigga'ón,

the difficulty would not be diminished; for, indepen-

dently of the inscription, no one would have ever

suggested that the ode and the psalm belonged to the same

species of sacred poem. And even since their possible

similarity has been suggested, no one has definitely

pointed out in what that similarity consists, so as to

justify a distinct classification. In this state of uncer-

tainty, it is natural to endeavor to form a conjecture as to

the meaning of shigga'ón from its etymology; but,

unfortunately, there are no less than three rival etYO-

mologies, each with plausible claims to attention.

Genesis and Fürst (s. v.) concur in deriving it from נִשָּׂגַה

(Piel of נְשַׁגָּה), in the sense of magnifying or extol-

ling with praises: and they justify this derivation by

kindred Syriac words. Shigga'ón would thus mean a

hymn or psalm; but its specific meaning, if it have any,

as applicable to Psa. vii, would continue unknown.

Ewald (Die poetischen Bücher des alt en Bundes, 1, 29),

Roediger (s. v. in his continuation of Gesenius's The-

aurus), and Delitzsch (Commentar über den Psalter, 1,

51), derive it from נִשָּׂגַה, in the sense of reflecting, as from

wine, and consider the word to be somewhat equivalent to n dithyrambus; while De Wette (De Psalm. p. 34),

Lee (s. v.), and Hitzig (Die zwolf kleinen Propheten, p.

29) interpret the word as a psalm of lamentation, or a

psalm in distress, as derived from Arabic. Huppfeld, on

the other hand (Die Psalmen, 1, 109, 199), conjectures

that shigga'ón is identical with siggón (Psa. ix, 16), in

the sense of poem or song, from נַשָּׂגָה, to meditate or com-

pose; but even then no information would be conveyed as to the specific nature of the poem. As to the

inscription of Habakkuk's ode, נִשָּׂגָּה, the translation of the Sept. is פַּדָּר מִי-

תָּא, which conveys no definite meaning.

The Vulgate translates pro ignorantia, as if the word had been shegagath, transposition through igno-

rantia (Lex. v. 27, Numb. xv, 27; Eccles. v, 6), or shag-

gath (Psa. xix, 13), which seems to have nearly the

same meaning. Perhaps the Vulgate was influenced by the Targum of Jonathan, where shigga'ón seems to

be translated נִשָּׂגָּה. In the A. V. of Hab. iii, 1, the

rendering is "upon shigga'ónth," as if shigga'ónth were

some musical instrument. But under such circum-

stances "al (הָ)" must not be translated "upon" in the

sense of playing upon an instrument. Of this use there is

not a single undoubted example in prose, although the use on musical instruments is frequently referred to;

and in poetry, although there is one passage (Psa. xvi

2, 9) where the word might be so translated, it might

equally well have been rendered there "as the accompa-

nators of" the musical instruments therein specified; and this translation is preferable. Some writers even doubt

whether "al signifies "upon" when preceding the sup-

posed musical instruments Gittith, Machalath, Nezinat,

Nechlioth, Shushan, Shoshannim (Psa. vii, 1; i, xxxvii,

1; i,xxxiv; 1; i, xxxvii; lx, 1; lxv; 1; lxv; 1;xxxvii, 1; li, v, 1; lx, 1;

lxv; 1; lxv; 1; xxxvii, 1). Indeed, all these words are

referred to by Ewald (Pet. Bisch. i, 77) as meaning nu-

sical keys, and by Fürst (s. v.) as meaning musical

bands. Whatever may be thought of the proposal of

the supposed instruments, it is very singular, if those six words signify musical instruments that are not one of those already mentioned elsewhere in the whole Bible. See PSALMS.

Shig'gonoth (Hab. iii, 1). See Shiggonah.

Shigmu, in Chinese mythology, was the mother of

Fo. While still a virgin she ate a lotus-flower, found

while bathing, and was thus impregnated by some deity.

Shi'hon (Heb. Shion), רועא; Sept. Σειόων

v. t. Διαύω; Vulg. Seon; A. V. originally "Shion"); a town of

Issachar, named only in Josh. xix, 19, where it occur-

s between Haphrah and Anaharath. Eusebius and Je-

rome (Onomast.), mention it as then existing "near

Mount Tabor." A name resembling it at present in

that neighborhood is the Kirbet Shio in Dr. Schultz

(Zimmermann, Map of Galilee, 1861), one of a few mile

half north-west of Deburi. This is probably the place

mentioned, by Schwartz (Palest. p. 166) as "Sain

between Duberich and Jafa." The identification is,

however, very uncertain, since Shin in appears to con-

tain the Ain, while the Hebrew name is in the Ath.

On this and other accounts we prefer the position of

the modern village esh-Shagorah, a little north of

Tabor (Robinson, Researches, iii, 219). note.

Shi'hor (Heb. Shicho'or, שִׁחוֹר [thus only in Josh.

xxxii, 3; 1 Chron. xiii, 3; or שִׁחוֹר [Jer. ii, 18], or שִׁיחוּר [ Isa. xxxiii, 3], dark; once with the art. "Shiho'or.

Josh. xiii, 8, and once with the addition "of Egypt," 1

Chron. xiii, 5.; Sept. Γράνων, ἅ ἀνείωσεν, εἰρύνας, and μεταγέλατος;

Vulg. Siker, Nilus, fluvis turbidus, and aqua turbida; A. V. "Shior" in all passages except 1 Chron. xiii, 5),

one of the names given to the river Nile, probably aris-

ing from its turbid waters, like the Greek Μικρᾶς (Gesen.

Thesaurus, s. v.). Several other names of the Nile may

be compared. Νιλός itself, if it be, as is generally sup-

posed, of Iranian origin, signifies "the blue," that is, "the

dark" rather than the turbid; for we must then compare

the Sanscrit Nilah, "blue," probably especially "dark

blue," also even "black," as "black mud." The Arabic

azarkh, "blue," signifies "the dark" in the sense of<br>Arab., Azafr, or Blue River, applied to the eastern of the two

great confluents of the Nile. Still nearer is the Latin

Melo, from μικρᾶς, a name of the Nile, according to Festus

and Servius (ad Virg. Georg. iv. 291; A. N., i, 475; iv. 246); but little stress can be laid upon such a word resting on no better authority. With the classical writers it is the soil of Egypt that is rather its type: the Nilo-Satrapia, too, in hieroglyphics, the name of the country, Kemi, means "the black," but there is no name of the Nile of like signification. In the ancient painted sculptures, however, the figure of the Nile-god is colored differently according as it represents the river during the time of the inundation, and during the rest of the year; in the former case red, in the latter blue. See Nile.

There are but three occurrences of Shihor unqualified

as describing its color.
In the Bible, and but one of Shihor of Egypt, or Shihor-nizraim. In 1 Chron. xiii, 5 it is mentioned as the southern boundary of David's kingdom: "David gathered all Israel, from Shihor of Egypt even unto the entering of Hamath."

At this period the kingdom of Israel was at the height of its prosperity. David's rule extended over a wider space than that of any other monarch who ever sat upon the throne; and, probably, as an evidence of this fact, and as a recognition of the fulfilment of the divine promise to Abraham (Gen. xv. 18)-"Unto thy seed have I given this land, from the river of Egypt unto the great river, the river Euphrates"-the sacred historian may here have meant the Nile. Yet, in other places, where the northern boundary is limited to the "entrance of Hamath," the southern is usually "the torrent of Egypt," that is, Wady (장) el-Arish (Numb. xxxiv, 5; 1 Kings viii, 65). There is no other evidence that the Israelites ever spread westward beyond Gaza. It may seem strange that the actual territory dwelt in by them in David's time should thus appear to be spoken of as extending as far as the easternmost branch of the Nile; but it must be remembered that, at this one tribe, at this one period, had spread beyond even its first boundaries, and also that the limits may be those of David's dominion rather than of the land actually fully inhabited by the Israelites.

The passage in Josh. xiii, 3 is even more obscure. The sacred writer is describing the territory still remaining to be conquered at the close of his book, and then about to be divided among the Israelites. It is this,"(in the face of, not 'east of,' but rather 'on the front of') Egypt, even unto the borders of Ekron northward." Keil argues that Wady el-Arish, and not the Nile, must here be meant (Comment, ad loc.) but his arguments are not conclusive. Joshua may have had the Lord's covenant-promise to Abraham in view if so, Shihor means the Nile; but, on the other hand, if he had the boundaries of the land as described by Moses in Numb. xxxiii, 5 sq. in view, then Shihor must mean Wady el-Arish. It is worthy of note that, while in all the other passages in which this word is used it is an nouns, here it has the article. This does not seem to indicate a specific meaning, but it can scarcely be doubted that here and in 1 Chron. xiii, 5 the word is employed in the same sense. The use of the article indicates that the word is, or has been, an appellative- rather the former if we judge only from the complete phrase. It must also be remembered that Shihor-nizraim is used interchangeably with Nahal-nizraim, and that the name Shihor-nizraim, in the north of Palestine, unless derived from the Egyptians or the Phoenician colonists of Egypt, on account of the connection of that country with the ancient manufactures of glass, shows that the word Shihor is not restricted to a great river. That the stream extended by Shihor, which is mentioned as a navigable river in a passage in Isaiah, where it is said of Tyre, "And by great waters, the sowing of Shihor, the harvest of the river (Yrdr, ניח) [is] her revenue" (xxili, 8), Here Shihor is either the same as, or compared with, Yiur, generally thought to be the Nile. In Jeremiah the identity of Shihor with the Nile seems distinctly stated where it is said of Israel, "And now what hast thou to do in the way of Egypt to drink the waters of Shihor? Hast thou to do in the way of Asshur to drink the waters of the river?" i.e. Euphrates (ii, 18). Genesius (ut sup.) considers that Shihor, wherever used, means the Nile; and upon a careful consideration of the several passages, and of the etymology of the word, we are of the opinion that it cannot appropriately be applied to Wady el-Arish, and must therefore be regarded as a name of the river Nile (see Jerome, ad Isai. xxiii, 3; Icldan, Palest, p. 280). See RIVER OF EGYPT.
so remote from the scene of John's labors and the other events of the Gospel history, seems to forbid this.

**Shillem** (Heb. *Shillem*, שִּׁלֶּם, requital, as in Deut. xxxii, 55; Sept. Σιλλήμ, v. r. Σιλλημ, Σιλλημα, etc.), a son of Naophali (Gen. xlv, 24; Num. xxvii, 49); elsewhere (Num. viii, 13) one of Shillem (q. v.)

**Shilemite** (Heb. collectively with the article *hash-Shilemim*, תְּשִׁילֶםֵּית, Sept. וּסְדָלָםְמִי), the patronymic title of the descendants of Shillem (q. v.), the son of Naophali (Num. xxvii, 49).

**Shiloah** appears in the A. V. as the rendering of two words in the Hebrew, the one apparently a person, and the other certainly a place. In the following treatment of both we bring together the Scriptural and modern archeological information bearing upon them.

1. **Shiloh** (Pr. viii, 6). See Siloa.

2. **Shiloh** appears in the A. V. as the rendering of two words in the Hebrew, the one apparently a person, and the other certainly a place. In the following treatment of both we bring together the Scriptural and modern archeological information bearing upon them.

(a) Those of the first class coincide, (1) for the most part, with the ancient interpreters, taking רָאָשׁ as equivalent to רָשָׁן, and this to be made up of ש, the contraction of רָאָשׁ, who, and ר, the dative of the third person pronoun. The rendering, accordingly, in this case, would be conuđא esse, or cui est, utrumque est, in whom it belongs, i.e. the sopher or dominion. This interpretation is due to Stolz (Eisn. in d. A. T. i, 507, and Pat. Mess., i, 179). It is approved also by Hese, De Wette, Krummacher, and others, including Turner (Companion to Genesis, ad loc.). The authority of the ancient versions, already alluded to, is the principal ground upon which its advocates rely. But to this sense it is a serious objection that it necessarily involves a violation of the word יִשָּׁה, which was known in the time of Moses.

There is no other instance of it in the Pentateuch, and it is only in the book of Judges that we first meet with it. However the rendering of the old translators may be accounted for, there is no sufficient ground for the belief that the form in question was the received one in their time. If it were, we should doubtless find some traces of it in the existing manuscripts, for though these copies exhibit the reading רָאָשׁ, not one of them gives רָאָשׁ, and but very few רָאָשׁ, which Hengstenberg deems of no consequence, as the omission of the Yod was merely a defective way of writing, which often occurs in words of similar structure. An argument for this interpretation has, indeed, been derived from Ezek. xxii, 57, where the words "until he shall come whose is the dominion," לְרָאָשׁ הָאָדֶם, are regarded as an obvious paraphrase of לְרָאָשׁ הָאָדֶם. But to this it may be answered that while Ezekiel may have had the present passage in his eye, and intended an allusion to the character or prerogatives of the Messiah, yet there is no evidence that this was designed as an interpretation of the name under consideration. The reasons, therefore, appear ample for setting aside, as wholly untenable, the explication of the time here propounded, without advertmg to the fact that the ellipsis involved in this construction is so unnatural and violent that no parallel to it can be found in the whole Scriptures.

(2) Another solution proposed by some expositors is, to derive the name יִשָּׁה from יִשָּׁה, the son of Jacob, and the suffix ר for ר. This will yield the reading "until his (Judah's) son or descendant, the Messiah, shall come." Thus the Targ. Jot., "Until the time when the king's Messiah shall come, the little one of his sons." This view is favored by Calvin (ad loc.) and by Knapp (Doym. ii, 198), and also by Dathe. There is, however, no such word in known Hebrew, and as a plea for its possible existence, reference is made to an Arabic word, which agrees with the same signification. The only philological defense is (with Luther) to resolve יִשָּׁה into a synonym with יִשָּׁה, after-birth (Deut. xxviii, 57), rendered "young one;" but this requires us to adopt the unnatural supposition that the term properly denoting the secundines, or the membrane that encloses the fetus, is
taken for the fœtus itself. Besides, this exposition has an air of grossness about it which prompts its immediate rejection.

(b) The second class consists of those who consider it as a radical or simple derivative. Among these, again, there are two principal opinions.

1. By translating the word as it is translated everywhere else in the Bible, viz. as the name of the city in Ephraim where the ark of the covenant remained during such a long period, a sufficiently good meaning is given to the passage without any violence to the Hebrew language, and, indeed, with a precise grammatical parallel elsewhere (comp הֵרָזָתָן, 1 Sam. iv, 12). The simple translation is, "The sceptre shall not depart from Judah, nor the ruler's staff from between his feet, till he shall go to Shiloh." In this case the allusion would be to the primacy of Judah in war (Judg. i, 1, 2; xx, 18; Numb. ii, 3; x, 14); which was to continue until the Promised Land was conquered, and the ark of the covenant was seemingly deposited at Shiloh. Some Jewish writers (especialy Aben-Ezra) had previously maintained that Shiloh, the city of Ephraim, was referred to in this passage; and Servetus had propounded the same opinion in a fanciful dissertation, in which he attributed a double meaning to the words (De Trinitate, ii, 61, ed. 1556) above translation, as proposed and defended on critical grounds, was first suggested in modern days by Tellor (Nota Critica et Exegesis in Gen. xxxi. Deut. xxviii, Exod. xx, Judg. v [Halé et Helmstädtt, 1766]); and it has since, with modifications, found favor with numerous learned men belonging to various schools of theology, such as Eichhorn, Hitizig, Tuch, Bleek, Ewald, Delitzsch, Rödiger, Kaish, Luzzatto, and Davidson.

The objections to this interpretation are set forth at length by Hengstemberg (Christology of the Old Test. ii, 1 a, 41, Keith's transl.), and the reasons in its favor, with all the accounts of various interpretations that have been suggested by others, are well given by Davidson (Introduction to the Old Test. i, 199-210). As they are not of a grammatical character, they will be considered below.

2. But an exposition of far more weight, both from its intrinsic fitness and from the catalogue of distinguished names which have espoused it, is that which traces the term to the root שָׁלַח, qââkatû, to rest, to be at peace, and makes it equivalent to pacificator, peacemaker, or pacifier, and the allusion is either to Solomon, whose name has a similar signification, or to the expected Messiah, who in Isa. ix, 6 is expressly called the "Prince of Peace." This was once the translation of Genesius, though he afterwards saw reason to abandon it (see his Herzi's trans. of the O. T., 1759). The opinion of Hengstemberg in his Chriatologv of the Old Test. p. 69, and of the grand rabbi Woges, in his translation of Genesis, a work which is approved and recommended by the grand rabbins of France (Le Pentateuque, ou les Cinq Livres de Moïse [Paris, 1800]).

But, on the other hand, if the original Hebrew text is correct as it stands, there are three objections to this translation, which, taken collectively, seem fatal to it. 1st. The word Shiloh occurs nowhere else in Hebrew as the name or appellation of a person. 2d. The only other Hebrew word, apparently, of the same form, is Giloh (Josh. xv, 51; 2 Sam. xv, 12); and this is the name of a city, not of a person. 3d. The idea conveyed by the proposed interpretation is that of causing or effecting peace—an idea for which the Hebrew has an appropriate form of expression, and which, in this word, would normally be מַשָּׁלָח, mashlách. The actual form, however, is diverse from this; and though several examples are adduced by the advocates of this interpretation of analogous derivations from a triliteral root, as יָרָר from יָרָר, יָרָר, יָרָר, יָרָר, יָרָר, etc., yet it is certain that the original characteristic of this form is a passive instead of an active sense, which requires according to the exegesis proposed. We must therefore understand the term as expressing the gentle character of the Messianic sway in general. The other objections will be considered below.

3. The translation of Shiloh is perhaps that of "rest," from the same root, taken passively. The passage would then run thus: "The sceptre shall not depart from Judah . . . till rest come [till he come to rest], and the nations obey him;" and the reference would be to the Messiah, who was to spring from the tribe of Judah. This translation deserves respectful consideration, as having been ultimately adopted by Geuenius. It was preferred by Vater, and is defended by Knobel in the Exegetisches Handbuch (Gen. xlix, 10). This import of the term, however, would rather require a fem. than a masc. form. It likewise remains subject to the objection that Shiloh occurs nowhere else in the Bible in this sense, and that the import thus becomes neither apt nor noteworthy.

To say nothing of other objections, one circumstance seems decisive, so clearly decisive that Hofmann has given up this last interpretation and embraced the common one, pronouncing the interpretation of Hosea 3.6 makes Shiloh impossible. The circumstance is this, that Shiloh, originally Shilon, and making its adjective as Shilone, belongs to a class of nouns in Hebrew which are never appellatives or common nouns, but always proper names either of persons or of places; and this is unaffected by a variation in the etymology, whether we derive it, with almost all authorities, from פָּלָשָׁה (phalashah), or whether, with Rödiger, from the root of Solomon's name, פֶּלֶשׁ (phelash), reckon that there has been a change of the letters and w. (comp. also 1 Kings, i, 1 sq.; 2 Kings, iv, 1 sq.; 2 Kings, x, 14); and that this war could not be said to be finished and the victory to be gained till after the victorious Jews had entered Shiloh, a city standing almost in the center of the land and west of Jordan, and had there set up the sacred ark; then, at length, when the peoples of Canaan had been reduced to obedience, Judah ceased to be leader in the war, and the tranquilized country was portioned out among the tribes." It is not very easy to see how this paraphrase arises out of the words of the text; nor, should we even admit that it does, do we seem to have attained to any very satisfactory meaning. But, apart from any special objections to some particular exposition, we urge against this translation:

1. There is no evidence of the existence of the city Shiloh in the time of Jacob, or, if it did exist, it is not improbably known by some other name; for we shall have occasion to suggest that the name of the city was derived from this prophecy. Nay, granting that it existed under the name of Shiloh, it is a gratuitous assertion that Jacob spoke to his sons of a place so entirely unknown to them, with which we have no respect to think that he or they ever had any connection.

In this respect it stands entirely on a different footing from the city Shechem, to which there is thought to be a reference in Gen. xliv, 22.

2. There is something which requires to be explained in the expression "until he come to Shiloh."
Supposing it to refer to the place to which the tabernacle was brought, and to which it was taken when Shiloh was destroyed, it is clear that this "coming to Shiloh" more than the other tribes, "Judah, of which tribe Moses spake nothing concerning priesthood?" At the very least, it suggests a grave doubt whether Judah really was meant to be the subject of the verb; the more so that it would have been extremely easy to write the sentence so as to leave room for doubt as to the grammatical construction.

(3.) A violent surprise is given to us by this limitation of Judah's lead or rule to the time anterior to his coming to Shiloh. The prophecy of Jacob was in reference to things which should befall them in the last days, a future for which they were specially fitted. Or, if this be a vague or an indefinite expression of this phrase, it is much at variance with a prophecy of Judah's supremacy for forty-five or fifty years, from the Exode till the coming of the tribes to Shiloh; of which period thirty-eight years were spent in a state of suspension from the favor of God, so far as this was manifested by church privileges. Was this all the pre-eminence blessing of Judah? Was a sudden termination to be put to the triumphal progress, "conquering and to conquer," which we anticipated as we read ver. 8, 9? Or, at least, must a veil be thrown over what remained of it subsequent to the arrival at Shiloh?

This question. Does this interpretation harmonize in any way with the facts of the case? Delitzsch is well aware that, on this interpretation, the prophecy implies, first, that Judah had the sceptre and the lawgiver till it came to Shiloh, and, secondly, that this coming to Shiloh was a turning-point in its history; and it is incomprehensible to us how he persuades himself into affirming these two propositions.

As to the former, we have not space for discussing the varieties of translation proposed; but, for the sake of argument, let us concede as much as possible in the way of cutting down and restricting the meaning of these terms. So far as we are aware, the pre-eminence was assigned to Judah only in one respect, during the march through the wilderness—that it took the first place among the tribes in the order of marching (Numb. ii. 2, 3); unless we add that the same order was observed in the consecration-offerings at the tabernacle (Ex. xiii. vii.). But in this we see no more than a symbol of the power and authority which were in the hands of Moses and Aaron the Levites, and next in those of Joshua the Ephraimite. Let any one compare the dying blessing of Moses with this blessing of Jacob, and see how brief is the notice of Judah (a tribe certainly the most numerous, the most powerful, and the most favored in the estimation of the patriarchs); and how full are the blessings pronounced upon Levi and Joseph. We do not either deny or under-value the honor of the position assigned to Judah; but we say it was of little value unless taken in connection with this prophecy and regarded as a prognostic or a pledge of its fulfillment in due time; or, at most, a prelude to it and a preparation for it. The proper fulfillment began in David's time; and the sceptre and the lawgiver are to be sought for in his line, to which the promises were made of an unending dominion. But before David came to hold the sceptre, the city Shiloh had ceased to be the religious center of the people of Israel, and its mention in this prophecy would be equally inexplicable. As to the second proposition involved in this interpretation, there is not even a shadow of evidence that the coming to Shiloh was a turning-point in the relations of the tribe of Judah either to the other tribes or to the heathen. Whatever primacy Judah had enjoyed, and which may perhaps have been enjoyed, was certainly not continued to enjoy, it was the first to be sent to the wars after Joshua's death, yet alone and not command- ing the others (Judg. i. 1, 2); it was sent foremost into the battle in the civil war with Benjamin (xx. 18), and it furnished the first of the judges (iii. 9). These are certainly small matters, but they are quite as great as any which can be named anterior to the arrival at Shiloh. Still they are in perfect harmony with the fact that the time for Judah's sceptre and lawgiving had not yet come, as the age of the judges was the period in which Ephraim was the leading tribe (comp. viii. 1; xii. 1-6; Psa. lxx.).

The difficulties in the way of adopting this translation are, however, very great that in his commentary Tuch suggested a modification which has met with some little support. He supplies an indefinite subject to the verb—"The sceptre shall not depart from Judah...as long as [people] come to Shiloh;" that is to say, forever. The objections to this rendering are so overwhelming as to be hardly even open to discussion. It may be that the phrase was not even proposed but for the perplexities of those who deny that Shiloh is a person. There is an awkwardness in supplying this subject, there is an entire misapprehension of the meaning of the conjunction; and the use of the phrase "as long as people come to Shiloh," in the sense "forever," has no parallel in Scripture, and appears most unnatural when we look at it in the light of history.

2. On the Reference of the Name Shiloh to the Messiah.—The old and simple interpretation is that the sovereignty in Israel belongs to Judah, and that this prerogative shall not be exhausted till the promised Son shall bring all the blessings to the highest perfection.

a. Arguments in Favor of this Interpretation. (1.) The name is now generally admitted to be an adjective meaning "peaceful," a title most appropriate to our Saviour, and confirmed by parables or imitations to which it will be necessary to refer. It is highly probable that there is a close connection between the name of the person here and that of the place which is mentioned in the other texts in which the word occurs; and this connection indicates the circumstance by which many have been led to adopt the explanation which we have rejected, owing to its appearance in all the other texts; but they felt that the place Shiloh was not to be thrust out of this text without good reason. Now the fact is not that there is here a reference to the place, for all attempts to make this intelligible and satisfactory have failed; but that in the place there is a reference to this text. Shiloh was the name given to the place where the ark first rested, and it was the throne of a city which bore this name was selected as the resting-place of the ark, because it expressed the hope of the people that in this place they should find "one greater than the Temple." Shiloh the place reminded them continually of this prophecy of Shiloh the person. Shiloh the name, "him that was to come." Similar to this is the name Jerusalem, "possession of peace," or "foundation of peace," to which the ark was afterwards carried as Jehovah's place of rest forever, which he had desired, and in which the Lord whom they sought should suddenly come to his temple. This reference to the person Shiloh in the name of the place where the people met with God has a parallel in the history of the most prominent persons after the sceptre and the lawgiver actually came to Judah. For David named his son and successor Solomon, a name which in Hebrew bears a much closer analogy to Shiloh than the English reader might suppose; he being a "man of peace" and "him that was to come." Thus David had been restrained from building the Temple because he had shed blood abundantly; but he gave the name Solomon to him who was to build it, for he was to be a "man of rest;" and the Lord was to give "peace and quietness to Israel in his days" (1 Chron. xxii. 8, 9). This also illustrates the following verse of the prophecy, "until the Peaceful One comes, and unto him shall the gathering of the peoples be." The peoples, in the plural, are admitted by almost universal consent to be the heathen nations, attracted by this Peaceful One who gives them rest (see Matt. xi. 28-30; xiii. 37).
This thought comes out more beautifully as the precise signification of the gathering of the people is contemplated; whether it be "attachment," or "trust," or, most simply and probably, "filial obedience," as in Prov. xxx, 17.

(2) Those alone who acknowledge Shiloh to be a person bring the blessing of Jacob into harmony with the promises in the patriarchal period. There is difference of opinion, of course, as to the clearness with which Christ's person was then revealed. But there is no room for doubting that two subjects were brought prominently forward—the multiplication of their seed, and the prospect that out of them should come a blessing for all the nations of the world. The former subject appears to be the main in this chapter, as the latter is overlooked entirely in the other interpretation, while full justice is done to it in this one. Nay, the line of blessing had been distinctly marked out in the case of the three successive patriarchs; now, when the third of these saw that blessing expanding over twelve contemporaneous patriarchs, it was most natural that Jacob, who had been so anxious to obtain it for himself, should name the one from whom the seed of blessing in the highest sense was to come. And unless we admit that a prerogative is granted to Jacob, far different from the narrow concession in time and degree which is made by those who understand Shiloh here to be a place, it will be difficult to discover any ground for asserting that the chief ruler was to spring from Judah, of whom the Lord had made choice for this place of power and honor (1 Chron. v, 2; xxviii, 4). It is true that some of the best living expositors of the Messianic interpretation do not think that the descent of our Lord from Judah is the notion conveyed in the words "from between his feet." But it is vain to make any difficulty out of this; for, speaking of each of the tribes in succession and one by one as Jacob does, it is impossible that he can mean to make Shiloh belong to any other tribe.

(3) If we understand Shiloh to be a person, we see that the blessing pronounced on Judah is one complete homogeneous whole. It begins with laying emphasis on his name, "He that shall be praised," a verb which certainly is used habitually, it would even seem exclusively, of God; as if to hint that there is a mysterious fulness of blessing in Judah's case which involves supernatural blessing. And in every case Praise and favor from his brethren; and in the midst of this it places his invincible superiority to his enemies. It compares him to a lion, in respect of his irresistible activity, and of his safety when he lies down; and on this metaphor it enlarges throughout a verse. In fact, the whole exaltation is a recognition to Shiloh: for there is no change of subject, since Shiloh is a part of Judah, its head and noblest part; and there is no limitation in the word "until," which has an inclusive (not an exclusive) meaning in this as in many passages, as much as to say, "The sceptre does not cleave till Shiloh comes, and of course after his coming there is no risk of its departure." And so Judah, at whose head is Shiloh, enjoys a rest at once glorious and luxurious in the Promised Land, possessing all the fulness of God's goodness, as is related of the earthy Solomon's reign (1 Kings iv, 24, 25; v, 4, 5), and as shall be realized more nobly in the reign of the heavenly Solomon, whose life on earth already contrasted with that of his ascetic forerunner in certain respects, to which his enemies called attention for a malignant purpose (Luke vii, 38, 34).

(4) This interpretation is confirmed by other texts referring to it. The prophecies of Balaam refer more than once to the blessing pronounced on Judah, the lion-like course of the people, the royal honor in store for them, and the leader by whom all the noblest things were to be achieved. Especially Num. xxiv, 17, "I shall see him, but not now; I shall behold him, but not nigh; there shall come a star out of Jacob, and a sceptre shall rise out of Israel, and shall smite the corners of Moab, and destroy all the children of Sheth," of tumult or of pride. Perhaps this distance of the time, fulfillment of the prophecy may be the reason of the extreme brevity of the blessing of Moses pronounced on Judah; though its brevity may be also owing to this, that it is an allusion to the fuller blessing of Jacob. Again, in the age in which the sceptre and the law were to be delivered, as well as in the time in which the names of the firstborn were to be recorded, it would be known what earlier stepping-stone led to the language of Psa. ii and cx, and to that of Nathan's prophecy of the perpetuity and glory of David's line, if Shiloh be not a person: Psa. lix, in particular, is the expansion of the faith in his glorious and peaceful reign. In the prophecies of which we have just spoken, the name Shiloh is merely a symbol of the language which seems connected with this one; the very name "Prince of Peace" (ix, 6) is an interpretation of Shiloh. And in Ezek. xxxi, 30-32 (25-27 in the English) there is a reference which few critics have hesitated to acknowledge, and whose influence upon the ancient translators must yet be noticed: "And thou profane wicked prince of Israel, whose day is come, when iniquity shall have an end, thus saith the Lord, Remove the diadem and take off the crown; this shall not be the same: exalt him that is low, and abase him that is high. I will overturn, overturn it: and it shall be no more, until he come whose right it is; and I will give it him for a possession, and it shall be for the time thereof; forasmuch as even the names given to our Lord in the New Test. which must be traced back to this prophecy: such are found in Eph. ii, 14, "For he is our peace," and especially in Rev. v, 5, "the Lion of the tribe of Judah." b. Objections to this Interpretation.—These have been greatly exaggerated. They are chiefly of a negative character.

(1) Kurtz, following the earlier opinion of Hofmann in his Weissagung und Erfüllung, interposes a theoretical objection that the organic progress of prophecy in connection with the developments of history is unfavorable to the notion of a personal Messiah in the dispensation: it would not arise till the promises to the patriarchs had been realized so far as concerned the expansion of the individual into a numerous offspring, when the necessity of a head would come to be felt, that this multitude might be led back to a unity again. This assumption cannot be admitted; there is a connection between the promise and the history. It is nevertheless true that the latter, from time to time, bursts the limits which are imposed upon the former; so that, as we have already said, he who rejects the personal Messiah in this text must be prepared for prophecy taking a much greater and more sudden leap than is the case in the matter of the kingdom. In the event, that Moses had no conception of a personal Messiah, there is nothing to hinder our belief that Jacob had been gifted enough to see it; just as, if we deny that Jacob saw it, we must admit that Abraham did not see Christ's day and rejoice, unless we renounce confidence in our Lord's testimony. Nay, we do not hold that the understanding of the prophets is the measure of the meaning of their predictions; so that our belief that Shiloh is the Saviour does not necessitate our belief that Jacob understood this in the way that we do. Yet, so far as we comprehend the circumstances, we know of no reason for doubting that Jacob did expect a personal Saviour whom he named Shiloh; for an individual head seems requisite for the work mentioned in the text, at once subduing the heathen and attracting them to willing obedience. Compare Psa. xviii, 40 sq., where the head and his work appear, when the sceptre is given to the head of Jacob. Se also Isa. xi, 4, 5. There is weight in Hengstenberg's observation that the individual comes strongly out in the patriarchal history on account of its biographical character; so that one feels no surprise at the mention of the personal Messiah after reading passages like these: "I will bless thee," "In thee," not less than "in thy seed, shall all the nations
of the earth be blessed." This is apart from any weight which the apostle teaches us to attach to the word in the singular number was given to Abraham and his seed were the promises made; he saith not, And to seeds, as of many; but as of one, And to thy seed, which is Christ.

(2.) A very different objection of a most practical kind is that our interpretation is contradicted by facts, since the sceptre had departed from Judah for centuries before Christ was born; and when the sceptre is given to the end of the kingdom by the Babylonian captivity, to the continued subjection of the people to the Persian and the Greek governments, to the fact that even the Macedonian princes did not spring from the tribe of Judah, and to the thoroughly foreign nature of the rule of the Seleucid dynasty.

In reply, we do not need to enter into a laborious discussion for the purpose of showing that something of Judah's sceptre still remained. Were we to grant all that is alleged, the very fact that Christ arose in due time is proof that the sceptre had not departed from Judah in the course of these reverses; precisely as a total eclipse is no proof that the day is an end. The sceptre was long of appearing in Judah; Israel had to wait for centuries in faith that kings would arise in the line of promise, although they had not been long of arising in the rejected line of Esau (Gen. xvi, 16; xxxv, 11; xxxvi, 31). The lapse of centuries before the line of promise in Israel does not disturb our faith in this prophecy; neither need the lapse of centuries after it disappeared, if Judah was only kept together till the predicted rod should come forth of the stump of Jesse (Isa. xi, 1). At the worst, we rest in faith on Gabriel's words to Mary—"The Lord God shall give unto him the throne of his father David, and he shall reign over the house of Jacob forever; and of his kingdom there shall be no end" (Luke i, 32, 38). It is important to observe that the facts which stumble some modern Christians were no stumbling-block to ancient Jews and Christians, to whom they were equally well known, and by whom translations and paraphrases were made in which Shiloh was, without hesitation, interpreted to be the Messiah. They understood the true meaning of the prophecy—that it secured a kingdom substantially and truly perpetual, yet liable to interruptions which should seem to the world to be failures of God's word, because only his children understand that chastisements are a part of the kingdom and are caused to them by covenant. At the time when the sceptre did first appear in Judah the law of the kingdom on this point was laid down explicitly by Nathan (2 Sam. vii, 12-16), of which we have a more expanded statement throughout Psa. lxix.xxix.

In a very important sense, however, the sceptre had not departed from Judah even during the Babylonian captivity and the Persian rule; for the national elders were always more or less recognised by these foreign powers, as the titles Rech geluth (prince of the captivity) and alabarch (q.v.) evince in later times. See Captivity, Dominion of. The authority of Ezra-ben-Hag (Hag ii, 2) evidently rested upon a recognition of this traditional supremacy. Moreover, the Jewish people well understood that this foreign yoke was imposed as a temporary penalty for their sins, and the prophecy obviously refers to a final, as distinct from a temporary, yoke upon which, it is demonstrable, did not the redeemed till after the reduction of Judaea to a Roman province. The restoration of royalty in the persons of the Amanean line, therefore, served legitimately as a link to keep alive this grant; and its transfer to Herod, although but a Jew by adoption, was in like manner a renewal of the prerogative. After the coming of the Jesus the Jews were also acknowledged that "they had no king but Caesar" (John xix, 15). It would seem to have been Jehovah's original intention to make the Davideic dynasty absolutely perpetual in a political sense, but the condition of loyalty to him, which was never overlooked, having failed, the promise was suspended, and at last finally revoked so that the spiritual import of the grant remained in full force, and shall never be repealed. Christ was the true Heir of David, and the supremacy, whatever it may have originally contemplated, took, in his person, the spiritual phase exclusively. It is this change in the aspect of the Judah that justifies the particular term Shiloh, the Peaceful, as characterizing the new "kingdom of heaven," in distinction from the vindictive and often sanguinary spirit of the older Judaism.

(3.) It is alleged that we take the word Shiloh in a sense elsewhere unknown, and here unnecessary. The necessity, however, seems to us to be proved by the impossibility of satisfactorily satisfied with the literal interpretation; and confessedly this necessity has been felt by the vast majority of interpreters of every age, and country, and school of opinion, always excepting open unbelievers. We have pointed out the real and intimate connection of the two names, that of the person and that of the city; nor is there anything unusual in this double use of a name, of which the book of Genesis gives other examples in Enoch and Shechem (iv, 17; xxxiiii, 18, 19). If we think that the name of a city has been imagined erroneously here, this is no more than is now commonly supposed in regard to Shalem in ver. 18.

(4.) A comparatively trifling objection is that we mar the simplicity of the structure of the sentence by introducing Shiloh as a new subject; an objection, besides, which presses with equal weight upon our opponents, who forget that "the sceptre" or "the lawgiver," and not "Judah," is the original subject.

On the above considerations, and the regular comments, and the treatises already cited, the monographs in Latin by Stempel (F. ad O. 1610); Alting (Francc. 1662); Leusler (Giess. 1662); Müller (Jen. 1667); Bürger (Alt. 1710); Schöttgen (F. ad O. 1718); Vriemont (Ultraj. 1722); Sherbach (Vitemb. 1748); Huth (Erlang. 1748); Nettel (Alt. 1767); Gütcher (Lips. 1774); Sixt (Alt. 1785); and in German by Kern (Gött. 1786); Bahr (Vienna, 1789); also the Christ, Rev. 1849, p. 285; Journ. of Soc. Lit., April, 1857; Prefab. Quar. Rev. April, 1861.

2. (Heb. Shiloh, שִׁלוֹחּ [Josh. xviii, 1, 8, 9, 10, 11; xxi, 2; xxii, 9, 12; Judg. xiii, 51; xiii, 12, 1 Sam. 1, 5, 9, 9; ii, 14; iii, 21; iv, 5, 5, 4, 12; xiv, 5]; Kings xiv, 2, 4; Jer. xxxvi, 6, or Shiloו [1 Kings ii, 27]; also Shiloh, שלאו [Judg. xxi, 19] 1 Sam. 1, 24; iii, 21; Psa. lixvii, 60; Jer. vii, 14; xxvi, 9, xii, 5; Shiloh [Judg. xxi, 21; Jer. vii, 12]; and perhaps also Shiloh, שילו [which does not occur], whence the gentile Shelomite [q.v., שִׁלוֹמִי [1 Kings xi, 29, xii, 15] in the Sept. usually שִׁלוֹמָה or שלומית, n. v. שלומית, שלמה; Josephus, Ant. [Ant. viii, 7, 7; 11, 1; Ant. xiv, 1, 19, 2, 9; Σαλώμα, v. 2, 12]; Vulg. Salmo, and more rarely Setlo], a town or village in the tribe of Ephraim, interesting for its sacred associations, and regarded by many as indicated in the blessing of the dying Jacob (Gen. xlix, 10). See the preceding article. The name was derived probably from שִׁלוֹמֶה, שִׁלוֹמָה, "to rest," and represented the idea that the nation attained at this place to a state of rest, or that the Lord himself was present among his people. Zaanath-shiloh (q.v.) may be another name of the same place, or of a different place near it, through which it was customary to pass on the way to Shiloh, as the obscure etymology may indicate. See also Kurz, Gesch. des A. Bund. ii, 569. See EPHRAIM, Tannin of, above. Shiloh was one of the earliest and most sacred of the Hebrew sanctuaries. The ark of the covenant, which had been kept at Gilgal during the progress of the conquest (Josh. xviii, 1 sq.), was removed thence on the subjugation of the country, and kept at Shiloh from
the last days of Joshua to the time of Samuel (ver. 101; Judg. xviii, 51; 1 Sam. iv, 5). It was here the Hebrew conqueror divided among the tribes the portion of the west Jordan-region which had not been already allotted (Josh. xvi, 10; xix, 51). In this distribution, or an earlier one, Shiloh fell within the limits of Ephraim (xvi, 5). The seizure here of the “daughters of Shiloh” by the Benjamites is recorded as an event which preserved one of the tribes from extinction (Judg. xxii, 19–23). The “annual feast of the Lord” was observed at Shiloh, and on one of these occasions the men lay in wait in the vineyards, and when the women went forth “to dance in dances,” the men took them captive and carried them home as wives. Here Eli judged Israel, and at last died of grief on hearing that the ark of the Lord was taken by the enemy (1 Sam. iv, 12–18). The story of Hannah and her vow, which belongs to our recollections of Shiloh, transmits to us a characteristic incident in the life of the Hebrews (1, 1, etc.); Samuel, the child of her prayers and hopes, was here brought up in the sanctuary, and called to the prophetic office (ii, 26; iii, 1). The ungodly conduct of the sons of Eli occasioned the loss of the ark of the covenant, which had been carried into battle against the Philistines, and Shiloh from that time sank into insignificance. It stands forth in the Jewish history as a striking example of the divine indignation. “Go ye now,” says the prophet, “unto my place which was in Shiloh, where I set my name at the first, and see what I did to it, for the wickedness of my people Israel” (Jer. vii, 12). Some have inferred from Judg. xviii, 31 (comp. Psa. lxviii, 60 sq.) that a permanent structure or temple had been built for the tabernacle at Shiloh, and that it continued there (as it were sine numerò) for a long time after the tabernacle was removed to other places. But the language in 2 Sam. vii, 6 is too explicit to admit of that conclusion. God says there to David, through the mouth of Nathan the prophet, “I have not dwelt in any house since the time that I brought up the children of Israel out of Egypt, even to this day, but have walked in a tent and in a tabernacle.” So in 1 Kings iii, 2, it is said expressly that no “house” had been built for the worship of God till the erection of Solomon’s Temple at Jerusalem. It must be in a spiritual sense, therefore, that the tabernacle is called a “house” or “temple” in those passages which refer to Shiloh. God is said to dwell where he is pleased to manifest his presence or is worshipped; and the place thus honored becomes his abode or temple, whether it be a tent or a structure of wood or stone, or even the sanctuary of the heart alone. Ahijah the prophet had his abode at Shiloh in the time of Jeroboam I, and was visited there by the messengers of Jeroboam’s wife to ascertain the issue of the sickness of their child (1 Kings xi, 29; xii, 15; xiv, 1, etc.). The people there after the time of the exile (Jer. xii, 5) appear to have been Cuthites (2 Kings xvii, 30) who had adopted some of the forms of Jewish worship. (See Hitzig, Zu Jerem. p. 381.) Jerome, who surveyed the ruins in the 4th century, says, “Vix ruinarum parva vestigia, vix altaris fundamenta monstrantur” (Ad Zeph. i, 14).

The principal conditions for identifying with confidence the site of a place mentioned in the Bible are—at least the modern name should bear a proper resemblance to the ancient one, that its situation accord with the geographical notices of the Scriptures; and the statements of early writers and travellers point to a coincident conclusion. Shiloh affords a striking instance of the combination of these testimonies. The description in Judg. xxii, 19 is singularly explicit. Shiloh, it is said there, is “on the north side of Bethel, on the east side of the highway that goeth up from Bethel to Shechem, and on the south of Lebonah.” In agreement with this, the traveller at the present day, going north from Jerusalem, lodges the first night at Beitith, the ancient Bethel; the next day, at the distance of a few hours, turns aside to the right, in order to visit Seilin, the Arabic for Shiloh; and then passing through the narrow Wady which brings him to the main road, leaves el-Lebbain, the Lebonah of Scripture, on the left, as he pursues “the highway” to Nablus, the ancient Shechem. Its present name is sufficiently like the more familiar Hebrew name, while it is identical with Shilon (see above), on which it is evidently founded. Again, Jerome (ut sup.) and Eusebius (Onomast. s. v. Σηλω) certainly have Seilin (Σηλω) in view when they speak of the situation of Shiloh with reference to Neapolis or Nablus. It discovers a strange oversight of the data which control the question, that some of the older travellers have placed Shiloh at Nebiy Samwil, about two hours north-west of Jerusalem. The contour of the region, as the traveller views it on the ground, indicates very closely where the ancient town must have stood. A tell, or moderate hill, rises from
an uneven plain, surrounded by other higher hills, except a narrow valley on the south, which hill would naturally be chosen as the principal site of the town. The tabernacle may have been pitched on this eminence, where it would be a conspicuous object on every side and could be watched from the surrounding ground at some distance. It was indeed a considerable place. They consist chiefly of the remains of a comparatively modern village, with which some large stones and fragments of columns are intermixed, evidently from much earlier times. Near a ruined mosque flourishes an immense oak, the branches of which the wind, during a strong gale, had broken off and left to wave. Just beyond the precipices of the hill stands a dilapidated edifice, which combines some of the architectural properties of a fortress and a church. Three columns with Corinthian capitals lie prostrate on the floor. An amphora between two chaplets, perhaps a work of Roman sculpture, adorns a stone over the doorway. The natives call this ruin the “Mosque of Seilûn” (so Robinson; Wilson understood it was called “Mosque of the Sixty” [Stittin: [Lands of the Bible, ii, 294]). The interior was vaulted. The materials are unsuited to the structure, and have been taken from an older building. At the distance of about fifteen minutes from the main site of the town is another hill, the slope of which is apparently a natural rowdale. Its water is abundant, and, according to a practice very common in the East, flows first into a pool or well, and thence into a large reservoir, from which flocks and herds are watered. This fountain, which would be so natural a resort for a festal party, may have been the place where the sons of Shiloh were dancing when they were surprised and borne off by their captors. In this vicinity are rock-hewn sepulchres, in which the bodies of some of the unfortunate house of Eli may have been laid to rest. There was a Jewish tradition (Asher, Benj. of Toud, ii, 430) that Eli and his sons were buried here. It is certainly true, as some travellers remark, that the scenery of Shiloh is not specially attractive; it presents no feature of grandeur or beauty adapted to impress the mind and awaken thoughts in harmony with the memories of the place. At the same time, it deserves to be mentioned that, for the objects to which Shiloh was devoted, it was not unwisely chosen. It was secluded, and therefore favorable to acts of worship and religious study, in which the youth of scholars and devotees, like Samuel, was to be spent. Yearly festivals were celebrated there, and brought together assemblages which would need the embankments of water on such an easily obtained in such a place. Terraces are still visible on the sides of the rocky hills which show that every foot and inch of the soil once teemed with verdure and fertility. The ceremonies of such occasions consisted largely of processions and dances, and the place afforded ample scope for such movements. The surrounding hills served as an amphitheatre where the spectators could look and have the entire scene under their eyes. The position, too, in times of sudden danger, admitted of an easy defence, as it was a hill itself, and the neighbouring hills could be turned into bulwarks. To its other advantages we should add that of its central position for the Hebrews in the west of the Jordan. An air of oppressive stillness hangs now over the scene, and adds force to the reflection that truly the “oracles” so long consulted there are “dumb;” they had fulfilled their purpose, and given place to “a mere sound of prophecy.” A visit to Shiloh requires a détour of several miles from the ordinary track, and it has been less frequently described than other more accessible places. See Reland, Palestine, p. 1018; Bachienne, Beschreibung, ii, 582; Raumer, Polîstat, p. 201; Ritter, Erdk. xvii, 681 sq.; Robinson, Bib. Res. ii, 269-276; Wilson, Lands of the Bible, ii, 294; Stanley, Sin. and Pal. p. 231-233; Porter, Handb. of Syria, ii, 328; Ridgeway, The Leuks, p. 517 sq.; Budeker, Palestine, p. 327; Conder, Tent Work in Palestine, i, 81 sq.

Shiloh. See Shiloh; Shilohite.
SHIMEI 684

SHIMEI

ix, 38); elsewhere (1 Chron. viii, 32) called Shimeahe (q. v.).

Shim'ith (Heb. Shimith', שִׁמִּית, fem. of Shimeahe; Sept. Σίμικκα, v. r. Σίμικκα, and Σίμικα, an Ammonite, mother of Zabad or Jozachar, one of the two murderers of king Josiah (2 Kings xxi, 21; 2 Chron. xxiv, 26). B.C. ante 609.

Shim'ithite (Heb. only in the plur. Shimithim', שִׁמִּיתִים, a patronymic from Shimeahe; Sept. Σιμικκῖται, the name of one of the three families of "scribes" resident at Jabez (q. v.) in the tribe of Judah; descendants apparently of a Shimea who seems himself to have been of the family of Salmon, and not to have been related to the King of the Kenites (q. v.), possibly the brother of David (2 Sam. xxii, 21).

Shim'ei (Heb. Shim'i, שִׁמֵּי, my flame, or renowned; Sept. Σιμικκέ, but Σιμικκία in 1 Chron. viii, 21; Σιμικκία in Ezra x, 23; Σιμικκά in Eath. ii, 5; and v. r. Σιμίκηa occasionally elsewhere), the name of some sixteen Hebrews.

1. The second named of the two sons of Gershon the son of Levi (Exod. vi, 17; A. V. "Shimi"); Numb. iii, 22; iv, 28; xvi, 21; 1 Chron. viii, 21; 2 Chron. xxxii, 13). B.C. post 1874. In 1 Chron. vi, 29 [Heb. 14] he is called the son of Libni and father of Uzza, and both are reckoned as sons of Merari; but there is reason to suppose that there is some clerical error in this verse, as he is nowhere else represented to be Libni's brother. In 1 Chron. xxiii, 7-10 his post-exilic career is but briefly sketched, but the text has probably there also suffered a transposition, so that we ought to read, "Of the Gershonites were Laadan [or Libni] and Shimei. The sons of Laadan the chief was Jehiel, and Zetham, and Joel, three; these were the chief of the fathers of Laadan. The sons of Shimei, Shelomith [or Shelomoth, and Haziel, and Haran, and Jarkash; the sons of Shelomith [instead of Shimei] were Jahath, Zina, Jeush, and Beriah; these four were the sons of Shelomith [or perhaps Shimei might here remain]. And Jahath was the chief, etc. Both Keil and Zöckler (in Lange), however, regard Laadan as different from Libni, and make out two distinct persons here by the name of Shimei. See No. 3, below.

3. A Gershonite Levite, son of Jahath and father of Zinnah in the ancestry of Asaph (1 Chron. vii, 42 [Heb. 27]). B.C. c. 1050. Some have regarded him as identical with the younger son of Gershon (ver. 17 [Heb. 2]), but the other particulars do not allow this.

4. A Simeonite, son of Zacchur, and father of sixteen sons and six daughters (1 Chron. iv, 26, 27). B.C. ante 1618. He was perhaps the same with Shemalah (q. v.), the ancestor of Ziza (1 Chron. iv, 37).

5. One of the heads of the families of Benjamin resident at Jerusalem (1 Chron. viii, 21; A. V. "Shimhi"; apparently the same with Shema (q. v.) the son of Elpaal (ver. 18). B.C. post 1618.

7. The son of Gera, a Benjaminite of the house of Saul, who lived at Bahurim during the reign of David, and is associated with some of the most painful transactions of the reign of that monarch and his successor. His residence there agrees with the other notices of the place, as if he had spent the way to and from the Jordan valley of Jerusalem, which lay just within the border of Benjamin. See Bahurim. He may have received the unfortunate Phaliter after his separation from Michal (2 Sam. iii, 16).

1. When David and his suite were seen descending the long declivity of Olivet on his flight from Absalom (2 Sam. xvi, 13), the whole of Benjamin burst forth without restraint in the person of Shimei. His house apparently was separated from the road by a deep valley, yet not so far as that anything that he did or said could not be distinctly heard. He ran along the ridge, cursing, throwing stones at the king and his companions, and when he came to a patch of dust on the dry hill-side, taking it up and throwing it over them. Abishai was so irritated that, but for David's request to the Kenites, it would have descended across the ravine (ver. 9) and torn or cut off his head. The whole conversation is remarkable, as showing what may almost be called the slang terms of abuse prevalent in the two rival courts. The cant name for David in Shimei's mouth is "the man of blood," twice emphatically repeated. Some took it out of the "man of the blood," to make it out to be "a man of blood art thou" (xvi, 7, 8). It seems to have been derived from the slaughter of the sons of Saul (ch. xxii), or generally perhaps from David's predatory, warlike life (comp. 1 Chron. xxiii, 8). The cant name for a Benjamite in Abishai's mouth was "a dead dog" (2 Sam. xvi, 2; comp. Abner's expression, "Am I a dog's head?" iii, 8). "Man of Belial" also appears to have been a favorite term on both sides (xvi, 7; xx, 1). The royal party passed on, Shimei following them with his stones and curses as long as they were in sight. (See Lorens, De Crimine Simes in Davidem [Strasb. 1749].)

B.C. 1099.

2. The next meeting was very different. The king was now returning from his successful campaign. Just as he was crossing the Jordan, in the ferry-boat or on the bridge (2 Sam. xix, 18; Sept. διαβαίνοντος; Joseph. Ant. vii, 2, 4, καὶ τὰς γεφυρὰς, the first person to meet him welcomed the morning, whether from the eastern, side was Shimei, who may have seen him approaching from the heights above. He threw himself at David's feet in abject penitence. "He was the first," he said, "of all the house of Joseph," thus indicating the close political alliance between Benjamin and Ephraim. Another altercation ensued between David and Abishai, in which the head of the house of Saul was mortally wounded with an oath (2 Sam. xix, 18-28), in consideration of the general jubilee and amnesty of the return. B.C. 1029.

3. But the king's suspicions were not set to rest by this submission; and on his death-bed he recalls the whole scene to the recollection of his son Solomon. Shimei's head was not combs with age (1 Kings ii, 9), and he was living in the favor of the court at Jerusalem (ver. 8). B.C. 1013. Solomon gave him notice that from henceforth he must consider himself confined to the walls of Jerusalem on pain of death. The Kidron, which divided him from the road to his old residence at Bahurim, could not be considered as the line of demarcation, but a building house in Jerusalem (ii, 36, 37). For three years the engagement was kept. At the end of that time, for the purpose of capturing two slaves who had escaped to Gath, he sent out on his ass and made his journey successfully (ii, 40). On his return, the king took him at his word, and he slain by Benjaminites (ib. 41-46). B.C. 1009. In the sacred historian, and still more in Josephus (Ant. viii, 1, 5), great stress is laid on Shimei's having broken his oath to remain at home; so that his death is regarded as a judgment, not only for his previous treason, but for his recent sacrilege. (See Ottilb, De Processu Sol. contra Shimei [Lips. 1719].) See David; Solomon.

8. One of the faithful adherents of Solomon at the time of Adonijah's usurpation (1 Kings, 1, 8). B.C. 1015. Probably he is the same as Shimei the son of Elah, Solomon's commissariat officer in Benjamin (iv, 18). Ewald, however, suggests (Greck, iii, 265) that he may have been the same with Shimeah or Shammah, David's brother (1 Sam. xvi, 9; 2 Sam. xxii, 21). From the mention which is made of "the mighty men" in the same verse, one might be tempted to conclude that Shimei is the same with Shammah the Hararite (2 Sam. xxii, 11).

2. The head of the tenth division of twelve musicians severally in the distribution by David (1 Chron. xxv, 17). B.C. 1013. It would seem that he was one
SHIMEON

of the sons of Judah, for a name is necessary in ver. 3 to complete the number six there given, and all the other lists are full.

10. A Levite of the descendants of Heman who assisted in the purification of the Temple under Hezekiah (2 Chron. xxix., 14). B.C. 726.

11. A Levite who, in connection with his brother Cononiah, numbered the porters. He charged the offerings, the tithes, and the dedicated things in the renewal under Hezekiah (2 Chron. xxx., 12). B.C. 726. He was probably the same as the preceding.

12. A son of Pedahzur and brother of Zerubbabel (q.v.), but whether by the same mother or not is doubtful (1 Chron. iii., 19). B.C. 701.

13. A Benjamite, "son of Kish and "father of" Jair in the genealogy of Jair in the tribe of Manasseh (Esth., ii, 5). B.C. ante 479.

15. An Israelite of "the sons of Hashum" who did the same (Ezra x., 38). B.C. 459.

16. An Israelite of "the sons of Bani" who did the same (Ezra x., 38). B.C. 459.

Shim'eo'nom (Ezra x., 31). See Simkon.

Shim'te (Heb. with the art. hash-Shim'ri, שִׁםִּתָה, a patronymic from Shim'i, Sept. Ἰσχαρία, A. V. "the Shimeites"), a name (Num. iii., 21; comp. Zech. xiii., 13) of the descendants of Shim'e, the son of Gerion.

Shim'ma (Heb. Shim'mon, שִׁמְמָה, desert; Sept. Σεμμών, v. r. Σεμμωνι), a person vaguely mentioned (1 Chron. iv., 20) among the descendants of Judah in Canaan, and the father of four sons. B.C. post 1618.

Shim'rath (Heb. Shim'rahath, שִׁמְרָה, watch; Sept. Σαμουράθ), the last named of the nine sons of Shimsi (i.e. Shimei), a Benjamite of Jerusalem (1 Chron. viii., 21). B.C. post 1618.

Shim 'ri (Heb. Shim'mir, שִׁמֵּר, my watch, or vigil- lant), the name of four Hebrews.

2. (Sept. סְמָר, v. r. Σαμαρι, v. r. Σαμαρία) Father of Jedidiah (q.v.), one of David's body-guard (1 Chron. xii., 40). B.C. ante 1043.

3. (Sept. פִּילָסְטִי, reading פִּילָסְטֶם, the Philistines) Son of Hoshah, a Merarite Levite appointed by David a doorkeeper of the ark. Although not the first-born, his father made him chief and elder brother (1 Chron. xxvi., 10; A.V. "Simri"). B.C. 1043.

4. (Sept. סְמָר, v. r. סְמָרְבִּי), First named of the two sons of Elizaphan, and one of the Levites who assisted at the purification of the Temple under Hezekiah (2 Chron. xxxii., 18). B.C. 726.

Shim'rith (Heb. Shimmirith, שִׁמֵּרִית, fem. of Shim'mir, vigilant; Sept. Σαμουρίδα, v. r. Σαμαριάδος, Σαμούαδ), an Ammonitess, and mother of Jehozabad, one of the assassins of king Joash (2 Chron. xxiv., 20); elsewhere (2 Kings xii., 21) called Shomer (q.v.).

Shimron (1 Chron. vii., 1). See Shimon 1.

Shim'ron (Heb. Shimm'ron, שִׁמֶרֶון, watch-height), the name of a man and also of a place. See also Shitam. 1.

1. (Sept. סֶמֶרוֹן, v. r. סֶמֶרְוִי, etc.) Last named of the four sons of Issachar (Gen. xi., 13; 1 Chron. vii., 1, "Shirimmon" in later editions), and head of the family of the Shimeonites (Num. xxvi., 24). B.C. 1874.

2. (Sept. Σαμουρών, v. r. Σαμουρίων and Σαμουέλ.) A town of Zebulun (Josh. xix., 15), where it is named between Nahalal and Japhlet; one of those which joined the northern confederacy under Jabin against Joshua (Josh. xi., 5), and apparently the same elsewhere (xii, 29) more fully called Shim'on-meron (q.v.). Eusebius and Jerome in the Onomasticon confound it with Samaria. The old Jewish traveller Hap-Parchi fixes it at two hours east of Enannim (Jenin), south of the mountains of Gilbon, at a village called in his day Dar Meron (Asher, Benjamin, ii, 434). This is in accordance with the tradition existing among the Jews of Safed that Shimon- meron is identical with the sacred village of Meiron, where the tombs of the rabbins Hillel and Shammay are still preserved and honored (Wilson, Lands of the Bible, ii, 318). Schwarz, with greater probability (see Re Lands, Palest. p. 1017; Genesiusthe, p. 1455), proposes (Palesst. p. 36) to see in Shim'on-meron (Josh. xii., 20) probably the same elsewhere (xi, 1) called simply Shim'on (q.v.).

Shim'nah (Heb. Shim'nah, שִׁמְנָה, my suns, or suns; Sept. Σαμαρία, v. r. Σαμαριά, etc.), a scribe or secretary of Rehum, who was a kind of satch of the conquered province of Judea and of the colony at Samaria supported by the Persian court (Esther iv., 8, 19, 27). B.C. 529. He was apparently an Aramean, for the letter which he wrote to Artaxerxes was in Syriac (ver. 7), and the form of his name is in favor of this. He is called Semelius by Josephus (Ant. i., 2, 1). The Samaritans were jealous of the return of the Jews, and for a long time plotted against them without effect. They appear ultimately, however, to have prejudiced the royal officers, and to have prevailed upon them to address to the king a letter which set forth the turbulent character of the Jews and the dangerous character of their undertaking, the effect of which was that the rebuilding of the Temple ceased for a time. See Nehemiah.

Shim were supposed by the Chinese to be spirits of the air, and, according to Dr. Milne, are to be considered as auras, spirits or intelligences. In the Le-Go it is said that "if we speak of all the Shi- collectively, we call them SHAN-ΓE-" (q. v.); but the very circumstance that the word Shim is a collective noun, and never used with a numerical affix, shows that it cannot be considered as denoting the one supreme God.

Shin'ab (Heb. Shin'ab, שִׁנָּב, father's tooth [so Genesis as literally; but Hitzig refers the last element to the root שב, or the Samaritan שבא, while Fürst prefers splendor of the Father (i.e. God)]; Sept. Σεμβάνος, Σέμβανος; Vulg. Semuanum) seems to have been the ancient name (Gen. x., 10; xii, 2; xiv, 1, 5) of the great alluvial tract through which the Tigris and Euphrates pass before reaching the sea—the tract known in later times as Chaldean or Babylonian. It was a plain country, where brick had to be used for stone, and slime, bitumen, or mud, for mortar (xiii, 3). Among its cities were Babel (Babylon), Erech or Orch (Orchon), Caine or Calno (probably Niffer), and Accad, the site of which is unknown. These notices are quite enough to fix the situation. It may, however, be re-
SHINGLE 686 SHISHIU

marked, further, that the Sept. renders the word by "Babylonia" (Βαβυλωνία) in one place (Isa. xi, 11), by "the land of Babylon" (γῆ Βαβυλῶνος) in another (Zech. v, 11), and by τοιχήλια in a third (Josh. vii, 21) as an equivalent to Βαβυλονία (A. V. "Babylonia").

The native inscriptions contain no trace of the term, with the exception of a place which is called Bubulon (Βούβολων) in a mixed language of Greek and Phoenician.

At least it is extremely doubtful whether there is really any connection between Shinâr and Singâra, or Sinjar. Singâra was the name of a town in Central Mesopotamia, well known to the Romans (Dion Cass. xlviii, 22; Amm. Marci, xviii, 5, etc.), and still existing (Layard, Nin. and Babh, p. 240). If this is from the place that the mountains which rise across Mesopotamia from Mosul to Rakkeh receive their title of "the Sinjar range" (Σγηγαρας ὄρος, Potlomy, v, 18). As this name first appears in Central Mesopotamia, to which term Shinâr is never applied, about the time of the Antonines, it is very unlikely that it can represent the old Shinâr, which ceased practically to be a geographic title soon after the time of Moses (the use in the above passages of Isaiah and Zechariah is an archaism; so also, perhaps, in Dan. i, 2).

It may be suspected that Shinâr was the name by which the Hebrews originally knew the lower Mesopotamian country, where they so long dwelt, and which Abraham brought with him from "Ur of the Chaldees" (Mugheir). Possibly it means "the country of the two rivers," being derived from שִׁינָר, Shiner, a fish, which was used in Babylonia, as well as near or nahâd ( 실험), for "a river." (Comp. the "Ar-malahch" of Pitin [H. N. vi, 26] and "Ar-Macales" of Abydenus [Fr. 9] with the Naar-malcha of Ammianus [xxiv, 6], called Ναραγαλία by Isidore [p. 5], which is translated as "the Royal River," comp. again the "Narracmei" of Pitin [H. N. vi, 86] with the "Aramaicus" of Abydenus, & c. & c.) See Mesopotamia.

Shingle, a wooden tile for covering roofs, spires, etc., made of dressed oak. Shingles were formerly very extensively employed in some districts, but their use has, for the most part, been superseded by more durable kinds of covering; they are, however, still to be found on some church roofs, and on many timber spires, especially in the counties of Kent, Sussex, Surrey, and Essex, England.

Shin-men, a Chinese deity, said to be the son of Fo or Fo-hi, and to correspond with the Hindoo god Ganesa.

Shin-moo, a goddess worshipped in China as the supposed mother of Fo, and styled the Queen of Heaven. Her image is generally placed in a niche behind the altar, sometimes having an infant either in her arms or on her knee, and her head encircled with a glory.

Shinn, Asa, a minister of the Methodist Episcopal Church, was born in New Jersey, May 3, 1871. He was converted at the age of seventeen years, and in his twentieth year entered the itinerancy in the Baltimore Conference. In 1892 Mr. Shinn took a prominent part in the discussion of lay representation in the Methodist Episcopal Church; and when the discussion culminated in the disciplining of a number of the advocates of the measure, he withdrew from the Church, and identified himself with the lay-representation movement. He took an active part in the organization of the Methodist Protestant Church, and received the most important offices in the gift of his constituents. He was frequently elected president of the Annual Conference, and in 1890 was twice (1889 and 1892) a candidate for the presidency of the General Conference. In 1894 he was elected, with Rev. Nicholas Snelten, editor of the Methodist Protestant of Baltimore. Owing to an accident received in his youth, and overstrain of work and care, he had four attacks of insanity—in 1808, 1812, 1824, and 1828. From the last he never recovered, but was sent to an asylum in Philadelphia, and then to another in Brattleboro, Vt., where he died, Feb. 11, 1835. He was a strong and effective speaker and a ready and forcible writer. He published, Essay on the Plan of Salvation (Baltimore, 1813; 2d ed. Cincinnati, 1831)—The Benevolence and Rectitude of the Supreme Being (Baltimore, 1840, 12mo). He also wrote a series of articles in the Mutual Rights. See Sprague's Biblical Dictionary, Pulpit, vii, 960; Simpson, Cyclop. of Methodism, s. v.

Shinn, John, a minister of the Methodist Episcopal Church, was born in Warren County, O., March 2, 1824, and united with the Church at the age of fifteen. He was received into the Cincinnati Conference in 1854. In 1862 he entered the Christian Commission, and afterwards became an army chaplain. After the war he was county agent of the Bible Society for one year. In 1866 he again entered the pastorate, and lived until death (by paralysis), which occurred at West Mansfield, O., Sept. 26, 1871. See Minutes of Annual Conferences, 1872, p. 107.

Shinshiu (meaning New Stet) is the name of a Japanese sect of Buddhists, who are the adherents of one of the most remarkable developments of Buddhism, unique in many points. Buddhism has been called the Protestantism of Asia; the Shinshiu followers are the Protestantism of Japan. The leading members of the sects of Buddhism so called are repudiated by the Shin sect. Their priests marry and rear families, eat flesh and drink wine. Nuns, monks, and monasteries are unknown within their pale; schools, or rather real theological seminaries, taking their place. Penance, fasting, pilgrimages, prescribed diet, isolation from society, and, generally, amulets and charms, are proscribed. The Protestant doctrine of justification by faith in Buddha is their central tenet, in opposition to the common Buddhist idea of salvation by works. Devout prayer, purity and earnestness of life, and trust in Buddha himself as the only vehicle of perfect righteousness, are insisted upon. They solemnly and strictly reject the development of most of the idols venerated by the other sects. The Scriptures of Shinshiu, instead of being kept in the Sanscrit and archaic Chinese, as in other sects, are translated into the vernacular, and their daily reading urged. The Shin temples are built, not on mountains and in secluded situations, but on the main streets, and in the crowded and business centres of great cities, with altars gorgeous in their magnificence. The Shin priests are more highly educated than those of any other Japanese sect, and the average intelligence of their worshippers is superior. They profess never to intermeddle with political affairs, but to govern themselves on the basis of their teachings, and to civilize and Christianize themselves on their self-reliance. When travelling, they assume the lay dress, and in time of war claim the right of defence. Whole battalions of ascetic soldiery have been recruited from the Shin sect in the wars of the past. Their influence is probably greater than that of any other sect in Japan. Within the last decade, they have organized their training-schools on the model of Christian theological seminaries, and have carefully studied the weapons and methods of Christian missionaries. They have lately sent out successful missionaries to China, Corea, and the Riu-Kiu (Loocohe) islands. There are six subsects or divisions in Shinshiu, who have in all 13,718 temples. Other names for the Shin sect are Montô ("Followers of the Gate") and Ikô, from the initial of one of their canonical books, both terms referring to their singleness of aim and unity of organization. Shinshiu was founded by Shuni (born 1171, died 1282), who was a pupil of Hosom (1154-1250), a founder of the Kirin sect (1234), the successor of Naun, and the president of the General Conference. In 1834 he was elected, with Rev. Nicholas Snelten, editor of the Methodist Protestant of Baltimore. Owing to an accident received in his youth, and overstrain of work and care, he had four attacks of insanity—in 1808, 1812, 1824, and 1828. From the last he never recovered, but was sent to an asylum in Philadelphia, and then to another in Brattleboro, Vt., where he died, Feb. 11, 1835. He was a strong and effective speaker and a ready and forcible writer. He published, Essay on the Plan of Salvation (Baltimore, 1813; 2d ed. Cincinnati, 1831)—The Benevolence and Rectitude of the Supreme Being (Baltimore, 1840, 12mo). He also wrote a series of articles in the Mutual Rights. See Sprague's Biblical Dictionary, Pulpit, vii, 960; Simpson, Cyclop. of Methodism, s. v.
honored the memory of Shinnun by bestowing upon him the posthumous title, by imperial letters patent, of Ken- shin Daishi (Great Revealer of Light), on Nov. 28, 1876. Though wary and ceaselessly active in their endeavours to counteract Christianity, now so aggressive in Japan, they have resisted every effort of the government to amalgamate them with other sects, and their enemies and rivals of late have charged them with being so much like Christians that separation from the latter is inconsistent. (W.E.G.)

Shintoism (Shintō; i.e., "the Religion of the Kami") is the term for the religion of the ancient Japanese which existed before the introduction of Confucian ethics or Buddhism into Japan, and which was practiced in a more or less pure form until the restoration of the mikado to supreme power in 1868, when a thorough purification and propagation of the ancient cult was ordered by the government. Nearly all accounts of Shinto by European writers prior to 1870 are of little value, as these treat of the impure Buddhistized form. The ancient documents and archaic literature of Shinto have been unearthed and made accessible even to native readers only during the last and present centuries. The books printed in Japan on the ancient life and literature apart from the imported creeds of India and China, and pure Shintoists insist that the native and the foreign religions are incompatible.

Shishido is a Chinese term repudiated by native scholars, who use the pure Japanese word Kami no Mi-Chi (way or nature of the gods). Shinto is the introduction of Chinese letters in the 6th century A.D., every important Japanese word has a Chinese equivalent and synonyms. The term Shinto was coined to distinguish the native cult from the two other to or do then new upon the soil, viz. Ju-do (Confucianism) and Buta-so (Buddhism). The literal rendering of Shinto is "theology."

I. The Scriptures, Essence, and Characteristics of Shintoism (to A.D. 60).—To decide positively the ultimate origin of Shinto, whether a purely indigenous growth or imported from the Asian mainland, is to decide the origin of the Japanese people. Believing as we do that the aborigines of Japan were Ainu in the north and Malays in the south, ultimately conquered by immigrant tribes from the Manchurian highlands, descending through Corea, who thus became the dominant race in Japan, we must refer the origin of the gêmers, but not of the Kami-ten Shintoism, the Asian mainland. The pre-Buddhistic religion of China is China She King: Book of Ancient Chinese Poetry [trans. by Dr. Legge], p. 46-58) and Shinto had some striking points in common, though the growth and development of Shinto have been on Japanese soil. The Asian invaders in Japan had neither letters nor writing until they were brought from China after the 5th century A.D. Rigid Shintoists, however, assert that previously there was a native alphabet in use called Shindaiji or Shinji (god-letters, or letters of the divine age). The Buddhists and all foreign scholars maintain that this alphabet was derived from Corea. Certain it is that these god-letters have been traced on the ab-firsts now written in Japan, while no literary remains have yet been found written in them. The origin of most of the Shintō may be discovered by comparing them with the alphabet invented in Corea in the latter part of the 7th century A.D., and still in use by the Coreans. This subject has been fruitful of literary controversy in Japan.

The oldest monuments both of Shinto and the Japanese language are the Kojiki (book of ancient traditions, or "notices of ancient things"), the Nihongi (chronicles of Japan), and some liturgical works, such as the Nenzaki (the ceremonial law of Shinto), and the Matsu-šūkiki (book of the ceremonial law of Shinto). These ancient texts, with the recensions, commentaries, and controversial writings of the native scholars and Shinto revivalists—Mabuchi (1697-1769), Motoori (1750-1801), and Hiraishi (1776-1849)—form the chief sources of information concerning Shinto. In the texts are imbedded a number of poetical passages forming the Noritō, or Shinto liturgies, composed most probably centuries before the introduction of writing, and preserved through the medium of the human memory. The ancient texts contain the cosmogony, philosophy, and ritual of Shintosho. According to them, Japan is the centre of the earth, and the mikado is the first of men and vicar of gods. Infallibility is his attribute, and his will is the test of right.

The Kojiki is written almost entirely in pure Japanese style as concerns the forms both of language and thought, while the text of the Nihongi is full of Chinese modes of expression and purely Chinese philosophical conceptions. Both are expressed by Chinese characters, which in some cases are phonetic for Japanese words, but in others are ideographic. The correct deciphering of the texts, especially that of the Kojiki, and the interlinear given in kana letters in some editions, is a comparatively modern work, which is as yet by no means infallible. The Kojiki was composed A.D. 712 by order of the 44th mikado, Genmō, and first printed in 1622. The Nihongi was composed A.D. 720, and the evident intent of the writer is to clothe the matter in hand in Chinese garb and give a Chinese character to the native text. The tenor of both works is best shown by a comparison of their opening sentences literally translated:

Kojiki.

"At the time of the beginning of heaven and earth there existed three pillar (chief) kami (gods). The name of one kami was Lord of the Middle of Heaven;" text. "High Heaven Pro-creator;" next, "Ineffable Pro-creator." These three existing single, hid their bodies (died, passed away, or became pure spirit). Next, when the young had floated like oil moving about, there came into existence, sprouting upward, like a rush shoot, a kami named 'Delightful Rush Sprout';" text. "Standing-on-the-Bottom" kami, the two chief kami, existing single, hid their bodies. Next came into existence these three kami, etc.

Nihongi.

"Of old, when heaven and earth were not yet sepa-rated, and the In (male, active, or positive principle) and the On (female, passive, or negative principle) were not separated, chaos developing all things, like a fowl's egg, contained within it a germ. While there existed the primal substance expanding became heaven; the heavy and thick substance agglutinating became earth. The ethereal union of matter was done; and out of the thick substance hardened with diffi-culty. Therefore heaven and earth were made; and earth the soil floated about like a fish floating on the top of the water," etc.

In the Kojiki we have the original Japanese theory of creation, and in the Nihongi the same account with Chinese philosophical ideas and terms added. Indeed, the first verse of the Nihongi down to "Now, it is said," etc., is borrowed direct from Chinese books. Both texts show that the Japanese scheme of creation starts without a Creator or any first cause; matter appears before mind, and deity has no existence before matter. This view of the origin of things may be traced in these ancient philosophers. There is no creation, properly speaking, but only evolution until the gods (kami) are evolved or get being. The work of creation properly so called begins only when after the genesis of several pairs of (hirii-gumi) single, sexless beings, Izana- gi and Izanami appear. Standing upon the floating bridge of heaven, Izanagi plunged his jewelled falchion (or spear) into the unstable waters beneath, and, withdrawing it, the drops which trickled from it congealed, and formed an island. Upon this they descended, and planting the falchion in the ground, made it the central pillar of a palace which they built, and declared that it should be the pillar of a continent. Izanagi means "The-male-who-invites," Izanami "The-female-who-invites." In Izanagi was the first manifestation of the male principle; in Izanami that of the female
SHINTO

principle. They were the first beings who were conscious of a difference of sex. They separated to make a tour of the island. At their meeting the female spirit spoke first—"How joyful to meet a lovely male!" Izanagi, offended that the female had spoken first, required the circuit to be repeated. Meeting a second time, the male spirit spoke first, and said, "How joyful to see a lovely female!" Then following the first practice of the art of love. Whence the origin of the human race, the gods (kami), and the ten thousand things in heaven and earth. The first series of children born were the islands of Japan. The details of creation were carried out by various kami who sprang from Izanagi and Izanami. In the conception of the supreme kami, Izanagi was the creator-deity of the gods who make up the heavens, the two creator-deities had a common part, but many others were generated by the separate action of each. Thus, in bringing forth the god of fire Izanami suffered great pain, and from the matter which she vomited forth in her agony sprang the god and goddess of metal. She afterwards created the gods of clay and fresh water to pacify the fire-god when he was inclined to be turbulent. Izanagi, being incensed at the fire-god, clove him in three pieces with his sword. From the fragments sprang the gods of thunder, of mountains, and of rain. The gods of clay and fresh water married. From them descended the suffering goddess, the silkworm, from the navel, the five esculent grains—rice, wheat, millet, beans, and sorghum. Izanami had enjoined upon her consort not to look upon her during her retirement, but Izanagi disregarding her wish, she fled into the nether world (the "root-land," or "land of darkness"). Izanagi descended to induce her to return to earth. He found the region one of awful stillness, and the body of his consort a mass of worms. Escaping to the upper world, he purified himself by repeated washings in the sea. In these acts many gods were born, among others Susanóo from his nose and Amaterasu from his left eye. The deities created out of the filth from which he washed himself are the evil deities war against the good gods and still trouble mankind in many ways. At this time heaven and earth were very close to each other, and the goddess Amaterasu being a rare and beautiful child, whose body shone brilliantly, Izanagi sent her up the pillar that united heaven and earth with her rule. The high place of heaven. She ever afterwards illuminated heaven and earth. Her name, Amaterasu-O-Mi-Kami, means "From heaven—far—shining—Deity." The Chinese equivalent is "Ten-Sho-Dai-Jin," and the common English term "sun-goddess." Susanóo, whose full name was "Susanóo-O-Mikoto," was likewise commanded to rule over the whole of the sea and the multitudinous salt waters. He, however, neglected to keep his kingdom in order, was very slovenly, and cried constantly. To cure him of his surly behavior, his father made him ruler over the kingdom of night. He is usually styled the god of the moon. Instead of reforming his conduct, Susanóo grew worse. He turned a wild horse loose into the rice-fields planted by his sister the sun-goddess, defiled the white rice in her storehouse, and, finally, while one day she was weaving, he flung the reeking hide of a wild horse freshly skinned over her loom, and the carcass into the room. Dreadfully frightened and hurt, the sun-goddess withdrew into a rocky cave and shut the door. Instantly there was darkness over heaven and earth—a calamity which the turbulent gods improved by making a confused noise like the buzzing of flies. A great congress of all the gods was now held in the dry bed of the River of Heaven (the Milky-way), and after devising and carrying out many plans, the gods decided that Susanóo should be banished from the arts of life in Japan—the sun-goddess came out, light shone again, and Susanóo was banished into a distant land, where his adventures took place, the accounts which fill many pages in the national mythology. As the earth-gods and evil deities multiplied, confusion and discord reigned, which the sun-goddess seeing resolved to correct by sending her grandson, Ninigi, to earth to rule over it. She gave him a mirror—the emblem of her own soul—a sword of divine temper taken by Susanóo from the tail of an eight-headed dragon which he had slain, and a seal or ball. Accompanied by a great retinue of deities, he descended by means of the floating bridge, and became the first ruler. The first pair had stood to Mount Kurilshima (which lies between Hunga and Satsuma). After his descent, heaven and earth, which had already separated to a considerable distance, receded utterly, and further communication ceased. Ninigi was received with due honors by the earthly kami, and began to rule without much opposition. His grandfather, a male, had been a great warrior; his mother, a woman, was Jimmu Tennó (as he is usually styled), the first mikado of Japan. At this point the first volume of the Kojiki ends. Thenceforth the narratives of the Kojiki (with Nihongi) form the history of Japan to the time of Suiko (empress), who reigned A.D. 588-628, and on these books all subsequent works are based.

The Kojiki and Nihongi form the historic and doctrinal basis of Shinto, and from them we gather its characteristics. Its cosmogony and theogony is evolution. It is in no Supreme God, Creator, or Trinity (as some foreign conceptions have it), but in the myriad kami. Its highest gods were once creatures before being creators, and the lower grades of deities were once men. The Shinto earth is Japan; its heaven is immediately above the mikado's room. The literal meaning of the names of the several pairs of deities preceding the first having sex, and the comments of the native writers, show that they are merely names descriptive of the various stages through which they passed before arriving at the perfection of existence. Thus, some of the names of these rudimentary deities are "First Mud," "Sand and Mud," "Body without Hands, Feet, or Head—fetus," "Beginning of Breath," "Complete Perfection," "Awful One," etc. Thus, out of the mud, through a series of protoplasmic deities, the first creative pair evolved unto perfection.

So far we have given an outline of the Kojiki and Nihongi texts, refraining from any but the most necessary explanations or comment. From the acknowledged native orthodox commentators, who add much more elaborate and rich meaning, then, to the present point of Japanese archaeology and religion, we add further explanation. The description of the act of Izanagi and Izanami in creating Japan is only a euphemism for the sexual act. The jewelled spear, Hirata thinks, was in the form of a lingo. The worship of the phallic has from prehistoric times been nearly universal in Japan. (The gods of the sea and the sea-god, Nippon, were the gods of the sea and of the sex and the sex-spear became the axis of the earth. That "the motion imparted to the fluid mass of earth was the origin of its daily revolutions" is a statement showing how the acquisition of European knowledge enables a Shinto commentator to accommodate an ancient text to modern notions. The island formed here by the congealed slap was once at the north pole, but has since taken its present position in the Inland Sea. Japan lies on the top of the globe, which accounts for the fact that she escaped the flood which took place in China in the reign of Yao (B.C. 2550), and by which Occidental countries were drowned, China and Corea suffering most, because near Japan. The stars were formed when Izanagi's spear was drawn out of the earth; the muck which was unfit to enter into the composition of the world flew off in lumps into space and became the stars. After the birth of the Japan islands (Yezo and Sakhalin not being mentioned, as these were not discovered till long after the writing of the Kojiki and Nihongi), the remaining small islands and foreign countries were formed by the spontaneous consolidation of the form of the sea; hence their immeasurable inferiority. Hence Japan is the Holy Country—the Land of the Gods—and the mikado is the Tennó (heavenly king) and the Ten-
SHINTO 689

shi (son of heaven) whom all Japanese must reverently obey.

Shinto contains no moral codes. The duty of the Shintoist is to live in fear and reverence of the memories of the dead, to imitate the example of the gods and illustrious ancestors. Shinto prescribes no ritual, formulates no dogmas, contains no argument, teaches no immortality, commands no polemic propagation. These two latter doctrines may be easily developed from its Scriptures, as in practice they have been, since all men are derived from gods who are immortal, and the heavenly kami made war upon the earthly, and the mikados by divine right slew the disobedient rebels. The prescribed ecclesiastical machinery and personnel are extremely simple. Its temples (miya, "house worthy of honor") are thatched or shingled edifices of hinoki wood, about which there should be no paint, gilding, or gaudy decoration. The type of Shinto architecture, easily recognised, is the primitive hut with ridge-pole and cross-beams. Within are no idols or emblems. Nothing is visible save the strips of notched white paper called the goheki, which depend from a wand of hinoki wood, or are fixed in a pair of vases. A mirror—emblem of the purity of the sun-goddess—a casket of hinoki containing a paper on which a prayer is written, and, on occasions, the offerings of fruit, fish, and various foods, which become the property of the shrine-keepers, are the appurtenances of a Shinto temple. Outside, at the entrance of the path leading to the shrine, is the torii (bird-rest), or portal; now serving to the common mind as a gateway, but anciently used as a perch for the sacred fowls who proclaimed the break of day. Among the most approved of the ancient sacrifices, besides rice, rice-beer, fine cloth and coarse cloth, silk and brocade (now partly symbolized by the goheki), were white horses, boars, and cocks—the first for the personal use of the gods, the second for food, and the third for time-keepers. A peculiarity concerning the living sacrifices was that they were not slaughtered, but after being hung up by the legs before the shrine were again set free. Sin was recognised, and the need of confession and cleansing recognised. All sin was conceived as pollution. The chief Shinto rite is that of purification, and its rites consist almost wholly, besides offerings, of prayers for cleansing and actual illustrations. Anciently the mikados commanded public ablations in the river. Later on, the symbolical cleansing from sin was made by the people casting paper figures of men into the river; then the mikado (deputed the high-priest at Kioto) to perform the symbolical act for the whole nation, and an iron mannikin was made of the size of the mikado and thrown into the river. The ancient elaborate systems of purification by salt or water in the cases of birth, death, etc., binding the mouth of the officiating priest with a piece of paper, lest breath pollute the offerings, are all observed by Shinto priests, and their modern expression is that of rinsing the mouth or dipping the hands in water before prayer at the shrine. The following is a characteristic Shinto prayer. The worshipper at the shrine pulls a white rope attached to a bell hung in the roof above the shrine, clasps his hands in prayer, folds them palm to palm before his breast, with the thumbs, and prays, "I say with aye, deign to bless me by correcting the unwitting faults which, seen and heard by you, I have committed; by blowing off and clearing away the calamities which evil gods might inflict; by causing me to live long and hard, like the lasting rock; and by repeating to the gods of heavenly origin and to the gods of earthly origin the petitions which I present every day, along with your breath, that they may hear with the sharp-earedness of the forth-galloping colt." In the Engishichi, or Book of Ceremonial Law, there are numerous specimens of prayers and joyful chants for harvest, remarkable alike for their solemn simplicity and poetic beauty, and expressive of the deeper emotions of nature—thunder, lightning, earthquakes—and the kami of the sea, rivers, hot springs, mountains, trees, roads, yards, and wells, are all worshipped and addressed in prayer.

Such is "pure Shinto"—a bold mythology, a patriarchal cult of autochthons, a literary code of rules for propounding the supremacy of a tribe of conquerors, a religious device for a nation in its savage infancy—a Robinson Crusoe among religions. Motoori teaches that morals were invented by the Chinese because they were an immoral people; but in Japan there is no necessity for any system of morals, as every Japanese acted right if he did not cause hurt to others. It is proper to believe that a good Japanese consists in obeying the mikado, without questioning whether these commands are right or wrong. It is only immoral people like the Chinese who presume to discuss the character of their sovereigns. Hence, in ancient Japan, government and religion were one and the same. The mikado is the centre of the government and State, which are one. He is more than sovereign pontiff. Japan is the land of the gods. The mikado is god and vicar of all the gods, and in his hands rests the ownership of all the land; hence, what a Japanese eats, drinks, and enjoys is from the mikado and his heavenly ancestors. And, above all, is the ever-lasting glory of the Holy Country—one dynasty of heaven-descended rulers, which from all time has stood unchangeable, and to all eternity will stand unchangeable. (In Japan the dynasty has never changed. The present mikado is the 129th of the line, while in China there have been thirty-three of the imperial dynasties. The date fixed for the accession of Jimmu Tenno is B.C. 660.) As a political force, Shinto has no parallel in the history of Japan, if indeed of any nation. More than all else, it has contributed to the unity of the Japanese people. It was the main-spring of the tremendous revolution of 1868, whose secondary effect and outward phases have attracted the attention of the world. Such was Shinto before the advent of Confucian ethics or Buddhism.

"It is quite possible to show that the indigenous belief of the ancient Japanese contained unformed materials out of which might have been evolved, in the course of ages, both positive morality and law, had not the process been interrupted at an early stage."

II. History of Shintoism, including its Developments and Modifications by Buddhism and Chinese Ethics (A.D. 600-1700).—The Chinese ethical system reached Japan long before Buddhism. Confucianism easily lends itself to despotism, and the Five Relations of the Chinese sage were grafted on to the creation of the Shinto shrine and began to influence the Japanese in and after A.D. 552. The new faith from India met with ready acceptance,
its gradually rising sun eclipsing the old cult, which gradually lost many of its distinguishing characteristics, and for centuries was known in its purity in the main to have been guarded by the few court nobles. In some sequestered myias its rites were perfectly preserved, even to the lighting of fire by means only of the fire-drill and Retiuniora obtusa wood, whence the native word hinoki, "fire-wood."

In spite of the attractions of their more sensuous worship, the Buddhist propagandists found that the roots of Shinto were very strong in the hearts of the Japanese. To retain permanent hold upon the national heart, it would be necessary to propound some scheme of reconciliation by which the ancient traditions of their divine ancestors were woven into the Indian dogmas. To do this required some master spirit profoundly interested in both, and zealously guarded in the heart of the Buddhist nation. To retain permanent hold upon the national heart, it would be necessary to propound some scheme of reconciliation by which the ancient traditions of their divine ancestors were woven into the Indian dogmas. To do this required some master spirit profoundly interested in both, and zealously guarded in the heart of the Buddhist nation. To retain permanent hold upon the national heart, it would be necessary to propound some scheme of reconciliation by which the ancient traditions of their divine ancestors were woven into the Indian dogmas. To do this required some master spirit profoundly interested in both, and zealously guarded in the heart of the Buddhist nation. To retain permanent hold upon the national heart, it would be necessary to propound some scheme of reconciliation by which the ancient traditions of their divine ancestors were woven into the Indian dogmas. To do this required some master spirit profoundly interested in both, and zealously guarded in the heart of the Buddhist nation.

The conversion of a line of theocratic emperors, whose authority was derived from their divine origin and sacred titular character, is a striking anomaly in Japanese history: but to fuse into unity such cults as Shinto and Buddhism was not so much like that of the Reformed Homeric Helia--Grecian and Hebrew culture. Nevertheless, a Japanese Philo was at hand. Kobo, a Buddhist priest (b. 774, d. 855), perhaps Japan's mightiest intellect—the resemblance of whose head to that of Shakspere has been pointed out—achieved the work with almost surpassing success. In the end, Kobo was a Sanseki Pali, and Chinese, a zealous student of Buddhism in Corea and China, and a master of the Shinto Scriptures, which he studied at the Japanese Mecca, Isé. While at the shrine of the goddess Toy, she manifested herself to him and delivered the revelation on which his system is founded. His scheme, briefly stated, is that the Shinto deities are the incarnations of Buddha in Japan previous to the teaching of his perfect doctrines. Each Shinto kami is rebaptized with a Buddhist name. Thus Amaterasu becomes Amida, Ojin, Hachiman, etc. The legends of the Kojiki were explained according to the philosophy of Buddhism, and shown to contain the essence and tenets of Buddha's teachings. A characteristic specimen of this style of reasoning is the Sankei-ri, one of the best Japanese theological works. Kobo's system finally secured the complete ascendency of Buddhism. The mikado was so pleased that he gave it the name of Kiō-shinto (twofold doctrine of the godhead). The authority of Buddha for each Shinto Buddha, the Buddhist Bosatsu (Pohchisatra) and certain of the Shinto kami are worshipped as one and the same. The general name for the kami, who were incarnations of Buddha, is gongen. Thenceforth, until within the last decade, the form of Shinto generally known and practiced, and as such treated by both Europeans and Japanese, was a combination of the political force in and since the memorable year of 1868, when Japan achieved the paradox of a return to the ancient régime and to the modern order of things.

III. Revival and Reformation of Shintōism (from A.D. 1700 to the present time).—Within the last hundred years a school of native writers have attempted to purge Shinto of its foreign elements and present it in its original purity. The activity of these scholars bore fruit in the creation of a large body of literature, some polemic, but most of it of high historic and antiquarian value. At the same time the eyes of the people were opened to see that the shogun was a political usurper, and the mikado, being the heir of the gods, was, and ought of right to be, the sole ruler of his people. The increasing reverence for the mikado generated by Shinto scholars soon grew into fiery zeal, and a turbulent determination to restore the mikado, abolish Buddhism, sweep all foreigners from the Holy Country, and rehabilitate Shinto as the State religion. Shinto created one of the most powerful currents of thought that helped to swell the flood which in 1868 swept away the dual system of government and restored the Tennō (son of heaven) or mikado (honorable gate, sublime person, Pharaoh) to supremacy, abolished the office of shōgun, and made the city of Yedo the national capital, now called Tokio. These changes would doubtless have taken place even if Perry or other foreigners had not come to Japan. It was the general spirit of the nation that outward direction which has filled the eye of Christendom with wonder. No sooner was the new or ancient form of government established in Tokio than successive edicts were issued which utterly purged the Rikus-Shinto temples and all the national shrines of all Buddhist influences, both material and personal, and again the gokoku, mirror, and unpainted wood replaced the symbols, gilding, candles, incense, and paint of Buddhism. The Buddhist monasteries and temples were thrown of much of their revenues, and "sequestration" was the order of the day. A propaganda was instituted to teach its tenets in Tokio and elsewhere. In 1868, people to Shinto tenets and practice. Despite of sporadic and local successes, the scheme was a splendid failure, and bitter disappointment succeeded the first exaltation of victory. Confronted by modern problems of society and government, the mikado's ministers found themselves in the position of the ancient philosophers in religion, and gradually the shadowy cult of Shinto waned from its momentous splendor. Its fortunes may be traced in the rank and grade of the Department of Religion. And, for a while in 1868, the Jin Gi Kuan (council of the gods of heaven and earth) held equal authority and influence with the Dai Jo Kuan (the great council of government). Soon, however, from a supreme Kuan, it was made one of the ten boards of administration, the Jin Gi Shō. In less than a year its dignity was again lowered by being made the Kiō Bu Shō (board of religious instruction). Finally, in 1877, it was quietly turned over to the Home Department and made a bureau with a very shadowy existence. Nevertheless, Shinto is still a living force to millions in Japan, and, with Buddhism, shares the arena against advancing Christianity in that country. The census of 1874 gave a return of 76,119 Shinto officials and priests, and 129,000 Shinto shrines as against 207,699 Buddhist temples. It is probable that the Buddhists still outnumber Shintoists four or five times over. The cardinal tenets promulgated by the Department of Religion in 1872, which are the central themes of the Shinto lecturers (who, however, enforce them by texts drawn from the Confucian and Chinese classics), are the three following:

1. Thou shalt honor the gods and love thy country.
2. Thou shalt clearly understand the principles of heaven and the duty of man.
3. Thou shalt revere the mikado as thy sovereign and obey the will of his council.

In its higher forms, Shinto is simply a cultured and intellectual atheism. In its lower forms it is blind obedience to governmental and priestly dictates. "Shinto, as expounded by Motoōri, is nothing more than an engine for reducing the people to a condition of mental slavery." Japan being a country of very striking natural phenomena, the very soil and air lend themselves to support in the national mind this system of hero-worship and worship of the forces of nature. In spite, however, of the conservative power of the ancestral influences, the patriotic incentives, and the easy morals of Shinto, it is doubtful whether, with the pressure of Buddhism, the spread of popular education and Christianity, it can long continue to support in the national mind this system of hero-worship and worship of the forces of nature. For the details of worship, festivals, symbols, description of temples, etc., see works on Japan.

IV. Literature.—The leading writer on Shinto is Ernest Satow, secretary in Japan to H. D. M. Lega...
tion in Japan, who has written The Revival of Pure Shinto, and The Shinto Shrines of Ise, in the Transactions of the Asiatic Society of Japan for 1874; The Mythology and Worship of Ancient Japan, in the Westminster Review for July, 1878. See also Griffis, The Mikado's Empire, p. 43-55, 96-100, 160, 800; Appleton's Cyclopædia, ix, 538, 551, 652; Fusio Mimo Bukuuro (a budget of Japanese), Notes (Yokohama, 1874); see also, with caution, Klaproth, Aperçu des Annales des Empereurs du Japon; Siebold, Archiv zur Geschichts von Japan; Klaproth, Geschichte des Japans; and the various sketches of travellers and missionaries. See Japan. (W. E. G.)

SHIP (for the original term, see below). Under this head we propose to bring together all the important information extant relating to ancient and especially Biblical naval operations. These latter, although somewhat late historically and not very scientific, have nevertheless a peculiar interest.

I. Extent of Navigation.—The Jews cannot be said to have been a seafaring people; yet their position on the map of the world is such as to lead us to feel that they could not have been ignorant of ships or of the navigation which relates thereto. Phoenicia, the north-western part of Palestine, was unquestionably, if not at the head of, the earliest cultivators of maritime affairs. Then the Holy Land itself lay with one side coating a sea which was anciently the great highway of navigation, and the centre of social and commercial enterprise. We hear of ships sent by the Pharaoh in the Red Sea (Exod. vii. 7); and the Nile, with which river the fathers of the nation had become acquainted in their bondage, was another great thoroughfare for ships. The Red Sea itself, which conducted towards the remote east, was at no great distance even from the capital of the land. Then at different points in its long line of coast there were harbors of no mean repute. Let the reader call to mind Tyre and Sidon in Phoenicia, and Acre (Asco) and Jaffa (Joppa) in Palestine. Yet the decidedly agricultural bearing of the Israelitish constitution checked such a development of power, activity, and wealth as these favorable opportunities might have called forth on behalf of seafaring pursuits. There can, however, be no doubt that the arts of ship-building and of navigation came to Greece and Italy from the East, and immediately from the Levant; whence we may justifiably infer that these arts, so far as they were cultivated in Palestine, were there in a higher state of perfection at an early period than in the Hebran world. Of the great monarchs of the world (Ezek. xxvii; Strabo, bk. xvi; Comenius, De Nave Tyrtae). In the early periods of their history the Israelites themselves would partake to a small extent of this skill and of its advantages, since it was only by degrees that they gained possession of the entire land, and for a long time were obliged to give up the sovereignty of very much of their seaboard to the Philistines and other hostile tribes. The earliest history of Palestinian ships lies in impenetrable darkness, so far as individual facts are concerned. In Gen. xlix, 13 there is, however, a prophecy, the fulfilment of which would connect the Ishmaelites of the Arabian desert and the Palestinian inhabitants of the same name, as though they should dwell at the haven of the sea, and he shall be for a haven of ships, and his border shall be unto Zidon (comp. Deut. xxxi, 19; Josh. xix, 10 sq.).—words which seem more fitly to describe the position of Asher in the actual division of the land. These local advantages, however, had not been bare of ships and the business of navigation for his own purposes, he was still, whatever he did himself, indebted to Hiram for "shipmen that had knowledge of the sea" (1 Kings i, 26; x, 22). The effort, however, to form and keep a navy in connection with the East was not lastingly successful; it soon began to decline, and Jehoshaphat failed when at a later period he tried to give new life and energy to a new enterprise (xxii, 49, 50). In the time of the Maccabees Joppa was a Jewish seaport (1 Macc. xiv, 5). Herod the Great availed himself of the opportunities naturally afforded to form a more capacious port at Cesarea (Josephus, War, iii, 8, 8). Nevertheless, no purely Jewish trade by sea was hence even now called into being. Cesarea was the place whence Paul and Silas were carried as a prisoner to Rome (Acts xxvii, 2). His voyage on that occasion, as described most graphically in the Acts of the Apostles (xxvii, xxviii), if it requires some knowledge of ancient maritime affairs in order to be rightly understood, affords also rich and valuable materials towards a history of the subject, and might, we feel convinced, be so treated as of itself to supply many irresistible evidences of the certainty of the events therein recorded, and, by warrantable inferences, of the credibility of the evangelical history in general. No one but an eye-witness could have written the minute, exact, true, and graphic account which these two chiefs respectively give. The vessels connected with Biblical history were, with the exception of those used on the Sea of Galilee (for which see below), for the most part ships of burden, almost indeed exclusively so, at least within the period of known historical facts, though in a remote antiquity the Phenician ships may have been of the type of what we know of the Phoenician ships; in short, it is in keeping with the purposes. This peculiarity, however, of the Biblical ships exonerates us from entering into the general subject of the construction of ancient ships and their several subdivisions. A good general summary on that head may be found in Smith's Dictionary of Greek and Roman Antiquities, n. s. V. A few notes on the precisely regarding ships of burden may be of service to the scriptural student.

II. Sources of Information.—Ancient literature is singularly deficient in everything which relates to ships or navigation. No work written expressly on the subject has come down to us; and we are dependent for our knowledge on the subject upon the incidental notices in poets and historians, or upon the figures on coins, marbles, or paintings, often the works of ignorant artists, which are calculated to mislead. Recent discoveries have, however, added much to our knowledge of the subject, especially in the marbles and pictures exhibited at Berlin in 1884, and prints made of the whole range of Greek and Roman literature has supplied us (it may be doubted whether all put together have supplied us) with so much information concerning the merchant-ships of the ancients as Luke in the narrative of Paul's voyage to Rome (Acts xxvii, xxviii). There was also dug up at the Piraeus, in 1834, a series of marble slabs, on which were inscribed the inventories of the ships of the Athenian fleet. They have been published by Prof. Büch, of Berlin, under the title of Urvonden über das Seenesen des attischen Staates (Berlin, 1840, fol. and 8vo). The pictorial representations on the Egyptian monuments are, and always have been, of great service (Acts xxvii, 1-6); secondly, the large Alexandrian corn-ship, in which he was wrecked on the coast of Malta (ver. 6; xxviii, 1) [see Melita]; and, thirdly, another large Al-
exandrian corn-ship, in which he sailed from Malta by Syracusan and Rhægium to Puteoli (ver. 11–13).

The word employed by Luke of each of these ships is, with one single exception, when he uses ναῦς (Acts xxvii, 41), the generic term πλοῖον (ver. 2, 6, 10, 15, 22, 30, 37, 38, 39, 44; xxviii, 11). The same general usage prevails throughout. Elsewhere in the Acts (xx, 15, 38; xxi, 2, 5, 6) we have πλοῖον. So in James (iii, 4) and in the Revelation (viii, 9; xvii, 19, 19). In the Gospels we have πλοῖον (προς) or πλοῖον (Mark iv, 36; John xxi, 8). In the Sept. we find πλοῖον used twenty-eight times and ναῦς nine times. Both words generally correspond to the Hebrew נֵבִי, om, or מַגָּה, oniyah. In Jonah i, 5, πλοῖον is used to represent the Heb. מַגָּה, rephaiah, which, from its etymology, appears to mean a vessel covered with a deck or with hatches, in opposition to an open boat. The senses in which σκάφος (2 Macc. xii, 3, 6) and σκάφος (Acts xxvii, 16, 82) are employed we shall notice as we proceed. The use of τυρὴν, or trireme (A. V. “galley”), is limited to a single passage in the Apocrypha (2 Macc. iv, 20).

In four passages (Numb. xxiv, 24; Isa. xxxiii, 21; Ezek. xxx, 9; Dan. xi, 30) the Heb. term is נֵבִי, so called from being set up or built. See BOAT.

IV. Styles of Ancient Ships.—1. Their Sizes.—The narrative which we take as our chief guide affords a good standard for estimating this. The ship in which Paul was wrecked had 276 persons on board (Acts xxvii, 37), besides a cargo (φροῦριον) of wheat (ver. 10, 39); and all these passengers seem to have been taken on to Puteoli in another ship (xxviii, 11) which had her own crew and her own cargo; nor is there a trace of any difficulty in the matter, though the emergency was unexpected. Now in English transport-ships, prepared for carrying troops, it is a common estimate to allow a ton and a half per man; thus we see that it would be a mistake to suppose that these Alexandrian corn-ships were very much smaller than modern trading-vessels. What is here stated is quite in harmony with other instances. The ship in which Josephus was wrecked (Life, § 8), in the same part of the Levant, had 600 souls on board. The Alexandrian corn-ship described by Lucian (Nearchos. s. v. sōla) as driven into the Piræus by stress of weather, and as exciting general attention from her great size, would appear (from a consideration of the measurements, which are explicitly given) to have measured 1100 or 1200 tons. As to the ship of Ptolemy Philadephus, described by Athenæus (v. 204), this must have been much larger; but it would be no more fair to take that as a standard than to take the “Great Eastern” as a type of a modern steamer. On the whole, if we say that an ancient merchant-ship might range from 500 to 1000 tons, we are clearly within the mark.

2. Merchant-ships in the Old Testament.—The earliest passages where seafaring is alluded to in the Old Testament, are the following in order: Gen. xlix, 13, in the prophecy of Jacob concerning Zebulun (Sept. κατοικοῦντα παρὰ ἀξόνων πλοίων); Num. xxiv, 24, in Balaam’s prophecy (where, however, ships are not mentioned in the Sept.); Deut. xxviii, 68, in one of the warnings of Moses (αποτρέψας σε Κύριος αἰ Αὐγήντον ἐν πλοίοις); Judg. v, 17, in Deborah’s Song (Δαιν ἐν παροικε πλοίοις). Next after these it is natural to mention the illustrations and descriptions connected with this subject in Job (ix, 26, ἢ καὶ ἵστα ναῦσιν ἱχνὸς ὁδοῦ) and in the Psalms (xlvii [xlviii], 7, ἐν πνεύματι βασιν συντρίβεις πλοῖα θαρσῖς; ciii [civ], 26, ἐκ πλοία διασπάονται; cvii, 23, ὁι καταβαίνοντες ἐν ἑλάσσασι ἐν πλοίοις). Prov. xxiii, 34 may also be quoted. To this add xxx, 19 (ἠμέλεως νήσου οὐστοπορεώς); xxxi, 14 (ναῦσι ἐμπορούμεναι μακράθυροι). Solomon’s own ships, which may have suggested some of these illustrations (1 Kings ix, 26; 2 Chron. viii, 18; ix, 21), have previously been mentioned. We must notice the disastrous expedition of Jehoshaphat’s ships from the same port of Ezion-geber (1 Kings xxii, 48, 49; 2 Chron. xxx, 16, 17). The passages which remain are in the prophets, especially Isaiah and Ezekiel. In the former prophet the general term “ships of Tarshish” is variously given in the Sept., πλοῖον Ἑλάσσασ (Isa. li, 16), πλοῖον Καρχηδόνος (xxiii, 14), πλοῖα θαρσία (ix, 9). For another allusion to seafaring, see xxiii, 14. The celebrated 27th chapter of Ezekiel ought to be carefully studied in all its detail; and in Jonah i, 3–16 the following technical phrases in the Sept. (besides what has been already adduced) should be noticed: καλόν (ver. 3), συντρίβειν (ver. 4), ἐκδούλωσα τοὺς σκηνοῦντος, τοὺς κοινωνίζοντος (ver. 5), κοινωνία τῆς ἑλάσσας (ver. 11, 12). In Dan. xi, 40 (συναχίζοντας βασιλέως τοῦ Βαβylon ο Ἱερουσαλήμ καὶ ἐν ἰσπαστικὸν καὶ ἐν ναοῖς πολλαῖς) we touch the subject of ships of war.

3. Ships of War in the Apocrypha.—Military operations both by land and water (ἐν τῇ Ἑλάσσας καὶ ἐν τῇ Ἰερουσαλήμ, 1 Macc. xxxii, 28, 32) are prominent subjects in the books of Maccabees. Thus in the contrast between Judas Maccabaeus and the Romans it is agreed (ver. 26, 28) that no supplies are to be afforded to the enemies of either, whether σῖτος, ἔλαιον, ἀργυρίον, or πλοῖα. In a later passage (xxv, 3) we have more explicitly, in the letter of king Antiochus, πλοῖα πολεμικά (see ver. 14), while in 2 Macc. iv, 20 (as observed above) the word τρίτικος, “galley,” occurs in the account of the proceedings of the infamous Jason. Here we must not forget the monument erected by Simon Maccabaeus on his father’s grave, on which, with other ornaments and military symbols, were πλοῖα ἑπταγελημένα, ἐκ τῆς ἑφευρέσεως ὑπὸ πάντων τῶν Ἑλάσσας (1 Macc. xii, 29). Finally, must be mentioned the ναῦσα at Joppa, when the resident Jews, with their wives and children, 200 in number, were intro-
duced to go into boats and were drowned (2 Macc. xii, 3, 4), with the vengeance taken by Judas (τοὺς μὲν λε-μίνα νῦττων ἱεροποιεῖ καὶ τὰ σκάφη κατιολεῖ, ver. 6). It seems sufficient simply to enumerate the other pas-
sages in the Apocrypha where some allusion to seafar-
ing is made. They are the following: Wind. v, 10; xiv, 1; Ecclus. xxxiii, 2; xiii, 24; 1 Esd. iv, 23.

Modern Levantine Ship.

In row-boats the rowers are seated on the cross-
beams (Στράτης, in Latin triclinia), hence called zygites. Before the invention of gunpowder, naval combats were necessarily at close quarters; but to enable the soldiers (ἐπίβαται) to fight without interfering with the row-
ers, a platform or gangway (παροδος) was laid on the
top of the bulwarks which surround the deck, projecting partly over the side and partly over the deck. Upon this they fought; and, where great speed was required, as in pursuit or flight, the fighting-men rowed, in which case movable seats or stools (Στράτης) were requisite for them to sit upon, and from these they were called thra-
wites. It appears, therefore, that from the necessity of the case, fighting-vessels must have had more than
one rank of rowers, just as the natives of the South
Seas both fight and row from the outriggers of their
canoes. The adjoining cut represents the upper rank,
or thratites, rowing from the gangway. It is right
to explain that the artist has contrived to give the
details of the bow and stern, by introducing only one
fourth of the straight part of the ship where the rowers
were seated. Otherwise, if done to a scale, a long low
vessel would have appeared on a coin little more than a
mere line.

As the size of the vessels was increased, and they were decked over, the zygites retained their name, but were necessarily placed upon raised seats. Upon trial it was found that an additional rank of rowers, seated on the deck between the oars of the primitive rank, could, by keeping time, row without difficulty. As these were seated nearer the side of the ship, and under the gang-
way or sheltered portion of the deck, which was called the thalamus, or sleeping-place, they were called thal-
amites. Hence the three ranks of rowers in a trireme were the thronites, zygites, and thalamites; and hence the vertical distance between the rows was only one half of the horizontal distance, or only eighteen inches, instead of six feet, as is usually supposed.

The monoxide, or hollow tree, with both ends rounded, must be held to be the primitive form and model for the ship, and continued to be so with little alteration till the Middle Ages, when a change in the mode of steering ren-
dered a change in the form of the stern necessary, but which it is foreign to our purpose to take into consider-
ation.

4. Boats on the Sea of Galilee.—The reader of the
New Test. is well aware how frequently he finds himself
with the Saviour on the romantic shores of the Sea of
Gennesareth. There Jesus is seen, now addressing the
people from on board a vessel, σκάφος (Matt. xiii, 2,
Luke v, 8), now sailing up and down the lake (Matt.
vi, 25; ix, 1; xiv, 13; John vi, 17). Some of his ear-
liest disciples were proprietors of barks which sailed on
this inland sea (Matt. iv, 21; John xxii, 5; Luke v, 9).
These “ships” were indeed small. Josephus designates
the ships here employed by the term σκάφος. They were not, however, mere boats; they carried their anchor with them (War. iii, 10, 1; Life, § 80). There was, too, a kind of vessel larger than this, called ερείδεα by Josephus, who narrates a sea-fight which took place on the lake, conducted on the part of the Romans by Vespasian himself
(War. iii, 10, 9). It thus appears that the lake was not contemptible nor its vessels
mean; and those should hence learn to qual-
ify their language who represent the Galilean
fishermen as of the poorest class.

Coin of Hadrian, showing a Trireme.
There is a melancholy interest in that passage of Dr. Robinson’s Researches (iii, 233) in which he says that on his approach to the Sea of Tiberias he saw a single white sail. This was the sail of the one rickety boat which, as we learn from other travellers (see especially Thomson, Land and Book, ii, 81), alone remains on a scene represented to us in the gospels and in Josephus as full of life from the multitude of its fishing-boats. In the narratives of the call of the disciples to be “fishers of men” (Matt. iv, 18-22; Mark i, 16-20; Luke v. 1-11), there is no special information concerning the characteristics of these boats. In the account of the storm and the miracle on the lake (Matt. viii, 23-27; Mark iv, 38-41; Luke viii, 22-25), it is for every reason instructive to compare the three narratives; and we should observe that Luke is more technical in his language than Matthew, and Mark than Luke. Thus, instead of πλοιοὶ μέγα, ζεύγος εἶναι εἰς τὴν βαλανή (Matt. viii, 24), we have κατιζή λαλαψ αὐτόμοις εἰς τὴν λίμνην (Luke vii, 23), and again τὴν ἐλάθος τοῦ ὕδατος (ver. 24); and instead of ὡστε τὸ πλοῖον καλύπτεται, we have συνελευθέρωται. In Mark (iv, 41) we have τὰ κύματα ἐπιβαλλείς εἰς τὸ πλοῖον, ὡστε αὐτὸ ἄγνωστον. This evangelist also mentions the προσκεφαλαίως, or boatman’s cushion, on which our blessed Saviour was sleeping εἰς τῷ πρώτῳ, and he uses the technical term ἔκπτοσμος for the lulling of the storm. See more on this subject in Smith, Dissertation on the Gospels (Lond. 1853). We may turn now to John. In the account he gives of what followed the miracle of walking on the sea (vi, 16-25), πλοῖον and πλοῖα ὀμαίνεται seem to be used indifferently, and we have mention of other πλοία ὀμαίνει. There would of course be boats of various sizes on the lake. The reading, however, is doubtful. Finally, in the solemn scene after the resurrection (John xx, 1-8), furnished with a προσκεφαλαίως, “pillow,” which, according to Hezychius, was the same as the ἄντρομωμα, or fleece, upon which the rowers sat. So far as we can learn from the scriptural account, they fish with nets, we must suppose with the drag-net, and also with the ἀμφίβλετρων (Matt. iv, 18) or ἀμφίβλετος (Mark i, 16).

Fishermen Dragging a Net. (Mosaic pavement from Corinth, in the British Museum.)

V. Construction and Equipment.—1. Shape and Ornaments of the Hull.—It is probable, from the mode of steering (and, indeed, it is nearly evident from ancient works of art), that there was no very marked difference between the bow (πρώτος, “foreship,” Acts xxvii, 30, “fore part” ver. 41) and the stern (πρῶτος, “hinder part,” ver. 41; see Mark iv, 38). The “hold” (κοίλη, “the sides of the ship,” Jonah i, 5) would present no special peculiarities. In merchant-ships the sides of the deck were defended by an open rail, the stem-post and stem-post being in a curve, most frequently terminated by an ornament representing the head of a water-fowl bent backwards. This was termed the apedole or ἀπεδολεῖς (χίλιοις, from χίλιοι, a goose); or by a head in profile, probably suggestive of the sign (παρατόμωμα, Acts xxviii, 11) or name of the ship. Outside of these ornaments were projections at each end, which increased the dimensions without adding to the capacity of tonnage of the vessels. This must be kept in mind in estimating the relative size of ancient and modern ships. On the stern-projections we sometimes see an awning represented, as in the ship on the tomb at Pompeii; and on the
corresponding projections at the bow, we are informed by Lucian, in his description of an Alexandrian ship, that the anchors were stowed, and also the πτεράχαια και περαγωγική. The πτεράχαια may be interpreted capstans for heaving up the anchors, and the περαγωγικά θάλαμος or paddles for helping the ship round when "slack in stays," rendered by Hedaricus "instrumentum ad circumanagem navem." In the picture of Theseus desiring Adriande, from Hercules Leonum, we see the cable coiled round a capstan near the stern. We see also the bow as one of the features, or cabins, of a ship, also mentioned by Lucian in his description of the ship of Alexandria. It will be observed that the mode of furling the sails like a window-curtain, more fully indicated in another figure, is marked by the outline of the sole or lower edge of the sail. Of two other customary ornaments, however, one is probably implied, and the second is distinctly mentioned in the account of Paul's voyage. That personification of ships which seems to be instinctive led the ancients to paint an eye on each side of the bow. Such is the custom still in the Mediterranean, and indeed our own sailors speak of "the eye" of a ship. This gives vivdness to the word ἀλατία, which is used (Acts xxvii, 15) where it is said that the vessel could not "bear up into" (literally "look at") the wind. This was the vessel in which Paul was wrecked. An ornament of that which took him from Malta to Perea is more explicitly referred to. The "sign" of that ship (παρασύραμος, Acts xxvii, 11) was "Castor and Pollux" (Ludia sidera—brilliant constellations, suspicious to navigators, Horace, Od. i, 3; Liv. xxxvii, 92; Tacit. Ann. vi, 84; Ovid, Trist. i, 10, 1); and the symbols of these heroes (probably in the form represented in the coin engraved under that article) were doubtless painted or sculptured on each side of the bow, as was the case with the goddessless Isia on Lucian's ship (ἡ περαγωγική των κατακομβῶν τοῦ καισαρίου, Navis, c. 5). The Rev. George Brown found an inscription at Port Phoenia which had been on an ancient building, superintended by an Alexandrian governor (κατεβασμικής, Acts xxvii, 11), of the ship whose sign was "Iphtharia." In the list of the Attic fleet we find names like those of the moderns, such as "Agatha," "Amphitrite," "Aura," "Delia," "Lyra," "Europa," "Centaur," "Roma," etc.

2. Masts, Sails, Ropes or Rigging, Yarda, Oara, etc.—These, in distinction from the hull or vessel itself, were collectively called σκυφόν or σκυφοῦν (ή ἢ σταγε- 

rom a σκυφός καλλίτης, Jul. Polli.). We find this word twice used for parts of the rigging in the narrative of the Acts (xxvii, 17, 19). The rig of an ancient ship was more simple and clumsy than that employed in modern times. Its great feature was one large mast, with one large square sail fastened to a yard of great length. Such was the rig also of the ships of the Northmen at a later period. Hence the strain upon the hull and the danger of starting the planks were greater than under the present system, which distributes the mechanical pressure more evenly over the whole ship. Not that there were never more masts than one, or more sails than one on the same mast, in an ancient merchantman. But these were repetitions, so to speak, of the same general unit of rig. In the account of Paul's shipwreck very explicit mention is made of the στροφήν (Acts xxvii, 40), which is undoubtedly the "fore-sail" (not "main-sail," as in the A. V.). Such a sail would be almost necessary in putting a large ship about. On that occasion it was used in the process of running the vessel aground. Nor is it out of place here to quote a Crimen letter in the Times (Dec. 5, 1855): "The 'Lord Raglan' [merchant-ship] is on shore, but taken there in a most soldierlike manner. Directly her captain found he could not save her, he cut away his mainmast and mizen, and, setting a topsail on her foremost, ran her ashore stern on." Such a mast may be seen raking over the bow, in representations of ships in Roman coins. In the Old Testament, the mast (ιερός) is mentioned (Isa. xxxiii, 23); and from another prophet (Ezek. xxvii, 5) we learn that the cedar-wood from Lebanon was sometimes used for this part of ships. There is a third passage (Prov. xxiii, 94, ὁπὸ τοῦ καφέ) where the top of a ship's mast is probably intended, though there is some slight doubt on the subject, and the Sept. takes the phrase differently. Both ropes (εὔφωνια, Acts xxvii, 32) and sails (ἰστία) are mentioned in the above-quoted passage of Isaiah; and from Ezekiel (xxvii, 7) we learn that the latter were often made of Egyptian linen (if such is the meaning of στροφήν). There the word γάλακτος (which we find also in Acts xxvii, 17, 30) is used for lowering the sail from the yard. It is interesting here to notice that the word ινάτουλομα, the technical term for furling a sail, is twice used by Paul, and that in an address delivered in a seaport in the course of a voyage (Acts xx, 20, 27). It is one of the very few cases in which the apostle employs a nautical metaphor. The annexed cut, from a marble in the Borghese collection at Rome, gives a good idea of the relative size and position of the sails, although in other respects the details are incorrect. It will be observed from this, as well as from the figure of the ship from the tomb at Pompeii, the sails are divided into compartments by ropes sewed across them; so that should the sail be torn in a storm, the injury would be confined to one of the squares. The name of the great and proper mast (ὁ μήκος καὶ γαφός ἢστος) was aca- 

tion (ἀκαστός); the mast at the stern επιδρόμος, accord- 

ing to Julius Pollux, who adds that the smallest was called dolon, without, however, mentioning its position. Isidore of Seville gives the same names to the sails in a passage evidently taken from the foregoing, which is as follows: "Acantium velum maximum et in medium naves constitutum, epidermos secundae ampli- 

dinis sed ad puppum. Dolon minimum velum et ad pro- 

ram armem diringende potius navis causa commendatur quam celeritate." It has generally been supposed by 

this that the sail at the bow was called the dolon. Mr. 

Smith, however, in his essay has shown, by numerous 

extracts from ancient authors, that the dolones were
small sails to be substituted for the larger in stormy weather, and that the mast at the bow with its sail was the artemon. In addition to the three lower sails, they had suppara, or topsails, to be set in light winds; and it would appear from a coin of Nero, given by Montfaucon (pl. cxliii.), that they had sails above the suppara equivalent to toppgallant-sails—a ship being represented with two yards above the main-yard. We have no proof that the ancients made use of what, in modern language, are termed fore-and-aft sails; but they certainly had triangular sails, at least in the war-galleys, with the apex at the foot of the mast; such a sail could be braced about without interfering with the rowers, which was probably the reason why this form was adopted. The two lower corners of the sails, or rather the ropes which attach them to the sides of the ship, in English the “sheets,” were called the feet of the sail. The proper, fore-foot (πρωπόστασις), a word which has puzzled commentators, is simply the sheet which is drawn forward, and would no doubt have been called in English the fore-sheet, had that term not been applied to the sheet of the foresail. The σκεῖον in ancient ships consisted of σκεῖον ξύλινα (wooden gear), and σκεῖον κριμαστά (hanging gear); the first consisted of masts, yards, oars, rudders, etc. The σκομή (fines) were the hawser or strong ropes for the anchors, and also for fastening the ship astern; while the ρωτία was a lighter kind of cordage, carefully made and attached to the masts, yards, and sails. The yards (εξαρία) were composed of two spars doubled in the centre. This explains an apparently absurd non sequitur of Pliny. He tells us that, although single spars were large enough, yet seamen were so rash as to add sail to sail—the word “non” being obviously omitted. The above cut, from the tomb of Naoolea Tyche at Pomppei, explains the mode of furling the sails by drawing them up to the yard like a window-curtain, as already noticed in the ship of Theseus.

This seems the best place for noticing three other points of detail. Though we must not suppose that merchant-ships were habitually propelled by rowing, yet sweeps must sometimes have been employed. In Ezek. xxxvii, 29, oars (ἐνδέσμα) are distinctly mentioned; and it seems that oak-wood from Bashan was used in making them (καί τις Βασσανίτης ἐπιφησάμεν τὰς κώ-πας σου, ver. 6). Again, in Isa. xxxiii, 21, ἄλος ἡμῶν literally means “a ship of oar,” i.e. an oared vessel. Rowing, too, was probably implied in Jonah I, 13, where the Sept. has simply παρασκέφαστο. Another feature of the ancient as of the modern ship is the flag, or σημεῖον, at the top of the mast (Isa. loc. cit. and xxx, 17). Here, perhaps, as in some other respects, the early Egyptian paintings supply our best illustration. Each ship was provided also with a plumb-line for sounding (Acts xxvii, 29; Isidor. Orig. xix, 4).

3. Steering Apparatus.—Some commentators have fallen into strange perplexities from observing that in Acts xxvii, 40 (τὰς ἑκτερα- ριας τῶν πηλίων, “the fastenings of the rudders”) Luke uses πηλίδαι in the plural. One even suggests that the ship has one rudder fastened at the bow and another fastened at the stern. We may say of him, as a modern writer says in reference to a similar comment on a passage of Cicero, “It is hardly possible that he can have seen a ship.” The sacred writer’s use of πηλίδαι is just like Pliny’s use of guberaecula (H. N. xii, 37, 88) or Lucer- tius’s of guberna (iv, 440). Ancient ships were in truth not steered at all by rudders fastened or hinged to the stern, but by means of two rudder-rudders, one on each quarter, acting in a rowlock or through a port-hole, as the vessel might be small or large. This fact is made familiar to us in classical works of art, as on coins, and the sculptures of Trajan’s Column. The same thing is true, not only of the Mediterranean, but of the early ships of the Northmen, as may be seen in the Bayeux tapestry. Traces of the “two rudders” are found in the time of Louis IX. The hinged rudder first appears on the coins of king Edward III. There is nothing out of harmony with this early system of steering in James ii, 4, where πηλίδαι occurs in the singular; for “the governor” or steersman (ὁ ἐλευθερος) would only use one rudder-rudder at a time. In a case like that described in Acts xxvii, 40, where four anchors were let go at the stern, it would of course be necessary to lash or trice up both paddles, lest they should interfere with the ground tackle. When it became necessary to steer the ship again, and the anchor-ropes were cut, the lashings of the paddles would of course be unfastened.

4. Anchors.—It is probable that the ground tackle of Greek and Roman sailors was quite as good as our own. The anchors appear to have differed little from those of the moderns, except that in place of the palms or iron plates attached to the extremities of the arms, the arms themselves were beaten flat, as in the Dutch anchor. It is a common error to suppose that they were without stocks. Thus Capt. Beechey says, “The transverse piece or anchor-stock is wanting in all of them.” The annexed cut, from a coin of Antoninus Pius, shows that this is a mistake. Two allusions to anchoring are found in the New

---

Coin of Antoninus Pius, showing Anchor.
many instances could be given where it has been found necessary in modern experience. Ptolemy's great ship, in Athenaeus (loc. cit.), carried twelve of these undergirders (σπασσατα). Various allusions to the practice are to be found in the ordinary classical writers. See, for instance, Thucyd. i. 29; Plato, Rep. x. 5, 616; Horace, Od. i. 14, 5. But it is most to our purpose to refer to the complete inscriptions containing a complete inventory of the Athenian navy, as published by Böckh (Urkunden über das Seewesen des attischen Staates [Berlin 1840]). The editor, however, is quite mistaken in supposing (p. 133–138) that these undergirders were passed around the body of the ship from stern to stern.

5. Ship's crew.—This is perhaps the best place for noticing separately the σκάφος, which appears prominently in the narrative of the voyage (Acts xxvii, 16, 32). Every large merchant-ship must have had one or more boats. It is evident that the Alexandrian corn-ship in which Paul was sailing from Fair Havens, and in which the sailors, apprehending no danger, hoped to reach Phenicia, had her boat towing behind. When the gale came, one of their first desires must have been to take the boat on board, and this was done under the lee of Claudia, when the ship was undergirded, and brought round to the wind for the purpose of lying-to; but it was done with difficulty, and it would seem that the ship was on the verge of destruction in that short spell of τοὐρομάτων τε φυσικῶν τινῶν τῆς σκάφος, ver. 16). The sea by this time must have been furiously rough, and the boat must have been filled with water. It is with this very boat that one of the most lively passages of the whole narrative is connected. When the ship was at anchor in the night before she was run aground, the sailors lowered the boat from the davits with the selfish desire of escaping, on which Paul spoke to the soldiers, and they cut the ropes (καὶ σχοινία) and the boat fell off (ver. 30–32).

VI. Command and Management.—1. Officers and Crew.—In Acts xxvii, 11 we have both εὐκριτήριον and καύλορος. The latter is the owner (in part or in whole) of the ship or the cargo, receiving also (possibly) the fares of the passengers. The former has the charge of the steering. The same word occurs also in Rev. xviii, 17; Prov. xxvii, 34; Ezek. xxvii, 8, and is equivalent to σκαφής in ver. 29; Jonah 1, 6. In James iii, 3, 4 we δισκόρου, “the master,” is simply the steersman in the moment. The word for “shipmen” (Acts xxvii, 27, 30) and “sailors” (Rev. xviii, 17) is simply the usual term, ναῦστης. In the latter passage δίμως occurs for the crew, but the text is doubtful. In Ezek. xxvii, 8, 26, 27, 29, 34, we have κυριλλάται for “those who handle the oar.” The word oar, as stated in chap. xxvii, 39, in this ship, which may mean either passengers or mariners. The other only passages which need be noticed here are 1 Kings ix, 27, and 2 Chron. viii, 18, in the account of Solomon’s ships. The former has τῶν παίδων αὐτῶν ἀνδρῶν ναυτικῶν, θυσίων ἡλίκων ἔδωκεν Δίδασσαν; the latter, παιδὸς ἄνδρας Δίδασσαν.

2. Rate of Speed.—Paul’s voyages furnish excellent data for approximately estimating this, and they are quite in harmony with what we learn from other sources. We must notice here, however (what commentators sometimes curiously forget), that winds are variable. Thus the voyage between Troas and Philippi, accomplished on one occasion (Acts xvi, 11, 12) in two days, occupied on another occasion (xx, 6) five days. Such a variation might be illustrated by what took place almost any week between Dublin and Holyhead before the application of steam to sea-faring. With a fair wind an ancient ship would sail fully seven knots an hour. Two very good instances are again supplied by the narrative— in the voyages from Ceesarea to Sidon (xxvii, 2, 3) and from Rhegium to Puteoli (xxvii, 13). The result given by comparing, in these cases, the measurements of time and distance corresponds with what we gather from Greek and Latin authors generally— e.g. from Pliny’s story of the fresh fig produced by Cato.
In the Roman senate before the third Punic war: "This fruit was gathered fresh at Carthage three days ago; that is the distance of the enemy from your walls!" (H. N. xvi. 20).

3. Sailing Before the Wind and Near the Wind.—The square-rig which has been described is, like the rig of Chinese junks, peculiarly favorable to a quick run before the wind. (Acts xxvi. 11, xxvii. 16) the technical term εἰκόνισθαι for voyages made under such advantageous conditions. The run of Paul's ship from Rhegium to Puteoli, one hundred and eighty miles, in two consecutive days, the wind being from the south and consequently fair, agrees perfectly with the instances added by captain Beechy in his "Travel in the Mediterrenean," (Apollo iv. 36, v. 23; Philo, Opp. iv. 548; Acts xxvii. 9); and ships which, towards the end of the year, were still at sea earnestly sought a harbor in which to pass the winter. (ver. 12).

The first century of the Christian era was a time of immense traffic in the Mediterranean; and there must have been many vessels lost there every year by shipwreck, and, perhaps, as many by foundering. This last danger would be much increased by the form of rig described above. Besides this, we must remember that the ancients had no compass and very imperfect charts and instruments, if any at all, and though it would be a great misfortune if the ship were lost in the open sea, it would be even worse if it were driven out of sight of land, yet, dependent as they were on the heavenly bodies, the danger was much greater than in new bad weather, when the sky was overcast and "neither sun nor stars in many days appeared." (Acts xxvii. 20). Hence, also, the winter season was considered dangerous and, if possible, avoided (ὑπὸ τῶν ἡμῶν πολέμων τοῦ ἄνευ καὶ τῶν ἁρπαγμῶν, Acts xxvii. 7) sailing slowly and with a favorable wind, if there were some. If it did not make navigation contrary winds; but we know from the context that the ship was sailing to the westward, in a region and at a season when westwardly winds constantly prevail. The superior rig and build, however, of modern ships enable them to sail nearer to the wind than was the case in classical times. At one very critical point of Paul's voyage to Rome (ibid.) we are told that the ship could not hold on her course (which was west by south, from Cnidus by the north side of Cretae) against a violent wind (μὴ προσέρχεται ἡμᾶς τοῦ ἄνευ) blowing from the north-west, and that consequently she ran down to the east end of Cretae (see SALMONE), and worked up under the shelter of the south side of the island (ver. 7, 8). See Fair Havens. Here the technical terms of our sailors have been employed, whose custom is to divide the whole circle of the compass-card into thirty-two equal parts called points. A modern ship, if the weather is not very boisterous, will sail within six points of the wind. To an ancient vessel, however, the hull would be so heavily loaded that the yards could not be kept close, and it would be safer to assign seven points as the limit. This will enable us, so far as we know the direction of the wind (and we can really ascertain it in each case very exactly), to lay down the tracks of the ships in which Paul sailed, beating against the wind, on the voyages to Rome (Acts xxi. xxii. 6), from Sisera to Myra (διὰ τοῦ τούτον ἐν Ἰοναστίου, ver. 7, 8), from Myra to Cnidus (ἐν Κυνοῦ, ἔντος ἀνεύτων, ver. 7, 9), from Salmone to Fair Havens (κάθε παραλαγομένοι, ver. 7, 8), from Syracusa to Rhegium (παραλαγομένα, xxii. 12, 10).

4. Luke. This topic arises naturally out of what has preceded, and it is so important in reference to the main questions connected with the shipwreck at Malta that it is here made the subject of a separate section. A ship that could make progress on her proper course, in moderate weather, when sailing within seven points of the wind, would lie-to in a gale, with her length making about the same angle with the direction of the wind. This is done when the object is not to make progress at all hazards, but to ride out a gale in safety; and this is what was done in Paul's ship when she was undergirded and the boat taken on board (Acts xxvii. 14-17) under the lee of Claudia. It is here that Luke uses a word which is generally supposed to be the proper term for "to hold a ship undergirded," and which is not found in any English dictionary. Of the gale had been less violent, the ship could easily have held on her course. To anchor was out of the question; and to have drifted before the wind would have been to run into the fatal Syltis on the African coast. See Quickands. Hence the vessel was laid-to ("close-hauled," as the sailors say) "on the starboard tack," i.e., with her right side towards the storm. The wind was east-northeast [see Eurycylidon], the ship's bow would point north by west, the direction of drift (six points being added for "lee-way") would be west by north, and the rate of drift about a mile and a half an hour. It is from these materials that we easily come to the conclusion that the vessel which had been wrecked on the coast of Malta. See Adria.

5. Storms and Shipwrecks.—The dangers of the ocean to sailors on board such ships as these were great, and, in the then ignorance of navigation, caused sailing to be restricted to the spring, summer, and autumn months; winter was avoided. To the Romans the sea was open in winter. (Cic. de Orat. iv. 11; Probr. xiv. 36, v. 23; Philo, Opp. iv. 548; Acts xxvii. 9); and ships which, towards the end of the year, were still at sea earnestly sought a harbor in which to pass the winter. (ver. 12).

The first century of the Christian era was a time of immense traffic in the Mediterranean; and there must have been many vessels lost there every year by shipwreck, and, perhaps, as many by foundering. This last danger would be much increased by the form of rig described above. Besides this, we must remember that the ancients had no compass and very imperfect charts and instruments, if any at all, and though it would be a great misfortune if the ship were lost in the open sea, it would be even worse if it were driven out of sight of land, yet, dependent as they were on the heavenly bodies, the danger was much greater than in new bad weather, when the sky was overcast and "neither sun nor stars in many days appeared." (Acts xxvii. 20). Hence, also, the winter season was considered dangerous and, if possible, avoided (ὑπὸ τῶν ἡμῶν πολέμων τοῦ ἄνευ καὶ τῶν ἁρπαγμῶν) by sailing slowly and with a favorable wind, if there were some. If it did not make navigation contrary winds; but we know from the context that the ship was sailing to the westward, in a region and at a season when westwardly winds constantly prevail. The superior rig and build, however, of modern ships enable them to sail nearer to the wind than was the case in classical times. At one very critical point of Paul's voyage to Rome (ibid.) we are told that the ship could not hold on her course (which was west by south, from Cnidus by the north side of Cretae) against a violent wind (μὴ προσέρχεται ἡμᾶς τοῦ ἄνευ) blowing from the north-west, and that consequently she ran down to the east end of Cretae (see SALMONE), and worked up under the shelter of the south side of the island (ver. 7, 8). See Fair Havens. Here the technical terms of our sailors have been employed, whose custom is to divide the whole circle of the compass-card into thirty-two equal parts called points. A modern ship, if the weather is not very boisterous, will sail within six points of the wind. To an ancient vessel, however, the hull would be so heavily loaded that the yards could not be kept close, and it would be safer to assign seven points as the limit. This will enable us, so far as we know the direction of the wind (and we can really ascertain it in each case very exactly), to lay down the tracks of the ships in which Paul sailed, beating against the wind, on the voyages to Rome (Acts xxi. xxii. 6), from Sisera to Myra (διὰ τοῦ τούτον ἐν Ἰοναστίου, ver. 7, 8), from Myra to Cnidus (ἐν Κυνοῦ, ἔντος ἀνεύτων, ver. 7, 9), from Salmone to Fair Havens (κάθε παραλαγομένοι, ver. 7, 8), from Syracusa to Rhegium (παραλαγομένα, xxii. 12, 10).

Luke. This topic arises naturally out of what has preceded, and it is so important in reference to the main questions connected with the shipwreck at Malta that it is here made the subject of a separate section. A ship that could make progress on her proper course, in moderate weather, when sailing within seven points of the wind, would lie-to in a gale, with her length making about the same angle with the direction of the wind. This is done when the object is not to make progress at all hazards, but to ride out a gale in safety; and this is what was done in Paul's ship when she was undergirded and the boat taken on board (Acts xxvii. 14-17) under the lee of Claudia. It is here that Luke uses a word which is generally supposed to be the proper term for "to hold a ship undergirded," and which is not found in any English dictionary. Of the gale had been less violent, the ship could easily have held on her course. To anchor was out of the question; and to have drifted before the wind would have been to run into the fatal Syltis on the African coast. See Quickands. Hence the vessel was laid-to ("close-hauled," as the sailors say) "on the starboard tack," i.e., with her right side towards the storm. The wind was east-northeast [see Eurycylidon], the ship's bow would point north by west, the direction of drift (six points being added for "lee-way") would be west by north, and the rate of drift about a mile and a half an hour. It is from these materials that we easily come to the conclusion that the vessel which had been wrecked on the coast of Malta.
SHIP

are some which have not been mentioned in this article: ανιγγέας κατάγεσσαν (e.g. Acts xxviii, 11, 12), σανίτις (Ezek. xxvii, 5), τρόπος (Wisd. v. 10), αναβάινων (Jonah i, 3; Mark vi, 51), γλυβρή (Matt. viii, 26), ἀδρὶβαρος (Heb. xx, 18; αργοτριστάς (Heb. xxiv, 4), ἑπταόπω (xxvii, 18), γυνών (ἀνόμος τυφνός, ver. 14) ἁγίας καταστεῖν (ἀγίας κτεῖναι, ver. 30), ἐδρατός ἀνέμως (ἐδρατός, ver. 10; ἐδρατός, ver. 21), προσκεκλῶ (προσκεκλῶ, ver. 41), κολυμάθη (ver. 42), ἐλισάτεσσ' τῆς νείκης (ὑπέρ πιάνα ἠλέστε, ver. 41). This is an account of the various parts of the ship. It may serve to show how rich the New Testament and Sept. are in the nautical phraseology of the Greek Levant. To this must be added a notice of the peculiar variety and accuracy of Luke's ordinary phrases for sailing under different circumstances, σκέος, ἅπανέλαιον, ἅρπανος, σαφέως, ἑπτάόπω, ὑπόπω, παραπλω, ἑδρατός, ἑπταόπω, ἑπτάπλω, φλοράμ, διαφορά, διαφορά.

VII. Authorities.—Smith's work on the Voyage and Shipwreck of St. Paul (Lond. 1848, 1856) is the standard work on ancient ships, and it contains a complete list of previous books on the subject. Reference, however, may be made to the memoir on Aegae in Greece, by P. Pusey, incorporated in Conybeare and Howson, Life and Epistles of St. Paul (Lond. 1856, 2d ed., ch. xxvii, note.) See also Schlözer, Vers. einer allg. Gesch. d. Handels u. der Schiffsfahrt in den ältesten Zeiten (Eestock, 1780); Le Roy, La Marine des Anciens Peuples (Paris, 1789); Benevent, Gli Antichi Naviganti (Naples, 1792); Benedict, Vers. einer allg. Gesch. d. Schiffsfahrt u. d. Handel bei d. Aten (ibid. 1809); Howell, On the War Galleys of the Ancients; Jai [A.], Architlogie Navale (Paris, 1840). A full account of the ancient Egyptian vessels is given by Wilkinson, abridged, i., 411 sq; ii, 119 sq. See Navigation; Shipwreck.

SHIP, in ecclesiastical usage, is the name given to the vessel, shaped like a ship, in which incense is kept. It is also called a BATEA.

Shipford, a Fayet, a Congregational minister, was born in Granville, N. Y., Aug. 18, 1797. He was prepared for college at the Granville and Cambridge academies. He entered Middlebury College in 1819, remaining but one year, on account of ill-health, which prevented the completion of his course. He next studied theology with the Rev. William Chester, D.D., of Saratoga, and was ordained at Pawlet, Vt., Dec. 5, 1826, as missionary of Rev. Jesse Lee. In 1827 he married Miss Lovell, and on the 1st of July following he was dismissed Oct. 27, 1830. Choosing for a time the missionary work, he was sent, first to Vermont, in 1830, and to New York in 1831, remaining in this field until he received a call to become a colleague of Dr. Beeman, at Troy, N. Y. Here he remained one year, and then became pastor of Bethel Free Church, at the same place, and remained two years, at which time he received and accepted a call to the pastorate of the Church at Walton, N. Y. At this place he was installed April 29, 1835, and after remaining in charge three years was dismissed, to again take charge of the Church of the Village of Walton. He continued to be employed to supply from 1838 to 1841. He organized the Congregational Free Church at Troy, Feb. 16, 1842, and remained there, preaching with success, until 1849, at which time the pastorate was dissolved. In 1850 he was acting pastor at St. Phentown, also at Nassau from 1851 to 1853. He then, from 1855 to 1858, was agent in Waterviile and vicinity; of Caron Lake, at the same time supplying churches at Peru River, Stone Mills, Orleans, Four Corners, and La Fargeville. He was acting pastor at Pulaski from 1855 to 1858; also, without charge, filled the pastorate at Orono, from 1859 to 1873, preaching often, and supplying at Wellington in 1863 to 1865. He then filled the same in Westfield, N. Y., from 1866 to 1868. In 1878 he removed to Walton, N. Y., and to Sidney Plains in 1877. In 1876 he published a pamphlet entitled What May Women Do? At length, being coming gradually feeble, he died, Aug. 14, 1878. (W. P. S.)

Ship'phi (Heb. Ship'phi, שִׂפְרִי, my abundance, or abundant; Sept. Σφαρίς v. r. Σφαρίδης and Σφαρά, the son of Allon and father of Ziza, which last was a chief Simonite in the time of Hezekiah (1 Chron. iv, 37). B.C. ante 726.

Ship'mite (Heb. with the article hash-Skiph'mi, שַׂפֹּרְתִּי, pastoral adj.; Sept. ὁ τοῦ Ἱσραήλ, an epiphon of Zadok, David's chief vintage-master (1 Chron. xxvii, 27); probably as being a native of Shepham (q.v.).

Ship'rah (Heb. Ship'-rah, שַׂפֹּרְתָּה, probably bright-ness, as in Job xxvi, 13; but perhaps Egyptian; Sept. Σφαρά, first named of the two Hebrew midwives who disobeyed Pharaoh's order to kill the male infants, and were rewarded by Divine Providence for their humanity (Exod. i. 15). B.C. cir. 1740.

Ship'tan (Heb. Ship'tan, שַׂפֹּרְתָּן, judicial; Sept. Σφαράς v. r. Σφαράδων, father of Kemuel, which latter was the phylarch of Ephraim and one of the commissioners appointed to divide Canaan among the tribes (Numb. xxxiv, 24). B.C. ante 1618.

Shipley, Jonathan, a learned English prelate, was born about 1714. His education was liberal, and at a proper age he entered Christ Church, Oxford. In April, 1738, he took his degree of Master of Arts, entered the honorary orders of the university, and in January of the latter year, having constitutionally been ordained a prebendary in the Cathedral Church of Winchester, and in March, 1746, was appointed chaplain to the duke of Cumberland. He received the degree of Doctor of Divinity Oct. 14, 1748; became canon of Christ Church, Oxford, Jan. 28, 1749; and was made dean of Winchester in 1758, being permitted, by dispensation, to retain the livings of St. Helen and Chilbolton. His last preferment took place in 1769, when he was promoted to the bishopric of St. Asaph, in which he remained until his death, in Bolton Row, Piccadilly, Dec. 3, 1788. His works, consisting of sermons, charges, and parliamentary speeches, were published in 2 vols. 5vo (1782).

Shipwreck, a term that occurs but twice in the New Testament, in the verbal form ναύαργω, once literally (2 Cor. xi, 25) and once metaphorically (1 Tim. i, 19). We learn from the former of these passages that Paul had already three times experienced this mishap prior to his more notable instance on the way to Rome. The interest of the shipwreck lay in the fact that the light it sheds upon many points of Biblical history, geography, and archaeology, are so great as to justify a special treatment of the topic in addition to the remarks given under previous heads. It is a singular coincidence that another Jew, a contemporary of Paul, should have suffered a similar mishap on the same route, viz. Josephus (Life & 3); but the account left is so brief as to afford but little illustration of the case. Luke's narrative of the shipwreck of the apostle, on the contrary, is so full and graphic that we are enabled to trace the causes, progress, and culmination of the catastrophe in great detail; and his nice but artless discriminations show not only his truthfulness, but his careful habits of observation. His language, although of course not professional, is yet highly appreciative of the technical particulars to which he was an eye-witness. We here present a brief outline of the results of the accurate and most interesting investigations of Mr. Smith, of Llandaff, and of Mr. Jardanhill, in his work On the Voyage and Shipwreck of St. Paul (3d ed. Lond. 1866). A winter's residence in Malta afforded this learned writer ample opportunities for personal examination of the localities of the shipwreck. Having been a yacht sailor of more than thirty years' standing, and with much practical experience in the building and management of ships, he was able to bring a kind of knowledge to the interpretation of the passage which no commentator had possessed.
Paul's company embarked in a ship of Adramyttium, a seaport of Myra, on the very shore of the Ægean, opposite Lycia. On the second day they touched at Sidon, sixty-seven geographical miles from Cesarea. Loosing from thence, they were forced, by contrary winds, to run under the lee of Cyprus. A ship's course from Sidon to Myra is W.N.W., leaving Cyprus on the right. The contrary wind must have been from the west, which prevails in this part of the Mediterranean in the summer. Under these circumstances, they left Cyprus on the left hand, doing as the most accomplished seamen of the present day would do under similar circumstances. Favoured, as they probably were, by the land-breeze and currents, they arrived, without accident, at Myra in Lycia, a flourishing city, now a desolate waste and about three miles from the sea. The company were there transferred to a corvuship from Alexandria bound for Italy. From the dimensions of one of these ships given by Lucian, they appear to have been quite as large as the largest class of merchant-ships of modern times. Myra lies due north from Alexandria, and its bay is well fitted to shelter a wind-bound ship. Their progress after leaving Myra was extremely slow, for it was many days before they "came over against Cnidus," at the entrance to the Ægean Sea. As the distance between Myra and Cnidus is not more than 180 geographical miles, the delay must have been caused by unfavourable winds, which may be inferred from the words "with difficulty." The course of a ship on her voyage from Cnidus to Italy is by the north side of Crete, through the archipelago, W. by S. But this would be impossible with a north-wet wind. With that wind the ship would work up to Cnidus, because she had the advantage of a weather shore and a westerly current; but there the advantage would cease. The only alternative would be to wait at Cnidus for a fair wind, or else to run under the lee of Crete in the direction of Salamine, which is the eastern end of Crete. As the south side of this island is a weather shore, they would be able, with north-west winds, to work up as far as Cape Matala. Here, however, the land bends suddenly to the north, and their only resource would be to make for a harbor. Fair Havens is the harbor nearest to Cape Matala. This was probably no more than an open roadside, or, rather, two roadsteads contiguous to each other. The site of the city Lasaea is still visible. It was not until the autumnal equinox, and sailing was dangerous. It was a question whether they should winter here or sail to port Phocae, on the same side of Crete, about forty miles west. Paul strongly urged the officers to remain, but his advice was overruled. Phocae, the harbor which they entered, was known as Luke (Luke 21:18) towards the south-west and north-west, or, as Mr. Smith translates the preposition, in the same direction as, i.e. the point towards which, the wind Liba blows; so that the harbor would open, not to the south-west, but to the north-east. It seems to have been the one now called Lutro, which looks towards the east. The south wind, which now blew, is a fair wind for a ship going from Fair Havens to Lutro. The island of Clauđa is exactly opposite to Lutro, the Claudii of Ptolemy, and the Gozzo of the modern charts.

Sailing from Fair Havens close to the land, they might hope, with a south wind, to reach Phocae in a few hours. But soon the weather changed; the ship was caught in a typhoon which blew with such violence that they could not face it, but were forced, in the first instance, to scud before it. It follows from this that the wind must have blown off the land, else they would have been stranded on the Cretan coast. This sudden change from the west wind to a violent north-easterly was a common occurrence in these seas. The Greek term typhoon means that the wind was accompanied by the agitation and whirling motion of the clouds caused by the meeting of the opposite currents of air. By this single word are expressed the violence and direction of the gale. The wind Euroclydon (according to the most ancient versions, Euroclysus - east-north east) forced them to leave Phocae. Having done this, they endeavoured to fill themselves of the smooth water to prepare the ship to resist the fury of the storm. Their first care was to secure the boat by hoisting it on board. Luke tells us that they had much difficulty in doing this, probably because it was filled with water. The next care was to undergo the ship the amount of the shattered condition of his ship, to undergird her.

We are next told that, fearing they should be driven towards the Syrtis, they lowered the rudder (not "strake sail," which would be equivalent to saying that, being apprehensive of a certain danger, they deprived themselves of the only possible means of avoiding it). A ship preparing for a storm sends down upon deck the "top hamper," or gear connected with the fair-weather sails, such as the suparai, or topsails. When the ship was thus borne along, she was not only undergirded and made snug, but had storm-sails set and was on the starboard tack, on her return from his perilous arctic voyage in 1883, was forced to cope with the turbulent and turbulent condition of his ship, to undergird her.
the fifteen-fathom depth, and at such a distance as would allow of preparation for anchoring with four anchors from the stern, which must have required some time. Now, about half an hour farther the depth was fifteen fathoms. Fearing lest they should fall upon rocks, they cast four anchors out of the stern. This implies that there were rocks to leeward on which they were in danger of falling; but the fifteen-fathom depth is, as nearly as possible, a quarter of a mile from the shore, which is here girt with mural precipices, and on which the sea must have been breaking violently. Their only chance of safety was to anchor; but to do this in a gale on a lee shore not only requires time, but very tedious holding-ground. Is there such ground here? In the English Sailing Directions it is said (to repeat an important fact given under a previous article), "The harbor of St. Paul is open to easterly and north-east winds. It is, notwithstanding, safe for small ships, the ground generally being very good; and while the cables hold there is no danger, as the anchors will never start." But why anchor from the stern? "The anchor is cast from the prow," it being much easier to arrest a ship's way by the bow than the stern. Ships constructed like those of the ancients were, of necessity, amply provided with anchors and cables. It seems, too, from the figure of the ship in the picture of Theœus deserting Aridane, that they could anchor by the stern, as they had hawse-holes aft (a hawser is seen towing astern; it passes through the rudder-port, and within board it is seen coiled round an upright beam or capstan in front of the break of the poop-deck). The advantages of being anchored in this manner are that by cutting away the anchors, loosening the bands of the rudders, and hoisting the artemon (the foresail, not the mainsail), all of which could be done simultaneously, the ship was immediately under command, and could be directed with precision to any part of the shore which offered a prospect of safety. But if anchors were in the usual mode, she might have taken "the wrong cast" or drifted on the rocks. The number of anchors let go show that nothing was neglected.

The shipmen, after taking a meal, lightened the ship, not only by pumping, but by throwing the wheat into the sea. When day broke, they knew not the land, but it had certain peculiarities: the shore was rocky, it being, in fact, skirted with precipices. They then discovered a creek with a sandy beach (the Greek word, in a restricted sense, means this, in contradiction to a rocky coast). Into this creek they were minded to thrust the ship. They now cut their cables and left the anchors in the sea; and, losing the lashings of the rudder and hoisting the foresail, they made for the creek. On the west side of the bay there are two creeks. One of them, Mdina Valley, has a shore. The other, though its sandy beach has been worn away by the action of the sea, was probably the scene of the wreck, for here "two seas meet." At the entrance of the bay, where the ship anchored, it could not have been suspected that at the bottom of it there was a communication with the sea outside. But such is the case. Salmine island, which separates the bay from the sea outside, is formed by a long, rocky ridge separated from the mainland by a channel of not more than a hundred yards in breadth. Near this channel they ran the ship ashore; the fore-part stuck fast, but the stern was dashed in pieces. A ship impelled by a gale into a creek such as that in St. Paul's Bay would strike a bottom of mud graduating into tenacious clay, into which the fore-part would stick itself and be held fast, while the stern would be exposed to the force of the waves. See Malta.

The correspondence in the direction and distance is no less striking. A modern merchant-ship can sail within six points. Taking the mean between these, we cannot be so much as a point wrong if we assume that an ancient ship would, under favorable circumstances, make good her course about seven points from the wind. But there is another element which must be taken into account when we calculate the course of a ship in a storm—it is the lee-way, which in a modern ship, in a gale such as described in Acts xxvii, is about six points. Now, if we apply these elements to Luke's account of Paul's voyage, the result will be found to be very striking. The facts mentioned in the narrative are: (1) The point of departure—Clauudia. (2) The direction of the wind—in the received text, Eureclydon, but since the discovery of the Codex Sinaiticus the reading of the Vulgate, Eurocluido, cast-northeast (that is, a wind between eurus, east, and aquilo), must be considered established. (3) The ship's course—seven points from the wind, which, with six points of leeway added, must have been thirteen points to the west of cast-northeast, or west by north, which is as nearly as possible the bearing of Malta. (4) Distance; this is inferred from the ship's rate of sailing and the time consumed.

Situation of St. Paul's Ship on the Fifteenth Morning.
In the voyage in question we know within very narrow limits the time that elapsed: it was "a little before midnight on the fourteenth night" (Acts xxvii, 27), and therefore thirteen days complete and a fraction. With regard to the rate at which a ship would drive under the circumstances described by Luke, Mr. Smith, in the work already alluded to, taking the mean from the determinations of skilful and scientific seamen, assumed that it would be thirty-three and a third miles in the twenty-four hours, and the distance ascertained from the nautical observations of Admiral Smyth is four hundred and seventy-seven miles to the nearest of a mile. Now a ship laid-to, in a gale from east-north-east, according to these calculations, founded on the inexact premises of Admiral Smyth, "about midnight, 'when the fourteenth night was come' of their being driven through (διαπέρασοντες), not up and down, Asia—have been exactly at Malta, and within two or three miles of St. Paul's Bay. Such were the results arrived at by Mr. Smith, and given in the first edition of his treatise on the Voyage andShipwreck of St. Paul. Since then Dr. Howson in his researches discovered that Admiral Sir Charles Penrose had made a similar calculation, agreeing with the above to about four hours in time and six miles in distance; but, as such results can only be approximations, a nearer agreement could not have been anticipated from the most accurately kept dead-reckoning.

We here note an incidental fact with regard to Sal- mone, the east point of the island of Crete. In the account of Paul's voyage to Rome this promontory is mentioned in such a way (Acts xxvii, 7) as to afford a curious illustration both of the navigation of the ancients and of the minute accuracy of Luke's narrative. We gather from other circumstances of the voyage that the wind was blowing from the northwest (ιεναμίοντος, ver. 4; βραδινοῦν τούτον, ver. 7). See ΜΥΧΑ. We are then told that the ship, on making Cnidus, could not, by reason of the wind, hold on her course, which was past the south point of Greece, west by south. She did, however, just fetch Cape Salamine, which bears south-west by south from Cnidus. Now we may take it for granted that she could have made good a course of less than seven points from the wind (see SHIP); and, starting from this assumption, we are at once brought to the conclusion that the course must have been between north-northwest and west-northwest. Thus what Paley would have called an "undesigned coincidence" is elicited by a cross-examination of the narrative. This ingenious argument is due to Mr. Smith, of Jordanhill (Voyage andShipwreck of St. Paul, p. 79), and in a manner it may be, for Cnidus bears Cnidus and Homed (Life and Epistles of St. Paul, ii, 398, 2d ed.). To these books we must refer for fuller details. We may just add that the ship had had the advantages of a weather shore, smooth water, and a favoring current before reaching Cnidus, and that by running down to Cape Salamine the sailors obtained similar advantages under the lee of Crete, as far as Fair Havens, near Lasae.

See the monographs on the various incidents connected with Paul's shipwreck, cited by Vol bedding, Index Programm. p. 84; and Danz, Wörterb. a. v. "Apокалипс." No. 114-116; also the Journal of Soc. Lit. u. "Josephus." See Paul; Ship.

Shire-mote, the highest of the three motes, or courts, on the island of Man, was held twice a year, and was composed of the freeholders. Hearing both civil and ecclesiastical causes, the shire-mote was presided over by an alderman and a bishop, who were not the absolute judges, being present chiefly to keep order and advise. Cases were decided by the majority of votes. See Hill, English Monasticism, p. 199.

Shirer, John Wesley, a minister of the Methodist Episcopal Church, was born in Muskingum County, O., Dec. 19, 1821, and united with the Church in 1842. He was licensed to preach Jan. 30, 1847, and the same year was admitted into the Pittsburgh Conference. He continued in the active ministry, with the exception of two years supernumerary, until 1873, when he became superannuated and so continued until his death, at Akron, O., May 8, 1874. See Minutes of Annual Conferences, 1875, p. 84.

Shirley, Walter, the rector of Loughrea, Galway County, Ireland, was a cousin of the countess of Hunt- tington. He was born in 1725 and died in 1786. He published, Twelve Sermons (Dublin; reprinted Lond. 1763 [some 1764], 12mo)—poems, Liberty, an Ode; The Judgment;—and some Hymns ("Lord, dismiss us with thy blessing" is believed to be his). He also revised Lady Huntington's Hymn-book (1764). See Roger, Lyra Brit. 1868, p. 498, 673; Allibone, Dict. of Brit. and Amer. Authors, a. v.

Shirley, Walter Augustus, D.D., was a member of the noble house of Ferrers and the son of Rev. Walter Shirley, vicar of Woodford, Northamptonshire. He was born at Westport, Mayo County, Ireland, in 1797, and was educated at Winchester College, and New College, Oxford, of which he was a fellow. He became bate to the chair of Divinity at Oxford, in 1829; vicar of Chil- ley, Derbyshire, in 1829; rector of Brailsford in 1839; prebendary of Lichfield and archdeacon of Derby in 1841; bishop of Sodor and Man, Jan. 10, 1847; and died April 21, 1847. Besides his Letters to Young People (Lond. 1860, 8vo), there is a volume of his Sermons (1850, 12mo), and a collection of his Hamp ton lectures had been delivered at his death. See Allibone, Dict. of Brit. and Amer. Authors, a. v.

Shi'asha (Heb. She'asha, פֶּשֶׁא, an orthographical variation of Shaheva [q. v.]; Sept. Σεβάζα v. Σήβα, father of Eliheph and Ahiah, Solomon's secretaries (1 Kings iv, 3); elsewhere called Sharesha (1 Chron. xviii, 16), etc.

Shi'ashak (Heb. Sh'ashak, פֶּשֶׁא or the margin, but the text has Shashak or Shishak, פֶּשֶׁא); Sept. Σεβάζειν; Vulg. Sesa), a king of Egypt contemporaneous with Jeroboam, to whom he gave an asylum when he fled from Solomon (1 Kings xi, 40). This was indicative of his politic disposition to encourage the weakening of the neighboring kingdom, the growth of which, under David and Solomon, was probably regarded by the kings of Egypt with some alarm. After Jeroboam had become king of Israel, and probably at his suggestion, Shishak invaded the kingdom of Judah, B.C. 971, at the head of an immense army, and, after having taken the fortified places, advanced against Jerusalem. Satisfied with the submission of Rehoboam, on which the immense spoils of the Temple, the king of Egypt withdrew without imposing any onerous conditions upon the humble grandson of David (xiv, 25, 26; 2 Chron. xii, 2-9). The importance of this connection between the Hebrew and Egyptian annals justifies a full treatment of the subject, which we give from the latest archaeological investigations. See JUDAH, KING- DOM OF.

I. Name.—We see above an uncertainty in the He- brew form of Shishak's name. Josephus Græcizes the name as Σωσους (Σωσουσας, Ant. vii, 5, 1; xii, 8, 9). He has generally been recognised as the Σεσουκής (Σεσουκής) of Manetho, and the Sheeshonk or Sheshonk I of the monuments, first sovereign of the Bubas- tite, or twenty-first, dynasty. The accompanying cartouches present his name as written in hieroglyphics. The following is a transcription and translation of the second oval, containing more particular-
In order to render the following observations clear, it will be necessary to say a few words about the dynasties of Egypt before the accession of Sheshonk I. On the decline of the Tanite or Ramessian family (the twelfth dynasty), two royal houses appear to have arisen. At Thebes the high-priests of Amen, after a virtual usurpation, at last took the regal title, and in Lower Egypt a Tanite dynasty (Manetho’s twenty-first) seems to have gained royal ascendancy, be it noted, over the Ramessian, though not exorcised from the state. If it be granted that there was no line between the twelfth and twenty-second dynasties, and that the high-priest kings belonged to the twenty-first, it is probable that their lines had been united; certainly towards the close of the twenty-first dynasty a Pharaoh was powerful enough to lead an expedition into Palestine and capture Gezer (1 Kings xi. 16). Sheshonk took as the title of his standard “He who attains royalty by unifying the two regions (of Egypt)” (De Rouge, Étude, etc., p. 204; Lepsius, Künstlerbuch, xlvii, 567 A, a). He himself probably married the heiress of the Ramessian family, while his son and successor, Usarken, appears to have taken to wife the daughter, and perhaps heiress, of the Tanite twenty-first dynasty. Probably it was not until late in his reign that he was able to carry on a war of conquest against the pharaohs of the early thirteenth who captured Gezer. It is observable that we trace a change of dynasty in the policy that induced Sheshonk, at the beginning of his reign, to receive the fugitive Jeroboam (1 Kings xi. 40). Although it was probably a constant practice for the kings of Egypt to show hospitality to fugitives of importance, Jeroboam would scarcely have been included in their class. Probably, it is expressly related that he fled to Sheshonk because he was well received as an enemy of Solomon. We do not venture to lay any stress upon the Sept. additional portion of 1 Kings xii., as the narrative there given seems irreconcilable with that of the previous chapter, which agrees with the Masoretic text. In the latter chapter Hadad (Sept. Ader) the Edomite flees from the slaughter of his people by Joab and David, to Egypt, and marries the elder sister of Tahpenes (Sept. Thekemina), Pharaoh’s queen, returning to Idumea after the death of David and Joab. In the additional portion of the text Jeroboam—a Pharaoh to have fled to Sheshonk (Sept. Sacsakim)—is married, after Solomon’s death, to Anó, elder sister of Thekemina the queen. Between Hadad’s return and Solomon’s death, probably more than thirty years elapsed, certainly twenty. Besides, how are we to account for the two elder sisters? Moreover, Shishak’s queen, his only principal wife, is called Karali, which is remote from Tahpenes or Thekemina. See Tahpenes.

The king of Egypt does not seem to have commenced hostilities during the powerful reign of Solomon. It was not until the division of the tribes that, probably at the instigation of Jeroboam, he attacked Rehoboam.

The following particulars of this war are related in the Bible: “In the fifth year of king Rehoboam, Shishak king of Egypt came up against Jerusalem, because they had transgressed against the Lord, with twelve hundred chariots and three thousand horsemen; and the people [were] without number that came with him out of Egypt, the Lubim and the Cushim, and the Cushim. And he took the fenced cities which [pertained] to Judah, and came to Jerusalem” (2 Chron. xii, 2–4). Shishak did not pillage Jerusalem, but exacted all the treasures of his city from Rehoboam, and apparently made him tributary (ver. 5, 9–12, especially 8). The narrative in Kings mentions only the cities mentioned in the Bible (Kings xiv, 25, 26). The strong cities of Rehoboam are thus enumerated in an earlier passage—“And Rehoboa

am dwelt in Jerusalem, and built cities for defence in Judah. He built even Beth-lehem, and Etam, and Tekoa, and Beth-zur, and Shoco, and Adullam, and Gath,
SHISHAK

Profile of Shishak. (From the outer wall of the Great Temple at Karnak.)

and Marahesh, and Ziph, and Adoraim, and Lachish, and Azekah, and Zorah, and Aijalon, and Hebron, which [are] in Judah and in Benjamin fenced cities” (2 Chron. xi, 5-10).

Shishak has left a record of this expedition sculptured on the wall of the Great Temple of Karnak. It is a list of the countries, cities, and tribes conquered or ruled by him, or tributary to him. In this list Champollion recognised a name which he translated “the kingdom of Judah,” and was thus led to trace the names of certain cities of Palestine. It is well to observe that this figure has not, as some have hastily conceived, been alleged to represent the king, but to personify the kingdom of Judah (Champollion, Systeme Hieroglyph., p. 205; Rosellini, Monumenti Storici, i, 85; Wilkinson, Anc. Egypt. i, 37; Cory, Chronological Inquiry, p. 5). See REHOBOAM. The list of Shishak in the original hieroglyphics is published by Rosellini, Monumenti Reali, No. cxlviii; Lepsius, Denkmäler, Abth. iii, Bl. 352; and Brugsch, Geogr. Inschr. ii, Taf. xxv; commented upon by the latter (ibid. p. 56 sq.) and Dr. Blau (Zeitschr. d. deutsch. morgenländ. Gesellschaft, xv, 233 sq.). There are several similar geographical lists, dating for the most part during the period of the empire, but they differ from this in presenting few, if any, repetitions, and only one of them contains names certainly the same as some in the present. They are lists of cities, cities, and tribes forming the Egyptian empire, and so far records of conquest that any cities previously taken by the Pharaoh to whose reign they belong are mentioned. The list, which contains some of the names in Shechen’s, is of Thothmes III, sixth sovereign of the eighteenth dynasty, and comprises many names of cities of Palestine, mainly in the outskirts of the Israelish territory. It is important, in reference to this list, to state that Thothmes III, in his twenty-third year, had fought a battle with confederate nations near Megido, whose territories the list enumerates. The narrative of the expedition fully establishes the identity of this and other towns in the list of Shishak. It is given in the document known as the “Statistical Table of El-Karnak” (Birch, “Annals of Thothmes III,” Archæologia [1858]; De Rougé, Rec. Arch. N. S. xi, 347 sq.; Brugsch, Geogr. Inschr. ii, 52 sq.). The only general result of the comparison of the two lists is that in the later one the Egyptian article is in two cases prefixed to foreign names, Nekbu of the list of Thothmes III being the same as Penakbu of the list of Shishak, and Ameuku of the former being the same as Pa’akma of the latter. It will be perceived that the list contains three classes of names mainly grouped together—(1) Levitical and Canaanitish cities of Israel; (2) cities of Judah; and (3) Arab tribes to the south of Palestine. The occurrence together of Levitical cities was observed by Dr. Brugsch. It is evident that Jeroboam was not at once firmly established, and that the Levites especially held to Rehoboam. Therefore it may have been the policy of Jeroboam to employ Shishak to capture their cities. Other cities in his territory were perhaps still garrisoned by Rehoboam’s forces or held by the Canaanites, who may have some- what recovered their independence at this period. The small number of cities identified in the actual territory of Rehoboam is explained by the erasure of fourteen names of the part of the list where they occur. The identification of some names of Arab tribes is of great interest and historical value, though it is to be feared that further progress can scarcely be made in their part of the list.

The Pharaohs of the empire passed through northern Palestine to push their conquests to the Euphrates and Mesopotamia. Shishak, probably unable to attack the Assyrians, attempted the subjugation of Palestine and the tracts of Arabia which border Egypt, knowing that the Arabs would interpose an effectual resistance to any invader of Egypt. He seems to have succeeded in consolidating his power in Arabia, and we accordingly find Zerah in alliance with the people of Gerar, if we may infer this from their sharing his overthrow.

III. Chronology. The reign of Shishak covers the first determined synchronisms of Egyptian and Hebrew history. Its chronology must therefore be examined. We first give a table with the Egyptian and Hebrew data for the chronology of the dynasty, continued as far as the time of Zerah, who was probably a successor of Shishak, in order to avoid repetition in treating of the latter. See ZERAH.

Respecting the Egyptian columns of this table, it is only necessary to observe that, as a date of the twenty-

third year of Usorken I occurs on the monuments, it is reasonable to suppose that the sum of the third, fourth, and fifth reigns should be twenty-nine years instead of twenty-five, Kō being easily changed to KÉ (Lepsius, Königsl. p. 85). We follow Lepsius's arrangement, our Teuter I, for instance, being the same as his.

The synchronism of Shishak and Solomon and that of Shishak and Rehoboam may be nearly fixed, as shown in the article ChRONOLOGY. Lepsius, however, states that it is of the twenty-first century, correcting Compollon, who had been followed by Bunsen and others (XXI/Egypt. Königsl. p. 272, note 1). It must therefore be supposed that the invasion of Judah took place in the twelfth century, and not in the twenty-first, year of Shishak. The synchronism of Shishak would thus correspond to the twenty-sixth of Solomon, and the twentieth to the fifth of Rehoboam.

The synchronism of Zerah and Ass is more difficult to determine. It seems, from the narrative in Chronicles, that the battle between Ass and Zerah took place early in the reign of the king of Judah. It is mentioned before an event of the fifth year of his reign, and afterwards we read that "there was no [more] war unto the fifth and thirtieth year of the reign of Ass" (2 Chron. xxv. 19). This is immediately followed by the account of Basab's coming up against Judah "in the six and twentieth year of the reign of Ass" (2 Chron. xxvi. 1). The latter letters are perhaps to be reckoned from the division of the kingdom, unless we can read the fifteenth and sixteenth, for Basab began to reign in the third year of Ass, and died after a reign of twenty-four years, and was succeeded by Elah, in the twenty-sixth year of Ass. In these cases, the most probable is that the war with Zerah took place early in Ass's reign before his fifteenth year, and thus also early in the reign of Usorken II. The probable identification of Zerah is considered under that name. See EGYPT.

She'irā (Heb. Shirayyā, נָשִׂיָּה [marg. Shirayy], מִיָּדָן שִׂירָּה; my decisions, or decision; Sept. Zarpal v. τ. Arapyn), a Sharonite who had charge of David's herd-feeding in Sharon (1 Chron. xxvii. 29). B.C. 1043.

Shittah (שִׂיתָה, Shitthah, for שִׁיתָה, Shithah, properly the thorny, if Heb. [see below]; i. q. the Arabic Sunt; only once in the ins. xii. 19; Sept. psil. Vulg. pirae; A. V. "Shittah-tree") or Shittim (שִׂיתָמ, Shittim, plur. of the same, used with דָּרֶךְ, דָּרֶשׁ, עִשְׂרִית, דָּרֶסֶת, דָּרֶבֶּן, דָּרָבָן, דָּרְבָּן, דָּרְבּוֹת, דָּרֵי, דָּרְיָה), a tree, generally regarded as the acacia, and the tree of which was made a part of the altar in the construction of the tabernacle, and the pillars and boards being made of it, the ark of the covenant and the staves for carrying it, the table of show-bread with its staves, the altar of burnt-offerings and the altar of incense with its respective staves, were also constructed out of this wood (see Exod. ch. xxvi. xxvii, xxviii, xxxii, xxxviii). In 1 Sam. xv. 19 the same tree is mentioned with the "cedar, the myrtle, and the oil-tree," as one which God would plant in the wilderness. The Heb. term (为导向) is, by Jablonski, Celsius, and many other authors, derived from the Egyptian word, the 2 being dropped; and, from an Arabic MS, cited by Celsius, it appears that the Arabic term also comes from the Egyptian, the true Arabic name for the acacia being KARAD (Hierod. i, 508). The Egyptian name of the acacia is sent, sent, or senth. See Jablonski (Oriens, i, 261), Rossius (Ethynol. Õgypt. p. 273), and Prosper Alpinus (Plant. Õgypt., p. 6), who thus speaks of this tree: "The acacia, which the Egyptians call sent, grows in localities in Egypt remote from the sea, and large quantities are worked in a kind of the mountains of Sinai, overhanging the Red Sea. That this tree is, without doubt, the true acacia of the ancients, or the Egyptian thorn, is clear from several indications, especially from the fact that no other spiny tree occurs in Egypt which so well answers to the required characters. These trees grow to the size of a mulberry-tree, and spread their branches aloft." The acacia-tree, says Dr. Shaw, "being by much the largest and most common tree in these deserts (Arabia Petraea), we have some reason to conjecture that the senth tree was the wood of the acacia, especially as its flowers are of an excellent smell, for the shittim tree is, in Is. xii. 19, joined with the myrtle and other fragrant shrubs." Bruce, as quoted by Dr. Harris, says, "The shittim tree is indigenous in the Thebaid. The male is called the Sustel; from it proceeds the gum-arabic on incision with an axe. This gum chiefly comes from Arabia Petraea, where these trees are most numerous." Kitto says the required species is found in either the Acacia gumfoldosa or in the A. Segal, or rather in both. They both grow abundantly on the mountains of the Hebrews and the Israelites wandered for forty years, and both supply products which must have rendered them of much value to the Israelites. We think the probability is that the A. Segal supplied the shittim wood, if, indeed, the name did not denote acacia wood in general. This tree grows from fifteen to twenty feet in height. So M. Bove, "Le lendemain, en traversant le Vodeé (Wady) Schen, je vis un grand nombre d'Acacia Segal; cet arbre s'éleve à la hauteur de vingt à vingt-cinq pieds. Les Arabes font avec son bois du charbon qu'ils vont vendre à Suez." The A. Segal is very common in some parts of the peninsula of Sinai (M. Mont. Selv., Ann. des Scien. Nat., 1845, sec. i, 166; Stanley, Sin. and Pal. p. 20, 69, 298). These trees are more common in Arabia than in Palestine, though there is a valley on the west side of the Dead Sea, the Wady Segal, which derives its name from a few acacia-trees there. The A. Segal, like the A. Arabica, yields the well-known substance called gum-arabic, which is obtained by incisions in the bark, but it is impossible to say whether the ancient Jews were acquainted with its use. From the tangled thickets into which the stem of this tree expands, Stanley thinks is to be traced the use of the plural form of the Heb. noun Shittim. "The wild acacia (Mimoso Nilotica), under the name of Sennir," the same writer says (ibid. p. 29), "everywhere represents the 'seneb' or 'senna' of the burning bush." But neither of these conjectures appears to be well founded. Besides the above, there is another species, the A. tortilis, common on Mount Sinai. Although none of the above-named trees are sufficiently large to yield such cubits long by one and a half cubits wide, which are told was the size of the boards that formed the tabernacle (Exod. xxxvi, 21), yet there is an acacia that grows near Cairo, viz. the A. serissa, which would supply boards of the required size. There is, however, no evidence to show that this tree ever grew in the peninsula of Sinai. And though it would not be fair to draw any conclusion from such negative evidence, still it is probable that "the boards" (םַעַלֶּבָּה) were supplied by one of the other acacias. There is, however, no necessity to limit the meaning of the Heb. שָׁלַשׁ (kireh) to "a single plank." In Ezek. xxvii, 6 the same word, in the singular number, is applied in a collective sense to "the deck" of a ship (comp. our "on board"). The kereh of the tabernacle, therefore, may denote "two or more boards joined together," which, being thus united, may have been expressed by a singular noun. These acacias, which are for the most part thorny plants, must not be confounded with the tree (Robinia pseudo-acacia) popularly known by this name in England, which is a North American plant, and belongs to a different genus and suborder. The true acacias, most of which possess hard and durable wood (comp. Pliny, H. N. iii. 138; Joseph. Ant. iii. 6, 1), belong to the order Leguminosae, suborder Mimosae. Livingstone (Trav. in S. Africa, abridged ed., p. 77) thinks the A. giraffa (camel-thorn) supplied the wood for the tabernacle, etc. "It is," he adds, "an imperishable wood, while that which is usually supposed to be the shittim (A. Nilotica) wants beauty and soon decays."—Kitto;
Smith. But there is no evidence that this tree grows in Arabia. The A. Segal is the only timber tree of any size in the Arabian desert. It is a gnarled and very thorny tree, somewhat like the solitary hawthorn in its habit of growth, but much larger. It flourishes in the driest situations, and is scattered over the whole of the Sinaitic peninsula. It is also abundant in the many ravines which open on the Dead Sea at Engedi, and all along its western shores. Several places on the eastern shore also derive their names from its presence. See Shittim.

The wood is very hard and close-grained, very much resembling that of the yellow locust, of a fine orange-brown color, with a darker heart, and admirably adapted for cabinet-work. Its leaves are small and plinate, and in spring it is covered with its round tufts of yellow blossoms, which grow in clusters round the branches, like little balls of fibre. The bark is yellow and smooth, like that of the nilantus. It is powerfully astringent, and is used by the Bedawin for tanning yellow leather. The branches are often cut by the natives for making charcoal, but the camels browse on them when young and tender. The bark exudes a gum, the gum-arabic of commerce, not only by incisions, but spontaneously, which the Arabs collect for sale and occasionally employ for food. They also say that it alays thirst. See Tristram, Nat. Hist. of the Bible, p. 390 sq. See Thorn.

Acaia of the Desert (Acaia Segal), with Flower and Fruit.

Shittah (שׂיתָה; plur. שׂיתָתִים) means in Chaldee a line or series. Thus, the passage in Iss. xxx, 8, אֲדֹ נֵ הָסִי לַעֲקֹב, "Noted in a book," is rendered by the Targum מִטְעָמִים לְעַקֹב, "Register it on the lines of the book." The passage in the Song of Songs, v, 13, "His cheeks are like beds of balsam," is rendered מַעֲשֹׂר הַיָּדִים מִטְעָמִים לְעַקֹב, i. e., "were written (viz. the two tables of stone which he gave to his people) in ten rows, resembling the rows or beds in the garden of balsam." The Masorites denote with Shittah a series or catalogue of words—a register of things of the same import, as a number of verses, pairs, words, which are alike either in vowel-points or letters. Thus, they noted down a list of pairs of words which occur once, but the first of which commences with a Lamed, viz. מִטְעָמִים לְעַקֹב (Gen. xvii, 8), or they give us a list of thirty-eight words which respectively have in one instance only the accent on the penultima, as בַּשְׁלֹא (Gen. xviii, 20); לָוֵא (xxi, 6), לָוֵא (Lev. xv, 13), etc.; or they give a list of words which, on the contrary, occur only once with the accent on the ultima, as בַּשְׁלֹא (Gen. xcxix, 21), מִטְעָמִים לְעַקֹב (xxx, 1), מִטְעָמִים לְעַקֹב (xxx, 33), etc. See Buxtorf, Tibritas, seu Commentarius Massoreticus, p. 273; Levi, Massoreth ha-Massoreth (ed. Ginzburg), p. 205, 210; Frensdorff, Massora Magna, p. 981 sq.; id. Ochla-We-Ochla, § 20, p. 36; § 372, p. 61, 171; § 373, p. 61, 172. (B. F.)

Shittim (Heb. with the art. hosh-Shittim, השֶׂיתָמִים, the acaias; Sept. Δήμος; in the Prophets, ρα αρχώια; Vulg. Sittim, Abel-sittim), a designation rather than proper name of at least two localities in Palestine. See Shittah.

1. The place of Israel's encampment between the conquest of the Transjordan highlands and the passage of the Jordan (Numb. xxxiii, 49; xxxv, 1; Josh. ii, 1; iii, 1; Mic. vi, 5). Its full name appears to be given in the first of these passages—אֲדֹ נֵ הָסִי לַעֲקֹב. It was in the dry or moist place of the acacias. See Abel-shittim. It was "in the Arboth-Moab, by Jordan-Jericho." such is the ancient formula repeated over and over again (Numb. xxii, 1; xxxvi, 3; xxxix, 12; xxxviii, 48, 49); that is to say, it was in the Arabah or Jordan valley, opposite Jericho, at that part of the Arabah which belonged to and bore the name of Moab, where the streams which descend from the eastern mountains and force their winding way through the sandy soil of the plain nourished a vast growth of the Segal, Sunt, and Sidd trees, such as is nourished by the streams of the Wady Kelt and the Ain Sultan on the opposite side of the river. See Moab. It was in the shade and the tropical heat of these acacia-groves that the people were seduced to the licentious rites of Baal-peor by the Midianites; but it was from the same spot that Moses sent forth the army, under the fierce Phinehas, which worked so fearful a retribution for that license (xxxii, 1-12). It was from the camp at Shittim that Joshua sent out the spies across the river to Jericho (Josh. ii, 1). Tristram thinks that "the situation of Keferim [of which he gives a view] at the northern margin of the oasis (the Ghôr es-Seïsam), and its marshy verdure, unmistakably identify it with Abel-shittim" (Land of Israel, p. 525).

2. A "valley" (נַחֲלָה, nachal, winter-torrent) of Shittim, or Wady Sunt, as it would now be called, of Joel (xii, 18), can hardly be the same spot as that described above, as it must certainly have been west of the Jordan, and probably in the neighborhood of Jerusalem, although the particular vale cannot now be distinguished. The name is probably to be regarded as an appellative —"acaia vale" denoting, perhaps, as that tree delights in a dry soil, an arid, unfruitful vale.

Shiva. See Siva.

Shiva-Narayana. See Siva-Narayana.

Shiva, in Hindoo mythology, is a festival celebrated in the month of March in honor of Siva, in which the grossest indecencies, accompanied with lascivious songs, are publicly perpetrated without shame or offending observers, since everything of the kind is regarded as highly pleasing to the god. The Līnga (q. v.), Siva's most eminent symbol, is preferably dedicated at this festival.

Shitza (Heb. שִׂיתָה, Shitza, perhaps splendid; Sept. Φισών), a Reubenite, father of Auna (q. v.), one of David's warriors (1 Chron. xii, 42). B.C. ante 1043.

Sho'â (Heb. id. שֹׁא, a cry for help, or rich, or id-
eral; Sept. סוד v. r. סעד; Vulg. t瓜ana), a proper name which occurs only in Ezek. xxiii, 23, in connection with Pekod and Koa. The three apparently denote districts in Syria with which the kingdom of Judah had been intimately connected, and which were to be arrayed against it for punishment. The Peshito-Syriac has ליעד, that is, Lydia; while the Arabic of the London Polyglot has סעד, and Koa occupies the place of Koa. Rashii remarks on the three words, "the interpretive Assyrian that signify offices, princes, and rulers." This rendering must have been traditional at the time of אושיריאת and תוריון and קארא (Jerome, nobilis, tyranni et principes). Gesenius (Thesaur. p. 1208 a) maintains that the context requires the words to be taken as appellatives, and not as proper names; and First, on the same ground, maintains the contrary (Horaeod a. v. מועַ). Those who take Shoa as an appellative refer to the use of the word in Job xxvi, 19 (A.V. "rich") and Isa. xxxii, 5 (A. V. "bountiful"), where it signifies rich, liberal, and stands in the latter passage in parallelism with נִדְיָה, with which Kimchi explains it, and which is else where rendered in the A. V. "prince" (Prov. xvi, 7) and "noble" (viii, 16). But a consideration of the latter part of the verse (Ezek. xxiii, 23), where the captains and rulers of Assyria are distinctly mentioned, and the fondness which Ezekiel elsewhere shows for playing upon the sound of proper names (as in xxvii, 10; xxx, 5), lead to the conclusion that in this case Pekod, Shoa, and Koa are proper names also; but nothing further can be said. The only name which has been found at all resembling Shoa is that of a town in Assyria mentioned by Phny. "Sue in rubub", near Ganges-mela, and west of the Orontes mountain chain. Bochart (Phaleg, iv, 9) derives Sue from the Chaldee סּיָעַד, a rock. See Koa.

Shoaff, David, a minister of the Methodist Episcopal Church, South, was born in Juniata County, Pa., July 17, 1823, and was converted Aug. 23, 1844. In March, 1848, he was admitted on trial into the Baltimore Conference. At the division of the Baltimore Conference in 1857, he became a member of the East Baltimore Conference. In 1866 he severed his connection with the Methodist Episcopal Church, and united with the Methodist Episcopal Church, South, in which he continued to labor until his death, May 26, 1871. See Minutes of Annual Conferences of the M. E. Ch., South, 1872, p. 648.

Shrobat (Heb. Shobrab, שָׁבִּרָב, rebellious, as in Jer. iii, 14, 21; Isa. xvii, 17; Sept. Σωβάδης v. r. Σωβάδης, etc.), the name of two Hebrews.

1. Apparently the second named of the three sons of Caleb the son of Hezron by his first wife Azubah (1 Chron. i, 11). B. C. post 1874.

2. Second named of the sons of David born in Jerusalem (2 Sam. v, 14; 2 Chron. iii, 5; iv, 15). B. C. post 1044.

Shoback (Heb. Shobak, שּׁבָּאָק, expansion; Sept. Σωβάδης v. r. Σωβάδης, Vulg. Sobyca), the general of Hadadezer king of the Syrians of Zobah, who was in command of the army summoned from beyond the Euphrates against the Hebrews after the defeat of the combined forces of Syria and the Ammonites before the gates of Rabbah. He was met by David in person, who crossed the Jordan and attacked him at Helam. The battle resulted in the total defeat of the Syrians. Shoback was wounded, and died on the field (2 Sam. x, 15-18). B. C. 1084. In the parallel passage (1 Chron. xix, 16, 18) he is called Shophak, and by Josephus Sabuceus (Σαβουκεος, Ant. vii, 6, 3).

Shobai [some Σωβάτι] (Heb. Shobat, שָׁבָאַת, but always in pause, as שָׁבָאַת), taking captive [Gesen.], or glorious [First]; Sept. Σωβάδης v. r. Σωβάδης, etc.), one of the heads of the Levitical family of doorkeepers of the Temple, whose posterity returned from Babylon with Ze-rubbabel (Ezra ii, 42; Neh. vii, 43). B. C. long ante 536.

Shobal (Heb. Shobal, שָׁבָאַל, flowing, or a shoot [Gesen.], or wandering [First]; Sept. Σωβάδης or Σουβάδης v. r. Σουβάδης), the name of two Hebrews.

1. Second named of the seven sons of Seir the Horite (Gen. xxxvi, 20; 1 Chron. i, 38). He was the father of five sons (Gen. xxxvi, 23; 1 Chron. i, 40), and one of the aboriginal "dukes" or sheiks of Edom (Gen. xxxvi, 29). B. C. post 1963.

2. First named of the five sons of Hur the son of Caleb of the Horites. He became the founder ("father") of Kirjath-jearim (1 Chron. ii, 50). B. C. cir. 1612. He is evidently the same mentioned as father of Reaiah (q. v.) among the descendants ("sons") of Judah in 1 Chron. iv, 1, 2.

Shobek (Heb. Shobek, שֹׁבֶק), of the ascendants of the ("sons") of Judah in 1 Chron. iv, 1, 2.

Shoeb (Heb. Shobeq, שֹׁבֶק, foresaking [Gesen.], or free [First]; Sept. Σωβάδης v. r. Σουβάδης, etc.), one of the chief Israelites who signed Nehemiah's covenant (Neh. x, 24). B. C. 446.

Shober, Gottlieb, a Lutheran clergyman, was born in Bethelheim, Pa., Nov. 1, 1756. Under the influence of a careful and thorough education, he early became impressed with the importance of religion, and desired to gain satisfactory evidence that he had been born from above. He united with the Moravian Church in his seventh year, and entered heartily into everything tending to its prosperity. After reaching fifty years of age he determined to devote the remainder of his life to the ministry, and entered that of the Lutheran Church. In the fall of 1810 he was set apart to the work of the ministry, and immediately became pastor of the church in Salem. Here he continued laboring with zeal and fidelity until a few years before his death, which occurred June 27, 1838. Mr. Shober was one of the founders of the General Synod of the Lutheran Church, was its president in 1825, and a member of the committees to prepare a hymn-book and catechism. He took a deep interest in the education of young men for the ministry, and in 1825 was appointed one of the first directors which adopted the incipient measures for the formation of the Seminary at Gettysburg, Pa. He left it three thousand acres of land. Mr. Shober prepared two volumes for the press—a translation from Stilling, entitled Scenes in the World of Spirits (Baltimore, 1818, 12mo):—

A Comprehensive Account of the Rise and Progress of the Christian Church, by Dr. Martin Luther. See Sprague, the Apologist, Pulpit and Press.

Shob'el, probably another form for Shobal (q. v.); Sept. Σουβαλθ; Vulg. Seba), a son of Nahash of Rabbah of the children of Ammon (2 Sam. xvii, 27), and one of the first to meet David at Mahanaim on his flight from Abasaolom, and to offer him the hospitality of a powerful and wealthy chief, for he was the son of David's old friend Nahash; and the bond between them was strong enough to survive, on the one hand, the insults of Haunon (who was probably his brother), and, on the other, the conquest and destruction of Rabbah. B. C. 1028. Josephus calls him Siphar (Σιφάρ), "chief (διοικητη) of the Ammonith country" (Ant. vii, 9, 8).—Smith.

Shocho (2 Chron. xxviii, 18), or Shocho (xi, 7). See Socoh.

Shocoh (1 Sam. xvii, 1). See Socoh.

Shock of Corn (וֹשָׁב, gadieth, a heap; hence sometimes "a tomb," as in Job xx, 32), a "stack" (Exod. xxii, 6 [Heb. 3]) of grain reaped (Judg. xvi, 5; Job v, 26). See Agriculture.

Shockley, James A, a Methodist Episcopal minister, was born in the county of Greensburg in 1809. He was converted at twelve years of age, obtained license to preach in 1840, was received on trial in the Mississippi Conference in 1841, and appointed to the Paulding Circuit, in 1842, to the Decatur Circuit; in 1843, to the Whitesand
Circuit, where he died, Sept. 12, 1844. He was a faithful preacher and pastor, and his death was a signal triumph. See Minutes of Annual Conferences, iii, 589.

**Shodeleth**, in Hindî mythology, is a place in the vicinity of every city where the dead are burned. It always contains a stone representing king Arishandara, who was at one time overseer of such a place, and in that position denied to his own son the honor of being burned because the boy’s mother was unable to pay the small sum exacted in return for that privilege. This pious action so moved the gods that they restored the king to his former honors, from which he had been degraded in order that his disposition might be put to the proof.

**Shoe** (שֶׁבָּא, nàyal, so called from fastening on the foot, everywhere so rendered, except once [Isa. xi, 15], “dryshod”; but in Deut. xxxiii, 25 שֶׁבָּאֶל, nîdîl, which probably means a bolt, as elsewhere (“lock,” Neh. iii, 3, 6, 13, 14, 15; Cant. v, 5); הָאִדָּה, properly a sandal. It does not seem probable that the foot-coverings of the Hebrews differed much from those used in Egypt, excepting, perhaps, that from the greater roughness of their country they were usually of more substantial make and materials. The Egyptian sandals varied slightly in form: those worn by the upper classes, and by women, were usually pointed and turned up at the end like our skates and many of the Eastern slippers at the present day. They were made of a sort of woven or interlaced work of palm-leaves and papyrus-stalks or other similar materials, and sometimes of leather; and were frequently lined with cloth on which the figure of a captive was painted, that humiliating position being considered suited to the enemies of their country, whom they hated and despised. It is not likely that the Jews adopted that practice; but the idea which it expressed, of treating their enemies under their feet, was familiar to them (Josh. x, 24). Those of the middle classes who were in the habit of wearing sandals often preferred walking barefooted. Shoes, or low boots, are sometimes found at Thebes; but these are believed by Sir J. G. Wilkinson to have been of late date and to have belonged to Greeks, since no persons are represented in the paintings as wearing them except foreigners. They were of leather, generally of a green color, laced in front by thongs, which passed through small loops on either side, and were principally used, as in Greece and Etruria, by women (Wilkinson, iii, 374-367). The Assyrian monuments represent shoes of a similar character, but worn by natives, especially princes.

The use of shoes was by no means universal among the Greeks and Romans. The Homeric heroes are represented without shoes when armed for battle. Socrates, Phocion, and Caton frequently went barefooted. The Roman slaves had no shoes. The covering of the feet was removed before reclining at meals. People in grief (as, for instance, at funerals) frequently went barefooted. The Roman shoes may be divided into those in which the mere sole of a shoe was attached to the sole of the foot by ties or bands, or by a covering for the toes or the instep (solea, crepida, soccus), and those which ascended higher and higher, according as they covered the ankles, the calf, or the whole of the leg. To calceaments of the latter kind, i.e. to shoes and boots as distinguished from sandals and slippers, the term calceus was applied in its proper and restricted sense. There were also various other varieties of the calceus, according to its adaptation to particular professions or modes of life. Thus the calypa was principally worn by soldiers, the pardo by laborers and rustics, and the coturnus by tragedians, hunters, and horsemen. The calcei probably did not much differ from our shoes, and are exemplified in a painting at Herculaneum, which represents a female wearing bracelets, a wreath of ivy, and a panther’s skin, while she is in the attitude of dancing and playing on the cymbals. On the other hand, a marble foot in the British Museum exhibits the form of a man’s shoe.

**Roman Shoes for Women.**

Both the sole and the upper leather are thick and strong. The toes are uncovered, and a thong passes between the great and the second toe as a sandal. The form and color of the calceus indicated rank and office. Roman senators wore high shoes, like buskins, fastened in front with four black thongs, and adorned with a small crescent. Among the calcei worn by senators, those called mulleti, from their resemblance to the scales of the red mullet, were particularly admired, as well as others called alutes, because the leather was softened by the use of alum. See Smith, Dict. of Greek and Roman Antiq. iv. v.

**Roman Shoe for a Man.**

Certain scriptural usages connected with shoes deserve especial notice. In transferring a possession or domain it was customary to deliver a sandal (Ruth iv, 7), as in our Middle Ages a glove. Hence the action of throwing down a shoe upon a region or territory was a symbol of occupancy. So Ps. ix, 10, "Upon the land of Edom do I cast my sandal," i.e. I possess, occupy it, claim it as my own. In Ruth, as above, the delivering of a sandal signified that the next of kin transferred to another a sacred obligation, and he was hence called "sandali-loosed." A sandal thong (Gen. xiv, 23), or even sandals themselves (Amos ii, 6; viii, 6), are put for any-
thing worthless or of little value; which is perfectly intell-ligible to those who have witnessed the extemporaneous manner in which a man will shape two pieces of hide and make them into shoes with the soles of his feet, thus fabricating in a few minutes a pair of sandals which would be dear at a penny. It was undoubtedly the custom to take off the sandals on holy ground, in the act of worship, and in the presence of a superior. Hence the command to take the sandals from the feet under such circumstances (Exod. iii, 5; Josh. vi, 15). This is still the well-known custom of the East—an Oriental taking off his shoe in cases in which a Euro- pean would remove his hat (see Hackett, Illustrations of Script. p. 66). The shoes of the modern Orientals are, however, made to slip off easily, which was not the case with the shoes required to be taken off with some trouble. This operation was usually performed by serv-ants; and hence the act of unloosing the sandals of an-other became a familiar symbol of servitude (Mark i, 7; Luke iii, 16; John i, 27; Acts xiii, 25). So, also, when a man's sandals had been removed, they were usually left in charge of a servant. In some of the Egyptian paint-ings servants are represented with their master's sand-als on their arm; thus became another conventional mark of a servile condition to bear the sandals of an-other (Matt. iii, 11). The terms ordinarily applied to the removal of the shoe (ποζω, Deut. xxxv, 10; Isa. xx, 2; and ספוח, Ruth iv, 7) imply that the thongs were either so numerous or so broad as almost to cover the top of the foot. It is worthy of observation, however, that the term used for "putting off" the shoe on sacred occasions is peculiar (ποζω), and conveys the notion of violence and haste. See BYNEN, De Cæcis Hebrae-orum (Dord. 1714); Kittto, Vcit. Bible, note at Ruth iv, 8. See SANDAL.

Shoe-sandal. See LATCHET; SHOE.

Shoes, PUTTING-OFF OF. In the ancient Christian Church a few (for it was not a general custom) took off their shoes as they entered the church. Cassian (Institut. i, 10) observes of the Egyptian monks that they always wore sandals instead of shoes, and took these off when they went to celebrate or receive the holy mysteries, thinking themselves obliged to do so from a literal interpretation of the command to Moses, "Put off thy shoes from off thy feet," etc. Others ob-served the custom only among those people who con-sidered it an indication of reverence, as it was in East-ern countries at the time of Moses and Joshua. See BING-ham, Christ. Antig. bk. viii, ch. 10, § 7. See SHOE.

Shobam. See ONYX.

Shob'am (Heb. id. שֹׁבַם, oshem, as in Gen. ii, 12; Sept. Σωβαὶ v. ι. ἠταγοῦ, second named of the four sons of the Merarite Levite Jezaziah, who were employed about the ark by David (1 Chron. xxiv, 27). B.C. 1043.

Shob('on) (Heb. Shonem', שָׁבֹן, keep, as often; Sept. Σωβάτος v. Σαβατύ, etc.), a variation for the names of two Hebrews.

1. Second named of the three sons of Heber, an Ash-erite (1 Chron. vii, 32); called SHAMER (q. v.) in ver. 94, where his sons are enumerated.

2. The father of Jehoshaph, who slew king Joash (2 Kings xii, 21); in the parallel passage in 2 Chron. xxxiv, 26, the name is converted into the feminine form SHIMRITH (q. v.), who is further described as a Moab-ite. This variation may have originated in the dubs-ten gender of the preceding name Shimmeath, which is also a feminine in the Chronicle. Others suppose that in Kings the father is named, and in Chronicles the mother.

Schook, JEFFRESON, a minister of the Methodist Episcopal Church, South, was born in Madison County, Mo., May 20, 1829; was converted and joined the M. E. Church in 1888. He was licensed to preach Sept. 18, 1841, and the same year was admitted into the Arkansas Conference. In 1844 he was transferred to the Texas Conference, and at its division in 1845 he fell to the East Texas Conference. About 1864 he became super-numerary, and, with the exception of one year, held that reli-ation until his death, Dec. 20, 1872. See Minutes of Annual Conferences of the M. E. Ch., South, 1873, p. 895.

Shoo-king, one of the Chinese sacred books. It is chiefly of a historical character, commencing with the reign of the Yaou, one of the very earliest emperors, supposed to have been contemporary with Noah, and stretching onward to the time of Confucius. This work is considered to be of the highest authority, containing many valuable moral and political maxims. On account of the vast influence of the Shoo-king over the public mind, the utmost efforts were made to suppress it during the reign of Chie-huang-te (B.C. about 245). As edited by Confucius, the Shoo-king throws much light upon the early religion of the Chinese, showing that Sha-manism (q. v.) was then the prevailing form of re-ligion.

Sho'phach (Heb. Shophak', שופח, prob. a varia-tion of Shobak; Sept. סופח and סופח v. סופח; Vulg. Sophach), the general of Hadarezer (1 Chron. xix, 16, 18), elsewhere (2 Sam. x, 16) called SHOBACH (q. v.).

Sho'phan (Heb. Shophan', שופן, prob. l. q. Shap-phan; Sept. סופן; Samar. סופל, Vulg. Sophar), given at the taking of the fortified city of Aroth in Jordan which were taken possession of and rebuilt by the tribe of Gad (Num. xxxii, 35); but probably a mere affix (significant, according to some, of barenness) to the second Aroth, to distinguish it from the former one, not an independent place. See ATARTH.

Shore is the rendering in the A. V. of three Heb. and two Greek words. 1. פָּרָה, choph (so called from being chafed by the waves [Gesen.], or enclosed [Frits.]; comp. Eng. cliff, and the modern town Cheffay), a round-stone (Gen. xlii, 7; Jer. xvii, 1); Ezek. xxx, 10; "haven" in Gen. xliii, 12; "side" in Deut. iv, 7; αἰγολακόν, a beach (Matt. xiii, 2, 48; John xxi, 4; Acts xxi, 5; xxxvii, 39, 40). 2. יַבָּשָׂה, kathoth, the extremity of the land (Josh. xv, 2; elsewhere "brim," "brink," etc.). 3. פְּרָה, parshah, a lip (as often, some-times "brink," "bank," etc.); χιλιάκος, the lip (as usually, "shore" only in Heb. xi, 12). See SEA.

Shoshan'nim (Heb. Shoshanim', שֹׁשָׁנִים, lilies, as often), a technical term, found as such in the phrase "To the chief musician upon Shoshanim," which is a musical direction to the leader of the temple-choir that occurs in several Psalms, and most probably indicates the melody after or in the manner of (בּ, al. A', "upon") which the Psalms were to be sung. See also SHOSHANNIM-EDUTH. As "Shoshanim" literally signi-fies "lilies," it has been suggested that the word denotes lily-shaped instruments of music (Simiton, Lex. s. v.), perhaps cymbals (rather trumpets), and this view ap-pears to be adopted by De Wette (Die Psalmen, p. 54), Hengstenberg gives it an etymological interpretation as meaning the "subject or subjects treated, as lilies figuratively for bride in xiv; the delightful consolations and deliverances experienced in lix, etc." (Davidson, Introd. ii, 246), which Dr. Davidson very truly char-acterizes as "a most improbable fancy." The Sept. and Vulg. have in both Psalms ἄνθος τῶν ἀλονᾶ κρουσόμον, and pro iis qui immutabuntur respectu, reading ap-parently יוֹם בְּנֵן. Ben Zeb (Ossar Ushahkor, s. v.) regards it as an instrument of psalmody, and Junius and Tremellius, after Kimchi, render it "a hexachord," an instrument with six strings, referring it to the root שֵׁהָד, "six," and this is approved by Eichhorn in his edition of Simionis. See PSALMS.

Shoshan'nim-eduth (Heb. Shoshanim' Eduth', שֹׁשָׁנִים, lilies, a testimony; Sept. οἱ αὐξωνοθυ-
SHOSHISKESHA 710 SHOWBREAD

σῶμαν, μαρφίτων; Vulg. iu quí commutabo tur testi-
mundum, 4; phasis found in the time of Paul xxx. as a
direction to the chief musician, which appears, accord-
ing to the most probable conjecture, to denote the melo-
ody or air "after" or "in the manner of" which the
psalm was to be sung. As the words now stand they
must be regarded as probably a fragment of the begin-
ning of an older psalm with which the choir was famil-
iar. Ecclesiastes was what he considered as the original
meaning—"lilies" that is, pure, innocent, is the "law;" but
the words will not bear this interpretation, nor is it
possible in their present position to assign to them any
certain meaning. For the conjectures of those who reg-
ard the words as the names of musical instruments, see the
article EKEZIAH.

Shoshinkesha, in Hindu mythology, is a surname of Agni, the god of fire. It signifies "the lord of brilli-
ancy."

Shotta, Kirk of. The prolonged services at this
place under the ministry of Mr. Livingstone, about 1836,
gave rise to the Monday sermon so common in Scotland
after a communion service.

Shoulder is the rendering most of ἐσώματος, shekim, (as being the part bent to receive a burden; but perhaps the word is rather primitive; occasionally "back," etc.), and σκέφτω (Matt. xxiii. 4; Luke xv. 4); frequently of ἔσωματος, shékh (properly the log [as sometimes rendered], especially the so-called right or "heave" shoulder [q. v.], Exod. xxii. 22, 27; Lev. vii. 33, 34, etc.); and elsewhere of καρπός, kathépso, the shoulder properly so called, especially the "shoulder-piece" (q. v.) of the high-
priest's ephod (Exod. xxviii., xxix.); rarely of ἱματι,
sevöl, the arm (Num. vi. 19; Deut. xviii. 3), or of some
denominative phrase.

Shoulder-blade (σκίμβα, skimbah, fem. of σκίμβος,
the common word for shoulder; used only in Job xxxi.
22, where it clearly means the socket or bone to which
the arm is attached).

Shoulder-piece (καρπός, kathépso, from an unroot
meaning [according to First] to bend or protect; often rendered "side," sometimes "arm"), a term specia-
ally used (in the plur. fem. ἐσωματοσκίμβος, kethéphóth of
the side-pieces on the upper part of the high-priest's ephod
[q. v.], which came up over the shoulder, where the frames
and back drapes were fastened by a golden stud (Exod.
xxvii., 25; xxviii. 4; simply "shoulders," xxvii. 12,
xxix. 7; or "sides," xxviii. 27; xxviii. 20); also of the
arms of an axle ("undersetters," 1 Kings vii. 30, 34), and
the wings or side-plates of a porch or gate ("sides," Ezek.
h. 3; 28). The term is frequently applied to that part
of the body called the shoulder, but only of persons, either
literally or figuratively; or metaphorically to places or
inanimate objects. According to Gesenius it differs from
σκείμα, shekim, in specifically meaning the upper part of
the side or arm, the shoulder proper; whereas the latter
term denotes originally the shoulder-blade, and hence
that part of the back where these bones approach each
other. But First thinks the two words are altogether
synonymous. In the Mishna (new ed. of Gesenius's Hands-
terbuch, sp. v.), remarks that shekim signifies only the rear
part of the shoulder where the neck joins the back, and
hence occurs only in the song. See SHEKHEM.

Shovel is the rendering in the A.V. of—1. ἀντάφυλλον, rá-
chath (from ἀντάφυλλον, the wind), a winnowing fork or jin
(Lev. xxx. 24); 2. ἄνθιον, yd (from ἄνθιον, to sweep away),
used (in the plur.) of the implements for removing the
ashes from the altar (Exod. xxvii. 3; xxxviii. 3; Num.
v. 14; 1 Kings vii. 40, 45; 2 Kings xxv. 14; 2 Chron.
v. 11, 16; Jer. iii. 19). See AGRICULTURE: ALTAR.

Showalter, Wesley M., a minister of the Meth-
odist Episcopal Church, was born in Clearfield County,
Pa., Feb. 24, 1811. When ten years of age he was con-
verted, and entered the ministry in 1858 as a member of
the East Baltimore Conference. His last appointment
was Bedford, which he was obliged, by reason of failing
health, to relinquish in the fall of 1865. He removed to
Salona, Clinton Co., Pa., where he died, Nov. 27, 1865.
As a preacher he was discriminating, candid, and direct.
See Minutes of Annual Conferences, 1866, p. 10.

Showbread is the rendering in the A. V. of the
Heb. phrase הַכְּלֵם הָפַּןְיָא, lechém hap-panim, lit. bread of
the face, i.e. of Jehovah (this is the usual form); or
(in the later books) הַכְּלֵם הָנָּמָּרָאָא, lechém ham-maare-
eth, bread of the ordering (1 Chron. ix. 82; xxiii. 29; 
2 Chron. xxii. 11; Neh. x. 35), or simply the latter word
(1 Chron. xxvii. 16; 2 Chron. ii. 4; xxiv. 18); also הַכְּלֶ
ם הָתָּמָד, lechém hat-mamad, the continual bread
(Num. iv. 7); and הַכְּלֶם הַדָּוִדְשָׁם, lechém kedosh, holy bread
(1 Sam. xxii. 5). Onkelos sometimes paraphrases it הָנָּמָּרָא, bread of the nostrils. The Sept. has lit.
ארון יָשֹׁפֵא הַפַּן יִשְׂרָאֵל, sometimes מִיָּרֶשְׁמָרָא הַפַּן
יִשְׂרָאֵל, of the former, 1 Kings vii. 48, or מִיָּרֶשְׁמָרָא הַפַּן
יִשְׂרָאֵל, 1 Chron. ix. 82, etc., as in the New Test.
(Matt. xii. 4; Luke vi. 4); and יָשֹׁפֵא הַפַּן
יִשְׂרָאֵל, in Heb. ix. 12 Josephus directly מִיָּרֶשְׁמָרָא הַפַּן
יִשְׂרָאֵל, (1 Sam. xii. 7); the Vulg. has propositionis. In the
following account we bring together all the ancient and
modern information on the subject.

1. The Table and its Accessories.—Within the ark it
was directed that there should be a table of shittim
wood, i.e. acacia, two cubits in length, a cubit in breadth,
and a cubit and a half in height, overlaid with pure
and having a "golden crown to the border there-
round about," i.e. a border or list, in order, as we may
suppose, to hinder that which was placed on it from by
any accident falling off. The further description of
this table will be found in Exod. xxx., 28-30, and a re-
presentation of it as it existed in the Herodium Temple
forms an interesting feature in the bas-relief within the
arch of Titus. The accuracy of this may, as is
obvious, be trusted. It exhibits one striking corre-
spondence with the prescriptions in Exodus. We there
find the following words: "and thou shalt make unto
it a border of a handbreadth round about." In the
sculpture of the arch the hand of one of the slaves who
is carrying the table, and the border, are of about equal
breadth. This table is itself called הַכְּלֶם הַפַּן, "the
table of the face," in Numb. iv. 7, and הַכְּלֶם הַפַּן,
"the pure table," in Lev. xxiv. 6 and 2 Chron. xii. 11.
This latter epithet is generally referred by commen-
tators to the unlaid golden with which so much of it
was covered. It may, however, mean somewhat more
than this, and bear something of the spiritual force
which it has in Malachi i. 11.

It was thought by Philo and Clement of Alexandria
that the table was a symbol of the world, its four sides
or legs typifying the four seasons. In the utter ab-

Table of Showbread. (From the Arch of Titus at Rome.)
sense of any argument in their support, we may feel
merely named among the other appurtenances of
the first sanctuary. But although unexplained, it is
referred to as one of the leading and most solemn
appurtenances of the sanctuary, and the privilege of
Abijam to the revolted tribes (2 Chron. xiii, 10, 11)
runs thus, "But as for us, the Lord is our God, and
we have not forsaken him; and the priests, which
unto the Lord, are the sons of Aaron, and the Levites
wait upon their business; and they burn unto the Lord
every morning and evening burnt-offering, and sweet
and incense; the shewbread also set they in order
upon the pure table," etc. In this absence of
explanation of that which is yet regarded as so solemn,
we have but to seek whether the names bestowed on,
and the rites connected with, the showbread will lead us
to some apprehension of its meaning.

The first name we find given is obviously the
dominant one, מזון, "bread of the face, or faces." This
is explained by some of the rabbins, even by Mal-
monides, as referring to the four sides of each loaf. It
is difficult to believe that the title was given on a
basis of the ground upon which they were placed by oth-
er loaves. Besides, it is applied in Num. iv. 7, simply
to the table, מזון, not, as in the English ver-
sion, "the table of showbread," but the "show table,"
the "table of the face, or faces." We have used the
words face and faces; for מזון, it need scarcely be said,
exists only in the plural, and is therefore applied equal-
ly to the face of one person and of many. In connec-
tion with this meaning, it continually bears the sec-
ondary one of presence. It would be superfluous to cite
any of the countless passages in which it does so. But
whose face or presence is denoted? That of the peo-
ple? The rite of the showbread, according to some,
was performed in acknowledgment of God's being the
giver of all our bread and sustenance, and the loaves
lay always on the table as a memorial and monitor of this.
But against this, besides other reasons, there is the
powerful objection that the showbread was unseen
by the people; it lay in the sanctuary, and was eaten
there by the priests alone. Thus the first condition of
symbolic instruction was wanting to the rite, had this
been its meaning.

The מזון, therefore, or presence, is that not of the
people, but of God. The מזון יומין, and the מזון
יומין תרנואפ, of the Sept. seem to indicate as
much, by saying nothing of 1 Sam. xxvi, 6, where the
words מזון יומין תרנואפ, seem decisive of the
question. But in what sense? Spencer and others consider it bread of the Minchah, a sym-
boical meal for God somewhat an-
swering to a heathen Lectisternum. But it is not
easy to find this meaning in the recorded appointments.
The incense, no doubt, to be burned on the appointed altar,
but the bread, on the Sabbath following that of its pre-
sentation, is to be eaten in the holy place by the priests.
There remains, then, the view which has been brought
out with such singular force and beauty by Bähr—a
view broad and clear in itself, and not disturbed by
those fanciful theories of numbers which tend to abate
confidence in some parts of his admirable Symbolik.
He remarks, and justly, that the phrase מזון יומין is applied
solely to the table and the bread, not to the other for-
siture of the sanctuary, the altar of incense, or the gold-
en candlesticks; there is something therefore peculiar
to the former which is denoted by the title. Taking
מזון יומין as equivalent to the presence (of God subaud),
he views the application of it to the table and the bread
as analogous to its application to the angel, מזון יומין
לפי
ןו, (1 Sam. xiii, 9, compared with Exod. xxxiii, 14, 15; Deut.
iv., 37). Of the angel of God's presence it is said that
God's "name is in him" (Exod. xxiii, 20). The pre-
ence and the name may therefore be taken as equiva-
SHOWER

SHIRVING-HAND

lent. Both, in reference to their context, indicate the manifestation of God to his creatures. "The name of God," he remarks, "is himself, but that, in so far as he reveals himself, the face is that wherein the being of a man proclaims itself, and makes known its individual personality. Hence, as name stands for he or himself, so face for person: to see the face, for to see the person. The 'bread of the face' is, therefore, that bread through which God is seen; that is, with the participation of which the seeing of God is bound up, or through the participation of which man attains the sight of God. Hence it follows that we have not to think of bread merely as such, as the means of nourishing the bodily life, but as spiritual food, as a means of appropriating the remaining that life which consists in seeing the face of God. Bread is therefore here a symbol, and stands, as it generally does in all languages, both for life and life's nourishment; but by being entitled the bread of the face, it becomes a symbol of a life higher than the physical. It is, since it lies on the table placed in the symbolic heaven, heavenly bread. They who eat of it and satisfy themselves with it see the face of God." (Bühler, Symbolik, bk. i, ch. vi, § 2.)

It is to be remembered that the showbread was "taken from the children of Israel by an everlasting covenant" (Lev. xxvii, 9), and may therefore be well expected to bear the most solemn meaning. Bühler proceeds to show very beautifully the connection in Scripture between seeing God and being nourished by God, and points, as the coping-stone of his argument, to Christ being at once the perfect image of God and the bread of life. The references to a table prepared for the righteous man, such as Ps. xxiv, 5; Luke xxii, 30, should also be considered. See BREAD.

Shower is the rendering in the A.V. of דַּשָּׁן, ge-shen (Exek. xiii, 11, 13; xxxiv, 26), a heavy rain (as elsewhere rendered); דַּשָּׁונָּס (Luke xii, 54); דַּשָּׁן, ze-rems (Job xxiv, 8), a pouring rain (elsewhere "storm," "tempest," etc.); and דַּשָּׁנָּה, rebhaim (from their multitude), drops (Deut. xxxii, 2; Psa. lxv, 10; lxxii, 7; Jer. iii, 3; xiv, 2; Mic. v, 7). See RAIN.

Shower, John, an eminent Dissenting minister, was born at Exeter, England, in 1657, and received his early education at that place. At the age of fourteen he removed to the academy of Mr. Warren, at Taunton, and some time after was placed under the care of Mr. Morton, Newington-green, London. He preached his first sermon in his twentieth year, and in 1678, when an evening lecture against popery was established in Exchange Alley, he was one of the lecturers. In the following year he was privately ordained, and chosen assistant to Mr. Vincent Alsop. In 1688 he travelled on the Continent with Mr. Cornish, the nephew of Sir Samuel Barnardiston, where he became acquainted with many Protestant divines. Returning to England, he resumed his lectures in Exchange Alley, but, owing to measures pursued by James II, he retired to Holland, where he was chosen evening lecturer to the English Church. Returning to London in 1690, he labored with Mr. Hower, but soon took charge of a Church in Old Jewry, which, under his labors, greatly prospered. He died June 28, 1715. He published, Mourner's Companion (1692,1699, 12mo)--Family Religion (Lond.1694, 8vo)--Funeral Discourses (1699, 2 vols 12mo)--Serious Reflections on Time and Eternity (1699, 8vo), of which there are many editions.---Heaven and Hell (1706, 12mo)--Sacramental Discourses (1702, 8vo)--Meditations (1709, 8vo). See Tong [Wm.], Memoirs and Funeral Sermon (1716, 8vo); Bennett, Hist. of Dissenters (Lond. 1833), ii, 331.

Shreve, Richard S., a minister of the Methodist Episcopal Church, South, was born in Alexandria County, Va., Oct. 5, 1839. He was graduated at Dickinson College, Carlisle, Pa., in 1860. He entered the Confederate army, serving from the beginning of the war till its close. In March, 1869, he was admitted into the Baltimore Conference. In 1871 he located, with the intention of residing in Kentucky, but was induced to remain, and the next year was readmitted. He, with his wife, was killed by lightning at the parsonage of Upper Botetourt, Va., June 25, 1874. See Minutes of Annual Conferences of the M. E. Ch., South, 1875, p. 157.

Shri Rama. See Vishnu.

Shrift, the act of absolving a penitent. See Confessional.

Shrift-father, the priest to whom confession is made.

Shrift-hand, the priest's right hand—that is, the hand used in shriving a penitent.

Shrift-mark. See Shrift-sign.

Shrift-sign, the sign of the cross used by the priest in shriving a penitent.

Shrine (wodć, Ac. xix, 24, a temple, as elsewhere rendered), a miniature copy of the Temple of Diana at Ephesus containing a small image of the goddess. See Diana.

Shrine (Lat. scrinium), a feretory or repository for relics, whether fixed, such as a tomb, or movable. The term is also sometimes applied to the tomb of a person not canonized. Shrines were often made of the most splendid and costly materials, and enriched with jewelry in profusion, as that of St. Taurin at Evreux, in Normandy. Those which were movable were, on certain occasions, carried in religious processions: they were arranged above and behind the altar, on rood or other beams, and lamps were suspended before or around them. Others were substantial erections, generally the tombs of saints, as that of Edward the Confessor in Westminster Abbey, and that of St. Cuthbert, formerly in Durham Cathedral, etc. These were not unfrequently rebuilt (with additional splendor) subsequently to their first erection.

Shrine at Ely Cathedral.

Shrine-clerk, or Shrine-keeper, is the official in a church who receives the voluntary oblations of the faithful. At the great and most noted shrines of saints the shrine-clerk sat at a table near, or sometimes at, a tomb, the slab of which served as such, to accept the donations of the pilgrims.

Shrine-cloth, the curtain hanging before a shrine; sometimes called shrine-veil.

Shrine-keeper. See Shrine-clerk.

Shrine-man, a name by which the shrine-clerk was sometimes called.

Shrine-veil. See Shrine-cloth.

Shrive (Saxon, scrifian). 1. To absolve a penitent after private confession. 2. To take or receive a confession. To enjoy or impose a penance after confession. The word is now nearly obsolete.

Shriver, or Shriving-clerk, a confessor.

Shriving-hand, that hand by which the sign of
the cross is made by the priest over the penitent in pronouncing absolution, i.e. the right hand. Also called Shrift-hand and Shrove-hand.

Shriving Mark or Sign, the sign of the cross made by the priest with his right hand when giving absolution. Also called Shrift-mark and Shrove-sign.

Shriving-pew, a term sometimes applied to the confessional (q.v.).

called "Fasting tide" and "Fast mass," names still retained in some parts of Great Britain. The precept of shriving having been fulfilled, the faithful, on the eve of entering upon Lent, were allowed permission to give themselves up to amusements. In England, the pastimes of foot-ball, cock-fighting, bull-baiting, etc., were down to a late period recognised usages of Shrovetide, but are now gradually disappearing.

Shrove-Tuesday, the day before Ash-Wednesday, so called from the custom among the Roman Catholics of confessing their sins on that day, and so qualifying themselves for Lent. In process of time this was turned into taking leave of flesh and other dainties, and afterwards, by degrees, into sports and merrymaking. In old Scotland it was called Fasterns-eve, probably the eve of the great fast. In England it received the name of "Fancake-Tuesday," from the fritters and pancakes eaten on that day.

Shrovings, the festivity of Shrovetide.

Shrub (םרוב, stach; Gen. xxi, 15, a bush, as rendered in Job xxx, 4, 7; "plant" in Gen. ii, 5).

Shrivying-cloth. Some antiquaries hold that this was the veil which was hung before the rood-loft in Lent. Others believe it to have been a head-veil assumed by women when they went to confession in church; for as confessionals probably did not generally exist in the ancient Church of England, a "shriving-cloth" may have been found convenient in protecting the penitent from the public gaze. The latter explanation seems at least reasonable and probable.

Shu'a, the name of a Hebrew and a Hebrewess, which appears in different forms in the original.

1. (Heb. Shu'ā, שֻׁחָא, wealth, or a cry for help, or an oath; Sept. Σωτήρ or Σωτίς v. r. Σωτίς.) A Canaanite of Adullam, whose daughter (hence named only as Bath-sheba in the original) was David's wife, and the mother of his first three children (Gen. xxxviii, 2, 13 [in both passages the A.V. has incorrectly "Shushah"]). 1 Chron. i, 32. B.C. ante 1655.

2. (Heb. Shu'ā, שֻׁחָא, id.; Sept. Σωτίς.) Daughter of Heber, a grandson of Asher, whose three sons are likewise enumerated (1 Chron. vii, 32). B.C. post 1784.

Shu'ah, the name of three Hebrews, which appears in different forms in the original.

1. (Heb. Shu'āch, שֻׁחַ, a pit; Sept. Σωτίς v. r. Σωτίς and Σωτίς.) Last named of the six sons of Abraham by Ketura (Gen. xxv, 2; 1 Chron. i, 32). B.C. ante 1688.

2. The father of Judah's Canaanitish wife (1 Chron. ii, 9). See Shua.

3. (Heb. Shu'achah, שֻׁחַ, a pit; Sept. 'Arχά). A brother (some MSS. have son) of Cheleb among the descendants of Judah (1 Chron. iv, 11). B.C. prob. ante 1612.

Shu'al. See Fox.

Shu'al (Heb. Shu'āl, שֻׁחָל, a jackal; Sept. in Chron. Σωτίς v. r. Σωτίς and Σωτίς; in Kings, Σωτίς), the name of a man and a region.

1. Third named of the eleven "sons" of Zophah, descendant of Asher (1 Chron. vii, 36). B.C. post 1612.

2. A district ("land of Shu'al") named only in 1 Sam. xiii, 17, to denote the direction taken by one of the three parties of marauders who issued from the Philistine camp at Michmash. Its connection with Ophrah (probably Taibeb) and the direction of the two other routes named in the passage make it pretty certain that the region in question lay north of Michmash. If, therefore, it be identical with the "land of Shelim" (1 Sam. ix, 4)—as is not impossible—we obtain the first and only clue yet obtained to Saul's journey is quest of the ass. The name Shu'al has not yet been identified in the Ancient Shriving-pew at Taunton, near Ripon, Yorkshire.

Shroud is the rendering of the A.V. in Ezek. xxxi, 4, 12, שָׁלָה, a thicker ("forest," 2 Chron. xxvii, 4); "bough," Isa. xvii, 9; elsewhere "wood".

Shroud, Feast of the Most Holy, a sacred festival of the Roman Catholic Church, held on the Friday after the second Sunday in Lent, in honor of the shroud in which our Lord was buried. Relics bearing the name of the shroud of our Blessed Lord are found in various places in Italy, France, and Germany, all of which are alleged to work miracles. To the altar of the Most Holy Shroud at Besançon, Gregory XIII granted extraordinary privileges, with indulgences to all who visit the same on stated days. Pope Julius II was equally liberal in his grants to the Chapel of the Most Holy Shroud at Turin. There is a hymn to the shroud in the Anglican Breviary, which celebrates it as bearing the impression of the body of our Saviour.

Shroud, the term for a covered walk or cloister in the old Cathedral of St. Paul, London.

Shrove, to, means to join in the festivities of Shrovetide.

Shrove-box. See Shriving-pew.

Shrove-hand. See Shrift-hand.

Shrove-sign. See Shrift-sign.

Shrovetide literally means "confession time," and is the name given to the days immediately preceding Ash-Wednesday. These days were so called because on them, and especially on the last of them, people were accustomed to confess their sins as a preparation for Lent. In most Roman Catholic countries it began on the Sunday before Lent. In the modern discipline of that Church a trace of the custom is still preserved, as in many countries the time of the confession which precedes the Paschal, or Easter, communion commences from Shrovetide. These days are sometimes...
neighborhood of Taiyibeh or elsewhere. It may have originated in the Hebrew signification of the word ("jackal"), in which case it would be appropriate enough to the wild desolate region east of Taiyibeh—a region containing a valley or ravine at no great distance from Taiyibeh which bore, and perhaps still bears, the name of "Hyenas." See ZEIKOM, VALLEY OF. Others (as Thieneus, in Ezeq. Handb.) derive the name from a different root, and interpret it as "hollow land."

Shu’bâl (Heb. Shu’bâl, שֻּׁבָּל, i. q. Shebuel; Sept. Σουβαλά v. r. Σουβαλά, etc.), the name of two Levites, both elsewhere called Shubael (q. v.), namely; (a) a son of Gersam (1 Chron. xxiv, 20; comp. xxvii, 1, xxvi, 24); and (b) a son of Heman (1 Chron. xxv, 29; comp. ver. 4).

Shuck, John Lewis, a minister of the Baptist denomination, was born in Alexandria, D.C., Sept. 4, 1812. Having received an appointment as a missionary of the Baptist General Convention to labor among the Chinese, he reached the field of his labors—Macao—Sept. 17, 1836, where he remained until March 16, 1842, when he removed to Hong-Kong, and afterwards to Canton. Mr. Shuck returned to the United States in 1846, the year in which the separation took place between Northern and Southern Baptists. He was honorably dismissed from the Missionary Union, the name by which the convention was then known, in 1846, becoming a missionary of the Southern Baptist Convention. By this society he was sent to labor among the Chinese of California. Having spent several years in this work, he returned East, and died at Barnwell Court-house, S.C., in October, 1863. (J. C. S.)

Shuckford, Samuel, a learned English divine, the time and place of whose birth are unknown. He was educated at Corpus Christi College, Cambridge, graduating in 1716. He became successively curate of Shelton, Norfolk, prebendary of Canterbury (1738), and rector of All-hallows, London. He died in 1754. He published a few occasional Sermons (Camb. 1728, 4to; 1724, 4to; 1734, 4to, and later); but he is principally known for his History of the World, Sacred and Profane (Lond. 1743, 4 vols. 8vo, and often since), intended to serve as an introduction to Prideaux’s Connection, but he only lived to bring it down to the time of Joshua. See Allibone, Dict. of Brit. and Amer. Authors, s. v.; Hook, Eccles. Biog. s. v.

Shu’ham (Heb. Shucham, שׁוּךָם, perhaps-pal-digger [Gesen.], or humidity [Furst]; Sept. Σουχάμ v. r. Σουχάμ; Vulg. Shoham, the son of Dan, and progenitor of a family named after himself (Numb. xxxvi, 42); elsewhere (Gen. xxii, 23) called Husam (q. v.).

Shu’hamite (Heb. with the art. hash-Shuchami, הַשָּׁךְמִי, patronymic from Shuham; Sept. ὁ Σουχαμίτης v. r. Σουχαμίτης), the descendants (numbering 4480 at the Epistle) of Shuham (q.v.) the son of Dan (Numb. xxxvi, 42, 43).

Shu’hithe, with the art. hash-Shuchithi, הַשָּׁכְיתִי, patronymic from Shouchi; Sept. ὁ Σουχαί τοῦ Σουχαίτη, etc.), an ethnic apppellative frequent in the book of Job (i, 11; vii, 1; xvii, 1; xxx, xlii; 9), but only as the epithet of one person, Bildad (q. v.). The local indications of the book of Job point to a region on the western side of Chaldea, bordering on Arabia; and exactly in this locality, above Hit and on both sides of the Euphrates, are found, in the Assyrian inscriptions, the Thukhi, a powerful people. It is probable that these were the Shuhites, and that, having been conquered by the Babylonian kings, they were counted by some of the tribes of the Chaldean. Having lost their independence, they ceased to be noticed; but it was no doubt from them that the country on the Euphrates immediately above Babylonia came to be designated as Shene, a term applied to it in the Peutingerian Tables. The Shuhites appear to have been descendants of Abraham by Keturah (Gen. xxxv, 2; 1 Chron., 2, 2).—Smith. Others, however, think that Shumma (Σουματίς), which Ptolomy (v. 14) places eastward of Babylon, is more probably their representative. See ARAMIA.

Shukra, in Hindo mythology, is the planet Venus, or the genius who governs and possesses it—a grandson of Brahaspati, the planet Jupiter, and father of the beautiful Dewajani and a powerful Brahmin.

Shu’lamite (Heb. with the art. hash-Shulammith, הַשָּׁלָמִית, i. e. the Shulammities; Sept. Σουλαμίτις v. r. Σουλαμίτις, etc.; Vulg. Sulamitae and Sunammates), one of the personages in the poem of Solomon’s Song, who, although named only in one passage (vi, 12), is, according to most interpreters, the most prominent of all the characters, being no other than the bride herself. The name—after the analogy of Shunammite—denotes a woman belonging to a place called Shulam. The only place bearing the name of which we have any knowledge is Shunem itself, which, as far back as the 4th century, was so called (Euseb. Onomat., s. v.). On the theory that Shulamite and Shunammite are equivalent, some have supposed that the female in question who was the object of Solomon’s passion was Abishag—the most lovely girl of her day, and at the time of David’s death one of the most prominent persons at the court of Jerusalem. It would be equally appropriate whether Solomon were himself the author of the Song or it were written by another person whose object was to personate him accurately. See Solomon. But this is abhorrent to the whole tenor of the Canticles, and is opposed to the Oriental usage with regard to the hireling of a deceased king. See AMIAD. It is far more reasonable to suppose that the title the Shulammites was a poetical term applied to the bride in imitation of Solomon’s name, as they are thus both masculine and feminine forms for “peaceful.” See Canticles.

Shulchan Aruk. See KARO, JOSEPH.

Shultz, Thomas, a Methodist Episcopal minister, was born in Hamburg, Germany, July 11, 1821. He came to New York in 1834, and his parents in 1836, was licensed to preach in 1845, and employed to commence a mission at Bloomington, la. In 1846 he was admitted on trial in the Illinois Conference, and appointed to the Galena mission; in 1847 to the Beardstown mission; and in 1848 to Burlington, where he died March 26, 1855. See Minutes of Annual Conferences, iv, 283.

Shum. See GARLICK.

Shumah. See Shumathite.

Shumathite (Heb. collective with the art. hash-Shumathithi, הַשּׁוֹמַתִיתִי, a gentile or patronymic; Sept. Χοσαμίτης; Vulg. Sematheth), one of the four families who sprang from Kishath-jeairim (1 Chron. ii, 33); so called either as being colonists of a village named Shumak (רֹשׁ גַּלִיל [Gesen.], or valuation [Furst]), somewhere in that neighborhood, or as descendants from a man of that name; but in neither case is there any other trace of the origin or location.

Shunnammite (Heb. with the art. hash-Shunammith, שַׁנְנַמִית, i. e. the Shunammites; Sept. Σουναμίτις v. r. Σουναμίτις), a native of Shunem, as is plain from 2 Kings iv, 1. It is applied to two persons—Abishag, the nurse of king David (1 Kings ii, 13; 11, 17, 21, 22), and the handmaid of Elisah (2 Kings iv, 12, 22, 36). See Woodward, Lectures on the Shunammite (Lond. 1840). The modern representative of Shunem being Solam, some have suggested (as Gesenius, Thesaur. p. 1379 b.), or positively affirmed (as Furst, Handbuch i, 429), that Shunnammite is identical with Shulamitae (Cant. vi, 13). But this last probability.

Shunem (Heb. Shunem, שׁנֶם, uncoven plan
Shuni, or perhaps [Gesen.] for שְׁנִי, Νινί, quiet [Gesen.], or fortunate [Furst.]; Sept. Νωμία v. τ. Νωμία, one of the cities allotted to the tribe of Issachar (Josh. xix. 18; where it occurs between Chezulloth and Haphraim). It is mentioned on two occasions.

First, in 1 Chron. vi. 22 as the place of the Philistines’ first encampment before the battle of Gilboa (1 Sam. xxvii. 8). Here it occurs in connection with Mount Gilboa and En-dor, and also, probably, with Jezreel (xxix. 1). Secondly, as the scene of Elisah’s intercourse with the Shunammite woman and her son (2 Kings iv. 8). Here it is connected with adjacent corn-fields, and, more remotely, with Mount Carmel. It was the Philistines’ native place of Abishag, the attendant on king David (1 Kings i. 8), and, according to some, of Shulamith, the heroine of the poem or drama of “Solomon’s Song.”

Judg. 1 v. 1, a place of the tribe of Dan, as now, but differently named, under Σουμαμ and Σουμαμ, as five miles south of Mount Tabor, and then known as Salem (Σωμαμ); and under “Sonam,” as a village in Arcabattine, in the territory of Sebaste called Saniam. The latter of these two identifications probably refers to Sanír, a well-known fortress some seven miles from Sebastiyeh and four from Arrabe, a spot completely outside the circle of the associations which connect themselves with Shunem. The other has more in its favor, since—for except for the distance from Mount Tabor, which is nearer eight Roman miles than five—it agrees with the position of the present Solom or Sulem, a village on the south-west flank of Jebel Duhuy (the so-called “Little Hermion”), three miles north of Jezreel, five from Gilboa (J. Fukan), full in view of the sacred spot on Mount Carmel, and situated in the midst of the finest corn-fields in the world.

It is named as Salem by the Jewish traveller Hai-Parchi (Asher, Benjamin, ii, 481). It had then its spring, without which the Philistines would certainly not have chosen it for their encampment. Nothing in the notice of Dr. Weiss (Researches, ii, 324), the spring of the village is a but poor one. The change of the n in the ancient name to t in the modern one is the reverse of that which has taken place in Zerin (Jezreel) and Beitin (Bethel). There is nothing specially to mark an ancient site in Sulem, for it is only a mud hamlet with cactus-bushes. West of the houses there is a beautiful garden, cool and shady, of lemon-trees, watered by a little rivulet; and in the village are a fountain and trough (Condor, Tent Work in Palestine, i, 128).

Shuni (Heb. שְׁנַי, Νινί, quiet [Gesen.], or fortunate [Furst.]; Sept. Νωμία v. τ. Νωμία), third named of the seven sons of Gad (Gen. xlvi. 16), and progenitor of a family named after him (Num. xxvi. 15).

1874.

Shuni’s (Heb. Shuni, שְׁנַי, Shuni, or Ἐννίων, a patronymic from Shephupham; Sept. o. Σωμαμ v. Ρωμαίος; A. V. “Shunamites”), the designation (Num. xxxvi. 39) of the family of Shephupham (“A. V. Shaphan”), or Shephupham, the son of Benjamin (1 Chron. viii. 5). See Shuppim.

Shuppim (Heb. Shuppim, שׁפְּפַם, or [1 Chron. vii. 15] שׂפֵּפָם), or a contraction for Shephupham (1 Sam. xxviii. 4). See Shuppim.

1. In 1 Chron. vii. 12, “Shuppim and Huppim, the children of Ir,” are reckoned among the posterity of Benjamin. B.C. 1856. It is, by some, thought to be the same as Irri the son of Bela the son of Benjamin, and in that case Shuppim should be reckoned as the greater of the two.

2. In a number of places, e.g. xvi. 39, he and his brother are called Shuppah and Hupham, while in 1 Chron. viii. 5 they appear as Shephupham and Huram, sons of Bela, and in Gen. xlvi. 21 as Muppim and Huppim, sons of Benjamin. To avoid the difficulty of supposing that Benjamin had a great-grandson at the time he went down to Egypt, lord A. Hervay conjectures that Shuppim, or Shephupham, was a son of Benjamin, whose family was reckoned with that of Ir, or Irri. But this is arbitrary and unnecessary, as the date is that of Jacob’s death. As he is elsewhere (1 Chron. v. 15) similarly mentioned as the brother of Huram or Huppim, who was a son of Lechen and grandson of Benjamin, he must have been such likewise. See Benjamin: Jacob.

2. A Levite of the family either of Kohath or Merari, who, together with Hosah, had charge of the Temple gate Shallecheth, in accordance with an arrangement originally instituted by David (1 Chron. xxvi. 16). B.C. 1013.

Shur (Heb. שָׁרוֹן, Vulg. Sur), a place just without the eastern border of Egypt. Its name, if Herodotus (iv. 68) is correct, is still preserved. The word probably has the same etymology as the Hebrew שָׁרוֹן, and שְׁרוֹן, a vale, and שָׁרוֹן, a highland. The Targum Bablyoni and Josephus by Pelusium (Πελούσιον [Ant. vi. 7, 8]); but the latter was called Sinai by the Hebrews.

Shur is first mentioned in the narrative of Hagar’s flight from Sarah. Abraham was then in southernmost Palestine, and when Hagar fled she was found by an angel “by the fountain in the way to Shur” (Gen. xi. 7). Probably she was endeavoring to return to Egypt, the country of her birth—she may not have been a pure Egyptian—and had reached a well in the inland caravan route. Abraham afterwards “dwelled between Kadesh and Shur, and sojourned in Gerar” (xx. 1). From this it would seem either that Shur lay in the territory of the Philistines or that the Philistines did wander in a region extending from Kadesh to Shur.

Since in either case we can ascertain the position of Shur. The first clear indication of this occurs in the account of Ishmael’s posterity: “And they dwelt from Havilah unto Shur, that [is] before Egypt, as thou goest towards Assyria” (xxxv. 18). With this should be compared the statement of the genealogy of the Israelites that the children of Ishmael “wandered from Egypt unto the land of Canaan.” The Wildeness of Shur was entered by the Israelites after they had crossed the Red Sea (Exod. xv. 22, 23). It was also called the Wilderness of Etham (Num.
SHURIASAWARNEN 716

SHUSHAN

The passage presents one difficulty, upon which the Sept. and Vulg. throw no light, in the mention of Assyria. If, however, we come to have regard later places, we find הַשֻּׁם הַיִּשְׁרֵי תַּחְלָתוֹ here remarkably like שְׁמַע v. 5 in 1 Sam. xxvii. 8, and שֶׁמֶשׁ יִשְׁרֵי תַּחְלָתוֹ in xv, 7, as if the same phrase had been originally found in the first as a gloss; but it may have been there transposed, and have originally followed the mention of Havilah. In the notices of the Amalekithish and Ishmaelitish region, in which the latter succeeded the former, there can be no question that a strip of Northern Arabia is intended, stretching from the Isthmus of Suez towards, and probably to, the Persian Gulf. The name of the wilderness may perhaps indicate a somewhat southern position. Shur may thus have been a fortified town east of the ancient head of the Red Sea, but in the hands of the Arabs, or at one time the Philistines, not of the Egyptians. From its being spoken as of a limit, it was probably the last Arabian town before entering Egypt. The hieroglyphic inscriptions have not been found to throw any light upon this question. The Sharr or Shala mentioned in them is an important country, perhaps Sazzar.

According to recent authorities the "Wilderness of Shur" is substantially identical with the modern desert el-Jifjar, which extends between the Red Sea and the Mediterranean from Pelusium to the south-west borders of Palestine (Rosenmuller, Altherth., iii, 241 sq.). It consists of white shifting sand (yet see Schubert, ii, 279), barchans, and series of salt marshes or halitations, constituting at some seven days' journey across. The simple word Shur evidently designates, in general, a high ridge running north and south in the form of a high wall, according to the meaning of the word before, i.e. on the east side of Egypt (Gen. xxvii, 18; Exod. xv, 22). This can be no other than the high range to the east of Suez, the continuation of the great chain of Jebel et-Tih northward towards the Mediterranean, forming a sharp ridge or a high wall as seen from a distance east and west, and a grand barrier on the east side of Egypt and to the west of the great plain in the interior of the wilderness called Desert et-Tih. There is no other range whatever of the kind between Egypt and the interior of the wilderness (see Palmer, Desert of the Exodus, pp. 44). This must be, therefore, the Wilderness of Shur. It is called by the Egyptians, and those who live the desert of Shur, el-Jebel es-Rahah, or the Mountain of Rahah. But according to the Arabs of the interior of the wilderness, on the east side of the range, it is called Jebel es-Sir, or the Mountain of Shur.

Shuriasawaren, in Hindit mythology, is a devoce now living, who is destined to become the ruler of the great age which shall follow upon the present, over which Vaivassada presides. In that age Vishnu will appear in his tenth Avatar.

Shurtleft, William, a Congregational minister of Portsmouth, N. H., who died in 1747, aged about sixty. He published a number of Sermons and two or three religious pamphlets (1725-41). See Allbone, Dict. of Brit. and Amer. Authors, s. v.

Shurtliif, Asaph, a minister of the Methodist Episcopal Church, came from Canada while yet a young man, and settled in Easton, Washington Co., N. Y. There he united with the Church, and was for many years an active and useful local preacher. In 1858 he was received into the Troy Conference, and served as a travelling preacher for eleven years. In 1864 he took a supernumerary relation, in which, and that of a supernumerary, he continued until his death, in Easton, N. Y., Feb. 3, 1873. See Minutes of Annual Conferences, 1873, p. 68.

Shusian. See LILY.

Shu'shan (Heb. Shushan; שׁוּשָׁן; Sept. Σουσάν and Σοῦσα; Vulg. Susa), or Susa, one of the most important towns in the East, in which the kings of Persia had their winter residence (Dan. viii., 2; Neh. 1, 1; Esth. 1, 9, 5). It is described as being built from the abundance of the lily (Shushan, or Susah), in its neighborhood (Athen. xii, 518). In the following account we collect the archaeological information on this subject.

1. History. — Susa was originally the capital of the country called Scripture Elam, and by the classical writers sometimes Ctesia (Ktesias) or sometimes Susa, or Susiana. See Elam. Its foundation is thought to date from a time anterior to Chedorlaomer, as the remains found on the site have often a character of very high antiquity. The first distinct mention of the town that has come to us, as yet found is in the inscriptions of Ahasuerus-bani-paath, son and successor of Ahasuerus, who states that he took the place, and exhibits a ground-plan of it under his sculptures (Layard, Nin. and Bab. p. 452, 453). The date of this monument is about B.C. 660. We next find Susa in the possession of the Babylonians, to whom Elam had probably passed at the division of the Assyrian empire made by Cyaxares and Nabopolassar. In the last year of Belshazzar (B.C. 536), Daniel, while still a Babylonian subject, is there on the king's business, and at Shushan in the palace sees his famous vision of the ram and the goat (Dan. viii., 2). The conquest of Babylon by Cyrus transferred Susa to the Persian empire; and long before not long before the Achaemenian princes determined to make it the capital of their whole empire and the chief place of their own residence. According to some writers (Xenoph. Cyrop. viii., 6; Strabo, xv, 3, 2), the change was made by Cyrus; according to others (Ctesias, Pers. Exc. 9; Herod. iii, 90, 65, 70), it had at any rate taken place before the death of Cambyses; but, according to the evidence of the place itself and of the other Achaemenian monuments, it would seem most probable that the transfer was really the work of Darius Hystaspis, who is said to have been (as Pliny says, H. N. vii, 27) the founder of the great palace there—the building so graphically described in the book of Esther (1, 5, 6). The reasons which induced the change are tolerably apparent. After the conquest of Babylonia and Egypt, the western provinces of the empire had become by far the most important, and the court could no longer be conveniently fixed east of Zagros, either at Ecbatana (Haman, Mem. 3, 28) or at Persepolis (Mem. 3, 29), as these were cut off from the Mesopotamian plain by the difficulties of the passes for fully half the year. Not only were the passes difficult, but they were in the possession of semi-independent tribes, who levied a toll on all passers, even the Persian kings themselves (Strabo, xv, 3, 2), and it was necessary to fix the capital west of the mountains, and here Babylon and Susa presented themselves, each with its peculiar advantages. Darius probably preferred Susa, first, on account of its vicinity to Persia (ibid., xv, 3, 2); secondly, because it was cooler than Babylon, being nearer the mountain-chain; and, thirdly, because of the excellence of the water there (Geograph. Journ. ix, 70). Susa accordingly became the metropolis of Persia, and is recognised as such by Eschylus (Pers. 16, 124, etc.), Herodotus (v, 25, 49, etc.), Ctesias (Pers. Exc. passim), Strabo (iv, 3, 2), and almost all the best writers. The court must have resided there during the greater part of the year, only quitting it regularly for Ecbatana for the height of summer, and perhaps sometimes leaving it for Babylon in the depth of winter (see Rawlinson, Herod. iii, 256). Susa retained its pre-eminence to the period of the Macedonian conquest, when Alexander found there the immense riches of the regalia of the Great King (Arrian ii, 40). After this it declined. The preference of Alexander for Babylon caused the neglect of Susa by his successors, none of whom ever made it their capital city. We hear of it once only in their wars, when it falls into the power of Antigonus (B.C. 315), who obtains treasure
SHUSHAN

SHUSHAN

t here to the amount of three millions and a half ster-
ling (Diod. Sic. xix. 48.7). Nearly a century later
(B.C. 221) Susa was attacked by Molo in his rebellion
against Antiochus the Great. He took the town, but
failed in his attempt upon the citadel (Polyb. v. 48.14).
We hear of it again at the time of the Arabian con-
quest of Persia, when it was bravely defended by Hor-
nunus (Lotus, Chaldea and Susiana, p. 344).

II. Position, etc.—A good deal of uncertainty has ex-
isted concerning the position of Susa. While most his-
torians and comparative geographical writers (Renoul, Geo.
of Herodotus; Kinneir, Mem. Pers. Empire; Porter [K.],
Trave's, ii. 4, 11; Ritter, Erdkunde Asiens, ix. 294; Vi-
torial Bible, on Dan. viii. 2) have inclined to identify
it with the modern Sus or Shush, which is in lat. 32°
10', long. 48°26' east from Greenwich, between the
Shapur and the river of Dziful; there have not been want-
ing some (Vincent, Commerce and Navig. of the An-
cients; Von Hammer, in Mem. of the Geo. Soc. of Par-
ze, ii. 520 sq., 533 sq.) to maintain the rival claims of
Shister, which is situated on the left bank of the Ku-
ran, more than half a degree farther to the eastward.
A third candidate for the honor has even been started,
and it has been maintained with much learning and
ingenuity that Susam, on the right bank of the same
stream, fifty or sixty miles above Shuster, is, if not the
Susa of the Greeks and Romans, at any rate the Shus-
shan of Scripture (Geogr. Journ. i. 85). But a careful
examination of these several spots has finally caused a
general acquiescence in the belief that Susa alone is en-
titled to the honor of representing at once the scriptu-
ral Shushan and the Susa of the classical writers (see
Lotus, Chaldea and Susiana, p. 358; Smith, Dict.
of Geog. v. v.; Rawlinson, Herod. iii. 234.).
The difficulties caused by the seemingly confused accounts
of the ancient writers, of whom some place Susa on the
Chosapes (Herod. v. 49, 52; Strabo, xv. 3, 4; Q. Curt.
v. 2), some on the Eulises (Arrian, Exp. Al. vii. 7; 7;
Folem, vi. 5; Pliny, H. N. vi. 27), have been removed by
a careful survey of the ground; and it thus ap-
pears that the Chosapes (Kerkhah) originally bifur-
cated at Pai Pul, twenty miles above Susa, the right
arm keeping its present course, while the left flowed
a little to the east of Susa, and, absorbing the Shapur
about twelve miles below the ruins, flowed on some-
what east of south and joined the Kahrn (Pastigria)
at Ahwaz. The left branch of the Chosapes was some-
times called by that name, but more properly bore the
appellation of Euleus (Ubi of Daniel). Susa thus lay
between the two streams of the Euleus and the Sha-
pur, the latter of which, being probably joined to the
Euleus by canals, was reckoned a part of it; and hence
Pliny says that the Euleus surrounded the citadel of
Susa (loc. cit.). At the distance of a few miles east and
west of the city were two other streams—the Coprates,
or river of Dziful, and the right arm of the Euleus
(the modern Kerkhah). Thus the country about Susa
was most abundantly watered; and hence the luxuri-
ance and fertility remarked alike by ancient and mod-
ern authors (Athen. xii. 518; Geograph. Journ. i. 71).
The Kerkah water was, moreover, regarded as of peculiar
excellence; it was the only water drunk by the Great
King, and was always carried with particular care and
foreign expiditions (Herod. i. 188; Plutarch, De
Ezul. ii. 601, D; Athen. Deipn. ii. 171, etc.). Even at
the present day it is celebrated for its lightness and
purity, and the natives prize it above that of almost all
other streams (Geogr. Journ. i. 70, 89).

On this site there are extensive ruins, stretching, per-
haps, twelve miles from one extremity to the other,
and consisting, like the other ruins of this region, of
hillocks of earth and rubbish covered with broken pieces of brick
and colored tile. At the foot of these mounds is the so-
called Tomb of Daniel, a small building erected on the
spot where the remains of that prophet are be-
lieved to rest. It is apparently modern; yet nothing
but the belief that this was the site of the prophet's
sepulchre could have led to its being built in the place
where it stands (Malcolm, Hist. of Persia, i. 255, 256);
and it may be added that such identifications are of far
more value in these places, where occasion for them is
rare, than among the crowded "holy places" of Palest-
ine. The city of Susa is now a gloomy wilderness
infested by lions, hyenas, and other beasts of prey.

III. General Description of the Ruins.—The ruins of
Susa cover a space about 6000 feet long from east to
west, by 4500 feet broad from north to south. The cir-
cumference of the whole, exclusive of outlying and com-
paratively insignificant mounds, is about three miles.
According to Mr. Lotus, "the principal existing re-

Plan of the Ruins of Susa.

3. The palace.
5. Ruins of the city.

Digitized by Google
as indubitably the remains of the famous citadel (άκρα or ακρόπολις) of Susa so frequently mentioned by the ancient writers (Herod. iii. 68; Polyb. v. 48, 14; Strabo, xv. 3, 2; Arrian, Exp. At. iii. 16, etc.). "Separated from the citadel on the west by a channel or ravine, the base of which is on a level with the external defences, and is the great central platform, covering upwards of sixty acres (No. 3 on the plan). The highest point is on the south side, where it presents generally a perpendicular escarpment to the plain and rises to an elevation of about 70 feet; on the east and north it does not exceed 40 or 50 feet. The east face measures 800 feet in length. Enormous ravines penetrate to the very heart of the mound" (Loftus, p. 345). The third platform (No. 2 on the plan) lies towards the north and is "a considerable square mass," about 1000 feet each way. It abuts on the central platform at its north-western extremity, but is separated from it by "a slight hollow," which was, perhaps, an ancient roadway (ibid.). These three mounds form together a lozenge-shaped mass, 4500 feet long and nearly 8000 feet broad, pointing in its longer direction a little west of north. East of them is the fourth platform, which is very extensive, but of much lower elevation than the rest (No. 4 on the plan). Its plan is very irregular, and it is about equal to all the rest of the ruins put together. Beyond this eastern platform a number of low mounds are traceable, extending nearly to the Dizful river; but there are no remains of walls in any direction, and no marks of any buildings west of the Shapur. All the ruins are contained within a circumference of about seven miles (Geograp. Journ. ix. 71). See Mummert, Bible Educator, iii. 105.

IV. Architectural Character.—The explorations undertaken by general, now Sir Penwick, Williams of Kar in the mounds at Susa, in the year 1851, resulted in the discovery of the bases of three columns, marked 5, 6, 7, on the following plan. These were found to be about six inches apart, and as the rest of the ruins put together. Beyond this eastern platform a number of low mounds are traceable, extending nearly to the Dizful river; but there are no remains of walls in any direction, and no marks of any buildings west of the Shapur. All the ruins are contained within a circumference of about seven miles (Geograp. Journ. ix. 71). See Mummert, Bible Educator, iii. 105.

The bases uncovered by Mr. Loftus were arranged on the second plan above, and, most fortunately, it is found on examination that the building was an exact counterpart of the celebrated Chel Minar at Persepolis. They are, in fact, more like each other than almost any other two buildings of antiquity, and consequently what is wanted in the one may safely be supplied from the other, if it exists there. Their age is nearly the same, that at Susa having been consecrated by Darius Hystaspis, that at Persepolis—if one may trust the inscription on its staircase (Journ. As. Soc. x. 326)—was built entirely by Xerxes. Their dimensions are practically identical, the width of that at Susa, according to Mr. Loftus, being 945 feet, the depth north and south 244. The corresponding dimensions at Persepolis, according to Flandin and Coste's survey, are 357.6 by 254.6, or from 10 to 12 feet in excess; but the difference may arise as much from imperfect surveying as from any real discrepancy. The number of columns and their arrangement are identical in the two buildings, and the details of the architecture are practically the same so far as they can be made out. But as no pillar is standing at Susa, and no capital was found entire or nearly so, it is not easy to feel quite sure that the annexe restored is in all respects correct. It is reduced from one made by Mr. Churchill, who accompanied Mr. Loftus in his explorations. If it be correct, it appears that the great difference between the two buildings was that double bull capitals were used in the interior of the central square hall at Susa, while their use was appropriately confined to the porticos at Persepolis. In other respects the height of the

Restored Elevation of Capital at Susa.

Plan of the Great Palace at Susa.
capital, which measures 28 feet, is very nearly the same, but it is fuller, and looks somewhat too heavy for the shaft that supports it. This defect was to a great extent corrected at Persepolis, and may have arisen from those at Susa being the first translation of the Ninevite wooden original into stone architecture. The pillars at Persepolis vary from 60 to 67 feet in height, and we may therefore assume that those at Susa were nearly the same. No trace of the walls which enclosed these pillars was detected at Susa, from which Mr. Loftus assumes, somewhat too hastily, that none existed. As, however, he could not make out the traces of the walls of any other of the numerous buildings which he admits once existed in these mounds, we ought not to be surprised at his not actually finding them in this instance.

Fortunately, at Persepolis sufficient remains still exist to enable us to supply this hiatus, though there also sun-burnt brick was too much used for the walls, and if it were not that the jambs of the doors and windows were generally of stone, we should be as much at a loss there as at Susa. The annexed wood-cut, representing the plan of the hall at Persepolis, is restored from data so complete as scarcely to admit of doubt with regard to any part, and will suffice to explain the arrangement of both (see Ferguson, The Palaces of Nineveh and Persepolis Restored [Lond. 1851]). Both buildings consisted of a square building, which may be called a palace, and consequently, so far as we know, the largest interior of the ancient world, with the single exception of the great hall at Karnak, which covers 58,300 square feet, while this only extends to 40,000. Both the Persian halls are supported by 36 columns, upwards of 60 feet in height, and spaced equidistant from one another at about 27 feet 6 inches from centre to centre. On the exterior of this, separated from it by walls 18 feet in thickness, were three great porches, each measuring 200 feet in width by 65 in depth, and supported by 12 columns whose axes were coincident with those of the interior. These were, beyond doubt, the great audience halls of the palace, and served the same purposes as the House of the Forest of Lebanon in Solomon's palace, though its dimensions were somewhat different—150 feet by 75. These porches were also identical, so far as use and arrangement go, with the throne-rooms in the palaces of Delhi or Agra, or those which are used at this day in those of Persia. The western porch would be appropriate to morning ceremonial, the eastern to those of the afternoon. There was no porch, as we might expect in that climate, to the south, but the principal one, both at Susa and Persepolis, was that which faced the north with a slight inclination towards the west, and was, therefore, the main entrance to the palace, and an inspection of the plan will show how easily, by the arrangement of the stais, a whole army of courtiers or of tribute-bearers could file before the king without confusion or inconvenience. The bassi-rilivi in the stairs at Persepolis in fact represent permanently the procession which on great festivals took place in the inner room; and a similar arrangement of stairs was no doubt to be found at Susa when the palace was entire. It is by no means safe to what use the central hall was appropriated. The inscription quoted above would lead us to suppose that it was a temple, properly so called, but the sacred and the secular functions of the Persian kings were so intimately blended together that it is impossible for us to draw a line anywhere, or to say how far "temple cela" or "palace hall" would be a correct designation for this part of the building. It probably was used for all great semi-religious ceremonies, such as the coronation or enthronization of the king, at such ceremonies as returning thanks or making offerings to the gods for victories—for any purpose, in fact, requiring more than usual state or solemnity; but there seems no reason to suppose it ever was used for purely festal or convivial purposes, for which it is singularly ill suited.

From what we know of the buildings at Persepolis, we may assert, almost with certainty, that the "King's Gate," where Mordecai sat (Esth. ii, 21), and where so many of the transactions of the book of Esther took place, was a square hall (see cut below), measuring probably a little more than 100 feet each way, and with its roof supported by four pillars in the centre, and that this stood at a distance of about 150 or 200 feet from the front of the northern portico, where its remains will probably now be found when looked for. We may also be tolerably certain that the inner court, where Esther appeared to implore the king's favor (Esth. v, 1), was the space between the northern portico and this square building, the outer court being the space between the "King's Gate" and the northern terrace wall. We may also predote with tolerable certainty that the "Royal House" (i. 8) and the "House of the Meddeters" (ii, 9, 11) were situated behind this great hall to the southward, or between it and the citadel, and had a direct communication with it either by means of a bridge over the ravine, or a covered way under ground, most probably the former. There seems also no reasonable doubt that it was in front of one of the lateral porticos of this building that king Ahasuerus (Xerxes) "made a feast unto all the people" which were present in Shushan in the palace, both unto great and small, seven days in the court of the garden of the king's palace; where were white, green, and blue hangings, fastened with cords of fine linen and purple to silver rings and pillars of marble: the beds were of gold and silver upon a pavement of red, and blue, and white, and black marble (Esth. i. 5, 6).

From this it is evident that the feast took place, not in the interior of any hall, but out of doors, in tents erected in one of the courts of the palace, such as we may easily fancy existed in front of either the eastern or the western porch of the great central building. The whole of this great group of buildings was raised on an artificial mound, nearly square in plan, measuring about 1000 feet each way, and rising to a height apparently of 50 or 60 feet above the plain. As the principal building must, like those at Persepolis, have had a taber, or raised platform [see Talmud], above its roof, its height could not have been less than 100 or 120 feet, and its elevation above the plain must consequently have been 170 or 200 feet. It would be difficult to conceive anything much grander in an architectural point of view than such a building, rising to such a height out of a group of subordinate palace-buildings, interspersed with
trees and shrubs, and the whole based on such a terrace, rising from the flat but fertile plains that are watered by the Euluis at its base. See PERSEA.

Shu\'sh\'an-eduth (Heb. Shu\'sh\'an Eduth, ש"שנה אד Fetish), an expression occurring in the phrase "To the chief musician upon Shu\'sh\'an-eduth," which is plainly a musical direction, whatever else may be obscure about it (Psa. ix, title). In Psa. lxxx we have the fuller phrase Shu\'sh\'an-nim-eduth, of which B"ohm regards Shu\'sh\'an-eduth as an abbreviation (Gesenius, Thesaur. p. 1385). As it now stands it denotes the lily of testimony, and possibly contains the first words of some psalm to the melody of which that to which it was prefixed was sung; and the preposition כּ, al (A. V. "upon") would then signify "after, in the manner of," indicating to the conductor of the Temple choir the air which he was to follow. The Sept. and Vulg. appear to have read כּ, al (A. V. "upon"); for they render רכש דֹּלָפָּא וּסְגַּנְּוָא (psalms and hymnody, and the like) respectively. In the Sept. כּ, כּ, becomes כּ, כ, כ. There does not appear to be so much support for the view taken by some (as by Joel Bret) that Shu\'sh\'an-eduth is a musical instrument, so called from its resemblance to a lily in shape (Simonis), or from having lily-shaped ornaments upon it, or from its six (שֵׁשָּׁה) strings. First, in consistency with his theory with respect to the titles of the Psalms, regards Shu\'sh\'an-eduth as the name of one of the twenty-four divisions of the Temple choir created by David, so called at length by a band master, Shu\'shan, and having its headquarters at Eduth, which he conjectures may be the same as Adithaim in Jos. xix, 36 (Hamb. s.v.). As a conjecture this is certainly ingenious, but it has the disadvantage of introducing as many difficulties as it removes. Simonis (Loc. s.v.) connects Eduth with the Arabic 'ud, a lute, or kind of guitar played with a plectrum, and considers it to be the melody produced by this instrument; so that in his view Shu\'sh\'an-eduth indicates that the lily-shaped cymbals were to be accompanied with playing on the lute. Gesenius proposes to render Eduth a "revelation," and hence a psalm or song revealed; but there seems no reason why we should depart from the usual meaning as above given, and we may therefore regard the words in question as a fragment of an old psalm or melody, the same in character as Ajeleth Shahar and others, which contained a direction to the leader of the choir. See PSALMS.

Shu\'sh\'an Gate of the Temple at Jerusalem (שְׁמוֹנָא cổּ, Misn., Cheleim, xvii, 9) was located in the eastern outer wall, being the only entrance on that side of the city, and naturally identified with the present Golden Gate, which is evidently a Herodian structure; but this can hardly be done, as it lay in a direct line with the interior gates. See TEMPLE.

Shute, Daniel, D.D., a Unitarian minister, was born at Malden, Mass., July 19, 1722. He entered Harvard College in 1739, and graduated in 1743. In September, 1746, he accepted a call to the Third (now South) Church, in Hingham, and ordained its pastor Dec. 10, 1746. In both the French and Revolutionary wars Mr. Shute entered warmly into the feelings of the people. In 1738 he was appointed by Gov. Pownall chaplain of Col. Joseph Williams's regiment. In 1780 he was chosen delegate to the convenion to frame a constitution for the state, and in 1788 he was associated with Gen. Lincoln to represent the town in the convention of Massachusetts which ratified the Constitution of the United States. Dr. Shute relinquished his public labors in March, 1799, retaining his pastoral relation till his decease, but giving up his salary. He died Aug. 30, 1809. Dr. Shute published the "Cosmopolite" (1777, 248, 287). See Sprague, Annals of the Amer. Pilgrim, viii, 18.

Shute, Josias, rector of St. Mary Woolnoth, London. He suffered during the civil wars for his attachment to Charles I, and was made archdeacon of Colchester in 1642, but died the same year. After his death appeared Ten Sermons (Lond. 1644, 4to) — Judgment, or The Plague of Frogs Infected, Sermon, etc. (1645, 4to): Sarah Koggar, or Gen. xvi opened in Nineteen Sermons (1649, fol.). See Allibone, Dict. of Brit. and Amer. Authors, s.v.

Shu\'talbite (Heb. Shu\'tal, ש"탈, shental, perhaps noise of breathing [Gesenius], or setting [i.e. son] of Shelach [first], or fresh plant [M"uller]; Sept. in Numb. סונאלא v. r. סונעלא and סונעלא, a designation of the descendent of Shu\'talite (q. v.), the son of Ephraim (Num. xxvi, 35).

Shu\'thelah (Heb. Shu\'thal, ש"תל, shetelah, perhaps noise of breathing [Gesenius], or setting [i.e. son] of Shelach [first], or fresh plant [M"uller]; Sept. in Numb. סונעלא v. r. סונעלא and סונעלא, in Chron. סונעלא v. r. סונעלא and סונעלא), the name of two Ephraimites (Num. xxvi, 35). The Sept. of the preceding, being the son of Zabad and the father of Ezer and Elead (1 Chron. vii, 21). B.C. apparently post 1618.

Shuttle. See WEAVER.

Shuttleworth, Philip Nicholas, D.D., an English clergyman, was born at Kirkham, Lancashire, in 1782. He was educated at Winchester, and thence elected scholar of New College, Oxford, in 1800. He became rector of Foxley, Wilts., in 1824; tutor of his college, and in 1830 principal of Oxford; warden of New College in 1822; bishop of Chichester in 1840. He died in 1842. His published works consist of Sermons on some of the Leading Principles of Christianity (Lond. 2 vols. 8vo; vol. i, 1827; 2d ed. 1829; vol. ii, 1834; 3d ed. of both, 1840, 2 vols. 8vo)— Paraphrasial Transl. of the Apostolical Epistles (Oxf. 1829, 8vo; 4th ed. 1848) — Consistency of the Whole Scheme of Revelation, etc. (Lond. 1822, 12mo)— Sermons before the University of Oxford (ibid. 1840, sm. 8vo). See Darling, Cyclop. Bibl. s.v.; Allibone, Dict. of Brit. and Amer. Authors, s.v.

S'ia (Heb. ס"ה, ס"ה, congregation; Sept. Σιαί v. r. Σαοσία, one of the family heads of the Nethinim whose children returned from the captivity with Zerubbabel (Neh. vii, 47). B.C. ante 586. In the parallel passage (Ezra ii, 44) the name is written S'iaia (q. v.).

S'iaha (Heb. ס"ח, ס"ח, congregation; Sept. Σ'αηα v. r. Σααια, etc.), one of the chief Nethinim (Ezra ii, 44); elsewhere (Neh. vii, 47) called Sia (q. v.).

Siam (meaning in Malay the brown race) is called by its people Muang Thai, "the kingdom of the free," i.e. free from the superstitions of the Brahmins. It is the chief kingdom of the peninsula called Indo-China, or Farther India. Siam proper occupies the middle portion of the peninsula, with all the countries surrounding the Gulf of Siam, and stretches between lat. 14° and 22° N. and between long. 99° and 106° E. Its greatest length is 1300 miles, its breadth 450 miles, while its area is estimated at from 190,000 to 300,000 square miles (probably the latter estimate is nearly correct), with a population of between 5,000,000 and 6,000,000.

1. Soil, Climate, etc.—A considerable portion of Siam is covered with mountains and hills. Two mountain ranges, extending mainly south-east from the Himalayas, form general natural divisions from China on the north, and partly from Anam on the east, and Burmah and British India on the west. A third range passes through the central regions, and in the south is the "Itha Pat," or mountain of the "sacred-foot" of Buddha. The great river of the country is called by foreigners
Menam, or Meam, and is the Nile of Siam. Its annual inundation commences in June and ends in November, and thus fertilized is upwards of 22,000 square miles. The coast-line may be roughly estimated at 1,100 miles, with several excellent harbors. The seasons are two: the wet or hot, and the dry or cool. The former begins near the middle of March, the latter in October. Siam is rich in natural productions. Rice, sugar, pepper, cotton, and many other staple products. There are also many valuable articles procured from the forests—gutta-percha, lac, dammar, costly woods, etc. The animal kingdom is very varied, furnishing rhinoceros, tigers, leopards, bears, otters, musk, civets, wild hogs, monkeys, deer, and elephants, especially the white elephant.

III. Government.—The Siamese are mainly of Mongolian type, but there is much reason to suppose that they are closely allied to the great Indo-European race. According to the researches of the late king, out of 12,800 Siamese words more than 5000 are found to be Sanscrit, or to have their root in that language, and the rest in the Indo-European tongue. Besides the Siamese, a great variety of races inhabit the territories of Siam, as the Chineses, Cambodians, etc. According to the French consul at Bangkok, Garnier (1874), the population of Siam proper and its Laos dependencies is composed of 1,800,000 Siamese, 1,500,000 Chinese, 60,000 Laos, 50,000 Cambodians, 50,000 Puggnans, 50,000 Karens, and others. The Siamese proper are gentle, timid, careless, indolent, and yet peaceable and polite. Most of the business is in the hands of the Chinese. Marriage takes place as early as eighteen for males and fourteen for females, without the aid of priests or magistrate; but the former may be present to offer prayers. The number of wives, ordinarily one, may, among the wealthy, reach scores and hundreds, but the first is the wife proper, to whom the rest are subject. Eighty or ninety per cent. of the males can read, a limited education being gratuitously furnished at the temples.

The government is theoretically a ducracy, practically a monarchy, for although there is a second or vice king, the first or senior king is actual sovereign. The crown is hereditary, and is bequeathed, with the sanction of the nobles, to any son of the queen. The second king seems to occupy the place of first counselor, and is probably consulted before taking any important step. The council of state comprises the first king (as president); the ministers, who have no vote; from ten to twenty councillors, who have to draft new laws, and from their own number elect a vice-president; and six princes of the royal house. The country is divided into forty-one provinces, each of which is governed by a phraya, or council of the first class.

III. History and Religion.—The early history of Siam is entirely unknown. In 1511 the Portuguese, after the conquest of Malacca by Albuquerque, established an intercourse with Siam. In the 16th century Siam was for many years subject to the Burmans, but recovering its independence towards the close of the century. In 1604 the Dutch established relations; in 1612 the first English vessel went to Aythaya. Towards the end of the 17th century a European adventurer, a native of the island of Cephalonia, called Phaulkon, gained the esteem of the king, and was by degrees promoted to an important office in the government. Through his persuasion an embassy was sent to Louis XIV of France, who sent two embassies to Siam in 1655 and 1657, and also a corps of 500 soldiers, who were put in possession of the fortress of Bangkok by Phaulkon. They were expelled in 1690. About 1760 the Burmans invaded the country and took the capital, Aythaya. In 1789 the French occupied the country, and transferred the seat of government to Bangkok. Treaties were made with the East India Company in 1822 and 1825, and with the United States in 1833.

The religion of the Siamese is Buddhism; nevertheless the lower classes, and in some respects the more enlightened, are profoundly superstitious. They have peopled their world with gods, demons, and goblins. Over the “footprint of Buddha,” on the Phra Bat is built a beautiful temple, to which crowds of ardent Buddhists perform long and painful journeys, and millions of costly gifts are offered. The following account of missions is from Appleton's Cyclopaedia (s. v.): “Missions have varied on the road by the Roman Catholics, under the greatest vicissitudes, since the middle of the 16th century. The missionaries are French, and their converts were reckoned in 1872 at 10,000, in sixteen congregations. At the head of the mission is a vicar apostolic. Protestant missions date from the visit of Gustavus, Tomlin, and Abeel, in 1829 to 1851, and properly from the settlement on by the Roman Catholics in 1830. Missions have been established by the American Baptist Union, and by the American Board of Commissioners for Foreign Missions; and the American Missionary Association has established several Protestant congregations, schools, and religious papers. The number of the Baptist congregations in 1874 was 154, and of Presbyterian, 38.”

Y. 1873); Vincent, Land of the White Elephant (ibid. 1874).

Siamese Version. Siamese is the language spoken in the kingdom of Siam, which embraces a large portion of the peninsula of India beyond the Ganges. Formerly the language of the Siamese was called Pto- yama phasa, the “Sa-yam language;” but since the reign of Phra Ruang, who set his country free from the yoke of Cambodia, they call themselves T'hai, “free,” and their language Phosa T'hay or Tai, “the language of the freemen.” As early as the year 1810 the design of providing Siames with a version of the four Gospels was entertained by the Calcula Auxiliary Bible Society, but it was not till the year 1846 that the translation and publication of the entire New Testament in Siamese were completed. A second edition was published in 1850. (B. P.)

Sias, Solomon, a minister of the Methodist Episcopal Church, was born at London, N. H., Feb. 25, 1781. He began to preach Sept. 25, 1805, and in 1806 was admitted into the New England Conference. He was ordained deacon by Bishop Asbury in 1806, and elder in 1810. In 1828 he took a superannuated relation, which he held, with the exception of one year, until his death at Newbury, Vt., Feb. 12, 1833. See Minutes of Annual Conferences, 1853, p. 322.

Sib'becai (1 Chron. xl, 29; xxvii, 11) or Sib'-bec'chai (2 Sam. xxi, 18; 1 Chron. xx, 4) [some Sib- bec'chaj and Sib- bek'aj according to Gesenius and Fürst for סיביבכ'ח, a thicket or grove of thistles, i.e. a people of Jehorah, or Jehovah is a thicket [i. e. defence]; but rather a weaver, for it is doubtful if the final י in such cases ever stands for the sacred name; Sept. סיביבכ'ח and תיביבכ'ח, etc.; Josephus סיביבכ'ח, the eighth named of the subordinate thirty in David's guard, and eighth captain for the eighth month of 24,000 men of the king's army (1 Chron. xi, 29; xxvii, 11). B.C. 1043. He belonged to one of the principal families of Judah, the Zerithites, or descendants of Ze- rah, and is called “the Hushathite,” probably from an ancestor by the same name. See for Sibb'bec'ch'ai (Am. vii, 12, 2) calls him “the Hittite,” but this is no doubt an error. Sibbecai's great exploit, which gave him a place among the mighty men of David's army, was his single combat with Saph, or Sippai, the Philis-
SIBBOLETH 722
SIBMAH

tine giant, in the battle at Gezer, or Gob (2 Sam. xxii., 18; 1 Chron. xx., 4). In 2 Sam. xxiii., 27 his name is written MIBNANAI by a mistake of the copist. Josephus says that he slew "many" who boasted that they were of the descent of the giants, apparently reading 

Sib’boleth (Heb. Sī♭bōlēth, סִּבּוֹלֶת, for Shī♭bōlēth [q. v.]; the Sept. does not represent it, the Greek having no aspirate for α; Vulg. Sī♭bōlēth), the Ephraim- 

Sibbs (or Sibbes), Richard, D.D., a learned English Puritan divine, was born at Sudbury, Suffolk, in 1572, and was educated at St. John's College, Cambridge, where he took his degree. He gained great applause, and obtained a fellowship. Taking orders, he was chosen lecturer of Trinity Church, Cambridge, the living of which he held during the last two years of his life. He became preacher to the Society of Gray's Inn in 1618, and in 1625 was chosen master of Katherine Hall, Cambridge, which, though a Puritan, he held to his death. His sermons and his works are among the most popular, and his practical life is one of the most interesting in English literature. This was the age of the great religious and social reformers, and he had the opportunity of expressing his views in a lively and effective manner. His works are very numerous, chiefly sermons and pious treatises. An incomplete edition of these was published (Lond. 1809; Aberdeen, 1812) entitled Sibbs's Works. Mr. Pickering published several of his treatises (1837-38, 2 vols. 12mo). viz. The Soul’s Conflict and Victory, etc. -- The Inward Dangers of Human Spirit, etc. -- Doctrines of the Brasted Reed and Smoking Flax: -- The Fountain Sealed: -- and Description of Christ. Still later we have Complete Works of Richard Sibbes, D.D., ed. by R. A. B. Grosart (Edinb. 1862, 2 vols. 8vo). Richard Baxter tells us that he was a great reformer, and his principal works are his Commentary on 2 Cor. i (1655). See Chalmers, Biog. Dict. s. v.; Neal, Hist. of the Puritans, ii. 294.

Sibbel, Caspar, a learned Calvinist and active participant in the controversy of the Dutch Church with Arminianism, which eventually in the Synod of Dort, was born near Elberfeld, June 9, 1590, and was reared in the practice of piety and study, and educated at Her- born and Leyden. When scarcely nineteen years old, he assumed the pastorate of the communions Randerath and Gellenkirchen, in the duchy of Juliers, and, in the midst of the discouragements and dangers growing out of the war of succession to the ducal throne in which the country was then involved, he obtained remarkable success. A price of 8000 thalers was offered for his apprehension as an evangelical pastor of the neighborhood, and he thrice narrowly escaped the troops of the imperial party; but he nevertheless added three hundred and sixty adult members to his Church in the brief term of two years. In 1611 he became pastor of the military Church in the fortress of Juliers, and was again successful in adding to the strength of its members, besides obtaining from the States-General the grant of a regular appropriation for the support of its pastor. A visitation of the plague in 1616 afforded opportunity for the display, on his part, of indomitable courage and unflagging zeal. A call to one of the churches at Nimegen was declined by him because of the opposition raised by the other pastors of that town, who were adherents of the Remonstrant party; but the incident turned the attention of a Church in Deventer, the important metropolis of the province of Overeyssel, towards him, and he was installed its pastor in the au-
tumn of the same year. He remained in this place for thirty years of his life. His labors extended into many fields and gave evidence of the qualities which constituted his strength, e.g. a narrow orthodoxy which placed the Reformed Confession on an equal footing with the Bible, an intolerant and energetic spirit, great learning, consummate skill as a controversialist, a profound devotion to duty, and a fervent piety. He assumed charge, for a time, of an orthodox band in the town of Campen, who were dissatisfied with the ministry of their resident Remonstrant pastor. In 1618 he was delegated to the Synod of Dort, and took an active part in its deliberations until an attack of fever compelled his return to Deventer, May 19, 1618. At the same time he evinced a lively interest in the cause of education by the direct part he took in the founding and development of a pedagogium in the city, an institution of an important nature. It was by his motion that the Synod of Overyssel adopted the canons laid down by the General Synod of Dort; and it was on his motion that a number of Remonstrants were suspended or expelled from their ministry by the latter authority. In the preparation of a new version of the Scriptures, as authorized by the Synod of Dort, Sibbel rendered to the Church the most important service of his useful life. One of the revisers for the province of Overyssel having died, he was chosen to fill the vacancy, and subsequently was made vice-secretary of the board of revisers. Eleven months — from Oct. 30, 1634, to Oct. 10, 1635 — were given by the board to the final revision of the translators' work. (On the version thus prepared, see Kist et Royaard, A röckte
t verker Kerkelijke Geschiedenis, pt. ii, p. 57-176.) To these varied labors must be added the constant care for the temporal welfare of numerous churches and individuals which was imposed on him by the instructions of his master. Sibbel married Maria Möckel, a daughter of the burgomaster of Randerath, and became the father of a daughter, Elizabeth, who was married to the pastor Lubbert Van Goor. In 1648 a stroke of paralysis compelled his retirement from active life. The magistracy of the town and the presidency of his Church continued to him the salary and honorary rights of an active pas-
tor, and when he died, Jan. 1, 1658, they voted an adequate pension for the support of his widow, and civil protection and guardianship for his grandson.

The productions of Sibbel's pen are very numerous, and have often been published in monograph form. They contain nothing, however, of consideration or value to modern readers, and may be classed as follows: Sermons and homilies on parts of the Old-Test. Scriptures: —Sermons and homilies on sections of the New Test., and miscellaneous sermons: — Catechetical writings: — Medit. Catechetici (1646-45, four parts) — Proleg. et Paralipomena Catechetica (1660) — Epitome Cate-
chismi (Dutch [1648]; a Latin ed. approved by clas-
sis in 1653) — A devotional manual, Chriat. Gebeder ende Danksygeingen (last ed. 1648; Latin ed. approved 1653) — Translations of the New Test. (Dutch, with Sibbel's Marginalia [1640, and often]; Latin, with notes, 1658, and approved by the States in 1658) — CCIV Questionum et ad illas Francisc de Juni Respoin-
onum (not printed) — An autobiography, incomplete; it extends to 1653, in two volumes, but there is evidence that a third volume must have been written. See Her-
zig, Reul-Enekglop, s. v.

Sibben, in Hindu mythology, was a prince of the children of the moon, who was father to Sanatren, or Jandra, and grandfather to the rajah Darmadammen.

Sib'mah (Heb. Sī♭māh; מִשְׂמָה, coolness, or fra-
grance [Genesius]; balasm-place [Furst]; Sept. Șin'vemā v. r. in Jer. Arqamaj, etc.; A. V. "Shimam, part of the Jewish History."

Sib'mah is grouped with Heshbon and Neba, and must, consequently, have stood near the western brow of the plateau, east of the Great Sea. The most suitable place for such fantastic sites, Sib-

Sibmah disappears from view during the main phase of the Jewish history. We, however, gain a parting glimpse
of it in the lament over Moab pronounced by Isaiah and by Jeremiah (Isa. xvi. 8, 9; Jer. xliv. 32). It was the placing for the abundance and excellence of its grapes. They must have been remarkably good to have been thought worthy of notice by those who, like Isaiah and Jeremiah, lived close to and were familiar with the renowned vineyards of Sorek (Isa. v. 2, where “choicest vine” is “vine of Sorek”). Its vineyards were devastated, and the town totally abandoned by the “lords of the heathen,” who at some time unknown appeared to have laid waste the whole of that once smiling and fertile district. It will be observed that these prophets speak of the city as belonging to Moab, whereas in the books of Numbers and Joshua it is enumerated among the cities of Reuben. The reason is, on the captivity of the Transjordanic tribes by the Assyrians, the Moabites returned to their ancient possessions and reoccupied their ancient cities, and among them Sibmah. See Moab.

Sibmah seems to have been known to Eusebius (Onomast. s.v. “Sabama”), and Jerome (Comment. in Isiacum, lib. v.), who states that it was hardly 100 paces distant from Heshbon. He also speaks of it as one of the very strong cities (urbes validissimae) of that region. From the way in which it is grouped in the Bible, it seems to have been on the south or south-west of Heshbon; but even the minute researches of De Saulcy, in his recent tour through that country, have failed to discover a trace of it. It may have been that it was through a confusion, that he (Voyage sur la Terre Sainte, i, 277 sq.) especially es-Samakh, or es-Samit, a ruined village near Heshbon, on the north-east. It is interesting to observe, however, that around Heshbon he found traces of the vineyards for which the city was once celebrated; such that from the lips of the Bedawin both he and Tristram (Land of Israel, p. 535) heard the name Neba given to a mountain-peak a short distance south-west of Heshbon. See NABO.

Sibour, Marie Dominique Auguste, a French prelate, was born at St.-Paul-Trois-Châteaux (Drôme), April 4, 1792, and was educated in philosophy and theology chiefly at the seminary of Viviers. He afterwards taught the humanities in the seminary of St. Nicolas du Chardonnat at Avignon. After spending a year at Rome, he was ordained priest, June 13, 1818, and on his return to Paris was attached to the parish of St. Sulpice, and next to the mission chapel. Nov. 9, 1822, he was made canon of the Cathedral of Nîmes, but continued to teach till the revolution of July, 1831, when he occupied himself with literary labors. In September, 1839, he was appointed bishop of Digne, and in October, 1848, he became archbishop of Paris, in which capacity he was noted for benevolent, patriotic, religious, and ecclesiastical labors, which made him conspicuous in both Church and State. He was assassinated Jan. 3, 1857, by a priest whom he had offended by a religious penalty. He was the author of several ecclesiastical works of local interest, for which see Hoefer, Nouv. Biog. Générale, s.v.

Sib’rām[many Sibrām][Heb. Sibrā’im, Sibb’rām, twofold hope [Gesenius], or double hill [First; Sept. Σαβαρίμ v. r. [C]Εβραίος or Ἐβραῖος [hebaim]; Vulg. Saborim], one of the landmarks on the northern boundary of the Holy Land, between Bethrothah and Hazar-hatticon, and between the boundary of Damascus and that of Hamath (Ezek. xlv. 16; Ezek. xlv. 17). Eusebius (Comment. in Isiacum, lib. v.) suggests that it may be identical with the Ziphron (q. v.) of the parallel passage (Numb. xxxix. 49).

Sibyl (Σιβώλλα, commonly derived from Δίκως βουλής, Doric Σίκως βολής, will of Jupiter), in Grecian and Roman mythology, etc., one of a class of inspired virgins who were believed to reveal the decrees of the gods, and to whom altars were not unfrequently erected. The earliest sibyl was reared by the Muses themselves, and her verses were composed in hexameters, probably by the priests of Apollo. She is the prototype of all the other sibyls and of such oracles. The number of sibyls is sometimes fixed at four, and again at ten. The former list includes the Erythrean, the Samian, the Egyptian, and the Sardian (Elian, Var. Hist. xii. 35) sibyls; the latter embraces, 1, the Babylonian, named Saba or Sambetha, living in the days of Noah, and married to one of his sons (she forestold the coming of Baden, Alexander’s march of conquest, the advent of Christ, etc.); 2, the Libyan, a daughter of Jupiter and Lamia, the original sibyl, from whom all the others obtained the title; 3, the Delphian, born in the Temple of Apollo, and living long anterior to the Trojan war, which she foretold (there was an elder Delphian, who it is said foretold the Fall of Jerusalem); 4, a younger Delphian (Pausan. x. 12, 11); 4, the Italian or Cimmerian, soon after the Trojan war; 5, the Erythrean, before the fall of Troy (here, too, we find an elder and a younger one, who is called Herophile (Strabo, xiv. 645); 6, the Samian, belonging to the time of Numa; 7, the Cumesan, who was the most noted of them all (she was consulted by Eneas before he descended into the lower world (Ovid, Metam. xiv. 104; xv. 712, etc.); Virgil, Aeneid, vi, 10') she wrote her predictions on leaves, which she arranged in the morning, but then left exposed to the winds; she is stated to have attacked no one as aged as a year and a day; 8, the Hellespontian or Trojan, who lived 600 years before the time of Homer and was buried in a temple of Apollo at Gergithum; 9, the Phrygian; and 10, the Tiburtine, whose name was Albunea. Pausanias also mentions a Hebrew sibyl of the name of Sabbe, who is called a daughter of Bereus and Erynangée. All these sibyls are more or less identified with each other, and their respective oracles cannot be determined. Modern researches have shown that the belief in sibyls cannot well be traced back to historical personages, but must instead be assumed to have sprung from the observation of natural phenomena, such as sounds heard in caverns, forests, etc. The belief was afterwards employed to serve the purposes of deceivers, statesmen, etc. See Bernhardy, Griech. Lit. ii, 249 sq.; Herrmann, Gottesdienstl. Alterthämmer d. Griechen, § 37; Klausen, Æneis, i, 201 sq.; Müller [Otfried], Dorier, i, 339; and Fabrici Biblic. Gr. tom. i. See Sibylline Oracles.

Sibylline Books. The ancient sibyls were, according to the popular belief, female soothsayers or prophetesses, who frequently delivered vaticinations, especially of a threatening character, and sometimes showed how to propitiate the wrath of the gods. The most celebrated of the number was the Cumesan, concerning whom there is the following famous Apollo, having been enroached on her, offered to give her what she should ask. She demanded to live as many years as she had grains of sand in her hand, but unfortunately forgot to ask for continued enjoyment of health and bloom. The god granted her request, but she refused in return to listen to his suit, and her longevity, without freshness and beauty, did not yield her a benefit. It was supposed that she was to live about 1300 years, and at the expiration of this period she was to wither quite away, and be converted into a mere voice (Ovid, Metam. 14, 104; Serv. ad Virg. Æn, vi, 321). She is variously called Herophile, Demo, Phenomenon, Deiphobe, Demophorie, and Alcmaeia. These sibyls have come to Italy from the East (Livy, i, 7), and she is the one who, according to most traditions, appeared before king Tarquinius, offering him the Sibylline Books for sale (Pliny, H. N. xiii. 29; Celsius, i, 19).

According to an ancient legend, the emperor Augustus Caesar repaired to the Tiburtine Sibyl to inquire whether he should consent to allow himself to be worshipped with divine honors, which the senate had decreed to him. The sibyl, after some days of meditation, took the emperor apart and showed him an altar; and above the altar, in the opening heavens, and in a
GLORY of light, he beheld a beautiful virgin holding an infant in her arms, and at the same time a voice was heard saying, "This is the altar of the son of the living God;" whereupon Augustus caused an altar to be erected upon Capitoline Hill, with this inscription, Ara Primigeniae Dei; and on the same spot, in later times, was built the church called the Ara Coeli, well known, with various steps, to all who have visited Rome. A very rude but curious base-relief, preserved in the church of the Ara Coeli, is perhaps the oldest representation extant. The Church legend assigns to it a fabulous antiquity; and it must be older than the 12th century, as it is alluded to by writers of that period. Here Augustus knelt on the knees of Madame and Child, and at his side is the sibyl Tiburtina, pointing upwards (Mrs. Jameson, Legends of the Madonna, p. 197).

I. Lost Works.—The so-called Sibylline Books of antiquity were certain writings regarded with much veneration and guarded with great care. The legend concerning them is that a sibyl (some say the Cumaean, others the Ionian) came to Tarquin II (or Tarquin the Superb) with nine books, which she offered to sell for a very high price. Tarquin refusing to purchase, the sibyl went away and burned three of the volumes. Returning, she asked the same price for the remaining six; and when Tarquin again refused to buy, she went away and burned more, so that Tarquin demanding the same price for the three as she had for the nine. Her behavior struck the king, and upon his augurs advising him to do so, he bought the volumes. The sibyl disappeared and was never seen afterwards. The books were preserved with great care, and were called Sibylline Volumes, etc. They were said to have been written on palm-leaves, partly in verse and partly in symbolical hieroglyphics. The public were never allowed to inspect them, but they were kept in the Temple of Jupiter Capitolinus, preserved in a stone chest. A college of priests was appointed to have charge of them. It was the duty of this college to consult these books on all occasions when the gods manifested their wrath by inflicting calamities upon the Romans. The answers which were derived from them were almost invariably of a religious nature, as they either commanded the introduction of some new worship, or the institution of new ceremonies and festivals or the repetition of ancient. See Thorlacius, Libri Sibyl. Veteris Ecclesiae (Copenhagen 1815); Volkmann, De Orac. Sibyl. (Lips. 1858); Frielieb, De Codic. Sibyl. (Bremen, 1847); Floder. Verigin. Homer, et Hessiod, in Orac. Sib. (Ups. 1770); and other monographs cited by Volbeding, Index Program. p. 14.

2. Contents.—The results of criticism show that the Sibylline Books consisted of 55 volumes, in which were contained the oracles of the oracles which they called Sibyls, and that they originated in different countries and periods. The collection as we now have it includes:

a. Jewish Elements.—Scholars are generally agreed that book iii is, upon the whole, the work of an Egyptian Jew, though based somewhat on already extant heathen oracles preserved. By the Christian era, however, the oracles ceased to be read, and the books were lost.

b. Extant Writings.—It is certain, from Roman history, that Sibylline oracles were committed to writing, and that Sibylline books were preserved; and it is a well-known fact that when the conquests of Alexander and the Romans in the East brought in a period of religious syncretism, the fates of the nations in their traditional religions gave way to superstitious of every form, and was replaced no less by an interest in prophecies of every sort than by an inclination to the practice of secret acts. It is not strange, accordingly, that traces are found of a Chaldean and a Babylonian and even of a Hebrew sibyl. When Christian-}
SIBYLLINE ORACLES

make war on Rome. The date of its composition is easy to determine from these data. No specifically Christian elements appear, and the religious bearing of the fragment upon the whole is difficult to determine. It is not a later form of the ordinary type, by which Christian of the collection involved in such a character.

Book v is a *crux interpretum.* The first fifty verses recite the list of Roman emperors from Julius Caesar to Hadrian, their names being indicated by the respective initial letters. The internal evidence assigns the date of composition to the close of Hadrian's reign (A.D. 138). The description it gives of Nero as laying claim to divine honors, after he "shall have returned," indicates a Christian pen; but the Christian element is so little apparent that judicious critics regard the greater part of the book as a Jewish production. The repeated reference to Nero, the arch-enemy, seems to suggest that the author wrote in Nero's time, in which case it would become necessary to separate that portion of the book which reaches down to Hadrian, and upon this point scholars are greatly divided. The subject-matter is largely historical, geographical, and ethical, so that the author or compiler deals rather with the dooms of particular cities and countries than with that of the world.

b. Christian Elements.—Book vi is a brief hymn on Jesus as the Son of God, which touches on his miracles, teachings, and death, and denounces a prophetic curse on those who shall crucify him among the Jews. In connection with the baptism in Jordan, it introduces the fire mentioned in ancient gospels, and presents an image of the dove greatly at variance with the canonical idea. It has been supposed that a form of gnosis is here revealed to our notice; but the question may depend for its answer on the connecting fragment of this book with book vii. The latter also contains, among apparently disconnected oracles of threatening, a number of extended hymns on Christ, in which the baptism is again particularly referred to and a peculiar philosophy connected with it (the premundane Logos clothed with flesh by the Spirit), and in which, moreover, a ritual of sacrifice is recommended (v. 76) to which the Church was an entire stranger. The only historical allusion which might afford a hint respecting the age of the books is that in which it is said that "other Persians should reign" in the time of greatest trouble (the time then current?). The reference might perhaps be made to the successes of the Persians in the reign of Philip II, and the reign of Alexander.

Book vii deals more extensively with ideas peculiar to Christianity than any of those described. It is composed of fragments and devoid of unity, but the first half (ver. 1-390) makes the impression of a connected whole. It begins where book v left off, and assigns to Hadrian's family three additional kings. A further reference to a king of different family (Sept. Severus), with his sons, may be a later interpolation. The book is intended to be a prophetic portrait of the last judgment, but it includes a rehearsal of the life of Jesus, with the famous lines, thirty-four in number, which are the subject of the sestertius of T. Carus. From the initial letters forming the words Ιησοῦς Χριστός (θεός θνός σωτήρ σταυρος). They were early recognised, e.g. by Eusebius and Augustine (*Civ. Decl., 18, 29*); but it is evident that they originated with a later hand. Neither the first nor the last of the lines is independent of the context in its structure, but the cities at least one of the lines as having a different initial letter. The number of the lines is in some copies limited to twenty-seven; and the form Χριστός has no parallel. The less extended second half (ver. 361-501) contains nothing Sibylline in character, and is composed of fragments of Christian hymnus. It is supposed to belong to a late period.

Books i and ii are probably of later date than those already discussed. No Christian writer earlier than the 5th century quotes from them, and they are remarkable because of the absence of all reference to Rome. No definite fixing of their date is accordingly possible. They are distinguished by greater conformity to a settled plan than is found in the others, and doubtless due to this quality that the collection ends here. Three kings are said to reign in the golden age, who are identified by some critics with the sons of Kronos, and by others with the sons of Noah, or with three patriarchs of early Hebrew history. The Titans are supposed to denote the entire series of heathen powers to the time of the Messiah. Book i continues the history through the destruction of Jerusalem and to the final dispersion of the Jews, while book ii deals chiefly with the last judgment. It is apparent that a portion of the poem has been lost from between the two books as they now exist, and it would seem that the loss of that section has involved art of the process of ascertaining the time in which the books originated. The fact is that they were wholly unknown to the Church fathers, that even the sibyllomaniac Januarius does not mention them, and that they are free from all trace of Chiliasm.

Their contents are as follows:

Book xi begins at the deluge and the tower of Babel, and follows the history down through the Egyptian, Persian, and Grecian dominions to the time of the Roman supremacy. In the progress of the poem Joseph and the exode are mentioned; and Homer, the Trojan war, Alexander and the Diadochi, the Ptolemaeans, Cleopatra, Caesar and his successors, with their relations to Egypt, are all referred to. The book closes with a request from the sibyl for rest from the madness of inspiration, thus implying that it is the first part of a continued poem. The religious element is not made prominent, though the author was evidently acquainted with sacred history. A peculiar wealth of chronological statements and reckonings characterizes the book.

Book xii begins with Apollonius of Tyana and mentions the entire succession of Caesars, designating each individual by the numerical equivalent of his name, with the single exception of Alex. Severus. The absence of all reference to religious ideas is a very noticeable feature, though Vespassian is termed the annihilator of the righteous, and the coming of a μνηστή 

λόγος υστέρος is mentioned (ver. 30 sq.), who may be the Messiah, as ver. 232 declares that in the reign of the first Roman sovereign "the word of the immortal God came upon the earth." The earliest victories of the Sassanids over the Romans are mentioned; and a description of the sestertius of Caracalla is given (ver. 294 for). Much of the history of book xii is inexplicable to us, and the same is true of book xiii. It is fragmentary and brief, and is almost exclusively devoted to Asiatic wars, the different Roman rulers being very indefinitely described. The situation of Oriental countries during the second and third centuries appears to have been more familiar to the author than it can be to us. The book is like those mentioned in the absence of religious references, and closes in the usual form.

Book xiv is wholly inexplicable. Lists of emperors are given, but in such a manner as to render their identification impossible. The internal character of the book may be due to the idea that there was an Egyptian living in the reign of Gallienus, who framed the history of the world and of the emperors in Sibylline verses, and added to it a continuation drawn from
his own resources. No religious, and especially no Mes-
bianic, interest is apparent, unless the thought at the 
(white that after all of conflict shall be over, the earth 
shall enjoy undisturbed peace) might be regarded as 
Messianic.

The collection and arrangement of the Sibyl line Books 
were evidently the work of comparatively recent hands, 
and were made in the interests of Christianity. Lac-
tantius appears to have known them only as separate 
poems. Most of the manuscripts contain only the first 
eight books, and the differences of arrangement to be 
observed in them would indicate that, before the entire 
collection was completed, certain sections had been 
brought together. The loss of fragments and sections 
was the natural result of the scattered state in which 
the material existed; but the date of the last publication, 
which preserved the books against further losses, is 
wholly unknown.

Sibyl. Libr., in the Misc. Hafii, 1816, vol. 1; Terry, The 
Sibyllines Oracles (N. Y. 1890).

Sibyllists, a name of reproach given, in early times, 
the Christians because in their disputes with the 
heathen they sometimes made use of the authority 
of Sibylla, their own prophets, against them (Origen, 
Cont. Celsum, lib. v, p. 272). They urged her writings 
with so much advantage to the Christian cause and 
prejudice to the heathen that Justin Martyr (Apol. 2, 
p. 82) says the Roman governors made it death for 
any one to read them, or Hystaspes, or the writings of the 

Sicanius, in Grecian mythology, was the son of 
Neptune and a nymph from whom the island of Tri-
nacia is said to have derived its name of Sicania (later 
Sicily). He is sometimes represented as the father of 
Proserpine by Ceres.

Sicard, RICHARD CUCURDIT, a knight and 
educator, was born at Fosses-
net, near Toulouse, Sept. 20, 1742, and succeeded the 
abbé Lépée as master of the deaf-and-dumb school in 
Paris in 1789. He had two narrow escapes during the 
Revolution, at which epoch he joined Jauffret in pub-
lishing the Religious, Political, and Literary Annals of 
France. He wrote several works of interesting sub-
ject which chiefly occupied his attention, and in 1800 es-
tablished a printing-press for the use of his scholars.

Sicarii (σικάριοι, Greekized from the Lat. sicarii, 
an assassin; "robber," Acts xxi, 38; so Josephus, Ant. 
xx, 8, 6; War, ii, 13, 5), the special title of a band or 
sect of Jewish fanatics who notoriously the last war with 
the Romans, and on the downfall of Masada retired to 
Egypt, where they still maintained their stubborn resi-
dance to the Roman authority (ibid., vii, 10, 1). They 
only appear in the New Test., in the person of Judas 
(q. v.) of Galilee, the leader of a popular revolt "in 
the days of the taxing" (i. e. the census, under the prefect-
ure of Pontius Pilate), as a political party, and are described to 
by Gamaliel in his speech before the Sanhedrin 
(Acts v, 37). According to Josephus (Ant. xviii, 1, 1), 
Judas was a Gaulonite of the city of Gamala, probably 
taking his name of Gaul from his insurrection hav-
ing its rise in Galilee. His revolt had a theocratic 
character, the watchword of which was "We have no 
lord nor master but God," and he boldly denounced the 
payment of tribute to Caesar, and all acknowledgment 
of any foreign authority, as treason against the princi-
ples of the Jewish nation, and a flagrant breach of 
short of downright slavery. His fiery eloquence and 
the popularity of his doctrines drew vast numbers to his 
standard, by many of whom he was regarded as the 
Messiah (Origen, Homil. in loc. xxv), and the country 
was for a time entirely given over to the lawless depre-
dations of the fierce and licentious throng who had 
joined themselves to him. But the might of Rome 
proved irresistible: Judas himself perished, and his 
followers were "dispersed," though not entirely destroyed 
till the final overthrow of the city and nation.

With his fellow-insurgent Sadoc, a Pharisee, Judas 
is represented by Josephus as the founder of a fourth 
sect, in addition to the Pharisees, Sadducees, and Es-
anes (Ant. xviii, 1, 6; War, ii, 8, 1). The only point 
which appears to have distinguished his followers from 
the Pharisees was their stubborn love of freedom, lead-
ing them to despise torments or death for themselves 
or their friends rather than call any man master.

The Gaulonites, as Judas’s followers were called, 
may be regarded as the doctrinal ancestors of the Zealots 
and Sicarii of later days, and to the influence of his tenets 
Josephus attributes all subsequent insurrections of the 
Jews and the final destruction of the city and Temple.

Judas and his followers were a terror to the Romans, 
and after several attempts to induce them to surrender 
without a struggle failed, the Roman governor, Titus, 
with a great army, attacked the city. The Jewish 
resistance was desperate, and the Romans suffered heavy 
losses. After a long siege, the city was taken and 
destroyed, and the people were massacred. The 
Sicarians, as they were called, were distinguished by 
their peculiar dress and manners, and by their 
fanatical devotion to their leader.

Sicheus, in Phoenician mythology, was the hus-
band of Didon, queen of Carthage, whose brother Py-

gmalion caused him to be murdered for his treasure. 
The disembodied spirit revealed the place in which the 
treasure was hidden to the widow before her flight. 
She accordingly landed in Africa, and founded Carthage 
(Virgil, Aeneid, i, 347, etc.; iv, 20, 502, etc.; vi, 474). 
(Juvenal, xiv) gives the name Acerbos to Dido’s hus-
band, and states that Pygmalion himself was the 
murderer; that Dido fled his kingdom in order to escape 
from the scene which fed her grief, and that she was 
obliged to use stratagem to induce her attendants to 
refrain from delivering her up to the king. After 
touching at Cyprus, the final settlement was made at 
Carthage.

Sichem (an incorrect rendering [borrowed from 
the Vulg.] of the name elsewhere Anglicized Shechem 
[q.v.]) occurs in two passages of the A. V.

1. (Gen. xii, 6) the unusual expression “the 
place of Sichem” may refer to the site of the ancient 
town of Shechem, which was a town of Mount Gerizim, 
the place where the city did not exist. The “oaks of Moreh” 
were there, but the town of Shechem as yet was not; its 
place only was visited by the great patriarch.

2. (Ex. 33:15; Vulg. in Sichin., Ecclus. i, 26.) 
If there could be any doubt that the son of Sirach 
was a contemporary of Shechem, this passage would 
prove the characteristic pun which he has per-
pertrated on the word Moreh, the ancient name of 
Shechem: “That foolish people (απός μαχανης) that 
dwell in Sichem.”
Sicilian Vespers, the name given to the insurrection of Palermo, March 21, 1282. It was at a festival on Easter-Monday that a multitude of the inhabitants of Palermo and the neighborhood had thronged to the Church of the Holy Ghost, about half a mile out of the town. The religious service was over, and amusements of all sorts were going gayly on, when a body of French soldiers appeared, under the pretext of keeping the peace. One of them offering an insult to the daughter of Roger Mastrangelo, he was immediately slain, and in the fighting which followed every one of the 200 Frenchmen present was killed. The insurrection became general: 2000 French were slain. A government was hastily formed, the towns asserted their independence, and began to prepare for mutual defense, and in one month Sicily was free; the French had disappeared. See Milman, Hist. of Latin Christianity, i, 155 sq.

Sicily, Council of, (Concilium Siculon), was held in 363 or 366 by Eustathius, bishop of Sebaste, and the Oriental deputies, who convoked the bishops of the country in order to confirm the faith as settled at Nicea and to nullify the proceedings at Ariminum. The use of the term "consubstantial" was approved, and the bishops drew up a synodal letter after the form given by pope Liberius. See Mansi, ii, 830.

Sicinus, in Grecian mythology, was a son of Thoas, king of Lemnos, and a Naiad whom he learned to love while in the island of Céoë. He colonized an island near Euboea, which he named in his honor. See Schol. Ad Apollon. Rhod. i, 624; Strabo, x, 484.

Sick, Anointing of. See Extreme Unction.

Sick, Care of, was one of the principal duties of the deaconesses (q. v.) in the apostolic age.

Sick, Communion of the. is the celebration of the Lord's supper in a private house for the benefit of one so ill as to be unable to attend the church. Of this there are many instances in antiquity. Paulinus, bishop of Nola, caused the eucharist to be celebrated in his own chamber a few hours before his death. Gregory Nazianzen informs us that his father communicated in his own chamber; and Ambrose is said to have administered the sacrament in a private house in Rome. It has been the constant usage of the Christian Church to permit persons dangerously sick to receive the sacrament in their own homes. The Church of England has a special office for the communion of the sick.

Sick, Visitation of. The sick being in special need of pastoral care, and the visitation of them being enjoined by divine authority (Matt. xxxvi, 36; James i, 27; v, 14, 15), it is made by Christian churches a special duty of the clergy. The Church of England has a special order for it in her Book of Common Prayer. The usual office contains: 1. Supplications to avert evil, in the Savilution and short Litany. 2. Prayer to procure good things, in the Lord's Prayer and the two collecta. 3. Exhortations, prescribed in the large form of Exhortation; and directions in the rubric to advise the sick man to forgive freely, etc. 4. Consolations, in the Absolution and the Prayer, etc. There are also added Extraordinary Prayers and the Manner of Administering Communion.

Sickles, William, a Presbyterian minister, was born at Troy, N. Y., Aug. 20, 1795. He graduated at Jefferson College, Canonsburg, Pa., in 1824, and at the theological seminary at Princeton, N. J., in 1827; was licensed by Winchester Presbytery, and ordained by the same, in 1828; and then removed West and settled at Rushville, Ind. He subsequently preached at Washington, Shiloh, Bethany, and Hopewell, within the bounds of Indiana- apolis Presbytery; also at Connellsville, Pleasant, and Jefferson churches in Madison Presbytery. He died in Indianapolis, Ind., Aug. 9, 1864. Mr. Sickles was an able preacher, always instructive and interesting. He was known as a good man, a sound theologian, and a genuine friend. See Wilson, Presb. Hist. Almanac, 1866, p. 169. (J. L. S.)

Sickingen, Franz von, a noble and heroic character, living in the early period of the German Reformation, and eminent because of the relation he sustained to that movement, was born May 1, 1481, in the Castle of Ebermühn, near Kreuznach, and was the son of a local magnate on behalf of the emperor Maximilian, where he served until he had acquired fame and high rank as a military leader. He was likewise engaged, however, in the less legitimate minor wars between the powerful nobles of Germany, which were then so common, though his part generally consisted in protecting the weaker and in delivering justice to the weaker parties. He was, however, too, of his day, he was often guilty of unnecessary violence. In 1515 he compelled the city of Worms to receive back a number of citizens and councillors who had been banished during a dispute between the magistrates and the public. He then turned his arms against the duke of Lorraine, compelled the latter to purchase freedom from violence at the cost of fifty thousand florins and a mouth's pay to Sickingen's troops. Immunity from punishment for such offences was secured through the necessity of retaining Sickingen's skill and experience in the emperor's service. Maximilian died in 1519, and then Sickingen occupied an important position as the candidates for the imperial throne—Francis of France and Charles of Spain and Austria—both sought to obtain his support in their behalf. He decided in favor of the latter, and when his choice was ratified and Charles became emperor, June 26, 1519, he threw himself with enthusiasm into the service of his new lord, and was made commander of the imperial armies, councillor, and chamberlain. As early as 1521 he was enabled to display his devotion to his new master in the field, under the command of count Henry of Nassau, in the abortive campaign against the Netherlands, when the successful defence of Maastricht by the Chevalier Bayard compelled the retreat of the invading army. Sickingen's next undertaking was intended to break down the despotism of the princes and the superciliousness of the clergy. He was chosen general leader by the nobles of the Upper Rhine, and gathered an army which he employed against the archbishop of Trier, who had some successes by force of his own injury; as the protracted siege of Trier exhausted his resources and compelled his retreat, after having irritated the allied princes—the elector-palatine, the landgrave Philip of Hesse, and the archbishop—so that they followed him to his Castle of Landstuhl, near Zweibrücken, where he had built a strong fortification which he had labored so hard to build, but which, in the meantime, gave Sickingen a mortal wound, so that he died at noon, May 7, 1528, while his chaplain was employed in ministering to him the consolations of religion. The hostile princes bowed reverently and repeated a Pater-noster for the repose of his soul. He left five sons, who were hindered from taking possession of their paternal properties during nineteen years, when a compromise restored to them their own. His death made a profound impression through all Germany, and so startled Luther that he at first refused to credit the report of its occurrence, though he afterwards saw in the event a display of God's wonderful and righteous judgments. See De Wette, Luther's Briefe, ii, 340, 341.

Sickingen's character was unquestionably marred by the faults of the chivalry of his time; but he was distinguished by fidelity to his pledges, devotion to his friends, courageous intervention in behalf of the oppressed. He did not receive the benefits of a liberal education in his youth, but was very well qualified in the high culture when judged by the standard of his time; and he became a zealous promoter of learning and a protector of scholars. Reuchlin (q. v.) found an asylum with him in April, 1519, when the hostile forces of the Schabir League entered Stuttgart, and again when the Dominicans of Cologne were persecuting him by legal
process. Still more noteworthy is the fact that Ulrich von Hutten (q. v.) resided in the Ersbom during two years, and was thus able to influence his former comrade to look with favor on the Wittenberg Reformer and his work. It was through the influence of Hutten that Sickingen was released from the fetters of scholasticism, and enabled to attain to a recognition of evangelical truth. Among Sickingen’s guests were Caspar Aquila, Martin Bucer, John Ecklampsidius, and John Schwebel (q. v.), besides others of inferior rank, in such numbers that his halls came to be known as “Hins of Righteousness.” The result of the sojourn of so many reformatory spirits in the Ersbom was apparent in the reform of the religious services in all of Sickingen’s castles, which work was executed, before the expedition to Treves, by Ecklampsidius. Sickingen endeavored to promote the cause of the Reformation with his pen as well as with the force of his public and private authority. A Send- schreiben (given in Munch, Fr. von Sickingen, ii, 192-139) addressed to his brother-in-law Dietrich von Haxdtschuscheim aims to show that the Reformation is simply a restoration of primitive Christianity, and to set forth the author’s views respecting the Lord’s supper, the mass, celibacy, and monasticism, the saints and images. He also wrote an Essay on the question “Whether it is advisable for the professing princes of the Holy Roman Empire to conclude a universal or particular treaty of peace with the pope?” (see Jöcher, Ge- lehrten-Lexikon, iv, 369).

Sickle (σκειλή, chermiss, a reaping-hook, Deut. xvi, 9; xxiii, 25; [ἐνθοϑ], magál, a reaping-knife, Jer. vii, 16; Joel iii [iv], 13, ἀφιράνων), the instrument usually employed for cutting grain. See Agriculture; Harvest; Reaping.

Sickles, Jacob D., a Dutch Reformed minister, was born at Tappan, N. Y., in 1772, graduated from Columbia College in 1792, and prepared for the ministry under Drs. S. Froeligh and J. R. Livingston. He was distinguished as a linguist, both in classic and modern tongues. After his licensure, in 1794, he became assistant to Rev. Dr. Theodoric Romeyn, pastor of the Reformed Church in Schenectady. Two years subsequently he settled over the United churches of Coxsackie and Coeymans, N. Y. In 1798 he went, by appointment of the General Synod, on a tour of missionary exploration among the settlements on the frontier of New York and on the Susquehanna; and in 1809 made a similar tour among the churches of his denomination in Canada. He removed to the large and important Church of Kinderhook, N. Y., in 1807, of which he was pastor until 1835. Here, with a territory which now contains five or six congregations that are offshoots of the still vigorous mother Church, he labored with un-
SICKSA

as a remedy (see Cohn, De Medicina Talmud. [Vatikan-
lar., 1846]); of no account is Goldmann, Disc. de Rei-
Med. V. 7 [Hild 1845]). In general, see Wedel, Ezech-
Schmidt, Bibl. Medicus (Zullichau, 1743); Reinhardt,
Bibelbildwissenschaften (Frankf. und Leipzig. 1767, 3 vols. 8vo);

g. u. Relig. [Gera, 1784], ii. 57 sq.; iii. 124 sq.; iv.
73 sq.]; Shapley, Short Exposition of Diseases in the
Sacred Writings (Lond. 1834). See DISEASE; MED-
ICINE.

SICKSA, in Slavic mythology, was a mocking sylvan sprit who possessed the power of assuming any form, but delighted particularly in those shapes which involved the extreme of startling oddity.

SICYON, in Greek mythology, was a son of Marca-
tron, Meion, Erechtheus, or Pelops, and the husband of Xeriphip, daughter of king Lamandos of Sicyon. The town was named Mecone or Egealos, but is said to have received its subsequent name from him (see Pausan. ii, 1, i; vii, 2, 3; Strabo, viii, 382).

SICIYON (Σίκυων), a city mentioned with several others [see Phaselis] in 1 Mac. xx, 23 as those to which the Romans sent a decree in favor of the Jews. It was on the sea, near the Dorian peninsula just outside of the Peloponnesus, which always implies a market region; and the original settlement was probably one to which the inhabi-
tants of the narrow strip of highly fertile soil between the mountains and the southern shore of the Corinthian Gulf brought their produce for exportation. The oldest name of the town on the coast (the Sicyon of the times before Alexander) was said to have been Agyalos, or Agyaloi. This was perhaps the common native name, and Sicyon that given to it by the Phoenician traders, which would not unnaturally extrude the other as the place acquired commercial importance. It is this Sicy-
on, on the shore, which was the seat of the government of the Orthogridas, to which the Clazomaeans celebrated by Herodotus (v, 67) belonged. The commercial con-
nection of the Sicyon of the Orthogridas with Phoenicia is shown by the quantity of Tartessian brass in the treasury of the Orthogridas Myron at Olympia. The Phoenician (or Corinthian) treasury was next to it. Another Sicyon was at the mouth of the river Afram near Corinth, also called by the Greeks Sicyon. But a book of Maccabees is a more recent city, built on the site which served as an acropolis to the old one, and was distant from the shore from twelve to twenty stadia. Demetrius Poliorcetes, in B.C. 303, surprised the gar-
risson which Ptolemy had five years before placed there to defend the city. In B.C. 189, Sicyon joined the lower town. The acropolis was surrendered to him; and he then persuaded the population, whom he re-
stored to independence, to destroy the whole of the buildings adjacent to the harbor and remove thither, the site being one much more easily defensible, especially against any enemy who might attack from the sea. Diodorus describes the new town as including a large space so surrounded on every side by precipices as to be unapproachable by the machines which at that time were employed in sieges, and as possessing the great advantage of a plentiful supply of water within its cir-
cuits. Modern travel completely destroys his account.

Mr. Clark, who in 1857 descended upon Sicyon from "a ridge of hills running east and west, and commanding a splendid prospect of both the Corinthian and Saronic gulfs and the isthmus between," after two hours and a half of riding from the highest point, came to a ruined bridge, probably ancient, at the bottom of a ravine, and then ascended the right bank by a steep path. Along and up the crest of this hill he traced fragments of the western wall of Sicyon. The mountain which he had descended did not fall towards the sea in a continuous slope, but presented a succession of abrupt descents and level ter-
races, severed at intervals by deep rents and gorges, down which the mountain-torrents make their way to the sea, spreading alluvium over the plain, about two miles in breadth, which lies between the lower cliffs and the shore. "Between two such gorges, on a smooth expanse of table-land overlooking the plain," stood the city of Demetrius. "On every side are abrupt cliffs, and even at the southern extremity there is a lucky transverse rent separating this from the next plateau. The ancient city may be described as lying along the edge of the cliffs on all sides." It is easy to conceive how these advantages of position must at once have fixed the attention of the great engineer of antiquity—
the besieger.

Demetrius established the forms of republican gov-
ernment in his new city, but rejected the convention which had by that time become an impossibility in Hellas. In the next half century a number of tyrants succeeded one another, maintaining themselves by the aid of mercen-
caries, and by temporizing with the rival sovereigns, who each endeavored to secure the hegemony of the Greek race. This state of things received a tem-
porary check by the efforts of Aratus, himself a native of Sicyon, of which his father Clistias for a time be-
came dyntar. In his twentieth year, being at the time in exile, he contrived to recover possession of the city and to unite it with the Achaeans league. This was in B.C. 251, and it appears that at this time the needs of the new community of Sicyon led to the addition of the town to a confederation of Achaeans a matter of remark. For the half century before the foundation of the new city, Sicyon had favored the anti-
Lacedaemonian party in Peloponnesus, taking active part with the Messenians and Argives in support of Mega-
lopolis, which Epaminondas had founded as a counter-
check to Sparta.

The Sicyonian territory is described as one of singular
fertility, which was probably increased by artificial 
irrigation. In the changeful times which preceded the final absorption of European Hellas by the Romans it was subject to plague by any party who had the con

But very soon after this Roman influence began to pre-
vail in the cities of the Achaeas league, which were in-
igated by dread of Nabis, the dyntar of Lacedaemon, to
seek Roman protection. One congress of the league
was held at Sicyon under the presidency of the Romans
in B.C. 152, in which Corinth and Mysia had a voice later.
From this time Sicyon always appears to have ad-
hered to the Roman side, and on the destruction of
Corinth by Mummium (B.C. 146) was rewarded by the
victors not only with a large portion of the Corinthian
domain, but with the management of the Isthmian
games. This distinction was again lost when Julius
Cesar refounded Corinth and made it a Roman colony;
but in the meanwhile Sicyon enjoyed for a century all
the advantages of an entrepôt which had before accu-
rated to Corinth from her position between the two seas.
Even in the days of the Antonines the pleasure-gounds
(προμηχανία) of the Sicyonian tyrant Cleon continued ap-
propriated to the Roman governor, until a point was reached at the time to which reference is made in the Maccabees it was probably the most important position of all over
which the Romans exercised influence in Greece (Di-
odorus Siculus, xx, 70; xx, 37, 102; Polybius, ii, 43;
Strabo, viii, 7, 25; Livy, xxxiii, 16, 19; xxxv, 25; Pausan. ii, 14, 9; vi, 10, 1-6; x, 11, 1). See Clark, Peloponnesus, p. 388 sq.; Smith, Dict. of Class. Geo-

SICYONIA, in Greek mythology was, i, an appla-
vative of Venus, derived from her temple at Sicyon, where she was represented in a statue of gold and
ivory—apparently the famous Venus Victrix, since, according to Pausanias, it held in its hand an apple; 2, a surname of Minerva, to whom Epeus erected a temple after his victory over the Thebans.

Sida, in Grecian mythology, was the wife of Orion, who was banished by Juno to Hades because she pretended to be more beautiful than the goddess (Apollod. i, 4, 5).

Siddim, Vale of (Heb. *Emek ha-Siddim*; Sept. ἡ ἡγαρή ἡ ἀλοκή, and *κολάς* ἡ ἀλοκή; Vulg. *Vallis Silvestris*), a place mentioned in Gen. xiv, 3, 8, 10 as the scene of the encounter between Chedorlaomer and the five confederate kings of the plain of Shinar. Following the above, in a subsequent and archeological information on this subject.

1. The Name.—The word Siddim appears to be from the root *ṣaddā, sāddā*, "to be straight or level.

The singular *ṣaddā* or *ḥāẓadā* would thus signify "a level field," and the phrase Emeq Siddim (אֵםֶק סִדִּים), "the valley of fields.

Prof. Stanley conjectures (Sin. and Pal.) that Siddim is connected with *ḥāẓadā* sādā, "a field," and that the signification of the name was thus directly the "valley of the fields," so called from the high state of cultivation in which it was maintained before the destruction of Sodom and the other cities. Gessenius expresses his conviction (by inference from the Arabic *sād*, "a field") that the real meaning of the words Emeq ha-Siddim is "a plain cut up by stone channels which render it difficult of transit;" and this agree Fürst (Handb. ii, 411 b) and Kalisch (Genes., p. 355). Perhaps more accurately the word may in this sense be derived from *ḥāẓadā, sādā*, "to harrow." See Kalisch, loc cit., who, however, disapproves of such a derivation, and adheres to that of Gessenius.

The following are the equivalents of the name given in the ancient versions: Samar. *בְּמַעַן סִידִּים;* Onkelos, *טְפַלָּה בָּאָדָם;* Saadias, *מֶרֶד אָבָלָא;* Peshi. *עֵּמֶק סִידִּים;* Aquila, *κολάς τῶν πετρίδων;* Symm. and Theod., *κολάς τῶν ἀλοκῶν;* Jerome (Quint. in Gen.), *Vallis Salinarum.* The authors of the Sept. probably thought the clause "which is the Salt Sea" was explanatory of the word Siddim, which they therefore rendered ἡ ἀλοκή. Or perhaps they may have read Δαμας instead of בְּמַעַן; and ἡ ἀλοκή may be an error for ἀλοκίας = ἀλάρχων, "wooded;" a view corroborated by the Vulgate, which has silvestris; and by the reading of Symmachus and Theodotion, τῶν ἀλοκῶν.

2. Topographical Indicators.—The word rendered "valley" is in Hebrew פֶּסֶל, *emeq,* which means a low or sunken tract of land. See Valley. It was probably a section of the Arabah somewhat lower than the rest; perhaps resembling the plain of Sakhah at the southern end of the Dead Sea. It was "full of bitumen-pits; or, as the Hebrew idiom expresses it, it was "wells, wells of bitumen," as *(בָּאָדָם עַל הַשָּׁמֶל)*. They are so numerous as to submerge the whole surface (Gen. xiv, 10). It was the battle-field on which the king of Sodom and his allies were vanquished. It seems probable, though, it was not stated, that Sodom and Gomorrah were situated in the vale. Be this as it may, the vale was included in the general destruction when "the Lord rained upon Sodom and upon Gomorrah brimstone and fire from the Lord in heaven" (Gen. xix, 24).

But the most remarkable fact regarding the vale of Siddim is that stated in Gen. xiv, 3, "it is the Salt Sea" (הָרָבָּן הַשָּׁם). The meaning of these words cannot be mistaken; and we have no more ground for questioning their genuineness than for questioning the genuineness of any other passage in Genesis. There is abundant evidence that the look at it now stands was the prodigy of Moses. He may have embodied in it authentic documents handed down from a remoter age, arranging and supplementing them as he deemed necessary. But his additions would be as authoritative as the documents themselves. Until we can prove from clear evidence that the clause was interpolated by an uninspired writer, we must regard it as an integral part of the Mosaic record, and we must believe that the vale of Siddim was submerged.

3. Probable Identification.—If we understand, therefore, the latter clause of ver. 3 to designate a part of what was afterwards known as the "Salt Sea," then we must agree with Dr. Robinson and others in identifying the Valley of Siddim with the enclosed plain which in deserts between the south end of the lake and the range of heights which terminate the Ghor and commence the Wady Arabah. This is a district in many respects suitable. In the ditches and drains of the Sakkah are the impassable channels of Gessenius. In the thickly wooded Ghor es-Sâdah are ample conditions for the fertility of Prof. Stanley. The level aspect and formation of the plain answer fully to the idea of an *emeq.* The most careful explorations of recent travellers have not brought to light a single fact calculated to overthrow this view. On the contrary, the following results of scientific research go far to establish it. The pressures of the sea have not dumped bitumen-pits in the plains around the Dead Sea, and time could have removed the sea had they remained above water. It has been ascertained, from masses of bitumen frequently thrown to the surface, that there must be wells of bitumen in the bed of the sea towards its southern end. Traces of what appears to have been a "shower of sulphur" have been discovered recently on the south-west shore; and with it are layers and lumps of bitumen calcined by heat. The section of the Dead Sea south of el-Lisân has been found to be very shallow—only a few feet, and in places only a few inches of water covering a flat, slimy plain—whereas the whole northern section is a deep and plainer formed basin. These facts do not appear to limit that section of the Dead Sea which is south of the peninsula covers the region which was called in Lot's time the "vale of Siddim." Josephus states this view emphatically. His words (Ant. i, 9) are, "They encamped in the valley called the Wells of Asphalt; for at that time there were wells in that spot; but now that the city of the Sodomites has disappeared, that valley has become a lake which is called Asphaltites." See also Strabo, xvi, 764. See Salt Sea; Sodom.

Si'dā (Σίδα, Vulg. Valis), a city on the coast of Pamphylia, 34 miles long, 31° 27', ten or twelve miles to the east of the river Erymanth. It is mentioned in 1 Mac. xx, 23 among the list of places to which the Roman senate sent letters in favor of the Jews. See Phasaelis. It was a colony of Cumans.

In the time of Strabo a temple of Athenae stood there, and the name of the goddess associated with Apollo appears in an inscription of undoubtedly late times found on the spot by Admiral Beaufort. It is now called Eskdy Adalies. Side was closely connected with Aradus in Phoenicia by commerce, even if there was not a considerable Phoenician element in the population; for not only are the towns placed in juxtaposition in the passage of the Maccabees quoted above, but Antiochus's embassy to the Achaean league (Livy, xxxv, 48), when boasting of his master's navy, told his hearers that the left division was made up of men of Side and of Aradus. As the right was those of Tyre and of Sidon, "quae gentes nulique uncam nee arte nec virtute navali sequuntur." The name of the city was given by the inhabitants as that of Sidon, and that it (as well as the Side on the southern coast of the Euxine [Strabo, xii, 3]) was originally a Phoenician settlement, and that the Cymean colony was something subsequent. In the times in which Side appears in history it had become one of considerable importance. It was the station of Antiochus's navy on the eve of the battle with the Rhodian...
Sideromancy (σιδηρομαντία, σιδηρομαντία), a mode of divination anciently practised by placing straws on red-hot iron, and drawing inferences as to the will of the gods from the manner of their burning. See Divination.

Sidemen (properly συνόδος·men; also called quest-
men). It was usual for bishops in their visitations to summon some credible persons out of every parish, whom they examined on oath concerning the condition of the Church. Afterwards, these persons became standing officers, especially in the great cities; and when personal visitations were a little disused, and when it became the custom for the parishioners to repair the body of the church (about the 15th century), these officers were still more necessary. They are chosen every year, according to the customs of the place, and their business is to assist the churchwardens in things relating to the church, and to make presentment of such matters as are punishable by the ecclesiastical laws. Hence they are called questmen. The whole office now generally devolves upon the churchwardens. Sidemenes and stichemenes were old English terms for sidesmen.

Sidigrani, in Norse mythology, was a surname of Odin.

Sidha, in Hindû mythology, designates a large class of good and strikingly beautiful genii. The latter quality is indicated by the name.

Sidharta, the name of Gotama (q. v.) before he became a Buddha. For interesting traditions concerning Sidharta, see Hardy, Eastern Monachism, p. 5, 87, 371, 925.

Sidhoete, in Norse mythology, was a surname of Odin, derived from a hat descending low over the forehead, in which he was accustomed to conceal his face when associating with men.

Sidney, Mary, Countess of Pembroke, was the sister of Sir Philip Sidney, and married Henry, Earl of Pembroke, in 1576. She died in London, Sept. 25, 1601. The countess possessed a talent for poetical composition, and translated from the Hebrew many of the Psalms, said to be preserved in the library at Wilton, and in this was assisted by her brother. She also translated (from the French of P. Mornay) and published A Discourse of Life and Death (Wilton, 1590; Lond. 1600, 12mo). She wrote an Essay on her brother:—A Pastoral Dialogue in Praise of Astroph (i.e. seen Elizabeth [1607?]) — and a poem, Our Savoir's Passion (Sloanean MS. No. 1303, British Museum).

Sid'ôn (Σιδών), the Greek form of two Esdr. i, 11; Judith ii, 28; 1 Macc. v, 15; Matt. xi, 21, 22; xv, 21; Mark iii, 8; vii, 24, 31; Luke iv, 26; vi, 17; x, 15; Acts xii, 20; xxxviii, 3) of the city called in the Heb. (but in the A. V. "Sidon," also in Gen. x, 19, 19) Zidon (q. v.), or rather Thidon.

Sid'ônián (Σιδωνιαν), the Greek form of the gentile Zidonian (q. v.), usually so exhibited in the A. V. of the Old Test. (Deut. iii, 9; Josh. xiii, 4; Judg. iii, 3; 1 Kings vi, 6).

Sidonius, Cæsarius Sollius, Apollinaris Modestus, a learned ecclesiastic, was born probably in Lyons about 431. He was educated with care, and became very skilful in all parts of literature, especially in poetry. He married Faustina, the daughter of Avitus, and afterwards emperor. When the city of Lyons was taken by Majorian, the latter treated Sidonius with great consideration, and in return for his lenient treatment he wrote a poem in honor of Majorian, by whom he was created a count and sent to govern the Gallic province of Arles. He also erected a column to the genius of the city of Rome. In 467 he went to Rome as ambassador of the Arverni, and so pleased the reigning emperor, Anthemius, by a panegyric on him, as to be made governor of the city and honored with a second statue. In 472 he was chosen bishop of Clermont (Avernium), and though of a layman, fulfilled his duties with great erudition and piety. He died in 487. Of his works, nine books of Epistles, with about twenty-four poems interspersed, are still extant. They were published in Milan (1498) and Paris (1614); republished by Lugli in 1652 (the best edition).
SIDONIUS

Michael, a prelate of the Church of Rome who became noteworthy through his participation in many of the most important transactions connected with the Reformation, but whose family name was Helding, was born in Baden in 1506, studied at Tubingen, and entered the priesthood at Mayence, where he became cathedral preacher and rector of the cathedral school. In 1531, 1538 he was made suffragan to the archbishop of Mayence, and received from pope Paul III the title of bishop of Sidon in partibus infidelium, which gave him the name of Sidonius, by which he is commonly known. The Theological Faculty of Mayence conferred the degree of D.D. on him in 1548, and afterwards for a time represented the elector of Mayence in the diet of Trent. In 1547 he was made imperial councillor by Charles V. He took possession of the pulpit of the reformer Musculus during the Diet of Augsburg, and from it preached a series of anti-Lutheran sermons (Sleidanis de Statu Rel. etc. [Frankf. 1796]). In 1549 he served with Jul. v. Pflug, bishop of Naumburg, and with Job, Agricola, the court preacher at Eisleben, on the commission which drew up the Augsburg Interim (q.v.), after which he was sent by his archbishop to promote the execution of the Interim at Frankfort. Prince George of Anhalt was at this time conductor of the bishopric of Merseburg, having been chosen by a majority of the canons; but the emperor declared against him and nominated Sidonius in his stead (Seckendorf, Comment. de Lutheranismo [Lips. 1694], lib. iii. c. 30, § 117, p. 497 sq.), though the opposition raised against the measure delayed his investiture until 1550. In that year Sidonius was present at the Diet of Augsburg in 1556 at that of Tegernsee, in 1557 at the Colloquy of Worms, where he contributed according to his ability to render reconciliation impossible by his addresses, and by introducing at the sixth session a rejoinder to a declaration of facts submitted by the Protestants, in which he not only defended the traditional teachings and practice of the Church, but also contended that the interpretation of difficult and controverted passages of Scripture belongs rightfully to the Romish Church. The Romish collectors finally refused to continue the negotiations (Salig, Vollat. Hist. d. Augs. Conf. [Halle, 1735], iii. 292 sq.). To the honors already enjoyed by Sidonius was added by the emperor in 1557 with the title of Cardinal and Sept. 26, 1561, at Vienna, and was buried in St. Stephen's Church. His writings include a Catechismus Mogunt. s. Institut. ad Christ. Pietatem (frequently reprinted and much controverted by Protestants)—the Sleidanis de Statu Rel. already mentioned.—Decreta Concil. General. Moguntini ad litter. ecclesiast. Explicationem, ac Missae. See Unschuld. Nachrichten, 1715, p. 394 sq.; 1716, p. 7 sq.

SIEBELS, Carl Gottfried, a German theologian, was born in 1769 at Naumburg. After he completed his philosophical studies he was called in 1788 as rector to Zeira, and in 1804 as rector to Bautzen, where he died in 1845. He wrote, Disputationes quaestiones quidam Ostentandae in V. Grecorum et Romanorum Doctrinae Religionis ac Morum Plurima esse, qua cum Christianism Conscientia (Lips. 1837);—Additamenta ad Disputationes Quinque, etc. (ibid. 1842).—Die Bibel die beste Grundlage der Kinderziehung (Zittau, 1818). See Zachold, Bibl. Theol. ii, 1326; Regend. Conversationes. s. v. (H. P.)

SIEGE (some form of *Hll, toirt, to press in a hostile manner). The Egyptian and Assyrian monuments describe the taking of capitallies by thebes, e.g. Wilkins, Anc. Egypt. i, 367 sq.; Layard, Nineveh, ii, 281 sq.). See WAT.

SIENA, COUNCIL of (Concilium Senense), was held first at Pavia, and subsequently translated to Sienna (a central province of Italy, in Tuscany), June 22, 1423. This council lasted till Feb. 29, 1424, and many sessions were held. Among the acts is a decree against the heresies previously condemned at Constance, and against all aiding and abetting the Wyolffites and Hussites. Incongruence was granted to the pope and the cardinals. The question of a reunion with the Greek Church was also debated, and its further consideration postponed. It was determined that everything relating to the reformation of the Church should be referred to the council about to be held at Basle. See Mansi, xii, 965.

SIEVA, in Slavic mythology, was the goddess of love. She was the wife of Sibog, the parent of marriage, and was highly venerated by all lovers. The reports sometimes mentioned concerning beautiful paintings in which the Wendish artists had represented this deity are fabulous.

SIEVE oder, kebaradah, Amos ix, 9; ; mna, naphath, a winnowing sim, Isa. xxx, 28; as if is mna, mua, or , to warre [as often rendered], or throw up into the air for winnowing; aviaiz., Luke xxii, 31). Among the ancient Egyptians sieves were often made of string, but some of an inferior quality, and for coarse work, were constructed of small thin rushes or reeds (very similar to those used by the Egyptians for writing, and the principal materials of the reed tables of the Egyptian men of which kind of sieve is in the Paris Museum. The paintings also represent them made of the same materials; and the first they used were evidently of this humble quality, since the hieroglyphic indicating a sieve is borrowed from them. Horse-hair sieves are also described up to the Greeks; the Spaniards, he says, made them of string, and the Egyptians of papyrus stalks and rushes. See Wilkinson, Anc. Egypt, ii, 95.

SIEVEKING, Amalia, the founder and long the head of the woman's union for the care of the poor and the sick of the city of Hamburg, belonged to one of the most respected senatorial families of that city, and was born in 1794. She lost her parents at an early age, and was received into the home of an elderly relative of her mother, where she began, when scarce seventeen years of age, to display the qualities which stumped her a born deaconess. Her earliest efforts were expended on an uninstructed girl living in the same house with herself, and five other girls were soon added to her school. She devoted three hours a day to instruction in elementary subjects, omitting nothing by region, which she did not at the time either possess or understand. Kempis's Imitation of Christ first directed her thoughts towards the Bible, and A. H. Francke's Manuskript zu Lectionein Script. Sac. (q.) taught her to find the sense of Scripture by comparing its parts together, and to use the Bible also to translate her own experience, through prayer and personal application. She claims, accordingly, that her faith was grounded on no human authority whatever, but solely on that of the Lord. The doctrine of the atonement continued to trouble her, however, until an enlightened Bible student, who had been the school friend of her early-deceased brother, was able to relieve her doubts. Religion was now given a prominent place in her curriculum, and a weekly "Bible-hour" was added to her labors, for the benefit of such as had by confirmation been removed from school into the walks of common life. These Bible—hours yielded fruit also for a wider circle through a publication issued in 1822, and entitled Betrachtungen ub. einzelne Thesie d. heil. Schrift, upon which followed, in 1827, Beschäftigungsnig mit d. heil. Schrift, and in 1845 Unterhaltungen ub. einzelne Abschnitte d. heil. Schrift). These schools for girls were continued, with rare interruptions, up to the last year of all; the sixth class being admitted in 1854; and it became a desirable thing in the eyes of her neighbors, even when they differed from her in religious opinion, to have their children placed under her care.

The disposition to give and help in every way was too strong in Amalia's nature to be confined within the limits of her school. She thought at first of organizing
an evangelical sisterhood after the pattern of the Roman
ish orders. Her way was made clear, however, by the
first results of the visit of cholera epidemic in Europe in
the summer of 1831, when she offered her services to the
cholera hospital, which were accepted. She was last
placed over the entire corps of male and female nurses.
The experience so gained was practically utilized after-
wards in the forming of a women's society for the relief
of the poor and sick instead of the sisterhood. It was
composed of women belonging to the middle and higher classes of society, at first thirteen in number (1832), and was placed under stringent rules of
administration. Direct visitation was made a duty, cer-
certain families being assigned to a number of mem-
ers, who were required to visit in succession and record
the state of health of those provided for that pur-
puse. No case of chronic poverty was received, and the
most careful inquiries were made with reference to ap-
plicants for aid, covering the business, number of per-
sons in the family, their age and sex, attendance on
schools, the home, and its appearance as to neatness and
order. A weekly meeting was held in which the claim
of such applicants to admission was discussed, and at
which they were placed under the care of certain mem-
bers if received. It was also a principle never to visit
the poor empty-handed, but never to give them money,
orders on tradesmen or provisions in kind being prefer-
red; and if the family was not the occasion of the suf-
ferring, the effort was made to secure employment. The
union even erected a number of manufactories itself,
and had them managed under its control, for the pur-
pose of affording employment to the poor; and its re-
ports show that this part of its business was not con-
ducted at a loss. Nor was the spiritual welfare of its
clients neglected. Every visitor was expected to use
all proper effort to secure the moral and religious
improvement of the persons under her care, no less than
to minister to their temporal needs. The workings of
this union caused its fame to spread, not simply through-
out an appreciative city, but over wide areas, so that
when a terrible conflagration visited Hamburg in 1842,
contributions from women's unions in numerous German
cities, all of which called themselves daughters of the
union of Hamburg, were forwarded to the parent society
for its use. Amalia Sieveking's life-work was thus
fully realized, and crowned with blessing beyond all her
expectations. The last two years of her life were
shadowed by pulmonary troubles, which destroyed her
strength and compelled her gradual withdrawal from
the work whose supervision had become to her a second
nature. She died April 1, 1850. For her life, see Denk-
würdigkeiten aus d. Leben von Amalia Sieveking, etc.
(The results of her work still continue to educe a spirit of
benevolence and a desire for the work of healing that was
in her mind and her efforts.)

Sif, in Norse mythology, was the beautiful sec-
ond wife of Thor, celebrated on account of her won-
derful blonde hair, which the evil Loki cut off on
one occasion while she slept. Thor compelled him,
peril of his life, to procure golden hair for Sif in- stead of that which he had stolen, and Loki obtained
it from the dwarfs. Sif had been previously married,
and had a son, but was given to a second husband,
by her were named Thrud and Lorrile. Sif would
appear to have been the most virtuous of the asins,
for when Loki, at Aegir's banquet, charged upon the
women and virgins their numerous loves, he spared
Sif such exposure. She handed him a cup while
three, and gave for her forbearance upon the assump-
tion that she must concede to her an eminence above
all others, since she had possessed only one lover, who
was himself.

Sifra. See Siphra.

Sifridenses. See Siccidenciae.

Siga, the name of an alleged Phoecian goddess who
has been likened to Minerva.

Sigalon, Xavier, a French painter, was born at
Uzès (Gard) in 1788, of parents in humble circum-
cumstances, and was educated in the school of design at
Nîmes. He painted chiefly sacred subjects, especially
in the Last Judgement, a copy of Michael Angelo's in
Lourdes which made his fortune. He died of the cholera at
Rome, Aug. 18, 1837. See Hoefer, Nouv. Biog. Géné-
rale, s. v.

Sigaraboomer, in Norse mythology, was an island
in the north on which a battle was fought that brought
forty-six heroes to their graves, and in which their
swords are buried. The walkare Svava brought the
most famous of the swords to her lover Helgi, who was
under her protection.

Sigarvoellur, in Norse mythology, was the place
where the battle was fought between Helgi and Hród-
mar. Helgi, Hattingskaldre fell mortally wounded, and
expired in the arms of his beloved Svava, the walkare.
Sigarvoellur was subsequently given by Sigmund Wald
ungssohn to Helgi Hundingstôtter, his son, in honor of his
name.

Sigeoet of Gembolux (Gembolus), a Belgian
monk, was born about A.D. 1030, and educated in
the convent of Gembolux, where he also became a monk.
About A.D. 1048 he assumed charge of the school at-
tached to the convent of St. Vincent at Metz, but re-
turned to Gembolux, after a successful career, about
1070, and continued during forty additional years to
labour in the work of teaching and authorship, being gen-
erally admired and revered. He was characterized by
frankness and piety, gifted with a sound judgment, so
that he was fitted to administer in secular affairs, and
was decidedly true to principle. It was because of his
influence that the Church of Liege remained loyal to
the emperor, despite the efforts put forth by certain ab-
bots to subject it to the pope alone. The celebrated
letter written by Gregory VII to bishop Hermann of
Metz, which asserted the right of the pope to place a
sovereign under the ban and dissolve the allegiance of
his subjects, was answered by Sigebert, and so also was
the demand of Paschal II, made in 1102 or 1103, that
count Robert of Flanders should head a crusade to pun-
ish the Church of Liege for its fidelity to the sovereign.
With like good judgment he resisted the imposing of
the yoke of asceticism on the entire Church, though he
himself was predisposed in favor of a monastic life.
His fearless attitude with reference to such questions pro-
duced a strong prejudice against him in the minds of his contempo-
rary historians. He died Oct. 5, 1112.

The works of Sigeoet are enumerated by himself in
the work De Viris Illustribus (best ed. in Mirai Bibli-
oth. Eccle. ed. ii, cur. J. A. Fabricio), a book whose only value
now consists in the preservation of a few interesting
facts which illustrate the times. The only part of the
earl y work commemorating the founder of the abbey
of St. Vincent at Metz, gives evidence of the author's ex-
tensive reading. He also wrote a life of King Sigeoet,
the founder of the church and abbey of St. Martin, near
Metz, and a number of saints' legends in either prose
or verse, particularly a life of Wiberti, the founder of
Gembolux, and a history of the convent to 1048; and
he gave attention to music and chronology. His last
and most celebrated work is the Chronicon, extend-
ing from A.D. 381 to 1111, but being a mere compilation
from other works down to 1025, after which date it pos-
sesses, to some degree, the character of an independent
source. Its selections from other chroniclers are judic-
ious, the treatment of facts cautious, moderate, and impartial,
and the whole is characterized by something of the
historic spirit. The work became in time the principal
source of information with reference to the churches and
abbes of Belgium and Northern France. The charge
that Sigeoet had invented the legend of St. Joan of
Joan is now disbelieved, and Bethmann, in the Monu-
menta Germ., SS., omits it from his collection of Sige-
bert's works. See the Monumenta Germ., SS., passim:
Hirsch, De Vita et Scriptis Sigeoberti (Berol. 1841):
Wattenbach, Deutsclia's Geschichtsquellen (Berl. 1858).
him to the support of the Formula of Concord (q. v.) by securing his signature to a declaration approving of that standard, and of the existing organization in churches and schools. His wife, Anna, a daughter of duke Albert of Prussia and Maria Eleonore of Cleve, was a rigid Lutheran, and exercised all her influence to prevent a change in his Church relations; and the temerity of many of his subjects in Brandenburg and the district of Prussia which he held as a fief from Poland threatened to render such a step productive of grave complications. To these influences must be added the certainty that many neighboring princes would withdraw their favor. Sigismund, nevertheless, took that step, and partook of the Lord's supper under the Reformed ritual, for the first time, on Christmas-day of 1618. Even his most embittered enemies never charged secular or political motives on him for this action, though a later generation adopted that explanation (Schröckh). He had been prejudiced against the Formula of Concord from the beginning, and had already, in 1610, issued statutes to the University of Frankfort, in which subscription to the Formula was not required. An immense excitement was caused. The elector of Saxony wrote, under date of Feb. 1, 1614, to dissuade Sigismund from completing the transfer; and on the 24th of the same month the latter was compelled to issue an edict forbidding the clergy to inveigh against his measures in the pulpit. The estates of Brandenburg demanded the continuation of the prerogatives enjoyed by the Lutheran Church, and the disuse of all measures intended to favor the Reformed. The difficulty was finally composed by the action of the elector, who (Feb. 5, 1615) engaged that the Lutherans should continue to enjoy liberty of conscience and to exercise the right of patronage where legally entitled thereto; but insured like privileges to their Reformed opponents. A colloquium of clergymen was held at Berlin in October, 1614, where the resolution was reached that defamation of the Reformed party should thereafter be avoided. The result of the whole
SIGNARINGEN

SIGNET

Sigmaringen, FIDUSUS OF, properly MARCH RE, A Capuchin monk, was born at Sigmaringen in 1577, and educated at Freiburg. He was sent as a missionary to the Grisons, by whom he was murdered at Senis, April 24, 1622. He was canonized by Benedict XIV in 1746. See Hoefer, Nouv. Bioe. Générales, s.v.

Sigmund Wolfingsohn, in Norse mythology, was a celebrated hero who was in a fight and prayed against death and was drank the cup of poison intended for his brother without injury to himself. He became the father, by the beautiful Danish queen Borghild, of Helgi Hundingstöder and Sigurd Fafnirstöder.

Sign is the rendering in the A. V. of several Heb. and Gr. words, especially签, thαμ, σημάδιον, which usually denote a miraculous or, at least, divine or extraordinary token of an event, generally in the future. See MIRACLE. In Biblical language a sign is a token, or whatever serves to express or represent another thing. Thus the Lord gave to Noah the rainbow as a sign of his covenant (Gen. ix. 12, 13), and for the same purpose he appointed circumcision to Abraham (xvii, 11; see also Exod. iii, 12; Judg. vi, 17). In comparison with this the word in Luke (xxi, 26), "Behold, I and the children whom the Lord hath given me are signs for signs and for wonders in Israel," is certainly a dispensation from the usual rules of expression of the Hebrews. See also Ezek. iv, 3. Signs and wonders, as they are usually connected, sometimes denote those proofs or demonstrations of power and authority which were furnished by miracles, and by other tokens of the divine presence (John iv, 46; Matt. xii, 38; Acts ii, 22); sometimes those unusual appearances which betokened the approach of great events (Luke xxi, 11, 25), and at other times tokens or pledges as evidences of fulfilment (ii, 12; I Cor. i, 22). This word is emphatically used in Scripture for a miraculous appearance, which would attest the divine authority of a prophet or teacher. The Jews asked our Lord for "a sign from heaven" (Matt. xvi, 1), meaning, thereby, the appearance of the Messiah coming in the clouds of heaven, which Daniel had foretold (vii, 13), and which "the traditions of the elders," as appears from the Talmud, had declared to be the only certain sign of the advent of the promised inheritor of David's throne and deliverer of the Jewish nation. So our Lord refers to "the sign of the Son of man" (Matt. xxiv, 30), as prefigured by the national overthrow of the Jews (see Zettner, De Astro Judaeis quamvis Ominoso [Alt. 1724], and the monographs cited by Hase, Leben Jesu, p. 187). See ESCHATOLOGY.

Sign, a term used in defining a sacrament to describe the relation existing between an external ordinance and that which it represents. The former is called the "outward part, or sign," the latter the "inward part, or thing signified." See Signs.

SIGN OF THE CROSS, see CROSS, SIGN OF; SIGNUM CRUCIS.

Sige, a daughter of queen Bera of Zealand. Hagbart of Drohtheim, the bold son of Hake and a celebrated viking, came to Zealand with the intention of challenging the queen's son, Alf and Alger, to single combat in order to measure strength with them. He saw and loved Sige, but her cruel mother hated him and prevented their union. Alf fell in the duel, and Hagbart recklessly suffered himself to be made a prisoner, because he trusted in his strength, but a look of Sige's had bound him fast. He was soon doomed to death, and the archers were prepared to execute the queen's decree, when the victim took his own life. Sige was rescued from her blazing dwelling by her brother Alger, but only in order to die beside the corpse of her lover, for she had taken poison. Comp. Ehenschilder's touching tragedy, in which he has elaborated this material, entitled Hagbart og Sige.

Signet is the rendering in the A. V. of 法, chothôn (Gen. xxxviii, 18; Exod. xxvii, 11, 21, 36; xxxix, 6, 14, 30; Jer. xxiv, 24; Hag. ii, 23), or chothô, chothômet (fem. of the same, only in Gen. xxxvi, 25), a seal, as elsewhere rendered; and of the Chal. א, א, the same (Dan. vi, 17 [18]); both so called from being engraved; also of σφραγις, Tob. i, 22; Esclus. xvii, 22; xxxi, 6; xlix, 11; Bel xi; 1 Maced. vi, 15, a seal, as elsewhere rendered.

The importance attached to seals in the East is so great that without one no document is regarded as authentic (Lee, Bible in the East, p. 56; Neum. in A. K. v, 454). The use of some method of sealing is obviously, therefore, of remote antiquity. Among such methods used in Egypt at a very early period were engraved stones, pierced through their length and hung by a string or chain from the arm or neck, or set in rings for the finger. The most ancient form used for this purpose was the scarabaeus, formed of precious or common stone, or even of blue pottery or porcelain, on the flat side of which the inscription or device was engraved. Cylinder of stone or pottery bearing devices were also used as siglets. One in the Ashmolean Museum bears the date of Oarašen I, or between 2900 and 2700 B.C. Besides finger-rings used by Egyptians, and also the Assyrians and Babylonians, made use of cylinders of precious stone or terra-cotta, which were probably set in a frame and rolled over the document which was to be sealed. The document, especially among the two latter nations, was itself often made of baked clay, sealed while it was wet and burned afterwards. But in many cases the seal consisted of a lump of clay, impressed with the seal and attached to the document, whether of papyrus or other material, by strings. These clay seals often bear the impress of the finger, and also the remains of the strings by which they were fastened. One such found at Nimrud was the challenge of Sarseko, king of Egypt, B.C. 711, and another is believed by Mr. Layard to have been the seal of Sennacherib, of nearly the same date (Birch, Hist. of Poetry, i, 101, 118; Wilkinson, Anc. Egypt. ii, 341, 364; Layard, Nin. and Bab. p. 154-160). In a somewhat similar manner doors of tombs or other places were closed with a seal intended to prevent the wish from being broken by any unwarranted hand. The custom prevalent among the Babylonians of carrying seals is mentioned by Herodotus, i, 195, who also notices the seals on tombs, i, 121; Wilkinson, i, 15; ii, 364; Matt. xvii, 66; Dan. vi, 17. The use of clay in sealing is noticed in the book of Job xxxvi, 14, and the signet-ring as an ordinary part of a man's equipment in the case of Judah (Gen. xxxviii, 18), who probably, like
many modern Arabs, wore it suspended by a string from his neck or arm. (See Cant. viii, 6; Genesis, p. 598; 1140; Robinson, i, 36; Niebuhr, Descr. de l'Arab. p. 90; Chardin, loc. cit.; Olearius, Travels, p. 317; Knobel, on Gen. xxxviii, in Exeg. Handb.) The ring or the seal as an emblem of authority, in Egypt, Persia, and elsewhere, is mentioned in the cases of Pharaoh with Joseph, Gen. xiii, 42; of Ahah, 1 Kings xxviii, 8; of Abas- 
"erus, Esth. iii, 10, 12; viii, 2; of Darius, Dan. loc. cit.; also I Macc. vi, 15; Josephus, Antiq. xx, 2, 2; Herodotus, iii, 128; Curtius, iii, 6, 7; x, 5, 4; Sanchys, Travels, p. 62; Chardin, ii, 291; v, 451, 462; and as an evidence of a 
"ovenant in Jer. xxxvii, 10, 34; Neh. ix, 35; x, 1; Hag. ii, 29. Its general importance is denoted by the meta-
"porical use of the word (Rev. v, 1; ix, 4). Rings with 
seals are mentioned in the Mishnas (Shabb. vi, 3), and earth or clay as used for seals of bags (viii, 5). Seals of four sorts, used in the Temple, as well as special guar-
dians of them, are mentioned in Shekuel. v, 1.

Among modern Orientals the size and place of the 
seal vary according to the importance both of the send-
er of a letter and of the person to whom it is sent. In 
sealing, the seal itself, not the paper, is smeared with 
the sealing substance. Thus illiterates persons some-
times use the object nearest at hand—their own finger, 
or a stick notched for the purpose—and, drawing it with 
ink, smear the paper therewith (Chardin, v, 845; ix, 347; Arvilleux, Travels, p. 161; Rauwolf, Travels, in Ray, 
ii, 61; Niebuhr, loc. cit.; Robinson, i, 36). Engraved 
signets were in use among the Hebrews in early times, 
as is evident in the description of the high-priest's 
breastplate (Exod. xxviii, 11, 36; xxxix, 6), and the 
work of the engraver as a distinct occupation is men-
tioned in Eccles. xxxix, 27.

There seem to have been two kinds of seals in use 
among the Hebrews. A notion appears to exist that 
all ancient seals, being signets, were rings, intended to 
be worn on the hand. But this was by no means the 
case; nor is it so now in the East, where signet-rings 
are still, probably, as common as they ever were in an-
cient times. Their general use of seals was very differ-
ent from ours, as they were employed not for the 
purpose of impressing a device on wax, but in the place of 
a sign manual, to stamp the name of the owner upon 
any document to which he desired to affix it. The 
name thus impressed had the same legal validity as the 
actual signature, as is still the case in the East. This 
practice may be illustrated by a circumstance which oc-
curred in the last days of George IV. When he became 
too ill to affix his sign manual to the numerous docu-
ments which required it, a fac-simile was engraved on a 
stamp, by which it was in his presence impressed upon 
them. By this contrivance any one may give to any 
paper the legal sanction of his name, although he may 
be unable to write; and the awkward contrivance to 
which we resort in such cases, of affixing a cross or 
mark with the signature of an attesting witness, is un-
necessary. For this purpose the surface of the seal is 
smearsed with a black pigment, which leaves the figure 
of the body of the seal upon the paper, in which the 
characters appear blank or white. The characters re-
quired are often too large or too many to be convenient-
ly used in a signet-ring, in which case they are en-
graved on a seal shaped not unlike those in use among 
ourselves, which is carried in the bosom, or suspended 
from the neck over the breast. This custom was ab-
cient, and, no doubt, existed among the Hebrews (Gen. 
xxxviii, 18; Cant. vii, 6; Hag. ii, 23). These seals are 
of entirely of metal (brass, silver, or gold), but some-
times of stone set in metal. As an appendage thus 
shaped might be inconvenient from the pressure of its 
edges, the engraved stone was sometimes made to turn 
in its metal frame, like our swivel seals, so as to present 
a flat surface to the body. (See below.)

If a door or box was to be sealed, it was first fastened 
with some ligament, over which was placed some well-
compacted clay to receive the impression of the seal. 
Clay was used because it hardens in the heat which 
would dissolve wax, and this is the reason that wax is 
not used in the East. A person leaving property in the 
custody of strangers—say in one of the cells of a car-
vanserai—seals the door to prevent the place from being 
entered without legal proof of the fact. The simplicity 
of the Eastern locks, and the case with which they 
might be picked, render them poor security. Some 
seals were even ornamental and large wooden seal is employed for this purpose. There are 
distinct allusions to this custom in Job xxxviii, 14; 
Cant. iv, 12.

Signet-rings were very common, especially among 
persons of rank. They were sometimes wholly of metal, 
but often the inscription was borne by a stone set in 
silver or gold. As impression from the signet-ring of a 
monarch gave the force of a royal decree to any in-
strument to which it was affixed, so the delivery or 
transfer of it to any one gave the power of using the 
royal name, and created the highest office in the State 
(Acts. xii, 42; Esth. iii, 10, 12; viii, 2; Jer. xxxiv, 24; 
Dan. vi, 10, 13, 17; comp. I Kings xxvii, 6). Rings, being 
such much employed as seals, were called ἐπικεφαλή, 
which is derived from a root signifying to imprint, and 
also to seal. They were commonly worn as ornaments 
on the fingers—usually on the little finger of the right 
hand (Exod. xxxv, 22; Luke xvi, 22; James i, 2). Such 
rings were anciently made of silver, gold, or bronze; 
sometimes the hoop was of iron, and the signet part of 
gold. Rings were early set with gems or other stones; 
and when designed for seals or signets, the gems were 
engraved (Exod. xxxv, 22, 21). In the tombs of Egypt, 
there are several rings, ear-rings, nose-rings, pendants, 
signets, beads, necklaces, bracelets, and other ornaments, 
from the tombs of Egypt. They are of gold, silver, 
bronze, iron, electrum, cornelian, Jasper, porcelain, ivory, 
glass, emerald, etc. Some of the signets are set with 
amulets or scarabaii, and bear the prenomen of Thothmes 
III. There are finger-rings, some in open work, with 
figures of deities, etc.; and on the faces of some the prenomen of Amenophis III; on others, the name of Amen-
ra, etc. Among the Egyptian antiquities in the possession 
of Dr. Abbot, English resident physician at Cairo, is the 
well-authenticated signet-ring of Cheops It is the 
oldest article of the kind in the world, and is of fine gold, 
weighing nearly three sovereigns, and bearing the name 
of Sheshi, the S gran of 
the Cheops of the Greeks. This precious relic
of the age of the founder of the Great Pyramid is in the highest state of preservation. The style of the hieroglyphics is in perfect accordance with those in the tombs about the Great Pyramid, and all the details are minutely attended to and beautifully executed. It was found in a tomb near the pyramids of el-Gizeh. One of the largest signs seen by Wilkinson contained two rows of Horus' worth of gold. It consisted of a massive ring, half an inch in its largest diameter, bearing an oblong plinth, on which the devices were engraved, one inch long, six teuths in its greatest, and four teuths in its smallest breadth. On one face was the name of king Horus, of the eighteenth dynasty; on the second a lion, with the legend 'Son of strength,' referring to the monarch; on the third side a scorpion; and on the fourth a crocodile (Anc. Egypt. ii, 337). See SEAL.

Signet-ring of Horus. (2 is the entire ring, with its swivel; 1 is the face-side, with signature of Horus; 8 and 4 are the other sides.)

Significat was a brief name for the writ De Excommunicato Capiendo from the word at the beginning of the writ—"Significat nobis venerabiles Pater, H. L. Episcopos," etc.

Signorelli, Luca (called Luca di Cortona), an Italian painter, was born at Cortona about 1440. He was instructed first by Matteo da Siena and afterwards by Pietro della Francesca, whose style he seized so effectually that the works of the two have often been confounded. He painted many religious subjects, of which a list is given in Hoefer, Nouv. Bioîg. Générales, a. v.

Signa. 1. The great bells at Canterbury in the 12th century; one took twenty-four and another thirty-two men to sound it. 2. A most intricate system of talking with the fingers, used by the Clugnacios to indicate their wants in hall. 3. Gerbert furnishes a minute account of a similar manual telegraph made use of by the preceptors in a cloister.

Signum Crucis (sign of the cross), words used in the form for confirmation, etc. The modern form in the Roman Catholic Church is as follows: "Signo te signum crucis, et confirmo te christumatis salutis. In nomine Pa[+]ris, et Fa[+])iii, et Spiritus [+ Sancti. Amen.

Signy, in Norse mythology, was a daughter of King Wolsung, and was married against her consent to Siggnir of Gothland. She had feared that her husband would bring misfortune to her family, and her dread was realized in the murder of her father and eight of her brothers, Sigmund, the ninth brother, being rescued by her. She lived in concealment in a hut in the forest with Sigmund, and having presented herself before him in a changed form, she conceived a son, who was afterwards known as Sinfoetli, and who consequently belonged to the Wolsung race by descent from both his father and his mother. Like his father, he was immensely strong. Sigmund and Signy avenged the murder of their father in the blood of Signy's husband, and Signy then caused herself to be burned with the corpse as she had no wish to live after her revenge had been inflicted.

Signhoefundir, in Norse mythology, was one of Odin's names, signifying the originator of victory.

Sigyn (or Sigirlin), in Norse mythology, was a daughter of King Swansea of Swawaland, and the most beautiful of women. She was sought in marriage by king Herwald and also by Frostmahr, the former winning the prize through the cunning of his follower, the

Harl Irmond, who shot the harl Frammarr when the latter, weary with the duty of guarding Sigyn, which he did in the form of an eagle, had fallen asleep.

Sigrun, in Norse mythology, was a celebrated heroic maiden of the primitive time. See Swawaw.

Sigrunnur, in Norse mythology, was a surname of Odin, signifying the fortunate victor.

Sigtiror, in Norse mythology, was one of Odin's names, signifying the mighty victor.

Sigtifar (the fortunate, victorious gods), in Norse mythology, is a name given to all the Aesnas.

Sigtopir (the houses of the blessed ones), in Norse mythology, is the abode which shall be occupied by the aess who remain after the destruction of the world.

Sigtun, in Norse mythology, is the residence beside the Midael sea in the dominions of king Gyfle which Odin selected for himself. It was a temple and place of sacrifice.—Völmer, Wörterb. d. Mythol. a. v.

Sigtirur, in Norse mythology, is a surname of Odin, signifying the god of victory.

Sigiriam, in Norse mythology, was a son of Odin who was made king of Garderike (Russia) by his father. He married Heida, the daughter of a Swedish king, and became the ancestor of a famous race of heroes.

Signy, in Norse mythology, was the wife of the evil aess Loki, to whom she bore two sons, named Narve and Vale.

S'hon (Heb. Sichow', סִכָּו, Numb. xxii, 21, 23, 26, 28, 34; xxxii, 38; Deut. i. 4; ii. 24, 31, 32; iii, 2, 6; iv. 46; xxxix, 7; Josh. ii. 10; Jer. xxvii, 45), sweeping away, i.e. warrior [Gesen.], or bold [Furst]; Sept. סִכֵּו v. r. סִכָּו [Josephus, Σιχωρ], the king of the Amorites when Israel arrived on the borders of the Promised Land (Numb. xxii. 21). B.C. 1618. He was evidently a man of great courage and audacity. Shortly before the time of Israel's arrival, he had dispossessed the Moabites of a splendid territory, driving them south of the natural bulwark of the Arnon with great slaughter and the loss of a great number of captives (xxi, 26-29). When the Israelite host appears, he does not hesitate or temporize like Balak, but at once gathers his people together and attacks them. But the battle was his last. He and all his host were destroyed, and their district from Arnon to Jabbok became at once the possession of the conqueror. Josephus (Ant. iv. 5, 2) has preserved some singular details of the battle, which have not survived in the text either of the Hebrew or Sept. He represents the Amorites as containing every man in the nation fit to bear arms. He states that they were unable to fight when awared from the shelter of their cities, and that being especially galled by the slings and arrows of the Hebrews, and at last suffering severely from thirst, they rushed to the stream and to the shelter of the recesses of the ravine of the Arnon. But the Hebrews pursued them into the recesses they were pursuing by their active enemy and slaughtered in vast numbers. Whether we accept these details or not, it is plain, from the manner in which the name of Sihon fixed itself in the national mind, and the space which his image occupies in the official record and in the later poetry of Israel, that he was a truly formidable chieftain (Deut. xxxi. 4; Josh. ix. 10; xii. 5; xiii, 10, 21, 27; Judg. xi. 19, 20, 21; 1 Kings iv. 19; Neh. ix. 22; Psa. cxxxv. 11; cxxvi. 19). It is probable that a trace of the name still remains in the Jebel Shihab, a lofty and conical mountain just to the south of the Wady Mejeh.

S'hor (Josh. xiii. 3). See Shinnon.

Sikes, Henry N., a minister of the Methodist Episcopal Church, was born in Fulton County, Pa., in 1833.
He was converted in early youth, and began to preach in his nineteenth year. He united with the Baltimore Conference in 1834, and served in the regular ministerial work (with the exception of two years—1861 and 1862—when he acted as chaplain of the U.S. Penitentiary at Washington, D.C.) until his death, June 20, 1865. Mr. Sikhs was well-stocked and was unrivaled, industrious, and of unbending courage. See Minutes of Annual Conferences, 1866, p. 17.

Sikhism (a corruption of Sanscr. sikha, disciple), originally a religious sect, since grown into a nation, and inhabiting the Punjab. Their founder was Nanok (q.v.), who has been succeeded by nine pontiffs, each of whom, like himself, is popularly designated guru, or teacher. His object was to unite Hindus and Mohammedans on the basis of a pure monotheism and of human brotherhood. Sufficient proof of the comprehensive character of his scheme is afforded by the circumstance that he accepted concurrently the incarnations of Neo-Brahmanism and the mission of the Arabian prophet. Nanok's three immediate successors, while zealously protecting the interests of the infant sect, avoided secular pursuits, and held themselves aloof from political complications. Arjuna (Arjunaal), compiler of the Sikh doctrines in a volume called Adigranh, and Milkha Singh, both pupils of Nanok, the holy scribe, rendered himself conspicuous as a partisan of the rebellious prince Khusrau, son of Jahanqir. He was imprisoned by the Musulman government, tortured, and put to death in 1606. His son, Har Govind, led the Sikhs against the Mohammdans, but was driven from Lahore to the northern mountains. It was under Guru Govind, the tenth of the "teachers," that the Sikhs were first formed into a separate state. He combated the Mohammdan power and religion; and Hinduism, with its castes, fictions, and irrational idolatry, fell under his ban. He also wrote the second volume of the Sikh Scriptures, in which he taught the oneness of God, strict morality, and, equally, loving by the neighbor. He was assassinated while in the imperial service in 1708, on the banks of the Godavari. After his death, persecution from time to time greatly reduced the strength of the tribe; but their religious fanaticism, nourished by the sacred writings which successive leaders had prepared, lent vigor to their warlike energies. In 1764 they convened a general assembly, formally assumed the character of a nation, and issued a coin from which the name of the emperor was omitted. Their commonwealth was designated Khalsa, and its twelve component states were called misals, and were governed by singhs, who were chosen in a strict way. Of these states, the most powerful was the Khalsa. His son, Runjit Singh, consolidated the misals into a unity subject to his own sway, A.D. 1838. The following year he died, aged fifty-nine years, leaving a kingdom, called Lahore, which included all the principal Sikh states except those east of the Satlej. In 1846 they were conquered by the English, and ceased to be a nation. New complications arising, war between the Sikhs and English was renewed in 1848, but concluded unfavorably for the Sikhs in February, 1849. The portion of the Sikh territory remaining independent is comprised in the nine small states of Sirkhi. The Sikhs were faithful to the English during the Sepoy rebellion in 1857, and aided materially in its suppression. The Sikhs still maintain their national characteristics, being tall, thin, dark, active, excellent soldiers, frank, sociable, and pleasure-loving. Their number in British India was officially given in 1868 as 1,250,000. A critical acquaintance with the real views of Nanok, his followers, and especially of the present gurus, is essential to a correct conception of the Sikhs and their religious system. See Cunningham, History of the Sikhs; Malcolm, Sketch of the Sikhs; Asiatic Researches, vols. i, ii; and The Calcutta Review, vols. xxii, xxiii.

Silanus is mentioned as governor of Syria by Josephus (Ant. xviii, 2, 4, s.). According to Tacitus (who names him Cutricus), he was in that office in A.D. 16, but removed from the governorship by Tibertius in the following year, on account of the connection of Silanus with Tiberius, the eldest of the children of Germanicus (Annales, ii, 4, 43). From his name, Cutricus Silanus, it has been conjectured that he originally belonged to the Julia gens, but was adopted by the Cecilia gens. It was further supposed that he is the same person as Silanus mentioned in Acts, xi, 28, 39, and in Acts, vii, 55, who is better known as Metellus. In that case his full name would have been Q. Cecilius Metellus Cutricus Silanus.

Silas (Silas), an eminent member of the early Christian Church, described under that name in the Acts, but probably as Silvanus (q.v.) in Paul's epistles, B.C. 55-59. According to critics, Silas is the same as Silvanus, the bold abbreviations of proper names, such as Zenus for Zeno- dorus, Apollos for Apollonius, Hermas for Hermodorus. The method by which they arrived at these forms is not very apparent. Silas first appears as one of the leaders of the Church at Jerusalem (Acts xv, 27, 39), holding a place of honor, and an inspiration in the communication (prophe- ter, ver. 32). His name, derived from the Latin set, "wood," betokens him a Hellenistic Jew, and he appears to have been a Roman citizen (xvi, 37). He was appointed as a delegate to accompany Paul and Barnabas on their return to Antioch with the decree of the Council of Jerusalem (xvi, 22, 29). Having accomplished this mission, he returned to Thessalonica (ver. 33); the following verse, οὐδὲ ἐν ἑωράσεις τὸν Σιλα ἐπιμενεῖν αὐτόν, is perhaps an interpolation introduced to harmonize the passage with ver. 40). He must, however, have immediately revisited Antioch, for we find him selected by Paul as the companion of his second missionary journey (ver. 40; xvi, 40). At Berea he was left behind with Timothy while Paul proceeded to Athens (ver. 14), and we hear nothing more of his movements until he rejoined the apostle at Corinth (xviii, 5). Whether he had followed Paul to Athens in obedience to the injunction to do so (xviii, 15), and had been sent thence to Beroea, and to Thessalonica (Thess. iii, 2), or whether his movements were wholly independent of Timothy's, is uncertain (Conybeare and Howson, Life of St. Paul, i, 488, note). His presence at Corinth is several times noticed (2 Cor. i, 19; 1 Thess. i, 1; 2 Thess. i, 1). He probably returned to Jerusalem with Paul, and from that time the connection between them appears to have terminated. Whether he was the Silvanus who conveyed Peter's first epistle to Asia Minor (1 Pet. v, 12) is doubtful; the probabilities are in favor of the identity; the question is chiefly interesting as bearing upon the Pauline character of Peter's epistles (De Wette). The Alexandrine writers adopted some of the views, for the purpose of rejecting, the theories which identify Silas with Tertius (Rom. xvi, 22) through a Hebrew explanation of the name (תִּתַּרְס), and again with Luke, or at all events with the author of the Acts (Alford, Protegoma, in Acta, i, 1). The traditions (ap. Dorotheum et Hippolytum) regard Silas and Silvanus as different persons, being, the former bishop of Corinth, and the latter bishop of Thessalonica, as Liberius, &c., Silvanus, et Sila, Epang. p. 117; Cellarius, Diss. de Sila Virt. Apostol. Jen. 1773. See PAUL.

Silent Prayer. In the ancient Church none but communicants were permitted to remain in the Church during the communion service. The entrance on this service was made by a mental or silent prayer, offered by the people in private, and thence called εὐχὴ ἐν ὑπνῷ, the silent prayer, and εὐχὴ κατὰ ὑπνοῖον, the
SILENTIARII 739

SILK

Sensible prayer (Cont. Laodic. can. 19). Some take the prayer in silence here to mean no more than prayers made over the communicants by the minister alone, the people not making any responses; but we are to understand here such private prayers as each particular person made by himself. That there were such private prayers appears not only from the canon, but from several ancient writers (Chrysostom, De non Evang. Pepend. Ψηφιακά, v. 72; Basil, Ep. 65). See Bingham, Christ. Antig. bk. xvi. ch. 3, § 11.

Silentiarii, a name given, i, to some monks in early times. This was not a name of any particular order, but given to some few for their professing a more than Pythagorean silence; such as Johannes Silentiarius, who was first bishop of Colonina in Armenia, but renounced his bishopric to become a monk in Palestine, where he got the name of Silentiarius from his extraordinary silence (Cyril, Acta Synodorum, Maii 15, vol. iii. p. 284).

2. More commonly to certain men who were civil officers in the emperor's palace, and served both as apparitors to execute public business, and as guards to keep the peace about him, when they had the name of Silentiarii, under which title they are spoken of in the Theodosian Code (Cod. vi. cit. 20). See Bingham, Christ. Antig. bk. vii. ch. ii. § 14.

Silentiarius, an ancient form of speech used to bid the people fall to their private devotions. This signal was given by the deacon; but when the bishop gave the signal, he said Oremus (Let us pray). See Bingham, Christ. Antig. bk. xv. ch. i. § 1.

Silanus, in Grecian mythology, was originally synonymous with ζατήρ (q. v.); but when the latter term became attached to a class of companions of Bacchus, a single one of them, Silanus, obtained a special prominence. He was said to be the son of Mercury or of Pan, and the inseparable companion of Bacchus, whom he brought up and instructed. Silenus was represented as a jovial old man, bald-headed, pug-nosed, fat and round like the wine-bag which he constantly carried, and usually intoxicated. He did not, consequently, trust to his legs, but generally rode on an ass. His special delight was in music and dancing, a certain dance being named from him, Silenus; and the invention of the flute is sometimes attributed to him. He also appears, in contrast with his undignified external appearance, as a Bacchic inspired prophet who has a familiar knowledge of things both past and future, and as a demigod of fortunate and earthy life. When he was drunk and asleep, he was in the power of mortals, who might compel him to prophesy and sing by surrounding him with chains of flowers. Silenus had a temple at Elissos, in Greece, where Metha (drunkenness) stood by his side handing him a cup of wine. As the companion of Bacchus, he took part in the contest with the giants, whom he put to flight, in part through the braying of his ass. The name is thought to be derived from a root signifying to flow or run, so that Silenus was considered the reaper of Bacchus, either because moisture is necessary to the growth of the vine, or because over the company he always mixed better with the wine than they drank. See Smith, Dict. of Class. Mythol. s. v.; Vollmer, Wörterb. d. Mythol. s. v.; Hirt, Mythol. Bilderb. p. 104, etc.; Müller, Ancient Art, etc., § 386.

Silentoptr, in Norse mythology, was one of the famous ass-horses on which the gods rode to the daily seat of judgment.

Silicium (etymology unknown), a feast given in honor of the dead, but it is uncertain on what day. It sometimes appears to have been given at the time of the funeral, sometimes on the Novendale (q. v.), and sometimes later.

Silinicz, in Slavic mythology, was the forest god of the Poles, to whom the mooses were sacred and whose altar-fires were fed with moss alone. See Vollmer, Wörterb. d. Mythol. s. v.

Silk. The only undoubted notice of this material in the canonical Bible occurs in Rev. xvi. 12, where it is mentioned "among the treasures of the typical Babylon." So also in 1 Macc. iv. 23, in the enumeration of the spoil obtained by the Syrains from the Jews. It is, however, in the highest degree probable that the text was known to the Hebrews from the time that their commercial relations were extended by Solomon. For, though we have no historical evidence of the importation of the raw material to the shores of the Mediterranean earlier than that of Aristotle (Hist. Anim. v, 19) in the 4th century B.C., yet that notice, referring as it does to the island of Cos, would justly assume that it had been known at a far earlier period in Western Asia. The commercial routes of that continent are of the highest antiquity, and an indirect testimony to the existence of a trade with China in the age of Isaiah is probably afforded us in his reference to the Sinim (q. v.). The well-known classical name of the substance (οξύς, sericum) does not occur in the Hebrew language, although Calmet conjectured that סובא, sericloth (Isa. xix. 3, A. V. "fine") was connected with sericum. But the absence of the mention of silk in the Old Testament is account for part by the fact that the Hebrews were acquainted only with the texture, and not with the raw material, and partly on the supposition that the name sericum reached the Greeks by another channel, viz. through Armenia. The Hebrew terms which have been supposed to refer to silk are "שׁוֹדֵשׁ, mesesh, and דְּמֵשׁ, demeshek. The former occurs only in Ezek. xvi. 10, 13 (A. V. "silk"), and is probably connected with the root דָּמַשׁ, to draw out as if it were made of the finest drawn silk in the manner described by Pliny (vi. 20; xi. 26); the equivalent term in the Sept. (דָּמַשׁ), though connected in point of etymology with hair as its material, is, nevertheless, explained by Heacyvius and Suidas as referring to silk, which may well have been described as resembling hair (see Fuller, Miscell. ii. 11; Schroeder, Vorteli. Müller, p. 284 sqq.). The other term, demeshek, occurs in Amos iii. 12 (A. V. "Damascas"), and has been supposed to refer to silk from the resemblance of the word to our "damask," and of this again to "Damascus," as the place where the manufacture of silk textiles was carried on. However, this is by no means a corruption of דָּמַשׁ, a term applied by the Arabs to the raw material alone, and not to the manufactured article (Pusey, Min. Proph. p. 188). The A. V. confounds שׁוֹדֵשׁ, shesh, byssus, with "silk" in Prov. xxxi. 22. We must therefore consider the reference to silk as extremely dubious. (See Hartmann, Hebräerheim, i. 126 sqq.; ii. 406 sqq.). We have no notice of silk under its classical name (Σιλκείον) in the Mishna (Kil. ii. 2), where Chinese silk is distinguished from false-silk. The value set upon silk by the Romans, as implied in Rev. xvii. 12, is noticed by Josephus (War, viii. 5, 4), as well as by classical writers (e. g. Sueaton. Collq. 52; Mart. xi. 9). Aristotle (Hist. Anim. v, 19) gave the first correct account of its nature by describing it as unwound from a large horned caterpillar. Notwithstanding this information, however, the most ancient notices continued to be entertained respecting its origin; for Pliny (Hist. Nat. xi. 22) attributed it to a worm that built nests of clay and collected wax; while Virgil (Georg. ii. 121) and other authors supposed that the Seres carried the down from the leaves of plants and from flowers.

There can scarcely be a doubt that silk, the most beautiful of all the fabrics of the loom, was known and employed by the Assyrians long before the captivity of the prophet by the Assyrians. The Medes were notorious for the luxuriance and effeminacy of their costume, as is well shown in Xenophon's copious details.
SILK

(Cyp. passim). After the conquest of Babylon and the possession of the Persians of universal empire, the very quintessence of magnificence was "the Median robe," which thenceforward became the dress of honor. "Cyrrus distributed robes to his great men, most beautiful and noble, all of the Median sort." These were made of silk; for Procopius, writing long afterwards, when the silk-worm had become known in Europe, says, "The robes which the Greeks used to call Median we now call saken." The author of The Periplus of the Erythraean Sea speaks of silk in Malabar as an article imported from countries farther east, which, however, can only apply to the raw material; for in the Statutes of Menu, of an antiquity far more remote, we read of "silk and woolen stuffs" and "silk clothes" (Menu, vi, 129; xii, 64); and "woollen cloth, deer-skins, jewels, soft silks, variously colored garments, and beautiful ornaments" are enumerated as presents in the Ramayana (i, 61). Pliny, commenting on a passage in Aristotle above cited, states that silk came to Greece from Assyria and was worked up by the Grecian women; and we may fairly conclude that the rich and curious products of China, her silk and porcelain, reached the marts of Egypt, of Phoenicia, and of Greece by various routes—one from the south of China through India, and thence either by sea up the Persian and Arabian gulfs or across the Indus through Persia by the great Saryan and Arabian caravans; and another by the grand route of Central Asia, by Bactria, "situate on the highway of the confluence of nations," whence the opulence of Thibet, Tartary, and China was poured in a ceaseless and splendid tide of traffic through the Caspian Gates (see Heeren, Hist. Researches, passim; and Wilkinson, Anc. Egypt, iii, 107). "As the dress described [in Ezek. xvi] is intended to be of the richest materials, it might well be supposed that the prophet would mention silk if silk were known to him. Silk continued to bear an astonishingly high price down to a comparatively late period. Thus we find that silk was forbidden to be worn by men under Tiberius. When they did wear it, silk formed only part of the fabric, robes entirely of silk being left to the women. It is numbered among the most extravagant luxuries or effeminacies of Heliogabalus that he was the first man who wore a robe of entire silk; and the anecdotes are well known of the emperor M. Aurelius, who caused a silk robe which had become his property to be sold, and of the emperor Aurelian, who, refused, on the ground of its extravagant cost, a silk dress which his consort earnestly requested from him. Such anecdotes have an emphasis here, where, by a figurative reference, the most rich and costly articles of dress, so well known, God describes the precious and glorious things with which he had invested the people he redeemed from the bondage and misery of Egypt" (Kitto, Pict. Bible, ad loc.).

The silk known to us is entirely produced by one insect, the caterpillar of a sluggish moth known as Bombay mori, after its proper food-plant, the mulberry (Morus). The larvae of other moths produce silk, and in India several species are cultivated, as the Tussah and the Arrindy silk-worms. But there is none that can compete with the Chinese worm for the exquisite softness, gloss, and beauty of its silk, and its suitability for the finer textiles. Every one in this country is now familiar with the history of the bombby; with the

round, flattened eggs; the gray worms which they produce which feed so voraciously on mulberry-leaves, till they become plump white caterpillars, three inches long, and furnished with a little horn behind; with the oval yellow cocoons of silk which these caterpillars form around their own bodies; with the short brown pupa into which each immured caterpillar changes; and with the soft, downy, cream-colored moth with feathery antennae that in due time emerges from the pupa, and from the cocoon if undisturbed. The mode of unwinding the cocoons and reeling off the silk thread is also familiarly known.

Silla, Cill, or Sole (Fr. soeul, from Lat. solum). 1. The horizontal piece of timber or stone forming the bottom of a window, doorway, or other similar opening. 2. Also the horizontal piece of timber, or plate, set on the bottom of the window partition. 3. Also the horizontal piece of timber near the base of houses which are built partly of timber and partly of brick. —Parker, Gloss. of Architect, s. v.

Sill, George G., a Presbyterian minister, was born at Lyme, Conn., Jan. 26, 1791. He received a good education, studied theology at Auburn Seminary, N. Y., was licensed by Rochester Presbytery in 1821, and ordained by the same in 1825 as an evangelist among the new settlements of the pre-Reformation Church. He afterwards preached at Mendon, N. Y., for some years. In 1827 he was the editor of the Rochester Observer, the first religious newspaper in Western New York. He removed, in 1835, to Illinois, where, in 1841, he joined the Reformed Dutch Church, and labored at Brunswick, Peoria Co. In 1849 he removed to Farmington, Mich., and finally returned East with no regular charge, preaching in the vicinity of Albany, N. Y., to the poor and destitute. He died May 28, 1859. Mr. Sill was a good scholar, and specially fond of antiquarian research. He was the author of a Verse Book of Scripture for Sunday-schools (Rochester, 1834, 8vo)—A Manual of the History and Polity of the Reformed Dutch Church—and a Genealogical History of the Sill Family (Albany, 1859, 12mo), posthumous. See Wilson, Prefab. Hist. Am. Manua., 1840, p. 204; Whitney, Hand-book of Amer. Geneal. p. 158. (J. L. S.)

Silla'1a (Heb. Silla'ah, נִכְסָא, a twig or basket [Gesen.], a highway [Frits.], Sept. Πακάλα and Πακάδα; Vulg. Selal). "The house of Millo which goeth down to Silla" was the scene of the murder of king Josiah (2 Kings xii, 30). Millo seems most probably to have been the citadel of the town of Joppa. Two inscriptions on Mount Zion have been discovered, one of which must have been in the valley below, overlooked by the top of the citadel which was used as a residence. The situation of the present so-called Pool of Siloam would be appropriate, and the agreement between the two names is tempting (Schwarz, Poles, p. 241); but the likeness exists in the sound and English versions only, and in the original is too slight to admit of an inference. Gesenius, with less than his usual caution, affirms Silla to be a town in the neighborhood of Jerusalem. Others (as Themistus, in Kursef, erg. Handb. on the passage: Ewald, Gesch. Irr. iii, 70) refer it to a place on or connected with the causeway or flight of steps (תַּלְיָא) which led from the central valley of the city up to the court of the temple. This latter is confirmed.
by the etymology (from לֶשֶׁת, to raise an embankment).

See Jerusalem.

Silla, the actual and supreme god in the mythology of the Greenlanders, is also named Friksonna. The name signifies the one above. He raises the dead to eternal life, and is graciously or angrily disposed towards men in accordance with their character for virtue. The training of children is not at all understood by that people; but the happy and grateful earneuisses, quietness, and good behavior of the older persons produce their effects upon the young in begetting in them similar traits. A mother may, nevertheless, be heard now and then to rebuke her child with the words "Silla tekon," i.e., the one above sees it. Silla is to them the Supreme and Incomprehensible of Being.

Sillagik Sartok, a powerful idol, venerated among the Greenlanders. He dwells in the fields of ice, and causes storms.

Sillery, Fario Brulart de, a French prelate, was born at the castle of Pressigny (Toumont) Oct. 25, 1655, and was a relative of the marquis Nicolas de Brulart. He was educated in philosophy at the Collège de la Maréchale, and was received into the Sorbonne as a teacher in 1681. In 1689 he was appointed bishop of Avranches, and in 1699 exchanged that see for Soissons. He died at Paris Nov. 20, 1714. He left a few religious works, for which see Hoefer, Nouv. Biog. Générale, s. v.

Sillick, John A., a minister of the Methodist Episcopal Church, was born in Saratoga, N. Y., May 21, 1805, and was converted at the age of twelve. Failing away, he was restored when about twenty-four. He then spent two years at Wilbraham Academy, and about two years at the Wesleyan University. In 1834 he joined the New York Conference, and remained in it until its division (1848), when he became a member of the New York East Conference. In 1854 he was transferred to the New York Conference, and continued effective till 1861, when he took a supernumerated relation, and settled in Yorkville, a suburb of New York city, where he died July 10, 1865. He was kind and generous, a good preacher, practical, entertaining, and instructive. See Minutes of Annual Conferences, 1865, p. 73.

Silon See Brier.

Silnoy-Bog, a god mentioned in Slavic mythology who is believed to be the war-god of the ancient Russians and Polcs. He is represented as a warrior, heavily armed, and having the skulls of men and beasts scattered about at his feet.

Sil'ō'ah, Sil'o'an, or Sil'o'ah, a place in the vicinity of Jerusalem, of great importance in some respects both in ancient and modern times.

I. Name.—This occurs in a different form both in the original and in the A. V., as applied to water, in three passages of Scripture, which we here arrange chronologically.

1. The Waters of Siloam" (Heb. נַעֲרָת שִׁלוֹאָם, Ne'arath Shilo'ah; Sept. נִעְרֵי שִׁלוֹאָם, v. נַעֲרָת שִׁלוֹאָם; Suidas, Ain Seluwan; Vulg. aquae Silv.; a certain slow-flowing stream employed by the prophet Isaiah (viii. 6) to point his comparison between the quiet confidence in Jehovah which he was urging on the people, and the overwhelming violence of the king of Assyria, for whose alliance they were clamoring.

There is no reason to doubt that the waters in question were the same that are better known under their later name of Siloam—the only perennial spring of Jerusalem. Objection has been taken to the fact that the "waters of Siloam" run with an irregular intermittent action, and therefore could hardly be appealed to as flowing "quietly." But the testimony of careful investigators (Robinson, Bib. Res. i, 341, 2; Barclay, City of the Great King, p. 516) establishes the fact that the disturbance only takes place, at the most, two or three times a day, say three to four hours out of the twenty-four, the flow being "perfectly quiescent" during the rest of the time. In summer the disturbance only occurs once in two or three days. Such interruptions to the quiet flow of the stream would therefore not interfere with the contrast enforced in the prophet's metaphor.

2. The Pool of Siloam" (Heb. בְּרֶכֶת שִׁלוֹאָם; Sept. κολυμβήσας τῶν κοιώνων τοῦ Σιλουάμ; Vulg. Fluvia Silva), a locality on the southern wall of the city near "the king's garden" (Neh. iii. 15). This was possibly a corrupt form of the name which is first presented as Shiloah, then as Siloam, and is now Solewah. The root of them all is doubtless שָלוָה, shalāch, "to send." The meaning of Sheloah, taken as Hebrew, is "dark." This cannot be a name given to the stream on account of its swiftness, because it is not now, nor was it in the days of Isaiah, anything but a very soft and gentle stream; and it is probably an accommodation to the popular mouth, of the same nature as that exemplified in the name Dart, which is now borne by more than one river in England, and which has nothing whatever to do with swiftness, but is merely a corruption of the ancient word, which also appears in the various forms of Derwent, Darent, and partibus.

3. The Pool of Siloam" (ἡ κολυμμῆσις τοῦ Σιλουάμ, which the evangelist immediately explains by adding, "which is interpreted Sent," ὁ ἐξομίληται Ἀταστραμύνος, evidently deriving it from ποτίζω, a bathing-place in the vicinity of Jerusalem to which our Lord sent the blind man to wash in order to recover of his sight (John ix, 7-11).

In this connection we may also refer to the other Biblical occurrence of the name by "the Tower in Siloam" (τὸ πύργον ἐν τῷ Σιλουάμ, Vulg. turris in Silo), to which Jesus alluded as the cause of a great calamity to certain Jews (Luke xiii. 4). There is no good reason to suppose a different place to be here meant; but some structure adjoining the fountain is doubtless designated. There were festivities hard by, for of Jotham we read, "on the wall of Ophel he built much" (2 Chron. xxvi, 3); and of Manasseh that he "compassed about Ophel" (xxxi. 14); and, in connection with Ophel, there is mention made of "a tower that Sela" (Neh. iii. 20); and there is no unlikelihood in connecting Ophel and the tower with the waters of Siloam, while one may be almost excused for the conjecture that its projection was the cause of its ultimate fall.

The above change in the Masoretic punctuation perhaps indicates merely a change in the pronunciation or in the spelling of the word, sometime during the three centuries (Nah. iii, 25; and Neh. ix. 30) between the time of these books being written, and following them, Jewish travelers, both ancient and modern, from Benjamin of Tudela to Schwarz, retain the earlier Sheloah in preference to the later She loah. The rabbins give it with the article, as in the Bible (יְהוֹשֵׁע, Dach, Codex Talmudicus, p. 367). The Sept. gives Σιλουά in Isaiah; but in Nehemiah κολυμμήσις τῶν κοιώνων, the pool of the sheep-skins, or "breasting heap," because, in their day, it was used for washing the fleeces of the victims. In Talmudical Hebrew Sheloah signifies "a skin" (Lеви, Левит, Sacer; and the Alexandria translators attached this meaning to it, they and the earlier rabbins considering Nehemiah's Shelach as a different pool from Siloam, probably the same as Bethesda, by the sheep-gate (John v. 2), the "leader," καλοῦσθαι, in the probeatica piscina of Jerome. If so, then it is Bethesda, and not Siloam, that is mentioned by Nehemiah.

We may observe that the Targum of Jonathan, the Peshito, and the Arabic versions of 1 Kings i. 33 read Shiloah for the Ṣihu of the Hebrew. The Vulg. has uniformly, but in the Old and the New Test. Siloam; in the Old calling it piscina, and in the New natatoria. The Latin fathers, led by the Vulg., have always Silo; the old pilgrims, who knew nothing but the Vulg., Silo or
The Greek fathers, adhering to the Sept., have Siloam. The word does not occur in the Apocrypha. Josephus mentions Siloam and Siloah (Σηλωάμ and Ση-λοα) generally, the former.

II. Identification.—Siloam is one of the few undisputed localities (though Relland and some others mis-placed it) in the topography of Jerusalem, still retaining its old name (with the Arabic modification, Silwud), which every other pool has lost in Biblical designation. This is the more remarkable as it is a more suburban tank of no great size, and for many an age not particularly good or plentiful in its waters, though Josephus tells us that in his day they were both "sweet and abundant" (War, v, 4, 1). Apart from the identity of name, there is an unbroken chain of exterior testimony, during eight centuries, connecting Jerusalem with Siloam. It is the only, or only the most important, fountain known to the writers of the Bible (cf. 2 Kings v, 9). From the life of David (2 Sam. vi, 10) down to the rise of Islam, Josephus, the Talmud, and the works of the Patriarchs, we find the name attached to this fountain.

Siloam is identified with the Pool of Siloam by the same type of intelligence and tradition that determines the location of the Pool of Gihon, which has been noticed by most subsequent pilgrims and travellers. This assures us that the present fountain of Siloam is that which he had in view, and that it is the same to which the scriptural notices refer there is no reason to doubt.

Soon after Jerome, Antoninus of Placentia, in his Pèlerinage (A.D. 570), gives a similar description, and mentions especially that at certain hours only did the fountain pour forth much water. He also distinguishes between the fountain and the pool where the people washed themselves for a blessing. In the 7th century John of Ephesus, in his Tappa Calendarium, mentions the fountain of Siloam, and states that it is near the road from Jerusalem to Hebron. He points it out to the people, and tells them to pray at the fountain of Siloam.

Benjamin of Tudela (A.D. 1173) speaks of "the great spring of Siloach which runs into the brook Kedron" (Asher's ed. i, 71), and he mentions it as a "large building upon it" (32), where the people were wont to wash themselves in the days of their fathers. Is it of this building that the present ruined pillars are the relics? Caumont (A.D. 1418) speaks of it as the Valley of Kedron, and describes it by the name of fountain of Siloam. The fountain of Siloam is called at hand (Voyage d'Oultremont en Jerusalem, etc. [Paris ed.], p. 68). Felix Fabri (A.D. 1484) describes Siloam at some length, and seems to have attempted to enter the subterranean passage, but failed, and retreated in dismay after filling his flask with its water. It is mentioned by Argula (A.D. 1496) and identifies the spot (Die Pilgerfahrt [Col. Freiburg], p. 186). After this the references to Siloam are innumerable: nor do they, with one or two exceptions, vary in their location of it. We hardly needed these testimonies to enable us to fix the site, though some topographers have rested on these entirely.

Scriptural notice sets it down in the mouth of the Tyropoön as Josephus does, brings us very near it, both in Nehemiah and John. The writer who compares Neh. iii, 15 with xii, 37 will find that the pool of Siloam, the fountain-gate, the stairs of the city of David, the wall above the house of David, the water-gate, and the king's garden were all near each other. The evangelist's narrative regarding the blind man, whose eyes the Lord miraculously opened, when carefully examined leads us to the conclusion that Siloam was somewhere in the neighborhood of the Temple. The Rabbinical traditions, or histories, as they doubtless are in many cases, frequently refer to Siloam in connection with the Temple service. It was to Siloam that the Levite was sent with the golden pitcher on the "last and great day of the feast" of Tabernacles; it was from Siloam that he brought the water which was then poured over the sacrifices, in memory of the water from the rock of Horeb; and it was to this Siloam water that the Lord pointed when he stood in the Temple on that day and cried, "If any man thirst, let him come unto me and drink." The Lord sent the blind man to wash, not in, as our version has it, but at (σε) the pool of Siloam (see Wollf Curric, etc. Or σε gets its force from τεῖγα, νείμα coming between the verb and its
preposition, parenthetically, "Go to the pool and wash thine eyes there"), for it was the clay from his eyes that was the "a" which the evangelist is careful to throw in a remark, not for the purpose of telling us that Siloam meant an "aqueduct," as some think, but to give higher significance to the miracle. "Go wash in the pool of Siloam" was the command; the evangelist adds, "which is by interpretation, sent." On the inner meaning here, the paralleism between "the sent one" (Luke, iv, 18; John x, 36) and "the sent water," the missioned one and the missioned pool, we say nothing further than what St. Basil said well, in his exposition of the 8th of Isaiah: γις οὖν ὁ ἀπεσταλμένος καὶ ἄφωρος ἀνήμεν; ἡ περι ὁ ἐκ τῆς ἱλαρίας, κύριος ἀπεσταλκέ με καὶ πάλιν, οἳς ἐπέδραμες τὴν καιροῦ. That "sent" is the natural interpretation, not simply from the word itself, but from other passages where ὁ παμέλεως is used in connection with water, as Job lxxi, 10, "be sendeth waters upon the fields;" and Ezek. xxxi, 4, "she sent out her little rivers unto all the trees of the field." The Talmudists coincide with the evangelist, and say that Shiloah was so called because it sent forth its waters to water the gardens (Lev. 25, 36). We may add Homer's line—

κατ' ἄρεον καὶ τεῖχον ἐν ῥοὸν (H. xii, 26).

III. Modern Locality. — I. General Description. — A little way below the Jewish burying-ground, and on the opposite side of the valley, where the Kedron turns slightly westward, and widens itself considerably, is the Fountain of the Virgin, or Um ed-Deraj, near the beginning of that saddle-shaped projection of the Temple hill supposed to be the Ophel of the Bible and the Ophials of Josephus. See En-Hozza. At the back part of this fountain a subterraneous passage begins, through which the water flows, and through which a man may make his way, as did Robinson, Barclay, and Warren, sometimes walking erect, sometimes stooping, sometimes kneeling, and sometimes crawling, to Siloam. This rocky conduit, which twists considerably, but keeps, in general, a south-westery direction, is, according to Robinson, 1750 feet long, while the direct distance between Silwan and Um ed-Deraj is only a little above 1200 feet. In former days this passage was evidently deeper, as its bed is sand of some depth, which merely was supposed to enter. I then observed a large opening entering the rock-hewn channel, just below the pool, which, though once a copious tributary, is now dry. Being too much choked with tesselate and rubbish to be penetrated far, I carefully noted its position and bearing, and, on searching for it above, soon identified it on the exterior, where it assumed an upward direction towards the Temple, and, entering through a breach, traversed it for nearly a thousand feet, sometimes erect, sometimes bending, sometimes inching my way snake-fashion, till at last I reached a point near the wall where I heard the donkeys tripping along over my head. I was satisfied, on subsequently locating our course above ground with the theodolite, that this canal derived its former supply of water, not from Moriah, but from Zion (ibid., p. 292). Lieut. Warren, of the English party exploring Jerusalem, has more recently examined the water-passages from the Virgin's Fount, and found several outlets, all blocked up, however, with débris, except one which led up through the rock to the surface on the west. He is inclined to think that the supply of water came from the Temple rock (Jerusalem Recovered, p. 194 sq.). Certain it is, at all events, that the water of both fountains is the same, though some travellers have pronounced the water of Siloam to be bad, and that of the Fountain of the Virgin good. It has a peculiar taste, sweetish and very slightly brackish, but not at all disagreeable. Late in the season, when the water is low, it is said to become more brackish and unpleasant. The most remarkable circumstance is the ebb and flow of the waters, which, although often mentioned as a characteristic of Siloam, must belong equally to both fountains. Dr. Robinson himself witnessed this phenomenon in the Fountain of the Virgin, where the water rose in five minutes one foot in the reservoir, and in another five minutes sank to its former level. The intervals and the extent of the flow and ebb in this and the fountain of Siloam vary with the season; but the fact, though it has not yet been accounted for, is beyond dispute. This conduit enters Siloam at the north-west angle; or, rather, enters a small rock-cut chamber which forms the vestibule of Siloam, about five or six feet broad. To this you descend by a few rude steps, under which the

The Present "Pool of Siloam." (From a photograph taken by the Editor in 1874.)
water pours itself into the main pool (Narrative of Mission to the Jews, i, 207). This pool is oblong; eighteen paces in length according to Lalli (Viaggio al Santo Sepolcro, A.D. 1678), fifty feet according to Barclay, and fifty-three according to Robinson. It is eighteen feet broad and nineteen feet deep according to Robinson; but Barclay gives a more minute measurement: "fourteen and a half at the lower (eastern) end and seventeen at the upper; its western end side being somewhat bent. It is eighteen and a half in depth, but never filled, the water either passing directly through, or being maintained at a depth of three or four feet. This is effected by leaving open or closing (with a few handfuls of weeds at the present day, but formerly by a flood-gate) an aperture at the bottom. At a height of three or four feet from the bottom its dimensions become enlarged a few feet, and the water, attaining this level, falls through an aperture at its lower end into an educt, subterranean at first, but soon appearing in a deep ditch under the perpendicular cliff of Ophel, and is received into a few small reservoirs and troughs" (Barclay, p. 524). This large receptacle is faced with a wall of stone, now greatly out of repair. Several columns stand out of the side walls, extending from the top downward into the cistern, the design of which it is difficult to conjecture. The water passes out of this reservoir through a channel out in the rock, which is covered for a short distance; but subsequently it opens and discloses a lively copious stream, which is conducted into an enclosed garden planted with fig-trees. It is afterwards subdivided, and seems to be exhausted in irrigating a number of gardens occupied with fig, apricot, olive, and other trees, and some flourishing legumes.

2. Coincidences with Ancient Accounts. — The small basin at the west end, which we have described, is what some old travellers call "the fountain of Silo" (F. Fabrici, i, 420). "In front of this," Fabri goes on, "there is a bath surrounded by walls and buttresses, like a cloister, and the arches of these buttresses are supported by marble pillars," which pillars he affirms to be the remains of a monastery built above the pool. The present pool is a ruin, with no moss or ivy to make it romantic; its sides falling in; its pillars broken; its stair a fragment; its walls giving way; the edge of every stone worn round or sharp by time; in some parts mere debris; once Siloam, now, like the city which overhung it, a heap; though around its edges "wild flowers, and, among other plants, the caper-tree, grow luxuriantly" (Narrative of Mission, i, 207). The gray crumbling limestone of the stone (as well as of the surrounding rocks, which are almost verdureless) gives a poor and worn-out aspect to this venerable relic. The present pool is not the original building; the work of crusaders it may be; perhaps even improved by Saladin, whose affection for wells and pools led him to care for all these things; perhaps the work of later days. Yet the spot is the same. Above it rises the high rock, and beyond it the city wall; while eastward and southward the verdure of gardens relieves the gray monotony of the scene, and beyond these the Kedron vale, overshadowed by the third of the three heights of Olivet, "the mount of corruption" (1 Kings x, 7; xxii, 15), with the village of Silván jutting out over its lower slope, and looking into the pool from which it takes its name and draws its water. This pool, which we may call the second, seems anciently to have poured its waters into a third, before it proceeded to water the royal gardens. This third is perhaps that which Josephus calls "Solomon's pool" (War, v, 4, 5), and which Nehemiah calls "the king's pool" (Neh. ii, 14): for this must have been somewhere about "the king's garden" (Josephus's Βασιλείας παραδύσως, Ant. vii, 14, 4); and we know that this was by "the wall of the pool of Siloah" (Neh. iii, 15). The Antonine Itinerary speaks of it in connection with Siloah as "alia piscina grandis foras." It is now known as the Birkelet el-Hamra, and may be perhaps some five times the size of Birkelet es-Silván. Barclay speaks of it merely as a "depressed fig-yard;" but one would like to see it cleared out.

Siloam is in Scripture always called a pool. It is not an סלומ, that is, a marsh-pool (Isa. xxxv, 7); nor a מים, a natural hollow or pit (xxx, 14); nor a נחל, a natural gathering of water (Gen. i, 10; Isa. xxii, 11);
Siliao

nor a בְּרֶשֶׁת, a well (Gen. xvii, 14); nor a בֶּן, a pit (Lev. xi, 36); nor a בָּשׁ, a spring (Gen. ii, 17); but a בְּרֶשֶׁת, a regularly built pool or tank (2 Kings xx, 20; Neh. iii, 15; Eccles. ii, 6). This last word is still retained in the Arabic, as any traveller or reader of the Koran knows. Whence it is a pool, Isaiah merely speaks of it as "the waters of Shiloah"; while the New Test. gives κυράκια, and Josephus πυγή. The rabbins and Jewish travellers call it a fountain; in which they are sometimes followed by the European travellers of all ages, though more generally they give us piscina, natura, and stoegada. It is the least of all the Jerusalem pools: hardly the sixth part of the Birket el-Mamilla; hardly the tenth of the Birket es-Sultan, or of the lowest of the three pools of Solomon at El-Burak. Yet it is a sacred spot, even to the Moslem; much more to the Jew; for not only from it was the water taken at the Feast of Tabernacles, but the water for the ashes of the red heifer (Dact. Talm. Babyl. p. 380). Jewish tradition makes Gihon and Siliao one (Lightfoot, Cent. Chor. in Matt. p. 51; Schwarz, p. 265), as if Gihon were the "burning forth" (יָרַד, to break out), and Siliao the receptacle of the waters sent. If this were the case, it might be into Siliao, through one of the many subterranean aqueducts leading from Jerusalem to Gihon, on one of which probably went down the Tyropoeon, that Hezekiah turned the waters on the other side of the city, when he "stopped the upper watercourse of the city of David" (2 Chron. xxxvii, 20).

The streets of water which descend to these conduits is referred to by Jerome ("per terram concava et autra saxi durissimi cum magno sonitu venit," in Isaa. viii, 6), as heard in his day, showing that the water was more abundant then than now. The intermittent character of Siliao is also noticed by him; but in a locality perforated by so many aqueducts, and supplied by so many large wells and secret springs (not to speak of the discharge of the great city baths), this irregular flow is easily accounted for both by the direct and the siphonic action of the water. How this natural intermittency of Siliao could be made identical with the miraculosus troubling of Bethesda (John v, 4) one does not see. The lack of water in the pool now is no proof that there was not the great abundance of which Josephus speaks (War, v, 4, 1): and as to the "sweetness" he speaks of, of the "aque dulces" of Virgil (Georg. iv, 61), or the Old Test. (Exod. xv, 25), which was used both in reference to the sweetness of the Marah waters (ibid.) and of the "stolen waters" of the foolish woman (Prov. ix, 17); it simply means fresh or pleasant, in opposition to bitter (יָרַד, παποκ). The miracle performed on the blind man gave rise, most probably, to the tradition of the healing qualities of the water. We may here note that the sacredness and efficacy of the water are still held by Jewish tradition, but more particularly at its source, the well of the Virgin. It is also קָבָר יָרוּד—the bathing-place of Rabbi Israel, where the high-priest used to plunge himself, and where the modern Jews of Jerusalem visit as one of their holy places, especially on the first day of their year (Rosh Ha-hshanah) and the day of atonement (Yom Kippur).

The expression in Isaiah, "waters of Shiloah that go softly," seems to point to the slender rivulet, flowing gently, though once very profusely, out of Siliao into the lower breadth of level, where the king's gardens, or "royal paradise," stood, and which is still the greenest spot about the Holy City, reclaimed from sterility into a fair oasis of olive-trees, fig-trees, pomegranates, etc., by the tiny rill which flows out of Siliao. A winter-torrent like the Kedron, or a swelling river like the Euphrates, carries havoc with it by sweeping off trees, and trees; but this Siliao-fed rill flows softly, fertilizing and beautifying the region through which it passes. As the Euphrates is used by the prophet as the symbol of the wasteful sweep of the Assyrian king, so Siliao is taken as the type of the calm prosperity of Israel under Messianic rule, when "the desert rejoices and blossoms as the rose." The word softly or secretly (יוּרָד) does not seem to refer to the secret transmission of the waters through the tributary vinducts, but, like Ovid's "molles aqua," "blandae aquae," and Catullus's "molle flumen," to the quiet gentleness with which the rivulet steals on its mission of beneficence, through the gardens of the king. Thus "Siliao's brook" of Milton, and "cool Siloan softly rill," are not more poetical fancies. The "fountain" and the "pool" and the "rill" of Siliao are all visible to this day, each doing its own work beneath the high rock of Moriah, and almost beneath the shadow of the Temple wall.

2. A joining Village of the Same Name.—East of the Kedron, right opposite the rough grey slope extending between Deraj and Silwan, above the kitchen-gardens watered by Siliao which supply Jerusalem with vegetables, is the village which takes its name from the pool—Katefr-Silita. At Deraj the Kedron is narrow, and the village is very near the fountain. Hence it is to it rather than to the pool that the villagers generally betake themselves under a hot summer's day. For with the consideration in its progress southward, the Katefr is at some little distance from the Birkeh. This village is unmentioned in ancient times; perhaps it did not exist. It is a wretched place for filth and irregularity; its square hovels all huddled together like the lairs of wild beasts, or, rather, like the tombs and caves in which savages or demonsiacs may be supposed to dwell. It lies near foot of the third or southern height of Olivet; and in all likelihood marks the spot of the idol shrines which Solomon built to Chemosh and Ashethoth and Milcom. This was "the mount of corruption" (2 Kings xxiii, 18), the hill that is before (east; before in Hebrew, צפונה, צפונית); the entrance to Jerusalem (1 Kings xi, 7); and these "abominations of the Moabites, Zidonians, and Ammonites" were built on "the right hand of the mount," that is, the southern part of it. This is "the opprobrious hill" of Milton (Par. Lost, i, 403); the "mons officius" of the Vulgate and of early travellers: the Morææ of the Sept. (see Keil, On Kings); and the Berg des Aegernisses of German maps. In Ramiboux's singular volume of lithographs (Col. 1858) of Jerusalem and its Holy Places, in imitation of the antique, there is a sketch of an old monolith tomb in the village of Silwan, which few travellers have noticed, but of which Dr. Dufour has given us both description (ii, 215), setting it down as a relic of Jebusitish workmanship. The present village of Siliao occupies the site of an old quarry. The houses are often made simply by walling up an excavation, and sometimes they cling to the scarped face of the cliff. Steps are cut in different parts of the village, originally for the convenience of the quarrymen, and now serving as streets (Ordnance Survey, p. 64).

For further details, see Robinson, Biblical Researches, i, 490, 492-498; Olin, Travels, ii, 155, 154; Williams, Holy City, p. 378, 379; Barclay, City of the Great King, p. 91 sq.; Thomson, Land and Book, ii, 324; Jerusalem Enraptured, p. 90; and especially Tobler, Die Siloahquelle und der Oelberg (Berlin, 1862).

Silia, Samuel da, a Jewish physician of the 17th century, deserves our attention on account of the part he took against Uriel (or Gabriel) Acosta (q.v.). Having succeeded in perusing Acosta's work before it was printed—a work in which the Pharaonic tradition was not attacked, but also the immortality of the soul and the oral tradition denied—De Sancto sedata da Immortalitate da Alma (Amst. 1623), in which he combats the ignorance "of a certain adversary of his time" (de certo contrivtor de nostro tempo). In consequence of this attack, Acosta published his work Erudientibus Bibliis Fieritque Caesariis, etc. (1623).
SILVERUS

746

SILVERUS

Silvanus, an old Italic divinity. The etymology of the name denotes a salvan god, but descriptions of the qualities and doings of Silvanus indicate that he symbolized the life-giving forces of nature generally. He was the god of arable fields as well as of the forests, and in that character watched over the boundaries of fields and presided over their fruitfulness. The law of the agrimensores (a collection of various instructions relating to the surveying of land) even requires that every landed property shall be gold and silver, as well as in the woods, however, would seem always to have been the peculiar domain of Silvanus. His loud-resounding voice would be heard to issue from the wood like that of Pan, with whom he was often confounded; and sacrifices of corn, pigs, meat, and wine were there presented to him in return for the fruitfulness they would ensure to the welfare of the herds of cattle. Pigs which devastated cultivated fields were also offered to him in sacrifice. See Smith, Dict. of Mythol. s. v.; Vollmer, Wörterb. d. Mythol. s. v.

Silvanus (Greece Σλωνας; from the Lat. silvana for silvanes, "of the grove"); a distinguished Christian teacher, the companion of Paul in his journeys through Asia Minor and Greece (2 Cor. i, 19; 1 Thess. i, 1, 2 Thess. i, 1; 1 Pet. v, 12); elsewhere (Acts xv, 22, 27, 32, 44, 46; xvi, 13, 25, 29; xvii, 4, 10, 14, 15; xviii, 5) in the contracted form Stilas (q. v.).

Silver (גרים, kērēph, often rendered "money"). There is no mention of this metal in Scripture until the time of Abraham. Before that time brass and iron appear to have been the only metals in use (Gen. iv, 22). Abraham was wealthy, and gold and silver, as well as in his flocks and herds, and silver in his day was in general circulation as money. It was uncoined, and estimated always by weight. Coinage money was not in use among the Israelites until an advanced period of their history. The Romans are said to have had only copper money until the first Punic war, when the Carthaginians began to coin silver (Pliny, Hist. Nat. xxx, 3). Their coins were extensively introduced into Judea after it became a Roman province.—Kitto.

In early times, according to Scripture, silver was used for ornaments (Gen. xxiv, 53), for cups (xiv, 2), for the sockets of the pillars of the tabernacle (Exod. xxvi, 19, etc.), their hooks and fillets, or rods (xxvi, 10), and their capitals (xxvii, 17); for dishes, or chargers, and bowls (Numb. vii, 13), trumpets (x, 2), candlesticks (1 Chron. xxvii, 20), tables (ver. 16), basins (ver. 17), chairs (Isa. xi, 19), the settings of ornaments (Prov. xxx, 11), stunts (Cant. i, 11), and crowns (Zech. vi, 11). Images for idolatrous worship were made of silver or overlaid with it (Exod. xx, 23; Hos. xiii, 2; Hab. ii, 19; Jer. vi, 39), and the manufacture of silver shrines for Diana was a trade in Ephesus (Acts xix, 24). But its chief use was as a medium of exchange, and throughout the world we find kērēph, "silver," used for money, like the Fr. argent. To this general usage there is but one exception. See Metal. Vessels and ornaments of gold and silver were common in Egypt in the times of Tharrosen I and Thothmes III, the contemporaries of Joseph and Moses (Wilkinson, Anc. Egypt. i, 220). In Egypt we find indications of the constant application of silver to purposes of ornament and luxury. It was used for basins (Od. ix, 137; iv, 59), goblets (Il. xxiii, 741), baskets (Od. iv, 125), coffers (Il. xxiv, 413), sword-hiltts (i, 219; Od. vii, 404), door-handles (i, 442), and clasps for the greaves (Il. iii, 331). Door-posts (Od. vii, 89) and lintels (ibid. 90) glittered with silver ornaments; baths (iv, 128), tables (x, 355), bows (Il. 1, 49; xxiv, 605), scabbards (xi, 31), sword-belts (xxviii, 588), belts for the shield (ibid. 489), chariot-poles (xxviii, 588), and the weapons of war were adorned with silver; women braided their hair with silver-thread (xvii, 62), and cords appear to have been made of it (Od. x, 24); while we constantly find that swords (Il. ii, 46; xxxii, 807) and sword-belts (xi, 287), thrones, or chairs of state (Od. vii, 65), and bedsteads (xxxii, 200) were adorned with silver. Thias of the silver feet fastened with rings was probably formed as it is found in the silver sandal (Il. i, 538). The practice of overlaying silver with gold, referred to in Homer (Od. vi, 232; xxxii, 159), is nowhere mentioned in the Bible, though inferior materials were covered with silver (Prov. xxxvi, 23).

Silver was brought to Solomon from Arabia (2 Chron. ix, 14) and from Tarshish (ver. 21), which supplied the markets of Tyre (Ezek. xxxxi, 12). From Tarshish it came in the form of plates (Jer. x, 9), like those on which the sacred books of the Singhalesse are written to this day (Tennent, Ceylon, ii, 102). The silver bowl given as a prize by Achilles was the work of Sidonian artists (II. ii, 867). Abydus is called the birthplace of silver, and was probably celebrated for its mines. But Spain appears to have been the chief source whence silver was obtained by the ancients. Possibly the hills of Palestine may have afforded some supply of this metal. "When Nebuchadnezzar was among the Danites, it was mentioned to him that an ore affording silver and lead had been discovered on the declivity of a hill in Lebanon" (Kitto, Phys. Hist. of Palestine, p. 73).

For an account of the knowledge of obtaining and refining silver possessed by the ancient Hebrews, see Mines. The whole operation of mining is vividly depicted in Job xxxviii, 1-11, and the process of purifying metals is frequently alluded to in Psa. xxi, 6; Prov. xxv, 4, while it is described with some minuteness in Ezek. xxxi, 20-22. Silver mixed with alloy is referred to in Jer. vi, 89, and a finer kind, either purer in itself or more thoroughly purified, is mentioned in Prov. viii, 19, 22—Smith. There is a beautiful allusion in the poem of Malachi to the refining of this precious metal. The Lord of hosts is represented "sitting as a refiner and purifier of silver" (Mal. iii, 3). In the process of refining silver, the workman sits with his eye steadily fixed on the surface of the molten metal, and the operation is only known as complete when he finds that his glance is reflected in it. So in this passage we have a beautiful figure descriptive of God's purpose in placing his people in the furnace of affliction, while he is, as it were, seated by his side, his all-seeing eye being steadily intent on the work of purifying, and his wisdom and love engaged on their behalf until his own glorious image is reflected on their souls, and the work of purifying is fully accomplished. The way in which silver is spoken of in the book of Job (xxxviii, 1), "Surely there is a vein for the silver and a place for gold where they fine it," affords one of the many instances of the scientific accuracy of Scripture. An eminent geologist has remarked on the distinction here drawn, and which the discoveries of modern science have made clear, between the "vein of silver" and "dust of gold," indicating that there are mines of the one and not of the other (Murchison, Siluria, p. 437).

Silver was in use for coins and in the temple in 536-37. He was a son of pope Hormisdas, who had been married before he became a priest, and prior to his elevation to the papacy was a subdeacon. That elevation was caused by Theodatus, the Gothic king, who was involved in disputes with Justinian, and would not consent that a candidate who favored the emperor should be confirmed. It is said, however, that Silvester added bribes to the other mo-
SILVERLING

3. It is used as a symbol or mmenotechnical sign. Thus when a word occurs three times, four times, etc., as often as it occurs a corresponding symbol, which is generally of a very artificial character, is given. Thus the Masora Parva remarks on אִישׁ (Gen. xxvii, 4), viz., "it occurs three times, and the symbol is 'the waters of the mighty iron.'" Now each of these three words represents a symbol, signifying the passage in which the word "Iron" occurs. Thus דָּרָשׁ (Jer. ii, 14), "iron" refers to the passage דַּרְשִׁי, "iron is taken out of the earth" (Job xxxvii, 2). In the same verse the Masorah remarks on הנֶבֶט (Isa. xliii, 25), "the word, "iron," refers to the passage הנֶבֶט תֹּקָף, "wash you, make you clean." 4. The word יְסָרָם stands alone without any addition or explanation, and in this position it serves as a monitor: a. When one word differs from a similar one, either by its prefix or by the following letter, and in this instance it calls the attention to the difference. Thus in Lev. xxv, 25 we read מְמַעַר אֶרֶץ, "if thy brother be waxen poor," but in ver. 35 we read מְמַעַר אֶרֶץ רַע, "and if thy brother," etc. To the latter passage the Masorah adds יִדְרֵשׁ, to call attention to the רַע in ver. 25, and יִדְרֵשׁ in ver. 35. b. When the difference is caused by another word. Thus in Num. iv, 14, we read יִתְנַשׁ, "and shall put in the staves thereof," but in ver. 8, 11 we read יָתַנְשֵׁם, "and shall put," etc. Here, in this instance, the Masorah places יִדְרֵשׁ to the first form. Comp. also Lev. xix, 25 and xxii, 29; Psal. lvi, 5, 12. c. When a difference consists in the accents. Thus in Num. iv, 30 we read יְרַע דְּרָע יְשָׁרִים נְתָנָה, "even until fifty years;" but in ver. 35 we read יְרַע דְּרָע יְשָׁרִים נְתָנָה, "and shall put in the staves thereof." In this instance the attention is called to the difference of the accents, viz. the first דְּרָע has the תֹּכֶב, the second the Tiphaḥ, etc. These few examples will show the importance of the meaning of the symbols in its different stages. See Bukcat, Tiberius, seu Masoretices Commentaries, p. 259 sqq.; Freundorff, Masoraa Magna, introd. p. 9. (B.F.)

SIMEON (Heb. Shimon, שִׁמְוָן, a hearing, i.e. by Jehovah; Sept. and New Test. Συμεών, and so Josephus, Ant. i, 19, 7), the name of one of the heads of the Hebrew tribes, and of several other Jews named from him. In our account of the former we collect all the ancient and modern information respecting him and his posterity.

1. The second of Jacob's sons by Leah. B.C. 1918. His birth is recorded in Gen. xxix, 33, and, in the explanation there given of the name it is derived from the root שָׁמַע, "to hear"—"Jehovah hath heard that I was hated," etc., and she called his name Shimeon. This metaphor is not carried on (as in some other of the names) in Jacob's blessing, though that of Moses all mention of Simeon is omitted. First (Hebr. Hanatěb, s. v.) inclines to the interpretation "famous" (raimhechter). Redelb (Alttest. Namen, p. 98), on the other hand, adopting the Arabic root شَمَعَا, considers...
SIMEON

The terms of this denunciation seem to imply a close bond of union between Simeon and Judah, a sentiment and continued exploits performed under the bond, such as the one that now remains on record. The expressions of the closing lines evidently refer to the more advanced condition of the nation of Israel after the time of the death of the father of the individual patriarchre. Taking it, therefore, to be what it purports—an actual enumeration of the prophecies about the sons of Judah (xxxix. 25, 26), a deed which drew on them the remonstrance of their father (ver. 30), and evidently also his dying curse (xlix. 5-7). With Judah the connection was drawn still lower. He and Simeon not only "went up" together, side by side, in the forefront of the nation, to the conquest of Canaan and the Land of Promise (Josh. xx. 1, 21; Judg. i. 3, 17), but their allotments lay together in a more special manner than those of the other tribes, something in the same manner as Benjamin and Ephraim. The massacre of Shechem—a deed not to be judged by the standards of a more civilized and less violent age, and, when fairly estimated, not wholly despicable to its perpetrators—the only personal incident related of Simeon is the fact of his being selected by Joseph, without any reason given or implied, as the hostage for the appearance of Benjamin (Gen. xlii. 19, 24, 36; xlili, 29).

Of these slight traits are characteristic amplified in the Jewish traditions. In the Targum of Pseudo-Jonathan it is Simeon and Levi who are the enemies of the lad Joseph. It is they who counsel his being killed, and Simeon binds him before he is lowered into the well at Dothan. (See further details in Fabricius, Cod. Pseudo. p. 555.) Hence Joseph's selection of him as the hostage, his binding and incarceration. In the Midrash the strength of Simeon is so prodigious that the Egyptians are unable to cope with him, and his binding is only accomplished at length by the intervention of Manasseh, who acts as the house steward and interpreter of Joseph. His powers are so great that at the mere roar of his voice seventy valiant Egyptians fall at his feet and break their teeth (Weil, Bibl. Leg. p. 88). In the "Testament of Simeon" his fierceness and implacability are put prominently forward, and he dies warning his children against the indulgence of such passions (Fabricius, Cod. Pseudo. p. 508-509).

The connection between Judah and Simeon already mentioned seems to have begun with the conquest. Judah and the two Joseph-brethren were first served with the lion's share of the land; and then, the Canaanites having been sufficiently subdued to allow the sacred tent to be established without risk in the heart of the land, and by the individual Jacob—it has often been shown that the seven inferior tribes was proceeded with (Josh. xiii. 1-6). Benjamin had the first turn, then Simeon (xix. 1). By this time Judah had discovered that the tract allotted to him was too large (ver. 9), and also too much exposed on the west and south for even his great power. The connection between Judah and Simeon already mentioned seems to have begun with the conquest. Judah and the two Joseph-brethren were first served with the lion's share of the land; and then, the Canaanites having been sufficiently subdued to allow the sacred tent to be established without risk in the heart of the land, and by the individual Jacob—it has often been shown that the seven inferior tribes was proceeded with (Josh. xiii. 1-6). Map of the Tribe of Simeon.

those of Judah (6800). After David's removal to Jerusalem, the head of the tribe was Shephatiah, son of Maachah (xxvii, 16).

The following list contains all the names of places in this tribe, with the probable modern names. (On the possible identifications, see the Qur'ān Statement of the 18th Explor. Fund, Jan. 1875, p. 28 sq.).

What part Simeon took at the time of the division of the kingdom we are not told. The tribe was probably not in a sufficiently strong or compact condition to have shown any northern tendencies even had it entertained them. The only thing which can be interpreted into a trace of its having taken any part with the northern kingdom are the two casual notices of 2 Chron. xvi, 9 and xxvii, 6, which appear to imply the presence of Simeonites there in the reigns of Ahaz and Josiah. But this may have been merely a manifestation of that vagrant spirit which was a cause or a consequence of the prediction ascribed to Jacob. On the other hand, the definite statement of 1 Chron. iv, 41-43 (the date of which by Hezekiah's reign seems to show conclusively its southern origin) proves that at that time there were still some of them remaining in the original seat of the tribe, and actuated by all the warlike, lawless spirit of their progenitor. This fragment of ancient chronicle relates two expeditions in search of more eligible territory. The first, under thirteen chieftains, leading a body of followers, was made against the Hamites and the Meehumin, a powerful tribe of Bedawin, "at the entrance of Gedor at the east side of the ravine." The second was smaller, but more adventurous. Under the guidance of four chiefs a band of five hundred undertook an expedition against the Amalek, who had taken refuge from the attacks of Saul or David, or some later pursuers, in the distant fastnesses of Mount Seir. The expedition was successful. They smote the Amalekites and took possession of their quarters; and they were still living there after the return of the Jews from cap-
tivity, or whenever the first book of Chronicles was edited in its present form.

The audacity and intrepidity which seem to have characterized the founder of the tribe of Simeon are seen in their fullest force in the last of his descendants of whom we hear anything in the sacred record. Whether the book which bears her name be a history or a romantic romance, Judith (q.v.) will always remain one of the most prominent figures among the deliverers of her nation. Bethulia would almost seem to have been a Simeonitel colony. Olys, the chief man of the city, was a Simeonite (Judith iv. 1); so was Manasseh, the son of Judith (vii. 2). She herself had the purest blood of the tribe in her veins. Her genealogy is traced up to Zerubbabel (in the Greek form of the present text Salasaladi, ver. 1), the head of the Simeonites at the time of their greatest power. She serves herself for her tremendous exploit by a prayer to "the Lord God of her father Simeon" and by recalling in the most characteristic manner, and in all their details, the incidents of the massacre of Shechem (ix. 2).

Simeon is named by Ezekiel (xlvi. 25) and the author of the book of Revelation (vii. 7) in their catalogues of the generation of Israel. The former removes the tribe from Judah and places it by the side of Benjamin. See Meth. Quart. Rev. Jan. 1875, p. 121.

2. (A. V. "Shimeon.") An Israeitite of the family of Harim who divorced his Gentile wife after the return from Babylon (Ezra x. 3). B.C. 458.

3. A priest, son of Joiarib (i.e. Jehoiarib), father of John and grandfather of Mattathias the father of the Maccabees brothers (1 Macc. ii. 1).

4. The son of Judah and father of Levi in the maternal genealogy of our Lord (Luke iii. 30). B.C. c. 866. He seems to have been the same with Masseiah the son of Adahiah (2 Chron. xxxiii. 1).

A name, inspired by the Holy Ghost, who met the parents of our Lord in the Temple, took him in his arms, and gave thanks for what he saw, and knew of Jesus (Luke ii. 25-35). B.C. 6. The circumstance is interesting as evincing the expectations which were then entertained of the speedy advent of the Messiah; and important from the attestation which it conveyed in favor of Jesus from one who was known to have received the divine promise that he should "not taste of death till he had seen the Lord's Christ."

In the Apocryphal gospel of Nicodemus, Simeon is called a high-priest, and the narrative of our Lord's descent into hell is put into the mouths of Charinus and Titus, and in the apocryphal Acts of the apostles, he is represented as one of those who rose from the grave after Christ's resurrection (Matt. xxvii. 58) and related their story to Anias, Caiaphas, Nicodemus, Joseph, and Gamaliel.

Rabban Simon, whose grandmother was of the family of David, succeeded his father Hillel as president of the Sanhedrim about A.D. 18. (Itho, Lexicon Rabbi, p. 697), and his son Gamaliel was the Pharisee at whose feet Paul was brought up (Acts xxii. 3). A Jewish writer specially notes that no record of this Simeon is preserved in the Mishna (Lightfoot, Horae Heb. Luke ii. 25). It has been conjectured that he (Frideaux, Connexion, 1807, Micahia) or his grandson (Schöttger, Lexicon Rabbi, p. 697) was the 52nd of the family of the rabbis before the Simeon of Luke. In favor of the identity it is alleged that the name, residence, time of life, and general character are the same in both cases; that the remarkable silence of the Mishna and the counsel given by Gamaliel (Acts v. 98) countenance a suspicion of an identity with the family of the rabbinic towards Christianity. On the other hand, it is argued that these facts fall far short of historical proof, and that Simeon was a very common name among the Jews; that Luke would never have introduced so celebrated a character as the president of the Sanhedrim merely as a "man in Jerusalem;" and that his son Gamaliel, after all, was educated as a Pharisee. The question is discussed in Witsius, Miscellanea Sacra, i, 21, 14-16. See also Wolf, Curia Philologice at Luke ii. 25; and Bibl. Hebr. ii. 682. See also Simon ben-Hillel.

6. A form (Acts xv. 14; also 2 Pet. i. 2 in some MSS) of the name of Simon Peter (q.v.).

7. The 1st century (tit. 1) of Nigger (q.v.), an eminent Christian at Antioch.

Simeon of Durham, an English chronicler, taught mathematics at Oxford, and afterwards was preacher in the cathedral at Durham. We owe to him a Historia de Gesta Regum Anglicorum, from 616 to 1129, continued down to 1156 by John of Hexham, and inserted in the Anglica Historiae Scriptores X of Tysvarden (Lond. 1739). It is mostly a repetition of the Chronicles of Florence of Worscester, who died in 1118. Simeon is likewise the author of a letter De Archiepiscopia Eborac; and he has given under his own name, without any addition to the work, another production, Historia de Duemilliaci Eclesi, printed in Tyysward's edition, but which altogether belongs, as Selden has shown, to Frere, prior of Durham, who died in 1115. Simeon died after 1180. See Write, Biog. Britann. Literaria, vol. i.

Simeon of Polotsk, a Russian monk, poet, and ecclesiastical historian, was born at Polotsk in 1628, and was brought up by strangers; but after the capture of Smolarisk he was called by the czar Alexis to educate his oldest son, 60, and introduced him to the sciences and the Kremlin. He composed dramas which were appreciated chiefly by Sophia, the intelligent sister of Peter I. When the emperor Theodore ascended the throne (1676), his preceptor obtained permission to establish a press in connection with the palace. He conceived the design of forming the Orthodoxy of Russia looks to be but a copy of the first printed edition of the Oecumenic patriarchy. We owe to Simeon several religious and poetical treatises, but the greater part of his works remains buried in the libraries of Moscow and Novgorod. He died at Moscow, Aug. 1683.

Simeon, St., surnamed Stylites (from στυλαῖος, a pillar), an early anchorite, was born about 390 at Sisian, on the confines of Cilicia and Syria. He was the son of a shepherd, and followed the same vocation himself till his thirteenth year, when he entered a monastery where several brethren consecrated themselves entirely to a knowledge of the Holy Scriptures. Living among monks, his ascetic discipline was increased by his mortifications, so that the superior, fearful of his example, at last dismissed him. After spending three years in solitude on Mt. Selenissassa, where he is said to have passed forty days without eating, a feat which he re-enacted for many years afterwards, he betook himself to the top of a mountain in Syria, and there made for himself a sort of shelter with stones piled on each other. In order to withdraw himself from the importunities of the crowds who came to him for the cure of their maladies, he contrived, about the year 423, to establish his residence on the top of a column, which he raised first from six to twelve, and at length to twenty-eight and thirty-six feet in height. Its summit was three feet in diameter and was surrounded with a balustrade of sufficient height. It was impossible to lie down upon it, and Simeon there maintained his abode day and night. A mode of life extraordinary was, in general, regarded as a piece of extravagance and vanity, but by Simeon a mark of unusual holiness. From his aerial retreat the ascetic gave his instructions to the people who resorted thither, and held public consultations. Three Christian emperors—Theodosius the Younger, Marcion, and Leo—came to see him. His life was compared to that of angels—offering up prayers for men from his elevation and bringing down graces on them. His neck was loaded with an
Simeon, Charles, an English clergyman, was born at Reading, Sept. 24, 1758, and was educated at Eton and at King's College, Cambridge, of which he became a fellow. He was presented to the living of Trinity Church, Cambridge, in 1783, which he held until his death, in 1836. As a preacher, Simeon was distinguished for an impassioned evangelistic language, sentiment, and doctrine, that at first roused bitter opposition, but he eventually became the centre of evangelical influence. He may be regarded as the founder of the Low-Church party. His best-known work is the _Hera Homileticæ, or Discourses (skeloton) upon the Whole Scriptures_ (1819-20, 11 vols. 8vo; Appendix, 1828, 6 vols. 8vo). The entire works of Simeon, including _Claus's Essay on the Composition of a Sermon_, were published in 21 vols. 8vo (Lond. 1840). _Claus's Essay, with notes, etc., and 100 skeletons of Sermons_, etc., were published in London in 1852 (12mo). For the copyright of his works he received £5000, of which Mr. Simeon appropriated £1000 to the Society for Promoting Christianity among the Jews, £1000 to the London Missionary Society, £1000 to the Church Missionary Society, and £210 to the binding of twenty large-paper copies presented to dignitaries and libraries. This series is now published by Henry G. Bohn (Lond.), who issued a new edition of Simeon's select works in 1854, 2 vols. 32mo. See _Recollections of the Conversations of the Rev. C. Simeon_, etc. (1862, 8vo); _London Reader_, 1848, 1854, ii, 293; _Carus, Memoirs of Simeon_ (1847, 8vo; 2d ed. 1847, 8vo); _Allibone, Dict. of Brit. and Amer. Authors_, s. v.; _Darling, Cyclop. Bibl._, s. v.

**Simeon Metaphrases was born of noble parents at Constantinople in the 10th century. He was well educated, and raised himself to his merit by very high trust under the reigns of Leo the Philosopher and his son Constantine Porphyrogenitus. It is said that being sent by the emperor to Cyprus, a contrary wind carried his ship to the island of Phoebus. There he met an anchorite, who advised him to write the life of Theoctist, a female saint of Lesbos, and he gradually extended his labors, so that it included the lives of 120 saints. He died in 976 or 977. His 120 Lives of Saints are to be found in Latin translations in Suris; the Greek is not extant. See _Chalmer, Biog. Dict._, s. v.; _Darling, Cyclop. Bibl._, s. v.

**Sim'oneite (Heb. collect. with the art. hašh-Shi'moni, יִשְׂמֹנִי; Sept. Šimŵon), a patronymic designation of the descendants of Simeon (Num. xxv, 14; xxvi, 14; 1 Chron. xxvii, 18).

**Similitude (צְוָדָא, a physical resemblance, 2 Chron. iv, 3; Dan. x, 16; נְצָרָה, a pattern, Psa. cvi, 29; cxliv, 12; נְצָרָה, a shape, Num. xii, 8; Deut. iv, 12, 15, 16; אֶוֹם, אֶוֹם, אֶוֹם, similarity; similarity in general). The word is now chiefly used in a figurative sense of a form of speech including the simple metaphor, or the extended metaphor of various kinds, especially the two following of the latter.

1. The *Allegory, a figure of speech, has been defined by bishop Marsh, in accordance with its etymology, as "a representation of one thing which is intended to excite the representation of another thing;" the first representation being consistent with itself, but requiring, or being capable of admitting, a moral and spiritual interpretation over and above its literal sense. An allegory has been incorrectly considered by some as a lengthened or sustained metaphor, or a continuation of metaphors, as by Cicero, thus standing in the same relation to metaphor as parable to simile. But the two figures
SIMLAI

are quite distinct; no sustained metaphor, or succession of metaphors, can constitute an allegory, and the interpretation of allegory differs from that of metaphor in having to do not with words, but things. In every allegory there is a twofold sense—the immediate or historic, which is understood from the words, and the ultimate, which is left to be inferred, but which is not prompted by the words. The allegorical interpretation is not of the words, but of the things signified by them; and not only may, but actually does, coexist with the literal interpretation in every allegory, whether the narrative in which it is conveyed be of things possible or real. An illustration of this may be seen in Gal. iv. 24, where the apostle gives an allegorical interpretation to the historical narrative of Hagar and Sarah; not treating that narrative as an allegory in itself, as our A. V. would lead us to suppose, but drawing from it a deeper sense than is conveyed by the immediate representation.

In pure allegory no direct reference is made to the principal object. Of this kind the parable of the prodigal son is an example (Luke xvi. 11-32). In mixed allegory the allegorical narrative either contains some hint of its application, as Ps. lxxx., or the allegory and its interpretation are combined, as in John xv. 1-8; but this passage is, strictly speaking, an example of a metaphor.

The distinction between the parable and the allegory is laid down by dean trench (On the Parables, ch. i) as one of form rather than of essence. "In the allegory," he says, "there is an interpretation of the thing signified, as in the history, the quality and properties of the first being attributed to the last, and the two thus blended together, instead of being kept quite distinct and placed side by side, as is the case in the parable. According to this, there is no such thing as pure allegory as above defined. See Allegory."

A form of this kind differs from the Fable, (1) in excluding brute or inanimate creatures passing out of the laws of their nature, and speaking or acting like men; (2) in its higher ethical significance. It differs, it may be added, from the Mythus in being the result of a conscious deliberate choice, not the growth of an unconscious realising, personifying attributes, appearing, no one knows how, in popular belief. It differs from the Allegory in that the latter, with its direct personification of ideas or attributes, and the names which designate them, involves really no comparison. The virtues and vices of mankind appear, as in a drama, in their own character and costume. The allegory is the mythus seen, the mythus is the allegory unobserved. The attention, insight, sometimes an actual explanation. It differs, lastly, from the Proverb in that it must include a similitude of some kind, while the proverb may assert, without a similitude, some wide generalization of experience. So far as proverbs go beyond this, and state what they affirm in a figurative form, they may be described as condensed parables, and parables as expanded proverbs (comp. Trench on Parables, ch. i.; and Grotius on Matt. xiii). See Parable.

Simlai, Rabbi, a famous Jewish teacher of the 2d century, is known as the first who reduced all laws of Judaism to certain principles. Thus we read in the Talmud Babyl. Maccot, fol. 23, col. 2 sq.: "R. Simlai said that Moses was instructed to give 413 injunctions to the people, viz. 365 precepts of omission, corresponding to the days of the solar year, and 248 precepts of commission, corresponding to the members of the human body. David reduced them all to eleven in the fifteenth Psalm: 'Lord, who shall abide in thy tabernacle, who shall dwell on thy holy hill? He that walketh uprightly, etc.' The prophet Isaiah reduced them to six (xxxii, 15): 'He that walketh righteously, etc.' The prophet Micah reduced them to three (vi. 8): 'He shall judge the poor of the people, and he shall deal wisely, and seek judgment.' David reduced them all to eleven in the fifteenth Psalm: 'Lord, who shall abide in thy tabernacle, who shall dwell on thy holy hill? He that walketh uprightly, etc.' The prophet Isaiah reduced them to six (xxxii, 15): 'He that walketh righteously, etc.' The prophet Micah reduced them to three (vi. 8): 'He shall judge the poor of the people, and he shall deal wisely, and seek judgment.' David reduced them all to eleven in the fifteenth Psalm: 'Lord, who shall abide in thy tabernacle, who shall dwell on thy holy hill? He that walketh uprightly, etc.' The prophet Isaiah reduced them to six (xxxii, 15): 'He that walketh righteously, etc.' The prophet Micah reduced them to three (vi. 8): 'He shall judge the poor of the people, and he shall deal wisely, and seek judgment.' David reduced them all to eleven in the fifteenth Psalm: 'Lord, who shall abide in thy tabernacle, who shall dwell on thy holy hill? He that walketh uprightly, etc.' The prophet Isaiah reduced them to six (xxxii, 15): 'He that walketh righteously, etc.' The prophet Micah reduced them to three (vi. 8): 'He shall judge the poor of the people, and he shall deal wisely, and seek judgment.' David reduced them all to eleven in the fifteenth Psalm: 'Lord, who shall abide in thy tabernacle, who shall dwell on thy holy hill? He that walketh uprightly, etc.' The prophet Isaiah reduced them to six (xxxii, 15): 'He that walketh righteously, etc.' The prophet Micah reduced them to three (vi. 8): 'He shall judge the poor of the people, and he shall deal wisely, and seek judgment.' David reduced them all to eleven in the fifteenth Psalm: 'Lord, who shall abide in thy tabernacle, who shall dwell on thy holy hill? He that walketh uprightly, etc.' The prophet Isaiah reduced them to six (xxxii, 15): 'He that walketh righteously, etc.' The prophet Micah reduced them to three (vi. 8): 'He shall judge the poor of the people, and he shall deal wisely, and seek judgment.'

SIMLAI

782

SIMER

to one (v. 4): 'Seek ye me, and ye shall live.' But lest it might be supposed from this that God could be found in the fulfillment of his whole law only, Habakkuk said (ii. 4): 'The just shall live by his faith.' Rabbi Simlai also acquired fame for his virulent opposition to Christianity. It has been suggested, and with apparent reason, that Habakkuk and Amos of the eighth and ninth centuries were contemporaries, and were both prophetically engaged in controversy with the celebrated Origen, who spent considerable time in Palestine, and, as is well known, introduced into the Church a kind of Hagadic exegesis. It will readily be conceived that Christian truth was placed at disadvantage when made to depend on isolated portions or texts which had been gratuitously extracted from historical narratives by exegetical niceties and subtleties, instead of resting on the general scope and bearing of the Old-Test. teaching, and on whole passages, taken in their breadth and fulness, as the individual exponents of general and well-ascertained principles. However, Hagadic studies sometimes led to a spirit of judicial inquiry, and to frequent controversies between Christians and Jews. An instance of these has, among others, been recorded by Jerome (Quast. in Genesis) in a discussion between Jason, a converted Jew, and his friend Papisacus. In the Talmud. Jera. Berachoth, ix. 11, 12 a, and Genesis Rabb. xix. 6, v, some of these points disputed by Simlai. See Grätz, Gesch. d. Juden, iv. 256 sq.; Edersehers, Hist. of the Jewish Nation, p. 517; Bick, Die Gesch. des jüd. Volkes (Liisa, 1878), p. 207; Cassel, Lehrbuch der jüdischen Geschichte u. Literatur (Leipsic, 1879), p. 182. (B. F.)

Simler, Johann Jakob, a descendant of the following, was born in 1716 and died in 1788. He was inspector of the seminary at Zurich, and left at his death a comprehensive collection of historical documents relating largely to events connected with the Reformation. It includes many letters by the various Reformers, though often they are only copies, and it ranks as an ornament of the town-library of Zurich. A work entitled Sammlung aller u. neuer Urkunden zur Beleuchtung der Kirchengeschichte, vornehmlich d. Schweizerlandes (Zurich, 1757 sq.) is from his pen.

Simler, Jonas, a prominent Swiss theologian, was born Nov. 6, 1830, at Cappel, near Zurich, being the son of a prior who had quitted the convent there and married. Young Simler had applied himself with success to belles-lettres, the sciences, and theology, devoting several years to visiting the principal schools of Germany; and on his return to Zurich in 1846, he first assisted in the teaching duties of the university. Afterwards he was appointed to the exposition of the New Test. (1552) in the capacity of dean in the Church of St. Peter. In 1853 he succeeded Bibliander (q. v.) and Vermigl in the theological chair at Zurich, and distinguished himself by an immense literary activity, in addition to a faithful performance of the duties of his office. He was twice married, and left by his second wife four children. Though greatly afflicted with gout, he possessed an exceedingly amiable disposition, and was fond of society, given to hospitality, and benevolent. He died of gout, July 2, 1576. His life was written by J. Ogt, of Zürich (1573), and his writings are catalogued in Gesser's Bibliotheca, amplified by Frisius (Zurich, 1588). Letters addressed to him from Hungary may be found in Macell. Tigur. ii, 213 sq., and in the Zurich Letters of the Parker Society. Comp. also Trechsel, Antitrinitarius, ii, 377 sq. Simler's works deal with astronomy, geography, history, biography, and statistics, no less than with theology. He republished Gesser's Bibliotheca Universalia in an abridged but much improved form (1555 and 1574). His Repub. Helvetiorum was translated into three languages, and passed through twenty-nine editions. In 1558 he was in the midst of the most active period of the doctrine of Christ's twofold nature. We meet in his dis-ascio ad Medaleum Francisci Stancari ... de Trinitate et Mediatori Nostro Jesu Christo (1558): De æterno
SIMONS, George Frederick, a Unitarian minister, was born in Boston, Mass., in 1814. He was prepared for college at the Letter School in that city, entered Harvard University in 1828, and graduated in 1832. On leaving college he became private tutor in the family of David Sears, Longwood, Me. The next year he accompanied his family to Europe, and returning in July, 1835, entered the divinity school at Cambridge, where he completed his course in 1838. He was ordained evangelist, Oct. 9, 1838, and went immediately to Mobile and commenced his ministry. He only remained there until 1840, being obliged to fly because of his protest against slavery. In April, 1841, he began to preach regularly at Waltham, Mass., and was installed as minister in that town on November 21 following. In January, 1840, having resigned his charge, he repaired to the University of Berlin to still further study theology. He returned in October, 1845, and preached in several pulpits, till February, 1848, when he became pastor of the Unitarian Church, Springfield, lately vacated by Dr. Peabody. He was dismissed from his charge on account of his views by George Thompson, the English abolition lecturer, and retired to Concord, Mass. In November, 1853, he began to supply a church in Albany, N. Y., and was installed as its pastor, January, 1854. He died of hasty consumption, Sept. 5, 1856. The following is a list of his publications: Who was Jesus Christ? (1839)—The Trinity: its Scripture, Formalism, etc.—A Lecture (Springfield, 1849)—Sermons (1840, 1851, 1854)—A Letter to the So-called Boston Churches (1846). A volume of his sermons was printed in 1855. See Sprague, Annals of the Amer. Pulpit, viii, 554.

SIMMONS, John, a minister of the Methodist Episcopal Church, South, was born in Hancock County, Ga., Nov. 6, 1791. In his nineteenth year he united with the Church, and in 1815 was admitted into the South Carolina Conference. After four or five years he located, the better to provide for his family; but he still continued to labor. He organized societies, and even erected a church at his own expense in 1847. Mr. Simmons was received into the Georgia Conference, and again entered upon the regular work of the ministry, until compelled to take a superannuated relation. This relation he sustained until his death, in Upson County, Ga., Dec. 12, 1865. See Minutes of Annual Conferences, M. E. Church, South, 1866, p. 24.

SIMMONS, John C., a minister of the Methodist Episcopal Church, South, was born in Jackson County, Ga., in 1806. In 1830 he was received on trial into the Georgia Conference, and labored thirty-eight years, most of the time as presiding elder. He died in 1866. See Minutes of Ann. Conf. of M. E. Church, South, 1869, p. 319.

SIMMONS, Perry A., a minister of the Methodist Episcopal Church, was born in Macon County, Tenn., Dec. 1, 1865, and united with the Church at the age of fifteen. Secured license to preach in 1864, removed to Missouri in 1861, and in 1868 united with the Missouri Conference. He was superannuated in 1870, and located at his own request in 1872. In 1873 he was readmitted to the conference, but died, near Lancaster, Schuyler Co., Mo., Oct. 3, 1876. See Minutes of Annual Conferences, 1876, p. 77.

SIMMONS, William, a minister of the Methodist Episcopal Church, was born in Mason County, Ky., June 24, 1798, and removed with his parents the next year to Ohio. He was converted in 1816, licensed to preach July 17, 1820, and received on trial the same year by the Ohio Conference. In his early ministry he traveled over extensive territory; and in 1825, besides pasting the church in the Muskingum district as presiding elder of a district including the whole of that state and a part of Northern Ohio. His relation to his conference, during fifty-four years, was always effective. He was an agent of the Freedman's Aid Society for a number of years, up to the time of his death, Aug. 6, 1874. For several years he was president of the trustees of Xenia College. See Minutes of Annual Conferences, 1874, p. 102.

Simpson, William S., a minister of the Methodist Episcopal Church, was born in Bristol, R. I., Sept. 24, 1813, and was converted at the age of sixteen. Having received a good education, and having served as a supply for two years, he joined the New England Conference in 1836, and has served up to the present time. Married, June 13, 1841; and elder, June 11, 1843. His last appointment was Hopewell, Providence Conference, where he died, Jan. 4, 1867. See Minutes of Annual Conferences, 1867, p. 102.

Simōnēs, in Grecian mythology, was the god of the river Simois, which joins the Scamander, or Xanthus, in the plain of Troy. He was the son of Oceanus and Tethys, and the brother of Evros and Acheloüs. He was represented as the leader of the Troughian pirates who attempted to enslave the youthful Bacchus and were by him turned into dolphins.

Sîmôn (Σίμων), a name of frequent occurrence in Jewish history in the post-Babylonian period. We here present those found in the Apocrypha, the New Testament, and Josephus. It is doubtful whether it was borrowed from the Greeks, with whom it was not uncommon, or whether it was a contraction of the Hebrew Shimeôn, i.e., SIMON. That the two names were regarded as identical appears from 1 Macc. ii, 65.

1. Simon Chodashâmeus, a name that erroneously appears in 1 Esdr. ix, 32, in place of the four names "Simôn, Benjamín, Mâlîch, and SHÉMÂRÎAH of the Hebrew text (Ezra x, 31, 32). "CHOSAMEUS" is apparently formed by combining the last letter of Málchis with the first part of the following name, SHEMARIAH.

2. Second son of Mattathias and last survivor of the Maccabean brothers. See Maccabees, 4.

3. Son of Onias, whom he succeeded in the high-priesthood (2 Macc. 9:28-38), being himself succeeded by his uncle Eleazar. He is often called Onias (Josephus, Ant. xii, 2, 5; 4, 1, 10). He is generally called "Simon the Just." See the following article, No. 6. He is Doubtful identical with the son of Onias the high-priest (Iosip. ο' Μύγακ), whose eulogy closes the "praise of famous men" in the book of Ecclesiasticus (ch. lxxxvi). See Ecclesiasticus, whose edition of Ecclesiasticus (Exeg. Han.1.) appeared in 1860, maintains the common view that the reference is to Simon II, but without bringing forward any new arguments to support it, though he strongly underlines the importance of Simon I (the Just). Without laying undue stress upon the traditions which attached to this name (Herzfeld, Gesch. Isr. i, 192), it is evident that Simon the Just was popularly regarded as closing a period in Jewish history, as the last teacher of "the great synagogue." Yet there is, in fact, a doubt to which Simon the title "the Just" was given. Herzfeld (i, 357, 358) has endeavored to prove that it belongs to Simon II, and not to Simon I, and in this he is followed by Jost (Gesch. d. Judend., i, 95). The later Hebrew authorities, by whose help the question should be settled, are extremely unsatisfactory and confused (Jost, p. 110, etc.); and it appears better to adhere to the express testimony of Josephus, who identifies Simon I with Simon the Just (Ant. xii, 2, 4, etc.) than to follow the Talmudic traditions, which are notoriously untrustworthy in chronology. The legends are connected with the title, and Herzfeld and Jost both agree in supposing that the reference in Ecclesiasticus is to Simon known...
as "the Just," though they believe this to be Simon II (compare the Rabban, Hist. of Jews, i, 115-134; Pridianus, Connection, i, 1). 4. A governor of the Temple" in the time of Seleu-
cus Philopator, whose information as to the treasures of the Temple led to the sacrilegious attempt of Heliodo-
rus (2 Macci, i, 4, etc.). B.C. 175. After this attempt failed, through the interference of the high-priest Onias, Simon accosted him, and so provoked him to a bloody feud arose between their two parties (ver. 3). Onias appealed to the king, but nothing is known as to the result or the later history of Simon. Considerable doubt exists as to the exact nature of the office which he held (πρωτοτοκος τοις ιεροις, iii, 4). Various inter-
terpretations of the text are given by Grimm (Exeg. Handsch. ad loc.). The chief difficulty lies in the fact that the term Simon is said to have been of "the tribe of Benjamin" (ver. 8), while the earlier "ruler of the house of God" (ὁ γενομενος οιου τω ζωει [eikous], 1 Chron. ix, 11; 2 Chron. xxxi, 18; Jer. xx. 1) seems to have been always a priest, and the "captain of the Temple" (επιφωνος τοις ιεροις, Luke xxii, 4, with Lightfoot's note; Acts iv, 1; v, 24, 26) and the keeper of the treasures (1 Chron. xxxvi, 24; 2 Chron. xxxii, 12) must have been at least Levites. Herzfeld (Gesch. Isr. i, 218) conjectures that Benjamin is an error for Miniamin, the head of a priestly family. In support of this view it may be observed that Menelaus, the usurping high-
priest, is said to have been a brother of Simon (2 Macc. iv, 23), and no Intimation is anywhere given that he was not of priestly descent. At the same time, the cor-
ruption (if it exist) dates from an earlier period than the present Greek text, for "tribe" (μονας) could be used for "family" (οικος). The various readings διαφωνικος ("regulation of the market") for παραφωνικος ("dis-
order," ii, 4), which seems to be certainly correct, points to some office in connection with the supply of the sacrifices; and probably Simon was appointed to carry out the design of Seleucus, who (as is stated in the context) had undertaken to defray the cost of them (ver. 8). In this case there would be less difficulty in a Benjaminite acting as the agent of a foreign king, even in a matter which concerned the Temple ser-
vice.

5. A resident of Jerusalem, son of Boethus, a priest of Alexandria, and a person of considerable note, whose daughter Herod the Great married, having first raised her father's family to sufficient distinction by putting him into the high-priesthood in place of Jesus the son of Phahet (Josephus, Ant. xvii, 10, 6). B.C. 4.

6. A slave of Herod who usurped royalty and com-
mitted many atrocities till he was overcome and be-
headed by Gratus (Josephus, Ant. xvii, 10, 6). B.C. 4.

8. The father of Judas (q. v.). Isacriot (John vi, 71; xii, 4; xiii, 20, 26). A.D. ante 27.

9. One of the apostles, usually designated Simon Pe-
ter (q. v.).

10. Another of the apostles, distinguished from the preceding as "the Canaanite," or rather Cananite (Matt. x, 4, Mark iii, 18), otherwise described as Simon Zel-
totes (Luke vi, 15; Acts i, 13). A.D. 27. The latter term (Σαλπητρις), which is peculiar to Luke, is the Greek equivalent for the Chaldee term (חפלעון) preserved by Matthew and Mark (Kanaanîy, as in text, recept, or καναανιαος, as in the Vulg., Canonanis, and in the best modern editions). Each of these equally points out Simon as belonging to the nation of the Zealots, who were conspicuous for their fierce advocacy of the Mosaic ritual. The supposed references to Canaan (A. V.) or to Caia (Luther's correction) are equally erroneous. See CANANAITE. The term Kanaanîy appears to have survived the other as the distinctive surname of Simon (Const. Apost. vi, 14; viii, 27). He has been frequently identified with Simon the brother of Jesus, although Eusebius (H. E. iii, 11) clearly distinguishes between the apostles and the relations of Jesus. It is less likely that he was identical with that same Simon of Jerusalem, as stated by Sophronius (App. ad Hieron. Catal.). Simon the Canaanite is reported, on the doub-
ful authority of the Pseudo-Dorotheus and of Nicephorus Callistus, to have preached in Egypt, Cyrene, and Mauri-
tania (Barton, Lectures, i, 333, note), and, on the equal-
ly doubtful authority of Ammonius (quoted by a man in the sixth century from an original copy of the Apostolical Constitutions (viii, 27), to have been crucified in Judea in the region of Domi-
tian.

11. A relative of our Lord, the only undoubted no-
tice of whom occurs in Matt. xiii, 56; Mark vi, 3, where, in common with James and Judas, he is mentioned as one of the "brethren" of Jesus. A.D. 28. He has generally been identified with Symeon, who be-
came bishop of Jerusalem after the death of James, A.D. 62 (Euseb. H. E. iii, 11; iv, 22), and who suffered mar-
tyrdom in the reign of Trajan at the extreme age of 120 years (Hippolyt. Origen. Euseb. H. E. iii, 12; 107, or, according to Barton (Lectures, ii, 17, note), in 104. A very considerable probability also has from early times been attached to the opinion which identi-
ifies him with the subject of the preceding paragraph, for in all the lists of the apostles he is named along with James the son of Alphæus, and Jude or Thaddæus. But in whatever sense the term "brother" is accepted—a vexed question which has been already amply discussed under Brother and James—it is clear that neither Eusebius nor the author of the so-called Apostolical Constitutions understood Symeon to be the brother of James, nor consequently the "brother" of the Lord. Eusebius invariably describes James as "the brother" of Jesus (H. E. i, 12; i, 1, al.), but Symeon as the son of Clopas and the cousin of Jesus (iii, 11; iv, 22), and the same distinction is made by the other author (Const. Apost. vii, 46).}

13. A resident at Bethany, distinguished as "the leper," not from his having leprosy at the time when he is mentioned, but at some previous period. It is not improbable that he had been miraculously cured by Je-
sus. In view of his authority and distinction he placed his father in the pontificate of Matthias the son of Theophilus (ibid. xvii, 4, 2). B.C. 5. See HIGH-
priest.

14. A Hellenistic Jew, born at Cyrene on the north coast of Africa, who was present at Jerusalem at the time of the crucifixion of Jesus either as an attendant at the feast (Acts ii, 10) or as one of the numerous set-
ters at Jerusalem from that place (v, 9). A.D. 29. Meeting the procession that conducted Jesus to Gol-
ththa as a captive from the country, he was pressed into the service (μηγαδέως, a military term) to bear the cross (Matt. xxvii, 32; Mark x, 21; Luke xxiii, 26) when Jesus himself was unable to bear it any longer (comp. John xix, 17). Mark describes him as the father of Alexander and Rufus, perhaps because this was the Rufus known to the Roman Christians.
Simon (Rom. xvi, 13), for whom he more especially wrote. The Basilidian Gnostics believed that Simon suffered in Jesu of Jesus (Burton, Lectures, i, 64). A. A. 50—

Simon (Rom. xvi, 13), for whom he more especially wrote. The Basilidian Gnostics believed that Simon suffered in Jesu of Jesus (Burton, Lectures, i, 64).

The Basilidian Gnostics believed that Simon suffered in Jesu of Jesus (Burton, Lectures, i, 64).

16. A tanner and a Christian convert living at Joppa at whose house Peter lodged (Acts ix, 43). A.D. 32. The profession of tanner was regarded with considerable contempt, and even as approaching to uncleanness, by the rigid Jews. See TANNER. That Peter selected such an abode showed the diminished hold which Judaism had on him. The house was near the seaside (x, 6, 32), for the convenience of the water.—Smith. The traditional "house of Simon" is still shown at Jaffa in a not improbable position. Some time since an order was issued by the sultan for removing the old walls and fortifications at Jaffa (Joppa). In cutting a gate through a water battery at an angle of the sea-wall built by Vespasian, and directly in front of the reputed house of Simon the tanner, the men came on three oval-shaped tanners' vats, heaved out of the natural rock and lined with Roman cement, down very near the sea, and similar in every respect to those in use eighteen centuries ago. There is also a fresh-water spring flowing from the cliffs close by, long known as the town spring. This discovery at least proves that the house on the rocky bluff above, and from which steps lead down to the vats, must have belonged to some tanner; and, as perhaps not more than one of that trade would be living in so small a place as Jaffa, some probability is given to the tradition that this is the identical spot where the house of Simon stood with whom Peter was sojourning when he saw his vision. See JOPPA.

17. A well-informed citizen of Jerusalem who persuaded the people to exclude Agrippa from the Temple, but was pardoned for the offence on his confession (Josephus, *Ant.* xix, 7, 4). A.D. 38.

18. Son of Saul, and a distinguished Jew who slew many of the inhabitants of Scythopolis, and finally killed himself, with his entire family (Josephus, *War*, ii, 18, 4). A.D. 69.

19. Son of Gioras of Gerass, and a prominent leader of the Jews in their last struggle with the Romans, according to Josephus, who relates at length some of his exploits against Cestius Gallus (*War*, ii, 19, 2), his intrigues at Masada, his campaigns in Acrabattine and Idumaean (*ibid.* iv, 9, 3 sq.), and his final capture and execution by the Romans (*ibid.* vii, 21, 5, 6). A.D. 70.

20. Son of Cathas and one of the Idumean generals who came at the invitation of the Zealots during the intestine broils at the final siege of Jerusalem. Josephus recites a speech of his on this occasion (*War*, iv, 4, 4). A.D. 70.

**Simon**, a name common to a number of Jewish rabbis and literal, of whom we mention the following:

1. **Simon Durant.** See RASHI.

2. **Simon ben Gamaliel I**, A.D. cir. 50-70, succeeded his father Gamaliel (q. v.). The authentic notices of him are very few. We get a glimpse or two of him in the storm which was then so fiercely raging in Jerusalem. As the resolute opponent of the Zealots, he took an active part in the political struggles whose convulsions hastened the ruin of the state. He also took an active part in the defence of Jerusalem, and fell, one of the many victims of the national struggle. Josephus (*Life*, § 38) says of him: ὁ δὲ Σίμων οὗτος ἦν πύλως μν ἱροολογίων, γίνοντας διὰ σφόδρα λαμπρόν, τῆς ἐπὶ Φορσαλῶν αἱρέσεως, ὡς πάρα πάτρα νόμιμα δοκοῦν τῶν ἀδημοθείων ἀνθρώπων. Ἡμῖν δὲ οὕτως ἀνέθει πλήρες συνέχεια ταῦτα λογίσμου, δυνάμεως τε πρεσβυτέρων καὶ κοινοῦ φρουρίου τῷ κατοίκῳ εὐσφιδεία. His recorded maxim is: "The world exists by virtue of three things—viz., truth, justice, and peace; as it is said, Truth and the judgment of peace shall be in your gates" (*Abod. i, 18*). He also belonged to the ten teachers who were called ἱεραρχοὶ, "the killed for the kingdom," and their death is celebrated on the 25th of Sivan, for which day a fast is ordained. Comp. Schletter, *Lehrbuch der jüd. Zeitgeschichte* (*Leips.* 1874), p. 335, 435, 459; Demberg, *Essai sur l'histoire et la Géographie de la Palestine*, p. 270 sq.; Bick, *Gesch. des jüd. Volkes* (Lissa, 1878), p. 157; Grätz, *Gesch. d. Juden*, iii, 324, 334, 370, 388 sq.; Cessell, *Lehrbuch der jüd. Gesch.* u. *Literatur* (*Leips.* 1879), p. 147, 150, 166, 168, 177.

3. Simon ben Gamaliel II, A.D. cir. 140-160, a contemporary of Nathan the Babylonian (q. v.), was the only schoolboy who escaped from the slaughter at Bethura under Bar-cocheba. He was the father of the famous Judah the Holy (q. v.), and was elected to the presidency when yet a youth. Simon was much regarded by the people for the sake of his illustrious forefathers; but his striving for autocratic power aroused an opposition party.
against him, which rendered his position very difficult. From some of the decisions of Simon which have come down to us, it seems to have been not only a man with a passable knowledge of Hebrew law, but, for a Jew at that time, prodigious knowledge of Gentile literature. He cultivated the study of the Greek language, and gave his countenance to the reading of the Septuagint. Comp. the essay by Ph. Bloch on Simon, in Frankel's Montaschrijf, 1864, p. 81 sq.

4. Simon ben-Hillai, who succeeded his father Hillel II, is said (Baronius, A.D. 1, n. 49), upon the authority of Athanasius and Epiphanius, to have been that same Simon whom Luke described as embracing the infant Saviour in the Temple and pronouncing the •f?¥力求 (ii, 23-28). Whether he is the same Josephus (Ant. xii. 7, 4) describes as accusing king Agrippa of an unholy living, and that he should be excluded from the Temple, since it belonged only to native Jews (προσηνέφθης τοις ἑγγένεσιν) is difficult to tell. Simon's recorded maxim is found in Abod. i, 17: "All my life have I been brought up among sages, nor have I found anything better to keep silence; for to act, and not to explain, is the principle and basis of all; he who multiplies words only induces sin." See Simon 5.

5. Simon ben-Jochai, the reputed author of the Zohar (q.v.), lived in the 2d century. The biographical notices of him are so enveloped in mythical extravagances as to make it difficult to give a true statement of his life. The whole history of the study of the Cabala, in which he was regarded as one of the most eminent masters. He existed in a world of his own, a region beyond the bounds of ordinary nature, and peopled by the genii of his own imagination. His occasional intercourse with his coreligionists did not profane their good affections; he was disliked by some for the moroseness of his disposition, and feared by others from his supposed connection with the spirits of the other world. He had the character of being an unpleasant companion and a bitter opponent; moreover, he merited the reproaches of his countrymen by causing the overthrow of the school at Jamnia. At a time when their Gentile rulers were grudging the Jews the partial relaxation they had lately enjoyed from the severe discipline of Hadrian, and when the jealousy and suspicion entangled against them were so great that the patriarchy, who dared not use the title of nasi nor assume any outward mark of authority, was constrained to screen the ordinary routine of the schools as much as possible from external inspection and obloquy. He resisted the temptation to commit also to the written notes of the lectures, Simon ben-Jochai was rash enough to inveigh against their oppressors in a public discourse. The affair, becoming a topic of public conversation, aroused the displeasure of the civil authorities. A process of law was instituted, and Simon was doomed to die. He managed, however, to escape, and, accompanied by his son, he concealed himself in a cavern, where he remained for twelve years. Here, in the subterranean abode, he occupied himself entirely with the contemplation of the sublime Cabala, and was constantly visited by the prophets. The sages of the Cabala transmitted to him some of its secrets which were still concealed from the theosophical rabbis. Here, too, his disciples resorted to be initiated by their master into those divine mysteries; and here Simon ben-Jochai expired with this heavenly doctrine in his mouth while discoursing on it to his disciples. Scarcely had his spirit departed when a dazzling light filled the cavern, and a young man looked at the rabbi; while a burning fire appeared outside, forming, as it were, a sentinel at the entrance of the cave, and denying admittance to the neighbors. It was not till the light inside and the fire outside had disappeared that the disciples perceived that the lamp of Israel was extinguished. As they were preparing for his obsequies, a voice was heard from heaven, saying, "Come ye to the marriage of Simon ben-Jochai; he is entering into peace, and shall rest in his chamber!" When the funeral procession moved towards the grave, a light revealed itself in the air; and when the remains were deposited in the tomb, another voice was heard from heaven, saying, "This is he who vanquished the quake and the kingdoms to shake!" Such is the statement concerning Simon ben-Jochai, and in its traditional garb it is probably more intended to show the affection and reverence with which this sage was regarded by his disciples. See Fuerst, Bibl. Jud., iii, 329 sq.; Eth sacred, 80 sq., Theolog. hist., 261 sq.; Ginsburg, The Kabbalah, p. 9; Ederer, History of the Jewish Nation, p. 261; Grätz, Gesch. d. Juden, iv, 196 sq.; 470 sq.; Bâche, Gesch. des jüd. Volkcs, p. 199; Cassel, Lehrbuch der jüd. Gesch. u. Literatur (Leips. 1879), p. 176; Herzog, Real-Enclykop., s. v.

6. Simon "The Just" (B.C. cir. 300-200). Under this name he was known 4£<£ to the πρὸς οὐδέποτε καί το πρῶς οὖμενί θησαυρόν (Josephus, Ant. xii. 2). Derenbourg has conclusively established that this Simon is the same that is spoken of in Ecclesiasticus. There are many legends about him. According to one, it was he who encountered Alexander the Great; according to another, he was the last survivor of the great Synagogue (Παλαιότερης Εκκλησία); according to another, it was he who warned Poltemy Philopator not to enter the Temple. All the traditions, however, as far as they represent Simon the Just, refer to the better days of Judaism. "Down to his time," says Stanley (History of the Jewish Church, iii, 276 sq.), "it was always the right hand of the high-priest that drew the lot of the consecrated goat; after his time the left and right visaged and varied. Down to his time the red thread round the neck of the scape-goat turned white, as a sign that the sins of the people were forgiven; afterwards its change was quite uncertain. The great light at the entrance of the Temple burned, in his time, without fail; afterwards it often went out. Two fagots a day sufficed to keep the flame on the altar alive in his time; afterwards piles of wood were insufficient. In his last year he was said to have foretold his death, from the observation that on all former occasions he was accompanied into the Holy of Holies on the Day of Atonement, to the entrance only, by an old man clothed in white from head to foot, in that year his companion was attired in black, and followed him as he went in and came out. These were the forms in which the later Jewish belief expressed the sentiment that the last Lotus was not so much to visit the Temple, as which he should attend the other. In the book called Ecclesiasticus we are told of Simon's activity for his people. Thus he made the city of Jerusalem, which had suffered much through the wars, a great stronghold, in order that it might not be so easily taken, for which many glowing promises continually sprang up. The Temple Simon also fortified, repaired all damaged places, and raised the foundation of the fore court. The reservoir in the Temple, holding the water, he enlarged to the extent of a pond, in order that the inhabitants might not suffer from scarcity of water in case of a siege. Since this reservoir is dccaled by the ecclesiastics the water of store, which, in a hot clmate, and on dry soil like Jerusalem, was looked upon with great astonishment. If Simon thus cared for the material interest of his people, he was not the less severed from the idea of Judaism, that Israel's strength does not depend upon such means. "Of three things Israel's salvation is maintained: the業eousness of the kingdom is the compromise of the two extremities upon observance of the law (Torah); upon recognition with God by virtue of means of grace, which the Temple worship furnishes (Adonah); and upon works of charity (Genulath Chasidim)." His piety was a purified one, free from ascetic excess. His period, full of wars and troubles, brought about many evils, although the strictly pious sought, as during the time of the prophets, to withdraw from human society altogether,
and to consacrse themselves in vowing to lead a Nazaritish life—the first step to the sect of the Assiduans. Simon did not like his mode of life, and showed his protest against it by not allowing the priests to use the pieces due to them from the sacrifices of the Nazarites. Only once he made an exception in favor of a young beautiful shepherd who came to him as a Nazarite.

"Why do you wish," inquired the high-priest of the youth, with a splendid head full of ringlets, "to destroy the beautiful head of this sheep, which I gave you?"

Simon replied, "Because my head full of ringlets has nearly enticed me to sin from mere vanity. Once I saw my reflection in a clear stream, and, as my likeness thus met my eye, the thought of self-deification took hold of me; wherefore I consecrated my hair unto the Lord through the Nazarite vow." On hearing these words Simon kissed the young shepherd of such morally pure simplicity, and said to him, "Oh, if there were only in Israel many Nazarites like yourself!" Beautiful, indeed, is the magnificent eulogy of Ben-Sira, the writer of Ecclesiasticus, in which he describes our Simon (I, 1–21):

"How beauteous he was when coming forth from the temple. He appeared from within the veil! He was as the morning star in the midst of clouds, and as the moon in the days of Nisan: As the sun shining upon a palace, and as the rainbow in the cloud: As the waveing wheat in the field, as the Persian lily by a fountain, and as the trees of Lebanon in the days of vintage: As a crown of gold of variegated beauty and adorned with precious stones: As a king's son whose beauty is perfect, and as the tree of anointing whose branches are full."

This description, says Stanley, "is that of a venerable personage who belonged to a noble age and would be seen again no more." See Derosenb, Essai sur l'Histoire et la Geographie de la Palestine, p. 47–51; Grätz, Gesch, d. Juden, iv. 260 sq. and his Leipzig Bar-Napacha (q. v.). Ben-Lakish, or more commonly Resh-Lakish, is the same who held that the book of Job was only an allegory, an allegory, koteh dereh kara, i.e. "Job never lived and never existed, but is a parable."

8. Simon ben-Shetach was the brother of Alexander (q. v.), queen of Alexander Jannaeus (q. v.). When the Jews revolted against Jannaeus and six thousand were killed, Simon ben-Shetach was saved by escaping to Egypt; but soon returned to Jerusalem, having been recalled through the influence of his sister. By way of supplement to what has already been stated on Simon ben-Shetach in the art. Scribes (q. v.), we will add the following. He was a man of inflexible rigor, a high-minded ecclesiastic, sensitive within, thought it no sin to refuse forgiveness to an adversary, and was every day without fail to magnify his office before his flight to Alexander in the Talmud (Shabb. 105a, tr. 92ב 14ב) we read the following: "One of the king's servants had committed a murder and then absconded. The king, as master of the fuggitive, was summoned to answer for his servant, and, as master, did honor to the law by coming. As king, he remembered his dignity and sat down in court, Ben-Shetach being judge.

"Stand up, king Jannai!" shouted this haughty judge, "stand up upon thy feet while they bear witness concerning thee; for thou dost not stand before us, but before Him who supremely and alone was. The royal displeasure was so signally manifested in consequence that a law was enacted to this effect: 'The king neither judges nor is judged'" (Mishna, ii. 1). See Grätz, Gesch. d. Juden, ii. 107, 109, 111, 126, 133; Rule, History of the Karaites Jews, p. 22 sq.; Derosenb, Histoire et Geographie de la Palestine, p. 96 sq.; Pick, The Scribers Before and in the Time of Christ, in Lutheran Quarterly, 1878, p. 260 sq.; Schirer, Lehrbuch der neuesten Zeitgeschichte, p. 122 sq., 128 sq., 411, 432, 454. (B. P.)

Simon, Count de. See Saint-Simon.

Simon of Sudbury was archbishop of Canterbury in 1375, lord chancellor in 1379, and was murdered by Wat Tyler's followers June 13, 1381.

Simon of Tournay was a dialectician who taught in the University of Paris at the beginning of the 13th century, and who was among the first to apply the Aristotelian philosophy to theology. He is charged by Matthew Paris with having on one occasion interrupted his lecture, in which he had refuted certain arguments raised by himself against the doctrine of the Trinity, with the exclamation "O Jesus, Jesus, how much have I done to establish and honor thy teachings! If I were to become their opponent, I could certainly attack them with yet sterner and more objectionable words!" Upon reflecting upon both speech and memory; and though he subsequently recovered his mind to some little degree, he was unable to impress on his memory more than the Lord's Prayer and the Creed. Thomas Cantipratinus ascribes to him the crime usually attributed to the emperor Frederick II. of having said in the library of Noto, "There are three who have deceived and oppressed the world through their sects—Moses, Christ, and Mohammed." Both writers assert, but do not adequately prove, the immorality of Simon's life. Henry of Ghent, who became a doctor of the Sorbonne in about 1293, and who held a canonry at Tournay, merely says that Simon had followed Aristotle too far, and that he was for that reason regarded by some as a heretic. None of Simon's writings have appeared in print. The list of them is given by the authors of the Hist. Littérature de la France, xvi, 398, and they state that nothing is contained in them which conflicts with the belief of the Church."

Simon (Sr.) and Jude's (Sr.) Day, a holy day appointed by the Church for the commemoration of these two holy men, is probably derived from the relationship (Matt. xxii, 55). Oct. 28. When this festival was instituted history does not inform us; but it is usually referred to the 12th or 13th century. See Riddle, Christ. Antig.; Hook, Ch. Dict.

Simon, Honoré Richard, a French scholar, but no connection of the following, was born at Castellaune in the latter part of the 17th century. After having been curate of St. Uze, a small parish in the neighborhood of St. Vallier, he went for his health to Lyons, where he compiled his Grand Dictionnaire de la Bible (1693, 40v.), a work the reputation of which is attested by several later editions (ibid. 1713, 1717, 2 vols. fol.), and which maintained its place till supplanted by that of Caumet, who made great use of it in his own Dictionary. Simon died at Lyons in 1693.

Simon, Richard, a French Hebrew scholar, was born May 13, 1638. He entered the Congregate of the Oratory in 1642, and soon distinguished himself in Oriental studies. He taught philosophy first at Jully and then at Paris, where he employed himself in forming a catalogue of the numerous and valuable Oriental MSS. in the library of the Oratory, and hence making collections which assisted him greatly in his subsequent labors. From the beginning of his career he was distinguished by a boldness of thought and action which is rarely found in members of his communion;
SIMONETTA

and the first work of magnitude which he attempted was prompted by the offer of 12,000 livres by the Protéstantes of Charenton for a new translation of the Bible in place of that of Geneva, in which the object of this work he denies that Moses was the author of the Pentateuch, and attributes its compilation to scribes of the time of Estas, acting under the direction of the Great Synagogue. So daring a criticism could not fail to excite the alarm of his censor Prost, and the book was by him submitted to Bossuet, who obtained an order from the chancellor to forbid its publication until more rigorously examined. The result of the examination was a decree of council suppressing the work, and ordering all copies of it to be destroyed. One of these escaped, and was the basis of a destructive edition published by the Elzevirs in Holland. A Latin translation by Aubert de Verse is still more defective. But a very correct edition, with preface, apology, marginal notes, and historical tracts, was published at Rotterdam in 1685 by Rainer Leers. An English translation was published in London in 1682. In consequence of his views, Simon was compelled in 1678 to quit the Oratory, and retired to the village of Belleville in Normandy, where he died in 1694. In 1682 he resigned this charge and went to Paris, where he occupied himself entirely in literary labor. He finally returned to Dieppe, where he died of fever April 11, 1712. He bequeathed his MSS. to the cathedral of Rouen.

Besides the above work, Simon published a large number of others, chiefly on Biblical subjects, which are enumerated in Hoefer, Nouv. Biog. Générale, s. v.

Simonne, Giacomo, an Italian cardinal, was born at Milan about 1475, and after education at Padua and Pavia was made priest and went to Rome, where Julius I appointed him advocate consistorial in 1555, and later auditor of the Rota. Clement VII gave him the bishopric of Pesaro in 1529, and Paul III created him cardinal in 1555, giving him also the bishopric of Perugia as well as the administration of the dioceses of Lotri, Nepi, and Conza. Simonetta died at Rome Nov. 1, 1559, having published only two treatises: De Reservatibus Beneficiisius (Cologne, 1588; Rome, 1588), and De Vita et Miraculae Francisci de Paula (ibid., 1559).

His younger brother, Giacomo Filippo, likewise born at Milan, also became an ecclesiastic, and was provided with rich benefices. He wrote Epigrammata (Milan, s. d.) and other poems.

Simonet, Ludovic, an Italian cardinal, was born at Milan early in the 16th century. After having received the diploma of doctor in utroque jure (1558), he entered holy orders, and succeeded his uncle Giacomo as bishop of Pesaro in 1556. In 1560 he was called to the episcopal see of Lotri, and was made cardinal in 1561, and in 1564 one of thelegates at the Council of Trent. He died at Rome, April 30, 1568. There is preserved in the Ambrosian Library at Milan part of his Correspondence with Charles Borromeo, whose friend he was.

Simionis, a heretical sect which arose in the 2d century, and owed its origin to the antimessianist influence and teaching of Simon Magnus (q. v.). The recent discovery of The Refutation of All Heresies, a work written by Hippolytus early in the 3d century, gives a summary of a work by Simon Magnus, called The Great Announcement, a Revelation of the Voice and Name Recognizable in the History of the Jewish Interlude of Great Indefinite Power, in which his system was set forth. That system is one of thorough and unflinching pantheism. He introduced into his very definition of the Divine Nature that its substance is exhibited in material things. He ascribes the formation of the world to certain portions of the divine fulness (αός). The originating principle of the universe is fire, of which is begotten the logos, in which he subsists actively when the image of the godhead, the image of which power is the spirit of God. These αός, called roots, are in pairs—mind and intelligence, voice and name, ratiocination and reflection. In them resides, coexistently, the entire indefinite power, potentially with regard to these "secret" portions of the logos, in which he subsists actively when the images of these portions are formed by material embodiment. For mind and intelligence becoming "manifest" are heaven and earth; voice and name are sun and moon; ratiocination and reflection are air and water. The indefinite power becomes then the seventh actual power of the God, their whole power being reduced to four elements. The logos employs the divine roots or αός, which are both male and female. To the first pair of αός is assigned the first three days' work of the creation; to the second pair is referred the fourth day; to the third pair the fifth and sixth days. Every man may become an embodiment of the logos; an "image," that is, of the logos, a conversion of the "secret" portion of the divine power into the "manifest." In this system the persons of the Trinity are confused, and Simon professed himself to be the Power of God, with the right of assuming the name of any of the three. Simon taught that Jesus was a man, and that the human sufferings and atonements which were the system of Simon, a heresy not properly classed with those that bear the name of Christ (Epiph. Hær. xxi. 1). The Simionians pretended to be Christians that they might insinuate themselves into the Church; and many convicted of this heresy were excommunicated (Eusebius, Hist. Eccl. ii. 1, 18). The pretensions of Simon were supported by magic, and magic in several forms was practiced by the sect. Many see nothing unreasonable or unscriptural in supposing that supernatural agencies, the power of evil spirits, may have been permitted to enter into such delusions. Ireneaus accuses the sect of lewdness, and his statement is confirmed by the Great Announcement itself, which speaks of promiscuous intercourse of the sexes as "unconforming another another" (Hippolytus, Refut. Hær. vi. 14). Of the number of this sect Justin Martyr writes that almost all the Samaritans, and a few even of other nations, worshipped Simon. Simon had been much honored at Rome, but after his infamy and the preaching of the Gospel, Origen writes, about A.D. 240, that not thirty of Simon's followers could be found in the whole world (Contr. Cels. i. 57). By almost universal consent Simon is regarded as the first propagator in the Church, but acting from without, of principles which developed into Gnosticism. Indeed, there are many points in common: i. e. both reject the notion of absolute creation; both hold the unreality of the Lord's body. See Bunsen, Hippolytus, i. 47, 48; Burton, Bampton Lectures; Blunt, Dictionary of Sects, s. v.

Simonian, Saint—See Saint-Simon.

Simonis, Johann, connoisseur of the gymnastics and professor of Church history and antiquities in the University of Halle, was born Feb. 10, 1698, at Drusen, near Schmalkalden, and died Jan. 2, 1766. He wrote, Omo- nisticum Vet. Test. sive Tractatus Philosophicus, in quo Nomina Vet. Test. Propria, etc. (Halle, 1756—Antidoto Grammatico-critico in Lexicon Graecum, etc. (ibid. 1752)—Introductio Grammatico-critica in Linguam Hebraicum, etc. (ibid. 1758)—Lexicon Manusue Her. et Chald. (ibid. 1755; Anmst. 1757 and often; last ed. by Winer, Leipzig, 1828; Engl. trans. in two vol. of the American Translators of Classical and Hebraic Texts by John Brown) (ibid. 1758). Omonasticum Translated and Improved, Lond. 1832—Omonasticum Novi Test. et Librum Vet. Test. Apocryphonum, sive Tractatus Philol. quod Nomina Propria Novi Test. et Librorum Apocryphon Vet. Test. et Librorum Origi-
Simonton, Asbury Green, a missionary of the Presbyterian Church, was born at West Hanover, Dauphin Co., Pa., Jan. 20, 1833. He prepared his preparatory studies in the academy at Harrisburg, Pa., graduated at the College of New Jersey in 1852, studied law in 1854, and was admitted to the privileges of the Church in May, 1855. He entered the Theological Seminary at Princeton in September of the same year, and at an early stage of his course was led to consider his duty in relation to the foreign missionary work. He was licensed by Carlisle Presbytery, April 14, 1856, and his formal application to the board for appointment as a foreign missionary was sent to New York Oct. 25, 1856. The executive committee decided to send him to Brazil, and he was named as a member of the several companies. The time fixed upon for his departure was May, 1859. Meanwhile he spent two months in New York, taking lessons in the Portuguese language, and lecturing, as opportunity was afforded, upon Brazil. He was ordained by the Presbytery of Carlisle, April 14, 1859. His sermon on this occasion was upon the words, "Come over into Macedonia and help us," and it was an able presentation of the claims of the unevangelized upon the Church, and was afterwards published in Dr. Van Rensselaer's Presbyterian Magazine. He arrived at Rio Janeiro Aug. 12, 1859, and, after two years of study and explorations of the field, began a Bible-class, May 19, 1861, at which two were present; but the audiences soon increased to such dimensions that larger accommodations were demanded. In 1863 it was deemed best to enlarge the operations of the mission by taking in the province of São Paulo. In November, 1864, appeared the first number of the Imprensa Evangélica, a semi-monthly paper established for the diffusion of religious intelligence among the more cultivated class of minds. The greater part of the labor of writing for its columns and superintending its publication devolved upon him until September, 1866, when he had an assistant. The unanimous impression of those who read his leading editorials in the Imprensa was that they were characterized by great ability, clearness, and comprehension of the subjects treated. The paper continued to increase in circulation, and during the three years of its connection with it much good was effected through its instrumentality. In March, 1865, Mr. Simonton made a missionary tour into the province of São Paulo, and while there the President of Brazil ordered him to return Dec. 26, 1867. Mr. Simonton possessed a clear, penetrating intellect, well disciplined by diligent study. He excelled as a preacher, and had few superiors as a sermonizer. He greatly loved the missionary work, for which he was eminently fitted by nature, culture, and grace, and lived as if the work was last with his earthly energies. See Wilson, Prob. Hist. Mission, 1868, p. 155. (J. L. S.)

Simony, the crime, in ecclesiastical law, of buying or selling holy orders and offices. The term is derived from the sin of Simon Magus (q. v.), who wished to purchase from the apostles money for the power to confer the Holy Ghost (Acts xii, 19). The ancient Christian Church distinguished simony into three different kinds: 1. Buying and selling spiritual gifts; 2. Buying and selling spiritual preferments; 3. Amibitious usurpation and sacrilegious intrusion into ecclesiastical functions without legal election or ordination. Of course the first sort was that which most properly had the name of simony, resembling most closely the sin of Simon Magus. This crime was thought to be committed when money was offered or received for ordination or consecration to the sacred offices or for the consecration of the several churches of the Church. The apostolical canons (Can. Apost. 29) seem to lay a double punishment, both deposition and excommunication, upon such of the clergy as were found guilty of this crime. Among the councils which have condemned simony are Chalcedon; second Council of Orange; Council of Constantinople, 1, 4, 6, 7, 8, 10, 11, 12, 13; Nicephorus, fourth, eighth, and eleventh of Toledo; second of Nices; Rhedia; Placentia; and Trullo—the term of the canons being according to the various circumstances and forms of the crime prevalent. The ancients also include in this sort of crime the exacting of any reward for administering baptism, the eucharist, confirmation, burying the dead, consecration of churches, or any like spiritual offices. The second sort of simony (traffic in spiritual preferments) was denounced by both ecclesiastical and secular laws (Concil. Chalced. can. 21; Justinian, Novel, 123, c. 1), the former ordering the deposition of the bishop that "sells grace to sale, and ordains a bishop, etc., for money," and the latter of the emperor Constantine the Great to make oath that he did not choose the party elected either for any gift or promise, etc. The third sort of simony was when men by ambitious arts and undue practices, as by the favor and power of some wealthy or influential person, got themselves invested in any office or preferment to which they had no regular call or legal title; or when they intruded themselves into other men's places, already legally filled. Thus Novatian got himself secretly and simonically ordained to the bishopric of Rome, to which Cornelius had been legally ordained before him (Cyprian, Ep. 92, al. 55, ad Antonium). Such ordinations were usually vacated and declared null, and both the persons and their ordinations declared criminal by degradations and reduction to the state and communion of laymen. There were also general imperial laws made by Gratian and Honorius (Cod. Theol. lib. xvi, tit. 2; De Eccl. Leg. 35 Honorii), obliging all bishops who were censured and deposed by any synod to submit to the sentence of the synod, under the penalty of being banished a hundred miles from the city where they attempted such disturbance. See Bingham, Christian Antiqu., bk. vii, ch. vi, § 28-30.

This crime became quite common in the Church during the 11th and 12th centuries. Benedict IX, when a boy of twelve years (A.D. 1053), was elected pope, interceding with nimble cunning. Guibert, bishop of Milan (A.D. 1059), lamenting the prevalence of simony in his Church, promised for himself and successors utterly to renounce it. Hildebrand, afterwards Gregory VII, was a vigorous opponent of the practice. At a council at Lyons the archbishop and forty-five bishops confessed themselves simoniacal and were deposed. The fourth of the canons of 1003 (Church of England) is directed against simony, as being "execrable before God," and provides an oath to be taken personally by every one admitted to a benefice that no simoniacal payment, contract, or promise has been or shall be made. While in great Britain the cognizance of simony and punished simoniacal offenses as originally to have belonged to the ecclesiastical courts alone, the courts of common law have held simoniacal contracts void, as being contra bonos mores and against sound policy. According to English law (statutes of Eliz. and 12 Anne, c. 12, 7; 8 and 9 George IV, c. 25; 9 and 10 William and Mary, c. 41) it is not simony for a layman or spiritual person, not purchasing for himself, to purchase while the church is full either an advowson or next presentation, however immediate may be the prospect of a vacancy, unless that vacancy is to be occasioned by some agreement or arrangement between the parties. Nor is it simony for a
SIMOOM

spirtual person to purchase for himself an advowson, although under similar circumstances. It is, however, simony for any person to purchase the next presentation while the church is vacant; and it is simony for a spiritual person to purchase for himself the next presentation, although the church be full. See Milman, Latin Christianity, iii. 237, 244, 370 sq.; vii. 270; Willis, Hist. of Simony (Lond. 1865, 2d ed.); and the monographs cited by Volbeding, Index Programmatum, p. 75.

SIMOOM. See Wind.

Simpkins, Solomon G., a minister of the Methodist Episcopal Church, South, was born in Maryland in 1811; moved to Vicksburg, Miss., in 1827; was commissioned and became a member of the Mississippi Conference. In 1849 he was appointed to Bayou Pierre Circuit, but died before he could reach it. See Minutes of Annual Conferences of M. E. Church, South, 1849, p. 243.

Simple Feasts were, according to the Salisbury use, those on which only the initial words of the antiphon to the Benedictus and Magnificat were sung. These were used under three classes, the first, of nine lessons, with triple or double invitatoy; the second, of three lessons, with double invitatory; the third, of three lessons, with simple invitatory; the latter, in distinction from the former two, were marked "nine regimine chori." Simple feasts, like feasts and vespers, had a distinctive form.

In the Roman use simple feasts, without ruling the choir, are classed as simples; the simple, with ruling the choir, as semi-doubles. Accordingly, the highest class of Salisbury simples became the Roman doubles, to which succeed greater doubles, doubles of the second, and doubles of the first class.

Simplicius (simple), a term of reproach frequently bestowed upon the early Christians.

Simplicianus, archbishop of Milan (388-400), was a friend and teacher of Ambrose, who wrote to him four epistles (comp. Migne, xvi, 574). Augustine dedicated to Simplicianus his De Diversis Questionibus, and mentions him very often. Virgilius of Trent addressed to him his De Martyrio S. Virginii et Sociorwm (Migne, vol. xiii), and Emodius of Favia wrote an epigram in his honor. Simplicianus was canonized under three classes, the first, of twenty-seven, March 2, 483, and his memory is honored in the Roman Church annually on the recurrence of that date. See Hertzog, Real-Encyclopaedia, s. v.

Simplicius, a philosopher of the 6th century, was a native of Cilicia, a disciple of Ammonius the Peripatetic, and endeavored to unite the Platonie and Stoic doctrines with the Peripatetic. Disturting his situation under the governor Justinian, he went to Chosroes, king of Persia, but returned to Athens after it had been stipulated in a truce between the Persians and the Romans, A.D. 549, that he and his friends should live quietly and securely upon what was their own, and not be compelled by the Christians to depart from their religious profession. He died March 2, 549, and his memory is honored in the Roman Church annually on the recurrence of that date. See Hertzog, Real-Encyclopaedia, s. v.

Simpson, Benjamin Franklin, a minister of the Methodist Episcopal Church, South, was born in N. Y., Dec. 30, 1858, and was educated at Wilberforce, Mass., in 1884. In 1888 he went to Ohio, to take charge of an academy; then to the Biblical Institute at Concord, in 1860. He joined the Newark Conference in 1862; was drafted into the army July 13, 1864, and in October was appointed chaplain. In September, 1866, he returned from the war and resumed his ministerial work, which he was obliged to give up early in 1869. He died at Hanover, N. J., July 12, 1871. See Minutes of Annual Conferences, 1872, p. 34.

Simpson, David, an English clergyman, was born at Ingleby, Yorkshire, Oct. 12, 1745. He was educated at St. John's College, Cambridge, and was successively curate of Stamford, Essex, of Buckingham, and of the Old Church, in the city of London. In all his later years he had an aversion to Methodism gave offense, and, while at the last place, he was silenced by the bishop of Chester. But his friends erected a new edifice (Christ Church, Macclesfield) for him, in which he officiated until his death, in 1799. He published, Sacred Literature (Birm. 1788-90, 4 vols. 8vo)--De Digestione Testamentorum (1788) --Key to the Prophecies (Maccles, 1795, 8vo; ed. 1812, 8vo) --A Plea for Religion, etc. (Lond. 1802, 8vo, with numerous later editions) --A Plea for the Deity of Jesus and the Doctrine of the Trinity (1812, 8vo) --Sermons (8vo). See Allibone, Dict. of Brit. and Amer. Authors, s. v.

Simpson, Edward, S.T.D., a learned English divinity, was born at Tottenham, in May, 1576. Having been prepared at the Westminster School, he entered Trinity College, Cambridge, from which he graduated in 1600, and the next year was admitted fellow. In 1608 he received his degree of A.M., and his A.B. in 1610. He was chaplain to Sir Thomas Finch, 1615-18, and rector of Eastling in 1618, in which year he took his degree of D.D. He was a man of piety and learning, and was educated at the University of Corningham. He died in 1651. He published, Mosaca, etc. (Cantab. 1636, 4to) --Positive Divinity:--Knowledge of Christ:--God's Providence in Regard to Evil: --Regeneration Defended: --Declaration: --De Justificationes:--Note Selections in Horatianum, etc. See Allibone, Dict. of Brit. and Amer. Authors, s. v.

Simpson, George W., a Presbyterian minister, was born near Churchtown, Lancaster Co., Pa., June 1, 1821. He early embraced religious feelings. In 1841 he was called to be his duty to preach; he pursued his studies at Easton College, Pa., and Princeton Theological Seminary. He chose Africa as his field of labor, and sailed for the Gold Coast in Sept., 1849, where he was cordially received by Rev. J. L. Wilson and other missionaries. Corisco was chosen as a station and residence, and Mr. Simpson's wife immediately occupied it. They embarked March 25, 1850, in an English vessel for Fernando Po, but on the evening of April 2 the ship was capsized by a tornado, and all on board except one of the crew were lost.

Simpson, Robert, D.D., a Scottish divine and instructor, was born at Little Tillyelle, near Milnathort, in Kinross-shire, Feb. 15, 1746. Having completed his academical studies, he entered the University of Edinburgh, and was ordained minister of the parish of Saughton, in 1775. He remained there until 1782, when he retired from the parsonage and became residentiary of the church of Edinburgh, and was immediately succeeded by the Rev. Dr. John Sinclair, to whom he was the first member of the church of Edinburgh. He retired in 1784, and died in 1795.

SIMPSON, 782

SIMULTANEUM

tention. He was chosen president of the Dissenting school afterwards known as the Hxton Academy, and applied himself wholly to this work. His health failing in May, 1817, he tendered his resignation, although he continued to lecture his classes as often as illness would permit. He died Dec. 21, 1817.

Simpson, or Symson, Sydrach, B.D., a Puritan divine, was educated at the University of Cambridge, and became curate and lecturer of St. Margaret's, Fifth Street, London. He was summoned before archbishop Wharton in conformity in 1635, and retired to Holland. Returning to England at the commencement of the civil wars, he was chosen one of the Assembly of Divines in 1643. He joined the Independents against the Presbyterians, was appointed by Cromwell's visitors master of Pembroke College, Cambridge, in 1650, and died in 1655. He published several scholastic and theological treatises, for which see Darling, Cyclop. Bibl. a. v.; Watts, Biblio. Brit. a. v.

Simpson, William, a minister of the Methodist Episcopal Church, was born in Huntingdon County, Pa., Jan. 22, 1812. He professed conversion and united with the Church in June, 1832, and received license to preach June 3, 1837, at Bloomington, Ill. He entered the Semi-Theological School in Sept., 1837, and was ordained deacon in Sept., 1839, and elder in August, 1841. His ministry closed with his life, Feb. 22, 1864. See Minutes of Annual Conferences, 1864, p. 178.

Sim'ri (1 Chron. xxvi, 10). See Shimmri.

Sims, Edward Drumgoole, a minister of the Methodist Episcopal Church, South, was born in Brunswick County, Va., March 24, 1805. He graduated at the University of North Carolina in 1823; was tutor in that institution, and afterwards principal of an academy at La Grange, Ala.; and on the establishment of the college at that place was elected professor of mathematics and natural philosophy. He then travelled two years in connection with the Tennessee Conference; afterwards was professor of languages in Randolph Macon College, Va. In 1836 he visited Europe and spent two years at the University of Halle, in Germany; in 1837 he travelled through France and Germany, Italy, Holland, Belgium, and England; in 1838 he returned to the United States, and filled the chair of English literature in Randolph Macon College; and in December, 1841, was elected by a unanimous vote of the trustees of the State of Alabama to the state department in this University. He died April 12, 1845. Prof. Sims was a man of various, extensive, and accurate learning, especially in the department of language in general. Besides the ordinary classics, he wrote and spoke French and German. He was master of the philosophy of language, and almost the entire circle of the sciences; and had collected materials for an Anglo-Saxon grammar, and also for an English grammar, which he designed publishing. As a minister, the qualities of his mind and piety infused themselves into his preaching and distinguished it. Eminent as he was in learning and the social virtues, his Christian character was his highest ornament. His religion was deeply experimental. See Minutes of Annual Conferences of M. E. Church, South, 1845-58, p. 48; Sprague, Annals of the Amer. Pulpit, vii, 766. (J. L. S.)

Simistria, a goddess of the Slavic mythology, chiefly worshipped by the Russians, but not unknown among the Poles. She was the awaker of spring, and the wife of Fogoda (the weather). She possessed wonderful power over the rain.

Simultaneum (scil. Religionis Exercitium) is a term which in Europe designates, in its general bearing, the religious services common to churches or denominations having diverse creeds, and which has particular reference to the employment in common of certain religious arrangements and institutions.

The denial of a churchly character by Romanism to any but the Papal Church renders a simultaneum impossible on their part, but the Peace of Westphalia in 1648 insured to the Evangelicals both that character and the resultant rights of worship. The progress of the new Church, however, was irregular, in some places being much more vigorous and rapid than in others, so that the relations existing between Romanists and Protestants were very diverse; and it was thought necessary to establish a general prescription of the exercise of a common worship. These prescriptions erected a barrier against religious persecution on the part of a sovereign prince, but they also suggested the denial of religious privileges to certain parties, since the status of the year 1624 was made the condition for granting the free exercise of religion—those who had then enjoyed it being held to be entitled to a continuance of the privilege, while others were generally, though not always, judged to have no claim to its enjoyment. These regulations were intended to settle the case as between Romanists and Protestants. A different arrangement was calculated the affairs of the Lutheran and the Reformed parties, so that the condition of the churches at the conclusion of the Peace of Westphalia was the basis of their future relations.

The advisability of a simultaneum was much debated in Germany, until the recess of the diet resolved, Feb. 25, 1808, § 59, that "the exclusive exercise of religion as hitherto, in any country shall be prevented against all interference and interruption; especially shall the possession and undisturbed enjoyment of its separate ecclesiastical property, including the school-" fund, be insured to each religion according to the directions of the Peace of Westphalia. The sovereign may, however, tolerate the adherents of other religions and allow them the exercise of all civil rights."

The simultaneum does not affect the dogmatic relations of the several churches. The Church of Rome still regards Protestants as heretics and schismatics, and refuses to recognise the validity of their services; and the different sections of Protestantism have frequently maintained towards each other an attitude no less hostile. Circumstances, however, have done much to bring about a state of things in which the spirit of a simultaneum is measurably realized. Legislation has done much in this regard, and the felt need of fraternal relations has not been least among the influences at work.

When the simultaneum has been fixed by special treaties, it must be judged in accordance with their terms, otherwise general principles must determine. The State does not assume the right to ordain the observance of the usages belonging to one religious community by another different community on religious grounds; but it may extend the benefits of institutions enjoyed by any community to others as well, e.g. when civil functions have been intrusted to the clergy of a particular Church, or when but a single burial-ground is available for any community.

It is reported (Prot. Kirchen-Zeitung, 1854, No. 5, p. 102) that a very peculiar simultaneum existed at Gildenstein, in Osnaburg, during two hundred years prior to 1850. A Roman Catholic and an Evangelical congregation had a common house of worship, and employed in common a Roman priest and a Protestant clerk. The priest and Romanists began the service with the Introit, after which the Evangelicals chanted the Kyrie Eleison. Alternate chantings and readings followed, until the offering of the mass, in which the Evangelicals took no part. A sermon was preached to both parties in common, and was usually followed by the singing of an appropriate euchologion. An instance is mentioned in which a sermon assailing the Lutheran Confession of Faith was followed by the singing of Luther's hymn, "Eine feste Burg," etc.

In America what are called "Union Services" are frequently held in a church used in common by several denominations. In such cases the services are some-
times of a mixed character; at other times the different denominational services are held alternately.

On the general subject, see Instrum, Paiva Omahray; Putter, Geist des westphal. Friedens (Gotz, 1785); Emmler, Dain, de Pactorum Hildena, in Conferr. Concill. Cathol., Doctor, circa Simulaneam Efficiens (1757, 1771); and in Schmidt, Theaur. Juris Eccles. v, Nov. 7, 8, p. 257 sq.; 326 sq.; Durr, Dain, de eo, quod Justum est circa Jus Reform. in Territor, Oppressurato, etc. (Mogunt, 1700, and in Schmidt, loc. cit.); Schottl, Gegenfeit, Gemeinach, in Catholic, Concill. de, Kirchlichen u. Kirchlichen (Regensburg, 1858). Concerning the Austrian law of Jehovahs, see:

SIN (Heb. Sin, סין; Sept. Zeis [v. Tänu] or Σινήν; Vulg. Pulsusium), the name of a town and of a desert perhaps adjoining, upon which modern researches have thrown important light.

1. A city of Egypt, which is mentioned in Ezek. xxxii, 15, 16, in connection with Thebes and Memphis, and is described as "the strength of Egypt," showing that it was a fortified place. The name is Hebrew, or, at least, Semitic. Gesenius supposes it to signify "clay," from the unused root סין, probably "he or it was muddy, clayey." It is identified in the Vulg. with Pulsusium, פולסיון, "the clayey or muddy" town, from פולס, and seems to be preserved in the Arabic Et-Tineh, with the slight variation of removing the ending of the name, Tneeh, the Mouth of Et-Tineh, the supposed Pulsusian mouth of the Nile, and Burg or Calat-et-Tineh, the Tower or Castle of Et-Tineh, in the immediate neighborhood, "tn"signifying "mud," etc., in Arabic. This evidence is sufficient to show that Sin is Pelusium. The ancient Egyptian name is still to be sought for; it has been supposed that Pelusium preserves traces of it, but this is very improbable. Champollion identifies Pulsusium with the Pseorus or Perseus (the second being a variation held by Quatremère to be incorrect) and Barsoun of the Copta, Et-Farmâ of the Arabs, which was in the time of the former a boundary-city, the limits of a governor's authority being stated to have extended from Alexandria to Filak-h, or Philae, and Peremoon (Acts of St. Sarapam Ws. Capt. Vat. 67, fol. 90, ap. Quatremère, Mémôres Géog. et Hist. sur l'Egypie, i, 269). Champollion ingeniously derives this name from the article पृ, prefixed to र्, "to be," and отर् (Arab. لر, "meaning, purpose"). Et-Egypie, i, 92-97; comp. Brugsch, Géogr. Inschr. p. 297, 298, interprets it as Arabic, an Egyptian Ha-reem, which he reads Me-rema, on our system Pe-reem, "the abode of the dragon," or of the fish rem (ibid. pl. iv, No. 1679). Pelusium he would make the city Samath (or, as he reads it Sam-hud), remarking that "the name of the city Samsu" is the only one which has the determinative of a city, and comparing the evidence of the Roman nome-coins, on which the place is apparently treated as a nome; but this is not certain, for there may have been a Pelusian nome, and the etymology of the name Samath is unknown (ibid. p. 128; pl. xxvii, 17).

The exact site of Pelusium is not fully determined. It has been thought to be marked by mounds near Burg et-Tineh, now called El-Farmâ and Et-Tineh. This is disputed by Capt. Spratt, who supposes that the mound of Abu-Khiydar indicates where it stood. This is further inland, and apparently on the west of the old Pelusian branch, and not Pelusium. It is situated in the two Farmas, or Tel-Dedefenah. Whatever may have been its exact position, Pelusium must have owed its strength not to any great elevation, but to its being placed in the midst of a plain of marsh-land and mud, never easy to traverse. The ancient sites in such alluvial tracts of Egypt are in general only sufficiently raised above the level of the marsh, and the land being from being injured by the inundation. It lay among swamps and morasses on the most easterly estuary of the Nile (which received from it the name of Osiut Pelusiacum), and stood twenty stades from the Mediterranean (Strabo, xvi, 760; xvii, 801, 802; Pliny, Hist. Nat. v, 11). The site is now only approachable by boats during a high Nile, or by a donkey. When the sun has dried the mud left by the inundation; the remnants consist only of mounds and a few fallen columns. The climate is very unhealthy (Wilkinson, Mod. Egypt, i, 406, 444; Savary, Letters on Egypt, i, let. 24; Henninger, Traeck).

The antiquity of the town of Sin may perhaps be inferred from the mention of "the wilderness of Sin" in the journeys of the Israelites (Exod. xvi, 1; Numb. xxxiii, 11). It is remarkable, however, that the Israelites did not immediately enter this tract on leaving the cultivated part of Egypt, so that it is held to have been within the Sinaitic peninsula, and therefore it may take its name from some other place or country than the Egyptian Sin. (See No. 2.)

Pelusium is noticed (as above) by Ezekiel, in one of the prophecies relating to the invasion of Egypt by Nebuchadnezzar, as one of the cities which should then suffer calamities, with, probably, reference to their latter history. The name is repeated in another of his prophecies, in the visions of Daniel, Zon (Tania), No (Thebes), Aven (Heliopolis), Pi-beseth (Bubastis), and Tehaphunehes (Daphne). All these, excepting the two ancient capitals, Thebes and Memphis, lay on or near the eastern boundary; and, in the approach to Memphis, an invader could scarcely advance, after capturing Pelusium and Daphne, without taking a most difficult and heliopolis, and, in the most ancient times Tania, as afterwards Pelusium, seems to have been the key of Egypt on the east. Bubastis was an important position from its lofty mounds, and Heliopolis as securing the approach to Memphis. The prophet speaks of Sin as "the stronghold of Egypt" (xxx, 15). This place it held from that time until the period of the Romans. Pelusium appears to have been the perpetual battle-field between the Egyptians and their foreign enemies. As early as the time of Rameses the Great, in the 14th century B.C., we find Sin proving itself to be what the prophet termed it, "the strength of Egypt." One of the Salifer papyri in the British Museum contains a record of the war between the Egyptians and the Sheita; and the victory which Rameses gained in the neighborhood of Pelusium is detailed at length. The importance of this victory may be gathered from the fact that the Sheita are said to have made a great attack against Pelusium, with 50,000 horsemen and 500 chariots, and that Diodes reports the number of this Pharaoh's army, which he says amounted to 60,000 infantry, 24,000 cavalry, and 26,000 chariots of war, it is no wonder that he was enabled successfully to resist the attacks of the Sheita. Diodorus also mentions that Rameses the Great "defended the east side of Egypt against the irruptions of the Syrians and the Arabians with a wall drawn from Pelusium through the desert, as far as to Heliopolis, for the space of 1500 furlongs." He gives a singular account of an attempt on the part of his younger brother to murder this great Pharaoh, when at Pelusium after one of his warlike expeditions, which was happily frustrated by the treachery of the king (Diod. Sic. i, 4). Herodotus relates (i, 141) that Nebuchadnezer advanced against Pelusium, and that near Pelusium Cambyses defeated Psammetichus (iii, 10-13). In like manner the decisive battle in which Ochus defeated the last native king, Nectanebos (Neb-khet-nef), was fought near this city. It was lost by the Persians in the year 342, or 334 B.C., being, being, being, being, being, being, being, being, being, being, being, being, being, being, being, being, being, being, being, being, being, being, being, being, being, being, being, being, being, being, being, being, being, being, being, being, being, being, being, being, being, being, being, being, being, being, being, being, being, being, being, being, being, being, being, being, being, being, being, being, being, being, being, being, being, being, being, being, being, being, being, being, being, being, being, being, being, being, being, being, being, being, being, being, being, being, being, being, being, being, being, being, being, being, being, being, being, being, being, being, being, being, being, being, being, being, being, being, being, being, being, being, being, being, being, being, being, being, being, being, being, bein
the chief place of her successive humiliations. Two Persian conquests and two submissions to strangers—first to Alexander, and then to Augustus—may explain the connexion, and settle the identity of the man: "Sin shall suffer great anguish" (Ezek. xxxv. 16).

We find in the Bible a geographical name which has the form of a gentile noun derived from Sin, and is usually held to apply to two different nations, neither connected with the city Sin. In the list of the descendants of Noah, the Sinite, סינ, occurs among the sons of Canaan (Gen. x. 17; 1 Chron. iv. 15). This people, from its place between the Sinaite and the Canaanite, has been supposed to have settled in Syria north of Palestine, where similar names occur in classical geography, and have been alleged in confirmation. This theory would not, however, necessarily imply that the whole tribe was there settled, and the supposed traces of the name are by no means conclusive. On the other hand, it must be observed that some of the eastern towns of Lower Egypt have Hebrew as well as Egyptian names, as Heliopolis and Tanis; that those very near the border seem to have borne only Hebrew names, as Migdol; so that we have an indication of a Semitic influence in those places, diminishing in importance as we go according to the distance from the border. It is difficult to account for this influence by the single circumstance of the Shepherd invasion of Egypt, especially as it is shown yet more strikingly by the remarkably strong characteristics which have distinguished the inhabitants of the eastern districts of Egypt from their fellow-countrymen from the days of Herodotus and Achilles Tatius to our own. Nor must we pass by the statement of the former of these writers that the Palestine Syrians dwelt westward of the Arabians to the eastern boundary of Egypt (iii. 5). Therefore it does not seem a violent hypothesis that the Sinites were connected with Pelusium, though their main body may perhaps have settled much farther to the north. The distance is not greater than that between the Hittites of Southern Palestine and those of the valley of the Orontes, although the separation of the less powerful Hittites into those dwelling beneath Mount Hermon and the inhabitants of the small confederacy of which Gibea was apparently the head is perhaps nearer to our supposed case. If the wilderness of Sin owed its name to Pelusium, this is an evidence of the very early importance of the town and its connection with Arabia, which would perhaps be strange in the case of a purely Egyptian town. The expression "forth wandering" in the old explanation of the famous mention of "the land of Sinim," סינים יסינים, in Isaiah (xlix. 12), supposed by some to refer to China. This would appear from the context to be a very remote region. It is mentioned after the north and the west, and would seem to be in a southern or eastern direction. It is certainly notremote, nor is the supposed place of the Sinites to the north of Palestine; but the expression may be proverbial. The people of Pelusium, if of Canaanitish origin, were certainly remote compared to most of the other Canaanites, and were separated by alien peoples, and it is also noticeable that they were to the south-east of Palestine. As the sea bordering Palestine came to designate the high-road, so that the Sinim must have passed into a proverbial expression for a distant and separated country. See, however, SINIM; SINTEK.

2. A "wilderness" (סינים; Sept. έρημος Σιν; Vulg. desertum Sin) which the Israelites reached after leaving the encampment by the Red Sea (Num. xxxiii. 11, 12). Their next halting-place (Exod. xvi. 1; xvii. 1) was Raphidim, either Wady Feiran, or the mouth of Wady sup, which is said to mean 'the desert', which supposes it would follow that Sin must lie between those wadis and the coast of the Gulf of Suez, and of course west of Sinai. Since they were by this time gone more than a month from Egypt, the locality must be too far towards the south-east to receive its name from the Egyptian Sin of Ezek. xxx. 15, called סינים by the Sept., and identified with Pelusium. (See above.) In the wilderness of Sin the manna was first gathered, and those who adopted the supposition that this is the true natural product of the tarry bush find from the abundance of that shrub in Wady es-Sheikh, south-east of Wady Gharundel, a proof of local identity. See ELIM. As the previous encampment by the Red Sea must have been in the plain of Makkah, the "wilderness of Sin" could not have been on the other side of the Arabian Desert, el-Kaa, which commences at the mouth of Wady Tairibeh, and extends along the whole south-western side of the peninsula. At first narrow, and interrupted by spurts from the mountains, it soon expands into an undulating, dreary waste, covered in part with a white gravelly soil, and in part with sand. Its desolate aspect appears to have produced a most depressing effect upon the Israelites. Shut in on the one hand by the sea, on the other by the wild mountains, exposed to the full blaze of a burning sun, on that bleak plain, the stock of provisions brought from Egypt now exhausted—we can scarcely wonder that they said to Moses, "Would to God we had died by the hand of the Lord in the land of Egypt, when we sat by the flesh-pots, when we did eat bread to the full; for ye have brought us forth into this wilderness, to kill this whole assembly with hunger" (Exod. xvi. 8). See EXODUS.

Sin (properly סינ, ἀπαπρία, both originally signifying to mislead) is any action, word, desire, purpose, or omission contrary to the law of God: a voluntary violation of, or failure to comply with, the divine law (Rom. vi. 15; ix. 19, 20; vii. 7; James iv. 17). Whether such a law be placed in the holy oracles, or in the constitution of our nature, the violation constitutes the transgressor a sinner (Rom. i. 19-32; ii. 11-15). The various words by which sin and wickedness are set forth in the Old Testament, throw considerable light upon the real nature and necessity of the evil.

1. The proper original idea of sin appears to be that it is a coming short of our true destiny, a "missing" the mark (סינ, ἀπαπράω). The end of man's being is to be like unto God, to have his will in thorough harmony with the divine will, and so to glorify God and enjoy him forever. God is love; and to love him and be beloved by him is true blessedness. The whole law is summed up in love, whence sin, which is contrary to love, is the principal purpose of our existence.

2. This leads us to the second idea of sin, namely, that it is the transgression of God's law. From the Christian theistic standpoint there is no doubt as to the existence of an eternal moral order. That which, according to this rule, ought to be done is good; that which ought not to be done is sin. The law being neither advice nor prayer, but a positive demand, our only relation to it can be either that of submission or transgression. Whether we look upon God's law as moral, that is, stamped upon our nature, or positive, that is, revealed to us from without, in either case it should be considered binding upon our hearts, and should be implicitly obeyed, because it proceeds from the loving Author of our being. Duty is represented in Scripture as a path along which we should walk, and to sin is to transgress or to go out of the way of God's commandments; hence the use of the word סינ, to pass over.

3. Again, every transgression is represented in the Bible as an act of rebellion (סינ סינ). God is the Ruler of his people, the Father of the human race. In both these capacities he demands obedience. To sin is to rebel against his paternal rule, to revolt from his allegiance. It is to act independently of him, to set up the will of the creature against that of the Creator, to put self in the place of God, and thus to dishonor his holy name.

4. Further, to sin against God implies distrust of him and a willingness to deceive him, and to act treacherously.
towards him (ὢπλησθή; comp. also ὀπλίσθης and ὀπλήθη). To entertain a suspicion of God’s goodness is to distrust him; and when once that suspicion has been planted in the heart, alienation begins, and deceit is sure to follow. 5. Another remarkable fact about sin is that it is perversion or distortion (περιτύπωσις); it is a wrong, a wrench, a twist to our nature (ἡ περιτύπωσις), destroying the balance of our faculties, and making us prone to evil. Man is thrown out of his centre and cannot recover himself, the consequence of which is that there is a jarring of the elements of his nature. Sin is not a new faculty or a new element introduced, but it is the confusion of the existing elements—which confusion the Son of God came to take away, by restoring man to his right balance, and leading him once more to a living and self-sacrificing trust in God. 6. Sin is also unrest (ἀνεστάλη), a perpetual tossing like the waves of the sea; a constant disturbance, the flesh against the spirit, the reason against the inclination, one desire against another, the wishes of one person against the wishes of another; a love of change and excitement and stir; and withal no satisfaction. Man was never intended to find rest except in God; and practically when God is not his centre he is like a wandering star, uncertain and erratic, like a cloud without water, and like seething foam. 7. Connected with this is the idea which identifies sin with toil (ἐργασία). Wickedness is wearisome work; it is labor without profit; it is painful, sorrowful travail; it is grief and trouble. And after all the labor expended, nothing is gained; the works of darkness are unfruitful; sin is vanity, hopelessness, nothingness (πενίθης); the ungodly are like the chaff which the wind scatters away; they can show no results from all their toil. 8. Sin is also ruin, or a breaking in pieces (πτωσις). Adversity, calamity, distress, misery, trouble, are represented by the same words as wickedness, mischief, harm, evil, and ill-doing. Gathering together the foregoing observations, they bring us to this result, that sin is willful disobedience of God’s commands, proceeding from distrust, and leading to confusion and trouble. Sin lies not so much in the act as in the nature of the agent whose heart and life have been perverted. We are taught by the Scriptures that man was led into sin originally by the Evil One, who instigated suspicions of God’s goodness; and was thus misled, deceived, ruined, and dominated over by Satan. See Burroughs, Sinfulness of Sin; Dwight, Theology; Fletcher, Appeal to Matter of Fact; Fuller, Works; Gill, Body of Divinity, art. “Sin;” Goodwin, Agravations of Sin; Hagenbach, Hist. of Doctrines: Howe, Living Temple: King and Jenyn, Origin of Evil; Miller, Christian Doctrine of Sin; Orme, Blasphemy against the Holy Ghost; Owen, Indwelling Sin; Payson, Sermons; Williams, Answer to Hallett; Watts, Ruin and Recovery. SIN, Actual, is a direct violation of God’s law, and is generally applied to those who are capable of committing moral evil; as opposed to idiots or children, who have not the full scope for their moral faculties. It may be a sin either of commission or omission (q.v.). SIN of Commission is the doing a thing which we ought not to do. SIN AGAINST THE HOLY GHOST. See UNPROVINCIAL SIN. SIN OF INFIRMITI. Sins of infirmity are those which arise from the infirmity of the flesh, ignorance, surprise, cares of the world, etc. SIN, MORTAL OR DEADLY. See Mortal Sin. SIN OFFERING. See Sin-offering. SIN OF OMISSION differs from that of commission in being negative, and consists in the leaving those things undone which ought to be done. “Ye pay tithe of mint, and anise, and cummin, and have omitted the weightier matters of the law, judgment, mercy, and faith: these ought ye to have done, and not to leave the other undone” (Matt. xxiii. 23). SIN, ORIGINAL. I. Definition.—“Original sin” is usually defined as “that whereby man is very far gone from original righteousness, and is of his own nature inclined to a disposition to sin; and from the absence of original righteousness is not only a depravation, but also a deprivation; such an estrangement of the heart from God as to lead to a defiance of his authority and law. Original sin is not only negative, but positive; it is not merely the lack of a thing—viz., original righteousness—but the presence of an inherited tendency evil, which tendency is the cause of all sinning (Ephesians iv. 24). Tim. ii. 16; 1 John iii. 4; and the inexhaustible source of all actual sins (Rom. v. 12-19). But original sin, or this tendency of the mind to evil, is by no means to be regarded in the same sense as guilt; inasmuch as involuntary developments of natural susceptibilities have no moral character. A mere desire, growing out of the natural constitution of the mind, excited by temptation, may be innocent. Moral evil only commences when the desire or temptation is followed by the determination, or volition, to gratify the desire or yield to the temptation. See SIN, ACTUAL. All men, as the descendants of Adam, have this original depravity (1 Cor. xv. 21, 22), descending by continual descent from father to son. See DEPRAVITY. II. Theories.—There are four principal hypotheses, to one or the other of which all the various explanations offered on this subject may probably be reduced. 1. The first theory is that the whole human race was literally in Adam as the oak is in the acorn, and thus participated in his transgression. In other words, the race is a unit, and God deals with it as a unit—not with individuals as individuals. Thus, though unconsciously, every soul participated in the first great transgression, and, in the words of the catechism, “sinned in him (Adam), and fell with him in that first transgression.” 2. The second theory is that Adam was the representative of the race; that as a king, or as an ambassador, or as a congress represent the nation, and the entire nation is held responsible for the act of its representative, so Adam represented the human race, was chosen as the type to stand for humanity, and by his trial the whole race was judged and sinning in him and falling in his fall. Acting thus as representative for the race, his sin was imputed, i.e., charged, to the whole race. It is said, moreover, that in point of fact this choice of Adam as a representative was not arbitrary; that Adam and Eve fairly represented the race, and that the continual sin of his descendants, placed in similar circumstances of trial, shows that no injustice was done by submitting them to a trial in the person of such a representative. These two views are held, one or the other of them, by those who are known in modern times as belonging to the old school. In them the entire race is treated by God as a unit, and is because of Adam’s sin, under divine condemnation; and, irrespective of the sin or the virtue of the individual, requires to be pardoned and redeemed. 3. The third theory holds that Adam fell, and in falling became a sinner. The universal law of nature is that like begetteth like. So all his descendants have inherited from him a nature like his own, a nature depraved and prone to sin. Those who maintain this theory add, usually, that man is not responsible for this depraved nature, and that he is not in any strict sense guilty before God for it; that while infants must be redeemed from it through the power of God in Christ Jesus, because they are incapable of imputing, they cannot be said to be guilty until they have arrived at an age when they are capable of choosing between good and evil, and that they are then held responsible for that voluntary choice, and for that alone. In other
words, this school distinguishes between sin and depravity, holding all sin to consist in voluntary action, and depravity to be simply that disorderly state of the soul which renders it prone to commit sin. This view is the one generally entertained by the new-school divines in the Presbyterian Church, by a majority of the Congregationalists, and by many of the Episcopalians and the Methodists. According to this view, mankind are all born sinners, which Adam brought upon the race, but are not guilty except as they become so by personal conduct.

4. The fourth theory, known in theological language, from its most eminent exponent, Pelagius, as Pelagianism (q. v.), denies that there is any connection between depravity and sin; it is held by old writers in a sense held responsible for, or on account of, Adam's sin. Each soul, according to this theory, is created as was Adam, pure and innocent, and determined towards either sin or holiness. Each soul, for itself, chooses its own destiny by its voluntary choice of good or evil, right or wrong. The universality of sinfulness, it is said, is sufficiently explained by the evil influence and example of those by whom the young are from their earliest years surrounded. According to this theory it is possible, or at least quite conceivable, that a man should be utterly sinless; and in such a case there would be no need of an atonement. Such a view would deny any regenerating Spirit. That need is occasioned in each individual case by each individual deliberately choosing for himself the way of sin. A modification of this view, by which there is an endeavor to combine it with the others, is termed Semi-Pelagianism (q. v.). According to this view there is no ruin except that which each individual springs upon himself; and, consequently, no need of redemption except such as springs from the individual's own guilt in departing from God and disobeying his law.

III. History of the Doctrine.—The early Church, it is maintained by some, was unacquainted with the doctrine; and the most orthodox admit that the doctrine had not at that time been fully developed. We offer the opinions of some of the early fathers. Gregory of Nazianzus maintained that both the νοῦς and the ψυχὴ have been certainly impaired by sin, and regarded the perversion of consciousness seen in idolatry, which previous teachers had ascribed to the influence of demons, as an inevitable effect of the first sin. But he was far from asserting the total depravity of mankind and the entire loss of the free will. Athanasius maintained man's ability to choose good as well as evil, and even allowed exceptions from original sin, alleging that several persons prior to Christ were free from it. Cyril of Alexandria marshals the life and state of innocence, and that sin enters of the free will. Chrysostom insisted upon the liberty of man and his self-determination. Augustine laid down that every natural man is in the power of the devil, and upheld the justice of this as a punishment for the share which the individual had in Adam's transgression. Pelagius, on the other hand, who rejected the Traducian theory, denied that the fall of Adam has exercised any prejudicial influence on the moral condition of his posterity. He maintained that all men are born in innocence, possess the power of free will, and may live without sin. The views of Augustine never secured a footing in the Eastern Church, and even in the West they met with opposition. The Reformers of the 16th century made original sin a leading doctrine, and thus were enabled effectively to combat the Roman Catholic doctrine of the merit of works.

SIN, HISTORICAL. Historical theology, i, 383; Hagenbach, Hist. of Doctrines; Van Oosteram, Christian Dogmatik; Edwards, Wesley, and Taylor, on Original Sin. Comp. Fall; Imputation.

SIN, PHILOSOPHICAL. Philosophical sins, in opposition to theological, according to the Jesuits, are those in which a man at the time of committing them has not God and his law before his mind. He, therefore, with-
On the nature of the far severer punishment to be inflicted on those who reject the mercy of God in Christ Jesus, see **Perdition**; **Punishment; Future; Retribution**.

**SIN, Secret.** Secret sins are those committed in secret, or those which we, through blindness or prejudice, do not see the evil of (Ps. xii, 19).

**SIN, UNPARDONABLE,** seems to consist in the malicious ascription of the dispensations, gifts, and influences of the Spirit to the power of Satan. The reason why this sin is never forgiven is not because of any want of sufficiency in the blood of Christ nor in the pardoning mercy of God, but because such as commit it despise and reject the only remedy, i. e. the power of the Holy Spirit, applying the redemption of the Gospel to the souls of men. See **Meth. Quar. Rev. April, 1858.** See **Blasshemy; UNPARDONABLE SIN.**

**SIN, Venial.** Venial sins are those which, according to the theology of the Church of Rome, do not bring spiritual death to the soul, or which do not turn it away from its ultimate end, or which are only slightly repugnant to the order of right reason. "It is, moreover, certain," says Duns, "not only from the divine compassion, but from the nature of the thing, that there are venial sins, or such slight ones, as in just men may consist with a state of grace and friendship with God; implying that there is a certain kind of sin of which a just man may commit, and still remain friends with God." Such doctrine as this meets with no countenance from the Word of God, which declares that "the wages of sin is death," without making any distinction among sins. See **Venial.**

**S'ina (Σωοί),** the Greek form (Judith v, 14; Acts vii, 50, 38) of the well-known name which in the Old Test. universally, and as often as not in the Apocrypha and New Test., is given in the A. V. **SINAI (q. v.).**

**S'inaí (Heb. Sinai),** יָם, perhaps [if Semitic] thorëy, i. e. cleft with ravines; possibly [if Egyptian or Zabean] devoted to Sîn, i. e. the moon: Sept. **Sowai;** [v. r. in Judg. v, 5, Sowaw; and in Neh. ix, 13, Sowai]; in the New Test. **Sow;** Josephus, τὸ Σωιάνος δρότος, Ant. ii, 12, 1; Vulg. **Sinaiv;** A. V. **"Sinaiv" (q. v.) in a few passages], a well-known mountain in the peninsula formed by the gulf of Suez and Akabah. The name appears to be primary, and its meaning is unknown. It is mentioned thirty times in the Pentateuch and only four times in the rest of the Old Test. (Judg. v, 5; Neh. ix, 13; Ps. cviii, 18, 17) and four in the New Test. (Acts vii, 38; Gal. iv, 24, 22). It would thus appear that the name had, in a great measure, become obsolete at an early period. We here present a summary of the Scriptural and other ancient notices, with the light of modern researches.

I. **Biblical Notes and Occurrences.**—The leading statements made regarding Sinai in the Pentateuch demand special notice, as they constitute the chief evidences in establishing its identity. A small section of the wilderness through which the Israelites passed took its name from the mountain (Exod. xix, 1, 2). In one direction was Rephidim, only a short day's march distant; while Kibroth-hattaavah lay a day's march in another. The "desert of Sinai," therefore, could only have been a very few miles across.

In the third month of their journey the Israelites "departed from Rephidim, came into the wilderness of Sinai... and camped before the mount" (Exod. xix, 1, 2). The base of the mount in front of the camp appears to have been so sharply defined that barriers were put up to prevent any of the people from approaching rashly or inadvertently "to touch the mount" (ver. 12). The "top of the mountain" was in full view from the camp; so that when the Lord "came down" upon it the thick cloud in which his glory was shrouded was "in sight of all the people" (ver. 11, 16). While Moses was receiving the law on the summit of Sinai, "the thunderings and lightnings, and the voice of the trumpet" were so near the camp that the people, in terror, were "afraid, and shook with fear" (ver. 16). Yet set one is of the mount for "the sight of the glory of the Lord was like devouring fire on the top of the mountain in the eyes of the children of Israel" (comp. xx. 18; xxiv. 17). Upon that peak the tables of the law were twice given to Moses, with all the details of the rites and ceremonies recorded in the Pentateuch (xxx. 18; xxxix).

Sinai was spiritually "the mount of the Law" (Num. x, 33). There the Lord spoke with Moses "face to face, as a man speaketh unto his friend" (Exod. xxxiii, 11); and there he revealed himself in such glory and majesty as were never witnessed on earth.

II. **Distinction between Sinai and Horeb.**—Those critics who did not place the Pentateuch in a certain place, and to a variety of authors are ready to support their view by pointing to a variety of dictum; and one evidence of this they find in the use of Horeb throughout the book of Deuteronomy (except in the song of Moses, xxxiii, 2, which they attribute to a still different writer); whereas the person whom they suppose to have been the original composer of the first four books uses Sinai, which is the name always employed except in Exod. iii, 1; xvii, 6; xxxiii, 6; and these passages they attribute to a supplementary writer. This view is still strongly asserted by Ewald (Geschichte, ii, 37), who pronounces Sinai the older name, therefore occurring in the ancient text. The distinction is also made by Robison, although Horeb is not discoverable till the time of his fourth and fifth narrators, in whose age, however, it had become quite prevalent. His statement is a very fair sample of the precision and confidence with which these critics speak of matters as to which there is no evidence except their own critical sagacity, or their imagination, as others may be apt to consider who claim no such peculiar insight. For while it is quite possible that the same writer might use two names indiscriminately for the same place, as in the case of Bethel and Luz, Baalath and Kirjath-jeearim, the Sea of Galilee and the Lake of Tiberias, yet this last example indicates how readily two names may come to be in use indifferently, though originally the one was more definite than the other. Accordingly, Gesenius suggested that Sinai might be the more general name, and Horeb a particular peak; and in this conjecture he was followed by Rosenmiller, who added another suggestion was made by Hengstenberg (Pentateuch ii, 925-927) which has gained the credit of almost all the German authorities since his time, as also de Robinson (Hib. Res. i, 120, 591), apparently after having inclined to the conjecture of Gesenius. Hengstenberg agrees with Gesenius that the one name is more general than the other; but he differs in this respect—that he makes Horeb the mountain-ridge, and Sinai the individual summit from which the ten commandments were given. The reasons for this opinion as urged by him and by others may be arranged under a threefold division: (1) The name Sinai is used at the time that the Israelites were upon the very spot of the legislation, that is, from Exod. xix. 11, onward, and onwards till Num. iii, i; whereas it is Horeb that is always used in the recapitulation in Deuteronomy; (2) as a writer close beside a particular mountain would naturally single it out when describing his locality, though afterwards, when writing at a distance from it and taking a general retrospect, he would call it a comprehensive name of the entire mass of mountains to which it belonged. The only exception in Deuteronomy is that case in the song of Moses already alluded to (xxxiii, 2), which is universally admitted to be a peculiar composition both by the impugners and by the defenders of the Mosaic authorship. When we take in the additional fact, "the wilderness of Sin..." as denoting the place in which the Israelites encamped, we have Sinai occurring as early as Exod. xix, 1, 2, and continuing till Num. x, 12, where the march from Sinai is described. That particular spot would natu-
rally take its name from the mountain-peak besides it, whereas the name "wilderness of Horeb" is unknown to Scripture. The name Sinai never occurs in the Pentateuch after the departure from the spot except in three instances. Two of these (Num. xxvi, 64; xxxiii, 15) refer expressly to events in language already employed upon the spot about the exposure of the censers and in the list of the components, and both use that phrase "the wilderness of Sinai," which never occurs with the name Horeb; so that they are no exceptions in reality. The third (xxviii, 6) is, therefore, the only exception—"It is a continual burnt-offering which was ordained in Mount Sinai," and this also is explicable on the principle that the phrase had become the common in the legislation. Once, also, Sinai occurs before the Israelites reached it (Exod. xvi, 1), "the wilderness of Sin, which is between Elim and Sinai," and here the precision of this term is thoroughly natural. (2) The name Horeb occurs in the earlier books thrice, all in Exodus, but it is in circumstances which best suit the general or comprehensive meaning which we attach to it. Moses, while acting as the shepherd of Jethro (iii, 1), "came to the mountain of God [even to Horeb," or, more literally, "came to the mountain of God Horeb-ward." Our translators have identified the mountain "Horeb with Horeb-ward," which is wholly uncertain; for the original may quite as naturally be interpreted that he came to a particular peak in that mass of mountains which had the name of Horeb, to the sacred peak which is to be sought in the direction of Horeb. Particularly distinct is the second instance (xvii, 5), "Behold I will stand before thee there upon the rock in Horeb," etc.; for this miraculous gift of water took place while the Israelites were encamped in Rephidim (ver. 1), the station before the station in the wilderness of Sinai (ix, 2). Probably the like should be said of the third instance (xxxii, 6), "And the children of Israel stripped themselves of their ornaments, and went down to Mount Horeb," referring very nearly apart, and every individual apart, as in other cases of humiliation and repentance; and the propriety of the use of the general rather than the specific term is the more apparent if those are right who translate the peculiar Hebrew phrase as exactly as they can, "stripped themselves, etc. [retiring], from Mount Horeb." (3) An argument may be drawn from the use of the prepositions connected with these two names. Reverting to Exod. xvii, 6, we find the Lord saying, "Behold, I will stand upon the rock in Horeb," that is, "upon the particular spot, but in the district. Accordingly, it is the preferable to the English version ("unto at once or twice") which is used with Horeb, not only here, but almost always where the name occurs in Deuteronomy, perhaps always, except "from" (i, 2, 19). The same is true of all the passages in which Horeb is mentioned in later Scripture (1 Kings viii, 5; 2 Chron. v. 10; Psa. cxi, 10; Mal. iv, 4; [Heb. iii, 22]), except 1 Kings xix, 8, "unto Horeb the mount of God," or better, "up to the mount of God Horeb [ward]," for it is plainly an expression referring to Exod. iii, 1, of which we have already spoken. With Sinai, on the other hand, there are connected several prepositions, "in" or "of" or in the case of Horeb; also "to," but especially "upon" (Exod. xix, 11, 18, 20; xxiv, 16), which describes the descent of the Lord, or the resting of the symbol of his presence, upon that individual peak from which the law was given, whereas we have no reason to think that it rested upon the whole mass of mountains which are clustered together. The same preposition "of" is the only one in the only other Old Testament reference where Sinai occurs with a preposition (Neh. ix, 13). Indeed, besides this text we find Sinai nowhere but in Judg. v. 6; Psa. lixvi, 8, 17 (Heb. 9, 18), in passages which indisputably stand in a very close connection with Deut. xxxiii, 2. More much is inferred from the usage of later Scripture in regard to these names; though from what has been mentioned it may be seen that Horeb is very decidedly the predominant name in the rest of the Old Testament, as it is with one exception in Deuteronomy, and probably in both cases for the same reason—that at a distance in time and place the more general name was, on the whole, more natural. Yet the distance may be so great that the phrase has become the common in the connection we have said that Horeb does not occur. Josephus seems also to confine himself to the name Sinai. In the Apocrypha we have noted Judith v, 14, "to the way of Sinai," or, according to another reading, "to the mount Sinai;" and Eccles. xlvii, 7, where "in Sinai" and "in Horeb" occur in a geographical parallelism: but these determine nothing. Perhaps nothing can be concluded from the fact that Horeb never has the prefix "mount" except in Exod. xxxiii, 6, whereas Sinai always has it in both the Old Testament and the New except in Exod. xvi, 1, and Deut. xxxiii, 2, and the passages depend on the one name, and not on the other. Once more, it is very doubtful whether etymology can contribute anything to the settlement of the question. Horeb certainly means "dry," or "dried up," a name very descriptive of the region. But the meaning of Sinai is much debated. Gesenius suggests "muddy," but with hesitation, and he appears to have no followers. More probably, Knobel proposes "sharp-pointed," "toothed," or "nibbed." The old derivation of Sinai, which Hiller understood "Sin, to be equivalent to סנה, sinyah, "the bush of Jehovah," with reference to Exod. iii, 2. Possibly as simple a meaning as any would be "bushy," or "that which has the bush." If so, the etymologies of the two names, so far as they went, would favor the view given of their respective meanings. Rodiger (additions to Gesenius, Thesaur. makes it "sacred to the God of the moon." Ewald and Ebers regard it as equivalent to "belonging to [the Desert of] Sin/ Understanding Horeb to be the more general name, there might still be differences of opinion how wide a circuit should be included under it; though the common opinion seems to be that there is no necessity for taking it wider than that range (some three miles square) long favored by the ordinary varieties of the Arabes Jebel Tôr, or Jebel et-Tûr, sometimes with the addition of Sina, though Robinson says extremely rarely. III. Identification of the Particular Mountain.—In the Biblical notices there are implied three specifications which must all be present in any spot answering to the true Sinai: 1. A mountain-summit overlooking the place where the people stood. 2. Space sufficient, adjacent to the mountain, for so large a multitude to stand and behold the phenomena on the summit; and even, when afraid, to remove afar off and still be in sight. 3. The relation between this space where the people stood and the base of the mountain must be such that they could approach and stand at 'the nether part of the mount;' that they could also touch it; and that bounds could be set round the mount' (Biblith. Sue. May, 1849, p. 382). There are three claimants for the name Sinai, and it will be necessary to examine them successively: 1. Jebel Serbal.—Its claims were suggested by Burenhult (Travelera, p. 609), and are advocated by Lepsius (Letters from Egypt [London, 1858]), Bartlett (Forty Days in the Desert), Stewart (The Tent and the Khan), and others. The arguments in its favor may be thus summed up: It was the most conspicuous mountain in the peninsula, and therefore the best known to the Egypt.
tian colonists. Near its northern base was the oasis of Feirán, which was probably the centre of the primeval Sinaitic population; and the summit of Serbál would form their natural sanctuary. Moses, knowing such a fertile and well-watered spot as Feirán, would never have led the Israelites past it, but would naturally select it as the place of the permanent camp (Lepsius, p. 356-363). Besides, it is supposed to be more in accordance with the narration of the wilderness journey than any other mountain; and it is alleged that early historical tradition is wholly in its favor. The last two arguments are the only ones of any weight; and neither of them stands the test of critical examination. The basis of Lepsius’s argument is that Rephidim is identical with Feirán, and that Moses selected this spot as the site of a permanent camp because it was well watered and fertile; but the sacred writer tells us that in Rephidim “there was no water for the people to drink” (Exod. xvii, 1). With strange inconsistency Lepsius affirms that the “wonderful fountain of Feirán” was opened by the miracle recorded in ch. xvii. If so, then how could the place have been well watered previously? But further: Rephidim was a day’s march—probably a short one—from the permanent camp before Sinai (xix, 1). These facts totally overthrust the alleged argument from Scripture.

The historical argument is not more convincing, although dean Stanley somewhat rashly says: “It (Serbál) was undoubtedly identified with Sinai by Eusebius, Jerome, and Cosmas; that is, by all known writers till the time of Justinian” (Sinait and Palaestina, p. 40). Eusebius merely states that “Rephidim is a place in the wilderness by Horeb; and that there Joshua fought with Amalek near Pharan” (Onomast. a. v.). Jerome only translates his words without addition or comment (he renders ζωονετα by prophe). The language of Cosmas is equally intelligible (Topogr. Christ.

v), especially as it is known that Pharan was a pretty large district, and that Horeb is said to be six miles distant from it.

It is hardly necessary to discuss the argument grounded on the remarkable Sinaitic inscriptions, though Lepsius presses it, and Stanley says that the natural inference from them is that Serbál “in the earlier ages enjoyed a larger support of tradition than Gebel Mousa” (p. 39). But how can this be? Wady Mokatteb, in which most of the inscriptions are found, is the leading route to Jebel Mūsa as well as to Serbál. Inscriptions have also been discovered on the northern road from Egypt to Jebel Mūsa by Surahat el-Khādīm, and they are much more numerous in the passes around Jebel Mūsa—in Wady Leja, Nukh Hawy, etc.—than in Wady Aleiyat, the only pass leading to Serbál. It may be safely affirmed that the Sinaitic inscriptions do not, for the present at least, affect the question at issue in any way (Porter, Handbook, p. 16 sq.).

But the nature of the country around Serbál is sufficient of itself to show that it could not possibly have

The Summit of Jebel Mūsa.
been Sinai. Wady Feiran is three miles distant, and from it an occasional glimpse only can be got at the summit. Wady Feiran, which leads up to Serbal, is narrow, rugged, and rocky, affording no place for a large camp. This is acknowledged on all hands (Lepsius, p. 423 sq.; Bartlett, p. 57; Stanley, p. 44; Sandie, Horæ and Jerusalem, p. 149); and as there is no other valley or plain at the base of the mountain, it follows that Serbal cannot be Sinai.

2. Jebel Musa is the Sinai of recent ecclesiastical tradition, and it has found some advocates among modern travellers (Wilson, Lands of the Bible, i, 219; Sandie, Horæ, etc.). It is situated in the very centre of the mountain group; but it is neither so lofty nor so commanding as some others around it. Its elevation is only about 9000 feet, and is the highest peak on Mount Sinai. Jebel Katherine, three miles south, is 8700 feet, and Um Shaunor, beyond it, attains an altitude of 9800 feet. Jebel Musa is the highest point of a short isolated ridge which runs from north-west to south-east, between the two parallel ravines of Shueib and Leja. At one end (the south-east) it is bounded by a rugged wady called Sebaste, at the other by the upland plain of Er-Rahab. In Wady Shueib, on the north-east of the ridge, stands the convent of St. Catherine, with the naked cliffs rising almost perpendicularly over it. In the glen of Leja, on the opposite side, is the reputed rock of Moses. The peak of Jebel Musa ("Moses' Mountain"), which the monks identify with the Mount of the Law, is the southern extremity of the range, overlooking Wady Sebaste and a confined region of rugged gravelly hills near it. The summit is a platform about thirty paces in diameter, partly covered with ruins. At its eastern end is a little chapel, and near it a mosque. Notwithstanding the elevation, the view is not extensive, and no plain is in sight on which the camp of the Israelites could have stood; nor is the base of the peak at all so clearly defined as the incidents of the sacred narrative require.

Various traditions—Jewish, Christian, and Mohammedan—have found a local habitation on this mountain. A rugged ancient path, in many places blown into flights of steps up the granite cliffs, passes a grotto of the Virgin, the cave where Elijah dwelt in Horæ, the footmarks of Mohammed's camel, and other spots equally apocryphal, in its winding course to the summit. This is the Sinai of tradition, but certain scenes of the Bible.

3. Ras es-Sufafah is the third claimant for the name Sinai; and its claim is valid. It forms the north-western point of the ridge of which Jebel Musa is the south-eastern. The name signifies "the peak (or head) of the willow," and is derived from a willow-tree which grows in a cleft on its side. The summit is very clearly defined, rising high above all the other peaks near it. In front it descends in broken crags of naked granite to Wady er-Rahab. The view from it is not so extensive as that from Jebel Musa, but it is far more interesting and impressive. The whole extent of the plain of Er-Rahab, measuring more than two miles in length, and ranging from one third to two thirds of a mile in breadth, is visible. The eye can follow its windings as it runs away among the mountains in the distance. The level expanse of Wady es-Sheikh, which joins Er-Rahab, is also seen opening out on the right, while opposite it on the left is another section of plain forming a recess in the mountains.

From near the summit a wild ravine runs down the front of the mountain, conveying a winter torrent into Er-Rahab. Up this ravine the ascent may be made from the plain; it is rugged and steep, but an active mountaineer, such as Moses was, could easily accomplish it.

There can scarcely be a doubt that Ras es-Sufafah is Sinai, "the mount of the Lord." Every requirement of the sacred narrative is supplied and every incident illustrated by the features of the surrounding district. Here is a plain sufficient to contain the Israelite camp, and so close to the mountain's base that barriers could be erected to prevent the rash or the heedless from touching it. Here is a mountain-top where the clouds that enshrinèd the Lord when he descended upon it would be visible to the vast multitude, even when in fear they would withdraw from the base and retire to a distance. From this peak the thunderings and the voice of Jehovah would resound with terrific effect through the plain, and away among the cliffs and glens of the surrounding mountains. When descending through the clouds that shrouded it, Moses could hear also the songs and shouts of the infatuated people as they danced round the golden calf; and in "the brook that descends out of the mount" (Deut. i. 21), through the ravine into Er-Rahab, he could cast the dust of the destroyed idol. In fact, the mountain, the plain, the streamlet, and the whole topography correspond in every respect to the historical account given by Moses. The words of dean Stanley are equally graphic and convincing: "No one who has approached the Ras Sufafah through that noble plain, or who has looked down upon the plain from that majestic height, will willingly part with the belief that these are the two essential features of the view of the Israelite camp. That such a plain should exist at all in front of such a cliff is so remarkable a coincidence with the sacred narrative as to furnish a strong internal argument, not merely of its identity with the scene, but of the scene itself having been described by an eye-witness. The awful and lengthened approach, as to some natural sanctuary, would have been the fittest preparation for the coming scene. The low line of alluvial mounds at the foot of the cliff exactly answers to the 'bounds' which were to keep the people off from 'touching the mount.' The plain itself is not broken and uneven, and narrowly shut in, like almost all others in the range, but presents a long retiring sweep, against which the people could 'remove and stand afar off.' The cliff, rising like a huge altar, in front of the whole congregation and visible against the sky in lonely grandeur from end to end of the whole plain, is the very image of 'the mount
that might be touched, and from which the voice of God could be heard far and wide over the stillness of the plain below, widened at that part to its utmost expanse by the confluence of all the contiguous valleys. Here, beyond all other parts of the peninsula, is the adytum, withdrawn, as if in the end of the world, from all the stir and confusion of earthly things" (p. 42, 43).

The remarks of Mr. Beaumont, a recent and observant traveller, are of some importance, as showing that some traces of the ancient Scripture names still linger around Mount Sinai: "Two or three facts seem to me well worthy of observation. Immediately above Wady es-Sheitik rises Jebel Fureia, the front of this is named Jebel Gebel, or Gebel for short; it is unknown to us, but our guide on Ras es-Sufafch needed no prompting to give it its designation. This cluster of Fureia, or Ziporah, is nearly parallel with the cluster of Jebel Musa, and extends northward from it to the head of the central Sinaicite cluster. Separated from the same central cluster of Jebel Musa on the left by Wady Leja, runs another parallel range of Sinaicite rocks. To one of these, and separated from Jebel Fureia by the broad Er-Rahah, the name Urreibbeh is given. This name also, as well as the name of the other group, was spontaneously assigned to it by our guide Mohammed. I was rather sceptical on the point, and made him repeat it several times, but I am convinced that there might be no mistake. My orthography is intended to express, as nearly as I can, the sound of his utterance, for it would have been vain to ask him to spell the word. Supposing, then, that his nomenclature was correct, we have a cluster bearing the name of Seneh (Sinai; comp. Stanley, p. 42) on the right of Jebel Musa, and one bearing the name Urreibbeh (Horob) on the left; the central cluster itself has no local appellative, and is called after the prophet Moses. May we not, then, suppose that this central cluster bore the name Sinai or Horob indiscriminately, serving as the nucleus to which the ranges of Sinai and Horob tended; and that, after the delivery of the law from the peak of Ras es-Sufafch, this bore the special name of 'Mountain of Moses,' and that subsequently the local designations were restricted to the ridges on the right and left?" (Cairo to Sine, p. 81, 82).

The name Wady er-Rahah, which is given to the upland plain in front of Ras es-Sufafch, is also called Er-Rahah, "the sheepfold"—rare after labor, that as enjoyed by beasts of burden at the close of the day. This is very expressive as applied to the long encampment of the Israelites in this plain, after the toilsome march from Egypt. The monks, as has been stated, give the name of Jebel Musa to the southern peak of the central ridge, identifying it with Sinai; but they identify Ras es-Sufafch with Horob. There are several traditional sites pointed out in Wady er-Rahah along the base of Sufafch, but they are so manifestly apocryphal as to be scarcely worth notice—such as the hill on which Aaron stood, the mound in which the golden calf was cast, and the pit of Kadesh (Potter, Handbook, p. 85). It is worthy of note that no other district in the whole peninsula, with the exception of a small portion of Wady Feiran, possesses such supplies of water and pasture as that around Mount Sinai. When the springs and wells are dry elsewhere, the Bedawin resort hither. On Sinai itself, on Jebel Katherin, in Wady Leja, in the convent, and in the plains of Rahah are perennial sources. The pastures, too, among the rocks and in the glens and little upland plains, are comparatively abundant (see Olin, Travels, i, 386, 415).

4. The late Dr. Beke of England broached the theory that Mount Sinai was not in the peninsula at all, but east of the Gulf of Akabah, a position that carries its refutation on its own face. In order to accommodate it, he did not hesitate to remove the Mizrain, or "Egypt" of the Bible, into the peninsula. He finally made a visit to the region, and imagined he discovered the requisite locality in Jebel Nura, up Wady Itm, a short distance from Akabah; and although the main object of his journey, which lasted four months, was the Mount Sinai, the fact was effectually exploded by the facts on the spot, he still maintained his general views as stoutly as ever, but without the concurrence of a single writer of note. Soon after his return he died of fatigue and disappointment, and his widow has published the notes of his journey with more discretion than discretion (Sini in Arabia [Lond. 1878]).

IV. Description of the Region.—The physical features of the peninsula are broadly and deeply marked. In form a triangle, it is shut in on two sides by the gulf of Akabah and Suez, and on the third by the desert of Tih. The Wady Leja and the wadies of Gebel Mousa, cutting the native barriers of other peoples, including what may be termed the same. Along the southern edge of Tih runs, like a vast wall, a bare limestone ridge; and south of it again is a parallel belt of sandy plain, appropriately termed Debbet er-Ramleh. A naked gravelly plain called El-Kâa extends along the whole shore of the Gulf of Suez. Between El-Kâa, Debbet er-Ramleh, and the Gulf of Akabah lies a group of mountains, triangular in shape, which forms, as it were, the nucleus of the peninsula, and is now called emphatically El-Tôr, "the mountains." On the north and west the group has projecting buttresses of reddish sandstone, on which most of the inscriptions in the "written valley" are traced; in the south, and especially in the lower bed, are granite, and exhibit a variety of coloring—red, yellow, purple, and green—making them objects of singular beauty when bathed in the bright sunshine. They are all, however, naked and desolate. As the eye wanders over their riven sides and up their jagged peaks, not a tree, not a shrub, not a blade of grass is seen (see Olin, Travels, i, 389). Ruined palaces, almost as bare and dry and desolate as the granite cliffs overhead, wind from the outer borders up into the centre of the group. On penetrating these ravines, a few acacias are here and there seen in a cranny of the rocks, and a clump of wild palms is occasionally met with fringing a well or fountain. In the heart of these mountains, in nature's profoundest solitude, amid scenery unsurpassed for wild and stern grandeur, history, tradition, and geography have combined to locate Sinai, "the mount of the Lord," and all those wondrous events which were enacted round it.

The Sinai Peninsula has been arranged (Stanley, Sin. and Pal. p. 11) in three chief masses as follows: (1) The north-western cluster above Wady Feiran; its greatest relief found in the five-ridged peak of Serbal, at a height of 6342 feet above the sea. (For an account of the singular natural basin into which the waters of this portion of Sinai are collected, and its probable connection with scriptural topography, see KâFâHIM.) (2) The eastern and central one; its highest point the Jebel Katherin, at a height of 8063 (Rüppell) to 8168 (Russegger) feet, and including the Jebel Musa, the height of which is variously set (by Schubert, Rüppell, and Russegger) at 6786, 7093, and 7097 feet. (3) The south-eastern chain mostly covered, however, with 2; its highest point, Um Shaumer, being that also of the whole. The three last-named peaks all lie very nearly in a line of about nine miles drawn from the most northerly of them, Musa, a little to the west of south; and a perpendicular to this line, traced on the map of the area for about 50 miles, nearly traverses the whole length of the range of Serbal. These lines show the area of greatest relief for the peninsula, nearly equidistant from each of its embracing gulf, and also from its northern base, the range of El-Tôr, and its southern apex, the Kâa Mohammed. The vertical extent of the peninsula from El-Wady, near Tôr, on the coast of the Gulf of Suez, in Wady Feiran, the two oases of its waste, and "in the nucleus of springs in the Gebel Mousâ" (Stanley, p. 19). As regards its fauna, Seetzen (iii, 20) mentions the following animals as found at Er-Ramleh, near Sinai: the
The Mountains of Sinai. (From a model constructed after the Ordnance Survey.)

V. Literature.—Mount Sinai and its vicinity have been visited by hundreds of travellers in modern times, and multitudes of descriptions have been written, few of which, however, contain anything specially new. The best accounts are those of Robinson, *Bibl. Res.* i, 88–144; Burchhardt, *Travels in Syria*, p. 541–590; *Bibl. Sac.* May, 1849, p. 381–386; Stanley, *Sin. and Pal.* p. 3–77; Beal, *Cairo to Sinai*, p. 88–85; Sandie, *Horeb and Jerusalem*, p. 124–224. The German writers—Ritter, *Pal. und Syr.* vol. i; Rüppell, *Reise*; Schubert, *Reise*, vol. ii; and Niebuhr, *Description de l’Arabie*—may be consulted with advantage; and full descriptions of the convent, with views, are given in Laborde’s *Mount Sinai and Petra*, and in Bartlett’s *Forty Days in the Desert*. The vicinity is minutely described in Porter’s *Handbook for Palestine*, and in Bädeker’s also. The results of the English Ordnance Survey—which, however, only extended over the western half of the peninsula—have been published in three noble volumes with two supplementary series of photographs (Lond. 1868–69), and a good abstract may be found in Palmer’s *Desert of the Exodus* (Lond. and N. Y. 1872), and more briefly in his *Sinai from the Monuments* (Lond. 1878).

Sinai Codex. Hebrew. This MS., which contains the Pentateuch, contains many variations of the accents, as תִּשְׁנָה, and he heard (Exod. xviii, 1), has the accent Gershaim, but in Sinai it has Robâ; again, יָבִא, the desert (ver. 5), has Zepheph, while in Sinai it has Zabephe gadol. As to the name of the codex, whether it is so called from the author or from the place where it was written is a matter of dispute. According to Levita it would be the name of a codex; First (Gæsch.
SINAITIC INSCRIPTIONS 773

Sinaitic Inscriptions is the name usually given to certain singular marks cut or rather scratched on the rocks of the Sinaitic peninsula, which have in all ages given rise to great curiosity and conjectures. Dionysius of the well-known Commentaries states that the mention of the name Sinaitic refers to the place where it was written or found. Strabo, in his Geographical Description of the World, mentions it as the place where the inhabitants of the surrounding country were accustomed to make pilgrimages every five years. There was a sanctuary at the spot with an inscription in the sanctuary's name, which appears to be the first mention of the now famous Sinaitic inscriptions. The sanctuary was possibly Beit, though some think it was the village of Tura, in the coast of the Red Sea. The quinquennial festival is mentioned by Strabo, but the first description of the inscriptions is given (about A.D. 535) by Cosmas, who supposed them to be the work of the Hebrews. They are also referred to by several early travellers, as Neitzschart and Monymos. Pococke and Niebuhr attempted to copy them, but with little success; Seetzen and Burchardt were more accurate in their transcription. In the Transactions of the Royal Society of Literature (1832, iii, 1), 177 of them are carefully engraved; nine of these are Greek, and one is Latin; the rest are of that peculiar character which recent papyxographers, as Beer, have denominated Nabataean. They are accompanied, wherever they occur, by rude figures of men with shields, swords, bows, and arrows; of camels and horses; of goats and ibexes with horns wonderfully exaggerated; of antelopes pursued by greyhounds; of lizards and tortoises; besides a number of nonscriptures which will puzzle the zoologist. They are met with almost every part of the mountainous region of the peninsula, in groups and singly. They have been seen in wadies Sila, Mahairah, and Feirain; in wadies Hurm and Bir, on the northern route to Sinai; on and around Mount Seribah; in Wady Leja at Sinai; on the plateau between wadies Selay and Ain, on the route to Akabah; at Petra, and on the southern border of Palestine. They occur, however, in greatest numbers in Wady Mokattet.

The inscriptions are in general very short, consisting of one or two brief lines; the letters are from two to three inches long, rudely cut with a sharp-pointed instrument. The surface of the rock is generally soft, so that with a pocket-knife one could cut a shallow inscription in a few minutes. A few, however, are more deeply and regularly formed. Though Lepsius discovered some of the more interesting characters, he did not over other Greek names; yet the Greek inscriptions are generally of a much more modern date than the others, judging from their appearance. Some of them have crosses attached; but these are not in all cases of Christian origin. The very same figures are found on Egyptian obelisks. Their position on the face of the cliffs is generally so low that a man could reach them. Some are higher, and would require a ladder, or at least an expert climber. None are so high as to suggest the necessity for ropes or scaffolding.

Prof. Beer, of Leipsic, has examined them with great care and constructed an alphabet. The results of the researches of this distinguished scholar are as follows: 1. The alphabet is independent; some of the letters are unique, others like the Palmyrene, Estrangelo, and Cufic. They are written from left to right. 2. The contents of the inscriptions, so far as examined, consist only of proper names preceded by some such words as ἀνάγω, “peace,” ἐπισκέπτης, “in memory,” and ἐνίκη, “blessed.”

The word πριέα, “priest,” is sometimes found after them. The names are those common in Arabic; not one Jewish or Christian name has yet been found. 3. The language is supposed to be the Nabataean, spoken by the inhabitants of Arabia Petraea. 4. The writers were pilgrims. The great number around Seribah leads to the supposition that it was once a holy place. That some of the writers were Christian is evident from the crosses. 5. The age of the inscriptions he supposes to be not earlier than the 2nd century B.C. Had they been later, some tradition respecting them would probably have existed in the time of Cosmas.

Dean Stanley, in his careful résumé, states that there is a great difference of age manifested both in the pictures and letters; that they are intermixed with Greek, Arabic, and even one or two Latin words, apparently of the same date; that crosses are very numerous, and of such form as to show their Christian origin. He concludes that they are, for the most part, the work of Christian pilgrims.

It will be seen from the above statements that these singular inscriptions chiefly occur in the wadies, and on the roads leading to particular spots, such as mounts Sinai and Seribah, and the Deir at Petra. They seem to have been the work of idle loiterers, rude in their
SINAITIC MANUSCRIPT

ideas of art, and ruder still in their morals; for the figures of animals are generally ludicrous, and occasionally obscene. Many of the inscriptions are evidently of remote antiquity, while others are plainly not older than our own era. That they are of Israelish origin, as Mr. Forster maintains, no satisfactory evidence has as yet been produced. The letters are not Hebrew. Some of them resemble Phoenician characters, others are different from those of any known language. And yet it would seem they were the symbols of a language at one period universally known throughout the whole peninsula. It does seem strange that all knowledge of these characters and the people who used them has been entirely lost, and it seems stranger still that it was already lost in the 4th century. The researches of the greatest scholars of our age have been unable to solve the mystery of these inscriptions, or afford any satisfactory clue to their origin, authors, and object (Porter, Handbook for Palest, p. 17).

Prof. Palmer has carefully investigated these inscriptions in the Ordinance Survey of Sinai, and his conclusions are thus summarily expressed: "They are mere scratches on the rock, the work of idle loungers, consisting, for the most part, of mere names interspersed with rude figures of men and animals. In a philological point of view they do possess a certain interest, but otherwise they are as worthless and unimportant as the Arab, Greek, and European graffiti with which they are interspersed. The language employed is Aramaean, the Semitic language which in the earliest centuries of Christ was held throughout the East the place now occupied by the modern Arabic, and the character differs little from the Nabataean alphabet used in the inscriptions of Idumea and Central Syria" (Desert of the Exodus, p. 160).

SINAITIC MANUSCRIPT (Codex Sinaiticus, designated as S), a MS. of the Septuagint and Greek New Test., brought from the Convent of St. Catherine, on Mount Sinai, by Tischendorf in 1859. It consists of 454 leaves, 34 lines to a page, in the Old and New Test. The Codex Sinaiticus contains the following portions of the Old Test. and Apocrypha in the order here given: Chron. i-x, 27-xi, 22; Tobit i, ii, to the end; Judith i-xii, 13; xiii, 9-xvi; 1 Macc. 4 Macc.; Isaiah; Jer. i-x, 25; Joel; Obadiah; Jonah; Nahum; Habakkuk; Zephaniah; Haggai; Zechariah; Malachi; Psalms; Proverbs; Ecclesiastes; Canticles; Wisdom of Solomon; Ecclesiasticus; Job. Of the missing portions the following are supplied by the Codex Friderico-Augustanus, and the fragments afterwards by Tischendorf, which were originally parts of the Sinaitic MS.: a few verses of Gen. xxi, xxiv, and of Num. v-vii; Deut. i-xii, 17; to the end; Nehemiah: Esther: Tobit i, ii, ii; Jer. 3, 25 to the end; Lam. 5, 1-iii, 20. This codex contains the entire New Test. together with the epistle of Barnabas and parts of the Shepherd of Hermes. There are four columns in each page. The character of the letters, the inscriptions and subscriptions to different books, the absence of the Ammonian sections and Eusebian canons, the nature of the readings, and other peculiarities, agree in a remarkable manner with B, or the Vatican. Tischendorf supposes that it is somewhat older than B, belonging to the 4th century. Probably it is of the 6th century, though made from a text older than that of B. The conjectures perhaps from dictation, or many blunders. The value of this acquisition to the critical apparatus of the Bible can hardly be overstated. In Tischendorf's Votitia Editionum Codicae Bibli-
SINCLAIR

JONEX, a minister of the Methodist Episcopal Church, was born in Loudon County, Va., April 9, 1738. In his twenty-first year, while residing in Lexington, Ky., he professed conversion and joined the Church. He was received on trial in the Kentucky Conference in September, 1824, but was transferred to the Illinois Conference in 1830. Here he labored as pastor and presiding elder until 1844, when, having been su-

SINCERITY, one who holds a sincerity or is an advocate for sincerities (q. v.).

SINEE, in Norse mythology, was one of the twelve famous houses—houses—employing the gods when they rode to the place of judgment by the fountain of Urðr.

SINNEW (once for Ýrj, a swaner, i. e. psain [Job xxx, 17]; elsewhere Ýr, gid) occurs especially in the phrase Ýrj, úr að, to make a shrank" (Genesis, xi, 38, i. e. the versus subject, or thigh-cord (Genesis, Thea., p. 921). Josephus renders it the broad nerve (MYO6 7s LE7A, Ant., i, 10, 2), being that which is on the thigh (παρελθεις ἐπὶ, παρελθεις ἐπὶ, παρελθεις ἐπὶ, παρελθεις ἐπὶ, παρελθεις ἐπὶ, παρελθεις ἐπὶ, παρελθεις ἐπὶ, παρελθεις ἐπὶ, παρελθεις ἐπὶ, παρελθεις ἐπὶ, παρελθεις ἐπὶ, παρελθεις ἐπὶ, παρελθεις ἐπὶ, παρελθεις ἐπὶ, παρελθεις ἐπὶ, παρελθεις ἐπὶ, παρελθεις ἐπὶ, παρελθεις ἐπὶ, παρελθεις ἐπὶ, παρελθεις ἐπὶ, παρελθεις ἐπὶ, παρελθεις ἐπὶ, παρελθεις ἐπὶ, παρελθεις ἐπὶ, παρελθεις ἐπὶ, παρελθεις ἐπὶ, παρελθεις ἐπὶ, παρελθεις ἐπὶ, παρελθεις ἐπὶ, παρελθεις ἐπὶ, παρελθεις ἐπὶ, παρελθεις ἐπὶ, παρελθεις ἐπὶ, παρελθεις ἐπὶ, παρελθεις ἐπὶ, παρελθεις ἐπὶ, παρελθεις ἐπὶ, παρελθεις ἐπὶ, παρελθεις ἐπὶ, παρελθεις ἐπὶ, παρελθεις ἐπὶ, παρελθεις ἐπὶ, παρελθεις ἐπὶ, παρελθεις ἐπὶ, παρελθεις ἐπὶ, παρελθεις ἐπὶ, παρελθεις ἐπὶ, παρελθεις ἐπὶ, παρελθεις ἐπὶ, παρελθεις ἐπὶ, παρελθεις ἐπὶ, παρελθεις ἐπὶ, παρελθεις ἐπὶ, παρελθεις ἐπὶ, παρελθεις ἐπὶ, παρελθεις ἐπὶ, παρελθεις ἐπὶ, παρελθεις ἐπὶ, παρελθεις ἐπὶ, παρελθεις ἐπὶ, παρελθεις ἐπὶ, παρελθεις ἐπὶ, παρελθεις ἐπὶ, παρελθεις ἐπὶ, παρελθεις ἐπὶ, παρελθεις ἐπὶ, παρελθεις ἐπὶ, παρελθεις ἐπὶ, παρελθεις ἐπὶ, παrhoelthet}
in de Singalese Tule Oevergebracht, etc. A revised and corrected edition was published in 1780 by the Revs. Dybrands and Philipps, who also superintended an edition of the Acts printed in 1771, and published under the title De Handelingen der Apostelen Beschreven door den Evangelist Lucus. For this part of the New Text, two editions were published, one being an English translation under the direction of the Rev. S. Cat. In 1776 the whole New Text was issued, while Old Text only some parts were published. When, in 1812, the Colombo Auxiliary Bible Society was formed, one of the first measures adopted by the society was the examination of the Sinhalese version of the New Text. It was found that a thorough revision or a new translation was deemed indispensable. The work of revision progressed but slowly; and it was not till 1817 that the revised New Test, left the Colombo press. Six years later the Old Test was printed. In the meantime, the Rev. Mr. Lambick, of the Church Mission at Cotta, a village near Colombo, had undertaken another translation of the Sinhalese Scriptures, which was completed in 1834 at the expense of the Church Missionary Society. This version, which is generally distinguished as the "Cotta Version," differs from that adopted by the Colombo Bible Society in the following particulars: 1. All the historic terminations—that is, peculiar terminations of the verbs, nouns, and pronouns indicative of respect—used in books in the high Sinhalese dialect are omitted in the Cotta version. 2. Those terminations of nouns, etc., in common use in the colloquial dialect are adopted. 3. One pronoun for the second person singular (there are twelve others in use in Sinhalese books) is uniformly used throughout the Cotta version, whoever may be the person spoken to, human or divine. 4. Words in common use are invariably substituted for learned ones. As both versions had their merits, yet the missionaries engaged in various places into the conclusion that one version should be for common use; and a revision committee was appointed in 1855 to prepare a new translation. In 1857 the revision of the New Test was completed; but when that of the Old Test will be completed is difficult to say. Meanwhile it has been found necessary to print more than one edition of the Old Test, according to the previously existing versions. See Le Long-Masch, Bibliotheca Sacra (Halle, 1778), ii, i, 210 sq.; The Bible of Every Land, p. 147 sq.; the Annual Reports of the British and Foreign Bible Society, 1857 sq. (B. P.).

SINGING-cakes, a name given formerly among Romanists to the consecrated wafers used in private masses.

SINGING-schools were established for the instruction of the order of singers as early as the 6th century, and became common in various parts of Europe, particularly in France and Germany. These schools were very much patronized by Gregory the Great, under whom they gained great celebrity. From them originated the famous Gregorian Chant (q. v.), a plain system of Church music. The priors, or principal, of these schools were a man of great consideration and influence. The name of this officer at Rome was archiconcertor ecclesie Romane, and, like that of prelatus cantor in their chapters and collegiate churches, it was a highly respectable and lucrative office. See Coleman, Christian Antiquities.

Single Combat has always been among semi-civilized peoples a favorite resort to decide a dispute without the effusion of human blood. Classical history abounds with instances. The Bible also gives a few noteworthy cases, of which the contest between David (q. v.) and Goliath is the most remarkable. Similar customs still prevail among the Arabs (Burckhardt, Notes on the Bedouins, p. 174). The practice has in modern times fallen into that of duelling. See the monographs on the subject cited by Volbeding, Index Programmatur, p. 160.

Single Eye is a phrase used in the A. V. (Matt. vi, 29; Luke xi, 34) for ἕνα oπαντὶς ἀπόκοπον, an unclouded vision, rather than a single aim. See the commentators ad loc., and the monographs of Zorn in the Miscell. Durb. i, 240; and Sommel (Lond. and Goth. 1877).

Singlin, Antoine, a French theologian, was born at Paris early in the 17th century, and by the advice of Vincent de Paul embraced the monastic life at the age of twenty-two. After learning Latin in the College de Paris, he entered the Hôpital de Pitié to teach the catechism to children. Later he attached himself to the abbé of St. Cyr, who induced him to become a priest, and procured him a nomination as confessor to the Palatine Royal recluses, to which duty he joined that of superior of two of their houses. His timidity at length caused him to seek a retreat with Madame de Longueville, where he died, April 17, 1664. He was possessed of moderate learning; but sound sense, and a good knowledge of the world, were the father of his fecundity. It is said that he composed 11,000 letters in his Instructions Christiennes (Paris, 1671-73, and later), being a collection of his sermons, which are highly spoken of. He is also the author of several letters in the Nouveaux Memoires de Port-Royal. See his Life prefixed to Goujet's edition of the former works.

Singular, a word used by old writers in the sense of incomparable, matchless, of unequalled excellence. The following examples are taken from king Edward VI's Primer: "Breathe into my heart by thy Holy Spirit this most precious and singular gift of faith, which worketh by charity . . . that when thou shalt call me out of this careful life [a life full of cares], I may enjoy therefore that they most singular and last benefit, which is everlasting glory through Jesus Christ our Lord."—Staunton, Dict. of the Church, s. v.
SINIM (Heb. Sinim', סינים, probably of foreign etymology; Sept. Σενημαίος; Vulg. Sinnae, Novum Testamentum), a tribe of Canaanites (Gen. x. 17, 1 Chron. i. 15) whose position is to be sought for in the northern part of the Lebanon district. Various localities in that district bear a certain amount of resemblance to the name. Perhaps the most plausible is the modern Sin, or Sinna, the ruins of which existed in the time of Jerome (Quast. Gen. loc. cit.); Sin, a village mentioned in the 15th century as near the River Arca (Gesenius, Theaur. p. 948); and Damideh, a district near Tripoli (Robinson, Researches ii. 494). The locality Sinnekelej and Jonathai gave Orthoas, a town on the coast to the northeast of Tripolis. See CANANITE.

Sinœs, in Greek mythology, was an Arcadian nymph who brought up the god Pan, and from whom he was named Sinœs.

Sin-offering (παντρα, chatthath; Sept. αὑράπια, τὸ ἁυραπία, τοῖς ἁυραπίαις; Vulg. pro peccato). The sin-offering among the Jews was the sacrifice in which the ideas of propitiation and of atonement for sin were most distinctly marked. It is first directly enjoined in Lev. iv., where it is specified that the sin-offering, and peace-offering are taken for granted, and the object of the law is to regulate, not to enjoin, the presentation of them to the Lord. Nor is the word chatthath applied to any sacrifice in ante-Mosaic times. Its technical use in Gen. iv. 7 is asserted, and supported by high authority. But the word here probably means (as in the Vulgate and the A.V.) sin. The fact that it is never used in application to any other sacrifice in Genesis or Exodus alone makes the translation sin-offering very improbable. It is therefore peculiarly a sacrifice of the law, agreeing with the clear definition of good and evil, and the stress laid on the sinfulness of sin, which were the main objects of the law in itself. The idea of propitiation was, no doubt, latent in earlier sacrifices, but it was taught clearly and distinctly in the Levitical sin-offering. The ceremonial of the sin-offering is described in Lev. iv. and vi. The animal—a young bullock for the priest or the congregation, a male or a female lamb for a private person, in all cases without blemish—was brought by the sacrificer to the altar of sacrifice; his hand was laid upon its head (with, as we learn from later Jewish authorities, a confession of sin, and a prayer that the victim might be its expiation); of the blood of the slain animal then was taken, and before the veil of the sanctuary, some put on the horns of the altar of incense, and the rest poured at the foot of the altar of sacrifice. The fat (as the choicest part of the flesh) was then burned on the altar as a burnt-offering; the remainder of the body, if the sin-offering were that of the priest himself or of the whole congregation, was carried out of the camp or city to a "clean place" and there burned; but, if the offering were that of an individual, the flesh might be eaten by the priest alone in the holy place, as being "most holy."

The trespass-offering (παντρα, πλημμμα, τὸ τῆς πλημμμελίας; pro delicto) is closely connected with the sin-offering in Leviticus, but at the same time clearly distinguished from it, being in some cases offered with it as a distinct part of the same sacrifice, as, for example, in the cleansing of the leper (ch. xiv.). The victim was in each case to be a ram. At the time of offering, in all cases of damage done to any holy thing, or to any man, restitution was made with the addition of a fifth part to the principal; the blood was sprinkled round about upon the altar, as in the burnt-offering, the fat burned, and the flesh disposed of as in the sin-offering. The distinction of ceremonial clearly indicates a difference in the idea of the two sacrificial. The nature of that difference is still a subject of great controversy. Look-
SIN-OFFERING 778  SINFIRFfERING

ing first to the derivation of the two words, we find that

ήμαι is derived from Ημέω, which is, properly, to
"miss" a mark, or to "err" from a way, and secondarily, to "sin," or to incur "penalty;" hence that ήμαι is derived from the root Ημέω, which is, properly, "to fail," having for its "primary idea negligence, especially in guilt" (Ge-

senius). It is clear that, so far as derivation goes, there
appears to be more reference to general and actual
sin in the former, to special cases of negligence in the
latter. Turning next to the description, in the book of
Leviticus, of the circumstances under which each
should be offered, we find one important passage (Lev.
v, 1-19) in which the sacrifice is called first a "trespass-
offering" (ver. 6), and then a "sin-offering" (ver. 7, 9, 11,
12). But the nature of the victims in ver. 6 agrees with
the ceremonial of the latter, not of the former; the ap-
plication of the latter name is more emphatic and reit-
ereed; and there is at ver. 14 a formal introduction of
the law of the trespass-offering, exactly as of the law
of the sin-offering in iv, 1. It is therefore safe to con-
clude that the word ήμαι is not here used in its techni-
cal sense, and that the passage is to be referred to the
sin-offering only. See TRESPASS-OFFERING.

We find, then, that the sin-offerings were—

A. REGULAR.

1. The whole people, at the New Moon, Passover,

Pentecost, Feast of Trumpets, and Feast of Tabernacles
(Numb. xxvii, 15-xxix, 80); besides the solemn offering
of the Great Day of Atonement (Lev. xvi, 6-28).

2. For the priests and Levites at their consecration
(Exod. xxi, 10-14; 30); besides the yearly sin-offering
(a bullock) for the high-priest on the Great Day of Aton-
ement (Lev. xvi, 30).

3. To these may be added the sacrifice of the red heif-
ec (conducted with the ceremonial of a sin-offering), from
the sin-offering of the burnt offering (Lev. vi, 26), and
used in certain cases of ceremonial pollution (Numb. xi, 9).

B. SPECIAI.

1. A sin of "ignorance" against the command-
ment of the Lord, on the part of priest, people, ruler, or
private man (Lev. iv).

2. For refusal to bear witness under adjuration (Lev.
v, 1).

3. For ceremonial defilement not willfully contracted
(Lev. v, 2, 3), under which may be classed the offerings at
the purification of women (xii, 5-6), at the cleansing of
lepers (xiv, 30-31) or the uncleanness of men or women
(xv, 10-16), on the defilement of a Nazarite (Numb. vi, 6-
11) or the expiration of his vow (ver. 16).

4. A rash oath, the keeping of which would involve sin
(Lev. v, 4).

The trespass-offerings, on the other hand, were always
special, as—

(1.) For sacrifice "in ignorance," with compensation for
the harm done, and the gift of a fifth part of the value,
besides a "sin offering" for the priest (Lev. v, 1-14).

(2.) For ignorant trespass against some definite
exhibition of the law (Lev. v, 17-21).

(3.) For fraud, suppression of the truth, or perjury,
against man, with compensation, and with the addition
of a "sin offering" for the priest (Lev. v, 6).

(4.) For rape of a betrothed soul (Lev. xix, 21), and
the polluted Nazarite (Numb. vi, 19), offered with the sin-
offering.

From this enumeration it will be clear that the two
classes of sacrifice are thus distinguished closely upon each
other, as especially in B (1.), of the sin-offering,
and (2.) of the trespass-offering. It is also evident that
the sin-offering was the only regular and general recog-
nition of sin in the abstract, and accordingly was far
more solemn and symbolical in its ceremonial; the tres-
pass-offering was confined to special cases, most of which
related to sin done with some malice, either to the holy
things or to man, except in (s), where the trespass-
offering is united with the sin-offering. Josephus
(An. iii, 9, 3) declares that the sin-offering is presented
by those "who fall into sin in ignorance" (κατά ἀγνοίαν)
and, the trespass-offering by "one who has sinned and
that sin has caused to him a particular punishment.
From this it may be inferred (as by
Winer and others) that the former was used in cases of
known sin against some definite law, the latter in the
case of secret sin, unknown, or, if known, not liable
to judicial cognizance. Other opinions have been en-
tertained, widely different from, and even opposed to,
other another. The opinions which suppose one offering
due for sins of omission, and the other for sins of commis-
sion, have no foundation in the language of the law.
Others, e.g., that the sin-offering is due to inability, refers to the sins of pure ignorance, the trespass-offering to those of
a more sinful and deliberate character; but this does not
agree with Lev. v, 17-19, and is contradicted by the so-
enm contrast between sins of ignorance, which might be
atoned for, and the "sins of presumption," against which
there is no atonement. Others, by a special application
to the death of Christ, denote sin-offerings as necessary to
the sacrifice. Others seek more recondite distinc-
tions, supposing, e.g., that the sin-offering had for its
object the cleansing of the sanctuary or the common-
wealth, and the trespass-offering the cleansing of the
individual; or that the former referred to the effect of
sin upon the outer man, the latter to the inner man, and
the breach of an external law. Without attempting to
decide so difficult and so controverted a question, we
may draw the following conclusions:

First, that the sin-offering was far more solemn and compre-
prehensive of the two sacrifices.

Secondly, that the sin-offering looked more to the guilt
of the sin done, irrespective of its consequences, while
the trespass-offering looked to the evil consequences of sin,
either against the service of God or against man, as the
the duty of atonement, as far as atonement was possible.

Hence the two might be made to propriety be offered together.

Thirdly, that in the sin-offering especially was found
bolished the acknowledged sinfulness as inherent in
man, and the need of expiation as a necessary office to renew
the broken covenant between man and God.

There is one other question of some interest, as to
the nature of the sins for which either sacrifice could be
offered. It is seen at once that in the law of Leviticus
most of them, which are not purely ceremonial, are
called sins of "ignorance" (see Heb. ix, 7); and in Numb.
xxv, 30 it is expressly said that while such sins can be
atoned for by offerings, "the soul that doth aubst pre-
sumptuously" (Heb. with a high hand) "shall be cut off
from among his people. . . . His iniquity shall be upon
him" (comp. Heb. x, 20). But there are sufficient indi-
cations that the sins here called "of ignorance" are more
strictly "legal ignorance" or "infoliety," repented of by
the unpunished offender, as opposed to those of
deliberate and unrepentant sin. The Hebrew word itself
and its derivations are so used in Ps. cxxxix, 67 (Sept.
κλημενήσασθαι; 1 Sam. xxvii, 21 (ἀγνοεῖται; Ps. xix,
3 παραπλησίας; ḍoḥ xix, 8 (πλάνοιν). The words ἀγνοεῖται and ἀγνοεῖν have a corresponding as-
sent meaning in the New Test.: when in Acts ii, 17, the
Jews, in their crucifixion of our Lord, are said to have act-
ed ignorantly (κατὰ ἀγνοεῖ晏; and in Eph. iv, 18; 1 Pet.
i, 14 the vices of heathenism, done against the light of
conscience, are still referred to ἀγνοεῖν. The use of the
word (like that of ἀγνοεῖν in classical Greek) is
found in all languages, and depends on the idea that
goodness is man's true wisdom, and that sin is the fail-
ing to recognise this truth. If from the word we turn
to the sins actually referred to in Lev. iv, v, we find
some which certainly are not sins of pure ignorance;
they are sins of defect, of heredity, or of hereditary
sinfulness, but they are real sins. The later Jews (see Oth-
tram, De Sacrificiis) limited the application of the sin-
offering to negative sins, sins in ignorance, and sins in
action, not in thought, evidently conceiving it to apply
to actual sins, but to sins of a secondary order.

In conclusion it must be remembered that the sacrifices of the law had a temporal as well as a
spiritual significance and effect. They restored an
SINOLD 779  SION

offender to his place in the commonwealth of Israel; they were, therefore, an atonement to the King of Israel for the infringement of his law. It is clear that this rite was not only an act of expiation, but also of reconciliation; for there are crimes for which the interest and very existence of a society demand that there should be no pardon. But so far as the sacrifices had a spiritual and typical meaning, so far as they were sought by a repentant spirit as a sign and means of reconciliation with God, it can hardly be doubted that they had a real moral effect, so far as their typical character remained. See SACRIFICE.

For the more solemn sin-offerings, see DAY OF ATONEMENT; LEVITICUS, etc.

SINOLD. PHILIP BALTHASAR, a German jurist, was born near Giessen, May 5, 1657, studied at Jena, and died at Lauch, March 6, 1742. He wrote many devotional books under the assumed name Ludwig Ernst von Paramount and Amadeus Kreuzberg. His Gottseige Betrachtungen auf alle Tage des ganzen Jahres has been edited anew by Rev. C. J. Heinersdorf, with a preface of Dr. Ahlfeld (Halle, 1856). He also composed about seventy-two hymns, one of which, Lebet du in war, o welche Leben, has been translated into English, "Kingsway," "True Foundation," "Wilt Thou Live?" by Miss Winkworth, in Lyra German, i. 19. See Wezel, Hymn. iv, 87, 91; Neubaur, Nachrichten (Zittauhau, 1743), p. 119 sqq.: Jocher, Allgem. Gelehrten Lexikon, s. v.; Koch, Gesch. d. deutich. Kirchenlebens, v. 404 sqq.; Knapp, Evangel. Liederschatz, p. 1345, s. v. (B. P.)

SINON, in Greek mythology, was a son of Eads or Mysiphus, grandson to Autolycus, and said to have been the son of Odyseus, and was said to have permitted the Trojans to make him prisoner in order to persuade them to admit the wooden horse within their walls. He represented that it had been constructed in atonement for the robbery of the Palladium, and succeeded in obtaining its admission into Troy, after which he gave the preconcerted signal and opened the door in the horse through which the Greeks poured forth and took possession of the city.

SINOPÉ, in Greek mythology, was a daughter of Asopus and Metope, or of Ares and Egnia or Parnass. Apollo became enamoured of her beauty and carried her off from Boeotia to Paphlagonia, where she brought forth Syrus and gave her name to the town of Sinope.

SINRIOD, in Norse mythology, was one of the four wives of king Hioward, who were accounted the most beautiful women on the earth. She became the mother of Hylining.

SINART, BENOIT, a French controversialist, was born at Sedan in 1696, and after having served as an engineer in Holland, embraced a monastic life in 1716, entering the congregation of the Benedictines at St. Vaune. He taught philosophy and theology at the abbey of Senones, passed into that of St. Gregory at Munster, and became abbot of the latter in 1745, where he died June 22, 1776. Sinart was a well-educated, laborious man. He wrote several religious works, which are enumerated in Hoefer, Nouv. Biog. Générale, s. v.

SINTENIUS, a name common to a number of German theologians, of whom we mention the following:

1. CONRAD. FREDRICH, was born at Zerbst in 1759, where he was appointed deacon in 1773. In 1791 he was made professor of theology and metaphysic, and died in 1820 as member of consistory and pastor of Trinity Church. He published, Theologische Schriften- genbe für Prediger (Leipsic, 1806);—Eisden, oder meine Fortentager nach dem Tode (Dantzig, 1792, 3 pts.), and a number of tracts in various languages. See Von Schlett's biography of Sintenis (Zerbst, 1820); Winer, Handbuch, ii, 290, 410, 415, 470, 477, 840; ii, 90, 138, 141, 227, 280, 353, 356, 366, 398, 779; Theol. Universal-Lexikon, s. v.; Regensburger Conversations-Lexikon, s. v.; First, Bibl. Judaica, iii, 340.

2. JOHANN CHRISTIAN SIGHSMUND, brother of Christian, was born at Zerbst in 1752. In 1785 he was appointed pastor at Dornburg in Anhalt; in 1794 he was called to Roslau; in 1798 he was appointed inspector of church and school, and died in 1829. He published, Oeffentliche kathetische Prüfungen nebst Schlusserledes (Halle, 1808-10, 3 vols.). See the Regensburger Conversations-Lexikon, s. v.; Winer, Handbuch, ii, 209, 780; Theol. Universal-Lexikon, s. v.

3. KARL HEINRICH, brother of the above, was born in 1744 at Zerbst and appointed in 1771 rector at Torgau. In 1788 he was called to Zittau, and died at Zerbst in 1816. He wrote, Theophron (Zerbst, 1800);—Lernbuch der moralischen Vernunftreligion (Altenburg, 1892);—Geron und Paladin (Zerbst, 1803). See the Regensburger Conversations-Lexikon, s. v.; Theol. Universal-Lexikon, s. v.

4. WILHELM FRANZ, son of Johann Christian Sighsmund, was born April 26, 1794, at Dornburg in Anhalt. He studied at Zerbst and Wittenberg. In 1824 he was called to Meissen. He second printed the Church of the Holy Ghost, and in 1831 he was made pastor primarius. His rationalistic views brought him into conflict with his ecclesiastical superior. The consequence was that the rationalistic preachers organized a union of so-called Friends of Light in 1841. Sintenis died Jan. 29, 1859, having retired some years before from the ministry. He published a great number of sermons and discourses, which are enumerated in Zuchold, Bibliotheca Theologica, ii, 1231 sq. See also Theol. Universal-Lexikon, s. v.; Kurtz, Lernbuch der Kirchengeschichte, § 175, 1. (B. P.)

SINTO, SINTUSS. See SINTIOT.

SIQON, SIOFNA or SIONNA, in Norse mythology, was the goddess of youth, gracefulness, and the first motions. She is said to love in the breasts of young men and maidens and dispose them to mutual affection; but she is not to be confounded with Freya, the proper goddess of love.

SI'ON, MOUNT, the name of two hills in the Scriptures.

1. (Heb. hav 'Sion', סֵיה נֵבֶּעַ; Samar. סֵיה הֶבֵּעַ. Sept. τὸ ὅρος τοῦ Ἱεροῦ; Vulg. mens Sion). One of the various names of Mount Hermon which are fortunately preserved, all not improbably more ancient than "Hermon" (q. v.) itself. It occurs in Deut. iv, 48 only, and is interpreted by the lexicographers to mean "lofty." First conjectures that these various appellations were the names of separate peaks or portions of the mountain. Some have supposed that Zion in Ps. cxxxiii, 3 is a variation of this Sion; but there is no warrant for this beyond the fact that so doing overcomes a difficulty of interpretation in that passage.

2. (τὸ ὅρος Σἰὼν). The Greek form of the Hebrew name ZION (Tsiyon), the famous Mount of the Temple (1 Macc. iv, 37, 60; v. 54; vi, 48, 62; vii, 83; xi, 11; xiv, 27; Heb. xii, 22; Rev. xiv, 1). In the books of Maccabees the expression is always "Mount Sion." In the other Apocryphal books the name "Sion" is alone employed. The New Test. usually employs the simple form "Sion" (Matt. xxvi, 51; John xii, 13; Rom. ix, 30; xi, 20; 1 Pet. ii, 6). Further, in the Maccabees the name unmistakably denotes the mount on which the Temple was built; on which the Mosque of the Aksa, with its attendant mosques of Omar and the Mogrebins, now stands. The first of the passages just quoted is enough to decide this. If it can be established that Zion in the Old Test. means the same locality with Sion in the books of Maccabees, one of the greatest puzzles of Jerusalem topography will be solved.

Sion, NUNS OF. These nuns belonged to the order of St. Brigid, and had their house at Sion, near Brentford, Middlesex. It was broken up by
SIONITA 780  SIRA

Henry VIII, reassembled by Mary, and finally dispersed under Elizabeth. Many of the many settled in Lisbon. In 1810 the house there was broken up, and many of its members sought a refuge in England, some of whom were living in 1825 in Staffordshire.

SIONITA. See Gabriel Sionita.

SIONITAE, a sect which arose in Norway in the first half of the 15th century. They called themselves Sionites, as professing to set forth the reign of the king of Sion, of whom they claimed to be children, and with whom they were in such close communion that their acts were identified with his. They also took the name of Pilgrims and Strangers. It was their custom to wear long beards and hair, and to keep their faces blackened as "Sion," with some mystical character, embroidered in red on their sleeves. They delivered passports to their emisaries, whom they charged to aid in establishing the kingdom of Sion. One of their number, George Klei- non, gave out that he was inspired with the spirit of prophecy, and, under his guidance they repudiated the baptism of their converts, and repudiated them when they entered their community. Jeroen Bolle, who had studied theology at Copenhagen, was their minister, and celebrated their marriages. Their principal residence in Norway was Bragernes, from which they were exiled in 1486, and obliged to settle at Altona. King Christian VI, on the last of the same year, issued orders for dissolving the community on account of its disobedience to the laws, and its pretensions of setting up a kingdom which claimed to be independent. Some chose to emigrate, while others gave up their peculiar customs and adopted those of the country. See Grgoire, Hist. des Sektes Relig.; Blunt, Dict. of Sects, n. v.; Gardner, Faiths of the World, s. v.

Siph'motch (Heb. Siphmoth', סיפומת, fruitful; [Fürst]; Sept. Sapho v. הַסַּפֶּה, Vulg. Saphomoth'), one of the places in the south of Judah which David frequented during his freebooting life, and to his friends in which he sent a portion of the spoil taken from the Amalekites (1 Sam. xxxi, 28). It is not named by Eusebius or Jerome. It is perhaps the present ruined site Kunis el-Sir, in a wady of the same name not far south-east of Arar, or Aror (Palmer, Desert of the Exodus, p. 841).

Si'phori, a sect found under this name in Gennadius Massiliensis, but it is supposed to be a misunderstanding of Sappocchophi (q. v.)

Si'phra (also compounded Be-si'phra, De-si'phra), from the Heb. סֵפָר, "a book," is an expression used by the Mosaicite to denote a certain book to which reference is made, and it is generally quoted with the prefix ב and י, סֵפָרָה יְבִיא or אֲסֵפָרָה יָבִא, and is also abbreviated in ספ, ספירה. Thus, on וכל in Gen. ii, 5, the Masora Parva remarks אספרה יב, i.e. "there occurs five times at the beginning of a verse in this book," viz. Genesis. Where books consist of two, as Samuel, Kings, Ezra, and Chronicles (Ezra and Chronicles according to the Jewish canon, but one book), they are only quoted as one. Thus, on חָלֹה in 1 Kings ii, the Masorah remarks אספרה יב, i.e. "the word חולה occurs seventeen times written plea in that book," i.e. in 1 and 2 Kings. The same is the case with the twelve minor prophets, which are also regarded as one book. Thus, on כל in Amos iii, 12, the Masoretic note is אספירה יב, i.e. "the word כל occurs five times in that book [viz. in the twelve minor prophets] with the accent." Hence the Masora Magna laid down the following rule: כֵּלָה יְבִּיא instead of כֵּלָה יב. However, דָּרֶךְ אֲסֵפָרָה יְבִּיא מָצָא, i.e. "take this rule into thine hand: where in the Masorah the twelve minor prophets are spoken of as 'in the book,' the whole book of the minor prophets is to be understood." Thus, on דָּרֶךְ אֲסֵפָרָה יְבִּיא, the word מַעַלָּה is written three times plea in that book," viz. in the minor prophets; or מַעַלָּה in xiv, 18, יְבִּיא, i.e. "there occurs three times at the beginning of a verse in this book," i.e. not in Zechariah alone, but also in all the other books constituting the minor prophets. It must, however, be observed that when the Masora Parva on the word מַעַלָּה in Lev. xvi, 29 remarks אספירה יב, i.e. "there are thirty-nine instances where מַעַלָּה is written plea in this book," viz. in the Pentateuch, this is a mistake, since מַעַלָּה is never used for the "Pentateuch," but always מַעַלָּה. With the servile פָּרֲעַה we read on Gen. xxxiv, 25, on the word מַעַלָּה, i.e. "it is one of the words written with a Patach and Atrak in that book." To understand this remark, we must call attention to the laws of the vowel-points, viz. that when Atrak and Soph-pasuq come under Patach and Segol, they convert the latter into a long kamets. Some instances, however, are left in each book of the Bible which have not been thus converted, and these are called אספירה יב פָּרֲעַה=Patach de-Siphra, i.e. "Patach of the book," and to this the Masorah remark alludes. See Buxtorf, Tiberian sect Commentarius Masoraeus, p. 262 sq.; Levita, Massoretic Ita-Massoroth (ed. Ginsburg), p. 234 sq.; Frondsdorff, Massora Magna, p. 9 sq. (B. P.)

Sip'pai (Heb. Sippay', סֵפָי, my bows or sills; Sept. Σαφαί v. Σαφή; Vulg. Saphati), one of the sons of the Rephaim, or "the giants," slain by Sibbœoggles at Gezer (1 Chron. xx, 4), called in the parallel passage (2 Sam. xxi, 18) by the equivalent name Saphar (q. v.).

Sipro'désis, in Grecian mythology, was a Cretan youth who accidentally observed Diana while the goddess was bathing, and who was accordingly transformed into a girl.

Sip'ylius, in Grecian mythology, was one of the sons of Amphion and Niobe, who vainly tried to avoid the fatal arrows of Apollo (Apollod. iii, 5, 6; Ovid, Met. vi, 281).

Si'quis (Lat. if any one), the name of a notice, so called from its first two words put forth by any objector to dispute the fitness of a candidate for holy orders. It was formerly posted up on the church doors, but now is read from the altar, and is as follows: "Notice is hereby given that A B, now resident in this parish, intends to offer himself a candidate for the holy office of deacon (or priest) at the ensuing ordination of the lord bishop of —, and if any person knows any just cause or impediment for which he ought not to be admitted into holy orders, he is now to declare the same, or to signify the same forthwith to the bishop." In the case of a bishop, the si quis is affixed to the door of Bow Church or the Court of Archbishops. This notice corresponds to the premadico of the primitive church and the epiphrasia of Chalcedon (451). See Eadie, Eccles. Cyclop. s. v.; Walcott, Sac. Archedel, s. v.

Sir. See Thorn.

Si'ri (as the English of dominus) was the title adopted by priests, as "dom" by monks, and in consequence they were commonly called Sir Johns. There were three airs—sir king, sir priest, and sir knight. At the Reformation it was the title of those in orders, but not graduated—those who had graduated being known as magis- ters (masters).

Si'ra (Ben-), Alphabet of. Under the title of "Alphabet of Ben-Sira" (אֲלֹפֶת בֶּן שִּׁירָא, there exists a collection of proverbs in Hebrew and
Si'rah (Heb. with the art. hus-Sirah', סירֳה, the turning [perhaps, as First suggests, from a khān in the vicinity; Sept. Σερή; Vulg. Sira), a well (תִּשְׁרָה; Sept. Σερή; Vulg. Iteris) marking the spot from which Abner was recalled by Joab to his death at Hebron (2 Sam. iii, 26). It was apparently on the northern road from Hebron—that by which Abner would naturally return through BahaUr (ver. 16) to Mahanaim. There is a spring and reservoir on the western side of the ancient northern road, about one mile out of Hebron, which is called Ain Sira, and gives its name to the little valley in which it lies (see Dr. Rosen's paper on Hebron in Zeitschrift der deutschen morgenl. Gesellschaft, xxii, 486, and the excellent map accompanying it). This may be a relic of the well of Sirah. It is mentioned as far back as the 12th century by rabbi Peshachia, but the correspondence of the name with that of Sirah seems to have escaped notice.—Smith. Lien. Conder suggests that the modern Arabic name, "like the Hebrew, means withdraus, and the title is due to the fact that the spring is under a stone arch at the end of a little alley with dry stone walls, and is thus withdrawn from the high-road" (Tent Work in Palestine, i, 86). Josephus, however, says (Ant. vii, 1, 5) that the place was twenty days' journey from Hebron, and was called Bedira (Bidiyad).

Sirani, Giovanni Andrea, an Italian painter, was born in 1610 at Bologna, where he also died in 1670. He was a pupil of Guido, some of whose works he finished. His own paintings are of a similar style, being on religious subjects, and found in several churches in Italy.

Sirani's three daughters were among his pupils, the eldest of whom, Elisabetta (born at Bologna in 1638, and died there in 1665), left a considerable number of paintings on religious subjects, after the style of Guido, which are quite celebrated even beyond the limits of her own country. See Hoefer, Nouv. Biog. Générale, &c., vol. iv.

Sirath, in Islamism, is a bridge, narrower than a hair and sharper than a sword, which passes over the abyss of hell, and which all human beings must attempt to cross after their death. Moslems are enabled, by sustaining angels, to pass over safely: but Christians, Jews, and other unbelievers fall into the abyss below.

Sirueda, in Indian religion, is a name for chief priests among the Burmese, who enjoy the veneration of other priests and the people generally to a high degree. Their bodies are embalmed after death, and interred in the Convent of Immortality.—Volmer, Wörterb. d. Mythol. s. v.

Siren, a name for fabulous beings occurring in Greek mythology and first mentioned in the Odyssey of Homer, who enticed seamen by the magic sweetness of their songs and then slew them. Ulysses escaped their power by stopping the ears of his companions with wax and causing himself to be bound to the mast of his vessel until beyond the reach of their musical charms; and the Argonauts were preserved by the singing of Orpheus, which excelled that of the Sirens. The number of the Sirens was at first two, but afterwards three. Their names were said to be Aglaio (clear voice) and Thelkiopet (magic song). Finissone being afterwards added, and others being substitut-
ed by different writers—e.g. Parthenope, Ligea, and Leucosia. They were fabled to have descended from Achelous, a river-god, by the muse Terpsichore or Calliope, or by Sterope, daughter of Ptolema, from Phorcys, or from the earth. Their form was also variously represented—part woman and part fish or bird, endowed with various other characteristics. The latter were generally regarded as being sometimes identified with the Harpies. The place of the abode of the sirens was also uncertain—the Sicilian headland Pelorum, the island of Caprea, the Sirenusian isles, the island Anthemusa, and the coast of Parthenope (the modern Naples) all having been so designated. At Parthenope the tomb of the siren of that name was shown; and a temple dedicated to the worship of these beings stood near Surrentum. See Vollmer, Wörterb. d. Mythol. s. v.; Smith, Dict. of Mythol. s. v.; Author, Classical Dict. s. v.

Siret, Pierre Hubert Christophe, a French preacher, was born at Rheims, Aug. 3, 1754, and was admitted to the Congregation of the Canons of St. Genevieve, where he taught theology. He became prior of the abbey of the Val des Écoliers; afterwards he devoted himself to preaching, and he has left some remarkable productions in that line. At the time of the Revolution he was curate of Sourdin, near Provins; but he renounced the priesthood and held several civil offices. He died at Paris, May 19, 1834. See Hoefer, Nouve. Bioè. Générales, s. v.

Siri, Victor, an Italian historian, was born in 1698, and was a monk of Parma, where he employed his leisure hours in writing a history of his times. Of the writings of Siri cardinal Mazarin held a very high opinion, and persuaded Louis XIV. to invite him to Paris. On his arrival he was preferred to a secular abbey; and, quitting his ecclesiastical functions, lived at court in great intimacy and confidence with the king. He was himself a learned and accom- plished historiographer. Siri died in Paris, Oct. 6, 1695. He published a kind of political journal, Memorie Raccolte, afterwards collected into volumes, running up to the eighth (4to)—Il Mercurio, ovvero Istoria de Correnti Tempi (1647-82, 15 vols. 4to). He also published some mathematical works, and replies to his critics (1658, 1671). See Chalmers, Bioè. Dict.; Hoefer, Nouve. Bioè. Générales, s. v.

Sirisius, pope from 384 to 398, was a firm defender of the orthodox faith and a zealous promoter of the power of the Church through the exercise of a rigid discipline. He commanded the monk Jovinian and bishop Bonosus of Saridca (q. v.) as heretics, and zealously prosecuted the suppression of the Manichean and Priscillianist heresies. He carefully and carefully zealously proceeded. The earliest discoveries referable to circumstances he succeeded in attaching Eastern Illyria to the see of Rome, and induced the bishop of Thessalonica to acknowledge himself the vicar of Rome for that province. He was the first to make celibacy a law of the Church, and furnished in his Epist. ad Humerim Episc. Epirus an étude the earliest discovery to the end. Epistles from his pen are still extant. See Petr. Constant. Epist. Rom. Pontificum in Gieseler's Lehrbuch d. Kirchen- geschichte, i, 2; Bonn, p. 383, and comp. p. 199, 276. See Herzog, Real-Encyklop., s. v.

Siron (Heb. Siryon, הִסִּירון, in Deut., but in Ps. xxxix Siryon, סִירִיון; Samar. סִירֶיון; Sam, סָרִיון; Sept. Sirios; Vulg. Siron), one of the various names of Mount Hebron (q. v.), that by which it was known to the Zidonians (Deut. iii, 9). The word is most identical with that (סִירָן) which in Hebrew denotes a brooklet, or a "cistern"; and Gesenius therefore expresses his belief that it was applied in this sense to the moist spot in the shape of a tomb of the name Thoim (which has the same meaning) given to a mountain in Mount Hebron (v. 14). This rendering is not supported by the Sam. Ver., the rendering in which—Ruben—seems to be equivalent to Jebel esh-Sheshik, the ordinary, though not the only modern, name of the mountain.

Sirius, a name which occurs in both mythology and astronomy—the dog which stands near Orion in the skies, and which belonged either to that hero, to Ceph- alus, to Isis, or to Ergione; the dog-star.

Sirleto, Guglielmo, a learned Italian, was born in 1514 at Guardavalle, near Stiro, in Calabria, of a poor but honorable family, and was early destined to the Church. His intelligence and prodigious memory enabled him to form remarkable productions in study; and he soon gained influential friends, who at length procured him the position of librarian of the Vatican in 1549. Successive popes added to his honors and emoluments, including the cardinalate (1565), and the bishopric of San Marco in Calabria (1566), then that of Squillace (1568), which he resigned in 1578, to devote himself wholly to the Vatican library. He died at Rome, Oct. 8, 1585, leaving some religious works, which are enumerated in Hoefer, Nouve. Bioè. Générales, s. v.

Sirmond, Councils of (Concilium Sirmiensis). I. The first Synod of Sirmium was held in 351 against Photinus, bishop of that see. His heresy was similar to that of Paul of Samosata. He denied the existence of our Lord before his birth of the Virgin, and maintained that he was merely a man, but admitted that the Holy Spirit descended into him, and that he might in a subordinate sense be called the Son of God. After having been condemned in the Council of Milan in 347, he took himself to Constantinople, and demanded a fresh hearing before judges to be appointed by the emperor. This was granted to him; and he pleaded his cause against Basil of Ancyrza in the presence of certain judges, all laymen, nominated by the emperor. He was, however, again condemned in the Synod of Rome (A.D. 349), in which Valens and Uraeus embraced the communion of Athanasius. An information of the decree against him having been forwarded to the East, the Oriental bishops at Sirmium this year to confirm the act of condemnation, and to pass sentence of deposition upon Photinus, which was accordingly done. There seems to be some question about the orthodoxy of the bishops who composed this council, as they drew up a formulary of faith which is denounced by Athanasius as erroneous. Hilary, however, commends it as Catholic. It is not to be confounded with the conference which Hosius of Cordova was, by threats and violence, compelled to sign in a subsequent council, held in 357, from which the words εἰρήνη, ἵππος, were rejected. See Manili, ii, 729; Pagi, in Baronii Ann. (A.D. 351), note xii; Cave, Apostolici, p. 406.

II. The second Council of Sirmium was held by order of the emperor Constantius, who was at the time in Sirmium, at the instigation of the Ariam bishops, who, having drawn up a new formulary of faith, rejecting the words εἰρήνη, ἵππος, and ὑπόστασις, in which the Father was declared to be greater than the Son, endeavored to force the Catholic bishops to subscribe it, and especially Hosius of Cordova. The old man, yielding to torture and imprisonment, at last consented, and signed the confession of faith; but Athanasius testifies that before his death he anathematized the Ariam heresy (Cave, apostolici, p. 406).

Sirmon, Antoine, a French Jesuit, nephew of the following, was born at Riom, 1591, and admitted at the age of seventeen to the Order of the Jesuits, in which he taught philosophy, and afterwards devoted himself to preaching. He died at Paris, Jan. 12, 1643, leaving several religious works, which are mentioned in Hoefer, Nouve. Bioè. Générales, s. v.

Sirmond, Jacques, a learned French Jesuit, was born at Riom, Oct. 12, 1559, being the son of the provost of that place. He was educated at the College of Bilbon, entered the Society of Jesuits in 1576, and took the vows two years after. He was sent to Paris,
where he taught classical literature two years and rhetoric three, having François de Sales as one of his pupils. During this time he acquired his knowledge of the Greek and Latin languages. In 1586 he began his course of divinity, which lasted four years. In 1589 he was sent to Rome by the general of the order, Aquaviva, to become his secretary, which office he filled for sixteen years. The study of antiquities was at that time his principal object, and he became noted as an antiquarian. He returned to Paris in 1608. Pope Urban VIII had a desire to draw him again to Rome, and caused a letter for that purpose to be sent to him by father Vittelleschi, general of their order; but Louis XIII retained him, and in 1637 appointed him his confessor. In 1648, after the death of Louis XIV, he was the most frequent visitor at the ordinary occupations. In 1645 he went to Rome, for the sake of assisting at the election of a general, upon the death of Vittelleschi; and then returned to France and resumed his studies. But, having engaged in a warm dispute in the College of the Jesuits, the excommunication brought on a disorder which carried him off in a few days. He died Oct. 7, 1651. Much of Simond’s life and the better part of his reputation relate to his labors as an editor. His works, as author and editor, amount to fifteen volumes, folio, five of which contain his original productions. They were printed at the royal printing-house, Paris, 1696, under the title Jacob Simonds Opera Varia, ex patrum Collecta, ex suis Schedis Emendationibus, Notis Posthumis, Epistolis, &c. Opuscula alia quibus Auctoris. See Hoefer, Nouv. Biog. Générale, s. v.

Sirname. See Surname.

Sirôna, in Roman mythology, is a name designating a goddess mentioned in several inscriptions in connection with Apollo Gramnos. Some writers regard the name as a local appellative of Diane, others that it designates a Gallic divinity. The most recent inscriptions were discovered by the author at Nierstein, on the Rhine, which is accordingly known as the Sirona spring. Another inscription in stone, having the names of both Apollo and Sirona, and dating from A.D. 201, was dug up at Grossbottwart, in Württemberg.

Sirpad. See Brier.

Sis. See Crane.

Sis’naamî [most Sis’amati, some Sis‘amatu] (Heb. Sisamay, סיסמא, of uncertain etymology, perhaps distinguished; Sept. Σισαμαῖ, son of Eleasah, and father of Shallum, descendants of Sheshan, of the line of Jerahmeel, the son of Judah) (1 Chron. i, 40). B.C. apparently not long ante 1618.

Siscidenses, a sect of the Waldenses which is mentioned by Reinerius as agreeing with them in everything except that they received the sacrament of the eucharist (Reiner, Contr. Waldens, in Bibl. Max. Lugd. xxi, 206 sq.). Gieseler (Eccr. Hist. iii, 446, n. 6, Clark’s ed.) thinks the name is properly spelled Siscidenses, and that they took it from some local Sisum Sisid.

Sis’era (Heb. Sisera, סיסרה, battle-array [Gese­na], or lieutenant [First]; Sept. Σισαῖρας v. r. [in Ezra and Neh.] Σισαιρας, etc.; Josephus, Σισαίρας [Ant. v, 5, 4]), the name of two men.

1. Captain (營) of the army of Jabin, king of Canaan, who reigned in Hazor. He himself resided in Harosheth of the Gentiles. As this is the only instance in those early times of armies being commanded by other than kings in person, the circumstance, taken in connection with others, intimates that Sisera was a general eminent for his abilities and success. All that we really know of him is stated in the Biblical account of the battle under the conduct of Barak and Deborah (Judg. v.). B.C. 1409. See JABIN. The army was mustered at the Kishon, on the plain at the foot of the slopes of Leijon. Partly owing to the furious attack of Barak, partly to the impassable condition of the plain, and partly to the unwieldy nature of the host itself, which, among other impediments, was made up of 900 chariots, which caused confusion and rout took place. Sisera deserted his troops and fled on foot. He took a north-east direction, possibly through Nazareth and Safed, or, if that direct road was closed to him, stole along by more circuitous routes till he found himself before the tents of Heber the Kenite, near Kedesh, on the left bank of the Jordan river, overlooking the upper basin of the Jordan valley. Here he met his death from the hands of Jael, Heber’s wife, who, although “at peace” with him, was under a much more stringent relation with the house of Israel (Judg. iv, 22-22; v, 20, 26, 28, 30). His name long survived as a word of fear and exaltation in the mouths of prophets and psalmists (1 Sam. iv, 21; Ps. lxxvii. 9). See JAEIL. The number of Jabin’s standing army is given by Josephus (Ant. v, 5, 1) as 300,000 footmen, 10,000 horsemen, and 3000 chariots. These numbers are large, but they are not those to those of the Jewish legends. Sisera “had 40,000 generals, every one of whom had 100,000 men under him. He was thirty years old, and had conquered the whole world; and there was not a place the walls of which did not fall at his voice.” When he shouted, the very beasts of the field were riveted to their places. “Nine hundred horses went in his chariot” (Judg. v, 19, 24) went wild, and were wrapt up in foam and were swelled and were thrashed after the waters of the land of Israel, and they asked and prayed Sisera to take them with him without further reward” (Her. Rub. c. 23; comp. Judg. v, 19). See Stanley, Hist. of the Jewish Church, lect. xiv.

It is remarkable that from this enemy of the Jews should have sprung one of their most eminent characters. The great rabbi Akiba, whose father was a Syrian proselyte of justice, was descended from Sisera of Haro­sheth (Bartolocci, iv, 272). The part which he took in the Jewish war of independence, when he was standard­bearer to Bar-cocheba (Otho, Hist. Doct. Misc. 184, note), shows that the warlike force still remained in the blood of Sisera.

2. After a long interval the name reappears in the lists of the Nethinim as the head of one of the families who returned from the captivity with Zerubbabel (Ezra ii, 58; Neh. vii, 55). B.C. ante 586. Sisera is another example of the foreign names occurring in these lists, doubtless because Canaanites and Philistines still held the lowest offices of the Temple, even though the Sisera from whom the family derived its name were not actually the same person as the defeated general of Jabin. It is curious that it should occur in close companionship with the name Harsha (Ezra ii, 52), which irresistibly recalls Haro­sheth.

Sis’innes [Σισίννης], the form in which the name of Tannai (τανναί) of the Hebrew text (Ezra v, 3, 6; vi, 6, 13) appears in the Apocrypha (1 Esdr. vi, 3, 7; vii, 1) and Josephus (Ant. x, 4, 5, 7), being that of the governor of Syria and Phoenicia under Darius, and a contemporary of Zerubbabel, who attempted to stop the rebuilding of the Temple, but was ordered by Darius, after consulting the archives of Cyrus’s reign, to adopt the opposite course, and to obtain the plans of chariots and horses (Herod. i, 103), born in Sisimpan, pope, was born in Syria, and elected to the pontificate Feb. 7, 708, in place of John VII. He died twenty-eight days afterwards, and was succeeded by Constantine. See Artaud de Montor, Hist. des Popes, i.

Siscon, George, a Methodist Episcopal minister, was born in Fairfax County, Va., Jan. 5, 1811; converted in 1829; admitted on trial in the Pittsburgh Conference in 1838, and appointed to Connellsville Circuit; in 1839, Bradotechield Circuit; in 1843, Braddockville Circuit; in 1845, Bumpassville Circuit; in 1846, again on Connellsville Circuit; in 1838-37, Chartiers Circuit; in 1839, supernumerary; in 1840-41, Birmingham; in 1842-43, West Newton Circuit, where he died, April 1, 1843. He was a devout Christian man—faithful, zealous, and successful as a minister, and an excel­
SISTER

SISTERHOODS

lent preacher. See Minutes of Annual Conferences, iii. 451.

Sister (σιστή, σαίστη; σειστή), a term often having, in the style of the Hebrews, equal latitude with brother (q.v.). It is used, not only for a sister by natural relation from the same father and mother, but also for a sister by the same father only, or by the same mother only, or a near relation only (Matt. xii. 56; Mark vi, 9). Sarah is called sister to Abraham (Gen. xii. 12). In the very early Jewish church, enough only his niece according to one or sister by the father's side according to others. By the Mosaic law (Lev. xviii, 18) it is forbidden to wed the sister of a wife, i.e. to marry two sisters; or, according to some interpreters, to marry a second wife, having one already; literally, "Thou shalt not take a wife over her sister to afflict her," as if to forbid polygamy. Sometimes the word sister expresses a resemblance of conditions and of inclinations. Thus the prophets call Jerusalem the sister of Solomon and of Samaria, because that city delighted in the imitation of their idolatry and iniquity (Jer. iii, 8, 10; Ezek. xvi, 45). So Christ describes those who keep his commandments as his brothers and his sisters (Matt. xii, 50).

Sisterhoods, associations of women, in the Roman Catholic Church, devoted to the attainment of ascetic perfection and works of charity, and bound together by religious vows. See Nuns. Some of these congregations devote themselves exclusively, or in a very special manner, to hospital work, and the care of aged or infirm persons. Among the Roman women's orders are: Augustinian Nuns; Benedictine Nuns; Brightines; Calvary, Congregation of our Lady of Capuchins; Carmelites; Carthusians; Charity, Sisters of; Cistercian Nuns; Claire, St. Nuns of; Cross, Orders of the, Dominican Nuns; Elizabethines; Genevieve, St. Daughters of; Immaculate Conception of Mary, Nuns of the; Jesus, Sacred Heart of, Congregation of; Minims; Notre Dame, Congregation of; Providence, Nuns of; School Sisters, Shepherd, Order of the Good.

The very many orders of these sisterhoods we here mention the following:

1. Adoration, Perpetual, Sisters of.—This order was founded at Avignon by Antoine Lequenin, a Dominican friar, in 1639, and in 1659 the first regular house was established at Marseilles. The members follow the rule of Augustine, and wear the Dominican habit. They continued to be a congregation until 1674, when they were raised to an order, and placed under the jurisdiction of Marseilles. After the suppression of the convents in France, some fled to Rome and others were condemned to die, but escaped through the death of Robespierre. The convent was returned to Marseilles in 1816, and in 1856 erected a new convent. There are five houses of this order in France, viz. at Marseilles, Bollene, Aix, Avignon, and Carpentras.

2. Adoration Reparatrix, Congregation of the, was founded at Paris in 1848, with the object of making reparation for the evils existing in the world and Church. It was approved by pope Pius IX in 1853, and special privileges were granted for the dispensing of indulgences, etc. With this Congregation is associated another, that of the Œuvres des Tabernacles. It has only one house, located in Paris.

3. Holy Family, Sisters of.—This order was founded at Arras in 1636 by Jeanne Biscot, and was specially engaged in hospital work. It escaped entire destruction in the Revolution, and was re-established by Napoleon, 1.

4. Ann, St., Daughters of.—This order was founded in 1848 by the bishop of Montreal, and has its motherhouse at Lachine, with 343 sisters and novices. It had in 1891 (see Sadlier, Catholic Directory) 63 sisters, 11 schools, 2 hospitals, 2 parochial schools, 8 parishes, and 8 houses in the diocese of Montreal, and 8 in Vancouver Island and British Columbia.

5. Assumption, Daughters of the, called also Haudepark, were founded by Etienne Haudry in the time of St. Louis of France. Their habit consists of a blue dress and mantel, with the colors of the linen, and Mauve of the cap and mantle. A new convent building was erected during the last century in Paris which was called the Convent of the Assumption, from which the order has taken its name. It has in British America 12 convents, 77 sisters and novices, and teaches about 1500 pupils (see Sadlier, Catholic Directory, 1891); and in the U. S. 2 convents and 27 sisters.

6. Augustine, Sisters of, a congregation of Hospitaliars, were founded at Arras in 1178. Their house was broken up in 1550, but reopened in 1563 as the Hospital of St. John. They experienced much persecution during the Revolution; but in 1810 they were reorganized, with a small convent at Arras.

7. Calvary, Daughters of.—This congregation was founded at Gennes, France, by Virginie Centurion, in 1619, and approved by pope Pius VII in 1815. Gregory XVI bestowed upon it a yearly endowment. The work of this order is similar to that of the Order of St. Vincent de Paul, with the exception that these Daughters are employed only in hospitals, and do not attend the sick at their homes. They are also called Brigade Sisters.

8. Childhood of Jesus, Sisters of the, were founded in Rome, Oct. 15, 1853, by canon Triest, and on July 20, 1856, recognized as a regular religious community. Their desire is special devotion to the Virgin under ten years of age. They have only one house, situated at Rome.

9. Cross, Holy, Sisters of the, have their motherhouse at Le Mans, France. They have a convent at St. Laurent, near Montreal, with 171 sisters and novices; and in the United States (see Sadlier, Cath. Directory, 1891), 7 convents, 175 sisters, 33 schools, with 512 pupils, and 5 asylum, etc., with 150 inmates.

10. Cross, our Lady of the, Sisters of, were founded by M. Buisson at Murtinias, Grenoble, France, in 1883. Their constitution was approved by the bishop of Grenoble, and they had in 1899 6 establishments and 97 sisters.

11. Father, Eternal, Sisters of the.—This order was founded at Vannes, France, by Jeanne de Queler, in the latter part of the 17th century. It was only a secular community until 1701, when the bishop of Vannes gave it a regular constitution. It was the sole order in Britain in which the perpetual adoration was established. It is not now in existence.

12. Holy Family, Sisters of the.—This congregation was founded by Madame Rivier about 1827, and was in reality an outgrowth of the Sisters of the Presentation of the Virgin. It has in the United States (see Sadlier, Cath. Directory, 1891) 8 convents, with 26 sisters.

13. Holy Names, Sisters of the, were founded in 1843 in the diocese of Montreal, and have their headquarters at Longueil. They have in the diocese 12 houses, 511 sisters, novices, etc., and 2902 pupils; in the diocese of St. Hyacinth, 2 houses, with 322 pupils; in the diocese of Sandwich, 3 houses, with 866 pupils; and in the United States, 15 houses, with 2990 pupils (see Sadlier, Cath. Directory, 1891).

14. Humility of Mary, Sisters of the.—There is a convent of the Sisters of the Humility of Mary at New Bedford, Mass, (according to the Roman Catholic Directory, it is 18 sisters, 8 pupils, and 20 orphanases; also communities at Newburg, Louisville, and Harrisburg, Q. Beyond this no information is given, except that they
SISTERHOODS

now have in the United States (Sailier, Cath. Directory, 1891) 3 houses, 120 sisters, and 400 pupils.

15. Incarnate Word, Sisters of the, have in the United States (Sailier, Cath. Directory, 1891) 6 houses, 179 sisters, and 400 pupils.

16. Jesus, Daughters of, founded in 1890 by the bishop of Cahors, France, and recognized by the government in 1865. Their houses are taken annually for the first eight years of their profession, after which they are taken for five years.

17. Jesus, the Child, Sisters of, founded at Paris by Nicolas Barré in 1678. They are dependent on their superiors for their support, not even being allowed to dispose of any property without their consent. They are subject to the regular places and the direction of their superiors. They confess twice a week before the assembled community. There are several of these establishments in France. In the United States (see Sailier, Cath. Directory) in 1891 they had 3 houses, with 71 sisters and 76 pupils.

18. Jesus and Mary, Sisters of.—This congregation was founded in Lyons, France, in 1816, by André Coindre, assisted by Mlle. Claudine Thavenet. The Sisters employ themselves in the education of young children. A branch establishment was founded in Puy, Haute Loire, in 1822; and in 1842 sisters went to Hindostan, and founded schools in several cities. In 1849 they founded an establishment in Barcelona, Spain, from which have arisen several others. In 1854 they came to America, and opened a school in Quebec, in which diocese they have 4 houses, with 102 sisters and novices, and 648 pupils. In the United States they have 5 houses, 47 religious, and 1101 pupils (see Sailier, Cath. Directory).

19. St. John of Fornes, Sisters of.—The two monasteries of this name were founded in Spain by cardinal Xinienes, the one at Alcala in 1504, and the other at Toledo in 1511. Pope Leo X approved the order in 1514, and granted it liberal benefices, which were increased by Philip II. The house at Alcala was removed to Madrid, and transferred from the Franciscan rule to that of the Augustines.

20. St. Joseph, Sisters of.—This order was founded at Puy, France, by father Medaille, in 1650, confirmed by the bishop of the diocese in 1661, and received the royal sanction in 1665. In 1667 an asylum of Penitence was established in connection therewith, and another congregation was founded at Bourg in 1825. The principal house is at Clermont. In the United States the order has (see Sailier, Cath. Directory, 1891) 85 houses, with 1335 sisters and novices; 77 schools, with 7847 pupils; and 21 asylums, etc., with about 2400 inmates.

21. St. Martin, Sisters of.—An order of nuns, founded in 1808 by Madame Malesherbes and her daughter, Madame Molié. There are four establishments, devoted to instruction and religious contemplation.

22. St. Madeleine, Sisters of.—This order was founded at Strasbourg in 1625, and approved by pope Gregory XIV in 1627. It is under the Augustinian rule. In 1747, during the wars, it was broken up, and the buildings destroyed. The order was afterwards restored, and largely benefited by the pope. In 1825, so greatly had its income increased that the magistrates obliged it to contribute largely of its revenue for civil purposes, and in 1825 its entire income was confiscated.

23. St. Martha, Sisters of, an order that was founded in 1813 by Mlle. Edwige de Vivier at Romans. In 1815 it was settled into a community, having had a house built for its accommodation. It was confirmed by the government in 1826, and in 1848 had 30 establishments and about 4500 sisters.

24. Mater Dolorosa, Sisters of, at Perigueux, founded in 1643, and approved by the bishop in 1650. In 1701 a general hospital was established, and another in 1711. During the Revolution the Sisters were nearly destroyed, being expelled from their house. Afterwards they were allowed to return, but in 1839 took possession of a new convent. At present they have 30 houses. Another branch of this order, called the Sisters of the Orphans, was founded at Gras in 1831. It has 9 houses and about 45 sisters.

25. Modesty, Sisters of, founded at Venice about 1573 by Dejanara Valmarana, under the rule of St. Francis. Their employment consists in teaching, visiting the poor, and religious exercises. They have several houses.

26. Mary of our Lord, Sisters of the, founded at Crest, France, in 1519, and a second house at Valence in 1814. The order was approved by the king in 1826, and by pope Pius IX in 1855.

27. Mary of the Virgin, Sisters of the, founded at Saint-Genrmain-en-Laye, France, in 1818. They are under the Augustinian rule, and devote themselves to the education of girls, having two seminaries, one for young-schooling, and another for primary school for poor children.

28. Nazareth, Holy Family of, Sisters of the, founded in 1851. Their object is principally to prepare girls for vocations by religious instruction. They were approved by the bishop in 1855. Another house, Notre Dame de Nazareth, was founded in 1874 by brother Olivier. It was established for the purpose of instructing slave-girls purchased in the markets of the Levant. The Society of Ladies of Nazareth was formed at Montmirail, France, in 1822. In 1853 the Ladies founded a house at Nazareth, in Palestine. They now have three houses.

29. Piarists, Sisters of, founded at Tréguier, France, in 1699. Their several establishments have been broken up during the Revolution, and their convents are now occupied by the Ursulines.

30. Paul, St., Hospital Sisters of, called Sisters of St. Maurice de Chartres, were founded in 1690, re-established in 1806, and approved by the government, and also by an Imperial edict, in 1811. They had in 1899 38 establishments in the diocese of Chartres, and 67 in the remainder of France; in England, 9 houses, and 1 in Hong-Kong.

31. Paul, St., Sisters of.—This congregation was founded at Angoulême, France, in 1826, and was under the Franciscan rule. The Sisters are sometimes called Ladies of Dogmers, and have three houses in France.

32. Philippines, Oblate Sisters of, were founded at Rome by Rutilio Brandt in 1620, and confirmed by Urban VIII. The object of the sisterhood was the education of poor girls, and they were under a cardinal protector.

33. Philomena, St., Sisters of, were established at Poitiers, France, in 1835, and approved in 1888. They founded a small agricultural college for boys, and in 1899 had about 56 sisters.

34. Poor, Little Sisters of the, were founded at Saint-Servan, Brittany, by the abbe Le Failleur in 1840. Much opposition at first, but soon opened private schools in all the cities of France. They were approved by Pius IX, July 9, 1854, and recognised by the French government in 1856. In 1868 they came to Brooklyn, N.Y., and now have houses in Cincinnati, New Orleans, Baltimore, St. Louis, New York, Philadelphia, Louisville, and Boston. There is another community, styled Sisters of the Poor of St. Francis, which originated at Aix-la-Chapelle in the present century, and came to the United States in 1857. They have many establishments in the large cities.

35. Presentation, Sisters of the.—Under this general name were several congregations. That of Notre Dame, founded in the diocese of Digne, France, by Mgr. Molié, bishop of Digne, was recognised by royal ordinances in 1826. In 1859 they had 3 establishments and 100 sisters.

36. Presentation of the Virgin, Sisters of the.—This order was founded at Tours, France, in 1684 by Marie Poussepin. It has been a flourishing community, having a large number of establishments, with about 1200 sisters, who are chiefly engaged in hospital work. The Presentation of Mary was founded at Bourg Saint-Amédée, France, by Madame Rivier, in 1796, and approved by Gregory XVI in 1866. Several other establish...
SISTERHOODS exist in France. In 1858 an establishment was formed at Sainte-Marie-de-Monmoir, Canada, which has now (1891) in the diocese of St. Hyacinth, 12 houses, 129 sisters, and 2065 pupils. Of the Order of the Presentation there are in the United States 13 houses, 96 sisters, and 1000 pupils.

Sisters Good, Sisters of the, were founded at Caen, Normandy, in 1720 by two poor girls, who in 1730 opened asylums for homeless children and others. They were suppressed in 1789, but persevered in their labor until May 22, 1805, when 15 sisters met in community. They were charged with the care of insane women in 1817, and soon after with that of insane men. In 1874 the movement house numbered 900 sisters, and upwards of 1000 insane patients. They have 3 establishments—Albi, Pont l’Abbé, and Brucciet. In Canada, the care of the insane at Quebec devolved on the Sisters of the general hospital till 1844.

38. Solidaires, nuns of the Order of St. Peter of Alcantara, instituted by cardinal Barberini in 1670. They imitate the austere practices of their patron saint, observe perpetual silence, and employ their time wholly in spiritual exercises; they go barefoot, gird themselves with a cord round the waist, and wear no linen.

39. Trinity, Holy, Sisters of the, founded at Valence, France, by mother Andrée de Saintes-Esprit in 1885. The congregation suffered much during the Revolution, but was not expelled from its home. In 1837 it received the royal approval, since which time it has largely increased in establishments and numbers.

40. Union, Christian, Sisters of, founded at Fontaine-le-Comte, France, by Madame Polainin in 1869, and confirmed by the archbishop of Paris in the same year. This order is under the protection of the Holy Family—Jesus, Mary, and Joseph. Dispersed by the Revolution, the Sisters were authorized to reunite themselves into a community. The order is very flourishing, having houses in many of the provinces of France.

41. Virgin, Holy, Sisters of the, or Ladies of Budes, an order founded at Rennes, France, in 1676, and authorized by Louis XIV in 1678. It was founded for the reception of girls who had been converted from Calvinism to the Church of Rome, but has not grown much since the general decline of the Reformation in France. See Appleton’s American Cyclop., s. v.; Barnum, Romanism as It Is; Migne, Dict. des Ordres Religieux, vol. i–iv; Saillier, Catholic Directory, 1879.

SISTERHOODS, PROTESTANT. In the Church of England, several communities of women devoted to works of charity have been organized in the present century.

1. Sisters of Mercy were founded at Devonport, about 1845, by Miss Lydia Sellon, and were at first under the visitatorial control of the bishop of Exeter. The society is composed of three orders, viz., those living in the community and leading an active life; those unable to take vows, but who wish to lead a quiet, contemplative life; and married and single women who live in the world, but are connected with and assist the community. The Sisters are bound only by the vow of obedience to the superior, and are free to abandon their vocation at will.

2. A sisterhood for nursing the sick at their homes, or in hospitals, etc., was founded at East Grinstead by Dr. John Mason Neale in 1855. In 1874 it had houses in London, Aberdeen, Wigan, and Frome-Selwood.

3. Sisterhood of St. John the Baptist was founded at Cheltenham in 1849, and comprises (1) choir and lay sisters living in community; (2) a second order (formed in 1860) of those who enter for periods of three years, to be renewed at their own desire and with the consent of the Sisters; (3) associates, who live in their own home and render such assistance as they may.

4. Sisterhood of St. Mary, Wangan, was established in 1850, and has branch houses at Bedminster, Plymouth, and other places.

5. Sisterhood of St. Mary the Virgin was established at Wymering in 1859, and consists of sisterhood (residents) and ladies of charity (associates). It has branches at Manchester and Aldershot.

6. Sisterhood of St. Thomas the Martyr has its parent house at Oxford, and branches at Liverpool and Plymouth.

7. Sisters of the Poor were founded in 1851, and have their parent house in London, with branches at Edinburg, Clifton, Eastbourne, and West Chester.

In the Protestant Episcopal Church, the Sisters of the Holy Communion were founded by the exertions of the Rev. W. A. Muhlenburg, in connection with the Church of the Holy Communion in New York. They are under no vows, and leave whenever they please. They are usually received between the ages of twenty-five and forty years; if under twenty-five, they must secure the consent of their parents or guardians. Since 1858 they have had charge of St. Luke’s Hospital, New York. There is also a community of four or five sisters associated with the ‘House of Prayer,’ Newark, N. J.

Sistrum (Gr. οἰκοτροπα), a mystical instrument of music used by the ancient Egyptians in the worship of Isis. Its most common form is seen in the annexed wood-cut, which represents an ancient sistrum formerly belonging to the library of St. Genevieve, at Paris. Apuleius (Met. xi, 119, 121, ed. Ahl.) describes the sistrum as a bronze rattle, consisting of a narrow plate curved like a sword-belt, through which passed a few rods that rendered a loud, shrill sound. He says that these instruments were sometimes made of silver, or even of gold. Plutarch says that the shaking of the four bars within the circular apsis represented the agitation of the four elements within the compass of the world, by which all things are continually destroyed and reproduced, and that the cat sculptured upon the apsis was an emblem of the moon.

Sisty, John, a minister of the Baptist denomination, was born near Newark, N. J., March 26, 1788, and became a member of the First Baptist Church in Philadelphia, July 4, 1803. For some years he was engaged in a successful business in Philadelphia, being a manufacturer of pocket-books. His heart being set upon the preaching of the Gospel, he was licensed by the Church in Mount Holly, N. J., whither he had removed, Aug. 13, 1814. For a time he preached without ordination. A congregation having been formed in Haddonfield, he was ordained as its pastor in August, 1819, and held that office for nineteen years, not by any means short of charge to the Church, but proving his love for it by contributing liberally to the erection of a house of worship for his people from his own funds. He resigned Sept. 30, 1836, and removed to Philadelphia, where he died, Oct. 2, 1866. He was a member of the body which in 1814 organized the Baptist General Convention, and was the last of the thirty-three who were the constitu-
SITTING

SITTING, as a posture of Christian adoration, never
had (according to Bingham) any allowance in the prac-
tice of the ancient Church, being considered by them
as very irreverent. Neither did they ever receive sit-
ting the sacrament of the Lord's supper, but always

kneeling or standing. It was quite a general custom in the early Church for the people to stand while listening to the sermon. This custom was most observed in Africa, France, and some of the Greek churches, while in the churches of Italy the contrary custom prevailed. This posture is allowed in the Church of England at the reading of the lessons in the morning and evening prayer, and also of the first lesson or epistle in the communion service, but at no other time except during the sermon. Some of our Protestant denominations use sitting as the posture of prayer, and of receiving the Lord's supper. Some Arians in Poland have done this for the avowed reason of showing that they do not believe Christ to be God, but only their fellow-creature. See Bingham, *Christ. Antiq.* 4, Hook, *Church Dict.* s. v.

**Siva**, in Hindut mythology, is the third member of the Hindu trinity, the terrible destroyer. According to the doctrine of the Sivaites, he is, next to Brahma, the highest god, to whom Brahma and Vishnu are subordinate; but the worshippers of Vishnu and Brahma rank Siva lower than either of these deities. He is commonly represented as riding on the ox Nandi (the symbol of wisdom), and holding his beautiful consort Parvati on his lap. Painters and sculptors have sought to introduce into his countenance every faculty of the impassible expressive element, and he is regarded as cruel and blood-thirsty, so as to require the most terrible sacrifices; but he is nevertheless filled with tenderest love towards his wife, and has established her in one half of his own body, to the end that she need never be separated from him. He is, accordingly, the god who presides over the generation of all living beings. To renounce the joys of love is to act contrary to his will, and himself passed a hundred celebratory years in the arms of the fascinating Uma, an earlier form of Parvati. He consequently awakens all life, as he destroys it—a contradiction whose solution must be found in the fact that the natural and religious teachings of the Hinduts do not recognise any real annihilation, but simply a transformation, change, the passing from one condition into another. Siva appears as an immemorable pillar of fire whose dimensions Vishnu and Brahma cannot estimate, and as Mahadeva (the great god); and also in a large number of additional avatars, in all of which he promotes the welfare of the world and means of destruction. The worship paid him is accordingly both cruel and lascivious. The frequent deities celebrated in the *pagodas of India* are chiefly in his honor.

**Sivabrahmins**, in Hindutism, are Brahmins of the sect of Sivaites, who recognise Siva as the supreme deity.

**Sivan** (Heb. *Sivan*, מִשְׁובָּן; Sept. *Nadob*), the third month of the Hebrew year, from the new moon of June to the new moon of July. The name signifies a month of *sabbath* in the Hebrew etymology; but as it occurs only in Est. viii. 9, it is better to regard it as of Persian origin, like the other names of months; the corresponding Persian month being *Shëfand-aram*; Zend, *Çepit Armaiti*; Pehliavi, *Sopand-umad* (Benfey, *Monatsamen.* p. 13, 41 sq., 122 sq.; Gesenius, *Theaur.* p. 946). See **Calendar; Month**.

**Sivpasadaña**, a term employed by the Buddhists in Ceylon to denote almsgiving when practiced in relation to the priests. Of this almsgiving the Buddha was given three maxims: 1. Chandi-pasadaña, the gift of salvation; 2. Abhãrãdana, the gift of food; 3. Sayanãsana-dança, the gift of a pallet on which to recline; 4. Gilanaprathyâdana, the gift of medicine or sick diet. See Hardy, *Eastern Monachism*.

**Six-Principle Baptists.** See **Baptists, Six-Principle**.

**Sixt, Christian Heirich, D.D.,** a German theologian, member of consistory, and dean of Nuremberg, who died Aug. 20, 1866, is best known as the biographer of Paul Eber (q.v.). (Heidelberg, 1849; Ansbach, 1857.) He also wrote, Petrus Paulus Bergerius, pâpistaei Nuncius, catholicoh Bishop and Vorkãmpfer des Ercangelismus (Brunswick, 1855) the same in a popular edition (ibid., 1866). See Zuchold, *Bibliotheca Theol.* iii, 1238; *Literarischer Handwörter*, 1866, p. 396. (B. F.)

**Sixtus, Simeón**, an Italian convert from Judaism, was born at Siena in 1590. After his conversion to Christianity he joined the Order of Francisians, and distinguished himself by his preaching in many cities of Italy. Having been accused of heterodoxy, the Inquisition condemned him to the stake, but he was saved through the intervention of the cardinal Michael Ghislieri, afterwards pope Pius V, with whose aid he joined the Dominican Order in 1597. He was noted for his knowledge of Greek, Hebrew, history, and philosophy, and distinguished himself both as a writer and a preacher. He died in 1599. The work which immortalized his name is his *Bibliotheca Sancta ex Principis Catholicos Ecol. Auctoribus Collecta* (Venice, 1566, and often; lastly Naples, 1742), which he dedicated to pope Pius V, and in his dedication he states, "Me, quem tu alim, ad inferos revocatum et errorum tenebris eritutum, sincerum veritatis lumine illustrasti," etc. The *Bibliotheca* is divided into eight books: the first treats of the division and authority of the Scriptures; the second contains a historical and alphabetical index of the matter; the third treats of the interpretation of the Holy Writings; the fourth gives an alphabetical list of Catholic interpreters; the fifth (published also separately with the title *Ars Interpretandi S. Scripturarum Absolutissima* [Cologne, 1577-85]) contains a hermeneutic of the Scriptures, the sixth and seventh contain exegetical disquisitions, and the last an apology of the Scriptures. The work was highly esteemed among both Catholics and Protestants. Besides this, he also published homilies and mathematical writings. See Kalkar, *Israel u. die Kirche*, p. 72 sq.; *Theologisches Univers.-Lexikon*, s. v.; Dupin, *Bibl.* vol. xvi; *Vox, Bibl. Hebraica*, i, 999; Simon [K.], *Histoire Critique*, p. 457 sq.; Fabri, *Delecta Argumentorum et Syllogos*, p. 516; Hoefer, *New. Biog. Générale*, s. v. (B. F.)

**Sixtus I (St.),** pope, was born at Rome, of a senatorial family, near the close of the 1st century, and succeeded Alexander I in 119. We know little of his life, except that he perished in 127 during the persecution ordered by the emperor Hadrian. He was canonized, and his day was fixed as Aug. 6, although he appears in the martyrologies likewise under April 3 or 6. There have been attributed to him two decretal Letters, which are spurious; there is also a Commentary under his name in the patristic collections. He was succeeded in the episcopal office by Telephorus.

**Sixtus II (St.),** pope, was born at Athens about a senatorial family, near the close of the 1st century, and succeeded Alexander I in 119. We know little of his life, except that he perished in 127 during the persecution ordered by the emperor Hadrian. He was canonized, and his day was fixed as Aug. 6, although he appears in the martyrologies likewise under April 3 or 6. Two of the false decretales [see Ducreux-
like a recent example, he carried his measures with a high and firm hand, and so vigorously enforced justice that the instances often read more like cold-blooded cruelty. His measures had the desired effect, however, of extirpating the bandits who had so long overrun the country, and of some show of the general lawlessness of society. We cannot enumerate here his great enterprises in administrative reform, or the magnificence of his public works, but they all mark his passion for order and completeness. His foreign policy was of the same trenchant description; no half measures, or vagaries, were to be tolerated. For examples of this spirit it may be sufficient to name the Catholic league, and the invasion of England by the Spanish Armada. Still more surprising and gigantic were his conceptions as he grew old, as his rigid financial system enabled him to amass a large public treasure in the vaults of St. Angelo. His designs now were sufficient to prove that he had perfected the government of his own states and improved the discipline of the Church as an instrument of a more universal dominion than the papacy had ever reached; even the Greek Church and the empire of Mohammed were destined to be transformed under his hand. Sixtus V breathed his last amid the triumphs of his apostolic career on August 27, 1590. A storm burst over the palace of the Quirinal at the moment of his death, and it became an article of the popular faith that he had achieved his enterprises by a compact with the evil one, which had then expired. See Hoefer, Nouv. Biog. Générale, and the literature there cited.

Sjabo-no-alt is a martial and religious festival in which the male youth of Japan engage; the Kalamus festival.

Sjugu-nitsai Abugui Kaju Kurabi is a Japanese popular festival, observed on the fifteenth day of the first month, and in connection with which it is customary to serve a favorite dish of beans.

Sju-go-zin is a subordinate or adjunct deity of the Japanese mythology, who, in the form of a fox, accompanies the moon-god in his travels. He was highly venerated, but even more greatly feared. His form, however, was changing, and he never failed to command the high regard of the people as a protector, though he sometimes appears as the attendant spirit of Inari as well. In the latter character he is honored in the form of a fox, and his image of clay is sold at the annual fairs which fall on the days of the Inari festival, to serve as the patron of all who are afraid of the foxes. He is found in nearly every house and in the little temples throughout the land. The belief is still common that the foxes assemble once a year in some unknown place where a flame bursting from the earth foretells the fruitfulness of the year.

Skade, in Norse mythology, was the wife of Njord and daughter of the giant Thjasse. She lives in her father's dwelling, Thrymheim, and hunts with the wild bear with bow and arrow as she rides on her geese down the mountain. See NORSE MYTHOLOGY.

Skaldas (or Scalds) were the poets, reciters, and singers, and also the historiographers, of the ancient Scandinavians. Like the Celtic bards, they went before the heroes to battle with inspiring war-cry, and observed the warriors' deeds, recounted them in song, and transmitted their fame to succeeding generations. As the issuers of posthumous fame and as divinely inspired wise-men and prophets, they were in high esteem at the courts of princes. They were known throughout Norway, Sweden, Iceland, Denmark, and the north of Germany. The legends of the Edda, preserved for us by Snorre Sturleson, were the work of these Skaldas.

Skanda, in Hindu mythology, was the child of Raudra (Siva) and the sisters Ganga and Uxa, the former of whom was the consort of all the gods, the latter
of Rudra alone. Skanda was taken in charge at his birth by the stars Kartigas, who were six nymphs, and thus obtained his other name, Kartikeya. He was washed and nourished, and became so bright that he eclipsed the brilliancy of the sun. He received the divine arms and appliances as leader of the heavenly armies when they should march against the evil demons and spirits of the under-world. Numerous pagodas were erected to him in India, in which he was always represented as accompanied by his consorts Devanel and Velliamen. The name Skanda signifies the rapidity conquering one.

Skapidur was one of the celebrated skilled dwarfs, in Norse mythology, who came from Swains Haugi to Orwanga on Jornwall.

Skatalundr, in Norse mythology, was the grove where Odin caused the beautiful Brynhildar to fall into a magic sleep and encased her with shields, leaving her in that condition until Sigurd wrought her deliverance.

Skangul, in Norse mythology, was one of the battle-virgins, the beautiful Valkyrias.

Skaggoeld, in Norse mythology, was a Valkyria. The name signifies time of axes.

Skeldbrimer was one of the asa-horses, in Norse mythology, on which the asas (excepting Thor, who walked) rode to the place of daily judgment.

Skelton, Philip, a worthy and learned clergyman of Ireland, was born in the parish of Derryhappy, near Lisborn, February, 1707, and educated at Trinity College, Dublin. Soon after graduation he went to reside with his brother John at Dundalk, and was ordained deacon for the cure of Newtown-Butler, Fermanagh Co., about 1729. This, after two years, he resigned and returned to his brother's, where he remained until 1732, when he settled on the curacy of Monaghan, in the diocese of Clogher. In 1730 the living of Pettigon, County Donegal, was given to him; and in 1759 he received the living of Devenish, Fermanagh Co., worth about three hundred pounds a year. In 1756 he removed to Fintona, in the County of Tyrone, from which, in 1780, he took his final leave and removed to Dublin to end his days. He died May 4, 1787. Mr. Skelton was somewhat eccentric, but was a very charitable, unassuming, and useful minister. He published, A vindication of the Bishop of Winchester (1736):—Some Proposals for the Revival of Christianity (1736):—Dissertation on the Constitution, etc., of a Petty Jury (1737):—Necessity of Tillage and Granaries (1743)—Truth in a Year (1744):—The Candid Reformer (1744):—The Chevalier's Hopes (1745):—Deism Revealed (1749, 2 vols. 8vo; 2d ed. 1751, 2 vols. 12mo):—The Consultation (1758):—Discourses, Controversial and Practical (1754, 2 vols.). He published his works by subscription in 1770, 5 vols. 8vo; in 1794 vol. vii, and in 1796 vol. viii, also in the same year A Catechism. See Allibone, Dict. of Brit. and Amer. Authors, s. v.; Darling, Cyclop. Bibl. bibl. a. v.; London Monthly Review, Dec. 1792; London Gent. Mag., lxxx, 104; lxxxii, 349; lxxxvii, 58; Southern [k], Life and Correspondence, ch. xxxii; Chalmers, Biog. Dict. a. v.

Skevi-Kare, a small sect in Sweden. In 1734 a little society of Priests, driven from Denmark and other countries, took shelter on the little Isle of Wermode, near Stockholm. Their contempt for the established worship had drawn them into disagreeable circumstances, but in 1746 they were permitted to fix themselves on this island, where their descendants still remain. Having taken the domain of Skevie, they are called Skee-Kare.

Skew or Askewtable. The term skew is still used in the north of England for a stone built into the bottom of a gable or other similar situations to support the coping above it. It appears formerly to have been applied to the stones forming the slopes of the set-offs of buttresses and other projections. Skew table was probably the course of stone weathered, or sloped, on the top, placed over a continuous set-off in a wall.

Skalgr is the best one of the name of the moon in Norse mythology.

Skibladner, in Norse mythology, was a splendid ship belonging to the god Frey. It was built by skillful dwarfs, the sons of Ivaldi, and was made large enough to hold all their armor, but is nevertheless capable of being reduced to so small dimensions that it may be carried away in one's pocket. It also commands favorable winds, whatever may be the destination of its voyage.

Skidmore, Jeremiah, an eminent elder in the Presbyterian Church, was born at Rockaway, L. I., March 20, 1729. He came to New York at the age of sixteen, where for fifty-seven years he was engaged in business. He was senior member of the firm of Jeremiah Skidmore & Sons. He early became a member of the Rutgers Street Presbyterian Church, and removed with it to its present location on Madison Avenue, filling successively the office of deacon and elder. He often represented the Church in her higher judicatories, and in Church matters his judgment was highly prized. He maintained an unspotted and honorable business reputation. In social life he was regarded with the highest esteem, and in the domestic circle his Christian virtues were still more prized because better known. His example and influence were an untold blessing to society, and his death was a great loss to the Church. He died in New York, November, 1877. (W. F. S.)

Skierstuvas, among the ancient Prussians, was a sausage-festival celebrated in memory of the dead.

Skin (prop. *"vz, ër, so called, perhaps, from its nudity; once *"vza, gelded, so called from its smoothness [Job xvi, 15]; once improperly for *"vza, basis [Ps. cv. 5], flesh, as elsewhere rendered; *"vzaa], the cuticle of man (Exod. xxiii, 29; Lev. xiii, 2; Job viii, 5, etc.), or the hide of an animal (Job xl, 91); the latter chiefly as taken off (Gen. iii, 19; xxvii, 16; Lev. iv, 10; viii, 8), also as prepared or wrought into leather (xi, 32; xiii, 48; Numb. xxxi, 20). So in the plur. (Exod. xxvi, 14; xxxiv, 84). For the *"vzaa-skins (Num. iv, 8; xi, 12), see BAGGER. For the use of holding water, see SKIN-BOTTLE. The word in Heb. is poetically put for body (Job xviii, 15). The phrase "skin for skin" (ii, 4) means like for like, or what is intimate and dear as the skin. "Skin of the teeth" (xix, 20) is evidently a proverbial phrase for the barest nothing.

Skin-bottle. The people of Asia west of the Indus use the skins of animals, on a journey, for carrying water and other liquids, as well as, in general, other articles of provision which they are obliged to take with them in their journeys across the deserts or thinly inhabited parts. The preference of such vessels is well grounded. Earthen or wooden vessels would soon be broken in the rough usage which all luggage receives while conveyed on the backs of camels, horses, or mules;
and if metal were used, the contents would be boiled or baked by the glowing heat of the sun. Besides, such skins exclude the encroaches of ants, which swarm in those countries, and also effectually guard against the admission of fine impalpable dust. The scarcity of streams and wells renders it indispensable for all travelers to carry water with them. When a party is large, and has purposely the prospect of a fresh supply of water distant, large skins of the camel or ox, two of which are a good load for a man, are usually used. Goat-skins serve in ordinary circumstances. Individual travelers, whether in large or small parties, mounted or on foot, usually carry a kid-skin of water, or else a sort of bottle of prepared leather shaped something like a powder-flask. The greater portability of such skins is another advantage. The skins of kids and goats are those used for ordinary purposes. The head being cut off, the carcass is extracted without opening the belly, and the neck serves as the mouth of the vessel. See Bottle.

**Skinfaxi** (bright mane), in Norse mythology, was the steed of Dagur (day), with which he makes his daily journey from earth to the north. The glitter of its mane gives light to the world.

**Skinner, Esskiel,** a Baptist preacher, was born in Glastenbury, Conn., June 27, 1777. He was apprenticed to a blacksmith, but bought the last year of his apprenticeship and studied medicine. He received his license to practice medicine in 1801, and settled at Granville, Mass. Here he professed religion and united with the Congregational Church; but afterwards adopting the views of the Baptists, he was immersed and joined the Baptist Church in Lebanon. He enlisted in the army in the war of 1812; but was discharged in a few months on account of the failure of his health, and removed to Stafford, Conn. While there he began to preach, and was licensed in 1819 by the Baptist Church in that place. In 1822 he was ordained pastor of the church in Ashford, where he officiated nine years; and also pastor at Westford, where he officiated seventeen years, including a period of four years which were spent in the service of the Colonization Society. In the summer of 1834 he went to Liberia, and rendered important services to that colony. On his final return in 1837, he resumed his pastoral relations with his former charge, which he resigned in April, 1855, and went to reside with his son (Dr. E. D. Skinner, Greenport, L. I.), where he died, Dec. 25, 1855. Mr. Skinner published a series of articles On the Prophecies, in the Christian Secretary (1843). See Sprague, Annals of the Amer. Pulpit, vi, 694.

**Skinner, James,** a missionary of the Presbyterian Church, was born in Dundee, Scotland, in 1801. His parents were members of the Secession Church of Scotland. He was educated at St. Andrew's College and at Marischal College; studied divinity under John Mitchell, D.D., and John Dick, at Glasgow; was licensed in the summer of 1833; was accepted by the Mission Committee of the United Associate Synod, and designated to go to Canada; and was ordained for that work by the Presbytery of Forfar March 31, 1834. He landed at Montreal in May, 1834, and immediately directed his steps westward to the township of Southwold, on Lake Erie, where he began a series of itineraries and expositions, setting up regular stations and starting new congregations in every direction. He died Oct. 17, 1865. Mr. Skinner was emphatically a missionary. See Wilson, Presb. Hist. Almanac, 1867, p. 481. (J. L. S.)

**Skinner, Thomas E.** A minister of the Methodist Episcopal Church, was born on Kent Island, Queen Anne Co., Md., April 26, 1838. He was educated at Balt-
timore (where he was converted in his sixteenth year) at Dickinson College, and graduated as Doctor of Medicine at the Maryland University of Baltimore. In 1859 he abandoned the profession of medicine, and entered the Philadelphia Conference. Consumption soon began to prey upon him, and he died June 14, 1862. See Minutes of Annual Conferences, 1869, p. 45.

**Skinner, Thomas Harvey, D.D., LL.D., a Presbyterian minister, was born at Harvey's Neck, Perquimans Co., N. C., March 7, 1791. He graduated at Princeton in 1809, and commenced the study of law in his native state. After pursuing this study for eighteen months, he experienced religion, and determined to preach. He returned to Princeton, where he remained one year. The year 1812 was mainly spent with Rev. John McDowell at Elizabeth, N. J., and he was licensed to preach in December of that year. He was ordained co-pastor with Dr. Janeway, Philadelphia, June 10, 1813, and in 1816 became pastor of the Fifth Presbyterian Church in Locust Street. He remained in Philadelphia until 1832, when he accepted the chair of Sacred Rhetoric in Andover Seminary. He occupied this for three years, and then became pastor of the Mercers Street Church, New York. After thirteen years of service he became professor of sacred theology in the Union Theological Seminary, N. Y., and continued to discharge the duties of this professorship until his death, Feb. 1, 1871. He published, Religion of the Bible (1839) — Aids in Preaching and Hearing (1839) — Hints to Christians (1841): Thoughts on Evangelizing the World: — Religious Life of Francis Marques: — Vinet's Pastoral Theology, and Vinet's Homiletics (1856) — Discussions in Theology (1866). See Plumley, Presb. Church throughout the World, p. 410.

**Skold, in Norse mythology, was a son of Odin, who obtained for his consort the beautiful Gelfon after she, aided by her magic powers, in the form of a white ploughed-out Zealand off from Sweden. Skold was ancestor of the Danish kings, traces of whose graves and monuments yet occur near Leira. Leira was the early Heleida, or Lethe, the principal place of sacrifice among the heathen Danes.

**Skinner, in Norse mythology, was an intimate friend and companion of the god Frey.

**Skirt** is the rendering in the A. V. properly of ἱματισμός (so called as being pendulous), the flowing train of a female dress ("skirts," Jer. xxiv. 22, 36; Lam. i. 9; Nahum iii. 5; "train," Isa. vi. 1; elsewhere "haimon"; more vaguely of ἄμματος, ἐφεδρή (literally a wing), the flap of a robe (Deut. xxxii. 39; xxvii. 20; Ruth iii. 9; 1 Sam. xv. 27; xxiv. 4, 5, 11; Ezek. v. 8; Hag. ii. 12; Zechar. viii. 23); improperly of ἐθνῶν, pek (literally the mouth, as usually rendered), the upper opening of a garment around the neck (Ps. cxxxii. 2; "hole," Exod. xxxii. 32; xxxiii. 28; "collar," Job xxx. 18). To raise the skirts of a female's garment is put for a symbol of the greatest insult and disgrace (Jer. xiii. 22, 26; Nah. iii. 5; comp. Isai. xlviii. 14); to make her to cover her face with her dress was a token of mourning (Ruth iii. 9), or to remove it was preliminary to sexual intercourse (Deut. xxiii. 1); the wide Oriental outer garment serving as a coverlet by night. See Dress.

**Skjoldr,** in Norse mythology, is the name of a famous Danish king who, after many conquests and great deeds, caused himself to be placed with his treasures on board a ship and exposed to the mercy of the winds.

**Skoll (or Skoll),** in Norse mythology, was the terrible son of Fenris and Gyme, whose form was that of a monstrous giant resembling a wolf. He steadily pursues the sun in order to devour it, and in this purpose he will eventually succeed. His brother Hati will, in like manner, devour the moon in the end of the world.
Skoptzi. See Russian Sects.

Skuld, in Norse mythology, was (1) the youngest of the three Norns, or Fates, who guide the life of men. The gods often seek counsel from them; and even Odin has not the power to alter their decrees. (2) A Valkyria who, accompanied by two others, rides to the battle-field to invite the heroes to Odin's banquet in Valhalla.

Skull (εγκαταλείπει, galgethēs), so called from its round form [2 Kings ix, 35; "head," 1 Chron. x, 10; elsewhere "pall;" σκυλός; the Lat. cranium, Matt. xxvii, 39; Mark xv, 22; Luke xxiii, 33; John xix, 17]. See CALVAR.

Sky stands in the A. V. as the rendering only of 743. šidak (Deut. xxxiii, 26; 2 Sam. xii, 12; Psa. xviii, 11; Ixxvii, 17; Isa. xlv, 8; Jer. li, 9), the thick black clouds (as elsewhere rendered) spread over the whole firmament; and thrice (Matt. v, 2; Heb. xi, 12) of ὅποια ἐστιν, the visible expanse of air (elsewhere "heaven"). In Scripture phraseology the hevena (השמים), as the opposite of the earth (Gen. i, 8, 10), constitute with it the world (i, 1; ii, 1; Deut. xxxii, 19; Psa. i), for which idea the Heb. had no other proper expression. According to the theosophy of the amphigogomy, the sky seems to have been regarded as physical, being a space between the upper and lower waters, or rather as a fixed expanse (השמים, "firmament") which separates these (Gen. i, 6, 8; Psa. civ. 3; cxlvii, 4). Through this oceanic heaven were poured upon the earth rains, dew, snow, and hail (Job xxxvii, 2) by means of openings, which were under the divine control, and which are sometimes called windows (השמים, Gen. vii, 11; viii, 2; 2 Kings vii, 19; or doors (המשל, Psa. lxxxvii, 23). In the sky hung the sun, moon, and stars, the lights which inhabit the earth (Gen. i, 14 sqq.) and above it set Jehovah as the throne (Psa. ciii, 3; comp. xxxiv, 3; Ezek. i, 26). These, however, were rather poetical than literal representations (comp. Exod. xxiv, 10; Dan. xii, 3; Job xxxvii, 18; Ezek. i, 22; Rev. iv, 6), for there are not wanting evidences of a truer conception of the cosmical universe (Job xxxvi, 7; xxxvii, 7). See EARTH.

Skydnir, in Norse mythology, is an additional name for the moon, signifying the haunting one.

Slack, Comfort L., a Presbyterian minister, was born in New York, N. Y., Aug. 12, 1855. He graduated at Hamilton College, Clinton, N. Y., studied theology in Auburn Seminary, was licensed to preach by the Cayuga Presbytery, and in 1883 was ordained and installed pastor of Westminster Church at Newport, Jasper Co., Ind. After serving charge for three years, he labored faithfully till his death, Feb. 24, 1885. Mr. Slack was distinguished for his fidelity as a student, his interest in the missionary cause, and his devoted piety. The Rev. George Ransom, of Muir, Mich., writes of him: "He brought into the work of the ministry an accuracy of judgment, a perspicuity of reasoning, and a safety in his conclusions which are rarely achieved save by the discipline of a long and trying experience." See Wilson, Preb. Hist. Almanac, 1886, p. 224. (J. L. S.)

Slack, Elijah, L.L.D., a Presbyterian divine, was born in Lower Township, Bucks Co., Pa., Nov. 24, 1784. He professed religion in 1801, attended the grammar-school at Trenton, N. J., from 1803 to 1806, and graduated at the College of New Jersey; Princeton, in 1808. He was appointed to the presidency of the College during which time he studied theology privately; was licensed by the New Brunswick Presbytery in 1811; was elected vice-president of the College of New Jersey and professor of natural philosophy and chemistry in 1812, and continued to discharge the appertaining duties for five years, which are rarely achieved save by the discipline of a long and trying experience. He was elected president of the Literary and Scientific Institute in that city. In 1819, the Cincinnati College being established, he was appointed president and professor of natural philosophy and chemistry, in which position he remained until 1828, when, from deficient endowment, the college closed. During this time he had, in connection with Dr. Daniel Drake, established the Cincinnati Medical College and Commercial Hospital. In 1828 he removed to Brooklynville, Ohio, where he established a high-school for young men, which was very successful; but in 1842 returned to Cincinnati, and retired from public life. He died May 29, 1866. Dr. Slack was very closely identified for several years with the early educational interests of the West. A short time before his death his alma mater conferred upon him the title of Doctor of Laws. See Wilson, Prefb. Hist. Almanac, 1867, p. 197. (J. L. S.)

Slade, John, a minister of the Methodist Episcopal Church, was born on Beech Branch, Beaufort Dist., S. C., April 7, 1790. He joined the Church when about thirty years of age, and was licensed to preach in 1822. In 1823 he was admitted on trial in the South Carolina Conference, and was received in full connection in 1825. In 1828 he was ordained elder; but his health having been impaired by excessive labors and exposure, he was made supernumerary. In 1830 he was located, and held this relation until 1845, when upon the organization of the Florida Conference he was readmitted into the travelling connection. He continued his ministerial labors until his death, which occurred a few days resulted in death, June 25, 1854. Mr. Slade possessed an intellect of high order, and was endowed with great courage, both physical and moral. He was distinguished for his humility, his self-denial, his devotedness to Christ, and his fidelity to all his Christian obligations. See Sprague, Annals of the Amer. Pulpit, vii, 682.

Slater, Cornelius H., a Baptist missionary, was born in Norwich, Vt., Jan. 31, 1811. He removed with his parents to the town of Lawrence, St. Lawrence Co., N. Y., and remained there until 1831. Soon after his hopeful conversion, he felt it to be his duty to preach the Gospel. Like so many other young men whom God calls to be his servants in the ministry, he was poor, and saw no way by which he could obtain the funds necessary to procure an education. Trusting, however, in him who, he believed, had chosen him to enter upon what proved to be his life-work, he went to Hamilton, and entered the Baptist institution in that place. His frank statement of his feelings and wishes won the confidence of his brethren and friends, and the college, and he was able to earn by his own efforts, he was supplied with an amount of funds sufficient to carry him through his studies. On leaving the institution, he carried with him the sincere esteem of friends who had given him their love and their aid to fit him for the service upon which he purposed to enter. The cause of Christian missions had taken strong hold upon the mind of Mr. Slater. It is related of him that "even before his conversion what he had heard and read on the subject had made a deep impression upon his mind, and while pursuing his studies, on looking over the field, the condition of the heathen heathenmen, the claim which he could not resist." Having decided what was the path of duty, he offered himself as a missionary, and was appointed to the Siam field. He sailed from Boston in December, 1888, and arrived at Bangkok via Singapore Aug. 22, 1839. The hopes which had been raised with reference to Mr. Slater's qualifications for his work were not disappointed. Having acquired the language, he entered upon his missionary labors with characteristic zeal and energy. Having in his mind made a survey of the great field of his missionary operations, he determined in person to see as much of it as it was possible for him to visit. In order that he might carry out his purpose, he fitted up a family boat, in which he and his companion made several excursions upon the River Meamur, and the canals which connect this with the other principal rivers. He
SLAGFIDR 793

SLAVERY

penetrated farther into the interior of the country than any other Protestant missionary has ever done. It was his earnest desire to do a work which no other one had done before him, and it was his delight to distribute tracts and such portions of the Bible as had been translated into Siamese where the good news of salvation through Christ had never before been proclaimed. While there, the message he came to him, and he was removed from the scene of his earthly toils April 17, 1841. It seemed a dark and mysterious Providence which thus early in his career brought to a termination so many cherished plans. But the cause was God's, not man's, and "he doeth all things well." See The Baptist Memorial, i. 82. (J. C. S.)

Slagfir (or Finnir), in Norse mythology, was a prince of Finnish race, who was a great hero or singer, and whom the Valkyria Swanwit chose for her consort. She forsook him after eight years, and he now seeks her incessantly, but in vain.—Völlmer, Wörterb. d. Mythol. n. V.

Slander, according to Dr. Barrow, is uttering false speeches against our neighbor, to the prejudice of his fame, safety, welfare, and that of such others as are of an honorable character, honesty, or good name. The principal kinds of slander are these: (1) charging others with faults they are not guilty of; (2) affixing scandalous names and odious characters which they deserve not; (3) aspersing a man's actions with foul names, importing that he does or says what he does not; (4) falsely declaring that he does not or cannot appear; (5) perverting a man's words or acts disadvantageously by misrepresentation; (6) partial or lame representation of men's discourse or practice, suppressing some part of the truth or concealing some circumstances which ought to be explained; (7) instilling suspicions which create prejudice in the minds of others; (8) imputing to our neighbors' practice, judgment, or profession evil consequences which have no foundation in truth.

Slater (or Slayer), William, a learned English divine and poet, was born in Somersetshire in 1587, entered St. Mary's Hall, Oxford, in 1600, removed to Brasenose College in 1607, took his degree of Bachelor of Arts the following year, and was chosen to a fellowship. In 1611 he entered holy orders, and was beneficed. In 1628 he took his degree in divinity, and had acquired considerable reputation as a poet. He died in Otterden, Kent, where he was beneficed, October (or November) 1647. His works are, Threnodia, see Fundamentum, being elegies in Latin, and epitaphs on eminent persons; and to whom he had been chaplain:—Pala-Albon, or History of Great Britain (Lond. 1621, fol.):—Genethlicicon, see Stemma Regis Jacoba (ibid 1610, fol.):—The Psalms of David, in Four Languages—Greek, Latin, and English (1652, 16mo), in four parts, set to music, etc. See Burney, Hist. of Music; Chalmers, Stoy. Diet. a. v.

Slaughter, Devereaux J. C., a minister of the Methodist Episcopal Church, South, was born in Dinwiddie County, Va., Nov. 8, 1817. He was converted Aug. 16, 1835, joined the Church May, 1836, was licensed to preach Sept. 25, and received on trial into the Virginia Conference in November, 1842. He received deacon's orders in November, 1844, and elder's in November, 1846. He was effective and very useful until 1862, when, because of ill-health, he obtained a supernumerary relation, which he retained until his death, Nov. 6, 1870. See Minutes of Annual Conferences of M. E. Church, South, 1870, p. 408.

Slavery, Briefly. For the discussion of this question we endeavor to bring together all the ancient information together with the best results of modern examination.

I. Terms Employed to Designate this Condition.—The word "slavery" does not occur in the English Bible, and the word "slave" is but rarely used, once (in italics) to supply a noun to the adj. phrase ὁ ἄνθρωπος ᾿ εἶναι ἀνθρώπος; yet ὁ λεγένς ὁ λεγόμενος, "home-born" (Jer. ii, 14, "servant" having been already used in the former clause); once (Rev. xviii, 13) by way of paraphrase for the peculiar use of σώματος, body, i.e. person, for the time in the Apocrypha in the Greek ν. 1, 11; xiv, 18, 41; 1 Macc. iii, 41) for δολοκατος, which is the appropriate classical word. The Heb. and Greek terms designating servitude are, for the male, מחי, אב, δολοκατος; for the female, אסוף, סמע, or מחי, שיחוק, שיחוק, usually rendered "bondman," "servant," etc., which our translators have instinctively felt were more euphonious and appropriate words. Indeed, the regular term for bondman in the Hebrew tongue, מחי (δολοκατος), is used in a far greater variety of applications than our word slave; and collateral circumstances are always needed to determine the nature and extent of the service which it denotes. The term is used to describe individuals viewed as the servants of God, as when David and Daniel, speaking of themselves in prayer to the Most High, say, "Put not away thy servant in anger" (Psa. xxvii, 9): "Now, therefore, O our God, hear the prayer of thy servant" (Dan. i, 17). It is also applied to the relation of men to one another who occupied high positions, as to Eliezer, who had a place in Abraham's household something similar to that of a prime minister at court (Gen. xxv, 2; xxiv, 2), and to Jacob, or Joseph, with reference to his brother Esau (xxviii, 5). See the Bbl. Sac. xxii, 740-748; Genuesius, Theaur. p. 978, 979.

It thus appears that the term slavery, though frequently applied to the Jewish system of servitude, is not wholly appropriate. Among the Greeks and Romans it properly expressed the legal condition of captives taken in war, or the victims of the existing slave-trade and the offspring of female slaves. Those slaves were held to be the absolute property of their masters, and their slavery was regarded as perpetual and hereditary. Nor does Jewish servitude bear any resemblance to modern slavery, which, however, it may differ from the Greek and Roman in some of its minor incidents, resembles it in its essential principles. If under the Roman law slaves were held "pro nullis, pro mortuis, pro quadrupeditibus," so, until lately, under the laws of several of the United States, they were adjudged to be chattels personal, the property of the owners, to all intents, constructions, and purposes whatsoever; and their slavery, like that of the ancient Romans, was, as a necessary consequence, perpetual and hereditary.

In the heat of modern controversy, indeed, some writers have been led to deny that the Hebrew and Greek words noticed above necessarily, or in point of fact ever do, designate a condition of absolute bondage; but whatever may be said of מחי, it is certain that דוקא, both from its etymological signification (from דא, to bind), and its classical usage, is the prevalent and appropriate word for slave in the current acceptance of the term. See Service.

II. Forms of Scriptural Slavery.—It is difficult to trace the origin of slavery. It may have existed before the Deluge, when violence filled the earth, and drew upon its vengeance the God of Heaven. But the first direct reference to slavery, or rather slave-trading, in the Bible is found in the history of Joseph, who was sold by his brethren to the Ishmaelites (Gen. xxxvii, 27, 28). In Ezek. xxxix, 12, 13 we find a reference to the slave-trade carried on with Tyre by Javan, Tubal, and Meshech. In the Apocalypse we find enumerated in the merchandise of pagans amongst the nations (tò τῆς ᾿ ζαρῆς) and the souls of men (Rev. xviii, 13). The sacred historians refer to various kinds of bondage:

1. Patriarchal Servitude.—The exact nature of this service cannot be defined: there can be no doubt, however, that it was regulated by principles of justice, equity, and kindness. The servants of the patriarchs were
SLAVERY

of two kinds, those "born in the house" and those "bought with money" (Gen. xxvi. 13). Abraham appears to have had a large number of servants. At one time he armed three hundred and eighteen young men, "born in his own house," with whom he pursued the kings who had taken "Lot and his goods, and the women also, and the people," and rescaptured them (xiv, 1-16). At another time he had a large number of servants, entitled to greater privileges than the others. Eliezer of Damascus, a home-born servant, was Abraham's steward, and, in default of issue, would have been his heir (xxv, 2-4). This class of servants was honored with the most intimate confidence of the masters, and was employed in the most important offices. An instance of this kind will be found in Gen. xxvii, 1-9, where the eldest or chief-servant of Abraham's house, who ruled over all that he had, was sent to Mesopotamia to select a wife for Isaac, though then forty years of age. The authority of Abraham was that of a prince or chief over his patriarchate or family, and was regulated by usage and the general consent of his dependents. It could not have been otherwise in his circumstances; nor, from the knowledge which the Scriptures give of his character, would he have taken advantage of any circumstances to oppress or degrade them: "For I know him," said his servant; "he will not deal dishonestly with his master's children and will keep his household after him, and they shall keep the way of the Lord, to do justice and judgment, that the Lord may bring upon Abraham that which he hath spoken of him" (xviii, 19). The servants of Abraham were admitted to the same religious privileges with their master, and received the seal of the covenant (xxv, 8, 14, 24, 27).

There is a clear distinction made between the "servants" of Abraham and the things which constituted his property or wealth. Abraham was very rich in cattle, in silver, and in gold (Gen. xiii, 2, 5). But when the patriarch's power or greatness is spoken of, then servants are spoken of as among the most important of the objects which constituted his wealth (xviii, 24, 30). It is said of Isaac and Jacob, "A man waxed great, and went forward, and grew until he became very great, for he had possession of flocks, and possession of herds, and great store of servants" (xxvi, 18, 14, 16, 26, 28, 29). When Hamor and Shechem speak to the Hivites of the riches of Jacob and his sons, they say, "Shall not their cattle and their substance and every beast of theirs be ours?" (xxxiv, 23). Jacob's wives say to him, "All the riches which God hath taken from our father, that is ours and our children's." Then follows an inventory of property: "all his cattle," "all his goods," "the cattle of his gotten." His numerous servants and his wealth are mentioned together with his property (xvi, 43, and also ver. 16, 18). When Jacob sent messengers to Esau, wishing to impress him with an idea of his state and sway, he bade them tell him not only of his riches, but of his greatness, and that he had oxen and asses and flocks, and men-servants and maid-servants (xxxii, 4, 5). Yet in the present which he sent there were no servants, though he manifestly selected the most valuable kinds of property (ver. 14, 15; see also xxxiv, 23; xxxvi, 6, 7). In no single instance do we find that the patriarchs either gave away or sold their servants, or purchased them of third persons. Abraham had servants "bought with money." It has been assumed that they were bought of third parties, whereas there is no proof that this was the case. The probability is that they sold themselves to the patriarch for an equivalent; that is to say, they entered into voluntary engagements to serve him for a longer or shorter period of time, in return for the consideration which is referred to as that whatever costs money is money or property. The children of Israel were required to purchase their first-born (Numb. xviii, 15, 16; iii, 45, 51; Exod. xiii, 13; xxxiv, 20). They were, moreover, required to pay money for their own souls; and when they set themselves free (Deut. xv, 15, 16), the price of release was fixed by statute (Lev. xxvii, 2-8). Boaz bought Ruth (Ruth iv, 10). Hosome bought his wife (Hos. iii, 2). Jacob bought his wives Rachel and Leah, and not having money, paid them for labor, seven years apiece (Gen. xxix, 16-23). That the purchase of wives, either with money or by service, was the general practice is plain from such passages as Exod. xxii, 17 and 1 Sam. xviii, 25. But the idea of property does not appear in any of these passages, nor in the later books, that the price of the purchase was paid to himself. For a further clue to Scripture usage, the reader is referred to 1 Kings xxi, 20, 25; 2 Kings xvii, 17; Isa. iv, 1; li, 3; see also Jer. xxxiv, 14; Rom. vi, 16; vii, 14; John viii, 34. Probably Job had more servants than either of the patriarchs to whom reference has been made (Job i, 2, 3). In light he regarded, and how he treated, his servants, may be gathered from Job xxxi, 13-23. That Abraham acted in the same spirit we have the divine testimony in Jer. xxii, 15, 16, 17, where his conduct is placed in direct contrast with that of some of his descendants, who used their many servants and their numerous possessions without wages, and gave him not for his work (ver. 13).

2. Egyptian Bondage.—The Israelites were frequently reminded, after their exode from Egypt, of the oppressions they endured in that "house of bondage," from which they had been delivered by the direct interposition of God. The design of these admonitions was to teach them justice and kindness towards their servants when they should have become settled in Canaan (Deut. v, 15; viii, 14; x, 19; xv, 15; xxiii, 7, etc.), as well as to impress them with gratitude towards their great deliverer. The Egyptians had domestic servants, who may have been slaves (Exod. ix, 14, 21; Deut. x, 19). But the Israelites living in the faires of Egypt; they formed a special community (Gen. xxxiv, 34; Exod. ii, 9; iv, 29; vi, 14: viii, 22, 24; ix, 26; x, 28; xi, 7; xvi, 22; xvii, 5). They had exclusive possession of the land of Goshen, "the best part of the land of Egypt." They lived in permanent dwellings, their own houses, and not in tents (xii, 22). Each family seems to have had its own house (ver. 4; comp. Acts vii, 20); and, judging from the regulations about eating the Passover, the houses could scarcely have been small ones (Exod. xii, etc.). The Israelites appear to have been well clothed (ver. 11). They owned flocks and herds, and very probably, slaves (xxix, 22, 27). They lived under their own form of government, and although occupying a province of Egypt and tributary to it, they preserved their tribes and family divisions, and their internal organization throughout (ii, 1; iii, 16, 18; v, 19; vi, 14, 25; xii, 19, 21). They had to a considerable degree the disposal of their own time (i, 9; iii, 16; 27; 29, 31; xii, 6). They were not acquainted with the fine arts (xxiii, 4; xxxiv, 22, 35). They were all armed (xxiii, 27). The women seem to have known something of domestic refinement. They were familiar with instruments of music, and skilled in the working of fine fabrics (xx, 20; xxxiv, 25, 29); and both males and females were able to read and write (Deut. xi, 18, 20; xvii, 19; xxvii, 3); their food was abundant and of great variety (Exod. xvi, 3; Numb. xii, 4, 5; xx, 5). The service required from the Israelites by their taskmasters seems to have been exacted from males only, sometimes by the use of the rod (xii, 1). The women complained of being compelled to labor at any one time. As tributaries, they probably supplied levies of men, from which the wealthy appear to have been exempted (Exod. iii, 16; iv, 29; v, 20). The poor were the oppressed, "and all the service wherewith they made them serve was with rigour" (I, 13). Their complaining to Moses, "behold, we cry and hear their groanings," and delivered them after having inflicted the most terrible plagues on their oppressors.
SLAVERY

3. Jewish Slavery. — The institution of slavery was recognized, though not established, by the Mosaic law as a permitted punishment for theft; i. e. for taking another man's goods, theft was punishable by slavery, to the end that every man might have his rights respected. Repugnant as the notion of slavery is to our minds, it is difficult to see how it can be dispensed with in certain phases of society without, at all events, entailing severe evils than those which it produces. Exclusiveness of race is an instinct that gains strength in proportion as social order is weak, and the rights of citizenship are regarded with peculiar jealousy in communities which are exposed to contact with aliens. In the case of war carried on for conquest or revenge, there were but two modes of dealing with the captives, viz. putting them to death or reducing them to a state of servitude. The latter may be said in regard to such acts and outrages to be a discreditable feature of the society of his fellow-citizens. Again, as citizenship involved the condition of freedom and independence, it was almost necessary to offer the alternative of disfranchisement to all who through poverty or any other contingency were unable to support themselves in independence. In all these cases slavery was the mildest of the alternatives that offered, and may hence be regarded as a blessing rather than a curse. It should further be noticed that a laboring class, in our sense of the term, was almost unknown to the nations of antiquity. Hired service was regarded as incompatible with freedom, and the legal establishment of servitude in the same social position as the servant or laborer of modern times, though differing from him in regard to political status. The Hebrew designation of the slave shows that service was the salient feature of his condition; for the term ἱδρυς, usually applied to him, is derived from a verb signifying "to work," and the very same term is used in reference to offices of high trust held by free men. In short, service and slavery would have been to the ear of the Hebrew equivalent terms, though he fully recognized grades of servitude, according as the servant was a Hebrew or a non-Hebrew, and, if the latter, according as he was bought with money (Gen. xvi, 12; Exod. xxi, 44) or born in the house (Gen. xiv, 14; xv, 3; xvii, 25). We proceed to describe the condition of these classes, as regards their original reduction to slavery, the methods by which it might be terminated, and their treatment while in that state.

(1) Hebrew Slaves. — (1.) The circumstances under which a Hebrew might be reduced to servitude were — (a) poverty; (b) the commission of theft; and (c) the exercise of paternal authority. In the first case, a man who had mortgaged his property, and was unable to support his family, might sell himself to another Hebrew, the cost of the purchase being equal to the amount of the debt, with a chance surplus sufficient to redeem his property (Lev. xxv, 23, 39). It has been debated whether, under this law, a creditor could seize his debtor and sell him as a slave. The words do not warrant such an inference, for the poor man is said in Lev. xxv, 39 to sell himself (not as in the A. V., "be sold," see Genesis, Thesaur. p. 787); in other words, to enter into voluntary servitude, and this under the pressure, not of debt, but of poverty. The instances of selling the children of debtors in 2 Kings iv, 1 and Neh. v, 5 were not warranted by law, and must be regarded as the outrages of lawless times, while the case depicted in the parable of the unmerciful servant is probably borrowed from Roman usages (Matt. xviii, 25). The words in Isa. 1, 1, "Which of my creditors is it to whom I have sold you?" have a prima facie bearing upon the question, but in reality apply to one already in the condition of slavery. The commission of theft rendered a person liable to servitude, whenever restitution could not be made on the scale prescribed by the law (Exod. xxii, 1, 3). The theft was bound to work out the value of his restitution-money in the service of him on whom the theft had been committed (for, according to Josephus, Ant. xvi, 1, 1, there was no power of selling the person of a thief to a foreigner); when this had been effected he would be free, as implied in the expression "sold for his theft," i. e. for stealing, which contrasts favorably with that of the Romans, under which a thief became the actual property of his master. The exercise of paternal authority was limited to the sale of a daughter of tender age to be a maid-servant, with the ulterior view of her becoming a concubine of the purchaser (Exod. xxii, 2). Such a case can perhaps hardly be regarded as implying servitude in the ordinary sense of the term.

(2.) The servitude of a Hebrew might be terminated in three ways: (a) by the satisfaction or the remission of all claims against him; (b) by the recurrence of the year of Jubilee (Lev. xxv, 40); or (c) might be at any period of his servitude, and (d) failing either of these, the expiration of six years from the time that his servitude commenced (Exod. xxii, 2; Deut. xv, 12). There can be no doubt that this last regulation applied equally to the cases of poverty and theft, though Rabbinical writers have endeavored to restrict it to the former. The period of seven years has reference to the sabbatical principle in general, but not to the sabbatical year, for no regulation is laid down in reference to the manumission of servants in that year (Lev. xxv, 1 sq.; Deut. xv, 1 sq.). We have a single instance, indeed, of the sabbatical year being celebrated by a general emancipation of Hebrew slaves; this was in consequence of the neglect of the law relating to such cases (Jer. xxxiv, 14). To the above modes of obtaining liberty the Rabbinists added, as a fourth, the death of a master without leaving a son, there being no power of claiming the slave on the part of any heir except a son (Maimonides, Aboth. 2, § 12).

If a servant did not desire to avail himself of the opportunity of leaving his service, he was to signify his intention in a formal manner before the judges (or, more exactly, at the place of judgment), and then the master was to take him to the door-post, and to bore his ear through with an awl (Exod. xxii, 6), driving the awl into or unto the door, as stated in Deut. xv, 17, and thus fixing the servant to it. Whether the door was that of the master's house, or the door of the sanctuary, as Ewald (Alterth. p. 245) infers from the expression et ḫd-clohim, to which attention is drawn above, is not stated; but the significance of the action is enhanced by the form of the word for thus as a conventional sign between the servant and the house in which he was to serve. The boring of the ear was probably a token of subjection, the ear being the organ through which commands were received (Psa. xi, 6). A similar custom prevailed among the Mesopotamians (Juvener, i, 104). The Lydians and the Xerxids of Persia had the custom in the ancient nations. A servant who had submitted to this operation remained, according to the words of the law, a servant "forever" (Exod. xxii, 6). These words are, however, interpreted by Josephus (Ant. iv, 8, 28) and by the Rabbinists as meaning until the year of Jubilee, partly from the universality of the freedom that was then proclaimed, and partly perhaps because it was necessary for the servant then to resume the cultivation of his recovered inheritance. The latter point no doubt presents a difficulty, but the interpretation of the word "forever" in any other than its obvious sense presents still greater difficulties.

(3.) The condition of a Hebrew servant was by no means intolerable. His master was admonished to treat him, not "as a bond-servant, but as a hired servant and as a sojourner;" and again, "not to rule over him with rigor" (Lev. xxv, 39, 40, 43). The Rabbinists specified a variety of duties as coming under these general precepts: for instance, compensation for personal injury, exemption from menial duties, such as unbinding the master's sandals or carrying him in a litter; the use of gentle language on the part of the master; and the maintenance of the servant's wife and children, though the master was not allowed to exact work from them
SLAVERY

(Mielziner, *Sklaven bei den Hebr.,* p. 31). At the termination of his servitude the master was enjoined not to "let him go away empty," but to remunerate him liberally out of his flock, his floor, and his wine-press (Deut. xvi, 13, 14). Such a custom would stimulate the servant to faithful service, inasmuch as the amount of the profit was contingent upon the master's discretion; and it would also provide him with means whereby to stand in the world afresh.

In the event of a Hebrew becoming the servant of a "stranger," meaning a non-Hebrew, the servitude could be terminated only in two ways, viz. by the arrival of the year of jubilees, or by the payment of the purchase-money paid for the servant, after deducting the sum for the value of his services proportioned to the length of his servitude (Lev. xxv, 47-55). The servant might be redeemed either by himself or by one of his relations, and the object of this regulation appears to have been to impose upon relations the obligation of effecting the redemption, and thus putting an end to a state which must have been peculiarly galling to the Hebrew.

A Hebrew woman might enter into voluntary servitude on the score of poverty, and in this case she was entitled to her freedom after six years' service, together with the clothing of the house in which she lived, just as in the case of a man (Deut. xv, 12, 13). According to Rabbinical tradition, a woman could not be condemned to servitude for theft; neither could she bind herself to perpetual servitude by having her ear bored (Mielziner, p. 43).

Thus far we have seen little that is objectionable in the condition of Hebrew servants. In respect to marriage, there were some peculiarities which, to our ideas, would be regarded as hardships. A master might, for instance, give a wife to a Hebrew servant for the time of his servitude, the wife being in this case, it must be remarked, not only a slave, but a non-Hebrew. Should he afterwards repudiate her, or make her a slave, she would remain the absolute property of the master (Exod. xxi, 4, 5). The reason for this regulation is, evidently, that the children of a female heathen slave were slaves; they inherited the mother's disqualifications. Such a condition of marrying a slave would be regarded as an axiom by a Hebrew, and the case is only incidentally noticed. Again, a father might sell his young daughter to a Hebrew, with a view either of the latter's marrying her himself or of his giving her to his son (ver. 7-9). It diminishes the apparent harshness of this proceeding if we look on the purchase-money as in the light of dowry given, as was not the case with the parents of the bride; still more, if we accept the Rabbinical view (which, however, we consider very doubtful) that the consent of the maid was required before the marriage could take place. But even if this consent were not obtained, the paternal authority would not appear to be violently strained; for among ancient nations that authority was generally held to extend even to the life of a child, much more to the giving of a daughter in marriage. The female slave was in this case termed נפש, as distinct from נפש, applied to the ordinary household slave. The distinction is marked in regard to Hagar, who is described by the latter term before the birth of Ishmael, and by the former after that event (comp. Gen. xvi, 1; xxi, 10). The relative value of the terms is expressed in Abigal's address, "Let thine handmaid (אמא) be a servant (שיפקה) to wash," etc. (1 Sam. xxxv, 41). The position of a maiden thus sold by her father was subject to the following regulations: [1] She could not "go out as the men-servants do;" i.e. she could not leave at the termination of six years, or in the year of jubilees, if (as the regulation assumes) her master was willing to fulfil the object for which she was given to her. [2] If not wished to marry her, he should call upon her friends to procure her release by the repayment of the purchase-money (perhaps, as in other cases, with a deduction for the value of her services). [3] If he betrothed her to his son, he was bound to make such provision for her as he would for one of his own daughters. [4] If either he or his son, having married her, took a second wife, it should not be to the prejudice of the first. [5] If neither of the three above-specified alternatives took place, the master was entitled to immediate and gratuitous liberty (Exod. xxi, 7-11).

The custom of reducing Hebrews to servitude appears to have fallen into disuse subsequently to the Babylonian captivity. The attempt to enforce it in Nehemiah's time met with decided resistance ( Neh. v, 4), and Nehemiah's enactment that foreign workers imported from foreigners roused the greatest animosity (Josephus, Ant. xvi, 1, 1). Vast numbers of Hebrews were reduced to slavery as war-captives at different periods by the Philistines (Joel iii, 16), the Philistines (ibid.; Amos i, 6), the Syrians (1 Macc. iii, 41; 2 Macc. vii, 11), the Egyptians (Josephus, Ant. xii, 2, 3); and above all, by the Romans (War, vi, 9, 3). We may form some idea of the numbers reduced to slavery by war from the single fact that Nicanor calculated on realizing 2000 talents in one campaign by the sale of captives at the rate of ninety for a talent (2 Macc. vii, 10, 11), the number required to fetch the sum being 180,000. The Philistines were the most constant importers of Hebrews, purchasing the Hebrews (Amos i, 9), of the Syrians (2 Macc. viii, 21), and even of the tribes on the shores of the Euxine Sea (Ezek. xxxvii, 18), and selling them wherever they could find a market about the shores of the Mediterranean, and particularly in Joel's time to the people of Javan (Joel iii, 6), it being uncertain whether that name represents a people in South Arabia or the Greeks of Asia Minor and the peninsula. It was probably through the Tyrians that Jews were transported in Obadiah's time to Sepharad, or Sarlos (Obad. 20). At Rome vast numbers of Jews emerged from the body of the state of Philistia, and even numbers which the slaves were offered by Nicanor were considerably below the ordinary value either in Palestine or Greece. In the former country it stood at thirty shekels (=about $18), as stated below; in the latter at about one and a quarter mina (=about $20), this being the mean between the extreme rates stated by Xenophon (Mem. ii, 5, 2) as the ordinary price at Athens. The price at which Nicanor offered them was only about $121 a head. Occasionally slaves were sold as high as a talent (about $1058) each (Xenophon, loc. cit.; Josephus, Ant. xii, 4, 9).

(II.) Slaves.—(1.) The majority of non-Hebrew slaves were war-captives, either the Canaanites who had survived the general extermination of their race under Joshua, or such as were conquered from the surrounding nations (Num. xxxi, 26 sq.). Besides these, many were obtained by purchase from foreign slave-dealers (Lev. xxv, 44, 45); and others may have been resident foreigners who were reduced to this state either by poverty or crime. The Rabbinists further deemed that any person who performed the services of a slave became ipso facto a slave (Mishna, Kedush. ii, 3). The children of slaves remained slaves, being the class designated as נפש in the house (Gen. xiv, 12; xvii, 12; Eccles. ii, 7), and hence the number was likely to increase as time went on. The only statement as to their number applies to the post-Babylonian period, when they amounted to 7387, or about one to six of the free population (Ezra ii, 65). We have reason to believe that the number diminished subsequently to this period, the Pharisees in particular being opposed to the system. The average value of a slave appears to have been thirty shekels (Exod. xxii, 32), varying, of course, according to age, sex, and capabilities. The estimation of persons given in Lev. xxvii, 2-8 probably applies to war-captives that had been dedicated to the Lord, and the price of their redemption would in that case represent the ordinary value of such slaves.

(2.) That the slave might be manumitted appears
SLAVERY

from Exod. xxi, 26, 27; Lev. xix, 20. As to the methods by which this might be effected, we are told nothing in the Bible; but the Rabbinitic specify the following methods: [1] redemption by money payment, [2] a bill or ticket of freedom; [3] testamentary disposition; or [4] any act that implied manumissio, such as making a slave one's heir (Mielziner, p. 65, 66).

(3.) The slave is described as the "possession" of his master, apparently with a special reference to the power which the latter had of disposing of him to his heirs as he would any other article of personal property (Lev. xxxv, 45, 46); the slave is also described as his master's "money" (Exod. xxi, 21), i.e. as representing a certain money value. Such expressions show that he was regarded very much in the light of a municipium, or chattel, for he was under the protection of his person: willful murder of a slave entailed the same punishment as in the case of a free man (Lev. xxiv, 17, 22). So, again, if a master inflicted so severe a punishment as to cause the death of his servant, he was liable to a penalty, the amount of which probably depended on the circumstances of the case; for, the Rabbinitic view that the words "...he shall be surely punished," or, more correctly, "it is to be avenged," imply a sentence of death, is wholly untenable (Exod. xxi, 29). No punishment at all was imposed if the slave survived the punishment for a day or two (ver. 21), the loss of the slave being regarded as a sufficient punishment for his master. The four false standards of manumission pointed to by the Rabbinitic, but not by the Talmudists, were the attachment of his adherents, and often inherit a large share of his wealth. It is sometimes the practice of childless persons to adopt a favorite slave of this class as their own child and heir, or sometimes they purchase promising boys when young; and, after having brought them up in their own household, they adopt them as their sons.

4. Gibonitische Sertitude. — The condition of the inhabitants of Gibeon, Chephirah, Beeroth, and Kirjath-jearim, under the Hebrew commonwealth, was not that of slavery; it was voluntary (Josh. ix, 8–11). They were not employed in the families of the Israelites, but resided in their own cities, tended their own flocks and herds, and exercised the functions of a community with the independency and independence, (x, 6–8). The injuries inflicted on them by Saul were avenged by the Almighty on his descendants (2 Sam. xi, 1–9). They appear to have been devoted exclusively to the service of the "house of God," or the Tabernacle; and only a few of them were actively employed at any one time. The rest dwelt in their cities, one of which was a great city, as one of the royal cities. The service they rendered may be regarded as a natural tribute for the privilege of protection. Now service seems to have been required of their wives and daughters.

On the return from the Babylonian captivity they dwelt at Ophele (Neh. iii, 26; see also 1 Chron. ix, 2; Ezra ii, 43, Neh. vii, 24; viii, 17; x, 28; xi, 21). See NETHINIM.

5. Roman Slavery. — Our limits will not allow us to enter into detail on the only kind of slavery referred to in the New Testament, for there is no indication that the Jews possessed any slaves in the time of Christ. Suffice it, therefore, to say that, in addition to the fact that Roman slavery was perpetual and hereditary, the slave had no protection whatever against the avarice, rage, or lust of his master. The bondman was viewed less as a human being, subject to arbitrary dominion, than as an inferior animal, dependent wholly on the will of his owner. The Roman slave possessed no personal rights, no property in life or death over his slave—a power which continued, at least, to the time of the emperor Hadrian. He might, and frequently did, kill, mutilate, and torture his slaves, for any or for no offence, so that slaves were sometimes crucified from mere caprice. He might force them to become prostitutes or gladiators; and, instead of the perpetual obligation of the marriage-tie, their temporary unions (contubernia) were formed and dissolved at his command, families and friends were separated, and no obligation existed to provide for their wants in sickness or health. But, notwithstanding all the barbarous cruelties of Roman slavery, it had one decided advantage over that which was introduced in modern times into European colonies—both law and custom being decidedly favorable to the freedom of the slave (Blair, Inquiry into the State of Slavery among the Romans [1833]).

The Mohammedan law, also, in this respect, contrasts favorably with those of the Byzantine and Justinianian settlement.

Although the condition of the Roman slave was no doubt improved under the emperors, the early effects of Christian principles were manifest in mitigating the horrors, and bringing about the gradual abolition, of slavery. Oneimos, according to the concurrent testimony of antiquity, was liberated by Philemon (ver. 21); and in adulation to the Christian master. The Slavery (ut infra, p. 60), see the preface of Euthalius to this epistle. The servile condition formed no obstacle to attaining the highest dignities of the Christian priesthood. Our space will not allow us to pursue this sub-
jeh. It was," says M. Guizot, "by putting an end to the cruel institution of slavery that Christianity extended life, and thus led to the abolition of the practice of slavery and the barbarous art, softened by its humane spirit, ceased to be so destructive" (Milman's Gibbon, i, 61). "It is not," says Robertson, "the authority of any single detached precept in the Gospel, but the spirit and genius of the Christian religion, more powerful than any particular command, which has abolished the practice of slavery throughout the world." Although, even in the most corrupt times of the Church, the operation of Christian principles tended to this benevolent object, they unfortunately did not prevent the revival of slavery in the European settlements in the 16th and 17th centuries, together with the slave trade offensive to modern conscience, which has rendered the name of Wilberforce forever illustrious. Modern servitude had all the characteristic evils of the Roman, except, perhaps, the uncontrolled power of life and death, while it was destitute of that redeeming quality to which we have referred, its tendency being to perpetuate the condition of slavery. It has also been supposed to have introduced the unfortunate prejudice of color, which was unknown to the ancients (Linstant, Essai [1841]). It was the benevolent wish of the philosophical Herder (History of Man [1788]) that the time might come when we shall look back with as much compassion on our human traffic in negroes as on the ancient Roman slavery or Spartan holts." This is now legally, if not actually, the case in all civilized countries. See SLAVERY, MODERN.

III. Ethical Considerations.—These have been incidentally touched upon in the foregoing discussion; but the importance in connection with the occurrence of slavery in the Bible requires a fuller notice, especially as it has been boldly claimed that the above facts justify the detention of human beings in menial servitude.

1. The circumstances of patriarchal slavery were so very different from those of modern times that no argument in this regard can fairly be a comparison of the two. It is obvious, for example, that if Abraham's "servants" had chosen to run away, there was no power by which they could have been compelled to return. But even if there had been, and if their state could be proved to be ever so severe, there is no evidence that this condition of society had the approval, much less the authority, of God, either in its institution or its continuance. There were many social usages in those days which were only tolerated for a time, until a better economy should supravene.

2. This last consideration likewise applies, in part, to the whole system of Jewish slavery. But we are not led to investigate anything of the sort now in question. The moral law is a revelation of great principles. It requires supreme love to God and universal love among men; and whatever is incompatible with the exercise of that love is strictly forbidden and condemned. Hence, immediately after the giving of the law at Sinai, as if to guard against all slavery and slave-trading on the part of the Israelites, God promulgated this ordinance: "He that stealeth a man and setteth him, or if he be found in his hands, he shall surely be put to death" (Exod. xxii, 16; Deut. xxi, 7). The crime is stated in its threefold form—man-stealing, selling, and holding—the penalty for either of which was death. The law punished the stealing of mere property by enforcing restitution; in some cases twofold, in others fivefold (Exod. xxxi, 14). When property was stolen the legal penalty was compensation to the person injured; but when a man was stolen no property compensation was made to the owner; and the guilty offender paid the forfeit of his life for his transgression, God thereby declaring the infinite dignity and worth of man and the inviolability of his person. The reason of this may be found in the great fact that God created man in his own image (Gen. i, 26-28)—a high distinction, more than once repeated with great solemnity (v. 1; ix, 6). So was the operation of this law, and the obedience paid to it, that we have not the remotest idea how the sale and purchase of slaves ever occurred among the Israelites. The cities of Judaea were not, like the cities of Greece and Rome, slave-markets, nor were there found throughout all its coasts either helots or slaves.

3. It has been made a question whether servitude, even of the modified kind described in the Old Test., existed in Palestine in the days of our Lord. There is some reason to believe that after the return from Babylon the system gradually lost ground and disappeared. Certainly there is nothing in the Gospel history to indicate the existence of what could with any propriety be called slavery. It admits of no doubt, however, that it was prevalent in Italy and Greece and Asia Minor; and it has been argued that since the apostles did not everywhere openly denounce it, therefore it cannot be viewed as inconsistent with the principles of the Gospel. But there is a wide, unbridged interval between the premises and the conclusion. The fundamental precepts of Christianity are quite opposed to the idea of the subjugation of one man to the arbitrary will of another. The mutual love which it enjoins, the brotherhood of believers which it establishes, the golden rule of doing to others as we would have them do to us, the self-sacrificing model of self-denial and self-suffering in our Saviour himself, are all utterly repugnant to the practice of stealing men, buying and selling them, and holding them to enforced labor; and accordingly it has ever been found that just in proportion to the footing which the Gospel has obtained in any country the system of slavery has declined and in the end died out. This universal system has its root in the evil passions of depraved human nature, and in certain states of society it flourishes, but the moral and spiritual renovation effected by the merciful religion of Jesus gradually brings a withering blight upon it which ultimately quite destroys it.

Why, then, it may be asked, did not the apostles place themselves in more direct and obvious opposition to it while visiting the cities and countries of heathen nations? Why did they not everywhere denounce it and command the whole world to relinquish it? Now such questions betray a total ignorance of the whole circumstances of the case, and how so were the apostles in the estimation of mankind in that age? They were men of no worldly influence, few, and poor, and despised, strangers wherever they appeared; and the effect of their entering into a hand-to-hand fight with any of the institutions of society would have been to throw everything into confusion and to obstruct in the way of the progress of the Gospel. This course, moreover, would have manifested the folly of expecting to reap before the seed was sown. First of all, it was indispensable that men's moral notions should be rectified; that the principles of love and universal brotherhood should be insculpted upon them; that they should discover in the one sacrifice of Christ for rich and poor, for bond and free, for men of all colors and climes, that God looked upon them all with equal favor; and not until these ideas were embraced by multitudes, and, in fact, permeated the great mass of society, was it possible that a system so rooted as slavery could be plucked up or even much changed.

The laws which the great Deliverer and Redeemer of mankind gave for the government of his kingdom were those of universal justice and benevolence, and as such were subversive of every system of tyranny and slavery that had ever been in operation. The apostles did assert, that Jesus or his apostles gave their sanction to the existing systems of slavery among the Greeks and Romans is to disparage them. That the reciprocal duties of masters and servants (σωματα) were inculcated admits, indeed, of no doubt (Col. iii, 22; iv, 1; Tit. ii, 9; 1 Pet. ii, 19; Ephes. vi, 5-9). But the performance of these duties on the part of the masters, supposing
SLAVERY

them to have been slave-masters, would have been tantamount to the utter subversion of the relation. There can be no doubt either that "servants under the yoke," or the slaves of heathens, are exhorted to yield obedience to their masters (1 Tim. vi. 1). But this argues no approval of the relation; for (1) Jesus, in an analogous case, appeals to the paramount law of nature as superseding such temporary regulations as the hardness of our times requires (see Wright [Rev. W.], Slavery at the Cape of Good Hope [1831], p. 68); and (2) Paul, while counselling the duties of contentment and submission under inevitable bondage, inculcates at the same time on the slave the duty of adopting all legitimate means of obtaining his freedom sooner or later, and after his deliverance "to remember them that have used them well," and to be "obliged" (Heb. 13:1). The strict construction of this passage has been denied by Chrysostom, Photius, Theodoret, and Theophylact, who maintain that it is the state of slavery which Paul here recommends the slave to prefer. But although this interpretation is indeed rendered admissible by the context, yet the more received meaning, or that which counsels freedom, is both more easily connected with the preceding phrase, "if thou mayest make free, use it rather," and is, as Neander observes, "more in accordance with the liberal views of the free-minded Paul" (Birüoth, Commentary on Corinthians, in Bib. Comm.). But Paul's words imply that Onesimus returned with his own free consent, because persuaded that he would now be more happy with Philemon than anywhere else. What countenance is there here for a fugitive-slave law to enforce the restoration of runaways? Can we imagine that Paul would have spontaneously acted upon the principle of which he here protested, to the exclusion of his own free discretion to the religion he had been reared in, which expressly forbade that any servant who had fled from his master should be sent back to him? This would have been not only to ignore the benign spirit of the Gospel, but even to fall below the lower platform of the pre-patriarchal condition. This would have been to follow the advice of the foolish counselors of Rehoboam, and to exchange the whip of Solomon's gentle reign for the scorpion of intolerable oppression. The return of Onesimus to Philemon was the return of one friend to another with the congratulations of a common friend who was unspeakably dear to both. Slavery finds no support at all in the law of God, and the attempt to deduce its principles from Scripture does the utmost dishonor to the benign and merciful spirit of the Gospel.

IV. Literature.—A calm and complete view of Hebrew servitude is given in the above-mentioned treatise of Mielziner, Der Verhältnisse der Sklaven bei den alten Hebräern, nach biblischen und talmudischen Quellen dargestellt (Copenhagen, and Leips, 1859), which was translated by Prof. Schmidt in the (Gettysburg) Evangelical Review, Jan. 1862, p. 311-355. Older treatises are those of Abicht, De Servis Hebr. (Lips. 1704); Mieg, Constitutiones Servi Heb. ex Script. et Rabbin. (Herb. 1768). See also Baron, Schriften der Vierter Stadt (Phals. 1846); Raphall, Bible View of Slavery (N. Y. 1861); Journ. Sac. Lit. Oct. 1855; Jan. 1860; New-Englander, May 1860; Amer. Theol. Rev. April, 1861; Amer. Prob, Ren. July, 1861; Bibliotheca Sacra, Jan. and July, 1862; Bow, Hamilton Lectures for 1878, p. 147. Comp. the numerous earlier controversial articles cited by Voce, in dez, a V. See also the two articles immediately following.

SLAVERY, MODERN. Ancient slavery, especially among the Romans and Greeks, became a system of extreme cruelty. Christianity, though it did not do away with slavery, tended to ameliorate the condition of the slave. See SLAVERY, RELATION OF, TO CHRISTIANITY.

1. In Ancient Egypt. The Jews had measures to prevent the eventual extinction of slavery, and the consequent mass of excommunicated slave-owners who put their slaves to death without warrant from the judge. But the number of slaves again increased, multitudes being brought by the barbarian invaders, and in the countries which had been provinces of the empire slavery continued long after the fall of the empire. At the time of the crusades the negro and the slave, who had been largely employed in the war of reconquest, emerged into the mitigated condition known as serfdom, which prevailed all over Europe in the Middle Ages. The contact between Christianity and Mohammedanism during the Crusades gave a new impetus to slavery, neither party having scruples about the enslaving of those belonging to the other; and from the 10th to the 14th century there grew up a considerable slave-trade, of which Rome was the centre. The great commercial republics of Italy engaged largely in slave-trading, the Venetians even selling Christians to Moslems. Slavery also existed in Florence, the slaves being mostly negroes, to which class negro slaves, who had been taken as prisoners of war. Under the Saxons, the slave-trade flourished in England, Bristol being the chief market, whence many slaves were exported to Ireland. But in England slavery was never very popular, and the Irish early emancipated their bondmen. Slavery still exists in most Mohammedan countries, but in a very mild form. It being a political rather than a social institution, it is possible for the slave not only to obtain liberty, but also to secure the highest social position. For a long time the Algerine corsairs took large numbers of captives from among the Christian nations around the Mediterranean, and sailed as far north as Ireland, seizing people whom they reduced to slavery. The European powers made frequent wars on the Barbary states, and the United States also resorted to force to secure the liberty and commerce of its citizens. The successful bombardment of Algiers in 1816 by an English fleet commanded by Lord Exmouth put an end to white slavetrade in Barbary countries.

2. Negro Slavery.—The slave-trade in negroes existed three thousand years ago, at least, and the Carthaginians brought numbers of black slaves from Central and Southern Africa. The Venetians, no doubt, distributed some negro slaves over the various European nations which they had conquered. But negro slavery did not exist in Mohammedan countries since the time of the prophet, but they have often risen very high, both in the state and in the household. The negro formerly was sold, not because he was a negro, but under the same conditions as the Greek or Arab. The initiative in the African slave-trade was taken by the Portuguese, who in 1444 formed a company at Lagos, although it is doubtful whether it was organized expressly for the trade in men. In 1445 four negroes were taken by the Portuguese, but rather accidentally than of set purpose to make them slaves. The trade quickly increased, and another factory was established in one of the Anguin islands, which sent from seven to eighteen hundred black slaves to Portugal every year. The discovery of America (1492) gave a new impetus to the trade, which had declined fully one half. The Spaniards, finding the Indians unable to do the work required of them, soon began to import negroes into the New World, and were encouraged by the priests Las Casas and other Roman Catholic leaders on the plea of preventing the extinction of the natives. The trade, under the stimulus afforded by the American demand, rapidly increased, and was engaged in by the English, who had already brought negroes into their own country and sold them as early as 1655. In the time of the Stuarts four com-
companied were formed for carrying on the traffic, which furnished negroes to America. In 1713 the privilege of supplying negroes to the Spanish colonies was secured by the English for thirty years, during which time 144,000 were to be landed. Other European nations engaged in the commerce, and the first slaves brought to the old territory of the United States were sold by the State of Georgia under the authority of the State of Virginia, in 1750, provided for general emancipation. In Massachusetts the abolition of slavery was provided for by the constitution of 1780. Rhode Island gradually emancipated its slaves, and had but five left in 1840; New York adopted a gradual emancipation act in 1799, and in 1817 passed another act declaring all her slaves free on July 4, 1827. New Jersey pursued the same course in 1804. The increase in the demand for cotton and the invention of the cotton-gin made slavery very profitable, and it was supported by law, mainly by the Southern states. In 1820, when Missouri was admitted into the Union as a slave state, the "Missouri Compromise" was entered into, by which slavery was legalized to the south, but prohibited to the north, of 36° 30' N. lat. The South obtained in compensation an amendment of the Fugitive Slave Law, making it penal to harbor runaway slaves or aid in their escape. In Boston, Mass., Jan. 1, 1831, William Lloyd Garrison began to oppose slavery in The Liberator, and on Jan. 1, 1832, the first emancipation society was formed, on the basis that "slaveholding is a sin against God and a crime against humanity; that immediate emancipation was the right of every slave and the duty of every master." This society was organized in Boston, by twelve men, with Arnold Buffum as president. Very soon the results of their efforts were manifest in the religious sects and parties. In 1840 some of its members seceded and formed the American Anti-Slavery Society, and in 1843 the American Association for the Advancement of Social Science, and the same year the "Liberty party" was organized, which was mostly absorbed by the "Free-soil party" in 1848. This party was in turn absorbed by the Republican party, which in 1860 elected Abraham Lincoln president. The "American Abolition Society" was formed in Boston in 1855, to advocate the view that the national government had the constitutional right to abolish slavery from every part of the Union. In 1859 the "Church Anti-slavery Society" was organized for the purpose of convincing ministers and people that slavery was a sin. In the same year an attempt was made by John Brown to carry it out, but it was defeated. The accession of the states forming the Confederate States (1861) wholly changed the relation of the government towards slavery. War soon followed, notwithstanding the assurances of Mr. Lincoln of his purpose to abide faithfully by all constitutional compromises relating to slavery. In May, 1861, major general Butler, of the department of Eastern Virginia, declared all slaves who had been employed for military purposes of the confederacy to be contraband of war. The president recommended, March 2, 1862, that Congress adopt a resolution "that the United States, in order to co-operate with any state which may adopt a law prohibiting slavery, give to state antislavery aid, to be used by such state in its discretion, to compensate for the inconvenience, public and private, produced by such change of system." The resolution was adopted, but produced no effect. Mr. Lincoln issued a proclamation on Sept. 22, 1862, declaring his intention to announce that on Jan. 1, 1863, all emancipation held by any state, or part of a state, which should then be in rebellion, should be free. The final proclamation of freedom was issued Jan. 1, 1863. On June 9, 1862, Congress passed an act declaring that "from and after the passage of this act there shall be neither slavery nor involuntary servitude in any of the territories now existing," etc. On June 23, 1864, all laws for the rendition of fugitive slaves to their masters were repealed. On Jan. 31, 1865, the vote was taken submitting to the several states for ratification the 13th amendment to the Constitution: "Neither slavery nor involuntary servitude shall exist in the United States; and in any state which shall have been made free by the Union, or by any state or by any state.

3. In Egypt and Africa.—Slavery has existed in
SLAVERY

SLAVERY

Egypt through all its known history. In modern slavery there has not been very great severity, the male black slave being treated with more consideration than the free servant. He leads a life well suited to his lazy disposition, and if discontented with his situation, can easily compel his master to grant him his liberty. The females, on the contrary, are generally Egyptians, Abyssinians, Georgians, or Greeks. They occupy all positions from that of the lowest menial to the favorite companion, and even wife, of the master (Lane, Manners and Customs of Modern Egyptians, i. 275 sq.).

Slavery has been nominally abolished in Egypt, although it still exists to a large degree in Nubia and in the Sudan. In both these regions the slave-trade is still carried on with much severity, principally by Arab traders. See Chamber's Encyclop. s. v.; Johnson's Cyclop. s. v. For literature, see Apollodorus, s. v.

SLAVERY, RELATION OF, TO CHRISTIANITY. This topic has necessarily been touched upon in the preceding articles, but its importance justifies a fuller consideration separately. (In doing this we avail ourselves in part of the treatment in Herzog's Real-Encyclop.)

The New Test. teaches that salvation is the common privilege of all mankind, and that all men have an equal claim to it (Rom. iii. 21; Gal. ii. 11 or iii. 11; Tim. ii. 4). This principle alone would, of necessity, determine the Christian view of slavery and lead to the extinction of that state (Gal. iii. 28; Col. iii. 11). Christianity, moreover, does not deal with nations and masses of people, but with individuals, whom it severally invites, exhorts, and receives into its communion. It sets forth faith as an inward liberating life-principle (John viii. 36), through which the individual lays hold on Christ and becomes united with him. This involves a recognition of the rights of the inner man, which the heathen nations never apprehended, and which were veiled from sight even in the Old Test., though clearer in the Gospel dispensation (Acts xix. 41; xii. 46), and which in their progress and complete realization under Protestantism must ultimately bring about the utter extirpation of slavery from the earth. Christ postulated the law of liberty, and made freedom the privilege of believers (John viii. 32; James i. 25; ii. 12; Rom. viii. 2), thereby accomplishing the predictions of the Old Covenant (comp. Luke iv. 18-21 with Isa. lx. 1 sq.); and, though the proclamation of liberty by the apostles had primary reference to the inward states of the soul (1 Cor. vii. 23; Gal. v. 1; 1 Pet. ii. 16; comp. Gal. ii. 4, 5, 13; 2 Pet. ii. 19), it necessarily led to the great principle of liberty in general, common to man (see Luke i. 79; 2 Cor. iii. 17). They taught that while freedom begins in the religious consciousness, it is not restricted to that field, but involves consequences in other departments of human life as well, even as the saving of the soul involves that of the body likewise (Rom. viii. 25); and that the Christian is a freeman, and entitled to all the blessings which God sheds abroad in the earth (1 Cor. iii. 21-23). The realization of that ideal, however, was shown to be the work of a progressive Christianity, advancing in knowledge and in influence over the conditions of the world; and they consequently disapproved all the subtle resistance against the properly constituted and existing authorities of the nations of the earth. It is evident from Rom. xiii. 1 sq. that a disposition to refuse obedience to governments existed to some extent in apostolic times, and, from the case of Onesimus, that bondmen sometimes broke away from their masters' state in the New (Gal. iv. 19; Acts x. 38). Paul asserted in effecting the voluntary return of the fugitive Christian slave by imparting to him a deeper and more correct knowledge of the nature and aims of Christianity (Philem. 10-16). A similar principle is embedded in the important passage 1 Cor. vii. 21: existing conditions, however adverse to the spirit of Christianity, are not to be subverted by force, but are to be displaced by new conditions whose root is the principle of Christian freedom implanted in the human heart. As a rule, converts to Christianity are exhortcd to continue in the station and condition of life to which the Providence of God has assigned them. The argument by which that rule is enforced, that the present is a time of distress and, more nearly approach that day, the grand catastrophe through which the world's conditions shall be exchanged for the new one, near, have universal force, and adapt the rule to the conditions of all Christians. It is, however, evident that the apostle does not strike at the right to liberty and personal independence in these instructions. 1 Cor. vii. 23 asserts that right most forcibly, and shows that the saving grace of the Lord involves a setting-aside of all human bondage. A denial of that right would bring him into conflict with his own claim to freedom (1 Cor. ix. 1), and with his fundamental statement that in Christ all things shall become new (2 Cor. v. 17).

From the opposite point of view, Christianity is seen to insure to the slave the right to set himself free from their slave kindly, and as brothers (Eph. vi. 9; Col. iv. 1; Phil. 16). In practice, the early Christians were accustomed to give freedom to their slaves, and to purchase the freedom of the slaves of others: witness the action of Gregory the Great in the 6th century in purchasing a number of British captives and returning them in freedom to their native land, that they, as a gift by the monk Augustine, might carry the blessings of Christianity to their countrymen. Where slavery exists in a Christian land in any pronounced form, it is because Christianity itself has remained in a low state of development—as, for instance, in Russia—or because of its religious character it has resulted in a universal enslavement in Europe during the Middle Ages. In its fundamental nature, Christianity is the law of liberty, and, therefore, opposed to the enslaving of individual men, on the one hand, and to the exercise of absolutism and despotism in the government of states, on the other.

The extirpation of slavery, which has been made a part of the mission of Protestantism. It is among Evangelical Christians alone that the evils of slavery have arrested attention, and it is chiefly through their influence that its sway has been contested. The attitude of the Papal Church has been that of indifference or of imputation of the greatest possible injustice to the ideas of human slavery belongs to Great Britain, whose West-Indian colonies and naval supremacy compelled a recognition of responsibility in the matter; but the Christian spirit ruling in Protestant lands will allow none of the nations which they shelter to rest until the last vestige of human slavery is wiped from the face of the earth.

The earliest endeavors for the overthrow of slavery date back to A.D. 1270, when an alliance between England and France was formed to punish the pirates of the Barbary states. The object was to compel the liberation and subsequent immunity from slavery of white persons. Philip the Bold attacked Tunis with this intention, and England repeated the attack in 1889, in each instance compelling the liberation of all Christian slaves; but the states of Oran, Algiers, Tunis, and Tripoli, nevertheless, devoted themselves, from the close of the 15th century, to piracy as their leading industry. Repealed invasions of seamen were being carried on at the hands of England, France, and America; but they continued at the same time to exact tribute and ransom from the subjects of those powers. The first effective hindrance to this business was realized in the present century through the conquest and colonization of Algiers by the French.

The idea that the bonds of the race in negro slaves is to be much more recent. The Pennsylvania Quak-
ERS passed resolutions against slavery in 1696, and repeatedly afterwards, and enforced them practically since 1727. George Fox and William Penn were especially active in this movement. The earliest authors who wrote against slavery were William Burin (1718) and after him John Wesley, who pronounced the abolition of trade in negroes in this work, as did his friend Anthony Benezet, who was connected with John Wesley, George Whitefield, and the Countess of Huntingdon. In 1731 the Quakers gave up the trade in slaves among themselves, which led Sidmouth, Wellesley, and others to adopt the same. The efforts to effect the abolition of the trade in negroes in their general. It was, however, chiefly through the efforts of Granville Sharp that the principle was established, in 1727, that "a slave who treads on English soil is free." Public opinion was now with him, and Sharp proceeded to demand the closing of the slave-trade, and the liberation of the slaves in all the colonies of England. Clarkson's prize-essay on the question "Is it right to make slaves against their will?" appeared in 1788. Wilberforce, Pitt, and Fox were gained over to the cause of abolition soon afterwards; and in 1788 a petition by the first of these men led to an official inquiry into the slave-trade and its consequences by the House of Commons, on the privy-council. Facts were accumulated which caused the passage of the first bill for the restriction of the slave-trade in 1789. The Commons passed a bill for the abolition of slavery in 1792 by a majority of nineteen votes; and in 1807 the definitive "Abolition Act of Slavery" became a law. In 1807 the most important chapter in the history of the African continent charged to make every effort to secure the co-operation of the native kings in the work of stopping the supply of slaves; and fleets were sent out and kept on the African coast, at great expense, to prevent their exportation. Negroes rescued from their captors were sent to the colony of Sierra Leone, where they have made most rapid progress in civilization under the influence of Christian teaching. Denmark and France were equally prompt in their action. The former in 1789 restricted the slave-trade in its West-Indian colonies, and in 1804 forbade it entirely. The latter in 1806 in all slave-holding in its colonial territories by act of the National Convention.

The earliest negro slaves were introduced into Europe by the Portuguese, though Spanish historians claim the unenviable distinction for their own nation; and these nations likewise introduced them into America. The first slaves found in an English colony were obtained by Virginia from a Dutch vessel in 1620. The Puritans in the Northern colonies enslaved the native Indians at first, and displayed no repugnance to the idea of negro slavery, though the nature of their soil and the conditions of their life prevented any considerable employment of such bondmen. In the South, James Oglethorpe, the founder of Georgia, interdicted the holding of slaves; but when, in 1752, Georgia became a royal colony, its inhabitants were freed from all restrictions of this kind, and slave-holding became general. After the Revolutionary War, in 1780, the census reported 657,587 slaves in the United States, of whom 40,370 were in the North; but in the latter section interest combined with a growing moral sentiment to excite hostility against any increase in the number of slaves or the permanent retention of slavery as an institution. The situation of the Southern States, on the other hand, was entirely favorable to the development of slavery. The cultivation of tobacco, cotton, and the great staples of that section, afforded opportunity for the profitable employment of the slaves. Gradually the dislike of slavery felt by the more intelligent of the early Southern statesmen and clergymen died out, and a sentiment favorable to its existence arose; and the reaction was carried so far that the pulpits devoted their powers to the demonstration of a divine origin and a divine character for slavery. The slave-trade continued to be carried on until 1808. The prominence of this subject at the first session of the First Congress on Jan. 1, 1808—the passing of the measure preceding that of the British Parliament by seven days. But the inter-state trade in slaves continued. The breeding of negroes for the slave-market became a regular business, whose proportions enlarged with the extension of the slave-holding territories. Political measures of the Southern States were wholly designed to promote the interests and the extension of slavery, culminating in the Fugitive-Slave Law of 1850, by which any slave-owner was authorized to follow an escaped slave into any part of the Union, and compel the assistance of citizens for the recovery of the bondman. The operation of this law outraged the moral sense of the world, and led to the initiation of antislavery efforts by which the sentiment of the free states was thoroughly revolutionized. In these agitations the names of Garrison, Wendell Phillips, and others became prominent as the leaders of the abolition movement, which realized its object on Jan. 1, 1865. The operation of the law went into effect wherever the authority of the United States was recognized. The success of the Northern arms soon made that proclamation universal in practice.

The relation of the churches to the question of slavery involved great inconsistencies of practice, among Evangelicals, at least. The Roman Catholic and Protestant Episcopal churches never expressed an authoritative condemnation of slavery, and in the war for the Union the influence of the Papal Church was emphatically favorable to the South; but other churches were opposed in principle to slavery, while they tolerated it in practice, and tried hard to persuade themselves that slavery is right. The Methodist Episcopal Church was set right by the separation of 1844; the Presbyterian Church by the New-school Assembly's declaration of 1857, and by the separation, consequent on the war, in 1861. In each denomination of Protestants, except the Protestant Episcopalian, the remarkable fact came to pass that the churches in slave-holding communities became the defenders, while those in free territory became the determined opponents, of slavery. The progress of events has, however, wrought a great change of opinion among the more intelligent of the people.

The extinction of slavery in the United States is, at any rate, a fact whose influence over the ideas of the people cannot be resisted. For the attitude of each particular Church towards this subject, see the articles devoted to the several denominations.

The latest aspect of the relation of slavery to Christianity appears in connection with the planting of Christian missions in the interior of Africa, as one of the consequences of the recent explorations of Livingstone, Stanley, and others. The Christian communities of Liberia and Sierra Leone afford opportunity for an invasion of African heathendom from the west, which is expected to be the sower of the gospel. The extinction of slavery in the United States is, at any rate, a fact whose influence over the ideas of the people cannot be resisted. For the attitude of each particular Church towards this subject, see the articles devoted to the several denominations.

SLAVERY IN THE EARLY CHRISTIAN CHURCH LABORED under several disabilities as regarded their Church re-

Digested by Google
lations and privileges. This did not arise from any hostility or desire to oppress on the part of the Church, but rather from the necessity of respecting the legal rights of the master. 1. They were debarred from the privilege of ordination, for the reason that, being originally tied by birth or purchase to their patron's or master's service, they could not be legally ordained; the service of the Church being incompatible with their other duties, and no man was to be deprived of his right under pretense of ordination. If, however, a slave was found worthy, and his master gave consent, then he might be ordained. 2. If the master of a slave was a Christian, his testimony concerning the life and conversation of the slave was required before the latter could be admitted to the privilege of baptism. The design of this course was to enlist the interest of the master, and prevent the over-hasty admission of unfit persons. 3. The slave could not marry without his master's consent, being looked upon in this respect as a child; nor could he enter a monastery without this permission, because this would deprive his master of his legal right of service. 4. The privilege of sanctuary was granted them, so that it would excuse them from the proper duties of their station. If they fled to a church, they might be reclaimed and brought out immediately. Other facts relating to slaves may not be uninteresting: e.g. exception was made in their favor so that the judge might on Sunday go through the civil process of the necessary for their emancipation. It was thought a highly proper and commendatory act to celebrate Easter by granting freedom to slaves. Further, if the slave of an apostate or a heretic fled from his master and took sanctuary in the church, he was not only to be protected, but to have his manumission or freedom granted him likewise. See Bingham, Christ. Antq.

Slavio Mythology. This term may cover the religions of the early Poles, Russians, Wends, Bohe-
mians, Moravians, Servians, Masuri, and Silesians. The teaching of these systems is based on the idea of dual principles, a race of good and another of evil deities, with whom are associated numerous inferior gods. The principal deities may be connected with a tree whose root is God—called Bog or Swantevit. All the subordinate gods are in pairs, as Belbog and Czernebog, good and evil, and Razi and Ziroston, counsellors and magicians, as follows:

- Swantevit, Triglat, or Bog=God.
- Belbog
- Czernebog
- Radegast (Zironitri) (Razi)
- Resivis (Zironitri) (Razi)
- Flins (Zironitri) (Nemesis)
- Hei (Zironitri) (Nemesis)
- Mira (Razi)
- Prove
- Podaga
- Hierowiti, Siebel, Zibogob
- Gilboy
- Jurtoh
- Ruglewit, Karetw
- Berstuk (Razi) (Gasto)
- Gasto
- Siska Gudji
- Swiatix
- Marowit.

This plan assumes that the principal seat of the Slavic religions was at Arcona, since Swantevit was there the only god, and as the supreme god at Kieff and Romowa the lightning-darting Perun, or Perkus, stood first, and at Rhetra, Radegast; but Swantevit was at all events the chief deity worshipped among all the Western Slavs, and was esteemed as one of the chief gods among the Eastern Slavs as well. The Russians of the Poles residing nearest to Kieff, Novgorod distinguished the gods into four classes, which contrasted with each other, and whose respective members were similarly various in their natures. There were, for instance, gods of men and of beasts. In the former class were found gods of love and of pain; in the latter, gods of growth and of destruction. The other classes were that of the nation and that of inanimate nature—the one including the gods of the house and of the field. To these deities of the general populace must be added innumerable private and local gods, especially among the Poles, each tribe, town, or institution having its own patron divinity, and each one regarding its own god as superior to other gods of his class. The most insignificant duties, such as the lighting of lamps, the cutting of bread, the tapping of a fresh barrel, etc., were under the guidance of the gods. A numerous priesthood conducted the religious rites, which generally took place in front of the temples, and sometimes involved bloody sacrifices of human beings. Princes were accustomed to depose princes in war in this way, though the interested priests would sometimes spare the latter for a life of servitude; and the people were in the habit of contributing material of every kind and in lavish quantity to the support of their religion. Such contributions were rewarded by wondrous gifts, and the principle of faith was sustained. The temples were rude structures of logs and were surrounded by hanging cloths. The devastating campaigns of Henry the Lion destroyed the temples of the western Slavonic tribes and brought the prevalent paganism to an end, though certain superstitious customs have been preserved in the regions of their former occupancy to this day.

Slavonia is the general designation of a race of great antiquity, who were found on the Don among the Goths, and afterwards on the Danube among the Huns and the Bulgarians. Their ancient religion was a system of unmixed paganism, their chief god being Perun (thunder), while the other principal deities were Lada (goddess of love and pleasure, the rainbow and the fruits of the earth), and Koleda (god of festivals). From Procopius we learn that they worshipped also rivers, nymphs, and other deities, to whom they offered sacrifices, making divinations at the same time. The most celebrated deity of the Baltic Slavonians was Swantevit, whose temple was at Arcona, the capital of Rügen. For a lengthened and graphic account of the temple and worship of Swantevit, see Gardner, Faiths of the World, s. v. Each of the different Slavonian nations had its own special deities. At Plön, in Holstein, there was an idol called Podaga, and at Stettin there was a temple dedicated to the Slavic god Trig- lat, whose image was triple-headed. Notwithstanding the numbers of their deities, the Slavonians seem to have believed in a supreme God in heaven, and held that all other gods issued from his blood. In addition to their gods, they believed in good and evil spirits and demons of different kinds, in the immortality of the soul, and in a retribution after death. Worship was held in forests and temples, and sacrifices of cattle and fruit were offered. The dead were burned and their ashes preserved in urns. For literature, see Miklo- sich, Vergleichende Grammatik der slavischen Sprachen Wien, 1862-71; Naake, Slavonic Fairy Tales (Lond. 1874); Schafarik, Slavische Alterthümer (Leips. 1843, 2 vols.); Talvi, Historical View of the Languages and Literature of the Slavic Nations (N. Y. 1850). See SERVIA.

Slavonic Versions. Under this head we shall have to speak of different versions, all belonging to one and the same family. The oldest of these is—

1. The Slavonic Version, which was executed during the 9th century by Cyril (q. v.) and Methodius (q. v.), the first missionaries to the Slaven, is contrary to the course pursued by Xavier, but anticipating the labors of modern and Protestant missions and Bible societies, conferred on that half-savage nation the inestimable blessing of a valuable translation of the Bible.
SLAVONIC VERSIONS

The first portion of the Slavonic version which was printed was the Psalter, published in 1491 at Cracow, Poland, and reprinted in 1495 in Montenegro. The four gospels were printed in 1512 at Ugrovolettsa, which edition was followed by another in 1552 at Belgrade, and a third, in Montenegro, in 1562. In 1581 the first edition of the Slavonic Bible was published at Ostrog, a number of Greek MSS. having been used for the revision. The second edition of the Bible was published at Moscow. In 1712 the czar Peter the Great issued a ukase ordering the printed Slavonic text to be carefully compared with the Greek of the Septuagint, and rendered in every respect conformable to it. The revision was not completed till the year 1747, when a correct copy of the Lectionary was finished. In the following year Peter the Great ordered the revised copy to be put to press, but his death in that year greatly retarded the progress of its publication. Besides the death of the czar, other obstacles occasioned still further delay, and it was not till 1751 that this revised edition was published in a ponderous folio form, containing, besides the text, long and elaborate prefaces, with tables of contents and other useful additions. This edition, which served as the basis of all subsequent ones, has often been printed by the Russian Bible Society; and up to the year 1816 not fewer than twenty-one editions of the whole Bible, besides many others of the New Testament, were issued. According to the last report (1879) of the British and Foreign Bible Society, about 246,418 copies of the Bible have been distributed. Owing to the comparatively late date of this version, it has no claim as a critical authority. Of late, parts of the New Test. have been published based on the oldest manuscript text, as Ostrogoths Evangelen, edited after a MS. of 1056 by Vostokov (St. Petersburg, 1843); Evangelium Matthaei Palesiense, ed. by M. F. Mikloho (Vindob., 1856); Mark i-x, by the same, in Silesionia Formenlehre (ibid., 1874); John, by Lesken, in Handbuch der altbaptistischen Sprache (Weimar, 1871). See the Introductions by Hing, Kichhorn, Kaulen, Scholz, the art. "Slavonic Version" in Kitto's Cyclop. and Smith's Dict. of the Bible; Davidson, Biblical Criticism, p. 238 sq.; Kohl, Introductio in Hist. et Lem Litt. Slavorum; Dobrowolsky, Slavis: Beiträge zur Kenntniss der slawischen Literatur (Prague, 1860); Four different editions of Dulaen, Das Geleit des Herrn in den Sprachen Russlands, p. 57 sqq. 2. Russian Version (q. v.).

3. Polish Version. — A translation of the Scriptures into Polish is said to have been made prior to 1390 by order of queen Hedwig, the first wife of Jagello. Since the middle of the 15th century, when different editions have been the first in order of time was a translation of the New Test., made by Szkucyan, a Lutheran, and a competent Greek scholar. It was printed at Königsberg in 1551, and was thrice reprinted before 1555. The first version of the entire Old Test. appeared at Cracow in 1561. It was translated from the Vulg. by Leonhard, and reprinted in 1575 under the title Bible, to jest Księgi Staroje i Nowego Zakoñu, na Polski jzyk, etc.; in Krakow, by druk. Mik. Szarfberget (1575, and again in 1577). Although designed for Roman Catholics, it never received the sanction of the pope, because many passages had been taken from the Bohemian Bible. It is known as the "Old Cracow Bible," and copies are now very rare. The New Test. of this version first appeared at Cracow in 1556, and in the course of time other translations were published. Thus in 1563 the famous Radziwill Bible was produced, under the title Bibli, to jest, Księgi Staroje i Nowego Zakoñu, ulazime z Zgodobojskiego, Greek and Latin, now na Polski jzyk z piwnym i wierszyn wylosoweme. This edition was executed from the original texts by an anonymous translator for the Calvinists, and printed at the expense of prince Radziwill; but his son, who became a Roman Catholic, carefully bought up all the copies he could find and burned them. In 1572 the Socinian Bible, translated from the original texts by Budny, a Unitarian clergyman, was published at Nieszawa, in Lithuania, and was reprinted at the same place in 1572. Only three copies are said to be extant. The authorized Polish Bible was first printed in Cracow in 1599, with the title Bibli, to jest Księgi Staroje i Nowego testamento ; przez D. Jak. Woyka, w Krakowic, w druk. Lazażowic, na rok 1599 (1599-1600). The translation of the Roman Catholics, was sanctioned by Clement VIII. The translation is accounted one of the best of European versions of the Vulg., the language being pure and classical, though in some places slightly antiquated. It was executed by the Jesuit Jacob Wuyck. At present there is a new copy of the Lectionary, published in 1609, or about $90. Two other editions followed in 1740 and 1771. In 1632 the Dantiz Bible, translated by Palii, rus, Wengierscic, and Nicolaevius, from the original texts, was sent forth by the Reformed Church at Dantiz, under the title Biblia Sacra, to jest Księgi Staroje i Nowego Przysmarnia z Lzbojskiego y Greckycy jzyka na Polski pilna y wierszyn przetłumaczenie; we Gdansku w druk. Andrzeja Hunefelda. This Bible had passed through many editions before the British and Foreign Bible Society commenced its operations. In 1808 the Berlin Bible Society projected an edition of the Polish Scriptures. The text selected was that of the Dantiz edition of 1632. The Berlin Bible Society commenced an edition of the New Test. from the text of Jacob Wuyck. Other editions from both of the above texts were issued by the Berlin society with the aid of the British and Foreign Bible Society, which are at present in circulation. According to the latest report (1878) of the latter society, a revision committee is engaged to prepare a translation of the New Test. from the original, the work to be completed in three years. 4. Bohemian Version. — It seems that the greatest part of a Bohemian version of the Scriptures was extant at the close of the 14th century. When Huss began to preach against the evils of Rome, the second portions of Scripture that had been translated into Bohemian were for the first time collected together. After his martyrdom, in 1415, copies of this Bible were greatly multiplied by his followers, and from A.D. 1410 to 1428 (when this Bible was first printed), no less than ten different editions were published in various places. By comparison, these can be distinctly traced, and many more of the New Test. From the date of the first publication of this Bible in 1428 to the year 1804, fourteen editions of the same left the press. Between the years 1579 and 1601, a version of the Scriptures executed by the United (or Moravian) Brethren from the original texts was published in six quarters by the Evangelical Societ, in Dill Privatsä. Fourteen translators are said to have been engaged on this splendid work (the price of which is given in a Leipsic catalogue at 510 marks, or about $129), and the whole was executed at the expense of baron John Zernitz. This edition is now very scarce, most of its copies having been destroyed by the Jesuits. As to the translation and the notes accompanying the same, Schafarik has remarked that "they contain a great deal of that which, two hundred years later, the learned corphax of exegesis exhibited to the world as their own profound discoveries." A third edition of this Kralitz Bible was published in 1613 by the Ilflten Tiede, under the title Biblij Strut, to jest, Kutho, w niz se vecka Fjuma S. Starého y Nového Zákona obsahuje; v novy výstupu, a vydany, which is also remarkable for its high price ($90) given in a Leipsic catalogue. In addition to the above editions mentioned, a translation of the entire Scriptures into the Valachian tongue was published in 1804 by Prochazka and Durich, under the title Biblij Cťask... podľa starého obecného Latinščiky od sveté vjanské Katolícky cyrkve živého rýhleda (Prague, 2 vol.). The design of issuing an edition of the Bohemian Bible was entertained by the Berlin society as early as 1805. The current of political events, 

Digitized by Google
however, impeded the progress of the edition, which was not completed till 1807. In 1808 an edition of the Bible, carefully printed from the text of 1593, was edited by Prof. Pulkovitch, of Hungary, with a list of obsolete words. After one hundred copies had been circulated, the British and Foreign Bible Society purchased in 1812 the whole stock for distribution. Numerous other editions have been published, both at the same society, and, in spite of the great opposition to the circulation of the Scriptures among the Bohemians, the latest report (1878) of that society shows that up to March 30, 1878, all in all, 402,096 portions of the Holy Scriptures have been disseminated.

5. Servian Version.—The Servians approximates more closely to the Old Slavonic than to any modern idiom, and its chief characteristic is the softness of its sound, Schafarik, in comparing the various Slavonic languages, fancifully but truly said, “Servian song resembles the tone of the violin; Old Slavonic, that of the organ; Polish, that of the guitar. The Old Slavonic, in its psalms, sounds like the loud rush of the mountain-stream; the Polish, like the bubbling and sparkling of a fountain; and the Servian, like the quiet murmuring of a streamlet in the valley.” As to the version into that language, it is of a comparatively recent period, since the ancient Slavonic version, more intelligible to the Servians than to any other Slavonic, since the Slavonic Church has always been in Russia. We are told that in 1498 a translation of the Pentateuch into Servian was printed at Zenta, in Herzegovina; but it is probable that the language of this version approached nearer to the Old Slavonic than to the modern idiom. In 1815 a communication from Mr. Kopitar, of Vienna, was addressed to the committee of the British and Foreign Bible Society through Baron De Sacy, of Paris, calling attention to the necessity of furnishing Servia with a version intelligible to the mass of the people. A Servian, by name Vucie Stephanovitch, was engaged to prepare an edition of the New Test. in Servian, which was not completed at press until 1824. As his translation was written in the common dialect of the people, many objections were made to it by those who preferred a more elevated style, bearing a stricter conformity to the Old Slavonic idioms. Soon after the appearance of this version, Prof. Stoikovitch was appointed by a committee of the St. Petersburg society, to prepare a new edition, holding the narrow similarity between the common and the more ancient and classical phraseology of the language. This edition was printed at St. Petersburg. When a second edition of the New Test. became necessary for Servia, the committee of the British and Foreign Bible Society, having ascertained that the latter edition proved more acceptable to the people, took Stoikovitch’s and issued an edition of 2000 copies at Leipsic in 1830, which was followed by other editions published at different times. In 1864 the same society purchased the manuscript translation of the Psalms prepared by Prof. Danicij, which was published in 1865. From that time on, different parts of the Old Test. were published as soon as their translation was approved, and in 1869 the Servian Bible was completed. As to the merit of this translation, we will mention the fact that the bishop of Pakrac, in Slavonia, the most talented of the Servian hierarchy, and in former days a strong opponent, has written to Mr. Danicij, the translator, in the following terms: “I am more pleased with your translation of the Bible than with any other. I only regret that I cannot express my approbation of your glorious work as freely as you deserve and as I wish.” “Danicij’s version,” as the Zugro-hapski Katholische List (a Roman Catholic periodical) states, “is a valuable addition to our national literature. The Servian language (as that of no other Slavonic tongue) has been preserved from the decay that has befallen itself of advantage; but, although the translation is an honest one, neither the Greek Oriental nor the Catholic Church can approve of it in its present state, nor can it be recommended to the people. What is to be done in the case? The Greek Oriental Church, unless it desire to abide by its custom of using the ancient Slavonic and quoting from that, might easily bring Danicij’s version into conformity with its rules. The Catholic Church may do the same. . . . It is not worthy of praise that, with so many bishops of both churches, it should have been left to the British and Foreign Bible Society to produce a more popular version. It is not a translation; it never was, and never was allowed to remain as they are now, no prohibitions will be of any avail. The people will grasp at this translation, unless an authentic one be provided for them.” That the writer in that journal was correct in his anticipation may be seen from the fact that up to March 30, 1878, 102,109 copies of the Servian version had been distributed.

6. Croatian Version.—The Servians and Croatians speak the same language, the only difference being in the written characters. The Servians belong almost without exception to the Greek Church, and use a modified Cyrillic character, while the Croats, having received instruction in the Catholic faith, use that of the Christians, as far as it is written originally from Latin priests, belong in general to the Roman Catholic Church, and use the Roman character. A translation of the gospels into a Croatian or Dalmatian-Servian, by Bandolovitch, appeared at Venice in 1618, but never obtained much circulation. In 1640 a Jesuit, named Gavran, produced another translation of the entire Scriptures, but it was never printed. After the lapse of another century, Stephen Ross, a Roman Catholic priest, executed a new translation, which he forwarded to the pope with the request that it might be used in all the churches instead of the Old Slavonic version; but at the consideration of a committee appointed by the pope, the project was formally rejected in 1754. At length, in 1832, by the renewed efforts of the Roman Church and the zealous aid of the deceased primate of Hungary, cardinal Rudnay, another version was completed and permitted to pass through the press. It was printed in Roman letters, and was at once adopted by the Roman Catholics of Dalmatia and Croatia. This version, translated from the Vulg., and rendered conformable in all points to the dogmas of the Romish Church, was executed by Katanesch, a Franciscan monk and professor. An entire new translation was commenced by Mr. Karadic, completed by Mr. Danicij in 1864, and published at Leipsic in 1865.版印刷 of the Old and New Tests. was commenced by Dr. Su-lek, with the orthography revised and obsolete words changed. Of this revised edition the New Test. was published in 1878, which proves to be more acceptable because more intelligible than formerly. Altogether the British and Foreign Bible Society had circulated up to 1878, by means of these editions, 50,000 copies, and it had been estimated that 100,000 more copies were in circulation. In 1874 a version of the Serbs and Croats, translated by Trubner, was printed and was used at the third council of Nicaea. In 1848 a version of the Orthodox Church was printed in the vernacular.

7. Slovenian Version,—Slovenian is a dialect spoken in the Austrian provinces of Carnithia, Carniola, and Styria, and has been the vernacular of these regions since the 5th century, but was never embodied in a written form till towards the epoch of the Reformation. The first who wrote in this dialect was Truber, a canon and curate of several places in Carniola and Carnithia. In his endeavors to give to his people the Bible in the vernacular, he met with so much discouragement and opposition that he was obliged to take refuge with Christopher, duke of Wurttemberg. Here he completed his translation, the first portion of which was the Gospel of Matthew, published at Tubingen in Roman letters in 1555, while the entire New Test. was completed at press in 1557. Dalmatin, who assisted Truber, translated the Old Test., and an edition of the entire Scriptures in Slovenian was printed under his direction, with the aid of Melancthon, in 1584. This edition was designed for the Protestants of the Austrian dominions and was then very numerous; but they have been exterminated by the Jesuits, and almost all the copies of this edition seem to have been destroyed. In 1784 a version of the Scriptures—for the use of Roman Catholics was printed at Laybach, it being executed from the Vulg. by George
Japel. This version has since been reprinted. About the year 1817 another version is said to have been prepared by Ravnikar, a Roman Catholic divine at Laybach. Of late, however, the British and Foreign Bible Society has undertaken a new translation of the New Test. into this dialect, made directly from the Greek. In 1870 the sixty-sixth Annual Report of that society announced the publication of a complete New Test. of 2000 copies of the Epistle to the Romans, and in 1877 by the publication of three additional epistles. Of the Old Test. the Psalms are prepared for publication. Altogether the British and Foreign Bible Society has circulated in about eight years 25,500 copies of the New Test., the best evidence of the timely undertaking of this version.

8. Slovakian Version.—This dialect is spoken in the north-west of Hungary. It approximates closely to the Servian, but has been greatly influenced by the Bohemian, which the Slovaks have adopted as their literary language. A translation of the New Test., made by the British and Foreign Bible Society, was printed in 1831.

9. Bulgarian Version.—The first translation into this dialect was commenced in 1820 by the archimandrite Theodosios, and completed in 1822. Only the Gospel of Matthew was printed at St. Petersburg in 1823. In 1827 another translation of the New Test. was completed by Sapouzoff, of which the four gospels only were printed. In 1836 the British and Foreign Bible Society set an entirely new translation on foot, and the complete New Test. was published at Smyrna in 1840. Other editions have since been issued from the London press, and up to March 30, 1878, 51,918 copies of the New Test. have been published. From the publication of this version the Word of God evinced by the Bulgarian population encouraged the British and Foreign Bible Society to take steps for obtaining a translation of the entire Old Test., and this work was completed in 1858, under the superintendence of Dr. Riggs, of the American mission. It was printed at Smyrna, and left the press in September, 1853. In 1873 the report of the British and Foreign Bible Society stated that a new edition of the Bulgarian Bible was in course of preparation by the Rev. Dr. Long, introducing some small corrections in order to make the whole work uniform in style and pronunciation. Since 1873 this new edition has been in circulation.

10. Wendenish Version.—The Latin term Venedis, German Wenden, is the specific appellation of a Slavonic tribe located in Upper and Lower Lusatia. Two dialects are predominant among them—that of Upper Lusatia and that of Lower Lusatia, the former resembling more the Bohemian, the latter the Polish. At an early period attempts seem to have been made to translate portions of the Bible into Wendsch. In 1728 a version of the entire Scriptures in Upper Wenden appeared at Budsissan, or Bautzen, in Upper Lusatia, which was followed by a revised edition in 1742, and a third edition in 1797. All these editions strictly follow the German version of Luther. With the aid of the British and Foreign Bible Society, the Dresden society produced an edition of 3000 copies of the version of 1728 in 1817. For Lower Lusatia an edition was also published in 1816. New editions soon followed, and in 1860 an edition was published by the Rev. Mr. Teschner, which was published at Berlin.

11. Wendish-Hungarian Version.—A peculiar dialect of the Wendish is spoken by about 15,000 Protestant Slovakiens in the Szela and other districts of Hungary. The New Test. has been translated for this race by Sterioli Kucurovo, or Kucurmis, an edition of which has been printed by the British and Foreign Bible Society, together with a version of the Psalms by the Rev. Mr. Trulan.

12. Lettish or Livonian Version.—The maritime portion of Livonia bordering on the Baltic, and also part of Courland, are occupied by a small nation to whom this dialect is vernacular. According to Dalling, their number amounted in 1870 to about 200,000 souls, of whom 150,000 lived in Riga and the remainder to the Lutheran Church. The Livonians are indebted for their version of the Bible to Ernest Gluck, dean of the Lutheran Church in Livonia. He was a native of Saxony, and bestowed eight years upon this version. After it was revised by John Fischer, a German pastor of profound erudition and piety, and printed in Livonia, it was printed at the command and expense of Charles XI in 1689. This edition was so favorably received that a second was soon demanded, and in 1739 a second and revised edition, consisting of 9000 copies, was printed at Königsberg, the New Test. having previously been published at Riga in 1730. In 1813 another impression of the New Test., according to the revised edition of Fischer, was printed by the Courland section of the St. Petersburg Bible Society at Mittau, consisting of 15,000 copies. Numerous copies of the Lettish Testament have also within a recent period been distributed through the proceedings of the agency of the British and Foreign Bible Society. An edition of 30,500 New Test. was printed in 1854 at the expense of the British and Foreign Bible Society. In 1866 another edition, together with the Psalms, was issued, under the title Ta Jauna Derribu muhau Kunguo Jesua Kristsa jeb Deuca suvētā ukrāddi Kas peza ta Kunguo Jesua Kriatsu peedoseitamason no toem suhleem preesza-nahdaitipen Am Apustatoer drussu ustrakati. The seventieth report (1874) of the British and Foreign Bible Society stated that "a revision of the Lettish Scriptures is in progress, partly at the expense of the Livonian and Courland synods, the principal reviser being Prof. Bielenstein. The committee have ordered the text to be altered and the slavonic words to be introduced from this version. It is expected that the Old Test. will also be revised shortly." Altogether, the British and Foreign Bible Society had distributed up to March 30, 1878, 158,750 New Tests. with Psalms.

13. Lithuanian Version.—The Lithuanian dialect is now spoken only by the peasants, Polish being the language of the middle and upper classes. It is interesting that the dialect used by the Protestant Lithuanians differs from that spoken by the Roman Catholic Lithuanians. This difference is not to be traced back to any confession al quarrel, but rather to territorial influences—the Lithuanians and Jews having lived more or less in the country (Kovno, Wilna, Courland), the Catholics more in the southern part (Poland). Hence Lithuanian proper is spoken by the former, while the latter use the Samaitic or Samogitian dialect. See SAMOGITIAN VERSION. The first translation into this dialect was made at the close of the 16th century by John Brekius, Bammeln, near Friedland, and pastor of Lablu. He afterwards became pastor of the Lithuanian Church at Königsberg, and there he commenced his version in 1579, which he completed in 1590. From the MS., which was deposited in the Royal Library at Königsberg, the New Test. was printed at Strasburg in 1709, by order of Frederick I, king of Prussia. A new translation was undertaken by the Rev. John Jacob Quandt, at the order of Frederick William, king of Prussia. The New Test. and the Psalms were completed in 1727, and the entire Bible in 1735, in which year it was also printed, with the title Biblia, tai este: Wissas asventus raudsna, seno ir Nytoje Testamento. An edition of 3000 copies of the Bible was published at Königsberg in 1755. In 1806 the British and Foreign Bible Society was informed that, although the province of Lithuania possessed 74 churches and 400 schools, the people were almost destitute of the Scriptures. An edition of 3000 copies of the Bible was accordingly printed by the society at Königsberg in 1816, which was followed by other issues. The New

SLEIDAN

Test, now in circulation has the title Naviga Testamenta Latin the British and Foreign Bible Society had distributed 13,000 Bibles and 53,111 New Testaments with the Psalms. 14. Samogitian Version (c. v.).

See The Bible of Every Land; Dalton, Das Gebet des Herrn in Latein in Russland (Hackett, p. 104); for more especially see the Annual Reports of the British and Foreign Bible Society.

Sleep (properly "καθάρων") is taught in Scripture either (1) for the sleep or repose of the body (Jonah i. 5, 6; Psa. iv. 8) or (2) the sleep of the soul, i.e. suspense, insouciance, or stupid inactivity of the Roman xii. 11, 12; Eph. v. 14; 1 Cor. xv. 34), whose or damnable slumbereth not (2 Pet. ii. 3); or (3) for the sleep of death (Jer. li. 39; Dan. xii. 2; John xii. 11; 1 Cor. xv. 51; 1 Thess. iv. 13, 14). See DEATH.

The early Christians looked upon the death of the body as a sleep from which they should awake to inherit glory everlasting. In the Greek word cetering, signifying a sleeping-place, applied to them by the tomb, there is a manifest sense of hope and immortality, the result of Christianity. In the catacombs of Rome, where multitudes of the early Christians rested in hope, among the inscriptions may be read: "in a Latin death line of Life, Sleep; * Veni, veni, Jesus, to Sleep; "The Sleeping-place of Elpis; "Gemella sleeps in Peace." Emblems of their sure and certain hope of a resurrection abounding, such as a vessel supporting a burning flame, and the palm branch and wreath, signifying victory over death. See Inscriptions.

The manner of sleeping in Eastern climates is very different from that in colder countries. The present usages appear to be the same as those of the ancient Jews. Beds of feathers are altogether unknown, and the Orientals generally lie exceedingly hard. People who have no certain home, or when on a journey, or employed at a distance from their dwellings, sleep on mats, or wrapped in their outer garment, which from its importance in this respect was forbidden to be retained in pledge over night (D'Arvieux, iii, 257; Gen. ix. 21, 23; Exod. xxii. 26, 27; Deut. xxiv. 12, 13). Under peculiar circumstances a stone covered with some folded clothes is a favorite pillow. A quilt thickly padded with ears are used either singly or one or more placed upon each other. A similar quilt of finer materials forms the coverlet in winter, and in summer a thin blanket suffices; but sometimes this is doubled up and put upon the bed for that very purpose, and was so among the Jews, as we learn from 1 Sam. xxix. 13, where Michal covers with a cloak or mantle (corresponding to the modern abba or ayk) the image which was to represent her husband sleeping. See BOLSTER.

The difference of use here is that the poor sleeps themselves up in it, and it forms their whole bed, whereas the rich employ it as a covering only. A pillow is placed upon the mattress, and over both, in good houses, is laid a sheet. The bolsters are more valuable than the mattresses, both in respect of their coverings and material. They are usually stuffed with cotton or other soft substance (Exod. xii. 18, 20); but instead of these, skins of goats or sheep were employed to be formerly used by the poorer classes and in the hardier ages. These skins were probably sewn up in the natural shape, like water-skins, and stuffed with chalk or wood (1 Sam. xix. 13). See Pillow.

It is evident that the ancient Jews, like the modern in India, were in the habit of changing their dress on going to bed. Most people only divest themselves of their outer garment, and loosen the ligatures of the waist, excepting during the hottest part of the summer, when they sleep almost entirely unied. See COUCH. As the floors of the better sort of Eastern houses were of tile or plaster and were covered with mats or carpets, and as shoes were not worn on them, and the feet were washed, and no filthy habits of modern times prevailed, their floors seldom required sweeping or scrubbing: so that frequently the thick, coarse mattresses were thrown down at night to sleep upon. (Hackett, p. 103). See BOLSTER, BOLSTER CHAMBER. The poorer people used skins for the same purpose, and frequently they had but a simple mattress, or a cloak, or a blanket, which probably also answered to wrap themselves in by day (Exod. xxii. 26, 27; Deut. xxiv. 12, 13). Hence it was easy for the persons whom Jesus healed "to take their beds and walk" (Matt. ix. 6; Mark ii. 9; John v. 8). See BOLSTER.

To be tormented in bed, where men seek rest, is a symbol of great tribulation and anguish of body and mind (Job xxxiiii, 19; Psa. xii, 3; Isa. xxxviii, 20). See BED.

SLEEPER, JOSEPH JONATHAN, a minister of the Methodist Episcopal Church, was born in Vincentown, N. J., Jan. 24, 1750, and was converted Aug. 31, 1812, uniting with the Methodist Episcopal Church, at Burlington, N. J. In 1828 he received a local preacher's license, and in 1837 was admitted into the New Jersey Conference. In 1857 he took a supernumerary relation, in which, and that of a supernumerate, he remained until his death in Pemberton, N. J., Feb. 27, 1873. See Minutes of Annual Conferences, 1875, p. 25.

SLEEPERS, SEVEN, THE. See Seven Sleepers.

SLEIDAN (originally Philippon), JOHANN, a celebrated historian of the Reformation in Germany, and an actor in the scenes he describes, was born in 1560 at Schleiden, in the present governmental district of Aix-la-Chapelle, Prussia, and educated at Liége and Cologne. At the age of eighteen he became private tutor to a son of count Manderscheid, in whose domain the village of Schleiden was situated, and in that capacity visited France, where he devoted himself to the study of jurisprudence and became licentiate of that faculty (at Orleans, 1595). Through the influence of cardinal John de Bellay of Paris, Sleidan was appointed by king Francis I interpreter to the embassy which attended the diet at Hagenu in 1549; and in the following year the landgrave Philip of Hesse confirmed his appointment as messenger, interpreter, and historiographer to the emperors. He gained much favor (see Von Rummel, Philipp d. Grossmäthige, etc. [Gießen, 1880], ii, 439). It is evident, therefore, that Sleidan was by that time an adherent of the evangelical faith; and he soon afterwards proved himself a determined opponent of the Church of Rome by publishing two tracts, addressed to the princes of the empire and the other to the emperor (Oraciones Duae [Argent, 1544, and in German, 1567]). He also left the service of king Francis, and established his home permanently at Strasbourg. In 1545 he published a Latin version of Philip Comines' history of Louis XI and of the duke Charles of Burgundy; and in the same year he was instructed by the Smalcald League "to write a complete history of the renewed religion." He therefore began his famous work De Statu Rellig. et Reipubl. Caroli Quinti Causae Commentarii. He also, in that year, accompanied the Protestant embassy to England, in order to negotiate a peace with France, and on his return in 1546 he married Jola von Neuhof, who bore him three daughters and lived with him in wedlock to her death, in 1555. In 1548 he published a Latin edition of Comines' Charles VIII, and in 1550 a Summa Docti. Platon, de Republica et Legibus (Argent.), and a Latin edition of De Seysel on the French State and the duty of kings. He published the Comines in 1553 in the capacity of representative of the city of Strasbourg, but was not received, and in 1552 he went to the camp of king Francis, near Saverne, for the purpose of inducing the king to modify his demands for the support of the army. In 1554 he visited the Con-
vent of Naumburg as the ambassador of Strasburg (Selig, Hist. d. Augs., Conf. i, 682; ii, 1085). The somewhat noted work De Quatuor Summis Imperiis Libri Tres (Argent, 1557) was probably written in the last year of the author's life. He died in 1556. Sleidan was characterized by frankness and a love for the truth. His style as an author was natural and easy, his Latin classical, his ideas clear, his movements logical and always a keen advocate of political freedom. His works are a valuable and authentic source of information about the history and culture of the time.

Sleipner, in Norse mythology, was the famous eight-footed horse of Odin. See Svaðilfari.

Sleipnisfrenadi, in Norse mythology, was a surname of Loke, who assumed the form of a mare and enticed the steed Svaðilfari away from his lord, afterwards giving birth to the eight-footed horse Sleipner (q.v.).

Slicer, Henry, D.D., a distinguished minister of the Methodist Episcopal Church, was born in Annapolis, Md., March 27, 1801. He joined the Church in Baltimore in his seventeenth year, and was licensed to preach in his twentieth year. He was received into the Baltimore Conference in 1822, and his appointments (from 1822 to 1874) may be thus classified: seven years on circuits; twenty years in stations; two years agent of the Metropolitan Church, Washington, D.C.; eight years chaplain of the Seamen's Union Bethel, Baltimore; and fifteen years as presiding elder. He was a member of eight General Conferences—namely, 1822, 1840, 1844, 1856, 1858, 1860, 1868, 1872. When the East Baltimore Conference was formed he became a member of it, and served until 1874. In that year he returned to the Baltimore Conference. He died April 23, 1874. Mr. Slicer was a man of vigorous intellect, self-reliant and indefatigable. His ministry is an instructive example of devotion to primitive Methodist usage, of sympathy with judicious changes, and of puncilious discharge of official duties. See Minutes of Annual Conferences, 1875, p. 16.

Slidrugannir, in Norse mythology, was a surname of the golden boar, Gullin Bursti, made by the dwarves.

Slidur, in Norse mythology, was one of the Ei- vogs, rivers which flow from the well Hoergelmir.

Slime is the constant rendering in the A. V. of the Heb. יָפִי, chnedr, the hinnom of the Arabs, translated ἄρσαλως by the Sept., and bitumen in the Vulg. That our translators understood by this word the substance now known as bitumen is evident from the following passages in Holland's Pliny (ed. 1834): "The very clanny slime Bitumen, which at certain times of the yere floteth and swimmeth upon the lake of Sodom, called Asphalities in Jury" (vii, 15; vol. i, p. 163). "The Bitumen whereof I speak is in some places in manner of a muddy slime; in others, very earth or mineral." The three instances in which it is mentioned in the Old Test. are abundantly illustrated by travellers and historians, ancient and modern. It is first spoken of as used for cement by the builders in the plain of Shih- nar, or Babylonia (Gen. xi. 3). The bitumen pits in the vain attempts to well them. His account fragment of Canaanitish history (xiv, 10); and the ark of papy- rus in which Moses was placed was made impervious to water by a coating of bitumen and pitch (Exod. ii. 3).

Herodotus (i, 179) tells us of the bitumen found at Is, a town of Babylonia, eight days' journey from Baby- lon. The word bitumen (Heb. בְּדָל, Bél, Gen. xvi. 11) were sent by Darius to collect asphaltum, salt, and oil at Ardere- ca, a place two hundred and ten stadia from Susa, in the district of Cissia. The town of Is was situated on a river or small stream of the same name which flowed into the Euphrates and carried down with it the lumps of bitumen which were used in the building of Babylon. It is probably the bitumen springs of Is which are described in Strabo (xvi, 748). Erastothe-nes, whom he quotes, says that the liquid bitumen, which is cold liquid, is sold in Babylonia, and dry in Babylonia. Of the latter there is a spring near the Euphrates, and when the river is flooded by the swelling of the snow the spring also is filled and overflows into the river. The masses of bitumen thus produced are fit for buildings which are made of baked brick. Diodorus Siculus gives an account of the admittance of bitumen in Babylonia. It proceeds from a spring, and is gathered by the people of the country, not only for building, but for dry, for fuel instead of wood. Ammianus Marcellinus (xxii, 6, 23) tells us that Babylon was built with bitumen by Semiramis (comp. Pliny, xxxv, 51; Berossus, noted by Josephus, Ant. x, 11, 1; Contr. Advers. i, 19; xiii, 17; Avi, vii, 1, 17, i, etc.). The town of Is, mentioned by Herodotus, is, without doubt, the modern Hit, on the west, or right, bank of the Euphrates, and four days' journey north- west, or rather west-north-west, of Bagdad (Sir R. Ker Porter, Fifty Years in Persia, ed. 1877). The principal bitumen pit at Hit, says Mr. Rich (Memoir on Asphal- yon, p. 63, ed. 1815), has two sources, and is divided by a wall in the centre, on one side of which the bitumen bubbles up, and on the other the oil of naphtha. Sir R. K. Porter (iii, 215) observed that "bitumen was chiefly confined to the Chaldean builders, to the founda- tions and lower parts of their edifices, for the purpose of preventing the ill effects of water." "With regard to the use of bitumen," he adds, "I saw no vestige of it whatever on any remnant of building on the higher ascenta, and therefore drier regions." This view is indirectly confirmed by Mr. Rich, who says that the te- mperature of the bitumen, and no proper kind of bitumen, was in their opinion of necessity. The use of bitumen appears to have been confined to the Babylonians, for at Nineveh, Mr. Layard observes (Ninev. and Bab. ii, 278), "Bitumen and reeds were not employed to cement the layers of bricks as at Babylon; although both materials are to be found in abundance in the immediate vicinity of the city. At Nimrud bitumen was found under a pavement (ibid. i, 29), and "the sculpture rested simply upon the platform of sun-dried bricks without any other substructure, a mere layer of bitumen about an inch thick having been placed under the plinth" (ibid. p. 208). In his description of the bitumen he says that by Arbs, Mr. Layard falls into the language of our translators ("Tongues of flame and jets of gas, driven from the burning pit, shot through the murky canopy. As the fire brightened, a thousand fantastic forms of light played amid the smoke. To break the cinder crust, and to bring fresh flame to the surface, the Arabs threw large stones into the spring. In an hour the bitumen was exhausted for the time, the dense smoke gradually died away, and the pale light of the moon again shone over the black slime pits" (ibid. p. 202). See BABYLON.

The bitumen of the Dead Sea is described by Strabo, Josephus, and Pliny. Strabo (xvi, 763) gives an account of the volcanic action by which the bottom of the sea was disturbed and the bitumen thrown to the surface. It was at first liquefied by the heat, and then changed into a thick, viscous substance by the cold water of the sea. The spray of which it was formed was deposited by the wind and the sea, and thus formed lumps (βάλαμη). These lumps are described by Josephus (War, iv, 8, 4) as of the size and shape of a head- less ox (comp. Pliny, vii, 13). The semi-liquid kind of bitumen is that which Pliny says is found in the Dead Sea, the earthy in Syria about Sidon. Liquid bitumen, which the Zeychian, the Babylonian, and the Apollonian, he adds, is known by the Greeks by the name of πίς-ασφαλτος (comp. Exod. ii, 3, Sept.).
He tells us, moreover, that it was used for cement, and that bronze vessels and statues and the heads of nails were covered with it (Pliny, xxxv, 51). The bitumen pits by the Dead Sea are described by the monk Brocardus (Deter. Terr. Synod. c. 7, in Ugolino, vi, 1044). The Arabs of the neighborhood have perpetuated the story of its formation as given by Strabo. "They say that it forms on the rocks in the depths of the sea, and by earthquakes or other submarine concussions is broken off in large masses and rises to the surface" (Thomson, Land and Book, i, 336). They told Burckhardt a similar tale. "The asphaltum, hammar, which is collected by the Arabs of the western shore is said to come from a mountain which blocks up the passage along the eastern Ghōr, and which is situated at about two hours south of Wady Mūjeh. The Arabs pretend that it oozes up from fissures in the cliff, and collects in large pieces on the rock below, where the mass gradually increases and hardens until it is rent sounder by the heat of the sun with a loud explosion, and, falling into the sea, is carried by the waves in considerable quantities to the opposite shores" (Trav. in Syria, p. 394). Dr. Thomson tells us that the Arabs still call these pits by the name bārēt Ṭāmmar, which strikingly resembles the Heb. be'erōth chendar of Gen. xiv, 10 (ut sug.). See Salt Sinks.

Strabo says that in Babylonia boats were made of wicker-work and then covered with bitumen to keep out the water (xvi, 743). In the same way the ark of rushes or papyrus in which Moses was placed was overlaid over with a mixture of bitumen and pitch or tar. Dr. Thomson remarks (p. 224): "This is doubly interesting, as it reveals the process by which they prepared the bitumen. The mineral, as found in this country, melts readily enough by itself; but then, when cold, it is as brittle as glass. It must be mixed with tar while melting, and in that way forms a hard, glossy wax perfectly impervious to water." We know from Strabo (xvi, 764) that the Egyptians used the bitumen of the Dead Sea in the process of embalming, and Pliny (vi, 85) mentions a spring of the same mineral at Corinth in Ethiopia. See BITUMEN.

Sling (쎄 않고 급: Sept. σφαῖρον; Vulg. Slinga), an implement which has in all ages been the favorite weapon of the shepherds of Syria (1 Sam. xvii, 40), and hence was adopted by the Israelite army as the most effective weapon for light-armed troops. The Benjamites were particularly expert in their use of it; even the left-handed could "sling stones at a hair and not miss." (Judg. xx, 16; comp. 1 Chron. xii, 2). According to the Targum of Jonathan and the Syriac, it was the weapon of the Cherethites and Pelethites. It was advantageously used in attacking and defending towns (2 Kings iii, 25; Josephus, War, iv, 1, 3), and in skirmishing (Bib. ii, 17, b). Other eastern nations availed themselves of it, as the Syrians (1 Macc. ix, 11), who also invented a kind of artificial sling (1 Macc. vi, 51), the Assyrians (Judg. ix, 7; Layard, Nin. and Bab. ii, 344), the Egyptians (Wilkinson, i, 337), and the Persians (Xenophon, Anab. iii, 3, 18). The construction of the weapon hardly needs description. It consisted of a couple of strings of sinew, or of some turgid substance, attached to a leather receptacle for the stone in the centre, which was termed the kaph ( Khá), i.e., pan (1 Sam. xxv, 29). The sling was swung once or twice round the head, and the stone was then discharged by letting go one of the strings. Sling-stones (שָׁפָאֹת נֶפֶשָׁה) were selected for their smoothness (1 Sam. xvii, 40), and were recognised as one of the ordinary munitions of war (2 Chron. xxxvi, 14). In action the stones were either carried in a bag round the neck (2 Sam. xvi, 40), or were kept up at the feet of the combatant (Layard, Nin. and Bab. ii, 344). The violence with which the stone was projected supplied a vivid image of sudden and forcible removal (Jer. x, 18). The rapidity of the whirling motion of the sling round the head was emblematic of inquietude (1 Sam. xxx, 29, "the souls of thine enemies shall he whirl round in the midst of the pan of a sling"), while the sling-stones represented the enemies of God (Zech. ix, 15, "they shall tread under foot the sling-stones"). The term muryendeh (מִרְעָנָה) in Prov. xxvi, 8 is of doubtful meaning. Gesenius (Thesaur. p. 1263) explains of "a heap of stones," as in the margin of the A. V., the Sept.; Ewald and Hitzig, of "a sling," as in the text. The simple weapon with which David killed the giant Philistine was the natural attendant of a shepherd, whose duty it was to keep at a distance and drive off anything attempting to molest his flocks. The sling would be familiar to all shepherds and keepers of sheep, and, therefore, the bold metaphor of Abigail has a natural propriety in the mouth of the wife of a man whose possessions in flocks were so great as those of Nabai (1 Sam. xxv, 29).

Later in the manuscript, all the former part of the regular army (2 Kings iii, 25), though it would seem that the slings there mentioned must have been more ponderous than in earlier times, and that those which could break down the fortifications of so strong a place as Kir-hareseth must have been more like the engines which King Uzziah contrived to "shoot great stones" (2 Chron. xxvi, 15). In ver. 14 of the same chapter we find an allusion (concealed in the A. V. by two interpolated words) to stones specially adapted for slings, "Uzziah prepared throughout all the host shields and spears . . . bows and sling-stones."

Shepherd life in Syria and Arabia affords peculiar facilities for the cultivation and acquirement of this art; and Burckhardt notes of the modern Bedawin that "the shepherds who tend flocks at a distance from the camp are armed with short lances, and also with slings, which they use very dexterously in throwing stones as large as a man's fist." (Notes on the Bed. i, 57). Thomson speaks of the extraordinary skill of the Iads of Haibeyha with this weapon (Land and Book, i, 372). In various other countries the use of the sling was much practiced in ancient times; the inhabitants of the Haleares (Majorca and Minorca) were particularly distinguished for it. See AXON.

Sith, in Norse mythology, was one of the thirty-seven rivers of Hell, which rise in the well Hoergelmer, and flow around Niflheim.
Sloane Codex (Heb.). This codex, formerly known as Kenn. 126, is now designated as Sloane 4708. It originally belonged to the Cost of Amsterdam, and is now in the library of the British Museum. It contains the later prophetic. It has no Masoretic notes; but the Keri, vowels, and accents have been added by a later hand. According to Heidenheim, this codex was written between the 6th and 8th centuries; but Strack says, "Hannan codex esse antiquum libertatis concedimus, minime vero plus uncedim secula eum habere demonstratum est, cum sola literarum figura de librorum Hebraicorum atate accurata concluti nequeat.

Whatever may be the age, the Sloane codex contains a great many various readings as well as omissions. Thus, e.g., we notice:

Isaias 1, 30, V. D. H. זבל.
ii. 6, V. D. H. רְבּוּר.
iii. 18, V. D. H. דְּרֵךְ.
iv. 3, V. D. H. אָרָב.
v. 4, V. D. H. רְבּוּר.
vi. 5, V. D. H. וּמִקְבָּח.
vii. 14, וַיְבָא omit.
viii. 11, וַיְרָא omit.
ix. 10, וְכִבָּשׁ omit.
x. 9, וְכִבָּשׁ omit.
xi. 18, וְךִבָּשׁ omit.
xii. 11, וַיְבָא and וַיְרָא omit.
xiii. 2, בָּא וּמִקְבָּח omit.
xiv. 7, וַיְרָא omit.
xv. 11, וְצִבָּה omit.
xvi. 7, ובו, V. D. H. אֶל.
xvii. 15, בִּל omit.
xviii. 16, בִּל omit.
xix. 10, וָעָרָב omit.
xix. 19, וָעָרָב omit.
xiv. 8, וָעָרָב omit.
xv. 8, וָעָרָב omit.

These readings we have taken from Heidenheim's Deutsche Vierteljahrschrift für englisch-theologische Forschung und Kritik, where in i, 268–274, 398–405, 553–562; ii, 73–79, the variations and omissions of this codex are noted down. See also Strack, Prolegomena Critica, Lipsia, 1873, p. 47. (B. F.)

Sloas, James Long, a Presbyterian minister, was born in the parish of Bellaghy, County of Derry, Ireland, March 13, 1781. He enjoyed good opportunities for early education in his native country, emigrated to the United States with his father's family in 1804, and settled in Lexington, Va. He was apprenticed to the printer's trade for seven years; after this he pursued his studies under private instruction, at the same time teaching as an assistant, and completed his preparatory course for the ministry under the care of Rev. Dr. Moses Wad- del, of Willington, S. C. He was licensed by the Presbytery of South Carolina Nov. 18, 1817; the next day received a commission as a missionary through portions of Georgia and the newly formed settlements of the then Alabama Territory, and ordained Oct. 3, 1818. Subsequently he became pastor of the following charges: The Church at St. Stephens, Clarke Co., Ala., for three years; the three churches of Selma, Pleasant Valley, and Cahawba, three years; at Somerville, Morgan Co., six years; at Florence, Lauderdale Co., eleven years, where he died, Aug. 3, 1941. Mr. Sloas was a man of fine intellectual abilities—every exercise of his mind evincing a clear, logical, and discriminating judgment. As a pastor he had few, if any, equals, being always intensely devoted to the spiritual interests of his people. See Sprague, Annals of the Amer. Pulpit, iv, 581. (J. L. S.)

Slovanian Version. Slovenian is a South-Slavic dialect, spoken in parts of Styria, and in Carinthia, Carniola, Croatia, etc. In all the southern provinces of the present empire of Austria, the doctrines of the Reformaion made rapid progress in the beginning of the 16th century. In 1599, according to a letter written by a Romish bishop to pope Paul V, only one fifth of the population of the capital city of Linzbar was left to the Romish Church, and that small portion consisted mainly of the poor and ignorant. In 1572 primus Truber, once a Romish priest, afterwards a minister of the Gospel, completed the first translation of the New Test. into the Slovenian, which was published in 1577. In 1584 Truber's successor, George Dalmatin, published at Vitenberg the first entire Slovenian Bible, based on Luther's translation. In 1628 the emperess of Austria peremptorily ordered "all non-Catholick gentlemen and farmers, and all nobles (male and female)" to leave the realm within the space of one year. This was the end of the Reformation in those parts, and Rome succeeded in putting out the light of the glorious Gospel. The Slovenian language, never fully developed, but since then greatly neglected, has of late years revived in a remarkable degree. One sign of this revival appears in the translation into this dialect of the gospels of Matthew and Mark, which were printed in 1869. The Roman Catholic priests, who for the last two hundred years have had things all their own way, did certainly not look with a kindly eye on this small book; but the success which attended the circulation of these two gospels encouraged the committee of the British and Foreign Bible Society to go on, and subsequently, in 1871, the remaining gospels and the Acts of the Apostles, forming together the first volume of the New Test., were added. As to the translation itself, and its effect, the sixty-seventh Annual Report (1871) of the British and Foreign Bible Society states: "It would be idle to set up a plea for perfection in a first translation; but the fruits of honest and competent criticism will be available for improvement in subsequent editions, which, it is hoped, may be speedily in demand. The appearance of this work has produced some alarm, and it is regarded as an uncomfortable sign that, after the Bible had been successfully suppressed for ages, it should again emerge in the 19th century clothed in the vernacular of the Slovenian race." But the consternation thus produced seems to be without any effect upon the arduous task of kindling this lamp of life; for not only is the New Test. almost complete, but the Psalms also are in preparation. That there is a great demand for this translation may be seen from the fact that from the publication of the parts of the New Test. up to March 30, 1878, 23,500 copies had been disposed of. For this version comp., the Annual Report of the British and Foreign Bible Society since 1869. (B. P.)

Slovice is in Isa. xix, 10 the improper rendering of the A. V. for סֶבָּה, seker, hire ("reward," in Prov. xi, 18).

Slyuter, Richard, a minister of the Reformed (Dutch) Church, born at Nassau, N.Y., 1877. He graduated at the New Brunswick Theological Seminary in 1815, and became pastor at Claverack, Columbia Co., N. Y., from which place he removed to New York. He served also, in connection with his Claverack Church, one or two neighboring churches for some years. He was eminent as an apostolic spirit, and for the numerous remarkable revivals that blessed his labors. In some of these the converts were numbered by hundreds. He wore himself out in the work. His memory, as a man of God, is still fresh in the hearts of the people of all that region, which
was spiritually transformed by his labors." He had "a fine and even martial appearance, great conversational powers, energy, hopefulness, courage, simplicity, and generosity. He was an unusually excellent singer. He was incessantly visiting his people and talking about their souls. He was active, self-denying, in the establishment of new churches, in whole or part formed out of his own. His death-bed was a scene of great spiritual beauty and powerful influence. His successor was prepared by Rev. B. O. Currie, D.D. See Corwin, Manual, p. 309. (W. J. R. T.)

**Smallbrook, Richard,** an English prelate, was born at Birmingham in 1672, and graduated from Magdalen College, Oxford, in 1694. He took his degree of Bachelor of Divinity in 1706 and of Doctor of Divinity in 1708. He was chaplain to archbishop Tenison, treasurer of Llandaff in 1712, and afterwards prebendary of Hereford. He was consecrated bishop of St. David's Feb. 2, 1733; whence he was translated to the see of Lichfield and Coventry Feb. 20, 1730. He died Dec. 22, 1749. He published *Inquiry into the Authority of the Primitive Complutianus Edition of the New Testament.* (Lond. 1724, 8vo.)—Reefections on Mr. Whiston's Conduct.—And Antimissions on the New Arsian Repromed. His great work was *A Vindication of our Saviour's Miracles* (ibid. 1728, 8vo.)—also *Sermons and Charges* (ibid. 1706-32). See Allibone, *Dict. of Brit. and Amer. Authors,* s. v.; Darlinc, *Cyclop. Bibliog.* s. v.; Lardner, *Works; London Gent. Mag. LXXV.* Nichol, *Lit. Anecd.*; Shaw, *Staffordshire; Chalmers, Biog. Dict.* s. v.

**Smalcald, League of.** See *Smalkald, League on.*

**Small, Arthur M.,** a Presbyterian minister, was born in Charleston, S. C. He was converted in early life, and, after an academical training in his native city, he graduated at Oglethorpe University, Milledgeville, Ga.; studied theology in the Columbia Seminary, S. C.; was licensed by Charleston Presbytery in 1854, and ordained by Harmony Presbytery in 1857. He preached for some time at Liberty Hill, S. C., then two years at Tuskegee, Ala., and finally at Selma, in the bounds of South Alabama Presbytery. During one of the raids made by portions of the United States army in the suppression of the rebellion, the town of Selma was attacked, and, with others, Mr. Small rallied to its defence, and was in the front line of the fighting. In 1865, Mr. Small's talents were of a high order. As a preacher of the Gospel, he was universally and greatly admired, always aiming to present its plain, simple truths with great distinctness. See Wilson, *Preb. Hist. Almanac,* 1866, p. 362. (J. L. S.)

**Small, Samuel M.,** a minister of the Methodist Episcopal Church, was born a slave in Maryland about 1803. He was converted when twenty-six, and in 1836 was taken to New Orleans, where, in 1850, he was licensed to preach by the Rev. (now bishop) N. H. M'Tyeire, of the Methodist Episcopal Church, South. During the war he was removed to Alabama, but returned to New Orleans when peace was restored. He was sent by the Rev. J. F. Newman a missionary among the freedmen, and upon the organization of the Louisiana Conference in 1865 was admitted on trial. In 1871 he was granted a supernumerary relation, and settled in East Feliciana Parish, where he died, Oct. 12, 1873. See *Minutes of Annual Conferences, 1873,* p. 16; *Simpson, Cyclop. of Methodism,* s. v.

**Smalley, Elam D.,** a Presbyterian divine, was born in Burdick, Minn., Oct. 27, 1827. He graduated at Brown University, Providence, R. I., studied theology privately, was licensed by the Methodist Episcopal Conference of Massachusetts, and ordained, June 17, 1829, as colleague with the Rev. Dr. Emmons, over the Church at Franklin. In 1838 he became pastor of Union Church, Worcester, Mass., and in 1845 of the Second Presbyterian Church, Troy, N. Y., as successor of the Rev. Charles Walsworth. He died July 30, 1858. Dr. Smalley was a man of decided piety and ability, and was the author of *The Worcester Pulpit, with Notices Historical and Biographical* (Boston, 12mo). See Wilson, *Preb. Hist. Almanac,* 1860, p. 78; Allibone, *Dict. of Brit. and Amer. Authors,* s. v. (J. L. S.)

**Smalley, Henry,** a Baptist preacher, was born in Pisgahville, N. J., Oct. 25, 1755, and was admitted by baptism to the communion of the Baptist Church there when about sixteen years old. He was educated first at Queen's College, New Brunswick, and then at Princeton, where he graduated in 1786. He was licensed to preach in 1785, and in 1790 he began to preach for the Cohase Baptist Church, Cumberland Co., N. J., and on Nov. 8 of the same year was ordained its pastor. In this charge he continued forty-nine years, until removed by death, Feb. 11, 1839. See Sprague, *Annals of the Amer. Pulpit,* vi, 281.

**Smalley, John D.D.,** a Congregational minister, was born in Lebanon, Conn., June 4, 1734; graduated at Yale College in 1756; studied theology under the Rev. Joseph Hellamy; was ordained pastor of the First Congregational Church in Litchfield, Conn., April 29, 1758, and died in his church June 1, 1820. He was a distinguished theologian, and a faithful and successful preacher. He published, *Sermons on Natural and Moral Inability* (1769);—*Eternal Salutation not a Just Debt* (1785), against John Murray;—*Concio ad Clerum: At the Election* (1809);—*Sermons on Connection Questions* (1803);—*Sermons* (1814). See *Sprague, Annals of the Amer. Pulpit,* i, 559.

**Smalridge, George,** a learned English prelate, was born in Lichfield, Staffordshire, in 1663. He was sent to Westminster School in 1678 by Ashmole, the celebrated antiquary. In May, 1682, he was elected to Christ Church, Oxford, where, having taken his degree of B.A., he became tutor. In July, 1688, he entered holy orders, and in 1702 was appointed to the living of Tothill Fields Chapel. In 1693 he was collated to a prebend in the cathedral of Lichfield. He was chosen lecturer of St. Dunstan's in the West, London, in 1708, which he resigned in 1711, when he was made one of the canons of Christ Church, and succeeded Atterbury in the deanery of Carlisle, as he did likewise in the deanery of Christ Church in 1718. In 1714 he was consecrated bishop of Bristol, and queen Anne soon after appointed him her lord-almoner, in which capacity he for some time served her successor, George I. Refusing to sign the declaration which the archbishop of Canterbury and the bishops framed in aid of the Queen and up against the rebellion in 1716, he was removed from that place. He soon regained the favor of the princess of Wales, afterwards queen Caroline, who was his patron until his death, in 1719. He published, *Animadversions on the Eight Theses,* etc., in 1687, having for its full title *Church Government, Part V, a Relation of the English Reformation,* etc.:—*Action Dunstanii (1689, 4to):*— Twelve *Sermons* (1717, 8vo). Also Sixty *Sermons* published by his widow (1726 fol.; 2d ed. 1727; new ed. Oxfo, 1832, 2 vols. 8vo). See *Allibone, Dict. of Brit. and Amer. Authors,* s. v.; Darlington, *Cyclop. Bibliog.* s. v.; Chalmers, *Biog. Dict.* s. v.

**Smaltz, John H.,** a Presbyterian minister, was born in Philadelphia, Pa., Feb. 17, 1783. He enjoyed the advantages of an early religious training; graduated at Rutgers College, New Brunswick, N. J.; studied theology in the seminary in that place; was licensed by the Classis of New Brunswick, May 27, 1819; entered upon his work as a missionary in New Jersey; and for three years performed the toilsome duties of his calling. In 1822 he connected himself with the Presbyterian Church; was ordained by the Philadelphia Second Presbytery over the Third Presbyterian Church, Baltimore, Md., and subsequently was settled in Germantown, Pa.; Frederick City, Md.; Trenton, N. J., and Harrisburg. Pa. He died July 30, 1861. Mr. Smaltz was
SMARA

a plain, practical preacher, and conscientious in the dis-
charge of all his duties. See Wilson, Prefab. Hist. Al-
mame, 1862, p. 118. (J. L. S.)

Smara, in Hindii mythology, is a surname of the
love-god, Kamadeva. See Kama.

Smaragdus, the name of several monkish writers in the
Middle Ages.

1. An abbot of the Convent of St. Michael, in the
diocese of Verdun, who was one of the most learned of
Frankish theologians in the 12th century. He is known
for his work on the doctrine of the Trinity. His work is
particularly notable for its careful examination of the
textual evidence and its attempt to reconcile the di
ferent interpretations of the doctrine.

2. A friend and pupil of Benedict of Aniane, whose
name was Ardo. Having witnessed the death of Benedicet, he was appointed to write his biography (see the
work, Vita S. Benedicti Amphianensis, in Mabillon,
Annali, iv, 271 sq., and Migne, p. 354 sq.). Smaragdus
died in 1046, aged sixty-nine.

3. The abbot of a monastery at Luneburg, Sax-
one, which was founded in 972 by the duke Hermann
Billing, so that he could not belong to a period ear-
lier than about A.D. 1000. Nothing is known with
regard to his literary work, but he is known for his
work on the doctrine of the Trinity. His work is
particularly notable for its careful examination of the
textual evidence and its attempt to reconcile the di
ferent interpretations of the doctrine.

ordained by the Miami Presbytery in 1839, and his first
and only charge was Massey’s Creek, O. Here he la-
bored with true apostolic zeal and earnestness, and died
Feb. 28, 1861. Mr. Smart was a man of vigorous mind
and noble heart. He was for many years stated clerk
of the Xerox Presbytery. See Wilson, Prefab. Hist. Al-
mame, 1862, 239.

Smart, John G., D.D., a Presbyterian divine, was
born in Huntingdon, Pa., in 1826, studied theology pri-
vately, was licensed by the Associate Presbytery of
Philadelphia, Aug. 17, 1826, and ordained pastor of the
Associate Church in Johnstown, N. Y., Nov. 5, 1829,
where he continued to labor until 1857, when he re-
moved to Pittsburgh, Pa., and in 1858 was installed pas-
tor of the Church in that city. This relation was dis-
solved in 1856, and he removed to Cambridge, N. Y.,
where he continued without a charge, but was engaged in
preaching almost constantly in the many vacancies
which occurred in the Presbytery of Cambridge, to
which he belonged. He died July 16, 1862. Dr. Smart
was a man of very superior mental power. He was
well skilled in the languages, particularly the Latin,
and while a student of theology edited the Orationes de
Ciceron pro Tower & Hogan, publishers in Philadel-
phia. His distinguishing characteristic was his ac-
quaintance with the vast treasures of Church history.
He has also been an ecclesiastical disciplinarian that he
was chosen by the General Assembly of the United
Presbyterian Church as chairman of the committee to
draft a book of discipline. See Wilson, Prefab. Hist. Al-
mame, 1863, p. 383; The Evangelical Repository, s. v.;
Allibone, Dict. of Brit. and Amer. Auth. s. v. (J. L. S.)

Śmectymnus, an answer to bishop Hall’s re-
monstrance to Parliament against the Church of Eng-
rance of Divine Rigours. The name of the treatise
is fictitious, made up of the initial letters of the authors
viz. Stephen Marshal, Edward Calamy, Thomas Young,
Matthew Newcomen, and William Spurstone. When
the bishop replied to their book, these divines published
a vindication of their answer to the Humble Remon-
strance. This being an appeal to the legislature on both
sides, may be supposed to contain the merits of the
controversy. The debate was upon these two
heals—(1) of the antiquity of liturgies, or forms of
prayer; (2) of the apostolical institution of diocesan
episcopacy.

Smell (בּעם in בּעם, fragrance; מַעַך, stench),
Jacob said to his sons, after the slaughter of the She-
chemites (Gen. xxxvii. 40), “Ye have troubled me, to
make me to stir among the inhabitants of the land”—
Ye have given me an ill scent, or smell, among this people.
The Israelites, in a similar manner, complained to Moses
and Aaron (Exod. xxi, 21), “The Lord look upon you,
and judge, because you have made our savour to be
abhorred in the eyes of Pharaoh and in the eyes of his
servants.” This manner of speaking occurs frequently
in the Hebrew. In a contrary sense, Paul says (Rom.
li, 15, 16), “We are unto God a sweet savour of Christ in
them that are saved and in them that perish: to the one
we are the savour of death unto death, and to the other
the savour of life unto life.” In the sacrifices of the
old law, the smell of the burnt-offerings is represented in
the offering with the rite of sprinkling (Gen. vii. 21), “And
thou shalt burn the whole ram upon the altar: it is a
burnt-offering unto the Lord; it is a sweet savour,
offering made by fire unto the Lord.” The same
thing, by analogy, is said of prayer (Ps. cxli, 2), “Let
my prayer be set forth before thee as incense, and
the sweet incense upon the prayer offering.” So Job
allusion to this service of the old Testament, represents the
twenty-four elders with “golden vials full of odors, which are the prayers of the saints” (Rev. v. 8).

Smermitza, in Slavic mythology, was an appari-

SMERNITZA
tion whose coming always occasioned the decease of persons who were sick. The phantom was invisible to others, and neighbors might observe it skulking about and finally entering the house of the victim, whose fate was then inevitable. The spasmodic twitchings and the throat-rattle of the last hour were evidences of the force which Smerminiza employed to separate the soul from the body.

Smet, Hans von der Ketten, son of the Dutch illuminarian of the same name, was born in Nimwegen about 1630, and was pastor at Alkmaar until 1634, when he received a call to Amsterdam, where he died May 23, 1710, leaving several religious works.

Smet, Peter John de, a Roman Catholic missionary, was born in Dendermonde, Belgium, Dec. 31, 1801. He came to the United States in August, 1821; entered the Jesuit novitiate at Whitefram, Md.; went to Missouri in 1825, and aided in founding the University of St. Louis, in which he labored until 1838. He was then sent to found a mission among the Pottawatomies, afterwards laboring among the Flatheades and the Blackfeet. Taking a general superintendency of these missions, he travelled to collect money for them. He died in the course of his dying themselves, but neighbors might LETTERS, SKETCHES, AND RESIDENCE IN THE ROCKY MOUNTAINS (Phil. 1843, 12mo):--OCEAN MISIONS AND TRAVELS OVER THE ROCKY MOUNTAINS (N. Y. 1847):--WESTERN MISSIONS AND MISSIONARIES (1863, 12mo):--REISEN IN DEN FELSENAGE, etc. (St. Louis, 1863). See Appleton's cyclopaedia; Allibone, Dict. of Brit. and Amer. Authors, v. v.

Smeton, Thomas, a learned Scotch divine and educator, was born in Gask, near Perth, in 1538. He was educated at the University of St. Andrew's, and afterwards studied in Paris. He went to Rome, and entered the Society of Jesus; but, going to Geneva, he was confirmed in his intention of leaving the Church of Rome. From Geneva he went to Paris, where he narrowly escaped the massacre. Arriving in London, he publicly renounced papery, and settled at Colchester, Essex, as a schoolmaster. In 1578 he returned to Scotland, joined Knox and the other Reformers, was appointed minister of Paisley and member of the General Assembly which met at Edinburgh the same year, and was chosen moderator in the Assembly of 1579. He was soon after ejected from the College of St. Salvator, and died in 1583. His only publication is entitled Responsio ad Hamiltonii Dialogum (Edinb. 1579, 8vo), a defense of the Presbyterians, to which is added Extimis Viri Joannis Knoxii, Nostri Ecclesiae Justissimorum, etc. See Allibone, Dict. of Brit. and Amer. Authors, v. v.; Chalmers, Biog. Dict. of Brit. and Amer. Authors. v. v.

Smiglewa, Martin, a learned Jew, was born in Poland in 1582. He entered the Society of Jesuits in Rome in 1581, and after making great progress in his studies was sent back to Poland, and taught philosophy at Wilna for four years and divinity for ten. He became rector of several colleges and superior of the convent at Cracow. He died July 26, 1618. He published many works in the Hebrew, Latin, and Polish languages, but his principal work is his Logic (Ingolst. 1618, 2 vols. 4to).

Smik, in Lettish mythology, was a god of the Lithuanians, to whom they dedicated the first farrow turned up by the plough, and whatever should grow on it. To cross such a farrow was regarded as an insult to the god.

Smilax, a young girl in Grecian mythology who tenderly loved Crousus. As their love was hopeless, the gods changed them into flowers bearing their respective names.

Smintheus, in Grecian mythology, is a surname given to Apollo in the Troad, from the town of Sminthe. It is derived by some, from sminthos, a mouse.

Smite (στείρω, τείρω, etc.), to strike, is often used in Scripture for to kill. Thus David smote the Philistine, i.e. he killed Goliath. The Lord smote Nabaf and Uziah, i.e. he put them to death. To smite an army is to conquer it, to rout it entirely. To smite with the tongue is to load with injuries and reproaches, with scandalous reflections. To smite the thigh denotes indignation, trouble, astonishment (Jer. xxxix, 19).—Calmet.

Smith (σάρχω, charaché, a workman in stone, wood, or metal, like the Lat. faber, but sometimes more accurately defined by what follows, as ἀρχαῖος, a workman in iron, a smith: Sept. θείωσις, θείωσις σίδηρου, χαλκίας, τειριωμένη; Vulg. faber et faber fiantur—(1 Sam. xiii, 19; Isa. xlv, 12; liv, 16; 2 Kings xxiv, 14; Jer. xxiv, 1; xxix, 2). In 2 Chron. xxiv, 12 "workers in iron and brass" are mentioned. The first smith mentioned in Scripture is Tubal-cain, whom some writers, arguing from the similarity of the names, identify with Vulcan (Gerh. Vossius, De Orig. Idolol., i. 16). He is said to have been "an instructor of every artificer in brass and iron" (Gen. iv, 22), or, perhaps more properly, a whetstone, or the most skilled in every instrument of copper or iron. So Montanus, "aceretem omnipotens artificium aeris et ferri;" Sept. σφιγκρίσιος χαλκίας και σίδηρου; Vulg. fuit malleator et faber in cuncta opera aeris et ferri." Josephus says that he first of all invented the art of making brass (Ant. i, 2, 2). As the art of the smith was the first essential of civil progress, the mention of its founder was worthy of a place among the other fathers of inventions. So requisite was the trade of a smith in ancient warfare that conquerors removed these artisans from a vanquished nation, in order the more effectually to disable it. Thus the Philistines devoted the Hebrews of their prisoners (1 Sam. xix, 19; comp. Judg. v, 8). So Nebuchadnezzar, king of Babylon, treated them in later times (2 Kings xxiv, 14; Jer. xxiv, 1; xxix, 2). With these instances the commentators compare the stipulation of Porsenna with the Roman people after the expulsion of their kings: "Ne ferro, nia in agricultra, uturantur" (Pliny, Hist. Nat. xxxi, 14). Cyrus treated the Lydians in the same manner (Herodotus, i, 142). See Handicraft.

Smager, smith, occurs in 2 Kings xxiv, 14, 16; Sept. σφιχτή; Jer. xxiv, 1; xxix, 2; Vulg. clusero, or includor. Buxtorf gives "clausarius, faber ferrarius." The root "στείρι, to close, indicates artisans "with busy hammers closing rivets up," which suits the context better than other renderings, as setters of precious stones, seal-engravers, etc.

In the New Testament we meet with Demetrius, "the silversmith," at Ephesus, ἀργυροκόσμος, "a worker in silver;" Vulg. argentarius; but the commentators are not agreed whether he was a manufacturer of small silver models of the Temple of Diana, μακροχρυσος, or, at least, of the chapel which contained the famous statue of the goddess, to be sold to foreigners, or used in private devotion, or worked against the Christian pretenders, but his principal work is his (Acts. 19, 40. 41). That the word may signify a silversmith is clear from the Sept. rendering of Jer. vi, 29. From Plutarch (De Iside et Osiride, 301, 473, ed. Reisch, and Harsch) it appears that the word signifies any worker in silver or money. A coppersmith named Alexander is mentioned as an opponent of Paul (2 Tim. iv, 14).

Other Heb. terms substantially indicating the handicraft of a smith are: ἀρχαῖος, ἀρχαῖος, Vulg. mallearor, a hammerer (A. V. "instructor"); a term applied to Tubal-cain in Gen. iv, 22 (see Gesen. Theor., p. 530, 753; Saalschütz, Arch. Hebr., i, 145); and ἀρχαῖος, holēm, Sept. ἀρώτως, he that smites (A. V. "smoochethe") the anvil (σφέρα, σφέρα, iu) Isa. 7.
A description of a smith's workshop is given in Eclipses, xxxviii, 28. See Mechanic.

Smith, Albert, D.D., a Congregational minister and teacher, was born in Milton, Vt., Feb. 15, 1804. In 1826 he went to Hartford, Conn., and began a course of study preparatory to entering upon the profession of the law. He soon after experienced a change of heart, which also brought a change in his views of life, and led him to turn his attention to the ministry. He graduated at Middlebury College, Vt., in 1831; also at Andover Theological Seminary in 1835; and in 1836, having been licensed by Andover Congregational Association, he was ordained by the Congregational Council, and became pastor of the Congregational Church at Williamstown, Mass. He was called to the professorship of languages in Marshall College, Mercersburg, Pa., and in 1841 to the chair of rhetoric and oratory in his alma mater at Middlebury, Vt. In 1845 he returned to the ministry, and became pastor of the Church in Vernon, Conn., where he remained till 1854, when, compelled by disease, he was licensed to proceed and admitted on trial in the summer of 1855 he was employed in Duquoin, in the southern part of Illinois, in the service of the Home Missionary Society; and in the fall of that year he settled at Monticello, Ill., where he died, April 24, 1868. Dr. Smith was a man of uncommon intellectual power. He was an accurate, clear, and eloquent writer, an acute and profound theologian, and a wise, faithful, and affectionate pastor. See Wilson, Prob. Hist. Almanac, 1864, p. 321; Congregational Quarterly, 1865, p. 349. (J. L. S.)

Smith, A. B., a minister of the Methodist Episcopal Church, was born on Bell Creek, Fayette Co., West Va., June 13, 1829. He joined the Church in his thirteenth year, and was received into the West Virginia Conference in the spring of 1859, took a superannuated relation in 1862, but was ordained elder in 1863. He was made effective in 1868, but died in the spring of 1870. See Minutes of Annual Conferences, 1871, p. 40.

Smith, Alexander J., a minister of the Methodist Episcopal Church, was born in South Carolina in 1831. He united with the Church when nine years of age, and was licensed to preach and admitted on trial in the Mississippi Conference, Methodist Episcopal Church, South, in 1855. After being ordained elder, he was located at his own request. He was admitted into the Arkansas Conference of the Methodist Episcopal Church in 1869, and laboring faithfully until his death. See Minutes of Annual Conferences, 1857, p. 158.

Smith, Alexander L., a minister of the Methodist Episcopal Church, South, was born in Marlborough District, S. C., Dec. 5, 1826, and was received into the South Carolina Conference in 1847. He remained effective for twenty years, superannuatory one year, and superannuated for nearly four years. He died in Spartanburg, S. C., Aug. 29, 1872. See Minutes of Annual Conferences of M. E. Ch., South, 1872, p. 671.

Smith, Amos, a minister of the Methodist Episcopal Church, was born in Frederick County, Va., April 30, 1795, and professed conversion in 1811. He served as a soldier during the war of 1812, after which he studied in Asbury College, Baltimore. In 1820 he was admitted on trial into the Baltimore Conference, and thus commenced a life of usefulness, continuing, however, in 1826 was ordained deacon Sept. 29, 1822, and elder April 10, 1825. In 1839 he was appointed to the office of presiding elder, but was compelled to resign, on account of ill-health, in the winter of 1841-42. He became a member of the East Baltimore Conference upon its formation in 1857, and in 1863 was superannuated. He, however, continued to preach frequently. He died Jan. 20, 1868. See Minutes of Annual Conferences, 1868, p. 29.

Smith, Anson C., a minister of the Methodist Episcopal Church, was born in Bridgewater, N. H., Dec. 20, 1810, and made profession of religion in 1831. He entered the ministry in 1834 as local preacher, and was admitted into the New Hampshire Conference in 1835, receiving ordination as deacon in 1837, and as elder in 1839. His health failed in 1859, and he died April 25, 1862. See Minutes of Annual Conferences, 1863, p. 103.

Smith, Archer B., a Baptist minister, was born in Georgetown, S. C., and graduated at Brown University in the class of 1828, and pursued his theological studies at Newton. His ministerial life was spent at the South, chiefly in Virginia, where he was highly respected. He died at his residence at Auburn Mills, Hanover Co., Va., Dec. 5, 1877. (J. C. S.)

Smith, Archibald G., a minister of the Methodist Episcopal Church, was born in New York in 1818, and was admitted into full connection in the Rock River Conference in 1856. He sustained an effective relation for eleven years, and was superannuated four years. He died at Shell Bark, Butler Co., Ill., August 1870. See Minutes of Annual Conferences, 1870, p. 275.

Smith, Asa, a Methodist Episcopal minister, was received on trial in the Philadelphia Conference in 1860, and appointed to the Northumberland and Shamokin Circuit. He subsequently travelled Salem, Freehold, Gloucester, Bristol, Cecil, Chest, Bohemia, Kent, Dover, Queen Ann's, Lancaster, Northampton, Essex, Staten Island, Somerset, Snow Hill, Annamassett, Dorchester, Accomac, and Salisbury circuits, which terminated his active ministry. He died in April, 1847. Mr. Smith was abundant in labors, and was often denominated "a son of thunder." See Minutes of Annual Conferences, iv, 203.

Smith, Asa D., D.D., LL.D., a Presbyterian minister, was born in Amherst, Mass., Sept. 21, 1804. At the age of seventeen, while living at Windsor, Vt., he was called by Christ to a new life, and there he consecrated himself with all his heart and strength to the service of Christ. The vows he then took he most sacretely kept, nor ever turned aside from the one great purpose God had wrought in his soul. He very soon commenced a preparatory study for the work of the ministry, and entered Dartmouth College in 1826. Here the traits of character which distinguished him in after-life—industry, energy, fidelity, and singleness of purpose to the one great object of his early consecration—were made conspicuous. His remarkable power of extemporaneous speech drew to him the marked and admiring attention of the students. He ranked very high as a debater among the very first in his class; in some respects he had no superior. He was a decided Christian, and knew the secret, which so many fail to learn, of living a decidedly godly life at college. He never was more active, or accomplished more for the salvation of souls in his after-life, than during his college course of four years. After leaving college he taught an academy one year in Maine. During that year the school was blessed with a revival of religion. From Maine he went to the Theological Seminary at Andover. After completing the course he was ordained to the ministry, and settled as pastor over a church in New York city, in which charge he continued for thirty years. While in that city he was associated with its leading men in all the public, benevolent, and religious movements of the time. His prominent position in the literary and religious world brought many applications for him to leave the pulpit for services in colleges and seminaries, but he was regarded as being eminently fitted. From the retirement of Dr. Lord from the presidency of Dartmouth College, attention was directed to him as his successor. He received an unanimous call from the trustees of the college, which, after prayerful deliberation, he accepted. Dr. Smith entered upon his work in the highest spirit, with all the fire and energy of youth. Endowed with every talent which the highest mental culture could give, and freighted
with an experience rich in every department of literary, social, and religious life, and resolved to carry out the design of the founder of the college to impart a sanctified learning to all who should gain access to its halls. So thoroughly was he devoted to his great work that every moment was consecrated to the interests of the institution. He knew but one work, and every interest in which he took a part was made to contribute to the welfare of the college. In sympathy with his aims, as they were, acted over again, for, while his care extended to the temporal welfare of his flock, he was, if possible, more anxious about their salvation. He improved occasions to converse with them on the subject of religion, and prayed much for them, while he asked for them an interest in the church. He took a deep interest in the college, and took an interest in the affairs of the college, but in all things that pertained to the welfare of the community.

As a citizen he was public-spirited, always earnest for improvements, quite up to the means of securing them, always willing to bear his full share of labor or expense. No one in the community was more free, more generous in aid of every good cause, or more ready to contribute of his substance to those in need. By over-exertion his health became somewhat impaired and it was necessary for him to remain abroad during the winter and spring of 1870. With that exception he was rarely laid aside from labor during the thirteen years with the Turks. With the last days of the year, near the close of the fall term, he was suddenly stricken down by acute disease, and from that blow he never fully recovered, nor had sufficient strength to attend to his official duties. Following the advice of his physician and his own judgment, he trenched, early in the winter, his resignation of the presidency. It was accepted with reluctance on the part of the trustees, but only when they saw there was no hope of his final recovery. He was grateful to God for having permitted him to render so long a service, and, though he could have wished it protracted, yet he was resigned to the divine will. During the last few days he was extremely weak, and at the close, without pain, he gently fell asleep in Jesus to enjoy the 'rest that remains for the people of God,' Aug. 17, 1877. Dr. Asa D. Smith was author of the following: Letters to a Young Student:—Memor of Mrs. L. A. Leavitt:—Impressiveness of a Scripture Ministry:—Yale Discourses on the Life of John Charles Hall, D.D.: The Puritan Church’s Stewardship:—Beneficence Our Life Work:—Two Baccalaureate Discourses:—Obedience to Heaven’s Law:—Death Abolished:—Introduction to Pioneer American Missions in China:—with numerous articles in the American Theological Review and Biblical Repository. He was also appointed by the Dept. of Brit. and Amer. Authors, s. v. (W. P. S.)

Smith, Asaiah, M.D., a minister of the Congregational Church, was born in Manlius, N. Y., Feb. 16, 1817. From a very early age he was kept at school, studying, in addition to the ordinary branches, algebra, Latin, and Greek. In the spring of 1835 he entered the freshman class in Yale College. In 1835, during a revival, he was the subject of converting grace. Soon after his conversion he became interested in the subject of missions, and made his impressions known to Dr. Armstrong, one of the secretaries of the American Board. Immediately after graduation he went to Geneva, N. Y., where he pursued the study of medicine in the office of Prof. Spencer, attending six lectures a day. He engaged in Sunday-school work and was secretary of the village Tract Society. In 1839 he went to Philadelphia, where he spent three months, enjoying, under the special favor of Prof. Hodge, access to the Pennsylvania Hospital and also to the Pennsylvania and almshouse. In October he entered the Theological Seminary at New Haven. During the winter he kept up his medical as well as theological studies, and received from the medical school connected with the college the degree of M.D., Jan. 24, 1840. He also, day by day, attended the lectures of the law-school on Blackstone’s Commentaries. He was not he slightest mannering, but his application was such that he thoroughly mastered what he undertook. On Aug. 30, 1842, he was ordained at Manlius, and he embarked for Western Asia in November following, arriving at Smyrna after a voyage of fifty-three days. After residing at Brissa and Constantipol for a few months, he proceeded to Trebizond, where he entered into the mission, and during the most of his time in studying Turkish and practicing medicine. In 1844 he visited Smyrna, Rhodes, Cyprus, and Beirut, and made a tour in the interior to Aleppo, Orfa, Diarbekir, and Mosul. He was at Mosul when Botta was disentombing one of the palaces of Nineveh; he also traveled for a time with Mr. Layardi. At Mosul it was his sorrowful privilege to attend the dying couch of the excellent Dr. Grant. This year he made a trying and dangerous tour in the mountain Nestorian districts of Kurdistan, going, through much peril, as far north as Julamerk, returning to Mosul, and thence to Alexandria. In 1845 he traveled extensively after visiting Constantinople, including a visit to Trebizond and Erzerum, where he remained a year and a half. This year he was mobbed for affording protection to an Armenian priest who had fled to his house, but by his determined courage and perseverance the offenders were punished and damages were recovered from them. He was then called to Egypt, and he often went many miles out of his way to administer medicine for the cholera at different missionary stations. What was so widely known and extensively used in this country in 1849 as “Dwight’s Choler Mixture” was his own preparation. Once he was attacked with this disease in the wilderness, his only attendant forsaking him through fear; but after two days’ suffering he recovered sufficiently to proceed on his journey. At length, in 1848, he arrived at Aintab, seventy miles north of Aleppo, which he made his missionary home. It had a population of Armenian Christians amounting to 12,000, twice that of the Mohammedan residents—a field large enough to wear out the most untiring energy. He returned to America the same year, was married, and went back to his field. Everything he knew, he knew thoroughly; and everything he did, it was with all his might. As the author of valuable papers on meteorology, Syrian antiquities, and natural history, a member of the American Association for the advancement of Science, he at once took rank with the best scholars of his own land, thus confirming the declaration that “none have made richer contributions to the material of the naturalist and geographer than are being made by the missionaries of the Cross.” He lived and labored so that others might live, and; with his Lord in the trying hour. When death came, June 3, 1851, it found him prepared. In the midst of painful struggles which amounted almost to agony, he uttered, in Turkish, his last words— “Joy, joy! praise, praise!” (W. P. S.)

Smith, Bela, a Methodist Episcopal minister, was born in 1784, converted when about eighteen years of age, and admitted on trial by the New York Conference in 1809. He was ordained at the Annual Conference in 1818, and was ordained to the ministry in Canada; in 1811 admitted into full connection and appointed to Ulster Circuit. He was ordained, in 1812, elder, and appointed to Delaware Circuit; 1813, Newburg Circuit; 1814-15, New Windsor; 1816, Delaware; 1817, Schenectady; 1818, Albany; 1819, Pittsfield; 1820-21, Stratford. In 1829 he was taken sick, but with health, he took a superannuated relation, in which he continued to the termination of his life, July 2, 1848. He was a faithful and successful ambassador for Christ, and in all the relations of life he was highly valued and universally esteemed. See Minutes of Annual Conferences, iv, 229.

Smith, Benjamin A., a minister of the Methodist Episcopal Church, was born in Warren Co.
Ga., in 1813. He embraced religion in his seventeenth year and united with the Church. He was licensed to preach in 1848, and in 1849 was admitted into the Georgia Conference. His brief ministry was closed by death June 13, 1850. See Minutes of Annual Conferences of the M. E. Church, South, 1851, p. 304.

Smith, Benjamin Coleman, a Presbyterian minister, was born at Windsor, Vt., May, 1800. He was educated in the Bloomfield Academy, N.J.; graduated at the Theological Seminary at Auburn, N.Y.; and was licensed by Windsor Congregational Association, Vt., and ordained by the same in 1826. He was chaplain of the state-prison at Auburn for twelve years, agent for the Western Education Society for two years in 1848, 1849, and last and best charged pastor of the Presbyterian Church at Prattsburg, N.Y., by Bath Presbytery, which relation existed until 1859, when he was disabled by paralysis, and died Oct. 17, 1861. Mr. Smith was a good preacher, decidedly Calvinistic; an excellent pastor, a godly man. See Wilson, Proph. Hist. Almanac, 1863, p. 296. (J. L. S.)

Smith, Benjamin F., a minister of the Methodist Episcopal Church, South, was born in Hardin County, Tenn., Oct. 28, 1830. He was brought into the Church in 1848, and admitted into the Tennessee Conference in 1857. During the year 1862 he enlisted in the Confederate army and was killed at Jackson, Tenn., July 8, 1863. He was a man of sound judgment, deep piety, and a promising preacher. See Minutes of Annual Conferences of the M. E. Church, South, 1865, p. 545.

Smith, Caleb, a Presbyterian minister, was born in Brookhaven, L.I., Dec. 29, 1723. He received good preparatory training, graduated at Yale College in 1743, remained at college for some time as a resident graduate, gave instruction in the languages, and at the Elizabethan, N.J., and at the same time studied theology under the direction of the Rev. Jonathan Dickinson. He was licensed to preach in April, 1747, and was ordained and installed pastor of Newark Mountains (now Orange), N.J., Nov. 30, 1748. In 1750, shortly after his settlement in the ministry, he was appointed a trustee of the College of New Jersey and clerk of the board, and continued as such officer till the removal of the college to Princeton. After the death of president Edwards he was chosen president pro tempore, and for several months continued to discharge the duties of that important position with much dignity and ability. He was for many years stated clerk of the presbytery, and usually conducted its correspondence. He died Oct. 22, 1762. Mr. Smith ranked among the more popular preachers of his day. His only publication was a Sermon on the Death of Aaron Burr (1757). A Brief Account of his Life from his Diary, etc., was published at Woodbridge, N.J., in 1783. See Sprague, Annals of the Amer. Pulpit, iii, 146; Stearns, Hist. of First Church, Newark; Allibone, Dict. of Brit. and Amer. Authors, s. v. (J. L. S.)

Smith, Charles D.D., a Presbyterian minister, was born in Hopkinton, N.H., July 17, 1801. He was graduated at Union College in 1822. He became a teacher in Petersburg, Va., and in Therrell's, going from the latter place to mailbox, N.Y., where he taught six years. He was ordained by Oneida Presbytery at Utica, N.Y., in 1832, and was installed pastor of the Presbyterian Church at Manlius, N.Y. He remained in this charge four years, and then removed to Painsville, Ohio, where he was pastor eight years. He next took charge of the church at Kirkwood, Ohio. He continued three years. He then accepted a call to Tallmadge, Ohio, and was pastor of that church fourteen years. His next and last charge was Akron, Ohio, where he remained eleven years, after which he was without charge. Dr. Smith died at Akron, April 22, 1877. He published, Inv. and Test. (1821); God's Voice (1842); and The Questions of the Day (1844). He stood.—The Pulpit Theme (1854):—Eyes and No Eyes (1855):—Spiritualism, or the Bible a sufficient Witness (1856):—God's Call to the Nation (1861):—The Memory of Our Noble Dead (1864):—Christ in the Bible (1870):—Selling of Intoxicating Drinks Immoral (1872):—Roman and Greek Civilization: To Young Men (1872):—Value of a Good Man (1873):—Historical Discourse (1875):—An Adventure at Sea: and a several minor publications. (J. S.)

Smith, Charles A. D.D., a Presbyterian minister, was born in the city of New York in 1809. He received a classical education in the Hartwick Seminary, and subsequently passed through a theological course. His early labors were in the Lutheran Church, and at the age of twenty-one he was ordained and installed pastor of the Palatine Church on the 16th of March, 1833. After six years of service he was called to take charge of a new Church enterprise in Baltimore, Md. While there he was a contribut or to the Southern Observer, and in connection with Dr. J. G. Morris he prepared and published a Popular Exposition of the Gospel in four volumes. He was next called to the rural parish of Westport and Ethnebeck on the Hudson, where he remained nine years, during which he conducted successfully several controversies in behalf of evangelical religion in opposition to a dead formality. Many, through his faithful ministrations, were brought to a saving knowledge of the truth. After this, he received a call to the Christ Church, Easton, and after a few years of successful labor was called to St. Mark's Church, Philadelphia. He there accepted a call to the Western Presbyterian Church in that city. In this Church he remained seven years, doing effective service. From this charge he was called to the Presbyterian Church at East Orange, N.J. After a successful pastorate of five years, he resigned his charge and returned to Philadelphia, where one of his sons, Rev. Henry A. Smith, has for a long time been a poor of a flourishing Presbyterian Church (Northminster), and another son, E. C. Smith, has for twelve years proved his excellent qualities as an educator as principal of Rugby Academy. Dr. Smith died in Philadelphia, Feb. 15, 1879. He was, in the judgment of those who knew him best, a man of rare attainments. He was frank, ingenuous, unpretending, and manly. His writings were numerous, and his style, especially in translations from the German and in his descriptive works, was remarkably happy. Among these works, besides those already mentioned, were a translation of Krummacher's Parables; Illustrations of Faith; Men of the Old Time: Familiar Talks about the Five Senses; Among the Lilies: and last, perhaps best of all, Stonewall, made up of pastoral sketches and scenes from history. His contributions to the periodical press were numerous. See Allibone, Dict. of Brit. and Amer. Authors, s. v. (W. F. S.)

Smith, Charles Mouson, a minister of the Methodist Episcopal Church, South, was born June 29, 1841, and joined the Church when he was sixteen. He was licensed to preach in 1869, and the same year entered the Conference. In 1876 the absence of his senior pastor, a chaplain in the South ern army, he was overtaxed, and was taken with a violent hemorrhage of the lungs. From this he never recovered. He was made a superannuate in 1862, and died Oct. 9, 1883. See Minutes of Annual Conferences of the M. E. Church, South, 1869, p. 454.

Smith, Clark A., a Methodist Episcopal minister, was born at Selbyville, Washington Co., N.Y., Dec. 3, 1810; converted Sept. 14, 1828; licensed to exhort in 1830, and as local preacher in 1835; received on trial soon after, and travelled Lawrenceville, Loyalsock, Che mung, Towanda, Fairport, and Millmont circuits. He died Sept. 15, 1844. See Minutes of Annual Conferences, iii.

Smith, Cotton Mather, a Congregational minister, was born in Suffield, Conn., Oct. 26, 1751, and graduated at Yale College in 1751. He studied theol-
ogy under the direction of the Rev. T. Woodbridge, of Hatfield, but before his course was completed he took charge of a school among the Indians at Stockbridge. He resumed his theological studies at Hatfield, and was licensed to preach in 1753. He was installed pastor of the First Church, Sharon, Conn., Aug. 28, 1755. Mr. Smith served as chaplain in the campaign of general Schuyler in 1755. He preached his last sermon on his first Sunday in January, 1806, but lingered for several months, dying Nov. 27, 1806. He published single sermons (1776, 1771, 1793). "Mr. Smith was not only a polished gentleman, and a discreet and affectionate pastor, but a devout and earnest Christian, and an invigorating and animated preacher." See Sprague, Annals of the Methodist Episcopal Church, 1, 500.

Smith, Daniel, (1), a minister of the Methodist Episcopal Church, was born in Philadelphia in 1769. Although his early educational advantages were small, he had a great taste for knowledge, and acquired considerable stock of useful information. He was admitted into the travelling connection in 1789, and in 1790 was appointed to Boston with Jesse Lee. In 1791 he was admitted into full connexion by the conference. In 1794 Mr. Smith located, and continued in that relation till the close of his life. He settled in New York city, and engaged to some extent in secular business; but continued in the vigorous exercise of his ministry till the close of his life. He died Oct. 28, 1815. See Sprague, Annals of the Amer. Pulpit, vii, 172.

Smith, Daniel (2), a minister of the Methodist Episcopal Church, was born in Salisbury, Conn., Sept. 26, 1806. When nineteen years of age he was converted, and shortly after began to study at the Wilbraham Academy. In 1813 he was admitted on trial into the New York Conference. He labored on the Derby Circuit; at Sag Harbor; Winsted, Conn.; Forth Street, New York; Bridgeport, Reading, and Stratford, Conn.; Tenth Street, Philadelphia; and Third Street, New York; and at Kingston, N.Y. He was a delegate to the General Conference of 1844, and a reserve in 1845. He died June 23, 1852. He was a plain, practical, earnest preacher. See Minutes of Annual Conferences, 1853, p. 192.

Smith, Darius, a minister of the Methodist Episcopal Church, was born in Pittsford, N.Y., July 19, 1822, and was admitted to the Conference in 1847. He was licensed to preach in May, 1833, and in 1835 was received on trial by the Pittsburgh Conference. After laboring, with the exception of one year (superannuated), until 1874, he became superannuated, and died in Saybrook, O., May 12, 1875. He was at the time of his death a member of the Erie Conference. See Minutes of Annual Conferences, 1857, p. 139.

Smith, David, a Presbyterian minister, was born in Wilmington, Del., about the year 1772; graduated at Hampden Sidney College in 1791; studied theology privately; was licensed by Redstone Presbyterian Nov. 14, 1792; was ordained and installed by the same presbytery as pastor of the congregations of George's Creek and the Tent in Fayette Co., Pa., Aug. 29, 1794, and of the congregations of Behrebach and W. Welland Co., in 1798, where he remained until his death, Aug. 24, 1803. Mr. Smith was a well-read divine, and an earnest and faithful preacher. See Sprague, Annals of the Amer. Pulpit, iii, 290, note. (J. L. S.)

Smith, Eben, a Methodist Episcopal minister, was born in Lenox, Berkshire Co., Mass., July 18, 1774. His parents were religious persons, and members of the Baptist Church. He was converted at the age of thirteen years, was licensed to preach in 1801, began his itinerant labors in the Litchfield Circuit, Conn., in November, 1808, was admitted on trial in the New York Conference in 1804, and appointed to Litchfield Circuit. He continued to fill appointments until 1819, when he was made presiding elder of the Hudson River District. In 1823 he was appointed presiding elder of the Saratoga District; in 1829 without an appointment; six of the years between 1827 and 1840 he held an effective relation and received appointments; seven of these years he was a superannuated; and from 1840 until his death, May 18, 1844, he was superannuated. He was a man of great learning, zeal, diligence, and usefulness, and a great lover of Methodism. See Minutes of Annual Conferences, iii, 473; Bangs, Hist. of the E. M. Church, ii, 305; iii, 33. (J. L. S.)

Smith, Edward, an Irishpretate, was born in Lisburn, County of Antrim, in 1665, and was educated at the University of Dublin, of which he was elected a fellow in 1684. In 1689 he went for safety to England, and was recommended and appointed chaplain to the factories of the Smyrna Company at Constantinople and Smyrna. In 1693 he returned to England, and was made chaplain to William III, whom he attended four years in Flanders. He was promoted to the deanery of St. Patrick's, Dublin, in 1695, and advanced to the bishopric of Dover and Connor in 1699, being soon after admitted to the Privy Council. He died at Bath in October, 1729. In 1695 he was elected a member of the Royal Society of London, and contributed papers upon various subjects. He also printed four sermons. See Allibone, Dict. of Brit. and Amer. Authors, s. v.; Chalmers, Bibl. Hist. Lit. of Ireland.

Smith, Edward Parmelee, a Congregational minister, was born in South Britain, Conn., June 8, 1827. He graduated at Yale College in 1849, and went thereafter to Mobile, Ala., where he engaged in teaching, and continued in that occupation for three years, when he returned and entered the New Haven Theological Seminary. After remaining one year, he entered the Union Theological Seminary, which he completed in 1855, and went to Andover Theological Seminary, where he finished his somewhat erratic course. He was ordained and installed pastor of the Congregational Church in Pepperell, Mass., in 1856, and continued in this relation for six years, when he resigned and became field agent for the United States Christian Union, Philadelphia. In 1866 he became field agent for the American Missionary Association, and remained such until 1871, when he received the appointment from government of Indian agent in Minnesota. In 1873 he was appointed United States Commissioner of Indian Affairs. From the year last named he has been president of the Union of Iowa, and continued such until 1876, when he took a voyage to Africa. He died at Accra, Western Africa, June 15, 1876, after a laborious and useful life spent in the service of God and his country. (W. P. S.)

Smith, Eli, D.D., an eminent scholar and missionary, was born in Northfield, Conn., Sept. 13, 1801. He graduated at Yale College in 1821, and at Andover Theological Seminary in 1825. In May of the same year he embarked on his mission to the East, to take charge of the printing establishment of the American Board at Malta. In 1827 he went to Beirut to study Arabic, and in 1828 returned to his work at Malta. In 1829 he made a tour with Dr. Dwight through Greece, and in 1830—31, with Dr. Dwight, of Constantinople, through Armenia and Georgia to Persia, opening the way for the Nestorian mission at Urumiah. He returned to the United States in 1832, and embarked on his return to Syria in September, 1833. Mrs. Smith died at Smyrna, Sept. 30, 1836. Until 1841, with the exception of a second visit to the United States, he was actively engaged in missionary duty, and in the critical study of the Arabic language. Among other important services performed by him in this period was the production of a new and improved font of Arabic type, conforming to the calligraphy of a first-rate manuscript of the Koran, the types being made by Mr. Homan Hallcock, the ingenious printer for the mission, from models prepared by Dr. Smith. The
first font was cast by Tauchnitz, at Leipzig, under Dr. Smith’s superintendence, and others of different sizes have since been cut and cast by Mr. Hallock in the United States. He resumed his missionary work in Syria in the summer of 1841. In the autumn of 1846 he was appointed to the office of interpreter into the Arabic language. The importance of this work is seen in the fact that that language is spoken by more than sixty millions of the human family. After more than eight years of exhausting and incessant toil, he completed the New Test., the Pentateuch, the minor prophets from Hosea to Nahum, and the greater part of Isaiah. At this stage of the enterprise, he was called from the scene of his earthly labors to his heavenly reward. He died at Beirut on Sabbath, Jan. 11, 1867. Dr. Smith was a thorough scholar and a most laborious missionary. By his wise counsels and practical and comprehensive views he, independently of his labors as translator, rendered important service to the American Board, with the operations of which in the Levant he was identified for a quarter of a century. The value and completeness of Dr. E. Robinson’s Researches in Palestine are largely due to Dr. Smith’s co-operation. See Allibone, Dict. of Brit. and Amer. Authors, a. 417.

Smith, Eli Burnham, D.D., a distinguished minister of the Baptist denomination, was born in Shoreham, Vt., April 16, 1803, and was a graduate of Middlebury College in the class of 1828. He pursued his theological studies at Andover and Newton, Mass., where he was graduated in the class of 1826. He was ordained as pastor of the Baptist Church in Buffalo, N. Y., where he remained three years, and then was pastor at Poultney, Vt., for four years. He was elected president of the New Hampton Literary and Theological Institution (now Fairfax Institution) in 1833. Here he remained for nearly twenty-eight years—1833-51. In this position he devoted himself with great zeal and self-denial to his work. He was a delegate to the following assemblies under his charge: a large number of ministers, who have done good service in the cause of Christ. President Smith died at Colchester, Vt., Jan. 5, 1861. (J. C. S.)

Smith, Elijah, a minister of the Methodist Episcopal Church, was born in Newport, N. Y., Sept. 4, 1797. He united with the Church in 1829, and in 1832 was admitted on trial into the Oneida Conference. His effective ministry closed in 1855. He was a member of the Black River Conference at the time of his death, which occurred in Le Roy, N. Y., Sept. 30, 1870. See Minutes of Annual Conferences, 1871, p. 144.

Smith, Ethan, a Congregational minister, was born Dec. 19, 1765, in Belchertown, Mass. He learned the shoemaker’s trade, and entered the army in 1780; but after remaining in that service he was converted and became a preacher. Having prepared for college, he entered Dartmouth, and graduated in 1790. He was ordained pastor at Haverhill, N. H., early in 1791, where he remained until 1799, when he settled in Hopkinton, which place he left in 1818 and became pastor of the Presbyterian Church in Herborn, N. Y. From the latter place he went to Poulney, Vt., and remained five years as pastor of the Congregational Church, when he went to Hanover, Mass., but left in short time, and was appointed city missionary in Boston. He died in Boylston, Mass., Aug. 29, 1849. He published, A Dissertation on the Prophecies (1809);—A Key to the Prophetic Language of the Prophecies (1814);—A View of the Trinity, Designed as an Answer to Necah Worchester’s Bible Notes (1824)—A View of the Hebrews, Designed to Prove, among other things, that the Aborigines of America are Descended from the Ten Tribes of Israel (1825);—Memoirs of Mrs. Abigail Bailey.—Four Lectures on the Subject and Mode of Baptism.—A Key to the Revelation (1833) and Archetypal to Lead to the Study of the Prophetic Scriptures (1839);—and a number of occasional Sermons. See Sprague, Annals of the Amer. Pulpit, ii, 296.

Smith, FieldeN M., a minister of the Methodist Episcopal Church, was born near Hodgenville, Hardin Co., Ky., June 16, 1838, but removed to Warren Co., Ill., with his father in 1840. He joined the Church Jan. 5, 1851, and was licensed to preach in the conference year 1853-54. He was received on trial by the Rock River Conference in September, 1854, and was ordained deacon at the charge of the Central Conference in 1856, and elder in 1858. He was superintended in 1862, but became effective in 1864, and so continued until his death, in Avon, Ill., Dec. 20, 1868. See Minutes of Annual Conferences, 1868, p. 265.

Smith, Francis, a Baptist minister, was born in Wakefield, Mass., July 12, 1812, and was a graduate of Brown University in the class of 1837, and of the New-York Theological Seminary in the class of 1840. He was ordained in Providence, R. I., as pastor of the Fourth Baptist Church, and remained there thirteen years—1841-54. He supplied the Baptist Church in Rutland, Vt., for some time, and then accepted an appointment as district secretary of the American Baptist Publication Society. Having returned to this position, he flourished for some time as missionary of the Rhode Island State Convention. He died in Providence, Jan. 29, 1872. (J. C. S.)

Smith, Friend W., a minister of the Methodist Episcopal Church, was born in Lenox, Bucks Co., Mass., Dec. 4, 1799. He entered the ministry in 1821, and continued to perform efficient service until the day before his semi-centennial conference, when he suddenly died, April 24, 1847. Mr. Smith was attractive and useful in his services, even to the last. See Minutes of Annual Conferences, 1871, p. 102.

Smith, Gad, a Methodist Episcopal minister, was born in Goshen, Litchfield Co., Conn., in 1788; converted in 1807; approved as an exhorter in 1810; licensed as a local preacher in 1811; received into the itinerancy on trial in June, 1812, and into full connection in 1814, and was stated at that time as pastor of the Church, Litchfield Circuit, 1812; New Haven, 1813-14; Hotchkissville, 1815. He died Sept. 24, 1817. He was a man of deep piety, good natural and acquired abilities, and sound and acceptable preaching talents. See Minutes of Annual Conferences, i, 309; Stevens, Hist. of the M. E. Church, iv, 394; Bums, Hist. of the M. E. Church, iii, 79.

Smith, Gad N., a Methodist Episcopal minister, was born in Sharon, Litchfield Co., Conn., Dec. 25, 1812; converted in his eighteenth year; received on trial in the New York Conference in June, 1836, and was appointed to Wethersfield Circuit. He subsequently preached in Litchfield in 1837-38; in Burlington Circuit in 1839-40; Norwich, Conn.; Cummington, Mass., in 1842; at Sullivan Street Church, New York, in 1843; at Seventh Street Church, New York, in 1845, where he died, Oct. 22 of the same year. Mr. Smith, as a man, was amiable, modest, and unassuming in manners. His preaching was solid and instructive. As a pastor he excelled, always faithful to the personal interests of every one of his flock. See Minutes of Annual Conferences, iv, 30.

Smith, George (1), a minister of the Methodist Episcopal Church, South, was born in Litchfield, Conn., in 1801. Of Presbyterian parentage, he, nevertheless, joined the Methodist Episcopal Church in Chenango County, N. Y., in November, 1817. He joined the Pittsburgh Conference in 1821, and was ordained deacon in 1834 and elder in 1836. He afterwards went West and joined the Missouri Conference. He died Sept. 1, 1872. See Minutes of Annual Conferences of the M. E. Church, South, 1872, p. 737.

Smith, George (2), a minister of the Methodist Episcopal Church, was born in Hampshire Co., Va., in 1810, but was removed in early life to Ohio. In 1830 he was licensed as a local preacher in the Ohio Conference, but in 1833. He was ordained deacon in 1835 and elder in 1836, at the first session of the Detroit Con-
S
defence. He served the Church thirty-five years, twenty-
two as presiding elder, and died May 4, 1868. He was
a member of the General Conference of 1844. He was
a man of sound judgment, comprehensive views, and
courageous horse, and aumat a preacher. See
Minutes of Annual Conference, 1866, p. 175.

Smith, George R. W., a Methodist Episcopal
minister, was born in Lincoln Co., Ga., Aug. 8, 1820; 
converted in October, 1822; licensed to exhort in 1838,
and as local preacher in 1839. He was received on trial
in the Alabama Conference in January, 1840, and sent
to the Georgia Conference in March of the same year.
In 1842 he was received into full connection and sent
to Pensacola; in 1843, to Apalachicola, where he organ-
ized a Church and began the building of a house of
worship. He died April 16, 1843. See Minutes of An-
nual Conference, iii, 462.

Smith, George W., a minister of the Methodist
Episcopal Church, was born in Nelson, Madison Co.,
N.Y., in August, 1816, and was licensed to preach in
1854. In 1855 he entered the Oneida Conference; was
superannuated in 1858 and made effective in 1859; was
appointed in 1863 to the Oneida Indian Mission, and
labored efficiently until 1872, when he was granted a
superannuated relation, being at the time a member of the
Ohio Conference. See Minutes of Annual Conference.
He died March 12, 1873. See Minutes of Annual Confer-
cence, 1873, p. 130.

Smith, Giles Chapman, a minister of the Metho-
dist Episcopal Church, was born in Union District, S.C.,
July 3, 1805. When four years of age his parents
settled in Wayne Co., Ind. He studied one year in
Harper's Academy, Tenn., and graduated at Columbia
(now Jackson) University April 3, 1826. His conver-
sion took place while a student at college, and his ministry
was spent in the Indiana and afterwards in the South-eastern
Indiana Conference. In 1865 ill-health compelled him
to take a superannuated relation, and he made his home
in Brownstown, Ind., where he resided until his death,
April 12, 1870. He represented his conference in the
General Conference in 1864. His writings were pub-
lished in the periodicals of the day. See Minutes of
Annual Conference, 1870, p. 192.

Smith, Griffin, a minister of the Methodist Epis-
copal Church, was born in Upper Canada May 14, 1814.
Previous to his conversion he was a practicing physician,
but was admitted to the ministry by the Genesee Con-
ference in October, 1835. In 1866 he took a superan-
nuated relation and was sent to the Methodist Church of
Scottsville, Monroe Co., N.Y. Here he died April 29,
1868. See Minutes of Annual Conference, 1868, p. 273.

Smith, Harvey S., a minister of the Methodist
Episcopal Church, was born in Monkton, Vt., in 1820.
He was received on trial in the Troy Conference in 1843,
and labored faithfully wherever appointed. His work,
however, was short, for death overtook him at the early
age of thirty-five years. He died in Albany, April 30,
1855. Mr. Smith was deeply pious, an industrious stu-
dent and a devoted pastor. See Minutes of Annual Con-
ference, 1855, p. 589.

Smith, Henry (1), an English clergyman, was born in
Withcock, Leicestershire, in 1556, and after pursu-
ing his studies at Oxford entered the Church. His
scruples, however, as to subscriptions and ceremonies
were such that he resolved not to undertake a pastoral
charge, but accepted the office of lecturer of the Church
of St. Clement Danes, London. The circumstances of
his death are unknown; Fuller thinks that he died
about 1600, Wood in 1595. Granger says that "he was
called the Silver-tongued Preacher." His sermons and
treatises, published at various times about the close of
the 17th century, were collected in one volume, 4to, in
1675, with a life of the author by Fuller. See Allibone,
Dict. of Brit. and Amer. Authors, s. v.; Chalmers, Biog.
Dict., s. v.

Smith, Henry (2), a veteran minister of the Metho-
dist Episcopal Church, was born near Frederick City,
Md., April 23, 1769. He was admitted into the Church
as a seeker of religion in 1790, and soon after experienced
a change of heart. In August, 1798, he was licensed to
teach, and in the following October, was received on trial
into the Conference held in Baltimore. For about
ten years he labored in Western Virginia, Kentucky,
and the North-west, in the face of dangers, loss, and
extreme hardships. Mr. Smith was actively employed
in the work of a travelling preacher forty-two years.
In 1836 he took a superannuated relation, and settled in
Hockstown, Baltimore Co., Md., where he continued to
reside until his death, Dec. 7, 1862. Mr. Smith published
an autobiography, An Old Itinerant Preacher (New York,
12mo). See Minutes of Annual Conference, 1863, p. 17.

Smith, Henry Boynton, D.D., LL.D., an emi-
nent Presbyterian minister and educator, was born
in Portland, Me., Nov. 21, 1815. He graduated at Bowdoin
College in 1834, and remained as tutor in the same for
some time. He prosecuted his theological studies at
Bangor and at the Andover Theological Seminary.
Desiring to pursue them still further, he went to Halle and
Berlin, Germany. Here he developed his peculiarly
Germanic conception of the place of the study of scholastic
and critical accuracy, that patient and laborious
research of study, which marked him so strongly
even among the conspicuous American students of
that day. In 1842 he became pastor of the Congre-
gional Church at West Amesbury, Mass., which posi-
tion he held for a number of years. He enjoyed and
fostered friendly relations with the congregation.
Two years from the above time, he filled the chair of Hebrew in the
Andover Seminary in connection with his pastoral
duties. In 1847 he accepted the professorship of mental
and moral philosophy in Amherst College, whence, after
a service of three years, went, at the express solicit-
ation of Dr. Adams and the trustees and faculty, to the
Union Theological Seminary, New York city. He was
called originally to the professorship of Church history,
but it was subsequently exchanged for the chair of sys-
tematic theology in 1855, which he held until 1873, a
period of eighteen years, when, broken down by un-
remitting toil, he retired from the chair, but was still
retained in connection with the faculty as emeritus pro-
sessor of apologetics until his death, Feb. 7, 1877.
In speaking of himself he said, "My life has been given to
the seminary," and it may be added that it was
characterized by a lucid intensity. To strangers he
seemed distant, yet moments of genial company in
any sense of the word magnetic; yet though he did
not seem to draw, he never repelled. He took a deep
and abiding interest in the students, and held them
"with hooks of steel." He was punctual in his attend-
ance at church, being latterly a member of Dr. Prentiss's
Church of the Covenant, which he was principally
instrumental in organizing in 1862, where on Sabbath and
at the week-day prayer-meetings he was always found,
taking an active part when his health would permit.
His piety was of a pure, deep, and even kind. He en-
tered into the discussions of the higher judicatures of
the Church. In public he was��
home, and in the discussions relating to the contemplated
reunion of the New and Old School branches of the Church he took an active interest. As moderator of the
New-school General Assembly in 1864, his utterances
on Christian union were in the highest degree impressive,
and conducted greatly to bring about the happy result
which four years before was so successfully accomplished.
As a delegate to the General Assembly in 1867 his sound
sense as well as modesty was made apparent. On the
presentation of the plan of reunion there wanted but a
few lines to bind it stronger, and the two lines offered by
Prof. Smith and sent up to the Assembly of 1868 became
one of the foundations of the Bread of Life. Somewhat
the words were, "It being understood that this confession
is received in its proper—that is, historical—Calvinistic
or Reformed sense." Dr. Jessup, writing from Beirut
SMITH

820

SMITH

In 1877, thus speaks of a visit made by Prof. Smith to Syria a few years before: "As I write there rises a vision of one of the Lord's eminents saints who met on yonder heights of Lebanon, and are now walking the golden streets in the New Jerusalem. I refer to Simeon B. Calhoun and Henry B. Smith. When Profs. Smith, Park, and Hitchcock visited this land a few years ago, they came up to Abeith, on Mt. Lebanon, to meet Mr. Smith. Prof. Smith requested, and it was a rich treat to me to have a visit from my old teacher. At the time of my graduation in 1855, our class invited him to a social gathering one evening. He made a brief address, but so sententious that it seemed apostolic. He said, 'When I went to Germany, I passed through an intense struggle with rationalistic doubt and unbelief, and there I had the experience of a vision of Christ. Those two experiences have made me a Christian, a living, divine, and human Saviour—only one and the same who was driven away, and I never doubted more. This vision of Christ we all must have. No man can be a true and living Christian until he has had this vision of a living Christ.' The whole sentiment and substance of his theological lectures was permeated with this glorious conception of Christ. He seemed to lift up his pupils to the same high plane on which he himself stood. It brings heaven nearer to think that such men as Calhoun and Smith are actually there, for heaven seem to be to them while they are here."

In the April number, 1877, of the Princeton Review is an editorial by Dr. Atwater on Prof. Smith, who was his colleague in the conduct of the Review for a period of nine years. This noble tribute is followed by one from Dr. Sherwood. It contains a reminiscence of Prof. Smith's labors as an editor of the Review, and the largest contributor to its columns. It contains a list of the titles of all his contributions to the several Reviews with which he was connected and the date of their appearance, making five pages of the Review. The record will prove of special interest to many who may wish to read or re-read the always interesting, and often elaborate and powerful, productions of his pen. He bequeathed his large and valuable library to the Union Seminary. Dr. Smith's principal publications are as follows: "The Relations of Faith and Philosophy:—Nature and Worth of the Science of Church History:—Problem of the Philosophy of History:—The Churches of Europe and America in Relation to General Church History:—The Idea of Christian Theology as a System; an Argument for Christian College:—History of the Church of Christ:—Chronological Tables:—A Syncretic View of the Events, Characters, and Culture of Each Period, including the History of Polity, Worship, Doctrine, and Discipline in America:—A Summary of the Chief Events on the Church in America, and an Appendix containing the Series of Councils, Popes, Patriarchs, and other Bishops, and a Full Index, making matter for four large volumes of print:—A Translation of Dr. Gieseler's Text-book of Church History:—Translation of Dr. Hofmann's Christian Doctrines:—A Plea for Christian Union and Ecclesiastical Reunion before the General Assembly of 1864:—State of Religion in the United States in a Report made to the Ecumenical Alliance:—Numerous contributions to the American Theological Review and to the Bibliotheca Sacra. See Allibone, Dict. of Brit. and Amer. Authors, &c. (W. P. S.)

SMITH, Henry F., a minister of the Methodist Episcopal Church, was born Dec. 21, 1818, and entered the Florida Conference in 1857. He died in Ocala, Marion Co., Fla., June 12, 1864. He was a Christian of deep and ardent piety, and an excellent preacher. See Minutes of Annual Conferences of the M. E. Ch., South, 1864, p. 521.

SMITH, Henry H., a minister of the Methodist Episcopal Church, was born in Benson, Vt., in 1801; and at the age of fifteen joined the Congregational Church. He prepared for college; but relinquished his studies because of failing health, and engaged in teaching and the study of medicine. In 1834 he united with the Methodist Episcopal Church, was licensed to exhort, and in 1835 joined the New England Conference on trial, and was ordained deacon in 1837. He became a member of the Providence Conference at its formation, laboring until 1870, when he superannuated. He died in South Yarmouth, Mass., Jan. 30, 1871. See Minutes of Annual Conferences, 1871, p. 71.

SMITH, Henry Ryan, a minister of the Methodist Episcopal Church, was born in Canada, April 29, 1812. He was converted at an early age, and commenced to preach when about nineteen. At the age of twenty-six he entered the Geneseo Conference; and his ministerial life was interrupted by but one year's superannuation (1847). He died at Wilson, N. Y., April 29, 1873. Before coming to the United States, Mr. Smith occupied an honorable position in his Conference in Canada, filling the two previous years one of the chief pulpits in Hamilton, Canada. He was a man of positive Christian conviction and masterly in his preaching. See Minutes of Annual Conferences, 1873, p. 111.

SMITH, Hervey, a Congregational minister, was born in King's County, Sept. 19, 1796. He pursued his preparatory studies with Rev. Enoch Hall, of West Hampton; entered Williams College, and graduated in 1819, and studied theology with Mr. Hale and Rev. Moses Hallock, of Plainfield, Mass. He was ordained and installed over the First Church in Stafford, Conn., Oct. 5, 1822, and remained pastor of this Church eight years, and was installed to the Second Church of West Springfield, Mass., where he remained three years, and was installed pastor of Ireland Parish, now Holyoke, continuing such for eight years. He was without charge while residing at Granby, East Hampton, and West Hampton until his death, June 4, 1877. For several years he was secretary of Hampden County Missionary Society. He published two Sermons, one preached after the death of his wife, and the other after the death of his only daughter. (W. P. S.)

SMITH, Hezekiah D., a Baptist minister, was born on Long Island, N. Y., April 21, 1757, and joined the Baptist Church in New York city in his nineteenth year. He began his education at Hopewell Academy, N. Y., and graduated from Princeton in 1762. He was ordained in Charleston, S. C., where he preached until the spring of 1764, when he went to New England. He organized the First Baptist Church in Havervill, Mass., May 9, 1765; and was recognized as its pastor Nov. 12, 1765. In 1786 Mr. Smith was appointed chaplain in the American army, and continued as such until within the close of the war. He greatly assisted in the establishment and prosperity of Brown University, and continued to be pastor of the First Church, Havervill, for forty years, when, after preaching from John xil, 24, he was smitten with paralysis, and died, after a week's illness, Jan. 22, 1805. Dr. Smith was a man of commanding presence and winning manners, and was strictly evangelical. See Sprague, Amada of the Amer. Pulpit, vi, 97.

SMITH, Hugh D., an Episcopal clergyman, was born near Fort Hamilton, L. I., Aug 29, 1795. He was trained for college at the Flatbush Academy; and, graduating from Columbia College, New York, in 1813, he pursued his theological studies under Bishop Duyckinck, from whom he received deacon's orders in 1816 and priest's orders in 1819. In April, 1817, he was appointed by Dr. Brown his assistant in Grace Church, and in the same year accepted the rectoryship of St. Ann's Church, Brooklyn. In 1819 he became rector of the Episocopal Church in Augusta, Ga. Resigning this charge in 1831, he returned to the North, and was called to the rectorship of Christ Church, Hartford, Conn., where he remained till 1833, when he became missionary of the Church of the Holy Evangelist in New York. St. Peter's Church, his last parish, was offered to him in 1850; and in the same year he became professor of Pas-

Smith, Isaac (1), an eminent early minister of the Methodist Episcopal Church, was born in New Kent Co., Va., Aug. 17, 1758. He was born in a religiously advanced family and at the age of thirteen was apprenticed to a house carpenter. Previous to the Declaration of Independence he enlisted as a volunteer, and was for more than four years in active service; and received an honorable discharge at Goshen, N. Y., in August, 1779. At the age of twenty-five he made a public profession of faith, and immediately began to labor as exhorter; and in April, 1784, he was admitted to the travelling connection, on trial, in Virginia, and travelled that year the Salisbury Circuit, N. C.; Tar River Circuit in 1785; Charleston, S. C., in 1786; Santee Circuit in 1787; Edisto Circuit in 1789; Charleston in 1790; Broad River in 1791; Santee Circuit in 1792. He was presiding elder from 1793 to 1795. In 1796 he retired from active work on account of ill-health, took a location, and went into the mercantile business. He made his residence at Camden, S. C., where he remained twenty-four years, when (1820) he was readmitted to the Conference. In 1822 he was appointed missionary to the Creek Indians, and remained with them five years. He took a superannuated relation in 1827, left the Creek Nation in February, 1828, and went to Mississippi, where he labored two or three years. He died in Monroe County, Ga., July 20, 1834. Mr. Smith was a man of sterling Christian character, and of a sweet and loving disposition. Believing every word of God meek above the reach of provocation, and thoroughly imbued with the spirit of love and devotion, he was a saint indeed. As a preacher he was earnest in manner, and concise and energetic in language. See Sprague, Annals of the Amer. Pulpit, viii, 292; Minutes of Annual Conferences, ii, 149; iii, 57, 384; Simpson, Cyclop. of Methodism, s. v.

Smith, Isaac (2), a minister of the Methodist Episcopal Church, was born in Wilmington, Va., Nov. 1, 1817. He first joined the Methodist Episcopal Church, but relapsed into a backslidden state. At the age of twenty-one was reclined and united with the Baptist Church. He was educated at Oberlin, O., and at Newburyham, Mass.; he determined to enter the latter institution, but reunited himself with the Methodist Church, and was licensed to preach. In 1843 he joined the New Hampshire Conference, and at its division became a member of the Vermont Conference. In 1852 he was transferred to the New England Conference, in which he continued to render effective service until a few months previous to his death, in Chicopee, Mass., July 16, 1860. See Minutes of Annual Conferences, 1861, p. 54.

Smith, Israel Bryant, a Presbyterian minister, was born at West Hills or Huntington, Long Island, Sept. 12, 1822. At an early age his father removed to New York, and there the son united with Dr. Hattfield's Church in his fourteenth year. After three years spent in business pursuits he determined for the ministry, and with this end in view entered the New York University, from which he graduated in 1846. He then entered the Union Theological Seminary, and graduated in 1849. He was ordained July 12, 1851; and, with the exception of three years at Mount Pleasant and Uniondale, Pa., he passed his entire ministerial life on Long Island. He was very successful at East Hampton, Fresh Pond, Northport, and Green Lawn. In 1875 he relinquished his charge, but continued to reside at Green Lawn until his death, which occurred suddenly after an illness of only a few days, July 6, 1878. He was an earnest, hard-working man, and his memory will be tenderly cherished by the churches. (W. T. S.)

Smith, James (1), a Methodist Episcopal minister, was born in Virginia in 1782, converted in early youth, and in 1802 received as a travelling preacher into the Virginia Conference. He soon gave evidence of strong powers of mind, and evinced a taste and capacity for intellectual improvement. On some occasions, especially, he was truly eloquent, and rose far above ordinary speakers in sublimity of sentiment and energy of thought and expression. He died in 1826. See Minutes of Annual Conferences, i, 542; Stevens, Hist. of the M. E. Church, iii, 401, 402; Sprague, Annals of the Amer. Pulpit, vii, 573-577; Bangs, Hist. of the M. E. Church, ii, 307; iii, 371.

Smith, James (2), a minister of the Methodist Episcopal Church, was born in Kent Co., Del., May 15, 1788. He was graduated at Jefferson College, 1810; was received on trial into the Philadelphia Conference in 1811. He became supernumerary in 1830, but again entered the active work in 1838. He was also presiding elder of the North Philadelphia District and of the Wilmington District. He died March 30, 1852. See Minutes of Annual Conferences, 1852, p. 22.

Smith, James (3), a minister of the Methodist Episcopal Church, was born in Washington Co., Va., May 4, 1814. He was converted in early life, and in 1818 was licensed to preach, and admitted on trial into the Ohio Conference. He was ordained deacon in 1820, and elder in 1822. For thirty years he rendered effective service, and when, in 1852, the conference was divided, he became a member of the Cincinnati Conference, and received a superannuated relation, which he continued until his decease. He died in Sidney, O., April 7, 1856. See Minutes of Annual Conferences, 1856, p. 152; Simpson, Cyclop. of Methodism, s. v.

Smith, James (4), a minister of the Methodist Episcopal Church, was born in Antover, N. Y., Jan. 21, 1807, and united with the Church in his seventeenth year. He entered the ministry in 1838, and for eighteen years did effective service, and then took an annuated relation, which he held until his death, at Westfield, Vt., Nov. 20, 1875. He was a member of the Vermont Conference. See Minutes of Annual Conferences, 1876, p. 85.

Smith, James (5), a Presbyterian minister, was born in Scott Valley, Blair Co., Pa., Sept. 5, 1819. His father was an elder in the Church at Hollidaysburg, of which the son afterwards became a member. He was graduated at Jefferson College in 1843, and entered Princeton Theological Seminary in the autumn of the same year. After completing the course he graduated, and was licensed by the Presbytery of Huntington at Clearfield, Pa., Oct. 8, 1846. The following April he was dismissed to the Presbytery of Clarion, and was ordained as an evangelist by that presbytery Sept. 1, 1847. After preaching one year as an evangelist, he was again received into the Presbytery of Huntington in 1848, and in April, 1849, he was called to the pastorate of the Little Valley Church. He did not choose to be installed as pastor, but supplied the pulpit until 1855. Joining the Allegheny Presbytery, he was called to the pastorate of his former charge, installed by the last-named presbytery, at the Bridge Church over the Bridge. In 1857 he again changed his relation, and was installed pastor of the Church at Mount Joy by the Donegal Presbytery. Here he continued to labor with great acceptability and usefulness among a people strongly attached to him, and to the theological period of ten years when, owing to the failure of his health, he was obliged to submit to the dissolution of the pastoral relation. For the last eight years of his life feeble health prevented him from performing ministerial duties, and he gradually declined until his death, Oct. 4, 1875. (W. T. S.)

Smith, James Bradford, a minister of the Methodist Episcopal Church, South, was born in Warren Co., Ga., and united with the Church in 1836. He
received license to preach in 1845, and in 1846 joined the Georgia Conference. His last appointment was at Oglethorpe, where his brief ministry closed with death, July 7, 1853. See Minutes of Annual Conferences of M. E. Ch., South, 1858, p. 470.

Smith, James C., minister of the Methodist Episcopal Church, was born in New Liberty, Lycoming Co., Pa., Aug. 31, 1824, and was converted at the age of nine. He was admitted into the Iowa Conference in 1846 (or 1847), and was transferred to the Missouri Conference in May, 1858. After serving in Jefferson City and St. Louis, he was appointed presiding elder of the Kansas City District. Pursued in the fall, he escaped with his family into Iowa, where he continued until the next session of the conference, when he was placed in charge of the St. Louis District. In 1865 he took a supernumerary relation, and died May 8, 1866. See Minutes of Annual Conferences, 1866, p. 261.

Smith, James M., a Presbyterian minister, was born at Jamaica, N. Y., in 1810. He entered Princeton Theological Seminary in 1837, and, after remaining one year, finished his theological studies in the Union Theological Seminary in 1840. He was ordained and installed pastor of the Upper Ten-mile Creek and Mount Nebo churches, Pa., remaining such till 1843, when he resigned, and became a stated supply of the church at New Paltz and North Hoffen and North Branch, Pa. He then became pastor of the Church at Tarentum, Pa., in 1844, and continued in this relation until 1853, a period of nine years, laboring with success and usefulness. He removed to Grand Spring, Wis., and remained without charge until his death, in 1854. (W. P. S.)

Smith, Jeremiah, an English Dissenting minister, was born about 1653. It is not known where he received his education. He was at first pastor of a Church at Andover, in Hampshire, and afterwards succeeded Mr. Spademan, as co-pastor with Mr. Rossweiler, in Silver Street, where he was also one of the Friday-evening lecturers. Amid the theological contents of the year 1719, he stood forward the champion of the Trinity. He continued to preach with great zeal the faith which others were attempting to destroy until the day of his death, Aug. 29, 1728. He was one of four who composed the work entitled The Doctrine of the Trinity Stated and Defended. The Exposition of the Epistles to Titus and Philemon, in the continuation of Henry's Commentaries, was written by him. He is the author of The Sermon (1712 and 1713, 8vo) — Four Sermons (1715 and 1716, 8vo) — On the Death of Sir Thomas Abney (1722, 4to). See Bennett, Hist. of Dissenters, ii, 349.

Smith, John (1), an English clergyman, was born in Warwickshire in 1563, and elected in 1577 a scholar of St. John's College, Oxford, where he also obtained a fellowship. He succeeded Dr. Lancelot Andrews as lecturer in St. Paul's Cathedral, London. In September, 1592, he was presented to the living of Clavering, Essex. He died in November, 1616. His works are, The Essex Doves, etc., in three treatises (1629, 4to) — Exposition of the Creed, and Explanation of the Articles of Christian Faith, in seventy-three sermons (1629, fol.).

Smith, John (2), an English divine and instructor, was born in Archurch, near Oundle, in 1618. He entered Emmanuel College, Cambridge, in 1636, and in 1644 was chosen fellow of Queen's College. He died Aug. 7, 1632. Certain treatises by Mr. Smith were published by Dr. John Worthington (Cambridge, 1660, 4to) under the title of Nebel Discourses, and the edition, corrected, with a funeral sermon by Patrick, was published at Cambridge (1673, 4to). One of the discourses, that Upon Prophecy, was translated into Latin by Le Clerc, and prefixed to his Commentary on the Prophecies (1731). See Allibone, Dict. of Brit. and Amer. Authors, s. v.; Darling, Cyclop. Bibl. s. v.; Houb. Ecclesiastical Biography, s. v.; Chalmers, Hist. Dict. s. v.

Smith, John (3), a learned English divine, was born in Lowther, Westmoreland, Nov. 10, 1659. After being under several teachers, he was for some time at the school of Appleby, whence he went to St. John's College, Cambridge, June 11, 1674. He took his degrees of A.B. in 1677, and of A.M. in 1681, and was also ordained a deacon and priest. In the same year he was invited to Durham by Dr. Denis Granville, and in July, 1682, was admitted a minor canon of Durham. About the same time he was collated to the curacy of Croxdale, and in July, 1684, to the living of Witton Gilbert. In 1688 he went to Madrid as chaplain to Lord Lansdowne, who was also Lord Lieutenant of Ireland. In 1694 Crow bishop of Durham, and appointed him his domestic chaplain, collated him to the rectory and hospital of Gateshead in June, 1695, and to a prebend of Durham in September following. In 1696 he was created D.D. at Cambridge, and treasurer of Durham in 1699, to which bishop Crow, in July, 1704, added the rectory of Bishopwearmouth. He died at Cambridge, July 30, 1715. Dr. Smith was learned, generous, and strict in the duties of his profession. Besides his edition of Bede's History, he published four single Sermons. See Allibone, Dict. of Brit. and Amer. Authors, s. v.; Bishop; Hutchinson, Durham, i, 41; Nicholson, Letters, i, 151; Chalmers, Hist. of Biol. Dict. s. v.; Newcourt, Dict. of Alpine and Arch. s. v.

Smith, John (4), D.D., a Congregational minister, was born in Newbury (Byfield Parish), Mass., Dec. 21, 1752. He entered the junior class in Dartmouth College in 1771, graduating in 1773, and immediately after was appointed preceptor of Moor's School at Hanover. While occupying this position, he studied theology under the direction of president Wheelock. In 1774 he was appointed tutor in the college, continuing in that office until 1778, when he was elected professor of languages. This position he retained until the close of his life, April 8, 1809. He served as college librarian for thirty years (1779-1809). For two years he delivered lectures on systematic theology, and officiated as stated preacher until his death. In 1793 the village of Hanover prepared a Hebrew Grammar (dated May 14, 1772; revised Feb. 11, 1774). He also prepared a Chaldee Grammar: — a Latin Grammar (1802) — a Greek Grammar (1809) — an edition of Cicero de Oratore, and Sermons. See Sprague, Annals of the Amer. Pulpit, ii, 90.

Smith, John (5), a Methodist Episcopal minister, was born in Kent Co., Md., March 10, 1758; converted on June 9, 1776, in the连接 in 1774, and into full connection in 1786, and afterwards travelled the following circuits: New Hope, Redstone, Greenbrier, Cecil, Talbot, Milford, Somerset. Ammanessex (twice), Caroline, and Dover, when he became superintendent for several years, and afterwards superintended until his death, May 10, 1812. See Minutes of Annual Conferences, i, 224; Stevens, Hist. of the M. E. Church, ii, 147; iv, 281.

Smith, John (6), D.D., a Congregational minister, was born in Belchertown, Mass., March 5, 1766. He graduated at Dartmouth College in 1794, entered the ministry in 1796, and was ordained Jan. 4, 1797, co-pastor at Salem, N. H., but resigned his charge Nov. 21, 1817. He was removed as missionary Sept. 26, 1817, but was dismissed Sept. 8, 1819, to accept the professorship of theology in the Theological Seminary, Bangor, Me., which he held until his death, April 7, 1831. He published, Treatise on Infant Baptism: — Two Sermons on the National Fast (1812), and a few occasional Sermons. See Sprague, Annals of the Amer. Pulpit, ii, 389.

Smith, John (7), a Presbyterian minister, was born in Hopewell, Pa., May 8, 1776. He was carefully educated by his parents, graduated at Dickinson College: studied theology privately at Princeton, N. J.; was licensed by New Brunswick Presbytery in 1809; and ordained by Oneida Presbytery as pastor of the Church at Cooperstown, N. Y., in 1810, where for nearly a quarter of a century he went in and out as a true shepherd.
before his people. In 1834 he became principal of Cherry Valley. He taught the same time preaching in the church at Middlefield, a distance of some 50 miles. He died here in 1896. He was stated supply of the Church at Painted Post, in Chemung Presbytery; in 1840 of the Church in Hammondsport, in Bathest Prebytery, where he preached as opportunity and his increasing years would permit, until 1855, when he removed to Pen Yan and took up his residence with his son-in-law. He died here, June 12, 1860. On the announcement of Mr. Smith's death, the members of Bath Prebytery held a meeting and passed resolutions in view of his great worth as a Christian and minister. See Wilson, Preb. Hist. Alumniac, 1862, p. 195. (J. L. S.)

**Smith, John (8), a minister of the Methodist Episcopal Church, was born in Kirby, Va., in 1808. He was converted and joined the Church in 1824, was licensed to preach in 1827, and joined the New England Conference in 1829. He labored for about twenty years in the active ministry, and then, compelled by ill-health, took a supernumerary relation, which he held until his death, March 27, 1872, in West Burke. See Minutes of Annual Conferences, 1873, p. 58.**

**Smith, John Blair, D.D., an eminent Presbyterian divine and educator, and brother of Samuel Stanhope Smith, D.D., was born in Pequea, Lancaster Co., Pa., June 22, 1836. He received his early education at Greensville Theological Institute for knowledge and uncommon facility in acquiring it, received most watchful and faithful parental training, and was converted when fourteen years of age. He graduated at the College of New Jersey in 1773 under Dr. Witherspoon; pursued his theological studies under the direction of his brother, who was licensed by the Presbytery of Hanover, April 29, 1778, and ordained by the same presbytery, Oct. 26, 1779. He became successor to his brother as president of Hampden Sidney College in the same year, and in the spring of 1780 also as pastor of the churches of Cumberland and Brierly, in Prince Edward Co., Va., where he became very popular, and before he was forty years of age is said to have been "at once more attractive and powerful than any other clergyman in Virginia from the time of Samuel Davies." In 1789 he resigned his position as president of Hampden Sidney College, in 1791 became pastor of the Third Presbyterian Church, Phila-delphia, and in 1793 president of the University of North Carolina, and for three years presided over the institution with great credit and success. In May, 1799, he returned to his former charge in Philadelphia, where he died, Aug. 22, of the same year, of yellow fever. Dr. Smith was a fervent and eloquent preacher, earnestly devoted to the cause of Christ, and drew large congregations, which would hang upon his lips in breathless silence. As a patriot and a citizen he also exerted an important influence in the civil concerns of the state, especially as connected with the interests of religion. When the Legislature, in 1776, abolished the establishment of the Church of England in the state, they at the same time passed an act incorporating the Episcopal clergy, and giving them a right to the glebes and churches which had been procured by a tax upon the inhabitants in general, including Dissenters of every description as well as Episcopalians. Another bill was introduced, but not yet passed, to extend the privileges of the Act of Toleration, as passed by William and Mary, to the State of Virginia. Dr. Smith framed a remonstrance against those acts, which he induced the Presbytery of Hanover to adopt and send to the Legislature, which was a very able State paper and had the desired effect. About this time another great excitement was raised in Virginia. A bill introducing a plan for the Legislature for a general assessment for the support of religion, a scheme which was advocated by Patrick Henry and several other popular politicians. An adverse petition was prepared, and it, together with a memorial from the presbytery, was presented to the Legislature by Dr. Smith (whose handwriting the papers show), who was heard for three successive days at the bar of the House in support of them. So decided was the influence of the struggle in Virginia as to procure the withholding from the Federal Constitution of all power to erect a religious establishment of any kind. Dr. Smith's only publication was The Endowment of Christ's Kingdom, a sermon at Albany in 1797. See Sprague, Annals of the Amer. Pulpit, i. 305, 1840; iii, 307, 1877; Davidson, Hist. of Presb. Ch. in Kentucky, p. 37-39; Gen. Assem. Miss. Mag. 1805; Foote, Sketches of Virginia, 1st series; Life of Dr. Ashbel Green; Graham, Let., VII; Smyth, Eccles. Republicanism, p. 96-103; Baird, Religion in America, pp. 109, 110; Lang, Religion and Education in America, i. 248, 249, ii. 115, Rice, Evangel. Mag. ix, 30, 33, 35, 42, 43. (G. S.)**

**Smith, John Blakely, a minister of the Methodist Episcopal Church, South, was born in Charlotte, N.C., July 11, 1820. In 1843 he joined the Church, and in December, 1847, was admitted into the Georgia Conference. After its division he became a member of the South Georgia Conference. Besides serving as pastor, he was chairman of the Annual agent of the Western Jurisdiction, three years agent of the American Tract Society, and three years agent of the Wesleyan Female College. In 1850 he was elected conference secretary, and continued in office for twenty-two years. He died near Americus, Ga., Sept. 30, 1872. See Minutes of Annual Conferences of M.E. Ch., South, 1872, p. 680.**

**Smith, John Cross, D.D., a Presbyterian minister, was born in Kingston, Md., Oct. 29, 1808. He received his classical education in a private school. After studying theology under Dr. Duncan, he entered Princeton Seminary and remained one year. He was licensed in 1825, and soon after began to preach as an evangelist at Fortress Monroe, Va. While here he received a call from Fortress to be the pastor. He was one of the first pastors over that Church. Here he labored with great zeal and success until 1832, when he accepted a call to the Bridge Street Church, Georgetown, D.C. He went to work in his new charge with zeal, clearing his Church of a heavy debt, and securing its prosperity and growth. In 1839 the pastoral relation was dissolved, and he became agent of the American Tract Society; but in a few months he was called to the Fourth Church in Washington, D.C., over which he was installed in September, 1839. Here he labored with untiring zeal and energy for thirty-eight years, and his Church was blessed with numerous and powerful revivals. He was quite successful in building churches free from debt, and still more successful in raising funds to liquidate the debts of others. In 1861 he offered his services gratuitously as chaplain in the Union army, and served with fidelity for more than a year. In 1876 he received an injury in the street from which he never recovered, and his system gradually gave way. He died in Washington, Jan. 29, 1878. (W. P. S.)**

**Smith, John Faria, a Presbyterian minister, was born in York County, Pa., Jan. 29, 1822. He graduated at Jefferson College, Canonsburg, in 1842, studied theology at Princeton, N.J., was licensed by Donegal Presbytery in 1844, and ordained and installed pastor of Owen'sborough (Ky.) Church. He preached successively at Bardstown, Ky.; Vincennes, Richmondu, and Hope-well, Ind.; and afterwards undertook a temporary labor in behalf of the United States Christian Commission in the army, whence he returned sick, and died among his kindred in York, Pa., July 4, 1844. The Indianapolis Presbytery recorded the following minute: "Brother Smith was an honored and useful member of Presby-tery, was well known and greatly confided in in all our ecclesiastical councils. Taken off in the prime of life, while pastor of a flourishing Church, the lamentations of his people follow him to his grave." See Wilson, Preb., Hist. Alumniac, 1865, p. 129; 1866, p. 170. (J. L. S.)**

**Smith, John G., a minister of the Methodist Epis-
SMITH

copal Church, was born in Marlborough, Ulster Co., N.Y., Sept. 30, 1809. He was licensed to preach at the age of twenty-two, and was also admitted into the New York Conference on trial. When this conference was divided, Mr. Smith being stationed at Willet Street, New York city, became a member of the New York East Conference. He was transferred to the Church of New Haven, Conn., where his health failed. He removed to Warwick in July, 1854, and died Sept. 30, in the same year. See Minutes of Annual Conferences, 1855, p. 546.

Smith, John M., a Methodist Episcopal minister, was born in Brooklyn, N.Y., Oct. 10, 1796. He was converted in the spring of 1806, and immediately joined the church organized at Columbia College in the city of New York; entered upon the study of medicine, but, becoming impressed that it was his duty to preach, relinquished that design and entered the itinerant ministry in 1817, and was stationed on Jamaica Circuit, L.I. He continued in this work until September, 1829, when he was elected by the New York Conference principal of the Wesleyan Seminary in New York city, in which he continued until that institution was removed to White Plains, of which he also took the oversight. From this he was transferred, in May, 1832, to the professorship of languages in the Wesleyan University. He entered upon the duties of his professorship with great arduous of mind and promising hopes of distinguish- ing usefulness; but his days were soon cut off, and he died Dec. 27, 1832. Mr. Smith was a diligent and successful student; a fine classical scholar; sound and systematical as a preacher; meek, modest, and polished as a man. See Minutes of Annual Conferences, ii, 216; Bangs, Hist. of the M. E. Church, iv, 146-151. (J. L. S.)

Smith, John Pye, D.D., LL.D., F.R.S., an eminent English Presbyterian divine, was born in Sheffield, May 25, 1774. He was educated at the Independent Academy at Rotherham, was ordained to the ministry in the Independent Church, and, without entering upon the regular work, he accepted the appointment of resident professor of classical literature and theology in the Theological Seminary at Homerton. Subsequently (in 1815) he became sole professor of divinity, and discharged his duties with acceptability, training hundreds of young men for the ministry. In 1843 he resigned this post and became president of the institution. He was born in 1774, and was ordained in 1805, when New College, St. John's Wood, was formed by the junction of Homerton, Highbury, and Coward colleges. Dr. Smith retired to private life aided by a testimonial fund of $15,000. For forty-three years he was pastor of the celebrated Gravel Pit Chapel, Homerton. He took a great interest in scientific pursuits and was honored by a membership in the Royal and Geological societies. He died at Guildford, Surrey, Feb. 5, 1851. Dr. Smith wrote, The Scripture Testimony to the Messiah (1818-21, 2 vols. 8vo; 1829, 3 vols.; 1837, 3 vols.; 1847, 2 vols.)—Four Discourses on the Sacrifice and Priesthood of Christ (1828, 8d ed. 1847)—Principles of Interpretation as Applied to the Prophecies of Scripture (1829, 2d ed. 1881):—The Relation between Holy Scripture and Some Parts of Geologic Science (1889, 8vo; 4th ed. 1848):—Personality and Divinity of the Holy Spirit;—Mosaic Account of the Creation and Deluge:—Manual of Latin Grammar:—A Treatise on the Religion of the Protes- tant Religion: besides many sermons, controversial pieces, and reviews. After his death appeared First Lines of Christian Theology, being notes of his lectures to his students (1854, 2d ed. 1860). He was one of the greatest biblical scholars of his day; and the works above enumerated are full of most valuable criticism and exegesis. See Medway [J.], Memoirs of the Life and Writings of John Pye Smith (1858); Allibone, Dict. of Brit. and Amer. Authors, s. v.

Smith, Joseph (1), an English clergyman, was born in Lowther, Westmoreland, Oct. 10, 1670, and was admitted to Queen's College, Oxford, May 10, 1689. In 1693, being chosen taberdor, he took his first degree in arts, but was afterwards removed from college by Sir Joseph Williams, who appointed him his deputy keeper of the Paper-office at Whitehall; and soon after, being made dean of Plepiopolis, by the king's request, he took Mr. Smith with him as secretary. He was created doctor of divinity, March 1, 1696, and a fellow, Oct. 31, 1698. Desiring to enter the Church, he returned to Oxford in 1700 and was ordained by Dr. Talbot, bishop of Oxford. Not long after he was presented to the donative of Ifley, near Oxford, and at the same time was appointed di- vine lecturer at the college. In 1705 he was promoted to the prebend of Dunholm, Lincoln; and received the donative of Paddington, near London. He was also promoted to the prebend of St. Mary, Newting- ton, in St. Paul's Cathedral. He was chosen lecturer of St. George's Church, Hanover Square. He had before resigned the lectureship of Trinity Chapel, Conduit Street, and in 1781 resigned also that of St. George's in consequence of having been, on Oct. 20, 1730, elected provost of Queen's College. His provostship, which lasted twenty-six years, was of great financial benefit to the college. He died in Queen's College, Nov. 23, 1786. In December two sermons and a pamphlet entitled A Clear and Comprehensive View of the Being and Attributes of God, etc. See Allibone, Dict. of Brit. and Amer. Authors, s. v.; Chalmers, Biog. Dict. s. v.

Smith, Joseph (2), one of the early ministers of the Presbyterian Church in Western Pennsylvania, was born in Nottingham, Pa., in 1736. Of his early education and religious convictions nothing is known. He graduated in 1759 from King's College, New York. He was a member of the Presbytery of Newcastle at Drawyers, Aug. 5, 1767; was ordained and installed pastor of the Congregation of Lower Brandywine, April 19, 1769; of the united congregations of Wilmington, Del., and Lower Brandy- wine, Oct. 27, 1774; and of Buffalo and Cross Creek congregations of the United Presbyterian Church of Pennsylvania, Dec- ember, 1780, where he spent the remainder of his life. He died April 19, 1792. Mr. Smith was an extraordinary preacher and laborious pastor. "I never heard a man," said the Rev. Samuel Porter, "who could so completely as Mr. Smith unbar the gates of hell and make me look far down into the abyss or who could throw open the gates of heaven and let me glance at the awful brightness of the great white throne." See Sprague, Annals of the Amer. Pulpit, iii, 274. (J. L. S.)

Smith, Joseph (3), D.D., a minister of the Presbyterian Church, was born in Westmoreland County, Pa., July 15, 1796. He entered Jefferson College and was graduated in 1815. From thence he went to Princeton Theological Seminary, where he graduated in 1819. He was ordained to the ministry, and commenced preaching in Virginia, where he remained several years. He was principal of the academy at Staunton, Va., and also of that at Fredericksburg City, Md. He subsequently became president of Franklin College, O., and also of a college at Fredericksburg City. After this he became general agent of the Propagation of the Gospel of Virginia, Northern Virginia, and Eastern Ohio. He was pastor of the churches of Round Hill, and at Greensburg, Pa.,
at which latter place he died, Dec. 4, 1868. He was the author of Old Red Stone and a History of Jefferson College. He possessed great versatility of talent, and served the Church in the various relations he sustained to it with great acceptability and usefulness. See Plumley, Presbyterian Church, p. 296. (W. P. S.)

Smith, Joseph (4) (Mormon prophet). See Mon- mons.

Smith, Joseph (5), a Baptist minister, was born in Hampstead, N. H., Jan. 31, 1808, and pursued his studies at the New Hampton and Newton institutions. Wishing to secure a full collegiate education, he entered Brown University, and was graduated in the class of 1837, and was ordained Sept. 27, 1837. His pastorates were at Woonsocket and Newport, R. I., and at Grafton and North Oxford, Mass. In the latter place he died, April 26, 1866. (J. C. S.)

Smith, Josiah, a Congregational minister, was born in Charleston, S. C., in 1794, and graduated at Harvard College in 1725. He began to preach within about a year of his graduation, and was ordained July 11, 1726. In 1729 he maintained a learned dispute with Rev. H. Fisher on the right of private judgment, and in 1740 he espoused the cause of Mr. Whitefield. In 1749 he received a stroke of palsy, from which he never recovered so far as to be able to articulate distinctly. He nevertheless continued writing sermons, many of which were published. Mr. Smith was an earnest friend of the cause of American independence, and on the surrender of Charleston became a prisoner of war, but was released on parole. In 1781 he was ordered out of Charleston, and landed in Philadelphia, where he died in October of that year. Mr. Smith was a respectable preacher, a learned divine, and a writer of considerable reputation. He published, Sermons (1726-45):—Sermons (1752, 8vo):—The Church of Ephesians Ar- raigned (1765):—Letters, etc. See Sprague, Annals of the Amer. Pulpite, ii, 351.

Smith, Josiah D., D.D., a Presbyterian divine, was born in Westmoreland County, Pa., Nov. 20, 1814. He was educated in South Hanover College, Ind., studied divinity in the South Hanover Theological Seminary, was licensed by the Madison Presbytery and ordained by the Columbus Presbytery, O., in 1841, and installed pastor of the Truro and Hamilton churches in that state. He subsequently became pastor of the Westminister Presbyterian Church in Columbus, where he died June 16, 1866. Dr. Smith was highly regarded for his intellectual worth. He published, Truth in Love:—Sermons (1864), with a biographical preface by the Rev. James M. Platt and an introduction by M. W. Jacobus, D.D. See Wilson, Presb. Hist. Almanac, 1864, p. 133; Allibone, Dict. of Brit. and Amer. Authors. (J. L. S.)

Smith, Leonard, a minister of the Methodist Episcopal Church, was born in Ancaster, Wentworth Co., Canada, May 2, 1838, and joined the Church there in 1854. He was licensed to preach in 1857, and entered the Illinois Conference in 1860. In 1873 he was granted a supernumerary relation, and held that position until his death, Nov. 18, 1874. See Minutes of Annual Conferences, 1873, p. 133.

Smith, Matthew, a Presbyterian minister, was born in Dumfries, near Belturbet, Ireland, in 1825, where he received his early education. He studied theology at Paisley, Scotland, and was ordained and in- stalled pastor of a Presbyterian church near Belfast in 1846. In 1850 he emigrated to America, and was stated supply for the Associate Reformed Presbyterian Church at Milton, Pa., where he labored for more than a year, and was then removed to Wisconsin as an As- sociate Reformed missionary. In 1854 he accepted a commission from the American Home Missionary Soci- ety, and became stated supply of the Presbyterian Church at Centreville, Ia. He died Aug. 18, 1859.

Mr. Smith was a faithful minister, attending diligently to all the duties of his calling, and endeavoring himself to all his people. See Wilson, Presb. Hist. Almanac, 1861, p. 164. (J. L. S.)

Smith, Miles, an English prelate, was born in the city of Hereford, and about 1558 entered Corpus Christi College, Oxford, but graduated at Brasenose. He after- wards became one of the chaplains or petty canons of Christ Church, where he took his bachelor of divinity degree. In due course he was preferred to the office of residentiary at Hereford Cathedral, was created inctor of divinity in 1594, and on Sept. 20, 1612, became bishop of Gloucester. His knowledge of the Oriental lan- guages was so extraordinary that he was employed by James I upon the translation of the Bible. He began with the first, and was the last man engaged upon that work, having also written the preface. For this service he was appointed bishop of Gloucester, and had leave to hold in commendam his former livings, viz. the prebend of Hinton in the Church of Hereford; the rectories of Upton-upon-Severn and Hartlebury, in the diocese of Worcester; and the first portion of Ledbury, called Over- hall. According to Willis, he died Oct. 20, but Wood says in the beginning of November, 1624, and was buried in his own cathedral. His published works are, Sermons (London, 1632, fol.):—Sermons (published without his consent by Robert Burhill, 1602). He was the editor of bishop Babington's works, to which he prefixed a pre- face. See Allibone, Dict. of Brit. and Amer. Authors, s. v.; Darling, Cyclop. Bibliog. s. v.; Chalmers, Biog. Dict., s. v.

Smith, Moses, D.D., a minister of the Methodist Episcopal Church, was born in Chatham County, N. C., Feb. 28, 1817. When two years old, his parents moved to Highland County, O., where he was converted, and united with the Church. He graduated from Augusta College in Augusta, 1842; was licensed to preach, Jan. 91, 1843, and admitted into the Ohio Conference on Sept. 27. His ordination as deacon took place in 1844, and that of elder in 1846. For twenty-seven years he was constantly engaged in the work. He died in Newton, Jasper Co., in Aug. 25, 1869. He was twice a delegate to the General Conference. He wrote works on Mental and Moral Sciences, the former of which was published. See Minutes of Annual Conferences, 1863, p. 292.

Smith, Noah, a minister of the Methodist Epis- copal Church, was admitted to the Georgia Conference about 1857 or 1858. He was a very popular and useful preacher until 1858, when he took a supernumerary relation. He died Sept. 14, 1860. Mr. Smith was a man of right principles, ardent piety, and indefatigable in his labors. See Minutes of Annual Conferences of the M. E. Ch., South, 1866, p. 257.

Smith, Peyton Pierce, a minister of the Meth- odist Episcopal Church, South, was born in Franklin County, Ga., Jan. 12, 1815, and joined the Church in Sep- tember, 1826. He was licensed to preach by the Guin- nett Circuit Quarterly Conference, Nov. 12, 1831, and at the next session of the Georgia Annual Conference was received on trial. According to his journal, he was a travelling preacher for thirty years and four months, during which time he preached 4414 sermons, and baptized 1529 persons, made 5079 visits, wrote 4941 letters, and travelled, chiefly by private conveyance, 123,623 miles. In 1863 he was returned to Madison district as presiding elder, where he labored until the day before his death, May, 1863. Mr. Smith was one of the oldest and most efficient ministers in the Georgia Conference, and as a minister was eminently successful. See Minutes of Annual Conferences of the M. E. Church, South, 1863, p. 466; Simpson, Cyclop. of Methodism, s. v.

Smith, Philander, D.D., third bishop of the Methodist Episcopal Church in Canada after the sepa- rate organization in 1828, was born in Delaware Coun- ty, N. Y., in 1796. He was reared a Calvinist, and at
an early age settled in Elizabethtown, near Brockville, Canada. He was converted in 1817 under the preaching of bishop George, and united with the Methodists. In 1820 he joined the Genesee Conference, and was duly ordained deacon and elder. In 1826 he was appointed presiding elder of the Upper Canada work, and labored regularly till the union of the Canada Conference with the British episcopal church in 1848. In 1849, after the deposition of the bishop, he united with the American conference, and was ordained a bishop in 1853. At the time of the union generally, he arose for a time. In 1836 he united with the Method-ist Episcopal Church, which had again rallied, and in 1862 was elected to the episcopate, which office he held until his death, March 28, 1870. As a presiding bishop he was earnest in his administration. He was a calm and judicious; as an overseer in the Church of Christ he was watchful, self-sacrificing, and laborious. See Simpson, Cyclop. of Methodism, s.v.

Smith, Reuben, a Presbyterian minister, was born in South Hadley, Mass., Sept. 26, 1789. He enjoyed a good academical training, graduated at Middlebury Col-lege, Vt., in 1812, and at Princeton Theological Semi-nary, N. J., in 1816. Licensed by the New York Presbytery, he was installed pastor of the Church at Ballston Centre, N. Y., in 1816, by the Troy Presbytery. He afterwards labored in the Third Presbyterian Church at Albany for some years; in 1829 became pas-tor of a Congregational Church in Burlington, Vt.; in 1825 of the Church at Waterford, N. Y. He died Nov. 7, 1860. Mr. Smith was a man of deep, effective piety, an influential student of his principles, and an eloquent preacher. He was the author of Africa Given to Christ (Burlington, Vt., 1860), a sermon—The Pastoral Office, embracing Experiences and Observations from a Pastorate of Forty Years (Phila. 1850). See Wilson, Prob. Hist. Almanac, 1862, p. 119; Allibone, Dict. of Brit. and Amer. Authors, s. v.; Smith, Church History, vol. iii. See also, Hook, Eccles. Biog. s. v.

Smith, Robert (1), an English divine and educator, was born in 1808, and educated at Trinity College, Cambridge, where he took his degrees of A.B. in 1711, A.M. in 1715, LL.D. in 1723, and D.D. in 1739. Information respecting Dr. Smith is very meagre. He was a mathematical preceptor to William, duke of Cumberland, and master of mechanics to George II. In 1716 he became professor of literature at Oxford, and afterwards succeeded Bentley as master of Trinity. He died in 1768. Smith's works are, A Complete System of Optics (1728, 2 vols. 4to), and Harmonics, or the Philo-sophy of Musical Sounds (1760). See Allibone, Dict. of Brit. and Amer. Authors, s. v.; Cambridge Graduates; Cambridge, Life; Chambers, Biog. Dict. s. v.

Smith, Robert (2), D.D., an eminent Presbyte-rian divine, father of some eminent men, was born in Derry, Ireland, in 1725. His family came to America when he was seven years old, and settled at the head-waters of the Brandywine River, about forty miles from Philadelphia. At the age of fifteen his mind was enlightened, and he became a professed Christian under the preaching of Whitefield, during his first visit to America, and he soon felt a strong desire to devote himself to the ministry. He accordingly placed himself under the instruction of the Rev. Samuel Blair, who was then conducting an institution for the education of young men for the ministry at Fagg's Manor, Chester Co., Pa. There he made very rapid improvement in both classical and theological knowledge; was licensed by the New Side Presbytery of Newcastle Dec. 27, 1749, and ordained and installed pastor of the churches in Pequea and Leacock, Pa., March 25, 1751. Shortly after his settlement he founded a school, designed especially for the instruction of youth in the Latin, Greek, and Hebrew languages, which was afterwards resorted to by many who were subsequently greatly distinguished in the different professions. In 1759 he resigned the care of the congregation of Leacock: in 1760 he received a dispensation to leave the Presbytery of New Jersey, and in 1772 he was appointed chaplain of the convention of Pennsylvania, and held the office during the rest of his life. He was the second moderator of the General Assembly, and the last public act of his life was to attend a meeting of the board of trustees of the College of New Jersey. He died April 15, 1783. Dr. Smith was distinguished for his activity, being in labor most abundant. *Few
men in the holy ministry have been more useful or more esteemed." He published a sermon preached on the union of the Old and New Side Presbyteries of Newcastle, entitled *A Wheel in the Middle of a Wheel, or the Harmony and Connection of the Various Acts of Divine Providence:*—*Two Sermons on Sin and Holiness* (1767):—*A Sermon* (1774):—*Three Sermons on Saving Faith,* in the *Amer. Preacher,* vol. iv. (1791). See *Spoggins, Samuel* (1753), *Amer. Coll. Class.,* Pulpit, *Dict. of Brit. and Amer. Authors,* s.v.; *Gen. Assembly Misc. Mag.* vol. ii; *Tinlows, Hist. Sermon.* {L. S.}

Smith, Robert D., an efficient Episcopal minister in America, and afterwards bishop of South Carolina, was born in Norfolk, England, Aug. 25, 1722. He passed A.B. and A.M. at Cambridge, of which he was also elected fellow, and was ordained in 1756. On his arrival in America he was successively assistant to the rector of St. Philip's, Charleston, S. C., and was specially interested in the negro school. He exerted himself in favor of the American cause, and went to the lines as a common soldier at the siege of Charleston. During the Revolutionary war he was chaplain to the Continental Army, and was one of Colonel Paul's, Queen Anne's Co., Md. He devoted the remainder of his life to teaching and the care and organization of the Episcopal Church. In 1789 he was made D.D. by the University of Pennsylvania, and in 1795 was elected bishop. He died Oct. 28, 1801. See *Sprague, Annals of the Amer. Pulpit,* v. 170.

Smith, Robert A., a Methodist Episcopal minister, was born in Cumberland County, Tenn., in 1809; converted in 1828, licensed as a local preacher in 1832, received on trial in the Tennessee Conference in the same year, transferred and stationed on Oakmulgee Circuit in 1835, at Jones's Valley in 1834-35, and admitted into full connection at Montgomery, in 1836, where he died in 1849, a man of ardent piety, a good preacher, and a most agreeable companion. See Minutes of Annual Conference, ii, 487.

Smith, Robert D., a minister of the Methodist Episcopal Church, South, was born in Lancaster County, Pa., Oct. 21, 1802. In 1813 his family removed to Champaign County, O., where he lived till 1824, when he went to Mississippi to teach school. There he was converted, and united with the church Nov. 9, 1825. He was licensed to preach in 1826, and preached under the presiding elder until 1829, when he was received on trial into the Mississippi Conference. He labored as missionary to the Choctaw nation for two years and six months. In 1831 he was stationed in Montgomery, Ala., 1832, Vicksburg, 1833, V., New Orleans; 1835, Natchez; 1836, Cole's Creek Circuit; 1837-38, Vicksburg District; 1839, Warren Circuit; 1840-41, appointed president of the Elizabeth Female Academy at Washington; and in 1842 he was at Centenary College. In 1843-45 he labored as missionary among the colored people in Madison Parish, La., where he closed his life and work, May 16, 1845. See Minutes of Annual Conferences of the M. E. Church, South, 1845, p. 83.

Smith, Samuel, an English clergyman and popular writer of tracts, was born in or near Dudley, Worcestershire, in 1588, and studied for some time at St. Mary's Hall, Oxford. He left without taking a degree, and became beneficed at Prittlewell, Essex, and afterwards, as Wood says, in his own county; but, according to Calamy, he had the perpetual curacy of Crossedge and Cound, Shropshire. On the breaking-out of the Rebellion he went to London, and sided with the Presbyterian. On his return to the country he was appointed an assistant to the commissioners for the ejection of "scandalous and ignorant ministers and schoolmasters." At the Restoration says, in his own county; but, according to Calamy, he had the perpetual curacy of Crossedge and Cound, Shropshire. On the breaking-out of the Rebellion he went to London, and sided with the Presbyterian. On his return to the country he was appointed an assistant to the commissioners for the ejection of "scandalous and ignorant ministers and schoolmasters." At the Restoration, in 1660, he was living near Dudley in 1663. Smith's works are, *David's Blessed Man* (Lond. 8vo):—*The Great Assect* (12mo; thirty—one editions of which appeared before 1684):—*A Fold for Christ's Sheep* (printed thirty-two times):—*The Christian's Guide*: besides other tracts and sermons. See Albbine, *Dict. of Brit. and Amer. Authors,* s.v.; Daring, *Cyclop. Biblio.* s.v.; Chalmers, *Biog. Dict.* s.v.

Smith, Samuel Stanhope, D.D., LL.D., a distinguished divine and educator of the Presbyterian Church, and son of the Rev. Robert Smith, D.D., was born Oct. 14, 1751. His father was a clergyman in Gloucester County, Va. At a very early period he gave indications of possessing a mind of no common order. When he was only six or seven years old he commenced the study of the languages in his father's school. "He made the best of his opportunities, and was distinguished for his improvement in every branch to which he directed his attention. His personal and communicative manners, which were formed under his father's care while he was yet under the paternal roof; and before he was eighteen years of age graduated at the College of New Jersey under circumstances the most honorable and gratifying. After graduation he returned to his father's house and spent some time "partly in assisting him in conducting his school, and partly in vigorous efforts for the higher cultivation of his own mind." In 1776 he became tutor of the classics and of belles-lettres in the College of New Jersey, where he remained for upwards of two years, discharging his duties with great fidelity and acceptability, and while at the same time he was preparing for theological study privately. In 1778 he resigned the position of tutor, was licensed to preach by the Presbytery of New Castle, and immediately went as a missionary to the western counties of Virginia, where he soon became an almost universal favorite. So powerful an impression did he make that some of the most wealthy and influential persons soon set on foot a project for detaining him there as the head of a literary institution. A seminary was subsequently chartered under the name of Hampden Sidney College, and he took upon himself the double office of principal of the seminary and pastor of the church, and the duties of both he discharged with the most exemplary fidelity. In 1779 he accepted the professorship of moral philosophy in the College of New Jersey. The college was then in ruins in consequence of the uses and abuses to which it had been subjected by both the British and American soldiers; its students were dispersed, and all its operations had ceased. But it was not to be long continued during this whole period, although Dr. Witherspoon's name could not fail to shed glory over the institution, and he was always intent upon the promotion of its interests, it was mainly by the energy, wisdom, and generous self-devotion of Dr. Smith that the college was speedily reorganized and all its usual exercises resumed. In 1783 Yale College honored him with D.D., and in 1810 Harvard University with LL.D. In 1785 he was elected an honorary member of the American Philosophical Society in Philadelphia; and the same year was appointed to deliver their anniversary address, and he met the occasion in a manner which, of itself, would have conferred lasting honor upon his name. The address was afterwards published in the *Transactions of the society,* and subsequently in an enlarged and improved form in a separate volume. With this work his reputation as a philosopher both at home and abroad is, in no small degree, identified. In 1786 he was associated with several of the most distinguished and venerable men in the Presbyterian Church in preparing the *Form of Presbytery Government.* In 1794, Dr. Witherspoon having died, he became president of the College of New Jersey. He had now acquired a wide reputation as a pulpit orator. His baccalaureate discourses particularly attracted large numbers, even from remote parts of the country, trying to hear one of his most splendid performances was his oration, delivered at Trenton, on the death of Washington. The occasion roused his faculties to the utmost, and the result was a production of great beauty and power. In
1802 the college edifice was burned, together with the libraries, furniture, and fixtures of every description. The trustees resolved to rebuild it immediately. Dr. Smith made a begging tour through the Southern States, and returned in the following spring with about one hundred thousand dollars, and other liberal aid, enabled him to accomplish vastly more than he had ventured to anticipate. "This was his crowning achievement. He had won new honors and gained many new friends. The college was popular and prosperous, and numbered two hundred students. New buildings were soon erected, and new professors were added to the faculty." During the whole period of his presidency he continued to contribute to the elevation of the college to a position of the highest usefulness, and ever proved himself to be one of the ablest and most successful disciplinarians of any age. In 1812, being too much enfeebled to discharge any longer the duties of his office, he tendered his resignation as president and retired to a place which the board of trustees provided for him, and there spent the remainder of his life. He died, in the utmost tranquillity, Aug. 21, 1819, and his remains were laid by the side of his illustrious predecessors. Dr. Smith was an indefatigable student, conversant with the literature, science, philosophy, and politics of ancient and modern times; a classical scholar in the highest acceptance of the phrase; and wrote and conversed in Latin with great facility and was a first-rate prosodist. As a preacher, the uniform testimony was that his eloquence in his best days was unsurpassed, and no preacher in New England was so polished a writer. His superior talents as professor and principal were everywhere spoken of and acknowledged. As a man, the saintly aspect, the tranquil resignation, the humble faith, the generous sympathy, the comprehensive charity, the modest, unpretending gentleness of his whole manner, all proclaimed the Christian gentleman and the matured and gifted good man. The following is a list of his publications: "Essays on the Causes of the Variety of Complexion and Figure of the Human Species," etc. (Phila. 1787, 8vo; Edin. 1788, 8vo; Lond. 1799, 8vo; 2d ed. New Brunswick, N. J., 1810, 8vo): - "Sermons" (Newark, N. J., 1789, 8vo; Lond. 1801, 8vo): - "Lectures on the Evidences of the Christian Religion" (Phila. 1809, 12mo): - "Lectures on Moral and Political Philosophy" (Trenton, N. J., 1812, 2 vols. 8vo): - "Comprehensive View of Principles of Natural and Revealed Religion" (New Brunswick, 1815, 8vo). He also published a number of single sermons, orations, and discourses (1781-1810). After his death appeared "Sermons, with a Brief Jottings of a Visiting Tour in the Interior of the Western World" (Dr. W. Judson, 8vo). See Sprague, "Annals of the Amer. Pulpit," iii. 335-345; "Life and Works of Philip Lindsey" (1806), iii. 652; "Life of Dr. Archibald Alexander," p. 265; "New York Med. and Phys. Journ. 1809; Mitchell [Dr. John], "Essays on the Causes of the Different Colors of People in Different Climates: Anal. Mag. xvi. 445; xvii. 1; Ramsay [Dr. David], "Hist. of the United States. 1607-1808," continued to the treaty of Ghent by S. S. Smith, D.D., LL.D., and other literary gentlemen; Allibone, "Dict. of Brit. and Amer. Authors;" Davidson, "Hist. of the Presb. Church in Kentucky," p. 59; Thomas, "Biog. Dict. s. v. (J. L. S.)"

Smith, Samuel W. (1), a minister of the Methodist Episcopal Church, was born in England in 1812, and began to preach at the age of nineteen. In 1834 he raised one hundred thousand dollars, and several other liberal contributions, in order to labor until his death, March 16, 1858. See "Minutes of Annual Conferences," 1858, p. 99.

Smith, Samuel W. (2), a minister of the Methodist Episcopal Church, was a native of Ireland, and identified himself with the Wesleyan Methodists in Cork. On May 25, 1831, he reached Quebec, Ca., and shortly after removed to Point of Rocks, Md., still following his profession of teacher. He was licensed to preach in 1837, and was received on trial into the Baltimore Conference in March, 1838. After twen-

---

**Smith, Seth.** a minister of the Methodist Episcopal Church, was born in Bristol County, N. C., Feb. 1, 1815, and was admitted to the Order of Elder in Oneonta Conference, June 12, 1829. He removed to Indiana in 1834, was licensed to preach in 1837, and joined the travelling connection in 1838. He was a member of the South-east Indiana Conference, and labored faithfully until about a month previous to his death, Oct. 1, 1855. See "Minutes of Annual Conferences," 1855, p. 290.

**Smith, Socrates.** a minister of the Presbyterian Church, was born in Hesseimer, N. Y., June 16, 1814. He graduated from Dartmouth College in 1842 and entered the Union Theological Seminary, where he took the full course and graduated in 1845. He was soon thereafter ordained, and accepted a call Nov. 23, 1845, to Beards-town, Ill., as a stated supply. After remaining one year, he became a stated supply the Palestine Creek Church, Ill., where he remained until 1849, and then became teacher of a classical school in Greenville, Ill. He continued in this position until 1858, when he received a commission as home missionary, and labored at Jerseyville and Troy, Ill., to 1859. After this he resigned his commission and remained in charge of the church in Greenville until 1862. (W. P. S.)

**Smith, Stephen,** a minister of the Methodist Episcopal Church, was born in Hampshire County, Va., Nov. 1, 1802, and united with the Church in 1815. He was received into the Baltimore Conference in 1830. In 1844 he lost his voice while preaching in a new, damp church, and took a superannuated, and afterwards a superannuated salary. In 1847 he became very effective, so continuing until his death, Sept. 9, 1871. See "Minutes of Annual Conferences of the M. E. Church, South," 1872, p. 648.

**Smith, Sydney,** an English clergyman and celebrated humorist, was born in Woodford, Essex, in 1771, and was educated at Winchester School and New College, Oxford, where, in 1790, he obtained a fellowship and a prebendary. He was ordained a Deacon in 1791, and elected Preacher of the Church, he became, in 1794, curate of Amesbury, Wilts, but three years later went to Edinburgh as a private tutor to the son of the squire of his parish. During this time, he officiated in the Episcopal chapel there. In 1802, in connection with Jeffrey, Horner, Brough and others, he published a new quilt, in 1812, 2 vols. 8vo. Smith started the Edinburgh Review, to the first number of which, as editor, he contributed seven articles. In 1808 he went to London, and was soon popular as a preacher, as a lecturer on moral philosophy (1804-6), and as a brilliant conversationist. In 1805, during the short reign of the Whigs, he was presented by his Erkine to the rectory of Foston-le-Clay, Yorkshire, worth about five hundred pounds a year. Failing to exchange this for some more desirable living, he built a new rectory, and in 1814 moved into it with his family. Some eighteen years afterwards the duke of Devonshire gave him the living of Londesborough, seven hundred pounds a year, to hold until Mr. Howard, son of the earl of Carlisle, came of age. In 1838 lord chancellor Lyndhurst presented him to a prebendal stall in Bristol, and enabled him to exchange Foston for Combe Florey, Somersetshire. In 1831 earl Grey appointed him one of the canons residuary of St. Paul's. Having inherited considerable landed property on the death of his life-long friend Courtenay, he invested largely in the public stock of Pennsylvania; and the neglect of that state to pay the interest on her bonds called out his "Petition to Congress and Letters on American Debts." He died in London, Feb. 22, 1845. Sydney Smith was not only the wisest, but one of the wisest, men of his age. His writings were devoted to the removal of great abuses, and to the exposure of public vices and crimes at a time when vice
was enthroned in high places, and when so many perils environed the path of a reformer as to require, in even the mildest innovator, a large stock of humanity and an equal share of courage. Without the power and prestige which in England usually follow high birth or wealth, he exercised a greater influence over the public mind of his day than any man except, perhaps, lord Brougham. He erred at times in treating sacred subjects with levity and seeming irreverence; but this fault was of natural temperament and had root in infidelity. Although his Christianity partook of the temper of the time and circle in which he moved, and had, therefore, far less of the evangelical element than could be desired, it is yet clear that his life was mainly regulated by a strong sense of duty and that he found peace and comfort in his abiding faith in the great truths of religion. His writings are, Sir Sermons (Edinb. 1800, small 8vo)—contributions to the Edinburgh Review (published 1839)—Peter Pleydell's Letters (1807), to promote Catholic emancipation:—Sermons (1809, 2 vols.).—Speeches on Catholic Claims and Reform Bill (1835-38):—Three Letters to Archdeacon Simpson on the Ecclesiastical Commission (1837-38):—The Ballot (1837):—Letter to Lord John Russell on the Church Hills (1838):—Letters on Railways (1842):—Letters on American Debt (1843). After his death appeared, Fragments on the Irish Roman Catholic Church (Lond. 1845, 8vo):—Sermons (ibid. 1846, 8vo):—Eleven Discourses on Morals (ibid. 1846, 8vo). See Memoir of Rev. Sydney Smith, by his daughter, lady Holland (N. Y. 1855, 2 vols. 12mo); Allibone, Dict. of Brit. and Amer. Authors, s. v.

Smith, Thomas (1), a learned English divine and writer, was born in the parish of Allhallows, Barking, Essex, June 3, 1838, and was educated at Queen's College, Oxford, being elected fellow in 1866. In June, 1868, he, as chaplain, accompanied sir Daniel Harvey, ambassadour-at-large, to Constantinople, and returned in 1871. In 1876 he travelled in France, and returning shortly before he became chaplain to Sir Joseph Williamson, secretary of state. In 1883 he took the degree of D.D., and the year following was presented by his college to the rectory of Stanlake, diocese of Oxford, but resigned it in a month. In 1887 he was collated to a prebend in the church of St. Helyer's, Westminster. In August he was deprived of his fellowship by Dr. Giffard because he refused to live among the new papish fellows of that college. He was, however, restored in October following; but afterwards, refusing to take the oaths to William and Mary, his fellowship was pronounced void, June 13, 1890. His lectures in London, 1839, 1840. Among his learned works are the following: Distributia de Chalcediaca Paschae (Oxon. 1662, 8vo);—Symposia de Drujum Moribus ac Institutis (Lond. 1664, 8vo):—Epistola Duce, etc. (Oxon. 1672, 8vo);—De Graeco Eclesiae Medii Historio Statu Epistola (ibid. 1674, 8vo):—Miscellanea (2 vols. 12mo; vol. i, 1868; vol. ii, 1869):—Epistola et Annal. Compend. ab A.D. 1602 ad 1629, etc. (1691, 4to). See also Allibone, Dict. of Brit. and Amer. Authors, s. v.; Darling, Cyclop. Bibliog. s. v.; Chalmers, Biog. Dict. s. v.

Smith, Thomas (2), a Congregational minister, was born in Boston, Mass., March 10, 1702, graduated from Harvard in 1720, and was licensed to preach in April, 1722. On account of his youth he declined a call from the church in Belchertown; took a preaching in various places as a supply. On March 8, 1727, a Church was constituted at Falmouth and Mr. Smith was ordained its pastor, and continued such until 1764, when, on account of infirmity, he received Rev. Samuel Deane as his colleague. He, however, preached in his turn until his death, which took place May 29, 1785. The only publications of Mr. Smith are a Sermon (1756) at the ordination of Rev. Solomon Lombard, and a Practical Discourse to Seafaring Men (1771), See Sprague, Annales of the Amer. Pulpit, i, 236.

Smith, Thomas (3), a Methodist Episcopal minister, was born in Kent County, Md., June 3, 1776. He was converted in early life, began to preach in his eighteenth year, and in 1793 was licensed to preach at the Philadelphia Conference May 20, 1798, and "the demonstrations which had attended Abbott's labors were repeated at almost all his appointments, and hundreds of souls were gathered into the societies." He labored as follows: Caroline Circuit, 1798; Flanders Circuit, N. J., 1799; Northampton Circuit, Va., 1800-1; Dover, Del., 1802; Annamissic, Md., 1803; Talbot Circuit, 1804; Seneca Circuit, N. Y., 1805; Burlington, N. J., 1806; Asbury, N. J., 1807; Lewiston, Del. 1808; St. George's, Philadelphia, 1809; Cecili, Md., 1810; Smyrna, Del., 1811; Kent, Md., 1812; Acacomack, Va., 1813; from 1814 to 1816 he was allowed a respite on account of ill-health; Kent Circuit, 1817; New Brunswick, 1818; Kensing, in 1819, Kearns, 1820-21; supernumerary in 1822, in which relation he continued until his death, in May, 1844. Mr. Smith was a man of unquestioned piety, a superior pastor, and a powerful preacher. He preached "with the utmost brevity, but with the utmost power." He possessed a faith admirable in its strength and in its simplicity. Minutes of Annual Conferences, iii, 595; Experience and Ministerial Labors of the Rev. Thomas Smith, edited by the Rev. David Daily (N. Y. 1848); Stevens, Hist. of the M. E. Church, iii, 379, 415; iv, 269. (J. L. S.)

Smith, Thomas (4), a Congregational minister, was born in Litchfield, Me., Aug. 17, 1812. Converted at the age of twenty-one, he set out to prepare himself for the ministry by his own exertions prepared for college, graduated at Bowdoin College in 1840, and at Bangor Theological Seminary in 1843. He preached in Maine at Cherryfield and Orrington, and in 1849 became pastor of Brewer Village, where he continued until his death, April 7, 1861. Mr. Smith was pre-eminently a man of piety and charity, endeared by his people. He was much attached to his work, and pursued his objects with unconquerable energy. See Congregational Quarterly, 1861, p. 376.

Smith, Thomas C., a Methodist Episcopal minister, was born Jan. 1, 1807, embraced religion in 1824, was admitted on trial in the South Carolina Conference Feb. 11, 1826, and appointed to Washington Circuit, Ga.; returned thence in 1828 to Virginia, entered in connection in 1830, and sent to Morganton Circuit; Cooper River Circuit in 1831-32; supernumerary on Lancaster Circuit in 1833; returned effective and appointed to Lincolnton Circuit in 1834; superannuated in 1835, in which relation he continued until his death, Nov. 27, 1885. He was a man of eminent preaching abilities, and was much beloved by those with whom he labored. See Minutes of Ann. Conf., iii, 575.

Smith, Thomas G., a Dutch Reformed minister, was born in Scotland in 1756, came to America in 1774, and enlisted actively in the cause of American independence. After the Revolutionary war he studied for the ministry under Dr. John Mason, and obtained license to preach in 1785 from the Associate Reformed Church. His ministry covered the period of forty-six years, during most of which (1808 to 1837) he was pastor of the Reformed Dutch Church at Tarrytown, N. Y. He had previously been settled in the Associate Reformed Church in Orange County, and then in Ulster County, in the churches of Esopus, Blooming Grove, and Hurley. He was always a favorite preacher, popular in manner, evangelical in spirit, and Calvinistic in creed, and in the pulpit was particularly practical and experimental. He possessed a sound mind in a sound body, and a warm heart with a vigorous intellect. His ministry was discriminating, and in every respect useful and honored. See Corwin, Manual of the Reformed Church, p. 191, 220. (W. J. R. T.)

Smith, Turner H., a minister of the Methodist Episcopal Church, South, was born in Buncombe County, N. C., May 15, 1818, and moved to Missouri in 1853,
He united with the Church in 1839, was licensed to preach in 1846, and entered the St. Louis Conference in 1851. He was ordained deacon Oct. 1, 1854; and elder Oct. 12, 1856. He died April 20, 1857. See Minutes of Annual Conferences of the M. E. Church, South, 1857, p. 744.

**Smith (or Smyth), William** (1), an English prelate, was a native of Lancashire, and born about the middle of the 16th century. He took his LL.B. degree at Oxford before 1492, when he was presented to the rectory of Cheshunt, Hertfordshire, by the countess of Richmond. Previous to this (Sept. 20, 1485) he was appointed clerk of the hanaper, and a few years after was promoted to the deanship of St. Stephen's, Westminster. In 1493 he was consecrated bishop of Lichfield and Coventry. He was shortly afterwards made president of the prince's council within the marches of Wales. There was a renewal of this commission in the seventeenth year of Henry VII, of which Smith was again lord-president. In 1495 he rebuilt the hospital of St. John, Lichfield, and gave a new body of statutes for the use of the society. Bishop Smith was translated to the see of Lincoln in November, 1495. In 1500 he was elected chancellor of Oxford, and in 1507-8 he concerted the plan of Brasenose College, along with his friend Sir Richard Sutton, and lived to see it completed. He died at Buckden, Jan. 2, 1518 (1514), and was interred in Lincoln Cathedral. See Charton, Lives of the Founders; Chalmers, Hist. of Oxford; Hook, Ecclesi. Biog.; Chalmers, Biog. Dict. s. v.

**Smith, William** (2), a learned English divine, was born in Worcester in 1711, and educated at the grammar-school of that city, and afterwards at New College, Oxford, from which he graduated in 1732. In 1735 he was presented by James, earl of Derby, to the rectory of Trinity Church, Chesterton, and by his will to the deanery of Chester in 1758. He held the mastership of Brentwood School, Essex, for one year, 1748; and in 1758 was nominated one of the ministers of St. George's Church, Liverpool, which he resigned in 1767. With his deanship he held the parish churches of Handley and Trinity; and in 1780 resigned the last for the rectory of West Kirkby. He died Jan. 12, 1787. He is known in the literary world chiefly by his valuable translation of Longinus on the Sublime (1738, 8vo):

_Thyedides_ (1738, 2 vols. 4to; reprinted in 1781, 8vo):

—_Xenophon's History of the Affairs of Greece_ (1770, 4to).

**Smith, William** (3), D.D., an Episcopal clergyman, was born in Aberdeen, Scotland, in 1727, and was graduated at the college in his native city in 1747. For three years he taught a parochial school, and in 1750 came to the United States. He acted as private tutor in the family of Gov. Martin, on Long Island, for two years, when he was invited to take charge of the Seminary in Philadelphia, which has since become the University of Pennsylvania. He accepted, went to England for holy orders, and being ordained in December, 1758, returned, and in the May following took charge of the institution. In 1759 he returned to England and received his degree of D.D. from the University of Oxford, and about the same time from Aberdeen College. A few years after the same degree was conferred upon him by Trinity College, Dublin. In 1766 the mission in Oxford being vacant, Dr. Smith undertook to supply it, and was chosen deacon and canon, and was at his own request on the list of the society's missionaries the next year. Dr. Smith held a somewhat indecisive attitude in the contest that resulted in the nation's independence. The charter of the College of Philadelphia being taken away in November, 1778, Dr. Smith became rector of Chester Parish, Md., and established a classical seminary, which in June, 1782, was chartered as Washington College, of which he became president. He was president of the convention which organized the Protestant Episcopal Church, and in June following was elected bishop of Maryland; but finding strong opposition to an episcopate in that state, and others elsewhere opposed to his consecration, he gave up the matter altogether. In 1783 he took charge also of St. Paul's Parish, Richmond, which he held for two years. He was on the committee appointed in 1782 to revise the Prayer-book. In 1789, the charter of the College of Philadelphia having been restored, he again became its president. He died at Philadelphia, May 14, 1803. "Dr. Smith was a learned scholar, an eloquent and greatly popular preacher, and distinguished as a teacher of the liberal arts; and, as an author, he was the author of many occasional sermons, addresses, letters, pamphlets, etc., of which a selection was published, with a preface by bishop White, under the title of The Works of William Smith, D.D. (Phila. 1803, 2 vols. 9vo). For a complete list of these works, see Sprague, Annales of the Amer. Church, vol. vi, 161; also Allibone, Dict. of Brit. and Amer. Authors. s. v.; Duyckinck, Cyclop. of Amer. Lit., i, 388; Rich, Bibl. Amer. Nova, i, 111, 129, 225, 245, 357.

**Smith, William** (4), D.D., an Episcopal clergyman, was born in Scotland about 1754, and came, an ordained minister, to the United States in 1785. Shortly after he had settled in Stepenai Parish, Md., and after remaining there three years, he became rector of St. Paul's Church, Narraganset, R. I. He left Jan. 28, 1790, to assume the rectorship of Trinity Church, Newport, R. I. He was instrumental in organizing the Church in Rhode Island. He left Newport April 12, 1797, to take charge of St. Paul's Church, Norwalk, Conn., where he remained until 1800, when he removed to New York, where he opened a grammar-school. In 1802 he became principal of the Episcopal Academy at Cheshire, N. Y., which he left in 1806, and returned to New York, where he died, April 6, 1821. He was author of The Reasonableness of Setting Forth the Praises of God (N. Y. 1814, 12mo):—Essay on the Christian Ministry:—Chants for Public Worship:—Office of Institution of Ministers, in the American Prayer-book:—also occasional sermons and articles in periodicals. See Allibone, Dict. of Brit. and Amer. Authors, s. v.; Sprague, Annales of the Amer. Church, s. v. 343.

**Smith, William** (5), D.D., a Presbyterian minis-
ter, was born in Hanover, Pa., July 17, 1759. He entered Jefferson College, and was graduated; but was appointed to a tutorialship in the same. In 1821 he was inducted into the professorship of ancient languages. He held this position with marked ability for a quarter of a century, when, on the division of the chair and the appointment of a professor of the Latin language, he was made vice-president of the college and professor of the Greek language and literature. Such he continued at the union of the Canonsburg and Jefferson colleges in 1865. Dr. Smith was a profound linguist, and an able teacher of the languages. Preferring retirement after so long a service, he resigned, and was made emeritus professor, the college being unwilling to part with a man of such eminent attainments. He died at Canonsburg, July 17, 1878. (W. P. S.)

**Smith, William** (6), a minister of the Methodist Episcopal Church, was admitted on trial in the Philadelpia Conference in 1802, was ordained deacon in 1804, and elder in 1806. He located in 1819, but in 1825 his name appears on the Minutes as supernumerary, which relation he held until 1822, when he was ordina-
ted, and so continued until his death at Long Branch, N. J., April 8, 1854. See Minutes of Annual Conferences, 1854, p. 332.

**Smith, William** (7), a Methodist Episcopal minis-
ter, was born in Niagara, Upper Canada, March 26, 1802, was converted when about twenty years of age, joined the Methodist Episcopal Church in Canada, and
SMITH 831

SMYRNA

preparèd himself for the ministry in Cæzennia (N.Y.) Seminary. He was admitted to the Canis College, in 1827, in which he served with fidelity and acceptableness during a period of eight years, filling such responsible stations as Brockville, Kingston, and Toronto. In 1835 he removed to New England, and in 1836 was received into the New England Conference, and preached successively at Williamsburg, Westfield, Charlestown, Lynn, Wood End, and Church Street, Boston, where he died, March 30, 1843. He was a good man, and benevolence, faithfulness, and conscientiousness were among the traits of his character. In doing the work of a pastor he shone pre-eminent. See Minutes of Annual Conferences, iii, 430.

Smith, William, (8), a minister of the Methodist Episcopal Church, was born in Kenilworth, England, Feb. 26, 1826, was converted at the age of eleven, and was licensed to preach when but sixteen. He came to the United States in 1857, and was received on trial by the Upper Iowa Conference in 1858. In 1871 he was appointed presiding elder, but was prevented from completing his term of four years’ service by death, May 29, 1875. See Minutes of Annual Conferences, 1875, p. 128.

Smith, William, (9), a minister of the Methodist Episcopal Church, was converted and united with the Mount Pleasant (Pa.) Church, Ralstin Circuit. In 1856 he was licensed to preach, and received on trial in the Philadelphia Conference. In 1864 his health declined, and he was superannuated. He died at Mobile, aged sixty years. See Minutes of Annual Conferences, 1863, p. 35.

Smith, William Andrew, a minister of the Methodist Episcopal Church, South, was born in Fredericksburg, Va., Nov. 29, 1802. He received a good English education in Petersburg, united with the Church at the age of seventeen, and was admitted into the Virginia Conference in February, 1825. In 1839 he became agent for the Randolph Macon College, and afterwards continued to fill the chief stations in his conference until 1846, when he accepted the presidency of the college. This office he held for twenty years, and acted also as professor of rhetoric, logic, and mental and moral philosophy. In 1865 he resigned the presidency, and was transferred to the St. Louis Conference. He was elected president of Central College, Mo., in 1868. In October of the same year he became the subject of a disease that eventually caused his death, March 1, 1870. Mr. Smith was one of the leading minds of the Methodist Episcopal Church, South. See Minutes of Annual Conferences of the M. E. Church, South, 1875, p. 479.

Smith, William R., a Presbyterian minister, and son of Robert Smith R. D.D., was born at Prescot, Pa., May 10, 1752. He graduated at Princeton, N. J., in 1773, was licensed to preach by the Presbytery of Newcastel, Del., in 1776, and was settled as pastor of the Second Church in Wilmington about 1786. He resigned his charge in 1796, and became pastor of the Reformed Dutch churches of Harlingen and Shannock, N. J., in which relation he died, about the year 1815. The Rev. Dr. Thomas Dewitt writes, “I remember him while I was studying theology at New Brunswick, 1810–12. He was plain in his manners, a judicious and instructive preacher, without much power of eloquence; a faithful pastor, and amiable and exemplary in his spirit and deportment.” See Sprague, Annals of the American Presbyterian, iii, 173.

Smith, Worthington, D.D., a Congregational minister, was born in Hadley, Mass., 1795. He graduated at Williams College in 1816, studied theology at Andover, and was licensed to preach in 1819. He was minister at St. Albans, Vt., 1825–49, and was president of the University of Vermont from Vermont’s death at St. Albans, Feb. 18, 1836. He published separate Sermons (1846, 1848, 1849) and a volume of Sermons, with a Memoir of his Life by Rev. Joseph Torrey (Andover, 1861, 12mo).

Smithers, William Collier, D.D., an English clergyman, was born in 1796, and was educated at Queen’s College, Oxford. He served the cure of St. Alphage, Greenwich, for eighteen years, that of Chariton for five years, and was also principal of a school. He died at Maize Hill, Greenwich, Feb. 19, 1861. His works were principally educational, as, The Classical Student’s Manual:—On the Particles, the Middle Verb, etc. See Allibone, Dict. of Brit. and Amer. Authors, s. v.

Smoke usually γαστή, askān, καντόν; but in Gen. xix, 29; Psa. cxvii, 83, the stronger word ρινεσ, kōtō, is used, like ρινομα, Matt. xii, 20. On the expression "pilars of smoke" (Joel ii, 30, 31; Acts ii, 19, 20) "Thomson remarks (Land and Book, ii, 311) that they are probably those columns of sand and dust raised high in the air by local whirlwinds, which often accompany the sirocco. On the great desert of the Haurān I have seen a score of them moving with great rapidity over the plain." See Wieland.

Smotherman, Jesse S., a minister of the Methodist Episcopal Church, South, was admitted into the Memphis Conference in 1854. He labored in the regular work of the ministry (with the exception of one year’s service in the army during the rebellion) until his death, in 1868. See Minutes of Annual Conferences of the M. E. Church, South, 1865, p. 435.

Smyrna, in Grecian mythology, was (1) the mother of Adonis, commonly called Myrrha; (2) one of the Amazons from whom the town in Asia Minor derived its name.

Smyrna (Σμύρνα, myrrrh), a city which derived its Biblical importance from its prominent mention as the seat of one of the Apostolic churches of Asia Minor (Rev. ii, 8–11). In the following account we freely condense the ancient and modern information on the subject.

I. History.—This celebrated commercial city of Ionia (Ptol. v, 2) is situated near the bottom of that gulf of the Ægean Sea which receives its name from it (Mela, i, 17, 3), at the mouth of the small river Meles, and 520 stadia north of Ephesus (Strabo, xvi, 682). It is in N lat. 38° 29′; E long. 27° 7′. Smyrna is said to have been a very ancient town founded by an Amazon of the name of Smyrna, who had previously conquered Ephesus. In consequence of this, Smyrna was regarded as a colony of Ephesus. The Ephesian colonists are said afterwards to have been expelled by Æolianis, who then occupied the place, until the establishment of the Colophonians. The Ephesian colonists were enabled to re-establish themselves at Smyrna (ibid. xiv, 683; Steph. B. s. v.; Pliny, v, 31). Herodotus, on the other hand (i, 150), states that Smyrna originally belonged to the Æolianis, who admitted into their city some Colophonian exiles; and that these Colophonians afterwards having a festival which was celebrated outside the town, made themselves masters of the place. From that time Smyrna ceased to be an Æolian city, and was received into the Ionian confederacy (comp. Paus. vii, 5, i). So far, then, as we are guided by authentic history, Smyrna belonged to the Æolian confederacy until the year B.C. 698, when, by an act of treachery on the part of the Colophonians, it fell into the hands of the Ionians and became the thirteenth city in the Ionian League (Heron. loc. cit.; Paus. loc. cit.). The city was attacked by the Lydian king Gyges, but successfully resisted the aggressor (Heron. i, 14; Paus. ix, 29, 2). Alyattes, however, about B.C. 627, was more successful; he took and destroyed the city, and burnt it for a period of 400 years, it was desolated and in ruins (Heron. i, 16; Strabo, xiv, 640), though some inhabitants lingered in the place, living υμβιον, as it is stated by Strabo, and as we must infer from the fact that Scylax (p. 37) speaks of Smyrna as still existing. Alexander the Great it is said divided the city among the Athenians, citizens of the city (Paus. vii, 5, 1) soon after the battle of the Granicus, in consequence of a dream when he had lain down to sleep after the fatigue of hunting. A temple in which two goddesses were worshipped under the name of Nemese stood on the hill, on the sides of which
the new town was built under the auspices of Antigonus and Lysimachus, who carried out the design of the conqueror after his death. The new city was not built on the site of the ancient one, but at a distance of twenty stadia to the south of it, on the southern coast of the bay, and partly on the side of a hill which Pliny calls Mount Sipylus, but principally in the plain at the foot of it extending to the sea. After its extension and embellishment by Lysimachus, new Smyrna became one of the most magnificent cities, and certainly the finest in all Asia Minor. The streets were handsome, well paved, and drawn at right angles, and the city contained several squares, ports, a public library, and numerous temples and other public buildings; but one great drawback was that it had no drains (Strabo, loc. cit.; Murm. Oxsm. No. 5). It also possessed an excellent harbor which could be closed, and continued to be one of the wealthiest and most flourishing commercial cities of Asia. It afterwards became the seat of a conventus judicialis, which embraced the greater part of Eolis as far as Magnesia, at the foot of Mount Sipylus (Cic. Pro Flacc. p. 30; Pliny, v., 31). During the war between the Romans and Mithridates, Smyrna remained faithful to the former, for which it was rewarded with various grants and privileges (Liv. xxxv.; xcvii., 16, 51; xcviii., 89). It is said that it suffered much when Trebonius, one of Caesar's murderers, was besieged there by Dolabella, who in the end took the city, and put Trebonius to death (Strabo, loc. cit.; C. Phil. x., 2; Liv. Epit. 119; Dion Cass. xlvii., 29). In the reign of Tiberius, Smyrna had conferred upon it the equivalent honor of being allowed, in preference to several other Asiatic cities, to erect a temple to the emperor (Tac. Ann. iii., 63; iv., 56). During the years 177 and 180 Smyrna suffered much from earthquakes, but the emperor Aurelius did much to alleviate its sufferings (Dion Cass. lxxi., 32). It is well known that Smyrna was one of the places claiming to be the birthplace of Homer, and the Smyrneans themselves were so strongly convinced of their right to claim this honor that they erected a temple to the great bard, or a οἴσιαν, a splendid edifice containing a statue of Homer (Strabo, loc. cit.; C. Pro Arch. 9); they even showed a cave in the neighborhood of their city, on the little river Meles, where the poet was said to have composed his works. Smyrna was at all times not only a great commercial place, but its schools of rhetoric and philosophy also were in great repute. The Christian Church also flourished through the zeal and care of its first bishop, Polycarp, who is said to have been put to death in the stadium of Smyrna in A.D. 166 (Iren. iii., 176). Under the Byzantine emperors the city experienced great vicissitudes. Having been occupied by Tzachas, a Turkish chief, about the close of the 11th century, it was nearly destroyed by a Greek fleet, commanded by John Ducas. It was restored, however, by the emperor Comnenus, but again subjected to severe sufferings during the siege of Tamerlane. Not long after, it fell into the hands of the Turks, who have retained possession of it ever since.

II. Characteristics.—Smyrna contained a temple of the Olympian Zeus, with whose cult that of the Roman emperors was associated. Olympic games were celebrated here, and excited great interest. On one of these occasions (in the year 68), a Rhodian youth of the name of Artemidorus obtained greater distinctions than any on record, under peculiar circumstances which Pausanias relates. He was a pancratist, and not long before had been beaten at Elis from deficiency in growth. But when the Smyrnean Olympia next came round, his bodily strength had so developed that he was victor in three trials on the same day—the first against his former competitors at the Peloponnesian Olympia, the second with the youths, and the third with the men; the last contest having been provoked by a taunt (Paus. v., 14, 4). The extreme interest excited by the games at Smyrna may perhaps account for the remarkable ferocity exhibited by the population against the aged bishop Polycarp. It was exactly on such occasions that what the pagans regarded as the unpatriotic and anti-social spirit of the early Christians became most apparent; and it was to the violent demands of the people assembled in the stadium that the Roman preconsl yielded up the martyr. The letter of the Smyrneans, in which the account of his martyrdom is contained, represents the Jews as taking part with the Gentiles in accusing him as an enemy to the state religion—conduct which would be inconceivable in a sincere Jew, but which was quite natural in those who were accused under the label characterizes as "a Buddhist of Satan" (Rev. ii., 9).

In the vicinity of Smyrna was a Macedonian colony settled in the country under the name of Hyrcania. The last are probably the descendants of a military body in the service of Seleucus, to whom lands were given soon after the building of new Smyrna, and who, together with the Magnesians, seem to have had the Smyrnean citizenship then bestowed upon them. The decree containing the particulars of this arrangement is among the marbles in the University of Oxford. The Romans continued the system which they found existing when the country passed over into their hands.

Not only was the soil in the neighborhood eminently productive, so that the vines were even said to have two crops of grapes, but its position was such as to render it the natural outlet for the produce of the whole valley of the Hermus. The Pammean wine (which Nestor, in the Iliad, and Cirece, in the Odyssey, are represented as mixing with honey, cheese, and meal, to make a kind of salad-dressing) grew even down to the time of Pliny in the immediate neighborhood of the temple of the Mother of the Gods at Smyrna, and doubtless played its part in the orgiastic rites both of that deity and of Dionysus, each of whom in the times of imperial Rome possessed a guild of worshippers frequently mentioned in the inscriptions as the ιδρυς σύνοδος μυστών μητρός Συμφηλής and the ιερα σύνοδος μυστών και τεχνίτων Διοισών. One of the most remarkable of the chefs-d'œuvre of Myron which stood at Smyrna, representing an old woman intoxicated, illustrates the prevalent habits of the population.

The inhabitants of new Smyrna appear to have possessed the talent of successfully divining the course of events in the troublous times through which it was their destiny to pass, and of habitually securing for themselves the favor of the victor for the time being. Their admiration for Seleucus and his son Antiochus was excessive. The title ὁ Θεός καὶ οὐράριος is given to the

Coin of Smyrna (with the head of Cybele).
latter in an extant inscription; and a temple dedicated to his mother, Stratoucine, under the title of Ἀφροδίτη Στρατοπούσα, was not only constituted a sanctuary itself, but the same right was extended in virtue of it to the whole city. Yet when the tide turned, a temple was erected to the city of Rome as a divinity, in time to save the credit of the Smyrniarchs as zealous friends of the Roman people. Indeed, though history is silent as to the particulars, the existence of a coin of Smyrna with the head of Mithridates upon it indicates that this energetic prince also, for a time at least, must have included Smyrna within the circle of his dependencies. However, during the reign of Tiberius, the reputation of the Smyrniarchs for an ardent loyalty was so unsullied that on this account alone they obtained permission to erect a temple, in behalf of all the Asiatic cities, to the emperor and senate, the question having been for some time doubtful as to whether their city or Sardis (q.v.) — the two selected out of a crowd of competitors — should receive this distinction. The honor which had been obtained with such difficulty was requited with a proportionate adulation. Nero appears in the inscriptions as σωρεύς τῶν στίχων τοῦ Σωτῆρος Νῖκου.

It seems not impossible that just as Paul's illustrations in the Epistle to the Corinthians are derived from the Isthmian games, so the message to the Church in Smyrna contains allusions to the ritual of the pagan mysteries which prevailed in that city. The story of the violent death and reviviscence of Dionysus entered into these to such an extent that Origen, in his argument against Celsus, does not scruple to quote it as generally accepted by the Greeks, although by them interpreted metaphysically (iv, 171, ed. Spence). In this view, the words ὁ πρῶτος καὶ ὁ οίκος, ὡς ἐγένετο ὁ θεός καὶ ἔγενεν ὁ θεός, would come with peculiar force to ears perhaps accustomed to hear them in a very different application. The same may be said of ὅτως σου τῶν στίχων τῆς ζωῆς, it having been a usual practice at Smyrna to present a crown to the priest who superintended the religious ceremonial, at the end of his year of office. Several persons of both sexes have the title of στίχωνος in the inscriptions; and the context shows that they possessed great social consideration. These allusions derive additional force from the superstitious regard in which the Smyrniarchs held chance phrases (εὐλογίας) as a material for augury. They had a ἀνάθεμα ἱστορὶ τῆς δήμου just above the city outside the walls, in which this mode of divination was the ordinary one (Pausan. ix, 11, 7).

III. Present Condition.—From the convenience of its situation, Smyrna has still maintained its rank as a great city and the central emporium of the Levantine trade; and seeing the terrible decay which has fallen upon the numerous great and beautiful cities of Asia Minor, its relative rank among the existing cities of that region is probably greater than that which it anciently bore. The Turks call it İzmir. It is a better-built town than Constantinople, and in proportion to its size there are few places in the Turkish dominions which have so large a population. It is computed at from 180,000 to 200,000, according to the season of the year; and the Franks compose a far greater proportion than in any other town of Turkey; and they are generally in good circumstances. Next to the Turks the Greeks form the most numerous class of inhabitants, and they have a bishop and two churches. The unusually large proportion of Christians in the town renders it peculiarly unclean in the eyes of strict Moslems, whence it has acquired among them the name of Giouar İzmir, or Infidel Smyrna. There are in it 20,000 Greeks, 8000 Armenians, 1000 Europeans, and 9000 Jews: the rest are Moslems.

The prosperity of Smyrna is now rather on the increase than the decline; houses of painted wood are giving way in all directions to mansions of stone; and probably not many years will elapse before the modern
SMYRNA 834 SMYTONITE CONTROVERSY

town may not unworthily represent that city which the ancients delighted to call "the lovely—the crown of Ionia—the ornament of Asia." It is the seat of a pashalik, and is the centre of all important movements in Asia Minor.

Smyrna stands at the foot of a range of mountains which enclose it on three sides. The only ancient ruins are upon the mountains behind the town, and to the south. Upon the highest summit stands an old dilapidated castle, which is supposed by some to mark the previous (but not the most ancient) site of the city; frequent earthquakes having dictated the necessity of removing it to the plain below, and to the lower elevations of the mountains. Mr. Arundell says, "Few of the Ionian cities have furnished more relics of antiquity than Smyrna; but the convenience of transporting them, with the number of investigators, has exhausted the mine. It is therefore not at all wonderful that of the stoa and temples the very ruins have vanished; and it is now extremely difficult to determine the sites of any of the ancient buildings, with the exception of the stadium, the theatre, and the Temple of Jupiter Acraeus, which was within the acropolis" (Discoveries in Asia Minor, ii, 407). Of the stadium here mentioned the ground-plot only remains, it being stripped of its seats and marble decorations. It is supposed to be the place where Polycarp, the disciple of John, and probably "the angel of the Church of Smyrna" (John ii, 8), to whom the Apocalyptic message was addressed, suffered martyrdom. The Christians of Smyrna hold the memory of this venerable person in high honor, and go annually in procession to his supposed tomb, which is at a short distance from the place of martyrdom.

Smyrna has a deep interest to Christians from this fact. During one of the Roman persecutions many Christians suffered the most dreadful torments here. They were put to death at the stake, or by wild beasts in the amphitheatre; and the only test applied to them was whether they would throw a few grains of incense into the fire as a sacrifice to the genius of the emperor, or whether they would refuse. A circular letter addressed to the churches in the Christian world from that of Smyrna gives a most interesting account of Polycarp's death, and Neander has admirably translated, abridged, and systematized it. The processual before whom Polycarp was accused did all he could to save the venerable bishop, now in his ninetieth year; and when, like Pontius Pilate before him, he found it impossible to restrain the popular fury, he refused to allow any wild beasts to be let loose, and Polycarp, abandoned to the populace, was fastened to a stake and soon surrounded with flames. An old tradition states that the flames formed an arch above the head of the martyr, and left him uninjured; seeing this, a Roman soldier pierced him to the heart with a spear, and the fire then did its office, and consumed the lifeless body. It is, however, as Neander observes, more rational to believe that Polycarp died as Ridley and Latimer have done in more modern times. It is by no means improbable that Polycarp was confined in some one of the arched vaults within the acropolis, which remain to this day. An ancient mosque is also standing, which is said to have been the Church of St. John; but tradition is not much to be depended upon for assigning the correct site to such buildings, and the edifices of Smyrna are constructed of a white and peculiarly friable marble not adapted for great purposes. The Apocalyptic message to the Church at Smyrna is one which conveys no reproach, and it has been often brought forward as a proof of the inspiration of the book in which it is found, that Smyrna has been always a flourishing city, and that there has been, ever since the days of the apostle, a numerous congregation of Christians among her inhabitants. This, however, has not been, strictly speaking, the case, and it is easy to carry such a mode of proving the truth of Scripture too far; but it is satisfactory to know that true religion is greatly on the increase in this important city, and that the labors of Protestant missionaries have been abundantly successful.

1. Authority.—1. Anc. Strabo, xiv, 183 sq.; Herodotus, i, 16; Tacitus, Annal. iii, 63; iv, 56; Pliny, H. N. vi, 29; Böckh, Inscription. Græc. "Smyrnæan Inscriptions," especially Nos. 3135-3176; Pausanias, loc. cit., and iv, 21, 5; Macrobius, Saturnalia, i, 18.

Smyth, Thomas, D.D., a Presbyterian minister, was born in Belfast, Ireland, July 14, 1808. He was educated at Belfast and at London, and came to the United States in 1830. He was graduated at Princeton Theological Seminary, N. J., after which he was pastor of the Second Presbyterian Church at Charleston, S. C., from 1832 until his death, Aug. 20, 1873. He was the author of numerous works, chiefly in illustration and defence of the Presbyterian form of Church government; also of The Unity of the Human Race Proved to be the Doctrine of Scripture, Reason, and Science (1860), and The True Origin and Source of the Mecklenburg Declaration of Independence. (W. P. S.)

Smyth, William. See Smith, William (1).

Smytonite Controversy was a dispute which arose in the Secession Kirk about the middle of the

View of Smyrna. (From a photograph.)
18th century respecting the elevation of the elements in celebrating the Lord's supper. One of the ministers of that body, Mr. Smyth, of Kilmarnock, considered such elevation an essential part of the ordinance, but the synod determined that it should be left an open question.

**Snail** is the representative in the A. V. of two Hebrew words, which are certainly the names of very different animals.

1. *Chōmēt* (.QLabel); Sept. *αἰπαί*; Vulg. *lacerata* occurs only as the name of some unclean animal in Lev. xi. 30. The Sept. and Vulg. understand some kind of lizard by the term; the Arabic versions of Erpenius and Saadias give the *chameleōn* as the animal intended. The Veneto-Greek and the rabbins, with whom agrees the A. V., render the Heb. term by "snail." B-çhârt (Heresii. ii. 500) has endeavored to show that a species of small sand-lizard, called *chulaca* by the Arabs, is denoted; but his argument rests entirely upon some supposed etymological foundation. The word *chōmēt* in Chaldee is said to signify "to bow down," and therefore "suggests the *Lacerta stellio*", which is noted for bowing its head, insomuch that the followers of Mohammed kill it, because they say it mimics them in the mode of repeating their prayers. It is about a foot in length, and of an olive color shaded with black" (Kitto, Pet. Bib. ad loc.). The lizard referred to appears to be the skink (*Scincus officinalis*), which is very abundant throughout Northern Africa, Arabia, and Syria. MM. Dumeril and Bibron, in their elaborate work on reptiles, give us the following information of the species: "M. Lefèvre, who collected several of these animals during his excursion to the oasis of Barhizah, has communicated to us several observations on the habits of this species which we cannot omit. According to this zealous entomologist, the skink is found on hillocks of fine light sand, which the south wind accumulates at the bottom of hedges that border on cultivated grounds, and around the roots of tamarisk-trees, which grow on the confines of the desert. It may be there seen basking in the rays of the sun, when the heat is intense, and, from time to time, giving chase to beetles and other insects which happen to pass near it. It runs with considerable rapidity, and when alarmed it buries itself in the sand with singular quickness, burrowing in a few moments a gallery of many feet in depth. When caught it struggles to escape, but neither attempts to bite nor to defend itself with its claws."

Col. H. Smith, without specifying his reasons, takes the *chōmēt* to be the true lizard (that is, we presume, the genus *Lacerta*) as restricted in modern herpetology—"several (probably many) species existing in myriads on the rocks in sandy places and in ruins in every part of Palestine and the adjacent countries. There is one species particularly abundant and small, well known in Arabia by the name of *sawabendi*. Of these Lord Lindsay says, speaking of his approach to Sinai, "hundreds of little lizards, of the color of the sand, and called by the natives *sawabendi*, were darting about."

In the present imperfect state of our acquaintance

with the reptiles of Western Asia, it is perhaps impossible to determine with satisfaction the actual species intended by some of the ancient Hebrew names. That the chōmēt was some one or other of the common kinds there can be little doubt, and this is all we can venture to say. Lizards of many sorts abound in these lands; they delight in a burning sun, in a dry sandy soil, in stony deserts, in ruined edifices. Moore's picture of "Gray lizards gittering on the walls Of old fine woods, bay and clean. As they were all alive with light," is intensely true, and highly characteristic of the sun-scorched East. All travellers are struck with this element of the scene. Major Skinner says of the Syrian desert, "The ground is teeming with lizards; the sun seems to draw them from the earth, for sometimes, when I have fixed my eye upon one spot, I have fancied that the sands were getting into life, so many of these creatures at once crept from their holes." Lord Lindsay describes the ruins at Jerash as "absolutely alive with lizards." Bruce says, "I am positive that I can say without exaggeration that the number I saw one day in the great court of the Temple of the Sun at Baalbec amounted to many thousands: the ground, the walls, the stones of the ruined buildings, were covered with them; and the various colors of which they consisted made a very extraordinary appearance glittering under the sun, in which they lay sleeping and basking."

2. *Shabbâlāt* (שַׁבָּלָא); Sept. *εἰργαζόμενος*; Syn. *phiyphon*; Vulg. *cera* occurs only in Ps. viii. 9 (8, A. V.); "As a shabbâlāt which melteth let [the wicked] pass away." There are various opinions as to the meaning of this word, the most curious, perhaps, being that of Symmachus. The Sept. reads "melted wax," similarly the Vulg. The rendering of the A. V. ("snail") is supported by the authority of the Jews, and the Hebrew does not seem to be directly improperly correct. The Chaldee Paraphr. explains *shabbâlāt* by *thibala* (תִּבָּלָא), i.e. "a snail or a slug," which was supposed by the Jews to consume away and die by reason of its constantly emitting slime as it crawls along. See *Schol. ad Gem. Med.목 Katan*, i. fol. 6 B, as quoted by Böchart (Heresii. iii. 500) and Gesenius (Theod. p. 212). Snails and slugs are not very common in dry in summer as Palestine. Hence, perhaps, the fact that there is only one allusion to them in Scripture, where the figure seems to be more significant if understood of snails without shells, i.e. slugs, rather than shell-snares, though true of both. The name itself, *shabbâlāt*, from a verb signifying "to smear" or "soil," has reference to the slime and mucus; and is probably (like *spaâmatâm* from *spaammâ*). Probably some species of slug (*Limax*) is intended which differs from the snails proper (*Helix*) in being unprovided by an external shell. The slugs delight in dampness, and hence dewy nights and rainy weather are the seasons of their activity. Over a dry surface they cannot crawl without pouring out that copious effusion of mucus which constitutes their shining trail; and every one must have seen some miserable slug which, roving over a stone pavement in the dewy night, has been overtaken by the morning sun. The absorbent surface rapidly becomes dry; in vain the wretched creature pours out its slimy secretion, the sun is drying up its moisture, which at every moment becomes less and less copious with the demands made upon it, and it "melts away as it goes." We possess no information respecting the *palmoniferous mollusca* of Palestine. They do not present many attractions to naturalists or travelers, and atmoles are rarely seen. In so dry a country the probability of the species are few; and it is only in situations permanently humid, and during the night, that they would be likely to occur, at least in any abundance.

**Snake** (שֵׁנָא, A. V. "serpent"), a creature found in Palestine (Robinson saw some there six feet long [*Jub. Res. ii. 154*]), but still more abundantly in the neigh-

**Skink (Scincus officinalis).**
boring countries, especially Egypt (Ammian Marcell., xxii., 15; p. 324 ed. Bip.) and Arabia (Herod. ii., 70; iii., 109; Elian, Anim. ii., 5, 7, 11; Strabo, ii., 353; Pliny, v., 766, 775; Diod. Sic., iv., 58; Agath. Phot. Cod. 256, p. 1376; comp. Num. xxxi., 6 sq.; Isa. xxx., 6; see Prosper Alpin. Rev. Egypt. iv., 4; Burchard, Trans. ii., 814; Tischendorf, Rezei, i., 261; Russell, Aleypo, ii., 120 sq.; Schubert, iii., 120; Forskål, Descr. Anim. p. 15 sq.;) — sometimes in the deserts, frequently of poisonous species. They belonged to unclean animals according to the M. E. classification (Lev. xi., 10, 41 sq.). The scientific investigation of the different species in the East is not sufficiently accurate to enable us to determine with any certainty the various kinds mentioned in Scripture. See SERPENT.

SNAPE, Andrew, a learned English divinity, was born at Hampton Court, and educated at Eton and King's College, Cambridge, where he received his degree of A.B. in 1568, of A.M. in 1569, and a fellowship. He went to London, was elected lecturer of St. Martin's-in-the-Fields, and afterwards held the rectory of St. Mary-at-Hill. He was created D.D. in 1705, and represented Cambridge in that faculty at the Jubilee at Frankfort in 1707. In 1710, he published, on the breaking-out of the Kangarian controversy, he took part against Hoadly; but the latter's interest at court prevailed, and Dr. Snape was removed from the office of chaplain to the king. He had been installed a canon of Windsor in 1713, and on Feb. 21, 1713, was elected provost of King's College. In 1720 he served as vice-chancellor of the university. He held for a short time rector of Knebworth, Hertfordshire, and afterwards (1737) of West Ilsley, Berkshire, which latter he retained until his death, Dec. 30, 1742. Dr. Snape was for several years head master of Eton school. He was a man of great learning, of an amiable temper, and had a great zeal for the principles of the Church of England. He was the editor of dean Moses's Sermons: — the author of a Letter to the Bishop of Bangor, during the Kangarian controversy, which passed through seventeen editions in a year: — Sermons (1745, 8vo), by Dr. Berriman and chaplain. See Allibone, Dict. of Brit. and Amer. Authors, s. v.; Chalmers, Biog. Dict. s. v.

Snare (usually the rendering in the A. V. of חָבֵּשׁ, ָּשָׁבֵּשׁ, חָבֶשׁ, or ָּשָׁבֶשׁ, all kindred roots signifying to catch by the foot in a spring- noose; occasionally of רַע, etc.; רַע, רַע, רַע, a gin, net, or trap, especially of the fowler (Isa. viii., 14; Amos iii., 5); also such a one as seizes and holds beasts or men by the foot (Job xviii., 9; Jer. xxviii., 22). They were set in the path or hidde in the ground (Prov. vii., 23; xxii., 5; Ps. cxli., 5; cxlix., 110; Jer. xxviii., 22). The form of the verb means, in an old trans. net appears from the original word pach (Amos iii., 5; Lxx., 29). It was in two parts, which, when set, were spread out upon the ground and slightly fastened with a stick (trap-stick), so that as soon as a bird or beast touched the stick, the parts flew up and enclosed the bird in the net or caught the foot of the animal (Job xviii., 9). In Lxx., 29, "let their table before them become a net," here the skulchos is the Oriental cloth or leather spread upon the ground like a net. The original term is figuratively put for any cause of destruction (Josh. xxiiii., 13; Hos. v., 1; Job xxii., 10). Thus is usually rendered Ps. xix., 6, "Upon the wicked God shall rain the curse, and fire and brimstone." But the Hebrew word might here be rendered coals, burning coals, and then lightning. Still the significations nets, snare, may here well be retained as an emblem of destruction to the wicked. The "snare of death" (2 Sam. xxii., 6; Ps. xlviii., 5) are poetically put in apposition with the cords (A.V. "bands""). This "snare of destruction" is mentioned in N. C.

Sneath, Richard, a Methodist Episcopal minister, was born in Ireland, Dec. 2, 1751. He emigrated to America in 1774, embraced religion in 1782, and entered the Itinerancy in 1796. For twenty-eight years his labors were unremitting, and he ceased not until he was literally worn down in the glorious work. He died Oct. 24, 1824. He was known for his integrity, benevolence, and Christian character. See Minutes of Annual Conference of the Methodist Episcopal Church, 1811, p. 257; Bangs, Hist. of the M. E. Church, ii., 307.

Sneed, George W., a minister of the Methodist Episcopal Church, South, was born in Davidson County, Tenn., Dec. 26, 1790, and professed faith in Christ in 1822. Some years subsequently he received a license to preach, and joined the Tennessee Conference. With its bounds he labored for many years, and was superannuated about 1848. Removing to Texas, his health failed, and he died suddenly about 1851. See Minutes of Annual Conferences of the M. E. Church, South, 1851, p. 337.

Sneill, Thomas D.D., a Congregational minister, was born at Cummington, Mass., Nov. 21, 1774; graduated at Dartmouth College in 1795, and was ordained pastor at North Brookfield, Mass., in 1798, where he continued pastor until his death, May 4, 1862. Dr. Sneill's influence upon the Church, town, and brethren in the ministry was much felt. He was a pioneer in temperance and slavery reform, and was much interested in missionary and educational movements. He published a number of tracts and pamphlets, conversations on baptism, etc. See Congregational Quarterly, 1862, p. 317-332.

Snethen, Nicholas, an influential minister of the Methodist Protestant Church, was born at Fresh Pond (now Glen Cove), L. I., Nov. 15, 1769. Removing to Belleville, N. J., he there experienced religion, and began to speak and pray in public. In 1784 he entered the ministry of the Methodist Episcopal Church, and preached for four years in Connecticut, Vermont, and Maine. In 1789-90 he preached in Charleston, S. C., and in 1800 was chosen as travelling companion to bishop Asbury. He was elected secretary of the General Conference of 1800, and was also a member in 1804 and 1812. He took a prominent part in favor of limiting the episcopal prerogative, a delegated General Conference (his plan for which was adopted in 1808), and was an early advocate of anti-slavery principles. He located in 1806, and removed to his farm on Longanoore, Frederick Co., Md. By his marriage he became the holder of slave property which he emancipated as soon as the law would permit (1829). In 1809 he re-entered the Itinerancy, and was stationed in Baltimore, Georgetown, and Alexandria, and while at Georgetown was elected chaplain of the House of Representatives. He located again in 1814. In 1829 he removed to Indiana, and upon his entry into the state of the Methodist Protestant Church (q.v.) he united with it, and in connection with it continued to travel and preach till within a short time of his death. In 1834 he became one of the editors of The Methodist Protestant, in Baltimore. In 1836 the Methodist Protestants started a college in New York, of which Mr. Snethen took charge. The enterprise did not succeed, and in 1837 he returned to the West and took charge of a Manual Labor Ministerial College at Lawrenceburg, Ind., but that institution also failed. Much of his subsequent labor was performed in Cincinnati. He died May 30, 1845. Mr. Snethen was a clear and forcible writer and an eloquent minister. He became a contributor to the Whiggardian Review, and afterwards to its successor, The Mutual Rights. In 1870 he wrote a Reply to O'Kelly's Apology, and in 1801 his Answer to O'Kelly's Rejoinder: — Funeral Oration on Bishop Asbury (1816) — Lectures on Preaching (1822): — Essays on Log Representation (1835) — Lectures on Biblical Subjects (1836) — Sermons (1848), edited by W. G. Snethen.

Snijo (now), in Norse mythology, was one of the Fornjot nature-gods, whose father was Froste (côdd, fröst), grandfather Kari (air), and great-grandfather Forjoter, the oldest of gods. He was also named Snauar.

Snoddy, Robert H., a Presbyterian minister, was born in Jefferson County, Tenn., in 1800. After the usual training in academical schools, he graduated at
the college at Maryville, Tenn., and also at the Southwestern Theological Seminary at Maryville; was licensed by Union Presbytery in 1831; was ordained in 1833, and preached for Lebanon and Eusebia churches; took charge of New Prospect Church in 1836. Having organized Spring Place Church, he added to his other places of preaching till 1858. He took charge of Ebenezer Church in 1855, where he labored until his death, June 22, 1859. Mr. Snoddy was a faithful and devoted minister of the Gospel. See Wilson, Preb. Hist. Alabama, 1861, p. 192.

**Snotr**, in Norse mythology, was the goddess of virtue and modesty, and the protectress of virtuous men.

**Snow** (θυέλα, thiely, so called probably from its glis-
tening; Sept. and New Test. χίόν; but ἑρικός in Prov. xxvi; Vulg. nix). The historical books of the Bible contain only two notices of snow actually falling (2 Sam. xxiii, 20; 1 Macc. xiii, 22), but the allusions in the poetical books are so numerous that there can be no doubt as to its being an ordinary occurrence in the winter months. Thus, for instance, the snow-storm is mentioned among the ordinary operations of nature which are illustrative of the Creator’s power (Psa. cxlvii, 16; cxlviii, 8). We have, again, notice of the beneficial effect of snow on the soil (Isa. lv, 10). Its color is ad-
duced as an image of brilliancy (Dan. vii, 9; Matt. xxvii, 3; Rev. i, 14), of purity (Isa. i, 18; Lam. iv, 7, in refer-
ence to the white robes of the princes), and of the blanch-
ing effects of leprosy (Exod. iv, 6; Numb. xii, 10; 2 Kings v, 27). In the book of Job we have references to the supposed cleansing effects of snow-water (ix, 30), to the rapid melting of snow under the sun’s rays (xxvi, 19), and the consequent flooding of the brooks (vi, 16). The thick falling of the flakes forms the point of com-
parison in the obscure passage in Psa. lxxviii, 14. The snow lies deep in the ravines of the highest ridge of Lebanon until the summer is far advanced, and indeed never wholly disappears (Robinson, iii, 501); the sum-
mit of Hermon also perpetually glistens with frozen snow (ibid. ii, 437). From these sources probably the Jews obtained their supplies for the purpose of cooling their beverages in summer (Prov. xxv, 13), as is still done (Hackett, Illust. of Script. p. 53). This allusion removes the apparent contradiction of this passage in Prov. xxvi, 1. As snow—that is, a fall of snow—in summer is unnatural and ill timed, so honor is not seem-
ly for a fool; but it is quite out of character, out of season. The “snow of Lebanon” is also used as an expres-
sion for the refreshing coolness of spring water, probably in reference to the stream of Siloam (Jer. xvii, 14). Lastly, in Prov. xxxvi, 21, snow appears to be used as a synonym for winter or cold weather. The liability to snow must of course vary considerably in a country of such varying altitude as Palestine. Josephus notes it as a peculiarity of the low plain of Jericho that it was warm there even when snow was prevalent in the rest of the country (Wer. iv, 8, 3). At Jerusalem snow often falls to the depth of a foot or more in January and February, but it seldom lies long (Robinson, i, 429). At Nazareth it falls more frequently and deeply, and it has been observed to fall even in the maritime plain at Joppa and about Carmel (Kitt, Phys. Hist. p. 210). A comparison of the notices of snow contained in Scripture and in the works of modern travellers would, however, lead to the conclusion that more fell in ancient times than at the present day. At Damascus snow falls to the depth of nearly a foot, and lies at all events for a few days (Wortabet, Syria, i, 215, 236). At Aleppo it falls, but never lies for more than a day (Russell, i, 65)—Smith. Scientifically, snow is nothing more than the frozen visible vapor of which the clouds are formed. A quanti-
ty of very minute crystals of ice having been formed, they are enlarged by the condensation and freezing of vapor, and, merging together, constitute flakes, which increase in size during their descent. In equatorial regions snow is unknown at the ocean level, and in all latitudes less than thirty-five degrees it is rare; but it is found in all latitudes in the higher regions of the atmosphere. It would scarcely be supposed that the broad flakes of snow which every blast of wind blows hither and thither as it lists are perfectly formed col-
lections of crystals, delicate in their structure, and regu-
lar in their measurement. Flakes of snow are best ob-
served when placed upon objects of a dark color, cooled below the freezing-point, a method first described by Kepler, who expressed the highest admiration of their structure. The minute crystals exhibit an endless di-

**Crystals of Snow, magnified.**
verity of regular and beautiful forms. Snowflakes described nine-sixteenths of the crystals and they probably amount to several hundreds. Snowflakes are understood to belong to the hexagonal system of crystals. Kemtz remarks that flakes which fall at the same time have generally the same form; but if there is an interval between two consecutive falls of snow, the forms of the second are observed to differ from those of the first, although the snow may have fallen among themselves. The temperature and density of the atmosphere have doubtless an influence upon their structures. Some have thought that the expression "treasures of the snow" in Job xxviii. 22 has reference to these variegated forms (Kitto, Pict. Bible, ad loc.).

The substance which has received the name of red or crimson-colored snow is common in all alpine districts; yet no one ever pretends to have seen this kind of snow fall. This substance has been observed by Ross, Parry, and others in the Arctic regions; and even green snow was observed about an inch beneath the white by the French Expedition at Spitzbergen. Prof. M. Ch. Marius and his companions in the French Expedition concluded generally that the red and green granules of colored snow are one and the same microscopic plant in different stages of development; that red is the color of the primitive state, which afterwards becomes green under the influence of light and air. This very minute red or crimson-colored plant, sometimes called the Palmetto micalis, finds nourishment on the surface of the snow within the limits of perpetual congelation; it is also found covering long patches of snow in the Alps and Pyrenees. See Schlichter, De Nive etque Usu Arctico (Haardt, 1730).

Snow, Jonathan M., a minister of the Methodist Episcopal Church, was born in Montpelier, Vt., Oct. 30, 1809. He embraced religion and joined the Church when seventeen, and in 1838 was admitted into the Illinois Conference. In 1852 he located, but in 1859 he was admitted into the Wisconsin Conference and granted a superannuated relation, which continued until his death, in Chicago, April 30, 1862. See Minutes of Annual Conferences, 1862, p. 218.

Snow, William, a minister of the Methodist Episcopal Church, was born in Providence, R. I., July 14, 1788. He joined the New York Conference in 1807; located in 1818; in 1831 re-entered the itinerancy; but in 1855 became superannuated, and remained such until his death, in Geneseo, N. Y., July 6, 1871. See Minutes of Annual Conferences, 1871, p. 157.

Snow, William T., a minister of the Methodist Episcopal Church, was born in Providence, R. I., about 1803. In 1826 he embraced religion, was licensed to preach, and soon after joined the Ohio Conference. For a number of years he labored in the mountains of Western Virginia, Southern Ohio, and the wilds of Michigan. In 1836-37 his health failed, and he retired from active work, residing in Oakland County, Michigan, and preaching to the Indians as his strength permitted. He died Oct. 16, 1875. See Minutes of Ann. Conf. 1875, p. 146.

Snowden, James Ross, LL.D., an eminent elder of the Presbyterain Church, was born in Philadelphia, Pa., in 1818. For many years he was prominently connected with the affairs of Pennsylvania, having repeatedly been elected to the Legislature of the state, where he served two terms in the speaker's chair. He subsequently filled the positions of state treasurer, treasurer of the United States Mint, and assistant-treasurer of the United States at Philadelphia. In 1858 he was appointed as United States Consul at Leghorn, and held that position till 1861. His connection with the mint led him to study numismatics with great thoroughness, and he was the author of several important works on the subject. In 1864 he published The Coins of the Bible and its Money Terms. In 1868 he contributed the article on "Coins" to the United States to Bouvier's Law Dictionary, also several addresses on currency, coinage, and other kindred subjects. He contributed a number of articles to the New York Observer under The Coins of the Bible, Evidencing the Truth of the Scripture Testimony. Mr. Snowden frequently represented the Philadelphia Presbytery in the General Assembly. He died in Hulmeville, Pa., in March, 1878. (W. P. S.)

Snowden, L. D., a minister of the Methodist Episcopal Church, was born in Howard County, Md., in 1826. In 1867 he was admitted on trial in the Washington Conference; was ordained deacon in 1869, and elder in 1871. He died in Romney, W. Va., Dec. 5, 1872. See Minutes of Annual Conferences, 1876, p. 31.

Snowden, Samuel Finley, a Presbyterian minister, was born in Philadelphia, Pa., Nov. 6, 1767. He graduated at the College of New Jersey in 1786; studied theology privately; was licensed to preach by the New Brunswick Presbytery, April 24, 1794; was ordained and installed pastor of the Church in Princeton Nov. 25 of same year; resigned, on account of ill-health, April 29, 1801; was afterwards settled successively at Whitesborough, New Hartford, and Sackett's Harbor, N. Y.; and died in May, 1845. See Sprague, Annals of the Amer. Pulpit, iii, 341, note.

Snuff-dish (σνιφιον, machloth, Exod. xxv, 38; xvii, 23; Sept. νίφιον; Vulg. vanum; elsewhere "censer" or "fire-pan"); a tray for catching the snuff of the lamps of the golden candelabrum; resembling a fire-pan or shovelf, as the same Hebrew word elsewhere means (Lev. xvi. 12; Exod. xvii, 3; xxxviii, 3; Num. xvi, 6 sq.; 1 Kings vii, 50). See CANDLESTICK.

Snuffer (σνιφερτής, mesamphere, a cutting instrument; 1 Kings vii, 50; 2 Kings xii, 14; xxxv, 14, 2 Chron. iv, 22; Jer. ii, 18; ἡ σκεύη τῆς καντήλας, melkocachi'gam, Exod. xxxvii, 28; τόνγκο, as elsewhere rendered), an implement for removing the snuff from the lamps of the sacred candelabrum. Judging from the latter of the above Hebrew terms, it was double, but not of the scissors form. Instruments like ours for cutting the wick of a lamp were not anciently known, unless the instrument represented in the cut, copied from one in the British Museum, may be supposed to have been used for such a purpose, but a sort of tweezers was employed to draw up the wick when necessary, and for pinching off any superfluous portion. Every one is aware that lamps when properly replenished with oil do not need snuffing, like candles. The sort of tweezers we have mentioned is still used in the East for trimming lamps. Snuffers are only known in those parts of Western Asia where candles are partially used during winter. Snuffers are candle, not lamp, instruments; and candles are but little used in any part of Asia, the temperature being generally too warm. See CANDLESTICK.

Snyder, George Niver, a minister of the Reformed Dutch Church, was born in Honesdale, Pa., March 27, 1844. He graduated at Hamilton College, N. Y., in 1868, and entered Union Theological Seminary, where he graduated in 1871. He was ordained, and became a stated supply of the Church at Elsmor, N. Y., and after remaining one year became pastor of
the Church at White Plains, N. Y., where he died, Nov. 2, 1872. (W. P. S.)

Snyder, Henry (1), a minister of the Methodist Episcopal Church, was born near Schellsburgh, Bedford Co., Pa., Sept. 16, 1813. He was converted, and united with the Church Sept. 26, 1831. He was admitted on trial into the Pittsburgh Conference in 1848, ordained deacon in 1850, and elder in 1852. He continued in active labor under his dear pastor, Oct. 3, 1861. As a preacher he was eminently successful; gracious revivals attended his ministry wherever he went. See Minutes of Annual Conferences, 1862, p. 43.

Snyder, Henry (2), a Presbyterian minister, was born in Stephensburg, Frederick Co., Va., Dec. 2, 1814. He graduated at Jefferson College, Canonsburg, Pa., in 1838, and took his degree of A.B. in the same institution in 1840, licensed by the Ohio Presbytery, and in 1850 was ordained by the same presbytery as an evangelist. In 1841 he was appointed adjunct professor of mathematics in Jefferson College, Pa.; in 1843, professor of mathematics; in 1856, reigned; in 1851, professor of Latin in Centre College, Danville, Ky.; in 1853, removed to Bridgeton, N. J.; in 1860, became principal of the college; in 1861, was appointed supply to the Church at Amelia Court-house, Va.; in 1857, professor of mathematics in Hampden Sidney College, Prince Edward Co., where he remained until the outbreak of the war, when he and his family were compelled to abandon everything and seek refuge in the North. After the war, he was appointed a chaplain by the State of Virginia, and stationed at Fort Richmond, S. L., New York Harbor. Here he remained until he was mustered out of the service, and was making arrangements to settle in Sharpsburg, Pa., to resume the work of teaching, when, on the evening of Feb. 22, 1866, he was drowned. Mr. Snyder was well read in English literature, a remarkable conversationalist, and was noted for a clear and logical mind, quick in discernment. See Wilson, Preb. Hist. Almanac, 1867, p. 198. (J. L. S.)

Snyder, Peter, a Presbyterian minister, was born in Schoharie, N. Y., Oct. 18, 1814. He graduated at Union College, Schenectady, N. Y., in 1836; studied theology one year at Princeton Seminary, N. J., and two years at Union Seminary, New York city, was licensed by New York Third Presbytery in 1839, and in 1840 was ordained by Rockaway Presbytery, and afterwards labored two years at Whippley, N. Y.; two years at New Rochelle, N. Y., then at Cairo, Greene Co., N. Y.; and the remainder of his ministerial service, sixteen years, at Watertown, N. Y., where he died, Dec. 19, 1868. Mr. Snyder was a thorough reader and a learned man; was of great influence among his reading extensive, few men being better versed in current literature, and none more devoted to the moral, religious, and educational movements of the day. From his birth he suffered from an optical infirmity, but, although never using his own or another's pen in preparing for the pulpit, his discourses were always systematic, well digested, and specially eloquent. See Wilson, Preb. Hist. Almanac, 1864, p. 323. (J. L. S.)

So (Heb. סו, סיא; Sept. Ἱσάα = Vulg. Su); a king of Egypt whom Hosea, the last king of Israel, called to his help against the Assyrians under Shalmaneser, evidently intending to become the vassal of Egypt, and therefore making no present, as had been the yearly custom, to the king of Assyria (2 Kings xvii. 4). B.C. 725-722. He was known as a thorough enquirer of information, as he rather than any other king of Egypt is mentioned in connection with the ten tribes. See ISRAEL, KINGDOM OF. It has been questioned whether this So was the same with Sobchos (Manetho Sauatricis), the first king of the Ethiopian dynasty in Upper Egypt, or his son and successor Secechis (Manetho Selabkhas), the second king of the same dynasty, and the immediate predecessor of Tirhakah. Winer hesitates between them, and Gesenius concludes for the latter. Secechis reigned twelve years, according to Manetho, fourteen according to Syncellus. This name, in Egyptian Sebekh, is also that of the god Saturn (Champollion, Pthou. Egypt, No. 21, 22; Winer, Real-Wörterb. s. v.; Gesenius, Comment. in Jes. i, 696). See EGYPT.

The ascension of Taharka, the Tirhakah of Scripture, may be inferred from the evidence of an Aip-tablet, which states that one of the bulls Aipi was born in his twenty-sixth year, and died at the end of the twentieth of Psammetichus I. This bull lived more than twenty years, and the longest age of any Aipi stated is twenty-six. Supposing the latter duration, which would allow a short interval between Taharka and Psammetichus II, as seems to be the case, the accession of Tirhakah would be B.C. 695. If we assign twenty-four years to the two predecessors, the commencement of the dynasty would be B.C. 719. But it is not certain that their reigns were continuous. The account which Herodotus gives of the war of Senencherib and Nebuchadrezzar suggests that Tirhakah was not ruling in Egypt at the time of the destruction of the Assyrian army, so that we may either conjecture, as Dr. Hincks has done, that the reign of Nebuchadrezzar followed that of Shebakeb and preceded that of Tirhakah over Egypt (Journ. Soc. Antiq., Jan. 1853), or else that Tirhakah was king of Ethiopia while Shebakeb, not the same as Senes, ruled in Egypt, the former hypothesis being far the more probable. It seems impossible to arrive at any positive conclusion as to the dates to which the mentions in the Bible of So and Tirhakah refer, but it must be remarked that it is difficult to overthrow the date of B.C. 721 for the taking of Samaria. If we adopt the earlier dates, So must correspond to Shebakeb; if the latter, perhaps to Shebebek; but if it should be found that the reign of Tirhakah is dated too high, the former identification might still be held. The name Shebek is nearer to the Hebrew name than Shebebek; and if the Mosoretic points do not faithfully represent the original pronunciation, as we might almost infer from the consonants, and the name was Seva or Sava, it is not very remote from Shebek. We cannot account for the transcription of the Sept.

From Egyptian sources we know nothing more of Shebek than that he conquered and put to death Bocchoris, the sole king of the twenty-fourth dynasty, as we learn from Manetho's list, and that he continued the monuments of the Egyptians in the temple of Amon. A long inscription at Elkarnak in which Shebek speaks of tributes of "the king of the land of Khala (Shara)," supposed to be Syria (Brugsch, Hist. d'Egypte, i, 244). This gives some slight confirmation to the identification of this king with So, and it is likely that the founder of this dynasty would have a name like Shishak and Psammetichus I, the latter virtually the founder of the twenty-sixth, to restore the Egyptian supremacy in the neighboring Asiatic countries. The standard inscription of Sargon in his palace at Khorassan identifies, according to M. Oppert, that after the capture of Samaria, Hanan, king of Gaza, and Sebebe, sultan of Egypt, only fifteen years of Assyria in battle at Raphia, were defeated. Shebek disappeared, but Hanon was captured. Rapho, king of Egypt, was then put to tribute (Les Inscriptions Assyriennes des Sargoniades, etc. p. 22). This statement would appear to indicate that either Shebek or Shebebek, for we cannot lay great weight on the name, was acting with the former, advanced to the support of Hosea and his party, and being defeated fled into Ethiopia, leaving the kingdom of Egypt to a native prince. This evidence favors the idea that the Ethiopian kings were not successive. See TIRHAKAH.

In a room in the museum of the palace of Senencherib at Koyunjik, Mr. Layard found a piece of clay upon which was impressed the signet of Sabak, or Sabaso, king of Egypt. On the same piece of clay is impressed an Assyrian seal, probably of Senencherib, with a device representing a priest ministering before the king,
or perhaps the symbol of the high contracting parties. The original of this remarkable seal is now deposited in the British Museum. The Egyptian portion of it represents Sabak as about to smite an enemy, perhaps in sacrifice to Amun-Ra, with a kind of mace. Above and before him are hieroglyphs, expressing Neter nfr sb or cht Sabak="the perfect god, the lord who produces things, Sabak." Behind him, sna anch-haf = "life follows his head." On the left edge, ma na nkt = "I have given to thee." This seal, impressed with the royal insignia of the two monarchs, probably Sennacherib and Sabak, or Sop, appears to have been affixed to the treaty between Assyria and Egypt and deposited among the archives of the kingdom. As the two monarchs were undoubtedly contemporary, this piece of clay furnishes remarkable confirmatory evidence of the truth of Scripture history. See Pharaoh.

Soanen, Jean, a French prelate, was born in Riom, Jan. 6, 1847, and entered the Congregation of the Oratory at Paris in 1861, where he chose father Quensel for his confessor. Leaving that establishment, he taught ethics and rhetoric in several provincial towns, and devoted himself afterwards to the pulpist, for which he had great talents. Having preached at Lyons, Orleans, and Paris with applause, he was invited to court, preached there during Lent in 1866 and 1868, and was appointed bishop of Senez soon after. Appealing from the bull Unigenitus to a future council, and refusing to listen to any terms of accommodation on the subject, he published a Pastoral Instruction, giving an account to his diocesan of his conduct. This Instruction gave great offence, and occasioned the famous Council of Embrun (1727), in which M. de Tencin procured its condemnation as rash, scandalous, etc., and the bishop to be suspended from all episcopal jurisdiction and ecclesiastical functions. After this council, M. Soanen was banished to La Chaise Dieu, where he died, Dec. 25, 1740. His writings are, Pastoral Instructions—Manuscript and Printed Letters. The Letters have been printed with his Life (6 vols. 4to, or 8 vols. 12mo). His Sermons were published in 1767 (2 vols. 12mo). See Chalmers, Biog. Dict. s. v.; Hoefer, Nouv. Biog. Générale, s. v.

Soap (σαπφέα, borith; Sept. σαφέα) occurs in Jer. ii. 22, "For though thou wash thee with niter, and take thee much soap, yet thine iniquity is marked before me, saith the Lord God;" and again in Mal. iii. 2, "But who may abide the day of his coming? and who shall stand when he appeareth for he is like a refiner's fire, and like fuller's soap." From neither of these passages does it distinctly appear whether the substance referred to by the name of borith was obtained from the mineral or from the vegetable kingdom; but it is evident that it was possessed of cleansing properties, and this is confirmed by the origin and signification of the word, which is thus illustrated by Celsius: "A verbo ἱππος, borär, purificavit, quae vox etiam apud Chaldceos, Syros, Arus, in usu fuit, descendit nomen ἵππος, bor, purificitus" (Hierobol. i. 449). So Maimonides, on the Talmud tract Shenuthith, "Species abilionibus aptae, uti sunt borith et abal. In fact, the simple ὅρα, bor, itself denotes a vegetable alkali used for washing (Job i. 6) and as a flux for metals (Isa. i. 25). See Alkali.

The word borith is very similar to the bor of the Arabs, written bûrûk in the Latin translations of Jerome and Avicebron, and translated nitrum, that is, niter, or carbonate of soda. Borak appears, however, to have been used in a generic rather than in a specific sense, as in the Persian works on materia medica (derived chiefly from the Arabic) which have been collated we find that no less than six different kinds of borak (Persian borak) are enumerated, of which some are natural, as the Armenian, the African, etc., and others artificial, as that obtained from burning the wood of the poplar, also that employed in the preparation of glass. Of these it is evident that the last two are chemically nearly the same, being both carbonates of alkalis. The incineration of the poplar, yields the carbonate of potash (commonly called potash, or pearlash); while carbonate of soda, or barilla, is the alkali used in the preparation of glass. Previous to the composition of bodies having been definitely ascertained by correct chemical analysis, dissimilar substances were often grouped together under one general term; while others, although similar in composition, were separated on account of some unimportant character, as difference of color or of origin, etc. It is unnecessary for our present purpose to ascertain the other substances included by the Arabs under the general term of Dolak, which may have been also included under the nitrum of the Greeks. It is evident that both the carbonate of soda and of potash were comprehended under one name by the former. It would be difficult, therefore, to distinguish the one from the other, unless some circumstances were added in addition to the mere name. Thus in the above passage of Jeremiah we have neter (nitre) and borith (soap) indicated as being both employed for washing or possessed of some cleansing properties, and, yet, from occurring in the same passage, they must have differed in some respects. The term niter, we know, was in later times confined to the salt obtained chiefly from the niter lakes of Egypt, and neter may also be a name of earlier times. In this case, therefore, the natural carbonate of soda is mentioned in one part of the verse, it is very probable that the artificial carbonates may be alluded to in the other, as both were in early times employed by Asiatic nations for the purposes of washing. The carbonate of potash, obtained from the burning of most plants growing at a distance from the sea or a saline soil, might not have been distinguished from the carbonate of soda, produced from the ashes of plants growing on the shores of the sea or of salt-water lakes. Hence it is probable that the ashes of plants, called borak and borah by Asiatic nations, may be boraks, but as there is no proof that soap is intended, though it may have been known to the same people at very early periods. Still less is it probable that borax is meant, as has been supposed by some authors, apparently from the mere similarity of name.

Supposing that the ashes or juices of plants are intended by the word bor, the next point of inquiry is whether it is to be restricted to those of any particular plants. The ashes of the poplar are mentioned by Arabian authors and of the vine by Dioscorides; those of the plantain and of the Butea frondosa by Sanscrit authors—thus indicating that the plants which were most common, or which were used for fuel or other purposes in the different countries, had also their ashes, that is, impure carbonate of potash, employed for washing, etc. Usually the ashes only of plants growing on the seashore have been thought to be intended. All these, as before mentioned, would yield barilla, or carbonate of soda. Many of them, however, have been burned for fuel, and some of them yield on the coasts of India, of the Red Sea, and of the Mediterranean. They belong chiefly to the natural family of the Chenopodiaceae and to that of the Menebyanthemum. In Arabic authors, the plant yielding soda is said to be called osman, and its Persian name is stated to be ghiabud, both words signifying "the washer," or "washing-herb." Hauwulf points out two
SOBRIETY

plants in Syria and Palestine which yield alkaline salts. Hasselquist considered one of them to be a *Mesembryanthemum*. Forskål has enumerated several plants as being burned for the barilla which they afford, as *Mesembryanthemum genus victatum* and *nodiflorum*, both of which are called *gshali*. *Salvia kola* and its Sudan *monieca*, called *aul*, are other plants, especially the last named, which yield sal-alkali. So on the coasts of the Indian peninsula, *Steviroa indicica* and *Steviroa undiflora* yield barilla in great abundance and purity, as do *Salvia matica kola* and *tugna*, and also *Steviroa annua* on the coasts of Spain and of the south of France. In Palestine we may especially notice the plant named *hubebekh* (the *Salvia kola* of botanists), found near the Dead Sea and with glass-like leaves, the alkali from which are called *el-Kali* from their strong alkaline properties (Robinson, *Bibl. Res. i*, 505); the *ajram*, found near Sinai, which when pounded served as a substitute for soap (ibid., i, 84); the *gillia*, or "soap plant" of Egypt (Wilkinson, *Anc. Egypt. ii*, 106) and the heaths in the neighborhood of Joppa (Kitto, *Phys. Hist. p. 207*). From these sources large quantities of alkali have been extracted in past ages, as the heaps of ashes outside Jerusalem and Nablis testify (Robinson, *Bibl. Res. iii*, 201, 299), and a active trade in the article is still prosecuted with Aleppo in one direction (Russell, *Arabo., i*, 72) and Arabia in another (Burchard, *Arabo., i*, 66). It was always the custom of the smiths and mechanics, when working in the article, to have the exterior of the vessels covered with salt ashes. These ashes were used up in the form familiar to us, for no such article was known to the Egyptians (Wilkinson, *Anc. Egypt. i*, 186).

The uses of soap among the Hebrews were twofold—(1) for cleansing either the person (Jer. ii., 22; Job ix., 30, where for "never so clean" read "with alkali") or the clothes; (2) for purifying metals (Isa. i., 25, where for "purely" read "as through alkali"). Hitzig suggests that *borith* should be substituted for *berith*, "covenant," in Ezek. xx., 35 and Mal. iii., 1.

Sobriety, freedom from any inordinate passion—that quiet self-possession which enables one to devote himself to the matter in hand, whether prayer, meditation, study, forming schemes, laboring to carry them out, and which keeps the individual from undue elevation in prosperity or depression in case of failure. The necessity of sobriety is especially obvious: (1) In our inquiries after truth as opposed to presumption; (2) in our pursuit of this world as opposed to covetousness; (3) in the use and estimate of the things of this world as opposed to avarice; (4) in trials and temptations as opposed to impatience; (5) in forming our judgment of others as opposed to censoriousness; (6) in speaking of one's self as opposed to egoism. Many motives might be urged to this exercise, as (1) the general language of Scripture (1 Pet. iv., 7; 8; 9; Phil. iv., 5; Tit. ii., 12); (2) our profession as Christians; (8) the example of Jesus Christ; and (4) the near approach of death and judgment.

Socbeh. See Marble.

So'cho (Heb. *Soko*/*Scoho*, שָׁוֵה, for שָׁוֵה, bushy; Sept. *Σάχος*; Vulg. *Socho*), the name of a town, which occurs in this form, among those settled by the sons of Ezra of the tribe of Judah (1 Chron. iv., 18). It apparently was the same as the town of Socho (q. v.), in Judah, probably the one in the lowland, which was better known than the other, and in the vicinity of the Dead Sea (Tit. ii., 13). It appears from its position in this list that it was colonized by a man or a place named Heber. "The Targum, playing on the passage after the custom of Hebrew writers, interprets it as referring to Moses, and takes the names Jered, Soco, Jehukkith, as titles of him. He was the rabbi of Socho because he sheltered (גֶּהֶר) the house of Israel with his virtue." See Socho:

SOCIALISM

Socialism, a general term applied to several schemes of social arrangement—which advocate community of property, and abandon or modify individual industry, the rights of marriage, and of the family. In discussing the subject of Socialism, two elements are to be considered: (1) the judiciousness of aband

The various plans which it has proposed for doing better. Socialism affirms that the evils it complains of are irremediable in the present constitution of society. In the opinion of Socialists, the existing arrangements of society in the production of property and the production and distribution of wealth are, as a matter of fact, bad, a total failure. First among existing evils may be mentioned that of poverty. The institution of property is upheld and commended principally as being the means by which labor and frugality are insured their reward and mankind enabled to emerge from indigence. But Socialism urges that an immense proportion of the industrious classes are, at some period or other of their lives, dependent on legal or voluntary charity; that many are outstripped by others who are possessed of superior energy or prudence; that the reward, instead of being proportioned to the labor and abstinence of the individual worker, is distributed in the hands of the owners; that the great majority are what they are born to become— to be rich without work, others to become rich by work, but the great majority are born to hard work and poverty through life; that competition is, for the people, a system of extermination, resulting from the continual fall of labor. "Cheaperness," they say, "is advantageous to the consumer at the cost of introducing the seeds of ruinous anarchy among the producers." The Fourierists (M. Considerant, *Destinée Sociale*, i., 35-37) enumerate the evils of existing civilization in the following order: 1. It employs an enormous quantity of labor and of human power unproductively, or in the work of destruction, e. g., in maintaining armies, courts, magistrates, etc., in allowing 'good society,' people who pass their lives in doing nothing, also in allowing philosophers, metaphysicians, political men, who produce nothing but disturbance and sterile discussions. 2. That even the industry and powers which, in the present system, are devoted to production do not produce a proportion of what they might produce if better directed and employed," e. g. "the wastefulness in the existing arrangements for distributing the produce of the country among the various producers." Socialism seeks to put an end to the vices and suffering of men, not by individual reformation and reformation, but by a new social organization. It is the employment of political and economic measures for a moral purpose. Proceeding upon the supposition that the individual is wholly or largely the creature of circumstances, it seeks to make the latter as favorable as possible. Thus it makes a religion of social regeneration, and proposes to renovate the world by a new arrangement of property and industrial interests. Although in some measure anticipated by movements in the ancient world, socialism may be considered a product of the French Revolution, which was an anarchic attack on the social system that had its roots in the feudalism of the Middle Ages. The first to revive or bring socialism into its modern form was François Noël Babeuf (1764-1797), in his paper *Le Tribun du Peuple*. The idea from which he started was that of equality, and he insisted that there should be no other differences than those of age and sex; that men differed little in their faculties and needs, and consequently they should receive the same education and food. After his death his system, Babeuf, had for a time entirely forgotten, until, in 1834, Buonarotti again attempted its propagation in the *Moniteur Républicain* and *Homme Libre*. The three most noted developments of Socialism are Communism, Fourierism, and
Socialism

Saint - Simonism or Humanitarianism. The Nihilists of Russia at this time attract considerable attention because of the effort made by the government toward their extinction. They believe that, in order to human progress, it is not only possible, but absolutely necessary, to begin at once with the present complicated social phenomena in the way of a sudden and complete social reform, or with a revolution. In April, 1879, an attempt was made by the government to capture the emperor. This has led to the arrest of hundreds, many of whom have been sent to Siberia. A number of Socialist communities have been established in the United States, some of which have already been noticed. See Harmonists; Separatists; Shakers.

Other will be treated in their articles.

Agrarian Socialism. — This society takes its name from the Bible (Cant. iv. 8), and has its location in Iowa, in the town of Amana. The members call themselves the "True Inspiration Congregations" (Wahre Inspirations-Gemeinden), and are Germans. They came from Germany in 1842, and settled near Buffalo, N. Y., but in 1855 they removed to their present location. The "work of inspiration" began far back in the 18th century, an account of the journeys, etc., of "Brother John Frederick Rock" in 1719 being given in the Thirty-sixth Collection of the Inspiration Record. Finally, in 1816, Michael Krauser became what they call an "instrument," and to this day, according to records, other than Christian Metz, who was for many years, and until his death (1867), the spiritual head of the society. Another prominent "instrument" was Barbara Heynemann, whose husband, George Landman, became spiritual head of the society. The removal to this country was inaugurated by Metz, who professed to have a revelation so directing.

1. Social Economy. — The society was not communistic in Germany, and even after removal to this country the community intended to live simply as a Christian congregation. Being obliged to look after the temporal interests of each other, they built workshops, etc., out of a common fund, and thus drifted into their present practice. They have now seven villages, and carry on farming, woolen, saw, and grist mills. Each family has a house for itself; but the members eat in common, in cooking or eating-houses, of which there are fifteen. Each business has its foreman; and these leaders, in each village, meet every seven days to consult with the principal for the following year. The civil temporal government is vested in thirteen trustees, chosen annually by the male members, the trustees choosing the president of the society. The elders are men of presumably deep piety, appointed by inspiration, and preside at religious assemblies. The members are supplied with clothing and other necessities, no money is allowed by any member to each individual. Usually a neophyte enters on probation for two years, and, if a suitable person, is admitted to full membership; although some are received at once into full membership by "inspiration." They forbid the use of musical instruments (except a flute); and exclude photographs and other pictures, as tending to idol-worship. Although not forbidding marriage, celibacy is looked upon as meritorious; and young men are not allowed to marry until twenty-four years of age. The society is financially prosperous, has no debt, has money at interest, and owned in 1874 about 25,000 acres of land, 3000 sheep, 1500 head of cattle, 200 horses, and 2500 hogs, with a population of about 1500.

2. Religion and Literature. — The society is pietistic, and believes in inspiration as a result of entire consecration to God. It accepts both the Old and the New Testament, but not to the exclusion of present inspirations. It does not preach the Second Coming of the Lord's supper whenever led by "inspiration." Inspiration is sometimes private, at other times public; and the warnings, reproofs, etc., thus received are written down in yearly volumes, entitled Year-books of the True Inspiration Congregations. When a member offends against the rules of society, he is admonished by the elders; and if he do not amend, expulsion follows. These rules are twenty-one in number, and encourage sobriety, reverence, honesty, and abstinence. They hold religious services on Wednesday, Saturday, and Sunday mornings, and every evening. They keep New Year's as a holiday, and Christmas, Easter, and Holy Week are their great religious festivals. At least once a year there is an "Untersuchung," or inquisition of the whole community, including the names and condition of its spiritual condition, in which each member is expected to make confession of sins. Their hymnology is found in The Voice from Zion (Ebenzer, 1851, pp. 958), and another hymn-book in regular use, Psalms after the Manner of David," etc. (Amana, la., 1871). Among their books are: A Testimonium Christi; Jesus, A. B. C. For his Scholars, also in rhyme; Rhymes on the Sufferings, Death, Burial, and Ascention of Christ.

II. Perfectionists of Oneida and Wallingford. — This body is American origin, having for its founder the present head, John Humphrey Noyes, born in Drattleborough, Vt., in 1811. He was educated at Dartmouth, Andover, and Yale. While in the latter institution he entered upon a new experience and views new ways of the way of salvation, which took the name of Perfectionism. In 1834 he went to Poultney, Vt., and slowly gathered about him a small company of believers, and in 1847 he established Wallingford, a small community, consisting of small gatherings in other states who recognised him as leader. Not a Communist at first, Mr. Noyes, in 1845, made known his peculiar views, and began cautiously to practice them in 1846. The community were mobbed and driven from the place, and in 1848 settled in Oneida, Madison Co., N. Y. Other communities were established, but all were eventually merged in those of Oneida, N. Y., and Wallingford, Conn. After various reverses, they began to accumulate property, engaged in manufacture and the preserving of fruit, etc., and in 1874 had 640 acres of land near Oneida, with 240 at Wallingford. In ten years (1857-66) they had netted $180,500, and were worth over $500,000. The two communities must be counted as one, and the members are interchangeable at will. In February, 1874, they numbered 288 persons, 131 males and 157 females. The members are mostly Americans, largely recruited from New England.

1. Daily Life. — The members live in one large building, the older people occupying separate chambers, the younger sleeping two together. There is no regulation style of dress, although plainness is expected of all. They have twenty-one standing committees — on finance, amusements, arbitration, etc.; and, besides this, the duties of all members are divided among the eight departments, as publication, education, agriculture, manufacture, etc. Every Sunday morning a meeting is held of the "Business Board," composed of the heads of all the departments, and any member of the community who choose to attend. The children are left to the care of their mothers until weaned; when they are placed in the general nursery, under "care-takers," who are both men and women. They have no sermon or public prayers, and address one another as Mr. or Miss, except when the women were married before they entered the society. An annual allowance of thirty-three dollars is made to each woman, the men ordering groceries at wholesale. In the school the Bible is the prominent text-book, but a liberal education is encouraged. They receive members with great care, but exact no probation.

2. Religious Belief. — The Perfectionists hold to the Bible as the "text-book of the spirit of truth," to Jesus Christ as the "embodiment of spiritual life," and to the "Sacrament of Baptism" and Primitive Church as the exponents of the everlasting Gospel. They believe that the second advent of Christ took place at the period of the destruction of Jerusalem; that the final kingdom of God then began in the heavens; that the manifestation of the kingdom in the visible world is now approaching; that its approach is
ushering in the second and final resurrection and judgment; that a Church on earth is now rising to meet the approaching kingdom in the heavens, and to become its duplicate and representative; that inspiration, or open communication with God and the heavens, involving perfect holiness, is the element of connection between the Church on earth and the Church in the heavens, and the power by which the kingdom of God is to be established and to reign in the world. They also teach that "the Gospel provides for complete salvation from sin," which is withheld from them by all other reformers. Community of goods and of persons they believe to have been taught by Jesus, and hold that communism is "the social state of the resurrection." In their system, "complex marriage takes the place of simple," they affirming that there is no intrinsic difference between property in person and property in things; and that the same spirit which abolished exclusiveness in regard to money would abolish, if circumstances allowed full scope for it, exclusiveness in regard to women and children. "Complex marriage" means that, within the limits of their community, any man and woman may freely cohabit, having gained each other's consent, and being accompanied by six other members, in order to prove that the believers are in the efficacy of the "faith cure," and quote instances in which invalids have been instantly restored to perfect health in answer to prayer.

This community has lately taken an important step towards reorganization by formally abandoning the system that father Noyes has consistently advocated for so many years. Considerable opposition having been experienced because of the promiscuous commerce of the sexes asserted to exist, father Noyes has decided to abandon his scheme called stipulicure in practice, while retaining it in theory. He accordingly wrote (Aug. 20, 1879) a message to the community, containing modifications in their platform, of which the following is a summary:

I. To give up the practice of complex marriage, not as renouncing belief in the principles and prospective finality of that institution, but in deference to the public sentiment evidently rising against it.

II. To place themselves as a community, not on the platform of the Shakers, on the one hand, nor on that of the world, on the other, but on Paul's platform, which, while allowing marriage as a concession to human weakness, prefers celibacy as the holier and more perfect state.

III. To continue to hold their common property in common; to continue to live together, and to eat at the same table; to continue in the common supervision of the care for the poor, the infirm, and the aged; and to maintain the practice of regular evening meetings for mutual criticism.

The platform contained in the communication was adopted by a formal vote on the evening of Tuesday, Aug. 26, abolishing the offensive abomination of complex marriage at astroke. The society will hereafter, therefore, consist of two classes of members—celibates, and married persons living together as husband and wife under the laws of marriage as generally understood. The family idea is left, it is true; but with permanent families within the community family it is born of its main significance, and takes the form of a common work, a common interest in commercial ventures, and a common responsibility. Among the literary productions of this community are, Paul Not Cornul; The Perfectionist; The Way of Holiness; Berean Witness; Spiritual Magazine; Free Church Circular; Bible Commentary; History of American Socialism; and Essay on Scientific Propagation (the latter two by J. H. Noyes). The practice of communism as a present rule of these communities is Dr. Keil, a Prussian, born in 1811. At first a man-miller, he became a mystic, and afterwards, at Pittsburgh, made open profession of his belief. He gathered a number of Germans about him, to whom he represented himself as a being to be worshiped, and later as one of the two witnesses in the Book of Revelation. He believed that this communistic somewhat resembling that of Rapp, but without the celibate principle. His followers, in 1844, removed to Bethel, Mo., and took up four sections of land, or 2560 acres, to which they added from time to time, until they possessed 4000 acres. In 1874 they numbered about 200 persons; in 1865 Dr. Keil, with about 80 persons, moved to Oregon, and established a colony at Aurora. They numbered in 1874 nearly 400 people, and owned about 18,000 acres of land.

The government at Aurora is vested in Dr. Keil, who is both president and preacher, and has for his advisers four of the elder members, chosen by himself. The preacher is a member of the board of the Board of Directors, with six trustees, chosen by the people. The members of both communities are plain, frugal, industrious Germans, with simple tastes, and seem contented and happy. They hold to principles which are chiefly remarkable for their simplicity. 1. That all government should be parental, to inculcate parental government of each. 2. That society should be formed upon the model of the family, having all interests and property absolutely in common. 3. That neither religion nor the harmony of nature teaches community in anything further than property and labor. Hence the family life is strictly maintained, and all sexual irregularities are absolutely rejected. The community is held twice a month, and after the Lutheran style.

IV. Icariana. — This community was the offspring of the dreams of Etienne Cabet, who was born in Dijon, France, in 1788. Cabet was educated for the bar, but became a politician and writer. He was a leader of the Cariboeque, and the first to write a systematic book for their community. He wrote a history of the French Revolution of July, was condemned to two years' imprisonment, but fled to London, where he wrote the Voyage to Icaria. In this book he described a communist Utopia, and in 1848 set sail, with a number of persons, for Texas, where he started an actual Icaria. Sixty-nine persons formed the advance-guard, which was attacked by yellow fever, and disorganized by the time Cabet arrived in the next year. They went to Nauvoo, Ill., and were established in that deserted Mormon town, May, 1850. They numbered here, at one time, not less than 1500 persons, and labored and planted with success; but Cabet developed a dictatorial spirit, which produced a split in the society. He and some of his followers went to St. Louis, where he died in 1856. Shortly after, the Illinois colony came to an end, and between fifty and sixty settled upon their Iowa estate, about four miles from Corning. They own at the present time 1896 acres of land; number 65 members, and 11 families, and are all French. They live under the constitution prepared by Cabet, which lays down the equality and brotherhood of mankind and the duty of holding all things in common, abolishes servitude and servants, commands marriage under penalties, provides for education, and requires that the majority shall rule. In practice they elect a president once a year, who is the executive officer, but whose powers are strictly limited. They have also four directors, who carry on the necessary work and direct the other members. They have no religious observances. Sunday is a day of rest and amusement.

V. Bishop Hill Commune, now extinct, was formed by Swedish pietists, who settled in Henry County, Ill., October, 1846. Others followed, until, by the summer of 1848, they numbered 800 persons. At first they were very poor, living in holes in the ground and under sheds; but by industry and economy they prospered, so that, in 1859, they owned 10,000 acres of land and a town. Their religious life was very simple. Two services were held on Sunday and one each week-night. They discouraged amusements as tending to worldliness, and after a while the young people became discontented with the dull community life. It was determined, in the spring of 1860, to divide the property, which was done. Dissensions still continuing, a further division was made, each family receiving its share, and the commune ceased to exist.

VI. Cedar Valley Community is a communist society
SOCIALISTS

near Cedar Vale, Howard Co., Kansas, and was begun in January, 1871. Its members were recruited from among two essentially different classes of Socialists—the Russian Materialists and American Spiritualists. They numbered in 1874 four males, one female, one child; and on probation, two males, one female, and one child. They are organized under the name of the Progressive Community, and hold to community of goods and to empty forest of other.

VII. Social Freedom Community is a communistic society established early in 1874, in Chesterfield County, Va. It has two women, one man, and three boys as "full members," with four women and five men as "probationary members." They have now a farm of 383 acres, and are engaging in general farming, sawing, grilling, etc. The members are all Americans. They hold to "unity of interests, and political, religious, and social freedom; that every individual shall have absolute control of herself or himself." They have no constitution or by-laws; ignore man's total depravity, and believe that all who are actuated by a love of truth and a desire of progress can be governed by love and moral suasion.

See Holyoke, History of Co-operation (1875); Noyes, History of American Socialism (1870); Stein, Der Socialismus and Communismus des heutigen Frankreichs (1844), and Geschichte der sozialen Bewegungen in Franken (1846); for information on the society. The society mentioned in this article are widely indebted to Nordhoff, Communist Societies of the United States (N. Y. 1875).

Society. See Socialism.

Society, a combination of persons uniting in a fellowship for any purpose whatever, and having common objects, principles, and laws. Many such combinations have been made of late years for the purpose of promoting religious objects, among the earliest of which are the Society for Promoting Christian Knowledge, for the circulation of Bibles, prayer-books, and tracts, founded in 1698; the Society for the Propagation of the Gospel in Foreign Parts, for carrying Christianity to the colonies and other dependencies of the British empire, established in 1701; and others, most of which will be found under their appropriate heads, as Bible Societies, etc. Since convocations and diocesan synods have fallen into disuse, the duty of providing for missions, the circulation of the Scriptures, the preparation and publication of devotional works, and similar objects, has devolved upon voluntary associations. These societies, being formed independent of ecclesiastical authority, are necessarily free from ecclesiastical rule or regulation, and their constitution is thus determined by the nature of their object. In the Church of England a controversy has arisen in relation to these societies, respecting the necessity of members of the Church having the sanction of their diocesan before joining such associations. The real question is, whether any such society involves in its constitution or practices a violation of canonical law or established discipline. The matter was finally left to the discretion of the individual. In the United States such societies are often organized by the authorities of the Church they represent, or are endorsed by several churches, and thus become their acknowledged agency in that direction. Of the latter the American Bible Society is a notable example.

Society People, a name given to the Covenanters in Scotland by Wodrow (ii. 357) and others, because they withdrew themselves into societies for mutual religious intercourse and edification.

Socinianism, a development of the Arian heresy, has for its leading feature the denial of our Lord's divine nature, with the belief that he was a typical and unique man, displaying in so unprecedented a manner those higher characteristics of human nature which make him a shadow of the divine nature that he was called the Son of God. See Socinus.

I. System of Theology.—Socinianism represents Jesus as having been born of the Virgin Mary by a supernatural interposition of the Holy Ghost, in consequence of which he was a man free from original sin and its evil inclinations, but only a man. He was outwardly anointed prophet, priest, and king at his baptism by a material descent of a divine force and efficacy upon him in the form of a dove; but he had no divinity of his own, and no union of his own with God (prostration of the spinning at God of his own) from the dead, and delegated to him a supreme authority over men and angels. But in all this he is only a created being, and worship rendered to him should only be given to him as the representative of God, not as his own right. The Socinian system discards altogether the idea of union between divine and human nature, alleging that the two are so infinitely removed from each other that union between them is an impossibility. Its later development does not recognize Christ as, in any sense, an object of worship, denies the supernatural origin which was attributed to him by the earlier form of the heresy, and looks upon him only as a very exalted saint and moral teacher.

Socinianism, however, is not merely a system of negations, but includes positive propositions. It not only denies the doctrine of the Trinity, but positively asserts that the Godhead is one in person as well as in essence. It not only denies the proper divinity of Jesus Christ, but positively asserts that he was a mere man—that is, a man, and nothing else or more than a man. It not only denies the vicarious atonement of Christ, but it asserts that men, by their own repentance and good works, procure the forgiveness of their sins and the enjoyment of God's favor; and thus, while denying that, in any proper sense, Christ is their Saviour, it teaches that men save themselves—that is, in so far as they need salvation. It denies that the Spirit is a person who possesses the divine nature, and teaches that the Holy Ghost in Scripture describes or expresses merely a quality or attribute of God.

In its theology Socinianism represents God as a being whose moral character is composed exclusively of goodness and mercy, desiring merely the happiness of his creatures; thus virtually excluding from his character that immaculate holiness which leads him to hate sin, and that inflexible justice which constrains him to inflict upon sinners righteous punishment. It also denies that God foresees the actions of his creatures, or knows anything about them until they come to pass; except in some special cases in which he has foreordained the event, and foresees it because he foreordained it. That they may not seem to derogate from God's omniscience, they admit that God knows all things that are knowable; but they contend that contingent events are unknowable, even by an infinite being.

In its anthropology Socinianism denies, in substance, the fall of man, and all original depravity, and asserts that men are now, as to all moral qualities, tendencies, and capacities, in the same condition as when the race was created. Having no original righteousness, Adam, when he sinned, did not lose any quality of that sort. He simply incurred the divine displeasure, but retained the same moral nature with which he was created. Created good nature, he would still have, he had sinned or not. Men are now, in their moral nature and tendencies, just as pure and holy as Adam when created; without, however, any positive tendency towards God or towards sin. Men are now under more unfavorable circumstances than Adam was, because of the many examples of sin, which increase the probabilities of actually falling into sin. Some avoid sin
altogether, and obtain eternal blessedness as a reward; others sin, but there is no difficulty in obtaining forgiveness from God, and thus escaping the consequences of transgression.

In its Christology this system naturally denies the necessity of an atonement, and declares that Christ had nothing to do with the redemption of the world, and that the real purpose of the prophetic office was to communicate fuller and more certain information about the divine character and government, the path of duty and future blessedness, and to set before men an example of obedience to God's law and will. The old Socinians rejected, therefore, the priestly office of Christ altogether, or confined and confined the most important functions of the kingdom entirely to the Socinians abolish the kingly office and resolve all into the prophetical. His suffering of death, of course, did not belong to the execution of the priestly, but of the prophetic office; in other words, its sole object and design were confined within the general range of serving to declare and confirm to men the will of God. Thus was revealed an immortality beyond death, of which no certainty had been given to men before Christ's death.

With respect to eschatology Socinianism denies the resurrection of the body, as a thing absurd and impossible. It holds what is called a resurrection, which is not a resurrection of the same body, but the formation and the union to the soul of a different body. It repudiates the doctrine of eternal punishment; but Socinians are divided between the two theories of the annihilation of the wicked (held by older Socinians) and the final restoration of all men (adopted by modern Socinians).

As regards the Church and its sacraments, Socinianism teaches that the Church is not, in any proper sense, a divine institution, but is a mere voluntary association of men, drawn together by similarity of views and a desire to promote one another's welfare. The object of the sacraments is to teach men, and to impress divine truth upon their minds; and they are in no way whatever connected with any act on God's part in the communication of spiritual blessings.

II. The Sect.—Laelius Socinus (q.v.) is usually regarded as the true founder of the Socianian system, though his nephew, Faustus, was its chief defender and promulgator. The origin of the sect is usually traced by their own writers to the year 1546, when colleges or conferences of about forty individuals were in the habit of meeting, chiefly at Vicenza, in the Venetian territory, with a view of introducing a purer faith by discussing the interpretations and dogmas of the Saviour as well as Papists—although this account is discredited by Mosheim and others. The first catechism and confession of the Socinians was printed at Cracow, Poland, in 1574, at which time the sect received the name of Anabaptists. See CATECHISM, II, 8. George Schomann is believed to have been the author of this early Socinian creed. This catechism was, however, supplanted by the creed adopted in the 17th century by the Racovian Catechism, composed by Schmalz, a learned German Socian, who had settled in Poland. From Poland, Socian doctrines were carried, in 1565, into Transylvania, chiefly through the influence and exertions of George Blan- drata, a Polish physician. For upwards of a hundred years Poland was the stronghold of this sect; but in 1658, by a decree of the diet of Warsaw, they were expelled from the kingdom; and this severe edict being repeated in 1661, they were completely rooted out from the country. The father of Socianism in England was Riddle, who, in 1618, towards the middle of the 17th century, was the first who openly taught principles subversive of the received doctrine of the Trinity. The publication of Riddle's Twofold Catechism caused great excitement both in England and on the Continent. Various answers to this Socianian pamphlet appeared; but the most able was that of the celebrated Dr. John Owen, in his Vindiciae Evangeliae. The Riddellians were never numerous, and speedily disappeared. The modern Socinians, who took the name of Unitarians (q.v.), were not a conspicuous party in England till the close of the 18th century, when Priestley and others publicly avowed and propagated antitrinitarian sentiments. A considerable difference, however, exists between the views of the modern Socinian sect and those of the modern Socinians. Both the Socini, uncle and nephew, as well as their immediate followers, admitted the miraculous conception of Christ by the Virgin Mary, and that he ought to be worshipped, as having been advanced by God to the government of the whole created universe—doctrines usually rejected by the modern Socinians. These do not, however, make the Socinians quite generally substituting, for Socinianism proper, the pantheistic infidelity of Germany, though under a sort of profession of Christianity.

Socinians. See Socinianism.

Socinus, Faustus (Fausto Soczini), the real founder of the Socianian sect, was the nephew of Laelius Socinus (q., and was related, through his mother, with the famous race of the Piccolomini. He was born in Sienna, Italy, Dec. 6, 1529, and was orphaned at a tender age. His early training was neglected, and his education immeasurably defective. Theological questions engaged his mind while he was yet employed in the study of jurisprudence on which he had entered, and his conclusions were largely determined by the anti-Roman training he received, his uncle Laelius acting as his principal instructor. In 1562 the papers of Laelius, then recently deceased, received the conclusion of Faustus, and their study confirmed the opinions held by him, so that they became convictions. He was wont to declare that, aside from the Bible, his only instructor had been his uncle Laelius.

1. Life and Labors.—The literary life of Socinus began in 1562 with the publication of a work entitled Explicatio Prima Partis Primi Capitii Evangel. Joannis—in effect a declaration of antitrinitarian principles; but twelve years of courier life in Florence interrupted his activity in this direction. A single minor work, De S. Script. Autoritate, belongs to this period. He did, however, in 1568, at Basle, in the United States, perfecting of his system and the propagating of his views, his residence being at Basle; and at this time he wrote two of his most important works, the De Jesu Christo Servatore et de Deo Primi Hominis ante Lapsam. From Basle he went to Transylvania, and thence, in 1579, to avoid the plague, to Poland, where he spent the remainder of his life.

Socinus now undertook the work of unifying and organizing the scattered Unitarian elements which existed, especially among the upper classes of Polish society; but his success was not at first encouraging. Anabaptist views prevailed to a degree which prevented his own admission into the Unitarian society at Cracow during four years, because he declined rebaptism as a needless ceremony. He came, however, to be in time regarded as the recognised and principal champion of the sect. His discussions and writings secured to it prominence and reputation, and gradually a new school of Unitarians was formed. In 1608 the Synod of Rakov, or Racovia, settled the specially controverted question of rebaptism by approving the teachings of Socinus.

But few events belong to Socinus's private life which claim notice in this place. He left Cracow in 1563 to avoid persecution by the king, Stephen Bathori, and settled in the adjoining village of Pawlikowice, where he
married a lady of noble rank, the daughter of Christoph Moratszy. At the same time he became impoverished through the loss of his Italian properties. He soon returned to Cracow. In 1588 he secured the favor of the Lithuanian Unitarians, whose synod he visited at Breslau. The other features of his history are simply illustrative of the general aspects of his life. He was finally tried by the Inquisition, and after a persecution, now at the hands of a military mob (1594), then through the fanaticism of the students of Cracow, who were incited to their action by Romanish priests (1598). They dragged him from a sick-bed to the streets, beat him, sacked his house, and burned his books and writing materials. He was imprisoned in the castle of Lidzbarsk, and lived in a neighboring village, Luclawice, until he died March 3, 1604. His works were collected and published in the Bibliotheca Fratrum Polonorum, vol. i and ii. They also bear the title Fautil Sinaitis Opera Omnia in Dvo Tomos Distincta. They include expositions of Scripture: polemics against Romanists, Protestants, and Unitarians; and dogmatical writings. The more important are the Praelectiones Theologicae and the Christ Ianis Religionis Brevisissima Institutio per Interrog. et Respon., etc., to which may be added a Fragmentum Catechismi Prioris F. L. S. qui perit in Cracoviansis Rebus, Gesuitæ Editione 1610.

Immediately after Socinus's death the Raconeum Catechism, which had been prepared by him, but which was completed by Schnitz, Moskorzowski, and Voikel, was published in the Polish language (1605). A German edition appeared in 1598, and one in Latin, with notes and additions, in 1603. The latter brought out a new edition in 1739, which was based on that of 1609, and which affords a good compendium of Socinian theology. It is accompanied with a refutation by the editor.

II. Followers.—Numerous congregations of Unitarians, whose members were chiefly of noble rank, had been formed in the land, and by 1620, when he died, Bacov was the largest. They supported many schools, too which the most capable teachers were appointed, and in which the most prominent theologians delivered occasional lectures. A press connected with the establishment at Bacov promoted the dissemination of the principal writings of Socinian authors. A general synod, which met annually at Bacov, and subordinate particular synods, furnished an effective organization which contributed greatly to the progress of the Socinian cause. But the most influential factor at work in securing this result is to be found in the large number of distinguished pastors, theologians, and scholars who contributed to the fame of Socinianism. Among them were Jerome Moscorovius (Moskorzowski), Johann Crell (q. v.), and others, are recognized as those of men who in their time exercised a most powerful influence over the history of the Polish Church and State. The progress of Socinianism was, however, stopped, and its very existence assailed, by the Roman reaction under Sigismund II of Poland and his son, Vladislaw IV. An insult offered to the crucifix by some pupils of the Bacov school furnished the occasion for a complaint of sacrilege, which involved the whole community of Unitarians. In violation of law, and in disregard of the facts of the case, they were condemned. The school at Bacov was destroyed, the church transferred from the possession of its Arias owners, and the clergy and teachers declared infamous and outlawed. Other schools and churches were afterwards involved in similar ruin. The decisive blows of Jesuitism against the Unitarian sect were not inflicted, however, until after the accession of John Casimir—a Jesuit and cardinal— in 1648. The Cossack wars which raged in Southern Poland ruined many congregations; and when the Swedes invaded the country many Socinians, as well as others, joined their party. This was made the occasion for the suppression of the Unitarian sect of the Ukraine. The Peace of Warsaw in 1658 deprived them of their banishment, to take effect within three years, and this term was afterwards shortened to two years. The protests of Socinian delegates, and likewise those of Electoral Brandenburg and Sweden, were disregarded, and the edict was rigorously executed.

In Germany, Socinianism had established itself in the University of Alsfeld through the influence of Prof. Ernst Sonner (died 1612); but when the emigration of the authorities of Narenberg effected its overthrow, Polish exiles settled in Silesia, and held synods in 1661 and 1663; but their efforts to gain proselytes led to unfavorable action on the part of the State, and to their eventual removal in 1666. Certain departments of Brandenburg contained numerous Unitarian congregations and communities during the last decades of the 16th century. Everywhere, however, they were merely tolerated. Often they were persecuted. The repeated efforts to extirpate them were so far successful that in 1688 only two Socinians were found in Prussia, both of them old men.

In the Netherlands, anti-trinitarianism was at first connected with the Anabaptist movement. An Antitrinitarian, Herman van Vleckwyck, was burned at the stake at Bruges in 1569. Amsterdam and Leyden each contained a band of Socinians at the close of the 16th century, whose expulsion was attempted by the States-General. The sect continued to grow, even in the face of the active efforts of the orthodox synods to bring about its extirpation. The influence of Polish coreligionists, who were banished from their native country, greatly strengthened its numbers. Constant repression of its worship and interference with its tenets eventually produced the intended effect; however, the Socinian party gradually melted away, and its members were absorbed by the Remonstrants, the more liberal Anabaptists, and the Collegiants.

Anti-trinitarian ideas found reception in England as early as the middle of Henry VIII., and were particularly vigorous martyrs. So late as the time of James I three Anti-trinitarians were burned at the stake. The Polish Socinians forwarded a copy of their Catechism to the latter monarch, which was not favorably received, but proved the first of an uninterrupted series of Socinian writings which circulated from that time. John Biddle (q. v.) became the prominent leader of a modified Socinianism, and the rise of deism secured to it a widespread existence, even though it was excluded from the Acts of Toleration, and was under the ban of stringent laws; and it became a tendency among the clergy of the Established Church. Lindsey and Priestley eventually brought about a breach with the Church. The old repressive laws were finally repealed in 1813. For the present status of Unitarianism in England, recourse must be had to the census-tables of 1851, the census of 1861 not giving information respecting the creed of the inhabitants. In 1851 Great Britain contained 299 Unitarian churches, which afforded 68,551 sittings, and attracted 37,156 attendants—nearly all of them being in England.

Unitarianism was planted in North America in the middle of the 18th century, and obtained its first American church in November, 1787, when James Freeman (q. v.) was ordained pastor over the King's Chapel congregation in Boston. The movement spread in secret, care being taken by its supporters to avoid alarming the orthodox part of the population; so that when the state of affairs was finally understood, nearly every Congregational Church in Boston had become Unitarian, and many churches in other parts of New England had adopted Unitarian views. A controversy grew out of the publication in 1815 of a pamphlet entitled American Unitarianism led to the withdrawal of Unitarians from the orthodox, and their separate organization. Channing (q. v.) became the foremost representative of the American Unitarian Association, founded in 1825, became its centre, and the Christian Examiner its leading periodical. It has now less than 300 churches, about 350 ministers, a member-
ship estimated at about 30,000, two theological schools, and a number of benevolent and other societies. The Socian view has many supporters, besides, in the Church of Christ ("Oecumenicalists").

See Fock, Der Socianismus und seine Stellung in der Gesamtentwicklung des chrstlichen Glaubens, seine Geschichte. Veroff. u. seiner Lehreigentum (Kiel, 1847): Hunst, Hist. of Rationalism, ch. xxii; Gieseler, Ch. Hist. iv, 358–565; Baumgarten-Crassius, Compend. i, 384; Bibliotheca Fraternum Polonorum, etc. (Anhald). Socinus, Laelius (Lelio Sozzini), a noted Italian heresiarch, uncles of the preceding, was born in Siena in 1525, being the son of Mariano Sozzini, Jan., a lawyer, of a family that made considerable pretensions to learning. Leio gave himself to the study of theology, then quickened by discussions of Luther, and for this purpose read the Bible in the original tongues. This made him suspected by the Church authorities, and he left Italy about 1544, and wandered for four years over France, England, the Netherlands, and many other countries. He at last settled at Zurich, where his erudition and personal qualities at first gained him consideration, and there entered upon a series of investigations and a course of correspondence which resulted in undermining his belief in the divinity of Jesus Christ. These convictions rendering him unpopular at Zurich, he retired, after the death of his father, in 1548 or 1559, to Poland, where Sigismund II received him favorably, and gave him letters that enabled him to return with prestige to Zurich; and he spent the remainder of his days there in peace, dying May 16, 1562.

He left the following works: Dialogus inter Calvam et Leonem, s. l. 1612, in which he opposes the punishment of heretics: — De Socianum et De Resurrectione Corporum, both inserted in Fruits et Laelii Sociniani Tractatus (Ekleutheropolis [Holland], 1654). Sand (Biblioth. Antiqu. p. 18–25) speaks of some other doubtful writing attributed to Laelius Socinus.

Soclet (טנ', eden), the bare, e. g. of the planks of the tabernacle (Exod. xxvi, 19, etc.), the pedestal of a pillar (xxxviii, 10 sq.; Cant. v, 15); the "foundation" of a building (Job xxxviii, 6). See Column.

Soc'oh (Heb. Sukoh, סוקה, Josh. xxv, 35, 48; marg. Socoh, סוקה, which occurs in the text at 1 Chron. iv, 18; "Socho;" 2 Chron. xi, 7; "Shoco;" xxviii, 18; "Shocho;" "Shochoh," 1 Sam. xvii, 1 twice; or סוקה, 1 Kings iv, 10, "Socho;" another form for Socoh [q. v.]); the name of two towns, both in the tribe of Judah (q. v.).

1. (Sept. Σωκάθιος v. r. Σωκάθιος; Vulg. Socroth.) A place in the district of the lowland or Shephelah (Josh. xxv, 35). It is a member of the same group with Jarana, Aneszah, etc., and is noted for the N. W. corner (see Keil, Comment. ad loc.). The same relative situation is implied in the other passages in which the place (under slight variations of form) is mentioned. At Ephes-dammim, between Socoh and Azekah (1 Sam. xvii, 1), the Philistines took up their position for the memorable engagement in which their champion was slain, and the wounded fell down in the road to Shaaraim (ver. 54). Socoh, Adullam, Azekah, were among the cities in Judah which Rehoboam fortified after the revolt of the northern tribes (2 Chron. xi, 7), and it is mentioned with others of the original list as being taken by the Philistines in the reign of Ahaz (xxviii, 18). In the time of Eusebius and Jerome ("Euseb. Hist. eccl."") it bore the name of Socoth (Σωκοθ), and lay between eight and nine Roman miles from Eleutheropolis, on the road to Jerusalem. Paulina passed through it on her way from Bethlehem (?) to Egypt (Jerome, Ep. Pauly, § 14). As is not unfrequently the case in this locality, there were then two villages, an upper and a lower ("Oecumenus"). Dr. Robinson's identification of Socoh with esth-Shaweekeh (a diminutive of Shawekeh) in the western part of the mountains of Judah is very probable (Bibl. Res. ii, 21). It lies about one mile to the north of the track from Beit Jibrin to Jerusalem, between seven and eight English miles from the former.

To the north of Socoh, within a day's journey by Yarmuth, the ancient Jarmuth. Damun, perhaps Ephes-dammim, is about the same distance to the east, and Azekah and Shaaraim, no doubt, were in this neighborhood.

To complete the catalogue, the ruins which must be those of the upper one of Eusebius's two villages stand on the southern slope of the Wady es-Sum, which with great probability is the Valley of Elah, the scene of David's victory over Saul's son. This is the mountain of David's battle (ver. 20), and its distance from Jerusalem as there given is not sufficient for the identification proposed above (Revel, Par. 30, p. 1019).

2. (Sept. Σωκάθιος v. r. Σωκάθιος; Vulg. Socroth.) Also a town of Judah, but in the mountain district (Josh. xv, 48). It is one of the first group, and is named in company with Anab, Jattir, Eshtemoah, and others. It has been discovered by Dr. Robinson (Bibl. Res. i, 249) in the Wady el-Khall, about ten miles S.W. of Hebron; bearing, like the other Socoh, the name of esth-Shaweekeh, and, with Anab, Semoa, 'Attir, within easy distance of it.

Socordia, in Roman mythology, was the daughter of Ether and the Earth; a personification of dulness.

Socrates, the most notable and the best known of all the Greek philosophers, to whom the designation of "the Father of Philosophy" ("pater philosophiae") has been deservedly given. His prominence during life, his influence after death, and his notoriety through his death affected the character and development of speculation more than they have ever been affected by any other philosopher. It is the impress of his own heart and soul in the great changes that have been wrought — the impulse and direction which he gave to intellectual inquiry and to moral action — much more than any special doctrine, which have insured to his name the distinction and affectionate reverence that have attended it through all the ensuing centuries. Even if no regard should be paid to the peculiarities of the philosophical character of Socrates would merit the highest admiration in any age. They were singularly remarkable in a pagan age, and amid all the corruptions, the sophistries, and the brilliant license of Athens during the Peloponnesian war. He was a heathen, with many of the virtues and more of the aims of Christianity. In a world of corrupt and elaborated oeclochacy, of eager ambition, of greed, of self-seeking, and of rapacity, he, though conscious of the highest intellectual vigor, and associating with the ablest public
men, was content with the humble station in which he was born, and never sought office or command. Surrounded with opportunities for acquiring wealth and luxurious indulgences, he was heedless of poverty, hunger, danger, the loss of all he had obtained, and his breath of life. The Athenian, patriotic, and observant of law in matters religious, political, and social. He was without superstitions other than those inseparable from his time and country. He was faithful and fearless in the discharge of every public and private duty. He gave his thought, his heart, his exuberance, the full expression of his opinions, and his life, as a model to all time, his heart, and as a model to all time, the most solemn of all signatures. As a missionary, and as a zealous, self-abnegating and untiring moralist, Socrates suggests a comparison with the apostles and martyrs of Christianity, and with the founders of monastic communities in the desert and stormy ages of the Church. As a preacher and teacher of moral regeneration, he provokes, though with reverential assertion of the vast interval, a more daring comparison, which has impressed devout Christians no less than unbelievers and misbelievers of Rousseau and Baur. It adds new dignity and a loftier interest to the life and death of Socrates to contemplate his career as an essential part of the providential and patient preparation of the civilized world for the acceptance of Christianity.

I. Life.—It is peculiarly needful, in the case of Socrates, to pay careful attention to the course and circumstances of his life. His remarkable personality is so strongly and so strikingly impressed upon his doctrine and upon the whole tenor of his procedure. The Socratic philosophy, in its active development and in its theoretic import, is distinctly the product of the idiosyncracies of Socrates, and of the requirements and tendencies of his age. It is not of age, and of age, which he rendered more illustrious by his life. This has been fully recognised by Ritter, by Zeller, by Grote, and by other historians of philosophy and historians of Athens. It may be thought that they have overlooked some considerations not less weighty and significant than the obvious; that they have not failed to note the intimate correspondence between his man and his doctrine, between his teachings and his times. His life is his philosophy, his philosophy the reflection of his life. Yet it is difficult to present a true portrait of the great teacher, or a just biography of him. The materials are abundant, are, indeed, redundant; but they are all presented "in such questionable guise" as to be of doubtful credibility. Socrates reappears in nearly all later writers, Greek or Roman, whose subjects allowed any reference to him, or who sought "to point a moral or adorn a tale." Incident and anecdote, text and comment, are multiplied indefinitely; but no new facts have been recorded. What is reported or repeated by Cicero, Seneca, or Quintilian, by Plutarch or Diogenes Laertius, or by other authorities having will less claim on our belief. Revert conceits are invented, credulous admiration accepted, eager transmuted, and curious repetition distorted detail after detail, till the genuine Socrates of the fifth ante-Christian century became an accumulation of myths. This process of transfiguration commenced in the time of Plato, who introduced him into the dialogues of the sage. Aristophanes, in his Clouds, and Ameipias, in his Comus, exposed to immoral laughter his appearance, his rage, his manners, and his speculation. Yet the caricature of the comedians may be welcomed as a likeness with almost as much security as the declinations of his appearance, as a likeness that we possess the Memorabilia and the Symposium of Xenophon and the Dialogues of Plato. But both these biographers were manifest writers of fiction, and all their productions were dyed in the brighter or more subdued colors of fancy. The author of the Memorabilia composed the Cypriae, the Apology, and the Hiero. The author of the exquisitely Apologie, was under the influence of the Republic and the Laws. All the writings of both these glories of Attic literature may be included under Pindar's category: εισελαύσιν ψευδεία ποιούσος ... νίκους. Aristippus wrote to Plato repudiating his representations of their common teacher (Aristotle, Rhet. ii. 23), and seeking for a fuller and more accurate account of the exploits of Socrates at Delium and Amphipolis. The contrasts and discrepancies between Xenophon and Plato have been long and prominently noted. They have been explained by diversity of aim, difference of intellectual susceptibilities, and disparity of talent, by Aristippus, by Democritus, and in an able article in Smith's Dictionary of Biography, that the apparent contradictions may be reconciled. It is alleged that Xenophon regarded only the practical side of the Socratic instructions, and sought to convince the Athenians of the innocence of the master; while Plato was always most interested in the speculative import of the Socratic doctrine, and sublimating teaching and teacher in accordance with his own philosophical fancy. This may be freely admitted, but it does not leave a sufficient or a safe basis for accurate biography: "The trail of the serpent is over it all." Even those who espouse this scheme of conciliation are compelled to exclude from the Mémoires pour servir the greater and the more characteristic part of the Platonic Dialogues, in which Socrates is evidently a mere lay figure, or, rather, a tailor's mankinik for the exhibition of the Platonic robes and other finery. Agreement may be found in a preliminary calculation of the speculative import of the metaphor of the same personage. Such agreement, however, is not inconsistent with a lavish employment of decoration by each; since all forms of flattery and of caricature require some observance of characteristic features. Yet it may reasonably be conceived that the Socratic of Xenophon as well as of Plato is postulating, though there be great difference in the grace and fascination of the two figures. Still Xenophon and Plato are our best, and almost our only real, authorities for the life and opinions of Socrates. They must be accepted as nearly our sole genuine sources of information. Least of all must she be the enumeration; and it must be remembered that something of coherence and consistency, the softening of some asperities, and the exaggeration of some angularities, which were originally due to the fictitious ingredient, will remain after all our care. There may be little real ground for regret in the want of perfect assurance of the literal truth of the portrait. There is a hazy conception, and an exaggeration through the haze, of all the images of the past. There will be a general truth of presentation, resulting from the affectionate and admiring pictures of dissimilar followers, which will be more impressive and inspiring than any metaphysical speculation, though the faithful daub could be. At any rate, Xenophon and Plato furnish forth the Socrates who kindled, guided, charmed, the later world. Those who are sated of the substantial agreement of the two contemporary bi-
Socrates introduces Aristotle to check or to confirm their statements. The indications of Aristotle are eminently valuable. They are rarely biographical. They do not diminish the regret that all the works of the censors and even calumniators of Socrates, except the Clouds, and all the sources whence Athenæus drew his discrediting reports, have been utterly lost, but lost without having influenced the general judgment of men.

Socrates was born at Athens in B.C. 468 or 469; before 469 says Ueberweg, with great plausibility. His birthday was in later times commemorated as a sacred day on the 6th of Thargelion, which would fall in May. His celebrated Oath is said to have been a mother of his in humble circumstances; not a common stone-mason, if his distinguished son, who learned and practiced the father's art, produced the Graces in front of the Acropoli, which were seen and noted by Pausanias (1, 22, 8; ix, 35, 1). His mother was Phemarete, a midwife, whose occupation he often employed to illustrate his own intellectual procedure, which may have been confirmed or suggested by it. The father's condition did not allow the son any special advantages of education. The statement that Socrates was the pupil of Anaxagoras and Prodicus can have no other meaning than that he may have read the works of the former, and that he was present at the lectures that were held both by Gorgias and Parmenides, were at Athens during his early or mature manhood. The extraordinary education of an Athenian, with the varied aids and stimulations which rendered the average Athenian more than equal to an average member of the British Parliament, were open to his mind; but his less than useless turn of account. He would learn music and gymnastics, and these were, probably, his only school acquisitions; but music and gymnastics embraced the elements of all intellectual and physical training. He has expressed, through Plato, his obligations for his public education (Crêt, xii). The free intercourse of a democracy, and of such a democracy as that of Athens in the age of Pericles, with its boast of freedom of speech and of association, would afford Socrates, who ever sought intimacy with noted persons, every chance of instruction and information that could be desired. The education of living communion far transcends all that can be learned from books. Socrates himself professed to have been self-educated in philosophy (Xenophon, Symp. i, 5), and the profession is just, for he had none to point the way which he pursued. He might also have claimed self-education in other respects, but it was an education resulting from habitual intercourse with the most intelligent and the best informed of all classes and of both sexes. He became a perfect oracle of Pericles. He was intimate with Aspasia and Diotima, as well as with poets, artists, sophists, and artisans. His indefatigable pertinacity and curiosity would enable him readily to acquire the extensive knowledge ascribed to him by Xenophon.

There are no authentic details of the first half of the life of Socrates. To Plato and to Xenophon he was always an old man. Is there not room here for suspecting that the tenets and inquiries and practices which were ridiculed by Aristophanes and Ameipsias, before an audience familiar with the object of caricature, may have been the pursuits and investigations of Socrates in his earlier years, while grouping his way towards his ultimate vocation? This suspicion merits examination. It may, however, be fairly inferred from the tenor of Xenophon's and of Plato's remarks that Socrates pursued the simple path of his obscure life, in the performance of every public and private duty, without failure and without blame. He was an honest man, a citizen, a military man, having no political ambitions. He was not a son of a military family; on the contrary, he was a husband and a father of a family, beloved by the Athenians, loved its scenes, its bustle, and its people. He married and had children, but he was happy neither in his wife nor his children. Xanthippe had the reputation of a shrew throughout all antiquity; and the sons of Cimon, Pericles, and Socrates are commemorated to the present day. It is not impossible that Aristocles was once even credited to Socrates, but his neglect of wife and family while interminably discussing and debating throughout the livelong day. It is a question whether he had one or two wives—the much-known Xanthippe, the mother of his daughter, and Myrto, the daughter or descendant of Aristocles the Just. This bigness, or matrimonial duplicity, is repudiated by Athenæus (iii., 3), by Grote, Zeller, and nearly all the moderns. Athenæus says that the allegation rests upon the authority of Calisthenes, Demetrius Phalerus, Satyrus, and Aristoxenus. This is early testimony, and in the main reputable. It rests also on the higher evidence of Aristotle (Rhet. 1409 a 15) and of Diogenes Laërtius, but the reporter may be suspected.

We may believe that Socrates displayed the highest civic virtue and the highest moral courage on the only two occasions when he is stated to have been clothed with an official character. He was at all times averse to political employment, and when he accepted it was to his temperament and habits; but he renounced no duty. As presiding member of the Prytany, he refused to put to the vote the iniquitous decree against the generals inculpated at Arginusæ; and, under the Thirty Tyrants, he opposed the execution of the infamous order for the arrest of Leon the Salaminian. In one case he bravely the furious mob, in the other he despairs of oligarchs. The vocation of Socrates lay not in art, nor in litigation, nor in war, nor in politics. His mission was that of a reformer of morals and of speculation, and was created by and for himself. At what time he entered upon this career it is impossible to ascertain. It probably grew upon him gradually, and gradually, and shaped itself as it grew, until at length it became recognised as a definite and irremovable duty. There is so much in both method and doctrine that springs from the peculiarities of the man, so much in the fashion of his apostolate that reflects and elucidates any possible interpretation of his character, that his marvels can be reer much; the history of Delium, with the death of the democratic oligarchs, the deliberate and systematic prosecution of his high vocation must have begun soon after the death of Pericles, though it probably did not assume its characteristic form till a later time. He must have attained public notoriety in those years, for Aristophanes and Ameipsias offered him to the mercenary morals of the Athenian people in the spring after the battle of Delium. The new teacher presented as curious a spectacle as the fancy of a caricaturist could devise. He was earnest, enthusiastic, untring, pertinacious; pressing forward, in season and out of season, with line upon line and precept upon precept, tackling everybody, high and low, at work or at recreation, in street and temple, theatre and banquet-hall, court, dock-yard, and grove; in school, workshop, conference, and assembly. He claimed to be impelled to catechise, and to expose ignorance, under the solemnity of a divine call. But the missionary was grotesque in all respects, repulsive in character, coarse in manner, a corrupter of society, an intemperate disputant; boring everybody with an unceasing and pitiless storm of questions, and answering others only with a fresh shower of questions. This incorrigible note of interrogation was ugly beyond known examples of human ugliness, with short,
squat figure, fat, round belly, google eyes, thick lips, big mouth, pug-nose, transcending in its pug-nasity all observed puggishness. Even friends and admirers called him a satyr, and compared him to the comic masks of Silenus. Rabelais wittily assimilated him to a patent-physic-bottle. He was habitually unwashed and unshaven, and reeked of the sweat and chalybs of his blankets. His manners tended to increase repugnance. His speech was rude and inelegant, his voice grating, his immediately topics and examples humble, if not positively vulgar; his bearing was obtrusive, without being presumptuous; his address plain and unpolished, though not discourteous. His manners were deemed coarse and clownish by Aristoxenus. Politicians, legislators, orators, philosophers, sophists, magistrates, generals, and citizens were decried by him as fools and knaves, and compelled to gaze in the mirror held before them; that they might recognise their own folly, fraud, and ignorance. This drastic medicine was forced upon those who enjoyed the discomfiture of others, but not their own, by the quaint personage who could stand, and keep others standing, from morning to night, and who talked without intermission, though able sometimes to listen with the utmost patience. Nevertheless, this portentous mouthpiece for the power of sorcery and enchantment, and lull those on whom he fastened like a vampire, fanning them while sucking their blood, or held them, like the skinny finger of the Ancient Mariner, so that “they could not choose but hear.” The lustre of another world broke forth in his speech, like the moon emerging from the clouds. A bank of blackclouds veiled a tenderness of sentiment, a purity of feeling, a depth of thought, a fertility of illustration, an overflowing humor, a playful and penetrating wit, a wealth of knowledge, an ingenuity of argument, and a concentration of noble aims. His magic wrought like the Vice of the poet:

“A monster of so frightful mien
As, to be hated, needs but to be seen;
Yet seen too oft, familiar with her face.
We first endure, then pity, then embrace.”

It could scarcely increase the favor of Socrates with the multitude, who knew him only by sight, to see him attended by Critias, Alcibiades, Charmides, Xenophon, Aristippus, etc., and to hear that this zealot of a new doctrine, who condemned present conduct and current opinion, professed to keep a little divinity of his own, and was declared by the Delphic oracle to be the wisest of men. The humility of his interpretation of the oracle might become him, if he was a mere receiver of dictation, correspondent to his familiar and habitual irony. The only ground of the oracular utterance, he said, was that he knew that he knew nothing, while others mistook their own ignorance for knowledge. There is more wit than reason in the remark of Anthenous (v, 60), “If knowing nothing is wisdom, knowing all things must be folly.” He proceeds to say that Socrates was worthy of belief when he professed himself “not to be wise;” and that it was as needless to consult the god on this point as to ask whether any one was more pug-nosed than Socrates.

Such, then, was the reformer who undertook to convert the Athenians. He was a political reformer, the error of whose system was more frugal. He was more frugal than a Neapolitan lawyer or a Greek mendicant — Gracius aversus. He was abominable, given neither to wine nor to pleasure. He was able and willing to drink more than any of his contemporaries; yet “no man ever saw Socrates drunk” (Plato, Symp., p. 229). He was ascetic, inviting hardships and careless of pain, like the Coeliphibes of the desert or the founders of medialicen, of the desert or the founders of medieval fraternities. He declined the invitations of princes and potentates because he could not return their favors. He refused to take money for his instructions, denounced the Sophists for their mercenary practice, and would not be known among the rich, so that they might share him. He condemned existing usages, procedures, and theories; derided the political institutions of Athens; invited all to abandon their delusive and pernicious doctrines and reasonings; attached himself specially to the young for the conversion of the rising generation; yet was himself observer of established customs and prescription in religion, in law, in political and social conduct.

A character like this could hardly receive due appreciation in the Platonian world of captious community in which he lived and moved without resting, and which he tormented through all ranks without ceasing. How difficult the appreciation must have been may be estimated from the diverse portraits drawn by his friends and pupils, Xenophon and Plato, without either achieving a fair picture. Socrates is in the admirers of many by his brilliant display of dialectical ingenuity and intellectual power; he might attract ambitious politicians by the hope of acquiring his arts; but he could secure the devotion only of the few who caught glimpses of his purpose and desired to share his aims. To the populace and to the upper multitude he must have seemed a strange and unwelcome phenomenon. He must have gone about multiplying disfavors, nursing enmities and antagonisms, and storing up wrath against the day of wrath. In the Platonian Apology he expresses greater apprehension of chronic misconception and the calumny of his contemporaries, than of his bitter and unjust charge. This is consonant with probability. The distinct reference to Aristophanes is a Platonic device, and excites a suspicion that there is as little authentic and uncolored fact as in the Latin Panaetius, or the Diogenes of Dion Cassius.

Full acquaintance may be accorded to Grote’s remark that the indictment and condemnation of Socrates are less surprising than his long escape from prosecution. For twenty or thirty years he had been suffered, without molestation, to infest the streets of Athens, to consort with orlogarchs and tyrants, to preach novel doctrines to the masses, and seduce every one, and to offend prevailing sentiment. The Jews went and have stoned such a prophet without such patient endurance.

At length, in B.C. 399, after the restoration of the democracy and the re-establishment of the old constitution, Socrates was indicted. His accusers had little obvious reason for personal enmity. Melitus, or Meletus, was a youthful poet, otherwise almost unknown. Anytus was a wealthy tradesman and active politician, who had co-operated efficiently with Thrasybulus in the recent overthrow of the Thirty, and whose son had been disannulled from following his father’s trade. Lycon was a professional rhetorician, and was thus involved in the persecution of the Socratic sect. None of the three had any personal grievance. It was very slight, but it concurred with a general antipathy to Socrates. The charge was that Socrates neglected his country’s gods, introduced new divinities, and corrupted the Athenian youth. These charges may now be admitted to be substantially unjust; but they were then very plausible, and gave utterance to what may well have been the common impression in regard to the tenor and tendency of his dispositions. The purity of the motives, designs, and conduct of Socrates none will now gainsay. None will now repeat the fatal accusations with any thought that Socrates could conceive of them as just. His strict observance of the religious rites of his country is insisted upon in both the Apologies written after the event. He will not be less revered now from a conviction that his religious views inclined vaguely to the assertion of monothelism and to the adoration of “the unknown God.” This would result in the negation of existing superstitions and creeds, and would sustain the allegation of the introduction of new divinities. This allegation would be confirmed by his claim of special inspiration, and by the announcement of his mysterious and divine counsellor, whose essential character he had not yet been enabled to define. Desire of the third charge of corrupting young men would be even more plausible among the ancient Athenians than the other two. The Socratic method contemplated the compulsory confes-
SOSRATES 851

sion of ignorance, and proceeded by a perplexing series of questions and constrained answers, designed to re-
move the false conceit of knowledge in order to prepare the way for a careful and unprejudiced examination of
truth. Most of the sufferers who could stop with the nega-
tive result, as Socrates himself appears practically to have
done. Others, who did not understand the proc-
cess and could not appreciate the design, would con-
clude that the purpose as well as the effect of the So-
cratic elenchus was to unsettle belief in accredited in-
istitutions, not of the popular sects, but Crito and Charmides had been among his most cherished associates; that his chief disciple, Plato, perhaps not yet prominent, was the nephew of Charmi-
des, one of the Thirty, and had recently been active in aristocratic opposition; that Socrates had always dis-
approved of the existing modes of appointment to office;
and that he had displayed a constant distrust and dis-
approval of democratic institutions—a censure which democracies always jealously and passionately resent.

Socrates was brought to trial. His divine monitor forbade his making a defence in the customary spirit.
If people were to suppose that his motives were calculated only to irritate his judges. There was no
fixed or systematic law at Athens, especially in crimi-
nal matters. Every indictment was a bill of attainder.
Nevertheless, Socrates was condemned by a majority of
only five or six voices in a decasy of more than five
hundred, and the sentence of death was left to be deter-
mined. Athenian procedure required the ac-
cusers to name a penalty and the accused to offer an
alternative satisfaction. The accusers had specified
death. The alternative proposed by Socrates was a
virtual negation of the verdict by substituting for death
public support in the Prytaneum, the highest honor
that could be bestowed; or, in deference to the urgency
of his friends, a fine of thirty mine (about seven hun-
dred dollars). The jury could choose one only or oth-
er of these penalties. Socrates had already been de-
clared guilty. The sentence could scarcely be other
than—death.

Polycrates among the Greeks, and Catou among the
Romans, justified the condemnation of Socrates. Lelut
and Forchhammer did the same thing forty years ago,
and Dresig preceded them by a century. Grote holds
the balance even between the judges and the judge.
The judgment of Polycrates may have been merely a
rehearsal for the intellectual tour de force; or it
may have been serious, and may have called out the
Apologia of Xenophon as a reply. It was recognised
by friends and contemporaries, it was generally recog-
nised in antiquity, it has usually been recognised by
the moderns, that the condemnation and death of So-
crates was his own act. He did not desire to live. His
work was done, his career was bending to its close. He
was willing, if not eager, to perpetuate his influence and
to confirm his life and doctrine by his death. Nothing
can be more exquisite touching, more ennobling, or
more memorable than the account given by Plato of the
last days of Socrates, and of the cheerful, playful
scenes with which the intellectual conflict and the human
uprising scenes of his life. The closing scenes are among the noblest ex-
hibitions of human, and almost of superhuman, virtue.
That there is much of Plato in the pathetic story is
indubitable. The artistic arrangement of details, the
subdued coloring, the solemn calm, the dramatic pres-
centation, are all Plato's, but the essential significance
may be confidently ascribed to the genuine Socrates.
We shall not repaint the rose or reperform the lily.
The tale must be read in the pages of the reverent disciple and consummate artist.

Socrates should have drank the fatal hemlock the day after the sentence. But the sacred embassy had
just arrived in the very hour that the punishment was pend-
Plato, Sophist, xlii; Erasmus, Ch. — "Non est beat-
us, esse qui se necaret;" "Nil passus es mi si dissol-
mulcereis." It was in this condition of the State and
of Greek society that Socrates felt himself urged, as by
a divine voice, to interpose for the reclamation and re-
generation of his countrymen, and to appear as a per-
sistent missionary in the cause of justice, honesty, and
truth (Plato, Apology, xxii). It has already been ob-
served that he had been implicitly delev-
oped. He may have proceeded at first in an intuitive,
unconscious, tentative sort of way, following his natu-
ral impulse to inquiry, to the pursuit of information,
love of company and conversation, till his course shaped
itself out before him, bestir him as the special duty of
his life, and assumed the imperative form of a divine
mission. There was a perception of the public and
private faith and morals which would conduce to such
a result in a nature highly sensitive to all intel-
lectual and moral demands. Whatever opinion may be
entertained of the claim of the Platonic Apology to be
regarded as a just representation of the actual defence
made by Socrates, it is very remarkable that Plato puts
into the mouth of the accused the distinct declaration
that he had received his mission from the divinity, and
that if his life were taken another divine messenger
might be sent (Apology, xivi). This special and con-
trolling influence is familiarly known as the demeon
or daemon of Socrates. It was the subject of the
more dispassionate
Some critics, commentators, and historians of
philosophy conceive it to have been a personal genius,
or, at least, to have been so regarded by Socrates.
Others look upon it as simply a divine pressure or mysteri-
ous suggestion. Those who recognise the direct action
of the Holy Spirit and the divine call to Christian be-
lievers cannot utterly reject the possibility of the like
agency even in pagan times (Rom. ii, 15). Others, again,
consider the Socratic daemon to have been "the still,
small voice of conscience" gradually transmuting itself
into a prophetic voice. Others, finally, regard the alle-
gation of this divine guidance as a restraint against halluci-
nation, hypocrisy, or prevarication. Neither pretense nor
hypocrisy would have been apt to assume such a form
in those sceptical times, and would be at variance with
any plausible or consistent conception of the character
of Socrates. Pure hallucination is not consonant with the
philosophic temper and spirit of him which distin-
guished him from all other enthusiasts. That this
demon was sometimes regarded by him and his dis-
ciples as personal cannot be denied. As Socrates says
that every earnest servant of the gods may have a like
divine illumination, as Plato speaks of the demon of ev-
every man leading him after death to the judgment (Phaed.
119 A 3), it was perhaps a mistake of an era of the
classical period, as a guardian or attendant angel. This
conclusion scarcely militates against the second supposition,
which will not appear extravagant or unreasonable
for those who remember the numerous echoes, through all
ages and all creeds, and from the most eminent men in
all lines of thought, of the Homeric phrase tiv ev omé
qanéi qanwv (Odys, xix, 138). Saya Cicer (De Nat.
Deor, ii, 66, 167), "Nemo vir magnum sine aliquo di-
vino auctato umquam fuit." The testimonies are end-
less, and from sources that would not be anticipated; but
there is no room to cite them. Waiving, however, such
testimonies, what that demon was is still under perpa-
rous investigation. There may be delusion in imaging any special inspiration, it will not do to resolve the Socratic demonism into
practical wisdom with Grote, or into moral tact with
Ueberwey. These might be the results of the moni-
tions of the demon, or independent of them; but they are
also quite detectable, though transcendant. It might be agreed,
the Socratic phenomenon, rarely noted because of infre-
cquent occurrence and less frequently subjected to criti-
cal observation, which merits grave estimation in this
connection. A mind and nature quick, earnest, com-
prehensive, and impressive—with unusual faculties of
intuition—fervently occupied with any serious moral
or intellectual pursuit, has visions of the day "which have
ever elsewhere their rising"; and spring neither from
the reason nor from the intuition, but reveal themselves to
others never hear; has sudden convictions which descend upon him without logical induction or antecedent evidence; has firm assurances which rest
upon inexplicable faith; and is led reverently to pre-
sume that "it is the Lord which gives him under-
standing to reveal himself by an immediate revelation. Of
such men was Socrates.

In the assurance of a heavenly vocation, Socrates put
aside all other thoughts, cares, interests, employments,
aims, and devoted himself exclusively to the task of
reforming his fellow-citizens by disclosing their intel-
lectual procedure and by enlightening their consciences.
He professed he saw no objection to the adoption of
public and private faith and morals to improve himself and to acquire fixed knowledge.

He disclaimed any pretence of teaching, for ignorance
was his profession and the ground, as he alleged, of his
being declared by Apollo "the wisest of men." He
spent the whole day and every day, from early morn
till set of sun, amid the gatherings of men, inquiring into
the opinions, and the grounds of their opinions, of
persons in every profession and of every grade. He
never was tired of asking questions, and he did nothing
but ask questions, drawing out by the answers obtained
the fallacy and inconsistence of dogmas, and making
every one see that his own opinions were the wiser in
the open confession of his supposed knowledge. Hence he always
professed to do nothing more than practice intellectual ob-
estics, and to deliver men of their own intellectual
progeny, for the most part monstrously deformed. This
was the method of Socrates, and his method was his
whole philosophy. The curtain was the picture. Yet
this method was productive of nearly all the philosophy
that followed, and was then the one thing needful—the
effectual exposure of the false conceit of knowledge.

"Dam falsas mentes vires miratur homines et cele-
brant, veras exsudem, quae esse possint, . . . praeerueat
et perdant. Remittere illi supernatis ut res intelligant
et detur, melioribus prassidii" (Bacon, Nov. Orq. Morum;
comp. J. Aph. x, 31). To those who were subjected to
this catechising process it may have appeared a preconcerted scheme for their confusion. Such it may
ultimately have become, being scarcely disguised by
the pretence of disinterestedness, as a scheme of en-
lightenment. So the practice was regarded and pre-
seented by Xenophon and Plato. So it has been
universally esteemed by later writers, who have explained it
by the Socratic irony. Is it not more reasonable
and more consistent with every probability to suppose
that this interrogatory insinuation was begun in simple
delusion, as honesty in the beginning it might lead to an easy
admission of God, than that it assumed its definite purpose as a criterium falsi,
itis only after those who were consulted were found to be
without settled principles or tenable doctrines? With
the prevalent arrogance of knowledge which was no
knowledge, with the consequent substitution of blunt
assurance for intelligent investigation, with such a blind
indifference to logical proof that the possibility of ei-
ther rational or moral principles was often theoretically
denied, with the vitiation of all intellectual procedure
and of all authoritative rules of moral conduct thence
ensuing, the first duty of the reforming missionary was
to discover the reality and the bounds of truth. What
is truth? was the great question. What is true? was
the question that Socrates propounded. There was,
however, a preliminary task to be performed before such
inquiries could be hopelessly prosecuted. It was nec-
rresary to purge the minds of the inquirers, to disclose the
nature and the sources of uncertainty, to reveal the
cowlness and fallacy of current maxims, postulates,
deductions, and arguments, to expose the ambiguity
and deception of popular phrases and received terms,
and to establish the elementary principles of valid rea-
soning: diálektikê gêr égrês ouv tov 'án (Aristot.
Metaf. xiii, 4). Socrates never got beyond the pre-
liminary task. His whole life was engrossed with it. He only laid the foundations and discovered the elements of dialectical science.

Socrates thought—at first, perhaps, only instinctively felt or ascertained by experience—that any hope of moral reform must be preceded or accompanied by intellectual reform. He examined himself, he examined others, the philosophy of life was nothing better than ingenious fantasy or unauthentic opinion. The first effort, then, was to remove delusion, prejudice, untruth, and, what Grote calls "the conceit of knowledge." The humble concession of ignorance was the indispensable preparation for a candid and hopeful search for truth. Grote has acutely and ingeniously observed the prevailing tendency of actual reform inclined his thoughts almost exclusively to ethical speculation. He was dissatisfied with the development of the physical theories of Anaxagoras, which he studied in early life; but he was dissatisfied on grounds whose invalidity he has pointed out (Hiat. Crit. Dict. "Anaxagoras," note E). He rejected physical inquiries entirely, deeming them beyond human apprehension and human application: "Quod supra nos nihil ad nos." Grote thinks that he excluded physics only provisionally, and that he contemplated such studies as an ultimate portion of his scheme. But he had no system, and could have no system; and Grote is directly contradicted by Aristotle, who speaks of him as the first to use the word philosophy. The sense of the term, was the special and peculiar domain of Socrates. He deserves Grote's designation as "the first of ethical philosophers." This commendation had been anticipated by Augustine (De Civ. Dei, viii, 8): "Socrates primus universam philosophiam ad corrigendam componendosque mores flexisse memoratur.

But there was no systematic doctrine; there were principles and tendencies which might be developed into a system, or into several systems, but they were not adapted by him for the places which they might occur in such systems. They were undeveloped and disconnected; not harmonious, but unharmonized; requiring explanation and discussion to be understood in their true bearing. Thus he holds that all virtue is knowledge, and may be acquired by instruction—a doctrine accepted and partially developed by Plato, and corrected by Aristotle. His test of good is practical utility—a narrow and dangerous principle, which he was far from acting on himself. In government he advocated the rule of the best and most instructed—an optimist delusion—without showing, or being able to show, how the best and most competent were to be discovered, or to secure their obedience. The words are sometimes applied to the point by lot; and, with good reason, condemned the contemporaneous practices in his own State. However wise in purpose, Socrates was a dreamer in practical affairs, despite Xenophon's admiration of his sagacity in counsel. In that higher department of ethics which consists of theology he manifested an instruction towards monotheism, though maintaining the formal observance of the religious ceremonial and worship of his country. Like the best of the ancients, he had not attained to the conviction of the immortality of the soul. It was a wish, a hope, a probability, not an assured belief. It must be remembered, however, that everything we seem to know of Socrates, of his tenets, and of his instructions is seen through stained glasses, and glasses of a wonderfully magnifying and distorting power. We cannot safely trust either Xenophon or Plato, and there is none other whom we can trust except Aristotle; and his indications are loose and rare. The number of coincidences in opinion, however, is not small. The number of the precepts of the precepts, under both the first and the second covenant, are singularly noteworthy. These precepts may or may not be the real expressions of Socrates; they may be eagerly accepted as such, but some doubt must always remain. After all uncertainties are
entertained, and all reasonable deductions made, there can be no reluctance to reverence Socrates as one of the most memorable, best, and wisest of men: "Bonum virum facile creatres, magna libenter." Erasmus declared that "Socrates, proficus in eloquentia, "Sawdane Socratio, ora pro nobis!" and his impulse may excite sympathetic appreciation in others. The highest attestation of the moral excellence, the sublime purpose, and the intellectual greatness of Socrates is to be found not in the beautiful biographical notices of his loving disciples, but in the defects which he has imputed to them, and in the perpetual praise with which he is justly associated in the minds of his auditors. "In the universal reverence early and always accorded to his name; in the volume of philosophy which traced its descent from him; and in the broader, loftier, healthier, soberer spirit which animated all subsequent speculation.

III. Influence of Socrates.—The unquestioned influence of Socrates was not revealed by any marked improvement in the political or private morals of the contemporary and succeeding generations, but in the changed tone of thought and sentiment among the higher natures of the following times, and pre-eminent-ly in the enlargement and more sedate and rational development of philosophy. Xenophon and Plato, Euclid and Phaedo, Antisthenes and Aristippus, were his immediate disciples, and from them proceeded all the great sects of the Greek philosophers, with the exception of Epicureans—and the morals of Epicureans accorded with the philosophy. It is useful to remember that this Hellenic philosophy issued all Roman, and nearly all that is valuable in medieval or modern philosophy, so far as these have been independent of revelation. No such extensive and enduring influence has ever been, or can ever again be, exercised upon the world by any other unsupervised teacher. No such unending influence could have been exercised by any system or by any founder of a system.

IV. Literature.—Dreisig, De Socrate justis Dramate (Lips. 1732); Freiber, Observations sur les Causes et sur quelques Circonstances de la Condamnation de Socrate (1736; Paris, 1809); Wiggem, Sokrates, als Mensch, Bürger u. Philosoph (Rost. 1897); Schleiermacher, Uber den Werth des Sokrates, etc. (Berlin, 1815); Meiners, Uber den Genius des Sokrates; Brandis, Uber die Grundlinien der Lehre des Sokrates (Rhein. Socrates, SCHOLASTICUS, an ecclesiastical historian, was born at Constantinople towards the end of the 5th century. He studied grammar and rhetoric under Ammonius and Helladius, of Alexandria, and afterwards followed the profession of advocate or scholasticus. He appears, however, to have abandoned this profession in order wholly to devote himself to the study of ecclesiastical history. In the latter part of his life he undertook to write the history of the Church, beginning at 399, where Eusebius ends, and continued it down to 440, in seven books. He is generally considered the most exact and judicious of the three continuators of the history of Eusebius, being less timid in his style and more careful in his statements than Sozomen, and less censurable than Theodoret. "His impartiality is strikingly displayed," says Waddington, "as to make his orthodoxy questionable to Baroinius, the celebrated Roman Catholic historian; but Valesius, in his life, has shown that there is no reason for such suspicion. He is generally suspected of being a Novatian, though he shows himself the disciple of the subject, and confounds Novatian, a priest at Rome, with Novatian of Africa." His history has been abridged by Epiphanius, the scholastic, in his Historia Tripartita, and was published for the first time as a continuation of Eusebius by Robert Stephens (Paris, 1544, fol.). There was an English edition published by Reading (Lond. 1720, 3 vols. fol.), and an English edition of Cambridge, 1683, fol.). There is a good French translation of it by the president Cousin. See Smith, Dict. of Gr. and Rom. Biog. s.v.

Socrates, a local name for the Gnostics, which is to be found under the number 26 in St. John Damascene's treatise On Heresies.

Sodalities (Lat. for societies), a term applied to certain associations in the Roman Catholic Church. These are composed of laymen, and are instituted for the encouragement of devotion, or for promoting certain works of piety, religion, and charity, under some rules or regulations, though without being tied to them so far as that the breach or neglect of them would be sinful. An example is afforded by the Sodality of the Living Rosary, which exists in parishes and churches, as is visible by this: each member, every month, each taking by lot one of the fifteen "Mysteries of the Rosary" and reciting its dedication (=ten Hail-Marys, with a Lord's Prayer before it, and a Gloria Patri) every day. A number of circles, united under a clergyman as director, constitute a sodality.

Sodé. See SoUER.

Sodóm (Heb. Sedom, סְדוֹם, meaning uncertain [see below]; Sept. and New Test. [rā] Σοδομα; Josephus, Σώδουμ, Ant. i, 9, 1; Vulg. Sodomam), an ancient city in the vale of Siddim, where Lot settled after his separation from Abraham (Gen. xiii, 12; xiv, 12; xix, 1). It had its own chief or "king," as had the other four cities of the plain (xii, 2, 10), and was along with them, Zoar only excepted, destroyed by fire from heaven on account of the gross wickedness of the inhabitants; the memory of its evil even is perpetuated in a name of infamy to all generations (ch. xxi, xx). In the following account of this remarkable place we digest the ancient and modern information on the subject. See SODOMITISH SEA.

I. The Name.—The word Σδόμ has been interpreted to mean "burning" (Geosenius, Theaur. p. 589a), taking Σδόμ = θυμός, and that as θυμός. This is possible, though not at all certain, since Geosenius himself hesitates between this interpretation and one which identifies it with a similar Hebrew word meaning "vineyard," and Fürst (Handb. ii, 72), with nearly equally plausible, connects it with an Arabic root meaning to enclose or fortify (סָדָם, as the base also of Siddim), a view in which Muhlau coincides. Simonia, again (Onomast. p. 365), renders it "abundance of dew or water," Hiller (ibid. p. 176), "fruitful land," and Chrytneux, "mystery." In fact, like most archaic names, it may, by a little ingenuity, be made to tell of fire and volcanism. Stanley (Sin. and Pal. p. 286) notices the first of these interpretations, and, comparing it with the "Phlegranean fields" in the Campagna at Rome, says that the "name, if not derived from the subsequent catastrophe, shows that the marks of fire had already passed over the doomed valley." There is another "marks of fire" theory that are all over the neighborhood of the Dead Sea. They have been regarded by many travellers as tokens of conflagration and volcanic action, and in the same manner it is quite possible that they originated the name Sedom, for they
unoubtedly abounded on the shores of the lake long before even Sodom was founded.  

II. Historical Notes. — Sodom is commonly mentioned in connection with Gomorrah, but also with Admah and Zeboim, and on one occasion (Gen. xiv.) with Bela or Zoar. Sodom was evidently the chief town in the settlement. Its king takes the lead, and the city is always named first in the list, and appears to be the most important of the five. The first evidence of its destruction is given in the narrative records of Gen. xix. 19 as belonging to the Cannaanites: “The border of the Cannaanites was from Zidon towards Gerar unto Azza, towards Sodom and Amorrhah and Admah and Tzboim unto Lasha.” The meaning of this appears to be that the district in the hands of the Cannaanites formed a kind of triangle—the apex at Zidon, the base at Lasha, in the west extremity at Gâza, the southern-eastern at Aâr. 

The next mention of the name of Sodom (Gen. xiii, 10-13) gives us more definite information as to the city. Abram and Lot are standing together between Bethel and Ai (ver. 3), taking, as any spectator from that spot may still do, a survey of the land around and below them. Eastward of them, and absolutely at their feet, lay the “circle” (“מֹּדִיע”) of Jordan,” i.e. the ghôr. It was in all its verdant glory—that glory of which the traces are still to be seen, and which is so strangely and irresistibly attractive to a spectator from any of the heights in the neighborhood of Bethel—watered in the northern portion by the copious supplies of the Wady Kelt, the Ain Sultan, the Ain Dîk, and the other springs which gush from the foot of the mountains in the southern part by Wady Tutilëh, and the abundant brooks of the Ghôr es-Safi. These abundant waters even now support a mass of verdure before they are lost in the light, loamy soil of the region. But at the time when Abram and Lot beheld them, they were husbanded and directed by irrigation, after the manner of Egypt, until the whole tract of country formed one great extensive garden of Jorovâh” (ver. 10). In the midst of the gardens the four cities of Sodom, Gomorrah, Admah, and Zebœim appear to have been situated. To these cities Lot descended, and retaining his nominal habits among the more civilized manner of the Cannaanitishe settlement, “pitched his tent” by (“אֵצֶל”, not “towards”) the chief of the four. At a later period he seems to have been living within the walls of Sodom. It is necessary to notice how absolutely the cities are identified with the district. That the subsequent account of their destruction (ch. xix.), the topographical terms are employed with all the precision which is characteristic of such early times. “The Cicecor” (“קְכָד”), the “land of the Cicecor,” “Cicecor of Jordan,” recurs again and again both in ch. xiii. and xix., and “the cities of the Cicecor” is the almost technical designation of the towns which were destroyed in the catastrophe related in the latter chapter. See JORDAN. 

The remaining passages of Scripture respecting Sodom relate merely to the event of its destruction (Gen. xix.), and to its perpetual desolation: “Brimstone, and salt, and burning...” not spoken of anywhere (Dufr. xxii. 22); “Never to be inhabited, nor dwelt in from generation to generation; where neither Arab should pitch tent nor shepherd make fold” (Ias. xiii. 19); “No man abiding there, nor son of man dwelling in it” (Jsr. xlix. 18; I. 40); “A fruitful land turned into saltiness” (Psa. cvii. 34); “Overthrown; and the inhabitants thereof; and the cities thereof, and the dwellers thereof” (Amos iv. 11); “Winding up of nettles and salt-pits, and a perpetual desolation” (Zeph. ii. 9); “A waste land that smoketh, and plants bearing fruit which never cometh to ripeness” (Wis. ix. 7); “Land lying in clogs of pitch and heaps of ashes” (2 Esdr. ii. 9); “The cities turned into ashes” (2 Pet. ii. 6), where their destruction by fire is contrasted with the deluge. The miserable fate of Sodom and Gomorrah is held up as a warning in these and other passages of the Old and New Tests. By Peter and Jude it is made “an example to those that after should live ungodly,” and to those “denying the only Lord God, and our Lord Jesus Christ” (2 Pet. ii. 8; Jude 4-7). Our Lord himself, when describing the fearful condition of the inhabitants of that judgment, that the ungodly in Sodom and Gomorrah in the day of judgment for that city” (Mark vi. 11; comp. Matt. x. 15). 

In agreement with the above Scripture accounts is the statement of Josephus (Ant. V, viii, 4), who, according to the life of the city, he proceeds: “Adjoining it is Sodomitis, once a blessed region abounding in produce and in cities, but now entirely burned up. They say that it was destroyed by lightning for the impiety of its inhabitants. And even to this day the relics of the divine fire and the traces of five cities are to be seen there, and, if the ashes remain, thanks to the fruit.” Josephus regarded this passage as his main statement of the event (see Ant. i, 11, 4). In another passage (War, v, 13, 6) he alludes incidentally to the destruction of Sodom, contrasting it, like Peter, with a city destroyed by fire. By comparing these passages with Ant. i, 6, it appears that Josephus believed the tale of Sodom to have been submerged, and to have been a district adjoining Sodom. Similar are the accounts of heathen writers, as Strabo and Tacitus; who, however vague their statements, are evidently under the belief that the remains of the towns were still to be seen. These passages are given at length by De Saulcy (Narr. li. 448). There is a slight variation in the account of the Koran (xi. 84): “We turned those cities upside down, and we rained upon them stones of baked clay.” 

The name of the bishop of Sodom, “Severus Sodomorum,” appears among the Arabic prelates who signed the acts of the first Council of Nicea. Reidel remonstrates against the idea of the Sodom of the Bible being intended, and suggests that it is a mistake for Zuzumano or Zoraima, a see under the metropolitan of Bosra (Pal est, p. 1020). This De Saulcy (Narr. i. 454) refuses to admit. He explains it by the fact that many see still bear the names of places which have vanished, and exist only in name and memory, such as Troy. The Coptic version to which he refers, in the edition of M. Lenormant, does not throw any light on the point.

II. Physical Means of the Catastrophe to the City.—The destruction of Sodom claims attention from the solemnity with which it is introduced (Gen. xviii, 20-22), from the circumstances which preceded and followed, and the internal evidence. Abram, in the event of Lot, and the judgment which overtook his lingering wife (ver. 25-38; xix.) and from the nature of the physical agencies through which the overthrow was effected. Most of these particulars are easily understood; but the last has awakened much discussion, and may therefore require a larger measure of attention. The circumstances are these. In the first place, we learn that the vale of Sodom, in which Sodom lay, was very fertile, and everywhere well watered—“like the garden of the Lord;” and these circumstances induced Lot to fix his abode there, notwithstanding the wickedness of the inhabitants (xviii, 10, 11). Nor is it apparent that the vale was full of springs. This is one of the sources of bitumen, for the word is the same as that which is applied to the cement used by the builders of Babylon, and we know that this was bitumen or asphaltum (xiv, 10; comp. xi, 8). These pits appear to have been of considerable extent; and, indeed, it was from them doubtless that the whole valley derived its name of Sidim (ṣīdîm). At length, when the day of destruction ar- rived, “the Lord rained upon Sodom and upon Gomorrah fire and brimstone from the Lord out of heaven; and he overthrew those cities, and all the plain, and all the inhabitants of those cities, and all the dcultaters upon the ground” (xix, 24, 25). In the escape from this overthrow, the wife of Lot “looked back, and became a pillar of salt” (ver. 26). When Abraham, early that same morning, from the neighborhood of his distant
camp, "looked towards Sodom and Gomorrah, and towards all the land of the plain, and beheld, and, lo, the smoke of the country went up as the smoke of a furnace" (ver. 27). These are the simple facts of the case.

The following are the naturalistic explanations that have been attempted of the phenomena:

1. It has usually been assumed that the vale of Siddim, as the geographical characteristics of the region go, is bottomless. The sea, which did not previously exist, but was one of the results of this catastrophe (see Milman, Hist. of the Jews, i, 15 sq). It has now, however, been established that a lake to receive the Jordan and other waters must have occupied this basin long before the catastrophe of Sodom, as all the geological characteristics of the region go, to show that its present configuration is in its main features coeval with the present condition of the surface of the earth in general, and is not the effect of any local catastrophe at a subsequent period (Dr. Buist, in Trans. of Bombay Geogr. Soc. xii, p. xvi). See Dead Sea.

2. Although a lake must then have existed to receive the Jordan and other waters of the north, which could not have passed more southward, as was at one time supposed, and which must even, as is now proved, have received the waters of the south also, we are at liberty to assume, and it is necessary to do so, that the Dead Sea anciently covered a much greater extent of land than it does now. The cities which were destroyed must have been situated at the edge of the lake as it then existed, for Lot fled to Zoar, which was near Sodom (Gen. xix, 20). This view has the support of several incidental circumstances. Thus the abundant water supply (as above noticed) still exists at both ends of the lake. "Even at the present day," says Robinson, "more living streams flow into the Ghôr, at the southern end of the sea, from the eastern mountains than are to be found so near together in all Palestine; and the tract, although now mostly desert, is still better watered through these streams and by the many fountains than any other district throughout the whole western part of the country" (Bibl. Res. ii, 608). The slime-pits, or wells of asphaltum, are no longer to be seen; but it seems that masses of floating asphaltum occur only in the southern part of the lake; and as they are seen but rarely, and immediately after earthquakes, the asphaltum appears to be gradually consolidated in the lake, and not being able to flow off, forms by consequence a layer at the bottom, portions of which may be detached by earthquakes and other convulsions of nature, and then appear on the surface of the water or upon the shore. The eminent geologist Leopold von Buch, in his last letter (Bibl. Res. iv, 388), thinks it quite probable that this accumulation may have taken place in remote times as well as at the present day. Thus another circumstance of importance is produced in coincidence with the sacred accounts, especially with reference to the southern portion of the present lake, at its southern extremity, is the portion of which did not in ancient times exist—that it, in fact, covers the more fertile vale of Siddim, and the site of Sodom and the other cities which the Lord destroyed; and that, in the words of Dr. Robinson, "by some convulsion or catastrophe of nature connected with the miraculous destruction of the cities, either the surface of this plain was scooped out or the bottom of the sea was heaved up so as to cause the waters to overflow and cover permanently a larger tract than formerly. The country is, as we know, subject to earthquakes, and earthquakes of such magnitude as would have been of uncommon effect of either of these causes to heave up the bottom of the ancient lake, and thus produce the phenomenon in question. But the historical account of the destruction of the cities implies also the agency of fire. Perhaps both causes were therefor in the case of Sodom. When the panic and earthquakes go hand in hand, and the accompanying electric discharges, usually cause lightnings to play and thunders to roll, in this way we have all the phenomena which the most literal interpretation of the sacred records can demand." The same writer, with the geological sanction given above, repeats the conjecture of Le Clerc and others that the bitumen had become accumulated around the springs, and had perhaps formed strata, spreading for some distance upon the plain; that possibly these strata and the lake were formed under the bitumen, and thus approach the vicinity of the cities: "If, indeed, we might suppose all this, then the kindling of such a heap of combustible materials, through volcanic action or lightning from heaven, would cause a conflagration sufficient not only to engulf the cities, but also to destroy the strata of asphaltum, and the whole country would go up as the smoke of a furnace, and the sea rushing in, would convert it to a tract of waters." The supposition of such an accumulation of bitumen, with our present knowledge, appears less extraordinary than it might in former times have seemed, and requires nothing more than nature presents to our view in the wonderful lake, or rather tract, of bitumen in the island of Trinidad. The subsequent barrenness of the remaining portion of the plain is readily accounted for by the presence of the masses of fossil salt which now abound in its neighborhood, and which were perhaps then, for the first time, brought to light. These, being carried by the waters to the bottom of the valley, would suffice to take away its productive power. In connection with this fact, the circumstance that the wife of Lot 'became a pillar of salt' is significant and suggestive, whatever interpretation we may assign to the fact recorded" (see Baier, De Excidio Sodomae [Franc. 1805]).

See Lor.

This view of the catastrophe of the cities of the plain has, however, not passed without the dissent of some writers. It was easy to explode the opinion long current that when the five cities were submerged in the lake their remains—walls, columns, and capitals—might still be discerned by the eye of a spectator, and the list of opened no such relics. Not content with this, Reisch led the way in modern times in attacking the whole theory in question of the meteorological and geological agencies employed in the event (Palest. p. 257), and De Saulcy (Dead Sea, i, 370, Amer. ed.) and Stanley (Sin. and Pol. p. 289) have followed in the same line. Their arguments are the following:

1. Only two words are used in Gen. xix to describe what happened: הֶבַךְ, to throw down, to destroy (ver. 13, 14), and האָפָה, to overturn (ver. 21, 25, 29). In neither of these is the presence of water—the submergence of the cities or of the district in which they stood—either mentioned or implied. This would perhaps be a valid objection if the submergence were regarded as the principal cause of the destruction; but as, under the above statement, it comes in merely as a consequence of that event (see Keil, Comment. ad loc.), the argument hardly applied. Moreover, in the latter of the two terms employed (הֶבַךְ, haphâk, to overturn) there does seem to be a covert allusion to the undermining action of a subterranean force; and perhaps in the former (הָפַךְ, hûchîth, to wipe out) there is implied the erosive violence of a rush of water. Certainly these terms do not forbid such an explanation of the mode of destruction; and in the confessed inability of the opponents of this view to suggest any other natural means, we may well acquiesce in this as the most plausible hypothesis.

2. "The geological portion of the theory does not appear to agree with the facts. The whole of the lower end of the lake, including the plain which borders it on the south, has every appearance not of having been lowered since the formation of the valley, but of undergoing a gradual process of filling up. This region is, in fact, the delta of the very large, though irregular, streams which drain the highlands on its east, west, and
south, and have drained them ever since the valley was a valley. No report by any observer at all competent to read the geological features of the district will be found to give countenance to the notion that any disturbance has taken place within the historical period, or that there is any present general conformation beyond the quiet, gradual change due to the regular operation of the ordinary agents of nature, which is slowly filling up the chasm of the valley and the lake with the washings brought down by the torrents from the highlands on all sides. The volcanic appearances and marks of fire, so often mentioned, are so ephemeral in character as to have any trustworthy means of judging, entirely illusory, and due to ordinary, natural causes." On the contrary, we have adduced above the testimony of travellers and the opinion of competent scientists to sustain the convulsive character of the region in modern times. Until counter-evidence shall have been brought forward of a more decide[d] character than merely round assertions and general inferences, we may rest the case upon these grounds. Prof. Hitchcock shows (Bibliothea Sacra, July, 1867, p. 469 sq.) that the present geological features of the region confirm the Scriptural account of the fate of the cities of the plain, and the volcanic story.

(3.) The plain of the Jordan, in which the cities stood (as has been stated), can hardly have been at the south end of the lake. This position of Sodom favors, indeed, the foregoing theory, by reason of the comparative shallowness of the water in the southern end of the Dead Sea; but it is not essential to the mechanical argument. The volcanic phenomena were as volcanic, or fluvial. As, however, the two questions have been involved in each other, we will proceed to consider,

IV. The Location of the City.—Until a very recent period it has universally been held that the cities of the plain were situated at the southern end of the Dead Sea. Joshua, although he speaks indefinitely about the position of Sodom, expressly fixes Zoar (Am i, 11; War. iv, 8) in Arabia, under which name he was in this case referring to the south-east end of the Salt Sea; and to the same effect is the testimony of Eusebius (Onomast. a. v.) and of Jerome (Ep. viii, 11; Comment. in Eos. xx, 5). This view seems to have been universally held by the medieval historians and pilgrims, and it is adopted by modern topographers, almost without exception. In the words of one of the most able and careful of modern travelers, Dr. Robinson, "the cities which were destroyed must have been situated on the south end of the lake as it then existed" (Bibl. Res. ii, 189). This is the usual and universally held view. In regard to the name Gezer, in the orography of Gomorrah and, in fact, is generally accepted. Besides the above arguments in favor of the submersion beneath the shallow waters of the south end of the sea, a consideration of much force is the existence of similar names in that direction. Thus, the name Adnon, attached to the remarkable ridge of salt which lies at the south-western corner of the lake, is usually regarded as the representative of Sodom (Robinson, Van de Velde, De Saulcy, etc.), notwithstanding a slight difference between the two words. See SOMONITH SEA. The name 'Amrah, which is attached to a valley among the mountain of south of Sodom (Van de Velde, ii, 29, and map), is an almost exact equivalent to the Hebrew of Gomorrah (Amorah). The name Dara, and nearly as strongly that of Yzaph, recall Zorah. The frequent salt pinnacles in the same vicinity are likewise striking momenta of the saline incrustation which overtook Lot's wife, although, from the miraculous character of the latter incident, we are not inclined to press this coincidence. See Lot's Wife.

On the other hand, Mr. Tristram, who has explored the lake neighborhood more carefully than any previous investigator, strenuously contends for the northern location of Sodom with its neighboring cities, chiefly on account of the water, and its connection with the Jordan. When it is said that Lot encamped at (not "towards") Sodom (Gen. xiii, 12; Sept. iv Σαδόμως), the statement is made in such a connection with the "Cecera," or circle, of Jordan as to imply that Sodom was in it. Now this Cecera was in view from a mountain on the east of Bethel (Gen. xii, 8; xiii, 5, 10), whence no portion of the south end of the lake can be discerned; the headland of Feshkah shuts out the view in that direction. There is good reason to believe, however, that the Cecera, or circle, of the Jordan comprehended the whole crevasse on both ends of the Dead Sea (see Jour. Sac. Lit. April, 1866, p. 36 sq.), and in the above passages it is not expressly said that Zoar itself was visible from the citadel of Abraham, even though they have any trustworthy means of judging, entirely illusory, and due to ordinary, natural causes.

(2.) In the account of the invasion of Chedorlaomer (Gen. xiv) he is described as marching from Mount Seir to Hazezon-tamar (Engedi); and it is said that afterwards he met the king of Sodom and his confederates in the vale of Siddim. Now, as Mr. Tristram urges, the name of the Dead Sea is represented under either city. It was the south end of the sea, it was certainly not after omitting the Amalekites and Amorites at Engedi that they would have met the invader, but long before he reached Hazezon-tamar. But when we place these cities in the plain (circle) of the Jordan, there is a topographical sequence in the whole story, while Abraham and his allies hurried eagerly pursued the plunderers up the Ghor without delay or impediment until they overtake them at the sources of the Jordan" (Land of Israel, p. 362). On the contrary, it is impossible to proceed directly from Engedi to the plain of Jericho, owing to the impassable heights of Ain Feshkah, whereas the way is open along the whole shore and the Dead Sea southerly. It was from Kadesh, on the western side of the Arabah, that Chedorlaomer passed northerly through the Negeb, or south of Palestine, and then came down upon the Dead Sea by the pass of Engedi, where he could have encountered the natives only from the southern Ghor.

(3.) The location of Zoar at the north-eastern end of the Salt Sea is inconsistent with the statement that Moses beheld it in his view from Mount Nebo (Deut. xxxiv, 3); for only the western outline of the lake can be seen from the most commanding position among those heights, one of which must be the mount in question. To this argument the same reply may be made as in the case above (Sodom). In regard to the Jordan passage to be seen, but only "the plain," or Ghor. We have had occasion under the article Pisgah to notice the sweeping character of the panorama there disclosed to Moses—one doubtless of miraculous extent: and the discussion of the location of the guilty cities will be resumed under Zoar.

For the present we may say that, although Tristram has reiterated his views on this subject in his Land of Moab (p. 343, Am. ed.), yet it is privately understood that he has since changed his mind, and now adheres to the tradisionary opinion. Dr. Merrill revives the arguments in favor of the northern position of Zoar (Bulletin of the American Geographical Society, condensed in the Quir. Statement of the Palestine Exploration Fund, July, 1879, p. 144). See Sodom.

Sodom, Fruit of. —See Apples of Sodom; Vine of Sodom.

Sodom'ma (Σώδομα), the Greek form (Rom. ix, 29) of the name elsewhere Anglicized Sodom (q.v.).

Sodom'ite (Σώδομιτης, kudeseה, i.e. consecrated; Vulg. secutor, effeminatus). This word does not denote an inhabitant of Sodom (except only in 2 Esdr. vii, 86), nor one of their descendants, but is employed, at least, in the A. V. of the Old Testament, for those who practiced as a religious rite the abominable and unnatural vice from which the
inhabitants of Sodom and Gomorrah have derived their lasting infamy. It occurs in Deut. xxiii, 17; 1 Kings xiv, 24; xv, 12; xxii, 46; 2 Kings xxiii, 7; and Job xxxvi, 14 (margin). The Hebrew word קְדָשׁ is said to be derived from a root קָדָשׁ, which (strange as it may appear) means "pure," and hence "holy." The words sanctus in Latin, and "devoted" in our own language, have also a double meaning, though the subordinate significance is not so absolutely contrary to the principal one as it is in the case of קְדָשׁ. "This dreadful 'consecration,' or rather dedication, was spread in different forms over Phoenicia, Syria, Phrygia, Assyria, Babylonia. Asherah, the Greek Astarte, was its chief object." It appears also to have been established at Rome, where its victims were called Galli (not from Gallia, but from the river Gallus in Bithynia). There is an instructive note on the subject in Jerome's Comment, on Hos. iv, 14. See SODOM.

The translation of the Sept. has, with that anxiety to soften and conceal obnoxious expressions which has often been noticed as a characteristic of their version, have, in all cases but one, avoided rendering קדוש by its ostensible meaning. In the first of the passages cited above they give a double translation, ἱεροπροσκύνησις and τελεούσιον (initiated). In the second, σύνεδριον (a conspiracy, perhaps reading συνεδρίαν); in the third, τὰς θανατικὰς θεσσαλίους; in the fourth the Vat. MS. omits it, and the Alex. has ταῖς ἐνεχθείσαις; in the fifth, τῶν Κανρίπιον; and in the sixth, τοὺς ἄρηνδους. The latter is a feminine equivalent to קְדָשׁ, viz. קְדָשָׁהוֹת. This is found in Gen. xxxviii, 21, 22; Deut. xxiii, 17; and Hos. iv, 14. In each of these cases it throws a new light on the passage to remember that these women were (if the expression may be allowed) the priestesses of a religion, not plying for hire, or merely instruments for gratifying passing lust. Such ordinary prostitutes are called by the name ζωκόν. In 1 Kings xxii, 38 the word ζωκόν is rendered "armor." It should be "harlots"—and the harlots washed themselves there (early in the morning, as was their custom, adds Procopius of Gaza). The Septa has rendered this correctly. The "strange women" of Prov. ii, 10, etc., were foreigners, saroth. See HARLOT.

Sodom'ish Sea (Mare Sodomiticum), a name once given in the Apocrypha (2 Esdr. v, 3) to the Dead Sea (q. v.), evidently from its supposed connection with the overthrow of Sodom. A striking illustration of this coincidence in name (which in some form has been since that time) is found in the names of one or two natural features of that region. See Sodom.

(1.) At the south-west corner of the lake, below where the wadys Ziweirah and Mahawat break down through the enclosing heights, the beach is encroached on by the salt mountain or ridge of Khahin Usted. This remarkable object is lightheter but imperfectly known. It is said to be quite independent of the western mountains, lying in front of and separated from them by a considerable tract filled up with conical hills and short ridges of the soft, chalky, marly deposit just described. It is a level ridge or dike several miles long. Its northern portion runs south-southeast; but after more than half its length it makes a sudden and decided bend to the right, and then runs south-west. It is from three to four hundred feet in height, of incomparable width. There is great uncertainty about its length. Dr. Robinson states it at five miles and "a considerable distance farther" (ii, 107, 112). Van de Velde makes it two miles (ii, 113), or three and a half hours (p. 116). But when these dimensions are applied to the map they are much too large, and it is difficult to believe that it can be more than five miles in all. Dr. Anderson (p. 181) says it is about two and a half miles wide; but this appears to contradict Dr. Robinson's expressions (ii, 107). The latter are corroborated by Mr. Clowes's party. They also noticed salt in large quantities among the rocks in regular strata some considerable distance back from the lake. The mountain consists of a body of crystallized rock-salt, more or less solid, covered with a capping of chalky limestone and gypsum. The lower portion—the salt rock—rises abruptly from the glossy plain at its eastern base, sloping back at an angle of not more than 45°. It has a strangely dislocated, shattered look, and is all furrowed and worn into huge angular buttresses and ridges, from the face of which great fragments are occasionally detached by the action of the rains, and appear as "pillars of salt," advanced in front of the general mass. At the foot the ground is strewed with lumps and masses of salt, salt streams drain continually from it into the lake, and the whole of the beach is covered with salt—soft and sloppy, and of a pinkish hue in winter and spring, though during the heat of summer dried up into a shining, brilliant crust. An occasional patch of the Kali plant (Stellicerite, etc.) is the only vegetation to vary the monotony of this most monotonous spot. It is probable that from this mountain rather than from the lake itself was procured the so-called "salt of the Dead Sea," which was much in request for use in the Temple service. It was preferred before all other kinds for its reputed effect in hastening the combustion of the sacrifice, while it diminished the unpleasant smell of the burning flesh. Its deliquescent character (due to the chlorides of alkaline earths it contains) is also noticed in the Talmud (Menachoth, xxi, 1; Jalkut). It was called "Sodom salt," but also went by the name of the "salt that does not rest" (ירדנה מצה, because it was made on the Sabbath as on other days, like the "Sunday salt" of the English salt-works. It is still much esteemed in Jerusalem. See SALT SEA.)
(2) Between the north end of Khasm Umdu and the lake is a mound covered with stones and bearing the name of un-Zogli (Robinson, ii, 107). By the Saucy the name is given Redjul el-Merzourah (the ch and r in both attempts to represent the ghain). The "Pilgrim" in "Aenomenum, April 2, 1854, expressly states that his guide called it Rudjrin ez-Zoglier. It is about sixty feet in diameter and ten or twelve feet high, evidently artificial, and not improbably the remains of an ancient structure. A copy of it, engraved from a photograph by Mr. James Graham, is given in Isaac's "Desert Sea" (p. 21). This heap De Saucy maintained to be a portion of the remains of Sidom. Its name is more suggestive of Zor, but there are great obstacles to either identification. See Zor.

**Sodom**, an unnatural crime, consisting of the defilement of man with man, and thus differing from bestiality, which is the defilement of man with brutes. The name is derived from Sidom, in which city the crime was frequent. Sodom was strictly forbidden in the Mosaic law, and was punishable with death (Lev. xx, 13). Among the pagan nations of antiquity, as still in many heathen countries, this was a very common vice (Rom. i, 27); the Greeks and Romans designated it by the term pedersenity (see Wilcke, De Satyrifici Romanae [Viteb. 1760]). In the early Church this was considered, not an ordinary, but a monster crime. The Council of Ancyra has two canons relating to this and similar crimes, imposing heavy ecclesiastical penalties upon their offenders. St. Basil (Can. 62, 63) imposes the penalty of adultery, viz. twenty years' penance; and the Council of Elipertus refused communion, even at the last hour, to those guilty of this crime with boys. There was an old Roman law against it, called the Lex Secundina, mentioned by Juvenal (Sat. ii, 44) and others; but it lay dormant until revived by Christian emperors. They constituted it a capital offense, and ordered it to be punished with death by the sword; while Theodosius decreed that those found guilty should be burned alive. According to modern legislation, it is considered a very heinous crime, and severely punished. See Bingham, Christ. Antiq. bk. xvi, ch. xi, p. 9.

**Sodor and Man**; Diocese of. The Norwegians and Danes, who in ancient times occupied the Orkneys and other islands on the coast of Scotland, divided these islands into two groups: to the former they gave the name of Nordreier, or Northern Isles; and to the latter, which included the western islands, that of Surdeier, or Southern Isles. By Sodor, therefore, is meant the island of St. Kilda, which may be considered the most contiguous to the Isle of Man, which, with them, formed a diocese.

**Soffit** (erroneously Sophret), a ceiling. The word is seldom used except in reference to the subordinate parts and members of buildings, such as staircases, entablatures, arcades, cornices, etc., the under-sides of which are called the soffit.

**Sogdi?e** (Swarga, Sindas Suy?wian, the name of two towns in Persia.

1. A city of Galilee (Josephus, Life, p. 51; War, ii, 20, 6), situated twenty stadia from Araba, and the same distance from Gabara (Reland, Palæst., p. 1921): now Sukhmir, a village in the centre of Galilee, first visited by G. Schumacher, and identified by Gossen (Ritter, Erdk. xvi, 768; see also Robinson, Later Res. pp. 81, 82). There are at Sukhmir graves of some famous Jewish rabbins (Schwarz, Palæst. p. 188).

2. A city of Gaulonitis (Josephus, War, iv, 1, 1; Re-
III. Held Aug. 18, 866, by order of Charles. Thirty-five bishops attended. The clerks ordained by Ebbo, and who had been deposed in the Council of 853, were, by indulgence, re-established. Vulgde, one of the number, was in this same year consecrated archbishop of Bourges. See Hincmar, Opusc. vol. xviii.; Mansi, viii.

IV. Held in 1092 or 1098 by Raymondus, archbishop of Rheims, against Roscellin the Trithète. Fulco, bishop of Beauvais, attended in behalf of Anselm, abbot of Bec (afterwards archbishop of Canterbury), whom Roscellin, both in private and in his writings, had falsely charged with holding the same opinions as himself, viz. that the Holy Spirit and the Holy Soul are three distinct beings, existing separately, and that it might be said that there were three Gods, not the expression harsh, and contrary to the phraseology in use. Being questioned before the assembly, Roscellin explained his views, and abjured the heresy imputed to him; but no sooner was the council disbanded than he recanted, declaring that he had made his abjuration before the synod merely through fear of being assassinated by the ignorant populace unless he did so. Upon this Anselm wrote his tract De Incorruptionibus, which he dedicated to Urban II. Subsequently Roscellin, finding himself regarded by all Catholics as a heretic and avoided, betook himself to Ivo, bishop of Chartres, imploping his assistance, and abjuring again all his errors. At last he died in retreat in Aquitaine. See Pagi, in Baronius, A.D. 1094; Mansi, x, 494.

V. Held in 1115 by Conon, bishop of Prænesta. From this council deputees were sent to the Carthusians, entertaining and commanding them to send back into his diocese Godfrey, bishop of Amiens, who had retired among them. This command was executed in the beginning of Lent. Another council was held in the same year at Rheims upon the same subject by the legate Geminus. See Mansi, x, 801.

VI. Held in February, 1121, by Conon, bishop of Prænesta and legate. In this council Abelard was compelled to burn his book upon the subject of the Blessed Trinity, and was desired to make a confession of faith; he accordingly, with many tears and much difficulty, read the Creed of St. Athanasius. He was then sent to the monastery of St. Medard at Soissons, and subsequently to that of St. Denys. See Mansi, x, 865.

VII. Held July 11, 1146, by John, archbishop of Rheims, who presided. The execution of the decrees of Basle was ordered, and the acts of the Assembly were confirmed. Other canonical enactments, which relate, among other things, to the dress of bishops, the approval of confessors, the preaching of indulgences, etc. See Mansi, xiii, 1896.

Sojourn (סֹּאְר, a residence; Exod. xii, 40; elsewhere "dwelling," "habitation," etc.; παρακίνη, 1 Pet. i, 17; so the verb and noun, παρακίνη and παρακίνον), the 400 years of the sojourn of the children of Israel in Egypt, according to the 12th century reckoning thus: From the call of Abraham (Acts vii, 12), till the re-visualization of Haran (Gen. xi, 6), about 539; in Canaan before the birth of Isaac (Gen. xxii, 5), 29; till the birth of Jacob (Gen. xxv, 26), 89; till the migration into Egypt (Gen. xvi, 9), 390; the time passed in Egypt, only 90. The whole period of sojourn (Exod. xii, 40), 430 Deduct 5 years in Haran — till Isaac's birth, 90; so the sojourn of the "seed" (Gen. xv, 18; Acts vii, 6) 400. See CHRONOLOGY.

Soli, in Roman mythology, is the Latin name for • Helios, the sun.

Sola (alone), a term used in old English registers to designate a spinster or unmarried woman.

Soler, Soller (Lat. solarium), a loft, garret, or upper chamber. In a medieval house it was usually situated behind the dais, separated from it by the end of the hall, and had a cellar under it; these two stories together were not so high as the hall, leaving the gable of the loft roof with the window in it free above them. This was the lord's chamber, and there generally was a small opening from the solar into the hall, from which the lord could overlook the proceeding, and hear all that passed in the hall. The solar is also called a loft (q.v.) of a church. In Norfolk, Forby observes that the belfry-loft is termed the soler, or the bell-soller.

Solares, or Chamai, a small sect inhabiting a certain district of Mesopotamia, and supposed by some to be descendants of the Samarians mentioned by Ephesians. Hyde (History of the Ancient Religion of the Persians) describes them as among the most religious of all peoples, having more than a thousand souls; having no priests nor doctors, and no places of meeting except caves, where they perform their religious worship, the mysteries of which are kept so secret that they have not been discovered even by those who have been converted to the Christian religion. Being compelled by the Mohammedans to declare themselves members of some Christian communion, they chose the Jacobite sect, baptizing their children and burying their dead according to the custom of these Christians. They are considered by some to be the same as the Eleazartes (q.v.). See Gardiner, Paths of the World, s. v.; Mosheim, Eccles. Hist. i, 124.

Solari, Andrea, surname del Gobbo, an Italian painter, flourished in the former half of the 16th century. He was a good colorist, and evidently belonged to the school of Da Vinci. He painted the members of the Holy Family for various museums, and took part in the decoration of the castle of Gaillon.

Solari, Cristofero, surname del Gobbo, an Italian sculptor and architect, brother of the preceding; flourished in the latter part of the 16th century. He was one of the most illustrious artists that worked at Chartres and Pavia, and on the cathedral of Milan. It is difficult to distinguish his pieces, except some sacred figures in Milan.

Soldier (soldier, from sold, to stick), welding of metal (Isa. xi, 7). The same Heb. word likewise denotes a "joint" of a coat of mail (1 Kings xxxiii, 24; 2 Chron. xviii, 33).

Soldier (in Heb. only collect. for נָשִׁי, an army; or by periphrase; στρατιωτής). See Army.

SOLIDER OF CHRIST, an expression borrowed from a well-known Scripture simile, and frequently introduced or alluded to in the Prayer-book (see Offices for Bishops). One of the writers of the Church of England the word "knights" was used in the same sense; "The fourth gift of the Holy Spirit is
the gift of strength which arment God's knight, and
maketh his soul hardy and strong to suffer divers dis-
cases to God's love." (Wycliffe).

Soldins, a Christian sect, so called from their lead-
er, one Soldan, a Greek priest. They appeared about
the middle of the 5th century in the kingdoms of
Saba and Godolia. They altered the manner of
the sacrifice of the mass; their priests offered gold, their
deacons incense, and their subdeacons myrrh; and
this in memory of the like offerings made to the
infant Jesus by the wise men. Very few authors men-
tion the Soldins, neither do we know whether they still
subsist.

Sole (ταξις, prop. the palm of the hand). See Foot.

Soluta (σολο, solia), a part of the church respect-
ing which ecclesiastical writers are not agreed. Latin
writers use the word solae. It is supposed to denote
certain seats at the entrance of the chancel appropri-
ated to the use of emperors, kings, magistrates, or other
persons of distinction. The seats of the inferior clergy
and monks are sometimes designated by the same name.
According to Walcott (Sacred Archbald, s. v.) it was the
space in a Greek church between the ambon and
sanctuary; in a Latin church between the choir and
presbytery. In the basilica it was raised several steps
above the ambon and the choir of minor clerks. Here
the communion was given to all but the clergy, and
subdeacons; and clerks sat, and therefor the
priesthood was led from this part to the altar.

Solemn League and Covenant. See COVE-
NANT (SOLEMN LEAGUE AND).

Solemn Service, a modern Anglican term used
to signify a choral celebration of the holy eucharist with
priest, deacon, and subdeacon, or with music. It is
equivalent to the "high mass" or "solemn mass" of
the Roman Catholics, and if used of evening service is the
same as "solemn vespers."

Solemnities, This, was an ancient term to design-
ate the holy eucharist.

Solicitant, one who, abusing the privacy of the
confessional, tempts women to a violation of chastity.
This kind of solicitation became so common in Spain
that pope Paul IV promulgated a bull against solici-
tors. Nor was this custom confined to Spain; it was
rife in Portugal, England, France, and Germany. A
German council held A.D. 1225 charged the priests with
unchastity, voluptuousness, and obscenity. Gregory
III in his bull of 1225 mentions this practice in 1625,
-bearing the title Universi Dominii, which was con-
firmatory Benedict XIV, June 17, 1741. Another bull
was also issued by the same pontiff in 1745.

Solidianism, the doctrine that faith is the whole
of religion, such doctrine being preceded by an errone-
ous description of faith. There are two forms of Sol-
idianism—one resting the whole of religion in the re-
ception of the intellect of the doctrine, the other in
an inner sense or persuasion of the man that God's
promises belong to him. Those who hold the latter
view are called also Fidecircuit. It is easily seen that
Solidianism, in both its forms, destroys the nature of
faith. The former refers faith to the intellect alone,
with a suppression or entire exclusion of the grace of
God and the renewed will, and tends to the superseding
of good works; the latter suppresses the action of the
reason and understanding, and substitutes for a reason-
able faith an unreasoning and groundless persuasion.

The former error may take the shape of a mainte-
nance of orthodoxy, which, however, will be found to be
an extremely deficient representation of Christian do-
trine, omitting those doctrines which have most power
to move the will, and striving to bring others within the
comprehension of man's understanding. The more
common form is that of advancing the doctrine of justi-
fication by faith into the substance of the Gospel. Such

Solidians teach that good works are not necessary to
justification.

The second form of Solidianism generally connects
itself with a one-sided or perverted view of the doctrine
of election. It advances the error that Christ died only
for the elect, and that the elect cannot fall from grace,
and it rests on an inward sense or persuasion of one's
own election. It speaks of faith, but makes false the
same as faith, and the latter it makes to be, not the
witness of the Spirit with our spirits, i.e. with an en-
lightened conscience and understanding, but a mere in-
ner sense or persuasion, held without appeal to the con-
science. Both forms of Solidianism lead to Antino-
ianism.

Solidians, those who maintain the principles of
Solidianism (q. v.).

Solimo, Francesco, an Italian painter, was born
Oct. 4, 1657, near Naples, and studied first under
his father, Angelo, but was afterwards sent by cardinal
Orsini to Naples, where he studied under various emi-
nent painters. He became in some sort a universal art-
ist, but executed several sacred designs, which are found
Générale, 1844.

Sola, Antonio de, a Spanish ecclesiastical and poet,
was born at Placentia, in Old Castle, July 18, 1610, and
was sent to Salamanca to study law. His preference,
however, was for poetry, which he cultivated with great
success, so that he was considered by Cornejo to have
been the best comic poet that Spain ever saw. He
became secretary to the count de Oropses, and in 1642
Philip IV made him one of his secretaries. After Phil-
ip's death the queen-regent made him first historiog-
rapher of the Indies, a place of great profit as well as
honor. Eventually Sola resolved to dedicate himself
to the service of the Church, and was ordained a priest
at the age of fifty-seven. He now wrote nothing but some
discourses upon subjects of devotion, which are
represented in Spain on certain festivals. He died
April 19, 1686. His Comedies were printed at Madrid
(1681, 4to):—his sacred and profane poemes at the same
place (1716, 4to):—his History of Mexico often, but par-
icularly at Brussels (1704, fol.). There is also a collec-

Solitaires, nouns of the Order of St. Peter of
Alcantara, instituted by cardinal Barberini in 1670.
They imitate the ascetical practices of their patron
saint, observe perpetual silence, and employ their
time wholly in spiritual exercises. They go bare-
foot, gird themselves with a linen cord, and wear no
linen.

Solitaries, a term which designates such as addict
themselves to a retired or solitary life. It was origi-
nally applied not only to such as retired to absolute soli-
city in caves and deserts, but also to such as lived apart
from the world in separate societies.

Solitarii, a branch of the MANICHAEANS (q. v.).

While the Thedosian Code decreed capital punish-
ment upon some of the other branches of this obnox-
ious sect, the Solitarii were only punished with con-
fusion.

Solomon (Heb. Sholomon, פלוס, peaceful; Sept.
Solomow; New Test. and Josephus, Solomon; Vulg.
Solomo), the son of David by Bathsheba, and his
successor upon the throne. B.C. 1013—973. The
importance of his character and reign justify a full
ready treatment here, in which we present a digest of
the Scriptural information with modern criticism. See
DAVID.

I. Sources.—1. The comparative scantiness of his-
storical data for a life of Solomon is itself significant.
While that of David occupies 1 Sam. xvi—xxii, 2 Sam.
xxiv, 1 Kings 1, ii, 1 Chron. x—xxi, that of Solomon
fills only the eleven chapters 1 Kings i—xi and the nine
SOLOMON 862

II. Early Life.—1. The student of the life of Solomon must turn to his starting-point the circumstances of his birth. He was the child of David’s old age—the last-born of all his sons (1 Chron. iii. 5). B.C. 1034. The narrative of 2 Sam. xii leaves, it is true, a different impression. On the other hand, the order of the names in 1 Chron. iii. 5 is otherwise unaccountable. Josephus distinctly states it (Ant. vii. 14, 2). His mother had gained over the king’s heart by her prayer a feeling of a passionate though guilty love; and, next, as the one person to whom, in his repentance, he could make something like restitution. The months that preceded his birth were for the conscience-stricken king a time of self-abasement. The birth itself of the child who was to replace him was looked for as a pledge of pardon and a sign of hope. The feelings of the king and of his prophet-guide expressed themselves in the names with which they welcomed it. The yearnings of the “man of war,” who “had shed much blood,” for a time of peace—yearnings which had shown themselves before—now led him to give to the new-born infant the name of Solomon (Shelomoh, the peaceful one). Nathan, with a marked reference to the meaning of the king’s own name (designating the beloved one), takes another form of address, the growing custom of the time, with the name of Jehovah. David had been the darling of his people. Jedit-jaab (the name was coined for the purpose) should be the darling of the Lord (2 Sam. xii, 24, 25; see Ewald, Gesch. Isr. iii, 215). See JEDIDIAH. According to the received interpretation of Prov. xxxi. 1, his mother also contributed an ideal name, Lemuel (‘unto God, Decoda- tus’), the dedicated one (comp. Ewald, Poet. Buc. iv, 175). On this hypothesis the reproach was drawn forth by the king’s intemperance and sensuality. In contrast to what his wives were, she draws the picture of what a pattern wife ought to be (Pineda, De Eeb. Sol. i, 4).

2. The influences to which the childhood of Solomon was thus exposed must have contributed largely to determine the character of his after-years. The inquiry what was the education which ended in such wonderful contrasts—a wisdom then, and perhaps since, unparalleled, a sensuality like that of Louis XV.—cannot but be instructive. The three influences which must have entered most largely into that education were those of his father, his mother, and the teacher under whose charge he was placed from his earliest infancy (2 Sam. xii, 25).

(1.) The fact just stated that a prophet-priest was made the special instructor indicates the king’s earnest wish that his son should be trained under the influence of the evils which, then and afterwards, showed themselves in his elder sons, and be worthy of the name he bore. At first, apparently, there was no distinct purpose to make him his heir. Abasolom is still the king’s favorite son (2 Sam. xiii, 87; xviii, 39)—is looked on by the people as the destined successor (2 Sam. xv, 1-6). The death of Abasolom, when Solomon was about ten years old, left the place vacant, and David, passing over the claims of all his elder sons, those by Bathsheba included, guided by the influence of Nathan, or by his own discernment of the gifts and graces which were tokens of the love of Jehovah, pledged his word in secret to Bathsheba that he, and no other, should be the heir (1 Kings i, 13). The words which were spoken somewhat later express, doubtless, the purpose which guided him throughout (1 Chron. xxvii, 9, 20). The son’s life should not be as his own had been, one of hardships and cares, dark crimes and passionate repentence, but, from first to last, to be pure, fulfilling the ideal of glory and of righteousness, after which he himself had vainly striven. The glorious visions of Ps. lxxii may be looked on as the prophetic expansion of those hopes of his old age. So far, all was well. But we may not ignore the fact that the later years of David’s life presented a change for the worse
as well as for the better. His sins, though forgiven, left behind it the Nemesis of an enfeebled will and a less generous activity. The liturgical element of religion begins to break up the Psalms, particularly the Psalms of the King, and to turn the spirit of the whole School of Ahab.

He lives to amass treasures and materials for the Temple which he may not build (xxii, 5, 14). He plans with his own hands all the details of its architecture (xxviii, 19). He organizes on a scale of elaborate magnificence all the attendance of the priesthood and the choral services of the Levites (xxvi, xxv). But, meanwhile, his duties as a king are neglected. He no longer sits in the gate to do judgment (2 Sam. xv, 2, 4). He leaves the sin of Amnon unpunished "because he loved him, for he was his first-born" (Sept. at 2 Sam. xxi, 21). The hearts of the people fall away from him. First Absalom, and then Sheba, the Romys of the Israel (2 Sam. xv, 6; xx, 2). The history of the numbering of the people (xxiv; 1 Chron. xxii) implies the purpose of some act of despotism—a poll-tax or a conscription (2 Sam. xxiv, 9 makes the latter the more probable)—such as startled all his older and more experienced counselors. If in the last words of David" belonging to this period there is the old devotion, the old hungering after righteousness (xxiii, 2-5), there is also—first generally (ver. 6, 7), and afterwards resting on individual offenders (1 Kings ii, 5-8)—a more passionate desire to punish those who had wronged him, a painful recurrence of vindictive thoughts for offences which he had once freely forgiven. The name of Absalom, as a sign of Absalom, cannot rest in the belief that his influence over his son's character was one exclusively for good.

(2) In Eastern countries, and under a system of polygamy, the son is more dependent, even than elsewhere, on the character of the mother. The history of the Jewish monarchy furnishes many instances of that dependence. It recognises it in the care with which it records the name of each monarch's mother. Nothing that we know of Bathsheba leads us to think of her as likely to mould her son's mind and heart to the higher forms of goodness. She offers no resistance to the king's passion (Ewald, Gesch. Isr. iii, 211). She makes it a stepping-stone to power. She is a ready accomplice in the scheme by which her shame was to have been concealed. Doubtless she, too, was sorrowful and penitent when the rebuke of Nathan was followed by her child's death (2 Sam. xii, 24); but the after-history shows that the grand-daughter of Ahithophel had inherited not a little of his spirit. She is left doing an evil thing, but not come devout, but had not ceased to be ambitious, could hardly be more, at the best, than the Madame de MAIecoven of a king whose ambition and piety were rendering him, unlike his former self, unduly passive in the hands of others. See BATHSHEBA.

(3) What was least fitting to be the influence of the prophet to whose care the education of Solomon was confided? (Heb. of 2 Sam. xii, 25). We know, beyond all doubt, that he could speak bold and faithful words when they were needed (2 Sam. vii, 1-17; xii, 1-14). But this power, belonging to moments or messages of special inspiration, does not involve the permanent possession of an office, having a voice so highly, and we in vain search the later years of David's reign for any proof of Nathan's activity for good. He gives himself to the work of writing the annals of David's reign (1 Chron. xxix, 29). He places his own sons in the way of being the companions and counsellors of the future king, and that it wished itself in the presence of the Dead man's own heart, to the end of turning to its better impulses (2 Sam. xxiv, 10), and to an older and less courtly prophet, to protest against an act which began in pride and tended to oppression. Joshua, with his usual inaccuracy, substitutes Nathan for God in his narrative (2 Sam. vii, 13, 2).

3. Under these influences the boy grew up. At the age of ten years he was made a prince, and sent through the second revolt of Absalom and shared his father's exiles (2 Sam. xv, 16). He would be taught all that priests or Levites or prophets had to teach; music and song; the book of the law of the Lord in such portions and in such forms as were then current; the "proverbs of the ancients," which his father had been wont to quote (1 Sam. xxiv, 10); probably also a literature which has survived only in fragments; the book of Jasher, the upright ones, the heroes of the people; the book of the wars of the Lord; the wisdom, oral or written, of the sages of his own tribe, Heman, and Ethan, and Calcol, and Darda (1 Chron. ii, 6), who contributed so largely to the noble hymns of a later age. The Psalms of David were most likely be incorporated into the choir of the tabernacle (Ewald, Gesch. Isr. iii, 355). The growing intercourse of Israel with the Phenicians would naturally lead to a wider knowledge of the outlying world and its wonders than had fallen to his father's lot. Admiable, however, as all this was, a shepherd-life, like his father's, furnished, we may believe, a better education for the king's calling (Psa. lxxviii, 70, 71). Born to the purple, there was the inevitable risk of a selfish luxury. Cradled in liturgies, trained to think chiefly of the magnificent "palace" of Jehovah (1 Chron. xxix, 19) of which he was to be the builder, there was the danger first of an aesthetic form and last of the kings. This cannot rest in the belief that his influence over his son's character was one exclusively for good.

III. Accession.—1. The feebleness of David's old age led to an attempt which might have deprived Solomon of the throne his father destined for him. Adonijah, next in order of birth to Absalom, like Absalom, "was a goodly man" (1 Kings i, 6), in full maturity of years, backed by the eldest of the king's friends and counselors, Joab and Abiathar, and by all the sons of David, who looked with jealousy—the latter on the obvious though not yet acknowledged presence of the latest-born, and the former on the growing influence of the rival counselors who were most in the king's favor, Nathan, Zadok, and Benaiah. Following in the steps of Absalom, he assumed the kingly state of a chariot and a body-guard; and David, more passive than ever, looked on in silence. At last a time was chosen for openly proclaiming him as king. A solemn feast at En-roget was to inaugurate the new reign. All were invited to it but those whom it was intended to displace. It was not necessary, they were told, to make anything to come, but had not ceased to be ambitious, could hardly be more, at the best, than the Madame de MAIecoven of a king whose ambition and piety were rendering him, unlike his former self, unduly passive in the hands of others. See BATHSHEBA.

(4) What was least fitting to be the influence of the prophet, to whose care the education of Solomon was confided? (Heb. of 2 Sam. xii, 25). We know, beyond all doubt, that he could speak bold and faithful words when they were needed (2 Sam. vii, 1-17; xii, 1-14). But this power, belonging to moments or messages of special inspiration, did not involve the permanent possession of an office, having a voice so highly, and we in vain search the later years of David's reign for any proof of Nathan's activity for good. He gives himself to the work of writing the annals of David's reign (1 Chron. xxix, 29). He places his own sons in the way of being the companions and counsellors of the future king, and that it wished itself in the presence of the Dead man's own heart, to the end of turning to its better impulses (2 Sam. xxiv, 10), and to an older and less courtly prophet, to protest against an act which began in pride and tended to oppression. Joshua, with his usual inaccuracy, substitutes Nathan for God in his narrative (2 Sam. vii, 13, 2).

3. Under these influences the boy grew up. At the age of ten years he was made a prince, and sent through the second revolt of Absalom and shared his father's exiles (2 Sam. xv, 16). He would be taught all that priests or Levites or prophets had to teach; music and song; the book of the law of the Lord in such portions and in such forms as were then current; the "proverbs of the ancients," which his father had been wont to quote (1 Sam. xxiv, 10); probably also a literature which has survived only in fragments; the book of Jasher, the upright ones, the heroes of the people; the book of the wars of the Lord; the wisdom, oral or written, of the sages of his own tribe, Heman, and Ethan, and Calcol, and Darda (1 Chron. ii, 6), who contributed so largely to the noble hymns of a later age. The Psalms of David were most likely be incorporated into the choir of the tabernacle (Ewald, Gesch. Isr. iii, 355). The growing intercourse of Israel with the Phenicians would naturally lead to a wider knowledge of the outlying world and its wonders than had fallen to his father's lot. Admiable, however, as all this was, a shepherd-life, like his father's, furnished, we may believe, a better education for the king's calling (Psa. lxxviii, 70, 71). Born to the purple, there was the inevitable risk of a selfish luxury. Cradled in liturgies, trained to think chiefly of the magnificent "palace" of Jehovah (1 Chron. xxix, 19) of which he was to be the builder, there was the danger first of an aesthetic form and last of the kings. This cannot rest in the belief that his influence over his son's character was one exclusively for good.

(2) In Eastern countries, and under a system of polygamy, the son is more dependent, even than elsewhere, on the character of the mother. The history of the Jewish monarchy furnishes many instances of that dependence. It recognises it in the care with which it records the name of each monarch's mother. Nothing that we know of Bathsheba leads us to think of her as likely to mould her son's mind and heart to the higher forms of goodness. She offers no resistance to the king's passion (Ewald, Gesch. Isr. iii, 211). She makes it a stepping-stone to power. She is a ready accomplice in the scheme by which her shame was to have been concealed. Doubtless she, too, was sorrowful and penitent when the rebuke of Nathan was followed by her child's death (2 Sam. xii, 24); but the after-history shows that the grand-daughter of Ahithophel had inherited not a little of his spirit. She is left doing an evil thing, but not come devout, but had not ceased to be ambitious, could hardly be more, at the best, than the Madame de MAIecoven of a king whose ambition and piety were rendering him, unlike his former self, unduly passive in the hands of others. See BATHSHEBA.
a massacre of the defeated party. Adonijah expected such an issue, and took refuge at the horns of the altar. In this instance, however, the young conqueror used his triumph generously. The lives both of Adonijah and his partisans were spared, at least what had remained of them was done afterwards in more solemn form. Solomon was presented to a great gathering of all the notables of Israel with a set speech, in which the old king announced what was, to his mind, the programme of the new reign, a time of peace and plenty, of a stately worship, of devotion to Jehovah. A few months more and Solomon found himself, by his father’s death, the sole occupant of the throne.

2. The position to which he succeeded was unique. Never before, and never after, did the kingdom of Israel take its place among the great monarchies of the East, able to ally itself or to contend on equal terms with Egypt or Assyria, stretching from the river Euphrates to the Gulf of Akaba, receiving annual tributes from many subject princes (see Hase, Regni Salom. Descriptio [Nürnberg, 1759]). Large treasures accumulated through many years were at his disposal. The sums mentioned are (1) the public funds for building the Temple, 10,000 talents (kikarim) of gold and 1,000,000 of silver; (2) David’s private offerings, 3000 talents of gold and 7000 of silver. Besides these, large sums of unknown amount were believed to have been stored up in the sephurah of David. 3000 talents were taken from it by Hyrcanus, B.C. 155; (3) “charity” money, 700 shekels; the people, with the exception of the tolerated worship in high places, were true servants of Jehovah. Knowledge, art, music, poetry, had received a new impulse, and were moving on with rapid steps to such perfection as the age and the race were capable of attaining. We may rightly ask what manner of man he was, outwardly and inwardly. Jerusalem, the seat of power, was called to this glorious sovereignty? We have, it is true, no direct description in this case as we have of the earlier kings. There are, however, materials for filling up the gap. The wonderful impression which Solomon made upon all who came near him may well lead us to believe that with him, as with Saul and David, Absalom and Adonijah, as with most other favorite princes of Eastern peoples, there must have been the fascination and the grace of a noble presence. Whatever higher mystic meaning may be latent in Ps. xlv, or the Song of Songs, we are compelled to think of them as having had, at least in their inner being, the starting point of one who was, in the eyes of the men of his own time, “fairer than the children of men,” the face “bright and ruddy” as his father’s (Cant. v, 10; 1 Sam. xxvii, 42), bushy locks, dark as the raven’s wing, yet not without a golden gloss (possibly sprinkled with gold-dust, as was the hair of the youths who waited on him [Josephus, Ant. vii, 3, 3] or dyed with henna [Michaelis, note in Lowth, Perv. xxxxi]), the eye soft as “the eyes of doves,” the “countenance as Lebanon, excellent as the cedars,” “the chiefest among ten thousand, the altogether lovely” (Cant. v, 9-16). Add to this all gifts of the spirit, not intellect, but sympathy, pathos, a playful and genial humor, the lips “full of grace,” the soul “animated” as “with the oil of gladness” (Ps. xlv), and we may form some notion of what the king was like in that dawn of his golden prime.

3. The historical starting-point of the Song of Songs just spoken of connects itself, with all probability, with the earliest facts in the history of the regnal reign. The narrative, as told in 1 Kings ii, is not a little perplexing. Bathsheba, who had before stirred up David against Adonijah, now appears as interceding for him, begging that Abishag the Shunammite, the virgin concubine of David, might be given him as a wife. Solomon, who till then had professed the profoundest reverence for his mother, his willingness to grant her anything, suddenly flashes into fiercest wrath at this. He detects what her unsuspicious generosity had not perceived. The petition is treated as part of a conspiracy in which Joab and Abiathar are sharers. Benaijah is once more called in. Adonijah is put to death at once. Joab is slain even within the precincts of the tabernacle, to which he had fled as an asylum. Abiathar is deposed and exiled, sent to a life of poverty and shame (1 Kings ii, 31-36), and the high-priesthood transferred to another family more ready than he had been to pass from the old order to the new, and to accept the voices of the prophets as greater than the oracles which had belonged exclusively to the priesthood. See 1 K. vi, and Ezek. xxviii. This declaration is probably not clearly not for any new offences, but for his participation in Adonijah’s original attempt; and Joab is put to death because he is alarmed at the treatment of his associates (ver. 26-29), which implies collusion on his part. The king sees in the movement a plot to keep him still in the tutelage of childhood, to entrap him into admitting his elder brother’s right to the choicest treasure of his father’s harem, and therefore virtually to the throne, or at least to a regency in which he would have his own partisans as counsellors. With a keen-sighted promptness he crushes the whole scheme. He gets rid of Benaijah and orders Abiathar to bring him Joab, and asserts his own independence. Soon afterwards an opportunity is thrown in his way of getting rid of one [see Shemti] who had been troublesome before and might be troublesome again. He presses the letter of a compact against a man who by his infatuated disregard of his sacred gift, had put himself in his hands (ver. 36). An elaborate indication of Solomon’s conduct in this matter may be found in Menthe, Theseaur., vol. i; Sliasser, Diss. de Salom. Processus contra Shemti. There is, however, no needless slaughter. The other “sons of David” are still spared, and one of them, Nathan, becomes the head of a distinct family (Zech. xii, 22) which ultimately fills up the line of direct succession (Luke iii, 31). As he punishes his father’s enemies, he also shows kindness to the friends who had been faithful to him. Chimmah, the son of Barzillai, apparently receives an inheritance near the city of David, and probably in the reign of Solomon displays his inherited hospitality by building a caravansary for the strangers whom the fame and wealth of Solomon drew to Jerusalem (2 Sam. xix, 31-40; 1 Kings ii, 7; Jer. xlii, 17; Ewald, Gesch. Isr., iii, 247; Proph. ii, 191).

IV. Foreign Policy.—The want of sufficient data for a continuous history has already been noticed. All that we have to go by is that they通知, the external relations of the kingdom during the thirty-five years of Solomon’s reign (1 Kings xi, 42). (Josephus, again inaccurate, lengthens the reign to eighty years, and makes the age at accession fourteen [Ant. viii, 7, 8].) (b) The commencement of the Temple in the fourth, its completion in the eleventh year of his reign (vi, 1, 57, 38). (c) The commencement of his own palace in the seventh, its completion in the twentieth year (vii, 1; 2 Chron. vii, 1). (d) The conquest of Hamath-zobah, and the consequent foundation of cities in the region north of Palestine after the twentieth year (ver. 1-6). With materials so scanty as these, it will be better to group the chief facts in an order which will best enable us to appreciate their significance.

1. Egypt.—The first act of the foreign policy of the new reign must have been to make Israelites a very startling one. He made alliance with Pharaoh, king of Egypt. He married Pharaoh’s daughter (1 Kings iii, 1). Since the time of the Exodus there had been no intercourse between the two countries. David and his counsellors had taken no steps to promote it. Egypt had probably taken part in assisting Edom in its resistance to David (1 Chron. xi, 23: Ewald, Gesch. Isr., iii, 182), and had received Hadad, the prince of Edom, with royal honors. The king had given him his wife’s sister in marriage, and some points which related to his family (1 Kings xi, 14-20). These steps indicated a purpose to support him at some future time more actively, and Solomon’s proposal of marriage was probably intended.
to counteract it. It was at the time so far successful that when Hadad, on hearing of the death of the dreaded leaders of the armies of Israel, David and Joab, wished to seize the opportunity of attacking the new king, the court of Egypt rendered him no assistance (xxi, 21, 22). The disturbances thus caused, like those of a later date in the north, coming from the foundation of a new Syrian kingdom at Damascus by Rezon and other fugitives from Zobah (ver. 23-25), might well lead Solomon to look out for a powerful support, to obtain for a new dynasty and a new kingdom a recognition by the rest of older families. The expediency of this manoeuvre and the results were probably favorable enough. The new queen brought with her as a dowry the frontier city of Gezer, against which, as threatening the tranquillity of Israel, and as still possessed by a remnant of the old Canaanites, Pharaoh had led his armies. She was received with all honor, the queen-mother herself attending to place the diadem on her son's brow on the day of his espousals (Cant. iii, 11). Gifts from the nobles of Israel and from Tyre (the latter offered perhaps by a Tyrian princess) were lavished at her feet (Psa. xlv, 12). It is to be remembered that the daughter of Pharaoh appears to have conferred to the Hebrew faith, for she is mentioned among the people that “knew no Pharaoh before” (Exod. xii, 48). The seduction of Solomon into the toleration or practice of idolatry (1 Kings xi, 1), and there are no accounts of any Egyptian superstitions being introduced during his reign. The Egyptian queen dwelt in a separate portion of the city of David till a palace was reared—the presence of the ark on Zion precluded the idea of residencies of such a foreigner, though she might have abandoned her national gods (2 Chron. viii, 11). She dwelt there apparently with attendants of her own race, “the virgins that be her fellows,” probably conforming in some degree to the religion of her adopted country. According to a tradition which may have some foundation in quite earlier times (v. note), in Psalter, or, as in the story, Vaphees) sent with her workmen to help in building the Temple to the number of 80,000 (Eupolemus, in Euseb. Prep. Evang. ii, 80-85). The “chariot of Pharaoh,” at any rate, appeared in royal procession with a splendor hitherto unknown (Cant. i, 9).

The ultimate issue of the alliance showed that it was hollow and impotent. There may have been a revolution in Egypt, changing the dynasty and transferring the seat of power to Bubastis (Ewald, iii, 389). There was at any rate a change of policy. The court of Egypt had no interest in the fate of Solomon, and the fact is known to have aspirations after kingly power. There, we may believe, by some kind of compact, expressed or understood, was planned the scheme which led first to the rebellion of the Ten Tribes, and then to the attack of Shishak on the weakened and dismantled kingdom of the son of Solomon. Evils such as these were hardly counterbalanced by the trade opened by Solomon in the fine linen of Egypt, or the supply of chariots and horses which, as belonging to aggressive rather than defensive warfare, a wiser policy would have led him to avoid (1 Kings x, 28, 29).

2. Tyre.—The alliance with the Phoenician king rested on a somewhat different footing. It had been part of David's policy from the beginning of his reign, Hiram had been “ever a lover of David.” He, or his grandfather (comp. the data given in 2 Sam. v, 11; Josephus, Ant. vii, 3, 2; viii, 3, 3; Cont. Ap. i, 18; and Ewald, iii, 287), had helped him by supplying materials and workmen for his palace, and the latter in his days as king of Sidon and Pharaoh's accession he sent ambassadors to salutate him. A correspondence passed between the two kings, which ended in a treaty of commerce. (The letters are given at length by Josephus [Ant., viii, 2, 8] and Eupolemus [Eusebius, Prep. Evang. loc. cit.].) Israel was to be supplied with Tyre, for the Temple that was to be the glory of the new reign. Gold from Ophir, cedar-wood from Lebanon, probably also copper from Cyprus, and tin from Spain or Cornwall (Niesbuer, Lect. on Anc. Hist. i, 79), for the brass which was so highly valued, purple from Tyre itself, workmen from among the Zidonians—all these were wanted and were given. The opening of Joppa as a port created a great trade, and part of the cotton grown from Tyre were conveyed to it on floats, and thence to Jerusalem (2 Chron. iii, 16). The chief architect of the Temple, though an Israelite on his mother's side, belonging to the tribe of Dan or Naphtali [see Hiram], was yet by birth a Tyrian, a namesake of the king. In return for the trade, the Tyrians were only too glad to receive the corn and oil of Solomon's territory. Their narrow strip of coast did not produce enough for the population of their cities, and then, as at a later period, “their country was nourished” by the broad valleys and plains of Samaria and Galilee (Acts xii, 20).

The results of the alliance did not end here. Now, for the first time in the history of the Israelites, they entered on a career as a commercial people. They joined the Phoenicians in their Mediterranean voyages to the coasts of Spain. See Tarshish. Solomon's possession of the Edomish coast enabled him to open to his ally a new world of commerce. The ports of Elath and Ezion-geber were vital points in the lines of communication, ships, for the long voyages, manned chiefly by Phoenicians, but built at Solomon's expense, which sailed down the Ælanitie Gulf of the Red Sea, on through the Indian Ocean, to lands which had before been hardly known even by name, to Ophir and Sheba, to Arabia Felix, to Oenopoli and Phœnicum, after an absence of nearly three years, treasures almost or altogether new—gold and silver and precious stones, nard, aloes, sandal-wood, almsg-trees, and ivory; and last, but not least in the eyes of the historian, new forms of animal life, on which the inhabitants of Palestine gazed with wondering eyes, “apes and peacocks.” The immediate object of this vast enterprise was the securing of the tribes, and the consequent leaving his palaces at Jerusalem and elsewhere and travelling to Elath and Ezion-geber to superintend the construction of the fleet (2 Chron. viii, 17); perhaps also to Sidon for a like purpose. (The statement of Justin Martyr [Dial. c. Tryph. c. 94], in Sidon abvlov Oiakro, receives by the accompanying étv yapukis the character of an extract from some history then extant. The marriage of Solomon with a daughter of the king of Tyre is mentioned by Eusebius [Prep. Evang. x, 11].) To the knowledge thus gained we may ascribe the wider thoughts which appear in the psalms of this period (chap. xxi), and the mention of the wonders of the deep and occupy their business in great waters (Psa. evei, 23-30); perhaps also as an experience of the more humiliating accidents of sea-travel (Prov. xxxiii, 34, 35). (See the monographs De Navij, Salom. by Wichmannhausen [Viteb. 1709], Huetiæs [in Ugolino, vol. vii], Königsmann [Siev. 1800], and Reil [in Germ.] W PERSON 1834).

According to the statement of the Phoenician writers quoted by Josephus (Ant. viii, 5, 3), the intercourse of the two kings had in it also something of the sportiveness and freedom of friends. They delighted to perplex each other with hard questions, and laid wagers as to their power of answering them. If Solomon lost, he had to pay the loser and pay his forfeits; but afterwards, through the help of a sharp-witted Tyrian boy, Abdonel, he solved the hard problems, and was in the end the winner. (The narrative of Josephus implies the existence of some story, more or less humorous, in Tyrian literature, in which the wisest of the kings of earth was baffled by a boy's cleverness. A singular pendant to this is found in the popular mediæval story of Solomon and Moloff, in which the latter [an ugly, deformed dwarf] outwits the former. A modernized version of this work may be found in the Waldalla [Leipic, 1844]. Older copies, in Latin and German, of the 14th century, are in the British Library. The Anglo-Saxon Catalogue of Solomon and Saturn is a mere catechism of
SOLOMON 866 SOLOMON

scriptural knowledge.) The singular fragment of his-
tory inserted in 1 Kings ix, 11-14, recording the cession
by Solomon of sixteen cities, and Hiram's dissatisfaction
with them, is perhaps connected with these imperial
wagons. The king of Tyre revenges himself by a Phe-
monic tone that the Phoenician monarchs were
at this time comparatively feeble. Other neighboring
nations were content to pay annual tribute in the form
of gifts (ix, 24). The kings of the Hittites and of Syria
welcomed the opening of a new line of commerce which
enabled them to find in Jerusalem an emporium where
they might get the chariots and horses of Egypt (1
Kings x, 28). This, however, was obviously but a small
part of the traffic organized by Solomon. The founda-
tion of cities like Tadmor in the wilderness, and Tiph-
ha (Thapsacus) on the Euphrates; or of others on the
route, each with its own special market for chariots or
horses or stores (2 Chron. vii, 5-6); the erection of
lofts for corn or wine (2 Chron. viii, 7-8, 4), pointed to a
more distant commerce, opening out the resources of
Central Asia, reaching, as that of Tyre did afterwards
(availing itself of this very route), to the nomad tribes of
the Caspian and the Black seas, to Togarmah and Meshech
and Tubal (Ezek. xxvii, 15, 14; xxviii, 14, 17, 18); then to the commerce of "all that was in her heart" (2
Chron. x, 2). With the few exceptions above noted, the reign
of Solomon verified his name. It was a time of peace:
"he had peace on all sides round about him, and Judah
and Israel dwelt safely" (1 Kings iv, 24, 25). The arms
of David had won the empire which Solomon now en-
joyed. It was an empire for princes and the Oriental sense, ex-
tending from the Euphrates to the Mediterranean, from
Thapsacus to Gaza. The outlying territories paid tribu-
tue to their suzerain; "they that dwell in the wilder-
ness bowed before him; the kings of Tarshish and of
the isles brought presents; the kings of Sheba and Seba
offered gifts;" the Syrian tribes beyond Lebanon and as
far as Damascus, with Moab, Ammon, and Edom, the
Arabian clans, the surviving aborigines, and the Phili-
des, did homage and paid tribute—"they brought
presents, and served Solomon all the days of his life." At
the same time proper measures or precautions were
taken to increase the resources which had been built
along the ridges of Lebanon, and on the frontiers
"were chariot-cities, and cities of horsemen." The two
Beth-horons, on the boundary-line of the great and un-
easy tribe of Ephraim, and on the high-road between
Jerusalem and the sea-coast, as well from the east as
from Philistia and Egypt, were strongly fortified—be-
came "fenced cities, with walls, bars, and gates" (2
Chron. viii, 5). For a similar reason the old city of
Gezer, on the Philistine border, was rebuilt and garri-
sioned; and Hazor and Megiddo, guarding the plain of
Esraelon from Syrian or Assyrian attack, rose into great
fortress cities. The increased wealth had been spent in
expounding Iudzam and the desert, similar military sta-
tions were placed at intervals. Such a congeries of
kings has but a loose coherence, and continues united
only so long as the central controlling power maintains
its predominance, so that Solomon's empire, made up
of those heterogeneous materials, fell to pieces at his
death and the division that so speedily followed it.

4. The survey of the influence exercised by Solomon
on surrounding nations would be incomplete if we were
to pass over that which was more directly personal—
the fame of his glory and his wisdom. The legends
which pervade the East are probably merely the ex-
position of the authority given them in the Old Test.,
but (as suggested above), like those which gather round the
names of Nimrod and Alexander, the result of the im-
pression made by the personal presence of one of the
mighty ones of the earth. Cities like Tadmor and
Tiphsah were not likely to have been founded by a king
who had never seen and chosen the sites. 2 Chron. viii,
3, 4, implies the journey which Josephus speaks of (Ant.
vi, 6, 1), and at Tadmor Solomon was within one day's
journey of Damascus, and supplied his ship (see
Josephus, loc. cit.; but the day's journey must have
been a long one.) Wherever the ships of Tarshish
went, they carried with them the report, losing nothing
in its passage, of what their crews had seen and heard.
The impression made on the Inca of Peru by the power
and knowledge of kings offers perhaps the nearest
approach to what falls so little within the limits of
our experience, though there was there no personal cen-
tre round which the admiration could gather itself.
The journey of the queen of Sheba, though from its circums-
stances the most conspicuous, did not stand alone. The
inhabitants of Jerusalem, of the whole line of country
between it and the Gulf of Akaba, saw with amazement
the "great train;" the men with their swarthy faces,
the camels bearing spices and gold and gems, of a queen
who held the far South, because she had heard of the
wisdom of Solomon, and connected with it the name of
the "king of Tyre" (1 Kings x, 1). She came with
hard questions to test that which, according to the
royal phrase, quoted may throw light upon their nature.
Not riddles and enigmas only, such as the sporting fancy
of the East delights in, but the ever-old, ever-new,
problems of life, such as, even in that age and country, were
vexing the hearts of the speakers in the book of Job, were
stirring in her breast. Then was the composite form of
"all that was in her heart" (2 Chron. x, 2). She meets us
the representative of a body whom the dedication-
prayer shows to have been numerous, the strangers"coming from a far country" because of the "great
name" of Jehovah (1 Kings vii, 41), many of them
princes or the members of the families of kings (2
Chron. ix, 23). The historians of Israel delighted to dwell
on her confession that the reality surpassed the fame,
"the one half of the greatness of thy wisdom was not told"
(version 6; Ewald, iii, 533). See Schramm, De Fama
Stalmon. [Herb. 1745.]

The territory of Sheba, according to Strabo, reached
so far north as to meet that of the Nabatheans, al-
though its proper seat was at the southernmost angle
of Arabia. The very rich presents made by the queen
show the extreme value of her commerce with the He-
brew monarch; and this early interchange of hospitality
and prosperity derives a peculiar interest to those later
ages—those of the Maccebæes and downward—the
intercourse of the Jews with Sheba became so intimate,
and their influence, and even power, so great, Jewish
circumcision took root there, and princes held sway
who were called Jewish. The language of Sheba is be-
lieved to have been strongly different from the original
Arabic; yet, like the Ethiopic, it belonged to the great
Syro-Arabian family, and was not alien to the Hebrew
in the same sense that the Egyptian was; and the
great ease with which the pure monothelism of the
Maccebæes propagated itself in Sheba gives plausibility
to the opinion that, at this time at least, the people of
Sheba had much religious superiority over the Arabs
and Syrians in general. If so, it becomes clear how
the curiosity of the southern queen would be worked
upon by seeing the riches of the distant monarch,
whose pure creed must have been carried everywhere
with them by their sailors and servants. See Sheba.

Y. Internal History. — 1. Administration of Capacity.—
We can now enter upon the reign of Solomon, in its
hearing upon the history of Israel, without the necessity
of a digression. The first prominent scene is one which
presents its character in its noblest aspect. There were
two holy places which divided the reverence of the
people—the ark and Jerusalem, and the temple at
Jeru-
salem, and the original tabernacle of the congregation,
which, after many wanderings, was now pitched at Gib-
bon. It was thought right that the new king should
offer solemn sacrifices at both. After those at Gibeah there came that vision of the night which has in all ages borne its noble witness to the hearts of rulers. Not for riches, or long life, or victory over enemies, would the son of David, then at least true to his high calling, feeling himself as "a little child" in comparison with the vastness of his work, offer his supplications, but for a "saying in the heart of the king" that answered to the people. The "speech pleased the Lord." There came in answer the promise of a wisdom "like which there had been none before; like which there should be none after" (1 Kings iii, 5-15). So far all was well. The prayer was a right and noble one. Yet there is also a contrast between it and the prayers of David which are so often interlaced with the desire that the heart of his own, that of David's heart is not chiefly for wisdom, but for holiness. He is conscious of an oppressing evil, and seeks to be delivered from it. He repents, and falls, and repents again. Solomon asks only for wisdom. He has a lofty ideal before him, and seeks to accomplish it; but he is as yet haunted by no deeper yearnings, and speaks as one who has "no need of repentance.

The wisdom asked for was given in large measure, and took a varied range. The wide world of nature, animate and inanimate, which the enterprises of his subjects were throwing open to him, the living and characteristic performances, in all their inner depths, lay before him, and he took cognizance of all. But the highest wisdom was that wanted for the highest work, for governing and guiding, and the historian hastens to give an illustration of it. The pattern-instance is in all its circumstances thoroughly Oriental. The king sits in the gate of the city, at the early dawn, to settle any disputes, however strange, between any litigants, however humble. In the rough-and-ready test which turns the scales of evidence, before so evenly balanced, there is a kind of rough humor as well as sagacity specially attractive to the Eastern mind, then and at all times (1 Kings iii, 16-28).

But the power to rule showed itself not in judging only, but in organizing. The system of government which he inherited from David received a fuller expansion. Prominent among the "princes" of his kingdom, i.e. officers of his own appointment, were members of the priestly order: Azariah the son of Zadok, Zatok himself being the "high priest." But the line of Jedidiah as captain of the host, another Azariah and Zabud, the sons of Nathan—one over the officers (Nissatobim) who acted as purveyors to the king's household (1 Kings iv, 2-5), the other in the more confidential character of "king's friend." In addition to these, there were the two scribes (Sopherim), the king's secretaries, drawing up and preserving the "secrets" (see Scribes), Eliephor and Abiah, the recorder or annalist of the king's reign (Mazkir), the superintendent of the king's house and household expenses (Issa, xxii, 15), including probably the harem. The last in order, at once the most indispensable and the most hated, was Adoniram, who presided "over the tribute," that word including probably the personal service of forced labor (comp. Keil, Com. ad loc., and Ewald, Gesch. Isr. iii, 334).

2. Exchequer.—The last name leads us to the king's finances. The first impression of the facts given us is that of abundant plenty. That all the drinking-vessels of the two palaces should be of pure gold was a small thing, "nothing accounted of in the days of Solomon" (1 Kings x, 21). "Silver was in Jerusalem as stones, and cedars as the sycamore-trees in the vale" (x, 27). The people were "eating and drinking and making merry" (iv, 20). The treasures left by David for building the Temple might well seem almost inexhaustible (1 Kings vi, 1). But however, the uncertainty, [1] as to the accuracy of the numbers, [2] as to the value of the terms. Primeaux, followed by Lewis, estimates the amount at £833,000,000, yet the savings of the later years of David's life, for one special purpose, could hardly have surpassed the national debt of England (comp. Milman, History of the Jews, 1, 267.) The large quantities of the precious metals imported from Ophir and Tarshish would speak, to a people who had not learned the lessons of a long experience, of a boundless source of wealth (1 Kings ix, 28). All the kings and princes of the subject provinces paid tribute in the form of gifts, in money and in kind, "year by year" (x, 25). Monopolies of trade, then, as at all times in the East, contributed to the king's treasury, and the trade in the fine linen and chalices and horses of Egypt must have brought in large profits (ver. 28, 29). The king's domain-lands were apparently let out, as vineyards or for other purposes, at a fixed annual rental (Cant. viii, 11). Upon the death of the Hebrew king, the provinces were not only nominally, but actually, under foreign rule. In the reign there was levied a tax of ten per cent, on their produce (1 Sam. viii, 15). All the provinces of his own kingdom, grouped apparently in a special order for this purpose, were bound each in turn to supply the king's enormous household with provisions (1 Kings iv, 21-29). The total amount thus brought into the treasury in gold, exclusive of all payments in kind, amounted to 666 talents (x, 14). See Tax. The profound peace which the nation enjoyed as a fruit of David's victories stimulated the industry of all Israel. The tribes beyond the Jordan had become rich by trade, not by the pastoral industries within the district where their cattle might multiply to an indefinite extent. The agricultural tribes enjoyed a soil and climate in some parts eminently fruitful, and in all richly rewarding the toil of irrigation; so that, in the security of peace, nothing more was wanted to develop the resources of the nation than markets for its various produce. In food for men and cattle, in timber and fruit-trees, in stone, and probably in the useful metals, the land supplied of itself all the first wants of its people in abundance. For exportation, it is distinctly stated that wheat, barley, oil, and wine were in chief demand; to which we may conjecturally add wool, hides, and other raw materials. The king undoubtedly had large districts and extensive herds of his own; and besides this, he received presents in kind from his own people and from the subject nations; and it was possible in this way to make demands upon them, without severe oppression, to an extent that is unbearable where taxes must be paid in gold or silver. He was himself at once monarch and merchant, and we must therefore conclude that private merchant of no private merchant will be allowed to compete with a prince who has assumed the mercantile character. By his intimate commercial union with the Tyrians, he was put into the most favorable of all positions for disposing of his goods. That energetic nation, possessing hardy sailors and a strong fleet, was the source of various raw produce for their own wants. Another large demand was made by them for the raw materials of manufactures, and for articles which they could with advantage sell again; and as they were able to furnish so many acceptable luxuries to the court of Solomon, a most active change soon commenced. Only second in importance to this, and superior in fame, was the commerce of the Red Sea, which could not have been successfully prosecuted without the aid of Tyrian enterprise and experience. The navigation of Shobha, and the districts beyond—whether of Eastern Arabia or of Africa—seems to have been highly active; from the vast diversity of productions bought from the countries so exchanging; while, as it was a trade of monopoly, a very disproportionate share of the whole gain fell to the carriers of the merchandise. The Egyptians were the only nation who might have been rivals in the southern maritime traffic; but their religion and their exclusiveness deprived them of the trade; and there is some reason to think that at this early period they abstained from sending their own people abroad for commerce. The goods brought back from the south were chiefly gold, precious stones, spice, alum or other scented woods, and ivory, all of which
were probably so abundant in their native regions as to be parted with on easy terms; and of course were all admirably suited to the purposes of Solomon. His carrying-trade, which was thus shared between Solomon and the Tyrians, was probably the most lucrative part of the southern and eastern commerce. How large a portion of it went on by caravans of camels is wholly unknown, yet that this branch was considerable is certain. The Dyrtus, a mountainous region on the eastern slopes of the Anti-Lebanon, is the type of the region for the supply of the finest timber, and even of the finest wool, yarn, but even horses and chariots, which were sold again to the princes of Syria and of the Hittites; and were probably prized for the superior breed of the horses, and for the light, strong, and elegant structure of the chariots. Wine, being abundant in Palestine, and probably the favorite beverage, with the exception of wine, was the principal means of repayment. Moreover, Solomon’s fortifying of Tadmor (or Palmyra), and retention of Thapsacus on the Euphrates, show that he had an important interest in the direct land and river trade to Babylon; although we have no details on this subject. The difficulty which meets us, is to imagine by what exports, light enough to bear land-carriage, he was able to pay for his imports. We may conjecture that he sent out Tyrian cloths and trinkets, or Egyptian linen of the finest fabric; yet in many of these things the Babyliouans also excelled. On the whole, when we consider that in the commerce of the time the entire community was concentrated in the hands of the government, that much of the trade was a monopoly, and that all was assisted or directed by the experience and energy of the Tyrians, the overwhelming riches of this eminent merchant-sovereign are perhaps not surprising.

It is hardly possible, however, that any financial system could bear the strain of the king’s passion for magnificence. The cost of the Temple was, it is true, provided for by David’s savings and the offerings of the people; but when this was building, yet more when it was finished, one structure followed another with ruinous rapidity. A palace for himself, grander than that which his father had built for his father; another for Pharaoh’s daughter; the house of the forest of Lebanon, in which he sat in his court of judgment, the pillars all of cedar, set on a throne of ivory and gold, in which six lions on either side, the symbols of the tribe of Judah, appeared (as in the annals of Assyria, Layard, XI. and Rob. ii. 30) standing on the steps and supporting the arms of the chair (1 Kings vii. 12, x, 18–20); ivory palaces and ivory towers, used apparently for the king’s armory (Psa. xlv. 8; Cant. iv. 4; v. 4; vii. 4); the ascent from his own palace to the house or palace of Jehoahaz (1 Kings x. 5); a summer-palace in Lebanon (ix. 19; Cant. vi. 3); a winter-palace in Egypt (1 Kings x. 4); and those of the great Eastern kings (Eccles. ii, 5, 6; Josephus, Ant. vii. 7, 3) [see Paradise]; the foundation of something like a state school or college: costly aqueducts bringing water. It may be, from the well of Bethlehem, dear to David’s heart, to supply the king’s palace in Jerusalem (Eccles. iii, 390); the fortifications of Jerusalem completed, those of other cities begun (1 Kings ix. 15–19); and, above all, the harem, with all the expenditure which it involved on slaves and slave-dealers, on concubines and eunuchs (1 Sam. viii. 15; 1 Chron. xxvi. 18), on men-singers and women-singers (Eccles. ii. 8)—these rose before the wondering eyes of his people and dazzled them with their magnificence. All the equipment of his court, the “ apparel” of his servants, was on the same scale. If he went from his hall of judgment to the Temple, he marched between two lines of soldiers, each with a burnished shield of gold. (Eccles. iii, 390) after the fashion of the king, and as he went on a royal progress to his paradise at Ethenam, he went in snow-white raiment, riding in a stately chariot of cedar, decked with silver and gold and purple, carpeted with the costliest tapestry worked by the daughters of the Jews (Cant. iii. 9, 10). A body-guard attended him, “ three-score valiant men, tallest and handsomest of the sons of Israel, in the freshness of their youth, arrayed in Tyrian purple, their long black hair sprinkled freshly every day with gold-dust (ver. 7, 8; Josephus, Ant. viii. 1, 7).” His chariots, and twelve thousand horsemen, made up the measure of his magnificence (1 Kings iv. 26). If some of the public works had the plea of utility—the fortification of some cities for purposes of defence (Millo [the suburb of Jerusalem], Hazor, Megiddo, the two cities of Jabin, the foundation of their towns in Bashan and over the hills of Idumaea), or some other purposes of commerce—these were simply the pompas of a selfish luxury; and the people, after the first dazzle was over, felt that they were not. As the treasury became empty, taxes multiplied and monopolies became more irksome. Even the Israelites, besides the public houses, . . . (ix. 22), were subject, though, for a part only of each year, to the corvee of compulsory labor (v, 13). The revolution that followed had, like most other revolutions, financial disorder as the chief among its causes. The people complained, not of the king’s idolastry, but of their burdens, of his “ grievous yoke” (xii. 4). Their hatred fell heaviest on Adoniram, who was over the tribute. If, on the one side, the division of the kingdom came as a penalty for Solomon’s idolatrous apostasy from Jehovah, it was, on the other, the Nemesis of a selfish passion for glory, itself the most terrible of all idolatries.

3. Structures.—It remains for us to trace that other downfall, belonging more visibly, though not more really, to his religious life, from the loftiest height even to the lowest depth. The building and dedication of the Temple are obviously the representatives of the former. That was the special task which he committed to his father, and to that he gave himself with all his heart and strength. He came to it with all the noble thoughts as to the meaning and grounds of worship which his father and Nathan could instil into him. We have already seen, in speaking of his intercourse with Tyre, what measures he took for its completion. All that can be said as to its architecture, proportion (Isa. xlv. 3), and the organization of the ministering priests and Levites, will be found elsewhere. See TEMPLE. Here it will be enough to picture to ourselves the feelings of the men of Judah as they watched, during seven long years, the cyclopean foundations of vast stones (still remaining when all else has perished; Edw. iii. 297) gradually rising up and covering the area of the threshing-floor of Araunah, materials arriving continually from Joppa, cedar and gold and silver, brass “without weight” from the foundries of Succoth and Zarethan, stones ready hewn and squared from the quarries (Psa. cv. 8); the work in stone being conducted by the lavish use, within and without, of the gold of Ophir and Paraim. It glittered in the morning sun (as has been well said) like the sanctuary of an El Dorado (Milman, Hist. of the Jews, 1. 259). Throughout the whole work the tranquillity of the king’s city was unbroken by the sound of the workman’s hammer: 

“Like some tall palm the noiseless fabric sprung.”

We cannot ignore the fact that even now there were some darker shades in the picture. Not reverence only for the holy city, but the wish to shut out from sight the misery he had caused, to close his ears against cries which were rising daily to the ears of the Lord of Sabaoth, led him probably to place the works connected with the Temple at as great a distance as possible from the Temple itself. Forgetful of the lessons taught by the experiences of the old world, he went on to make the building of the Temple a violation of the law (Exod. xxii. 21; xxiii. 9 et al.), following the example of David’s policy in its least noble aspect (1 Chron. xxii. 2), he reduced the “strangers” in the land, the remnant of the Canaanitish races who had chosen the alternative of conformity to the religion of their conquerors, to the state of helots, and made their life “bitter with all hard bondage.” See PHOENIX.
Copying the Pharaohs in their magnificence, he copied them also in their disregard of human suffering. Acting, probably, under the same counsels as had prompted that measure, on the result of David's census, he seized on these "strangers" for the weary, servile toil against which the free spirit of Israel would have rebelled. One hundred and fifty-three thousand, with wives and children in proportion, were torn from their homes and sent off to the quarries and the forests of Lebanon and to the task of constructing 2 Chron. v. 14. Even the Israelites, though not reduced permanently to the hot state, (viii., 9), were yet summoned to take their share, by rotation, in the same labor (1 Kings v. 13, 14). One trace of the special servitude of "these hewers of stone" continued long afterwards in the existence of a body of men attached to the Temple, and known as Solomon's servants (q.v.).

Besides the great work which has rendered the name of Solomon so famous—the Temple at Jerusalem—we are informed of the palaces which he built, viz. his own palace, the queen's palace, and the house of the forest of Lebanon, his porch (or piazza) for no specified object, and his porch of judgment, or law-court. He also added to the walls of Jerusalem, and fortified Millo ("in the city of David," 2 Chron. xxxii., 5) and many other strongholds. The Temple seems to have been of very small dimensions—sixty cubits long, twenty broad, and thirty high (1 Kings vi. 8)—or smaller than many modern churches in this respect. It was useful for the lavish use of precious materials. Whether the three palaces were parts of the same great pile remains uncertain. The house of the forest of Lebanon, it has been ingeniously conjectured, was so called from the multitude of cedars pillars, similar to a forest. That Solomon's own house was of far greater extent than the Temple appears from its having occupied thirteen years in building, while the Temple was finished in seven. In all these works he had the aid of the Tyrians, whose skill in hewing timber and in carving stone, and in the application of machines for conveying heavy masses, was of the first importance. The cedars were cut from Mount Lebanon, and, as would appear, from a district which belonged to the Tyrians; either because in the Hebrew parts of the mountain the timber was not so fine, or from want of roads by which it might be conveyed. The hewing was superintended by Tyrian carpenters, but all the hard labor was performed by Hebrew laborers. It is said of the latter that they displayed an invincible hardihood, which enabled them to work beneath the heat of the noonday sun, while in the meantime the Tyrians were frolicking along the sea. It is also reported that they never failed to get the work done on time. It is also said that they never failed to get the work done on time. These laborers were, indeed, not idle, but industrious, and little aided by the strength of beasts. It is inferred that at least the Hittites had recognized princes of their own, since they are named as purchasers of Egyptian chariots from Solomon; yet the mass of these nations were clearly pressed down by a cruel bondage, which must have reacted on the oppressors at every time of weakness. The word צור, which is translated "levy" and "tribute," means especially the personal service performed by public slaves, and is rendered "task" in Exod. i, 11, when speaking of the master's hired hand in his household.

Until the Temple was finished, the tabernacle appears to have continued at Gibeah, although the ark had been brought by David to Zion (2 Chron. i, 3, 4). David, it appears, had pitched a tent on purpose to receive the ark, where Asaph and his brethren the Levites ministered before it with singing, while Zadok and his brethren the priests ministered before the tabernacle at Gibea with sacrifice (1 Chron. xvi, 14-24; xvii, 1). This shows that even in David's mind the idea of a single centre of religious unity was not fully formed, as the co-ordinate authority of Abiathar and Zadok indicates that no single high-priest was recognized. But from the time of the dedication of the Temple, not only was the ark no more borne, but even the Levites and the priests were brought into it (1 Kings viii, 4), and the high priest naturally confined his ministrations to the Temple, Zadok having been left without an equal by the disgrace of Abiathar. Nevertheless, the whole of the latter history of the Jewish monarchy, even under the most pious kings, proves that the mass of the nation never became reconciled to the new order that in Jerusalem (alone) was the place where they ought to worship. The "high places," at which Jehovah was worshipped with sacrifice, are perpetually alluded to in terms which show that, until the reign of Josiah, it was impossible for kings, priests, or prophets to bring about a uniformity and central superstition of the national religion.

After seven years and a half the work on the Temple was completed, and the day came to which all Israelites looked back as the culminating glory of their nation. Their worship was now established on a scale without parallel. As a nation, the Jews were no longer wandering nomads, but a settled people, humans from the mass of idolatry. On its completion, and its freedom from all worship that could possibly become idolatrous. Instead of two rival sanctuaries, as before, there was to be one only. The ark from Zion, the tabernacle from Gibeah, were both removed (2 Chron. v, 5) and brought to the new Temple. The choirs of the priests and Levites met in their fullest force arrayed in white linen. Then, it may be for the first time, was heard the noble hymn "Lift up your heads, O ye gates, and be ye lifted up, ye everlasting doors, and the King of Glory shall come in" (Milman, Hist. of Jews, i, 263). The trumpeters and singers were "as one" in their mighty hallelujahs—"O praise the Lord, for he is good, for his mercy endureth forever" (2 Chron. v, 18). The ark was solemnly placed in its golden sanctuary, and then "the cloud," the "glory of the Lord," filled the house of the Lord. The two tables of stone, associated with the first rude beginnings of the life of the wilderness, were still, they and they only, in the ark which had been removed to Jerusalem, where now so many of the most precious and most sacred memories of the people were. The ark was a witness to the great laws of duty towards God and man, remaining unchangeable through all the changes and chances of national or individual life, from the beginning to the end of the growth of a national religion. Throughout the whole scene the person of the king is conspicuous, and the one man among kings and prophets is for the time subordinate. Abstaining, doubtless, from distinctively priestly acts, such as slaying the victims and offering incense, he yet appears, even more than David did in the bringing-up the ark, in a liturgical character. He, and not Zadok, blesses the congregation, offers up the solemn prayer, dedicates the Temple. He, and not any member of the prophetic order, is then, and probably at other times, the spokesman and "preacher" of the people (Ewalt, Gesch. Isr. iii, 320.). He takes, at least, some steps towards that far-off (Psa. cx, 1) ideal of "a priest after the order of Melchizedek," which one of his descendants rashly sought to fulfill [see Uzziah], but which was to be fulfilled only in a Son of David, not the crowned leader of a mighty nation, but despised, rejected, crucified. From him came the lofty prayer—the noblest utterance of the creed of Israel—setting forth the distance and the nearness of the eternal God, one, incomprehensible, dwelling not in temples made with hands; yet ruling men, bearing their prayers, giving them all good things—wisdom, peace, righteousness.

The solemn day was followed by a week of festival, synchronizing with the Feast of Tabernacles, the time
of the completed vintage. Representatives of all the tribes, elders, fathers, captains, proconsuls, it may be, from the newly acquired territories in Northern Syria (2 Chron. vi. 32; vii. 8)—all were assembled, rejoicing in the actual glory and the bright hopes of Israel. For the king himself then, or at a later period (the narrative of 1 Kings ix. 14), he was the idolatry of all there was a strange contrast to the glory of that day. A criticism, misled by its own acuteness, may see in that warning prophecy of sin, punishment, desolation, only a tautology in events, added some centuries afterwards (Ewald, ii. 404). It is open to us to maintain that, with a certain amount of wisdom, Solomon's, which was religiously far beyond his actual life, such thoughts were psychologically probable, that strange misgivings, suggested by the very words of the jubilant hymns of the day's solemnity, might well mingle with the shouts of the people and the hallegues of the Levites. It is in harmony with all we know of the work of the Divine Teacher that those misgivings should receive an interpretation, that the king should be taught that what he had done was indeed right and good, but that it was not all, and might not be permanent. Obedience was better than sacrifice. There was a danger near at hand.

4. Idolatry.—The danger came, and, in spite of the warning, the king fell. The priestly and prophetical council had to grieve over rival temples to Moloch, Chemosh, Ashtaroth; forms of ritual not idolatrous only, but cruel, dark, impure. This evil came, as the compiler of 1 Kings xi, 1-8 records, as the penalty of another. Partly from policy, seeking fresh alliances, partly from the terrible necessity of just seeking the stimulus of change, he gave himself to "strange women." He found himself involved in a fascination which led to the worship of strange gods. The starting-point and the goal are given us. We are left, from what we know otherwise, to trace the process. Something there was perhaps in his desire to be "like the heathen" in his feeding, sport, "to增長 the traditional knowledge of his age, rising to higher and wider thoughts of God, which predisposed him to it. His converse with men of other creeds and climes might lead him to anticipate, in this respect, one phase of modern thought, as the confessions of the preacher in Koheleth anticipate another. In recognising what was true in other forms of faith, he might lose his horror at what was false—his sense of the pre-eminence of the truth revealed to him—of the historical continuity of the nation's religious life. His worship might go backward from Jehovah to Elohim, from Elohim to the "gods many and all" of the Baal, Ashtaroth, Chemosh, Ashtaroth, each form of nature worship, might come to seem equally true, equally acceptable. The women whom he brought from other countries might well be allowed the luxury of their own superstitions; and, if permitted at all, the worship must be worthy of his fame and the mere magnificence. With this there may, as Ewald suggests (iii. 380), have mingled political motives. He may have hoped, by a policy of toleration, to conciliate neighbouring princes, to attract a larger political traffic. But probably also there was another influence less commonly taken into account. The widespread belief in the man, the myth of Solomon, is not, it is believed, without its foundation of truth. On the one hand, an ardent study of nature, in the period that precedes science, runs on inevitably into the pursuit of occult, mysterious properties. On the other, throughout the whole history of Judah, the element of idolatry which has the strongest hold on men's minds was the Baalism. Not in Babylonia, or Ashtaroth, Chemosh, is not, it is believed, without its foundation of truth. On the one hand, an ardent study of nature, in the period that precedes science, runs on inevitably into the pursuit of occult, mysterious properties. On the other, throughout the whole history of Judah, the element of idolatry which has the strongest hold on men's minds was the Baalism. Not in Babylonia, or Ashtaroth, Chemosh, the religion of Israel opposed a stern prohibition to all such perilous yet tempting arts (Deut. xviii, 10 et al.). The religions of the nations around fostered them. Was it strange that one who found his progress impeded in one way should turn to the other? In any rate, it was. The reign which began so gloriously was a step backward into the gross darkness of fetch worship. As he left behind him the legacy of luxury, selfishness, oppression, more than counterbalancing all the good of higher art and wider knowledge, so he left this, too, as an ineradicable evil. Not less truly than the son of Nebat might his name have been written in history as Solomon the son of David who "made Israel to sin." The name in common is castigated by the ecclesiastical name of "the Mount of Offence," given to the southernmost peak of the range of which Olivet (q. v.) forms a part. (See Brucker, De Solomon. Idololatria, Lips. 1755; Niemeyer, Charakter, iv. 352 sq.)

Disasters followed before long, as the natural consequence of the general political and religious situation. The strength of the nation rested on its unity, and its unity depended on its faith. Whatever attractions the sensuous ritual which he introduced may have had for the great body of the people, the priests and Levites must have looked on the ritual worship with entire disfavor. The zeal of the prophetic order, dormant in the earlier part of the reign, flamed, as it were, hindered from its usual utterances by the more dazzling wisdom of the king, was now kindled into active opposition. Ahijah of Shiloh, as it was taught by the history of his native place, was sent to utter one of those predictions which help to work out our own fulfilment, to forewarn the king of the events which were to befall himself and to the people as the destined heir to the larger half of the kingdom, as truly called as David had been called to be the anointed of the Lord (1 Kings xi, 28-39). The king in vain tried to check the current that was setting strong against him. If Jeroboam was driven for a time into exile, it was only, as we have seen, to be united in marriage to the then reigning dynasty, and to come back with a daughter of the Phe- rorae as his queen (Sept. ut sup.). The old tribal jealousies gave signs of renewed vitality. Ephraim was prepared once more to dispute the supremacy of Judah, and to contemplate, in the absence of a central head, the possibility of the kingdom's being divided (1 Kings xii, 1-11). This weakness within there came attacks from without. Hez- dad and Rezon—the one in Edom, the other in Syria—who had been foiled in the beginning of his reign, now found no effectual resistance. The king, prematurely old (about sixty—one), must have foreseen the rapid breaking-up of the great monarch's many-day to which he had succeeded. Rehoboam, inheriting his faults without his wisdom, haughty and indiscreet, was not likely to avert it.

5. Writings.—Of the inner changes of mind and heart which ran parallel with this history Scripture is silent. Some of the most impressive work in the books that bear his name, which, whether written by him or not, stand in the canon of the Old Test. as representing, with profound, inspired insight, the successive phases of his life; something, also, from the fact that so little remains out of so much—out of the songs, proverbs, treatises, of which the historian speaks (1 Kings iv, 32, 33). Legendary as may be the genealogy of Hezekiah as at one and the same time preserving some portions of Solomon's writings (Prov. xxv. 1) and destroying others, a like process of selection must have been gone through by the unknown rabbins of the Great Synagogue after the return from the exile. Slowly and hesitatingly they received into the canon, as they went on with their unparalleled work of the expurgation by a people of its own literature, the two books which have been the stumbling-blocks of commentators—Ec- clesiastes and the Song of Songs (Ginsburg, Koheleth, p. 13-15). They give excerpta only from the 3000 Proverbs. Of the thousand and five songs (the precise number indicates a known collection) we know absolutely nothing. They were willing to admit Koheleth for the sake of its ethical conclusion; the Song of Songs, because at a very early period, possibly even then, it had received a mystical interpretation (Ki, Einzel., in das Alte Testament § 127) because it was, at any rate, the history of a love which, if passionate, was also tender and pure and true. But it is easy to see that
SOLOMON

there are elements in that poem—the strong delight in visible outward beauty, the surrender of heart and will to one overpowering impulse—which might come to be divorced from truth and purity, and would then be perilous in proportion to their grace and charm. (But see Rollin, Salom. a Scepticiomo Defensus [Rost. 1710].)

Such a divorce took place, we know, in the actual life of Solomon. It could not fail to leave its stamp upon the idyl, and to delight the holy imagination. The poems of the son of David may have been like those of Háfiż. The scribes who compiled the canon of the Old Test. may have acted wisely, rightly, charitably to his fame in excluding them.

The wisdom of Solomon is specially dwelt on in Scripture. He was endowed with great faculties and capacities; and that his intellect was not only stored with vast and varied information, but was so active, shrill, and penetrating as to be successful in its studies and investigations. He had at once an unwearying eagerness in the pursuit of knowledge, and he had also the creative power of genius. Nature and man were his study; botany and zoology shared his attention with men and manners; and his spirit gave utterance to its thoughts and emotions in a style which is called the naturalistic—"he spake three thousand proverbs: and his songs were a thousand and five. And he spake of trees, from the cedar-tree that is in Lebanon, even unto the hyssop that springeth out of the wall: he spake also of beasts, and of fowl, and of creeping things, and of fishes" (1 Kings iv. 32-33). The value of his zoological and botanical researches we know not. No doubt his knowledge took minute cognizance more of external particularity than of inner structure, but it may have had the rudiments of a science, though he may not be compared to Linnaeus or Hooker, Cuvier or Owen. He was not so absorbed in royal cares or royal state and luxury as to forget mental culture. Amid much that was weak and wrong, he was "yet acquainting his heart with wisdom" (Eccles. ii. 3). The "wisdom of Egypt" was proverbial in geometry, astronomy, and medicine; but Solomon outstripped it.

Arabia was the home of that sagacity that clothes itself in proverbs and of the subtlety by which quibbling prevails. Solomon's wisdom excelled the wisdom of all the children of the east country. There had been men of noted intelligence in his own country, such as Ethan, who had charge of the temple music in David's time; Heman, one of the famous singers and "the king's seer in the written word of God;" and Jeduthun was "wiser than all men" (1 Kings iv. 29-31). (See the monographs De Sup. Sal. by Möller [Kil. 1708], Lund [Upasala, 1705], and Scherer [Argent. 1770].)

The books that remain meet us, as has been said, as at any rate representing the three stages of his life. The Song of Songs springs before us the brightness of his youth; the heart as yet untainted; human love passionate, yet undefined, and therefore becoming, under a higher inspiration—half-consciously, it may be, to itself, but, if not, then unconsciously for others—the parable of the soul's affections. (See Krummacher, Solomon and Shadrach, 11-17.) Then comes in the Book of Proverbs, the stage of practical thought, searching into the recesses of man's heart, seeing duty in little things as well as great, resting all duty on the fear of God, gathering, from the wide lessons of a king's experience, lessons which mankind could ill afford to lose. Both in Ecclesiastes (i, 9-12) and yet more in Proverbs, the world is shown to us. Its spiritual and practical experiences gained in other ways. The graphic picture of the life of the robbers and the prosecutions of an Eastern city could hardly have been drawn but by one who, like Haroun al-Rashid and other Oriental kings, at times laid aside the trappings of royalty and plunged into the other extreme of social life, that so he might gain the excitement of a fresh sensation. The poet has become the philosopher, the mystic has passed into the moralist. But the man passed through both stages without being permanently the better for either. They were to him but phases of his life which he had known and exhausted (Eccles. i. 2, II). Therefore there came, as in the Confessions of the Preacher, the great retribution. "The sense then is gone with time; and the crude sense; there fell on him, as on other crowned volup- tuaries, the weariness which sees written on all things, vanity of vanities. Slowly only could he recover from that vexation of spirit," and the recovery was incomplete. It was not as the strong bust of penitence that brought the penitent David the assurance of forgiveness. He could not rise to the height from which he had fallen, or restore the freshness of his first love. The weary soul could only lay again, with slow and painful relapses, the foundations of a true morality. See Ecclesiastes.

Here our survey must end. We may not enter into the things within the veil, or answer either way the doubting question, Is there any hope? Others have not shirked from debating that question, deciding, according to their formulæ, that he did or did not fulfil the conditions of salvation so as to satisfy them, were they to be placed upon the judgment-seat. It would not be prudent to give reason to the other writers who have dealt with this subject. They have been elaborately collected by Calmet (Dict. s. v. "Salomon, Nouvelle Dissert. de la Salut du Sal."). It is noticeable and characteristic that Chrysostom and the theologians of the Greek Church are, for the most part, favorable, Augustine and those of the Latin, for the most part, adverse, to his chances of salvation. (See Petersen, De Salute Solomontis [Jen. 1665]; Reime, Harmonia Vita Solomonis [ibid. 1711]; Éwald, Salomo [Gera, 1800].)

VI. Legends. The impression made by Solomon on the minds of later generations is shown in its best form by the desire to claim the sanction of his name for even the noblest thoughts of other writers. Possibly in Ecclesiastes, certainly in the Book of Wisdom, we have instances of this, free from the vicious element of an Apocryphal literature. Before long, however, it took other forms. Round the facts of the history, as a nucleus, there grew up a web of wonderful stories. For the Jewish, Christian, Mohammedan—refractions, colored and distorted according to the media through which they pass, of a colossal form. Even in the Targum of Ecclesiastes we find strange stories of his character. He and the rabbins of the Sanhedrin sat and drank wine together in the court of the temple, and saith Solomon: "Better is a tree of the wilderness than a grass of the fields." He and the prophets, sitting under the purple trees which the evil spirits brought him from India. The casuistry of the rabbins rested on his dicta. Ashmedai, the king of the demons, deprivéd him of his magic ring, and he wandered through the cities of Israel weeping, and saying, I, the preacher, was king over Israel in Jerusalem (Koran, sur. 38; Gimbarg, Kolekhet, app. ii, II). He left behind him spells and charms to cure diseases and cast out evil spirits; and for centuries incantations bearing his name were the special boast of all the vagabond Jew exorcists who swarmed in the cities of the empire (Josephus, Ant. viii. 2, 5; Just. Mart. Respons. de Orient, p. 489; Origen, Com. in Matt. xxi. 3). His wisdom enabled him to issue benedictions for the blessing of beasts and birds, a gift shared afterwards, it was said, by his descendant Hillel (Koran, sur. 37; Éwald, iii, 407). He knew the secret virtues of gems and herbs (Fabricius, Codex Pseudo. V. T. p. 1042). The name of a well-known plant, Solomon's-seal (Convallaria majalis), perhaps is derived from one of his, the names of the remnant of the Syrian and Arabian alphabets (ibid. p. 1014).

2. Arabic imagination took at a yet wilder flight. After a long struggle with the rebellious Afrits and Jinns, Solomon conquered them and cast them into the sea (Lace, Arab. Nights, i, 30). The remote pre-Adam-
SOLOMON'S POOLS

the insect on his hand, and held converse with it, asking, "Crow! Crow! Am I not the brightest and most glorious of men?" "Not so," replied the anti-king. "Thou sittest on a throne of gold, but I make thy hand my throne, and thus am greater than thou." (Chardin, iii, 198.) One pseudonymous work has a somewhat higher character, the Pseudoeremitan Solomoneum, altogether without merit, a mere cento from the Psalms of David. (Barth, Hist. der Poesie, p. 117; Tregelles, Introd., to the New Test. p. 154.)

VII. New-Testament Views. -- We pass from this wild farrago of Jewish and other fables to that which presents the most entirely accurate to the text. The teaching of the New Testament, adds nothing to the materials for a life of Solomon. It enables us to take the truest measure of it. The teaching of the Son of Man passes sentence on all that kingly pomp. It declares that in the humble work of God, in the lives of the field, there is a quality of beauty and grace about which the feet of men were descended from the Jews of Ethiopia, and the great Prester John (Presbyter Joannes) of medieval travelers (D'Herbelot, loc. cit.; Pineda, loc. cit.; Corlyus, Diass. de Regni Austr. in Menthcn's Thesaurus, vol. i.).

She brought to Solomon the self-same gifts which the Magi afterwards brought to Christ. See Magi. One, at least, of the hard questions with which she came was rescued from oblivion. Fair boys and sturdy girls were dressed up by her exactly alike, so that no eye could distinguish them. The king placed water before them and bade them wash; and then, when the boys scrubbed their faces and the girls stole them softly, he made out which were which (Polyb. 4. 14. in Fabricii, loc. cit.).

Versions of these and other legends are to be found also in Weil, Bibl. Legenda, p. 171; First, Persameshira, ch. xxxvi.

3. The fame of Solomon spread northward and eastward to Persia. At Shiraz they showed the Meder-Saleman, or tomb of Bath-sheba, and said that Perses had been built by the Jews at his command, and pointed to the Tahki-t-Suleiman (Solomon's throne) in proof. Through their spells, too, he made his wonderful journey, breakfasting at Persepolis, dining at Baulbek, and supping at Jerusalem (Chardin, iii, 135, 149; Ouseley, ii, 63. 64. 72). Great care was taken that such a singular gift as the life of David, boasted of countless histories of Solomon; one, the Suleiman-Nameh, in eighty books, ascribed to the poet Firdusi (D'Herbelot, loc. cit.; Chardin, iii, 198).

In popular belief he was conflated with the great Persian hero Jemmish (Ouseley, ii, 64.) As we may expect, the legends appeared in their coarsest and basest form in Europe, losing all their poetry, the mere appendages of the most delectable of Apocrypha, books of magic, a Hygromanteia, a Contra dictio Solomonia (whatever that may be) condemned by Gelasius, Incantations, Clavicula, and the like. Two of these strange books have been reprinted in fac-simile by Scheibell (Kloster, v.).

The Clavicula Solomoniae Necromanticae consists of incantations made up of Hebrew words; and the mightiest spell of the enchanters is the Sigilatum Solomonum, engraved with Hebrew characters, such as might have been handed down through a long series of generations. This singular text (unless this, too, was part of the imposture) that both the books profess to be published with the special license of popes Julius II and Alexander VI. Was this the form of Hebrew literature which they were willing to encourage? A pleasant Persian apologue teaching a lesson deserves to be rescued from the mass of fables. The king of Israel met one day the king of the ants, took

SOLOMON'S GARDENS (Eccles. ii, 5). See Gardens.

SOLOMON'S POOLS (Eccles. ii, 6). Of the various pools mentioned in Scripture, or usually regarded as such, there are none recorded in the life of Solomon in Wady Urtas, between Hebron and Bethlehem, called by the Arabs el-Burak, from which an aqueduct was carried which still supplies Jerusalem with water (Eccles. xxix, 30, 51). They are three in number, partly hewn out of the rock, and partly built with masonry, but all lined with cement, and formed on successive levels, with conduits leading from the upper to the lower, and flights of steps from the top to the bottom of each (Sandy, Tract, p. 150). They are all formed in the sides of the valley of Ethan, with a dam across its opening, which forms the east side of the lower pool. Their dimensions are thus given by Dr. Robinson (Bibl. Res. ii, 348, 374): (1) Upper pool: length 380 feet; breadth at the east 236 feet, at the west 229 feet; depth at the east 25 feet; distance above the middle pool 100 feet. (2) Middle pool: length 425 feet; breadth at the east 250 feet, at the west 180 feet; depth at the east 90 feet, at the west 60 feet, in the middle 30 feet. (3) Lower pool: length 582 feet; breadth at the east 207 feet, at the west 148 feet; depth 50 feet. They appear to be supplied in part from a spring in the ground above (see Thomson, Land and Book, i, 311), but they are evidently filled mostly by surface-water in the rainy season, as they drain the neighboring hill-sides. The aqueduct has two lines, an upper and a lower level; the
former tunnelling the hill, and the latter passing near
the surface by way of Bethlehem (see _Ordnance Survey
of Jerusalem_, Notes, p. 80 sq.). See POOL.

SOLOMON'S PORCH, a name given in Scripture to
two very different structures in Jerusalem: (a) The
"porch of judgment" attached to the palace (1 Kings
vii, 7), for which see PALACE; and (b) "Solomon's
Porch," or portico (στόά Σαλομώνος), the outer eastern
corridor of the Temple (John x, 23; Acts iii, 11; v, 12),
for which see TEMPLE.

SOLOMON'S PSALTER. See Psalter of Solo-
mon.

SOLOMON'S SERVANTS (סֵפָר הַיָּדָה הַיָּדָה; Sept-
ami: Σφαρανάλ, Ezra ii, 58; νομοδούλοι Σαλομώνος,
ver. 55; Neh. vii, 57, 60; Vulg. filii servorum Salomo-
nii). The descendants ("sons") of persons thus named
appear in the lists of the exiles who returned from
the captivity. They occupy all but the lowest places in
those lists, and their position indicates some connection
with the services of the Temple. First come the priests,
then Levites, then Nethinim, then "the children of Sol-
omon's servants." In the Greek of 1 Esdr. v, 30, 36,
the order is the same, but instead of Nethinim we meet
with ἵπποςηυος, "servants" or "ministers" of the
Temple. In the absence of any definite statement as to
their office, we are left to conjecture and inference. (1.)
The name, as well as the order, implies inferiority, even
to the Nethinim. They are the descendants of the
slaves of Solomon. The servitude of the Nethinim,
"given to the Lord," was softened by the idea of dedi-
cation. (2.) The starting-point of their history is proba-
ble to be found in 1 Kings v, 13, 14; ix, 20, 21; 2 Chron.
viii, 7, 8. Canaanites, who had been living till then with
a certain measure of freedom, were reduced by Solomon
to the helot state, and compelled to labor in the king's
dee quarries, and in building his palaces and cities.
To some extent, indeed, the change had been effected
under David, but it appears to have been then connect-
ed specially with the Temple, and the servitude under
his successor was at once harder and more extended (1 Chron.
xxii, 2). (3.) The last passage throws some
light on their special office. The Nethinim, as in
the case of the Gibeonites, were appointed to be hewers of
wood (Jos. ix, 23), and this was enough for the ser-
cices of the tabernacle. For the construction and re-
pairs of the Temple another kind of labor was required,
and the new slaves were set to the work of hewing and
quarrying stone (1 Kings v, 17, 18). Their descendants
appear to have formed a distinct order, probably inherit-
ing the same function and the same skill. The promi-
ience which the erection of a new Temple on their re-
turn from Babylon would give to their work accounts
for the special mention of them in the lists of Ezra and
Nehemiah. Like the Nethinim, they were in the pos-
tion of proselytes, outwardly conforming to the Jewish
ritual, though belonging to the hated race, and, even in
their names, bearing traces of their origin (Ezra ii, 55-
58). Like them, too, the great mass must either have
perished, or given up their position, or remained at
Babylon. The 392 of Ezra ii, 55 (Nethinim included)
must have been but a small fragment of the descendants
of the 150,000 employed by Solomon (1 Kings v, 13).

Solomon ben-Isaac. See Rashiy.

Solotaja Baba (the golden woman), a deity of
the Slavonic mythology, who was worshipped in
the extreme east of European Russia, and whose image
was covered with gold. The nomads and hunters of the
steppe offered her beasts taken from their
herds, or the skins of animals taken in the chase.
The hollow statue of the goddess was occupied by the
priest who was selected to pronounce her oracles;
and the opportunity so afforded was largely used to
persuade the assembled shepherds to make more lib-
eral offerings. The blood of the sacrifices was used
to smear the eyes and mouth of the goddess, and what
remained of the animal became the property of her
servants.

Solu (alone), a term used in old English registers
to designate an unmarried man.

Solitta (free), a term sometimes used in old Eng-
lish registers to designate a spinster.

Soma, in Hindú mythology, the _moon_: also termed
Chandra, was (1) an entire dynasty of Hindú kings
who bore the title "children of the moon;" (2) the
_"moon-plant"_ (Asclepias australis), from which a milky juice
was extracted, that, when mixed with barley and fer-
mented, formed an intoxicating drink much used in the
ancient Vedic worship. This plant was held sacred
and worshipped by the Hindús of the Vedic period.
The hymns comprising one whole section of the Rig-
Veda are addressed to the Soma, and its dedication is
still more prominent in the Sama-Veda. As early as
the Rig-Veda, the Soma sacrifice is called _amrita_ (im-
more), and, in a secondary sense, the liquor which
SOMASCHIANS

communicates immortality. It was the more important part of the ancient daily offering among the Hindus, bulls were gathered on the hills by moonlight, and brought home in carts drawn by rams; the stalks are bruised with stones and placed with the juice in a strainer of goat's hair, and further squeezed by the priest's ten fingers, ornamented by rings of flattened gold. Lastly, the juice, mixed with barley and clarified butter, forming is then drawn off in a scoop for the gods, and in a ladle for the priests. They finally say to Indra (its discoverer), 'Thy inebriety is most intense, nevertheless thy acts are most beneficent.' See Gardner, Faiths of the World, s. v.; Butler, Land of the Vedas, Glossary; Volmier, Worterb. d. Mythol. s. v.

Somasch exempted from the Church of Rome, and their congregations rank with the most important institutions called into being by the effort to retard the progress of the Protestant Reformation in the 16th century. The name is derived from the solitary hamlet of Somasco, between Milan and Bergamo, where Girolamo Miani (Hieronymus Emilianus), the founder, undertook the definitive organization of the order and wrote its first rule. Miani was a noble Venetian who served with distinction against Charles VIII and Louis XII, and who was given over to frivolity and worldliness until the capitulation of Castelnuevo, near Treviso, where he was captured and imprisoned by the Austrians under Maximilian I (1508). He was thrown into a dark dungeon and there abjured his sins, and vowed a thorough reformation of life to God if he should once more become free. It is related that his prayers were heard, and that the Blessed Virgin caused his shackles to fall from his limbs and led him through the midst of the guard to freedom. He now renounced the dignity of podestà of Castelnuevo, given him in recognition of his bravery, and accepted an inferior position in Venice itself, where he displayed great benevolence in caring for the poor and the sick, especially during a famine and pestilence in 1558. Eventually he devoted himself chiefly to the care of poor orphan children and fallen women. He founded an orphan asylum in connection with the Church of St. Roch in Venice, in 1528, and afterwards others in Verona, Bergamo, and Brescia. In 1532 he established a magdalen asylum in Milan, and finally he gathered a number of like-minded clergymen in founding a congregation for the care and administering of the institutions he had established, and for the training of young persons to succeed in that work. Pope Clement VII highly approved of this benevolent order, and favored it. Its seat was fixed at Somasca; where the houses which we now see were established at Pavia and Milan. Miani died Feb. 8, 1537. He was succeeded by Angelus Marcus Gambarana, under whose administration the community was solemnly constituted an order of regular clergy under the rule of St. Augustine, and denominated Clerici Regulariores S. Augustini, Pupiae Congregationis Somaschana, from a church in Pavia presented to them by archbishop Charles Borromeo of Milan. The order was afterwards temporarily united with the Theatines (1546-55), and with the Fathers of Christian Doctrine in France (1616-47), and increased largely in numbers and influence, so that in 1851 Alexander VII approved its division into three provinces—Lombard, Venetian, and Roman. It sustained numerous colleges, and was earnestly devoted to the instruction of the young. A French province was subsequently added.

The constitutions of the order are based on the ideas of its founder as collected by the procurator-general, Antonio Palafox, and approved by paul IV, and they have continued without essential change until now. They prescribe simple and poor clothing, in all respects like that of the regular clergy, simple food, frequent prayers by day and night, fastings, bodily mortifications, manual labor, care of the sick and of orphans, and the instruction of the young.

SOMER. Mrs. MARY, a distinguished scientist and mathematician, whose studies contributed to the advancement of navigation and surveying, was born in Jedburgh, Scotland, Dec. 26, 1780, and was the daughter of Admiral William Fairfax. In her early childhood she gave no promise of genius, but was apparently beneath mediocrity. Her mind was awakened to higher aspirations and endeavors by a slow and spontaneous process. At the age of eleven, while spending a vacation at Burnt Island, she occupied her time gathering sea-shells, the beginning of her knowledge of natural history. From her father she inherited a passion for flowers, and turned the garden of her home into a studio, the beginning of her love of botany. Two small globes in the house attracted her, and thus began her love of geography and astronomy. She soon learned to play on the piano, and in a little while became an accomplished painter, studying under Naasmyth in Edinburgh. The love of knowledge became an irrepressible passion. She took up Euclid alone, which she soon mastered; studied navigation, and taught herself Latin enough to read Caesar's Commentaries. In 1804 she was married to Samuel Greig, and resided in London. After three years she returned, a widow with two children, to Burnt Island, where she resumed her studies with more diligence than ever. Prof. Wallace, of Edinburgh University, gives the following catalogue of books which she mastered: Francour's Pure Mathematics, Elements of Mechanics; Lacroix's Algebra, Differential Calculus, Finite Differences and Series; Biot's Analytical Geometry and Astronomy; Poisson's Treatise on Mechanics; La Grange's Theory of Analytical Functions; Euler's Algebra, Isoperimetric Problems (in Latin); Clairaut's Calculus of Two Variables; Monge's Treatise of Analysis to Geometry; Callet's Logarithms; La Place's Mécanique Celeste, and Analytical Theory of Probabilities. In 1812 she married her cousin, Dr. William Somerville, who deeply sympathized with her in her studies. She soon became a correspondent of such men as Faraday and South, and was elected a member of most of the learned societies of Europe. Losing her fortune, she was dependent upon a government pension, first of one thousand, later of fifteen hundred pounds, and lived, for economy, many years in Italy. Mrs. Somerville continued to keep up her studies in her advanced years, working from 8 A.M. till 12 or 1 P.M. even in her ninetieth year. She died Nov. 29, 1817. Her works are, Mechanism of the Heavens (Lond. 1831, 8vo; Phila. 1832, 18mo):—On the Connection of the Physical Sciences (Lond. 1834, 12mo; 8th ed. 1849, 8vo; completely revised, 1859, 8vo; American editions, N. Y. 1846, 12mo:—Physical Geography (Lond. 1848, 2 vols. 12mo; 2d ed. 1849; 3d ed. 1851; 4th ed. 1858, 8vo; 5th ed. 1862, 8vo; American editions, Phila. 1848, 1850, 1858, 1856, 1860, 12mo:)—On Molecular and Microscopic Science (Lond. 1869, 2 vols. 8vo).

Sommer- or Summer-beam, a main beam or girder in a floor, etc.; a name now seldom used except in the compound breasummer.

Sommer, Peter Nicholas, a Lutheran minister, was born in Hamburg, Germany, Jan. 3, 1799. He received a thorough classical and professional education, and on the completion of his course was licensed as a
theological candidate. He received a call from a Church in Scholastic County, N. Y., left for America (Oct. 24, 1742), and arrived at his destination, May 25, 1743. Here for nearly fifty years he labored and, after 1606, often travelling from thirty to fifty miles to care for destitute Lutheran settlements. In 1768 he was suddenly smitten with blindness, but still continued to serve the Church for about twenty years, when his sight was as unexpectedly restored. In 1784 he retired from the active ministry and took up his abode in N. Y., where he remained until his death, Oct. 27, 1795. "Mr. Sommer held a high rank in his denomination, as an able, earnest, laborious, and successful minister." See Sprague, "Annals of the Amer. Palæt.," ix, 13.

**SOMMIER, JEAN CLAUDE, a French prelate, was born July 22, 1601, at Yauvilliers, and studied at Besançon, where he became doctor in theology and law. He was first curate of Girancourt, and afterwards (1696) at Champes. He became preacher to Leopold I of Lorraine, and was engaged in several important negotiations of state. Benedict XIII made him archbishop of Cesarea and prothonotary apostolic in 1725, and the same year he received the provostship of St. Die and other ecclesiastical honors. His zeal for clerical privileges involved him in a controversy with the bishop of Toul, which continued till his death, Oct. 3, 1737. He is the author of several works on local church history, for which see Hoefer, "Nuov. Biog. Générale," s. v.

**Somnacodom, in Siamese mythology, was a most wise legislator, who conceived by his virgin-mother from the sun. He traversed the world, passing through various adventures and perils until he had subdued all the countries and conquered all the armed and bodyguards and blessed the world with his teachings until his mission is accomplished and the earth is free from sin. He trained many pupils, and died from eating the flesh of a hog which contained the soul of an evil genius whom he had once conquered. Temples and numerous statues were erected in his honor through all Siam.

**Somnia (dreams), in Roman mythology, were children of Erebus and Night, whose palace in Tartarus had two gates, one of ivory and the other of bone. From the latter issued the truthful, from the former the fanciful and deceptive dreams.

**Sonnists, a name for those who maintain that the soul is in an unconscious state from the time of death until the resurrection; called also Soul Sleepers (q. v.).

**Somnus, or Hypnos, in Roman and Grecian mythology, was the god of sleep.

**Somodes, in Hindustani mythology, is one of the most attractive of female genii, belonging to the race of the Gantharas: a servant of the holy Tushali.

**Somayansha, in Hindustani mythology, is the famous family of kings which claimed descent directly from the moon (Soma or Chandra), and assumed the title of Children of the Moon.

**Somnopir (i.e. summerer), a term found in Chaucer and other of our older writers to designate the officer who is now called an apparitor, whose duty it is to summon the ecclesiastical courts.

**Son, properly bê, bén (often rendered in the plural "children"), from the root bêt, are derived both bê, son, as in Ben-hanan, etc., and bê, daughter, as in Bath-sheba. The Chalde. also bê, son, occurs in the Old Testament, and appears in the New Testament. In such words as Barnabas, but which in the plural bê, (Exra vi, 16) resembles more the Hebrew. Cognate words are the Arabic Ben, son, in the sense of descendants, and Benat, daughters (Genesis, Thes. Heb., p. 215, 236; Shaw, Travels, p. 8). See Benz.

1. The word "son" is used with a great variety and latitude of significations both in the Old and the New Testament, especially in the former, some of which often disappear in a translation. The following is a summary of these applications: It denotes (1) the immediate offspring. (2) Grandson: so Laban is called son of Nahor (Gen. xxiv, 39); whereas he was his grandson, being the son of Bethuel (xxv, 29); Mephibosheth is called the son of Saul, though he was the son of Jonathan, son of Saul (2 Sam. xix, 24). (3) Remote descendants: so we have the sons of Israel, many ages after the primitive ancestor. (4) Son-in-law: there is a son born to Naomi by Boaz (Ruth iv, 19). Son by education, that is, a disciple: Eli calls Samuel his son (1 Sam. iii, 6). Solomon calls his disciple his son in the Proverbs often, and we read of the sons of the prophets (1 Kings xxvii, 25, et al.), that is, those under a course of instruction for ministerial service. In nearly the same sense a convert is called son (1 Tim. i, 2; Titus i, 4; Philcm. 10; Col. iv, 15; 1 Pet. v, 13). See Prophet. (8) Son by disposition and conduct, as sons of Belial (Judg. xix, 22; 1 Sam. ii, 12), unrestrainable persons; sons of the mighty (Psa. xxix, 1), heroes; sons of the havock (Isa. xxi, 13), soldiers, rank and file; sons of the sorcerers, who study or practice sorcery (Isa. livii, 3). (9) Son in reference to age: son of one year (Exod. xvi, 5), that is, one year old; son of sixty years, etc. The same in reference to a beast (Micah vi, 6). (10) A production or offspring, as we are born from the burning coal, that is, sparks which issue from burning wood (Job v, 7). "Son of the bow," that is, an arrow (iv, 19), because an arrow issues from a bow; but an arrow may also issue from a quiver, therefore, son of the quiver (Lam. iii, 13). "Son of the floor," threshed corn (Isa. xxii, 10). "Son of oil" (Zech. iii, 14), the branches of the olive-tree. (11) Son of beating, that is, deserving beating (Deut. xxv, 3). Son of death, that is, deserving death (2 Sam. xiii, 3). Son of perdition, that is, deserving perdition (John xvii, 12). (12) Son of God (q. v.), by excellence above all: Jesus the Son of God (Mark i, 1; Luke i, 35; John i, 43; Rom. i, 4; Heb. iv, 14; Rev. ii, 18). The only begotten; and in this he differs from Adam, who was son of God by immediate creation (Luke iii, 18). (13) Sons of God (q. v.), the angels (Job i, 6; xlviii, 7), perhaps so called in respect to their possessing power delegated from God; his deputies, his vicegerents; and in that sense, among others, his oppressed, his genuine Christs, his true people, his particular persons; perhaps also so called in reference to their possession of principles communicated from God by the Holy Spirit, which, correcting every evil bias, and subduing every perverse propensity, gradually assimilates the party to the temper, disposition, and conduct, called the image, likeness of God (Col. i, 15). Sons of the devil (Acts xiii, 10). In addition to these senses in which the word son is used in Scripture, there are others which show the extreme looseness of its application. So when we read of sons of the bride-chamber (Matt. xiv, 19; Mark vii, 21) it merely indicates the youthful companions of the bridegroom, as in the instance of Samson. And when the holy mother was committed to the care of the apostle John (John xix, 36), the term son is evidently used with great latitude. See Daughter, etc.

2. The blessing of offspring, but especially, and sometimes exclusively, of the male sex, is highly valued among all Eastern nations, while the absence is regarded as one of the severest punishments (Herod. i, 136;
SON
S 876 SON OF GOD

Strabo, xv, 733. See Gen. xvi, 2; xxix, 31; xxxi, 1, 14; Deut. xvi, 14; 1 Sam. i, 5, 6; iv, 20; 2 Sam. vi, 23; xviii, 18; 2 Kings iv, 14; Isa. xliv, 9; Jer. xx, 15; Hos. ix, 14; Esth. v, 11; Psal. cxxvi, 3; 5; Eccles. vi, 3; Comp. Dariusius, Proph. Ben-Sira, in Crit. Scur. viii, 1887; Luke xvi, 24; Psal. xcvii, 20; Redon, Egypt, iii, 163; Niebuhr, Dever. des Ax. p. 67; Chardin, Voy. vii, 466; Russell, Nubia, p. 343). Childhood is in the East usually, not so much, attended with little difficulty, and accomplished with little or no assistance (Gen. xxvii, 17; xxxvii, 28; Exod. i, 19; 1 Sam. iv, 10; 2 Sam. xxvii, 30; 1 Chron. vi, 96; Harmer, Observ. iv, 425; Montagu [Lady M. W.], Letters i, 217, 219, 222). As soon as the child was born, and the umbilical cord cut, it was washed in a bath, rubbed with salt, and wrapped in swaddling-clothes. Arab mothers sometimes rub their children with earth or sand (Exek. xvi, 4; Job xxxvii, 8; Luke ii, 7, 3; see Burchhardt, loc. cit.). On the eighth day the rite of circumcision in the case of a boy was performed, and a name given, sometimes, but not usually, the same as that of the father, and generally conveying some special meaning (Gen. xxvi, 4; xxix, 32, 50; xxx, 6, 24; Lev. xii, 3; Isa. vii, 14; viii, 5; Luke i, 55; ii, 21). Among Mohammedans, circumcision is performed in the first month, at a mithl to the eighth, sixth, or even the fourteenth year (Speeuer, De Legg. Heb. v, 62; Strabo, xvii, 824; Herod. ii, 36, 104; Burchhardt, ut sup.; Lane, Mod. Egypt, i, 87; Poole [Mrs. J.], English., in Egypt, iii, 158; Niebuhr, Deser. p. 70). See Circumcision. After the birth of a male child the mother was considered unclean for seven days. The child was a female, for double that period, 14 + 60 days. At the end of the time she was to make an offering of purification of a lamb as a burnt-offering, and a pigeon or turtle-dove as a sin-offering; or, in case of poverty, two doves or pigeons, one as a burnt-offering, the other as a sin-offering (Lev. xii, 14; 15). The period of nursing appears to have been sometimes prolonged to three years (Isa. xlix, 15; 2 Mac. vii, 27; comp. Livingstone, Travels, vi, 126; but Burchhardt leads to a different conclusion). The Mohammedan law enjoins mothers to suckle their children for two full years if possible (Lane, Mod. Egypt, i, 83; Poole [Mrs. J.], English., in Egypt, iii, 161). Nurses were employed in cases of necessity (Gen. xxxiv, 59; xxxv, 8; Exod. ii, 9; 2 Sam. iv, 4; 2 Kings xii, 2; 2 Chron. xxii, 11). The time of weaning was an occasion of rejoicing (Gen. xxvi, 8). Arab children wear little or no clothing for four or five years. They are carried in the arms of both parents, or sometimes carried by the mothers on the hip or shoulder, a custom to which allusion is made by Isaiah (xliv, 22; lxvi, 12; see Lane, Mod. Egypt, i, 83). Both boys and girls in their early years, boys probably till their fifth year, were under the care of the women (Prov. xxxi, 1; see Herod. i, 130; Strabo, xv, 728; Niebuhr, Deser. p. 24). After the boys were taken by the father under his charge. Those in wealthy families had tutors or governors (P. V. N. T. 420), who were sometimes eunuchs (Numb. xii, 12; 2 Kings x, 1, 5; Isa. xxxii, 23; Gal. iii, 24; Esth. ii, 7; see Josephus, Life, § 76; Lane, Mod. Egypt, i, 88). Daughters usually remained in the women's apartments till marriage, or, among the poorer classes, were employed in household work (Lev. xxix, 9; Numb. xii, 14; 1 Sam. ix, 11; Prov. xxxi, 19, 23; Eccles. vii, 25; xlii, 9; 2 Mac. iii, 19). The example, however, and authority of the mother were carefully upheld to children of both sexes (Deut. xxix, 20; Prov. x, 1; xv, 20; 1 Kings ii, 19). The first-born male children were regarded as devoted to God, and were to be redeemed by an offering (Exod. xliii, 13; Numb. xviii, 15; Luke ii, 22). Children devoted by special vow, as Samuel was, appear to have been brought up from very early years in a school or place of education near the tabernacle or temple (1 Sam. i, 24, 29). See Education. The authority of parents, especially the father, over children was very great, as was also the reverence enjoined by the law to be paid to parents. The disobedient child, the striker or reviver of a parent, was liable to capital punishment, though not at the independent will of the parent. Children were liable to be taken as slaves in case of non-payment of debts, and were expected to perform menial offices for others, such as washing the feet, and to maintain them in poverty and old age. How this last obligation was evaded, see CORIN. The like obedience is enjoined by the Gospel (Gen. xxxviii, 24; Lev. xxvi, 9; Numb. xii, 14; Deut. xxxiv, 16; 1 Kings ii, 19; 2 Kings iv, 1, 1; Neh. v, 5; Job xxiv, 9; Prov. x, 1; xv, 20; xxix, 3; Col. iii, 20; Eph. vi, 1; 1 Tim. i, 9; Comp. Virg. Aen. vi, 609; and Servius, ad loc.; Aristophan. Ran. 146; Plato, Phadon, 144; De Legg. ix. See Dariusius, Quest. Hebr. ii, 63, in Crit. Scur. viii, 1547). The legal age was twelve, or even earlier, in the case of female, and thirteen for a male (Maiouio, De Pros. c. 3; Grotius and Calmet, On John iv, 21). The inheritance was divided equally between all the sons except the eldest, who received a double portion (Deut. xxxi, 17; Gen. xxvi, 31; xlix, 3; 1 Chron. v, 1, 2; Judg. xi, 7). Daughters had by right no portion in the inheritance, and at the death of the husband passed to his father's tribe, but they were forbidden to marry out of their father's tribe (Numb. xxxvii, 1, 8; xxxvi, 2, 8). See Child. Son, in Norse mythology, was one of the barriels in which Fialar and Gair altered the blood of the white Quasar, in order to brew it from the mead which produced poetic intoxication. Son of God. This expression occurs, and even with some frequency, in the plural before it is found in the singular; that is, in the order of God's revelations it is used in a sense applicable to a certain class or classes of God's creatures prior to its being employed as the distinctive appellation of One to whom it belongs in a sense altogether peculiar. It seems necessary, therefore, in order to obtain a natural and correct view of the subjects that we first look at the more general use of the expression, and then consider its specific and higher application to the Messiah. 1. Sons of God viewed generally. We first meet with this designation in a passage which has from early times been differently understood. It is at Gen. vi, 1, where it is said that the children of God were men of power, deeds were attributed to the inhabitants of the world, and both the Hebrew and the tetravolume, it is said, "the Sons of God (beni Elohim) saw the daughters of men that they were fair, and they took them wives of all whom they chose" (that is, having regard only to natural attraction). And again, "there were giants in the earth (literally, 'the nephilim were on the earth') in those days; and say, that when the sons of God came in unto the daughters of men, and they bare [children] unto them, these were the mighty men (the heroes, brimmam) who were of old, men of renown." The sons of God in these verses, say many of the Jewish interpreters, were persons of quality, princes and nobles, and the daughters of men they married were females of low birth—as if the climax of disorder was reached in the Bible—sense were inheriting below one's rank! Such a view carries impropriability in its very front, and is without any support in the general usage of the terms. In the Apocryphal book of Enoch, then by many of the fathers, and in later times not a few Catholic and Lutheran theologians (including among the last class Steier, Hofmann, Kurz, Delitzsch), the sons of God is a name for the angels, in this case, of course, fallen angels; who they think form the only proper contrast to the daughters of men. In other passages, also, angels are undoubtedly called "sons of God" (Job 1, 6; li, 1; xxxvii, 7; Dan. iii, 3) and "sons of men" (Psa. xxxii, 1; Ixxxix, 7). There are, however, other passages in which men standing in a definite relation to God, his peculiar people, are so called. Israel, as the elect na-
SON OF GOD

877

SON OF GOD

ction, is called his son, his first-born (Exod. iv. 22); but in this circle a narrower circle still bore the name of his sons, as coequally distinguished from those who corrupted themselves and fell away to the world (Deut. xxxii, 5); and those who had backslidden, but again returned, were to be designated sons of the living God (Hos. i, 10). Also in Isa. xxxvii, 17, Israel in the strictest sense is spoken of, when the prophet says, "the name of Jehovah (Elohim) made strong for himself. There seems no reason, therefore, for supposing that the expression "sons of God" should be understood of angels any more than of men. Its actual reference must be determined from the connection, and in the case under consideration angels are on various accounts necessarily excluded. For (1) the case is not that of the mighty ones who beholding beautiful women for wives and marrying them—cannot, without the greatest incongruity, be associated with angelic nature, among which there is neither marrying nor giving in marriage (Luke xx, 55, 56). Even carnal intercourse between such parties was impracticable; but the actual taking of wives (the term used being that uniformly employed to denote the marriage relationship) is still more abhorrent to the ideas set forth in Scripture as to the essential distinctions between the region of spirits and the world of sense. (2) If a relation of the kind had been possible, it would still have been indefensible in place of the marriage, by which the object of the historian manifestly is to trace the progress of human corruption—implying that the prominent actors in the drama were men, and not beings of another sphere. Hence, immediately after the first notice of the angels of God marrying the daughters of men, the Lord says, "My spirit shall not always strive with man, for that he also is flesh" (Gen. vi, 3); as if the whole were the partakers of flesh and blood. (3) The moral bearing and design of the narrative also point in the same direction, which undoubtedly aimed at presenting, from the state of things which drew on the Deluge, a solemn warning to the Israelites against those heathen marriages which brought incalculable mischief on the covenant people. (4) In like manner, the allusion of our Lord to the marrying and giving in marriage before the Flood as things which were going to be repeated after the same fashion before the second advent (Luke xvii, 27) requires them to be seen in the picture of the coming judgment. The ancient world could have furnished no proper parallel to the state of things anticipated in the last days, and would have been beside the mark. (See Stosch, De Filii Dei [Lingen, 1749]; Quintornp. ibid. [Rost. 1751]; Scholz, Ehe d. Söhne Gottes, etc. [Ratisb. 1866].)

We are therefore decided in opinion that by "sons of God" (Gen. vii, 22) we must understand "children of God" in the plenitude of the term, as the great body of the best interpreters have understood it, a select class of men on earth, those who belonged to the line that had maintained in a measure the true filial relationship to God (the Sethites). Though fallen and sinful, yet, as children of faith and heirs of promise, they were the spiritual as well as natural offspring of God, by whom once for all he chose one who was originally made in God's image, and who still through grace could look up to God as a father. From this select class the Canaanites were cut off, the unbelieving and godless spirit manifested showing them to be destitute of the childlike spirit of faith and love; while the Adams of Eve, by reckoning their seed only through Seth, had in a measure disowned them. Alienated from God, the offspring of Cain were merely sons of men, and their daughters might fitly be called in an emphatic sense the daughters of men, because knowing no higher parentage. But the other class contained members of a family of God on earth; for, if "the old woman that was pious" was a woman, why should not "the old man that was righteous" be a man? (Gen. xlix, 26) Enoch and Noah, walked with God, or who, even if they did not stand in this close, priestly relation to God, made the divine image a reality through their piety and fear of God, then these were sons of God (Elohim), for whom the only correct appellation was 'sons of Elohim,' since sonship to Jehovah was only introduced with the call of Israel" (Keil). The name in question, "sons of God," was made prominent at the critical time when it was on the eve of becoming altogether inapplicable in order the more distinctly to show how willing God was to own the relationship as long as he well could, and how grievous a degeneracy discovered itself when the prophet beheld the marriage of the sons of God (Elohim) made strong for himself. There seems no reason, therefore, for supposing that the expression "sons of God" should be understood of angels any more than of men. Its actual reference must be determined from the connection, and in the case under consideration angels are on various accounts necessarily excluded. For (1) the case is not that of the mighty ones who beholding beautiful women for wives and marrying them—cannot, without the greatest incongruity, be associated with angelic nature, among which there is neither marrying nor giving in marriage (Luke xx, 55, 56). Even carnal intercourse between such parties was impracticable; but the actual taking of wives (the term used being that uniformly employed to denote the marriage relationship) is still more abhorrent to the ideas set forth in Scripture as to the essential distinctions between the region of spirits and the world of sense. (2) If a relation of the kind had been possible, it would still have been indefensible in place of the marriage, by which the object of the historian manifestly is to trace the progress of human corruption—implying that the prominent actors in the drama were men, and not beings of another sphere. Hence, immediately after the first notice of the angels of God marrying the daughters of men, the Lord says, "My spirit shall not always strive with man, for that he also is flesh" (Gen. vi, 3); as if the whole were the partakers of flesh and blood. (3) The moral bearing and design of the narrative also point in the same direction, which undoubtedly aimed at presenting, from the state of things which drew on the Deluge, a solemn warning to the Israelites against those heathen marriages which brought incalculable mischief on the covenant people. (4) In like manner, the allusion of our Lord to the marrying and giving in marriage before the Flood as things which were going to be repeated after the same fashion before the second advent (Luke xvii, 27) requires them to be seen in the picture of the coming judgment. The ancient world could have furnished no proper parallel to the state of things anticipated in the last days, and would have been beside the mark. (See Stosch, De Filii Dei [Lingen, 1749]; Quintornp. ibid. [Rost. 1751]; Scholz, Ehe d. Söhne Gottes, etc. [Ratisb. 1866].)

We are therefore decided in opinion that by "sons of God" (Gen. vii, 22) we must understand "children of God" in the plenitude of the term, as the great body of the best interpreters have understood it, a select class of men on earth, those who belonged to the line that had maintained in a measure the true filial relationship to God (the Sethites). Though fallen and sinful, yet, as children of faith and heirs of promise, they were the spiritual as well as natural offspring of God, by whom once for all he chose one who was originally made in God's image, and who still through grace could look up to God as a father. From this select class the Canaanites were cut off, the unbelieving and godless spirit manifested showing them to be destitute of the childlike spirit of faith and love; while the Adams of Eve, by reckoning their seed only through Seth, had in a measure disowned them. Alienated from God, the offspring of Cain were merely sons of men, and their daughters might fitly be called in an emphatic sense the daughters of men, because knowing no higher parentage. But the other class contained members of a family of God on earth; for, if "the old woman that was pious" was a woman, why should not "the old man that was righteous" be a man? (Gen. xlix, 26) Enoch and Noah, walked with God, or who, even if they did not stand in this close, priestly relation to God, made the divine image a reality through their piety and fear of God, then these were sons of God (Elohim), for whom the only correct appellation was 'sons of
of God or have received from him the adoption, that they become members of the kingdom (John i, 12, 13; iii, 8, 5; Gal. iii, 5, etc.); and the Spirit is conferred upon them, not with a kind of secrecy and reserve, but in the full plenitude of grace, and expressly as the spirit of sonship or adoption, leading them to cry in a manner altogether peculiar, "Abba, Father" (Rom. viii, 15). It was not only high with the sons of God, and those who lived in earlier times, while they enjoyed the reality, scarcely knew how to use it. In the tone of their spirits and the general environments of their condition they approached nearer to the state of servants than that of sons. See Anna.

2. Sonship. — Special application to Jesus Christ. Even in Old-Test. Scripture, and with respect to the participation of sonship by the common members of the covenant, there was, as already stated, a narrowing of the idea of sonship to those in whom it was actually realized. But within that narrow circle there was a narrower still of which divine sonship was predicated, and this in connection with the family of David, the royal house. Even in the first formal announcement of God's mind on the subject, when the prophet Nathan declared so distinctly that David's son should also be God's son, and that the throne of his son's kingdom should be established forever (2 Sam. vii, 14-16), a limitation of the idea of sonship was made, a limitation beyond what had yet been given in the revelations of God to his people. The king on the throne of Israel in David's line was to be in the most emphatic sense God's son—combining, therefore, royalty and sonship—and this associated with actual perpetuity. Could such things be supposed to have their full accomplishment in a son who had about him only the attributes of humanity? Must not the human, in order to their realization, be in some peculiar manner interpenetrated with the divine? Thoughts of this description could scarcely fail to occur to contemplative minds from the conclusions of this prophecy alone; but other and still more explicit utterances were given to aid their contemplations and render their views in this respect more definite. For David himself in Ps. ixi he speaks of the future God-anointed king of Zion as so anointed and destined to the irreversible inheritance of the kingdom, just because it was Jehovah's son and had a right to wield a complete power and exercise a complete sway over the utmost bounds of the earth. This seemed to speak for him who was to be king by way of eminence an essentially divine standing; and in Ps. cxlv he is addressed formally as God, whose throne should be for ever and ever. The same strain was caught up at a later period, when the adversaries rejected the claim and held that the pointing of it to be a capital crime. Jesus knew perfectly that they so understood him, and yet he deliberately accepts their interpretation of his words, nay, consents to let the sentence pronounced against him run its course rather than abandon or modify the claim to divinity on which it was grounded. The conclusion is inevitable on both scores, and the significant assertion of the authorities that the idea of divine sonship was utterly abhorrent to their view of the expected Messiah, while in the mind of Jesus it was only as possessing such a sonship that the real characteristics of the Messiah could be found in him. Stier, however, has conclusively shown [143] that the text read in LXX (v. 39) taking the title "Son of God" was not a mere equivalent for "Messiah."

The mistake of the Jews respecting the person of Christ did not come of itself; it sprang from superficial views of the work of Christ. The national king of Israel, such as they had come to anticipate in the Messiah, might have been a mere man only specially assisted by God. There was nothing in the contemplated office which lay above the reach of human capacity or prowess, and it could not appear otherwise than blasphemy to associate with it an incarnation of Deity. Had they seen the more essential part of the work to lie in the reconciliation of iniquity, and laying open, through an atonement of infinite value and a righteousness all perfect and complete, the way to eternal life for a perishing world, they would have seen that unspokably higher than human powers were needed for the execution of the task. The sight of the great problem that had to be solved, they utterly mistook the kind of qualifications required for its solution, and remained blind to the plainest testimonies of their own Scriptures on the subject. They alone saw it who came to know Jesus as the Saviour of sinners, the Redeemer of the world; and their testimony to his divine character was, like his own, explicit and uniform. If, as has
been well said—gathering up the substance of their statements and our Lord's own on the subject—"if the only-begotten and well-beloved Son of God, who always was, and is to be, in the bosom of the Father, in the nearness and dearness of an eternal fellowship and an eternal companionship of himself; in the very idea of himself, in the very conception, the perfect image of God, such a reflection of his glory and express image of his person that whoever has seen the Son has seen the Father also; who is the agent and representative of God in the creation and preservation of the material and the spiritual universe, in the redemption is the mediator of the world and the government of both, in the general resurrection of the dead and the final judgment of men and angels, in all divine attributes and acts, so that he is manifestly the acting Deity of the universe—if he is not God, there is no actual or possible evidence that there is any God" (Dr. Tyler, in Bib. Sacra for October, 1863). See Son of God.

Son of Man. This designation, which, like the Son of God, is now chiefly associated with Christ, has also an Old as well as a New Test. usage; it had a general before it received a specific application. In a great variety of passages it is employed as a kind of circumlocution, when well enough to express a nature and humble condition; as, when speaking of God, it is said, "He is not the son of man that he should repent" (Numb. xxiii, 19); and "What is man that thou art mindful of him, or the son of man that thou visitest him?" (Psa. viii, 4). For some reason not certain to us, the Son of Man, in which it could be fitted the more adoption of Chaldean usage, or its possessing a sort of poetical and measured form, the designation "son of man" is the style of address commonly employed in Ezekiel's writings when he was called to hear the word of God (ii, i, i, etc.). That Chaldean usage had, at the time, a form different from similar employment by Daniel; as, when speaking of a heavenly messenger appearing to him in the visions of God, he describes the appearance as being of one, not simply like a man, but "like the similitude of the sons of men" (x, 16), while in other parts of the description this is interchanged with the simple designation or appearance of a man (ver. 5, 18). Nor have we any reason to think that, as regards the expression itself, anything else is indicated by "son of man" in the vision of Daniel which most directly points to New-Test. times and relations. In that vision, after beholding successively four different monstrous and savage figures, the mighty one of Daniels' description, the man saw "like a son of man came with the clouds of heaven, and came to the Ancient of Days; . . . and there was given him dominion, and glory, and a kingdom, that all people, nations, and languages should serve him" (vii, 13, 14). The expression here, "like a son of man," is evidently equivalent to one having a human aspect, and as such differing essentially from those beastly and rapacious natures that had already passed in vision before him. The kingdoms represented by such natures, though presided over by human beings, were to be characterized by the caprice, selfishness, and cruelty which were instinctively suggested by those ideal heads; while the kingdom that shall come after them, and which was really to attain to the universality and perpetuity that they vainly aspired after, there were to be the possession and display of quality distinctive humanity—those, namely, which are the image and reflex of the divine. This, however, it could only be the head of the kingdom in that higher and of occupying a higher platform than that of fallen humanity, and being able to pervade this lower sphere with the might and the grace of Godhead. Hence in the vision, not only is ideal humanity made to image the character of the kingdom, but the bearer of it appears coming at the head of all, and the Deity— as himself being from above rather than from beneath—eminently, indeed, the Lord from heaven.

It may be regarded as certain that in so frequently choosing for himself the designation of "the Son of man" (in all fully fifty times), our Lord had respect to the representation in Daniel. It was the title under which, with a few rare exceptions, he uniformly spoke of himself, except when it was requisite to use the term Son of God (Matt. xxvi, 64), as if to show that what belonged to the Son of God might equally be affirmed of himself (the terms were weighty and well understood) of the Son of man. This comes out with peculiar force in the latter of the two passages referred to; for no sooner had our Lord confessed to the adjuration of the high-priest as to his being the Son of God than he added, "Hereafter ye shall see the Son of man sitting on the right hand of power and coming in the clouds of heaven," appropriating the very language in Daniel's vision, and asserting of himself as Son of man what belonged to him as the fellow of Godhead. Along with and behind the attribution of humanity, which he loved to place in the foreground, there lay the heavenly majesty. Hence, while the epistle in question may not have been found in the subscription of the Lord himself, it is at least with the best authority to regard this as the "ideal man" (which is all that rationalistic interpreters would find in it), it includes much more than that: it makes him known as the new man, who had come from heaven, and in whom, because in him the Word was made flesh, manhood had attained to the condition in which it could fulfill the high destiny of exercising lordship for God over "the world to come" (Heb. ii, 5).

By this title, then, to use the words of Luther, "Jesus, on the one side, includes himself among other men—he is one of our race; while, on the other, he thereby exalts himself above the whole race besides, as in a truly exclusive sense, the Son of mankind, its genuine Offspring—one Man towards whom the whole history of the human race was tending, in whom it found its unity, and in whom history finds its turning-point as the close of the old and the commencement of the new era." But this, coupled with the authority and power of judgment which he asserts for himself over all flesh as the Son of man, be-speaks his possession of the divine as well as of the human nature. "No rationalistic ideal of virtue can avail us here. To call Jesus the mere prototype and prefiguration of mankind will not suffice to justify such language; we are constrained to quit the limits of humanity, and look for the source of all, the root of all the things that are to come; and it was in God himself to explain the possibility of such declarations. The absolute relation to the world which he attributes to himself demands an absolute relation to God. The latter is the necessary postulate of the former, which cannot be properly understood but from this point of view. Only because Jesus is to God what he is can he be to us what he says. He is the Son of man, the Lord of the world, its judge, only because he is the Son of God." (Fundamental Truths of Christianity, p. 289, 290.) For literature, see Hase, Leben Jesu, p. 127.

Sonargaulter, in Norse mythology, was the great golden boar which was placed on the table of the heroes on every recurring Juel evening, and upon whose back they placed their hands while making oaths which were to bind them during the ensuing year.

Soncinio. This appellation designates a Jewish family who won a lasting name by their early and extensive enterprises in Hebrew typography. They were of German origin, and may be traced to the city of Spire, but take the name by which they are best known from Soncinio, a small town in Lombardy, where they established a press, from which issued a number of valuable works in Hebrew literature, more especially some of the earliest-printed Hebrew Bibles. The first production of the Soncinio press is the treatise Be-
rakoth, dated 1844, a full description of which is given by De Rossi in "Annales Hebreeo-Typographici, Sec. XV" (Parram. 1795), p. 28 sq. The printer was Joshua Solomon ben-Israel Nathan, who was the head of the family, and whose son Gerson was associated with Moses, whose son Gerson established a press at Constantinople. In the preface the printer speaks of himself as "Gerson, a man of Soncino, the son of R. Moses, the son of the wise and excellent R. Israel Nathan ben-Samuel ben-Rabbi Moses, being of the fifth generation from the rabbi Mose of Spire." Seen after the printing of Berveratothis press issued the former and later prophets (i. e. Joshua, Judges, Samuel, Kings, Isaiah, Jeremiah, Ezekiel, and the twelve minor prophets), with Kimchi's commentary. The whole comprises 459 leaves. The first word in Joshua, Judges, and Samuel ("ཡוש") is printed in large letters: in the greater and smaller prophes the first word is wanting, but a great space is left. Neither pages, chapters, nor verses are numbered: above the text the name of the book is printed. Each page is divided into two columns; the commentary stands below the text, which has no minuscule or majuscule letters, no vowels or accents. A full description of this part of the Old Testament appears in the "Bible Hebraica Completa," by H. Deissmann (vol. J). This is the most comprehensive Hebrew Bible with vowel-points and accents. This Bible is very rare: only nine copies are known to be extant, viz., one at Exeter College, Oxford, two at Rome, two at Florence, two at Parma, one at Vienna, and one in the Baden-Durlach Library. It has a title, but at the end of the Pentateuch we find a postscript, which seems to have been added after the completion of the twenty-four books. According to Kennicott, this edition is said to contain more than 12,000 variations, which is probably an exaggeration. The firm of the Soncinzi extended their operations by erecting presses at Naples, Brescia, Fano, and other places; and their operations Jewish literature is greatly indebted. For a list of the works edited by the Soncinzi, see Euseb. "Epist. ad Flavi. Jud. iii, 352 sq." (B. P.)

**Song** (Heb. שיר, šīr). Songs were generally used on occasions of thanksgiving and triumph, as the song of Moses at the deliverance from Pharaoh and his host (Exod. xv, 1); the song of Israel at the well of Beer (Num. xxii, 17); the song of Moses, in Deuteronomy, xxi, 28; the song of Deborah (Judg. v, 12); that of David on bringing up the ark (1 Chron. xiii, 8); of Hannah (1 Sam. i, 11); of the Virgin (Luke i, 46); of the four-and-twenty elders (Rev. v, 8); of Moses and the Lamb (xiv, 3). But a few also were sung on occasions of sorrow, such as that of David on Saul and Jonathan (2 Sam. i, 18, etc.); the Lamentations of Jeremiah, and the song he composed on the death of Josiah (2 Chron. xxxvi, 25). It is said of Tyre, in Ezek. xxvi, 13, as one mark of her desolation, "I will cause the noise of thy songs to cease, and dries up the sources of thy harp shall be no more heard." Songs and viols were the usual accompaniments of sacrifices among the Jews and heathens (Amos vi, 23).

"Sacritica, dulces tibia effundat modos, Et nivea magnum victima ante aras cadat." (See Troad.)

Eccl. xi, 4, "And all the daughters of song shall be brought low," i. e. all the organs which perceive and distinguish musical sounds, and those also which form and modulate the voice; age producing incapacity of enjoyment, as old Barzillai remarks (2 Sam. xix, 30); and juvenile noted for the same vice by Dryden: "What music or enchanting voice can please A stupid, old, impenetrable ear?"

Ps. lxviii describes the manner of Jewish musical festivities:

"The singers went before, After came the players on instruments, And all the men that played upon every sort of instrument."

In Hos. ii, 15 singing implies the manifestation of the divine favor, where the Targum says, "I will work miracles for them, and perform great acts, as in the day when they ascended up out of the land of Egypt." In this sense a song denotes a great deliverance and a new subject of thanksgiving; so a new song, as in Psa. xl, 2, and Rev. xiv. 3, "To him that is mighty to save, and to him that is mighty to give strength, and who sitteth in the counsel of the everlasting, and who turneth the cause of Jacob; and the waters shall fail from the mouth of Azariah unto the end of the song." And the song should be, in the context of the two parts of the psalm, coupled with the fact that ver. 14, which tells that the Temple and its worship no longer exist, contradicts ver. 30, 31, 61, 62, where both are said to exist, and that the same author would not have put the prayer into the mouth of Azariah alone, it is evident that the two parts proceed from different sources. Those who are acquainted with the multifarious stories wherewith Jewish tradition has embalmed the memory of..."
SONNA
881
SONSHIP OF CHRIST

scriptural characters well know that it is almost impossible to trace the authors or dates of these sacred legends. Neither can the language in which they were originally written be always ascertained. These legends grew with the nation; they accompanied the Jews into their wanderings, assumed the complications and were repeated in the languages of the different localities in which the Jews colonized. An Apocryphal piece may, therefore, have a Palestinian or Babylonian origin, and yet have all the drapery of the Alexandrian school.

De Wette (Lehrbuch) conceives that the prayer and the hymn betray marks of two different authors (Dan. iii, 38; comp. ver. 55, 56, 54, 86, Stephen, Versicherungen, 1837). The last line of this hymn, which has been the subject of a dispute between critics of different schools, is of later date than the text of the prayer, and must have been written with a liturgical object. Certain it is that, from a very early period, it formed part of the Church service (see Rufinus, in Symbol. Apost., who observes that this hymn was then sung throughout the whole Church; and Athenaeus, De Verisimilia). It is one of the canticles still sung on all festivals in the Roman, and retained in the daily service of the Anglican Church. In its metrical arrangement it resembles some of the ancient Hebrew compositions. De Wette adduces (loc. cit.) several proofs from the style to show that it had a Chaldee original, and had undergone the labors of various hands, and was at length sanctioned by those who contented for the divine authority of this hymn that the context requires its insertion, as without it there would be an evident hiatus in the narrative (Dan. iii, 23). “Then these men, Shadrach, Meshach, and Abed-nego, fell down bound into the midst of the burning fiery furnace,” after which we find immediately (ver. 24, Heb.), “then Nebuchadnezzar was astonished,” etc. The cause of this astonishment is said to be supplied by the Greek translation—“And they walked in the midst of the fire praising God, and blessing the Lord (ver. 1, A.V. Aposc.) . . . . . . the angel of the Lord came down into the oven,” etc. (ver. 27). But this addition seems to be no mere assemblage of the contrary which constitutes Nebuchadnezzar’s astonishment, as the cause of it is given in Daniel, ver. 92 (ver. 25 in the Heb. and A.V.). See Daniel, Apocryphal Additions to.

SONNA, in Mohammedan law, is, according to the Book of Definitions, the observance of religion in matters respecting which there is no positive and necessary command; also the general practice of the prophets, with some alterations. Now this general practice in matters of religion is called the Sonna of guidance, but in those of common occurrence the Sonna of excess. The Sonna of guidance is that by the due performance of which religion is rendered complete, and the dereliction of which is either detestable or sinful. The Sonna of excess is that to which a man is driven by necessity, which constitutes the sonna of excess, that is, it performs, insures good works, but the dereliction of which is neither detestable nor sinful; as, for instance, the custom of the prophet in rising, sitting, putting on his clothes, etc., is not binding, but if followed is meritorious. The Sonna, therefore, comprises the Mohammedan traditions. See SUNNA.

Sonnites are the orthodox Mohammedans who rigorously follow the traditions and are famous for their opposition to the several heretical sects, especially the Shiites (q.v.), who reject the traditions. The Turks belong to the former, the Persians to the latter sect. They regard the Sonna (q.v.), or traditions, as of equal authority with the Koran, but still do not undervalue the latter. They are accounted orthodox Mohammedans, and recognize the Ottoman emperor as the caliph and spiritual head of Islam. There are four orthodox sects of Sonnites, who agree in points of dogmatic and speculative theology, but differ on ceremonial points and questions of civil and political administration. These sects all unite in hostility to the house of Ali, and to the Shiiites who support his cause.

Sonntag, Christoph, a German Lutheran theologian, was born Jan. 28, 1654, at Weylitz. In 1676 he was called to the pastorate of Oppurg, in 1686 he was made superintendent at Schlesingen, and four years later he was appointed professor of theology at Altdorf, where he died, July 6, 1717. He wrote, Disputatio de Allegata Apocryphis in Codice IV Evangeliorum (Altdorf, 1716): —Sermo Bianum Biblicum (ibid. 1708); —Examen Persicorum Philolatrum (ibid. 1712); Methodus Votum. Test. Ephemeris (ibid. 1691); —Minule XX Autentica Chaldaica (ibid. 1708): — Dissertatio in Vatic. Estia (ii, 11 (ibid. 1692); — Trialogia Vot. Test. Catholica (ibid. 1698); — Tidul Philosomorum in Methodum Ammianurum Redactis (1687). See First, Bibl. Jud. iii, 356 sq.; Winckler, Die israel. thol. u. Gesch. d. deutsch. Kirchenleides, v. 419. (B. P.)

SONS OF GOD. See Sons of God, 1.

SONS OF THUNDER. See Boanerges.

Sonship of Christ. The Creed of Nice declares, “We believe in one Lord Jesus Christ, the Son of God, the only begotten of the Father, that is, of the essence of the Father, God of God, Light of Light, very God of very God, begotten, not made, of one essence with the Father.” These sentiments have been the faith of the Church in every age, but they have been in many instances explained by unjustifiable imagery and language, or have been more or less obscured by the Platonic ontology, and drawn in later times from material sources. The two constituent elements of the divine sonship are, the Son’s consubstantiality with the Father, and his peculiar ante-mundane origin in the Father.

1. Dependence of the Son.—The name implies the Son’s dependence on the Father, and this relation of dependence lies also at the basis of other scriptural expressions relating to Father and Son, e.g. “Image of the invisible God,” “Word of God,” etc. The dependence of Jesus on the Father is expressly taught in 1 Cor. i, 3: “Ye are Christ’s,” i.e. “the head of Christ is God’s.” “The head of Christ is God.” But it would be opposed to the central idea of Christian doctrine to maintain a dependence of the Son on the Father inconsistent with his true divinity. By “dependence” in this relation is only meant that relation by which the second Person in the Trinity derives his godhead in virtue of his unity of nature with the Father. It is because he is the Son of God that he is himself likewise fully and truly God. There is no inequality or inferiority implied in this expression. The dependence is one of essence, of nature, and not of creation, production, or emanation. Precisely in the same way the Holy Spirit is not said to be “created” in the form, “God from the Father,” i.e. he is an outflow of the same essential being, but a different personality. The language employed on this subject must necessarily be mysterious, as the theme itself transcends human thought. See PERSON.

2. Consubstantiality.—Here we set out with the words of Christ himself, “As the Father hath life in himself, so hath he given to the Son to have life in himself” (1 John v, 26). As the fountain of life, as the independent dispenser of life, the Son is entitled to the appellation of Lord in conjunction with the Father. The world has its existence only in him who upholds and fills it with its gifts; in God only man lives, moves, and has his being (Rom. i, 28). The dependence of the Son has its being in the Son. He is not only living, but the fountain of life. Sonship we understand to mean similarity of essence, and not a procreation as among men. Not only is the Son of the same essence with the Father, but he is also ariostos—God in and from himself. Sonship is not to be read as a distinction of essence, but of existence—not of being in itself, but of being in its relations. The term does not characterize a separation of nature so much as personality. But such difference of position is not inequality of essence, and when rightly understood will be found as remote from the calumnious imputation of Tritheism as from the heresy of modalism or Sabellianism.
Soothsaying in Christian Times. Although Christianity was a professed enemy to soothsaying and its kindred practices, yet the remains of such superstition continued in the minds of many in the Church. The Church was therefore obliged to make severe laws to restrain them. The Council of Eliberis (can. 62) deposed the Bishop of Trier for making the sign of the Cross before a Christian consecrating a church, and a return to its practice was followed by expulsion from the Church. This was the rule in the Apostolical Constitutions (lib. viii, cap. 32), and the councils of Agde (can. 42), Vannes (Conc. Venet. can. 16), Orleans (Conc. Aurel. i, can. 30), and several others. A peculiar sort of soothsaying was the so-called divination of the last named, under the name of sortes sacre, divination by holy lots. It is also known as sortes Biblicae, Bible lots. The practice of the Romans in opening a book of Virgil and taking the first passage that appeared as an oracle was imitated by many superstitious Christians. These used the Bible to learn their fortune by "sacred lots," taking the first passage that presented itself to make their divination and conjecture upon. This was also called "The Lot of the Saints," and was practiced for gain by some of the French clergy; but it was decried by the Council of Agde that any who should be detected in the practice of this art, either as consulting or teaching others how to cast it out of the communion of the Church." The custom of using the Bible in this way still lingers in England, Scotland, and other countries, more, however, as sport for children. See Bingham, Antiquities of the Christian Church, bk. xvi, ch. v, § 2. See SUPERSTITION.

So'pater [Σωπατήρ, a mereł], a piece of bread dipped into sauce (Jas. xix., 3). See SAPERIUM.

Sop'he'reth ( Heb. id. פְּהֶרֶת:, writing: Sept. Σηφ′ρα, Σαφαρ, v. r. Ἀσφοράς, Άσφορας), one whose children were a family that returned from Babylon with Zerubbabel among the descendants of Solomon's servants (Ezra ii, 55; Neh. vii, 52). B.C. ante 536.

Sopherim is the title of a Talmudic treatise, which is generally found at the end of the ninth volume of the Babylonian Talmud, together with other treatises which belong to the post-Talmudic period. The whole consists of twenty-one chapters, and is divided into three parts, the first of which has given the title Sopherim to the whole treatise. For this first, comprising ch. i-v, contains directions for the copyist of the Holy Writings. With this part corresponds what we read in the treatise Sopher Towrah (edited by R. Kircheim, Frankfurt-on-the-Main, 1851), in the Septem Libri Talmudici Parvi Hierosolimitani. Part second, comprising ch. vi-x, contains the Masoretic part of the book, and treatises on the laws of the cantateuch which have the puncta extraordinaria, viz. Gen. xvi, 5; xviii, 9; xix, 33; xxxii, 4; xxxvii, 12; Num. iii, 39; ix. 10; xxii, 30; xxix, 15; Deut. xxix, 28; of the Keri and Kethib, the variations between Ps. xxviii and 2 Sam. xxii, between Isa. xxxvi sq. and 2 Kings xviii sq. The enumeration of the books, which are written, but not read, and of those portions which are not to be read publicly, leads us to the third part, which is subdivided into
two sections, viz. ch. x.-xvi, which treat of the laws for
the public reading in general, while ch. xvii.-xxi treat of the
holy days. From the contents we see the importance
of this treatise for the text of the Old Test. Its
redaction probably belongs to the 9th century; in
the 12th century it is cited by the school of Southern
France. This treatise has often been commented upon
—thus by A. L. Spira, who published the text with the
commentary Aderes
(ch. 1-4) (Dyrenfert,
1732), and by Jac. Naumburg, in his Mecab
(Leipa, 1784), under the title
Musecaet Sopherim, der palmaudische Tractus der Schreiber,
aEinleitung in die Studien der ahdäischen
Graphik, der Masora und der altjüdische Literatur.
This edition contains, besides the Hebrew text, expla-
inations in German, which are very valuable in spite
of the many mistakes which we often find in the writing
of proper nouns, as Kennikut for Kenciscott, etc. For a
review of Müller's edition, see Schürer, Theol. Lite-
raturzeitung, p. 626 sq.; Jüdisches Literaturblatt,
1878, p. 53 sq. and 61 sq. See TALMUD. (B.P.)

Sophia. This name occurs frequently in the cata-
logues of the libraries of the Church, but in no instance with historical authentication.
1. A Christian widow, living at Rome under Hadrian,
about A.D. 120, with her daughters Fides, Spes, and
Charitas. Accused before the prefect Antiochus, they
made joyous confession of their faith. The daughters
were condemned to be thrown into a pit filled with pitch
and sulphur, but as they remained unharmed in the fire, they
were taken out and beheaded. The mother was tem-
porarily released, and buried her children, but after
two days she, too, sealed her faith with her blood.
Her day is Sept. 30, o.r. according to other authorities.
Aug. 1: The legend is found in Simeon Metaphrasees
iv.; Mombr. tom. ii.; Acta SS. ad 30 Sept.).
2. A virgin martyred under Decius at Fermo, in
Piacenza, April 30, and buried in the church of that
town. The Fasti Westphalani, however, commemorate
a Sophia on the same day at Minden (Martyr. Rom.
[ed. Ferrarius]; in Catal. SS.; comp. Acta SS. ad
April 30).
and Greek (Menolog. Siriciam) lists as having been be-
headed at Milan, Sept. 18.
4. An Egyptian, whose daughters were named Diba,
Neporida, and Hadar, and was Flipa Hesemnion), and with
whom were associated a St. Varsenophia and her mother.
Their natality are assigned to June 4 (Acta SS.),
their time is uncertain.
5. Sophia Senatrice, a nun of Aenos, in Thrace, the
widow of a senator at Constantinople, who returned
to Thrace after the death of her six children in or-
ter to devote herself exclusively to works of Chris-
tian love. She died June 4, in the 10th or 11 century.
The Acta SS. ad h. d. furnish a brief description of
her life in Greek, taken from a Synaxarium Dievo-
mensis.

Sophists is a title given to the leading public
teachers in ancient Greece during the 5th and 4th cen-
turies B.C. The most noted of these were Gorgias,
Leontium and Protagoras of Abdera. The foundation
of their doctrine was laid in scepticism, absolute truth
being denied, and only relative truths being admitted
as existing for man. Gorgias attacked the existence of
the finite, but at the same time he maintained that
all notion of the infinite is unattainable by the human
understanding. He expressed his views in the
three principal propositions: (a) nothing exists; (b) if any-
thing existed, it would be unknowable; (c) if anything
existed and were knowable, the knowledge of it, could
nevertheless, not be communicated to others. The
Doctrine of Protagoras was that the phenomena both of ex-
ternal nature and of the processes of mind are so fluctu-
ating and engendering that they are altogether un-
attainable. He held that nothing at any time exists, but is
always in a state of becoming. Man, he declared, is the
measure of all things. Just as each thing appears to each
man, so it is for him. All truth is relative. The
existence of the gods, even, is uncertain. Thus this lead-
ing sophist succeeded in annihilating both existence
and knowledge. He founded virtue on a sense of shame
and a feeling of justice seated in the human constit-
ution. The sophists made use of their dialectic subtle-
ties as a source of amusement, as well as intellectual
exercise, to the youth of Greece. They were opposed by
Socrates (q. v.) and Plato, and Aristotle defines a sophist
as an imposturous pretender to knowledge—a man who
employs what he knows to be fallacy for the purpose
of deceit and of getting money." Mr. Grote contends that,
so far from this being true, the morality of the Athenian
public was greatly improved at the end of the 5th cen-
tury as compared with the beginning of the century.

Sophonias (Sophonias), a Greek (or rather Latin)
form (2 Esdr. i, 40) of the name of the prophet ZEPPHA-
NIAH (q. v.).

Sophonius. 1. A contemporary and friend of
Jerome in Palestine about the close of the 4th century.
He would seem to have been a Greek, who composed
original works, and also translated a portion of Jerome's
Latin version of the Scriptures into Greek. He is men-
tioned in the De Viris Illust. c. 134. See Cave, De
ed. Harl.), ix, 158; Schürck, Kirchengesch. ii, 132.
2. A monk of Damascus, who was termed a scholar
or sophist, and who became patriarch of Jerusalem in
A.D. 634. He opposed the endeavors of Cyrus, pa-
triarch of Alexandria, to secure the general acceptance
of Monothelitism. He though thoroughly temperly induced,
in a conference with Sergius, patriarch of Constantinop-
ple, and with Cyrus, to consent to the phrase ἐνακεραυνω
τον αύτου without insisting further on the consequences
therefrom in favor of a dual nature in Christ, he refused to
be intimidated after he became patriarch. In a cir-
cular letter addressed to Sergius and Honorius of Rome,
he gave a strong condemnation of the position of that
person, and demanded that no further concessions should
be made to Monotheleitism. The emperor Heraclius is-
ued his edict Ezechias (q. v.) in 638 with the design of
putting an end to the discussion; and as Jerusalem had
fallen into the possession of the Saracens two years earlier,
Cyrus changed his position and gave in to the considera-
tion of the support of his cause. The epistle en-
yclica referred to above is given in Haroudin, Acta Conc.
dii, 1258, 1315 (Conc. Ecumen. vi, 11 et Acta 12). The
work by Joannes Moschus, Pratum Spirituale (Ἀμφό-
τροπος Πυρομαχικης), is frequently cited under the name
of Sophonius. It was perhaps dedicated to Moschus, or
composed by Sophonius and Moschus together. Sev-
eral additional writings by Sophonius exist in MS, or
Waleh, Gesch. d. Ketzerwesen, ii, 14, 15, 115 sq.; Ne-
ander, Kirchengesch. iii, 248). The Menologium Grecorum
(Urnini, 1727) cites this Sophonius as a saint, and fixes
his day on March 11.
3. Possibly identical with No. 1, is mentioned
in Photius's Bibli. Cod. v as having written a Liber
pro Basilio adv. Eunomium. The name is also men-
tioned in lists of the patriarchs of Alexandria and
x, 158 sq.

Soz, in Persian mythology, is the personification
of a deadly drying and heat. He is an evil de\a, created by
Ahiram and opposed to the de\a of Ormuzd, for
the purpose of hindering the growth of plants, and thus
to cause famine and misery.
The Soranic academy loses its importance under the next president—

Hai'el, ben-Michael........................................... 906-914

It languished, but with any outward appearance.

The study of the Talmud had so diminished in this academy that there was no Talmudic authority of being invested with the gaonate, or presidency. In order not to give up this school entirely, the Talmudic academy was transformed into a religious seminary: the students were not further instructed in Hebrew, but engaged in Latin, Greek, and Arabic.

Joseph ben-Michael-Arama was elected........................................... 914-926

For want of a learned man, a weaver was elected as the next incumbent.

Joseph ben-Meir-Kim was elected........................................... 926-933

Under Saadia the Soranic high-school revived again.

A scholar willing to be ordained in the hands of those who called him to his position, was deposed in 930 through the jealousy of other scholars, and unceasing intrigue; and an anti-geon in the person of Joseph ben-Jacob-Satia was elected. 930-939

Saadia, however, retained his office in the presence of an anti-geon for nearly three years more (930-933), when he had to relinquish his dignity altogether. His opponent, Joseph ben-Jacob-Satia was now sole geon 938-957

but when deposed in 937.

Saadia ben-Joseph was again incumbent........................................... 937-942

When Saadia died, the deposed anti-geon was again set free. 942-948

But with Saadia's death the last sunset light of the Soranic academy had passed away; and the dilapidated state of that once so famous school obliged Joseph ben-Satia to relinquish Sora, and to emigrate to Basara, in 948. The school founded by Joseph ben-Satia after had flourished for less than seven centuries, was now closed. But the Soranic academy could not permanently submit to the downfall of the venerable academy, and used all its endeavors to continue the same. They sent four of their Talmudists outside of Babylonia to interest the Jewish congregations for this old alma mater. But these messengers never returned, nor did they succeed in the hands of a Spanish correir. Among these captives was Moses ben-Chanoch (q.v.), who was brought to Spain, where he proceeded far and wide, preaching the gospel on the pulpitum. In the meantime there was an...

interregnum at Sorâ from........................................... 948-1069

Samuel ben-Ushkab, the last geon of Sora, was elected to the presidency, to close up the list of presidents of that old school.

Soranus, in old Italian mythology, was a name of Pluto in use among the Sabines. Roman poets sometimes identified Soranus with the Greek Apollo (Virgil, Aenid, xi, 786).

Soracte, a mountain in ancient Italy which, according to Servius, was sacred to the infernal gods, especially to Dis Pater. It was a custom among the Hirpi (or Hirpinii) that at a festival held on Mount Soracte they walked with bare feet upon glowing coals of fire-wood, carrying about the entrails of victims which had been sacrificed. This ceremony is connected by Strabo with the worship of Feronia.

Sorbin, de Sainte-Foi, Arnaud, a French prelate, was born at Monteche-en-Quercy, July 14, 1537. From a child he possessed an insatiable thirst for knowledge. He studied philosophy and theology at the College of Histoire, where he became doctor of theology; and in 1557 he obtained the neighboring curacy of Sainte-Foi de Puyrolles. At the invitation of the archbishop of Auch he preached in the churches of Toulouse, Narbonne, Lyons, and Paris; and in 1567 became court preacher of Catherine de Medicis. He spent much time in public labors, controversies, and historical writings (a list of which is given in Hoefer, Nouv. Biog. Générale, s. v.), and died at Nevers, March 1, 1606.

Sorbon, Robert de, founder of the famous French institute of the Sorbonne (q.v.), was born at Sorbon, Oct. 9, 1201. From the position of an almoner student he became successively priest, doctor of theology, and canon of the Church of Carlay. His piety and sermons gained him the notice of Louis IX, who made him his
chaplain and confessor. For the aid of poor students he formed a society of secular ecclesiastics, who lived in common, and gave gratuitous instruction. Out of this, under royal and papal patronage, eventually grew the school of theology known by his name. He died at Paris, Aug. 15, 1274, leaving all his property to the institution. The Sorbonne formed one part only of the faculty of theology in the University of Paris; but its name became famous that it was often given to the whole, and graduates were proud to name themselves of the Sorbonne rather than the university. See Hoefer, Nouv. Biog. Générale, s. v.

Sorbonne, The, of Paris, originally a seminary for indigent young men preparing for the secular priesthood. It is not a college of theology, whose influence over theological thought was widely recognised. This body of scholars has frequently, but erroneously, been identified with the theological faculty of the University of Paris, and also with the university itself.

The University of Paris may trace its origin to the time of Alcuin, inasmuch as an uninterrupted current of teaching extends from that period until the present. But there was then no organization of faculties. William of Champeaux and Abelard taught philosophy and theology, and especially dialectics, at the beginning of the 12th century, but in any place where opportunity was found, in the schools, or in the churches, the teaching of a knowledge of the University of Paris was founded, and it was fully organized, being divided into three faculties, etc., when the Sorbonne was opened. The founder of this college, the canon Robert of Sorbon or Sorbonne, in Champagne, was chaplain to Louis IX. His purpose was to assist poor young men in securing a theological education by affording them free tuition and training for the service of the Church. He obtained a site with a few buildings from the crown-domains in the street Coupe-gorge, and there built his school. The proper spiritual authorities granted the necessary license for the institution of a Collège universelum novitatorum studentium in theologias faculata, and pope Clement confirmed it in A.D. 1268. The school began with sixteen students, four taken from each of the four parts into which the university was divided; but its fame grew so rapidly that in a brief time over four hundred pupils thronged its halls. Eminent men were called to occupy its theology chairs, from Honoré and Pierre Vauvenargues, Jean de Beaufremont, and Laurent L'Anglois; and finally a preparatory school was added, called Collège de Calvi, and more generally known as the Little Sorbonne, designed for five hundred boys.

The principal source of the reputation in which the school was held was the excellence of the instruction it afforded and its devoted attendance to the study of the Catholic doctrine. This was maintained throughout by all the professors, and was the result of many years' application and study. The Sorbonne, the teaching of which was in the hands of the schoolmen, was divided into two classes, the fellows and the guests, the latter being affiliated, but not incorporated, with the house. The privilege of such residence was eagerly sought after. It appears, however, that doctors of theology connected with other colleges were also called docteurs en Sorbonne, perhaps because the theological faculty was accustomed to hold its regular meetings in the halls of the Sorbonne, and that they were often given to the whole, as much as they had there acquired their title by defending a thesis. If to all this be added the fact that the theological professors of several colleges were invariably taken from the Sorbonne, it will be easy to understand how the mistake of identifying the Sorbonne with the theological faculty arose.

The Sorbonne has during its career pursued two leading tendencies—that of reconciling theology with philosophy, and that of preserving theology in orthodox purity and unquestioned supremacy. Philosophical and philosophical studies were taught in its halls; but its spirit and importance, as well as its fame, were sought in its theological effectiveness alone. The apparatus of learning was at first too meagre to admit of noticeable results. Down to the 14th century the study of Latin constituted the whole of philosophy. Philosophy stimulated theological inquiry, but theology could lay no claim to a scientific character. It had no exegesis, and was not based on any previous systematizations. The students lacked books, the teachers acquaintance with the most necessary languages. But under the circumstances, and according to its opportunity, the Sorbonne watched over the orthodoxy of theology according to the councils and the fathers, though such supervision belonged to the diocese. Its influence was, however, exercised indirectly over the theological faculty, the university, and even the conseil du roi. The Sorbonne as an association did not appear publicly in defence of doctrine, or send representatives to Church councils, or take part in political meetings. Statements made to that effect must be understood as referring to the university or the theological faculty rather than the Sorbonne; though the fact that all the principal doctors belonged to the Sorbonne assured her practical participation in all important affairs. More than once it opposed the collection of Peter's pence and the Inquisition.

In April, 1541, it condemned several tenets taken from the works of Amboise-D'Avranches. Among these was that of the 16th century it laid under the ban of its censures a long list of writings by different authors, some of them even the works of eminent bishops, and one of them the Catholic version of the Bible by René Benoît.

It is to be noted that in all this the Sorbonne was not a blind attachment of the Church. It accepted all the Protestant aspirations, but also against all Jesuital assumptions. It was the earliest defender of the Gallican liberties and of the accepted doctrines of the Church. When the cardinal of Lorraine had procured from Henry II the right to build a Jesuits' college in Paris, the Sorbonne declared the Order of Jesus dangerous to the faith, the peace of the Church, and the monastic discipline. When Martin Bécan published his Controversia Anglicana de Potestate Regis et Pontificis (1612), and queen Marie de Medici forbade the intervention of the Sorbonne, the latter, nevertheless, denounced the book as dangerous to morality, etc. It defended the purity of the Roman Church against every foreign and heretical heresy. Of 128 doctors, only forty-nine were ready to accept the bull Unigenitus without protest, though the absolute king Louis XIV favored it, and many declared themselves directly opposed to its reception.

The Sorbonne, i.e., the theological faculty, considered itself the guardian of the pure faith and the scientific organ of the Church down to the beginning of the 18th century. In 1717 it put forth an effort, on the occasion of the presence of Peter the Great in Paris, to bring about the union of the Greek and Roman churches. It was at the time the highest authority in the Gallican
Sorcerer, Sorcery (usually some form of ḫakshāq, to murther incantations). See Divination.

Sorcery in Christian Countries. In early times those who gave themselves to magic and sorcery were usually termed magicians, and dealt in the arts of either by poison or by means of fascination they wrought pernicious effects upon others. The laws of the Theodosian Code (lib. ix. tit. 16, De Mefetia) frequently brand them with this name of maleficè. Constantius (Cod. Theod. leg. 5) charges them with disturbing the elements or raising up and sending forth abominable arts in the evocation of the devil, to assist men in destroying their enemies. These he therefore orders to be executed, as unnatural monsters, and quite divested of the principles of humanity. They were also excepted at the granting of indulgence to criminals at the Easter festivals, as guilty of too heinous a crime to be comprised within the general pardon granted to other offenders. The Council of Laodicea (can. 36) condemns them under the name of magicians and enchanters, and orders their expulsion from the Church.—Bingham, Christ. Antiq. bks. xvi, ch. v, § 5.

The early Christians were derided as sorcerers in accordance with the impious charge brought by Cel-sus and others against our Lord, that he practiced magick, which they supposed him to have studied in Egypt. Augustine (De Consens. Evang., i 9) says that it was generally believed among the heathens that our Saviour wrote with his own hand magical arts, which he delivered to Peter and Paul for the use of the disciples.

Bo'erek (Heb. Sorek, בּוֹרֶק, red; Sept. Soophé [in some copies compounded with a part of the preceding word]), the name of a valley (םיר), wady, in which lay the residence of Deliah (Judg. xvi. 4). It appears to have been a Philistine place, and possibly was nearer Gaza than any other of the chief Philistine cities, since thither Samson was taken after his capture at Deliah's house. Beyond this there are no indications of its position, nor is it mentioned again in the Bible. Eusebius and Jerome (Onomast. Soophex) state that a village named Çaphorsorek was shown in their day "on the north of Eleutheropolis and the town of Sar (or Sarea), i. e. Zorah, the native place of Samson." Zorah is now supposed to have been fully ten miles north of Beit-jibrin, the modern representative of Eleutheropolis, though it is not impossible that there may have been a second further south. Van de Velde (Memoir, p. 539) says that in 1700, when he was on the spot, there was a village named Zorah, or Zorah-jibrin to Askulthan; but this he admits to be more conjectural. On the south side of the ridge on which the city of Zorah stood, and between it and Bethshemesh, runs a wide and fertile valley, whose shelving sides of white limestone are admirably adapted for the cultivation of the vine. It winds away across the plain, passing the sites of Ekron and Jabneel. This may possibly be the valley of Sorek. Its modern name, Wady as-Sūdār, bears some remote resemblance, at least in sound, to the Biblical Sorek (Porter, Handbook, p. 292).

"The view up this valley eastward is picturesque. The valley is well watered. The river, which in the middle runs the white shingly bed of the winter torrent. Low white hills flank it on either side, and the high rugged chain of the mountains of Judah forms a pretty background" (Conder, Tent Work in Palestine, ii. 170).

The word Sorek in Hebrew signifies a peculiar choice kind of vine, which is said to have derived its name from the dusky color of its grapes, that perhaps being the meaning of the root (Gesenius, Thesaur., p. 1342). It occurs in three passages of the Old Test. (Isa. v. 2; Jer. ii. 21, and, with a modification, in Gen. xiii. 13). It is further said to be the vessel for a certain purple grape, grown in Syria, and highly esteemed, which is noted for its small raisins and minute soft pips, and produces a red wine. This being the
case, the valley of Sorek may have derived its name from the growth of such vines, though it is hardly safe to affirm the fact in the unquestioning manner in which Gesenius (ibid.) does. Ascalon was celebrated among the ancients for its wine; and, though not in the neighborhood of Zoram, was the natural port by which any of the productions that district would be exported to the west. See VINE.

Sorōs (sisters). See AGAPETE.

SÓRÕS ECLLESE (sisters of the Church), a name given in early times to nun.

Sororia, in Roman mythology, was a surname of Juno. The sole survivor of the famous contest of the Horatii and the Curatii is said to have erected an altar to the goddess, under this name, after he had been purified of the murder of his sister (Livy, i, 20).

Sorrow (representing in the A. V. many Hebrew and several Greek words), mental pain or grief, arising from the privation of some good we actually possessed. It is the opposite to joy. This passion contracts the heart, sinks the spirit, and injures the health. Scripture cautions against it (Prov. xxxv, 20; Eccles. xiv, 1-3; xxx, 24, 25; I Thess. iv, 13, etc.), but Paul distinguishes two sorts of sorrow—one a godly, the other a worldly sorrow (2 Cor. vii, 10): "Godly sorrow worketh repentance unto salvation, not to be condemned, but the sorrow of the world worketh death." So the wise man (Eccles. vii, 8) says that the grave and serious air of a master who reproves is more profitable than the laughter and caresness of those who flatter. Our Lord upbraided that counterfeit air of sorrow and mortification which the Pharisees affected when they fasted, and cautioned his disciples against all such affection which proposes to gain the approbation of men (Matt. vi, 16).—Calmet. See Grief. Though sorrow may be allowable under a sense of sin, and when involved in troubles, yet we must beware of an extreme. Sorrow, indeed, becomes sinful and excessive when it leads us to slight our mercies, causes us to be insensible to public evils; when it diverts us from duty, so oppresses our bodies as to endanger our lives, sour the spirit with discontent, and makes us inattentive to the precepts of God's Word and to the advice of our friends. In order to moderate our sorrows, we should consider that we are under the direction of a wise and merciful Being: that he permits no evil to come upon us without a gracious design: that he can make our troubles sources of spiritual advantage; that he might have afflicted us in a far greater degree; that though he has taken some, yet he has left many other comforts; that he has given many promises of relief; that he has supplied us with great troubles as ours: finally, that the time is coming when he will wipe away all tears, and give to them that love him a crown of glory that faileth not away.—Buck. See Resignation.

Sortes Biblicæ. See Sootisathing.

Sortes Sacrae (holy lots), a species of divination which existed among some of the ancient Christians. See Soothsaying.

Sortilio, a name for those among the ancient heathen who forecasted future events by the sortes, or lots.

Sosano Vono Mikoto, in Japanese mythology, is the moon-god, who beget of the sun-goddess, Inadahime, eight children, generally symbolized under the figure of an eight-headed dragon. Temples were erected to these two deities in the sacred garden of Miako, and in them a number of festivals are held each year in their honor.

Sosaníus, in Greek mythology, is a surname of Apollo, Seleucia, or, according to some, of Rome, where the name was derived from the statue of that god which the quвестor C. Sosian brought from Seleucia (Cicero, Ad Att. viii, 6; Pliny, H. N. xiii, 5; xxxvi, 4).

Sosp'ater (Σωσπάτερ, suuer of his father, a common Greek name), the name of two men in the Apocalypse and New Test.

1. A general of Judas Maccabeus who, in conjunction with Dositheus, defeated Timotheus and took him prisoner (2 Macc. xii, 10-24). L. C. cir. 164.

2. A. A fellow of Aristobulus, mentioned as being with him in the salutations at the end of the Epistle to the Romans (xvi, 21). A.D. 54. He is probably the same person as Sopater (q. v.) of Berea (Acts xx, 4).

Sospóllus, in Grecian mythology, was a patron-god of the State, venerated among the Eleans. His worship originated, as it is said, at a time when the Arcadians were driven from their City. A woman appeared among the Eleans, and related that in a dream the child at her breast had been pointed out to her as the savior of the State. The leaders thereupon placed the child naked before their ranks, and when the battle began it was metamorphosed into a serpent, which frightened the Arcadians and won that "the crowd" (ἐκ τοῦ σωσθῆναι τοὺς ἄνθρωπος) disappeared, and on the spot where it was last seen a temple was erected to the child and his mother, Eileithyia (Pausan. vi, 20, 2; iii, 25, 4). See Smith, Dict. of Biog. and Mythol. s. v.; Vollmer, Wörterb. d. Mythol. s. v.

Sospita, in Roman mythology, was a surname of Juno, especially at Lanuvium.

Sosthenses (Σωσθήνης, perhaps for Σωστήνης, suuer of his nation; a not infrequent Greek name) was a Jew and one who was seized and arrested in the presence of Gallio, on the refusal of the latter to entertain the charge of heresy which the Jews alleged against the apostle Paul (see Acts xvii, 12-17). A.D. 49. His precise connection with that affair is left in some doubt. Some have thought that he was a Christian, and was maltreated thus by his own countrymen as was known as a special friend of Paul. But it is improbable, if Sosthenes was a believer, that Luke would mention him merely as "the ruler of the synagogue" (διευθύνων του συναγωγοῦ), without any allusion to his change of faith. A better view is that Sosthenes was one of the bigoted Jews who, with "the crowd" (εχθρῶν τῆς τοῦ κόσμου), and not πάντως τοῦ Ἐλληνίου, the true reading were Greeks who, taking advantage of the indifference of Gallio, and ever ready to show their contempt of the Jews, turned their indignation against Sosthenes. In this case he must have been the successor of Crispus (ver. 8), the ruler of the synagogue (possibly a colleague with him, in the looser sense of διευθύνων, as in Mark v, 22), or, as Biscoe conjectures, may have belonged to some other synagogue at Corinth. Chrysostom's notion that Crispus and Sosthenes were names of the same person is arbitrary and unsupported.

Paul wrote the First Epistle to the Corinthians jointly in his own name and that of a certain Sosthenes whom he terms "the brother" (1 Cor. i, 1). A.D. 54. The mode of designation implies that he was well known to the Corinthians; and some have held that he was identical with the Sosthenes mentioned in the Acts. If this be so, he must have been converted at a later period (Wetstein, N. T. ii, 500), and have been at Ephesus, and not at Corinth, when Paul wrote to the Corinthians. The name was a common one, and but little stress can be laid on that coincidence. Eusebius says (H. E. i, 1, 2) that this Sosthenes (1 Cor. i, 1) was one of the seventy disciples, and a later tradition adds that he became bishop of the Church at Colophon, in Ionia.

Sotócrat (Σωτόκρατος, probably a contraction for Σωστόκρατος, a common Greek name), a commander of the Syrian garrison in the Acre at Jerusalem (ος σωτόκρατος Ἰασώρ) in the reign of Antiochus Epiphanes (2 Macc. iv, 27, 29). B.C. cir. 172.

Sotah. See Talmud.

So'tai (Heb. Sotay, 'ψωταί, my turners, or change-
SOTAMTAMBU 888  

SOTO

divine maintained that holiness of heart is necessary to the person's children were a family of the descendants of Solomon's servants that returned with Ezra ii, 55; Neh. vii, 37. B.C. ante 586.

Sotamtambu, in Lamaism, is a region in hill where the damned are tormented with unbearable cold.

Boteira (the saving goddess) was a surname in Gre- cian mythology of Diana at Pegase in Megara, at Tre- zene, at Bose in Aegina, and near Felleni; of Proser- pina in Acrasia and Arcadia; and of Minerva and Esa- nomus.

Soter (Σωτήρ, Savior), in Grecian mythology, was a surname of Jupiter, and also of Bacchus and Helios (Pausan. ii, 20, 5; 31, 4; iii, 23, 6; iv, 31, 5; viii, 9, 1; 30, 5; 31, 4; Aristoph. Ran. 1435; Pliny, H. N. xxxiv, 8; Plutarch, Aratus, 53; Lycoth. 206). It was a title likewise assumed by some of the Ptolemies and Syrian kings.

Soter, pope from A.D. 168 to 176 or 177, is said to have been a native of Campania, and to have written against the Montanists, his work eliciting a reply from Tertullian. A letter to the Corinthians, now lost, but used for reading in the Sunday worship of the Church, is also attributed to him. Decretals said to have been issued by him are not genuine. Some authorities re- port that he died a martyr's death.

Soteriology (Gr. σωτηρίας λόγος, doctrine of salvation) treats of the work of Christ as man's Re- deemer, and its logical study requires that we should consecutively look at the deeds Christ has wrought for the salvation of the world, and at their application, through faith, to individuals. The former is called Objective Soteriology, the latter Subjective Soteriology.

a. Objective.—Under this head are included the incarnation of Christ, his holy life, obedience unto death, the intermediate state, resurrection, exaltation to heaven, Christ's coming again, his office as the Judge of the living and the dead, and the work of the Holy Ghost—all of these entering into the work of atonement.

b. Subjective.—Under this head are discussed the sever- al steps which constitute the way of salvation—the demands upon the sinner, and how he is enabled to satisfy these demands. These are, desire for salvation, saving faith, true repentance, good works, Christian sanctifi- cation, the work of grace (necessity, extent, character, result).

Soteriology received little theoretical investigation in the ancient Church compared with that bestowed upon the Trinity and original sin. The chief defect in the patristic soteriology is that the distinction between justification and sanctification was not always so care- fully drawn as to preserve the doctrine of atonement in its integrity. The holiness of the Christian is sometimes represented as co-operating with the death of Christ in constituting the ground of the remission of sin.

The papal statements during the Middle Ages were too influential to allow of an improvement in soteriology, and the Church was holding a theory of salvation wholly opposed to that which prevailed in the fourth century. Anselm interrupted this dogmatic decline, and set the Church once more upon the true path of investigation. The leading features of his theory are: 1. Sin is an of- fense against the divine honor. 2. This offense cannot be waived, but must be satisfied for. 3. Man cannot make this satisfaction except by personal endless suffering. 4. God must, therefore, make it for him, if he be willing to make the idea manifest in the incarna- tion and atonement of the Son of God. The soteriol- ogy of Anselm exerted but little influence upon Roman Catholic Christendom, but Luther's assertion of justifi- cation by faith alone caused soteriology to become the centre of dogmatic controversy between Protestant and Papist. The principal point of dispute between the Council of Trent and the Protestant theologians related to the appropriate place of sanctification. The Roman

Sotho, the name given by the Egyptians to the dog-star, or Sirius. Their year began with the rising of this star, and the coincidence of the latter phenomenon with the new moon marked the great sidereal or solar year, before the Gregorian calendar. Sirius, in Egyptian mythology, a designation of Isis, and the star Sirius was accordingly sacred to that divinity.

Soto, Francisco Domingo de, a monk and theologian, was born of poor parents, in A.D. 1494, at Segovia. He began life as a sacristan at Orchando, and after a severe struggle with difficulties growing out of his indigent condition, he entered the University of Alcala, where he was the pupil of Thomas de Villanueva, and afterwards the University of Paris. In 1520 he be- came teacher of philosophy at Alcala, and took ground as a victorious opponent of the nominalism then prev- alent in the university. He wrote a Comment. in Aristotela Dialectica (Salaman. 1544, and often)—Categorica (Venet. 1538)—De VITIS Physicorum (Salaman. 1545)—and Sobre la Redemption, etc. (1575). He was elected prior, and finally became a monk, and entered first at Montferrat, but finally became a Dominican at Burgos in 1524. At Burgos he taught philosophy and theology until 1582, when he removed to Salamanca, and was associated with John Victoria and Melchior Canus in the promul- gation of scholastic theology. In 1545 he was appoint- ed by Charles V to participate in the Council of Trent, and at once took prominent rank. In the first four ses- sions he represented his order, and in the fifth and sixth filled the place of the new general of the Dominicans, Fr. Romero. He also contributed much towards the set- tling of the points discussed by the two previous sessions. He was spokesman of the Thomist school, and met with de- termined opposition from the Scotist Ambrosius Catha- rinus; their disputes dealing with the doctrines of original sin, the condition of the human will after the fall, justification, grace and predestination, the works of unbelievers, and similar matters. These controver- sies gave occasion for his works De Natura et Gratia Lib. III; etc. (Venet. 1547; Antwerp, 1556):—An apologia, qua Episcopo Minoriorum de Certitudine Gratiae respondent D. S. (Venet. 1547):—Discept. F. Ambri. Catharini Episc. Minor, ad Dom. de Soto, Ord. Preed. super Quinquaginta Articulis Liber (Rom. 1556). On the removal of the council to Bologna, Soto returned to the court of Charles V. He became confessor to the emperor and archbishop of Segovia in 1549, but renounced both dignities, and went back to the monastery of Salamanca, where he became prior in 1558. At this time he wrote, against the Protestant theses, Ad Romanos (Antwerp, 1559; Salamanca, 1561). After two years' service as prior, he resumed a professorship in the University of Salamanca, and wrote De Ratione Telegendi et Detegendi Secretum Relatio Theologica (Salamanca 1552):—Annot. in J. Feri Francisc. Mogunt. Comment. super Evangel. Johan- nis (Salamanca, 1557). Four years after resuming the professor's seat, he returned to the convent of San Jerónimo, prior, and died Nov. 15, 1569. In addition to a num-
SOTO 889
SOUL

ber of minor works, he composed, besides those already given, De Justitia et Jure Libri VII, etc. (Salamanca, 1556.) — Sententiarum Comment. s. de Sacramentis (1557 and 1560): — A Commentary on the Gospel according to St. Matthew, not printed: — A treatise De Ratione Promulgandi Evangelium, etc. See Antonio [Nicola], Biblioth. Hispanica, etc. (Rom. 1672), l. 253.—258.

Soto, Pedro de, a Dominican theologian and bitter foe of German Protestantism, was born of aristocratic parentage, at Cordova, and in 1519 became a monk. He gradually obtained the reputation of great learning, particularly in scholastic theology, where he took ground as a staunch Thomist. Charles V appointed him privy-councillor and father-confessor, and his order appointed him vicar of the province of Low Germany. In this capacity he accompanied the emperor to Germany, but there exchanged the emperor's service for that of the seminary at Dillingen, where he became a teacher of theology, and began his literary activity by writing his Romish Institutiones Christianae (Aug. Vind. 1548, and afterwards) — Method, Confessiones s. Doctr. Pietatisque Christ. Epitome (Antwerp, 1556) — Tractat. de Instituto Sacerdotum, etc. (Dill. 1558), a sort of pastoral theology. The Absertio Catholico Fidei, etc., involved him in a controversy with Brentius (q. v.), which called forth the further work Defensio Cathol. Confessiones, etc. (Antwerp, 1557). He came into conflict with the famous Pole, Melchior Canov (q. v.). Dillingen. After a time he accompanied Philip II to England, and was employed by queen Mary to restore Romanism and teach theology in the University of Oxford. In 1568, on Mary's death, he returned to Dillingen, and in 1561 accepted the canonicate of Piuss Freuden, in order to participate in the reopened council. Soto died April 20, 1568. See Biblioth. Hist., etc. (Rom. 1672), ii, 193 sq.

Southwell (properly Southwelle, Lat. Sotowelles), Nathaniel, an English Jesuit of the 17th century, is entitled to notice as one of the historians of his order; but particulars of his life are wanting. Being employed to write the lives of eminent authors among the Jesuits he carried on the plan of Ribadeneyra and Alejambra down to his own times. His improved edition was published under the title of Bibliotheca Scriptorium Societatis Jesu, Opus incognitum a R. P. Petro Ribadeneyra, et productum ad annum 1699, etc., a Nathanaelo Sotowellio (Rome, 1676, fol.).

Souchal (or Souchay), Jean Bapriste, a French ecclesiastical historian, was born at Saint-Arnoul near Vendôme, in 1688, and was educated by his uncle. Removing to Paris, he gained the applause and esteem of all the learned, and in 1782 was elected a member of the Academy of Inscriptions. He was also made canon of Rodez, counsellor to the king, and reader and professor of eloquence to the College Royal. He died at Paris, Aug. 25, 1746. He wrote, Taras et Elida (1720) — Au sone, Latin text (1730, 4to) — Astrée, par d'Urjé (1733) — [Error Diverses de Pellisson (1755, 3 vols. 8vo): — [Error de Hoelle (1735, 1745, 12mo; 1740, 2 vols. fol. and 4to) — Avec des Éclaircissements Historiques, Josephé, trad. par Arnould d'Audilly (1744, 6 vols. 12mo); — translation into French, L'Écuyer sur les Erreurs Populaires de Th. Brown (Paris, 1738) — six Dissertations. See Chalmers, Biog. Dict. s. v.; Hoefer, Now., Biog. Générale, s. v.

Souchon, Adolf Friedrich, a German theologian, was born at Magdeburg, Aug. 10, 1807. He studied theology at Berlin, and in 1830 he entered upon his first ministerial duties in Strassburg in the Eckemarck. In 1854 he was called to Berlin, first as pastor of the French Church in the French quarter, and then (1852) of the Trinity Church, where Schleiermacher and Krummacher preached before him. Soon after 1854 he was also made a member of consistory. Early in 1878 he was obliged to retire from the ministry on account of bodily infirmities, and died at Miroev, in Mecklenburg-Strelitz, Aug. 27, 1878. Souchon was one of the most prominent ministers of Berlin, and enriched the homiletical literature by his collections of sermons on the gospels and epistles of the Christian year, his sermons on the passion of Christ, and other sermons. See Zuchold, Biblioth. Theologica, ii, 1241 sq. (B. P.)

Souchon, François, a French painter, was born at Alais, Nov. 19, 1785, and was early sent by his parents, who were simple artisans, to Paris, in order to improve his talents under the tuition of David, and afterwards of Gros. He soon began to paint sacred subjects for a livelihood, and in 1823 accompanied his friend Sigalon to Rome, where he aided Michael Angelo on his cartoons. In 1838 he was made professor in the school of design at Lille, but retired in 1858, and died April 5, 1857. His works are of moderate merit. See Hoefer, Now., Biog. Générale, s. v.

Soubriot, Jacques Germain, a French architect, was born at Trenzi, near Aixerre, in 1713 (or 1714). His father desired him to study law, but he evinced so strong a taste for architecture that he was allowed to choose that profession. Travelling in Italy to pursue his studies, his assistant died and took the responsibility of the Duke of St. Aignan, ambassador of France to the Holy See, who secured him favors. Returning to France, he was engaged by the magistrates of Lyons as architect, and built the Hôtel-Dieu, Exchange, Concert-room, and Theatre. He was shortly after appointed comptroller of the bourse of April 13, 1746. Tulliucrodes was the recipient of many other honors. The commission to rebuild the Church of St. Geneviève was given him, and the foundation was laid in 1756. In the following year he received the Order of St. Michel, and was nominated commissioner and general superintendent of the public buildings. Envy endeavored to destroy the success of Soufflot, and so vexed him that he was hastened, before the completion of the Church of St. Geneviève, to his death, Aug. 29 (30), 1780. See Hoefer, Now., Biog. Générale, s. v.; Cresy, Lives of Architects, s. v.

Soul (prop. גלה, ψυχα, the rational spirit; but occasionally גרה, ψυχα, the animal principle of life), that vital, immaterial, active substance, or principle, in man whereby he perceives, remembers, reasons, and wills. The rational soul is simple, unaccompanied, and immaterial, not consisting of matter and substance, never think and move of itself as the soul does. In the fourth volume of the Memoirs of the Literary and Philosophical Society of Manchester the reader will find a very valuable paper by Dr. Ferrer, proving, by evidence apparently complete, that every part of the brain has been injured without affecting the act of thought. It will be difficult for any one to believe that the brain is not the house in which the soul resides; but no one can be convinced that the modern theory of the Materialists is shaken from its very foundation. See Materialism.

The soul is rather to be described as to its operation than to be defined as to its essence. Various, indeed, have been the opinions of philosophers concerning its substance. In the second book of his treatise Ψυχα, Aristotle has given two definitions of it. In the first of these he calls it "the Entelechy (Εντελεχεία), or first form of an organized body which has potential life." The Epicureans thought it a subtle air, composed of atoms, or primitive corpuscles. The Stoics maintained it was a flame, or portion of heavenly light. The Cartesian thinkers make thinking the essence of the soul. Critias, a Sophist, regarded the blood as the seat and substratum of the soul. According to Plato, "The first or invisible element of the soul in man is the instrument of rational cognition, the other element is the organ of perception and representation. With this soul, having its seat in the brain, and being the vessel of the sensible and appetitive souls, the whole resembling the composite force of a driver and two steeds." Aristotle distinguished several forms of soul, viz. the rational, which is purely spiritual, and infused by the immediate inspiration of God; the appetitive, which was the source of desire and will—the
motice of locomotion; the senses, which, being common to man and brutes, is supposed to be formed of the element, and is the cause of sensation and feeling; and, lastly, the vegetative soul, or principle of growth and nutrition, as the first is of understanding, and the second of animal life.

Modern philosophy has made many attempts to define the soul; and in what way we give the following résumé: "It is not I that thinks, but I thinks in me; and it is not I that am, but it is something in me" (Beggesen, Zeit.-

Schr., von Fichte, xxxiv, 158). "Spirit is a substance, immediately immanent in thinking, or of which thinking is immediately the form of activity. Spirit is thinking substance, the substance which dynamically present in the entire organism" (Chalybaï, ibid. xx, 69). "We are compelled to suppose that there must be a real essence as the substantial bearer of all psychical conditions. This essence is the soul. It must stand with other real essences in causal relation, in order to the generation in it of manifold internal conditions. In brief, the soul needs the body, the body needs the soul" (Cornelius, Zeit. für exacte Philosophie, iv, 99-102). "In the organism formed of atoms, which are spiritual essences, one unfolds its spiritual force to the point of self-consciousness; this atom, which as gasform atom intermediate between physical substance and soul as the centre, is the soul" (Drosbach, Zur Kenntnis der Ergebnisse d. Naturforschung, p. 101-129, 229). "The phenomena of body and soul hang together as internal and external phenomena of the same essence. This primary essence is, however, nothing more than the conjunction of phenomena themselves in the unity of the general consciousness. The soul becomes aware only of its own proper phenomena, the body becomes aware only through that which appears of it to the soul itself. It is a common essence which appears externally as body, internally as soul" (Fechner, Physical und philosoph. Atomelehre, 2nd ed. p. 258, 259). "The soul is no more than the internal and conscious activity of the body; the consciousness as such of the body and the soul which is now apprehended itself as sentient or perceptive, now as thinking forth effort, willing, etc., knows itself at the same time as one and the same, the same abiding self. It is but an expression of this consciousness of unity when we speak of our own soul, and impute to it this or that predicate; that is, when we distinguish our own soul, with its manifold characteristics, from ourselves, and in this act implicitly contrast ourselves as unity with the mutation and manifoldness of our intellectual life" (Ulrich, Glauben und Wissen, p. 64-66; Zeit. für Fichte, xxxvii, 312; Gott u. die Natur, p. 414-417).

Modern philosophers in Germany thus make a distinction between the mind (Selbstbewusstsein, Griech., or spirit and soul; but they reverse the relative significance of these terms. Prof. G. H. Schubert says that the soul is the inferior part of our intellectual nature, while the spirit is that part of our nature which tends to the purely rational, the lofty and divine. The doctrine of the natural and the spiritual (q. v.) man, which we find in the writings of Paul, may, it has been thought, have formed the basis upon which this mental dualism has been founded. The plainest and most common distinction taken in the use of the words soul and mind is, that in speaking of the mind of man we refer more to the various powers which it contains in and the spirit of man we refer to the nature and destiny of the human being. The following distinguishing features of spirit, mind, and soul have been given: "The first denotes the animating faculty, the breath of intelligence, the inspiring principle, the spring of energy, and the expression of exertion; the second is the recording power, the preserver of impressions, the storer of deductions, the nurse of knowledge, and the parent of thought; the last is the disembodied, ethereal, self-conscious being, concentrating in itself all the purest and most refined of human excellences, every generous affection, every benevolent disposition, every intellectual attainement, every moral virtue, and every exalted aspiration" (The Purpose of Existence [1850, 12mo], p. 79). Ψυχή, spirit, when considered separately, signifies the principle of life; νοῦς, mind, the principle of intelligence. According to Plutarch, spirit is the cause and beginning of motion, and a mind of other men with respect to motion, together they signify an intelligent soul. Thus we may say the "immortality of the soul," and the powers of the mind (Fleming, Vocabulary of Science, q. v.). See MIND.

In the Holy Scriptures three science (q. v.) are recognized (especially 1 Thess. v, 23) as essential components of man—the soul (ψυχή, or νοῦς) the spirit (ανεξάρτητος, or θεών), and
and the body (μαρμαρίτις) but these are not accurately, much less scientifically, defined. The first and the last of these elements are essentially opposed to the material or physical and the immortal or spiritual parts of man's nature, i.e. the soul and the body, as ordinarily defined by modern philosophers and scientists; but the middle term, the “spirit,” is hard to be distinguished. Yet in all earthly creatures, even in the lowest forms of animals, there is a principle, however indeed in the body, and yet distinct from the rational faculty of man or the instinctive intelligence of brutes. This is usually styled “the animate principle,” or briefly life. It is this which moulds the whole physical organism, and for this end controls, and to a large degree overrules, mere chemical and inorganic laws, producing combinations which are called univitalized substance. This power or essence—for it has not yet been determined whether it be distinct from or a mere result of the combination of soul and body—has hitherto eluded the analysis of scientific and philosophical research, and it will probably remain an inscrutable secret; but it is a sufficiently separate element of human and animal nature to warrant the distinctive use of a special term for it by the Biblical writers (which is carefully observed by them in the original, although frequently obscured in the English version). Thus spirit (πνεῦμα, πνευμάτικον) is never applied to God or to angelic beings, who are incorporeal; nor, on the other hand, is soul (ψυχή, πνεύματα) ever used of beasts (except in Eccles. iii, 19, 21) where it is evidently employed out of its proper sense for the sake of uniformity. Yet life (ζωή) is ascribed equally to all these classes of existence, although those only who have bodies are endowed with the organic locomotive principle (Gen. i, 20; ii, 7). See Psychology.

On the general subject, see Baxter, On the Soul; Drew, Immortality and Immortality of the Soul; Dodridge, Lectures, p. 92-97; Flavel, On the Soul; Locke, On the Understanding; Moore, Immortality of the Soul; Usher, Hist. of Philosophy. See Spirit.

SOUL. IMMORTALITY OF. See IMMORTALITY.

SOUL. ORIGIN OF. Respecting the manner of the propagation of the soul among the posterity of Adam, the sacred writers say nothing. The text (Eccles. xii, 7) gives us, indeed, clearly to understand that the soul comes from God in a different manner from the body, but what this manner is it does not inform us. The texts (Isa. xlii, 6; Job xlii, 10) which are frequently cited to prove that we have two souls, we have two souls, human breath and life, and do not relate to this subject. Nor can anything respecting the manner of the propagation of the soul be determined from the appellation Father of spirits, which was commonly given to God among the Jews, and which occurs in Heb. xii, 9 (see Wettstein, ad loc.). This appellation implies nothing more than that man is the father of an offspring of the same nature with himself, so God, who is a Spirit, produces spirits. It is doubtless founded upon the description of God (Numb. xvi, 22) as “the God of the spirits of all flesh.” The whole inquiry, therefore, with regard to the origin of human souls, would be properly philosophical and scriptural authority can be adduced neither for nor against any theory which we may choose to adopt. But notwithstanding the philosophical nature of this subject, it cannot be wholly passed by in systematic theology, considering the influence which it has upon the statement of the doctrine of original sin. It is true, however, to the great time to be the doctrine of the theologians of the Romish Church, who in this follow after the schoolmen, like them making little of native depravity, and much of the freedom of man in spiritual things. Among the Protestant teachers, Melancthon was inclined to the hypothesis of the Cre-
esis, which will shortly be noticed, was received with much approbation by Protestants. Still many distinguished Lutheran teachers of the 17th century followed Melancthon in his views concerning this doctrine—e. g. G. Calixtus. In the Reformed Church, the hypothesis which we are now considering has had far more advocates than any other, though even they have not agreed in all details. Thus, for instance, some have thought the subject left without being determined, and many of his contemporaries were of the same opinion.

3. The Hypothesis of the Propagation of the Soul.—According to this theory, the souls of children, as well as their bodies, are propagated from their parents. These two suppositions may be made: Either the soul of children exist in their parents as real beings (entia)—like the seed in plants, and so have been propagated from Adam through successive generations, which is the opinion of Leibniz, in his Theodicee, i, 91—or they exist in their parents merely potentially, and come from them per impressionem or traducem. Hence those who hold this opinion are called Traduciani. This opinion agrees with what Epicurus says of human seed, that it is σώματος τη και φυσικος ἀνώτατος. This hypothesis formerly prevailed in the ancient Western Church. According to Jerome, both Tertullian and Apollinaris were advocates of this opinion, and even "maxima pars Occidentalia" (see Epist. ad Marcellin.). Tertullian entered very minutely into the discussion of this subject in his work De Anima, c. 25 sq., where he often uses the word traduc; but he is very obscure in what he has said. This is the hypothesis to which the opponents of the Pelagians have been most generally inclined (see No. 2), though many who were rigorously orthodox would have nothing definitely settled upon this subject. Even Augustine, who in some passages favored the Creticius, affirmed in his book De Originis Animae "nullum (sentientiam) temere affirmare oportebit." Since the Reformation there has been more support than any other, not only by philosophers and naturalists, but also by the Lutheran Church. Luther himself appeared much inclined towards it, although he did not declare himself distinctly in its favor. But in the Formula Concordiae it was distinctly taught that the soul, as well as the body, was propagated by parents in ordinary generation. The reason why this theory is so much preferred by theologians is that it affords the easiest solution of the doctrine of native depravity. If in the souls of our first progenitors the souls of all their posterity existed potentially, and the souls of the former were polluted and sinful, those of the latter must be so too. We see here the same psychological propositions, and it is very difficult to reconcile it with some philosophical opinions which are universally received. We cannot, for example, easily conceive how generation and propagation can take place without extension, but we cannot predicate extinction of the soul without making it a material substance. Tertullian and other of the fathers affirm, indeed, that the soul of man, and that spirit in general, is not perfectly pure and simple, but of a refined material nature, of which, consequently, extension may be predicated. With these opinions the theory of the propagation of the soul agrees perfectly well, certainly far better than with the opinions which we entertain respecting the nature of spirit, although even with these opinions we cannot be sure that a spiritual generation and propagation are impossible; for we do not understand the true nature of spirit, and cannot therefore determine with certainty what is or is not possible. There are many psychological phenomena which seem to favor the theory now under consideration; and hence it has always been the favorite theory of psychologists and physicians. The natural disposition of children not unfrequently resembles that of their parents, and the mental excellences and imperfections are transmitted from them by those children as bodily attributes. Again, the powers of the soul, like those of the body, are at first weak, and attain their full development and perfection only by slow degrees. Many more phenomena of the same sort might be mentioned. But after all that may be said, we must remain in uncertainty with regard to the origin of the human soul. Important objections can be urged against these arguments and any others that might be offered. If the metaphysical theory of the doctrine of the soul’s birth is admitted, the whole subject remains involved in total darkness.

SOUL, PRE-EXISTENCE OF. See PRE-EXISTENTS.

Soul-bell, the knell tolled on the decease of a person. See PASSING-BELL.

Soul-cakes, a term used for the gifts of sweetened bread, anciently distributed at the church-doors on All-souls’-day (Nov. 2) by the rich to the poor. They were frequently stamped with the impression of a cross, or were tricolored in form. They were given away with inscriptions on paper or parchment, soliciting the prayers of the receivers for the souls of certain departed persons, whose names were thus put on record. Some of the earliest specimens of block-printing consisted of "soul-paper," as they were termed.

Soul-chime, the ringing of the passing or soul bell.

Soul-mass, mass for the dead.

Soul-papers. See SOUL-CAKES.

Soul’s-cot, or Soul’s Scoot, the payment made at the grave to the parish priest in whose church the service for the departed had been said.

Soul-seat, that place where the friends of a departed Christian, in the Middle Ages, offered aims, as or near the grave, or, for the use of the clergy, the benefit of the Church, and for the good estate of the departed soul. While offering, they recited the psalm De Profundis, and then a versicle and response, asking for eternal rest and peace for the person passing away.

Soul-service, mass for the departed.

Soul-sleep is the name given to one among the many conceptions entertained by the human mind with respect to the state of the soul after the death of the body. It assumes that the soul sleeps so long as the body lies in the grave, and that it will arise together with the body at the Resurrection. The term psychopannychism (q. v.) has been applied to this doctrine because it teaches a continuous night for the soul "until the day of judgment" (2 Pet. i, 19), or until the eternal day shall begin in which there is no more alteration of light and darkness (Rev. xxi, 25, 22, xii, 5). The doctrine of psychopannychism originated in the East among the Arabian and Armenian sects, and from thence spread into the West of Europe. Traces of it are found with several of the Church fathers. It was condemned by the Councils of Ferrara (1438) and of Florence (1439), earlier by that of Lyons (1274), and later, in the 16th century, by the Council of Trent (sens. vi, 25). Pope John XXII (died 1394), however, held the doctrine of the soul’s sleep himself, and openly promulgated the view that the souls of the pious dead do not see the face of God until after the body has been raised. Later, after the rise of Protestantism, certain of the Socinians and also of the Armagnacs showed themselves inclined to hold an indefinite, not thoroughly apprehended, psychopannychism; and the Anabaptists (q. v.) allowed the doctrine to attain to its complete development among their adherents. Calvin repeatedly rejected it, first in his treatise De l’Psychopannychia (1534), and afterwards in his Tractatus Var. ii, 449 sqq. etc. Luther, on the other hand, was inclined to accept the doctrine of the soul’s sleep as correct, and he wrote an "Anekdot de Mortis," which was taught as early as A.D. 248 by the Arabian Thedeopanyktes (q. v.). Peter Pomponius (died 1529)
SOULE became especially prominent among the advocates of this doctrine, and his activity led pope Leo X to condemn this and other similar errors disseminated since the time of Averroes.

The errors in question are based in part upon certain expressions in the Scriptures (see Job xiv, 11, 12; Psa. vi, 5; Ixxviii, 11; extrav. 17, 18; Isa. xxxviii, 19; 1 Thess. ii, 14; Gal. v, 21; Eph. viii). This exegesis of such passages by which soul-sleep is proved certainly rests upon a misconception, since the New-Test. language does not refer to the soul's sleep nor to the soul's death, but simply to the soul's rest (see Rev. xiv, 13, where the dead are described as "asleep"). The Old-Test. language refers to a sleep of the body. The theory merely regards the life of this earth as a period of gracious opportunity and privilege which comes to an end at death (see Heb. ix. 27; John iv. 4). It must be conceded that the Old-Test. revelation was incomplete; it does not disclose everything with reference to eschatological questions, as in other departments of inquiry, and much is left for the New-Test. revelation to perfect. But the earlier revelation contains no error that might contradict New-Test. truth.

The principal basis for the soul-sleep view is found, however, not in the Scriptures, but in the assumption that death causes a complete disintegration of the constitution of the human soul. This view has been best by regarding the living soul (Gen. ii, 7) as a concrete real, and not simply abstract being; but more satisfactorily by the scriptural statement of the blessedness of the soul after death, from henceforth (Rev. xiv, 13)— in other words, by the intermediate state, which is to continue until the final redintegration of the entire man and of the race at the day of the general resurrection. This latter doctrine is expressly taught by Calvin, Institutes, iii, 35. (See also Ursinus, Mittelzustand der Seelen; Delitzsch, Bibl. Psychol. [Leips. 1859], p. 389-394.)

The idea of soul-sleep has, nevertheless, a measure of truth belonging to it, inasmuch as death may really be likened to sleep as it stands related to a future resurrection. It actually does lead pious souls to a sublimation of rest, i.e. to the kutaphasia (Heb. iv. 9-11) and the anapanas (Rev. xiv, 13). Nor is it accidental that the God-man rested in the grave on the Sabbath, and arose on the first day of the week. Finally, the soul-sleep theory claims to be the conclusion that the line of death is to the sleepers but as a moment, however long it may seem to us who have not entered upon its experience. The views entertained by the adherents of the theory are not constant, however, and they are found sometimes to postulate a distinction between soul and spirit (Eccles. xii. 7) and at other times to ignore it.

Bordering on the errors of soul-sleep and soul-death is the monstrous doctrine of a soul-migration, or metempsychosis (q. v.), accompanied by no recollections of any former state, inasmuch as it postulates a previous sleep, or even death (see Lange [J. P.], Positive Dogmatik, p. 748; and see conception of the limits of Christian thought. Sleep and night, death and Sheol, are rest compared with such a migratory state. The theory, associated with that of pre-existence, occurs chiefly, however, in Gnosticism and the Cabala.

SOULE, George, a Congregational minister, was born at Wilmington, Conn., Oct. 12, 1823. He studied at Amherst College, and, completing the course, graduated in 1847. Soon after he entered the East Windsor Theological Seminary, Conn., where he remained two years, and then went to the Union Theological Seminary, where he remained one year, and returned to the East Windsor Seminary, where he graduated in 1851. He was ordained Oct. 18, 1851, and became a stated supply of the Congregational Church at Ashford, Conn., where he remained two years; after which he supplied the pulpit of the church at Hampton, and was installed pastor in 1855, and continued in this relation, honored, beloved and successful, until his death, Oct. 4, 1867. (W. P. S.)

SOULE, Justus, a minister of the Methodist Episcopal Church, was born in Columbia County, N. Y., Sept. 1, 1867. He was licensed to preach in 1865, and was admitted into the Oneida Conference on trial in 1887. He received his ordination as deacon in 1889, and elder in 1941. He was transferred to the Florida (afterwards the Central District) Conference in 1895. He was appointed presiding elder, and served as such (with one year's exception) until 1916, when he was appointed book agent in New York. In 1920 he was stationed in New York city, spent the next two years in Baltimore, and in 1924 was elected to the episcopacy. When the Church divided in 1844, he identified himself with the Southern section, continuing in the bishopric. He died near Nashville, Tenn., March 6, 1867. Mr. Soule was for four years (1816-19) editor of the Methodist Magazine, and in 1808 drew up the plan of a delegated General Conference, which now appears in the Discipline. "In the pulpit he was a forceful, almost a dramatic, exponent of imagination or figurative illustrations, but strongly fortified in the main positions of his subject, and vigorous in style. His discourses showed more breadth than depth, but were often overwhelmingly impressive. See Stevens, Hist. of the M. E. Ch. iv, 44-49.

SOULS, CURE OF, the technical term by which the canon law describes the charge which is given to a pastor, no matter of what his dignity, of whatever spiritual concerns of a flock; and the words especially imply the right of administering the sacraments. In this sense, the phrase is used to mark an important distinction between two classes of benefices, or church-livings— "benefices with," and "benefices without," the cure of souls. Of the latter class are canonicates, prebends, and the whole group of benefices called in the Church "benefices." Of the former are parochial cures, vicarial cures, and, still more, the higher charges of archbishop, bishop, etc.

Sound-holes, perforations in the wooden shutters of the belfry-windows in church-towers, for the emission of the sound of the bells. In early times they were simply horizontal divisions obtained by the arrangement of the planks of the sounding-board, the performance of which was essential in character, shaped like a trefoil or quatrefoil, and harmonized with the character of the structure.

SOUNDING-BOARD, a board or structure, canopy or tester, with a flat surface, suspended over a pulpit to prevent the sound of the preacher's voice from ascending, and thus sending it out farther in a horizontal direction.

SOURDIS, François D'ESCOURCEAU, cardinal of, was born in 1573 at Bordeaux, of a noble house, originally from Poitou. In youth he accompanied the duke of Nevers to Rome in a military capacity, but suddenly entered holy orders under the good graces of Clement VIII, and was furnished with the rich deanship of An- brac. By solicitation of Henry IV, he was made cardinal at the age of twenty-three (March 3, 1598); and
was nominated as archbishop of Bordeaux in 1599, while yet a deacon. He established a great number of religious houses, and assisted at the elections of popes Leo XI and Paul V. He eventually became embroiled with the civil authorities, and died Feb. 8, 1628. See HOFER, Venerab. Man., 1628.

Sourdis, Henri d'Escoublay de, a French prelate, brother of the preceding, was born in 1598, and was early provided with several considerable benefices, and in 1629 succeeded his brother as archbishop of Bordeaux. He was associated with Richelieu in State affairs, but ultimately became involved in troubles which ended only in his own death (Dec. 21, 1632). See Sourdis returned to his see. He died at Auteuil, near Paris, June 18, 1645. See HOFER, Nouv. Biog. Générale. s. v.

Souse, an ancient term for a CORNEL (q.v.).

South, the country or quarter of the heavens which the Shamite, standing with his face to the east, supposes to be on his right hand. It is denoted by seven Hebrew words, nearly all of which refer to some characteristic of the region to which they are respectively applied.

1. בַּקְשֵׁה (boksheh) [in Syr. and Chald. to be dry], probably derived its name from the hot dry winds which annually blow into Syria, over Africa and Arabia. In March, says Volney, "appear in Syria the piercing southwesterly winds with the same circumstances as in Egypt; that is to say, their heat, which is carried to a degree so excessive that it is difficult to form an idea of it without having felt it; but one can compare it to that of a great oven when the bread is drawn out" (Voyage en Syrie et Egypte, i, 297; comp. Luke xii, 25, "When ye see the south wind blow, ye say there will be heat"); and see KITTO, Physical History of Palestine, March of Month, of March, p. 221, 222). The word is occasionally applied to a particular dry season or to dry weather. A daughter says to her father, "Thou hast given me a south," or rather "dry land," כּּּנֶּרֶגְּלָה (neraglah) [Vulg. terram aridentem]; "give me also some springs of water" (Judg. i, 15; comp. ver. 9). At other times the word refers to those arid regions, notwithstanding their occasional fertility, over which the south wind blows into Syria. So the Sept. and Vulg. understood the "whirlwinds from the south" (Isa. xxvi, 1: לְרָקִיָּה, turbines ab Africo). The burden of the beasts in the south" is rendered דְּנָשָּׂא (dansha) [v. el. xxi, 4] in the present Hebrew text; but in Ezck. xxvi, 4 [9] it renders יִנָּשָּׂא יִנָּשָּׂא (yinnasha) [Vulg.]. "ab asturo usque ad aquilonem;" so also in Ezck. xxvi, 18 יִנָּשָּׂא יִנָּשָּׂא is rendered πρὸς βορέαν; Vulg. "ad australium." It is also used in the geographical sense in Numb. xxiii, 4; Josh. x, 21; 1 Chron. xiv, 24; 2 Chron. iv, 4; Ezck. xii, 24; xvi, 9. It also signifies heat and impetus of the winds, the word being used as the name or designation of the desert regions lying at the south of Judaea, consisting of the deserts of Shur, Zin, and Paran, the mountainous country of Edom or Idumea, and part of Arabia Petraea (comp. Mal. 3, 1; 1 Sam. xix, 24). Thomas, Travels, p. 438). Thus Abraham, at his first entrance into Canaan, is said to have "gone on towards the south" (Gen. xii, 9). Sept. in τίρῃ ἱππο, Λαύπια νοτίωτα, Symmachus καί νότον, and upon his return from Egypt into Canaan he is said to have gone "into the south" (xiii, 1); Sept. καί τίρῃ ἱππο; Vulg. "ab australiam plagam," though he was in fact then traveling northward. Comp. ver. 3, "He went from the south to Bethel," Sept. καί τίρῃ ἱππο; Vulg. "a meridie in Bethel." In this region the Amalekites are said to have dwelt, "in the land of the south," when the chosen seed of Israel was forced to leave the land of Canaan (Num. xxvii, 29, viz. the locality between Idumea and Egypt and to the east of the Dead Sea and Mount Seir. See AMALEKITE. The inhabitants of this region were included in the conquests of Joshua (Josh. x, 40). Whenever the Sept. gives the Hebrew word in the Greek letters, Namey, it relates to this particular district. To the same region belongs the passage "Turn our captivity as the streams in the south" (Ps. cxvi, 4; Sept. ως χειμάρρους τοις νότοις, "as winter torrents in the south") (Vulg. sicut torrentes in Austro), which suddenly fill the wadys or valleys during the season of rain (comp. Ezck. vi, 3; xxxiv, 18; xxxiv, 8; xxxvi, 4, 6). These are dry in summer (Job vi, 15-18). The Jews had, by their captivity, left their country empty and desolate, but by their return would "flow again into it." Through part of this sterile region the Israelites must repas in their vain application to Egypt (Exod. xxi, 6); those of the south, which are the Wilderness of Judea (Matt. iii, 1; Josh. xvi, 61); comp. Ps. lxv, 6, Heb. or margin; see also Jer. xvii, 26; xxxii, 44; xxxiii, 14; Ezra xx, 46; 47; xxi, 4; comp. Obs. 19, 20; Zech. ix, 7). Through part of this region lay the road from Jerusalem to Gaza, "which is the desert" (Acts viii, 26). Thus, as Drusius observes, the word is often meant for the whole of the south land, the desert tract of land to the south of Judea. Sometimes it is used in a relative sense; thus the cities of Judah are called "the cities of the south" (Jer. xii, 19), relatively to Chaldea, expressed by "the north" (4, 14; comp. iv, 6; vi, 1). Jerusalem itself is called "in the midst of the south field" or "consp. like the Latin aeger (Ezek. xx, 46; comp. Gen. xiv, 7). See FOREST. Egypt is also called "the south;" thus, "the kingdom of the south" (Dan. x, 5) is Ptolemy Soter and his successors; comp. ver. 6, 9, 11, 15, 25, 29, 40; but in the last-named verse Mede understands the Saracens from Arabia Felix (Works, p. 674, 816). See South Country.

2. בַּקְשֵׁה, darom, which, according to Gesenius, is a word of uncertain derivation. It is in the Sept. rendered by δῆφι, Des. xxxxi, 23; by νότος, Eccles. i, 6; xi, 3; Ezck. xl, 24, 27, 28, 44, 45; xii, 11; and by Σωκρατος, Ezck. xili, 18; Vulg. "meridies," "auster," "australis," "ventus australis." This word as a proper name is usually used to designate the southern part of Judea in Job xxxvi, 17; Eccles. xiii, 2; xi, 24. Hence the name of "Daroma" is given by Eusebius and Jerome to the region which they describe as extending about twenty miles from Eleutheropolis on the way towards Arabia Petraea, and from east to west as far as from the Dead Sea to Gerara and Beer-sheba. A little to the south of Gaza there is now a spot called Bab ed-Daron, a name probably derived from the fortress Daron, celebrated in the time of the Crusades. That fortress was built on the ruins of a Greek convent of the same name, which, being traced so far back, may well be identified with Darom as the ancient name of this territory. In Deut. xxxix, 23 the Hebrew word is applied to the sunny southern slope of Nablus, towards the Lake Huleh. See DAHOM.

3. בַּקְשֵׁה, Tymon, and its adverb בַּקְשֵׁה, strictly what lies to the right: Sept. νότος, δῆφι; and sometimes the word is simply put into Greek letters; thus, Νοτιωνιαν (Hal. iii, 3). Indeed, all the three preceding words are so rendered (Ezek. xx, 46 [xxi, 2]); τις δηφως, aetos, which bears the usual sense, καί ηπως, καί δηφως, καί ποροσφως, καί ηπως, καί ποροσφως, καί δηφως, καί ποροσφως, καί ηπως. While perhaps the vocabulary of the translator did not afford him sufficient variety. The Vulg. here gives "viam australi," "ad aphericum," "ad saltum agri meridianum,"
and elsewhere renders the Hebrew word by "meridian, plaga," or "ad meridiem." It occurs in Exod. xxxvi, 35; Num. xii, 10; ii, 9; x, 6; Job ix, 9; xxxix, 26; Psa. lxvii, 26; Cant. iv, 16; Isa. xlii, 6; Hab. iii, 3; Zech. xii, 9; xiv, 4. In Zech. vi, 5  symbolizes Egypt. It is poetically used for the south wind, like Shakespeare's "sweet south." Psa. lxvii, 26, vtor, africum, and Cant. iv, 16, vtor; for the explanation of the latter see North. Observe that and are interchanged in Exod. xxxvi, 18; xxxvi, 23; Ezek. xlviii, 1. See Teman.

4. י”ע, yamin, also meaning the right side and south. Thus, Psa. ixxxix, 12, "Thou hast made the north and the south;" Sept. ἡ Νοτιοτέρης; Vulg. mare. The word is evidently here used in its widest sense, comprehending not only the countries lying south, but also the Indian Ocean, etc., le raumia, ab interiorem us. The full phrase occurs in ix, 9, ה’ נכדו, raumia vtor, interiora australis, the remotest south; perhaps in both these passages the word means the chambers or storehouses of the south wind.

6. ד”ת, midbar, "Promotion cometh not from the south" (Psa. lxxxv, 6), literally "wilderness," ἡ ἅπαξ λειτουρα, desertus montis. See Desert.

8. ד”ת, mayim, water, "And gathered them out of the sands, and from the south" (Psa. cviii, 3), ἡ Νοτιοτέρης, mare; where Gesenius contends that it ought to be translated "west," though it stands opposed to י”ע, as it is indeed translated under exactly the same circumstances (Acts ix, 23). He refers to Deut. xxiv, 28, and Amos viii, 12. It is also thus rendered in our version of the first of these references, and on the latter we can only refer to archbishop Newcome's Version of the Minor Prophets (Pontefract, 1809), p. 51, 52.

In the New Test. we have vtor in the geographical sense, בּוּרָא, vtor, regio australi, Matt. xii, 42 [see Sheba] and Luke xiii, 29; Rev. xvi, 13. The word misperiosis is also translated "south" in Acts viii, 26, κατά μεσημβρίαν, contra meridianum. It is used in the same sense by Josephus (Ant. iv, 5, 2). In Symmachus (1 Sam. xx, 41) for ס"ע. Hesychius defines Μεσημβρία "τα τοῦ Νότου μέρος και τοῦ ἡμέρας μίσον. The verb מָיָר occurs in Paul's dangerous voyage (Acts xxvii, 13), "a haven of Crete," Μεσημβρία, κατά λίβα, respectivem ad africum, by metonymy the wind for the quarter whence it blows. The south wind is mentioned ver. 13, vtor, auster, and xxviii, 13. See Wind.

Egypt and Arabia lay south in respect of Canaan, and were therefore frequently mentioned by that designation. But from the Egyptians they may have learned the existence of nations still farther to the southward, for representations of victories over the negroes, and of negro captives, are not uncommon on the tombs in the valley of the Nile. One which is here copied represents the triumph of one of the Pharaohs over a negro chief, probably designed to be the type of his nation. It is evident that the figure exhibits the usual characteristics of the negro features as strongly as they are found at the present day. See Ethiopia.

South Country (222, Negeb, south, or, according to Buxtorf, Parkhurst, and Gesenius, arid or dry country). There was a certain tract of country or portion of Palestine which was variously designated as "the South," "the South Country," or "the Land of the South." It was so called whether it lay to the south or to the north of the point from whence reference was made to it, i.e., by persons who stood to the south of it or were approaching it from the north, as well as by those who lived to the north of it or were approaching it from the north.

Thus Abraham, not only when he was journeying towards the south, as he proceeded southward from Bethel and from Hebron (Gen. xii, 9; xx, 1), but when he was travelling northward, is said to go into "the south." "Abraham went up out of Egypt into the south," that is, into the South Country, or that part of the land of Canaan which was called "the south," and then "went on his journeys from the south," or South Country, even to Bethel (xiii, 1, 3). When Moses sent the spies from Kadesh to search the land, he said unto them, "Get you up this way southward," not towards the south, or that point of the compass, according to the obscure rendering of the English translation, which he could not mean when he was directing them northward, but, according to the Hebrew, into the Negeb, or the south, i.e. the South Country, or that part of the Land of Promise which was so called; and then it is said that "they ascended by the west" that is, by the sea, or through the South Country, "and came into Hebron" (Num. xii, 17, 22). It was the abode of the Amalekites at the time that the spies searched the land, for in their report they said, "The Amalekites dwell in the land of the south" (ver. 29), and when Israel came by the way of the spies, or the second time to Kadesh, king Arad, who had come out against them, is said to have dwelt in the south, i.e. in the South Country, when his seat lay at the time to their north (xxi, 1).

This district or tract of country was evidently the south part of Judaea, or the southern portion of the Land of Promise. It is spoken of in Judg. i, 16 as "the wilderness of Judah, south of Arad;" and it is found to be, according to the meaning of the word wilderness, a hilly region, a strip of hilly country, running from the Dead Sea westward across the land of Palestine, or somewhat obliquely to the south-west, rising abruptly in grand precipices from the shore of the Dead Sea; next forming a high and extensive elevated plateau, here directed towards the west by one or two ranges of mountains; and finally sloping westward or sinking gradually into the land of Gerar, or the great plain south and south-east of Gaza. It constituted in general the portion of Judah (q. v.) that was set off to the tribe of Simeon (q. v.), and its boundaries (which have been inordinately extended by some, e.g. Wilton, The Noger [Loud, 1863]) are to be defined by the cities specified in Josh. xv, 21-32; xix, 1-6. See Topographical Terms.

South End, the end of an altar on the south or easterly side; that is, on the right-hand side of a person looking eastward towards it. See South Side.

South, Queen of the. See Sheba.

South Ra'moth (1 Sam. xxx, 27). See Ramoth-Negor.

South, Robert, D.D., an English clergyman, was born at Hackney, Middlesex, in 1663, and became a king's scholar at Westminster at the age of fourteen.

Tribute from the South to the Kings of Egypt.
In 1651 he was admitted a student of Christ Church, Oxford, under the care of his relative Dr. John Smith. In 1655 and 1656 he successively took his degrees of A.B. and M.A. The former he received at Oxford, and was chosen preacher at one of the chapels in that city in 1658 by one of the deprived bishops. At the restoration of Charles II, the opportunity was afforded him of showing his peculiar eloquence. In August, 1660, he was chosen public orator in his university, and presently after preached before the king's commissioners. Clarendon appointed him, without delay, his domestic chaplain. On the disgrace of that minister he was nominated to the same office in the family of the duke of York; the king, in the meantime, placing him on the list of royal chaplains. He was installed prebendary of Westminster in March, 1665, and on Oct. 1 following was advanced to the dignity of D.D. Afterwards he had a sinecure in Wales bestowed upon him by his patron, the earl of Clarendon, and in 1670 was installed canon of Christ Church. In 1675 he attended, as chaplain, Laurence Hyde, ambassador extraordinary to the king of Poland. Upon his return he was presented, in 1678, by the dean and chapter of Westminster to the pleasant rectory of Jislip, near Oxford. To this Church he became a considerable benefactor—rebuiding the chancel in 1680, allowing £100 a year to his curate, and spending the rest in educating the poorer children of the parish. After the Revolution, South took the oath of allegiance to the new King and Queen, and was admitted to the curacy of St. Mary-le-Strand. He had declined the offer of a great dignity vacated by one who refused the oaths. It was at this time that he became engaged in the violent controversy with Dr. Sherlock, dean of St. Paul's. Sherlock's Vindication of the Doctrine of the Trinity appeared in 1699, and was answered by South in his Animadversions. Sherlock replied in 1694 in a Defence, which was replied to by South in Trithemis, etc. This was a sharp contest, and men of great note espoused the cause of each. During the greatest part of Queen Anne's reign, South was a severe sufferer from illness; and he did little as minister, save attend in the House of Lords at Westminster Abbey. He was offered the bishopric of Rochester with the deanship of Westminster; but declined to leave his private station. He died July 8, 1716, and was buried in Westminster Abbey. Dr. South was a man of uncommon abilities and attainments; of judgment, wit, and learning. His wit was his bane, for he could not repress it, even on the most solemn occasions. His writings are: Musica Incomata, sive, Poena Exemplarum Musicae Vires, etc. (1655; 1667, 4to);—Animadversiones ad Dr. Sherlock's Book entitled A Vindication of the Holy and Ever-blessed Trinity (1693);—Trithemis Charged upon Dr. Sherlock's New Notion of the Trinity (1695). He published also Animadversiones (1692, 6 vols. 8vo; other editions in 1697, 1704, 1715, 1722, 1727). To these were added (1744) 5 vols. 8vo. These eleven volumes were republished at Oxford (1823, 7 vols. 8vo). They have been reprinted in Philadelphia (4 vols. In 2 vols. 8vo), in New York (4 vols. 8vo), and by Hurst and Havighton (1867, 5 vols. 8vo). See Cattermole, Literature of the Church of England, ii., 412-463; Chalmers, Biog. Dict. s. v.; Allibone, Dict. of Brit. and Amer. Authors, s. v.

**South Side**, the side of an altar on the south or epiotile side: that part of the altar at which the priest during the Mass, says or sings the collects and the epistle for the day. See **South End**.

**Southcott**, JOANNA, a noted enthusiast, was born about 1750 at Gittisham, in Devonshire. She was the daughter of a farmer at St. Mary Ottery's, in Devonshire, and from an early age became familiar with the teachings of her mother, who lived till Joanna had reached the age of womanhood, she received the most exalted religious ideas, the exuberance of which her father often felt himself called upon to check: she was still, however, a sober member of the Church of England. At length she joined the early morning and evening meetings of the southcottians, and in 1790 was received into that body; she was soon expelled from it on account of her pretended visions. The religious exercises to which Joanna was thus introduced seem to have produced, as exciting causes, her remarkable visions and dreams, which soon took the form of prophecies, and commanded universal attention. Some of her predictions received a remarkable fulfilment, especially that which she published immediately after the conclusion of the Peace of Amiens, in 1801; for she then declared the joy of the nation, and gave the solemn assurance that a calamitous series of wars would be about to break out, the events of which she would foretell. Afterwards, for a short period, she as solemnly asserted that Napoleon would never land in England, and that his power would be overthrown. The visions which formed the ground of these prophecies are often very striking as dramatic pictures, and the rude doggerel of her prophetic chants as frequently becomes musicus or poetry. A cultivated mind can overcome the disgust first excited by their uncomeliness, and their deficiency in common grammatical correctness. She began the publication of her prophetic pamphlets in 1794, and about 1804 was brought up to London and lodged at the West End by some of her admirers, who entertained hopes of her influence in society. Soon after this event, an old man named Thomas Dowland and a poor boy named Joseph also had visions, and a paper-manufacturer named Carpenter (in whose employment they were) finally published many of them. We mention them here, however, because this Carpenter, conceiving himself to be the "right man" of Joanna's prophecies, finally took her place as the chief of the sect who followed her, having first led the succession when she was believed by the more enlightened of her followers to have fallen under a delusion. This delusion consisted in the belief that she was destined to bring forth Shiloh, the Messiah, and its origin is explained by Carpenter as the result of her believing that she was the Church, or bride, itself, instead of its shadow or representative. We may here mention that previous to its arrival at this idolatrous pitch, which it is still painful to contemplate, Joanna had occupied a year in "sealing" her followers, generally by some sort of magic regarded as a mere trick to make money. The old man Dowland expired in 1804, ten years after the commencement of his, Joseph's, and Joanna's prophecies, and 1814 was fixed upon by her for the birth of Shiloh. She was deceived by appearances, and expired on the 27th of December in that year, having predicted her own decease. But on that very day she was deceived, she had, at all events, been the sport of some spirit, good or evil." The whole case, like many others of the kind, may be explained by the easily ascertained laws of psychology. The appearance which Joanna mistook for pregnancy was the result of a diseased condition, explained when her body was opened. The prevailing thought of her writings is the redemption of man by the agency of woman, the supposed cause of his fall. See **Southcottians**.

**Southcottians** or **Southotters**, the followers of Joanna Southcott (q.v.), who in 1792 professed to be a prophetess. The book in which Joanna published her prophecies is dated London, April 25, 1804; and she begin by declaring that she herself did not understand the communications given her by the Spirit till they were afterwards explained to her. In November, 1803, she was told to mark the weather during the twenty-four days of each month. On the first day of each month, she was informed that the weather each day was typical of the events of each succeeding month: New-year's-day to correspond with January, January 2 with February, etc. After this she related a dream she had in 1792, and declares she foretold the death of bishop Buller, and appeals to a letter put into the hands of a clergy-
man whom she names. One night she heard a noise as if a ball of iron were rolling down the stairs three steps, and the Spirit afterwards, she says, told her this was a sign of three great evils which were to fall upon the land—the sword, the plague, and the famine. She affirms that the then late war and the extraordinary harvest of 1797 and 1800 happened agreeably to the predictions which she had previously made known; and particularly appeals to the people of Exeter, where it seems she was brought up from her infancy. In November, 1803, she says she was ordered to open her Bible, which she did at Eccles, i, 9; and then follows a long explanation of that chapter. In March, 1805, we find Joanna published a pamphlet in London, endeavouring to show the Bible which had appeared in the Leed's Mercury, and four of which, she says, were absolutely false. The first charge was respecting the sealing of her disciples; the second, on the invasion; the third, on the famine; the fourth, on her mission; the fifth, on her death. Sealing is the grand peculiarity and ordinance of these people. Joanna gave those who professed belief in her mission and who subscribed to the things revealed in her "Warning" a sealed written paper with her signature, for which they had to pay half a crown, and they were led to think that they were sealed against the day of redemption, and that all those who were possessed of these seals would be signally honored by the Messiah when he comes again. This seal was affixed to most of the voluminous writings which she printed, but the papers given to her disciples generally contained the words "The sealed of the Lord—the Elect Precious Man's Redemption—To inherit the Tree of Life—To be made heirs of God and joint-heirs of Jesus Christ." It is said they looked upon Joanna as the bride, the Lamb's wife; and that as man fell a woman, he will be restored by a woman. Some of her followers pretended also to have visions and revelations. Joanna went so far at last, when past sixty years of age, as to declare herself pregnant with another Messiah, who was to be called Shiloh. Her followers made costly preparations for the birth of their expected prince, and had a cradle constructed at an expense of two hundred pounds. The disease by which she was deceived terminated in her death; but her deluded disciples, after having been compelled to inter her, persisted in the belief that she was to bear the Shiloh, and gave out that she would rise again with the child in her arms. The members of her society have been gathered chiefly from amongst the members of the seceding denominations, especially the Wesleyans, with whom she had once been associated, and of the Established Church. Mr. Foley, rector of Old Swinford, near Stourbridge, was said to be a firm believer in the resurrection of the prophetesses; and another clergyman used to go regularly to expound her writings at Bristol. The Southwells abounded principally in the northern counties. At Ashton-under-Lyne they have a splendid temple, which costs them nine thousand pounds. Their worship is described as awfully wild and tumultuous. The men are known by their wearing long beards and brown hats. At present, it seems, both warning and sealing have subsided; they are waiting in awful suspense for the commencement of the thousand years' reign on the earth. Yet it is said they do not mean that Christ will come in person, but in spirit, and that the sealed who are dead before that time will be raised from their graves to partake of this happy state.

Southgate, Richard, an English divine, was born at Alwalton, Huntingdonshire, March 16, 1729, and was educated partly at Uppingham, but chiefly at Peterborough, under Rev. T. Marshall. He entered St. John's College, Cambridge, in 1745, and took his degree of A.B. in 1749. Retiring to his father's house on account of some unpleasant family occurrences, he continued his studies; was ordained deacon September, 1752, and priest September, 1754, by Dr. Thomas, bishop of Lincoln. In the last year he was presented with the rectory of Woolley, in Huntingdonshire, but resigned it when Mr. Peacock, the patron, took orders. On Jan. 2, 1763, he went to London, and became a subordinate of St. James's, where he remained until 1765, when, in Feb. of that year, he entered upon the curacy of St. Giles's, which he retained throughout his life. He received, May, 1783, the small rectory of Little Steeping, in Lincolnshire; and the following year was appointed assistant librarian of the British Museum. In 1799 he was presented with the rectory of Woolley, which he vacated in 1815, and in the same year became a member of the Society for Propagating Christian Knowledge; in 1791, a fellow of the Society of Antiquaries, and afterwards of the Linnean Society. He died Jan. 25, 1795. Mr. Southgate never committed any of his writings to the press, although he was thoroughly qualified, and did make preparations for a new History of the Sixty and Dukes in England. He was a distinguished antiquarian, and left a choice and valuable collection of books, coins, medals, shells, etc., which were sold at auction. His Sermons (1798, 2 vols.) were published by Dr. Gaskin. See Chalmers, Biog. Dict. a. s. v.; Allibone, Dict. of Brit. and Amer. Authors, s. v.

Southwell, Nathaniel. See Southwell, NATHANIEL.

Southwell, Robert, an English Jesuit, was born at Horsham, St. Faith's, Norfolk, in 1560. He was educated at Douai, and became a Jesuit at Rome in October, 1578. In 1585 he was appointed prefect of the English college there, and the next year was sent as a missionary to England. He resided principally with Anne, countess of Pembroke, secretly converted to the scattered Roman Catholics. Apprehended in 1592, he was imprisoned in the Tower, and several times subjected to torture to make him disclose a plot against queen Elizabeth. In February, 1595, he was tried at the bar of the King's Bench, Westminster, and executed the next day (Feb. 21) at Tyburn. He was much revered among Roman Catholics for his goodness and purity of life, and his name has lately been introduced for canonization in the Roman ecclesiastical courts. He wrote, St. Peter's Complaint, with other poems (Lond. 1593, 4to; last edition, with sketch of life, by W. J. Walter, 1817); — Supplication to Queen Elizabeth (ibid. 1593); — A Letter to the Gardinian (ibid. 1605, 4to). His chief prose works are, Triumphe over Death (ibid. 1595); — Epistle of Comfort to those Catholics who Lie under Restraint (1605, 8vo); — Marie Magdalena's Funeral Tears (ibid. 1609, 1772; new ed. 1828); — Rules of a Good Life, etc. Collective editions of his works were published in 1620, 1630, 1634, 1637, and 1825, with a complete edition of his poetical works in 1856. See Chalmers, Biog. Dict. a. s. v.; Allibone, Dict. of Brit. and Amer. Authors, s. v.

Southworth, Alanson, a Congregational minister, was born at Winthrop, Me., Aug. 16, 1826. He studied law at Lowell, Mass., was converted in 1858, and entered Bangor Theological Seminary, graduating in 1864. He published in 1820, 1834, and 1837, and was ordained at South Paris, Me., in 1859, where his ministry of nearly six years was very useful. After returning from a voyage to Cuba for his health, he entered the service of the Christian Commission, and labored with great assiduity in ministering to the bodies and souls of the soldiers in the Army of the Potomac. He returned to South Paris, and was soon stricken down with typhoid fever, of which he died, March 25, 1864. Mr. Southworth was an earnest, unselfish worker for Christ, and endowed with true nobility of soul. In 1863 he published a small but valuable book on Universalism.
SOUTHWORTH 898

SPACE

Two of his brothers entered the ministry. See Congregational Quarterly, 1865, p. 205.

Southworth, Tertius Dunning, a Congregational minister, was born at Rome, N. Y., July 25, 1801. He entered Hanover College and pursued his studies, only taking a partial course. He received the degree of A. M. and the connection is still. He spent one year in Auburn Theological Seminary, and graduated at Andover Seminary in 1829. He commenced his labors in Paris, N. Y., where he preached two years. He was ordained at Utica, N. Y., Oct. 7, 1822, and installed at Claremont, N. H., June 18, 1834. He remained there until 1838, when he received a call from Franklin, Mass., which he accepted, more especially installed in January, 1839, in a pulpit made famous by the long occupancy of the same by Dr. Emmons. After remaining there eleven years the pastorate was dissolved, and he was called to charge of the Church in Lyndon, Vt., where he remained four years, and accepted a call to the pastorate of Pleasant Prairie, Kenosha, Wis., in March, 1859. He remained at this post until 1868, and in the following year returned to his home in Bridge- water, N. Y. He was a man of fine presence and impressive delivery. His thinking was clear, and his sermons were logical and pithy. As a successor of Dr. Emmons, it is enough to say he filled the pulpit to the entire satisfaction of the people. He died at Bridgewater Aug. 7, 1874. (W. P. S.)

Sovereignty of God is his power and right of dominion over his creatures, to dispose and determine them as seemeth him good. This attribute is evidently demonstrated in the systems of creation, providence, and government. It may be considered as absolute, universal, and everlasting (Dan. iv, 35; Eph. i, 11). See Cole, On the Sovereignty of God; Charnock, On the Dominion of God in his Works, i, 690; Edwards, Sermons, ser. 4; Meth. Quar. Rev. Jan. 1855. See Power of God; THEODICY.

Sow. See SWINE.

Sowan, the first of the four paths an entrance into which secures, either immediately or more remotely, the attainment of the Buddhist Nirvana (q. v.). The path Sowan is divided into twenty-four sections, and after it has been entered there can be only seven more births between that period and the attainment of the Nirvana, which may be in any world but the four hells. This is the second gradation of being.—Gardner, Faiths of the World, s. v.

Sower, Sowing (usually some form of τῷ, sard, σταῖπος). The operation of sowing with the hand is an act of so simple a character as to need little description. The Egyptian paintings furnish many illustrations of the mode in which it was conducted. The sower held the vessel or basket containing the seed in his left hand, while with his right he scattered the seed broadcast (Wilkinson, Anc. Egypti, ii, 12, 18, 39). The "drawing out" of the seed is noticed, as the most characteristic action of the sower, in Isa. xxxvii, 6 (A. V. "precious") and Amos iv, 13: it is uncertain whether this expression refers to drawing out the handful of seed from the basket, or to the dispersion of the seed in regular rows over the ground (Gesenius, Thesaur, p. 827). In some of the Egyptian paintings the sower is represented as preceding the plough: this may be simply the result of bad perspiration. The sower is told in such a way that a practice actually prevailed in the East in the case of sandy soils, the plough serving the purpose of the harrow for covering the seed (Russell, Aleppo, i, 74). In wet soils the seed was trodden in by the feet of animals (Isa. xxxiii, 20), as represented in Wilkinson's Anc. Egypti, ii, 12. The sowing season was commenced in October and continued to the end of February, when barley was sown, and barley after the beginning of January (Russell, Aleppo, i, 74). The Mosaic law prohibited the sowing of mixed seed (Lev. xix, 19; Deut. xxii, 9): Josephus (Ant. iv, 8, 20) supposes this prohibition to be based on the repugnancy of nature to intermixture, but there would appear to be a further object of a moral character, viz. to impress on men's minds the general lesson of purity. The regulation offered a favorable opportunity for Rabbinical refinement, the results of which are embodied in the Talmud. See Keth. 1-5. That the ancient Hebrews did not consider the grains prohibited from planting several kinds of seeds in the same field appears from Isa. xxviii, 25. A distinction is made in Lev. vi, 37, 38, between dry and wet seed, in respect to contact with a corpse; the latter, as being more susceptible of contamination, would be rendered unclean thereby, the former would not. It is possible that the germination of seed and the effects of a principle or a course of action on the human character for good or for evil is frequently noticed in Scripture (Prov. xi, 18; Matt. xiii, 19, 24; 2 Cor. ix, 6; Gal. vi, 7). See Agriculture.

Sozomen, Salamanes Hermias, a Greek writer of Church history, almost contemporary with Socrates as an author, was born at Bethel, a town of Palestine. After being liberally educated, he studied law at Berytus, in Phoenicia, and then pleaded at the bar in Constantinople. He afterwards applied himself to the writing of ecclesiastical history, and drew up a comprehensive work, which, from the ascension of Christ to A.D. 532, but this is lost. Then he added his history in a more circumstantial manner to A.D. 440; and this part is extant in nine books. A comparison renders it probable that Sozomen was acquainted with the work of Socrates, his own additions and enlargements being more important with regard to volume than quality, and relating principally to hermits and monks. For those recluses he had a high veneration, so that he frequently extolled the monastic life in hymns. His vision saw only what was extreme and imposing, so that he was not able to appreciate the more moderate phases of monastic life, and the ordinary conflicts between virtue and vice. In point of style he is superior to Socrates, as was already seen by Photius (iv τῆς ἑρείας βελτιωτος), but in every other respect he is inferior. Attention has often been called to material misapprehensions in his statements, e. g. by Dupin (Nouvelle Bibliothèque, iv, 80). An edition of Sozomen, bound with Eusebius and Socrates, was published by Valerius in 1659, and often republished. See Dupin, as above; Schröck, Kirchengesch. vol. vii: Holzhausen, De Fontibus gub. Socreti, Soc., et Theod. uni sum (Göttingen, 1825), Daur. Epochen d. kirchl. Geschichtsschreibung; Herzog, Enclop. s. v. Smith, Dict. of Gr. and Rom. Biog. s. v.

Spaadair, in Norse mythology, is the name of the norma, a class of goddesses represented by the maid as being beneficent and wise, and as employed in directing the way of heroes and exalted personages through life, and in securing the prosperity of such favorites through the means of prudent counsel.

Space (Lat. spatum) is a term which, taken in its most general sense, comprehends whatever is extended, and may be measured by the dimensions, length, breadth, and depth. In this sense it is the same with extension. Space, in this large significance, is either occupied by body or it is not. If it be not, but is void of all matter and contains nothing, then it is space in the strictest meaning of the word. This is the sense in which it is commonly used in English philosophical language, and is the same with what is called a vacuum.

Very many theories have been held respecting space, a few of which are mentioned below. Zeno of Elea argues against the reality of space, and says, "If all that exists were to go into space, this space must be in another space, and this in another infinite," etc. Pomponius Mauroculus declares that "there exists no empty space, since such a space, if it existed, would be an existing nothing."
The Atomists, on the other hand, held to an empty space, arguing (1) that motion requires a vacuum; (2) that rarefaction and condensation are impossible without empty intervals of space; and (3) that organic growth depends on the generation of nutriment into the vacant spaces of the body. Aristotle held that "space is limited; the world possesses only a finite extension; outside of it is no place. The place of anything," he defines, "is the inner surface of the body surrounding it, that surface being conceived as fixed and immovable. As nothing exists outside of the world except God, who is pure thought and thought not in space, the world naturally cannot be in space, i.e., its place cannot be defined." The Stoics believed that "beyond the world exists an unlimited void." According to Epicurus, "space exists from eternity, and that in the void spaces between the worlds the gods dwell." Arnobius, the African, asserted that God is "the space of all space, the place of all places." Space, as containing all things, was by Philo and others identified with the infinite. So the text (Acts xxvii, 29) which says that "in God we live, and move, and have our being" was interpreted to mean that space is an affection or property of the Deity. Eckhart declares that "out of God the creature is a pure nothing; time and space are pure nothingness with which nothing becomes, nothing in themselves." According to Campanella (1568–1639), God produced space (as well as ideas, angels, etc.) "by mingling in increasing measures non-being with his pure being. Space is animato, for it dreads a vacuum and craves replenishment." Newton regards space as infinite, the sanctuary of the Deity. Leibnitz defines space as "the order of possible co-existing phenomena." Locke has attempted to show that "we acquire the idea of space by sensation, especially by the senses of touch and sight." In the philosophy of Kant, "space and time are mere forms of the sensibility, the form of all external phenomena to the sensibility is necessarily anterior in the subject to all real intention, it follows that the form of all these phenomena is in the mind a priori. There can, then, be no question about space or extension but in a human or subjective point of view. The idea of space has no objective validity; it is real only relatively to phenomena, to things, in so far as they appear to us; it is purely ideal in so far as things are taken in themselves and considered independently of the forms of sensibility." Herder says that "space and time are empirical conceptions." Schopenhauer teaches, with Kant, that "space, time, etc., have a purely subjective origin, and are only valid as mere external phrases, which are used to represent the sensations in consciousness. Space and time have the peculiarity that all of their parts stand to each other in a relation, with reference to which each of them is determined and conditioned by another. In space this relation is termed position, in time it is termed sequence." Herbart holds that extension in space involves a contradiction. Extension implies prolongation through numerous different and distinct parts of space, but by such prolongation the one is broken up into the many, while yet the one is to be considered as identical with the many. Trendelenburg seeks to show that space is a product or phase of motion, its immediate external manifestation. In the philosophy of Thomas Reid (1785), "space and its relations, with the axioms concerning its existence and its relations, are known directly in connection with the senses of touch and sight, but not as objects of these senses." James Mill thus explains infinite space: "We know no infinite line, but we conceive an infinite line. In the same way, then, by which we conceive the increase of a line the idea of one portion more is continually associated with the preceding length, and to what extent soever it is carried the association of one portion more is equally close and irresistible. This is what we call the idea of infinite extension, an idea inseparable from the concept of a thing." According to Lord Monboddo, place is space occupied by body. It is different from body as that which contains is different from that which is contained. Space, then, is place potentially; and when it is filled with body, then it is place actually. See Krauth's Fleming, Vocabulary of the Philosophical Sciences, n. v.; Ueberweg, Hist. of Philosophy (see Index).

Spada, Bernardino, an Italian cardinal, was born at Brescina in Lombardy, April 21, 1584, of an obscure family. After studying the humanities with the Jesuits in Rome, he applied himself to ecclesiastical jurisprudence, in which he acquired considerable reputation. He was honored with several dignities by Paul V and Gregory XIV, and afterwards by Urban VIII, who sent him on various commissions to France and Parma, and gave him the archbishopric in partibus of Damietta, the cardinalate in 1626, and the legation to Bologna in 1627. He was a patron of the fine arts, and left some Poems and Letters addressed to Mazarin. Spada died in Rome, Nov. 10, 1661.

Spada, Fabrizio, nephew of Bernardino, born March 18, 1648, was made archbishop of Autaras, nuncio to Savoy and France, and cardinal in 1675. He died June 15, 1717.

Spada, Giambattista, brother of Bernardino, born at Lucca, Aug. 27, 1597, likewise became an ecclesiastic, and was made governor of Rome in 1635, president of the Romagna in 1644, cardinal in 1652, and bishop of Rimini and Palestrina. He died in Rome, Jan. 28, 1675.

Spada, Orsino Filippo, brother of Fabrizio, became bishop of Osimo and papal nuncio to Poland, and was made cardinal in 1706. He died June 24, 1724.

Spafford, William M., a minister of the Methodist Episcopal Church, was admitted into the North Ohio Conference on trial in 1841. He labored effectively until 1865, when he took a supernumerary relation. In 1868 he became supernumerary, and so continued until his death, in Effingham County, Ill., in 1876. Mr. Spafford was a man of brilliant intellect, but of peculiar sensitiveness. See Minutes of Annual Conferences, 1876, p. 111.

Spahr, William E., a minister of the Methodist Episcopal Church, was born in Greene County, O., Aug. 1, 1848, and united with the Church at fourteen years of age. He received a license to preach in 1861, and in the fall of 1863 entered the Cincinnati Conference. He was ordained deacon in 1865, but consumption had seized upon him, and he died Nov. 26, 1866. He was a modest, teachable, and kind. See Minutes of Annual Conferences, 1866, p. 150.

Spain (España, Rom. xxv, 28; 1 Tavstia, 1 Mac. viii, 3; Vulg. Hispánia). This name was anciently applied to the whole peninsula which now comprises Spain and Portugal (Celsius, Not. i, 51 sq.). The early history of Spain is enveloped in great obscurity. The natives were called Iberians, the country Iberia, and one of the chief rivers the Iberus (the Ebro); and William von Humboldt has shown that the Iberian language was the same in every part of the country, and that it exists with certain modifications in the modern Basque. The Carthaginians, during the flourishing times of their republic, established many settlements upon the Spanish coast, such as Cartagena (now Cartagena), and Malacca, the royal city (now Malaga). Gades (now Cadiz) was a Phoenician settlement, probably coeval with Cartaghe, itself, was never subject to Carthaginian rule, and during the Punic war embraced Italy; and the site of Carthago Nova is that of the ancient Hamilcar Barca's and Hannibal, a considerable part of Spain became a Carthaginian colony. It gradually passed under the power of the Romans, and in the apostolic period formed no inconsiderable portion of the Roman empire. See Smith, Dict. of Geo. a. v. "Hispania" and some of our space occupied by body. It is different from body as that which contains is different from that which is contained. Space, then, is place potentially; and when it is filled with body, then it is place actually. See Krauth's Fleming, Vocabulary of the Philosophical Sciences, n. v.; Ueberweg, Hist. of Philosophy (see Index).
whose alliance with the Phoenicians enlarged the circle of their geographical knowledge to a very great extent. See Tarsus. The local designation, Tarshish, representing the Tarshish or Tarshis, probably prevailed, probably until the name of the Roman wars in that country reached the East, when it was superseded by its classical name, which is traced back by Bochart to the Semitic *taqflan*, "rabbi," and by Humboldt to the Basque *Esparia*, descriptive of its position on the edge of the Basque provinces. The Latin form of the name is represented by the above passages which contain all the Biblical notices of Spain: in the former the conquests of the Romans are described in somewhat exaggerated terms; for though the Carthaginians were expelled as early as B.C. 206, the native tribes were not finally subdued until B.C. 25, and not until then could it be said with truth that "they had conquered all the place" (I Mac. viii. 4). It seems clear from Rom. xv, 24, 28, that Paul formed the design of proceeding to preach the Gospel in Spain. That he ever executed this intention is necessarily denied by those who hold that the apostle sustained but one imprisonment at Rome—namely, that in which the Acts of the Apostles leave him; and even those who hold that he was released from this imprisonment can only conjure that in the interval between it and the second he fulfilled his intention. There is, in fact, during the three first centuries no intercourse of the subjects of a vague region, by Clemens, which is open to different explanations; and later traditions are of small value. See Paul. The mere intention, however, implies two interesting facts, viz, the establishment of a Christian community in that country, and this by means of Hellenistic Jews resident there. We have no direct testimony to either of these facts; but as the Jews had spread along the shores of the Mediterranean as far as Cyrene in Africa and Rome in Europe (Acts ii, 10), there would be no difficulty in assuming that they were also found in the commercial cities of the eastern coast of Spain. The early introduction of Christianity into that country is attested by Ireneus (i, 3) and Tertullian (Adv. Jud. T.) An inscription, purporting to record a persecution of the Spanish Christians in the reign of Nero is probably a forgery (Gieseler, *Church Hist.*, i, 82, note 5).

**SPAIN.** In ancient times what is now the kingdom of Spain was called Iberia. Its Latin name was Hispania, which, changed into Spanish, became Espana. With Portugal, it forms what is called the Pyrenean Peninsula, the whole constituting the most southerly and also the most westerly part of Europe. The average breadth of the whole peninsula is not far from 490 miles, its length, that of nearly 2,800,000 square miles. The area of Spain, which occupies by far the greater part of the Pyrenean Peninsula, is a little more than 184,000 square miles. It is bounded on the north by the Bay of Biscay and the Pyrenees, on the east by the Mediterranean Sea, on the south by the Mediterranean, the Straits of Gibraltar, and the Atlantic Ocean, and on the west, its southwesterly section by Portugal, and its north-westerly section by the Atlantic Ocean.

**I. Physical Aspect.**—Spain has an extended coastline, it being not far from 1,400 miles in length, of which 770 miles belong to the Mediterranean and 600 miles to the Bay of Biscay and the Atlantic. A part of this coast-line is mountainous, and a part of it, especially to the south-west, is low and swampy, until it reaches the extreme south, where it rises suddenly to the well-known Rock of Gibraltar. Another noticeable feature in the Spanish physical aspect is the mountain system. Geographers lay down five distinct mountain belts, which are subdivided into minor ranges. These are the Pyrenees, which separate Spain from France, the Sierra de Guadarrama, the mountains of Toledo, the Sierra Morena, and the Sierra Nevada. Among the highest of these mountains are the Cerro de Mulhacen, 11,655 feet; Mount Nethou, 11,427 feet; Vignemale, 10,980 feet; Peak of Oo, 9730; and the Puerto del Pico, 9000. The river system of Spain embraces many deep and swiftly flowing streams. Among the largest of these are the Ebro, which flows east and empties into the Mediterranean, and the Douro, the Tagus, the Guadiana, and the Guadalquivir; the first two flowing nearly west and the last two south-west, and emptying into the Atlantic. Some of the smaller rivers are the Rio Guadalcaliar, and the Xucar. So long a coast-line as that of Spain furnishes, as might be supposed, many commodious bays and harbors. Among those on the east are Barcelona, Tarragona, Valencia, Alicante, and Cartagena; on the north are Santander and Bilbao. The physical features of Spain to which allusion has been made give to this country a marked variety in climate and soil and vegetable productions. The northern section of the kingdom is mountainous and hilly, and the character of the climate is such as to invite the labors of the husbandman. Accordingly this section of Spain has been given up largely to agriculture. The middle section is not so well situated. The absence of rains is followed by sterility and unproductive ness of the soil. There are great extremes of temperature, the summers being very hot and the winters very cold, while the springs and autumns are pleasant. Passing to the southern section, we find ourselves in a country having the characteristics of a tropical region. The climate is hot and arid, and the effect of the hot rays of the sun reflected from the lofty mountain-walls is very marked. And yet, as a whole, Southern Spain is exceedingly fertile. Frosts are not known in Andalusia. Snow seldom falls, and when it does melts at once. Such is the character of the climate and soil of the country that Spain ranks among the most fruitful of all the countries of Europe. Every kind of cereal can be grown in some part of the kingdom, and the fruits of the most northern part of the temperate zone and of the most southern part of the tropical regions are raised there. The cultivation of the vine has been carried to a high state of perfection, and the Spanish vines are reckoned among the finest in the world. Perhaps the most noted of these are the Xeres, or sherry, and the Malaga.

**II. Political Divisions.**—We give these as they were a few years ago, no essential changes having occurred since, with the population as shown by the census of 1884.

</table>
early period on the coasts of Spain, founding such places as Tarresus (the Tarshish of the Bible) and Gades, now Cadiz. Next came the Carthaginians, who succeeded in gradually subduing no small part of Andalusia, and brought it under submission to Carthage, B.C. 238. Then followed the conquest of Spain by the Roman arms, two centuries being required in almost half a century to subdue it. The Punic wars are among the most celebrated in history—wars which always more or less affected the fortunes of Spain, because of the intimate connection which that country held with Carthage, the rival and foe of Rome. Upon its subjugation the name by which the country had been known, Iberia, was changed to Hispania, and was brought into this region as far as the Roman power was divided by the river Ebro into two sections, the one called Celtiberia and the other Ulterior. These two sections Augustus formed into three, giving them the names of Bética, Lusitania, and Tarracon, the second of these divisions corresponding in large part with what is now Portugal. The Roman emperor, with a wise policy, removed the cohorts of the army, composed mostly of natives of the country, to other and more distant sections of the empire, substituting for them the imperial legions, and in this way Romanizing the country which he had brought under his subjection. The end aimed at was at least in great measure secured, and the Hispania was made very largely familiar in a social code and manners, and perhaps the wealthiest and the most productive of all the provinces annexed to the empire. Gibbon, quoting from Strabo and Pliny, after alluding to the circumstance that almost every part of the soil was found pregnant with copper, silver, and gold, says that "mention is made of a mine near Carthagena which yielded every day twenty-five thousand drachmas of silver, or about three hundred thousand pounds a year. Twenty thousand pounds' weight of gold was annually received from the provinces of Asturias, Galicia, and Lusitania." On the whole, general prosperity attended the administration of affairs under the emperors down to the death of Constantine, A.D. 337. Some what more than a half century passed away when the vast hordes of Northern barbarians, who brought such desolation to the Roman empire, had made no inconsiderable progress in their attacks upon their more civilized neighbors of the South. Spain fell before their victorious onward. The Suevi, Vandals, and other Germanic tribes so wasted the country that many parts of it became almost literally a desert. After the conquerors had somewhat restored the desolated region, there came another fierce tribe, the Goths, who under Wallia wrested it from their hands. The tribes which for so many years had held sway over the land were in part subjugated and in part destroyed or exiled from the country, and the Goths remained masters of nearly the whole of Spain (427).

We divide the history of Spain into three periods: first, from the earliest traditions respecting its settlement down to A.D. 427, when it fell into the hands of the Goths; second, from A.D. 427 to the latter part of the 15th century, bringing us to the reign of Ferdinand and Isabella; third, from this latter period to the present time.

1. There are some traditions which refer the early settlement of Spain to the grandson of Noah, Tubal, who was said to have conducted colonies thither from the East. These traditions can be placed in these early traditions. The Iberians are the earliest inhabitants of whom we have any trustworthy account. At what time the Celts migrated to this section of Europe, and precisely from what region they came, is matter of unsettled dispute. The Phoenicians, whose colonies were found in so many places, established themselves at an

III. History. We divide the history of Spain into three periods: first, from the earliest traditions respecting its settlement down to A.D. 427, when it fell into the hands of the Goths; second, from A.D. 427 to the latter part of the 15th century, bringing us to the reign of Ferdinand and Isabella; third, from this latter period to the present time.

1. There are some traditions which refer the early settlement of Spain to the grandson of Noah, Tubal, who was said to have conducted colonies thither from the East. These traditions can be placed in these early traditions. The Iberians are the earliest inhabitants of whom we have any trustworthy account. At what time the Celts migrated to this section of Europe, and precisely from what region they came, is matter of unsettled dispute. The Phoenicians, whose colonies were found in so many places, established themselves at an
against their attacks; and Roderic, who came into pos-
session of the throne in A.D. 680. A party was formed
against him which called to its assistance the Arabs
dwelling on the north coast of Africa, in Mauritania,
and hence called Moors—a name so memorable in sub-
sequent Spanish history. A battle, waged for three
days and three nights on the plains of the Spanish
side, was fought on the plains of Jereu de la Frontera
in July, 711, and the Goths were defeated. Other vic-
tories of the Moors in a few years brought the whole
of Spain, with the exception of some mountain fast-
nesses, under the dominion of the Moors. The story of
their rise and victories is too long to rehearse in
this place. There were periods of great prosperity
under the rule of the Moors. So celebrated became
some of their institutions of learning that they were re-
sorted to by Christian scholars from all parts of civilized
Europe. Gradually the Christians of Spain, who, un-
der the general subjugation of the country, had fled
to its hills and mountains, grew more courageous, and
were able not only to stand on the defensive, but even to
attack the common foe. Three confederated provinces—
Navarre, Castile, and Leon—took up arms against the
foe, and nearly succeeded in gaining a victory over the
Moors; but their success was given to their hitherto
successful career from which they never fully recovered;
and henceforth there was very distinctly a Christian
Spain in the more northerly sections of the country, and
a Mohammedan Spain in the more southerly sec-
tions, which were continually at war with each other.
Neither side was able to retain permanent possession
of its own domains. Petty rivalries existed among both
the Christian and the Moorish princes, which prevented
long-continued success on the side of either party. At
last, the Christian princes succeeded in laying aside for
a time their petty animosities, and formed a league
combining all the Christian forces. A sanguinary battle
was fought in A.D. 1212, on the river Tajo, between San-
ra Morena, in which the Moors were defeated. During
the next half-century the conquest of the Moors went
on. Their territorial limits continually grew more re-
stricted, until there was left to them little besides the
kingdom of Granada. At length, in the year 1492, in
the reign of Ferdinand and Isabella, the last sovereign
of Granada, Boabdil, was defeated, and the empire of
the Moors in Spain, after an existence of nearly eight
centuries, came to an end.

3. Our survey of the history of Spain from the over-
throw of the Moors, in the reign of Ferdinand and Isa-
bella, down to the present day, is too long to rehearse
at this rapid. The condition of the conquered race was made
exceedingly wretched, worse even, as it would seem, than
was that of the Christians while under the Saracen
authority. It has justly been remarked by Rob-
ertson, the historian, that "the followers of Mohammed
are the only enthusiasts who have united the spirit of
toleration with zeal for making proselytes, and who, at
the same time that they took arms to propagate the
doctrine of their prophet, permitted such as would not
embrace it to adhere to their own tenets and to practice
their own rites." As a consequence of the persecutions
which they suffered in the island of the Spaniards, the
Moors abandoned the country in which for so many
hundreds of years they had lived, and to the possession
of which their natural right was just as good as that of
the Spaniards. It is estimated that from the reign of
Ferdinand of Castile to that of Philip III more than
three millions of these people left their native land,
carrying with them not only a great part of their ac-
quired wealth, but that industry and love of labor which
are the foundation of national prosperity. Another
fateful blow to the prosperity of Spain was the expulsion
of the Jews, who directed the commerce of the country,
and held in their hands so large a part of its movable
properties, and in the form of the precious metals and of
costly jewels. The great events which occurred under the reign of

Ferdinand and Isabella are too familiar to need a special
recital, and we may pass on to the times of Charles V
(the title by which he is best known), being Charles I
of Spain, the grandson of Isabella. During his long
reign of forty years Spain reached the highest point
of her prosperity. What she accomplished on both
sides of the Pyrenees, in the reign of Charles V, was
where victorious in Europe, how the proud Francis I
of France and the Protestant princes of Germany were
humbled, and the onsets of the barbarous Turks were
repelled, and how Charles V saw himself standing first
among the sovereigns of Europe—all these things are
clearly known to readers of his history. Philip II succeeded
his father, Charles V. The great aim of his admin-
istration was the extirpation of heresy and the complete
establishment of the Roman Catholic faith. The proc-
ess of decay in Spain commenced under his reign. The
immense riches which flowed into the country from the
Spanish possessions in America proved a curse instead of
a blessing. The people became luxurious, indolent,
and effeminate, so that when Philip II, who, with
all the glaring faults of his character, was an energetic
monarch, died, and the sceptre came into the hands of
his successor, Philip III, a weak and unenterprising
man, the country fell from the heights of glory. The de-
dstruction or expulsion of hundreds of thousands of
Moriscos, descendants of the Moors, brought about the
same state of things in Spain which the destruction and
expulsion of the Huguenots had produced in France.
Some of the most profitable of the industrial arts almost
were closed to the country. Large sections of the country
were so completely depopulated that they have been
but little better than barren wastes ever since. Under
succeeding monarchs the decline in the fortunes of unhap-
Pyrenees Spain continued. The falling-off in the popula-
tion was so great that in thirty-two years, from 1668
to 1700, it had gone down from eleven millions to eight
millions, and now to six millions. Upon the death of
Anjou, a Bourbon prince, who was king of Spain
under the title of Philip V, a better day seemed to dawn
on Spain, not because her own sons took the lead in
civil affairs, but because they were guided by the more
skilful hands of French statesmen. But the claim of
Philip to the throne was resisted by Germany, England,
and Holland; and the "War of the Spanish Succession," continued on for thirteen years, was the result of the
controversy. Although Philip retained his throne, yet
he came out of the contest stripped of so small part
of the territories which had once belonged to Spain.
In the time, during which we have been civilized,
we find an improved state of things, at least so far as
the internal affairs of the kingdom were concerned.
Externally, however, constant humiliation attended the
military movements of Spain. Both on the land and
the sea defeat was the rule, victory the exception. In
1737 occurred the defeat of the Spanish fleet near Cape
St. Vincent, and the almost complete annihilation of
the combined fleets of France and Spain by Lord Nel-
son at Trafalgar, Oct. 21, 1805. A few years later we
saw Napoleon setting aside the claims of all aspirants
to royal authority in Spain, and placing his brother
Joseph on the throne. In succession everywhere we find
what was considered a high-handed outrage. A treaty of
alliance was formed with England, which recognised
Ferdinand VII as lawful monarch of Spain. Fortune, for a
time, everywhere favored the French
arms. The two victories of Wellington, however—that
at Victoria, June 21, 1813, and at Toulouse, April 10,
1814—turned the scale, and Spain was once more free.
But for years everything was in a most unsettled con-
dition. Liberal opinions gradually gained a foothold
among the people. Attempts were made to bring about
radical reforms. At times success seemed to crown
these efforts, but soon the order of things would be re-
versed. At length came great progress, and the liberal party be
thrown again into the shade. Such has been the state of things the last
half-century. The story of the reign of queen Isabella II is one of interest, but it is too long to relate in a brief article like this. It must suffice to say that from the time when she was declared to be of age, Nov. 8, 1843, down to her flight to France, on the defeat of the royal army at Alcaza, Sept. 28, 1868, her life and fortunes were of a singularly checkered character. The departure of Isabella led to the formation of a provincial government, which in a year or two was followed by the accession to the throne of king Amadeus, the second son of Victor Emmanuel of Italy, who accepted the crown Dec. 4, 1870. It was an uncomfortable position in which the new king found himself, and he resigned it Feb. 11, 1873. The attempt to establish a republic did not meet with success; the leader in that enterprise (Don Emilio Castelar), the efforts put forth by Don Carlos to obtain the throne, and the failure of both republicans and royalists to accomplish their purposes bring us down almost to our own times. Alfonso, the son of Isabella II, was proclaimed king Jan. 9, 1875, and is now apparently in permanent possession of the crown. But in a kingdom whose history for so many centuries has been a history of change and revolution there can be but little stability; and he must be a wise man who can with certainty predict what will be the condition of things in Spain a year hence.

IV. Religion.—When the Christian religion was introduced into Spain settled relations with ecclesiastical historians. Paul, writing from Corinth to the disciples in Rome, alludes to a journey which he proposes to take into Spain, but whether he went or not is not known. One of the fathers, Theodoret, says that after Paul was released from his captivity—when he had been tried at the bar of Nero and acquitted—he went to Spain, and there spent two years. In Conybeare and Howson's Life and Epistles of St. Paul, the authorities on the subject are given (ii, 437-439), and the conclusion is reached that the apostle went to Spain and there preached the Gospel. Tradition also asserts that James the elder went to Spain as a herald of the Gospel. If we come down to the times of the persecutions by the Roman emperors, we shall find abundant evidence that all along during those ages of trial through which Christianity passed, martyrs to the faith were found in Spain as well as in other parts of the Roman empire. The conversion of Constantine the Great, which in a year or two was followed by the conversion of the Roman army by the emperor, was the fruit of the faith which he had embraced. And when, subsequently, the Goths obtained possession of Spain, we find that as, in the lapse of time, the affairs of the kingdom became settled, the church was restored to the condition in which it had been. It was reconstituted by the nomination of bishops, and that he presided, if he wished, at ecclesiastical tribunals, convoked national councils, and regulated the discipline of the Church. In due time the supremacy of the pope came to be acknowledged, and the peculiarities of the episcopal form of Church government were generally carried out. There were metropolitan sees, the heads of which held jurisdiction over their subordinates; while these subordinates, in turn, exercised authority over the lower grades of the ministry. It is said that the cathedrals and parish churches were in general well endowed, lay patronage existed, and monasteries introduced. The conquest of Spain by the Moors introduced a new state of things into the country. The Moors were Mohammedans; but, as has already been stated, they were inclined to be tolerant so long as the Christians conducted themselves in an orderly manner and did not oppose or revile the religious faith of their conquerors. There were not wanting cases of persons who, because they could not do otherwise, in the exercise of their conscientious convictions, than attempt to make converts from Mohammedanism, or in some way show their contempt for the religion of the Moors, suffered martyrdom. A canfi!d review, however, of the whole history of Spain during the eight hundred years nearly that the Saxons held sway over a country now convinces us that the sufferings which the Christians endured during this very long period bore no comparison to those which the Moors endured in the comparatively short period that Philip II was on the throne.

Upon the expulsion of the Moors from Spain, the whole country may be said to have come under the jurisdiction of the pope of Rome, and, in this connection, to be as intensely Roman Catholic as any country in Europe, not excepting Italy itself. Previous to the year 1868 no other religion was recognised by law, and to attempt to introduce any one of the forms of the Protestant faith was an indefensible offence. This is not the place to mention the attempts of bishops to introduce the Roman Church for ages carried on against heretics and infidels, of the establishment and atrocities of the Inquisition,—first introduced by St. Dominic to "inquire" after the condition of the Jews and Moors who became Christians—or of the acts of the Jesuits in Spain. It is more pleasant to speak of the dawn of what, it is to be hoped, will prove to be a brighter day in respect to religious toleration. Although Protestantism has gained but the smallest foothold, comparatively, in the kingdom, and its followers are still subject to many disabilities, it is matter for congratulation that the right of private judgment in matters of religion is, in form at least, recognized. The hopes of the church may be cherished that persecution on account of one's religious faith will not again be sanctioned by law.

V. The authorities to which the general reader is referred on matters relating to the history, etc., of Spain are very numerous. Among English and American writers are Gibbon, Robertson, Hallam, Prescott, Irving, and Ticknor, whose Spanish Literature (N. Y. 1854) holds a place acknowledged even by Spanish writers to be second to the production of no other author. Sketches of the history of the introduction and progress of Christianity in Spain may be found in all ecclesiastical historians. Likewise all writers of French and English histories treat largely of matters connected with Spanish history, because of the intimate connection which these three countries have sustained to each other. The article in the Encyclopaedia Britannica gives a good account of the history of Spain. See also the following: Hurdado de Mendoza, Guerra de Granada, quarto, 1807; D. O. W., Historia de aquél Reino sus Rebeldos (Valencia, 1776, sm. 4to, new ed.); History of Spain, from the Establishment of the Colony of Gades by the Phœnicians to the Death of Ferdinand, ascribed the Sage, by the Author of the History of France (Lond. 1788), vol. i.-iii., map; Beawes, Civil, Commercial, Political, and Literary History of Spain and Portugal (ibid. 1793, 2 vols. fol.); Murphy, The History of the Mohammedan Empire in Spain, containing a General History of the Arabs, their Institutions, Conquests, Literature, Arts, Sciences, and Manners, to the Expulsion of the Moors, designed as an Introduction to the Arabic and Spanish Languages of Spain; Power, The History of Spain and Portugal, from the First Invasion of the Moors to their Ultimate Expulsion from the Peninsula (Lond. 1815, 8vo); Dunham, History of Spain and Portugal (ibid. 1832-33, 5 vols. 12mo); Viardot, Essai sur l'Histoire des Arabes et des Moors d'Espagne (Paris, 1833-34, 3 vols. 8vo); Mahon [Lord], History and Biography of the Succession in Spain (2d ed. Lond. 1866); Ahmed Ben Yusuf Teifache, Histoire du Mohammedan Dynastie in Spain, transl. by Pascal de Gayangos (ibid. 1840, 4 vols. 4to); Londonerry [Marquis of], Story of the Peninsula, New ed. revised, with considerable additions, 2d ed. Lord. 1849; Mahon [Lord], History of the Conquest of the Cid, from the Spanish (Lond. 1846, 8vo); Ferreras, Histoire Générale d'Espagne, transl. from the Spanish by M. d'Hermilhy (Amsterdam, 1851, 10 vols. 4to). (J. C. S.)

Spain, Hartwell, a minister of the Methodist
Episcopal Church, South, was born in Wake County, N.C., Feb.10,1785. He was converted in August, 1810, licensed to preach in November, 1816, and admitted into the South Carolina Conference in December. In 1821 he was made a supernumary, locating the following year. In 1828 he was readmitted; in 1837 he was again supernumary. In 1840 he was made a member of the Columbia District; in 1844 was supernumary, and continued in this relation during his life. He was a delegate to the General Conference of 1832, and re-

Spalatin, Giongo, the friend of Luther and chap-
lain of the elector Frederick the Wise of Saxony, a
leading Reformer and judicious superintendent of the
churches, was born A.D. 1481 at Spalt, in the diocese of Eichstädt, whence was derived the name Spalatin, his real name being Burkhardt. He attained his bac-
calaureate at Erfurt in 1500, and from 1501 was a fel-
low-student with Luther. In 1502 he was made master
at Wittenberg, but soon returned to Erfurt, where he
became tutor (1505) in a patrician family, and first
learned to know the Bible, a copy of which he pur-
chased at great cost. He was ordained priest in 1507,
and was named in the part of Hans Eppen, a member of the
ordi-
thora; and a year later was called to assume, in addition
to his parochial duties, the functions of teacher in the
neighboring convent of Georgenthal. His reputation had,
however, already extended beyond the narrow lim-
its of the field of labor to which he was assigned; and
he was called to the electoral court in 1509 to assume
charge of the education of the young crown-prince, John
Frederick. Two years later he exchanged his place at
court for the post of tutor to Otto and Ernest of Brun-
swick-Luneburg, the elector's nephews, who were then
students at Wittenberg; and at the same time he was appointed (1513) chaplain of the Abbey of Alten-
burg. From this period dates the intimate friendship
between Luther and Spalatin and between Spalatin and
other Reformers, e. g. Melancthon, Justus Jonas, Link,
Bugenhausen, Amsdorff, etc. His relations with the elec-
tors likewise became more intimate, so that his advice
and assistance were sought when the latter founded the
Church of All-Saints at Wittenberg, and the university
library (1512), and he was made librarian. In 1514
Spalatin was appointed chaplain and private secretary
to the elector, and immediately became one of the most
influential personages of the electoral court. He placed
himself, however, especially at the service of the
Reformation, and became the medium through which
Luther was wont to influence the elector. Rome recog-
nised his power, and every important measure of
the time showed traces of his shaping hand. He has been
charged with timidity and an excessive fondness for
peace; but all his actions show that he was possessed of
a noble and upright character, and governed wholly by
inflexible and firm religious principle. Both as a
man of affairs and as a literary character he established
for himself an unequivocal reputation among his con-
temporaries. In the former capacity he accompanied
him to the diet at Worms, which his presence at the elec-
tion of emperor in 1519, the coronation of Charles V in
1520, the Diet of Worms in 1521, the Diet of Nurem-
berg in 1523 and 1524, conducting the electoral corre-
ponde-
ance and participating in the progress of events either
directly or by means of counsel and influence. In
literature his attention was fixed principally on his
historical studies, particularly on the history of Germany;
and he wrote, Christliche Religions-Händelt, or Religions-
suchen, beginning in 1518 (subsequently published by
Cyprian under the title Reformations-Analen), besides
undertaking the collection of materials for the history
of emperors, emperors, 1526, 1528, 1529, 1530, so that
the latter is known as the "Saxon historiog-
rarphy." On the death of the elector Frederick, in
1525, Spalatin was appointed by John the Constant to
the post of evangelical superintendent of Altenburg in
connection with the diocese of Altenburg. He now
married Catharine Heidenreich, and established a home
at Altenburg. In 1526 he attended the Diet at Spires,
in the suite of the elector. During 1527 to 1529 he par-
ticipated in a visitation of the churches and schools.
In 1528 he accompanied the elector to the Council of
1531 at Cologne, where a protest against the election
of Ferdinand as king of Rome was premeditated. At
the Convention of Schweinfurt in 1532 he contributed
materially towards the securing of the Reformation in
that vicinity. Such incessant labors, added to a con-
tinual literary occupation, the unceasing activity of his
strength made by his prince and the churches, impaired
his health and necessitated his release from a portion of
his multifarious duties. He was, however, sent to
Weimar in 1538, when the papal legate Rangoni visited
that place in order to initiate measures for the calling
of a council. In 1534 we find him journeying with the
elector through Northern Germany, and in the follow-
ing year through Bohemia and Moravia to Vienna,
where the elector John wished to make his peace with
Ferdinand. He was present at the renewal of the Small-
kald League, and then went to Venice to make pur-
cesses for the library of Wittenberg; and, on his return,
he was named (1537) one of the members of the Aca-
cord. In 1537 he signed the Articles of Smalkald, and
undertook the visitation of the Church at Freiberg.
He then attended the Convention of Zerbst, And defend-
ed the claims of his prince to the county of Magdeburg.
He was finally selected to attend the proposed conven-
ation at Nuremberg in 1538, which was to complete the
Concord initiated at Wittenberg, and to share in the
visitation of the churches of ducal Saxony, now under
the rule of duke Henry. From this time he was con-
fined to the vicinity of his home; but continued abund-
ant in labors, literary and official, until he died, Jan. 18,
1545. His widow followed him Dec. 5, 1551. The MS.
remains of Spalatin are preserved at Weimar and Gotha;
and portions of his works have been published in dif-
ferent, but always faulty and incomplete, editions. A
new edition, under the title Georg Spalatins Historischer
Nachlaß und Briefe, was undertaken by Neudecker and
Freller, and the first volume appeared in 1851.
The style of Spalatin as a writer was simple, but wanting in
attractive qualities. His works are, however, rich in
documentary records. In addition to those already
indicated, they include a number of poetic productions, in
which considerable ability is displayed. See Schlegel, The
Historians of Saxony (Jena, 1818); Schneider, Geschichte
Sax. (Jena, 1858); Wagner, G. Spalatin u. d. Reform. d. Kirchen u. Schulen zu Altenburg (Alten-
burg. 1830).

Spalding, Johann Joachim, a rationalizing theologian
germany, was born Nov. 1, 1714, at Tribes,
sees, in Swedish Pomerania, and was educated at Strat-
and Rostock (1731) at the time when the Wofian
philosophy and Pietism were the subjects of controversy.
He studied the current philosophy in the writings of
Wolf, Bilfinger, and Canz, and defended its principles
until association with the professors at Greifswald,
who were then known as the "philosophers of Sax-
ony," so that he became known as the "Saxon historiog-
rarphy." On the death of the elector Frederick, in
1525, Spalatin was appointed by John the Constant to
by his renunciation of the ordinary pulpit phraseology and his adoption of a direct, clear, and simple style; but he received, not the less, many encouraging proofs of a growing appreciation of his labors and of dawning success. He continued his literary labors also, devoting himself largely to the study of the Deistic and anti-Deistic literature of England, and translated some of the current works on either side into German, among them Butler's *Analogy of Nature and Revealed Religion*. From Lassau Spalding was transferred in 1757 to Barth (in Pomerania) as provost and chief pastor. The Pietistic tendency, emanating principally from Mecklenburg, induced him to commit to writing his *Thoughts on the Value of the Feelings in Christianity* (Gedanken über den Werth der Gefühle im Christentum [1761 and often]). The purpose of this work was to distinguish true religious feeling from that which is false and artificial; but the execution of that purpose is marred by the inability of the author to clearly apprehend the profound nature of his subject. His conception of religion continued to be the one-sided apprehension by which morality takes its place. At this time he was visited by Lavater, Füssli, and Felix Hess, and entered into friendly relations with the former, which continued unbroken despite the difference of views and temperament existing between them. In 1764 Spalding was once more transferred to a new post. He became provost and chief pastor at the Church of St. Nicola in Berlin, and at the same time high-consistorial councillor. His sermons proved very acceptable to cultured minds, a feature which he declared to be "a doubtful evidence of their utility." He now published (1772) an anonymous work on the utility of the pastoral office, etc. (*Über die Nutzbarkeit des Predigtwesens u. deren Beförderung*), which reappeared, bearing his name, in 1773, and was sharply criticised by Herder (*An Prediger: frische Provinzialblätter*). Spalding had stripped the pastoral office of every ideal quality, while Herder took his position with the Scriptures, and asserted a priestly and prophetic character for the ministry. The inception of the work was occasioned by the desire, then generally prevalent, to bring Christianity into harmony with the culture of the age, and to protect it against the attacks of a frivolous infidelity. The intention was to give up all unessential matters and preserve only what is really essential. This spirit led Spalding to compose a further work, *Vertraute Briefe die Religion beträffend* (Familiar Letters pertaining to Religion), anonymously published in 1784 and 1785, and with the author's name in 1788. The accession of Frederick William II, in 1786, was signalized by the publication of a rigid decree in favor of orthodoxy, and Spalding was thereby induced to resign his position. He preached his last sermon Sept. 25, 1788, after he had vainly sought to obtain some modification of the obnoxious edict. His last work was published by his son, Georg Ludwig, in Berlin, 1804. It is entitled *Religion, eine Angelegenheit des Menchen (Religion, a Concern of Man)*. He died May 28, 1804, leaving behind a reputation for sincere piety, according to the standards of his time, and modified by a constant endeavor to secure it the clearest possible expression. If a rationalist, he was certainly one of the noblest and most pious representatives of that tendency. His pure theism, moreover, affords an attractive contrast to all pantheistic conceptions of the idea of God.

Spalding, Josiah, a Congregational minister, was born at Plainfield, Conn., Jan. 10, 1751. He graduated at Yale College in 1778; was ordained at Uxbridge, Mass., Sept. 11, 1782; dismissed in 1787. After dismissal he was installed at Washington, Mass., and in 1784 at Buckland, Mass., where he died, May 8, 1825. He was a faithful minister of evangelical sentiments." See Congregational Quarterly, 1858, p. 44.

Span (ם), zireth, according to the rabbins the little finger, Exod. xxvii, 16; xxxix, 9; 1 Sam. xvi, 4; Isa. xii, 12; Ezek. xxiii, 13; elsewhere some form of רפיע, tapich, to spread upon the hands; hence to extend a palm's breadth, Isa. xlvi, 13; or carry in the arms, Lam. ii, 20, "a span long."); a Hebrew measure of three hand-breaths, or twelve finger-breaths; apparently half a cubit (comp. Exod. xxvi, 10 with Josephus, Ant. iii, 6, 5). See METROLOGY.

Spandrel, the triangular spaces included between the arch of a doorway, etc., and a rectangle formed by the outer mouldings over it. The term is also applied to similar spaces included between arches, etc., and straight-sided figures surrounding them: they are usually ornamented with tracery, foliage, shields, or other enrichments. In the Perpendicular style the doorways most commonly have the outer mouldings arranged in a square over the head so as to form spandrels above the arch. In the earlier styles this arrangement is very seldom found in the doorways, but spandrels are sometimes used in other parts of buildings, especially in decorated work, in which they are frequent, as at Ely. In the west door of the chapel of St. Alban's Abbey Church, cir. 1400, a spandrel in each side of the doorway contains a small representation of the crucifixion.

Ely Cathedral.

Magdalen College, Oxford, the spandrels of the outer arch (which stands considerably in front of the actual doorway, so as to form a shallow porch) are cut quite through and left open. The spandrels of a door were sometimes termed the kame or knouch of a door.

Spangenberg, Augustus Gottlieb, a bishop of the Moravian Brotherhood, was born at Klettenberg, Hanover, July 15, 1704. In 1722 he entered the University of Jena as a student of law, but he soon gave up this pursuit to devote himself to the study of theology. The famous Buddeus was his professor, and he devoted all his energies to his theological studies, to such a degree that he was allowed to lecture from 1726 to 1732 on theological topics. In 1737 he made the acquaintance of count Zinzendorf and the Moravians, and in 1755 we see Spangenberg at Herrnhut, where he began a very useful work as assistant minister. For many years he fulfilled the most important duties for the Brethren by visiting their churches in North America, the West Indies, and in England, confirming them in the faith. In 1744 he was ordained Moravian bishop at Herrnhut, and in 1762, after Zinzendorf's death, he became his successor as bishop of Barby, where he died, Sept. 18, 1792. He was a man of great piety and talent. Knapp calls him the "Melanchthon of the Brethren."

Spangenberg, Cyriacus, a German theologian in repose during the second half of the 16th century, was born June 17, 1528, at Nordhausen, where his father was then a resident pastor. He entered the University of Wittenberg with a thorough preparation as respects the ancient languages, dialectics, and rhetoric at the early age of fourteen, and graduated with honor in 1546. His father had, in the meantime, removed to Eisenben, where he filled the positions of pastor and general superintendent of the county of Mansfeld, and Cyriacus was, through his influence, immediately appointed teacher. When he was twenty-five years of age (in 1550), he succeeded the successor of the pastor of his now deceased father, and was soon afterwards chosen by the counts of Mansfeld to be the town and court preacher as well as general dean of the county. While diligently employed in his ministerial work his zeal for a pure Lutheran orthodoxy involved him in controversies which, in the end, wholly destroyed his earthly comfort. He took an active part so early as 1556 in the discussions of the Synod of Eisenach, at which the doctrine of George Major (q. v.) that good works are necessary to salvation was debated, violently opposing that opinion. Graver consequences for him were involved in the party contest of 1557, in which he himself broke out in 1557 between Victorin Strigel, who taught the co-operation of the human will with divine grace in the work of conversion in a manner which contradicted Luther's doctrine of man's natural inability, and Matthias Flacius, who, as leader of the strict Lutherans, taught that the natural man cannot co-operate with God, but only resist his saving grace. Spangenberg supported the latter view; but, as the Mansfeld clergy generally were of like opinion with himself, his position was pleasant and his opportunities for successful work large and frequent. Repeated publications extended his reputation so far beyond the limits of his native country and brought him calls to positions in various important cities, which he declined, with the exception of an invitation to Antwerp, whither he went in October, 1566, to assist in establishing a Lutheran organization among its churches. The Flaccian controversy, however, destroyed the organization thus effected, and caused a part of the Lutheran community of Antwerp to emigrate, in 1565, to Frankfort-on-the-Main. Soon after Spangenberg's return (January, 1567) to Mansfeld the controversy broke out afresh. The occasion was given by the publication of a learned treatise on original sin by Wiegand, professor of theology at Jena, in which he opposed the ideas of Flacius. A second work by the same author condemned, in its preface, the adherents of Flacius, and Spangenberg in particular, as heretical Manicheans. Spangenberg replied vigorously, asserting the strict Lutheranism, rather than Manicheanism, of his own party, and forwarding to the highest authority, Krüger, who had ventured to preach against his view, to occupy the pulpit. A colloquy was held during two days in July, 1572, by order of the counts of Mansfeld, who desired to reconcile the parties, but without effect. The trouble grew to such dimensions that the ruling families were incited to take sides, which resulted in a conflict of interest that was finally turned into faction. The elector of Saxony, as feudal lord of the county, finally occupied the town and castle of Mansfeld with troops and dealt harshly with the supporters of Flacius. Spangenberg was compelled to flee clothed in the dress of a midwife. He tarried for a time in Thuringia, and on Sept. 9, 1577, engaged in a colloquy at Sondershausen with Jakob Andræi (q. v.), the results of which he published; but instead of effecting an amelioration of his condition, as he had expected, he only in the exacerbation of the count Volmar of Mansfeld, his patron from his ancestral seat. The two now went to Strasburg, where count Volmar died in the following year. Soon afterwards Spangenberg became pastor at Schlitzsee, on the Fulda, but was again driven out in consequence of the zeal with which he defended his views of original sin. The landgrave, however, afforded him a refuge near Smalkald, where he devoted himself exclusively to literary work and obtained a meager support; but his foes gave him no rest, and he finally retired with his wife to Strasburg, where he received a cordial welcome from the canon, count Ernest of Mansfeld. He died Feb. 10, 1604. Spangenberg died for himself, despite his untoward circumstances, a distinguished place among the scholars of his time, particularly with respect to theology and history. His writings comprise numerous works on original sin, sermons on various subjects, doctrinal and ethical treatises, and expositions and several philological works are either wholly confined to the realm of the Church history of Germany or serve to elucidate particular points in that history. They are very numerous. All his works are written in pure and generally appropriate language, forceful and direct. See Leucfeld, *Historia Spangenbergiana,* etc. (Quedlinb. 1712, 4to); Adam [Melch.], *Vita Theol., Geru., (Heidelberg. 1620); Kindt-vater, *Nordhsm Illustr., p. 280 sq.; Schiltzseburg, *Catalogus Harevit. Lib. III. (Franct. 1597–99); Musius [Sim.], *Proef van Plac. Clar. S. S.; Arnoldi, Kirchenhist., iv. 86 sq.; Walch, *De Histor. Doctrina de Pecatu Original., in 1783 became a bishop and was placed beyond the limits of his native country.

Spangler, Isaac, a minister of the Methodist Episcopal Church, South, was for many years a member of the Virginia Conference of the Methodist Protestant Church. In 1876 transferred to its Alabama Conference, and after serving that charge he was engaged in secular pursuits until 1869. In that year he was received by the Montgomery Conference into the Methodist Episcopal Church, South, and appointed Sunday-school agent. He afterwards became pastor, but was superannuated, and died in Tuskegee, Ala., April 23, 1874. See Minutes of Annual Conferences of the M. E. Church, South, 1874, p. 44.

Spanheim, Ezekiel, a diplomatist and philologist, rather than clergyman and theologian, was born at Geneva in 1629. At the age of sixteen he defended *Thees contra Ludovicum Copellum pro Antiquitate Hieraticum* (Lugd. Bat. 1645). A response by *Bochart called forth his Dierentum et Literarum Aestemium* (1648). In 1650 the government of Geneva offered him the chair of philosophy, but he preferred that of eloquence, which was accordingly given him in 1651. He had probably been consecrated priest at Leyden, where he was a student; but his theological proclivities were such that he withdrew in 1657 into the Latin side of the Great Council. Soon afterwards he became tutor to the son of the elector-palatine Charles Louis, and em-
employed the leisure afforded him in that station for the
study of German national law and the history of the
Kurmainz, in several writings against Des Cartes and Coc-
ceius. He was four times rector and held the office
of chief librarian, and, in addition, was a most pro-
liptic writer, achieving such success in the latter charac-
ter that he was dismissed from teaching in order that
he might devote himself exclusively to authorship.
He died in 1701, after having arranged for the publica-
tion of the first volume of his Complete Works. Two
volumes remained, which were given to the public by
his pupil and colleague John Marck, under the title
*Opera quatenus Complectuntur Geogr. Chronol. et Hist.
fol.). The works of Spanheim cover a wide range and
encompass a wide range of subjects, from history to theology, an intro-
duction to the Scriptures, exegesis, Biblical archeology
and Church history, dogmatics, polemics, and practical
theology, and also sermons. See Nicéron, *Mémoires pour
servir à l'Hist. des Hommes Illustres* (Paris, 1784), xxix,
11—26; Chaufepié, *Nouveau Dictionnaire Histor. et Cri-
tique* (Amst. et La Haye, 1750—56); comp. also the
discourse preached at Spanheim's funeral (Jan. 6, 1701)
and contained in the *Complete Works* of Jakob Trig-
land.

**Spanish Architecture.** In the South few early
Gothic buildings remain, and those which exist were
domestically erected in the 15th century; but in the North
the Obra de Gólos (Gothic), the Romanesque, and
the Geometrical (Tudor) and Renaissance styles are
prevalent in the German Middle Pointed, as well as French
motives, clearly influenced the designers in Spain. The
old system of parallel eastern apses gave way to the affectation for a
chevet, with its processional path and choir of chapel.
The constructional choirs are usually very short.

The choir of a Spanish church occupies the eastern half of
the nave. The western part of the church is called the
*trascoro*; the part eastward of the choir is called
*entre dos coros*. Under the cimborio, or lantern, is the
crucero, or crossing. A passage fenced with screens of
metal-work affords the clergy a means of access to the
screen in front of the altar in the sanctuary, or *capilla
capital*. In the centre of the nave are several lecterns
for the choir-books; and on the west, north, and south
are stalls, the bishop occupying a central stall facing
east. Pulpits are erected against the western faces of
the eastern pillars of the crossing. This curious ar-
rangement, which has been followed at Westminster
Abbey, is probably of medieval origin. About the 17th
century, in parish churches, large flights of galleries of stone were erected for the choir, as in
Coimbra, Braga, and Braganza, and provided with
ambones at the angles. The choir was in the centre of the
nave at the Lateran, St. Mary the Great, St.
Laurence's, and St. Clement's, at Rome, by a basilique
arrangement.

**Spanish Version.** See *Romanic Versions.*

**Sparianis.** In Greek mythology, was a daugh-
ter of the Spartan Hyacinthus, who was sacrificed in
Athens at the grave of the Cyclop Gynastes (Apollod.
iii, 15, 8).

**Spark (טֶבַשׁ), kiddel, so called from being struck
off; מָשָׁה, n fists, so called from shining, Isa. i., 31; שִׁבַּדְבָּל, shabb, flame, Job xviii., 5; מָשָׁה, zikith, burning
arrows, Isa. i., 11; else where מָשָׁה, ben-rashheph, a son of flame, Job v., 7.

**Spark.** Thomas, an English clergyman, was the
son of Archibald Spark, minister of Northrop, in Flint-
sire, and was born in 1635. He was educated at West-
minster School and Christ Church, Oxford, which he
entered in 1672. After his ordination he was appointed
chaplain to Sir George Jeffreys. At his death, Sept. 7,
1692, he was rector of Ewehurst, in Surrey, to which
he had been instituted in 1687; of Norton (or Hognorton).
in Leicestershire; a prebendary of Lichfield and of Rochester, and a D.D. He published a good edition of Lactantii Firmiani Opera qua Estant, ad Fidem MSS. Recognita, et Commentaria Illustrata (Oxon. 1864, 8vo) — and Notes in Libro Sex Nominum Zoologicorum Contitis (ibid. 1862). Soon after he was presented by Arthur lord Grey to the parsonage of Bletchley, in Buckinghamshire. He was chaplain to Cooper, bishop of Lincoln, from whom he received in 1573 the archdeaconry of Stowe. In 1581 he took his divinity degrees, and in 1582, finding that he could not attend to his archdeaconry because of its distance from his cure, he resigned it, but in September of the same year he was installed prebendary of Sutton-in-the-Marsh in the Church of Lincoln. In 1606 he represented the Puritans in the conference at Hampton Court, having also been one of their champions at Lambeth in 1634. The issue of the Hampton Court Conference was that he inclined to conformity. He died at Bletchley, Oct. 8, 1616. Wood says he "was a learned man, a solid divine, well read in the fathers, and so much esteemed for his profundity, gravity, and exemplary life and conversation that the sagacity of the university thought it fit after his death to have his picture painted on the wall in the School Gallery among the English divines of note there." His works are, A Brotherly Persuasion to Unity and Uniformity in Judgment and Practice, etc. (Lond. 1607, 4to); — A Comfortable Treatise for a Troubled Conscience (ibid. 1589, 8vo); — Brief Catechism (Oxon. 1588, 4to); — Answer to Mr. John d'Alemb's Notable Discourse against Hersesies (ibid. 1591, 4to); — The Highway to Heaven (Lond. 1597, 8vo), a treatise on John i, 37-39; — Funeral Sermon on the earl of Bedford and another on lord Grey.

Sparks, Giles B., a minister of the Methodist Episcopal Church, South, was born in Georgia in 1815, and professed religion in his fourteenth year. He was educated at Lagrange and Covington, Ga.; taught a classical school at Oak Bowery and Tuskegee, Ala.; was admitted on trial in the Alabama Conference in 1844, and appointed to the Franklin Street Church, Mobile, Ala. In 1846 he was called to Columbus, Miss., in 1846 to Wadesboro', N.C., in 1847 — 48 of the Hampton Court Conference, where he died Sept. 26, 1848. Mr. Sparks was characterized by his gentlemanly nature, his smoothness, and peculiar persuasive manner. He was an eminence as a Biblical student, and as a pastor had few superiors. See Minutes of Annual Conferences of the M. E. Church, South, 1845-53, p. 296.

Sparks, J. O. A., a minister of the Methodist Episco- pal Church, South, was born about 1835, and was admitted on trial into the Florida Conference in 1864, and ordained deacon in 1866. He died of yellow fever, May 18, 1869. See Minutes of Annual Conferences of the M. E. Church, South, 1869, p. 328.

Sparrow (τοξον, τσιπόρ; Sept. ἄρσην, ἄρσην, τὸ πετελίνον, στραγών; χίμαρος in Neh. v, 18, where it was probably read τσιπόρ; Vulg. avis, avolum, passer). The above Hebrew word occurs upwards of forty times in the Old Testament. In most cases it refers indifferently to any kind of bird, as is clear, especially from its use in Gen. iv. 25; Ps. xiv. 7. In a few cases, however, except in two τσιπόρ is rendered by the A. V. indifferently "bird" or "owl." In Psa. xxxiv. 3 and 5, i, the A. V. renders it "sparrow." The Greek στραγόν (A. V. "sparrow") occurs twice in the New Testament. (Matt. x. 29; Luke xii. 6, 7) where, the Vulg. has passive. Tσιπόρ, from a root (τσιπος) signifying to chirp or twitter, appears to be a phonetic representation of the call note of any passerine bird (comp. the Arabic عسيف, "a sparrow"). Similarly the modern Arabs use the term zaisk for all small birds which chirp, and serauf not only for the starling, but for any other bird with a harsh, shrill twitter, both these being evidently phonetic names. Tσιπόρ is therefore exactly translated by the Sept. στραγόν, explained by Moschopulus τὰ μικρὰ τῶν ὄρνιθων, although in Homer sometimes it has been understood in a more restricted sense (see Athen. Deipn. i, 391, where two kinds of στραγόν are in the more restricted signification are noted); but in general both terms properly designate any small bird (Gen. xv, 10; Lev. xxiv, 4, 53, marg.; Isa. xxxii, 5; Matt. x, 29, 31; Luke xi, 6, 7). The Hebrew name evidently included all the small birds denominated "clean," or those that might be eaten without violating the precepts of the law, including many insectivorous and frugivorous species, as all the thrushes, the starlings, the larks, the finches, and some others (Deut. iv, 17; Job xii, 5; Psa. viii, 8; xi, 1; civ, 17; Prov. xxvi, 2, xxvii, 8). Accordingly we could not fail to find there somewhat the or- nithological features and customs of Palestine. See Bird.

1. Numerous Species.—It was reserved for later naturalists to discriminate the immense variety of the smaller birds of the passerine order. Excepting in the cases of the hoopoes, the warblers, the thrushes, and the larks, the history of the passerines, particularly in Asia Minor, is not in a satisfactory manner comprehended. Yet in few parts of the world are the kinds of passerine birds more numerous or more abundant than in Palestine. A very cursory survey has supplied a list of above one hundred species of birds of this order (see Ibis, i, 26 sqq., and iv, 277 sqq.). But although so numerous, they are not generally noticeable for any peculiar brilliancy of plumage beyond the birds of our own climate. In fact, with the exception of the denizens of the mighty forests and fertile alluvial plains of the tropics, it is a popular error to suppose that the nearer we approach the equator, the more gorgeous necessarily is the coloration of the birds. There are certain tropical families with a brilliancy of plumage which is unri- valled elsewhere; but any outlying members of these groups—as, for instance, the kingfisher of Britain, or the see-eaters and roller of Europe—are not surpassed in brightness of dress by any of their Southern relations. Ordinarily in the warmer temperate regions, especially in those which, like Palestine, possess neither dense forests nor morasses, there is nothing in the brilliancy of plumage which especially arrests the attention of the observant. It is therefore not necessary for us to enumerate in detail any of the smaller birds, although the species are generally divided indirectly under the term tσιπόρ, ερί- διον, or passer. The proportion of bright to obscure colored birds is not greater in Palestine than in England; and this is especially true of the southern portion. Judaea, where the wilderness, with its bare hills and arid ravines, affords a home chieftly to those species which rely for safety and concealment on the modesty and inconspicuousness of their plumage.

Although the common sparrow of England (Passer domesticus, Linn.) does not occur in the Holy Land, its place is abundantly supplied (see Thomson, Land and Book, 1, 53, 397) by two very closely allied species of the same genus. The English sparrow (Passer domesticus, Pallas) is also very common, and may be seen in numbers on Mount Olives, and also about the sacred enclo- sure of the temple. In addition to these, there are perhaps the exact species referred to in Psa. lxxxiv. 1, 3, when the Hebrew hath found a house. Though in Britain it seldom frequents houses, yet in China, to which country its eastward range extends, Mr. Swinhoe, in his Ornithology of Amoy, informs us its habitats are precisely the
of our familiar house-sparrow. Its shyness may be the
result of persecution; but in the East the Musul-
mans hold in respect any bird which resorts to their
houses, and in reverence such as build in or about the
mosques, considering them to be under the Divine pro-
tection. This natural veneration has doubtless been
inherited from antiquity. We learn from Elian (Var.
Hist. v. 17) that the Athenians condemned a man to
death for molesting a sparrow in the Temple of Esca-
lapius. The story of Aristocles of Cyme, who reprobated
the cowardly advice of the oracle of Branchus to sur-
render a suppliant by his symbolic act of driving the
sparrows out of the temple, illustrates the same senti-
ment (Herod. i. 150), which was probably shared by Da-
vid and the Israelites, and is alluded to in the psalm.
There can be no difficulty in interpreting ΘΤΤΥΞΩ, not
as the altar of sacrifice exclusively, but as the place of
sacrifice, the sacred enclosure generally, το τιμαως,
"sanctuary." The interpretation of some commentators,
who would explain ΘΤΤΥΞΩ in this passage of certain sa-
cred birds, kept and preserved by the priests in the
Temple, and the sacredness of this of the Egyptians seems
to be wholly without warrant (see Bochart, iii. 21, 32).

Most of the common small birds are found in Pal-
estine. The starling, chaffinch, greenfinch, linnet, gold-
finch, corn-bunting, pipits, blackbird, song-thrush, and
the various species of waggait abound. The woodlark
(Alauda arvensis, Linn.), crested lark (Galericera cristata,
Boie.), Calandra lark (Melanocorypha rufo-vestita, Boie.),
short-tailed lark (Calandrella brachyactyla, Kaup.), Is-
abel lark (Alauda deserti, Licht.), and various other des-
cert species, which are snared in great numbers for the
markets, are far more numerous on the Southern plains
than the skylark in England. In the olive-yards, and
among the brushwood of the hills, the Oriental bunting
(Eunicea hortulana, Linn.), and especially Cretzsch-
mauer's bunting (Eunicea cecia, Cretz.), take the place
of the common yellow-hammer, an exclusively Northern
species. Indeed, the second is seldom out of the trav-
eller's sight, hopping before him from bough to bough
with its simple but not unpleasing note. As most of
the warblers (Sylidae) are summer migrants, and have
a wide eastern range, it was to be expected that they
should occur in Syria; and accordingly upwards of twen-
ty of those on the British list have been noted there,
including the robin, redstart, whitethroat, blackcap,
nightingale, willow-warren, Dartford warbler, whinchat,
and stonechat. Besides these, the Palestine list contains
fourteen others, more southern species, of which the
most interesting are perhaps the little fantail (Cinclus
chienrostris, Boie.), the orphean (Curruca orphera, Boie.),
and the Sardinian warbler (Syliea melanocephala, Lath.).
The chats (Nocidice), represented in Britain by the
wheatear, whinchat, and stonechat, are very numerous
in the southern parts of the country. At least nine
species have been observed, and by their lively motions
and the striking contrast of black and white in the
plumage of most of them, they are the most attractive
and conspicuous bird-inhabitants which catch the eye in
the hot March and April suns of the Jordan, a bird not
genius. Yet they are not recognised among the Bed-
awin inhabitants by any name to distinguish them from
the larks.

The rock-sparrow (Petronia stulta, Strickl.), is a com-
mon bird in the barren portions of Palestine, eschewing
woods, and generally to be seen perched alone on the
top of a rock or on an are, among the ruins of the
habitations, such as have been conjectured to be the bird alluded to in Psal.
cii. 7, as "the sparrow that sitteth alone upon the house-
top;" but as the rock-sparrow, though found among
ruins, never resorts to inhabited buildings, it seems
more probable that the bird to which the psalmist al-
ludes is the Village sparrow (Passer domesticus, Boie.),
a bird so conspicuous that it cannot fail to attract atten-
tion by its dark-blue dress and its plaintive monotonous
note, and which may frequently be observed perched
on houses, and especially on outbuildings, in the villages
of Judaea. It is a solitary bird, eschewing the society
of its own species, and rarely more than a pair are seen
together. Certainly the allusion of the psalmist will
not apply to the sociable and garrulous house or tree
sparrows (see Tristram, Nat. Hist. of the Bible, p. 202 : Wod,
Bible Animals, p. 468).

Among the most numerous of the small birds of Palestine are the shrikes (Lanius), of which the red-
backed shrike (Lanius collurio, Linn.), is a familiar ex-
ample in the south of England, but there represented by
at least five species, all abundantly and generally dis-
tributed, viz. Enactomus rubra, Boi. ; the woodchat
shrike, Lanius sylvanus, Linn. ; L. minor, Linn. ; L. 
personatus, Tem. ; and Telephonus eucallatus, Grz.

2. Special Biblical Notes.—There are but two allu-
sions to the singing of birds in the Scriptures, Eccles.
xii. 4 and Psal. civ. 12, "By them shall the fowls (7717)
of the heaven have their habitation which sing among
the branches." As the psalmist is here speaking of the
sides of streams and rivers ("By them"), he probably
had in his mind the bullfinch of the country, or Palestine
nightingale, and the Chalcedon shrike (Lanius vul-The
very far removed from the thrush tribe, and a closely
allied species of which is the true bullfinch of Persia
and India. This lovely songster, whose notes, for volume and
variety, surpass those of the nightingale, wanting only the
final cadence, abounds in all the wooded districts of
Palestine, and especially the banks of the Jordan,
where in the early morning it fills the air with its music.

In one passage (Ezek. xxxix. 4), trippor is joined with
the epithet δαμα (ravenous), which may very well
describe the raven and the crow, both passerine birds,
now carrion-feeders. Nor is it necessary to stretch the
interpretation so as to include raptorial birds, which are
distinguished in Hebrew and Arabic by so many specific
appellations.

With the exception of the raven tribe, there is no
prohibition in the Levitical law against any passerine
birds being used for food; while the wanton destruction
or extirpation of any species was guarded against by
the humane provision in Deut. xxii. 6. Small birds
were therefore probably as ordinary an article of con-
sumption among the tamgales as they still are in the
markets both of the Continent and of the East. The
inquiry of our Lord, "Are not five sparrows sold for two
farthings?" (Luke xii. 6), "Are not two sparrows sold for a
farthing?" (Matt. x. 29), points to their ordinary
exposure for sale in his time. At the present day the
markets of Jerusalem and Safed are attended by many
"fowlers" who offer for sale long strings of little birds of
various species, chiefly sparrows, wagtails, and larks.
These are also frequently sold ready plucked, trussed in
rows of about a dozen on slender wooden skewers, and are cooked and eaten like kababs. See Hackett, *Illus. of Script*, p. 80.

3. MODES OF CAPTURE.—It may well excite surprise how such vast numbers can be taken, and how they can be vended at a price too small to have purchased the powder required for shooting them. But the gun is never used in their pursuit. The ancient methods of fowling to which we find so many allusions in the Scriptures, are pursued, and those simple, are now the less effective. The art of fowling is spoken of no less than seven times in connection with "àëíü, ex, e. g. —"a bird caught in the snare," "bird hasteth to the snare," "fall in a snare," "escaped out of the snare of the fowler." There is also one still more precise allusion, in Eccles. xii, 30, to the well-known practice of using decoy or call birds, πιγρεῖς ἐναιρεῖς ἐν καρακάλλῳ. The reference in Jer. v, 27, "As a cage is full of birds ("çêtà")", is probably to the same mode of snaring birds.

There are or five simple methods of fowling practiced at this day in Palestine which are probably identical with those described in the Old Testament. The simplest, but by no means the least successful, among the dexterous Bedawin, is fowling with the throw-stick. The only weapon used is a short stick, about eighteen inches long and half an inch in diameter, and the chase is conducted after the fashion in which, as we read, the Asherites followed the kites and hawks in the wilderness near Hebron; an interesting illustration of the expression in 1 Sam. xxi, 20, "as when one doth hunt a partridge in the mountains."

A more scientific method of fowling is that alluded to in Job, xxxvi, 30, by the use of decoy-birds. The birds employed for this purpose are very carefully trained and perfectly tame, that they may utter their natural call-note without any alarm from the neighborhood of man. Partridges, quails, larks, and plovers are taken by this kind of fowling; especially the two former. The decoy-bird, in a cage, is placed in a concealed position, while the fowler is secreted in the neighborhood, near enough to manage his guns and snare. For game birds a common method is to construct of brushwood a narrow run leading to the cage, sometimes using a sort of bag-net within the brushwood. This has a trap-door at the entrance, and when the dupe has entered the run, the door is dropped. Great numbers of quails are taken in this manner in spring. Sometimes, instead of the more elaborate decoy of a run, a mere cage with an open door is placed in front of the decoy-bird, of course well concealed by grass and herbage, and the door is let fall by a string which is attached to the bird. Those and other smaller birds are the decoy is used in a somewhat different manner. The cage is placed without concealment on the ground, and springies, nets, or horse-hair nooses are laid round about to entangle the feet of those which curiously attract to the stranger; or a net is so contrived as to be drawn over them, if the cage be placed in a thick or among brushwood. Immense numbers can be taken by this means in a very short space of time. Traps, the door of which overbalances by the weight of the bird, exactly the same as the traps used by the hunters on the Sussex downs to take weatheters and larks, are constructed by the Bedawin boys, and also the horse-hair springers so familiar to all English schoolboys, though these devices are not wholesome enough to repay the professional fowler. It is to the moose on the ground that reference is made in Isa. x, 27, "the snare is broken, and we are escaped." In the towns and gardens great numbers of birds, starlings and others, are taken for the markets at night by means of a large loose net on two poles, and a lantern, which startling the birds from their perch, when they fall into the net.

At the beginning of millet season immense numbers of birds, and especially quails, are taken by a yet more simple method. When notice has been given of the arrival of a flight of quails, the whole village turns out. The birds, fatigued by their long flight, generally descend to rest in open space a few acres in extent. The fowlers, perhaps twenty or thirty in number, spread themselves in a circle round them, and, extending their large loose barnes with both arms about them, gently advance towards the centre, or to some spot where they take care there shall be some low brushwood. The birds, not seeing their pursuers, and only slightly alarmed by the noise before them, begin to run together, then dig themselves deeper and deeper, and, narrowing the space into a very small space. At a given signal the whole of the pursuers make a din on all sides, and the flock, not seeing any mode of escape, rush huddled together into the bushes, when the barnes are thrown over them, and the whole are easily captured by hand.

Although we have evidence that dogs were used by the ancient Egyptians, Assyrians, and Indians in the chase, yet there is no allusion in Scripture to their being so employed among the Jews, nor does it appear that any of the ancients employed the sagacity of the dog, as we do that of the pointer and setter, as an auxiliary in the chase of winged game. At the present day the Bedawin of Palestine employ, in the pursuit of larger game, a very valuable race of greyhounds, equaling the Scottish staghound in size and strength; but the inhabitants of the towns have a strong prejudice against the uncann animal, and never cultivate its interest. The fowlers often go out after their houses and flocks (Job xxx, 1; Isa. lvi, 10) and of removing the offal from their towns and villages. No wonder, then, that its use has been neglected for purposes which would have entailed the constant danger of disturbance from an uncanny animal, besides the risk of being compelled to reject too good game which might be torn by the dogs (comp. Exod. xxii, 9; Lev. xxii, 8, etc.).

Whether falconry was ever employed as a mode of fowling or not is by no means so clear. Its antiquity is certainly much greater than the introduction of dogs in the chase of birds, and from the statement of Aristotle (*Hist. iv.* 24), "in the city of Thrace, formerly called Cedropolis, men hunt birds in the marshes with the help of hawks," and from the allusion to the use of falconry in India, according to Photius's abridgment of Ctesias, we may presume that the art was known to the neighbors of the Greeks. Ctesias (see also Eum. *Hist. iv.* 36, and Pliny, *Nat.* 8, 9) says, "Thrace, formerly called Cedropolis, men hunt birds in the marshes with the help of hawks." Falconry, however, requires an open and not very rugged country for its successful pursuit, and Palestine west of the Jordan is in its whole extent ill adapted for this species of chase. At the present day falconry is practiced with a certain skill by the Arab inhabitants of Syria, though not in the same manner. It is the favorite amusement of all the Bedawin of Asia and Africa, and esteemed an exclusively noble sport, only to be indulged in by wealthy sheiks. The rarest and most valuable species of hunting falcon (*Falco lapadarius*, Linn.), the lanner, is a native of the Lebanon and of the northern hills.
of Palestine. It is highly prized by the inhabitants, and the young are taken from the nest and sold for a considerable price to the chieftains of the Hauran. Forty pounds sterling is no uncommon price for a well-trained falcon. A description of falconry as now practised among the Arabs would be out of place here, as there is no direct allusion to the subject in the Old or New Testament. See Fowler.

Sparrow, Anthony, a learned English prelate, was born at Depen, in Suffolk, and was first a scholar and then a fellow of Queen’s College, Cambridge. He, with others, was ejected from his fellowship in 1648 for levity and profaneness, and was not re-admitted until he accepted the rectorcy of Hawkedon, Suffolk, but, before he had held it above five weeks, was ejected for reading the Common Prayer. After the Restoration he returned to his living, was elected one of the preachers at Bury St. Edmund’s, and was made archdeacon of Suffolk and a prebendary of Ely. About 1664 he was elected master of Queen’s College, and resigned Bury St. Edmund’s and the Hawkedon rectorcy. He was consecrated bishop of Exeter, Nov. 3, 1667, and bishop of Norwich in 1678. He died in May, 1685. He wrote, Rationale of the Book of Common Prayer of the Church of England, 2 vols. (1662); On Articles, Injunctions, Canons, Orders, etc. (1671, 4to). See Chalmers, Biog. Dict. s. v.; Allibone, Dict. of Brit. and Amer. Authors, s. v.

Sparrow, Patrick J., D.D., a Presbyterian divine, was born in Lincoln County, N.C., in 1802. His father died while he was quite young, and, owing to the poverty of his mother, he was hired out to assist in supporting the family. The family in which he worked became interested in him, and placed him in the Bethel Academy, S. C., then under the care of Rev. Samuel Williamson. He remained in that institution about eighteen months, and this was all the academical education he ever received, never having enjoyed the advantages of a collegiate or theological course. After leaving the academy he engaged in teaching and studying with such assistance as he could obtain, until he was licensed by Bethel Presbytery in 1826. His first charge was Washington and Long Creek churches in his native county, in 1828 he moved to Lincoln, N.C., where he was engaged in preaching and teaching; in 1831 he became pastor of Unity Church in the same county. He was elected a member of the Church in 1834, of N.C. It was while in this charge that a joint effort was made by Concord and Bethel presbyteries to build up a literary institution for the education of young men for the ministry. The men selected as suitable agents to raise the funds were Rev. P. J. Sparrow and Rev. R. H. Morrison. They were so successful in their work that the institution was put in operation in March, 1837, receiving the name of Davidson College. Dr. Sparrow was chosen the first professor of languages in this institution, the duties of which position he continued to discharge until 1840, when he received a call from the College Church in Prince Edward County, Va., and became pastor of that church. He was in the prime of his manhood, both intellectually and physically, a most indefatigable student, greatly in love with work, and was willing to undertake any labor, however arduous or self-denying. While thus preaching a vacancy occurred in the presidency of Hampden Sydney College, and he was invited to occupy that position temporarily; he accepted, and immediately wrote out a full course of lectures to the senior class on moral philosophy, and as a result he was elected permanent president, and continued, as long as he remained there, to perform the duties of president of the college as well as pastor of the Church. In 1847-48 he re- moved his family to Abbeville, Ala., where he remained until 1861, when he removed to Cahaba, Ala., where he died, Nov. 10, 1867. See Wilson, Preb. Hist. Almanac, 1868, p. 369; Davidson, Hist. of Preb. Ch. in Ky, p. 40. (J. L. S.)

Sparshana (the air which enters into and permeates the human body), in Hindu mythology, is a surname of the wind-god, whose usual name is Parvama.

Sparta, in Grecian mythology, was a daughter of Eurotas, and wife of Lacedaemon. The latter gave his own name to the kingdom over which he reigned, and the name of his wife to its capital city (Pausan. ii, 3; Schol. Eurip. Orest. 615).

Sparta (Σπάρτη, 1 Μακκ. xiv, 16; Λακεδαιμόνια, 2 Μακκ. v, 9: A.V. “Lacedaemonians”). In the history of the Macedoeees mention is made of a remarkable correspondence between the Jews and the Spartans, which has been the subject of much discussion. The alleged facts are briefly these. When Jonathan endeavored to strengthen his government by foreign alliances (about B.C. 144), he sent to Sparta to renew a friendly intercourse which had been begun at an earlier time between Spiros and Orestes, the father of Agesilaus, and it is supposed by common descent from Abraham (1 Macc. xii. 5-23). The embassy was favorably received, and after the death of Jonathan “the friendship and league” was renewed with Simon (1 Macc. xiv, 16-23). No results are deduced from this correspondence, which is recorded in the narrative without comment; and imperfect copies of the official documents are given, as in the case of similar negotiations with the Romans. Several questions arise out of these statements as to (1) the people described under the name Spartans, (2) the relationship of the Jews and Spartans, (3) the historic character of the event, (4) the persons mentioned under the names Orestes and Spiros. For the general history of Sparta itself, see Smith, Diet. of Geog. s. v.

1. The whole context of the passage, as well as the independent reference to the connection of the “Lacedaeemonians” and Jews in 2 Macc. v, 9, seem to prove clearly that the reference is to the Spartans, properly so called. Josephus evidently understood the records in this sense, and the other interpretations which have been advanced are merely conjectures to avoid the supposed difficulties of the literal interpretation. Thus Michaelis conjectured that the words in the original text were σµεναι, σασασασαι (Obad. 20, see Gesen. Thesaur. s. v.), which the translators read erroneously as άκαρμασασασαι, and thus substituted Spartus for Steparus (q. v.). Frankel, again (Mimatschrift, 1833, p. 246), endeavors to show that the name Spartus may have been given to the Jewish settlement at Nicaea, the chief centre of the Armenian dispersion. But against these hypotheses it may be urged conclusively that it is incredible that a Jewish colony should have been so completely separated from the mother state as to need to be reminded of its kindred, and also that the visitations of the Jews to Sparta in the period of history in question (Acts xxvii, 20, ἑλληνίδες, Acts xxiv, 26, ἄρχοντες and οἱ πόλεως) should have corresponded with those of Sparta itself.

2. The actual relationship of the Jews and Spartans (2 Macc. v, 9, σασαι) is an ethnological error which it is difficult to trace to its origin. It is possible that the Jews regarded the Spartans as descendants of the Pelasgi, the supposed descendants of Peleg, the son of Eber (Stillingfleet, Origines Sacree, iii, 4, 15); Ewald, Gesch. iv, 277, note), just as in another place the Pergamenes trace back their friendship with the Jews to a connection in the time of Abraham (Josephus, Antiq. xiv, 10, 22); if this were so, they might easily spread the story, as the Pergamenes are of the same origin; in fact, a Jewish colony existed at Sparta at an early time (1 Macc. xxv, 23); and the important settlement of the Jews in Cyrene may have contribu-
SPARTI

ted to favor the notion of some intimate connection be-
tween the two races. The belief in this relationship
appears to have continued to later times (Josephus, War, i, 26, 1), and, however mistaken, may be par-
alleled by other popular legends of the Eastern origin of
Greek states. The various hypotheses proposed to sup-
port the truth of the statement are examined by Werns-
dorff (Von der Bibel. Macc. § 84), but probably no one now
would maintain it.

3. The incorrectness of the opinion on which the in-
tercourse was based is obviously no objection to the fact
of the intercourse itself; and the very obscurity of Sparta
at the time makes it extremely unlikely that any for-
ground knowledge of the facts would be transmitted.
It is urged that the letters said to have been exchanged are
evidently not genuine, since they betray their fictitious or
origin negatively by the absence of characteristic forms
of expression, and positively by actual inaccuracy.
To this it may be replied that the Spartan letters (1 Macc.
xii, 20–23; xiv, 20–23) are extremely brief, and exist
only in a translation of a translation, so that it is unrea-
sonable to expect that any Doric peculiarities should
have been preserved. The Hellenistic translator of the
Hebrew original would naturally render the text before
him without any regard to what might have been its own
On the other hand, the absence of the name of
the second king of Sparta in the first letter (xii, 20),
and of both kings in the second (xiv, 20) is probably to
be explained by the political circumstances under which
the letters were written. The text of the first letter, as
given by Josephus (4 M. xii, 4, 10), contains some vari-
ations, and a very remarkable additional clause at the
end. The second letter is apparently only a fragment.

4. The difficulty of fixing the date of the first corre-
spondence is increased by the recurrence of the names
involved. Two kings bore the name Areus, one of whom
alone with his grandson lived from 257 to 198 B.C.,
son, died B.C. 257, being only eight years old. The
same name was also borne by an adventurer who occu-
pied a prominent position at Sparta about B.C. 184 (Po-
lyby, xxiii, 11, 12). In Judea, again, three high-priests
bore the name Onias, the first of whom held office B.C.
300–309 (or 309); the second, B.C. 240–226; and the
third, about B.C. 198–171. Thus Onias I was for a short
time contemporary with Areus I, and the correspondence
has been commonly assigned to them (Palmer, De Epist.,
etc. [Darmst. 1828]; Grimm, On 1 Macc. xii). But the
position of Judea at that time was not such as to make
the contraction of foreign alliances likely; and the
absence of such a practice which had been directed to
the growth of the city, and which clearly directed the
attention of the Spartan king to the Jews as
likely to effect a division against Demetrius Polior-
cetes when he was engaged in the war with Cassander.
(2 Macc. 302 (Palmer, quoted by Grimm, loc. cit.), are
not completely satisfactory, even if the priesthood of Onias
can be continued to the later date. Ewald (i.e. Evi, 266,
277, note) supposes that the letter was addressed to Onias
II during his minority, B.C. 290–240, in the course of
the wars with Demetrius. Josephus is probably cor-
rect in fixing the event in the time of Onias III (4 M.
xii, 4, 10). The last-named Areus may have assumed
the royal title, if that is not due to an exaggerated
translation, and the absence of the name of a second
king is at once explained (Uscher, Annales, A.C. 183;
Hersfeld, Gesch. d. V. Ier. I, 215–218). At the time
when Jonathan and Simon made negotiations with
Sparta the succession of kings had ceased. The last
letter of Demetrius, B.C. 192, has the other king, who
lived until B.C. 192. (Wernsdorff, De Fide Lib. Macc. § 83–12; Grimm,
loc. cit., Hersfeld, loc. cit. The early literature of the
subject is given by Wernsdorff.)

SPARTI, in Grecian mythology, were the warriors
who sprang from the dragon's teeth sown by Cadmus at
the command of Athena. They were first of the
only five were left alive, whose names were Echion,
Uleus, Pelor, Chthonius, and Hyperenor. These sur-

vivors became the builders of Thebes, and from them
five of their sub-sequent population derived their names
(Apollod. I. 3, 4, 1; Pausan. ix, 5, 1; 10, 1, etc.).

Sparton, in Grecian mythology, was (1) the son
of Myceneus, who was said to be the founder of the
state of Mycene (Pausan. ii, 16, 3); (2) A son of Tima-
menus (Ibid. vii, 6, 2).

Sparrow, a richly embroidered cloth used as a can-
opy over a pulpit, tomb, or bed. See Tesser.

Spatularia, a term found in English inventories
of ecclesiastical vestments descriptive of the ornamental
apparel placed round the neck and wrists of the alb.

Spaulding, Justin, a minister of the Methodist
Episcopal Church, born at Mount Airy, N. C., in 1803,
and joined the New England Conference in 1823.
He served in the capacity of an itinerant preacher, a
presiding elder, and a missionary to South America.
He was once a member of the General Conference.
He sustained a supernumerary relation to the New Hamp-
shire Conference for several years before his death,
which took place in his native town in 1865. He was
an able minister, a good scholar, and gentlemanly in
his deportment. See Minutes of Annual Conferences,
1866, p. 81.

Spear (λέβης), John xix, 4; 2 Macc. xv, 11; γα-
υσίς, Judith ix, 7; δενι, xi, 2; Eccles. xxiii, 18),
the next most effective piece of offensive armor to the
sword, but has little effect for fighting at any considerable
range. Of this weapon among the Hebrews we meet with
several kinds, each of which appears to have its distinctive
name. See Arms.

1. The chanith (ךחט), a "spear" by eminence, and
that of the largest kind, as appears from various cir-
cumstances attending its mention. It was the weapon
of Goliath—its staff like a weaver's beam, the iron head
five and a half cubits long, 550 shekels. About twenty-
five pounds (1 Sam. xvii, 7, 45; 1 Sams. xxii, 19; 1 Chron.
ixi, 5), and also of other giants (2 Sam. xxiii, 21; 1 Chron.
xi, 23) and mighty warriors (2 Sam. ii, 23; xxiii, 18; 1
Chron. xi, 11, 20). The chanith was the habitual
companion of King Saul—a fit weapon for one of his gigantic
stature—planted at the head of his sleeping-place when
on an expedition (1 Sam. xxv, 7, 8, 11, 12, 16, 22), or
held in his hand when mustering his forces (xxii, 6); and
on it the dying king is laying when we catch our last
glimpse of his stately figure on the field of Gilboa
(2 Sam, i, 6). His fits of anger or madness become
even more terrible to us when we find that it was this
same spear which David was ordered to hurl at the head
of the A. V. renders it), that he cast at David (1 Sam.
xxvii, 10, 11, xix, 9, 10) and at Jonathan (xx, 8). A striking
idea of the weight and force of this ponderous armmay
be gained from the fact that a mere back thrust from
the hand of Abner was enough to drive its butt end
through the body of Asahel (2 Sam. ii, 25). The cha-
nith is mentioned also in 1 Sam. xiii, 19, 22; xxii, 8; 2
Kings xi, 10; 1 Chron. xxiii, 9, and in numerous pas-
sages of poetry.

2. Apparently lighter than the preceding, and in
more than one passage distinguished from it, was the
kiddon (ךקרח), to which the word "javelin" perhaps
answers (Ewald, Wurfspeer). It would be the ap-
propriate weapon for such manoeuvring as that described
in Jos. ix, 27, and the javelin could with ease be
stretched for a considerable time (ver. 18, 26; A. V.
"spear"). When not in action the kiddon was carried
on the back of the warrior, between the shoulders (1
Sam. xvii, 6, "target," and in the margin "w'gezet.") Both in this passage and in ver. 46 of the same chapter
the kiddon is distinguished from the chanith. In Job
xxxii, 23 ("spear") the allusion seems to be to the
quivering of a javelin when poised before hurling it.

3. Another kind of spear was the rōmēch (ךג'ג),
In the historical books it occurs in Numb. xxxv, 7 ("jave-
lin") and in 1 Kings xviii, 28 ("lancelet:" ed. 1611, "lancers"); also frequently in the later books, especially in the often-recurring formula for arms, "shiled and spear:" 1 Chron. xii, 8 ("buckler"); 24 ("spear"); 2 Chron. xi, 12; xiv, 8; xxv, 5; and Neh. iv, 18, 16-21; Ezek. xxv, 12; xiv, 28.

4. A lighter missile, or "dart," was probably the šīlāch (םילח). Its root signifies to project or send out, but unfortunately there is nothing beyond the derivation to guide us to any knowledge of its nature: see 2 Chron. xxiii, 10; xxiii, 5 ("darts"); Neh. iv, 17, 23 (see margin); Job xxxiii, 18; xxxvi, 12; Joel ii, 8.

5. The word shēbet (שֶֽבֶט), the ordinary meaning of which is a rod or staff, with the derived force of a baton or sceptre, is used only once with a military significance, for the "darts" with which Joab despatched Abasa-lom (2 Sam. xvii, 14).

Other Hebrew words occasionally rendered "spear" are קָיָּן, qayin, the shaft, or perhaps head, of a lance (2 Sam. xxii, 16); and דְּשָׁס, dēssās, a spoked wheel (Job xlii, 7 [Heb. xl, 81]).

In general terms the spear may be described as a wooden staff surmounted with a head of metal, double-edged and pointed, and carried by the heavy-armoured infantry. Great care was usually taken in polishing the handle; and its entire length was under six feet (Jer. xlii, 4; John xix, 34). Warriors of gigantic strength seem to have prided themselves on the length and weight of their spears. The "staff of Goliath's spear was like a weaver's beam, and its head weighed six hundred shekels of iron" (1 Sam. xvii, 7). The butt end of the spear was usually shod with a metal point, for the convenience of sticking it in the earth (2 Sam. ii, 22, 23).

Among the ancient Egyptians the spear, or pike, was of wood, between five and six feet in length, with a metal head, into which the shaft was inserted and fixed with nails. The head was of bronze or iron, often very large, and with a double edge; but the spear does not appear to have been furnished with a metal point at the other extremity, called nouruhip by Homer (II, xx, 151), which is still adopted in Turkish, modern Egyptian, and other spears, in order to plant them upright in the ground, as the spear of Saul was fixed near his head while he "lay sleeping within the trench" (comp. Virg. Aen. xii, 130). Spears of this kind may sometimes come under the denomination of javelins, the metal being intended as well for a counterpoise in their flight as for the purpose above mentioned; but such an addition to those of the heavy-armied infantry was neither requisite nor convenient. The javelin, lighter and shorter than the spear, was also of wood, and similarly armed with a strong two-edged metal head, of an elongated diamond or leaf shape, either flat or increasing in thickness at the centre, and sometimes tapering to a very long point; and the upper extremity of its shaft terminated in a bronze knob, surmounted by a ball with two thongs or tassels, intended both as an ornament and a counterpoise to the weight of its point. It was used like a spear, for thrusting, being held with one or with two hands; and occasionally, when the adversary was within reach, it was darted, and still retained in the warrior's grasp, the shaft being allowed to pass through his hand till stopped by the blow, or by the fingers suddenly closing on the band of metal at the end; a custom still common among the modern Nubians and Ababdeh. They had another javelin, apparently of wood, tapering to a sharp point, without the usual metal head; and a still lighter kind, armed with a small bronze point, which was frequently four-sided, three-bladed, or broad and nearly flat; and, from the upper end of the shaft being destitute of any metal counterpoise, it resembled a dart now used by the people of Darfur and other African tribes, who, without any scientific knowledge of projectiles and of the curve of a parabola, dexterously strike their enemy with its falling point. Another inferior kind of javelin was made of reed, with a metal head; but this can scarcely be considered a military weapon, nor would it hold a high rank among those employed by the Egyptian chasseur, most of which were of excellent workmanship (Wilkinson, Anc. Egypt. i, 356 sq.). The Egyptian spearman were regularly drilled and taught to march with steps measured by sound of trumpet. (See following page.) The prophet Jeremiah (ch. xlvii) intimates that the Libyans and Ethiopians formed the strength of the Egyptian heavy-armied infantry; but the spearmen represented in the accompanying engraving belong to a native corps.

The Assyrian monuments likewise exhibit specimens of heavy-armied soldiers equipped with shield and spear. See SPEARMAN.

SPEAR, HOLY, a lance with a serpent twined about it, carrying a lantern for the new fire on Easter-eve.

Spear, ELLI, a minister of the Methodist Episcopal Church, was born at Hartford, Vt., in 1795. He was converted and commenced preaching in 1814, and entered the travelling ministry in 1818. He received the ordination of deacon June 24, 1821, and that of elder June 15, 1823. In 1827 he was returned as supernumerated, and sustained that relation most of the time until his death, in Pomfret, Vt., Dec. 27, 1863. See Minutes of Annual Conferences, 1864, p. 110.

Spearman is the rendering in the A. V. of one Heb. and one Greek word.

1. פַּשְׁנָה, pasnah, a reed (as often rendered) in the phrase פַּשְׁנָה דִּנְקָד, pasnah dinqād, chaydith, pasnah, reed-beast (A. V. improperly "company of the spearman"), i.e. the crocodile (q.v.), as a symbol of Egypt.

2. ΠΕΡΝΩΝΔΩΣ, pernōnōs. This is the Greek word which, in the plural, is rendered "spearmen" in the A. V. of Acts xxiii, 23. As it does not occur in the classical writers, and only this once in the Scriptures, it is

Heads of Small Ancient Egyptian Javelins. (Alnwick Museum and Thebes.)
ing the whole person. Nor is it strange that these choice troops should be employed on this duty, since the service was important and delicate. The guarding of prisoners to be tried before Caesar was often, at Rome, committed to the pretorians. Our translators lowered the lancearii of the Vulg., and it seems probable that their rendering approximates most nearly to the true meaning. The reading of the Cod. Alex. is ἐξορθαλίσκω, which is literally followed by the Peschito-Syriac where the word is translated "darters with the right hand." Lachmann adopts this reading, which appears also to have been that of the Arabic in Walton's Polyglot. Two hundred of these soldiers formed part of the escort which accompanied Paul in the night march from Jerusalem to Cesarea. They are clearly distinguished both from the στρατιάρχης, or heavy-armed legionaries, who only went as far as Antipatris, and from the ἵππος, or cavalry, who continued the journey to Cesarea. As nothing is said of the return of these troops to Jerusalem after their arrival at Antipatris, we may infer that they accompanied the cavalry to Cesarea, and this strengthens the supposition that they were irregular light-armed troops; so lightly armed, indeed, as to be able to keep pace on the march with mounted soldiers. Meyer (Commentar, 2d ed. ii, 3, 404) conjectures that they were a particular kind of light-armed troops (called by the Romans Velites or Larvata), perhaps either javelin-men or slingers. In a passage quoted by the emperor Constantine Porphyrogenitus (Them. i, 1) from John of Philadelphia they are distinguished both from the archers and from the peltasts, or targeteers, and with these are described as forming a body of light-armed troops, which, in the 10th century, were under the command of an officer called a turmarch. Grotius, however, was of opinion that at this late period the term had merely been adopted from the narrative in the Acts, and that the usage in the 10th century is no safe guide to its true meaning. Others regard them as body-guards of the governor. In Suidas and the Etymologicum Magnum, ταραβάλεσσα is given as the equivalent of ἐξορθαλίσκος. The word occurs again in one of the Byzantine historians, Theophylactus Simocatta (iv, 1), and is used by him of soldiers who were employed on skirmishing duty. Inasmuch, however, as they were evidently a kind of light-armed Roman troop, and hence, of course, bore the spear (hasta, ἵππος), it is proper here to give, by way of supplement to the preceding article, some account of this weapon among classical nations of the time.

The spear is defined by Homer, ἄραν χαλλής, "a pole fitted with bronze." The bronze, for which iron was afterwards substituted, was indispensable to form the point (ἀχίς, ἱωνίς, Homer; λέγγα, Xenophon; acta, epiqos, epiculum) of the spear. Each of these two essential parts is often put for the whole, so that a spear is called ἄραν and δόραν, ἱωνίς, and λέγγα. Even the more especial term μικα, meaning an ash-tree, is used in the same manner, because the pole of the spear was often the stem of a young ash, stripped of its bark and polished. The handle of the spear was then enclosed in a pointed cap of bronze, called by the Ieroi writers σαρωτήρ, and ἵππος, and in Attic or common Greek στέργει. By forcing this into the ground the spear was fixed erect. Under the general terms ἄραν and λέγγα were included various kinds of missiles, of which the principal were as follows: Λεγγα (λέγγας), the lance, a comparatively slender spear commonly used by the Greeks. Pītum (πιτός), the javelin, much thicker and stronger than the Grecian lance. Its shaft was partly square, and five and a half feet long. The head, nine inches long, was of iron. It was used either to throw or to thrust; the latter was called the παναρ, and gave the name of pilium to the division of the army by which it was adopted. Vērub or servum, a spit, used by the light infantry of the Roman army. It was adopted by them from the Sammites and the Volsci. Its shaft was three and a half feet long, its point five inches. Besides the
Special Confession, a confession of sin made by a particular person to a particular priest, in contradistinction to the general confession made by a congregation repeating a form of public confession after the priest or minister.

Special Intention. 1. The celebration of the Christian sacrifice with the object of gaining some particular gift or grace. 2. The act of receiving the holy communion with the object of obtaining some particular grace.

Special Psalms, an Anglican term to designate the fact that "proper psalms on certain days" are appointed to be used in the Matins and Even-song of the Church of England. These days are Christmas-day, Ash-Wednesday, Good-Friday, Easter-day, Ascension-day, and Whit-Sunday.

Species Collatio, the name of a tax provided for in the Theodosian Code. It was so called because this tribute was commonly paid in specie—as in corn, wine, oil, iron, brass, etc.—for the emperor's service. Being the ordinary stand-
ing tax of the empire, it is no less frequently styled indirecta canonia in opposition to the superstida et extraordinaria, that is, such taxes as were levied upon extraordinary occasions. See Bingham, Christ. Antiq. bk. v, ch. iii, § 3.

Species, Origin Of. The immutability of species—that is, the law that no really distinct kind of plant or animal is capable, by any process, whether natural or artificial, of being transformed into another, beyond the non-essential limits of what are technically denominated "varieties"—is no less a doctrine of Scripture (where it appears to be contained) in the emphatic expression אינתי, "after its kind," constantly appended to the statement of each successive creative act in the first chapter of Genesis) than a conclusion of sound inductive science.

Each animal and plant has an ancestry of its own; and relationship by descent is admittedly that which constitutes identity of species—that is to say, all the animals of the world (and the same may be said of plants) which have descended from the same pair of ancestors according to the same species. There is, therefore, many apparently different species of animals now in existence is obvious. But the question has been mooted whether this distinction of species is a reality in nature, or whether all animals may not be lineally descended from one, or, at all events, a few original stocks. Geology teaches us that the species of the zoonophores, mollusks, and crustaceans were inhabitants of our globe up to the close of the Silurian era; that the fish then, for the first time, made its appearance, and afterwards the reptile, in the Carboniferous era, and then the mammal, at a later period, in the Tertiary. Were the different species of zoophores, mollusks, and crustaceans of the Silurian age and those of the succeeding and present eras all of them the offspring of one pair, or of different pairs of ancestors, whose descendants had become thus varied by the operation of time and the changed conditions of life? Again, were the various species of fishes, reptiles, and mammals descendants from their several respective pairs of ancestors, or were they all of them lineal descendants of the previously existing inferior orders of animals of the Silurian and its preceding eras, and all thus related in blood to each other? If the various species had each their own separate first parents and lineage, then each of those ancestors must have been produced by some act of creative power, or, as it has been termed, by a separate creative fiat, similar to that which kindled the first spark of life in the first living creature that stirred within the precincts of our planet; and thus the Creator must have been ever present with his work, renewing it with life in the various species of animals and plants with which it has from the beginning been supplied. On the other hand, philosophers have been found to insist that all the animals (and plants also) in the world, including man himself, have descended from one simple organism, and the operation of the preordained laws of nature without the interference of the Deity.

In 1774 lord Monboddo, a Scotch jurist, hazarded the proposition that man is but a highly developed baboon—a proposition which has since made his name the laughing-stock of the literary world. About the close of the last century two French philosophers (De Maillé and La Marck) endeavored to establish the proposition that all the higher orders of animals and plants have been derived, by the immutable laws of nature, from the first-born and lowest items in the scale of physical life; and that life itself is producible, by the agency of caloric and electricity, from dead matter. They also held that all the qualities and functions of animals have been developed by natural instinct and a tendency to progressive improvement; and that organization was the results of function, and not function of organization. Their theory of life, therefore, was that the zoophyte, which was developed out of something still more simple, expanded
itself into a mollusk or crustacean; that the crustacean was developed into a fish, fishes into reptiles and birds, and these into quadruped mammals, and the man-
imal into man.

This theory, so dishonoring to God and degrading to man, was at once rejected as an absurdity by the com-
monger of mankind. It was, however, revived, with a little variation, by the author of the "Natural History of Creation" (Lond. 1844), who in that work reviewed the whole world of life which has been supplied by geology and natural history, and insists that "the various organic forms that are to be found upon the earth are bound up in one—a fundamental unity pervades and embraces all, collecting them from the highest to the lowest. If in one system, the whole creation of which must have depend-
ed upon one law or decree of the Almighty, though it did not all come forth at one time. The idea of a sep-
ate creation for each must appear totally inadmissi-
ble;" and he argues that "the whole train of animated beings, from the simplest and oldest up to the highest and most recent, are thus to be regarded as a series of advances of the principle of development, that have de-
pend上了 upon external physical circumstances to which the resulting animals are appropriate." As to the ori-
gin of vitality, he suggests that the first step in the cre-
ation of life upon this planet was chemical-electric operation, by which simple germinal vessels were pro-
duced, and that the advance from the simplest form of being to the most complicated was through the medi-
um of the ordinary process of generation. But in a few years the experiments of naturalists exploded that the-
ory.

These speculations, whimsical and absurd in concep-
tion, but at the same time most mischievous in tenden-
cy, have therefore long since been rejected by the most enlightened of our philosophers, basing their arguments on purely scientific principles and inductive reasoning. Professor Huxley, in his address to the students of the University of Cambridge, p. cxviii, has declared that ge-
ology, "as a plain succession of monuments and facts, offers one firm cumulative argument against the hy-
pothesis of development." Agassiz, Cuvier, and Hugh Miller have been equally strong in their condemnation of the theory of the transition of species.

The discussion of this question has been recently re-
revived by the publication of Dr. Darwin's "Origin of Species." In this work an attempt has been made to solve the mystery of the creation of life by seeking to estab-
lish the proposition that every species has been pro-
duced by generation from previous species. Darwin believes (or it is nothing more) that, that as man, acting on the principle of selection, causes different animals and plants to produce varieties, so in nature there is a similar power of selection, originated and car-
ried on by the struggle of life, which tends to produce and perpetuate, by the operation of a natural law, vari-
eties of organisms as distinct as those which man may cre-
ates among domesticated animals and plants. It must be conceded that, by the principle of natural selection, we can account for the origin of many varieties of the same species; but that is far short of the proposition that an accumulation of inherited varieties may con-
stitute a specific difference. No facts have yet been es-
tablished to warrant the inference that because man can produce varieties of species by selection among dom-
esticated animals, he could produce, or that nature has produced, by the application of the same prin-
ciple, essentially distinct species. There has always, in the past, been a difference between the wild and the domesticated animal, and it is impossible to bring it to man's power to produce varieties, in like manner as, in the operations of nature, the sterility of hybrids has raised a barrier against the multiplication of spe-
cies which cannot be passed.

Darwin believes that animals and plants have descended from one prototypal form through the probability of the survival of disadvantageous organic beings that have ever lived upon the earth have descended from some one primordial form into which life was first breathed." This admits that life has been produced upon our planet by one, if not more, divine creative fiat; and such being the case, it is more rea-
sable, as well as more natural, to account for the ap-
pearance of distinct species by concentration of the exercise of similar acts of divine power than by a vain endeavor to link together animals in relationship by de-
scent that are wholly dissimilar in organization, and in all the habits, propensities, and instincts of their lives.

It is admitted that the position is not confirmed by geological evidence. In our fossiliferous strata we find re-
late links which must necessarily have existed between the various species are not found in the geological for-
mations. There is no such finely graduated organic chain revealed by geology; for the groups of animals, as they existed, are as distinct and well defined in those ancient records as they are at the present day. To meet this admitted difficulty, Darwin is driven to allege "the extreme imperfection of the geological record," arising, as he states, "from an extremely incomplete examina-
tion of existing strata, and the small proportion which those existing strata bear to those others which have been destroyed by the agencies of the third and fourth age of cre-
dation." These are mere gratuitous assumptions, put forth without foundation, to prop up a failing theory. No well-informed geologist will be found to admit that imperfections could exist in the geological record to an extent sufficient to account for the absence of so many forms of life as must, if Darwin's theory be true, have been in existence at some period of the world's history. Moreover, his suggestion that every past and present or-
ganism has descended from three or four original forms requires us to suppose that life must have existed in the planet long before the deposition of the Cambrian and Silurian, and that perhaps the groups of life appear, and that the rocks in which these remains were pre-
served have been either removed or transformed. This hypothesis not only receives no countenance from the records of geology, but is contradicted by all the evi-
dence which they supply. So many startling concea-
sions required to uphold this theory of the production of species by natural selection, without the direct in-
vention of the creative power of the Almighty, are suf-
cient to justify its rejection, even if the more direct arguments to which we have referred were wanting.

See Creation.

So long as this, which has now come to be generally known as the "evolution theory" of creation, was ad-
vocated only by men either hostile or indifferent to revelation, the theological world could well afford to leave it to purely scientific treatises for a solution or refutation. But of late we regret to see it has crept insidiously into favor with some professedly religious writers, who do not seem to see anything in it incon-
sistent with the Christian idea of creation. For ex-
ample, an eminent scientist, in the Methodist Quarterly Review for April, 1877, art. v, commits himself substan-
tially to it, and even defends it, although with the quali-
ifying remark that it cannot be said to have been "demonstrated." His arguments in its favor are drawn from three classes of facts: first, geology discloses a series of gradually variant types, with many gaps, in-
deed, between, yet on the whole corresponding to such a system of evolution from lower to higher forms; se-
condly, links are constantly discovered between genera that are formerly distinct, and in this way we may be-
ning to see the irrevocable transition from one to the other; thirdly, the embryo of every animal actually passes successively through the various stages indicated by the evolution theory. All this, that writer thinks, renders it "now far safer to accept the hypothesis than to reject it." It may seem presumptuous for theologians, who are usually spoke

by contemplatively by the professional scientist to judge
SPECTRE 917

in this matter; but as the writer referred to further thinks that "if it is safer for the scientist, it is safer for the student," he is not unduly chary of his cherished premises and the conclusion of that demand. For, in the first place, scientists themselves have not fully accepted the theory. Even the learned writer quoted only claims for it the authority of a "hypothesis." It seems to us that it will be ample time for "scientists" to make such disclosures as they show on the premises that they have no right to urge their crude and unsettled hypotheses upon other people. In the second place, they should remember that this is not purely a scientific question; it is rather a historical, if not a theological one, which science has volunteered to determine in its own fashion. The Christian or the baha'i student, or any other professional of the book, has no difficulty in explaining to his own satisfaction the origin of species: he attributes it to the direct creative act of God, continued in the linear propagation from the initial pair or pairs of each kind. If the scientist finds any fault with this, let him first resolve his doubts, and make out a system harmoniously, fully, and definitely determined according to the boasted accuracy and certainty of his own method, before he challenges the adherence of others. In the third place, let him modestly and gratefully call to mind the many illustrious names of Christian theologians who have been, and are, and remain most eminent as scientists also, and whose opinion might at least be entitled to a verdict made up and published as binding upon the rest of the world. Nay, more, let him consider that intelligent parties standing somewhat outside of the immediate discussion are generally better prepared, because more cool and less committed, and actually occupying a broader field of view, to come to a just conclusion on such mooted points when the evidence is conflicting, and chiefly of a moral and cumulative character, than those immediately engaged in the dispute. We, therefore, say, emphatically, let the naturalist pursue his investigations, gather and analyze all the facts, even speculate, if he pleases, on their bearings; and then present the whole for the candid and general judgment of the educated world, exclusive of invidious classification. In short, common-sense must determine in this, as in every extensive generalization. A jury of plain, practical men is most competent to decide an issue, although the testimony of experts may be needed in the evidence.

Let us now bestow a few words upon the facts arrayed above as warranting a concurrence in the evolutionary theory. We are ourselves amazed that the acute and learned writer who clearly presents them did not perceive their utter insufficiency as proof of the position he contended for. The evidence is not less, nor more than that from the various orders of animated beings now observed upon the face of the earth. The only difference, if any, is that they do not seem to have been all simultaneous or synchromal; nor are those now extant to be found all in one habitat. The first and second arguments, therefore, resolve themselves substantially into one, and this has the great flaw of the supposition—the begging of the main question in reality—that the many missing links will yet be found, or, if not found, still once existed. The third argument is parallel, but still weaker, because in the embryo we have the actual stages, again, with many and notable gaps, but they are not so rare, to the common mind, as at any particular point which the theory supposes. The germ of each animal in generation must go on immediately to its complete development, or perish at once as an abortion. None can stop short of its peculiar type, nor go beyond it. In fine, the fact patent to every eye is that there are many which, on the same premises, of this whole speculation, is that each species regularly and inevitably propagates substantially its own pattern, with no such variations as the three classes of phenomena referred to exhibit; or else refuses to reproduce permanent organisms at all. The grand fallacy in the evolution argument—even as a presumption (and we mean to use that word authoritatively both as a premise and the conclusion of that demand). For, in the first place, scientists themselves have not fully

Species, a term used in eucharistic theology to denote the outward and visible part in the Lord's supper.

Speckled is the rendering in the A. V. of three Heb. words, which have very different significations: 1. צֶֽבֶשׁ, naklid, spotted, as black goats or sheep with white spots, or vice versa (Gen. xxx, 32, 33, 35, 39; xxxvi, 8, 10, 12); 2. צֶֽבֶשׁ, saruk, bay, or reddish horses (Zech. i, 8); 3. צֶֽבֶשׁ, tebua, striped, as the hyena (Jer. xii, 9). See COLOR; HYENA.

Speculator, ERWIN, a German painter, was born at Hamburg in 1886. Encouraged by Von Rumohr, he made an artistic tour, in 1892, through Schleswig and the neighboring country. In 1895 he visited Munich and placed himself under the direction of Cornelius, returning to Hamburg in 1899. In September, 1898, he started for Italy, where he remained until the summer of 1894. His death took place Nov. 23, 1901. His paintings on sacred subjects are, Christ and the Woman of Samaria;—The Women at the Tomb.

Spectre. A belief in apparitions was universal among the ancients, especially in the East; and the Israelites, even before the Captivity, notwithstanding the aversion of their religion to demonology (see Crusius [B., Bibl. Theol. p. 293], had in popular superstition their apports and their apparitions, in which they were not inferior to the Egyptians. See AZAZEL. At a later period the spectres and evil spirits were confounded together (Tobit viii, 3; Baruch iv, 35). The canonical books refer (Isa. xxxiv, 13) to a female night-monster (זָרָשָׁה) and goatlike savages (גָּטֹרָשָׁה), who danced and called to each other (xiii, 21). See SATYR. In the Targum, and by the rabbins, this popular belief is more fully unfolded as a part of the demonology; but much of it may have come down from earlier times. These ghostly beings are classed as night, morning, and mid-day spectres (Targum at Cant. iv, 9). The last (יאַבְּנָה מֵאָמְמוֹנָה), Sept. at Isa. xx, 6; הַיָּדָע, Targum at Cant. iv, 6) appear at noon, when people unconcernedly resign themselves to repose (the siesta: see Philostr., Her, i, 4); and they are especially dangerous (Aben-Ezra, On Job iii, 5).
Morning spectres are called γυναικεῖα in the Taragum (Psam.xxxii.6). Among the night spectres (comp. Matt. xxiv.29; similar was the Greek Ἐγκαταστάς [see the Scholiast on Aristoph. Ran. 295; Volckcn, Diatrib. 132; Bernhardy on Dionys. Perg. p. 721]) was the Lilitth, a beautiful woman who especially waylaid children and killed them (like the Lamia, comp. the Vulg. at Isa. xxxvi.14, and and Stripes of the Romans [Boehm. Hist. Rom. ii.381; Mar. Jud. 145; comp. Phagitt. A poll. iv. 23], and the gohoul of the modern Arabians); male infants to the eighth, and female to the twentieth, day after their birth (see Eisenmenger, Entdeckte Judenheit, i. 418 sq.; Selden, De Dies Syr. p. 249 sq.).

Another spirit insinual to children, particularly in such places as Paris (Nouaill. p. 27; Tal- anith, xx, 2), was called נְבִּיָּֽים (but it does not appear that the Jews used to threaten their children with sprites, as the Romans did with their larvos [Spanheim on Callim. Dian. 69], like modern vulgar bugaboos). See Van Dale, Idol. p. 94 sq.; Doutzei Analecit. i. 246. See Superstition.

Spee, FRIEDRICH VON, a German Jesuit and composer of religious poems, was born at Kaiserwerth in 1591 of the noble family Spee von Langenberg, entered the Order of Jesus at the age of thirteen (1601), and was employed in the school at Cologne as teacher of grammar, philosophy, and morals. He was afterwards removed (about 1627) to Wurzburg and Bamberg, and transferred to the pastorate, a measure which is supposed to indicate dissatisfaction with his teaching on the part of his superiors. He had acquired both reputation and popularity with his auditors; but later events revealed a degree of liberality in his views such as Jesuitism does not often tolerate. While acting as a pastor Spee was often obliged to minister to the unfortunates who were accused of witchcraft, and, after having been compelled to escape the tortures imposed on them by the court, were condemned to death by fire. More than two hundred of these miserable victims came under his care in the course of a few years. It is related that he was asked by John Philip of Schönborn, subsequently the elector of Mayence, why his head was gray at the early age of thirty; and that he gave as a reason the fact that he had been obliged to accompany so many witches to the stake, though every one of them was innocent. He gave a more emphatic expression to his sentiments upon this matter by the (anonymous) publication of a Cautio Criminalis, e. de Processa contra Suspectos, in which he stated the charges against the accused in the same spirit from which many of the cases from which the principles and the indefensible judicial methods by which such prosecutions were controlled. He would seem to have been suspected of the authorship by his superiors, as he was soon afterwards sent to Lower Saxony to attempt the conversion of Protestants to Roman Catholicism. He actually succeeded in gaining over a Protestant community; but, according to Jesuitical authorities, came near to suffering a martyr's death in consequence. He was attacked by an assassin, said to have been employed by the Protestants of Hildesheim, who beat him mercilessly; and having lost his enthusiasm for missionary work, as the result, he went to Treves. This place afforded him a wide field of pastoral usefulness, especially during the siege and storm of 1636 by Imperialists and Spaniards. He was indefatigable in his labors for the sick, wounded, and dying, and also for the impoverished and the prisoners. While engaged in such work he was taken with fever, and died Aug. 7, 1636. Spee's reputation rests on one collection of poems, which are contained in two collections, the Trutz-Nachts- Tijnl and the Gildenes Tugendbuch. The former was first issued at Cologne in 1649, and appeared afterwards in several editions; but was then lost from observation until Brentano republished it in a somewhat modernized form in 1843. The latter, which, though with considerable amendment from Leibnitz (Theolocie, § 96), likewise appeared for the first time after the author's death, in 1643, perhaps not earlier than 1649. As a poet Spee stands alone, holding no relation to any of the schools of his century. He possessed a fine sense of prosody and euphonic forms, and felt profoundly the spirit of his compositions. He was, moreover, entirely rational, a lover of nature; and, consequently, in no danger of a Jesuitical superstition or of a superstitious worship. His poems are not, however, hymns; they were composed without the slightest reference to use by a Christian congregation. His subject is always either some observation of nature or an expression of the author's intense and glowing love for Christ. Occasional allusions are made by comparison to the life of one of the most eminent lyric poets of his country; but the adoption of the pastoral as a medium for expressing the poet's admiration of God will serve to show how utterly unsuited are his works for a place in the worship of the congregation. Spee's writings were published by Smits (Prouem. ad Sp. Bonn. 1842); and earlier by Förster, in Muller's Biblioth. deutscher Dichter der 17ten Jahrhunderts (Leips. 1831, vol. xii.), the latter preserving the original form more faithfully than the other. The Gildenes Tugendbuch, somewhat changed, was republished at Coblenz in 1850 as a Roman Catholic manual of devotion. See Hauber, Wildb. Magica, vol. iii; Gires, Chrest. Mystik. vol. iv.

Speece, CONRAD, a Presbyterian minister, was born in the town of New London, Bedford Co., Va., Nov. 7, 1776. Being engaged in agricultural pursuits until 1792, he had little early educational advantages, but afterwards studied at a grammar-school near New London and Washington College. In the contemplation of some mysterious passages of Scripture he was driven, as he says, "by my own ignorance and pride," to the brink of infidelity, from which he was rescued by means of Jenyss's Internal Evidence and Beattie's Evidence. He united with the Presbyterian Church in April, 1796, at New Monmouth, and in September following was received as a candidate by the Presbytery of Lexington. Certain difficulties on the subject of infant baptism led to the postponement of his licensure, and in the spring of 1799 he became tutor of Hampden Sidney College. He was immersed by Dr. Archibald Alexander shortly after he left to accept infant baptism. He withdrew from the Baptist communion, was licensed to preach, April 9, 1801, by the Hanover Presbytery, and appointed general missionary. His labors spread over a large part of Eastern Virginia. In February, 1806, he commenced his connection with a church in Montgomery Co., Md., called Captain John, of which, at the time of his ordination by the Presbytery of Baltimore, April 22, 1804, he was installed pastor. This connection, because of his ill-health, was dissolved in April, 1805. He continued to preach in Goochland and Fluvanna counties until 1806, and in the counties of Powhatan and Cumber-

Speed, John, an English historian, was born at Farringdon, in Cheshire, about 1555. He was brought up to the business of a tailor, but was taken from his shop by Sir Fulk Greville, and supported by him in the study of English history and antiquities. Besides other works of history, he wrote, The Cloud of Witnesses, or Genealogies of Scripture (1598, 8vo). This was prefixed to the new translation of the Bible, and printed for many years in the subsequent editions. He died July 28, 1629. See Chalmers, Biog. Dict. s. v.; Allibone, Dict. of Brit. and Amer. Authors, s. v.

Spegel, Hauquin, a Swedish prelate, was born at
SPEKE-HOUSE

Romney, June 14, 1645, being the son of a pastor. Having studied but little, he went to Llandaff, then to Copenhagen, and the universities of Holland and England, at length (about 1672) became preacher to the queen, and later (1675) of the court of Charles XI. In 1686 he was made bishop of Shara, in 1692 of Linköping, and in 1711 archbishop of Upsala. After a learned, amiable, and patriotic career, he died at Upsala, Dec. 14, 1715, leaving several piious and historical works, which are enumerated in Hoefer, Nouv. Biog. Générale, s. v.

Speke-house, a room in religious houses set apart for conversation.

Spells. Constantine had allowed the heathen, in the beginning of his reformation, not only to consult their augurs in public, but also to use charms by way of remedy for bodily distempers, and to prevent storms. Many Christians were much inclined to this practice, and made use of charms and amulets. The Church was forced to make severe laws against this superstition. The Council of Laodicea condemns clergymen who made phylacteries. Those were condemned also who pretended to work cures by enchantments, diviners, etc., and those who consulted them. See Bingham, Christ. Antiq. bk. vi, ch. v, § 6.

Spelt. See Rye.

Spence, James, a minister of the Episcopalian Church, was converted while engaged in the practice of law at Dawson, Ga., 1865. He was licensed to preach in 1869, and was supernumerated by the South Georgia Conference in 1874. His health continued to decline, and he died of heart-disease, April 23, 1875. See Minutes of Annual Conferences of the M. E. Church, South, 1873, p. 175.

Spence, Joseph, an English divine and scholar, was born in 1649 and educated probably at Winchester School, and New College, Oxford, where he took the degree of A.M. Nov. 2, 1727. He was elected professor of poetry July 11, 1729, and about 1731 travelled with the duke of Newcastle into Italy. In 1742 his college presented him to the rectory of Great Horwood, in Buckinghamshire; and in June of the same year he succeeded Dr. Holmes as his majesty’s professor of modern history at Oxford. He was installed prebendary of the seventh stall at Durham May 24, 1754. His death, by drowning in a canoe in Byflett, Surrey, occurred Aug. 20, 1798. His writings were mostly in the realm of polite literature, as, An Essay on Pope’s Odyssey (1727); Remarks on Shakespeare’s Plays; and several Dissertations on Virgil, by Mr. Holdsworth, with notes, etc. (1768, 4to). He wrote a pamphlet entitled Plain Matter of Fact, or a Short Review of the Reigns of our Popish Princes since the Reformation (pt. i, 1748, 12mo). See Chalmers, Biog. Dict. s. v.; Allibone, Dict. of Brit. and Amer. Authors, s. v.

Spence, Robert W., a minister of the Methodist Episcopal Church, South, was born May 11, 1824, in South Carolina. He first joined the Presbyterian Church, but this being dissolving in his neighborhood, he then united with the Methodist. He was licensed to preach, and joined the Alabama Conference in 1849. After a successful ministry of about six years, his health entirely failed, and he retired to his home in Kemper County, Miss., where he died, Sept. 27, 1856. See Minutes of Annual Conferences of the M. E. Church, South, 1856, p. 707.

Spencer, Elihu, D.D., a Presbyterian divine, was born at East Haddam, Conn., Feb. 12, 1721. He commenced a course of literary study, with a view to the Gospel ministry, in March, 1740, and graduated at Yale College in November, 1745. After graduation he was urged to undertake a mission among the Indians of the Six Nations, and, under the sanction of the society in Great Britain which had fostered the other missions among the Indians, he entered upon the arduous task, and in September, 1748, was solemnly ordained to the work of the ministry, with a special view to an Indian mission. The leadings of Providence, however, appear to have been such as to direct his labors into another and entirely different department of evangelical work, and Feb. 7, 1750, he was installed pastor of the Presbyterian Church in Elizabethtown, N. J., then vacant in consequence of the death of president Dickinson. It was during his pastorate in Elizabethtown that his character for piety and public spirit prompted the trustees of the College of New Jersey to elect him one of the corporate guardians of that institution, which office he held as long as he lived. In 1756 he became pastor of the Presbyterian Church at Jamaica, L. I.; in 1758 he accepted the pastorate of the Congregational Church, New York, and at once set about to take their place in the French war still raging. When his services as chaplain were closed, he connected himself with New Brunswick Presbytery, and labored several years in the contiguous congregations of Shrewsbury, Middletown Point, Shark River, and Amboy. It was about this time that he addressed a letter to the Rev. Ezra Stiles, D.D., which was published, and attracted no small share of public attention. The subject of it was “The State of the Dissenting Interest in the Middle Colonies of America.” It was originally dated at Jamaica, July 2, 1759, and there were some amendments and additions to it at Shrewsbury. This was the only letter he ever committed to the press. In 1764 the Synod of New York and Philadelphia, having reason to believe that a number of their congregations in the South were in an unformed and irregular state, sent the Rev. Elihu Spencer, and Alexander McWhorter of New-ark, N. J., to prepare them for a more orderly and edifying organization. Soon after returning from this important service, he became pastor of St. George’s Church in Delaware, where he spent five years. In 1769 he accepted a call to the city of Trenton, N. J., where he remained useful and beloved until he was removed by death, Dec. 37, 1784. Dr. Spencer was possessed of fine genius, great vivacity, ardent piety, and special merits as a preacher and a man. In 1782 the University of Pennsylvania conferred upon him the degree of D.D. See Sprague, Annals of the Amer. Pulpit, iii, 165. (J. L. S.)

Spencer, Francis, a minister of the Methodist Episcopal Church, was converted in his eighteenth year, at Springville, Pa., and joined the Presbyterian Church. He afterwards united with the Methodist Church, and was licensed to preach, 1847, and ordained 1849. He was tried for an alleged violation of the discipline, and was tried on trial in the Wyoming Conference in 1855, and continued a member thereof until his death, Sept. 18, 1862. See Minutes of Annual Conferences, 1863, p. 77.

Spencer, Ichabod Smith, D.D., an eminent divine of the Presbyterian Church, was born in Rupert, Vt., Feb. 28, 1798. His early educational advantages were limited, consisting only of the training of a common school. The death of his father, in 1815, marked a decisive epoch in the history of his life. During the next year he left home, and settled in the town of Granville, Washington Co., N. Y., where he was converted and first felt strongly impressed to devote himself to the ministry. He graduated at Union College in 1822, with a high reputation for both talents and scholarship; studied theology under the direction of Andrew Yates, D.D., professor of moral philosophy in Union College; removed to Canandaigua, N. Y., in 1825, and became principal of the academy in that place, which he soon succeeded in raising to a commanding position among the primary educational institutions of the State; was licensed by the presbytery of Geneva in November, 1828; and was installed pastor of the Rev. Solomon Williams, of the Congregational Church in Northampton, Mass., Sept. 11, 1829, where he continued laboring with the most remarkable success until March 23, 1832, when he was installed pastor of
the Second Presbyterian Church, Brooklyn, L.-L, which was his last field of ministerial labor. By his great wisdom and energy, and almost unexampled industry, he succeeded in raising this church into one of the most prosperous and efficient churches in the Presbyterian denomination. In 1836 he accepted the professorship extraordinary of Biblical history in the Union Theological Seminary. In 1839 he was selected to the presidency of the University of Alabama; in 1832, to the presidency of Hamilton College. In 1838 he was elected to the professorship of pastoral theology in the East Windsor Theological Seminary; and many formal calls were put into his hands from churches in various important cities, but none of these tempted him from his chosen field. He published nine single sermons, 1835-50, and the following well-known works: A Pastor's Sketches, or Conversations with Anxious Inquirers respecting the Way of Salvation (N. Y. 1850; second series, 1853); these sketches have been reprinted in England, and also translated into German: "Memories of his Life" by Rev. J. M. Sherwood (N. Y. 1855, 2 vols.). Also since his death have been published: Discourses on SACRAMENTAL Occasions, with an Introduction by Gardner Spence, D. D. (1861, 1862; Lond. 1861) — Evidence of Divine Revelation (Boston, 1855). See Sprague, Amuse of the American Pulpit, iv, 710. Allibone, Dict. of Brit. and Amer. Authors, s. v.; Bibl. Repert. July, 1861, p. 572. (J. L. S.)

Spencer, John, a learned English divine, was a native of Boston-under-Clare, in Kent, where he was baptized Oct. 31, 1680. He was educated at Canterbury School, which he left March 25, 1645, taking his A.B. in 1648, A.M. in 1652, and being chosen fellow in 1655. He became a tutor, was appointed a university preacher, and served the curtes, first of St. Giles and then of St. Benedict, in Cambridge. He took the degree of B.D. in 1659, and that of D.D. in 1665; it was presented, 1667, by his college to the rectorcy of Landbeach, Cambridgeshire, and Aug. 3 was elected master of the college. About a month later he was preferred by the king to the archdeaconry of Sudbury, in 1672 to a prebend of Ely, and in 1677 to the deanship of that church. He resigned, 1668, the rectorcy of Landbeach in favor of his kinsman, Wm. Spencer. In 1697 he succeeded Dr. Richard Simpson, and settled it by deed on the college. He died May 27, 1695. Dr. Spencer published a sermon, The Righteous Ruler (1660) — A Discourse concerning Frodigity (1668); a second edition was published (Lond. 1666, 8vo), to which was added a Latin Dissertation concerning Urim and Thummim (1669, 1701) — A Discourse concerning Vulgar Prophecies (1665, 8vo) — De Legibus Hebraorum Ritualibus et carum Rationibus Libri Tria (Camb. 1665, 2 vols., fol.) — afterwards greatly enlarged by the addition of a fourth book, and published by order of the university (Lond. 1737, 2 vols., fol.). This is usually regarded as the best edition, although that by Pi Grim (Tbingen, 1732, 2 vols.) is in some respects more desirable, as it contains a dissertation by the editor on the life of Spencer, the value of his work, its errors, and the authors who have written against it. The work is preceded by Prolegomena, in which the author shows that the Jews had their own city of God, and that the ceremonies by which they were founded on reasons which it is desirable and profitable to search into, so far as the obscurity of the subject permits. The work itself is divided into three (in the second edition into four) books. The first book treats of the general principles of the Mosaic laws, with a discussion of the city of God. The second and third books treat of those laws to which the customs of the Zabobes, or Saboras, gave occasion, with a dissertation on the apostolic decrees. Acts xv. The third discusses the laws and institutions to which the usages of the Gentiles furnished the occasion, in eight dissertations: 1. Of the rites generally transferred from Gentile customs to the law; 2. Of the origin of sacrifice; 3. Of purifications: 4. Of new moons; 5. Of the ark and cherubim; 6. Of the Temple; 7. Of the origin of Urim and Thummim; 8. Of the habits of the Gentiles that used them. But there is no room for instructive and instructive rite, which the Jews borrowed from the Gentiles, without, so far as appears, any divine warrant; with a dissertation on phylacteries. The great error of this learned and admirable work is its derivation, to an undue extent, of the rites and ceremonies of the Jewish law from the idolatry that was around; but the error is one of excess, not of principle; for much that was incorporated in Judaism had been in existence from the earliest ages." See Chalmers, Biog. Dict. s. v.; Hoefer, Nouv. Biog. Générale, s. v.; Allibone, Dict. of Brit. and Amer. Authors, s. v.

Spencer, Robert O., a minister of the Methodist Episcopal Church, was born in Columbus, Ohio, Feb. 10, 1806. He began to preach at the age of seventeen, and was admitted to the Ohio Conference, Nov. 17, 1828. He labored actively for thirty-four years, sixteen of them as presiding elder, when he was obliged, by reason of ill-health, to retire. He died shortly after, Aug. 30, 1858. He was unaffectedly pious, diligent in study, grave and dignified in the pulpit. See Minutes of Annual Conference, 1858, p. 299.

Spencer, Thomas, an English Dissenting minister, was born in Hertford, Jan. 31, 1751. He went to school at a very early age, and his religious impressions and exercises were early manifested. The special inclination of his mind was so early disclosed that preachers and preaching seemed to occupy all his thoughts. His manners were exceedingly amiable and engaging. In the age of Cambridge, he was promoted to the degree that prepared him for the study of Hebrew. He drew up a statement of his views of theological truth in connection with his call to the ministry. In January, 1787, having passed a remarkably good examination on all his studies, he went home, and while there his health was so precarious that his father would not have him go, who heard him were filled with astonishment and admiration. His fame spread in every direction, and wondering, weeping crowds followed him everywhere, in fields, barns, school-houses, workshops, in towns and cities, as well as in the metropolis, and lady Huntington’s chapel at Brighton. On Nov. 8, he was appointed to preach at Cambridge in the pulpit previously occupied by the Rev. Robert Hall. Mr. Spencer was ordered to go to Liverpool, and he entered upon his duties June 30, 1810. His preaching affected all hearts, and during the five Sabbaths of his stay he attracted increasing multitudes from all parts, and at the close he received a unanimous call to the pulpit. This he accepted, though he had numerous calls from other places, including London. When he entered upon his pastoral labors in Liverpool he was just twenty years of age. All the circumstances were of the most auspicious character. He had left the city of London, and he entered upon the duties of a new and prosperous pastor. On June 27, 1811, he was ordained and installed pastor. The Church at once began to increase its membership by conversions, and God set his seal upon his ministry; but alas, that the flower which had just begun to open with such bloom and beauty started with full leaves, and his�示意了于1811年5月8日, 他离开了他的家,并开始在水疗中心进行治疗。

neum Pottery, and was seen soon after by one of the workmen to be carried rapidly by the tide around a projecting rock. He struggled bravely, but his efforts vainly struggling he sank to rise no more. His body was recovered fifty minutes afterwards. Every effort that kind friends and medical skill could exert to resuscitate the body proved unavailing. (W.P.S.)

Spencer, William H., a Presbyterian minister, was born in Madison, Conn., Oct. 13, 1813. He was educated in the University of New York; graduated at the Theological Seminary of Auburn, N. Y., in 1845; was ordained a Presbyterian minister by Utica Presbytery as pastor of the Presbyterian Church in Utica, N. Y., the same year. After spending some years there, he accepted a call to Milwaukee, Wis.; subsequently became the secretary of the Presbyterian Publication Committee in Philadelphia; then returned to pastoral labor in the city of Rock Island, Ill.; and more recently in Chicago, where he was pastor of the Westminster Church at the time of his death, Feb. 16, 1861. Mr. Spencer possessed fine mental powers, was eminently public-spirited, and loyal to the Church. See Wilson, Presb. Hist. Almanac, 1862, p. 196.

Spencer, Philip Jacob, the father of Pietism (q. v.), and one of the most remarkable personnages in the Church of the 17th century, was born in Alsace, at Rappoltsweiler, in 1605, though he was wont to consider himself as born in the town of Bresse, which he had originated in that city. Reared amid pious surroundings, and possessed of a naturally serious and retiring disposition, he was easily impressed with religious things; and the influence of his godmother, a dowager countess of Rappolstein, the reading of edifying books like Aarnl’s True Christians, and the practice of prayer, early cultivated, contributed to a rapid development of his religious character while he was yet a child. He was indebted for both religious and intellectual training to Joachim Stoll (successively his brother-in-law, and from 1645 preacher to the counts of Rappolstein [see the biographical sketch of Stoll in Köhrich, Mittheilungen aus d. evang. Kirche des E lassus (1855), iii, 321)], and entered the University of Strassburg when in his sixteenth year. His theological instructors in Strassburg were Dorsche (who left in 1638), Dannhauser, J. Schmid, and Sebastian Schmid. Dannhauser indoctrinated him in the strictest tenets of the Lutheran faith, J. Schmid became his benefactor, and Seb. Schmid was one of the most accomplished exegetes of his time. To these must be added Böckler, who excelled in the youth an abiding love for the study of history.

Spener filled the position of tutor to the two sons of the court-palatinate Christian II from 1654 to 1656, and afterwards entered on the then usual peregrinatio academica. He went to Basle in 1659, and studied Hebrew under the younger Buxtorf, and thence to Geneva, for the purpose of studying French. A severe illness detained him at Geneva a whole year, and the association with Reformed clergymen which thus became possible to him greatly enlarged his views and sympathies. His letters, written in the earnest admiration of the Church of Geneva, are characteristic of his mind and heart. Afterwards, in 1666, Spener became minister and senior at Frankfort-on-the-Main. This position gave him authority over clergymen older than himself, and involved heavy responsibilities. A low state of discipline existed in the churches, and the constitution of the city rendered improvement difficult, inasmuch as the civil authorities were charged with the supervision of the churches, and their indifference prevented the application of any thorough measures of reform. Spener, however, did what he could. He infused new energy into catechetical instruction, by giving to it his personal attention, and urging a clearer exposition of the subject-matter than had been usual in the former practice of the Frankfort churches. He was also published, as aids to the teachers, an Einfaltige Erklärung der christl. Lehre (1677), and the Tablete Catechetica in 1688. In preaching he discussed a wider range of subjects than a slavish following of the prescribed pericopes would admit of, his intention being to afford his people opportunity to become thoroughly acquainted with the contents of the Scriptures. His preaching was rather didactic than pathetic or emotional, and yet the effect produced was often profound and of abiding influence. His force lay in an intimate acquaintance with the Bible and in a devout walk, whose agreement with the doctrines he advocated in the pulpit was known to all his hearers. A sermon preached by him in 1699 on the insufficient and false righteousness of the Pharisees caused a division among his hearers, which resulted in 1670 in a closer union of the more earnest ones for their mutual edification. Spener invited them to assemble in his study for religious and social intercourse, and, after a time, for religious services. The assembly went on at first small, but it grew in time so that more than a hundred persons were habitually present at these gatherings; and after repeated applications had been made, the authorities granted, in 1682, the use of a church for their assemblies. Such was the origin of the “Frankfort conventicles.” (See Spener, Sendachreiten an einen christlichen Theolog, etc.; Becker, Beitr. zur Frankl. Kirchengesch. [1853], p. 87. Göbel, in Rhein.-westphä. Kirche, ii, 560, gives a different account, as do a number of other writers, but their statements are effectually disposed of by Spener, Abfertigung von D. Pfeifer, p. 108, etc.)

Spener had in the meantime acquired reputation as a zealous promulgator of strict Lutheran teachings; and as he was endowed with great prudence and modesty, and was always willing to share in the burdens of the ministry, he was able to avoid unpleasant controversy for a time, even in that polemical age. The calm was broken, however, when the “Pietists” were denounced as the Fia Didericia, etc., whose burden was a “heart-felt sigh for such improvement of the true Evangelical Church as shall be pleasing to God.” The work was approved by the ministerium of Frankfort, and its statements were everywhere guarded by appeals to the most approved authorities. Its complaints, strong and startling as they might appear, were echoed by numerous voices in every part of the land, so that Spener was subsequently able to publish more than ninety letters of commendation received from leading theologians, among whom was Calovius. The remedies proposed for the evils existing in the Church were also in harmony with the aims of the Pietists, and the tone of the book was, nevertheless, unfavorably criticised, particularly at Strasbourg. The hostility so aroused became more intense when the collegia pietatis, by which name Spener’s assemblies of laymen for mutual edification became known, were extended beyond the community in Frankfort, and the first organ was published. It was observed that their multiplication was attended with a growing spirit of exclusiveness, a tendency towards separatism, and occasional eccentricities on the part of their members. The attack on the Pietists, as they were now dubbed by their opponents, was led by a fortnight before the death of Spener, the distinguished academicians Antt. Mentzer, and by Dillfried of Nordhausen, who wrote a work entitled Thesosopia Horbico-Speneriana (1679), in which he denied that the new birth is essential to a correct theology. Spener replied in Gottgesegeltheit.
SPENER

SPENER

altter gläubigen Christen, and disarmed his assailants; and then wrote a work entitled Klagen über das verderb-
bene Christenthum, etc. (1684), in which he successfully combated the separatist tendency which had crept in among his followers without fault of his. He did not introduce similar meetings for edification in his subse-
quent fields of labor, and it has been supposed that they no longer commanded his approval; but a letter writ-
ten to his father in 1685 declares that he considered the ac-
tion of the authorities of Frankfurt by which the collae-
pia pietatis were prohibited, affords positive evi-
dence that his confidence in their utility was undimin-
ished.

After a pastorate of twenty years in Frankfurt, Spe-
ner received a call as professor of Saxony and court-
priest. At that time, it may be said, the most prominent ecclesiastical post in Protestant Germany (1686). His call emanated from the elector Joh. Georg III himself, and was brought about by his own faithful-
ness as a minister of the Gospel. The elector at one

922

time became sick while at Frankfurt, and Spener was

invited to visit him officially. He assented, on con-
ting that he might minister to the prince as to a simple

man, and without other reference than the soul's rela-
tion to its Maker. This plain-dealing pleased the elec-
tor, and resulted in the transfer of Spener to the court

of Dresden. He departed from Frankfurt July 10, 1686.

It was somewhat unusual for a professor of theology of the

preacher was largely confined to the power he might

exercise as the spiritual counsellor of the prince; but

the warlike elector was rarely in his capital, and was

not disposed to yield to the control of his chaplain.

The self-esteem of the Saxon clergy had been wounded

by the appointment of a foreign theologian to the high-
est ecclesiastical position in the land, and they began a
course of systematic opposition to the new incumbent.

Various motives combined to intensify their hostility,
among them the fact that Spener's unselfish and earn-
nest piety was a constant reproach to their self-seeking
and formal dispositions. The source of this opposition
was the Leipsic University, where Carpzov was nursing
the disappointment of having failed to secure the ap-
pointment to the court in Spener's stead, and where a
rebuke administered by the high consistory on Spener's
motion because of the neglect to expound the Scriptures
which was a serious fault which the illiterate faculty on

A still stronger occasion for trouble was given by Tho-
massius, a relative of Spener's son-in-law, who in 1688
began to publish a satirical journal, in which the cleri-
cy, and especially Carpzov and the professors extraor-
dinary Alberti and Pfeifer, were roughly handled. Spe-
ner was not among the决不 tendencies; but it was con-
vain, and was held personally accountable for conduct of
which he disapproved. The faculty had counte-
nanced the study of the Scriptures in the original
tongues by certain masters of the university as early as
1660; but when in 1689 Francke (q. v.), Anton, and
Schade associated themselves with Spener and began
the holding of collegia Biblica in German for the edifica-
tion of themselves and others, among them laymen, this
favor was withdrawn; Carpzov and Alberti began to
preach against the "Pietists," the collegia Biblica and
the original Philologica were suppressed, and Francke was cited before the bar of a legal tribunal.

To these troubles was added the complete loss of the
favor of his prince, occasioned by the exercise of the
same quality which had at first recommended him to
that favor—the unflinching fidelity and frankness with
which he fulfilled the duties of the office of confessor.

The same spirit which had molded Roman Catholicism, and was depraved of his

office in 1684. The families of court officials regu-
larly attended mass. Ernest Grabe, another professor ex-
traordinary, had placed in the hands of the consistory a
work in which he alleged that the Evangelical Church
had, by renouncing the apostolic succession, removed
itself from a Christian basis. The elector committed the
work of answering the various treatises written in

request having been acceded to, Spener removed to Ber-
lin in April, 1681, and was made consistorial-councillor and provost of St. Nicola Church.

The house of Brandenburg was at this time commit-
ted to the policy of toleration in religious matters, and
none of its members were directly interested in Spener's
work. The queen, indeed, became directly hostile to
him, and the king did not grant him audience.

The toleration of the Elector was further extended to the circle of candidates about him with whom he entered
on a thorough study of the Scriptures. His influence
was even more effective indirectly, as appears from the
appointment of a large number of persons of like mind
with himself to responsible positions in the Church.

It was through such appointments to the faculty that
Halle became the nursery of the pietist theology, being
manned by such professors as Breithaupt, Francke, An-
ton, and their adjuncts Joachim Lange and Freyling-
hausen.

A new trouble for Spener was occasioned in Berlin by
his loved colleague Schade, who was unable to refrain
from exercising his ministry without being required to
administer private confession; and a similar experiment
was granted by edict in 1698 to all who had conscien-
tious scruples against that practice. Francke and Frey-
linghausen were fighting a similar battle at Halle, and
in other cities irresponsible visionaries appeared who
were guilty of real excesses. The responsibility of every trouble of the kind, this was once charged upon Spener by his opponents. Wittemberg
and Leipsic railed at each other in abusing him, employ-
ing personalities and calumniations rather than argu-
ments and solid proofs to support their asseverations;
and as the temper of the times required of him who
was a confessor to confess not only his own, but the
selected malefactor a reply to every charge raised by an opponent. Spener was compelled to find time for such polemic
labors. Among the numerous writings from his pen
which originated under such circumstances a response to
the fulminations of the Wittemberg faculty of 1695,
entitled Aufrechtiges Betragen mit der unangenehm,
Confession, and a reply to the pamphlet Bruchstuck des Unfugs, written by Carpzov and others, deserve spe-
cial attention—the latter because it contains Spener's
version of the entire progress of the Pietistic controver-
sies. The polemical abilities of Spener were at about
this time employed upon another controversy, not con-
ected with his own direct work. The Catholic party,
had, under the guidance of Leibnitz (q. v.), drawn near to
the Roman Church, and their influence was making itself felt among the tutors of the university. Pfeifer,
professor extraordinary of theology, had openly com-
mented on Roman Catholicism, and was deprived of his
office in 1694. The families of court officials regu-
larly attended mass. Ernest Grabe, another professor ex-
traordinary, had placed in the hands of the consistory a
work in which he alleged that the Evangelical Church
had, by renouncing the apostolic succession, removed
itself from a Christian basis. The elector committed the
work of answering the various treatises written in

request having been acceded to, Spener removed to Ber-
lin in April, 1681, and was made consistorial-councillor and provost of St. Nicola Church.

The house of Brandenburg was at this time commit-
ted to the policy of toleration in religious matters, and
none of its members were directly interested in Spener's
work. The queen, indeed, became directly hostile to
him, and the king did not grant him audience.

The toleration of the Elector was further extended to the circle of candidates about him with whom he entered
on a thorough study of the Scriptures. His influence
was even more effective indirectly, as appears from the
appointment of a large number of persons of like mind
with himself to responsible positions in the Church.

It was through such appointments to the faculty that
Halle became the nursery of the pietist theology, being
manned by such professors as Breithaupt, Francke, An-

cial attention—the latter because it contains Spener's
version of the entire progress of the Pietistic controver-
sies. The polemical abilities of Spener were at about
this time employed upon another controversy, not con-
ected with his own direct work. The Catholic party,
had, under the guidance of Leibnitz (q. v.), drawn near to
the Roman Church, and their influence was making itself felt among the tutors of the university. Pfeifer,
professor extraordinary of theology, had openly com-
mented on Roman Catholicism, and was deprived of his
office in 1694. The families of court officials regu-
larly attended mass. Ernest Grabe, another professor ex-
traordinary, had placed in the hands of the consistory a
work in which he alleged that the Evangelical Church
had, by renouncing the apostolic succession, removed
itself from a Christian basis. The elector committed the
work of answering the various treatises written in
support of this movement to three theologians, among whom was Spenser. He produced in this the Dein Der ekow. Kirche Rechts vor falschem Bekenntnisse, which restrained Graft from going over to Romanism as Pfeiffer had done, though he removed to England and joined the Anglican establishment. Soon afterwards the elector Frederick Augustus of Saxony, a former pupil of Spenser, apostatized to Romanism. A doctrinal war ensued with time; and associations for religious improvement were multiplied among the clergy and laity of Berlin.

Spenser's family consisted of his wife and eleven children, eight of whom survived his departure. One son, John I., occupied the chair of physics and mathematics at Halle, and died in 1692. Another, William Lewis, began the study of theology. Jacob Charles was first theologian, then jurist, and eventually became the victim of melancholy, which unfitted him for public life. The youngest, Ernest Godfrey, also studied theology, but fell into vicious habits. After being reclaimed, he abandoned theology and entered on the law, in which profession he was distinguished for ability and integrity.

In his twenty-sixth year, he held the position of chief-auditor.

Spenser was inferior to none of his contemporaries in theological culture and acumen. His ability as an exegete is attested by his sermons and his valuable book Gemeinsame Bibelsprüche (1698). In systematic theology he was thorough and eminently clear, though hampered by the formalistic methods of his time. It appears, however, that his knowledge, or, at any rate, his interest, particularly towards the close of his life, did not transcend the bounds of theology. He was wanting in imagination, gifted with a strong and practical mind, as well as with a warm heart, the father of which is evidenced by the choice of genealogy and heraldry among historical studies as the subjects of special inquiry. An important work in heraldry, entitled Insignium Theoria, was published by him as late as 1690. He also lacked a good literary and rhetorical style. All his writings are intolerably verbose. He had experienced the shortcomings of the Latin master of his time; but at least one German hymn from his pen deserves mention—So tate an dem, dass ich mit Freud en, etc. His ecclesiastical attitude was that of thorough and sincere subordination to the confession of his Church; but he endeavored to widen, so far as he saw good, the meaning of the word religion, and thereby restricted the confession. The evils in the Lutheran Church which he censured had been all repeatedly ascribed by leading writers. He differed from his predecessors, however, in according a much larger measure of charity to reformers whose excess of zeal might drive them into error, and he even asserted that real piety may exist in the hearts of persons whose beliefs concerning even important matters of the faith are found to be very erroneous. He conceded, nevertheless, that every departure from a correct belief implies the religious life and constitutes a fault. His only heresy was chiliasm (q. v.), without a rejection of art. 17 of the Augsburg Confession (q. v.). The hope of a general gathering of the Jews into the Church of Christ, to which he held, had been asserted by a number of the earlier theologians of his Church.

In ecclesiastical politics Spenser had, almost alone, discovered a great deficiency in the organization, though not in the theory, of his Church. He held the estate, the laity, held no position of trust or duty in the practical administration of the Church, save as it was represented by persons employed as teachers of the young or officers of the government. Spenser believed in the divine institution of the ministry of the Word, but he held that the Church could not afford to dispense with the services of laymen; and as the Church needed their services, so they were entitled to participate in her government.

In his private character Spenser was eminently pure. His public and private life are open to inspection in the writings of himself and his contemporaries, but it would be difficult to raise a single objection against his moral character. He was a man of such Christian spirit, and Christ brought Spenser's literary labors to a close. He died Feb. 5, 1705. A few years later, on the accession of queen Sophia Louisa (1708), the tendency represented by him began to prevail. The court-preacher, Porst, inaugurated prayer-meetings at the court, which even the king attended frequently and regularly; and associations for religious improvement were multiplied among the clergy and laity of Berlin.

Spenser's character was so pure that he was able to produce upon his own age. Protestant theology was at that time turning away from dogmatism and concerning itself more especially with the interests of subjective piety, and Roman Catholic theology, revealed in France, a tendency to Mysticism and Quietism. There is no question, however, that Spenser was the most influential exponent of the new tendency, not merely because of the exalted stations he was called to fill at Dresden and Berlin, but also through his influence on the German character and his lofty modesteo and erudition. He was at the same time the friend of a number of German princes and influential statesmen. His relations with the ducal family of Wurtemberg and with that of the counts of Wetterau have already been referred to. Duke Ernest sought his advice with reference to the Calixtine troubles as early as 1670. Gustavus Adolphus of Mecklenburg counselled with him in regard to reforms which he intended to inaugurate. Ulricke Eleonore, consort of Charles XI. of Sweden, corresponded with him in relation to the call of a chaplain for her court. The Saxone princes were with but few exceptions his supporters. He was also a rallying-point for all the Lutheran theologians who were not extreme zealous. His correspondence was immense, and involved the treatment of grave and serious questions; and of the academical peregrinants then so common, many came to sit at his feet. To these must be added the numerous candidates whom he was accustomed to receive into his house and bring under his influence. Finally, with the ecclesiastical matters, the Church was not able to send out into the world, though his time was frequently occupied with sessions of the consistory from 8 A.M. till 7 P.M. Canstein's list of Spenser's writings extends over seven folio pages, and enumerates 63 vols. in 4to, 7 in 8vo, and 46 in 12mo, aside from numerous prefatory matter. It is a very time-consuming labor, for he was accustomed to withdraw himself almost entirely from social gatherings. When he died the theological tendency of the Church was greatly changed from what he found it at the beginning of his career. More than half the faculties and a majority of the consistory were still opposed to his views; but the number of like-minded men had attained to high positions in the Church; and the universities of Halle and Giessen, and, somewhat later, those of Jena and Köenigsberg were training a great number of pupils in his spirit and according to his views.

See Walch, Streitigkeiten innerhalb der luth. Kirche; Canstein, Lebenbeschreibung Spenser's (1740); Steinmetz, in his ed. of Spenser's minor works (1746); Knapp, Leben u. Charakter einiger frommen Manner des vorigen Jahrhunderts (1829); Hossbach, Leben Spenser's (2d ed. 1858); Thilo, Spenser als Kateschet (1841).

Spengler, Lazarus, recorder, syndic, and councilor of Nuremberg from 1592 to 1584, and one of the earliest of Luther's friends, was born March 13, 1479, and qualified himself for the practice of law at the University of Leipzig. He wrote in defence of Luther's teaching, and his name was in consequence included with
that of Perkheimer (q. v.) in the bull of excommunication which Dr. Eck procured for the destruction of Luther and his adherents. Eck also wrote to the Council of Nuremberg, urging the execution of the bull; and the two men were obliged to apply to him for absolution (see Planck, Gesch. d. protest. Lehrbegriffe [Leips. 1791], i, 382). Spengler was the representative of Nuremberg at the Diet of Worms in 1521. He was afterwards employed to promote the interests of the Reformation in his native city by securing the establishment of an evangelical school; and for this purpose negotiated with Melancthon and visited Wittenberg in person. His wish was realized in 1525. He also participated in the Convention of Spiritual and Secular Councillors called by margrave George of Franconian Brandenburg (June 14, 1528) at Anspach, for the purpose of fixing regulations to govern a visitation of the churches. When Melancthon seemed to be yielding too much to the opponents of the Reformation at the Diet of Augsburg, in 1530, Spengler was commissioned to report the state of affairs to Luther, then sojourning at Coburg. He also drew up an able opinion on the response given by the Protestant deputies to the proposals made by their adversaries on Aug. 19, 1530. Spengler was esteemed by many princes and lords, particularly by the elector of Saxony; and also by many prominent leaders in the Church—e.g. Bruck, Jones, Bugenhagen, Camerarius, and others. The letters of Luther and Melancthon show how warm and intimate was their friendship for him. His health gave way in 1529; and, after repeated attacks of sickness, he died Nov. 7, 1534. He was buried in 1531 at Ursula Sulmeister, and became the father of nine children. A hymn by his hand is still extant, and has been rendered into several languages, beginning with Durch Adams Fall ist ganz verdorrt. Others were composed by him, but are no longer extant. See Haunbrot, Lebenbeschreibung, eines chrißt. Politiciern, nehmlich L. Spengler (Nuremb. 1741). A list of his published and unpublished works is given in Planck, ut sup., p. 559–565.

**Spur** (Sper, Spar), a name applied by old writers to pieces of timber of various kinds, such as rafters, wooden bars for securing doors, etc. The term is still used in some districts for rafts, and batten is not an unusual name with Middle-age authors for a rafter. They also frequently speak of sperring a door, meaning the securing it with a wooden bar, or fastening it with a bolt. Another sense of the word spur is for the ornamented wooden brackets which support the somber-beam by the doorways at York: this usage is believed to be quite local. See Bracket; Haunch.

**Spertus, Paul,** a Swabian poet and Reformer, is said to have been descended from a noble Swabian family named Spetter or Spret. His name is frequently followed in documents by the adjectives Heiligen-Teut. He first appears as a preacher at Dinkelsbühl, in Franconia, and then, in 1523, preacher in the cathedral at Würzburg. His sermons presented the Word of God in its purity, and fearlessly reëxisted abuses and corruptions in the Church; and as Luther's influence became more powerful in the chapter, Spertus was accused of fomenting disturbances, and was dismissed from his post (see Scharold, Luther's Ref. in Beschreibung auf das damalige Bisthum [Würzburg, 1834], p. 186 sq.; De Wette, Luth. Briefe, ii, 448). He also labored for a time in the ministry at Salzburg, but left the exact date of his leaving it. In 1521 he went to Vienna, living in privacy until January, 1522, when he took occasion, from a notorious sermon by a monk in defence of celibacy, to demonstrate the sanctity of the marriage state and to show that the traditional theory and practice of vows are in direct contradiction of the Gospel and the bare necessities of life. That month he preached a sermon to this end from the pulpit of St. Stephen's Church, which was subsequently printed at Königsberg (1524), and a copy of which he sent to Luther. The theological faculty at once branded the sermon as heretical, and selected from it eight specifications for a charge against him which was laid before the bishop, and also published. Being wholly unprotected against the rage of his foes, Spertus departed from Vienna, and, having been thrice summoned to appear, he was formally excommunicated under the canon law. His word had, however, fallen upon receptive soil, and the refutation of his arguments which was required of all preachers served only to spread his sermon over a wider area.

On his flight through Moravia, Spertus was requested by the abbot of the Dominican convent at Iglaus to accept the position of preacher to the convent church. He accepted, but, to the great surprise of his patron, at once began to preach the Gospel, and with a success that won the town-councillors and citizens in a body to his support. A public pledge of protection and support was given him in the town-hall, while the abbot and his monks were preparing to begin violent measures of repression. His activity rapidly extended his influence over the whole of Moravia, and in the next few years, in association with all the leaders in the Evangelical movement throughout Bohemia and Moravia. It is noticeable that he was unable to agree with the Bohemians in regard to the Lord's supper, and that he sought counsel and instruction from Luther with reference to this and other points of doctrine. In the meantime the abbot of Iglaus had laid a complaint against Spertus before the bishop of Olmutz, who was confessor to the inexperienced king Louis and a determined enemy of the Reformation. The result was that Spertus was thrown into prison without having been allowed a trial, and was kept there for repression of his friends, among them margraves Albert and George of Brandenburg, supported by the fear of a popular rising, which the attempt to burn Spertus at the stake would have caused throughout Moravia, induced the king to order his liberation, though coupled with a positive prohibition of a renewal of his ministry at Iglaus. His late parishioners furnished him with testimonials setting forth his character and usefulness while their pastor, and allowed him to depart. He went to Wittenberg, and became the assistant of Luther in literary labors. Among the labors performed by him in this period was the participation with Luther in the first collection of German Evangelical hymns, which appeared in 1524 and included three hymns of his own (Es ist das Heil uns kommen her; Helf Gott, wie ist der Menachen Not; In Gott gauß ich, dass er hat, etc.).

In the year 1524 the margrave Albert extended to Spertus an invitation to visit his castle at Wolfthal, which he accepted after ascertaining that no likelihood of his being imprisoned by the king or removed to Iglaus existed. He brought with him Luther's recommendation as "a dignus vir et multa perplexus," and at once joined Briesmann, the earliest Reformer of Prussia, in carrying forward the work of Protestantism. He retained the services of six years, during six of which he was court-preacher at Königsberg, after which he became bishop of Pomerania. While at Königsberg he was di-
SPERATUS 925 SPHINX

rected in March, 1525, to participate in the introduction of the new system of Church government devised by the clergy and adopted by the legislative body in December, 1525. He also contributed materially towards the improvement of the liturgical part of public worship by composing hymns for use by the congregation, and in some instances accompanying them with original melodies in the spirit of the so-called "Kölnisches Lieder," a collection of songs which he had put together at the request of Prince Casimir of Saxony. His work is still held in high esteem by the clergy of that country."

Speratus was a Thessalian river-god in Greek mythology, in the region of Epirus and the Hebrus. He became the father of Meneius by Polydorus, the son of Peleus (Homer, Iliad, xv, 174; xxiii, 145; Apollod. iii, 14, 4; Pausan. i, 37, 2; Herod. vii, 198).

in the constellations Leo and Virgo appears quite unfounded. In Egypt the sphinx also appears as the symbolical form of the monarch considered as a conqueror, the head of the reigning king being placed upon a lion's body, the face bearded, and the usual dress-drapery being suspended before it. Thus used, the sphinx was generally male; but in the case of female rulers the figure has a female head and the body of a lioness.

The most remarkable sphinx is the Great Sphinx of Gizeh, a colossal form hewn out of the natural rock, and lying three hundred feet east of the second pyramid. It is sculptured out of a spur of the rock itself, to which masonry has been added in certain places to complete the form, and measures one hundred and seventy-two feet six inches long by fifty-six feet high. Immediately in front of the breast, Caviglia found, in 1816, a small naos, or chapel, formed of three hieroglyphical tablets, dedicated by the monarchs Thothmes III and Rameses II to the sphinx, which they adore under the name of Haremakh, or Harmachis, as the Greek inscriptions found at the same place call it—i.e. the Sun on the Horizon. These tablets formed three walls of the chapel; the fourth, in front, had a door in the centre and two couchant lions placed upon it. A small lion was found on the pavement, and an altar between its fore-paws, apparently for sacrifices offered to it in the time of the Roman period. Before the altar was a paved esplanade, or dromos, leading to a staircase of thirty steps placed between two walls, and repaired in the reigns of M. Aurelius and L. Verus, on May 10, A.D. 166. In the reign of Severus and his sons, A.D. 198-200, another dromos, in the same line as the first, and a diverging staircase were made, while some additions were found to have been made to the parts between the two staircases in the reign of Nero. Votive inscriptions of the Roman period, some as late as the 3rd century, were discovered in the walls and constructions. On the second digit of the left claw of the sphinx an inscription in pentameter Greek verses by Arrian, probably of the time of Severus, was discovered. Another metrical and prose inscription was also found. In addition to these, walls of unburned brick, galleries and shafts, were found in the rear of the sphinx extending northward. The excavations, however, of M. Mariette in 1852 have thrown further light on the sphinx, discovering the peribolos, or outer wall that encircled it; that the head only was sculptured; and that the sand which had accumulated round it was brought by the hands of man, and not an encroachment of the desert; also that the masonry of the belly was supported by a kind of abutment. To the south of the sphinx Mariette found a dromos which led to a temple built, at the time of the 4th dynasty, of huge blocks of alabaster and red granite. In the midst of the great chamber of this temple were found seven statues, five mutilated, and one whole, of Chephren and two in the temple, made of a porphyritic granite. They are fine examples of ancient Egyptian art. While the beauty and grandeur of the Great Sphinx have often attracted the admiration of travellers, its age has always remained a subject of doubt; but these later discoveries prove it to have been a monument of the age of the 4th dynasty, or comparatively early in the pyramid-building.

Besides the Great Sphinx, avenues of sphinxes have been discovered at Sakkara forming a dromos to the Serapeum of Memphis, and another dromos of the same at the Wady Essehala. A sphinx of the age of the Shepherd dynasty has been found at Tanis, and another of the same age is in the Louvre; and a granite sphinx, found behind the vocal Memnon and inscribed with the name of Amenophis III, is at St. Petersburg. An avenue of crouching sphinxes has been found at Karnak. These are each about seventeen feet long and of the age of Horus, one of the last monarchs of the 18th dynasty. Various small sphinxes are in the different collections of Egypt, but none of any very great antiquity. The Theban sphinx, whose myth first appears in Hesiod, is described as having a lion's body, female head, bird's wings, and serpent's tail, ideas probably derived from Phoenician sources, which had adopted this symbolical form into inscriptions from Egypt. She was said to be the issue of Orthos, the two-headed dog of Geryon, by Chimera, or of Typhon and Echidna, and was sent into the vicinity of Thebes by Juno to punish the transgression of Laius, or, according to other accounts, by Bacchus, Mars, or Pluto. This she did by propounding a riddle to every one that passed by and killing those who were unable to solve it. Oedipus finally gave the solution, and the sphinx thereafter threw herself from the rock on which she had settled. The sphinx was a favorite subject of ancient art, and appears in bas-reliefs, on medals of Chios and other towns, and often as the decorations of arms and furniture. In Assyria and Babylonian representations of sphinxes have been found, and the same are not uncommon on Phoenician works of art.

Sphragis (Σφραγις, σφραγις) a name given in the ancient Church to baptism. Being rather uncommon as applied to baptism, it has occasioned some error among learned men, who often mistake it either for the sign of the cross, or the consignation, and the union which was used in confirmation. The imposition of hands in ordination was called σφραγισμός (sphragismos) and σταυρονομία (sphragismos (in form of a cross), because the sign of the cross was made on the head of him that was ordained. (Chrys., Christ. Antiq. bk. iv, ch. vi, § 12; bk. xii, ch. i, § 4.

Sphragitididas, in Greek mythology, were a class of prophetic nymphs on Mount Citharon, in Boeotia, where they had an oracle in a grove.

Sphyryrus, in Grecian mythology, was a grandson of Asklepius and son of Machaon by Anticlea, the daughter of king Diocles of Phere.

Spice is the rendering in the A. V. of the following Hebrew and Greek words. See AROMATICUS.

1. Baslam, bieem, or bdem (בזלאם, ביאם, or בידם; Sept. ἦλαμα, ἔλαμα; Vulg. aromata). The first-named form of the Hebrew term, which occurs
only in Cant. v, 1, "I have gathered my myrrh with my spice," points apparently to some definite substance. In the other places, with the exception perhaps of Cant. i, 13; vi, 2, the words refer more generally to sweet aromatics or the principal of which was that of the balsam, or balm of Gilead. The tree which yields this substance is now generally admitted to be the *Amyris* (*Balsamodendron*) *opobalsamum*; though it is probable that other species of *Amyris* are included under the terms. The identity of the Hebrew name with the Arabic *basham* or *basham* leaves no reason to doubt that the substances are identical. The *Amyris* *opbalsamum* was observed by Forskål near Mecca; it was called by the Arabs *basham*, i. e. "very odorous." Yet whether this was the same plant that was cultivated in the plains of Jericho and celebrated throughout the world (Flint, *Hist. Nat.* xii, 25; Theophrastus, *Hist. Plant.* ix, 6; Josephus, *Ant.* xv, 4, 2; Strabo, xvi, 367, etc.), it is difficult to determine; but being a tropical plant, it cannot be supposed to have grown except in the warm valleys of the south of Palestine. The shrub mentioned by Burckhardt (*Trav.* p. 323) as growing in gardens near Tiberias, and which he was informed was *balsam*, cannot have been the tree in question. The A. *v. var. rendent balam* by "balm;" it gives this word as the representative of the Hebrew *tsori*, or *tsori*. See Balm. The form *bism* or *bism*, which is of frequent occurrence in the Old Testament, may well be represented by the general term "spice," or "sweet odors," in accordance with the renderings of the Septuagint. The "balsam of Tarsus" was given in some parts of Arabia and Africa, and is seldom more than fifteen feet high, with straggling branches and scanty foliage. The balsam is chiefly obtained from incisions in the bark, but the substance is procured also from the green and ripe berries. The balsam orchards near Jericho appear to have existed at the time of Titus, by whose legions they were taken formal possession of, but no remains of this celebrated plant are now to be seen in Palestine (Lady Calcutt, *Scripture Herbal*, p. 38). See Tristram, *Nat. Hist. of the Bible*, p. 386. See Gilead, Balm of.

2. *Nekoth* (Greek) occurs twice in the book of Genesis, and no doubt indicates a product of Syria, for in one case we find it carried into Egypt as an article of commerce, and in another sent back to the same country. Thus, in Gen. xxxvii, 25 we read, "Behold, a company of Ishmaelites came from Gilead with their camels, bearing *spicery* (*nekoth*), and balm (*tsori*), and myrrh (*lod*), going to carry it down to Egypt." To these men Joseph was sold by his brethren, when they were feeding their flocks at Dothan, ascended to be a few miles to the north of Sebaate, or Samaria. It is curious that Jacob, when desiring a present to be taken to the ruler of Egypt, enumerates nearly the same articles (Gen. xlii, 11), "Carry down the man a present, a little balm (tsori), and a little honey (dlibosh), spices, (*nekoth*) and myrrh (lod)." (See the several words.) Bochart (*Hieroz.* ii, iv, 12) enters into a learned exposition of the meaning of *nekoth*, of which Dr. Harris has given an abridged view in his article on spices. Bochart shows that the true import of *nekoth* has always been considered uncertain, for it is rendered *waz* by the paraphrast Jonathan, in the Arabic version of Erpensius, and in *Bereith Roth* (§ 91, near the end). Others interpret it very differently. The Sept. renders it *Syriaca*, *parfume*; Aquila, *stovas*; the Syrian version, *resin*; the Samaritan, *balan*; one Arabic version, *khanub* or *curb*; another, *sumga* (or gum); Kimchi, a desirable thing; rabbi Solomo, a collection of several aromatics. Bochart himself considers it to mean *stovas*, and gives six reasons in support of his opinion, but none of them appears of much weight. *Stovas*, no doubt, was a natural product of Syria, and an indigenous product seems to be implied; and Jerome (Gen. xliii, 11) follows Aquila in rendering it *stovas*. Rosen-
was not used for fumigations, but, mixed with honey, was extensively used as a medicine. It is now chiefly employed for its mucilaginous property as a paste, especially by druggists. See Tristram, Nat. Hist. of the East., p. 6; Proctor, in the ref. vol. of the Encyc.; and Stoll, Gesch. der Pflanzen, i. 155.

It is uncertain whether the word ἄροξ, neldēh, in 2 Kings xx, 13; Isa. xxxix, 2, denotes spice of any kind. The A. V. reads in the text "the house of his precious things," the margin gives "spicery," which has the support of the Vulg., Aqu., and Symm. It is clear from the passages referred to that Hezekiah possessed a house or treasury of precious and useful vegetable productions, and that spice may be included in the places denoted, though perhaps not exclusively, tragacanth gum. Kell (Comment. loc. cit.) derives the word from an unusual root (נֵלָּד, "implievit loculum"), and renders it by "treasure." 3. Sammân (סְמַמוּן; Sept. δέντρα, δέντρον, δέομα, δρομα, סְמַמוּת; Vulg. suave fragrans, boni odoris, gratissimus, aromata; A. V. "sweet" in connection with "spice" or "incense") is a general term to denote those aromatic substances which were used in the preparation of the anointing oil, the incense offerings, etc. (Exod. xxx. 36; xxxi, 11; xxxv, 8, 15, 28; xxxvii, 24; xxxix, 38; xl, 27; Lev. iv, 7; xvi, 12; Num. iv, 16; 2 Chron. ii, 4; xiii, 11). The root of the word, according to Genesius, is to be referred to the Arabic ʿalākam, "officinal," whence samān, "an odoriferous substance." Sammān, therefore, was a single term, supposed to be used for all the mean drugs and aromatics in general. When these are separately noticed, especially when several are enumerated, their names may lead us to their identification. Dr. Vincent has observed that "in Exod. xxx we find an enumeration of cinnamon, cassia, myrrh, frankincense, stacte, onycha, and galbanum, all of which are the produce either of India or Arabia." More correctly, cinnamon, cassia, frankincense, and onycha were probably obtained from India; myrrh, stacte, and some frankincense from the east coast of Africa; and galbanum from Persia. Nine hundred years later, or about B.C. 588, in Ezek. xxvii, the chief spices are referred to, without the addition, however, of calamus. They are probably the same as those just enumerated. Dr. Vincent refers chiefly to the Persians, ascribed to Arrian, written in the 2d century, as furnishing a proof that many Indian substances were at that time well known to civilization. Agalloch, or agarwood, gum of India, cinnamomum, cassia, and cinnamon, nard, costus, incense—i.e., olibanum—ginger, pepper, and spices. If we examine the work of Dioscorides, we shall find all these, and several other Indian products, not only mentioned, but described, as schenanthus, Calamus aromaticus, cyperus, malabarshum, turmeric. Among others, Lycium Indicum is mentioned. This is the extract of barberry root, and is prepared in the Himalayan Mountains (Rolye, On the Lyciwm of Dioscorides, in the Linnean Trans.). It is not unworthy of notice that we find no mention of several very remarkable products of the East, such as camphor, cloves, nutmeg, betel-leaf curcum, lauraceae, and others, which are indigenous in the nature that we could not have failed to recognise them if they had been described at all, like those we have enumerated, as the produce of India. These omissions are significant of the countries to which commerce and navigation had not extended at the time when the other articles were well known (Index Medicine, p. 38).

If we trace these up to still earlier authors, we shall find many of them mentioned by Theophrastus, and even by Hippocrates; and if we trace them downward to the time of the Arabs [see Spicemen], and from that to modern times, we find many of them described under their present names in works written throughout the East, and in which their ancient names are given as synonyms. We have therefore as much assurance as is possible in such cases that the majority of the substances mentioned by the ancients have been identified, and that among the spices of early times were included many of those which now form articles of commerce from India to Europe. For more particular information on the various aromatic substances mentioned in the ancients, the reader is referred to the works which treat of the different kinds—Cinnamon; Frankincense; Galbanum; Myrrh; Spikenard, etc.

4. In one passage (Ezek. xxiv, 10), ἀρόξ, ῥακάχ, to perfume, hence to flavor flesh, is rendered "spice" (elsewhere "prepare," "compound"). See Apothecary.

5. The spices (ἀρώματα, a general term) mentioned as being used by Nicodemus for the preparation of our Lord's body are, according to the Synoptists, myrrh and aloes; by which latter word must be understood, not the aloe of medicine (Aloe), but the highly scented wood of the Aquilaria agallochum. See Aloe. The enormous quantity of one hundred pounds' weight of which John speaks has excited the incredulity of some authors. Josephus, however, tells us that there were five hundred spice-beares at Herod's funeral (Ant. xvii, 8, 3), and in the Talmud it is said that eighty pounds of opobalsamum were employed at the funeral of a certain rabbi. Still, there is no reason to conclude that one hundred pounds' weight of pure myrrh and aloes was consumed. The word of the evangelist imply a preparation (ποιήσα) in which perhaps the myrrh and aloes were the principal or most costly aromatic ingredients. Again, it must be remembered that Nicodemus was a rich man, and perhaps was the owner of large stores of precious substances; as a constant though timid disciple of our Lord, he probably did not scruple at any sacrifice so that he could show his respect for him. A lavish use of spices at the obsequies of the illustrious dead was also made by the later Romans; but, instead of being deposited with the body, they were cast into the flames of the funeral pile. The case of Nero's wife, Poppea, was somewhat exceptional, perhaps on account of her Jewish habits. Pliny tells us (Hist. Nat. xii, 18) that more than a year's supply of spices was burned to do her honor; but Tacitus more accurately says that "the body was not dissipated in the flame, after the Roman fashion; but, according to the custom of foreign kings, was filled with antiseptic perfumes and deposited in the tomb of the Julii" (Am. xvi, 6). See BURIAL.

Spicer, Thomas, a distinguished minister of the Methodist Episcopal Church, was born at Kinderhook, N. Y., Nov. 7, 1788. His conversion took place in October, 1803, and soon after he united with the Church. He was admitted into the New York Conference at Pittsfield, Mass., May 28, 1810. He received the ordination of a deacon in that of elder in 1816. Upon the division of the conference he became a member of the Troy Conference. He was superannuated in 1837, effective in 1839; again superannuated in 1843, effective in 1844, and superannuated in 1845. In 1846 he was the delegate from the Troy Conference to the Evangelical Alliance, London, England, from that time he held either a superannuated or a superannuated relation to the church. He was often engaged in regular work, either as pastor or presiding elder. He died Nov. 13, 1862. Mr. Spicer was a deep thinker and a hard student. He was very industrious, having preached during his ministry 5,800 sermons; and during his seventy-second year he preached 211 times. See Minutes of Annual Conferences, 1865, p. 96.

Spicery. See Spices 2.

Spider is the rendering in A. V. of two Heb. words: 1. 'Akkābiyāh (אֱ֫קרָבִיָּה; Sept. δάραχ; Vulg. arama) occurs in Job viii, 14; Isa. lix, 5. In the first of these passages the reference seems clear to the spider's web, or, literally, house (הַ֫נַּגְּוָה), whose fragrance is alluded to as a fit representation of the hope of a profane, ungodly, or profigate person; for so the word נָגְּוָה really means, and not "hypocrite," as in our version. The object of
such a person's trust or confidence, who is always really in imminent danger of rain, may be compared for its uncertainty to the spider's web. " He shall lean upon his house (i.e. to keep it steady when it is shaken); he shall hold it fast (i.e. when it is about to be destroyed); nevertheless, it shall not endure" (Job viii, 15). In the second passage (Isa. lix, 4) it is said, "The wicked weaves the spider's web" (folly, literally " thin threads"); but it is added " their thin threads shall not become garments; they shall not cover the one who is with their works; that is, their artificial shall neither succeed, nor conceal themselves, as does the spider's web. This allusion intimates no antipathy to the spider itself, or to its habits when directed towards its own purposes; but simply to the adoption of those habits by man towards his fellow creatures. No expression can convey antipathy towards any creature whatever is to be found in Scripture. Though certain species, indeed, which for good and wise reasons were prohibited as food, are so far called " an abomination," yet revelation throughout recognizes every living creature as the work of God, and deserving the pious attention of mankind.—Kitto.

In the passage from Job the special allusion is thus seen to be not to the use of the web as a snare to interconvert flies, but as a structure for the concealment and protection of the artificer; and is intended to express that, notwithstanding all the ingenuity displayed in the construction of the web, and the spider's trust in its art and effort, the means at the impostor's disposal suffices to destroy it; so shall the artificers which the hypocrite so craftily devises, and on which he depends for concealment, fail before the judgment of God. We may suppose that the writer had his eye upon one of those species which weave an elaborate nest in the form of a wide sheet, centring in a close and clothelike tube, in which the animal lives, such as that of Apelena labyrinthica, which is so common with us in the latter part of summer. "Our readers," says Mr. Rennie, "must often have seen this nest spread out like a broad sheet in hedges, furze, and other low bushes, and sometimes on the ground. The middle of this sheet, which is of a close texture, is swung, like a sailor's hammock, by silken ropes extended all around, to the higher branches; but the whole curves upward and backward, sloping down to a long funnel-shaped gallery which is nearly horizontal at the entrance, but soon widens obliquely, and it becomes quite perpendicular. This central gallery is about an inch in diameter, is much more closely woven than the sheet part of the web, and sometimes descends into a hole in the ground, though often into a group of crowded twigs or a tuft of grass. Here the spider dwells secure, frequently resting with her legs extended from the entrance of the gallery, ready to spring out upon whatever insect may fall into her net-net" (Insect Archit. p. 357).

The prophet Isaiah appears to glance at the poisonous nature of the spider, and the object for which the web is woven. It is for the entrapping of unwary insects, which are then seized by the treacherous lie-in-wait, and pierced with its venomous sting. Even then moral feelings cannot with metaphysical propriety be attributed to an invertebrate animal, but popular prejudice in all ages and countries has sanctioned the poet's unfavorable verdict, when he says of the spider—

"Cunning and fierce, mixture abhorred."

The craft and apparent treachery of its actions; its ferocity even to its own kind; the dark, sombre colors; the hairiness; and in many species the swollen, bloated form of the abdomen; the repulsive aspect of the head and mouth; and, in particular, the fatality of the venom injected by those formidable fangs—sufficiently warrant the general dislike in which the Araignidae are held, even though we readily grant that they are but fulfilling the instinct which an all-wise God has implanted in them, and concede their utility even to man in diminishing the swarm of annoying insects. The organs of destruction in a spider form an interesting study, and can be examined to great advantage in the slough, or cast skin, which we so often find in the haunts of these creatures. There are in the front of the head— in Clubiona atrax, for example, a common species Common Spider (Clubiona atrax), two stout bristle organs, which are the representatives of the antennae in insects, though very much modified both in form and function. They are here the efficient weapons of attack. Each consists of two joints—the basal one, which forms the most conspicuous portion of the organ, and the terminal one, which is the fang. The former is a thick hollow case, somewhat cylindrical, but flattened sidewise, and covered with minute transverse ridges on its whole surface, like the marks left on the sand by the rippling waves, and studded with stout, coarse hair. Its extremity is cut off obliquely, and forms a furrow, the edges of which are beset with polished conical points resembling teeth. To this end of this furrowed case is fixed by a hinge-joint the fang, which is a curved claw-like organ, formed of hard chitine, and consisting of two parts—a swollen oval base, which is highly polished, and a more slender tip, the surface of which has a silky lustre, from being covered with very fine and close-set longitudinal grooves. This whole organ falls into the furrow of the basal joint when not in use, exactly as the blade of a clasp-knife shuts into the hasp; but when the animal is excited, either to defend itself or to attack its prey, the fang becomes stiffly erected. By turning the object on its axis under the microscope, and examining the extreme tip of the fang, we may see that it is not brought to a fine point, but that it has the appearance of having been cut off slant-wise just at the tip; and that it is tubular. Now this is a provision for the speedy infliction of death upon the victim; for both the fang and the thick basal joint are permeated by a slender membranous tube, which is the poison duct, and which terminates at the open extremity of the former, while at the other end it communicates with a lengthened oval sac where the venom is secreted. This, of course, we should not see in the slough, for it is not cast with the exuviae, but retained in the interior of the body; but in life it is a sac extending into the cephalothorax—i.e., one of the body, which carries the legs is called—and covered with spiral folds produced by the arrangement of the fibres of its contractile tissue. When the spider attacks a fly, it plunges into its victim the two fangs, the action of which is downward, and not right and left, like that of the jaws of insects. At the same instant a drop of poison is secreted in each gland, which, oozing through the duct, escapes from the perforated end of the fang into the wound, and rapidly produces death. The fangs are then clasped down, carrying the prey, which they powerfully press against the toothed edges of the stout basal piece, by which means the nutritive fluid of the prey is pressed out and taken into the mouth; after which the dry and empty skin is rejected. The poison is of an acid nature, as experiments performed with irritated spiders prove, litmus paper pierced by them becoming red as far around the perforation as the emitted fluid spreads.

There are very many species of spider in Palestine; some which spin webs like the common garden spider; some which dig subterranean cells, and make doors in them, like the well-known trap-door spider of Southern Europe; and some which have no web, but chase their prey upon the ground, like the hunting and wolf spiders (Wood, Bib ble Animals, p. 644). Notice is taken in the Bible, however, only of those that spin webs, but the
SPIEKER

SPIES

particular species is not indicated. A venous spider is noticed by several travellers (Kitto, *Phys. Hist. of
Palaestina*, p. 418).

2. *Semenith* (σεμένιθ), Sept. καλαβρότης; Chald. נֹעַר; Vulg. stello; translated by the A. V. "spider"
in *Pro. xxx*, 28, the only passage where the word is found) has reference, according to most interpreters, to
some kind of lizard (Bochart, *Hieros. ii, 510*). It is
mentioned by Solomon as one of the four things that
are exceeding clever, though they be little upon earth.
"The semenith taketh hold with her hands, and is in
kings' palaces." This term exists in the modern Greek
language under the form σαμενιθας. "Quem Græci
hodie σαμενιθας vocant, antiquæ Græciae est ἱσσα
καλαβρότης, id est stello—que vox pura Hebraica est et
repetitur in *Pro. xxx*, 28, σαμένιθ (Salmasii *Parr.
Exercit. p. 817, b. G.).—Smith. If a lizard be indicated, it
must evidently be some species of gekko, a notice of
which genus of animals is given under the article
Lizard. Thus the Sept. rendering designates a clinging
lizard, able to hold on against gravity, and most
modern commentators incline to follow this interpre-
tation. However, as the gekko could never be other
than a casual intruder into a palace, and as the selection of
a dwelling, implying sagacity, seems indicated by the
rendering, some are rather disposed to accept the render-
ing of our English Version, and to understand the house-
spider (*Arranea domestica*), which mounts by means of
her "hands" to secure corners, even in royal palaces,
and there makes her home.

Spiker, Christian Wilhelm, a Protestant di-
vine of Germany, was born April 7, 1780, at Branden-
burg. He studied at Halle, where in 1804 he was also
instructor at the seminary. In 1809 he was made
professor of theology and deacon at Frankfort-on-the-
Oder, in 1818 superintendent and first pastor, and died
there May 10, 1858. Spiker was a voluminous writer.
Of his writings we mention, *Auseinandersetzung für
crystallische Erbauung* (Leips. 1855, 4 vols.); *Anakath-
buch für gebildete Christen* (ibid. 1860, 9th ed.); *Das
Abendmahl in* (ibid. 1868, 8th ed.); *Das augsbur-
gische Glaubensbekenntniss und die Apostolische
dezennium* (Berlin, 1830, 2 vols.); *Kirchen-
und Reformationsgeschichte der Mark Brandenburg*
*Theologischen Literatur*, iii, 184, 977; *Regenburger Conversa-
(B. P.)

Spiera, Francesco, an Italian in the days of the
Reformation who abjured the Evangelical faith, which
he had for a time professed, and then became the prey
of remorseful despair until he died. The history of his
lapse and sufferings excited immense interest, and ac-
quaintance with the circumstances of the case caused
at least one conversion, that of Paul Vergerius (q. v.).
Various observers recorded the facts, among them Ver-
gerius, Dr. M. Gribaldus, professor of civil law at Padua,
Dr. Henricus Scotus, and Dr. Sigismund Gelous, profes-
sor of philosophy at Padua, whose reports are yet
extant, and form the basis of older and more recent
German revisions of the story. The latest are Roth,
*Spiera's Lebenende* (Nuremberg. 1829); and Sixt,
*petrus paulus vergerius* (Brunswick. 1855), p. 125-
160.

Spiera was a jurist and attorney in the little town
of Citadella, near Padua, excessively avaricious and capa-
bile of employing the most disreputable measures to se-
cure his ends, and none the less possessed of talent and eloquence. He acquired a considerable fortune, and
rose to prominent position among his neighbors. He was
also hardly married, and the father of eleven chil-
dren. In about 1542, when about forty-four years of age,
he was awakened, and began to repent of his worldly-
ness. At this precise juncture the Reformation began
to assert itself with vigor in Italy, and Spiera heard the
message of salvation through the death of Christ. It
filled him with transcendent joy, and under its impulse
he felt constrained to declare to others the riches of sa-
vation, that they might partake of similar felicities.
He had faith, and also feeling, the highbrow enjoyed
that of faith; he was doubtless in danger of confounding
faith with the subjective feelings, and of neglecting a
moral appropriation to himself of the atonement as ac-
tualized by faith. In point of fact, he seems to have
been more concerned to proclaim the good news to oth-
ers than to regulate his life by the knowledge he had
obtained. To qualify himself to preach he gave him-
self to an incessant study of the Scriptures, assisted by
ancient and modern theological books; and soon after-
wards he proclaimed the new doctrine in every part of
the little town. It is remarkable that he preached, on
the one hand, the doctrine of justification by faith in
the merits of Christ without meritorious works, and, on
the other, protested against the errors and abuses of
the Romish Church, but that he did not emphasize the
doctrine of repentance. He seems never to have clearly
apprehended the need of repentance, and while rejoin-
ing in his spiritual ecstasy and intent on the conver-
sion of all, he was well armed for himself to conduct his
practices without much change from his earlier habits.
His course produced much excitement and gained him
many followers, so that the influence of the village
priests was greatly impaired, and they were induced
about six months after Spiera's entrance on his new ca-
cer, to come out against him before the legate Daza
Casa at Venice. The latter at once proceeded in the
case by the hearing of a number of witnesses, and assu-
ured himself of the co-operation of the counsel for the
State, and Spiera at once lost heart. He had never ex-
perienced a real conflict with his old self, and was not
qualified to entertain this conflict when he felt he had
brought himself before the legate, even before he was
summoned, and when required signed a revoca-
tion of everything he had taught in opposition to the
Church, together with a plea for forgiveness. He was
then compelled to return to his home and read in the
Church a prescribed formula of abjuration, which he did
on Sunday, in the presence of more than two thousand
people, and was fined thirty ducats, of which five were
given to the priest.

Immediately on Spiera's return to his house the ter-
rors of the judgment and eternal perdition came upon
his soul, even to the prostrating of his physical stren-
gh. He could not mend his ways, and lost all desire
though a raging thirst tormented him. After six months
he was taken back to Padua, where three leading physicians
took him in charge, and a number of learned and pious
men ministered to his soul. Every endeavor was in
vain, and as the case was exciting too much interest in
Padua, he was taken back to his home, where he con-
tinued to reject food except as physical force compelled
him to receive it, and often sought to lay violent hands
on himself. The ingenuity he had cultivated in the
perversion of his legal practice now returned to plague
him, and prevented him from deriving comfort from
the promises of the Gospel. He beheld himself to have
committed the sin against the Holy Ghost, and declared
that God had reproved him, so that none of the prom-
ises were for him. The intolerable sense of his sin at
times caused him to roar like a beast; but it is appar-
ten that he found it easier to give way to despair than
to repent—a possible indication that he found a certain
satisfaction in his sufferings. The Romish religious-
ians who sought to give rest to his mind, and the superin-
tendents or physicians who thought that exorcisms and
dead saints might heal his malady, probably intensified
the mischief, as Melanchthon already observed; at any rate,
Spiera endured no relief, and died in convulsions of
despair in the autumn of 1549. See *Herogg, Real-
Encyclopedia*, s. v.

Spies (Numb. xxxi, 1). See Atharim.
In addition, Servin, the attorney of queen Joanna, accused him of defaming the royal house of Navarre, and, according to the custom, containing the forged letters in prison, March 11, 1566. At the same time rumors of Spîfen's adultery and connected forgeries began to circulate, and an examination was ordered, which resulted in the finding of a forged contract for a marriage of conscience with Catherine, dated Aug. 2, 1569, but which she acknowledged to have signed only two years before the discovery, and containing the forged consent of Catherine's father and uncle to her relations with him after her widowhood began. He confessed the forgery, but pleaded the lapse of time and his subsequent marriage and blameless life. The charge that he had written against the house of Navarre was indignantly denied; he had desired the Gonzeps to be reconciled, but denied any intention of reuniting with the Roman Church. His intention was to become a true and evangelical bishop. The Council of Geneva condemned him to die because of the proven forgery, and the intercession of the Bernese and of Coligny (the latter too late), as well as the memory of the services rendered for the reformed cause, concurred in the sentence of banishment. If he had been a protestant, was of no avail to avert his fate. He was beheaded March 23, 1566, and suffered with great fortitude. See Mémoires de Conde, vol. iv; Beza, Histoire Ecclésiastique, vol. ii; also Haag, France Protestante, vol. ix; Senéquier, Histoire Littéraire, i, 384 sq; Spon et Marguery (ed. Gautier), vol. ii; Spon et Annuaire Buronni Continuato (1699), xviii.

Spikenard (גֵּרֶד; ύφόν), a far-famed perfume of the East that has often engaged the attention of critics, but the plant which yields it has only been ascertained in very recent times. That the nard of Scripture was a perfume is evident from the passages in which it occurs. Cant. i. 12, "While the king sitteth at his table, my Spikenard (nard) sendeth forth the smell thereof." So in iv. 14, "Spikenard and saffron, calamus and cinnamon, with all trees of frankincense, myrrh and aloes, with all the chief spices." Here we find it mentioned along with many of the most valued aromatics which were known to the ancients, and all of which, with the exception perhaps of saffron, must have been obtained from the East, and the very name of Sassafras, the food of Justinian's ships, was derived from the word safran, a word which is very like the Arabic sharia or shara, meaning the eye of a sparrow. The close connection between the nard and the ointment of the New Testament is evident by the statement of Mark xiv. 3. "When our Saviour sat at meal in Bethany, "there came a woman having an alabaster box of ointment of spikenard (yperon), very precious; and she brake the box, and poured it on his head. So in John xii. 3, "Then took Mary a pound of ointment of spikenard (μύρον νύφον), very costly, and anointed the feet of Jesus, and wiped his feet with his hair: and the house was filled with the odor of the ointment." On this Jesus, who afterwards betrayed our Saviour, said (ver. 5), "Why was this ointment sold for three hundred pence, and given to the poor?"

Before proceeding to identify the plant yielding nard, we may refer to the knowledge which the ancients had of this ointment. Horace, at a period nearly contemporary, "promises to Virgil a whole cædus (about thirty-six quarts) of wine for a small onyx-box full of spikenard" (Rosenmüller, p. 189), "Nardo vina merebant. Nardi parvus onyx elicesit cadum." The composition of this ointment is given by Dioscorides in i, 77, Παρι υφόνθι μύρον, where it is described as being made with nut-oil, and having as ingredients malabathrum, schoenus, costus, amomum, nar-

SPIKENARD

dus, myrrha, and balsamum—that is, almost all the most valued perfumes of antiquity. It was also a valuable article in ancient pharmacy (see Strabo, xv, 695; Pliny, xii, 25; xiv, 19, 5; xvi, 59; Arrian, Exp. Alex. vi, 22, 8; Hirtius, Bell. Hist. xxxii, 5; Athen. xv, 689; Evangel. Infant. A rok. ch. v; Theophr. Plant. ix, 7; Galen, Sing. Med. viii, 15; Celsi Hierob. ii, 1 sq.).

The nard (νάρδος) was known in very early times, and is noticed by Theophrastus and by Hippocrates. Dioscorides, indeed, describes three kinds of nard. Of the first, called νάρδος (nardo) simply, there were two varieties—the one Syrian, the other Indian. The former is so called, not because it is produced in Syria, but because the mountains in which it is produced extend on one side towards Syria and on the other towards India. This may refer to the Hindu Kshesh and to the extensive signification of the name Syria in ancient times, or to so many Indian products finding their way in those ages into Europe across Syria. These were brought there either by the caravan route from north-west India or up the Persian Gulf and Euphrates. It is evident, from the passages quoted, that nard could not have been a produce of Syria, or its value would not have been so great either among the Romans or the Jews. The other variety is called gangis, from the Ganges, being found on a mountain round which it flows. It is described as having many spikes from one root. Hence it, no doubt, came to be called νάρδος σαγγίς, and, from the word stachis being rendered by the word σταχής, it has been translated stachy荑. The second kind is by Dioscorides called Celtic nard (νάρδος κελτικής), and the third kind mountain nard (νάρδος δρένης). If we consult the authors subsequent to Dioscorides, as Galen, Pliny, Oribasius, Aetius, and Paulus Aegineta, we shall easily be able to trace these different kinds to the time of the Arabs. On consulting Avicenna, we find there are two species named सुंबल, and in the Latin translation from nardum to spica, under which the Roman, the mountain, the Indian, and the Syrian kinds are mentioned. So in Persian works on materia medica, chiefly translations from the Arabic, we have the different kinds of सुंबल mentioned, as (1) सुंबल हिन्दी; (2) सुंबल रूसी, called also सुंबल उल्लेक and Nardem ulleti, evidently the above Celtic nard, said also to be called सुंबल इटालियन, that is, the nard which grows in Italy; (3) सुंबल जिबुली, or mountain nard. The first, however, is the only one with which we are at present concerned. The synonyms given to it in Persian works are—Arabic, سَمْعَلَ, or fragrant nard; Greek, νάρδης; Latin, nardum; and Hindeye, bal chord and jutamansi.

Sir William Jones (Asiat. Res. ii, 416, 8vo) was the first to ascertain that the above Hindeye and Sanscrit synonyms referred to the true spikenard, and that the Arabs described it as being like the tail of an ermine. The next step was, of course, to attempt to get the plant which produced the drug. This he was not successful in doing, because he had not access to the Himalayan Mountains, and a wrong plant was sent him, which is that figured and described by Dr. Roxburgh (Asiat. Res. iv, 27, 438); so Dr. Royce, when in charge of the East India Company's botanical garden at Searahpore, in 30° N. lat., about thirty miles from the foot of the Himalayan Mountains, being favorably situated for the purpose, made inquiries on the subject. He there learned that jutamansi, better known in India by the name bal chord, were early brought down in considerable quantities as an article of commerce to the plains of India from such mountains as Shalma, Kedar Kanta, and others, at the foot of which flow the Ganges and Jumna rivers. Having obtained some of the fresh-brought-down roots, he planted them both in the botanical garden at Searahpore and in a nursery at Munsore, in the Hooghly district, and found the plant produced. The plant is figured in his Illustr. H. Botan. t. 54, and was found to belong to the natural family of Vale-

riano, which has been named Nardostachys jatamansi by De Candolle, and formerly Patrinia jatamansi by Mr. Bow, from plants sent home by Dr. Wallich from Gosamtham, a mountain of Nepal (Penny Cyclop. art. "Spickenard."); Royle, Illustr. H. Botan. p. 242). Hence there can be no doubt that the jutamansi of the Hindus is the सुंबल किन्दी of the Arabs, which they compare to the tail of an ermine. This would almost be sufficient to identify the drug: the appearance to which it refers may be seen even in the accompanying wood-cut. This is produced in consequence of the woody fibres of the leaf and its footstalk not being decomposed in the cold and comparatively dry climate where they are produced, but remain and form a protection to the plant from the severity of the cold. There can be as little doubt that the Arabs refer to the descriptions of Dioscorides, and both they and the Christian physicians who assisted them in making translations had ample opportunities from their profession and their local situation, of becoming well acquainted with things as well as words. There is as little reason to doubt that the νάρδος of Dioscorides is that of the other Greek authors, and this will carry us into ancient times. As many Indian products found their way into Egypt and Palestine, and are mentioned in Scripture—indeed, in the very passage with nard we have cians, cinnamon, and aloes (αλοίς)—there is no reason why spikenard from the Himalayas could not as easily have been procured. The only difficulty appears to arise from the term νάρδος having occasionally been used in a general sense, and therefore there is sometimes confusion between the nard and the sweet cardamon another Indian product. Some difference of opinion exists respecting the fragrance of the jutamansi. It may be sufficient to state that it continues to be highly esteemed in Eastern countries in the present day, where fragrant essences are still procured from it, as the Unguentum nardum was of old. Dioscorides refers especially to its having many shaggy (πολυκυμώνες) spikes growing from one root. It is very interesting to note that Dioscorides gives the same locality for the plant as is mentioned by Royce: απὸ τὴν πατριτανίαν ποιμαντον τοῦ δώον, Γέων κυριουμένον πως τῆς φιάτας. Though he is here speaking of lowland specimens, he also mentions plants obtained from the mountains (see the monographs De Nardo Patritiis by
Spilsman, Benjamin F., a Presbyterian minister, was born in Garrard County, Ky., Aug. 17, 1796. He graduated at Jefferson College, Pa., in 1822, studied theology privately, was licensed by Chillicothe Presbytery in 1823, and ordained and installed by Muhlenburgh Presbytery as pastor of Sharon Church, Ill., in 1824. He labored there until 1826, when he became an itinerant missionary in Middle and Southern Illinois, and organized the Church at Shawneetown, where he built a neat house of worship in 1842. Having labored for seventeen years as a missionary, the people of Shawneetown prevailed upon him to settle, and he became their pastor in 1842. In 1844 he adopted the pastorate of Chester Church, which he retained until 1851, when his old congregation at Shawneetown called him back, and he remained with them till his death, May 3, 1859. Mr. Spilsman was a hard-working missionary, and for over thirty years he labored faithfully, never idle and seldom sick. See Wilson, Presb. Hist. Almanac, 1860, p. 78. (J. L. S.)

Spin (סָפִין, spin). The notions of spinning in the Bible are confined to Exodus xxxv, 25, 26; Matt. vi, 29; and Prov. xxxvi, 19. The latter passage implies (according to the A.V.) the use of the same instruments which have been in vogue for hand-spinning down to the present day, viz. the distaff and spindle. The distaff, however, appears to have been dispensed with, and the termיָּפִין so rendered means the spindle (q. v.) itself, while that rendered "spindle" (עַלְפָּתָה) represents the whorl (verticillium, Pliny, xxviii, 11) of the spindle, a button or circular rim which was affixed to it, and gave steadiness to its circular motion. The "whirl" of the Syrian women was made of amber in the time of Pliny (loc. cit.). The spindle was held perpendicularly in the one hand, while the other was employed in drawing out the thread. The process is exhibited in the Egyptian paintings (Wilkinson, Ancient Egypt, ii, 86). Spinning was the business of women, both among the Jews (Exod. loc. cit.) and for the worship among the Egyptians (Wilkinson, ibid. ii, 4). Smith. Similar customs have prevailed in most modern nations; hence the word "spinner" for an unmarried female. See Weave.

Spinax, Alphonso de, a Christian apostle, lived in Spain in the 15th century. He was of Jewish extraction, but was converted and received into the Order of Franciscan monks, after which he became rector of the high-school at Salamanca, and ultimately bishop of Ourense, in Galicia. He wrote an apologetical work entitled Fortitutim Fidei contra Judaeos, Saracenos Alione Christianae Fidei Inimicos, which was published in 1484, and repeatedly afterwards, and which was famous in its time. It consists of four books, each of which includes several considerations. Book I proves from the foundation of prophecy the truth of Messiah. Book II deals with heretics and the punishments they incur. Book III is devoted to the Jews and to the refutation of their arguments in opposition to Christianity. Book IV is directed against the Mohammedans, and contains a detailed criticism of their religious system, followed by a not uninteresting description of the conflicts the Christians were obliged to sustain against the Saracens. The work was first published anonymously, and was in time attributed, but erroneously, to the Dominican Bartholomew Spina (died 1546; see Zedler, Universal-Lexikon) and others. For a thorough characterization of the work, see R. Simon, Bibloth. Crit. biblique, p. 159; M. de Salicorne, ibid.; and comp. Bayle, Dictionnaire; Zedler, Universal-Lexikon; Schürch, Kirchengesch. xxx, 578 sq.; xxxiv, 361 sq.

Spinckes, Nathaniel, a Nonjurist divine, was born at Castor, Northamptonshire, England, in 1658 (or 1654). He received his first classical instruction from Rev. Mr. Morton, rector of Hadden, and was admitted to Trinity College, Cambridge, March 22, 1670. Induced by the prospect of a Rustian scholarship, he entered Jesus College, Oct. 12, 1672, became A.B. in 1674, was ordained deacon May 21, 1676, was A.M. in 1677, and admitted into priest's orders Dec. 22, 1678. For some time he was chaplain to Sir Richard Edgecombe in Devonshire, and then removed to Petersham, where, in 1681, he was associated with Dr. Hicks as chaplain to the duke of Lauderdale. He was curate and lecturer of St. Stephen's, Wallbrook, London, for over thirty years (1683-85), and in the latter year received from the dean and chapter of Peterborough the rectory of Peakingum-Glyntown. On July 21, 1687, he was made prebendary of Salisbury, Northamptonshire; in the same year (Sept. 24) instituted to the rectory of St. Mary's in that town, having vacated the advowson of Stratford-under-Castrum, or Midlen Castle, in Wiltis, for which he had an annual stipend of £80. He was deprived of all his prebendaries for refusing to take the oaths to William and Mary. After this he was supported by the gifts of the more wealthy Nonjurors, and was consecrated one of their bishops June 3, 1713. He died July 28, 1727. He assisted in the publication of Grabbe's Septuagint, Newcourt's Repertorium, Howell's Caunois, Potter's Clemens Alexandrinus, and Walker's Sufferings of the Clergy. His own works were, An Answer to the Essay towards a Proposal for Catholic Communion, etc. (1705) — The New Pre tenders to Prophecy Re-examined, etc. (1710) — two pamphlets against Howley's Measures of Submission (1711, 1712) — two pamphlets On The Case between the Church of Rome and the Church of England (1714, 1718) — two pamphlets against Restoring the Prayers and Directions of Edward VI's Liturgy (1716). His most popular work was The Sick Man Visited (1712).

Spindle ( спинда, kishór, literally director, i.e. of the spindle), the twirl or lower part of the instrument used in giving motion to the whole (Prov. xxxix, 19). See Distaff. In Egypt spinning was a staple manufacture, large quantities of yarn being exported to other countries, as, for instance, to Palestine in the time of Solomon. The spindles were generally of wood, and they increased their force in turning by having the circular head made of gypsum or some species of composition. In some instances the spindles appear to have been of a light plaited wood, made of rushes or palm-leaves, stained of various colors, and furnished with a loop of the same materials for securing the yarn after it was wound. In Homer's pictures of domestic life, we find the lady of the mansion superintending the labor of her servants, and sometimes using the distaff herself. Her spindle, made of some precious material, richly ornamented, her beautiful work-basket, or rather vase, and the wool dyed of some bright hue to render it the property of being touched by aristocratic figures, are ordinary accompaniments of a lady of rank, both in the Egyptian paintings and Grecian poems. This shows how appropriate was the present which the Egyptian queen Cleopatra gave to the Spartan Helen, who was not less famous for her beauty than for her skill in embroidery.
papal nuncio and authorization by the emperor, he approached different princes and rulers with his plans, which were received with some consideration by reason of the emperor's endowment, but also with much distrust. The most favorable reception was in Hanover, whose rulers were Roman Catholics, and whose leading theologian, Molanus (q. v.), and leading philosopher, Leibnitz (q. v.), were both inclined to favor the proposed union. In 1683 Spinola personally offered the following concessions, which, however, were not in writing: the communion under both kinds; marriage for priests, and non-separation of spiritual properties which had been secularized; suspension of the decrees of Trent, and consent that the "Neo-Catholics" should not be obliged to make formal retraction, and that they should be admitted to participation in a general council, for which provision was to be made. In return, the Protestants were to acknowledge the supremacy of the pope. Molanus thereupon convened a conference of theologians, which drew up a memorial in response to Spinola (Œuvres de Bossuet [ed. Vernay], xxxv, 203, Regula circa Christianorum Omnium Ecclesiasticae Re- unionem), and which put forth a further tractate, in the main according to Spinola's proposition (Methodus Hec- decadsae Unionis Ecclesiæ, inter Romanos et Protestantes). Fortunately no considerable interest in the business was taken by either Church. Bossuet, for example, received the papers which were transmitted to him, and then ignored their existence; and when subsequently Leibnitz and Molanus corresponded with him in reference to the subject, he bluntly rejected Spinola's terms, and demanded unconditional submission to the pope and the Tridentine Council. The landgrave Ernest of Hesse-Rheinfels, on the other hand, asserted that the sole purpose of the movement was to compromise certain princes and theologians with their own party. Negotiations were nevertheless carried on until 1684, and Spinola was made the commissioner-general in charge of the union movement throughout the empire. He retained his hopes of success to the last, but died without having achieved any success whatever. His successor, bishop Graf of Buchheim, renewed the inquiry at the court of Hanover with respect to a possible unification of the churches, and Leibnitz repeated his endeavor to achieve a satisfactory result through the co-operation of Bossuet (1699–1701), but in vain. See Gieseler, Kirchengesch. iv, 177–181; Hering, Gesch. d. kirchl. Unionversuches (1888); Zedlitz, Universal-Leksikon, s. v.; the art. Leibnitz u. d. Kirchenvereinigung in the Grez- boten, 1860, Nos. 44 and 45.

Spinola, BERNHARD DE (Baruch), the most ingenious, acute, and remarkable of the metaphysicians of the 17th century; equally notable for the simplicity, disinterestedness, and purity of his life, and for the rigorous form and unhesitating audacity of his speculations. "Everything in Spinoza appears extraordinary." says Saisset—"himself, his style, and his philosophy." There is, perhaps, no other instance of a philosopher who so completely developed and systematized his scheme as to leave scarcely the possibility of addition or change. Others have been more original in their principles: scarcely any have been more self-inspired in their deductions: a rare combination of his system. These have been more sincere, more earnest, and more assured in their procedure. None have more confidently assumed their premises; none have more rigidly pursued the consequences of their data to their extremest results. Spinoza left no disciples. He has had few followers, and hardly a single imitator. Yet he was a power at the reality of abstract thought, and remains a landmark in the history of philosophy. He pressed the tendencies of his predecessors far beyond their ventures. He was a terror and a torment to the next generation. He exercised a potent influence on metaphysical progress not by making discoveries, but by provoking eager and too unreflecting, dogmatism, by the name as well as the dogmas of Spinoza were regarded.
with unmitigated abhorrence. He was denounced from the pulpit on every possible occasion. He was presented as an object of bitter contempt and execration. Bayly held him up to the scorn of his readers as "a systematical atheist." Leibnitz, gentle to all others, had little gentleness for him, and constructed his own philosophy to refute his errors and to correct the tendencies of his scheme. Berkeley endeavored to rectify and Christianize his theory of matter and mind. Hume, in a like spirit, assumed his ideas and endeavored to imitate his deductions. For coherence of logical evolution, for unshrinking and undeviating application of mathematical demonstration to speculative topics, for impassive and colorless reasoning in abstract formulas, for fearlessness in the ascertainment, no other system can be compared to Spinoza. The peril threatened by his doctrines justified the fervor of resistance with which they were encountered. It did not excuse the bitterness and intemperance with which they and their author were assailed. A milder and juster criticism has in later years been manifested. There is, indeed, some danger that the vicious tendencies of his system may be insufficiently apprehended in the kindlier consideration of the man whose life was innocent and free from blame, and who was fearfully misled in his ardent prosecution of truth by devious and mistaken paths. The approach and the recent occurrence of the anniversary of Spinoza's death are of interest to the man in his labors. Treatises on his life and doctrine were multiplied. His works were republished with diligent care. New and unedited fragments were discovered and given to the world. At the bicentenary celebration at the Hague he was commemorated, in a striking address, by Ernest Renan, in some respects his counterpart in the 19th century. The praise of one who, living, and long after death, had been condemned of nearly all men went abroad into every land, and found sympathizing echoes wherever it went. These alternate fits of chill and fever are frequent in the history of opinion. In the case of such a philosopher as Spinoza, unmeasured praise is even more alarming than unmitigated censure. What is required is a cool and just estimate, which shall explain the origin and character of his philosophy—shall expose its invalidity and its mischievous tendency, and shall yet deal tenderly with the great thinker, and acknowledge the serene virtues of the man. It would be a just judgment for the soberest and soundest of reasoners if they were held responsible for all their thoughts and for all the possible tendencies of their thoughts. Something of the mercy which all men may require should be shown in the estimation of our fellow-men when their speculations—honorable and pious—lie outside the pale of the truth. The approximation is made—under most widely and most hazardously from the truths that we revere and the dogmas that we regard as orthodox.

I. Life.—Baruch van Spinoza was born at Amsterdam, then the great commercial city of Holland, on Nov. 24, 1632. It was a strange nativity for a philosopher. He was a queer product in the land of dikes and canals, polders and docks, and in a community of money-making Dutch traders. The time, too, was a strange one for the appearance of a contemplative recluse. The Continent was involved in wars of religion, wars of succession, and wars of ambition. Germany was convulsed and desolated by Thirty Years' War, which had not run out half its dreadful course. Gustavus Adolphus had fallen a week or two before. Disorders, uproars, contentions, were abroad throughout Europe. Spinoza was born of a pure-blooded Jewish family which had left Portugal and sought in the Netherlands a refuge and asylum from the Spanish Inquisition. His father was in comfortable circumstances, and dwelt in a good house near the Portuguese synagogue, where dealers in old clothes and junk now congregate; but the locality was then a respectable and segregated part of the city.
that class of eminent thinkers—like Grotius, Locke, Leibnitz, Kant—who were profoundly religious in spirit, but not confined within formal theological boundaries. The Jews were so anxious to retain him in their sect, so desirous of avoiding the scandal of his renunciation of Judaism, that they made him a pension of a thousand florins to remain with them, and to attend the synagogue occasionally. The bribe was refused. It was addressed to a spirit never mercenary, and more likely to be repelled than attracted by pecuniary temptations. As he could not be seduced by gain, an inducement made to remove him permanent-ly out of the way. As he came from the theatre or the old Portuguese synagogue—for the accounts differ—an attempt was made to assassinate him. He preserved the vestments which had been pierced by the murderer's dagger.

"See what a rent the envious Cacca made!"

Corruption and violence having equally failed to prevent Spinoza's desertion of the synagogue, he was solemnly cut off from the chosen people. The excommunication seems to have severed him from the members of his own family, and he was reduced entirely to his own resources. The Jewish law has always required the acquisition of some handicraft as an assured means of support in case of necessity. Spinoza, accordingly, learned the art of grinding optical glasses, and depended upon this for his future maintenance. He applied himself to the art with avidity. He frequented the manufactories, where all his surroundings were embarrassing, and found a lodging with a friend in the country. How long he remained in the neighborhood of his native city is uncertain. In 1664 he removed to Rhinsburg, a small place between Leyden and the mouth of the Rhine, which is there a navigable stream, running through the flat and hollow land. He remained at Rhinsburg through the winter, and then changed his abode to Voorburg, a small town three miles from the Hague. Some three years thereafter he was induced to transfer his residence to the Hague itself, where he spent the short remainder of his life. From the time of his departure from Amsterdam his existence passed in secluded industry, mechanical and philosophically. By grinding lenses for optical instruments—an occupation much increased by the recent discovery of telescopes and microscopes—he secured a very modest but independent support. The rest of his time was assiduously employed in the practice of his philosophy. In pleasant conversation with the few friends who enjoyed his intimacy, or with admiring visitors.

The only incidents in this monotonous life which deserve mention are his visit to Utrecht to meet the great Condé, and his refusal of a professorship at Heidelberg. The first occurrence was due to an invitation from Stoupé, a Swiss colonel, commandant in Utrecht during Louis XIV's Dutch war. Stoupé sent Spinoza a passport through the French lines, accompanied with the declaration of the prince de Condé's solicitude to make his acquaintance. Condé was in Utrecht in 1672, but he was then in the midst of a war with Sweden, and in the passage of the Rhine. He was in no condition to meet the Hebrew philosopher, and he set off for his seat at Chantilly as soon as he was able to travel. Spinoza, however, after some delay, accepted Stoupé's invitation, perhaps with the hope of a secure refuge in France in case of his being driven out of Holland on account of his opinions. He did not see Condé, who had left Utrecht before his arrival. When he got back to the Hague, he found much fermentation among the people, who regarded his visit to the French quarters as the visit of a spy, and as a proof of reasonable negotiation. The Jews, who were alarmed at the time, was alarmed by the popular commotion, and by the menace of danger to his house and to his lodger, Spinoza reassured them, stating that he could satisfac-torily explain his journey to Utrecht; but that if the

rable approached the door, he would go straight to them, even if they should tear him to pieces, as they had torn the De Witts. The massacre of the De Witts occurred on Aug. 22, 1672. Condé was wounded on June 12 in that year. Thus the proximate date of Spinoza's visit to Utrecht may be determined.

The second incident was the offer, in 1678, of a pro-fessorship by the elector-palatine. The invitation was conveyed in the most gratifying and flattering manner. The chair of philosophy was offered. Entire freedom of speculation was accorded, on the distinct understanding that there should be no offence to the recognised religion. It was a strange proposal, with a strange condition. It displayed the toleration of rationalistic tendencies which is so characteristic of Germany in our day. Yet it is not easy to discern how Spinozism could be taught without grave infringement of any form of Christianity. The invitation was declined in a graceful and piquant manner, because Spinoza had no disposition to teach instead of studying philosophy, could not determine the limits of the freedom conceded, and preferred the quiet of his private and solitary life to distinctions and emol-uments.

This retired and equable existence was his delight. It was never broken at the Hague, except by inter-rupting discussions of his supposed opinions, which amused more than they disquieted him, though they prevented him from giving his Ethics and other lucubra-tions to the public. The clamar which had been raised in the public mind through the publica-tion of his Tractatus Theologico-politicus, and the apprehension of louder clamor and more vehement opposition, induced him to withhold his Ethics from the world, when already preparing to give it to the press.

The later years of Spinoza were rendered easy and comfortable by a most attentive and courteous intimacy to the friendly lady by a friend. He had declined the chair at Heidelberg without regard to its revenues. He refused to dedicate a treatise to Louis XIV, even with the prospect of a roy-al pension. Simple, upright, independent, incorruptible, self-sustained, of few and humble wants, he declined all favors which might in any way compromise his perfect moral and intellectual freedom. Yet in his later years he was provided for without the necessity of his own labor, and was remitted to the enjoyment of his tranquil speculative activity. Simon De Vries, of Amster-dam, presented him with two thousand florins, to enable him to live more at his ease. He rejected the gift, saying that he had never been a member in any session of so large a sum would certainly interfere with his studies. When Simon approached his end, he de-tcrmined to bequeath all his worldly goods to Spinoza, being himself without wife or child. Spinoza remon-strated with his friend, maintaining that the estate ought to be left to the decedent's brother at Schoten. This was accordingly done, on the condition that the brother should bestow a pension for life on Spinoza. Five hundred florins a year was the amount proposed by the heir. Spinoza pronounced the sum excessive, and insisted on its reduction to three hundred florins. So small a sum sufficed for his maintenance, and for the satisfaction of his truly philosophic wants. Spinoza was small in frame, lean, sickly, and for twenty years threatened with consumption. His habits were always singularly abstemious, but care and watchful-ness in regard to his diet were required in his later life. Death came to him generally by night. He had come down stairs at noon, and had conversed freely with them in regard to the morning sermon which they had heard. They had heard no more. A second visit sprang up over his remains, and after his remains were placed by the to the ground. Petty accounts for shaving, for furnis-hing drugs, for drawing up the inventory of his beggarly chattels, were hastily and urgently presented. His sis-
ter Rebecca, who seems to have utterly slighted him while alive, claimed the inheritance of his effects, but refused to pay his small debts without being assured that a surplus would be left after this was done. All claims were paid by De Vries, of Schiedam, who seems also to have defrauded the funeral expenses. His property was sold in his lifetime and some of it, including his hundred and ninety florins and fourteen sous, after deducting some ten florins for the expenses of sale. It consisted of a meagre supply of plain clothing, two silver buckles, a few books and stamps, some polished glasses and implements for polishing them. He left little money and no visible assets, except his memory of a pure, simple, unambitious, modest, and innocent life, industriously employed in high and earnest speculation, void of offence towards God or man, except for that most dangerous of all offences—sincerely but pernicious error in regard to the highest principles and to the highest objects of human importance.

What finite mind shall undertake to weigh in the balance honesty of motive and sincerity of conduct against intellectual delusions? Spinoza was buried with decent respect at the Hague, Feb. 21, 1677.

II. Works. There is inevitable perplexity and confusion in any attempt to enumerate the works of Spinoza. There is a considerable loss, as well as some gain, in the suppression or the development of his philosophical views. His most important productions were not given to the world till after his death, and some have been discovered and edited only in recent years. But one work of any note was published by himself. Yet, before its publication, his most characteristic tenets were already entertained by him, and were gradually moulding themselves into shape, and receiving further development and increased precision till the very moment of his death. Taking his collected works as they are now presented to us, it is usually impossible to fix the dates at which his conclusions were reached, or to indicate the order in which they bear the seal of his doctrine. This uncertainty, however, is rendered less annoying by the remarkable consistence or consistency, or, rather, by the inflexible rigidity and dry precision, of his system from its first concept to its final exposition. His Ethics constitutes his philosophy properly. They had been commenced before his first published work, though they were not published till after he had passed away. About the same time with their conception was printed his first work, a summary of the Cartesian philosophy. In this the geometrical procedure, so characteristic of his mode of reasoning and so rigorously employed in the philosophy of Spinoza, is already used. Before either of these works was composed, he had probably written his short tractate On God, Man, and Happiness, which was edited for the first time in very late years. In this recently recovered production are already discernible the cardinal principles more fully, and in some respects diversely, elaborated in his later treatises. It would appear that Spinoza's philosophy revealed itself to him, in its first manifestation, virtually such as it was in its ultimate realization. It is so simple in essence, though so elaborate in detail, that this may well have been so. There was no elasticity, no mutability, in the essential thought, and therefore growth or serious alteration of belief was brought only by its nature. The geometrical procedure was in intimate harmony with this changeless character of principle and reasoning, and its adoption may have as readily pretermitted the philosophy as have been induced by it. Of course, under these circumstances, the chronological order of publication was of no great consequence between his several productions, or even of their rudimentary contemplation, ceases to be of any marked philosophical import, and his chief works may be noted simply in the order of their appearance. In 1663, when Spinoza was thirty-one years of age, was issued from the press Remont des Cercles Principio, Philosophiae Frat. I, and II. More Geometrico Demonstrator. He had already exchanged his Hebrew name of Barnabas for the Latin name of Benedict. This treatise was merely a synopsis and logical presentation of the Cartesian philosophy, originally drawn up for a friend. It is no part of his own philosophy. Nevertheless, it is worthy of note that Spinoza's metaphysical career began with a systematization of Cartesianism, and that the geometrical method is employed in his own day, as it was the only exhibition of his views offered to the public; but there was no reason for its engaging so exclusively the consideration of the ensuing century. It is not surprising that polemics should have attached themselves chiefly to this work, for it is much more level to the general apprehension than either the Ethics or the Reformations of the Understanding, as it deals not with the rarefied abstractions of ontology, but with the received notions in regard to prophecy, the inspiration and interpretation of the Scriptures, and kindred topics which lie at the foundation of revealed religion. The Tractatus Theologico-politicus was pure and bold rationalism, and it was first published in 1670. The Life of Jesus has been to the 19th; and the latter may be considered as only the development of the former. It is true that genuine Spinozism is implied in this work; but this is not its prominent characteristic. The most obvious points, which at once provoked antagonism, are briefly indicated by Henry Oldenburg in a letter dated Nov. 15, 1675. He specifies the confusion of God with nature, the rejection of the authority and worth of miracles, the concealment of his views of the incarnation, of the satisfaction, and of the nature of Christ. These important subjects are, however, not what is most prominent in the work, whose whole spirit is expressed in its full title: A Theologico-political Treatise, containing Several Dissertations, in which it is Shown that the Freedom of Philosophy is not only Compatible with the Maintenance of Piety and with Public Tranquility, but that it cannot be Violated without Violating at the same time both Piety and Public Tranquility. The work was a revolution of the general movement of the century. In 1614 John Milton asserted the freedom of the press in his Areopagitica; in 1647 Jeremy Taylor produced his Liberty of Prophesying, advocating freedom of religious ministrations; in 1670 appeared Spinoza's Tractatus Theologico-politicus, urging unrestricted freedom of philosophical speculation. The spirit of Spinoza's interpretation of the Scriptures. In 1698 Locke published the first of his Letters on Toleration, urging entire religious freedom. The closing years of the century were preeminently the age of the freethinkers. Spinoza's treatise may therefore be considered as a manifestation of the spirit of the time, not as an abnormal phenomenon. Spinoza was only one of a strong

"he above the rest, in shape and gesture proudly eminent... by merit raised... To that bad eminence."

We cannot enter into the details of this treatise, significant as they are. They are not Spinoza's philosophy, though they are concomitants of his philosophy. The treatise, though first in order of publication, was a consequence rather than a cause of his philosophy, which was not fairly exhibited during his lifetime. The Ethics, which is his philosophy, was apparently constructed to set forth the ideas which existed between the death of Spinoza and the publication of his Opera Posthuma, which contained, besides his Tractatus Politicus, his Tractatus de Intellctu Emendatione, Epistola Doctorum Vivorum, and his Compendium Grammaticis Linguae Hebraicae. His Reformations of the Understanding and his Ethics will be noticed under the head of his Philosophy; so will the Letters, as far as may be found expedient, for they are chiefly comments upon
his doctrine. *The Tractatus Politicus* was perhaps suggested by *The Leviathan* of Hobbes, but differs greatly from it in spirit and conclusion, though largely accordant with it in general procedure. Hobbes favored despotic authority. Spinoza upheld regulated and rational freedom under every form of government. Arbitrary restraints were foreign to his mental and moral habits, and had been rendered repugnant to him by the bitter and tyrannical experiences of Van der Meer and of van der Ende. The *Hebrew Grammar* requires no further commemoration. Several other works have been ascribed, correctly or incorrectly, to Spinoza. Some of them have been lost. A number of marginal notes have been preserved and published. A little treatise of much interest was the *Tractatus de Yosemite*. Several editions of it are clear, and the *Korte Verhandeling van God, de Mens en deszelven Weltland* is preserved in the Dutch version, not in the original text. The chief value of the essay is that it contains clear indications of the peculiar doctrines of Spinoza, and gives the earliest view of them. It was probably composed before 1651; possibly as early as 1654-5. In the latter case, Spinoza would have been only twenty-two or twenty-three at the time. It thus reveals the precocity of his scheme and the singular consistency of his intellectual development. The chronological order of Spinoza's works thus appears to have been almost exactly the reverse of their order of publication. That the later works are clearer and more perfect is evident; but the first is a veritable garden of ideas, and requires the same preliminary attention. This is the *Korte Verhandeling van God, de Mens en deszelven Weltland*. It is preserved in the Dutch version, not in the original text. actions of rational beings, the conduct of creatures capable of spontaneous movement, to be accounted for? Here was the knot which Cartesianism could not untie, which must be untied before Cartesianism could be completely valid. The same knot, in a disguised form, is still perplexing speculation. Various solutions of the difficulty were proposed; all have proved extravagant and unphilosophical. Spinoza accepted the postulates of Des Cartes, and appreciated the difficulty which rent Cartesianism from crown to root. If he could only obtain clear ideas of mind and matter, their relations to each other would be discerned and the problem would be solved. Mind and matter are identical; they cannot be separated; they suffer concurrent modifications; they act continually in harmony, yet they cannot act upon each other. The only conclusion consonant with these positions is that mind and matter are essentially one and the same; that they are diverse aspects of a single existence, and that they are distinguished by merely apparent and accidental differences. If the same, they must be, and must have been, the same at all times and throughout all eternity, through all their changes and in all their forms. There is no longer any need of explaining their reciprocal interaction, for there is no interaction. There is no necessity for any divine pre-ordination or intervention. Matter is self-determining, changes coincidently with mental determinations, because, as the universe is reduced to absolute unity, the Divinity is itself embraced in that unity—is, indeed, that unity. There is inconclusiveness in the reasoning, no doubt; if there were no inconclusiveness, Spinozism would be true. It is not meant to be asserted that Spinoza consciously pursued the course of reasoning here presumed, or has anywhere formally developed it. The foundations of his philosophy are intuitive, according to his own principles. But from his essay on the Reform of the Understanding, from the constitution of his Ethics, from the whole complexion of his scheme, from the Cartesianism which furnished his point of departure, and the correction of Cartesianism which he submitted as his system, it is certain that he must have instinctively pursued this or a like line of reasoning.

Everything is thus swallowed up in the Divinity. God is all, and all is God—not interchangeably, for that would be materialistic Leibnizianism, nor Spinozism; but with the precedence and exclusiveness of the divine, and that is idealistic pantheism. Things are not preordained, or predetermined, or prearranged, but preinvented. Whatever phenomena arise, whatever changes occur, they are the transitory manifestations of some modification of the divine activity. There is much more than any one kind of language can say. The waves swell and roar upon the ocean, the bubbles burst upon the waves, but the ocean remains identically the same—

"Such as creation's dawn beheld."

But there is no creation, there is only transfiguration through the incessant evolution and revolution of one eternal being. All possibilities are contained in this being, and all possibilities come into act, not coincidently or contemporaneously, but in diverse order and position. There is but one existence, one substance, but infinite forms. "There cannot be, and we cannot conceive, any other substance than God." "Whatever is, is in God; and nothing can be, nor can be conceived, without God" (Ethics, pt. i, prop. xiv, xv). These are foregone conclusions. They are involved in the third and sixth definitions of the first part. The definitions are assumptions, and arbitrary assumptions. All Spinozist logic is based upon the fundamental assumption that all possibilities and eventualities are enclosed in the Spinozistic Divinity. But Spinoza's definition of substance is altogether alien from the definitions and conceptions of the Greek and other philosophers. With the latter, substance is shadowy and almost inappra-

hensible, the final residuum after everything conceivable has been separated from the aggregate of accidents, properties, and other constituents. With Spinoza, it is the cause and body of those accidents and properties, and of what else there may be. In both cases, it is true, it is the foundation, the underlying aliquid necesse-
rum—to ὁ πασχόμενος. With Spinoza it is everything, with Descartes it is nothing. Out of the unity of substance and the concomitant universality of the Divinity, all Spinozism follows of necessity, and its pantheistic character is also a necessary consequence, with or without geometrical deduction. We have exhibited only the roots of the doctrine; the trunk, the branches, the leaves, and all the fruit all spring from them. We have not the space to pursue Spinoza through all the intricacies of his system. It is only necessary to add to the explanations already given that the Ethics of Spinoza include ontology, psychology, and deontology. The treatise is distributed into five parts: I. On God; II. On the Nature and Origin of the Soul; III. On the Nature and Origin of the Passions; IV. On the Slavery of Man, or the Strength of the Passions; V. On the Power of the Understanding, or the Liberty of Man. This freedom is very delusive. Man has no freedom of volition or of action. The only freedom accorded by Spinoza is freedom from other constraint than the necessity of his nature (Ethics, pt. ii, prop. xviiiii; pt. iii, def. lii, i, sp. i, ii, etc.).

In the rigorous demonstrations of Spinoza, though the validity of the demonstration may be sometimes contested, there are many acute and profound observations. Nothing can be more surprising or more inspiring than the deduction and enforcement of every duty and of every virtue in the fifth part. There is a nice distinction between Natura naturata and Natura naturata which has become so celebrated and is often so convenient that it should not be left without notice (Ethics, pt. i, prop. xxix, Schol.). With Spinoza, Natura naturata is the divine substance considered as operating cause; Natura naturata the divine substance considered as effect or modification. With philosophers of dissimilar tenets, Natura naturata signifies nature in her silent operation producing the appropriate results; and Natura naturata the results of such operation.

In the book there is a temptation to write more and for abundant reflection, but these must be reluctantly renounced. From the brief survey of the essential character of Spinozism, it will be evident that the doctrine is the purest and completest pantheism—the purest in every sense. It is pantheism, and has consequently affinities and correspondences with all fashions of pantheism. It is not a trading pantheism, nor a mystic pantheism, yet it is steeped through and through in the Divinity; but in an endless, formless, indiscriminate, impersonal, and mistaken Divinity. It is the reductio ad absurdum of Cartesianism. It therefore instituted no sect and invited no acolytes. The philosophy became a target and a butt, and when new forms of error menaced religion it passed away, and has been too little remembered. The memory of the clear spirit, the noble nature, and the unsullied life of Spinoza should not be allowed to sink into oblivion.

came, as at Ryhall, Rutland; Barnack and Ringstead
Northamptonshire; and Christ Church Cathedral, Oxford.
With the exception of a few rare examples, spire at this period were always octagonal; and when placed on square towers, the angles of the tower not covered by the base of the spire were occupied by pinnacles or by masses of masonry made to slope back against the spire. At the bottom of each of the four cardinal sides was usually a large opening with the jambs built perpendicularly, so that the head stood out from the spire and was usually finished with a steep pediment. Above these, at some considerable distance, smaller openings of a similar kind were generally introduced on the alternate sides; these openings are called spire-lights. The top of the spire terminated in a bell or a cross or a vane. Spires were still usually made to rise from the exterior of the tower walls without a parapet, a mode of construction which is distinguished in some districts by the term brough, the name of spire being confined to such structures as have gutters and parapets round their bases. Fine examples of spires of this date exist in Normandy, and at Hampton and Witney, Oxfordshire, and various other places.

During the prevalence of the Decorated style spires were almost always very acute; they generally had parapets and gutters round them, though the brough spires are by no means uncommon at this date, as at St. Mary's and Crick, Northamptonshire. Decorated spires do not differ materially from Early English spires, except in the character of the details and the amount of enrichments, which now began to be introduced in profusion. Crockettes were often carved on the angles, as at Cuthorpe, and small bands of panelling or other ornaments

Spountain, a term applied to an unmarried woman in legal documents, and in bands or proclamations of marriage. Spountain, with the old termination, is the female of spinner, as songster is of singer, seamster or semster of seamer. King Alfred, in his will, calls the male side of his house the spear side, and the female the spindle side. This term is derived from the old occupation of women.

Spire (spira), an acutely pointed termination given to towers and turrets, forming the roof, and usually carried up to a great height. It is doubtful whether any very decided approach towards a spire was made till a considerable time after the introduction of the Norman style: at this period spires were sometimes adopted both on turrets and towers, and were generally made to correspond with them in their plan. Thus the circular turrets at the east end of the Church of St. Peter at Oxford, terminate in small circular spires; an octagonal turret at the west end of Rochester Cathedral has an octagonal spire; and the square towers of the churches of Than and St. Contet, and several others near Caen, in Normandy, are surmounted with pyramids or square spires. They were at first of very low proportions compared with later structures, and in truth were little more than pyramidal roofs. The whole of the existing specimens of this date are of stone, so as to have no parapet or gutter round the base. These pyramids become gradually more elongated as they are later in date, and clearly led the way to the spire.

As the Early English style arose, considerably greater elevation was given to spires, although they were still very frequently less acute than they afterwards be-

formed round them at different heights; the openings also were more enriched, and the pinnacles on the angles of the tower were enlarged, and were not so frequently connected with the spire by small flying buttresses. Fine examples of this style are the spires of Salisbury Cathedral and of St. Mary's, Oxford. In the Perpendicular style the same general arrangement was continued, although the character of the details and enrichments was altered in common with those of the other features of Gothic architecture. At this period broach spires appear to have been abandoned—at least, no example of one of this date can be referred to. The foregoing observations refer to spires of stone, but they were often also made of timber and covered either with lead or shingles, the greater part of these were broach, but they were sometimes surrounded by a parapet at the base. Many specimens of timber spires covered with shingles are to be met with in the counties of Surrey, Sussex, Kent, and Essex, and in some other places. Small spires of open work of timber, of sometimes are placed at the east end of the naves of large foreign churches. In some of these the Lady-bell (or Sanctusbell) is placed. The conjunction of a tower and spire forms a steeple. The following is the measurement of celebrated steeples above the ground: Old St. Paul's, 627 ft.; Salisbury, 484 ft.; St. Michael's, Paternoster, 392 ft.; Norwich, 509 ft.; Louth, 294 ft.; Chichester, 279 ft.; Strasburg, 500 ft.; Vienna, 441 ft.; Antwerp, 406 ft.; Freiberg, 385 ft.; Chartres, 333 ft.; St. Patrick's, Dublin, 222 ft.; Glasgow, 221 ft. The spire of Amiens, called the golden steeple, from its gilded crockets, is 422 ft.; of Cologne, 510 ft.; the highest pinnacle of Milan, 555 ft.; the dome of St. Peter's, 543 ft.; Florence, 387 ft.; and Segovia, 380 ft. See Parker, Gloss of Architecture, s. v.; Lee, Gloss of Liturgy, Terms; Walcott, Sacred Archæol, s. v.

Spire, or Exupère, St., first bishop of Bayeux, was born, according to some, in Rome, and came to Gaul about A.D. 66, with Denis, Saturnin, and other bishops, whom they pretend to have sent by Pope Clement. This opinion, followed in the diocese of Bayeux, is in contradiction with the chronology of its bishops; and it is also necessary, in accordance with the majority of writers, to fix the epoch of his arrival towards the end of the fourth century. He died about 405, and was buried at the end of Mt. Pannus, where he had before preached the Christian faith. His remains, transferred in the 16th century to Corbeil, where a church was erected in his memory, were burned, Feb. 8, 1679, in the presence of the municipality. His festival is on Aug. 1.

Spire Cross. In medieval times every church spire was crowned and surmounted by an ornamental cross. Its form was very varied, and frequently the representation of a cock was placed at the top, while at the foot of the cross was a globe, signifying the influence and power of the cross over the world. The richest examples of spire crosses are found in France and Germany. That from the pencil of Mr. Pugin, in the accompanying cut, is not unlike the cross surmounting the spire of Amiens Cathedral.

Spire, or Spire, or Spire (Ger. Speyer; anc. Noviomagus, afterwards Nemetas), is a city of Bavaria, at the confluence of the Speyerbach with the Rhine, once the residence of the German emperors, but now greatly reduced, having been nearly destroyed by the French in 1688. It is noted in ecclesiastical history for the meetings held there by the Reformers.

I. The first diet had been ordered to convene Feb. 1, 1526, at Eslingen, but was afterwards directed to meet at Spire on May 1. It did not begin its deliberations, however, until June 26. The situation at the time was favorable to the evangelical cause, inasmuch as the peace of Madrid, concluded between the emperor Charles V and Francis I, the king of France (January, 1526), had been broken by Francis, with the consent of the pope. All Western Europe was leagued together to destroy the preponderating power of the imperial house. The Turks threatened to invade Germany, and the Torquato alliance had compacted the Protestant states into a formidable power. The Protestant princes accordingly assumed a bold attitude, and from the time of their arrival caused their preachers to hold daily services, at which thousands of people were present. The religious question was prominent from the beginning of the diet. The imperial commissioners announced that the emperor had determined to maintain the existing order in religious matters until a council should arrange a different order, and demanded that new innovations agreeable to the teaching of Luther and contrary to the Edict of Worms should not be undertaken, besides calling attention to ordinary matters pertaining to the general conduct of the empire and to its needs. Debates immediately ensued, in which the lay estates directed attention towards the many and notorious abuses existing in the Church, and the imperial cities demanded the abrogation of erroneous and dangerous customs. They asserted that it was impossible to tell when, if ever, a general Christian council might be convened. These arguments prevailed. The complaints so presented were given to a committee, which reported that baptism and the Lord's supper should alone be regarded as sacraments; that the laity should partake of the cup; and that the vernacular should be employed in the administration of the sacraments. A second committee reported, advising the exercise of liberty in the points named by the former committee, and, in addition, recommending the abrogation of celibacy and an intelligent preaching of the Word of God. At this point the
commissioners introduced instructions, dated March 23, which prohibited them from accepting any action on the part of the diet that did not harmonize with the traditional doctrines and usages, and required them to promote the execution of the Edict of Worms. The elector of Saxony and the landgrave of Hesse took immediate measures to depart from Spires, and the difficulties which surrounded the emperor, joined with the counsels of his advisers, now led him to employ more conciliatory language. He wrote to his brother Ferdinand that he was determined to win over the Evangelicals with kindness, and to submit their doctrines to a council; and the reply of the diet, dated April 3, declared that a universal—or at least a national—council should be called within a year, and that in matters treated of in the Edict of Worms each state should, during the interval, behave as to be able to render account to God and the emperor. The Evangelical cause was thus accorded a season of quiet, during which its adherents drew more firmly together, and conspired the Church. See the Acta of the diet in Luther's Werke (Walch's ed.), xvi, 243 sq.; Veesenmayer, Die Verhandlungen auf dem Reichstage zu Speyer im Jahre 1526, etc., in Vater's Archiv, 1825, i, 22 sq.; Ranke, Deutsche Gesch. ii, 354 sq.; id. Fürsten u. Fürsten von Süd-europa, ii, 100 sq.; Neudorfer, Mercks. Auktionstücks aus dem Zeitalter d. Reformation, i, 19 sq.

II. The second Diet of Spires was occasioned by the more favorable conditions which the political relations of the emperor assumed, in consequence of which he felt himself able to enforce what was always his real desire, the establishment of an Evangelical majority. When Francis I of France sued for peace, and the pope was induced to renew amicable relations, the council promised in the recess of the first diet was no longer thought of by the emperor. He declared that he would no longer tolerate such disobedience to his commands as was manifest in the disregard of the Edict of Worms, and asserted that the existing differences in matters pertaining to the faith were the occasion from which sprang the troubles of the empire. He appointed commissions, at the head of whom was his brother Ferdinand, and ordered the convening of a diet at Spires, to open Feb. 1, 1529. The date was afterwards changed to the 21st of that month; but the opening was delayed until March 15. The Romish party was strongly in the majority, and had been embittered by the fraud of Pack (q. v.), until its members were thoroughly determined to execute the emperor's instructions designed to overthrow the Evangelical teachings and Church order. The diets of the first and second Spires were deprived of the use of a church, and were compelled to worship in their lodgings. Attendance on their services was prohibited; but congregations of over 8000 persons were, nevertheless, present at the preaching of the Word. The imperial commissions were busily employed in disseem among the Evangelicals; and failing in this purpose, they secured the exclusion of the delegates from Strasbourg and Memmingen, where the mass had been prohibited.

The diet was opened by the commissioners in the spirit of the emperor's instructions. They abrogated the recess of the previous diet, on the alleged ground that it had been arbitrarily explained. The address of the commissioners was referred to a committee, in which the Evangelicals were greatly in the minority, and was of course approved. The report recommended the holding of a council in some German city, that the mass should be everywhere retained, and that it should be restored where it had been set aside; that a rigid censorship over books should be exercised; and, finally, that every form of teaching which did not recognize the real body and blood of Christ in the sacrament should be prohibited. The final item was designed to prevent the union of Lutherans and Reformed into a single and powerful party, as the landgrave of Hesse proposed. Ferdinand exerted himself to promote the adoption of this report, and Eck and Faber (q. v.) were restless at work to divide the minority. The landgrave, assisted by Melancthon, was, however, successful in uniting the Evangelicals in support of a declaration directly opposed to the report of the committee in all its parts. This declaration was submitted to the diet April 21, and the diet, by a large majority, rejected it by the Romish majority; and Ferdinand, in the session of April 19, even exalted the report of the committee into a recess of the diet, and commanded the Evangelicals to submit to its provisions, as having been fixed by a majority. As the minority were not prepared to yield immediately, he declared he would leave the diet.

The Evangelical princes at once drew up a protest against the action of Ferdinand and in harmony with their previous declaration, and caused it to be read immediately and publicly, after which they demanded its incorporation into the recess. On the following day (April 20) they transmitted a more extended copy of their protest to the imperial commissioners, which was returned to them by Ferdinand. This incident conferred on them the title of Protestants. The protest set forth that the Evangelical princes and estates could not sanction the revocation by a party vote of the recess passed unanimously at the last diet; that their opponents had concealed the correctness of Evangelical teaching in many points, and could not therefore require its rejection by those who now received it; that the papal legate had acknowledged, at the diet in Nuremberg, that the Church suffered from many evils in both head and members, and that consequently the occasion for existing differences could be found in Rome; as was evident from the fact that the compliance of the German nation had not yet been satisfied. In the event that the recess of the former diet should, nevertheless, be recalled by the partisan majority, the signers protested before God that, for themselves and their people, they would "neither consent nor adhere in any manner whatsoever to the proposed decree in anything that is contrary to God, his holy Word, our right conscience and the salvation of our souls, and the last decree of Spires." They asked that the matter be reported to the emperor, and declared that they would in the meantime so govern their actions that they might be able to render account thereof to God and the emperor.

The recess of the diet was issued April 22 in the form already described; and three days later the Protestant princes and delegates assembled in the house of Peter Muderstatt, dean of St. John's, to draw up—in behalf of themselves, their subjects, and all who should abide in the true faith both in the Westphalian and an appeal addressed to his imperial majesty, and to a free and general concil of holy Christendom. They incorporated in it a review of the action taken by the diet, accompanied with the principal documents belonging to the case, and demanded immunity from all past, present, and future vexatious measures. They next resolved to send an embassy to the emperor, in order that the reasons from which they acted might be truthfully reported to him, and that he might be conciliated; and then they quitted Spires.

The envos were selected at a convention held in Nuremberg May 15, 1529, and reached the emperor Sept. 12. They were, Alexis Frauenucht, secretary to the landgrave of Brandenburg; Michael von Kelen, syndic of Memmingen; and John Ehinger, the burgomaster of Memmingen. The emperor had in the meantime concluded a treaty with the pope at Barcelona, June 29, and had concluded peace with Francis I at Cambrai, Aug. 6, in each instance binding himself to put through the Reformation. The diets of Spires henceforward pointed the protest, but were obliged to wait until Oct. 12 for the emperor's reply, insisting on the submission of the Protests to the decree of the diet; receiving which they at once read the appeal of Spires, and caused it to be taken to the emperor, who thereupon placed them under arrest. In Germany, the landgrave
SPIRES

SPIRIT

of Hesse had given the protest of Spires to the world in print, May 5, 1529, and the elector of Saxony May 12. See Müller, Hist. von d. evang. Stände Protest u. Appellation . . . dann der darauf erfolgten Legation in Spmien an k. Majest. Karl V., etc. (Jena, 1706); Jung, Gesch. des Reichstages zu Speyer, 1529 (Strasbourg, and Leipzig, 1860).

The third Diet of Spires was convened to take action with reference to the necessities of the empire as against the Turks. It was opened Feb. 9, 1542, by king Ferdinand, who urged the importance of providing aid against the threatening enemy, but was met by the Evangelical estates with a declaration that they would vote no assistance save under the condition that the peace of Ulm (1541) should be restored. They asserted that many rulers did not act conformably to that agreement, and also that in suits at law before the chamber Evangelical contestants could not expect justice because of the composition of that tribunal, and they demanded that unbegrudging men should be appointed to its bench. Ferdinand could not receive such sentiments with favor, but was obliged to yield to the demands of the Protestant party through fear of the Turks.

The pope had sent cardinal Moroni to the diet to advocate the inauguration of a reform which should result in the suppression of the Choler and the formation of a central church body, and to propose, in furtherance of that purpose, the holding of a council in some Italian city. The estates rejected the latter proposition; and the Evangelical party went so far as to declare that they would never recognize a council convened and opened by the pope, though the latter had offered to substitute Trent or Cambray as the place of meeting, and the estates had decided in favor of Trent. The Evangelicals also demanded that their protest against the proposed council should be admitted into the recess of the diet. A compromise was finally adopted, and published as a recess on April 11, 1542, by which the Evangelical claims were recognized, and an armistice for five years after the war was accorded them in return for the vote of liberal aid for the prosecution of the Turkish campaign. The recess, however, provided no new guarantee that the unwilling Romanists would respect its provisions any better than those of the Ratisbon Interim (q. v.). See Sleidani De Statu Religionis et Rerum. Comment. Ad Chr. Carol. etc. (Fred. ad M. 1796), p. 248 sq.; Seckendorf, Historia Luteranismi, bk. iii, § 25, p. 382 sq.; Walch, Luther's sämtliche Schriften (Halle, 1745), xvii, 1002 sq.; Schmidt, Geschichte der Deutschen (Ulm, 1783), v, 409 sq.; Planck, Geschichte des prot. Lehrbegriffs, pt. iii, 338 sq.; Von Rommel, Philipp der Großeinige (Giessen, 1830), i, 476.

Spirit (מְטִיָּה, ruchāch [twice מְטִיָּה], nimbūth, breath, Job xxi, 4; Prov. xxvii, 27; מְטִיָּה [twice מְטִיָּה], a phantasm, Matt. xiv, 26; Mark vi, 49), both literally meaning wind, is one of the most generic terms in either the English, Hebrew, or Greek language. We therefore discuss here its lexical as well as psychological relations somewhat extensively. See PSYCHOLOGY.

1. Scriptural Usage of the Word.—Its leading significations may be classed under the following heads:

1. The primary sense of the term is wind. "He that forsaeth the mountains and createth the wind" (מְטִיָּה, Amos iv, 13; Isa. xxxvi, 8). "The wind (מְטִיָּה) bloweth where it listeth" (John iii, 8). This is the ground idea of the term "spirit"—air, ether, air refined, sublimated, or vitalized; hence it designated

2. Breath, as of the mouth. "At that blast of the breath of his nostrils (מְטִיָּה וּמְטִיָּה) are they consumed" (Job iv, 9). "The Lord shall consume that wicked one with the breath of his mouth" (רַגְמָלָוָתָו תְמוֹ וּמְטִיָּה, 2 Thess. ii, 8).

3. The vital principle which resides in and animates the body. In the Hebrew, נַפְרָה is the main specific term for this. In the Greek it is ψυχή, and in the Latin anima. "No man hath power over the spirit (נַפְרָה) to retain the spirit" (Eccles. viii, 8; Gen. vi, 17; vii, 15). "Jesus yielded up the ghost" (ἀνεφράχθη τοῦ πνεῦμα, Matt. xxvii, 50). "And her spirit (ψυχή) went out" (ἀπεφραξθή) came again," etc. (Luke viii, 55). In close connection with this use of the word is another,

4. In which it has the sense of apparition, spectre. "They supposed that they had seen a spirit," i.e. spectre (Luke xxiv, 37). "A spirit hath not flesh and bones, as ye see me have" (ver. 39; Matt. xiv, 26).
5. The soul—the rational, immortal principle by which man is distinguished from the brute creation. It is the πνεῦμα, in distinction from the ψυχή. With the Latins it is the animus. In this class may be included that use of the word spirit in which the various souls or spiritual substances are spoken of.

"Into thy hands I commend my spirit" (רֹ תֵּאָּ֣דָאָמָו, Luke xxiii, 46; Acts vii, 59; 1 Cor. v, 5; vi, 20; vii, 34; Heb. xii, 9). "My spirit hath rejoiced in God my Saviour" (Luke i, 47). "Poor in spirit" (πνεύμα τῷ πνευματί) denotes humility (Matt. v, 8). 

"Ye know not what manner of spirit ye are of" (Luke ix, 53), which is analogous to the "πνεῦμα μου." "He that hath no rule over his own spirit" (םְךָנָר, Prov. xxxi, 28; xvi, 32; Eccles. vii, 9). The moral affections are denominated "the spirit of meekness" (Gal. vi, 1), "of bondages" (Rom. viii, 15), "of jealousy" (Numb. iv, 14), ε of fear (2 Tim. i, 7), "of slumber" (Rom. xi, 8).

In the same way also the intellectual qualities of the soul are denominated "the spirit of counsel" (וּלָנוּפָּת, Isa. xi, 2); "the spirit of knowledge" (בשַמִּיזָת, ibid.); "the spirit of wisdom" (גַּלְפִּים, Epher. i, 17); "the spirit of truth and of error" (1 John iv, 6).

6. The race of superhuman created intelligences. Such beings are denominated spiritual beings because they have no bodies like ours. To both the holy and the sinning angels the term is applied. In their original constitution their natures were alike pure spirit. The Bible says: "they were not made by the hand of nature," and "the fallen angels as spiritual beings." In the New-Test. demonology δαίμων, δαίμονον, πνεῦμα ἀκάδαμον, πνεῦμα πονηρόν, are the distinctive epithets for a fallen spirit. Christ gave to his disciples power over unclean spirits (πνεῦματων ἀκαδάμων, Matt. x, 1; Mark i, 29; Luke i, 46; Acts vi, 16). The holy angels are termed spirits: "Are they not all ministering spirits?" (αἱ ἀγγέλλαι πνευμάτων, Heb. i, 14). "And from the seven spirits (ἐπτά πνευμάτων) which are before his throne" (Rev. i, 4).

7. The term is applied to the Deity, as the sole, absolute, and uncreated Spirit. "God is a Spirit" (πνεῦμα ὃς θεός). This, as a predicate, belongs to the divine nature, irrespective of the distinction of persons in that nature. But its characteristic application is to the third person in the Divinity, who is called the Holy Spirit (Πνεῦμα ἁγίου) because of his essential holiness, and because he is the only scheme in their family who was to sanctify the people of God. He is denominated the Spirit by way of eminence, as the immediate author of spiritual life in the hearts of Christians. The New-Test. writers are full and explicit in referring the principle of the higher life to the Spirit. In the Old Test. the reference is more general. The Spirit is an all-pervading, animating principle of life in the world of nature. In the work of creation the Spirit of God moved upon, or brooded over, the face of the waters (Gen. i, 2; Job xxi, 13). This relation of the Spirit to the natural world the ancients expressed as ἔναν εκτός, ἐνα σαρώ, ἐνα ψυχρα-μυκραν. The doctrine of the Spirit, as the omnipresent life and energy in nature, differs from Pantheism, on the one hand, and from the Platonic soul of the world, on the other. It makes the Spirit the immanent divine causality, working in and through natural laws, which is called nature; as in the Christian life He is the indwelling divine causality, operating upon the soul, and through divine ordinances, and this is termed grace. The Spirit in the world may be considered as the divine omnipresence, and be classed among the doctrines which are more peculiarly theological. But the indwelling and operation of the Spirit in the heart of the believer is an essential doctrine of Christianity. And it is this one thing which is termed the grace; the other grace. Upon the difference between the two, in respect to the Spirit's work, rests the Christian consciousness. The general presence and work of the Spirit in nature are not a matter of consciousness. The special presence and work of the Spirit in the heart of the believer, by the effects which are produced, are a matter of which, from consciousness, there may be the most consoling and delightful assurance. See Spirit.
of both body and spirit by purely natural processes in-
volves a disregard of the original distinction between
the forming of the one and the inbreathing of the other.
In creatiorism the truth is limited to the origin of the
spirit, the soul being the product of both the traduced
and the infused factors, so that the doctrine of tradi-
tudicism leads logically to the dichotomy, while that of
creatiorism leads to the trichotomy. In every form of
creatiorism the birth of a human being involves a
sacramental wonder, since God is himself directly en-
gaged in imparting to the individual his peculiar spirit.
This theory, derived from the Aramaic (De Anim. Motus),
and transmitted through the Church fathers, was culti-
vated in the Middle Ages, and generally adopted by
Roman Catholic writers, though not as a confessed
locus. It was also largely admitted among theologians
of the Reformed Church, though by no means universal-
ly. Traducianism was more generally accepted in the
Lutheran Church, though here also standard and lead-
ing authorities leave the question undecided. The Pseu-
do-Gnostic and Semi-Pelagian heresies, which taught
that the spirit of man is either not at all or but little
affected by sin, grew out of a combination of creatiorism
and the trichotomy theory; but they were the result
simply of the combination of the two. The same is true of
the Anabaptian theory, which confines the human nature
of Christ to body and soul (amína vegetále), and holds
that in him the Logos supplied the place of the spirit
A third question follows, which is concerned with personal
union — with the forming of the body and the imparting
of the spirit, and with the results that follow.
A fourth question asks, whither does the soul tend?
or, more exactly, what becomes of it when separated
from the body? The scriptural answer is brief and con-
fident: the spirit returns to God, but not as it came from
God; it retains the nature obtained by its union with
the body; and it is accordingly as a soul, i.e., affected
by the body, although the latter has become dust, that
the spirit returns to God. The Scriptures teach that
the soul neither sleeps nor dies, but retains its spiritual
character. We shall accordingly not be found utterly
naked even after death, but rather clothed with con-
sicacy activity (κώστισμα, ὥς γὰρ κυρίως, 2 Cor. v, 8—
a passage, however, which legitimately refers only to the
finally glorified state; see Alford, loc. cit.), and thus wait
the renewal of the same natural and body in the resurrection. See Intermediate State.
The soul accordingly attains its consummation in the body,
which was also the beginning and basis of the personality.
Corporeity is thus the end of the ways of
God, as it was the beginning in the clay from which man
was fashioned. The third Catholic dogma states the
words "the resurrection of the body and the life et-
terlasting;" and Paul writes, "There is a natural body, and
IX.—O o o
baptized with the Holy Ghost” (lv Poiéhonts ayfpi, Acts i, 5; comp. Joel ii, 28 with Acts ii, 18-19, where the 100% of the prophet is translated πνευμα by the apostle).

II. Historical Development of the Functions of the Holy Spirit.—In accordance with what seems to be the general rule of divine revelation, that the knowledge of heavenly things is given more abundantly and more clearly in later ages, the person, attributes, and operations of the Holy Spirit are made known to us chiefly in the New Testament. In the light of such later revelation, words which, when heard by patriarchs and prophets, were probably understood imperfectly by them, become full of meaning.

1. In the earliest period of Jewish history the Holy Spirit was revealed as cooperating in the creation of the world (Gen. i, 2), as the Source, Giver, and Sustainer of life (Job xxviii, 3; xxxii, 4; Gen. ii, 7); as resisting (if the common interpretation be correct) the evil inclinations of men (vi, 3); as the Source of intellectual excellence (xii, 38; Deut. xxxiv, 9), of skill in handicraft (Exod. xxxviii, 3; xxxi, 3; xxxiv, 31), of supernatural knowledge and prophetic gifts (Num. xxiv, 2), of valor and those qualities of mind or body which give one man acknowledged superiority over others (Judg. iii, 10; vi, 34; xi, 29; xiii, 25).

2. The Hebrews began with the metaphor of the effect of the Spirit coming on a man is described in the remarkable case of Saul as change of heart (1 Sam. x, 6, 9), shown outwardly by prophesying (x, 10; comp. Num. xi, 25, and 1 Sam. xix, 20). He departs from a man whom he has once changed (1 Sam. xvi, 14). His departure is the departure of God (ver. 14; xviii, 12; xxxviii, 15); his presence is the presence of God (xvi, 13; xviii, 12). In the period of the kingdom the operation of the Spirit was recognized chiefly in the inspiration of the prophets (see Witsius, Miscellanea Sacra, lib.i; Smith [J. J.], Select Discourses, 6, Of Prophecy; Knobel, Prophetismus der Hebräer). Separated more or less from the common occupations of men to a life of special religious exercise (Bull [Bp.], Sermons, x, 187, ed. 1840), they were sometimes workers of miracles, always forerunners of future events, and guides and advisers of the social and political life of the people who were contemporary with them (2 Kings ii, 9; 2 Chron. xxiv, 20; Ezek. ii, 23; Neh. ix, 30, etc.). In their writings are found abundant predictions of the ordinary operations of the Spirit that were to be most frequent in later times, by which holiness, justice, peace, and consolation were to be spread throughout the world (Isa. xi, 2; xiii, 1; lx, 1, etc.).

3. The teaching of the Spirit in the New Testament. The presence of the Holy Spirit in the world continued to be acknowledged by Jewish writers (Wesel, i; 7; ix; 17; Philo, De Gigant, 5; and see Ridley, Moger Lectures, sermon ii, p. 81, etc.).

4. In the New Testament, both in the teaching of our Lord and in the narratives of the events which preceded his ministry and occurred in its course, the existence and agency of the Holy Spirit are frequently revealed, and are mentioned in such a manner as shows that these facts were part of the common belief of the Jewish people at that time. Theirs was, in truth, the ancient faith, but more generally entertained, which looked upon prophets as inspired leaders, accredited by the power of working signs and wonders (see Nitzsch, Christl. Lehre, § 84). It was made plain to the understanding of the Jews of that age that the same Spirit who wrought of old among the people of God was still at work. "The dove forsook the ark of Moses and fixed its dwelling in the heart of the Spirit (Bull, Orac. ad ver. x, 7)."

5. The gifts of concord, prophecy, are teaching, which had cast a fitful lustre on the times of the great Jewish prophets, were manifested with remarkable vigor in the first century after the birth of Christ. Whether in the course of eighteen hundred years miracles and predictions have altogether ceased, and, if so, at what definite time they ceased, are questions still debated among Christians. On this subject reference may be made to Dr. Conybeare's Free Inquiry into the Miraculous Powers of the Christian Church; Dr. Brooke's Examination of Middleton's Free Inquiry; W. Dodwell's Letter to Middleton; Bp. Douglas's Catechesis; J. H. Newman's Essay on the Miraculous Agencies of the Church Government, ch. v; and Hooker, Eccles. Polity, v, 72, 5-8. See Miracle.

"Not the Spirit of God, but the Spirit of the Lord" is marked (Ep. iv. 7; John vii, 39, etc.) as the commencement of a new period in the history of the inspiration of men by the Holy Ghost. The interval between that event and the end of the world is often described as the dispensation of the Spirit. It was not merely (as Didymus Alex. in
SPIRIT, HOLY

Trinitate, iii, 54, 431, and others have suggested) that the knowledge of the Spirit's operations became more general, and was unceasingly active, as the law was abolished, though Bp. Heber (Lectures, viii, 514, and vii, 488) and Warburton have maintained it, that the Holy Spirit has sufficiently redeemed his gracious promise to every succeeding age of Christians only by presenting us with the New Testament. Something more was promised, and confirmed in the church by its experience. Indeed, on the early gifts of the Holy Spirit were unconcealed, not universal, intermittent, chiefly external. All this was changed. Our Lord, by ordaining (Matt. xxviii, 19) that every Christian should be baptized in the name of the Holy Ghost, indicated at once the absolute necessity from the nature of the work to have the Spirit brought in by the believer with the Spirit; and (in John xvi, 7-15) he declares the internal character of the Spirit's work, and (in xiv, 16, 17, etc.) his permanent stay. Subsequently the Spirit's operations under the new dispensation are authoritatively announced as universal and internal in two remarkable passages (Acts ii, 16-21; Heb. viii, 8-12). The different relations of the Spirit to believers several under the old and the new dispensation are described by Paul under the images of a master to a servant, and a father to a son (Rom. viii, 15); so much deeper and more intimate is the union, so much higher the position (Matt. xii, 11), of a believer, in the latter stage, than in the earlier (see Wachsmuth, Macleanian: Sacra, p. 765; De Spiritu Adoptionis; and the opinions collected in note H in Hare's Mission of the Comforter, ii, 438). The rite of imposition of hands, not only on teachers, but also on ordinary Christians, which has been used in the apostolic (Acts vi, 3; xiii, 3; xix, 6, etc.) and in all subsequent ages, is a testimony borne by those who come under the new dispensation to their belief of the reality, permanence, and universality of the gift of the Spirit.

Under the Christian dispensation it appears to be the office of the Holy Ghost to enter into and dwell within every believer (Rom. viii, 11; 1 John iii, 24). By him the work of redemption is (so to speak) appropriated and carried out to its completion in the case of every one of the elect people of God. To believe, to profess sincerely the Christian faith, and to walk as a Christian, are his gifts (1 Cor. xii, 3; 2 Cor. iv, 13; Gal. v, 18) to each person severally: not only does he bestow this grace of believing, but also of walking, and of living right (Gal. v, 18; Phil. ii, 13) in every particular action so far as it is good (see South, Sermons, xxxvi, vol. ii, p. 292). His inspiration brings the true knowledge of all things (1 John ii, 27). He unites the whole multitude of believers into one regularly organized body (1 Cor. xii, and Eph. iv, 4-16). He is not only the source of life to us on earth (2 Cor. iii, 6; Rom. viii, 3), but also the power by whom God raises us from the dead (ver. 11). All Scripture, by which men in every successive generation are instructed and made wise unto salvation, is inspired by him (Eph. iii, 5; 2 Tim. iii, 16; 10; 2 Pet. i, 21); he co-operates with suppliants in the utterance of every effectual prayer that ascends on high (Eph. ii, 18, 19; Rom. viii, 29); he strengthens (Eph. iii, 16), sanctifies (2 Thess. ii, 13), and seals the souls of men unto the day of completed redemption (Eph. i, 13; iv, 30).

That this work of the Spirit is a real work, and not a mere imagination of enthusiasts, may be shown (1) from the words of Scripture to which reference has been made; (2) by the testimony of intelligent Christians in every age, who are ready to specify the marks and tokens of his operation in themselves, and even to describe the manner in which they believe he works (on this see Barrow, Sermons, lxvii and lxviii, towards the end; Waeland, Sermons, xxvi, vol. v, p. 686); (3) by the superiority of Christian nations over heathen nations, in the possession of those characteristic qualities which are gifts of the Spirit, in the establishment of such customs, habits, and laws as are agreeable thereunto, and in the exercise of an enlightening and sanctifying influence in the world. The Spirit is the bond of union in the church; he is the source of friendship to all who are in Christ; he is the common father of all the believers of every country and nation, and he is never absent from any in whom he has once resided. Those nations which are now in eminent power and knowledge are all to be found within the pale of Christendom—not, indeed, free from national vices, yet, on the whole, manifestly superior both to contemporary unbelievers and to paganism in its ancient palmy days. See Hare, Mission of the Comforter, iii, i, 2, 3; de la Porte, On the Beneficial Effects of Christianity on the Temporal Concerns of Mankind, in Works, vi, 375-460.

It has been inferred from various passages of Scripture that the operations of the Holy Spirit are not limited to those persons who, either by circumcision or by baptism, have been consecrated to him. This inference is supported by the early churches (Gen. xxi, 31), Melchizedek (xiv, 18), Jethro (Exod. xiii, 12), Balaam (Num. xxxii, 9, and Job, in the Old Test., and the Magi (Matt. ii, 12), and the case of Cornelius, with the declaration of Peter (Acts x, 35) thereon, are instances showing that the Holy Spirit bestowed his gifts of knowledge and holiness in some degree even among heathen nations; and if we may go beyond the attestation of Scripture, it might be argued from the virtuous actions of some heathens, from their ascription of whatever good was in them to the influence of a present deity (see the references in Heber's Lectures, vi, 446), and from their tenacious preservation of the rites of sacrifices, that the name they knew not must have girded them, and still girls such as they were, with secret blessedness.

III. Doctrinal Theories.—Thus far it has been attempted to sketch briefly the work of the Holy Spirit among men in all ages as it is revealed to us in the Bible. But after the closing of the canon of the New Test., the religious subtlety of Oriental Christians led them to scrutinize, with the most intense accuracy, the words in which God has, incidentally as it were, revealed to us something of the mystery of the being of the Holy Ghost. It would be vain now to condemn the superfluous and irreverent curiosity with which these researches were sometimes prosecuted, and the scandalous contents which they caused. The result of them was the formation as well as the general acceptance of certain statements as inferences from Holy Scripture which took their place in the established creeds and in the teaching of the fathers of the church, and which the great body of Christian doctrine continued to adhere to, to guard with more or less vigilance.

1. The Sadducees are sometimes mentioned as preceding any professed Christians in denying the personal existence of the Holy Ghost. Such was the inference of Epiphanius (Heres., xii), Gregory Nazianzen (Oratio xxxi, § 5, p. 589, ed. Ben.), and others from the testimony of Luke (Acts xxiii, 8). But it may be doubted whether the error of the Sadducees did not rather consist in asserting a corporeal Deity. Passing over this, in the first youthful age of the church, when, as Neander observes (Ch. Hist. ii, 327, Bohn's ed.), the power of the Holy Spirit was so mightily felt as a new creative, transforming, and holy principle of life in the knowledge of the Spirit, as identical with the Essence of God, was not so thoroughly and distinctly impressed on the understanding of Christians. Simon Magus, the Montanists, and the Manicheans are said to have imagined that the promised Comforter was personified in certain human beings. The language of some of the primitive fathers, though its sense has not been always made clear, occasionally comes short of a full and complete acknowledgment of the divinity of the Spirit. Their opinions are given in their own words, with much valuable criticism, in Dr. Burton's Testimonies of the Ante-Nicene Fathers to the Doctrine of the Trinity and the Divinity of the Holy Ghost (1831). Valuable information is given also of his Holy Ghost was an angel. The Sabellians denied that he was a distinct person from the Father and the Son. Eunomius, with the Amanesans and the Arians, regarded him as a created being. Macedonius, with his fol-
it should not be made to signify anything in respect to the divine activity in the world in the service of the Son. His procession from the Son as well as from the Father was the great point of controversy in the Middle Ages. In modern times the Socinians and Spinoza have altogether denied the personality, and have regarded him as an influence or power of the Deity. It must suffice in this article to give the principal texts of Scripture in which the procession is mentioned, if possible, to refer to the principal works in which they are discussed at length. The documents in which various existing communities of Christians have stated their belief are specified by Winer, Comparative Darstellung des Lehrgriifs, etc. p. 41, 80.

2. The activity of the Holy Ghost is proved by the fact that he is called God. (Comp. 1 Sam. xvi, 13 with xvi, 12; Acts v, 3 with v, 4; 2 Cor. iii, 17 with Exod. xxxiv, 34; Acts xxviii, 23 with Isa. vi, 8; Matt. xii, 28 with Luke xi, 29; 1 Cor. iii, 16 with vi, 19.) The attributes of God are ascribed to him. He creates, works miracles, inspires prophets, is the Source of holiness (see above), is everlasting (Heb. ix, 14), omnipresent, and omniscient (Ps. cxxxix, 7; and 1 Cor. ii, 10).

3. The personality of the Holy Ghost is shown by the actions ascribed to him. He speaks and works (John xvi, 13; Acts x, 19; xii, 2, etc.). He wals and acts on his decision (1 Cor. xii, 11). He chooses and directs a certain body of action (Acts xvi, 23). He knows (1 Cor. ii, 11). He teaches (John xiv, 26). He intercedes (Rom. viii, 26). The texts 1 Thess. iii, 12, 13, and 2 Thess. iii, 5, are quoted against those who confound the three persons of the Godhead.

4. The procession of the Holy Ghost from the Father is shown from John xiv, 26; xv, 26, etc. The tenet of the Western Church that he proceeds from the Son is grounded on John xv, 26; xvi, 7; Rom. viii, 9; Gal. iv, 6; Phil. i, 19; 1 Pet. i, 11; and on the action of our Lord recorded by John xx. 22. The history of the long and important controversy on this point has been written by Plaff; by Walchius, Historia Controversiae de Processione (1761); and by Neale, Hist. of the Eastern Church, ii, 1898. See Holy Ghost.

SPIRIT (HOLY), BAPTISM OF. The bestowment of the Divine Spirit upon faithful men—which is simply God's spiritual access to and abiding with his believing and obedient ones—is a promise for all times and dispensations of the Church, of the fulfillment of which promise the Divine Word is the perpetual record. It was the consolation and guide of the patriarchs; the inspiration of the prophets, and the light and life of the Old-Test. Church. That which is now given to believers and to the aggregate Church differs from the former in degree and in some of its modes of manifestation, in its substance or kind. Indeed, as the Church has been, and is, essentially the same under all its dispensations, having the same precious faith, with the one atoning Sacrifice as its object and end, so the animating Spirit that guided and sustained the faithful ones of the earlier Church is the same with that which we recognise and worship, and in which we rejoice in this our day of the fulness of Gospel grace. It is evident, however, that, for obviously good reasons, a special and peculiar manifestation of the Spirit was given to the apostles—first on the day of Pentecost, and afterwards continuously, though evidently with steadily decreasing outward manifestations till it finally entirely ceased. In this sense the "Istatus" failed from the Church, as did the power of working miracles, its substance and reality, with all its blessed results, continued as Christ's perpetual legacy to his disciples all down through the ages, and will do so till the great consummation of his kingdom.

1. In the term "baptism," used in the New Testament to designate the bestowment of the Holy Ghost, is probably simply an accommodation of the idea of John's baptism, and is used to indicate the substance of which that ceremony was but the shadow and type; and, therefore,
into the Church by God himself; and even here an apostle's presence seems to have been requisite. In all other examples recorded the imposition of apostolic hands seems to have been an essential condition to the conferment (see Acts vii, 17; 18; xix, 6; Rom. i, 11). The miraculous power once imparted seems to have been permanent and hereditary, and no individual except the apostles had the right or ability of communicating the Holy Ghost to another person. Hence after the death of the apostles the power itself became extinct. This was no doubt a principal one of their peculiar functions. We commend this fact to the consideration of those who claim to be their lineal successors. The extraordinary and exclusively spiritual endowment, which is the perpetual heritage of the Christian Church and the privilege of all true believers, we understand to be still conferred, as it always was, directly by God in answer to prayer, without any intermediation or human instrumentality being necessary, though the way of preparing the subjects to expect and appreciate the sacred gift. In point of fact, the gift of the Spirit, in its ordinary function, is found to attend personal intercourse with individuals of deep Christian experience.

Many questions, curious rather than profitable, are sometimes raised respecting these supernatural endowments; but we must here pass them by as a thing of history and speculation, and of very little personal interest. The manifestations of the Spirit evidently differed widely in individual cases, and were altogether of an arbitrary and abnormal character. The principal information concerning them is contained in 1 Cor. xii—xiv, respecting the proper meaning of which Scripture communications and exegesis are by no means agreed among themselves. See Spiritual Gifts.

One example, however, of the experience of this manifestation, recorded in Holy Writ, is of so marked and instructive a character that we must note it somewhat at length. Acts xix. was a third missionary tour he visited Ephesus, where Apollos had previously labored. The apostle there found twelve men who had become converts to John's baptism, possibly under the preaching of Apollos, prior to the superior illumination of the latter by the more spiritual instructions of Aquila and Priscilla. These men had not, therefore, received the gift of the Holy Spirit. Indeed, when questioned on the subject, they averred that they "had not so much as heard whether there be any [a] Holy Ghost." By this they could not have meant an utter ignorance of such a divine being, much less of the office-work upon human hearts; for one in the Old Testament had been familiar, full of allusions to the Holy Spirit, but John had expressly taught his disciples to look for the long-expected baptism. We cannot suppose that the Hebrew sages had been destitute of that heavenly influence without which no genuine religious fruit could possibly grow in the human heart; for the very heathen owed all their real piety to the unconsciously anticipated virtue of the incarnate Redeemer. The same Spirit which brooded over the primeval deep (Gen. i, 2) was the Spirit of Christ (John i, 3), without which none are his (Rom. viii, 9). It was he, as Jehovah, Logos, who wrought upon the wilderness of the human disposition (1 Cor. x, 3). The inspiration, whether personal or official, of all the Old-Test. characters proceeded, by their own acknowledgment, from this source. The seventy elders (Exod. xxiv, 10) stood on the same spiritual platform with the beloved disciple in Patmos (Rev. iv). Abraham, entering into God's covenant, symbolized by the laying on of hands as the means of their reception (Gen. xv, 17), rejoiced to behold Christ (John viii, 56). Jacob's ladder (Gen. xxviii, 12) was a lively type of Christ (John i, 51), the sole medium of intercourse with heaven. David and the prophets abound with recognitions of the Holy Spirit's presence and power in religious experience. Most of the above instances seem to indicate, in respect to their subjects, unusual frames of mind and special inspirations, but some of them speak the ordinary language of private devotion. The Ephesian converts, therefore, must obviously have meant that they did not expect for themselves what they were entirely familiar with in past history as the privilege of a few favored individuals, or, what is most probable, that it was not necessarily included in the dispensation of the Baptist's announcement concerning the Spirit, of which probably they had as yet only very inadequate appreciation. Their experience then and after this was, of course, similar to that of their fellow-Christians.

3. We come, therefore, to the difficult task of discriminating the perpetual from the transient manifestations of this precious gift of Christ to his Church in its bearing upon ordinary religious experience. We must clear the way for the discussion by a few preliminary considerations, which we will treat with as little metaphysical abstraction as possible.

All the functions of the Holy Spirit are in one sense preternatural—that is, they are outside of, and superior to, our natural faculties; and the spiritual capabilities with which they invest us are in that sense supernatural. But a miracle is more than this. It is not only beyond and above nature, but still within the realm of nature. Between functions of the one kind and the other, which we now allude are not opposed to our essential nature, but they come from beyond its sphere, yet often become supplemental, auxiliary, or recuperative to it. This is in accord with another important truth which we are apt to overlook. Our Lord, in his discourse to Nicodemus, declared that as "the wind bloweth where it listeth, and thou hearest the sound thereof, but canst not tell whence it cometh, and whither it goeth: so is every one that is born of the Spirit" (John iii, 8). The operations of the Spirit are inscrutable, even to the subject of them, as to their mode of action; consciousness reveals to us only the fact, not the manner nor the origin, of the divine influence. We must learn from some other criterion or source. The apostle, therefore, very properly exhorts us to "try the spirits [both in ourselves and in others, by means of the written Word and their fruits] whether they are of God" (1 John iv, 1). If we had, like the apostles, the inspired gift of "discerning spirits," perhaps we might, to some extent, dispense with these accessory tests. Now the reason why we are unable to distinguish by any infallible internal mark or quality the author or tendency of our cognitions, impulses, or emotions, even when they are really due to the influence of the Holy Spirit, is because the influence, however genuine or powerful, all lie in the sphere of our immediate faculties, appearing to the consciousness as of subjective origin. They, in fact, use these faculties as their channel or vehicle, just as the electric current runs along the telegraphic wire precisely the same whether the thunder-storm or the magnetic machine give the impulse, and whether the telegraph be from furnishing fee, a truth or a lie. It is a great and dangerous error, alike unscriptural and unphilosophical, to assume for any one that he is directly conscious of any divine influence as such. Whether it is God himself or Satan that is operating the wires in his soul, he can only tell for a certainty by a comparison of the character and bearing of the message with some external rule or standard.

It follows from this law that, aside from the miraculously inspired experience of prophets strictly so called—which no sound Christian now claims, and of which we could only speak theoretically—we are to expect no ecstatic, frenzied, or extravagant demonstration as the evidence, conscious or unconscious, of the spiritual endowment which we are considering. We say this not from any sympathy with such a Quietism as Upham has learned from Madame Guyon, which teaches that no influence of the Holy Spirit tends to fluctuate, disturb, or agitate the soul. Unquestionably some terribly disquieting convulsions often reach the bosom of the peni-
tent, and many distressing emotions sometimes invade the peace even of the believer; and we are far from dissipating God’s Spirit from these. We only mean that fantasy, rashness, and spiritual transcendentalism answer. It is seen that some of the most immoderate are considering than is catalepsy, vociferation, or gle. All these may thrill the nerves; and so may music or poetry or a landscape. It is only when God plays upon the key-board that the divine harmony is wakened, and only when he speaks that the sacred whispers of soul respond. It is seen that something in man is deeply impressed with the “thunders and lightnings and a thick cloud” at Sinai. Both in physical extravagances and mental transports heaven devotees have often excelled, and Mohammedan dervishes are adepts in these unprofitable bodily exercises.

4. But we must give a positive, and not merely a negative, statement of the baptism of the Holy Spirit. This involves a somewhat close analysis of religious states and processes, in the formulation of which Christian denominations are not fully at one, though the agreement may be more nearly complete than it sometimes seems.

The acts on God’s part in conversion are essentially two, justification, or the pardon of sin, which takes place in the divine mind; and regeneration, which is also an initial act, but is not immediately connected to immediate admission to divine life. These two co-ordinate elements are inseparable from the very beginning of any true religious life in the Bible sense, and they are, therefore, characteristic of every genuine believer, whether in the Old or the New Economy. Thus Saul, the first Hebrew king, was “turned into another man” (Acts xxi. 28), when he met the company of the prophets (1 Sam. x, 6), although he afterwards fell from grace; and Saul, the first chief persecutor of the infant Church, received the same change on the way to Damascus, and continued steadfast in it to his life’s end. Jacob experienced a similar spiritual transformation as he wrestled with the angel—for be it carefully noted that his vision of the ladder resulted only in a conditional promise of future consecration to God (Gen. xxviii, 20, 21); but the apostles were no doubt converted men long before the day of Pentecost, for Judas could not otherwise have been an apostle (John xvii, 12).

Both these acts—forgiveness and the new birth—are blessings, and are in no case too soon or too late, because they are acts, and divine ones. They are not processes, but each is a fact, which must be perfected whenever their conditions are met, matured, or perfected.

Sanctification, on the other hand, is the outcome of a progressive work, begun at conversion and completed. In point of fact, it is usually deferred till fatal sickness or utter decrapi-
tude has wearied the heart from earth, or it is even postponed to the hour of dissolution; if, indeed, it be granted—as is generally assumed, we think rightly—that the saved soul entering Paradise must be, in the fullest sense, “cleansed of all sin.” At whatever moment this great change may be fully achieved, it is, of course, entirely the work of God—that is, of the influence of the Holy Spirit.

Now there are two other and more special offices of the Holy Spirit which it is the privilege of Christians to perform, namely, the ministry and the apostolic. In, any of the three acts or operations already specified. It is these that are the distinctive features of Christian-
This baptism is neither the same with entire sanctification, nor is the latter the inevitable result of the experience of the former. Some may have, perhaps unwittingly, but not therefore harmlessly, confounded the two under the vague name of "the second blessing." This is rather the doorway, the roadway, to that exalted attainment. Multitudes, it must be believed, are walking in its light and peace and joy who are, nevertheless, conscious of numerous spiritual failings, who may even, though not of necessity, be overcome by temptation and fall into momentary—never into deliberate—sin. But if they abide in the Spirit, they are enabled to divine grace immediately to take hold upon the grace itself and to taste and know the "mystic joys of penitence," and to rejoice anew in the power of saving grace. All those who thus faithfully hold on to Christ by the Spirit will at length prove completely victorious, and will be enabled to shout on earth as well as in heaven their triumph over every inward and outward foe. See SPIRITUAL GIFTS.

SPIRIT, GRIEVING OR QUENCHING THE, is a phrase that occasionally occurs in Scripture, and is often repeated in Christian literature.

1. To "quench the Spirit" (1 Thess. v, 19) is a metaphorical expression easily understood. The Spirit may be quenched (1) by forcing, as it were, that divine agent to withdraw from us, by sin, irregularity of manners, vanity, worldliness, sloth, or other, to charity, truth, peace, and his other gifts and qualifications. (2.2) The Spirit might have been quenched by such actions as caused God to take away his supernatural gifts and favors, such as prophecy, the gift of tongues, the gift of healing, etc. For though these gifts were mere grace, and God might communicate them sometimes to doubtful characters, yet he has often granted them to the prayers of the faithful, and has taken them away, to punish their misuse or contempt of them. To "grieve the Spirit" (Eph. iv, 30) may also be taken to refer either to an internal grace, habitual or actual, or to the miraculous gifts in which God favored the primitive Christians. We grieve the Spirit of God by withholding his holy inspirations, the motions of his grace; or by living in a lukewarm and incautious manner; by despising his gifts, or neglecting them by abusing his favors, either out of vanity, curiosity, or indifference. In a contrary sense (2 Tim. i, 6), we are sanctified in the presence of the Spirit of God, and are made subject by the practice of virtue, by our compliance with his inspirations, by fervor in his service, by renewing our gratitude, etc.

SPIRIT, PRAYING AND PREACHING BY. In the early Church it was customary for the people to pray audibly, and that they might pray in concert the words were dictated to them by the deacon. St. Chrysostom, in his homily (7th, p. 68) on Romans, explaining the words "the Spirit maketh intercession with groanings," etc., says that the gift of prayer was then distinguished by the name of the Spirit, and he that had this gift prayed for the whole congregation. But in his own time, he says, the deacons prayed by ordinary forms, without immediately communicating to the congregation all that the fathers pretended to from the assistance of the Spirit was only that ordinary assistance which men may expect from the concurrence of the Spirit with their honest endeavors, as a blessing upon their studies and labors. See Bingham, Christ. Antig. bk. xxiii, ch. vi, § 9; bk. xiv, ch. iv, § 12.

SPIRIT, PROCESSION OF. See PROCESSION OF THE HOLY GHOST.

SPIRIT (HOLY), SAVIOUR OF THE, a name for the representatives of a pantheistic movement of the 12th century in France. The party originated with Amalric (q. v.) of Bena, a teacher at Paris. The first germs of this pantheistic mysticism were probably derived from the writings of the pseudo-Dionysius and of Erigena. Amalric taught that none could be saved who believed not that he was a member of the body of Christ. Similar views were entertained by David of Dinanto (q. v.) and Simon (q. v.) of Tourna. These opinions finding their way among the lity, a goldsmith proclaimed the advent of the age of the Holy Spirit, when all positive religion and every outward form of worship should cease to exist. As God the Father had appeared in every believer, did God become incarnate; and on this ground the Christian was God in the same sense in which Christ had been. These views were condemned by a synod held at Paris in 1209, the writings of Erigena were republished, and several members of the sect consigned to the stake. See Kurze, Church Hist. i, § 108, 2.

SPIRIT (HOLY), TESTIMONY OF. See WITNESS OF THE HOLY GHOST.

SPIRITS (HOLY), WORK OF. See SPIRIT, HOLY.

Spirit-rappings. See SPIRITUALISM.

SPIRITUALISM. See SPIRITS, DISCERNING OF. See DISCERNING OF SPIRITS.

SPRITS IN PRISON (1 Pet. iii, 18-20). This topic is introduced by the apostle in connection with the sufferings of Christians through persecution, as both the context preceding and that following indicate. Under these sufferings the apostle encourages the Christians to look to Christ; for although his passion was vicarious, as theirs is not, still the two are parallel in one point—namely, that death in either case is their extreme limit (ver. 18, "once suffered:" iv, 1, "he that hath suffered in the flesh hath ceased from sin"). Connected with this analogy the apostle presents another which is a favorite one with Paul also (Rom. viii, 10-15)—namely, that the death of carnality is the revival of spirituality, and Christians are consol ed in their physical sufferings by this thought, which was the ground-idea of the Redeemer's passion ("suffered for sins, to bring us to God"). This central antithesis is pithily expressed in the last clause of 1 Pet. iii, 18, "being put to death in the flesh, but quickened by the Spirit." Some commentators insist that this should be rendered "put to death in the flesh, but quickened in the spirit" (βασανίσθης μιν αρκεί ζωοποιηθείς ἐκ τούτου), alleging that the strict correspondence of the clauses requires exact parallelism of construction. This, however, appears to us to be far from necessary. The meaning of the first clause is, of course, unequivocal. Christ died physically. But we are at a loss to conceive what intelligible idea is conveyed by the expression, if parallel, Christ revived spiritually. All the labored interpretations collected by Van Oosterzee, in Lange's Commentary, seem to be mere nonsense or pure transcendentalism. Nobody imagines that any human being, much less Jesus, could cease to exist in spirit physically, or could therefore return to life spiritually. This latter clause is evidently tantamount to the statement elsewhere explicitly made, that the body of Jesus and was reanimated by the power of the Holy Spirit (Rom. viii, 11). As the preposition necessary in English to indicate this relation ("in" or "by") is not expressed in the Greek (the simple dative being used), we are at liberty to employ either indifferently; nor to one thinking after the Greek idiom it is necessary to distinguish consciously between the two: Christ's death, like ours, is stated as the result of a physical affinity; his resurrection was, as ours is also to be, the effect of spiritual relationships. The former ensued from his connection with mortal flesh, the latter was accomplished by virtue of his unity with the Holy Spirit. We therefore obtain a consistent sense by translating, "being put to death by reason of his flesh, but quickened by reason of [his] Spirit." His physical constitution rendered him capable of death, but his divinity was sure to reanimate him. Both clauses can only have reference to the palpable facts on which the Gospel is founded—the bodily death and resurrection of Christ.

In the next clause this relation between Christ's hu-
manity and divinity is more explicitly expressed in the Greek by the same case with a preposition (iV yo), and we therefore render in like manner, "by virtue of which [Spirit] he went," etc. Here all interpreters recognise the idea of a spiritual presence of Christ, but many explain the word as his disembodied spirit. This, again, is to us simply unintelligible, and the added statement of "going" (ραγεσικ), upon which some lay special stress as confirming the belief in an actual visit to the place of departed spirits, appears to us to flatly contradict it. What sort of a journey a disembodied spirit could make we cannot imagine. The only real meaning, and must be, that Christ was, in some imaginary, figurative, or representative sense, present at the place in question. Grant that this was true by reason of his divine ubiquity, and by virtue of his special authority on the given occasion, and all becomes clear, consistent, and intelligible. But to suppose or insist that the presence in question was merely that of a ghost is to relace the whole transaction to the sphere of the unknown, if not unknowable.

But the main question is, who were "the spirits in prison" to whom he "preached"? That they were the antediluvians doomed to destruction by the flood seems evident from a certain passage which is generally conceded. The disputed point is, at what time are they spoken of here; while yet living, or after their death? If the transaction were a real one, and not a mere phantasm, it seems to us, and it has seemed also to the good sense of the Church at large, that the former only can possibly be the case. The apparent horizon is a well-known physical fact, and the context evidently refers to it as such—namely, that Noah preached to the antediluvians "while the ark was a-preparing." We see no mystery or difficulty here whatever. But to understand "prison" to be Hades, Sheol, or the place of departed spirits, is wholly unwarranted by the context, and is repugnant to all that we know of that abode of the lost. It is in vain to appeal to the particles "sometime" (εκείνοι) and "also" (καί) in support of this purgatorial notion; they require no such allusion, but simply indicate that the event in question was anterior to the present time, and in some respects a parallel case. The analogy is substantially that above indicated as underlying this whole paragraph, and it is immediately brought out as consisting in the fact of a deliverance by means and in the midst of a seeming overthrow. The flood was the death of the Old World, and the ark was its renaissance. The same thought is in the minds of the antediluvians as "preparing for" and is applied to baptism as an emblem of Christian redemption; and this is there explicitly referred to Christ's resurrection from the dead as its potential means. As if to prevent all possible misunderstanding, the Saviour is there represented as having passed (ραγεσικ, again, a bodily transference in space) into the heavens. There is not a word about his descent ad inferos.

To sum up, then, it appears to us clear—and we are not to be bogged by transcendental speculations about the assumed capabilities of the invisible world—that the preaching of Christ through Noah to his contemporaries during the constriction of the Holy Spirit, is eminently appropriate to the course of the apostle's argument. In illustrating the paradox of deliverance through destruction, he says that the same principle of mercy through Christ has prevailed in all dispensations, just as the Old World had the profiter of rescue by means of the ark, and as some actually embraced it; so the Gospel both now and finally saves us by a reconstruction through the seeming overthrow of its author. To introduce an allusion to some presumed scene in the other world enacted in the short interim of Christ's burial, and from which nothing seems to have impressed a gratifying, not to say nugatory and puerile. Nobody uninfected with Romish superstition, we apprehend, would have originated so bald and yet so bold an interpretation. See HELL, DESCENT INTO. See (besides the various commentaries, and the monographs cited by Danz, Wörterb. p. 758), Journal of Soc. Lit. Jan. 1858; Oct. 1869; Ch. Review, July, 1857; Biblioth. Soc. Jan. 1862; New-Englander, Oct. 1872; Princeton Rev. April, 1875; Brit. and For. Rev. Jan. 1876.

Spirits, Unclean (πνευματα ακακαρτα), a frequent term in Scripture for unholy angels (Matt. x. 1, 3). See THE CHRISTIAN REMembrancer, July, 1862. See DEMON.

Spiritual (πνευματικος, which in classical Greek is opposed to bodily, Platarch, De Sunit. 388) denotes in New-Test. usage, (a) belonging to the Holy Spirit (Rom. i. 11; xv. 27; 1 Cor. ii. 13; ix. 11; xil. 1; xiv. 1, 67; Eph. i. 3); or (b) determined or influenced by the Holy Spirit (1 Cor. i. 13; xiv. 37; Gal. vi. 1), such as "spiritual songs" (Eph. v. 19; Col. iii. 18), i.e. in-igined; a "spiritual house" (Col. i. 3), not angelic, nor unmanufactured, but composed of stones vivified by the Spirit (comp. Eph. ii. 22), like "spiritual sacrifices" (1 Pet. ii. 5); "spiritual food and drink" (1 Cor. x. 3), i.e. nourishment afforded by the Spirit (the "spiritual Rock," Deut. viii. 15; xxxiii. 4), and not in an ordinary sense (comp. 1 Cor. x. 4). See CREMER, Lektion der N.-T. Greek, s. v. See SPIRITUAL-MINDEDNESS.

The expression "spiritual body" (σωμα πνευματικον, pneumatic body), used in 1 Cor. xv. 44 to describe the resurrection state, appears at first sight a palpable contradiction of terms; but it is interpreted by the antithesis between the earthly, decaying, and sin-stained costume of the soul here and its celestial, immortal, and purified state after here. It is plain likewise from the kindred antithesis of the context ("corruption ... incorruption," "dishonor ... glory," "weakness ... power," "earthly ... heavenly"). We are not taught, therefore, to look for an ethereal, or sublimated body in the other life, but one of bone and flesh, substantial as at present, although transfigured by a divine and heavenly grace. See RESURRECTION.

Spiritual Communion is the mental act of holding communion with our blessed Saviour and his saints, either in the sacrament of the eucharist, or in any other religious service. See COMMUNION.

Spiritual Corporation is one the members of which are spiritual persons, as bishops, archdeacons, parsons, and vicars, who are single corporate bodies: also deans and chapters, as formerly abbots and convents, are bodies aggregate.

Spiritual (or Ecclesiastical) Courts are those having jurisdiction in spiritual or ecclesiastical matters. Besides the courts of ARCHDEACON (q. v.) and ARCHES (q. v.), they are the following:

1. The Council of Conscience was created in 27 Henry VIII for determining suits and controversies relating to monasteries and abbey lands. The court was dissolved by Parliament, 1 queen Mary. The Augmentation Office, however, still exists, in which there are a variety of valuable records connected with lands formerly belonging to monasteries and abbey.

2. The Bishop's or Consistory Court is held in the cathedral of each diocese for the trial of ecclesiastical causes within that diocese.

3. The Court of Conscience or Requests (Curia Conscience) was erected in 9 Henry VIII in London, and an act of commission then appointed persons to sit in the court twice a week to determine all matters between citizens and freemen of London in which the debt or damage was under forty shillings.
SPRITUALLY GIFTS

This act of common council was confirmed by 1 James L. By this the court issues its summons, the commissioners examine on oath, and decide by summary process, making such orders touching debts as "they should find to stand to equity and good conscience." The commissioners may commit to prison for disobedience of their summons. Various subsequent acts have regular procedure. The act of 1650 empowered the council to issue writs of assistance. The court issued such writs and the acts of assembly. The act of 1658 authorized the council to issue such writs. The council issued such writs and the acts of assembly. The act of 1658 authorized the council to issue such writs. The council issued such writs and the acts of assembly.

4. The Court of High Commission originated in the Act of Supremacy, passed in 1559, which empowered the queen Elizabeth to choose commissioners who might exercise supreme jurisdiction in spiritual or ecclesiastical matters. The court so formed claimed a pre-eminent authority in the kingdom. This authority was uncontested. The rack and other means of torture were weapons confined to them. They were bound by no rules or precedents in receiving evidence or in imposing penalties, but acted as they pleased, and soon became odious as a terrific and lawless inquisition. In 1610 a court of this nature was erected by James VI in Scotland, and re-established in 1664, the last consisting of nine priests and thirty-five laymen. It was armed with highest authority, and had a military force at its command. It had also an organized espionage, with agents everywhere. It ruined many financially by the heavy fines imposed, banished others to unhealthy districts, and even sold some as slaves to the Dutch. It is not known how many were executed by this court.

5. The Court of Faculties belongs to the archbishop of Canterbury. Its power is to grant dispensations for the marriage of persons without the publication of banns, to ordain a deacon under the canonical age, to enable a son to succeed his father in a benefice, or one person to hold two or more benefices incompatible with each other.

6. The Court of Prerogative is held at Doctors' Commons, in London, in which all wills and testaments are proved, and administrations granted on the estates of persons dying intestate, etc.

7. The Court of Triers is that portion of the judges of the Court of Session that administers the law as to the revenues of the Scottish Established Church.

Meetings of Session, Presbytery, Synod, and General Assembly are usually termed Courts.

SPRITUALLY GIFTS (τὰ πνευματικὰ ὑπολογία—, a phrase used to denote those endowments which were conferred on persons in the primitive Church, and which were manifested in acts and utterances of a supernatural kind. The phrase is taken from 1 Cor. xii, 1, where the words πνευματικοὶ are rendered in the A. V. "concerning spiritual gifts." The accuracy of this rendering is generally admitted; for, though some would take πνευματικοὶ as masculine, and understate things, it is not probable that the tenor of the entire passage shows that it is of the gifts themselves, and not of the parties endowed with them, that the apostle speaks in this chapter (comp. xiv, 1). It is from the apostle's statements in this chapter that our information concerning the spiritual gifts of the primitive Church is chiefly drawn.

1. The first thing to be noted is what may be called the fundamental condition and test of these gifts. This is the acknowledgment of Jesus Christ as Lord. "I give you to understand," says the apostle, "that no man speaking by the Spirit of God calleth Jesus accursed; and that no man can say that Jesus is the Lord, but by the Holy Ghost." In this statement there is a recognition of Jesus as an impostor, whether that came forth in the shape of an imprecation (ἐμπείρωμα) or in the shape of an assertion (ἀπεστάλμα), having reference to his having died as one accursed (comp. Gal. iii, 13), proved sufficiently that the party uttering it was not under the influence of the Spirit; while, on the other hand, the admission of His Messianic claims and the submission to his supreme authority formed the antithesis to this, and was a proof that the party was under the power of the Holy Ghost. The primary condition, then, of the possession of spiritual gifts was sincere adherence to Jesus as the Messiah. Apart from this there might be the arts of the magician or soothsayer, but no effects produced by the Spirit of God.

2. The source of these spiritual gifts was God's grace, and the agent by whom they were produced was the Holy Ghost. They were χαρίσματα, or grace-gifts; they were not the amount of grace the person possessed, but the grace which he had received. The idea of a grace-gift is it one and the same Spirit by whom they are bestowed, and amid diversity of services it is one and the same Lord by whom they are appointed, amid diversity of operations it is one God who energizes all in all (1 Cor. xii, 4-6).

3. When the passage speaks here of χαρίσματα, δωρεάν, and ἐνεργητικά, the inquiry is suggested how these three expressions are to be taken. Are they intended to mark off three distinct classes of spiritual gifts? or do they describe the same objects under different aspects? or is the first the generic class under which the other two are subclassed as species? Each of these views has found advocates; we know not which is the more correct. The Greek fathers generally regard them as simply different names for the same object (comp. Chrysostom, ad loc.), but most recent writers regard them as relating to distinct classes. (For different classifications on this principle, see Aquinas, Summa Theol. ii, 2, qu. 171: Estius, On 1 Cor. xii; Osiander's paraphrase, etc.) The objection to all these arrangements on this principle is that they are all more or less arbitrary, so that what is placed by one under one head is with equal plausibility placed by another under another. The opinion that Charisma is the genus of which Diakonia and Enérgepsis are species is open to the objection that to make diakonia a kind of charisma is somewhat forced; and, besides, it does not accord with the parallelized structure of the apostle's statement, which plainly makes these three objects collateral with each other. The opinion which has most in its favor is that we have here only one object presented under different aspects. On this principle the three classes may be arranged thus: These endowments of the primitive Church are, (1) Gifts of divine grace, as the principle of the new life which, with its manifold capabilities, is communicated by the indwelling Spirit of God; (2) Ministries, as means by which one member serves for the benefit of others; and (3) Operations, effects, by which the grace of God is manifested in the act of power. This seems a highly probable explanation of the apostle's words; nor do we see the harshness in it of which Kling, from whom we have taken it, complains.

4. Side by side with this parallel arrangement of the gifts, the apostle places in another series of parallels the agency by which each of them is produced and sustained. The two series may be tabulated thus:

Charismata (given by) the Spirit.
Ministries (directed by) the Lord.
Effects produced by the Father.

In the first two of these parallel propositions there is an allusion of the verb, but this the mind naturally supplies from the analogy of the last in which the verb is enunciated (see Henderson, On Inspiration, p. 181).

5. It has appeared to some that there is a correspondence between the gifts enumerated in 1 Cor. xii, 8-10 and the Church offices enumerated in verse 28 (Horsley, Sermons, xiv, Appendix). The number of both is the same; the list of the former, and perhaps that of the latter, the correspondence only very partially exists, and in order to give it even a semblance of existing throughout, not only must very fanciful analogies be traced, but some palpable errors in interpretation committed (Henderson, On Inspiration, p. 188).

6. The suggestion of Beza that the enumeration of gifts in 1 Cor. xii, 8-10 is divided into coordinate groups, distinguished by the pronouns ὑμῖν, ver. 8; ἐμοὶ, ver. 9; ἐμοὶ, ver. 10, has been very generally followed by interpreters. Hence Meyer arranges them in the following scheme:
I. Charisms which relate to intellectual power. 1. λόγος σοφίας. 2. λόγος γνώσεως.

II. Charisms which are conditioned by heroic faith (Glossaagogicum). 1. The operation of this in act-μα, ιάματα; δυνάμεις. 2. The operation of this in word, προφητεία. 3. The critical operation of the mind, καταφανία. 4. The critical operation of the tongue, τάλαμος.

III. Charisms relating to the γνώσις. 1. Speaking with tongues; 2. Interpreting of tongues.

Henderson adopts substantially the same arrangement (Inspiration, p. 185 sq.), like Meyer, laying stress on the use of the pronoun ἵππος in place of ἄλλον by the apostle in his enumeration ("ἵππος is selected because a distinction is to be made; only thus can we account for the apostle's non proceeding with ἀλλ'ων"—Meyer; comp. Tittmann, Synoptica, ii, 28). To all such attempts at classification De Wette objects: (1.) That ὅ μιν, ἵ ππος, ἰ ἵππος ἔι, ἵππος ἔι, do not stand in relation to each other, but ἵππος ἔι is always opposed to the nearest preceding ἀλλ' ἦ, so that neither can the one denote the genus nor the other the species. (2.) If anything could make a division, it would be the repeated κατὰ τὸ αὐτὸ τνεῦμα, ἐν τῷ αὐτῷ τνεῦμα, with the concluding πάντα ἐν ταύτῃ of 1 Cor. xii, 11; but even thus we should gain nothing, for in ver. 10 heterogeneous objects are united. (3.) There is not enough positive information concerning the classification to make it complete (see ver. 29). (4.) The classification proposed (by Meyer) is in itself unsatisfactory; plainly the speaking with tongues is more closely akin to prophesying than to gifts of healing; and, as Kling observes, the διαφοράς πνεύμων and the καθενὴ πνεύμων relate to the gift; while not to κατὰ πνεύμα. In these reasons there is much force; and though the apostle's arrangement has the aspect of a classified scheme, we feel constrained to conclude with Kling that we must leave it undecided whether and how they can be classified. Neander, followed by Billroth and (with reservations) Weisse, as a high authority, without inquiring into the apostle's words, contented himself with the obvious division of these charisms into two great classes—the one of which embraces such gifts as manifest themselves by word, and the other such as manifest themselves by deed; and each of these presents two subordinate classes, determined by the relation of the man's own mental culture and capacity to the working on him of the Spirit, so that in a man of high culture and intellectual power the λόγος γνώσεως would be manifest, while to one of less culture the Holy Spirit would come with a power which overwhelms his self-consciousness and makes him almost the mechanical utterer of what does not pass through his own inner appreciation (Apostel. Zeit., i, 174 sq. [Eng. trans., i, 132]).

7. Taking in order as they stand in the text the gifts enumerated, we have—

(1.) The Word of Wisdom (λόγος σοφίας) and the Word of Knowledge (λόγος γνώσεως). Λόγος is used here as frequently elsewhere in the New Testament as "σόφ-

(2.) Faith (πίστις)—All are agreed that this cannot be understood of that faith which saves—justifying faith; and most regard it as a πίστις

8. He would therefore understand by πίστις here a high degree of faith in Christ—a faith heroism whose operation in some was in healings, etc. As, however, such faith in Christ must mean faith in him as the risen Lord, the source of miraculous power, whether exercised in healing diseases or in utterances of knowledge, this opinion seems to resolve itself into a substantial identity with the other.

(3.) Gifts of Healings (γαρ ἑαυτάς).—This all are agreed in understanding as the power of healing disease directly without the aid of therapeutic applications. The plural is used to indicate the variety of diseases, and the various gifts of healing them possessed in the Church.

(4.) Works of Power (διαργήμα. ἑαυτάς).—This is generally understood to mean all the works in the case of which faith in Christ—"a faith heroism whose operation in some was in healings, etc."

(5.) Prophesy (προφητεία).—This refers not to ordinary religious discourses for the edification of the Church, but to such a forth-speaking of the mind of God in relation to truth, duty, or coming events as the inward action of the Holy Spirit on the mind may produce (Chrysost. i προφητείας τῆς ὑπ' ὑμῶν πιστῶν, τῶν ἡκατόν). That the gift of predicting future events was possessed in the early Church, we see from such instances as Acts ii, 27, 28; xxi, 11, etc.; but the προφητεία of the New Testament does not generally relate to this: it usually has reference to the utterance of doctrine given by revelation from God (comp. 1 Cor. xii, 3; xiv, 26-33, etc.).

(6.) Discourses of Spirits (διὰργήματος πνεύματων).—From 1 Cor. xiv, 29 (comp. 1 Thess, v, 21; 1 John iv, 1) we learn that professed prophetic utterances were to be subjected to trial, that nothing unchristian or unedifying must pass unexamined; and that the gift now before us relates. Even apostles would seem to have submitted their doctrine to the judgment of these gifted critics (1 Cor. xiv, 37).
(7.) *Kinds of Tongues* (γίνη γλώσσας).—That this refers to the λαλίνον γλώσσαν or γλώσσαις which existed in the Corinthian Church, and indicates that of these γλώσσαι were there various kinds, is undoubted; but in what this gift consisted is a question involved in great difficulty, and to which very different answers have been given. Some have supposed these as not deserving serious consideration—viz., 1, that of Barnabas and Elechorn, who take γλώσσα in the literal sense of tongue, and suppose that the λαλίνον was a sort of inarticulate babble, an ecstatic utterance of mere sounds made by the tongue—an opinion which is improbable as the Greek word in the phrase ἐκ γλώσσαις λαλῶν of the Holy Ghost, with the possibility of the sounds uttered, with what Paul says (1 Cor. xiv, 18), and with the use of the plural in the phrase γλώσσαις λαλῶν: 2, that of Bleek, who takes γλώσσα in the sense of glosses—i.e. archaic, poetical, or provincial word or idiom—a meaning which belongs to the technicalities of the grammarians, and is quite foreign to the language of the New Testament; and 3, that of Billroth, who supposes γλώσσα to mean a composite language formed of the elements of various tongues, and in its composition affording a symbol of the uniting power and universality of Christianity—which is at the best only a plausible hypothesis. Any idea of interpreting are the old view that these γλώσσαι were actual foreign tongues which the gifted persons spoke without having learned them, and the opinion, subject to various modifications, that they were new and divinely inspired utterances of a kind transcending the ordinary capacity and intelligence of men.—Kitto.

Before entering on the consideration of these views, it may be well to state accurately the various peculiarities of this gift. These may be gathered from the statements of the apostles. From these we learn that it was a gift of the Spirit (1 Cor. xii, 11, 28, 30); that it belonged only to some in the Church (ver. 11, 80); that it was exercised only by one (1 Cor. xiv, 16); that only one may prophesy at a time;—was inferior to it in point of utility, but afforded greater scope for display (v. 5, 6, 18, 19); that it was exercised in acts of prayer and praise (ver. 2, 14, 15, 16, 17); that it was not exercised through the medium of the intelligence (νοήμα), and so was unintelligible without an interpretation, which the party exercising it might not be capable of supplying, as it was the result of a distinct gift, which might or might not accompany the other (ver. 5, 6, 13, 16, 23); that it might appear to one unaccustomed to it a frenzy (ver. 23); that it had the effect of an instrument giving an uncertain sound, or was an instrument giving forth the sound of an iron clanging of a cymbal when not interpreted (ver. 7–9; xiii, 1); and that its use was to serve as a sign (or evidence of God's presence) to those who did not believe (xiv, 22).

Let us now turn to the former of the two opinions above noticed: those who hold this to be γλώσσα in the sense of language support their opinion by an appeal to our Lord's promise to his disciples that, as a sign of his presence with them, they should speak with new tongues (καὶ ἐν γλώσσαις, Mark xvi, 17), and to the occurrences of the day of Pentecost when the apostles spake with other tongues (τὰ γλώσσα τῶν, Acts ii, 4 sq.). It seems altogether probable that the event of the day of Pentecost was a full illustration of the promise of Christ to his disciples, and if we assume (as the narrative seems to intimate) that on that occasion the apostles did receive the faculty of speaking foreign tongues through the agency of the Spirit, there is great plausibility in the view that the gift of tongues becomes known in the primitive Church consequent on the session of this faculty. It is frivolous to object to this, as De Wette and Meyer do, that the speaking of a language one has never learned is psychologically impossible, for, if divine interposition be admitted, it is idle to set limits to its operation. "With God all things are possible," and he who caused "the dumb as to speak with man's voice" could surely employ the organs of a man to utter a foreign tongue of which he was ignorant. In the way of the conclusion, however, above stated, that the gift of which the apostles treat in writing to the Corinthians is the same as that promised by our Lord, and received by the apostles on the day of Pentecost, there is some difficulty. The gift as here described possessed the power of speaking foreign tongues miraculously, they appear to have made very little use of it for the purposes of their mission, for, with the exception of the instance of the day of Pentecost, we do not read of their ever using this gift for the purpose of addressing foreigners. The reason seems to be that such a faculty would be miraculously conferred when it was one for which no special need existed, the Greek tongue being so widely diffused that the first preachers of Christianity were not likely to go where it was not known. But it is probable, although not recorded, that they eventually used this faculty in preachings to heathens. As to the day of Pentecost, though the gift of tongues came upon the disciples when they were alone, yet it was immediately available to foreigners. It is an un warranted assumption that these persons all understood a common language, or that to all of them at once Peter spoke on the same day without the help of an interpreter. The opinion that the Glossolalia of the Corinthians was a speaking in foreign tongues are derived from what the apostles say about it in writing to them. (1) The phrase γλώσσα λαλοῦμεν does not necessarily mean "to speak a foreign language"; but it is evidently tautological (comp. Acts x, 46; xix, 6 with Acts ii, 4). The statements in Acts ii are conclusive that these tongues in that case were vernacular with the polyglot audience. (2) The Glossolalia was unintelligible to every one till interpreted (1 Cor. xiv, 2). But this may only refer to the absence of any one with whom it was vernacular. (3) It is thought that this gift was used in individual prayer to the God of Paul, and in prayer to others, used it chiefly in secret: can we understand this of a speaking to God in foreign tongues? But of this assumption there is little evidence. (4) The apostle places the Glossolalia in opposition, not to speaking in the vernacular tongue, but to speaking intelligibly; or εὐαγγελίζομαι, εὐαγγέλιζομαι, εὐαγγελίζομαι. He likewise compares the glossai with foreign tongues, which assumes that they were not the same (ver. 10 sq.). But foreign languages surely are unintelligible, and in ver. 10 the wider term ποιμεν does not use. (5) The apostle had given the gift of the speaking of tongues to the Gentiles on condition that they had made the exercise of them dependent on the presence of those by whom they were understood, not on their bearing on the edification of the Church. But the latter could only have been effected through the former. The other objections raised by Dr. Poor in the American edition of Lane's Commentary (ad loc.) are as little to the point. (6) So far our opponents here on unbelievers, they were a sign of reprobation (ver. 11). But that was true only when no one was present to interpret. (7.) Its special use was for the possessors' own benefit in prayer and praise. Such, certainly, was not the case on the day of Pentecost. (8) Any foreigner present who understood the language could have acted as interpreter without a special gift; but he would hardly have been accepted as an authoritative exponent in the Christian sense. (9.) Corinth, being the resort of foreigners, had need of this gift less than other localities. On the contrary, this was the very reason why a polyglot was required. (10.) Paul desired that old might have this gift. To the poor, perhaps, whatever it was. (11.) The phrase εὐαγγελίζομαι seems to imply some individual peculiarity rather than an external demand. Rather it shows that the tongues were varied in different cases. (12.) It is nugatory to ask such questions as, How was this speaking in different foreign tongues conducted? Did the gifted persons all
made to convey edification to the hearers only as it was explained (by translation or otherwise); and for this purpose the Holy Spirit gave some persons the faculty of comprehending it, and thereby of giving its meaning to others. This gift sometimes was bestowed on the same person that had the gift of tongues.

8. Such were the gifts of the Spirit enjoyed by the primitive Church. They were different and variously distributed according to the sovereign will of the giver. But amid all this diversity the Church remained one—the indivisible body of Christ pervaded and influenced by the Holy Spirit. All the members were to be subordinated to the end of edifying the Church, and, more than all of them, charity was to be sought (1 Cor. xii, 11–31).

Spiritual Relationship is one effected through some spiritual act—such, for example, as that between godparents and godchildren.

Spiritualitas (or Spiritualia) is the name given to the stricter party of the Franciscans. Elijah of Cortona attempted, especially after the death of St. Francis, to soften the rigid discipline of the order. Violent discussions arose, and Elijah was twice deposed, but finally reconciled to the Church (1256). The fanaticism of the order increased in proportion as more lax opponents grew in number. At length the disputants separated, and the stricter party (called Spiritualia, Zelatores, Fratiarici) gradually became avowed opponents of the Church and of its rulers who had disowned them, and even denounced the pope as anticlerical and consequently deprived of Inquisition. See Fincher, Hist. of the Ref. p. 57; Kurtz, Church Hist., i, 108, 4.

Spiritualia is a term opposed to temporals, or tempora (q. v.).

Spiritualism is a word now generally used to designate the belief of those who regard certain mental and physical phenomena as the result of the action of spirits through sensitive organizations known as mediums. The practice of spiritualism has received much attention for the belief in the supernatural: that it has pervaded all ages and nations; and that American Spiritualism is but the last blossom of a very ancient tree. They assert that phenomena differing but slightly from the manifestations of modern Spiritualism appear in many of the Scripture incidents, e.g. the vision of Eliza-ah (2 Kings vii), and in other analogous instances, at the feast of Belshazzar (Dan. v. 5), in the Delphic oracles, in the experiences of Luther, the occurrences related by Gwillam (1661), in the Camisard maravies (France 1860–1707), in the occurrences in the Western family (1710), and in the communications of Swedenborg with spirits of the departed. About a hundred years before the American phase of Spiritualism appeared, Germany and Switzerland had their Spiritualists, developing or believing in phenomena almost identical. They had spirit—vision, spirit—writing, knowledge of coming events from the spirit-world, and daily direct intercourse with its inhabitants. among these Spiritualists were Jung-Stilling, Kerner, Lavater, Eschenmeyer, Zschokke, Schubert, Werner, Kant, etc. Clairvoyance and mesmerism were intimately associated with the introduction of modern Spiritualism, making the same claims to open intercourse with the spirit-world, and in some cases predicting that this communication would ere long assume the form of a living sen-
SPIRITUALISM

SPIRITUALISM

Onstrual" (Davis, The Principles of Nature, her Di-aver Revelations, etc.).

Spiritualism assumed a novel shape in the United States—that of moving physical objects—and has intro-
duced spirits speaking through means of an alphabet, rapping, knocking, knocking, knocking, knocking by the hand of mediums or independently of them. The "spirit-rap-
ping" phenomenon began in the home of J. D. Fox, Hydeville, Wayne Co., N. Y., and is thus described by Mr. Dale Owen: "In the month of January, 1848, the noises assumed the character of distinct knockings at night in the two pianos, and were distinct enough to be heard through the floor, and the cellars below, and resembling the hammering of a shoemaker. These knockings produced a tremulous mo-
tion in the furniture and even in the floor. The chil-
dren (Margaret, aged 12 years, and Kate, aged 9 years) felt something heavy, as of a dog, lie their feet on the bed; and Kate felt, as it were, a cold hand passed over her face. Sometimes the bedside doors were pulled off. Chairs and the dining-table were moved from their
places. Raps were made on doors as they stood close to them, but on suddenly opening them no one was visi-
ble. On the night of March 15 (or 21), 1848, the knock-
ings were unusually loud," whenupon "Mr. Fox tried the doors of the furniture, and in many instances found them as if they were being moved," Kate observed that the knockings in the room exactly answered the rattle made by her father with the nail. Thereupon she snapped her fingers and exclaimed, 'Here, old Splitfoot, do as I do.' The raps followed. This at once arrested the mother's attention. 'Count ten,' she said. 'Tell me the distance.' 'How old is my daughter Margaret?' Twelve strokes. 'And Kate?' Nine." Other questions were answered, when
she asked if it was a man? No answer. Was it a spirit? It rapped. Numbers of questions were put to the
spirit, which replied by knocks that it was that of a
travelling salesman, who had been murdered by the then tenant, John C. Bell, for his property. The pedi-
aller had never been seen afterwards; and on the floor being dug up, the remains of a human body were found.

After a time the raps occurred only in the presence of the Fox sisters, accompanying them upon their removal to Rochester, and developing new phenomena. In No-

tember, 1849, the Fox girls appeared in a public hall, and their phenomena were subjected to several tests, without being able to trace them to any mundane aca-

Young. They arrived in New York in May, 1850, and be-
came the subject of extensive newspaper and conversa-
tional discussion. Meanwhile knockings were reported to have occurred in the home of Mr. Granger, of Roch-
esta, New York, and the report was advertised by Dr. Phineas Parkhurst. Individuals were discovered to be mediums, or persons through whose atmosphere the spirits were enabled to show their power, until, in 1853, their number is given at 30,000.

The following are some of the numerous phe-

omena characteristic of Spiritualism in this country: Dials with moving hands pointing out letters and an-
swering questions without human aid; the hands of mediums acting involuntarily, and writing communica-
tions from departed spirits, sometimes the writing be-
ing upside down, or reversed so as to be read through the paper or in a mirror. Some mediums represented the departed spirits by their actions, as the appearance of deceased persons, or, blinded, drew correct portraits of them. Sometimes the names of deceased persons and short messages from them appeared in raised red lines upon the skin of the medium. Medi-

ums were said to have been raised into the air and floated above the heads of the spectators. Persons clamed to see spirits; it was said that spiritualists had magnetic hands, or invisible hands; and voices were heard purporting to be those of spirits. In 1850 D. D. Home became known as a medium, and maintained for five years a wide-spread reputation, giving sittings before Napoleon III in Paris, and Alexander II in St. Petersburg. Other prominent mediums were the "Hampton brothers," "Beck" of Ohio, Florence Cook, and the Holmecs. In the London Quar-

terly Journal of Science, Jan. 1874, some of the phenom-
ena exhibited in repeated experiments with the medi-

ums D. D. Home and Kate Fox are thus classified: 1. The movement of heavy bodies with contact, but with-

out mechanical exertion; 2. The phenomena of percus-
sion, and other evident sounds; 3. The séances by the hands of mediums or independently of them. The "spirit-rap-
ping" phenomenon began in the home of J. D. Fox, Hydeville, Wayne Co., N. Y., and is thus described by Mr. Dale Owen: "In the month of January, 1848, the noises assumed the character of distinct knockings at night in the two pianos, and were distinct enough to be heard through the floor, and the cellars below, and resembling the hammering of a shoemaker. These knockings produced a tremulous mo-
tion in the furniture and even in the floor. The chil-
dren (Margaret, aged 12 years, and Kate, aged 9 years) felt something heavy, as of a dog, lie their feet on the bed; and Kate felt, as it were, a cold hand passed over her face. Sometimes the bedside doors were pulled off. Chairs and the dining-table were moved from their
places. Raps were made on doors as they stood close to them, but on suddenly opening them no one was visi-
ble. On the night of March 15 (or 21), 1848, the knock-
ings were unusually loud," whenupon "Mr. Fox tried the doors of the furniture, and in many instances found them as if they were being moved," Kate observed that the knockings in the room exactly answered the rattle made by her father with the nail. Thereupon she snapped her fingers and exclaimed, 'Here, old Splitfoot, do as I do.' The raps followed. This at once arrested the mother's attention. 'Count ten,' she said. 'Tell me the distance.' 'How old is my daughter Margaret?' Twelve strokes. 'And Kate?' Nine." Other questions were answered, when
she asked if it was a man? No answer. Was it a spirit? It rapped. Numbers of questions were put to the
spirit, which replied by knocks that it was that of a
travelling salesman, who had been murdered by the then tenant, John C. Bell, for his property. The pedi-
aller had never been seen afterwards; and on the floor being dug up, the remains of a human body were found.

Other prominent mediums were the "Hampton brothers," "Beck" of Ohio, Florence Cook, and the Holmecs. In the London Quar-

The books relating to Spiritualism may be
reconciled by the hundred, of which the following are
some of the more important: Ballou, Spiritual Mani-
festations; Crookes, Researches in the Phenomena of
Spiritualism (Lond. 1874); Crowe, Spiritualism and
the Age we Live in (ibid. 1859); De Morgan, From Matter
to Spirit (ibid. 1863); Edmunds and Dexter, Spiritual-
ism (N. Y. 1854-5, 2 vols.); Harding, The Influence of
American Secession on Spiritism (ibid. 1870); Howe,
Incidents in my Life (Lond. Paris, and N. Y. 1862, 1872, 1875);
Howitt, History of the Supernatural in All Ages and Na-
tions (Lond. 1865); Olcott, People from the Other World
(Harford, 1873); Owen, Footfalls on the Boundary of
Another World (Phila. 1860), and The Deniable Land
between Us and the Next World (N. Y. 1872); Sargent,
Planchette, or The Despair of Science (Bost. 1869);
Wallace, On Miracles and Modern Spiritualism, three
essays (Lond. 1875).

**Spiritualists.** 1. = Libertines (q. v.). 2. The name
assumed by persons who profess to hold communica-
tion with the spirits of the departed. See Spiritual-
ism.

**Spiritualities, Guardian of the.** The arch-
bishop is the guardian of the spiritualities during the
vacancy of a bishopric; and when the archbishopric is
vacant, the dean and chapter of the diocese are guardi-
ans of the spiritualities, who exercise all ecclesiastical
jurisdiction during the vacancy.

**Spirituality, in the ecclesiastical affairs and lan-
guage of the Church of England, is a term for the
whole body of the clergy, derived from the spiritual
nature of the office which they hold.

**Spirituality of God** is his immateriality, or be-
ing without body. It expresses an idea made up of
a negative part and a positive part. The negative
part is the exclusion of some of the known
properties of nature, especially of solidity, of the
vis inertiae, and of gravitation. The positive part
comprises perception, thought, will, power, action, by
which last term is meant the origin of motion
(Paley, Nat. Theol. p. 481). See Incorporeality of
God.

**Spiritualize** is to interpret and apply historical or
other parts of the Bible in what is called a spiritual
manner. The sense thus brought out is termed the
spiritual sense; and those preachers or expositors who
are most ready and extravagant in elicting it are the
most highly esteemed by the unlearned and persons of
an uncultivated taste. It is impossible adequately to
define the abuse of this facility of allegorizing which has
been committed by such teachers. From the time of Origen,
who spiritualized the account of the creation of the
world, the creation and fall of man, and numerous oth-
er simple facts related in the Bible, down to the Jesuit
who made the greater light to mean the pope, and the
lesser light and the stars to mean the subjection of
kings and princes to the pope, there have been multi-
tudes in and out of the Catholic Church who have pur-
sued the same path. A noted preacher in the metrop-
olis, when expounding the history of Joseph, made out
Pharaoh to mean God the Father, and Joseph the Son.
As Joseph interpreted Pharaoh's dreams, so Christ in-
terpreted the will of the Father. Potiphar's wife sig-
nified the sinful humanity which, according to the
preacher, our Lord assumed. The prison signified the
prison of hell, to which Christ went after his death.
The chief butler, who was restored, typified a num-
ber of damned spirits whom Christ then liberated; and
the chief baker was a type of the rest who were left—out
off from their head, Christ. Such a mode of interpre-
tation may astound persons of weak minds, but it is
most irreverent and dangerous. It is one thing to ex-
plain a passage literally and then deduce from it spirit-
ual and practical reflections, and another to represent it
as directly and positively teaching certain spiritual
truths, or apply it to subjects with which it has no
manner of connection whatever. Jacob Burham, Mi-
guel de Molinos, Madame Guyon, and Madame de
Bourignon are representatives of the somewhat nu-
merous class of religiousists, particularly of the 17th
century, to whose teaching and practice the appella-
tion of spiritualism has been applied. See Interpre-
tation.

**Spiritual-mindedness is that disposition
implanted in the mind by the Holy Spirit, by which it
is inclined to think, believe, feel, and do spiritual
things. The spiritual-minded highly appreciate spir-
Itual blessings, are engaged in spiritual exercises,
pursue spiritual objects, are influenced by spiritual
motive and end, and express spiritual joys. To be spir-
itual-minded, says Paul, is life and peace (Rom.
viil. 6). See Owen's excellent Treatise on this
subject.

**Spirituals, a sect which arose in Flanders in the
16th century, and is known also as Libertines (q. v.).

**Spirituals.** See Spirituals.

**Spittal, a hospital, usually a place of refuge for lep-
ers.**

**Spittal Sermons, a title of two sermons annually
preached on Easter Monday and Tuesday before the lord
mayor and sheriffs at Christ Church, Newgate Street,
London. The sermon on the former of the two days is
preached by a bishop; that on the latter by the chap-
lain to the lord mayor, or some other clergyman whom
he appoints. The Spittal Sermons were or are pre-
ched at a pulpit-cross, erected in the churchyard of
"The Spittle," or Hospital of St. Mary, in the parish of
St. Botolph, Bishopsgate. See Stow's London (Stryge's
ed.), ii. 98.

**Spitta, Karl Johann Philip, a German theolo-
gian and poet, was born Aug. 1, 1801, at Hanover. He
was of Hugenot stock, which had emigrated during the
persecutions under Louis XIV. His early years were
held out no promise of future eminence for him, as
he seemed dull, and was, moreover, afflicted with scro-
fulous disease, which interrupted the progress of his stud-
ies. On his recovery, he was deemed so little qualified
to undertake the theological career which he preferred
that he was apprenticed to a watchmaker. While thus
employed, he developed a love for the study of lan-
guages and of science, and spent his leisure time in the
private study of Greek and Latin, and also of geography
and history. He was subsequently admitted to the ly-
cée of his native town, and in 1821 entered the Uni-
versity of Göttingen. He early came under the influ-
ence of the rationalistic imps, and Spitta lost his
love for theology, though he neglected the study of
philosophy, in which the current rationalism sought its
support. A period of questioning ensued, which was
happily ended by his return to a simple scriptural faith
through the influence of the writings of De Wette and
Tholuck. After graduating, he became a private tutor,
and remained in that position until 1829, though he
was during the interval associated with pastor hang-
mann at Linnburg in an abortive attempt to publish a
journal for Christian families of every rank in society.
At the age of twenty-six he was associated with r-
aged Cleves in the pastorate, but in November, 1829,
to became temporary preacher to the garrison at Hamel
and also spiritual guide to about 500 convicts in the
penitentiary. Thence he was transferred, after being
married to Maria Hotzen, to the parish of Weehacht,
where he remained during ten happy years. The num-
ber of his readers increased with the influence over
the community. His reputation extended far beyond his
native country, and secured for him calls to Bremen,
Darmstadt, and Elberfeld. He eventually be-
came superintendent and pastor at Wittingen, in Lune-
burg, and then pastor of the more responsible post at
Peine (1853). In 1853 he received the doctor's degree.
from his alma mater, together with an honorary testimonial in recognition of his signal fidelity to the Church. In 1859 he was once more transferred to a new field of labor, but was attacked with gastric fever soon after his removal, and died of heart-disease Sept. 28. As a clergyman, Spitta was pious, thoroughly evangelical, and deeply in earnest. His temperament was genial and sociable, and he was a capable performer on the harp. But his principal claim to notice grows out of his spiritual hymns, through which his fame extended over Germany, and of which a number have been rendered into English. He had attempted poetry in his childhood days, and proved its power in every species of poetry, but in time came to devote his abilities wholly to religious composition. In 1833 he published a collection of hymns under the title *Paulus und Horfe* (24th ed. 1861), which was received with general satisfaction, and was followed by a second collection in 1843 (13th ed. 1861). A third (posthumous) collection was published by his friend, Prof. Adolph Peters, in 1861 (2d ed. 1862). These hymns are pervaded with unusual fervor and simplicity, and are chaste and neat in style. They are specially suited for use in household and private devotions, the second collection being perhaps inferior to the others in an artistic point of view. Peters's collection is accompanied with a portrait of the author. Of English renderings of Spitta's hymns, we mention "I know no life divided, O Lord of life, from thee," by Massie, and the funeral hymn, "The precious seed of weeping to-day we sow once more," by Miss C. Winkworth. See Münkel, *K. J. F. Spitta* (Leipzig, 1861); Meiträger in *Neue Evangelische Kirchenzeitschr.* 1860 (No. 5), 1861 (No. 23); also the preface in Peters's collection of Spitta's hymns.

**Spitting** was a ceremony introduced into baptism in the early Church. The candidate was required not only to renounce the devil in word, but also by act and gesture. The catechumen was brought into the baptismary and placed with his face to the west: a form of words was used by which he denounced the devil; he then stretched out his hands and spat, as if in defiance of him. This was thrice repeated. He then turned to the east and entered into covenant with Christ. See Bingham, *Christ. Antig.* bk. xi, ch. vii, § 5. See Spitt-ter.

**Spittle** (πτερέω, πτέρωχ), although, like all the other natural secretions, a ceremonial impurity (Lev. xv, 18), was employed by our Lord as a cure for leprosy and blindness (John ix, 6). The rabbins cite it as a remedy in like cases (see Lightfoot, *ad loc.*), especially the spittle of fasting persons (αλετέρανα, which was anciently held to be a remedy likewise against poisonous bites (Pliny, v, 2; xxviii, 7; Galen, *Simp. Med.* Fac. x, 104; see Gill, *Exeg. Hebr.*), a fashionable nostrum (D rodz., *Lived.*). But it was not regarded as a specific in medicine: on the contrary (but see John., *In Christo Medic.* p. 41), although ancient writers citespittle as an act of Vespanian having that aspect (Dion Cass. lxxv, 8; Tact. Hist. iv, 81; Sueton. I. c. viii). On Luke xvi, 21 we may remark that the dog's tongue has a peculiarly cleansing and soothing effect upon sores. See Medicin.

On the other hand, the act of spitting upon a person, especially in the face (Numb. xii, 14; Isa. i, 6; Matt. x, 30; Mark vii, 37), is revolting, the grossest insult (see Harmer, *Obs. i.* iii, 357), and it was even held an indignity to spit towards any one (Job xxx, 10); so that an Oriental never allows himself to spit at all in the presence of one whom he respects (Heb. 12, 9); see Arville, iii, 167; Nicbauer, *Bd.* p. 28, 29). This does not proceed (as John., *In Christo Medic.* p. 350) from regard merely to cleanliness, but from piety (Josephus, War ii, 8, 9), and hence was enforced within the precincts of the Temple (Mishna, *Berach. ix, 5). Hence the ignorance in the case of the recusant goel (Deut. xxxv, 9).

**Spittle in Baptism**, in the Roman Catholic Church, is that part of the ceremony of baptism which follows the sign of the cross. The priest recites an exorcism, touching gently some spittle on the eyes and nostrils of the person to be baptized, and saying, "Eorum est, qui te wash (be thou opened into an odor of sweetness; but be thou put to flight, O devil, for the judgment of God will be at hand." This ceremony is taken from the example of Jesus when he cured the deaf- and dumb man (Mark vii, 30). See Elliot, *Delination of Romanis*, p. 125.

**Spittler**, Louis THEODORUS von, an eminent ecclesiastical historian of Germany, was born in November, 1752, at Stuttgart, where his father was a clergyman. His early training was obtained at the gymnasion of his native town, where the rector, Volz, inspired him with fondness for historical studies and trained him to critical research. He entered at Tubingen as a student of theology, and became particularly interested in philosophy, wherever applying his warmest and most careful collocation of authorities and comparison of statements. His earliest literary productions dealt with difficult questions in historical theology, which only the most painstaking and critical labors might hope to solve. His themes were, for example, the 60th canonic of Laodicea, the decrees of Sardica, and the *Capita* *Angeli* *ramati* (1777), history of the canon law to the time of the Pseudo-Isidore. In 1779 Spittler became professor in ordinary in philosophy at Gottingen, and was associated with Walch in teaching Church history, and with Putter in German history, besides co-operating with Rehder and Saur. In 1786, he left this last to work in their own way. Down to Walch's death, in 1784, he confined himself chiefly to ecclesiastical history, but afterwards entirely to political history. His *Grundriss der Geschichte der christlichen Kirche* was accordingly published in the former period (1782), when he was thirty years of age, and constitutes almost his last contribution to that branch of literature. Spittler's Church history was highly valued by his contemporaries, and among modern Schelling writes of him (preface to Steffen's Nachlass, p. xxii) as a man "who has not been excelled in political penetratory any by historical scholar of Germany, and in breadth of view in both secular and ecclesiastical history," while Heeren and Wolzmann speak of the Church history as the "true bloom of the author's mind." On the other hand, the opponents of 18th-century enlightenment, no less than the sceptical Bause (Epochen d. kirchl. Geschichtsschreib.*, p. 162-178), have little to commend in that book. The truth is that Spittler had little regard for the work of others, even of his benefactors, in the development of dogma, his interest being more particularly centred on the government and constitution of the Church. His rare powers of research and perfect mastery of the resultant material, joined to an unusual facility in grasping the salient features of an era and a marvellously graceful and vivid presentation of the story, were devoted to a narration of the experiences.
and actions of those who aspired to rule the Church and of the consequences which resulted to the mass of the governed. He did not assume to determine what constitutes Christianity, and he traced back events to a source in the purposes of individuals; but his peculiar attitude grew out of the opinion that Christianity is not an institution, but a means to secure the salvation of mankind, the efficiency of which is impaired by whatever degree of ignorance and immorality may be connected with its operation. He did not, however, discover any possible improvement in history, and, more particularly, in the history of the Church; nor yet, upon the whole, any degeneration, but simply a manfully uniform and consistent ordered world-course. A posthumously published series of Spittler's lectures, copied from students' notes, which deal with the papacy, monasticism, the Jesuits, etc., is scarcely worthy of the author and of the subjects presented because of the prevalent humor, often travestied until it becomes ribaldry. It is, however, to be remembered that they were the product of his earlier years, delivered while his character was not fully formed, and while he had his position to confer by the side of able and famous professors. In 1757 he was recalled to Stuttgart and made private professor. In that position the very breadth of view which he had cultivated, and gave him a perfect understanding of affairs, deprived him of the ability to make himself powerfully felt in the administration of the State. A further disqualification grew out of the accession in the same year of a prince who soon after allied himself with Napoleon, and who was not concerned to guard the 'good and ancient privileges' of Württemberg. Nobility, titles, and medals could not replace what Spittler had lost in giving up his post at Göppingen. He died March 14, 1810. Characteristics of Spittler have been furnished by Flanck in the preceding page to the 5th ed. of Spittler's Kirchengesch. (1812); Hegel in Christlicher Monatsschrift, 1808; Heeren, Werke, vi, 515-534; Woltmann, Werke, xii, 312-322; Dav. Strauss, in Haym's Preuss. Jahrbücher, 1860, i, 124-150. See also Pütter-Saalfeld,格尔特庯克斯. v. Göppingen, ii, 178-179; iii, 116-122. Spittler's complete works have yet been published only in part (1827-37, 15 vols.).

**SPOIL**

SPOIL (represented by many Heb. and several Gr. words in our version). See AKKORIHOTH; BOOITY. The modern Arab nomads, or Bedawin, live in great part on the plunder of caravans or single travellers, and do not regard the trade of robbers as dishonorable (Arvieux, Descr. iii, 229 sq.; Niebuhr, Betr. p. 382 sq.; Mayeur, Les Bédouins, or Arabes du Desert [Par. 1816], xii, 3). This was the case with their ancestors the Ishmaelites, as well as the neighboring Chaldees (Gen. xvi, 12; Job i, 17). The same is related of Israelites in the times of Samuel (I Sam. xxvii; xi, 3; comp. I Chron. xi, 21), and many invasions by the Philistines, the Amalekites, etc., were but attacks from bands of robbers (comp. 1 Sam. xxiii, i, xxvii, 8 sq.; Judg. ii, 14, 16), such as are still frequent in the villages of Palestine. In the organized Jewish state open plundering was rare (yet see Hos. vi, 9; Micah ii, 8), and the figures of speech referring to it (Prov. xxix, 28) may be referred chiefly to neighboring countries. But after the Captivity, especially under the oppressive rule of the Romans, and in consequence of almost unceasing wars of which the nearer Asia was the scene, the bands of robbers, aided by the multitude of hiding-places which the cavernous nature of the country afforded, became a formidable force against them from time to time (Am. xx, 6, 1), unless they preferred to tolerate them for tribute (ibid. xx, 11, 1). Sometimes these officers even increased the number of the robbers by accepting bribes to release prisoners (ibid. xx, 9, 5) or disarming them for other reasons (ibid. xx, 9, 3). The wilderness between the Jordan and the Jezreel, through which the highway led, and which, in great part, is a deep valley traversed by cliffs and shut in with walls of cavernous sandstone...
which we are familiar with it, of an irregular network of minute fibres of a clear horny substance, branching and anastomosing in every direction, so as to form a highly porous and elastic mass, the general form of which is that of a cup with thick walls, but not unfrequently rounded or ovate without any cavity. These fibres were during life clothed with a glair which possessed vitality, and were furnished with cilia, by whose movements currents were produced in the water which everywhere occupied the cavities of the mass, thus insuring oxygen for respiration and nutritive matter for increase. This particular species grows on rocks in deep water in the Levant, and especially in the seas that wash the Grecian isles, where, from remote antiquity to the present time, there has existed an active fishery for it. The inhabitants of many of the isles are dependent for a living on sponge-diving.

SPONGE, Holy, is a sponge used in the Greek Church to gather the various "portions" in the disk under the holy bread, and to cleanse the chalice in the sacrifice of the holy eucharist. It was used in memory of the Crucifixion, and was carefully wrapped in a linen cloth.

Sponsa Christi (bride of Christ) are the first words of a hymn for All-saints' day, an English version of which is as follows:

"Sponsa of Christ in arms contending
O'er each clime beneath the sun
Mix with prayers for help descending,
Notes of praise for triumphs won.
As the Church to-day rejoices
All her saints in one to join,
So from earth let all our voices
Rise in melody divine."

Sponsage, Token of, is that which is given and received by the witnesses or contracting parties in the case of espousals, as a token of such act or witnessing to such act. See Ryvo.

Sponsalia was the general name in the early Church for espousals or betrothing, consisting of a mutual contract between the parties concerning the future marriage. When the contract was made, it was customary for the man to bestow certain gifts upon the woman as earnings or pledges. The contract was usually confirmed also by a ring, a kiss, a dowry, a writing or instrument of dowry, and a sufficient number of witnesses to attest it. See Bingham, Christ. Antiq. bk. xxii, ch. iii, § 1 sq.

Sponsalitiae Donationes (espousal gifts) were given as earnings or pledges of future marriage. They were also called arva et pigmora, earnings and pledges of future marriage, because the giving and receiving of them was a confirmation of the contract, and an obligation on the parties to take each other as man and wife unless some reason gave them liberty to do otherwise. See Bingham, Christ. Antiq. bk. xxii, ch. iii, § 3. See BETHROTHAL.

Sponsel, Johann Ulrich, superintendent at Burgbernheim, in Baienroth, was born Dec. 13, 1712, at Muggendorf, and died Jan. 5, 1788. He wrote, Puerpera Theologica et exegetica (Coburg, 1752, pt. ii, 1756, pt. i) ;—Philologisch — thesauriae, Äbaltung über verschiedene Stellen der heiligen Schrift (Amphenach, 1761, pt. i) ;—Excurses Philologico-exegetica in Diversa Scriptura Locos (ibid., 1744) ;—Von der Gültigkeit der Bücher der Chronik und Esa (Schwaben, 1775) ;—Über die Verwirrung der Sprachen bei den babylonischen Thurm- bau (ibid., 1777) ;—Abhandlung über den Propheten Isaias (Nuremberg, 1770-80, 2 pts.), See Winer, Handbuch der theol. Literatur, ii, 786; Fürst, Bibl. Jud. iii, 576. (B. P.)

Sponsors. At an early period of the Church, certain persons were required to be present at the baptism of its members, to serve as witnesses of the due perform-
ance of the rite, and to become sureties for the fulfilment of the engagements and promises then made. There is no mention of sponsors in the New Testament, though there is mention of "baptismers" (Acts 2:38). The mention of them first occurs in Tertullian—for infants in the De Baptismo (c. 18) ; for adults, as is supposed, in the De Corona Militis (c. 8: "Inde suscepit lactis et mellis concordiam pragnatumus." See Suicer, s. v. διαβάσκονας). In the Jewish baptism of proselytes, two or three sponsors were present (see Lightfoot, On Matt. iii. 6). It is so improbable that the Jews should have borrowed such a custom from the Christians that the coincidence can hardly have arisen but from the Christians continuing the usages of the Jews.

I. Their Appellations.—These persons were called as sponsors, sponsors, especially when they responded for an infant. They were called also fidejussores, sureties (Augustine, Serm. 116, De Temp.). The title is borrowed from the Roman law. The Greek term διαβάσκονας corresponds to the Latin offereunt and successores, and refers to the assistance rendered to the baptized immediately before and after the ceremony. The appellation ἱππαρπαζοντες, testes, witnesses, which became a favorite in later times, was unknown to the ancient Church. The more modern terms compatrii, etc., godfathers and godmothers, are derived from the practice of early times, in which the parents, or in their absence the nearest relatives, took the child out of the baptismal water.

II. Origin of the Office.—This has been traced by some writers to the institutions of Judaism, and by others to those of the Roman civil law. Neither the Old nor the New Testament contains any allusion to the presence of witnesses at circumcision, nor is there any trace of sponsors or witnesses to be found in any of the narratives of baptism recorded in the New Testament. It is, however, easy to account for the presence of sponsors at baptism, if we refer to the customs of the Roman law. Baptism was early regarded in the light of a stipulation, covenant, or contract, and on all such matters the Roman jurisprudence was very exact and careful in its institutions. The leaders of the early Church, many of whom were conversant with Roman law, would doubtless endeavor to give solemnity and security to the sacred covenant in a way corresponding to that which they had been accustomed to observe in civil transactions. Perhaps the custom arose naturally from the practice of infant baptism, in one of whose ceremonies the witnesses of the rite might not be without some answer. Tradition says that the office was appointed by Hyginus, or Iginius, a Roman bishop, about the year 154. It was, however, in full operation in the fourth and fifth centuries.

III. Duties of Sponsor.—According to Bingham, there were three sorts of sponsors made use of in the primitive Church: (1.) For children who could not renounce or profess or answer for themselves. (2.) For such adult persons as, by reason of sickness or infirmity, were in the same condition with children—incapacitated to answer for themselves. (3.) For all adult persons in general. In times of persecution it was proper to have witnesses to the fact, in order to prevent apostasy. Two things were anciently required of sponsors as their proper duty in the case of children: first, to answer, in the names of their charge, to all interrogatories of their spiritual life for the future, and to take care, by good admonition and instruction, to have them well tilled, being parties to the covenant in which they were engaged (Augustine, Serm. 116, De Temp.). Bingham thinks that they were not obliged to give them their maintenance, this devolving naturally, upon the parents; and if orphans, or destitute, upon the Church.

IV. Qualification, Number, Marriage, and Restriction. (1.) It was a general rule that every sponsor must be himself a baptized person and in full communion with the Church. This excluded all heathen, all mere catechumens, reputed heretics, excommunicated persons, and penitents. (2.) Every sponsor was required to be of full age. No minors were admitted to this office, even though they had been baptized and confirmed. (3.) Every sponsor was supposed to be acquainted with the fundamental truths of Christianity, and to know the Creed, the Lord's Prayer, the Ten Commandments, and the leading outlines of Christian doctrine and morality. (4.) Monks and nuns were in early times eligible as sponsors, and were frequently chosen to act in that capacity; but in the 6th century this practice was prohibited. (5.) At first there was no law respecting the number of sponsors at baptism, although one sponsor was considered sufficient. In later times it became customary to have two sponsors—one male and one female. (6.) By the Council of Trent it was ordered that not only the names of the baptized, but also the names of the sponsors, should be registered in the books of the Church. The object was that men might know what persons were forbidden to marry by this spiritual relation. But anciently it had a much better use: that the Church might know who were sponsors, and that they might be held in mind of their duty by being entered upon record, which was a standing memorial of their obligations.

V. A law of Justinian (Cod. lib. v, tit. 4, De Nuptiis, leg. xxvi) forbids any man to marry a woman, whether she be slave or free, for whom he had been godfather at baptism when she was a child. The Council of Trent (can. 58) forbids the godfather not only to marry the infant, but the mother of the infant, for whom he answers; and orders them that have done so first to be separated, then to do the penance of fornicators. The prohibition was extended to more degrees in the following ages, and grew so extravagant under the Council of Trent thought it a matter worthy of their reformation. By their rules, however, this spiritual relation was extended to more degrees, forbidding marriage not only between the sponsors and their children, but also between the sponsors themselves; nor may the baptizer marry the baptized, nor the father or mother of the baptized, nor the sponsors of the spiritual relation that is contracted between them.

VII. The twenty-ninth canon of the Anglican Church makes it necessary for every child to have a godfather and godmother; and, in order to secure this benefit to all the infant members of the Church, it prohibits the parents assuming this office. The canon appears to argue in this way: No father or mother is a real godfather or godmother; it is quite true that they may stand at the font and take upon themselves the nominal...
SPOON 963

office, but the real godfather and the real godmother are the creators of time, custom, and natural feeling working within the precincts of the Church. They are essentially persons outside of the home circle, whose interest is engaged in the rising young Christian by assuming this relation to him. The parents themselves are already sponsors by the simple fact of being parents; so that, if you give the child only his parents for his sponsors, you give him nothing at all, because he has them already. The reason of having a godfather and godmother is that they are persons from without, who add friendly interest and attention to the parental one. According to Gilpin, "the Church demands the security of sponsors, who are intended, if the infant should be left an orphan or neglected by its parents, to see it properly instructed in the advantages promised and the conditions required" (Serm. xxxii, vol. iii, p. 259).

See Bingham, Christ. Antiq. bk. xi, ch. ix; Riddle, Christ. Antiq.; and the monographs cited by Volbeding, Index Program, p. 142. See Baptism.

Spoon ( spons, a hand, as elsewhere), a hollow dish or pan used as a censer for the Tabernacle and Temple (Exod. xxxv, 29; Num. iv. 7; viii, 14 sq.; 1 Kings vii, 50; 2 Kings xxv, 14; 2 Chron. xxiv, 14; Jer. iii, 18, 19). The Orientals generally eat with the fingers, and so have no occasion for knives, forks, etc. See Eating. Among the ancient Egyptians spoons were introduced when required for soup or other liquids; and perhaps even a knife was employed on some occasions, to facilitate the carving of a large joint, which is sometimes done in the East at the present day. The Egyptian spoons were of various forms and sizes. They were principally of ivory; bone, wood, or bronze, and other metals; and in some the handle terminated in a hook, by which, if required, they were suspended to a nail. Many were ornamented with the lotus flower; the handles of others were made to represent an animal or a human figure; some were of very arbitrary shape; and a smaller kind, of round form, probably intended for taking ointment out of a vase and transferring it to a shell or cup for immediate use, are occasionally discovered in the tombs (Wilkinson, Anc. Egypt. i, 183 sq.). See Dish.

SPOON, a vessel used both in preparing the chalice for the eucharist and for distributing the sacrament to the faithful generally, to the infant, and the sick. In the first case the bowl is perforated, in order that any impurities in the altar wine may be easily and simply removed; in the other the bowl is solid, and the handle usually made in the form of a cross. Many ancient examples exist. The spoon is likewise used in the ceremonies of a coronation.

SPOONER, ERASTUS CARTER, a Presbyterian minister, was born at Brandon, Vt., July 18, 1815. He graduated at Middlebury College in 1839, after which he entered the Union Theological Seminary, where he remained over two years, and engaged in teaching in Brandon; and before he could prepare for the ministry, which was his design, he was called away to a higher field of labor. He died in Brandon, Dec. 11, 1841. (W. P. S.)

Sport (some form of πράξις or πολέμιος, to laugh; but in Isa. vii, 4 τιμή, to mock; ιππόπαρος, 2 Pet. ii, 18). The various events incident to domestic life afforded the Jews occasions for festivity and recreation. Thus, Abraham made a great feast on the day Isaac was weaned (Gen. xxii, 8). Weddings were always seasons of rejoicing; so, also, were the seasons of sheep-shearing (1 Sam. xv, 86; 2 Sam. xiii, 23) and harvest home. To these may be added the birthdays of sovereigns (Gen. xi, 28; Mark vi, 21). Of most of these festivities music and dancing were the accompaniments (Lam. vi, 14). Children were anciently accustomed to play (see Plato, Leg. vii, 797) in the streets and squares (Zech. viii, 5; Matt. xi, 16; comp. Niebuhr, Trav. i, 171); but, with few exceptions (see Mishna, Chalim, xvii, 15; Edagoff, ii, 7), juvenile games are comparatively rare in the East (Orig. Cela. v, 42; Cosmas, Pera. 68).

Military sports and exercises appear to have been common in the earlier periods of the Jewish history (2 Sam. ii, 14). By these the Jewish youth were taught the use of the bow (1 Sam. xx, 30-35), or the hurling of stones from a sling with an unerring aim (Judg. xx, 16; 1 Chron. xii, 3). Jerome informs us that in his days (the 4th century) it was a common exercise throughout Judea for the young men who were ambitious to give proof of their strength to lift up round stones of enormous weight, some as high as their knees, others to their waist, shoulders, or head; while others placed them at the top of their heads with their hands erect and joined together. He further states that he saw at Athens an extremely heavy brazen sphere, or globe, which he vainly endeavored to lift; and that, on inquiring into its use, he was informed that no one was permitted to contend in the games until, by his lifting of this weight, it was ascertained who could match with him. From this exercise Jerome elucidates (ad loc.) a difficult passage in Zech. xii, 3, in which the prophet compares Jerusalem to a stone of great weight, which, being too heavy for those who attempted to lift it, falls back upon them and crushes them to pieces.

Among the great changes which were effected in the manners and customs of the Jews subsequently to the time of Alexander the Great, it may be reckoned the introduction of gymnastic sports and games, in imitation of those celebrated by

1. Ivory spoon, about four inches long, in the Berlin Museum. 2. Bronze spoon in Wilkinson's possession, eight inches in length. 3, 4. Bronze spoons, found by Mr. Burton at Thebes. 5. Of wood, in Mr. Salt's collection.
the Greeks, who, it is well known, were passionately fond of those exercises. These amusements they carried on with a zeal which some of the most capricious countries of the East; the inhabitants of which, in imitation of their masters, addicted themselves to the same diversions, and endeavored to distinguish themselves in the same exercises. The profligate high-priest Jason, in the reign of Antiochus Epiphanes, first introduced public games at Jerusalem, where he erected a gymnasium. (Macc. i. 38.) The exercise, however, was put up of youth in the fashions of the heathen' (2 Macc. iv. 9).

The avowed purpose of these athletic exercises was the strengthening of the body; but the real design went to the gradual exchange of Judaism for heathenism, the games themselves being closely connected with idolatry, sacrificed a deity of several pagan gods. The innovations of Jason were therefore extremely odious to the more pious part of the nation, and even his own adherents did not fully enter into all his views; yet the games proved a source of attraction and demoralization to many. Even the very priests, neglecting the duties of their sacred office, hastened to be partakers of these unlawful sports, and were ambitious of obtaining the prizes awarded to the victors. The restoration of divine worship, and of the observance of the Mosaic laws and institutions under the Maccabean princes, put an end to the spectacles. They were, however, revived by Herod, who, in order to ingratiate himself with the emperor Augustus (B.C. 7), built a temple at Jerusalem and a large amphitheater, without the city, in the plain; and who also erected similar edifices at Cesarea, and appointed games to be solemnized every fifth year, with great splendor, and amidst a vast concourse of spectators who were invited by proclamation from the neighboring countries. Josephus's narrative of these circumstances is not sufficiently minute to enable us to determine with accuracy all the exhibitions which took place on these occasions; but we may collect that they included wrestling, chariot-racing, music, and combats of wild beasts, which either fought with one another or with men who were under sentence of death (Ant. xv. 8, 1; xvi. 5, 1; xix. 7, 5; 2 War. 1, 21, 8; see Eichborn, De Ro Scenicis Judeor. in his Comment. [Gött. vol. i.]) The Talmud occasionally alludes to these spectacles (Sundh. iii. 3; Shabb. xxii. 2; see Ortho, Lex. Hebr. p. 398, 703; Wa- gesscull, De Juda Hebreor. [Nörth. 1897]).

Some of the scriptural passages deal with amusements and recreations, and have already noticed (see Hofmann, De Judaicis Memorabilis in N. T. Commentar. [Viteb. 1769]). See GAME; PRIZE, etc. We may here mention two others. From the amusement of children sitting in the marketplace and imitating the usages common at wedding feasts and at funerals, our Lord takes occasion to compare the Pharisæes to the sullen children who will be pleased with nothing which their companions can do, whether they play at weddings or funerals, since they could not be prevailed upon to attend either to the severe precepts and life of John the Baptist, or to the milder precepts and habits of Christ (Matt. xi. 16, 17). The imitation of this custom is said to have caused the death of St. Paul with love and truth. This example has furnished Paul with a strong metaphor, in which he cautions the Christians at Ephesus against the cheating sleight of men (Eph. iv. 14), whether unbelieving Jews, heathen philosophers, or false teachers in the Church itself, who corrupted the doctrines of the Gospel for worldly purposes, while they assumed the appearance of great distinctness and piety. See PRIEST.

Sports, Sportelle, Sportla (Lat. sportula; a basket), are fees paid to the clergy for service rendered. The allusion is probably to bringing the first fruits in a basket (sporta) (Deut. xxvi. 1-12); or paying the mode of paying the clergy being traced to a Roman practice. In the days of Roman freedom, clients were in the habit of paying respect to their patron by throning his atrium at an early hour, and escorting him to places of public resort when he went abroad. As an acknowledgment of these courtesies, the clergy received some of the first fruits of the vintage, called the evening meal. After the extinction of liberty, the presence of such guests, who had now lost all political importance, was soon regarded as an irksome restraint; while, at the same time, many of the noble and wealthy were unwilling to sacrifice the display of a numerous body of retainers. Hence the practice was introduced, under the protector of the Church, of giving a public repast, or entertainment for the time of the younger Pliny, the word was commonly employed to signify a gratuity, emolument, or gift of any kind. In Cyprian, the term fratera sportulantes occurs.

Sports, Book of, was a book or declaration drawn up by bishop Morton, in the reign of king James I, to encourage recreations and sports on the Lord's day. It was to be read in churches:

'"That for his good pople's recreacyion, his majesty's pleasure was, that, after the end of divine service, they should not be disturbed, letted, or discouraged from any lawful recreations; such as dancing, either of men or women; archery for men; leaping, vaulting, or any such harsenes recreations; nor having of May-pomes, Whitsamades, or such like seruices or oother sportes therewith used, so as the same may be had in due and convenient time, without impediment or let of divine service; and that women should have liberty to carry rushes to the Church for the decoring of it, according to their old custome: withab prohibiting all unlawful games to be used on Sundays only: as humaning, bull-bating, interfudes, and at all times (in the meaner sort of people prohibited) beeding.'

Two or three restraints were annexed to the declaration, which deserve the reader's notice:

(1) "No remount (i.e. papist) was to have the benefit of this declaration; (2) nor such as were not present at the whole of divine service; nor (3) such as did not keep to their own parish churches—that is, Puritans."

This declaration was ordered to be read in all the parish churches of Lancashire, which abounded with papists; and Wilson adds that it was has been read in all the churches of England, but that archbishop Abbot, being at Croxton, failed to find it was read. In the reign of king Charles I, Archbishop Laud put the king upon republishing this declaration, which was accordingly done. The court had their balls, masquerades, and plays on the Sunday evenings; while the youth of the country were at their morrice-dances, May-games, church and clerke ales, and all such kind of reveling. The king himself had no aversion to having his say havoc among the Puritans, as it was to be read in the churches. Many poor clergymen strained their consciences in submission to their superiors. Some, after publishing it, immediately read the fourth commandment to the people, "Remember the Sabath-day to keep it holy," adding, "This is the law of God, the other the injunction of man." Some put it upon their curates, while great numbers absolutely refused to comply; the consequence of which was that several clergymen were actually suspended for not reading it.

Sportulantes (Frateria) was a term applied: the clergy because of their sharing equally in the monastic obligations.

Spot is the rendering in the A. V. of בּוּשָׂ (boša, בושא, בוש; as used forevolved), either physical (Lev. xxi. 17 sq.; xxiii. 39; xxxiv. 19, 20, etc.; 2 Sam. xiv. 27; Cant. iv. 7) or moral (Deut. xxiii. 5; Job xi. 13; xxxii. 7; Prov. ix. 7); so στόχος, literally a breaker or rock in the sea (metaphor. Jude 12) or στόχος (mark, Epph. v. 27; 2 Pet. ii. 13); кёбакір, кёбакербэх, the variegated spots of the panther, or rather the stripes of
the tiger (Jer. xiii, 23); ἠθική, brightness, the whitish "bright spot" of incipient leprosy (Lev. xii, 2–39; xiv, 56); דֶּבָּה, surf; the scaly "freckled spot" of pronounced leprosy (xiii, 39); צָלְדָּה, tali, patched (as "spotted" sheep or goats, Gen. xxx, 32 sq.; or "divers-colored" garments, Ezek. xvi, 16). See Color.

Spotswood (or Spottiswood). John, a Scottish prelate, was born in the parish of Mid-Calder, Edinburg Co., in 1635, and was graduated from the Glascow University in his sixteenth year. When eighteen years old he succeeded his father as minister of Calder; and in 1601 attended Lodowick, duke of Lenox, as chaplain in his embassy to the court of France. In 1603 James I selected him to be one of the clergy to attend him to England, and the same year he was appointed titular archbishop of Glasgow and privy-councillor for Scotland. In 1610 he presided in the assembly at Glasgow; and the same year, upon the king's command, repaired to London upon ecclesiastical affairs. While there he, with Lamb and Hamilton, was consecrated bishop, in the chapel of London House, Oct. 21. Upon their return they conveyed the episcopal powers to their former titular brethren, and the Episcopal Church was once more settled in Scotland. Spotswood was in 1615 translated to St. Andrew's, and became prince of all Scotland. He continued in high esteem with James I during his whole reign; nor was he less regarded by Charles I, whom he crowned, 1625, in the abbey church of Holyrood House. In 1635 he was made chancellor of Scotland, which post he had not held for four years when the popular confusions obliged him to retire into England. He consented at the king's request to resign the office of chancellor, and received £2500 for the sacrifice he made. He went first to Newcassel, where he remained until he gained sufficient strength to travel to London, where he no sooner arrived than he had a relapse and died, Nov. 29, 1639. He was interred in Westminster Abbey. "A more generous, learned, and munificent prelate has seldom been called to rule in the Church; and his advice was at all times given for moderate measures, and for the sacrifice of anything but principle for peace." Spotswood was the author of a History of the Church of Scotland, from A.D. 203 to the End of the Reign of James VI (Lond. 1655, fol.). He also wrote a tract in defence of the ecclesiastical establishment in Scotland, entitled Refutatio Libelli de Regimine Ecclesiae Scoticae. See Allibone, Dict. of Brit. and Amer. Authors, s. v.; Chalmers, Biog. Dict. s. v.; Hook, Eccles. Biog. s. v.; Hoefer, Nouv. Biog. Générale, s. v.

Spoudæi (Spουδαῖοι, seceders), was a name given by Eusebius (Eccles. Hist. vi, 11) and Epiphanius (Expos. Fid. p. 22) to ascetics, in reference to their diligence in fasting and prayer, and almsdeeds, etc.

Spouse (πρόνοια, kúlaith, crowned with the bridal chaplet; Cant. iv, 8; 9, 10, 11, 12; v, 1; Hos. iv, 13, 14; "bride"); Isa. xlix, 18; lx, 10; lxii, 5; Jer. ii, 32; vii, 94, etc.; Joel ii, 16; elsewhere "daughter-in-law." See Marriage.

Spout. The usual contrivance for throwing off the water from the roofs of medieval buildings was by means of a curved stone spout called a gargoyloge or gurgoyle. It is quite possible some were of lead, but none are found remaining of an earlier date than the 16th century.

Sprague, Benjamin F., a minister of the Methodist Episcopal Church, was a native of Spencer, Mass., and was converted when L. L. was a young man of age. In 1832 he united on trial with the Maine Conference, but was discontinued at the close of the year on account of ill-health. He spent several years in study, and acting as supply until 1839, when he was readmitted to conference and ordained elder. His labors were not confined to the close of the year 1839. Mr. Sprague was a man of positive character, cautious in his positions, firm and unyielding in their support. See Minutes of Annual Conferences, 1861, p. 122.

Sprague, William Buel, D.D., LL.D., an eminent Presbyterian minister, was born in Andover, Tolland Co., Conn., Oct. 16, 1795. He went to Yale College in 1811 and graduated in 1815. The year following he entered Princeton Seminary, and, after studying theology for two years, was licensed to preach by an association of ministers in the county of Tolland, convened at Andover, Aug. 29, 1818, and the next year as sole pastor. He was ordained and installed assistant pastor of the Congregational Church, West Springfield, Mass., Aug. 25, 1819. Here he labored with great assiduity and success for seven years, but was dismissed on charge July 1, 1829, having accepted a call to the Second Presbyterian Church in Albany, N.Y., where he was installed Aug. 26, 1829. At Albany he had a pastorate of forty years' duration, remarkable for the extraordinary steadiness and warmth of attachment existing throughout all that protracted period between himself and his large and intelligent congregation; and even more remarkable for the vast and varied labors performed by him. He has been well and truly described as an "illustrious man; a cultivated, elegant, voluminous, useful, and popular preacher; an indefatigable and successful pastor; an unselfish and devoted friend; loving, genial, pure, and noble; an Israelite, indeed, in whom there was no guile; one of the most childlike, unsophisticated, and charitable of men." While he never relaxed his pulpit and pastoral duties, his added literary labors were prodigious, and their fruits exceedingly great. He preached nearly two hundred sermons on special occasions, the most of which were published. He also produced a large number of biographies and other volumes on practical religious subjects. But the great literary work of his life was his Amens of the American Pulpit, undertaken when he was fifty-seven, and finished in seventeen years. It was a herculean task, but it was nobly accomplished, and by it he has placed all denominations represented in it under great obligations for the faithful manner in which it is executed. (See below.) To this comprehensive work we have been largely indebted in the compilation of this Cyclopedia. Dr. Sprague's extensive travels in Europe brought him into delightful association with many of the dignitaries of the Old World, and many eminent personages in religious and literary circles. He was on terms of intimacy and correspondence with a vast number of distinguished men, both in the Church and in the State, in our own land. At the age of seventy-four, on Dec. 20, 1869, he was released by the Presbytery of Albany, at his own request, from the pastoral charge of the Second Church in Albany, and retired to Flushing, L. I., where he passed his later years, which were a beautiful and serene evening to his industrious, laborious, and useful life. Here he enjoyed the sunshine of the divine favor, and looked on death's approaches with a strong and placid faith. No sore disease or fierce pains oppressed him, but gently and peacefully he passed away, May 7, 1876. Dr. Sprague's writings are as follows: Letters on Practical Subjects to a Daughter (1822, 12mo; 11th ed. of 1852).
Spreng, Jacques, a Flemish theologian, was born at Ypres about 1485 of parents in ordinary circumstances, who early devoted him to a religious life, and he accordingly set out as an Augustinian monk on a pilgrimage, which at length led him to Erfurt, and there he embraced Luther's views. He afterwards returned to his monasteries and became the author of a convent in Antwerp (hence his surname Prepositus). He was imprisoned for his faith, first at Brussel, and afterwards at Bruges (1522); but was rescued by a fellow- Franciscan, and escaped into Germany. On the recommendation of Henry of Zutphen, he was appointed pastor of Notre Dame at Bremen in 1554, and filled that position till his death, Jan. 30, 1562. In 1585 he assisted at a Freemasons' congress held in Cologne.

Sprenger, Jacob, a Dominican monk of Cologne, provincial of his order (A.D. 1495), and one of the two inquisitors-general appointed by Innocent VIII (1484) for the destruction of witches, which he declared were overrunning Germany. From confessions extorted on supplicatory rack of the rack of torture, he formed the most of a convent in Antwerp (hence his surname Prepositus). He was imprisoned for his faith, first at Brussel, and afterwards at Bruges (1522); but was rescued by a fellow- Franciscan, and escaped into Germany. On the recommendation of Henry of Zutphen, he was appointed pastor of Notre Dame at Bremen in 1554, and filled that position till his death, Jan. 30, 1562.

Sprig (Hindi, Urdu, Polišek, Evzek, xxii, 6, a branch, as elsewhere rendered; 2137, salsal, a shoot of a vine, Isa. xviii, 5).

Spriggs, Joseph, a minister of the Methodist Episcopal Church, South, was born in Lancaster County, Va., July 6, 1804, and united with the Church in 1824. He was licensed to preach in January, 1829, and was admitted into the Baltimore Conference in March of the same year. He was ordained deacon in 1830, and elder in 1832. When the Methodist Episcopal Church divided in 1844, he adhered to the Southern branch, and was admitted into the Virginia Conference. In 1869 he took a very prominent part in the relations between the two conferences, which were of the utmost importance in the restoration of the work of the ministry. He died at Yorktown, Va., Oct. 20, 1870, at the age of 66.

Spring. See Fountain; Season.
probation of God. He heard the recitations of the upper classes in Latin and Greek. Too severe application to study affected his health, and he was obliged to desist for a time. When his health was restored he re-entered Yale College and continued the course, graduating in 1863. In the fall of that year, Dr. Springer, then a secondary student, occurred in the college, and many of the students were the subjects of renewing grace. He was not brought under its influence to any great extent, and was so far from entertaining thoughts of the ministry that he determined on entering the legal profession. He according to his prophecy made his money feeling; and the success of the Garveys, in buying and selling Coke, Littleton, and Blackstone. Being reduced in finances to four dollars, he wrote to Mr. Moses Brown, a gentleman of great wealth in Newburyport, and one of the founders of Andover Seminary, who sent him a blank check to be filled at his discretion. Thus furnished, he went to Bermuda as teacher of the classics and mathematics. While there, in reply to a serious letter from his father, he wrote an analysis of his religious experience, stating that he was "vibrating between heaven and hell." Disgusted with the island, he returned home, and not long afterwards married, and returned to New Haven; but finding no opening for his law studies, he returned to Cambridge, and remained there more than a year at the head of a flourishing school. He was induced to leave from apprehensions of war between England and the United States. He had saved $8500, and was in somewhat easy circumstances. Continuing the study of the law, he passed a satisfactory examination, and was admitted to the bar at New Haven in December, 1880, and on April 24 succeeding he united with the Church under the pastorate of the Rev. Moses Stuart. At the Yale commencement he took his degree of A.M., and delivered an oration on "The Christian Patriot." On that day the Rev. John M. Mason preached his great sermon from the text "I saw the poor man flourishing," under which Mr. Springer was so deeply impressed that he formed the purpose of preaching that Gospel. Through the kindness of a lady who furnished the means, he was enabled to enter Andover Theological Seminary. Before leaving that institution, he received a call from the South Parish, and another from Park Street, Boston. On visiting New York, he preached for Dr. Romeyn in Cedar Street. He was then on his way to the General Assembly, which met in Philadelphia, and on his return he received a unanimous call from the Brick Church, New York, which he accepted, entering at once upon his duties. He was ordained and continued pastor of a united and powerful Church until old age and feebleness obliged him to retire from its active duties, but he was retained as pastor emeritus until the day of his death, Aug. 18, 1873. The sphere of Dr. Springer's labors covered a wide space both in the pulpit and in the press, and few men in any profession have made a more enduring mark upon the age. His reading, especially in the department of theology, was extensive. He was a Calvinist of the strongest type. He was decidedly opposed to what he called "spurious revivals," and to all sensational devices of evangelists. He was early identified with the cause of missions, and was connected with the organization of the American Bible Society through his father. He entered heartily into the discussion of the managers with the Baptists, and also into the discussions in regard to opening the meetings of the board with prayer. He was identified with the Sabbath-reform movement, and at the breaking-out of the Rebellion showed his loyalty and patriotism in his prayers and sermons and public addresses. Dr. Springer was the author of several works, among which are, The Bible Not of Man: — Obligations of the World to the Bible; and others, for which see Allibone, Dict. of Brit. and Amer. Authors, s. v. (W.P.S.)

Spring Samuel, Sen., D.D., a Congregational minister, was born at Northbridge, Mass., Feb. 27, 1746. He graduated at the College of New Jersey in 1771; was licensed to preach in 1774, and in the following year joined the army as chaplain, and marched under Col. Arnold in the disastrous expedition to Canada. In 1776 he left the army; and in 1777 was ordained over the Church at Northbridge, where he continued pastor until his death, March 4, 1819. Dr. Springer was a primary agent in establishing Andover Theological Seminary. His personal appearance, says Dr. Woods, "was marked with nobleness; his countenance was indicative of lofty intelligence and ancient, benevolent expression." He was a warm-hearted, good-natured, "Father of Peace," "Father of Christianity," and "Father of the Church at East Hampton." He had a very modest estimate of his scriptural and mental attainments. As a preacher, Dr. Springer was able and frequently eloquent. He published two Sermons in the American Preacher, vol. iv (1789)—A Letter addressed to the Rev. Solomon Aiken on the Subject of Two Fast-day Sermons (1809); and a number of occasional Sermons. See Sprague, Annals of the Amer. Pulpit, ii, 85.

Springer, Samuel, Jun., D.D., a Congregational minister, son of the preceding, was born at Newburyport, Mass., March 9, 1792. He received his preparatory education at Exeter Academy, entered Yale College, and was graduated therefrom in 1811. After his graduation he engaged in the trade and shipping business, and continued therein until 1819, when, feeling it his duty to prepare for the ministry of the gospel, he entered Andover Theological Seminary, and took the full course. He was ordained and installed pastor of the Church at Abington, Mass., Jan. 2, 1822, and remained until December, 1828, when he resigned. He was next installed over the North Church, Hartford, Conn., where he remained six years, and in 1833 installed over the Church at East Hartford, where he remained twenty-eight years. He finally became chaplain of the Insane Asylum, Hartford, and continued at that post seven years. He was director of the Connecticut Bible Society, and trustee of the Theological Institute of Connecticut. He died at Hartford, Dec. 18, 1877. (W.P.S.)

Springer, Elihu, a Methodist Episcopal minister, was born in Bond County, Ill., July 21, 1811. He was the subject of religious impression at an early age; united with the Methodist Episcopal Church in 1824; entered the Rock Spring Seminary, St. Clair Co., Ill., in 1827; was licensed as an exhorter May 29, 1832; received by the Illinois Conference on trial in September, 1838, and appointed to Carlinville Circuit, Sangamon district. The following were his subsequent appointments: in 1838, 1839, 1840, and 1842, Oplin; in 1843, 1844, and 1845, located, owing to feeble health; 1838, Somonauk Circuit; 1839, Bristol Circuit; 1840, ordained elder and reappointed to Bristol; 1841, Lockport; 1842, Joliet; 1843-44, St. Charles; 1845, Mineral Point; 1846, Hazle Green Circuit; 1847-50, presiding elder of Milwaukee district, Wisconsin Conference, where he died. Aug. 22, 1850. Mr. Springer was a man of strong intellectual development, well versed in theological subjects, and an able exponent of the truth. See Minutes of Annual Conference, iv, 611. (J. L. S.)

Springer, John M., a minister of the Methodist Episcopal Church, was born at Petersburg, Ill., Jan. 13, 1837. He was converted at the age of sixteen, but, fearful of the toils and sacrifices of the ministry, fell back, and eventually became an ardent worker, yielding to the influences of the Holy Spirit, and joined the Church Sept. 6. He was licensed to preach April 17, 1858, and admitted into the West Wisconsin Conference on the 29th of the same month. Being drafted into the army, he was appointed chaplain of the Third Regiment of Wisconsin Volunteer Cavalry, Feb. 25, 1863. Wounded in the battle of Resaca, Ga., May 15 of that year, and died on the 28th. See Minutes of Annual Conference, 1864, p. 186.

Springer, Moses, a minister of the Methodist
Episcopal Church, was converted in his eighteenth year, and in 1840 was admitted into full connection in the Maine hierarchy. He immediately located to take charge of the Maine Wesleyan Journal, which he continued to edit until it was united with the Zion's Herald. In 1859 he was admitted into the Minnesota Conference, and placed in a superannuated relation, which he sustained until his death, at Winchendon, Mass., Dec. 21, 1865. Mr. Sprague was a man of no great faith, but also of superannuated, and devoted to scientific studies, the last years of his life being spent in the National Observatory, Washington, D. C. See Minutes of Annual Conferences, 1866, p. 212.

Springers, the jumping sect among the Ingrais (a tribe belonging to the Tchadric branch of the Finns), which traces its origin to 1813. Proceeding from a religious excitement independent of the Church, they came to the conviction that every individual required the direct illumination of the Holy Spirit in order to his salvation. They also soon believed that they enjoyed this illumination, and ecstatic praying, singing, and crying, connected with clapping of hands and jumping at their meetings, gave evidence of being possessed by the Holy Ghost. The current illuminations, so-called, as compared with the relative also a special holiness, and this was sought not only in despising marriage, but also in abstaining from meat, beer, brandy, and tobacco. He who applied for admission into the sect was required to prove, nuda super nudum, before the eyes of the meeting that the old Apostles had displayed the same in him. The "holy love" which they placed in the stead of marriage also led here, as ever, to fleshly errors, and this was the reason why many of them, after the example of the Skopzi (q. v.), with whom they were probably connected, chose the much more certain means of contraception. Authors and chiefs of the sect were named, and were said to have been present at meetings, but the civil authorities were not able to get hold of them. The sect is now near its end. See Kurutz, Church History, ii, 406.

Springing, or Springer, the impast or point at which an arch unites with its support. The bottom stone of an arch, which lies immediately upon the impast, is sometimes called a springer or springing-stone. Also the bottom stone of the coping of a gable. See SKEW; VOUSSOIR.

Sprinkler. See ASPERGILLUM.

Sprinkling, as a form of baptism, took place immediately after a few centuries in the early Church, not from any established rule, but by common consent, and it has since been very generally practiced in all but the Greek and Baptist churches, which insist upon immersion. In its defense the following considerations are offered: (1) The primary signification of the word "baptize" (baptizo) cannot be of great importance, inasmuch as the rite itself is typical, and therefore derives its moment not from the literal import of the term, but from the significance and design of the ordinance. (2) Although no instance of sprinkling is expressly mentioned in the New Test., yet there are several occasions on which immersion was possible (Acts ii, 41; x, 47, 48; xvi, 33). (3) In cases of emergency, baptism by aspersio was allowed at a period of high antiquity, especially in the case of sick persons. See CLINIC BAPTISM. This form was also admitted when the baptismal font was too small for immersion, and generally, whenever considerations of convenience, health, or climate required (Walfred Strabo, De Rebus Eccles. c. 26; Gerhard, Loc. Theol, ix, 146). Aspersio did not become common in the Western or Latin Church until the 13th century, although it appears to have been introduced much earlier (Aquinas, Summa, quest. 66, art. 7). See Coleman, Christ. Antig. p. 270 sqq. See BAPTISM.

Sprout, James, D.D., a Presbyterian divine, was born at Scituate, Mass., April 11, 1722. He graduated at Yale College in 1741; was converted while in college; and having gone through the requisite course of preparation for the ministry, was licensed to preach, and ordained pastor of the Fourth Congregational Church in Guilford, Conn., Aug. 28, 1748. Here he labored with great zeal and success for about twenty-five years, when, in October, 1778, he became pastor of the church in Philadelphia of which Rev. Gilbert Tennent had been pastor. He continued sole pastor till 1787, when he was relieved from a portion of his labors by the settlement of Mr. (afterwards Dr.) Ashbel Green. In 1780 the College of New Jersey conferred upon him the degree of D.D. The year 1793 was signalized by the prevalence of yellow fever in Philadelphia to an appalling extent. The family of Dr. Sprout was almost annihilated by it; his own death took place on the 18th of November of the same year. He was a man of the learned languages, and had made deep researches into systematic, casuistic, and polemic divinity. In his personal religion he was truly eminent—his faith was built on the sure foundations of the Gospel, and it supported him in the most trying hour. In his last months he said, "All my expectations rest on the infinite grace of God, abounding through the finished righteousness of the Lord Jesus Christ." His only publication was a Sermon, preached on the death of Whitefield in October, 1770. See Sprague, Annals of the Amer. Pulpit, iii, 125; Allen, Biog. Dict. s. v.; Mass. Hist. Coll.; Assembly Miss. Mag. L. (J. L. S.)

Spry, William, a Methodist Episcopal minister, was born at York, Me., Feb. 25, 1806. He was converted in 1822; admitted on trial in the Philadelphia Conference in 1822, and appointed to Cecil Circuit; 1833, Salisbury Circuit; 1834, Elkon; 1835, on account of ill-health, supernumerary; 1836, Caroline Circuit; 1837-38, Dorchester Circuit; 1839-40, Lewiston; 1841, Easton, Talbot Co., Md.; and subsequently to Newburg, Brandywine, Seaford, Georgetown, and Accomack circuits, on the last of which he died, Nov. 29, 1847. Mr. Spry was an excellent preacher and a model pastor. He was one of the sweetest singers in Israel. See Minutes of Annual Conferences, iv, 204; Manship, Thirty Years in the Itineracy, p. 14-15.

Sprung. See Spring.

Spruckle, among the early Scots and Picts, was the name of a class of teasing spirits who appeared in the form of greas fistes, and led wanderers astray into swamps and moras.

Spur-money, a name for a fine levied by custom, on behalf of the choristers of certain old foundations (St. Paul's, Westminster, Lichfield, and Windsor), on persons entering the Church.

Spurstowe, William, a Nonconformist divine, was educated at St. Katharine Hall, Cambridge, of which he became a fellow. He was minister at Hampden, in Buckinghamshire, when the Rebellion broke out. He joined the rebel army as chaplain, and in 1649 became a member of the so-called Assembly of Divines, becoming at the same time pastor of Hackney. He was made master of St. Katharine Hall, but was turned out for refusing the engagement. He was obliged to give place to an orthodox clergyman at Hackney in 1662, and died in 1666. He was the author of a Treatise on the Promises:—The Spiritual Chemist:—The Wise of Sodom:—A Discourse:—and Sermons. He was also engaged in the attack on episcopacy under the name of Sinecymus. See Allibone, Dict. of Brit. and Amer. Authors, s. v.; Hook, Eccles. Biog. s. v.

Spy-Wednesday, an old name for the Wednesday in Holy Week, so called because of the work which Judas Iscariot carried on upon that day when he went forth to make preparation for the betrayal of his Master.

Squarcione, Francesco, an Italian painter, was born at Padua in 1394, and, after performing many
SQUARER

969

SQUINCH

tours in Greece and Italy, lived in the latter country in great affluence and distinction until his death, in 1474. From his very numerous school (he had one hundred and thirty-seven scholars), he was called the father and primo maestro of painters. The celebrated illustrated Books of Hours in the Church of the Minfericosa, which used to be commonly ascribed to Mantegna, is now by competent judges considered one of the commissions of Squarcione executed by his scholars.

Squar (32")

Squash

Squash, a fourth part, as often rendered, a side (as elsewhere), especially of a rectangle (Ezek. xiii, 16, 17). See SCULPTURE.

Squash Cap, a cap worn in England by Church clerks, the use of which began in the 15th century.

Squamation, one of the three kinds of tortoise commonly used by the Inquisition to extort confession. It consisted in tying back the arms of the victim by a cord, fastening weights to his feet, and drawing him up to the full height of the place by means of a pulley. He was then suddenly let down to within a short distance of the floor, and by the repeated shocks all his joints were dislocated. This torture was continued for an hour or longer, according to the pleasure of the inquisitors present and to what the strength of the sufferer seemed capable of enduring. See Barnum, Romanism as it is, p. 368.

Squier, Miles Powell, D.D., an eminent Presbyterian divine and educator, was born in Cornwall, VI, May 4, 1792. The family was of English origin, settling in Connecticut in the days of the Pilgrim fathers. He was trained with assiduous care, and at fourteen entered the academy at Middlebury, VI, where he pursued his classical studies; graduated with honor at Middlebury College in 1803, and at Theological Seminary, Mass., in 1814; was licensed to preach the same year, and immediately began his labors as a supply to the Congregational Church, Oxford, Mass.; thence he removed to Vergennes, Vt., where he remained till the spring of 1815, when he accepted an appointment of missionary to the western part of New York State. He was ordained May 3, 1816, by the Geneva Presbytery as pastor of the First Presbyterian Church in Buffalo, N.Y., which relation existed till 1824. In 1817 he was a commissioner to the General Assembly of the Presbyterian Church which met in Philadelphia; in 1825, after closing his pastorate in Buffalo, he spent a short time in agricultural pursuits for the benefit of his health; in 1826 he accepted the secretarieship of the Western agency of the American Home Missionary Society at Geneva, N.Y., in which work he spent eight years; in 1833 he was occupied in superintending the affairs of the Geneva Lyceum, which he had founded at the same time supplying the churches at Janius, Newark, Castleton, and West Fayette, N.Y., and in the winter of 1839-40 the Southwark Presbyterian Church in Philadelphia. In 1845 he was induced to visit Beloit, Wis., where it was proposed to establish a college, and he resolved to identify himself with it. In 1846 the charter was obtained, in 1847 the corner-stone was laid, and in 1849 he was elected professor of intellectual and moral philosophy, entering upon his duties in 1851. The subjects of his lectures at Beloit College were as follows: The Truth of Religion: — The Method and the Acquisition of Knowledge: — Mental and Moral Habits: — The Value of a Philosophical Mind: — The Value of Moral Sciences: — The Generic Properties of Mind: — Philosophy and its Uses: — and Elements of Moral Science. In August, 1861, he went to Europe to attend the Evangelical Alliance in Switzerland, and while abroad he received the attention due his high position as an eminent educator. He lectured in the college during the winter in 1862-3. For the reason of declining health he made arrangements for a successor, he retaining a place in the catalogue as emeritus pro-

and those offered on certain days of every month. 2. Occasional, as those for a recently deceased relative, or on various domestic occasions, as the birth of a son, etc. 3. Voluntary, performed for a special object, such as the hope of religious merit, etc. The propriety and the observance of the Masses collectively are the dark fortnight (or period of the moon's wane), the day of the new moon, the summer and winter solstices, eclipses, etc. The presentation of the ball of food to the deceased and to his progenitors in both lives is the office of the nearest male relative, and is the test and title of his claim to the inheritance.

Sramanas (Sanskrit svami, performances of asceticism), a name given to the priests of Budha, who are monks as to their mode of living, but priests as to the world without. Their vows are in no case irrevocable. They seek their food by carrying the alms-bowl from door to door, and their chief employment is teaching the novices, or writing books upon the leaf of the talipot. See Hardy, Eastern Monachism.

Savakara or Srawakara (Sanscrit aru, to hear), a name of the disciples of Buddha, who, through the hearing of his doctrine and by practicing the four great Buddhistic truths, attained to the qualification of an Arhat, or Buddhist saint. From amongst the disciples eight are seen to be Mahamaharjas, or the great Srawakas. The Srawakas are entitled to the predicate Ayushmat, or one possessed of long life. This name is also given among the Nepalese to one of the four orders into which their priests are divided. See Hardy, Eastern Monachism.

Sriamsa, in Hindú mythology, is the lord of the vahiceros, which is his symbol; one of the twenty-four Budhas recognized by the Jains. He was a son of Vishnu and Vishna (the name given by them to Lakshmi, Vishnu’s consort).

Sripada, the name given to the worship of the impressions of Gotama’s foot. The legend is that on the third visit of the sage to Ceylon, in the eighth year after he obtained the Budhaship, he left an impression of his foot on the summit of the mountain usually known by the name of Adam’s Peak, 7420 feet above the sea, intended as a seal to declare that Lankā would be the inheritance of Budha. In the same journey he left other impressions of a similar kind in different parts of India. The footprint is said to be a superficial hollow five feet long and three-quarters of a foot wide; between two feet seven inches and two feet five inches wide. The summit of the peak is annually visited by great numbers. See Hardy, Eastern Monachism, p. 227.

Srudasaen, Srudaggiri, and Srudavarmen, in Hindú mythology, are three of the five sons born of Dronaveli, the wife of the five Pandus, to her husbands. The others were named Pridyudagen and Sruddagyan.

Seafarino Kagami, in Japanese mythology, is the mirror of knowledge which is placed before the prince of hell, and which serves to reveal to him in their true character all the sins of the persons who come into his presence.

Sangjai is the name of Buddha in Thibet, where the highest veneration is accorded him as the ruler of the present world-period. Three other Budhas have preceded Sangjai, and nine hundred and ninety-six are yet to follow. See BUDDHISM: LAMAISS, THIBET.

Soadadani, in Hindú mythology, is a king of Magadha, the middle kingdom of India and the principal scene of all its myths. Soadadani was married to Maha-maya, the virgin wife who was chosen by Sakyanuni, that, after he had entered her womb as a five-colored ray, he might be born of her, and who accordingly gave birth to the Buddha in the grove of Lombar through her right armpit. See BUDDHA.

Stabat Mater, or, better, the Mater Dolorosa, to distinguish it from the Mater Speciosa (q.v.), is the celebrated Passion hymn of Jacopone da Benedictis. Its proper name is Planetas Beatae Virginis, or Sequentia de Septem Dolubus B. Virginis, or De Conpasionis Beatae Virginis. This hymn has been endowed by universal consent as the most pathetic and touching of Latin Church lyrics, and inferior only to the Dies Irae (q.v.), which stands alone in its glory and overpowering effect. It was spread all over Europe by the Flagellants, or Brethren of the Cross (Cruciferares), and Cross-bearers (Cruciferos), “peinnitus which, in the 13th, 14th, and 15th centuries, went about in procession day and night, travelling everywhere, naked to the waist, with heads covered with a white cap or hood (whence they received, likewise, the appellation of Dealbatores), singing penitential psalms, and whipping themselves until the blood flowed. By their means it was that the knowledge of this hymn was first carried to almost every country in Europe.” Once sung in penitential processions, it gradually found a place in almost every breviary or missal. For “it breathes the spirit of profound repentance and glowing love, such as can be kindled only by long and intense contemplation of the mystery of the cross—the most amazing and affecting spectacle ever presented to the gaze of heaven and earth. The agony of Mary at the cross, and the sword which then pierced through her soul, according to the prophecy of Simon (Luke ii, 35), never found a more perfect expression. It surpasses in effect the Mater-Dolorosa of the greatest painters.” The key-note of the hymn is contained in the first two lines, and is suggested by the brief but pregnant sentence of John as found in the Latin version, “Stabat mater misera ejus” (xix, 25), which has given rise to some of the most magnificent works of art.

I. Text—In its received form it reads as follows:

Stabat mater dolorosa
Juixta crucem laceramos,
Dum pendentibus pectora
Cujus animam gementem,
Contristat ac dolorem,
Pertransiret gladius.

O quam tristis et afflicta
Pulchra illa benedicta
Mater unigenita
Quae mercebat et dolceb
Et tremebat, cuni videb
Nati ponne inclyt!

Quis est homo qui non fieret
Matrem Christi a sideret
In tanto supplicieta
Quis non posset contristari,
Piam matrem contemplari,
Dolentem cum Filio

Pro peccatis suae gentis
Vidit Jesum in tormentis
Et flagellum subditum
Vidit Numen dulci Nam
Morientem, et desolatum,
Dum emisit spiritum.

Pla mater, fons amoris
Me sentire vis doloris
Fac, ut tecum iaque
Fac ut ardeat cor meum
In amando Christum Deum,
Ut sibi complaciam.

Sancta mater, istud agas,
Crucifixi fide pingua
Cuius munere valde,
Tu Nam vulneri,
Tarn dignati pro me pati
Pennis mune dividere.

Fac me vere tecum fere,
Crucifixo condoleare,
Donee ego vixer

Fac me vere tecum stare,
Meque tibi societate
In planctu desidero.

Various readings: *qua; 2 contristationem; 2 dum; 5 Christi matrem; 1 morubulo; *ea; **piecer; 2 tecum vere, recum pie; **et me tibi societare, ut te liberare, ut tibi me societare.
STABAT MATER

Virgo virginum preclara,
Mili tam non els amara,
Fac tenebras plangere;
Fac ut portem Christi mortam,
Passionis fac consortem,
Et nisi restituo recolere.

Fac me plagis vulnerari,
Cruci hac inebriari,
Ob ameniti Filii,
Infamatus est accensus,
Per te, Virgo, sim defensus,
In die judicii.

Fac me cruce custodi,
Necte Christi premuniri,
Confovera gratia.
Quando corpus morietur,
Et alia utime donetur,
Paradisi gloria.**

II. Authorship.—In the case of this hymn, as in that of the Dies Irae, it has been a matter of dispute who was the writer. The Stabat Mater has been variously ascribed to pope Innocent III, but without any proof; for though Ebert (in the Allgemeinen bibliographischen Lexi-
con, 1874) mentions this fact, yet he rejects the opinion as to the authorship of Innocent. The Florentine histori-
an Antonius tells us that, according to some, one of the Gregories was the author of the hymn; but we are not told whether it was Gregory IX, X, or XI. The Geno-
ese chancellor and historian Georgius Stella ascribes the hymn to pope John XXII (1316-1334), an opinion adopted by his successor Georgius Ignatius and Johann Georg Müller. Others have referred its paternity, contrary to all probability, to St. Bernard. Dismiss-
ing all these as conjectures unsupported by proof, it is now generally conceded, on the authority of Luke Wadding, the Irish historian of the Franciscan Order, and himself one of the number, that the author of this hymn is Giacomo da Todi, better known as Giacopone, or Jacopone. His proper name was Jacobus de Bene-
dictis, or Giacomo de' Benedetti, he being a descendant of the noble family of the Benedettis of Todi (Tuder, Tu-
dertum; hence he is also called Jacoponus Tuderintius, in Umbria, Italy. He successfully studied and prac-
ticed law; but was converted in consequence of the sud-
den death of his wife in a theatre, sold his goods for the benefit of the poor, and united himself to the Order of the Franciscans. This Order, founded by St. Francis of Assisi, was in the fervor of its first love, and carried away with the spirit of noblest enthusiasm for youth.

Its ruling idea and aim was the literal imitation of the poor and humble life of Christ. St. Francis died of the wounds of Christ, which are said to have impressed themselves on his hands and side through the plastic power of an imagination drunk with the contemplation and the practice of asceticism. Animated by the same spirit, Giacopone went to fanatic extremes in his zeal for ascetic holiness and spiritual martyrdom. He endeavored to stone, by self-sought tortures, for his own sins, and "to fill up that which is behind in the affictions of Christ," for the good of others. He was sub-
ject, as Wadding expressly states, to fits of insanity, leading him at one time to enter the public market-
place naked, with a saddle on his back and a bridle in his mouth, walking on all fours like a horse; and at an-
other, after anointing himself with oil and rolling him-
self in feathers of various colors, to make his appearance suddenly, in this unseemly and hideous guise, in the midst of a gay assembly gathered together at the house of his brother on the occasion of his daughter's mar-
rriage; and this, too, in disregard of previous precautionary entreaties of friends who, apprehensive, it seems, at the time they invited him, that he might be guilty of some crazy and irrational action, and begged him not to do anything to disturb the wedding festivities, but to behave as an ordinary citizen. "He was called Giac-
ycopone, or the Great Jacob, at first in derision, perhaps,
also, to distinguish him from the many Jacobs among the Franciscans. For the syllabic suffix one in Italian indicates greatness or elevation; as alberone, great tree, from albero, tree; portone, great door, from porta, door; salone, from sala, saloon" (Schaaff. For ten years he carried on these ascetic excesses; and when at the end of this time he desired to be received by the Minorites, and they hesitated on account of his reputed insanity, their scruples were overcome by reading his work On Contempt of the World, conceiving that it was impossible that an insane man could write so excellent a book. As a Minorite he was not willing to become a priest, but only a lay-brother. "Very severe against himself he was," says Wadding, "always full of desire to imitate Christ and suffer for him. In an ecstasy he imagined, as in a vision, that he saw him with his bodily eyes, and often he was seen sighing, sometimes weeping, sometimes singing, sometimes embracing trees, and claiming, 'O sweet Jesus! O gracious Jesus! O beloved Je-
sus!' Often he conversed with his Saviour, who call-
ed him dearest Jacob. Once when weeping loudly, on being asked the cause, he answered, 'Because Love is not loved.' That Jacopone was in deep earnest with his ascetic life is beyond all doubt. For determining the genuineness of love he gives these searching tests: "Al-
though I cannot know positively that I love, yet I have some good marks of it. Among others it is a sign of love to the history of good and evil. If the Lord does not and he does it not, and I love him, notwithstanding, more than before. If he does contrary to that which I seek for in my prayer, and I love him twofold more than before, it is a sign of right love. Of love to my neighbor I have this sign, namely, that when he injures me I love him not less than before. Did I love him less, it would prove that I had loved not him previously, but myself." On the subjugation of the senses he allegorizes in this wise: "A very beautiful virgin had five brothers, and all were very poor; and the virgin had a precious jewel of great worth. One of her brethren was a guitar-player, the second a painter, the third a cook, the fourth a space-dealer, the fifth a pimp; each desired the jewel. The first was willing to play, and so on; but she said, What shall I do when the music has ceased? In short, she remained firm and kept the jewel. At last a great king came, who was willing to make her his bride and give her estate out of his heart. She went to the virgin. She replied: How can I, O my beloved, to such grace refuse the stone? and so she gave it to him. It is plain that by the five brethren are meant the five senses; by the virgin, the soul; and by the precious jewel, the will. With such severe principles and severer ascetic life, Ja-
copone could not but be consumed in the corrup-
tions of his time in general, and especially the licentious manners, wickedness, and debaucheries of the priesthood, and the deeply sunken condition of the Church. He was especially severe on pope Boniface VIII, who pun-
ished him by excommunication and hard imprisonment.
Boniface, one day passing the cell where Jacopone was, asked mockingly, 'When will you come out?' He an-
swered, 'When you come in.' After the death of this bad pope, in 1303, Jacopone was set free, and closed his earthly pilgrimage at an advanced age, Dec. 25, 1306, and was buried at Todi. 'He died," says Wadding, "like a swan, having composed several hymns just be-
fore his death.' The inscription on his grave tells the story of his life:

"Ossa B. Jacoponl de Benedictis
Tudertini, Fr. Ordinis Minorum
Nove proprie Christum
Nova Mundum arte deinait.
Bt Celem rapuit.
In Domino
Die xxv Decembris, Anno MCCULXXXVI.

The year 1296 is not correct; hence Wadding calls this date a crassus error.

The Mater Dolorosa has furnished the text to some of the noblest musical compositions by Palestrina, Pergo-

Various readings: * jac; * parnem; * pliae to recolare; * cruce fac me have heart; * ier crucere; * famina urar ne (me urat) succenum; * gratia;
STABAT MATER

Iesi, Astorga, Haydn, Bellini, Rossini, Neukomm. That of Palestina is still annually performed in the Sienna Chapels during the Passion week. That of Pergolesi, the last and most celebrated of his works, has never been surpassed, if equalled, in the estimation of critics of Pergolesi’s compositions. Tieck, in his Phantastia (ed. 1812, ii, 384 sq.), expresses himself in the following manner: “The loveliness of sorrow in the depth of pain, this smiling in pain, this chivalric tenderness which touches the highest heaven, had to me never before risen so bright in the soul; I had to turn away to conceal my tears, especially at the place ‘Vidit suum dulcem Natum.’ How significant that the Amen, after all is concluded, still sounds and plays in itself, and, in tender emotion, can find no end, as if it were afraid to dry up the tears and would still fill itself with sobbing! The hymn itself is touching and profoundly penetrating. Surely the poet sang these rhymes, ‘Quem morebat et dolore musivadet, with a moved mind.’ It is a tradition that the great impression which the Stabat Mater of the young artist (Pergolesi) made on its first performance inflamed another musician with such furious envy that he stabbed the young man as he left the church. This tradition was long disproved; but as Pergolesi died at an early age, it may, as some one remarks, be permitted to the poet to refer to this story, and allow him to fall as a victim of his art and inspiration.

III. Translations.—Like the Dies Irae this hymn has challenged and defied the skill of the best translators and imitators. Thus Lisco mentions about eighty German translations and four Dutch. The earliest German translation is that by Herman of Salzburg (Moriae sternal in seculum spectat). Of other translators we mention L. Tieck, de la Motte Fouqué, A. L. Follen, Wessenberg, Daniel, Lisco, Königsfeld, A. Knapp, etc. Of English translations we mention that of E. Caswall, in Hymns and Poems, “At the cross her station keeping,” that of lord Lindsay, in The Seven Great Hymns of the Medieval Church (N. Y. 1860), p. 98:

“By the cross and vigil keeping, Stood the mournful mother weeping, While on it the Saviour hung.”

By Mant, in Ancient Hymns, p. 96:

“By the cross and vigil keeping, Stood the mother, doleful, weeping, Where her Sun extended hung.”

By Benedict, in Hymns of Hildegard, p. 65:

“WEEPING stood his mother, sighing By the cross where Jesus, dying, Hung aloft on Calvary.”

But the best translation is undoubtedly that of Dr. Coles, of Newark, N. J., which runs thus:

“Stood th’ afflicted mother weeping, Near the cross her station keeping, Where she hung her Son and Lord; Through whose spirit sympathizing, Sorrows and agonizing, Also the cruel sword passed.”

“OH! how mournful and distressed Was that favored and most blessed Mother of the Only Son! Trembling, grieving, bosom heaving, While perceiving, scarce believing, Pains of that Illustrious One.

Who the man who, called a brother, Would not weep saw he Christ’s mother In such deep distresses and wild? Who could not and tribute render Witnessing that mournful sight, Agonizing with her Child?

For his people’s sins atoning, Him she saw in torment groaning, Given to the scourge’s rod; Near her darling lying dying, Desolate, forsaken, crying, Yield his spirit up to God.”

STABAT MATER SPECIOSA

“Make me feel the sorrow’s power, That with thee I may bear it too, Tender mother, fount of love! Make my heart with love unceasing Beat for my Lord, the Christ, that pleasing I may be to him above.

Holy mother, this be granted, That the slain One’s wounds be planted Firmly in my heart to abide, Of him wounded, all astounded— Depths unbounded for me sounded, All the pens with me divide.

Make me weep with thee in union With the Cruel’d communion In his grief and suffering give Near the cross with tears falling I would join thee in thy wailing Here as long as I shall live.

Maid of maidens, all excellling! Be not bitter, me repelling, Make thou me a mourner too; Make me bear about Christ’s dying, Share his passion, shame defying, All his wounds in me renew.

Wound for wound be there created; With the cross intoxicated For thy Son’s dear sake, I pray May I be with pure affection, Virgin, have through thee protection In the solemn judgment-day.

Let me by the cross be warded, By the death of Christ be girded, Nourished by divine supplies, When the body death hath riven, Grant that to the soul be given Glories bright of Paradise.”

IV. Criticism.—As to the character of this hymn, Dr. Coles says: “No admiration of the lyric excellence of the Stabat Mater should be allowed to blind the reader to those objectionable features which must always suffice, as they have hitherto done, to exclude it from every hymnary of Protestant Christendom. For not only is Marking one of the objects of religious worship, but the incommunicable attributes of the Deity are freely ascribed to her. Her agency is invoked as if she were the third person of the Trinity, or had powers co-ordinate and equal. Plainly it is the province of the Holy Ghost, and not of any creature, to ‘work in us to will and to do;’ to effect spiritual changes; to ‘take of the things of Christ and show them unto us;’ and yet these are the very things which she herself is asked to accomplish for the suppliant.” True as this is, yet the remark of Dr. Schaff is worthy of consideration: “But we should make allowance for the irresistible influence of the spirit of the times, and not overlook the truth which underlies most every error of the Roman Church, and gives it such power over the pious feelings of her members.”

V. Literature.—On the author’s life, see Wadding, Annals Minorum seu Trium Ordinarum a S. Francisco Institutionis (2d ed. Rome, 1781, sq. [21 vols. in all]), iv, 407 sq.; v, 506 sq. The best monograph is still Lisco’s Stabat Mater (Berlin, 1843), to which may be added Dr. Coles’s Latin Hymns (N. Y. 1868), mainly based on Lisco’s work. Dr. Schaff published an article on the two Stabat Matres in the HOURS at Home for May, 1867, p. 50-58. There is also a collection of Dutch translations of this hymn, published in the Bel- wieg. Museum voor de Nederlandse Taal en Letterkunde en de Gechidensien der Vaderlanden, uitgegeven door J. F. Willems. Te Gent, by Gyselink (1839), pp. 443-472. See also Herzog, Real-Encyklop., xiv, 719-720; Theolog. Universal-Lexikon, s. v.; Daniel, Theaurama Hymnol, ii, 114; Ossazam, Les Poesies Francaises de ltalie au Treize siecle, p. 11, in a Chancay des Petres Fleurs de St. Francois, traduit d’Italien (Paris, 1852; Germ. transl., by N. H. Julius, Münster, 1854.) See Mater Dolorosa. (P. F.)

STABAT MATER SPECiosa must be distinguished from the Stabat Mater Dolorosa (q. v.). While the former sets forth the sorrows of the Virgin Mother at
the cross, the *Mater Speciosa* speaks of the joys of the Virgin at the manger. For five centuries the *Mater Speciosa* was forgotten, until A. F. Ozanam, in his *Poésies Franciscaines*, rescued it from oblivion and gave it once more to the world. Cardinal Diespecker, bishop of Breslau, made an admirable German translation of this Novitiate hymn, and the late Dr. John Mason Neale published the original Latin, with the first English translation, in August, 1866, a few days before his death.

I. Text.—The hymn itself runs thus:

**Stabat Mater speciosa**

*Stabat mater speciosa* 

*Juxta faciem gaudiosa* 

*Dam in tempore parvulius* 

*Culmis animam gaudentem* 

*Lababant aeternam ferveantem* 

*Petroniti jubilas.*

*O quam ieta et beata* 

*Pulit ilia immaculata* 

*Mater Unigeniti* 

*Quae gaudet et ridebat* 

*Exultat, cum videbat* 

*Nati partum ioceti.*

*Quis jam est qui non gauderet* 

*Christi matrem ali videt* 

*In tanto solatii.*

*Quis non posset collaterari* 

*Christum mater contemplator* 

*Laudem tempore Filii.*

*Pro pecatis suas gentis* 

*Christum videt cum jumentis* 

*Et algori subditum.*

*Vidit num dolcem Natum* 

*Vexatum, adoratum,* 

*Villi diverso.*

*Nato Christo in praepe* 

*Coeli cives cantui late* 

*Cunctum immenso gaudio.*

*Stabat senex cum puella* 

*Non cum verbo nec lingua* 

*Supplicatim cordibus.*

*Hic mater, fons amoris* 

*Me sentire victoris* 

*Fac ut tecum sentiat.*

*Fac ut ardeat cor meum* 

*In amatum Christum Deum.*

*Ut abis compleacum.*

*Sancto mater, iustus agas* 

*Prone introducit piae* 

*Cordi fixas valide.*

*Tui Nati ceno laps.*

*Jam dignati fano nasci* 

*Penas mecum divide.*

*Fac me vere conguaudere* 

*Jesus lio cohercere.*

*Donec ego vivero.*

*In me sistat ardor tu* 

*Puerino fac me totidem.*

*Sum in exilio.*

*Hunc arderem fac communem* 

*Me facias immemem.*

*Ab hoc desiderio.*

*Virgo virginum precarum* 

*Mati jan non sis aman* 

*Fac me parvum rapere.*

*Fac ut pulchrum faustum portem.*

*Quo nascenti visist mortem.*

*Volemus vitam tradere.*

*Fac me tecum satiari,* 

*Nate me inerari,* 

*Stans inter triplio.*

*Inflammatus et accensus* 

*Obstipescit omnem sensum* 

*Tali de commercio.*

*Omnem stabulum amantem* 

*Et pastores vigilantes* 

*Feroxantescit sociant.*

*Per virtutem Nati tui* 

*Ora ut electi sui.*

*Ad patriam veniant.*

*Fac me Nato cantodiri,* 

*Verbo Dei promunerit,* 

*Conservavi gratia.*

*Quando corpus mortetur,* 

*Fac ut dume donetur.*

*Tui Nati visio.*

II. Authorship.—As to the source of this hymn, both Ozanam and Dr. Neale ascribe it to Jacopone da Todi, the author of the *Stabat Mater Dolorosa*; while Dr. Schaff and Coles regard the *Mater Speciosa* as the work of some admiring imitator. Against the latter opinion it may be observed that the second edition of the Italian poems of Jacopone (*Laude di Fra Jacopone da Todi*), which appeared at Brescia in 1496, contains an appendix of seven poems, among which the late Dr. John Mason Neale published the original Latin, with the first English translation, in August, 1866, a few days before his death.

In the absence of authentic or contemporary evidence, this opinion is no more than a probable conjecture; but it is preferable to other conjectures. From the want of finish and the number of imperfect rhymes, Dr. Neale infers that the *Mater Speciosa* was composed first; but Dr. Schaff, and with him Dr. Coles, takes an opposite opinion. Says Dr. Schaff: "The *Mater Dolorosa* was evidently suggested by the Scripture scene as briefly stated by St. John in the first words of the poem (in the Vulgate version); and this, again, suggested the cradle-hymn as a counterpart. It is a parallelism of passion which runs from the beginning to the end. The *Mater Speciosa* is a Christmas hymn, and sings the overflowing joy of Mary at the cradle of the new-born Saviour. The *Mater Dolorosa* is a Good-Friday hymn, and sings the piercing agony of Mary at the cross of her divine-human Son. They breathe the same love to Christ, and the burning desire to become identified with Mary by sympathy in the intensity of her joy as in the intensity of her grief. They are the same in structure, and excel alike in the singularly touching music of language and the soft cadence that echoes the sentiment. Both consist of two parts, the first of which states the objective situation; the second identifies the author with the situation, and addresses the Virgin as an object of worship. Both bear the impress of their age and of the monastic order which probably gave them birth. They are Roman Catholic in that they fix the pious contemplation upon the mother first, and only through her upon the Son; while the Protestant looks first upon the Son, and worships him only. For this feature of Mariolatry they are, as a whole, unsuitable for an evangelical hymn-book, unless they be so changed as to place Christ in the foreground, and to address the prayer to him."
Ator Mater Speciosa 975

Stabell, Theodor, a German monk, was born in 1806 at Lack, in Carniola. At a very early age he joined the Order of the Benedictines, and labored from 1835 to 1887 as professor at the St. Stephen's Gymnasium of Augsburg, and from 1859 to 1861 at Salzburg. He died in the church of St. Peter at Salzburg, St. Fev. 6, 1861, after having completed his Biographies of the Saints. See Literarische Handzeichner, 1866, p. 81. (B. P.)

Stable is one (Ezek. xxv, 5) the rendering of מחש, a dwelling or habitation (as usually rendered); hence a pasture or resting-place for flocks or other animals. See STALL.

Stachys (Στάχυς, an ear of corn; occurs as a proper name in Gruter's Inscrip. 689 a), a Christian at Rome, saluted by Paul in the Epistle to the Romans (xvi. 9). A.D. 55. According to a tradition recorded by Nicephorus Callistus (H. E. viii, 6), he was appointed bishop of Byzantium by St. Andrew, held the office for ninety years, and was succeeded by Onesimus. He is also said by Hippolytus and Dorotheus to have been one of the seventy disciples.

Stake (יוֹדָשׁ, gadish, a heap (once a "tomb," Job xxii, 32), as of grain, Exod. xxii, 6; elsewhere "shock").

Stackhouse, Thomas, an English divine, was born in 1680. He was for some time minister of the English Church at Amsterdam, and afterwards successively curate at Richmond, Ealing, and Finchley. In 1728 he was presented to the vicarage of Benham-Valencia, alias Seeham, in Berkshire, where he died, Oct. 11, 1752. He wrote, The Miseries and Great Hardships of the Inferior Clergy in and about London (1722, 8vo);—Memoirs of Bishop Atterbury (1723, 8vo);—A Complete Body of Divinity (1729, fol.);—A Fair State of the Controversy between Mr. Woodward and his Adversaries, etc. (1730, 8vo);—A Defence of the Christian Religion from the Several Objections of Antiscripturists, etc. (1731, 8vo);—Reflections on the Nature and Property of Languages (1731, 8vo);—The Book-binder, Book-printer, and Book-seller: Confuted, etc. (1732, 8vo);—New History of the Discovery and Extirpation of the World to the Establishment of Christianity (1732, 2 vols. fol.);—New and Practical Exposition of the Creed (1747, fol.);—Vana Doctrina Eumolpuma (1747, 4to.);—Sermons, etc.

Stacto (Στάκτον, naiðph; Sept. στακτόν; Vulg. stacte), the name of one of the sweet spices which composed the holy incense (see Exod. xxxvi, 34): "And the Lord said unto Moses, Take unto thee sweet spices, stacte (naiðph), and onycha, and galbanum; these sweet spices with pure frankincense. Thou shalt make it a perfume after the art of the apothecary" (ver. 33). The Heb. word occurs once again (Job xxxvi, 27), where it is used to denote simply "a drop" of water. Naiðph has been variously translated—belamum, liquid styrax, benzoin, costus, mastick, bdellium. Celsius is of opinion that it means the purest form of myrrh, called stacte by the Greeks. See MON. He adds Pliny (xii, 35) as saying of the myrrh-trees, "Sudant stacte stacten dictam," and remarks, "Ebreis Στάκτον naiðph est stillare"—adding, as an argument, that if you do not translate it myrrh in this place, you will exclude myrrh altogether from the sacred perfume (Hierob. i, 529). But Rosennmuller says, "This, however, would not be suited for the preparation of the perfume, and it also has another Hebrew name, for it is called mirt deror. But the Greeks also called stakte a species of storax gum, which Dioscorides describes as transparent like a tear and resembling myrrh (see Pliny, xiii, 2; Athen. xv, 688; Dioscor. i, 73, 77). This agrees well with the Hebrew name" (Bibl. Rer. p. 164). The Sept. στακτόν (from στακτόν, "to drop") is
the exact translation of the Hebrew word. Now Dioscorides describes two kinds of στακριζ—one is the fresh gum of the myrrh-tree (Balsamodendron myrrha) mixed with water and squeezed out through a press (i, 74); the other kind, which he calls, from the manner in which it is prepared, σκωλητικής στόραξ, denotes the resin of the storax adulterated with wax and fat (i, 79).

The true stacte of the Greek writers points to the distillation from the myrrh-tree, of which, according to Theophrastus (Fr. iv, 29, ed. Schneider), both a natural and an artificial kind were known. Perhaps the nataph denotes the storax gum, but all that is positively known is that it signifies an odorous distillation from some plant. The Arabs apply the term netaf to a sweetmeat composed of sugar, flour, and butter, in equal parts, with the addition of aromatics (see Boden a Stapel Comment. ad Theop. p. 984; Hartmann, Hebræer, i, 307; vi, 110 sq.; Gesenius, Thesaur. p. 879; Tristram, Nat. Hist. of the Bible, p. 895). See AROMATING OIL; SPICE.

The storax (Styrax officinalis) is a native of Syria. With its leaves the poplar, downy underneath, and with sweet-scented snow-white flowers clustered on the extremities of the branches, it grows to a height of fifteen or twenty feet. The reddish-yellow gum-resin which exudes from the bark, and which is highly fragrant, contains benzoic and cinnamic acids. From the kindred plant, Styrax benzoin, a native of Borneo and Java, is obtained the benzoin or benjamin which the Hindoos burn in their temples—a circumstance strongly in favor of the hypothesis that the stacte of Exodus is a storax. See POPULAR.

Stacy, Aaron G., a minister of the Methodist Episcopal Church, South, was born near Morgantown, Burke Co., N. C., Nov. 15, 1822. He joined the Church Jan. 1, 1866, and professed conversion July 29, 1839. He was educated at Cokesbury, S. C., was licensed to preach September, 1844, and in 1847 entered the South Carolina Conference. He continued in the pastoral work until 1863, when he was elected president of the Davenport Female College, N. C. In 1873 he was transferred to the Texas Conference, and became president of the Austin Female College, where he died April 8, 1875. See Minutes of Annual Conferences of the M. E. Church, South, 1875, p. 200.

Stacy, James, a minister of the Methodist Episcopal Church, South, was born in Lincoln, N. C., Nov. 18, 1807, where he was converted September, 1822, licensed to preach July, 1829, and admitted into the South Carolina Conference in 1830. He gave the Church thirty-eight years of laborious and unremitting labor, one year of which he was the agent for Cokesbury School and Randolph Macon College. He was several times a member of the General Conference. His death took place May 28, 1868. See Minutes of Annual Conference of the M. E. Church, South, 1868, p. 213.

Stade (σταδίον), the proper designation of a term used in two senses in the Bible.

1. A "furlong," a Greek measure of distance universally current in the East from the time of Alexander the Great, and hence occasionally occurring in the Apocrypha (2 Macc. x, 16, 29; xi, 5; xii, 2, 17) and the New Testament (Luke xxiv, 13; John vi, 19; xi, 18, Rev. iv, 20; xxii, 16), but regularly in Josephus for the determination of the location of places. One (Olympic) stadium, as a measure, contained, according to Herodotus (ii, 140), 600 Greek feet, i.e., according to Pliny (ii, 26) comp. 222.2 meters or 671.5 English feet. 222.2 meters or 671.5 English feet, approximately, as appears, likewise, from the above passages of Luke, that 69 stadia were reckoned as 64 miles, and John (xi, 18) reckons 15 stadia as 12 of a mile. In the Talmud the stadium is called ḫan or ḧan, of which ḥan went to the Roman mile (Reland, Palet. p. 486). See METROLOGY.

2. A "race"-course in the public games (1 Cor. ix. 24; comp. Heb. xi, 1; in the Talmud, ד"ע, א בּוּרָא, A. B. Stara, i, 7), where the lists ( skbapq), whether armed or unarmed, was located, and which was generally not always; see Forbiger, ii, 51 sq. (225) places or 690 Greek feet long (see Potter, Gr. Antig. i, 902 sq.). Whoever first reached the goal (κλήτος) received from the arbiter (ἄρχων, ἀρχων, or ἀρχων), e.g., Nero, 53) the prize (σπανίον, 1 Cor. lori. cii. : Phil. iii, 14), namely, a crown (σταυροῦ, 1 Cor. ix. 25) of living twigs or leaves. Every important city of Greece and the Greek colonies of Asia Minor (also the Palestinian cities that contained many Greek inhabitants; Josephus, Life, § 17, 64) had its stadium, either separate or in connection with the gymnasia (Wachsmuth, Hellen. Athéris, ii, 678). See Lydii Ἀσιακός Στάδιον (Rotterd. 1857). See GAME.

Stadning. See STADINGER.

Stadler, Johann Evangelus, a Roman Catholic divine, was born Dec. 24, 1804, at Parkstetten, in the Upper Palatinate. He studied theology and Oriental languages at Landshut and Munich, and from 1823 until his death (Dec. 30, 1868) he occupied some of the highest positions in his Church. He wrote, Lexicon Missionale Hebraicum-Latinum et Chaldaicum-Biblicum (Munich, 1814; --De Blandina et Virg. V.T. et V.T. 1814). He also published correct editions of the Roman missal and breviary; but his main work is his Vollständiges Heiligenlexikon (Augsburg, 1858-66, vol. i-ii, continued by J. N. Ginal). See REGIMENTALCERACUS-LETIKON, s. v.; Literarischer Handwörterbuch, 1869, p. 129. First, 1855, ed. 1, 1866; SteinSchneider, Haniel, Handleb. F. P. vol. i-iii. (1853, F.)

Staff (usually מִקָּדֶשׁ, מְקָדֶשׁ, or בַּדָּשׁ, בַּדָּשׁ; denoting a stick). The use of rods and staffs was in various with the ancient Israelites as with us. Men and animals were goaded with them (Exod. xxii, 20; Deut. Sir. xxxiii, 27; Num. xxviii, 27; 1 Sam. xvii, 45; Sam. vii, 14; Prov. x, 13, 13, 24; Isa. ix, 3) see BIBL.
STAFF

TINADO]; fruit was beaten with them from the trees (Judg. vii, 11; Ruth ii, 17; Isa. xxxiii, 27), especially olives (p.v.). Old and infirm persons carried them as supports or for defence (Exod. xxi, 19; Deut. xxiii, 11; Gen. xxxix, 10; Exod. xii, 11; 2 Kings iv, 29; Matt. x, 10; Mark vi, 8). See WALK.

A baton, like a ring, was often a sign of rank (Gen. xxi, 18, 25; comp. Herod. i, 19; Bonomi, Viminac., p. 197); sometimes inscribed with the owner's name (Wilkinson, As. Engt. li, 647); and especially a badge of office (Exod. iv. 2 sq.; vii. 9 sq.; Num. xx, 8; xxi, 18; Judg. v, 14; 1 Sam. xiv, 27; 1 Sam. cx, 2; Mic. vii, 14). See SCEPTRE. The shepherd carried a staff, which he used not only as a support in climbing hills, but for the purpose of beating bushes and low brushwood in which the flocks strayed, and where snakes and other reptiles abounded. It may also have been used for correcting the shepherd-dogs and keeping them in subjection (Van Lennep, Biblo Lands, p. 188). See SHEPHERD.

In Heb. xi, 21 it is cited as an example of faith that the dying Jacob "worshipped [leaning] upon the top of his staff" (ταξινομήσας το ἐν δος τοῦ βασιλέα αὐτοῦ), a statement which Romanists have sometimes appealed to as sanctioning the worship of images, on the pretense that the patriarch's staff bore a carved head (after the Vulg. adoravit fustimum baculi sui). These words are simply quoted from the Sept. at Gen. xlviii, 17, where the Greek translator has mistaken ταξινομής, bed, for ταξινομήσας, staff, as is obvious from the parallel passage (xlix, 2). The phrase merely indicates a reverential posture such as David assumed (1 Kings i, 47). See Zebiich, De Jacobo ad Caput Scipionis Aduante (Ger. 1788). See JACOB.

STAFF, Pastoral, a symbol of episcopal authority, resembling a shepherd's crook, and pointed at the end as an emblem both of encouragement and correction. It was originally a simple walking-stick with a plain head or a cross-piece at the top. The Roman bishop used one with two curved heads. It was eventually wrought into very elaborate forms; but was, at length, generally discarded, except by the patriarch (q.v.) who retained it in its primitive form. The pope gave up the use of the staff in the middle of the 12th century, and cardinal-bishops no longer carry it. The early staffs were mostly made of cypress-wood, and afterwards of ivory, copper-gilt, crystal, and precious metals richly carved, jewelled, or enamelled. Between 1150 and 1280 the crook was often formed of a serpent (the old dragon), or contained St. Michael or the lion of Judah, and at a later period the prie de prayer before his patron saint. Beautiful crocketed work was also added to the exterior of the staffs. The French abbot's staff has its crook turned inward, to show that his jurisdiction extended only over his house, while the bishop's crook turned outward, to denote his external jurisdiction over his diocese. In the Penitentiary of Theodore and the Ordo Romanus the bishop gave the abbot his staff and sandals. The banner on the staff was originally a handkerchief. Fine specimens of staffs are preserved—those of Wyckham, of silver-gilt, enamelled, at New College; of Fox, at Corpus Christi College; of Laud, at St. John's College, Oxford; of Smith, of the 17th century, at York; of Wens and Trelawney, at Winchester. Others are to be seen in the British Museum, the Museum Clugny, at Chichester, and Hildesheim. See PASTORAL STAFF.

It was ordered by the first book of Edward VII, "whenver the bishop shall celebrate the holy communion in the church, or execute any other ministration, he shall have his pastoral staff in his hands, or else borne or holden by his chaplain." When, however, Dr. Matthew Parker was consecrated archbishop of Canterbury, in December, 1559, no pastoral staff was delivered to him. Its delivery was prescribed in the Ordinal of 1550, but not by that of 1552. From that time the staff has been generally disused, although the bishops of Oxford, Chichester, Rochester, Salisbury, Hereford, and some other colamnel prelates, have resumed its use. See CROZIER.

STAFF, Preceptor's. A staff for baton of office made of wood or precious metal, used by a preceptor (q.v.) to designate his rank and office, and also (q.v.) to enable him to beat time and keep time in sight of the whole choir. Of the preceptor's staff there are three kinds—(1) ornamented with a pommea of gold, like one preserved at Limburg—on-the-Lahn, and within memory at Rheims; (2) having a carving, like those of St. Gerone's and the Dom at Cologne—the latter has a staff of the 12th century, with the Adoration of the Magi added in the 14th century; (3) terminating in a Tau-shaped head, usually of boxwood, like St. Servais, of the 12th century, at Maastricht. Sometimes the staff was made of ivory, adorned with bands of silver, gilt-edged, with gems, and ending in a crystal ball. It was sometimes called serpentina, from a figure of the Virgin treading on a serpent, as at Paris. The slightly curved top of the "cross de St. Julienne" at Montreuil-sur-Mer, of the 11th century, marks the transition from the staff to that borne by a bishop. The chanter's baton of St. Denis, now in the Louvre, was carried by Napoleon I, and the French kings before him, at their coronation, as "the golden sceptre of Charlemagne," from a seated figure of the mon.
arch on the top: it is dated 1584. At Amiens the choristers carried little silver crosses, and the priest-chamber and chantry had staves with figures in a dome-like niche, but formerly used batons of silver of the Tournai shape, which in length descended to the hands of choristers and chantry staves, and certain consecutives on great festivals used the staves at Paris, Rouen, Angers, Lyons, Catania, Neti, Messina, and Syracuse. See PRECEDE.

Staffelstein, Paul (originally Nathan Abram), a convert from Judaism, was professor of Hebrew at Heidelberg in the 16th century. The programme in which the rector of the university invited the students to attend at his lectures is still preserved, and from the following passage we may judge as to the lectures Staffelstein was to deliver: "Idem hic auspiciis curat et ab narratione celebris dicti quod de mundi durantiae in domo Heliœ sonuisse traditur. Grammatica deinceps tractabit compendia ac praecepta et scriptura petitis exemplis illustrabat in consistente ad phrasin, quae multis a philologia lectionibus arcet, asseverati auditor possit vestuissimamque ilium paulatim amare theologiam." Staffelstein published, Tractat vom Messias (Heidelberg, 1660):—Aihortatio ad Judeos ac Opinionem de Messia Caraulani Diss., (ibid. 1660)—Refuta, sive demonstrationem Judaicae Factae (ibid. 1660);—Vortrag über die Weiheit der Ausleihung und Being an introduction to his lectures (ibid. 1551). See Kalkar, Israel und die Kirche, p. 88; Fürst, Bibl. Jud. iii, 377; Geiger, Das Studium der M. Sprache in Deutschland, p. 90. (B. P.)

Stafford Book. The, a book written to justify the exchange of the Lutheran for the Reformed faith by the margrave Ernest Frederick of Baden (died 1694), and printed in 1599 at the Castle of Stafford, a few miles to the north of Carlisle. It begins with a preface addressed to margrave George Frederick, and then proceeds to collate the Augustana as embodied in the Book of Concord with the original manuscript copy signed by the princes assembled in diet at Naumburg, Feb. 1, 1611. Next follows a careful comparison of the Lutheran catechism contained in the Book of Concord with the Wittenberg edition of 1570. The object of this review was to demonstrate that intentional alterations and falsifications had been made. A detailed criticism of the teachings of the Formula of Concord is given, with reference especially to Christology and the doctrine of the divinity of Christ's body in the sacrament, followed by an examination of the citations from ancient ecclesiastical writings contained in the appendix to the Book of Concord, and designed to show the general correspondence of doctrine between these different authorities. Every variation from the original, so discovered, is at once charged to willful dishonesty. The book concludes with the margrave's own confession of faith with reference to the doctrines de libero arbitrio, de providentia Dei, de praedestinatione, de persona Christi, of the sacraments generally, and of baptism and the Lord's supper particularly.

A response to the Stafford book was issued by the Württemberg theologians in the following year (1600); and a second work appeared in 1601 in defence of the Book of Concord. The Saxons also entered the lists against the "margrave's Calvinistic book." Two replies to the Württembergers were issued by the margrave in 1602. The controversy was, however, transferred to other hands by the margrave's death in 1604.

Stag. See Deer.

Stage, a step, floor, or story. The term is particularly applied to the stages or divisions of the set-offs of buttresses in Gothic architecture, and to the horizontal divisions of windows which are intersected by transoms.

Stage-playing. In the early Church, actors and stage-players were regarded as ineligible to membership. The canons forbade all such to be baptized except on condition that they first bade adieu to their arts. Should they return to them, they were excommunicated, and were not reconciled or received again to favor by any profane conversion (Conc. Elberis, can. 62; Conc. Carthag. 3, can. 35). They were finally condemned as so long as they continued to act. Gennadius cautions against ordaining any who had been actors or stage-players. In the time of Cyprian not only public actors, but private teachers and masters of this art, were debarred the communion of the Church. The same regulations prevail concerning actors, dramatists, managers, and all who had any concern in the exercise or management of such sports, and all frequenters of them. The reason assigned for such exclusion was that it was agreeable neither to the majesty of God nor the discipline of the Gospel that the modesty and honor of the Church should be defiled by entertainments and infamous a contagion." This indictment was none too severe, for we may add that "this kind of life was scandalous even among the wise and sober part of the heathen." Tertullian observes (De Spectac. c. 29) that they who professed these arts were noted with infamy, degraded, and denied many privileges, driven from court, from pleading, from the senate, from the magistracies, and deprived of the right to serve the gods or in the Roman city and commonwealth. See Bingham, Christ. Antig. bk. xi, ch. v, § 7; bk. xvi, ch. iv, § 10. See Theatre.

Stähelin, Johann Jacob, a Protestant divine, was born May 6, 1797, at Basle; studied theology at Tübingen from 1817 to 1821, and commenced lecturing as a privat docent at Basle in 1823. In 1828 he was made extraordinary professor of theology, in 1835 ordinary professor, and in 1842 he was honored with the appointment of such of divinity. He lectured on the Old Test. until his death, Aug. 27, 1875. He wrote, Kritische Untersuchungen über die Genesis (Basle, 1808):—Animalviere von quendam in Jacobi Vatciniom (ibid. 1827)—Kritisch Untersuchungen über den Pentateuch, die Bücher Jona, Richter, Stewar und der Könige (Berlin, 1842)—Die messianischen Weisungen des alteren Testaments und der Entstehung, etc. (ibid. 1847)—Spezielle Einleitung in die kanonischen Bücher des alten Testaments (Elberfeld, 1862). He also wrote different essays for the Studien und Kritiken and Zeitschrift der deutschen morgenl. Gesellschaft. See Fürst, Bibl. Jud. iii, 377; Zuchael. Bibl. Theol. ii, 125 sq.; Theolog. Universal-Lexik.-s. v. (B. P.)

Stahlschmidt, John Christian, a minister of the German Reformed Church, was born not far from Cologne, in the principality of Nassau-Siegen, March 3, 1740. In his nineteenth year he was brought to sympathize considerably with Pietistic separatists, which so displeased his father that he whipped him, extorting from him a promise that he would no more associate with them or read their books while under his care. He decided to leave home, and went to Amsterdam, in which city he had learned that the books of the Pietists were published. Disappointed at not finding his hopes realized in that city, he sailed for the East Indies, arriving at Batavia June 3, 1760, and from thence proceeded to China. Returning to Ajia, he went on to Japan, hoping to find congenial friends and employment there. Disappointed, he again went to sea, and came back to Amsterdam June 1, 1765. Led by the reading of Tersteegen's writings, Stahlschmidt visited him in August, 1766, and again in 1767, receiving much instruction and encouragement from him; he entered into business with an uncle, in which he continued till the autumn of 1769. He again (March, 1770) started out in search of employment, visiting Rotterdam, Helvoetluit, Harwich, and London, arriving in Philadel-phia, Pa., in August, 1770. Here he began to study under Dr. Weyenberg, and after some time became assistant to Dr. Hendel, of Tulpheckens. In 1777 he was
STAINED GLASS 979

STAIRS

STAINED (or Painted) Glass. Though often used as if they were synonymous, there is a broad distinction to be made. Stained glass is the substance of which has been stained or colored in the process of manufacture; while painted glass is that which, whether previously stained or colorless, has had a design painted upon it in colors, usually metallic oxides, combined with a vitreous vehicle or flux. The art of making colored glass was known to the Egyptians and Assyrians, and from them passed to the Greeks and Romans. The earliest reference to the use of stained-glass windows in Europe appears to be in a passage of Prudentius, about the middle of the 5th century; but a more distinct mention is made in the following century. Painted-glass windows are not spoken of for two or three centuries after the earliest examples discovered by Lasteyrie, are in the abbey of Tegernse, Bavaria, presented to the abbey by count Arnold in A.D. 999. Five other windows in the same abbey, painted by the monk Wernher, date between 1008 and 1001. At Hildesheim there are also some which are attributed to one Bruno, and to the years 1029-39. The earliest examples in France belong to the 12th century, the oldest being a representation of the funeral of the Virgin, in Angers Cathedral, of the first half of the century; the others are some medallion windows of a very remarkable character, placed in St. Denis by the abbe Sugir in the latter half of the century. There is, however, a small portion believed to be of the 11th century at Le Mans. The earliest known examples in Great Britain are of the end of the 12th century, as in the clear-story of Canterbury. It was in the latter part of the 12th and the 13th century that the art made its greatest advance; and, as decorative works, the windows of the 13th century are preferable to those of the 12th. The oldest English examples are in Canterbury and Salisbury cathedrals; but the finest are the magnificent five sister lancets (fifty feet high) of York Minster, and the great rose window of Lincoln Cathedral, in which the central Majesty (or Christ in Glory) is surrounded by fifteen containments containing the events of the life of Christ. The chief French examples—many of them of extraordinary grandeur and beauty—are in the cathedrals of Chartres, Bourges, Paris, Amiens, Soissons, Rouen, and Sens, and the Sainte Chapelle, Paris.

The painted glass of the 14th century was more vivid in color, broader in style, and the painting better executed; but it was less pure in conception, and less strictly subordinated to the general architectural effect. One of the best examples of English work of this period is the east window of Bristol Cathedral. Other characteristic examples occur at York Minster; Exeter Cathedral; the chapel of Merton College, Oxford; Tewkesbury Abbey Church; Norbury Church, Derbyshire; Lowick Church, Northamptonshire, etc.

In the 15th century a great change took place in glass-painting. The windows became still more individualized, and less dependent on the architecture. The subjects occupied a larger space, and were treated more as pictorial effects. The earlier examples of the art required very skilful manipulation is exhibited throughout. But the color is poor, white glass is chiefly employed, and the general effect is cold and comparatively feeble. Some of the examples—the earlier ones especially—are, however, very elaborate and impressive. Of this class is the magnificent east window of the choir of York Minster, which consists of no fewer than one hundred and sixteen compartments, each having a separate subject.

By the end of the 15th century Gothic architecture was everywhere dead or dying. The aim of glass-painters was to rivale the effects of oil-paintings; and windows were mere imitations of oil-pictures, the glass being treated as if it were a canvas or panel. Examples of this class are to be seen in the choir of King's College Chapel, Cambridge, 1527 and succeeding years; the great east window of St. Margaret's, Westminster; Fairford Church. In France there are numerous fine examples of 16th-century windows in the cathedrals of Bourges, Auxerre, Auch, Bourges, etc., the glass being treated as if it were a canvas or panel. From this time glass-painting fell more and more into disrepute, though windows continued to be painted, and some glass-painters, especially in France, acquired a certain celebrity. The renewal of the art was coincident with the revival of Gothic architecture. It has since been studied earnestly by archaeologists, and pursued zealously by a numerous body of practitioners. Hitherto, however, little original power has been exhibited in the designs; the object aimed at being mainly to produce faithful imitations of medieval glass, the style being of the 13th, 14th, or 15th century, according to the taste of the patron. There is a kind of ornamental glass, with its distinctive pattern, by which the glass is covered with a very fusible composition, either white or tinted, reduced to a powder. This powder is then removed from certain parts of the glass, according to the required pattern, and, after firing, produces on the glass a dull ground with a bright pattern. Another method of ornamenting glass, rather inappropriately called embossing, consists of a bright figure on a dull ground. This is etched with hydrofluoric acid.

The following are works to consult as to the history of the art: Gesammt, Geschichte der Glasmalerei in Deutschland und Niederlanden, Frankreich, England, etc. (Stuttgart, 1859, 5 vol.); Lasteyrie, Histoire de la Peinture sur Verre d'apres les Monumens en France (Paris, 1858-60, 2 vols. fol.); Warrington, History of Stained Glass from the Earliest Period of the Art to the Present Time (1848, 1 vol. fol.); Weale, Divers Works of Early Masters in Christian Decoration (1846-47, 2 vols. fol.). For authorities on the theory and practice of the art, consult the English Catalogues, Arts and Sciences, 8th ed., to which article we are indebted for most of the gloss information.

Stair (usually דלת, or מדרגות, an ascent; once מדרגות, Cant. ii, 14, a precipice, "steep place," Ezek. xxxviii, 20; מדרגות, a "winding stair" or staircase, 1 Kings vi, 8). The expression translated "on the top of the stairs" (2 Kings ix, 13) is one of the clue to which is lost. The word rendered "top" is גון, תַּלֶּה, i. e. a home, and the meaning appears to be that they placed Jehu on the substance, i. e. the very stairs themselves, if מדרגות be stairs, without any seat or chair below him. The stairs doubtless ran round the inside of the quadrangle of the house, as they do still, for instance, in the ruin called the house of Zachiæus at Jericho, and Jehu might have remained in the tower when the people formed the top or roof of the house. Thus he was conspicuous against the sky, while the captains were below him in the open quadrangle. The old versions throw little or no light on the passage; the Sept. simply repeats the Hebrew word, הרו תַּלֶּה פְּרַעַת יְהוֹ. Josephus speaking of the magnificence by general terms (Ant. ix, 6, 2). See Jour. Soc. Lit. 1859, p. 439.

Stairs. Respecting church-stairs a few facts may be noticed. At Tamworth, where the church was collegiate and parochial, there are double stairs to the tower for the use of the several ringers before the respective services. Two sets of stairs also lead to the upper chapel at Christchurch, Hants, probably for the accommodation of persons visiting the relics, one being for access
and the other for egress. At Barnack there is an octagonal early English staircase within the Prenorman tower, and at Whitchurch a similar wooden staircase of the 14th century. At Wolverhampton the pulpit stair winds round a pillar. There were usually three stairs to an altar. At Salisbury, on Palm-Sunday, the benefaction of palms was made on the third step; flowers and palms were presented on the altar for the clergy, and for others on the stairs only.

STAIRS, THE HOLY. See SCALA SANTA.

Stake (יוֹתֶּה, yathéh, a peg or nail [as often rendered], especially a tent-pin, Isa. xxxiii, 20; liv. 2). See TENT.

Stalens, Jean, a Belgian theologian, was born in Calcar (duchy of Cleves) in 1595, and, after having received licensure became curate at Rees in 1628; but being obliged to leave on account of zeal against the Reformed party, he entered the Congregation of the Oratory in 1657; and passed the rest of his life in the convent of Kevelaer (Guelde), where he died, Feb. 8, 1681. According to Paquot (Mémoires, vol. vii), he possessed a great memory, and much judgment as well as knowledge. He wrote several historical and ecclesiastical essays, some of which are mentioned in Hoefer, Nouv. Biog. Générale, s. v.

Stälin, Christoph Friedrich von, a German writer, was born Aug. 4, 1805, at Calo, in Württemberg, and studied theology, philology, and philosophy at Tübingen and Heidelberg. In 1825 he was appointed assistant to the Royal Library at Stuttgart, in 1826 sub-librarian, in 1829 librarian, in 1846 director of the library, and died Aug. 12, 1873. Stälin was one of the most learned and meritorious historians of Germany. He never occupied a professorial chair, but for a number of years had been a member of the Society for Early German History, originally superintending the editorship of the Monumenta Germaniae Historica, and was also a very useful member of the Munich Historical Commission. His Württembergische Geschichte (which was begun in 1841, but of which the first installment of vol. iv, containing the turbulent reign of duke Ulrich, the period of the Peasants' Rebellion, and the Reformation of the Church, was published in the year 1870) is universally acknowledged to be a perfect model of a provincial history (Ländegeschichte) in regard both of completeness and of methodical precision. The second portion of vol. iv has been left ready for press, but whether it has yet been published we do not know. See the Regensburger Conversations-Leckim, s. v. (B.P.)

Stalk (בעז, a tree or wood [as often]; hence the woody or fibrous part of the flax-stem, Josh. ii, 6; יָפָה, yaphá, a reed [as often]; hence the strawy stem of grain, Gen. xlii, 5, 22; יָפָה, yaphá, the stalk of the same, Hos. viii, 7). See PLANT.

Stall (עֵבֶּה, devebā, a stable for cattle, Amos vi, 4; Mal. iv, 2; "fat," 1 Sam. xxviii, 24; "fatted," Jer. xlv, 21; הָעֳִבֶּה, hayebā, or הָעֳִבְּה, hayebā, a crib, 2 Chron. xxxii, 38, or a span, 1 Kings iv, 26; 2 Chron. ix, 25; יָפָה, yaphā, a rack for fodder, Heb. iii, 17; פָּרֳָמִה, parāmā, Luke ii, 13, a manger, as elsewhere rendered; stalleth is פָּרֳָמה, parāmah, crammed, Prov. xv, 17; "fatted," 1 Kings iv, 23). Among the ancient Egyptians the stables for horses were in the centre of the village; but the farm-yard, where the cattle were kept, stood at some distance from the house, like the Roman rustica. It consisted of two parts—the sheds for housing the cattle, which stood at the upper end, and the yard, where rows of rings were fixed in order to tie them while feeding in the daytime (Wilkinson, Ancient Egypt, i, 30). See HORSE.

Stalls were ranges of seats placed in the choirs of churches or chapter-houses for the use of the clergy, for the religious in a monastery, or for canons. In the most ancient churches of the West, in the cathedrals and great minsters, the abbot or bishop sat at the head of the choir, behind the altar. Around him, on semi-circular benches of wood or stone, were ranged the canons. After the 13th century the seats of the clergy were placed in front of the sanctuary, on either side of what is now called the choir. In cathedrals and other large buildings they were enclosed at the back with panelling, and were surmounted by overhanging canopies of open tabernacle-work, which were often carried up to a great height, and enriched with numerous pinacles, crockets, pierced tracery, and other ornaments. Examples of stalls of this kind remain in most of the English cathedrals and in many other churches. In some cases two rows were used, the outer one only being surmounted by canopies. It was also raised a step or two higher than the other, as in Henry VII's Chapel, Westminster. In ordinary parish churches the stalls were without canopies, and frequently had no panelling at the back above the level of the elbows; but in many instances the walls over them were lined with wooden panels having a cornice above, corresponding with the screen under the rood-loft, of which a very good specimen remains at Etchingham, Sussex. When the Chancellor had sides behind the stalls, the backs were formed by the side screens, which were sometimes close and sometimes of open-work. The chief seat on the dais in a domestic hall was sometimes a stall, as in (the ruins of) the palace of the archbishop of Canterbury at Mayfield, Sussex, where it is of stone.
STAMMER

981

STANCARISTS

Stamper, Jonathan, D.D., a minister of the Methodist Episcopal Church, was born in Madison County, Ky., April 27, 1791, and was converted at the age of nineteen. In 1811 he was employed on the Flemingsburg Circuit as junior preacher, and in 1812 was admitted on trial into the Western Conference. In 1841 he was transferred to the Illinois Conference, returning to Kentucky in 1844, where he was agent for the Transylvania University. In 1848 he was transferred to the St. Louis Conference, and again returned to Kentucky in 1849. He was supernumerated in 1858, and made Decatur, Ill., his home; but in 1858 he joined the Illinois Conference, and was stationed in his own town. In 1862 he was again supernumerated, and continued in that relation until his death, Feb. 26, 1864. He was a great preacher, and one of the finest pulpit orators of his day. See Minutes of Annual Conferences, 1864, p. 191.

Stanbury, Daniel, a minister of the Methodist Episcopal Church, was born in Baltimore, Md., in May, 1808. He was converted in early life, and licensed to preach when about twenty years of age. He entered the Wisconsin Conference in 1849, and continued to preach until disabled by paralysis in July, 1860. He lingered on until October of the same year, when he died in peace. See Minutes of Annual Conferences, 1861, p. 178.

Stancari (in Latin Stancarius), Francesco, a noted Italian theologian, was born in Mantua in 1501. After taking orders, he applied himself to the study of Hebrew with the most learned teachers of his time, and began to teach it at the Academy of Udine; but his leanings towards the Reformation becoming apparent, he was obliged to flee to Germany, and there began teaching the same language. Persecution followed him, however, and he was imprisoned as a heretic. Having gained his liberty through the intervention of certain noblemen, he took refuge in Poland with Nicholas Olesnicki, and in 1550 a church was built for him in Pinczew. After marrying, he spent a year in Königsberg as professor of Hebrew, but, becoming engaged in a violent dispute with Osianer (q. v.), was obliged to return to Poland, where he died, at Stobnica, Nov. 12, 1574. He was not only a theologian, but also a doctor of medicine. Besides several Biblical works, Stancari left a Grammaire Hebrique (Batat, 1549) — a treatise De Trinitate, etc. (ibid., 1547; Nouveaux Noms de Reformateurs, etc., 1547, 8vo). See Hoefer, Nouv. Bihg. Générale, s. u. See STANCARISTS.

Stancarists, the followers of Francesco Stancari (q. v.), who was brought into note by his controversies with Osianer, Buliliger, Melanchthon, and others of the Lutheran and Calvinistic reformers. Osianer and his followers had maintained peculiar views respecting the atonement of our Lord, alleging that it was not as the Father willed it, for that as the Son of God Christ was under obligation to keep the divine law on his own account; and, therefore, that he could not, by obeying the law, procure righteousness for others. The Stancarists went to the opposite extreme, and attributed the atonement to our Lord's human nature alone, excluding it altogether from his divine nature. Further, they maintained that the divine nature in its purity had no existence in Christ, and that he was only called God the Word metaphorically. They also held a theory that he had two natures—the one as mediator, the other as the author of mediation, and was, therefore, in one sense "sent," and in the other "one who sent." Another notion they held was that the holy eucharist was not the medium of any present gift of grace, but only the pledge, or omoios, of one to come. The heresy of the Stancarists was eventually absorbed by that of the Socinians.
Stanchion (old Fr. estançon), the upright iron bar between the mullions of a window, screen, etc.; they were frequently ornamented at the top with fleurs-de-lis, leaves, etc. The upright bars or railings around tombs may be called stanchions, and these were often very elaborately ornamented at the top. The name is also sometimes applied to the quarters or stalls of wooden partitions, and is used in the North of England for the stone mullions also.—Parker, Gloss. of Architect. n. v.

Warborough, Oxon.

Standard (נֵס, dîgel, prop. the banner; while בָּרֶס, nêš, was prop. the staff; but the terms are used somewhat indiscriminately). Standards and ensigns are to be regarded as efficient instruments for maintaining the ranks and files of bodies of troops; and in Numb. ii. 2 they are particularly noticed, the Israelites being not only enjoined to encamp "each by the standard of his tribe and the ensign of his father's house," but, as the sense evidently implies, in orders or lines. It is clear, when this verse is considered in connection with the religious, military, and battle pictures on Egyptian monuments, that the Hebrews had ensigns of at least three kinds, namely, (1) the great standards of the tribes (נֶשׁ of a single tribe, רְשֵׁי of three tribes together), serving as rallying-signs for marching, forming in battle array, and for encamping; (2) the divisional standards (מִשְׁפַּת, mishpa-châhâ) of clans; and (3) those of houses or families (יְדֵי, yâdâh, beth abôth), which after the occupation of the Promised Land may gradually have been applied more immediately to corps and companies, when the tribes, as such, no longer regularly took the field. That there were several standards may be inferred from the uniform practice of the East to this day; from their being useful in manoeuvres, as already explained, and as shown in the Egyptian paintings; and from being absolutely necessary; for had there been only one to each tribe, it would not have been sufficiently visible to crowds of people of all ages and both sexes, amounting in most cases to more than 100,000, exclusive of the encumbrance of their baggage. Whole bodies, therefore, each under the guidance of the particular clan ensign, knew how to follow the tribal standard; and the families offered the same convenience to the smaller divisions. It may be doubted whether these three were enough for the purpose; for if they were carried in the ranks of the armed bodies, it must have been difficult for the households to keep near them; and if they were with the crowd, the ranks must have had others to enable them to keep order, as we find that even in the Roman legions, thoroughly trained as they were, numerous vexillae were still held to be necessary. That there were others might be inferred (Isa. xiii. 2; Jer. lii. 27) from the circum-

Ancient Egyptian Standards.
likely to have been connected with religious than with military purposes, as they are found standing in front of an altar. The military banner appears to have been usually fixed on a long staff, and supported by a rest in front of the chariot, to which it was attached by a long rod or rope (Layard, Niniveh, ii, 267).

The early Greeks employed for a standard a piece of armor at the end of a spear; but Homer makes Agamemnon use a purple veil with which to rouse his men. The Athenians afterwards, in the natural progress which we observe in the history of ensigns, adopted the olive and the owl; and the other Greek nations also displayed the effigies of their tutelary gods, or their particular symbols, at the end of a spear. Some of them had simply the initial letter of their national name. The ancient Persian standard is variously described. It seems properly to have been a golden eagle at the end of a spear fixed upon a carriage. They also employed the figure of the sun, at least on great occasions, when the king was present with his forces. Quintus Curtius mentions the figure of the sun, enclosed in crystal, which made a most splendid appearance above the royal tent. We therefore presume it was the grand standard, particularly as even at this day, when Mohammedanism has eradicat most of the more peculiar usages of the Persians, the sun continues to partake with the lion the honor of appearing on the royal standard. Among the very ancient sculptures in Persia we discover specimens of other standards, as exhibited in our engraving. One sort consists of a staff terminating in a divided ring, and having below a transverse bar from which two enormous tassels are suspended. The other consists of five globular forms on a cross-bar. They were doubtless of

metal, and probably had some reference to the heavenly bodies, which were the ancient objects of worship in Persia. The proper royal standard of that country, however, for many centuries, until the Mohammedan conquest, was a blacksmith's leather apron, around which the Persians had at one time been rallied to a successful opposition against the odious tyranny of Zohak. Many national standards have arisen from similar emergencies, when any article which happened to be next at hand, being seized and lifted up as a rallying-point for the people, was afterwards, out of a sort of superstitious gratitude, adopted either as the common ensign or the sacred banner. Thus also originated the horse-tails of the modern Turks, and the bundles of hay
were ensigns intended to be placed upon the ends of spears. In the East the use of standards fixed upon
arms seems to have been long continued. We have ob-
served that this was a usage in ancient Persia, and at
a period long subsequent we find it existing among the
Saracens. Turpin, in his History of Chartemenye, men-
tions it as belonging to them. He says, "In the midst
of the tent was a wagon drawn by eight horses, upon
which was raised their red banner. Such was its in-
fluence that while the banner remained erect no one would
ever fly from the field" (Meyrick, Ancient Armor, i, 16). This custom was afterwards introduced into Europe, and
found its way to England in the reign of king Stephen;
after which the main standard was borne, sometimes at
least, on a carriage with four wheels. The main stand-
ard of Henry V at the battle of Agincourt was borne
thus upon a car, being too heavy to be carried other-
wise.

After this rapid glance at ancient standards, it re-
 mains to ask to which of all these classes of ensigns that
of the Hebrews approached the nearest. We readily
confess that we do not know; but the rabbinis, who pro-
fer to know everything, are very particular in their in-
formation on the subject. They leave out of view the
ensigns which distinguished the subdivisions of a tribe,
and confine their attention to the tribe-standards, and
in this it will be well to follow their example. They
by no means agree among themselves; but the view
which they most generally entertain is that of the
dimension given above, and is in accordance with the
prevailing notion among the Jewish interpreters. They
suppose that the standards were flags bearing figures
derived from the comparisons used by Jacob in his
final prophetic blessing on his sons. Thus they have
Judah represented by a lion; Dan by a serpent; Ben-
domin by a wolf, etc. But, as long since observed by
Sir Thomas Brown (Vulgar Errors, bk. v, ch. x), the
escutcheons of the tribes, as determined by these
ingenious triflers, do not in every instance correspond
with any possible interpretation of Jacob's prophecy,
nor with the analogous prophecy of Moses when about
to die. The latter Jews were of opinion that, with re-
spect to the four grand divisions, the standard of the
camp of Judah represented a lion, that of Reuben a
man, that of Joseph an ox, and that of Dan an eagle;
but this was under the conception that the appearances
in the cherubic vision of Ezekiel alluded to this division.
The Targumists, however, believe that the banners were
distinguished by their colors, the color for each tribe
being analogous to that of the precious stone for that
tribe in the breastplate of the high-priest, and that the
great standard of each of the four camps combined the
three colors of the tribes which composed it. They add
that the names of the tribes appeared on the standards,
together with a particular sentence from the law, and,
moreover, accompanied with appropriate representa-
tions, as of the lion for Judah, etc. Aben Ezra and
other rabbins agree with the Targumists in other re-
spects, but they insert other representations than the lat-
ter asem. Last of all, the Cabalists have an opinion that
the bearings of the twelve standards corresponded with
the months of the year and the signs of the zodiac—
the supposed characters of the latter being represented
thereon; and that the distinction of the great standards
were that they bore the cardinal signs of Aries, Cancer,
Libra, and Capricorn, and were also charged each with
one letter of the tetragrammaton, or quadrilateral name
of God. Thus much for Rabbinical interpretation. Most
modern expositors seem to incline to the opinion that
the ensigns were flags, distinguished by their colors or
by the name of the tribe to which each belonged. This
is certainly the case in itself, as long as a thing that can be
offered, unless the instances we have given from the early
practice of other nations lead to the conclusion
that flags were not the earliest, but the ultimate,
form which standards assumed. We have in most in-
stances seen them preceded by any object that would
serve as a distinguishing mark, such as leather aprons,
whips of hay, pieces of armor, and horse-tails; then
by metallic symbols and images, combined sometimes
with feathers, tassels, and fringes; and then plain or
figured flags of linen or silk. Besides, the interpretation we
have cited is founded on the hypothesis that all sculptu-
ure, painting, and other arts of design were forbidden
to the Hebrews; and as we are not quite prepared to
admit the existence of such a prohibition, we do not
feel absolutely bound, unless on its intrinsic probability,
to receive an explanation which takes it for granted
(Kritz, Pict. Bible, note at Num. ii, 2).

From the kind of service which each class of en-
sign was to render, we may assume that the tribal
standard (םנה"כ, דג"ל), at all times required to be dis-
inguishable "afar off," would be elevated on high poles
with conspicuously marked distinctions, and that there-
fore, although the mottoes ascribed to the twelve tribes,
and the symbolical efficacies applied to them, may or
may not have been adopted, something like the lofty
fabelliform signs of Egypt most likely constituted their
particular distinction; and this is the more probable,
as no fans or umbrellas were borne about the ark, and,
being royal, no chief, not even Moses himself, could
assume them; but a priest or Levite may have carried
that of each tribe in the form of a fan, as the distinc-
tion of highest dignity, and of service rendered to the
Lord. They may have had beneath them ריסת, or
shaws, of the particular color of the stone in the breast-
plate of the high-priest (although it must be observed
that that ornament is of later date than the standards);
and they may have been embellished with inscriptions
or with figures which (at a time when every Hebrew
knew that the animal forms and other objects constitut-
ated parts of written hieroglyphic inscriptions, and even
stood for sounds) could not be mistaken for idols—the
great lawgiver himself adopting efficacies when he shap-
ed his cherubim for the ark and bulls for the brazen sea.
In after-ages we find typical figures admitted in the ships
carved on the monuments of the Maccabees, being the
symbol of the tribe of Zebulon, and not even then pro-
bhibited, because ships were inanimate objects. As for
the "abomination of desolation," if by that term the
Roman eagle was really meant, it was with the Jews
more an expression of excited political feeling under
the form of religious zeal than of pure devotion, and
one of the many signs which preceded their national
doom.

There is reason to believe that the mishpachoth, or
with joining the Roman eagles to the state umbrella of Cleopatra.

Iterque signa (turpe!) militaria
Sol aspicit conspectum” (Horace, Epod, ix).

The ensign of the family or clan of the royal house then reigning, of the judge of Israel, or of the captain of the host was, no doubt, carried before the chief in power, although it does not appear that the Hebrew kings had, like the Pharaoh, four of them to mark their dignity; yet from analogy they may have had that number, since the practice was also known to the Parthian kings subsequently to the Byzantine emperors, and even to the Welsh princes. See Banner; Ensign; Flag.

In Daniel the symbols on several standards are perhaps referred to, as the Medo-Persian "ram with two horns;" the he-goat with one horn for Alexander; the goat with four horns for Alexander's successors; and the goat with the little horn for Antiochus Epiphanes (Dan. viii, 3-25; comp. vii, 8-27.) See Standard-Bearer.

Standard-Bearer. This name seems to have been applied formerly to (1) various articles of furniture which were too ponderous to be easily removed, as to large chests, or the massive candlesticks placed before altars in churches, etc.; (2) also the vertical poles of a scaffold, and the vertical iron bars in a window, or stanchions; (3) it was also applied to the ends of the oak benches in churches, and that is the common use of the term now. They were often very handsomely carved, sometimes having poppy-heads and sometimes without. A good illustration is taken from Dorchester; (4) large standard candlesticks placed before altars, e. g. "Two great standards of lauren to stand before the high altar of Jeu" (Lysons, Magna Britannia, i, 718). — Parker, Gloss. of Architect. s. v.

Standard-bearer (σηματοφόρος, means, one pine away, Isa. x, 18; but σωστοπανηγυρίζω, "lifted up as an ensign," Zech.}

Various Forms of Ancient Standards.

clan ensigns, and the δῆ, or tribal ensign, were, at least in the earlier ages, symbolical figures; and that the shekels ascribed to David, bearing an olive or citron branch, to Nehemiah with three lilies, to Herod Agrippa with three ears of corn, and to Trypho with a helmet and star, were so many types of families, which may all have been borne as sculptured figures, or, when the purism of later times demanded it, may have been painted upon tablets, like the supposed family or clan motto on the ensign of the Maccabees (יְרַעִית). The practice was equally common among the heathen Egyptians, Persians, and Greeks; and perhaps the figures of those actually used in Jerusalem are represented in the sculptured triumphal procession on the Arch of Titus, where the golden candlestick and other spoils of vanquished Judah are portrayed. A circumstance which confirms the meaning of the objects represented upon the Jewish shekels is that on the reverse of those of Herod Agrippa is seen another sovereign ensign of Asia—namely, the umbrella (chattah, chatuh, of India) always attending monarchs, and sculptured at Chehel Minar, and at Nakshi Bustan, where it marks the presence of the king. It is still the royal token through all the East and Islam Africa; and it appears that in the Macedonian era it was adopted by the Greco-Egyptian princes; for Antony is reproached.
As the Hebrews had banners of various kinds [see STANDARD], they must of course have had persons specially designed to carry them, although the particular bearer is not mentioned. Of such does not occur in the Bible. Among the ancient Egyptians the post of standard-bearer was at all times one of the greatest importance. He was an officer, and a man of approved valor, and in the Egyptian army he was sometimes distinguished by a peculiar badge suspended from his neck, which consisted of two lions, the heads of which faced in opposite directions (Wilkinson, Anc. Egypt, i. 342). Among the ancient Assyrians standard-bearers enjoyed a like distinguished rank, as is evident from their prominence on the sculptures (Bonomi, Vineea, p. 224 sq.). See ARMOR-BEARER.

Standards (Lat. consuetudines, co-standartes), an order of penitents in the primitive Church, so called from their having liberty (after the other penitents, energumens, and catechumens were dismissed) to stand with the faithful at the altar and join in the common prayers and see the oblation offered; but yet they might neither make their own oblations nor partake of the eucharist with the others. This the Council of Nice (can. 11) calls communicating with the people in prayers only, without the oblation; which, for the crime of simony, was to last for two years, after they had been three years bearers and seven years prostrators before. The Council of Ancya (can. 4) often uses the same phrase of communicating in prayers only, and communicating without the oblation; and in one canon (25) expressly styles this order of penitents συναρτήματοι, co-communicantes; they are named both in the Canons of Gregory Thaumaturgus (can. 11), and frequently in the canons of St. Basil. See Bingham, Christ, Antiq. bk. xviii. ch. 1, § 5.

Standing, as a posture of worship, was the general observance of the whole Church on the Lord's day, and the fifty days between Easter and Pentecost, in memory of our Lord's Resurrection and Descent at Pentecost. (Quast. et Responsa, ad Orthodox. qu. 115) says, "Forasmuch as we ought to remember both our fall by sin, and the grace of Christ, by which we rise again from our fall, therefore we pray kneeling six days, as a symbol of our fall by sin; but our not kneeling on the Lord's day is a symbol of the resurrection, whereby through the grace of Christ, we are delivered from our sin, and from death, which is mortified thereby." Psalmody, being esteemed a considerable part of devotion, was usually, if not always, performed standing. An exception was made in the monasteries of Egypt, the monks, by reason of fasting, being unable to stand all the time of their eleven psalms. Each one stood while reading, and at the last psalm they all stood up and repeated it alternately, adding the Gloria Patri at the end. At the reading of the Gospel it was ordered by pope Anastasius that all the people should stand up; and some of the Middle-age ritualists take notice of their saying, "Glory be to thee, O Lord," at the naming of it. Formerly those who had staves laid them down as a sign of submission to the Gospel; and the military orders, after the example of the Polish king Michael (1680), drew their swords. It was usual for the people also to listen to the preaching in this posture, although this was not universal. The eucharist was generally received standing, sometimes kneeling, but never sitting. See Bingham, Christ, Antiq. (see Index). See ATTITUDE.

Standing-cup, a cup with a bowl, stem, and foot, in contradistinction to a cup shaped like a modern tumbler. Many ancient examples of such exist in the plate belonging to the colleges of great universities.

Standing-light. See STANDARD.

Standing, a mediaval term for the inkbstand found in the scriptorium, monastery, and in the vestry or sacristy of a church.

Stanford, David, a minister of the Methodist Episcopal Church, South, was born in Pike County, O., Dec. 14, 1817. He united with the Methodist Episcopal Church in 1825; was licensed to preach July 10, 1841, and served as a pastor and preacher. In 1865 he entered the regular ministry of the Christian Union Church, afterwards in connection with the Methodist Episcopal Church, South. He died at his residence near Clay City, Clay Co., Ill., April 1, 1868. See Min. of Conf. of the M. E. Ch., South, 1868, p. 293.

Stanford, John, a Baptist minister, was born at Wandsworth, Surrey, England, Oct. 20, 1754. Early confirmed in the Church of England, he nevertheless engaged in the study of theology, and was ordained in 1781. He returned to New York in the following month and opened an academy there. In 1787 he accepted a call from the Church in Providence, R.I., and was shortly after called to the church of Brown University. He returned to New York in November, 1789, and resumed teaching. In 1794 he erected in Fair (now Fulton) Street a building to be used as an academy and lecture-room, and held services on each Sunday. A Church organization was the result, and he became its pastor; but his congregation becoming scattered and the organization was discontinued in August, 1808. In 1807 he set up as a supply for the Bethel Church in Broome Street. In March, 1808, he preached for the first time in the Almshouse, and in June, 1818, became its chaplain. His life until its close was devoted to degraded, fallen humanity. He labored in the State-prison Bridewell, the Magdalene Asylum, the Magdala Retreat, the Penitentiary, Lunatic Asylum, and other charitable institutions. He was honored with the degree of D.D. from Union College. His death took place Jan. 14, 1884. Dr. Stanford published, An Address on the Burial of the Orphan House, Philadelphia (1822)—On the Laying of a Corner-stone of the Orphan House, Greenich (1823)—Discourses (1824, 1825), and The Aged Christian's Companion (1829, 8vo). See Sprague, Annals of the Amer. Pulpit, vi. 274.
1704. He was also Tuesday lecturer at the Church of St. Lawrence, Jewry. At the convocation of the clergy in February, 1714, he was elected proctor, to which position he was twice re-elected. He died at Bath, March 18, 1728. In his will he left two hundred and fifty pounds to found an exhibition for a king's scholar of Canterbury school. He published a translation of Thomas à Kempis's De Imitatione Christi (1696, 8vo):—A translation of Charron's Treatise on Wisdom (1657, 8 vols. 8vo):—Meditations of the Emperor M. Aurelius Antoninus (1699, 4to):—Truth and Excellency of the Christian Religion Asserted, etc. (Boyle Lectures, 1706, 4to):—a fourth edition of Parson's Christian Directory (1716, 8vo):—a free version of St. Augustine's Meditations (1728, 8vo):—Grounds and Principles of the Christian Religion:—Sermons, etc. See Chalmers, Biog. Dict. s. v.; Allibone, Dict. of Brit. and Amer. Authors, s. v.

Stanhope, Lady Hester, whose remarkable life in Mount Lebanon may be numbered among the most interesting romances of history, was born March 12, 1776. Her father was the celebrated lord Stanhope, and her mother a daughter of the great Earl of Chatham; consequently she was niece to William Pitt, in whose house she resided, acting as his private secretary and sharing in all his confidences. Biographers are silent on the causes which influenced her fate after the death of her uncle, but they were principally two: First, the disgust of her high nature for European society, created by her knowledge of the secrets of diplomacy and the hollow, deceitful life of all around her; and, secondly, the mystical influence which prevailed for about ten years at that period, and of which history takes little note. It is certain, however, that from 1794 to the death of Pitt startling announcements were continually made by private letters to the minister, and prophecies were actually fulfilled both in England and France. It is probable that these circumstances, exaggerated by her unstrained imagination and her longing for the free simplicity of nature, finally determined lady Stanhope to leave England. William Pitt having recommended his niece to the care of the nation, she received a pension of twelve hundred pounds per annum, with which, after his death, she commenced a life of great state in the East, and acquired immense influence over the Arabian population. Her manner of life and romantic style are well known; we will only add, therefore, that it is unfair to judge her character from the reports of English travellers, for she was one of those high-souled women who not only refused allegiance to the empty mannerisms she had cast off, but was well able to answer every fool who forced his way into her presence according to his folly. She never married, but adopted the habit of an Arabian cavalier, and under those bright skies rode and dwelt where she pleased, virtually queen of the deserts and mistresses of the ancient palaces of Zeno-bia. Her religion, which seems to have been sincere and profound, was compounded in about equal propor-

Stanhope's Grave.
Stanley, Julius A., a minister of the Methodist Episcopal Church, South, was born in Lagrange, Ga., in 1834. He received license to preach in Camden, Ark., in 1858, and was admitted into the travelling ministry. He was a superb preacher. He held the Little Rock Conference from 1867 until his death, Nov. 9, 1868. See Minutes of Annual Conferences of the M. E. Church, South, 1869, p. 372.  

Stanley, Thomas, an accomplished English scholar, son of Sir Thomas Stanley, of Laytonstone, Essex, was born in 1625. He graduated from Pembroke Hall, Cambridge. Having spent some time in the Netherlands, he took up his residence in the Middle Temple. He died at his lodgings, Suffolk Street, parish of St. Martin's-in-the-Fields, April 12, 1678. Mr. Stanley owed his reputation as a scholar principally to his History of Philosophy, containing the Lives, etc., of the Philosophers of Every Sect (1655, in parts; 1660, 1665, 1746, 4to). It was translated into Latin (1671). Among his manuscripts was A Critical Essay on the First-fruits and Tenths of the Spoil. See Chalmers, Biog. Dict. s.v.  

Stanley, William, an English divinity, was born at Hinckley, Leicestershire, in 1647, and was educated at St. John's College, Cambridge. In 1669 he was made a canon residuary of St. Paul's. In 1692 he was made archdeacon of London, and in 1706 dean of St. Alban's. He died in 1741. His Discourses, The Devotions of the Church of Rome Compared with those of the Church of England (London, 1685, 4to): —The Faith and Practice of a Church of England Man (1688, 8vo): —Essay on Theology (8vo): —Sermons (1692, 1708): and two tracts. See Hook, Eccles. Biog. s.v.; Allibone, Dict. of Brit. and Amer. Authors, s.v.  

Stanley, Frank, a minister of the Methodist Episcopal Church, South, was born at Newbern, N. C., March 31, 1807. He was licensed (1829) by the Supreme Court of his state to practice law, but, meeting with a change of heart, he felt it his duty to preach, and in 1831 was admitted into the Virginia Conference. Within its bounds he labored until October, 1861, when he died of apoplexy. See Minutes of Annual Conferences of the M. E. Church, South, 1862, p. 387.  

Stanbury, John T., a minister of the Methodist Episcopal Church, was born in Baltimore, Md., July 15, 1828, and joined the Church when about ten years of age. Not long after he removed to Dubuque, Ia.; but returned, and was admitted into the Baltimore Conference in 1856. In 1858 he became superintendent, and held that relation until his death, at Baltimore, Md., Jan. 26, 1873. See Minutes of Annual Conferences, 1873, p. 32.  

Stantes Laci, a name given in the early Church, to the laity who remained faithful to their vows. They helped to form the councils held to treat of the case of those who had lapsed into idolatry (Cyprian, Epist. 31). See Coleman, Ancient Christianity, p. 184.  

Stanton, Benjamin Franklin, a Presbyterian minister, was born at Stonington, Conn., Feb. 12, 1769. He graduated at Union College in 1811; studied theology for some months under the distinguished Hebrew

in Princeton Theological Seminary, 1815; was licensed by the Presbytery of New Brunswick in April, 1815; ordained and installed pastor of the Presbyterian Church in Hudson, N. Y., Nov. 19 of the same year; resided on account of ill-health, April 20, 1824; in 1825 became pastor of the Congregational Church in Bethlehem, Conn. In 1825, owing to continued and increasing ill-health, he again resigned his pastoral charge, removed to Virginia, and preached to the Hanover Church until 1842. After the death of Rev. John H. Rice, D.D., professor in the University of Virginia, he wrote a Memoir by his son, Arthur Penryhn Stanton, A.M. (1851, 8vo; 2d ed. 1862). See Allibone, Dict. of Brit. and Amer. Authors, s.v.; English Cyclop. s.v.  

Stanzioni, Massimo, an Italian painter, was born at Naples in 1585. He was the pupil of Caracciolo, but afterwards became the imitator of the great Bolognese painters, especially Guido Reni. He was an excellent portrait-painter, and was also distinguished for his frescos. There are several excellent works of his in the Church of Certosa at Naples, especially the picture of St. Bruno Presenting the Rules of his Order to his Monks. In the same church is a picture of a dead Christ and the Maries, which, as it had somewhat darkened, Spagnoletto, through jealousy, persuaded the Carthusians to wash with a corrosive water, which completely spoiled it. Stanzioni would not restore it, preferring to leave it as a monument of Spagnoletto's meanness. Stanzioni died at Naples in 1666.  

Stapf, the name of two Roman Catholic theologians, viz.  

Stapfer, Johann Friedrich, brother of the preceding, was born in 1718 at Brugg, in the canton of Argovia; after studying theology and philosophy in Holland and Germany, he returned to Switzerland and became pastor of the important parish of Diesbach, where his vast knowledge rendered him very useful to a wide community. He died in 1778. The following are his works, which are largely tinged with the theories of Leibniz and Wolff: De Divinatione in Mysteriis Philosophiae Naturae (Zurich, 1741) — Institutiones Theologicae-poloniae (ibid. 1752) — Grundlagen der sakral Religion (ibid. 1746-54, 13 vols.) — Die christliche Moral (ibid. 1756-66, 6 vols.). See Herzog, Real-Encyklop. s. v.

Stapler, Philipp Albert, a nephew of both the foregoing, was born at Berne, Sept. 25, 1766. After studying at the Gymnasium, he was in 1792 appointed director of the steadily growing number of the Lower Germanic High-schools and in 1792, and during the stormy times that followed the French invasion (1798) he was a bulwark against the unhappier influences resulting in civil and religious life. He retired to privacy in 1804, and died after a long illness, March 27, 1840. Besides contributions to journalistic literature, he wrote a number of works on religion, philosophy, and morals, and all of these works, and geographical character, which are all enumerated in Herzog, Real-Encyklop. s. v.

Staphylus, in Grecian mythology, was — 1. A son of Bacchus and Ariadne, an Argonaut. 2. A shepherd of King Cnossus, to whom the latter taught the art of playing on the organ; and after he had dismembered a few of the organ pipes, he was turned into a grape. 3. A son of Bacchus and Erigone. The former assumed the form of a grape, which Erigone ate. She immediately realized that she was with child, and, in time, gave birth to a son, whom she named Staphylus (a grape).

Staphylus, Friedrich, a noted theologian of the middle of the 16th century, born at Osawbruck, in Westphalia, Aug. 17, 1512 (O. S.), and educated at Wittgenberg under Luther and Melanchthon, became known chiefly as an ambitious and equivocal character, and an active participant in the theological disputes of his time. He was, on the recommendation of Melanchthon, made professor of theology in 1546 at the newly founded University of Königsberg, and acquired some reputation as a lecturer; but he signalized himself more especially by his quarrels with Guimpheus (q. v.) and Osianer (q. v.). The former, who was the poorly paid rector of the Königsberg Gymnasium, had ventured to express the opinion that the theological professors might lecture more diligently in view of the general readiness they had received, and was in consequence made to suffer petty persecutions from the combined influence of the faculty, composed of Staphylus, Herzog, and Osianer, until they succeeded in having him formally deposed from his office, as a teacher of false doctrine, and publicly excommunicated, June 9, 1549. The last, though a foreigner and neither a master nor doctor of divinity, was called by duke Albert of Brandenburg to the first theological chair in the university; and the older professors, conceiving that their own claims were thus ignored, endeavored to bring about his dismissal. Osianer was, however, able to defeat their project, and Staphylus in 1553 was named a member of the Germanic. Finding Osianer still in favor on his return, he demanded his dismissal, which, somewhat to his surprise, was immediately granted; and thereupon he went over to the Roman Catholic Church, giving as his only reason the disagreements of Lutheran theologians and the dangers impending over Protestants. He became councillor to the bishop of Breslau, and aided in a reform of the clergy, afterwards rendering valuable services in other directions. He established a good school at Neisse, in Silesia. In 1554 he was made imperial councillor, in which capacity he participated in several religious conferences, and contributed much towards the advancement of the Roman Catholic Church of Austria. While retaining that dignity he was called to Bavaria and made curator of the University of Ingolstadt, whose faculty he improved by the appointing of a number of capable professors. His multifarious labors heightened his reputation to such a degree that he was regarded as the superior of Eck in scholarship and devotion to the Church, and was desired to obtain the doctorate of divinity, though he was a layman and married, and by a donation of a hundred gold crowns in money, accompanied with a polite letter of approval from pope Pius IV himself, to which the emperor Ferdinand added a patent of nobility and duke Albert of Bavaria an estate. He died of consumption, March 5, 1564, and was buried in the Franciscan church at Ingolstadt. The writings of Staphylus were collected by his son Frederick, and published in Latin in 1618 at Ingolstadt. A list of them is given in Koloth's Gelehrten-Lex. They include works of a polemical character, a Biography of Charles V., etc. — Dr. Diodorus Siculus in Latin, etc. See Nachrich von dem Leben und Schriften Staphylus, in Strobel's Miscellen (Nuremberg, 1778), 1 sq.; Hartknoch, Preussische Kirchen-Hist. (Franz. ad M. and Leips. 1686, 4to); Arnold (Gottfried), Kirchen- u. Ketzer-Hist. (Franz. ad M.), pt. ii, vol. xvi, ch. viii, xxviii sqq.; Salig, Gesch. d. Augs. Conferentia bis 1555 (Halle, 1847, 4to); Planeck, Gesch. d. Exeterer, Veränderung u. Bildung unseres protest. Lehrbegriffs bis zur Concordien-Formel (Leips. 1796, 8vo), IV, ii, 249 sq.

Stapledon, Walter, an English prelate, was born (according to Prince) at Anney, in the parish of Monkleg, near Great Torrington, Devonshire. Our knowledge of his history begins with his advancement to the bishopric in 1607, its installation which was accompanied by ceremonies of magnificent solemnity. He was chosen one of the privy council to Edward II, appointed lord-treasurer, and employed in embassies and other weighty affairs of State. In 1325 he accompanied the queen to France, in order to negotiate a peace, but her intention to depose her husband did not meet his approval, and he was early sacrificed in an early sacrifice. He was appointed, in 1326, guardian of the city of London during the king's absence in the West, and while he was taking measures to preserve the loyalty of the metropolis the populace attacked him, Oct. 15, and beheaded him, together with his brother Sir Richard Stapledon, near the north door of St. Paul's. By the order of the queen the body was afterwards removed, and interred in Exeter Cathedral. Exeter House was founded by him as a town residence for the bishops of the diocese. He also founded, in 1516, Exeter College, which was called by his name until 1494, when it was called Exeter Hall.

Staples, Allen, a Methodist Episcopal minister, was born at Cheshire, Mass., July 15, 1810. He was li-
censed to exhort in 1835, admitted on trial in the Michigan Conference in 1836, and was appointed to the Saline Circuit; 1837, Bean Creek mission; 1838, Marshall Circuit; 1839, ordained deacon and appointed to Grand Rapids mission; 1840, Lyons mission; 1841, superintendent; 1842, Albion Circuit; 1845, superannuated; 1844, ordained elder and appointed to Plymouth Circuit; 1845, Farmington Circuit; 1846, superannuated. He died Oct. 21, 1847. He was modest and unassuming; as a Christian, eminent; in his piety; more than in anything else. He was a man of great usefulness. His zeal for the salvation of men was proverbial. See Minutes of Annual Conferences, iv. 275.

Staples, John, a Congregational minister, was born at Taunton, Mass., in 1743. He graduated at the College of New Jersey in 1765, was ordained over the church in Westminster, Conn., in 1772, and continued pastor until his death, of putrid fever, Feb. 16, 1804. He was of moderate Calvinistic views, although disliking the views of Hopkins. See Cong. Quarterly, 1860, p. 26.

Stapleton, Thomas, a Roman Catholic clergyman, was born at Henfield, Sussex, England, in 1355. He was educated at Canterbury and Winchester, and then removed to New College, Oxford, where he obtained a pension in 1354. In that year, having been knighted, he married Mary, who was made prebendary of Chichester; but, on the accession of Elizabeth, left the kingdom, and settled at Louvain, where he distinguished himself by his controversial writings against Jewell, Horne, Whitaker, and other eminent divines of the English Church. He also visited Paris and Rome; but returned to Louvain, where he translated Bede's "Church History into English. He was made regius professor of divinity at Douay, and canon in the Church of st. Amoure. He became a Jesuit, but relinquished the order; and was appointed regius professor of divinity at Louvain, canon of St. Peter Nahi, bishop of Hildeberga in 1558. His chief works are, "Sta Thoma: seu Res Gestae S. Thoma Apost. S. Thoma Archbisp. Cant., et Thoma Mori:—Oraciones Funebrae (Antwerp, 1577)—"Oraciones Catecheticae (Ibid. 1598)—"Oraciones Academicae Miscellaneae (Ibid. 1600). His works were published collectively at Paris in 1620 (4 vols. fol.), to which is prefixed his life by Hollendon.

Star (סער, kokāb; אֶּשֶּר or dâsōn; but "seven stars" in Amos v, 8 is הַשָּׁם, kimāh, the "Plieades," as rendered in Job ix, 9; xxxvii, 8; and "day-star" in 2 Pet. i, 19 is υφίστατος, Venus in the morning). The ancient Israelites knew very little of the starry heavens, if we may judge from the indications of the Bible, which contains no trace of scientific astronomy. We find there only the ordinary observations of landmen (Amos v, 8), especially shepherds (Psa. viii, 9), for instance, such as would observe on open plains (see Von Hammer in the Fundgruben, i. 1 sq; ii. 235 sq). The patri- archs observed the stars (Gen. xxxvii, 9); and metaphors drawn from the stellar world, either with reference to the number of the stars (xxxi, 17: Exod. xxv. 6, etc.), or to the brightness (Num. xxiv. 17; Psal. xiv. 12; Rev. xii. 5), were early in frequent use (see Langerker, Daniel, p. 237 sq.). The sun and moon, of course, were readily distinguished from the other celestial luminaries (Gen. i, 16; Psa. cxxxvii, 7; Jer. xxxi, 5) on account of their superior size and brilliancy; and from the name as well as period of the latter (םל) the earliest form of monthly designation of time was taken. See MOON. The Phenicians, Babylonia, and Egyptians, that people whose level country as well as agricultural or naval interests, and especially the intense brilliancy of their sky by night (Hackett, Illust. of Script. p. 30), inclined them to an observation of the heavens, far surpassed the Hebrews in astronomical knowledge (see Dioec Sic. i, 50, 62, 81; ii, 31; Strabo, xvii, 8, 16; Macrobi. Sat. 1, 19); and the Egyptians were the first to ascertain the true length of the solar year (Herod. ii, 4). See YEAR. Under the name of stars the Hebrews comprehended all constellations, planets, and heavenly bodies, with the exception of the moon. No part of the visible creation exhibits the glory of the Creator more illustriously than the starry heavens (Psa. viii, 3; xiii, 1). The Psalmist, to exalt the power and omniscience of Jehovah, represents him as taking a survey of the stars as a king taking a review of his army, and knowing the name of every one of his soldiers (xxxvii, 4). Among the Hebrews stars were frequently employed as symbols of persons in eminent stations. Thus "the star out of Jacob" designates king David, the founder of the Hebrew dynasty, according to others the Messiah (Num. xxiv. 17; see Georgi, De Stella ex Jaco. Regiorum) (see Jean de la Chambre, Trib. de l'Astron. [Teb. 1776]). The patriarchs are called "stars" (Gen. xxxvii, 9); so also "stars" denote the princes, rulers, and nobles of the earth (Dan. viii, 10; Rev. vi. 18; viii, 10, 11; ix, 1, xii, 4). Christ is called the "Morning Star," as he introduced the light of the Gospel day, and made a fuller manifestation of the truths of God than the ancient prophets, whose predictions were now accomplished (xxxi, 16). In allusion to the above prophecy in Numbers, the infamous Jewish impostor Bar-cocba, or, as the Romans called him, Bar-cocheba (q. v.), who appeared in the reign of Hadrian, assumed the pompous title of "Son of Star," among the Jews, as if it was a title peculiar to the star out of Jacob; but this false Messiah was destroyed by the emperor's general, Julius Severus, with an almost incredible number of his deluded followers. Stars were likewise the symbols of a deity—"The star of your god Chion" (Amos v, 26). Probably the figure of a star was fixed on the head of the image of a false god. See CHIN.

The study of the stars very early in the East (as eventually in the West likewise, Caesar, Bell. Gall. vi, 21) led to star-worship (Ws. xiii, 2); in fact, the religion of the Egyptians, Chaldeans, Assyrians, and ancient Arabsians was nothing else than astrology (Michau, Abola Sarra, iv, 7), although at first this relation is not so apparent (see Wernsdorff, De Cultu Astrorum [Gedan. 1746]). Hence the Mosaic law sternlywarned the Israelites against this idolatry (Deut. iv, 19; xvii, 8); yet they set at length (in the Assyrian period) the sun and stars into their calendar (xv, 12; Jer. xxxi, 5; xxi, 16; Zeph. i, 5). The account given of it by Ma- monides is both curious and instructive. "In the days of Enos, the son of Seth, the son of Adam erred with great error, and their error was this: and the counsel of the wise men became brutish, and Enos himself was deceived by them. They said, the stars, who hath created these stars and spheres to govern the world, and hath set them on high, and imparted honor unto them, and they are ministers that minister before him, it is meet that men should laud and magnify and give them honor." So, in process of time, the glorious and fearful Name was forgotten out of the mouth of all living, and out of their knowledge, and they acknowledged him not. . . . And the priests, and such like, thought there was no God, save the stars and spheres, for whose sake, and in whose likeness, they made their images; but as for the Rock Everlasting, there was no man that did acknowledge him or kept him, save a few persons in the world, as Enoch, Methuselah, Noah, Shem, and Heber; and in this way did the world walk and converse till that pillar of the world, Abraham our father, was born." See STAR—GAZER.

A brief allusion to a few modern discoveries respecting the stars will be proper to close the present chapter, especially their inconceivable extent. Astronomers tell us that the nearest of the fixed stars is distant from us twenty millions of miles; and to give us some idea of that mighty interval they tell us that a cannon-ball flying at the rate of five hundred miles an hour would not reach that star in less than four milli-
tion of that divine pre-arrangement whereby, in his deep humiliation among men, the child Jesus was honored and acknowledged by the Father as his beloved Son in whom he was well pleased. Thus the lowly shepherds who kept their nightly watch on the plains near Bethlehem, together with all that remained of the highest and freest portion of the partakers and the witnesses of the glory of him who was "born in the city of David, a Saviour which is Christ the Lord." Such is substantially the account which, until the earlier part of the present century, would have been given by orthodox divines of the star. Indeed, the Gothic learning of Christian divines have combined with the unfriendly daring of infidelity to cast difficulties on the particulars involved in this passage of Holy Writ. Much has been written by friends and enemies on the subject. The extreme rationalistic view is given by Strauss (Leben Jesu, 1, 249). See Jesu Ercuest.

2. Latterly, however, a very different opinion has gradually become prevalent upon the subject. The star has been displaced from the category of the supernatural, and has been referred to the ordinary astronomical phenomenon of a conjunction of the planets Jupiter and Saturn. The idea originated with Kepler, who, among his other brilliant speculations, was supposed that if he could identify a conjunction of the above-named planets with the Star of Bethlehem he would thereby be able to determine, on the basis of certainty, the very difficult and obscure point of the Annunciation. Kepler’s suggestion was worked out by Dr. Ideler of Berlin, and the results of his calculations, certainly do, on the first impression, seem to show a very specious accordance with the phenomena of the star in question. We purpose, then, in the first place, to state what celestial phenomena did occur with reference to the planets Jupiter and Saturn at a date assuredly not very distant from the time of our Saviour’s birth, and then, in the second place, to examine with the perspicacity and backing of our present day, whether the conditions required by the narrative in Matthew. (In this discussion we freely use the materials afforded in Smith’s Dict. of the Bible, with additions from other sources.)

In the month of May, B.C. 7, a conjunction of the planets Jupiter and Saturn occurred not far from the first point of Aries, the planets rising in Chaldea about three and a half hours before the sun. Kepler made his calculations and found that Jupiter and Saturn were in conjunction in the constellation Pisces (a fish is the astrological symbol of Judaea) in the latter half of the year 747, and were joined in the year 748. It appears that Jupiter and Saturn came together for the first time on May 20 in the twentieth degree of the constellation of the Fishes. Jupiter then passed by Saturn towards the north. About the middle of September they were, near midnight, both in opposition to the sun—Saturn in the thirteenth, Jupiter in the fifteenth degree—being distant from each other about a degree and a half. They then drew nearer. On Oct. 27 there was a second conjunction in the sixteenth degree, and on Nov. 12 there took place a third conjunction in the fifteenth degree of the same constellation. In the two last conjunctions the interval between the planets amounted to more than twice as great, so that to the unassisted eye the rays of the one planet were absorbed in those of the other, and the two bodies would appear as one. The two planets went past each other three times, came very near together, and showed themselves all night long for months in conjunction with each other, as if they would never separate again.

It is said that a well-known astronomer of that time supposed such a conjunction could not fail to excite the attention of men like the magi, and that in consequence partly of their knowledge of Balaam’s prophecy, and partly from the uneasy persuasion then said to be prevalent that some great one was to be born in the East, these magi commenced their journey to Jerusalem. Supposing them
at least seven months, the planets were observed to separate until the end of July, when, their motions becoming retrograde, they again came into con-
junction by the end of September. At that time there can be little doubt that they would present to astronomers, especially in so clear an atmosphere, a magnificent spec-
tacle. It was then at its most brilliant apparition, for it was at its nearest approach both to the sun and to the earth. Not far from it would be seen its duller and much less conspicuous companion, Saturn. This glori-
ous sight would have lasted for several days, when the planets again slowly separated, then came to a halt, when, by reasserting a direct motion, Jupiter again approached to a conjunction for the third time with Saturn just as the magi may be supposed to have entered the holy city. To complete the fascina-
tion of the tale, about an hour and a half after sunset the two planets might be seen from Jerusalem, hanging, as it were, in the meridian, and suspended over Bethle-
hem in the distance. These celestial phenomena thus described are, it will be seen, beyond the reach of ques-
tion, and at the first impression they assuredly appear to fulfill the conditions of the star of the magi.

The first circumstance which created a suspicion to the contrary arose from an exaggeration, unaccountable for any man having a claim to be ranked among as-
tronomers, on the part of Dr. Idolcr himself, who de-
scribed the two planets as wearing the appearance of one bright but diffused light to persons having weak eyes (5, 407). Not only is this imperfect eyesight in-
flicted upon the magi, but it is quite certain that had they possessed any remains of eyesight at all they could not have failed to see, not a single star, but two planets at the very considerable distance of double the moon’s apparent diameter. Had they been even twen-
ty times closer, the duplicity of the two stars must have been apparent; Saturn, moreover, rather confusing than adding to the brilliance of his companion. This forced blending of the two lights into one by Dr. Idolcr was still further improved by dean Alford in the first edition of his very valuable and suggestive Greek Test-
ament, who, indeed, restores ordinary sight to the magi, but represents the planets as forming a single star of surpassing brightness, although they were certainly at more than double the distance of the sun’s apparent diameter.

Exaggerations of this description induced the Rev. Charles Pritchard, honorable secretary of the Royal Astronomical Society (in the Memoirs of the Ro-
al Astronomical Society, vol. xxxv), to undertake the very arduous labor of calculating fresh ephemerides of the planets Jupiter and Saturn and of the sun from May to December, B.C. 7. The result was to confirm the fact of there being three conjunctions during the above period, though somewhat to modify the dates as-
gsigned to them by Dr. Idolcr. Similar results, also, have been obtained by Enecke, and a December conjunction has been confirmed by the astronomer royal. No celes-
tial phenomena, therefore, of ancient date are so cer-
tainly ascertained as the conjunctions in question.

We will now proceed to examine to what extent, or, as it will be seen, to how slight an extent, the De-
cember conjunction fulfills the conditions of the narra-
tive of Matthew. We can hardly avoid a feeling of regret at the dissipation of so fascinating an illusion; but we are in quest of the truth rather than of a picture,

however beautiful.

(a) We are profoundly ignorant of any system of
astrology as held by the magi in question; but sup-
posedly this was natural, and it did explain how incoincible that solely on the ground of astrological reasons men would be induced to undertake a seven months’ journey. As to the widely spread and preva-
 lent expectation of some powerful personage about to show himself in the East, the fact of its existence de-
 pends on the testimony of Tacitus, Suetonius, and Jo-

ning to Vespasian, in A.D. 69, which date was seventy-
five years, or two generations, after the conjunctions in question! The well-known and often-quoted words of Tacitus are, “eo ipso tempore;” of Suetonius, “eo tem-
po re;” of Vettius Valens, “vel sacrati venire;” all pointing to A.D. 69, and not to B.C. 7. Seeing, then, that these writers refer to no general uneasy expecta-
tion as prevailing in B.C. 7, it can have formed no re-
spons for the departure of the magi. Furthermore, it is quite certain that in the February of B.C. 66 (Pritchard, in Treaties on Christianity, vol. xxxv, p. 219), an eclipse of Jupiter and Saturn occurred in the constellation of Pisces, closer than the one on Dec.
4, B.C. 7. If, therefore, astrological reasons alone impelled the magi to journey to Jerusalem in the latter instance, similar considerations would have impelled their fathers to take the same journey fifty-nine years before.

(b) But even supposing the magi did undertake the journey at the time in question, it seems impossible that the conjunction of December, B.C. 7, can on any reasonable grounds be considered as fulfilling the con-
ditions in Matt. ii, 9. The circumstances are as follows:

On Dec. 4 the sun set at Jerusalem at 3 P.M. Suppos-
ing the magi to have then commenced their journey to Bethlehem, they would first see Jupiter and his bull and somewhat distant companion one and a half hour distant from the meridian in a south-east direction, and decidedly to the east of Bethlehem. By the time they came to Rachel’s tomb (see Robinson, Bibl. Res. ii, 500) the planets would be due south of the meridian, and no longer over the hill of Bethlehem (see the maps of Van de Velde and of Tobler), for that village (see Robinson, as above) bears from Rachel’s tomb S. 5° E. 18° declination. S. 18° E. The road then takes a turn to the east, and ascends the hill near to its west-
ern extremity; the planets, therefore, would now be on their right hand, and a little behind them: the “star,” therefore, ceased altogether to go “before them” as a guide. Arrived on the hill and in the village, it be-
came physically impossible for the star to stand over any house whatever close to them, seeing that it was now visible far away beyond the hill to the west, and far off in the heavens at an altitude of 57°. As they ad-
vanced, the star would of necessity recede, and under no circumstances could it be said to stand “over” (στε-
νών) any house, unless at the distance of miles from the place where they were. Thus the two heavenly bodies altogether fail to fulfill either of the conditions implied in the words: τοιαύτην αὐτήν ἔφελον ὑμῖν κ. wv, αὐτήν ὑπέρ τοῖς (see).

A star, if vertical, would appear to stand over any house or object to which a spectator might chance to be near; but a star at an altitude of 57° could appear to stand over no house or object in the immediate neigh-
borhood of the observer. It is scarcely necessary to add that if the magi had left the Jaffa Gate before sunset, they would not have seen the planets at the outset, and if they had left Jerusalem later, the “star” would have been a more useless guide than before. Thus the beautiful phantasm of Kepler and Idolcr which has fasci-
nated so many writers vanishes before the more per-
fect daylight of investigation, so far as it is concerned in an explanation of the guidance to Bethlehem. The ace-
tromonical phenomena, however, may have invited them in part to their visit to Judea.

Kepler’s ideas may be found in the essay De Jes-
Christi Servitoria Nostrl Vero Anno Nataiis, and more fully in De Vero Anno quo Æternas Les Faus 
Humanae Memoriam Mandavit, and the view was taken up and presented with approbation to the literary world by a learned prelate of the Lutheran Church, bishop Münter (Der Stera der Weltcn [Copen-
aug. 1827]). It also gained approval from the celebrated a-
stronomer Schubert, of Potsberg (Vermittelte Schrif-
ten [Stuttg. 1823]). The learned and accurate labe
STAR (Handb. der Chronologie, ii, 399 sq.) reviewed the entire subject and signified his agreement. Hase and De Wette, however, have stated objections. A recent writer of considerable merit, Wieseler (Chronolog. Synop. der 4 Evangelien [Hamb. 1843]), has applied this theory of Kepler's in conjunction with a discovery that he has made from some Chinese astronomical tablets which show that the comet of 750 a.comet appeared in the heavens and was visible for seventy days. Wieseler's opinion is that the conjunction of the planets excited and fixed the attention of the magi, but that their guiding-star was the comet. A modern writer of great ability (Dr. Wordsworth) has suggested the antithesis to Kepler's speculation regarding the star of the magi viz., that the star was visible to the magi alone. It is difficult to see what is gained or explained by the hypothesis. The song of the multitude of the heavenly host was published abroad in Bethlehem, the journey of the magi thither was no secret whispered in a corner. Why, then, should the heavenly light, standing as a beacon of glory over the place where the young child was, be concealed from all eyes but theirs, and form no part in that series of wonders which the Virgin Mother kept and pondered in her heart? A writer in the Journal of Soc. Lit. April, 1857, argues that the magi found the infant Christ at Nazareth, not at Bethlehem; but this is in opposition to the indications of the narrative. See Bethlehem.

The works which have been written on the subject are referred to by Welch, Biblioth. Theol. ii, 422 sq.; Thiers, Crit. Comment. ii, 350 sq.; Volbeding, Index Progrbmaturum, p. 14; Elsner, in the Symb. Liter. Brem. ii, 42 sq. Additional monographs on those there or above cited are the following: Reccardi, De Stella que Magia Apparuit (Regiom. 1756); Kepler, De Weisen aus Orient, in the Rintecl. Anzeig. 1700, p. 4; Sommell, De Stella Nati Regis Judaorum. (Lond. 1771); Velthuesen, Der Stern d. Weisen (Hamb. 1788); Thiers, Die Magier und die 730 Wolken, in der Arg. Theol. Weizen (Leips. 1847): Trench, Star of the Wise Men (Lond. 1830). See Magi.

STAR, GOLDEN, in the Greek Church, is an instrument used by the Greeks in the liturgy, and is a star of precious metal surmounted by a cross, which is placed on the paten to cover the host and support a veil from contact with the eucharist. It recalls the mystic star of the abbot of Hadersleben. At the Church it is a vessel for the exhibition of the host at the communion of the pope on Easter-day. One with twelve rays is used to cover the paten when carried by the cardinal-deacon to communicate the eucharist to the pope.

Stark, Johann August, a German Crypto-catholic, was born in 1741, at Schwerin, where his father was preacher, and studied theology at Göttingen, at the same time entering zealously the order of Freemasons there. After a visit of several years at St. Petersburg, he travelled, in 1765, over England, and finally went to Paris, but returned in 1768 to St. Petersburg. In 1769 he was appointed professor of Oriental languages at Königsberg, and for several years served as court-preacher and professor of Oriental studies in 1776. He afterwards fell into disrepute as unorthodox, in consequence of several publications (for which see Herzog, Renz-Knykelopf, &c.), and after becoming successively professor of philosophy at Münster (1777) and court-preacher at Darmstadt (1781), he finally adopted Roman Catholic associations, and died in 1816, with the apparatus for the celebration of the mass in his house.

Stark, Johann Friedrich, a German theologian, was born Oct. 10, 1809, at Hildesheim, studied theology at Giessen, was appointed in 1715 as pastor of Frankfort-on-the-Main, and died July 17, 1756. He is widely known through his Tüchtige Handbuch in gutem und biesen Tagen (Frankf. 1727; 48th ed. 1870) and Morgen- und Abendandachten von Christen auf alle Tuge im Jahre

--- IX

Stagarzer (starzer, starzer), an astronomical observer, for which the Chaldeans were famous. See Astronomy. In Dan. ii, 27; iv, 7; v, 7, 11, the professed astrologers or calculators of nativities (Gazeris, Chald. 222, 222, 'soothsayers') are named. (The term here rendered "astrologers," asthaksaphim, means conjecturers only.) Diodorus Siculus (ii, 30, 31) says of the Chaldeans, "They assert that the greatest attention is given to the five stars called planets, with which they name interpreters; so called because, while the other stars have a fixed path, they alone, by forming their own course, show what things will come to pass, thus interpreting to men the will of the gods; for to those who study them carefully they foretell events, partly by their rising, partly by their setting, and also by their course, and often they show heavy winds, at others rains, at others eves of human/ heathen misfortune, in the name of comets, eclipses of the sun, earthquakes, and, in general, anything extraordinary, has, in their opinion, an injurious or beneficial effect, not only on nations and countries, but kings and even common individuals; and they consider that those stars contribute very much of good or evil to the life of every individual." The result is, in consequence of the nature of these things, and of the study of the stars, they think they know accurately the events that befall mortals." Comets were, for the most part, considered heralds of evil tidings (Josephus, War, vi, 5, 5). The Orientals of the present day hold astrology in honor (Gazeris, p. 120), and stipendiary astrologers form a part of their court (Kämpfer, A. mus. p. 57, 82). See Astrology.

Stark, Andrew, L.L.D., a Presbyterian divine, was born in the parish of Slamanan, County of Stirling, Scotland, Aug. 3, 1791, of pious parents in easy circumstances. At a very early age Andrew manifested a love of study; he received his first instructions in Latin in his own parish school, but was soon transferred to the grammar-school at Stirling, and afterwards to the University of St. Andrews and to the University of Glasgow. In the beginning of 1805 he entered the University of Glasgow, which he attended for six successive winters, graduating in April, 1811, with the degree of A.M. After leaving the university he taught a public school near Falkirk with great success for upwards of two years. He pursued his theological studies at the seminary in Edinburgh, then under the superintendence of the Rev. Prof. Paxton. Upon leaving the seminary he went to London (Chelsea), where he engaged as a classical teacher in a boarding-school, under the Rev. Weeden Butler, a clergyman of the Church of England. Capt. Frederick Marryat, the distinguished novelist, was one of his pupils. Providential circumstances and careful reflection directed him to the ministry, and he was soon licensed by the Associate Presbytery of Edinburgh. His first sermon was preached Oct. 26, 1817, in the pulpit of his cousin, Rev. Dr. Stark, of Denny Loanhead; and it was a singular coincidence that he preached for the last time in his life in the same pulpit. His first settlement as pastor was over the congregation of South Shields, Sept. 16, 1818; but after a few months he resigned, and the Presbyterian reluctantly dissolved the pastoral relation, June 14, 1819. For a year he was employed as a private tutor in the family of Sir Frederick Vane. In June, 1820, he proceeded once more to London, and near the end of August embarked for New York, where he arrived Oct. 6. He came to this country without any fixed purpose as to employment, willing to teach or preach as Providence might seem to direct. For a year he preached occasionally, and superintended the studies of two or three boys, the sons of wealthy
gentlemen in the city of New York. Dr. Mason, who was then president of Dickinson College, proposed to him to become a professor in that institution, and he was not disinclined to listen to this proposal; but just at this time circumstances occurred which led him to devote himself to the ministry. He was united with the Associate Presbyterian Church (then in Nassau Street, afterwards in Grand Street, and now in Thirty-fourth Street) in the city of New York, which had lately lost its pastor, the Rev. Thomas Hamilton, invited Mr. Stark at first to become their stated supply, and soon to become their pastor; and he was installed in that capacity in the early part of May, 1823. Under his care the Church grew, by gradual and healthful accessions, and became distinguished for its stability. He was honored with the degree of LL.D. by the University of London about the year 1844 or 1845. Dr. Stark labored incessantly for the moral and spiritual welfare of his people; many sought his counsel and advice in their worldly affairs, and some who became wealthy attributed their success to his judicious advice and assistance. He secured both the respect and love of his people, who on many occasions manifested their high regard for him by the most delicate and kindly acts. Dr. Stark had naturally a good constitution, but it had been greatly impeded by the long and arduous exertions he made in London and the United States. At length he became so enfeebled that his physician urged him to make a visit to his native country, and accordingly he embarked for England July 3, 1849. Soon after his arrival in Scotland his symptoms became much more unfavorable, and he died Sept. 1, 1849, at a place near Edinburgh, in the house of his cousin, the Rev. Dr. Stark. His remains were brought to New York, and interred in Greenwood Cemetery. In person Dr. Stark was of medium height, and of symmetrical and graceful proportion; his high forehead and dark piercing eyes indicated a mind of more than ordinary power. In manner he was dignified and courteous, yet pleasing and affable. To a stranger he might seem distant and reserved, but those who knew him well and had his confidence found him frank and cordial. He never professed what he did not feel, and abhorred hypocrisy and sham in all their forms. As a scholar he had few superiors. In the classics, in history, theology, philosophy, and in general literature, he was competent to fill the chair of a professor. Such was his familiarity with Homer's Iliad that he was heard to say that if the last copy of it were lost from the world, he thought he could reproduce it without much difficulty. As a preacher he was not only popular and powerful, but full of the power of securing the attention of his hearers. He made most careful preparation; in early life he wrote out his sermons in full, and committed them to memory: but later he usually wrote very full outlines of his sermons, studying his subject with great care, rendering it both instructive and interesting. In expository preaching he had few equals. His correct learning and superior culture, his extensive and varied knowledge of literature, both ancient and modern, enabled him to illustrate and enforce the truths which he proclaimed with peculiar aptness, beauty, and power. His preaching was calculated to reach the very thoughts of his listeners, and was enlightening and stable Christians: his manner in the pulpit was solemn and impressive; his fervor and unction convinced every hearer that he magnified his office and felt what he uttered. As a pastor he was conscientiously faithful, and watched with tender care the flock over which God had placed him as overseer. He was prompt in all his engagements, and never failed to fulfill an appointment. He was more frequently seen in the homes of the poor than in the mansions of the rich; he formed his estimate of men not by their wealth or rank, but by their worth, and especially by their piety. The worthy pastor has left his mark in his pastorate, in the sympathies of a deeply feeling friend. He was generous, but unostentatious in his charities, keeping his benefactions a profound secret. His whole life, public and private, was in keeping with his high calling; he was a living epistle known and read of all men, a noble Christian gentleman, and a faithful ambassador for Christ. Dr. Stark was married May 8, 1828, to Ellen, daughter of John and Mary McKie, of New York. They had five children—three daughters and two sons. The eldest son, John M., was graduated at Union College in 1842, and, succeeding the Rev. Mr. Stark at the New York College of Physicians and Surgeons, and had the position of surgeon under the government in the late war of the Rebellion; the eldest daughter is married to the Rev. Andrew Shiland. Dr. Stark was an ornate and instructive writer, and, when he chose, wrought with his pen. Many of his sermons and much of his correspondence may be mentioned: Charitae Exercitationes Orationes et Sermones, a Metrical Version of the Psalms of David Defended, a Biography of Rev. James White, prefixed to the Sermons of the latter, A Lecture on Marriage, Remarks on a Pamphlet by the Associate Presbyterian of Albany, in a Letter to the Associate Congregation of Grand Street, A History of the Secession, published in the Associate Presbyterian Magazine, to which publication he contributed largely. (W. P. S.)

Stark, Heinrich Benedict, professor of Oriental languages at Leipzig, was born in 1672, and died July 18, 1727. He wrote, Greek Grammar, Latin Grammar, Hebraica ex Clariss. kuyus Lignum Luminantis, etc. (2d ed. Lips., 1706, and often; last ed. by Bosse, 1764);—Luz Accentuations HEBREVS (ibid. 1707);—Hebraismus Eklektus (ibid. 1710);—Hebraistische Schriften (ibid. 1714);—Apostolische Inschriften in PONT., etc., etc. (ibid. 1714). See Forst, Bibl. Jud., iii, 378; Winer, Handbuch der theol. Literatur, i, 115, 195, 240, 268; ii, 788; Steinschneider, Bibl. Himmdb., p. 135. (B. P.)

Stark, Jedediah Lathrop, a Dutch Reformed minister, was born at New London, Conn., March 6, 1738. He was a graduate of Brown University in the class of 1758. He spent two years in theological study, and in the autumn of 1820 was ordained pastor of the West Parish Church (Congregational) in Brattleborough, Vt., where he preached for fourteen years (1820-34), and then removed to Buell, N.Y., and was pastor of a Church in that place eight years (1834-42). In 1842 he accepted an invitation to become the minister of a Dutch Reformed Church in Mohawk, N.Y., where he remained sixteen years (1842-58). The last four years of his life he was unable to perform much ministerial service on account of ill-health. He died at Mohawk, N.Y., Oct. 16, 1862. (J. C. S.)

Stark, Mark Y., a Presbyterian minister, was born at Dunfermline, Scotland, Nov. 9, 1759. He was educated at the University of Edinburgh, and graduated in divinity in 1821, studied theology at the same university, was licensed by Glasgow Presbytery of the National Church of Scotland, and afterwards travelled on the Continent and extended his studies, attending lectures at the University of France as well as at Berlin. In 1838 he emigrated to Canada, and was soon after installed as pastor of the congregations at Ancaster and Dundas. He occupied the moderator's chair of the last synod held before the division of the Church in Canada, and of the first Free Church Synod in Kingston in 1844. In 1861, when the "union" of the churches of Canada was consummated, he was connected with his brethren in 1862, on account of infirm health, he resigned his charge, and died Jan. 24, 1865. See Wilson, Preb. Hist. Almanac, 1867, p. 483.

Starkie, Christoph, a German divine, was born March 21, 1884, at Freienwalde, and died Dec. 12, 1744, as pastor primarius at Driesen, in the Neumarck. He is best known by an edition of Synopsis Bibliothecae Literarum in Y. et N. Testamentum (1738-41, 9 vol., published at Berlin 1865-68). See Thol. Universel-Lex. s. v.; Först, Bibl. Jud., iii, 378; Winer, Handb. der theol. Literatur, i, 186; ii, 788. (B. P.)

Starkkoder, in Norse mythology, was a monstrous giant of Danish race who is said to have had eight
hands. He became celebrated throughout the world on account of his Titanic deeds, and lived to the age of 250 years.

Storobradzti is the official name of a numerous class of Russian dissenters who called themselves Storobraztsi. See Russian Sects, § 1, 4.

Starr, Charles, a minister of the Methodist Episcopal Church, was recommended and admitted into the Oneida Conference, September, 1834. He continued in the active ministry until his superannuation, about 1860. He afterward served as a delegate to the General Conference. Mr. Starr was a preacher of more than ordinary gifts, and very successful in winning souls to Christ. See Minutes of Annual Conferences, 1865, p. 69.

Starr, Frederick, a Presbyter, was born in Rochester, N. Y., Jan. 23, 1826. He was converted when ten years of age; graduated at Yale College in 1846, and at the Theological Seminary at Auburn, N. Y., in 1849. Early in 1850 he turned his steps westward, and, under Dr. Bullard, began his labors as a city missionary in St. Louis; was ordained and installed by Lexington Presbytery as pastor of the Church in Weston, Mo., Nov. 17, 1850. While in Weston the question of the Missouri Conflict began to be agitated. On a visit to Auburn he took occasion to lay the facts in his possession, on this question, before the Hon. Wm. H. Seward and afterwards before Horace Greeley, but these gentlemen regarded them "as idle tales." Mr. Greeley, however, admitted into the column of his paper (the Tribune) two articles which Mr. Starr wrote on this subject. In 1858 Starr wrote a pamphlet styled Letters for the People on the Present Crisis, which his father had privately printed, and mailed from New York to all the foremost men and newspaper of the country. The aspect of the political heavens was becoming day by day more and more threatening. The Missouri Compromise was repealed. May 25, 1854. The Platte County Self-defensive Association, composed chiefly of planters, was formed for the purpose of banishing from Weston and the whole surrounding country all the open and suspected friends of freedom. Another association was soon formed under the auspices of the state militia, which was upon deeds of violence. The elders of his Church now advised him to leave the city, and he and his family left for Rochester, N. Y., where he arrived in the spring of 1855. He now took charge of the interests of the Western Educational Society, and to him the Auburn Theological Institution delegated a very large share of its endowments and popularity. In June 1862, he resigned this agency and was installed as pastor of the Church of Penn Yan, N. Y.; in April 1865, he became pastor of the North Presbyterian Church, St. Louis, Mo. He died Jan. 8, 1867. Mr. Starr was characterized by the thorough conviction of principle and duty. He was generous, faithful, upright, and large-hearted. See Plumsley, Preb. Church, etc., p. 400; Wilson, Preb. Hist. Manzana, 1806, p. 227. (J. L. S.)

Starr, John Walcott, a Congregational minister, was born at Guilford, Conn., March 9, 1848. He graduated at Yale College in 1871, and at the New Haven Theological Seminary in 1873. Soon after graduation he engaged in missionary labor in the town of Stratton, and in the following year he was the first president of the Cross. He accepted an invitation from the Home Missionary Society of New Hampshire to preach in West Stewartstown. He was ordained to this work June 18, 1875. His labors were of a short period, and he was early called to his reward. Young, and his life full of promise of great usefulness to the Church, he was called to labor in a higher sphere. He died in 1875. (W. P. S.)

Starr, John Wesley (1), a minister of the Methodist Episcopal Church, South, was born in Wilkes County, Ga., Aug. 7, 1806, and associated himself with the Church when fourteen years of age. He was licensed to preach Sept. 17, 1830, and in 1833 was admitted into the Georgia Conference. In 1839 he was transferred to the Alabama Conference; superannuated in 1848; agent for the Oak Bowery Female Institute in 1849; in 1852 his superannuation was renewed, and he remained until his death, in Bibb County, Feb. 24, 1870. See Minutes of Annual Conferences of the M. E. Church, South, 1870, p. 438.

Starr, John Wesley (2), a minister of the Methodist Episcopal Church, South, was born in Henry County, Ga., Oct. 23, 1830, and was converted in 1841. He was educated at Oxford, Ga.; was admitted on trial into the Georgia Conference in 1852, and sent to Mobile, where he died within a year. See Minutes of Annual Conferences of the M. E. Church, South, 1853, p. 479.

Starr, William H., a minister of the Methodist Episcopal Church, South, was born in Edenton, N. C., May 7, 1798. He was converted when twenty-two, and was admitted into the Virginia Conference, January 10, 1824, and in 1841 he was a superannuated; active in 1845; chaplain of the Seaman's Institute from 1846 to 1848; and in 1850 became again a superannuaries. After serving as colporteur two months, he acted for three years as agent of the American Colonization Society; and then of the Virginia Colonization Society till the close of 1858. He was superannuaries with appointment from 1852 to 1864, when he became superannuaries, and held that relation until his death, near Murfreesboro, N. C., Feb. 14, 1867. See Minutes of Annual Conferences of the M. E. Church, South, 1867, p. 102.

Starr, Skyein, the Great Bear, which never sets, and is the emblem of the everlasting state of the Catholic Church (Rev. 1, 20).

State Mater, a Roman divinity to whom an image was dedicated in the forum, and whose rites consisted in the lighting of fires nightly before her image. She was regarded as a protectress against damage by fire, and was supposed to be either a wife of Vulcan or identical with the goddess Vesta.

State and Church. See Church and State.

Stater (στατηρ; Vulg. stater; A. V. "a piece of money;" margin, "stater"), a coin of frequent occurrence in the Greco-Roman period. See Money.

1. The term stater, from sterno, to stand, is held to signify a coin of a certain weight, but perhaps means a standard, though it is not restricted by the Greeks to a single denomination, but is applied to standards of gold, electrum, and silver. The gold staters were diachrons of the later Phoenician and the Attic talents, which, in this denomination, differ only about four grains troy. Of the former talent were the Doric staters, or Darics (στατηρίων Δαρικων, Δαρικος), the famous Persian gold pieces [see Daric], and those so called of Croesus (Χροσειος); of the latter, the stater of Athens. The electrum staters were coined by the Greek towns on the west coast of Asia Minor: the most famous were those of Cyzicus (στατηρίων Κυζικων, Κυζικος), which weigh about 248 grains. They are of gold and silver, mixed in the proportion, according to ancient authority—for we believe these rare coins have not been analyzed—of three parts of gold to one of silver (Pliny, Hist. Nat. xxxii, 4, 23). The gold was alone reckoned in the value, for it is said (Demosth. in Phurm. p. 914) that one of these coins was equal to 28 Athenian silver drachmas; while the Athenian gold stater, weighing about 132 grains, was equal (Xenop. Mem. 205: 20: 132: 28: 132: 4: 28: 4, or 2 of a Cyzicen stater). This stater was thus of 184 grains, and equivalent to a dinarion of the Aginian talent. The staters of Croesus, which were the oldest gold coins that came to Greece (Herod. i, 104), have about the same weight as
States, was the name given to the dominions formerly belonging to the see of Rome. These states occupied the central part of Italy, stretching across the peninsula in an oblique direction from the Mediterranean to the Adriatic, bounded south by Naples, and north by Tuscany, and the coast of the Adriatic, and the weight of Attic didrachms. Thus far the stater is always a didrachm. In silver, however, the term was in later times applied to the tetradrachm of Athens (Phos. s. v. Στρατιώ; Hesych. s. v. Πανεύξει λαμπροκιαί), and attempts have been made to prove that even in the time of the tetradrachm of Athens, the stater was already a didrachm (Thucyd. iii. 70, Dr. Arnold's note). The term stater was also applied to the gold tetradrachms (commonly called octodrachms) of the Ptolemies (Josephus, Ant. iii. 8, 2). There can therefore be no doubt that the name stater was applied to the standard denomination of both metals, and does not positively imply either a didrachm or a tetradrachm. See Dedarach. 2. In the New Test. the stater is once mentioned, in the narrative of the miracle of the sacred tribute-money. At Caperneum the receivers of the didrachms (ού τὰ δίδαρμα λαμπροκιαί) asked Peter whether his master paid the didrachms. The didrachm refers to the yearly tribute paid by every Hebrew into the treasury of the Temple. It has been supposed by some ancient and modern commentators that the civil tribute is here referred to; but by this explanation the force of our Lord's reason for freedom from the payment seems to be completely missed. The sum was half a shekel, called the mensa νόμος, which after the reign of Alexander was reduced to a half-shekel. The plain inference would therefore be that the receivers of sacred tribute took their name from the ordinary coin or weight of metal, the shekel, of which each person paid half. See SHEKEL. But it has been supposed that as the coined equivalent of this didrachm at the period of the evangelist was a tetradrachm, and the payment of each person was therefore a current didrachm [of account], the term here applies to single payments of didrachms. This opinion would appear to receive some support from the statement of Josephus, that Vespasian fixed a yearly tax of two drachms on the Jews instead of that they had formerly paid into the treasury of the Temple (War, vii. 6, 6). But this passage loses its force when we remember that the common current silver coin in Palestine at the time of Vespasian, and that in which the civil tribute was paid, was the denarius, the tribute-money, then equivalent to the debased Attic drachm. It seems also most unlikely that the use of the term drachm should have so remarkably changed in the interval between the date of the Sept. translation of the Pentateuch and that of the writing of Matthew's Gospel. To return to the narrative. Peter was commanded to take up a fish which should be found to contain a stater, which he was to pay to the collectors of tribute for our Lord and himself (Matt. xvi. 24-27). The stater must here mean a silver tetradrachm; and the only tetradrachms then current in Palestine were of the same weight as the Hebrew shekel. It is observable, in confirmation of the minute accuracy of the evangelist, that at this period the silver currency in Palestine consisted of Greek imperial tetradrachms, or staters, and Roman denarii of a quarter their value, didrachms having fallen into disuse. Had two didrachms been found by Peter, the receivers of tribute would scarcely have taken them; and, no doubt, the ordinary coin paid was that miraculously supplied. The tetradrachms of Syria and Phenicia during the 1st century were always of pure silver, but afterwards the coinage became greatly debased, though Antioch continued to strike tetradrachms to the 3d century, but they gradually depreciated. It was required (Poole, Hist. of Jev. Coinage, p. 240) that the tribute should be paid in full weight, and therefore the date of the gospel must be of a time when states of pure silver were current. See SILVER. Piece of.
STATINUS 997 STAUDENMAIER

rights, and the French army besieged Rome, June 23, 1849, which surrendered unconditionally, July 3. The French took possession, and soon after proclaimed the authority of the pope; who, however, did not return till April 12, 1850. The people were disheartened, and one province after another emancipated itself from the papal sceptre, and united with the kingdom of Italy. The French soldiers left Rome Aug. 21, 1870, and king Victor Emmanuel took possession of the city, declaring it the capital of Italy, and thereby abolishing the temporal power of the pope. See TEMPORAL POWERS.

Statius, or Statilinus, a Roman divinity whose office it was to watch over children before they could walk and to give them the ability to stand. Sacrifices were offered to him when a child began to stand or run alone (Augustine, De Civ. Dei, iv, 21; Tertull. De Animal. 39; Varro, Ap. Nom. p. 526). See Smith, Dict. of Biog. and Mythol. s. v.; Vollmer, Wörterb. d. Mythol. s. v.

Statio, a word employed in ecclesiastical language to denote, 1. A certain fixed post or place, and especially an appointed place, in which prayer might be made, either publicly or privately (locus suceri, oratorium). 2. A standing posture at prayer. See STANDING. 3. Statio is also frequently employed by early writers as nearly equivalent to jejunium. See STATIONS.

Stationalis, Cruz, a cross or crucifix carried in religious processions, and serving as a kind of chief standard, or to denote a place of rendezvous or head-quarters.

Stationarii, Indulgences. Indulgences published at certain stations, and especially in the ecclesiastical stations.

Stationarii, one of the three classes of subdeacons, whose duties related chiefly to processions.

Stationarii Calix, the cup or chalice which is taken from one station to another where mass is to be celebrated or a sororitus suceri to be performed.

Stations of the Holy Cross, or the Holy Way of the Cross, consist, among Roman Catholics, of fourteen representations of the successive stages of our Lord's passion, or of his journey from the hall of Pilate to Calvary. See Vía Dolorosa. These are set up in regular order round the nave of a church or elsewhere, and visited successively, with meditation and prayer, at each station; the devotion being a substitute for an actual pilgrimage. Stations in a true sense are stations placed themselves. The fourteen stations of the cross represent—1. Jesus is condemned to death; 2. Jesus is made to bear his cross; 3. Jesus falls the first time under his cross; 4. Jesus meets his afflicted mother; 5. The Cyrenian helps Jesus to carry his cross; 6. Veronica wipes the face of Jesus; 7. Jesus falls the second time; 8. Jesus speaks to the women of Jerusalem; 9. Jesus falls the third time; 10. Jesus is stripped of his garments; 11. Jesus is nailed to the cross; 12. Jesus dies on the cross; 13. Jesus is taken down from the cross; 14. Jesus is placed in the sepulchre. See Barnum, Romants in 11, p. 306.

Stator, a Roman surname of Jupiter, given because he stayed the Romans in their flight before the Sabines. Romulus vowed to erect a temple in his honor, but contented himself with indicating the spot where it should stand. M. Attilius repeated that vow at a later day, and the senate thereupon caused the temple to be built in the tenth region (Livy, i. 12). See Anthon, Classical Dict. s. v.; Völkerk., d. Mythol., s. v.

Stattler, Benedict, a German Jesuit, was born Jan. 30, 1728, at Kitzing, in Lower Bavaria, studied at Niederaltaich and Munich, and entered in 1745 the Order of the Jesuits at Landsberg. In 1759 he received holy orders, lectured at Soleure and Innspruck on philosophy and theology, was appointed pastor at Innspruck in 1776, and in 1792 at Kenau. Having resigned his pastorate, he retired to Munich, where he died Aug. 21, 1797. Stattler has the merit of having shown the untenability of modern philosophy, especially that of Kant. He wrote, Wahre und allein hinreichende Reformation der katholischen Priesterstande (Ulm, 1791);—Demonstratio Catholica (placed on the Index) ;—Plan zu der allein möglichsten Vereinigung im Glauben der Protestantismen mit der kathol. Kirche und den Gerechten der Ungläubig- keit (Augsburg and Munich, 1791);—Tractatio Cosmologica de Viribus et Natura Corporum (Munich, 1783);—Philosophia Methodo Scientifica Propria Explanata (ibid. 1789-72);—Demonstratio Evangelica adversus Thesistas, etc. (ibid. 1770);—Ethos Christianus Universalis (Ingolstadt, 1772);—Comparatio Philosophiae (ibid. 1774);—De Locis Theologiae (Weissenburg, 1775);—Theologiae Theoreticae Tractatus VI (Munich, 1776);—Theol. Christ. Theorica (ibid. 1781, etc.);—Wahres Verkündigung von dem volken Ungreund der katholischen Philosophie und von dem aus ihrer Aufnahme in christlichen Schulen unfähig entstehenden äußersten Schaden für Moral und Religion, gegen zwei neue Vertheidiger (Landshut, 1794).

See Reichenbacher Conversations-Lexikon, s. v.; Theol. Universit.-Lexikon, s. v.; Werner, Geschichte der katholischen Literatur (Munich, 1866);—Furst, Bibl. Jurid. iii, 379; Winer, History of the modern literature, 3, 305, 316, 357, 384, 487; ii, 328, 788. (B. P.)

Statures. The ancient Christians did not approve of statues of wood or metal or stone to be used in churches. This is proved from the testimonies of Germanus, bishop of Constantineople (Ep. ad Thom., etc.), and Stephanus Bostrenensis, both cited in the Acts of the Second Council of Nice, which show that masses, images or statues were thought to look too much like idols even by that worst of councilists. Petavius answers the reference to the authority of Gregory Nazianzen (Ep. 49), that he speaks not of statues in temples, but of profane statues in other places. It is most certain, from the writings of Augustine (in Pas. cxxxvi) and Optatus (lib. ii), that there were no statues in that age in their churches or upon their altars, because they reckon both those to be mere heathenish customs. Cassander notes (Consul. de Imagin. p. 165) that till the time of the Sixth General Council the images of Christ were not usually in the figure of a man, but only symbolically represented under the type of a lamb; and so the Holy Ghost was represented under the type or symbol of a dove. That council forbade (Conc. Trull. c. 83) the picturing of Christ any more in the symbol of a lamb, and ordered that the Son of God should be drawn only in the likeness of man. The worship of images began, probably, in A.D. 1303, as we have been thought indecent to pay devotion to the picture of a lamb, before it was no longer seen in the Church. Statues are now among the prominent ornaments of Roman Catholic churches and chapels. See Bingham, Christ. Antiq. bk. viii, ch. vii, § 1. See Image-Worship; Sculpture, Christian.

Status Duplex, the old dogmatic mode of speaking of the twofold state in which the Lord accomplished his redemptive work. See Van Oosterzee, Christ. Dogmat., ii, 540.

Statute, Bloody, an act passed during that period of reaction against the Reformation in the mind of Henry VIII which lasted from 1538 to 1584. See Articles, Six.

Staudenmaier, Franz Anton, an eminent theologian of the Roman Catholic Church, was born Sept. 11, 1800, at Donzdorf, in Wurttemberg. He was consecrated to the Holy Priesthood in 1827, and in the next year was appointed as a teacher in the following year, when he became tutor in the theological seminary at Tübingen. In 1828 he was appointed to the chair of theology at Giesen, in consequence of the publication of a work by him on the History of Bishop's Elections (Tub. 1880), which had already been awarded a prize offered by the Tübinger University in 1825. He developed an uncommonly
was no less busy as a writer. In 1834 he founded, in conjunction with several of his colleagues, a journal bearing the name Jahrbiicher für Theologie u. christl. Kirchengeschichte. He was transferred in 1837 to the University of Freiburg, and in 1839 aided in founding another theological journal. Honors now began to pour in upon him; he became canon of the cathedral of the archdeaconry of Freiburg, a spiritual and then privy councilor to the grand-duke of Baden, and obtained a seat in the legislative assembly of Baden. His life was spent in a manner that secured him the highest distinction among the members of the University of Prague. Severe application had, however, destroyed his health and exhausted the strength of his mind. In 1855 he was obliged to apply for dismissal from his professorship, and on Jan. 19, 1856, he found his death in the canal at Freiburg. Staudenmaier ranks among the most eminent scholars of his Church, and may in some respects be brought into comparison even with Muhler (q. v.). His culture was universal, because he was convinced that theology has relations towards all sciences, being as it were their sun, from which they derive light, life, and beauty (comp. his essay Über das Wesen der Universität [Freib, 1852]). He lived in a world of ideas. Through protracted and zealous study of the old and new philosophies, of the fathers, the schoolmen, etc., he entered more fully into the realm of ideas which he regarded as the originals and the ground-forms of all existences. Several unfinished works show how profound were his inquiries in this field (comp. J. Scott, Erigena u. der Philosophie der Erkennung, 2 vols. [Frankfort, 1848]; Phänomenologie d. Christenthums, etc. [Giessen, 1840]; and Darstellung u. Kritik d. heil. Systema [Mayence, 1844]). It is evident, however, that Staudenmaier could in no case have solved the problem he had set himself, because he had no apprehension of the relation of the doctrine of the divine ideas to the world of nature. He did not even observe what, Erigena has to say upon this subject, and thoroughly misapprehended the principle upon which the system of Jacob Bohme (q. v.) rests. The broad comprehensiveness of his studies of doctrine was already apparent in his Enzykl. d. theol. Wissenschaften, etc. (Mayence, 1834);—Prologmatism. d. Geistesgaben, etc. (Tub., 1835);—und Geist d. gottl. Offenbarung. Upon these works followed his Christl. Dogmatik (1844-48). We have also to mention in connection the popular works Bilderschule für katholische Christen, in nine pamphlets (Carlshue, 1843-44);—und Geist d. Christenthums dargestellt in d. heil. Zeiten, Handlungen u. Kunst (Mayence, 1844);—und Geist d. Christenthums, etc. (ed. 1852). Staudenmaier's miscellaneous writings form an extensive group. They generally discuss questions of the time, and are pervaded by a liberal tone, though the author is utterly unable to appreciate Protestantism or its results.

Staedd, Karl Friedrich, theological professor at Göttingen, was born July 25, 1764, at Stuttgart. His father was councillor of state. He was educated in the Stuttgart gymnastum and the theological institution at Tübingen. In 1786 he became tutor to a number of pupils, whom he accompanied in journeys through France, England, and Switzerland, and in 1790 he was called to Göttingen. He was not specially brilliant as a professor, and his lectures, particularly in his later years, were not attractive. But he was a prolific writer and an indefatigable compiler. His doctrinal position is described by himself (Gesch. der Rationalismus u. Supernaturalismus [1825], p. 498) as involving a conception of religion based on naturalism and supernaturalism. In dogmatics, which he elaborated at several times—in 1801, 1809, and 1822—he did not regard the principles of the critical philosophy as adequate to the establishing of religion; and in ethics he also came to concede the superiority of the world of understanding. He probably furnished a larger number of works to the history of ethics than any other writer: Gesch. d. Sittenlehre Jesu seit d. Wiederaufleben d. Wissenschaften (1808);—Gesch. d. philosoph., hebräisch. u. christl. Moral (Hanover, 1806);—and Gesch. d. Moralphilosophie (ibid. 1827). He was transferred in 1837 to the University of Prague. Severe application had, however, destroyed his health and exhausted the strength of his mind. In 1855 he was obliged to apply for dismissal from his professorship, and on Jan. 19, 1856, he found his death in the canal at Freiburg. Staudenmaier ranks among the most eminent scholars of his Church, and may in some respects be brought into comparison even with Möhler (q. v.). His culture was universal, because he was convinced that theology has relations towards all sciences, being as it were their sun, from which they derive light, life, and beauty (comp. his essay Über das Wesen der Universität [Freib, 1852]). He lived in a world of ideas. Through protracted and zealous study of the old and new philosophies, of the fathers, the schoolmen, etc., he entered more fully into the realm of ideas which he regarded as the originals and the ground-forms of all existences. Several unfinished works show how profound were his inquiries in this field (comp. J. Scott, Erigena u. der Philosophie der Erkennung, 2 vols. [Frankfort, 1848]; Phänomenologie d. Christenthums, etc. [Giessen, 1840]; and Darstellung u. Kritik d. heil. Systema [Mayence, 1844]). It is evident, however, that Staudenmaier could in no case have solved the problem he had set himself, because he had no apprehension of the relation of the doctrine of the divine ideas to the world of nature. He did not even observe what, Erigena has to say upon this subject, and thoroughly misapprehended the principle upon which the system of Jacob Bohme (q. v.) rests. The broad comprehensiveness of his studies of doctrine was already apparent in his Enzykl. d. theol. Wissenschaften, etc. (Mayence, 1834);—Prologmatism. d. Geistesgaben, etc. (Tub., 1835);—und Geist d. gottl. Offenbarung. Upon these works followed his Christl. Dogmatik (1844-48). We have also to mention in connection the popular works Bilderschule für katholische Christen, in nine pamphlets (Carlshue, 1843-44);—und Geist d. Christenthums dargestellt in d. heil. Zeiten, Handlungen u. Kunst (Mayence, 1844);—und Geist d. Christenthums, etc. (ed. 1852). Staudenmaier's miscellaneous writings form an extensive group. They generally discuss questions of the time, and are pervaded by a liberal tone, though the author is utterly unable to appreciate Protestantism or its results.

Staughton, William D.D., a Baptist minister, was born at Coventry, Warwickshire, England, Jan. 4, 1770. He studied in the Baptist theological institution at Bristol, and emigrated to the United States in 1798, where he soon became pastor of the Baptist Church in Georgetown, S. C. Here he acquired great popularity, but the climate not agreeing with his health, he removed to New York in 1806. In 1807 he became principal of an academy at Bordentown, N. J., at the close of the next year removed to Burlington, where he kept a large and flourishing school for several years. He was made D.D. by the College of New Jersey in 1801. In 1805 he became pastor of the First Baptist Church in Philadelphia, and afterwards of the Namson Street Church. In 1826 he became president of the newly organized Columbus College, D. C., and in consequence removed to Washington in the fall of 1823. During a journey South, undertaken for the purpose of raising funds for that institution, he was led to resign its presidency, and, returning to Philadelphia, he preached for a while to the North Market Street congregation. He was chosen first president of the Baptist Literary and Theological Institution at George-town, Ky., which he accepted, but, during his journey there, he fell sick, and died Dec. 12, 1829. Dr. Staughton published a number of Discourses, Addresses, and Sermons. See Sprague, Arms of the Amer. Pulpit, v. 394; Allibone, Dict. of Brit. and Amer. Authors, s. v.

Staupitz, Johann von, the genial patron and friend of Luther, was descended from an ancient noble family of Misinia, though the names of his parents and the date and place of his birth are not known. He became an Augustine monk, and studied theology at Tübingen where he was also prior of his convent and was made theological doctor. He was not attracted by scholasticism, but gave himself rather to the study of the Schriffs and the Scriptures. This conviction led him to object to a mission which he was to make to the founding of the university at Wittenberg, and in the prosecution of that work he journeyed to Rome to secure for the institution the papal privileges. In 1592 he became the dean of its theological faculty, and in 1598 he was made vicar-general of the Augustines for the province of Germany. In the character he introduced the reading aloud of the Holy Scriptures instead of Augustine's works at meal-time a
the monasteries under his supervision, and earnestly sought to promote their general prosperity. The duties of the latter office seriously impaired his efficiency as an academical instructor; but it is related that he was never hostile or antagonistic to the study and teaching of theology. Staufpitz discovered Luther during an inspection of the Convent of Erfurt, which the latter had entered in 1505, and not only obtained his release from the menial position to which he had been assigned, but gave him kindly spiritual counsel that guided his feet into the way of truth and delivered his mind from slavish and superstitious fears. See also THOMAS.-It was also through Staufpitz that Luther was called, in 1508, to fill the chair of dialectics and ethics at the Wittenberg University, and that he was induced to ascend the pulpit, and afterwards in 1512 to accept the doctor’s degree in theology. How great was the confidence placed by Staufpitz in his young friend appears from his appointing the latter his substitute in the inspection of forty convents, while himself absent in the Netherlands, in 1516, to collect relics for the new Church of All-Saints at Wittenberg. The sympathies of Staufpitz were necessarily with Luther when the latter began his reformatory work. He expressed his sentiments repeatedly, and did not hesitate to expose himself to great peril on behalf of the reformed movement. He furnished support when the latter appeared before the cardinal in October, 1518, at Augsburg. He was not, however, fitted to be himself a reformer. His disposition was quiet, tender, and contemplative rather than bold and heroic. He consequently drew back from Luther and his cause in 1521, and to a large extent his anti-Erasmianism and consent to be used against the Reformation. He spent the closing years of his life, beginning with 1519, at Salzburg, whither he had been attracted by the cunning of cardinal Matthew Lang. He became preacher to the cardinal in 1519, and soon afterwards passed from the Augustine into the Benedictine order of monks. In 1522 he was named Abbot of the convent, and took the name of John IV, and subsequently was made vicar and suffragan to the cardinal-archbishop Lang. He still, however, kept up his connection with Luther, and as late as 1519 invited the latter to take refuge with him, “ut simul vivamus moriamurque.” The Reformer, nevertheless, complained of neglect at the hands of Staufpitz, and was mortified that the latter should have declared his willingness to submit to the pope when charged with being Luther’s patron, and that he should have consented to become an abbot. Staufpitz retained his evangelical spirit to the end, and felt dissatisfied and oppressed in his new character, and he exercised circumspect influence by permitting his monks to read the works of Luther, brought with him on his first arrival. One of his successors caused the suspicious writings contained in the library of Staufpitz to be burned. Staufpitz died Dec. 29, 1524, and was buried at Salzburg. The literary remains of Staufpitz consist of ten Letters, collected by Grimm and published in Ilmen’s Zeitung für kath. Theol. 1837, ii. 65 sq., and a number of minor ascetical and miscellaneous works. His theology was Augustinian, Scriptural, and mystical; his tendency practical, though not profound; his entire personality noble, engaging, and dignified. His highest claim to notice must ever be that he assisted, and even encouraged his great disciple, until the latter had developed into fitness for the mighty work to which he was called of God. See Adam, Vita Stauflpii, in Vite Theologorum, 1st ed. p. 20; Grimm, ut sup.; Ulmann, Reformatorum vor der Reformation, vol. ii.; D’Aulnay, Reformation, vol. i. b. 10, c. ii. 10 sq.; De Wette, i., 25; Luther’s Werke, Walck’s ed. vol. xxii., passim.

Staufanastasia (Σταυροαναστασία), a Greek term for the crosses made of red and white ribbons which are attached for eight days to the dress of the newly baptized.

Stauronein (Σταυρονεῖν), a Greek word signifying either to crush or to make the sign of the cross.

Stauropoigeion (Σταυροποιεῖον), a name sometimes given to a bishop’s diocese, meaning the district wherein he had power to fix the cross within his own bounds for the building of churches. It may mean—1. The rule of the bishop, now in token of his patriarchal jurisdiction. 2. A church or convent where a cross has been so fixed and exempt from ordinary diocesan jurisdiction.

Stauropodori (Σταυροποδόροι), a Greek term for the six great dignitaries of the Oriental Church who wear a cross on their caps.

Staurophylax (Σταυροφύλαξ), the keeper of the sacred cross on the Church of the Resurrection at Jerusalem.

Stauropostokion (Σταυροποστόκιον), a Greek term for a hymn commemorating the Blessed Virgin at the cross, corresponding to the Latin Stabat Mater (q. v.).

Staves is properly the plural of staff, but it is used in the A. V. distinctively as the rendering of the plural of Heb. דשׁ, bad (literally part, and so occasionally rendered "branch," etc.), spoken of the bars or poles for carrying the sacred ark (Exod xxv. 23, 28—30, etc.; Num. iv. 5, 16—18; 1 Kings viii. 7, 8; 2 Chron. v. 8, 9); and of מָצַב, mazō, a staff or pole for bearing on the shoulder (1 Chron. xxv. 10), especially the ox-bow of a yoke ("band," Lev. xxvi. 13), and hence the "yoke" itself (q. v.). See STAFF.

Stay. This word is found in its antiquated sense in the Burial Service, but in no other part of the Prayer-book. It occurs in a passage quoted from Job xiv. 1, 2, concluding with "and never continueth in one stay." The word "stay" may be changed for "place" or "condition" without affecting the sense.

Stay-bar, or IRON. See STANCHION.

Stayned Cloths, an old name for altar-cloths of linen painted with Scripture or other appropriate subjects, commonly in use in the ancient Church of England.

St. Clair, Alanson, a Congregational minister, was born at Greene, Me., 1804. He was for twenty-five years active in the anti-slavery cause, and established and edited two papers devoted to it. He was ordained in June, 1844, and became acting pastor at Muskegon, Mich., for ten years, 1845 to 1855. From 1855 to 1868 at Newago; from 1868 to 1870 at Whitehall; from 1870 to 1873 at Shelby, and remained there without charge until called to his reward. He died Sept. 21, 1877. (W. F. S.)

St. Clair, John E., a minister of the Methodist Episcopal Church, South, was born in Virginia about 1857, and was a member of the St. Louis Conference, of which he became a superannuate in 1874. His last charge was Chouteau Avenue, St. Louis, Mo. He died near St. Louis, Oct. 29, 1874. See Minutes of Annual Conferences of the M. E. Church, South, 1875, p. 238.

Stead, Benjamin F., D.D., a Presbyterian divi-

vines, was born in Pittsburgh, Pa., Feb. 22, 1815. In early life his parents removed with him and five other children to Michigan, where he was left an orphan; but, by a remarkable series of providences, he was led to Brown University, R. I., and then to the New York University, where he graduated in 1841. He became a member of Dr. Skinner’s Church and had his attention directed to the ministry. He taught in private families and schools for a period and pursued the study of theology. He was ordained and installed pastor of the Bridesburg Church, Pa., Feb. 22, 1842, and remained
in that charge for ten years. In July, 1852, he was called to the pastorate of the Presbyterian Church of Astoria in the vicinity of New York, where he continued to labor with great fidelity and acceptability for twenty-five years, when death closed his service on earth.

His last hours were spent in unceasing prayer, and the ruling passion exhibited its strength. At times he was doing pastoral work—visiting his people, counsel-ling and comforting, explaining passages of Scripture, and even preaching with unction and power. His death, which occurred Feb. 15, 1879, was exceedingly peaceful and dignified. (W. P. S.)

Stead, Henry, a minister of the Methodist Episcopal Church, was born in England, April 10, 1774, and came to the United States June 10, 1802. In 1804 he joined the New York Conference, and continued a member thereof until its division in 1832, when his lot fell in the Troy Conference. In 1804 he is found on the superannuatory list, where he remained till June 5, 1839, when he took it up. He was returned as superannuated, passing to superannuated, and remaining such until his death, at Greenwich, Washington Co., N. Y., Oct. 18, 1854. See Minutes of Annual Conferences, 1855, p. 535.

Stead, William D., a Methodist Episcopal minister, was born in the parish of Brayton, Yorkshire, England, on Aug. 25, 1806. He emigrated to the United States when three years old, was converted in his nineteenth year, admitted on trial in the New York Conference in 1833, and appointed to Johnstown Circuit. He subsequently filled the following appointments: Lansingburg and Waterford, Sand Lake, Pittsford, New Lebanon, Greenfield, Groton, and East Troy. He died Dec. 6, 1834. He was characterized by great fidelity and sobriety: was a good preacher, remarkable for simplicity and ardor, and a most excellent pastor. See Minutes of Annual Conferences, iii, 582.

Stegall, Joy P., a minister of the Methodist Episcopal Church, South, was born in Jasper County, Ga., Dec. 4, 1807, and united with the Church when fifteen years of age. He emigrated to the United States when three years old, was converted in his nineteenth year, admitted on trial in the Georgia Conference in 1834, and continued in the active ministry till within two years of his death, April 9, 1848. See Minutes of Annual Conferences of the M. E. Church, South, 1849, p. 202.

Steal (στήλα), αίσθημα. The Mosaic law on the subject of stealing is contained in Exod. xxii, and consists of the following enactments:

1. He who stole and killed an ox or a sheep was to restore five oxen for the ox, and four sheep for the sheep.

2. If the stolen animal was found alive, the thief was to restore double.

3. If a man was found stealing in a dwelling-house at night and was killed in the act, the homicide was not held guilty of murder.

4. If the act was committed during daylight, the thief might not be killed, but was bound to make full restitution or be sold into slavery.

5. If money or goods deposited in a man's house were stolen therefrom, the thief, when detected, was to pay double; but if the owner could not be found, the master of the house was to be examined before the judges.

6. If an animal given in charge to a man to keep was stolen from him, i.e. through his negligence, he was to make restitution to the owner. See Oath.

There seems to be no reason to suppose that the law supposed by G. G. Simpson's time, as Michaelis supposes; the expression in Prov. vi, 30, 31 is that a thief detected in stealing should restore sevenfold, i.e. to the full amount, and for this purpose even give all the house of his house, and thus case of failure to be liable to servitude (Michaelis, Laws of Moses, § 284).

On the other hand, see Bertheau on Prov. vi; and Keil, Arch. Heb., § 154. Man-stealing was punishable with death (Exod. xxvi, 16; Deut. xxiv, 7). Invasion of right in land was strictly forbidden (xxxi, 17; Isa. v. 8; Mic. ii, 5). See Theft.

Stearns. See STEEVE.

Stearns, Charles, a Unitarian minister, was born at Leominster, Mass., July 19, 1758; entered Harvard University in 1779, and graduated in 1783. Immediately upon graduation he commenced to teach, and during 1780 and 1781 he was tutor at Cambridge. He was first employed to preach at Lincoln in October, 1780, over which Church he was installed Nov. 7, 1781. In 1792 he became principal of a high-school in Lincoln, which he conducted for ten years. He then commenced his studies, and was graduated in 1798 of the degree of D. from Harvard University. He died July 26, 1826. He published, The Ladies' Philosophy of Love (1797), a poem:—Dramatic Dialogues for the Use of Schools (1798):—Principles of Religion and Morality (1786; 2d ed. 1807):—Sermons (1792, 1806, 1815, 1821). See Sprague, Annals of the Amer. Pulpit, viii, 147.

Stearns, Josiah, a Congregational minister, was born at Billerica, Mass., Jan. 20, 1752, and graduated from Harvard University in 1771. He was ordained pastor of the Church in Epping, N. H., March 8, 1788. He adopted and earnestly advocated the principles of the Revolution, sending his elder sons into the army, and sacrificing most of his worldly interest in support of the government. He was the last of Mr. Stearns' family to graduate and to be a close and thorough student, and, although his slender means would not allow him to possess much of a library, he was favored with the use of books by friends. He died at Epping, July 25, 1788. Five of his occasional sermons were published. See Sprague, Annals of the Amer. Pulpit, 1757.

Stearns, Samuel, a Congregational minister, son of the preceding, was born at Epping, N. H., April 8, 1770. He fitted for college at Exeter Academy, entered Dartmouth in 1790, whence he removed in his junior year to Cambridge, and graduated at Harvard in 1794. He studied theology under Rev. Jonathan French, of Andover, and was ordained minister of the town of Bedford April 27, 1795. On Nov. 14, 1831, a vote was passed in town meeting to occupy the pulpit for a certain number of Sundays during the ensuing winter with Unitarian preachers. A new society was consequently formed under the name of the Unitarian Congregational Society, June 5, 1833; and Mr. Stearns became its first president. He died, however, in connection with his death, Dec. 26, 1834. He published six occasional Sermons and Discourses (1807—22), and an Address (1815). See Sprague, Annals of the Amer. Pulpit, i, 579.

Stearns, Samuel Horatio, a Congregational minister, son of the preceding, was born at Bedford, Mass., Sept. 12, 1801. In 1816 he entered Phillips Academy, Andover, where he underwent a change of heart, and made a public profession of religion in June, 1817. He entered Harvard College in 1819, from which he graduated in 1823. After leaving college, he became a teacher in Phillips Academy, where he remained until 1828, when he entered the Theological Seminary at Andover, leaving it in 1828. His health was in such a feeble condition that he would not consider himself a candidate for settlement until 1834, in which year, on April 16, he was ordained pastor of the Old South Church, Boston. After preaching for three Sabbaths, he was compelled to cease, and returned to Bedford. In June, 1825, he commenced to travel in pursuit of health, and so far recovered as to anticipate a resumption of labor among his people. But this was found to be too dangerous an experiment, and he sought a dismissal, which was granted him in February, 1826. He went abroad in the following June and died in Paris, July 15, 1837. His Life and Select Discourses were

Stearns, Silas, a Baptist minister, was born at Waltham, Mass., July 26, 1784. Although born of Unitarian parents, he was led to Christ by the preaching of Dr. Stillman, a Baptist preacher, by whom he was baptized in 1804. He pursued his studies under Rev. Dr. Baldwin, of Boston, and was licensed to preach Sept. 11, 1806. Soon after he gave up his trade, that of upholsterer, and applied himself wholly to preparation for the ministry. He was ordained an evangelist Oct. 22, 1807, and soon after began to labor in Bath, Me. A Church was the result, and was recognized Oct. 80, 1810. Mr. Stearns being installed as its pastor the same year. He suffered shipwreck he survived, and was installed on July 18, 1810. He was a man of warm affections, earnest in purpose, and diligent in labor. He published a Discourse (Dec. 31, 1816). See Sprague, Annals of the Amer. Pulpit, vi, 524.

Stearns, Timothy, a Presbyterian minister, was born at Billerica, Mass., Jan. 28, 1810. He was educated at Phillips Academy, Andover, Mass., graduated at Harvard College in 1833, and in the same year as teacher in the Female Seminary at Chelmsford, O., graduated at the Andover Theological Seminary, Mass., in 1837, was licensed by the Andover Congregational Association, removed to Athens, O., and was ordained and installed pastor of the Church at Worthington, O., where he labored nearly four years successfully. In 1842 he moved to Mount Pleasant, Iowa, and took charge of the Church at Kingston, Iowa, where his talents as a minister were fully displayed, and his zeal and energy blessed in the ingathering of many to the Church. In 1848 he induced his Church to erect in Kingston a Presbyterian academy as an Elenezer to God's goodness to the Church and the world, and two years afterwards their Church was built. In 1855, owing to impaired health, he removed to town, and took charge of the Church at Mount Pleasant, Iowa, Presbytery. The Church was weak, but God blessed his labors, and in 1857 the congregation dedicated one of the most complete and commodious houses of worship in that State. He died July 19, 1861. Mr. Stearns was an excellent preacher and an eminently faithful pastor. He was the author of a work on The Promises, and of several magazine articles. See Wilson, Preb. Hist. Al- manac, 1862, p. 119. (J. L. S.)

Stearns, William Augustus, D.D., LL.D., an eminent Congregational minister and educator, was born at Bedford, Mass., March 17, 1805. In his father's house industry and economy, study and piety, culture and industry, he loved the work of his hands. In 1823 he recited the Assembly's Shorter Catechism entire at one standing in the Church. At fourteen he committed to memory the entire Gospel of Luke in one week, working in the hay-field with the men during the day. In the necessary economy of the family, one Latin grammar had to do with both the older sons, thus in the afternoon when his brother was not using the book, William learned his first Latin lesson, and astonished his father at the recitation; but so great were his ex- citement and the strain on his nerves in accomplishing it that as soon as it was ended he fainted away. His father hastened away to send him to college for want of pecuniary means. At length he went to Septuagint Academy, where he remained three years and distin- guished himself as a scholar. During a revival in 1823, which occurred in his senior year, he was converted. This was the year in which the day of prayer for col- leges was first observed. Instead of joining his father's Church, he united with that in the seminary chapel. One of the sons had graduated at Harvard, and, not- withstanding the change which had come over its the- ological status, and as the college was only twelve miles from home, it was determined he should go there; be- sides, his father and grandfather were graduated there.

He entered Harvard in 1823 and was graduated in the class of 1827. He taught school every winter. So scanty were his means that at one time he was on the point of leaving the college, but the good president, Kirkland, relieved him from embarrassment. As to his standing in college, Edmund Quincy, one of his class- mates, writes, "His recitations were always perfect, and in Latin above all other subjects he was most elegant in every respect of any." After his graduation he occupied his time in teaching as principal of the Academy in Duxbury, Mass. He had no question about his profession. The ministry being hereditary in the family, it seemed to be a mat- ter of course that it should be his profession, and he accordingly entered Andover Theological Seminary in 1827. He was graduated Dec. 14, 1829, and in the same course was preached at Cambridgeport. He accepted a unanimous call to the First Evangelical Congrega- tional Church in Cambridgeport, and was installed Dec. 14, 1831. He entered upon his work with heartiness, and his labors were blessed, his Church was enlarged and its numbers increased, and in time one of the most beautiful of churches was erected. The number ad- mitted to the Church during his ministry was little less than five hundred. He took a deep interest in Harvard as one of its trustees. He was elected presi- dent of Amherst College, and was inaugurated Nov. 22, 1854. As one of the admirers of his administration, the growth and prosperity of the college gave ample evi- dence in bequests and donations amounting to $500,000, a doubling of the number of college edifices, all of the most costly and elegant construction. When president Stearns was inaugurated there were eleven professors and two hundred and one students, and at his death there were twenty-one professors and three hundred and thirty-eight students. Of upwards of two thou- sand alumni, more than half of them had graduated under his presidency. He was appointed a member of the Massachusetts Board of Education, which office he held for eight years. He was president of the Massa- chusetts Missionary Society for seventeen years, and in a great measure guided the councils of the American Board of Commissioners for Foreign Missions. Dr. Stearns died suddenly, June 8, 1876. As a preacher he usually wrote his sermons, which were at once doctrinal and practical, instructive, eloquent, and impressive. He was so direct in his style, that no word was lost. His strength lay not in his written, but in his spoken discourse, and particularly in his ex- ecutive capacity. He managed his business with rare discretion, and might have been rich had he not aimed at something higher. His great secret of success and usefulness did not lie in one faculty, but in a well-formed and well-balanced mind, the faith was unbounded in God, himself, and his fellow- men. He was not a book-maker, nor in the technical sense an author. The Life and Discourses of his eldest brother, Rev. S. H. Stearns, pastor of the Old South Church, Boston, was the largest volume he ever gave to the public. His writings consist of Essays on Infant Baptism and Infant Church Membership;—and Sermons on the death of president Taylor; on the position and mission of the Congregational Church; commemorative of Daniel Webster;—on slavery;—on educated manhood; national fast;—election sermon; a plea for the nation; and with numerous other subjects. (J. L. S.)

Stebbing, Henry (I.), an English divine, was successively rector of Rickinghall, Suffolk; preacher of Gray's Inn, London; and chancellor of the diocese of Salisbury. He was noted as a controversialist, being opposed to Hoadly in the Bangorian Controversy, and to Warburton's Divine Legation of Moses. He died in 1763. Among his works is a work in defense of the Christian religion. (Camb. 1727, fol.)—Defence of Dr. Clark's Evidences (Lond. 1731, 8vo)—Discourse on the Gospel Revelation (ibid. 1731, 8vo)—Brief Account of a Prayer, The Lord's Supper, etc. (ibid. 1739, 8vo)—Christiinity Justified upon Scripture Foundation (ibid. 1760, 8vo) —Sermons
STEBBING 1002

STEBBING, Henry (2), D.D., son of the preceding, was born at Kickinghall, Suffolk, in 1716; entered Catharine Hall, Cambridge, 1734; succeeded his father as preacher of Gray's Inn, 1739; and shortly after as chaplain in ordinary to the king. He received his degree of D.D. at Cambridge, 1776. He died at Gray's Inn, 1787. Gray's Inn was a truly learned and good man, and an indefatigable preacher. He wrote Sermons on Practical Subjects, published with an account of the author by his son (Lond. 3 vols. 8vo; vol. i and ii, 1788; vol. iii, 1790). See Darlington, Cyclop. Bibl., s. v.; Allibone, Dict. of Brit. and Amer. Authors, s. v.

STEBBINS, Dixon, a minister of the Methodist Episcopal Church, was a native of Willerham, Mass. Of his early life and conversion we are without information. He was received into the Providence Conference in 1842, and preached, with intervals of ill-health, until 1858, when he received a superannuated relation. He died at Hanson, Sept. 27, 1863. See Minutes of Annual Conference, 1863, p. 356.

STEBBINS, Lorenzo D., a minister of the Methodist Episcopal Church, was born Sept. 2, 1817. He was educated at Cazenovia Seminary, and graduated from the Wesleyan University, Middletown, Conn., in 1842. In 1844 he joined the Black River Conference; in 1853 became professor of mathematics to the New York Conference Seminary; in 1854 was appointed professor of Latin in the same seminary. At the close of the year he was transferred to the Troy Conference, and in 1866 to the New England Conference. In the spring of 1867 he removed to Central New York, where he remained until his death, Nov. 1, 1869. See Minutes of Annual Conference, 1870, p. 86.

STECK, John Michael, a Lutheran clergyman, was born at Germantown, Pa., Oct. 5, 1765. He studied theology under Dr. Helmuth, and was afterwards admitted a member of the Lutheran Synod of Pennysylvania. In 1790 he took charge of the Lutheran church in Newburgh, N. Y., in 1790 became pastor to the congregations in Bedford and Somerset counties, and in 1792 accepted a call from the congregations in Westmoreland County, making Greensburg his residence, where he died, July 14, 1830. He was an earnest, faithful, and successful minister. See Sprague, Annals of the Amer. Pulpit, vi, 148.

STECK, Michael John, a Lutheran clergyman, was born at Nolde, Pfalz, in Germany, on May 1, 1793, and studied at the Greensburg Academy. Soon after leaving the academy he began to study theology under his father, continuing it with Rev. Jacob Schnier, of Pittsburgh. He was licensed to preach by the Synod of Pennsylvania in 1816, and began his labors as temporary assistant to his father. He returned to the call from Laurens, O. S., under his duties Dec. 15, 1816. Here he labored with great acceptance in his own and other churches, besides making, by appointment of the synod, extensive missionary tours. In 1828 Mr. Steck removed to Greensburg as his father's assistant; and on the death of his father in 1830, succeeded to the sole pastorate, where he labored until his death, Sept. 1, 1848. An idea may be formed of the amount of his labors from the fact that he ministered regularly to eleven churches, besides preaching at three or four stations, some of which were distant thirty miles from his residence. See Sprague, Annals of the Amer. Pulpit, ix, 148.

Stedingers, a community of Friars who were settled in the vicinity of Bremen and Oldenburg at the beginning of the 19th century, and was noted for its defense of liberty and independence because they refused to render tithes to the Church. A certain priest became dissatisfied with the amount of the fees paid at confession by the wife of a prominent man, and when administering the sacrament he placed her money instead of the host in her mouth. Convinced that such a practice was highly improper, she carried it in her mouth to her home, where she discovered its nature. Her husband was indignant at the insult offered her, and reported the case to the superiors of the priest, but obtained only unworthy reproaches in reply. He therefore considered himself as having punished the offender, and took his life. The clergy now assumed the attitude of an injured party, and complained to archbishop Hertwig II of Bremen, who demanded the rendition of the murderer and the payment of an indemnity fine, and accompanied his demand with violent threats of punishment in case of refusal. As the action of the criminal had been already approved by the Stedingers, they refused obedience; and when the archbishop imposed increasingly heavy burdens, and even pronounced the ban over the country, they renounced the authority of himself and his chapter. Refused further tithes, and declared that they would not continue to be benefactors of the State, and that of the civil government (1904 sq.). The archbishop, having already in 1197 obtained the promise of pope Innocent III that a crusade should be inaugurated against the Stedingers if required for their subjection, now collected an army (1207) and marched against the rebels, but was repulsed with many losses and promises. He died in the following year, and his successors renewed the war, prosecuting it with varying success during forty years. A large army raised by archbishop Gerhard II was utterly defeated and its base of operations, the Castle of Schluter (Castrum Sluterorum), stormed in 1290. Enraged by the disaster, the bishop and his associates now called upon the world to combine for the destruction of the contumacious heretics, and did not hesitate to spread abroad the most contemptibly silly and impossible stories, which could only find credence in a superstitious and spiritually enslaved age. The pope was finally induced by the repeated appeals to pronounce the general ban of the Church over the unhappy community, and to cause a crusade against it to be preached. Forty thousand soldiers assembled at Bremen to avenge the injury sustained by the Church, and the most powerful ally of her enemies, duke Otto of Liineburg, was detached from their cause through papal influince and the fear of the imperial interdict. The Stedingers nevertheless prepared for resistance; and when the attack was made and irresistible numbers prevailed against them, four hundred of them laid down their lives in the conflict before the field was lost; and another perhaps more than three hundred were actually defeated, and its purposes of destroying the dikes of the river Weser and drowning out the population prevented. The prisoners taken by the crusaders were, however, numerous, and all miserably perished at the stake. The country was devastated with fire and sword, and rape and licentiousness were the tormenting motives of the army of the Church. A final battle, the Stedingers appeared under the leadership of Mathias (27 (?), 1234, near Altenesch. Eleven thousand Stedingers drove the mighty host of their adversaries before them, but, having lost their formation in the pursuit, were themselves taken in flank and rear by the cavalrty under the leadership of Half of them fell on the field, or were drowned in the subsequent battle, which was decided in the favor of the free Friars and became fully identified with them, and others submitted to the authority of the Church. Their country was divided between the
archbishop of Bremen and counts Otto II and Christian III of Oldenburg. The archiepiscopal Church in Bremen celebrated the bloody triumph with a procession, and ordained an annual day of commemoration, fixing on the fifth Sunday after Easter for that purpose, beside causing a chapel to be erected near the scene of the victory. The abbots Hermann of Corvey exhorted his joy by the erection of two other chapels in the same neighborhood. All the writers prior to the Reformation who mention this war condemn the Stedingers as heretics, and it was reserved for the days of Protestantism to vindicate the fame of these champions of liberty. On May 27, 1634, a simple but durable monument was dedicated to their memory on the spot where once stood one of the abbots of Corvey's chapels. See Monachi Chron. in A. Math. Anec. ii. 501; Chron. Rastadt. 

Stedman, Rowland, a Nonconformist minister, was born at Corston, Shropshire, in 1630. He was admitted commissary of Balliol College, Oxford, in 1647, and removed to University College in 1648, taking his degree of A.M. in 1655. He soon after became minister of Hanwell, Middlesex, and vicar of Ockingham, Berkshire, in 1660. In 1662 he was ejected for nonconformity, and afterwards became chaplain to Philip, lord Wharton. He died in 1673. Stedman wrote, The Mystical Union ofBelievers in Christ (London 1668, see below) -- Sermons (ibid. 1668, Rev. 1673).

Steel. In all cases where the word "steel" occurs in the A.V. that are rendered "copper" or "brass," the translators have always translated "brass" as the case with the cognate word sbenkoth, with the exception of Jer. xxv, 12 (A.V. "steel") and Ezra viii, 27 (A.V. "copper"). Whether the ancient Hebrews were acquainted with steel is not perfectly certain. It has been inferred from a passage in Jeremiah (xxv, 12) that the "iron from the north" there spoken of denoted a superior kind of metal, hardened in an unusual manner, like the steel obtained from the Chalybes of the Pontus, the ironsmiths of the ancient world. The making of iron hardened and tempered, as was practiced in Pontus, Lydia, and Laconia (Eustath. II, ii, 294, 6q, quoted in Müller, H. M. d. Arch. u. d. Kunst, 1807, 307, 412). Justin (xlix, 3, 8) mentions two rivers in Spain, the Bilidiles (the Sajo, or Xalon, a tributary of the Ebro) and the Chalybes, the water of which was used for hardening iron (comp. Pliny, xxxiv, 41), The same practice is attested for the Vulgar Latin (ob. li, 393) and Sophocles (Aj. 650). The Celts, according to Diodorus Siculus (v, 33), had a singular custom. They buried sheets of iron in the earth till the weak part, as Diodorus calls it, was consumed by rust, and what was hardest remained. This firmer portion was then converted into weapons of different kinds. The same practice is said by Beckmann (Hist. of Tur., ii, 328, ed. Bohn) to prevail in Japan. The last-mentioned writer is of opinion that the two methods of making steel, by fusion either from iron-stone or raw iron, and by cementation, the ancients were acquainted only with the former. See Copper.

There is, however, a word in Hebrew, palad, which occurs only in Nah. ii, 9 (4), and is there rendered "iron," but which must have signified steel or hardened iron, and refers to the flashing scythes of the Assyrian chariots. In Syriac and Arabic the cognate words poldo, paladul, paleul signify a kind of iron of excellent quality, and especially steel. See Metal.

Steel appears to have been known to the Egyptians. The steel was found in the tomb of Rameses III, says Wilkinson, are painted blue, the bronze red (Anc. Ep. ii, 154). See Iron.

Steel, Robert, D.D., a Presbyterian divine, was born in the vicinity of Londonderry, Ireland, Jan. 9, 1738. In early boyhood he came to the United States, pursued his preparatory studies in the Academy of Philadelphia, graduated at the College of New Jersey, at Princeton, N. J., and at the Associate Reformed Theological School; was ordained to the ministry at Philadelphia Presbytery, commenced his labors as a city missionary in that city and vicinity, and (Nov. 9, 1819) was ordained and installed pastor of the Presbyterian Church at Abington, Pa. This was his only charge, and here he performed faithfully and successfully his life-work. He died Sept. 2, 1826, respected by all as a good man, and a pre-eminently effective preacher. The Church was to him "all in all;" the cause of missions seemed to absorb all his interest; and the Sabbath-school cause, apparently, possessed his whole heart. See Wilson, Presb. Hist. Almanac, 1863, p. 207. (J. L. S.)

Steele, Allen, a minister of the Methodist Episcopal Church, was born at Salisbury, N. T., May 24, 1808. He was converted at the age of thirteen years, and studied for a while at Wilbraham, Mass., and then began to teach school in Western New York. In 1831 he was admitted into the Genesee Conference. He received appointments, among others, in Buffalo, Rochester, Troy, Albany, and New York. After nearly forty years of ministerial labor, he retired as a supernumerary to West Branch, N. Y., where he died, Jan. 14, 1890. At the time of his death he was a member of the Western New York Conference. He was a critical scholar, a sound theologian, and an eloquent and powerful preacher. See Minutes of Annual Conferences, 1873, p. 110.

Steele, Anne, a hymn-writer, usually called Mrs. Steele, although she really was never married, was born at Broughton, Hampshire, England, in 1716. Her father, the Rev. William Steele, was a Baptist minister in the place of her nativity. She developed early in life poetical talent, which showed itself in the composition of devotional hymns, many of which have been introduced into our collections of hymns. She united with her father's Church when she was fourteen years of age. A few years after this she became engaged to a young man named Evans. The day for the wedding was fixed, and her friends were assembled to witness the ceremony, when the sad intelligence was brought to the house that the expected bridegroom, having gone into the river to bathe, ventured beyond his depth, and was drowned. In 1750 two volumes of her poetry were published under the name of Theodosia. She died in 1778. Her collected Poems and Hymns, published in 1780, were edited by Dr. Caleb Evans. They were published also in Boston in 1808, and a new edition, edited by John Shepard, was published in 1853. See Christopher, Hymn-writers and their Hymns, p. 225; Buttersworth, Story of the Hymns, p. 58-60; Belcher, Historical Sketches of Hymns, p. 297-301. (J. C. S.)

Steele, David, a minister of the Methodist Episcopal Church, was born about 1791. When about eight-
War admitted on trial into the Baltimore Conference. He was ordained deacon and elder, and also received the privilege of preaching on the Eighth Circuit, and was licensed until 1847, when he took a superintendence relation. This relation was changed to superannuated in 1849, and was continued until his death, at Washington, D. C., May 4, 1852. See Minutes of Annual Conferences, 1853, p. 313.

Steele, Joel, a Methodist Episcopal minister, was born at Tolland, Conn., Aug. 14, 1782. Converted when twenty-two years of age, he entered the itinerancy in 1800, was made superintendent of local circuits; Lyndeborough Circuit; Bristol, Me.; Vershire, Vt.; Tolland, Conn.; Ashburnham, Mass.; New London, East Greenwich, Conn.; Barre, Mass.; Barnard, Vershire, Vt.; Wethersfield, Conn.; Unity, Me.; Willetfleed, Eastham, Sandwich, Saugus, Edgartown, Barnstable, Chatham, Truro, Weymouth, Mass.; and Barnard, Vershire, Vt. In 1815 he took a superannuated relation, and died Aug. 23, 1846—a father in Israel—having been forty years in the ministry. Mr. Steele possessed an amiable and humble spirit, a clear understanding, and his preaching was plain, manly, and deeply in earnest. See Minutes of Annual Conferences, iv, 116.

Steele, John (1), a minister of the Associate Reformed Church, was born in York County, Pa., Dec. 17, 1772, and received his collegiate education at Dickinson College, where he graduated in 1792. He studied theology under the Rev. John Young, of Greenscience, Pa., and was licensed by the First Associate Reformed Presbytery of Pennsylvania May 25, 1797, and ordained in August, 1798. He then went to Kentucky, where he labored for four congregations till 1806. Then he returned to the state where he was relieved of two. In 1817 he removed to Xenia, O., where he remained until October, 1836. He had just moved to Oxford, and had made some arrangements for his family, when he died suddenly, Jan. 11, 1837. He was an able, clear-headed theologian, well read in Church history, and versed in ecclesiastical affairs; and a man of long and able as clerk both of his presbytery and synod. See Sprague, Annals of the Amer. Pulpit, ix, 102.

Steele, John (2), a Presbyterian minister, was born at Bellefonte, Centre Co., Pa., Dec. 11, 1812. He received a careful parental training, joined the Church at the age of twenty-two, pursued his academic studies at Milan Academy, Huron Co., O.; graduated at Jefferson College, Pa., in 1842, and at the Theological Seminary at Allegheny City in 1845; was licensed to preach by the Presbytery of Blairsville, Ind., April 16, 1846; ordained by Lake Presbytery April 8, 1849; and in 1850 was installed pastor of the Church at Laporte County, Ind. In 1855 he labored at Macomb, MacDonough Co., Ill.; in 1866 he moved to Indiana, and labors at Newton, Ind.; in 1869 as a missionary to Pike's Peak, in company with several members of his church; was appointed chaplain of the 8th Regiment Iowa Volunteers Nov. 5, 1861, and died in that service Sept. 10, 1862. Mr. Steele was an able exponent of the doctrines of the Bible, faithful and self-sacrificing as an army chaplain, and mild, amiable, and social as a man. See Wilson, Presb. Hist. Almanac, 1864, p. 196. (J. L. S.)

Steele, Richard, a Nonconformist preacher, graduated at St. John's College, Cambridge. He became vicar of Hanmer, North Wales, and was ejected for nonconformity in 1662. He died in 1692. His works, which are commenced by Philip Henry, are:—Discourse of the Creation (London, 1675);—Discourse upon Unrighteousness (1670, 8vo);—Christian Husbandman's Calling (1670);—Tradescan's Calling (1684, 8vo);—Discourse of Old Age.—Discourse upon Untimeliness (1670, 8vo);—Sermons. See Darling, Cyclop. Bibl. s. v.; Allibone, Dict. of Brit. and Amer. Authors, s. v.

Steele, Robert A., a minister of the Methodist Church, converted in early life, and practiced medicine for several years. He was licensed in 1823 and was ordained as pastor of the Second Church at Alcovia, N. Y., in 1827. In 1830 he was appointed a missionary to the west, and in 1833 he was appointed to the mission to the Indians in the state of Ohio. He died in 1843.

Steeple (stepul), the tower of a church, etc., including any superstructure, such as a spire or lantern, standing upon it. In some districts small churches have the steeples not unfrequently of massive wooden framing, standing on the floor, and carried up some little distance above the roof; these are usually at the west end, parted off from the nave by a wooden partition, and called west towers, and Tetworth, Oxfordshire. See Belfry: Tower.

Stefani, Tommaso de', an Italian painter, was born at Naples about 1230. He painted the chapel of the Minutoli in the Duomo, mentioned by Boccaccio, with a series of frescos representing the passion of our Saviour. In the Society of St. Angelo at Nilo are the paintings of St. Michael and St. Andrew that are attributed to him. He died probably about 1310. He may be regarded as the earliest of the Neapolitan school. See Hoefer, Nouv. Bioq. Générale, s. v.

Stefani, Agostino, an Italian composer, was born at Castell-franco, government of Venice, about 1655. In his youth he was entered as a chorister at St. Mark's, Venice, where a German nobleman, pleased with him, obtained his discharge, took him into Bavaria, gave him a liberal education, and when he arrived at the proper age, got him ordained. He then took the title of Abate, by which he is now commonly known. His ecclesiastical compositions soon became numerous, and attracted the notice of Ernest, duke of Brunswick, who invited him to Hanover, and made him director of his chamber music. Stefani was also a statesman, and had a considerable share in the councils of Vienna and Ratisbon the scheme for erecting the duchy of Brunswick-Lüneburg into an electorate, for which service the elector assigned him a handsome pension, and pope Innocent XI gave him the bishopric of Spiga. He died at Frankfurt in 1790.

Stegger, Benjamin C., a minister of the Methodist Episcopal Church, South, was a native of Jasper County, Ga. He joined the Mississippi Conference about 1837, located after six or seven years' travel, and was readmitted into the Louisiana Conference in 1855. He died June 10, 1860. See Minutes of Annual Conference of the M. E. Church, South, 1860, p. 253.

Steger, Benedict Stephan, a Lutheran minister, was born at Nuremberg, April 9, 1867. He studied at Erlangen and Berlin. His first ministerial duties he performed in his native place. In 1885 he was appointed second preacher at Hof, and in 1893 he was called to his native place as third preacher of St. Egild in which he labored for thirty-three years. He died...

Steigman, Josua, a Lutheran divine, was born in 1588 at Sulzdorf, in Franconia. For ten years he attended the lectures at the Leipzig University, and on account of his great learning he was honored in 1617 with the degree of D.D. by the Wittenberg faculty. In 1621 he went to Rinteln as professor of the newly founded university there; but on account of the war he had to relinquish his position until 1625, when he returned and discharged his pastoral as well as academic duties until 1659. About this time the Benedictine monks returned to Rinteln, and Steigman’s position became very unpleasant. He was persecuted in every way, and the excitement which he had to undergo caused his death, Aug. 3, 1632. He is the author of the famous German hymn, _Ach, bleib mit deiner Gnade_ (English trans. _In Lyra Geru._ ii, 120: “Abide among us, O gracious Lord, in thy grace and in thy peace”). Besides this and other hymns, he also wrote _Phoebusianus_, _Eutychius_, _Spiritus Austerus_, _Etzlerius_, _Praetextatus_, _Trinitarianus_, _Cunctans Refutatio Errorum Photinosianorum_, _56 Disputationibus Brevarius Compendium_ (Rinteln, 1623; Frankfort, 1643). See *Theol. Universalis-Lezion*, s. v.; Koch, *Gesch. des deutschen Kirchenleidens*, iii, 128 sq.; viii, 148; Winer, *Handb. der theolog. Literatur*, i, 354; ii, 708. (B. P.)

Steiger, Carl Friedrich, a Reformed minister of Germany, was born in 1806 at Flawel, in Switzerland. In 1832 he was called to the pastorate at Brunnstadt, in 1838 to Balgach, and in 1841 to Watwyl, in Toggenburg, where he died, May 11, 1860. He published, _Kleine Wochenpredigten über das Christen Stimmung und der Welten_ (Zur. ed., 1852); —_Marias von Rothenburgs Reliquien_, _Wort und Weisung_, _Gedichte_, _Briefe_ (ibid. 1843); —_Das Gebetbuch der Bibel_ (ibid. 1847-53): —_Religiöse Gedichte_ (ibid. 1851). See Koch, _Gesch. des deutschen Kirchenleidens*, viii, 382 sq.; _Regensburger Conversations-Lezionken_, s. v.; Zuchold, *Bibl. Theolog.* i, 1201 sq. (B. P.)

Steiger, Wilhelm, a minister of the Reformed Church in Switzerland, was born in Aargau, Feb. 9, 1808, and in 1838 he became a pastor in which he remained until his death in 1868. He was at Benged at that time in the faculty, though the latter died only a year afterwards. Steiger then removed to Halle, and came under the controlling influence of Tholuck, through which his natural aversion to the prevalent rationalism was intensified. In 1828 he was only twenty years old, and was deemed not competent to earn his labors within his own denomination, being urged by the conviction that a lack of faithful preaching and pastoral care was largely responsible for the separation of many believing souls from the Church. In connection with Dr. Hahn, of Wittenberg, he conducted social meetings for spiritual edification, tutored students, and wrote the periodical _Bundesblat_ and other things an interesting history of the Momiers of Vaud for the Evangel. Kirchenzeitung at Berlin. He became associate editor of that journal in 1829, and devoted himself wholly to study and literary work. From this period date the pamphlet _Die Hollandische Streitsache_, etc., and the book _Kritik des Rationalismus in Wegwalters Dogmatik_ (Berlin, 1830). In 1832 he issued a valuable commentary on 1 Peter, dedicating the work to the theological committee of the Evangelical Association of Geneva, which had just called him to the exegetical chair of its theological institution. He entered on his new station at Easter, 1832. It is said that he was un- commonly successful in giving adequate expression to German ideas in the French language. After his death, one of his students published, from notes taken in the lecture-room, an *Introduct. Générale aux Livres du N. T.* (Geneva, Lausanne, and Paris, 1837). Two volumes (1833-34) of a journal started by him and Haverwick (q. v.) were issued, entitled _Mélanges de Théologie Reformée_, and in 1835 appeared his commentary on Colossians. In this work he included in the introduction only such information as was derived from sources other than the exposition of the epistle itself, and appended to the work a review of the exposition, in which he has compared it with the learned work of the French school. His work is built upon solid historical and philological foundations, and devotes especial attention to criticism of the text, despite its studied brevity. A hymn in honor of the Son of God, with which the preface concludes, affords evidence of the poetic endowment of the author, who left, in addition, a number of unprinted poems. He died Jan. 9, 1840, a widower and an infant son. See Hersog, *Reed-Enzyklop.* s. v.

Steinhofer, Maximilian Friedrich Christoph, an eminent minister in the Church of Wurttemberg, was born Jan. 16, 1706, at Owen, and graduated in theology at Tubingen in 1729. He supplemented his studies with a journey of observation among the churches of North Germany, and visited Hermuth, the seat of the Moravian Brotherhood. Mutual esteem resulted, and measures were proposed for obtaining Steinhofer as pastor to the community of Hermuth, but before any decision was reached he returned to Wurttemberg. Zinzendorf subsequently secured the release of the minister from his own charge for Hermuth; but the Saxony government interposed difficulties, and he accepted a call to Ebersdorf instead, where he filled the post of chaplain to the counts. The latter had previously organized the religious portion of their household into an _ecclesiola_ after the pattern of Spener, and to guide this organization and oversee the associated orphanage was to be his task. The society ultimately (August, 1745) effected an organization and adopted a constitution modelled after those of Hermuth, but was distinguished from the latter in doctrine and modes of expression, being more cautious, critical, and unqualifiedly scriptural. Steinhofer’s relations with Hermuth, however, were strongly influential, and in 1746 the Ebersdorf congregation united with the Moravian Brotherhood, while Steinhofer himself was ordained “coepiscopus for the Lutheran troops.” His service here was, however, brief, though varied. He married in 1747, and became inspector of a training school for a short time, after which he practiced as a lawyer and served for some time in various districts. The unsettled life to which he was condemned and the increasing fanaticism of the Brotherhood alienated him gradually from what had never been a thoroughly congenial home, and a brief visit to Wurttemberg threw him in the way of influences which he had long superseded. He now rejected all his previous teachings and modes of expression in current use at Hermuth. He thereupon quietly retired from his functions, and in time, after correspondence with Zinzendorf, laid down his offices, March 14, 1749, and returned to the Church of Wurttemberg. Four years were now spent in the sub-pastorate at Dottingen, whose fruit appeared in a collection of sermons, published in 1758. In this year he obtained the pariah of Zavelstein, in 1756 that of Ehnigen, and in 1759 he was made dean and preacher at Weinsberg, where he died, in peace, Feb. 11, 1761. Steinhofer was characterized by mildness of disposition, joined with heroic devotion to the truth. He studied the Bible to obtain a correct rendering of its meaning and for the enriching and developing of the Christian character. He differed from Bengel in not preferring apocalyptic studies, and from Oettinger in avoiding a theosophic tendency. He preferred the solid ground of Scripture to the position of any speculation whatever. He is said by his contemporaries to have been endowed with a peculiar sanctity which cannot be described. It was impossible to trifle in his presence, and yet impossible not to find pleasure there. He was an anointed one, who carried about him
those who knew him. His ministry was accordingly successful in the winning of souls. Steinheifer's writings have been in part published, and may be recommended to all who regard being imbued with the Scriptures as requisite for a right apprehension of the truth. They are, Tägliche Nahrung d. Glaubens n. d. Fp. an d. Hebräer (latest ed. 1853), with autobiography — Nach d. Fp. an d. Kolossar (1853) — Nach d. Leben Jesu (1854), eighty-three sermons; — Evangel. Glaubensgrund (1853—54) — Evangel. Glaubensgrund unter besonderer Berücksichtigung d. Leiden Jesu (1854) — Haushaltung d. dreieinigen Glaubens (1759) — Erklärung d. ersten Briefes Johannas (last ed. Hornburg, 1856) — Römer (Tub. 1851) — Christologie (Nuremberg, 1797; Tub. 1864), etc. See Knapp's sketch of Steinheifer's life in collection of Sermons (27) published by the Evangelical Brotherhood at Stuttgart; the autobiography mentioned above; an article in the Christenbote, 1892, and another in the Brüderbote, 1865—66; MS. sources in the archives of the Brotherhood, etc.

Steinkopf, Carl Friedrich Adolph, a German doctor of theology, was born at Ludwigsburg, Sept. 7, 1775, and studied theology at Tübingen. In 1801 he went to London and became a pastor of the Society Church, and placed himself in personal communication with the Religious Tract Society, of which he afterwards became one of the secretaries. When the British and Foreign Bible Society was founded, March 7, 1804, Dr. Steinkopf took a prominent and important part, and was unanimously appointed one of its secretaries, with special reference to the foreign department; but he also took his full share in its domestic deliberations and proceedings. He sustained this office till the year 1826, when he retired, because he would not take the position of the society regarding the Apocryphal books of the Old Testament. He died May 28, 1839. Steinkopf also published a number of sermons and different tracts, which are enumerated by Zuchold in his Bibliothek, ii. 1855. See also Theol. Universal-Lexikon, s. v.; Neue evangel. Kirchenzeitung, 1859, No. 32; but more especially the Memorial published in the Fifty-sixth Report (1860) of the British and Foreign Bible Society, p. 180 sq. (B. P.)

Steinemetz, Johann Adam, member of consistory, abbot of Bergen, and general superintendent of the duchy of Magdeburg, was born in 1639, and died June 10, 1763. He wrote, Ezete (di Trani) Commentarius in Josuam, etc., in Versio cum Notis Illustratum (Leips. 1712): — Das Buch der Weisheit, nach dem Grundtexte in griechischer Sprache mit philologischen und moralischen Anmerkungen (Magdeburg and Leips. 1747). See Fürst, Biblioth., ii. 389. See also Handbuch der theolog. Literatur, ii. 325, 360, 789. (B. P.)

Steins, Frederick, a Presbyterian minister, was born in Germany Nov. 18, 1805. He was educated at Mors, in Prussia, studied theology in the University of Bonn, and was licensed and ordained in the ministerium of Cologne in 1835, and for some years had the pastoral charge of a church near the Rhine. He afterwards emigrated to America, and entered the Duchy of York, New York, but while there developed a very pleasant acquaintance with some Presbyterian ministers of the Old School, and sought admission into their Church with the prospect, as he supposed, of greater usefulness. His field was a mission in the eastern part of New York City. He had a vast population of poor Germans among whom to work; and he labored faithfully, going from house to house through the streets where the poor dwelt, seeking the acquaintance of all, and distributing tracts, uttering words of comfort to the distressed and counsel to the indolent and ungodly. While thus employed in his master's service he died, Aug. 30, 1862. Mr. Steins was thoroughly trained in that line of work, and a kind and affectionate pastor. See Wilson, Preb. Hist. Almanac, 1868, p. 148. (J. L. S.)

Stellae, a mediaval term to describe a stem, stalk, or handle.

Stella, James, a French painter, was born at Lyons in 1896. At the age of twenty, being at Florence, he was assigned lodgings and a pension by Duke Cosimo de Medici, remaining there several years. He went to Rome, Milan, and finally to Paris, where Richelieu presented him to the king, who honored him with the Order of St. Michael and ordered several large paintings. He died in 1647. While at Paris he spent his winter evenings designing the Histories of the Holy Scriptures. He also painted the Holy Family, of which an engraving was made.

Stellos, in Greek mythology, was a youth whom Ceres changed into a larcis (Ovid, Metam. v. 461).

Stellonatius (from stello, a tarantula), a name applied in the time of the early Church to all imposture and fraud which has no special title in law — such as mortgaging property already engaged; changing wares which have been sold, or corrupting them; substituting baser metal for gold. The chief of these crimes were forgery, calumny, flattery, deceitfulness in trust, and deceitfulness in traffic. See Bingham, Christ. Antiq. bk. xvi. ch. xi, § 14.

Stenm (Sf.7), geza, the stump of a tree as cut down. "stock," Job xiv. 8; hence the trunk of a tree, whether old [ Isa. xi. 1] or just planted, "stock" [ xli. 24].

Stennett, Joseph, Sen., an English Baptist minister, was born at Abingdon in the year 1663. He showed remarkable intellectual ability in his youth, and made himself proficient in French, Italian, and Hebrew, and other Oriental languages by the time he was not far from twenty-one years of age. He was ordained March 4, 1690, and became pastor of a small church in Londes, with which he connected till his death. Such was the position he occupied in his denomination that the Baptists selected him to draw up the address which they presented to king William on his deliverance from a plot to assassinate him. He was also one of the committee of the Dissenters who drafted an address to the queen in 1706. It is a proof of the esteem in which he was held by the religious public that an eminent private said of him, If Mr. Stennett could be reconciled to the Church, he believed that few preachers in it would be thought above his merit. Mr. Stennett died July 21, 1718. His published works consist of a volume of poetry, three volumes of sermons, and some controversial writings, which were somewhat widely circulated in their day. (J. C. S.)

Stennett, Joseph, Jun., D.D., a Baptist minister in England, son of the preceding, was born in London Nov. 6, 1692. For some time he was minister of a Baptist Church in Abergavenny, Wales. In 1719 he became pastor of a Church in Exeter, where he remained.
eighteen years. He then went to London, and was pastor of the Church in Wild Street, Lincoln's Inn Fields, from 1737 to the close of his life. Dr. Stennett seems to have won the regard not only of his own Church, but of some of the cabinet ministers of George II., particularly of Arthur Onslow, Speaker of the House of Commons. He died at Warford Feb. 7, 1758. He published several Sermons and other pieces. His 'Cyclop. Bibliogr.' v. v.

Stennett, Samuel, D.D., an English Baptist minister, son of the preceding, was born at Exeter in 1727. Like his grandfather and father, he early exhibited rare intellectual abilities, making great proficiency in the classic and Oriental languages. Having entered the Christian ministry, he assisted his father for ten years, at whose death he was chosen his successor, and remained in that capacity until the Autumn of 1724, 24, 1795. Dr. Guild, in his 'Manning and Brown University,' says, 'Dr. Stennett was regarded as one of the most eminent ministers of his own denomination. His connections, too, with Protestant Dissenters generally, and with members of the Established Church, were large and respectable. One of his constant hearers was John Howard, whom Burke has so highly eulogized. George III., it is said, was on terms of intimacy with him, frequently calling at his house on Muswell Hill.' As a scholar and an author Dr. Stennett has no small repute. His works, edited by Rev. William Jones, were published in 1824 in three octavo volumes. ('J. C. S.'s)

Stenor, a Greekian warrior in the army against Troy, whose voice was louder than the combined voices of ninety other men. His name has accordingly furnished an adjective which, in common use, describes a voice of unusual volume. It is said that Juno assumed the form of Stenor in order to encourage the disheartened Greeks ('Iliad, v., 783 sq.); 'Juv. Sat. xiii., 112.'

Step or Stair. It may be convenient in this place to give the nomenclature of the different parts of a stair. The vertical surface is called the riser (or raiser), the horizontal surface the tread. If the edge have a moulding, it is called the nosing: this never appears in medi-

A step or a stair is an essential part of a building, and is usually designed to facilitate the ascent or descent of a flight. The number of steps is usually determined by the number of persons who use the stair. A flight of stairs is a series of steps leading from one floor to another. The tread of a step is the horizontal part that a person places their foot on. The riser is the vertical part that is lifted off the ground. The step and the stair are often used interchangeably.
throughout Saxony, insomuch that he had "stations" in every part, and held regular visitations among them. He also held correspondence and friendly relations with the dissenter of Württemberg and Baden, but severed his relations with the Moravian Brotherhood, whose members had been among the first to strengthen his hands in Dresden, and who denounced the friendship of the regular clergy to Seybenhaar. A youthful clergyman whom he had trained was blindly devoted to him, and his influence was felt in many parishes where the minister was not in harmony with his views. Disputes, and even open violence, broke out in many churches, and the government was ultimately induced to send a commission to Berlin and other places. The government's action, however, had been too late. Seybenhaar, who had been installed now entered a complaint against him, dated April 17, 1838, and supplemented July 5, 1838, in which the pastor was charged, first, with immodest and unchaste conduct (the specifications being too definite for performative role); second, with dishonest administration of the finances of his church; and, third, with frequent neglect of his official duties, especially with regard to Church, school, and the sick and dying; and these charges gave a more serious character to an investigation which had promised to result in his favor. Seybenhaar now gave the word to his followers to prepare for evangelization; but when getting ready he resumed his former nocturnal practices, and again came under police surveillance. At midnight of Oct. 27-28 he secretly, and without bidding adieu to his family, left the city and repaired to Bremen, where a body of his adherents had assembled to the number of 700 souls, including six clergymen, ten candidates, and four teachers. He sailed for America on Nov. 18. During the passage he was noticeably lonesome, idle, and arbitrary, though faint-hearted in moments of danger. Five days before the arrival at New Orleans he caused himself to be elected bishop, and before arriving at St. Louis he had a council of his adherents by which a body of adherents pledged themselves to be subject to him "in ecclesiastical, and also in communal, matters," only one person refusing to subscribe to its terms. His power had been established by the fact that he had obtained control of the emigration fund, amounting in the aggregate to about 125,000 thalers. He allowed more than two months to pass unimproved at St. Louis, to the great financial injury of the colony, while procuring the insignia of a bishop's office and leading a life of pleasure. In April, 1839, however, a portion of the colony, including the bishop, removed to Wittenberg, 18 miles from St. Louis, and had not been heard of or chased. On May 5 and afterwards a number of young girls revealed to pastor Lobor that Seybenhar had made improper advances to them while at sea and after the arrival, using as a cloak his sacred position and office. These statements were established by affidavits. Seybenhar was subsequently deposed of his rank, and was excommunicated and expelled the community. He went to Illinois, followed by his faithful concubine, and died in Randolph County, of that state, in February, 1846. His deceived followers experienced grave difficulties because of unfavorable outward circumstances, and the general internal dissatisfaction of his pastorate was not able at once to lay aside that tendency to hierarchal pretensions which they had imbibed from Seybenhar's example; but eventual prosperity came to them under the guidance of the Rev. O. H. Walther, pastor of the St. Louis congregation.

Stephan was evidently a chosen instrument of God, employed with exaltation and the charisms, which he employed for the blessing and abused to the misery of souls. He was of imposing physical stature, over six feet high, and possessed of rugged earnestness and intense determination. He was as shrill as he was bold. His early ministerial life was that of a hermit. Externally, he was a model of ascetic devotion, and his people excied his vanity, and opened the way to sin and immorality. In his latter days he was, no doubt, an abandoned hypocrite, who used his high positions for the gratification of his fleshly lusts. See Stephan, Predigten, two sermons delivered in the Church of St. John, in Dresden, on the day of commemorating the Reformation, and on the first Sunday in Advent, 1823 (Dürr, Dresden and Leipzig); id. Der christl. Glaube. Sermons in the year 1824 (Dresden, 1825, 2 pts.); Fischel, Glaubensbekenntnisse d. deutschen Pietisten, 1827 (Dresden, 1828); Die hymnen composed by the emigrating colony of Stephanists, in which exaggerated adulation of the pastor, Stephan, is intermixed with devotional sentiment; Franke, Two Sermons on Eph., iii, 14, 15, 6, delivered in the royal chapel at Dresden, 1838; Steinitz, Three Sermons on the Stephanists (Dresden, 1838); Siebenhaar, Discourses relating to the Stephanist Movement (Penig, 1839); Widenhain, A Sermon (ibid, 1839); Pleissner, Die kirch. Fanatiker im Muldenhalle (Altenburg, 1839), rationalistic; Warne, Der neue sächs. Auswanderer nach America (Leipsic, 1839), shallow, and not important; Schäfer u. A. Weber d. Stephanisten (Dresden, 1839), based on reports from Günther, a returned emigrant Stephanist; Fischer, Das falsche Martyrergut, etc. (Leipsic, 1839), the most complete presentation of the subject; Von Polenz, D. öffentl. Meinung u. d. Pastor Stephan (Dresden and Leipzig, 1840), the most important treatise for reaching a true estimate of Stephan; Vehse, D. Stephanische Anm. u. America, etc. (Dresden, 1840), held by returned members of the Stephanist colony to be the most accurate statement of the facts as they occurred; Walther, Sermon delivered before the Lutheran Congregation in St. Louis, Nov. 22, 1840;صيانة Stephan's Diet in regard to the case of Stephen and see Guericke, Handb. d. Kirchengesch. 3d ed. ii, 995, 1096 sq., and numerous articles in the periodicals of the time.

Stephanus (Στέφανος), a contraction for the colloquial Lat. Stephanus, "crowned"); a disciple at Corinth whose household Paul baptized (1 Cor. i, 16), being the first converted to Christianity in Achaia (xvi. 14). For these texts it would appear that Stephanus and his family, in the most exact sense, were "addicted themselves to the ministry of the saints," which some interpret of their having taken upon them the office and duty of deacons; but which seems to admit of a larger sense (without excluding this), namely, that all those who had been his excellent family ministered to the wants and promoted the comfort of their fellow-Christians, whether strangers or countrymen. As the household of Stephanus is mentioned in both texts, it has been supposed that Stephanus himself was dead when Paul wrote; but in ver. 17 it is said "I am glad of the coming of Stephanus."—Kitto. He was present with the apostle at Ephesus when he wrote his First Epistle to the Corinthians (A.D. 54), having gone thither either to consult him about matters of discipline connected with the Corinthian Church (Chrysost. Hom. 44, or on some charitable mission.

Stephan, Heinrich, a Protestant divine of Germany, born at Gmünder, April 1, 1761. He studied at Erlangen, and was made in 1784 member of consistory of Erlangen. He was appointed prebendary of the Church and school at Augsburg; in 1818 dean and pastor at Günzenhausen, was suspended in 1826, and died in 1850 at Gorkau, in Silesia. He wrote, Gedenken über Entstehung und Ausbildung eines Missions (Nuremberg, 1787); Grundräff der Staatsverzeichnisse, 1804 (Nuremberg, 1805); Die Staat und der Religions (4th ed. Nuremberg, 1819): Das allgemeine berechtig. Recht der protestantischen Kirche in Deutschland (Tü-
to be called away from their proper employment of extending the bonds of the Christian community, they told the same tale as the multitudes of the people men of their own number, in whose faith and integrity they might repose entire confidence, for the superintendence of everything connected with the relief of the poor. The proposal of the apostles met with the approval of the brethren, who proceeded at once with the choice of the new presiding number of individuals, among whom Stephen was first mentioned; hence the title of first deacon, or first of the deacons, is given to him by Ireneus (Iren. 1, 12). He is distinguished in Scripture as a man “full of faith and of the Holy Ghost” (Acts vi. 5). The newly elected individuals were brought to the apostles, who ordained them to their office by laying on of hands, with extraordinary zeal and success. The number of the disciples was greatly increased, and many priests were among the elect converts. In this work Stephen greatly distinguished himself by the miracles he performed before the people and by the arguments he advanced in support of the Christian cause. From his foreign descent and education, he was naturally led to address himself to the Hellenists; and in his disputations with Jews of the Synagogue of the Libertines and Cyrenians, etc. [see SYNAGOGUE; LIBERTINES], he brought forward views of the Christian scheme that could not be refuted by the bigots of the ancient faith.

3. The Martyrdom of Stephen.—Don’t make the mistake the apostles and the early Christian community had clung in their worship, not merely to the Holy Land and the Holy City, but to the holy place of the Temple. This local worship, with the Jewish customs belonging to it, Stephen now seems to have denounced. The actual words of the charge brought against him may have been false, as the sinister and malignant intention which they ascribed to him was undoubtedly false. “Blasphemous” (βδανυται), that is, calumnious, “words against Moses and against God” (Acts vi, 11) he is not likely to have used. But the overthrow of the Temple, the cessation of the Mosaic ritual, is no more than Paul preached openly, or than is implied in Stephen’s own speech, “against this holy place and the law”—“that Jesus of Nazareth shall destroy this place, and shall change the customs that Moses delivered us” (ver. 18, 14).

Benson (History of the First Planting of the Christian Religion) and others have considered the testimony of the witnesses against Stephen as false, and that we are not even to suppose that he had stated that Christ would change the customs which Moses delivered (Acts vi, 14), upon the ground of the improbability of more being revealed to Stephen than to the apostles, as to the abolition of the Levitical ceremonies. From the strain of the martyr’s speech, however, a different conclusion may be drawn. His words imply, in various passages, that external rites were not essential, and that true religion was not confined to the Temple service (vii, 8, 38, 44, etc.). There seems much plausibility in the conjecture of Neander (Planting and Training of the Christian Church, translated by Hyland, i, 56 sq.) that Stephen and the other deacons were less concerned with birth and education, were less under the influence of Jewish prejudices than the natives of Palestine, and may thus have been prepared to precede the apostles themselves in apprehending the liberty which the Gospel was to introduce. The statements of Stephen correspond in more than a particular with what was afterwards taught by Paul.

4. The Trial.—For such sayings he was arrested at the instigation of the Hellenistic Jews and brought before the Sanhedrin, where, as it would seem, the Pharisaic party had just before this time (Acts v, 34; vii, 51), gained an ascendency. As they were unable to withstand his powers of reasoning, their malice was excited; they suborned false witnesses against him as a blasphemer. The charge brought against him was, as we have seen, that he had spoken against the law and
sation was calculated to incite all parties in the Sanhedrin against him (comp. xxii, 22); and upon receiving it the predetermined purpose of the council was not to be made known. Stephen saw that he was to be the victim of the blind and malignant spirit which had been exhibited by the Jews in every period of their history. But his serenity was unshaken; his confidence in the goodness of his cause and in the promised support of his heavenly Master imparted a divine tranquillity to his soul, which was not shaken even by the most malignant rage and hate that was ever exhibited against him, the light that was within beamed forth upon his countenance, and "they saw his face as if it had been the face of an angel" (vi, 15).

For a moment, the account seems to imply, the judges of the Sanhedrin were awed at his presence. Then the high-priest that presided appealed to him (as Caiaphas had, in like manner, appealed in the great trial in the Gospels' history) to know his own sentiments on the accusations brought against him. To this Stephen replied in a speech which has every appearance of being faithfully reported. The peculiarities of the style, the variations from the Old Testament history, the abruptness which, by breaking off the argument, prevents us from easily doing it justice, are all indications of its being handed down to us substantially in its original form.

5. Stephen's Defence.—His speech is well deserving of the most diligent study, and the more it is understood the higher idea will it convey of the degree in which he possessed the qualities ascribed to him in the alabaster cylinder. Very different views have been taken of it by commentators. Upon the whole, we are inclined to follow that which is given by Neander in the work referred to. Even as a composition it is curious and interesting from the connection which may be discovered between the various parts, and from the unity given to the whole by the honesty and earnestness of the speaker. Without any formal statement of his object, Stephen obviously gives a confession of his faith, sets forth a true view of the import of his preaching in opposition to the false gloss that had been put upon it, maintains the justness of his cause, and shows how well founded were his denunciations against the imposters among the Jews.

The framework in which his defence is cast is a summary of the history of the Jewish Church. In this respect it has only one parallel in the New Testament, the eleventh chapter of the Epistle to the Hebrews—a likeness that is the more noticeable, as, in all probability, the immediate writer of that epistle was, like Stephen, a Hellenist.

In the facts which he selects from this history he is guided by two principles—at first more or less latent, but gradually becoming more and more apparent as he proceeds. The first is the endeavor to prove that, even in the previous Jewish history, the presence and favor of God had not been confined to the Holy Land or the Temple of Jerusalem. This he illustrates with a copiousness of detail which makes his speech a summary almost as much of sacred geography as of sacred history—the appearance of God to Abraham in "the Mount of the Lord's House" (Acts vii, 3); his succession to Moses at Mount Sinai (comp. xxii, 22); the dwelling of his seed in a strange land (ver. 6); the details of the stay in Egypt (ver. 8—13); the education of Moses in Egypt (ver. 20—22); his exile in Midian (ver. 29); the appearance in Sinai, with the declaration that his name was Jehovah (yəhôwâ) (ver. 30—33); the forty years in the wilderness (ver. 36—44); the long delay before the preparation for the Tabernacle of David (ver. 45); the proclamation of spiritual worship even after the building of the Temple (ver. 47—50).

The second principle of selection is based on the attempt to show that there was a tendency from the earliest times towards the same ungrateful and narrow political existence. And this rigid, suspicious disposition he contrasts with the freedom of the divine grace and of the human will, which were manifested in the exaltation of Abraham (Acts vii, 4), Joseph (ver. 10), and Moses (ver. 20), and in the jealousy and rebellion of the nation against those their greatest benefactors, as chiefly seen in the bitterness against Joseph (ver. 9) and Moses (ver. 27), and in the long neglect of true religious worship in the wilderness (ver. 39—43).

Both these two great principles that may almost be called critical principles. There is no allegorizing of the text, nor any forced constructions. Every passage quoted yields fairly the sense assigned to it.

Besides the direct illustration of a freedom from local restraints involved in the general argument, there is also an indirect illustration of the same doctrine, from his mode of treating the subject in detail. Many of his references to the Mosaic history differ from it either by variation or addition, apparently from traditional sources of information, e. g.:

1. The call of Abraham before the migration to Haran (Acts vii, 9), not, as according to Gen. xi, 31, before it.
2. The death of his father after the call (Acts vii, 4), not, as according to Gen. xi, 25, before it.
3. The seventy-five souls of Jacob's migration (Acts vii, 14), not, as according to Gen. xvi, 27, seventy.
4. The supreme loveliness (see avw'v 1er 16, 2, a Hebraic superlative) of Moses (Acts vii, 30), not simply, as according to Exod. xix, 9, the statement that "he was a goodly child."
5. His Egyptian education (Acts vii, 29) as contrasted with the silence on this point in Exod. iv, 10.
6. The personality of God with regard to a peculiar grace, "mighty in words and deeds" (Acts vii, 29, comp. Exod. ii, 10).

7. The distinct mention of the three periods of forty years (Acts vii, 33, 38, 40), of which only the last is specified in the Pentateuch.

8. The presence of Moses at the bush (Acts vii, 29), not mentioned in Exod. iii, 3.

9. The supplementing of the Mosaic narrative by the allusion to the history of the neglect of the true worship in the desert (Acts vii, 42, 43).
10. The intervention of the angels in the giving of the Law (Acts vii, 29), not mentioned in Exod. xii, 16.
11. The burial of the twelve patriarchs at Shechem (Acts vii, 16), not mentioned in Exod. i, 6. The burial of Joseph's bones alone is recorded (Josh. xxiv, 32).
12. The purchase of the tomb at Shechem by Abraham from the sons of Emmer (Acts vii, 16), not, as according to Gen. xxiii, 15, the purchase of the cave at Machpelah from Ephron the Hittite.

13. The tradition of Remphan from the Sept. of Armaï, 29, not found in the Hebrew.

The explanation and source of these variations must be sought under the different names to which they refer; but the general fact of their adoption by Stephen is significant as showing the freedom with which he handled the sacred history, and the comparative disregard of very accuracy by him in that historical section which regards his speech. "He had regard," as Jerome says, "to the meaning, not to the words." (See their reconciliantion in Wordsworth's New Testament, 1860, p. 65—69.)

6. His Condemnation and Martyrdom.—It would seem that, just at the close of his argument, Stephen saw a change in the aspect of his judges, as if for the first time they had caught the drift of his meaning. He broke off from his calm address, and turned suddenly upon them in an impassioned attack which shows that he saw what was in store for them. Those heads thrown back on their unbending necks, those eyes chased against any person, no matter how close to his patron, "Ye stiff-necked and uncircumcised in heart and ears ye do always resist the Holy Ghost: as your fathers did, so do ye. Which of the prophets did your fathers persecute? ... the Just One: of whom ye are the betrayers and murderers." As he spoke they showed by their tears and their hearts (to use the strong language of the narrative) that they were being saved suddenly, and they kept grasping their set teeth against him, but still, though with difficulty, restraining themselves.
Ho, in this last crisis of his fate, turned his face upwards to the open sky, and as he gazed the vault of heaven seemed to him part asunder (έπονομασθεῖς), and the divine glory appeared through the reading of the heavenly veil—the Divine Presence, seated on a throne, and on the right hand the human form of “Jesus,” not, as in the usual representations, sitting in repose, but standing erect, as if to assist his suffering servant. Stephen spoke as if to himself, describing the glorious vision, in which he saw one of all the speakers and writers in the New Testament, except only Christ himself, use the expressive phrase, “the Son of man.”

As his judges heard the words, expressive of the divine exaltation of him whom they had sought so lately to destroy, they could forbear no longer. They broke into a loud yell; they clapped their hands to their ears, as if to prevent the entrance of any more blasphemous words; they flew as with one impulse upon him, and dragged him out of the city to the place of execution.

It has been questioned by what right the Sanhedrin proceeded to this act without the concurrence of the Roman government; but it is enough to reply that the whole transaction is one of violent excitement. On one occasion, even in our Lord’s life, the Jews had nearly stoned him even within the precincts of the Temple (John viii, 59). “Their vengeance in other cases was confined to those subordinate punishments which were left under their own jurisdiction: imprisonment, public scourging, and execrations” (Milman, Hist. of Latin Christianity, i. 400). See Conybeare and Howson, Life of St. Paul, i. 74. On this occasion, however, they determined for once to carry out the full penalties enjoined by the severe code of the Mosaic ritual. See Stoning. Any violator of the law was to be taken outside the gates, and there, as if for the sake of giving to each individual member of the community a sense of his responsibility in the transaction, he was to be crushed by stones, thrown at him by all the people. Those, however, were to take the lead in this wild and terrible act who had taken upon themselves the responsibility of denouncing him (Deut. xvii, 7; comp. John viii, 7). These were, in this instance, the witnesses who had reported or misreported the words of Stephen. They, according to the custom, for the sake of facility in their dreadful task, stripped themselves, as is the Eastern practice on commencing any violent exertion; and one of the prominent leaders in the transaction was deputed by custom to signify his assent (Acts xxii, 20) to the act by taking the clothes into his custody, and standing over them while the bloody work went on. The person who officiated on this occasion was a young man from Tarsus—one, probably, of the Cilician Hellenists who had disputed with Stephen. His name, as the narrative significantly adds, was Saul. Everything was now ready for the execution. It was outside the gates of Jerusalem. The earlier tradition fixed it at what is now called the Damascus gate. The later, which is the present tradition, fixed it at what is hence called St. Stephen’s gate, opening on the descent to the Mount of Olives; and in the red streaks of the white limestone rocks of the sloping hill used to be shown the marks of his blood, and on the first rise of Olivet, opposite, the eminence on which the Virgin and her mother supported him while they prayed. The sacred narrative fixes its attention only on two figures—that of Saul of Tarsus, already noticed, and that of Stephen himself.

As the first volley of stones burst upon him, he called upon the Master whose human form he had just seen in the heavens, and repeated almost the words with which he himself had given up his life on the cross, “O Lord Jesus, receive my spirit.”

Another crush of stones brought him on his knees. One loud piercing cry (καταραμένη μεγάλη φωνή)—answering to the loud shriek or yell with which his enemies had flown upon him—escaped his dying lips. Again clinging to the spirit of his Master’s words, he cried, “Lord, lay not this sin to their charge,” and instantly sank upon the ground; and, in the touching language of the narrator, who then uses for the first time the word afterwards applied to the departure of all Christians, but here the more remarkable from the bloody scenes in the midst of which the death took place—κοίμησάς, “fell asleep.”

It is remarkable that the history of Stephen’s trial and execution appears for the first time in the New Testament document so far as only two persons are mentioned by name as witnesses to the event. No reference to it occurs in the other Gospels. It is related in three other places: (1) in Josephus; (2) in Tacitus; and (3) in the Jewish historian, who was a contemporary of the Acts writers. It is probable that the history was written by a Christian who was with Stephen at the time of his death, and who later wrote the story to preserve the memory of the event and the name of the man who had so nobly maintained the faith of his fathers and died for it. This story is probably first drawn up on the occasion of the remarkable event which occurred in A.D. 415, under the name of the Invention and Translation of the Relics of St. Stephen. Successive visions of Gamaliel to Lucian, the parish priest of Caphar Gamala, on Dec. 3 and 18 in that year, revealed the spot where the martyr’s remains would be found. They were identified by a tablet bearing his name, Cheilet, and were carried in state to Jerusalem, amid various portents, and buried in the church on Mount Zion, the scene of so many
tion is celebrated in the Latin Church on Aug. 3, probably from the tradition of that day being the anniversary of the dedication of a chapel of St. Stephen at Ancona. The event is not without legend, but the event is mentioned in all the chief writers of the time. Parts of his remains were afterwards transported to different parts of the coast of the West—Minorca, Portugal, North Africa, Ancona, Constantinople—and in 460 what were still left at Jerusalem were translated by the empress Eudocia to a splendid church called by her name. On this magnificent edifice (Tillemont, St.-Étienne, art. 5-9, where all the authorities are quoted) Evodius, Bishop of Mylas, wrote a short treatise concerning the miracles performed by them; and Severus, a bishop of the island of Minorca, wrote a circular letter of the conversion of the Jews in that island and of the miracles wrought in that place by the relics which Orosius left there. These writings are contained in the works of Augustin, who gives the sanction of his authority to the incredible follies they record (De Civ. Dei, xxii, 8).

The exact date of Stephen's death is not given in the Scriptural history. But ecclesiastical tradition fixes it in the same year as the crucifixion, on Dec. 28, the day after Christmas-day. It is beautifully said by Augustin (in allusion to the juxtaposition of the two festivities) that men would not have had the courage to die for God, if God had not become man to die for them (Tillemont, St.-Étienne, art. 4).

L. The Life of Stephen. Typical Character.—The importance of his career may be briefly summed up under three heads:

1. He was the first great Christian ecclesiastic. The appointment of the "Seven," commonly (though not in the Bible) called deacons, formed the first direct institution of the nature of an organized Christian ministry, and of these Stephen was the head—"the deacon," as he is called in the Eastern Church—and in this capacity represented as the companion or precursor of Laurence, archdeacon of Rome in the Western Church. In this sense allusion is made to him in the Anglican Ordination of Deacons.

2. He is the first martyr—the protomartyr. To him the name "martyr" is first applied (Acts xxii, 20). He, first of the Christian Church, bore witness to the truth of his convictions by a violent and dreadful death. The veneration which has accrued to his name in consequence is a testimony of the Bible to the sacredness of truth, the nobility of sincerity, to the wickedness and the folly of persecution. It also contains the first germs of the reverence for the character and for the relics of martyrs, which afterwards grew to a height now recorded by all Christians as excessive. A beautiful hymn, by Reginald Heber, commemorates this side of Stephen's character.

3. He is the forerunner of Paul. So he was already regarded in ancient times. Πέλας ο ἐκκένωσαν is the expression used for him by Basil of Seleucia. But it is an aspect that has been much more forcibly drawn out in modern times. Not only was his martyrdom (in all probability) the first means of converting Paul—his prayer for his murderers not only was fulfilled in the conversion of Paul—the blood of the first martyr, the seed of the greatest apostle—the pang of remorse for his death, among the stings of conscience against which the apostle vainly wrested (Acts ix, 5); not only thus, but in his doctrine also, he was the antecedent, as, had he lived, he would have been the propagator, of the new phase of Christianity of which Paul became the main support. His denunciations of local worship, the stress which he lays on the spiritual side of the Jewish history, his freedom in treating that history, the very turns of expression that he uses, are all typical.

Archäol. Denkmäler i. 145; Rees, De Lapidestonio Stephani (1729); Ziegler, Acta Stephani (Vienne 1736); Walch, De Funeris Steph. (Jen. 1756); Schwartz, Martyrium Stephani (Vieus 1756); Baut, De Ostroam Steph. (Tubs 1789); Schmid, Dieck in St.-Étienne (Strasburg 1839); Bohn, Life of St. Stephen (Lond 1844); and other monographs cited by Volbeding, Index Pro grammatum, p. 74; and by Danz, Wörterb. s. v. "Apostelgesch." Nos. 56, 57.

Stephen I, pope from A.D. 233 to 257, was a native Roman, and is noteworthy because of his connection with the controversy respecting the administration of baptism by heretics. In Africa and the East such baptism was generally rejected, while at Rome the received heretics who had been baptized were received simply with laying-on of hands. The Eastern Church, and especially Cyprian of Carthage (q. v.), decided emphatically against the practice of Rome, and asserted that baptism, as a valid rite, cannot exist beyond the pale of the Church; to which Stephen replied that every baptism performed in the name of Jesus carries with it regenerating and sanctifying influence. The synods of Carthage, in 255 and 256, sanctioned the Eastern opinion, and forwarded notice of their decision to Rome. A dispute between Stephen and Cyprian was then inaugurated, which ended with Stephen's renouncing all connection with the African Church. Stephen found earnest opponents, also, in bishops Dionysius of Alexandria and Firmilian of Caesarea, the latter of whom emphatically resisted the claim of the Romish see to supremacy, and would have been stoned to death in the quarrel. The division between the churches continued down to Stephen's death, in 257. Tradition relates that he died a martyr under Valerian, condemned because he refused to sacrifice to idols. He is commemorated Aug. 2.

Stephen II, said to have been elected pope March 27, 752, and to have died three or four days afterwards, is not usually included in lists of the popes.

Stephen III, whose pontificate lasted from 752 to 757, is generally recorded as Stephen II. This pope was threatened by Astolph, king of the Lombards, who took the exarchate of Ravenna. Stephen thereupon appealed to Pepin the Short, king of the Franks for help, and offered in return an eternal reward and all the joys of Paradise, but threatened him with forfeiture of his lands if he should delay. Pepin was obliged to return to Italy (755), and the Lombards were restored to him the territories he had conquered, and then raised the pope to the patriarchate, and made him protector of the exarchate. This act first made the pope the secular head of a country and a people. Stephen, in return, anointed Pepin king. He died in 757, leaving a number of letters and canonical constitutions.

Stephen IV, pope from 768 to 772, was a Benedictine monk, and had been made cardinal-præses by Zachary. He condemned his rival pope Constantine, who had been a layman, as a usurper of the episcopal chair, and in 769 held a synod in the Lateran, which decreed that only a deacon or a priest could sit in the papal dignity. The same synod sanctioned the fresh of the worship of images, relics, and saints, which had been rejected by a synod at Constantinople and by the emperor Constantine Copronymus. This pope was troubled by the Lombards, and sought relief at the hands of Charles and Carloman, the Frankish kings. The persistent enmity of the Lombards suggested the advisability of preventing any alliance between them and the Franks, and Stephen was accordingly concerned.
to prevent the consummation of a proposed marriage of Charles with Desideria, daughter of the Lombard king. He did not, however, accomplish his purpose; but Charles separated from his wife when they had been married one year. Stephen died in 772.

Stephen V (IV), a Roman, created cardinal-deacon by pope Leo III, who was raised to the papal throne in A.D. 816, but reigned only a few months. He caused the discontented Roman population to swear allegiance to Louis the Pious as well as to himself, in order to bring them more completely into his power; and he crowned that monarch emperor. He died in 817.

Stephen VI (V) ascended the papal chair in 885. He negotiated with the emperor Basil of Constantinople and his son Leo for a restoration of the peace between the Greek and Roman churches which had been disturbed by Photius (q. v.). Stephen demanded that all clergy men consecrated by Photius should be deposed, and that those whom the latter had banished or excommunicated should be restored; and Leo conformed to the requirement. The pope was also able to maintain his position against Charles the Fat, who sought to depose him because he had not obtained secular confirmation. He crowned the duke Guido of Spoleto as emperor, and died in 891.

Stephen VII (VI), pope during a few months, in 896–897. On his attaining to the papal dignity he caused the body of his predecessor and personal enemy, Formosus (q. v.), to be exhumed and mummified, after which it was thrown into the Tiber. It is alleged that Formosus had, on some former occasion, prevented Stephen from becoming pope. The same partisan fury which enabled Stephen to vent his anger upon a deceased enemy brought about his own destruction. He was strangled to death in prison, and his action towards Formosus was condemned by a synod under John IX (898).

Stephen VIII (VII), pope from 899 to 891, belongs to the number of pontiffs who were governed by the notorious Theodora and Marozia. He is remarkable in no other respect.

Stephen IX (VIII), a German, and related to the emperor Otto the Great, was elevated to the papacy by the action of clergy and people in 995, and reigned until 992. He was totally unable to resist the shameless rule of abandoned women in the Church, and, like the other popes of that period, was simply the creature and plaything of a party.

Stephen X (IX), a creature of Hildebrand [see Gregory VII], was the son of duke Gotelom of Nether-Lorraine. His name was Frederick. Pope Leo IX appointed him cardinal-deacon and chancellor to his apostolic chair. In that capacity he accompanied cardinal Humbert as legate to Constantinople, and aided in preventing any reconciliation between the two churches (comp. Breviarium Commmunem, eorum quo Gessent Apostol, Sincto Rom., Nevia in Regia Urbe, etc., in Annual Eccles. auxt. Cass. Baronio [Col. Agrripp, 1809], IX, xix, 222; also Annuat. Eccles. ex vet. Tomis C. Bonum, Reduct, opera Hen., Spondoni [Monunt. 1618], p. 824). On his return he became a monk in the Convent of Monte-Casino, and was promoted to be abbot; and when Victor II died he ascended the papal chair, A.D. 1057, under the name of Stephen. Guided by Hildebrand, he opposed the immorality of the clergy, especially with respect to simony and concubinage. He appointed the famous Peter Damiani (q. v.), to be bishop of Ostia, and entered into negotiations with Agnes, mother of the emperor Henry IV, with a view to secure the expulsion of the Normans from Italy, and also to insure the election of bishop Gerard of Florence as his successor (who actually did follow him to the pontificate as Nicholas II). and, finally, he ordered that the election of a pope should be postponed until the return of Hildebrand from Germany, whether he had gone as a legate. He died in 1058.

Stephen de Bellaville, or de Borbone, was a Dominican monk at Lyons, and died in 1261. His great work, De Septem Donis Spiritus Sancti, is yet unpublished, though a portion referring to the Cathari and the Waldenses had been issued in D'Argentre, Collectio Judiciorum de Novis Erroribus, 1, 85 sq., and more fully in Quisit et Echard, Scriptores Ordinis Predicatorum, 1, 190 sq. It is found in manuscript in France, England, and Spain. Stephen had preached in his youth, at Valence, against the Cathari, and was afterwards a parish priest; he then had the opportunity to learn what were the teachings and customs of the sects found in Southern France. His report of such sects is among the most trustworthy sources of the history of heresies, though sometimes overdrawn. His statements respecting the Lyonnaise Vaudois and the Waldenses are mostly true, as they seem to indicate that these people had adopted some of the views held by the Brethren of the Free Spirit (q. v.).

Stephen of Tournay, born in 1135 at Orleans, France, abbot of the convent of St. Evertre at Orleans, and afterwards of St. Genevieve at Paris, was subsequently made bishop of Tourny, and died in 1203. He was very learned in canon law, but rather narrow in philosophical and theological studies. While he complained of the confusion existing with respect to science, of the ambition of scholars and their fondness for disputing on matters pertaining to the faith, he was yet unable to discover any remedy for the evils he deplored save the intervention of the papal authority. He hoped that in this way genuine and sound theological instruction might be secured, and that bounds might thus be set to the independence of the teachers. His principal work appears to have been a Summa de Decretis, only the preface of which is known. Two discourses and several letters from his pen are extant, which possess some importance as sources for the history of his time. The best edition is that of Molinet (Paris, 1675, 8vo).

Stephans, more correctly Stephen (Etienne), the family name of an illustrious succession of learned printers, of whom, however, we have here to notice specially only Konrert. He was the son of Henri Etienne (Henricus Stephanus), the printer of the Quindecim Psalmoterum de Feve de Estipolles (Paris, 1509–15), who died in 1510. Robert was born in Paris in 1501. Having received a learned education and become skilled in the classical languages and Hebrew, he devoted himself to the editing and issuing of carefully printed editions of learned works. In 1545 he issued, under the simple title of Biblii, an edition of the Vulgate, with a new Latin translation of the Bible, printed in parallel columns, and in a type of exquisite beauty. Explanatory notes were added in the margin; and as some of these gave offence to the doctors of the Sorbonne as savouring of the Reformed doctrines, Stephens thought prudent, on the death of his father, to remove to Geneva. Before leaving Paris, however, he had issued his edition of the Greek New Testament, first in a small folio, known as the O miniicna edition, from the first words of the preface (Paris, 1546–49), and afterwards in folio, with various readings from MSS. collated by his son Henry. At Geneva he printed an edition of the Greek text with the Vulg. rendering, and that of Erasmus, 1551. This edition presented the text for the first time in a form divided into verses. Two editions of the Hebrew Bible were also printed by him—one with the Commentary of Kimchi on the minor prophets, in 13 vols. 4to (Paris, 1593–49), another in 10 vols. 16mo (ibid. 1544–46). It is to him we owe the Thesaurus Lingue Latinae (4 vols. fol.), as to his son Henry the Thesaurus Ling. Graece is due—two

Stephens, Abednego, an Episcopal clergyman, was born at Centreville, Queen Anne Co., Md., July 24, 1812. When three years of his age his parents moved to Havre de Grace in that state, and from thence, in 1819, to Staunton, Va. In 1829 his father left him in charge of a farm, at which he worked until he entered college at the close of the session; wound up his father's business, and conducted the family to Columbia, Tenn. He was elected to the presidency of a male academy in that place, resigning to enter the University of Nashville in May, 1832, from which he graduated in October, 1833. On July 8, 1834, he was ordained by Bishop Meade. After graduation he accepted the tutorship of ancient languages in his alma mater, and was soon after made professor in the same department. He attended the General Theological Seminary in New York from October, 1836, to October, 1837, and upon his return was ordained deacon by bishop Ottey, Oct. 13, 1837, entering priest's orders soon after. He continued in his college professorship until 1839 he accepted a call to the presidency of Jefferson College, at Washington, Miss. His health failing, he spent the winter in Cuba; but, receiving no permanent relief, returned and settled at Nashville, where he died, Feb. 27, 1841. He stood in front of college and church pulpits; his sermons were characterized by depth and comprehension of thought, and by profound research and impassioned eloquence.” See Sprague, Annals of the Amer. Pulpit, v. 746.

Stephens, Daniel, D.D., an Episcopal clergyman, was born at Licking Creek, Bedford Co., Pa., in April, 1778. At the age of nineteen he joined the Baptist Church, and devoted his intention of devoting himself entirely to the ministry. Entering Jefferson College, Canonsburg, Pa., at the age of twenty-five, he was, after the first year, appointed tutor of ancient languages, and so industrious as to be able to study divinity during one session of his senior year and to graduate in 1805. He entered upon the vocation of teaching, studying divinity under Mr. (afterwards bishop) Kent. Deciding to enter the Episcopal Church, he was ordained deacon by bishop Cloggett in February, 1809. For this choice he was disinherited by his father. Upon his ordination he removed to Chestertown, and taught in Washington College, and preached acceptably. He was ordained priest by bishop Cloggett in Baltimore in 1810, and removed to Centreville, Queen Anne Co., where he had charge of an academy and two parishes. He remained there four years, and removed to Havre de Grace, where he preached four years, when he accepted a call to Staunton, Va., and continued there five years. After a short residence in Fincastle, Va., he accepted a call to St. Peter's Church, Columbia, Tenn., in 1829. Removing to Bolivar, Tenn., in 1833, he organized the parish of St. James. His wife died in 1847, and he consented to retire to the home of his son-in-law, Peter Miller, of Bolivar. He resigned his charge in 1849, and died Dec. 13, 1850. See Sprague, Annals of the Amer. Pulpit, v. 519.

Stephens, Jeremy, an English divine, was born at Bishop's Castle, Shropshire, in 1592, and entered Brasenose College, Oxford, in 1609. Taking his degrees in art in 1615, he was ordained deacon, and appointed chaplain of All-Souls' College. In May, 1616, he was admitted to priest's orders, and in 1621 was presented to the rectory of Northam, Northamptonshire, and in 1626 to that of Wotton, both by Charles I. He was made prebendary of Biggleswade, Lincoln, in 1641, but was deprived in 1644 of all his prebendaries, and imprisoned by the usurping powers. At the Restoration he was replaced in all his former livings, and had also a presentancy of the rectory of Tringham in Northamptonshire, and in January 9, 1665. He published, Nota in D. Cyprianum. De Unitate Ecclesiae (London, 1632, 8vo);--Nota in D. Cyprianum. De Iuno Patientie (ibid. 1633, 8vo);--Apology for the Ancient Right and Power of the Bishops to Sit and Vote in Parliament (ibid. 1660).--B. Gregorii Magni Episcopi Romani de Caru Pastorali Libere Aureus, etc., MSS. cum Romana editione collatis (ibid. 1629, 8vo). He was also editor of Spelman, On Tithes, and his apology for the treatise De non Teremandis Ecclesiis. See Chalmers, Bioi. Dict. s. v.; Allibone, Dict. of Brit. and Amer. Authors, s. v.

Stephens, William, an English clergyman, was a native of Devonshire, and graduated from Exeter College, Cambridge, in 1715. He was the first vicar of Brampton, and afterwards rector of St. Andrew's, in Plymouth. He died, much lamented, in 1736. He published four single Sermons (1717, 1719, 1722, 1724, each 8vo); and for his last work appeared (thirty-five) Sermons (Oxford, 1737, 2 vols. 8vo). See Allibone, Dict. of Brit. and Amer. Authors, s. v.

Stephens, William H., a Methodist Episcopal clergyman, was born in New York Dec. 18, 1804, converted in 1828, under the preaching of Rev. Charles Pitman; travelled Burlington and Bargaintown circuits, under the presiding elder, in 1829-30; was admitted on trial in 1831, and appointed to Cumberland and Cape May Circuit; in 1832, to Salem Circuit; and in 1833 was admitted into full connection, and appointed to Sedesborough Circuit, where he died the same year. He was a man of studious habits, good preaching abilities, ardent piety, and extensive usefulness. See Minutes of Annual Conferences, ii, 292.

Stephen's (St.) Day, a festival observed on Dec. 26 in honor of the protomartyr Stephen.

Stephenson, James White, D.D., a Presbyterian divine, was born in Augusta County, Va., in 1756. He was educated at Mt. Zion College, Wambourough, S. C.; principal, for three years, of a classical school near the old Waxhaw Church, in Lancaster District, S. C.; studied theology privately; was licensed by the Presbytery of South Carolina in 1789; ordained and installed pastor of the Bethel and Indiantown churches, in Williamsburg District, in 1796, March 8, 1808, with about twenty families, he migrated to Maury County, Tenn., jointly purchased a tract of land, and organized what was afterwards known as the "Frierson Settlement"—a Christian colony which long maintained an enviable reputation, particularly for its faithful private and public instruction of the blacks. His death was much regretted. He published two or three sermons. As a preacher he was solid and instructive. In 1815, South Carolina College conferred upon him the degree of D.D. See Sprague, Annals of the Amer. Pulpit, iii, 550; Allibone, Dict. of Brit. and Amer. Authors, s. V. (J. L. S.)

Stercoranists (from stercoro, to void as excrement). The grossly sensual conception of the presence of the Lord's body in the sacrament, according to which that body is eaten, digested, and evacuated like ordinary food, is of ancient standing, though not found in Orig- en, as some writers have assumed (e.g. Tournely. Cursus Theologicus, iii, 345), nor, perhaps, in Rhabanus Maurus, who, like the former, was charged with holding such views because of his connexion with the monasteries. The term stercorarum, c. 17 (e.g. by Gerbert, De Corp. et SANG. Domini, in Poz. Theosaur. Anecdot. Novicia, 1, i, 144). It certainly originated with a class of false teachers contemporary with or earlier than Rhabanus Maurus, whom Paschasius Radbert condemns, De Corp. et SANG. Domini, c. 20, where he remarks, with reference to monastic cryptography, "Frivolum est ergo in hoc mysterio cogitare de stercore, ne commiscetur in digestione alterius cibi." He does not, however, apply the term Stercoranists to his opponents. Cardinal Humbert is the first to so employ the word in his work directed against the monk Nicetas Peculiaris (1648), and the word "stercentism" [see AZYMITES] and the other characteristic doctrines of the Latin Church (see CANIS LETICI. ANT. III, i, 319, ed. Basnage); and from that time the word was frequently employed to designate the supporters of the grossly
realistic theory of the Lord's supper. It occurs now and then in the writings of the opponents of the Lutheran doctrine, particularly the realistic doctrine of Brentius and other Württembergers in the time of the Reformation. On the subject, see Pfaff, De Stercorariis Medii Ævi, etc. (Tübingen, 1750, 4to) and Schrock, Kirchengesch. xviii, 429-499.

Sterculius, Stercutius, or Sterculium, a Roman family invoked by husbandmen. The name is derived from sterca, manure, and is applied by some to Saturn, because he taught the use of manure in agricultural processes. Others give it to Picumnus, the son of Faunus, who is likewise credited with introducing improvements in agriculture (Macrobius, Sat. 1, 7, Serv. A. d. Nat. 7, Pliny, H. N. xvi, 9; August. De Civ. Dei, xviii, 15).

Sterling, John, a minister of the Methodist Episcopal Church, was born in Ireland in 1810, and emigrated to this country in early life. At the age of seventeen he united with the Church, and in 1844 was licensed to preach. He was received into the North Ohio Conference in 1847, and travelled six or seven years, when, because of ill health, he was called to the ministry. He was committed into the Central Ohio Conference, where he labored several years. His death occurred April 2, 1863. See Minutes of Annual Conferences, 1863, p. 168.

Stern (שֶׁרֶן), the hinder part of a ship (as the word is rendered in Mark iv, 38; Acts xxvii, 41), out of which the anchors were anciently fastened (ver. 29). See SHIP.

Stern, Hermann, a Jewish missionary, was born of Jewish parentage in 1794, at Teningen, in Bavaria. He visited the high-school in Bamberg to study as teacher. In his twenty-first year he received his first place as teacher in Hochberg. Endeavoring to conform in his religious instruction to the letter and spirit of the Holy Scriptures, he could not avoid alluding to the defectiveness and emptiness of the synagogue ceremonies as taught in the Talmud and in the Jewish code Shulchan Aruch. Complaint was made to the chief rabbi of the district, and for his own security Stern requested the government that the rabbi be required to superintend the religious instruction of his school. Mr. Bing, the chief rabbi, begged to be excuse to the governement in this instance. The government then demanded of the rabbi either to propose one of the existing compendiums as a text-book for schools, or else write one himself. The rabbi offered to do the latter. In the meantime Stern was sent by the government to the town of Heidenfeld, near Würzburg. Having spent some years at the latter place, he was removed from the government the new text-book of the Mosaic religion, which rabbi Alexander Behr, under the direction of the chief rabbi, had prepared. The one hundred and sixty pages of this book were entirely filled with ceremonial laws, and contained not a word, much less an exposition, of morality, of conscience, of virtue, of holiness, of the condition and destiny of man. Stern called the attention of the government to these deficiencies of the book, and promised to publish a better one. In 1829 he published his Die Confirmation der Israeliten, oder das Judenthum in seiner Grundlage, which was followed in 1835 by his larger work, Der Lebensbogen. Both these books continued to be standards in many schools, even after Stern had embraced Christianity. The preparation of these works led Stern to study the Bible and the Talmud more thoroughly, which brought him to the conviction that the expected Messiah had already come. His sentiments he made known to the Jews, who persecuted him as much as possible, as they could not agree with him. But Stern often said, "They ought to know it, and it is my duty that I tell them the truth quite decidedly; the Lord demands it from me." Sooner than he expected, the hour had come. In the year 1836 many theologians were as
Stern, Mendel Emanuel, a Jewish writer, was born at Presburg, in Hungary, in 1811, where the celebrated Talmudist rabbi Moses Sopher exercised an en-
during influence upon the pious disposition of the youth. At the age of twelve he was obliged to assist his father, then stricken with all the misfortunes of increasing blindness, in the duties of tuition at the Royal Jewish Normal School of his native place; and when fourteen years old he replaced his blind father in the arduous post of teacher. In 1838 he was employed as reader in the fa-
nous Oriental printing establishment of A. von Schmidt. He then tried his fortune as teacher in some country places, and in 1838 settled at Vienna, where henceforth he occupied himself exclusively with literary pursuits, and where he died, March 9, 1873. Of his numer-
ous works we mention the following: —

A Hebrew grammar (Vienna and Presburg, 1829, and often since): —
A metrical German translation of the book of Proverbs (Presburg, 1832): —
A German transla-
tion of the same book, with a Hebrew commentary (ibid. 1833): —
The Ethics of the Fathers, נאום (Vienna, 1840), in German metrical and rhymed lines: —
Liturgical Hymns on the Divine Unity, נאום מיר (ibid. 1840), also in German metrical and rhymed lines: —
The Prophet Ezekiel, with a German translation and a Hebrew commentary (ibid. 1842): —
The Ethical Medita-
tions of Bedaroch, נאום בֶּדֶרוֹך, with a German translation (ibid. 1847): —
The Star of Isaac, full of interesting matter, of which twenty-six parts were published (ibid. 1845–61): —
The Duties of the Heart of Bechai, with a German translation (ibid. 1856, 2d ed.): —
A Talmudical lexicon (ibid. 1863). See Fürst, Bibliotheca Judaica, i, 399–409; Steinschneider, Bibliographisches Handbuch, p. 137. (B. P.)

Stern, Siegmund, doctor of philosophy and preacher of the Jewish Reformed Synagogue at Berlin, and lately director of the philantropin at Frankfurt-on-the-Main (where he died, May 9, 1867), was the author of Ein Judenthum und der Jude im christlichen Staate (Berlin, 1845) —
Die Aufgabe des Judenthums und der Juden in der Gegenwart (ibid. 1845): —
Die Reli-
gion des Judenthums (ibid. 1846; 2d ed. 1848): —
Die gesetzmaßige Behandlung im Judenthum (ibid. 1845) —

April 22, 1892, at Mosbach, and died March 31, 1873, at Carlshaus, having for forty years been teacher and di-
rector of the evangelical seminary there. He wrote, Erfahrungen, Grundzüge und Grundsätze für bibel-
christlichen Religionsunterricht (Carlshaus, 1833): —
Geschichtlicher Sprachbuche der Wiederkehr der bib-
liischen Geschichten für christl. Schulen (ibid. 1844) —
Lehrbüchlein der christl. Glaubens nach der heil-
igen Schrift, (ibid. 1847): —
Büchlein des Evangelisten Johannes (Barmen, 1870; new ed. 1872): —

Sterne, John (1), a physician and ecclesiastical writer, was born at Ardbraccan, County of Meath, Ireland, in 1622. He was educated in the Col-
lege of Dublin, became a fellow, was elected because of his loyalty, but reinstated at the Restoration. He died in 1669. His writings are, Aphorisms of Felicitate (Dublin, 1654, 8vo; twice reprinted): —
De Morti Dis-
antia (ibid. 1656, 1655, 8vo): —
Annae Mediae, seu de Beatitudinum et Mortis (ibid. 1659, 8vo): —
Adulterii, Her-
bordii Disputationum de Concurrunt Erremus (ibid. 1656, 4to): —
De Electione et Reprobatione (ibid. 1662, 4to): —
to this is added Manudsactio ad Vitam Probo: —
De obiti-
natione, opus posthumum, pietat Christiano, Stoic, scholasticum more authent. published in 1672 by Mr. Dod-
well.

Sterne, John (2), an Irish prelate, son of the pre-
ceding, was educated in Trinity College, Dublin, and became successively vicar of Trim, chancellor and dean of St. Patrick's, bishop of Dromore in 1718, of Clogher in 1717, and vice-chancellor of the University of Dublin. He laid out immense sums on his episcopal palaces and on the College of Dublin, where he built the printing-
house and the great exhibition building. At the age of 74 (1745) he bequeathed £30,000 to public institutions. His only publications were, Tractatus de Viajum Infor-
morum (Dublin, 1697, 12mo): —
and Concio ad Clerum. See Chalmers, Biog. Dict. s. v.

Sterne, Laurence, an Anglican clergyman, was born at Clonmel, in the South of Ireland, Nov. 24, 1713. After moving from place to place with his family, he was educated at Cambridge, and became a priest. It is supposed that he remained till 1731. In the following year he was admitted to Jesus College, Cambridge, where he took the degree of A.B. in January, 1736, and that of A.M. in 1740. During this time he was ordained, and through his uncle, James Sterne, prebendary of Durham, obtained the living of Beaudesert. Afterwards he married, and through his wife he secured the living of Stillington. He resided for twenty years principally at Sutton. In 1726 he went to France, and in 1744 to Italy. Returning to England, he died at his lodgings in London March 18, 1768. He wrote, Sermons (London, 1740, 2 vols. of which there are many subsequent editions): —
The Life and Opinions of Tristram Shandy, Gentleman (York, 1759, 2 vols. 12mo): —
A Sentimental Journey through France and Italy (London, 1768, 2 vols. 12mo): —
Letters (ibid. 1775, 3 vols. 12mo). For information as to editions of these several works, many of which are strongly tinged with immoral sentiments, see Allibone, Dict. of Brit. and Amer. Authors, s. v.

Sterne, Richard, an English prelate, was born at Mansfield, Nottinghamshire, in 1596. He was ad-
mitted to Trinity College, Cambridge, in 1611, taking his degree of A.B. in 1614, and that of A.M. in 1618. In 1620 he removed to Benet College, and was elected fellow July 10, 1621. He proceeded B.D. the following year, and was incorporated in the same degree at Ox-
ford, 1627. Appointed one of the university preachers in 1626, he was selected as one of Dr. Love's opponents in the philosophical act, kept for the entertainment of the Spanish and Austrian ambassadors. In 1632 he was
STERNDOLL

came president of the college, and in March, 1833, master of Jesus College. He took the degree of D.D. in 1835. He was presented by his college to the rectory of Hareton, Cambridgeshire, in 1841, but did not possess the living till the summer of 1842. He had, however, been presented in 1834 to the living of Yevilton, Somerset County, through the favor of Laud, who caused him to attend him on the scaffold. He was seized by Cromwell, and ejected from all his preferments; but after some years was released, and permitted to retire to Steventon, Hertfordshire, where he supported himself till the Restoration by keeping a private school. Soon after he was appointed bishop of Carlisle, and was concerned in the Savoy Conference and in the revival of the Book of Common Prayer. On the decease of Dr. Frewen, he was made archbishop of York, which position he held till the time of his death, Jan. 18, 1688. Besides some Latin verses, he published, Comment on Ps. citii (Lond. 1649, 8vo);--Summa Logicae (1666, 8vo), published after his death; and was one of the assistants in the publication of the Polyglot. See Chalmers, Biog. Dict. s. v.; Hoefer, Nouv. Biog. Générales, s. v.; Hoefer, Eccl. Biog. s. v.

STERNDOLL, Thomas, an English poet and psalmist, was born (according to Wood) in Hampshire, or as others say at Southampton (Hist. of Gloucestershire) affirms that he was born at Awre, twelve miles from Gloucester. He studied at Oxford, but not long enough to take any degree. The office of grooms of the robes to Henry VIII was secured to him, and he was continued in the same office by Edward VI. He died 1549. He versified the Psalms, which were first printed by Edward Whitchurch, 1549, with the title All such Psalms as Thomas Sterndoll, late Groom of the Kings Majestyes Robes, did in his Life-tyme Drawne into English Metre. He was succeeded in the translation by John Hopkins (fifty-eight psalms), William Whittingham (five psalms), Thomas Norris (twenty-seven psalms), Edward Wisdome (sixty-five psalms), and others. The complete version was entitled The Whole Book of Psalms, Collected into English Metre by T. Sterndoll, J. Hopkins, and others, etc. (printed in 1662, by John Day). Certain Chapters of the Psalms, etc., is ascribed to him, but the authenticity is doubted. For further particulars as to editions, etc., see Chalmers, Biog. Dict. s. v.; Allibone, Dict. of Brit. and Amer. Authors, s. v. See Psalmody.

STERDROP, in Grecian mythology, was—1. A Pleiad, the wife or mother of (Eunomaus (Apollod. iii, 10, 1) and daughter of Atlas (Paus. v, 10, 5). 2. Daughter of Pleuron and Xantippe, and sister of Agenor and Leipontes (Apollod. i, 7, 7). 3. Daughter of Cepheus of Tegea. Her father declined to join Hercules in the war against the Hippocoonides, because he feared an invasion of the Argives during his absence. Hercules thereupon gave to Sterope a brazen lock of Medusa's hair, which he himself obtained from Minerva. This displayed in the face of an advancing foe, would transform every warrior into stone. Centaurs and Giants was thus induced to join in the war in which he and his twenty sons lost their lives (Apollod. ii, 7, 3).

4. A daughter of Acastus, whose career is interwoven with the history of Peleus (Apollod. iii, 13, 3). 5. A daughter of Porthaimn, and mother of the Sirens (Apollod. i, 7, 10).

STERRY, John, a Baptist minister, was born in Providence, R. I., in 1760, and studied in Brown University, but did not take the full collegiate course. About 1790 he removed to Norwich, Conn., where he established himself as printer, author, and publisher. Mr. Sterry was converted soon after his removal to Norwich, and joined the Baptist Church there; and on Dec. 25, 1805, was received into the church, of which he served was very poor, in no year paying him a salary exceeding $100, so that he continued his mechanical

and literary pursuits. He died in Norwich Nov. 5, 1823. He published, with his brother Consider, The American Youth (1790, 8vo);—Arithmetic for the Use of Schools (1795) ; in conjunction with the Rev. Wm. Northrop, Divine Songs; and participated in the compilation of Epaphras Porter he edited and published The True Republic, a newspaper (June, 1804). See Sprague, Annals of the Amer. Pulpit, vi, 407.

STEUENO (in Latin Steucois and Eugbunialis), Agostino, a learned Italian, was born in 1496 at Gubbio (in Umbria), and admitted in 1513 into the congregation of the Canons of St. Saviour, where he left off his surname Guido. For a long time he gained a scanty livelihood by the sale of the Oriental manuscripts and antiquities; but in 1525 he was sent to Venice and put in charge of a rich library formed in the convent of St. Anthony of Castello. He afterwards became prior of his order at Gubbio, and in 1538 was made bishop of Chiasso, in Candidia; but soon returned to Rome, where in 1542 he was ordained Alessandro as prefect of the Vatican library. He there wrote many works on sacred antiquities and exegesis (for which see Hoefer, Nouv. Biog. Générales, s. v.), and finally died at Venice in 1549.

STEUDL, Johann Christian Friedrich, doctor and professor of theology at Tubingen, was born Oct. 25, 1779, at Esslingen, in Wurttemberg. He was received into the gymnasium at Stuttgart when in his sixteenth year, and thence began the study of Hebrew and laid the foundation for the Old-Test. studies of his later days. In 1797 he was admitted to the theological institution at Tubingen, where Storr's ten- dency was then represented by Flatt, Stusskind, and others. He afterwards served two years as vicar at Obereslingen, and then returned to Tubingen as tutor. Schur- ner's lectures on the Arabic language now stimulated Steudel to prepare himself to teach Oriental languages, and he availed himself, in 1800, of the aid of the government and of his own resources to undertake the study of Arabic and Persian at Paris under the direction of De Sacy, Langle, Chezy, etc. On his return in 1810 he was, however, at the summer following made deacon at Canstatt and Tubingen; but an academical career was opened for him by the opportunity of giving private tuition to backward students. In 1815 he became a member of the theological faculty, though he retained his position in the ministry. In 1823 he added the charge of the exorcist service in the town churches to his professorship in the seminary, and in 1826 he became senior of the faculty and first inspector. His lectures at first were confined to the books of the Bible, particularly of the Old Test.; after a time he included the Oriental languages in his course; and from 1826 he delivered regular lectures on dogmatics and apologetics. He was likewise a diligent and fruitful writer, though not in the field of Old-Test. literature where he was most at home. He preferred to write on systematic theology. A few academic essays, of which that of 1830, entitled Vete- rinare Testam. Libris Innot. Novi Testamenti ab Occulto Dis- tinctum, were the most important, and were printed in reviews and articles in Bengel's Archiv, and in the Tubi- niger Zeitschr. für Theologie (founded by him in 1828), constitute all that he published in his own special line of work. His lectures on Old-Test. theology were published after his death by Oehler, in 1840 (Berlin). His interest in systematic theology probably grew out of the importance attached to questions relating to theo- logical principles. In 1814 he wrote Ueber die Halb- barkeit d. Glaubens an geschichtliche, höhere Offenbarung Gottes. It was a matter of conscience with him not to ignore any important theological scheme, but rather to test it by the rule of unalterable truth; and he consequently fought his way from the beginning to the end of his career as a theologian. He broke a lance with nearly every prominent theologian of his time in the
nevertheless essentially a man of peace. He was un-
able to advance as rapidly as more recent thinkers,
because he believed that the new theology was not doing
justice to many features of the older supranaturalism;
but he fought every new departure fairly and in its
principles, so that he secured the respect of the better
class among his opponents, e. g. Schleiermacher, in
response to whom he wrote one of his best treatises
(Ueber das bei alleiniger Anerkennung des histor. Chr.
ft. sich für d. Bildung d. Glaubens ergebende Verfahrungen [Tüb. Zeit. 1820]). He had also gained the
approval of the latest prominent representative of the older Tü-
bingen school of which Storr was the head; but it is
evident from his writings that he occupied an in-
dependent relation to that school from the beginning,
and that he by no means ignored the progress of theologi-
cal science. He retained the one-sided idea of that
school concerning religion and revelation which defines
religion as an aggregation of "opinions," etc., but he
departed from the Storr method of demonstration, inas-
much as he taught that what the Bible reveals is sim-
ply a confirmation, completion, and rectification of man's
natural consciousness of the truth (comp. for Storr's view,
Storr's Dogmatik, § 15, note f.). Steudel was certainly
influenced to depart from the older supranaturalist view
by both F. H. Jacobi and Schleiermacher. (On the whole
subject, see his Glaubenlehre [1831]). In excesses
Steudel displayed the deficiencies of the Storr school;
but it is certain that his hermeneutical theory was bet-
ter fitted for his practical practice. His works contain
many sound arguments in support of the historicogram-
matical method of interpretation as against Kanne, Ols-
hausen, and Hegelstengel (see Behandlung d. Sprache
der heil. Schrift als eine Sprache d. Geistes [1822, etc.]).
He clearly recognized a historical progression in reve-
lation, and consequently different stages, and must be
accorded the praise of having furnished a sound contribu-
tions towards the development of Biblical theology.
(On this subject, comp. especially his articles entitled
Blicke in d. alttestamentl. Offenbarung, in the Tüb. Zeit-
schr., 1833, Nos. 1 and 2). Steudel also wrote on matters
pertaining to the practical interests of the Church, e. g.
ecclesiastical union, on which he published, in 1811, Ueber
Religionsvereinigung, in opposition to a proposed amal-
gamation of the Protestant and Roman churches; in
1816, Beitrag zur Kenntniss d. Geistes gewisser Vermittler
der Friedens; in 1822 he wrote against a proposed uni-
form union of the Reformed and Lutheran churches of
Wittenberg (Ueber d. Vereinigung beider evangel. Kirchen;
comp. also Ueber Rücksicht z. Lutheranen, in the Tüb.
Zeitschr., 1831, iii, 125 sq.). He had no confidence in
the value of experiments within the field of the Church,
and hence opposed their application (comp. Ueber Heil-
mittel für d. evangel. Kirche, in the Tüb. Zeitschr., 1833,
No. 1). His other writings were designed to promote in-
terest for the educational institutions of his country, etc.,
and need not be mentioned here. So forceful a charac-
ter as Steudel was not always favorably regarded by
his superiors, and he was frequently made aware of
the fact. But his principal troubles grew out of the hostili-
ty of the new tendency, which was becoming all-power-
ful at Tubingen during his later days. The new
school "could not pardon his inability to keep wholly
separate the scientific and the edifying" (Baur, in Klüpf-
elfs Gesch. d. Tüb. Universität, p. 417); and when he ventur-
ed, a few weeks after the appearance of the first vol-
ume of Straus's Leben Jesu, to issue a brief rejoinder,
in which he opposed to the tendency with which
Straus had pronounced sentence of death upon supra-
naturalism an equally confident testimony, "drawn from
the consciousness of a believer," to the vitality of su-
pranaturalism, he was smitten with the full force of the
anger of the enraged critic in the well-known tractate
Herr Dr. Steudel, oder d. Selbsttäuschungen d. versäumt
heiligenwerden. Unser Trierer, a master of depreciatory polesmics. Steudel responded quietly in
fort closed his public career. He was obliged by
physical ailments to submit to repeated and painful
surgical operations, and died Oct. 24, 1857. With
regard to his life and character, see the memorial
discourse by Dörner and the biographical sketch by
Dettinger, both published in the Tüb. Zeitschr., for
1838, No. 1. The latter article contains also a list of
Steudel's writings.

**Stevens, Benjamin, D.D.**, a Congregational
minister, was born at Andover in 1729, graduated at
Harvard College in 1740, and was ordained May 1, 1751.
He was pastor in Kittery, Me., where he labored until
his death the 18th of Jan. 1788. He published a few ser-
mons. See Sprague, Annals of the Amer. Pulpit, i.
484.

**Stevens, Dillon**, a minister of the Methodist
Episcopal Church, was born at Hancock, Mass., April 6,
1794. He was converted in his twenty-fifth year, and
in 1822 united with the New York Conference. When
the Troy Conference was set apart he became one of its
members, and continued to labor until 1846, when he
became supernumerary. He settled in Gloversville, N.
Y., where he continued to reside until his death.
Jan. 10, 1861. He was a man of sound judgment and
intellecual strength, well suited to educate the Church
both in the doctrines of the Gospel and in the practical
duties of Christian life. See Minutes of Annual Con-
ferences.

**Stevens, Isaac Collins**, a minister of the Meth-
odist Episcopal Church, was born in Fulton County,
Pa., Feb. 15, 1833, and was educated at Caseville Sem-
inary. He was converted in his eighteenth year; was
licensed to preach Aug. 6, 1855, and in 1857 was receiv-
ead on trial in the Baltimore Conference. He remained
with this connection until its dissolution, when he became
a member of the Eastern Annual Conference, and re-
mained until the formation of the Central Pennsylva-
nia Conference. He died Nov. 29, 1869. See Minutes of
Annual Conferences, 1870, p. 54.

**Stevens, Jacob**, a minister of the Methodist
Episcopal Church, was born at Epping, N. H., in 1849,
and was converted in early life. He joined the New
Hampshire Conference in 1866, and labored about
until (in 1848) he took a supernumerary relation. This
relation was changed in 1868 to effective, and he was
stationed at Fremont, retaining his home in Epping,
where he died in 1869. See Minutes of Annual Con-
ferences, 1869, p. 104.

**Stevens, Jedediah Dwight**, a Congregational
minister, was born at Hamilton, N. Y., March 23, 1799.
His early life was spent on the farm. After receiving a
preparatory education, he commenced the study of
theology with the Rev. Samuel J. Mills. He was mis-
sionary of the American Board of Commissioners for
Foreign Missions to the Stockbridge Indians from 1829
to 1833, and also to the Dakota Indians from 1833 to
1839. He was ordained an evangelist at Corriandville,
N. Y., Oct. 5, 1831, and in 1841 to the mission of a
pastor of the Church at Prairie du Chien, Wis. In
June, 1844, he was installed pastor of the Platteville
Church, Wis. He resigned this charge, and in 1846
was an evangelist in Grant County, and in Lafayette
County from 1847 to 1850; Greene County from 1850
to 1854; was acting pastor at Elk horn one year; Lafay-
ette from 1855 to 1859; Waterford from 1859 to 1862;
Callowell's Prairie from 1862 to 1864; Owen, Ill., from
1864 to 1866; Wauaus, Wis., in 1867. His last field of
labor. He died at Beloit, March 29, 1877. (W. P. N.)

**Stevens, Joseph B.**, a Presbyterian minister.
was born at Brookfield, Conn., Aug. 3, 1801. He
was educated at Bowdoin College, studied theology in
Bis-
gar, Me., was licensed by the Congregational Asso-
lilation of Maine and at the age of twenty years in
the state at large, when he was ordained over
the Second Congregational Church, Falmouth, Me., in 1826. In 1824 he removed to the South, to improve his health, and subsequently taught and preached at Brunswick, Ga., for two years and a half; at Darien two years; pastor of the Smyrna and Bethany churches, Newton County; supplied a church near Griffin one year, and Pachitta Church five years. He died May 9, 1860. Mr. Stevens was a good scholar and an earnest, practical preacher. See Wilson, Prep. Hist. Almanac, 1861, p. 177.

Stevens, Solomon, a Presbyterian minister, was born at Cavendish, Vt., Sept. 5, 1755. He graduated at Middlebury College, Vt., in 1811; studied theology at Auburn, N. Y.; was licensed and ordained by the Cayuga Presbytery about the year 1824. He labored for fifteen years in different places in Tompkins and Genesee counties, N.Y., where his labors were blessed with several revivals of religion. In 1840 he went to Ohio, spent some time in Cayahoga and Huron counties, and was installed at Newton Falls, Trumbull Co., in 1843; in 1850 he removed to Michigan, labored in several places in that state, and was installed pastor of the Church in Somerset, Hillsdale Co.; in 1859 he returned to Ohio, and preached for his former charge at Newton Falls until his death, June 7, 1861. See Wilson, Prep. Hist. Almanac, 1862, p. 197.

Stevens, Thomas, a Congregational minister, was born at Plainfield, Conn., in 1723. He was ordained over the Plainfield (Separate) Church in 1746. In 1755 he went as chaplain to the army, contracted a disease, and returned to die at his father's house, Nov. 15, 1755. He is reported to have been a clear and powerful preacher. Little is recorded of his life. See Cong. Quarterly, 1860, p. 376.

Stevens, William (1), a lay theologian, was born in the parish of St. Saviour, Southwark, England, March 2, 1732. He was engaged in the house of his father, but devoted much of his time to study, obtaining an intimate knowledge of the French language, and also a considerable acquaintance with the Latin, Greek, and Hebrew. He was well versed in the writings of the Church fathers, and quite familiar with all the orthodox writers of modern times. Such was the esteem in which he was held as a theologian that Dr. Douglass, bishop of Salisbury, said of him, "Here is a man who, though not a bishop, yet would have been thought worthy of that character in the first and purest ages of the Christian Church." He died in London, Feb. 6, 1807. He wrote, An Essay on the Nature and Constitution of the Christian Church; wherein are set forth the Form of its Government, the Extent of its Powers, and the Limits of our Obedience (anonymous, 1773); —Curious Observations on an Address to the Clergy, etc., by Mr. Wollaston:—Discourse on the English Constitution (1776); —Strictures on a Sermon entitled The Principles of the Revolution Indicated, by R. Watson (1776)—The Revolution Vindicated, etc., an answer to the Rev. R. Watson's accession sermon (1776)—A New and Faithful Translation of Letters from M. L'Abbé de —: A Review of the Revue of a New Preface to the Second Edition of Mr. Johnson's Life of Disraeli; and the Works of Mr. Jones, with his life (12 vols. 8vo.). The Memoirs of William Stevens, Esq., were printed for private distribution in 1812 (8vo.), and in 1815 for sale.

Stevens, William (2), a minister of the Methodist Episcopal Church, was born in Plymouth County, Mass., March 24, 1778. He was converted in his twentysixth year, and in 1804 he was received on trial and associated to Lamoine Beach Circuit in New Hampshire. In 1806 he was received into full connection in the New England Conference. He located in 1813, but in 1821 he was readmitted by the Ohio Conference. In 1845 he sustained a supernumerary relation, and became superannuated in 1846. He died in Bridgewater, Beaver Co., Pa., March 1, 1858. See Minutes of Annual Conferences, 1856, p. 114.

Stevenson, Edward, D.D., a minister of the Methodist Episcopal Church, South, was born in Mason County, Ky., about 1827. He attended the Kentucky Conference in 1829, and remained in it till its division in 1846, when he connected himself with the Louisville Conference. He was a member of the celebrated General Conference of 1844, and also a member of the convention which met in Louisville in 1845, and organized the Methodist Episcopal Church, South. In 1844 he was elected missionary secretary and assistant book-agent; to which latter office he was re-elected in 1850. In 1854 he was elected chief book-agent, and in 1858 accepted the presidency of the Russellville Female Collegiate Institute, which position he filled until the time of his death, July 6, 1864. See Minutes of Annual Conferences of the M. E. Ch., South, 1864, p. 482.

Stevenson, Joseph, a Presbyterian minister, was born near Harper's Ferry, Md., March 25, 1778. He graduated at Jefferson College, Canonsburg, Pa.; studied theology privately; was licensed by Washington Presbytery Oct. 15, 1808; ordained by the same presbytery in June, 1809; and installed pastor of the Two Ridges and Forks of Wheeling churches in West Virginia. He continued in that charge for fourteen years, during which time his earnest missionary spirit led him to make several excursions into the destitute West. In 1825 he asked for a dissolution of the pastoral relation, so that he might give his whole time to his new and more destitute field of labor. He fixed his home in Bellefontaine, Logan Co., O. In this and the adjoining counties he continued to labor for forty years, traversing for many years a missionary circuit of many miles, with thirteen preaching stations, at several of which he subsequently formed churches. He continued pastor of the Church in Bellefontaine until increasing infirmities led him to retire from active duties, seven years before his death, which occurred at his home, Feb. 24, 1865. Mr. Stevenson was a holy man. "Zeal characterized him, proved by much missionary work for the destitute of our own race and for the Indians, and by his active labor for Christ to the age of eighty-six." See Wilson, Prep. Hist. Almanac, 1866, p. 171. (J. L. S.)

Stevenson, Thomas, a Presbyterian minister, was born in Ireland in 1818. He was converted in his eighteenth year, studied in the high school of Rev. C. Allen, Strabane, Ireland, in 1837-39; then emigrated to America; graduated at Franklin College in September, 1842, and at the Western Theological Seminary, Allegheny, Pa., in 1845; was licensed by the Ohio Presbytery June 11, 1845; and was ordained as pastor of the Church in Montour, Pa., June 17, 1846. There he labored with great success until January, 1854, when he became pastor of the Second Presbyterian Church, Spruce Creek Valley, Pa., where he continued to preach the pure Gospel until he became chaplain of the 5th Regiment of Pennsylvania Volunteers. He continued in military life in the country's cause, enduring many hardships and privations, till his death, Feb. 10, 1867. See Wilson, Prep. Hist. Almanac, 1868, p. 146. (J. L. S.)

Stevenson, William, a minister of the Methodist Episcopal Church, South, was born in South Carolina, near a station called Ninety-six (on the then frontier), Oct. 4, 1768. He united with the Church June 1, 1800, and joined the itinerant ministry in 1811, going to South Arkansas in 1813, and soon after to Louisiana. The last recorded act by him was on July 24, 1870, holding at that time a supernumerary relation. At the close of that year he became superannuated, and held that relation until his death, March 5, 1857. See Minutes of Annual Conferences of the M. E. Ch. Church, South, 1856, p. 808.

Steward ("sword"; sat, usually rendered "prince;" ιερωπός, οἰκονόμος), one who manages the affairs or
Damascus did that of Abraham (Gen. xv, 2). Great confidence was reposed in those who held such an office, and hence Paul describes Christian ministers as the stewards of God over his Church and family (Titus i,7). Believers also are described as stewards of God’s gift and grace, to dispense the benefits of them to the world (1 Pet. iv. 10). Our Lord frequently uses the responsibility belonging to the office of a steward for the purpose of illustrating his reasoning. In the parable of the unjust steward, who defrauds his master by col- lapsing his balance (Luke xvi), the illustration is confined to the policy of the conduct pursued, and no inference can be drawn respecting its moral propriety. (On the proverbial dishonesty of modern Oriental wak- kils or agents of this kind, see Thomson, Land and Book, I, 517 sq.) The exhortation which follows is merely advice to manage worldly goods with such liberality and generosity as will promote the cause of true piety, Christian charity, and enlightened benevolence, and not to exercise the rights of property too harshly. See the monographs on this passage cited by Danz, Wörterb. s. v. “Lucas,” Nos. 76-78.

STEWARD, one who manages the domestic concerns of a family, religious house, or episcopal estate. Called also SENeschAL (q. v.).

1. Methodist Episcopal.—The number of stewards on each charge varies from three to nine. They are nomin- ated and in some cases elected by the church in regular order, and the Quarterly Conference has the right of affirmation or rejection. They hold office for one year, subject to reappointment, and by virtue of their office are members of the Quar- terly Conference. They should be “men of solid piety, who both know and love the Methodist doctrine and discipline, and of good natural and acquired abilities to transact the business of their charge.” They are there- fore defined: “To take an exact account of all the money or other provision collected for the support of preachers . . . and apply the same as the Discipline directs; to make an accurate return of every expenditure of money, whether to the preacher, the sick, or the poor; to seek the needy and distressed in order to relieve and comfort them; to inform the preachers of any sick or disorderly persons; to tell the preachers what they think wrong in them; to attend the quarterly meetings, and the leaders’ and stewards’ meetings; to give advice, if asked, in planning the circuit; to attend committees for the application of money to churches; to give counsel in matters of arbitration; to provide elements for the Lord’s supper; to write circular letters to the societies in the circuit to be more liberal, if need be; as also to let them know when occasion requires, the state of the temporal concerns at the last quarterly meeting.” One of them is the district steward, who represents his indi- vidual Church in the district stewards’ meeting; an- other the recording steward, who makes and preserves the records of the Church. The stewards are amenable to the Quarterly Conference, which has power to dismiss or change them. In the division of the labor between stewards and trustees, the former attend to all the cur- rent expenses of the Church for ministerial and benev- olent purposes; the latter to all the financial interests con- nected with the Church property. They have no right to incur any debt which is binding on the property of the Church; and hence it is their duty to complete their collections, and to meet their obligations annually.

2. English Wesleyan.—In this connection the office of steward embraces four departments, viz. circuit, soci- ety, poor, and chapel stewards. They are usually ap- pointed at the December quarterly meeting; the society and poor stewards at the first leaders’ meeting in Janu- ary. Their term of office ceases at the end of the year; but they are eligible for re-election for three years suc- cessively.

(1.) The duties of the circuit stewards are: 1. To ex- society stewards, and receive money raised for support of the ministry. 2. To pay each circuit preacher the allowance due him. 3. To meet all demands for house- rent, taxes, etc., and provide suitable furnished homes for the preachers. 4. To keep the accounts of the cir- cuit; to transmit each quarter to the district treasurer of the Children’s Fund whatever moneys may be due from the circuit to that fund, or to receive from him what the circuit is entitled to. 5. To attend, during the transaction of monetary business, the sittings of both the annual and district meetings. 6. To act as the official channel through which the communica- tions from the circuit are transmitted to the Confer- ence. 7. To audit, in conjunction with the superin- tendent minister, the accounts of all trust-estates in the circuit that are settled on the provisions of the Model Deed. 8. To take the initiative in the invitation of ministers for the ensuing year.

(2.) Duties of the Society Steward.—1. With the min- isters and leaders, to promote the spiritual and tempo- ral interests of the societies. 2. To attend the leaders’ and quarterly meetings, and receive and pay over mon- eys for support of ministers. 3. To provide for the taking of collections. 4. To attend to the supply of the pulpit, and prepare or sign notices intended for an- nouncement from the pulpit; to prepare for the sacra- ment of baptism, and, in case there is no poor-steward, the Lord’s supper and love-feasts. 5. To provide, when necessary, a suitable home for the preacher who offici- ates.

(3.) Duties of the Poor-Stewards.—1. To attend the leaders’ meetings, and pay out, as sanctioned by them, the poor-moneys. 2. To furnish the minister with the names of sick and poor persons. 3. To provide for the Lord’s supper and for love-feasts. 4. To keep an accurate account of all receipts and disbursements in reference to the poor. They are thus defined: “To take an exact account of all the money or other provision collected for the support of preachers . . . and apply the same as the Discipline directs; to make an accurate return of every expenditure of money, whether to the preacher, the sick, or the poor; to seek the needy and distressed in order to relieve and comfort them; to inform the preachers of any sick or disorderly persons; to tell the preachers what they think wrong in them; to attend the quarterly meetings, and the leaders’ and stewards’ meetings; to give advice, if asked, in planning the circuit; to attend committees for the application of money to churches; to give counsel in matters of arbitration; to provide elements for the Lord’s supper; to write circular letters to the societies in the circuit to be more liberal, if need be; as also to let them know when occasion requires, the state of the temporal concerns at the last quarterly meeting.” One of them is the district steward, who represents his indi- vidual Church in the district stewards’ meeting; an- other the recording steward, who makes and preserves the records of the Church. The stewards are amenable to the Quarterly Conference, which has power to dismiss or change them. In the division of the labor between stewards and trustees, the former attend to all the cur- rent expenses of the Church for ministerial and benev- olent purposes; the latter to all the financial interests con- nected with the Church property. They have no right to incur any debt which is binding on the property of the Church; and hence it is their duty to complete their collections, and to meet their obligations annually.

(4.) Chapel Stewards are appointed by the trustees, in conjunction with the superintendent of the circuit, and on them devolves the general oversight of the chapel and furniture, its cleaning, warming, lighting, etc.; to direct the movements of the sexton and pay his salary, and attend meetings of the trustees. See Discipline of the M. E. Church; Simpson, Cyclop. of Methodism, s. v.

Stewart, Alexander, a minister of the Method- ist Episcopal Church, South, was born in Norfolk Coun- ty, Va., in April, 1810. At the age of sixteen he joined the Church, and was licensed to preach in 1836. He was admitted into the Virginia Conference in 1843; was ordained deacon in January, 1844; and was ordained elder in September, 1849. He moved from Virginia to Vermont in 1852, and remained there until 1858, when he became supernumerary, living in Prince George County, Va., till January, 1866, when he became stew- ard of the Wesleyan Female College, Murfreesborough, N. C. In 1867 he was supernumerary, but continued to hold the above position until his death. March 3, 1872. See Minutes of Annual Conference of the M. E. Church, South, 1872, p. 654.

Stewart, Archibald Sinclair, a Presbyterian minister, was born at Palatine, N. Y., May 3, 1823. At the age of fifteen he united with the Church at Johnstown, N. Y. In the fall of 1840 he removed with his parents to Wisconsin, and received his preparation for college at the Wartburg Academy. He entered Princ- ton College, from which he graduated in 1842. After graduation, he taught school at Nyack, on the Hudson, about a year and a half, and then entered Prince- ton Theological Seminary, and graduated therefrom in 1846. On Oct. 11 of the same year he was licensed to preach by the Presbytery of Milwaukee, and in the succeeding October was ordained an evangelist. Receiving a com- mission from the Board of Domestic Missions, he com- menced his labors at Port Washington, where he was successful in gathering and organizing a Church, and
Stewart, Dugald, an eminent philosopher and writer, was born in Edinburgh Nov. 22, 1753, and was the son of the professor of mathematics. He was educated at the high-school and university of his native city, and attended the lectures of Dr. Reid, of Glasgow. From Glasgow he was recalled, in his nineteenth year, to assist his father; on whose decease, in 1785, he succeeded to the professorship. He, however, exchanged it for the chair of moral philosophy, which he had filled in 1778, during the absence of Dr. Ferguson in America. In 1780 he began to receive pupils into his house, and many young noblemen and gentlemen who afterwards became celebrated imbued their knowledge under his roof. It was not till 1792 that he came forward as an author. He then published the first volume of the Philosophy of the Human Mind. He died June 11, 1828, after having long enjoyed the reputation of being one of the most amiable of men, and one of the ablest of modern philosophical writers. As a writer of the English language; as a public speaker; as an original, a profound, and a cautious thinker; as an exponent of truth; as an instructor of youth; as an elegant scholar; as an accomplished gentleman; in the exemplary discharge of the social duties; in uncompromising consistency and rectitude of principle; in unbending independence; in the warmth and tenderness of his domestic affections; in sincere and unostentatious piety; in the purity and innocence of his life—few have excelled him; and, take him for all in all, it will be difficult to find a man who, so to many of the perfections, has added so few of the imperfections, of human nature. Stewart's publishing followed: A Plea for the Human Mind (Edinb., 1793, 8vo);—Life and Writings of Wm. Robertson, D.D., (1801, 8vo);—Life and Writings of Thomas Reid, D.D. (Edinb., 1803, 8vo);—Philosophical Essays (1810, 4to);—Philosophy of the Active and Moral Powers of Man (Edinb., 1828. 2 vols. 8vo.). Most of his works have been translated into other languages, and passed through several editions. For a fuller account of them, see Alibone, Dict. of Brit. and Amer. Authors, s. v.

Stewart, Ephraim C., a minister of the Methodist Episcopal Church, was born in Tuscarora Valley, Juniata Co., Pa., Jan. 17, 1833. He studied law and was admitted to practice, but in 1850 he commenced teaching in Shreddel's Orphan School, Camp Hill, Pa. In 1871 he united with the Church, and was soon after licensed to preach. He was admitted into the Central Pennsylvania Conference in 1872, but after a few months was attacked by consumption, and died at his parents' home, March 8, 1873. See Minutes of Annual Conferences, 1874, p. 84.

Stewart, Franklin, a minister of the Methodist Episcopal Church, South, was born in Wayne County, Ga., Oct. 19, 1824. His conversion took place June 19, 1844, and he was licensed to preach Oct. 25, 1845. In 1846 he was received on trial into the Florida Conference, and in 1853 was appointed presiding elder in St. Mary's District. He died July 8, 1855. See Minutes of Annual Conferences of the M. E. Church, South, 1856, p. 897.

Stewart, George, an Associate Reformed minister, was born at Greenwich, Va., in 1792, and graduated from Dickinson College in 1805. In November of that year he became a member of the first class that entered the Associate Reformed Theological Seminary in New York, under the care of Dr. John M. Mason. In June, 1809, he was licensed to preach by the Presbytery of New York and Westchester, and was ordained pastor of the Reformed Church in Bloomingburg, Sullivan Co., in that state. He retained this relation till the close of his life, Sept. 20, 1818. For several years he was the principal teacher of an academy in Bloomingburg. Mr. Stewart had an excellent reputation as a preacher, his discourses being marked by a deeply evangelical tone, thoroughly logical in their construction, simple and chaste in style, and every way fitted to render intelligible and impressive the mind of the Spirit. See Sprague, Annales of the Amer. Pulpit, ix, 135.

Stewart, Henry Greene, a Baptist minister, was born at Clarendon, Vt., April 12, 1812, and was a graduate of Brown University in the class of 1839. He spent two years in theological study at the Newton Institution, and was ordained pastor of the Baptist Church at Cumberland Hill, R. I., where he remained nine years (1841-50). After having been pastor of the Baptist Church in Seekonk, Mass., two years, he entered the service of the American and Foreign Bible Society, and was one of its agents for eight years (1852-60). He was pastor of the Wayland Church, and, then, for two years, was an agent of the Freedmen's Bureau; for three years, the missionary of the Rhode Island State Convention; and for one year Indian agent in the employ of the United States government. He died in Nevada, July 27, 1871. (J. C. S.)

Stewart, Isaac Ingersoll, a minister of the Methodist Episcopal Church, was born near Absecon, N. J., Aug. 4, 1806. When twelve years of age he removed to the state of New York, and entered the New York City Church. He was licensed to preach in 1836, and in the same year entered the Illinois Conference. In 1857 he took a supernumerary relation; in 1858 he became effective; in 1862 supernumerary. In 1863 he was appointed chaplain to the United States Hospital, Keokuk, la., where he died, Aug. 15, 1874. See Minutes of Annual Conferences, 1864, p. 178.

Stewart, John (1), the apostle to the Wyandots, was a mulatto, with a mixture of Indian blood, and was born of free parents in Virginia. While yet a youth he removed to Ohio, where he was converted, and joined the Methodist Church. In 1814 he felt it to be his duty to preach, and to journey towards the North-west with that object in view. Acting upon this impression, he travelled until he came to the Wyandot Reservation at Upper Sandusky. Here he labored with considerable success, and in February, 1817, the revival broke out afresh. Stewart continued to work among them until the Wyandot nation became Christianized. In 1819 the Ohio Conference took charge of the mission, and Stewart returned to the white people until his death, in 1860. See Zion's Herald, Jan. 16, 1861.

Stewart, John (2), a minister of the Methodist Episcopal Church, was born in Sussex County, N. J., in 1795, went to Ohio in 1808, and joined the Church in 1815. He was received on trial in the Ohio Conference in 1817, and worked effectively within its bounds for forty years. He retired in 1858, and spent the remainder of his life in Illinois among his children. He died March 10, 1870. See Minutes of Annual Conferences, 1876, p. 132.

Stewart, Kenan Spencer, a minister of the Methodist Episcopal Church, South, was born in Craven County, N. C., June 9, 1848, and joined the Church in 1866. He received his license to preach in 1873, and was the same year admitted to the Memphis Conference, but was immediately transferred to the St. Louis Con-
paired, and he died at the residence of his father, Katherfeld Station, Gibson Co., Tenn., Aug. 5, 1875. See Minutes of Annual Conferences of the M. E. Church, South, 1875, p. 292.

Stewart, Thomas C., a Methodist Episcopal minister, was born in New Jersey in 1790, removed on trial in the Philadelphia Conference in 1830, and filled the following appointments: in 1830, Pemberton Circuit; in 1831, Bergen Neck Mission; in 1832-33, Freehold Circuit; in 1834-35, Tuckerton; in 1836, Crosswicks; in 1837-38, New Egypt; in 1839-40, Cumberland; in 1841-42, Salem; in 1845-46, Swedesborough; in 1847-48, Henry County. He lived in New Jersey all his ministerial work he was persevering, bold, and firm, and distinguished for a noble ambition of winning souls. See Minutes of Annual Conferences, iv, 217.

Steeni, a Dardan warrior in the siege of Troy. He was the son of Ithemenes, and was slain by Patroclus (Homer, II, xvi, 586).

Steenili, the name of two persons in Grecian mythology—(1) a daughter of Danaus (Apollo, ii, 5); (2) a daughter of Acacus, who became the wife of Memnonius, and by him the mother of the heroic Patroi (ibid, iii, 12, 8).

Stollenus, a name which occurs repeatedly in Grecian mythology. 1. A son of Capaneus and Eavdes, one of the Epigoni, and a famous hero. He participated in the Trojan war (Apollo, iii, 7, 2; Homer, II, vii, 564). 2. The father of Cometes and lover of Egeialia, the beautiful wife of Diomedes. He overcame the chastity of the otherwise virtuous woman by the aid of Venus herself, and eventually expelled her from his kingdom (Apollo, i, 80; Ovid, Iib, ii, 350; Homer, II, v, 412 sq.). 3. A son of Perseus and Andromeda, who became the father of Eurytheus, the deadly foe of Hecules. He was slain by Hylus, the son of Hercules (Homer, II, xix, 116; Apollo, ii, 4, 5, etc.; Hygin, Fab, 244). 4. A son of Actor and companion of Hercules in his expedition against the Amazons (Apollod, Rhod, ii, 911). 5. A son of Androgeus and grandson of Minos, who with his brother Aelaeus was taken away from Paros by Hercules, in punishment for the hostile surprise in which his followers suffered harm at the hands of the sons of Minos (Apollo, iii, 5, 9, etc.).

Sthenas, a surname of the Grecian Minerva at Tricon.

Sthenus, a surname of Zeus, under which he had an altar in a rock near Hermione, and under which Epeus worshipped a sword with which he intended to recognize his son Theonus (Pausan, ii, 92, 7; 34, 6).

Sthen, one of the Phorciides or Gorgons in Grecian mythology, a sister to Medusa.

Sthenoboea, also called Anteia, a personage in Grecian mythology represented as the wife of the Argive king Praetus, and the daughter of the Lycean king Iobates. She fell in love with Bellerophon, who rejected her advances, upon which she accused him to her husband of having made attempts upon her virtue, and caused him to be sent to Iobates, where he achieved the celebrated victories in which the legend associates him with the winged-horse Pegasi. Hearing of his success, Sthenoboea hanged herself (Apollod, iii, 3, 1 sq.; Pindar, Isthm, vi, 63 sq.; Homer, II, vi, 144 sq., etc.). See Antheon, Class, Dict. s. v. "Sthenoboea" and "Bellerophon;" Vollmer, Worterb. d. Mythol. s. v.

Sticharion (Στιχαριόν), a Greek term denoting a surplice or white garment used in divine service, which corresponds to the Latin alba (or alba simply) of the Western Church. See ALBA.

Stichius, a leader of the Athenians in the war against Troy, who was slain by Hector (Homer, II, xiii, 50; xv, 325).
stuck would contain either three or four lines. The squares were used for general subjects and for stanzas of four lines in poetry; the triatlonal ones being adapted to trials and to a peculiar kind of ancient metre called Tribun, or triplet, and Euglyn-Milegr, or the warrior's verse. Several sticks with writing upon them were united together in a kind of frame or table, in the way of the modern called Petti- men, or Escalator, and was so constructed that each stick might be turned for the facility of reading, the end of each running out alternately on both sides. A continuation, or different application, of the same practice was offered by the Runic egl (a corruption of log)

Early British Stick-book.

almanacs, the use of which has been preserved to a comparatively recent period, being described by Dr. Plot in his History of Staffordshire (1686) as still in common use in that county; some, of large size, being usually hung up at one side of the mantel-tree of the chimney, while others were smaller and carried in the pocket. Other examples of the use of notched or marked sticks for the purpose of records are the Reine Pole, still or lately used in the island of Portland for collecting the yearly rent paid to the sovereign as lord of the manor, and the spezials, or specials, in Italy, which still give name to the office of certain functionsaries in England known as the "tellers" (talliers) of the exchequer. See Rod; Staff; Walk.

Stiefel (or Stifell), Zasias, the head of a mystical sect which engaged much attention at the beginning of the 17th century, has already been partly treated of in this Cyclopædia in the art. Metm, Ezekieli, (q.v.). He was a native of Thuringia, a country of the most fertile of Germany, near Turingin, who was led away, through self-conceit and a fondness for curious speculations, into a fanatical mysticism which, in connection with Mith, his nephew, he endeavored to propagate. His followers soon became numerous among his own kindred and towns-people, and then innumerable, and he joined the imperialists, which put him into difficulties, and demonstrated in the hope of a peaceful settlement of the troubles he occasioned; and he frequently renounced his errors, but as constantly returned to them again. He eventually died in the faith, however, at Erfurt, Aug. 12, 1627. About a century later his memory was revived by Christian Thomasius, in the third part of his History of the Writings, u. Things of the Truth (1704), and by Gottfried Arnold, in his Kirchen- u. Ketzer-Histo- rie (1704), iv. 1-49. The over-tolerant spirit in which these authors had discussed Stiefel's heterodoxy occasioned a critique of Arnold's book by pastor Utte, of Langensaitz (Anmerkung über Arnold's Erzählung [1714].

Stiefel has, however, been almost entirely dropped out of sight by the literature of to-day. The mysticism of Stiefel was carried beyond all proper limits by his fondness for paradox; and his worst errors of statement grew out of his perversions of ordinary language. He called himself Christ, and declared himself to be Christ revealed anew, without intending to positively identify himself with Christ. He also claimed to the possession of divine attributes, for which he was rebuked by no less a personage than Jacob Böhme (see Wullen, Blättern aus J. Böhme's Mystik [Stuttgart and Tub. 1838], p. 31, 89; also Kirchenh. Anzugs aus allen Schriften J. Böhme's [Amst. 1718, 4to], p. 929 sq.); though upon other matters Böhme sympathized with Stiefel and excused his enthusiastic rantings (see Apology, Stiefel). Comp., in addition to works already referred to, the accusation against Stiefel entitled Agamuss-Stettin Stifelsiana, and Herzog, Reut. Ekdyskri, v. s., 5.

Stiefel (also Stiefel, Stifell, and Stifel), Michael, an arithmetician, Millenarian, and coadulator of Lutheran, was born at Mainz on April 14, 1496. He became a monk in the Augustinian convent of that town. In 1520 he went to Wittenberg, and was promoted to the degree of master and made preacher to count Mansfeld. While there he composed a hymn which reveals his intimate sympathy with the Reformational spirit (Wackerermann, Deutsche Kirchenlehrer, 1854, p. 320). On May 16, 1525, Luther recommended him to George of Tollen, in Upper Austria, as a "pious, learned, well-behaved, and industrious person" (De Wette, Briefe, ii, 677). A fine treatment of Psalm x by him excited a persecution against the evangelicals; and Stiefel was obliged to leave Austria in 1530 or 1537 and return to Wittenberg. Whereupon pressed for him the parish of Lochau (October, 1538), and married him to the widow of the late pastor (De Wette, ut sup. p. 394, 405). Soon afterwards (in 1532) Stiefel published a treatise on the numbers in Daniel, entitled Ein Rechen- büchlein vom End Christi, in which he fixed the last day and hour to be in 19, 1538, at 8 o'clock in the morning (see De Wette, iv, 462), with the result that the peasants neglected their labors and lost their harvests, but sued for damages when the prediction was not fulfilled. Stiefel was accordingly compelled to abandon his post; but received assistance in money, etc., from the elector, who also induced Luther to receive the misguided man, with his family, under his own roof for the purpose of imparting to him further instruction. In 1533 Stiefel was again a pastor, probably at Holzdorff, near Wittenberg; and while there he published his Arithmetica Integra, with preface by Melanchthon (Corp. ref. v, 6). In 1545 he issued an arithmetic in German; in 1546, the Rechenbuch von der welschen u. deutschen Praktik. The battle of Mühlbach involved the destruction of his village; and after a sojourn at Frankfort-on-the-Oder he settled in the pastorate at Haberstr, near Königsberg, Prussia, in 1552. In 1558 he published the Cours (algebra) Christoph Rudolph's. He was also engaged on the composition of the numbers in Daniel and the Apocalypse, and became the zealous opponent of Andreas Osiander. Soon afterwards he was pastor at Brück, and in that character attended the convention of Coswig in 1557 (Salig, Gesch. d. A. Corp. [Berlin, 1882]: 242); and in 1558 he was received into the Jewish religion at the Jews' Press, in which position he had temporarily filled ten years earlier. Here he was assailed by the Finnicists, but prevailed against them. He died, after having been made dean of the town Church, April 19, 1567. The scanty information to be obtained respecting this remarkable, and in many respects peculiar, theologian shows him to have been possessed of a lively fancy and of extraordinary ability in mathematics. It was because of these qualifications that he was astray on the chiliasm question. He apprehended the Bible poetically, and believed that his mathematical acquirements afforded the means for an exact computation of its numbers. It is to be observed, moreover, that he was no pessimist. He rejected the Reformation as being simply the beautiful dawning of the day of the Lord, the breaking of a day of salvation, and Luther as the angel of revelation with the everlasting Gospel (Rev. xiv); and he wrote against "Dr. Murn's false and invented hymn respecting the destruction of the Christi faith." His judgments regard Stiefel as one of the greatest arithmeticians of his time. Unlike most scholars of that class, he regarded arithmetick as being not simply the art of reckoning, but also the science of numbers. His ingenious comparisons of arithmetical and geometrical progressions might easily have led to the discovery of the
ders of Christoph Rudolph, and rendered meritorious service in extending the area of the study of algebra in Germany.

**RUDOLF EWALD**, an eminent German commentator, was born at Freiburg, March 17, 1800. He received a very inadequate preparatory training at the gymnasium of Neustettin, in Pomerania. In his sixteenth year he matriculated at Berlin with the intention of studying law. He soon, however, tired of that pursuit, and, after overcoming the reluctance of his father, he entered the University of Edinburgh, to which he had been enrolled among the students of theology in the winter term of 1816. The principal inspiration of his being, nevertheless, was not theology, but poetry and an enthusiasm for liberty. He exulted when permitted for the first time to enjoy the privileges of Berlin, and he spent entire days in roaming through fields and forests, alleging in defence of his conduct that to spend such days behind the study table evinced ingratitude towards the Giver of the breath of spring and the sun of summer. He also entered into correspondence with Jean Paul, and made that romantic author his model. Essays and pamphlets flowed from his pen, all giving evidence of a bold and spirited, but also of an expectant and yearning spirit. His *Krokodileier, Träume und Märchen*, and numerous attempts at poetry, belong to this period. In 1818 he removed to Halle, and at once entered into the *Burschenchaft*, becoming its head on Oct. 27; but the *Burschenchaft* being dissolved in February 1821, Halle, and a deep sense of sadness at home, returned to Berlin. During the interval, he had experienced a thorough conversion, and Christ had come to be the all-absorbing object of his life. His mind had been profoundly agitated by the death of a young girl belonging to the family, whom he fervently loved, and the event turned all the ardor of his passionate nature from aesthetics and nationality into the channel of religion. Having returned to Berlin, Stier came under the influence of an ascetical curieuse, which decided him to break with all his earlier literary career and to commit not only his plans for further labors, but even his copies of the German classics, to the fire. He gave himself wholly to the study of theology, but in a spirit which permitted him to depreciate his professors, e.g. Neander and Lütcke, as not sufficiently devoted, and as exalting themselves above the apostles whom they expounded. A copy of Von Meyer's exposition of the Bible, given him by Thuluck for the purpose of encouraging a persistent study of the Scriptures, caused a decided change in his views, however, and delivered him from his supercilious tendencies. April 2, 1821, Stier entered the Preachers' Seminary at Wittenberg, where Nitzsch, Schleusner and Heubner were in the faculty, and Krummacher, Thuluck, and Rothe among the students. Heubner, especially, contributed greatly towards the clarifying of Stier's theology and to the settling of his faith. He became indefatigable in Bible study, noting in a quarto Bible of several volumes everything that could in any way assist in the exposition, especially a list of selected parallel passages; and when the quarto proved inadequate, he substituted for it a folio which became a perfect treasure-house of Biblical learning. After having completed his studies, he taught a year in the Teachers' Seminary at Karaline, and then followed a call in 1824 to the Mission Institute at Bascle. Excessive application exhausted his strength and compelled him, after four years, to retire. He went to Wittenberg, which had become a second home to him in consequence of his marriage with a sister of Karl Immanuel Nitzsch, and lived in comparative seclusion until called in 1829 to be pastor at Frankleben, near Merseburg, where he spent ten years of fruitful study and official labor. His sermons attracted hearers from beyond the bounds of his own parish, and his pastoral care was regarded by all as that of a father to the prosperity of the entire parish. The impression made he was once declared to be a mystic by one of a company gathered at an inn, and that on the question being asked what kind of persons mystics were, the speaker replied that they were precisely the men whom they preached. From these labors Stier was transferred in 1838 to Wichlinghausen, in the Wupperthal. His physical strength proved unequal to the task of managing so large a parish (3500 souls), and his spirit chafed under the rigid presbyterian control exercised in the Klenian churches. He also desired to devote himself to theological writing, and in his last years had been a constant solace and help, died. He accordingly resigned his post in 1846, and retired once more to Wittenberg, where he spent three years in literary seclusion. Before his return the University of Bonn had conferred on him the honorary degree of doctor of divinity. His next position was the superintendentship of Schkeuditz, where he exercised a beneficial supervision over his diocesan, but was not popular as a preacher. Frequently only fifteen to twenty persons attended the services, even on festival days. His sermons were said to be dry and his personal bearing brusque and unsociable. A similar experience awaited him at Eisleben, where he was transferred to the same office in 1839. His "Bible hours," however, were highly esteemed by a limited circle of earnest Christians in either place. Stier was afflicted all his life with many and severe corporeal ailments, a chronic affection of the throat being the last; but his death was wholly unexpected when he fell from his horse while returning to town.

Stier was an intense and resolute character, and not naturally sympathetic. An unyielding and stern controversialist, his bearing intensified the opposition already excited against him in the ecclesiastical world by his earnest advocacy of the union of the Lutherans and Reformed churches and by his suspected leaning towards Pietism. As a theologian, he suffered from the lack of adequate preparation in early life. He threw himself into the study of the Scriptures while deficient in philosophical and theological, and even philological, training, and accordingly developed a prudish Bibliicism which fails to recognise the necessity for a development of Church doctrine beyond the formal limits of the Word. He was primarily a Biblical theologian, and his principal works are exegetical. His theory of the inspiration of the Scriptures is peculiar. He believed the Bible to convey the thoughts of the Holy Spirit, not those of the different writers; but the inspiration does not extend to that, but rather to those who lived as Jesus spoke. Not indeed in the letter of the *verba simplex*, but as mediated through the testimony of the evangelists and elevated into the Spirit. He accordingly denied any inaccuracies whatever in the general tenor of Scripture, and yet conceded the occurrence of inaccuracies in minor particulars. Matthew did not combine into a single discourse what the Lord uttered at different times, because the Holy Ghost could not guide and instruct him to record any untruth whatsoever for the Church; on the other hand he wrote: "Once only did Luke mistake by introducing a saying from another place (v. 45)." Thoroughly convinced that the Holy Ghost is *uctor primatus* of the Scriptures, he was not greatly concerned about the canonicity of its human authors. He could not, however, ignore history altogether. He was a mystic, but of the rational class which believes in harmonizing the internal testimony of the Spirit with the external witness of history. Following the older interpretation, he received the authenticity of the whole of Isaiah and of 2 Peter on internal grounds alone and without being disturbed by philological or other scientific reasons. In this instance the critical faculty was compelled to give place to his dependence on ecclesiastical tradition and the felt religious necessity of regarding the whole of the Bible as the regular work of God. Other defects to be noticed in his exegetical works are...
plot against him. Shortly after their return, the pope sent cardinals to England to press certain enormities and abuses of the English clergy. Stigand, believing himself to be the special mark aimed at, hid himself in Scotland with Alexander, bishop of Lincoln, and afterwards in the isle of Ely. Learning that a convocation had been called at Winchester, he went thither and be came known by the name of the Englishman.

In practical theologie he likewise rendered important services, notably in the publishing of his Protokalische Ke-

rytik and in his contributions to the literature of cæ-

chetica. Hymnology and liturgics also engaged his

attention, and his interest in them is attested by the

issue of several volumes in these departments. He
commented on the Psalter (to which he contributed the

first part of the commentary) and on the Vulgate

translations on the Epistle to the Hebrews, the Epistle

of James, the Epistle to the Ephesians, and the Epistle

of Jude; on the prophet Isaiah, and on the Reden Jesus.

All these form a mine of wealthy ideas for

preachers, and have been very widely circulated. The

last named was his principal work and was repub-

lished in four years, 1557, to which were added in

1539 Reden des Herrn vom Himmel her, and in 1860

Reden der Engel. These have been published com-

plete in an English dress (N. Y. 1864, 3 vols. 8vo).

Mention may also be made here of his co-operation in

the preparation of the last edition of Von Meyer’s Bi-

ble (1842), and of the subsequent edition of 1856 (Bibelfeld),

prepared wholly by himself, together with the

well-known Polyglott Bible, edited by himself and Thiele.

Further, of the essays in behalf of a revision of Luther’s

Bible, entitled Abteil und Neues in Deutscher Bibel (Basel,

1828); — Drei Luther’s Bibel unübersichtlich bleiben (Halle,

1842); — die deutsche Bibel (Stuttgart, 1863). (1861). In practical theologie, homiletics, hymnology, etc., Protokalische Kerytik (1830; 2d ed. 1841) — Evange-

lisch-predigten (2d ed. 1862) — Predigt-Predigten (2d ed.

1855) — Privat-Agendi (5th ed. 1863) — Luther’s Kutch-

schnitz als Grundlage des Conformenunterrichts (6th

ed. 1853.) — Zehn-pflichten zum Kutschnitz (1857, etc.)

— London 1830, and poetical volumes in 1841: — Ge-

sängbuchmacht (1838), a critique of modern

hymn-books. In support of the Union, to which he

was thoroughly devoted, he wrote, Heimathaus aus der

alten Kirche (1448) — Unauthentische Theesen (1855).

See a sketch of his life by his son in Neue evange-

lische Kirchenzüge (1863, No. 11 March 14), a char-

acterization of the author by Nitzsch, attached to the

5th edition of the Reden Jesus. See Lacroix, Life of

Robert Stier (N. Y. 1874).

Stigand, an English prelate, was chaplain to king

Edward the Confessor, and preferred by him first to the

bishopric of the East Saxons, at Helming; in 1043, and

afterwards to Winchester, in 1047. Seeing the king dis-

pleased with Robert, the archbishop, he thrust himself

into his room, and kept both Winchester and Canterbury

until a little time before his death, when he was forced

to begone them both. After William the Conqueror had

slain Harold in the field, all England yielded to him

except the Saxons. The English earls, Ealdred and

Egelsin, demanded their ancient liberties, which

William granted. But he conceived a dislike for Sti-

gand, and would not allow himself to be crowned by

him, but chose Alfred, archbishop of York. He took

Stigand to Normandy with him, fearing to leave him to

IX.—T YV
(q. v.), who, in 1224, had a vision of a seraph with six wings, between which appeared the image of a crucified one; and on recovering consciousness found himself marked with the wounds of crucifixion in his hands, feet, and side. Thus appeared though à Celano and Bonaventura, and, though disinherited by the Dominicans generally and denounced by the bishop of Olmitz, was honored with an attempted execution by the popes of that period—Gregory IX and Alexander IV, the latter claiming to have himself seen the marks of the wounds. Other instances of the number of eighty, occur in the traditions of the Romish Church, though the stigmatization in some of them is but partial; showing, e.g., only the marks of the crown of thorns or of the spear-thrust. The Capuchin nun Veronica Giuliani, who died in 1727 at Città di Castello, was cano-

ized as the last person who bore these marks, in 1831. But instances have occurred within our own time, which are attested by thousands of witnesses who speak from direct observation, among them persons deserving of belief. Anna Catharine Emmerich, a nun of Dulmen, experienced full stigmatization in her body, after long previous illness, in 1811. Her wounds became very painful in consequence of repeated examinations by the authorities; and she prayed that they might be closed, which accordingly came to pass in 1819, though the wounds were always red and emitted blood on Friday. The case of Maria von Mül, at Kallern, in Southern Tyrol, was similar. In 1833, when in her twenty-second year, and after previous illness, the stigmata appeared on her hands, which always bled on Wednesday and Friday. More than forty thousand visitors were attracted to Kallern by the fame of this case. Maria eventually retired into the Franciscan convent at Kal-

tern. Still other instances were those of Crescentia Steinklutsch at Tschermis, and of Maria Domenica Laz-

zari, of Capriani. The latter bore the marks of Christ's passion on her forehead, hands, feet, and side from 1834 until 1850, and endured from them the most terrible physical pain. A Protestant girl in Saxony, said to have been magnetized, is reported to have borne similar marks, though only for a time and during the progress of a severe sickness, in the course of which she apparently died on Good-Friday, 1829, and revived again on the following Easter-day.

Although many of the cases of stigmatization are not well attested, it is yet certain that cases have actually occurred; and it becomes important to account for them. The popes attributed the case of St. Francis directly to "the eternal and wonderful favours which were vouchsafed to him in Christ." A better explanation unquestionably is obtained when we reflect how many and strong are the formative powers of the soul which the imagination may control, and how remarkable are the results sometimes caused by the action of the imagination upon the body. Certain Roman Catholic writers, e.g. Jacobus de Voragine (13th century), Petrarch, Cornelius Agrippa, etc., ascribed the stigmatization of St. Francis to his glowing fancy; and the fact of an excited imagination usually connected with an enfeebled body—the effect of sickness or of religious mortifications—may be demonstrated in every instance of the phenomenon in question which has been properly authenticated. The question of the importance to be attached to such phenomena consequently becomes easy of solution. Stigmatization seems only to have occurred where the subject had earnestly and decisively turned away from the world and its pleasures, and had embraced the Saviour in the fervor of a glowing conscience. The phenomenon was, nevertheless, never confirmed by God. As a phenomenon, permitted rather than caused by him, it must be regarded rather as a negative than a positive effect of his divine working.

Stikeman, William, a minister of the Methodist Episcopal Church, was born at Port Richmond, Staten Island, N. Y., Aug. 9, 1848. He was converted in his sixteenth year, and was licensed to preach Jan. 31, 1866. He was ordained on trial by the Newark Conference in 1866, and ordained deacon in 1868. He was attacked by a pulmonary trouble and obliged to give up his charge in November of the same year, and died Feb. 10, 1869. See Minutes of Annual Confer-

ence, 1869, p. 57.

Stilbê, in Grecian mythology, was a daughter of Penes and Creusa, who was beloved of Apollo, and is said to have become by him the mother of Lapithus and Centaurus (Diod. Sic. iv, 69, etc.).

Stiles, Abel, a Congregational minister, uncle of the following, was born at Windsor, Conn., March 5, 1708, graduated at Yale College in 1728, was tutor for a year, and ordained at Woodstock in 1737, where he was pastor until his death, July 25, 1783. In 1760 a breach took place in the Church, Stiles and his adhe-

rents setting up worship in the northern part of the town. The town of North Haven was organized in 1766 by mutual reconciliation. See Cong. Quar. 1861, p. 350.

Stiles, Ezra, D.D., an eminent Congregational minister, was born at North Haven, Conn., Dec. 10, 1727. He graduated at Yale College in 1747, and was appointed tutor in 1749, licensed to preach in the same year, but in 1753 he was admitted to the bar in New Haven, and practiced law for two years. Having re-

ceived a call from Newport, R. I., he was ordained sav-

tor Oct. 22, 1755, where he continued a persevering stu-
dent and faithful pastor until 1777, when he was elected president of Yale College and professor of ecclesiastical history, upon the duties of which positions he entered in June, 1778, and remained until his death, May 12, 1796. He published, A Funeral Oration on Governor Law (1751), in Latin:— a Latin Oration on his in-
duction to his office as President (1778)—Account of the Settlement of Bristol (1785)—History of the Three Judges of Charles I (1785). See Sprague, Annals of the Amer. Pulpit, i, 470.

Still, Abraham, a minister of the Methodist Epis-

copal Church, was born in Duncombe County, N. C., Aug. 9, 1814. He was associated with the hospital at a set of seventeen, and was licensed to preach in 1817. He was ordained deacon in November, 1821, and elder in October, 1825. He travelled in Virginia and Tennessee until 1888, when he was transferred to Missouri. At the division of the Church in 1844 he adhered to the Church North, and travelled for six years in Missouri, Iowa, and Mississippi. In 1850 the Missouri Con-

ference sent him as missionary to the Shawnee Indians, among whom he labored until the mission was discon-

tinued. The first appointments to Kansas were made (1855) by the Missouri Conference, and Mr. Still was made presiding elder, which office he continued to hold after the Kansas and Nebraska Conference was orga-

nized in May, 1856. In 1860 he was made a superannu-

ate, but became effective in 1863, and again took a su-

perannuated relation. He died Dec. 31, 1867. See Minutes of Annual Conference, 1868, p. 72.

Still, Elijah, a minister of the Methodist Episcopal Church, was born in White County, Tenn., Sept. 4, 1815. He was admitted on trial in the Holston Conference in 1832, but in 1838 was granted a location in Clay and Bradley County. When the present Holston Confer-
ence was formed, in 1865, he was reinstated and labored very successfully. He died at his home in Bradley, April 12, 1875. See Minutes of Annual Conferences, 1875, p. 130.

Stilling, John, an English prelate, was born in 1543, and was the son of William Stilling, of Grantham, Lincolnshire. He was admitted to Christ's College, Cambridge, where he took his degrees. In 1570 he was Margaret professor at Cambridge, in 1571 he became rector at Hadleigh, County of Suffolk, and archdeacon of Sudbury, and in 1573 was collated to the vicarage of East Marden, in the same county. He was also archdeacon of St. John's in 1574, and of Trinity College in 1577. In 1588 he was chosen proctor of the convocation, and two years after was appointed to the see of Bath and Wells, in which he continued until his death, Feb. 26, 1607.

Stilling, John Kline, a minister of the Methodist Episcopal Church, was born at New Windsor, Orange Co., N. Y., April 16, 1813, and united with the Church at the age of fourteen. In 1840 he was admitted on trial in the New York Conference, superannuated in 1855, supernumerary in 1856, and in 1861 finally superannuated. He died at Middletown, N. Y., Feb. 3, 1876. He was a diligent, studious, faithful, and useful minister. See Minutes of Annual Conferences, 1877, p. 44.

Stilling, Jung, whose real name was Johann Hein- rath Jung, was a Dutch author who wrote books on law, books for edification, and as a theosophico-mystical apocalyp- tist. He was born at Grund, in Nassau-Siegen, Sept. 12, 1740. His early years were spent in poverty. A common village school afforded the earliest instruction he received; and his subsequent progress was constantly interrupted by the necessity of practicing his father's trade of tailoring. Down to his twenty-first year he studied, taught, and sewed, but never ceased to aspire. He became proficient in geography, mathematics, gno- monics, Greek, and Hebrew; and when he obtained the position of tutor and general manager in the household of the merchant Spanier, at Bade, he added to his acquire- ments a knowledge of economics, agriculture, and commercial science. At this time a Roman Catholic clergyman of the neighborhood made known to Stilling a secret cure for diseases of the eyes, thereby con- ferring on him a favor by which he profited to the end of his life. A successful cure opened Stilling's way into the higher walk of life; and his recommendation to whose daughter plighted her troth to him, and whose aid enabled him to obtain in Strasbourg the diploma of doctor of medicine in 1771. At Strasbourg he first met Goethe and Herder, and also Salzmann, his life-long correspondent; and their influence undoubtedly did much to enlarge his mental horizon and broaden his sympathies; but it is certain that he never ceased to respect the Pietists, whose influence had guided his early experiences, and that he never wholly separated from them. The earliest pages of his autobiography, which were written at Elberfeld soon after his marriage, and published by Goethe, afforded evidence of increasing independence of thought, and served to decide his position as a literary man. They did not, however, re- lieve him from debts which he had incurred, nor free him from numerous enemies whom his too lively im- agination and morbid sensitiveness had raised up; and he accordingly accepted the position of professor of finance and political economy in the newly established academy of Kaiserslautern, though the salary was only 600 florins. The transfer of the school to Heidelberg doubled his salary, his practice as an occult became steadily more profitable, and the expenses of his house- hold were more carefully managed after he married his second wife, Selma von Seekatz, in 1803. He was, however, until his transfer to Mar- burg that the pressure of financial troubles began to lighten. His circle of friends and influence now rapidly widened, and his books and medical practice en- grossed his time; as a consequence, his academical du-
Stillman, Stephen L., a minister of the Methodist Episcopal Church, was born April 15, 1735, at Burlington, Conn. He made a profession of religion at the age of twelve, but did not openly profess Christ until six years after, when he joined the Baptist Church. He united with the Methodist Episcopal Church in 1817, and was licensed as a local preacher, Feb. 5, 1822. He was received on trial into the New York Conference in 1823, ordained deacon in 1826, and elder in 1828. In 1841 he was transferred to the Troy Conference, and filled important stations until 1854, when he was left, at his own request, because of failing health, without an appointment. He settled in Bethlehem, near Albany, and in the following year was appointed chaplain of the Albany Bethel for Sailors and Boatsmen. In 1856 he again took an effective relation, and continued to receive appointments until, in 1865, he became supernumerary, and in 1867 was an appointed deacon. He died at his room at Washington Avenue (afterwards Trumansville), which he held at the time of his death, April 2, 1869. His best monument is the unwritten labor of his life. See Minutes of Annual Conferences, 1869, p. 116.

Stillman, Samuel, D.D., a Baptist minister, was born in Philadelphia, Pa., Feb. 27, 1737. He preached his first sermon Feb. 17, 1758, and was ordained at Charleston, S. C., as an evangelist, Feb. 26, 1759. He subsequently settled in James Island, near Charleston. Some eighteen months afterwards he removed to Bordentown, New Jersey, where he became pastor of the First Baptist Church of Boston, Mass., in January, 1765. He was made A.M. in 1761 by Harvard University, having also received this degree from the Philadelphia College some time previous. In 1764 his name appears in the first list of trustees of Brown University, and in 1769 he was elected fellow the following year. He was always willing to co-operate in all public efforts made for the good of his country or his race, and was at one time (in 1778) member of the Federal Convention for Boston. He labored unceasingly until his death, March 12, 1807. Dr. Stillman was the author of a large number of religious books, including some Discourses. A report of some of the former was published after his death (1808, 8vo). See Sprague, Annals of the Amer. Pulpi, vi. 71.
STIMSON

The churches of Mr. Stilwell gradually declined, and all traces of such an associated movement have long since passed away. See Simpson, *Cyclop. of Methodism*, s.v.

STIMSON, David, a minister of the Methodist Episcopal Church, was born at Hopkinton, Mass., Oct. 17, 1777. In 1803 he joined the New England Conference, was ordained deacon at Lynn in 1805, and elder in 1807. He was located from 1813 to 1825; but rendered effective service from then till 1836, when he became superannuated. He died at Charleston, Mo., Aug. 4, 1859. See *Minutes of Annual Conferences*, 1860, p. 161.

SINTIA, the name of Semea, according to the pronunciation of the Romans (Livy, xxxix, 12: Augustine, *De Civ. Ivi*, iv, 16; Ovid, *Fast.*, vi, 503.). Others take the name to designate a goddess who excites men to take all manner of bold enterprises (Augustine, *De Civ. Ivi*, iv, 11).

STEINLEY, Constantine, a minister of the Methodist Episcopal Church, was born in Wurttemberg, Germany, May 20, 1825. He was educated in the Roman Catholic Church, and was thoroughly acquainted with its institutions. He came to America, June 15, 1849, and in September, 1850, settled in Liberty, Mo. Here, in November, 1850, he united with the Methodist Episcopal Church, and in 1852 entered the itinerant ministry. He continued in active service until his death April 1, 1869. See *Minutes of Annual Conferences*, 1869, p. 261.

STINSON, Edward, a minister of the Methodist Episcopal Church, South, was born in Fayette County, Tenn., July 18, 1837. He united with the Church in 1845, was licensed to preach in 1852, and the same year joined the Memphis Conference. He died at his father's residence in Tippah County, Miss., Sept. 18, 1855. See *Minutes of Annual Conferences of the M. E. Church*, South, 1855, p. 600.

Stipend (stipendium) is settled pay for services, whether daily, monthly, or annual. Salary (q.v.), as the name implies, was originally money given for *sell*, and then money for general purposes. Stipend was the pay given to the Roman soldier, while emolument, as the word denotes, was the gift of a priest paid to him who owned the *sola*, or mill. In a state church, the stipend is secured by law; in non-established churches it depends on the equity and generosity of the Christian people. See Tithes; Tithes.

Stipendary, one who performs services for a settled compensation, whether by the day, month, or year.

Stipendary Priest is (1) a priest who officiates for a determined compensation, whether in a church, chapel, or elsewhere; (2) a priest who is appointed in certain foreign countries to make arrangements for the saying of masses for deceased persons.

Stiphæus was the name of a Centaur who was slain at the wedding of Pithouhis by the handsome Ceneus (Ovid, *Metam.*, xii, 459).

Stirita, in Greek mythology, was a surname of Ceres, derived from the word starch, in Phocis.

Stirim, Carl H., a German doctor of theology and member of consistory, was born Sept. 22, 1799, at Schornberg. His first ministerial duties he discharged at Unterweningen, but from 1836 he was court chaplain and member of consistory at Stuttgart, where he died, April 21, 1873. Stirim is best known as the author of *Apollo der Christenthums in Briefen für gebildete Leser* (Stuttgart, 2d ed. 1865), which has been widely circulated. He also published *Sermone und Essays*, contained in the *Machte der evangelischen Kirche* (Stuttgart, 1856, 319: Zuchold, *Bibl. Theol.*, 1278. (B. P.).

Stjernhjelm, Johan, a Swedish scholar and poet, was born in April, 1596. In his youth he assumed the name of Goran Life, and after studying in Upsala, he visited Germany, Italy, France, Holland, and England. In 1625 he was appointed instructor in the gymnasium of Westerla, from which he went to Stockholm, and occupied a similar position. Here he remained till 1630, when he became assessor of the Superior Court of Dorpat. The next year he was elevated to the nobility, taking the name of Stjernhjelm. In 1642 he was recalled to Stockholm as a member of the commission to revise the laws of Sweden, and in 1648 became vice-president of the Superior Court of Dorpat. The invasion of Livonia by the Russians in 1657 caused him to fly, and cost him the loss of his estates. In 1667 he was appointed first director of the College of Antiquities, which office he retained until his death, April 22, 1672. Stjernhjelm was a very prolific writer, producing from fifty to sixty distinct works in poetry, philology, philosophy, etc. In the freshness and independence of his religious thinking he was in advance of his age, and was therefore persecuted by his contemporaries. See *Meth. Quart. Rev.*, 1875, p. 563-579.

Stoï, (Στοία), a Greek term for a portico or cloister around the court (atrium) of an ancient church.

Stoe, a brazen tube, formed like a cow's horn, used in the Middle Ages as a speaking-trumpet on the tops of church-towers to assemble the faithful to worship, and to proclaim new morns, quarters, and ecclesiastical festivals. The marquis of Drogheda possesses a remarkable Irish specimen of the stoë.

Stock (in the sing.) is the rendering, in the A. V., of the following Heb. and Gr. words: 1. ὡδε, bál, lit. produce ("food"); Job xi, 20; hence the trunk of a tree ("stock"); Isa. xlv, 19; 2. στήμα, gēsa, the stump ("stock"); Job xix, 8 or trunk ("stem"); Isa. xi, 1; "stock," xii, 24 of a tree; 3. Ἐς, its (Jer. ii, 27; x, 8), a tree, or piece of wood, as elsewhere rendered; 4. ὑἄκηρ, ὑἄκηρ, a plant rooted up and then transplanted in a foreign soil (Lev. xxvii, 4): 5. γιγανταίoν (Acts xxi, 26; Phil. iii, 5), race, or kindred (as elsewhere rendered). A gazing-stock (Nah. iii, 6) is *nēm*, rōt, a night (variously rendered elsewhere).

STOCK, in ecclesiastical technology, is (1) a vessel containing a store or supply; (2) a vessel containing oils blessed for use in the Christian sacraments. See Oil-stock.

Stock, Christian, a celebrated scholar and Orientalist, was born in Hamburg, Germany, in 1672, became a professor at Jena in 1717, and died in 1758, with a very high reputation, especially for Oriental literature. The chief of his works are, *Disputationes de Pomis Hebraeorum Cuprum*; —eelnessa et Enextera Testamenti; —Claria Lingua Sancta Novi Testamenti. The last two, which are a Hebrew and a Greek lexicon, have been much approved, have gone through several editions, and have received improvements and additions.

Stock, Richard, an eminent Puritan divine, was born in the city of York, and was educated in St. John's College, Cambridge. He took his first degree in arts there, and in 1569 was passed A.M. at Oxford. Leaving the university, he became domestic chaplain, first to Sir Anthony Cope, of Ashby, Northampton, and then to lady Lauce, of Burton-on-the-Water, Gloucestershire. Soon afterwards he went to London and officiated as assistant to the vicar of All-Hallows, Breadstreet, for sixteen years, and succeeded him in that living. He died April 20, 1593. His works are, *Genre of Eev. 8vo*; —Sermon at the Funeral of John, Lord Harrington, etc. (1614, 8vo); —Stock of Divine Knowledge (Lond, 1641, 4to); —Truth's Champion, etc. —Commentary on the Prophecy of Malachi (edited by Torsell, 1641, 4to).

Stock, Simon, an English monk, who became general of the Carmelites, and is known as an ascetic writer.
Stockdale, Percival, an English clergyman and writer, was born at全产业链 of the scapular in honor of the Virgin Mary.

Stockdale, Percival, an English clergyman and writer, was born at全产业链 of the scapular in honor of the Virgin Mary. He was educated at Alnwick and Berwick, and afterwards (1743) entered the University of St. Andrew's, where he left to accept a sub-deacon in the army. Deciding to enter the ministry, he was ordained deacon at Michaelmas in 1749, and became one of Dr. Sharp's assistants in the curacy of Duke's Place, Aldgate. After this he fell into a rambling life, and in 1767 went to Italy and resided for two years in the town of Villafranca, where he, says his biographer, disposed himself on the ship Resolution, which he retained three years. He became curate of Hincworth, Hertfordshire, in 1780; and also took priest's orders. In 1789 lord-chancellor Thurlow presented him with the living of Lesbury, Northumberland, to which the duke of Northumberland added that of Long Houghton in the same county. He remained in the naval service, and many times interested an invitation to spend some time at Tangier, and in 1790 returned from the Mediterranean. He died at his vicarage, Sept. 11, 1811. The works of Mr. Stockdale were chiefly poetical; but he also wrote, Treatise on Education (1782, 8vo.—Sermons (1784, 1791, 8vo). See Althamiire's History of Brit. and Amer. Authors, s. v.; Chalmers, Biog. Dict. s. v.

Stockfeld, Johann, a missionary among the Jews, was born Dec. 14, 1766, at Marbeck, near Mörs, in Rheinisch Prussia. Having been duly prepared by his brother, he entered, in 1824, the Hebrew College at London, to fit himself the better for the work among the Jews. In the following year he was appointed missionary by the London Society, and labored most successfully in Holland, Rheinisch Prussia, Westphalia, and other places. In 1856 he was ordained, and settled first at Brussels, then at Cologne, and lastly at Kreuznach, where for twenty-eight years he was enabled to prosecute his chosen work among God's ancient people. Here he also established an auxiliary society in connection with that at Cologne, or the Rheinisch Jewish Missionary Society, in an effort to awaken interest in behalf of Israel. He had a monthly meeting in his own house, where pious Christians, both clergy and laymen, attended in numbers. Stockfeld died Dec. 17, 1869, after having most diligently labored as a missionary for more than forty-three years. See (London) Jewish Intell. Feb. 1869; Missionsblatt des rheinisch-westfälischen Vereins für Israel, Jan. and Feb. 1870. (B. P.)

Stockflett, Niels J. Christ., the apostle of the Laplanders, was born Jan. 11, 1875, at Frederickstad. He studied law at Copenhagen in 1803, entered the military, was appointed lieutenant in 1809, and after the battle of Schestad he was made captain. In 1825 he resigned his military position and betook himself to the study of the universities of Upsal and Christiania. In 1826 he was ordained, and then commenced studying the language of the Laplanders, thus laying the foundation for a popular Lappish literature. In 1839 he resigned his ministerial position, and traveled through Norway, Sweden, and Finland. He died at Standefjord, April 26, 1866. Besides a Primer, a Grammar, a Bible History, and Contributions to the Knowledge of the Lappish Language, he translated the New Testament for the Lapps, and thus immortalized his name. See the Regensburger Conversations-Lexicon, s. v.; Vahl, Lappernen op den lappiske Mission (Copenhagen, 1806); Piper, Evangel. Kirulunder, 1867, p. 213 sq. See QUANJIAN Version. (B. P.)

Stocking, a covering for the leg or foot. Bishops and prelates wear official stockings of cloth of gold or purple, which practice has been approved by local councils both in Italy and England.
mentioned in the accounts of the sufferings of the early Christian martyrs (see Newman, Callista, p. 383 sq., where, however, the ligumia of the Vulg. is confounded with the robber, or interior cell). See PUNISHMENT.

Stockton, Benjamin Brearley, a Presbyterian minister, was born at Hackettstown, N. J., Jan. 31, 1790. After a complete academic course, he graduated at Middlebury College, Vt., in 1809; studied theology in the Andover Theological Seminary, Mass.; and was licensed and ordained by Utica Presbytery in 1812. He labored in the following churches: Skeneateles, Palmyra, Pompey, Camillus, Le Ray, Montgomery, Brockport, Genesea, and Phelps, all in Western New York. He was a member of Rochester City Presbytery from its organization in 1828, when he was called to the City, N. J., and subsequently to Williamsburg, L. I., and became a member of Nassau Presbytery. Here he died, Jan. 10, 1861. Mr. Stockton was a man of excellent understanding, careful culture, and full of faith and the Holy Ghost." See Wilson, Presb. Hist. Almanac, 1862, p. 129.

Stockton, Joseph, a Presbyterian minister, was born near Chambersburg, Pa., Feb. 25, 1779; pursued his classical course at Canonsburg, where he was subsequently a teacher; studied theology privately; was licensed by the Presbytery of Ohio in June, 1799; and ordained and installed pastor of the churches of Meadville and Sugar Creek, June 24, 1801, where he continued till 1810, when he resigned. On leaving Meadville, he was called to the Western Mission of the Presbytery of Pittsburgh, which was afterwards merged in the "Western University of Pennsylvania." Here he preached as well as taught, and, among other important services which he rendered, founded the Presbyterian Church in Allegheny. From 1820 to 1829 his labors were equally divided between the churches of Sugar Creek and the Allegheny booked; but from 1829 till his death, Oct. 29, 1832, he preached the whole time at Pine Creek. Mr. Stockton was the author of the Western Spelling-book and the Western Calculator. See Sprague, Annals of the Amer. Pulpit, iv, 243, note. (J. L. N.)

Stockton, Thomas Hewlings, D.D., an eminent minister of the Methodist Protestant Church, was born at Mount Holly, N. J., June 4, 1808. When about eighteen years of age he was converted, and joined the Methodist Episcopal Church in Philadelphia. Soon after the Methodist Protestant Church was formed he united with it, and was placed on a circuit in 1829 by Rev. Nicholas Sneath. The following year he was stationed at Souderton, Pa., in 1833 in the same capacity; and in 1836 he was elected chaplain to Congress, which position he held for three successive sessions. He resided in Philadelphia from 1838 to 1847, and built the church edifice at the corner of Eleventh and Wood Streets. From 1847 to 1850 he lived in Cincinnati. While residing in that city he was elected president of Miami University, but declined. He resided in Baltimore from 1850 to 1856, and was pastor of St. John's Methodist Protestant Church. From 1856 to 1868 he was pastor of the Independent Church, Philadelphia, but retained his personal connection with the Methodist Protestant Church. He was again chaplain to Congress in 1862, and died Dec. 9, 1868. Dr. Stockton was a man of great purity of life, of intellectual power, and was remarkable for his wonderful eloquence. He published, Sermons for the People (Pitts, 1854, 12mo).—Stand up for Jesus, a Christian Ballad (Phila, 1858, 12mo).—The Christian World, Book and Journal, and Bible Times, periodicals, etc. See Simpson, Church of Methodism, v. r.

Stoddard, David Tappan, a Congregational minister and missionary, was born at Northampton, Mass., Dec. 2, 1818. At the age of ten he had made considerable progress in Latin and Greek. He was sent to the Round Hill Academy, Mass. He was early the subject of converting grace, and joined the Church, on the profession of his faith, after he had entered college. He first commenced the college course at Williams, and completed it at Yale, and took high rank as a scholar, especially in the physical sciences. He declined an invitation to go on an exploring expedition under command of Wilkes, because he considered himself consecrated to the work of the ministry. He graduated with honor in 1843, and entered immediately on the office of tutor in Marshall College, Pa. While he here he offered a professorship in Marietta College, O.; but he declined it, and entered the Theological Seminary at Andover. Before he had completed his course he was appointed tutor in Yale College, and he returned to his alma mater. In 1841 a revival occurred in the college, in which he was much interested. He was then called to New York City, N. J., and subsequently to Williamsburg, L. I., and became a member of Nassau Presbytery. Here he died, Jan. 10, 1861. Mr. Stockton was a man of excellent understanding, careful culture, and full of faith and the Holy Ghost." See Wilson, Presb. Hist. Almanac, 1862, p. 129.

Stoddard, Ira Childs, a Baptist minister, was born at Brattleborough, Vt., Jan. 25, 1792. In 1817 he was licensed to preach by the Baptist Church of Guildford. He was not ordained until 1827, when, on Sept.
26 of that year, he became the pastor of the Church in Eden, Erie Co., N.Y., where he remained eleven years, his ministry being greatly blessed. In 1836 he removed to Busti, Chautauqua Co., N.Y., where he was a pastor four years, and then removed to Greenfield. For some time he was a member of the Buffalo Statistical Society, and had brief pastorates in several places in the State of New York. He died in Busti,Jan. 12, 1878. See New York Examiner and Chronicle. (J. C. S.)

Stoddard, John E., a minister of the Methodist Episcopal Church, was born at Brookfield, Worcester Co., Mass., March 10, 1801. He removed, when five years of age, to Finickey, N. Y., was converted in 1829, and received a license to preach on Jan. 5, 1835. In 1839, he was employed by the presiding elder from August of that year until 1836, when he was received on trial into the Black River Conference. In 1843 he was, for lack of health, made supernumerary, and held that relation until his death, at Morristown, St. Lawrence Co., N.Y., Feb. 12, 1861. See Minutes of Annual Conferences, 1861, p. 102.

Stoddard, Solomon, a Congregational minister, was born in Boston, Mass., in 1643, and was graduated at Harvard College in 1662. He was afterwards appointed a fellow. His health being impaired, he went to Barbadoes as chaplain to governor Serle, and preached to the Dissenters on that island near two years. After his return, he began to preach at Northampton in 1665, received a certificate from the conference of July 4, 1670, and was constituted such Sept. 11, 1672. He continued in that place till his death, Feb. 11, 1729. His colleague, Mr. Edwards, succeeded him. Mr. Stoddard was a learned man, well versed in religious controversies, and himself an acute disputant. He engaged in a controversy with Increase Mather respecting the Lord’s supper, unfortunately maintaining that the sacrament was a converting ordinance, and that all baptized persons not scandalous in life may lawfully approach the table, though they know themselves to be unconverted or destitute of true religion. As a preacher his discourses were plain, experimental, searching, and argumentative. He was blessed with great success. He used to say that he had five harvests; and in these revivals there was a general cry, “What must I do to be saved?” He was so diligent in his studies that he left a considerable number of written sermons which he had never preached. From 1667 to 1674 he was librarian of the library of the University of Cambridge (being the first who ever held it). He published, besides several sermons, The Doctrine of Instituted Churches (London, 1700, 4to):—A Guide to Christ, or the Way of Directing Souls in the Way to Conversion (1714), compiled for young ministers:—A Treatise concerning Conversion of Sinners to God (London, 1719);—Answer to Cases of Conscience (1722):—Whether God is not Angry with the Country for Doing so Little towards the Conversion of the Indians (1723):—Safety of Appearing at the Judgment in the Righteousness of Christ. This last work was republished at Edinburgh (1723, 8vo), See Biblioth. Stodd. see Index, Vol. 5, Quart. Rev. Jan., 1859; New-Englander, Nov., 1858; North Amer. Rev., Jan., 1859.

Stoic Philosophy, the body of doctrine held and taught by the Stoics, or followers of Zeno. It was an offshoot from the school of Socrates, but the plant was very unlike the other shoots from the same root. It was thoroughly syncretistic; and its separate doctrines, often much disguised and internally distorted, may be readily traced to earlier systems. The philosophy was like Corinthian brass, the result of the fusion of many dissimilar materials, and unlike any that entered into its composition. The chiefs and advocates of the creed boasted of its marvellous symmetry and perfect organizing discipline, and its admirable orderliness; its pedagogical incredibilis erudito sermon. Quapro deos immortales! nonne mirari? Quid enim aut in natura, qui nihil est aptius, nihil descriptius, aut in operibus manufactum tam compositum tamque compactum et coagamentum invenerit potest? Quid posterius prius non convenit? Quod sequitur quod non respondeat superiori? Quid non sic aliud ex alioc nee sectatur, ut non simul litteram moveris, labeat omnia? Nec tamen nihilquam est, quod movet possidit (Cicero, De fin. iii. 74)." and "It was a "filled with bones." The Stoic philosophy was full of extravagances, incoherences, and contradictions, which were softened down or reconciled only by violent interpretations, and the constant exercise of dialectical legedism. Its opponents exposed its innumerable petit and grand larcenies. More dispassionate judges, like Plutarch, wrote treatises to exhibit its internal discrepancies. It was with good reason charged with gross absurdities, and was censured as a notable justification of the sneer. Osseus est taw kalovnikov philofov d'phofov (Athens, Delphi, xiii. 99). Nevertheless, the philosophy of the Stoics is sufficiently distinct and characteristic to merit the eminent and enduring ascendency which it enjoyed as one of the great Hellenic schools, and to invite definite appreciation as a philosophic creed. Philosophy, according to the Stoics, was the art and practice of virtue ("Philosophia studium virtutis est, quo maxime admiraturus est", and per se,长短, Seneca). According to the doctrine of the Stoics, it was stated that it might be practiced; it was practiced that it might be learned; it was the theory and rule of a wise and virtuous life. The essentially ethical character and the practical tendency of the philosophy were manifested from the outset. Aristo of Chios regarded nothing but the doctrine belonging to the main principle of philosophy, and ethics always constituted its main and determinant part. Morality was its aim, its "ratio essendi;" all the rest was its "ampla" or "cura supellex," its garniture or its scaffolding. For this everything was devised; to this everything converged; and to this all other things were fitted. Incoherencies were blanked, were disregarded, were masked, or were welcomed if they aided, or did not obstruct, the attainment of the main object. Extravagances and paradoxes were cordially entertained if they conduced to the main purpose. Some of the Stoic chiefs narrowed the range of speculation to the pursuit of virtue, and because of Zeno himself, Chrysippus, and Posidonius, embraced in their teachings the whole domain of knowledge; but always in subordination to the pursuit of virtue and the wisdom "whereunto all other things shall be added." Philosophy, according to the Stoics, should be—1. Practical; 2. In conformity with nature; 3. In conformity with the laws of nature. The "ius et norma naturae" ran through all the ramifications of Stoic doctrine. To be practical, philosophy must be rational; to be rational, it must be in perfect consonance with the constitution of man and with the process of the universe. The act of virtue must therefore rest on the knowledge of reason and of nature. This was a doctrine of inquiry insisted upon by all his disciples as by Carlyle, though in far other guise.

In agreement with these views, and also with those of previous philosophers, philosophy was divided by the Stoics into three parts: Physics, Ethics, and Logic; or, by Cleanthes, so into six: Logics, Rhetorics, Ethics, Politics; Physics and Theology. This is simply a binomial subdivision of the original tripartite distribution. The order of the parts was variously determined by different Stoic teachers. Logic came first with some, physics with others; but logic and physics were alike constituted mainly, if not solely, for the sake of ethics, in order to discern the character and attributes of the virtuous man. One order or another will be preferred, according to the point of view from which the whole system is regarded. If it is desirable to trace the genesis and the organic relations of the doctrine, ethics
should take precedence, as in the third book of Cicero's tractate De Finibus Bonorum et Malorum, where ethics occupy nearly the whole book, only two chapters out of the twenty-two being conceded to dialectics and physics. This order of exposition would be tedious and inconvenient on the present occasion, as the other parts of the speculation would have to be broken up and dispersed, in order to show their connection with the moral truths. If it is improper to establish the authority and obligation of the Stoic rule on the basis of pervading law, physics, as including the constitution of the universe, and theology should come first. This sequence is unfavorable to a condensed presentation of the philosophy, and throws logic out of connection with the other parts of the speculation. The order is to treat first of logic, next of physics, and lastly of ethics. The means of ascertaining and securing truth are thus first considered; then the order and constitution of universal nature, by which the duties of man are determined and his actions controlled; and, finally, the obligations imposed upon man by the laws of reason and the laws of existence.

1. Logic.—The Stoic logic consisted of three divisions: Rhetoric, or continuous exposition; Dialectics, or discontinuous speech, specially argumentation; "inter respondentem et interrogantem discissa" (Seneca, Epist. xiv, 1, 17); and, thirdly, the Criterium, or test of truth. The last of these divisions of the Stoic logic was held by the Stoics to be the most important of all.

1. Our information in regard to the Stoic rhetoric is limited, broken, and unsatisfactory. Rhetoric, in the Stoic plan, included topics which would now be considered foreign to the art, and would be relegated to grammar. It excluded orators which would seem to be essential members of this branch of discipline. To this head, apparently, belonged the fantastic etymologies which were so diligently and erroneously cultivated by the school.

2. Dialectics embraced expression and the means of expression—thoughts and words. It therefore approached as much which should be conceded to rhetoric; it gave great attention to the nature and contents of sentences, and thus advanced grammatical inquiry and grammatical precision. So far as reasoning was concerned, it borrowed the logic of Aristotle and amplified it, without adding anything to it of substantial value. Like Sir William Hamilton, it introduced needless refinements, inappropriately induced by the wish of their approval exclusively to the hypothetical syllogism; habitually practiced ratiocination by captious questions and evasive answers; elaborated the doctrine of fallacies, and were frequently entangled in their own toils; invented manifold and bewildering distinctions, according to their fancy, and, in general, the soundness of them, exercised themselves in continual disputation. Hence they were reproached with wire-drawn and briery argumentation: "subtle vel epinomos potius disserendi genus" (Cicero, De Fin., i, 8). They thus merit the denunciation and the ridicule both of enemies and friends.

3. The Stoic doctrine on the Criterium is a notable part of the general theory, and is closely associated with the whole system. It is the basis on which the theory rests, and by which its validity is upheld. It cannot be examined here in its development and details. The Stoic philosophers were harassed, as other philosophers have been, with the fundamental necessity of establishing some ground of assurance for truth—a πρῶτος στόχος for reason to work on. They approximated to Locke in regarding all knowledge as deductible from perceptions and concepts, which are analogous to, but not identical with, the sensation and reflection of the English philosopher. They agreed with Descartes in mistaking position of conviction for certainty of truth. They also attached much weight to common notions—κοινά ἴδια— which are not innate ideas, but impressions and judgments in which all men intuitively agree. The reception of impressions and the formation of concepts were purely material and mechanical processes. The former were at first represented as produced by the actual imposition of a stamp, or die, upon the sensibility. Chrysippus recognized that this view was untenable, as each successive impression would thus blur or blot out its predecessors, and memory would be rendered inconceivable. He substituted the rational alteration of the experienced substance for mere press-work—ἀλλαγήν for ἀβαδίαν, and thereby brought the doctrine of the other cumbrotists into harmony with the later and more refined forms of nature. The Stoics were Nominalists after the order of the Cynics, for so many of their names have been identical with the Cynic philosophy (Cicero, De Off., iii, 8). Perception was simply a fantsaye, an appearance, a mental alteration. But a fantasy was distinguished from a phantasm, or apparition, which was a mental delusion. A true perception was apprehended by the apprehension of the apprehensive faculty or nous καθήκοντας ἐν ὑπόπτῳ causae, quia virtus est dormitiva. This position is a partial or qualified anticipations of Descartes. The invalidity and the fallibility of the καταληκτικὴ φαντασία are pleasingly illustrated by an anecdote told of Socrates at the court of Ptolemy, in Alexandria (Athenaeus, Deipn., viii, 4). A joke, it is true, is not an argument. It followed, however, the sector of the Stoics in the matter of notions and assured convictions were necessarily true: "All that exists takes value from opinion." Much of the ethical paradox of the Stoics proceeds from this false point of departure. It was a very rude and unsafe criterion of knowledge, and sanctioned the acceptance of whatever might be confidently believed and audaciously asserted. A justification of it from the Stoic point of view may be found in the Stoic physics. If the individual reason is only an effluence from the universal reason; if all things, and therefore all impressions, are necessarily determined by unerring law, the fantasy which is obscured by no doubt or indistinctness must be in accord with the universal reason, and must, consequently, be true. This is Spinozism, or strangely resembles it. To aid in the analysis of perceptions and thought, the Stoics devised a system of Categories, diverse in principle as in designation from the Categories of Aristotle, but consonant with their physics and metaphysical views. Indeed, it may be maintained, that the conception was Being, for which was afterwards substituted Something or Anything. Under this, in regular gradation, were arranged—1. Substance; 2. Property; 3. Variety; 4. Variety of Relation. The deviation from Aristotle proceeded from the necessities of the Stoic physics, which, in them, exercised only one real being or entity; but, unlike Spinoza, made that one substance matter. We are thus introduced to the Stoic physics.

1. Physics.—Like other ancient philosophers, but with greater propriety, the Stoics included theology in the philosophy of nature. They usually divided this branch of speculation into three heads: Concerning the Universe; Concerning Elements; Concerning Causes. They assumed two principles, as Plato had done: ἄρχαὶ Ἀθρόι καὶ ὕθεος, ὑπὸ Πλάτωνος (Aristocles, ap. Euseb. P. F. xvi, 14): but in a very different sense. With Plato these principles had been distinct in character and essential nature, and, indeed, they were the same in both. They were confounded, coalescent, and virtually identical. Thus rigid materialism supplanted Platonic idealism, and the universe was filled with animated material entities, and with their constant transformations. The tendency of modern science seems to be in the direction of similar views. Pythagoras, Heracles, from whom Xeno borrowed so largely, he bore on essential the dogma of the eternity and imperishability of matter; and also the four elements generated by the separation and differentiation of unqualified substance (ἀπόφασιν Ἐλαχί), and admitting indefinite combinations and transmuta-
tions. The elements themselves and all resulting prod-
occts were enveloped and interpenetrated by a subtle,
electric fluid which at the same time filled them all,
throughout all their changes and determined their char-
acter and actions. This ether was the determining
cause, the efficient force, in everything. All things were
moulded, guided, governed, by its impregnating and sus-
taining flame; everything was informed and animated by
it. Stars, planets, sun, moon, earth, comets—as all
other things—were vitalized by it; and through all
tings moved the anima mundi, the soul of the universe.

"Namque canon tacita naturae mentem pollentem; 
Infusuumque demum calo, terresiaque, fretoque, 
Hostiumque praestans moderantium foedereum, 
Et rationes agi mota; sum spiritus unus
Per cu byas habiet partes, cuique irgret orbeum, 
Omnis pervolitans, corpusque animale figurat." 
(Manil. Astron. ii, 60-65.)

The Stoics differed among themselves in regard to the
location of this all-pervading fire (πῦρ ῥηγνων). Some
placed it in the centre of the earth, Cleannthes in the
sun, but most assigned it to the highest atmosphere, or
"extra flammanita monia mundi." Dr. Carpenter, as
president of the British Association, at the Brighton
meeting, declared unphilosophically the representation of
the forces of nature as self-sustaining and self-operative.
The inconsistency was felt or disregarded by the Sto-
ics, as they did not distinguish their being and the
world; the universe and all its members were framed out of undis-
gusted and indiscriminate matter by the motion of the
etheral fire which was distributed throughout all things.
The light and life of the stars were supposed to be fed
from the vapors and exhalations rising from the earth.
These must be consumed in the long lapse of countless
years. The universe would in turn become desiccated,
and be consumed by the fiery currents within it and
around it. A general conflagration will therefore wind
up the varied drama of creation, when "the heavens
shall pass away with a great noise, and the elements
shall melt with fervent heat; then the heavens shall be
consumed with fire; and the works that are therein shall be
burned up." This total combustion shall be followed by the gradual renewal
of all things. The process of evolution will recommence;
there shall be "a new heavens and a new earth." A
complete anacatastasis shall occur, to be succeeded by
another total incendescence. This destruction of the
world by fire was derived from Heraclitus. Other Sto-
ics added to it, or substituted for it, destruction by flood.
There were Neptunians and Vulcanians in the sect.
Some of the fraternity rejected the hypothesis altogether.
It will be observed in what a remarkable manner the
Stoics have anticipated the modern theories in the
theory of the spontaneous consumption of the worlds by
fire, and their reproduction by cooling, coalescence, divi-
sion, and recomposition of parts.

Although a nominal distinction is always made by
Zeno and his followers between matter and God, and is
specially insisted on by Boethus, who does not admit
the world to be a huge animal, yet, as God is material
—only "a finer air"—as he is the creative and fiery ether which fashions, regulates, and dwells in all, it is
impossible to establish any real division between the
Divinity and the material universe. It is not merely,
as Autolycus says, that "all things are from Jove, in
Jove, and converge to Jove," but all things are Jove,
and Jove is all things. The Stoic identification of God
with the universe was manifest to the ancients:

"As mihi tam presens ratio non alla videtur
Quaque patens mundi divini nuncupatur Deus" 
(Manil. Astron. i, 490-492.)
The fiery ether constituted the Divinity of Heraclitus
before being adopted as the God and soul of the uni-
verse by Zeno. Throughout the whole range of being,
in its highest and its lowest spheres, there is an in-
conceivable mixture of the divine and the material—
the mixed nature of the divine and the material
being sustained. This supreme God is no independent
or autonomous ruler. He is all-wise not of his own wis-
don; almighty from no power of his own. He acts
like Spinoza, God, not of his own will, but from the
necessity of his nature; and is obedient to the law
which he seems to impose, for that law is only the pro-
cess of his inevitable developments (Seneca, Diotyl. i, 5, 86.)
This Divinity is more shadowy than the Nouveau Grand Étre Suprême of Comte, though infinitely more
expansive. He is simply the chain of natural phe-

omena: "irrevocabiles humana pariter ac divina curas vehit" 
(Seneca, Diotyl. i, 5, 86.) An absolute fatalism evidently results from this con-
ception of the Divinity—a fatalism not of actions pre-
determined, but of eventualities necessitated. It is fa-
talism a posteriori, or an inverted fatalism. As all pos-
sibilities are realized and the being universal is
necessary in order, and are simultaneously contained
in the totality of his essence, their complexion and mani-
festation are foreknown to the Divinity, which, under
this aspect, is named Providence. The Stoic doctrine
here marches closely by the side of Spinozism. It is
somewhat strange that we who should be the "Pro-
vidence" to Stoic invention. From the conceptions just
explained proceeds the Stoic fate—ἡ ἐμαρτυρία—which envelops all issues in its toils, and determines the end
from the beginning. It follows, as with Heraclitus,
that law is universal and all-controlling, and that noth-
ing can evade it. All being is not only woven into the
law, but the law is woven into all being; the things
are alike ineffectual to break, to change, to retard, or
to advance it.

"The Author of the world's great plan
The same result will draw
Philosophical life, however mean
May keep or break his law."

The Divinity is dispersed, rather than divided, among
many secondary gods—"ignobilis deorum turba"—but
still retains the totality of its own essence. It is the
same God always under many names: ζεύς πατέρο-
μος, in the Hymn of Cleannthes; "Jehovah, Jove, or
Lord," in the Olives of S. Paul. It is regarded as due to accommodation to the contempor-
polluteh, 3. It is assuredly a natural de
development of the general scheme. The Divinity is in all
things, and everything is divine; but it dwells with
greater fulness and evidence in some of its incorpora-
tions than in others. Where its presence is ample,
its manifestation may be most fittingly recognized.
The stars have their indwelling and presiding deities,
as with Plato and others of the older philosophers. As
everything is necessitated, "the stars in their courses"
are subject to law. And as all the concomitants of
the present life change concurrently under the law, and submission to each other by the bonds of the law, astrology ("con-
scia fati sidera") and all forms of divination are worthy
credit. Such indications as they afford are compe-
prehended and interpreted either by natural intuition,
through a larger participation in the universal reason
and a dim sympathy with its pulsations, or by obser-
vation of coincidences and acquired skill. It is "from
the declaration of Nostredamus in respect to his own
pretensions. The descent of the divine is not, how-
ever, restricted to secondary gods and to their starry
thrones. It attends the life of the whole in all its mem-
bres and in all its motions, and it accompanies and the pro-
gress of the universal reason throughout all its infini-
tude wanderings. Man is himself divine. His soul is
a "vital spark of heavenly flame"—"particula celestis
aerial." It is a spherical flame proceeding from the
fiery ethereal sphere. In every one dwells a genius,
but the angel, or the god, is only good. "Homo
vir sine deo mero est" (Seneca, Epist. xii, 2.1)
With all these gradations, the unity of the Deity and the
unity of the universe remain unimpaired. There is only one existence, the "causa causarum, causa universalis,
animae mundi, mundus"—heat, which was not merely
"a mode of production of the spring, the sub-
stance, of all motion and of all change" (De Aut-
deo, ii, 9, 24.) The soul and the life of man, two po-

tencies united in one force, are themselves material. It is a "ferry particle."

"Ignis est ollis rigor et cælestis origo."

It is an efflux of the divine ether, as its reason is the procedure of the universal reason. It goes through its career, accompanying and animating the other matter with which it is conjoined. When its native ardor is chilled by time or consumed by action or subdued by circumstances, its corporeal alloy becomes decomposed, and it is exhaled into the circumambient air. Its subsequent history was variously conceived by different teachers of the school. Some maintained its immortality; others denied it (Cicero, Tusc. Disp. i, 31, 77). Some held that its absorption into the general body of the Divinity was immediate and universal. Others believed that such immediate return to its source was limited to the gods of the perfect, and that other souls passed through an elevated purgatory and were "purified so as by fire." Others, again, held that the spirits of the blessed dwell in the stars, and surveyed from those lofty seats the scenes of their terrestrial experiences, awaiting the grand consummation, when they, with all the worlds around them, should be reunited to the univestis. Thus they asserted the doctrine that the souls of Stoic sages were swallowed up in the ocean of Divinity; and that the rest rotted with their "tinements of clay" in "cold obstruction's apathy." Every possible variety of opinion was entertained. Seneca's views, as on most of the tenets of the creed, are largely eclectic and synthetical. They are modifications of the Stoic doctrine and are impregnated with Platonism. They are always rhetorical, and usually careless of philosophical consistency.

Of course, under the reign of fate and of absolute law, the freedom of the will must be denied. A delusive freedom of the will was, however, imagined; and the will was supposed capable of self-determination by voluntary acquiescence in the necessity to which it was subjected. Freedom was entire submission to the law of nature and the compulsion of fate. Such, too, was the freedom of the Divinity: "semper par, semel just." It was the same sort of freedom which is conceded to the will by Spinoza; but it is sufficient as an apparent and precarious basis for the Stoic resolution. If there is no freedom of will or of action, and if everything proceeds from intrinsic necessity and is controlled by fate, evil can have no positive or real existence. Physical evil is, with Zeno, the incompleteness or imperfection which is requisite to the perfection of the whole. Moral evil was admitted as a necessary part of good, and as a consequence of the inharmonious admixture of constituents in humanity. But it was maintained that there was no evil for the virtuous; that "all things work together for good to them that love God," and that the good and wise man is wholly impeccable.

III. Ethics. From the nature of man and the nature of evil, the transition is immediate to the domain of morals, which is occupied with the proprieties (πάθα καταστάσεως) of human conduct. This part of the doctrine constitutes the essence of the Stoic scheme. It was prosecuted by the sect, in theory and practice, with every greater earnestness than by their Cyrenaic predecessors, of whom it was said:

"Το θέμα ήταν πάντα οινομα διόκτενος καταστάσεως."

For this branch all the rest of the elaborate Stoic system was devised. Nevertheless, it was treated with much diversity by different leaders of the school. The divisions of the subject were numerous and varying; often painfully minute, and frequently irreconcilable with each other. There was looseness of distribution, as elsewhere in the Stoic system, and needless refinement in the intricate distinction of moral subdivisions. We are expressly told, as might easily have been conjectured, that the subject was more simply treated by Zeno than by Chrysippus and the followers and imitators of Chrysippus. The leading topics, and these alone can claim our attention here, are essentially the same. They are the "sumnum bonum," or highest good; the Stoic theory of life (πράσινο); the regulation of the passions; and the ordering of the life. The highest good, with which the ultimate aim of life connects itself, is true happiness and its prosecution. Herillus made this scope or end knowledge, deviating in this regard from the general opinion of his sect (Cicero, De Fin. v, 25). Happiness can be attained solely by conformity to the nature of things; and under the wise and willing obedience to the operations of universal law. Happiness is inevitable; but the wise and good man yields it with full consent; the fool and the knave vainly resist it ("Μελιος est ire quam ferri"). Law is equivalent to good, and good to law. The good, the useful, and the proper are necessarily identical. All things are good that tend to the attainment of the supreme good; all things are evil that oppose or obstruct its attainment. There are only two contrasts, "bonum et turpe;" all good things are equally good. There is no distinction of things evil; all are equally bad. He who violates one titlle of the law violates the whole law. The only opposition is between the good and the bad. But the manifesting unifornity, this hard antagonism, could not be manifest in the practical experiences of life. A system of accommodations was demanded. An intermediate term was accordingly introduced. A large class of accidents and actions—health, wealth, strength, honor, station, influence, etc.—was placed under the wide head of things indifferent (αδιάφορα). This relaxation was greatly advanced by his pupil, Aristotle, and the school. Things indifferent might become either good or evil, according to the use which might be made of them, or the service which they might be apt at any time to render. Whenever they were instrumentalities for the attainment of the "sumnum bonum," they were good; when they prevented or impeded its attainment, they were bad. When they did neither, they remained colorless and neutral. There were many distinctions, subdistinctions, and quasi-distinctions in regard to indifferent things which must be passed over. There was manifold, but not very important, diversity of opinion in regard to things indifferent. Ingenious efforts were continually made to divide.

A hair 'twixt south and south-west side."

The Stoic austerity and cavilliation, the Stoic legende-main with words and principles, and the infinitesimal diversifications of the sect were not particularly numerous than in the department of ethics. The Stoic school furnishes a singular anticipation of theological casuistry. Its acute but misapplied distinctions and contradistinctions find a counterpart in the controversies between the Franciscans and the Pratricelli about the interpretation of the Mendicant vow of absolute poverty. Happiness, the great aim of life, can be hopefully pursued only by the constant observance of the laws of nature: "convenienter naturae vivere" (Cicero, De Fin. iii, 7, 26). This is virtue, conformity to law—

the law of human nature and the law of the universe. It is also the law which God is himself under the law. It is from this conception of the highest and universal obligation of law that is derived the Stoic idea of a "state of nature" and of the natural equality of all men. The latter dogma was, indeed, pressed upon the acceptance of Zeno and of the later Stoics by the cosmopolitan tendencies of the times, and by the predominant estimation and consideration of the moral character of men. It was pressed to an extreme which was singularly at variance with the prejudices of antiquity. The language of Paul on the subject of the claims of slaves is scarcely as strong as that of Seneca: "Servi sunt. Immo homines. Servi sunt. Immo conscius servitutis." Immo humiles amici. Servi sunt. Immo conservi. Si cogitamini, servus sumus; in uteroque licerei fortune" (Epist. v, 47, 1, et vide §§ 10, 11, 15).
STOIC PHILOSOPHY

The accordance with law, the observance of those propensities which are consonant with nature, cannot be considered as complete except from all perturbations and without habitual self-restraint. We are misled by inconsiderate and unregulated impulses which generate passions that blind us to our duties, and "Now melt into sorrow, now madden to crime."

No one is free from such impulses. The vice comes from yielding to them. They are checked and suppressed when reason acts coolly and with assured judgment, and when disciplined habits of thought and feeling have been firmly established. Impulses are rational or irrational according as they are consonant with the dictates of nature or at variance with them. The irrational impulses produce four classes of emotion, springing from defects of imagination and disordered fantasies. These emotions are pleasure, desire, care, fear. Such emotions are mischievous in their tendency and injurious in themselves. Hence, serene feelings, εὐτροφία, were placed in opposition to παθή, or passions. The undisturbed flow of passive and impasive sentiment was termed εὐποια, and was indispensable to happiness.

It must be manifest that the Stoic fatalism, the absolute and unintermittent reign of physical and moral law, the negation of all freedom of the will, render the pursuit of virtue and of happiness an illusion. Thoughts, passions, actions, consequences, are all necessitated. The wise man has only to submit. Such inconstancies are characteristic of the Stoic doctrine. But the doctrine must be received as it has been delivered; for it is alone in the estimation of the sect, and out of the sect there is no assurance of happiness. Moreover, man is a reasoning, yet by no means a reasonable, animal. It would be a bad thing for the world if man were influenced to pursue the right course by no arguments except those that are valid. The imperfections of the Stoic creed did not prevent its exercising a very potent and a very wholesome influence upon the morality of the world.

The man who upholds and practices the Stoic doctrine, who suppresses all earnest feeling and acts in accordance with reason, with nature, and with law, is virtuous, wise, and happy. To him "no evil thing can come." The requirements, it was recognized, transcended the measure of human capacities; for the universal depravity of man is a Stoic tenet, and one which is necessary to the Stoic philosophy. In the experience of life it is necessary to divide the Stoic community, theoreti
cal and actual, into two classes—the proficient and the progressive, the saints and the seekers. In like manner actions are divided into perfect, κατασκευασμένη, and meet, καθάρσισ—s a division proposed probably by Zeno himself (Diog. Laert. vii. 22). The wise man is admitted by the Stoics to be, like the "summos orator" of Cicero, a dream—an ideal:

"A faultless monster which the world ne'er saw."

To this ideal the genuine Stoic will approximate more or less closely. So far as he approaches it, he will be wise, prudent, virtuous, happy; superior to the accidents of fortune; regardless of the advantages or calamities of life. He may be crushed, but he will not be cast down from his pedestal, but not overcome; dishonored, yet without shame; tortured, yet suffering no evil; mangled, but whole in spirit; in every chance and change, self-centred, self-poised, serene, the same. He will always present a steady and unconquered front—

"Invicta devictum mitem Catenum" (Seneca, passim, v. Index; Cicero, De Fin. iii. 7, 26; Plu-
tarch, Compend. Lib. Deip. etc.; Brucker, Hist. Crit. Phil. i. 399). When troubles increase beyond remedy, when reasonable hope is extinct; when life offers no prospect of better, his condition, his fate, even when weary of existence, the Stoic holds in his own hands the immediate means of redress and escape.

A voluntary death, a dignified suicide, a prompt return to the all-receiving bosom of the universe, puts an end to vain struggles, to insurmountable difficulties, or to the faintness of the flesh (Cicero, De Fin. iii. 18, 90, 61).

Long as this notice has been, there has not been space to enter into the interminable details and developments of the sect. In a word, the Stoics divide the universe into a cosmic pantheism as a religion, especially in the practical aspects of theology or morality; its quaint agreement with much of the language and some of the dogmas of Christianity, can scarcely be overlooked, and merit most serious consideration. They have attracted the regards of many vapid inquirers. The mental divergence between the Divine Plan and the human state, the fatalistic universe separates Stoicism completely from all revealed religion, and brings it, on several sides, into communion with Spinozism; on others, with the material evolution of much recent science. With all its syncrasism, its verbal trickeries, its discords, and its excesses, it was certainly a very significant product of Greek speculation and aspiration. While renouncing human sympathies, it enlarged the narrow sentiment of civic nationality into a sense of universal humanity. It made the whole world one (Cicero, De Fin. iii. 14, 62, 63), and converted friendship from an indulgence into a duty. It extended the conception of law and of moral obligations, and rendered them imperative upon societies and individuals. It checked, reproved, and turned back the growing demoralization of the ancient community; and it was, probably, an efficacious agency in preparing the pagan world for the gradual but rapid acceptance of Christianity.

IV. Literature.—It is unnecessary to refer to the classic authorities and the historians of philosophy. It will suffice to specify, Lipsius, Manuscipt ad Stoic. Phil. (Antw. 1604); Gataker, De Disciplina Stoica (Canterb. 1653); Menagii Obs. ap. Diog. Laert. (Amst. 1692), vol. i. Tischendorf, Führer durch die Antike (3 vols. 1793); Ravaisson, Essai sur le Stoïcisme (Paris, 1856); Id. de la Morale des Stoïques (ibid. 1857); Dourfou, Du Stoïcisme et du Christianisme (ibid. 1863); Mouillet, Le Stoïcisme à Rome (ibid. 1865); Zeller, The Stoics, Epicureans, and Skeptics (Lond. 1870); Wegesnheider, Ethica Stoicorum Recenti Fund. (Hamb. 1797); Scicoppius, Elementa Stoic. Phil. Mor. (Mayence, 1608); Liliæ De Stoic. Phil. Mor. (Altona, 1800); Meyer, Stoic. Doct. Eth. cum Chr. Comparatu (Gotting. 1825); Munding, Die Grundzüge der stoisch. Mor. (Rotterd. 1846); Heintze, Stoic. de Juxtagellae Doctrina (Wittenb. 1861); Id. Stoicorum Praelectiones (2 vols. 1865, 282); Hare, An Essay on Epicurean and Stoic Doctrina (Nuremb. 1859); Thomasius, De Stoico, Med. di Euxinione (Leips. 1672); Sonntag, De Pelagianismo Stoico (Jena, 1700); Zimmermann, Que Ruito Phil. Stoic. et Rel. Rom. (Erlangen, 1868); Laffereire, Mem. sur l'influence du Stoïcisme sur la Doctrine des Juristes Romains. (Paris, 1860); Winter, Stoicorum Parmenianae (Wittenb. 1863); The Ancient Stoics, in Oxford Essays (1865); Toullotte, Hist. de la Phil. des Emp. depuis César (Paris, 1892). See Stoics. (G. F. H.)

STOICISM AND CHRISTIANITY. The Stoics and Epicureans, who are mentioned together in Acts xvii. 18, represent the two opposite schools of practical philosophy which survived the fall of higher speculation in Greece. See PHILOSOPHY, GREEK.

1. Biblical Connection.—The principles of these sects require notice under this head only in so far as they are related to the teaching of the apostle, who, we are told, was regarded .as theouched-forth of spiritual gifts, because he preached to them Jesus and the resurrection. The doctrine of the resurrection of the body, or even of the immortality of the soul, would indeed be fundamentally at variance both with the materialism of the Epicureans and with the pantheism of the Stoics.

The idea of the resurrection of the body, or even, by other substances, a body composed of atoms, naturally concluded that it was resolved by death into its constituent ele-
STOICISM

De l’It. Beata, 112: "Laudant enim (Epicurei) ea quibuscumque bene Cebes et viro gloriamur," Phil. iii, 19: "Quorum... gloria in confutare eorum." Ind. i, 15: "In regno salutis annos: Deo parere libertas est." Epict. Dēm. ii, 17, 22: "Iviē mānīn Dēi Sēla ὡ ἢ τοῦ ζωῆς..." Anton. vii, 74: "mū inūs kūmē ψυχομενον εκ ψυχῆς." But the morality of Stoicism is essentially based on pride, that of Christianity on humility; the one upholds individual independence, the other absolute faith in another; the one looks for consolation in the issue of fate, the other in Providence; the one is limited by periods of cosmic ruin, the other is consummated in a personal resurrection (Acts xvii, 18). But in spite of the fundamental error of Stoicism, which lies in a supreme egoism (Seneca, De Vit. Beata, § 8: "Incorruptus vir sit externis et insuperabiles miratorque tantum sui, idem animo atque in utrumque paratus artifex vitae"), the teaching of this school gave a wide currency to the noble doctrines of the Fatherhood of God (Cleanses, Hymn, 31-38; comp. Acts xvi, 28), the common bonds of mankind (Anton. iv, 4), the sovereignty of the soul. Nor is it to be forgotten that the earlier Stoics were very closely connected with the East, from which much of the form, if not of the substance, of their doctrine, had been derived. Zeno himself was a native of Cithium, one of the oldest Phoenician settlements. See CHRIStian. His successor, Chrysippus, came from Soli or Tarus; and Tarus is mentioned as the birthplace of a second Zeno and Antipater. Diogenes came from Seleucia in Babylonia; Apamea in Syria was the birthplace of Epicurus from the Phrygian Hierapolis (comp. Sir A. Grant, The Ancient Stoics, in Oxford Essays [1858], p. 82).

3. Literature.—The chief ancient authorities for the opinions of the Stoics are, Diog. Laert. vii; Cicero, De Fin.; Plutarch, De Stoic. Repugn.; De Plac. Philos. adv. Stoic.; Sextus Empiricus; and the remains of Seneca, Epistulae Morales, Epistulae Moralia. The first four books of the Meditations of M. Aurelius, has traced out with the greatest care the parallels which they offer to Christian doctrine. See also Walch, De Stoicorum cum Paulo Diatessaron (Jena, 1759); Zeller, The Stoics, Epicureans, and Skeptics (transl. from the German by Beichel, Lond, 1870). See also STOIC PHILOSOPHY.

STOICISM (στοικία), Acts xvii, 18), a notable and well-known Greco-Roman philosophy, was, if anything, the most influential and important of the schools after Socrates, entitled to claim descent from Socrates. The contents of the Stoics with the other Socratic schools, and especially with the Epicureans, who devoted most widely from Socratic teachings, filled a large space in the intellectual history of Greece after the loss of Greek independence. The antagonism was continued under the declining Roman Republic and under the earlier Empire. During the reign of the Caesars, Stoicism became no more prominent than it had been before, and assumed the complexion of a political opposition and of republican aspirations or regrets. It lengthened the imperial throne in the person of Marcus Aurelius, and thenceforward gradually faded away into neglect and insignificance, being completely eclipsed by the Neo-Platonic school when not supplanted by Christianity. Simplicius, writing in the reign of Justinian, remarks that the systematic instruction, or school tradition, and nearly all the writings of the Stoics had vanished. Yet if the etrusc Cassius be considered the statesman with the emperor Marcus Aurelius, the Stoic doctrine had maintained a vigorous existence, and had exercised a wide dominion over the minds of men, for nearly half a millennium. It had been distinguished during its long duration, not only by numerous names eminent in the chronicle of speculation, but more essentially by the character of many persons prominent in public life, such as Blosius, Cato, Brutus, Seneca, and Marcus Aurelius. The better part of Roman society, in both the republican and the imperial age, was profoundly impressed with Stoic doctrine and Stoic discipline. It attained that evidence...
Stoicism produced its Roman poets in Manlius, in Lucan, and in Persius. It promoted the morals of the Roman world through the Offices of Cicero, the writings of Seneca, the Oedipus of Epictetus, and the letters of Epictetus to a disciple of the young Antonine. It suggested to Roman jurists the conception of general and systematic law. It furnished principles, axioms, theories, and tendencies to the renovated Roman law, and largely affected its scientific development. Through the agency of the Roman law it has penetrated into every part of the world. Whether this doctrine is called "law of the state", or the "state of nature" is proclaimed, or the dogma is alleged that "all men are born free and equal," Stoic Fantasies are revived, without their origin, their import, their application, or their restrictions being suspected. The philosophy of the Stoics, eo nomine, disappeared with the growth and ascendency of Christianity; but the influences of Stoicism survived, in changed guise; its spirit and its terms reappear in Christian theology, and continue to operate on the minds of men even in the present times. There has never been an age, since the Antonines, when Stoic doctrines and Stoic sentiments and Stoic austerities have not claimed, with altered face, but with the ancient arrogance, the admiration and adhesion of the world. It is not a little singular, too, that in this closing 19th century, even the most extravagant dogmas of the visionaries of the Porch find a counterpart in the scientific fantasies of Huxley, and in the cosmical reveries of Helmholtz and his fraternity. The modern fever, the long protracted skins, the enervating influence, the recent though partial revival, of Stoicism can be accounted for only by recognising its peculiar consonance with the characteristics of the times when it appeared; its adaptation to the needs or appen- tancies of subsequent generations; its agreement with the healthy tendencies or the morbid aspirations of the human heart; and the recurrence, in our day, of social and intellectual conditions analogous to those which en- gendered or favored the speculations of Zeno and his followers.

1. Origin and Development.—1. The sect of the Stoics was founded at Athens by Zeno of Citium, in Cyprus, a town which was, in part at least, of Phoenician origin. Zeno himself has been, at times, suspected of having had Asiatic blood in his veins. The institution of the new heresy must be assigned to the close of the 4th century before Christ, or to the beginning of the 3d. There is such a total absence of contemporary information, such a dearth of authentic testimony, and so many discrepancies, when we regard dates, events, and incidents cannot be reported with exactness or with confidence. According to certain tradi- tions, the father of Zeno was a merchant engaged in a regular and lucrative course of trade with Athens, who was in the habit of bringing back from that city the writings of eminent Athenians and other Greeks for the instruction and edification of his son, whose studious inclinations had been early manifested. The son was, in the course of time, sent to Athens in charge of a cargo of merchandise. Having arrived in that still brilliant city, either after a prosperous voyage or after a shipwreck, he fell in with a copy of Xenophon's Memorabilia, and was fascinated with the delineation of Socrates and of the Socratic disputations. He determined to devote himself exclusively to the pursuit of philosophy; and of Citium, of Cyprus, and of his father nothing more is heard. Disposing of what property remained in his hands, whether much or nothing, and either distributing the remainder among his friends or retaining it himself, he set out for the traditions vary and are altogether inconsistent—he attached himself at first to the Theban Crates, the chief of the Cynic school at that time. He was re- pelled, however, by the coarseness, vulgarity, filthy hab- its, and arrogant ignorance of the Cynic tribe; and for

The restoration of political and social health to his city and to his fellow-citizens was his chief aim. The same purpose may be discerned throughout the writings of of Stilpo the Megarian, and also of Diodorus the dia-lectician. He attended through a whole decennium, it is said, the instructions of Xenocrates, then the schol- arch of the Academy, and afterwards those of his suc- cessor, Polemo. It is difficult to find time in Zeno's life for this prolonged education. Yet the amount of truth in- volve the amount of truth contained in such reports. The variety of instructors assigned to Zeno, and his os- cillations between different schools, may be only a con- jectural and retrospectively interpretative of the composite character and frequent inconsistencies of his doctrine. A pretty amount of the old has been retained, first in a more simple and intensified range of knowledge. Having asked the oracle how he should secure the best mode of life, he was told to become of the same color with the dead. Hereupon he devoted himself to the perusal of the older authors. The wide range of sources whence he borrowed his scheme of philosophy may be implied in the title. His doctrine was compounded from materials derived from many schools. "Stoic fures" was a jesting re- proach in antiquity that acquired the currency of a proverb (Cicero, De Fin.). The sect was certainly an offshoot from the Socratie school. It took much from previous systems. It always retained a close affinity with the Cynics, and at times, in particular persons, was almost identified with them. Its logic it received from the Peripatetics, extending it into many bewilder- ing refinements. Its cautious and incessant disputation, its dry argumentation, its nugatory hair-splitting, its "ratio culcusa" and "inipie", and "verborea conserva- tiones," with all the other subtleties of "subtle vel opes- simi" [Cicero, De Fin. iii. 113], it borrowed from the Megarian. From them, and particu- larly from Stilpo, it received its exclusive consideration and estimation of virtue. Its physical principles it took partly from Pythagoras and largely from Heraclitus, who communicated to it the belief in the ultimate con- duction of the world and other characteristic topics. This diversity of obligation, and the strange syncretism which proceeded from it, direct attention to the general character of the Stoic innovation, and to its peculiar re- lations to the political, social, and intellectual condition of the age in which it transpired.

In the full tide of modern progress and of vigorous civilization, it is difficult to form an accurate and ade- quate conception of the disdain, despondency, and hope- lessness which overwhelm with gloom the minds of eager, active, and intelligent men when the course of political development is suddenly arrested and crushed beneath the rule coercion of military power and alien power. In a condition where the Greeks left after the amazing victories of Alexander the Great and the establishment of Macedonian domination or Macedonian influence. The memory of political independence and of free political action became a vain regret. The hope of renovated liberty was a tormenting dream, and most of us have rapidly elided away with the constant repetition of disheartening experiences. Political dejection, polit- ical indifference, or political servility was substituted for the violent but earnest and inspiring conflict of parties in a free state. At the same time, the vast extension of Hellenic domination over new lands, strange people, and ancient civilizations crossed curiosity, introduced the knowledge of foreign habits of thought, and brought Asiatic tradition and Asiatic speculation within the sphere of Greek intelligence. Coincidently with these potent agencies of intellectual change the splendid sys- tems of the great chiefs of the Socratic school reached a sudden and complete cessation, the world and other characteristic traits of political life and public morals by investigating the foundations of truth, discovering a basis for knowl- edge, and thus securing the rectification of principles.
his brilliant disciple, Plato, as the \textit{Republic} and the \textit{Laws} may sufficiently attest. \textit{See Plato; Socrates.} A like design, but with broader views and with less regard to particular applications, may be ascribed to Aristotle; though his alien nativity, his restless pursuit of all knowledge, his marvellous comprehension and systematization, may disguise the tendency, and may have disguised it even to himself. Still, the moral bearing and the political direction of the inquiries of Socrates, Plato, and Aristotle can hardly be missapprehended. It is a curious confirmation of this prevailing direction of thoughts that Zeno’s first work, composed before his separation from the number of his master’s students, is \textit{Stoic Schools}. This was, perhaps, the last marked manifestation of the spirit of an age that had passed away. It should be noted, too, that ethics, as such, had constituted a large part of the meditations of Socrates, Plato, and Aristotle, and had been prominent in secondary schools. The reformation of morals had been the immediate design of Socrates, and the impulse communicated by him had not ceased to operate. Indeed, the necessity for moral reform had greatly increased since Socrates urged the Athenians to a just and pure life. The crimes, the treacheries, the frauds, the greed, the selfishness, the rapacity, and the sensuality of the Greeks had been much increased by the tribulations of the Peloponnesian war and Critias; they had assumed larger proportions and greater disregard of restraint. The plundering triumphs of Alexander; the sack, spoliation, or oppression of cities; the acquisition of thrones, principalities, dominions, powers, and fortunes by the companions and followers of Alexander, raised the hopes of the enterprising and lowered their principles. If, in the days of Socrates, the reformation of knowledge was requisite for the reform of the State, after the Macedonian supremacy there was scarcely any State to be reformed. The reformation must, therefore, be restricted to private morals and to private life in order to redeem society or to insure individual improvement. Even this tendency had been already exhibited. The spirit of the approaching age is always anticipated, for “coming events cast their shadows before.” Aristippus, the pupil of Socrates, preceded Epicurus in presenting pleasure as the object of life; the Megarians gave nearly all their solicitude to ethical precepts and practices; and Antithenes, the founder of the Cynics, was before Zeno in proclaiming indifference to worldly honors, worldly cares, and every indulgence to be the essence and substance of wisdom. In the confusion or cessation of political life, in the crash of the brilliant organizations of the past, in the growth of a new spiritual heathenism, the case or dignity of individual existence naturally engaged the attention of innocent natures and of original and inquiring minds. Earlier speculations might be continued—expanded rather than advanced; but the yearning anxiety of the time, and the “regnum futuri,” centred in the individual, and sought escape both from political domination and social corruption. The need of moral satisfaction and of spiritual solace was, of course, augmented by the decay of effectual belief in the creed of polytheism.

Such was the condition of the Hellene world when Zeno and Epicurus almost simultaneously appeared with antagonistic schemes, as with diverse temperaments, to institute new systems of philosophy, which long rivelled the Academies and Peripatetics, and divided the mass of intelligent and dissatisfied men between their contending schools.

It would be very instructive to investigate the manner in which new schools of philosophy established themselves. The advantage and the disadvantage of the time and the inquiry are widely scattered, and they are neither abundant nor distinct. The process seems to have been both irregular and fortuitous. It bore much resemblance to the institution of new religious orders in the Middle Ages; to the gathering of vast congregations of disciples by illustrious schoolmen; and to the generation of new sects and separatist churches in our time. An ardent or ambitious student, earnest in the pursuit of truth, or consumed with the desire of notoriety, full of self-confidence, and stubborn in his convictions, finds himself at variance, on some points of greater or lesser importance, with the teachers whom he has long attended; or is taken into the fold of some like Laocoon, and has been deceived at last. He ventilates his doubts; he discusses his differences; he argues, he extends, he corroborates, he systematizes his opposition; he draws around him others who have experienced the like dubitations, or who catch the same infection from his own vehemence; and, as the number of his adherents acolytes increase, the desire and the demand for fuller and more original and more pronounced assertions of differences, and for the consolidation of the dissidents into active forces, and provoke the establishment of a new congregation. A place of meeting and of formal instruction is sought out, and the groves of Academicians, the shady walks near Athens, an open colonnade, a pleasant and retired garden, a retreat in the mountains, forests, or meadows, or a new meeting-house, give “local habitation and a name” to a school of philosophy, a monastic order, or a modern sect. That Zeno, during his long peregrination through the existing heresies, was speedily led to contemplate the institution of a new school is not only what the institution is attributed to Polemo: “It does not escape my notice, Zeno, that you, in your Phoenician garb, are gliding through the gates of others’ gardens and stealing their doctrines” (Diog. Laert. vii. 25).

By whatever motives induced, or by whatever circumstances favored, Zeno established a new school at Athens. At what time this occurred cannot be definitely ascertained. According to some accounts, he was thirty years of age when he reached Athens, and attended philosophers of high repute for twenty years. But the chronology of his life is uncertain and confused. The beginning of the 3rd century before Christ may be taken as the approximate date of the foundation of his school. This school maintained itself successfully against older and later competitors. It ministered to a latent and growing want. The character and bearing of the teacher gave weight to his doctrine and secured respect. He devoted himself and his instructions, with earnest assiduity, to the inculcation of individual morality and personal purity. Retaining the Cynic aim and the Cynic abstemiousness and self-sufficiency, he divested Cynicism of its coarser, more ignorant, and more offensive characteristics. He taught his hearers to seek contentment and satisfaction in conscious rectitude of thought, feeling, and conduct; to recognise toil and to deny toil as the appropriate and necessary duty; to contend indulgences; to resist temptations; to endure with serene disregard the accidents of life; and to maintain the same unswerving equanimity in adverse and in prosperous fortune. Whatever opinion may be entertained in regard to the invalidity of his theories or the hypocrisy of members of his sect in later days, he rendered an important service to his own and to subsequent generations by winning men from the abounding infamies of the time, and guiding them to the pursuit of honesty, integrity, justice, unsellosity, and personal propriety of sentiment and action. During his extended career as a teacher he earned the cordial regard of his fellow-citizens (or rather of his fellow-inhabitants of the same city, for he refused Athenian citizenship) and of his contemporaries. Antigonus, king of Macedon, attended his lectures, and invited him to his court; Zeno excused himself on account of his age, but sent two of his disciples to represent him. Another pupil, Sapphus, is illustrated by an anecdote which an Athenian historian related. The Athenians honored him with a panegyric, a golden crown, a statue, and a public tomb: “because he had exercised his vocation in Athens as a philosopher for many years, demeaning himself as a truly good man in all the offices of life; because he had trained to virtue and sobriety the youth who had resorted to him for in-
2. The disciples of Zeno were at first called *Zenomai,* after the master. They received the name of *Stoics* from the painted porch (*stoa poteia*) at the northwestern angle of the Agora, in which they were accustomed to assemble for instruction.

The numerous changes in the Stoic doctrine, and, still more, the variations and oscillations in the exposition of that doctrine, readily explain the disappearance of the works of Zeno and of the other chief exponents of the school. These changes were themselves due to the imperfections and inconsistencies in the system which resulted from its systole (system) and diastole (dissolution), and from the partial dissent and frequent recantations, and repeated attempts at systematization. Its very defects, however, rendered it pliant, and easy of adaptation to the changing sentiments and the altering needs of successive generations, and thus maintained its vitality and increased its adaptability to dissimilar ages and circumstances. Aristocles, another of the pupils of Zeno, manifested Cynic proclivities. He did not accord with the wider range of his master's expositions, and deviated widely from his teachings. Herillus of Carthage, another pupil, approximated more closely to Plato and to the Peripatetics, and subordinated the acquisition of virtue to the attainment of knowledge which should lead to virtue. Cleanthes, another disciple, and the immediate successor of Zeno in the direction of the Stoic school, differed from the founder in many important respects. The pupil and successor of Cleanthes, Chrysippus of Soli, modified, harmonized, enlarged, and reorganized the doctrine of the Porch to such an extent that the saying became proverbial.

*Εἰ μὴ τὰς ἡμᾶς ψυχὰς, ἐνὶ ἐν τοῖς (unless Chrysippus had lived, there would have been no Stoic school). He treated all the departments of philosophy, and treated them with fulness, ingenuity, and minuteness. To Stoic dialectics, however, he rendered such signal services as to suggest the eulogistic remark, *εἰ πάρα τοίς ἐν ψυχήποις ὄλη ἐν τοῖς ἀλληλομορφιᾶσιν* (if the gods had any art of dialectics, it could be no other than that of Chrysippus). In consequence of the completion and reintegration of Stoicism by Chrysippus, the phrase *Chrysippus gymnasium* is employed by Juvenal to designate the Stoic system. Aristocles of Chios had confined philosophy to ethics, and Panaitius of Rhodes, near the close of the 2d century B.C., gave his chief attention to this branch, and furnished the substance of the celebrated treatise of Cicero *De Officiis.* Poseidonius, the pupil of Panaitius, and his successor in the Rhodian school, was distinguished for the variety of his knowledge and for the extent of his information. The citations of Athenaeus manifest the wide range of his intelligent curiosity. His collections and researches in natural history and other departments of natural science supplied Seneca with materials for his *Natural Questions,* one of the most curious of the surviving treasures of antiquity. Poseidonius numbered many eminent
Cynicism. Yet, with all its fluctuations, it became more influential than ever in regulating moral conduct, or, at least, moral professions, and in determining moral sentiments. With the progress of time and the enlargement of social relations and conditions, it became more of a religion than of a philosophical theory. Its teachers became preachers; its instructions resembled homilies; its assemblies were like congregations of religious worshippers. Throughout its whole duration, unity of spirit and consistency of moral tone were more regarded than uniformity of doctrine. Such unity and consistency, while the philosophic doctrine became lacier in details, became more rigorous in its professed discipline. It was thus able to offer itself as a pagan competitor to the rising Christianity. With the growth of the new religion it gradually waned, its discrepancies, discord, and intestine controversies destroyed its authority by dividing its followers. Its extravagances and absurdities, and its want of any tenable philosophic basis, rendered it impotent in conflict with the new revelation. In its later period it borrowed much, undoubtedly, from Christian teachings; but it borrowed in vain. It was “impar congresus Achilli.” The very consanguinity of its teachings with Christian precepts was fatal to it in the contest which had so long demonstrated the victory of its rival. Yet whatever changes it underwent in its successive developments, it retained throughout its well-marked character as an authoritative scheme of ethics. The Stoics may, accordingly, be regarded as the precursors of the Christian faith in the department of practical morals, and as having prepared the path and made smooth the way for the progress and reception of its heavenly successor.

II. Later Teachers.—The regular “catena Stoicorum” extended only from Zeno to Jason, a period of two centuries and a half. Zeno was said to have guided his school for fifty-eight years. Among the numerous pupils of those long years are specified Cleaneus of Assos, in the Troad; Ario of Chios; Herillus of Carthage; Perseus of Citiu, a slave of Zeno; Aratus of Soli; Dionysius of Heraclea, in Pontus; and Socrates of Bosporus. Clearness was the immediate successor of the founder, and retained many of his fellow-disciples in the school. A very beautiful and most characterizable hymn, addressed by him to Jove “of many names,” has been preserved, and is our most valuable relic of early Stoicism.

2. Chrysippus of Soli (B.C. 290-206), the reformer and renovator of the Stoic creed, succeeded Cleaneus. He was singularly perspicacious and of indefatigable industry. The works which he composed are said to have numbered seven hundred and fifty. Among his more noted disciples were his nephew Aristocreon, Teles, Eratosthenes, and Boethus.

3. Zeno of Tyrus.

4. Diogenes of Alaces.

5. Antistitus of Tenea, among whose pupils was Blosius of Cumae, the teacher and friend of Tiberius Gracchan.

6. Pananius of Rhodes succeeded him, and died before A.C. 111. He had several noble Romans among his hearers, including Scipio Africanus, according to the declaration of Cicero.

7. Posidiumus of Apamia (B.C. 135-51) succeeded his preceptor Pananius, and was the last illustration of the formal Stoic school. He taught at Rhodes, where his lectures were attended by Pompey and many other eminent Romans of that day. By their persuasions he was induced to remove to Rome at a very advanced age. He lived to the age of ninety, which he regarded as sufficient for the accomplishment of his great design.

8. Jason, his grandson, the last of the Stoic succession, with whom the history of the school, as such, closes; and with whom, likewise, Zeller’s account of the Stoics proper terminates.

III. For the doctrine of the Stoics, see Stoic Philosophy.

IV. Literature.—To the works mentioned under this IX. C. V...
In 1790 he consummated a second marriage (with Sophia, countess von Rettern), and soon afterwards undertook a trip to Italy, which led him to Münster andexposed him to the influences that determined him to goover to the Church of Rome. He found at Münster atype of Catholicism in which the Christian element wasprominent and the Roman element not unpleasantlynoticeable. Princess Gallitzin was its leading repre-resentative, and the principal agent in persuadinghim to make the desired transfer. The journeycontinued to Rome, where he was profoundly stirredwhile witnessing the celebration of the mass by popePius VI, and filled with admiration for the pontiff onbeing admitted to an audience. He met the brothersDronze, who had been recommended to him by thepapal nuncio, and who adored Rome and the Church,and endeavored to persuade him in this direction. Hewent to Eutin, and entered on the performance of his duties as president of the government in the spring of 1795. The Münster coterie were from this period in regular communication withhim, while his Protestant friends of former days weregraddually alienated. In 1798 he notified the govern-ment that he intended to resign his offices, and inthe same year he visited the Moravian community, tofind, if he could, among them the peace and rest forwhich his soul longed; but he at the same time sub-mitted the resignation of which he was dispossessed by the exiled bishop of Boulogne, and received a reply in consonance with his desires. The transition to the Church of Rome was made on June 1, 1800, in theprivate chapel of princess Gallitzin. The reasons whichdetermined Stolberg's action may be reduced to three:1. A bald, cold, unsatisfying rationalism was in control of the evangelical churches. The formal principle of Protestantism, submission to the Bible, was loudly pro-claimed, but the demands of reason allowed very few scriptural truths to stand. So emotional a nature as Stolberg's could never rest content with such a state of affairs. 2. Stolberg lacked the keen intellect and resolute which might have fitted him to find and ap-ple the remedy for the evils which he saw, as his highstation would have enabled him to do. He was simplya man of feeling, and, in addition, a weakling who could enduralot of controversy, though it might assume nogreater proportions than an adverse discussion of his taste for Rome and the principal agent in persuadinghim to make the desired transfer. The Münster Catholicsdrew their inspiration from the Bible and the Christian mys-tics, and made the person of Christ the centre of their religious life. On Sept. 28, 1800, Stolberg, having re-signed his official position, removed from Eutin to Mün-stermine, and met every literary action with some at-tention to the classics, but devoting himself more es-sentially to religious work. In 1808 he published Au-gustine's De Vera Religione and De Moribus Eccl. Catho licis in German, and also composed the inscription which was placed on the stone over the grave of Klop-stock (q. v.), who had been the friend of his youth. Stimulated by C. A. Dronze (q. v.), he began a Geschich-te der Religion Jesu Christi, of which fourteen volumesappeared between 1806 and 1818. His patriotism in these later days was as evident as it had been in his youth. The freedom of his expressions led to his be-ing placed under surveillance by the French invaders in 1813, and when the German revolution took place in1813 he gave four sos to the army, and composed a number of patriotic hymns. But his day was almostover. The labor required for his history was exhaustinghim. He turned his attention wholly upon the Scriptures, and wrote two edifying volumes entitled Be-teufelder in der heiligen Schrift, a life of Vincent de Paul, and a work styled Biicher der Liebe, with which he closed his life. He died Dec. 5, 1819, call-ing with his dying breath on the "Mother of God," and placing confidence in the intercession of saints, but, after all, drinking in comfort and strength from the solidpromises of the Scriptures. This, indeed, was the per-sonal and particular of Gallitzin, that it was in themain, not Roman, but scriptural. His last words were"Blessed be Jesus Christ." See Nicolov, F. L. Giusaffa Stolberg (Mayence, 1846); Von Bippen, Eutiner Skizzen, etc. (Weimar, 1859); Goethe, Wahrheit und Dichtung, xviii; Voss, in Paulus's Sophronismus. Wie ward Fr. Stolberg ein Unfähiger (Frankfurt a. Main, 1849); Stolberg, Kurze Abfertigung, etc. (Hamb. 1890); Kater-kamp, Leben der Fürstin Anna von Gallitzin (2d ed. Münster, 1899); Schott, Voss u. Stolberg, etc. (Stuttgart,1850); Gesammelte Werke der Brüder Stolberg (Hamb. 1825 sq., 20 vols.).

Stole (στόλα), a Greek term for (1) a vestment or garment; (2) a vestment reaching to the feet, and worn by bishops and priests. This garment was originally of white linen, but so early as the beginning of the 7th century some of the younger clergy of Spain had taken to "colored oraria" decked with gold, and were not even content with one only. See Marriott, Vestiarium Christianum, p. 215.

In more recent times the stole is a narrow band of silk or stuff, fringed at the ends, and worn by bishops and priests. This garment was originally of white linen, but so early as the beginning of the 7th century some of the younger clergy of Spain had taken to "colored oraria" decked with gold, and were not even content with one only. See Marriott, Vestiarium Christianum, p. 215.

In more recent times the stole is a narrow band of silk or stuff, fringed at the ends, and worn by bishops and priests. This garment was originally of white linen, but so early as the beginning of the 7th century some of the younger clergy of Spain had taken to "colored oraria" decked with gold, and were not even content with one only. See Marriott, Vestiarium Christianum, p. 215.

Stole, the Latin name of a garment or vestment used by bishops and priests in the Church. It is worn over the shoulder and is fastened at the back. It is made of silk or wool and is usually fringed at the ends. The stole is a symbol of authority and is used in the administration of sacraments. It is also worn by priests at Mass and during the liturgy. In the Eastern Church, the stole is called orarion, or epitrachelion, and is a long strip of silk or wool that is worn over the shoulder and is not fastened at the back. The stole is a symbol of jurisdiction, and in that sense it is currenly worn by the pope, even when not officiating. The stole is also a custom in Italy, which is customary as to jurisdiction, of the parish priest, after he has administered extreme unction, leaving the stole upon the deceased, not to be removed until the death or recovery of the patient.

The stole of the Eastern priests, called orarion, or epitrachelion, is merely a long strip of silk or wool more than double the width of a Western stole, and with a hole in the middle of the upper part, through which the celebrant puts his head. It has an embroidered band down the middle.

In the Reformed Church the stole is still used under the slightly changed form of the scar (q. v.). Until within the last few years the use of the stole or scar was confined in the Reformed Church of England to bishops, chaplains of the nobility, members of chapters, and graduates in divinity: of late, however, it has been generally worn by the London clergy, though with what authority is not clear. See ORNAMENTS, ECCLESIA STICAL.

Stolzein (στολζειν), a Greek term signifying "to put the chrim robe on a person."

Stomacher (στόμαχος), some article of female attire (Isa. iii, 24), the character of which is mere matter of conjecture. The Sept. describes it as a variegated tunic (χειμώνιον μεσοφόροςος): the Vulg. as a species of girdle (fascia pectoralis). The word is evidently a compound, but its elements are uncertain. Genesis (Theeaur. p. 1187) derives it from στο*.
STOMION

with very much the same sense as in the Sept; Saal-
schutz (Archäol. i, 30) from ἀναγκῇ, with the sense of "undisguised lust," as applied to some particular kind of dress. The latest explanation (approved by Furst and Mahlaun) is that of Dietrich (Sem. Wörterb. p. 290) from the Chal. עונן, fine linoes (עונן, overgar-
ment), with the noun-ending  photoshop (as in בָּשָׂךְ). See ATTIK.

Stomion πολύς αδάων (Xτόμιον πολύων ἄδονος) is the beginning of a hymn attributed to Clement of Alexandria, and is found at the close of his Pedagogue. It is the oldest Christian hymn extant, and is a sublime but somewhat turgid song of praise to the Logos, as the divine educator and leader of the "human race."

The title of the hymn is Γάμος τοῦ Σωτήρος Χριστοῦ, i. e. "Hymn of the Saviour Christ," and it addresses Christ as the leader of the youth, that "he himself may gather them to praise him" (ver. 1-8); then as the shep-
herd and king of the saints, that he "may guide his sheep and rule over them" (ver. 9-22); and, finally, as the Eternal Word, whose footsteps lead to heaven (ver. 29-58). The first part runs thus in the original Greek:

There are three English translations of this hymn: one by W. Wilson, in the Ante-Nicene Christian Library, vol. iv; Clement of Alexandria, i, 343 sq.:

"Bride of colts untamed,
Over our wills presiding,
Wing of unwandering birth,
Our flight securely guiding.
Rock against an adverse shock,
Shepherd with wisdom tending
Lambs of the royal flock;"

a second by Mrs. Charles, in the Christian Life in Song, p. 44 sq.:

"Mouth of babes who cannot speak,
Wing of nestlings who cannot fly," etc.;

and a third by Saville, found in the Lyra Sacra (Lond. 1865), p. 6, and adopted by Schaff in Christ in Song, p. 675:

For the German translations, as well as for the literature on this hymn, see the very learned article on the contents and structure of this hymn by Prof. Piper, in his Evangel. Kalender for 1868, p. 17-39. (B. F.)

STONE

(usually ὕβρις, den; but occasionally ὕβρις, ὕβρια, both of which are rather a rock; ἀλχαρίς, sometimes πέτρος or ψάριον.) In such rocky countries as Mount Sinai and Syria, stones were naturally of very

frequent reference in Biblical language. See ROCK.

The kinds of ordinary stone mentioned by ancient and modern writers as found in Palestine (q. v.) are chiefly limestone ( Isa. xxiii. 9) especially marble (q. v.) and sandstone; occasionally basalt (Josephus, Ant. viii. 7, 4), flint, and firestone (2 Macc. x. 3). (See Wagner, De Lapidibus Judaeis [Ital. 1724]). See MINERAL.

The uses to which stones were applied in ancient Palestine were very various.

1. They were used for the ordinary purposes of building, and in this respect the most noticeable point is the very large size to which they occasionally run (Mark xiii. 1). Robinson gives the dimensions of one as 24 feet long by 6 feet broad and 3 feet high (Rex. i, 233; see also p. 284, note). See QUARRY. For most public edifices hewn stones were used. An exception was made in regard to altars, which were to be built of unhewn stone (Exod. xx. 25; Deut. xxvii. 5; Josh. vii.

31), probably as being in a more natural state. The Phoenicians were particularly famous for their skill in hewing stone (2 Sam. v. 11; 1 Kings v. 19). Stones were selected of certain colors in order to form orna-
mental string-courses. In 1 Chron. xxix. 2 we find enumerated "onyx stones and stones to be set, glistering stones (lit. stones of gee-patul), and of divers colors (i. e. streaked with veins), and, all manner of precious stones, and marble stones" (comp. 2 Chron. iii. 6). They were also employed for pavements (2 Kings vi. 17; comp. Esth. i. 6).

2. Large stones were used for closing the entrances of caves (Josh. x. 18; Dan. vii. 17), sepulchres (Matt. xxvii. 60; John xi. 38; xx. 1), and springs (Gen. xxix. 2).

3. Flint-stones (נָכַר or נָכָר) occasionally served the purpose of a knife, particularly for circumcision and similar objects (Exod. iv. 25; Josh. v. 2; comp. Herod. ii. 86; Plutarch, Niches, 18; Catull. Carmina, lix. 5). See NIPHA.

4. Stones were further used as a munition of war for sling-shots (1 Sam. xvii. 40; 49), catapults (2 Chron. xxvi. 14), and bows (Wis. v. 22; comp. 1 Macc. vi. 53). Also as boundary marks (Deut. xix. 14; xxvii. 17; Job xxiv. 2; Prov. xxiii. 28; xxviii. 10): such were probably the stone of Bohan (Josh. xv. 6; xviii. 17), the stone of Abel (1 Sam. vi. 15, 18), the stone Ezol (xx. 19), the great stone by Gibeon (2 Sam. xx. 8), and the stone Zooleth (1 Kings i. 9). Finally as weights for scales (Deut. xxv. 13; Prov. xvi. 11); and for mills (2 Sam. x. 21).

5. Large stones were set up to commemorate any remarkable events, as by Jacob at Bethel after his interview with Jehovah (Gen. xxviii. 18; xxxv. 14), and again when he made the covenant with Laban (xxxii. 45): by Joshua after the passage of the Jordan (Josh. iv. 9); and by Samuel in token of his victory over the Philistines (1 Sam. vii. 12). See PILLAR. Similarly the Egyptian monarchs erected their stèle at the farthest point they reached (Herod. ii. 106). Such stones were occasionally consecrated by anointing, as instanced in the stone erected at Bethel (Gen. xxviii. 18). A simi-
lar practice existed in heathen countries, both in Asia and in Europe (see De Sanclay, Dead Sen. ii, 51, 52; Hackett, Illustra. of Script. p. 102; More, Pillar Stones of Scotland [Edinb. 1865]). See ALTAR. By a singular coincidence these stones were described in Phoenicia by a name very similar to Bethel, viz. betulja (Barto-
lija), whence it has been surmised that the heathen name was derived from the scriptural one, or vice versa (Kalisch, Comm. in Gen. loc. cit.). But neither are the names actually identical, nor are the associations of a kindred nature; the betulja were meteoric stones, and derived their sanctity from the belief that they had fallen from heaven, whereas the stone at Bethel was simply commemorative. See BETHEL. The only point of resemblance between the two consists in the custom of anointing—the anointed stones (λιτοῖς ψυχροῖς, Clem.

Druisdal Stone of Persia.
Alex. Strom. vii, 302), which are frequently mentioned by ancient writers as objects of divine honor (Arnob. Adv. Gent., i, 39; Euseb. Prep. Evang., i, 10, 18; Pliny, xxxvii, 51; Theophr. Char. 17; Pausan., x, 24, 5; see Belermann, "Steine zu salben" [Erf. 1793]), being probably aerolites.

6. That the worship of stones prevailed among the heathen nations surrounding Palestine (see Biedermann, De Lapidum Cultu [Friib. 1749]; Hölling, De Batyl- lus Vett. [Gron. 1715]; Falcone, in the "Mémoires de l'acad. des Inscr., vi, 513 sq. [see Stone-Worship], and was borrowed from them by apostate Israelites, appears from Isa. lvii, 6, according to the ordinary rendering of the passage; but the original (יהיה לולע לע) admits of another sense—"in the smooth (clear of wood) places of the valley"—and no reliance can be placed on a peculiar term introduced partly for the sake of alliteration. The "amon makshith (המון מקשית), noticed in Lev. xxvi, 1 (A.V. "image of stone"), has again been identified with the beriyah, the doubtful term makshith (comp. Numb. xxxvii, 52, "picture," Ezek. viii, 12, "image") being supposed to refer to devices engraved on the stone. See Idol.

7. Heaps of stones were piled up on various occasions as in token of a treaty (Gen. xxxvi, 46), in which case a certain amount of sanctity probably attached to them (Homer, Od. xvi, 471); or over the grave of some notorious offender (Josh. vii, 26; viii, 29; 2 Sam. xviii, 17); see Propert. iv, 5, 75, for a similar custom among the Romans. See Galleri. The size of some of these heaps becomes very great from the custom prevalent among the Arabs that each passer-by adds a stone. Burckhardt mentions one near Damascus 20 feet long, 2 feet high, and 3 feet broad (Syria, p. 46). A reference to this practice is supposed by Gesenius to be contained in Prov. xxvi, 8, which he renders "as a bag of gems in a heap of stones" (Thee., p. 1263). The Vulgate has a curious version of this passage: "Sicut qui mittit lapidem in acervum Mercurii."

8. The "white stone" (q.v.) noticed in Rev. ii, 17 has been variously regarded as referring to the pebble of aquilus used in the Greek courts (Ovid, Met. v, 41); to the lot cast in elections in Greece; to both these combined, the white conveying the notion of acquittal, the stone that of election (Bengel, Gnom.); to the stones in the high-priest's breastplate (Zullig); to the tickets presented to the victors at the public games, securing them maintenance at the public expense (Hammard); or, lastly, to the custom of writing on stones (Alföhr, ad loc.). (See the monographs on this subject, in Latin, by Majus [Glas. 1706] and Dresig [Lips. 1751]).

9. The use of stones for tablets is alluded to in Exod. xxiv, 12 and Josh. viii, 32; and to this we may add the guide—stones to the cities of refuge (Alföhr, ad loc.).

10. Stones for striking fire are mentioned in 2 Macc. x, 5.

11. Stones were prejudicial to the operations of husbandry; hence the custom of spilling an enemy's field by throwing quantities of stones upon it (2 Kings iii, 19, 25), and, again, the necessity of gathering stones previous to cultivation (Isa. v, 2). Allusion is made to both these practices in Eccles. iii, 5 ("a time to cast away stones, and a time to gather stones").

12. The notice in Zech. xii of the "burdensome stone" is referred by Jerome to the custom of lifting stones as an exercise of strength, which he describes as being practiced in Judea in his day (comp. Ecles. vii, 21); but it may equally well be explained of a large corner-stone as a symbol of strength (Isa. vii, 16).

13. Stones are used metaphorically to denote hardness or insensibility (1 Sam. xvi, 37; Ezek. xi, 19; xxxvi, 26, as well as firmness or strength, as in Gen. xlix, 24, where "the stone of Israel" is equivalent to "the rock of Israel" (2 Sam. xxii, 3; Isa. xxx, 29). The members of the Church are called "living stones," as "contributing to that living temple in which Christ, himself, a living stone," is the chief or head of the corner (Eph. ii, 20–22; 1 Pet. ii, 4–8). See Corner-stone.

STONE OF DEDICATION. An original stone, inscribed with the date of dedication, 1192, remains at Clee Church, Lincolnshire.

Stone, Cornelius, a minister of the Methodist Episcopal Church, was born at Jay, N.Y., and after a thorough collegiate and theological education, joined the Maine Conference in 1841. In 1858 his declining health compelled him to abandon the work of the ministry and retire to his paternal homestead. He twice represented his district in the State Legislature. He died at Jay, April 5, 1866. Mr. Stone was highly esteemed as a faithful minister and able and discreet legislator. See Minutes of Annual Conferences, 1865, p. 106.

Stone, Frank, an English artist, was born at Manchester in 1800. He settled in London, and in 1831 was elected an associate of the Royal Academy. Among his religious paintings, Christ and the Woman of Samaria is much admired.

Stone, Isaac, a Methodist Episcopal minister, was born at Hooisach, Kesseler Co., N.Y., March 26, 1817.
He was converted in 1816, admitted on trial as a traveling preacher in 1822, and filled successively the following circuits and stations: Herkimer, Westmoreland, Canajoharie, Otsego, Black River, Stockbridge, Westmoreland, Rome, Verona, and Lowville, N.Y. In 1836 he was made presiding elder of Oswego District; in 1840-47 he supplied Fulton, Weedsport, Potdam, and Watertown stations; in 1847 he was made presiding elder of Adams District; in 1848 supernumerated, after which he was seldom able to preach. He died Sept. 10, 1850. He was distinguished for the depth and genuineness of his humility; he was also a man of great kindness, which was manifested in all his public ministrations and private intercourse with his fellow-men. See Minutes of Annual Conferences, iv. 616. (J. L. S.)

Stone, John S., a Presbyterian minister, was born at Madrid, St. Lawrence Co., N.Y., in November, 1823. He enjoyed the training and counsel of earnest, devoted Christian parents, spent the most of the early part of his life in teaching, studied theology privately, was duly licensed by the St. Lawrence Association in 1852, commenced his labors at Redfield, N.Y., and was ordained by a Congregational Council in 1854. In June, 1860, he became pastor of the church at Au Sable Forks, N.Y., which post he filled with marked fidelity, until he was constrained to enter the service of the United States, and received a captain's commission in 1862. He was killed in his first battle, May 16, 1864. See Wilson, Presb. Hist. Almanac, 1866, p. 225.

Stone, Joseph, a Methodist Episcopal minister, was born in England about the year 1742. He emigrated to America early in life, was admitted into the itinerancy in 1796, and appointed to Montgomery Circuit, in 1797-98 to Federal, in 1799 to Fairfak, in 1800-1 to Frederick, in 1802 to Huntington, in 1803 to Carlisle, in 1804 to Alleghany, in 1805 to Frederick, in 1806 to Winchester, in 1807-8 to Fairfak, in 1809 to Berkley, in 1810 to Loudon, York, and in 1811 the Conference granted him a supernumerated relation, in which he was retained until death, Oct. 7, 1818. He was a plain, zealous, and useful minister of the Gospel. See Minutes of Annual Conferences, i. 324; Stevens, Hist. of the M. E. Church, iv. 244; Bangs, Hist. of the M. E. Church, iii. 96.

Stone, R. W., a minister of the Methodist Episcopal Church, was born in Westmoreland, Conn., 1846. He first united with the Baptist Church in 1869, but joined the Methodists the same year. He was soon after licensed to preach, and was admitted to the Louisville Conference in 1869, but died in Allen County, Ky., Feb. 24, 1873. See Minutes of Annual Conferences of the M. E. Ch., South, 1873, p. 866.

Stone, Samuel, a Congregational minister, was born at Hertford, England, and was educated at Emmanuel College, Cambridge. He then studied divinity under the instruction of Rev. Richard Blackerby. Being a Non-conformist, he resolved to seek the more congenial atmosphere of New England, and arrived in America Sept. 4, 1633. On Oct. 11 following a Church was organized at Newtown, Conn., of which he was ordained teacher, Mr. Hosken being ordained pastor. In June, 1636, nearly the whole Church, including pastor and teacher, removed to Hartford, where Mr. Stone labored with Mr. Hooker for fourteen years, and then became sole pastor. This position he retained until his death, July 26, 1663. The latter part of his ministry was embittered by a violent controversy in the Church, originating in a dispute on some ecclesiastical topic between himself and a Mr. Godwin, a ruling elder. The origin of the misunderstanding is unknown. Mr. Stone published a Discourse on theLogical Notion of a Congregational Church (Lond. 1652); and left in MS. a work against Antinomianism, and a body of divinity. See Sprague, Annals of the Amer. Pulpit, i. 97.

Stone, Timothy, a Congregational minister, was born July 23 (O. S.), 1742, and entered Yale College in 1759, from which he graduated in due course. After his graduation he taught school in North Branford, studied theology under Rev. Mr. Brinsmade, of Judea (new Washington), Conn., and was licensed to preach by the New Haven Association, Sept. 24, 1765. He preached for some time in Hanover, and was then settled at Groton, Conn., Sept. 30, 1767; and while there discontinued the use of the "Half-way Covenant," i.e. of admitting to baptism the children of parents who professed a belief in Christianity, and were not immoral in their lives, though they did not partake of the ordinance of the supper. About the year 1780 he preached the Comenc of Cerreus at Yale. He died May 12, 1797. The following is a list of Mr. Stone's publications: A Sermon on Self-anemos (1778)---Sermon on the Death of Madam Faith Trumbull (1780)--- Election Sermon (1792)-- and Ordination Sermon (1794). See Sprague, Annals of the Amer. Pulpit, v. 681.

Stone, William Murray, D.D., an Episcopal clergyman, was born in Somerset County, Md., June 1, 1779, and graduated from Washington College, Kent Co., Md. He studied divinity under Rev. George Dar. sheil, Baltimore; was ordained deacon by bishop Claggert, May 17, 1802; and priest, by the same prelate, Dec. 27, 1803. Soon after his ordination as deacon he was called to the rectorship of Stepney Parish, where he remained until, in 1829, he removed to Chester Parish. He was chosen bishop of Maryland June 1, 1850; and consecrated Oct. 21. He died Feb. 26, 1837. The honorary degree of D.D. was conferred upon him by Columbia College in 1830. He published, A Charge (1851):--Pastoral Letter (1853)--and A Sermon (1855). See Sprague, Annals of the Amer. Pulpit, v. 484.

Stone, William Rodman, a minister of the Methodist Episcopal Church, was born in Portmouth, N.H., July 25, 1798, but removed in childhood, with his parents, to Boston. In his twenty-second year he united with the Church; and in June, 1825, joined the New England Conference on probation. He served in the regular pastorate until 1854, when he was appointed city missionary in Cambridge, and two years after the chancery of the Middlesex County House of Correction was added to his labors. In these fields of labor he continued until the infirmities of age confined him to his home. He died at Cambridge, June 27, 1875. See Minutes of Annual Conferences, 1876, p. 69.

Stonehenge (Sax. Stanhengest, hanging stones), a very remarkable structure, composed of large artificially raised monoliths, situated on Salisbury Plain, two miles from Amesbury, in Wilshire. Its neighborhood abounds in sepulchral tumuli, in many of which ancient British remains have been found. The fabric of Stonehenge was comparatively entire in the early part of this century, but it is now very much defaced. When entire, it consisted of two concentric circles, enclosing two ellipses, the whole surrounded by a double mound and ditch circular in form. Outside of the boundary was a small lake of stones, and the approach was by an avenue from the north-east, bounded on each side by a mound or ditch. The outer circle consisted of thirty blocks of sandstone, fixed upright at intervals of three and a half feet, and connected at the top by a continu-
ous series of imposts, sixteen feet from the ground. The blocks were all square and rough-hewn, dovetailed to each other, and fitted, by mortise-holes in their underside, to knobs in the uprights. About nine feet within this peristyle was the inner circle, composed of thirty unhewn granite pillars, from five to six feet in height. The grandest part of Stonehenge was the ellipse inside the circle, formed of ten or twelve blocks of sandstone, from sixteen to twenty-two feet in height, arranged in pairs, each pair separate, and furnished with an impost, so as to form five or six trioliths. Within these trioliths was the circle composed of nineteen uprights of granite, similar in size to those of the inner circle; and in the cell thus formed was the so-called altar, a large slab of blue marble. There has been much speculation regarding the origin and purpose of Stonehenge, which are still involved in much obscurity. In modern times the most prevalent opinion has been that, in common with other similar structures elsewhere, it was a temple for Druidical worship; but this belief has been somewhat shaken by the discovery of the sepulchral character of many other monuments which had been presumed to be Druidical. The circular form has also suggested the idea of a connection with the worship of the Sun, and stones have been used for the religious rites of various successive races and creeds; and also as a court of justice or battle-ring for judicial combats.

Stonehouse, James, Sir, an English baronet and clergyman, was born near Abingdon, Berkshire, July 20, 1716. He succeeded to the title of baronet late in life, by the death of his relative, Sir James Stonehouse. Educated at Winchester School, he entered St. John's College, Oxford, where he took his master's degree in 1739, and his degrees in medicine 1742 and 1745. After several more years devoted to the study of medicine at home and abroad, he settled in Northampton, where he had a very extensive practice. After practicing for twenty years, he left his profession, with the consent of entering the ministry. He was ordained deacon and priest in two successive weeks, by special favor of the bishop of Hereford; and in 1764 was presented to the living of Little Cheverell, and in 1779 to that of Great Cheverell. He died at Bristol-Well's, Dec. 8, 1790. Having imbued infidel notions from Dr. Nichols, one of his instructors, he wrote a keen pamphlet against revealed religion, the third edition of which, however, he burned. Greatly regretting his former acts of opposition, he devoted himself to his work as minister, and also wrote several tracts: Considerations on Some Particular Sins, and on the Mosaic Code, Ethically and Spiritually;—St. Paul's Exhortation and Motive to Support the Weak or Sick Poor;—A Short Explanation of the Scripture of the Lord's Supper, etc.;—Hints to a Curate for the Management of a Parish:—A Serious Address to the Parishioners of Great Cheverell.

Stones, Cut, Hewn, or Squared. See Mason.

STONES, Precious. The reader is referred to the separate articles, such as Agate, Carbuncle, Sardonyx, etc., for the formation and use of these stones by the ancients. It is possible to obtain on the various gems mentioned in the Bible. The identification of many of the Hebrew names of precious stones is a task of considerable difficulty. Sometimes we have no further clue to aid us in the determination of a name than the mere derivation of the word, which derivation is always too vague to be of any assistance. Very rarely does it occur that the identity of such a name is common to many precious stones. As far, however, as regards the stones of the high-priest's breastplate, it must be remembered that the authority of Josephus, who had frequent opportunities of seeing it worn, is preferred to any other. The Vulg. agrees with his mentioning of twelve stones of precious metal, whereas the LXX was still to be inspected in the Temple of Concord; hence this agreement of the two is of great weight. The Sept., Vulg., and Josephus are all agreed as to the names of the stones; there is, however, some little difference as to their relative positions in the breastplate: thus the tarsis, which, according to Josephus, occupies the second place in the third row, is by the Sept. and Vulg. put in the third place. A similar transposition occurs respecting the second row. The names of the stones in the third row. The modern Arabic names of the more usual gems, which have probably remained fixed the last two thousand years, afford us also some approximations to the Hebrew nomenclature; still, as intimated above, there is much that can only be regarded as conjecture in attempts at identification. Precious stones are frequently alluded to in the Holy Scriptures; they were known and very highly valued in the earliest times. The onyx stone, fine specimens of which are still of great value, is expressly mentioned by Moses as being found in the land of Havilah. The sard and sardonyx, the amethyst or rose-quartz, with many agates and other varieties of quartz, were doubtless the best known and most readily procured. "Onyx stones, and stones to be set, glistening stones and of divers colors, and all manner of precious stones," were among the articles collected by David for the Temple (1 Chron. xxii. 2). The Tyrians traded in precious stones and pearls (Ezek. xxv. 12). The robes of their king were covered with the most brilliant gems. The merchants of Sheba and Ramah in South Arabia, and doubtless India and Ceylon, supplied the markets of Tyre with various precious stones.

The art of engraving on precious stones was known from the earliest periods of antiquity. Sir W. Dugdale says (Anc. Egypt. [Lond. 1854], ii. 67), "The Israelites learned the art of cutting and engraving stones from the Egyptians." There can be no doubt that they did learn much of the art from this skilful nation, but it is probable that it was known to them long before their sojourn in Egypt; for we read in Gen. xxxviii. 18, that when Tamar desired a pledge Judah gave her his signet, which we may safely conclude was engraved with some device. The twelve stones of the breastplate were engraved each one with the name of one of the tribes (Exod. xxviii. 17-21). The two onyx (or sardonyx) stones which formed the high priest's shoulders pieces were engraved with the names of the twelve tribes—six on one stone and six on the other—"with the work of an engraver in stone like the engraving of a signet." See also Exod. xxviii. 36, "like the engravings of a signet." It is an undecided question whether the diamond was known to the early nations of antiquity. The A. V. gives it as the rendering of the Heb. Yahu dolon, (2 Sam. 22:2), but it is probable that the jasper is intended. G. Wilkinson is of opinion that the ancient Egyptians were acquainted with the diamond, and used it for engraving (ii. 67). Beckmann, on the other hand, maintains that the use of the diamond was unknown even to the Greeks and Romans: "I must confess that I have found no proofs that the ancient cut glass with a diamond" (Hist. of Inventions, ii. 97, Bohn's ed.). The substance used for polishing precious stones by the Hebrews and Egyptians was emery powder or the emery stone (ἀμέθυστον), which was inferior only to the diamond in hardness. See ALMANT. There is no proof that the diamond was known to the ancient Orientals, and it certainly must be banished from the list of engraved stones which made the sacerdotal breastplate; for the diamond can be cut only by abrasion with its own powder, or by friction with another diamond; and this, even in the hands of a well-practised artist, is a work of most patient labor and of considerable difficulty; and it is not likely that the Hebrews, or any other Oriental people, were able to engrave a name upon a diamond as upon a signet ring. Again, Josephus speaks of twelve stones of the breastplate; and the twelve stones of the breastplate were of great size and extraordinary beauty. We have no means of ascertaining their size; probably they were nearly an inch
STONE-SQUARER 1047 STONING

square: at any rate, a diamond only half that size, with
the five letters of ḱlḥ (Zebulon) engraved on it—
for, as he was the sixth son of Jacob (Gen. xxx, 29),
his name would occupy the third place in the second
row—in quite out of the question, and cannot possibly
be the Yahalom of the breastplate.

Perhaps the stone called "ligure" by the A. V. has
been the subject of more discussion than any other of
the precious stones mentioned in the Bible. In our ar-
ticle on that subject we were of opinion that the stone
denoted was probably tourmaline. We objected to the
"hyacinth stone" representing the lycernum of the an-
cients, because of its not possessing attractive powers
in any marked degree, as we supposed and had been in-
formed by a well-known jeweller. It appears, how-
ever, from a communication recently made by Mr. King,
that the hyacinth (zircon) is highly electric when rubbed.
He states he is practically convinced of this fact, although he allows that highly electric
powers are not usually attributed to it by mineralo-
gists. Mr. King asserts that our hyacinth (zirio), was greatly used for engraving on by Greeks,
Romans, and Persians, and that numerous intaglios in
it exist of the age of Theophrastus. The ancient hy-
cynthius was our sapphire, as Solinus states.

Precious stones are used in Scripture in a figurative
sense to signify value, beauty, durability, etc., in those
objects with which they are compared (see Cant. v, 14;
Isa. iv, 11, 12; Lam. iv, 7; Rev. iv, 5; xxi, 10-21). As
to the precious stones in the breastplate of the high-
priest, see Josephus, Ant. iii, 7, 5; Epiphanius, Papi-
tou ἱερομονάχου τῶν ἱερων ἑτῶν τῆς ἱερείας ἐν τῷ συγκροτο-
μένῳ ἐν τῷ τάφῳ Ἡρῴου (Cologne, 1682), ii, 225-
232: this treatise has been edited separately by Ges-
ner [Cont.], De Monni Berurum Fossilium, etc. (Tiguri,
1560), and by Hiler, the author of the Hieroglyphicon,
in his Syntagma Hennaeicum (Tbinga, 1711), p. 81;
Braun, Die Vindex Saccardorum Herbarum (Amstel-
1680; 2d ed. 1698), lib. ii, c. 7 and 8; Bellermann, Die
Urim und Thummim die ältesten Gemenen (Berlin, 1824);

Stone-squarer. See GIRLITE.

Stone-worship. One of the earliest modes of
commemorating any remarkable event was to erect a
pillar of stone or to set up heaps of stone. These in
course of time came to be looked upon as sacred, and
even to be worshipped. The stone which Jacob anoint-
ed and set up at Bethel is the first instance on record
of a consecrated pillar, and Vossius alleges that, at an
after-period, it became an object of worship, and was
conveyed by the Jews to Jerusalem, where it remained
even after the city was destroyed by Titus. According
to Bochart, the Phcenicians worshipped Jacob's pillar;
but whether this was the case or not, we know,
on the authority of Sanchoniatho, that they had their
own bezaloth, or anointed stones, to which they paid div-
vine honors. These, in all probability, were erratics,
or meteoric stones, as indeed appears to be indicated in
the fact that Sanchoniatho traces their origin to Ur-
ana, or the heavens. Eusebius goes so far as to allege
that these stones were believed to have souls, and, ac-
cordingly, they were consulted in cases of emergency,
as being the exponents to the will of Deity. Herodian
refers to the use of this kind as being consecrated to
the sun under the name of Helios-thalus, and pre-
served in a temple sacred to him in Syria, "where," he
says, "there stands not any image made with hands,
as among the Greeks and Romans, to represent the
god, but there is a very large stone, round at the
bottom, and terminating in a point, of a conical form,
and covered with a very rich color, which they say "comes
from Jupiter." Sacred stones have frequently been
worshipped by heathen nations, the Druids, etc., and
traces of the practice are even yet to be found. See
Stone.

Stoning (ḇās, ḱrb) [Talmudic, הפלס'; λυξίων, λυξίων], as a mode of capital punishment, was or-
dained by the Mosaic law (see the Mishna, Sanhed-
ri, vii, viii) for the following classes of criminals: 1. All
who trespassed against the honor of Jehovah (Lev.
x, 20, 21; Deut. xvii, 2 sq.), and entertain to idolatry
(xiii, 6 sq.), or libelous speakers (Lev. xxiv, 16 sq.), who
were put to death (Lev. xxi, 10 sq.); Acts vi, 13; viii,
56 sq.), Sabbath-
brokers (Num. xv, 32 sq.), fortune-tellers and sooth-
sayers (Lev. xx, 27); a false prophet (Deut. xiii, 6); a
sworn enemy who did not carry out his oath (Lev.
xxii, 28 sq.), and one who son of a beast, who had shared in any assured thing (Josh. xii, 25), as
Accursed. 2. Notoriously and incorrigibly disobedient
sons (Deut. xxxi, 18 sq.). 3. Brides whose tokens of virginity were wanting (xxii, 20 sq.); and so
an affianced woman who had complied with a seducer,
together with the seducer himself (ver. 23 sq.). Ac-
cording to Jewish criminal procedure (Mishna, Sanhed-
ri, vii, 4), the same penalty was incurred by those
who cursed their parents, or had sexual connection
with their mother (or step-mother), or daughter-in-law,
or with a beast. In the Mosaic statute these last crimes
are classed together (Lev. xx, 9 sq.), but no special
mode of execution is prescribed; the connection, how-
ever, seems to point to stoning (comp. Ezek. xvi, 40;
xxiii, 47; John viii, 5). Finally, Moses enacted this
punishment in one case for an animal, namely, one that
had been the means of destroying a human life (Exod.
xxii, 28 sq.); the same is presumable in Lev. xvi, 15 sq.
See Law.

The process of stoning is nowhere described in the
Bible; it only appears that the place of execution was
outside the city (Lev. xxiv, 14; Numb. xv, 36; 1 Kings
xxi, 10, 13; Acts vii, 56; comp. Mishna, Sanhedri,
v, i, sq.); and that the witnesses threw the first stone upon
the culprit (Deut. vii, 7; Acts vii, 57 sq.), in order to do
which they divested themselves of their outer garments
so as to free the user of their hands (loc. cit.). The
Talmudists give greater details as to the execution
(Mishna, Sanhedri, vi, 3, 4; comp. Winet, Chrestom.
Talm, p. 1 sq.; Ohlo, Lex. Rab., p. 361 sqq.). According
to them, the offender, if of the male sex, was wholly
dressed in clothing down to the private parts, and
if of the female sex, both before and behind; and then,
after being raised upon a scaffold twice as high as a
man, was thrown down backwards by one of the wit-
nesses. If he was thereby killed, the penalty thus ful-
filled upon him was calledRibh, impulsta; but if he
survived this shock, it became the duty of the other
witness to cast a large stone (see Lightfoot, Hor. Heb.
p. 420) upon the criminal's heart; and if this were not
fatal, the bystanders were to fall to stones. According
to some rabbins (as Maimonides), the condemned
man was treated to a bitter draught (wine mingled with
myrrh or gail), in order to stupefy him. See Cutre-
fixion. How much of these details is of ancient or-
igin it is impossible to determine. The precipitation

Druidical Rocking-stone.
of the culprit may have arisen from a false interpretation of Exodus xix, 13 (see B. Michaelis, in Pott's Sylloge, i. 186): but this is improbable, and the allegations against this Talmudical mode of lapsed (Helmi Dissert. p. 145 sq. ; Carpoz, Appar. Crit. p. 584) are without any foundation. Among the Jews, as among a mob (a very old practice, Exodus viii. 26; xvii. 4), in order to avenge itself on the spot upon such as had excited popular ill-will (1 Sam. xxxiii. 6; 2 Chron. xxiv. 21; 2 Macc. i. 16; Matt. xxvi. 35; Luke xxx. 6; John x. 31 sq.; xi. 8; Acts v. 26; 2 Cor. xi. 25; Josephus, Ant. xiv. 5. 1; xvii. 10, 5; War, ii. 1, 8; 19, 5; Life, 15, 59), even among the Jewish [and heathen] populace in foreign cities (Acts xiv. 5, 19). It was likewise resorted to by the Greek rabble (Herod. i. 5; Thucyd. v. 60; Pausan. viii. 5, 8; Elikan. Var. Hist. v. 19; Curtius, vii. 2, 1; see Wachsmuth, Hellen. Alterth. ii. 730 sq.), although the legitimate practice of stoning occurs among the Greeks, i.e. Macedonians (Curtius, vi. 11, 38; Schol. ad Eurip. Orest. p. 482); so among the Spaniards (Strabo, iii. 155) and Persians (Ctesias, Fragm. c. 45, 50); even the provincial officials used this punishment (against the Jews) (Plutarch, Opp. ii. 542). B. Michaelis introduces an example among the Germans in the Middle Ages (De Judaica Persica Copiti § 6). See, generally, Carpoz, Appar. Crit. p. 583 sq.; Selden, Justin. Nat. et Gent. p. 534 sq.; Ring, De Lapidatione Hebraeor. (Preface 1716). See PUNISHMENT.

Stool, in an ecclesiastical sense, is a seat for acolytes, servers, and attendant clerks in the services of the Church.

Stool of Repentance, an elevated seat in a Scottish Church, on which persons were formerly compelled to sit as a punishment for having committed certain of the deadly sins.

Stools, an old form of stool (q. v.).

Stools. The word thus rendered in the A. V. at Exodus i. 16 (כָּפֶרֶץ, ombridgin) is the dual of כָּפֶר, eben, usually thought to be equivalent to כָּפֶר, eben, a stone, and in this form only occurs there and in Jer. xviii. 3. In the latter passage it undeniably means a potter's wheel [see Potter]; but what it denotes in the former, or how to reconcile with the use of the word in the latter text any interpretation which can be assigned to it in Exodus is an example among the Germans in the Middle Ages (De Judaica Persica Copiti § 6). See, generally, Carpoz, Appar. Crit. p. 583 sq.; Selden, Justin. Nat. et Gent. p. 534 sq.; Ring, De Lapidatione Hebraeor. (Preface 1716). See PUNISHMENT.

Stolz, or Stoppe. See Stool.

Stopford, William K., a minister of the Methodist Episcopal Church, was born in Dublin, Ireland, July 9, 1809. At the age of ten years he gave evidence of conversion. He came to the United States about 1827, and in 1833 was received on trial into the New York East Conference. He occupied very many important appointments, and labored in them faithfully and with success. He died June 25, 1852. See Minutes of Annual Conference, 1853, p. 211.

Storax occurs only in Esclusa. xxiv. 15, as a rendering of σταρις, state: "I gave a sweet smell like cinnamon and aspalathus, and I yielded a pleasant odor like the best myrrh, as galbanum, and onyx, and sweet storax, and the name of frankincense, and of cinnamon." In Gen. xxvii. 25, Aquila renders τέσσερις, "spicery," by στιπακ, as also in xiii. 11, where he followed by the Vulgate. Sweet storax is mentioned by various Greek writers, from the time of Hippocrates to that of Dioscorides. Several kinds of it were known, varying chiefly in the form in which it was obtained or the degree of adulteration to which it had been subjected. Most methods of obtaining it are obtained by incisions made in the bark of the tree called storax officinale by botanists. This tree is a native of Greece, Asia Minor, Syria, and Palestine, and is about twenty feet high, with leaves like those of the quince, and flowers somewhat resembling those of the rose. The storax exudes from the cambium, and is obtained as an incense and for its medical properties. It consists chiefly of resin, a volatile oil, and some benzoic acid. It has a grateful balsamic odor, which no doubt made it valued in ancient times. See SPIR.

Storch, Nicholas, founder of the religious doctrines of the Anabaptists (q. v.), was born at Stolberg, Saxony, about 1490. He was therefore a young man when he commenced preaching the doctrines of the Reformation. He went much farther than Luther in proscribing ancient authorities, for he denounced all external documents and traditions whatever, and, accepting no book but the Bible, he taught his disciples to renounce the study of literature and theology, and, to the praise of God to enlighten their understandings. He insisted, also, on the necessity of rebaptism when that ceremony had been performed in infancy, on the principle that it was an act of faith and could not otherwise be valid. Neither Calvin nor Luther could tolerate these doctrines, and Storch and his followers became more and more disliked, and they became more and more more hateful, and to the princes of Germany when political ends and the doctrine of the community of goods were associated with them. For years previous the poor half-starved and half-naked serfs of Germany had been accustomed to assemble in great numbers, and, with "Bread and Cheese" inscribed on their
banners, had threatened the complete overthrow of the existing state of society. Storch gained many proselytes in Swabia, Thuringia, etc., which fact led to much bloodshed; and at length the elector of Saxony, at the pressing instance of Luther, banished their spiritual guide, in addition to executing their political, in the person of Münzer, in 1525. Storch was a man of the most amiable disposition; but the Baptists of the present day deny all connection with his party, to avoid the odium belonging to these scenes of turbulence. He died in his retreat at Munich in 1530.

Storchenauf, Sigmund, a German Jesuit, was born in 1731 at Hollenburg. In 1747 he joined the Society of Jesus, lectured at the University of Vienna on philosophy, and suffered himself to be sometimes influenced by the principles of modern philosophy. When his order was abolished he retired to Klagenfurt, where he died in 1737. He wrote, Institutiones Logicae et Metaphysicae (Vienna, 1769-71):—Philosophy of Religion (Angb. 1773-81, 7 vols.). See Regensburger Conversations-Lezikon, n.s. (B. P.)

Store. See Deposit.

Store-city (טִיָּבָס), ir mishkenot, city of magazines, 1 Kings ix, 19; 2 Chron. viii, 4, 6, xv, 4, xvii, 12; "treasure-city," Exod. i, 11; "store-house," 2 Chron. xxxii, 28, a place of deposit, or entrepot, for merchandise. See Store-house.

Store-house (טִיָּבָס), otzar, 1 Chron. xxvii, 25; Ps. xxxiii, 7, 8; Mal. iii, io, a treasury, as elsewhere usually rendered; נֵס, nasim, a receptacle for provisions, Deut. xxviii, 8; "barn," Prov. iii, 10; the modern ma'arabut, usually underground in the East; נֹחַ, nacham, ma'arabot. Jer. i, 26; a granary; מִשְׁקָנָה, mishkenoth, a magazine, Exod. i, 11; 2 Kings xxxii, 26; elsewhere "store-city." נָטַנְו, natanot, Luke xii, 24, Exod. xxix, 12; elsewhere "closed.

According to Gen. xli, 48, 49, Joseph built store-houses in Egypt, in which he laid up the superabundance of corn against the years of dearth. From the monuments we learn that such store-houses were common. The form of one of those ancient granaries is exhibited in a painting of the tomb of Rotei at Beni-Hassan. It consists of a double range of structures resembling ovens, built of brick, with an opening at the top and a shutter in the side. A flight of stairs gives access to the top of these receptacles, into which the grain, measured and noted, is poured till they are full. The mode of emptying them was to open the shutter in the side. See Granary.

Stork (טִיָּבָס), chasidah; translated indifferently by the Sept. ἀσίφα, τιφή, ἄρπαος, πλακεύω: Vulg. herodio, herodotea, milius; L. V. "stork," except in Job xxxix, 13, where it is translated "wing" [*stork" in the marg.] but there is some question as to the correct reading in this passage. See Storch. In the following account we present the ancient and the modern information.

I. Identification of the Scriptural Allusions.—The Sept. does not seem to have recognised the stork under the Hebrew term הַרְסָפָה, otherwise it could scarcely have missed the obvious rendering of πλακεύς, or have adopted in two instances the phonetic representation of the original ασίφα (whence, no doubt, Hesych. ἄσφη, ἄ-σφη ὀνυχίων). It is singular that a bird so conspicuous and familiar as the stork must have been both in Egypt and Palestine should have escaped notice by the Sept., but there can be no doubt of the correctness of the rendering of the A. V. The Hebrew term is derived from the root הָרֵס, whence הָרֵס הָרֵס, "kindness," from the material and dital affection of which this bird has been in all ages the type.

There are two kinds of stork, the Ciconia alba and the C. nigra. In Egypt the two species collectively are called ʾasr, the white, more particularly, belarty; in Arabic saqâz, saqâz (v), abukhist, hekek, heyegy, and haji ilaggy, the three last mentioned expressing the peculiar cluster which storks make with their tails, and haji, or pilgrim, denoting their migratory habits. This quality several of the Western names likewise indicate, while our word stork, albeit the Greek στοργη implies natural affection, is an appellation which extends to the Icelandic, Danish, Swedish, German, Hungarian, Latin, and Walachian in languages, and is presumed to have been stor egoi, i.e. migrating herons, with which the Greek agrees in sound but has no affinity of meaning, though it corroborates the interpretation of chasidah in the Hebrew, similarly implying affection, piety, mercy, and gratitude. This name results from a belief, general through all ancient Asia, in the attachment of these birds to each other; of the young towards the old, and of the parents towards their young. But the latter part of this opinion is alone verified by the moderns, in cases where the mother bird has perished while endeavours to save her progeny. This occurred in the great fire at Delft, and more recently at the battle of Friedland, where, a fir-tree with a stork's nest in it being set on fire by a howitzer-shell, the female made repeated efforts to extricate her young, and, at length, as in the other case, was seen to sink in the flames. Without, therefore, admitting the exaggerated reports or the popular opinions of the East respecting the stork, enough is shown to justify the identification of chasidah with that bird, notwithstanding that some learned commentators have referred the word toeron, and to several other birds, though none upon investigation are found to be of the same degree the qualities which are ascribed to the species in Lev. xi, 19; Deut. xiv, 18; Job xxxix, 13; Ps. civ, 17; Jer. viii, 7; Zech. v, 9.

Aspet, the Russian (? name of the stork according to Merrick, does not appear to be related to the Hebrew, unless it could be shown that the Estonian aspet, or aigro, applied to the same bird, and the old Teutonic aigel, Da- niel aegel, Italian aigolo, are denominations of the same bird, and not primitive appellatives in the great northern family of languages, which, it must be confessed, are not solitary examples in vocabularies so remote from each other. Of the smaller-sized, more solitary, black stork, no mention need be made in this place, because it is evidently not the bird referred to in the sacred writers.

II. Description and Habits.—1. Generally. — Storks are about a foot less in height than the crane, measuring only three feet six inches from the tip of the bill to the end of the toes, and nearly the same to the end of
2. Distinctively.—The white stork (Ciconia alba, L.) is one of the largest and most conspicuous of land birds. Standing nearly four feet high, the jet black of its wings and its bright-red beak and legs contrasting finely with the pure white of its plumage (Zech. v. 9, "They had wings like the wings of a stork"). It is placed by nat-uralists near the heron tribe, with which it has some affinity, forming a connecting-link between it and the spoonbills and ibises, like all of which, the stork feeds on fish and reptiles, especially on the latter. In the neighborhood of man it readily devours all kinds of offal and garbage. For this reason, doubtless, it is placed in the list of uncivil birds by the Mosaic law (Lev. xi. 19; Deut. xiv, 18). The range of the white stork extends over the whole of Europe, except the British isles, where it is now only a rare visitant, and over Northern Africa and Asia, as far as at least Birmah.

The black stork (Ciconia nigra, L.), though less abundant in places, is scarcely less widely distributed, but has a more easterly range than its congeners. Both species are very numerous in Palestine—the white stork being universally distributed, generally in pairs. From the whole country; the black stork living in large flocks, after the fashion of herons, in the more secluded and marshy districts. Tristram met with a flock of upwards of fifty black storks feeding near the west shore of the Dead Sea. They are still more abundant by the Sea of Galilee, where also the white stork is so numerous as to be gregarious, and in the swamps round the waters of Merom.

3. Social Character and Traditional References.—While the black stork is never found about buildings, but prefers marshy places in forests, and breeds on the tops of the loftiest trees, where it builds up its nest far from the haunts of man, the white stork attaches itself to him, and for the service which it renders in the destruction of reptiles and the removal of offal has been repaid from the earliest times by protection and reverence. This is especially the case in the countries where it breeds. In the streets of towns in Holland, in the villages of Denmark, and in the bazaars of Syria and Tunis it may be seen strolling gravely among the crowd, and woe betide the stranger either in Holland or in Palestine who should dare to molest it. The claim of the stork to protection seems to have been equally recognised by the ancients. Sempr. Rufus, who first ventured to bring young storks to table, gained the
following epigram, on the failure of his candidature for
the priesthood:

"Quamquam est duobus elegantior Plaucis
Suffragiorum puncta non tuit septem.
Cicinnariam populus utus est mortem.
"

Horace contemptuously alludes to the same sacrilege in
the lines

"Tutique cecum nidis,
Donec vos auctor docet praeclarius" (Sat. ii. 2. 49).

Pliny (Hist. Nat. x. 21) tells us that in Thessaly it was
a capital crime to kill a stork, and that they were
thus valued equally with human life in consequence of
their warfare against serpents. They were not less
honored in Egypt. It is said that at Fes, in Morocco,
there is still a place set apart for the feeding and
nursing sick cranes and storks, and of burying them
when dead. The Marocains hold that storks are
human beings in that form from some distant islands
(see note to Brown's Pseud. Epid. iii. 27. 5).

The Turks in Syria point to the stork as a true follower of
Islam, from the preference he always shows for the
Turkish and Arab over the Christian quarters. For
this undoubted fact, however, there may be two other
reasons—the greater amount of offal to be found about
the Moslem houses, and the persecutions suffered from
the sceptical Greeks, who rob the nests, and show none
of the gentle consideration towards the lower animals
which often redeems the Turkish character. Strick-
land (Mem. and Papers, ii. 227) states that it is said to
have quite deserted Greece since the expulsion of its
Mohammedan protectors. The observations of travel-
ers corroborate this remark. Similarly the rooks were
said to be so attached to the old regime that most of
them left France at the Revolution—a true statement,
and accounted for by the clearing of most of the fine
old timber which used to surround the chateaux of the
noblesse.

As already noted, the derivation of τουρτά points to the
parental and filial attachment of which the stork
seems to have been a type among the Hebrews no less
than the Greeks and Romans. It was believed that
the young repaid the care of their parents by attaching
themselves to them for life, and tending them in old
age. Hence it was commonly called among the Latin
"turta pin." (See Lattourens, in Petronius Arbiter; Aris-
totle, Hist. Anim. ix. 14; and Pliny, Hist. Nat. x. 32.)

Pliny also notices their habit of always returning to
the same nest. Probably there is no foundation for the
notion that the stork so far differs from other birds as
to recognise its parents after it has become mature;
but of the fact of these birds returning year after year
to the same spot there is no question. Unless when
molested by man, storks' nests all over the world are
rebuilt, or rather repaired, for generations on the same
site, and in Holland the same individuals have been
recognized for many years. That the parental attac-
achment of the stork is very strong has been proved on
many occasions. The above-mentioned tale of the
storks at the burning of the town of Helles has often been
repeated, and seems corroborated by unquestionable evi-
dence. The name of the bird itself, as we have seen, is
expressive of the same fact. Its watchfulness over its
young is unremitting, and often shown in a somewhat
droll manner. Tristram was once in camp near an old
ruined tower in the plain of Zama, south of the Atlas,
where a pair of storks had their nest. The four young
might often be seen from a little distance, surveying
the prospect from their lonely height; but whenever
any of the human party happened to stroll near the
tower, one of the old storks, invisible before, would
instantly appear, and, lighting on the nest, put its foot
gently on the necks of all the young, so as to hold
them down out of sight till the stranger had passed,
snapping its bill meanwhile, and assuming a grotesque
air of indifference and unconsciousness of there being
anything under its charge.

Few migratory birds are more punctual to the time
of their reappearance than the white stork, or, at least,
from its familiarity and conspicuousness, its migrations
have been more accurately noted. "The stork in the
heaven knoweth her appointed times" (see Virgil,
Georg. ii. 315, and Petron. Sat.). Pliny states that it
is rarely seen in Asia Minor after the middle of August.
This is probably a slight error, as the ordinary date of
its arrival in Holland is the second week in April, and
it remains until October. In Denmark Judge Boie
noted its arrival from 1820 to 1847. The earliest date
was March 26, and the latest April 12 (Kjerbolting,
Danmarks Fugle, p. 262). In Palestine it has been ob-
served to arrive on March 22. Immense flocks of storks
may be seen on the lanks of the Upper Nile during
winter, and some few farther west, in the Sahara; but
it does not appear to migrate very far south, unless,
indeed, the birds that are seen at the Cape of Good
Hope in December be the same which visit Europe.

The stork has no note, and the only sound it emits
is that caused by the sudden snapping of its long man-
dibles, well expressed by the epithet "crotalistrria" in
Petron. (quae crotalistrriae, to rattle the castanets). From
the absence of voice probably arose the error alluded to
by Pliny, "Sunt qui ciconiis non inesse linguis confirm.

Some unnecessary difficulty has been raised respect-
ing the expression in Ps. civ. 17, "As for the stork, the
first trees are her house." In the West of Europe the
home of the stork is connected with the dwellings of
man; and in the East, as the eagle is mentally asso-
ciated with the most sublime scenes in nature, so, to
the traveller at least, is the stork with the ruins of man's
noblest works. Amid the desolation of his fallen cities
throughout Eastern Europe and the classic portions of
Asia and Africa, we are sure to meet with them surmount-
ing his temples, his theatres, or baths. It is the same in
Palestine. A pair of storks have possession of the only
tall piece of ruin in the plain of Jericho; they are the
only tenants of the noble tower of Richard Cœur-de-Lion
at Lydda; and they gaze on the plain of Sharon from
the lofty tower of Ramleh (the ancient Arimathen). So
they have a pillar at Tiberias, and a corner of a ruin
at Nebi Moussach. And no doubt in ancient times the
sentry shared the watch-tower of Samaria or of Jezreel
with the cherished storks. But the instinct of the stork
seems to be to select the loftiest and most conspicuous
spot he can find where his huge nest may be supported;
and whenever he can combine this taste with his in-
istinct for the society of man, he naturally selects a
tower or a roof. In lands of ruins, which from their

Stork's Nest.
The black stork, no less common in Palestine, has never relinquished its natural habit of building upon trees. This species, in the north-eastern portion of the land, is the most abundant of the two (Harmer’s Obs. iii. 323). Of either, however, the expression may be taken literally that "the stork-trees are a dwelling for the stork."
College in 1756, and was tutor in 1761–62; was installed at Southold, L. L., in 1763; was absent from his parish from 1776 to 1782 on account of the war, being chaplain to the Revolutionary army for a part of the time. He was dismissed in 1787, and settled on the paternal estate at Mansfield, at the same time acting as pastor of the church. He died Oct. 9, 1799. His grandson is Rev. R. S. Storrs, D.D., of Braintree, Mass., and his great-grandson is the eloquent divine of the same name in Brooklyn, N.Y. See Cong. Quarterly, 1861, p. 265.

Storrs, Richard Salter, a Congregational minister, was born at Mansfield, Conn., Aug. 30, 1763, and at the age of thirteen went to live with Rev. Dr. Salter, who was his education. He entered Yale College in 1779 and graduated in 1783. After studying theology two years under Dr. Salter, he was licensed to preach, and on Dec. 7, 1785, was ordained pastor of the Church in Longmeadow, Conn. Here he continued his pastorate until his death, Oct. 3, 1819. He was the father of Rev. Richard and Charles Backus Storrs. He published a Sermon at the Installation of Rev. Stephen Williams (1800). See Sprague, Annuals of the Amer. Pulpit, ii, 257.

Story appears in the A. V. at 2 Chron. xiii. 22; xxiv, 27, as a rendering of דְּלֶ֖שׁ, meddāsh (q. v.), a commentary, or historical statement (comp. "Cesar's commentaries"). See History; Tale. In Amos ix, 6 it is the translation of פְּלֶ֖שׁ, maalith, a step, as often rendered. See Degree; Stair. In Gen. vi. 16; Ezek. xii, 16: xiii, 3, the word has been supplied by the translators in the sense of the successive floors of a building. See Ark; Temple.

STORY (or Stony), one of the divisions of a building in the vertical direction: the space between two contiguous floors, or between two contiguous entablatures or other architectural dividing-lines that indicate floors or separations of the building. In English medieval documents it is often Latinized into historia. In domestic and palatial architecture the stories are thus enumerated from the lowest upward: basement, or underground story; ground-story, or ground-floor, at about the level of the ground; first story, usually the principal floor or story. Then follow second, third, and so on, the upper being the garreta. Entre-sols, or half floors, are considered as intermediate stories not interfering with the enumeration of the principal ones. The word is applied also to a window where the lights appear above the other, as a "strored window."

Story, cyrus, a minister of the Methodist Episcopal Church, was born at Ipswich, Mass., Nov. 4, 1773, and removed to New Hampshire, and subsequently to Middletown, Wyoming Co., N. Y. In 1818 he was received into the Genesee Conference, but located about 1835. He settled at Liberty, Steuben Co., N. Y., and after a residence of seventeen years he removed to Thurston in the same county, where he lived until his death, Dec. 15, 1864. Mr. Story was an able preacher, and a man of great integrity and unimportunity. See Minutes of Annual Conferences, 1863, p. 240.

Stössel, Johann, a German theologian who was largely implicated in the disputes of the second half of the 16th century, was born June 23, 1524, at Kitzingen, in Franconia, educated in philosophy and theology at Wittenberg, and became master in 1549. During the ensuing interminable disputes, and in other connected events, he was held in opposition to those of Wittenberg, and was, on that account, called to be court preacher at Weimar. In that capacity he assisted in the reformation of Duralch in 1556, and made himself conspicuous as the advocate of an extreme orthodoxy, and in the following year he attended the colloquy at Worms, where he came into antagonism with Melanthon. Somewhat later he was made superintendent at Heldberg, and in 1558 he took part in the preparation of the noted Confutation, defending it against the objections of Strigel (q. v.) in a manner which characterizes an unquelled adherent of Franciscanism. In 1560 he accompanied his prince to the Heidelberg Disputation. His next dispute was with the Franciscans of Jena, his form of friendship having been suspended when, in 1561, the consistory of Weimar was erected and Stössel became one of its assessors; and when he soon afterwards was made superintendent at Jena and professor of theology, and when, acting in obedience to superior authority, he closed the pulpits against the Franciscans and peaceably submitted with their opponents, the rupture became complete. The quarrel ended in a victory for Stössel and in the utter overthrow of his antagonists. In 1562 he received the difficult appointment of mediator between the Franciscan clergy and Strigel, and in that capacity issued a Superdeclaratio in response to Strigel's Declaratio. The result was not favorable, however; numerous depositions followed and Strigel resigned from the university, leaving Stössel alone in the theological faculty until Selnecker and others came to reinforce him. An interval of peace now followed, during which he was made a doctor of divinity, being the first theologian of Jena to receive the degree (July 23, 1564). In 1566 he became a new sovereign recalled the Franciscans, and the latter at once issued a confutation of Stössel's Superdeclaratatio: all ministers who had subscribed to the latter were compelled to resign their pulpits. Stössel was called by Charles Augustus, the elector of Saxony, to be superintendent in Jena, and ultimately became the confessor of that prince. He used his influence in that position to win the elector to the support of the Crypto-Calvinists, with whom he had established friendly relations, but became involved in their misfortunes, and was imprisoned at Senftenberg, where he died on Reminiscere Sunday, 1576. His wife died at the same time, and a similar lot befell the remainder of his family. See Loesch, Hist. Mot. iii, 167 sq.; Planch, Gesch. d. prot. Lehrebrüders, v, 613 sq.; Salig, Gesch. d. Aug. Conf. iii, 14 sq.; Acta Disputat. Vimar. 1561, p. 251 sq.; Hospinian, Hist. Sacrum, ii, 266 sq.; Miller, Staats-Cabinet, i, 153 sq.; Schweitzer, Central-Origenen, i, 467 sq.

Stoup. See HOT-WATER STOCK or SToup.

Stout, Edward, a minister of the Methodist Episcopal Church, was born in Georgetown in 1838, and removed to New Mills Circuit, N. J.; and in 1841 he was received on trial into the Philadelphia Conference. After the New Jersey Conference was constituted he became one of its members. In 1846 he was made supernumerary, and settled in Haldonfield, N. J., where he died, Nov. 8, 1859. See Minutes of Annual Conferences, 1860, p. 88.

Stover, Emuell, a minister of the Methodist Episcopal Church, was born at Pittstown, N. Y., May 15, 1815, and professed conversion Nov. 10, 1831. In 1837 he went to Ohio and engaged in business, but in 1838 became a local preacher. He joined the Troy Conference in 1841, and labored in it without intermission for over thirty years. His appointments were made in Delaware, Mass., Bennington, Vt.; Brunswick, Petersburgh, Argyle, Plattsburgh, Union Village, Cohoes, Waterford, N. Y.; Cambridge twice; two churches in Albany, two in Troy, and two in West Troy. In almost every appointment Mr. Stover labored the full constitutional term. Successful revivals constituted the rule wherever he was stationed, and in a majority of the above-named appointments converts were counted by the hundred. In 1871 he was supernumerary, and settled in Saratoga; but he died soon after of typhoid pneumonia. Mr. Stover was a very able and successful minister. See Minutes of Annual Conferences, 1872, p. 42.

Stow, John, D.D., a distinguished minister of the Baptist denomination, was born at Croyden, N. H., June
straitened circumstances, in consequence of the death of his father, but he would not abandon his cherished hopes of obtaining a liberal education. Providence opened the way for him to prosecute his studies, and after due preparation he became a member of Columbia College, Washington, D. C., and graduated with the highest honors of his class in 1825. Having had the ministry in view during both his academic and college course, after his study, he directed his attention to the investigation of theological subjects, and therefore did not seek for special preparation for his life-work by connecting himself with any theological institution. He remained for a time in Washington after his graduation, and then accepted a call to become the pastor of the Baptist Church in Portsmouth, N. H., his ambition having previously existed. This station lasted for a little more than five years in Portsmouth was eminently successful, and added so much to his reputation that he was called to the pastorate of the Second Baptist, known as the Baldwin Place, Church, in Boston, where he was installed as pastor, Nov. 15, 1832. At once he took his place among the most eloquent and successful clergyman in a city which has always had a ministry than which none perhaps in the country has stood higher in rank and influence. The pastorate of Dr. Stow at the Baldwin Place Church covered a period of nearly sixteen years. The record of his work during this time, of course omitting innumerable details, must be brief. He has delivered and sixty-six sermons, made thirteen thousand four hundred and thirty-four pastoral visits, baptized six hundred and fifty-five, attended seven hundred and fifteen funerals, and solemnized five hundred and seventy-eight marriages. During this period I have travelled over twenty-five thousand miles. In these travels was included an extended tour in Europe, commenced by his departure from Boston, Dec. 1, 1840, and ended by his return June 16 following. Soon after his resignation of the pastorate of the Baldwin Place Church, Dr. Stow received invitations from several important churches of his denomination to become their minister. He decided to accept the call of the Rowe Street Church in Boston, and entered upon his duties Oct. 19, 1848. The same success followed him in his new field of labor which had been granted to him at Baldwin Place. His second pastorate in Boston covered a period of not far from nineteen years. Nearly thirty-five years of almost ceaseless pastoral and ministerial work were thus devoted to the two churches which he so faithfully served in Boston. It is not easy to estimate the good accomplished by a ministry so long continued, or make a correct inventory of the long train of holy influences set in motion by years of consecration to the work of benefiting the souls of men, such as Dr. Stow’s as a minister of Jesus Christ. Dr. Stow did not confine his labors simply to his strict professional calling. He touched life on many sides. In all good causes he took a positive and most lively interest. The institutions of learning in his own denomination, the different societies formed for missionary purposes, both at home and abroad, various benevolent organizations formed in the city of Boston, these and kindred enterprises found in him an ever-faithful friend and supporter. He was known also as an author, having published several works of a practical religious character which were well received at the time of their publication. [See below.] (J. Stowe, John Murdock, a Congregational minister, was born at Hubbardston, Mass., Sept. 7, 1824. He received his preparatory education in the common schools of his native town. He was a delicate youth, but a diligent and faithful student, and subsequently a successful teacher in these schools. He served as one of the commissioners of the Board of Education for several years. He was led to consider the question of preparation for the ministry, and shaped his studies accordingly. He completed the course, was ordained and installed pastor of the Walpole (N. H.) Congregational Church, Jan. 31, 1855. After serving this church for a successful nine years, his health failed, and he deemed it necessary to seek a new field. His relations as pastor was dissolved in 1865. He served the Church at Sullivan, N. H., as a stated supply for a period of seven years. In 1870 he was called to the pastorate of the Church in his native town, and was duly installed. In 1877 he retired from the active ministry because of physical injuries from which he never recovered. When death came, May 9, 1877, it was sudden, but it found him prepared for his change. He was a man of solid, substantial qualities, of deep and unaffected piety. His sermons were wrought out carefully and of Biblical philosophy, and his entertaining minstrelies were famous. He was loved and honored by his ministerial brethren and the Church at large; a man of the people, a faithful and successful pastor, and thoroughly devoted to his work. (W. P. S.) Strabo (of Strabo, i.e. the squinter) is the home- ly apppellative under which a not unimportant theologian belonging to the former half of the 9th century is usually mentioned in history. His real name was Walafried (Walafrius). He was born probably at the close of the reign of Charlemagne, and in the Upper Rhine country (though some writers call him an Anglo-Saxon); and was educated, according to some authorities, at St. Gall under Charlemagne, or at Grimuald, and, according to others, at Reichenau, under Tato, but, at all events, in the end of his course at Fulda, under Rhabanus Maurus. Afterwards he became dean of the convent at St. Gall, and in 842 abbot of the Benedictine convent at Reichenau, on an island in Lake Constance, where he is reported to have lived the remainder of his life. Trittenheim (q. v.) makes him to have been also president of the school in the Convent of Hirschfeld. Strabo died while engaged in a diplomatic mission to the court of Charles the Bald. July 17, 849. For a view of the uncertainties in which our knowledge of this monk is involved, see the larger bibliographical collections, e.g. those of Oudin, D. Celtier, the Historia Literaria de France (tom. v.), and Fabricii Bibli. Latina Medii Aevii. Older sources are given in those works. Walafried’s writings usually offer nothing of historical interest to the student. We note, first, his Latin poems relating generally to Church festivals, i.e. to apostles and martyrs. One of his most celebrated poems describes the author’s garden. These poems have been collected in Canisios Lionesis Antiqui, vi (or ii, 2, new ed.). The historical poems are also found in the Bollandists and in patristical collections. A prose life of St. Gall by Strabo is printed in Goldasti Script. Rerum Alumn., tom. i., and Mabillon, Acta Patr., N. Ser., II (comp. Ermenreich of Reichenau, in Oudin, ii, 78. Greater importance attaches to a little compendium of Christian archaeology, entitled De Esordio et Inveniencia Rerum Ecclesiasticarum (in Hirtorp, Script. de-script. Divinae [Cologne, 1568], and elsewhere). It treats of ecclesiastical usages, buildings, altars, prayers, liturgical images, sacraments, in thirty-one chapters, and in a scholarly and judicious manner. In the matter of image-worship, a position midway between superstition and iconoclasm is assumed; and on the Lord’s supper the statement is made that bread and wine afforded the most adequate symbols to indicate in a symbolic manner the blood and body of Christ, departing from the transubstantiation doctrine of the contemporary Rabind. The fame of Walafried rests principally, however, on the great exegetical compilation (of which he was mainly, if not exclusively, the author), which constituted the principal source of Biblical learning for the Western Church during nearly five hundred years. It bore the title of Glossa Ordinaria, and rapidly became authoritative in matters of interpretation. Numerous
editions were published down to the 17th century, all of which are mentioned in the art. "Walfrid" in the *Hist. Lit. de France*, and in Busse’s *Grundrisse d. christl. Literatur*, § 583. The work was generally printed in connection with Nicholas de Lyra (q. v.), and a scholion interpolated between the lines of the text by the hand of Anselm of Laon in the 12th century. Walfrid’s *Notes* contain the kernel of the older patristic exegesis in considerable perfection. In the 16th century the report was current that Charlemagne had caused the Bible to be rendered into German, and Flaccus, in the preface to his edition of Offrid, speaks of three doctors who performed the work—Rhabanus, Haymo of Halberstadt, and Walfrid; but the story is without support of any kind. See Herzog, *Real-Encyklop., s. v.*

**Strada, Famiano**, a learned Jesuit, was born in Rome in 1572, and entered the Society of Jesus in 1591. His ordinary residence was in the Roman College, where he taught rhetoric, and where he died in 1649. He was the author of *Prolusiones Academicae* (Cologne, 1617, 8vo; reprinted at Oxford in 1631), by far his best work: *De Bello Belgico* (Rome, 1640-47, 2 vols. fol.).

**Strafmichgott-Bibel** is the name of a German Bible translation prepared by Johann Fischer (Herborn, 1602-4, 4 vols.). This translation, the first which was made by a member of the Reformed Church into the German language, though complete, is very deficient, and bears its name (Strafmichgott-Bibel) from its translation of Mark viii, 12: "Wann diesem Geschlechte ein Zeichen würd gegeben werden, so strafe mich Gott." The translation closely follows the Latin version of Junius and Tremellius and the Latinizings. For a time this version was used in Berne and other places. See *Theol. Universit.-Lexikon, s. v.* (B. P.)

**Straight Street** (στεμμη νεασία), one of the ancient thoroughfares of Damascus, on which was situated the house of Judas, where Paul was visited by Ananias (Acts ix, 11). It still subsists as a narrow lane, which runs away westward from the Bab es-Sharuki, or East Gate, as far as the eye can follow it among the confused labyrinth of buildings. It retains the same name in an Arabic form, *Dhr. el-Mustakim*. It is not quite straight now, nor is its architecture peculiarly imposing, yet there cannot be a doubt of its identity. In the Roman age, and down to the time of the Mohammedan conquest, a noble street extended in a straight line from this gate westward through the city. It was divided by Christian colonnades into three avenues, opposite and corresponding to the three portals. The visitor may still trace the remains of these colonnades. Whenever excavations are made in the line, bases of columns are found in situ, and fragments of shafts lying under accumulated rubbish. This street was like those still seen in Palmyra and Jerash. Its length was an English mile, and its breadth about 100 feet. See Porter, *Handb. für Palestine*, p. 451; Bödeker, *Palestine*, p. 490. See *Damascus*.

**Strain at.** The A. V. of 1611 renders Matt. xxiii, 24, "Ye blind guides! which strain at a gnat, and swallow a camel." There can be little doubt, as Dean Trench has supposed, that this line follows a printer’s error, and that the true reading is "strain through a strainer (στεμμὴν ἀπήρ)." *Strain out* is the reading of Tyn- daile’s (1559), Cranmer’s (1559), the Bishops’ (1568) the Textus Receptus (1557) Bible, and "strain at," which is neither correct nor intelligible, could only have crept into our A. V., and been allowed to remain there, by an oversight. Dean Trench gives an interesting illustration of the passage from a private letter written to him by a recent traveller in North Africa, who says: "In a ride from Tangier to Tetuan, I observed that a Moorish soldier who accompanied me, when he drank, always unfolded the end of his turban and placed it over the mouth of his bottle, drinking through the muslin, to strain out the yufts, whose larve swarm in the water of that country" (*In the Auth. Ver. of the X. T.*, p. 172, 173). If one might conjecture the cause which led, even erroneously, to the substitution of *at* for *out*, it is perhaps to be found in the marginal note of the Geneva Version, which explains the verse thus: "Ye stay at that which is nothing, and let pass that which is of greater importance." There is a monograph on the passage itself by Ro-
Among the ancient Egyptians wine was kept in open vessels, as appears from the ladles used for serving it out; and hence small coalsiders were necessary for freeing it from the insects which it attracted. Such strainers of bronze have been found at Thebes, about five inches in diameter (Wilkinson, Anc. Egypt. ii. 21, 1774).

Strain, Joas, a Presbyterian minister, was graduated from the College of New Jersey (Princeton) in 1757. It is not known under whom he studied theology. He was licensed to preach by the Presbytery of Newcastle, Pa., May 29, 1759, and ordained sina titulu by the same presbytery in 1761. He settled as pastor of the churches of Chanceford and Slate Ridge, York Co., Pa., in 1762. He died May 21, 1774.

He was a preacher of uncommon power and success.”

Strange, John, a Methodist Episcopal minister, was born in Virginia Nov. 15, 1789, embraced religion when quite young, and was admitted on trial in the Ohio Conference in 1811, where he labored thirteen years with great fidelity, acceptance, and usefulness. The rest of his life was spent in Indiana. He died Dec. 2, 1832. Traditions of his eloquence and usefulness are rife through all Ohio. “He was,” says a fellow-laborer, “one of the brightest lights of the American pulpit in the valley of the Mississippi in the early part of the present century. He was formed by nature to be eloquent... There were times when his audience was increased by the applause from the seats, and sometimes they were raised en masse from their seats.”

See Minutes of Annual Conferences, ii, 276; Stevens, Hist. of the M. E. Church, iv, 383–385; Sprague, Annals of the Amer. Pulpit, vii, 505–511. (J. L. S.)

Strange, John R., a minister of the Methodist Episcopal Church, South, was born in Washington County, Ky., Jan. 14, 1838. He united with the Church in 1859. He served the Conference during the first half of the same year was received into the Louisville Conference. He was made a supernumerary in 1863, and was located at his own request in 1865. He engaged in the practice of law until 1871, when he was readmitted to the Louisville Conference. He was again made supernumerary in 1874, and died at Garnettville, Ky., Jan. 29, 1875. His discourse, “Strange was a man of more than ordinary intellectual power, and his conception of doctrinal truth was comprehensive and accurate.”

See Minutes of Annual Conferences of the M. E. Ch., South, 1875, p. 228.

Strange, Robert, Sir, an English engraver, was born at Pomona, in the Orkneys, July 14, 1721, of an ancient family, and, after many travels and adventures in Europe, established himself as a historian and artist in London, where he died, July 5, 1792. Besides many secular and classical subjects, he engraved several of the saints, remarkable for their sweetness, but lacking vigor. He left a list of them (Catalogue, etc. [Lond. 1793]).

Stranger (prop. “γερ,” or “ιπποτής,” toshab). These two Hebr. terms appear to describe, not two different classes of strangers, but the stranger under two different aspects—γερ rather implying his foreign origin, or the fact of his having turned aside to abide with another people, toshab implying his permanent residence in the land of his adoption. Winer (Realb. s. v. “Freimodie”) regards the latter as equivalent to hirling. John (Archæol. i. 11, § 181) explains toshab of one who, whether Hebrew or foreigner, was destined to be a home. We have no evidence for either of these opinions. In the Sept., these terms are most frequently rendered by παράκοιτος, the Alexandrian substitute for the classical μισθοκάτως. Sometimes παραξόνσιος is used, and in two passages (Exod. xii. 19; Isa. xiv. 1) γιοσαρ, as representing the Chaldean form of the word γερ. “A stranger,” in the technical limits of the promised land. He was distinct from the proper “foreigner” (παράκοιτος, nakor), inasmuch as the latter still belonged to another country, and would only visit Palestine as a traveller; he was still more distinct from the “nationals” (παράκοιτος, goyim, usually rendered “heathen”), or non-Israelitish peoples, who held no relationship with the chosen people of God. The term answers most nearly to the Greek μισθοκάτως, and may be compared with our expression “naturalized foreigner,” in so far as this implies a certain political status in the country where the foreigner resides; it is opposed to one “born in the land” (παράκοιτος, erabth), or, as the Chaldean may render, “nativized,” in the same way that the naturalized foreigner is opposed to a native. The terms applied to the “stranger” have special reference to the fact of his residing in the land. See Foreigner. The existence of such a class of persons among the Israelites is easily accounted for: the “mixed multitude” that accompanied them out of Egypt (Exod. xii. 38) formed one element; the Canaanitish population, which was never wholly extirpated from their native soil, formed another and still a more important one; captives taken in war formed a third; fugitives, hired servants, merchants, etc., formed a fourth. The number from these various sources must have been at all times very considerable; the census of them in Solomon’s time gave a return of 153,600 males (2 Chron. ii, 17), which was equal to about a tenth of the whole population. The enactments of the Mosaic law, which regulated the political and social position of resident strangers, were conceived in a spirit of great liberality. With the exception of the Moabites and Ammonites (Deut. xxiii, 3), all nations were admissible to the rights of citizenship under certain conditions. It would appear, indeed, to be a consequence of the prohibition of intermarriage with the Canaanites, that they would have excluded from the rights of citizenship; but the Rabbinical view that this exclusion was superseded in the case of proselytes seems highly probable, as we find Doeg the Edomite (1 Sam. xxii, 7; xxii, 9), Uriah the Hittite (2 Sam. xi, 6), and Araunah the Jebusite (xxiv, 18) enjoying, to all appearance, the full rights of citizenship. Whether a stranger could ever become legally a land-owner is a question about which there may be doubt. Theoretically the whole of the soil was portioned out among the twelve tribes; and Ezekiel notices it as a peculiarity of the division which he witnessed in vision that the strangers were to share the inheritance with the Israelites, and should thus become as those “born in the country” (Ezek. xlvii, 22). Indeed, the term “stranger” is more than once applied in a pointed manner to signify one who was not a land-owner (Gen. xxxiii, 4; Lev. xxv, 25); while, on the other hand, erabth (A.V. “born in the land”) may have reference to the possession of the soil, as it is borrowed from the image of a tree not transplanted, and so occupying its native soil. The Israelites, however, never succeeded in obtaining possession of the whole, and it is possible that the Canaanith occupants may in course of time have been recognised as “strangers,” and had the right of retaining their land conceded to them. There was of course nothing to prevent a Canaanite from becoming the mortgagee in possession of a plot, but this would not constitute him a proper landowner, inasmuch as he would lose all interest in the property when the year of jubilee came round. That they possessed land in one of these two capacities is clear from the case of Araunah above cited. The stranger appears to have been eligible to all civil offices, that of king excepted (Deut. xvii, 15). In regard to religion, it was absolutely necessary that the stranger should not infringe any of the fundamental laws of the Israelites: he was forbidden to blaspheme the name of Jehovah (Lev. xxiv, 14), to work on the Sabbath (Exod. xxv, xxvi, xxvii, xlii, xliii).
was manifested. See Proselyte. The term "stranger" (πρόσκειται) is generally used in the New Test. in the general sense of foreigner, and occasionally in its more technical sense as opposed to a citizen (Eph. ii, 19). See Hospitality. For the מְאָנָא, zardah, or "strange woman," see Harlot.

Strangers, Communion of (Lat. communio peregrinus), a punishment to which contumacious clergy were subjected in the early Church. It is mentioned in the Amaulis of the Council of Riez (A.D. 439), of Agde (A.D. 506), and of Lerida (A.D. 539). There has been much discussion as to the nature of the punishment. It was first found that it actually amounted as a full communion, and was given in regard to the use of prohibited food to an uncircumcised stranger; for on this ground alone can we harmonize the statements in Deut. xiv, 21 and Lev. xvii, 10, 15. Assuming, however, that the stranger was circumcised, no distinction existed in regard to legal rights between the stranger and the Israelite. "One law" for both classes is a principle affirmed in respect to religious observances (Exod. xii, 49; Numb. xvi, 16) and to legal proceedings (Lev. xxii, 22, and the judges are strictly warned against any partiality in their decisions (Deut. i, 16; xxiv, 17, 18). The Israelite is also enjoined to treat him as a brother (Lev. xix, 34; Deut. x, 19), and to assist him in every case, even in the case of his own state in the land of Egypt. Such precepts were needed in order to counteract the natural tendency to treat persons in the position of strangers with rigor. For, though there was the possibility of a stranger acquiring wealth and becoming the owner of Hebrew slaves (Lev. xxv, 47), yet his normal state was one of poverty, as implied in the numerous passages where he is coupled with the fatherless and the widow (e.g. Exod. xxii, 21, 23; Deut. x, 18; xxiv, 17), and in the special directions respecting his having a share in the feasts that accompanied certain religious festivals (xvi, 11, 14; xxvi, 11), in the leasing of the corn-field, the vineyard, and the olive-yard (Lev. xix, 10; xxiii, 22; Deut. xxiv, 20), in the produce of the triennial tithe (xvii, 28, 29), in the forgotten sheaf (xxix, 19), and in the spontaneous production of the soil in the sabbatical year (Lev. xxv, 6). It also appears that the "stranger" formed the class whence the hirelings were selected (Exod. xii, 45; Lev. xxii, 10; xxxii, 6, 40). Such laborers were engaged either by the day (xix, 13; Deut. xxix, 15) or by the year (Lev. xxviii, 53), and appear to have been considerably treated, for the condition of the Hebrew slave is favorably compared with that of the hired servant and the sojourner in contrast with the "stranger". A few unfortunate class of strangers, probably captives in war or for debt, were reduced to slavery, and were subject to be bought and sold (ver. 45), as well as to be put to task-work, as was the case with the Gibeonites (Josh. ix, 21) and with those whom Solomon employed in the building of the Temple (2 Chron. ii, 18). The laws by which the Mosaic regulations respecting strangers presents a strong contrast to the rigid exclusiveness of the Jews at the commencement of the Christian era. The growth of this spirit dates from the time of the Babylonian captivity, and originated partly in the outrages which the Jews suffered at the hands of foreigners, and partly through the influence of certain sects, such as the Samaritans, by constant admixture with foreigners: the latter motive appears to have dictated the stringent measures adopted by Nchemiah (Neh. vi, 2; xiii, 8). Our Lord condemns this exclusive spirit in the parable of the good Samaritan, where he defines the term "neighbor" in a sense new to his hearers (Luke x, 36). It should be observed, however, that the proselyte (πρόσκειται) in the Sept. = ἡμις in Exod. xii, 19; xx, 10; xxii, 21; xiii, 9) of the New Test. is the true representative of the stranger of the Old Test., and towards this class a cordial feeling IX.—X. x x •
earlier bishop of Winchester, was born at Stratford, Warwickshire, England. He was raised to the archbishopsric in 1333, and died in 1348. He was arraigned on a charge of high-treason in the malversation of subsidies levied for the French war. The archbishop fled from Lambeth, and at Canterbury excommunicated his accusers, the king's councillors. He returned to Lon-
don, shrouding himself under the privileges of Parliament, was forced to submit to an investigation before a jury of his peers, and the quarrel was settled by an amicable intervention. Stratford was a very charitable man and a lenient governor. See Collier, Eccles. Hist. iii., 63-107.

Stratford, Nicholas, a learned English prelate, was born at Hemel-Hempstead, in Hertfordshire, in 1636, and admitted into Trinity College, Oxford, in June 1655. He graduated A.B. in 1656 he became fellow and master of arts. After taking orders, he was made warden of Manchester College, Lancashire. He was in 1670 made prebendary of Leicester St. Margaret, Church of Lincoln; in 1673 dean of St. Asaph, at which time he took his degree of D.D., and was appointed chaplain in ordinary to the king. In 1683 he was presented to the rectory of St. Mary's, Aldermanbury, London, and in the following year resigned his wardenship. He was consecrated bishop of Chester in 1689, holding that office until his death, Feb. 12, 1707. Besides some occasional Sermons, he published, A Discourse concerning the Necessity of Reforming with respect to the Errors, etc., of the Church of Rome (London, 1706; 4to; 2d pt. fol.);—Discourse on the Pope's Supremacy (ibid. 1688, 4to)—The People's Right to Read the Holy Scriptures Asserted (ibid. 1688, 4to)—The Lay Christian's Obligation to Read the Holy Scriptures (ibid. 1688-89, 4to).—Examination of Bellarmine's Fourteenth Note concerning the Unhappy End of the Church's Enemies.

Stratius, in Grecian mythology, was a son of Clymen- thus. The latter having been slain by a Thbean, Erginius, his successor, imposed on the Thbeans an annual tribute of a hundred bullock's in punishment. After twenty years, the messengers who were despatched to demand the tribute were sent back by Hercules empty, and with the loss of their hands and noses. Among them was Stratius, who died of his wounds (Pausan. ix. 37, 1).

Stratoblmata, in Grecian mythology, was one of the sons of ELECTRYON, all of whom fell in a contest fought with the Pterelaids about their father's herds (Apollod. ii. 4, 5).

Stratonice was the name of several persons in Grecian mythology. 1. A daughter of PLEUROS and XANHIPPE, and sister to Sterope (q. v.) and Leopontes (Apollod. i. 7, 7). 2. A daughter of king Theusius, and by Hercules the mother of Atromus (ibid. ii. 7, 3).

Stratten, John B., a minister of the Methodist Episcopal Church, was born at Stratford, Conn., in 1785. He was admitted on trial into the New York Conference in 1811. At the formation of the Troy Conference in 1832, he became one of its members, but the next year was transferred to the New York Conference, in 1834 to the New York Conference, and in 1857 to the Troy Conference. In 1861 he took a superannuated relation, and made his home in Jonesville, N. Y., where he died June 20, 1866. See Minutes of Annual Conferences of the M. E. Church, 1864, p. 99.

Stratton, Daniel, a Presbyterian minister, was born at Bridgeport, N. J., Sept. 28, 1814. He made a profession of religion in early life, received his academic training in the Lawrenceville High-school, N. J., and graduated at Princeton College in 1833. He studied theology three years in Princeton Theological Seminary, and completed his course in Union Theological Seminary, Prince Edward Co., Va., in 1837. On April 13, 1887, he was licensed by the West Hanover Presbytery, and soon after his licensure started to a Southern field of labor, his steps being directed to Newbern, N. C., where he was ordained and installed by the Orange Presbytery, and where for fifteen years he faithfully preached the Gospel, while with a holy example he illustrated its power. In 1862 he accepted a call to the Church of the Holy Cross, Richmond, Va., where he continued to labor among this people. He died Aug. 24, 1866. Mr. Stratton's power as a preacher consisted in appealing to the affections of his hearers. His ministry was pre-eminently a ministry of love. Again and again were strangers heard to say, "That man fills my idea of St. John." Though greatly successful as a preacher, he had no great influence for the faith among the people as a pastor and in social life. In the sick-chamber or the house of mourning he had no superiors, but few equals. See Wilson, Preb. Hist. Almanac, 1867, p. 300, (J. L. S.)

Stratton, Isaiah, a Baptist minister, was born at Salem, N. J., Oct. 25, 1782. He became a member of the Second Baptist Church in Philadelphia, Aug. 14, 1809, and was licensed by that Church to preach Feb. 12, 1812. He spent some time in preaching in Phila-
delphia and its vicinity. His ordination took place Feb. 20, 1814, when he became pastor of the Church at New Mills, N. J., now known as the Pemberton Church. He did not long survive his ordination, his death oc-
curring June 7, 1816. He was a young minister of great promise. See The Missionary Jubilee, p. 118. (G. S. S.)

Strachan, E. H. P., a Lutheran divine of Germany, was born Feb. 21, 1832, at Wittenberg. When fourteen years of age he attended the lectures at the university of his native place. From 1849 to 1851 he at-
tended the lectures at Leipzig, and after his return to his place of birth he was made magister, and in 1853 he was appointed adjunct to the philosophical faculty. He soon advanced, and in 1856 he was honored with the degree of Dr., and in 1864 he was appointed to the chair of Church history. In 1869 he was called to Dan-
zic, but, on account of his controversies with the Cal-
vins and Paepists, he accepted in 1875 a call to Ham-
borg. On his way thither he was made a prisoner and brought to Colberg. After his release, he started again for Hamburg, but was again imprisoned at the order of Frederick William of Brandenburg, because of his ven-
iment preaching against the Calvinists, and was brought to Kistlin, where he remained three years. In 1877 he was released through the mediation of the mediating agents of Dantzic, and died Dec. 13, 1882. He wrote, Dissertatio de Anno Ebrocorum Ecclesiasticus (Wittenberg, 1661).—Dissertatio de Compuo Talmudico-Hebraico (ibid. 1661).—Dissertatio de Compuo Julio-Constantiniano (ibid. 1662).—De Pensalientia Nicheritaria (ibid. 1664).—and especially Brestorium Chronicorum, translated into English by Richard Sault (last ed. 1744). See Koch, Gesch. des deutschen Kirchengestzes, iii. 407 sqq.; Jäcker, Allgem. Gelehrten-Lezexikon, s. v.; Fürst, Bib. Jud. iii. 392 sqq. (B. P.)

Straughan, Samuel L., a Baptist minister, was born in Northumberland County, Va., July 30, 1783, and at the age of about twelve years became a clerk in his uncle's store, where he continued until his nineteen years. He was ordained April 7, 1806. He was elected April 7, 1806, president of the Association March 20, 1806, and on the same day took charge of the Wicomico Church, soon taking rank among the first Baptist preachers of Virginia. In 1807 he took charge of the Morattico Church, which he held until his death. In 1814 he was appointed by the Missionary Society of Richmond to travel in Maryland, and continued to make visits into that state for a number of years. He died June 9, 1821. Mr. Straughan published nothing except three Circular Letters (1812, 1817, 1819). See Sprague, Annals of the Amer. Pulp., vii. 514.
straud, in Norse mythology, was one of the rivers of hell.

straulna. See Russian Sects.

straus, David Friedrich, a notorious German theologian, was born in Ludwigsburg, in Württemberg, Jan. 27, 1808. He was educated at Blaubeuren and Tubingen; in 1830 he was appointed a curate, and in 1831 professor's assistant in the seminar at Maulbronn; after which he proceeded to Berlin to study the Hegelian philosophy and to be under the influence of this system. He became under-teacher in the Theological Institute at Tubingen, and delivered lectures on philosophy in the university. While acting in this capacity, he wrote his great work, \textit{Das Leben Jesu}, which occasioned his dismissal from his situation. He accepted the position of teacher in the Lyceum at Ludwigsburg, which he resigned in 1836 to become private tutor at Stuttgart. While there he prepared a reply to his opponents in his \textit{Streitschriften} (1847), and in his \textit{Zwei friedliche Blätter} he sought to place his case in the most favorable point of view. He was appointed, by the Council of Education of Zurich, professor of divinity and of Church history in the university, February, 1839, but the appointment gave such dissatisfaction that Strauss was dismissed from office, with a pension, however, of a thousand francs. In 1848 he was an unsuccessful candidate for the Frankfort Parliament, but was elected to the Diet at Stuttgart, from which he withdrew in December on account of the unpopularity of his political conduct. After living for some years in Darmstadt, he returned in 1852 to his native town, where he died of cancer, Feb. 9, 1874, and was buried, by his own direction, without any church service. Strauss was unhappy in his domestic life. In 1841 he married a formerly beautiful and celebrated actress, Agnes Scheber, who admired his talents; but for five years of unhappy living together, the fruit of which was a daughter, they separated by mutual consent. Besides the above productions, Strauss published an attempt to resolve theology as a whole into philosophy (\textit{Christ. Glaubenslehre} [Tüb, 1840, 2 vols.]), and later devoted himself to romantic, political, and general literature, with occasional articles on theology, for which see Zachold, \textit{Bibl. Theol. s. v.}

The early training of Strauss, in the light of which the genesis of his principal work must be explained, is described by the author himself in the art. \textit{Justinus Kerper} in the \textit{Itih. Jahrb.} 1858, No. 7. It was largely filled by instruction through immediate relations with Strauss with respect to the credibility of the Gospel, especially in the historical question; and Strauss had come to the conclusion that the fact of the resurrection of Jesus Christ had long been recognized by the earliest disciples; and they were confirmed by the reading of Hegel's writings, of whose influence over him he remarks that they had freed him from certain religious and philosophical prejudices.

He now felt himself called to undertake a philosophical task which neither Hegel himself nor any of his followers had attempted to perform, namely, to carry forward the theological question by the methods adopted by Schleiermacher, in the dialectical spirit, the exercise of which resulted in urging him beyond the limits of the accepted faith. Under the teaching of Baur, sporadic doubts had risen in the mind of Strauss with respect to the credibility of the Gospel, especially in the historical question; and Strauss had come to the conclusion that the fact of the resurrection of Jesus Christ had long been recognized by the earliest disciples; and they were confirmed by the reading of Hegel's writings, of whose influence over him he remarks that they had freed him from certain religious and philosophical prejudices.

He now felt himself called to undertake a philosophical task which neither Hegel himself nor any of his followers had attempted to perform, namely, to carry forward the theological question by the methods adopted by Schleiermacher, in the dialectical spirit, the exercise of which resulted in urging him beyond the limits of the accepted faith. Under the teaching of Baur, sporadic doubts had risen in the mind of Strauss with respect to the credibility of the Gospel, especially in the historical question; and Strauss had come to the conclusion that the fact of the resurrection of Jesus Christ had long been recognized by the earliest disciples; and they were confirmed by the reading of Hegel's writings, of whose influence over him he remarks that they had freed him from certain religious and philosophical prejudices.
would be guided. These were an inviable annihilation of nature in all that comes to pass, and a consequent im-
possibility that supernatural facts should occur in the
course of history. In the progress of his inquiry, he
shows from Spinoza that the laws of nature are simply
the laws under which the course of the universe is con-
ducted and that a miracle therefore involves a contradiction in
the Deity. He asserts, against Nitzsch, that the dis-
tinction between a higher and a lower nature is without
meaning, "since the higher nature is still nature." The
miraculous history of the Redeemer is reduced to a nar-
ration of natural events. Jesus, a pious Jew, was at-
tended in the midst of the Barrabas by the utter
confession of his sin, and was baptized into Him who was to
come. Subsequently he attained to the consciousness
that he was himself the promised Messiah, and through
the energetic assertion of that consciousness, his high
moral principles, and his bearing, impressed many
people favorably, especially among the lower classes,
gathered about him a number of enthusiastic ad-
herents; but having incurred the hatred of the Pharisee-
sees, he fell before their hostility, and ended his life on
the cross. The miracles with which this simple history
was embellished in the Church had their origin in the
fancy of his devoted disciples, and came in time to be
received as facts. A conclusion was appended to the
book, in which the author endeavored to replace the
historical with an ideal Jesus. He advanced the idea
that the God-man finds his actualization, not in the
individual, but in the human race as a whole. Later pub-
llications showed that under the force of adverse crit-
cisms the author had modified his views so far as to re-
gard the life of Jesus as extraordinary and Jesus him-
self as a religious genius, endowed with power to con-
trol the minds of men, and perhaps with powers of phy-
ical healing; and the concessions were carried so far (in pt.
ii of Vergängliches und Bleibendes) as to compel the recog-
nition in Jesus of the highest "that can be known or thought in religious things," and the acknowl-
agement that without him present in the mind no complete
piety is possible, "so that the substance of Christianity is
in him preserved to us." The earlier position was,
however, eventually reasserted by Strauss. In the pref-
ace to Studien and Charakteristiken, written in August,
1830, he recalls the opinion he had expressed in favor
of the authenticity of the Gospel of St. John, and in
the 4th edition of the Leben Jesu he expresses regret at
having nicknamed his sword, and returns to the negations
of the 1st edition. Strauss had been charged with
having given too little attention to the authenticity of
the Gospel of St. John, finding in his work no reposi-
tion, but when Baur's tendency-theory was published, he
expressed entire assent to its principles. It would seem
that in this utterance he had not only hacked, but
broken into pieces, his sword; for the tendency-criticism
has no place for the mystical theory: the "primitive
idea of Christianity in historical garb" cannot be har-
momized with "legend invented without purpose." This,
however, did not hinder him, when celebrating the twen-
ty-fifth anniversary of the issue of his Leben Jesu, from
expressing the opinion that the teachings of the book
had been absorbed into the culture of the day and into
the veins of science. He asserts, moreover, that during
these years not a single line has been written on the
topics of which it treats in which its influence may not
be seen. Such an illusion respecting the state of the
Church and of theological science can be explained only
in view of the "isolated life" to which he was, as he
explained, confined. The speculations of the book
have passed, as Griesbach has maintained, into the "foreground of history"; and in but narrow circles in other lands can their influence be observed. Of responses to Strauss we notice
Ullmann, Historisch oder Mythisch? (1838); id. Noch ein
Wort über d. Personen Christi, etc., in Stud. u. Krit. 1838;
Tholuck, Glaubwürdigkeit d. evang. Geschichte (2d ed.
1838); Hug, Geschichten ü. d. Leben Jesu von Strauss
der, Leben Jesu, 1837 (English, N. Y. 1848).—Herzog,
Real-Encyklop. s. v. SEE MYTHICAL THEORY.

Strauss, Gerhard Friedrich Abraham, a
German writer, was born Sept. 24, 1786, at Iserlohn.
He studied at Halle and Heidelberg, and after having
served as pastor in different places, he was called in
1822, as court preacher, to the cathedral in Berlin, where
he died Feb. 15, 1851. Strauss and his father were both
as pastor, preacher, and author. Of his many writings,
we mention, Glockentöne, oder Erinnerungen aus dem
Leben eines jungen Gelehrten (7th ed. Leipsic, 1840. 3
vols.):—Die Tugde im Jordan (Elberfeld, 1822);—
Krona Waldführer nach Jerusalem (ibid. 1820-28, 4 vols.;
Engl. trans. 1825.);—Das große Handbuch im unsterblichen
Jahr in seinen Zusammenhange (Berlin, 1869) ;—A bending
Glockentöne, Erinnerungen eines alten Gelehrten aus
seinem Leben (ibid. 1868). Besides these works, there
are a large number of published sermons, preached on
different occasions and subjects. See Theol., Christ.
Unser-Leben, s. v.; Regensburger Conversations-Lehrbuch,
S. v.; Zuchold, Bibl. Theol. ii, 1283-87; Winer, Hand-
buch der theolog. Literatur (see Index). (B. F. )

Straw (טב), tēbôn [once "stubble", Job xxii. 18;
once "chaff", Jer. xxiii. 28; once the cognate תבון,
mītnēb, Is. xxv. 10; Sept. ἄγωνον; Vulg. pælo].
Both wheat and barley straw were used by the ancient
Hebrews chiefly as fodder for their horses, cattle, and
Camels (Gen. xxiv. 25; 1 Kings iv. 28; Is. xxi. 7; Lxx.
25). The straw was probably often chopped and mixed
with barley, beans, etc., for provender (see Harper, Obs.
London. 1727.); ibid. 292, 429; Wilkinson, Ancient Egypt
[ibid. 1854. i, 48]. There is no Intimation that straw
was used for litter; Harper thinks it was not so em-
ployed. The litter the people now use in those coun-
tries is the animal's dung, dried in the sun and bruised
between their hands, which they heap up again in the
morning, and sprinkling it in the summer with fresh water
keep it from corrupting (Harmer, Obs. p. 424). Straw
was employed by the Egyptians for making bricks (Exod.
v. 17, 16); it was chopped up and mixed with the clay
to make them more compact and to prevent their cracking
(Willkinson, Ancient Egypt, ii, 194). See Buck. The
ancient Egyptians resorted their corn close to the ear
and afterwards cut the straw close to the ground (ibid. p. 194)
and laid it by. This was the straw that Pharaoh re-
fused to give to the Israelites, who were therefore com-
pelled to gather "stubble" (טבון, kash), instead, a materi-
ally of considerable difficulty, seeing that the straw itself
had been cut off near to the ground. The stubble (קשת
frequently alluded to in the Scriptures may denote
either the short standing straw meadow, or the corn
which was cut off short (hence the allusions in Is. v.
24; Joel ii. 5), or the small fragments which would be left
behind after the reaping (hence the expression "as the
kash before the wind" [Ps. lxx. 9, 13; Is. xii. 2; Jer.
xxiii. 24]). See AGRICULTURE.

Straw Day, a term used in many parts of England
to designate St. Stephen's Day, because on that day straw
was anciently blessed.

Strawbridge, Robert, an early local preacher
of the Methodist Episcopal Church, was born at Drummer's
Nave, near Carrick-on-Shannon, County of Leitrim, Ire-
land, and came to the United States some time between
1760 and 1765, settling on Sam's Creek, Frederick Co.,
Md. He began to preach in his own house, and in 1787
was joined in his labors by Robert Williams, and in the
year following by John King. In 1775 his name ap-
ppears on the Minutes as the "first one who associated
under Mr. Ashbury, but there is no evidence that he con-
tinued in the work. In 1775 his name again appears as second
preacher on Frederick Circuit, but he did not seem to
have had much regard for Church order, and clerned
the right to administer the ordinances of baptism and
the Lord's supper. In 1776 he moved his family to the
farm of captain Bridgely, who presented to him the use of it during life. He took charge of the society at Sam's Creek, and at Bush Forest, Hartford Co., and continued to be their preacher for five years. He died in the summer of 1781. See Sprague, Annales of the Amer. Pulpit, vii, 3; Simpson, Cyclop. of Methodism, s. v.

**Stream** is the rendering in the A. V. of the following words in the original. See TOPOGRAPHICAL TERRA.

1. **אָפָּה** (Job vi, 15; Ps. cxxxvi, 4; “brook”—rivers. xiii, 1 [2]; “channel.” 2 Sam. xxii, 16; Ps. xvi, 15 [16]; Isa. viii, 7; elsewhere “river”), properly denotes a violent torrent, sweeping through a mountain gorge, like a pipe. It occurs only in the poetical books, and is derived from a root **אָפָּה** (siphon), signifying “to be strong.” See **Channel**.

2. **גֶּשֶּׁה** (Num. xxi, 15), literally an outpouring, is a place where the torrents from the mountains flow down into the valleys and plains, i.e. a ravine. See **Valley**.

3. **ניֹֻּה** (Isa. xxxiii, 21; “brook”), xix, 6, 7, 8, xxiii, 3, 10; “flood,” Jer. xlv, 78; Amos viii, 8, 9; elsewhere “river”), is an Egyptian word, generally applied to the Nile, or to the *canals* by which Egypt was watered. The only exceptions to this usage are found in Dan. xii, 5, 6, 7. See **Nile**.

4. **גַּרְבַּל** (Isa. xxx, 25; “course,” xlv, 4), denotes strictly a delaying rain; hence an overflowing river. See **Flood**.

5. **כִּזְרָא** (Ps. lxxxvii, 16; Cant. iv, 15; “flood.” Exod. xv, 8; Ps. lxxxvii, 44; Isa. xlv, 3; elsewhere “running” or “flowing” water), signifies a trickling rill, and is hardly a determinative at all.

6. **נַחַל** (Ps. lxxxvii, 20; Isa. xi, 15; xxvi, 12; xxx, 28, 33; xxxiv, 9; xxxiv, 6; xxxvi, 6; lxvi, 12; Amos vi, 24; elsewhere “river,” “brook,” or “valley,” occasionally “flood”), is a term applied both to the dry torrent-beds (Num. xxii, 12; Judg. xvi, 4) and to the torrent itself (1 Kings xvii, 3). It corresponds with the Greek χαλαῖον, the Italian fiume, and the Indian नालिका. See **Valley**.

7. **נַחָלָה** (only found in Ps. cxxiv, 4), is merely the fem. of the preceding. See **Brook**.

8. **כֶּלֶג** (Ps. xlii, 4 [3]; elsewhere “river” or “water”), denotes an artificial rivulet or channel for watering land. See **Irrigation**.

9. Chaldee. **כִּזֶּרֶב** (Dan. vii, 10; elsewhere “river”), corresponds to the Heb. יִנָּר, nahr, which designates a perennial current of water, and is the most regular term. See **River**.

10. **בֵּרְאוֹג** (Luke vi, 48, 49; elsewhere usually “river,” sometimes “flood” or “water”) is the proper Greek word for a river of any kind. See **Water**.

**Stream of Egypt** (כנָרָלֶק הָבַע, נַחַל מִשְׁרִיר, Sept. *Paroecopa* [pl.]; Vulg. torrentes Egypti) occurs once in the A. V. instead of “the river of Egypt,” apparently to avoid tautology (Isa. xxvii, 12). The best translation of this doubtful name, for it expresses the sense of the Hebrew while retaining the vogue it has, so long as we cannot decide whether it is applied to the Pelusian branch of the Nile or the stream of the Wady el-Arish. See **Nile**; **River of Egypt**.

**Streaneshalb**. **Synod of**. See **Whitby, Council of**.

**Streater**. Robert, an English painter, was born in 1624. Upon the restoration of Charles II he was made the king's sergeant-painter, and was greatly prized by him. He died in 1680. His principal works are in the Theatre of Oxford and the Chapel at All-Souls' College: The Battle of the Greeks with the Goths is at Sir Robert Clayton's, and Moses and Aaron in St. Michael's Church, Cornhill.

**Street** (יוֹרֵחַ, chayah, properly out of doors; בָּהַל, bahal, chayah, properly a wide place; נֲשָׂא, shak, shak, properly an alley; נָהָר, a broad place; רֶפֶס, a passage). The streets of a modern Oriental town present a great contrast to those with which we are familiar, being generally narrow, tortuous, and gloomy, even in the best towns, such as Cairo (Lane, i, 25), Damascus (Porter, i, 30), and Aleppo (Russell, i, 14). Their character is mainly fixed by the climate and the style of architecture, the narrowness being due to the extreme heat, and the gloominess to the close and unbroken covering of the most part, into the inner court. As these same influences existed in ancient times, we should be inclined to think that the streets were much of the same character as at present. The opposite opinion has, indeed, been maintained on account of the Hebrew term **rechob**, frequently applied to streets and properly meaning a wide place. The specific signification of this term, however, is rather a court-yard or square. It is applied in this sense to the broad open space adjacent to the gate of a town, where public business was transacted (Deut. xiii, 16), and, again, to the court before the Temple (Ezra x, 5) or before a palace (Ezra ix, 0). Its application to a street may point to the convenient abuts of an al fresco, a sort of market or promenade. The term **rechob** means a street of sufficient **autic** width of the main street, or it may perhaps convey the idea of public/community rather than of width, a sense well adapted to the passages in which it occurs (e.g. Gen. xix, 2; Judg. xix, 15; 2 Sam. xxii, 12). The street called **Straight** (q. v.) in Damascus (Acts ix, 11) was an exception to the rule of narrowness; it was a noble thoroughfare, one hundred feet wide, divided in the Roman age by colonnades into three avenues—the central one for foot passengers, the side passages for vehicles and horsemen going in different directions (Porter, i, 47). The shops and warehouses were probably collected together into bazaars in ancient times as in modern times. We read of the barker's bazaar (Jer. xxxvii, 21), and of the wool, brazier, and clothes bazaar (ayyopot) in Jerusalem (Josephus, War, v, 8, 1), and perhaps the agreement between Benhadad and Ahab that the latter should make streets in Damascus (1 Kings xx, 94) was in reference rather to bazaars (the term chayas here used being the same as in Gen. xx, 11, 21), and the building of a street the establishment of a *jus commercii.* A lively description of the bazaars at Damascus is furnished us by Porter (i, 58-60). The broad and narrow streets are distinguished under the terms **rechob** and **chayas** in the following passages, though the point is frequently lost in the A. V. by rendering the term **abrech** in Gen. xiv, 8; Prov. vi, 16; vii, 12; xxii, 13; Jer. v, 1; ix, 21; Amos v, 16; Nahum, ii, 4. The same distinction is apparently expressed by the terms **rechob** and **shak** in Cant. iii, 2, and by **παρικαὶ** and **μυῖα** in Luke xiv, 21; but the etymological sense of **shak** points rather to a place of concourse, such as a market-place, while **myia** is applied to the **Straight** street of Damascus (Acts ix, 11), and is also used in reference to the Pharisees (Matt. vii, 2) as a place of the greatest publicity; it is therefore doubtful whether the contrast can be sustained. Josephus describes the alleys of Jerusalem under the term **στερματος** (War, v, 8). The term **shak** occurs elsewhere only in Jer. xvi, xxxix, xlii, 4. The word **shak**, already noticed, applies generally to that which is outside the residence (as in Prov. vii, 12, A. V. “she is without”), and hence to other places than streets, as to a pasture-ground (Job xiii, 17, where the A. V. requires emendation). That streets occasionally had names appears from Jer. xxxxi, 18; Acts xi, 11, but they were generally understood may be inferred from the notices of the pavement laid by Herod the Great at Antiocchio (Josephus, Ant. xvi, 5, 3) and by Herod Agrippa II at Jerusalem (Phil. xx, 9, 7). Hence pavement forms one of the peculiar features of the ideal Jerusalem (Tob. xiii, 17; Rev. xxxi, 21). Each street and bazaar in a
Street, Thomas, D.D., a Presbyterian minister, was born in 1823. After passing through the usual course of study, literary and theological, he was admitted to the ministry. In 1854 he accepted a call to the pastorate of the Presbyterian Church of Green Hill, Philadelphia, where he remained six years, preaching with great acceptance and success. In 1860 he accepted a call to the pastorate of the Presbyterian Church at York, Pa., where he continued four years, and resigned to accept a call from the North Presbyterian Church of New York city. He remained in this position until 1873, when he was called to the pastorate of the Church in Cortland, N.Y., and continued until released by death, suddenly, in the ears, on his way from Cortland to Syracuse; Oct. 15, 1878. (W.P.S.)

Street, Christian, a Lutheran minister, was born in New Jersey June 7, 1749, and graduated at the College of Pennsylvania in 1768. He pursued his theological course under Dr. H. M. Mühlenberg, and was licensed to preach by the Synod of Pennsylvania in 1769, in the same year taking charge of the Church in Easton, Pa., where he continued for ten years. He served as chaplain of the 3d Virginia Regiment in the Revolutionary war, and was subsequently settled over a Church in Charleston, S.C. In July, 1782, he took charge of New Hanover, Pa., but in July, 1785, assumed the pastorate of a Church in Winter, Va., his field of operations extending for more than fifty miles. He died March 10, 1812, honored and reverenced by the whole community. See Sprague, Annals of the Amer. Pulpit, ix, 48.

Street, Lawrence, a Presbyterian minister, was born in Washington County, Pa., in 1820. He received careful parental and religious training; graduated at Jefferson College, Pa., in 1843; studied theology privately under the Rev. Nathaniel West, D.D.; was licensed by the Presbytery of Erie June 29, 1838, and ordained by the same presbytery in June, 1839, as pastor of Watsburgh Church, Pa. He subsequently became pastor of Sunville and Fairfield churches, and died Aug. 5, 1858. Mr. Streit was a faithful and devoted servant of Christ. See Wilson, Pref. Hist. Almanac, 1890, p. 122 (J. L. S.)

Strickland, Isaac L. G., a Methodist Episcopal minister, was born in 1809, admitted on trial into the Tennessee Conference in 1834, and into full connection in 1836. He was transferred to the Texas Mission, Mississippi Conference, in October, 1838, and appointed to Montgomery Circuit; and in March, 1839, to Brazoria Circuit, where he died, July 2, 1839. He was an excellent preacher, animated by a spirit of unwavering and self-sacrificing devotion to the cause of the Redeemer. See Minutes of Annual Conference, iii, 58.

Strickland, John, a minister of the Methodist Episcopal Church, South, was admitted into the Georgia Conference Jan. 10, 1850. In the civil war he was chaplain to the 40th Georgia Regiment, and on his way home contracted the illness of which he died. See Minutes of Annual Conference of the M.E. Church, South, 1863, p. 453.

Strife. In the early Church it was considered a privilege to make oblations to the Church, and a sort of lesser excommunion to be debarred from doing so. The officers would not receive the offerings of persons that were at enmity or variance with their brethren, neither at the altar nor in the treasury. This custom was grounded upon the rule of our Lord (Matt. x. 23). Further, all open enmity and quarrelling, strife, envy, and contention, were punished with excommunication, as tendencies towards, and lower degrees of, murder. See Bingham, Christ. Antiq. bk. xvi. ch. x. § 17.

Strigel, Victorin, a Melanchozian Lutheran and professor at Jenas, was born Dec. 26, 1514. He studied philosophy and theology at Freiburg and Wittenberg, and in 1544 began to lecture in those departments. The Smalcald war interrupted his career at Wittenberg, and he drifted about in consequence to Magdeburg to Königsberg, and to Erfurt, where he renewed his professorial labors, though not regularly appointed to a chair. A settlement for him was obtained when the Ernestine gymnasium at Jenas was founded and Melanchozian refused to connect himself with its faculty, upon which Strigel was invited to take the vacant position. He arrived at Jenas March 3, 1548, with twenty students, and gave himself earnestly to the work of promoting the growth and prosperity of the institution, whose first rector he became. In this work he was assist ed by Strigel, Schneip, Justus Jonas (q. v.), and others with whom he labored in entire harmony; but when
Flaccius (q.v.) arrived in 1557, a period of disturbance was introduced. The Flaccianists urged duke John Frederic II to promulgate a confession of faith which should at the same time be a confutation of all errors, and the duke committed the preparation of the document to Strigel, Schnepf, and superintendent Hügel, all of whom protested against its promulgation as unnecessary. Strigel was never at the faculty rather than engage in the work asked at his hands, and finally declared openly that he adhered to the teaching of Melancthon's Loci of 1544. When the Flaccian Confutation of 1559 was issued and was given almost symbolical authority in the churches of Ernestine Saxony, Strigel repudiated it and declared that he could not accept the confutation as binding authority. The duke thereupon caused both him and Hügel to be seized by armed men on the night of March 25, and imprisoned until August, when, after endeavors to force him to a change of views by means of disputations with Flaccius and of threatenings, he was liberated in deference to the intercession of the university, the most prominent evangelical princes, and even the emperor; but he was ordered to remain quiet and not depart from Jena until he should have made satisfactory reply to the questions on which his views were required, a sentence which became the more easy to fulfill when both had been allowed to take back more or less freedom of release from prison. The brutal treatment he had undergone excited general indignation, and the duke was forced to yield so far as to appoint a colloquy between Strigel and Flaccius, which began Aug. 2, 1560, at Weimar. Five points of doctrine were to be discussed, but only the first, concerning the relation of the human will to divine grace in the work of conversion, was taken up. Strigel advocated, as always, the synergistic view, and pressed his arguments with such force and skill that Flaccius allowed himself to be drawn into the assertion that original sin is the very substance of man in his natural state. After this colloquy the temper of the court began to change; and when the Flaccianus persisted in pressing for a condemnation of Strigel despite an intention that the duke desired peace, the extreme measure was taken of depriving Flaccius of his professorship and expelling him with his followers from the university. Strigel, on the other hand, was rehabilitated in his chair; a declaration was issued and a visitation of the churches was ordered to pacify and unite their members. The plan encountered strong opposition, however, and Strigel, to avoid further controversy, undertook a journey to Leipsic in the autumn of 1562, and then refused to return, though urged to come back by a deputation from Jena. The elector permitted him to continue his labors at Leipsic and at the field of his future labors. He chose Leipsic. In March, 1563, he began to lecture on philosophy and theology, and in connection with his general duties he prepared a commentary on the Psalms, in which his synergistic views were clearly expressed. Theodium theologorum pursued him into this refuge also, and in February, 1567, the rector closed his lecture-room and forbade the further exercise of his professorship. Appeal to the elector produced no result, and he once more sought a place where he might rest in peace. He went first to Amberg and then to Heidelberg, where he became professor of ethics, and engaged in teaching with his usual success and acceptability; but he soon afterwards died, on June 26, 1569. He ranks among the most gifted of Melancthon's pupils, and among the influential men of his time with respect both to his academic and ecclesiastical position and to his literary activity. Strigel's works include philological studies (Forbietrian philology (John the Dialectic), and theology. We mention, Hypommemata in Omnes Libros N. T., etc. (Lips. 2 pts. 8vo) — Loci Theologici, etc. (Neustadt, 4 pts. with appendix, edited by Pezel, 1581-84). Hypomn. in Epistom. Philosophicæ Moralis F. Melancthon. (also by Pezel, ibid. 1582). Strigel included much compulsion in his works, though himself a clear and strong thinker. He possessed an extraordinary memory, and followed the principle of a common ownership in literary property; but he made no secrets of his method, and desired others to draw from him in a similar way. In other respects he was a worthy character, if a passionate and ambitious nature be left out of the account. See Adam, "Lice Theol. p. 417 sqq.;" Bayle, Diet. k. v.; Ernemann, De Strigeliamismo (Jena, 1658; Hanover, 1675, 4to); Merz, Hist. Vite et Controrera, F. Strigliii (Tib., 1782); Otto, "De Strig, Liberiosis Mentis in Eccl. Luth. Vindiciae (Jena, 1843).

Strigolika. See Russian Sects.

Strigonia (or Gran, in Hungary), the Council of, was held in 1114 by Lawrence, the archbishop. Sixty-five canons were published.

2. Orders that the epistle and gospel be explained every Sunday to the people in large churches; in small parishes the Creed and the Lord's Prayer.
3. Orders that in all large churches there shall be clerks of every degree.
4. Orders that the people shall come to the sacraments of penance and the holy eucharist at Easter and Christmas; the clerks at all the great festivals.
5. Orders that ignorant priests shall be deposed.
6. Enacts a penalty for not calling in the priest in time of danger of death: In place of death, the penalty to be enforced against the wife or relations of the deceased; or, if he resist, against his agent and two of the old persons of the place in which he lived.
7. Forbids to raise to the episcopal a married man, unless with permission from a council.
8. Forbids bishops and priests to keep slaves.
9. Forbids to consecrate a church which is not endowed.
10. Forbids to ordain a cleric without a title.
11. Directs that the bishop shall regulate the nourishment and manner of life to be observed by canons, according to their rule.
12. Declares that the children of persons who have voluntarily embraced a canonical life may not lay claim to their property without their consent.
13. Forbids deacons and priests to marry after ordination.
14. Directs that abbeys shall be seldom absent from their houses, and that they shall stay for at least six weeks, and after notice given to the bishop.
15. Forbids abbeys to use the episcopal ornaments, and denies to them the power of preaching, hearing confessions, and baptizing.
16. Forbids to confer holy orders upon monks.
17. Directs that nothing be said or sung in church but what has been ordered in synod.
20. Relate to the same vice among the laymen.
21. Directs that in every city the bishop shall have two houses for the incarceration of penitents.
22. Directs that a woman thrice deserting her husband shall, if noble, be put to penance, without any hope of ever being restored to him; if a woman of low degree, sold as a slave. Also orders that a husband slandering his wife, by accusing her of adultery, shall suffer the same punishment. Orders the same penalties against a husband deserting his wife from motives of hatred and avarice, and gives liberty to the wife in such case to marry another.
23. Deposes any cleric marrying a second time, or marrying a widow or divorced woman.
24. Appears to allow of priests who have married twice exercising their office, if their wives consent to separate from them.
25. Forbids clerks to keep taverns, or to practice usury: deposes those who drink at taverns without sufficient cause.

See Mansi, Supp. vol. ii, Coll. 283, etc.

String (or String-course), a projecting horizon...

Lincoln Cathedral, cir. 1229.
Stringed Instrument is the rendering, in the A.V., of two Heb. words: 1. נְגִיָּד, negidáh (Hab. iii, 19), which likewise denotes the music of such an instrument (and so rendered in Lam. v, 14), or a “song” adapted to such an accompaniment (and so rendered in the titles of many psalms), or in derision (Job xxx, 9; Lam. iii, 14). See NEGINAH. 2. יַגְיַל, minni (only found in the plnr., Psa. cl. 4; “whereby,” xlv. 8 (9)), which is of uncertain derivation and signification, but probably denotes the chord of some musical instrument. The Hebrews had various stringed instruments, chiefly or exclusively of the harp or guitar form; and similar ones have always prevailed in the East, if we may judge from the specimens exhibited on the Egyptian and Assyrian monuments. See MUSICAL INSTRUMENTS.

Stringfield, James King, a minister of the Methodist Episcopal Church, South, was born in Nashville, Tenn., March 27, 1839. After receiving a liberal education, he was licensed to preach in June, 1856, and admitted on trial into the Holston Conference in October, 1858. In 1862 he became chaplain in the Confederate army, and in 1869 was appointed professor at Asheville, N. C. His labors there were very brief, as he died suddenly of inflammation of the brain, June 2, 1870. See Minutes of Annual Conferences of the M. E. Church, South, 1870, p. 410.

Stringfield, Thomas, a minister of the Methodist Episcopal Church, South, was born in Kentucky in 1796. He embraced religion when only eight years of age, and in his twelfth year removed to Alabama. In the War of 1812 he became a soldier under Gen. Jackson, and maintained his Christian character throughout. He joined the Tennessee Conference Nov. 10, 1816, and when the Holston Conference was set off he became a member of it. In 1825-26 the Gallagher controversy was at its zenith, and Mr. Stringfield felt called upon to defend Methodism against the caricatures and slanders of its enemies, which he did at the expense of great labor and of thousands of dollars. In 1828 he obtained leave to be without an appointment, owing to feeble health. From 1829 to 1832 he was agent for the Holston Conference Seminary, and in 1836 was elected

Strimelites (στριμηλίται, micaceolites) is the most important work of Clement (q. v.) of Alexandria, of which the full title is Gnostic Dissertations concerning the True Philosophy. This work is designed to show, in opposition to the Gnostics, that Christians had their secret and deep mysteries, and were, in fact, the only people who deserve the name of Gnostics, as being alone truly learned on these subjects. For a full analysis of the work, see Biddle, Christ. Antig., p. 97-107.

Strong, Cyprian, D.D., a Congregational minister, was born at Farmington, Conn., May 26, 1744. He graduated at Yale College, 1763, entered the ministry Oct. 7, 1766, and was ordained, Aug. 19, 1767, pastor in Portland, Conn., where he remained until his death, in 1811. He published, A Discourse on Acts ii, 42, in which the Practice of Giving Things Commonly Examined (1780); - Animadversions on the Substance of Two Sermons Preached at Stepney by John Lewis, A.M., entitled "Christian Forbearance to Wrink Consolacies a Duty of the Gospel," etc. (1789); — An Inquiry wherein the End and Design of Baptism, etc., are Particularly Considered and Illustrated (1786); — A Second Inquiry into the Nature and Design of Christian Baptism (1786); and several occasional Sermons. See Sprague, Annals of the Amer. Pulpit, i. 651.

Strong, John D., a Presbyterian minister, was born at Rockaway, N. J., Jan. 26, 1821. He prepared for college at Millville Academy, N. J., graduated at Williams College, Mass., in 1846, and at Auburn Theological Seminary, N. Y., in 1851; was licensed by Cayuga Presbytery in 1856, and in 1858, leaving the seminary he went out West and preached at Fort Madison, la. He afterwards became pastor successively of the Stone Church, Iowa City, Springfield, la.; Fairplay,
James town, Lowville, and Leeds, Wis. He died May 14, 1859. During his ministry two churches were organized under his care, and many revival seasons were granted in answer to his prayers and labors. See Wilson, Pref. Hist. Almanac, 1860, p. 122. (J. L. S.)

Strong, Jonathan, D.D., a Congregational minister, was born at Bolton, Conn., Sept. 4, 1764. He graduated at Dartmouth College in 1786, and was ordained, July 20, 1787, in the church of Mass., where he remained until his death, Nov. 9, 1814. He published, An Oration on the Fourth of July (1810):— several occasional Sermons:— Besides articles in the Panoplist and other magazines. See Sprague, Annals of the Amer. Pulpit, ii, 275.

Strong, Nathan, D.D., a Congregational minister, was born at Coventry, Conn., Oct. 16, 1748. He graduated at Yale College in 1768, was ordained, June 17, 1772, and was ordained, Jan. 5, 1778, pastor of the First Church, Hartford, where he remained until the close of life, Dec. 25, 1816. He published, The Doctrine of Eternal Misery Consistent with the Infinite Benevolence of God (1796):— Two volumes of Sermons (1798, 1800). In 1799 he was the author of the Hartford Selection of Hymns, a number of them written by himself; and in 1800 he was the originator of the Connecticut Evangelical Magazine. A number of occasional Sermons were also published by him. See Sprague, Annals of the Amer. Pulpit, ii, 34.

Strong, Paschal Nelson, a minister of the (Dutch) Reformed Church, was born at Setauket, L. I., in 1798, graduated in 1819. Dr. Strong was the first ruling elder in the church of Northampton, Mass., who came to this country in 1830. At thirteen years of age he entered Columbia College, and graduated with the highest honors in 1810. He studied theology with Dr. J. M. Mason, and was licensed in 1815 by the Presbytery of New York. He and his classmate, Rev. John Knox, were immediately called by the presbytery to be pastors of the Church in New York, with Drs. Kuyper and Milledoler, and were ordained and installed together by the Classis of New York, July 14, 1816. His ministry was brief, but brilliant, popular, and powerful. He was an eloquent preacher, a fine classical and exegetical scholar, evangelical in sentiment, and characterized by deep personal piety and faithful pastoral service. A pulmonary disease, for which an ocean voyage and a visit to the West Indies brought no relief, ended his days, April 7, 1825, in the island of St. Croix, where his grave and monument still are. His death was peaceful and happy. His publication was a sermon, which attracted much attention at the time, preached Nov. 17, 1822, after the yellow fever of that year in New York, and entitled The Penitence a Punishment for Public Sin. He possessed fine executive talents, and it was chiefly through him that the Board of Domestic Missions of the Reformed Church was organized. See Life of Dr. Livingston, p. 399, 400; Sprague, Annals of the Amer. Pulpit, IX, ii, 191; Corwin, Manual of the Ref. Ch. p. 224. (W. J. R. T.)

Strong, Thomas M., D.D., a (Dutch) Reformed minister, and brother of Rev. Paschal N. Strong, was born at Cooperstown, N. Y., in 1797, graduated at Columbia College in 1816, received his theological education under Dr. J. M. Mason and at Princeton Seminary, and settled in 1819 in the Presbyterian Church in Norfolk, Va. Thence he removed to the Associate Reformed churches of Chamburgh and Shippensburgh, Pa., 1821-22. In 1822 he accepted the call of the Reformed Church of Flatbush, L. I., where he remained until his death in 1861. Sehem does God give to the church are more finely rounded and exalted character. "Resolve, without arrogance; modest, without timidity: positive in his convictions, without pride of will; persevering, without pretension; diligent, without ostentation of intentions; firm, without obstinacy; tena-
Strophus, an epitaph applied in Greek mythology to Mercury in the character of porter ( Aristoph. Plutus, 1153).

Strophus, the name of several persons in Greek mythology. 1. The father of Scamander (Hom. Il. v. 49). 2. A son of Crisus, king of Phoecia and father of Pytheas (Paus. ii. 25. 8; Euth., Oros. 38. 29; Pausan. ii. 29. 4). 3. A son of Pylades and Electra (Pausan. ii. 16. 7).

Stroth, Friedrich Andreas, a German scholar, was born at Tribsees, in Pomerania, March 5, 1750. For some time he was director of the gymnasium at Coburg, and died June 28, 1785, at Lauchstädt. He wrote, Dissertatio de Codice Alexandrino (Halle, 1771) — Progr. comm. eod. Lectiones nominata Codicis Graeci V. T. Echlebat, qui Venetia in Bibliotheca S. Marci Asservatur (ibid. 1775) — Symbola Critica ad illustrandum et Emendandum Alexandrinorum Interpretum Versionem ex Justino Martyre aliisque Patribus Eclecticae Collecte, reprinted in Eichhorn’s Repertorium der mehrmals in bibliotheken iii. 513; vi. 124, 183; xiii. 158, 168, 188 (Leips. 1778-83). — Index Criticus Omnium Codiciv Versionis Alexandrino Manuscriptorum (ibid.), v. 92, 134; vii. 177, 205; xi. 45, 72. See Winer, Handbuch der theolog. Literatur, ii. 794; Flurl., Bibl. Jud. iii. 384. (B. F.)

Stroud, Aea B., a Methodist Episcopal minister, was born April 11, 1807. He was converted in 1823, admitted on trial by the Ohio Conference in 1824, and appointed to serve the Kankakee Circuit. The following appointments were filled by him: Letart Falls Circuit, Charleston Circuit, Parkersburg and Athens circuits, New Haven, Eaton, Franklin, Monroe, Urbana, South Charleston,-reply, Cincinnati Mission, and Milford Circuit, where he died, Sept. 28, 1848. He was a faithful preacher and a most self-sacrificing pastor. See Minutes of Annual Conferences, iv. 386.

Stroud, Thomas D., a minister of the Methodist Episcopal Church, South, was received on trial in the Memphis Conference in 1840. In 1841 he was transferred to the Arkansas Conference, and continued to labor until a few days previous to his death, November 1844. See Minutes of Annual Conferences of the M. E. Church, South, 1845, p. 28.

Strout, George D., a minister of the Methodist Episcopal Church, was born at Cape Elizabeth, Me., Jan. 24, 1820, and united with the Church April 24, 1820. He was licensed as a local preacher in September, 1827, and was admitted into the Maine Conference in 1830. He was ordained deacon in 1832, and elder in 1834. His ministry was spent in the Maine and East Maine conferences, and lasted until closed by death, at Pittston, Oct. 22, 1868. See Minutes of Annual Conferences, 1869, p. 145.

Strout, Joseph C., a minister of the Methodist Episcopal Church, was born at Cornish, Me., in 1833. In 1846 he was converted, and united with the Church. He was educated in the East Maine Conference Seminary, at Buckport, and entered the Maine Conference in 1857. His ministry was very successful, but brief, as he died Jan. 25, 1862. See Minutes of Annual Conferences, 1862, p. 116.

Strout, Oran, a minister of the Methodist Episcopal Church, was born at North Poland, Me., Oct. 19, 1841, and united with the Church when nineteen. He was admitted to the East Maine Conference in 1863, and superannuated in 1892. He died at Searsport, Feb. 28, 1892. See Minutes of Annual Conferences, 1874, p. 67.

Strozzi, Bernardo, called Capaccino, an Italian painter, was born at Genoa in 1581, and studied under Pietro Sorri, but at the age of seventeen he entered which are enumerated in Hoefer, Nouv. Biog. Gén. s. v.

Strozzi, Lorenza, an Italian nun, was born at Capalia, near Florence, March 6, 1514, and brought up in the monastery of St. Nicholas del Prato, where she took the Dominican habit and devoted herself to religious duties, teaching, and music. She composed hymns and Latin psalms for all the festivals (Flor. 1588, 8vo), which were long used in all the services, and were translated into French by Pavillon and set to music by Mauduit. She died Sept. 10, 1591.

Struensee, Adam, a German theologian, was born Sept. 8, 1708, at Neurippin, in Brandenburg, of a wealthy family, and early began the study of theology with a circle of young companions, who styled their meetings colloquia biblica. Although warmly attached to the Moravian count Zinzendorf, he refused to join that community. In 1730 he was made chaplain of the countess Sayn-Wittgenstein, who resided at Berleburg, and after 1732 was pastor of several churches in Halle, and also occupied a chair of theology there. In 1734 he became provost of the Church of Altona; and in 1761 ecclesiastical superintendent of the duchies of Sleswig and Holstein. He died at Rendsburg, June 20, 1791. During all his life, Struensee was characterized by an enlightened piety and a most exemplary and amiable deportment. He wrote, Betrachtungen über Samson und Patez Saige Evangelius (Halle, 1747-48, 1758, 8 vols.); — Sammlung erbbter Schriften, ed. (ibid. 1759-65, 3 vols.); — Gedächtnissreden (ibid. 1756); — Predigten (Altona, 1758-60, 3 vols.); — Theologische Moral (Flenburg, 1765); — Theologische Abhandlung (Altona, 1765) — Bibliischer Unterricht (Halle, 1768).

Strut (or Struttng-piece). In carpentry, any piece that keeps two other things from approaching, and is, therefore, itself in a state of compression; in contradistinction to a strut, which keeps the two pieces apart to which its extremities are attached from receding, and is, therefore, in a state of tension. — Parker, Gloss. of Arch. s. v.

Struthers, Gavvin, D.D., a Presbyterian divine, was born in 1790. He was educated at the University of Glasgow, Scotland, and after studying divinity was called to the Anderson Relief Church, Glasgow, and was ordained in 1817. He was mainly instrumental in bringing about the union between the United Secession and the Relief Church, and was the author of the address read from all the pulpits of both denominations at its consummation; also author of Memoirs of American Missionaries (1816) — History of the Relief Church; — and an Essay on Christian Union, D. Struthers, and others, thinkers, wrote is published July 1856. See Wilson, Preb. Hist. Almanac, 1869, p. 272. Allibone, Dict. of Brit. and Amer. Authors, s. v. (J. L. N.)

Styrkier, Isaac P., a missionary of the (Dutch) Reformed Church to Borneo, was born at Harlingen, N. J., Nov. 27, 1811, and was brought up to mechanical labor, until God turned him aside to prepare for the Gospel ministry. He began his studies late in life, graduated at Rutgers College in 1837, and in 1838 he was graduated of the Dutch government, and almost before the real beginning of his missionary work. He was a man of fervid piety, zealously earnest in the Christian life, and thoroughly devoted to the cause of Christ among the pagans. The mission to which he belonged, after years of patient struggles, was abandoned in 1849. Mr. Styrkier was unmarried. See Corwin, Journal of the Rev. Church, p. 796. (W. J. T.)
A Scriptural View of the Wine Question (1848); —
Sermons (1810–46). He was also a large contributor to the Biblical Repository and the Bibliotheca Sacra.
A monument has been erected to his memory at Andover, on which he is styled "the father of Biblical science in his native country." See Sprague, Annals of the American Pulpit, ii, 475; Park, Funeral Discourse (1852); Meth. Quart. Rev. April, 1852; Christian Reviews, April, 1852; Journ. of Soc. Lit. Jan. 1853.

Stubb is the rendering in the A. V. of two Heb. and one Gr. word: 1. Usually ὄμη, kosh (which is invariably so rendered), so called from its dryness, which denotes the dry halm of grain, partly as left standing in the fields (Exod. v, 12), and then sometimes burned over (xv, 7; fava, v, 24; xlii, 14; Joel ii, 5; Nah, i, 10; Obad, 18), and partly as broken up into chaff by treading out the grain, and so separated from the ears (Job xiii, 25; xli, 20 [28]; Psa. xlviii, 24; Isa. xi, 24; xli, 2; Jer. xiii, 24). See Chaff. 2. Once ἔντεν, tiben (Job xxxi, 18), properly struvæ, as used for provender. See Straw. 3. Once καλάμυς (1 Cor. iii, 12), which denotes in general the stalk of grain after the ears are removed (Xenoph. Ver. v, 18; Sept. for πῦρ, Exod. xv, 7; Joel ii, 5). In Egypt the reapers only cut off the ears of the corn with the sickle, leaving the straw, which they deemed worthless, to rot on the ground. Hence when the cruel Pharaoh commanded the Hebrew brickmakers to gather straw, himself, for the construction of the vast Egyptian tyranny, he did not, as some have supposed, ordain a physical impossibility. See Brick.

Stubs, Aaron J., a minister of the Methodist Episcopal Church, was born in Butler County, O., March 13, 1830, and was converted and joined the Church in 1849. He was admitted on trial into the Central Ohio Conference in September, 1857. In April, 1864, he was elected chaplain of the 329th Regiment of Ohio Volunteers. He lost his health while in the army, was supernumerated at the Conference of 1864, and settled at Patterson, Hardin Co., O., where he died, June 14, 1865. His labors were very acceptable and useful. See Minutes of Annual Conferences, 1865, p. 142.

Studdiford, Peter, a (Dutch) Reformed minister, was born in New York city in 1763, graduated from Columbia College in 1766, and studied theology with Dr. John H. Livingston. He was licensed by the Synod of the Reformed Dutch Church in 1787, and settled that year at Readington, N. J., having Belminster as an associate Church until 1800, and then ministered at Readington alone until his death, Nov. 30, 1826. In 1812 he was appointed professor of Hebrew by the General Synod. In 1824 he was appointed a man of large views, much learning, and intense devotion to his ministerial work. He had a great reputation as an exterminator preacher, sometimes transfiguring himself when called upon in an emergency, and always on these occasions speaking with elaborate finish and great force. He was noted as a patriotic citizen, a faithful pastor, and a Christian of deep personal piety and of catholic sentiments. See Corwin, Manual of the Ref. Church, p. 229. (W. J. R. T.)

Studdiford, Peter O., D.D., a Presbyterian divine, son of the preceding, was born at Readington, N. J., Jan. 11, 1779. He early made a profession of religion, pursued his preparatory studies at the Academy at Baskingridge, N. J., and subsequently at Somerville. In 1816 he graduated with the highest honor at Rutgers College. New Brunswick, was occupied three years in teaching, and graduated at the Theological Seminary at Princeton in 1821. He was licensed by the New Brunswick Presbytery April 27, 1819, ordained as an evangelist by the same presbytery Nov. 28, 1821, and on Dec. 2, 1821, commenced his labors at Lambertville, N. J., of the Lambertville and Solebury churches, which relation existed most happily for a period of forty-five years. He died June 5, 1866. Dr. Studdiford was a sound and able theologian, a judicious and most instructive preacher, and admirably fitted and successful as an educator. See Wilson, Presb. Hist. Almanac, 1867, p. 204. (J. L. S.)

Student, in Slavic mythology, is the lake in the glory recesses of the mighty beech-wood on the island of Rügen, whose waters were used to wash the wheels of the wagon in which the goddess Nerthus had passed through the island. The slaves who performed that labor were immediately drowned. The lake swarmed with fishes, but none were allowed to be taken from it because they belonged to the goddess. Even to approach the lake was a capital offence.

Studies of the Clergy. In the early Church, the clergy were obliged to lead studious lives, and no pleasures were allowed as just apologies for the contrary. Their chief studies were to be the Holy Scriptures, to which special attention was demanded, and the approved writers and canons of the Church. Other books were to be sparsely and cautiously used. Heretical works were to be read only upon necessity to confute them or caution others against them. Beyond this, there was no obligation on them to read human learning; nor was there an absolute prohibition of it. Where such study could be made to minister to divinity, it was not only allowed, but encouraged, and the study of such learning rightly applied did very great service to religion in the primitive ages of the Church. See Bingham, Christ. Antiq. bk. vi, ch. iii, § 1 sq.

Studite, a name given to a branch of the ACMENIACI (q. v.). One Studites, a nobleman of Rome, renounced the world, and became one of their order, erecting a large monastery for himself, which was called Studium, and the monks Studite. In a short time they lost their credit by joining the Nestorians.

Studitès, Simeon, is said to have been a monk in the famous monastery of Studium in Constantinople (see Müller, Stud. Comob. Constant. et Monum. Byzant. Illustratum Diss. [Lips. 1721]), and is credited with the composition of a series of hymns of praise (see Allatius, De Sym. Scripta Distribra [Paris. 1664], p. 20).

Studites, Theodore, a violent opponent of the iconoclasts in the early Church, was born in Constantinople, A.D. 759, entered the Convent of Studium in 784, and made its abbot, or archimandrite, in 794. He soon came into conflict with the emperor Constantine Copronymus—a violent iconoclast, who had separated from his consort and was about to marry Teddy—or—and denounced the ban against him, besides severing his relations with the patriarch Tarasius, because the latter would not proceed energetically against the emperor. Constantine thereupon banished him to Thessalonica. When image-worship was restored, Theodore was recalled and received into favor; but he became involved in fresh troubles, this time with the emperor Nicephorus, who caused him to be imprisoned and transposed to an island near Constantinople, where he remained until reinstated in his office by Michael Rangabe. When Leo the Armenian renewed the attack on image-worship (813), Studites at once rose against him with his accustomed zeal; the emperor caused him to be warned, but without result, and then called a synod at Constantinople which prohibited iconolatry (815), after which he took energetic measures for its repression.
rection of a submission of national difficulties to arbitration rather than to the sword are well known. He promoted and arranged, in conjunction with like spirits with himself, the peace congresses which were held annually from 1848 to 1852 at Brussels, Paris, Frankfort, London, and Edinburgh. The influence of these public gatherings of the friends of peace was widely extended and of the most beneficial character. In labors like these Joseph Sturge devoted the busy years of a life which was spent in the three decades and ten days. He died in Birmingham, England, May 14, 1859. See *Memoir*, by Tract Association of Friends (Philadelphia). (J. C. S.)

**Sturges, Alfred Gallatin, a Methodist Episcopal minister,** was born at Uniontown, Pa., March 11, 1813. He experienced religion in 1829, was licensed to exhort and subsequently to preach in 1832, admitted on trial in the Pittsburg Conference in 1833, and appointed to Susquehanna Circuit, Warren District. In 1834 he was appointed to Salem Circuit; in 1835 was admitted into full connection, and appointed to Erie station; in 1836, to Hudson Circuit; in 1837, to Painesville Circuit; in 1838-9, to Ravenna Circuit; in 1840-41, to Warren; in 1842, to Poland Circuit; in 1843, to Youngstown; in 1844, to Meadville, where, on account of ill-health, he was compelled to desist from labor. He died Nov. 4, 1845. Mr. Sturges possessed talents of a superior order as a minister. The high estimate in which he was held may be seen from the fact that for six years in succession he was elected to the responsible office of conference secretary. See *Minutes of Annual Conferences*, iv. 58. (J. L. S.)

**Sturm, Christoph Christian,** was born at Augsburg, Jan. 25, 1740, and studied at Jena and Halle. From Halle, where he preached first, he was called to Magdeburg, where he finally became the pastor primarius of St. Peter's. He died at Hamburg, Aug. 26, 1786. Sturm is the author of a number of devotional books and hymns. One of his hymnals, *Hymnus symphonia*, has been translated into English by N. L. F., in the *Monthly Religious Magazine*, 1805, xxxii, 202: "Christ is risen, Christ is risen." One of his works has been translated into most of the European languages, and is known in English under the title of *Reflections on the Works of God* (often printed). For others, see *Herzog, Real-Encyclop.* s. v.; Hoefer, *Nachr. Bieg, Göttingen*, s. v.; *See also in Handbook der theolog. Literatur (index); Zuchhold, Bibl. Theol. ii, 1292; Theolog. Universal-Lexikon, s. v.; Koch, Gesch. d. deutschen Kirchenleides, vi, 357 sq.; Regensburger Conversations-Lexikon, s. v.; Federsper, Sturm's Leben und Charakter (Hamburg, 1786). (B. F.)

**Sturm of Fulda,** a disciple of Boniface, and first abbot of Fulda, belonged to a noble family living in the province of Naumburg, and was born A.D. 719. His parents, influenced by Boniface, devoted their son to the Church, and placed him under the care of that missionary. He now travelled with his preceptor for a time, and then retired into the Monastery of Fritzlar, to engage in scientific study of the Holy Scriptures and the Church fathers. In 733 he became bishop of Fritzlar, and at once began to engage in missionary labors among the surrounding heathen communities. His leading purpose was the dissemination of Gospel truth and the introduction of the Christian worship; but he was also earnest in the cultivation of a higher morality among his hearers. After three years of ministry in Fritzlar, however, he felt himself constrained to enter upon a life of greater austerity. Boniface approved of his design, and directed him, for its realization, as well as for the accomplishment of an intention of his own to found a large monastery beyond the reach of danger through incursions of the Saxons, to explore the country for a suitable site on which to erect a religious establishment. Accompanied by two associates, Sturm entered the unknown wilderness, and in three days found a place which seemed to offer every requisite except the assurance of quiet, as it was situated too near the territories of the hostile Saxons to justify the hope that it would remain undisturbed. There he set about the erection of a small cell in which he was to be the first abbot. The church of Boniface, founded there the Monastery of Hersfeld (768); but, by the advice of Boniface, a safer place was to be sought. Sturm now ventured into the forest alone, braving its wild beasts and its hordes of heathen, until he reached the spot where Fulda now stands, and there he set about the erection of a larger cell and temple. He returned to Hersfeld, and formed a plan for the erection of the convent; and Boniface repaired to the emperor Carloman to procure a donation of the land. At the beginning of 744, Sturm, accompanied by nine monks, took solemn possession of the locality, and rapidly pushed forward the building and arrangement of the proposed establishment. It was completed, in the course of a year, on the stream on which it stood, and received Sturm as its abbot. The number of monks rapidly increased, and it became necessary to arrange the plan of their government and of their ordinary life according to some strict system; and to this end a commission, to which Sturm belonged, was sent to Italy to study the methods in vogue among the Benedictines of that land. The Convent of Monte-Casino seemed to them to afford lessons in administration of especial value. They returned after having been absent a year, Sturm being detained on the journey by a severe illness at Kitzingen, on the Main: and after their return the new discipline which was introduced in all its strictness. Some of the brethren prayed, studied, or taught, while others were employed in the fields and gardens. The results of their industry, joined with the donations of wealthy patrons, greatly enriched the convent, extended its fame, and heightened the reputation of its abbot. When Lullus succeeded Boniface as archbishop, this peaceful state was rudely disturbed. Sturm demanded that the body of Boniface should be interred at Fulda, as Boniface himself had desired; but the clergy of Mayence, headed by Lullus, refused consent, and procured an order from king Pepin for the interment of the remains at Mayence. Lullus finally yielded. Another cause of trouble lay in the archbishop's assumption of the rights of ownership over the monastery, and of consequent supervision of its temporalities, which Sturm regarded as an invasion of his privileges. At the same time, three monks, who were dissatisfied with the strictness of Sturm's rule, charged him with treason against the king, and secured his removal from the court. Lullus, in the consciousness of his innocence, refused to defend himself, the anger of Pepin caused his banishment to the Monastery of Jumedia (now Jumieges), near Rouen. Lullus now endeavored to establish himself in the possession of Fulda; but as the monks drove away a priest whom he had appointed abbot, he gave way, and allowed them to choose for themselves. They selected Prezzold, a devoted adherent of Sturm, who at once began to labor for the pardon of his former superior; and, as other monasteries used their influence in the same direction, the end was attained. Sturm was recalled to court and reconciled to the king; and when Prezzold and his brothers of Fulda petitioned for Sturm's restoration to the monastery, the king consented, and, in addition, removed the monastery from under the jurisdiction of Lullus (762). A quiet era now began in the life of Sturm, which continued until his death. He grew in the royal favor constantly, and by his practical and genuine piety, and his benevolence, he secured the material welfare of his neighborhood. In the beginning of Charlemagne's reign he was employed to preserve peace between the king and the powerful duke Tassilo of Bavaria, and was completely successful. A wiser sphere opened before him when Charlemagne made war on the Saxons, and it was his duty to appoint other clergy to accompany the army in order to convert the conquered heathen. Sturm was especially prominent in this work, and achieved some real successes as
Sturz, Friedrich Wilhelm, a German scholar, was born May 14, 1762, at Erlsbach, near Freiburg. He studied theology and philosophy at Leipsic, and was professor of theology at Gera. In 1803 he was called to Grimma as rector of the academy, retired from his office in 1823, and died May 20, 1832. He wrote, De Dialecto Alexandrina Ratione simul Habita Version. Libr. Vet. Test. Grsec. (Lips. 1786)—De Dialecto Macedonica et Alexandrina (ibid. 1808)—De Dialecto Alexandrina (Gera, 1788-94, diss. 1-iv.)—Circumcision a Barbaris Gentibus ad Judaeos Translatia (Ibid. 1791); and edited Zonarum Censorum Sacrorum T. (Grimma, 1818)."

Stutzon, Nelson, a minister of the Methodist Episcopal Church, was born at Monson, Mass., Sept. 20, 1829, and was converted when about nineteen. He was educated at Williamsburg, graduated from college in 1858, and joined the New England Conference in 1859. In 1869 he spent three months in Europe to recruit his health, but it continued to decline until he died, April 16, 1871, at Springfield, Mass. Mr. Stutzon was a man of many rare and valuable qualities. See Minutes of Annual Conferences, 1872, p. 48.

Stuttgart, Synod of, held in the year 1559. It was convened by duke Christopher of Wurttemberg, with the purpose of bestowing a formal sanction on the Lutheran doctrine of the Lord's supper, which had been previously recognized, but was threatened by divisions in the churches of the duchy itself, and by the overthrow of the Lutheran confession in the adjoining palatinate. It was composed of the four general superintendents and the spiritual and lay members of the consistory, together with the rector, dean, and professors of the theological faculty of Tubingen. On Dec. 19 it adopted the formulary issued in the following year, under the title Confessio et Doctrina Theologorum et Ministeriorum Verbi Divini in Ducatu Wurttembergh, de Vera Præsentia Corporis et Sangniestis Iesu Christi in Cena Dominiuco. It begins with an exposition based on Eph. iv., 14, and proceeds to declare, on the alleged basis of the Scriptures and the Augsburg Confession—1. That in the sacrament the real body and blood of Christ are given and received with the bread and wine, in virtue of the word or institution of Christ; 2. That the substance of the bread and wine is not changed; nor do they simply serve as types, but the actual substance of Christ's body and blood is given with the unchanged substance of bread and wine; 3. That the union of these substances is sacramental, so that no sacrament exists when the bread and wine are not used; 4. The objection against the ubiquity of Christ's body based on his ascension to heaven is removed by the doctrine of Paul, that the Lord "ascended up far above all heavens, that he might fill all things" (Eph. iv., 10). 5. Not only the faithful and worthy, but also the unworthy, partake of the Lord's body and blood in the sacrament; the latter, however, to their destruction, etc. The Confession of Stuttgart has been regarded by Planch and Gieseler as the first formulating of the doctrine of the ubiquity of the body of Christ; but the fundamental principle of the whole doctrine of Luther respecting the Lord's supper was the ubiquity. It became the leading spirit in the Stuttgart Synod, had expressed the opinion that Christ's human nature participates in all respects in the glory of the Father, in his larger Catechism of the year 1551, Calvin complains of the "Ubiquists" of Wurttemberg in a letter to J. Andreae, dated 1556. It remains to be added that Lutherans received the decisions of this synod with much hesitation, but on objectionable expressions involved in them, e.g. that the blessing of the sacred Holy Spirit; that the blessing of the sacrament is not dependent on the will of the communicant; that the blessing of the sacrament is conditioned solely on the worth of the exalted God-man, etc. In the event, a reaction took place in the Wurttemberg churches which opened the way for a more rational, Melanchthonian view. See Pfaff, Acta et Scripta Publ. Eccl. Wirt. (1720); Plank, Gesch. d. protest. Lehrbegriffe, vol. vi.; Hepp, Gesch. d. deutschen Prof. vol. i. See MELANCTHON; UBICITY.

Stygius, in Greco-roman mythology, a surname of Plato.

Style, Old and New. See Calendar.

Stylites (στυλίτης) or pillar saints, a class of anchorites who took up their abode on lofty pillars, where the limited space forbade their sitting or lying down, and obliged them to stand continually (hence staustrati), protected only by a lattice-work or board railing, or by a wall, from falling, and exposed to the open sky by day and night, in both summer and winter. See PILLAR SAINTS.

The founder of this class of Christian fakirs was Simon, called the Syriac, or the elder, who lived in the 6th century, under the reign of Theodosius II (408-450) and his successors. He was a native of Sinai, or Sessa, in Northern Syria, on Mount Amanus, and was of Christian parentage. He was born in 390 or 391, and in childhood watched his father's flocks in the solitude of his native mountain region. At the age of thirteen he entered the way of asceticism, and acquired spiritual impressions which led to his adoption of a monastic life. He spent two years in a convent near his home, and ten more in St. Eusebius's convent, near Tel-edes, and in the latter place especially excelled all his associates in the rigorous harshness of his ascetical practices. After a time he removed to Tel-Necsa, Tel-Nessa (Tel-mar) or Tel-Aviv, near Antioch, and spent his abode in a hut on the side of a mountain. While there he fasted forty days, absolutely without partaking of food, in imitation of Moses and Elijah; and not only did this practice become his regular custom during the fasts of Lent, but he added to it the notion of spending the entire period standing on his feet, for which purpose he caused himself to be bound to an upright stake. After spending three years in this habit, he caused himself to be surrounded with a wall (μισπία, claustrum) and had himself fastened to a rock by a chain twenty cubits long. By this time the fame of his extraordinary piety had spread abroad, and multitudes of people took upon him, and quarrelled to touch his clothing, which induced him to erect a pillar within his mandira, which he mounted, and upon which he supported himself by being bound up to an upright post (about 420). Soon that support became unnecessary, and he was able to obtain what rest he required by holding fast to the lattice with which he was surrounded. The first pillar was only six or seven cubits high; but he caused its height to be repeatedly increased, so that it was at last thirty-six cubits high; and at this altitude he spent the last thirty years of his life, from 429. The monks of the adjoining desert sought to test him by ordering him to descend from his pillar; but as he declared his immediate readiness to obey, they desisted, and acknowledged a divine call to the course of life he had adopted in his case. From sunet until the ninth hour of the next day he was engaged in devotional exercises; after that he was accessible to all except women. Not even his own mother was permitted near him. He dispensed with preaching, prophesied, wrought miracles by the power of his prayers, and interfered in the affairs of the Church generally: e.g. when Theodosius II decreed the restoration of synagogues which the Christians had taken from the Jews of Antioch. Simon wrote a threatening letter, which induced the recall, the edict already issued by the emperor, and the advice of Simeon with respect to the Monophysite troubles.
