BIBLICAL, THEOLOGICAL, AND ECCLESIASTICAL LITERATURE.

RH.

Rhabanus (more properly Rabanus) Maurit, a distinguished German theologian and prelate, was born of French parents, named Raban, at Mentz, about 776. On the completion of his early studies at Fulda, in Hesse, he was there made a deacon in 801; and he betook himself to Tours the following year to enjoy the tuition of the famous Alcuin, who is said to have named him the Moor, from his dark complexion. It is also apparent from his writings that he had in his youth made a pilgrimage to Palestine. In his twenty-fifth year he became head of the convent school at Fulda, where his successful teaching drew around him many pupils, and not a few of the nobility intrusted him with the education of their sons. In 822 he was consecrated abbot; but he still directed the seminary, which supplied many able teachers for the Frankish and German churches. On a complaint of the monks that his absorption in literary pursuits hindered the discharge of his more active conventual duties, he retired in 842. He was, however, drawn out of this voluntary seclusion, in 847, by being made archbishop of Mentz, whence he is supposed to have received the epithet of Magnificus. In this situation he was the opposer and persecutor of Totschalk (q.v.), who advocated the doctrine of predestination. Rhabanus founded the monastery of Mont St. Pierre, and rebuilt that of Klingemunster. In 850 he showed great devotion in relieving the poor who had suffered from a flood. In 852 he presided at a council held in his metropolis. He died Feb. 4, 856. His influence was great among the churches in the diffusion of practical piety, and he had several illustrious disciples. His erudition and general attainments were respectable for the age in which he lived, and, as a lecturer, he instructed his scholars in general literature and science as well as theology. He wrote commentaries on all the canonical books and many of the apocryphal ones, and left behind him numerous treatises, sermons, and letters. His Opera Omnia were edited by Henin and Colvenner (Cologne, 1627, 6 vols. fol.). See Herzog, Real-Encyklop. s. v.; Hoefer, Nouv. Bioogr. Générale, s. v.; Darling, Cyclop. Bibliog. s. v., and the literature there cited; also, Johann, De Vita ac Doctrina Rab. Martii Magni. (Jen. 1724); Schwarz, De Rabano Mauro (Heidelberg, 1811); Dahl, Leben u. Schr. d. Roth. Maur. (Fulda, 1828); Kunstmans, Ueh. Hrabas. Maur. (Mainz, 1841).

Rhabdos ek tēs hēlēs (Ῥαβδός εκ τῆς ἱλές, a stem out of the root) is the beginning of one of the odes of St. Cosmas, surmounted "the Melodist," also "Hierosolimitanus," and sometimes "Hieropolitites." Like his foster-brother John of Damascus, Cosmas became a monk of St. Sabas, and, against his will, was consecrated bishop of Maiuma, near Gaza, by John, patriarch of Jerusalem, about A.D. 745. He led a holy life, and died in good old age about 760. Cosmas was the most learned of the Greek poets. He wrote on the Nativity, the Transfiguration, and the Purification, and on Gregory Nazianzen. His fondness for types, boldness in their application, and love of aggregating them make him the Oriental Adam of St. Victor. His hymns are much used and praised in the Eastern Church, IX.—A.
translated. He published a few Orations and Discourses in this country, which evince great vivacity and eloquence. See Sprague, Annals of the Amer. Pulpit, vi, 344.

Rhees, Morgan John (2), D.D., a Baptist minister, was born at Somerset, Somerset Co., Pa., Oct. 25, 1810. He devoted himself at first to the law, began practicing in May, 1826, and gave promise of great success in that profession; but, directing his attention to the study of theology, he acted for a time as temperance agent, and was finally ordained Sept. 9, 1829, and on April 1, 1830, became pastor of the churches at Bordentown and Trenton, N. J. He was also one of the founders of the New Jersey State Convention for missionary purposes in 1829, of which he became secretary, besides being chairman of the executive committee of the State Temperance Society, and editing for a time the Temperance Reporter. He closed his connection with the church at Bordentown in 1855, retaining that at Trenton. In 1840 he also resigned the latter to become corresponding secretary of the American Baptist Publication Society, in which position his services proved very useful. In 1843 he became pastor of the Second Baptist Church at Wilmington, Del., where he remained until 1850, when he accepted a call from the First Baptist Church of Williamsburg, Va., and here he still acts as recording secretary of the Board of the Missionary Union and the American and Foreign Bible Society, death closed his useful career, Jan. 15, 1858. See Sprague, Annals of the Amer. Pulpit, vi, 780.

Rhegium (Ῥηγῖον, from Ῥηγεῖα, alluding to the abrupt character of the coast). The mention of this Italian town (which was situated on the Bruttian coast, just at the southern entrance of the Strait of Messina) occurs quite incidentally (Acts xxviii, 13) in the account of Paul's voyage from Syracuse to Puteoli, after the shipwreck at Malta. But, for two reasons, it is worthy of careful attention. By a curious coincidence the figures on its coins are the very "twin-brothers" which gave the name to Paul's ship. See CASTOR AND POLLUX. Again, the notice of the intermediate position of Rhegium; the waiting there, the southerly wind to carry the ship up the Strait, the run to Puteoli with such a wind within the twenty-four hours, are all points of geographical accuracy which help us to realize the narrative. As to the position of the place, it was originally a Greek colony: it was miserably destroyed by Dionysius of Syracuse; from Augustus it received advantages which combined with its geographical position in making it important throughout the duration of the Roman empire. It was prominently associated, in the Middle Ages, with the varied fortunes of the Greek emperors, the Saracens, and the Romans; and still the modern Reggio is a town of 10,000 inhabitants. Its distance across the Strait from Messina is only 10 miles, and it is visible from the telegraph station above that Sicilian town. See Conybeare and Howson, St. Paul, ii, 349; Lewin, St. Paul, ii, 317; Smith, Dict. of Class. Geog. s. v.

Rheimish Testament, a Romish version of the New Test., printed at Rheims, France, in 1582, accompanied with copious notes by Roman Catholic authors. This version, like the Douay Old Test., with which it is generally bound up, was translated from the Latin Vulgate. See DOUAY BIBLE.

Rhenford, Jakon, a German Orientalist, was born at Muhlheim, in the duchy of Berg, Aug. 15, 1854. His son of a Protestant minister, he studied theology at Ham, Groningen, and at Amsterdam. From 1678 to 1860 he was rector of the gymnasium at Franeker, and then returned to Amsterdam to perfect his knowledge of Hebrew, Arabic, and Persian. In 1683 he became professor of Oriental languages at Franeker, where he held the remainder of his life. He was a man of great penetration, sound judgment, and possessed a great memory. Rhenferd died Oct. 7, 1712. Of his works we mention, De Antiquitate Literarum Judaicarum (Franeker, 1694);—Observationes ad Loca Hebreas Novi Testamenti (ibid. 1703-7);—De Arvarchichis Hebraicis (ibid. 1709);—De Hierarchia et Hierarchia Sacra (ibid. 1708);—De Oratorum et Historiarum Hebraicorum, Chaldaicorum, Syracusae, et Arabicae (ibid. 1706).—Hoefer, Nouv. Bioj. Générale, s. v. Besides editing a Syntaxa of dissertations by different writers, De Stylo Novi Testamenti (1701, 4to), he published several learned dissertations. These have been collected and issued in one vol. 4to, with a preface by D. Mill, and an "Oratio Funebre" by professor van Halla, under the title Ine, Rhenferdi Opera Philosophica, Dissertationibus Exquisitiissimis Argumenta Contenunt (Traj. Rhen. 1722). Besides discussing such Biblical subjects as the style of the Apocalypse, the meaning of the phrase διὰ αἰώνια τῶν μικρῶν in the New Test., the meaning of several passages in the same, the author treats largely on points of Jewish literature and archaeology, and takes up the subject of the Palmyrene and Phoenician dialects, and other points of interest to Oriental scholars.

Rhesa (Ῥῆσα) is a name given in the genealogy of Christ (Luke iii, 27) as that of a son of Zorobabel and father of Joanna, being evidently the same with Zorobabel the son in the Old Testament (1 Chron, iv, 19-21) as the son of Zerubbabel and father of Hananiah. Lord Hervey fancifully conjectures that Rhesa is no person, but merely the title Rošh, i. e. "prince," originally attached to the name Zerubbabel, and gradually introduced as an independent name into the genealogy (Genealogies, etc., p. 111, 114, 356-360). See GENEALOGY OF CHRIST.

Rhesa, L. J. EHMEN, a German doctor and professor of theology, was born June 9, 1777, at Carwisha, near Memel. In 1800 he was appointedarrison chaplain at Königsberg; in 1807 he lectured as privat-docent at the university there, and in 1810 was appointed extraordinary professor of theology. From 1812 to 1816 he acted as army chaplain, and after 1816 he lectured as professor of moral and dogmatic theology, and the same time a member of the consistory in Königsberg. Rhesa died Aug. 30, 1840, leaving some very important pamphlets bearing on the Lithuanian version of the Scriptures, as, Geschichte der litauischen Bibel, ein Beitrag zur Religionsgeschichte der nordischen Volker (Königsberg, 1829), and a monograph, Vom Unterschied zwischen der litauischen Bibel (ibid. 1816-18, 2 parts). Besides these, he wrote: De Primis, quos dicit Sacrorum Reformatorum, in Prussia (ibid. 1825)— and De Primis Veterum Religionis Christ, inter Lithuanos Propagata (ibid. 1810). See Winer, Handb. der theolog. Literatur, i, 909, 908; ii, 731; Zachold, Bibl. Theol. ii, 1061. (B.F.)

Rhetorians, an Alexanian sect of this name is mentioned by Philaster as founded by Rhetorius, and maintaining the opinion that there was no harm in any heresy whatever (Philast. Hor. xci). Augustine remarks that this seems so absurd that he considers it incredible (Augs. Hor. lxxii). Philaster is the original authority for the existence of such a sect, but Pseudoctitus speaks of them as if they were not unknown to him, as if he were very well acquainted with the sect. Philaster's statement that there were several Christian fellowships with all who believed in the Incarnation (Praelast. Hor. liii). Even before Philaster's time Athanasius mentions a person named Rhetorius, whom he accuses of holding the opinion that doctrines are of no consequence; but that all heretics are right in their own way. (Contra Arian, i, 6). And at a later date St. John Damascene enumerates the ἐρημομαχιοὶ as the eighty-eighth in his catalogue of heresies, who, it seems probable, were "knowledge (or theology) haters" in the sense of being anti-logicians,
RHINOCEROS

who had arisen from reaction against the subtleties of the Gnostics, the Antiochene and the Alexandrian schools of theologians, and who are identical with the Rhinoceros of Philaster.

RHINOCEROS. See Uncionum.

Rhinsbergers. See Collegians.

Rh. Giacomo, brother of Giovanni, was born at Macao, in Italy. At the age of twenty he joined the order of St. Ignatius, and, after being ordained priest, he accompanied Nicolas Trigaut to China. Being de{}ned at Macao, he aided in defending the town against the Dutch, and in surrounding it with new fortifications (1622). He afterwards penetrated into the province of Siam, and, owing to his knowledge of the country, he was engaged in important diplomatic missions in France and Siam. In 1631 he was ordered to Peking, where he was employed, with P. Adam Schall, in drawing up the imperial calendar. Rh died in China, April 27, 1638. He left only one work, in Italian—an account of his voyage—entitled Lettere della sua Navigazione e delle Cole dell'lndie (Milan, 1620), but he is said to have composed many works in Chinese on religion, astronomy, and mathematics. See Kircher, China Illustrata.

Rh. Giovanni, an Italian Jesuit, was born at Milan in 1590. In 1606 he was admitted to the Society of Jesus, taught rhetoric at Brera, and, after a time, desired to go as a missionary to India. But his superiors refused to grant his request, and he continued his studies in Rome. In 1619 he was sent to China, where he remained for four years. In 1622 he was again sent to Rome, where he remained until 1629, when he returned to China. In 1632 he was appointed superior of the mission in China, and died in Rome, Nov. 9, 1632. He left several works, among them, Martyrium Tomum Beatorum e Soci. Jes. Pauli Michi. Joh. Goto, et Soc. Chiniti (Florence, 1638);—Interrogationes Apologeticae (Lyons, 1641);—and orations on various ecclesiastical subjects.

Rhoida (Ροιοθα, Rose), the name of a servant-maid who announced Peter's arrival at the door of Mary's house after his miraculous release from prison (Acts xii. 13). A.D. 44. See Porther.

Rhodes (Ροδας, roys), an island in the Mediterranean, near the coast of Asia Minor, celebrated from the remotest antiquity as the seat of commerce, navigation, literature, and the arts, but now reduced to a state of extreme poverty by the calamities of war and the tyranny and rapacity of its Turkish rulers.

I. Scriptural Notices. The Sept. translators place the Rhodians among the children of Javan (Gen. x. 4), and in this they are followed by Eusebius, Jerome, and Isodore; but Bochart maintains that the Rhodians are modern and have been planted there by any immediate son of Javan, and considers that Moses rather intended the Gauls on the Mediterranean towards the month of the Rhone, near Marseille, where there was a district called Rhodania, and a city of the same name. They also render Ezek. xxxvii. 15, "children of the Rhodians," instead of, as in the Hebrew, "children of Dedan." Calmet considers it probable that here they read "children of Redan, or Rodan," but that in Gen. x. 4 they read "Dedan," as in the Hebrew. In the time of the consolidation of the Roman power in the Levant we have a notice of Jewish residents in Rhodes (1 Macc. xv. 25). Paul touched there on his return voyage to Syria from the missionary journey (Acts xx. 1). It appears from Josephus that the name of Rhodes, which, in the time of Soliman the Great a capitulation was agreed upon and the island was finally surrendered to the Turks, under whom it has since continued. It is now governed by a Turkish pasha, who exercises despotic sway, seizes upon the property of the people at his pleasure, and from whose vigilance rapacity scarcely anything can be concealed. Under this iron rule the inhabitants are ground to poverty and the island is becoming rapidly depopulated.

II. Description. Rhodes (pertaining to Rhodos) is situated immediately opposite the high Carian and Lycian headlands at the south-west extremity of the peninsula of Asia Minor. It is of a triangular form, about forty-four leagues in circumference, twenty leagues long from north to south, and about six broad. In the centre is a lofty mountain named Armenia, which commands a view of the whole island; of the elevated coast of Carmania, on the north; the archipelago, studded with numerous islands, on the north-west; Mount Ida, veiled in clouds, on the south-west; and the wide expanse of
waters that wash the shores of Africa on the south and south-east. It was famed in ancient times and is still celebrated for its delightful climate and the fertility of its soil. The gardens are filled with delicious fruit, every gale is scented with the most powerful fragrance wafted from the groves of orange and citron trees, and the numberless aromatic herbs exhale such a profusion of the richest odors that the whole atmosphere seems impregnated with spicy perfume. It is well watered by the river Candlura and numerous smaller streams and rivulets that spring from the shady sides of Mount Artemira. It contains two cities—Rhodes, the capital, inhabited chiefly by Turks and a small number of Jews; and the ancient Lindus, now reduced to a hamlet, peopled by Greeks who are almost all engaged in commerce. Besides these there are five villages occupied by Turks and a small number of Jews, and five towns and forty-one villages inhabited by Greeks. The whole population was estimated by Savary at 36,500; but Turner, a later traveller, estimates them only at 20,000, of whom 14,000 were Greeks and 6000 Turks, with a small mixture of Jews residing chiefly in the capital.

The city of Rhodes is famous for its huge brazen statue of Apollo, called Colossus, which stood at the mouth of the harbor, and was so high that ships passed in full sail between its legs. It was the work of Chares of Lindus, the disciple of Lysippus; its height was one hundred and twenty-six feet, and twelve years were occupied in its construction. It was thrown down by an earthquake in the reign of Ptolemy III, Euergetes, king of Egypt, after having stood fifty-six years. The brass of which it was composed was a load for nine hundred camels. Its extremities were sustained by sixty pillars of marble, and a winding staircase led up to the top, whence a view might be obtained of Syria and the ships proceeding to Egypt in a large looking-glass suspended to the neck of the statue. There is not a single vestige of this celebrated work of art now remaining. The present antiquities of Rhodes reach no further back than the residence of the Knights of St. John of Jerusalem. The remains of their fine old fortresses, of great size and strength, are still to be seen. The cells of the Knights are entire, but the sanctuary has been converted by the Turks into a magazine for military stores. The early coins of Rhodes bear the conventional rose-flower, with the name of the island, on one side, and the head of Apollo, radiated like the sun, on the other. It was a proverb that the sun shone every day in Rhodes.

See Murisius, De Rhodo (Amst. 1672); Coronelli, Isola di Rodi (Ven. 1702); Paulsen, Beschreibung Rhodos (Gott. 1818); Rost, Rhodos (Alton. 1823); Menge, Vorgeschichte von Rhodos (Cologne, 1837); and especially Rottier, Les Monuments de Rhodos (Brussels, 1839); Ross, Reisen nach Rhodos (Halle, 1852); Berg, Die Insel Rhodos (Brunswick, 1861).

Rhodes, Alexandre de, a French missionary, was born at Avignon, March 15, 1591. In 1612 he was admitted to the Order of Jesuits at Rome, and after long solicitation received permission to go to India as a missionary. In the spring of 1619 he left Lisbon, but on arriving at Goa was detained under various pretexts until 1623, when he went on to Macao. He desired to penetrate into Japan, and devoted a year to the study of the language; but the great severity which was exercised against Christians obliged him to abandon his project. He went into Cochin-China, and at the end of six months began to preach in the native idiom. In 1627 he passed to Tonquin, and gained the confidence of the king; but the jealousy of courtiers destroyed the fruits of his labor. An edict was launched against the Christian religion, and Rhodes was expelled. He re-
turned to Macao and remained ten years, teaching and travelling through the provinces of Canton. He still desired to return to Cochín-China, and was again met by persecution—this time barely escaping with his life, being sentenced to perpetual banishment (1646). On his way to Europe he was imprisoned at Java, which changed his plan of travel. He embarked for Macassar, visited Bantam and Savata, and in 1648 travelled through the whole kingdom of Persia as well as Armenia, and finally left Smyrna for Genoa. The three years following he spent quietly at Rome, but his passion for travel caused him to start on a second expedition to Persia at the head of a new missionary enterprise. He died in that country Nov. 5, 1668. Rhodes's writings are chiefly narratives of travel, and are generally correct. We may mention, Relazione di Felici Successi della Santa Fede nel Regno di Tun- chino (Rome, 1650) ; — Dictionarium Aumamaticum, Lu- stianum, et Lutinum (ibid. 1651) ; — Sommario des divers voyage et Missions Apostoliques du P. A. de Rhodes, etc. (Paris, 1653). See Sotovol, Bibl. Script. Soc. Jer.

Rhodes, George de, brother of Alexandre, was born at Avignon in 1597. He embraced the rule of St. Ignatius at Lyons in 1618, taught rhetoric in the College of Notre Dame in that city, and was its director for twenty-seven years. He died May 17, 1661. Of his writings we have, Disputationes Theologicas Scholasiticae (Lyons, 1661, 1671, 1676) ; — Philosophia Peripetrica (ibid. 1671).

Rhod'ocas ('Póddac'), a Jew who betrayed the plans of his countrymen to Antiochus Eupator. His treason was discovered, and he was placed in confinement (3 Macc. xiii, 21).

Rhodon. See Rose.

Rhodon. (1 Mac. xv, 23). See Rhodes.

Rhoeus, in Greek mythology, was king of the Mambulans, a son of Phorys, and father to Aemeboluus, of whom Virgil says that he defied the bed of his stepmother Casperia. (1) A centaur present at the wedding of Pirithous, who was wounded by Dryas, and fled. (2) A giant who was killed by Bacchus.

Rhoeus, in Greek mythology, was one of the numerous sons of Hercules. His son was named Phæsus, and built a city in Crete, to which he gave his own name.

Rhythia, in Greek mythology, was a nymph beloved of Apollo, by whom she became the mother of the Corybantes. An ancient town on the north-east coast of Crete derives from her its name—Rythion.

Riario, Raphael Galeotto, an Italian prelate, better known as Cardinal Riario, was born at Savona, May 3, 1431. He was in great favor with Sixtus IV, who raised him to the rank of cardinal in 1477, and afterwards conferred upon him several bishoprics and archbishoprics, together with the abbeys of Monte-Casino and Cava. During the feasts which celebrated his elevation to the cardinalate, Lorenzo de' Medici and his son were assassinated. The new cardinal did not escape the wrath of the Florentines, though he knew nothing of the plot, and was obliged to take refuge near the altar at which he was officiating. Under Alexander VI he took refuge in France, in his see of Treguier, but returned to Italy on the election of Pius III. He afterwards entered into a conspiracy with cardinal Petracci against Leo X, who generously pardoned his offence. It is said that cardinal Riario was the first to introduce theatrical representations in Rome. He died July 7, 1521. See Annu. Ecl. 1472-73, Paravicino, Vita di Sixto IV; Infessura, Diario Rom.; Ammattini, Epistola 548 ad Fr. Gonzagham, p. 92.

Rib, in architecture, is a projecting band on a ceiling, etc. In Middle-age architecture ribs are very extensively employed to ornament ceilings, both flat and vaulted; more especially the latter, when groined. In the earliest Norman vaulting the ribs generally consist of mere flat bands crossing the vault at right angles, the groins as well as the apex being left perfectly plain. As the style advances the ribs become moulded, and are also applied to the groins, and are sometimes enriched with zigzags and other ornaments peculiar to the style, with carved bosses at the intersections, as in the churches of Wylye, Oxfordshire, and Elstoke, Gloucestershire.

In Early English vaulting, and that of all subsequent periods, the groins are invariably covered by ribs, and the intersections are generally ornamented with bosses or other decorations, as is the case in the chapter-house at Oxford. In the Decorated style additional ribs are introduced between the diagonal and cross-springers following the curve of the vault, and frequently also in other parts running in different directions, and uniting the whole into a kind of net-work, as at Tewkesbury Abbey, Gloucestershire. The apex of the vault is almost invariably occupied by a rib, which is often slightly curved upwards between the bosses. When they are numerous, it is not unusual to find that the more important ribs are of larger size than the others. In this style the

Oxford Cathedral, cir. 1190.

Westminster Abbey, cir. 1290.

Gloucester Cathedral, cir. 1320.

Thornton Abbey, Lincolnshire, cir. 1420.
In ordinary Perpendicular vaulting, ribs are applied much in the same way as in the preceding style, but they are sometimes employed in greater profusion and in more complicated arrangements, by which the effect is by no means always improved, as at St. Mary Redcliffe Church, Bristol. In fan-vaulting the ribs radiate from the springing of each pendant, and generally become multiplied as they rise upwards, so that the whole surface is covered with tracery, which is usually enriched with featherings and other decorations.

Divinity School, Oxford.

Many churches, and some other ancient buildings, have raised ceilings, of wood or plaster, formed on the underside of the timbers of the roof. A few of these, which are as old as the Decorated and Early English styles, are sparingly ornamented with small ribs; there is generally one along the top and others crossing it at considerable intervals. In some instances the ribs are more numerous in both directions, so as to divide the surface into rectangular compartments, or panels.

Wymington, Bedfordshire.

In the Perpendicular style ceilings of this kind are almost invariably formed in canes, which are divided into squares by small ribs with bosses, shields, or flowers at the intersections. Flat ceilings also, which are common in this style, are frequently divided into squares, and sometimes into other patterns, by moulded ribs. In the time of queen Elizabeth and James I, ribs were much used on plaster ceilings, and were often arranged with considerable intricacy: at this period the intersections were usually either plain, or ornamented with small pendants. In some districts the purlings of a roof are called ribs.

RIB (ריב), tâdē, Gen. ii, 21, 22, a side, as often rendered; Chald. רוע, Dan. vii, 5), the part of Adam taken to form his wife (Gen. ut sup.). See Eke.

In the expression “fifth rib” (2 Sam. ii, 23; iii, 27; iv, 6: xx, 10), the original has simply ריעו, chōmesh, "fifth part" in Gen. xlvii, 26).

Ribadeneira, Pedro, a zealous Jesuit, pupil of Loyola, and industrious writer, was born at Padua, Nov. 1, 1527. He was sent to Rome while young, and received by Loyola into his order in 1546, before it had been confirmed by the Pope. In 1542 Ribadeneira removed to Paris for further studies in philosophy and theology, and three years later to Padua, where he completed his studies. In 1549 he became teacher of rhetoric at Palermo. In 1552 he returned to Rome and labored effectively for the instituting of the Collegium Germanicum. Loyola sent him to Belgium in 1555, in order to promote the interests of Jesuitism, more particularly to secure permission of Philip II to introduce the order. His success in this matter was contributed to by direct labors as a preacher at Louvain, and by defending the order against attacks of the Sorbonne, towards the realizing of that project. In 1559 he was appointed propositus of the Collegium Germanicum, and in 1560, after having taken the four vows of his order, propositus for the province of Tuscany. In 1560 he was commissary of the order in Sicily, and afterwards assistant to the generals Lainez and Francis Borgia. He attended the second general assembly of his order as the representative of Sicily, and the third as the representative of Rome, and subsequently was made overseer of all the houses of the Jesuits in Rome. Physical sufferings led to his return to Spain in 1584, and to the occupation of a writer in behalf of his order as his chief work. He was engaged in collecting the materials for a work intended to describe the services of the Jesuits in Spain and India when he died, at Madrid, Oct. 1, 1611. His head was found in an uninjured state, it is said, as late as 1583. As a thinker, Ribadenêira was characterized by credulity: as a writer, by a diffuse style in the manner of the old legends, whence his name was sarcastically transformed into Peter de Badüeria, l. e. "chatterer." His works were numerous, and are fully given in Zetterl's large Universal-Lexicon. They are ascetical or biographical in nature, though frequently devoted specifically to the interests of his order. We mention his Lives of Ignatius de Loyola, Borgia, Lainez, and Salmeron:—the Flos Sancatorum (transl. into English, 1669)—all in numerous editions— the Hist. del Schiame de l'An- gitore (Valencia, 1588.)—Le Prince Christies, a defence against Machia- velli (Antw. 1597, etc.)—Catalogus Scriptorum Soc. Jesu—a catalogue of Jesuit writers, their provinces, colleges, houses, etc. (Ibld. 1608); also translations from Albert the Great and Augustine into Spanish. See ALEGGIARHE.

Rib'ai (Heb. Ribay, ריבי, pleader [with Jehovah]; Sept. Ριβαί, Ριβαι), the father of Itai, one of David's mighty men of the tribe of Benjamin (2 Sam. xxiii, 29; 1 Chron. xxi, 81). B.C. ante 1020.

Ribalta, Francisco, an eminent Spanish painter, was born at Castellon de la Plana in 1551. He studied the works of Raphael and Sebastian del Piombo in Rome, and settled in Valencia. His design, color, and composition are highly commended. Among his works are a Last Supper, a Holy Family, and The Entombment of Christ. He died in 1582.

Riband (Numb. xv, 88). See Lack.

Ribas, Juan de, a Spanish ecclesiastic, was born at Cordova in 1612. He belonged to the Order of Dominicans, and taught for many years in the convent of St. Paul at Cordova. His death occurred Nov. 4, 1687. Besides sermons and some ascetic treatises, he wrote, Estudio al Ceasar y a Dios en Gloria (1685, fol.) this appeared under the name of Jose de Zais. Many writers have attributed to Ribas the work entitled Teatro Jesuitico, etc. (Coimbra, 1654, 4to), which bears the name of Francisco de la Piedra. This treatise speaks with great severity of the Jesuits, and was burned by order of the Inquisition. Ribas denied the authorship of the work, but was known to have written other attacks against the Jesuits, one of which is entitled Navrager boetoro. See Échard, Script. Ord. Pradici- cat.; Goujet, in Moret's Dict. Hist.; Peignot, Dict.
The Kamos al-Hermel on the plain of Ribalh.

east of Ribalh; and the Ribalh of the boundary-line also seems to have been greatly nearer the Galilean lake than the Ribalh on the Orontes was, since Ribalh was the town in the list nearest to the lake. The renderings of the ancient versions and the Targums only serve to confuse the passage. In the Sept., the division of the Hebrew words is even mistaken. Thus תְרוּפָּה, is rendered הַרְפָּה, and joining the two first letters of the second word to the first word. The Vulg., too, without any authority, inserts the word Daphnis; and Jerome affirms that Ribalh is identical with Antioch (Onomast., n. v., "Rebalah"). In his commentary on Ezekiel he is still more explicit. He says, "From the end of the temple (atrium) Enan—the border extends, according to the book of Numbers, to Sepham, which the Hebrews call Apamia, and from Apamia to Rebla, which is now called Antioch of Syria. And that it may be known that Rebla means that city which is now the noblest in Cilicia—Syria, the words contra fontem are added, which, it is manifest, signify Daphnis" (Opera, v. 478, ed. Migne). This singular view appears to be taken from the Targums (Bochart, Opera, i. 481). Some suppose that the Daphne here mentioned was the place near the Lake of Merom of which Josephus speaks (War, iv. 1, 1); and that therefore Aia may mean one of the fountains of the Jordan. With this agrees Farchi, the Jewish traveller in the 13th and 14th centuries, who expressly discriminates between the two (see the extracts in Zunz, Benjamin, ii. 418), and in our own day J. D. Michaelis (Bibl für Urgeschichte; Suppl. od Lexica, No. 2813) and Bonfrere, the learned editor of Eusebius's Onomasticon. So likewise Schwarz (Fulest, p. 28). But Dr. Porter has endeavored to draw the boundary-line in consistency with the position of the Ribalh or Riblah above described (Hand-book for Syria, p. 580); and Winer, Gesenius, Van de Velde, and others seem to have found no difficulty in identifying the Ribalh of Numbers with that of Jeremiah and the later historical books. But Palestine never actually extended thus far north, and the arguments of Keil (ad loc.) appear to us conclusive that another Ribalh must there be meant south of Mt. Hermon, perhaps the site afterwards called Laishen and Dun, the present Tell el-Kady. See Tabn.

2. Ribalh of Hamath lay on the great road between Palestine and Babylonia, at which the kings of Babylonia were accustomed to remain while directing the operations of their armies in Palestine and Phoenicia. Here Nebuchadnezzar waited while the sieges of Jerusalem and of Tyre were conducted by his lieutenants; here were brought to him the wretched king of Judah and his sons, and after a time a selection from all ranks and conditions of the conquered city, who were put to death, doubtless by the horrible torture of
Impaling, which the Assyrians practiced, and the long lines of the victims to which are still to be seen on their monuments (Jer. xxxvii. 5, 6; ii. 9, 10, 26, 27; 2 Kings xxv.; 6, 20, 21). In like manner Pharaoh-nehuch, after his victory over the Babylonians at Carchemish, returned to Riblah and summoned Jehoahaz from Jerusalem before him (2 Kings xxiii. 38). Riblah is probably mentioned by Ezekiel (vi. 14), though in the present Hebrew text and A. V. it appears as Diblah or Diblah (q. v.).

This Riblah has no doubt been discovered, still retaining its ancient name, Riblah, on the right (east) bank of el-Ayy (the Orontes), upon the great road which connects Baalbek and Huma, about thirty-five miles north-east of the former and twenty miles south-west of the latter place. It lies about twelve miles east by north of its great fountain, which still bears the name el-Aiu. The advantages of its position for the encampment of vast hosts, such as those of Egypt and Babylon, are enumerated by Dr. Robinson, who visited it in 1852 (Bib. Rea., iii. 545). He describes it as "lying on the banks of a mountain stream in the midst of a vast and fertile plain yielding the most abundant supplies of food and fuel." At this point the road is open by Aleppo and the Euphrates to Nineveh, or by Palmyra to Babylon. . . . by the end of Lebanon and the coast to Palestine and Egypt, or through the Bukait and the Jordan valley to the centre of the Holy Land." It appears to have been first alluded to by Buchanan in 1516 (Travels in Persia, p. 480). The most singular object in this neighborhood is a monument called Kamao el-Hermel, which stands on a high mound several miles farther up the Orenous than Riblah (that is, farther south), but distinctly visible from it. It stands on a pedestal of three steps, and in the form of two quadrilateral pillars, each about twenty feet in circumference with figures of dogs, stags, hunting-instruments, etc., and terminating in a kind of pyramid, it reaches the height of about sixty feet (as given by Robinson), but Van de Velde makes it about twenty more (469). One of the corners, the south-west, is in a dilapidated state; in other respects it is entire, and forms a solid mass of masonry built of large square stones. It is known to be of great antiquity; but its precise date and object are unknown; and Abulafia is the first writer who is known to have mentioned it. Dr. Thomson, who was the first to draw attention to it, would connect it with the ancient Babylonian dynasty (Jub. Sueras, May, 1847).

Riccio, Antonio, called Barbelungo, a painter of the Neapolitan school, was born at Messina in 1690. He went to Rome and studied under Domenichino; in that city he left several fine paintings. On his return to his native country he executed numerous works which now decorate its churches. Among them we mention, the Conversion of St. Paul: -- an Ascension: -- St. Charles Borromeo: -- and a very beautiful picture of St. Cecilia in a church in Palermo. See Domenich, Vite de' Pittori Italiani; Lanzo, Storia Pictorica; Ticiani, Dizionario; Guida di Messina; Mortillaro, Guida di Palermo.

Riccio, Bartolomeo (1), an Italian scholar, was born at Lugo, in Romagna, in 1490. He studied at Bologna, Padua, and Venice, and in the last-named city he charged of the education of Luigi Cornaro, afterwards cardinal. He subsequently taught at Ravenna. His researches and critical gains were so great as to place him in the position of tutor to Alfonso and Luigi d'Este, sons of the duke of Ferrara. In 1641 he received from Alfonso letters of nobility with the title of lord of Vendicà. Riccio wrote with elegance, but his style has been criticized as harsh and unequal. He died in 1655. His works have been collected into two volumes, Opera (Padua, 1748). See G. della Casa, Discorso sulla Vita di B. Ricci.

Riccio, Bartolomeo (2), an Italian Jesuit, was born at Castelfidardo. He was master of the novices at Nola and at Rome, and afterwards provincial of his order in Sicily. He died at Rome, Jan. 12, 1613. His works are Vita Jesu Christi ex Evangeliorum Notis Compendiosa (Rome, 1620, 4to), translated into Italian (ibid. 1609, 4to): -- Triumphus Christi Crucifixii (Antwerp, 1608, 4to): -- Monestorium Evangelicinum (Poitiers, 1621, 4to). See Tiraboschi, Storia della Letter., vol. vii.

Riccio, Lorenzo, an Italian Jesuit, was born at Florence, Aug. 2, 1708. He was of a noble family, and at a very early age joined the Society of Jesus. He was employed in various works, and finally became secretary-general under Leopoldo Marzorati. At the death of his superior, Riccio was elected to fill his place, May 21, 1758. But there soon arose those difficulties which finally destroyed the order. Its members were ban-
RICCI, Matteo, one of the earliest and most successful missionaries of the Romish Church. He was born at Macerata, in Ancona, Oct. 6, 1552, and was early devoted to a clerical life. After a thorough instruction in languages and the sciences, he entered the Order of Jesus in 1571. His comprehensive learning, together with his shrewdness, led to his being selected some years later to undertake the work of re-establishing the missions of his Church in China. The Minori Missione Corvino had founded them so long ago as A.D. 1294; but the abandonment of the native Christians, and the opposition of the native religions, Confucianism, Taoism, and Buddhism, followed by the persecutions of the Ming dynasty, had destroyed all the fructus of his labors. The Capuchin Gaspar de Cruz had attempted to reintroduce Christianity into China in about 1593; but without success. Ricci arrived with two companions in 1583 and was permitted to settle at Tsao-King-Fo. Aided by the Jesuit Roger, he was even permitted to build a Christian church in the immediate vicinity of a Chinese temple. His method was to gain the confidence of the people by conforming to their manners and prejudices. He assimilated his first teaching in the foundations of the moral and moral tenets of Confucianism; and he constructed a map of the world in which he grouped all other states about China as their centre. The Chinese priests were eventually successful, however, in exciting suspicion against him, from which he was compelled to flee to the sea-port Chow-chu. In 1585 he attempted a visit to Pekin, but, being considered a Japanese in disguise, he was unable to secure a presentation at court. Five years later he repeated the undertaking, and was fortunate enough to be selected by the Portuguese as the bearer of presents to the emperor; and he so improved the opportunity that he was thereafter permitted to reside with the other missionaries at the court of Pekin itself. Ricci now labored with increased energy in his mission. He acquired the respect of the imperial family and of prominent mandarins through his mathematical proficiency and through the arts of painting and music. Having given much attention to the vernacular, he was able to write a number of books in the Chinese language, and to adapt all his writings and writings to the promotion of Christianity. His influence extended, in course of time, beyond the precincts of the court and the capital, and was felt to the advantage of his cause in several provinces of the empire. The foundation of a durable work appeared to have been already laid when Ricci died, May 14, 1610. The mission immediately felt his loss in the withdrawal of the emperor's favor, and in being obliged to remove from the capital for a time. But the services rendered by the missionaries to the cause of mathematical science, and even to the Chinese civil and political State, were so valuable that they were soon permitted to resume their former places among the scholars. The Jesuits Schall, Verbiest, Pereire, and others were prominent in the subsequent history of Roman Catholic missions to China, and the successes realized were large; but the entrance of other orders upon this work, e.g. the Dominicans and Franciscans, introduced an element of discord among the missionaries themselves which impaired their usefulness and brought them into disfavor with the Chinese rulers. Incessant persecutions followed, extending from 1722 to 1846, which have almost obliterated the traces of the work of Ricci and his colleagues. See the art. China in this Cyclopedia. See Trigault, De Christ. Expel. apud Sinas ex Comm. Jesus, in Francisc. Societ. (1611, 2 vols.)—Wertheim, Ricci in Pietas, Neue theolog. Zeitung (Vienna, 1838).—Bretano, Breve riferimento a Prog. Mission. Soc. Jesu apud Chineses (Ratisbon, 1672, with notes by Mannegg, Vienna, 1834)—Du Halde, Descript. de l'Emp. de la Chine (Paris, 1736; German, with Mosheim's introd., Rostock, 4 vols. 410) —Gurzaff, Geschichte der China (Canton, 1833; German by Bredendorf, Bonn, 1836, 2 vols. 410) —and with continuation by Neumann, Stuttgart, 1847.—Wittgenstein, Herrlichkeit d. Kirche in ihren Missionen (Augsburg, 1841, 2 vols.; Gesch. d. kathol. Missionen auf unsere Zeit (Vienna, 1845))—Huc, Chine. Reich (Leipsic, 1856, 2 vols.).—Comp. Gieseler, Lehrb. d. Kirchengesch. III, ii, 638 sq.
RICCI

10

RICE

The inquiries instituted with reference to the state of nunneries, etc., revealed scandalous irregularities and crimes against morality carried to even unnatural lengths; but the removal of Leopold to ascend the throne of the German empire, soon after the Synod of Pistoja, brought the reforming career of Ricci to a close by depriving him of his protector. The opposition of the populace caused him to resign his bishopric, and the papal bull Austrom Fidei annulled the decrees of the Synod of Pistoja (Aug. 28, 1795). He submitted to the papal decision, after a long struggle, in 1796; but, heavily impressed on political grounds, and died Jan. 27, 1810. See De Potter, Vie de Sc. de Ricci (Brussels, 1825, 3 vols.; German, Stuttgart, 1829, 4 vols.).

Ricci, Sebastiano, a painter of the Venetian school, was born at Belluno in 1569. At the age of twelve he entered the studio of Cervelli, who took him to Milan. He there studied under Lisantrino, and afterwards went to Bologna. Receiving the patronage of the duke of Parma, Ricci was enabled to go to Rome to study design. He remained there until 1694, and spent several subsequent years in travelling throughout Europe, leaving his pictures in many of the most important cities. He finally settled in Venice, where he remained during the rest of his life. He died in 1794. The paintings of Ricci are noted for the nobility of the figures, grace of attitude, correctness of design, and brilliancy of coloring. Nevertheless, he never seemed able to rid his works of a certain disagreeable mannerism. Among those in Florence are a St. Charles and St. Francis Celebrating Mass; at the Museum of Dresden, an Assumption and Christ Giving to Peter the Keys of Paradise. See Orlandi, Abecedarium; Lanzi, Storia Pictorica; Tizetti, Dizionario; Bertolozzi, Guida di Parma.

Ricciarelli, Daniele (called Daniel of Volterra), a painter and sculptor of the Florentine school, was born at Volterra, in Tuscany, in 1569. He studied design under Sodoma, and afterwards under Peruzzi at Siena. On going to Rome, he became a pupil of Pierino del Vaga, and assisted his master in adorning the Vatican and other buildings. He became a friend of Michael Angelo, who procured for him the patronage of pope Paul III., and continued his work in the Vatican after the death of his master Pierino. A great deal of the success of his work was due to Angelo. The Ricci furnished designs for his paintings and gave him valuable advice. The Descent from the Cross, considered one of the three finest paintings in Rome, owes much of its renown to the assistance which Ricciarelli received from his friend. Were this his only work, he would have ranked among the greatest of Italian masters, but many of his other pictures have a sad lack of expression. On the death of Paul III., Ricciarelli lost his position as superior of the works of the Vatican, and gave himself thenceforth to sculpture. He modelled the sculptures of Michael Angelo in the chapel of St. Lorenzo in Florence; and while engaged upon an equestrian statue of Henry VII. in London died suddenly at Louvre is a bas-relief of Christ Placed in the Tomb, attributed to Ricciarelli. Among his minor paintings are Massacre of the Innocents and Martyrdom of St. Cecilia at Florence; at Dresden, a Holy Family (after Michael Angelo); and in the Louvre, David Killing Goliath. See Vasari, Vie, Lanzi, Storia Pictorica; Piolesi, Descrizione di Roma.

Riccio, Domenico, a painter of the Venetian school, was born at Verona in 1494. After receiving the instructions of Giolito, he went to Venice to study the works of Giorgione and Titian. He decorated the ducal palace at Mantua, and at Verona left many celebrated frescoes. He died in 1567. Among his works are Conversion of St. Paul.—Morning of St. Catherine:—Resurrection of Lazarus:—The Summarian, and The Resurrection of Christ. See

Ridolfi, Vite degli Illustri Pittori Veneti; Benozzi, Guida di Verona.

Riccio, Felice, an Italian painter, son of the preceding, was born at Verona in 1540. A pupil of his father, he continued his studies at Florence under Jacopo Ligozzi. Here he acquired an entirely different style of painting from his father. His Madonnas have much grace and delicacy, and he excelled in landscape. He painted many small pictures upon stone. His larger paintings are almost innumerable; among them are Adoration of the Magi:—Descent from the Cross:—St. Lucia and St. Catharine:—a colossal St. George, and a fresco on the façade of a house at Verona. See Ridolfi, Vite degli Illustri Pittori Veneti.

Riccoli, Giovanni Battista, an Italian astronomer and Jesuit, was born at Ferrara in 1588, and was professor of philosophy, theology, etc., at Bologna and Parma. By authority of his superiors, he devoted himself to astronomy, that he might confute the Copernican system, which he attempted to do in his Almagestum Novum (1651, 2 vols.). According to his theory, the sun, moon, Jupiter, Saturn revolve around the earth; while Mercury, Venus, and Mars are satellites of the sun. He also published an able treatise on mathematical geography and hydrography in 1661, and Astronomia Reformata in 1665. He died in 1671. See Fabroni, Vita Italiom. Doc. Excei.; Tiboraci, Storia della Letteratura Italiana.

Rice, Aaron, a Methodist preacher, was a native of Green County, Ky. Of his early history and his conversion, little is known. He became a member of the Louisville Conference of the Methodist Episcopal Church, South, and was long esteemed as an able and reputable minister. He died Sept. 9, 1846. See Minutes of Annual Conf. M. E. Church, South, 1846.

Rice, David, a Presbyterian minister, was born in Hanover County, Va., Dec. 20, 1739. He began his classical studies under the Rev. John Todd, and went to New College in 1759, becoming a member of the junior class. He graduated in 1761; was licensed to preach by the Presbytery of Hanover, Nov., 1762; and was ordained and installed pastor of Hanover Church, Va., Dec., 1768. Giving up this charge, he afterwards preached for a time near Isom, Va. He removed to Kentucky in Oct., 1786, where he labored for fifteen years. In 1798 he removed to Green County, but did not take any pastoral charge. Mr. Rice assisted in the establishment of Hampden Sidney College, was one of the trustees of the Transylvania University, and president of that institution from 1783 to 1789. He published a list of his publications: Essay on Baptism (1789); Lecture on Divine Decrees (1791); Slavery Inconsistent with Justice, etc. (1798, 12mo);—An Epistle (1805);—Second Epistle (1808);—Letters and Sermons. See Sprague, Annales of the Amer. Pulpit, iii, 246.

Rice, Edward, D.D., an English clergyman, was educated at Christ's, whence he was elected a fellow of Trinity College, Cambridge, in 1815. He was one of the classical masters of Christ's Hospital in 1829; vicar of Horley, Surrey, in 1827; head-master of Christ's Hospital in 1836; and died in 1853. He published several sermons: On Literature (Lond., 1820, 8vo);—On the Coronation of George IV. (ibid. 1821, 8vo);—Two Sermons on the Rosary, etc. (ibid. 1829, 8vo). See Lond. Gent. Mag. March, 1853, p. 316. See Allibone, Dict. of Brit. and Amer. Authors, s. v.; Darling, Cyclop. Bibl. s. v.

Rice, Henry Leffler, a Dutch Reformed minister, was the son of Henry and Elizabeth (Leffler) Rice, and was born in Washington County, Ky., June 25, 1795. His early education was conducted by the Rev. James Annand, of Kentucky, with whom Mr. Rice spent seven years into his own home. After spending three years in Transylvania University, Ky., he graduated from
that institution in the class of 1818. Having early experienced the renewing grace of God, in his sixteenth year he united, by a public profession of his faith, with the Presbyterian Church at Corthydon, Ind. Immediately after leaving the university, he entered the theological seminary at Princeton, N. J., whence he was regularly graduated in three years, after passing through the full course of study. He was licensed by the Presbytery of New Brunswick, Oct. 3, 1821, and was ordained as an evangelist by the same presbytery, Oct. 2, 1822. After his ordination he spent two years in mission work in new portions of the West, and then returned to New Jersey, where he accepted a call to become pastor of the New Brunswick Church at Spotswood, and was installed in September, 1825. Here he labored faithfully and successfully about eight years, until he was released by his classis, April 16, 1834, in order that he might accept a call to the German Reformed Church in Chambersburg, Pa., over which latter charge he was installed in May 1834, and in which he continued until his death. While residing in Chambersburg, he became profoundly interested in the literary and theological institutions of the German Reformed Church located at Mercersburg, and in the fall of 1836 he was induced to undertake an agency on their behalf, his pulpit being supplied, meanwhile, by neighboring ministers. Mr. Rice was also a member of the Board of Trustees of Marshall College at Mercersburg. After his removal to Mercersburg he studied the German language, and so thoroughly mastered it as to preach occasionally in that tongue to the German people in his vicinity; to their great delight. While proselyting the above-mentioned agency with great energy and success, he was stricken down by fever, and died at Chambersburg, May 3, 1837. Mr. Rice married, in 1821, Miss Gertrude Van Dyke, youngest daughter of Matthew Van Dyke, of Mapleton, four miles from Princeton, N. J. She was a woman of estimable character and fervent piety. She died June 9, 1857, about a month after the death of Mr. Rice. His wife was a most of large culture and of extraordinary piety, energy, and influence. (W. P. S.)

Rice, John H. (1), a Presbyterian minister, was born at Sharontown, N. Y., March 9, 1800. He received a good academical education, studied theology in Auburn Seminary, N. Y., was licensed and ordained in 1832, and subsequently became pastor of the following churches: Center Church, Canajoharie, N. Y.; Lebanon, N. Y.; Barton, C. W.; Grand Haven, Mich.; Gowanda and Sheridann, N. Y.; Watsburg and Wayne, Pa.; Clymer, N. Y.; Middlebush and Green, Pa. He died in the latter place, June 21, 1858. Mr. Rice was at one time an agent for the American Tract Society. He was a faithful laborer and devoted servant of Christ. See Wilson, Prep. Hist. Almanac, 1860, p. 122. (J. L. S.)

Rice, John H. (2), a minister of the Methodist Episcopal Church, South, was born in Middle Tennessee, Dec. 25, 1826. He professed religion and joined the Methodist Episcopal Church in 1838. He was admitted on trial into the Arkansas Conference Nov. 9, 1849, ordained deacon Nov. 9, 1851, and elder Nov. 9, 1853. He continued in active service until he was located. He joined the Confederate army in 1865, was received into the Arkansas Conference Oct. 21, 1863, and appointed chaplain of Colonel Shaw's regiment. He was killed in a skirmish with United States troops, March 25, 1864. For many years he had been a faithful minister, an able defender of the doctrines of his Church, and a generous dispenser of benevolence. See Annual Conference, M. E. Church, South, 1864, p. 529.

Rice, John Holt, D.D., a Presbyterian minister, was born near New London, Bedford County, Va., Nov. 28, 1777. He became tutor in Hampden Sidney College, Va., in October, 1796, and on Sept. 12, 1805, was licensed to preach. On Sept. 29, 1804, he was ordained and installed pastor of the church at Club Creek, still retaining his connection with the college until the latter end of the year, when he resigned his tutorship and removed to a small farm in Charlotte County. Here, his salary being insufficient, he also opened a school, and continued until 1812, when he became pastor of Mason's Hall, Richmond, Va. In May, 1816, he came to New York as a representative of the Bible Society of Virginia at the Union of American Bible Societies. He afterwards attended the meeting of the General Assembly at Philadelphia, where he was often sent again as a delegate from his presbytery. He was elected president of the College of New Jersey Sept. 26, 1822, as well as professor in the Union Theological Seminary in Princeton and College of New Jersey for the same year; he only accepted the latter and resigned his pastoral charge. He entered upon his professorship Jan. 1, 1824. In May, 1830, he came to New York, where he delivered one of the series of the Murray Street Lectures. After this his health gradually declined until his death, Sept. 3, 1851. Dr. Rice started, in 1815, and published for a time the Christian Monitor, the first weekly religious newspaper which appeared in Richmond. In January, 1818, he published the first number of the Virginia Evangelical and Literary Magazine, which he continued till 1829. His other writings are, a memoir of S. Davies and of Rev. J. B. Taylor; some occasional poems, and also a number of pamphlets, among which we will notice his Historical and Philosophical Considerations on Religion, addressed to James Madison, Esq. (the ex-president), which, after being first published as successive articles in the Southern Religious Telegraph in 1830, appeared in a small volume in 1832. See Sprague, Annals of the Amer. Pulpit, iv. 295.

Rice, John Jay, a Presbyterian minister, was the son of Gabriel and Phoebe (Garrard) Rice, and brother of Rev. Nathan L. Rice, D.D. He was born in Garrard County, Ky., Sept. 7, 1804, and received his early education wholly in the country schools in the neighborhood of his father's residence. At the age of fourteen he entered Centre College at Danville, Ky., but, after staying a short time, he returned home. Subsequently he again entered Centre College and remained two years, but did not graduate. While at college he and his brother Nathan were both converted during a glorious revival at Danville. Soon after he began devoting himself to the work of the ministry, he began to study theology under Rev. James C. Barnes, a widely known pastor and preacher of Kentucky, at the same time laboring in Mr. Barnes's and neighboring churches. He was licensed by the Transylvania Presbytery, April 2, 1827, but soon became convinced that he was not so well furnished as to make full proof of his ministry, and went as a licentiate to Princeton Theological Seminary, where he studied two years, 1829-31. While a student in the seminary he resided at Dutch Neck, about four miles south of Princeton, and stately supplied the Church at that place, with frequent help from his brother Nathan. The preaching of the brothers made a deep impression upon the people of Dutch Neck. Many were hopefuly converted. The brothers were regarded with strong affection, and their names are held in tender and loving remembrance to this day among the people of the region. Having returned to Kentucky at the end of his second year in the seminary, Mr. Rice returned to New York, April 5, 1831, where he entered the office of the late Rev. Henry St. Mary of Ebenezer, and soon became widely popular as a preacher. In the years 1832-34 he preached as stated supply to the Church at Millersburg, Ky., and from 1834-35 at Maysville, Ky. But, alas! the hand of a fatal pulmonary disease was soon laid upon the zealous and eloquent preacher. After aiding his brother Nathan for two or three years in editing a religious paper which the latter had started, he felt constrained to try a milder climate, and went to Florida. There, from Talahassee as a centre, he travelled much in Central Florida, and his soul was aroused at sight of the ignorance
of the people and their destination of Gospel privileges. Although sick, he must preach; and he did preach until he had utterly exhausted his remaining strength. He was at length seized with a high congestive fever, and died at Quincy, Ill., Sept. 19, 1840. He was a bright and shining light. His ability was amazing, his energy was endless, his pulpit gifts were highly attractive. His spirit was Christ-like, tender, loving, full of zeal. Mr. Rice married, May 5, 1825, Miss Emily Craig Welsh, of Lincoln, Ky., and at his death left only one child, a little daughter, who still survives (1878). Had he lived to a good old age, Mr. Rice would unquestionably have been one of the ablest and most ornamental ornaments of the American pulpit. (W. P. S.)

Rice, Luther, a Baptist minister, was born in Northborough, Mass., March 25, 1783, graduated at Williams College in 1810, and immediately entered the Congregational Theological Seminary at Andover. He was ordained as a foreign missionary Feb. 6, 1812, and sailed a few days after for Calcutta; but his views on baptism having, in the meantime, undergone a change, he joined the Baptist Church on his arrival there, and came back to this country for the purpose of wakup the Baptist churches to an effort in behalf of foreign missions. He was the chief motor of the formation of the Baptist General Convention in 1814. He afterwards became the President of the College, for the establishment of which he had zealously labored, and with which he remained connected until his death, Sept. 25, 1836. See Sprague, Annals of the Amer. Pulpit, vi, 602.

Rice, Nathan, a Methodist minister, was born June 10, 1792, in Coventry, R. I. His mother was a member of the Freewill-Baptist Church, and the first sermon preached by a Methodist minister was from Rev. William Jewett. He united with the Methodist Episcopal Church in Lee, Mass., at the age of seventeen years. In 1819 he joined the New York Conference, and continued in active service until 1854, when, worn down with labor, he took a superannuated relation. Mr. Rice was a true patriot, an example of simplicity, uncomplaining of a kind and sympathetic nature which delighted in the welfare of others. His death, which occurred at Washingtonville, N. Y., Feb. 21, 1864, was very happy, a fit closing of such a life. See Minutes of Annual Conf. M. E. Church, 1864.

Rice, Nathan Lewis, D.D., a Presbyterian minister, was born in Garrard County, Ky., Dec. 20, 1807; died June 11, 1877. To procure funds to enable him to obtain a preparatory education, he taught a school at the early age of sixteen. At the age of eighteen he united with the Presbyterian Church. He entered Centre College, Danville, Ky., in the fall of 1826, and during a part of his course was a teacher of Latin in the preparatory department. After remaining some time, without graduating, he entered upon the study of theology, and at the close of the year was licensed to preach by the Transylvania Presbytery. Feeling the need of a more thorough preparation for the work of the ministry, he entered Princeton Theological Seminary, where, during his course, he became known for his large attainments and extraordinary ability. He accepted a call to the Presbyterian Church at Bardstown, Ky., and was ordained and installed in 1833. The more effectually to counteract the efforts at persecuting by the Roman Catholic college at that place, he established an academy for girls, and subsequently one for boys, and also founded a newspaper called the Western Baptist. He was afterwards merged in the Presbyterian Herald of Louisville. He continued in this pastoral relation for eight years, and became, in 1841, stated supply for the Church at Paris, Ky. While here he entered into a discussion with Alexander Campbell, the president of Bethany College, Va., on the subject of baptism. The debate was held in Lexington, Ky. The moderators consisted of some of the most eminent lawyers of the state, among whom was Henry Clay. This discussion created a wide and intense interest throughout the country, and brought out the full power of Dr. Rice as a disputant, and gained for him the reputation of being the greatest polemic of the age. The debate was published in a large octavo volume, which was extensively circulated. Soon after, Dr. Rice received a call to the Central Presbyterian Church, Cincinnati, O., and entered upon his duties as its pastor in 1844. He was installed June 12, 1845. He was in labors more abundant, and in connection with his work as pastor he wrote several volumes, taught in several classes for the ministry, held a debate with the now archbishop Porcelli of Cincinnati, which was published in a volume, also a debate with the Rev. Mr. Pingree of the Universalist Church of that city. Calls came to him from every quarter, so extensive had become his fame. In 1853, on the death of Dr. Potts, he accepted a call to the Second Presbyterian Church of St. Louis, Mo., and was installed Oct. 9 of the same year. He edited, besides his other labors, the St. Louis Presbyterian, and published several books. At the meeting of the General Assembly in Nashville, Tenn., in 1855, he was elected moderator. He accepted a call to the Second Presbyterian Church, Chicago, Ill. The Church was small and weak, but under his labors it grew strong and flourishing. While there he edited the Presbyterian Expositor. In May, 1859, he was elected by the General Assembly to the professorship of didactic and polemic theology in the North-west Theological Seminary at Chicago, which he performed in addition to pastoral work. In 1861 he was called to the Fifth Avenue Church in the city of New York, to succeed Dr. J. W. Alexander, deceased. Here his labors proved too great for his strength, and he sought relief in 1867, and retired to a farm near New Brunswick, N. J. After residing in New Jersey he was called to the chair of the Westminster College, mo., where he remained until 1874, when he was elected to the chair of didactic and polemic theology in the theological seminary at Danville, Ky. Here he performed his last earthly labors; and at the close of the session in 1877, having become greatly impaired in health, he sought retirement, and at the residence of his brother, Rev. Dr. D. F. Rice, of Brenton County, Ky., where within the brief space of one month, with a mental fullness of peace and holy joy, he died June 11. (W. P. S.)

Rice, Phineas, D.D., an eminent Methodist preacher, was born in the State of Vermont in 1786. Having been trained for the law, he taught a school and opened a law office, and in his twenty-eighth year became a preacher, and in the course of a few years he was called to publicly exercise his gifts. He was received on trial in the New York Conference in 1807, and was sent to labor as junior preacher on the Granville Circuit. The ministry of Dr. Rice extended over a period of fifty-four years, and each year during all that long period he was returned effective, and received regularly his appointment. He labored on circuits sixteen years, in stations eleven, and in the presiding elder's office twenty-eight years, excepting the last year, which was not completed at the time of his death. He was a member of every General Conference from 1820 to 1856, inclusive, and was received at the University of Leyden, 1854. Dr. Rice was a marked man in every respect. His piety was deep, fervent, and abiding, and he was eminently a man of prayer. Scrupulously punctual, industrious, and self-sacrificing, he was a wise counsellor and a true friend. He had a natural vein of pleasantry, and his conceptions were not infrequently quaintly expressed. Even when in the pulpit, at times a facetious remark, evidently unpromised, would cause his hearers to smile. These smiles were not seldom followed by tears as the preacher passed from one phase of his subject to another. His pathos and tenderness were strangely blended with his wit and humor; and if one could have wished that there had been less of the latter qualities, it was
nevertheless evident that there was in them no bitterness, no harshness, no undue severity. As an exponent of ecclesiastical law and an administrator of the discipline, Dr. Rice had few equals. During the last months of his life he suffered greatly but patiently, and calmly contemplated the approach of death, which came Dec. 4, 1861. See Minutes of the Conferences, Methodist Episcopal Church, 1862, p. 70.

Rice, William H., a Presbyterian minister, was born in Shelby County, Ky., July 15, 1827. His early education was thorough; his collegiate studies were pursued at Transylvania College, Ind., and Haverford College, Ind. He spent one year in the theological seminary at New Albany, Ind., was licensed to preach in April, 1858, and ordained the same year by Vincennes Presbytery, and preached as stated supply for the Church at Rockport, Ind. In 1854 he removed to Texas, in the hope of restoring his health by a warmer climate. While there he preached for the churches at Palestine and Mound Prairie, in the bounds of the Eastern Texas Presbytery. In 1856 he resigned his charge, went to Alabama, and finally, in 1859, returned to Indiana, where he died, Sept. 5, 1859. Mr. Rice had a mind that was clear and penetrative, and his preaching powers were excellent. See Wilson, Presb. Hist., 1861, p. 106. (J. L. S.)

Rich, Claudius James, an Oriental traveller, was born March 28, 1787. His researches as a pioneer explorer of Oriental countries were papers published, and, though not able to sink his shafts as deep as Layard and other modern explorers, his labours are equally worthy of regard. Even as scientists have been supplanted by after-discoveries, so the time may come when Wilkinson and Layard, and Schliemann and Cremoza, may be outshone by future explorers whose names are to be inscribed, Memoires sur les Ruines de Babylon (1812):—Narrative of a Residence in Koordistan (1836). He died Oct. 5, 1821. (W. P. S.)

Rich, Edmund, St. (French Saint-Edme), archbishop of Canterbury, was born in Abingdon, Berkshire, about 1190. Having studied at Oxford, he graduated in theology at the University of Paris, and lectured there for some time on Scripture. He taught philosophy at Oxford from 1219 to 1229, enjoying also a prebend in Salisbury. On April 2, 1234, he was consecrated archbishop of Canterbury, enforcing discipline, by authority given by the king, in spite of the opposition of clergy and others. Pope Gregory IX appointing Italians to vacancies, Edmund deemed this an abuse of the papal power, and, on June 23, 1290, wrote to the see of Arles in Provence, France. Being in feeble health, he went to Soissons, in Champagne, where he died. He was canonized in 1246 by Innocent IV. Among his works are, Constitutions, in thirty-six canons, found in Labbe's edition of the Councils:—Spectaculum Ecclesiae, in vol. iii of Bibliae Sacrae Nova. A manuscript Life of St. Ed- mund, by his brother Robert, is preserved in the Bod- 
cillian library: another by Bertrand, his secretary, was published in Martene's Theatrum Anecdotorum. See Appleton's Cyclopaedia; s. v.

Rich, John, a minister of the Methodist Episcopal Church, South, was born in Davie County, N.C., Oct. 10, 1815. His conversion took place in 1837, he was licensed to preach in 1839, and was received into the North Carolina Conference in 1840. During the suc- ceeding ten years of his laborious and useful life he filled many of the most important appointments in the con- ference with great acceptability. At the conference of 1860 he was superannuated, and on Oct. 25, 1851, he died. His distinguishing traits were clearness and penetration of thought, childlike simplicity, and unaffected mien. See Minutes of Annual Conf. M. E. Church, South, 1851, p. 345.

Rich, Obadiah, an American bibliophile, was born in 1785. He published several works bearing on bibliography, but that for which he was most distinguished was the Bibliotheca Americana Nova. He died Jan. 20, 1850. (W. P. S.)

Richard of Armagh—whose real name was Fitz- Ralph, and whose historical name is Armachanus—was born in Devonshire, England, or, according to some, at Dundalk, in Ireland. He was educated at Oxford—first at University and then at Balio College. He graduated as doctor of divinity, and in 1383 was commissary-general of that university. His first Church promotion was to the chancellorship of the Church of Lincoln, July 1394; he was next made archdeacon of Chester, in 1396; and dean of Lichfield, April, 1397. At Oxford he opposed the affectation and irregularities of the mendicant friars. In 1347 he was advanced to the archbishopric of Armagh, and still continued his opposition to the friars, who became so incensed at his exposure of them that they had him cited before Innocent VI at Avignon, where he defended his opinions with great firmness, but was decided against by the pope. He died at Avignon, Nov. 16, 1360, without suspicion of poison. He was unquestionably a man of great talents and sound judgment. Perhaps his best panegyric is his being ranked, by some Catholic writers, among heretics. He is said by Baie to have translated the New Testament into the whole Bible. His published works are, Defensio Civitatum adversus Fri- tres Mmndicantes (Paris, 1496)—Sermones Quatuor ad Crucem (Lond. 1612).

Richard of Bury, an English prelate, was born at St. Edmundsbury, Suffolk, in 1218. His family name was Richard Angerville, or Angerville. He was educated at Oxford, and became tutor to prince Edward (afterwards Edward III), and was sent on a diplomatic mission by the pope, he formed a friendship with Petrarch, and was ap- pointed bishop of Durham in 1333. He was made high chancellor of England in 1334; treasurer of England in 1380; co-ambassador to France twice in 1388. He died in 1345. Richard was a man of great erudition, for his day, and a liberal patron of learning; as well as a great collector of books, which he devised to a company of scholars at Oxford, and which were deposited in a hall once occupying the site of Durham (now Trinity College. For an estimate of his character, see Jortin, Remarks on Exce-Ii, lii 394. His Philobiblon de Amore Librorum (Cologne, 1473, 4to) was translated into Eng- lish (Lond. 1803); the American edition was cor- rected and corrected, with notes, by Samuel Hault (Al- bany, 1861, 12mo and 8vo). See Allibone, Dict. of Brit. and Amer. Authors, s. v.

Richard of Cirencester (so called from his birth- place, in Gloucestershire, England)—in Latin Ricardus Corinensis—was born in the first half of the 14th century. Nothing is known of his family or circumstances. In 1530 he entered the Benedictine monastery of St. Peter, Westminster (where he is sometimes called the "Monk of Westminster"), and remained there the rest of his life. His leisure was devoted to the study of British and Anglo-Saxon history and antiquities. In the prosecution of these studies Richard is said to have visited numerous libraries and ecclesiastical establishments in England, and it is certain that in 1591 he ob- tained a license from his abbot to visit Rome. He died in 1401 or 1402. The work to which he owes his cele- brity is his De Sitts Britanniae, a treatise on the ancient state of Great Britain. This work was brought to light by Dr. Charles J. Bertram, professor of English at Copenhagen (1747), who sent a transcript of it, together with a copy of the map, to Dr. Stukely, the celebrated antiquarian. From this transcript Dr. Stukely published an analysis of the work, with the itinerary (1757, 4to; London, 1809):—Itinaria ob Henegatiam et Annam 1846.—Tractatus super Symbola Minor et Minus:—and Liber de Officiis Ecclesiasticis.

Richard of Devizes was a monk of the priory of St. Swithin, at Winchester, in the 12th century, who
wrote a history of the first years of the reign of Richard I. 1189-93, Conte di Riccardi Divisiostas de Belel-

Richard of Hexham was the first prior of his house before 1138. He compiled a short history of the last two years of the reign of Henry I, and of the more remarkable events of that of Stephen, and a history of the Church of Hexham. Tanner also attributes to him—probably on slender foundation—a history of the reign of Henry II. See Allibone, Dict. of Brit. and Amer. Authors, s.v.;— Chalmers, Biog. Dict. s.v.

Richard of St. Victor, a celebrated mystic and writer of the 12th century, concerning whose life but little is known. He was of Scottish extraction, and at an early age entered the Augustinian convent of St. Victor at Paris, where he became the pupil of the learned and pious Hugo (q.v.). He was made sub-prior of the abbey in 1159 and prior in 1162, and in the latter capacity contended persistently against the bad administration and the unedicifying life of the abbot Ervissius, until he effected the removal of the latter from his office. Nothing further has been handed down with reference to the circumstances of his life, save that he was a friend of St. Bernard, and died in 1173. A number of writings from his hand have been preserved, divided, as respects character, into exegetical, ethical, dogmatical, and mystical, or contemplative, works. As the exigent is little more than mystical allegory, the works in which it is contained possess but little historical value; but those which deal with other subjects have much higher merit, though the mystical element is everywhere apparent. Of his ethical works, mention is made of his treatises, De Statu Interioria Hominis;—De Erudizione Interioria Hominis;—De Exterminacione Multi et Promotione Boni;—De Differentia Peculi Mortalia et Venalia.

Of his dogmatic writings the following are prominent, De Verbo Incarnato, where, in imitation of Augustine, sin is praised as felix culpa, because he necessitated the incarnation of Christ:—two books, De Evangelio, against the Jews:—and, very particularly, six books, with which Apparatio Pernonea in Trinitate. In these works the author appears as one of the most skillful dialecticians and experienced psychologists of his time. Like his master Hugo, he aims to unite knowledge and faith, scholasticism and mysticism. He acknowledges the right of philosophical inquiry, but insists that for the Christian thinker faith is the necessary prerequisite of knowledge. This principle governs him in the work on the Trinity, which is perhaps the most remarkable product of his mind. He first shows that reason proves the existence of but one supreme substance, which is God. An examination of the divine attributes follows, particulars of the Deity and knowledge of God are argued that in their perfection they can belong only to the one Absolute Being. The idea of love is then introduced, in order to effect the transition to the subject of the Trinity. As love, like all the attributes of the Deity, must be perfect, it implies necessarily a plurality of Persons. Abstract love (amor) cannot become concrete (crescit) without an object upon which it may fasten. The Supreme Love can only be expended on a Supreme Object; and as it is eternal, its object must be so likewise. But as it is a proof of weakness not to allow society in love, these two Persons, who love each other, desire a third Person whom they may love with equal fervor. By this means, if not by no imputation of gaining salvation, and with the certainty of following the occupation which he loved best, he now set out with an army to join the third Crusade, then about to leave Europe. He united his forces to those of France on the
Richard

plains of Vezelay, and the two armies (numbering in all 100,000 men) marched together as far as Lyons, where they separated, and proceeded by different routes to Messina, where they again met. Here Richard ber-
touched his nephew Arthur to the infant daughter of Turcoed, king of Sicily, with whom he formed a close alliance. The Sicilian throne was at that time claimed by the emperor Henry VI; and the alliance with Tan-
cr, from this cause, afterwards turned out a very un-
lucky one for Richard. Having settled a difference which now arose between him and Philip respecting his old engagement to Philip's sister Adelais, the English king, on April 7, 1191, sailed from Messina for Cyprus, carrying along with him Berengaria, daughter of San-
cho VI, king of Navarre. He had fallen in love with this princess, and he married her in the island of Cy-
pess, where he hailed on his way to Palestine. But even love did not make him forget his favorite pastime of war: he attacked and dethroned Isaac of Cyprus, al-
leging that he had ill-used the crews of some English ships which had been thrown on his coasts. Having then presented the island to Guy of Lusignan, he set sail on June 4, 1191, and on the 10th of the same month he reached the camp of the Crusaders, then assembled before the fortress of Acre. The prodigies of personal valor which he performed in the Holy Land have made the name of Richard the Lion-hearted more famous in romance than it is in history. The man was the crea-
tion and impersonation of his age, and the reader who follows his career may perhaps be more interested than he would be by the lives of greater men, or by the his-
tory of a more important period. On Oct. 9, 1192, he set out on his return to England. After some wander-
ings and adventures, he became the captive of the em-
peror Henry VI, who shot him up in a castle in the Tyrol. John, meanwhile, ruled in England, and he and

at Nancy. He taught theology at Paris, was made doc-
tor, and in various ways showed himself the champion of his sect. In 1178 he was obliged to retire to Fland-
ers in consequence of the part he had taken in the con-
troversy concerning the marriage of a converted Jew. When the Revolution occurred, he went into Belgium, and at the time of the second French invasion, in 1794, was living at Mons. On account of his great age he was unable to flee, and, though he remained some time in concealment, was at last discovered, and taken to Paris, where he was subjected to a military commission, and sentenced to be shot. The sentence was executed on Aug. 16, 1794. His crime was that of publishing, before the entrance of the French, a treatise entitled Parallele des Juifs qui ont Crucefie Jezus-Christ avec lesFrançais qui ont Execute leur Roy (Mons, 1794, 8vo) and, as Barbier pretends, one entitled Des Droits de la Maison d'Austriche sur la Reli-
gique (ibid. 1794, 8vo). The works of father Richard are numerous; among them are, Dissertation sur la Pos-
session des Corps et l'Institution des Maisons par les Démones (1746, 8vo)—Bibliotheque Sacrée, etc. (Paris, 1769, 5 vols., fol.); in this work he was assisted by se-
veral other Doms of the Rasais; also one entitled Des Crimes, et de la Miserere and that of Giraud; a new edition, with additions and corrections, appeared early in the present century (ibid. 1821-27, 29, 8vo):—Examen du Libelle intitulé Histoire de l'Establishement des Moines Mendians (Aigvion, 1767, 12mo)—Analyse des Conciles Generaux et Parti-
culiers (Paris, 1777, 8vo), etc.; also one entitled Contraste avec la Religion et la Raison (ibid. 1775, 8vo):—Annales de la Charité et de la Bienfaisance Chrét-
tienne (ibid. 1786, 2 vols. 12mo):—Voltaire de Retour des Ombres, etc. (Brussels and Paris, 1776, 12mo)—Conversations (Paris, 1789, 4 vols. 12mo). He also wrote many trea-
tises and brochures, all relative to the civil oath required of the priests and the Revolution. See Guillot, Les

The Mortys de la Foi; Caron, Les Confesseurs de la Foi, vol. iv; Amé de la Religion, 1822, vol. xxx; Noti-
tice in vol. 1 of the new edition of the Bibliotheque Sacrée.

Richard, Jean-Pierre, a French preacher, was born at Belfort, Feb. 7, 1743. In 1760 he was ad-
mitted to the Order of Jesuits, and on its dissolu-
tion he went to Lorraine, where he superintended the education of the nephew of the prince-bishop. About 1786 he returned to France, and preached in Paris, but did not take the oath. In 1805 he be-
came canon of Notre Dame. He died at Paris Sept. 29, 1820. His Sermons were published in 1822 (Par-
is, 4 vols. 12mo). See L'Amé de la Religion, xxxiv, 65, 77.

Richardot, François, a French prelate, was born in 1507 at Morcy-Ville-Eglise, Franche-Comté. While very young he joined the Order of Augustines at Champ-
litté, and was sent in 1529 to Tournay to teach theology. He afterwards taught in Paris. During his visit to It-
aly, which occurred a little later, he obtained from the pope a release from the vows of his order, with permis-
sion to wear the secular dress. He was made canon of Besançon, and in this capacity rendered such a service to his bishop that he was made suffragan, with the title of bishop of Nicopolis. On Nov. 11, 1561, he was installed bishop of Arras, but had scarcely taken possession of the see when he obtained from Philip II the creation of the University of Douai. He founded this institution in 1562, and taught there till his death. He was a member of the Council of Toulouse, and assisted at the provincial Council of Cambrai in 1565, and held several synods. At the taking of Malines by the duke of Alba he was made prisoner, but regained his liberty a month after. He died at Arras July 26, 1574. Of his writings we have, Ordinances Symodales (Ant-
erp, 1588, 4to)—Tract du Controverse. Sermons, trans-
lated into Latin by François (Schoett, 1608, 8vo):—L'Isti-
inuation des Pasteurs (Arras, 1654, 8vo):—Ordinances Fanchères, of Isabella of France, wife of Philip II. His

Castle of Ternesteigen, the Prison of King Richard.

Philip of France had good reasons for wishing that Richard should never return to his kingdom. He dis-
appointed them; not, however, until he had paid a heavy ransom, and even, it is said, agreed to hold his kingdom as a fief of the empire. On March 13, 1194, he

found himself once more in England. His brother

John, who had acted so treacherously towards him, was magnanimously forgiven, but with Philip of France he could not deny himself the pleasure of a war. In the context which followed he was generally victorious, but in the end it proved fatal to himself. He was killed by an arrow shot from the castle of Chaluz, which he was besieging, on March 26, 1199. If Rich-

ard had the voices of an unscrupulous man, he had at least the virtues of a brave soldier. See Stubbs, Chronicles and Memorials of Richard I, from a MS. in the library of Corpus Christi College (1864). See Crusades.

Richard, Charles Louis, a French ecclesiastic, was born at Blainville sur l'Eau, Lorraine, in April, 1711. At the age of sixteen he entered the Dominican con-
vent at Blainville, and took the vows of that order

Digitized by Google
works are all remarkable for great erudition. See Stapleton, Oration Funèbre de Richardson, in his Œuvres (1620, 4 vols. fol.); Valère André, Dibl. Belgi- 
ci; Gazet. Hist. Éclect. des Pays-Bas; Gallix: Christi-
naëus: imprimé à Leyde, 1674, de Fr. Richardson, in the Mémoires de la Société Royale d'Arras, p. 170.

Richardot, Jean, a French prelate, was born at Arras in the 16th century. His father sent him to the best schools in Spain, and his precocity attracting the attention of Philip II, he was admitted to the privy council of theThat monarch. While in France, and somewhat later, he was made ambassador to Clement VIII, and re-
ceived in 1602 the bishopric of Arras. He was after-
wards prior of Morteau, and in 1610 was made arch-
bishop of Cambrai, which office he held till his death, Feb. 28, 1614. See Le Carpentier, Hist. de Cambrai et du Cambrésis.

Richards, Elias Jones, D.D., a Presbyterian minister, was the son of Hugh and Jane Ellis Jones Richards, and was born in the valley of the Dee, Eng-
land, Jan. 14, 1813. While he was yet a child his par-
ents came to the United States, and settled in the State of New York. He was prepared for college at Bloom-
field Academy, in the town of Bloomfield, N. J., and was graduated at the college of New Jersey at Princeton in 1834. In early life he gave evidence of a con-
version, and at about seventeen years of age united with the Brick Church in the city of New York. After leaving college he spent one year in teaching as a tutor in a private family at Fredericksburg, Va. In 1835 he entered Princeton Theological Seminary, and passed through a full course of three years. He was licensed by the Presbytery of New Jersey in 1838, and ordained by the same presbytery, sine titulo, in New York city in the same year. For one year (1839-40) Mr. Rich-
ards preached as stated supply to the Presbyterian Church at Ann Arbor, Mich. From 1840 to 1842 he was pastor of the Second Presbyterian Church at Paterson, N. J., and from 1842 to 1846 he was pastor of the West-
ern Presbyterian Church in the city of Philadelphia. On Oct. 14, 1846, he was installed as pastor of the First 
Presbyterian Church of Reading, Pa. Here he really began the best and greatest work of his life—a work which he carried out with unfailing determination and perseverance to the end of his life. Dr. Richards was a man of great gentleness and amiability of character, yet was endowed with unusual tenacity of purpose. As a schol-
ar, he was far above the average of his profession. As a preacher, he was pleasing, attractive, persuasive, log-
ical, and thoroughly evangelical. As a pastor, he was faithful and zealous. In all the relations of life he was lovely and beloved, and had a strong hold upon the affections of those who knew him well. Dr. Rich-
ards was twice married: the first time to Miss Emily Theresa Ward, of Newark, N. J.; the second time to 
Elizabeth F. Smith, of Reading, Pa. After more than twenty-five years of active and earnest pastoral labors in Reading, he was attacked by that frightful malady known as Bright’s disease of the kidneys, and, after much suffering, departed to be with Christ, March 25, 1872. His last utterance was, “My faith is in Christ.” (W. P. S.)

Richards, George, D.D., an English divine, was born at Halesworth, Suffolk, in 1739. He was educated at Christ’s Hospital, and matriculated at Trinity College, Oxford, in 1755, and obtained a scholarship. He was made fellow of Oriel College in 1750, vicar of Hampton in 1756, and rector of St. Martin’s-in-the-Fields in 1820. He died in 1837. His principal work is The Divine Or-
igin of Prophecy Illustrated and Defended, in a course of sermons preached in 1800 (Oxford, 1800, 8vo). He also published several Sermons and Poems. See Alli-
bone, Dict. of Brit. and Am. Authors, s. v.; Darling, Cyclop. Bibliog. s. v.

Richards, James (1), D.D., a Presbyterian min-
ister, was born at New Canaan, Conn., Oct. 29, 1767. His early education was limited. Having finally suc-
cceeded in entering Yale College in 1789, his health soon compelled him to leave it; yet, having afterwards gone through the academic and theological course with un-
tiring energy, the corporation of Yale College conferred upon him the degree of B.A. in 1794. In 1798 he was licensed to preach, and, having been called as pastor by the Church in Morristown, N. J., he was ordained and installed in May, 1797. In 1801 he was made M.A. by Princeton College, and in 1805, when but thirty-seven years of age, he was chosen moderator of the General Assembly of the Presbyterian Church. His ministra-
tions at Morristown were particularly successful, but having in 1809 received a call to the congregation of Newark, he accepted it, and removed there. Here his influence gradually increased. In 1815 he preached the annual sermon before the American Board of Commissi-

RICHARDS, 16

Richards, James (2), a Congregational minister, was born at Abington, Mass., Feb. 25, 1784. He gradu-
ated at Princeton College in 1809; he was ordained as pastor of the First Presbyterian Church of Philadelphia, in 1812, and, having offered himself to the American Board, sailed, with eight others, Oct. 23, 1815, for Cey-
lon. He was stationed at Batticotta, but, his health failing, he went to Cape Town in 1818, and returned the next winter, after which he was able to labor a year from April, 1829, and died Aug. 3, 1822. See Sprague, Annals of the Amer. Pulpit, li. 596.

Richards, John J., a minister of the Methodist Episcopal Church, South, was born July 16, 1816. He united with the Church in his thirteenth year, and for several years filled the office of class-leader, Sunday-
school teacher, and exhorter. In 1837 he was licensed to preach, and admitted on trial in the Georgia Confer-
ence in 1839, in which connection he remained until 1844, when he was transferred to the Florida Conference. There he labored until 1860, when, because of failing health, he was supers canned, and held that relation until his death—Sept. 4, 1863—in Madison County, Fla. Mr. Richards was a sound and practical preacher, de-
voting his time and talents to the service of the Church. See Journa of Am. Conf. M. E., Chi. South, 1863, p. 467.

Richards, John W., D.D., a Lutheran minister, was born in Mandan, N.D., April 18, 1806. He was a public profession of religion in his sixteenth year. His classical studies were pursued chiefly under the instruc-
tion of Rev. Dr. J. Grier. In 1821 he commenced the study of theology under the direction of his pastor, Dr. Muhlenburg, remaining with him until 1824, when the Synod of the New England States licensed him. He re-
signed his first charge (New Holland, Lancaster County, Pa.) in 1834, and removed to Trappe, Montgomery County. In 1836 he accepted a call to Germantown, Pa., where he remained till 1845, when he became pastor of St. John’s Church, Easton, Pa. While here he held the professorship of German language and literature in Lafayette College. In 1851 he took charge of the Three Tongs Church, Reading, Pa., and died Jan. 24, 1864. He was made doctor of divinity by Jefferson College in 1852.
RICHARDS

He published two Sermons, and left in MS, a translation of Hollaichs Nachrichten, and a History of the American Lutheran Church. See Sprague, Annals o

RICHARDS, Jonas De Forest, L.L.D., a Congregational minister, was born at Hartford, Vt., Dec. 28, 1849. After attending a grammar school, he entered Dartmouth College, where he graduated in 1866, and became tutor in Marietta College, O., where he remained but a short time. In 1868 he entered Lane Theological Seminary, at Cincinnati, O. From thence he went to New York and entered Union Theological Seminary, where he remained one year, and then matriculated at Andover, where he graduated in 1840, staying long enough at each of these institutions to become acquainted with their policy and methods. In 1841, he was ordained and installed pastor of a Church in Charleston, X.H. After remaining ten years, his pastoral relation was dissolved, and he accepted a call from Chester, Vt., where he remained four years as a stated supply. His next pastorate was Weathersfield, Vt., where he continued five years, at the end of which time he removed to Monroe, Mich., where he remained without charge for three years and returned to Weathersfield. After remaining one year in this place, he went South, and was elected a member of the Alabama Senate, which post he occupied four years, in the meantime being elected to a professorship in the University of Alabama. He died during his professorship, Dec. 2, 1872. (W. P. S.)

RICHARDS, Lewis, a Baptist minister, was born in 1752, in the parish of Llanharry, Caerdis- cardiganshire, South Wales. At the age of nineteen he left home and became a public profession of religion, and joined a society of Independents and studied for a short time in Lady Huntingdon's College. He then came to America, intending to pursue his studies at the Orphan House in Georgia. He was ordained a Baptist in Charleston in 1777, and after traveling about a year in various parts of South Carolina and Georgia, he removed to Northampton County, Va. In 1784 he became the pastor of the First Baptist Church in Baltimore. He continued alone in this pastorate till 1815, when Rev. E. J. Reis was elected co-pastor. Mr. Richards resigned his charge in 1818, but continued a member of the Church until his death, Feb. 4, 1832. See Sprague, Annals of the Amer. Pulpit, v. 201.

RICHARDS, Robert R., a Methodist preacher, joined the Methodist Episcopal Church in Thornton (now city of Rockland), Me., in 1838. Of his birth and early life we have no information. In 1841 he was admitted into the Maine Conference as a probationer, was ordained deacon in 1843, and elder in 1848. For twelve years he maintained an effective relation in the conference, but in 1864 failing health compelled him to take a supernumerated relation, which relation he sustained until Aug. 9, 1866, the date of his death. He was a man of sound understanding and great perseverance; as a friend, true and faithful; as a preacher, clear, logical, and persuasive. See Minutes of Annual Conferences, M. E. Church, 1867, p. 189.

RICHARDS, Thomas T. S., a minister of the Methodist Episcopal Church, was born in Baltimore, Md., Sept. 18, 1834. He professed conversion when in his thirteenth year, and in due time entered the ranks of the local ministry. In 1864 he was received on trial in the East Baltimore Conference, and continued in active service until the fall of 1868, when failing health compelled him to go to the state in rest. In the spring of 1869 he was transferred to the Baltimore Quarterly Conference, and given a supernumerary relation. He died Dec. 26, 1869. Mr. Richards was a preacher of creditable abilities, and, as a Christian, was ardent and devout. See Minutes of Annual Conferences, 1870, p. 19.

RICHARDS, William (1), LL.D., a Baptist minister of distinction, was born in 1749, in South Wales. His early advantages for obtaining an education were very limited. At the age of twenty-four he entered the academy at Bridgewater, England, where he remained two years. He became pastor of the Church in South Carolina, July 7, 1776, and continued his residence in that place the remainder of his life, about half the time as pastor of the Church. He died in 1818. In English and Welsh history and in the Welsh language and literature Dr. Richards was well versed. He wrote, History of Llangan, a Review of Noble's "Memorials of the Pretender House of Cromwell," and a Dictionary of Welsh and English. At his death he bequeathed his library—consisting of not far from 1300 volumes—to Brown University. "The library thus bequeathed is in many respects valuable; it contains a considerable number of Welsh books, a large collection of works illustrating the history and antiquities of England and Wales, besides two or three hundred bound volumes of pamphlets, some of them very ancient, rare, and curious. The collection is particularly valuable for its treatises on civil and religious liberty" (Guild, Manning and Brown University, p. 145-147). See Allibone, Dict. o

RICHARDS, William (2), a Congregational minister, was born in Plainfield, Mass., Aug. 22, 1792. He graduated at Williams College in 1819, and in Feb., 1822, offered himself to the American Board as a missionary to the Sandwich Islands. He was accepted, ordained Sept. 12, and sailed on Nov. 19, with two others, and four natives of the islands who had been instructed in this country. Mr. Richards was stationed at Lahaina, on Mani Island, and labored with great success until 1837, when he came to the United States, but returned in 1838, and occupied the post of king's counselor, interpreter, and chaplain. In 1842—after the organization of an independent government on the islands—he was sent as ambassador to the king, where he remained three years. After his return he lived with the king, and died there, Dec. 7, 1847. See Sprague, Annals of the Amer. Pulpit, ii. 228.

RICHARDS, William I., a minister of the Methodist Episcopal Church, was born in Fulton County, N. Y., July 30, 1815. He was converted when nineteen years of age, and for several years served as a local preacher, but entered the Black River Conference in 1850. He continued in active service (with the exception of one year) until his death—in Clarkson, Monroe County, N. Y.—May 22, 1875. He was a man of piety and great usefulness. See Minutes of Annual Conferences, 1875, p. 197.

RICHARDS, William K., a minister of the Methodist Episcopal Church, was born in Tennessee, Aug. 20, 1816, and in the same year his parents removed to Indiana. In 1837 he professed conversion; he was licensed to preach on Aug. 13, 1844; was employed by the presiding elder in 1851, and the next fall was admitted into the Indiana Conference. He labored until a few weeks previous to April 6, 1861, the date of his death. He was a very good man and a strong preacher. See Minutes of Annual Conferences, 1861, p. 197.

RICHARDS, William Lyman, a native Indian missionary, was born in Lahaina, Southern India, Dec. 2, 1823. He was sent to America to be educated with a view to the ministry. He accordingly entered Jefferson College, Va., where he graduated in 1841. Soon after he left college he became teacher of a classical school in Woodington, Va., where he remained some time, and then entered the Union Theological Seminary, where he graduated in 1846. He received license to preach at the same time, and was ordained to the Gospel ministry in Oct., 1847, and sent as a missionary to Fuh Chau, China, at which place he remained until 1851, when, on account of declining health, he was released and advised to return to the United States for its benefit; but died at sea near St. Helena, in the South Atlantic, June 5 of the same year. (W. P. S.)
Richardson, Chauncey, a Methodist minister, was born in Vermont in 1802. When nineteen years of age he professed conversion, and in 1826 was licensed to preach in the New England Conference, and in 1832, because of impaired health, was obliged to locate. His first residence in the South was at Tuscaloosa, Ala., where he labored to build up an educational institution. He was elected president of Batesville College, Texas, in 1838, and in 1839 a member of the annual Conference in Texas, 1840. He was also a member of the convention held in Louisville, 1845, to organize the Methodist Episcopal Church South; and of its General Conference in 1850. He served the Church as presiding elder, as editor of the Church paper, the Texas Watchman, and as president of the Conference for several years. He died April 11, 1852. Mr. Richardson was a good, gifted, trusty man. See Sprague, *Annals of the Amer. Pulpit*, vii, 721; Minutes of Annual Conf. M. E. Church, South, 1852, p. 423.

Richardson, James, D.D., fourth bishop of the Methodist Episcopal Church in Canada after the separate organization of 1828, was born at Kingston, Upper Canada, Jan. 29, 1791. He was trained as a sailor on the lakes; in the war of 1812-15 he served as a lieutenant and later as a captain, and maritime duty as principal pilot of the royal fleet. In the capture of the fort of Oswego he lost his left arm. At the close of the war he settled at Presque Isle, and became magistrate and collector of customs. He was converted in 1817, and joined the Methodist Episcopal Church the following year, serving the Church as steward and local preacher. In 1825 he was admitted on trial into the Conference, and was ordained deacon at Hamilton Conference, 1827, but was not ordained elder till 1830. In 1831 Mr. Richardson was appointed presiding elder of the Niagara district, and in 1832 editor of *The Christian Guardian*. He opposed the union with the British Wesleyans in 1838, but finally acceded to it and accepted appointments under it. But afterwards, being dissatised, he removed to the United States, and was preacher in charge at Auburn. In 1867 he returned to Toronto and joined those who continued to adhere to Episcopal Methodism. In 1840 he became one of the Yankee Wesleyan Bible Society, and held the office for eleven years. In 1852 he was appointed presiding elder, and in 1858, at St. Davids, he was elected and consecrated bishop, which office he held until his death, in March, 1875. See Simpson, *Cyclopedia of Methodism*, n.s.

Richardson, James J., a minister of the Methodist Episcopal Church, was born in Tennessee in 1808. He experienced religion in 1822, and in 1827 emigrated to Illinois. He was admitted on trial in the Illinois Conference in 1827, and served the Church in active work until 1856, when, because of failing health, he took a superannuated relation. In 1859 he became effective, but in 1862 he was again superannuated. In 1865 he was appointed to Spring Garden Circuit, which he served three years. He then traveled Benton Circuit one year, during which the active labor of his life ceased. His death occurred Sept. 21, 1872, in Marion County, Ill. Mr. Richardson was a plain, practical, and earnest preacher, and a prudent disciplinarian. See Minutes of Annual Conf. 1872, p. 136.

Richardson, James Monroe, a Presbyterian minister, was born in Carroll County, Miss., in 1829. He went to Mississippi College, where he graduated in 1846, and entered the Union Theological Seminary and passed through the full course, graduating in 1852. He was ordained in 1853, and became a stated supply of the Church at Marion, Miss., where he remained five years, and began the profession of teacher in Enterprise, Miss. In 1860 he supplied the Church at Flower's Place, Miss. After this he entered the Confederate army as an officer, and was killed in battle in Georgia in 1864. (W. P. S.)

Richardson, J. Clark, a Presbyterian minister, was born in East Windsor, Conn., in 1822. He spent some time in Yale College, but was compelled to discontinue his studies from health. He entered Union College in 1845, as a senior in the class of 1849. While in college he was a year, in the double character of pupil and tutor, in the University of Knoxville, Tenn. In 1847 he acted as colporteur in Kentucky and Tennessee; in 1849 he was licensed by the Presbytery of Tennessee, and was associated with James G. Fee as a missionary under the Board of Home Missions; and in 1851 he accepted an invitation to become the pastor of Alleghany Co., N. Y., where he was ordained by Genesee Valley Presbytery, and where he continued his acceptable labors until his removal to Osaw, N. Y., in 1865. He died Sept. 30, 1865. Mr. Richardson was a devoted, self-denying minister of the Gospel; in spirit, humble and retiring; in the maintenance of truth and the discharge of duty, extremely conscientious. See Wilson, *Presb. Hist. Almanac*, 1866, p. 222. (J. L. S.)

Richardson, John, bishop of Ardagh, was a native of Chester, England, but took his degree of D.D. at the University of Dublin. Of his early life we know nothing, save that he was appointed preacher to the state in 1601. He was consecrated bishop of Ardagh in 1635, and held the archdeaconry of Derry, the rectory of Ballymote, and the vicarage of Gransha in the Diocese of Derry. In 1641, being in dread of the rebellion which broke out in October, he removed to England, and died in London, Aug. 11, 1654. He was a man of profound learning, well versed in the Scriptures, and skilled in sacred chronology. His works are, *Choice Observations and Explinations upon the Old Testament* (Dublin, 1655, fol.); *Sermon of the Feast of Justification* (Dublin, 1625, 4to). He also wrote the "Assembly's Anointments," on Ezekiel. See Harris, Ware; Lloyd, *Memoirs*, p. 607.

Richardson, John P., a minister of the Methodist Episcopal Church, South, was born in Virginia, 1829, and was admitted into the Memphis Conference in 1848 or 1849. After five or six years his health failed; he located in St. Louis, and was graduated as a physician. He was readmitted into the Mississippi Conference in 1860, and after a year's successful labor volunteered as a soldier in the Confederate army, receiving the appointment of chaplain. At the fall of Fort Donaldson, he was taken prisoner and carried to Camp Chase, Ohio, where he died, March 4, 1862. Mr. Richardson was a learned and pious preacher, a close and inoffensive minister, and active and zealous as a Christian. See Minutes of Annual Conf. M. E. Church, South, 1862, p. 384.

Richardson, Lyman, a Presbyterian minister, was born in Attleborough, Mass., in 1790. In 1806 his parents removed to Harford, Pa.; he had at this time a fair education, with some knowledge of Latin, and in the winter of 1807-8 he taught his first school, which employment he continued in subsequent years. He was converted in 1809, and immediately turned his attention to the ministry. A friend secured for him the position of assistant in the academy at Wilkesbarre, Pa., of which he subsequently became principal; he remained there three years, devoting all his spare time to his professional labors, and then returned to Harford, Pa., opened a select school for youths pursuing the higher branches of study. He remained at Harford three years, during which he studied theology under Rev. Ebenezer Kingsbury, and in 1829 was licensed by Susquehanna Presbytery, and soon after entered upon his ministry. He was ordained in 1838, and subsequently was ordained an evangelist, and as such he preached at Wyalusing, Pike, and Orwell, Pa.; at Windsor, N. Y., three years; at Mount Pleasant and Bath, Pa.; and at Wysox, Pa. In 1840 he returned to Harford, Pa., to take charge of the academy, then a
very popular institution. This work suited him exactly, and he entered into it with great zeal and success, until 1865, when disease and age induced him to give it up. He died Dec. 1, 1867. As a preacher, Mr. Richardson was characterized by the power of glowing representations of truth and earnest love for souls; as a teacher, by kindness of manner and spirit, and by his wise counsel. See Wilson, Pref. Hist. Almanac, 1868, p. 225. (J. L. S.)

Richardson, Manoah, a Methodist preacher, was born in Lincoln County, Tenn., June 21, 1814; went to Missouri in early life, and settled in Chariton County. He was converted Jan. 16, 1831; was licensed to preach Jan. 16, 1841; entered the itinerancy Oct. 16, 1846, and was ordained deacon Oct. 1, 1843; elder Oct. 7, 1845. He did effective work for six years, when he superannuated, owing to failing health, and located at the end of a year. In 1868 he was readmitted into the Missouri Conference, and labored until about four weeks previous to his death, which occurred at Bloomington, Macon Co., Mo., April 18, 1871. He was a good man and a faithful preacher. See Minutes of Annual Conf. M. E. Church, South, 1871, p. 606.

Richardson, Marvin, D.D., a prominent Methodist minister, was born in Stephentown, Rensselaer Co., N. Y., June 10, 1789, but went, with his parents, in early youth to Brooklyn. He professed conversion in March, 1806, and united with the Sand Street Methodist Episcopal Church in that city. On Oct. 1, 1808, he was appointed to fill a vacancy on Croton Circuit, and was admitted into the New York Conference in 1809, of which he continued to be a member for sixty-seven years. He received his regular appointment as an effective minister forty-two consecutive years. He was a member of eight successive General Conferences—1820-52. Mr. Richardson in his early ministry endured the hardships, deprivation, and toil of pioneer life. The record of his life is one of early and deep religious experiences, of consistent piety, of ardent love to God and the Church, of a successful ministry, and at the close of a record of patient waiting and holy triumph. His last words were, "I have no fear." He died at Bougieville, N. Y., June 14, 1876. See Minutes of Annual Conferences M. E. Church, 1877, p. 41.

Richardson, Robert Hugh, a Presbyterian minister, was born at Liberty, Va., March 13, 1834. After receiving a preparatory education, he entered the Union Theological Seminary in 1850, and, taking the full course, graduated in 1856. He was appointed—after he had been twice rejected—to the mission field of San Francisco and the Oregon Territory. His call was accepted, and he was sent as a missionary to California in 1856. He labored for two years, and in 1858 was appointed chaplain to the Fifty-fifth Infantry, in which he served till 1861. He then went to the frontier, and continued to serve as a missionary until 1865. Since 1865 he has been a resident of New York City, and has been a prominent figure in the religious life of that city.

Richardson, William, D.D., an English clergyman, was born in 1698, at Wilshamstead, near Bedford, and educated at Westminster and Emmanuel colleges, Cambridge. He was appointed curate of St. Olave's, Southwark; and lecturer in 1727. He succeeded to the prebend of Welton-Rivoli, Lincoln, in 1724; was made master of Emmanuel College in 1736, and its vice-chancellor in 1738, and again in 1769; in 1746 he was appointed chaplain to the king. He died in 1775. He published four sermons on The Usefulness and Necessity of Persecution (London, 1730, 8vo) — a fifth on Redivivus Holines (1733).

Richelieu, Alphonse-Louis du Plessis de, called the cardinal of Lyons, elder brother of the great French marshal, was born at Paris in 1582. At the age of twenty-two he became bishop of Luçon, but about 1605 he resigned the see in favor of his brother Armand. In 1606 he entered the convent of Grande-Chartreuse, and for twenty years led a life of great austerity. He was prior of Bonpas when his brother obliged him to leave the cloister to occupy the archbishopric of Aix. In 1628 he was transferred to Lyons, and was made cardinal by Urban VIII, Aug. 21, 1629. Honors were heaped upon him, and he became, successively, grand almoner of France in 1632; dean of St. Martin's of Tours in the same year; abbot of St. Victor's, at Marseilles, and of St. Stephen's, at Caen, in 1640; of the Châlons-Dieu in 1642; and, on the death of his brother, was elected master of the Sorbonne. Meanwhile he was engaged in the work of his diocese, and, during the ravages of an epidemic in Lyons, was untiring in his efforts to aid the suffering. Louis XIII had several times engaged him in ecclesiastical affairs of state, but found Richelieu seldom left Lyons, and gave little attention to the court intrigues of the day. He died March 23, 1653. In the Imperial Library are to be found letters written by Richelieu to Louis XIII and the most illustrious persons of his court. See Abbé de Pure, Vie de Richelieu, Cardinal de Lyonne; Du Tens, Le Clergé de France, L iv; Aubéry, Dict. des Cardinalz.

Richelieu, Armand Jean du Plessis de, a noted French ecclesiastic and statesman, was born at Paris, Sept. 5, 1585, and was educated for the military profession at the college of Nanterre. But he renounced his father's profession in 1606, and renounced the bishopric of Luçon, Richelieu decided to take holy orders in order to succeed to that office. In 1607 he was consecrated bishop of Luçon, and for some time devoted himself zealously to the duties of his office. At the States-General, 1614, being appointed one of the representatives of the clergy, he secured the favor of the queen-mother, Marie de Médicis. He was in a private way, and in the presence of the young king, Louis XIII. He was appointed almoner to the queen-mother, and in Nov., 1616, entered the council as secretary of state. In 1617 Mary was banished to Blois, and he followed her thither, but was ordered to retire to Avignon. When the queen-mother was recalled to the court, she reinstated Richelieu in favor, and from that time he grew in power. Having strengthened his position by the marriage of his niece with the nephew of the duke de Luynes, he received the cardinal's hat in 1622, re-entered the state council, and soon after rose to the premiership. The administration of Richelieu was memora-

For several great measures, of which the first and most lasting was that by which the remains of feudalism were swept away and the absolute authority of the sovereign was established. In the pursuit of this object his most powerful adversary was Gaston, the duke of Orleans, brother of the king. But Richelieu triumphed over him and even the New Monarchy was obliged to bow before his unbending spirit and to withdraw into exile at Cologne. Another enterprise was the overthrow of the Huguenots as a political party and a rival of the throne of France. He conducted in person (1628) the siege of Rochelle, but is said to have secured for the Huguenot party a certain measure of toleration, and to have used his success against them with moderation. In 1631 Richelieu was raised to the dukedom and peerage. In the external relations of France the great object of Richelieu's measures was the abasement of Austria. With this view he did not hesitate to foment the internal disaffections of Germany, even allying himself against the Protestant powers of Gustavus Adolphus of Sweden, the great champion of Protestantism. He also took part with the disaffected Spanish provinces in the Netherlands, and favored the Catalonians and Portuguese when they shook off the Spanish yoke. At last Austria was humbled, Portugal was separated from Spain (1640), French influence predominated in Catalonia, England was secured, and France quiet and prosperous. His administration was again threatened by intrigues at court or treason in the camps. Richelieu, however, vindicated his power, and in 1642 came into Paris in triumph, carried on a litter, escorted by an army, and surrounded by the utmost pomp. Two months afterwards—Dec. 4, 1642 he died, and was buried at the Sorbonne, where
his mausoleum (the celebrated Girardon's masterpiece) may be seen. Busy with affairs of state, with war abroad, and dimension, plots, and treason at home, Richelieu nevertheless promoted arts and sciences, founded the Jardin du Roi (now Jardin des Plantes), also the French Academy and the royal printing-office, built the Palais Royal, and rebuilt the Sorbonne. He also found time to write several works and two plays—Mirame, a comedy, and La Grande Pastorale. He is regarded as the author of Mémoires du Cardinal de Richelieu (first published complete by Petitot [Paris, 1823]—Le Testament Politique (1724), 2 vols.) and of Le Journal de M. le Cardinal de Richelieu (Amst. 1643, 2 vols.). His theological works are, La Défense des Principaux Points de la Foi Catholique, etc. (1617)—L'Instruction du Chrétien (1619). See Aubery, Mémoires du Cardinal de Richelieu (1660); Jay, Histoire du Ministère de Richelieu; Capellé, Richelieu et Mazarin (1836); Martin, Histoire de France; Michelet, Histoire de France; Viollet, Histoire du Ministère de Richelieu (1649); Cailliet, L'Administration en France sous Richelieu (1681, 2 vols.); Robinson, Life of Cardinal Richelieu (1854); Sully, Mémoires; Retz, Mémoires.

Richer, Edmund, a noted defender of the liberties of the Gallican Church against papal absolutism, was born in 1587, in the parish of Fishburn, in a village near Quebec, Sept. 30, 1650. He became doctor in theology in 1690, and from that time devoted his energies to pulpit labors; but in 1594 he was made president of the College of Cardinal Lemoine, and soon afterwards censor of the University of Paris, in whose faculty he filled a theological chair. He undertook the reformation of the press in 1635, the publication of which was defeated by the papal nuncio Barberini (subsequently pope Urban VIII), and which called forth the violent condemnation of Gerson's works by Bellarmine. Richer's defence (Apologia pro J. Geromino [1607]) was not published until after his death (1674, 4to) but Gerson's writings appeared in 1607. Appointed syndic of the theological faculty in the following year, he opposed the public defence of the theses on the infallibility of the pope; and, in response to the request of Nicholas de Verdun, the first president, he wrote the book De Ecclesiastica et Politica Poestatione, in which he developed the idea—always held by the University of Paris—that the superiority of councils over the pope, and of the independence of secular governments in temporal things. This book brought on him the rage of the ultramontane party. He was dismissed from the university, his teachings were condemned by several provincial synods and the papal court, and he was proscribed. He was soon forgotton to the disorderly mob against him. He was even apprehended, but again liberated on the demand of the university. A protracted contest with his enemies ensued, in which he was finally conquered by cardinal Richelieu. He signed a retraction at the point of the dagger of assassins hired to take his life. His death took place Nov. 28, 1651. See Baillot, La Vie d'Edim, Richer (Amst. 1715, 12mo).

Riches (the rendering in the A. V. of several Heb. and Gr. words, especially ye'en, plou'c). The wealth of a pastoral people, such as the Hebrews in the patriarchal age, consisted chiefly in flocks and herbs. Hence we find it assigned as a cause of the separation of Esau and Jacob that "their riches were more than they might dwell together; and the land wherein they were strangers came not into competition because of their cattle" (Gen. xxxvi, 8). It was not until the reign of Solomon that the Jews possessed any abundance of the precious metals; and as the nation never became commercial, its rich men must in all ages have been great land-holders. Throughout the East the holders of land have ever been regarded as the very distinguishing vertex of the share of the profit from the actual cultivators of the soil, and this is the reason why we find "the rich" so often and so severely denounced in Scripture. Riches is frequently used in a metaphorical sense for intellectual endowments, and for the gifts and graces of God's Holy Spirit, which constitute the treasure to be "laid up in heaven, where neither moth nor rust doth corrupt, and where thieves do not break through and steal."

Richey, Daniel, a Methodist minister, was born in Newburyport, Mass., and moved with his parents to the neighborhood of Cayuga Lake, N. Y. His connection with the travelling ministry began in the Pittsburgh Conference, 1829, and continued up to the time of the Erie Annual Conference, July, 1845, when he was placed in a superannuated relation, which continued until his death, March 29, 1855. In point of zeal, integrity; and fidelity to the principles, he was few equals. See Minutes of Annual Conferences, 1855.

Richmond, Francis M., a Methodist preacher, was born in Herkimer County, N. Y., in 1808, and emigrated to Indiana in 1817. Although reared under Baptist influence, he united with the Methodist Episcopal Church at the age of twenty-five years. In 1836 he was admitted on trial into the travelling connection, and in 1837 was ordained as a preacher. The appointment of a temporary and impermanent board to regulate the pressure of domestic circumstances, he labored faithfully to the close of his life. His last appointment was to Greenfield Circuit, North Indiana Conference, but, after laboring a few months, was smitten down in the prime of life, in 1853. He was a sound theologian, and a powerful, practical, and experimental preacher. See Minutes of Annual Conferences, 1858, p. 295.

Richmond, Legh, an English clergyman, was born in Liverpool, Jan. 29, 1772. He graduated at Trinity College, Cambridge, in 1794, and was ordained in 1797. He became curate of Bradly and Yaverland, in the Isle of Wight, in 1798, and, in 1805, chaplain to the Lock Hospital, London. In the same year he was presented to the rectory of Turvey, Bedfordshire, which he held till his death in 1826. He was one of the authors of several tracts—The Dairyman's Daughter, The Negro Servant, The Young Cotager—published separately at first, but afterwards (1814) collected into two volumes 12mo, under the title of Annals of the Poor. Of The Dairyman's Daughter four millions of copies, in nineteen languages, had been circulated before 1849. He also edited The Parishes of the English Church (1807-12, 8 vols. 8vo), and published Domestic Portraiture:—Memoirs of his three children (9th ed. Lond. 1861, 8vo);—A Missionary Sermon (1809, 8vo), and a Memoir of Miss H. Sinclair.

Richmond, Paul C., a minister of the Methodist Episcopal Church, was born in Barnard, Vt., where he passed his early manhood. He received license to preach in March, 1833, and soon after was received on trial into the New England Conference. After filling several appointments in Vermont, he was in 1829 transferred to Maine Conference, where he did effective work until 1855, when falling health compelled him to take up a superannuated relation. He resided in Froyburn, and continued to labor for the strength of the church there, May 29, 1875. He was well versed in Scripture, apt in illustration, an able and successful minister. See Minutes of Annual Conferences, 1876, p. 87.

Richter, Aemilius Ludwig, a distinguished teacher of jurisprudence in Germany, who rendered especially meritorious services in the department of ecclesiastical law. Richter was born at Stolpen, near Dresden, on March 25, 1808, and entered Leipsic University in 1826. After graduating, he became a private lecturer, and once began to write in the field of ecclesiastical jurisprudence; and he added to these functions those of a teacher in the university, at first as a tutor, and subsequently, in 1855, as extraordinary professor. His labors were already attracting notice by that time, and obtained him a professorship of ecclesiastical law at Göttingen, to which the University of Greifswald, twenty years later, added that of divinity. In 1838,
Richter was made professor of ecclesiastical and civil law in the University of Marburg. Eighth years of quiet but productive labors were spent in that station, and he was then transferred to the High-school at Berlin, where he entered on a career which made him felt throughout Germany within the limits of his chosen field. His studies were given to the world in numerous essays, and the conclusions reached by him were brought to bear in the administration of the Department of Religion, under whose ministry he held various important posts; and his thorough learning, and fair yet conscientious spirit, gave him a commanding position with reference to Church laws and methods of administration. In the new settlement in royal Germany and in the church of the German lands. Few laws were passed relating to the churches, and few changes in their administration introduced, during the period of his connection with the government, in respect to which he did not exert a more or less determining influence. He died, after a long and severe illness, May 5, 1864.

The attitude of Richter towards the ecclesiastical issues of his time was largely determined by the principle, fundamental in his view, that the jus circa sacra belongs inseparably to the State as a moral power. He believed it wise that the State should allow freedom of action to the Church within its own appropriate field; but insisted on the regulation of mixed questions, for the restraining of ecclesiastical intrusions into the secular realm, for the repression of notoriously aggressive and thoroughly organized religious parties, e.g. the Order of the Jesuits; for the protection of the rights of one ecclesiastical organization as against the encroachments of others, etc., the right of sovereignty must be retained by the State. He was accordingly opposed to the course of the Raumer ministry, which simply ignored the necessity for restraining the unconstitutional demands of the Roman Catholic Church, in consequence of which the Jesuits flooded the western provinces of Prussia, and formed settlements without corporate titles as required by law, and even without coming under any kind of legal supervision. He was also opposed to the concordats concluded between several states and the pope, as being radically wrong. With regard to the evangelical churches of Germany, Richter condemned the territorial no less than the episcopal system, and favored that in which the sovereign power is endowed with authority, while the Church is constitutionally organized into congregations (notparishes), presbyteries, and synods. The merit of Richter as a writer on ecclesiastical law consists in his having based his works on a wide collection of previously unused material as well as to that to which reference was ordinarily made, and on a profound investigation of all the sources at command, and also in the absolute fairness of his spirit. These qualities appear as clearly in his works on Roman Catholic law as elsewhere. His earliest publication, the Corpus Juris Canonicum (1838-39), is the best edition of that book extant. Other early books are, Beiträge zur Kenntnis d. j. d. Brem., (Leips., 1834); — De Inedita, Decretal., Collect. Lipsiat. (Leips., 1838). In connection with his work he also published a large edition of the Canones et Decret. Conc. Tridentini. (Lips., 1835). An epochal book in its department was his Lehrbuch des kathol. und evangel. Kirchenrechts, etc. (Leips. 1842; 6th posthumous ed. 1865); and similar important attachments. In the Church-order of the 16th Century, etc. (Weimar, 1846, 2 vols.)

Richter, Christian Friedrich, a German hymnologist, was born at Sorau, in Silesia, Oct. 5, 1676. He studied medicine and theology at Halle, and after the completion of his studies was appointed by Franciscus superintendent of the new preacher at Berlin. After the death of his brother, he was also appointed medical attendant of the Orphan-house there. In conjunction with his brother, Dr. Christian Sigismund Richter, he discovered the celebrated Halle medicine, prepared from gold, and called essentia dulcis, and which gave a great name to the Orphan-house at Halle. The profits of this medicine he devoted to the benefit of the institution. From his twenty-ninth year he composed hymns, and thirty-three excellent and deeply spiritual Christian hymns are attributed to him. Knapp, in his Liederchets, gives fourteen of his hymns, some of which have also been translated into modern German, M. Mercke, in Regierungen, Dr. Bomberger, in Scbaffs Kirchenfreund, ii, 337 ("Jesus my king! thy mild and kind control") ; Hütter wird die Nacht der Sünden, in Sacred Lyrics, p. 32 ("O watchman, will the night of sin?"); Hier legt mein Sinn vor dir sich nieder, in the Moravian Hymn-book, No. 437; Seid jetzt, 169; Dein liebes heimat, in the Moravian Hymn-book, p. 190 ("O God, whose attributes shine forth in tum"). Richter was also the author of a remarkable medical treatise on the Crucifixion of Christ. He died October 5, 1711. See Koch, Geschichte des Kirchenledes, iv, 296, 355 sq. viii, 240 sq., 287, 434, 515; Miller, Singers and Songs of the Church, p. 141 sq. Jücher, Gethseman-Lexikon, s. v.; Richter's Leben und Werken als Arzt, Theol. und Dichter (published by the Haupt-Verein für christl. Erbauungsschriften in den preussischen Stäten, Berlin, 1865). (B. F.)

Richter, Henry, an English painter, of German extraction, was born in 1772. He resided mostly in London, where he died in 1857. His most important historical work is Christ restoring Sight to the Blind, now in a church at Greenwich, England.

Richter, Johann Heinrich, inspector in the missionary institute at Barmen, Germany, under whose administration the missions of the Rhenish Missionary Society were established, was born at Bellenen Dec. 11, 1799, and entered on the duties of the station in which he spent his life May 28, 1837. The Barmen Missionary Society did not as yet send out missionaries, nor even own a house, but a number of young men were trained under its direction for work among the heathen. Richter subsequently, aided by his brother William, became their instructor, and after about eighteen months was able to report the readiness of four of his pupils to begin their expected labors. The poverty of the Barmen association now induced them to invite other local societies to aid in forwarding the candidates to their foreign fields, and as a result the Rhenish Missionary Society was organized. Its first mission was among the slaves of the Boers in South Africa, which, in course of time, extended over five stations. Another was begun on the island of Borneo in 1834, but failed to achieve successful results while Richter lived; and a third, among the Indians of North America, was likewise unsuccessful; but the latter gave rise to a flourishing mission among the evangelical Germans of America. Richter's ardent soul was continually employed in devising new means for the extension of Christlikeness. He was incessantly busy with his pen, issuing reports, proceedings, through the Rev. Mr. Moritz, the Monatliche Gesellschaft, etc., and with public appeals in sermons and addresses in every section of the land. The institution of a society to preach the Gospel to the Jews was his work, and also the establishing of a German mission in China, which came to a close with the death of his brother. Richter was twice married, and became the father of a large family. A brief sickness ended his life April 5, 1847. As an author, Richter gave to the world a number of works: e.g. Erklarte Hausibel, a commentary on the entire Bible (6 vols.), decided orthodoxy according to the Lutheran standard, and everywhere complete to the end of the 18th century; Evangel. u. römische Kirchenlehre (1844), a polemical work:—a Life of Gutzlof, the Chinese missionary, and others. In personal intercourse he was vivacious, stimulating, witty, and yet dignified. A man
of scientific culture, he was an accomplished botanist, mineralogist, etc.; but his writings are characterized by freshness of statement rather than by depth of thought.

Richthofer, CHARLES, Baron von, canon of Breslau, was born of evangelical parents Jan. 31, 1822, in Hartwigsdal, Silesia. In 1838 his father quietly joined the Roman Catholic Church, while his mother remained in the Jewish faith, and the belief, law, had not the desire to follow the father. From 1845 to 1852 he attended the Matthias Gymnasium at Breslau, and decided to prepare himself for the office of woods and forests. He entered the academy at Neustadt-Eberswalde, and finished his course there, but was not satisfied with the step he had taken. He decided to study theology, attended the theological college at the Breslau University, and in 1860 received holy orders. In 1869 he was stationed at Hohenfriedberg, but would not accept the decisions of the Vatican Council. The government had appointed him canon of Breslau, but bishop Förster, of that city, pressed by the chapter, wished to have the canon sign a paper, according to which he accepted the Vatican decrees. Richthofer refused to sell his conscience to Rome, and the bishop excommunicated him in 1873. He then joined the Old-Catholic party, and acted as priest till 1875. But finding no satisfaction or peace of conscience and mind even in this party, he joined the Lutheran Church at Leipzig, being received by Dr. Abel feld, April 11, 1875. He died March 7, 1876, in the house of his brother at Berlin. Dr. Besser delivered the funeral oration. See Schneider, Theol. Jahresbuch, 1877, p. 227 sq.; Carl Freiherr von Richthofer, früher Domherr in Breslau, ein Lebensbild aus den kirchlichen Kämpfen der Gegenwart (Leipzig, 1877); Schirrer, Theologische Literaturzeitung, 1877, p. 916 sq. (B. F.)

Riccius, Paul. See RICCI.

Ricardes, SAMUEL, an English clergyman, was born in 1736; entered Orriel College, Oxford, in 1764; obtained the Newdigate prize for English verse in 1815, and graduated in second-class honors in 1817. He was fellow of Orriel College in 1819 to 1823, and vicar of Stow, Langtoft, Suffolck, from 1832 until his death, in 1865. He was the author of the Christian Householder, or Book of Family Prayers (1843, 12mo) and Short Sermonary (1846, 12mo); and numerous other Prayer-books:—also Religious Tracts, etc. See Allibone, Dict. of Brit. and Amer. Authors, s. v.

Riciman, THOMAS, a distinguished English architect, was born at Maidenhead in 1776. Although unsettled in early life, he seems always to have had a love for architecture, and to have studied it carefully. In 1808 he began to give his full attention to it, and wrote the Classification of Gothic Styles, which has rendered him famous. He afterwards resided in Birmingham, and acquired great celebrity by his Gothic churches and other structures. He died in March, 1841. He is well known as an author by his Gothic Architecture, an Attempt to Discriminate the Styles of Architecture in England, etc. (London, 1817, 8vo). There is a later and better edition of this work (Oxford, 1842). See Allibone, Dict. of Brit. and Amer. Authors, s. v.

Riculpus (Fr. Riculp), bishop of Soissons, died about 902. He entered upon this see between 883 and 892, and assisted in the council of Verberie in 892 and of Rheims in 893. In 900, in the latter city, he consecrated archbishop Hervé, and excommunicated the murderers of archbishop Foulques. He made himself especially conspicuous in connexion with the church in 889. This had for its object the correction of the ignorance of the clergy, and has been reprinted several times since 1615. It may be found in the supplement to the Conciles des Gaules of Pierre de la Lande, and in vol. ix. of the Conciles of Labbé. See Gallia Christiana; Hist. Litter. de la France; Hoefer, Nouv. Biog., Générales, s. v.

RIDDLE

See ISAIAH IN TRANSL.

Ridda, in Arabic mythology, is coincidence with the divine will; one of the five principal virtues which swim about on the sea of passions and tribulations.

Riddle (יעד, iudah; lit. complication, Judg. xiv; Ezek. xvii, 2; Sept. αἰνήμα, πρόβλημα; Vulg. problema, propositio; A. V. elsewhere "dark saying," "dark speech," "dark sentence," "hard question;" once [Hab. ii, 6] "proverb"). The Hebrew word is derived from a root cognate to an Arabic one meaning "to bend off;" "to twist," and is used for artifice (Dan. viii, 23), a proverb (Prov. i, 6), a song (Ps. xlix, 4; lxviii, 2), an oracle (Num. xii, 8), a parable (Ezeh. xxiv, 2), and in general any wise or intricate sentence (Ps. xxiv, 4; Hab. ii, 6, etc.), as well as a riddle in our sense of the word (Judg. xiv, 12-19). In these senses we may compare the phrases προφανή λόγου, προφανεία πάραθεοίδου (Wis. viii, 8; Ecclus. xxxix, 2), and προφανεία λόγων (Eurip. Phem. 497), and the Latin scripsi, which appears to have been similarly used (Anul. Gell. Noct. Att. xii, 6). Augustine defines an enigma to be any "obscure allegoria" (De Trin. xv, 9), and points out, as an instance, the passage about the daughter of the horse-leech in Prov. vii, 15, which has been explained by Bellermann in a monograph on the subject (Enigmata Herbarum [Erf. 1798]). Many passages, although not definitely propounded as riddles, may be regarded as such—e. g. Prov. xxvi, 10, a verse in the rendering of which every version differs from all others. The riddles which the queen of Sheba came to ask of Solomon (1 Kings x, 1; 2 Chron. ix, 1) were rather "hard questions" referring to profound inquiries. Solomon is said, however, to have been very fond of the riddle proper, for Josephus (Ant. viii, 5, 3) quotes two profe- sionaries (Menander of Ephesus, and Dius) to authenticate a story that Solomon proposed numerous riddles to Hiram, for the non-solution of which Hiram was obliged to pay a large fine, until he summoned to his assistance a Tyrian named Abdon, who not only solved the riddles, but propounded others which Solomon was himself unable to answer, and consequently in his turn incurred the penalty. The word αἰνήμα occurs only once in the New Testament, in the following passage (1 Cor. xiii, 12, "darkly," τυ αἰνήματι; comp. Num. xii, 8; Wettstein, N. T. ii, 158) but, in the wider meaning of the word, many instances of it occur in our Lord's discourses. Thus Erasimus applies the term to Matt. xii, 43-45. In the Apocalypse we find (Rev. xlvii, 15) παραθεοίδους αἰνήματος. The etymology is not indicated means, and is well explained by Augustine:— "Manifesta passimur, obscuris exercemur" (De Doct. Christ. ii, 6). The word αἰνήμα, taken in the extensive meaning of its root, αἰνός, certainly applies to an immense portion of the sacred writings—viz. as a narrative or tale, having an application to present circumstances: Odys. (xiv, 908), a faible, bearing moral instruction; Hesiod, Opera. (p. 292), which nearly approaches to the nature of a parable [see PARABLE]; 1 a pointed sentence, saying, or proverb (Theocritus, xiv, 13). See PROPHECY; PROVERBS. According to Lennep, the word αἰνήμα, taken substantively, means "amazing obscure." We know that all ancient nations, especially Oriental, have been fond of riddles (Rosenmuller, Morgental, iii, 68). We find traces of the custom among the Arabs (Koran, xxv, 35), and, indeed, several Arabic books of riddles exist—as Ketab el-Algas in 1469, and a book of riddles solved, called Aki el-Thenin. But these are not genuine riddles, rather than riddles of the ancient kind, although they are very ingenious. The Persians call them Algas and Mawnama (D'Herbelot, s. v. "Algas"). They were also known to the ancient Egyptians (Ja- blonski, Pantheon. Egypt. p. 48). They were especially used in banquetts both by Greeks and Romans (Muller, Dor. ii, 392; Athen. x, 457; Pollux, vi, 167; Gell. xviii, 2), and the kind of witicisms adopted may be seen in
the literary dinners described by Plato, Xenophon, Athenaeus, Plutarch, and Macrobius (see Zorn, *De Enigmatisibus Nocturnalis* [Lips. 1724]). Some have groundlessly supposed that the proverbs of Solomon, Lenuel, and Agur were propounded at feasts, like the parables spoken by our Lord on similar occasions (Luke xiv, 4, etc.).

Riddles were generally proposed in verse, like the celebrated riddle of Samson, which, however, was properly (as Voss points out, *Innt. Oratit. iv, 11*) no riddle at all, because the Philistines did not possess the only clue on which the solution could depend. For this reason Samson had carefully concealed the fact, even from his parents (Judg. xiv, 14, etc.). Other ancient riddles in verse are that of the Sphinx, and that which is said to have caused the death of Homer by his mortification at being unable to solve it (Plutarch, *Vit. Hom.*).

The pleasure of the propounder is derived from perplexing his hearers, and theirs from overcoming the difficulty, which is usually renewed by their proposing another enigma. This kind of amusement seems to have been resorted to, especially at entertainments, in all ages among different nations, and has even been treated as an art and reduced to rules. The chief writers on this curious branch of literature are Plutarch, *Ninus et Nimrod*, and F. Menestrier. The principal rules laid down for the construction of an enigma are the following: that it must be obscure, and the more obscure the better, provided that the description of the thing, however covered and abstract, and in whatever remote or uncommon terms, be really correct; and it is essential that the thing thus described be well known. Sometimes, and especially in a witty enigma, the amusement consists in describing a thing by a set of truisms, which tell their own meaning, but which confound the hearer through his expectation of some deep and difficult meaning.

Franc. Junian distinguishes between the greater enigmas, where the enigma is very obscure or ambiguous throughout the passage (as in Ezek. xxvii, 2, and in such poems as the *Syrinx* attributed to Theocritus), and the lesser enigma or *inveniagrama*, where the difficulty is concentrated in the peculiar use of some one word. As specimen of the enigmatical style of the former kind in the Old Test., Winer points out Prov. xxx. 12-19; Is. xxi. 12. The speech of Lemec to his wife Adah and Zillah (Gen. iv, 23, 24) is possibly an enigmatic mode of communicating some painful intelligence. In the New Test. we may adduce our Lord's discourse with Nicodemus (John iii, 5), and with the Jews (vi, 51, etc.), where the enigmatical style is adopted for the purpose of impressing the attention of the hearers (Stuck, *Antiq. Conv. iii, 17*). It may be useful to refer to one or two instances of the latter kind, since they are very frequently to be found in the Bible, and especially in the prophets. Such is the play on the word נִנְיָה ("a portion," and "Shechem," the town of Ephraim), in Gen. xlvii, 22; on רֵצִים (mattath, "a fortified city") and לֹאָב (Misraim, Egypt), in Mic. vii, 12; on רָעָב (Shaked, "an almond-tree") and רָעָב (shakad, "to hasten"); in Jer. i, 11; on רַחֲמָה (Dannah, meaning "Edom" and "the land of death"); in Isa. xxxi, 11; on מַחֲצִים, (Shekhah, "meaning Babylon," and perhaps "arrogance"), in Jer. xxv. 26; li, 41. The description of the Messiah under the name of the "Branch" (יְדֵי, neser), when considered in regard to the occasion and context, may be taken as a specimen of the lesser enigma (see *Luther* upon the passage). See *Nazarite*.

If only remains to notice the single instance of a riddle occurring in the New Test.—viz. the number of the beast. This belongs to a class of riddles very common among Egyptian mysteries, the Gnostics, some of the fathers, and the Jewish Cabalists. The latter called it גמרא (i.e. γεωμετρια), of which instances may be found in Carpoov (App. Crit. p. 542), Roland (Ant. Hebr. i, 25), and some of the commentators on Rev. xiii, 18:

Thus בָּשָׂם (nachash), "serpent," is made by the Jews one of the names of the Messiah, because its numerical value is equivalent to כָּשָׂם; and the names Shushan and Esther are connected together because of the numerical value of the letters composing them is 661. Thus the Marcionists regarded the number 24 as sacred from its being the sum of numerical values in the names of two quaternions of their deities, and the Gnostics used the name Ἀραβάδας as an amulet because its letters amount numerically to 855. Such little fancies are not infrequent in some of the fathers. Instances occur in the mystic explanation by Clem. Alexanderinus of the number 318 in Gen. xiv, 14, and by Tertullian of the number 900 (represented by the letter Τ or a cross) in Judg. vii, 6, and similar instances are supplied by the Testimonia of the Pseudo-Cyprian. The most exact analogies, however, are to be found in the so-called Sibylline verses. We quote one which is exactly similar to it, the answer being found in the name Ἰσραήλ = 888, thus: 1 = 10 + η = 8 + α = 200 + α = 70 + γ = 400 + α = 200 = 888. It is as follows, and is extremely curious:

With examples like this before us, it would be absurd to doubt that John (not greatly removed from time the Christian sages of the Sibylline verses) intended some name as an answer to the number 666. The true answer must be settled by the Apocalypse commentators. Most of the fathers supposed, even as far back as Irenaeus, the name Αραβάδας to be indicated. A list of the other very numerous solutions, proposed in different ages, may be found in Elliot's *hora Apocalipticae* (ii, 222-284), from which we have quoted several of these instances. See *Number of the Beast*.

Riddle, John, D.D., a minister of the Associate Reformed Church, was born in Monaghan County, Ireland, in 1768. He graduated at the University of Glasgow April 10, 1782, and entered upon the study of theology, under the supervision of John Brown, of Haddington. He was licensed to preach June 14, 1788, and was installed pastor of the congregation in Donaghlo-ney, County of Down, in Nov. 18. In this church he remained till the spring of 1794, when he came to the United States. In August of the same year he was installed at Robinson Run as pastor of the united congregations of Robinson Run and Union, in the vicinity of Pittsburgh. After a few years the congregations so increased that he could not perform his duties, and settled for the whole of his time at Robinson Run. Here he continued to labor the remainder of his life, and died, after a month's illness, Sept. 4, 1829. Dr. Riddle took an active part in the management of the affairs of the Associate Reformed Church, which was in its infancy when he became a member of it. He was among those who proposed the proceedings of the General Assembly Reformed Synod, and who finally, in 1820, resolved to constitute themselves into an independent synod, to be known as the Associate Reformed Synod of the West. He was a close student, argumentative in his preaching, and an excellent pastor. None of the productions of his pen were ever printed, though he left behind a large MS. on the subject of Religious Covenanting, which, had he lived a little longer, it is thought he would have published. See Sprague, *Annals of the Amer. Pulpit*, ix, 57.

Riddle, Joseph Esmond, an English clergyman, of St. Edmund's Hall, Oxford, curate of Harrow, and subsequently incumbent of St. Philip's, Leekhampton, was born about 1801, and died Aug. 27, 1880. He was the author of many works, both theological and educ-
RIDDOCH
James, a minister of the Episcopal Church, Scotland, during the last century, was born at Grange, Banffshire. He was first minister of a chapel at Glasgow, and afterwards became one of the ministers of Aberdeen, in 1757, in which charge he continued twenty years. His sermons are distinguished for pathos, persuasion, eloquence, and piety. He published Sermons on Several Subjects, etc. (Lond. 1799, 3 vols. 8vo; a fifth edition was published in 1831, 2 vols. 8vo).

Rideout, Uriel, a minister of the Methodist Episcopal Church, was born in Bowdoin, Me., July 28, 1816. He joined the Palestine Conference in 1846, and labored until 1849, when he located for the purpose of attending the Concord Biblical Institute. He resumed his place in conference in 1850, and continued in active service until the session of 1868, when he received a supernumerary relation. After an illness of ten days, he died at Cape Elizabeth Ferry Aug. 9, 1868. His labors were characterized by ability and ministerial fidelity. See Minutes of Annual Conferences, 1869, p. 141.

Rider (רִדֵּר, roḵê). It is uncertain at what time, or in what place, horses were first used for riding, but there is every reason to believe that it was not until a period long after their having been employed for draught. Instead of cavalry, the Egyptians and Babylonians, and the Greeks of the Homeric age, used war-chariots, the drivers of which are in the earlier books of the Old Testament called "riders," as in Miriam's song of triumph for the overthrow of the Egyptian host (Exod. xvi). The book of Job, however, clearly intimates a "rider," in our acceptation of the word, in the description of the chase of the ostrich: "She scorneth the horse and his rider" (Job xxxix, 19). White asses were used as steeds by the nobles in the land under the Judges, and instead of these we find that mules were used in the age of the Kings, horses being almost exclusively reserved for chariots. The Persians appear to have been the first Oriental nation that discovered the superiority of a flexible body of cavalry over a cumbersome and unwieldy corps of chariots. Many of their early victories may fairly be ascribed to their skill in horsemanship. On the other hand, the Jewish armies were always deficient in cavalry, and their alliances with foreign states were generally designed to obtain a supply of auxiliary horse. It is not one of the least proofs of Solomon's political wisdom that he exerted himself to supply this national deficiency. See Horse.

Rider, John, an Irish prelate, was born at Carrington, in Cheshire, about 1562, and entered Jesus College, Oxford, in 1576, where he took his degree of A.M., and continued in the university for some years, teaching grammar chiefly. He was preferred to the living of Waterstock, Oxonshire, in 1580, but resigned it in 1581. In 1583 he was admitted to that of South Wokton, in Northamptonshire, and in 1586 to that of St. Mary Magdalen, Bermondsey, and of Winwick, in Lancashire. He was afterwards archdeacon of Meath, in Ireland, dean of St. Patrick's, Dublin, and in 1612 bishop of Killaloa. He died in 1632, and was buried in his cathedral. He was much respected for his piety and learning. His principal work is A Dictionary, English - Latin and Latin - English (Oxf. 1589, 4to). It was the first Latin dictionary in which the English part was placed before the Latin part. In addition are given, A Letter Concerning the News out of Ireland (Lond. 1601, 4to)—Cæteris Irish Catholics (Dublin, 1602, 4to)—Claim of Antiquity in behalf of the Protestant Religion (Lond. 1606, 4to). See Chalmers, Biog. Dict.; Allibone, Dict. of Brit. and Amer. Authors, s. v.

Ridgeway, the upper angle of a roof. It has usually, though by no means always, a piece of timber running along it, called the ridge-piece, upon which the upper ends of the rafters rest; the tiles with which it is covered are called ridge-tiles. These are sometimes made ornamental, good instances of which are found at Great Malvern and Lincoln. — Parker, Gloirey of a architecture, s. v. See Rim.

Ridgley, Thomas, D.D., an eminent English Independent minister, was born in London about 1667, and educated at an academy in Wiltshire. Entering the ministry, he was chosen by a covenant with Mr. Thomas Gough, near the Three Cranes, London, and about four years afterwards became his successor. In 1712 he, with Mr. John Eames, began to conduct an independent academy in London as a divinity tutor. He died March 27, 1734. His principal work is, A Body of Divinity, an exposition of the Assembly's Larger Catechism (1731-33, 2 vols. fol.; new edition, with notes by John Wilson, Edinb. 1844, 2 vols. 8vo; Lond. 1845, 2 vols. 8vo; N. Y. 1855, 2 vols. 8vo). He also published Sermons, etc. (Lond. 1701-25). See Chalmers, Biog. Dict.; Allibone, Dict. of Brit. and Amer. Authors, s. v.

Riding Committees were committees of the General Assembly sent to superintend a presbytery which had refused to ordain a person under a reclaiming parson. The first instance occurred in 1717, when a presbytery refused to ordain Mr. John Hay in the parish of Peebles, and the General Assembly passed an act appointing certain brethren to correspond with the Presbytery of Peebles, and to act and vote in their meetings at their next ensuing diet, and thereafter, until the settlement of Mr. John Hay in the parish of Peebles be completed, and to concur with him in his ordination." By this device both the opposition of the people and the conscientious reluctance of the presbytery were surmounted. The last instance of a settlement effected by means of a riding committee was that of Mr. Watson in the Presbytery of Linlithgow, May 30, 1751.

Ridley, Gloucester, D.D., a learned English divine, was born at sea, on board the Gloucester, an East Indianman, 1702. He received his education at Winchestr and New College, receiving the degree of B.C.L. April 29, 1729. For a great part of his life he had no other preferment than the small college living of Weston, in Norfolk, and the donative of Poplar, in Middlesex, where he resided. To these his college added, some years after, a small benefice. In 1761 he was presented by archbishop Seeker to a golden prebend at Salisbury. He published, Eight Sermons on the Holy Ghost (1740-41; Lond. 1742, 8vo; new ed. Oxf. 1802, 8vo); — De Synodum Novi Federis Verismum Indole atque Unl Dissertatione, etc. (Lond. 1712, 2 vols. fol.; new ed. with notes by John M. Sides Letters, etc. See Chalmers, Biog. Dict.; Hook, Eccles. Biog.; Allibone, Dict. of Brit. and Amer. Authors, s. v.
Ridley, Nicholas, an eminent English prelate and martyr, was descended from an ancient family in Northumberland, and was born in the year 1500, in Tyndale, at a place called Wilmontavick. He was educated in a grammar school at Newcastle-upon-Tyne, and entered Pembroke Hall, Cambridge, about 1518. Here he was taught Greek by Richard Crook, who about that time began to teach it in Cambridge. His religious sentiments were those of the Romish Church, in which he had been brought up. In 1522 he took the degree of A.B., in 1524 was chosen fellow of his college, and in 1525 received the degree of A.M. Directing his attention to the study of divinity, his uncle, Dr. Robert Ridley, who had thus far paid for his education, sent him for further improvement to the Sorbonne at Paris, and thence to Louvain. In 1530 he was chosen junior treasurer of his college, and at this time paid great attention to the study of the Scriptures. For this purpose he used to walk in the orchard at Pembroke Hall, and there committed to memory almost all the epistles in Greek. The walk is still called Ridley's Walk. In 1533 he was chosen senior proctor of the university, and while in that office the question of the pope's supremacy came before the university to be examined on the authority of Scripture. The decision was that "the bishop of Rome had no more authority and jurisdiction derived from God, in this kingdom of England, than any other foreign bishop," and was signed by the vice-chancellor, and by Nicholas Ridley and Richard Wilkes, proctors.

In 1534 he took the degree of B.D., and was chosen chaplain of the university and public reader. In 1537, Cranmer, archbishop of Canterbury, appointed him one of his chaplains, and as a further mark of his esteem collated him, April, 1538, to the vicarage of Herne, in Kent. In 1539, when the act of the Six Articles was passed, Mr. Ridley bore his testimony against it in the pulpit, although he was in no danger from its penalties; still believing in transubstantiation, unmarried, and leaning to the practice of auricular confession, although not insisting upon it as necessary to salvation. In 1540 he went to Cambridge and took the degree of D.D., and about the same time was elected master of Pembroke Hall, having been also, through Cranmer's influence, appointed chaplain to the king, and appointed a prebend in the cathedral of Canterbury. At Canterbury he preached with so much zeal against the abuses of popery that the other prebendaries and preachers of the old learning brought articles against him at the archbishop's visit in 1541, but the attempt failed. Gardiner, bishop of Winchester, next caused articles to be exhibited against him before the justices of the peace in Kent, and afterwards before the king and council, charging him with preaching against auricular confession and with directing the Te Deum to be sung in English. The accusation was referred to Cranmer, and immediately crushed by him. The greater part of 1545 was spent by Dr. Ridley in retirement, and he employed himself in carefully examining the truth and evidence of the doctrine of transubstantiation, of which he had been an unsuspecting believer. He consulted the Apology of the Zwinglians and the writings of Bertram (q.v.), and concluded that the doctrine had no foundation, and found that Cranmer and Latimer both joined him in the same opinion. At the close of the year Cranmer gave him the eighth stall in St. Peter's, Westminster. When Edward VI ascended the throne, in 1547, Dr. Ridley, being appointed to preach before the king on Ash-Wednesday, took that opportunity to discourse concerning the abuses of images in churches, and ceremonies, particularly of the use of holy water to driving away devils. About this time the fellows of Pembroke Hall presented Dr. Ridley to the living of Soham, in the diocese of Norwich; but the presentation being disputed by the bishop, he was admitted to the living by command of the king. On Sept. 25 he was consecrated bishop of Rochester, and in 1548 was employed with Cranmer and others in reforming and compiling the Book of Common Prayer. On the suspension of bishop Bonner, bishop Ridley was transferred to London, and was installed April, 1550. In 1551 the sweating-sickness prevailed in London, and although it was fatal to hundreds, yet bishop Ridley remained faithfully at his post. In June, 1550, the bishop directed that the Romish altars should be taken down, and tables substituted, in order to take away the belief of the people that an altar was necessary to the celebration of the sacrament. He was soon after engaged with Cranmer in drawing up the Forty-two Articles. In 1552 he visited his old college at Cambridge, and on his return called at Hansdon, to pay his respects to the princess Mary. The arrogance, insolence, and bitterness of her nature she displayed on this occasion in the insults she Martyre' Monument at Oxford.
offered Ridley. In 1553 the bishop preached before Edward VI, and so aroused the benevolence of the king that the latter sent to him to inquire how he might best put into practice the duties he had so strongly enforced. The result was the founding of the endowed of Christ's, Bartholomew's, Bridewell, and St. Thomas's hospitals. Upon the death of Edward VI, Ridley strove to put lady Jane Grey upon the throne; but failing, he went to Mary, as was expected of the bishop of London, and did her homage. By her command he was sent back from Framingham on a lame horse and committed to the Tower, July 26, 1553, to be proceeded against for heresy. It has been thought that bishop Ridley might have recovered the queen's favor by countenancing her proceedings in religion. But he was too honest to act against his convictions, and, after eight months' imprisonment in the Tower, was taken to Oxford, where he was, Oct. 1, 1556, condemned to death for heresy. The evening before his execution he supped with some of his friends, showing great cheerfulness; and refused the offer of one of them to sit up with him, saying, "I mean to go to bed, and, by God's will, to sleep as quietly as ever I did in my life." The next morning, when the archepiscopal horse went, he walked to the place of execution between the mayor and one of the aldermen of Oxford. Seeing Latimer approach, he ran to meet him, and, embracing him, exclaimed, "Be of good heart, brother, for God will either assuage the fury of the flames, or else give us grace to endure them." Going to the stake, they both kissed it and prayed earnestly. Refused permission to speak unless he recanted, he said, "Well, so long as the breath is in my body, I will never deny my Lord Christ and his known truth. God's will be done in me." Fire was then applied, and after suffering intensely for a long time Ridley expired. Bishop Ridley, in his private life, was a pattern of piety, humility, temperance, and regularity. The following works are ascribed to him by Anthony Wood: *Treatise concerning Images:—Brief Declaration of the Lord's Supper* (1555, 1556, 8vo)—*A Friendly Farewell,* written during his imprisonment at Oxford (1555, 8vo)—*An Account of the Imputations held at Oxford* (1688, 4to)—*A Treatise of the Blessed Sacrament.* Additions are made by other authorities. Many of his letters are in Fox's *Acts and Monuments,* and in Dr. Gaster's *Life of Bishop Ridley.*

Ridolphus (Ital. Ridolfi), Claudio, a painter of the Venetian school, was born at Verona in 1754. He was descended from a noble family, and in his youth made great progress in his art. He worked in Verona, Urbino, and other cities of Italy. He died in 1644. The works of Ridolphus show a purity of design and simplicity of composition which are seldom found in the works of the Venetian school. Among his best are, *Presentation of the Virgin at the Temple:* The Assumption:—*The Virgin,* and several Saints. See Bumasanti, *Guida di Verona.*

Riegger, Joseph Anton Stephan von, an eminent teacher of jurisprudence, who was also author, imperial councillor, censor of books, etc., and whose principal field of labor was the University of Freiburg, was born at Innsbruck, Feb. 18, 1742. He wrote his first work—a review of the works of Plautus and Terence—when scarcely fifteen years of age, became master in philosophy in 1761, and in 1764 entered on his first position as a teacher in the Theresium. During his preliminary study, he had published a *Rheinische Juris Canonicum* (1761)—an edition of August. Archipep. Taroncon, De Emend. Gratianis Dialogi, and a new edition of the canonist Cironius, and had also written verses in German and Latin. In 1765 he was called to a professorship at Freiburg, and for the first time delivered lectures on jurisprudence in the German tongue. His preliminary study was so rapid that he was able to pass so as to become acquainted with his friends of this kind, and his reputation secured him for the charge of repeated government commissions of importance and delicacy; but the payment of debts incurred by his father and by an insolvent brother so impaired his fortune that a removal from Freiburg became desirable. He became professor of civil law at Prague, in which unpublished MSS. were largely introduced, would have been his crowning labor, but an instalment issued under the title *Bernardi Brevarium Extravagantium* (1778) failed to secure the sympathy of the public and caused him to renounce the undertaking. His numerous writings in the departments of belles-lettres, jurisprudence, and canon-law are given in Menzel, *Lexikon d. v. Jahre 1750—1800 verstor. deutsch. Schriftsteller* (Leips., 1811), xi; and in Weidlich, *Biogr. Nachrichten,* etc. (Halle, 1751), part ii. See Grünwald, *Biographie d. bld. Ritter von Riegger* (Prague, 1799); Schlichtegroll, *Neurolag auf d. Jahr 1780, 1st* heft.

Rieger, Paul Joseph von, father of J. A. S. Riegger (q.v.), and professor of canon-law in the University of Vienna from 1758 to 1775, was born at Freiburg, June 29, 1705, and received his education in his native town. At the age of sixteen years he obtained the degree of master in philosophy, and at the age of twenty-eight he became doctor of both civil and ecclesiastical law. Soon afterwards he was called to the chair of jurisprudence and German history at Innsbruck, where he subsequently attained to the highest honors, being twice elected rector and eight times dean of the university, frequently acting as its chosen agent in transactions with the imperial court, and also serving as counsel to the courts of Lower Austria. The empress Maria Theresa placed him over the Imperial Theological School and the Academy of Savoyard Knights as teacher of public and canonical law in 1749, and in 1758 he became professor of ecclesiastical law in the University of Vienna, though retaining the positions he already held. His *Institutiones Jurisprudentiae Ecclesiasticae* (4 vols.) were generally introduced into the schools of Austria. His next preferment was to the posts of imperial councillor and censor of books, and in 1764 to the knighthood and to the Bohemian branch of the government. Many laws relating to the establishing and execution of spiritual functions owe their origin to him, as does the abolition of trials for minor offenses, and which is a matter of the ecclesiastical system of Austria as subsequently taught in all its schools. The liberal influence exercised by him crowded the ultramontane theories out of use, and caused him to be regarded at Rome as an important promoter of reforms in the Church. It is said that he was threatened with excommunication in consequence, and that his works were placed in the *Index.* He died Dec. 8, 1775. A list of his works is given in Menzel and Weidlich, *See Biographie d. bld. Ritter von Riegger* (Prague, 1798).

27

thuastic supporter—while at Avignon, and he there received the appointment of papal notary. After his return to Rome he devoted himself to the work of inflaming the passions of the people through the means of popular and patriotic addresses, and with such success that he was proclaimed emperor of German and crowned with dictatorial powers in May, 1457. The pope at first confirmed Rienzi's elevation in the hope of securing the people and humbling the nobility, and the tribune's good fortune, power, and just administration recommended him even to princes, e.g. the emperor Lewis and the king of Hungary, who sought his friendship; but he had attained all that he desired. He knighted himself; declared Rome the sovereign of the world; commanded the pope and cardinals to return to Rome; cited the emperor and the king of Bohemia before him in order to restore peace between them; ordered the electors to furnish evidence of their right to elect the emperor, etc. Warnings and outbreaks of discontented factions failed to restrain him, and pope Clement interfered with what was rapidly becoming a reign of terror by issuing (Dec. 3, 1457) a bull against the tribune. The people immediately forsook Rienzi, and he was compelled to flee in disguise from Rome in January, 1458. He subsequently returned secretly to Rome, where he was received by the pope; he was challenged by the emperor Charles IV, who delivered him to the pope at Avignon in 1351. Innocent IV soon afterwards became pope, and Rienzi succeeded in disproving the charges raised against him of heresy and tyranny, and even in securing the pope's favor and confidence. In the meantime the conflict of factions and breakouts again with fresh fury at Rome, and a papal notary named Baronecelli (or Baracelli) had assumed the role of tribune. It was seen at Avignon that Rienzi might defeat the projects of that agitator, and he was accordingly attached to the suite of the cardinal Egidius Albornoz, to whom was intrusted the pacification of Italy. The vacillating populace received him with enthusiasm; but no sooner was he in the possession of power than he began once more to abuse it. He disregarded the hatred of the house of Colonna, imposed unwise taxes, and left his body-guard unpaid; and when it became apparent that his firmness had departed and that his administration was undecided and fluctuating, the popular outbreaks were brought about by some means Rienzi's house was burned, and Rienzi himself was slain by the people who just before had almost worshiped him. The date of his death is Oct. 4, 1354 (others, Oct. 7 or 8). The estimates of Rienzi's life and services differ greatly; some (as Schlosser, Weltgesch.) representing him as a fantastical character, others finding in him merits, especially an enthusiasm for republican institutions and for justice. Still others deny to him all greatness of character, but find an explanation of his career in the extraordinary conditions of his time and the circumstances of his life. Nationalism, based on the renewed familiarity with the conditions of antiquity, was certainly the leading element in the rapid drama of his life. See Balzli, Vite Pop., Avignon.; Bzovius, Amal. Ecc. ad Ann. 1858, No. 2; Villani, Col. di Rienzo; Schlosser, Weltgesch. vol. iv, pt. 1; Hist. pol. Blätter, vol. xx; Papencordt, Col. di Rienzo a seine Zeit (Hamb. and Gotha, 1841); and others; also Biwer's novel, Rienzi, the Last of the Tribunes.

RISTI, MOSES BEN-ISAAC DI, of Perugia, a noted Jewish writer, was born in 1388 and died after 1451. He was a physician and philosopher of some renown, and wrote very elegant verses in Hebrew and Italian. He is the author of Sefer ha'me'asseq, of a Great Paradiso in Terra Rima, with literary and historical notes. It consists of two parts, viz. the ha'me'asseq and ha'me'asseq be'shuv, which again are separated into divisions. The first part contains in the first division a prayer to God, and speaks of the plan, name, division, and grouping of the work; in the second the author treats of theology, revelation, the thirteen articles of faith, the phases of philosophy among Greeks and Hebrews, of the Cabala and its study; in the third he treats of the other sciences, the liberal arts, etc.; in the fourth he speaks of the introduction of Porphyry, the ten categories, the commentary of Ibn-Rosdi, and the philosophical labors of Levi ben-Gershon, or Rabbi; in the fifth he continues to speak of philosophy. The second part, which is composed of eight divisions, speaks in the first of Paradise, with its patriarchs, prophets, Sanhedrim, the wise and pious; the second, which is also entitled ha'me'asseq, is a grand confessional, penitential, and admonitory prayer; in the third, which is called ma'aseh ha'me'asseq, Rabbenu, The City of God, the bright abode of Ezra, Daniel, Ze-rubabel, Zechariah, etc., is described; in the fourth, called ha'me'asseq shel ha'me'asseq, the author of the Mishna and his work in the domain of the blessed are described and speaks of the chapters of the six orders of the Mishna and their contents; the sixth treats of the writings of the Tanaim, Amoraim, Sabraim, Geonim, etc., down to the author's own time; the seventh descants upon the teachers of Talmud, the theology of the Midrashim, etc.; and, finally, the eighth narrates the exiles of the Jews and their sufferings. The introduction of the Divine, which excludes Immanuel of Rome (q. v.) from the regions of the blessed, and he is also said to have repented of his own poetry as a waste of time. "This would show that he possessed more judgment than those who have published this unattractive work as the production of the 'Hebrew Dante'" (Steinschneider). This Divina Commedia was published in MSS., by Jacob Goldenthal, with an Italian and Hebrew introduction (Venna, 1851). Di Risti wrote some other works, which, however, are yet in MS. See Fürst, Bibl. Jud. iii., 138 sq.; Bartolocci, Bibl. Rabb. iii., 945 a; Gritz, Gesch. J. Juden (Leips., 1875), viii., 149-151; Dell'isla, Gesch. d. Judischen Poesie, p. 54, 145; Moses Rieti, the Jewish Messenger (N. Y.), May 18, 1876. (B. P.)

RIETSCHEL, ERNST FRIEDRICH AUGUST, an eminent German sculptor, was born in Pulsnitz, Saxony, Dec. 15, 1804. He studied under Rauch at Berlin, and in Italy. Settling in Dresden, he became professor in the Academy of Arts. Among his works are, Mary Kneeling over the Dead Body of Christ—a bust of Luther—the Reformation, and the Parable of the Ungrateful Servants. He died at Dresden in 1861.

RIETTER, ANTON, a German Roman Catholic theologian, was born at Stadt-am-Hof in 1808. He studied at Regensburg and Munich; was appointed professor of moral philosophy at Amberg in 1835, at Regensburg in 1842, and at Munich in 1832. He died at Stadt-am-Hof, Nov. 6, 1866. He wrote, Der Leben, die Wieβ von dem Leben, and Der Wert der Liebe (Regensburg, 1846).—Der Weg der Liebe (ibid. 1856).—Der heil. Liebe natürlichen Licht, etc. (Munich, 1857).—Die Moral des heil. Thomas von Aquin (ibid. 1858).—Breviarium der christlichen Ethik (Regensburg, 1866). (B. P.)

RIGAND, STEPHEN JORDAN, D.D., the eldest son of John Francis Rigand, was educated at, and afterwards fellow and tutor of Trinity College, Oxford. He became second master of Westminster School, and head-master of Ipswich School, Suffolk; mathematical examiner in 1845, and one of the select preachers of Oxford University in 1856. He was appointed bishop of Antigua in 1857, and died there, of yellow fever, May 16, 1859. He published Sermons on the Psalms (Ipswich, 1852, 8vo), and edited vol. i. and published vols. i and ii, of the Correspondence of Scientific Men. See Allibone, Dict. of Brit. and Amer. Authors, s. v.

RIGBY, ALFRED A., a Methodist Episcopal minister, of whose early history nothing is known. He fought in the Union army during the Rebellion, and it was while in military service that he connected himself with the
RIGGEN

Church. He was licensed to preach soon after his return from the war, and in 1870 was received on trial in the Des Moines Conference and appointed to Wheeling Circuit. But overwork and overstudy brought on disease, and he died at New Vernon, July 9, 1872. See Minutes of Annual Conferences, 1872, p. 103.

Riggen, John Wesley, a minister of the Methodist Episcopal Church, South, was born in Maryland Aug. 26, 1794. His parents migrated to Mason County, Ky., and, being poor and in a new country, were unable to give him a proper education. In 1816 he was converted, and joined the Methodist Episcopal Church. He commenced as a local preacher in 1825, and in 1829 he was ordained as a Mason. He traveled to Kentucky in 1834, and was ordained elder in 1835. He was a member of the Kentucky Conference until his death, Sept. 30, 1845. See Minutes of Annual Conferences, M. E. Church, South, 1845, p. 56.

Riggs, Adam S., a minister of the Methodist Episcopal Church, South, was born in Williamson County, Tenn., near Rigg's Cross Roads, June 6, 1816, and professed religion December 19, 1836. He was licensed with the Church on the 25th of the same month; was licensed to preach Sept. 21, 1839; was received on trial in the Tennessee Conference in 1839, and served as an itinerant preacher thirty-one years. After an illness of a little over three weeks, he died Oct. 29, 1870. Mr. Riggs was an able and judicious local preacher; a wise counselor and moderator; modest, kind, and faithful. He was honored by his brethren, and was chosen several times as a delegate to the General Conference. See Minutes of Annual Conferences, M. E. Church, South, 1870, p. 586.

Riggs, Joseph L., a Presbyterian minister, was born at New Providence, N. J., March 19, 1805. He graduated at Amherst College, Mass.; studied theology in Andover Seminary, Mass.; and was ordained to the ministry in 1832. He was mustered into the 5th Pennsylvania Volunteers in 1862, and was licensed and ordained Aug. 27, 1845. His fields of labor were, Wells, Bradford Co., Pa.; Millerstown, Pa.; Cumberland, Ill.; and as city missionary in Elmiria, N. Y., where he died Aug. 20, 1865. Mr. Riggs was a faithful preacher, and he loved the work to which he had devoted himself. See Wilson, Presb. Hist. Almanac, 1866, p. 223.

Rigby, Mounted, in Mongol mythology, is the sacred mountain, in the main identical with the Hindu Meru, and varying from it only in minor particulars which grow out of the fancy of the worshippers of the Lama.

Right, as an adjective, describes the quality of an action as in conformity with moral law; as a substantive, the claim of a person upon others consequent upon the equal subjection of all to moral law. A right action (rectum) is an action agreeable to our duty, but a man's right (jus) has a very different meaning. What I have a right to do, it is the duty of all men not to hinder me from doing, and what I have a right to demand of any man, is his duty to perform. A man's right is that which is vested in him by society, and because its laws may not always be conformable to the supreme rule of human action, viz. the Divine Law, the two words may often be properly opposed. We may say that a poor man has no right to relief, but it is right that he should have it. A rich man has a right to destroy the harvest of his fields, but to do so would not be right. See Fleming's Manual of Phil. Sciences, vol. v.

Right, Divine. See JUDE DIVINO.

Righteousness (τειμία, the quality of being right morally). The righteousness of God is the essential perfection of his nature, and is frequently used to designate his holiness, justice, and faithfulness (Gen. xviii, 25; Deut. vi, 25; Psa. xxxi, 1; cxxix, 137, 142; Isa. xliv, 23; xlii, 13; ii, 5-8; lvi, 1). The righteousness of Christ denotes not only his absolute perfection (Isa. ii, 11; i John ii, 1; Acts iii, 14), but is taken for his perfect obedience unto death as the sacrifice for the sin of the world (Dan. ix, 24; Rom. iii, 25, 26; v, 18, 19; Jer. xxiii, 6; John i, 29). The righteousness of the law is that obedience which the law requires (Rom. iii, 10, 20; viii, 4). The righteousness of faith is the justification which is received by faith (Rom. iii, 21-29; iv, 3-25; v, 1-11; Gal. ii, 16; iv, 4, 5; Gal. iii, 21; Heb. ii, 11). Righteousness is sometimes used for uprightness and just dealing between man and man (Isa. lx, 17), also for holiness of life and conversation (Dan. iv, 27; Luke i, 6; Rom. xiv, 17; Eph. v, 9). The saints have a threefold righteousness: (1) The righteousness of their persons, as in Christ, this must be (v, 21); the same is ascribed to them, and He promised to stand on the account thereof (2 Cor. v, 21; Eph. v, 27; Isa. xiv, 24); (2) The righteousness of their principles, being derived from, and formed according to, the rule of right (Psa. cxxix, 11); (3) The righteousness of their lives, produced by the sanctifying influence of the Holy Spirit, without which no man shall see the Lord (Heb. xiii, 7, 4; 1 Cor. vi, 11). See Dickinson, Letters, 12; Witherspoon, Essay on Imputed Righteousness; Hervey, Theron and Aspasio; Owen, On Justification; Watts, Works, iii, 532, 8vo ed.; Jenks, On Submission to the Righteousness of God. Comp. JUSTIFICATION; SANCTIFICATION.

Richter, Chester N., an agent of the American Bible Society in the Levant, was sent to Jerusalem. He graduated at Yale College in 1846; studied at New Haven and Andover, and afterwards spent a year or two in foreign travel for the benefit of his health. He sailed for the Levant in 1854, and died at Diarbekir, Turkey, in December, 1856, aged about thirty. Extracts from his letters and journals will be found in The Bible in the Levant, by Michael I. Prime. See Allibone, Dict. of Brit. and Amer. Authors, s. v.

Rigorists, a name given to the Jansenists by their adversaries. They made repentance to consist in the voluntary sufferings which the transgressor inflicts upon himself, in proportion to the nature of his crimes and the degree of his guilt. They went so far as to call those who had shorted life by excessive abstinence and labor the sacred victims of repentance, and said that they were consumed by the fire of divine love; that their conduct was highly meritorious in the sight of God; and that by their sufferings they not only appeased the wrath of God, but drew down abundant blessings upon their friends and upon the Church. See JANSSEN.

Rig, in Norse mythology, was a name of the god Frey. The Rig-RaETHER became the name of the four ranks of men—servants, peasants, nobles, and princes. Two of his descendants likewise bear this name.

Rig-Veda, the first and principal of the four Vedas. See VEDA.

Riley, Henry Augustus, a Presbyterian minister, was born in the city of New York Nov. 21, 1801. In 1815 he was sent to the Jesuit College at Georgetown, D.C., but left in 1817, and, under a private tutor in Philadelphia, he was prepared for the University of Pennsylvania, from which institution he graduated in July, 1829. After this he entered the law-office of Horace Binney, Esq., and continued in the study of the law until the fall, when a severe attack of illness moved him to the study of medicine. To this end he entered a private class of Prof. Nathaniel Chapman, M.D., and attended medical lectures in the University of Pennsylvania, and graduated from its medical department in April, 1825. Returning to his home in New York, he entered upon the practice of medicine, and continued for about three years. In June, 1828, he united with the Rutgers Street Presbyterian Church, then under the pastoral care of Dr. George M'Auley, and determined to devote his life to the work of preaching the Gospel. With this end in view, he entered Princeton Theological Seminary Feb. 5, 1829, and, after taking the full course, graduated in 1832. He was licensed by the Presbytery of New York in October of the same year, and ordained by the said presbytery in 1836.
RILEY

29
RIMMON

After his licensure he went to Philadelphia, and laid the foundation of the Third Church of that city in January, 1836, and labored there until April following. From that time until August he pastored the Presbyterian Church at Mattewan, N. Y., and in April, 1835, took charge of the Eighth Avenue Church—now West Twenty-third Street Church—in New York city, at which time, as above stated, he was ordained. He labored in that field until January, 1835, when he went to Montrose, Pa. Here he was installed, and a long, most useful, and successful pastorate of nearly a quarter of a century, from which he was released only on account of the loss of his voice, which occurred in 1863. After his resignation, he remained for a limited time the practice of medicine, and continued to reside in Montrose, where he died, March 17, 1878. (W. P. S.)

Riley, Isaac, a minister of the Presbyterian Church, son of H. A. Riley, was born in the city of New York Feb. 2, 1835. After receiving a preparatory education he entered Yale College, and was graduated, having written the class poem. He next entered the Union Theological Seminary, and, after graduation, was admitted to the ministry. His first pastorate was at Middlebury, Vt., where he labored for three years. He then accepted a call to Potsdam, Pa., and from there went to Newark, where he spent some time as associate pastor with his father—law, the Rev. Joel Parker. His next pastoral duties were in New York, where for seven years he occupied the pulpit of the Thirty-fourth Street Church, filling the position with signal ability and success. In 1875 he was called to the pastorate of the Westminster Church, Buffalo, preaching his first sermon on Oct. 20. His work was remarkably fruitful, and during his pastorate the Church enjoyed an uninterrupted prosperity. He was a man of very decided ability, and in him were united qualities very rarely combined in the same individual. His reasoning faculty was strong, and so also was his imagination. He was exact and mathematical, and at the same time poetical and rhetorical. All the varied powers of a disciplined intellect, and also of a strong emotional nature, were imbued with divine love, so that the whole man was consecrated to the work of the ministry. He wrote carefully and spoke fluently, and the best work he was what he gave to his people and the public. He was one of the most useful men in Buffalo. In his last illness he suffered much, but bore it uncomplainingly, and sank into the peaceful slumber of death. He died at Buffalo Oct. 20, 1878. (W. P. S.)

Rimah. See WORM.

Rimmon. See POMEGRANATE.

Rim'mon (Heb. Rimmon, rı̂môn, a pomegranate, as often, the name of an idol, of a man, and also of several places; all probably having some allusion to the pomegranate, especially the localities, which were doubtless so named from the abundance of that fruit in the vicinity, although in modern times, owing to the neglect which has for ages prevailed under Turkish rule, that tree is comparatively scarce. See also RIMMON MEHRAH; RIMMON MEHRAH; Rimmon.)

1. (Sept. 'Pommon.) A deity worshipped by the Syrians of Damascus, where there was a temple or house of Rimmon (2 Kings v. 18). Traces of the name of this god appear also in the proper names Hadadrimmon and Tabrimmon, but its signification is doubtful. Sennacherib, quoted by Selden (De Die Syris, ii, 10), refers it to the Hebrew name, a pomegranate, derived from the name of the god, Rimmon, to Venus, who is thus the deity worshipped under this title (comp. POMMON, from pomum). Ursinus (Abercromby Bibl. cap. 23, 7) explains Rimmon as the pomegranate, the emblem of the fertilizing principle of nature, the personified natura naturata, a symbol of frequent occurrence in the old religions (Bähr, Symbolik, ii, 129). If this be the true origin of the name, it presents us with a relic of the ancient tree-worship of the East, which we know prevailed in Palestine. But Selden rejects this derivation, and proposes instead that Rimmon is from the root דד, rûm, to be high, and signifies most high; like the Phoenician Elîm, and the Hebrew יִצְּרָאָל, te′zerâl (Herod. ii). Clericius, Vitringa, Rosenmüller, and Geessner were of the same opinion. Movers (Phön. i, 196, etc.) regards Rimmon as the abbreviation of Hadadrimmon; and Leight-Perke, Haas is the sun-god of the Syrians. Combining this with the pomegranate, which was his symbol, Hadadrimmon would then be the sun-god of the late summer, who ripens the pomegranate and other fruits, and, after influsing into them his productive power, dies, and is mourned with fearful ceremonies. (Zech. xii, 11).

2. (Sept. 'Pommon.) A Benjamite of Beeroth, and the father of Rechab and Baana, the murderers of Ishbosheth (2 Sam. iv. 2, 5, 9). B.C. ante 1058.

3. (Sept. 'Pommon v. r. 'Ermoç, etc.) A town in the southern portion of Judah (Josh. xv. 92), allotted to Simeon (v. 91; 1 Chron. iv. 92) in the former of these two passages it is inaccurately given in the A. V. as "Remmon." In each of the above lists the name succeeds that of Ain, also one of the cities of Judah and Simeon. In the catalogue of the places reoccupied by the Jews after the return from Babylon (Neh. xi. 29) the two are joined, and inaccurately so given "As-Rimmon" or "En-Rimmon" (q. v.). It is grouped with Ziklag and Beersheba, and must consequently have been situated near the southern border of the tribe. Rimmon would appear to have stood towards the western extremity of Simeon, and thus south of the plain of Philistia; for Joshua, in enumerating "the uttermost cities of the tribe of the children of Judah," begins at the coast of Edom on the east, and Rimmon is the last of twenty-nine, and therefore must have been near the western extremity. The only other notice of it in the Bible is in the prophecies of Zechariah: "All the land shall be turned as a plain, from Geba to Rimmon, south of Jerusalem" (xiv. 10). The land referred to is the kingdom of Judah; Geba lay on the northern and Rimmon on the southern border. Though both Eusebius and Jerome mention Rimmon, their notices are so confused, and even contradictory, that they evidently knew nothing of it. They appear to have confounded three different towns of the name—Jebus, one place of the tribe of Judah, another of the tribe of Simeon, and a town "of Simeon or Judah," and yet he locates it "fifteen miles north of Jerusalem." In the very next notice they write, "Remmon, in tribu Simeonis, vel Zabulon" (Onomast. s. v. "Remmon"). Under the name Remmon (Ephrosôn, Onomast. s. v.) both Eusebius and Jerome appear to give a more accurate account of the site of this city. They state that it is a "very large village" (vicea progarama), sixteen miles south of Eleutheropolis. This was no doubt pretty nearly its true position (see Relan, Palast. p. 973). About thirteen miles south of Eleutheropolis (now Beit Jibrin) is a ruined village called 'Kharab Um er-Rumannan ("Mother of Pomegranates," which in all probability is the name of the site, as it bears the name, of Rimmon of Simeon. On the top of the hill there are the foundations of an important square building of large well-dressed stones, and lower down there are the bases of three columns in situ (Quar. Statement of "Pal. Explor. Fund," Jan. 1876, p. 19). A short distance (about a mile) south of it are two tell or mounds, which are connected by a low ridge and between them, in the valley, is a "copious fountain, filling a large ancient reservoir, which for miles around is the chief watering-place of the Bedouin of this region" (Van de Velde, Memoir, p. 344). As fountains are extremely rare in this southern district, it seems probable that this one may have been a grazing station of Ain to the ancient town on the adjoining tell; and the proximity of Ain and Rimmon led to their being always grouped together.

4. (Heb. Rimmonóo, רֵימְנָן, his pomegranate; Sept. ῥί̂μος, ῥέμων.)
RIMMON METHOAR

A city of Zebulan belonging to the Merar-ite Levites (1 Chron. vi, 77). There is great discrepancy between the list in which it occurs and the parallel catalogue of Josh. xxii. The former contains two names in place of the four of the latter, and neither of them the same. But it is not impossible that Dimnah (Josh. xxii, 35) may have been originally Rimonam, as the D and R in Hebrew are notoriously easy to confound. At any rate there is no reason for supposing that Rimonam is not identical with Rimon of Zebulan (xix, 15) in the A. V. and Methoar (A. V.). The redundant letter was probably transferred, in copying, from the succeeding word—at an early date, since all the MSS. appear to exhibit it, as does also the Targum of Joseph.

5. THE ROCK RIMMON (Heb. סֵלָה הָאֹרְסָל; רִמְמֹוֹ מֵאֶלֶּךְ [also without the article] : Sept. יָאָרָה הַמַּעֲרָט; Josephus, πηγή Πάστι; Vulg. petra cava, vocabulum est Remmon; petra Remmon), a cliff (such seems rather the force of the Hebrew word סלָה) or inaccessible natural fastness, in which the six hundred Benjamites who escaped the slaughter of Gibeah took refuge, and maintained themselves for four months until released by the act of the general body of the tribes (Judg. xx, 45, 47; xxi, 15). It is described as in the "wilderness" (midbâr), that is, the wild, uncultivated (though not unproductive) country which lies on the east of the central hill HAPPY, on which Gibeah was situated—between them and the Jordan valley. This is doubtful which the Eusebian and Jerome mention, locating it fifteen miles north of Jerusalem (Onomast. s. v. "Remmon"). About ten miles north of Jerusalem, and nearly four east of Bethel, is a very conspicuous white limestone tell, rising like a cone above the neighboring hill-tops, and overlooking the whole wilderness down to the Jordan valley. Upon it stands a large modern village called Rimon. This is unquestionably the "Rock Rimon" on which the Benjamites took refuge. It is admirably adapted for the purpose. A deep and wild ravine cuts off the approach from the south, and other skirt its western and northern sides, rendering it a natural fortress of great strength. The sides of the tell are steep, bare, and rocky, and could be defended by a few resolute men against a host. The top is rounded, affording ample space for the refugees, while along the sides are ancient tombs. Robinson, Res. ii, 290; Van de Velde, Memoir, p. 344; Porter, Handbook, p. 217; Schwarz, Palest. p. 129.

RIM'MON METHO'AR (Heb. Rimmon ham-Methoar, נַחַר רִמָּה הַמֶּתְוָאָר, i. e. Rimmon the extensive; Sept. Ριμμώνας Ματωράς, V. Ριμμωνᾶς ματωράς; Vulg. Remmon, Anthar; A. V., "Remmon-methoar"), a place which contained one of the landmarks of the eastern boundary of the territory of Zebulan (Josh. xix, 13 only). It occurs between Eth-Katain and Neha. Methoar does not really form a part of the name, but is the Pool of מַג, to stretch, and should be translated accordingly (as in the margin of the A. V.):—"Rimmon which reaches to Neha." The object of the sacred writer is to describe as minutely as possible the exact course of the border-line. This is the judgment of Gesenius, Thescr. col. 1292 a; Rothen, ibid. 1491 a; Fürst, Handeb. ii, 512 a; and Bunsen, as well as of the ancient Jewish commentator Rashi, who quotes as his authority the Targum of Jonathan, the text of which has, however, been subsequently altered, since in its present state it agrees with the A. V. in not translating the word. The latter course is taken by the Sept. and Vulg. as above, and by the Peshito.

Junius and Tremellius, and Luther. Symmachi rendered רִמְמֹוֹ מֵאֶלֶּךְ, a descriptive epithet attached to Rimmon, "Rimmon the Renowned" (Rosenmüllcr, ad loc.). This Rimmon does not appear to have been known to Eusebius and Jerome, but it is mentioned by the early traveller Parchi, who says that it is called Rummoeh, and stands an hour south of Sephoris (Zunz, Benjam., ii, 433). If for south we read north, this is in close agreement with the statements of Robinson (Bib. Res. iii, 110) and Van de Velde (Memoir, p. 344), who place Rammadah on the south border of the plain of Buttaba, three miles north-northeast of Seffurieh (comp. Pococke, Trav. ii, 62; Thomson, Land and Book, ii, 129; De Saulcy, Dead Sea, i, 69).

Rimmon is not improbably identical with the Levitical city which in Josh. xxii, 35 appears in the form of Dimnah, and again, in the parallel lists of Chronicles (1 Chron. vi, 77) as Rimmom (A. V. "Rimmon").

Rimmon Pa'reth (Heb. Rimmon Pa'reth, רִמְמֹוֹ מֵאֶלֶּךְ [in pause, פָּרֶת, פא'א], pomegranate of the breach, so called probably from some local configuration; Sept. Ριμμώνος Φαράγ, the second-named station of the Israelites in the desert after leaving Hazeroth, and located between Rithmah and Libnah (Num. xxxiii, 20). It was somewhere in the northern interior of the Desert et-Tib, west of Kadesh-Barnea. See EXODUS.

RIN, in Norse mythology, was the name of one of the rivers of hell.

Rinaldi, Oodoci, a learned Italian ecclesiastical historian of the 17th century, was a native of Treviso, and was educated at Parma by the Jesuits. He became an Oratorian at Rome in 1618. After the death of cardinal Baronius (who was also a member of the Congregation of the Oratory), Rinaldi wrote a continuation of his Ecclesiastical Annals from 1198 (where the former left off) to 1654, when the Council of Trent was dissolved. Rinaldi's addition to the work consists of ten large folio volumes, published at different periods from 1648 to 1677. Rinaldi was also the author of a sufficiently copious abridgment in Italian of the whole Annals, compiled by Baronius himself.

Rinda, in Norse mythology, was one of Odin's wives, the mother of Wali, who became so strong in a single night that he was able to slay Hoeder, the murderer of Baldur.

Ring (usually גָּלָי, tabba'ath: δίαστημος, occasional גָּלָל, gali, a circle for the fingers, Esth. i, 6; Cant. v, 14, 15; gub, a rim of a wheel, Ezek. i, 18). The ring was regarded as an indispensable article of a Hebrew's attire, inasmuch as it contained his signet, and even owed its name to this circumstance, the term tabbat being derived from a root signifying "to impress a seal." It was hence the symbol of authority, and as such was presented by Pharaoh to Joseph (Gen. xlii, 42), by Ahabsuerus to Haman (Esth. iii, 10), by Antiochus to

Hands of a Wooden Figure of a Woman (on the lid of a mummy-case in the British Museum). 1, the left; 2, the right hand.
Philip (1 Mac. vi, 15), and by the father to the prodi-
gal son in the parable (Luke xv, 22). It was treasured
accordingly, and became a proverbial expression for a
most valued object (Jer. xxii, 24; Hagg. ii, 23; Eccles.
xiii, 11). Such rings were worn not only by men, but
by women (Isa. iii, 21; Mishna, Sot. 6, §3), and are
enumerated among the articles presented by men and
women for the service of the tabernacle (Exod. xxxv,
22). The signet-ring was worn on the right hand (Jer.
loc. cit.). We may conclude, from Exod. xxviii, 11, that
the rings contained a stone engraved with a device, or
with the owner's name. See ORNAMENT.

The ancient Egyptians wore many rings, sometimes
two and three on the same finger. The left was con-
sidered the hand peculiarly privileged to bear those orna-
ments: and it is remarkable that its third finger was dec-
orated with a greater number than any other, and was
considered by them, as by us, par excellence the ring
finger, though there is no evidence of its having been so
honored at the marriage ceremony. They even wore a
ring on the thumb. Some rings were very simple; others
were made with a scarabæus, or an engraved stone;
and they were occasionally in the form of a shell, a knot,
a snake, or some fancy device. They were mostly of
gold, and this metal seems to have always been preferred
to silver for rings. Silver rings, however, are occasion-
ally met with. Bronze was seldom used for rings, though
frequently for signets. Some have been discovered of
brass, (the native of the Roman times,) but ivory and
blue porcelains were the materials of which those worn
by the lower classes were usually made. The

seum). 1, of glass; 2, of bronze.

(Smith, Dict. of Antig. s. v. "Rings"). It appears also to
have prevailed among the Jews of the apostolic age;
for in James ii, 2, a rich man is described as χρυσοπαρα-
δεικνυμι, meaning, not merely and containing either a scarabæus or
an engraved stone (Wilkinson, Anc. Eng. ii, 337). The
ancient Assyrians seem to have been equally fond of
similar ornaments. The same profusion was exhibited
also by the Greeks and Romans, particularly by men
than the reign of Numa Pompilius. The rings then
worn were generally of iron, and sometimes engraved.
In process of time, these iron rings were adopted by free citi-
zens, and those of iron were abandoned to slaves. Gold
rings could, in the earlier ages of the republic, only be
worn by senators; and even in their case the use of the
gold ring was to be confined to public occasions. Ma-
rinus, in his third consulate, is said to have worn one
habitually; but if this account be correct, it must have
been a ring of a special kind, for it is not probable than a
century earlier the equestrian order had the privilege of
wearing gold rings, since Hannibal, after the battle of
Canne, sent as a trophy to Carthage three bushels of
gold rings, taken from the fingers of the Roman knights
slain in the battle. It is clear that the equestrian ring
was not allowed to be indiscriminately worn, for Horace
informs us that he did so himself by the express permis-
sion of Augustus (Horace, Sat. i, vii, 54). It may be
that the passage in James's epistle refers to the eques-
trian ring as a token of Roman rank. The ring was
generally worn on the fourth finger of the left hand, and
Anius Gellius gives as a reason for this that there is a
vein from the heart passing directly to the heart. The
wear rings on the right hand was regarded as a mark of
effeminacy, but they were not uncommonly worn in
considerable numbers on the left. This was a practice
among men of fashion at Rome (Martial, Epig. xi, 60),
as it had been at Athens so far back as the age of Aris-
tophanes (Aristoph. Was. 127). Lamia and Ithyle, the
Galatian and Heligobalus, whose fingers were always covered
with rings, never wore the same twice; and a part of the
fop-
pery of the age consisted in having rings of different
weights for summer and winter. Wedding-rings, often of
large size, were in use among the Jews, and from them
Christians have borrowed the practice; and the ring has
from a very early period formed a part of the episcopal
costume, as indicating that the bishop was wedded to
his Church. So long ago as the Council of Toledo (A.D.
633), a deposed bishop was restored by returning to him
his episcopal ring. See Signet.

RING (in Attic). The practice of wearing rings has
been widely prevalent in different countries at dif-
ferent periods. They have been used to decorate
the arms, legs, feet, toes, fingers, nose, and ears.
The most general and most distinguished use of rings is
on the finger. In ancient times the ring was a symbol of
authority, and power was delegated by means of it.
Finger-rings are alluded to in the books of Genesis and
Exodus; Hezekiah gave the Babylonians that the Babylons
wore them; and from Asia they were probably intro-
duced into Greece, doubtless subsequent to Homer's time,
as he makes no mention of them. Rings worn in early
times were not purely ornamental, but had their use as
signet-rings. The devices in the earlier rings were
probably cut in the gold; but at a later period the
Greeks came to have rings set with precious stones.
Among the Romans the signs engraved on rings were
very various, including portraits of friends or ancestors
and subjects connected with mythology or religion.
Rings entered into the groundwork of many Oriental
superstitions, as in the legend of Solomon's ring, which,
among its other devices, secured up the sun to a limit
in jars and cast them into the Red Sea. The Greeks
mention various rings endowed with magic power, as
that of Gyges, which rendered him invisible when its
stone was turned inwards; and the ring of Polycrates,
which was flung into the sea to propitiate Nemesis and
found by its possessor inside a fish. Welding and other
rings have been thought to possess magical properties.
Sometimes they owed their virtue to the stones with
which they were set; thus diamond was believed to
be an antidote against poison, etc. The Gnostics
engraved ring gems with mystic symbols, names, mono-
grams, and legends. In early times the names of Jesus,
Mary, and Josephine's rings were deemed to be preserv-
atives against the plague.

The early Christians adopted the use of rings, being
RING

at first simple circles of ivory, bronze, iron, or some other cheap material. Many of them were adorned with symbols connected with their faith, such as the cross, the monogram of Christ, the dove, anchor, ship, palm-branch, etc.; others had simple religious phrases, among the most common of which was Vires in Deo or Spes in Deo. Rings to be used as seal-rings alone were fitted with a plate of metal, often of the form of the bottom of a sandal or of the human foot, this, according to ancient tradition, being the symbol of possession. Among the rings found in the catacombs are some with a key, and some with both a key and a seal, the latter for both locking and sealing a casket. See Appletos' Cyclop., s.v.; Chamber's Encyclop., s.v.; Gardener, Faiths of the World, s.v.

RING (in Esposual). In early times it was customary for the man, together with other esposual gifts, to give the woman a ring as a further token and testimonial of the contract. This ceremony was used by the Romans before the introduction of Christianity, and in some measure admitted by the Jews, whence it was adopted among the Christian rites of esposual without any opposition. That the ring was used in esposuals, and not in the solemnity of marriage itself, seems evident from the account given by pope Nicholas, A.D. 860 (Nicel. Respons., ad Confirmul Bulgariorum, Conc. 1, viii, p. 817). "In the esposuals," says he, "the man first presents the woman with the cross, or esposual gifts, and among these he puts a ring upon her finger," etc. St. Ambrose (Ep. 34) and Tertullian (Apol. cap. 6) also speak of the annulus promonus, or ring of esposual. Pliny mentions an iron ring as worn by a person betrothed. In the ancient Greek Church a special ceremony was observed in presenting the ring. With a golden ring the priest made the sign of the cross upon the head of the bridegroom, and then placed it upon the finger of his right hand, thrice repeating these words: "This servant of the Lord espouses this handmaid of the Lord, in the name of the Father, and of the Son, and of the Holy Ghost, both now and forever, world without end, Amen." In like manner and with the same form of words he presents the bride with a silver ring. The groomman then changes the rings while the priest, in a long prayer, sets forth the import of the rings; after which the whole is closed with a prescribed form of prayer. The Gimmel, or betrothal-ring, was used in later times. The upper figure shows the three parts brought together; the lower figure, the parts separately. In Iceland the ceremony of betrothal used to be accompanied by the bridegroom passing his four fingers and thumb through a large ring and in this manner receiving the hand of the bride (Bingham, Christ. Antig. xxix, 85; Gardener, Faiths of the World, s.v.; Chamber's Encyclop., s.v.).

RING (in Investituras). A ring was anciently given to bishops on their consecration with these words: "Accipe annulum discretionis et honoris, fidei signum," etc. The ring was emblematical of his esposual to the Church, in imitation of the ancient ceremony of presenting a ring on the esposual of parties in marriage. It was called the ring of his esposuals, annulus sponsi- tius promonus, and sometimes annulus palatii. The ring was formerly worn on the middle finger of the right hand, as indicative of silence and discretion in communicating the mysteries, in giving the benediction, but was shifted to the annular finger in celebrating mass. The ring is mentioned by the Courtenay of Orleans, 511; Rome, 610; fourth of Toledo, 633; Hincmar of Rheims, Isidore of Seville, and the sacramentaries of Gelasius and Gregory the Great, 590. These rings usually had monograms (sigils), or engraved subjects, and were used as signets till the 11th century in offices of consecration, and for sealing a neophyte's confession of faith, and, pope Sergius's order (pap. 701), for sealing the font from the beginning of Lent to Easter-eve in France and Spain. They were, in consequence, sometimes called church rings. Every bishop had also a jewelled pontifical ring. This ring represented fidelity to Christ; the duty of sealing and revealing; and, lastly, the gifts of the Holy Spirit. The best rings of suffragans at their decease were the perquisites of the primates, and, in the vacancy of the archepiscopal chair, of the crown. Priests, as friends only of the bridegroom, did not wear rings (Coleman, Christ. Antig.; Walcott, Sacred Archael., s.v.).

RING (in Matrimony). Originally the gift of the ring was made at the time of the solemnization of marriage. Calvoer (Bibl. Eccles.) traces the origin of the marriage ring to the 10th century. He supposes it to have been introduced in imitation of the ring worn by bishops, and to have been regarded as a kind of phylactery, or charm. According to Rome, the delivery of the ring by the husband to the wife indicated that she was admitted into his confidence. Another explanation is that the ring symbolizes eternity and constancy; and it has been alleged that the left hand was chosen to denote the wife's subjection to her husband, and the third finger because it thereby presse a vein which was supposed to communicate directly with the heart (Riddle, Christ. Antig. vii, 1; Chamber's Encyclop., s.v.). See RING (in Esposuals).

RING, THE DECADE, a modern substitute for the rosary during the existence of the penal laws, being more easily concealed. It has on it ten knobs, on each of which, as it passed under the fingers, an Ave was said, and on the eleventh, which is distinguished by a cross, a Paternoster.

RING, FISHERMAN'S, is that worn by the pope as the descendant of Peter, with an engraving of Peter casting his net.

RING, MELCHIOR, a prominent Anabaptist leader in the landgravate of Hesse in the period of the Reformation, was at first a school-teacher and chaplain at Harnfeld. Having become a zealous disciple of Thomas Münzer (q.v.), he appeared in Sweden in 1524 in company with M. Hoffmann and Knipperdolling (q.v.), and by the fanaticism of his sermons excited a riot in Stockholm against images, which he justified as being the work of the Spirit of God. Towards the close of 1524 he returned to Germany in order to participate as a leader in the Peasants' War; and, after the bloody catastrophe at Frankenhäusen, he fled to Switzerland, where he found a fruitful soil and a cordial reception. A murderer committed by one of his adherents, professedly in obedience to the inspiration of God, obliged Ring, in 1527, to flee to the neighborhood of his early home. He now became a peripatetic preacher, made the teaching of Luther the subject of bitter attack, characterized the evangelical preachers as the expounders of a corrupt gospel, and by such means secured a large following. Disputations held with him failed to convince, and a threat of exorption failed to alarm him. He eventually fled to East Friesland, which had become a rallying-place for Anabaptists generally, and while there employed every method to inspire his fol-
lowers with a fanatical contempt for Scripture and the Lord's supper. It was difficult to restrain the fanatical tendencies thus implanted in the populace; but the Lutherans finally secured a preponderating influence, and Rinkart was compelled to flee once more. He labored in his characteristic method in Hesse and Saxony and met with some success, but was repeatedly imprisoned. He would seem to have died in connection with the Minster revolt. The teaching of Ring may be briefly stated as follows. Original sin involves no condemnation for persons of immature mind, etc. The curse in Gen. iii imposes spiritual death only, consequently death does not come to children on account of sin. Infant baptism is blasphemous, and cannot be justified on scriptural grounds. Christ is not God according to his nature, and does not derive human nature from Mary. He is from suff. He holds that the end of the and forgiveness of sins, but simply as an example and type; and they who would profit by his work must follow him with like works and sufferings. Christ's body and blood are not present in the sacrament. Man has the ability by nature to prepare himself to believe and come to the Spirit of God. See Krohn, Gesch. d. fanat. un. rebell. Kirchenl., Leipzig, 1848, p. 11, and Engler, in d. prot. Sakralgesch, in Hessen, in Niedner's Zeitchr., f. d. hist. Theologie, 1858, p. 541-553, and 1860, p. 272 sq.

Ringguth, Gotthard, an excellent Swiss artist, was born at Zurich, Jan. 27, 1575. Of his early life, education, and progress we are not informed. He was chosen by the magistracy of Berne to decorate with paintings of large size the senate-house and minister of that metropolis, and had the freedom of the city conferred on him. For the public library of Zurich he painted the arms of the state and its dependencies, supported by Religion and Liberty. Death lies at the feet of Religion, but to the usual allegorical implements in her hands, or to the allegories of the centaur, or Pegasus, or Panatonicism and Superstition. One of the most remarkable of his easel pictures, in the house of Werdmüller, is Job Listening to his Wife's Invectives. Perhaps his most valuable remains are designs, generally drawn with a pen and washed with India-ink. Among these are Our Savior's Burial—Simmah with the Elders—Faith Sheltered from Persecution. He died in 1635.

Ringgold, Bartholomew, a German hymnologist, born at Frankfort-on-the-Oder in 1530, was preacher at Langenberge, in Neumark; but his principal name was achieved as a writer of spiritual hymns, some of which are still in common use (e.g. Es ist geschweiget an der Zeit). His writings other than hymns are nearly all lost. He believed that the end of the world was near, and had even calculated its date to fall in the year 1684; and his first book, Die letzte Wahr heit (1885), expresses his yearning for the eternal world and wars against the condemnation of hell: while his second book, Christliche Warnung des treuen Eckert (Frankfort-on-the-Oder, 1858), serves as a guide to the mysteries of heaven and hell, which places Eckert in a trance. See Koch, Geschichte des deutschen Kirchleides, 2d ed., i. 156 sq.; Langbecker, Das deutsch-evangel. Kirchleid (1850), p. 201 sq.; Vörkel, Evangeliäsches evangel, Glaubenlehren u. Sängen (1850), ii. 98; Wendeburg, B. Ringgold's gesättliche Lieder, etc.

Ring-stretched is the rendering of the English Version ("ring-stretched") of the Heb. ṣ̄̄l̄̄, Ṣâdah (Gen. xxx: xxxi), as applied to the parti-colored rams of Jacob's flock. The Hebrew word literally means banded, or striped, and seems to refer especially to a variation of color in the feet (Symmachus lexikologisch, Suidas similarly).

Ringkaut, Martin, preacher and archdeacon at Eilenburg, in Saxony, was born there, April 23, 1586. His official life began at Leipsic, where he obtained the master's degree, and at Eisleben and Endeborn, where he first engaged in the duties of the ministry of the Word. His pastorate in his native town extended over thirty-two years, and covered the entire period of the Thirty Years' War. It is related that a forced contribution of 30,000 thalers having been demanded from the town, Rinkart held a prayer-meeting on Feb. 21, 1659, to invoke God's help in the emergency, with the result that the sum demanded was reduced to 800 thalers, thus to 400, and finally to 200. Pastor Rinkart was also a poet, and wrote hymns which are sung in the churches of Germany to-day, and are worthy of note because of their jubilant spirit, e.g. Nun danket Alle Gott, etc. Of his writings in other departments, though they were once numerous, but few have been preserved, and they contain nothing that possesses importance at this day. He died Dec. 8, 1649. See Plato, M. Martin Rinkart, etc. (Leips. 1830); Vörkel, Evangeliäsches evangel, Glaubenlehren u. Sängen (ibid. 1880), ii. 21 sq., 127 sq.; Koch, Gesch. d. deutsch. Kirchleides, 2d ed., i. 144 sq., iv. 567 sq.

Riper Years. In one of the offices for baptism, this phrase is used to designate those who are beyond the age of children and able to answer for themselves. This definition is only partly true that gives no distinction between adults and children, but is implied in the words themselves, which embrace both adults and those in age between the latter and children. In the ordinal this and kindred terms are used, as in the exhortation of priests, "that by daily reading and weighing the Scriptures ye may wax riper and stronger in your ministry."

Ripherus, in Greek mythology, was the largest of those mountainous peaks or towers that are above the tallest trees of the forest. He was killed by Theseus while present at the marriage of Piritous.

Riphath (Heb. Riphath', Ṣ̄̄l̄̄h, perhaps spoken; Sept. Pòpōd v. r. ‘Pòpōt; Vulg. Riphath), the second son of Gomer and the brother of Ashkenaz and Togarnah (Gen. x. 3). B.C. cir. 2450. The Hebrew text in 1 Chron. i. 6 gives the form Dipath (q. v.); but this arises out of a clerical error similar to that which gives the forms Raphaj and Hadad for Dbah (vers. 7, 50; Gen. xxxvi, 39). The name Riphath occurs only in the genealogical table, and hence there is little to guide us to the locality which it indicates. The name itself has been variously identified with that of the Rhiphean Mountains (Knobel); the river Rhabas, in Bithynia (Bochart); the Rhab, a people living eastward of the Caspian Sea (Schultze); and the Riphains the ancient name of the Paphlegonians (Joseph. Ant. i. 6, 1). This last view is certainly favored by the contiguity of Ashkenaz and Togarnah. The weight of opinion is, however, in favor of the Rhiphean Mountains, which Knobel identifies (ibid. p. 44) identifies etymologically and geographically with the Carpathian Mountains of north-east of Dacia. The attempt of that writer to identify Riphath with the Celts or Gauls is evidently based on the assumption that so important a race ought to be mentioned in the table, and that there is no other name to apply to them; but we have no evidence that the Gauls were for any long period settled in the neighborhood of the Carpathian range. The Rhiphean Mountains themselves existed more in the imagination of the Greeks than in reality; and if the received etymology of that name (from pīrāi, "blasts") be correct, the coincidence in sound with Riphath is merely accidental, and no connection can be held to exist between the names. The supposed geographers, Ptolemy (v. 10, 19) and others, placed the Rhiphaean range where no range really exists, viz. about the elevated ground that
separates the basins of the Euxin and Baltic seas. See ETHNOLOGY.

**Ripidium** (Gr. ῥιπίδιον, a bellows) was a fan made of parchment, peacock's feathers, or linen, and was used in the ancient churches to drive away all such insects as might drop into the cups or infest the altar. The apse of the church of St. George Scalabrinian at Alexandria (p. 892), calls them μυία ματιδιών, and reckons them among the holy utensils of the altar which were laid up among the rest in the consecryphacium, or vestry of the church. Suicer thinks that in most of the writings the word *ripidium* signifies one of their holy vessels, a basin of the like, in which they used to carry the sacred elements to and from the altar. In the liturgies of Chrysostom and Basil it is taken in the common sense of Greek authors, and it is used in the *Constitutiones* for a fan to blow with: for in Chrysostom's liturgy the deacon is to ventilate, or blow over, the elements with a fan; or, if there be no fan, then, to do it with the bellows of the cup. See Bingham, *Christ. Antiq.*, viii, 6, 21; *Ex.,* 3, 6.

**Ripley, Ezra**, a Unitarian minister, was born at Woodstock, Conn., May 1, 1751. He followed farming until he was sixteen, when he began to study, and was admitted into Harvard College, July, 1772. After his graduation he taught in Plymouth, and studied theology under Rev. Jason Havin, of Dartmouth. He was ordain- ed pastor of the Church in Concord, Mass., Nov. 7, 1778. He was honored with the degree of D.D. in 1816. Dr. Ripley was an ardent advocate of the temperance cause, and was a member of the old Massachusetts Society for the Suppression of Intemperance. His death took place Sept. 16, 1841. His publications are *Manners and Charms* (1791-1829); History of the Concord Fight (1827). See Sprague, *Annals of the Amer. Pulpit*, viii, 112.

**Ripley, Henry Jones**, D.D., a distinguished Baptist divine and Biblical scholar, was born in Boston, Jan. 28, 1798. He entered Harvard University, a medical scholar from the Boston Latin School, at the early age of fourteen, and graduated with the class of 1816. He took the full course of theological study at Andover, where he graduated in 1819. He was ordained as an evangelist Nov. 7, 1819, and spent some time in Georgia, devoting himself especially to the religious welfare of the colored people in the section of the state where he labored. The length of his ministerial service at the South was seven years. One year during this period he spent in Eastport, Me. Soon after the founding of the Newton Theological Institution, Dr. Ripley was elected, in 1826, professor of Biblical literature and pastoral duties, which office he held until 1832, when the election of another officer allowed him to direct his whole attention to Biblical interpretation. In 1839 he was transferred to the chair of sacred rhetoric and pastoral duties, which position he occupied with ability for seventeen years. The last three years of his connection with the institution he was associate professor of Biblical literature. After a service of thirty-four years, he resigned his professorship. After his resignation he occupied some five years in literary work, and for a time was engaged in evangelical labors among the freedmen of Georgia. Returning to the institution at Newton, he accepted an appointment as librarian, which position he held during the remainder of his life. He died at Newton Centre, Mass., Oct. 27, 1874. Prof. Ripley made frequent use of his pen during his life. He published quite a number of carefully prepared articles in the *American Baptist Magazine*, the *Christian Review*, and the *Bibliotheca Sacra*. He was also the author of the following works: *Memoir of Rev. Thomas S. Wilm.*—Christian Baptism, a sound exposition of the Baptist's mode of baptism;—Notes on the *Four Gospels*:—Notes on the Acts of the Apostles:—Notes on the Epistle to the Romans:—Notes on the Epistle to the Hebrews, with new translation.—Sacred Rhetoric, composition and delivery of sermons:—Exclusiveness of the Baptists, a review of Rev. A. Barnes's pamphlet on exclusivism.—Church Policy, a treatise on Christian churches and the Christian ministry. He prepared also an edition of *Campbell's Lectures on Systematic Theology*, and edited the *Karen Apostle* by Rev. Francis Mason. See Stearns, Hovey, and Clarke, *Funeral Addresses*. (J.C.S.)

**Ripley, Henizeliah**, D.D., a Congregational minister, was born at Windham, Conn., Feb. 8 (O.S.), 1743. He graduated at Yale College in 1763, and was ordained, Feb. 11, 1767, pastor at Green's Farms, where he labored until 1773. He was a member of Yale College Corporation in 1790, and remained such for twenty-seven years. See *Sprague, Annals of the Amer. Pulpit*, i, 647.

**Ripley, John Bingham**, a Presbyterian minister, was born in Ellsworth township, Mahoning Co., O., April 18, 1824. He was converted when eighteen years of age; graduated at Jefferson College, Pa., in 1846, and entered Theological Seminary at Princeton, N. J., in 1847. His labors in the ministry began at Bridgeton, N. J., where he was invited to settle, but did not do so. He subsequently accepted an agency from the American and Foreign Christian Union, and labored in Ohio and Michigan. He was ordained and installed by the Philadelphia Presbytery as pastor of the Mariners' Church, Philadelphia, in 1853, and here he died, March 1862. This was a very interesting charge. The sailors were his friends, and nothing that he could do for them by the instrumentality of books, visits, letters of entreaty, and prayer was ever omitted. He sought the mariner at the tavern, the celler, the refectory, the boarding-house, the sailors' home, and on board of ship. Besides many articles in the religious press, he was the author of several works, viz.: *Thoughts for theforeground*—Seven Diamonds:—Plain Words for Young Men, besides several Tracts. See Wilson, *Presb. Hist. Almanac*, 1863, p. 200. (J.L.S.)

**Ripley, Lincoln**, a Congregational minister, was born at Woodstock, Conn., in 1761. Late in life he entered Dartmouth College, where he graduated in 1796. He soon after entered the ministry and settled at Waterford, Me., then a wilderness. His life was identified with the early history of the Church and town of Waterford. He severed his connection with that Church in 1821, and died July 14, 1846. See *Amer. Cong. Yearbook*, 1859, p. 128.

**Ripley, Samuel**, son of Ezra, was born in Concord, Mass., Nov. 11, 1783, and graduated from Cambridge in 1804. He was ordained, Nov. 22, 1809, pastor of the Church at Waltham. After the death of Rev. B. Whitman, it was proposed to unite the two Unitarian societies; but Mr. Ripley, thinking it too great a burden, resigned shortly before (Oct. 27, 1841), and soon after took the pastoral charge of the Unitarian Church in Lincoln. In 1846 he removed to Concord, where he died, Nov. 24, 1847. See *Sprague, Annals of the Amer. Pulpit*, viii, 116.

**Ripley, Thomas B.**, a Baptist minister, and brother of Dr. H. J. Ripley, was born in Boston Nov. 20, 1795, and was a graduate of Brown University, in the class of 1814. He studied theology with the Rev. Dr. Staughton, of Philadelphia, and was ordained as pastor of the First Baptist Church in Portland, Me., July 24, 1816, where he remained till March, 1828. He removed to Bangor, Me., and was pastor of the First Baptist Church in that city from Sept. 10, 1829, until, in 1834, he resigned. After supplying two churches for a time, he removed to Tennessee, teaching and preaching in several places, and then settled in the midst of the Cane Ridge Conference; in 1842 engaged in service at Holly Springs, Miss. He returned to Portland, Me., in 1862, and acted as city missionary for several years. He died May 4, 1876. (J.C.S.)
Rippon, John, D.D., an English Baptist minister of distinction, was born in Tiverton, Devonshire, April 29, 1752, and was the son of a Baptist minister. He pursued his studies at Bristol, and for many years was the successor of the Rev. Dr. Gill in the pastorate of the Baptist Church on Grange Road, Southwark. The testimony of Dr. Rippon with regard to the stand taken by the Baptist ministers of London and vicinity in the War of the Revolution is interesting. "I believe," he remarks, in a letter to Pres. Manning, of Brown University, dated May 1, 1784, "all our Baptist ministers is town except two, and most of our brethren in the country, were on the side of the Americans in the late dispute. But sorry, very sorry, were we when we heard that the college was a hospital, and the meeting-houses were forsaken, and occupied for civil or martial purposes. We wept when the thirsty planks drank the blood of your departed heroes, and the shout of a king was among us when your well-fought battles were crowned with victory. And to this hour we believe that the independence of America will for a while secure the liberty of this country; but that if the continent had been reduced, Britain would not long have been free." Dr. Rippon died Dec. 17, 1836. (J. C. S.)

Ripundahaya, in Hindū mythology, was a mythical king, in whose reign great religious changes are said to have been brought about. It would seem that Buddhism took root, and under his protection spread throughout all India.

Risabhā, in Hindū mythology, was the oldest of the twenty-three Buddhas who have appeared in India, belonging to the race of king Ikawar. He is frequent in the Purāṇas, as an ox, often generally as a man with the head of an ox, or as a man with horns. The ox, as a symbol of wisdom, is peculiar to him, and always accompanies him, even when he is simply represented on the altar by a variously colored head.

Risco, Manuel, a learned Spanish ecclesiastic of the Augustinian Order, was born at Haro about 1790, and died about the close of the century. He acquired such reputation for knowledge in ecclesiastical history that he was appointed by the king, Charles III, to continue the history of which Flores published 29 vols., 4to. To these he added six volumes, written with equal ability and liberality of sentiment. The work was entitled Historia de España; see Chalmers, Dict. Dict. s. v.

Rishaba, in Hindū mythology, are ten sons of Brahma, who were infinitely wise and gentle, and remembered the gods, with whom they share the power to create men and gods. All things owe their existence immediately to these Rishis in common with the gods, and they are accordingly termed the ten ancestors, or lords, of all created beings. Their names are Daksha, Pusan, Agni, Vaishnava, Dhriti, Brigu, Narada, Pulagen, and Krtav. The seven Menus—Sugardhabha, Svaroshisha, Antamti, Tamasa, Raitaveta, Chakshusha, and Vaivassvata—are sometimes classed with the Rishis.

Rishikot, Edward, a Roman Catholic writer, was born in Lancashire, and died in 1586 at Louvain of the plague. He published Synopsis Rerum Ecclesiasticarum et A missus Christi 1657, and a Profession of Faith. He was the first publisher of Nicholas Sanders's De Origen et Progresso Schismatis Anglicanae (1685, 8vo), to which he added a third part; and a fourth part, by way of appendix, appeared in 1628. See Allibone, Dict. of Brit. and Amer. Authors, s. v.

Rising in the Air, the name of a belief (prevailing in the Middle Ages) that the bodies of holy persons are lifted up and conveyed in the air during the continuance of a religious ecstasy. Calmet states in his work on apparitions that this singular phenomenon might be produced by the fervor of the Holy Spirit, by the ministry of good angels, or by a miraculous favor of God, who desired thus to honor his servants in the eyes of men. Numerous instances are recorded in the Acta Sanctorum, and their relative accounts for the frequency with which representations of saints are exhibited in an aerial position in medieval paintings, etc. This belief falls in with one of the alleged phenomena of modern spiritism.

Risler, Jeremiah, a distinguished bishop and writer of the Moravian Church, was born at Mullhausen, in Upper Alsace, Nov. 9, 1720. He was a graduate of the University of Basel, and entered the ministry of the Reformed Church, laboring at Lübeck and St. Petersburg, from 1744 to 1760. In the latter year he joined the Moravian Church, and took charge of a parish at Neuwied, on the Rhine, where he remained for twenty-five years. In 1782 he was consecrated to the episcopacy, and in 1786 was elected to the executive board of the Unitas Fratrum, known as the Unity's Elders' Conference, of which body he continued a member until his death. His ministerial career embraced a period of sixty-six years, fifty of which he devoted to the Moravian Church. He was a zealous servant of Christ, an eloquent preacher, and a faithful overseer of the flock. He died at Berthelsdorf, Saxony, Aug. 28, 1811. The following are his principal works: A French Translation of Zinzendorf's Discourses, and a new edition of the French Hymnal of the Church (1785):—La Sainte Doctrine (1786), translated into German and English:—Historische Auszüge aus dem Leben des Bischöfes des Moravien (1787):—Leben von A. G. Spangenberg (1784):—Spangenberg's Reden an die Kinder, two collections (1792 and 1797):—Zinzendorf's Gedanken über verschiedene evangelische Wahrheiten (1800):—Betrachtungen der Weisheit Gottes im Krouesest oder Juen:—and three volumes of Erzählungen aus der Brüdergeschichte. (E. de S.)

Risley, Asahel Linns, a minister of the Methodist Episcopal Church, was born in Berlin, Connt., Ky., Feb. 14, 1804. He united with the Church Sept. 5, 1825, although he did not find peace until the 11th of the same month. He was licensed to preach July 27, 1827, and entered the itinerant ministry Sept. 16, 1827. He labored in the Kentucky, Rock River, and Southern Illinois Conference until 1866, when he took a supernumerary relation, and removed to Lebanon, where he remained until the time of his death, Aug. 24, 1874. See Minutes of Annual Conferences, 1874, p. 126.

Rissah (Heb. Rissah, rishah, a ruin; Sept. Ρισσα v. r. Ρησαν and Δεσσα), the twentieth station of the Hebrews in the desert (Num. xxxiii, 21, 22). It lies, as there given, between Libnah and Kelhelathah, and has been considered identical with Rissa in the Itinera. Rissa, thirty-two Roman miles from Allah (Elah), and 293 miles south of Jerusalem, distinct, however, from the Philistia of Josephus (Ant. xiv, 15, 2). See Exodus.

Risubgrad, in Norse mythology, was a pentagon known as Druiid's-foot or pentagram. It was a sacred symbol among the ancient Celts and Germans.

Riusus, in Roman mythology, i.e. laughter, is said to have been venerated as a deity by several tribes of Italy.

Rite (Lat. ritus) is, in general, an external sign or action employed in religious services, and designed either to express or to incite a corresponding inward religious feeling. Such are the incense used for insensible changes, or the sprinkling of the hands in prayer, the imposition of hands, etc. The name rite is sometimes used to signify the aggregate of all the ceremonies used in a particular religious office, as a “rite of baptism” or of the eucharist. In a still wider sense, it is used of the whole body of distinctive ceremonies, including the liturgy employed by a particular community of Christians. In this way we speak of the “Roman rite,” the “Greek rite,” or the “Slavonic rite.” See Ceremony.
Rites of Baptism. See Baptism, Ceremonies of.

Rites, Congregation of, the name of a committee of cardinals in the Roman Catholic Church, founded by pope Sixtus V. It was originally composed of six cardinals, with a number of secretaries and consultants. The regulations prescribed the number of those. In 1875 it comprised seventeen cardinals, twenty-five consultants, and eleven officials, including secretary, promoters of the faith, assessors, and masters of ceremonies. The matters of which it has cognizance are the liturgy, the rites of the administration of the sacraments, the rubrics of the revised breviary, the ceremonial of the Church in all public functions, and the proceedings in the beatification and canonization of saints. The congregation meets once a month at the residence of the prefect, who is always the senior cardinal of the board. See Apostolicae Caelestis. Cyclop. s. v.

Rith'tmah (Heb. Rith'mah, ריתמה, heath; Sept. Ῥαθμα, the seventeenth station of the Hebrews in the wilderness (Num. xxxiii. 18, 19). About half a day's journey south from Wady Kiseima (see Acoxos) is found a valley called Wady Rithmath, or Wady Abu-Rematam. Rothem literally is a broom-bush; hence Rethem is the brush oak, and near this wady the broom-bushes are abundant. So Schwarz (Palest, p. 212), who identifies Rithmath with Kerdesha-Barn. It probably lay immediately west of that place. See EXODE.

Ritschl, Georg Karl Benjamin, an eminent minister of the evangelical Church of Prussia, was born Nov. 1, 1785, at Erfurt. He studied theology at Erfurt and Jena, was licensed to preach in 1802, and came to Berlin in 1804, serving first as a private tutor, next as an adjunct professor in a gymnasion, and finally as a preacher in St. Mary's Church. Eighteen years were given to the duties of that station, during which he approved himself both as a pulpit speaker and an instructor of the young. In 1816, Ritschl was made a member of the consistory having supervision over Brandenburg, and distinguished himself in the conduct of the examination of candidates for the ministry to a degree that secured for him the title of doctor of divinity. He also aided in the preparation of the Berliner Gesamtbuch of 1829, a task for which he was qualified by his musical talent and by his acquaintance with musical culture. In August, 1827, Ritschl was appointed bishop of the evangelical church and general superintendent of Pomerania, etc., and in the spring of the following year he entered on the duties of his high station. The plan of union in the Prussian evangelical church was successfully introduced during his administration, and the visitations devolved on the superintendency were so efficiently performed that he sustained direct and personal relations with the entire clergy of the province, and was acquainted with the character of each individual in its membership. Having reached the age of seventy-five years, and having completed a public career of half a century, Ritschl resigned his position in 1854. He was, however, constituted an honorary member of the Supreme Ecclesiastical Council of Prussia, and thus induced to give his thought and labor to the Church down to the close of his life. He died June 18, 1858. See Herzog, Real-Encyklop. s. v.

Rittangelus, or Rithangel, John Stephen, a German writer of the 17th century, was a native of Forchheim, in the bishopric of Bamberg, and is said by some writers to have been born a Jew; but others assert that he was first a Roman Catholic, then a Jew, and lastly a Lutheran. This, however, is certain—that he published several books containing Judicial learning, was professor of Oriental languages in the Academy of Königsberg, and died about 1662. His works are, Commentary on Jeremiah (2 vols., 1642, 4to) De Veritate Religiosae Christianae (Franeker, 1699) Libra Veritatis (1698); Letters; German Translation of Prayers used by Jews in their Synagogues, etc. Rittangelus maintained this paradox, that the New Testament contains nothing but what was taken from the Jewish antiquities. See Gesner, Dict. s. v.

Ritter, Erasmus, a Bavarian, the Reformer of the Schaffhausen, lived in the middle of the 16th century. He was at first opposed to the Reformation, and being possessed of oratorical talents, was invited to Schaffhausen in 1522 to confront Seb. Hofmeister (q. v.); but being led to study the Scriptures in the progress of his work, he was converted, and at once entered on the work of strengthening the evangelical cause. He displayed great prudence and moderation, but nevertheless his Zwinglian principles involved him in angry disputes with Burghauer (1528 sq.), the successor of Hofmeister, in consequence of which it was found advisable to dismiss both the controversialists. Ritter went to Berne, where new troubles awaited him. The condition of his later life is not known. He married in 1529 the sister of the abbots of All-Saints in Schaffhausen, and was long in steady correspondence with Zwingli. See Herzog, Real-Encyklop. s. v.

Ritter, Joseph Ignaz, a Roman Catholic divine, was born at Schweiniz, in Silesia, April 12, 1785. In 1811 he became pastor at Neresheim near Baden; in 1818 at Grottkau; in 1818 at Berlin; and from thence he was called, in 1823, as ordinary professor of theology to Bonn. In 1830 he was created doctor of divinity and appointed professor of theology and member of the chapter at Breslau, and advanced in 1846 as cathedral dean, which office he occupied till his death, Jan. 9, 1857. He wrote, Manual of Church History (5th ed. Bonn, 1854, 2 vols.):—Irenikon, or Letters for Promoting Peace and Concord between Church and State (Leips. 1840):—History of the Breslau Diocese (Breslau, 1846);—Popular Lectures on the History of the Church in the First Ten Centuries (Paderborn, 1849);—On the Several Stiith (Breslau, 1856);—Zuchte, etc., Zuchte, etc., Bibliotheca Theologica, ii, 1073; Winer, Handbuch der theolog. Literatur, i, 548, 586, 598, 607, 887; ii, 736; Supplement, p. 156, 296; Niedner, Kirchengeschichte, p. 864. (B. F.)

Ritter, Karl, an eminent German geographer, was born Aug. 7, 1779, in Quedlinburg, Prussia. He studied at Halle, and after travelling in Switzerland, France, and Italy, was appointed professor extraordinary of geography at the University of Berlin in 1820. He was also director of studies of the military school. Ritter was the founder of general comparative geography, and exercised a decisive influence on its study, remodelling the whole science, and attracting general attention to its practical uses. He died at Breslau, Sept. 25, 1859. His chief works are, Die Erdkunde im Verhältnisse zur Natur und Geschichte des Menschen (Berlin, 1822-54, 17 vols. [19 pts.]):—Europa, ein geographisch-historisch-statistisches Ge念ahle (Frankfort, 1807, 2 vols.):—Die Stupas, oder die architekton. Monumente, etc. (Berlin, 1808):—Die Kolonisation von Neuzeland (ibid., 1842):—Blick auf das Nilgebiet (ibid., 1844):—Der Jordan und die Beschichtung des Tiden Meeres (ibid., 1850):—Ein Blick auf Palastina und die christliche Bevolkerung (ibid., 1852). Parts of his works have been translated into English by Gage: Comparative Geography (Edinb., 1865), and The Comparative Geography of the Palestine and the Sinaitic Peninsula (ibid., 1866, 4 vols.). See Gage, Life of Karl Ritter, in the For. Qu. Rev. Oct., 1837; Hoefer, Nouv. Biog. Générale, s. v.

Ritu, the seasons of the Hindū, which are six in number—two summers, two springs, and two winters. Their names are Sīsa; the season of dew; Himant, of cold; Vāman, of bloom; Grisna, of heat; Varas, of rain; and Sarva, of day.

Ritual (from ritus, a ceremony) has been defined as "the external body of words and action by which worship is expressed and exhibited before God and man." also "the book containing the particular ordinances of
any single Church." The necessity of ritual, whether of a more or less elaborate kind, may be supported (1) on historical grounds. Its traces may be found in all ages; and every form of religion, true or false—Christi-
nany, Mohammedanism, Buddhism, and the different forms of idolatry—has at one time or another been ritualistic. (2) on internal grounds. From the twofold constitution of man as body and spirit. As long as the body is an essential element of man, so long, it is urged, will ritual be a necessary feature in his worship. Objection is made that the Jewish system of external observances, and the ceremonies of the early Christians, compiled the Sanhedrin, a book of the kind, which was abol-
ished by our Lord when he said, "God is a Spirit, and they that worship him must worship him in spirit and in truth" (John iv. 24); and that all attempts to re-
introduce a system of ritual are a violation of the genius and intention of the Founder of Christianity. This was the basis of the teaching of George Fox (A.D. 1647). But it appears, from Christ's own conduct in the insti-
tution of baptism and the Lord's supper, and those re-
corded acts of worship (Luke xviii. 13; xxi. 2, 8, xxi. 4) which secured his sanction or approval, that the real object of his animadversion was a permanent external worship from which the heart and affections were ab-
sent. In the Christian Church the ritual has impelled the historic truths of religion. By the various festivals (e.g. Easter, Whit-Sunday) of the Church and their attendant ceremonies, Christians have their at-
tention drawn to the divine origin of their religion. (2) A constant witness to moral and doctrinal truth. Thus baptism shows the corruption of human nature and the necessity of purity, and is a symbol of the in-
ward "washing of regeneration." Mosheim (Eccles. Hist. [Amcr. ed.] i. 84) states that Christ only "estab-
lished two rites, which it is not lawful either to change or abrogate, viz. baptism and the Lord's supper," and infers from this that "ceremonies are not essential to the religion of Christ, and that the whole business of them is left by him to the discretion and free choice of Christians." In the 2d century ceremonies were much increased, for which Mosheim (i, 132) assigns the follow-
ing reasons: (1) To conciliate the Jews and pagans; (2) to rebut the charge of atheism made against the Christians, because they had not the external parapher-
nalia of religion; (3) imitation of language in the New Test., such as terms borrowed from the Jewish laws. The bishops were first innocently called high-priests, the presbyters priests, etc. These titles were abused by those to whom they were given, who claimed that they had the same rank and dignity, and possessed the same rights and powers, with those who were under the Jewish dispensation. Hence the splendid garments, and many other things. (4) Among the Greeks and other people of the East nothing was considered more sacred than the Mysteries. This circumstance led the Christians, in order to impart dignity to their religion, to claim similar mysteries. Without discussing the gen-
eral subject further, we present the rituals of the vari-
ous prominent Christian churches.

1. Church of Rome.—The ceremonial of the offices of the Roman Church administered by bishops is contained in the books entitled Pontificale and Ceremoniale Episcoporum. The priestly offices are detailed in the Ritual. In its present form it dates from the pontificate of Urban VIII, which directed a revision of all the different rituals then extant. An authoritative edition was published by Paul V in 1614, which has been frequently revised, and of which a revision was issued by Benedict XIV. Besides the Roman Ritual, there are many diocesan rituals, those of which are more the present. The most approved commentary on the Roman Ritual is that of Barufaldio (Florence, 1847, 2 vols.). See Breviary; Missal; Ritualia Romanae.

2. English Church.—Originally each bishop had the power to form his own liturgy, and to regulate its at-
tendent ritual, provided that the essential features of Christian worship were retained, and that nothing com-
mended in Scripture or derived from apostolic times was omitted. St. Basil (A.D. 329-379) composed a lit-
urgy for the Church of Cæsarea, which received the sanction of its bishop, Eusebius (Greg. Naz. Orat. 20). As a consequence, great variety existed, with a tendency for the number of rubrics to increase. This early but unsuccessful attempt was made to introduce a uniformity of worship throughout England. The Council of Cloveshoe (A.D. 747) recom-
manded the adoption of the Roman liturgy to all the English dioceses, but its recommendation was never more than partially carried out. In 1066 St. Osmund was made the Saxon Archbishop of Canterbury, which ob-
tained a wide circulation, but were never universally accepted to the exclusion of those previously existing. It was, in a great measure, to remedy the inconveniences resulting from this variety that the First Book of Common Prayer, compiled by a committee of Convo-
cation (first appointed in A.D. 1542), was drawn up in the second year of King Edward VI (A.D. 1549). This book, after receiving various additions and alterations in A.D. 1552, 1560, 1604, and 1662, is still the guide of the English Church in all matters connected with the per-
formance of divine service and ritual. See Common

Prayer, Book of.

3. Greek Church.—The Ritual (1) of the Greek Church, as in the other Eastern communions, the ritual forms part of the general collection (which contains also the eucharistic service) entitled Euchologion (q.v.).

4. The Methodist Churches. The ritual of these churches embraces directions for public worship, for the administration of baptism and the Lord's supper, for solemnizing marriage, burial of the dead, reception of members, laying corner-stones, dedication of churches, consecration of bishops, and ordination of deacons and elders. The chief part of this ritual was prepared by Mr. Wesley, and was adopted by the General Confer-
ence of 1784. Methodists do not believe that any pre-
vious form of ritual is essential to the Church, and the practice is now so flexible that the service may be adapted to the wishes of the congregation. Ritual may be arranged in various forms, from the simplest to the most elaborate. Ritual is sometimes included in books of the Bible, or in the form of a prayer book, or in separate books. Ritual is also found in the books of the Church of England, and in the Ritual book of the Church of Rome. Ritual is also found in the books of the Church of England, and in the Ritual book of the Church of Rome. Ritual is also found in the books of the Church of England, and in the Ritual book of the Church of Rome.

Ritual Choir. The part of the choir usually used for the service, and distinguished from the choir or structural choir. See Choir, Sac. Arch. (q.v.)

Ritualia Romanæ. Various rituals (ordini Romanæ) have been issued from time to time in behalf of the worship of the Roman Catholic Church (see Romanæ Rituæ); but the later popes, since the Council of Trent (comp. sess. xxv. De Indico Libr. 4. De Indico Libr.) were con-
tained to promote ecclesiastical unity by introducing a common ritual. Pius V accordingly published the Breviary and the Missale Romanum, and Clement VIII the Pontificale and Ceremoniale (see the re-

spective articles); and Paul V followed their exam-
ple by causing certain cardinals to compile a new ritual, which is now contained in several of the older rituals, especially that of cardinal Julius Antonius (Stenato Severino), which was issued under the title Ritualis Rituæ Romanæ, June 16, 1614, and has since then been made obligatory. It contains the Rubrics to be observed in the Mass, Sacramentals, processions, forms for use in the Church, etc. Other service-books gradually gave way before it in the general use of the Church, though special books were still prepared, particular-

Ritualism, a term popularly applied to a move-
ment in the Church of England, and in the Protestant Episcopal Church. The revival of ecclesiastical learn-
ing, which was so conspicuous a feature of the Tracta-
rian (q.v.) movement, necessarily made the clergy bet-
ter acquainted with the primitive liturgies, and with the ancient service-books of the Church of England. This study of ecclesiastical, as the science came to be
called, was soon brought to bear upon the restoration of old churches and the construction of new ones, as well as upon the service of the Church. There was also the feeling that prayer, praise, and the holy eucharist are offered to God, as well as used for the spiritual advantage of man. Under such circumstances, and under such influences, that "Ritualism" took its rise.

The principles of Ritualism, according to its advocates, are three. They say, in the first place, that it rests on the declaration of the Convocation of Canterbury (1571), "that preachers should, in the first place, be careful never to depart from the things which have been delivered to the holy church of England by any human creature, and to receive other ordinances from the church of Rome." The second great principle of the Ritualist is stated in the thirtieth canon: "So far was it from the purpose of the Church of England to forsake and reject the churches of Italy, France, Spain, and Germany, or any such-like churches, in all things which they held and practiced, that as the dignity of the Church of England confesseth, it doth with reverence retain those ceremonies which do neither endanger the Church of God nor offend the minds of sober men." This principle, it is alleged, establishes the fraternal readiness of the Church of England for visible union with other branches of the apostolic Church, and the Ritualists assert a willingness to approve of anything that approacheth or moveth toward the Continental Church. The third principle is found in the Ornamentals Rubric: "The chancellors shall remain as they have done in times past...that such ornaments of the church and of the ministers thereof, at all times of their ministration, shall be retained and be in use as they were in this Church of England, by the authority of Parliament, in the second year of the reign of King Edward VI." This was interpreted to mean that the chancels, vestments, ornaments of the church and ministers, should be the same as before the Reformation. This principle was fully developed at several churches in London, Oxford, Leeds, and elsewhere. In many of the above-mentioned principles, there are six chief points insisted upon by the Ritualists: 1. the eastward position of the celebrant in the sacrament of the holy communion, with his back to the people; 2. the eucharistic vestments; 3. lights, burning at the time of celebration; 4. incense; 5. the mixed chalice, with the water being mixed with the wine; 6. unleavened (or wafer) bread. The Directorium Anglicanum, being a manual of directions for the right celebration of a holy communion, for the saying of matins and evensong, and for the performance of other rites and ceremonies of the Church, according to ancient usage, was published by the Rev. John Purchas, was published in 1656. A full development of ritualistic usages on the principle thus indicated was established at St. Alban's Church, Holborn, and at a later date at a Brighton chapel, of which Mr. Purchas became incumbent. The ceremonial of divine service was raised to a much higher standard than had been common at the school of the old rites, and provoked opposition from them, for it was chiefly copied from modern Continental customs, and was much mixed up with a sentimentalism about candles and flowers, as well as with an excessive minuteness in regard to postures and gestures, which made it easy to charge the school with trifling and want of manliness.

There have been a number of legal cases arising out of the teaching and practices of the Ritualists. The Church of Barnabas, Pimlico, was opened in 1850 for the purpose of carrying out completely and honestly the principles of Ritualism. This led to litigation, which ultimately brought both advocates and opponents before the Privy Council, and under such circumstances, and under such influences, that "Ritualism" took its rise. 

RIVER. In the sense in which we employ the word,
RIVER

viz. for a perennial stream of considerable size, a river is a much rarer object in the East than in the West. See WAR. The majority of the inhabitants of Palestine at the present day have probably never seen one. With the exception of the Jordan and the Litany, the smaller streams are not used for water supply and commerce. They are either temporary, or are dry for a large part of the year, and are not easily navigable by large vessels. The larger streams are subject to sudden changes in their course and level, and are often beset with dangers. The most famous of these streams is the river Nile, which flows through Egypt and the neighboring countries. See NILE.

“River” is the rendering in the A. V. of seven distinct Hebrew words. These are not synonyms. Most of them have definite significations, and were used by the sacred writers to set forth certain physical peculiarities. When these are overlooked, the full force of the word is lost. The Hebrew word for “river” is יְבֶל (yovel), used only in three passages of Daniel (xii, 2, 3, 6). “I was by the river of Ulai.”

It comes from the root יֶבֶל (yebel), which, like the corresponding Arabic, signifies to flow copiously. Its derivative, יֶבֶלָה (yebelah), is the Hebrew term for deluge.

2. פֶּנֶם, aphrik, from פֹּנֶם, to hold or restrain. It thus comes to signify a “channel,” from the fact of its being “holding” or “restraining” within its banks a river. It is said in 2 Sam. xxii, 16, “The channels of the sea appeared, the foundations of the world were discovered” (comp. Ps. xliii, 15). The psalmist gives it very appropriately to the gale of the Negeb (south), which are dry during a great part of the year: “Turn again our captivity, O Lord, as the channels in the Negeb.”

The beauty of this passage is marred by the present translation, “streams in the south” (Ps. cxxxvi, 4). The word is rightly translated “channels” in Isa. viii, 7. It ought to be rendered in the same way in Ezek. xxxii, 6: “And the channels (rivers) shall be full of thee.” But the most striking example of a wrong rendering is in Joel iii, 18: “And all the rivers of Judah shall flow with waters.” See AHER.

3. יִבְּאר (yibar), yeor, is an Egyptian word, which is applied originally, and almost exclusively, to the river Nile, and, in the plural, to the canals by which the Nile water was distributed throughout Egypt, or to streams having a connection with that country. It properly denotes a fosa or ríver (it was expressed by tero in the dialect of Memphis, and by soro in that of Thebes, while it appears as sor in the Rosetta inscription). It was introduced into the Hebrew language by Moses, and is used more frequently in the Pentateuch than in all the rest of the Bible. As employed by him it has the definite force of “a river” or “large and mighty river, not like the rivulets or winter torrents of Palestine. Thus in Isa. xxxii, 10: “Pass through the land as a river, O daughter of Tarshish” (comp. xxxiii, 21). The usual rendering of this word in the A. V. is “river; but it is translated “streams” in Isa. xxxiii, 21: “Flood” in Jer. xlv, 7; 8: Amos viii, 8, etc.; and “brooks” in Isa. xix, 6, 7, 8, where reference is manifestly made to the “canales” which convey the water of the Nile to different parts of Egypt. See NILE.

4. בְּנָר, gabal, is found only in Jer. viii, 8: “He shall be as a tree . . . that spreadeth out her roots by the river.” The word is radically identical with בְּנָר (benar) (No. 1), and its meaning is the same.

5. נָזַר, nazar, from the root נָזָר (nazar), which signifies to flow; and it may be regarded as the proper Hebrew equivalent for our word river. The cognate Arabic word is the same, and in Arabic also, as in Hebrew, it includes canals, as the “Nakharan” of Kuzistan; and the Scripture must mean the Euphrates and its canals, where it speaks of “the rivers (nakaroth) of Babylon” (Pss. cxxvii, 1). It is always applied to a perennial stream. It is possibly used in the Jordan of Pss. lxvi, 6; lxvii, 15; of the great Mesopotamian and Egyptian rivers generally in Gen. ii, 10; Exod. vii, 19; 2 Kings xvii, 6; Ezek. iii, 15, etc. It is often followed by the genitives of countries, as “the river of Egypt” (Gen. xv, 18), that is, the Nile; “the river of Gozan” (2 Kings xvii, 6); “the rivers of Ethiopia” (Isa. xlviii, 1); “the rivers of Damascus” (2 Kings v, 12). With the article, נָזַר, han-nazar, the word is applied emphatically to the Euphrates; thus in Gen. xxxi, 21, “He rose up, and passed over the river;” and Exod. xxiii, 31, “I will set thy bounds . . . from the desert unto the river.”

In a few passages the word is translated in the A. V. as “stream” (xxvi, 2; Job xiv, 11; Pss. lxvi, 6); but with a few exceptions (Josh. iv, 4; xxiv, 2, 14, 15; Isa. lix, 19; Ezek. xxxiii, 15), nazar is uniformly rendered “river” in our version, and accurately, since it is never applied to the fleeting fugitive torrents of Palestine. See TOPOGRAPHICAL TERMS.

6. בֵּן, benakal, is derived from the root בֵּן (ben), which signifies to receive or to possess. Its usual meaning is a valley, probably from the fact of its receiving the surface-water after rains, and affording a bed for a stream. Sometimes it is applied to a valley or glen, apart altogether from the idea of a stream. Thus in Gen. xxxvi, 17, Abraham “pitched his tent in the valley of Gerar.” As many of the valleys of Palestine were the beds of winter streams, the word was sometimes applied to the stream itself, as in Lev. xi, 9, 10: “the river, the brook,” and the river” Zered (Num. xxii, 12; Deut. ii, 13; Amos vi, 14); the “brook” and the “river” of Jabbok (Gen. xxxii, 23; Deut. ii, 37). From Kishon (Judg. iv, 7; 1 Kings xvii, 40). Comp. also Deut. iii, 16, etc.

Jerome, in his Quastiones in Genesis, xxvi, 19, draws the distinction between a valley and a torrent: “Et hic pro vallo torrentes scriptus est, nunciam enim in valle inventur pateas aquae vivae.” Sometimes, however, the rendering is incorrect, and conveys a very wrong impression. In Num. xxiii, 23 “the brook Eschel” should manifestly be “the valley of Eschel” and in Deut. xiii, 16 the same word is rendered in two ways—unto the river Arnon half the valley” (comp. Josh. xii, 2). Again, in Josh. xii, 8 the sacred writer is represented as speaking of “a city that is in the midst of the river;” it means, of course, valley (comp. 2 Sam. xxiv, 5). Frequent mention is made of the “brook Kidron” (2 Kings xxii, 2, 6, 12; 2 Chron. xxv, 16; xxxiii, 14; Jer. xvii, 18). In Pss. Ixxxv, 20 the following is the: “He smote the rock, that the waters gushed out, and the streams overflowed.”

Neither of these words expresses the thing intended; but the term “brook” is peculiarly unhappy, since the pastoral idea which it conveys is quite at variance with
the general character of the wadyis of Palestine. Many of these are deep abrupt chasms or rents in the solid rock of the hills, and have a savage, gloomy aspect, far removed from that of an ordinary brook. For example, the Arnon forces its way through a ravine several hundred feet deep and about two miles wide across the top. The Wady Zebras, probably the Jablak, which Jacob was so anxious to interpose between his family and Esau, is equally unlike the quiet "meadowy brook" with which we are familiar. And those which are not so abrupt and savage are in their width, their irregularity, their forlorn and look when the torrent has subsided. "Brooks," as is "bourn," is now obsolete in English, though still in use in Scotland, where, owing to the mountainous nature of the country, the "burns" partake of the nature of the wadyis of Palestine in the irregularity of their flow. Burton (Geog. Journ., xxiv, 209) adopts the Italian *fiumana*. Others have proposed the Indian term *val- lan*, which is the equivalent of *wady*. It is evident in 1 Kings xvi, 3, where Elijah is commanded to hide himself in (not by) the *nakhel* Cheriah, and to drink of the *nakhel*. This word is also translated "broad" in 2 Sam. xxii, 5; Job xxviii, 4, etc. See Book

The frequent use of the word *nakhel* in Scripture, and the clear distinction drawn between it and *nahar* by the sacred writers, are indicative of the physical character of Palestine—"a land of hills and valleys"; a land in which nearly all the valleys are dry in summer, and the beds of torrents during the winter rains. The Arabic word *wady* is the modern equivalent of the Hebrew *nakhel*. It means a valley, glen, or ravine of any kind, whether the bed of a perennial stream or of a winter torrent, or permanently dry. Like its Hebrew equivalent, it is also sometimes applied to the river or stream which flows in the valley; but not so commonly as *nakhel*. In reading the Hebrew Scriptures the context alone enables us to decide the meaning attached by the writer in each passage to the word *nakhel*. In a few instances it appears to be used in two senses in the very same sentence (comp. 1 Kings xvii, 3-7, etc.). See a picturesque allusion to such brooks in Job vi, 15. When the word stands alone it seems to denote a mere winter torrent, a permanent stream being indicated by the addition of the word יָם, "perennial," as in Psal. lxxiv, 16; Deut. xxxi, 4; Amos v, 24. See Valley.

A few brooks are specially designated (in addition to the above, as the Brook of Willows (Isa. xv, 7), a stream on the east of the Dead Sea, probably the present Wady el-Ahaby, which descends from the eastern mountains and enters the eastern end of the Dead Sea: the Besor (the cold), a torrent emptying itself into the Mediterranean near Gaza (1 Sam. xxx, 9, 10, 21); and the Kanah, a stream on the borders of Ephraim and Manasseh (Josh. xvi, 18; xvii, 9). "The brook of Egypt" mentioned in 1 Kings iv, 47; 1 Kings v, 65; 2 Kings xxiv, 7; Isa. xxvii, 19, which is also called simply the "brook" (Ezek. xxlvii, 19; xxviii, 28), and described as on the confines of Palestine and Egypt, is unquestionably the Wady el-Arish, near the village of that name, which was ancienly called Rhinocorua. The "river (geer) of Egypt," however, is that of which the errors are not so well distinguished in the A.V. as in the original. Other examples are the valley of Gerar (Gen. xxvi, 17) and the valley of Sorek (Judg. xvi, 4), so called probably from its vineyards, which Eusebius and Jerome place north of Elutheropolis and near to Zorah. The valley of Shittim ("acacia") was in Moab, on the borders of Palestine (Joel iv, 18; comp. Num. xxvi, 1; Josh. ii, 1; iii, 1; Mic. vi, 5). See each name in its place.

7. *Peleg,* pelyg. The root of this word appears to be the same as that of *philoh, philou, phéo, fluo, pluo,* and the English *flov*; its meaning is "to rush" or "to flow over." *Peleg* is equivalent to the Arabic *polg,* "a stream," and is always given to something flowing. Thus in Job xix, 6, "The rock poured me out rivers of oil," and Lam. iv, 20, "The eastern border was dumb toward the rivers of water." In the Bible it is used ten times, and is translated "rivers," except in Psal. xlii, 4, where it is rendered "stream," and in Judg. v, 15, 16, "divisions," where the allusion is probably to the artificial streams with which the pastoral and agricultural country of Reuben was watered (Ewald, Dict. i, 129; Gesen. Thesaur. coll. 1109); or perhaps to the meanders that intersect that high table-land. See Moab.

8. What is commonly rendered "conduit" (2 Kings xviii, 17; xx, 20; Isa. viii, 3; xxxvi, 2), once a "water-course" (Job xxviii, 25), in one verse transformed into "little rivers," but with "conduita" on the margin (Ezek. xxxi, 4). The word is מַעַר, *maar,* and means simply a channel or conduit for the conveying of rain or water of any sort. See CONDUIT.

RIVER OF EGYPT. This term occurs eight times in the Old Test. (Gen. xv, 18; Num. xxxvi, 5; 1 Kings xxvii, 4, 47; 1 Kings vili, 65; 2 Kings xxiv, 7; Isa. xxvii, 12, in the last passage translated "the stream of Egypt"). In the first of these the word translated "river" is יָם, "nahar," while in all the others it is יָם, *nakhel.* The preceding remarks on these two terms and the clear distinction drawn between them by the sacred writers, will show that in the above passages they can scarcely be regarded as identical in meaning, and that in all probability *Nehar Mitzraim* is to be regarded as distinct from *Nakhel Mitzraim.* To determine this point, it will be necessary to examine critically the several passages in which the words occur, and the light that may be thrown upon them by parallels. Geographically, the question is of importance, as determining the southern border of "the land of promise" and of "the land of possession.

1. *Nehar Mitzraim* (נֵהֶר מִצְרָיִם, *The river of Egypt*). The land which the Lord gave in covenant promise to Abraham is thus described in Gen. xv, 18: "Unto the land which I will give this land, from the river of Egypt unto the great river, the river Euphrates." The Sept. renders the phrase, ἀνὰ τὸν ποταμόν Ἀιγύπτου: and the Vulg. a fluvio *Aegypti.* The word יָם, as has been stated, like ποταμὸς and *fluvius,* means river. But the Nile is the only river of Egypt, and hence it is natural to conclude that the Nile is meant, and here—-as the western border of the promised land, of which the eastern border was the Euphrates—the Pehi- siaic or easternmost branch. So it is understood by most commentators (Kalisch, Delitzsch, etc., ad loc.). It is true the extent of territory thus defined was never actually occupied by the seed of Abraham; nor was it possessed except, perhaps, during the reigns of David and Solomon. See Palestine. See Palestine.
RIVER

2. Nāchāl Mizrayim (נחל מִצְרָיִם) occurs seven times in the Bible. In six of these the A.V. translates "river," and in one "stream" (Isa. xxvii, 12). The Sept.
has ἤλωματος in Numb. xxxviii, 4; Josh. xiv, 7; 2 Kings xxiv, 7; 2 Chron. viii, 7; and 2 Chron. vii, 4:
referred to in 1 Kings vii, 65; 2 Chron. xxv, 7; Psalm cvv, in Josh. xi, 9; 2 Kings v, 22; and 2 Kings xvii, 4:
referred to in 1 Kings vii, 65; 2 Chron. xxv, 7; Psalm cvv, 22.
The proper meaning of nāchāl is a "valley," though it is sometimes, as has been stated (see above), applied to the winter
streams of Palestine. It could not with any propriety
be applied to a large permanent river like the Nile.

What, then, are the sacred writers mean by Nāchāl Mizrayim?

In describing to Moses the land of Canaan, which the
Israelites were about to enter and possess, the Lord
stated that the southern boundary should extend from
Kadesh-Barnum to "the river of Egypt," or more correc-
tly "the wady (valley) of Egypt." (Numb. xxxiv, 5).
After the conquest, the southern border of Judah ex-
tended to the same points (Josh. iv, 47). The coun-
try over which the Israelites had spread in the time of
Solomon was "from the entering-in of Hamath unto
the river of Egypt." (1 Kings viii, 65; 2 Chron. vii, 8).
In all these passages it will be observed that the
name is not descriptive of anything more than that given in
covenant-promise to Abraham, extending only on the north
as far as the entrance of Hamath. This has already
been explained in the article PALESTINE.

Two other passages in which the term is employed are
more difficult. In 2 Kings xxiv, the "river of Egypt"
is mentioned as the proper boundary of that
country; and it is said of the king of Babylon, that he
had taken "from the river of Egypt to the river Eu-
phrates all that pertained to the king of Egypt." The
expression nearly resembles that in Gen. xv, 18, where
the river Nile is meant (see above). A similar form is
used by Isaiah (xxvii, 12); and hence the Sept. has
rendered Nāchāl Mizrayim by Rhinocourva, which
was the name of a town now called el-Arish. If this
be correct, then Nāchāl Mizrayim must be identified
with Wady el-Arish, a valley and small wunter stream
which falls into the Mediterranean near this town.
This is the view adopted by most of the old commen-
tators (see in A. V. note). The Thesaur. p. 573; Roland, Palæst., p. 969, and authorities there cited).
Jerome states that Rhinocourva was situated on the borders of Palestine and Egypt, and that the "river (torres)
of Egypt" was near it (Comment, ad Jes. xix et xxvii et ad Amos cii).
Ancient geographers and historians describe Egypt as extending as far north as Rhius (Suidius, ed. inst., s. v.; Dict.
S. 6, 60; Strabo, xvi, p. 780; Ridel, p. 286). This
torrent, or valley, derived its notoriety from being the
boundary of two great countries; and hence in Ezek.
xxvi, 20 and xxvii, 28 it is called emphatically "the
valley" (A. V. "the river").

There is nothing, therefore, in any of the passages of
Scripture in which this term occurs, nor in the geo-
 graphical notices in other passages, nor is there any-
thing in the old geographers or historians tending to
identify Nāchāl Mizrayim with the Nile. This ap-
pears more clearly when the proper distinction is drawn
between the country given in covenant promise to Abra-
ham, and that which actually allotted to the Israelites (Bo-
chart, Opera, i, 62).

It may be inferred that the first term, Nakhar Miz-
rayim, ought to be translated "the river of Egypt," and
that it was the designation of the Nile in Abra-
ham's time, before the Egyptian word geδρ became
known. The other term, Nāchāl Mizrayim, might be
rendered "the wady of Egypt." It was applied
to Wady el-Arish, which acquired its importance and
notoriety from the fact of its marking the bound-
ary between Palestine and Egypt. See EGYPT.

River Brethren, a sect deriving their origin from

the Monommites. A revival of religion occurred during
the Revolutionary war in Lancaster Co., Pa., and a
number of Germans being converted, some of them
associated with United Brethren, and others were organ-
ized into a body called the River Brethren. The name
is applied to them partly from the locality in which they
were first found, being in the vicinity of Conocoche,
and chiefly from their baptizing only in rivers. They
now extend into Ohio, Canada, and elsewhere.
They recognize three orders of clergy—bishops, elders,
and deacons. Their preachers generally uneducated
men, engaged in secular pursuits during the week,
and receiving no salary for services—are chosen by
their own societies, and in case of discipline they have recourse to the lot. Their services are generally in the German language, and held
in private houses. This denomination rejects infant bap-
tism, and baptize adults by trine immersion. They hold
to feet-washing, baptism, the Lord's supper, and com-
munion (love-feast), and wear their beards unshorn.
They have never published a confession of faith. They
are opposed to war, and cannot therefore serve in the
army. See Gardner, Faith of the World, s. v.; Porter,
Handbook of Religions, s. v.

Rivet, André, a celebrated French Protestant theo-
logian, was born at Saint-Maixent, Aug. 5, 1573.
He studied theology at the Academy of Orthez under Lam-
bert Daneau, and afterwards at La Rochelle under Ko-
tan. He was ordained in 1596, and three years after
was chaplain to the Duke of Turenne. After the death
of his patron he remained in Thouars, and his reputation
as a preacher and theologian steadily increased.
In 1620 he was called to the chair of theology in the Uni-
versity of Leyden. He married, in 1621, the sister of
the celebrated Pierre du Moulin, and while in England received the fellowship at Oxford. The Synod of Castres endeavored to persuade Rivet to return to France and
devote his talents to the work of building up the Pro-
teast Church in his native country, but nothing could
induce him to leave Holland. He received from prince
Frederick Henry a most distinguished mark of esteem,
being chosen tutor and adviser for the young prince
William. In 1692 he left Leyden to become director of
the College of Oranje, at Breda. Here he remained till
his death, which occurred Jan. 7, 1651. Rivet was a
firm Calvinist, and always ready to combat any of the
foes of orthodoxy. He left a great number of works, a
complete list of which may be found in La France Pro-
teestante. The most imposing is his Comment, in
Homiliae (Leyden, 1625, 4to)—Catholicus Orthodoxus,
etc. (ibid. 1630, 2 vols. 8vo)—Isogoe, seu Introductio
Generalis ad Scripturam Sacram (ibid. 1627, 4to)—
Theologico et Scholastico Exercitationes in Genesis
(ibid. 1633, 4to)—Commentarius in Librum Secundum
Mosis (ibid. 1634, 4to). The theological works of Rivet
have been published in three volumes (Opera Theologica
Générale, s. v.

Rivet (De la Grange), Antoine, a learned
French Benedictine, was born at Confolens in 1683.
He opposed the bull Unigenitus uttered by Clement
XI, for which he was punished by confinement in the
monastery at Confolens. His death occurred May 2, 1745.
He projected a great work entitled The Literary History of
France, of which he composed nine volumes (1753—50),
and which was continued by Clémencet and others.

Rivet (De Champverson), Guillaume, brother
of André, was born at Saint-Maixent, May 2, 1580.
He was ordained in 1601, and was pastor of the church
at Sallibourg. He was member of various synods, and
assisted at the political assembly at Concorde in 1651. Rivet was a man of great prudence; and
though his learning was not so extensive as that of his
brother, his mind was fully as clear and forcible.
Of his writings we mention, Libertatis Ecclesiasticæ De-
fensio (Geneva, 1625, 8vo)—De la Défense des Droits de
Dieu (Saumur, 1634, 8vo)—Vindicationis Evangelicae de
Riya, i.e., strife, in Roman mythology, is the same as the Greek Eris, the goddess of discord.

Rispah (Heb. Rispah), a live coal, as in Isa. vi, 6; Sept. ἐρισφαὶ τ. ἐρισφαί; Josephus, Ἐρισφαί (Ant. vii, 1, 4). A concubine of king Saul, and mother of two of his sons, Armoni and Mephibosheth. B.C. cir. 1080. Like many others of the prominent female characters of the Old Test.—Ruth, Rahab, Jezbel, etc.—Rispah would seem to have been a foreigner, a Hivite, descended from one of the ancient worthy of that nation. The name of Gileon, name and name of the Israelites are preserved in the Ishmaelish record of Gen. xxxvi. After the death of Saul and the occupation of the country west of the Jordan by the Philistines, Rispah accompanied the other inmates of the royal family to their new residence at Mahanaim, and it is here that her name is first introduced to us as the subject of an accusation levelled at Abner by Ishbosheth (2 Sam. iii, 7)—a piece of spite which led first to Abner's death through Joab's treachery, and ultimately to the murder of Ish- bosheth himself. The accusation, whether true or false—and from Abner's vehement denial we should naturally conclude that it was false—involved more than meets the reader at first glance. And English; for among the Israelites it was considered "as a step to the throne to have connection with the widow or the mistress of the deceased king" (see Michaelis, Laws of Moses, art. 54). We hear nothing more of Rispah till the tragic story which has made her one of the most familiar objects of young and old in the whole Bible (2 Sam. xxix, 8-11). Every one can appreciate the love and endurance with which the mother watched over the bodies of her two sons and her five relatives, to save them from an indignity peculiarly painful to the whole of the ancient world (see Ps. lxxvii, 2; Homer, Il. i, 4, 5, etc.). But it is questionable whether the ordinary conception of the scene is accurate. The seven victims were not, as the A. V. implies, "hung," they were crucified. The seven crosses were planted in the rock on the top of the sacred hill of Gibeah—the hill which, though not Saul's native place, was, through his long residence there, so identified with him as to retain his name to the latest time in the Jewish nation (1 Sam. xi, 4, etc., and see Josephus, War, v, 2, 1). The whole or part of this hill seems at the time of this occurrence to have been in some special manner dedicated to Jehovah, possibly the spot on which Ahab the priest had deposited the ark when he took refuge in Gibeah during the Philistine invasion (1 Kings xxvii, 18). The victims were sacrificed at the beginning of barley-harvest—the sacred and festal time of the Passover—and in the full blaze of the summer sun they hung till the fall of the periodical rain in October. During the whole of that time Rispah remained at the foot of the crosses on which the bodies of her sons were exposed—the mater dolorosa, if the expression may be allowed, of the ancient dispensation. She had no tent to shelter her from the scorching sun which beats on that open spot all day, or from the drenching dews at night, but she spread on the rocky floor the thick mourning garment of black sackcloth which as a widow she wore, and crouching there she waited, that neither vulgur nor jackal should molest the bodies.

Road occurs but once in the A. V. of the Bible, viz., in 1 Sam. xxvii, 10, where it is used in the sense of "raid" or "inroad," the Hebrew word (בַּלָּשׁ) being elsewhere (e.g. ver. 8; xxiii, 27; xxxi, 14, etc.) rendered "invade" and "invasion." A road in the sense which we now attach to the term is expressed in the A. V. by "way" and "path," for which the most general words in the original are מִדְרֶשׁ, מֹשֶׁה. In the East, where travelling is performed mostly on some beast of burden, certain tracks were at a very ear-ly period customarily pursued; and that the rather as from remote ages commerce and travelling went on by means of caravans, under a certain discipline, and affording mutual protection in their passage from city to city and from land to land. Now, wherever such a band of men and animals had once passed they would form a track, which, especially in countries where it is easier to follow than to miss his way, remained for centuries, as the same of caravans or individuals would naturally follow; and the rather inasmuch as the original route was not taken arbitrarily, but because it led to the first cities in each particular district of country. Thus at a very early period were there marked out on the surface of the globe, not by the efforts of man but by the needs of the earth and, in some sort binding distant nations together. These, in the earliest times, lay in the direction of east and west, that being the line on which the trade and the civilization of the earth first ran. The purposes of war seem, however, to have furnished the first inducement to the formation of made, or artificial, roads. War, we know, afforded to the Romans the motive under which they formed their roads; and doubtless they formed them not only to facilitate conquest but also to insure the holding of the lands they had subdued; and the remains of their roads show us what skill they laid out a country and formed lines of communication and defence.

From the nature of the soil in the Holy Land, the roads must have been sometimes mountainous and rocky, sometimes level and sandy. The former were the most difficult, and in the rainy season the torrents made them dangerous (Schulte, Leistung, v. 150). Yet they had a firmness which was important, since little was known of road-making in the East. (The ancient Indians [Vindica] must be excepted, according to the accounts of trustworthy historians; see Strabo, xv, 689, and the remains of ancient artificial roads which are still extant [see Von Bohlen, Indien, ii, 199 sq.]. The Persians may have learned the art from India). Deut. xix, 8 (comp. Mishna, Maccot, ii, 5) it seems that the minds of the Israelites were early familiarized with the idea, "Thou shalt prepare thee a way . . . every slayer may flee thither" and other passages, when taken in connection with it, seem to prove that to some extent artificial roads were known to the Hebrews. Indeed in the times of Isaiah (xxxiii, 8; xxxv, 8; xlix, 11: xlii, 10). In 1 Sam. vii, 12 we read: "The kine went along the highway, lowing as they went, and turned not aside to the right hand or to the left." In Numbers also (xx, 17): "We will go by the king's highway," etc. (xxii, 22; Deut. ii, 27; Lev. xxvi, 22). Indeed, it is highly probable that the Hebrews had become acquainted with these roads during their sojourn in Egypt, where, in the Delta especially, the nature of the country would require roads and highways to be thrown up and maintained. Josephus (Ant. viii, 7, 4) expressly says, "Solomon did not neglect the care of the ways, but he laid a causeway of black stone (burnt) along the highways, and little roads that led to the cities, and made them easy for travellers and to manifest the grandeur of his riches. (See the Mishna, Maccot). To the Romans, however, Palestine was greatly indebted for its roads. On this subject Roland (Palestina) has supplied useful information. In the East generally and in Palestine in particular, the result is the same—little roads and set up mile-stones in imitation of what they had done in Italy. Eusebius, in his Onomasticon, frequently alludes to their existence in Palestine. To the present day traces of these roads and fragments of the mile-stones remain.

1. The first road in Palestine which we mention ran
from Polemais, on the coast of the Mediterranean, to Damascus. This road remains to the present day. Beginning at Polemais (Acco), it ran eastward to Nazareth, and continuing south and east, passed the plain of Esdraelon on the north; after which, turning north and east, it came to Tiberias, where, running along the Sea of Galilee, it reached Capernaum, and, having passed the Jordan somewhat above the last place, it went over a spur of the Anti-Libanus ( Jebel Beihan) , and, keeping across the plain of Esdraelon, reached Seacon (Shongor). This road was used for the purposes both of trade and war. It was the history of the Crusades it bears the name of Via Maris. It connected Europe with the interior of Asia. Troops coming from Asia over the Ephrathites passed along this way into the heart of Palestine. Under the Romans it was a productive source of income. It was on this road, not far from Capernaum, that Jesus saw Matthew sitting "at the receipt of custom" and gave him his call to the apostleship. (See, in general, Ritter, Erdkunde, ii, 379 sq.)

2. Another road passed along the Mediterranean coast southward into Egypt. Beginning at Polemais, it ran first to Caesarea, thence to Diospolis and so through Ascalon and Gaza down into Egypt. (Comp. Josephus, War, iv, 11, 5; Ant. xiv, 8, 1; Pliny, vi, 33; Arrian, Asia, i, 1; see Appian, Cir. v, 2.) The stations are given as above, rather differently from Josephus, in Antonin. Itiner. p. 149.) This was also an important line of communication, passing as it did through cities of great importance, and was an important road leading to Egypt. A glance at the map will show how important it was for trade by land and by sea as well as for the passage of troops. A branch of this road connected the sea with the metropolis, leading from the same Caesarea through Diospolis to Jerusalem. Down this branch Paul was sent on his way to Rome. (Acts xxiii, 25-28.; comp. Josephus, War, iv, 8, 1; Jerome, Ep. 186.) The band went through Antipatris, and thence on to Caesarea.

3. A third line of road connected Galilee with Judea, passing through the intervening Samaria. (Luke xvii, 11; John iv, 4; Josephus, Ant. xx, 6, 1; Lightfoot, § 59.) The journey took three days. Passing along the plain of Esdraelon, the traveler entered Samaria at Ginea (Jenin) and thence conducted to Samaria (Sebaste), thence to Shechem (Nablus), whence a good day's travel brought him to Jerusalem. This last part of the journey (comp. Isa. x, 28 sq.) has been described by Manasseh Ben Israel in his Melech Yisrael in the time of the Romans there was also a road from Jerusalem to the lake Gennesaret through Shechem and Scythopolis. The same road sent a branch off at Scythopolis in a westerly direction through Esdraelon to Caesarea; and another branch across the Jordan to Gadara, on to Damascus, along which line of country there still lies a road, southward of the Sea of Galilee, to the same celebrated city (see Relland, Palæst. p. 416; ibid., Hieros. p. 585 sq.; also Antonin. Itiner. p. 198). This road was even traversed by armies (Josephus, Ant. xiv, 8, 4).

4. There were three chief roads running from Jerusalem. One passed in a north-easterly direction over the Mount of Olives, by Bethany, through openings in hills and winding ways on to Jericho. (Matt. xx, 29; xxii, 1; Luke x, 30 sq.; xix, 1, 38 sq.; comp. Ruseggaf, Reis, iii, 102 sq.), near which the Jordan was passed when travellers took their way to the north if they wished to pass through Samaria, which was the usual way for the Jews, in coming to and returning from the festivals in the capital, were accustomed to take, thus avoiding the unfriendly territory of Samaria; or travellers turned their faces towards the south if they intended to go towards the Dead Sea. This road was followed by the legions when they directed their steps towards Caesarea. The Syrian Peres of the Syrian and Assyrian armies made their hostile advances on Israel (2 Kings viii, 28; ix, 14; x, 32 sq.; 1 Chron. v, 26).

A second road led from Jerusalem southward to Hebron, between mountains, through pleasant valleys (Russegger, Reis, iii, 78), whence travellers went through to Alaba, where the idea of the remains of the Roman road still show; or they might take a westerly direction on to Gaza, a way which is still pursued and is of two days' duration (Crome, Palest., i, 97 sq.). The ordinary way from Jerusalem to Gaza appears, in the Roman period, to have lain through Eleutheropolis and through the desert to Ascalon. From Eleutheropolis the Ebusus of the early Christian Church was the nearest road down into Egypt from Jerusalem (Josephus, Ant. xiv, 14, 2). Along this road many thousand prisoners, made by Vespasian in his capture of Jerusalem, were sent to Alexandria in order to be shipped for Rome. Of these two roads from Jerusalem to Gaza one went westward by Ramlah and Ascalon, the other southward by Hebron. This last road (Russegger, p. 191; see also his Beiträge, published after Robinson's work on Palestine—namely, in 1840—correcting or confirming the views given in his Palætina, 1808) is of opinion was that which was taken by Philip (Acts viii, 28 sq.), partly because tradition states that the eunuch was baptized in the vicinity of Hebron, and this road from Jerusalem to Hebron runs through the "desert" Thekoa (Thequa) in the Onomasticon. And here he finds the reason of the angel's command to go "towards the south"—for Hebron lay south of Jerusalem—whereas but for this direction Philip might have gone westward by Ramlah. Robinson, admitting that "the road first leading to the south, which the eunuch maintained (i, 920; ii, 640) that Philip went by a third road, which led down Wady Musur to Betogbara (Eleutheropolis), and thinks that he has found at Tell el-Hasy the spot where the eunuch received baptism. But, says Baumeister (Beiträge, p. 41), this road ran in a south-western direction, and Philip was commanded to go towards the south, for which purpose he must have gone by Hebron. Baumeister then proceeds to confirm his original position. Jerome, in his Life of Paula, testifies that a road from Jerusalem to Gaza went through Hebron. Paula traveled from Jerusalem to Bethlehem, which lay south of the city: "When she reached Bethlehem, she quickened the pace of her horse and took the old road which leads to Gaza." This road conducted to Bethus (a little north of Hebron), "where," says Jerome, "while he read the Scriptures, the eunuch found the Gospel fountain. "This," adds Baumeister, "is the same Bethus of which Jerome, in the Onomasticon, says, 'As you ascend to Bethlehem, a mile-stone, Tell el-Hasy, which is a mile-stone, you meet Bethusor, near which, at the foot of a mountain, is a fountain bubbling out of the soil. The Acts of the Apostles state that the chamberlain of queen Candace was baptized in it by Philip.' From Bethus Paula proceeded to Hebron. The Itinerarium Hierosolymitanum (of the year 339) mentions Bethus or the place where the baptism was performed." Baumeister concludes by remarking: 'Robinson rightly rejects tradition when it contradicts the Sacred Scriptures, but he must also reject those pretended scientific theories which contradict Holy Writ. Such hypotheses may easily become the groundwork of scientific legends. To fix the place of baptism at Tell el-Hasy contradicts the Scripture; but Bethus, which has from the earliest ages been so accounted, agrees with the passage in the Acts of the Apostles.'

There only remains for us to mention what Winer reckons the third of the three great roads which ran from Jerusalem to Hebron. This third road was the one through Hebron; and the road from Jerusa-
ROAN

Roan, John, a Presbyterian minister, was born in Ireland in 1710 and was brought up in Ulster. He came to the United States in his youth, studied at the New College, and was licensed to preach by the "New Side" Presbytery of Newcastle. As early as 1741 he taught in a grammar-school on the Neshaminy, and in 1744 was sent by his presbytery on a missionary tour in Virginia. He inveighed so strongly against the clergy of the Established Church that charges were brought against him, before the grand jury, of proselytism and of blasphemy. Mr. Roan returned to Pennsylvania before the court met; but when the trial came on, Oct. 19, the indictment was dropped. In 1745 Mr. Roan settled over the united congregations of Paxton, Derry, and Mountjoy, and continued to labor among them until his death, Oct. 5, 1775. See Sprague, Annals of the Amer. Pulpit, iii, 129.

Roast. The oldest, and still the usual, form of dressing meat in the East is by roasting it (John, i, ii, 198 sq.); boiling is a process which marks some antecedent progress in civilization, and many nations are ignorant of it at the present day. The culinary preparations of the patriarchs were the most simple that could well be imagined, and various meats and wines were used as a temperance measure when the flesh was required, and the joints, after some part had been selected for sacrifice, were then roasted or broiled over the glowing embers of a wood-fire. Roasting is mentioned but casually in the Bible, and is called in Heb. tsalah, דַּאָד (1 Sam. ii, 15; Isa. xlv, 16). A roast is called taasi'ית, דִּאָס (Exod. xii, 8 sq.; Isa. loc. cit. Comp. Aristeus, Voyage, iii, 233). See COOK.

Rob. I. The following are the Heb. and Gr. words rendered by this and its derivatives in the A. V.:
1. Rob.: (1) ῥαβ (Sept. διατριβα) Vulg. deportus); (2) ῥαβάς (ἢραμειὼν; violenter afero); (3) ῥαβ, "return, return;" hence in Ps. to surround, circumvent (Ps. cxix, 61; περιπολοπεύειν: circumplete, usually affin. reiterate assertions (Gen. Theorum, p. 997); (4) ῥαβ, "cover, hide" (προκαταλείπων; affido [Gen. Theorum, p. 1190]).
2. ῥαβ: (5) διατηρεῖ (διατηρεῖ) (dīvris; ῥαβ, same as last (προσομοιώς; bēdroid); (7) ῥαβ (προστάτικος; for: A. V. "steal"); (8) σούλοσ, to strip. See STEALING.
3. Robber: (1) ῥαβαί, part. from ῥαβ, "rob" (προσομο- μεῖται; vestane); (2) ῥαβαί, part. of ῥαβ, "break" (λομέω; latro); Mic. ii, 13, "breaker;" (3) ἄραβας, ἄραβας, ἄραβας (1 Sam. xviii, 9 (diphthongs; stiis). Targum, with A. V., has "robbers;" but it is most commonly rendered as Sept. ἄραβας, ἄραβας (locomo; latro), from ἄραβας, ἄραβας, ἄραβας (1 Sam. xiv, 45; diphthongs; teripec; A. V. "scooter"); (4) ἄραβας (προστάτικος; fur; A. V. "chief"); (7) ἄραβας. See TIRAN.
4. Robbery: (1) ῥαβιστή (ἁρπαγανούσα; rapinae); (2) ῥαβιστή, from ῥαβιστή, "break" (ἀλεξαντροσ; diligiceto); (3) ῥαβιστή, from ῥαβιστή, "waste" (διασπεράω; rapinae); (4) ῥαβιστή (προσομοί; prodea; A. V. "prey," "spoil;" (5) ῥαβιστή. See THEFT.
5. Whether in the larger sense of plunder or the more limited sense of theft systematically organized, robbery has ever been one of the principal employments of the nomadic tribes of the East. From the time of Jobma to the present day, the Bedouin has been a "wild man" and a robber by trade; and to carry out his objects successfully, so far from being esteemed disgraceful, is regarded as in the highest degree creditable (Gen. xvi, 12; Bercukalr, Notes on Red, i, 137, 157). An instance of an enterprise of a truly Beduin character, but distinguished by the exceptional features belonging to its principal actor, is seen in the night foray of David (1 Sam. xxvi, 6-12), with which, also, we may fairly compare Homer, I. K. 204, etc. Predatory inroads on a large scale are seen in the incursions of the Sabeans and Chaldeans on the property of Job (Job i, 15, 17), the re-

venge coupled with plunder of Simeon and Levi (Gen. xxxiv, 28, 29), the reprisals of the Hebrews upon the Midianites (Numb. xxxi, 32-54), and the frequent and often prolonged invasions of "spoilers" upon the Israelites, together with their reprisals, during the period of the Judges and Kings (Judg. ii, 14; vi, 3, 4; 1 Sam. xvi, 22; 2 Sam. viii, 5; 2 Kings v, 2; 1 Chron. x, 18-22). Individual instances, indicating an unsettled state of the country during the same period, are seen in the "liers-in-wait" of the men of Shechem (Judg. ix, 25), and the mountain retreats of David in the cave of Adullam, the hill of Hachilah, and the wilderness of Maon, and his abode in Zipkid invaded and plundered in like manner by the Amalekites (1 Sam. xxvii, 1, 2; xxviii, 19-25; xxvi i, 7; xxvii, 6-10; xxx, 1). See WAT, LIE-IN.

Similar disorder in the country, complained of more than once by the prophets (Hos. iv, 2; vi, 9; Mic. ii, 8), continued more or less through Maccatean down to Roman times, favored by the corrupt administration of some of the Roman governors in accepting money in redemption of punishment, produced those formidable bands of robbers so easily collected and with so much difficulty subdued who found shelter in the caves of Palestine and Syria, and who infested the country, even in the time of our Lord, almost to the very gates of Jerusalem (Luke x, 30; Acts v, 36; 18, 38). See BARBARAS; CAVK; JUDAS OF GALLIENES. In the later history, also, of the country the robbers, or sicarii, together with their leader, John of Gischala, played a conspicuous part (Josephus, War, iv, 2, 1; 3, 4; 7, 2). In Asia Minor, likewise, the native tribes gave the Roman government much trouble, so that the roads were often unsafe for travellers (2 Cor. xi, 26). See SPIELO.

ROBBER OF CHURCHES (εἰρηνοκτόνος, Acts xix, 37). Sacrilege took many forms in antiquity (1 Macc. vi). The plundering of heathen temples was indirectly forbidden to the Jews (Deut. vii, 25; Josephus, Ant. iv, 8, 10). The Roman law held it as a sacrilege to be punished by forfeiture of goods, to steal the holy books of the Jews or their money out of places of worship (bid. viii, 6). See SACRILIGE.

Robber Council of Ephesus. See Ephesus, Rev., viii. 11, 12.

Robbia, Andrea della, an Italian sculptor and nephew of Luca, was born at Florence in 1444, and died in 1537. He worked both in marble and terra-cotta, and his productions may be found in many Italian cities. There are three in the Louvre, The Virgin Adoring the Infant Jesus, a head of St. Am, and Christ Healing a Sick Man.

Robbia, Luca della, an Italian sculptor, was born at Florence in 1498. His first instructor was a goldsmith named Leonardo, from whom he learned to model in wax; but as soon as he had gained some proficiency, he gave himself wholly to sculpture. So great was his progress that at the age of fifteen he was employed to design the bas-reliefs for a tomb at Rimini. Similar work at Florence occupied him for several years, but he
found that the compensation he received was in no way adequate to the services he gave, and more devices were resorted to. He therefore turned his attention to working in the town. He invented a peculiar enamel, composed of tin, antimony, and other minerals, by which, after bating, this material was rendered more durable. He afterwards found that his bas-reliefs could be colored, and this improvement rendered him famous throughout Europe. Devices were sometimes resorted to by which he was enabled to supply it, Lucac employed his brothers to aid him. Their subjects in bas-reliefs, plaques, and other forms were principally religious, as, an Amnuation, in the Academy of Fine Arts at Florence, and a very beautiful medallion in the Louvre, The Virgin Adoring the Child. He also decorated many churches and tombs. Robbia died at Florence in 1498. See Vasari, Baldinuca, and Bartol di Jouy [H.], Della Robbia, etc.

Robbin, Alvin, a minister of the Methodist Episcopal Church, was born in Coeysman's, N.Y., July 5, 1816. He was converted at a camp-meeting in New Baltimore, X.Y., in 1832, and in 1841 was received on trial in the Black River Conference, within the bounds of which he labored as a missionary for nearly five years. He was associated with the Tryn Conference, received a supernumerary relation in 1870, and made his home in Osseo, Mich., where he died, April 10, 1874. See Minutes of Annual Conference, 1874, p. 66.

Robbins, Ammi Rubamah, a Congregational minister, was born at Brantford, Conn., in September, 1746. He was fitted for college by his father, and was graduated at Yale College. He was married at the beginning of his sophomore year. He graduated in 1760, and spent some time in teaching at Plymouth, Mass., and then engaged in the study of theology under Dr. Bellamy; was licensed by the Litchfield Association, and ordained at Norfolk, Oct. 26, 1761. When the Revolution came on, he enlisted as a chaplain, joining General Schuyler's brigade [March, 1777], and went to Canada, whence he returned in ill-health after an absence of nearly half a year. He continued laboring in his Church with great fidelity, at the same time fitting young men for college, until May, 1813, when a career began to develop, which rapidly carried him to the grave. He published An Ordination Sermon (1772):—Election Sermon (1789):—A Half-Century Sermon (1811). See Sprague, Annals of the Amer. Pulpit, i, 369.

Robbins, Chandler, D.D., a Congregational minister, was born at Brantford, Conn., Aug. 24, 1738. He graduated at Yale College in 1756, studied under Dr. Bellamy, and was ordained Jan. 30, 1750, pastor at Plymouth, Mass., where he continued until his death, June 30, 1796. He was made D.D. by the University of Edinburgh in 1773. His publications were, A Reply to John Cotton's Essays on Baptism (1773) :—Some Brief Remarks on a Piece Published by John Cotton, Esq. (1774) :—An Address at Plymouth to the Inhabitants Assembled to Celebrate the Victories of the French Republic over their Insubords (1793), and a few occasional Sermons. See Sprague, Annals of the Amer. Pulpit, i, 253.

Robbins, Onesiphorus, a minister of the Methodist Episcopal Church, was born in Harvard, Mass., Aug. 19, 1792. He was converted in South Carolina at the age of twenty-six, was licensed to preach in 1825, and in 1826 was received into the New England Conference. In 1841 the Providence Conference was set off, and he became one of its members. He continued in active service until 1868, when he was returned supernumerary, and so continued until his death, which took place in Woodstock, Conn., April 9, 1872. Mr. Robbins was a man of retiring habits and slow of speech—a clear and strong thinker, and excelling as a pastor. See Minutes of Annual Conference, 1873, p. 39.

Robbins, Philemon, a Congregational minister, was a native of Charlestown, Mass. He was graduated at Harvard College in 1729, and settled in Braintree, Conn., Feb. 7, 1732. About 1740 the Legislature of Connecticut, with a view to erect a seat of New-Lightism, passed a law forbidding any minister to preach within the limits of any other minister's parish. The people of Wallingford applied to Mr. Robbins to hold meetings for them. He consented, was arraigned by the Consociation, and formally deposed. The mass of his congregation adhered to him, and he continued to preach. There was some interference of the civil authority, but he pleaded his case so well before the Legislature that his penalty was remitted. He died Aug. 13, 1781. His publications are, A Plain Narrative of the Proceedings of the Rev. Association and Consociation of New Haven (1743), and An Address to the Congregations of the English Language, etc. (ibid. 1837, 12mo), besides several Sermons and articles for periodicals. See Allibone, Dict. of Brit. and Amer. Authors, s. v.

Robbins, Thomas, D.D., secretary and librarian to, and benefactor of, the Connecticut Historical Society, was a native of Norwalk, Conn. He graduated at Yale College in 1795, was minister at East Windsor, 1809-27, of Stratford, 1828-31, and subsequently at Mattapoisett and Rochester, Mass. He died in 1856. He published, Historical View of the First Planters of New England (Hartford, 1815, 12mo), also a number of Sermons. See Allibone, Dict. of Brit. and Amer. Authors, s. v.

Robe (the rendering of several Heb. and Gr. words, but especially of ρυθως, 'mell,' etraλ), a long garment with fringed or flowered borders, usually white, though sometimes purple, and worn by the great as a mark of distinction (Luke xv, 22; xx, 46). The ancient Assyrians and Babylonians were celebrated for their manufactures of beautiful garments of divers colors (Josh. vii, 21; Ezek. xxvii, 24). Their splendid robes appear to have been embroidered with figures of animals and flowers. According to Plutarch, Cato received as a legacy a Babylonian garment, and sold it because it was too costly for a citizen to wear. Some suppose that a sacred robe was preserved from early times, and handed down among the patriarchs as a badge of the birthright, and that "the goodly raiment" which Rehekah put upon Jacob was the birthright robe. This view is given in the Targum of Jonathan on Gen. xxxvii, i: "And Rehekah took the desirable robes of her elder son Esau, which had belonged to Adam the first parent." The coat of Joseph, the possession of which excited the envy of his brethren, is thus regarded, like the good raiment of Jacob, as a badge of the birthright, which, we are expressly taught, having been forfeited by Reuben, was transferred to Joseph (xxxvii, 5; 1 Chron. v, 1). The robe appears to have been, in some cases, a species of vestment appropriated to the sacerdotal office, the holy garment. It was made entirely of blue, woven throughout, and on which neither knife nor needle was to be used; on the lower border was a row of artificial pomegranates and golden bells, alternating with each other (Exod. xxvii, 2, 4, 31-38). The robes of Aaron symbolized the purity, majesty and holiness of the priest, "the heir of the whole creation" (Rev. iii, 4, 5; vi, 9-11; vii, 9-14). See Dress.

ROBE, ECCLESIASTICAL. See Roes.

Robert (Abbe), a French historian, was born near Rheims, about 1055. He was educated in the Abbey of St. Remi at Rheims, and in 1095 became its abbot; but on account of a dispute with the abbot of Mauviniac,
ROBERT 46

ROBERT
to the Priory of St. Oricle de Senuc, where he
offered to be the "Dean of the Churches." In 1006, on
his return from Palestine, the Council of Poitiers
(Nov. 28, 1100) declared his deposition from Rheims
unjust and his life irreproachable; but he was not
restored, and remained at Senuc. He was accused
of maladministration, and Calixtus II deprived him
of his office (April 16, 1121). He died at Senuc,
Aug. 23, 1129. He left two works, entitled Historia
Hierosolimitana Libris VIII Explicata (Cologne,
1470-74; Basle, 1583);—and La Chronique et His-
toire faite par le P. P. en Dieu Turpin, etc. (Paris,
1527). See Rivet, Hist. Littér. de la France; Gallia
Christianana.

Robert (St.), founder of the Order of Citeaux, was
born at Champagne in 1018. At the age of fifteen he
entered the Convent of Moutier-la-Celle, near Troyes,
of which he afterwards became prior. Later he was ab-
bot of St. Michel de Tomerre; and while prior of St.
Ayrul de Provins, Alexander II ordered him to take
charge of the hermits of Colan. Finding this solitude
very unhealthful, Robert conducted the recluse to the
desert of Molesmes where in 1770 he founded a conven-
in honor of the Virgin. The laxity of discipline and
decline of piety, however, caused him to leave Molesmes,
with twenty companions, and establish himself at Ci-
teaux, near Dijon. In 1198 he erected a monastery,
and it was his first abbot. He was recalled to Molesmes,
and succeeded in reviving the spirit of asceticism. He
died in 1121, and Sermata, and a Chronicle of Citeaux are attributed to Robert. His festival is cel-
ebrated April 29.

Robert of Bavaria; of Deutz. See Rupert.

Robert of Geneva, antepope against Urban VI
and Boniface IX, was the son of count Amadeus of
Geneva. He was chosen by the French cardinals,
who asserted that the election in Rome at which Urban
VI was successful had not been free, and he reigned at Avignon under the title of Clement VII from
Sept. 21, 1378, to Sept. 26, 1394. He was recogn-
ised by France, Naples, Castille, Aragon, Navarre, Scot-
land, Lorraine, and Cyprus, while the other nations of
Europe preferred the claims of Urban. This schism in
the Church gave rise to serious complications in the
intercourse of nations. The popes anathematized each
other, especially caused France and his rival to be preached in England, and had the death-penalty inflicted on a number of the cardinals who had conspired to dethrone him. The elec-
tion of Boniface IX in 1389 protracted the schism in all its bitterness, until the Sorbonne decided that both parties were in error, and a compromise of some sort should be effected by means of arbitrators or a coun-
cil of the Church. Clement was so affected by this
decision that he died of apoplexy (Sept. 26, 1394).
The peace desired was not, however, finally reached
until 1429.

Robert of Gloucester, an English chronicler,
lived in the latter half of the 15th century. He was
the Abbey of Gloucester, and does not appear to have lived long after 1265. He com-
posed a rhymed chronicle of more than ten thousand
verses, written in Anglo-Saxon, containing the his-
tory of England from the time of the Romans till Edward I. It is a philosophical curiosity, but is full of
the most absurd fables. It was published entirely by
Hearne (Oxford, 1734, 2 vols.), and appeared in
1810.

Robert of Lincoln. See Grosseteste.

Robert of Melun, an English theologian, was probably born in the latter part of the 11th century.
But little is known of his life. Du Boulay supposes
that he taught for some time in Paris, and then went to
Melun to pursue the same vocation. At any rate, one
of his pupils—John of Salisbury—reports that he taught
physics in the former city, and afterwards devoted him-
self to theology. He died Feb. 28, 1167. His principal
treatise is entitled Summa Theologica, fragments only
of which have been published. It contains very valuable
matter on the origin of scholastic theology. One other
work is attributed to Robert, Questions de Epistolisa
Paul., See Hist. Littér. de la France; Du Boulay,
Hist. Universa. Per.

Robert de Poule, or Robertus Pallus, chancellor
of the Church of Rome, flourished about 1150. He
was the primeval Vaticano of Rochechouart and became
a distinguished lecturer on the Scriptures at Oxford.
He was the author of Sententiarum, or Libri Sententiarum, or
Sententia di Trinitate (in MS, in the British Museum) :
—twenty Sermoms:—probably a treatise Super Doc-
trum Dictis:—and two or three other works (late edi-
tion by Hugo Mathou, Paris, 1665, fol.). See Allibone,
Dict. ofBrit. and Amer. Auth. a.v.

Robert, Christopher R., an eminent Presbyterian
layman, was born in 1801, near Morristown, L. I.
He was engaged for the greater part of his life in mercan-
tile pursuits, but early took a warm and active interest
in the religious and philanthropic enterprises which have
marked the present century. He contributed largely in
organizing and supporting several of the churches in
New York city. He founded the German Presbyterian
Church in West Broadway and supported its pastorate
work for many years at an annual expense of $2000.
Taking a deep interest in the education of young men
for the ministry, he assumed for many years the entire
expense of a number of students at Auburn and other
theological seminaries. While on a visit to Illinois in
1829, which at that time was one of the extreme West-
ern states, he became deeply impressed with the im-
portance of home missionary work in those regions, and
became a large contributor to the funds of the Home
Missionary Society, of which he was treasurer for a num-
ber of years, conducting all its financial business with-
out fee or reward. Near the close of our late civil war
he visited Tennessee, and with his own funds purchased
a tract of land on Lookout Mountain, and established a
college for the education of young men for the ministry
in the South, having special reference to the wants of
the colored race. In 1864 Mr. Robert made an exten-
sive tour in the East, and while at Constantinople was
inspired to such a scheme of missionary work that he
soon after left for the Turkish empire that he resolved on founding a college at that place. To this end he took into his counsel that eminent missionary the Rev. Cyrus Hamlin, D.D.,
then a resident of Constantinople, whom he appointed
president of the college, and to whom he intrusted the
great work of laying its foundations. For years the
Turkish government, true to its narrow-minded and
bigoted policy, placed every obstacle in the way of the
enterprise, refusing to give its sanction to the purchase
of a site for the buildings. Dr. Hamlin, not to be
daunted, pressed his way through all the difficulties,
finally purchased the ground, erected the buildings, and
placed the college in a firm foundation on a firm founda-
ion of Mr. Robert of $200,000. Contrary to his desire and
expressed wishes, the college was called after his name.
During the recent war in the empire, the revenue of
the college having been diminished, Mr. Robert supplied
the deficiency, amounting to $25,000 a year, from his own
resources. Largely on the efforts of Mr. Robert's efforts were put forth in
building up the cause of Christ, they did not consist
merely of munificent contributions of money, but from
the time of his conversion he was personally engaged in
every good work, actively and earnestly seeking to
promote the spirituality of the Church and the conversion
of his fellow-men. Being deeply convinced both of
the worldliness and want of spirituality witnessed among
professors of religion, he prepared with his own hand a
letter to Christians on the subject, and had it published
in pamphlet form and circulated by the thousand.
Early in June, 1878, he left his home to seek the re-
Robert, Claude, a French ecclesiastical writer, was born at Chelsey in 1564 or 1565. He studied at the College of Paris, and became preceptor of the son of Bézange Frenoy. After the education of his pupil was completed and he was made bishop, Robert continued to aid him in the administration of his diocese. He filled the same office under the bishop of Chalon-sur-Saône. This prelate rewarded his preceptor by making him archdeacon and his grand vicar. He died at Chalon-sur-Saône, May 16, 1587. He left, besides three Latin treatises, the Gallia Christiana (Paris, 1626), with a geographical chart. This work, the result of thirty years' labor, is an ecclesiastical history of all the dioceses of France from their origin to the 17th century. The documents which he had collected for a second edition were given into the hands of Sevole and Louis de Sainte-Marthe, and the book was published in Paris in 1625. A third edition was undertaken by the Benedictines of Saint-Maur in 1715, and remained unfinished at the thirteenth volume. It was continued in 1856 by M. B. Haureau. See Gallia Christiana; Perry, Hist. de Chalon-sur-Saône; Soeard, Notice Hist. sur Robert; Fouqué, Du Gallia Christiana et de ses Auteurs.

Robert, John, a learned and laborious Jesuit, was born at Hubert, in the Ardennes, in the year 1569. He studied at Liege and Cologne, and became professor of theology at Douay and other colleges, gaining a great reputation. He died at Namur in the year 1651. His published work is entitled Mystice Excellioris Quadrages, id est, IV Evangelii Historiarum et Temporum serie Vinculata (Greek and Latin, Mogunt., 1615).

Robertines, an English order of eremitas, founded by Robert of Knaresborough about 1169.

Robert, Charles Dillard, a Presbyterian minister, was born at Danville, Va., Feb. 15, 1838. He pursued his studies at Louisburg, Va., and subsequently, under the Rev. James H. Lea, at Parkersburg, Va., where, at the age of eighteen, he united with the Church. Soon thereafter he entered Princeton College, and, after graduation, entered the Theological Seminary in 1862. He was graduated in 1865. He was licensed by the Presbytery of Elizabeth-town, N. J., Jan. 10, 1865, and in April following was ordained at Badawey by the same presbytery as an evangelist for Western Virginia. He labored about a year and a half at Grafton, in that state, in connection with the Board of Domestic Missions. After serving a Church at Ridley, near Philadelphia, Mr. Robert went to Plattsmouth, Neb., where he joined the Presbytery of Missouri, and labored as a stated supply until 1869. Thence he went to Smartville, Yuba Co., Cal., and became a member of the Presbytery of Stockton, which, after the reunion, was merged in that of Sacramento. After preaching a year or two at Smartville, he became a stated supply at Elko, Nev., where he remained until his death, which occurred at the former place Oct. 12, 1875. He was held in high esteem by all who knew him as an earnest, laborious, self-denying missionary in the frontier fields of the Church.

Robert, David, a British artist, was born at Stockbridge, near Edinburgh, Oct. 24, 1796. He was apprenticed as a house-painter in his native place, and, after qualifying himself as a scene-painter, he went to Spain, and in 1838-9 made a tour through Syria, Egypt, and other Eastern countries. In 1841 he was elected a member of the Royal Academy. Mr. Robert died in London, Nov. 25, 1864. Among his paintings are, Ruins of the Great Temple of Karnak;—Jerusalem from the Mount of Olives;—Interior of the Cathedral at Burgos;—Chancel of the Collegiate Church of St. Paul, Antwerp. Among his books, the following are the principal: Picturesque Views in Spain and Morocco (Lond., 1853-58);—The Holy Land, Egypt, Nubia, Arabia, etc. (1842-48, 4 vols. fol.). See Allibone, Dict. of Brit. and Amer. Authors, a. v.; Appleton's Cyclop. s. v.

Roberts, Francis, a Puritan divine, the son of Henry Roberts of Aslake, Yorkshire, was born in that county in 1609. He entered a student of Trinity College, Oxford, in 1623, completing his studies and being ordained in 1625. On the breaking-out of the Rebellion he went to London, took the covenant, and was appointed minister of St. Augustine's, Watling Street, in room of Ephraim Udal, elected for his loyalty. In 1649 he was presented to the rectory of Wrington, Somersetshire, by lord Capel. At the Restoration he conformed, and in 1672 went to Ireland as chaplain to lord Capel, and while there received the degree of D.D. He died at Wrington in 1689. His works include: Synopsis Bibliorum (Lond. and Edinb. 1649, 2 vols. 8vo; 4th ed. 1675, fol.);—also, Synopsis of Theology (1644, fol.);—Believer's Evidence for Eternal Life (1649, 1655, 8vo);—Communicant Instructed (1651, 8vo). See Chalmers, Biog., Dict.; Allibone, Dict. of Brit. and Amer. Authors, a. v.

Roberts, John L., a minister of the Methodist Episcopal Church, was born at Strawfoot, Vt., March 18, 1818. He was in the regular ministry and united with the Church in 1845, joining the Vermont Conference in 1849. In this conference he continued to labor until October, 1862, when he became chaplain of the Fourth Regiment Vermont Volunteers. In 1866 he took a supernumerary relation to the Troy Conference, and took up his residence in Washington, D. C., filling several important government offices. He died at Ocean Grove, N. J., June 24, 1873. See Minutes of Annual Conferences, 1874, p. 70.

Roberts, John Wright, missionary bishop of the Methodist Episcopal Church for Africa, was born of colored parents at Petersburgh, Va., and was converted and joined the Church while in the United States. He early emigrated to Liberia, where he was admitted among the clergy. The Liberian Conference elected him to elder's orders in 1841, and in the same year he came to the United States and was ordained. In 1866 he was elected to the office of missionary bishop, and was ordained in St. Paul's Methodist Episcopal Church, New York, June 20, 1866. He left for Liberia June 25. From that time on he labored faithfully for the edification and enlargement of the Church in the republic of Liberia and the adjacent territory. He died Jan. 30, 1875. Bishop Roberts was endowed with excellent mental gifts, which, under the circumstances of his early condition, were exceedingly well trained. He was a gentleman by nature and culture, a Christian in faith and life. See Simpson, Cyclop. of Methodist, a. v.

Roberts, Joseph, a missionary to India, who went out to that country in 1818, under the patronage of the Wesleyan Missionary Society. After nearly fourteen years' residence among the Hindus, he returned to England, and gave to the public Oriental Illustrations of the Sacred Scriptures, collected from the Customs,manners, rites, superstitions, etc., of the Hindus, and noted on the spot by himself (Lond. 1835, 1844, 8vo). The work was published under the patronage of the Royal Asiatic Society of Great Britain and Ireland, of which the author was a corresponding member. His Illustrations are arranged in the order of the books, chapters, and verses of the Bible, and contain satisfac-
tory explanations of many doubtful or obscure passages. See most of these in Bush's Scripture Illustrations.

Robert, Palmer, a minister of the Methodist Episcopal Church, was born March 15, 1780, and was converted in September, 1804. He commenced traveling under the presiding elder in 1810, and joined the East Genesee Conference in 1811. He located in 1834, but was readmitted to conference in 1837. In 1839 he was supernumerary, and since that time was supernumerary until his death, at Seneca Falls, N. Y., April 19, 1856. See Minutes of Annual Conferences, 1858, p. 207.

Robert, Peter, a clergyman of the Church of England, was a native of North Wales, and was educated at Trinity College, Dublin. On entering into orders he became rector of Halkin, Flintshire, where he died in 1819. Among his works are, Observations on Christian Morality (Lond. 1796, 8vo);—Christianity Vindicated against Volney (ibid. 1800, 8vo);—Harmony of the Epistles (ibid. 1800, 4to);—Manual of Prophecy (ibid. 1818, 8vo);—Review of the Policy, etc., of the Church of Rome (ibid. 1809, 8vo). See Allibone, Dict. of Brit. and Amer. Authors, s. v.; Darling, Cyclop. Biblekg, s. v.

Robert, Robert, a minister of the Methodist Episcopal Church, was born in Lincolnshire, England, in 1832. He experienced religion at the age of fifteen years, and at eighteen became a local preacher, and four months after a traveling preacher, among the Primitive Methodists. He travelled four years until received into full connection, and then came to the United States. He was ordained into the New York Conference as a probationer in 1856. His last appointment was Cook Street, Brooklyn, in which he died, January, 1865, after an illness of two weeks. See Minutes of Annual Conferences, 1855, p. 82.

Robert, Robert Richford, bishop of the Methodist Episcopal Church, was born in Frederick County, Md., Aug. 2, 1775. He removed while a child to Ligoner Valley, Pa., and was converted when he was about fifteen years old. He was admitted on trial in the Baltimore Conference in 1802, and was ordained deacon in 1804. He was soon placed in charge of important stations in Baltimore, Alexandria, Georgetown, and Philadelphia. In 1815 he was appointed presiding elder of Schuykill district, embracing the city of Philadelphia, resulting to the death of bishop Ashby, he was elected to preside over the Philadelphia Conference in the spring of 1816. At the following session of the General Conference (May, 1816) he was elected to the office of bishop, being the first married man in America who filled that position. He made his first residence in Chenango (now Monroe) County, Pa., but in 1819 settled in Lawrence County, Ind. The record of his last year's service will serve to give an idea of the extent of his labors while bishop. In that year he preached in six different states and among four Indian tribes in the West, presided at four annual conferences, and travelled nearly 5000 miles. In the spring of 1845 his disease, the effects of which had been increased upon his mind, and he died March 26. His body was buried on his own farm, but in January, 1844, in pursuance of a resolution of the Indiana Conference, it was removed to Green Castle. Bishop Morrise writes of him: "He possessed by nature the elements of an orator—an imposing person, a clear and logical mind, a ready utterance, a full-toned, melody-voiced voice... He was always patient and pleasant; above all, unprentending." See Simpson, Cyclop. of Methodistism, s. v.; Sprague, Annals of the Amer. Pulpit, vii, 387.

Robert, Thomas W., a Presbyterian minister, was born in Montgomeryshire, North Wales, Oct. 10, 1830. His early education was good, and his parents emigrating to the United States, he graduated at the Theological Seminary at Auburn, N. Y., and was licensed and ordained at New York Mills Nov. 14, 1856. He excercised his gifts as a minister among the Welsh Congregationalists until 1860, when he joined the Cayugan Presbytery, with a view of laboring within the bounds of that presbytery; and it was while travelling in behalf of his mission that he was injured on the New York and Erie Railroad, and died soon after (Sept. 26, 1860). Mr. Roberts was a humble, unassuming man, and a devoted, energetic minister of the Gospel. See Wilson, Presb. Hist. Almanac, 1862, p. 191. (J. L. S.)

Robertson, William Hayward, D.D., a clergyman of the Church of England, was born in 1740, and educated at Eton and King’s College, Cambridge. He was for some time undermaster at Eton, became provost of King’s College in 1781, chaplain to the king, and rector of Farnham Royal, Bucks, and died in 1791. His works are, Poetical Essay (Lond. 1741, 4to);—Judith Restored, a poem in six books (ibid. 1774, 2 vols. 8vo);—besides other Poems, Sermons, etc. See Allibone, Dict. of Brit. and Amer. Authors, s. v.

Robertson, Frederick William, an English clergyman, was born in London, Feb. 3, 1816. At the age of nine he was sent to a grammar-school in Beverley, Yorkshire, where he remained a few years, and then entered King’s College, Cambridge. He entered the Edinburgh Academy, and the next year proceeded to the Edinburgh University. He was originally designed for the bar, but the study of law did not please him, and he would gladly have been a soldier. Certain difficulties intervening in the way of obtaining a commission, Robertson entered the Church (1836), to study for the Church. The purity of his life and the depth of his religious feeling prepared him to enter upon this new career without regret. His first appointment was to the curacy of St. Maurice and St. Mary Calendar; but his health failed in the course of a year, and he was compelled to visit the Continent. On his return to England, he was for a time curate to the incumbent of Christ Church, Cheltenham. In the beginning of 1847 he removed to St. Ebbes, Oxford, and was just attracting the notice of the undergraduates, when he was offered the incumbency of Trinity Chapel, Brighton. Here his eloquence and originality always attracted large and intellectual audiences. He was accused of not being very orthodox in his belief and teaching. This is supposed to have hastened his death, which took place Aug. 15, 1853. He was the author of Lectures and Addresses on Literary and Social Topics (Lond. 1838, 1861)—Expository Lectures on Corinthians (ibid. 1849);—Sermons on four series (1853—1855) with Memorial, Boston, 1870, 2 vols.). His Life and Letters have been edited by S. A. Brooke (1865, 2 vols.). See Chamber’s Encyclop. s. v.; Appleton’s Cyclop. s. v.; Math. Rev. Oct. 1866; Boston Rev. July, 1866.

Robertson, James (of Ellon), D.D., a minister of the Established Church, Scotland, was born in Pitalgo, a parish in the north of Aberdeenshire, in 1803. He graduated in due time at Marischal College, Aberdeen, and afterwards served as private tutor, as parish schoolmaster in his own parish, and eventually as head-master of a hospital in Aberdeen for the education of boys. In 1822 he was appointed minister of the parish of Ellon, where he remained until 1843, caring for his parish with assiduity and thoroughness. In the great controversy in the Scottish Kirk he was an earnest and indefatigable "Moderate," opposed to the Veto Act and to Dr. Chalmers, Candlish, Cunningham, and the other Non-intrusivists. When these withdrew in the great secession of the Free Church, it was natural that Mr. Robertson should be designated to occupy some one of the posts that fell vacant. The year 1843—the year of the disruption—Dr. Robertson became professor of divinity and Church history in the University of Edinburgh. He was one of the central minds of the Established Church, and toiled indefatigably in a great endowment scheme—a kind of adaptation or revival of the Church-extension scheme of Dr. Chalmers. He died in Edinburgh, Dec.
Robertson, John Jay, a Presbyterian minister, was born in Washington, Ga., in 1822. He graduated at the University of East Tennessee in 1845, entered the Union Theological Seminary in 1846, and graduated in 1848. He was ordained to the ministry in 1850, and filled the pulpit of the Presbyterian Church at Maryville, Tenn., as a stated supply. In the years 1851-52 he was professor in the Maryville College, and from the last date until 1862 he was chaplain in the Confederate army. From 1862 to 1865 he was a stated supply of the church in Rogersville, Tenn. He died in August, 1866, while in that relation. (W. P. S.)

Robertson, Joseph, a learned English divine, was born at Kipre, Westmoreland Co., Aug. 28, 1726. He entered Queen's College, Oxford, in 1746, where he took his degree of arts. Receiving orders, he was for some time curate to Dr. Sykes at Rayleigh, and in 1758 received the living of Herriard, Hampshire. In 1770 he became rector of Sutton, in Essex, and in 1779 he was presented to the living of Hawkhurst, in Kent, and of Chilham

Robertson, W. S., a minister of the Methodist Episcopal Church, was born in New Providence, N. J., in 1825, and united with the Church in 1831. He was licensed to preach as a local preacher in 1835, and in 1856 was received on probation in the Philadelphia Conference. He labored with great acceptability, being instrumental in the conversion of large numbers and successful in the building of churches. In the spring of 1857 he took a supernumerary relation, and made New York his residence, where he remained until August, 1864. He then went to New York, Fl., but in 1869 was called to the direction of the Christian Commission, where he died Nov. 2, 1864. See Minutes of Annual Conf. 1865, p. 49.

Robertson, William, D.D., often called Princo-

Robertson, a celebrated Scottish historian, was born at Borthwick, county of Mid-Lothian, Scotland, Sept. 19, 1721. His father, the Rev. William Robertson, was minister of Burntisland, with extensive views and was afterwards at the Grey Friars' Church, Edinburgh. After a preparatory course at the school of Dalkeith, and when only twelve years of age, young Robertson obtained admission into the University of Edinburgh, where his subsequent progress in learning was rapid, in proportion to the astonishing acquirements of his childhood. In 1743 he was appointed minister of Glensmuir, in Haddington-

Robertson, the Presbytey of Edinburgh to preach; in 1743 he was appointed minister of Glensmuir, in Haddington-

Robertson, W. S., a minister of the Methodist Episcopal Church, was born in New Providence, N. J., in 1825, and united with the Church in 1831. He was licensed to preach as a local preacher in 1835, and in 1856 was received on probation in the Philadelphia Conference. He labored with great acceptability, being instrumental in the conversion of large numbers and successful in the building of churches. In the spring of 1857 he took a supernumerary relation, and made New York his residence, where he remained until August, 1864. He then went to New York, Fl., but in 1869 was called to the direction of the Christian Commission, where he died Nov. 2, 1864. See Minutes of Annual Conf. 1865, p. 49.

Robertson, William, D.D., often called Princo-

Robertson, a learned English divine, was born at Kipre, Westmoreland Co., Aug. 28, 1726. He entered Queen's College, Oxford, in 1746, where he took his degree of arts. Receiving orders, he was for some time curate to Dr. Sykes at Rayleigh, and in 1758 received the living of Herriard, Hampshire. In 1770 he became rector of Sutton, in Essex, and in 1779 he was presented to the living of Hawkhurst, in Kent, and of Chilham. 

Robertson, Joseph, a learned English divine, was born at Kipre, Westmoreland Co., Aug. 28, 1726. He entered Queen's College, Oxford, in 1746, where he took his degree of arts. Receiving orders, he was for some time curate to Dr. Sykes at Rayleigh, and in 1758 received the living of Herriard, Hampshire. In 1770 he became rector of Sutton, in Essex, and in 1779 he was presented to the living of Hawkhurst, in Kent, and of Chilham.

Robertson, William, D.D., often called Princo-

Robertson, a celebrated Scottish historian, was born at Borthwick, county of Mid-Lothian, Scotland, Sept. 19, 1721. His father, the Rev. William Robertson, was minister of Burntisland, with extensive views and was afterwards at the Grey Friars' Church, Edinburgh. After a preparatory course at the school of Dalkeith, and when only twelve years of age, young Robertson obtained admission into the University of Edinburgh, where his subsequent progress in learning was rapid, in proportion to the astonishing acquirements of his childhood. In 1743 he was appointed minister of Glensmuir, in Haddington—
as well known in Germany and England as in his native land, was of Puritan descent, and inherited the pie- te, energy, love of liberty, and high moral principle of the sects of New England. He was the son of a Congregational minister, was born at Southington, Conn., April 10, 1734, and from 1812 to 1816 attended Hamilton College at Clinton, N.Y., where he distinguished himself chiefly in mathematics and the ancient languages, and was at the head of his class. In the fall of 1817, after studying law for some time at Hudson, N.Y., he was called to the pastorate of the Second Presbyterian Church of New York City, and accepted. A year later he married Eliza Kirkland, daughter of the Rev. Samuel Kirkland, known as missionary to the Oneidas. Though somewhat older than her husband, she was a woman of uncommon intellect and cultivation, and very attractive in appearance. She died, however, within a year after her marriage. Mr. Robinson remained at Clinton until 1821, when he went to Andover, Mass., to publish an edition of eleven books of the Iliad, with notes and a Latin introduction, which appeared in 1822. This stay at Andover, however, destined him to the service of theology and the church. He entered into intimate relations with Prof. Moses Stuart, the founder of the American Bible Society, and became assistant professor of the Hebrew language and literature at the Andover Theological Seminary (1823-26). He assisted Prof. Stuart in preparing the second edition of his Hebrew Grammar (which was founded on that of Gesenius), and in the translation of Winer's Grammar of the New Testament (1825). At the same time he prepared alone a translation of Wahl's Claria Philologica Novi Testamenti (Andover, 1825), which, in later editions, grew to be a much more important, independent work. These labors determined his future career, as well as the whole character of modern exegetical theology in America, of which Stuart and Robinson must be considered the founders and representatives. Stuart was brilliant and enthusiastic; Robinson, calm, sober, and critical; the former fresher and more animating, the latter more thorough and scholarly. The school of exegesis originated by them consists in an independent elaborating of the results of modern German investigation on the basis of Anglo-American orthodoxy and practical piety. By this process many excrescences and extravagances of German research were done away with, but at the same time the old Puritan severity was largely modified. Since then it has become a necessity for every American theologian who wishes to keep up with the times to make himself thoroughly acquainted with the recent developments in exegesis and literature; and this necessity will long continue to exist, even after most of the classical works of German theology have been made accessible to the Anglo-American literary world by translations.

In the year 1826, Robinson, then thirty-two years of age, undertook a voyage to Europe in order there to complete his theological education at the fountainheads of German learning and research. He spent his time chiefly at the universities of Göttingen, Halle, and Berlin, and, in point of persevering industry, a German among Germans. He was particularly intimate with the New Testament and Wahl's Claria, and with Neander and Ritter in Berlin. To the celebrated Berlin geographer, who elevated geography to the dignity of a science, constituting it the indispensable companion of ethnography and history, and who united with depth of learning sincere piety and a child-like faith, he was allied during his whole life by the closest ties of personal friendship. The exegesis of Wahl, which was so long received with the enthusiasm of the theological world, was greatly improved and, in part, entirely altered, appeared in 1850, and made it the first work of its kind to the present time. It is likewise an almost complete concordance, and enables the student to nearly dispense with Bruder. This work is a monument of labor and industry. Its motto is, "Diesi diem docet," and "Nulla dies sine linea." The method of Wahl's school is the basis of the historic-grammatical school founded by Winer, so far as it agrees with a stricter conception of inspiration and a decidedly Protestant-orthodox acceptance of all important doctrines. He kept equally aloof from rationalism and from mysticism, and was a progressive supernaturalist.

In the year 1837, Prof. Robinson received a call as professor of Biblical literature to the Union Theological
ROBINSON

Seminary of New York, a Presbyterian institution recently founded, which since then, and chiefly through Prof. Robinson, has risen to the first rank of theological seminaries in America, and stands side by side with Andover and Princeton, and which, by his efforts, was first enriched, at an early day, by the Van Esse library and other literary treasures. He accepted the call on condition of his being permitted to devote some years (at his own expense) to the investigation of the Holy Land on the spot itself before entering upon his duties. On July 17, 1837, he sailed from Europe with his family, left the last of the English fleet at Smyrna, and arrived by way of Athens and Egypt to Palestine. In conjunction with the Rev. Eli Smith, a highly esteemed missionary of the American Board, who was an accomplished Arabic scholar, he explored, with the acute judgment of a critical scholar and the devout heart of a believer in the Bible, all the important places of the Holy Land. In October, 1838, he returned to Berlin, after having been detained at Vienna by a severe illness, contracted during his travels, which nearly proved fatal. The two following years, spent in the metropolis of German science in the preparation of his Biblical Researches in Palestine, were among the happiest of his life. Being engaged in a country where much has been consulted and quoted on all questions of Biblical geography and topography by all the scholars of America, England, and Germany, appeared simultaneously in America and England in the original, and in Germany in a translation revised by Mrs. Robinson, in 1841, and secured the immortality of the author's name, planting a large grove of Biblical geography on the same soil, with Bochart, Reland, Ritter, Raumer, and Burkhardt; as in Biblical philology he stands side by side with Wahl, Gesenius, and Winzer. The Biblical Researches are based throughout on personal inspection and investigation by the aid of the telescope, compass, and maps, and a most minute and independent judgment, which allowed itself to be dazzled by no traditional or venerable monkish legends, but was guided by the principle, "Prima historie lex est, ne quid falsi dicere audeat, ne quid veri non audeat." Though necessarily dry in many details, his simple and majestic style rises at times to true eloquence. The work was immediately received with great favor in Germany, England, and America, and still continues to be quoted as the first authority in its department. We give as examples three criticisms upon it.

Ritter says of it (Die Erdumstände von Asien, viii, div. ii, 78): "The union of the accurate observation of topographic and historical objects, like that of Burkhardt, with much preparatory study, particularly the erudite study of the Bible, and of philological and historical criticism as well as that of the natural history of the country, by the author's travelling companion, the Rev. Eli Smith (whom a residence of many years in Syria as a missionary had made miscellaneously at home there), distinguishes this work, which is carried through in the most conscientious manner and with great vigor of body and soul, and makes all former ruses of its kind, whereby the scientific treatment of the subject has only now gained firm ground upon which the future will be able to keep with more success than the past. The competent Obhausen remarks that no previous work has brought to light a richer fund of new and important researches. The admirers of Biblical investigation developed and acted up to therein will remain a guiding-star for all future travellers who will understand to contribute to the investigation of Biblical antiquity in the Holy Land itself, wherefore the work marks a new era in Biblical geography."

The committee of the Palestine Exploration Fund, in its publication Our Work in Palestine (Lond. 1873), p. 7, expresses itself as follows: "The first real impulse, because the first successful impulse, towards scientific examination of the Holy Land, is due to the American traveler Dr. Robinson. He it was who first had the idea of making a work on Biblical geography to be based not on the accounts of others, but on the ground itself. He aimed at presenting the Holy Land as it was, not as it had been, nor as it was supposed to have been in later years; of strange sound good sense; reserved and dry, though, when in the society of his learned brethren, often very entertaining and with a strong sense of humor. He was thorough and indefatigable in his investigations, somewhat scep-

clical by nature, but bowing in reverence to God's revelations; patient, kindly, and warm in words and actions; of the kindliness of heart and tender sympathy; a plain, serious, solid, thoroughly honorable character; and a pious, orthodox,.

Dean Stanley (Addresses and Sermons delivered in the United States, October, 1876, p. 26) says: "Dr. Robinson, I believe it is not too much to say, was the first to take the new Palestine with his eyes open as to what he ought to see. Hundreds and thousands of travellers had visited Palestine before—pilgrims, seekers after truth, but scientific travellers, who, with a critical eye, person before his time who had come to visit that sacred country with all the appliances ready beforehand which were necessary to enable him to understand the Bible, and he also was the first person who came there with an eye capable of observing, and a hand capable of recording, all that with these appliances he brought before his vision." The Royal Geographical Society of London awarded to the author, in 1842, their Patron's Gold Medal; in the same year the University of Hallé conferred upon him the degree of D.D.; and Yale College, in 1844, that of L. I. D.

On his return to America, in 1840, Dr. Robinson devoted himself to his labors in the Union Theological Seminary, at the same time not neglecting his literary work. He wrote numerous articles and essays, revised his former works for new editions, and in 1845 published a new and independent Greek Harmony of the Gospels, with notes of his own, which, with other important changes, made it far superior to any former work of the kind and won it general acknowledgment. This was followed in 1846 by an English Harmony, with the notes adapted for popular use.

In 1851 Dr. Robinson made a second visit to Germany and Palestine, in which he included Damascus. The valuable results of his new investigations were laid down in an improved and enlarged edition of his Biblical Researches, in 1856, which was at the same time published in Germany with a translation of the additional matter by Mrs. Robinson. Nevertheless, this invaluable work was, in the eyes of Dr. Robinson, merely a preparation for a complete physical, historical, and topographical geography of the Holy Land, which he considered the chief labor of his life. Unfortunately, he was not permitted to finish it; only the first part, the Physical Geography of Palestine, was fully prepared in manuscript, and his faithful helper translated it into German after his death, and published it in both languages in 1865. Dr. Robinson, after a long illness under which he labored, and an incurable disease of the eyes obliged him, in the year 1861, to lay down his pen. In May, 1862, he set out on his fifth and last voyage to Europe, in order to consult the celebrated oculist Dr. von Gräfe, in Berlin, who, however, could promise him no permanent cure. Nevertheless, he greatly enjoyed the intercourse with his learned friends in Halle and Berlin, and refreshed his soul once more by a clouded view of the Swiss Alps. On his return in November of the same year, he resumed his usual duties at the Union Theological Seminary, but was forced to cease with the Christmas vacation. After a long illness, he died in the bosom of his family, Jan. 27, 1863, universally mourned, but more particularly lamented, most of all by his wife, son, and daughter, his colleagues, and a large number of students in the seminary, the learned ornament and crown of which he had been for a quarter of a century. Dr. Robinson was a man of athletic form and imposing figure, though somewhat bent in later years; of strength; sound good sense; reserved and dry, though, when in the society of his learned brethren, often very entertaining and with a strong sense of humor. He was thorough and indefatigable in his investigations, somewhat sceptical by nature, but bowing in reverence to God's revelations; patient, kindly, and warm in words and actions; of the kindliness of heart and tender sympathy; a plain, serious, solid, thoroughly honorable character; and a pious, orthodox,
evangelical Christian. Though a dangerous opponent when attacked, he was a lover of peace, avoided theological controversy, and adhered strictly to his task in life, which he accomplished faithfully. He is the most distinguished Biblical theologian whom America has brought forth, and one of the most distinguished of the 19th century. The American edition of the "Dictionary of the Bible" (published by the Amer. Tract Society), his Greek and English Lexicon of the New Test., his Hebrew and English Lexicon based on Gesenius, and, above all, his Biblical Researches in Palestine, belong to the most useful works of modern Protestant theology, and will long continue to exert their influence, under the guidance and encouragement of his disciple, Mr. Hitchcock.

Sources.—Next to the works quoted above in chronological order, particular reference is had to two excellent addresses by his two colleagues in the Union Theological Seminary.—Profs. Henry B. Smith and Roswell D. Hitchcock—which appeared soon after his death under the title The Life, Writings, and Character of Edward Robinson, D.D., LL.D., read before the N. Y. Historical Society, published by request of the Society (N. Y. 1863). Dr. Hitchcock's address gives, at the same time, a thoroughly trustworthy biographical sketch, partly founded on the communications of the family. See also the noble tribute which dean Stanley of Westminster paid to Mr. Robinson in an address before the students of the Union Theological Seminary, New York, Oct. 29, 1878, published in his Addresses and Sermons delivered during a Visit to the United States and Canada (Lond. and N. Y. 1879, pp. 23–34). He holds him up as the noblest specimen of an American scholar. The original M.S. of Robinson's Biblical Researches and a part of his library are in possession of the Union Theological Seminary in New York. (P. S.)

Robinson, George C., a Methodist Episcopal minister, was born at Hartford, near Cooperstown, N. Y., Aug. 9, 1835, and was educated first at the village academy in Welchboro, Pa.; next at Linus, N. Y.; and, finally, graduated with distinction at Yale College in 1856. He then studied at the Union Theological Seminary, New York, till the spring of 1857, when he entered the New York East Conference and took charge of the First Place M. E. Church, Brooklyn, N. Y. He was transferred in 1859 to the Cincinnati Conference, and served the Union Church at Cincinnati; but his health, induced by his generosily to send him to Europe in 1860. In Germany he studied thoroughly the latest results of theological inquiry and became master of the best learning of its evangelical teachers, enjoying the personal friendship and admiration of professors Tholuck and Lobeck, and the study of the languages of France and Italy, returned to the United States in June, 1862, with rich acquisitions of knowledge and improved health. But his frail constitution soon yielded again to our precarious climate, and, after a persistent conflict with pulmonary disease, he fell at last, greatly lamented, Sept. 21, 1865. Although so young, he had laid the broadest and deepest foundation for the future. To the Latin, Greek, German, French, and Italian languages he had added a knowledge of the Hebrew, Syriac, and Chaldee. He was familiar even with much of the literature of these languages—especially of the German. Several erudite and critical articles on the precise study of the Pentateuch were given by him in the periodical journals. To great geniality of disposition he added remarkable strength of intellect. Originality marked the whole structure of his mind, and it amounted to genius. A brief conversation could not fail to convince the hearer that he was not only capable of original and precise research, but had a mind quick to perceive in an instant the relation of separate facts, but that this power was spontaneous to his affluent mind. His preaching was characterized by it remarkably; and thus presented a singular fascination, especially to thoughtful hearers. His congregation at Union Chapel in Cincinnati established "The Robinson Mission" in his memory. See Record of the Yale Class of 1856, p. 60 sq.; The (N. Y.) Methodist, Oct. 3, 1863.

Robinson, George Marshall, a Baptist minister, was born in Buckfield, Me., July 15, 1821. He was a graduate of Waterville College in the class of 1850. He studied theology at Newton, and was ordained pastor of the Church in Sidney, Me., in the summer of 1853. On leaving Sidney in 1854, he preached in several churches, chiefly in temporary supply; the state of his health not allowing him to take a regular pastoral. For several years before his death he gave up preaching entirely, and was engaged in business. He died at Livermore, Me., April 29, 1875. (J. C. S.)

Robinson, Hastings, D.D., an English clergyman, was born in 1753, graduated at Cambridge as sixteenth wrangler in 1776, and was fellow of St. John's College from 1816 to 1827. He then took the college living of Great Warley, Essex. In 1821 he was appointed assistant tutor of his college, in 1823 Whitchall preacher, and in 1866 select preacher before the university, honorary canon of Rochester, and rural dean. His death took place, May 18, 1866. He published Europia Electa, or an emendation of Homer's Iliad (Lond., royal 8vo); Πραξεις των Αγωνιστων, Acta Apostolorum (Cambridge, 1824, 8vo). See Allibone, Dict. of Brit. and Amer. Authors, s. v.

Robinson, Hugh, D.D., an English clergyman, was born in St. Mary's parish, the county of Anglesea. He was educated at Westminster School, was admitted a probationer at New College, Oxford, in 1803, and was perpetual fellow in 1805. He completed his master's degree in 1811, and about three years after became chief master of Winchester School. He was afterwards archdeacon of Winchester, canon of Wells, and archdeacon of Gloucester. Having sided with the party that was reducing the Church to the Presbyterian form, he lost much of the favor of his diocesan, but obtained the rectory of Hinton, near Winchester. He died March 30, 1855, and was buried in St. Giles-in-the-Fields, London. He wrote for the use of Winchester School, Preces; Grammaticalis quasdam; Antiquae Historiae Synopsis (Oxford, 1816, 8vo), printed together: —School of Wintoun (Lond. 1564 and 1564) —Aeambus Mundii Universales, etc. (ibid.1677, fol.).

Robinson, Isaac, D.D., a Congregational minister, was born at Hudson, N. H., in August, 1779. Having studied under his own master, he commenced a course of classical and theological study with Rev. Reed Paige, of Hanover. He received a diploma of a student pastor of the Church in Stockbridge, Aug. 30, 1802, and being accepted it, was ordained Jan. 5, 1803. Here he remained until the close of his ministry and life. Mr. Robinson continued to labor with vigor until within a few weeks of his death, which occurred July 9, 1854. He published, about 1809, a pamphlet in opposition to Universalism on the Supreme Divinity of Jesus Christ, and others. See Sprague, Annals of the Amer. Pulpit, ii. 403.

Robinson, John (1), pastor of the "Pilgrim Fathers" of New England, was born in 1575. The Independents, as they were called, had their origin in a protest, not against popish intolerance and persecution, but against Protestant usurpation and bigotry connected with a persecution equal in atrocity to the darkest period of papal domination; not in the dark ages, but in the bright and golden age of Henry VIII and good queen Bess. While renouncing the supremacy of the pope and his title to headship in the Church of Christ, the king assumed ecclesiastical supremacy, and the precious freedom of change was lost. It was a step both everlast incompatible with the teachings of Christ. A little band whose consciences no chains could bind, and whose judgments no sophisms could pervert, rose up and boldly, but firmly, protested against such infringement of the rights of conscience and private judgment, and.
rather than submit to the same, suffered imprisonment, torture, and death. An attempt was made in 1692 to seek refuge in Holland, but the vile treachery on the part of the captain of the ship on which they were embarked prevented. The next year, Robinson, the pastor of the little flock, made another effort; but they were again thwarted by autocratic influences. Finally, a company arrived at Leyden in 1698. The church was enlarged by additions mostly from English exiles, and numbered more than three hundred. Robinson was greatly respected by the clergy of Leyden, and also by the professors in the university. He gave proof not only of his piety, but of his scholarship. The Church was not allowed to rest in quiet, and a vigilant providence was employed to keep a day of solemn fasting and prayer; Robinson delivered a discourse from 1 Sam. xxviii, 3-4. It was decided that part of the Church should emigrate and prepare the way, and the remainder follow when their pastor could go with them; but many could not get ready, and had to remain. Mr. Burnet, a ruling elder, was appointed to go as a leader. They were constituted as much an absolute Church as the portion that remained. In July they held another season of prayer, and the pastor preached from Ezra viii, 21. On June 21 they left Leyden to embark at Delftshaven, and went on board ship the day after they arrived. All having assembled on deck, their beloved founder knelt and poured out his soul to God in prayer for the divine protection. They believed thoroughly not only in a general, but a special, providence, extending to the minutest events. The proceeds of their estates were put into a common stock, and, with the assistance of the merchants to whom they mortgaged their labor and trade for seven years, two vessels were provided—the Speedwell, of sixty tons, and the Mayflower, of one hundred and eighty tons. They expended seven thousand pounds in provisions and stores. The ships, carrying one hundred and twenty passengers, sailed from Southampton on Aug. 5, 1620. The Speedwell, proving leaky, had to put into port at Dartmouth, and on Aug. 11 they took on board the Speedwell, and by still another providential interference, both ships proving unserviceable, they were obliged to put back to Plymouth. About twenty left the Speedwell, and, taking with them their provisions, went on shore; the remainder, one hundred and one in number, went on board the Mayflower, and the shores of England were lost sight of forever. The company had entered into a solemn covenant to be faithful to God and each other. But little remarkable occurred during the voyage. There was one death, and one birth—a son of Stephen Hopkins, who was named Oceanus. On Nov. 9 they caught sight of the sandy cliffs of Cape Cod, and the next day entered the harbor. Before going ashore, they founded a democratic government, and elected John Carver to serve one year as governor of the colony. They named the place Plymouth. The first religious service held on land was on Dec. 21. Robinson had charged them to "follow the Lord, as far as he should lead you; for you 'are born again; as born 'from the seed of the Most High God.'" They were faithful to the charge—a noble band of God-fearing and God-loving men; and they left unchanged to posterity what there they found; "the word of the Lord." — Robinson, The History of Mr. Robinson, and the first settlement of the Church of England, published in 1821. He died March 11, 1625. See Allibone, Dict. of Brit. and Amer. Authors, s. v.; Chalmers, Biog. Dict. s. v.; Sprague, Annals of the Amer. Pulpit, i, 1. (W. P. S.)

Robinson, John (2), bishop of London, was born at Cleasby, Yorkshire, in 1630, and was educated at Oriel College, Oxford. He was chaplain to the English embassy in 1660, and ambassador there himself. He returned to England in 1706, in 1710 became bishop of Bristol, and in 1714 was transferred to London. He was minister plenipotentiary at the Treaty of Utrecht, and one of the commissioners for finishing St. Paul's Cathedral. He died in 1726. He published. An Account of Sweden (3d ed. 1717, 8vo; with prel. by G. Austin, Lond. 1714, 4to), and others. See Allibone, Dict. of Brit. and Amer. Authors, s. v.; Darling, Cyclop. Bibliog. s. v.

Robinson, John (3), D.D., a Presbyterian minister, was born in Mecklenburg County, N. C., Jan. 3, 1708. His college course was pursued at Wmsborough, S. C. He studied under the care of the Orange Presbyterian, was licensed to preach April 4, 1726, and was by the presbytery directed to visit Duplin County, where he remained seven years. In 1800 he became minister of the Church in Fayetteville, but removed in 1801 to Poplar Tent. In 1806 he was induced to return to Fayetteville, where he resumed pastoral labors and his classical school. In Dec. 1818, he returned to Duplin County, where he passed the rest of his life, dying Dec. 14, 1845. Dr. Robinson was a man of consistent and elevated piety, large benevolence, firmness of purpose, courage, and punctuality. He published. An Elegy on Washington. See Sprague, Annals of the Amer. Pulpit, iv, 113.

Robinson, John (4), D.D., an English clergyman, was graduated at Christ College, Cambridge, and was minister of Ravenstondale, Westmoreland, and master of the grammar-school there. He published a Theological, Biblical, and Ecclesiastical Dictionary (Lond. 1815, 8vo) — The Proper Names of the Bible (ibid. 1804, 12mo) — besides a number of works for schools. See Alibone, Dict. of Brit. and Amer. Authors, s. v.; Darling, Cyclop. Bibliog. s. v.

Robinson, John (5), a minister of the Methodist Episcopal Church, was born in County Wicklow, Ireland, Aug. 14, 1819. He was converted in his fourteenth year, and came to the United States in 1818, uniting soon after with the Church in Fishkill, N. Y. He was ordained in 1823 and consecrated in the East Geneae Conference. In this and the East Genesee Conference, he labored a short time previous to his death, in Starkey, Yates Co., Jan. 9, 1868. See Minutes of Annual Conferences, 1868, p. 155.

Robinson, Jonathan N., a minister of the Methodist Episcopal Church, was born in Suffolk County, Long Island, N. Y., Sept. 27, 1816. He joined the Church April 26, 1842. He was licensed to preach in Chautauqua County, and after a course of preparatory study was received on trial in the New York Conference, June 16, 1844. He went to his last charge in 1855, was attacked with hemorrhage of the lungs, which became so aggravated that he died, Nov. 6, 1858. See Minutes of Annual Conferences, 1855, p. 158.

Robinson, Moses, a Presbyterian minister, was born in Burlington, Vt., April 26, 1815. His parents were poor, and he was dependent upon his own exertions to gain an education. He graduated at Middlebury College in 1839, studied theology in Union Seminary, New York city, was licensed by New York Third Presbyterian in 1842, and was ordained by Salem Presbyterian in 1845 as pastor of the church at Washington, Ind. He labored subsequently at Wadsworth, O., then at
Robinson, Ralph, a Presbyterian minister, was born in Scotland, Wissaham Co., Conn., March 12, 1780. His father and family removed to Dorset, Vt., where Ralph spent the earlier part of his life at agriculture. He pursued his preparatory studies under the care of Rev. William Jackson, of Dorset, paying his board and tuition by his labor; graduated at Middlebury College in 1804; studied theology with Rev. Holland Weeks, of Pittsfield; was licensed to preach by the Rutland Association in 1809, and for about a year acted as home missionary, preaching in Malone, N. Y., and in two or three towns in Vermont. In 1810 he was ordained and installed as pastor of two churches, viz., the Congregational Church in Tunbridge, and the First Congregational which in Hartford, Vt., in 1822 he was settled as pastor of the Congregational Church, Martial, Oneida Co.; in 1828 of the Church in New Haven; in 1830 of the Church in Palisai, where he remained sixteen years; in 1846 he returned to the New Haven Church and remained seven years; in 1854 he went to the Church in East Mexico, and in 1858 to the Church in East Providence, R. I. Thus we have fifty years of uninterrupted ministerial labor—a life itself, which, from its nature, must have made a mark for eternity on hundreds of souls. He died May 14, 1863. Mr. Robinson was an intelligent and earnest preacher and defender of the New England or Edwardian theology, a pioneer in temperance, an anti-slavery man, and an earnest promoter of all the benevolent causes of the Church. See Wilson, Preb. Hist., Almanac, 1864, p. 317; also The Congregational Quarterly, Boston, July, 1863; Allibone, Dict. of Brit. and Amer. Authors, s. v.; Darling, Cyclopaedia, s. v.; (J. L. S.)

Robinson, Richard, architect of Armagh and Lord Boleby, was born in the North Riding of Yorkshire, England, in 1709. He was educated at Westminister School and Christ Church, Oxford, where he took his master's degree in 1733. Dr. Blackburn, archbishop of York, appointed him his chaplain, and collated him first to Elton, Yorkshire, and next to prebend of Grindal, Cathedral of York. In 1751 he went to Ireland, and was collated to the bishopric of St. Patrick in 1756, and in the same year, in 1759, he was translated to the united sees of Leighlin and Ferns, and in 1761 to Kildare. In 1765 he was advanced to the primacy of Armagh, and made lord-almoner and vice-chancellor of the University of Dublin. He was created baron Boleby of Armagh in February, 1777, and in the Red book he appointed prior to the dean of St. Patrick. He succeeded to the title of baronet upon the death of Sir William, his brother, in 1785. Bishop Robinson died at Clifton, near Bristol, in October, 1794. He was very watchful over the legal rights of the Church in Ireland. The acts of the 11th and 12th of the then reigning sovereign, securing to bishops and ecclesiastical persons payment for expenditures in purchasing and building glebes and houses, originated with him.

Robinson, Robert, a distinguished minister of the Baptist denomination in England, was born at Swaffham, Norfolk, Jan. 8, 1735. In 1749 he was apprenticed to a hair-dresser in London. Becoming a hopeful Christian under the preaching of Whitefield, his master released him from his indentures, and he returned to his native county and began to preach as a Calvinistic Methodist. He soon joined the Baptists, and in 1759 became pastor of the Baptist Church in Cambridge, where he was very popular with all classes of people. Enjoying peculiar facilities for study at Cambridge, he improved every opportunity to add to his store of knowledge, and to become learned in both the ancient and modern languages. Between the years 1770 and 1782 he prepared and published a translation of Saurin's Sermons. He also published in 1776 A Plea for the Divinity of Our Lord Jesus Christ, in a Pastoral Letter Addressed to a Congregation of Protestant Dissenters at Cambridge. It is said that this book excited the most singular attention, and the highest dignitaries of the Church of England pronounced that it was the best defence of the divinity of Christ that had ever been published. He was invited to become a clergyman of the Establishment, to which, however, he refused to accede. Robinson was the author of several other works which, in their day, enjoyed a good degree of popularity. Among them was a translation of the celebrated essay of Claude, On the Composition of a Sermon, and an elaborate work on which he spent years of labor—History of Baptism. Close and long-continued application to study at length procured him his ordination to his constitution, and he died June 2, 1790. Although he was thought at one time to lean somewhat towards Socinianism, he never lost the affection and confidence of his Church in Cambridge. See Dyer, Robinson's Life and Writings (London, 1796, 4to); Flower, Robinson's Miscellaneous Systems, etc., also the annual Review, 1806, p. 464; Eclectic Review, September, 1861; Allibone, Dict. of Brit. and Amer. Authors, s. v.; Darling, Cyclopaedia, s. v.; (J. C. S.)

Robinson, Thomas (1), an English clergyman, was born at Wakefield, in the county of York, Aug. 29, 1749. He was educated at the grammar-school of his native place, the governors of which, when it was determined to send him to the university, unanimously agreed to allow him a pension, the more particularly as he was appointed a sizar into Trinity College, Cambridge, in October, 1768. In 1772 he was elected fellow of the college, and soon after presented to the curacies of Witcham and Witchford. About two years afterwards he accepted the curacy of St. Martin's in Leicester, was chosen afternoo lecturer on St. Paul's, and in 1782 chaplain to the Infirmarian. In 1778 he was appointed weekly lecturer of St. Mary's, Leicester, and in the same year was presented to the living of this church. Mr. Robinson died of apoplexy, March 24, 1813, after preaching thirty-nine years in Leicester. Among his works are, Scripture Characters (London, 1789, 12mo; last ed. 1806, 8vo):—Prophets of the Messiah (ibid. 1812-25, 8vo)—besides Addresses, etc. See Allibone, Dict. of Brit. and Amer. Authors, s. v.

Robinson, Thomas (2), an English clergyman, was born about the middle of the last century, and became rector of Ruin Moor and vicar of St. Hilary, Cornwall. He died in 1814. He was the author of, A Few Pieces on the Bible, for the Young (1800, 8vo):—Inquiry into the Nature, Necessity, and Evidences of Revealed Religion (1803, 8vo).

Robinson, William (1), a Presbyterian minister, was born near Carlisle, England, in the beginning of the 18th century. Having plunged into the dissipations of London, he was ashamed to return to his father, and resolved to seek his fortune in America. On his arrival, he began to learn a trade in Houndsley, N. J., living the life of a correct and sober man. Soon after his conversion, he determined to enter the ministry, and pursued his studies at the Log College. He was received under the care of the New Brunswick Presbytery on April 1, 1740, and was licensed to preach May 27 following. On Aug. 14, 1741, he was ordained in New Brunswick sine titulo. Until 1746 he labored as missionary in Virginia, and on March 19 was dismissed from the Presbytery of New Brunswick to that of New Castle, with a view of his becoming pastor of the congregation at St. George's, Del. But in April following, before he had been installed, his death occurred. There remains little documentary title concerning his life, and there is a uniform tradition that he was an eminently devout and beneficent man, and one of the most vigorous and effectual preachers of his day. See Sprague, Annales of the Amer. Pulpit, iii, 92.
ROCHUS

57

Roden power than those of the latter. The modern full sleeve is not earlier than the time of bishop Overall. Before and after the Reformation, till Elizabeth's time, the rochet was always of scarlet silk, but bishop Hooper changed it for a chimere of black satin. Bale describes the clergy wearing white rochet of raines (linen of Ionnes or Rheims), or fine linen cloth. See Watcott, Soc. Abs., 378; Ch. Diet.; Mead, Thes. Dict.; Gardner, Faiths of the World, s. v. See Ornaments.

ROCHUS, a carver of San Lucar, Spain, whose principal business was to make images of saints and other popular idols. Convinced of the errors of Romanism, he embraced the Protestant faith, and followed the business of seal-engraver only. An image of the Virgin had been retained as a sign, and a papal inquisitor passing asked him if he would sell it, and the price. Rochus gave the price, and the inquisitor offered him half the money: upon which Rochus replied, I had rather break it in pieces than take such a trifle. Break it in pieces if you dare, said the inquisitor. Rochus took a chisel and cut off the nose of the image, for which offence he was burned.

ROCK (properly ἔραυ, or ἔρας, ἔραπ). Palestine is a mountainous and stony country, abundance in caves and fastnesses where the inhabitants sought shelter from sudden invasions of enemies, and where bands of robbers frequently formed their dens. Thus when the Benjamites were overcome, they secured themselves in the caves of Adullam, Engedi, and Maon. These caves furnished a great number of defensible positions which have been the scene of many deadly struggles, from the days of the Canaanites down to the present hour. The prevailing rock is a dark-gray limestone, which, though it has a most saddening aspect of barrenness and desolation, is very susceptible of cultivation, being easily worked into terraces, which give support to the soil and facilitate the fertilizing process of irrigation. Travellers who now visit the land are disposed, at the first view, to doubt the ancient accounts of its fertility; they can scarcely bring themselves to believe that these barren wastes were the promised land flowing with milk and honey: but a more attentive examination of the country affords abundant evidence that its present sterility is owing to the nature of its government, which, affording no security either for life or property, prevents the husbandman from tilling the soil when he is uncertain whether he shall reap its fruits. Indeed, it may be generally said that a country of limestone rock will be found one of the best in rewarding the labours of cultivation, and one of the worst in spontaneous produce. See CAVE; HILL.

Rock is frequently used in Scripture In a figurative sense of the ancestor of a nation, the quarry whence it was derived (Isa. li, 1). It is also used in a metaphorical sense of God, as the Rock: i.e. the strength and refuge of his people (Deut. xxxiii, 4; 2 Sam. xxiii, 3; Psa. xviii, 2). The rock from which the Hebrews were supplied with water in the desert was a figure of type of Christ (1 Cor. x. 4). So the term rock is used of the grand doctrine of Christ's eternal supremacy, which is the foundation of the Christian system (Matt. xvi, 18). See STONE.

ROCK, DANIEL, a learned Roman Catholic, was born at Liverpool, England, in 1799, and educated at Old Hall, Herts, and in the English College, Rome. After serving the mission in London for two years, he became domestic chaplain to the earl of Shrewsbury, and in 1840 took charge of the Church at Buckland, Berks, which he resigned in 1854. On the reintroduction into England of the Roman hierarchy (1852), he was one among those first made bishops. He was consecrated 26th July, 1851. Rock published, Hierurgia, or the Holy Sacrifice of the Mass (London, 1833, 2 vols. 8vo; 2d ed. 1850, 8vo)—The Church of our Fathers, etc. (vol. i, ii, ibid. 1849, 8vo; vol. iii, 1853-54)—Transubstantiation Vindicated:—

The Mystic Crown of Mary: also minor publications. See Allibone, Diet. ofBrit. and Amer. Authors, s. v.; Darling, Cyclop. Bibl. s. v.

ROCKWOOD, LUTHER BURTON, a Congregational minister, was born at Wilton, N. H., April 8, 1816. He graduated at Dartmouth College in 1839, and entered the Andover Theological Seminary, where he remained two years, and then entered the Union Theological Seminary, where he also remained two years, graduating in 1843. He was ordained to the Gospel ministry in 1845, and became the financial agent of Union Theological Seminary. He was called to the pastorate of the Congregational Church at Rocky Hill, Conn., in 1856, and continued in charge of the same until 1858, when he accepted the position of district secretary of the American Tract Society of New York, and subsequently of that of Boston, Mass. He died while engaged in this work, May 7, 1872. (W. P. S.)

ROCO, a name given to the very debased style of architecture and decoration which succeeded the first revival of Italian architecture. It is ornamental design run mad, without principle or taste. This style prevailed in Germany and Belgium during last century, and in France during the time of Henry IV. The following figure is an example from an altar in the Church of St. Jaques, Antwerp.

Rocco Ornament.
used as entwined with two serpents. Aaron's rod was caused to blossom miraculously and bring forth almonds (Num. xxvii, 8) to show God's election for the priesthood. Parkhurst thinks that the rods of the chiefs among the Israelites were of the almond-tree, to denote vigilance, that being an early tree, flowering before all others. The shepherd's staff is called "a rod," and the rod of the shepherd is a symbol of rule (Num. xxiv, 14). "Whatever passed under the rod," i.e. from whatsoever required the shepherd's care (xxvii, 32; Jer., xxxiii, 13; Ezek. xx, 37; Mic. vii, 14). The term "rod" also means a shoot or branch of a tree, and in this sense is applied figuratively to Christ as a descendant of Jesse (Isa. xi, 1). "Rod" is used to designate the tribes of Israel (Num. x: 1-2; Jer. x, 16). It is used as the symbol of power and authority (Psa. ii, 9; cxv, 2; cxxv, 3; Jer. xlvi, 17; Ezek. xix, 11; Rev. ii, 27); of that which supports and strengthens, a stay or staff (Psa. xlviii, 4; Isa. iii, 1; Ezek. xxiii, 6); and of the afflictions with which God disciplines his people (Job ix, 34; Heb. xii, 7). See Cooper, Hist. of the Rod in all Countries and Ages (2d ed. Lond. 1877.) See SCEPTRE; STAFF.

A peculiar use of rods is afforded in the instance of those of poplar and hazel (more properly the wild almond) which Jacob partially peeled, and set in the wattles of the draught oxen, so as to appear as though they brought forth speckled and ring-streaked young. Commentators are not agreed as to the effect thus produced: whether it was natural or miraculous; whether the sight of the rods had naturally such an effect on the animals' perceptions as to influence the markings of their offspring, in the manner that children often receive marks before birth, from some object that has impressed itself on the mother's mind, or whether it was a special operation of God in Jacob's favor, which, in fact, seems clearly intimated in Gen. xxxi, 10, 12, where Jacob declares himself to have been guided on this subject by God in a dream. The Latin fathers considered the case as natural, the Greek as miraculous, which is also the prevailing opinion of modern commentators, who consider it very doubtful whether the same cause (the use of variegated rods) would now certainly produce the same effects. See POPULAR.

Rabolomancy, or divining by rods, became a common superstition among the Jews, arising, doubtless, from the idea of supernatural agency attached to the rods of Moses and Aaron. It is alluded to in Hos. iv, 12: "My people ask counsel at their stocks, and their staff declareth unto them." It was performed, first, by inscribing certain characters on small rods, and then drawing them, like lots, out of a vessel containing them in the same manner as dice. Sometimes, saying, alternately, words expressing a negative and an affirmative, and then determining, according to the last span, whether negative or affirmative, to do the intended action or not; thirdly, by erecting two sticks, repeating a charm, and then determining by certain rules, according as the sticks fell backward or forward, to the right or to the left. See DIVINATION.

Rodborne. See Rodborne.

Rodgers, Ebenezer, a Baptist minister, was born March 16, 1788, in the Blaine valley, Monmouthshire, England. He studied with the Rev. Samuel Kilpin of Leominster, Herefordshire, for two years, and was then admitted into the Baptist College at Stepney, London, where he spent four years. Soon after the completion of his studies, he came to America on secular business, intending to return in a few months. He was persuaded by some of his friends to visit the Territory of Missouri, and for a time relinquished his purpose of returning to his native land. A Baptist church was soon formed at Chariton, about 175 miles west of St. Louis, and Mr. Rodgers was ordained its pastor, though he did not confine his labors to this one locality.

Rodgers, James, a Presbyterian minister, was born in Roxburghshire, in the South of Scotland, in 1785. His parents were in humble circumstances, and his education was limited to that which could be acquired in the common school. He owed much to his early religious training, and in childhood he had been so thoroughly drilled in the doctrines of the Shorter Catechism that in later years, planted on this foundation, he stood unMOVED amid hosts of heresies. He date his conversion from his fourteenth year. In 1819 he emigrated to this country, and settled in the then new village of Shorter, St. Lawrence County, N. Y., where he was licensed March 23, 1823, and ordained as an evangelist June 9, 1824. For a number of years he continued to labor in Hammond and some of the adjoining churches. He also gave a partial supply to a church in the township of Oswego, where he finally settled as stated supply in 1827, and was installed as the regular pastor in 1828. In 1848 he found his regular labor impossible, and he resigned this charge, although he continued to labor for short periods in other fields. He died Aug. 20, 1863. Mr. Rodgers was a remarkable man, and he proved himself an efficient and successful workman. His pulpit labors were characterized by a thorough knowledge of the Scriptures and deep spirituality. See Wilson, Presb. Hist. Almanac, 1865, p. 114. (J. L. S.)

Rodgers, John, D.D., a Presbyterian minister, was born in Boston, Aug. 5, 1727. After studying theology, he was licensed by the Presbytery of Newcastle in October, 1747. After this he went to Virginia, but not being permitted to preach there, he went to Maryland, and early in 1748 returned to Pennsylvania, where on May 25 he was married to Martha Newland, St. George, where he was licensed March 23, 1823, and ordained as an evangelist June 9, 1824. For a number of years he continued to labor in Hammond and some of the adjoining churches. He also gave a partial supply to a church in the township of Oswego, where he finally settled as stated supply in 1827, and was installed as the regular pastor in 1828. In 1848 he found his regular labor impossible, and he resigned this charge, although he continued to labor for short periods in other fields. He died Aug. 20, 1863. Mr. Rodgers was a remarkable man, and he proved himself an efficient and successful workman. His pulpit labors were characterized by a thorough knowledge of the Scriptures and deep spirituality. See Wilson, Presb. Hist. Almanac, 1865, p. 114. (J. L. S.)
Rodgers, Ravaud Kearney, D.D., a Presbyterian minister, was born in N.Y. city, Nov. 8, 1796. He was the son of John R. B. Rodgers, M.D., surgeon in the Revolutionary army, practicing physician, and professor in the medical department of Columbia College, New York city. His grandfather, John Rodgers, D.D., was minister of the First Church, in New York, founder of the Brick Church, and the first moderator of the General Assembly in 1789. In the year 1815 Ravaud K. graduated at Princeton College, and in 1818 he graduated at the Princeton Theological Seminary. In 1820 he was ordained and installed pastor of the Sandhill and Glen's bury Presbyterian church in New York. He remained ten years in that field. He was an ardent, noble, earnest young preacher, and associated with Drs. Bullins, Proudfoot, Prime, and others in the Bible cause, education, and all great works of social improvement and philanthropy. With a voice of trumpet power and glowing eloquence, he was a favorite at Sermon public meetings and anniversaries, and a leader in every good work. Genial, warm-hearted, and generous, he was a general favorite. In the year 1830 he received a call from the Presbyterian Church at Bound Brook, N.J., and, accepting the same, was installed pastor; and at that place, and in the Synod and the State of New Jersey, he left an impress of a pure heart and unspotted life. No minister of that State was more generally known or more universally respected. On all social occasions his presence was indispensable as the most agreeable and entertaining of men. As a member and officer of ecclesiastical bodies—whether General Assembly, Synod, or Presbytery—his great excellence of character and peculiar executive ability were illustrated. For a long time he was stated clerk of the New Jersey Synod, and a more faithful, popular, and accomplished servant never filled that office. His assiduity in the discharge of official duty, his punctuality in attendance, his perfect knowledge of the law and practice of the Church, and his clear, incorruptible and able exposition of the Scriptural revelation, which was always at his command, rendered him an authority in the courts of the Church. He was a model pastor, knowing all his people and their families. He called his own sheep by name; he carried them in his heart, and went about among them to do them good, for he was their trusted counsellor and confidential friend. He entered his pulpit with sermons thoroughly prepared, which he delivered with energy, life, and power. Even down to old age he was strong in the work of the ministry, and at seventy-five could outwork many of his younger brethren. As he drew near to fourscore, he resigned his pastoral charge, which he had held unbroken for five years. In 1874 he removed to Athens, Ga., where in the home of his daughter he spent the calm and beautiful evening of a long, laborious, and honored life. He was a philosopher as well as a Christian, the divine presence being as real to him as the light of the sun; and living in that light, he was as ready to be as to live; for, "whether living or dying, he was the Lord's." He died at Athens, Ga., Jan. 12, 1879. (W. P. S.)

Rodigast, Samuel, rector of the gymnasium of the Gray Convent in Berlin from 1698 to 1708, and previously adjunct professor in the University of Jena. He was intimately acquainted with Philipp J. Spener to the time of his death, in 1705. His claim to recognition in this place lies in his having composed the hymn Was Gott that, dass ist wohlgethan (1675), which has become a classic, and is used wherever the German tongue is known. It was a favorite with Frederick William III of Prussia, and was rendered on the occasion of his funeral, June 11, 1840.

Rödiger, Emil, doctor and professor of the Oriental languages at the University of Berlin, was born Oct. 13, 1801, at Sangerhausen. In 1821 he left the gymnasium at Halie, and entered the university for the study of theology and philology. In 1828 he commenced his lectures; in 1830 he was made extraordinary, and in 1835 ordinary, professor of Oriental languages. In 1860 he was called to Berlin, where he died, June 15, 1874. He was one of the first editors of the Zeitschrift der deutschen morgenländischen Gesellschaft, which review also contains a great many of his articles pertaining to Oriental literature. He wrote, Commentatio, quo Vultur Opinio de Interpretibus Arab. Libr. V. T. Histor. Refut. (Halle, 1829);—Chrestom. Syr. c. Gloss. (ibid. 1888);—De Origine et Indole Arabicae Librorum V. T. Historiorum Interpretationis libri duo (ibid. 1829). But his main work is his continuation of Gesenius's great Novus Theaurus Philol. criticus Lingue Hebr. et Chald. V. T. (Lips. 1853). He also edited several editions of his Teacher's Hebrew Grammar. See Literarischer Handwörter, 1874, p. 206; Schneider, Theol. Zeitschr. Jahrhbg., 1871, p. 375 sq.;—Winer, Theologisch-Hethologisches Handbuch, ii. 162;—Steinschneider, Bibliographisches Handbuch, p. 52 sq.;—and Index to vol. i—xxx of the Zeitschrift der deutschen morgenl. Gesellschaft. (B. P.)

Rodon. See Derbourn.

Rodriguez, Girão, called Father João, a Portuguese missionary, was born near Lisbon in 1559. He entered the Jesuit order in 1576, and in 1588 went to Japan, where he gave himself to the study of the language. He soon spoke the dialect of Nagasaki with facility, received the protection of the government, and consequently escaped the persecutions to which the other missionaries were subjected. He returned to Europe late in life, and died in 1583. His principal work was printed at Nagasaki, and was entitled Arte da Lingua do Japão (1604). It was translated into French by Labrousse and published by Remusat (1752), and the editor also wrote letters on the persecutions to which Christians were subjected in Japan, entitled Cartas Annuas de Nangazachi dos Anos 1604 e 1605, transd. into Latin (Antw. 1611-12) and into Italian (1808-10)—Annuas de 1609 e 1610 (Rome, 1615). Some smaller works of Rodriguez appeared at Rome in 1615 and 1625. See Antonio, Bibli. Hispana; Pagés, Bibliogr. Japonesa.

Roe is properly the rendering in the A. V. of ἐσπερια, teblīyāq (Cant. iv. 5; vii. 3), which is the fem. of ἐσπερί, tebel—the Rose-buck (so called from its beauty, Deut. xii. 15, 22; xiv. 5; xv. 22; 1 Kings iv. 23; elsewhere improperly "roe," 2 Sam. ii. 18; 1 Chron. xii. 8; Prov. vi. 5; Cant. ii. 9, 17; iii. 5; viii. 14; Isa. xiii. 14; "beauty," 2 Sam. i. 19). These are the masculine and feminine appellations of an antelope, which was considered the very impersonation of beauty; and so, in the later Hebrew Scriptures, i.e. from Isaiah downward, it is always used in an abstract sense, and is rendered by such terms as "glory," "beauty," "ornament," "delight," etc. The word was not only found in the various Aramaic dialects of Western Asia, but has spread to nations where we should have little expected to find it, as those of the extreme south of Africa. Thus the elegant speech of the Cape Hottentots ("dou độcke") is nearly allied to the gazelles of Asia, is named tebel by the Bocmanas, and tebe by the Caffres. The Sept. generally renders the word by ἐραχας; and this is given in the New Test. as the Greek equivalent of the Syriac tabitha.
of Israel" (2 Sam. 1, 19) and in the Song of Songs the comparison is frequently interchanged between the bridegroom and the bride. What can be more exquisite than the compound simile in ch. iv. 5? Ashael, the brother of Job, was "as light of foot as one of the gazelles in the field" (2 Sam. ii. 18); and the Gadites who gathered to David in the wilderness were "men of might," whose faces were like the faces of lions, and who were as swift as gazelles upon the mountains" (1 Chron. xii. 8). The gentle Tabitha of Joppa, the loving and beloved (Acts ix. 36), was doubtless so named because of her beauty, real or fancied. The gazelle was permitted to be eaten by the law of Moses, as it is a typical ruminant. It seems to have even been a standard of lawful and proper food — "Thou mayest eat flesh,... even as the gazelle... is eaten" (Deut. xii. 22). Whereas hitherto they had eaten the flesh of their flocks and herds only on occasions of these being offered in sacrifice, now that they were about to become a settled and an agricultural people, they might kill and eat their domestic animals without any such restriction, as freely as they had been accustomed to eat the gazelles which they took in hunting. It is probable that this animal formed a considerable portion of the animal food of the Hebrews, not only in their desert wanderings but before and after their captivity in Egypt. The venison which Isaac loved, and which Esau took with his quiver and his bow, and which could not be distinguished from kid when this latter was suitably dressed (Gen. xxvii), was doubtless the flesh of the gazelle. To this day the valley of Gerar and the plains of Shechem are the haunts of vast flocks of these agile creatures, and still the pastoral Arabs hunt them there and make savory meat. See GAZELLE.

The paintings of ancient Egypt present us with numerous examples of gazelle-hunting. Sometimes a battle is depicted, in which all the game of the country is driven before the hounds. In such scenes the great predominance given to the gazelle shows how large a proportion this animal bore to other quarry. Sometimes the capture of the wild animal was the object desired; in this case it was either trapped or snared in some way, or shot with blunt-headed arrows, and the hunter is seen leading home the gentle gazelle by the horns. Occasionally, too, this was accomplished by throwing the issa, as wild hares are now taken on the South American pampas. Large herds of gazelles were kept by the Egyptian land-holders in their parks and preserves, like deer with us. Frequently, however, the hounds, which were held two or three in leash, were loosed after the fleet-footed antelope, and pulled it down by sheer running, the hounds running on foot, which implies that the course could not have been long. At present, however, though large herds of gazelles are common enough, and the sport of chasing them is as keenly relished as ever, no breed of dogs cultivated in the East has a chance of bringing one down in a fair open run. They are hunted by the Arabs with a falcon and a greyhound. The repeated attacks of the bird upon the gazelle; in Western India the kalsipi (A. Bennettii, Sykes; A. coru, H. Smith), closely like the gazelle, but higher on the limbs, with the tail entirely black, and scarcely gregarious; all along the eastern shore of the Red Sea lives the ariel gazelle (A. Arabica), scarcely to be distinguished from A. dorcas except by being somewhat darker in color, and usually a little slighter in form. On the continent of Africa we have, in the north of Abyssinia, the A. Summaringii of Rüppell, an animal considerably larger than the gazelle, with boldly lyrate horns, and associating in pairs; on the western side of the desert, the kevel (A. kevela), nearer the gazelle, but with the horns compressed, more annulated, and lyrate; and, finally, in the southern half of the continent, the springbok (A. enchore) and the bleabok (A. pygargus), large species with lyrate horns, and the sides and flanks marked with conspicuous dark bands, which enclose a white patch on the buttocks. These merge into another group, chiefly inhabiting North Africa, containing the mhorr and the addra. See PYGARG. Of all these species the tebel properly includes only the A. dorcas and A. Arabica; and in all probability these were not distinguished, but supposed. Stanley (Syr. and Pales., p. 297) says that the signification of the word Adjalon, the valley "of stags," is still justified by the gazelles which the peasants hunt on its mountain slopes. Thomson (Land and Book, i. 252) says that the mountains of Nahptali "abound in gazelles to this day." See ARTELOPE.

So elegant is the form, so light and slender the limbs, so graceful the movements, so shy and timid the disposition, of the gazelle that the Oriental genius has ever delighted to make it the representative of female loveliness. The eye in particular is large, soft, liquid, languishing, and of the deepest black—qualities which are so admired in the eyes of an Oriental woman that to say "she has the eyes of a gazelle" is the most flattering compliment that can be paid to beauty. The poetry of the Arabs and Persians is full of such allusions, while the lightness and fleetness of the creature afford similes by which to illustrate the activity and grace of the youthful man. David, in his exquisite elegy on the death of Saul and Jonathan, calls his friend "the gazelle...
a few feet away. As you can see, the head of the animal is small and the body is large. Many of these animals are also known to take shelter in trees and other elevated areas.

Now, let's move on to the next part of the document. It seems to be discussing the history of a certain animal species and its behavior. The text mentions the use of these animals for their natural warmth and their value in certain cultural contexts.

Finally, the document concludes by mentioning the importance of these animals in the ecosystem and their role in maintaining biodiversity. It is a great read for anyone interested in wildlife and nature conservation.
be thought fit to continue the observance of these days as private fasts. There is no office, or order of prayer, or even a single collect, appointed for the Rogation days in the Prayer-book; but there is a homily appointed for Rogation week, which is divided into four parts, the first three to be used on the three Rogation days, and the fourth on the day when the parish make the procession. The fasts on the four days were called in Anglo-Saxon *gang dagus,* the old form of the name, "gang days," still lingering in the north of England. There was considerable opposition to the observance of rogations during the fifty days between Easter and Pentecost—a time which was one continued festival in the early Church. The Eastern Church does not keep Rogationtide, and even during the fasts of Wednesday and Friday during the fifty days. See Bingham, *Christ. Antiq.* xxii, 2, 8; Hunt, *Dict. of Theol.* s. v.; Eden, *Theol. Dict.* s. v.; Hook, *Church Dict.* s. v.

**Rogation Sunday**, the Sunday immediately preceding Rogation days (q. v.).

**Rogation Week**, the next week but one before Whitsunday. See *Rogation Days.*

**Rogda**, in Slavic mythology, was a Russian hero who slew the serpent's son Tugarin of Bulgarin, inimicable to any person born of a woman. Tugarin intended to challenge the prince Vladimir to mortal combat because he had married Lepa, daughter of the king of the Bulgarians, against her father's will, and Lepa made known the secret of Tugarin's invulnerability to her husband. Rogda, who had been taken from his mother's womb by means of an incision made after her death, went forth and successfully encountered the giant. See En-Rogol.

**Ro'gelim** (Heb. *Roghelim,* ῥόγελιμ, *treaders,* i. e. *fullers;* Sept. *Pωύαλίης,* a place in Gilead, the residence of Barzillai (2 Sam. xxvii, 27; xix, 31). It is possibly the present Ajlun, the principal village of Jebel Ajlun, on a wady of the same name, between Jerash and ed-Deir (Jabes-Gilead).

**Roger of Hexham.** See Richard.

**Roger of Hoveden,** an English historian and professor of theology, was born in Yorkshire, and lived beyond 1294, but the exact periods of his birth and death are not known. He is said to have been employed by Henry II in confidential services, such as visiting monasteries. He was by profession a lawyer, but was in the Church, and also a professor of theology at Oxford. After Henry's death he applied himself diligently to the writing of history, and composed annals from 731, where Bede left off, to 1202, the third year of king John. These annals were first published by Saville among the *Historiae Anglicae* (1595; reprinted, Frankfurt, 1001, fol.). Vossius says that he wrote also a history of the Northumbrian kings and a life of Thomas à Becket.

**Roger of Wendover,** an ancient English historian, of whom little is known, embraced the monastic life in the Abbey of St. Alban's, and died May 6, 1237. He published *Rogeri de Wendover Chronica,* sine Flores Historiarum (formerly ascribed to Matthew Paris), translated from the Latin by J. A. Giles (Lond. 1849, 2 vols., 8vo). See Allibone, *Dict. of Brit. and Amer. Authors,* s. v.; Darling, *Cyclop. Bibliog.* s. v.

**Roger, Abraham,** a Protestant minister, who emigrated to the English colonies about 1641, was pastor at the Dutch factory, Palicat, on the Coromandel coast, for ten years. He died about 1670. From the intercourse he had with the Brahmans he has given a valuable account of their religion and customs—*La Vraie Representation de la Religion des Bramesins* (Amherst, 1670, 4to).

**Rogereens,** so called from John Rogers, their chief leader. They appeared in New England about 1677.

The principal distinguishing tenet of this denomination was, that worship performed the first day of the week was a species of idolatry which they ought to oppose. In consequence of this they used a variety of means to disturb those who were assembled for public worship on the Lord's day.

**Rogers, Daniel,** a Puritan divine, was born in 1578, and was educated at Christ's College, Cambridge, of which he was chosen fellow. He became minister of Havermash, Buckinghamshire, and afterwards of Weathersfield, Essex. His death took place in 1652. His publications are: *David's Cost* (Lond. 1619, 8vo):—
*Practical Catechism* (ibid. 1633, 4to; 1640):—
*Baptism and the Lord's Supper* (3d ed. ibid. 1635, 4to; again 1636):—
*Matriornial Honor* (ibid. 1642, 4to):—
*Neuman the King's Favor* (2 Kings ii, 8, 50, fol.):—

**Rogers, Elymas P.,** a Presbyterian minister, was born in Madison, Conn., Feb. 10, 1815. Though reared in humble life, he had devoted Christian parents; they trained him in religion, and unable to give his natural family, when nine years of age he was sent to live with strangers, and, being the only colored boy in the neighborhood, was looked down upon by those who were prejudiced against his race. His meagre advantages for gaining an education were thereby lessened and his difficulties increased. He returned home in his fifteenth year, and labored with his father until 1835, when he was placed in the situation in the family of major Caldwell, of Hartford, Conn., who wanted a person who would work for his board and have an opportunity of going to school. In 1838 he became a communicant of the Talcott Street congregation in Hartford, Conn. Now he determined to study for the ministry, and in 1838 entered the Oberlin Institute in Whiteborough, N.Y., where he remained five years, teaching for his support during the winter, and studying for the ministry during the other portions of the year, until he graduated in 1841. He immediately removed to Trenton, N. J., as principal of the public school for colored children, and there he continued the study of theology under the care of the late Rev. Dr. Eli F. Cooley and the Rev. Dr. John Hall. He was licensed by New Brunswick Presbytery Feb. 7, 1814, and in 1845 was ordained and installed as pastor of the Witherspoon Street Church, Princeton, N. J. In 1846 he became pastor of the Plane Street Church, Newark, N. J. When he continued to preach until Nov. 5, 1869, when he went to Africa, with the object of travelling in the interests of the African Civilization Society, and while engaged in this work, died at Cape Palmas, Jan. 20, 1861. Mr. Rogers was a man of fine gifts, and remarkable poetic talent. Dr. Maclean, ex-president of the College of New Jersey, says of him, "This truly good man ought to be held in respect by all who have any regard for simple and unaffected piety. My estimate of his character was a high one." He wrote a large number of temperance hymns and two poems, one, *The Report of the Missouri Compromise Considered;* the other, *The Thanksgiving Sermon, and Duties of Men of Business* (Philadelphia, 1835, 8vo). See Wilson, *Preb. Hist.* 1862, p. 191. (J. L. S.)

**Rogers, Ezekiel,** a Congregational minister, was born at Weathersfield, Essex, England, in 1590. He took the degree of B.A. at Benet College in 1604, and that of M.A. at Christ's College in 1606, becoming the chaplain of Sir Francis Harrington at Hatfield, Essex. After five or six years, Sir Francis bestowed upon him the benefice of Rowley, Yorkshire, where he exercised his ministry for about twenty years, when he was silenced for nonconformity, though he was allowed the profits of his living for two years longer, and the privilege of nominating his successor. Restless under the

ROGERS

restored upon his liberty. Mr. Rogers came to America in 1658, where he commenced a new settlement in April, 1659, and was ordained in the following December. He continued to labor in this parish until his death, Jan. 23, 1690. Mr. Rogers gave his library to Harvard College, and his house and lands to the town of Rowley for the support of the Gospel. See Sprague, Annals of the Americ. Authors, &c., v. 1.

Rogers, George, an English clergyman, was born in 1741, and was for more than fifty years rector of Sproughton, near Ipswich. He published a Sermon (1736, 8vo):—Five Sermons (1818, 12mo); and edited, with a memoir, the Sermons of Rev. Edward Ecclesius (1806, 2 vols. 8vo). See Gentlemen's Mag. 1836, i. 555; Allibone, Dict. of Brit. and Amer. Authors, &c., v.

Rogers, George W. T., a minister of the Methodist Episcopal Church, was born in Holderness, N. H., Feb. 2, 1812, and was converted March, 1830, joining the Church in 1832. He preached his first sermon as local preacher in 1838, and, after preparation, entered the regular work in 1843. In 1864 he became superintendent, in 1866 effective, in 1867 superannuated, and died at the house of his son in Salem the next year. See Minutes of Annual Conferences, 1869, p. 104.

Rogers, Hester Ann, an eminent saint in the early annals of Methodism, was born in Macclesfield, England, in 1756. Her father, a pious man, died when she was but nine years old, and his peaceful end made an indelible impression upon her mind. She was at first greatly prejudiced against the Methodists; but her interest in them was aroused by hearing one of their preachers, and, although her mother threatened to turn her out of doors in consequence, deepened, until, on a visit of Mr. Wesley to her native place in her twentieth year, she fully joined them. Her maiden name was Roe, and in 1754 Wesley promoted her marriage with James Rogers, the most effective of his preachers, with whom she lived happily, occupied in all evangelical labors, until her death, Oct. 10, 1794, soon after the birth of her fifth child. She was a model of Christian purity and zeal, filling the office of female class-leader, and often addressing public congregations with remarkable pathos and power. For twenty years she had been a witness of the experience of perfect love. Her Journal has been published, also her Life, as a part of Methodist literature. See also Stevens, Women of Methodism, p. 38 sq.; Simpson, Cyclop. of Methodism, &c.

Rogers, Isaiah P., a minister of the Methodist Episcopal Church, was converted in the autumn of 1840, and soon after joined the Church. In July, 1865, he was the first missionary sent out by the Maine Conference, where the conference was divided, August, 1848, he became a member of the East Maine Conference. He was superannuated June 20, 1849, and held that relation until his death, at Benton, Me., June 20, 1852. See Minutes of Annual Conferences, 1852, p. 80.

Rogers, John (1), an English divine and martyr, was born about 1590. He was educated at Cambridge where he entered holy orders, and was appointed chaplain to the English factory at Antwerp, where he remained several years. There he met Tyndale and Covendale, through whom he was led to renounce popery. He married at Antwerp, and became pastor of a congregation at Wittenberg, which office he retained until the security of the country permitted. In 1558, he settled in the city of Geneva, REV. JOHN ROGERS, 1590-1595, invited by bishop Ridley, and was presented with the rectory of St. Margaret Moyseis and the vicarage of St. Sepulchre's, both in London, May 10, 1550. Bishop Ridley made him a prebendary of St. Paul's, St. Paul's, and rector of Chigwell, Aug. 24, 1551, and, later, dean of the same in 1572; chaplain to George II, then prince of Wales; and vicar of St. Giles's, Cripplegate, London, October, 1728. He died May 1, 1729. He wrote, The Visible and Invisible Church of Christ (2d ed. London, 1719, 8vo):—Neces of Divine Revelation (1727, 8vo):—Sermons (4 vols. 8vo). See Allibone, Dict. of Brit. and
ROGERS, Joseph, a Presbyterian minister, was born in Wiveliscombe, Somersetshire, England, June 11, 1815. He emigrated to the United States at an early age, and settled in New York city. He was converted when about twenty-two years old, pursued his preparatory studies under Dr. Owen, of New York city, graduated at Princeton in 1839, and was ordained to the Presbyterian Church at Princeton in 1844, and was licensed to preach the same year by the Presbytery of New York. After leaving the seminary, he labored at May's Landing and Pleasant Mills, Atlantic Co., N.J., in the employment of the Board of Domestic Missions, until 1850, when he received an appointment to the Church of Round Prairie, La., over which he was settled in 1850, as a pastor in the Presbyterian Church, because of failing health, he returned East, and spent the succeeding four years in preaching and teaching in Attleboro', Pa.; at Bridgeton, N. J.; the vicinity of Fredericksburg, Va.; and at Newtown, Pa. In 1857 he received a call to, and was installed pastor of, the churches of Kingwood and Frenc throat, N. J., where he continued to labor till his death, Aug. 29, 1863. Mr. Rogers was a diligent student, a ripe scholar, and of fine attainments in the different branches of a liberal education, especially in the Greek language and English literature. As a preacher he was naturally eloquent. See Wilson, Preb. Hist. Almanac, 1864, p. 192. (J. L. S.)

ROGERS, Lorenzo, a minister of the Methodist church, was born in Tuscarawas County, Ohio, March 12, 1804, and was converted in 1828. He entered the ministry in 1834, was superannuated by the Erie Conference in 1854, and died in Cleveland, O., Feb. 17, 1865. He was greatly influential in winning men to Christ. See Minutes of Annual Conferences, 1855, p. 131.

ROGERS, Nathaniel, a Congregational minister, was born at Haverhill, Suffolk, England, in 1598. He was educated at Emmanuel College, Cambridge, and entered the ministry in 1627, after serving for two years as a deaconic chaplain, became Dr. Barkham's assistant at Bocking, Essex, where he remained for five years; and obtaining the living of Assington, Suffolk, he continued there until June 1, 1636, when he sailed for New England, and arrived Nov. 16. He was ordained, Feb. 20, 1638, pastor at Ipswich; and died July 3, 1655. He published A Letter to the Hon. House of Commons at Westminster on the Subject of Reformation (1643). See Sprague, Annales of the Amer. Pulpit, i, 87.

ROGERS, Nehemiah, an English divine (said by some to have been a great-grandson of John Rogers the martyr), was born in 1594. He was minister of Deddington, Essex, and died in 1660. He published, Expositions of the Parables (1620-62):—Exposition of St. Luke x, 5-11 (1658, 4to), and other works.

ROGERS, Thomas (1), an English divine, was a native of Chelsea, and entered Christ Church in 1568. He was A.M. in 1576; chaplain to Bancroft, bishop of London, and in 1581 rector of Horingo, Suffolk, where he was held in great esteem. He died Feb. 22, 1616. Among his many works are, The Anatomy of the Minde (Lond. 1576, 8vo); The End of the World (Ibid. 1575, 4to); A Golden Chain Taken out of the Rich Treasure-house of the Psalms of David (Ibid. 1579, 1587, 12mo);—Historical Dialogue touching Antichrist and Poytery, etc. (Ibid. 1589, 8vo);—besides Sermons, etc. See Allibone, Dict. of Brit. and Amer. Authors, s. v.; Darling, Cyclop. Biblio., s. v.

ROGERS, Thomas (2), an English clergyman, was born in Warwickshire, Dec. 27, 1660, and was educated at the free school there. In Lent term, 1675, he entered Trinity College, Oxford, but soon after removed to Hart Hall, where he took the degree of A.M. and entered holy orders. In July, 1689, he became rector of Slapton, near Totewester, Northamptonshire. He died of small-pox, while on a visit to London, June 8, 1694, and was buried at St. Saviour's, Southwark. His writings were mostly

poetical and published anonymously, and were not at all becoming his character as a clergyman. We mention only, Luz Occidetalia, or Providence Display'd in the Coronation of King William, etc. (Lond. 1689):—The Loyal and Impartial Satyr (Ibid. 1693, 4to):—A True Protestant Bride (Ibid. 1694, 4to):—Commonwealth Emasculated, See Allibone, Dict. of Brit. and Amer. Authors, s. v.; Chalmers, Biog. Dict., s. v.

ROGERS, Timothy (1), an English clergyman, was born in 1589, became preacher of Essex, and died in 1650. He wrote, Righteous Men's Evidences (Lond. 1619, 8vo; 12th ed. 1637):—Roman Exercitata (Ibid. 1621, 4to; 1631, 24mo):—Good News from Heaven:—A Faithful Friend True to the Soul:—Christian's Pearl of Faith. See Chester, John Rogers (1601), p. 270; also Allibone, Dict. of Brit. and Amer. Authors, s. v.; Darling, Cyclop. Biblio., s. v.

ROGERS, Timothy (2), a Dissenting minister, was born at Barnard Castle, Durham, England, about 1660. He was educated at one of the Scotch universities, became evening lecturer at a chapel in Crosby Square, London, and afterwards one of the ministers of a Dissenting congregation in Old Jewry, which office he resigned in 1707. He died in 1729. Among his works are a few sermons, Discourses (Lond. 1696) on the course concerning Trouble of Mind and the Disease of Melancholy (Ibid. 1691). See Allibone, Dict. of Brit. and Amer. Authors, s. v.; Darling, Cyclop. Biblio., s. v.

ROGERS, William, D.D., a Baptist minister, was born at Newport, R. I., July 22, 1751. He entered the Rhode Island College in 1765, and was licensed to preach in August, 1771. In May following he was ordained pastor of the Baptist Church in Philadelphia. In 1777 he became chaplain of the army of Pennsylvania, and from 1778 to 1781 he served as brigade chaplain in the Continental army. In March, 1789, he was appointed professor of English and oratory in the College and Academy of Philadelphia, and in April, 1792, was elected to the same office in the University of Pennsylvania. He was made D.D. by the latter institution in 1790, having previously received the degree of A.M. from Yale College in 1780, and from the College of New Jersey in 1786. From April, 1803, to February, 1805, he also acted as pastor of the First Baptist Church in Philadelphia. In January, 1812, he resigned his professorship and received the pastorate of the Church in Townsend, Mass., where he remained five years, and was installed, Aug. 6, 1835, pastor of the Franklin Street Church, Boston, and died Aug. 11, 1851. He published An Address at the Dedication of the New Hall of Bradford Academy (1841), and a couple of occasional sermons. See Sprague, Annales of the Amer. Pulpit, vi, 145.

ROGERS, William Matticks, a Congregational minister, was born on the island of Alderney, Sept. 10, 1806. His name was Samuel M. Ellen Kittle, which was changed to Rogers after he became a preacher. When ten years of age he was brought to the United States, and lived with his uncle, Capt. W. M. Rogers, at Dorchester. He graduated at Harvard College in 1827, studied theology at the Andover Seminary, became pastor of the Peace Meeting Church in Townsend, Mass., and died in Brunswick, Me., 1852.

ROGERS, William Matticks, a Congregational minister, was born on the island of Alderney, Sept. 10, 1806. His name was Samuel M. Ellen Kittle, which was changed to Rogers after he became a preacher. When ten years of age he was brought to the United States, and lived with his uncle, Capt. W. M. Rogers, at Dorchester. He graduated at Harvard College in 1827, studied theology at the Andover Seminary, became pastor of the Peace Meeting Church in Townsend, Mass., and died in Brunswick, Me., 1852.
Rohan, Armand de, called the Cardinal de Soubise, grand-nephew of Gaston, was born at Paris, Dec. 1, 1717. In 1736 he became abbé of St. Epoire, and in 1737 abbé of Luire and Murbach. March 21, 1739, he was elected rector of the faculty of arts at Paris, and in 1741 he was made doctor of the Sorbonne and member of the French Academy. Cardinal Rohan procured his appointment as his own coadjutor, with the title of bishop of Poitiers. Benedict XIV created him cardinal April 10, 1747, when he took the title of Cardinal de Soubise, to distinguish himself from his grand-uncle; but he never held it in the actual charge. At the cardinal's death, in 1778, Rohan succeeded him in the see of Strasbourg and in the office of grand almoner. He died at Saverne June 28, 1756. This prelate was distinguished for his charity, zeal, and sweet and simple manner.

Rohan, Armand-Gaston-Maximilien de, Cardinal, was born at Paris, June 26, 1674. In 1690 he was canon of Strasbourg, and in 1705 coadjutor of the prince-bishop Egon of Forstenberg, with the title of bishop of Tiberias in partibus. After the death of his superior he was titular of the diocese, in 1712 became cardinal, and grand almoner in 1718. He held several rich abbeys, and, without any literary qualifications whatever, was elected member of the French Academy. He was also master of the Sorbonne. By virtue of his birth, fortune, and high office, he took an important part in the negotiations for peace in the Church of France which occupied the latter part of the reign of Louis XIV; and his connection with father Teller, confessor to the king, and with the cardinal de Bissy, bishop of Bayeux, made him one of the most influential persons in the national party. In the defense of the clergy of 1715 he basel all possible means to gain their acceptance of the papal bull Unigenitus, and gained his cause during the next year. During the regency he endeavored to bring about a reconciliation among the bishops, and persuaded forty to sign an accommodation, which ended their quarrels. His library was one of the greatest in France, and was under the charge of the learned abbé Oliva. Cardinal Rohan died at Paris July 17, 1749. The only work of any account which he left is Rituale Argentiniae (Strasbourg, 1742). See Gallia Christiana.

Rohan, Armand Jules de, archbishop of Rheims, was born at Paris, Feb. 10, 1685. At an early age he entered the chapter of Strasbourg, received in 1715 the abbey of Gard, and in 1720 that of Gorze. As the conclave of cardinal Rohan, he assisted in the election of Innocent XIII, and was afterwards made bishop of Rheims (May 22, 1722). He was very active in favor of the bull Unigenitus. After consecrating Louis XV, he took a seat in Parliament as one of the most influential peers, and gradually gave over the care of his diocese to vicars under the title of bishops in partibus. He died at Saverne Aug. 28, 1762. He published Breviarium Remense (Charleville, 1758).

Rohan, Ferdinand-Maximilien-Meriadec, IX.—E. Prince of Guemenc, brother of Louis, was born at Paris, Nov. 7, 1738. He studied at the Sorbonne, was prior of the faculty of theology, and received the degree of doctor. He was grand provost of the chapter of Strasburg and abbé of Mouzon, when in 1759 Louis XV gave him the archbishopric of Bordeaux. In 1781 he was transferred to the diocese of Cambrai, and in 1790 was made regent of the principality of Liege, and took the civil oath. He returned to Cambrai in 1791, where he remained until 1801, when he resigned the archbishopric and became grand almoner to the empress Josephine. He died at Paris Oct. 30, 1813.

Rohan, Louis-René-Edouard, Prince of Guemenc, a French statesman, was born at Paris, Sept. 25, 1734. His education was carried out at the College of Plessis and the Seminary of Saint-Magloire. In 1760 he was elected coadjutor to his uncle, the bishop of Strasbourg, with the title of bishop of Canopus in partibus, in which position he showed more love for pleasure than zeal in religious exercises. Made member of the French Academy in 1761, he was in 1772 sent as ambassador to Viennna. Here he was at first received with great favor, but by his extravagant mode of life and interference in political affairs he fell under the displeasure of Maria Theresa, and at her request was recalled to France in 1774. After his return he was appointed grand almoner, in 1778 cardinal, and archbishop of Bordeaux. As bishop of Strasbourg and of the Sorbonne and bishop of Strasbourg. In addition to these honors, he held several rich abbeys, but his large fortune was not in any way adequate to his scandalous luxury. In 1785 he was arrested and imprisoned in the Bastile for the part he had taken in the affair of the diamond necklace, which so gravely compromised Marie Antoinette. The friends of Rohan were indignant at the government, the clergy protested against his imprisonment, and at his trial he was finally acquitted, without even an expression of blame for his evident misconduct. But he could not recover from the disgrace of his dismissal from court, and retired to his diocese of Strasbourg, where he lived in comparative quiet for a few years. In 1789 he was deputy of the clergy of Hagenau to the States-general, but, being accused of disloyal conduct, resigned his seat. In order to be out of the jurisdiction of the French government, he retired to a part of his diocese beyond the Rhine, and finally, in 1801, in consequence of the concordat, resigned the bishopric of Strasbourg en masse. He died at Eaubonne, Feb. 17, 1803. The cardinal de Rohan was a man of fine appearance and agreeable manners. It is not to be denied that he had a fine mind and great amiability, but he possessed no judgment, put no check upon his passions or conduct, and was weak and easily led by favorites. See Mémoire de l'Abbé Georges; Levis, Sources.

Roh'gah (Heb. Rohqahh, רֹהַ֔קָּה), also written רֹהַ֖ק, clausor; Sept. Psaüyä v. v. Oqosyä, the second name of the four sons of Shamar, of the tribe of Asher (1 Chron. vii, 34), and fifth in descent from that patriarch. B.C. perhaps cir. 1658.

Rohini, in Hindû mythology, is the name of one of the daughters of Daksha, said to be the favorite wife of Chandra (or the Moon, which in Sanscrit, as in German, is masculine). She is the bright star of the Bull's eye, called in Arabic Aldebaran (or Al Dabaran). Other stars regarded as the sisters of Rohini are also numbered among the wives of Chandra.

Röhr, Johann Friedrich, a prominent rationalist, was born July 30, 1777, at Rossbach, on the Saale, of humble parents, and early displayed mental qualities which induced his friends to promote him with supporting study. He was then enabled to enter Leipzig University as a student of theology, and while there attended the lectures of Palter and Keil, and employed his mind in the examination of Kant's philosophy. Reinhard examined him for ministerial license, and recommended
him as assistant preacher to the University Church. Transferred in 1802 to Porta, he engaged in the study of modern languages, particularly English, and published a tabular view of English pronunciation (1803). Unpleasant relations with his colleagues led to his removal in the following year (1804). He next became pastor at Osna, near Zeitz, and remained in that station during the remainder of his life. He was called to be chief minister at Weimar; and to that position the government added the dignities of court preacher, ecclesiastical councillor, and general superintendent for the principality of Weimar, his duties, in addition to those connected with his relation to his parish, including general visits, examinations, inspection of the Weimar Gymnasium, and the filling of appointments. He held these positions from 1820 to 1848, when he died.

Rohr's historical significance grows out of the energy with which he asserted the theological position of vulgar rationalism. His views were for the first time presented in a connected scheme in Briefe über den Rationalismus, etc. (Zeitz, 1815), whose train of ideas may be summarized as follows: Religious truth may be ascertained from revelation or from reason, the latter term denoting the natural, not cultured, judgment of the mind. If such truth is grounded on reason, the system of rationalism will be self-sustained, which is the only tenable system. This rationalism rejects all religious teachings which have not universal authority and a strict adaptation to moral ends; for the ultimate end of religion is a pure morality. There is in Christianity a theology or doctrine respecting God, and an anthropology or doctrine respecting man in his intelligent and moral nature, and also in his sensuality and consequent depravity; but it does not properly include a Christology, since opinions respecting the first expounder of a universal religion can form no part of that religion. Stripped of all additions to his personality made by the evangelists, Christ is simply a man, through the greatest; and even a unique, man. A subsequent work, entitled Grund- und Gläubenssätze d. evangel.-prot. Kirche (1892), was intended to unite the Church for its protection against its Roman Catholic, and still more against its Pietistic, adversaries, and to that end was sent to a number of theological faculties for their approval. The effort failed, however, as Rohr's fellow-rationalists found it to be too numerous; and in the second and third editions (1834, 1844), he gave a summary of the essential teachings of the Gospel in specifically Christian language. There is a true God, who is proclaimed to us by Jesus Christ, the only begotten Son, and who deserves our profound veneration because of his perfection; which perfection can be truly rendered only by the cultivation of a sincerely virtuous character and life, and for this work we may hope for the aid of the Divine Spirit. As God's children, we may confidently look for his help in earthly troubles, and in the consciousness of moral weakness and unworthiness we may look for grace and mercy through Christ; while we may be assured of enduring continuance and a better, redemptive life.

It is needless to add that throughout his official life Rohr was engaged in controversy with the orthodox theologians of his time, e.g. Reinhard, Harms, Hahn, Hengstenberg, Sartorius, etc., whom he accused of literal interpretations, and similar offenses. He was utterly incapable of appreciating the aims of such spirits as Schleiermacher, Twesten, etc., in the direction of a higher development within the limits of Protestant freedom; and in consequence of this incapacity he blundered into a dispute with Hase on the occasion of the appearance of the Deutsche Bauzeitung. When the latter, which Hase ended by clearly demonstrating that the "rationalism of sound reason" is utterly unscientific and has no regard for the facts of history. His peculiar views and tempers are reflected also in his sermons. The moral element predominates, of course, and the supernatural is reduced to natural proportions. His Christologische Predigten (Weimar, 1831, 1837) are not Christological in character, exhibiting Jesus simply as "the pattern and example of true culture," etc. His casual sermons, however, sometimes present all the characteristics of truly religious discourse. His published homiletical works are very numerous. In addition to the works mentioned, we notice the Kritische Prediger-Bibliothek, which under various names he edited from 1810 to 1848; - Palästina zur Zeit Jesu (Zeitz, 1816; 8th ed. 1845); - Luther's Leben u. Wirken (ibid. 1817; 2d ed. 1829); - Die gute Sache d. Protestantismus (Leips. 1843), and others.

Rohmon, the great serpent, an idol of the Caribbeans.

Rómus ('Púmuq), a Jew who returned to Jerusalem from Babylon with Zerubbabel (1 Eadw. v. 81; evidently the Réhum (q. v.) of the Heb. texts (Erica ii, 2; Neh. vii. 7).

Rók, or Rók, in Persian mythology, was an immense bird, so large that it bore elephants to its young in the nest. An egg of this monster once fell from its nest on the Alborzsh, and with its fluid overflowed the birthplace of the village. Legends say that fables are met with everywhere; but it is remarkable that the inhabitants of Greenland are said to make use of very powerful bows, each formed of two claws of some gigantic bird, which are often found in the ice. It would accordingly seem that not everything said of the rók is false. There have been mambas and amphiabias whose size far exceeded that of any similar animals of our era; and there may, in like manner, have been birds which could as readily bear away a camel as the condor can a young llama.

Róland, in Frankish legend, was a celebrated hero belonging to the circle of Charlemagne's paladins. He was of enormous size, and so strong that he could pull up the tallest pine by the roots, and use it as a walking-stick and club. His sword split a block of marble without injuring its edge. The numerous Roland columns found in the towns of North Germany are said to have been erected by Charlemagne in honor of this hero; but they are probably of much later origin, and served to designate the place where justice was administered in the emperor's name, so that they were some sense his representatives.

Roldan, Luisa, daughter of the following, was born in 1654, and became a distinguished artist. She assisted her father in many of his works, was pensioned by Philip IV, and confided with much of the work upon the Escorial. Her principal productions are the statues of Mater Dolorosa, John the Evangelist, and St. Thomas. She died at Madrid in December, 1704.

Roldan, Pedro, a Spanish sculptor, was born in 1624 at Seville. He studied at Rome, where he was a member of the Academy of St. Luke. Roldan executed a great number of works in Madrid and at Seville, the best of which is a Christ on the Cross. He died in 1700.

Rolf, in Norse mythology, was one of the most celebrated kings of Denmark, who was induced to adopt the surname of Kraki by the following occurrence. A poor youth named Voeggrúir went to the palace and looked steadfastly at the king, until asked why he gazed so long, when he was heard that he had heard that Rolf was the greatest man in Northland, but that he found the throne occupied by a Kraki (diminutive wight). Rolf responded, "Thou hast given me a name, now give me a present" (which was the bestowal of a name). Voeggrúir declared that he had nothing to give. "Then," said Rolf, "I who have possessions, will give a present," and he handed over a ring of gold, on receiving which Voeggrúir joyfully exclaimed, "Lord, I will avenge thee should any come near to thee in malice!"
The king's reply to this—"Voeeggril is pleased with a little matter"—became proverbial. The armies of Rolf Kraki were celebrated, especially the twelve Berserkers (according to others, eleven, himself being the twelfth), whom he once sent to assist his stepfather Adils, king of Sweden, against Ali, king of Norway. After gaining the victory, Adils refused to give the promised reward to either the Berserkers or king Rolf. The latter, accompanied by the Berserkers, accordingly visited the court of Adils and reminded him of his pledge. Adils invited the guests to a friendly banquet in the largest hall of his palace, in the centre of which he caused an immense fire to be built, and then reminded Rolf and the Berserkers that they had vowed never to flee from either fire or sword. The fire eventuated in the burning of Rolf's clothing, on which he rose, threw his shield into the flames, and passed through them with his companions, while he exclaimed, "He, surely, does not dread the fire who voluntarily rushes into it!" He then seized the servants who had kindled the fire and threw them into it, and emphatically demanded his parley. He obtained the ring Sviagría and a mighty horn filled with gold, and departed; but Adils rapidly assembled his warriors and followed in pursuit. To distract his pursuers, Rolf, having reached the heath of Fyriswall, scattered pieces of gold over the ground, and so actually delayed the pursuit; and when Adils approached him, he threw down also the costly ring and dismounted from his horse to get the ring, and at this moment Rolf inflicted on the rear of his horse a shameful wound, as he cried, "I have bent like a hog the richest man in Sweden." He then picked up the ring himself, and while the king's wound was bound up by his followers, succeeded in gaining the ships with his treasure and his mother, and returned to Denmark. From this incident gold was called Fyriswall seed, or Kraki's seed.

Rolin, Jean, Cardinal, was born in 1408. At twenty-two he was canon and archdeacon. In 1451 he became bishop of Chalon, which see he exchanged in 1456 for that of Autun. He obtained the purple in 1458; and continued to add to the number of his benefices and lived in luxury. He gained possession by fraudulent means of the abbey of St. Martin at Autun in 1451, built the cathedral in that place and also the one at Chalons, both of which he enriched with works of art. He was confessor to the dauphin, afterwards Louis XI. He died at Auxerre July 1, 1485. See Perry, Sir Thomas of Chalons.

Roll (רל, megalill; Sept. κεφαλίν; but in Ezra vi, 1, the Chal. יֶפֶח, a book, as elsewhere rendered: in Isa. viii, 1; יֶפֶח, gilgoth, a tablet, once of a mirror, iii, 20). A book in ancient times consisted of a single long strip of paper or parchment, which was usually kept rolled up on a stick, and was unrolled when a person wished to read it. See Book. Hence arose the term megalill, from gold, "to roll," strictly answering to the Latin volume, whence comes our volume; hence also the expressions, "to spread" and "roll together" (in Heb. נסיך, [2 Kings xix, 14] and דֶּסֶכ [Isa. xxxiv, 4]; in Gr. ἀντιστάσεως and πτερύγων [Luke iv, 17, 20]), instead of "to open" and "to shut" a book. The full expression for a book was "a roll of writing," or "a roll of a book" (Acts iii, 23). (Job xlii, 20). The term megalill is occasionally used for "roll" stands by itself (Zech. vi, 1, 2; Ezra vi, 2). The κεφαλίν of the Sept. originally referred to the ornamental knob (the umbilicus of the Latins) at the top of the stick or cylinder round which the roll was wound. The use of the term megalill implies, of course, the existence of a soft and pliant material: what this material was in the Old-Test. period we are not informed; but, as a knife was required for its destruction (Jer. xxxvi, 22), we infer that it was parchment. The roll was usually written on one side only (Mishna, Erub, 10, § 3), and hence the particular notice of one that was written within and without" (Ezek. ii, 10). The writing was arranged in columns, resembling a door in shape, and hence deriving their Hebrew name (יווֹלֶל), just as "column," from its resemblance to a column, or pillar. It has been asserted that the term megalill does not occur before the 7th century B.C., being first used by Jeremiah (Hitzig, in Jer. xxxvi, 2); and the conclusion has been drawn that the use of such materials as parchment was not known until that period (Ewald, Gesch. i, 71, note; Gesenius, Thesaur. p. 299). This is to assume, perhaps too confidently, a late date for the composition of Ps. xl, and to ignore the collateral evidence arising out of the expression "roll together" used by Isaiah (xxxiv, 4), and also of the probable reference to the Pentateuch in Ps. xi, 7, "the roll of the book," a copy of which was deposited by the side of the ark (Deut. xxxi, 26)—Smith. The book of Esther is specially designated by the Hebrew term Megillah. See Megilloth.

Roll-moulding. This term has been popularly, but very incorrectly, given to a moulding much used in Decorated and late Early English work, especially in strings and dripstones. Its varieties are numerous, and though some of them bear resemblance to a roll of parchment, others are very different. Some of these varieties, in which the square fillet is more decidedly marked, have been called the "roll and fillet moulding." It is sometimes called the scroll-moulding, from its resemblance to a scroll of paper or parchment with the edge overlapping. The name of roll-moulding is often applied to the common round, or bowtell.

Roll and Fillet. String, Dorchester, Oxfordshire.

Rolle, Johann Heinrich, a German composer of church music, was born at Quedlinburg in 1718. He was the successor of his father as director of music at Magdeburg in 1752. He died in 1785. Among his principal works are the oratorios Death of Abel and Abraham on Mount Moriah.

Roller (Ezek. xxx, 21), chittál, בֶּלֶט, a bandage, so called from being covered around a broken limb to keep the fractured parts in place till healed. So Rosenmüller explains the figure (Sektlos, ad loc.). The roller, in surgery, is a long fillet or strip of muslin or other webbing rolled upon itself in a cylindrical form, employed to give mechanical support in many of the diseases and injuries to which the human body is liable. In the case of a broken arm, the surgeon brings the fragments of the bone together in normal position, and next places the limb in splints or stays lined with cotton, wool, or other soft material, to protect the flesh against unequal pressure, and then secures the whole by firmly winding the roller round and round the limb over the stays, so as to maintain the broken ends of the bone in copartition until the process of ossific reunion is completed. The familiar manner of this incidental reference shows that the practice of the present enlightened surgery was known to the profession in the days of Ezekiel. The name used to designate this bandage not only implies the form giving the greatest facility to
its ready application, but is the very word which scientific works of the present day employ to express the same thing. The object of this revelation, as it would seem, was not to impart information respecting the special contrivances of the healing art, but to present to the mind of the prophet the great prospective fact that the predicted disability of Pharaoh would be permanent, as one of the essentials to restorative treatment would be wanting.

Rollin, Charles, a French historian, who formerly enjoyed, if he did not merit, an extensive popularity, was the son of a cutler, and was born in Paris, Jan. 30, 1661. He studied at the College du Plessis, where, in 1683, he was elected a fellow of the College, and four years later obtained the chair for himself. In 1688 he was called to the chair of eloquence at the College Royal de France, and for some ten years he discharged the duties of his office with remarkable zeal and success. In 1694 he was chosen rector of the University of Paris, a dignity which he held for two years, and signalized his brief tenure of office by many useful reforms, both in regard to discipline and study, and by his warm defence of the privileges of the university. His efforts to revive the study of Greek, then falling back into neglect, were particularly creditable to him, although his career as rector constitutes perhaps his best display of the spirit which has certainly left a more permanent impression than his writings, for its influence is perceptible even to the present day. In 1699 he was appointed coadjutor to the principal of the College de Beauvais; but was removed from this situation in 1712 through the machinations of the Jesuits, for Rollin was a strenuous Jansenist. For the next three years he devoted himself exclusively to learned study, the fruit of which was his edition of Quintilian (Paris, 1715, 2 vols.). In 1729 he was re-elected rector of the university, and in the same year published his Tractat des Études, which M. Villemain has pronounced "a monument of good sense and taste," and which is justly regarded as his best literary performance, for his Histoire Ancienne (ibid. 1730-38, 12 vols.), though long prodigiously popular, and translated into several languages (the English among others), is feeble in its philosophy, jejune in its criticism, and often inaccurate in its narrative. Nevertheless, to multitudes both in this country and abroad, this work has afforded the introduction to the study of ancient history. Frederick the Great, then the prince royal of Prussia, among other princely nobilities, wrote to compliment the author, and opened up a correspondence with him. In 1738 Rollin published his Histoire Romaine (ibid. 9 vols.), a much inferior work, now almost forgotten. He died Sept. 14, 1741.

Rolling-thing, ἐγωά, golgal, Job xxvii, 18; rendered by the A. V. "wheel" in Ps. lxxxiii, 13. Generius (Thesaurus, s. v.) prefers chaff, stubble, in both passages. The same word is used for wheel (q. v.) in Isa. v, 28; Ezek. x, 2, 5, xxiii, 24, and for whirhwind (q. v.) in Ps. lxvii, 19 ("heaven"); Ezek. x, 13 ("wheel"). There is, however, a wild archeology (Arab. akbād) in Psalms and Proverbs, where the Arabic chibbā or wheel, and what in growing out throws out branches of equal size and length in all directions, forming a globe a foot or more in diameter. In the autumn this becomes dry and light, breaks off at the ground, and flies before the wind. Thousands of them leap and roll over the plain, and often disturb travellers and their horses. This plant is thence in France it has formed the introduction to the word gol gal of Isaiah and the Psalmist than anything before suggested (Loud and Book ii, 357 sq.). Some (Smith, Bible Plants [Lond. 1877]) have held the golgal to be the so-called "Jericho rose" (Anastatica Hierichonti a), a small, ligneous, cruciform plant, which has the singular habit of growing when planted in water. In the summer it dries up into a ball, which might readily roll before the wind, except that it is held fast to the earth by its strong tap-root.

Rollock, Ronsart, first principal of the College of Edinburgh, was born in 1555 in the vicinity of Sterling, Scotland. From the school at Sterling he went to the University of St. Andrews, and became a student of St. Salvator's College. As soon as he had taken his degree he was chosen professor of philosophy, and began to read lectures in his own college. He left St. Andrew's in 1588, having been chosen in 1582 to be the principal and professor of divinity of the new Edinburgh University. In 1583 he with others was appointed by Parliament to confer with the papal lords. In 1585 he was appointed one of the visitors of the colleges, and in 1597 was chosen moderator of the General Assembly. He died at Edinburgh, Feb. 28, 1598. His only English work is, Certain Sermons on Several Places of St. Paul's Epistles (Edinb. 1597, 8vo). The rest of his works are in Latin—commentaries on Daniel, St. John's Gospel, Romans, and the epistles. He also published Prolegomena in Primum Librum Quaes. The, Brexit: Tractatus de Vocatione Efficaci (Edinb. 1597) — Questions et Responsones Adiectus ad Federic Des, etc. (ibid. 1596, 8vo) — Tractatus Brevis de Providentia Dei : et Tractatus de Escommunications (Lond. 1604: Geneva, 1605). His Life of Rollock (supplement to Encyclopl Brit.; Spotswood, Hist. Book, vi; Chalmers, Biographical Dictionary, s. v.; Allibone, Dictionary of British and American Authors, s. v.)}

Roma, the personification of the city of Rome, and as such called Deus Roma. She was represented clad in a long robe, wearing a helmet, in a sitting posture, strongly resembling the figures of the Greek Athena. She was in reality the genius of the city of Rome, and was worshiped as such from early times, though no temple was erected to her till the time of Augustus. After this their number increased throughout the empire.

Romaic (or Modern Greek) Version. Romaic, or Modern Greek, is the vernacular language of about 2,200,000 inhabitants of the ancient lands dispersed throughout the Turkish empire, as well as of the inhabitants of the modern kingdom of Greece. In this vernacular several versions of the New Test. exist. The earliest was printed at Geneva in 1638, in parallel columns with the inspired text, and was executed by Maximus Calliurgi (or Calliuri, as he is sometimes called), at the solicitations of Haga, the ambassador of the then United Provinces of Constantinopole. This translation, which is remarkable for its close and literal adherence to the Greek original text, is preceded by two prefaces, one by the translator, and the other by Cyril Lucas, patriarch of Constantinople. This edition, which had the title in Greek "Καινὴ Διάδεξις τοῦ Κυρίου Ἰησοῦ Χριστοῦ," was, however, in the hands of the translator in London in 1623. A second edition was published in 1658, in 12mo, and was printed with corrections in 1708 by the Societas for Propagating the Gospel in Foreign Parts, and another edition was issued by the same society in 1706. A reprint of this version, in 12mo, was published at Halle, in 1710, at the expense of Sophia Louisa, queen of Prussia, under the title," Καινὴ Διάδεξις τοῦ Κυρίου καὶ Σωτῆρος Ἰησοῦ Χριστοῦ" etc. in London, for the Societas for Propagating the Gospel in Foreign Parts, and another edition was issued by the same society in 1706. A reprint of this version, in 12mo, was published at Halle, in 1710, at the expense of Sophia Louisa, queen of Prussia, under the title," Καινὴ Διάδεξις τοῦ Κυρίου καὶ Σωτῆρος Ἰησοῦ Χριστοῦ" etc. in London, for the Societas for Propagating the Gospel in Foreign Parts.
ROMAIC VERSION 69

BIBLE SOCIETY'S VERSION.

1. ἐν ὑπέρ ἠτὸς ὁ λόγος,
   καὶ ὁ λόγος ἦν παρὰ τῷ Θεῷ,
2. καὶ ὁ λόγος ἦν ἡμῖν ἐκ τοῦ Θεοῦ.

See The Bible of Every Land, and the Annual Reports of the British and Foreign Bible Society. (B.F.)

ROMAINE, William, an English divine and writer, was born at Hartlepool, county of Durham, Sept. 25, 1714, and was the son of a French Protestant who took refuge in England upon the revocation of the Edict of Nantes. Romaine attended school at Houghton-le-Spring for seven years, and then entered Hertford College, Oxford, in 1730 (or 1731), and thence removed to Christ Church. He took his degree of A.M. Oct. 15, 1737, having been ordained deacon the year before. He became curate of Lee Trenchard, Devonshire, in 1737; was ordained priest in 1738, and the same year curate of Banstead and Horton, Middlesex. In 1741 Daniel Lambert, lord-mayor of London, appointed him chaplain. In 1748 he became lecturer of St. George's, Botolph Lane, and St. Botolph's, Billingsgate; and in the following year (1749) lecturer of St. Dunstan's-in-the-West, which position he held until his death. In 1750 he was appointed assistant preacher at the church of St. George's, Hanover Square, and continued until 1756; in 1752 professor of astronomy in Gresham College; curate and morning preacher at St. Olave's, Southwark, in 1756-1759; morning preacher at St. Bartholomew the Great, near West Smithfield, 1759, for nearly two years; chosen rector of St. Andrew Wood Street, in 1755; and held that office till 1774, an election which was disputed, but confirmed by the Court of Chancery in 1766. In the duties of this office he continued faithfully employed until his death, July 26, 1795. Romaine's best-known works are, Practical Commentaries on Psalm cxxi (Lond. 1747);—The Lord our Righteousness, two sermons (ibid. 1738, 8vo);—Twelve Sermons on Samuel's Song (ibid. 1758-59, 8vo);—The Life of Faith (ibid. 1763);—Scripture Doctrine of the Sacrament of the Lord's Supper (ibid. 1765)—Walk of Faith (ibid. 1771, 2 vols.);—Essay on Psalmody (ibid. 1775). See Allibone, Dict. of Bril. and Amer. Authors, s. v.;—Darling, Cyclop. Biblical, s. v.

Romani'tie-ëzer (Heb. úk. [for Romans' E'zer], ῥόμαντιεῖζερ, ῥόμαντιείζερ, heights of help; Sept. Ῥωμαιόντας, v. t. Ῥωμαίοντας, Ῥωμαίοντας), the tenth name of the sons of the Great Royal House, which appears in the time of David. He was chief of the twenty-fourth section of the singers, and his family, consisting of twelve persons, were among those engaged in the music of the tabernacle service (1 Chron. xxv. 4, 31). B.C. cir. 1014.

Roman (Ῥώμαιος), a citizen of the Roman empire (q. v.) (1 Mac. xvii. 34, 38; xii. 9, xiv. 30, 46; 2 Mac. viii. 10, 36; xi. 54; John xi. 48; Acts ii. 10; xvi. 21, 37, 38; xxii. 25-29; xxiii. 27; xxv. 16; xxviii. 17). Such persons, wherever born, were entitled to special privileges. See Citizenship.

Roman Art. The ancient Romans were characterized by a strong practical feeling. They had immense organizing; governing power; but they had little of that fine aesthetic sensitivity which is necessary as the foundation of an indigenous, native art with a people. Still, the position of Rome with reference to the general history of art is very important. It is marvellous, indeed, that a people who seemed originally to have had so little native talent for art should have become the most conspicuous patroners of art in all history. The inability of the Roman people to originate works of high art was recognised by their own writers. Virgil wrote: "To others it is granted to give life to marble and to lend breath to bronze, but the art of Rome is to govern nations, to conquer the proud, and to spare the weak." The Romans may be compared to rich people in a day who desire to possess works of art without knowing how to appreciate or understand them.
or who wish to use them as a means of displaying their ostentatious luxury. The presence of works of high art also created a proud rivalry among the aristocratic and wealthy which is altogether distinct from the patronage to art which comes from native, artistic impulse. During the first hundred and fifty years of its existence, Rome might be considered as an Etruscan city, so fully did the Etruscan spirit prevail in all her temples and other works of art. During the first two centuries of the republic, almost no works of art were executed within this great capital, though the names of a few Greek artists in Rome are recorded as early as five hundred B.C., before Christ.

With the conquest of Carthage first, followed by the conquest of Greece and Egypt, a new epoch was opened in the artistic life of the Roman people. Rome now became the great storehouse of the art treasures of the entire world. Greece especially was despoiled to enrich the private palaces and majestic public buildings of the great metropolis. With this gathering of the art treasures of the world into the great capital commences what may with propriety be called the beginning of the development of a true Roman art. The chief development of Roman art lay in the department of architecture. Carving and sculpture were employed in ornamenting public and private buildings of all grades, both in Rome itself and in all the remotest cities of the vast empire, these arts were practiced exclusively by Greek sculptors and painters. The great majority of architects, also, in the Roman dominions were Greeks, though their work was characterized by Roman elements and was executed in the Roman spirit.

The Romans used both stone and brick with extraordinary skill in their buildings. These materials were employed with great ingenuity and variety, both with and without mortar. The Romans adopted from the Etruscans the round arch and its consequence, the round vault, and vaulting are characteristic features of Roman architecture. By using these they were able to erect massive and lofty structures of pleasing lightness and with economy of material. Indeed, without the arch Roman architecture would not have had an existence. By the use of the arch and the vault, Roman architecture has given rise to the Byzantine style, and, through this, has inspired all subsequent architecture. Through the arch Roman architecture forms the connecting-link and the transition medium from the art of antiquity to the art of mediæval and modern times. The Romans used the vault as the transition to the dome, and thus, through half-domes, to the light and airy architecture of the Byzantine times. They also built circular temples, which, originally at least, were more usually consecrated to Vesta, with a simple circular cell, surmounted by a dome, as in the Pantheon.

From the traditions of their early Etruscan neighbors they preferred the square cell to the Greek rectangular oblong cell in their rectangular temples. Especially was this the case in Rome itself. The temples they built in other parts of the empire, especially in Greece and the former Greek colonies, were built after the plan of Greek originals; but these were decorated after the modified Greek manner, which the Romans adapted at the metropolis.

The Romans greatly modified all the styles of Greek architecture. To the Doric they added the Tuscan base. This gave the order much wider adaptability to the uses for which the Romans wished to employ the style; that is, in forming colonnades and pilasters to many kinds of buildings, whether circular, elliptical, or rectangular. The characteristic feature in the Ionic order, which they adopted from a single known Greek original, making volutes face all four sides of the capital. As half-columns or pilasters this modification was more fortunate. The Ionic order was only used by them as an intermediate style, in the second story of buildings, never in temples or other buildings a single story in height. The Corinthian order, which had hardly obtained its full capacity of development under the Greeks, was most happily used by the Romans. The Ionic volute, in a modified form, was introduced in the midst of the Acanthus. Thus was taken the first step to the complete union of the Ionic and Corinthian styles in the most characteristic and original decorative feature in Roman architecture, though it was doubtless elaborated by the hands of Greek workmen under the Roman rule. The capitals of columns and the entablatures were often covered with an amount of elaborate decoration which finally overwhelmed and almost destructive of good architectural effect. See Architecture.

In considering the classes of buildings erected by the Romans, the student of Egyptian or Greek art is surprised at the small number of temples constructed by the Romans in comparison with other edifices. The noblest monument of Roman architecture is the Pantheon, which is preserved almost in its entirety. Of other famous temples, as that of Jupiter Capitolinus, there are now no remains. The most magnificent temple built under the Roman dominion was that of Jupiter Olympus at Athens. The temples at Palmyra and Baalbec surprise by their size and the magnitude of the columns. The blocks and blocks of stone in these temples and arches, show an architectural elegance and purity they are very defective.

Of buildings of civil architecture the forum may first be considered. The forum was used, as by the Greeks, as a place for marketing, for assembling the people for the transaction of public business, for the election of officers, or for other purposes. The forum was surrounded by colonnades, which were frequently richly decorated. Besides the original Roman forum, various emperors laid out others, which served similar purposes. In the further development of the public life, the transaction of a portion of public affairs was transferred to special buildings, of which the basilicas are the most important. They were intended for courts of justice and the exchange for merchants; finally shops and libraries were added, and the basilicas almost served the varied purposes of the forums. The basilicas were generally rectangular and oblong in shape, though some were nearly square and were vaulted. The oblong basilicas usually had a round apsis at one end. These forms were furnished the starting-points for the two great early styles of Christian architecture—the oblong, for the so-called basilican churches in Italy; and the vaulted ones, for the Byzantine style in Constantinople. Thus we find in the Roman basilicas the most typical example of the meeting-place between classical and Christian architecture. See Basilica.

Triumphal arches form a most important feature of Roman architecture. They were very stately in form and costly in execution. This use of the arch they had doubtless derived from the Etruscans. The most important arches to signalize victories are those of Septimius Severus, Titus, and Constantine. The arch of Titus has peculiar interest to Christians, inasmuch as upon a bas-relief on the inside of the arch are cut models of the seven-branched candlestick and other vessels of the Temple service which Titus carried with him to Rome after his conquest of Jerusalem. Archs were erected in many cities to commemorate also the erection of public works of great extent by the emperors or other public officials. See Arch.

Originally, the Roman theatres, like those of Greece, were semicircular in form. But, while the theatres were cut in the solid rock on the side of some lofty hill, with the stage in an elevated landscape. In Rome they were built up, like other edifices, in the midst of the most populous cities, and the walls were decorated with colonnades, with vaulted arcades leading through the different stories to the seats. Theatres of vast size were built in Rome and in many provincial cities. The best preserved is at Orange, in France. But the amphitheatre was the specially characteristic form of theatre-building with the Romans. This was
ROMAN ART 71 ROMAN CATHOLIC CHURCH

built of vast size in even the most distant provincial cities. The largest are the Colosseum at Rome and the amphitheatres at Capua, Verona, Pola, Nimes, and Constantine in Africa. It is estimated that the Colosseum could contain over sixty thousand spectators. In its arena gladiatorial sports of the most cruel character took place, and by their ferocity hastened the depravation of manners and morals which largely caused the downfall of the empire. See THEATRE.

The Colosseum has its characteristic feature in Roman architecture. These were laid out upon a scale of immense grandeur. The baths of Caracalla covered thirty-six acres. The vast edifices in this structure were highly decorated, and contained almost innumerable works of sculpture and painting. Several thousand bathers could be accommodated at one time. Elegant halls were also provided for reading, conversation, music, boxing, and other lighter games of various sorts. Other baths of vast size were built by various emperors, as Diocletian, Agrippa, Titus, and Vespasian. See BATHES.

The arch was most successfully applied to the erection of columns and aqueducts. Many of these were erected with surprising boldness, and of a size and length to excite the wonder of the modern beholder. Though frequently without much architectural decoration, the aqueducts generally have graceful outlines, and by their long lines, as they sweep for miles over the plain, mark the power of the people who ruled the world. See AQUEDUCT.

The lack of perfect artistic taste was manifested by the Romans in the erection of columns of victory, which received long sculptured portrayals of the achievements of victors. As the sculpture is thus placed utterly out of the reach of the eye, its effect is lost upon the beholder. See COLUMN.

The history of the Roman domestic residence is to be traced in the progress of Roman luxury. In the early career of the state, private houses were extremely simple. During the empire, all the luxurious richness of decoration that wealth and art could supply was employed in adorning the houses of the wealthy. Good taste was soon overwhelmed in costly decoration. The houses in the provincial city of Pompeii indicate what may have been the luxurious decoration of the capital. Even greater profligate expenditures were made upon the villas of the rich on beautiful mountain-sides or by the coasts of the sea. See HOUSE. The palaces of the emperors were of the most magnificent description. They were generally built upon the lines of the Colosseum. These palaces, especially in provincial summer resorts, were built on an immense scale, and were rather a vast group of edifices within a fortified enclosure, all laid out and decorated with the fullest luxury of the period. Two of the most famous of these imperial palaces were that of Diocletian at Spalatro, and that of Adrian at Tivoli. See PALACE.

The tumular architecture of the Romans is very striking, both with reference to the number and the style of the monuments. Of the tombs of the kingsy period, there remain only the monuments attributed to the Carthaginians. Of the republic, there remain only the tomb on the Appian Way, which is of the only form of the tumular style of the period of the empire seem to have been decidedly Etruscan style, both in shape and construction. The earliest of these is that of Cecilia Metella, on the Appian Way; but the grandest and most splendid was that of Adrian, now known as the Castle St. Angelo. The basement was of a forty foot square; the height to the pine cone on the summit was three hundred feet. It was decorated with an immense number of statues. The building called the tomb of Santa Helena, mother of Constantine, shows how the feeling for interior decoration had in that period displaced the earlier feeling for exterior decoration in all classes of structures. Parallel to the history of his Cecilia Metella in Rome, there is the Columbaria, or underground tombs, with niches for containing a number of cinerary urns. In general struct-
ure, these have their antitype in the subterranean tombs, or catacombs, of the Etruscans. Many of these columbaria are exclusively decorated with arabesques of stucco, which has been the delight of medieval and modern artists. Tumular monuments of more slender upright form, often with highly appropriate architectural decoration, and evidently with a marked Greek impress, are found in a few provincial cities in the north and west of the empire. But in Cyrene in Africa and Cirene in Egypt there are the large and grand, central and imposing tombs. Those at Petra are deeply cut in the rock, like many Egyptian tombs, but with elaborate Corinthian decorations. Of this same Roman period are a number of tombs in Palestine, Mesopotamia, and other countries in the Orient. See Tombs.

The catacombs of the Etruscans were imitated by the Jews and Christians in Rome, as these classes, like the Etruscans, did not burn their dead. But the Romans themselves, so far as is known, did not imitate fully the Etruscan catacombs for their own dead. See CATACOMB.

The Romans invented almost no original sculpture, but they brought from the conquered cities and colonies of Greece countless statues of the first rank. They also had marble copies of many masterpieces made for the decoration of their baths, forums, circuses, palaces, and tombs. See SCULPTURE.

Painting, both in tempera and in mosaic, they employed very extensively in decorating the floors and walls of the apartments of all ranks of men, of those of shops and smaller houses. See PAINTING.

The objects of daily use of every kind, even down to the utensils of the kitchen or the shop, were richly decorated. Artistic decoration had become a necessity in all material objects. But, withal, it is remarkable that they should have depended upon foreign workmen to supply them with all their artistic objects, both large and small. See ROM.

In more ways than can be traced, the art of Rome, or rather the art in Rome, furnished the channel for the transmission of the art of classical antiquity, in modified forms, to medieval Christianity. See ROMANESQUE ART. (G. F. C.)

ROMAN Catholic Church, the name usually given to that organization of Christians which recognizes the Roman pope as its visible head and is in ecclesiastical communion with him. The name may be found in a number of Roman Catholic writers, and is generally used in the constitution of those states in which the Roman Catholic Church is designated as one of the recognized or tolerated State churches. It is, however, not the official name used by the authorities of the Church—who rather dislike it, and substitute for it the name "Catholic" or "Holy Catholic" Church. The name "Roman Church" is applied in the language of the Church, to the Church or diocese of the bishop of Rome. The views which the members of the Roman Catholic Church, on the one hand, and all other Christians, on the other, take of the doctrine and the history of this Church widely and irreconcilably differ. To the former, the Church is the only form of Christianity that has any validity, and all other denominations of Christians are looked upon as deviations from genuine Christianity, and the history of the Church is to the Roman Catholic identical with the progress and development of Christianity. All other Christians agree in viewing the doctrinal system of Rome as absolutely erroneous and antichristian in its admixture to the Christianity of the Bible, and its history as the gradual growth of a central and absolute power, which is without a scriptural basis, and prefers and enforces claims for which there is no warrant whatever in the teaching of Christ or the words of the Bible. See CHURCHES.
ROMAN CATHOLIC CHURCH

He provided for a complete organization of the Church by designating Peter as its head. The foundation of this supremacy externally completed on the day of Pentecost by the effusion of the Holy Spirit. Several Church fathers have called this day the birthday of the Christian Church; accordingly the Catholic historian claims it as the actual beginning of the Catholic Church. Many of the traditions and legends which formerly filled the history of the early Catholic Church have now been quite generally abandoned by Catholic writers: they continue, however, to insist that the Scriptures in many places attest the supremacy of Peter as the first among the apostles and the head of the Church. While admitting and lamenting the inaccuracy of information in the early history of the Church, Catholic writers emphatically deplore, in opposition to modern criticism, a Roman episcopate of the apostle Peter, the exercise of supreamtial powers by several bishops of Rome in the first three centuries, and the actual acquiescence of the Church in the Roman decisions. The pictures of the early Christian congregations, as they are drawn by Catholic writers, bear but little resemblance to the Roman Catholic Church of the present day; but it is contended that all that was subsequently developed in the Catholic system existed as a germ in the primitive Church, and that modern criticism has been unable to prove any irreconcilable differences between the creed of the early Church and the Roman Catholic Church as it now exists.

The growth of an "Old Catholic Church" with an episcopal constitution in the 2d and following centuries is generally recognized by Church historians. It is also quite generally admitted that the bishops of Rome, the imperial city of the West, successfully claimed a greater and greater influence; but only Roman Catholics defend these claims as the exercise of a divine right, while all other writers look upon them as the gradual development of a usurpation which was attended by the most dangerous results. Christianity, in the meanwhile, spread rapidly through all the parts of the Roman world-empire, and, by the conversion of the emperor Constantine, entered into the novel position of the ruling Church. The transfer of the imperial residence to Constantinople led to a rivalry between the bishops of Rome and Constantinople, which gradually became fatal to the unity of the Church. The bishops of Rome steadily urged their pretended supremacy over the Western Church, and, rapidly increased their power by the conversion of the Germanic tribes, which gradually grew up to be the most powerful nations of the Christian world. The establishment of the temporal power at the close of the 8th century gave to the popes of Rome both greater influence and greater prestige, and enabled them to gradually convert the episcopal into a papal Church. The pontificate of Hildebrand, who succeeded to the papal throne in 1073 under the name of Gregory VII, completed the papal system and the Roman Catholic Church in their most essential features. Even before his election as pope, he had prevailed upon his imperial predecessors, as their most influential adviser, to make the election of popes in future wholly independent of secular influence, and thus to secure a continuity of pontiffs whose sole aim would be the progress and complete victory of the Church, not only over all other ecclesiastical and religious organizations, but also over all temporal governments. Under his influence the Roman Church, in accordance with theDecree that the pope was to be only elected by the cardinals. After he had ascended the papal throne himself, he enforced in 1074 the priestly celibacy, and took the final step for emancipating the Church from the State by forbidding bishops and abbots, through a synod held at Rome (1075), to accept the investiture from secular governments.

For nearly fifty years this prohibition remained the subject of a violent controversy between the pope and the secular princes, and though it was finally settled by a compromise (1122), it secured to the pope a general recognition of the important right of confirming the election of all the bishop. One of the most striking features of the Roman Catholic system—the absolute supremacy of the pope as vicar of Jesus Christ and head of the Church in all ecclesiastical affairs—is largely due to the influences proceeding from Gregory VII and his successors. The fundamental idea of Gregory VII, however, was never fully carried out. He had clearly conceived the Church as nothing short of a universal theocracy, with the pope at its head as sole sovereign in temporal affairs as well as spiritual. According to this view, all states of the Christian name were to be bound together in the unity of the papal theocracy as members of one body. The pope was to be the spiritual prince of the world, and through the ecclesiastical power; they are appointed "by the grace of God;" but the Church mediates between them and God. Royalty sustains to the papacy the same relation as the moon to the sun, receiving from it its light and its heat. The divine authority with which secular powers are clothed by the Church can therefore be again withdrawn by the Church when the secular powers misuse it. With the withdrawal of this authority ceases also the liability of the subjects to obedience. The gigantic efforts made by the mediavel popes, from Gregory VII to Boniface VIII, to enforce these views fill some of the most interesting pages of the history of the Middle Ages. The rapid organization of the religious orders, the popes had a well-disciplined and trustworthy corps of officers at their disposal, who frequently fought their battles even when bishops ceased to side with them. The Crusades, though, in the first place aiming at the deliverance of the holy sepulchre, repeatedly supplied the popes with a willing army for coercing hostile princes. None of the successors of Gregory attained so great a power and came so near realizing the establishment of the papal theocracy as Innocent III. In the struggle against his successors, the noble house of Hohenstaufen perished; but soon the kings of France checked the theocratic aspirations of the pope, and the imprisonment of Boniface VIII by the French made a breach in the theocratic edifice reared by Gregory VII and his successors which has never been repaired. The right to depose princes and release their subjects from the oath of allegiance was not expressly disowned by the popes, but it ceased to involve any practical danger, and was clearly repudiated by the Church. The Emperor of the Holy Roman Empire, which made the popes disgracefully dependent upon the French kings, and, still more, the papal schism, during which two, or at times three, popes hurled against each other the most terrible anathemas, undermined to a large extent the respect which Catholic countries had thus far had for the papal authority, and rapidly diffused the belief that the Church was pervaded by corruption, and that it needed a thorough reformation in its head and members. Such a reformation was sincerely attempted by the great councils of Pisa, Constance, and Basel, which not only endeavored to eradicate many flagrant abuses in the practical life of the Church, but to reduce the constitution of the Church from a papal absolutism to an episcopal constitutionalism by expressly declaring the superiority of a general council over the pope. The success of this scheme would have shaped the subsequent development of the Roman Catholic Church very different from what it has been; but the astuteness of the popes rendered the curia secure; the Deus desires of the majority of the bishops, to stifle the cries for a Church reformation, and to reimpose upon a reluctant Church the papal authority, at least in matters of an ecclesiastical nature.

While Western Europe became politically reorganized under Teutonic leaders, a similar governmental centralization as the Roman Catholic Church under the leadership of the bishops of Rome, the Eastern churches retained substantially the constitution of the Old Catholic Church of the early centuries. The Council of Nice recog-
ognised the higher authority of the metropolitan bishop of Rome, Antioch, and Alexandria. This higher authority was subsequently expressed in the title "patriarch." Later, the bishops of Constantinople and Jerusalem were added to the number of patriarchal sees, and the growing importance of the city of Constantinople gradually made the bishop of the city the first among the Eastern patriarchs, a distinction which was expressly sanctioned by the Synod of 682. The Church of those times was greatly agitated by controversies and schisms. The Council of Chalcedon, held in 451, to reconcile the differences between the East and West united in the wish to preserve the doctrinal unity of the Church on those important subjects; and ecumenical councils, in which both sections were represented, defined the creed of the Church and expelled the dissenters from her communion. Whether at these councils any prerogative, honorary or otherwise, was conceded to the patriarchs of Rome continues to be a subject of theological controversy; but even Roman Catholic writers do not claim that the bishops of Rome can be proved to have asserted any superior jurisdiction in any of the other patriarchal dioceses. Gradually some different views sprang up between the East and West as to the distribution of power, jurisdiction, and worship. The most important of these controversies was that relating to the procession of the Holy Ghost. See FILIOQUE. In the course of the 9th century the controversy grew into a serious dissension, and in the course of the 11th it led to a formal and permanent schism. Many attempts at reconciliation and reunion between the Eastern and Western Churches were made, but all were equally unsuccessful, or, if successful for a time, without duration. See GREEK CHURCH.

In Western Europe, the Roman Catholic Church retained her unity until the 16th century. The leaders of that reformatory party which controlled the councils of Pisa, Constance, and Basel were anxious not to disturb the unity of the Church, and co-operated in the condemnation of men like Wycliffe and Huss, who wanted first of all a scriptural reform of the doctrine and dogma; and who showed no concern about external unity if it stood in the way of a doctrinal reformation. At the beginning of the 16th century, the stilled clamours for a radical revision of the doctrine of the corrupt Church, and the restoration of a pure scriptural doctrine burst irresistibly forth in the German and Swiss reformation. See REFORMATION.

The whole of England, Scotland, Holland, Denmark, Sweden, Norway, and large portions of Germany and Switzerland, permanently severed their connections with the Church for the execution of his ambitious schemes and the confirmation of his power and his dynasty. He concluded in 1801 with the pope a concordat, which was to restore to the pope his temporal possessions and his ecclesiastical powers; but as a complete agreement was not arrived at, Napoleon once more (1808) occupied the States of the Church, and declared the legal existence of his successor "Charlemagne" revoked. When he was thereupon excommunicated, he imprisoned the pope, and for several years deprived the Church of her head. In 1814 the allied princes of Europe restored the temporal power of the pope, and Pius VII was enabled to resume the full functions of the papacy as they were exercised before the French Revolution. In 1818, 1820, and 1823, however, between the pope and the princes assembled at the Congress of Vienna was not attained, and the pope entered through his legate a protest against the work of the congress. In 1816 the Order of the Jesuits was restored for the whole Church, and soon displayed again, as in former times, an extraordinary activity for strengthening and enlarging the papal authority in opposition to episcopal and liberal tendencies still manifesting themselves within the Church, as well as to the legislation of the secular governments. The growth of the liberal and revolutionary party in most of the European countries, which aimed at either curtailing or wholly abolishing the Church, was a matter of the most serious and distasteful to the Roman Catholic Church, but led in most countries to vehement conflicts, especially in regard to the public schools. In Italy, the national tendencies for a political union led to the establishment of a united kingdom of Italy, to which the larger portion of the Church was subordinated. The Church was in the remainder, including the city of Rome, in 1870, though not a few Catholics, including even some of the most prominent members of the Order of the Jesuits, were inclined to look upon the destruction of the temporal power of the popes as favorable to the spiritual interests of the Church, the pope (Pius IX) pronounced an excommunication against the King of Italy and all the statesmen who had aided in the conquest of the Papal
States. The successor of Pius IX became of exceeding importance in the inner history of the Catholic Church. The participation of the Holy See in the immediate congregation, the Virgin Mary, and of a syllabus which characterized a number of doctrines and views commonly held in civilised countries as heretical or erroneous, indicated a determination on the part of the pope and his advisers to force a belief in, and submission to, the extreme theories concerning the authority upheld by the entire Catholic Church. This victory of the extreme papal party within the Catholic Church became complete when, in 1870, the Vatican Council proclaimed the infallibility of the doctrinal decisions of the pope as a tenet of the Catholic Church. A considerable number of bishops, chiefly from Germany, Austria, and France, made a determined opposition to the adoption of the new doctrine, chiefly on the ground of its being incompatible. After its adoption by the council, however, the opposing bishops gradually submitted to the demand of the pope to have the doctrine promulgated in their dioceses. Several did so with undisguised reluctance; some (as bishops of Strasbourg) were more reluctant to have their names handed to friends who had secretly remained opponents of the innovation even on their death-bed; but externally all yielded, and not one of the bishops separated from the Church in consequence of the great change which had been made by the Vatican Council. The lower clergy quickly followed the example of the bishops. A number of professors of Catholic theology at the German universities continued, however, to refuse their submission, and were therefore excommunicated. As many thousands of laymen sympathized with them, the necessity of providing for their religious wants gradually led to the organization of Old Catholic congregations in Germany, Switzerland, and Austria, even the erection of Old Catholic bishops in Germany and Switzerland. In France, a distinguished pulpit orator, father Hyacinthe, has been active in the interest of Old Catholicism, but thus far (1879) without effecting any organization. In Italy, the friends of an Old Catholic reformation have a secret organization, with a bishop elect at its head. The numerical strength which the Old Catholic Church had attained after eight years of hard and incessant labor was far from meeting the expectations of its founders. The total number of the population which expressly and formally severed their connection with the Church was called in 1871. The Vatican Church did not exceed 200,000 persons, an insignificant number if compared with the 200,- 000,000 who remain nominally connected with Rome, But the reluctance of the bulk of the Catholic population to sever their nominal connection with the Church of their ancestors cannot be taken as a proof that the Catholic Church retains its control over the nations which refused to separate from her in the 16th century. The history of the Catholic nations during the last century furnishes, on the contrary, ample proof that the influence of the national Church in all these countries has to a very large extent been undermined. In Spain and Portugal, expelled the religious orders and confiscated the property of the Church; it has fully secularized public instruction, and, more than any other government of the world, it is impelled to reject the claims of the Church, because these claims involve the destruction of Italian unity.—Among the states of Spain and Portugal, on which there is not one which has not had, from time to time, its conflicts with pope and bishops. The progress of religious toleration and of a secular school system, after the Protestant models of Germany and France, and in opposition to the bishops, proved that the Church has ceased to have a firm hold on any of these states. See Old Catho-

In the Protestant countries of Europe the Roman Catholic Church has been greatly benefited since the beginning of the 19th century by the progress of religious toleration. The laws impeding the free exercise of the Roman Catholic religion, and of the bishops, were quite generally repealed, or fell, at least, into disuse. Thus congregations were reorganized in Sweden, Norway, and Denmark, where the Church had been almost extinct since the 16th century, and vicars apostolic were appointed as an initial step towards the reconstruction of the Church, and which, when the Church had been for two hundred years without a hierarchical organization, although it had not ceased to
have a considerable Catholic population, the constitu-
tion of 1848 proclaimed the principle of religious liberty. Th
even the Jesuits were allowed to return, and in 1863 the Catholic hierarchy was re-established by the  
creation of one archbishopric and four bishoprics. — In
the last quarter of the 19th century, the agitation of the Irish Catholics for equal political
rights, and to open both houses of Parliament to its
Catholic subjects. This was followed by the restoration of the
Catholic hierarchy in 1850, in which year pope Pius IX divided the kingdom into one archbishopric and
six bishoprics. In 1858, the Catholic Church in England had become extinct in 1858, by the
death of bishop Goldwell of St. Asaph. In Scotland, when the ancient hierarchy had become extinct by the
death of archbishop Betoun of Glasgow, in 1801, the
hierarchy was established by pope Leo XIII, who in 1878 established two archbishoprics and four bishoprics.
In Ireland, at the time of the Catholic emancipation
numbered alone seven millions of Roman Catholics, and a
tide of Irish emigration filled the cities of Eng
land and Scotland with a large Catholic population, the
Catholic Church appeared at home and abroad as a
great power; and the number of churches, of priests, and
of Irish Catholics, and the political opinions of the
bishops and the abbeys felt among Protestants at this revival of the
Church of Rome induced Parliament, in 1851, to adopt a
resolution declaring all papal edicts, and all jurisdic-
tions, ranks, or titles created by them, null and void; and
fining every person who, without legal authority, accepted any ecclesiastical title derived from the name of any place in the kingdom. But the new Catholic
bishops knew how to evade the laws; and the liberal
tendency of English legislation gave to the Roman
Catholics a position which even Roman Catholic writers
have often praised as the most favorable in Europe.

The hopes awakened by this restoration for the future of
Catholicism in England were greatly strengthened by
a movement within the Established Church of England, which aimed at a revival of the Catholic ele-
ments of this Church. Under the leadership of Pusey
and Newman, this movement—sometimes called the Oxford
movement because it had its chief centre in Oxford—
generated tendencies to Roman Catholicism and led to a considerable number of graduates of English
universities over to the Church of Rome. Among the
new Catholics were many men of great reputation, in-
fluence, and wealth. The most prominent were, Dr.
Henry Newman, one of the leaders of the movement, who,
as superior of the religious order of the Oratorians (commonly called the English College of Rome, or Angli-
gican Church), as rector of the Catholic University of Dublin, and by a number of literary works, displayed a
great activity for the Roman Catholic Church, and, as
a reward for his services, was raised, in 1879, to the car-
dinate; archbishop Manning of Westminster, created
cardinale in 1879, and the marquis of Lansdowne, one of the rich-
est noblemen of the United Kingdom; the marquis of Ripon, a prominent English statesman and member of the
Privy Council. The number of Anglican clergy-
men, members of the nobility, and literary persons who, since the beginning of the Oxford movement, have joined the
Roman Catholic Church exceeds one thousand. By these movements of the Oxford movement, social standing and a greater influence upon English
society than it had before. This is especially apparent in the
colonies, where the government recognises the power of the Catholic bishops and missionaries to co-
operate for the confirmation of the English rule, and is
willing to utilise this co-operation in pressing its demands on con-
cessions. It is, however, a noteworthy fact that, in
spite of all the accessions to the Church from the high-
ranks of English society, the total Catholic popula-
tion shows not only no notable progress, but the esti-
mates by the most careful statisticians give even lower
figures for it than were assumed some ten years ago.
This would indicate that the losses sustained by the
Church, especially among the lower classes of the popu-
lution, must, at least, equal in number the gains.

On the other hand, the territorial rearrangement of Ger-
many by the congress of Vienna placed nearly all the Ger-
man Catholics, except those of Austria and Bavaria, under
Protestant governments. The great cession of 1870
severed the connection between Catholic Austria and the
German Catholics, and placed Protestant Prussia and a
Protestant emperor at the head of the German nation-
ality. The laws of all the German states place the Ro-
man Catholics on a level with Protestants; but diver-
sions in the political and religious limits of the states have
caused the secular powers to have repeatedly led to fierce conflicts be-
 tween the Church and the German governments, especi-
ally Prussia. The two Prussian archbishops of Col-
logne and Posen were imprisoned in 1887, and kept
prisoners until 1890, for refusing obedience to royal or-
dinances concerning mixed marriages. A new conflict
began in 1872, which occupies a prominent place in the
modern history of Roman Catholicism, under the name
Kulturkampf, and was not yet ended at the beginning of
1879. The Prussian government, alarmed at the in-
crease of power which the Vatican Council had placed in the hands of the pope, deemed it necessary to divest the bishops of all the influence which they had
exerted upon the national schools; to check the abso-
lute control of the lower clergy by the bishops; and to
extend the jurisdiction of the State over both bishops and
lower clergy. The bishops regarded some of the
laws adopted in Prussia for this purpose as inconsistent
with their duties towards the Church, and refused to
submit to them. In consequence of the conflicts which
were caused by this attitude of the bishops, a number of the Prussian bishops were deposed from their sees;
and several other sees which became vacant by the death of their occupants could not be filled on account
of the insuperable disagreement between the Prussian
Government and the pope. At the beginning of 1879, of the twelve archbishoprics and bishoprics of Prussia,
only two were actually filled. During the progress of
this conflict, the bulk of the Catholic population of Ger-
many showed a marked sympathy with the bishops;
and the universal suffrage which has been adopted
in Germany for the elections to the Reichstag yielded in no country of the world so complete an approval
of the candidates as in Germany. Thus the Catholic
districts of Germany came to be looked upon as a bulwark
of the Roman Catholic Church in general. Previously
the German Catholic Church had won within the Catholic Church a
great prestige for superiority in the province of liter-
arrure, and now its influence in the language, literature, and
art was translated into the languages of most of the other Catho-
lic nations. The elevation of Dr. Hergenröther, a uni-
versity professor, to the cardinalate by pope Leo XIII,
in April, 1879, was regarded as an encouraging tribute
to the science of Catholic Germany by the head of the
Church. — The Roman Catholic Church has suffered the
greatest numerical losses in Russia. At the second
partition of Poland, in 1798, nearly all the dioceses of the
United Greeks in the former Polish empire were
incorporated with Russia. The empress Catharine II
made incessant efforts to reunite the United Greeks
(who, during the Polish rule, had been induced to rec-
ognise the supremacy of the pope over the Greek
Church); and it is said that, during her reign, no
less than seven millions of United Greeks separated from
Rome. No exhortations to this end were made by the
emperors Paul I and Alexander I; but Nicholas I
and Alexander II followed in the footsteps of Catha-
rine. In 1839, 3 bishops and 169 priests, representing a
census of 150,000, declared themselves Greek-Catho-
lic, held at Plock, in favor of reunion with the Russian
State Church. After this only one United Greek di-
cese remained (Chelm), with a population of 250,000,
nealy all of whom, in the years 1877 and 1878, likewise
joined the Russian Church. As the Russian government
forbids secession from the State Church to any other
ROMAN CATHOLIC CHURCH

religious denomination, a return of the United Greeks to the communion of Rome is for the present impossible. Roman Catholic writers unanimously insist that measures of the utmost severity and cruelty have been resorted to to bring about this separation from Rome; and their statements are fully confirmed by nearly all writers who are not Russians.—In the United States of America the Roman Catholic Church enjoys a degree of independence which it has hardly ever possessed in any other country. Owing to the increase of the population in the United States, and to the large influx of immigrants, it has already attained a high rank among the national divisions of the Roman Catholic Church. See ROMAN CATHOLIC CHURCH IN THE UNITED STATES.

The missionary labors of the Catholic Church in non-Christian countries received a great impulse by the foundation of the Order of the Jesuits. The latter sent out a larger number of missionaries than any other religious order has done before or after its foundation. In some countries of Eastern Asia the Catholic missions appeared, at times, to become a complete success. In Japan the Church embraced, at one time, more than 200,000 Christians, and counted among its adherents several princes. In China the Jesuits obtained a great influence at the courts of several emperors, and the permission to establish missions throughout the empire. In Hindustan, Corea, Anam, and other countries, numerous congregations were collected, and many natives became priests and members of religious orders. Many of these missions have had to suffer persecution; but most of them have survived, though in a crippled form and with reduced numbers, to the present day. 

Pope Gregory XV established for the chief and central direction of the Catholic missions, in all parts of the world, the Congregatio de Propaganda Fide, which consisted of 15 cardinals, 3 prelates, and 1 secretary. Pope Urban VIII connected with this institution, in 1627, a seminary for the training of foreign missionaries (Collegium Urbanum de Propaganda Fide), which still exists, and has always been famous for the large number of nationalities represented among its pupils. Besides the seminary of the Propaganda, the Roman Catholic Church has seminaries specially devoted to the education of foreign missionaries at Paris, Lyons, and in several other places; and at present most of the religious orders educate some of their members in their own institutions for the missionary service. For the financial support of the Catholic missions, a central Society for the propagation of the Faith was established in 1822 at Lyons, which has of late had an annual income of about 5,000,000 francs. This society has branches in nearly all countries of the world; only Austria and Bavaria have preferred to establish their own societies for the support of foreign missions. A children's missionary society, called the "Society of the Holy Childhood of Jesus," devotes its revenue chiefly to the efforts for the baptism and Catholic education of pagan children. It has branches in all countries. It is admitted by all Catholic writers that the sums annually contributed for the support of the Catholic missions fall far below the aggregate annual income of the missionary societies.

II. Doctrines.—As the Roman Catholic Church agrees with the Greek and the Protestant churches in regarding the Holy Scriptures as divinely inspired, and as an authority in matters of faith and morals, she holds many points of Christian belief in common with these large bodies. The Christian Church, with them, believes in the unity of divine essence, the Trinity of the divine persons (Father, Son, and Holy Ghost), and the creation of the world by the will of God out of nothing for his glory and the happiness of his creatures. Among other points of belief which are common to the Roman Catholic, Greek, and Evangelical churches are the following: the innocence of man; his fall in Adam, and redemption by Christ; the incarnation of the Eternal Logos and Second Person in the Holy Trinity; the divine human constitution of the Person Christ. In regard to the procession of the Holy Ghost, the Roman Catholic Church has added to the Nicene Creed the "Pneumatis" (from the Son), and accordingly believes that the Holy Ghost proceeds from the Father and the Son; while the Greek Church believes, in strict accordance with the original Nicene Creed, that the Holy Ghost proceeds from the Father only. The Roman Catholic Church holds in opposition to the Greek, but in opposition to evangelical Protestants, the doctrine: the authority of ecclesiastical tradition as a joint rule of faith with the Scriptures; the veneration of the Virgin Mary, the saints, their pictures and relics; the infallibility of the Church; justification by faith and works as joint conditions; the seven sacraments or mysteries; baptismal regentation, and the institution of water baptism for salvation; priestly absolution by divine authority; transubstantiation and the adoration of the consecrated elements; the sacrifice of the mass for the living and the dead; prayers for the departed. The infallibility of the Church was formerly lodged by the Roman Church in the heads of the members in conjunction with the pope, but since 1870 also in all the doctrinal decisions of the popes; by the Greek Church it is attributed to the seven eumenical councils, and the patriarchal oligarchy as a whole. The immaculate conception of the Virgin Mary, which was proclaimed as a dogma by the pope in 1854, is rejected by the Roman Catholic Church. The authority of the Pope in the veneration of the Virgin is no less than the Roman Catholic. In regard to the Holy Scriptures, the Roman Catholic Church includes in its canon the Apocrypha of the Old Test., which are excluded from the Protestant canon. The Latin ( Vulgate) translation of the Bible is placed on a par with the Hebrew and Greek Scriptures, while Protestantism claims divine authority only for the original Scriptures of the inspired authors. As regards the popular use and circulation of the Bible, the Roman Catholic Church has generally discouraged the reading of unannotated Bibles in the native tongues, and commanded her members to seek on this subject the previous advice of their rabbinary and other guides.

With regard to the unity of the Church, the Roman Catholic Church teaches that Christ founded one, and only one, infallible visible Church which was to represent him on earth as the teacher of religious truth, and to which, therefore, all men ought to submit. The Roman Catholic Church, therefore, insists that Protestantism by its separation and by the construction of new creeds and doctrine is a heresy, and therefore asserts that outside of her there is no salvation ("extra ecclesiam nullus salus"). She does not admit the Protestant distinction between a visible and invisible Church, but demands that all should belong to the visible Church. She admits, however, that there may be cases when insurmountable difficulties prevent persons from joining her communion, and when God will save them though they have not been formally received into her pale. As there is, in the opinion of the Church, only one Church and one baptism, all persons, children or adults, to whom the ordinance of baptism is administered in due form are thereby received into the Roman Catholic Church, and therefore the children of all Protestants and other non-Catholics are therefore regarded as belonging to the Catholic Church until they cut themselves loose from it by their own erroneous belief.

In regard to the future life, the Roman Catholic Church teaches a Divinity of the holy souls, and a final judgment of the same, (lasting until the final judgment) between heaven and hell, for the purification of imperfect Christians, which may be advanced by prayers and masses in their behalf. The centre of Catholic worship is the mass, which the Church holds to be an actual, though unbloody, repetition of Christ's sacrifice on the cross, by the power of the Holy Ghost. The Mass is the supreme act of worship: the original sacrificial offering is made; and the sacrifice is offered, as a rule, daily by every priest. To the laity the eucharist is now administered in only one kind, the
broad, the Church believing that Christ is wholly pres-
ent in the consecrated bread as well as in the wine, and
that therefore the reception of one kind is fully suffi-
cient.

An important difference between Roman Catholic
and Protestant ethics exists in the doctrine of good
works, the Roman Catholic Church believing that
works of supererogation, which are not commanded, but
recommended (omnia evangilea), with corresponding
exemptions, are due to each one of Christ's people. Bishop
of Rome, under the name of pope, has dispensed
the pope for the dispensation of indulgences. These
indulgences are transferable to the souls in purgat-
ory.

As the Church is the plenipotentiary and infallible
representative of Christ, her commandments are no less
binding upon the faithful than the divine command-
ments recorded in the Scriptures. Among the com-
mandments given by the Church are the duty of the
faithful to go once a year to confession, to receive once
a year the eucharist, and to attend mass on every Sun-
day and holiday. Upon her clergy the Church has
imposed the duty of celibacy; as this, however, is not a
part of Church doctrine, the priests of those of the
Eastern churches who recognise the supremacy of the
pope are allowed to marry.

Paintings and images are quite commonly used in
Catholic churches as fitting ornaments, and as objects
calculated to excite and keep alive feelings of devo-
tion. The crucifix may be mentioned as the principal
among these objects. A number of ceremonies and treat-
ments are used in the celebration of divine worship. They
are intended to give a peculiar dignity to the sacred mys-
teries of religion; to raise the mind of the beholder to
heavenly things by their various and appropriate im-
port; to instruct the ignorant and keep alive attention;
to give to the ministers of religion a respect for them-
selves and for the awful rites in which they officiate.

In the celebration of the mass and other services of
the Church, the Latin language is used. The Church
cherishes it as a bond of union which connects the
churches of the present with each other, as well as with
the primitive apostolic Church of Rome. For the use
of the people, translations into the vernacular languages
are made, and are in common use. The Eastern church-
es which have entered into a corporate union with
Rome are allowed to retain at divine service the use of
their old liturgical languages. Latin is also the lan-
guage of the Breviary, which contains the prayers and
religious readings prescribed by the Church for the
daily duties of the clergy.

III. Constitution.—The Roman Catholic Church be-
lieves in a special priesthood in which all the offices of
the Church are vested. The powers conferred upon
the priesthood are twofold—the priestly power, potestas
ordinas, and the governing power, potestas jurisdiction
is. The former is vested in its fulness in the bishops,
who alone have the right to provide for the contin-
uation of the hierarchy by means of ordination. Subordi-
nate to the bishop are the orders of priest and deacon.
These two orders, together with that of bishop, con-
sistute the ordines majoris, and form the keystone
of the entire hierarchy. Several minor orders, ordines
minores, are the symbols of the preparatory steps for the entrance into the hierarchy, and are no longer of any practical significance.

The governing power is possessed in its fulness by the
pope, who alone has apostolic authority, and may exer-
cise it in any part of the Church. The bishop has
governorship over the episcopal see, which, according
to the present Church law, can practically exercise it
only with the sanction of the pope. A number of epis-
copal dioceses are commonly united in an ecclesiastical
province, the head bishop of which bears the title of
archbishop, presides at the provincial councils, but oth-
erwise rules only under the orders of the pope. 4
Greek-Ruthenian bishops are appointed by the pope in
the administration of the suffragan dioceses. If a coun-
try has more than one ecclesiastical province, one of
the archbishops has the title of primate, and as
such ranks the other archbishops and presides at
national councils. As all the Eastern patriarchates have
served their connection with the pope, and the
Church has totally lost the signification it had in the early
Church. It is an honorary title which confers no de-
gree of jurisdiction superior to that of archbishop or
primate. The Church has at present, besides the pope,
twelve patriarchs—namely, four of Antioch (for the Lat-
in, Greek, Syrian, and Maronite rites respectively), and
seven others, in the following order: the Exarch of the
one each of Carthage, Alexandria, Antioch, Jerusalem,
with the title of patriarch, and the bishops of Thessal-
ion (of the Chaldean rite), Glicia (of the Armenian rite),
the East Indies, Lisbon, and Venice. Those figures of
Eastern churches which in course of time had entered
into a corporate union, with the privilege of retaining
the use of their ancient liturgical languages, the mar-
rriage of priests, and other ancient customs, are techni-
cally designated as the Eastern or Oriental rite, in op-
position to the Latin rite.

For the purpose of deliberating and legislating on
ecclesiastical affairs, a system of councils or synods has
gradually been developed, consisting of ecumenical,
national, provincial, and diocesan synods. Ecumen-
ical councils are such as represent the entire Church,
and to which now all the ordained bishops of the Church
are invited. The Church now numbers twenty of these
councils, the latest of which—the Vatican Council—was
held from Dec. 8, 1869, to Oct. 20, 1870. (For a list of
the first nineteen, see Councils.) Up to the Vatican
Council, larges portions of the Catholic church—bishops and provincial synods, have asserted the supe-
riority of an ecumenical council over the pope. After
the proclamation of the infallibility of the pope, it is no
longer possible for any Roman Catholic to claim for an
ecumenical council any kind of superiority. A na-
tional council is one consisting of all the archbishops and
bishops of a country under the presidency of the primate.
The Church law makes no provision for their regular
periodicity, and they have generally been convoked for
some special reason. Provincial synods are meetings of
the bishops of an ecclesiastical province under the
presidency of the metropolitan or archbishop. Diocesan
synods are meetings of the clergy of a diocese under the
presidency of the bishop. The Eccenomical Council of
Trent desired to introduce these two classes of synods
to a larger extent than had been the case before into the
regular organism of the Church, and therefore pro-
vided that a provincial synod was to be held every third
year in each ecclesiastical province, and a diocesan synod
annually in each diocese. These plans have not been
carried out but very imperfectly, and in the 18th century the diocesan synods fell into disuse in every
country of Europe except Italy.

The pope is assisted in the government of the uni-
versal Church by the college of cardinals, which is di-
vided into cardinal bishops, cardinal priests, and car-
dinal deacons. The bishops of every grade are, in a
similar manner, aided in the government of their dio-
ceses by a chapter, and frequently by an assistant bish-
op. The diocese is divided into parishes, a number of
which is generally united into a deanery, at the head of
which is a dean. The papal almanac (La Gerarchia Catolica) for 1878 publsishes the bishopric of the
pope, the cardinal, and the Catholic hierarchy: The full number of the mem-
bers of the college of cardinals is 78; namely, 6 cardinal
bishops, 51 cardinal priests, and 16 cardinal deacons.
Of patriarchal sees there are 12, 7 of which belong to the
Latin and 5 to the Oriental rite. The number of archi-
bishops was 13 in 1877, 15 in 1878, according to the
papal almanac. The number of priests and deacons
belonged to the Latin and the remainder to several Ori-
ental rites. Of the Latin archbishops, 13 were imme-
diately subject to the Holy See, and 188 were connected
with ecclesiastical provinces. Of the Oriental arch-
bishops, 1 Armenian, 1 Greco-Russian, and 1 4 Greek
at the head of ecclesiastical provinces; 4 Greek-Ortho-
xian, Melchite, 4 Syrian, 5 Syro-Chaldean, 5 Syro-
Maronite are subject to the patriarchs of the several
rivers. Of episcopal dioceses there were 719, of
which 664 belonged to the Latin and 55 to several Oriental rites. If we add the six suburban sees of the cardinal bishops, the total number of episcopal sees would be 725, of which 670 belong to the Latin rite. Immediately subject to the Holy See are 87 Latin and 4 Eastern (3 Greco-Ruthenian, 1 Greco-Bulgarian) bishops; 577 Latin sees and 8 Oriental (1 Armenian, 3 Greco-Romanian, and 4 Greco-Ruthenian) were suffragans in ecclesiastical provinces; 43 Oriental bishops (16 Armenian, 9 Greco-Melchite, 8 Syrian, 7 Syro-Chaldean, and 3 Syro-Maronite) were subjects to the patriarchs of the several rites. There were also 18 sees not connected with a diocese (nullius diocesso); their occupants are 12 abbots, 1 archabbot, 1 archimandrite, 1 bishop, and 5 vicars apostolic.

Where it is found impracticable to establish dioceses in accordance with the provisions of the canonical law, vicars apostolic are appointed in place of bishops. They are placed under the immediate supervision of the Congregation of Propagation, which is charged with a general superintendence of missionary districts. Besides vicars apostolic, the pope appoints for the superintendence of churches in non-Catholic countries apostolic delegates and apostolic prefects, both of whom are likewise placed under the Congregation of Propagation. The aggregate of delegates, vicars, and prefects was (in 1879) 154, making a total of 1186 hierarchical titles. The titular patriarchs of the Catholic hierarchy, inclusive of the assistant bishops, was 1198. The Catholic hierarchy received a very large increase during the pontificate of Pius IX. The number of bishoprics raised to the rank of archbishoprics was 24; number of archbishoprics created, 5; number of bishoprics created, 192; of sees, nullius diocesso, 3; of apostolic delegations, 3; of vicariates apostolic, 28; of prefects apostolic, 15; total, 215 hierarchical titles.

A large proportion of the new episcopal and archiepiscopal sees belong to English-speaking countries. The hierarchy of England and Wales, as restored Sept. 29, 1850, by letters apostolic of Pius IX, comprises the province of Westminster, consisting of the archiepiscopal see of Westminster and twelve suffragans. In the United States 34 new episcopal sees were established during the pontificate of Pius, and 10 sees raised to archbishoprics. The first addition made by pope Leo XIII to the Catholic hierarchy was the restoration of the hierarchy of Scotland on March 4, 1878. It comprises the archiepiscopal see of Glasgow, which is without suffragan sees, and the province of St. Andrews and Edinburgh, which consists of the archiepiscopal see of St. Andrew's and Edinburgh, with four suffragan sees. At the beginning of 1879 the British empire had 14 archbishoprics, 76 bishops, 83 vicars apostolic, and 7 prefects apostolic. Of the archbishoprics, 1 was in England, 2 in Scotland, 4 in Ireland, 4 in British North America, 4 in the Western colonies, 2 in Australia; of the bishoprics, 12 in England, 4 in Scotland, 24 in Ireland, 2 in the European colonies. 1 in Africa, 18 in North America, 1 in the West Indies, 11 in Australia, 3 in New Zealand; of the vicariates apostolic, two thirds are in the Asiatic possessions. Most of these vicariates are at present held by archbishoprics and bishops who take their title from their see in sordida infidelitas. Including eight condottiers or auxiliary bishops, the total number of archbishoprics and bishoprics holding office in the British empire at the beginning of 1879 was 128, a larger number than at present found in any other country except only Italy. Adding

It will be seen from the above table that the total number of Roman Catholics still exceeds the aggregate number of all other Christians. Among the large counties, South America is almost exclusively Catholic, the only exception being Brazil (and some parts of Dutch Guiana). Together with the Falkland Islands, being under Portuguese governments. Many of the other countries are gradually receiving a Protestant population by immigration. The largest number of immigrants is found in Brazil; a smaller number in Chili and the Argentine Confederation. In Europe, the Roman Catholics are about one half of the total population; they are in a ratio to the Protestants and the Eastern churches, because in some of the largest Catholic countries, as France and Spain, the natural increase of the population is slower than in most countries of Europe. In North America, which is very rapidly rises in the scale of Catholic population, the Catholic minority, although in Mexico and Central America nearly the entire population is connected with it. The same is the case with Australia, where the total population increases with still greater rapidity than in North America, and where the Roman Catholics are a decided minority in each of the Catholic countries. A considerable part of the rapid increase of the population of North America, according to the numerical proportion between Protestants and Catholics, would materially change the relative position of both in the list of the prominent religions of the world. Outside
of Europe, America, and Australia, the Roman Catholic Church predominate in the Spanish, Portuguese, and French colonies, the most populous of which, the Philippine islands, have a Catholic population now estimated at about 6,000,000. In Western Asia, one entire Eastern communion, the Maronites, and fragments, more or less considerable, of all the others, have connected themselves with the Church of Rome. In Hindostan and China, and in aggregate China and Japan, about 2,000,000 has for several hundred years adhered to that Church, in spite of repeated and bloody persecutions; and even in Japan, under the new era of religious toleration which has been opened by the establishment of intercourse with the Christian nations of Europe and America, despatches of the early nineteenth century report that about 20,000 have openly declared themselves as still attached to the Church. Though this Church continues to make some progress in all her mission fields, no conquests have been made in the 19th century equal to the success of the Jesuit missionaries in Eastern Asia in the 16th and 17th centuries, or to that of the Protestant missionaries in the 19th century in Madagascar.

It is a noteworthy fact that the Latin nations of Europe and America are almost a unit in their adhesion to the Roman Catholic Church. The Reformation having been suppressed in the 16th century by force in all the Latin countries, the Waldenses in Italy, and some of the French-speaking cantons of Switzerland, with a few hundred thousand Reformed Frenchmen, were, at the beginning of the 19th century, the only dissenters from Rome in Latin Europe and America. The introduction of religious toleration begins to make notable inroads upon the religious uniformity of some of these countries. Thus, the number of native Protestants was in Spain estimated in 1822 at 12,000, in Mexico at 12,000; Italy had 170 new evangelical congregations and 111 stations; and in France and Belgium a number of prominent men advised the liberal Catholics to sever their connection with Rome, and, if they were not prepared to embrace fully the doctrines of one of the Protestant churches, to inscribe themselves in the civil registers as Protestants. The principality of Roumania, which became an entirely independent state in 1878, also speaks a language chiefly of Latin origin, and is, therefore, sometimes classed with the Latin nations. Of its population, no more than one per cent. belongs to the Roman Catholic Church. With the restoration of the German empire under Protestant rule, the Roman Catholic Church has almost wholly lost any controlling influence upon the Teutonic nations. Great Britain, with a number of inchoate colonial states, Germany, Sweden, Norway, Denmark, and Holland, are an unbroken phalanx of Protestant states. The government of polychromatic Austria can hardly be called any longer Teutonic. In Belgium, a Teutonic nationality is united with a Latin into one state, which nominally is wholly Catholic, though it is now, like Austria, Italy, Portugal, and many other nominally Catholic states, under a liberal administration, which is in open conflict with the demands of the Catholic hierarchy. Of the Slavic nationalities, several, like the Poles and Czechs, are a genuine Roman Catholic; but there is now no Catholic Slavic state. The governments of all the Slavic states—Russia, Serbia, Montenegro, and Bulgaria—belong to the Orthodox Eastern Church. To the same Church belongs nearly the entire population of the kingdom of Greece, in which the Roman Catholic Church is very strong, and in which, by the laws of the constitution, only 12,000 souls, or less than one per cent.—The Roman Catholic constitutes a majority in only six entirely independent states of Europe, viz. Portugal, Spain, Italy, France, Belgium, and the Austro-Hungarian monarchy. In the last-named state the Roman Catholics constitute, among the inhabitants of Austria proper, 92 per cent., and in the lands of the Hungarian crown, 70 per cent. In France they are 98, and in each of the four other states more than 99 per cent. In North and South America the Roman Catholics are a majority in Mexico, the five states of Central America, in Brazil, and the nine republics of South America, constituting in each of these sixteen states more than 99 per cent.

V. Literature.—As the Roman Catholic Church is indissolubly connected with the history of the Christian religion, the manuals of Church history are the principal sources of information on its history. The most important of these manuals is the Church History, published in 1828 by the ancient详细的关于文章内容的详细信息。

Belarmine's Disputationen, Bossuet’s Exposition, Möhler's Symbolik, and Perrone’s Prelectiones Theologicae are regarded as the ablest Roman Catholic expositions of the Roman Catholic system. Among Protestant expositions of the Roman Catholic doctrine, the two most important are the Symbolik of Marheineke, Köllner, and Baier, and Hase’s Handbuch der protestantischen Polemik (3d ed. Leips. 1781). A full account of the constitution of the Roman Catholic Church is given in the manuals of Church law. Among the best works on this subject are Schultze, Lehrbuch des kathol. Kirchenrechts (9th ed. 1878); and Richter, Lehrbuch des kathol. u. evangel. Kirchenrechts (1877, 8th ed. by Dove). The largest work on the statistics of the Roman Catholic Church is Neher’s Kirchliche Geographie und Statistik (1864–68, 3 vols.), containing Europe and America. A complete list of the Roman hierarchy is annually published under the title La Gerarchia Cattolica. (A. J. S.)

ROMAN CATHOLIC CHURCH IN THE UNITED STATES.—1. Origin and Progress.—As the discovery of America by Columbus occurred a quarter of a century before the first public appearance of Luther, the Roman Catholic Church was the first to occupy the newly discovered world. The attachment of Columbus to his Church has been so strong that efforts have recently been made, though without success, to obtain from the pope his canonization. Many of the following explorers were equally fervid in their faith. Ojeda, who in 1510 settled the Isthmus of Darien, is said by Catholic historians to have been as pious as a monk. Balboa, governor of Darien, who in 1518 discovered the Pacific Ocean; Magellan, who first raised the cross on the most southern cape of America (1521); Cartier, the discoverer of Canada (1544); Champlain, the first governor of Canada; La Salle, the pioneer navigator of the Great Lakes—are all praised for their piety. The Upper Mississippi was discovered by the Jesuit Marquette. For more than a hundred years (1492–1607) permanent settlements were made by Protestants in the New World. The few attempts which had previously been made by French Huguenots in South Carolina and Florida, and by the English on Roanoke Island (1585 and 1607), had failed. The Spaniards, in the meanwhile, not only laid the foundation of Catholic colonial states in South America, but also established Mexico, and Central America, but they also formed settlements in territory now belonging to the United States, the oldest of which, St. Augustine, was founded in 1565.

Nearly forty years before, in 1528, the first Catholic missionaries set foot within our present territory, forming part of the province of New Spain. One of their number, John Juarez, had been appointed by the pope bishop of Florida. Bishop Juarez, and one of his companions, John of Palos, perished probably in
the same year, either of hunger or at the band of the Indians. In 1549 a Dominican friar, Louis Cancer, was slain by an Indian of Florida after he had barely landed. The first Catholic Church was erected in St. Augustine, soon after the foundation of the town by Menéndez; and from this centre many Franciscan, Dominican, and Jesuit missionaries began to labor among the Indians of Florida, Alabama, Georgia, and Carolina. The most important establishments of these missions was the Franciscan monastery of St. Helena at St. Augustine. The missions began to grow until thecession of Florida by Spain to England in 1763, which proved a fatal check, and gradually led to the entire destruction of the mission, which at the beginning of the Revolutionary War had become entirely extinct.

The Jesuit missions in New Mexico were two Franciscan monks, father Padilla and brother John of the Cross, who accompanied in 1542 the exploring expedition of Coronado. They began to preach in two Indian towns, but both soon perished. Three other Franciscans, who in 1561 erected a new mission, shared the same fate. The foundation of Santa Fe, in 1598, the second oldest city of the United States, laid the firm foundation of the Catholic Church at the headwaters of the Rio Grande, where gradually whole tribes embraced the Catholic religion. Texas was visited as early as 1544 by a Franciscan missionary, father de Olmos, but the real foundation of the Texan missions, which were very extensive, was made in 1688 by fourteen Franciscan priests and seven lay brothers.

The first Catholic mission of California was begun in 1601 by a band of Franciscan monks; but the real founder of the Church in that state was father Junipero Serra, an Italian Franciscan, who in 1769 established the first mission in San Diego, and in 1776, a few days before the declaration of the independence of the United States (June 27), founded the city of San Francisco. In 1790, father Segura and eight other Jesuit fathers landed in Chesapeake Bay, Maryland, with the son of an Indian chief whom Spanish navigators had brought away with them from that region, and who had received a good education in Spain. All of them were treacherously murdered at the instigation of this Indian youth. Sixty-four years later, in 1854, two English Jesuits, fathers Andrew White and John Altman, who accompanied Lord Baltimore, resumed the missionary labors in Maryland. In 1839 Indians reported that many tribes had been visited, numerous converts made, and four permanent stations established.

The first Catholic church in New England was reared by French missionaries on Neutral Island, in Schoodic River, Maine, in 1609, eleven years before the foundation of Plymouth. In 1613, a new mission was established on Mount Desert Island, but it was soon after destroyed by the English. In 1646, father Druillettes, a Jesuit, who has been called by Catholic historians the apostle of Maine, established a mission on the Upper Kennebec, which gradually succeeded in converting the entire tribe of the Abnaki. Thecession of Canada by the English in 1667 did not affect for some time the Catholic mission among the Abnaki; but after the Revolutionary War it was reorganized, and has since then continued to exist until the present day.

The first Catholic missionary among the Indians in the State of New York was father Jogues, a Canadian Jesuit. In 1650 he landed in Maryland, and was massacred in the village of Caughnawaga (now Chenectedy). The first Catholic church was established in November, 1655, among the Onondagas, on the site of the present city of Syracuse; but three years later the missionaries barely escaped with their lives, which was the prelude to the bloody war between France and the Five Nations in 1666 leading to the re-establishment of the old missions, and to the foundation of new ones among the Onondagas, Senecas, Cayugas, Oneidas, and Mohawks. In 1668 the cross, as a Catholic historian says, "towered over every village from the Hudson to Lake Erie," and the Mohawks, according to the Jesuits, "were Catholics from the Church;" but the recognition by France of the English claims to the State of New York, in the treaty of Utrecht, 1718, was the death-knell of the Catholic missions among the Indians of New York. Among the Indians of Vermont mass was said for the first time in 1615. The Great Lakes, in the present states of Michigan and Wisconsin, were opened to the Canadian Jesuits in 1641. The field proved ungrateful, and the missions terminated when the French government suppressed the houses of Jesuits and confiscated their property. All along the banks of the Mississippi, the shores of which were discovered by Marquette and Jollet in 1673, there were few missions. Among the Indians converted by them was Chicago, the chief of the Illinois. With the suppression of the Order of the Jesuits and the increase of English power, the Catholic missions among the Indians generally disappeared from the Gulf of St. Lawrence to the Gulf of Mexico. After the establishment of the independence of the United States, some of the Indian missions were gradually re-established, but their progress was slow. In 1833 the bishops of the United States assembled at the Council of Baltimore confirmed the Indian missions in the United States to the Jesuits. Catholic historians complain (Murray, Popular Hist. etc.) that the United States has "shown little interest in the Indian missions, and done little to cheer and support the missionaries." The latter had to look to Europe for the necessary means. The most famous among the Jesuit missionaries of the 19th century was father De Smet, a Belgian, who is compared by the historians of his age to Pelham in England, and is said "to have opened heaven to over 100,000 Indians."

2. The proper history of the Catholic Church in the English colonies begins with the immigration of Leonard Calvert, second son of Lord Baltimore, and about 200 English and Irish Catholics, into Maryland. Lord Baltimore, who had left the Anglican communion for the Church of Rome, had received (June 20, 1632) from king Charles I the grant of a large tract of land lying north of the Potomac, for founding a Catholic colony in the New World as a refuge from persecution. The charter drawn up by him guaranteed liberty of worship and the right to maintain "teachers of all professions of the law to the Catholic faith," and thus making the laws. He died soon after the charter had received the royal sanction, and his eldest son, Cecil Calvert, second Lord Baltimore, commissioned his brother Leonard Calvert to carry out their father's design, and appointed him governor of the new colony. Leonard Calvert, with his colonists, landed in 1634, and in the same year the city of St. Mary was founded. The colonists were accompanied by two Jesuits, who were soon followed by several more Jesuits and Capuchins. A civil contest between the new colonists, on the one hand, and Captain William Clayborne, who with a party of men from Virginia had settled, in 1636, on Kent Island, in Chesapeake Bay, and claimed the land for the Puritans, was decided for some time the Catholic mission among the Abnaki; but after the Revolutionary War it was reorganized, and has since then continued to exist until the present day.

The first Catholic missionary among the Indians in the State of New York was father Jogues, a Canadian Jesuit. In 1646 he landed in Maryland, and was massacred in the village of Caughnawaga (now Chenectedy). The first Catholic church was established in November, 1655, among the Onondagas, on the site of the present city of Syracuse; but three years later the missionaries barely escaped with their lives, which was the prelude to the bloody war between France and the Five Nations in 1666 led to the re-establishment of the old missions, and to the foundation of new ones among the Onondagas, Senecas, Cayugas, Oneidas, and Mohawks. In 1668
ROMAN CATHOLIC CHURCH

Maryland, and in 1704 a law was passed to prevent "the increase of popery." The stringent provisions of this act remained in force until the Revolution; only the first provision, which forbade bishops and priests to say mass or exercise their ministry, was so far modified that Catholics were permitted to hear mass in their own homes. This was later ascertained.

The colony of Pennsylvania was founded by Penn on the basis of religious toleration, and the Catholic immigrants from Ireland and Germany were allowed to live in comparative peace, but their creed was regarded with contempt. In the Dutch colony of New Netherland, Protestantism was not only not tolerated, but actually the few Catholics appear not to have been troubled. In 1664 the colony passed into the hands of the Catholic duke of York, afterwards James II, and its name was changed to New York. In 1688 the colony received a Catholic governor, colonel Thomas Dongan; and in the same year the first legislative assembly of the colony granted, like Maryland, religious liberty to all "professing faith in God by Jesus Christ." After the expulsion of James, another assembly in 1691 repealed the Toleration Act of 1688, and passed stringent laws against the Catholics. In 1696 only seven Catholic families were found on Manhattan Island. New laws were passed in 1700, 1701, and 1702; and at the beginning of the Revolutionary War the Catholic Church was almost unknown in New York, and the few Catholic inhabitants of New York city had to go to Philadelphia to receive the sacraments. The laws of the New England colonies, of Virginia, the Carolinas, and Georgia, retained rigid penal laws against Roman Catholics on their statute-books. At the beginning of the Revolutionary War, out of the 3,000,000 inhabitants in the American colonies, only about 25,000 were Roman Catholics, of whom 15,000 lived in Maryland. There were about twenty-five priests and about twice as many congregations.

On the eve of the War of Independence, the Continental Congress of Philadelphia, in 1774, pronounced for the broadest toleration. In 1776 the Catholics of Maryland were fully emancipated, owing largely to the influence of Charles Carroll, one of the signers of the Declaration of Independence. The other twelve original states, one after another, granted the Catholics liberty of conscience, the right to build churches and worship as they pleased; but full and unequalled equality of civil and political rights was withheld from them in many of the states some much longer. The Federal Constitution, adopted in 1787, provides in art. vi, sec. 9: "No religious test shall ever be required as a qualification for any office or trust under the United States." Among the framers and signers of this Constitution were two Catholics — Daniel Carroll, of Maryland, and Thomas Fitzsimmons, of Pennsylvania. The right thus obtained was further secured by the enactment of the first article of the amendments to the Constitution, which declares "that Congress shall make no law respecting an establishment of religion, or prohibiting the free exercise thereof."

Until the close of the Revolutionary War, the Catholics of the United States were under the jurisdiction of the vicar apostolic of the district of London, England, who, during the whole of the war, had no kind of intercourse with the American churches. After the establishment of the independence of the United States, the clergy of Maryland and Pennsylvania were naturally impressed with the importance of having an American superior for American churches, and they expressed a desire to be subject to the jurisdiction of a vicar apostolic, subject to the approbation and confirmation of the pope. In reply to the request, the pope, after consulting Benjamin Franklin through the nuncio in Paris, appointed in 1784 the Rev. Dr. Carroll prefect apostolic, with many of the powers of a bishop. In view of the extraordinary difficulties which the new prefect en-
by lay trustees. Another decree strongly recommended the establishment of a society for the diffusion of good books. The Catholic population of the United States was still very small but the rapid increase being chiefly due to the stream of immigration from Ireland. The second provincial council of Baltimore, in 1883, was composed of ten prelates, and directed that the Indian tribes of the Far West and the Catholic negroes of Liberia should be confided to the care of the missionary bishops, which was begun, in 1842, proved a complete failure, and was abandoned in 1845. At the date of the second council the Church consisted of 12 dioceses, with 308 priests, of whom 72 were Americans, 91 Irish, 73 French, 17 Italians, 39 Belgians and Germans, some English and Spanish, and 1 Pole. Archbishop Whitfield died in 1843, and was succeeded by Samuel Eccleston. During his administration five more provincial councils were held in Baltimore, in the years 1837, 1840, 1843, 1846, and 1849. Most of these councils recommended the erection of new episcopal sees, the number of which, therefore, received a large increase. While there were only sixteen in 1840, they numbered twenty-seven in 1850. The council of 1840 also recommended the formation of Catholic temperance societies; that of 1846 chose "the Most Blessed Virgin, conceived without sin, as the patroness of the United States"; and that of 1849, which was attended by twenty-five bishops, asked the pope for the definition of the immaculate conception as a doctrine of the Church in the request that was a few years later was complied with by pope Pius IX.

Many dioceses during this period were greatly troubled by conflicts between the bishops and the lay trustees of the churches. The latter were often unwilling to abandon the control of the churches which had been built by the contributions of the faithful, and the bishops were inflexible in claiming the sole control over the entire Church property of their dioceses. Repeatedly priests and congregations were excommunicated. Sometimes excommunicated priests defied for years the authority of the bishops; but finally the bishops carried their point, and the trustees system was completely crushed out, chiefly through the efforts of John Hughes, bishop of New York. The steady progress of Roman Catholicism, which the majority of Americans continued to regard as a form of ecclesiastical despotism, irreconcilable with, and therefore dangerous to, the free political institutions of the country, led, from 1840 to 1844, in several instances, to outbreaks of Protestant indignation, and even to unlawful attacks upon Catholic church edifices and monasteries.

The immense influx of Catholic immigrants from Ireland and Germany during the decade from 1840 to 1850, which annually added more than 200,000 Catholics to the population of the country, and the great industrial advantages which the people generally derived from the rapid development of the resources of the country, gradually softened the popular feeling with regard to a religious system which had so long been an object of intense aversion. The spread of the Roman Catholic Church in consequence of this most rapid immigration to the Middle Atlantic and the Western States, which could offer to immigrants the best prospects of material success. The Southern States, with their negro labor system, offered the least inducements to immigrants, and consequently received the smallest increase of Catholic population. In 1846 there were in the United States 6 bishoprics, with 27 episcopal sees, 1800 priests, 1078 churches, 600 stations, 29 ecclesiastical institutions, 17 colleges, and 91 female academies. The Catholic population received not only by the continuance of immigration, but by the ces- sion of California and New Mexico to the United States, was estimated at 3,500,000.

In May, 1852, bishop Kenrick of Baltimore, who had succeeded in 1851 archbishop Eccleston, pre-10001

ated over the first plenary or national council of the United States. The council consisted of forty bishops and twenty-six bishops, and, besides proposing to the pope the creation of several new dioceses, it strongly urged the necessity of establishing Catholic schools, and solemnly condemned secret societies, especially the Freemasons. In 1858 the pope conferred the rank of cardinal on Bishop Kenrick of Baltimore. Arch- bishop Kenrick died in 1864, and was succeeded by Dr. Spalding, formerly bishop of Louisville. In 1866 the second plenary council was held in Baltimore. It was presided over by Archbishop Spalding, and seven archbishops, thirty-eight bishops, three mitred abbots, and over one hundred and twenty theologians took part in the deliberations. The council expressed itself highly for the establishment of a Catholic university. The Vatican Council, which began in 1869, was attended by forty-nine prelates of the United States. Only a few of them were opposed to the promulgation of papal infallibility as a doctrine of the Catholic Church, and all readily acquiesced in the decree regarding moralities. The Old Catholic movement in some countries of Europe found no echo in the United States. Archbishop Spalding of Baltimore died in 1872, and was succeeded by James Roosevelt Bayley, bishop of Newark. In 1875 archbishop McCloskey of New York was raised to the dignity of the cardinalate, and the dioceses of Boston, Philadelphia, and Chicago were raised to the rank of metropolitan sees. Thus the number of arch- bishops in the United States rose to eleven. After the death of archbishop Bayley, in October, 1877, bishop James Gibbons of Richmond was appointed archbishop of Baltimore. The number of episcopal dioceses in 1870 was 49; of vicariates apostolic 7; of prefectures aposto- lic 1. The total number of dioceses (including arch- dioceses, vicariates apostolic, and prefectures apostolic) was 68. Many of the dioceses have a large Roman Catholic population. Sadler's Catholic Directory for 1879 claims, according to reports furnished by the bishops, for each of the following dioceses, Catholic population exceeding 200,000: Baltimore, 300,000; Boston, 301,000; Cincinnati, 200,000; New Orleans, 250,000; New York, 600,000; Albany, 200,000; Brooklyn, 200,000; Philadelphia, 275,000; St. Louis, 250,000; Chicago, 280,000. The number of priests in 1876 was 5074; that of churches, 5094; that of stations, 1402.

II. Rites and Religious Orders. - In the women which have been since the beginning of the 19th century the object of hostile legislation in nearly every country of Europe, have never been legally interfered with in the United States. Consequently, their history shows a steady increase of number; and they have grown all the more rapidly, as the expulsion of many orders from European countries and the urgent applications of the American bishops, who have always been, and still are, in need of more missionaries, have frequently induced large numbers of European nuns and monks to settle in the United States. In 1877 there were, according to Murray's Popular History of the Catholic Church in the United States (N. Y. 1877), 787 religious houses and 787 religious orders of men in the United States. Three of these (the Franciscans, Dominicans, and Jesuits) worked as early as the 16th century among the Indians; the Augustinians and Sulpicians founded their first estab- lishments in 1750 and 1781. The Trappists followed in 1863, and the Augustinians of the Province of New York in 1872. The Metropolitan Wilfrid Fenwick founded the Paulist Fathers in 1838. Eight religious orders established themselves between 1840 and 1850, and eleven between 1850 and 1877. One of the orders, the Paulists, arose in the United States, opening its first house in New York in 1858. Among the orders which have the largest num- bers of adherents are the Augustinians, with 290 houses and 750 members; the Christian Brothers, with 49 houses and 700 members; the Augustinians, with 13 houses and 60 members; the Priests of the Mission,
with 13 houses and 142 members; the Benedictines, with 12 houses and 300 members; the Brothers of Mary. In all, there are about 260 establishments of religious orders of men, with more than 8000 members. The number of members of the monastic orders is about as numerous as those for men. In all, there are forty-four religious orders of women, four of which (the Sisters of Charity, the Sisters of St. Joseph, the Sisters of Mercy, and the School Sisters of Notre Dame) have each more than one thousand members.

III. Educational Establishments. As the Catholic Church has always been foremost in kindling a desire for the propagation of the Gospel, and in providing for the religious education of the youth of the country, she has contributed largely toward the founding of denominational schools which prevail in all the states of the Union, strenuous endeavors have been made to gather the children of Catholic parents into parochial schools. The first council of Baltimore, held in 1829, expressed the wish that schools should be established where youth might imbibe principles of faith and morality along with human knowledge. The second plenary council of Baltimore warmly appealed to pastors and people to establish Catholic schools where the Catholic faith might be taught as a science. The bishops, accordingly, have endeavored to provide not only for the establishment of colleges, seminaries, and academies, which, as such, represent the most elevated form of ecclesiastical character, but to connect as much as possible with every parish church a Catholic parochial school. The number of schools of this character is at the present time very large, and in some of the older and more populous dioceses nearly every church has its parochial school. The number of Catholic schools in 1870 exceeded 1700, and the number of children educated in them was over 500,000. The teachers are to a large extent supplied by the religious orders. Though the expenses for supporting these schools are comparatively small, the aggregate amount which has annually to be raised voluntarily contributes is felt as a heavy burden, and insurmountable efforts are made, therefore, to obtain a part of the common-school fund of the states for the support of schools of a strictly Catholic character. Only in a few exceptional cases have these efforts been successful; as a general rule, the claims of the Church have been uncompromisingly rejected.

The number of Catholic female academies has grown with great rapidity. Towards the close of the last century, the Clarist Nuns, during a brief stay in America, opened a school at Georgetown, D.C., which subsequently passed into the hands of the Visitatius Nuns, and grew into a flourishing academy which dates its foundation from 1799. The purchase of Louisiana from France gave to the Catholic Church of the United States an Ursuline academy at New Orleans, with 170 pupils. The foundation of St. Joseph's Academy at Emmettsburg, Md., in 1809, by mother Seton, marks an epoch in the history of Catholic education for young American women. In 1812 the Loretto Nuns of Kentucky entered the field; in 1819 the Ursuline Convent was opened at Boston, and the Ladies of the Sacred Heart began their labor at the South. The Sisters of St. Joseph founded their first establishment in 1886; the Sisters of Notre Dame, in 1840; the Sisters of the Holy Cross and the Sisters of Providence, in 1841; the School Sisters of Notre Dame (founded by Peter Regis), in 1853. Other orders followed, and in 1877 the number of Catholic female academies exceeded 400, the best and most widely known of which were under the direction of the Ladies of the Sacred Heart, the Sisters of Charity, the Visitatius Nuns, the Ursulines, the Sisters of St. Joseph, the Sisters of Mercy, the Sisters of the Holy Cross, the Sisters of Notre Dame, and the Sisters of Providence. It is maintained that in not a few of the convent boarding-schools one third, and in some cases even one half, of the pupils are Protestant and other non-Catholic young ladies.

In the 17th century an attempt to found a Catholic college in New York was made by three Jesuits during governor Dongan's term of office, but it did not find sufficient support. Several years after the Revolution, bishop Carroll founded Georgetown College. Some time later, St. Mary's College, Baltimore, was established. It was chartered in 1806. Mount St. Mary's, Emmettsburg, stands next in point of age. In 1878 there were in the United States seventy-eight Catholic colleges and seminaries with power to confer degrees. Among the largest colleges are St. John's College, Fordham, N. Y.; the University of Georgetown, D.C., with a literary, a medical, and a law department of forty professors, a library of 30,000 volumes, an astronomical observatory, a conservatory of plants, and cabinets; Mount St. Mary's College, Emmettsburg, Md.; St. Louis University, St. Louis, Mo.; St. Joseph's College, Alabama; St. Xavier's College, Cincinnati, O.; the College of the Holy Cross, Worcester, Mass.; the College of St. Francis Xavier, New York; and Santa Clara College, California.

The first theological seminary in the United States was opened in 1791 in Baltimore. Mount St. Mary's Seminary, Emmettsburg, was founded in 1809; St. Joseph's Seminary, near Bardstown, Ky., in 1811. In 1878 there were 23 theological seminaries, with about 1800 ecclesiastical students. Catholic normal schools have been established at St. Francis, W.V.; St. Charles, Baltimore, Md. The following table gives the number of higher Catholic schools, and the number of pupils of parochial schools, in each of the ecclesiastical provinces:

IV. Statistics.—Owing to the large influx of Catholics from Ireland and Germany, and the acquisition of large Catholic territories from France and Mexico, the Roman Catholic population of the United States has increased at a much more rapid rate than the total population of the United States. The following table, giving the estimated Roman Catholic and the total population of the United States at different periods of our history, is instructive:

It is the unanimous opinion of the foremost Catholic writers on the history of the Catholic Church in the United States that their Church has suffered from its first organization to the present time, a gradual diminution; and that though many accessions have been received from other religious denominations, the losses by far exceed the gains. Bishop England of Charleston remarked in 1836: 'We ought, if there were no loss, to have five millions of Catholics; and as we have less than one million and a quarter, there must be a loss of three millions and a quarter at least. We may unhes-
Roman Catholic Church 84 Roman Catholic Church

italiatingly assert that the Church has within the last fifty years (1786-1836) lost millions of members in the United States. Bishop Spalding of Peoria (in his Life of Archbishop Spalding) likewise states: "To confine ourselves to the period to which the hierarchy has been in existence (1790-1870), we have lost in numbers far more than we have gained, if I may express an opinion beyond all doubt." The same opinion is often and forcibly expressed by Dr. O. Brownson and other prominent Catholic writers. Some of the writers referred to (as bishop Spalding) console themselves with the hope "that the number of those who are here lost to the faith is, in proportion to the Catholic population of the country, continually decreasing, while the number of converts each year grows larger." From some diseases among the faithful. Reports have been received from the Church of persons born of non-Catholic parents which are larger than those reported from any other country save England. Archbishop Spalding of Baltimore claimed that of 22,209 persons confirmed by him in five years, 2732 were "converts." Bishop Gibbons of Richmond (now archbishop of Baltimore) claimed that 14 per cent of those who were confirmed by him since he came to the diocese of Richmond were "converts," and in North Carolina 35 per cent. A comparatively large number of men who have attained great prominence in the history of the Roman Catholic Church have entered that Church as adults, and as seceders from other religious communions. Among these men are archbishops Bayley of Baltimore, and Wood of Philadelphia; bishops Rosencrans of Columbus, and Wadham of Ogdenburg; father Hecker, the superior of the Paulists; Dr. Ives, a bishop of the Protestant Episcopal Church; Dr. O. Brownson; and mother Seton, the foundress of the Sisters of Charity.

The following tables give the lists of the archbishops, bishops, and vicars apostolic, with the number of priests, churches, and members in each, the year of their foundation and their territorial extent. Thus it not only presents a summary of the Church at the beginning of 1879, but it exhibits its gradual growth and its comparative strength in different parts of the Union:

Roman Catholic Emancipation (or Relief) Acts. After the Reformation, both in England and in Scotland, Roman Catholics were subjected to many legal penal regulations and restrictions. As late as 1780, the law of England—or, rather, what was not expressly, but was tacitly, a matter of course in the English Church, was not measured, rigidly enforced—it made it felony in a foreign Roman Catholic priest and high-treason in a native to teach the doctrines or perform the rites of his Church. Roman Catholics could not acquire land by purchase. If educated abroad in the Roman Catholic faith, they were declared incapable of succeeding to any estate they went to the next Protestant heir. A son or other nearest relation being a Protestant was empowered to take possession of the estate of his Roman Catholic father or other kinsman during his life. A Roman Catholic could not be guardian even of Roman Catholic children, he was excluded from the legal profession; and it was a capital offence for a Roman Catholic priest to celebrate a marriage between a Protestant and a Roman Catholic. In 1780 it was proposed to repeal some of the severest disqualifications in the case of those who would submit to the following test. This test included an oath of allegiance to the sovereign, an abjuration of the Pretender, and a declaration of disbelief in the several doctrines that it is lawful to put heretics to death, that no faith is to be kept with heretics, that princes may be deposed or put to death, and that the pope is entitled to any temporal jurisdiction within the realm. This bill eventually passed into law in England. In 1791 a bill was passed affording further relief to such Roman Catholics as would in future accept the temporal power of the pope and his authority to release from civil obligations. In the following year, by the statute 33 Geo. III, c. 44, the severest of the penal restrictions were removed from the Scottish Roman Catholics upon taking a prescribed oath and declaration. The agitation in Ireland caused by these measures led to the Irish rebellion of 1798, while the union of 1800 was brought about by means of pledges regarding the removal of the disabilities in question. The agitation upon the subject increased; and at last the duke of Wellington was brought to the conviction that the security of the empire would be imperilled by further resistance of the Roman Catholic claims, and in 1829 a measure was introduced by the duke's ministry for Catholic emancipation. An act having been first passed for the suppression of the Roman Catholic Association—which had already voted its own dissolution—the celebrated Roman Catholic Relief Bill was introduced by Mr. Peel in the House of Commons in the House of Commons, with 350 votes, received the royal assent April 13. By this act (10 Geo. IV, c. 7) an oath is substituted for the oaths of allegiance, supremacy, and abjuration, on taking which Roman Catholics may sit or vote in either house of Parliament, and be admitted to most offices from which they were formerly excluded. Restrictions which existed on Roman Catholic bequests were removed by 2 and 3 Will. IV, c. 115, as regards Great Britain, and by 7 and 8 Vict. c. 60, with relation to Ireland. Later acts abolished a few minor disabilities.

Roman Empire, the government of the Romans as conducted in or by its provinces after the death of Augustus in the first century B.C. The history of the Roman Empire, properly so called, extends over a period of rather more than five hundred years, viz. from the battle of Actium, B.C. 31, when Augustus became ruler of the Roman world, to the abdication of Augustus, A.D. 476. The empire, however, in the sense of the dominion of Rome over a large number of subject states united by a central authority, and which had reached wide limits some time before the monarchy of Augustus was established. The notices of Roman history which occur in the Bible are confined to the last century and a half of the commonwealth and the first century of the imperial monarchy. But in order to appreciate these, some particulars of the condition of the Roman State is necessary. We have only to add, however, the
ROMAN EMPIRE

intention of entering into an account of the rise, progress, state, and decline of the Roman power, but merely to set forth a few of the more essential facts, speaking a little more freely of the relations formed and sustained between the Romans and the Jews. These, comparatively late, became eventually important to the last degree. For a description of the capital city, see Romc, I. History.—The foundations of Rome lie in an obscurity from which the criticism of Niebuhr has done little more than remove the legendary charm. Three thousand years came after, before the date assigned, formed the earliest population,—namely, the Rhamnenses (probably Romanenses, still further abbreviated into Ram- nes), the Titenses (shortened into Tities, from Titus Tatius, their head), and the Luceres (probably an Etruscan horde, who migrated to Rome from Solonium, under Lucumo). In order to increase his population, and with a view to that conquest which he afterwards achieved, and which was only a small prelude to the immense dominion subsequently acquired, Romulus opened in Rome an asylum, inviting thereto those who, for whatever cause, fled from the neighboring cities. To Rome accordingly there fled the discontented, the guilty, the bankrupt, the exiled. In the year 753 B.C. were laid the foundations of the future mistress of the world, according to the ordinary reckoning, B.C. 753, the number of inhabitants at the first not exceeding, it is supposed, four thousand souls. What it arose to in the period of its greatest extent we have not the means of ascertaining. (See I. 14.)

Though the date of the foundation of Rome coincides nearly with the beginning of the reign of Pekah in Israel, it was not till the beginning of the 2d century B.C. that the Romans had leisure to interfere in the affairs of the East. When, however, the power of Carthage had been effectually broken at Zama, B.C. 202, Roman arms and interests soon made themselves felt throughout Macedonia, Greece, and Asia Minor. The first historic mention of Rome in the Bible is 1 Mac. i. 10, where it is stated that there arose "a wicked root, Antiochus, surnamed Epiphanes, son of Antiochus the king, who had been an hostage at Rome." About the year B.C. 161, when Judas Maccabaeus heard of the defeat of Philip, Perseus, and Antiochus, and of the great fame of the Romans, he sent an embassy to them to solicit an alliance, and to obtain protection against the Syrian government (1 Macc. viii. 1 sq.; comp. 2 Macc. xi. 94; Josephus, Ant. xii. 10, 6; Justin, xxvi. 3). The ambassadors were graciously received, and Demetrius was enabled to defeat his rival, but before the answer arrived Judas was slain, having valiantly engaged the whole army of Baccides sent by Demetrius into Judea (1 Macc. xi. 1-18; Josephus, Ant. xii. 11, 1). In B.C. 140, Jonathan renewed the alliance with the Romans (1 Macc. xii. 1-4, 16; Josephus, Ant. xiiii. 5, 8), the embassy being admitted before the senate (βασιλείας ἐπιστασιμόροι), and on his death, the same year, his brother Simon, who succeeded him, sent also to Rome to again seek a renewal of friendship. The Romans readily acceded to his request, and the valiant deeds of Simon and his predecessors were engraved on tables of bronze and gold. Simon also sent to Rome with a great shield of gold, of a thousand pounds weight, to confirm the league with them. The senate at once consented to its re-establishment, and recognised him as high-priest and prince of Judea. The tables of brass on which the league was written were set up in the Temple (1 Macc. xiv. 17 sq.; Josephus, Ant. xxiii. 320). In the year B.C. 66, Pompey arrived in the East to take command of the Roman armies, and sent his general, Scaurus, to Syria. While at Damascus, the latter received an offer of 400 talents from Aristobulus and Hyrcanus, who were both fighting for the kingdom, each one wishing to be aided. Scaurus accepted the offer of Aristobulus, and ordered Aretas, who was assisting him from his own forces, or he would be declared an enemy to the Romans (ibid. xiv. 2, 3). The following year Pompey came into Syria, and deprived Antiochus XIII (Asiaticus) of his kingdom, reducing it to a Roman province. Ambassadors were sent to Pompey from the rival princes, and he wrote to B.C. 62, "You have seen how the princes of Asia Minor, their respective causes were heard by him. Notwithstanding the prejudices of the people in favor of Aristobulus, Pompey, perceiving the weakness of character and imbecility of Hyrcanus, seemed to incline towards the latter, knowing that it was better to have a weak man under the Roman control. He, however, left the matter undecided, and Aristobulus, seeing that his case was lost, withdrew to make preparations for defence (ibid. xiv. 2, 3). Pompey then occupied himself in reducing the forces of Aretas, and afterwards marched against Aristobulus, who fled to Jerusalem. Aristobulus, on his approach, met him, and offered him a thousand talents of silver, but Pompey refused the bribe; but on his arrival at Jerusalem he found the gates closed. Aristobulus was then thrown into prison, and Pompey marched to Jerusalem. Hyrcanus opened the gates to him, while the party of Aristobulus, including the priests, shut themselves up in the Temple. In the siege of Jerusalem, Pompey, observing that the Jews did not work on the seventh day, gained material advantage, and at last took the place by assault, killing, according to Josephus, as many as 12,000 persons, even desecrating the Temple by entering the holy of holies (comp. Tacit. Hist. v. 9), though he did not touch any of the treasures. Hyrcanus was then appointed high-priest and governor of the country, but was forbidden to wear a diadem (comp. Josephus, Ant. xx. 10). Tribute was also exacted of him, and Pompey took Aristobulus and his two sons, Alexander and Antigonus, prisoners to Rome, whence they subsequently escaped (ibid. xiv. 3, 2; 4, 2; 3, 4; War. i. 7, 6; Strabo, ii. 557, p. 785).

The restoration of Hyrcanus was, however, merely nominal, as the Idumean Antipater, an active friend of the Romans, was placed over him as governor of Judea. "Now began the struggle which was destined to continue with little intermission for nearly two hundred years. It was nourished by feelings of the utmost bitterness with the most frightful examples of barbarity, in which each of the contending parties stirred up to the other; but it was directed by a controlling Providence to a beneficent consummation, in the destruction of the Jewish nationality, and the dispersion throughout the world of the Christian communities." (See Mercivale, Romans under the Empire [London, 1865, 8 vols. 8vo], vol. iii, ch. xxix, where the events of the period are admirably summed up.) In the year B.C. 57, Alexander, the eldest son of Aristobulus, escaped from Pompey, and took up arms in Judea. Hyrcanus upon this applied to him for assistance in driving out the Antipatricians, who thereupon sent Mark Antony with a large force into Judea. Antony, being joined by Antipater with the forces of Hyrcanus, defeated Alexander, and compelled him to fly to Alexandria. Gabinius soon after arrived, and, through the mediation of the mother of Alexander, made peace with him and allowed him to depart. In 40 B.C., Gabinius, wrote to the Seven Cities, which were distributed thus five among the five cities. These seven Gabinius, Jerusalem, Gadara, Amathus, Jericho, and Sepphoris, in Galilee (Josephus, Ant. xiv. 5, 4). In B.C. 54 Gabinius
was unsatisfied with the government of Syria by Crassus, who plundered the province of about 10,000 talents, notwithstanding that a beam of gold of immense value had been given him, on condition that he would touch nothing else in the Temple (ibid. xiv, 7, 1). All this time Antipater was gaining influence with the Romans; and after the death of Pompey, in B.C. 48, he was very useful to Julius Caesar in his war against Egypt. He was therefore chosen by the procurator of Judea, to give him the privilege of a citizen of Rome, and freedom from taxes everywhere. Hyrcanus also was confirmed in the priesthood and etharch, the claims of Antigonus, the only surviving son of Aristobulus, being set aside, and thus the aristocracy was once more restored to Judea (ibid. xiv). The ascendency and prosperity of Antipater were now insured. At this period he had four sons. Two of them, Phasael and Herod, were holding important posts, the former being governor of Jerusalem, and the latter governor of Galilee. Finally, Antipater's son, Herod the Great, was made king by Antony's interest, B.C. 40, and confirmed in the kingdom by Augustus, B.C. 30 (ibid. xiv, 14; xv, 6). The Jews, however, were all this time tributaries of Rome, and their princes in reality were mere Roman procurators. Julius Caesar is said to have excused them from a fourth part of their agricultural produce in addition to the tithe paid to Hyrcanus (ibid. xiv, 10, 6). Roman soldiers were quartered at Jerusalem in Herod's time to support him in his authority (ibid. xv, 3, 7). Tribute was paid to Rome, and an oath of allegiance to the emperor as well as to Herod appears to have been taken by the people (ibid. xvii, 2, 2). On the banishment of Archelaus, A.D. 6, Judaea became a mere appendage of the province of Syria, and was governed by a Roman procurator, who resided at Caesarea. Galilee and the adjoining districts were still left under the government of Herod's sons and other petty princes, whose dominions and titles were changed from time to time by successive emperors. See HEROD.

The Jewish people, being at last worn out with the disputes and cruelties of the Herods, sent a mission to Rome, begging that Judea might be made a Roman province. In the year A.D. 6, Archelaus was banished, and Judea put under the government of Rome. The first procurator appointed was Coponius, who accompanied Cyrenius (the Greek form of the Roman name Quirinius). The latter had been sent to take an account of their substance, and to make a census or ἀφορίσια [see CHRONOLOGY; CYRENIIUS] of the inhabitants of Judea (Luke ii, 1; Josephus, Ant. xvii, 13, 5; xviii, 11; War, ii, 8, 1). In A.D. 9 Coponius was succeeded by Marcus Ambivius, who remained at the head of the government till A.D. 12; and was then replaced by Annius Rufus. On the accession of Tiberius, Valerius Gratus was made procurator, a post he held for eleven years, and was succeeded (A.D. 26) by Pontius Pilate (Josephus, Ant. xvii, 2, 2), who entered Judaea with the ensigns of war, as the envoy of Archelaus. The sending of images, and a great tumult arose, and shortly Herod ordered him to withdraw them (ibid. xviii, 8, 1; War, ii, 9, 8). Pilate tyrannically governed the Jews till A.D. 36; and at last, owing to continual complaints, was ordered by Vitellius, the president of Syria, to proceed to Rome to give an account of his administration. Tiberius sent word, as the result of a despatch from the emperor to Vitellius, ordering him to return to his life at the commencement of the reign of Caligula (Josephus, Ant. xvii, 3, 1-3; 4, 1; War, ii, 9, 2; Euseb. H. E. ii, 7). It was during his administration that our Lord was condemned and crucified (Matt. xxvii; Mark xv; Luke iii, 1; xxiii; John xviii, xix.). On Pilate's return to Rome, he was ever afterwards replaced over Judea by Vitellius (Josephus, Ant. xvii, 4, 2). The new emperor, Caius, however, superseded him, and appointed Marcellus procurator of Judea (ibid. xviii, 6, 10). In A.D. 40 Vitellius was recalled, and Petronius sent as presi-
Tacit. Hist. v, 10). See Governor. The following year Nero sent Vespasian into Judea (Josephus, War, iii, 1, 2). (Accounts of the war and siege of Jerusalem will be found in the article JERUSALEM.) In 68, Nero died; Galba, Otho, and Vitellius followed in quick succession; and Vespasian himself was elected emperor by the legions in Judea. In A.D. 70, Titus was sent by his father to conduct the war; and after a four months' siege Jerusalem was taken. Josephus states that 1,100,000 were killed during the siege (ibid. vi, 9, 3), that several were allowed to depart, and an immense number sold to the army and carried captive. These numbers are of course exaggerated. See Luke xxii, 24.

Under Trajan the Jews again broke out into open revolt, and the disturbances continued under Hadrian. At last, A.D. 131, one Bar-cocheba, the son of a star, was placed at the head of the Jews. Several times the Roman army was defeated; but Julius Severus, by reducing their fortresses one by one, finally defeated him in A.D. 135. Dion Cassius says that 580,000 Jewish people were slain in these battles (lxix, 14). This statement is as extravagant as that of Josephus (ut sup.). In A.D. 186 the emperor Hadrian founded a new city, under the name of Ælia Capitolina, to which he gave the privileges of a colony. None but Christians and pagans were allowed to enter (Dion Cass. lxix, 12; comp. Gibbon).

The New Testament history falls within the reigns of Augustus, Tiberius, Caligula, Claudius, and Nero. Only Augustus (Luke ii, 1; Tiberius, iii, 1), and Claudius (Acts xi, 28; xviii, 2) are mentioned; but Nero is alluded to in the Acts from ch. xxv to the end, and in Phil. iv, 22. The Roman emperor in the New Testament is usually called Caesar (Acts xxv, 10, 11, 12, 21), though sometimes Augustus (Σαβασσών, ver. 21, 25), and once Lord (ὁ κύριος, ver. 26). We thus find many characteristics of the Roman rule constantly before us in the New Testament; we hear of Caesar the sole king (John xix, 15) of Cyrenius, "governor of Syria" (Luke ii, 2); of Pontius Pilate, Felix, and Festus, the "governors," i.e., procurators, of Judea; of the "tetrarch" Herod, Philip, and Lysanias (iii, 1); of "king Agrippa" (Acts xxv, 13); of Roman soldiery, legions, centurions, publicans; of the tribute-money (Matt. xxii, 19); the taxing of "the whole world" (Luke ii, 1); Italian and Augustan cohorts (Acts x, 1; xxvii, 1); the appeal to Caesar (xxv, 11). Several notices of the provincial administration of the Romans and the condition of provincial cities occur in the narrative of Paul's journeys (xiii, 7; xviii, 12; xvi, 15, 36, 98; xix, 38). See JERUSALEM.

II. Extent of the Empire.—Cicero's description of the Greek states and colonies as a "fringe on the skirts of barbarism" (Cicero, De Rep. ii, 4) has been well applied to the Roman dominions before the conquests of Pompey and Caesar (Merviale, Rom. Empire, iv, 409). The Roman empire was still confined to a narrow strip encircling the Mediterranean Sea. Pompey added Asia Minor and Syria; Caesar added Gaul. The generals of Augustus overran the north-west portion of Spain and the country between the Alps and the Danube. The boundaries of the empire were now the Atlantic on the west; the Euphrates on the east; the deserts of Africa, the cataracts of the Nile, and the Arabian deserts on the south; the British Channel, the Rhine, the Danube, and the Black Sea on the north. The only subsequent conquests of importance were those of Britain by Claudius, and of Dacia by Trajan. The only independent powers of importance were the Parthians on the east and the Germans on the north.

The population of the empire in the time of Augustus has been calculated at 85,000,000 (Merviale, Rom. Empire, iv, 442-450). Gibbon, speaking of the time of Claudius, puts the population at 120,000,000 (Decline and Fall, ch. ii). Count Franz de Champagny adopts the same number for the reign of Nero (Les Césars, ii, 428). All these estimates are confessedly somewhat uncertain and conjectural.

This large population was controlled, in the time of Tiberius, by an army of twenty-five legions, exclusive of the praetorian guards and other cohorts in the capital. The soldiers who composed the legions may be reckoned in round numbers at 170,000 men. If we add to these an equal number of auxiliaries (Tacit. Ann. iv, 5), we have a total force of 340,000 men. The praetorian guards may be reckoned at 10,000 (Dion Cass. iv, 24). The other cohorts would swell the garrison at Rome to 15,000 or 16,000 men. For the number and stations of the legions in the time of Tiberius, comp. Tacit. Ann. iv, 5.

Map of the Roman Empire, showing the Provinces.
The navy may have contained about 21,000 men (Les Ciusa, ii, 429; comp. Merivale, iii, 534). The legion, as appears from what has been said, must have been "more like a brigade than a regiment," consisting, as it did, of more than 6000 infantry with cavalry attached (Cicero, de legibus, ii, 286).

III. Home Rule. — The Roman government was at first kingly. Romulus, the first monarch, was probably succeeded by six others, during a period of two hundred and forty-four years, till in the year B.C. 509 kingly government was abolished when in the hands of Tarquinii Superbus, in consequence of his arrogant and oppressive despotic, A consul form of government was next adopted, which was at the first of an essentially aristocratic character, but was compelled to give way by degrees to popular influence, till men of plebeian origin made their way to the highest offices and first honors is the State, when the government became an oligarchy; then fell into anarchy, from which it was rescued by the strong hand of Octavius Caesar, who became sole master of the world by defeating Antony at Actium on Sept. 2, A.U. 723 (v.B.C. 31), though it was not till the year 716 that the senate named Octavius Imperator, nor till the year 725 that he received the sacred title of Augustus. When Augustus became sole ruler of the Roman world, he was in theory simply the first citizen of the republic, intrusted with temporary powers to settle the disorders of the State. Tacitus says that he was neither king nor dictator, but "prince" (Ann. i, 9), a title implying no civil authority, but simply the position of chief member of the senate (princeps senatus). The old magistrates were retained, but the various powers and prerogatives of each were conferred upon Augustus, so that while others commonly bore the chief official titles, Augustus had the supreme control of every department of the State — above all, he was the emperor (imperator). This word, used originally to designate any one intrusted with the imperium, or full military authority over a Roman army, acquired a new significance when adopted as a permanent title by Julius Caesar. By his use of it as a constant prefix to his name in the city and in the camp he openly asserted a paramount military authority over the State. Augustus, by resuming it, plainly indicated, in spite of much artful concealment, the real basis on which was founded the support of the army (Merivale, Rom. Empire, vol. iii). In the New Test. the emperor is commonly designated by the family name "Cæsar," or the dignified and almost sacred title "Augustus" (for its meaning, comp. Ovid, Fasti, i, 609). Tiberius is called by implication ἄρχων in Luke iii, 1, a title applied in the New Test. to Cyrenus, Pilate, and others. Notwithstanding the establishment of an imperial government, the Romans seem to have shirked from speaking of their ruler under his military title (see Merivale, Rom. Empire, iii, 452, and note) or any other stowed despotic appellation. The use of the word κατηγορος, domínus, "my lord," in Acts xxv, 26, marks the progress of Roman servility between the time of Augustus and Nero. Augustus and Tiberius refused this title. Caligula first bore it (see Alford's note in loc. cit.; Ovid, Fasti, ii, 142). The term βασιλεύς, "king," in John xix, 15; 1 Pet. ii, 17, cannot be closely pressed.

The empire was nominally elective (Tacit. Ann. xiii, 4), but practically it passed by adoption (see Galba's speech in Tacit. Hist. i, 15); and till Nero's time a sort of hereditary right seemed to be recognised. The dangers inherent in a military government were, on the whole, successfully averted till the death of Pertinax, A.D. 193 (Gibbon, iii, 80); but outbreaks of military violence and Howling in this sinister period (comp. Wencek's note on Gibbon, loc. cit.). The army was systematically bribed by donations at the commencement of each reign, and the mob of the capital continually fed and amused at the expense of the provinces. We are reminded of the insolence and avarice of the soldiers in Luke iii, 14. The reigns of Caligula, Nero, and -

Roman Emperor and Empress.
the notices of the "politearchs" and "demos" at Thessalonica (Acts xx, 8), also the "protoclerk" and the assembly at Ephesus (xix, 35, 39 [Conybeare and Howson, Life of St. Paul, i, 357; ii, 70]). Occasionally, but rarely, free cities were exempted from taxation. Other cities were "colonies," i.e., communities of Roman citizens transplanted, like garrisons of the imperial city, into a foreign land. Such was Philippi (Acts xvi, 12). Such, too, in modern Turkey, Tarsus, the home of St. Paul. The inhabitants were, for the most part, Romans (ver. 21), and their magistrates delighted in the Roman title of Praetor (στρατηγός), and in the attendance of dictors (μητροπολίτης). Acts xvi, 35 (Conybeare and Howson, i, 815). See COLONY.

Augustus divided the provinces into two classes—(1) Imperial; (2) Senatorial—retaining in his own hands, for obvious reasons, those provinces where the presence of a large military force was necessary, and committing the peaceful and unarmed provinces to the senate. The imperial provinces, at first, were Gaul, Lusitania, Syria, Phoenicia, Cilicia, Syria, and Egypt. The senatorial provinces were Africa, Numidia, Asia, Achaia and Epirus, Dalmatia, Macedonia, Sicily, Crete and Cyrene, Bithynia and Pontus, Sardinia, &cætæ (Dion Cass. liii, 12). Cyprus and Gallia Narbonensis were subsequently given up by Augustus, who in turn received Dalmatia from the senate. Many other changes were made afterwards. The governors of these provinces which were assigned to the senate were called proconsuls (προκωνστάροι, deputies; A. V. Acts xiii, 7; xvii, 12; xix, 38), whatever their previous office may have been (Dion Cass. liii, 13). The imperial provinces, on the other hand, were governed by a Legatus (πρωτομήτης) or propraetor (πρωτοπροπολέμος), even if the officer appointed had been consul. The minor districts of the imperial provinces were governed by a procurator (προκωνστάρος, Dion Cass. liii, 15, "steward," Matt. xx, 8). Augustus brought all the procurators under his control (Dion Cass. liii, 32).

Under the republic they had managed the affairs of private citizens, but under the empire they discharged the duties performed by the questors in the senatorial provinces. They controlled the revenue and collected the taxes, and their power extended from these matters to justice and administration (Tacit. Hist., i, 11). The procurators of Judea seem to have been under the control of the proconsul of Syria, as Quadratus condemned the indiscretion of the procurator Cumanus (Josephus, Ant. xx, 6, 3; Tacit. Ann. xii, 54). They are called "governmental" (γεγονός) in the New Test. The verb γηγονησιωθή is employed in Luke ii, 2 to show the nature of the government of Quirinius over Syria. Asia and Achaea were assigned to the senate, and in each case the title of the governor in the Acts is proconsul (διοικητής, xvi, 12; xvi, 38). Dion Cass. (liii, 12) informs us that Cyprus was retained by the emperor; but Sergius Paulus is called in the Acts (xiii, 7) "proconsul." This is quite correct, as Dion adds that Augustus restored Cyprus to the senate in exchange for another district of the empire. Coins and inscriptions of Cyprus also bear the title of "proconsul" (comp. Conybeare and Howson, Life of St. Paul, i, 123 sq.). Allusion, in Num. iii. of New Test. p. 41. See PROCURATOR.

The government of the senatorial provinces lay between the consuls, for whom, after they had completed their consular office, two provinces were appointed; the other provinces were allotted to the proconsuls. Sueto- nius (Jul. xvi, 9) states that Augustus made changes in this arrangement. Questions, chosen by lot out of those who were named for the year, went with the proconsuls into the provinces of the senate. Into the provinces of the emperor, legati, or lieutenants, were sent, with procuratorial power, to act as representatives of their master; they were the pseudomintists of the imperial provinces and had power of life and death over the soldiers—two distinctions which were not granted to the proconsuls, or governors of the senatorial provinces. The imperial lieutenants remained many years in the provinces; until, indeed, it pleased the emperor to send them as "procurators," called at a later period "rationales," who were generally taken from the equestrian order. They raised the revenue for the imperial treasury, and discharged the office of paymaster of the army. There was also in the senatorial provinces a procurator, who raised the income invested, not for the treasury, but for the emperor's private purse: the smaller provinces, like Judea, which belonged to Syria, were altogether governed by such. See PROCURATOR.

The proconsuls, procurators, and proproratorial lieutenants, when about to proceed into their several provinces, received instructions for their guidance from the emperor; and in cases in which these were found insufficient, they were to apply for special directions to the imperial head of the State. A specimen of such application may be found in Pliny's letter to Trajan, with the emperor's rescript, regarding the conduct which was to be observed towards the already numerous and rapidly growing sect of Christians. The administration of justice, so far as it did not belong to the province itself, was in the governor or lieutenants assembled in a conventus; an appeal lay from this court to the proconsul, and from him to Caesar. Criminal justice was wholly in the hands of the local governor, and extended not only over the provincials, but the Roman citizens as well: in important cases the governors applied for a decision to the emperor. The procurator sometimes had the power of life and death, as in the case of Pontius Pilate (Tacitus, Ann. xv, 44). See PROVINCE.

Roman Orator and Youth.

The procurator of Judea resided principally at Cæsarea, and the military forces were generally stationed there (Josephus, Ant. xvin, 3, 1). During the Passover the troops were stationed at Jerusalem, in order to prevent any insurrection from the multitude of visitors at that festival (Acts xxii, 21; xxii, 31; xxiii, 34; xxiii, 29; Josephus, Ant. xx, 5, 3). The troops consisted of infantry and cavalry (Acts xxiii, 28), and were commanded by tribunes (πρωτομήτης, ver. 17) and centurions (ευπροσδοκοι, Mark xv, 39, 44, 45; ιεραπροσδοκοι, Matt. viii, 5; xxvii, 54; Acts x, 22). The former were at the head of the cohorts (ειραμνησια), and the latter at the head of the centurion, of which two made a maniple. See ARMY. It was the duty of the soldiers to execute the sentence of death and to keep guard over the prisoners (Matt. xxvii, 27 sq.; John xix, 28 sq. comp. Acts xxii, 25), and the garments of those who were executed became their perquisites (John xix, 28). They also guarded the prison which the Lord visited at Jerusalem (John x, 4), and the trial of the Savior at Cæsarea (Acts x, 1). The conversation is made of the Italian band at Cæsarea. This was probably a cohort serving in Syria composed of natives of Italy, and called Ἰταλική to distinguish it from those
which consisted of troops raised in Syria (Josephus, Ant. xiv, 13, 10; War, i, 17, 1), as we know from Gruter (Inscr. lat. 1, 10) that the whole Roman troops were serving in Syria. The κόσμος Augusti (Acts xxvii, 1) could not well be a κόσμος Augustae, for no legions in Syria or Judea bearing that title, nor could it be the band levied from Samaria (κύριος κοβαγηνος συγκαταρτιωτης, Josephus, Ant. xix, 9, 2; xx, 6, 1; War, ii, 12, 3). Wieseler suggests that it was the Augustanes mentioned in the itineraries of Suetonius (Vero, 20, 25). The first levying of this band by Augustus is recorded by Dion Cassius (xiv, 12).

The provinces were heavily taxed for the benefit of Rome and her citizens. In old times the Roman revenues were raised mainly from three sources: 1. the domain lands, 2. a direct tax (tributum) levied upon every citizen; 3. from customs, tolls, harbor duties, etc. The agrarian law of Julius Cesar is said to have extinguished the first source of revenue (Cicero, Ad Att. ii, xvi; Dureae de la Malle, ii, 480). Roman citizens had ceased to pay direct taxes since the conquest of Macedonia, B.C. 167 (Cicero, De Off. ii, 22; Plutarch, Romul. Paul. 38), except in extraordinary emergencies. The main part of the Roman revenues was newly drawn from the provinces by a direct tax (σηρανος, φρονος, Matt. xxii, 17; Luke xxii, 22), amounting probably to five to seven per cent. on the estimated produce of the soil (Dureae de la Malle, ii, 418). The indirect taxes, too (ρυθμος, rec. Matt. xix, 24; Dureae de la Malle, ii, 449), appear to have been very heavy (ibid. ii, 448, 452). Augustus, on coming to the empire, found the regular sources of revenue impaired, while his expenses must have been very great. To say nothing of the pay of the army, he is said to have supported no less than 200,000 citizens in idleness by the miserable system of public grants. Hence the necessity of a careful valuation of the property of the whole empire, which appears to have been made more than once in his reign. See Census. Augustus appears to have raised both the direct and indirect taxes (ibid. ii, 483, 448).

The provinces are said to have been better governed under the empire than under the republic, and those of the emperor better than those of the senate (Tacitus, Ann. i, 76; iv, 6; Dion, lili, 14). Two important changes were introduced under the empire. The governors received a fixed pay, and the term of their command was prolonged (Josephus, Ant. xviii, 6, 3). But the old mode of levying taxes seems to have been continued; the executive power existing generally of knights, paid a certain sum into the Roman treasury, and proceeded to write what they could from the provincials, often with the connivance and support of the provincial governor. The work was done chiefly by underlings of the lowest class (poritorii). These are the publicans (q. v. of New Testament). On the whole, it seems doubtful whether the wrongs of the provinces can have been materially alleviated under the imperial government. It is not likely that such rulers as Caligula and Nero would be scrupulous about the means used for replenishing their treasury. The stories related even of the reign of Augustus show how crude (Acts xxvii, 29) the mode of placing the governors. See the story of Licinius in Gaul (Smith, Dict. of Gr. and Rom. Biog. s. v.), and that of the Dalmatian chief Dion, lv). The sufferings of Paul, protected as he was, to a certain extent, by his Roman citizenship, show plainly how little a provincial had to look for from the government.

V. Roman Citizenship.—Seeing how great the privileges of a Roman citizen were, the eagerness with which it was sought, and the earnestness with which it was pleaded in case of any unjust treatment, is not to be wondered at. The freedom of Rome was often obtained by purchase for great sums (Acts xxix, 28), though at the end of the first century it is said that it might be bought for a little broken glass (Dion Cass. lx, 17). A citizen under the republic could in criminal cases, if he were so minded, appeal from the magistrate to the people, for without the acquiescence of the people no man could be condemned (Cicero, Tusc. Quest. 4, 1; In Verr. 54, 57). At the commencement of the imperial period it was, however, necessary that the appeal should be made to the emperor, who had assumed the privilege of final adjudication. It was thus that Paul, when being tried before Festus, "appealed unto Cæsar" (Acts xxvii, 11; xxvi, 32), fulfilling the words of the Saviour, "He that is not with me is against me" (xxiii, 11; xxvii, 23; xxviii, 14, 16, 17; 2 Tim. i, 17; iv, 17). The scourging of a Roman citizen was contrary to the law, and Paul, by the assertion of his Roman citizenship, prevented Claudius Lysias from ordering him to be scourged (Acts xxix, 20—22; xxi, 17—27). At an earlier period Paul and Silas had been scourged (xxvi, 37), and two Roman laws thereby violated (Lex Valeria, B.C. 508; Lex Porcia, B.C. 300). They were also illegally treated, being "uncondemned" (Cicero, Verr., i, 9; Tacitus, Hist. i, 6). See Siginonius, De Antiquo Jure Civ. Rom. (Paris, 1572); also in Grævi Thesaurus, vol. i; Spanheim, Orbis Rom. (Lond. 1705); Cellarius Dissertationes, ii, 713 sqq. Fabricius, Bibliograph. Antiq. p. 724 sqq. See Citizenship. VI. Religious Toleration.—The treatment that the Jews received at the hands of the Romans was at times very moderate. Under Julius Cæsar they were not forbidden to live according to their customs even in Rome itself (Josephus, Ant. xiv, 10, 8), and it is said that they should have full freedom of worship, hold their assemblies, and make gifts to their Temple; they were even admitted with the citizens to a share in the largesses of corn (Philod, Aed Cat. p. 1015; comp. Horace, Sat. i, 9, 69); and when it fell upon the Sabbath day, Augustus allowed it to be put off to the next day. They were also exempted from military service on account of their religious prejudices (Josephus, Ant. xiv, 10, 11—19; xvi, 6; comp. xiv, 5, 3). Suetonius (Ces. 84) records that the Jews were in great grief at the death of Augustus. Tiberius and Claudius banished them from Rome, the latter on account of tumults caused by a certain Chrestus (Tacitus, Ann. ii, 85; Suetonius, Claud. 25; comp. Josephus, Ant. xviii, 3, 5; Suetonius, Claud. 25; Acts xviii, 2); but the expulsion by Claudius is contradicted by Dion Cassius (ix, 6), and a few years after the Jews were again at Rome in great numbers (Acts xxxvii, 17 sq.). The interference of the Roman government was confined to keeping peace at the great festivals at Jerusalem, for which purpose praetors were stationed in the fortress of Antonia, overlooking the city (xxii, 24). The administration of religious ceremonies was committed to the high-priest and Sanhedrin; civil and criminal jurisprudence was retained by them, and they were allowed to pass the sentence of condemnation, but its execution depended upon the procurator (Josephus, Ant. xx, 9, 11; Mark xiv, 53—55, 62—65). They were also permitted to inflict lesser punishments, especially for infractions of the Mosaic law; but the power of life and death was taken from them (John xviii, 31). (See Alford's note on this passage, and Bischof On the Acts, p. 194 sqq.) The stoning of Stephen was evidently carried out under a tumult, and not with the sanction of the procurator (Acts vii, 28). Even beyond the borders of Palestine the Jews exercised among themselves the civil jurisdiction according to their laws. Josephus (Ant. xiv, 19, 17) gives a Roman decree to the city of Sards sanctioning this privilege.

The Romans could not remain masters of the country so long without leaving many traces of their occupation: the Latin language became known, the imperial weights and measures as well as modes of reckoning time were adopted, many Latinisms passed into common use (occasionally met with in the New Testament), and judicial proceedings were conducted in that language. Yet Latin literature never exercised the same influence on the Jewish mind which the Greek philosophy did, of
ROMAN EMPIRE, THE HOLY

which we have the most remarkable example in the Jewish school of Alexandria. Indeed, the Romans carefully abstained from forcing their own language upon the inhabitants of the countries they conquered, though the Greek language, which even in the farthest limits of the empire, was carried out in the Roman language was never relaxed, but the edicts were generally translated into Greek (Josephus, Ant. xiv, 10, 2). The better-educated Romans undoubtedly spoke Greek. The inscription on the cross was written in Hebrew, Roman, and Greek (Luke xxiii, 38; John xix, 20); but the inscription on the cross was in the official language, and the Greek, that usually spoke (Alford, ad loc.). All the official inscriptions put up by the Romans were called tithi (comp. Suetonius, in Calig. 34; in Dom. 10); and John (loc. cit.) uses the same expression (τίθηται πλῆθος).

The freedom of religious worship enjoyed by the nations subject to Rome was remarkably great, though foreign religions were not allowed to be introduced among the Romans (Livy xxxix, 16); and it is recorded by Dion Cassius (iii, 36) that Mæcenas advised Augustus not to permit such innovations, as they would only tend to destroy the monarchy. This rule was strictly maintained by Augustus and his successors, except, as we have seen, the Jews were sometimes expelled from Rome.

VII. The condition of the Roman empire at the time when Christianity appeared has often been dwelt upon, as affording obvious illustrations of Paul's expression that "the time had come for the general peace within the limits of the empire, the formation of military roads, the suppression of piracy, the march of the legions, the voyages of the corn-devis, the general increase of traffic, the spread of the Latin language in the West as Greek had already spread in the East, the extension of the unity of the empire, the diffusion of learning hitherto unknown for the spread of a world-wide religion. The tendency, too, of a despotism like that of the Roman empire to reduce all its subjects to a dead level was a powerful instrument in breaking down the pride of privileged races and national religions, and familiarizing men with the truth that "Goil hath made of one blood all nations on the face of the earth" (Acts xvii, 24, 26). But still more striking than this outward preparation for the diffusion of the Gospel was the appearance of a deep and wide-spread corruption which seemed to defy any human remedy. It would be easy to accumulate proofs of the moral and political degradations of the nations under the empire, to do more than allude to the corruption, the cruelty, the sensuality, the monstrous and unnatural wickedness of the period as revealed in the heathen historians and satirists. "Viewed as a national or political history," says the great historian of Rome, "the history of the Roman empire is sad and discouraging in the last degree. We see that things had come to a point at which no earthly power could afford any help; we now have the development of dead powers instead of that of a vital energy" (Niebuhr, Lect. v, 194). Notwithstanding the outward appearance of peace, unity, and reviving prosperity, the general condition of the people must have been in a great misery. To say nothing of the inherent practice generally prevailing, forbid us to think favorably of the happiness of the world in the famous Augustan age. We must remember that "there were no public hospitals, no institutions for the relief of the infirm and poor, no societies for the improvement of the condition of mankind from motives of charity. Nothing was done to promote the instruction of the lower classes, nothing to mitigate the miseries of domestic slavery, Charity and general philanthropy were so little regarded as duties that it requires a very extensive acquaintance with the literature of the times to find any allusion to them" (Arnold, Later Roman Commonwealthe, ii, 398). The empire was mainly not a single religion, except the Jewish, which was felt by the more enlightened part of its professors to be real, we may form some notion of the world which Christianity had to reform and purify.

Notwithstanding the attempts of Augustus to stop all tendencies to corruption by punishing immorality, it proved almost impossible to control the empire. With a high civilization, a flourishing commerce, and general outward refinement was associated a terrible depravity of morals. Yet the prosperous state of the empire was confessed by the provinces as well as the Romans. "They acknowledged that the true principles of social life, laws, agriculture, and science, which had been first invented by the wisdom of Athens, were now firmly established by the power of Rome, under whose auspicious influence the fiercest barbarians were united by an equal government and common language" (Gibbon, ch. ii). The cruelties and exactions of the provincial magistrates were so excessive by Augustus and Tiberius (Tit. Thrac. iv. 6) that Rome was constructed and commerce increased, but all of no avail. Society would not be reformed, and Paul draws a striking picture of the corruption of the age (Rom. i, 14-23). But the spirit of Christianity was floating in the atmosphere, and "the wisdom of providence was preparing a knowledge of the true Rock not as deeply as the literature of the Augustan age had been scattered superficially" (Arnold, loc. cit.).

The Roman empire terminated with the anarchy which followed the murder of Justinian II, the last sovereign of the family of Heracleius; and Leo III, or the second Michael the Pious, was the last Byzantine emperor (Finlay, Greece under the Romans, p. 438).

The chief prophetic notices of the Roman empire are found in the book of Daniel, especially in xi, 30-40, and in ii, 40; vii, 17-19, according to the common interpretation of the "fourth kingdom" (comp. 2 Esdr. xii, 1). See DANIEL. According to some interpreters the Romans are intended in Deut. xxviii, 49-57. For the mystical notices of Rome in the Revelation, comp. Rome.

On the general subject of this article, consult Eschenberg, Classical Manual, § 8 "Roman Antiquities" (Lond. 1844); Ruperti, Handbuch der römischen Alterthümer (Hanover, 1841, 2 vols. 8vo); Mailloot and Martin, Recherches historiques et critiques sur la race des Indo-Européens. See also Unger, Sitten und Gebiirde der Römer (Vienna, 1805); Arnold, Hist. of Rome. Much information may be found by the English reader on the state of manners in the first centuries after Christ in the following:es: Lockhart, Valeria; Bulwer, Pompeii; Ware, Palmyra; and in Milman, Hist. of Latin Christianity. But especially consult Morvile, Hist. of the Roman Empire (Lond, 1864, 8vo).

ROMAN EMPIRE, THE HOLY, is the designation familiarly given to the medieval and modern Roman Empire of the West, and especially to that empire after the imperial sceptre had passed into the hands of Ger- manic peoples, and not by a whole race from the coronation of Charlemagne to the abdication of Francis of Austria—the Roman empire occupied in Western Europe the first place, in dignity and prestige, of all secular governments. Though its actual power had continually fluctuated, and its influence on the affairs of the whole world was waning, it continued to be the central power of the Christian world. When, for example, Charles V. it remained an imposing memorial of ancient grandeur and dominion, and was honored as a "claram et venerabile nomen." "Heir of the universal sway of Rome, the holder of it claimed to be the suzerain of all earthly kings. First and oldest of European dignities, its very name had a sound of dignity.

Passing over the widely extended and thoroughly organized empire of Charlemagne, and the rapid decay
of eminence and power, under his successors of the Car
villian line, and continuing attention to the Germanic dy
through the early Empire maintained a lofty and pot
ascendancy over all kings and temporal rul
in the West for three centuries, extending from the
other. During this long and agitated period, the empire and the
people were subjected to the times of Rhetor and
cessation: the one acknowledged to be supreme in the
tral order, the other revered as supreme in the
rivalries, the jealousies, the ani
osties, the virulent antagonisms, of these transcendent
sovereignties—each endeavoring to secure its own posi
and predominance by the depression of the other—
plexes worse than the bloody warfare which they
engendered. For one brief interval in the subsequent
ages, after long and dreary eclipse, the Holy Roman
Empire, under an emperor of the house of Hapsburg,
threatened to regain a more arrogant control, a vaster
domain, a more solitary domination, than it had pos
under the first Caesars or had claimed under the
first Constantine. But Charles V, the most powerful
emperor since Charlemagne, was the last of emperors
rowned in Italy. He was frustrated of the dreams
which had been nursed for him by both his grandfathers,
and that had been eagerly cherished by himself throughou
which had been eagerly cherished by himself throughou
outward wealth and splendor, but inward want and woe;
ished and wasted, his enormous resources consumed,
and his authority paralysed by discords in his numerous
scattered kingdoms and principalities, and by the divi
ions and civil wars produced by the Protestant Re
form, and favoring its extension. Worn out and baf
fed, he renounced his throne in despair. He retired—
shattered in health, in spirit, and in confidence, to frir
away the last months of a grand existence—amid the
lovely scenery around the monastery of Juste. These
ward the empire continued to wane and shrivel up, to
finally extinguished by the conquests and confeder
ations of the emperor Napoleon.

An institution of such long duration, of such splendid
pretensions, of such intimate association with the eccles
iastical system of Christendom, of such profound influ
ence upon both the temporal and the spiritual fortunes of
humanity—an institution which transmitted the con
summate result of all ancient civilization almost to our
own days—could not be so easily extinguished himse
and the more urgently because its name has already ceased
to be familiar, and because its fortunes and vicissitudes
are often slighted as the vanished "phantoms of forgot
en rule."

I. Origin of the Name. The name of The Holy Ro
man Empire cannot be distinctly traced in either its
origin or its application. It is obscurely involved in
the institution in the empire throughout all the phases
of its existence. It may readily be discerned in pagan
Rome. It is implied in the constitution of the reanimat
ed Empire of the West. In more modern times it fre
quently appears in treaties and imperial documents, in
diplomatic correspondence, and in the proceedings of
imperial chancery. But it was never of obligatory or
habitual employment. It does not occur in the Act of
Abdication of Francis I in 1806, nor in the earlier Prag
matic, which paved the way for the abdication and pre
scribed his official titles as emperor elect. It has not
been found in any of the numerous chronicles, specially
examined for the present inquiry, which preserve con
versations from Charlemagne to Rodolph of Hapsburg.
It has not been detected by us in the capitategories and
tica, nor in the Libri Feudorum. There is nothing on
the subject in Pfeiffel's Abrégé Chronologique, not
withstanding the well-merited commendations bestow
ed by him. The chancery books of the Holy Roman
Empire, under the circumstances of its ordinary employment, if there ever was any
fixed rule on the subject. The city of Rome and the
imperium Romanum were always regarded as sacrosanct,
even under the republic. The argumentation of August
ine, in his memorable treatise De Civitate Dei, revolves
mainly upon the pagan allegation of the intimate de
pendence of Rome on the guidance of her gods. Under
the empire, the city was fervently adored as diva Roma,
urbs divina, and the sacred fire was kept ever burning
in her honor. Such a perpetual fire was maintained in
the imperial palace. Julius Cesar was Pontiff Maxi
mus, holding the holiest of offices at the time of his as
sasination, and had been chief of the religion many
years previously. On his murder, he was deified, and
became Deius Julianus. On the death of Lepidus, Augus
 tus united the office of Pontiff Maximus to his other
titles. He, too, was deified. Subsequent emperors re
tained the pontificate, and many were worshipped as
Dei while still alive. The pontificate was held even
by Christian pontiffs: such as the emi the "sacred" was ap
plied in both the Latin and the Greek vocabulary of
the court to their persons, their families, their functions,
their ministers, and all their surroundings. This prac
tice was not weakened by the establishment of Chris
tianity as the religion of the state. Comes sacri cubi
culi, sacri ieiunii, sacri laudantium, sacri magnifi
cationis, etc., were regular offices under the constitu
tion of Constantine. We find even "the sacred in
kstand and "the sacred ink." It should be remembered, too, that
the "tribunicia potestas," which was one of the principal
constituents of imperial authority, had always been "sa
crosanct" (Liv. IV, iii, 6, et Not. Var. ad xxvii, xxviii,
ed, Drakenbirk). The organization and ceremonial
of the old Roman empire were habitually adopted or
travelled by the barbarian kingdoms (see Cassiodor.
Eqpp. Var.) before they were repelled by the Western
emperors. In the attestation of the Acta de Pace Con
stantine, 1183, of Frederick Bararossa, the notary sig
ns as sacri praebentissimus, i.e., the bishop himself, "Ego
sacris praebentissimus," which was more urgently be
cause its name has already ceased
to be familiar, and because its fortunes and vicissitudes
are often slighted as the vanished "phantoms of forgot
en rule."

are often slighted as the vanished "phantoms of forgot
en rule."

When Charlemagne received the imperial crown at
Rome on Christmas-day, 800, he received it with all the
attributes of the imperial sovereignty of Rome. The
sanctity of the office, derived from the several confluent
tendencies which have been specified, was not the least
marked of these attributes. This sanctity was further
heightened by special circumstances attached to his
appointment, and by the relations of himself and his
family to the orthodox Christianity of the West. One
of his highest duties and honors was to be the "advo
catus ecclesiae," the protector of the pope against domes
tic and foreign enemies—the temporal sovereign of the
Christian faith on the continent of
omitted. It is stated by a late chronicler that he was
hailed, in the acclamations of the people, as "a Deo
coro nato." So Justinian had declared: "Deo au torre nostrum
imperantium imperator" (De Concept. Dig. § 1). When
Oto I was crowned in 963, the pope conveyed the dig
nity "beneficentiae et consecratio." It is a mistake to
suppose that with the decay of the Holy Roman Empire,
it took merely a title of higher dignity. It is an equal mistake to suppose that he only revived or re
newed the long-dormant Empire of the West. He was
crowned sole emperor of the Roman world at the time of a supposed vacancy of the imperial throne, which had always been deemed elective, and of exclusively masculine lineage: "Quia mulier exceperat imperatore Constantino filio suo imperabat" (Sigegethemblisensas, ad ann.; comp. Palgrave, English Commonwealth, p. 489-493, who long preceded Fustel de Coulanges [Rev. des Deux Mondes, Jan. 1, 1870]).

The expediency, the propriety, or the necessity of the transfer of the empire from the East to the West, though in three years restricted to the revival of the Western Empire, sufficed for the resurrection of the latter empire and for the distinct constitution of the Christendom (Christi dominium) of Western Europe. The epithet of "holy" does not seem to have been attached formally to either empire at this time, though probably in use. The title of the emperor, in the West as in the East, continued to be "Imperator Romanus, semper Augustus." But the idea of sanctity under the setting, as under the rising, sun seems to have been ever present to the minds of men. Hence the designation "Imperator sanctus" is found in the Edict of Verona, Gal. 28, 967, of Otho I, Imper. and his son Otho II, Rex (Perva, Mon. Hist. Germ., iv, 83). It was not until after the thorough feudalization of the empire under the Germanic successors of the Carthaginians, and the bitter conflicts and inveterate rivalries of emperors and popes, that the sanctity of the empire needed to be promulgated as the counterpart and counterpart to the sanctity of the papal throne. But pagan and Christian, Eastern and Western, habits and associations had combined to invest emperor and empire with an air of recognised holiness. These influences and tendencies were preserved and augmented by the circumstances attending the Charlemagne's coronation, and were increased by the ideal character which the empire subsequently assumed.

II. Theory of the Holy Roman Empire.—There would be manifest improbity in entering here into the consideration of the constitution or the history of the second Western empire. But the theory of the empire, its great tenet with the papacy, and the grave consequences thence resulting to the ecclesiastical and religious fortunes of Europe are apposite, and even indispensable, to the present Cyclopedia. The notices, however, must inevitably be both brief and jejune.

The significance of great historical events and institutions is not very great for itself till they are or do decline. It must be gathered by retrospection from the consequences—not expected from contemporaneous appreciation. Charlemagne was constituted emperor by the implied election of the Roman people, and by the consecration of the pope, as the ruler of the Christian world; as the official defender of the Church; as the upholder of orthodox Christianity against heresy and schism; as the champion of the faith and of the faithful against the infidel and the barbarian; as the patron, protector, and guardian of missionary enterprise for the conversion of the heathen. In this character he was not merely the first among temporal princes, but supreme. He was clothed in the character in order to act as the carnal instrument of the spiritual and ecclesiastical authority. He was chief of Christendom to preserve the Christian society from intestine disorders and external perils. He was head of the temporal order, but with distinct spiritual attributes. The pope was head of the spiritual order, but with some temporal jurisdiction, by the grant of Pepin and the confirmation of Charlemagne. Each, in his sphere, was the viceregent of Heaven for the government and guidance of the world. This is very cogently presented by Bryce: "Thus does the emperor answer in every point to his antitype, the pope, his power being, in the rank, created by the papal, as the papal itself had been modelled after the empire. The parallel holds good even in its details; for just as we have seen the churchman assuming the crown and robes of the secular prince, so now did he arrogate to himself in his own ecclesiastical vestments—the stole and the crosier—the sign and symbol of a sacred character; removed his office from all narrow associations of birth and country; inaugurated him by rites, every one of which was meant to symbolize and enjoin duties in their essence religious" (The Holy Roman Empire, vii, 106-116).

It must, indeed, have been very evident, or must have been felt instinctually by one of an instinct more profound than evidence, that the preservation of civilization; the protection of society against Saracen, Saxon, etc.; the perpetuation of Christian faith; the maintenance of religious order; and civil discipline, of morality and culture among the nations; unity in the brotherhood of faith; of civil unity within the Christian realm—required above all the still rampant paganism and the internal and external dangers of the time, that there should be consolidation of Christian government; that there should also be union between the temporal and spiritual authorities and that agreement and harmony should prevail between the two orders of rule. This was exemplified by the coronation of the emperor in Rome by the pope, by the assent of the emperor to the election of the pope. It is equally evident that these two powers—each in some sort supreme, yet each, also, in some sort subordinate to the other—would decline into jealousies and discord and furious antagonisms when the great danger which their combined united strength had repelled was removed, and when causes of difference, which were sure to arise, should eventually arise.

The splendid dreams of humanity are visions of the night which are dissipated by the realities of the day. It was a magnificent, but never realized, conception that as the first great "one, Lord, one baptism," there should be a single Christendom, with one administrator of spiritual interests and one governor of temporal society, that all nations might be one realm of Christianity and all Christians might be secured by the combined might of all, under the guidance and disposition of one secular control. It was a brilliant dream; it has left but the cloud behind. It may afford a hope or a promise of accomplishment in very dissimilar form in future centuries. For brief periods there was a remote approximation to its achievement. For long periods it was frustrated and often, perhaps, forgotten ("breves et infamios populi Romani amores"). The great dream passed away as Rome passed away as Rome passed as Rome passed away. "Holy Roman Church."—The Holy Roman Empire lasted for more than a thousand years. Its emergence and its relations to the papacy changed variously and greatly during this long lapse of time. Pfeffel, who is occupied with the history of Germany rather than with that of the empire, divides the former into nine periods beginning with Sigevus A.D. 900, and ending with the extinction of the male line of Hapsburg in 1740. Six of these periods must be left unnoticed for various reasons, which there is not room to state. The fourth, or Carthaginian, period has, indeed, been considered more fully than any other. It would be unjust. The great struggle began with a religious antithesis, continued in the fifth, sixth, and seventh periods, under the Saxons, Franks, and Swabian houses (962-1254); and from this struggle issued the religious and political complications of modern Europe and of the modern world. To these periods, then, attention will have to be confined, and to them it can be better immediately directed.

When Otho I was crowned at Rome in 962, he was in a position which permitted, and almost necessitated, the revival of the imperial pretensions, which had long been dormant, while that supreme dignity was squabbled over by Burgundian or other princes. There was occasion for the coercion of a strong hand, external to the empire and the empire. After quarters of a century the papacy had been the object of a faction, and had been held by the nobles, tools, or slaves of turbulent nobles and depraved women. It was
the age of Alberic and Marozia, and of that late fiction
papal Joanna. The interposition of some foreign control
was imperatively required. The treachery of John Vicius
caused the tumults by which Ortho of this right
to regulate papal elections, and the imposition of an oath
upon the cardinals and the Roman people to admit the
imperial supremacy.

This was manifestly a usurpation by the secular authority, but the state of affairs demand-
ed it. Naturally, as good order increased in the Church
and the sense of spiritual duties and responsibilities re-
vivified, civil and temporal order was uncheck'd; the
whole Church had been with patient effort brought into subjection to a
higher law than force; the work of centuries would
have been undone by the subjugation of the spiritual
authority which alone enforced moral restraints. Should
Church dignitaries be released from all subordination
to the State and depend solely upon the head of the
Church? Then would ensue chronic discord between
the supreme regulators of society; utter impotence
of the secular authority for the protection of the nations
or for the maintenance of order; the most unrestrained
license in the high places of the Church; neglect of
Christian sentiment, precepts, duties; luxury, sensuali-
sities, after tyranny over thought and feeling on the part of the ruling caste; and with the
abject servility of superstition and ignorance on the
part of the laity, who would be lewd in every sense of
the word. The question, in its ultimate tendency, was
whether Christendom should be subjected to the tyrant-
y of the sword or to the tyranny of the Church, and
the choice was the dilemma. Its character is illustrated by
the whole history of Europe from the 9th century to the
15th. See INVESTITURE.

The war between the two supreme powers was inevi-
table; it was even necessary. The question could not
be settled without war; it could not be settled by
war; but the bitter and long-continued contention prevented
either power from becoming absolute, and finally paralysis
both. The conflict about investitures broke out afresh,
as has been said, but soon changed its form. Under
the German emperors it was complicated with the
resistance of the Lombard League to the empire;
still later, with the efforts of the popes to exclude
the imperial supremacy from Italy, or, at least, to restrict it
to the valley of the Po. Hence sprang the savage strife of
Guelfs and Ghibellines, which extended its pernicious
influence beyond the period of the Renaissance.
But the second act of the great drama ended with the
Council of Lyons in 1245, and with the death of
Frederick II in 1250, and the passing of the power of
re sistless dominion, the empire crushed, shattered,
mingled; introducing, at the same time, chronic wars
into Italy, and anarchy and divisions into Germany,
from which that great country has not yet recovered.
Into the instructive details of these mighty and ominous
transactions there is no time to enter. A few words on
the effects of the struggle must terminate these
summary and inadequate remarks.

IV. Consequences of the Strife between the Church and
the Empire.—The disastrous issues of this unseemly con-
tention were immediate, continuous, and progressive.
None but the most prominent can be specified now, and
the outcome of these wars must be noted without being discussed. The
formidably duel was ruinous to both combatants. It weakened
fatally both the papacy and the empire; but it prevented
the permanent predominance of either. It frustrated
any harmonious agreement for the joint direction of the
growing Christian community. It precluded the estab-
lishment of what was called temporal restraint over the spir-
Itual and the temporal authority. The imperial
superiority over the nations ceased to be anything more than a hollow pretense. The imperial control even
over the Germanic principalities and municipalities was
almost annihilated. There was neither unity nor union.
The capacity of the empire to shield Christendom from
attack was sacrificed. The proof of this was given by
the great Mongol invasion, by the Ottoman conquest of

Latin Christianity; Greenwood, Cathedra Petri; Bryce The Holy Roman Empire (4th ed., Lond., 1879); Waiz Deutscher Kaiser von Karl dem Grossen, etc.; Döllinger Das Kaiserthum Karls des Grossen, etc.; Hoffer Kaiserthum und Papstthum; Möser, Römische Kaiser (G. F. H.)

Roman Manners. The custom of building church edifices in the form of a basilica, which was abolished by the Bishop abbott of Worms, went to France to engage ma sons. It was about the same time called the Gothic mode.

Romanelli, Giovanni Francesco, a convert from Romanism, was born at Viterbo in 1617. His first master was Domenichino, but his style was chiefly gained from Pietro di Cortona, under whom he afterwards studied. Later he adopted a manner more his own and less imposing, but more soft and gentle. It is in this style that his best works are executed as The Descent from the Cross in St. Ambrose's at Rome. Romanelli was employed by cardinal Barberini in the decoration of his palace, and also by Mazarin. He died in 1668. His works are very numerous in Rome, and are all on religious or mythological sub jects.

Romanes, Francis, a convert from Romanism, was a native of Spain, but afterwards became a resident of Bremen, where he transacted business for Antwerp mer chants. When convinced of the errors of papacy, he re signed his agency, informed his employers of the change he had made, resigned himself, and devoted himself to the practice of religion. While in Spain laboring for the conversion of his parents, he was informed against by his former employers, arrested, and after imprisonment was burned. In this torture, as long as he was able to speak, he con tinued to repeat the 7th Psalm. See Fox, Book of Mar tyr.

Romanes (Romonch, or Upper and Lower Rhining) Version of the Scriptures. This version is used in the Grisons, a part of Switzerland, and constituting the south-eastern angle of Switzerland. The mountains parts of this canton are inhabited by the little Romane nation. The Engadine, or valley of the Inn, on the borders of the Tyrol, is inhabited by a section of this people, to whom a Romanes dialect called Churwelsche is the vernacular. The other Romanes dialect is called Ladinische, and is spoken in the valley of the Rhine, on the confines of Italy. Both these dialects being derived from the Latin tongue, they preserve to this day the most striking characteristics of the Romance languages. The New Testament was printed in 1580 in these dialects in the translation of Jacob Biffrun, and the whole Bible in 1679, prepared by Jac. Ant. Vulpio and others. In the latter, the Bible was published in 1718 under the title La S. Biblia que et: Tut la Soinchca Scaritra, sur nots iui Ciechca d'iig Veder a Nief Testamentum, cum dui Ciechca Apocrypha Messe eui Lyngua Lromonchca de la Lenga Grischua Trax Aeschina surrants d'iig Plaidz Daus d'iui venerando Colloquis sua-a int il Guacuil, cum Privi legio (illustrissimorum D. R. Rostorum. Asquitschada en Coira tras Andrea Pfeffer, stampadur, En ilg On da Christi MDCCX VIII, fol Coire, 1718). These editions, including an earlier one, by J. Grittli, of 1640, were all printed in the Grisons: but they were soon exhausted, and at the beginning of the present century a copy was scarcely attainable. A company of Christians at Basle, therefore, projected an edition for the use of these mountaineers, and under the auspices of the Basle Bible Society, the New Testament in Churwelsche left the press in 1810. But when the poor Ladins heard what a treasure their neighbors on the Tyrolean frontier had got, they expressed a very strong desire to have the same in their dialect. The Bible societies of London and Basle promptly consented to grant them this boon, and in 1812 an edition of two thousand copies of the New

Romanesque Art. Some writers apply the term "Romanesque" to the period of Christian art in Italy and Western Europe which extended from the 3rd to the 10th century; but it is more usually applied to the period extending from the 9th to the 12th or 13th century. Until the 9th century Christian art, especially architecture, had flowed in two main streams, which in locality and in characteristics were quite distinct from each other. The one is usually called the "Classical" style (see BASILICA), which had its origin in Rome; the other is called the "Byzantine" style, which had its origin in Constantinople. See Architecture.

In the very active period of church erection which existed in Central and Western Europe from the 9th to the 12th century, the classical and Byzantine styles were in a sense forced into a new style, which took on certain characteristics of these former styles, but which had many very marked original features. The general ground-plan of the later basilicas, that of the Latin cross, was retained. For the convenience of the officiating clergy, a semi-circular apsis, or choir, was placed at the farther end of the main nave and at the end of each arm of the transept. From this general typical ground-plan there were many variations, which were chiefly caused by the disconnected times and plans by which the different parts of the edifices were erected.

The round arch is a distinctive feature of Romanesque style, which is termed, indeed, by many writers the Round-Arch style, in distinction from its successor the Pointed-Arch, or Gothic style. See Gothic Architecture. The round arch was inherited from both the classical and the Byzantine style. During the latter part of the Romanesque period, the pointed arch began to be used in parts of the openings, and, indeed, in a few cases was almost entirely adopted; but the other features of these edifices mark them as distinctively Romanesque. The method of covering enclosed spaces by vaulting differed greatly from that in the preceding styles, and forms one of the most prominent features in this style.

During the early Romanesque period, especially in Italy, the campanile, or bell-tower, was built separate from the church, as in the leaning tower of Pisa; but later it was attached to the church edifice. Indeed, the single tower was expanded into a system of towers surrounding the church, producing a rather unbalanced effect on the entire structure. The towers were in many cases flanked by small turrets, which produced beautiful and picturesque effects. In many cases a lofty tower with turrets rose over the intersection of the transept and the nave. In the Cathedral of Bamberg four lofty towers rose, two on each side of the nave.

One of the most attractive features of the Romanesque architecture is the introduction of delicately formed arcades in various places on the exterior, where they produce pleasing effects, as under the cornices of the choirs, or apses, or on the main façade. These arcades sometimes rise, like steps, up along the lines of the roof. Sometimes they were placed in successive tiers up the entire height of the façade, or even up the entire height of the campanile, as in the cathedrals of Lucca and Pisa.

The portals of churches were often flanked by greatly variegated and deeply set clusters of columns. These were surmounted by capitals, and the same or similar clustered lines were carried in an arch over the doorway. In a few cases the inner lines over the doorway were thrown in round arches, while the arches gradually changed to pointed ones. These clustered arches were, in the Gothic style, replaced by rows of angels. The courts of clusters were frequently surrounded by arcades of exquisite beauty, the columns usually being double, no two being alike, and more frequently one column being twisted. Clustered columns were also introduced in the interiors of churches. Indeed, the entire Romanesque architecture is marked by rather too exuberant fancy, variety being considered necessary or desirable, even when more harmony could be secured by less varied types of decoration.

The capitals of pillars were manifestly modelled upon the type of the late Roman-Corinthian or the Composite capital; but independence of motive was so manifestly introduced, and great variety was introduced in the capitals, which were generally managed in excellent harmony with the lines of the new style. Many new plant forms were conventionalized, and the foundation was laid for the subsequent luxuriant Gothic foliage. Animal forms, both realistic and imaginary, were frequently introduced in the midst of plant forms or alone, in the capitals of pillars and elsewhere. These not unfrequently represented eagles and other hideous beasts,
which were to frighten hypocrites and the wicked from entering the house of God, the precursors of the gar-
goyles of the Gothic. Not unfrequently the chief col-
umns of portals rested on the backs of lions or mas-
sive dogs, typifying the strength and defences of the
Church.

In truth and consistency of architectural char-
acteristics, the Romanic style, in its best examples, takes very
high rank among the historic styles. It is the only one
of the great styles in history which did not pass into
decadence through the perversion of architectural fea-
tures or principles. It was cut off in the height of its
career by its successor the Gothic — the pointed dis-
placing the round arch, with all its later new type of
doors and windows. Some examples of the Romanic style
are: in Italy, the cathedrals of Pisa, Luca, Par-
ma, Verceil; in France, those of Avignon, Toulouse,
Bayeux, Clermont, Périgueux, St.-Etienne, and other
churches in Caen; in Germany, those of Worms, Bonn,
Speyer, Treves, Hildesheim, and Bamberg; in Eng-
land, those of Peterborough, Waltham, and Winchester.
Many of the finest effects in this style are found in de-
tached fragments, which were made in churches that
were not finished until this style had been superseded
by the Gothic.

During the Romanesque period there was some activ-
ity in sculpture. The chief works in this branch of art
were in France. Many of these are extremely interest-
ing from the fact that they show an earnest spirit,
though with much naivety and almost crudeness of
execution. In painting, the chief works were in mini-
ature, in the decoration of missals, and other MS. books
devotion. In France, more especially, many impor-
tant compositions were executed in fresco, after the
style current in the Orient, and probably done by Byz-
der Baukunst*; id. *Gesch. der Malerei*; Scharnait, *Gesch.
der Künste*; Fergusson, *Hist. of Architecture*; Rosen-

**Romanic Versions of the Holy Scriptures.**

Under this head we mention—

1. The French Versions. — As these versions have al-
ready been treated in this *Cyclopedia* v. FRENCH
Versions, we add the following as supplement. Ar-
thur Dinaux has the merit of having pointed towards
the first translator of the Bible, Le Plano de Vals, who,
circa 1100. He was a priest and canon, and his version, free as it is for the greater part, was of the greatest
importance for that time. He undertook it under the protection of the empress Mathilde, wife of
the German emperor Henry V, and daughter of Henry
I of England. His *Génesis* is preserved in the Har-
leian MS. 1922, and his *Livre de la Bible, ou Histoire
de l'Ancien et du Nouveau Testament en Vers* in the
Imperial Library, MS. 7986. The assertion made
by A. Paulin Paris, in his *Manuscris Français de la
Biblie du Roi*, that before the year 1170 no trans-
lation of any note had been made, and that Étienne de
Hauteville, or d'Ansa, of Lyons, was the first who undertook
a work of this kind, has been proved erroneous by
Arthur Dinaux; yet Paulin refers to Le Long and
to a letter written by pope Innocent III to the bish-
op of Metz, published by Baluze, and translated into
French by Le Roux de Lincy in his *Introduction to the
Ancienne Traduction des Quatre Livres de Ro* (Paris,
1842) or by Hermann de Valdo. This work must be re-
garded as the first translator, the merit of Étienne de
Hauteville, who undertook a translation at the request of
Peter Valdo, are not diminished thereby in the least.
Étienne's translation, preserved in MS. 7268,5.3, and
belonging to the first half of the 13th century, is a work
of great value containing the language of the letter.
A. Paulin Paris saw many copies of that MS, which
in part must be regarded as a revision. A version of
this kind belongs to the beginning of the 14th century,
and to judge from its style, it must have been made
in England. This version we find in MS. 6701, and the
following specimen will best illustrate the difference
between the translation of 1170 (7268.4.5) and the version
from the beginning of the 14th century (6701):

**MS. 7268.5.3.**

*Mes le serpens estezil li plus
voleus de toutes les choses
qui est li in terre, de se
Dex azorvett. Et il dit à la
feme: Porquoi vous a Dex
commandé que vous ne meu-
gies pas de touts les fus de
paradis* (Gen. iii. 1).

With regard to the translation of 1170, we only mention
that Innocent III, not knowing its source, subjected it
about the year 1200 to the censor, and many writers of
the 14th century speak of it as a pernicious book.
Its language bears the original Romanic stamp, and re-
"moninds one of the modern French. But it is striking
that the translator, Étienne de Hansa, should be from
Lyons. We may suppose that the northern French
version of the translation of 1170, as we find it in the
MS. 7290 de la Bibliothèque, is the greater part belongs to the copyist.
A. Paulin Paris conjectures that the language of the
MS. is the same as that which was used at Rheims or Sen-
Sens in the 13th century. The translation of 1170 is known
as that of the "Bible des Pauvres." Le Roux de Lincy
pronounces the translation of the MS. 7268.5.3 an ex-
cellent one, although he believes it to have been made
in the 14th century at the request of Louis the Saint.
Étienne de Hansa's work is the more remarkable as it
may be called with certainty the first which gives a cor-
rect and literal translation of the whole Bible. The MS.
6818 contains a second literal translation, the author of
which, according to the investigations of scholars, es-
npecially of Alme Tampilion, is said to have been
Raoul de Preeles. Le Roux de Lincy acquaints us also
with translations of single parts of the Bible, the re-
duction of which he puts in the 12th century, while
the MSS. belong to the 13th century. As such he mentions:

1. *Les Quatre Livres du Roi*; a MS. of which is in
the Bibliothèque Mazarin.
2. *Les Psautiers*; MS. 1192 bis Supplement Français, 278
Latin, 7871 fonda François.
4. *Les Ecrits de Jacob*; a MS. with a French translation
of single psalms is given by
Karl Bartsch in his *Chrtenomathie de l'Ancien Fran-
sais* (1872), according to Fr. Michel's *Libri Psalmorum
Vers Antiqua Gotlica*.

The catalogue of A. Paulin Paris, *Manuscrits Français
de la Biblie du Roi*, contains also the following list of
translations and comments:

Moraux*; MS. 7290.3.2.
2. *Traduction en Vers de la Bible*; MS. 7268.3.3.
3. *Histoire de l'Ancien Testament*; MS. 7268.4.3.
4. *Traduction en Vers du Psautier Latin* "Domine, ne
in favore."
5. *Traduction des Psautiers*; MS. 7268.5.3.
6. *Commentaire sur les Psautiers, trad. d'un Ancien Texte
Latin*; MS. 7290.3.
7. *Récit de la Composition de Chacun des Psautiers*; par
A. Paulin Paris, MS. 7080.3.3.
8. *Commentaire Perpétuel sur les Psautiers*; MS. 7290.6.4.

According to Gréssé, two Augustinian monks, Julien Ma-
cho and Pierre Farget, translated a Latin Bible into the
Romanic language. The version of the Bible belonging to
the 14th century, was left by Mae of Chartres-sur-Loire,
and in MS. 6818 an original copy of the Bible des Pau-
vres is preserved.

We give on the following page some specimens of
different translations. The MSS. 7268.5.3 and 6818 are
copies of one text, which differ only in some essen-
tial points. The MS. 6818 forms the basis of a separate
version. In this supplementary article we have largely
depended on Strippelm's *Ersten Bibelübersetzungen
der Franzosen* (Brunswick, 1872), who also gives the fol-
lowing specimens; for the rest belonging to the French
versions we refer to the art. in loco.

* Dame Dez means "Lord God." Dame is from the Latin
dominus; and Dez (deus) is the ancient form for Dieu.*
In conclusion, we will only mention, from the seventy-third annual report of the British and Foreign Bible Society (1877), that “several new versions of the Scriptures in French have been urged on the committee, but they did not see their way to the adoption of any of them; they hope, however, that the present activity in Bible translating and revision may lead to the production of a version more accurate, and more acceptable to the French than any which they now possess.”

3. Fortunate Versions (q.v.)

4. Spanish Versions.—It is very difficult to decide at what time the first Spanish version was made. If we may believe tradition, the oldest version would belong to the 15th century, made at the request of Alphonso of Castile and John of Leon. But as there is no confirmation of this statement, we must depend on the different data which we find in the printed editions themselves; and it is a remarkable fact that the versions were made either by Jews or Protestants.

(a) First in chronological order we mention El Nuevo Testamento de nuestro Redemptor y Salvador Jesu Christo, traduzido de Greco en lengua Castellana por Francisco de Enzinas, dedicated a la Cesarea Magdalen (in Antwerp [i.e. Antwerp], Anno 1543, 8vo). Of this edition, which is also published by the British and Foreign Bible Society, we have no notice except what we find in Simon’s Nouvelles Observations sur le Texte et les Versions du Nouveau Testament, ii, 151, where we are told that, in the dedication, different reasons are given for and against the usefulness of translations of the Bible. “I do not,” says the translator, “condemn those who are of another opinion, but I believe such versions, when made by judicious and conscientious men, to be useful.” He then speaks of the cause for this translation. Gamaliel, he says, pronounced that if Christianity be of God, men cannot overthrow it; but if it be of men, it will soon come to naught; and addressing the emperor Charles V, he says, “The controversy about the translations of the Bible has already lasted for about twenty years. All measures to prevent them are in vain; on the contrary, their number has increased among the Christians, and Gamaliel’s judgment seems to be fulfilled.”

The versions of Enzinas is made from the Greek. Such words as “gospel,” “scribe,” “testament,” etc. are retained. For the greater part he follows Erasmus’s translation, e.g. John i, 1: En el principio era la palabra, y la palabra estaba con Dios, y Dios era la palabra. Where a word is ambiguous he puts the Greek in the margin; thus he puts the word λόγος three times to palabra. Very seldom he has an addition, and yet his translation is intelligible even to the unlearned. Sometimes, in spite of all care, he translates rather according to the sense than to the word of the text; e.g. Rom. i, 28, παράδεικνυς ανθρώπος ὑπὸ Θεοῦ, Vulg. traditit illius Dei; the translation of παραδείκνυς is “permítito caer,” i.e. he suffered them to fall.
(b) Next in chronologal order is Biblia en Lengua Es- pañola, traduzida palabra por palabra de la verdad He- brazgo, por muy excelentes Letrados. Vistayexaminadapor el oficio de la Inquisicion. Con Privilegio del Illus- trissimo Senor Duque de Ferrara (En Ferrara, 5313 [i.e. 1553]). At the end we read, "A gloria y lor de nuestro Senor se acabo la presente Biblia en lengua Espanyola traducida palabra por palabra de la verdad ebraica, por muy excelentes letrados: con yndustria y diligencia de Abraham Usque, Portugues: Estampata en Ferrara à costa y despesa de Yom Tob Atias, hijo de Levi Atias Español; en 14, de Aadar de 5313." In some copies we read at the end, "Con yndustria y diligencia de Duarte Pinel, Portu- gues: Estampata en Ferrara à costa y despesa de Yom- ren y Vargas, Espanol, en primer de Marzo de 1553." These copies were made for the use of Chris- tians. That the Spanish translation of the Pentateuch is the same as that printed six years before in the so- called "Constantinople Polyglot-Pentateuch" has been proved beyond a shadow of doubt by Le Long, who also supposes that the Spanish translation, of which the Pen- tateuch only was printed at Constantinople, while the whole was published at Ferrara, had been in use before the expulsion of the Jews from Spain in 1492, and that the Jewish exiles brought it to Constantinople. The ti- tle is followed by (1) an index of Haphtaroth; (2) an in- dex of persons among the Jews and Christians; (3) an index and short synopsis of the chapters of the Old Test.; (4) an index of the judges, prophets, and high- priests of the Jewish people, together with a short chro- nology from Adam to the 452d year after the destruction of the Temple according to the Seder Olam (a Jewish chronology); (5) a lectionary for each day, in order to read the Old Test. in one year. The translation in the Ferrara edition is in two columns, and the editors or pub- lishers were so conscientious as to indicate passages con- cerning which they were doubtful as to the correct trans- lation by a star (*). Where the Hebrew reads Jehovah, an A. with two dots is placed. The verses are not given in the text, but at the end of each book their number is given. The order of the book is, the Pentateuch, Joshua, Judges, Samuel, Kings, Isaiah, Jeremiah, Ezekiel, Hosea to Malachi, Psalms (divided into five books), Proverbs, Job, Daniel, Ezra, Nehemiah, Chronicles, Song of Songs, Ruth, Lamentations, Ecclesiastes, Esther. The translation, which follows the Hebrew very closely, is in that ancient Spanish which was used at that time in the synagogue.

ROMANISM

(k) Biblia en dos Colunas Hebr., y Españ. Amster-
dam, en casa y á costa de Joseph Jacob, y Abraham de
Salmon Poeps (Anno 1702, fol.). This is, according to
Le Long, an important edition; but the paper is of a
very inferior quality. It was not until the end of the 18th century that a
Roman Catholic diocese undertook to give his Spanish
countrymen a new translation, together with the Latin
and a commentary. The author of this Bible-work
[which was published at Madrid, 1794, in 19 parts] was
Philo Socio de S. Miguel. The translation of Socio has
also been adopted by the British and Foreign Bible
Society, which prints it since 1828. The latest transla-
tion of the New Testament is that by the bishop of Astorga,
Fel. de Torres Amat (Madrid, 1837).

5. Besides these translations, we may also mention,
under the head of Romanic versions, the New Testament,
the Pentateuch, and the Psalms. In 1568, a year later,
he was deputed to the Council of Trent, in 1569 to
France for further instruction in divinity and the English
language, and returned in 1564 as a missionary to Bres-
lau. In 1688 he was removed to Berlin to take charge
of the mission there by the side of Prof. Dr. Cassel.
For three years he was allowed to carry on work on
the oration of his Master in that city, and died Aug. 18, 1687.

De Scriptor. Soc. J e u., p. 225 sq.; R. Simon, Bibl. Se-
lecta, i, 148; Grätz, Gesch. d. Juden, i x, 556.

Romano, Giovanni Battista, a convert from
Judaism, was a native of Alexandria, and flourished in the
16th century. His grandfather was the famous
Elias Levita (q. v.), who instructed him while in
Germany. He then went to Italy, and in Venice he tried to
bring his brother into the fold of the syna-
gogue; in which he did not succeed. Then
he became himself a convert to Christianity, and was
baptized in 1551. For a long time he was professor of
Hebrew and Arabic in Rome. In 1561, pope Pius IV
sent him to the patriarch of the Copts, together with
Roderich, a member of his order. He translated Giov.
Bruno's catechism, which was written against the Ori-
ental heretics; but he was permitted by his superiors to
be translated into Arabic the decrees of the Council of Trent,
for the sake of having them circulated in the East.
He died at Rome, March 3, 1580. See Delitzsch, Künz, Wissenschaft u. Judenleben, p. 291 sq.; Phil. Alegame,
De Scriptor. Soc. J e u., p. 225 sq.; R. Simon, Bibl. Se-
lecta, i, 148; Grätz, Gesch. d. Juden, ix, 556.

Romano, Jehuda Leone, born-Moses, of Rome,
was born about 1368. He is known as the king of Robert of Naples, whom he instructed in the lan-
guages of the Bible. He was very well acquainted with scholastic literature, and translated the philo-
osophical writings of Albertus Magnus, Thomas Aquinas, and others for his coreligionists. He also wrote Rhedicitae on passages of the Bible from a philosophical stand-
point, excerpts of which have been published in Im-
manuel of Rome's Commentary on Proverbs (Naples, 1486). The date of Romano's death is not known.
Most of his writings are still in MS. in Rome, Florence, Paris,
Munich, Oxford, and London. See Fürst, Bibl. Jud., iii,
165 sq.; Delitzsch, Kunst, Wissenschaft u. Judenleben,
237; De mirabilibus Scripturarum, i, 282 sq., p. 277 (Germ. transl.); Grätz, Gesch. d. Juden (Leipsi, 1873),
vi, 299 sq.; especially Zunz, Jehuda b. Moses Ro-
mano, reprinted in Geiger's Wissenschaft, Zeitschr., f ü r
Jud. Theologie (Frankfort-on-the-Main, 1886), ii, 321-
330; and Steinachers, Giudic. Romano, Notizia es-
tratta del giorn. Romano II Boomerott, Gennaro, 1870
(Roma, 1870), mentioned in Mayerling's Bibliothek jüd-
discher Künstleiner, ii, Beiilage, p. 14 sq. (B. P.)

Romans, Epistle to. This is naturally placed first among the epistles in the New Test., both on account of its comparative length and its im-
portance. It claims our interest more than the other di-

castic epistles of Paul, because it is more systematic,
and because it explains especially that truth which subsequently became the principle of the Reformation, viz., righteousness through faith. It has, however, been
ROMANS, EPISTLE TO THE

greatly misunderstood in modern times, as it seems to have been very early (2 Pet, iii, 15, 16).

I. Authorship.—Internal evidence is so strongly in favor of the genuineness of the Epistle to the Romans that it has never been seriously questioned. Even the sweeping criticism of Baur did not go beyond condemning the last two chapters as spurious. But while the epistle bears in itself the strongest proofs of its Pauline authorship, the external testimony in its favor is not inconsiderable. The reference to Rom. ii, 4 in 2 Pet. iii, 15 is indeed more than doubtful. In the Epistle of James there is an evident perversion of the language and doctrine which has several points of contact with the Epistle to the Romans; but this may perhaps be explained by the oral rather than the written teaching of the apostle, as the dates seem to require. It is not the practice of the apostolic fathers to cite the New-Test. writers by name, but marked passages from the Romans are found imbedded in the epistles of Clement and Polycarp (Rom. i, 29-32 in Clem. Cor. xxv, and Rom. xiv, 10, 12, in Polyc. Phil. vi). It seems also to have been directly cited by the elder quoted in Ireneaus (iv, 27, 2, "ideo Paulum dixisse, comp. Rom. xiii, 21, 17), and is alluded to by the writer of the disciple of Plutarch (Ep. i, 1; cf. Rom. iii, 21 for v, 20), and by Justin Martyr (Dial. c. 23; comp. Rom. iv, 10, 11, and in other passages). The title of Melito's treatise On the Healing of Faith seems to be an allusion to this epistle (see, however, Gal. iii, 2, 3). It has a place, moreover, in the Muratorian Canon and in the Syrian translation, as well as in some versions of the testimony of orthodox writers alone. The epistle was commonly quoted as an authority by the heretics of the subapostolic age: by the Ophites (Hippol. Adv. Haer., p. 99; comp. Rom. i, 20-26), by Basilides (ibid. p. 238; comp. Rom. viii, 19, 23, and v, 13, 14), by Valentinus (ibid. p. 125; comp. Rom. viii, 11), by the Valentinians Harnack (West., On the Canon, p. 335, 340), and perhaps also by Tertullian (Orat. c. iv; comp. Rom. i, 20), besides being included in Marcion's Canon. In the latter part of the 2d century the epistle in its favor is still fuller. It is obviously alluded to in the letter of the churches of Vienne and Lyons (Euseb. H. E. v, 1; comp. Rom. viii, 18), and by Athenagoras (p. 13; comp. Rom. xii, 1; p. 87; comp. Rom. i, 24) and Theophilus of Antioch (Ad Autol. p. 79; comp. Rom. ii, 6 fol.; p. 126; comp. Rom. xiii, 7, 8); and is quoted frequently and by name by Ireneaus, Tertullian, and Clement of Alexandria (see Kirchhofer, Quellen, p. 12, 13; comp. also Athenagoras, On the Christian Missionary, in narrower limits than that of any other of Paul's epistles. The following considerations determine the time of writing. First. Certain names in the salutations point to Corinth as the place from which the letter was sent. (1) Phoebe, a deaconess of Cenchreae, one of the port towns of Corinth, is commended to the Romans (xvi, 1, 2). (2) Gaius, in whose house Paul was lodged at the time (ver. 23), is probably the person mentioned as one of the chief members of the Corinthian Church in 1 Cor. i, 14, though the name was very common. (3) Erastus, here designated "the treasurer of the city" (οικονομός, ver. 23, A. V. "chamberlain"), is elsewhere mentioned in connection with Corinth (see Acts xix, 22). Secondly, Having thus determined the place of writing to be Corinth, we have no hesitation in fixing upon the visit recorded in Acts xx, 3, during the winter and spring following the apostle's long residence at Ephesus, as the occasion on which the epistle was written. For Paul's stay in Ephesus, after his departure from Corinth, we have the testimony of Carying the contributions of Macedonia and Achaia to Jerusalem (xxv, 25-27), and a comparison with Acts xx, 22; xxiv, 17; and also 1 Cor. xvi, 4; 2 Cor. vii, 1, 2; iv, 1 sq., shows that he was so engaged at this period of his life. (See Paley, Horae Paulinae, ch. ii, § 1.) Moreover, in this epistle he declares his intention of visiting the Romans after he had been at Jerusalem (xxv, 25-26), and that such was his
design at this particular time appears from a casual no-
tice in Acts xix. 21.

The epistle, then, was written from Corinth during
Paul's third missionary journey, on the occasion of the sec-
tion of the two visits recorded in the Acts. On this
occasion he remained three months in Greece (Acts xx.
3). When he left, the sea was already navigable, for
he was on the point of sailing for Jerusalem when he
was obliged to change his plans. On the other hand,
it cannot have been late in the spring, because, after
Paul's third visit to Macedonia, he must have beenprobably either in Macedonia or after his arrival at
Corinth, i.e. after the epistles to the Corinthians, though
the date of the Galatian epistle is not absolutely cer-
tain. See Galatians, Epistle to the. We shall
have to notice the relations existing between these con-
temporary communications and the circumstances,
which appear to have been written within the twelve months preceding. The first Epis-
tle to the Corinthians was written before Paul left Eph-
esus, the Second from Macedonia when he was on his way
from Thessalonica to Corinth, and possibly the third
from Corinth to the Galatians, on his second visit.
The view advanced by those who consider the Epistle to the
Galatians as the first, would be most probable if it were
proposed either in Macedonia or at his arrival at
Corinth, i.e. after the epistles to the Corinthians, though
the date of the Galatian epistle is not absolutely cer-
tain. See Galatians, Epistle to the. We shall
have to notice the relations existing between these con-
temporary communications and the circumstances,
which appear to have been written within the twelve months preceding. The first Epis-
tle to the Corinthians was written before Paul left Eph-
esus, the Second from Macedonia when he was on his way
from Thessalonica to Corinth, and possibly the third
epistle to the Galatians on his second visit. 

The Epistle to the Romans is thus placed in chrono-
logical connection with the epistles to the Galatians and
Corinthians, which appear to have been written
within the twelve months preceding. The First Epis-
tle to the Corinthians was written before Paul left Eph-
esus, the Second from Macedonia when he was on his way
from Thessalonica to Corinth, and possibly the third
epistle to the Galatians on his second visit. 

Paul states in the introduction that he had long enten-
tained the wish of visiting the metropolis, in order to
confirm the Churches which he had planted, but that this
de-fi-delition was thwarted by that fate (i, 12). He adds (ver. 10) that he was pre-
vented from visiting the metropolis by external ob-
tacles which he must have overcame. He says that he had written to the Roman Christians in fulfilment of his vocation as
apostle to the Gentiles. The journey of Phoebe to
Rome seems to have been the occasion of this epistle.
Paul made use of this opportunity by sending the
sum and substance of the Christian doctrine in writ-
ing, having been prevented from visiting in Rome.
Paul had many friends in Rome who communicated with
him: consequently he was the more induced to address
the Romans, although he manifested some hesitation in
directing Phoebe to Rome. (see xvi, 15). These circumstances exercised some influence
as well on the form as on the contents of the
letter; so that, for instance, its contents differ consider-
ably from the Epistle to the Ephesians, although this
also has a general scope.

2. The immediate circumstances under which the epis-
tle was written were these: Paul long proposed visiting Rome, and still retained this purpose, wishing also to extend his journey to Spain (i, 9-13; xvi, 22-29). For the time, however, he was prevented from carrying out his design, as he was bound for Jerusalem with the alms of the Gentile Christians, and meanwhile he ad-
dressed this letter to the Romans, to supply the lack of his personal presence. Phoebe, a deaconess of a des-
cending Church of Cenchrea, was on the point of start-
ing for Rome (xvi, 1-2), and probably conveyed the letter.

The body of the epistle was written at the apostle's dic-
tion by Tertius (ver. 22); but perhaps we may infer from the abruptness of the final doxology that it was
added by the apostle himself, more especially as we
gather from other epistles that it was his practice to
conclude with a few striking words in his own hand-
writing, to vouch for the authorship of the letter, and
frequently also to impress some important truth more
strongly on his readers.

3. The Origin of the Roman Church is involved in
obscure (see Mangel, Die Anfänge der römischen Ge-
mind [Marb. 1866]). If it had been founded by Pe-
ter, according to a later tradition, the absence of any
allusion to him both in this epistle and in the letters
written by Paul from Rome would admit of no expla-
nation. It is equally clear that no other apostle was
the founder. Peter's very important position, in con-
junction with the mention of his proposed visit to Rome,
the apostle declares that it was his rule not to build on
another man's foundation (xv, 20), and we cannot
suppose that he violated it in this instance. Again,
he speaks of the Romans as especially falling to his share
as the apostle of the Gentiles (i, 15), with evident
reference to the partition of the field of labor between
himself and Peter, mentioned in Gal. ii, 7-9.

More-
over, when he declares his wish to impart some spiritual gift (χάρισμα) to them, "that they might be established" (1:11), this implies that they had not yet been visited by an apostle, and that Paul contemplated supplying the defect, as was done by Peter and John in the analogous case of the church founded by Philip in Samaria (Acts xii. 14, 17). See Peter (the Apostle).

The statement in the Clementines (Hom. 1, § 6) that the first tidings of the Gospel reached Rome during the lifetime of our Lord is evidently a fiction for the purposes of the romance. On the other hand, it is clear that the foundation of this Church dates very far back. Paul in this epistle salutes certain believers resident in Rome—Andronicus and Junia (or Juniana?)—adding that they were distinguished among the apostles, and that they attended the Church in Rome (Eph. v. 7), for such seems to be the meaning of the passage, rendered somewhat ambiguous by the position of the relative pronouns. It may be that some of those Romans, "both Jews and proselytes," present on the day of Pentecost (οἱ καταχριστοὶ Ρωμαίοι, Ιουδαῖοι καὶ προσελκύοντες, Acts ii. 10), carried back the earliest tidings of the new doctrine, or the Gospel may have first reached the imperial city through those who were scattered abroad to escape the persecution which followed on the death of Stephen (Acts viii. 4; xi. 19). At all events, a close and constant communication was kept up between the Jewish residents in Rome and their fellow-citizens in Palestine by the means of commerce, in which they became more and more engaged as their national hopes declined, and by the custom of repairing regularly to their sacred festivals at Jerusalem. Again, the imperial edicts alternately banishing and recalling the Jews (comp. e. g. in the case of Claudius (Acts xvi. 8, Act. xxi. 18), Claudius and Priscilla (Acts xvii. 2, 22); see Paley, Hor. Paul. c. ii, § 2) probably represents a numerous class through whose means the opinions and doctrines promulgated in Palestine might reach the metropolis. At first we may suppose that the Gospel was preached there in a confused and imperfect form, scarcely more than a phase of Judaism, as in the case of Apollos at Corinth (Acts xvii. 25), or the disciples at Ephesus (Acts xix. 1-5). As time advanced and better instructed teachers arrived, the clouds would gradually clear away, till the influence of the apostle himself at Rome dispersed the mists of Judaism which still hung about the Roman Church. Long after Christianity had taken up a position of direct antagonism to Judaism in Rome, heathen statesmen and writers still persisted in confounding the one with the other (see Mervine, Hist. of Rome, vi, 275, etc.).

4. A question next arises as to the composition of the Roman Church at the time when Paul wrote. Did the apostle address a Jewish or a Gentile community, or, if the two elements were combined, was one or other predominant so as to give a character to the whole Church? Either extreme has been vigorously maintained, Baun, for instance, asserting that Paul wrote to Jews, Christians, Olshausen arguing that the Roman Church consisted almost solely of Gentiles. We are naturally led to seek the truth in some intermediate position. Jowett finds a solution of the difficulty in the supposition that the members of the Roman Church, though Gentiles, had passed through a phase of Jewish proselytism. This will explain some of the phenomena of the epistle, but not all. It is more probable that Paul addressed a mixed Church of Jews and Gentiles, the latter perhaps being the more numerous.

There are certainly passages which imply the presence of a large number of Jewish Christians. The fact of the second person in addressing the Jews (ch. ii. and iii) is clearly not assumed merely for argumentative purposes, but applies to a portion at least of those into whose hands the letter would fall. The constant appeals to the authority of "the law" may in many cases be accounted for by the Jewish education of the Gentile believers (so Jowett, ii. 29), but sometimes they seem too direct and positive to admit of this explanation (Rom. iii. 19, vii. 11). In ch. vii Paul appears to be addressing Jews, as those who, like himself, had once been under the dominion of the law, but had been delivered from it in Christ (see especially verses 4 and 6). And when in x. 18 he says, "I am speaking to you as to one very near unto me, "the Gentiles" that the letter was addressed to not a few to whom the term would not apply.

Again, if we analyze the list of names in ch. xvi, and assume that this list approximately represents the proportion of Jew and Gentile in the Roman Church (and this is a safe assumption), we get the same result. It is true that Mary, or rather Mariam (xvi. 6), is the only strictly Jewish name. But this fact is not worth the stress apparently laid on it by Mr. Jowett (ii. 27); for Aquila and Priscilla (ver. 3) were Jews (Acts xviii. 2, 26), and the Church which met in their house was probably of the same nation. Andronicus and Junia (or Juniana?) called Paul's kinsmen. The same term is applied to Herodion (ver. 11). These persons, then, must have been Jews, whether "kinsmen" is taken in the wider or the more restricted sense. The name Apelles (ver. 10), though a heathen name also, was most commonly borne by Jews, as appear from the frequent appellation of the person whom mention of the name of ver. 10 was one of the princes of the Herodian house, as seems probable, we have also in the "household of Aristobulus" several Jewish converts. Altogether it appears that a very large fraction of the Christian believers mentioned in these salutations were Jews, even supporting the others, or, as the heathen expression, echoes the famous expression of Horace (Ep. ii, 1, 156) respecting the Greeks—"Vici victoribus leges dedente" (Seneca, in Augustine, De Civ. Dei, vii, 11). The bitter satire of Juvenal and indignant complaints of Tacitus of the spread of the infection through Roman society are well known (Tacitus, Ann. xx. 44; Juvenal, Sat. xiv. 96). These converts to Judaism were some women. Such proselytes formed at that period the point of concordance for the conversion of the Gentiles.

Among the converts from Judaism to Christianity there existed in the days of Paul two parties. The congregated apostles had decreed, according to Acts xvi, 4, that no Jewish men should be associated with Jews in the keeping of the ritual laws of Moses. There were, however, many converts from Judaism who were disinclined to renounce the authority of the Mosaic law, and appealed erroneously to the authority of James (Gal. ii. 9; comp. Acts xxi. 25); they claimed also the authority of Peter as their bios. Such converts from Judaism, mentioned in the other epistles, who continued to observe the ritual laws of Moses were not prevalent in Rome: Baun, however, supposes that this Ebionite tendency prevailed at that time in all Christian congregations, Rome not excepted. He thinks that the converts from Judaism were so numerous that all the converts were obliged to submit to the Judaizing opinion of the majority (comp. Baun, Abhandlung über Zwecke und Verankerung der Römerbriefe, in the Tübinger Zeitschrift, 1836). However, Neander has also shown that the Judaizing ten-
dency did not prevail in the Roman Church (comp. Næssler, "Einführung der christlichen Kirche" [3d ed.], p. 388). This opinion is confirmed by the circumstance that, according to ch. xvi, Paul had many friends at Rome. Baer removes this objection only by declaring ch. xvi to be a forgery. But it is better to prove that there were Ebionitians Christians at Rome: it appears, however, that the persons mentioned in ch. xiv were by no means strictly Judaizing zealots, wishing to overrule the Church, but, on the contrary, some scrupulous converts from Judaism, upon whom the others looked down contemptuously. There were, indeed, some differences between the Church at Rome and the Gentile Churches. This is evident from ch. 6, 9, and xi, 17, 18: these debates, however, were not of so obstinate a kind as among the Galatians; otherwise the apostle could scarcely have praised the congregation at Rome as he does in ch. i, 8, 12, and xv, 14. From ch. xvi, 17–20 we infer that the Jews had not yet been persuaded and, with little success.

On the other hand, situated in the metropolis of the great empire of heathendom, the Roman Church must necessarily have been in great measure a Gentile Church; and the language of the epistle bears out this supposition. It is professedly as the apostle of the Gentiles that he addresses the Christians in his Phil. iv, 1, 2; and he says in his Gal. "to have some fruit among them, as he had among the other Gentiles (ver. 13). Later on in the epistle he speaks of the Jews in the third person, as if addressing Gentiles: "I could wish that myself were accursed for my brethren, my kinsmen after the flesh, who are Israelites," etc. (ix, 5, 6). Again: "my heart's desire and prayer to God for them is that they might be saved," etc. (1, 17; the right reading is ἑιροτ αὐτῶν, not ἑιροτ γοῦ 'Ιραμᾶς, as in the Received Text). Comp. also xi, 23, 25, and especially xi, 30: "For as ye in times past did not believe God, so do these also (i.e. the Jews) now not believe," etc. In all these passages Paul clearly addresses himself to Gentile readers.

These Gentile converts, however, were not, for the most part, native Romans. Strange as the paradox appears, nothing is more certain than that the Church of Rome was at this time a Greek, and not a Latin, Church. It is clearly established that the early Latin version of the New Testament was made from the Greek text of the Roman Church, but not for the provinces, especially Africa (Westcott, Canon, p. 269). All the literature of the early Roman Church was written in the Greek tongue. The names of the bishops of Rome during the first two centuries are, with but few exceptions, Greek (see Milman, "History of Greece," iii, 27). In accordance with these facts, we find a peculiar version, but the correctness of the names in the salutations of this epistle are Greek names; while of the exceptions. Priscilla, Aquila, and Junia (or Junias), were certainly Jews; and the same is true of Rufus, if, as is not improbable, he is the same mentioned in Mark xv, 21. Julia was probably a dependent of the imperial household, and derived her name accordingly. The only Roman names remaining are Amplias (i.e. Ampliatus) and Urbanus, of whom nothing is known; but their names are of late growth, and certainly do not point to an old Roman stock. It was therefore from the Greek population of Rome, pure or mixed, that the Gentile portion of the Church was almost entirely drawn. The Greek formed a very considerable fraction of the whole people of Rome. They were the most busy and adventurous, and also the most intelligent of the middle and lower classes of society. The influence which they were acquiring by their numbers and versatility is a constant theme of reproach in the Roman philosopher and statesman, Juvenal (iii, 40–50; vi, 18; and Tacitus, Hist. 29). They complain that the national character is undermined, that the whole city has become Greek. Speaking the language of international intercourse, and brought by their restless habits into contact with foreign religions, the Greeks had larger opportunities than others of acquainting themselves with the truths of the Gospel; while, at the same time, holding more loosely to traditional beliefs, and with minds naturally more inquiring, they would be more ready to welcome these truths when they came in their way. At all events, for whatever reason, the Gentile converts at Rome were Greek, and it was no surprise to see con•juncture on the part of the transcriber of the Syriac Peshito that this letter was written "in the Latin tongue" (אֲנָשָׁא). Every line in the epistle bespeaks an original.

When we inquire into the probable rank and station of the Roman believers, an analysis of the names in the list of salutations again gives an approximate answer. These names belong for the most part to the middle and lower grades of society. Many of them are found in the cumbria of the freedmen and slaves of the early Roman emperors (see "Journal of Class, and Sacra. Phil." iv, 57). It would be too much to assume that they were the same persons; but, at all events, the identity of names points to the same social rank. Among the less wealthy merchants and tradesmen, among the petty officers of the army, among the slaves and freedmen of the imperial palace, whether Jews or Greeks, the Gospel would first find a firm footing. To this last class Phil. iv, 12, is addressed, and "Paul, a servant of Jesus Christ, to all that be in Rome under Ca•sar's household." From these it would gradually work upwards and downwards; but we may be sure that in respect of rank the Church of Rome was no exception to the general rule, that "not many wise, not many mighty, not many noble," were called (1 Cor. i, 20).

It seems probable, from what has been said above, that the Roman Church at this time was composed of Jews and Gentiles in nearly equal proportions. This fact finds expression in the account, whether true or false, which represents Peter and Paul as presiding at the same time over the Church at Rome (Dionys. Cor. ap. Euseb. H. E. ii, 25; Ireneaus, iii, 9). Possibly, also, the discrepancies in the lists of the early bishops of Rome may find a solution (Pearson, "Minor Theol. Works," ii, 449; Bunsen, "Hippolytus," i, 44) in the joint episcopate of Linus and Cletus—the one ruling over the Jew•ish, the other over the Gentile, congregation of the metropolis. If this conjecture be accepted, it is an important testimony here, though we cannot suppose that in Paul's time the two elements of the Roman Church had distinct organizations.

5. The heterogeneous composition of this Church explains the general character of the Epistle to the Romans. In an assemblage so various, we should expect to find not the exclusive predominance of a single form of expression, but the mingling of the language of the epistle. The Greek had here to contend not specially with Jewish, nor specially with heathenism, but with both together. It was therefore the business of the Christian teacher to reconcile the opposing difficulties and to hold out a meeting-point in the Gospel. This is exactly what Paul does in the Epistle to the Romans, and what, from the circumstances of the case, he was well enabled to do. He was addressing a large and varied community which had not been founded by himself, and with which he had had no direct intercourse. Again, it does not appear that the letter was specially written to answer any doubts, or settle any controversies, then rife in the Roman Church. There were mingling influences, such as arise out of personal relations, or peculiar circumstances, to derange a general and systematic exposition of the nature and working of the Gospel. At the same time, the vast importance of the metropolitan Church, which could not have been over•looked even by Peter, led Paul to send it out to the apostle as the fittest body to whom to address such an exposition. Thus the Epistle to the Romans is more of a treatise than of a letter. If we remove the personal allusions in the opening verses, and the salutations at the close, it seems not more particularly addressed to the Church of Rome than to any
other Church of Christendom. In this respect it differs widely from the Epistles to the Corinthians and Galatians, with which, as being written about the same time, it may most fairly be compared, and which are full of personal and direct allusions. In one instance alone we seem to trace a special reference to the Church of the metropolis. The injunction of obedience to temporal rulers (xiii, 1) would most fitly be addressed to a congregation brought face to face with the imperial government, and the more so as Rome had recently been the scene of disorders. The appearance of either Jews or Christians, arising out of a feverish and restless anticipation of the Messiah's coming (Sueton. Claud. 25). Other apparent exceptions admit of a different explanation.

6. This explanation is, in fact, to be sought in its relation to the contemporaneous epistles. The letter to the Romans closes the group of epistles written during the second missionary journey. This group contains, besides, as already mentioned, the letters to the Corinthians and Galatians, written probably within the few months preceding. At Corinth, the capital of Achaia and the stronghold of heathendom, the Gospel would encounter its severest struggle with Gentile vices and pomps, which either though natural sympathy or from close contact, seems to have been more exposed to Jewish influence than any other Church within Paul's sphere of labor, it had a sharp contest with Judaism. In the epistles to these two churches we study the attitude of the Gospel towards the Gentile and Jewish world respectively. These letters are direct and special. They are evoked by present emergencies, are directed against actual evils, are full of personal applications. The Epistle to the Romans is the summary of what he had written before, the result of his dealing with the two antagonistic forms of error, the gathering together of the fragmentary teaching in the Corinthian and Galatian letters. What is there immediate, irregular, and of partial application is here arranged and completed and thrown into a general form. Thus, on the one hand, his treatment of the Mosaic law points to the difficulties he encountered in dealing with the Galatian Church; while, on the other, his cautions against assimination excesses (vi, 15, etc.), and his precepts against giving offence in the matter of meats and the observance of days (ch. xiv), remind us of the errors which he had to correct in his Corinthian converts (comp. 1 Cor. vi, 12 sq.; viii, 1 sq.). Those injunctions, then, which seem at first sight special, appear not to be directed against any actual known failings in the Romans, but rather to be suggested by those irregularities occurring in Rome which he had already encountered elsewhere.

7. View this epistle, then, rather in the light of a treatise than of a letter, we are enabled to explain certain phenomena in the text above alluded to (§ 1). In the received text a doxology stands at the close of the epistle (xvi, 25-27). The preponderance of evidence is in favor of this position, but there is respectable authority for placing it at the end of ch. xiv. In some texts, again, it is found in both places, while others omit it entirely. The phenomena of the MSS. seem best explained by the supposition that the letter was written at an early date (whether during the apostle's lifetime or not it is idle to inquire) in two forms, both with and without the two last chapters. In the shorter form it was divested, as far as possible, of its epitostical character by abstracting the personal matter addressed especially to the Romans, the doxology being retained at the close. The other and longer form of this epistle, of any special references is found in MS. G, which omits εἰς Ἑβραίους (i, 7) and τινι εἰς Ἑβραίου (ver. 15); for it is to be observed, at the same time, that this MS. omits the doxology entirely, and leaves a space after ch. xiv. This view is somewhat confirmed by the parallel case of the opening of the letter, in which there is no room for authority for omitting the words εἰς Ἑβραίου, and which bears strong marks of having been intended for a circular letter.

V. Scope, Contents, and Characteristics. The elaboration argument and logical order observed in this epistle give it a very systematic character. Nevertheless, the bearing of many of its parts has often been greatly obscured or imperceptible, even under the influence of polemical bias. On this account, as well as because of the great interest always attached to the fundamental doctrines so formally treated in it, we give an unusually full outline of its contents, even at the risk of some repetition.

1. The general purport of this epistle we may start from Paul's own words, which, standing at the beginning of the doctrinal portion, may be taken as giving a summary of the contents: "The Gospel is the power of God unto salvation to every one that believeth, to the Jew first and also to the Greek; for therein is the righteousness of God revealed from faith to faith" (i, 16, 17). Accordingly the epistle has been described as comprising "the religious philosophy of the world's history." The world in its religious aspect is divided into Jew and Gentile. The different positions of the two, as regards their past and present relation to God and their future prospects, are explained. The atonement of Christ is the fundamental fact upon which the doctrine of justification by faith is the key which unlocks the hidden mysteries of the divine dispensation.

It belongs to the characteristic type of Paul's teaching to exhibit the Gospel in its historical relation to the human race. In the Epistle to the Romans, also, we find that peculiar character of Paul's teaching which induced Schleiermacher to call Paul's doctrine a philosophy of the history of man. The real purpose of the human race is in a sublime manner stated by Paul in his speech in Acts xvii, 26, 27; and he shows at the same time how God had, by various historical means, promoted the attainment of his purpose. Paul exhibits the Old-Test.

dispensation upholding the legal institutions of the education of the whole human race, which should enable men to terminate their spiritual minority and become truly of age (Gal. iii, 24; iv, 1-4). In the Epistle to the Romans, also, the apostle commences by describing the two great divisions of the human race, viz. those who underwent the preparatory spiritual education of the Jews, and those who did not undergo such a preparatory education. We find a similar division indicated by Christ himself (John x, 16), where he speaks of one flock separated by hurdles. The chief aim of all nations, according to Paul, should be the righteouness before the face of God, or absolute realization of the moral perfection of man, as the source of their σάσιον, law, as well religious as moral internal revelation (Rom. i, 19, 32; ii, 15). The heathen have, however, not fulfilled that law which they know, and are in this respect like the Jews, who also disregarded their own law (ch. ii). Both Jews and Gentiles are transgressors, or, by the law, separated from the grace and onship of God (ver. 12; iii, 20); consequently, if blessing could only be obtained by fulfilling the demands of God, no man could be blessed. God, however, has gratuitously given righteousness and blessedness to all who believe in Christ (ver. 21-31). The Old Test. also recognizes the value of religious faith (ch. iv). Thus we freely reign in peace and mercy, and have before us still greater things, viz. the future development of the kingdom of God (v, 1-11).

The human race has gained in Christ much more than it lost in Adam (v, 12, 21). This doctrine by no means encourages sin (ch. vi); on the contrary, men who are convinced of the correctness of their position. The climax of this epistle is reached in the Lord's exhortation to pursue high and worthi, the Scriptures. The sufferers of the present time cannot prevent this development, and must rather work for good to those

Digitized by Google
ROMANS, EPISTLE TO THE

whom God from eternity has viewed as faithful believ-
ers; and nothing can separate such believers from the
eternal love of God (viii. 28-39). It causes pain to be-
hold the Israelites themselves shut out from salvation;
but they themselves are the cause of this seclusion, be-
cause they wished to attain salvation by their own re-
sources. They failed, therefore, by deserting Abraham
and by their fulfilment of the law. Thus, however, the
Jews have not obtained that salvation which God has
freely offered under the sole condition of faith in Christ
(ch. ix.): the Jews have not entered upon the way of
faith, therefore the Gentiles were preferred, which was
promised by the prophets. However, the Jewish race, as
such, has not been rejected; some of them obtain
salvation by a selection made not according to their
works, but according to the grace of God. If some of
the Jews are left to their own obduracy, even their tem-
porary fall serves the plans of God, viz., the vocation of
the Gentiles. After the mass of the Gentiles shall have
entered in, the people of Israel, also, in their collective
capacity, shall be received into the Church (ch. xi.).

2. The following is a more detailed analysis of the epis-
tle:

SALUTATION (i., 1-7). - The apostle at the outset strikes
the keynote of the epistle in the expressions "called as an
apostle, an "elect" and "servant," Divine grace is everything,
human merit nothing.

I. PERSONAL EXPLANATIONS. Purposed visit to Rome (i.,
5-10).

II. DOCTRINAL DISCUSSION (i., 16; xi., 90).

A. The doctrine of justification. The Gospel the salvation of
the Jews and Gentile alike. This salvation comes by faith
(i., 16, 17).

B. The rest of this section is taken up in establishing this
thesis, and drawing deductions from it, or correcting
misconceptions.

(a.) All alike were under condemnation before the Gosp-
el: the heathen (i., 18-33). The Jew (i., 19-29).
(b.) Objectives to this statement answered (iii., 1-5).
(c.) The position itself established from Scripture (iii.,
21-26).

(d.) A righteousness (justification) is revealed under the
Gospel, which being of faith, not of law, is also uni-

versal (iii., 21-26).

Boasting is thereby excluded (iii., 27-31). This justifica-
tion by faith Abraham is an example (iv.,
1-25).

Thus, then, we are justified in Christ, in whom alone we
glorify (v., 1-11).

This acceptance in Christ is as universal as was the con-
demnation in Adam (v., 12-19).

(c.) The consequence of our deliverance.

The law was given to multiply sin (v., 20, 21). When we
died to the law, we died to sin (vi., 1-14). The aboli-
tion of the law (not of moral law) (ver. 15-25).

On the contrary, as the law has passed away, so must sin,
for sin and the law are cor-

related. In this view, this is a careful arrangement of the
law, but rather a proof of human weakness (vi.,
4). So that even in Christ we are free from sin, we
have the Spirit, and look forward in hope, trium-
phing over our present afflictions (vii., 1-39).

(d) The rejection of the Jews is a matter of deep sorrow
(v., 1-5).

Yet we must remember-

(i.) Their rejection is not to the whole people, but only to a select seed (ix., 6-18). And the absolute purpose of God in so ordaining is not to be can-
vassed in moral terms.

(ii.) That the Jews did not seek justification aright, and so mislead it. This justification was promised by the prophets, it was offered to all alike, the preaching to the Gentiles being implied therein. The character and results of the Gospel dispensation are fore-

told (x., 14-21).

(iii.) That the rejection of the Jews is not final. This seems to have been the means of grace to the

Gentiles, and through the Gentiles they themselves
will ultimately be brought to Christ (xi., 1-36).

III. PERSONAL APPLICATIONS (xii., 1-15).

(a.) To holiness of life and to charity in general, the duty of obeisance to rulers being inculcated by the way

(b.) More particularly against giving offence to weaker

brethren (xiv., 1; xv., 19).

IV. PEACEFUL MINDS.

(a.) The apostle's motive in writing the letter, and his intention of visiting the Romans (xv., 14-33).

CONCLUSION. The letter ends with a benediction and dox-
ology (xvi., 24-27).

3. While this epistle contains the fullest and most
systematic exposition of the apostle's teaching, it is at
the same time a very striking expression of his charac-
ter. Nowhere do his earnest and affectionate nature,
and his tact and delicacy in handling unwelcome topics,
appear more strongly than when he is dealing with the
rejection of his fellow-countrymen the Jews. See PAUL.

VI. THE COMMENTS ON THIS EPISTLE ARE VERY NUM-
EROUS, AS MIGHT BE EXPECTED FROM ITS IMPORTANCE.

For convenience, we divide them chronologically into two
classes.

Of the many patristic expositions, but few are now
extant. The work of Origen is preserved entire only in a
loose Latin translation of Ruffinus (Orig. [ed. De la
Rue] iv., 488); but some fragments of the original are
found in the Philoxenius, and more in Cramer's CATENA.
The commentary on Paul's epistles printed among the
works of Ambrose (ed. BEN. ii. App. p. 21), and hence
bearing the name Ambrosian, is probably to be attri-
buted to Hilary the deacon. Chrysostom is the most
important among the fathers who attempted to inter-
pret this epistle. He enters deeply and with psycho-
logical acumen into the thoughts of the apostle, and
expounds them with sublime animation (ed. Mon. ix.
, 420), edited specially by the Oxford University Press,
and entitled "Commentary on the Epistles of the Father-
ly of the Fathers" [Ofx. 1841.], vol. vii.). Besides these are the expositions of Paul's epistles by Pelagius
(printed among Jerome's works [ed. Vallarsi], vol. xi.
, vol. vi. pt. ii., p. 30), and by Theodoret (ed. Schulze, iii. 1).
Augustine commenced a work, but broke off at i., 4. It
bears the name "Expositio Epistolae Romanae" (ed.
Ben. iii, 925). Later he wrote Expositio quarum-
dom Propositionum Epistolae ad Rom., also extant (ed.
Ben. iii, 908). To these should be added the later Cat-
tena of Ecumenius (10th century), and the notes of
Theophylact (11th century), the former containing va-

lue extracts from Photius. Portions of a commentary
of Cyril of Alexandria were published by Mai (Nou.
Patr. Bibl. iii., 1). The Catena edited by Cramer (1844)
comprises two collections of Variantum notes, the one
extending from i, 1 to i, 1, the other from vii, 7 to the
end. Besides passages from extant commentaries, they
contain interesting extracts from Apollinaris, Theodic-

From Suecia, Severianus, Genisius, and others.

There are also the Greek Scholia, edited by
Matthiäi, in his large Greek Test. (Riga, 1782),
from Moscow MSS. The commentary of Euthymius Ziga-

benus (Tholuck, Eidn. § 6) exists in MS., but has never
been printed. Abelard wrote annotations on this epistle
in Opuscules (in Opp. ii.), a course of lectures in

Grundriiss (in Opp. i.), and Aquinas (in Opp. vi.). See COMMENTARY.

2. Modern exegetical helps (from the Reformation to the
present time) on the entire epistle separately are the
following, of which we designate the most important
by an asterisk prefixed: Titlemann, Collections (Antw.
, 1520, 8vo.); Melanchthon, Adnotationes (Vetem.,
1532, and often, 4to); Bugenhagen, Interpretation (Hag. 1552,
1527, 8vo.); Geelvapadus, Adnotationes (Basil.,
1526, 8vo.); Sadoleto [Rom. Cath.], Commentarii (Lugd.,
1535, fol.); Haeresche [Rom. Cath.], Commentarii (Par.,
1536, 8vo.); Calvin, Commentarii (in Opp.); in English by
Sibon, Lond. 1684, 8vo.; by Bodenham and Beveridge, Edinb., 1718, 8vo.; by Ernout, etc., Basil.,
1748, 8vo., 2 vols.; by Adam, Franc. 1806-38, 2 vols.;
Sarcor, Scholias (Franc. 1451, 8vo.); Grandis [Rom. Cath.],
Commentarii (Par., 1546, 8vo.); Soto [Rom. Cath.],
Commentarii (Antw. 1580; Salim. 1551, fol.); Hales, Dis-
putations (Vetem., 1535, 8vo.); Muselius, Commentarii
(Basil., 1536; 1572, 2 fol.); Valdes [Soc., Rom. Cath.],
Commentarii (Ven., 1536, 8vo.); Naclanti [Rom. Cath.],
Enarrationes (ibid. 1557, 4to.); Martyr, Commentarii (Basil.,
1588, fol., and later; in English, 1638, fol.); Vigner ["Rom. Cath."], Commentarii (Par., 1558, fol., and
later); erus [Rom. Cath.], Ezequias (ibid. 1559, 8vo.,
and later). Bucer, Metaphysikas (Basil. 1602, fol.); Mai-

ANCIENT ROME

WITH PORTIONS OF THE MODERN CITY IN RED

for the purpose of comparison
two disciples in Germany, Lavater (1741-1801) and Pestalozzi (1746-1826), and at about the same time (1724-1804) Kant lent his influence to this school. The principle of the Romantics was life, and they represented ideas lyrically, as they sing in the raptures or agonies of the human heart. They represented the passions pictorially, as they may burn in an individual character, and belong to a certain age, race, or sex. The decay of this school was a simple consequence of its artistic principle. Life is not the highest principle of art; the highest principle is truth. When this was seen, the question arose, What is truth? The Romantics attempted a double answer, but failed in both. In Germany they said, Truth is only a symbol, and the highest symbols mankind possess are a Roman Catholic Church and the absolute monarchy. They despised the Reformation on aesthetic grounds as unsound. Hence followed political reaction, conversion to Romanism, extravagances, insanity, and suicide. In England they said, There is not a truth outside of the individual; take away all those abstract generalities which underlie the individuality, and the unbound Prometheus will show himself the truth. The result was disgust at life, despair at all. This branch of the Romantic school soon withered. In Germany the favorite philosopher of the Romantics was Schelling, and their favorite divine Schleiermacher. The book which most fully represents their school in England is the Sartor Resartus of Carlyle.

Románus, the name of a number of saints of the Roman Catholic Church.

1. Románus Thaumaturgus, said to have lived at Antioch in the 4th century, to have led a very abstemious life in a cave—partaking of only bread, salt, and water, and never kindling a fire—and to have wrought many wonders. His day is Feb. 9.

2. An archbishop of Rheims (380), a reputed relative of pope Vigilius, said to have been at first a monk and to have built a monastery in the desert neighborhood of Tréves, which was confirmed by Clovis I. His death took place in 533 or 534. His anniversary is Feb. 28.

3. An abbot of the convent of Jaux, in Burgundy, who is said to have been born near the end of the 4th century and to have been consecrated priest by Hilary, the bishop of Arles. It is related that he retired into solitude at the age of thirty-five; that he introduced the benedictine life into France, built cells and convents, and healed the sick through prayer and the kiss. He died in 690, and his day is also Feb. 28.

4. Albert and Domitian, said to have been martyred at Rome. Their alleged remains were exhumed in Rome in 1716 and were removed to the Jesuit church at Antwerp. They are commemorated March 14.

5. A monk in the diocese of Auxerre and Sens in the 6th century, who was divinely instructed to go from Isabeste in France, and there built monasteries, converted many people to a monastic life, and wrought miracles. His relics are preserved at Sens. His day is May 22.

6. An archbishop of Rouen (622) said to belong to the royal family of France, of whom the legend relates that when a monster which devoured man and beast ravaged the city of Rouen, he provided a criminal who was holding death with the symbol of the cross and commanded him to remove the monster. The result was that the monster following like a tame animal, and was burned. Romulus is said to have died in 639, and is commemorated on the reported date of his death, Oct. 23, and also on May 30.

7. A martyr, alleged to have been baptized by St. Laurent and to have been beheaded under Decius, A.D. 255. Commemorated Aug. 9.

8. A deacon of Cassarea, martyred under Diocletian, to whom Nov. 18 is assigned.

9. A reputed priest of Bordeaux whose death is fixed in 818, of whom the legend states that many wonders were wrought through his prayers, particularly that of rescuing shipwrecked persons. His day is Nov. 24.

Romans, Pope in A.D. 897, reigned only four months and twenty-three days. A single letter is all that history has preserved of his reign, and the only remarkable event of his pontificate was his disapproval of the indignities inflicted by his predecessor, Stephen VI, on the lifeless body of Formosus I (891-896). See the article. Romans abrogated the unjust decrees of his predecessor, by which all the acts of Formosus had been declared void, and confirmed the consecrations and other pontifical acts which had been so nullified. See Bower, Lives of the Popes, v. 71-73; Baronius, Annuall., A.D. 891-896.

Rombout, Díck, a Flemish historical painter, was born at Antwerp July 1, 1597. A pupil of Jan-sen's, he inherited the hatred of his master for Rubens, and opened a rival school. In 1617 he went to Italy, where his reputation was soon established, and he was called to the court of the grand-duke Cosmo II. He returned to Antwerp, where he spent the rest of his life. He was master of the Guild of St. Luke and held municipal offices. He died in 1637. The Taking-down from the Cross, St. Francis Receiving the Stigmata, and Thessal with the Attributes of Justice show him to have possessed the qualities of a great master.

Rome [Poppa =treck, strength; but probably from Romulus, the founder], is largely mentioned in the Bible only in the books of the Maceabees, and in Acts xviii. 2, etc. Rom.i. 7, 15; 2 Tim. i. 17; see also "Babylon," Rev. xiv. 8, etc.), the ancient capital of the Western world, and the present residence of the pope and capital of Italy. In the following brief account, we treat only of its ancient, and especially its Biblical, relations. See Roman Empire.

I. General Description.—Rome lies on the river Tiber, about fifteen miles from its mouth, in the plain of which is now called the Campagna (Felix ita Campavus, Pliny, Hist. Nat. iii. 6), in lat. 41° 54' N., long. 12° 28' E. The country around the city, however, is not altogether plain, but a mixture of hilly and flat land, while it sinks towards the south-west to the marshes of Maremma, which coast the Mediterranean. In ancient geography, the country in the midst of which Rome lay was termed Latium, which, in the earliest times, comprised within a space of about four geographical square miles the country lying between the Tiber and the Numismatic, extending from the Alban Hills to the sea, having for its chief city Laurentum. The "seven hills" (Rev. xvii. 9) which formed the nucleus of the ancient city stand on the left (eastern) bank. On the opposite side of the river rises the far higher ridge of the Janiculum. Here from very early times was a fortress, with a suburb beneath it extending to the river. Modern Rome lies to the north of the ancient city, covering with its principal portion the plain to the north of the seven hills, once known as the Campus Martius, and on the opposite bank extending over the low ground beneath the Vatican to the north of the ancient Janiculum.

The city of Rome was founded (B.C. 758) by Romulus and Remus, grandchildren of Numitor, and sons of Rhea Sylvia, to whom, as the originators of the city, mythology ascribed a divine parentage. At first the city had three gates, according to a sacred usage. Founded on the Palatine Hill, it was extended, by degrees, so as to take in six other hills, at the foot of which ran deep valleys that in early times were in part overflowed with water, while the hillsides were covered with trees. In the course of the many years during which Rome was acquiring to herself the empire of the world, the city underwent great, numerous, and important changes. Un-
der its first kings it must have presented a very different aspect from what it did after it had been beautified by Tarquin. The destruction of the city by the Gauls (A.U.C. 365) caused a thorough alteration in it; nor could the troubled times which ensued have been favorable to its being well restored. It was not till riches and artistic skill came into the city on the conquest of Philip of Macedon and Antiochus of Syria (A.U.C. 565) that there arose in Rome large, handsome stone houses. The capture of Corinth conducted much to the adornment of the city, many fine specimens of art being transferred thence to the abode of the conquerors. As the power of Rome extended over the world, and her chief citizens went into the colonies to enrich themselves, so did the masterpieces of Grecian art flow towards the capital, together with some of the talents and gifts by which they owed their birth. Augustus, however, it was who did most for embellishing the capital of the world, though there may be some sacrifice of truth in the pointed saying that he found Rome built of brick and left it marble. Subsequent emperors followed his example, till the place became the greatest repository of architectural, pictorial, and sculptural skill that the world has ever seen—a result to which even Nero's inconsideration indirectly conducted, as affording an occasion for the city's being rebuilt under the higher scientific influences of the times. The site occupied by modern Rome is not precisely the same as that which was at any period covered by the ancient city: the change of locality being towards the north-west, the city has partially retired from the celebrated hills. About two thirds of the area within the walls (traced by Aurelian) are now desolate, consisting of ruins, gardens, and fields, with some churches, convents, and other scattered habitations. Originally the city was fortified with the seven citadels. In the time of Pliny the walls were nearly twenty miles in circuit; now they are from fourteen to fifteen miles around. Its original gates, three in number, had increased in the time of the elder Pliny to thirty-seven. Modern Rome has sixteen gates, some of which are, however, built up. Thirty-one great roads are here in Rome, which, issuing from the city, traversed Italy, ran through the provinces, and were terminated only by the boundary of the empire. As a starting-point, a girt pillar (Miliarium Aureum) was set up by Augustus in the middle of the Forum. This curious monument, from which distances were reckoned, was discovered in 1825. Eight principal bridges led over the Tiber; of these three are still relics. The four districts into which Rome was divided in early times, Augustus increased to fourteen. Large open spaces were set apart in the city, called Campi, for assemblies of the people and martial exercises, as well as for games. Of nineteen which are mentioned, the Campus Martius was the principal. It was near the Tiber, whence it was called Tiberinus. The epithet "Martiis" was derived from the plain being consecrated to Mars, the god of war. In the later ages it was surrounded by several magnificent structures, and porticoes were erected, under which, in bad weather, the citizens could go through their usual exercises. It was also used for theatrical and rhetorical exercises. The name of Forum was given to places where the people assembled for the transaction of business. The Fora were of two kinds—

Remains of the Forum at Rome.
Coliseum, from a colossal statue of Nero that stood near it. With an excess of luxury, perfumed liquids were conveyed in secret tubes around these immense structures, and diffused over the spectator, sometimes from the statues which adorned the interior. In the arena which formed the centre of the amphitheatres, the early Christians often endured martyrdom by being exposed to ravenous beasts.

II. Judaism in Rome. — The connection of the Romans with Palestine caused Jews to settle at Rome in considerable numbers. The Jewish king Aristobulus and his son formed part of Pompey's triumph, and many Jewish captives and emigrants were brought to Rome at that time. A special district was assigned to them (Josephus, *Ant. xiv*, 10, 8), not on the site of the modern "Ghetto," between the Capitol and the island of the Tiber, but across the Tiber (Philos, *Leg. ad Caesum*, p. 568, ed. Mangely). From Philo also it appears that the Jews in Rome were allowed the free use of their national worship, and generally the observance of their ancestral customs. With a zeal for which the nation had been some time distinguished, they applied themselves with success to proselytizing (Dion Cass. xxxvii, 17).

Many of these Jews were freedmen (Philo, *loc. cij.*). Julius Cæsar showed them some kindness (Josephus, *Ant. xiv*, 10, 8; Sueton. *Cæsar*, 84). They were favored also by Augustus, and by Tiberius during the latter part of his reign (Philo, *loc. cij.*). On one occasion, in the reign of Tiberius, when the Jews were banished from the city by the emperor for the misconduct of some members of their body, not fewer than four thousand and enlisted in the Roman army which was then stationed in Sardinia (Sueton. *Tib.* 36; Josephus, *Ant. xviii*, 3, 4). Claudius "commanded all Jews to depart from Rome" (Acts xviii, 2), on account of tumults connected, possibly, with the preaching of Christianity at Rome (Sueton. *Claud.*, 25, "Iudæos impulsumque Chresto assidue tumultuantes Roma expulsit"). This banishment cannot have been of long duration, for we find Jews residing at Rome apparently in considerable numbers at the time of Paul's visit (Acts xxviii, 17). The Roman biographer does not give the date of the expulsion by Claudius, but Orosius (vii, 6) mentions the ninth year of that emperor's reign (A.D. 50). The precise occasion of this expulsion history does not afford us the means of determining. The cause here assigned for their expulsion is that they raised disturbances, an allegation which at first view does not seem to point to a religious, still less to a Christian, influence. Yet we must remember that the words bear the coloring of the mind of a heathen historian, who might easily be led to regard activity for the diffusion of Christian truth, and the debates to which that activity necessarily led, as a noisy disturbance of the peace of society. The Epicurean view of life could scarcely avoid describing religious agitations by terms ordinarily appropriated to martial pursuits. It must equally be borne in mind that the diffusion of the Gospel in Rome — then the very centre and citadel of idolatry — was no holiday task, but would call forth on the part of the disciples all the fiery energy of the Jewish character, and on the part of the pagans all the vehemence of passion which ensues from pride, arrogance, and hatred. Had the ordinary name of our Lord been employed by Suetonius, we should, for ourselves, have found little difficulty in understanding the words as intended to be applied to Jewish Christians. But the biographer uses the word *Chrestus*. The *us* is a mere Latin terminus; but what are we to make of the root of the word — Chrest for Christ? Yet the change is in only one vowel, and Chrest might easily be used for Christ by a pagan writer. A slight difference in the pronunciation of the word as vocalized by a Roman and a Jew would easily cause the error. We know that the Romans often did make the mispronunciation, calling Christ "Chrest" (Tertull. *Apol.* c. 8; Lactant. *Instr.* iv, 17; Just. *Mart.* *Apol.* c. 2). The point is important, and we therefore give a few details, the rather that Larner has, under Claudia (i, 259), left the question undetermined. Now, in *Tacitus* (Ammal. xxv, 44) Jesus is unquestionably called Chrest in a passage where his followers are termed Christians. Lucian, too, in his *Philostratus*, so designates our Lord, playing on the word *Chrestus* (*μετεβασθείς*), which, in Greek, signifies "good." These are his words: "since Christ [a good man] is found among the Gentiles also." Tertullian (ut sup.) treats the difference as a case of ignorant mispronunciation, *Christianus* being wrongly pronounced *Chrestianus*. The mistake may have been the more readily introduced from the fact that, while Christ was a foreign word, Chrest was customary. Lips that had been used to Chrest would, therefore, rather continue the sound than change the vocalization. The term Chrest occurs on inscriptions (Heumann, *Syloge*, diss. i, 358), and epi-
grams in which the name appears may be found in Martial (vii, 55; ix, 28). In the same author (xi, 91) a diminutive from the word, namely, Chrestorilla, may be found. The word assumed, also, a feminine form, Chres-
ta, as found in an ancient inscription. Comp. also Mar-
tial (vii, 55). There can therefore be little risk in asser-
ting that Suetonius intended to indicate that Jesus
Christ by Chrestus; and we have already seen that the
terms which he employs to describe the cause of the
expulsion, though peculiar, are not irreconcilable with
a reference on the part of the writer to Christians. The
terms which Suetonius employs are accounted for,
though they may not be altogether justified, by the
passages in the Acts of the Apostles in which the col-
usion between the Jews who had become Christians
and those who adhered to the national faith is found
with occasional severe disturbances (Kuinoél, Acts
xxvii, 2; Rorsal, De Christo per Erreore in Christ. Comm,
(Groningen, 1779)). Both Suetonius and Luke, in men-
tioning the expulsion of the Jews, seem to have used
the official term employed in the decree. The Jews
were known to the Roman magistrate; and Christians, as
being at first Jewish converts, would be confounded
under the general name of Jews. But that the Christians
as well as the Jews strictly so called were banished by
Claudius is confirmed by one clause of Acts; and indepen-
dently of this evidence, seems very probable from
the other authorities of which mention has been
made. See CHRISTUS; ROME, JEWS IN.

III. Christianity at Rome.—Nothing is known of the
first founder of the Christian Church at Rome. Roman
Catholics assign the honor to Peter, and on this ground
an argument in favor of the claims of the papacy.
There is, however, no sufficient reason for believing that
Peter was ever even so much as within the walls of
Rome (Eellendorf, Ist Petrus in Rom und Bischof der
römiscben Kirche gewesen? [Darmstadt, 1849]). See
Peter. Christianity may, perhaps, have been intro-
duced into Rome not long after the
Holy Spirit on the day of Pentecost, by the “strangers
of Rome” who were then at Jerusalem (Acts ii, 10).
It is clear that there were many Christians at Rome
before Paul visited the city (Rom. i, 8, 10, 15; xv, 20).
The names of twenty-four Christians at Rome are given
in the salutations at the end of the Epistle to the
Romans. For the difficult question whether the Roman
Church consisted mainly of Jews or Gentiles, see Cony-
beare and Howson, Life of St. Paul, ii, 157; Alford, Pro-
log.; and especially Prof. Jowett, Epistles of St. Paul to
the Romans, Civalzation, and Thessalonians, ii, 7-26.
The view is maintained that they were the Church, but
with many Jewish converts, seems most in harmony
with such passages as i, 5; xi, 13, and with the
general tone of the epistle. See ROMANS, EPHESI.

It may be useful to give some account of Rome in
the time of Nero, the “Cesar” to whom Paul appealed,
and in whose reign he suffered martyrdom (Eusebius,
H. E. ii, 20).

1. The city at that time must be imagined as a large
and irregular mass of buildings unprotected by an outer
wall. It had long outgrown the old Servian wall (Di-
yuma, Ital. Ant. Hom., iv, 18; ap. Merivale, Rom. Hist,
iv, 497); but the limits of the suburbs cannot be exactly
defined. Neither the nature of the buildings nor the
configuration of the ground was such as to give a striking
appearance to the city viewed from without. “An-
cient Rome had neither cupola nor campanile” (Cony-
beare and Howson, Life of St. Paul, ii, 571; Merivale,
Rom. Emp., iv, 512); and the hills, never lofty or impos-
ing, when covered and streets of a huge city, a confused appearance like the
hills of modern London, to which they have some-
times been compared. The visit of Paul lies between
two famous epochs in the history of the city, viz. its
restoration by Augustus and its restoration by Nero
(Conybeare and Howson, i, 15). Some parts of the city,
especially the Forum and Campus Martius, must now
have presented a magnificent appearance; but many of
the principal buildings which attract the attention of
modern travellers in ancient Rome were not yet built.
The streets were generally narrow and winding, tanked
by densely crowded lodging-houses (insulae) of enor-
mous height. Augustus found it necessary to limit
their height to forty feet (v. 295). Paul’s first visit to
Rome took place before the Neronian con-
flagration, but even after the restoration of the city,
which followed upon that event, many of the old evil
continued (Tacitus, Hist. iii, 71; Juvenal, Sat. iii, 189,
269). One half of the population consisted, in all prob-
ability, of slaves, who, in the late empire, consisted of
pauper citizens supported in idleness by the miserable
system of public gratuities. There appears to have been no middle class and no free industrial
population. Side by side with the wretched classes just
mentioned was the comparatively small body of the
wealthy nobility, of whose luxury and profligacy we
hear so much in the heathen writers of the time. (See
for calculations and proofs the works cited.)

Such was the population which Paul would find at
Rome at the time of his visit. We learn from the Acts
of the Apostles that he was detained at Rome for “two
whole years, dwellings in his own hired house with a
soldier, who kept him in constant custody” (Acts xvi, 23).
apparently, according to Roman custom (Seneca, Ep. v;
Acts xii, 6, quoted by Brotier, Ad Tuc. Amm. iii, 22),
he was bound with a chain (Acts xxviii, 20; Eph. vi, 20;
Phil. i, 13). Here he preached to all that came to him,
no man forbidding him (Acts xxxii, 30, 31). It is
generally believed that on his “appeal to Caesar” he
was acquitted, and, after some time spent in freedom,
was a second time imprisoned at Rome (for proofs, see
Conybeare and Howson, Life of St. Paul, ch. xxvii,
and Alford, Gr. Test. vol. iii, ch. vii). Five of his epis-
tles, viz. those to the Colossians, Ephesians, Philippian,
that to Philemon, and the Second Epistle to Timothy,
were written while he was a prisoner at Rome, the latter
shortly before his death (2 Tim. iv, 6), the others during
his first imprisonment. See also HEBREWS, EPHESI
TO THIS. It is universally believed that he suffered
martyrdom at Rome.

2. The localities in and about Rome especially con-
ected with the life of Paul are (1) The Appian Way,
by which he approached Rome (Acts xxviii, 15). See
APPI FORUM. (2) “The palace,” or “Cesar’s court”
(ro παραπόλις, Phil. i, 13). This may mean either the
great camp of the Praetorian guards which Tiberius
established outside the walls on the north-east of the
palace of the emperor (Rome: History of Rome, 247, 248),
or, as seems more probable, a barrack attached to the
imperial residence on the Palatine (Wieseler, as quoted by
Conybeare and Howson, Life of St. Paul, ii, 428). There
is no sufficient proof that the word “pretorium” was ever
used to designate the emperor’s palace, though it is
used for the official residence of a Roman governor (John
xiv, 26; Acts xxiii, 35). The mention of “Cesar’s house-
hold” (Phil. iv, 22) confirms the notion that Paul’s
residence was in the immediate neighborhood of the
emperor’s house on the Palatine.

3. The connection of other localities at Rome with
Paul’s name rests only on traditions of more or less
probability. We may mention especially—(1) The
Mamertine prison, or Tullium, built by Ancus Marcius
near the Forum (Liv. i, 33), described by Sallust
(Cot. 50). It still exists beneath the Church of San Giuseppe
di Falegnami. Here it is said that Paul and Peter
were fellow-prisoners for nine months. This is not the
place mentioned by the Acts, but probably the other Peter was ever at
Rome. It may be sufficient to state that there is no evidence of such a visit in the New Test., unless
Babylon in 1 Pet. v, 13 be a mystical name for Rome, yet
early testimony (Dionysius, ap. Euseb. ii, 25) and the
universal belief of the early Church seem sufficient
to establish the fact of his having suffered martyrdom
there. The story, however, of the imprisonment in the
ROME, COUNCILS OF

The lately enumeraed foundations of the Church of St. Clement are confidently claimed as relics of the same age (Mullock, y. 78; Basiliaca in Rome (Rome, 1797, 8vo)). See CLEMENT.

LINSUS (who is mentioned in 2 Tim. iv. 21) and Clement (Phil. iv. 3) are supposed to have succeeded Peter as bishops of Rome. See LINUS.

IV. MYSTICAL TITLES.—Rome, as being their tyrannical mistress, was an object of special hatred to the Jews, who therefore denominated her by the name of Babylon—the state in whose dominions they had endured a long and heavy servitude (Schoettgen, Hor. Heb., i. 1125; Eisenmenger, Entdeckt. Jud. 1, 1800). Accordingly Rome, under the name of Babylon, is set forth in the Apocalypse (xiv. 9; xvi. 10; xvii. 5; xviii. 2) as the centre and refuge of all the alienation and unhealability of Israel, and the problem appears as the symbol of Judaism. In xviii. 9, allusion is clearly made to the Septicollis, the seven-hilled city—"seven mountains on which the woman sitteth." The description of this woman, in whom the profligacy of Rome is vividly personified, may be seen in Rev. xvii. In ch. xiii Rome is pictured as a huge, unnatural beast, whose name or number is the number of a man, and his number is χείς," 666, not improbably Latinos, Λατίνος, Latin, Roman. This beast has been most variously interpreted. The several theories serve scarcely more than to display the ingenuity or the bigotry of their originators, and to destroy each other. Münzer (De Oeccl. et Præcept. ecclesiae Romanae (Hamburg, 1811)) thinks there is a reference to the secret name of Rome, the disclosure of which, it was thought, would be destructive to the state (Pliny, Hist. Nat. iii. 9; Macrobius, Saturn. iii. 5; Plutarch, Quest. Rom. c. 61; Servius, Ad Aen. ii. 298). Pliny's words occur in the midst of a long and picturesque account of Italy. Coming in the course of it to speak of Rome, he says, "the uttering of whose other name is accounted impious, and when it had been spoken by Valerius Soranus, who immediately suffered the penalty, it was blotted out with a faith no less excellent than beneficial." He then proceeds to speak of the rites observed on the first of January, in connection with this belief, in honor of Diana Anguriae, whose image appeared with her mouth bound and sealed up. This mystic name tradition reports to have been Veneria.

One of the most recent views of the name of the beast, from the pen of a Christian writer, we find in Philemon (Hypomnena, or, A Psychological Exposition of the Apocalypse (London, 1844)). "The number in question (666) is expressed in Greek by three letters of the alphabet: χ, six hundred; ζ, sixty; τ, six. Let us suppose these letters to be the initials of certain names, as it was common with the ancients in their inscriptions to indicate names of distinguished characters by initial letters, and sometimes by an additional letter, as C. Caius, Cu. Cneus. The Greek letter χ (ch) is the initial of Χριστος (Christ); the letter ζ is the initial of Ελεον (wood or tree); sometimes figuratively put in the New Test. for the cross. The last letter, π, is equivalent to σ and τ, but whether an σ or an ι, it is the initial of the word Satan or the adversary, or the first two names in the genitive, and the last in the nominative, we have the following appellation, name, or title: Χριστου Ελουσ σατανας, 'the adversary of the cross of Christ,' a character corresponding with that of certain enemies of the truth described by Paul (Phil. iii. 19)." See NUMBER OF THE BEAST.

ROME, BISHOP OF. See PONT.

ROME, COUNCILS OF. The most important are: 1. In 318, against the lapsed, and on discipline; 2. In 341, by pope Julius I and the Eastern bishops, in favor of Basilianism; 3. In 352 by Liberius, against Arianism; 4. In 355, against the emperor Constans and the heretics; 5. In 364, at which were present deputees from the Council of Lampsacus; 6. In 366, at which the Macedonians adopted the Nicene Creed; 7. In 367, to examine
into the charge of abultery preferred against the pope Damasus; 8. In 369, by Damasus, at which Ursinus and Valera were condemned; 9. In 372, at which Auxentius, bishop of Milan, was excommunicated; 10. In 374, by Damasus, condemning Apollinaris; 11. In 375, condemning Lucius, bishop of Alexandria; 12. In 376, against the Apollinarists and others; 13. In 386, fourth of Damasus, condemned in Arles; 14. In 391, against the Donatists; 15. In 430, against Nestorius; 16. In 444, against the Manichees; 17. In 774, giving Charlemagne power to elect the Roman pontiff, and to invest all bishops; 18. In 963, deposing pope John XII and appointing Leo VIII; 19. In 964, deposing Leo VIII; 20. In 964, restoring Leo VIII and deposing Benedict VIII. The latter was very unpleasant.

ROME, JEWS IN. The origin of the Jews in Rome is very obscure. If credit is to be given to a reading in Valerius Maximus, as it is found in two epitomists,—Julius Paris and Januarus Nepotianus—the Jews were already in Rome in 193 B.C. The old reading was, ‘Idem (C. Cornelius Hispania, praeator peregrinus) qui Sabazius Jovis culto simulato mortem Romanae maiestatis sui sustinet, domos suas reperte coget.’ The epitomists read:

Paris.  
‘Idem Judaeos qui Sabaiz Jovis cultu Romanae maiestatis sui in caput Romanae maiestatis sui sustinet, domos suas repertae coget.’

Nepotianus.  
‘Idem Judaeos quoque qui Romanae maiestatis sui sustinet, domos suas repertae cogete.’

If this reading be genuine, we find the Jews not merely settled in Rome, but a dangerous and proselyting people, three quarters of a century before the taking of Jerusalem by Pompey. But aside from the fact that both Paris and Nepotianus are Post-Christian writers, the question comes up, ‘What have the Jews to do with Jupiter Sabazius—a Phrygian god?’ Without arguing the question at any length, we may unhesitatingly say that the whole is a flagrant anachronism, introduced into the text of Valerius after the time when the Jews, either of themselves or as connected with the Christians, had become much more familiar to the general ear. Friedlander, in his Darstellungen aus der Sitzenrichte. Rome, iii, 510, adopts the reading of Valerius Maximus as a source; but it is certain that the first seeing of the Jews in Rome at Pompey when vast numbers of slaves were brought to the capital. These slaves were publicly sold in the markets, but, if we may believe Philo, were soon emancipated by their tolerant masters, who were unwilling to do violence to their religious feelings. Is it not more probable that there were some, if not many, who connected Jewish habits, already in Rome, ‘who, with their usual national spirit, purchased, to the utmost of their means, their unhappy countrymen, and enabled them to settle in freedom in the great metropolis?’ Certain it is that at the time when Cicero delivered his memorable oration to vindicate Flaccus their influence was already felt; for being afraid of the large number of Jews Cicero saw in the audience, he delivered his speech in a low voice (Cicero, Pro Flacco, 28). Under Julius Caesar they enjoyed great liberties; for, as Suetonius tells us, they were among the mourners—the most sincere mourners—at the obsequies of Caesar; they waited for many nights around his tomb (‘precipue Judaei qui noctibus continuus bursam frequentabant’ [Jul. c. 81]). At the time of Augustus, the number of Jews residing at Rome already amounted to several thousand. Tacitus gives their number at 4000, and Josephus states that 8000 were present when Archelaus appeared before Augustus (Ant. xxiv, 11); we can hardly believe this. They formed a chief population of the trans-Tiberine region, ‘tum in pace Tiberis pontem medio flumini per sepetum, in quo ignis kathmogia et oikogenia pro fidei nikou’ ‘Romani et haec et plures antelegivantes. Aghahpat hie in Agiathion in Iuliam, uut opus eis patris et patriae dixit, quoniam et patris patriae.”

Such is the report Philo gives in Legat. ad Caes. § 23 (Mang, ii, 569). Augustus was at first an enemy to all foreign religions, and even praised Caius, the son of Agrippa, for not having sacrificed in Jerusalem (Sueton. Augustus, 93). But as he advanced in years he grew more superstitious, and finally ordered that sacrifices for his welfare should be offered. Hence we find Augustus in Jerusalem in 193, and on the following day if the distribution fell on a Sabbath.

The first direct persecution of the Jews occurred under the reign of Tiberius, who sent 4000 Jewish youth against the robbers of Sardinia, purposely exposing them to the inimicities of the climate (‘et ob gravitates, quas habebant, et damnum,’ Tacitus writes), and who banished all the others from Rome (Tacit. Annal. ii, 85; Sueton. Tiberius, 36). The ground of this decree is stated to have been the emperor’s desire to suppress all foreign superstitions, more especially the Jewish, which numbered many proselytes. Josephus explains that Augustus sought to employ the Jews in Rome, in concert with three other Jews, succeeded in proselytizing Fulvia, a noble Roman lady. On pretence of collecting for the Temple, they received from her large sums, which they appropriated to their own purposes. The fraud was detected, and Sejanus, who at that time was high in the emperor’s confidence, used the opportunity for insinuating his master to a general persecution of the Jews. After the death of Sejanus, the Jews were allowed to return to Rome to be oppressed by Caligula. Claudius (A.D. 41-54) again banished them from Rome, probably on account of the disputes and tumults excited by them in consequence of the spread of Christianity (‘Judaeos impulsero Christo ascendit tumultuarum Roma expulsit’ [Sueton. Claudius, 25]). Yet here, as elsewhere, oppression and persecution seemed not to be the slightest check on their increase, and it is true what Dion Cassius remarks, that the Jews were a γενος, κολυμνοις μν πολεικας, αμηθινοι ει τι πλεονεκροιν των πληθυσμων της πολιως των. And Martial adds, ‘Nunc sacrat fontis nensus et delubra locantur Judaeis, quorum cuphimis famesaque superex.’

And Martial alludes to their flight, and, what is curious enough, describes them as peddlers, vendors of matches, which they trafficked for broken glass (i, 42; xii, 46). Be it as it may, certain it is that the Jews had once a flourishing and influential congregation at Rome, as may be seen from Jewish inscriptions and tombs which of late have been brought to light.
ROME

Such was the checked history of the dispersed of Jerusalem during the period which ends with the destruction of Jerusalem. Their wanderings and settlements in other parts of Europe, and the events which befell them in the Roman empire and elsewhere, are fully treated in the articles JEW and ROMAN.

ROME, BENJAMIN BEN-JEHUDA OF, a learned Jew, flourished in the 14th century, and is the author of commentaries on Kings, Chronicles, and Proverbs. They are still in MS., but "represent the sound and single exegesis of the Spanish school, abounding with quotations from Jonah Ibn Ja’annah, Ibn-Gikatilla, Ibn-Balbigan, Ibn-Ezra, Joseph Kimchi, and David Kimchi, and are of considerable interest for the history of exegesis." See De Rossi, Dizionario Storico degli Autori Ebrei, p. 83 (Germ. transl.); Ginsburg, Lesia’s Masoretes ha-Masoroth, p. 81, note 91; Wolf, Bibliotheca Hebr. iii, 152, No. 398; Steinschneider, Catalogus Libr. Hebr. in Bibl. Bodleiana, p. 790, 1840, 2769; the same in the Jewish Literature, p. 146, 376; and Bibliographie de l’Hambourgh, p. 21, No. 206 (Leips, 1859); Fürst, Bibl. Jud. ii, 117. (B. P.)

ROME LAND, a large open space in front of the minister of Waltham, Bury St. Edmund’s, and St. Albans, called the forbury at Reading, and probably the original of the tombland of Norwich, so called since 1392.

ROME SCOT, or ROME FEE, an annual tribute of a thousand marks paid by king John to the see of Rome. The money was remitted for the support of an English school or college in Rome, and was held by some of the popes to be a proof of the dependence of England on the Roman see. It was abolished Jan. 15, 1534. See Peter-Fenelon.

ROMEYN, the name of a family who have long been prominent in the Reformed Dutch Church in America. Their ancestors fled from their native country, the United Provinces (now Belgium), during the persecutions of Louis XIV for conscience sake and for their attachment to the Protestant cause. They took their lives in their hands, leaving all their effects behind them. There were three brothers, one of whom went to England, and was the ancestor of the celebrated Rev. William Romaine, author of The Life, the Walk, and the Triumph of Faith. He was the contemporary and collaborator of Whitefield, Berridge, the countess of Huntingdon, and the Wesleyes, with others of the great revivalists of the last century. The other two brothers, somewhere between 1550 and 1600, emigrated to the Dutch West India Islands and Brazil. One of them died soon after. Claas Jans Romeyn, the survivor, left Brazil when that country, which had been subject to the States-general, passed from their possession in 1661. He came to New York and died about twelve years later. Of his descendants the following are entitled to notice among the deceased ministers of the Reformed Church.

I. JAMES, son of James Van Campen Romeyn, born at Greenbush, N. Y., in 1797, was a graduate of Columbia College in 1816, and of the Theological Seminary of the Reformed Church at New Brunswick in 1819. He was settled successively at Nassau, N. Y., 1820-27; Six Mile Run, N. J., 1827-33; Hackensack, N. J., as colleague with his venerable father, 1833-36; Catskill, N. Y., 1836-40; Leeds, N. Y., 1842-44; Bergen Neck, N. J., 1844-50; Geneva, N. Y., 1850-51. He had scarcely begun his labors at this place when he struck down with paralysis, of which he lingered, often in great suffering, until death brought him a happy release in 1859. He had previously been declared emeritus at his own request by the classis to which he belonged—a provision by which a minister is honorably discharged from active duties. None of the churches which he served offered him so prominent a position as his pulpit power seemed to other presbyteries. But his parochial labours in entire of his own peculiar views, his feeble health, and of his very sensitive nature, which led him to decline more commanding places and enabled him to occupy a congenial retirement. With these feelings he also declined the professorship of logic and rhetoric in Rutgers College, and seldom published any of his pulpit discourses. He was a friend, not a rival of the Dr. Beecher, writing upon almost all topics of current interest with equal ease and ability. His only published sermons were, one on The Crisis and its Claims upon the Church of God, preached, June, 1842, before the General Synod of the Reformed Church, of which he was the retiring president; another, A Plea for the Evangelical Preachers, preached at the public deliberative meeting of the American Tract Society, October, 1843; and the last effort of his pen, before he was paralyzed, entitled Eternity to the Cross of Christ. These are all characteristic sermons. The last was published in Dr. H. C. Fish’s Pilgrims of the Pilgrim Church, and also in compendium form by the author as "A Proving Memorial to the people of his former charges." He was the author of a famous Report on the State of the Church, made to the General Synod in 1848; and also published a remarkable address before the Greene County Agricultural Society, during his residence there. In his will be forbad any posthumous publication of his discourses. His correspondence would make one of the richest volumes of epistulary writing in our language. Probably the best idea of his pulpit oratory and sermons may be formed from the statements which we quote. Dr. James W. Alexander, writing to a friend in September, 1844, from Staten Island, says: "Here I heard James Romeyn; and a more extraordinary man I never heard. Fulness of matter, every step sudden and unexpected, genius, strength, fire, terror, amazing and preposterous rapidity, contempt of rule and taste. It was an awful discourse: 1 Thess, v. 8. It was one which I shall not soon forget." Another contemporary of his says: "I think he had—his tall form—which, in face at least, I fancy to have been Laurence Sterne’s, strung up to the highest nervous tension, and his tongue pouring forth a lava-tide of burning eloquence, the most powerful to which I have ever listened. Powerful," he adds, "is just the word. I have heard men more remarkable for their polish, more learned, more erudite in learning, more winning in paths; but for the grander sublimities of eloquence I never heard his equal. His denunciations were awful; he abounded in this style. I have heard of his preaching his first sermon on the text, 'Yet forty days and Nineveh shall be destroyed,' of which the effect was startling. I had abounded and excelled in illustration. He laid all literal and knowledge under contribution for this purpose." Yet with all these characteristics of a Boanerges, he was tender and soul-moving. He could as easily bring tears to the eyes as terrify to the conscience. His zeal was flaming. His love to Christ and to souls and to the kingdom of Christ was unquenchable and inflamed every prayer. His prayers were as remarkable as his sermons for fulness, variety, point, and overwhelming effects. The hymnology of the Church afforded him more illustration, and was quoted with more power than by any other minister whom we ever heard. His grasp of a great subject, his power, his surprising fertility of figurative language, and historical, scientific, literary, and especially scriptural, illustrations, his condensed, intense modes of expression, the beauty of his language, and the uplifting power of his eloquence made him, as a preacher, perfectly unique.
and inimitable. He thought in figures, and his figures were powers. His voice was strong and commanding; his utterance was more rapid than that of any other public speaker, not excepting the celebrated statesman Rufus Choate; his action was as energetic as his thought, and perfectly exhausting to his weak and overtaxed body. He never went into his pulpit, not even up its shady steps, without the most careful preparation. His manuscript sermons and lectures are quite as marvellous for their neat and minute chirurgical as for their literary and theological contents. It is wonderful how he could read them in or out of the pulpit. But his physical and mental peculiarities seem to have been more acutely sensitive than those of his contemporaries, even to the sense to hear quicker, speak and think more rapidly than almost all others. But these very qualities brought with them a more excitable and naturally irritable temperament, more impatience with things and people that were not right in his sight, and other infirmities that needed the constant control of divine grace to enable him to live for Christ. Yet he was, in private life, a most entertaining and interesting companion, mirthful, exuberant, simple as a child, and a fast friend. In the ecclesiastical affairs of his denomination he was a conspicuous and zealous work, and, although, as in his Report on the Schism, he seemed to rise from the times, yet, one by one, nearly all of his proposed changes have been adopted and incorporated with the policy and life of the Church. He dealt in principles and facts rather than in theories and fancies. His afflictions enriched his experience, while they caused "many a conflict, many a doubt." His last days were occupied by the saddening shadows of disease that fell upon the wreck of his body and mind. But the spirit of his piety and ministerial life still shot up its heavenly radiance through the gloom until he entered into rest. On his tombstone are graven these words expressive of his highest aims: "Thou hast dealt well with thy servant, O Lord! I have passed my days as a minister of Jesus Christ. That is enough! That is enough! I am satisfied. God has led me by a right way. Bless the Lord, O my soul!"

2. JAMES VAN CAMPEN, son of Rev. Thomas and Susannah (Van Campen) Romeyn, was born at Mini- sota, N.Y., Nov. 15, 1772. At an early age, he was converted, and at an early age, and was always noted for conscientious piety and for the simplicity and frankness of his well-balanced character. He was educated at the Scheunecdy Academy, which was the germ of Union College, under the eye of his uncle, Dr. Theodoric Romeyn, with whom he afterwards was associated. He was licensed to preach by the Synod of New York, Oct. 5, 1787, and immediately settled as pastor of the united churches of Greenbush and Schodac, Rensselaer Co., N.Y., opposite Albany. In 1794 he relinquished the Schodac Church and took charge of a new enterprise which he had organized at Wynaot's Kill in connection with the Church at Greenbush. In 1799 he removed to New Jersey, having accepted a call to the united Second Churches of Hackensack and Schralenburg, which had been formed out of the old original churches there, and where he remained until disease compelled him to cease all active services, in 1862. His ministry in New Jersey was a period of bitter disputes between the G eccentric and Confirment parties, which, perhaps, raged with more theological and personal violence in these two churches than in any other part of the Dutch denomination. True to the antecedents and instincts of his family, Mr. Romeyn was a leader of the liberal and progressive party of his time, as a rule, arrayed also against the national struggle for independence. Politics embittered the ecclesiastical disputes. Families were divided; personal strife ran so high that, in many cases, the opposing parties would neither worship together, nor speak to each other, nor even turn out for each other on the roads. In 1822 another great conflict which had arisen some years previously culminated in the secession of Rev. Solomon Fishegh, D.D., a professor of theology and pastor of the old churches of Hackensack and Schralenburg, and four other clergymen, with seven congregations, who formed what they called the "True Reformed Dutch Church in America." Romeyn was among the first to be transferred to this unhappy movement, in which Mr. Romeyn was necessarily involved as the chief representative of the faith and polity of the Church against which this revolt was directed. But he stood undaunted—prudent in counsel, energetic in action, and conciliatory in disposition. He was admirably fitted and adapted for the work. He possessed the moral qualities, and his prevailing piety. No one could charge him with rash enterprise, doubtful expediency, personal antipathies, excited words, retaliating acts, or irritating and aggressive measures. In the affairs of the Church he was the ready helper, the judicious counsellor, the pacificator. In the form of judicial authority, he wielded an influence far more effectual, desirable, and honorable. In person Mr. Romeyn was tall, large and well proportioned, erect and of command- ing presence, dignified and impressive. He was retir- ing, modest, stable, strong, and earnest. His piety was serene, profound, characteristic by his discipline, and he developed simplicity and tenderness. His mind was neither rapid nor brilliant nor original, but clear, comprehensive, well trained, and practical. In doctrine he was a strong Calvinist, holding the truth in love, and insisting more upon the spirit which is life than upon the letter which killeth." His own congrega- tions remained perfectly united and peaceful amidst the surrounding strife, and his ministry was blessed with a steady ingathering of souls and growth in grace. He preached from carefully prepared analyses, with fluent speech, terse expression, and a remarkable facility in the use of appropriate Scripture language. This was especially the ease in his communion services, when the Church members stood around successive tables, and, as he gave with his own hand the broken bread to each one, he accompanied it with some brief quotation from the Bible particularly adapted to the circumstances of the recipient. Here his pastoral tact and intimate knowledge of his flock were often manifested with a power and sweetness of expression which the Church never before experienced. In 1807 he was licensed to Rutgers College, and also founded the Literary Institute which the Greenbush and Schodac congregations maintained in the form of professorships. His only published matter consists of a manifesto in regard to a controversy, an address to theological students at New Brunswick (Magazine of the Re- formed Dutch Church, iv, 292), and some synodical re- ports. He died in perfect peace at Hackensack after a long illness of paralysis which had laid him aside from all pastoral work for eight years.

3. JEREMIAH, son of John and Juliana (McCarty) Romeyn, and nephew of the Rev. Thomas Romeyn, Sr., was born in New York Dec. 24, 1768. He was educated at Hackensack Academy under the celebrated Peter Wilson, L.L.D., and in theology under the Rev. Drs. Romeyn and McCarter. Before he was twenty years old he was ordained to the ministry, Nov. 10, 1788, and settled as pastor of a Dutch Church at Linlithgow, N.Y., Livingston's Manor. In 1806 he removed to Harlem, remaining there as pastor until 1814, when he went to Delaware County, serving churches at Oneonta, Kingston, and other places. The latter of which was resuscitated by his labors. In 1817 he removed to Woodstock, N.Y., on account of his daughter's health, but after a few months was himself taken with the disease of which he died, July 17, 1818. In 1797 he was appointed professor of Hebrew by the Gen-
Romeyn was born at Marbletown, Ulster Co., N.Y., Nov. 8, 1777. After a preliminary education in the Schenectady Academy, he entered the senior class of Columbia College at the age of seventeen, and graduated with high rank in 1795. The next year he united with his father's Church in Schenectady, and immediately began his theological studies with Dr. John H. Livingston, but completed them under his father. At twenty-one he was licensed to preach by the Classis of Albany, June 20, 1798. In 1799 he became pastor of the Reformed Church of Rhinebeck, Dutchess Co., N.Y., and labored there with increasing popularity and success until, in 1805, he took charge of the Presbyterian Church of Hackensack, N.J. His predecessor had resigned, and Dr. Romeyn had hoped to add him after a long period of division. This change enabled him to be with his aged father in his last days. After one year of labor, he went to the First Presbyterian Church in Albany, and sustained himself with great ability in that important Church at the capital of the state. Four years later (in 1808) he accepted a call of the newly formed Cedar Street Presbyterian Church in New York city, of which he continued the pastor until his death, which occurred Feb. 22, 1826, in the twenty-sixth year of his ministry. Dr. Romeyn inherited the nervous sensibility, and the acute, rapid, and decisive characteristics of his family. He was a man of medium size and fine appearance; quick in his movements, cultivated in manner, and earnest in his work. He was a great reader, and his fine library was filled with well-used works in almost all departments of literature. His theological attainments were general rather than profound. As a preacher, he was among the foremost of his day. Even when the New York pulpit contained such men as Dr. John M. Spence and Dr. Alexander M'Leod, he built up his new Church under the very shadows of their sanctuaries with complete success. With a congregation composed of the élite of the city, his popularity was maintained by discourses which always evinced careful preparation, and by a pastorate which was 아니라 excellence. He had such power to attach their people to their ministry as he. The greatest characteristic of his preaching was his magnetic power of attraction and impression. His sermons were not remarkable for analysis or discussion, but in their application, and especially in dealing with consciences, and in appeals to the emotional nature, he was a prince of preachers. His published volumes of sermons, like those of Whitefield, do not sustain his great reputation as a pulpit orator. Their power over his audiences was doubtless owing to his impressive delivery, which was generally pleasing, natural, and full of sympathy. At a rough place, his face, even in his whole frame, became instinct with passion, and then the eye kindled or became tearful, the very soul speaking through the body, that trembled with emotion or erected itself into an attitude of authority. The torrent of feeling often subdued and carried away his hearers with responding emotion. Dr. Romeyn, and young Mr. G. H. Spence, of the same class, have never raised a feeling in my mind as having strong points of resemblance (Dr. Vermilye, in Sprague's Annals of the Amer. Pulpit, iv, 228). His ministry was exceedingly blessed, and especially among the young. "His catechetical classes were crowded. Of a very large Bible class of young ladies every one became a professor of religion. More young men became ministers from his congregation than from any other." In addition to two volumes of Sermons (published in 1816 and reprinted in Scotland), Dr. Romeyn printed a number of occasional discourses, delivered upon national and other important occasions—among these was an Oration on the Death of Washing- ton (1800)—in the active and public movements of his day—a trustee of Princeton College from 1809; a principal agent in establishing the Theological Seminary in that place, and one of its first directors; moderator of the General Assembly in 1810, when he was but thirty-three years of age; and one of the found- ers of the American Bible Society in 1816. He was also its first secretary, for domestic correspondence. His health was not equal to the constant strain to which his zealous spirit, peculiar trials, and infirmities of mind and body subjected him. A tour in Europe in 1813 and 1814 brought transient relief; but for more than a year prior to his death his strength gave way, and he finished his course with joy, making "earnest interces- sion for his family and his flock," and supported by the most cheering heavenly prospects and triumphant faith in Christ.
tellest, mature and comprehensive judgment, great ex-
cutive ability, a remarkably retentive memory, a strong
will, and those marked qualities which made him "a
leader and commander in Israel." He was foremost,
with Dr. Livingston and others, in the movements
which secured the independence of the Dutch Church
from the Puritans, but made the church a free and
independent one. His high patriotism during the Revolu-
tionary war made him a conspicuous mark for Tory and British persecutions
and revenges. The British troops sacked his dwelling, and
destroyed or carried off all his furniture, clothing, books,
and papers. He was obliged to remove his family for a
while, but made frequent visits at his home, which were
always attended by danger; and at one time his life
nearly paid the forfeit from armed loyalists.
Among the prisoners who were carried off from Hack-
ensack when it was attacked by the British was his own
brother, who was held captive three months. He also
saved a number of men by hiding them in his own
house behind a chimney. During all this period he
was in intimate relations with some of the most distin-
guished officers of the army. "He was the counsellor
of senators, the adviser and compeer of the warriors of the
Revolution, and an efficient co-worker with the patriot."
His pulpit oratory was powerful and popular. He was
blessed with a happy power of expression, "a son of
consolation" also. His discourses were rich in
solid matter, enlivened with historical anecdote and
illustration. He went deep into his subject, and his
appeal to conscience and the feelings were at times
overwhelming. His manner was natural, easy, and
commanding. "His most expressive organ was his eye,
and when he was excited no one could withstand its
power." As a theological professor he gave full satis-
faction to his students and to the Church which
honored him. He was stately, reserved, affable, but not
familiar. Governor De Witt Clinton describes him as
having "something in his manner peculiarly dignified
and benevolent, calculated to create veneration as well
as affection, and it created an impression upon my mind
that can never be erased." Another of his friends, and
a student in theology (Dr. Jacob Brothhead), says that
"in his external form, his manly, noble stature, his ma-
jestic though sometimes stern countenance, he resem-
lled the illustrious Washington." Another says "he
was unquestionably the first man in our Church, among
the first in the whole American Church. His piety
was deep, practical, and experimental. He realized
more than others his own errors and weaknesses, and
trusted like a little child in the Saviour whom he
proclaimed. He died April 16, 1804, having been
in the ministry thirty-eight years. Elizabeth Brothhead, of Ulster Co., N. Y., by whom he had two children, a daughter and a son. The daughter
became the wife of Caleb Beck, of Albany, and mother
of three very eminent physicians—Dr. Theodoric
Ro- meyn, Lewis C., and John B. Beck. The son was the
Rev. John B. Romeyn, D.D., whose memorial is given
above.

6. Thomas, Sr., son of Nicholas Romeyn, was born
at Pompton, N. J., March 20 (O. S.), 1729. His father
being a farmer, he was brought up in the same calling
until April, 1747, when he began to study for the Gospel
ministry. He was a student at Princeton College under
the presidency of the Rev. Aaron Burr, D.D., and pur-
sued his studies with the Rev. Theodorus Frelinghuysen,
pastor of the Dutch Church in Albany, N. Y. Having
completed this course, and received a call from the
Dutch Church in Jamaica, L. I., he sailed for Europe
April 14, 1751, was examined, licensed, ordained, and
installed by the Classis of America to the pastoral office
in the Church in Jamaica, to which he returned Aug. 27,
1754. His first wife was Margaret, daughter of the
Rev. Theodorus Jacobus Frelinghuysen, by whom he
had one son, the Rev. Theodorus Frelinghuysen Romeyn.
She died at Jamaica in 1757. In 1768, on account of
difficulties in his congregation, he accepted a call to the
Church at Minisink, on the Delaware River. After a
pastorate of ten years he removed to Caughnawaga,
N. Y., in 1770, where he continued as pastor of the
Church until his death at Mayfield, Montgomery Co.,
Oct. 22, 1794. He married his second wife, Susannah
Van Campen, of Sussex County, N. J., Oct. 8, 1776.
Six sons were born to them. His name and his work
were known to four for the ministry—Theodorus Fre-
linghuysen, James Van Campen, Benjamin, and Thomas.
Benjamin died soon after graduating at Williams Col-
lege in 1796. The others were all ordained to the min-
istry of their mother Church. Theodorus F. died in
1786, and John B., in 1787, his seventh son. The pastor
of the churches of Bridgewater and Belminster, N. J.,
Their venerable father was the first. Low-Dutch minis-
ter who settled west of Schenectady, in the valley of
the Mohawk. His field of labor, being on the frontier,
embarked large portions of what are now Fulton and
Montgomery counties, surrounding the old church at
Caughnawaga (now Fonda). His duties were conse-
quentially very arduous and often dangerous, from expos-
ure to Indians and other pioneer trials. His missionary
spirit was accompanied by intense devotion to the lib-
eral views of the Copts, who advocated the education
and ordination of the clergy in this country, and inde-
dependent of both. In the early part of the Revolution
period of the Revolutionary war he was an enthusiastic
patriot. His residence on the frontier was the theatre of
frequent alarms, murders, and desolations, which often
interrupted, and at one time stayed, his ministerial lab-
ors. He was obliged to flee with all his family into the
interior for safety until the danger was passed. He
is represented to have been of a mild and gentle spirit,
"enduring hardness as a good soldier of Jesus Christ,"
and unostentations in his demeanor. As a preacher,
he was lucid and winning, strongly attached to the doc-
trines of grace as set forth in the standards of his
Church, and able in their defence. In the pulpit he was
solemn, earnest, and tender. His last illness, for more
than a year, was borne with meek submission to the
will of God, until his long ministry of forty years was
closed by death. His remains were buried in front of
the pulpit in the old church where for twenty-four years
he had preached the Gospel of Christ.

7. Theodorus Romeyn, Sr., was born at Caughnawaga
(now Fonda), N. Y., Feb. 22, 1777. Educated in the classics by his brother, Rev.
James V. C. Romeyn, and at the Schenectady Academy,
he graduated at Williams College, Mass., in Septem-
ber, 1796; studied theology with Dr. Theodoric Romeyn
in Schenectady; was licensed to preach by the Classis
of Albany, New York, on August 12, 1797, and
Died at Church of
Rensselaer (now Florida), N. Y., in 1800, having
the double charge of that congregation and the Second
Church of Schenectady. In 1806 he accepted the pas-
toral care of the churches of Niskayuna and Amity,
N. Y., and served them until 1837, when he was disabled
by a fall, which lambed him for life and compelled him
to abandon active duty as a settled minister. He had
a large, powerful frame, and was dignified, humorous,
courteous, and decided, as well as amiable and transpar-
ently honest. His intellect was vigorous, his judgment
almost uniformly correct, and his shrewd, pointed, quiet
humor gave great zest to his deliberate and thoughtful
speech. In the pulpit he was noted for theological ex-
actness of statement, for knowledge and apt quotations
of Scripture, for deep piety, and for practical usefulness.
His attainments were respectable, but his wide influ-
ce over a large section of the Church was chiefly due
to his thorough knowledge of "the uses of the tongue
and his skill as a presiding and peace-maker.
He died Aug. 9, 1850, revered by all who knew him, and
in "the full assurance of faith." He was a pillar of the
Reformed Church in the valley of the Mohawk.

See Sprague, Amuse of the Amer. Pulpit, iv., ix.; Cor-
win, Manual of the Ref. Church; Magazine of the Ref.
Dutch Church; Life of Dr. J. H. Livingston; Taylor,
RommeL, Dietrich Christopher von, the Hessian historian, was born April 17, 1791. At some time he was professor at Marburg, and from 1820 he resided at Cassel as president of the governmental archives. He died in 1859. His historical works are of great importance to Church history. He published, Philipp der Grossmütige, Landgraff von Hessen. Ein Beitrag zur genauen Kunde der Reformation und des 16. Jahrhunderts (Gießen, 1830, 3 vols.); Landgraff Philipp der friedhöfliche, und die Reformation (Darmst., 1845); Kurze Gesch. d. Hess. Kirchenverwaltung in d. Landgr. Philipp d. Grossmütigen, etc. (Cassel, 1817). See Winner, Handbuch der theolog. Literatur, i, 793; ii, 39; Eichholz, Biblioth. Theol. ii, 1082. (B. P.)

Ronmua, in Prussian mythology, is the sacred place of the ancient Prussians. A civil war had divided the native Prussians and the immigrant Skandians. Waidewurt and Grive, the first king and the first chief priest, had restored peace, and Grive afterwards assembled the people on a beautiful plain on which stood a massive oak with widely spreading branches. Before this tree he had placed three images, which he called Potrimops, Perkonos, and Pilkulos, and declared them to be the superior gods. Punishments were threatened and rewards promised in their names. Three niches were cut in the oak-tree which had been selected to become the home of the idols, and they were placed there with great solemnity. A pyre was then erected before the tree, from the top of which Grive exhorted the people, and on which sacrifices, including several inhumanable persons, were afterwards burned. A fearful thunder-storm, which the priest declared to be the voice of God, made the people tremble, and caused them to regard Grive with a dread that put them in mortal terror for centuries afterwards when they were obliged to approach him. The place in which this occurred was called Romowa. The priests continued to dwell and offer sacrifices there until the increased population and extension of its territories caused the establishment of other sacred oaks. Christianity ultimately came in and extirpated them all, so that the location of the original Romowa is no longer known.

Romulus, a prime character in Roman mythology; but which of the legends concerning this alleged founder and earliest king of their city was regarded as genuine by the Romans is wholly uncertain, since our information is based on very modern sources. The following tradition had, however, become quite generally established in the flourishing period of Roman literature: Two brothers belonging to the royal family descended from Numitor and reigning in Alba, who were named Numitor and Amulius, divided their inheritance so that Numitor received the throne and Amulius the treasure. Amulius, however, soon dethroned his brother, and made a vessel of his daughter Ilia, or Rhea Silvia, in order to guard against offspring on her part. She was, however, approached by the god Mars, and gave birth to the twins Romulus and Remus, whom they exposed on the Tiber. They were nourished by a shepherd and a bird, until found by the shepherd Faustulus, who bore them to his house and reared them with the assistance of his wife, Acca Larentia. On arriving at manhood, they discovered and killed Amulius and reinstated their grandfather Numitor. After this they founded a new city (Rome); but in the progress of the work a quarrel broke out between them, and Remus was slain by his brother's hand. Romulus now reigned alone in the new state, and after his death was venerated as a god under the name of Quirinus, because of the declaration of Julius Caesar that Remus had appeared to him in superhuman form. A bronze group of the wolf suckling the twins is still preserved in the Capitoline Palace, and constitutes one of the most eminent relics of ancient Roman art.

Ronmus, in Greek mythology, was the son of Ulysses and Circe.

Ronde, Lambertus de, a minister of the Reformed (Dutch) Church in America, was colleague with Johann Luykens, the College of New York, and successor to the venerable Guilerus du Bois from 1751 to 1784. With his associate Ritzema he was thoroughly educated in one of the universities of Holland, and brought to his pulpit ample preparations. When driven from New York during the Revolutionary war, he supplied the Church of Schaghticoke, near Albany, where he resided during the rest of his life, being too old to resume his labors. He preached only in the Dutch language, and was the leading spirit in opposition to the introduction of English preaching, and in the lawsuit which resulted in favor of the consistory and against the Dutch preachers who had to lose their church. Notwithstanding all this, his character was always venerated, and he died in a good old age at Schaghticoke, his place of voluntary exile, in 1795. The consistory of the Church in New York gave him an annuity of £200 for life after he left their active service, and the same was given to his aged colleague Ritzema, who died at Kinderhook, N. Y. Mr. de Ronde was a man of respectable attainments and abilities as a preacher, but was not so eminent for these things as he was for his part in the ecclesiastical controversies in that transition period of the Dutch Church. See De Witt, Hist. Discourse, p. 70; Gunn, Life of Livingston, p. 98; Corwin, Memoirs of the Ref. Ch., p. 76; and Life of De Witt, p. 130.

Roney, Moses, a minister of the Reformed Presbyterian Church, was born in Washington County, Pa., Sept. 20, 1804. In his fourteenth year he entered the grammar-school of Jefferson College, and graduated from the college in 1823. He spent some time in teaching in Baltimore, and then pursued his studies under Dr. Wilson, receiving his license June 8, 1829. He was ordained and installed pastor in Newburgh, N. Y., June 8, 1830. In the great controversy concerning the relations of the Church to the authorities of the United States he opposed the proposed changes. In 1836 the Synod chose him to be editor of a contemplated magazine, which first appeared in March following as The Reformed Presbyterian, and which he conducted, with the exception of a single year, until it reached the middle of the eighteenth volume. In 1848, on account of ill-health, he resigned the editorship, and the next year took charge of the literary institution in Allegheny, Pa., which he retained until nearly the time of his death (July 8, 1854). See Sprague, Annals of the Amer. Pulit., ix, 79.

Rongala, in South-Sea Island mythology, is the name of the supreme being or highest god among the inhabitants of the Caroline Islands, in the Pacific Ocean.
Ronsdorf Sect. This name has been given to the clique of fanatics founded by Elias Eller (q. v.) at Elberfeld, and subsequently transferred to Ronsdorf, in the duchy of Berg, Germany.

Rood (Saxon), a cross or crucifix. The term is more particularly applied to the large cross erected in Roman Catholic churches over the entrance of the chancel or choir. This is often of very large size, and when complete is, like other crucifixes, accompanied by the figures of St. John and the Blessed Virgin, placed one on each side of the foot of the cross; but these are often omitted. Lights are frequently placed in front of these roods, especially on certain festivals of the Church.

Occasionally roods or crucifixes are found sculptured outside of churches, on churchyard crosses, on wayside crosses, and at the entrance of chantries and oratories. There is a much-defaced example at Sherborne Minster, in Dorsetshire.

Many churches were dedicated to the holy rood, as the abbey near Edinburgh, and at Dagleingworth, Cærmarthen, Betws-y-Grôg, Capel Christ, Southampton, Wood Eaton, Swindon, and others. The Church of SS. Vincent and Anastasius, after it received the addition of a transept, was called Holy Cross, from its new shape. The rood was set before the feet of the dying, stretched on straw or ashes, emblems of mortality, and also, Beleth says, erected at the head of graves.

ROOD-ALTAR, an altar standing under the rood-screen. In large churches there were generally two, on each side of the entrance into the choir.

ROOD-ARCH, the arch which separates the choir from the nave of a cathedral or church, under which the rood-screen and rood were anciently placed.

ROOD-BEAM, or ROOD-LOFT. The rood spoken of above was supported either by a beam called the rood-beam, or by a gallery called the rood-loft, over the screen separating the choir or chancel of a church from the nave. Rood-lofts do not appear to have been common in England before, if so soon as, the 14th century. They were approached from the inside of the church, generally by a small stone staircase in the wall, which is often to be found in churches which have lost all other traces of them. The front was frequently richly panelled, and the under-side formed into a large covered cornice, or ornamented with small ribs and other decorations, connecting it with the screen below. Although most of the rood-lofts in England have been destroyed, a considerable number of examples (more or less perfect) remain, as at Llanvibryn, Holywell, Gwydir, Bangor, Denbigh, Trefor, Conwy, Machynlleth, and Wrexham, Somersetshire; Newark, Nottinghamshire; Charlton-on-Ouse, and Handborough, Oxfordshire; Merevale, Knowle, and Worm-Leftwich, Warwickshire; Flamstead, Hertfordshire; Offendal, Bradninch, Collumpton, Dartmouth, Kenton, Plympton, and Harland, Devon etc. The rood-loft was occasionally placed above the chancel-arch, as at Northleach, Gloucestershire. It sometimes extended across the first arch of the nave, as in Castle Hedingham Church, Essex. There are some very fine and rich rood-lofts in Wales, in churches which are in other respects plain and poor.

ROOD-BOWL, a bowl of latten or other material, with a pricket, the centre, to hold a taper for lighting the rood-screen.

ROOD-CHAINS, those chains by which, in the case of large figures placed on or beside the rood, such figures were supported. These chains were inserted in the rood in front of the chancel arch. Remains of such chains are to be seen at Collumpton, Devonshire.

ROOD-CLOTH (or Rode-Clotha), the veil by which the large crucifix or rood, which anciently stood over the chancel-screen, was covered during Lent. Its color in England was either violet or black, and it was frequently marked with a white cross. We find examples of this cloth figured in medieval illuminations.

ROOD-DOORS, the doors of the rood-screen, separating the nave from the chancel.

ROOD-GALLERY. See ROOD-LOFT.

ROOD-GAP, the space under a chancel-arch.

ROOD-LIGHT, a light, whether from a mortar with taper or from oil-lamps or cressets, placed on or about the rood-beam. Such were kept continually burning in ancient parish churches.

ROOD-LOFT. See ROOD-BEAM.

ROOD-MASS, a term sometimes applied (1) to the daily parish mass said in large churches at the altar under the rood-screen; and (2) sometimes to the mass said on Holy-cross Day, or on the feast of the Exaltation of the Holy Cross.

ROOD-SAINTS, images of the Virgin Mary and of John the beloved disciple, which were placed on each side of the rood.

ROOD-Screen, a screen separating the choir or chancel of a church from the nave. Above it was a gallery supporting the rood, and called the rood-loft. The rood-screen had no upper loft, or solar. In early times it had three doors, one facing the altar, the second fronting the gospel side, and a third the epistle side. Before it veils were dropped at the consecration.

ROOD-STAIR, the staircase winding up to the rood (q. v.).

ROOD-STEPELE, or ROOD-TOWER. This name is sometimes applied to the tower built over the intersection of a crucifix form church.

ROOD-STEPS, the steps into a choir or chancel, commonly found under or immediately before the rood-screen.

Rood, Anson, a Presbyterian divine, was ordained at New Haven, Conn., in 1829. He took up his residence in Philadelphia, Pa., where he died in 1857. He published, A Church Manual for the Members of the Presbyterian Church (Philadelphia, 1843, 8vo); several pamphlets and papers on theological subjects, temperance reform, etc.; and edited a daily paper in Philadelphia. See Allibone, Dict. of Brit. and Amer. Authors, q. v.
The roofs of dwelling-houses in the entire East, because of the generally dry weather, are made flat and are surrounded with a guard or railing (גֶּפֶן, מַעַל). See Deut. xxii, 8, where the parapet is insisted on, and comp. Thomson, Land and Book, i, 48 sq.; 2 Kings, i, 2; comp. Mishna, Moed Katam, i, 10; Michaelis, M. E. R. iv, 356). Ancient only buildings intended for display had raised roofs; such as temples (Cicerone, 

Oront., iii, 26; Philo, ii, 43; Sueton. Claud. xvii). So the Temple in Jerusalem, we are told by Jewish writers, was arched or vaulted, so that no one should repair thither for the same purposes as to the roofs of the houses (comp. also Jerome, Ad Santaem et Fratrem, p. 661). In the East the roof consists usually of a water-proof tiling (Maritii, Trav., p. 246 sq.; Tavernier, Voyages, i, 168) or of stones (Vitriv. ii, 1, 5; Schweiger, Reis. p. 263), and is raised a little at one side or in the middle to shed water (Pliny, xxxvi, 62; Burckhardt, Arab. p. 152). Pipes are also used to convey the water into cisterns (see Maimon. ad Middoth, vi, 6). A kind of weak, perishable grass commonly grew up between the tiles (Ps. xxxix, 6; 2 Kings, xix, 26; Isa. xxxvii, 27; see Shaw, Trav. p. 210). The roof of Dagon’s temple (Judg. xvi, 27) is said to have been crowded with 8000 persons to behold Samson’s feats; but this can hardly mean the top of the temple, because the persons there could not see what was passing within. It appears rather to have been a loft or gallery running around the top of the building inside, and supported by pillars with two main posts, in the middle of the temple. A very usual kind of roof is constructed in the following manner: The beams are placed around three feet apart; across these sticks are arranged close together, and thickly matted thorn-bush; over this is spread a coat of thick mortar, and lastly the marl or earth, which covers the whole. A large stone roller is kept on the top of the house for the purpose of hardening and flattening the layer of earth, to prevent the rain from penetrating. Roofs, however, are often of a very inferior description to this. They are at times composed of the palm-leaf, and in other cases are made of cornstalks or brushwood, spread over with gravel (Robinson, Biblical Res. i, 243; ii, 279), or of reeds and heather with a layer of beaten earth (Hartley, Researches in Greece, p. 240). The roofs of the great halls in Egypt are covered with flagstones of enormous size. Parapets are uniformly placed around the roof, for the purpose of guarding against accidents by falling (Wilkinson, Anc. Egypt. ii, 122). The roof was much used by the Hebrews, as it still is in Eastern nations. It was often resorted to get fresh air, by convalescents and others (2 Sam. xi, 2; Dan. iv, 26; comp. Buckingham, Mosop. p. 70; Thomson, Land and Book, i, 49 sq.; Shaw, Trav. p. 190, 297, where it is a playground for children). In summer the people slept there (1 Sam. ix, 26; comp. Tavener, ii, 168; Buckingham, Mosop. p. 386; Rosenmuller, Morgenl. iii, 86; Morier, Second Journey, p. 280; Robinson, iii, 242). It was sought as a place for quiet conversation (1 Sam. xxv, 25), for undisturbed lamentation (Isa. xxv, 8; Jer. xxviii, 38), for building "booths" (q.v., Neh. vii, 16), and for various religious actions (2 Kings xxiii, 12; Jer. xix, 13; Zeph. i, 5; Acts x, 9), perhaps with the feeling of being raised nearer to heaven and to God. Acts of a public nature were transacted there (2 Sam. xvi, 22), and announcements made (Matt. xx, 27; Luke xxi, 26; comp. Josephus, Wars ii, 21, 5; Talmo. Babil. Sheb. fol. 35, 2; comp. Lucian, Ver. Hist. ii, 46). Nor is this inconsistent with its use for secret interviews, before named, as these took place when neighbors were supposed to be occupied; yet the "upper chamber" (q.v.) was certainly more commonly sought for. Again, the roof was a lookout over the street (Judg. xvi, 27; 1 Sam. x, 10; comp. Shaw, Trav. p. 190), a place for exposing clothes and household stuff to the air (Josh. ii, 6; comp. Mishna, Toroth, ix, 6; Mikraoth, ii, 7; Machir. vii, 2; Maaser, i, 6, 3; Megilla, iii, 3; Menuch., viii, 4); a commanding position for defense against attacks from below (Judg. ix, 51; 2 Macc. v, 12; comp. Josephus, Ant. xiv, 15, 19; War, iv, 1, 4; Schweiger, Reis. p. 268). But a constant residence on the roof, in loneliness and exposure, is a forcible image of a sorrowful life (Prov. xxxi, 9; comp. xxxv, 24). It was usual to have two flights of steps to ascend to the roof; one within the house and one in the street. It was easy, too, to climb over the railing of the roof and thus pass from that of one house to its neighbor; or from house to house along a whole street (Matt. xxiv, 17; Mark xiii, 15; Luke xvii, 31; comp. Flamin. Reisebesch. p. 10; Russell, Allopa, i, 45; Josephus, Ant. xiii, 5, 3; Mishna, Bab. Menaia, fol. 88, 1; Barhebr. Chron. p. 170). Thus, too, it was easy to pass down from the roof into a house (see Lightfoot, Heb. d. 601). The parapet of the temple, last mentioned, is 4 is most naturally explained by supposing Jesus to have been in the chamber immediately under the roof. The people took up the floor of the roof (comp. Josephus, Ant. xiv, 15, 12) and let down the sick man (Stauros, Leb. Joz. ii, 61), supposes the usual mode of access from the roof to the upper chamber to be used, which contradicts Mal. iii, 4. This is a parallel passage, v. 19. If we understand the mitzoth (דִּשְׁפָּה), as our version has it, or rather bricks, must mean the guard wall around the roof (Faber, Arch. i, 419), or the cornice (Höst, Nörr. v. Maros, p. 264). But it is doubtful whether the latter was common in Palestine; and the expression into the mitzoth (comp. Luke iv, 35; Mark iii, 3; iv, 60; John xx, 19) does not admit the above interpretation (Shaw, Trav. p. 186 sq., gives an explanation which does not suit the passage). A literal taking-up of the roof, however, would be but a trifling matter, and would involve no injury to the building. They were like the modern Arab houses in that vicinity. They are very low, and the roof is formed chiefly of twigs and earth, on beams some three feet apart. It is very common to remove part of this to let down goods, etc. (see Thomson, Land and Book, ii, 6 sq.); the Talm. Bab. Moed Katam, xxxv, 1, says, when Huna died, his heir could not pass the door, and it was thought best to let it down through the roof. See Mill, Diss. de Epidemias Heb. Tectis, in Oehlrich’s Coll. Opusc. Hist. Phil. Theol. i, ii, 573 sq.; Batus, Diss. de Tectis Heb. Retectis (Viteb, 1696); Faber, Arch. i, 417 sq.; Hackett, Ißur. of Script. p. 70, 71, 72, and on Prov. xxvii, 15, p. 85.
ROOF

ROOF, in architecture, is the external covering on the top of a building; sometimes of stone, but usually of wood overlaid with slates, tiles, lead, etc. The form and construction of the timber-work of roofs differ materially according to the nature of the building on which it is to be placed, and any attempt to notice all the varieties would far exceed the limits of this work. The main portions of the framing, which in most cases are placed at regular intervals, are each called a truss, principal, or pair of principals. These, in ornamental open roofs, are the leading features, and in some ancient roofs are contrived with an especial view to appearance. The accompanying diagrams of two of the simplest kinds of modern roofs will serve to explain the names of the most important timbers: a king-post roof has one vertical post in each truss, a queen-post roof has two. Medieval roofs vary so much in their structure, on account of the ornamental disposition of the pieces, that it is not easy to establish a universal nomenclature for them. Many names of beams and timbers occur in old contracts of which the original application is often uncertain.

The Hammer-beam roofs contain most of the peculiarities of structure that distinguish the medieval roofs from the modern roofs, and the following nomenclature may be adopted in describing them: Sometimes one hammer-beam is repeated over another, forming, as it was, two stories. It is then called a double hammer-beam roof, and the nomenclature runs: lower hammer-beam, upper hammer-beam, upper hammer-brace, lower side-post, upper side-post, etc. It must be remembered that all upright pieces may be called posts, with an epithet, if necessary, e.g. Pendant-post. Inclined pieces, if not rafters, are braces, and commonly derive their epithet from the piece under which they are placed, or which they principally stiffen, as collar-brace. Ashlar pieces are fixed to every one of the rafters in most medieval roofs, but they are sometimes concealed by cornice-mouldings and frieze-boards. The example from Dorchester shows the hammer-beam construction with collar-brace, side-post, etc.

Hammer-beam Roof, North Aisle, Dorchester, Oxfordshire.

Of the construction of the wooden roofs of the Ancients very little is known, but it was probably of the most inartificial kind, and judging from the form of their pediments, the pitch of them was low. Some small buildings still retain their original roofs of marble, as the Tower of the Winds, and the Choragic Monument of Lysicrates at Athens. The Mausoleum of Theodoric at Ravenna has a domed roof, formed of a single block of stone, nearly thirty-six feet in diameter.

Saxon roofs were elevated, but to what degree we have no certain account; neither is there satisfactory evidence of their internal appearance. The illuminations in manuscripts seem to represent them as often covered with slates, tiles, or shingles. Norman roofs were also raised, in some cases to a very steep pitch; but in others the elevation was more moderate, the ridge being formed at about a right angle. It does not appear that at this period the construction was made ornamental, although, doubtless, in many cases the framing was open to view. The covering was certainly sometimes of lead, but was probably oftener of a less costly material.

Early English roofs were generally, if not always, made with a steep slope, though not universally of the same pitch. Sometimes the section of the roof represented an equilateral triangle, and sometimes the proportions were flatter. A few roofs of this date still exist, as on the nave of Hale Owen Church, Shropshire: this originally had tie-beams across it, and under every rafter additional pieces of timber are fixed, which are cut circular, so that the general appearance is that of a series of parallel ribs forming a barrel-vault. This seems to have been a common mode of improving the appearance of roofs in this style before any important ornaments were applied to them. The additional pieces under the rafters were usually either quite plain or only chamfered on the edges. A moulded rib sometimes ran along the top, and a cornice next the wall-plate, both of which were generally small. The tie-beams also were frequently moulded.

When first the approach of the Decorated style be-
ROOF

gas to exercise an influence, the roofs, though still of the same construction, became somewhat more ornamental. There are also roofs existing of this date, and probably some earlier, in country churches, the insides of which are formed into a series of flat spaces, or cants. They are usually quite plain, with the exception of the tie-beam and cornice, which are frequently moulded, and the king-post, which is commonly octagonal, with a moulded capital or base. Of a later period, roofs of this kind are extremely common in some districts, but they are generally to be distinguished from the earlier specimens by being arranged in seven cants instead of six. Of the old description good examples remain at St. Mary's Church, Kent, and on the south side of Merrow Church, Surrey. Most of these roofs are now ceiled, but probably many of them were originally open.

As the Decorated style advanced, the leading timber of the principals were often formed into an arch by the addition of circular trusses under the tie-beams, the beams themselves being also frequently curved. The spandrels formed by these trusses were very usually filled with pierced tracery, and the timbers generally were more moulded and enriched than in the earlier styles. Where the lines of mouldings were interrupted, they very commonly terminated in carved leaves or other ornaments.

Sometimes the tie-beams were omitted in roofs of high pitch, but the principals were generally arched. The roofs of domestic halls, in the Decorated style, appear to have been more enriched than those of churches: that of Malvern Priory had a variety of cross-trusses above the tie-beams cut into ornamental featherings; that of the bishop of Canterbury's palace at Mayfield, Sussex, was supported on stone arches spanning the whole breadth of the room (about forty feet). This kind of construction is also partially used in the hall at the Mote, Ightham, Kent. This kind of construction, a wood roof supported on stone arches instead of the large timbers necessary for the principals, seems to have been more common than is generally supposed, and at all periods.

In the Perpendicular style hammer-beam roofs were introduced (one of the finest specimens of which is that in Westminster Hall), and, together with them, most numerous varieties of construction for the sake of ornament. These are far too manifold to be enumerated; many specimens exist in churches and halls, some of which are extremely magnificent, and are enriched with tracery, featherings, pendants, and carvings of various kinds, in the greatest profusion. Many roofs in this style were nearly or quite flat; these, when plain, had the timbers often exposed to view, and moulded; in other cases they were ceiled with oak and formed into panels, and were usually enriched with bosses and other ornament of similar description to those of the higher roofs; good examples remain at Cirencester Church, Gloucestershire.

On halls hammer-beam roofs were principally used, but on churches other kinds of construction were more prevalent. There are some medieval buildings, principally vestries, apses, and porches of churches, which are entirely roofed with stone. They are generally of high elevation, and often have ribs answering to the rafters in a wooden roof. They occur at all periods, and in some cases may have been erected for protection against fire; in other cases, when the material was suitable, perhaps from economy.

The name of roof is often applied to what are, in fact, ceilings having an external covering, or outer roof, distinct from that which is seen. Vaulted roofs are also frequently spoken of, but a vault usually has an outer roof over it, and is more properly a vaulted ceiling. See Parker, Gloss. of Architect. s. v.; Chamber's Encyclop. s. v.; Walcott, Soc. Archæol. s. v.

Room is employed in the A. V. as the equivalent of no less than four Heb. and eight Greek terms. The only one of these, however, which need be noticed here is προκλησία (Matt. xxiii. 6; Mark xii. 39; Luke iv. 7; 9; xx. 40), which signifies, not a "room" in the sense we commonly attach to it of a chamber, but the highest place on the highest couch round the dinner or supper table—the "uppermost seat," as it is more accurately rendered in Luke xi. 43. See Meal. The word "seat" is, however, generally appropriated by our translators to καθήμενος, which seems to mean some kind of official chair. In Luke iv. 9, 10, they have rendered παραστάς by both "place" and "room." See also Upper Room.

The convenience of dividing habitations into separate apartments early suggested itself. We read of various kinds of rooms in Scripture—bedchamber, inner chamber, upper chamber, bride-chamber, guest-chamber, guard-chamber, of the king's house. In early times the females and children of the family slept in one room, on separate beds, and the males in another. See Chamber.

Roos, Johann Friedrich, only son of the following, was born in 1759, and died in 1826, at Marbach, where he had held the position of dean. He wrote a History of the Reformation and a Church History, neither of which was based on original sources, and both of which have been superseded by more modern works. See Herzog, Real-Encyklop. s. v.

Roos, Magnus Friedrich, the last of the series of clergymen in Württemberg who during the 18th century promoted the independent development of Pietism (q. v.), and exercised an important influence over the clergy and churches of Württemberg against the rationalistic and other movements of North Germany. He was born at Sulz-on-the-Neckar, Sept. 6, 1727, passed through the schools of Württemberg in regular course, and in 1749 became vicar at Owen. After filling various ministerial stations in Tübingen, Stuttgart, etc., he was made pastor at Linstau, near Tübingen, in 1767, where he was brought into contact with the notabilities and students of the university, and sought to benefit the latter by the delivery of private lectures on Biblical

St. Mary's, Devizes, Wilts, cir. 1450.
theology. In 1784 he was appointed to the prelature of Anhauzen, which gave him a seat in the district gov-
ernment, and in 1787 he was promoted to a place in the national diet, which diverted his attention largely to-
wards political affairs. He preached his last sermon to
his people on Christmas-day, 1802, and died March 19,
1803.

Roos was emphatically a man of one book—the Bible. He was not the representative of any scientific idea
in theology, nor a rhetorician who attached importance
to the elegancies of style. His theology was contained in
the sentences of the Bible, so that nothing is left for
the theologian to do beyond conforming to what is there
expanded, collecting what is scattered, and converting
the whole directly into faith and life. As a dogmatist
he simply brought together the doctrines of Scripture,
holding that they require no elaboration in order to ap-
pear as a faultless whole. As an expositor and polemic
he displayed an utter incapacity to appreciate difficulties,
and accepted all the statements of the Bible with
unquestioning faith; and in that one of his works which
paraktes most largely of a scientific character, the Fun-
damenta Psychologicum Sacrorum (Tübingen, 1769; Stutt-
gart, 1837), it simply gathered from the Scriptures
every passage in which a psychological term occurs, and
given the specific and general meaning of the terms and
phrases so obtained. He held that the truth was fully
and appropriately given in the Bible, and therefore did
not attempt a thorough system of psychology. He also
gave attention to the times in which he lived and to
the impending future, taking the Apocalypse for his
guide and following the interpretations of Bengel (q.v.),
though without accepting the dates of that scholar for
the end of the world (e.g. 1836), and without placing
implicit reliance on the results of his investigations.

The writings of Roos were very numerous, and have
no importance for our times. The principal ones are the
Funde. Psych. Sacr., already mentioned;—a de-
vozialional manual entitled Christliche Gedanken. v. d.
Verschiedenheit u. Ei-
nigkeit d. Kinder Gottes (1st ed. 1764; new [34] ed.
1850).

Roosevelt, James Henry, Hon., a distinguished philantrophist, was born in New York city, Nov. 10, 1800.
He was a descendant of the well-known and wide-spread family of his father, James Roosevelt, was an
attorney of the New York bar, educated at Columbia
College. James Henry was left a large property by his
father, and in early life manifested his benevolence by
making an interest in charitable institutions, particular-
ly the Leake and Watts Orphan Asylum, of which he was
for twenty-three years the treasurer. He never
married, and left a quiet and frugal life. As his nat-
ural heirs were wealthy and did not need his property,
his determination to do it benevolent objects. In
March, 1854, he made his will, and after certain be-
quests, gave the residue of his estate to five incorpora-
tions in the city of New York, known as the Society of
the New York Hospital, the College of Physicians and
Surgeons, the New York Eye Infirmary, the Demit Island,
and the New York Institution For the Blind. It also
provided for the establishment in the city of New York of a hospital for the reception and relief of sick and
diseased persons, and for its permanent endow-
mint. The charity was to extend to all sick, without
limit or restriction of any kind, and without distinction
as to race, sex, color, or religion. The hospital, which
occupies an entire block between Ninth and Tenth
avenues, was in due time erected, and was formally opened
Nov. 2, 1871. The generous founder died Nov. 30, 1883.
He left his fortune in his wife’s name, with the
belief, subline in his behalf.
ROQUELAURE 125 ROSARY

early in the 14th century; and having undertaken a
pilgrimage to Rome, was surprised on his way through
Italy by an outbreak of the plague at Piacenza. He
laboried with generous zeal for the victims, fell sick,
was abandoned by men, but a dog licked his sores. He
recovered his health, returned to France, and after a
life of great sanctity died at Montpellier, probably in
1351.

Roque laure, Jean Armaud de BRESSOUJOUS,
Count of, a French prelate, was born at Roque laure in
1231. Of a noble family, he entered the Church when
quite young, was doctor of theology at the age of twenty-
six, and vicar-general of Arras when, in 1574, he re-
becived the bishopric of Senlis. In 1674 he was first
almoner of the king, in 1676 counsellor of state, in 1676
archbishop of St. Omer, and in 1717 member of the
Academy. He was one of the few bishops who re-
mained in France after the civil oath was required, but
did not yield to the constitution of 1790. During the
reign of Terror he retired to Arras. He resigned his
see of Senlis, but was in 1802 made archbishop of Ma-
lines. In 1808 he received the pall of St. John of
Bethlehem, and spent the remainder of his life in Paris. He
died of old age, April 23, 1818. His writings are, Oraison Funebre de la Reine d'Espagne (Paris, 1761); — Oraison Funebre de Louis XV (ibid. 1774); — Mandements, and
Letters to the clergy.

Roques, Pierre, a Protestant French theologian,
was born at La Canne, July 22, 1685. His parents were
obliged to leave France on account of their faith, and
Roques was educated in Switzerland, at Geneva and
Lausanne. He was ordained in 1709, and in 1710 be-
came pastor of the Protestant French Church at Basle,
where he died, April 13, 1748. His principal writings are,
Le Pasteur Eucaristique (Basle, 1729), trans. into
German (Halle, 1741-44); — Elements des Verites Bis-
 SPIRITUALES, etc. (Bris, 1729); — Lettres a une
Infirmiere de l'Eternelle Misericorde (Lausanne, 1730-35); — Les Devoirs des
Sujet de Basle (1737); — Sermons sur Divers Sujets de Mort (ibid. 1730), trans. into
German (Halle, 1731); — Le Vrai Pieteisme (Basle, 1731) — Traite des Tribus de
Judith (Bastard, 1738). Besides these are scattered
pieces in several works, an edition of the Dictionnaire de Montmorin (ibid. 1745); and one of
Martin's Bible (ibid. 1736). He continued with Beau-
sobre the Sermons of Saurin, and revised the French
translation of Hubner's Geographie (ibid. 1747). See
Frey, Vie de P. Roques; Hang, La France Protestant.

Roquette, Gabriel de, a French prelate, was born at
Toulouse in 1632. After finishing his studies he went to
Paris, where he soon obtained ecclesiastical preferment, became abbe of Grandval, prior of Char-
lieu and of St. Denis de Vaux, vicar-general of Armand,
and abbe of Cluny. In 1666 he was made bishop of
Autun, and in 1669 founded the Hospital of St. Ga-
briel in that place. He resigned his see in 1702 in
favor of his nephew, Bertrand de Senuaux. He died at
Autun, Feb. 29, 1707. Roquette was an ambitious
man, a slave of the Jesuits, and devoted to the in-
terests of cardinal Mazarin. He left a work entitled
Ouvrages pour le Retablissement de la Doctrine Ec-
clcsiastique (Autun, 1669-74), and an Oraison Funebre
dame Marie Martinozzi, Princesse de Conti (Paris,
1674).

Rosa, St. See Rosa of Lima.

Rosa of Lima, the most noted of Peruvian saints, was
a beautiful virgin, born in 1586 at Lima, who early
displayed great fortitude in the enduring of physical
pain, and manifested a strong inclination towards an
ascetic life. Her parents permitted her to become a
Dominican nun; but having entered a church to pray
while on her way to the convent, she found herself
unable to proceed farther, and consequently became
a hermit, living in a cell which she built in the

garden belonging to her parents. She inflicted cruel
bodily mortifications on herself, and died in 1617.
She was buried in the Dominican church, and was
canonized in 1671. She ranks as the patroness of
the state, and is annually commemorated, with great
solemnity and pomp, on Aug. 26. See Acta SS. for

Rosa of Viterbo, a hermit attached to the order of
Franciscans, though without having been formally
received. She occupied a cell in the house of her parents,
and was accustomed to preach repentance, standing
with crucifix in hand in the public streets. She was
temporarily banished from Viterbo, but eventually
re-called and received with enthusiasm. She died in
A.D. 1292, aged about eighteen. See Acta SS. for
Sept. 4.

Rosa, Salvator, an Italian painter, was born at
Aranella, near Naples, June 20, 1615. He was brought
up under Francisco Francanzano, but was obliged to get
his living by selling his pictures upon the street.
After his father's death, he went with Ribera to Rome, at
which city he remained four years, when cardinal Bran-
cacci carried him to Viterbo, where he painted several
pieces. He afterwards went with Perrino to Loreto, then
of Medici to Florence, and stayed nine years in this city.
He finally fixed his residence at Rome, where he died,
March 15, 1673. Among his most celebrated works are,
the Calixtine Conspiracy: — Saul and the Witch of
Endor: — Attilas Regulus, and altar-pieces. He was also
a good composer of music. See lady Morgan, Life and
Times of Salvator (London, 1824, 2 vols.); Cantu, Salvator
Rosa (Milan, 1844); Reynolds [Sir Joshua], Works.

Rosalia, Sr., the greatest of Sicilian saints, is said
to have died between 1160 and 1180. Her father was the
count Sinibald of Quisisana and Rosia, and was de-
scented from the ancient kings of Sicily. She lived for
a time on Mount Quisisana in the character of a hermit,
but afterwards on Mount Pelegrino, near Palermo. It
is alleged that her body was found in 1624, together
with an inscription on Mount Quisisana narrating her
descent and sojourn in an adjoining cave. A pestilence
ceased to prevail at the time her body was found, and
this fact was attributed to her intercessions, which may
account for the veneration she receives. Her day is
Sept. 4, and is observed with much pomp in Palermo,
where one of the features being a procession in which a colo-
nal statue of the saint is carried about. See Acta SS.
for Sept. 4.

Rosario, Jeronimo, an Italian ecclesiastic and writer,
was born at Pordone in 1485. He was nuncio from
pope Clement VII to Hungary, and died in 1556. He
wrote a curious treatise — Quod Anima In Bruta serpe
Ratione utamur melius Homine (" That brutes often rea-
son better than man"") (1648).

Rosary (Rosarium). This is a Roman Catholic
instrument, composed of a number of larger and smaller
beads strung on a cord, which serves among Romanists
in the repeating of a definite number of Pater-
nosters and Ave-Marias. In its wider meaning the
word denotes the worship in which the rosary is
employed. The custom of repeating the Lord's Prayer a
number of times originated among the early hermits
and monks, and it is stated by Palladius (Aenon., cap. 35) and Sozomen (Hist. vi, 29) that the abbot Paul
of the desert of Phierme repeated the Pater-noister 500
times, and at each repetition dropped a small stone into
his lap. The Hail-Mary was added in the 11th cen-
tury, but did not attain its completed form until the
16th. A combination of the Lord's Prayer with the
Credo and the angelical extolling in this worship occurs
as early as 1156 in the Statuta Communia of bishop
Odo of Paris.

The rosary is accordingly of modern origin, and all
opinions which assign it to a high antiquity are false.
Some modern inquirers hold that it was brought from
said on Mondays and Thursdays through the year, and daily from the first Sunday in Advent to the Feast of the Purification. The five Sorrowful Mysteries are said on Thursdays and Fridays through the year, and daily from Ash Wednesday to Easter Sunday. The five Glorious Mysteries are said on ordinary Sundays and Feasts, and on Holy Thursdays through the year, and daily from Easter Sunday to Trinity Sunday. The manner of saying the rosary on the beads may be understood by the accompanying cut, with the following directions (see Barnum, Romandia, p. 480):

On the cross say the Apostles' Creed. On the next large bead say the Lord's Prayer. On the next small bead say the Hail Mary, thus: "Hail Mary, full of grace, the Lord is with thee: blessed art thou among women, and blessed is the fruit of thy womb, Jesus. Who may strengthen our hope." Then, at the end of every decade, say, "(5th) Glory be to the Father, and to the Son, and to the Holy Ghost, as it was in the beginning, is now, and ever shall be, world without end. Amen." On the second small bead repeat the Hail Mary, substituting for the above italicized words, "Who may strengthen our hope." On the third small bead repeat the Hail Mary, substituting in the same place, "Who may enter our charity." Then, at the end of every decade, say, "(6th) Glory be to the Father, etc." On the next large bead, say the Lord's Prayer. In saying the ten Hail Marys for the first Joyful Mystery, substitute for the above italicized clause, "Who was made man for us:" in the second, "Whom thou didst carry to St. Elizabeth's;" in the third, "Who was born in a stable for us;" in the fourth, "Who was presented in the Temple for us;" in the fifth, "Whom thou didst find in the Temple;" in the sixth, "Joyful," etc. At the end of the five Joyful Mysteries, and at the end of the five Sorrowful and five Glorious Mysteries, say the Salve Regina, thus: "Hail, holy Queen, Mother of mercy, our life, our sweetness, and our hope. To thee do we cry, poor banished children of Eve. To thee do we send up our sighs, mourning and weeping in this valley of tears. Turn, then, O most gracious advocate, thine eyes of mercy towards us and after this our exile in order to show us the blessed fruit of thy womb, Jesus. O clement! O pious! O sweet Virgin Mary! Y. V. Pray for us, O Holy Mother of God." 

R. That we may be made worthy of the promises of Christ.

In saying the five Sorrowful Mysteries, the clauses substituted in the Hail Marys for the italicized clause are: (1) "Who wept blood for us;" (2) "Who was scourged for us;" (3) "Who was crowned with thorns for us;" (4) "Who carried the heavy cross for us;" (5) "Who was crucified and died for us." In saying the five Glorious Mysteries, substitute for the italicized clause: (1) "Who arose from the dead;" (2) "Who ascended into heaven;" (3) "Who sent the Holy Ghost;" (4) "Who assumed thee (or took thee up) into heaven with thee;" (5) "Who cleansing thee in heaven;" (6) etc.

The term rosary is variously explained by Roman...
Catholic writers: as derived from Rosæ mysticaæ, an eccl. dispensation of the Virgin; from St. Rosalia, who is represented with a wreath formed of gold and roses; from the fact that the beads are made of rosewood, etc. Steitz in Herzog, Real-Encykl., s. v.) suggests that it may be derived from a rose-garden (rosarium), after the manner in which devotional manuals were used as pillows and considered as a form of meditation in theology. The circumstances of his life are shrouded in obscurity, however, and the particular views he advocated are not well determined. His place in history was achieved chiefly through controversies with Anselm and Abelard (see the respective articles) in which he became ensnared. He became interested in expressing opinions concerning the Trinity which were deemed heretical, at a time when he was canon at Complègne. As he claimed Anselm shared his views, the latter interposed a denial, and was about undertaking a refutation of Roscelin's teaching, when the Synod of Soissons (1092) compelled a retraction of the heresy. The course of Roscelin's life becomes doubtful again at this point, and such facts as are known to have occurred are variously combined by students. The following seems to be the view now generally preferred. Roscelin soon recalled his retraction, according to Anselm, because his action at Soissons had been governed by fear of the populace. Anselm completed refutation previously begun (De Fide Trinitatis, et Incarnati), and Roscelin went to England, where he attempted to injure Anselm by treating him contemptuously, but was himself compelled to return to the Continent, partly because of his relations with Anselm, then archbishop of Canterbury, and partly because he had offended the English clergy by denouncing abuses which existed among them. He then addressed an unsuccessful application for refuge to Ivo of Chartres (q.v.), and from that time was lost to notice for some years. The name of Roscelin is next mentioned in connection with a controversy with Abelard. The latter had been Roscelin's pupil; but the publication of his Introductio ad Theologiam (1119), in which he emphasized the divine unity in three persons, and in such a way as to reflect on the position Roscelin had occupied at Soissons, caused an open rupture between them. Abelard's language savored of Sabellianism, and Roscelin prepared to bring the new heresy to the notice of the bishop of Chartres. Each set up a party of its adherents; and from this controversy, which documents are still extant; and with the issuing of the Epistola ad Abaelard. Roscelin passes definitely from our view.

1. Roscelin as a Trinitarian.—His opinions grew out of an emphasizing of the idea of personality in connection with the divine persons, and, as such, the writings of his opponents, may be comprehended in the statement that the three Divine Persons cannot be conceived as una res (ovia), unless the necessary consequence that the Father and the Spirit became incarnate with the Son be also accepted. To escape this consequence, he holds that the distinction between the Persons is one of way in which the Son strives to preserve the divine unity by postulating a unity of will and power. It seems evident that he believed this provision sufficient to preserve his doctrine from being charged with polytheism and atheism, and that he was therefore not guilty of intentional heresy; but it was not difficult for the keen dialectic of Abelard and his opponents to argue that Roscelin cannot be justly charged with tritheism; and, if his argumentation was at fault, he certainly earned for himself the credit of scholarly penetration in having recognised the full greatness of the difficulty to be overcome in reconciling the doctrine of the Trinity with that of the Incarnation.

2. Roscelin as a Nominalist.—We are wholly dependent for a knowledge of his position in this respect upon the statements of his enemies, and it appears certain that they caricatured his views; but it is evident that they did not regard him as the originator of nominal-
ism. He held the extreme of the nominalist position, denoting universal conceptions an empty sound (flatum vocis), but apparently only for the purpose of antagonizing the extreme realism of Anselm. His idea doubtless was that universal concepts exist simply in our thought, and do not at the same time postulate a real existence extraneous to the mind. He laid down the axiom that "nothing has parts"—a paradox which can only mean that no whole can really exist and furnish its parts from out of itself. The parts really constitute the whole, and alone possess a real existence; and the whole, as a unity, cannot be distinguished from them otherwise than in thought. The application to the doctrine of the Trinity, the axiom implied that the real existences in the Deity are in the three Persons, and that the unity of the Godhead exists only in the thought which comprehends them together into one. The only point of interest to him as a philosopher, however, was to discover whether the reality lies in the general concept or in the concrete individual; and his axiom has, e.g., no relationship with the atomism of Democritus.

3. The Connection between Roscelin's Philosophy and his Theological Views.—This is evident from the foregoing statements. He did not, however, publicly connect his theological innovation with his nominalism, but based it on the Christological difficulty already mentioned. According to Anselm (De Fide Trinitatis, 3), Roscelin declared that "Pagani defendunt legem suam, Judaei defendunt fidem suam, ergo et nos Christianam fidem defendere debemus," thus showing that it was not his purpose to damage the faith; but the words sound like a plea for scientific discussion of the faith in general, or perhaps for liberty of the thinking mind to apprehend, and consequently to further the development of the doctrines of the Church. Nominalism, in general, would seem to have been nearly always connected with a rationalistic tendency.

See Anselm, Ep. ii, 35 and 41, and De Fide Trinitatis et Incarnatiou; a letter to Anselm by John, abbot of Telese, later cardinal-bishop of Tusculum (in Baluz. Miscell. iv, 478); Abelard, Epist. 21 (Opp. [Paris, 1616] p. 384), and Dialectica (in Cousin, Oeuvres Inédites d'Abel.); Epist. Roscel. ad Abaelardum (ed. Schmeller, Munich, 1851); a letter to Roscelin by Theobald of Estampes (in D'Achery, Spicilegium, vol. iii), and one by Ivo of Chartres (Epist. 7); John of Salisbury, Metalog. ii, 17; Otto of Freisingen, De Gest. Frider. vol. i, ch. 47, et al.

Roscholchika, a term signifying "Seditionists," and applied to the Russian sect Istroniki, or the "Company of the East." This sect was formed in the middle of the 17th century, during the patriarchate of Nicon, A.D. 1654. The cause of separation was not any difference of doctrine or ritual, but a desire to protest against the laxity and inclination to change displayed by the clergy, and to adopt a greater piety and purity of life. Pinkerton (Disertation on Russian Sects) identifies them with the Staraia Believers of the Old Faith. See Plato, Present State of the Greek Church. See Russian Sects.

Roscoe, William, a historian and poet, was born near Liverpool, March 8, 1758, and in 1769 was articled to an attorney for six years. During this time he paid great attention to English classics, and subsequently added an acquaintance with choice writers in the Greek, Latin, Spanish, Italian, and French languages. He was admitted to the bar in 1774, and retired from practice in 1796. His medical, musical, and unfortunate business speculations, became very limited, but he still continued his literary labours for many years. He was a member of Parliament for Liverpool in 1806, and died June 30, 1831. Among his works are, Scriptural Reputation of a Pamphlet on the Laisness of the Slave-trade (1798, 8vo)—The Life and Fortunes of Leo X (Liverpool, 1805, 4 vols. 4to). See Allibone, Dict. of Br. and Amer. Authors, s. v.; Darling, Cyclop. Bibliog. s. v.

Rose (רוז), chabadatseleh; Sept. epivov, ἐπίφανος; Aqu. κυάλα, Vulg. flos, lilium) occurs twice only in the canonical Scriptures; namely, first in Cant. ii, 1, where the bride replies, "I am the rose of Sharon and the lily of the valley," and secondly in Isa. xxxvi, 1, "The wilderness and the solitary place shall be glad for them, and the desert shall rejoice and blossom as the rose. There is a reference of opinion as to what particular flower is here denoted, and the question perhaps does not admit of definite determination. Tremellius and Diodati, with some of the rabbins, believe the rose is intended, but there seems to be no foundation for such a translation. The Sept. renders it simply by θρέματος, and the passage of the Canticles in which it has been followed by the Latin Vulgate, Luther, etc. It is curious, however, as remarked by Celsius (Hierobot. i, 489), that many of those who translate chabadatseleh by rose or flower in the passage of the Canticles render it by lily in that of Isaiah. The rose was, no doubt, highly esteemed by the Greeks, as it was, and still is, by almost all the Oriental nations; and it forms a very frequent subject of allusion in Persian poetry; it has been inferred that we might expect some reference to so favorite a flower in the poetical books of the Scripture, and that no other is better calculated to illustrate the above two passages. But this does not prove that the rose or flower, or any similar word, was applied to the rose. Other flowers, therefore, have been indicated, to which the name chabadatseleh may be supposed, from its derivation, to apply more fitly. Scheurer refers to Hiller (Hierophy. p. 2), who seeks chabadatseleh among the bulbous-rooted plants, remarking that the Hebrew word may be derived from chabad and betal, a bulb, or bulbous root, of any plant, as we have seen it applied to the onim (q. v.). So Rosenmuller remarks that the substantial part of the Hebrew name shows that it denotes a flower growing from a bulb, and adds in a note that chabadatseleh is formed from beitel, or bulb, the guttural chet being sometimes put before trilliters in order to form quadrilliters from them" (see Gesen. Gram. p. 863). Some, therefore, have selected the asphodel as the bulbous plant intended, respecting which the author of Scripture Illustrated remarks, "It is a very beautiful and odoriferous flower, and highly praised by two of the greatest masters of Grecian song. Hesiod says that they are planted probably in woods, in the groves of Apollo and Didymus," but Pliny (Nat. Hist. i, 24) calls the Elysian Fields 'meads filled with asphodel.'" Celsius (loc. cit.) has already remarked that Bosch has translated chabadatseleh by narcissus (Polyanthus narcissus), and without reason, as some Oriental translators have so explained it. In the Targum (Cant. ii, 1), instead of chabadatseleh we have narkos (נרקוס), which, however, should have been written narkos (נרקוס), as appears from the words of David Cohen de Lara, "Narkos is the same as chabadatseleh of Sharon." So in Isa. xxxvi, 1, chabadatseleh is written χαμαδαλοίο in the Syrian translation, which is the same as narcissus (Cels. Hierobot. i, 489). This, Rosenmuller informs us (Bibl. Bot. p. 142), according to the testimony of Syriac-Arabic dictionaries, denotes the Colchicum autumnale, that is, the meadow saffron. That plant certainly has a bulb-like root-stok in form the flowers resemble those of the crocus, and are of a light violet color, without scent. Narkos and narkos are, no doubt, the same as the Persian murgus, which throughout the East indicates the Narcissus tazetta, or the Polyanthus narcissus. The ancients described and alluded to narcissus on various occasions. Celsius has quoted various passages from the poets indicative of the esteem in which it was held. Since they were not so particular as the moderns in distinguishing species, it is probable that more than one may be referred to by them, and therefore that N. tazetta may be included under the same name as Ν. poetica, which was best known.
to them. It is not unimportant to remark that the narcissus was also called Bulbus compositus, or the Emetic bulbis, in Greek and Latin; and the Arabic buul-al-kye no doubt refers to the same or a kindred species. It is curious, also, that an Eastern name, or the corruption of one, should be applied by gardeners even in England to a species of narcissus: thus, N. tussurianus and cremulatus (the former supposed by some to be a variety of N. orientalis) were once called "Bazalman major" and "Bazalman minor." That the narcissus is found in Syria and Palestine is well known, as it has been mentioned by several travellers, and also that it is highly esteemed by all Asiatics from Syria even as far as India (comp. Soph. (Ed. Col. p. 698 sq.; Mosch. Itin. ii, 63 sq.; Athen. xvi, 679 sq.). Chateaubriand (Itinéraire, ii, 130) mentions the narcissus as growing in the plain of Sharon; and Strand (Flor. Palest. No. 117) names it as a plant of Palestine, on the authority of Rauwolf and Hasselquist (see also Kitto, Phys. Hist. of Palest, p. 216). Hiller (Hierophyt. ii, 80) thinks the chabastoteleth denotes some species of asphodel (Asphodelus); but the finger-like roots of this genus of plants do not well accord with the "bulb" root implied in the original word. Thomson (Land and Book, i, 161; ii, 269) suggests the possibility of the Hebrew name being identical with the Arabic bellbezizi, "the muff," which plant he saw growing abundantly on Sharon; but this view can hardly be maintained. The Hebrew term is probably a quadrilateral noun with the harsh aspirate prefixed, and the prominent notion implied in it is "bush," "a bulb," and has therefore no connection with the above-named Arabic word. The narcissus alone is still called buul in the natures of Palestine (Quar. Statement of the Palest. Explor. Soc. Jan. 1878, p. 46). See Sharon.

Though the rose is apparently not mentioned in the Hebrew Bible, it is referred to in Ecclus. xxiv, 14, where it is said of Wisdom that she is exalted "as a rose-plant among flowers of the field." Ecclus. xxiv, 13, 15; and the highest hydroponia, or rose-tree, was one of the ancient names, and rhodonophane another. The former name is now applied to a very different genus of plants; but laurier-rose, the French translation of rhodonapha, is still the common name in France of the plant which used to be called rose bay in England, but which is now commonly called oleander. Its long and narrow leaves are like some kinds of

IX.—I
willows, and in their hue and leathery consistence have some resemblance to the bay-tree, while in its rich fluorescence it may most aptly be compared to the rose. The oleander is well known to be common in the south of Europe by the sides of rivers and torrents, also in Asia Minor, Syria, and Egypt. It is seen in similar situations in the north of India, and nothing can be conceived more beautiful than the rivulets at the foot of the mountains, with their banks lined with thickets of oleanders, crowned with large and rose-colored flowers. Most travellers in Palestine have been struck with the beauty of this plant. Of the neighborhood of Tripoli, Rauwolf says, "There also by the river's side are found Antilia marina, etc., and oleander with purple flowers, by the inhabitants called delile." At the foot of Lebanon, again, he says, "The valley further down towards the water, grew also the oleander." It is mentioned as a conspicuous object in similar situations by Robinson and Smith. Kitto says, "Among the plants in flower in April, the oleander flourishes with extraordinary vigor, and in some instances grows to a considerable size by all the waters of Palestine. When this happens, the mass of flowers is so beautiful as to attract attention. It is much noticed in this as in the preceding month by travellers. Madox noticed in this month that fine oleanders in full bloom were growing all along the borders of the Lake of Tiberias, mostly in the water. The same observation was made by Morro. The lake is here richly margined with a wide belt of oleanders, growing in such luxuriance as they are proudly shown to even in the most genial parts of Europe. Such a plant could hardly escape reference, and therefore we are inclined to think that it is alluded to in the book of Ecclesiasticus by the name rhodon. If this should not be considered sufficiently near to rhododendron and rhododendron, we may state that in Arabic writers on Materia Medica rodyon is given as the Syrian name of the oleander (see Tristram, Nat. Hist. of Bible, p. 477). See ENGELI.

The plant commonly called "rose of Jericho" is in no way referred to in the above-quoted passages. Dr. Lindley, in the Gardener's Chronicle, ii, 362, has thus described Rosa canina, a scrambles and roses of the rose family, and says: Jericho of the old herbalists, is a rose at all, nor has it the smallest resemblance to a rose; nor is it, as it is often described, to be alive as sold in the shops. It is gathered by the poor Christians of Palestine and sold to pilgrims as a charm. It is a little gray-leaved annual, very common in Palestine, and of which hundreds may be gathered in full flower in June by the sides of the road over the Isthmus of Suez (see Arveux, Nevehr, ii, 156; Seetzen, in Zsch. xvii, 146; Forskål, Flora, p. 117). It produces a number of short, stiff, zigzag branches, which spread pretty equally from the top of the root, and, when green and growing, lie almost flat upon the ground. The flowers and fruit are on their upper side. It is, in fact, a cruciferous plant, nearly related to the common purple sea-rocket, which grows on the coast of England, and has a somewhat similar habit. When the seed-vessels of this plant are ripe, the branches die, and, drying up, curve inwards, so as to form a kind of bag, which then separates from the roots, and is blown about on the sands of the desert. In the cavity thus formed by the branches, the seed-vessels are carefully guarded from being so disturbed as to lose their contents. In that condition the winds carry the anastatica from place to place, till at last rain falls, or it reaches a pool of water. The dry, hard branches immediately absorb the water and soften, rapidly expand again into the position they occupied when alive; at the same time, the seed-vessels open and the seeds fall out, germinate if favored, and become new plants. This is due, then, to the hygroscopic property of vegetable texture."

ROSE, Architectural. A kind of rose was sometimes used as an ornament on the face of the abaci of Corinthian capitals. It also occurs in ornamental mouldings during the Norman style; but the full rose, as in the accompanying illustration, was a badge of the Tudors, and during their reigns it is often found carved on buildings in conjunction with the portcullis. — Parker, Glæs. iv, 159, s. v.

ROSE, The Golden (Rosa aurea), a rose made of gold and consecrated by the pope, which is presented to such princes as have rendered special service to the Church, or as may be expected to promote its interests, though it is sometimes given also to cities and churches.

The essential parts of the rose are gold, incense, and water, and as such it is mentioned in the threefold dedication of the church at Torni — Deity, body, and soul; and its color denotes purity, its scent attractiveness, its taste the satisfying of desire. It is not known when the ceremony of consecrating the rose was introduced, though the time is commonly placed in the 11th century and in the pontificate of Leo IX, and it has become increasingly impressive with the progress of time. The consecration is always on the fourth Sunday in Lent, which is consequently known also as "Rose-Sunday" (Dominica de Roso). The pope, clothed wholly in white, intones before the altar the Adjutorium nostrum and offers a prayer of consecration, after which he dips the rose in balsam and sprinkles it with balsam-dust, incense, and holy-water. It is then placed on the altar, mass is said, and the benediction concludes the solemnity. When the rose is not consecrated the hand of the pope, it is always transmitted by special messenger, and accompanied with a letter from the pope. Its use as a symbol of joyous events has been continued in the Roman Church down to the present time. See Herzog, Real-Encyclop. s. v.; Weitzer u. Welte, Kirchen-Lex. s. v. ROSE OF JERICO, a plant of the natural order Crucifera, which grows in the sandy deserts of Arabia, on rubbish, the roofs of houses, and other such situations, in Syria and other parts of the East. It is a small, bushy, herbaceous plant, seldom more than six inches high, with slender stems, long-stalked, white flowers, and the leaves fall off, and the branches become incurved towards the centre, so that the plant assumes an almost globular form, and in this state it is often blown about by the wind in the desert. When it happens to be blown into water the branches expand again, the pods open and let out the seeds (see illustrations on the following page). Numerous superstitions are connected with this plant, which is called Rosa Mariæ, or the Rose of the Virgin. See Rose.

ROSE, Alexander, a Scottish prelate, was born in the north of Scotland, was educated at King's College, Aberdeen, and afterwards studied theology at Glasgow. His first preferment was Perth, which he left to become professor of divinity in the University of Glasgow. In 1641 he was nominated to the principality of St. Mary's College, University of St. Andrew's, and in 1687 he was made bishop of Edinburgh. He refused to join the standard of William, and during the Revolution was deposed of his cathedral, despoiled of his revenues, and stripped of his civil dignities. He died in March, 1720, and was buried in the church of Restalrig, near Edinburgh.

ROSE, Guillaume, a French prelate, was born at Chaumont, about 1452. He was professor of grammar and rhetoric in the College of Navarre, but subsequent-
ly went to Paris, where his eloquent and incisive preaching gained him a wide reputation. Becoming chaplain-in-ordinary to Henry III, he soon joined the Holy League, and in 1563 opposed himself to the king; but the break was only temporary. Rose was made head-master of the College of Navarre, and in 1584 received the bishopric of Senlis. For some time he repressed the expression of any extreme views, but when he departed for Paris as member of the Council of the Union, he said publicly that the celestial palm was reserved for the members of the League when they had killed father and mother. Thereafter he was one of the foremost preachers of his party, and in the contest between Mayenne and the Spanish he was an ardent partisan of the latter. He was member of the States-General in 1598, and rendered important service to the country in opposing the friends of the infanta of Spain, which was all the more remarkable considering his previous attitude towards the Spaniards. After the triumph of Henry IV, Rose took refuge in the convent of Val de Beaumont-sur-Oise, but by letters-patent was allowed to retain his bishopric. Continuing his hostility to the king, he was in 1598 arrested and forced to pay a fine of one hundred livres d'or. Rose died at Senlis, March 10, 1602. The celebrated pamphlet entitled De Justa Reipublicae Christianae in Reges Impios Authoritate (Paris, 1590; Antwerp, 1592) has been attributed to Rose, but its authorship is uncertain. See Lalitie, Predicateurs de la Ligue; De Thom, Historia L'Estoi, Journal.—Hoefner, Nouv. Biog. Générale, s. v.

**Rose, Henry John**, an English author, was born in 1801, graduated at St. John’s College, Cambridge, in 1821, and became fellow of his college in 1824. He was made Hulsean lecturer in 1833, rector of Houghton Conquest, Bedfordshire, in 1837, and archdeacon of Bedford in 1866. His death took place in Bedford, Jan. 31, 1873. Rose edited the *Encyclopedic Metropolitana* from 1839, also vol. i of *Rose’s Biographical Dictionary*. He translated Neander’s *History of the Christian Religion and Church during the First Three Centuries* (1831, 2 vols.; 2d ed. 1842); contributed an essay to * Replies to Essays and Reviews* (1861); and was one of the authors of *The Speaker’s Commentary*. He published, *The Law of Moses*, etc. (Hulsean Lectures, 1834), and *History of the Christian Church*, 1700-1808.

**Rose, Hugh James**, an English clergyman, was born in Little Horsted, Surrey, in 1785, and was educated at Trinity College, Cambridge. He gained the first Bell’s scholarship in 1814, took his degree in 1817, became tutor to the son of the duke of Athol, was ordained deacon and became curate of Uckfield, Surrey, in 1818. In 1821 he became vicar of Horsham, Surrey; in 1825 select preacher at Cambridge; in 1826 chaplain to bishop Howley, and prebendary of Chichester, 1827-38. In 1830 he became rector of Hadleigh, Suffolk; exchanged it for Fairstead and Welrey, Essex, in 1833, and immediately exchanged the latter for St. Thomas’s, Southwark, which he retained until his death. He was made professor of divinity of the University of Dublin in 1833, domestic chaplain to the archbishop of Canterbury in 1854, and principal of King’s College, London, in 1836. Rose died at Florence, Italy, Dec. 22, 1838. He was the author of *Christianity Always Progressive* (1829, 8vo)— *Notices of the Mosaic Law* (1831, 8vo):— *The Gospel an Abiding System* (1833, 8vo)—an edition of Parkhurst’s *Greek Lexicon*;— besides *Lectures, Sermons*, etc. See Allibone, *Dict. of Brit. and Amer. Authors*, s. v.; Darling, *Cyclop. Bibliog.*, s. v.

**Rose, John Baptist**, a French priest, was born at Quiney, Feb. 7, 1716. He was made curate of a chapel in his own village, which position nothing could induce him to leave, and he there continued during his life. In 1778 he was made a member of the Academy of Besancon. He submitted to the decree of 1789, and in 1795 the National Convention voted him a pension of 1500 livres. Rose died Aug. 12, 1805. His works are, *Traité Élémentaire de Morale* (2 vols. 12mo):— *La Morale Évangélique* (1772, 2 vols. 12mo):— *Traité sur le Providence*:— *L'Esprit des Pères* (1791, 3 vols. 12mo). He was also a good mathematician, and sent papers to the Academy of Sciences, Paris.

**Rose, Stephen**, a deacon and ruling elder of the Presbyterian Church, Bridgwater, Long Island, N.Y., was born there, June 5, 1780. After a period of darkness and doubt, he was converted in 1805 and united with the Church. Renouncing all efforts to obtain wealth, he devoted himself exclusively to the Church, and he emphatically “loved the gates of Zion more than all the dwellings of Jacob,” and no one was more
ROSE-WINDOW

132

ROSENBAEH

distinguished for piety and usefulness than older Rose. He was a pioneer in the cause of the circulation of the Bible, temperance, and Sabbath-schools in Suffolk County. To the Church and these institutions he devoted the energies of a powerful and cultured mind. He was a man of large and liberal views, and was ready to labor for the cause of Christ in all denominations, no Church being interfering with beneficial actions. He did much in winnowing souls to Christ by personal effort, always seeming to be in a revival spirit. In his religious experience he knew little of those alternations of hope and despondency which enter into the feelings of many professing Christians. In him there was a harmonious blending of virtues and graces unsullied by any defects. He was the most modest and unassuming, cautious yet decided and unwavering. His sense of justice was strong and inflexible, but not stern and merciless—following the dictates of his Divine Master in a readiness to forgive even the greatest injuries on the first movement of repentance on the part of the offender. Everywhere, among all classes, he was revered as a man of God, perfect in his day and generation. He was a perfect storehouse of information, not only on all matters pertaining to Church history, but of Bible doctrines. He died "as a shock of corn cometh in its season," at his home on Rose Hill, July 18, 1866. (W. P. S.)

Rose-window, or the Marygold, was derived from the round window called the eye in the basilica, pierced through the glass over the entrance, and imitated in the Norman window at Canterbury in the transept, and at Southwell in the clerestory, but is unknown in Rhenish architecture. About the 13th century the rose became of large dimensions. There are fine examples at Paris (1220-57), Nantes (1229), Laon, Rheims (1239), Amiens (1235), St. Denis, Sez, Clermont, and Rouen. The millons of this window converge towards the centre, something like the spokes of a wheel; hence they are sometimes called Catherine, or wheel, windows. They also bore the names of the elements—the northern being called the rose of the winds; the west, of the sea; the south, of heaven; and the east, of the earth. When there were two of these transeptal windows in a cathedral, that on the north was called the bishop's, and the southern one the dean's eye, as representing their respective jurisdictions—one watching against the invasion of evil spirits on the north, and the latter as presiding as censeor morum over the church and close. At Paul, exceptionally, the Lady Chapel had a superimposed rose, and one still adorns the nine chapels of Durham. See Window.

Roselli (or Roselli), Cosimo, an Italian painter, was born of a noble family at Florence in 1439, and studied under Neri di Bioci and Fra Angelico. He decorated what is called "the Chapel of the Miracle" at Sant' Ambrogio, and in 1476 aided in decorating the Sistine Chapel at Rome, where he had charge of the four great subjects—the Passage of the Red Sea, the Worship of the Golden Calf, the Lord's Supper, and Christ Preaching on the Sea of Tiberias. Returning to Florence loaded with honors, he died about 1506. The Museum of Berlin contains a Virgin with the Magdalene painted by him; that of Paris, a Virgin Gloriosa, a Christ Entombed, and two Madonna's; and at the Exposition of Manchester were shown a Christ on the Cross and the Virgin Surrounded by Saints. Roselli's principal pupil was Fra Bartolomeo.

Roselli (or Roselli), Matteo, an Italian painter, descended from the preceding, was born at Florence. He studied at the Accademia di S. Giovanni, and after the death of his master finished several of his unfinished pictures. He decorated the Clementine Chapel. Some of his paintings are, the Manger, the Trinity, the Crucifixion of St. Andrew, and St. Elizabeth of Hungary. His frescos are superior to his other paintings, five of the best of which are in the cloister of the Annunciation. He died in 1560.

Rosellini, Impolito, an Italian antiquary, was born at Pisa, Aug. 13, 1800. In 1821 he received the degree of doctor of theology, and afterwards studied at Bologna under Mezzofanti, and taught in the University of Pisa. At the time of the discoveries of Champollion, in 1822, Rosellini became interested in the study of hieroglyphics, and, in company with Champollion, studied Egyptian antiquities in the museums of Italy, and went with him to Paris. In 1828 he was commissioned by the grand-duke of Tuscany to explore the ruins of Egypt and Nubia with his son and three naturalists. Champollion was sent at the same time, and on a similar errand, by the duke de Blacas. The two parties united, and for fifteen months travelled through the deserts. Returning to Pisa, Rosellini spent the rest of his life in directing the publication of the results of the expedition, the whole of the work having fallen upon him at the death of Champollion. On account of his feeble health, he gave up his professor's chair, and was made librarian of the university. He died June 4, 1843. His works are, La Fomba di David (Bologna, 1823), a treatise upon the age of the Masonic points:—Lettera Filologico-critica al M. Pepion (Pisa, 1831):—Trattato di Ricomposizione e d'Amore reato alla Memoria di Champollion il Minore (ibid. 1832):—I Monumenti dell'Egitto e del Libano (Florence, 1832, 1841): this is his great work, the foundation of all modern research concerning ancient Egypt; it is divided into Monumenti Storici, Civili, e Religiosi:—and Elementa Linguae Egyptiacae vulgo Copicina (Rome, 1837). The latter, published by P. Ungarelli, is a resume of the lectures given by Rosellini, but the substance of it is contained in the Grammatica Copica di Champollion. Some other works, De Interpretatione Obeiscorum Urbia Roman, published by Ungarelli as those of Rosellini, belong really to Champollion. See Miller and Unbenas, Revue de Bibliographie Analytique (1842); Bardelli, Bioghr. d'Imp. Rosellini.

Rosemary, Use of at Funerals. The early Christians rejected the use of the common funerals, as used by the heathen, and substituted rosemary. The heathen, having no thoughts of a future life, but believing that the bodies of the dead would lie forever in the grave, made use of cypress, which is a tree that, being once cut, never revives, but dies away. Thislew was therefore thought better suited to the reunion of soul and body, use rosemary, which, being always green, and flourishing the more as being cut, is more proper to express this confidence and trust.

Rosen, Friedrich Augustus, a celebrated Oriental scholar, was born in Hanover, Sept. 2, 1805, and entered Leipsic University in 1822, where he devoted himself to the study of the Biblical languages. He went to Berlin in 1824, and studied Sanscrit under Bopp. He was subsequently called to the London University as professor of Oriental literature, which professorship he resigned in 1831, and devoted himself to study and writing. As secretary of the Asiatic Society, he conducted its entire foreign correspondence. Rosen died in London, Sept. 12, 1857. His first work was Raddice Sanscrita (Berlin, 1827). He edited the Arabic Handbooks of Algebra, by Mohammed ben-Mussa (Lond. 1831), wrote Oriental articles for the Penny Cyclopædia, and revised the Sanscrit-Bengal Dictionary of Houghton (ibid. 1835). In 1836 he began to publish Hypatia (1838), and left it in the hands of Dr. A. R. Wace; it was published by the Asiatic Society under the title Rippo-Sandila, Liber Primi, Sanscrita et Latina (ibid. 1838).

Rosenbach, Johann Georg, a journeyman spur-maker of Heilbronn, in Wurtemberg, who became one of the most prominent fanatics of the last century.
ROSENFELD | 133 | ROSENMULLER

Converted to God, as he thought, by the reading of Plutarch's works, he forsook his handicraft in 1708, and traversed the cities of Central Germany, preaching and holding devotional meetings. He secured the endorsement of several professors in the faculty at Altdorf, and gained the sympathy of the students at Tübingen, although he was everywhere opposed by the clergy and driven away by the civil authorities. He eventually went to Holland, and there disappeared from view.

The teachings of Rosenbach were given to the world in three books—

Glaubensbekenntnis (1703), Wander- und geadte Bekehrung (1704), and Wander- und geadte Führungs Gottes aus auf der Wege dazu Bekehrung Christo nachfolgend. Schrift. It seems that he rejected infant baptism as not commanded in Scripture, and ineffective to produce conversion. He held the Lord's supper to be simply a memorial; deplored the ministry in the churches: regarded the Bible as a messianic letter, and not the Word of God; believed Christ to be the Saviour, but asserted that the kindling of inward goodness would result in the saving, through Christ, of those who do not know of him; and confounded faith with its fruits, and justification with sanctification. He insisted positively on the existence of an inner and spiritual state of souls and their progress in the prospect of a millennial reign of saints with Christ during a thousand years prior to the general resurrection.

The appeal of Rosenbach to the professors of Altdorf in support of his views led to a protracted controversy, in which Joh. Phil. Storr, pastor at Heilbronn, and Pet. J. Schröck, professor, were the principal champions. See Walch, Einl. in d. Rel.-Streitsachen d. ev.-luth. Kirche, i, 799 sq.; ii, 755 sq.; v, 199 sq.; Unschuldige Nachrichten, 1704, in 8; 1707, p. 172; 1708, p. 758; 1715, p. 1054; 1716, p. 426 sq.; 1721, p. 1096; also Von Einem, Kirchengesch. des 18ten Jahrhunderts, i, 737 sq.; and Schröck, Kirchengesch. seit d. Reformation, ii, 358, 404.

Rosenfeld, Hans, a German impotster who set himself as the Messiah, about the year 1763, in Prussia, declaring that Jesus Christ and his apostles were impostors, and that Frederick the Great was the Evil One, whom Rosenfeld was to depose. He taught that he was to govern the world, assisted by a council of twenty-four elders, like those of the Apocalypse. He divided multitudes, and lived upon the offerings of the people. He lived in Constantinople. Eventually, in 1782, two of his followers appealed to the king, whom he believed to be the Evil One, to revenge him on Rosenfeld for the seduction of his three daughters. The king ordered proceedings against Rosenfeld, and he was sentenced to be flogged, and imprisoned for the remainder of his life at Spandau. Among his followers, called Rosenfelders, quietly disappeared.

Rosenfeld, Samson Wolf, rabbi of Bamberg, was born Jan. 25, 1780, at Ulmstedt, in Bavaria. At the age of thirteen he entered the Jewish academy at Flurg, where, besides the Talmud, he studied the philosophical writings of Maimonides, Albo, and others. At the age of nineteen he returned to his native place, and continued his studies, especially devoting himself to the writings of Moses Mendelssohn. In 1817 he was appointed rabbi of his native place. In 1819 he represented his coreligionists in Munich, and presented a memorial concerning the emigration of the condition of the Jews; an act which he repeated in 1846, in spite of the hatred of the orthodox Jews, who thought of putting him under the ban. In 1826 he was excommunicated; and, having passed the necessary examination required by the government, he entered upon his new field in March of the same year. He was a conservative reformer, and as such he published some works which tended to enlighten his coreligionists. He died May 12, 1862. Of his publications, we mention especially his Samson des Andacht für die Israeliten beiderlei Geschlechts (2d ed. Dinkenbusch, 1858, 8 vols.). See Flucht, Bibloth. Jud. iii, 169; Kayserling, Bibl. jüd. Kirzel- redner, i, 414 sq.; Klein, in Frankel's Monatschrift, 1863, p. 201 sq.; Krümer, in the Jewish year-book Achaway, 1866, p. 15-35. (B. P.)

Rosenfelders. See Rosenfeld, Hans.

Rosenfeldt, Frederick John, a missionary of the Episcopal Church, was born of Jewish parents Feb. 10, 1804, at Mitau, in Courland, Russia. According to the custom of that country, Rosenfeldt was instructed in the religion of Rabbinism, and when ten years old he was taken to Berditschev for further instruction in the Talmud. One of the most learned teachers, however, at that place endeavored to awake in his students a desire to apply themselves to the study of other languages, and not without success Rosenfeldt, who had two fellow-schools, was permitted by a Roman Catholic priest to take part in the instruction of his school, which he did in secret, acquiring a knowledge of reading and writing Russian, Polish, German, and a little arithmetic. At the age of eighteen he was married, according to the fashion of the country, and for two years lived in the country. In 1825 he returned to his fatherland; he had given all his time in the study of the Talmud. Having returned to Berditschev, he came into possession of a copy of the New Testament in Hebrew, circulated by the missionary Mr. Moritz (q. v.). His two former fellow-scholars and himself resolved to embrace Christianity, and intended to go to America. Rosenfeldt was not permitted to carry out his plan by circumstances beyond his control. In the meantime he received letters of introduction to the missionaries in Poland, and arrived at Warsaw in September, 1827. Having received the necessary instruction, he was baptized in the Reformed Church Feb. 10, 1828. His exemplary life and Rabbinical learning recommend him to the London Missionary Society, and in September, 1828, he was appointed assistant to the mission station at Radom. From this time on till his death, which occurred July 11, 1853, he was connected with the London Society, his last station being Lublin. See the Jewish Intelligence, 1853, p. 813 sq.; Annual Reports of the London Society, 1829, p. 52 sq. (B. P.)

Rosenkranz, Cyrus B., a Presbyterian minister, was born at Wallpack, N. J., March 12, 1808. He graduated at Amherst College, Mass., studied divinity in the Union Theological Seminary, New York city; and was licensed and ordained by New York Third Presbyterians April 8, 1842. He entered upon his labors as a minister in the West, at East May, Wis., and subsequently at Columbus, Wis. On March 12, 1863, Mr. Rosenkranz was a man of fine conversational powers, excellent judgment, and had the tact necessary to carry out useful plans of action. See Wilson, Presb. Hist. Almanac, 1862, p. 195. (J. L. S.)

Rosenkranz, Joseph, a Presbyterian minister, was born at Wallpack, N. J., Nov. 13, 1812. He received his education at Amherst College, Mass., and Union College, Schenectady, N. Y.; studied theology in the Union Theological Seminary at New York; and was ordained by New York Third Presbyterians in 1842 as pastor of the Church in Bethlehem, N. Y. He subsequently preached for the churches of Newport, Martinsburg, Romulus, and Onondaga Valley, N. Y., where he was laboring when he died, June 19, 1865. Mr. Rosenkranz was a man of sound orthodoxy, faithful to every trust, a fair solicitor, and a good preacher. See Wilson, Presb. Hist. Almanac, 1862, p. 321. (J. L. S.)

Rosenkreuz. See Rosicrucians.

Rosenmüller, Ernst Friedrich Karl, a noted German Orientalist, who contributed largely to the advancement of our acquaintance with the Semitic languages, literature, and customs. He was the eldest son of the rationalistic theologian Johann Georg Rosenmüller (q. v.), and was born Dec. 10, 1768. The various positions held by his father introduced him to learned stud-
ies at an unusually early age, and afforded him un-
equaled facilities for their prosecution. He became
identified with the University of Leipzig, first as doc-
ment, in 1574, and his dissertation on the language of Arabic
in 1796, and professor in ordinary of Oriental languages
from 1813 to the time of his death, Sept. 17, 1835. His
principal work was authorship; his chief importance
that of a learned, keen, and industrious writer on Ori-
ental subjects. He promoted the study of the Arabic
language in the cloister of the Roman Catholic Church in
the 19th century, and his Convertitdebilders, or biographical sketches of con-
verts to the Roman Catholic Church in the 19th
century, are a very important contribution to Church his-
tory, in which the lives of Jewis and Protestants are
written about. He was the first to reduce the treat-
ment of the converts in Germany; the second, of those of Eng-
land; the first division of the third (1869), of those of
France and America; and the second division of the third
(1870) is devoted to Russia, besides giving a supplement
to the former volumes. See the Literaturhe Hand-
heuer, 1875, p. 120. (B.P.)

Rosette, an orator in front of the hat worn by
prelates, dignitaries in a cathedral, and archbishops.
Salute of a Divine, 1795) says, "He gained
a cassock, beaver, and a rose."—Walcutt, Scot. Archac.
av.

Rosewell, Thomas (1), an English clergyman,
was born near Bath in 1650, and educated at Pembroke
College, Oxford. He became rector of Sutton Mannde-
ville in 1657, and ejected for non-conformity in 1662,
and was separated from the Church. In 1668, he was
tried for high-treason in 1684 by judge Jeffreys for some
expressions in a sermon, was condemned, but pardoned.
He died in 1692. Rosewell published, The Causes and
Cure of the Papal Tyranny (London, 1665, 8vo). See
Allonne, Dict. of Brit. and Amer. Authors, s. v.; Darling,
Cytometer, s.v.

Rosewell, Thomas (2), an English Dissenting
minister, was born at Rotherhithe in 1680, and educated
partly in Scotland. He was for a time assistant to Mr.
John Howe, at Silver Street, London, and then colleague
with Mr. John Spademan at the same place till towards
the close of his life, when he removed to Mare Street,
Hackney, where he died in 1722. Rosewell had a share
in the continuation of Henry's exposition, the part as-
signed him being the Epistle to the Ephesians. He
published a volume of Sermons (1706)—sixteen single
Sermons (1706-20)—and The Arrangement and Trial of
Mr. Thomas Rosewell (1718, 8vo).

Rosh (Heb. Rosh, ר'ח, head, as often; Sept. 'Pn'h),
the name of a man and perhaps of a people. See also
Gall.
2. The seventh named of ten sons of Benjamin,
each of whom was head of a family in Israel (Gen. xlvii, 21).
B.C. cir. 880. He is perhaps identical with the Rapha
of Chron. viii. 2. See Jacob. "Kalisch has some long
and rather perplexed observations on the discrepancies
in the lists in Gen. xlvii. and Numb. xxvi. and specially
as regards the sons of Benjamin. But the truth is that
the two lists agree very well so far as Benjamin is con-
cerned; for the only discrepancy that remains, when the
absence of Becher and Gera from the list in Numb. is
explained [see these words], is that, for the two names
יהו (Jeho and яйн (Ehi and Rosh) in Gen., we have the one
same name אֶחָד (Ahiram) in Numb. If this last were
written as, as it might be, the two texts would be mut
most identical, especially if written in the Samaritan
character, in which the skin closely resembles the mem,
That Ahiram is right we are quite sure, from the fami-
ly of the Ahiramites, and from the non-mention else-
where of Rosh, which, in fact, is not a proper name.
The conclusion, therefore, seems certain that אֶחָד
in Gen. is a mere clerical error, and that there is perfect
agreement between the two lists. This view is strength-
ened by the further fact that in the word which follows
Rosh, viz. Moppum, the initial m is an error for sh.
It should be Shuppum, as in Numb. xxvi, 39; 1 Chron.
vii, 12. The final m of Ahiram and the initial sh of
Shuppum have thus been transposed."
2. The Heb. word רָשַׁד, rendered "prince" (Ezek. xxxvi., 2, 3; xxxix., 1), ought to be read as a proper name, as in the Sept.—"the chief" or "prince of Rosh, Meshech, and Tubal." Rosh thus appears as the name of a northern nation, along with Meshech and Tubal (comp. ḫwsw, in Ptny., vi., 4, which may be a city, a river, or a country). In the time had-lam, the name is mentioned in connection with other nations on the Caucasus, and ḫwsw, an Iberian province in the same place, named by Russeggier (Beschreib. d. Caucaias, i., 51). Gesenius says, "Without much doubt Rosh designates the Russians, who are described by the Byzantine writers of the 10th century, under the name of Ρόσης or Ρωσίας, as the owners of the gold mines of Taurus;" and also by Ibn-Fossam, an Arabic writer of the same period, under the name ṡouns, as dwelling upon the river Vspga (Thes. Heb. n. v.). The Oriental writers say that Røs was the eighth son of Japheth, and his descendants are, by Abulfaraj, always joined with the Bulgarians, Slavonians, and Alani. For other suppositions, see Stritze, Membr. Popul. olim ad Danub. etc., Habitant., i., 957 sq.; Michaelis, Suppl. vi., 2294 sq.; Bochart, Phil. xiii., 13; Schultzeus, Parad., p. 133; Herbelot, Bibl., Or., iii., 137 sq. If the view of Gesenius be correct, in this name and tribe we have the first trace of the Russ, or Rassia, nation. "Von Hammer identifies the Rus ad Vspga as the Tribus Røsi;" and in the peoples Aal, Thamud, and the Asbarhab (or inhabitants) of Rass or Ross. He considers that Mohammed had actually the passage of Ezekiel in view, and that 'Asbarhab' corresponds to Nast, the 'prince' of the A.V., and ἀρχηγος of the Sept. (Sur. Origines Russi, [St. Petrusb. 1825], p. 24—29). The first certain mention of the Russians under this name is in a Latin Chronicle under the year A.D. 839, quoted by Bayer (Origines Russica, Comment. Acad. Petropol. [1726], p. 493). From the junction of the Tiras with Meshech and Tubal in Gen. x., 2, Von Hammer conjectures the identity of Tiras and Røs (p. 20). The name probably occurs again under the altered form of Rasses (q. v.) in Judith ii., 25—this time in the ancient Latin, and possibly also in the Syriac version, in connection with Thiras or Thars; but the passage is too corrupt to admit of any certain deduction from it. This early Biblical notice of so great an empire is doubly interesting from its being a solitary instance. No other name of any modern nation occurs in the Scriptures, and the obliteration of it by the A.V. is one of the many remarkable variations of our version from the meaning of the sacred text of the Old Test."

Rosh hash-Shanah. See Talmud.

Rosiscians, a pretended fraternity in Germany which existed simply in a book entitled Fama Fraternitas des lübischen Ordens des Rosenkreuzers, and published in 1614. That book recited that Christian Rosenkreuz, a German of noble family, born in 1388, and educated in a convent, had in early youth visited the holy sepulchre, and had spent three years in Damascus with the Arabs, engaged in the study of physics and mathematics, after which he went to Fz by way of Egypt, and there pursued the study of magic. He learned among other things that every man is a microcosm. An attempt to dispense his new-found wisdom in Spain met with no encouragement, for which reason he determined to produce a product (k. a. a certain Elijah) he had invented. He built a sort of convent, which he named Sanctura Spiri-tus, and associated with himself three friends from the monastery to which he originally belonged. This was the institution of the Rosicrucian order, which was afterwards enlarged by the addition of four other persons. The members travelled everywhere to promote the reformation of the world, but met at their central house once a year. They claimed the possession of the highest knowledge and freedom in sickness and health, though not from death. Each member chose his successor, but concealed his own death and place of burial. Even the tomb of Rosenkreuz himself was unknown until after 120 years from the founding of the order, when a vault was discovered in his house which was brilliantly illuminated from above by an artificial light, and which contained a round altar placed over the yet undecomposed body of the founder. The inscription "Post CXX annos patebo" over the door of the vault showed that the makers of the vault had no knowledge of the means of communication with the world. The learned were accordingly invited to carefully examine the arts described in the Fama (which was printed in five languages), and to publish their opinions through the press, as the hope was expressed by the masters that many would connect themselves with the order. Other writings were also printed in confirmation of the statements of the Fama, e. g. a Confession (1615), and the Chymische Hochzeit Christian Rosenkreuz (1616). An immense excitement in Germany and adjoining lands was produced by these works, and called forth a flood of appreciative or condemnatory reviews. The interest felt at the time in secret arts, particularly that of making gold, led many to seek association with the fraternity, while others suspected a most dangerous heresy in theology and medicine; but it was remarkable that no actual member of the original Rosicrucian order was ever discovered. Every theological text-book contended at length against this heresy, and medical writers discovered its internal absurdities and destroyed it. Gerson, who later superseded him by Paracelsus. Robert Fludd, in England, defended the order with zeal, and the court physician of the emperor Rudolph II, Michael Maier, asserted the truth of the statements contained in the Fama. The title of Rosiscians was finally adopted by a society of alchemists, which originated at the Hague in 1622, and afterwards by other fraternities. Investigations made by such societies into the origin of the Fama Fraternitas led to the conclusion that the book was intended as a satire on the condition of the times. The authorship of the book was finally ascribed to Joh. Val. Andreas, the Württemberg theologian, and this opinion is still generally received. A list of the older Rosicrucian literature may be found in Missiv an d. hochel. Braüderschaft d. Ordens d. gold en u. Rosenkreuzes, etc. (Leips. 1783); Chr. v. Murr, Wahrer Uebrupung d. Rosenkreuzer, etc. (Sulzbach, 1808). See also Gottfr. Arnold, Unparthei. Kirchen- u. Ketz.-Histoire (Frankl. 1729; Schaaffhausen, 1742), pl. ii., ch. xvii and xix., vol., p. 347; Herder, Hist. Zunahme in über Fr. Nicolai's Buch, etc., in Deutscher Merkur of 1782 (Sämtl. Werke z. Phil. u. Gesch. vol. xxvii); Zur Lit. u. Kunst, vol. xx; Bühle, Ursprung u. vormehmte Schicksale der Orden d. Freimaurer u. Rosenkreuzer (Güst. 1804); Nicolai, Ueber Uebrupung u. Gesch. d. Freimaurer (Berlin, 1806) and Stettin (Berlin, 1807); Val. Andreas u. sein Zeitalter (Berl. 1819); Gruhauer, Vorfasser u. Uebrung, Zweck d. Fama Fraternitas, etc., in Niedner's Zeit. f. hist. Theologie, 1892, p. 298—315.

Rosin, properly "naphtha" (σαγαμ; Vulg. maph-atha, so the Peshito-Syriac). In The Song of the Three Children (ver. 29), the servants of the king of Baby- lon are said to have "ceased not to make the oven hot with rosin, pitch, tow, and small wood." Pliny (i., 101) mentions naphtha as a product of Babylonia, similar in appearance to liquid bitumen, and having a remarkable affinity to fire. To this natural that the Rosiscians believed was drawn near it became worse, and we were all instantly struck with excruciating headaches. The springs consist of several pits or wells, seven or eight feet in diameter, and ten or twelve deep. The whole number are within the compass of five hundred yards. A flight of steps has been cut into each pit for the pur-
ROSS

pose of approaching the fluid, which rises and falls according to the dryness or moisture of the weather. The natives lave it out with ladles into bags made of skins, which are carried on the backs of asses to Kirkük, or to any other mart for its sale. . . . The Kirkük naphtha is principally consumed by the merchants of the south-west of Kirkûr, while the pits not far from Kufri supply Bagdad and its environs. The Bagdad naphtha is black” (Tran. ii. 440).

It is described by Dioscorides (i. 101) as the dregs of the Babylonian asphalt, and white in color. According to Plutarch (Aegypt. p. 55), Alexander first saw it in the city of Ecbatana, where the inhabitants exhibited its medicinal effects by strewing it along the street which led to his headquarters and setting it on fire. He then tried an experiment on a page who attended him, putting it into a bath of naphtha and setting light to it (Strabo, xvi. 749), which nearly resulted in the boy's death. Plutarch suggests that it was naphtha in which Medes steeped the crown and robe which she gave to the daughter of Creon; and Suidas says that the Greeks called it “Medes' oil,” but the Medes “naphtha.” The Persian name is naft. Positionius (in Strabo) relates that in Babylonia there were springs of black and white naphtha. The former, says Strabo (xvi. 749), were of liquid benz, which they burned in lamps instead of oil. The latter were of liquid sulphur. See BRUMEN; NAPHTHA.

Rosini, Carlo Maria, an Italian archaeologist, was born at Naples, April 1, 1748. He studied among the Jews, embraced the ecclesiastical life, and in 1784 became the successor of Nicolò Ingrao as professor of Holy Scripture in a college at Naples. He was canon of the Cathedral of Naples till 1792, when he was elected bishop of Pozzuoli. He was in favor with the king, and received the position of councillor of state and grand almoner, and later, under Ferdinand I, was minister of public instruction. Rosini was a member of the Academy of Herculanenum after its reorganization, and was one of the most active in deciphering and editing the inscriptions of Herculaneum and Pompeii. See Tipaldi, Biografie der Ital. Iustri; Ross [Prospero della], Vita di C. M. Rosini.

Rössler, Christian Friedrich, a German doctor of theology and professor of history, was born June 19, 1736, at Canstadt, in Wurttemberg. For some time he lived at Heidelberg, and in 1777 he was called to Tubingen, where he died, March 29, 1821. He wrote, Lehrbegriff der chrißl. Kirche in den 3 ersten Jahrhunderten (Frankf.,—on-the-Main, 1775);—De Philosophia Vet. Ecclesiae de Spiritu et de Mundo (Tubingen, 1785);—Bibliothek der Kirchenreiter in Uebersetzung u. Auszeigam; etc. (Leips., 1775). See Werner, Histor. buch der theolog. Literatur, i. 594, 596, 876; ii. 738. (B. P.)

Ross, Alexander, a Scottish divine and writer, was born at Aberdeen in 1590. He became chaplain to Charles I., and was his zealous partisan during the civil war, 1642–49. He was also master of the Southampton Free School, to which, at his death, in 1654, he left a handsome bequest. Among Ross's works is a Continuation of the History of Scotland under William and Mary, A.M. 3604 to A.D. 1640 (Lond., 1652);—Rerum Judaicorum (ibid. 1617–32, 4 vols.):—Exposition of the First Fourteen Chapters of Genesis, by “Abrahame Rosse” (ibid. 1620):—A View of the Jewish Religion (ibid. 1656, small 8vo). See Allibone, Dict. of Brit. and Amer. Authors, s. v.

Ross, Edward Frederick, a Presbyterian divine, was born in New York city, Feb. 12, 1826. He graduated at Union College in 1847, and in 1853 entered the Andover Theological Seminary, where he pursued his theological studies for two years, when he entered the Union Theological Seminary, and graduated in 1851. He was ordained Sept. 26 of the same year, and was installed pastor of the Congregational Church of Morrisania, N. Y., in which position he remained until 1854, when he sailed for Europe. When he had finished his academic course, he studied theology with Rev. Dr. McCullough, was licensed by Picton Presbyterian in 1823, and, being able to preach in Gaelic, was soon after ordained as an evangelist, and spent some time in the island of Cape Breton. In 1827 he became pastor of the churches of Tatamagouche and New Amman, and consequently of Georgetown and Murray Harbor. He was moderator of the synod at the time of the disruption, and gave in his adherence to the Free Church. Mr. Ross died suddenly, Dec. 1, 1858. He was a man of fine gifts and an excellent preacher. See Wilson, Presb. Hist. Almanac, 1860, p. 294. (J. L. S.)

Ross (also Ross, Roos, or Ross), John (1), usually called Antiquary of Warwick, was born in the town of that name in England, and educated there until prepared for the university. He then studied at Balliol College, Oxford, where he took the degree of A.M., and afterwards was installed canon of Osney. English antiquities became his favorite pursuit, and he traveled over the greater part of the kingdom to acquire information. He then took up his residence at Guy's Cliff, in Warwickshire, where he had a posses-

sion granted him either by the earl of Warwick or by Edward IV, and died Jan. 14, 1491. Of the manuscripts left by him the following were published: Joanne Rossii Antiqurii Warwickiensis Historiarum Rerum Antiquarum scrispits (Oxon. 1716, 8vo; 2d ed. 1745, 8vo)—Joanne Rossii Historioli de Comitiis Warwicibus (1729, 8vo). See Allibone, Dict. of Brit. and Amer. Authors, s. v.

Ross, John (2), an English clergyman, was a native of Herefordshire, and was educated at St. John's College, Cambridge, where he took his degree of D.D. in 1756 he became vicar of Frome, Somersetshire, bishop of Exeter in 1761, and died in 1782. He published six single sermons (1756–85, 4to):—A Defence of Epistles said to have been Written by Cicero to Brutus:—Muri Tullii Cecorini Epistolatarum ad Familiaris Libri XVI (1749, 2 vols. 8vo).

Ross, John (3), a Presbyterian minister, was born in Dublin, Ireland, July 28, 1783, of Roman Catholic parents, but was left in a state of orphanage when quite young. At the age of ten a servant left his friends secretly and went to sea. On his way to Liverpool he was seized by a press-gang and put on board a man-of-war. Afterwards, at Barbadoes and elsewhere, he was pressed a second and a third time. His numerous desertsions and wonderful escapes would constitute a romance of a modern day. He served in the United States, and went to work at his early trade of shoemaker at New London, Conn. He was still a bigoted Roman Catholic; but as there was no church of that denomination in the town, he was in some degree weaned from his attachment and, through contact with Protestants, brought to reflect upon his condition. He was converted and led to seek the way of salvation by simper, and that something beyond the power of priestly absolution was necessary to give his troubled conscience rest. By prayer to the Friend and Saviour of sinners, he found pardon and peace. Soon after his conversion his mind was turned to the ministry, and providing himself properly equipped, he proceeded to what he did for all who are truly called to that work. By the
ROSS

and of an association of ladies he was enabled to enter Middletown College, Vt., where he graduated in 1811. He entered Princeton Theological Seminary in 1813. After remaining in the seminary over two years, Mr. Ross was placed as a missionary for about three months in the suburbs of Philadelphia. He was educated for the foreign field, and was in readiness to go to it, but the Board had not the funds to send him. He was therefore sent to Somerset and Bedford, Pa. Having received a call from the Church at Somerset, he was ordained as pastor by the Presbytery of Redstone in 1817. From Somerset he went to Ripley, O., in 1819, where he remained about four years, and afterwards went to Indiana, preaching at different points and for various periods of time on his way. In both Ohio and Indiana he did much missionary work, travelling on horseback over wild and wide regions of country. He preached several sermons in the old fort at Fort Wayne, Ind., when there were very few houses in that now large and flourishing city, and he is said to have been the first Presbyterian minister that ever preached in that town. In September, 1834, he settled at Richmond, Ind., and was pastor of Red celebration Presbyterian Church for twenty-five years, from 1824 to 1855. In the minutes of the Annual Assembly it appears that in 1849 he was a member of the Presbytery of Muncie, and continued such until his death. In 1849 he was a stated supply at Burlington, Ind., and in 1850 at Windsor, O., being yet quite vigorous for his years. After leaving Richmond, he re-sided in Indianapolis, O., Milton, Indiana, and New Castle, Burlington, Muncie, and Tipton, Ind. In labor, he was more abundant as a pioneer in what was then the "far west." As long as he could stand in the pulpit he was fond of preaching, and sometimes preached with the fire of his younger days long after he had become an octogenarian. He lived to be the oldest minister in the Presbyterian Church, and died at the house of his daughter in Tipton, March 11, 1876. (W. P. S.)

ROSS, William, a minister of the Methodist Episcopal Church, was born in Tyringham, Mass., Feb. 10, 1792. He was converted in his seventeenth year, and was received as a probationer in the New York Conference in 1812. In May, 1824, he attended the General Conference in Baltimore, where he signalized himself as the author of a very able and luminous report on missions. He died Feb. 10, 1825. He was a diligent student and an eloquent preacher. See Minutes of Annual Conferences, 1825, p. 476; Sprague, Annals of the Amer. Phil., vii, 524.

ROSS, William Charles, Sir, an English miniature-painter, was born in London, June, 1794. In 1827 he was appointed miniature-painter to the Queen. In 1846 he gained a prize of one hundred pounds for a picture of The Angel Raphael Discouraging with Adam. His death occurred in 1860.

ROSS, William Z., a minister of the Methodist Episcopal Church, was born in Licking County, O., April 24, 1825. At the age of sixteen he pronounced faith in Christ and united with the Methodist Episcopal Church. He was unable to graduate from college, so he attended the school of mining, and was elected to the Ohio Conference in 1858. In 1855 he was appointed missionary to Tennessee and stationed at Shelbyville, where he died, Oct. 11, 1866. His preaching was marked by extraordinary force and pungency of application. See Minutes of Annual Conference, 1857, p. 250.

ROSSHIT, Conrad Eugen Franz, a Roman Catholic divine, was born in 1798 at Oberscheinfeld, in Franconia. He studied at Landshut and Erlangen, and in 1817 he already possessed the professor of canon-law in the latter place. He was one of the oldest professors of canon-law in Germany, and died June 4, 1873, at Heidelberg. He wrote, Lehrbuch des Kirchenrechts (8d ed. Schaff- hauser, 1891), which contains the following new in Bamberg entdeckten Handschriften der falschen Decretalen (Heidelb., 1846) — Zu den kirchenrechtlichen Quellen des ersten Jahrhunderts und zu den pseudokirchlichen Decretalen (ibid. 1849) — Canonischer Recht (Schaffhausen, 1857) — Manuale Canonicum, Tafelspiegel des Kirchenrechts, Bibliographisch-theologisches Anathematisches Instrumentum, quo Lecicuri Luria Canonicus Liniemante Proponere Studuit (ibid. 1862) — Beitrage zum Kirchenrecht (Heidelberg, 1868). See Zuchold, Bibl. Theol. p. 1088; Litteratur, Handwörterbuch, 1873, p. 900. (B. P.)

ROSSI, Azariah (Ben-Moses) de, a Jewish scholar of the celebrated family called in Hebrew Min Ha-Adonim, was born in Mantua about 1514. Naturally endowed with extraordinary powers of mind, keenness of perception, refinement of taste, and with an insatiable desire for the acquisition of knowledge, De Rossi devoted himself with unwearied assiduity and zeal to the study of Hebrew literature, archaeology, history, the writings of ancient Greece and Rome, and even the fathers, which knowledge was of great use to him after- wards, when he devoted himself more especially to the criticism of the Hebrew language and the sacred text. Having prosecuted his studies in Mantua, Ferrara, Ancona, Sabionetta, Bologna, etc., he went back to Ferrara with the accumulated learning of more than half a century, the results of which he now communica- ted to the world in his celebrated work published in [Muh 3748] The Light of the Eyes (Mantua, 1574-75). The work consists of three parts, subdivided into chapters as follows:

Part I, which is entitled ברושי—who, or The Voice of God, (republished at Vienna in 1899), which was occasioned by the terrible earthquake at Ferrara, Nov. 18, 1570, and which De Rossi himself witnessed, contains, in easy style, a graphic description of that terrible catastrophe. It aims to show, not by postulating the power of the Creator and manifested itself. He dilutes on the subject, to prove that he does not altogether Greek philosophy, holding that sudden disasters are natural causes, but argues forcibly and (quoting also Scriptural and Rabbinical authorities) concludes that the whole hand of God is in the creation—to mete out men's deserts. He then branches out to comment scientifically on narratives in sacred and secular works relative to earthquakes, and remarks that what happened to his wife would have confounded an Absconopus and a Hippocrates. She had thrown her daughter's room shortly before the roof of the house fell, by a sudden shock, into her own chambers. The fright occasioned turned the color of her skin into a deep yellow, and from that moment she craved for nothing but salt. Bread and salt became to her a most delicious food. She was so much afraid to be left alone that she held her toast by that nothing may be done without sparing any. That a Greek translation of the Pentateuch—not of the whole Bible,—was made under the auspices of king Por- tyne, and that the works of the fathers of the Christian Church, the Talmud has recorded the incident, somewhat hyperbolically, in the treatise Me- molah. But the sect of the Socinians, who deny the entire Scriptures should have had the origin related above is im- possible. See Part II, which is entitled רזס—The History of the Aged (republished at Vienna in 1899), contains an ac- count of the Sept. version of the Bible, chiefly from the let- ter of Ariastes, a confidant friend of king Ptolemy Phil- delphus, communicated to his brother Phylacrites. De Rossi accepted it as true in all its details. Modern crit- icism has seen where it is at fault, and declared it spurious. That a Greek translation of the Pentateuch—not of the whole Bible,—was made under the auspices of king Por- tyne, and that the works of the fathers of the Christian Church, the Talmud has recorded the incident, somewhat hyperbolically, in the treatise Me- molah. But the sect of the Socinians, who deny the entire Scriptures should have had the origin related above is im- possible. See Part III, which is divided into two divisions, respectively called ברושיה, or Word of Understanding, and וינל, or Chronology, consists of four sections, subdivid- ed again into sixty chapters. The first division, with its two sections (ברושיה), treats, in ch. 1-xxiii, of the use of the fathers ; the heathen writings; Philo; the Jewish sects, es- pecially the Essenes; the Sept. and the Aramaic; the history of the Jews in Alexandria and Cyrene; the Bar Kochba revolts; the Ten Tribes; the Talmudic story about the Israelites in the time of Alexander the Great. The second section, embrac- ing ch. xxiv-xcviii, contains treatises on the explanation of Scripture by ancient sages; on the Midrash and Ha- gadic exegesis; on sundry striking differences between
ROSSI 138 ROSSIGNOL

Christian and Jewish writers; the old Persian list of kings, without any trace of the Persians in chronology, Josephus; Seder Olam; on the series of high-priests during the second Temple, etc., published with the second part of the same work. The third section, treated, in ch. xxix-xliv, of the Biblical chronology and the Jewish Calendar; of old Persian kings; extracts from and criticisms on Philo, Josephus, etc. The fourth section, embracing ch. xlv-ix, descants upon Jewish antiquities; Aquila and Theodotion; the antiquity of the letters and the vowel-point; Hebrew poetry, etc.

This work, considered as a whole, though not distinguished by scientific correctness or historical accuracy, has nevertheless always been a favorite among Hebrew scholars, and parts of it have been translated into Latin, as ch. xxii, xxv, xxxii, xxxv, xxxvi, by Voest, in his translation of the ידֶעַלְקֵינִי (Leyden, 1644); ch. viii, xiv, xix, by Meyer, in his version of the ידֶעַלְקֵינִי (Amst. 1699); ch. ix, xiii, lii, by Buxtorf, in his Tractatus de Antiquitate Punctorum (Basel, 1648); ch. i, ix, by the same, in his translation of Κεταιρί (Ibid. 1660), and ch. li, lvi, in his Dissertatio de Litteris Heb. (Ibid. 1662); ch. iii, vi, viii, ix, ix, x, xii, xvii, by Morin, in his Exercitationes Biblicae (Paris, 1638), p. 185, 188, 190, 191, 201, 207, 314, 342, 568; ch. ii, vii, xv, xvi, xxii, xlv, lvi, lix, by Voest, in his dissertation of Martinus Polydes adversus Maruos et Juden (Amst. 1699), p. 77, 77, 119, 127, 128, 129, 141, 144, 147, 338; ch. ix, by Van Dale, in his Dissertatio super Articem, etc. (Amst. 1705), p. 174; ch. ix, xii, by Bartolocci, in his Bibliotheca Magna Ribbinica (Rome, 1765-93), i, 689; ii, 800; ch. xvi and xxi, by Bochart, in his Hierozonicon (Leuyen, 1712), pt. i, ch. vii, li, 629; and ch. li, by Heisinger, in his Oppi Hebreei (Heidelberg, 1662), p. 125. The sixteenth chapter has been translated into English by Raphall, in the Hebrew Review and Magazine, ii, 170 (treating of "the great which entered the skull of Titus," as related in the Talmud); while the sixtieth chapter has been translated by bishop Lowth, in the preliminary dissertation to his translation of Isaiah (Lond. 1806), p. xxviii, etc. De Rossi has criticised his material in so liberal a manner that many of the Jews probed the work, while others wrote in refutation of some of his liberal criticisms. Prominent among these were R. Moses Provencal, of Mantua, and R. Isaac Finzi, of Pesaro. De Rossi subjoined to some copies of the Meor Eneunim itself a reply to the former, and wrote a separate work entitled וֹתִָּרָּר לֹאָּו וֹתִָּרָּר אָּרָּר (The Rebinning Pot for Silver, after Prov. xxvii, 3). This work, which is an essential supplement to the Meor Eneunim, has recently been published by Filipowski (Edinb, 1854), and by L. Zune, with the Meor Eneunim (Wilna, 1865-68, 3 vols.). De Rossi also wrote Poems and Epigrams, יָּאָּדָּר אָּרָּר (Venice, 1586). Three years before his death, De Rossi had a dream. A man stood by him, and voices cried, "Dost thou not see the personage looking on thee? He is a prophet." "If so," said Azariah, addressing the stranger, "if thou art indeed inspired, let me know how long I have to live." "Three years yet," was the answer. By the wayside of Mantua the bones of the illustrious writer rested, and on his grave a significant inscription was placed, when the dream proved true, in Kisley, 5338 (i.e. 1577). The stone shared the fate of his body who lay buried beneath. Both were rudely cast away to some unknown spot by the Italian monks, who sought for more space to build up monasteries. See First, Bibl. Jud. iii, 171 sq.; De Rossi, Dictionario Storico, p. 290 sq. (German transl.); Steinschneider, Catalogus Libr. Heb. in Bibl. Bodl. col. 747; Ginsburg in Kitto, s. v.; the same, Levita's Masmouth ha-Maasoum, p. 52 sq.; and Hebrew, p. 59 sq.; Wolf, Bibli. Rossi (in Lat. De Rubex), Bernardo Maria de, an Italian scholar, was born at Cividale di Friuli, Jan. 18, 1687. At the age of seventeen he took the vows of the Order of St. Dominie; and after finishing his studies taught for three years in a convent at Venice. In 1718 he went to Vienna, where he made the acquaintance of the learned Apolito Zeno. On his return, he accepted the chair of theology in the same institution in which he had formerly taught. In 1730 he resigned his chair and devoted himself wholly to study and the most rigorous asceticism. In 1722 he accompanied an embassy to the court of France. He was liberated from convet, and enriched it by the addition of many valuable works. Rossi died Feb. 8, 1775. His writings are very numerous, consisting principally of historical and religious annals. Among them are, De Fabrica Monarchi Mediciului D. Thomas Aquini, D. James D'Aquinii, D. Thomas Aquini:—De Pecatibus Originalibus (Ibid. 1757):—De Charite (Ibid. 1758):—Dissertations Variae Eruditionis (Ibid. 1762). See Fabroni, Vitis Italarum.

Rossi, Giovanni Bernardo de, an eminent Italian Orientalist, was born at Castel-Nuovo, in Piedmont, Oct. 25, 1742. In 1766 he was ordained priest at Turin, and in the same year received the degree of doctor of theology. For several years he devoted himself to the study of the Oriental languages, and he was also acquainted with the greater part of those of Europe. In 1769 he was employed in the Museum of Turin, and soon after was called to the chair of Oriental languages at Parma, which position he held until 1821. During the remainder of his life he was employed in writing and collecting his many philological and historical works. Many of these were printed in the most elegant style, and are to-day considered models of typography. His collection of rare Hebrew manuscripts was sold to Maria Louisa in 1816. De Rossi died at Parma in March, 1831. Among his works are, Continua seu Poema Hebraicum (Turin, 1764):—Della Lingua Propria di Cristo e degli Ebrei della Palestina del Tempio de' Maccabei (Parma, 1772):—Della Vana Aspettazione degli Ebrei del loro Messia (Ibid. 1773):—Variae Lectiones Veteris Testamenti (Ibid. 1784-88), a most valuable contribution to Biblical criticism (p. v.):—Introduzione alla Scorsa Scrittura (Ibid. 1817).

Rossi, Pasquale, called Passquinu, a painter of frescoes, was born at Civita in 1641, and died about 1718. His works are to be found in the principal galleries. Among them are, Christ in the Garden:—The Baptism of Christ:—St. Gregory Celebrating Mass:— and the Adoration of the Shepherds.

Rossignol, Jean Joseph, a French Jesuit, was born at Pise, among the Upper Alps, July 8, 1728. He joined the Order of St. Ignatius in 1742, and taught philosophy at Embrun, near Marseilles. In 1761 he went to Wilna, Poland, and there taught mathematics and astronomy, and constructed the observatory of the city. In 1764 he took the chair of mathematics in the College of the Nobles at Milan, and here he published his book. On the suppression of the Jesuits he settled at Embrun; but on account of the violent opposition which he showed to the civil constitution of the clergy, he was obliged to establish himself at Turin. Here he was maintained by the liberality of count de Melzi, a former pupil. Rossignol died in 1817. His works were numerous and great, and exceed one hundred, but they are very rare. The principal ones are, Theses Generales de Theologie, de Philosophie, de Mathematiques (1757):—Theses de Physique, d'Astronomie, et d'Histoire Naturelle (1759):—Vues Philosophiques sur
ROSSIGNOLI 139  ROSZEL

ROSSIGNOLI, Bernardo, an Italian theologian, was born at Ormea in 1565. At the age of sixteen he joined the Society of Jesus, subsequently taught theology at Milan, was rector of several colleges, and was president of the universities of Naples and Padua. At the time of his death, June 5, 1613, he was rector of a college at Turin. Rossignoli's writings are: De Disciplina Christiana Perfectionis Lib. I. (Ingolstadt, 1600) — De Actionibus Virtutis Lib. II. (Venice, 1608). These two works passed through many editions, and the first was translated into French (Paris, 1618), and into German (Leipsic, 1624). The works have been attributed to Rossignoli, but it is probable that he was merely the translator. At the time of the interest excited in the De Institutione Christi, Rossignolli was the first to attract attention to the MS. of this work, bearing the name of Jean Gerson. See Rossotto, Syglogus Script. Pedemontini.

ROSZEL, Carl Gottfried, a Lutheran divine, was born in Leipzig. He was first deacon at Merseburg, and afterwards superintendent at the same place, where he died, Aug. 16, 1837. He published Predigten und Gelehreisreden (Merseburg, 1828) — Die Schriften Sacrae Vssione a Luthero Temporibus unde ad nostra saecule in Ecclesia Evangelica Lingue Latina sermonem constiter censa posuerunt (Leipsic, 1796). See Zschuhl, Bibl. Theol. p. 1088; Winer, Handbuch der theolog. Literatur, ii, 108, 788, (B.P.)

ROSSO (in French, Roux), Giovanni Battista del, an architect and painter of the Florentine school, was born at Florence in 1460. It is not known whether he ever studied under any of the masters of his time, but his style was probably formed by copying the works of Angelo and Parmigiano. His life was one of agitation, and, during his earlier years, a continued disappointment. Finding that his work was not appreciated in his native city, he left for Rome. Here his success was somewhat greater; but, after the sack of the city in 1527, he fell into the hands of soldiers, who robbed him of all he possessed. He went to Perugia, and after the city was quieted, returned to Rome. In 1530 he went to France, where he was well received by Francis I; and his troubles seemed at an end. He was superintendant of the works at Fontainebleau, and many of the frescoes are in his own hand. During the triumphal passage of Charles V through France, the arches which were erected in his honor were designed by Rosso. As a reward for his work, Francis added to the pension of the artist and gave him a canonicate in the Sainte-Chapelle. He lived in luxury and high favor at court; but an unfortunate affair, involving his honesty, so wrought upon his mind that he poisoned himself in 1541. The pictures of Rosso are not often seen in galleries, but there are a few which may be mentioned: Moses Defending the Daughters of Jethro; — The Four Seasons: — Christ in the Tomb; — Madonna, with St. Sebastian and other Saints, — and the Marriage of the Virgin.

ROSTAGNO, Francesco Ghergo, a minister of the Waldensian Church, was born in the year 1838 in the village of Prali, in the mountains of the Alps. Delicate health prevented his going to school till he was about fifteen years of age; but, being a diligent student, he soon acquired the necessary requirements to make him a useful minister of the Gospel. Being thoroughly acquainted with the Italian language and literature, he wrote many articles for the Revista Cristiano, his last being on the "Religion of Alessandro Manzoni." In the year 1866 he was ordained for the Waldensian ministry, and a year afterwards he was put in charge of the church of Verona, where he labored until 1872. He was then called to Leghorn; and at this important and difficult post he not only supplied the spiritual wants of his own coreligionists, but also arranged to give a course of addresses especially to Jews upon the subject of the need of the Messiah—"What say the Scriptures about His Coming?" "Jesus of Nazareth Borne Testimony to in the Old Testament, in the Prophecies, and the Types." But soon he was removed from his earthly station, and died in January, 1874. See Jewish Intelligencer, 1874, p. 85 sq. (B.P.)

Rosweyde, Hendrick, a Dutch Jesuit and historian, was born at Utrecht, Jan. 22, 1669. At the age of twenty he entered the Society of Jesus, taught philosophy at Douai and Antwerp, and finally gave his whole time to the study of ecclesiastical antiquities, exploring the libraries of all Europe in search of information on the subject. Rosweyde died at Antwerp, Oct. 5, 1629. His works are numerous, and were all published at Antwerp. Among them are, Faziata Sanctorum (1607) — Vita Patronum (1615) — Historia Ecclesiastica (1625): — Vita Sanctorum Virgum (1626). See Foppens, Bibl. Belgica; Dupin, Bibl. des Auteurs Ecclésiastiques.

Roswitha, a nun of Gandersheim, in Brunswick, Germany, who lived at the close of the 10th century, and is noteworthy because of certain poetical compositions from her pen which have come down to our time. They are written in rhymed hexameters, and include panegyrics on the Virgin, St. Ganguil, St. Dionysius, St. Agnes, the Virgin, etc. Roswitha was a popular writer of German and Latin comedies in prose, after the manner of Terence, in which she celebrated the victory of heavenly over fleshly love, and of Christian martyrdom over heathen passion, and two historical poems in hexameter—one of which rehearses the history of her convent, and the other that of the emperor Otho I (Carminum de Gestis Ottomana Imperatoris). The latter possesses some historical interest, though based on the statements of the friends of Otho and showing marks of her ignorance of the world. It contains much fine description, and is written in superior language. Its form approaches that of the Latin epic, particularly that of Virgil. The Carmen de Primaevae Cenobii Gandersheimensis includes the family history of the house of Saxony, and thus becomes somewhat important to general German history.

Roswitha's works were first published by Conrad Celtes (Nuremberg, 1501, fol.). Pertz, Monumenta Hist. Script. iv, 305-353, contains the two historical poems and a life of Roswitha. A complete edition was given by Dr. Barrach, of the Germanisches Museum (1857). See Größer, Kirchengeschichte, III. 1837; Conzten, Geschichte des sächsichen Kaiserzeit (Regensburg and Augsburg, 1867), p. 109 sq.: Giesebrecht, Geschichte der deutsch. Kaiserzeit, i. 742.

Roszel, Stephen Abury, son of the following, was born in Georgetown, D. C., Feb. 18, 1811. At the age of seventeen he had made himself acquainted with the whole course of English and classical literature required for graduation from the best colleges. His conversion took place in his sixteenth year, and about the same time he became associated with his brother in a classical school in Baltimore. He studied law and was admitted to the Baltimore bar, but soon decided to give up the profession. He acted for several years as principal of the grammar-school of Dickinson College, and in 1858 was admitted to the Baltimore Conference on trial. He dissolved his connection with the institution in 1839, sustained a supernumerary relation for a year, and then resumed active work. He was elected in 1848 a delegate to the General Conference held at Pittsburgh, Pa., and was for eight years secretary of his own conference. He died in Alexandria, Va., Feb. 20, 1852. See Minutes of Annual Conference, i, 19, 10.

Roszel, Stephen G. a minister of the Methodist Episcopal Church, was born in Loundon County, Va., April 8, 1770. He was converted at the age of sixteen and soon after united with the Church. He entered the travelling connection in 1789, although, for some reason, his name is not found on the minutes until the
following year, when he appears among those who remain on trial. He served the Church as preacher in charge, presiding elder, as agent for Dickinson College, and in the General Conference, until his death, which took place at Leesburg, Va., May 14, 1841. See Sprague, *Annals of the Amer. Pulpit*, vii, 179; *Minutes of Annual Conferences*, 1842.

**Rosfeld** (in Latin, *Rosinus*), Johann, a German antiquary, was born at Eisenach in 1551. He studied at Jena, and in 1579 became sub-director of the gymnasiun at Hatisbon, but after a few years he gave up this position to enter the evangelical ministry, and preached at Naumburg, in Saxony, until his death by the plague, Oct. 5, 1626. His principal works are: *Antiquitatum Romanarum Corpus Absolutissimum* (Bassel, 1588; Lyons, 1589)—*Exempla Pietatis Illustris* (Jena, 1602).

**Rota**, in Norse mythology, was one of the Walkures, or Odin's messengers, to select the victims who were to fall in death.

**Rota**, in Lapp mythology, was an evil god of hell, the ruler of the place of punishment for the souls of transgressors.

**Rota Romana** (or *Sacro Rota*), the supreme papal tribunal at Rome, was instituted by pope John XXII in A.D. 1326, and improved by Sixtus IV and Benedict XIV. The name is variously derived from the circular arrangement of the judges' seats, or the form in which the calendar is arranged, etc.; comp. Dom. Bernino, *II Tribunale della S. Rota Rom.*, (Rome, 1717) for etymology of the title and history of the court. The Rota was long the supreme court of the entire Roman Catholic Church; but legal causes in the Church in foreign parts are now generally tried by *judices in partibus* who have been delegated by the pope. The Rota is divided into three colleges, or senates, one of which forms a lower court of appeal, while the other is the supreme jurisdiction. Each senate is composed of at least five judges, namely, a referendary (termed a *ponens*), who presides, and four associates (*correspondentes*). The action of the higher senate may, however, be subjected to the process of *restitutio in integrum*, on which the matter is referred to the plesum of the Rota. This plesum consists of twelve members (*Editors Romani*, or *Audirens Rote*), each of whom is assisted by a lawyer (*adjudicata di studio*). The senior judge is designated dean, and takes the chair. Sessions are held on Monday and Friday of every week, except in the vacation during August and September, in the Vatican Palace. The decisions of this court have been gathered into different collections, the first in 1470, etc. A more recent edition containing selected trials is *Decis. S. Rote R. Recensiores Selecta* (Venet. 1697, xxv parts in xix vols. fol.). They are also published in full in annual issues. See *Curia Romana*.

**Rote**, a medieval musical instrument, not unlike the ancient *psaltery*.

**Röter** (Rotger, Rutgers), archbishop of Treves from 1818 to 226. He was chosen, without intervention of the king, by the clergy and people of the Church of Treves, and by the wisdom and energy of his administration justified their choice. He induced Giselbert, the duke of Lorraine, to restore the abbey of St. Servetus at Maastricht, which he had seized, to the archbishopric of Treves, and was the leading agent in overcoming the resistance of the Elector, who sought to depose him. He continued, after the usurper Rudolph of Burgundy after that province had been forever ceded (293) to Henry, king of Germany. He also sustained a literary intercourse with Flodoard of Rheims, the learned author of the *Hiat. Rhenens*., and induced him to write a large poetic work on the Citeaux and various Passionist and Italian saints, the manuscript of which was still preserved in the library of the cathedral at Treves in the 17th century. His principal ambition, however, was to regulate the affairs of the Church in the province of Treves, and to administer the canons in the spirit of the council. He accordingly instituted a collection of canons from the father works of magdeburgian and a provincial synod of the suffragans of Metz, Verdun, and Tull at Treves in 927. See Wetzer u. Weite, *Kirchen-Lex.* s. v.; and comp. *Hist. de la France*, vii, 201–203. *Brower, Annal. Triv. Lib.* ix, 64–79.

**Rötgé**, Gottfried Sebastian, a German doctor of theology, was born at Klein- Germersheim, not far from Magdeburg, April 5, 1749, and died May 16, 1831, as director of the cloister school and provost of Magdeburg; he was called *Vorarach einer reformationsgeschichte* (Magdeburg, 1792)—Kirchliche Gebetstunden (Bonn, 1824). See Winer, *Handbuch der theolog. Literatur*, i, 806; ii, 283, 389, 738. (B. P.)

**Roth**, Karl Johann Friedrich von, juris ultrœque doctor, and during twenty years president of the Protestant high consistory at Munich, fills an important place in connection with the history of the Church in Bavaria from 1828 to 1848. He was born at Vahingen, in Württemberg, Dec. 6, 1789, and trained as a student to the ancient languages from early childhood. In his youth he shared in the enthusiasm of the times for theories set afoot by Voltaire and still more by Rousseau, and consequently chose the law for his profession instead of theology, as both his father and himself had originally intended. Entering the University of Tubingen, he found a judicious guide in Mahlland and, through the study of the sources of Roman law, acquired the historical faculty which distinguished him through life. At the age of twenty-one he published a treatise, *De Re Romanorum Municipali*, which won for him the doctorate of laws and secured the approval of prominent legal minds. He became jurisconsult to the then free city of Nuremberg, in which position he was led to study the subject of finance, which he had not previously examined; and when the city was transferred to Bavaria he entered the service of that kingdom in the finance department. He was elected to membership in the Royal Academy of Sciences in 1813; and the publication in 1817 of the Weisheit Dr. Martin Luther's—extracted apothegms from the reformer's writings—and of *Hamann's Werke* in 1825 gave evidence that his conversion to orthodox views in religion had progressed side by side with his growing attainments in scientific culture. In 1828 king Louis I appointed him to the presidency of the Royal University of Munich. When Roth received this appointment, the reaction against rationalism had begun, and a number of clergymen were conducting a brave battle for its overthrow. The attitude of Roth, who made it his business to foster the good wherever it might exist, gave them the encouragement they needed for a successful prosecution of their task. In other respects his work was marked out for him. His department was thoroughly organized into a high consistory, three consistories, and a number of deaneries, with district and general synods having advisory jurisdiction and the right to propose measures. It was requisite that this machinery should be quietly but firmly put into operation under the watchful eye of the president of the Royal University. When Roth received this appointment, the reaction against rationalism had begun, and a number of clergymen were conducting a brave battle for its overthrow. The attitude of Roth, who made it his business to foster the good wherever it might exist, gave them the encouragement they needed for a successful prosecution of their task. In other respects his work was marked out for him. It was requisite that this machinery should be quietly but firmly put into operation under the watchful eye of the president of the Royal University.
syste matically oppressed and the Roman Catholics fa
ered. An order by which all soldiers, including those of the Landwehr, which consists of citizens, were obliged to kneel whenever the Romish Sanctusmissum should be car
ried about excited great dissatisfaction; and Roth was censured in this business because it was believed that he had been timid or indifferent in contending for the rights of Protestants. Later events have shown that he was acting from prudential motives which would not permit him to risk all while striving to se

cure a particular end; but the feeling against him rose to such a height as to compel his retirement from the high consistory in March, 1848. The epheorate was likewise rejected by the students in that year of revolts. The result of the persecution was, however, beneficial to the cause of Protestantism in the end, because it united its adherents, increased their spirituality, and settled their determination to insist on a recognition of their rights; and at the proper moment a letter to the king from Roth secured a revocation of the military or
der which was so greatly resented. Roth was, soon after his return, called to a seat in the council of state; but, after completing the fifth year of his of

cicial life, he sought and obtained a dismissal to private life. He died Jan. 21, 1852. A collection of Roth's writings was published by himself at Frankfurt, con

sisting chiefly of pamphlets and addresses. He also edited the Geschichte der evangelischen Kirche of his own and with reviews of English, French, and other foreign works.

**Rothaan, John Philip**, a Dutch Jesuit, was born Nov. 28, 1765, at Amsterdam, entered, Feb. 3, 1804, at Dinaburg, in Russia, the Society of Jesus, and became professor of rhetoric, Greek, and Hebrew at Po

lesk, in Russia. When the Russian empire, he retired into Switzerland, and in 1829 was elected vice-general of the order. Being obliged to leave Rome on account of the Italian revolution, he visited a great part of the European provinces of the Jesuits, returned again to Rome, and called together a general congregation of the order; but before it convened he died, May 8, 1833. He published, Exercitii S. P. Ignatii Loyolae (Rome, 1855; Paris, 1856; German translation, Regensburg, 1855)—De Ratione Meditandi (Rome, 1847; German translation, Regensburg, 1853; Vienna, 1857). (B. P.)

**Roth, Richard**, an eminent German divine, was born at Posen, Jan. 28, 1759, and became successively member, professor, director, and koeppen of the Theological Seminary of Wittenberg. He was one of the young champions of the Prussian embassy, conducted a theological seminary at Heidelberg for twelve years, and was a professor of theology at Bonn and Heidel

berg, where he died, Aug. 20, 1867. His religious views are tinged with the philosophy of Schleiermacher and Hegel. He published, Die Anfrage der christlichen Kirche und ihre Verfassung (1857)—Zur Dogmatik (1858)—and Theologische Ethik (1845–48; 3 vols.; rev.

ised by Holtzman, 1867–71, 5 vols., with the author's posthumous notes). Since his death there has appeared his university lectures, Dogmatik (1870); essays, Stille Stunden (1872), and his lectures on Church history (1875), edited by Weingarten. For the best account of his life, see Nippold, Richard Roth (Wittenberg, 1873). See also the Studien und Kritiken, 1869, No. 3; Meth. Quart., July, 1872; Bibl. Sacra, July and Oct. 1874. See ETHICS.

**Rothem.** See JUNIPER.

**Rotherham or Rotherham**, John, an English divine, was born in Cumberland, and admitted fellow of Univer

sity College, Oxford, rector of Houghton-le-Spring, and in 1769 vicar of Seaham. Rotheram died in 1788. Among his published works are, Sketch of the One Great Argument for the Truth of Christianity (Oxford, 1752–

1800);—Force of the Argument for the Truth of Christianity from Prophecy (3d ed. 1763, 8vo);—Origin of Faith (1761, 8vo)—Apology for the Athenian Creed (Lond., 1762, 2 vols. 8vo);—On Faith (1766–68, 8vo)—besides Sermons and Essays.

**Rothwell, Richard**, an English divine, was born in Lancashire, near Bolton-in-the-Moors, about 1563. He received his education at Cambridge, and, after spending a number of years in the university, was ordained preacher by Dr. Whitgift, archbishop of Canterbury. He was made chaplain to a regiment under the earl of Essex in Ireland; and afterwards, refusing several benefices, was for a time lecturer at a chapel in Lancashire, and domestic chaplain to the earl of Devonshire. Still later, he spent most of his time in the bishopric of Durham, having gone there at the proposal of lady Bowes. His death took place in 1627.

**Rotuman Version.** About 300 miles north of Fiji is an island called Rotumah, with a population of less than 3000, and—until lately wholly enveloped in heathen darkness. In 1865 the Rev. W. Fletcher, of the Wesleyan Missionary Society, commenced missionary work among them, and his labours in that place resulted in bringing a large proportion of the population under the influence of the Gospel. In the year 1869 Mr. Fletcher commenced a translation of the New Testament in the Rotuman dialect, which was printed at Sydney, and has been in circulation since 1871. Mr. Fletcher, in consequence of his extremely trying character of the climate, was compelled to leave the island, but his translation was prepared with all possible promptitude. European missionaries are not allowed to reside permanently in Rotumah, and the future progress of the mission must depend mainly on the efforts of native teachers and the presence among the people of the Word of God in their own vernacular. (B. P.)

**Rouel (or Rouel) Light** is a device for moving the star in the Epiphany play of The Three Kings with a pulley-wheel (roue), as the spiked wheel in a spur is called roufe.

**Rougemont, François de**, a French Jesuit mission

ary, was born at Maestricht in 1624. In 1641 he joined the Jesuits, and, as was customary, was for a time employed in teaching, but at his urgent request he was finally sent to missionary work in China with several of his brethren. They arrived in that country in 1659, and for some years Rougemont had charge of several churches and missionary stations in the prov

ince of Nankin. During the persecution of 1664 he was, with many others, carried in chains to Canton, and thence to Han, where he was for a long time held prisoner. But an edict of the emperor Kang-hi gave him liberty in 1671, and he returned to his work of preaching and teaching. Rougemont died at Tatsang-chow in 1763. His writings are, His

toria Tartaro-sinica Nova (London, 1673); this was written in the prison at Canton:—Abrégé de la Doctrine Chrétienne:—Questions sur les Lois du Siecle. The last two were written in Chinese, and have never been translated. See Sotwell, Bibl. Scriptor. Soc. Jea.

**Rouillé, Pierre Julien**, a French Jesuit, was born at Tours in 1681, and died in 1740. He was one of the authors or compilers of Mémoires de Trousseau.

**Romania.** See RUSIA; TURKEY.

**Romonian (or Wallachian) Version.** The people for whom this version was made are descendants of the Dacians, and of the Roman colonists who settled in the country after its subjugation by Trajan. In consequence of their Roman origin, the Wallachians style themselves Rumânie, and are commonly known to other nations as the Rouman race. The language spoken by that people contains a large number of pure Latin words,
but about half of the Walachian words are borrowed from the Greek, the Turkish, and the Slavonian. The first translation of the Scriptures into that language was made by the metropolitan Theodotius, and was printed in 1668 at Bucharest; while prior to this, in 1648, the New Test. had been published in Belgrade. Another edition was published in 1714, and a third, at Blajé, in Transylvania, in 1730. In the year 1816 the Russo-Slavonic, or the second translation of the Scriptures, was published. A new edition was published in 1854.

The Round Churches were innovations of the Holy Sepulchre at Jerusalem, the nave being round and forming the vestibule of an oblong church, as in the Temples of Jerusalem, Egypt, and Persia. Similar buildings were afterward undertaken in Scandinavia and the Baltics. In many cases the shape may have been merely a mechanical contrivance to carry a dome. Circular churches occur of all dates, and distributed over most parts of Europe, either insulated as baptistries, in a mystical allusion to the Holy Sepulchre, attached as chapels to churches, or existing as independent buildings. They are sometimes of a square or polygonal form, either without recesses, except an apse or porch, such as the church of Ophir, Orkney, and the baptistery of Canterbury, or with radiating recesses, rectangular or apsidal, as the baptistries of Novara and Frejus. Sometimes a circular or polygonal centre is supported by pillars, and surrounded by an aisle of corresponding form; this aisle is repeated at St. Stephen's, Rome, and Charroux.

The Crusaders, or pilgrims, imitated the plan of the Sepulchre of Jerusalem, surrounded by a circular church, and the Martyrdom, or place of the crucifixion, by a chancel eastward of a round nave. At Bury St. Edmund's, at the 10th century, the round church moved, the body of St. Edmund from the "round chapel" to the new church; and this circular termination is still seen in Becket's Crown at Canterbury, in Sena, Burgos, Batallia, Muncia, and Drontheim. After the middle of the 13th century round churches were no longer built. Almost all the German churches of the time of Charles-magne were circular, like Aix, Nimeguen, Petersburg, and Magdeburg.

The Round Towers occur of the time of Justinian, attached to the Church of St. Apollinaris-ad-Claueum, in Verona; two in the same city, cit. 1047; others of minaret-like shape, and divided by string courses, at St. Mary's and St. Vitalis, Ravenna; also at Pisa, Bury, near Beauvais, and at St. Desert, near Châtillon-sur-Saône. The French round towers appear to have come from the English, or at least from the Saxon. In the South the towers were erected at Centula, Charroux, Bury, and Notre Dame (Poitiers), Gernrode, and Worms. Those of Ireland are mainly of the 11th or 12th century, though some are of an unknown date, and were at once treasuries, belfries, refuges, and places of burial. Round towers are found in East Anglia, at Bicknuggle Inferior, at Welford and Shefford, Bucks; Welford, Gloucestershire (13th century); in the Isle of Man, at Bremblest, Breconshire, Brechin, built by Irish ecclesiastics (cir. 1020); Abernethy, and Ternuguil, near Kief (cir. 1024).

The East Anglian form, and those of Piddington and Lewes, have been attributed to the peculiar character of the materials employed, and a desire to evade the use of coigns. At Brixworth a round is attached in front of a square tower.

**Rounds.** Nelson, a minister of the Methodist Episcopal Church, was born in Winfield, Herkimer Co., N. Y., May 4, 1867. He was converted at the age of nine years, and graduated at Union College, New York, in 1884. On June 24, 1881, he was licensed to preach; and July 1, 1884, he was admitted on trial in the Oneida Conference. In 1886 and 1887 he was professor of ancient languages in Cazenovia Seminary; then served as presiding elder of Cayuga District two years, and of the Chenango District four years. In 1894 he was elected editor of the Northern Christian Advocate, where he served four years. When the Western Conference was formed, he became a member of it, and labored within its bounds until 1897, when he became superannuated. The next year he took an effective relation and was soon transferred to the Oregon Conference, and elected president of the Willamette University at Salem, which position he held for two years. In 1897 he was named to the newly created position of Conference Theology as superintendent of public instruction, which office he held until within two months of his death, in Clark County, Wash., Jan. 2, 1894. See Minutes of Annual Conferences, 1874, p. 83.

**Rous, Edward D.,** a minister of the Methodist Episcopal Church, was born at Ithaca, Tompkins Co., N. Y., Dec. 6, 1839, and educated at Cornell College, and studied at Lima, N. Y. In 1862 he was received on trial in the EastGenese Conference, from which he was transferred, in 1863, to the Upper Iowa Conference. In 1886 he received a superannuation relation, and located in 1898. In 1873, he entered the Central Conferences, and died in Westfield, Tioga Co., Pa., May 6, 1875. See Minutes of Annual Conferences, 1873, p. 130.

**Rouse, Peter P.,** a clergyman of the Reformed Church in America, and the son of a respectable farmer, was born at Catskill, N. Y., March 29, 1799. He graduated at Union College in 1818, and at New Brunswick Theological Seminary in 1821; was settled in Florida, N. Y., 1825; and in 1829 joined the Reformed Church, Brooklyn, from 1828 to 1838. He was a good scholar, an animated, instructive, and eloquent preacher, and a thorough pastor. His brief ministry was closed by death, from hemorrhage of the lungs, in June, 1838; the immediate result of intense feeling produced by a pastoral visit to an afflicted parishioner. His memory is cherished by a strict affection in his parish, the love of his former parishes, and the affectionate address and name which he was an ornament. He departed this life in Christian triumph. See Sprague, Annals of the Amer. Pulpit, ix, 203. (W. J. B. T.)

**Rousseau, Jean Jacques,** the brilliant genius who divided with Voltaire the rule over the almost boundless republic of French culture in the 18th century. His name is a legend of names and of contractions, but it is possible to distinguish it in three periods. 1. The Period of Early Adulthood (from his childhood to 1749).—Rousseau was born at Geneva, June 28, 1712. His mother died in giving him birth, and his father early turned him over to the care of an uncle. He became first a copyist to an attorney, and then apprenticed to an engraver on copper. He was from early childhood an insatiable reader of romances, and an enthusiastic admirer of nature; nor is it unimportant to notice that at the age of nine years he had already devoured Pitarch. The charms of nature and of a circulating library were too strong for his fidelity to duty. He neglected his studies, was dismissed by his master, and ran away. At this time he first made the acquaintance of Madame de Warens at Annecy (her "mamma," as he was wont to term her), and was by her persuaded to become a Romanist.
earn his bread, he entered the service of a noble lady, and in that condition committed offences which he had the baseness to charge on an innocent girl. He soon removed to Paris, and, obtaining for him admission to a seminary for priests, where he renewed the musical studies of his earlier years, but did nothing else. Thence he went to Lyons with a music-teacher, and afterwards to Lausanne and Neuchâtel, in which places he endeavored to establish himself in the same manner as in the glided. Other situations were occupied by him in swift succession, but in the end he is found once more with Madame de Waren, who now lived at Chambéry, and permitted Rousseau to lead an idyllic life on her farm at Charmettes, while at the same time sustaining improper relations with him. His growth towards culture had in the meantime been steady. He was acquainted with much of the current literature, even of England, and had given thought to religious questions. He now added the study of Latin and mathematics, and also of philosophy in the works of Locke, Leibnitz, Malebranche, Descartes, etc. His earliest comedies and operas were written in this period, which, however, soon came to an end by reason of the failure of his health. His relation with Madame de Waren was definitely broken off by his removal to Montpellier in 1757. After a brief sojourn in Lyons, he went to Paris, where he arrived in 1741, hoping to make his fortune there as a composer of comic operas, but though his treatise was read before the Academy of Sciences, it was not approved. His next venture was an opera entitled Les Muses Galantes, which likewise proved less successful than he expected. In 1743 he was made private secretary to Count de Montaiglon, whom he accompanied to Venice, returning to Paris after an absence of eighteen months. With his entrance on a lawless relation with Theresa Le Vasseur, a thoroughly uncultivated character of low antecedents and utter ignorance, whom he did not profess to love, but whom he made his wife after years of illicit connection, and whose parents he received into his care, the first division of his life may close.

2. The Period of his Triumphs (1749-62). - The Academy of Dijon in 1749 offered a prize for the best essay on the question, 'Whether the re-establishment of the sciences and arts has helped to purify manners?' for which Rousseau competed with success. He ascribed the present manners being needed to redeem and improve nature, and argued the pessimist view with such force and brilliancy of style that he was at once assigned a place as a writer of prose by the side of Voltaire. The book was thoroughly adapted to the times, when hearts throbbed with intense desire to produce, but nature had been confounded by the conditions that prevailed in culture and in practical life, and when longings had been stimulated by the appearance of books like Robinson Crusoe, Thomson's Seasons, etc., in which the bliss of a state of nature was celebrated. The gospel of nature was in vogue, and Rousseau became its leading prophet. Yet it was at this time that he chose to add one more to the many paradoxes of his life, by availing himself of the celebrity he had attained to secure employment in copying music as a means of livelihood. In 1752 he published the opera, Le Devin du Village, by which its musical reputation became established; and in 1758 he discussed a second prize question presented by the Academy of Dijon, and relating to the inequalities existing in the conditions of mankind. His book, Discours sur l'Origine et les Fondements de l'Inégalité parmi les Hommes, takes the ground that human society, considered as a natural and causeries, and therefore sustains a relation independent of nature, i.e. as to divide nature and appropriate it to individuals. Rousseau does not place all men on the same level, as if they were merely so many animals. He admits the existence of physical, mental, and spiritual differences. But he declares that the first man to fence off a piece of land and claim that it belonged to him, and find people to concede his claim, was the founder of society. He evidently regards property as an egoistical robbery. He regards the common good as both required and conditioned by morality. This book also was in harmony with the spirit of the time, though its effect was not fully displayed until a later day; and Rousseau himself was so fully in sympathy with its teachings that he felt driven to forsake Paris for a season of communion with nature in his native town, though the growing coolness between himself and his friends— to which his letters on French music contributed largely— was not without influence in bringing him to that determination. He recovered his forfeited citizenship at Geneva by returning to the Reformed faith, and enlightened to call himself 'Citoyen de Genève.' He found, however, that he could not remain away from Paris, especially after his adversary Voltaire had established himself at Ferney; and his return was signalized in 1760 by the publication of the romance La Nouvelle Héloise, in which the ideas of his two previous works are combined, and in which great brilliances of style conceal grave faults of composition. It was also significant because of moral, social, and religious reflections in its pages, which foreshadowed Rousseau's later positions.

The two constructive works from Rousseau's pen, Le Contrat Social and Emile, appeared in close succession in 1762. The latter book was directed against abuses in the training of the young, and effected a complete revolution in European pedagogics; but while it antagonized many real errors, it at the same time assailed the fundamental conditions upon which all youthful training must rest. Nature again is the key-note to which the argument is attuned. Each child, so runs the demand, should develop its own nature from the beginning, without being placed under adult human guidance—that nature being its individualistic qualities. The object is to train the man, who exists for himself, and is contrasted with the training of the citizen, who exists for society, though the contrary object is enforced in the Contrat Social. This egoistic nature is represented as an ideal nature which needs only development, but not redemption and regeneration. Emile finds his religious perfection in deism, not in Christianity. In the Précis de l'Histoire de l'Humanité, Savoyard, Rousseau nevertheless assails the materialism and atheism of his former friends, and insists on the three fundamental theistic truths—God, liberty, and immortality. He contends against revelation, but yet utters sentiments of reverence for the Gospel on account of its exalted character and declares that 'if Socrates died like a philosopher, Christ died like a God.'

The effects produced by the Contrat Social in the political world were less rapid, but more profound, than that occasioned by the Emile in pedagogics. The ideas which ripened into the French Revolution were sown in the days of the Massacre of St. Bartholomew and during the reign of Louis XIV; but they found in Rousseau's book a spark which kindled them into a flame, ultimate in that furious blaze. The Contrat Social determined the scope of ideas at the beginning of the Revolution, conducted affairs to more or less advantageous consequences, and furnished the watchwords—all the cry—of "Liberty and equality." The book has no conception of the historical and rightful relation of the individual citizen to national and political authority; and of the supreme law of right above even such authority. It is a conception of nature not political, and cannot be maintained as the place as a person under the divinely instituted order of things in this world, but to cultivate the idea that the state rests simply on an original agreement between individuals, according to which the community stands pledged to protect the person and property of the individual, while the individual has bound himself to live
in entire subordination to the community. The citizen is accordingly altogether dependent on the community. He ought therefore to accept the religion appointed by the state or suffer banishment, or, in case of resistance, death. As Rousseau recognises no representation of the people, nor yet any form of government that may not at any moment be overturned by the community of citizens, he really passes beyond every limit of a republicanism which admits the general authority and subject, and of political and religious conditions, and draws the first lineaments of socialism. Yet he was too much a dreamer to suspect the consequences that must spring from such ideas. In 1766 he declared to a pseudonymous Cassius who offered to reconcile the two principles of freedom and authority, that he must, like the people, that he abominated every such undertaking; and when disorders broke out on the occasion of the burning of his Émile at Geneva, he pacified the people himself.

Of Rousseau's minor works, the Lettre à M. d'Alembert sur les Spectacles is a determined protest against the establishing of a theatre at Geneva; the celebrated Lettre à Christophe de Beaumont was a response to a prohibition of the Émile by the archbishop of Paris, and the Lettres de la Montagne form a similar rejoinder to the magistracy of Geneva. These letters have been compared with those of Junius, or of Lessing against 1766.

The troubles of Rousseau began to germinate at the time of his highest prosperity. His ardent and sensitive nature was out of place in the circle of cold and cynical mockers by whom he was surrounded, and the frankness with which he uncovered his inmost experiences to their gaze made him an object of their merciless Witticisms and sarcasms; and when he proceeded to assail their cherished idols and to contend for God, virtue, and immortality, he brought on himself the full weight of their hatred in the form of incessant malicious sneers. Other matters contributed to fully disgust him with the situation. He burned with ill-concealed love for Madame d'Houdetot, whose relations to her husband were unhappy, but who adored the poet Lambert instead of Rousseau. He broke decidedy with Diderot. He participated in false gossip derogatory to Madame d'Épinay, who had been his patroness and had permitted him to occupy her summer-house in the mountains since 1764. He spent 1768 to 1769 in another house near Montmorency, and in the latter year encountered the storm which broke out against his Émile. This event forms the proper opening of a new period.

3. The Period of Unsettled Wandering and Moral Struggle. It is probable that a government which tolerated an entire school of atheistical mockers of religion in Paris should have condemned as good-natured the earnest deist who was alone in daring to contend for God in those circles; and equally strange that the decree of the Parisian Parliament should have condemned the Émile, instead of the far more dangerous Contrat Social. Perhaps the government which had just expelled the Jesuits may have found it convenient to persecute Rousseau, the Swiss, who had gone back to Calvinism, and who had dared to represent a Romish priest as affording a charming illustration of delusion. To avoid arrest, he fled to Yverdon, in Switzerland; but the Geneva see was not sufficiently far away, for he was identified from his book which had reached that city. He renounced his citizenship and turned aside to the canton Neuchâtel, where he lived from 1762 to 1766 under the protection of Frederick the Great of Prussia. He wrote the Lettres de la Montagne, pursued studies in legislation in behalf of the Corsicans, and founded—shaggy and uncouth—his newspaper, instituting his favorite employments. The glossing tongue of his mistress, Theresa, succeeded, however, in rendering him suspected of irreverence by the pastor and peasants of Motiers-Travers, where he resided. He imagined himself no longer safe, and fled the canton. In 1765 he accepted an invitation from Hume to visit England, but even here his mania of suspicion controlled him. He included Hume in the number of his foes, and removed to the house of a new friend, Davenport, where the objection of individual Englishmen to his relation with Theresa drove him back to France in 1767. He went under the assumed name of Renon to Castle Trye, a possession of Prince Conti, and, after further travels, back to Paris. Then in 1770 he suddenly at Ermenouville, near Paris, July 2, 1778—whether of disease or of poison administered by himself is not known. He was received into the Panthéon Oct. 11, 1794.

The European and even world-wide reputation which Rousseau had acquired was increased by the fact that he was induced in the last period of his life to compose the Lettres sur Législation des Corse and the Considérations sur le Gouvernement de Pologne (1772); and his mental force is apparent in the ability to write his Confessions at a time when his soul was darkened with the clouds of morbid and imaginary fears. His native frankness for a very minute and picky book, but few errors are so interwoven with virtues and attractive features that the result of the whole is a glorification of himself. The book may be regarded both as a companion-picture and a contrast to the Confessions of Augustine. Such contradictions are characteristic of the man in every relation. He was immeasurably vain, selfish, changeable, unfaithful, and ungrateful—easily provoked, always suspicious, and morbidly misanthropic. As a reformer, his merit consists in having opposed to the godless humanism of his day the crying needs of the human heart; but he identified the empirical sinful heart with the ideal heart, individual participation in nature with personal conformity to nature, the beautiful soul with the moral spirit, the utilitarian with the practical, declaration with confession, and he therefore remained involved in contradictions to the end. In contrast with Calvin, he brought out the ideas of individual rights and of the personal dignity of man—elements of Christian truth often violently contrasted by his adversaries. He lived free under what he considered the state power over the religious worship and profession of its subjects. Compared with Voltaire, the sardonic mocker of all existing things, Rousseau commands respect by the frankness and manliness of his protests, even when they are directed against holy things. He was a man of thorough-going comprehensiveness of mind and culture, liberty and authority, individuality and society, reason and revelation, the human and the divine. In its pedagogical works, his humanism with that of Pestalozzi as does the dawn with the noon-day sun. In politics he points forward to both Mira- beau and Saint-Simon; and in philosophy, as a preacher of deism, he may be compared with Kant. For both good and evil, Rousseau was a mighty exponent of the spirit of his time, and deserves, in justice, to be studied from both points of view.

Rousseau's works were very numerous, the botanical and musical writings, among others, being especially important. The young of the 18th and 19th centuries were copied from his book. His works are likewise numerous (Geneva, 1782-90, 17 vols. 4to, or 35 vols. 8vo; Paris, 1789-1800, 18 vols. 4to, etc. German editions by Cramer, Gleich, and others). Additional matter was furnished by Musset-Pathay, in Ouvres Inédites de J. J. Rousseau (Paris, 1925), and by Max Michel-Rouan, Lettres inédites de J. J. Rousseau (Anvers, and Paris, 1858). Musset-Pathay also wrote a Histoire de la Vie et des Oeuvres de J. J. Rousseau (ibid. 1821). See also Girardin, Sur la Mort de J. J. Rousseau (ibid. 1824); Villaine, Cours de l'Écriture Française (Vingt-deuxième Léon); the
ROUSSEL

Works on the history of literature by Vinet, Demo-
gost, etc.; Schmidt - Weisenfel's, Geschichte der fran-
zösischen Revolutionsliteratur (Prague, 1859), p. 16.

ROUSSEL, GÉRARD (Lat. Gerardus Rufus), bishop of
ÎléÔen, in France, and reformer, was born at Vaquerie,
near Amiens, and became a student at Paris, where Le-
ferre d'Epalles convinced him that man is saved only
through faith in the civil law, but that such faith may
consist with the practice of the external forms of Ro-
manism, they being regarded as indifferent matters.
When Leferre was accused of heresy and obliged to flee
to his bishopric at Meaux in 1621, Roussel followed, and
remained at Meaux until compelled to seek a refuge
against imprisonment for heresy himself, when he es-

dtablished himself in the house of Guillaume Dugay.
In 1536 Francis I recalled the fugitives, and Roussel be-
came court preacher to Margaret of Orleans, in that po-
tion faithfully preaching evangelical doctrines, but re-
taining the usages of Rome. On the marriage of Mar-
garet with the king of Navarre (1527), Roussel became
her confessor. In 1530 he obtained the rich abbey of
Clairac. In 1533 his patroness invited him to preach in
the Louvre, which he did amid great popular agita-
tion. Many Romanists were expelled the city, and
Roussel, on the other hand, was imprisoned, but after-
wards released and forbidden to preach. He returned
with his proctoress to Beauvais, and soon afterwards
obtained the bishopric of Meaux, which Calvin
ursed him strongly, because his new position would
compel him to tolerate abuses which he had for-

domerely condemned. Roussel, however, did what he
could for the welfare of his diocese, while holding an in-

termediate position between Rome and the Reformation.
He explained the Bible in his sermons, celebrated mass
in the vernacular, administered the communion under
both kinds, made provision for the Christian training of
the young, and devoted his rich revenues to the sup-
port of the poor. He also wrote Expositions, in dialogue
form, of the Apostles' Creed, the Decalogue, and the Lord's
Prayer, as guides to his clergy in the conduct of cat-
cedrical instruction. In this work Roussel occupied

thoroughly evangelical ground, if a few concessions in
r
terms to ceremonies be set aside. The only appeal is
to the Bible; Christ is represented as the only head of
the Church; faith in him as the only condition of salva-
tion. The Church triumphant is the only perfect Church,
and of visible churches that alone is a true Church in
which the Gospel is preached in its purity, and in which
the sacraments, of which there are but two, are proper-
ly administered. A subsequent tract on the Lord's sup-

church in London. He wrote Lettres sur l'État Présent de
Christianisme, etc. (Lond. 1768, 12mo; in English,
1775, 8vo).

ROUTH, MARTIN JOSEPH, an English clergyman
and educator, was born at South Elmham, Suffolk,
Sept. 15, 1755. He matriculated as a batteir at
Queen's College, Oxford, May 31, 1770; in July,
1771, was elected a deacon of St. Mary Magdalen Col-
lege, and fellow in July, 1776. He was appointed
college librarian in 1781, senior proctor in 1788, jun-
ior dean of arts in 1784 and 1785, was made bache-
delor of divinity July 15, 1786, and college bursar in
1791. He became president of Magdalen College,
April 11, 1789, which position he retained till his
death (Dec. 29, 1843). In 1810 he became rector of
Tylehurst, near Reading, where he retired for rest at
certain seasons of the year. His works were dis-
tinguished by profound scholarship and great criti-
cal acumen. His works are: Plutonius Euthydemes et
Gorgias, etc. (Oxford, 1784, 4°.)—Reliquiae Sacrae
1814-18, 4 vols. 8vo.—1844-48, 8 vols.—Bishop
Burnell's History of His Own Time (1823, 2 vols. 8vo).
annotated.

ROUX - LAVERGNE, PIERRE CÉLESTIN, a French
writer, who died Feb. 16, 1874, was for some time editor of
the Univers. When quite advanced in age, he be-
came a priest, and for many years labored as professor
of theology at the seminary in Nismes. He died at
Rennes as master of the cathedral school. He wrote:
Philosophie de l'Histoire (1850) — Philosophie juris-
Divi Thoma Dogmata (1850-59). See the Literarischer
Handweiser, 1874, p. 176. (B. P.)

ROW HERSHEY. In 1881, Mr. Campbell, minister of
Row, Scotland, was deposed by the General Assem-
bly for holding, among other errors, the doctrine of
universal pardon, and a peculiar view of the nature of
faith, quite at variance with that of the Church of
(q. v.). On some other points his views touched those
of Edward Irving, but his doctrines did not spread
to any extent. In 1856 he published the Nature of
the Atonement, in which he declares that it was not a
satisfaction, but only "an adequate repentance, in
no sense substitution," and that Christ's suffer-
ing arose "from seeing sin and sinners with God's
eyes, and feeling in reference to them with God's
heart."

ROW, JOHN (1), a Scottish divine, was born near
Sterling about 1526. He was agent of the clergy of
Scotland at the Vatican in 1550, and afterwards became
a Protestant minister. He died in 1580. He was one of
the six ministers who composed the Scottish Confes-
sion and First Book of Discipline.

ROW, JOHN (2), a Presbyterian divine, and son of
John Row the reformer, was born at Perth in 1568.
He studied at the University of Edinburgh, and was
minister of Carnock, Fifeshire, from 1592 till 1644.
His death took place in 1646. He wrote The Historie of
the Kirk of Scotland (1658-1667), which, after lying in MS.
for more than 300 years, has recently been twice pri-

vately printed, together with a continuation by his sons
at 1639 (Edinb. Maitland Club, 1842, 2 vols. 4to; 2d ed.
ibid. Wodrow Society, 1842, 4to).

ROW, JOHN (3), a Presbyterian divine and Hebrew
scholar, was born at Carnock about 1598, and was the
son of the preceding. He became one of the ministers
of Aberdeen in 1631, and in 1644 he was chosen mod-
erator of the Provincial Assembly at Aberdeen. He
was a Covenanter in the civil war; and in 1652 became
principal of King's College, Aberdeen, but resigned in
1651. He was subsequently a schoolmaster in Aberdeen,
and spent his last years in retirement in the parish of
Ki-

nellar, near Aberdeen. He was noted—and the same
may be said of his father and grandfather—for an in-

finite acquaintance with the Hebrew language. His
death took place about 1672. He published, Hebræorum

IX. — K
Linguæ Institutiones (Glas., 1684, 12mo):—Xibias Hebraicæ seu Vocabularium, etc. (1644, 12mo):—Ecclesiæ Basiliæ, etc. (Abredon, 1660, 4to). See Allibone, Dict. of Brit. and Amer. Authors, s. v.

Rowan, Arthur Blennerhasset, D.D., an Irish divine, was for more than thirty years curate of Blennerhasset, subsequently archdeacon of Ardfelt, rector of the deanery, Oxford, in 1826. In 1829 he was made a member of the Consistorial Court of Ardfelt and Aghade. He died at Belmont, Kerry, Ireland, Aug. 12, 1861. Among his publications are, Romanism in the Church, etc. (1847, 8vo):—Newman’s Popular Fallacies Considered (Dublin, 1852, 8vo):—Causality and Conscience (1854, 8vo): besides Sermons and Sketches. See Allibone, Dict. of Brit. and Amer. Authors, s. v.

Rowan, Stephen, D.D., a (Dutch) Reformed minister, was born at Salem, N. Y., 1797. After having graduated at Union College in 1804, he studied theology with Drs. J. H. Meyer and Jeremiah Romainy, and then entered the ministry in 1806. He was a popular preacher of the Reformed Church settled in the then suburbian village of Greenwich, now in Bleecker Street, New York. His labors were much blessed, until, with difficulties which arose which led to his leaving the denomination and the establishment of the Eighth Presbyterian Church in Chrystie Street in 1819. Here he ministered until 1825, when he became secretary of the American Society for Meliorating the Condition of the Jews. He visited Europe for a short time, and was an efficient officer. His fine pulpit abilities and winning manners made him many warm friends, and great success attended his pastoral labors. But his trials were oppressive, and overclouded his work sadly. He died in 1835, chasted in spirit, in firm faith, and leaving rich testimonies for the grace that supported him. See Corwin, Manual of the Reformed Church, p. 192. (W. J. R. T.)

Rowbotham, John, an English clergyman of Un- minister, Essex, during the latter part of the 17th century, ejected for nonconformity in 1662. He wrote, Preciousness of Christ to Believers (Lond. 1647, 12mo):—Exposition of the Canticles (ibid. 1651, 4to):—Mystery of the Two Witnesses Unveiled (ibid. 1654, 12mo):—Dis- quisitio in Hypothesin Baxterianam de Foedere Gratiae ab Initio, etc. (ibid. 1694-98, 8vo). See Allibone, Dict. of Brit. and Amer. Authors, s. v.

Rowe, Elizabeth, an Englishwoman noted for her personal accomplishments and elegant writings, was the daughter of Walter Singer, a Dissenting minister, and was born at Icklethorpe, Somersetshire, in 1674. She was very charitable, freely distributing to those in need. Her death occurred in 1737. Among her published works are, Friendship in Death (1728):—Devout Exercises of the Heart, in Meditation, etc. (1738, 8vo; Phila. 1850, 24mo):—Miscellaneous Works (1739, 2 vols. 8vo).

Rowe, John, a Nonconformist minister, was born at Tiverton, England, in 1627. He was educated at New Inn Hall, Oxford, and obtained a fellowship in Corpus Christi College. He became preacher at Witney and Thame in Oxfordshire, at Westmancote, and in 1681 he was ejected for nonconformity, and afterwards had a congregation in Bartholomew Close, London. He wrote, Heavenly-mindedness and Earthly-mindedness (1672, 2 pts. 12mo):—Saints’ Temptations (1674, 1675, 8vo):—Emancipatio (1680, 8vo):—Sermons, etc.

Rowe, Samuel, an English clergyman, was born in 1736. He became a bookseller, but graduated at Jesus College, Oxford, in 1756. In 1758 he was made vicar of Credenham and perpetual curate of Postbury, St. Luke, which offices he held until his death. He published, Appeal to the Rubric (Lond. 1841, small 8vo): Church Psalm-book (several editions):—also Panorama of Plymouth, and Perambulations in the Forest of Dart- moor (Plymouth, 1848, 8vo).

Rowe, Wesley, a minister of the Methodist Epis- copal Church, was born near Frankfurt, Ross Co., O., April 4, 1809. He made a formal profession of religion and united with the Church in his nineteenth year. In 1832 he was licensed to preach, and in 1834 was admitted on trial into the Ohio Annual Conference, in which, and in the Cincinnati Conference, he labored until within in a few days of his death, Feb. 8, 1862. See Minutes of Annual Conferences, 1862, p. 185.

Rowites, the name applied to the followers of Mr. Campbell, of Row, Scotland. See Row Hexsey.

Rowland, Daniel, an eminent Welsh divine, chaplain to the duke of Leinster during the latter part of the last century. He published Eight Sermons, etc. (Lond. 1774, 12mo):—Three Sermons (1778, 12mo).

Rowland, Henry Augustus, D.D., a Presbyterian divine, was born at Windsor, Conn., Sept. 19, 1804. His father was pastor of the Congregational Church at Windsor, and his mother was a relative of Rev. Jonathan Edwards, D.D. He graduated at Yale College in 1823, finished his theological course at Andover Seminary in 1827, was licensed by the Hampden Association, and ordained by the New York Presbytery Nov. 24, 1830. He began his ministry in the Presbyterian Church at Fay- etteville, N. C. In 1834 he became pastor of Pearl Street Presbyterian Church, New York; in 1835 he became pastor of the Church at Honesdale, Pa.; and in 1845 accepted a call and was in- stalled pastor of the Park Presbyterian Church, New- ark, N. J., where he labored until his death, Sept. 4, 1859. Dr. Rowland was a successful pastor and an earnest, elo- quent preacher. He labored efficiently with his pen, and in the pulpit, to promote the interests of the Re- demper’s kingdom for more than one third of a century. He was fond of literature, and wrote much for the peri- odical press; also several volumes, viz.: On the Common Maxima of Infidelity (1850, 12mo):—The Path of Life (1851, 18mo):—Light in the Dark Valley (1852, 24mo):—The Way of Peace (1855, 16mo):—Tracts on Chris- tian Church, etc., etc. Conversations on Decrees and Free Agency. Also many single sermons and articles in the New York Evangelist, New York Observer, etc. See Memorial of the Life and Services of the late Henry A. Rowland, D. D., Wilson, Prob. Hist. Almanac, 1861, p. 103. (J. L. S.)

Rowland, Thomas, a minister of the United Methodist Free Churches, England, was born in Man- chester in 1792. He entered the Wesleyan ministry in 1815, and continued to labor until 1850, when he became involved in the questions connected with the Reform movement. Refusing to apologize to the Conference for some of his writings, he was at first made supernu- merary, and afterwards expelled. He joined the Wes- leyan Methodist Church and remained among them for several years. He attended the First Annual Assembly of the United Methodist Free Churches, held at Rochdale, 1857, and died in 1858. See Simpson, Cyclop. of Methodism, s. v.

Rowrawa, one of the eight Nararras (q. v.), or principal places of torment, in the system of Buddhism.

Roy, Julian David le, a French architect and antiquary, was born in Paris in 1728, and died in 1803. He was a member of the Académie des Inscriptions et Belles-Lettres de la France (1758, corrected 1770):—Histoire de la Disposition et des Formes Différentes des Temples des Anciens Romains:—Observations sur les Édifices des Anciens Peuples.

Royyaards, Herman John, professor of theology in the University of Utrecht for more than thirty years, beginning with 1822, was born in that city Oct. 5, 1772, and died in 1833. He obtained the degree of Doctor of theology, and in the following year became pastor of the Reformed Church at Meerkerk, at which place he wrote a successful prize essay on the Book of Daniel (1821). His special department in the university was that of historical theology, to which he added that of Christian ethics. He aided in founding (1889) the journal Archi- vor Kerckfich Gescichte, and contributed vari-
Rubble, RUBBLE-work, ROUGH-WALLING, coarse walling constructed of rough stones, not large, but of great irregularity both in size and shape, and not so flat bedded as in rag-work. In some districts it is often formed of flints: in large buildings, in neighborhoods

Rubble-work.

where better materials can be obtained for the outer face of the walls, it is in general only used for the insides, or backing; but in other districts the whole substance of the walls is not sufficiently of this construction. It is often found to have been plastered on both sides, but sometimes it was only pointed externally.

Rubens, Peter Paul, Sir, the illustrious Flemish painter, was born at Siegen, Germany (according to some, at Cologne), June 29, 1577. After the death of his father in 1587, he went with his mother to Antwerp, where his parents had formerly resided. He became page to Marguerite de Ligne, countess de Lalaing, but soon left her to study art, chiefly under A. van Noort and O. van Veen (or Venius). In 1606 he visited Italy, going first to Venice and Mantua and thence to Rome, where he devoted himself to the study of the pictures of Titian and Paul Veronese. In 1606 the duke Vincente Gonzaga sent him on a special mission to Philip III of Spain. Again visiting Italy, he resided at Rome, Milan, and Genoa, painting many pictures, until 1608, when, hearing of his mother's illness, he returned to Antwerp. He was appointed court painter to the archduke Albert, and married Isabella Brant (or Brandt) in 1609. When, in 1627, Charles I declared war against France,
RUBEZAH

did Robe to St. Iledefonse: — St. Ambrose Refusing to Admit the Emperor Theodosius into the Church; and two other figures representing the miracles performed by St. Ignatius Loyola and St. Francis Xavier. See Waagen, in subscribers to the project, "Tafelwerke" (Leipsig, 1836–1840); Michel, Rubens et L'École d'Anvers (Paris, 1834); Waagen, "Treasures of Art in Great Britain" (London, 1864–1874, 4 vols.).

Rubezahl, in Silesian legend, was a good-natured spirit of the Riesengebirge who assisted the good, the needy, and the wandering traveller, but who also teased and punished the wicked. He was able to assume any form he pleased, and appeared sometimes running between the feet of pedestrians, sometimes as a turtle, sometimes in the form of a hawk, snatching the hat from a sleeper's head, and sometimes so confused the senses that the tiles on a roof seemed to be of gold, or that a person seemed to see his own double, etc. He never carried his sport so far, however, as to work real injury to his victims. The name Rubezahl was a nickname, and greatly irritated him; but he loved to be called "The Lord of the Mountains."  

Rubigo. See Rubricus.

Rubino, Joseph Carl Friedrich, a German doctor and professor of philology and ancient history, was born Aug. 15, 1799, at Fritzlar, of Jewish parentage. Having completed his studies at Heidelberg and Göttingen, he returned from 1820 to 1831 in private at Cassel, where he became intimately acquainted with the most prominent men of his time. In 1831 he was appointed professor at Marburg, and April 24, 1842, he openly professed the Christian faith. Up to his death, April 10, 1884, he lectured at Marburg, having been invested with several times with the highest offices of the university. His last words were, "For other foundation can no man lay than that is laid, which is Jesus Christ" (1 Cor. iii. 11). The great veneration in which Rubino was held is best shown in Dr. Grau's dedication of his work, "Semiten und Indogermanen, zu seinen friend Rubino. See Kal- kar, Israel und die Kirche," p. 127; Delitzsch, "Staat auf der Hoffnung," II, 22 sq.; Literarischer Handekchecker, 1864, p. 342; Fürst, "Bibl. Jud. iii., 179." (B. P.)

Rubrics (Lat. rubrica, from ruber, red), in classic use, meant the titles or headings of chapters in certain important laws-books, and is derived from the red color of the ink in which these titles were written, in order to distinguish them from the text. In medieval and modern use the name is restricted to the directions which are found in the Book of the Church, the Prayerbook, containing the several prayers, and the performance of the sometimes complicated ceremony by which they were accompanied. The same name, together with the usage itself, is retained in the Church of England Prayer-book; and in all these, even where the direction has ceased to be printed in red, the name rubric is still retained.

Where red ink is not employed, the rubric is distinguished from the text by italics, or some other variety of print. In the Catholic Church a considerable controversy exists as to whether the rubrics of the missal, the ritual, and the breviary are to be considered preceptive or only directive — a question into which it would be out of place to enter. A similar controversy has existed at various times in the English Church. The science of rubrics is with the Catholics a special branch of study, the chief authorities on which are Gavanti, Merati, Cavaleri, and other more compendious writers.

Rubruquis, Guillaume de. See Rubysbroek.

Ruby (only pl. рубина, rubinum; once [Prov. iii. 15, Kethb] рубин, rubinum; Sept. Λευκός, or Λακκ. πολεμιξίας; Vulg. cuneus opes, cuneus pretiosissima, gemme; de ultimo ubuis, chur antiquum), a gem concerning which there is much difference of opinion and great uncertainty. It occurs in the following passages: "The price of wisdom is above peninim" (Job xxviii. 18; so also Prov. iii. 15; viii. 11, xxxi. 10); "A multitude of peninim" (xx. 15). In Lam. iv. 7, it is said, "The Nazarites were purer than snow, they were whiter than milk, they were more ruddy in body than peninim." Boote ("Animad. Sac. iv., 3") on account of the redness mentioned in the last passage, supposed "coral" to be intended, for which, however, there appears to be another Hebrew word. See CORAL. Michaelis ("Steph. p. 2023") is of the same opinion, and compares the Heb. רַבַּת, with the Arab. piena, "a branch." Gesenius ("Thesaur. s. v.") defends this argument. Bochart ("Hieroz. iii., 601") says that the word "coral" is wrong, and points to the root רָבַת (rabat) as explaining the "redness" alluded to above by supposing that the original word (רַבַּת) signifies merely "bright in color," or "color of a reddish tinge." This opinion is supported by Rosenmuller ("Schol. in Thern.") and others, but opposed by Maurer ("Comment.") and Gesenius. Certainly it would be no compliment to the great people of the land to say that their bodies were as red as coral or rubies, unless we adopt Maurer's explanation, while "the redness" to the blood which flowered in their veins. See RUDDY. On the whole, considering that the Hebrew word is always used in the plural, we are inclined to adopt Bochart's explanation, and understand pearls to be intended. See PEARL.

The ruby is, however, generally supposed to be represented by the word רַבַּת, kadd-kod, which occurs in Ezek. xxvii. 6, and Isa. liv. 12, where the A. V. renders "coral" (q.v.), and the Arabic word of similar sound (kaddad)kod) signifies "vivid redness," and as the Hebrew word may be derived from a root of like signification, it is inferred that it denotes the Oriental ruby, which is distinguished for its vivid red color, and was regarded as the most valuable of precious stones next after the diamond. This mode of explanation, however, seems rather precarious. The Greek translator of Ezek. xxvii. 16 does not appear to have known what it meant, for he preserves the original word; and although the translator of Isa. liv. 12 has οπαίος (opas), "a carbuncle" (q.v.), he is not regarded as any authority in such matters when he stands alone. The ruby was doubtless known to the Hebrews, but it is by no means certain that kadd-kod was its name. Some have supposed that the word elad, אֶלֶד, which from its etymology should signify a sparkling, flaming gem, is to be regarded as a species of ruby. It occurs only in Isa. liv. 12; hence the Sept. and A. V. make it a "carbuncle" (q.v.).

The wire of mineralogists is a red sapphire (q. v.), and spinel. It is a gem highly prized, and only inferior in value to the diamond. The finest are the Oriental, which are chiefly brought from Ceylon and Burmah. They are found in alluvial deposits. The ruby, like other gems, had a host of occult virtues attributed to it by the Cabalists. It was supposed to give valor to the soldier in battle; to decide and concentrate affection; to foretell evil by growing pale, and to indicate that the danger was past by recovering its vivid color. See GEM.

Ruchat, Abraham, a Swiss ecclesiastical writer, was born about 1680. He was for a time pastor at Au- bonne, but after 1719 taught belles-lettres and philosophy in the Academy of Lausanne. He died Sept. 29, 1758. His principal works are, "Grammatica Hebraica" (Basle, 1737); "Lexicon Hebreaicum" (1747); "Voyage de Vaud" (Berne, 1707); "Histoire de la Réformation de la Suisse" (Geneva, 1740, 6 vols.). See Roussel, "Éloge de Ruchat,"—Hoefer, "Noir. Rég. Générale," s. v.

Ruchath, Johann, called Von Wesel, a German reformer, was born at Oberwesel, on the Rhine, about 1410. He was professor of divinity at Erfurt, and afterwards preached at Worms for seventeen years. He was accused of heresy, and committed to the torture in 1479, but, to escape death or torture, recanted. Ruchath died in 1481. He wrote a "Treatise against Indul-

Rudbeck, John, a learned Swedish prelate and reformer, was born at Orebro about 1580. He was chaplain to Gustavus Adolphus, and bishop of Westernia. His death occurred in 1646. He was father of Olaf (or Olaf) Rudbeck, Sr., the eminent anatomist and botanist.

Rudborne (or Rodborne), Thomas, an English bishop and architect, was a native of Hertfordshire. He studied at Merton College, Oxford, and afterwards became chaplain to Henry V preceding the battle of Agincourt. He received the prebend of Horton, Salisbury, the living of East Deping, Lincolnshire, and the archdeaconry of Sudbury. He served the office of proctor in the university, and was elected chancellor. In 1436 he was warden of Merton College, resigning the next year. In 1438 he was promoted to the see of St. David's, and died about 1442. The tower and chapel of Merton will long remain monuments of his skill and taste. He wrote, according to Bale, a Chronicle, and some Epistles ad Thammas Waldenem et Alia.

Rudd, John Churchill, D.D., an Episcopalian clergyman, was born at Norwich, Conn., May 24, 1779. By adverse circumstances he was prevented from taking a collegiate course, and, although brought up a Congregationalist, united with the Episcopalian Church. He was admitted to deacon's orders by bishop Moore, April 28, 1800, and in 1806 to priest's orders by the same prelate. In December, 1805, he took charge of St. John's Parish, N. J., and in May following was instituted its rector. Owing to ill-health, he resigned, May 26, 1826, and removed to Auburn, N. Y., and took charge of St. Peter's Church in that city for seven years. In 1827 he was induced by bishop Hobart to commence The Gospel Messenger, which he continued to edit until the close of his life, Nov. 15, 1848. The following are some of Dr. Rudd's publications: Monitorial Schools (1825), an address:—The Resurrection (1833), a sermon:—Christ, the Chief Corner-stone (1833), a sermon: besides a number of other Addresses and Sermons. Dr. Rudd edited the Churchman's Magazine, several years previous to 1812. See Sprague, Annals of the Amer. Pulpit, v, 501.

Rudd, Sayer, a minister of Walmer, Kent, England, in the middle of the last century, published a number of Poems, Sermons, and Theological Treatises, of which the best known is his Essay on the Resurrection, Millenium, and Judgment (Lond. 1734, 8vo). His Prodomos, or Observations on the English Letters, was published in 1756 (8vo). See Allibone, Dict. of Brit. and Amer. Authors, s. v.

Rudder (enghal, Acts xxvii, 20, strictly a footlet; "helm," James iii, 4), an oar (hence the English paddle) used by the ancients for steering vessels, being passed through an eye or rowlock at the stern; when at anchor they were unshipped, and secured from slipping through the rudder-ports by lashings (ξυριφάσα, "bands"). There were usually two of these rudders (see fig., p. 375), one on each quarter of the vessel. See SHIP.

Ruddy (κυρίλλης, adoni, redish; Sept. ἄμμος; Vulg. rufus). Many interpreters think that the word means red-haired, and it is so rendered in the ancient versions, although ours understands a ruddy complexion. It would then appear that Essau (Gen. xxxv, 25) and David (1 Sam. xvi, 12; xxvii, 42) had red hair, a peculiarity so uncommon in the East that it forms a particular distinction, as in the Scriptural instances; but it is by no means unknown, especially in mountainous countries. It has been observed in Persia, accompanied with the usual fresh complexion. Such hair and complexion together seem to have been regarded as a beauty among the Jews. The personal characters of Essau and David appear to agree well with the temperament which red hair usually indicates.—Kitto. That interpretation, however, is by no means established, and the contempt of Goliath for David as a youth of a fair, bright skin is more probable. See David. This view is confirmed by the application of kindred words, as addam (טֶמָד, in Lam. iv, v, to the Nazarites in general; and addom (טָמָד) to the bridegroom (Cant. v, 10), who is immediately described as black-haired (ver. 11).

Rudelbach, Andreas, a Danish theologian, was born at Copenhagen in 1792. He became superintendent at Glauchau, Saxony, in 1829, and died in 1862. He published a number of dogmatic works, in which he advocates the orthodox Lutheran creed.

Rudente, the moulding, in form like a rope or staff, filling the fluting of columns, usually one third of the height. It is sometimes plain, sometimes ornamental.

Rudês (uncultivated), one of the names given to the catechumens in the early Church, because they were unequalled with the doctrines of Christianity, into which the baptized or faithful were initiated.

Rüdinger (also Ruđiger and Rudinger), Esrom, a German theologian and author, was born at Bamberg, Bavaria, May 19, 1528. He was a pupil of Joachim Camerarius in his early years, and subsequently (1548) became his son-in-law. In 1549 he became rector of the gymnasium at Zwieckau, and greatly promoted the efficiency of that school; but, as his relations with the superintendent became unpleasant by reason of his advocacy of the "necessity of good works," he gladly accepted a call to Wittenberg in 1557. In 1562 he be-
RUDOLPH

came rector, and in 1570 dean, of the theological faculty of that university. By this time his peculiar views had become known. He did not acknowledge the corporeal presence of Christ in the sacrament, nor a real partaking of the rea sacrament by unbelievers. He was com-

manded by the constituted authority to recant these opinions, and was even arrested (1574); but he refused and fled, eventually es-

establishing a school among the Moravians, in connection with whose curriculum he wrought out his valuable exposition of the book of Psalms. He died at Nurem-

berg in 1591, though Altorf is sometimes given as the place of his death.

Rüdinger left many works in manuscript, besides others which were published. His theological writings are the following: Symposi Cypriani Eginatti, seu de Pro-

videdentia Disputatio, etc. (Basle, 1557) — Exegeseis — de Cena Dom. (Leipsic and Heidelberg, 1575; the latter edition naming Corecss as the author) — Lōris Psalmoru-

num Paraphrasis Latina. — E Dēvōv, Tuncia Funebris ex Tela Paradisi ad Destr. Crucis Christi (Lukex xxiii, 43) — De Origine Ubiquitatis Pii et Eruditi — Tractatio (Geneva, 1587), a posthumous work usually credited to him. — De Jesu Martyre Anna Burgo, etc., in Miegii Monumenta, etc., ii, 61 sq. — De Fratrisus Orthodoxa-

Rudolph, St., a monk of Fulda in the 9th century, was a pupil of Rabanus Maurus (q. v.), director of the convent-school, and spiritual counselor and favorite preacher to Louis II, who wrote a series of works, among which a continuation of the Annals of Fulda (839-863) holds the first place. By direction of his ab-

bot, Maurus, he composed a life of Lioba, abess of Bischofshausen, which is given in Surius and Mabillon (Acta Ord. S. Ben. Sec. iii, 2). A short history of the Saxons, which has been incorporated into Meginhard's narrative of the translation of St. Alexander (comp, the art. "Felicitas u. ihre 7 Söhne" in Perrz, ii, 678-681), is also from his pen; and to this list must be added a tract known by the erroneous title Vita B. Rabani Archiep. Moguntiacensis, given by the Bol-

rich, subsequently abbot at Ellwangen, with which he transmits to Rudolph, his former instructor, a life of the priest St. Sola for improvement. See Pertz, i, 308, 309, in the preface to the Annales of Fulda.

Rudolph (Rudolf or Rodolf) II, emperor of Germany, eldest son of Maximilian II, was born in 1552. He was educated at the Spanish court by the Jesuits. Upon the death of his father (October, 1576), he ascended the throne. He prohibited the exercise of the Protestant religion, and gave all the principal offices to the Catholics. This bigotry and intolerance led the Protestants to ally themselves with the other anti-

lists in the Low Countries and in France in 1608, of which confederation the elector-palatine Frederick IV was the head. Between 1608 and 1611 his brother Matthias extorted from Rudolph successively the sovereignty of Austria, Moravia, Hungary, Bohemia, etc. He died without issue in January, 1612, and was succeeded by Matthias. Rudolph was devoted to the study of astro-

logy and the occult sciences, and extended his patron-

age to Kepler and Tycho Brahe. The Rudolphine Tables derive their name from Rudolph, who originally undertook to defray the expenses incidental to the und-

ertaking; but it failed for want of means. See Kurek, Geschichte Oesterreich, zum Kaiser Rudolph (Linz, 1821).

Rudra (the bloody one), a Hindū deity of the Vedic period, described in the Yéls as the father of the winds. At a later period he is identified with Siva (q. v.)

Rudy, John, a (Dutch) Reformed minister, was born in Switzerland in 1791, and studied under the Rev. Dr. Helffenstein in Philadelphia. He entered the ministry of the German Reformed Church in 1821, and after serving Christ in North Carolina for three years, at Guilford (1821-24) he transferred his relations to the Reformed Dutch Church. From 1825 to 1835 he was pastor at Germantown, N. Y. In the latter year he re-

solved to leave the English-speaking Church and peo-

ple and came to New York city as a missionary to the Germans, and in 1888 took pastoral charge of the Ger-

man Evangelical Mission Church in Houston Street, where he rendered apostolic service until his death, in 1842. He built up this Church from a little gath-

ering in a hired hall to a membership of 300, and secured the erection of their commodious edifice. He was a man of deep piety, filled with the Spirit, and bur-

dened with the labors of a New-Testament evangelist. His distinguishing traits were a sound mind, good judgment, untiring zeal, and faithfulness unto death. He was an efficient coworker with the American Tract So-

cietv in the preparation and circulation of evangelical truth among the Germans. He gave himself up to the missionary service among his countrymen with tact and success. His last illness was contracted while en-

gaged in arduous pastoral work. (W. J. R. T.)

Rue (πυγών; Vulg. rūca) occurs in the A. V. only in Luke xi, 42: "But woe unto you, Pharisées! for ye tithe the mint, and rue, and all manner of herbs, and pass over judgment," etc. In the parallel passage (Matt.

xxiii, 23) δillé (ἀρχινομενον, translated "anise") is mentioned instead of rue. Both δillé and rūca were cultivated in the gardens of Eastern countries in ancient times, as they are at the present day. Dioscorides (iii, 45) de-

scribes two kinds, Rūta montana and Rūta hortensis; the latter of which he says is the best for the table. They are distinct species, and the first is common in the south of Europe and the north of Africa. The other is usually called Ruta graveolens, and by some R. hortensia, which is found in the south of Europe, and is the kind commonly cultivated in gardens. It is a native of the Mediterranean coast, and has been found by Hassel-

quist on Mount Tabor. Several species grow wild in Palestine, but R. graveolens is cultivated (Tristram, Nat. Hist. of the Bible, p. 478). Josephus speaks of a rue of extraordinary size as growing at Machærus (War, vii, 6, 8). Rue was highly esteemed as a medicine, even as

Ruta graveolens.
early as the time of Hippocrates. Pliny says, "Rue is as an herb as medicinable as the best. That of the gar- den hath a broader leaf, and branched more than the wild, which is more bottome, and in that situation he obtained to be long in all operations; also that it is sowed usually in Februarie, when the western wind, Favonius, bloweth. Cerese we find that in old time rue was in some great account, and especial reckoning above other herbs: for I read in ancient histories, That Cornelius Celsius, at what time as he was chosen Consuill with Quintus Flaminius, preserued the flower of his grave, to give his posterity in people of new wine, aromatized with rue. The fig-tree and rue are in a great league and amittie, insomuch as this herb, sow and set it where you will, in no place prospereth better than under that tree; for planted it may be of a slip in spring" (Holland's Pliny, xix, 8).

That it was employed as an ingredient in diet, and as a condiment, is abundantly evident from Apicius, as no- ticed by Celsius, and is not more extraordinary than the fondness of some Eastern nations for assafetida as a seasoning to food (see Columella, R. Rust. xii, 7, 5).

One kind was cultivated by the Israelites is evi- dence from its being mentioned as one of the articles of the Pharaoh's taxes their people with the heavy hand, though they neglected the weightier matters of the law. Rosenmüller states that in the Talmud (Shebuthoth, ix, 1) the rue is indeed mentioned among kitchen herbs (asperagus por- tulanus et corexdro); but, at the same time, it is there expressly stated that it is tithe-free, it being one of those herbs which does not cultivate. Accordingly, accord- ing to the general rule established in the Talmud. Cels- ius long previously observed with reference to this fact that in making rue free from tithes they show how far they have left their ancestors' customs; by which, as God's Word assures us, it was tithed (Hierobol. ii, 233).

See Beckman, An Age, Curvet, p. 6, 9.

Rue is a small shrub with a bushy stem, dark gray towards the base, with doubly pinnated leaves of a deep dark green, and yellowish flowers. The whole plant has a peculiar and very powerful odor, and its juice is so acrid that if not diluted it would blister the skin. Notwithstanding this coarseness, it was popular with the ancients, and it is still prized in the East. The Egyptians have a proverb, "The presents of our friends come on leaves of rue," meaning that they derive a pleasant perfume from the good-will of the sender, and just as verbena and gypsophila are grown in our win- dows, the Turks and Arabs keep pots of rue in their drawing-rooms, and use it in the same manner (Oppert, Archäologie, Arch. Mitt. 1902, 54). Among the Greeks and Romans it was valued not only as tonic and medicinal, but a special efficacy was as- cribed to it as a safeguard from serpents (Pliny, Hist. Nat. xx, 13)—a popular belief embodied in the modern Arabic phrase, "More hateful than is the scent of rue to serpents." In the Middle Ages of Europe it acquired a certain sacredness from small bunches of it being used by the priests to sprinkle holy water on the people (Bur- nett, Useful Plants, vol. i), and it is called "herb of grace" by Shakespeare (Richard II, iii, 4).

Rue, Charles de La, a Benedictine monk, was born at Corbie, Picardy, in 1684 (5). He became very learned in the Greek and Hebrew languages, and died in 1739. He published three volumes of the Works of Origin (1728-30), and his nephew Vincent de La rue, born in 1676, published the fourth volume in 1732.

Ruechat, Abraham, a theologian and historical writer, was born at Sept. 15, 1676, at Grand- cour, in the canton of Vaud. In 1699 he had acquired a taste for archaeological and historical inquiry, and also great facility in the acquiring of languages, so that he was able to apply for a professorship of Greek and Lat- in at Berne when twenty-one years of age; and soon afterwards mastered English and German, attaining, for some time, a high reputation for his knowledge of various universities, e.g. Berlin and Leyden. On his return he was made pastor of Aubonne and Rolle, then professor of belles-lettres and president of the Upper Gymnasium at Lausanne (July, 1721), and finally pro- fessor of theology in the same institution, which latter position he occupied until his death, Sept. 29, 1766.

Ruechat distinguished himself chiefly as a historian of the Church in his native land. In 1707 he published an Abrégé de L'Histoire Eccl. du Pays-de-Vaud. His principal work, Histoire de la Réformation de la Suisse (Geneva, 6 vols.), appeared in 1727 and 1728. It was placed on the Index at Rome, and was assailed by Jesuit priests, to whom Ruechat replied in a letter addressed to the editor of the Biblioth. Germanique, xx, 218. His work had been published no farther than 1587, the remainder not being given to the public until more than a century after the first issue. The first complete edition is by Vallenier (Lausanne and Paris, 7 vols.), with a Preface by Saur, he once hesitated. Of Ruechat's works a number have not yet been printed. The list of his printed works in- cludes a Hebrew Grammar (Leyden, 1707),—Examen de l'Origineisme (against M. Huber (q. v.)),—a transla- tion of the epistles of the apostolical fathers Clement, Ignatius and Polycarp (1721)—A treatise on the Bible weights and measures (1748); and various dissertations.

Ruet, Francisco de Paula, a Spanish Protestant minister, was born at Barcelona in 1825. When nineteen years of age he became deeply impressed with the evangelical truth under the preaching of De Sanctis at Turin, and he at once decided for the Protestant faith. Having been for some time General, he cast himself to the preaching of the Gospel in his own native place with that ardor and zeal which characterizes the nature of the Spaniard. The fanaticism of the Ro- mish Church, however, brought about his expulsion from his country for the remainder of his life. He went to Gibraltar, and from that place to the evangelization of the country with great effect, and was the means of bringing Matamoros to the Gospel truth. The revolution which broke out in 1808 once more brought him back to his country, and from that time he labored at Madrid in the most intimate connection with the brothers Fiedler, preaching at the Jesus' chapel in Calatrava Street until he died, Nov. 18, 1878. Ruet was the senior among the Protestant clergy of Spain, and also the first who had suffered imprisonment and exile for the sake of the evangelical faith. (B. P.)

Ruff, an ecclesiastical garment: (1) a piece of plaied linen worn round the neck: (2) a falling collar; (3) an academical robe of silk worn over the gown of cer- tain graduates; (4) a name sometimes given in the 17th century to the hood or tippet worn by clerics in Church.

Ruffinus. See Rufinus.

Ruffiner, Henry, D.D., LL.D., a Presbyterian divine, was born in the valley of Virginia, in what is now Page County, Jan. 19, 1786. His father was of German ori- gin, his mother of Swiss. In his early youth his father removed to Kanawha County, Va.; and, schools being very scarce in that section, he was sent to Lewisburg, Va., to the school of Rev. John McKellar, who was also pastor of the Church in that place. While here he was hopefully converted, and joined the Church. He graduated at Washington College, Lexington, Va., in 1817, studied theology with his friend George A. Baxter, D.D., and was licensed by Lexington Presbytery in 1818. The same year he was elected (by PSU College, and in 1822 ordained by Lexington Presbytery and took charge of the Church of Timber Ridge, Va. During the thirty years of his connection with Wash- ington College, he successively filled every professor's chair, and was its president for ten or twelve years. In 1848 he was compelled to resign his position by reason of ill-health, and went to the parish of Malden, McDonald and various other counties. His last years were spent in that of the Church in Malden, on the Kanawha River, where he continued to labor till a year before his death, which
RUFO

152

RUGGLES

occurred Dec. 17, 1861. Dr. Rufner was an untiring and enthusiastic student all his life. In learning he had few equals, and for many years he was probably the most learned in the country, if not in the United States. He was always an impetuous preacher; at times his eloquence was overpowering, his manner always demanding attention. He was the author of Judith Benuaddi (a romance)—The Pathers of the Desert (2 vols.)—The Predestination: also a number of Pamphlets and Addresses. See Wilson, Presb. Hist. Almanac, 1863, p. 202; N. Amer. Rev. xiv. 341; South. Lit. Mess. iv. 792; Review of Duchshink's Cyclop. of Amer. Lit. p. 28; Amer. Annual Cyclop. 1861, p. 945. (J. L. S.)

Ruffo, Dionigi Fabrizio, an Italian cardinal and general, was born at Naples (or Calabria) about 1744. He raised in Calabria the Army of the Holy Faith, a large body of royalists which, under his command, expelled the French and the republicans from the country in 1759 and restored king Ferdinand IV to the throne. A number of republican chiefs taken by him at Naples, as prisoners of war, were put to death by order of the king. He died in 1787.

Rufio, Luigi, cardinal and archbishop of Naples, was born at San Onofrio, Calabria, Aug. 25, 1750. He was made cardinal-priest, and in 1777, archbishop on Naples, under the succession of Joseph Bonaparte to the throne, Rufio was exiled, and remained in Rome till 1815, when he was allowed to return to his diocese. Under Ferdinand IV he was director of the university, but was replaced by Rosini, bishop of Pozzuoli. Rufio died at Rome Nov. 17, 1832.

Rufina, St., a Christian martyr, under Valerian, at Rome. Her sufferer, to avoid danger, renounced Christianity, and endeavored to dissuade Rufina from her profession. She remained steadfast, and her sufferer, finding her unyielding, informed against her, and occasioned her arrest. Although tortured several times, she remained inflexible, and was beheaded A.D. 257.

Rufinus Tyrannus, monk, presbyter, the friend, and later the adversary of Jerome, was born at Concun- daly, Italy, about A.D. 380. Forty years later he was converted to Christianity and became a monk, in which character he visited the East and became acquainted with the monastic institution as found in the Nitrian desert and elsewhere. He witnessed and wrote an account of the persecutions under the emperor Valens, 367. Although he is said to have written that he endured many of the troubles of martyrdom. In 378 he went to Jerusalem in company with Melania, a strict ascetic and friend of Jerome, and was made presbyter by the bishop John of Jerusalem in 390. The breaking-out of the Origenistic controversy (q. v.) soon afterwards destroyed his friendship with the latter and he became a monk, and was formally condemned in 398. Subsequently the incursions of the Goths under Alaric compelled him to flee. He died in 410 in Sicily, while on the way to Palestine. The theological importance of Rufinus arises from his having brought the writings of the Greeks within the reach of the Western Church. He translated the Church History of Eusebius, the Histories of Eusebius and the Chronicle, in a complete work, and for a long time professed to be in opposition to the wish of bishop Chrysostom of Aquileia, although taking rather arbitrary liberties with the text (comp. Vales. on Eusebi.; Huevius, De Claris Interpretibus, p. 202; Kimmel, De Rufino Euseb. Interprete [1838]), and continued the history to the reign of Theodosius the Great, the continuation being afterwards translated into Greek. He also wrote a Vitae Patrum S. Histor. Euenotica for bishop Patronius of Cologn, which furnished the material and was long con- sidered to be the author, though many attributed the work to Jerome instead. Rufinus's translation of Origen was intended to demonstrate the orthodoxy of that father, but was not impartially done, and gave rise to numerous disputes with Jerome, against whom he now wrote his two books known as Inversionis. His exposition of the Apostles' Creed deserves mention also. It was composed at the request of bishop Laurentius, was much esteemed in ancient times, and is still important to the history of doctrines. Several other works are credited to him, but are now rejected as spurious. The chief edition of his writings is by Vallarsi (Verona, 1745). The Church History was first printed at Basle in 1544, but was afterwards improved by the Carmelite Peter Th. Osiociari, and published in 1740. See Fonte- mini, Hist. Lit. Aquilei; De Robies; J. F. Marx; and other modern writers (Arg. 1745; 1754; Marzammii, E. H. de Tyr. Rdf. Fide et Religion (Patav. 1855); Schirck, x. 121 sq.; Seander, Ch. Hist. vol. i.

Rufus (Lat. for red, Gr. Ροδισκος) is mentioned in Mark xv. 21, along with Alexander, as a son of Simon the Cyrenian, whom the Jews compelled to bear the cross of Jesus to Golgotha (Luke xxii. 28). A.D. 29. As the evangelist is called his son, who Simon was by naming the sons, it is evident that the latter were better known than the father in the circle of Christians where Mark lived. Again, in Rom. xix. 18, the apostle Paul salutes a Rufus whom he designates as 'elect in the Lord' (IIēsou Barnupv). Both these rufuses are generally regarded as having earned a mother's claim upon himself by acts of kindness shown to him. A. D. 55. It is generally supposed that this Rufus was identical with the one to whom Mark refers; and in that case, as Mark wrote his gospel in all probability at Rome, it was natural that he should have given his readers the name of a person who had been at Rome, while he, apparently, was not there, may have died or have come later to that city, from his relationship to two well-known members of the same community. It is some proof at least of the early existence of this view that in the Acta Andreae et Petri both Rufus and Alexander appear as companions of Peter in Rome. Assuming, then, that the same person is meant in the two passages, we have before us an interesting group of believers—a father (for we can hardly doubt that Simon became a Christian, if he was not already such, at the time of the crucifixion), a mother, and two brothers, all in the same family. Yet we are not sure that the name 'Rufus' was to be taken as a sign of the person's origin (Wetttstein, Nov. Test. i. 634); and possibly, therefore, Mark and Paul may have had in view different individuals.—Smith. The name is Roman, but the man was probably of Hebrew origin. He is said to have been one of the seventy disciples, and eventually to have had charge of the Church at Thesaba.

Rugen, in Greek mythology, was a prince belonging to the race of children of the moon, father of the Firmaces, and grandfather of the Pristides.

Rugger, Prosper (originally Salomo Meir ben-Mose), a Jewish scholar, was born at Novara in 1606. At the age of thirteen he was already known as a good Hebraist, and was afterwards appointed rabbi at Jerusalem. On June 25, 1646, he joined the Christian Church and received from James Prosper Rube, a new name (Wettstein, Nov. Test. i. 634); and possibly, therefore, Mark and Paul may have had in view different individuals.—Smith. The name is Roman, but the man was probably of Hebrew origin. He is said to have been one of the seventy disciples, and eventually to have had charge of the Church at Thesaba.

Ruggles, Henry Edwin, a Presbyterian minis-
RUGGLES

ter, was born at Newbury, Vt., Nov. 27, 1822. He entered Dartmouth College, where he graduated in 1845. He spent a year in teaching the classics at Lyndon, Vt., and also at Hoosic Falls, where he remained two years, at the end of which time he entered the Union Theological Seminary, N. Y., where in due course of time he graduated, and was appointed city missionary in New York. At the end of his service in this field he went South, and was appointed stated supply over a Church in St. Louis, Mo., which position he occupied for one year, and was ordained with a view of becoming pastor of the Presbyterian Church at St. Charles, Mo. Thence he came to New York, and was pastor of a Congregational Church at Eaton village, where he remained but one year on account of sickness, which obliged him to return to his native place, where he died, Dec. 24, 1856. (W. P. S.)

Ruggles, William, LL.D., a Baptist educator, was born in Rochester, Mass., Sept. 5, 1797, and was a graduate of Brown University in the class of 1820. Shortly after graduating, he went to Washington, D.C., and was appointed a tutor in Columbian College in 1822, his name being retained in the list of its faculty for forty-five years. He was appointed professor of mathematics and natural philosophy in 1827, and discharged the duties of that office with marked ability and success till 1839 when, at his own request, he was appointed professor of political economy. He discontinued active service after 1873. During four interims he was the acting president of the college. He died Sept. 10, 1877.

Prof. Ruggles was a most generous giver to the benevolent organizations of the denomination (the Baptist) with which he sympathized. "His relations with some of the Baptist missionaries in Burmah had led him to take particular interest in their labors. This was especially true of the Karen Theological School established by the late Dr. Binney, who had been his associate in Washington. In his last will and testament, after certain personal bequests, he bestowed his estate upon the Baptist Missionary Union and the Baptist Home Missionary Society, with a residuary provision for the college in whose service he had spent his entire active life." (J. C. S.)

Rugwit, in Wendish mythology, was a war-god of the ancient Rugians, and presumably the same as Karewe; since the latter is represented in a similar character (as Karenz, on the island of Rugen). Frequent colossal statues of stone or wood were erected to him in the different towns, in which he appeared as a being having seven faces on a single head, and as bearing a naked sword in his hand, while seven other swords were suspended from his person. The swallow appears to have been sacred to him, since that bird was allowed to build its nests in the eyes, mouthes, and other lines of the different faces, and also in the folds of the scarlet cloth in which the god was usually enveloped for the purpose of preventing access to his person. At Rheطا an image of this god was found which was almost naked and had six heads, four male and two female, besides the head of a lion on the breast. It has been supposed that a twofold deity, representing both Rugwit and Karewe, is set forth in this image; but the two are but a single god of war.

Ruhamah [some Ruhamah] (Heb. Rachamah; רחל, finding mercy; part. of רחל to be merciful; Sept. translates ἱεροφαίρως, and so Vulg. misericordiam concept, a figurative title of Israel. When God directed Hosea to prophesy against the wickedness of Israel and Judah, he commanded him to take to wife a harlot, the symbol of idolatry, the spiritual harlotry of the Jews; and of her were born a daughter, named, after God's direction, Lo-ruhamah, "Not obtaining mercy," and a son named Lo-ammi, "Not my people" (Hosea i, 6, 9). Israel is represented by Lo-ruhamah,

Judah by Lo-ammi. Perhaps Israel is typified by the female because that kingdom was the weaker of the two, and the more completely overthrown; and Judah by the male because from Judah the Messiah was to descend according to the flesh. Subsequently Hosea says (ii, 1), "Say ye unto your brethren, Ammi [my people]; and to your sisters, Ruhamah [having obtained mercy], thus promising God's reconciliation to the people on their repenting and seeking him; saying that he will have mercy, and they shall be his people, thus indicating the restoration of the Jewish nation after much affliction. As the promises of grace to the obdurate Jews were transferred meanwhile to the believing Christians, Peter applied them to the Gentile proselytes, to whom he addresses his first epistle, telling them that in time past they "were not a people, but are now the people of God, which had not obtained mercy, but now have obtained mercy" (1 Pet. ii, 10). Paul also distinctly applies the prophecy not to the Jews only, but to the Gentiles: "That he might make known the riches of his glory on the vessels of mercy... even on us, whom he hath called, not of the Jews only, but of the Gentiles. As he saith also in Osee, I will call them my people which were not my people, and her beloved which was not beloved" (Rom. ix, 23-25). The wording in Hosea (i, 2) indicates the admission of the Gentiles into the participation of the promises made to the Jews. In the first instance, in the threats against Israel and Judah, it is a son, Lo-ammi, and a daughter, Lo-ruhamah. When the promises are given, the plural number is used; then it is brethren and sisters: not Jew only, but Jew and Gentile. See LO-RUHAMAH.

Ruhmani, in Hindu mythology, was the first consort of the god Vishnu in the incarnation of Krishna.

Ruin. The words used in the Hebrew thus rendered in the A. V. are very expressive. The ruin of a city by dilapidation, separating all its stones: Isa. xxv, 2, "Thou hast made of a fenced city a ruin" (or separation, ἀποστρατευμα; so of a country, Isa. xxxiii, 13; ἀπορρύπανσι, Isa.
RUINART

Ruiz, Juan, archbishop of Hita, in Spain, probably flourished during the reign of Alphonso XI. He is known to have been imprisoned by the bishop of Toledo about 1330 for his zeal in attacking the laxity of the clergy and the worldly manners of St. Terrón. Most of his life was spent in Guadalajara and Hita. He wrote a humorous poem describing his adventures, which is a mixture of all kinds of measures, containing hymns, pastoral poems, and epistles, in the confusion of which the original plan of the work is entirely lost. The style of this work has been compared in some respects to that of Chaucer. See Ticknor, History of Spanish Literature; Puymaguirre, Les Vieux Auteurs Castillans.

Rukmini (golden), the name of an avatar of Lakshmi, who under this form was the favorite wife of Krishna, an avatar of Vishnu. See Ayatana.

Ruland, Anton, a German doctor of theology and Roman Catholic divine, was born at Würzburg in 1589, where he also received his orders in 1622. Having labored for some time at Kittingen, he was called in 1836 as librarian of the Würzburg University, but in 1837 he was appointed pastor of Arnstein. For thirteen years he labored in this place, when, in 1850, he was recalled to Würzburg as first librarian. From 1848 till his death, which took place January 8, 1874, he was a member of the Bavarian House of Representatives. He wrote: Praktischer Unterricht zum erstenmaligen Empfang der heiligen Kommunion (2d ed. Würzburg, 1866). See the Literarischen Handeisheer, 1872, p. 161; 1874, p. 48. (B. P.)

Rule the Choir, the duty of the precentor as director of the musical services on greater doubles, and of the hebdomasary on Sundays and feasts of nine lections, and other principal feasts. Canons present at the service were said to keep choir.

Rule of Faith. See Faith, Rule of.

Ruler, Gilbert, a Nonconformist divine, was subprincipal of King's College, Aberdeen, in 1651. He afterwards became curate of Alnwick, Northumberland, from which he was ejected in 1662. After the Restoration he was named principal of the University of Edinburgh. He died about 1708. He published, the Rational Defence of Nonconformity (1689, 4to):—Vindication of the Church of Scotland (1691, 4to) :—The Cyprianic Bishop, etc. (1696, 4to) :—Presbyterian Government, etc. See Allibone, Dict. of Br. and Amer. Authors, s. v.;—Darling, Cyclopaedia, 3: 276.

Ruler of the Feast. See Architrchnlus.

Ruler of the Synagogue. See Architrchnlus.

Ruling Elders. Among Presbyterian churches there are generally two classes of elders—teaching and ruling elders. See Elder; Presbyterian Church.

Ru'mah (Heb. Rumah, רְמָעָה, hiph.; Sept. Ρομᾶ). Vulg. Ruma; Josephus, Ἄρουμα, Ant. x. 5, 2); a city named only in 2 Kings xxii. 36 as the home of Pedaiah, father of Jehoiakim's mother, Zebudah. It is probably the same as Arumah (Judges ix. 41), which is identified by Schwartz (Palest. p. 158) with the modern Ramah, 9 miles N.W. of Sanaria. He sephus mentions a Ru'mah in Galilee (War ii. 7, 21). Others with less probability regard this as identical with Dimnah, one of the towns in the mountains of Judah, near Hebron (Josh. xv. 92), not far distant from Lihon, the native town of another of Josiah's wives.

Rumelin, Georg Burkhard, a German divine, born in 1680 at Tübingen, where, also, he studied, was made magister in 1699. In 1706 he labored as pastor at Ober-Oswieheim, in 1707 as deacon at Unter-Oswieheim, and from 1735 until his death (Jan. 29, 1746).
Rumilia, in Roman mythology, was the goddess of nursing mothers, whose office it was to cause infants to readily receive their nourishment. She was also supposed to have been nurse to Romulus and Remus.

Rumulus, in Roman mythology, was an appellative of Jupiter, signifying "the nourisher."

Rumulodus, St., was a martyr and patron of Mechlin. His life is narrated by the abbot Theodoric about A.D. 1100, and was based on popular traditions, while the death of Rumulodus is said to have occurred in the year 775. He is represented as a native of Scotia, who led a pious life and resolved to convert the heathen. A later addition to the story makes him a son of King David and a Sicilian princess. He journeyed to Rome and returned to Brabant, where he gained many converts in the neighborhood of Antwerp, Lysa, and Mechlin. Count Ado received him kindly. He is not certain that he ever became a bishop. Two mandarins surprised him while reciting the Psalms, and killed him to obtain money, throwing the body into a stream. Celestial lights marked the place where it lay, and led to its receiving honorable burial, while miracles before and after death attested the sanctity of the man. In about 1050 a convent of canons of St. Rumulodus was established at Mechlin, and the cathedral in that town was dedicated to him. He is commemorated June 1. See Acts SS., Juni, i, 169-266; Gestel, Hist. Arch. Mechlin, (1725); Hist. Litt., de la France, ix, 338.

Rump, or rather tail (γόνατα, αλβάκι) of the Sacrifices. Moses ordained that the rump and fat of the rams offered for peace-offerings should be given to the fire of the altar (Exod. xxii, 22; Lev. iii, 9; vii, 3; viii, 25; ix, 19). The rump was esteemed the most delicate part of the animal, being the fattest (see Bochart, Hieros, i, 491 sq.). Travellers, and ancients, speak of the rumps or tails of certain breeds of sheep in Syria and Arabia as weighing twenty or thirty pounds (Russell, Apello, ii, 147). Herodotus says (ii, 118) that some may be seen three cubits, or four feet and a half, long; they drag upon the ground; and for fear they should be hurt, or the skin torn, the shepherds put under the tails of these sheep little carriages, which the animals drag upon with them. The prophet Ezechiel has also such regard for the rumps or tails that they always made them a part of their sacrifices (Diod. Sic, ii, 24). In the Description d’Egypte (Paris, 1820, large fol.) is inserted a plate of an Egyptian ram, remarkable for the enormous size of the tail, which weighed of which exceeded forty-four pounds. See SHEEP.

Runcaria, the name of an Antonine sect of the Waldenses, which is mentioned by Reiner as agreeing for the most part with the Paterins, but as holding that no part of the body below the waist can commit mortal sin, because such sin proceeds "out of the heart." They probably took their name from the town of Runcia or Runkel. See Reiner, Contr. Waldensia, in Bibli. Mus. Lugd. n. T., 296 sq.

Runcina, in Roman mythology, was a goddess who presided over the reaping of grain.

Rundell, William W., a minister of the Methodist Episcopal Church, was born in Norwich, Chenango Co., N.Y., and joined the Genesee Conference in 1818. He began his labors in Canada, where his name is still mentioned with great respect. He travelled in the itinerant ranks for thirty years, and was superannuated twenty-seven. He was a member of the Northern New York Conference at the time of his death, which occurred in Mexico, Oswego Co., N.Y., March 28, 1876. See Minutes of Annual Conferences, 1876, p. 65.

Rundli, in Hindu mythology, was the daughter of Dritarashtra and Kandari, and the form in which the goddess Marishtha chose to appear among men. Her mother became famous as having won the love of Krishna; but Rundli was not the daughter of that god, having been born before Vishnu was incarnated in that form.

Rundle, Thomas, LL.D., an English prelate, was born in the parish of Milton Abbot, Devonshire, about 1866. In 1702 he entered Exeter College, Oxford, and was introduced to Mr. Edward Talbot, son of Dr. William Talbot, bishop of Oxford—an event of great importance, as it secured to him the friendship and patronage of the Talbot family. He was ordained by bishop Talbot in 1718, in 1720 was made archdeacon of Wilt, and in the same year was constituted treasurer of the church of Sarum. On Jan. 23, 1721, he was collated to the first stall in Durham Cathedral, but on Nov. 12 in the following year died. He had also the mastership of Sherborne Hospital (July 5, 1723), and became associate chaplain at the palace in Durham. He was consecrated bishop of Derry, in Ireland, February, 1734 (or 1735), and died at his palace in Dublin, April 14, 1748. Of his works we have nothing except four Sermons (1754-59), and The Letters of the Late Thomas Rundle to Mrs. Barbara Sandys (Oxf. 1790, 2 vols. 12mo). See Allibone, Dict. of Brit. and Amer. Authors, s. v.; Chalmers, Biog. Dict., s. v.

Runner, a word that does not occur in the A. V., although "running" frequently does (usually as a rendering of γόνατα, ροτα, ρεικου). The Old Test. furnishes many illustrations of speed of foot. See Footmen. We have a very curious specimen of the manners of the times, and a remarkable instance of the great importance in Ahimaz, who, it appears, was a proficient runner—and a very swift one, too—which one would hardly have expected in the son of the high-priest. It belongs, however, to a simple state of society that bodily powers of any kind should be highly valued, and exercised by the possessor of them in the most natural way. Homer's famous Homer ("the swift of foot"). Ahimaz was probably naturally swift, and so became famous for his running (2 Sam. xviii, 27). So we are told of Asahel, Job's brother, that "he was as light of foot as a wild goat" (i, 18). And that quick running was not deemed inconsistent with the utmost dignity and gravity of character appears from what we read of Eliah the Tishbite, that "he girded up his loins and ran before Ahab who was in his chariot to the entrance of Jezebel" (1 Kings xviii, 46). The kings of Israel had running footmen to precede them when they went in their chariots (2 Sam. xv, 1; 1 Kings i, 5), and their guards were called φορτυνομοί, runners. It appears by 2 Chron. xxx, 6, 10, that in Hezekiah's reign there was an establishment of running messengers who were also called φορτυνομοί. The same name is mentioned among the Persian posts in Esth. iii, 13, 15; viii, 14, though it appears from the latter passage that in the time of Xerxes the service was performed with mules and camels. The Greek name, borrowed from the Persian, was ἄγγαρος. Ancient Racers.

As regards Ahimaz's crafiness, we read that when Absalom was killed by Joab and his armor-bearers, Ahimaz was very urgent with Joab to be employed as the
RUPERT 156

messenger to run and carry the tidings to David. See Post.

In the New Test. we have frequent reference to running in the allusions to the Greek races (1 Cor. iv. 24; Heb. xii. 1; comp. Psa. xix. 5; Eccles. ix. 11). See Game.

Rupert (or Ruprecht, i.e. Robert), St., the apostle of Bavaria. The exact period in which this personage lived is not known, and is the subject of continued dispute, the limits being from about A.D. 580 to 700 sq. The authorities are the Salzburg Chronicles from the 12th to the 14th century, on the one hand; and the July, A. of Mainz, comp. about 873 (Kleiman, Nachr. vom Zustande d. Gegend u. Stadt Juwaria [Salzburg. 1784, suppl. p. 7 sq.]), the so-called Congestum of bishop Arno of Salzburg, the Breviar of the time of the bishop Virgil (died 784), etc., on the other. The preponderance of opinion is towards the later date, according to which Rupert entered on his work of conversion in 696, after a beginning had already been made by other agents. Concerning his life, it is related that he sprang from the royal family of the Franks, became bishop of Worms, and was invited by Duke Theodo to preach the cross in his Bavarian dominions. Having consented, he was received at Ratibon with great solemnity, and baptized the duke, many nobles, and large numbers of the common people. He was also permitted to select a place for his settlement anywhere in the country, and for this purpose traversed the land, everywhere preaching the Gospel; and after a temporary experiment elsewhere, finally chose the spot called Eichsfeld, and landed in a Bavarian city on the juvavum (Salzach), and there built an episcopal residence, church, and convents. This was the beginning of the town and diocese of Salzburg (about A.D. 700), which in the time of Arno, the tenth successor of Rupert, was raised into a metropolitan see. Rupert placed twelve pupils from Worms in the monastery, and assigned the nunery to the virgin Erindrub. After further tours for preaching, the founding of other churches, and the appointing of a successor, he returned to his proper see (propria sede), and there died on Easter-Sunday. So the Vita Primigenia, though Arnold of Vochburg lets him die at Salzburg. See Rudhard, in the Würz, Getrehe-Antiqu., 1857, Nos. 196-222; 1845, Nos. 80-83; Aelteste Gesch. Bayerns (Hamb. 1841); Rettberg, Kirch. Gesch. ii, 195 sq.; Kurz, Handb. der allergem. Kirchengesch. ii, 1, 120 sq.

Rupert, abbot of Deutz (Ruperus Tuttienensis), a contemporary of St. Bernard, and in his theological relation a mystic, was one of the most prolific among the exegetical writers of his time. Neither his country nor the exact time of his birth is known; but it is certain that he spent his early years in the Benedictine convent of St. Laurent at Liege in preparation for a monastic life. He was consecrated to the priesthood in 1101 or 1102, and began his literary career somewhat later. The earliest work from his pen, if we disregard some Latin verses but little known, is entitled De Divinis Officis, in which he endeavors to explain the entire symbolism of the public worship to the common understanding. His first exegetical work was an abridgment of the Moralia in Jobum of Gregory the Great. These publications involved him in controversies, chief among which was that waged against the schools of Voss, Gaunas, and Anciens. In them their adherents had advanced the idea in Rupert’s convent at Liege that God willed the evil and that Adam sinned in accordance with God’s will. Rupert characterized the doctrine as impious, and advocated instead the Augustinian (infrapassinian) view that God simply permitted evil. Being prolix, Berengar, and after the death of that patron in 1113 by Cuno, abbot of Siegburg, and later bishop of Ratisbon, he resisted the virulent attacks of the body of adherents belonging to those schools. He embodied his views in the treatise De Voluntate Dei, and when his opponents asserted that the idea of a permission of evil by the doctrine of predestination, he added the book De Omnipopotentia Dei (about 1117), and followed up his effort by meeting William of Champeaux in a public disputation at Chalon, which ended by leaving each disputant confident of the success of his cause, and exposed Rupert to the subsequent malicious attacks of William’s pupils while he lived.

The energy of Rupert’s devotion to the Scriptures is apparent from the fact that it was in this period of exciting conflict that he issued the first of his independent exegetical works, a Tractatus in Evangelium Johannis (in 14 books). The exposition follows the text, giving the literal meaning, reconciling difficulties—which are regarded as only apparent—and frequently giving an allegorical interpretation. The authority of the fathers prevails everywhere, and all manner of dogmatical questions are woven into the exposition. A second, the largest and most original of his exegetical works—the Commentarius de Operibus Sanctorum Trinitatis (in 42 books)—appeared in 1117. Its purpose was to explain the entire plan of salvation from the beginning to its consummation. Its title is derived from the systematic plan by which the dispensation of each Person in the Trinity is distinguished.

The work is dominated by the systematizing tendency of Middle Age theology, and as it lacks the advantage growing out of a knowledge of the true nature of the Scriptures, it represents the traditional results of earlier investigations; but it luxuriates in the use of the unregulated hermeneutics of the time and in the development of mystical and anagogical meanings from the Scriptures, and thereby illustrates the qualities which distinguish Rupert as a theologian; namely, the religious fervor and enthusiasm of the mystic.

In 1119 Rupert returned to Cuno of Siegburg, and would seem to have formed an intimate relation with the archbishop Frederick of Cologne, to whom he dedicated a Commentary on the Apocalypse (in 12 books), which is peculiar as regarding the views and statements of that book as relating to past experiences of the Church from the Creation to the times of the New Test., rather than as prophecies having reference to the future. In his next work was a Commentary on the Song of Solomon (7 books) which expounds the book as being a prophetical celebration of the incarnation of Christ, that is, the redemption of the plan of God’s inspired laudations of the Virgin Mother. The book is nevertheless a witness to show that the 12th century did not accept the dogma of the “ immaculate conception.” A Commentary on the Twelve Minor Prophets followed—which was interrupted by the composition of a work entitled De Victoria Verbi Dei (13 books), showing how God executes his counsels, despite the opposition of Satan, by an examination of the Bible narratives, the mystical treatment being altogether ignored—but was eventually completed.

In 1120 Rupert was chosen abbot of Deutz, and was compelled to lay aside his pen to arrange difficulties relating to the spirituality of his convent. He was also the author of a number of actions at law (comp. Ruperti, De Incendio Turfianis Liber Aureus, cap. viii, ix). He eventually placed the management of the secular business of the convent in the hands of a committee of monks, and reserved for himself the administration of discipline and the spiritual care of the faithful. His Commentary on Matthew (in 18 books), allegorical throughout, appeared not earlier than 1126. A work entitled De Glorioso Rege David (15 books) appeared at about the same time. It is based on the books of Kings, and, like all of Rupert’s writings, refers especially to the spirit of the Church he founded. He also gave attention to practical subjects, and wrote De Regula Sancti Benedicti (in 4 books), and an Annales (in 3 books), written in dialogue form and de
RUSH

Rush is the rendering in the A. V. of two Heb. words, both of which are occasionally translated "buhl-rush" (q. v.).

1. Agmôn (אָגוֹמִן; Sept. κήρος, ἀγωμᾶ, μικρός, γαλος; Vulg. circulus, fervens, fervetem) occurs in Job xl, 26 (A. V. xlii, 2), "Canst thou put agmôn (A. V. "hook") into the nose of the crocodile? again, in xl (A. V. "rash"); "Out of his nostrils goeth smoke as out of a seething-pot or agmôn (A. V. "caldron.") In Isa. ix, 14, it is said Jehovah "will cut off from Israel head and tail, branch and agmôn (A. V. "rash".)" The agmôn is mentioned also as an Egyptian plant, in a sentence similar to the last, in Isa. xix, 15 (A. V. "rushing"); while from lviii, 5 (A. V. "bushing") we learn that the crocodile had a pendulous nose. The term is allied closely to the Heb. agâm (אָגוּמ), which, like the corresponding Arabic ajâm, denotes a marshy pool or reed-bed (see Jer. il, 22, for this latter signification). Agâm is also considered to be derived from the same root as גָּאוֹמ, גָּמְי, the papyrus (see No. 2 below). Some have even concluded that both names indicate the same thing, and have translated them by juncus, or rush. The expression "Canst thou put agmôn" into the crocodile's nose? has been variously interpreted. The most probable interpretation is that which supposes allusion is made to the mode of passing the reed or rush through the mouth of fish in order to carry them home; but see the commentaries and notes of Rosenmuller, Schultens, Lee, Cary, Mason Good, etc. The agmôn of Job xli, 29 seems to be derived from an Arabic root signifying to "be burning;" hence the fervens of the Vulg. Rushes were used anciently for corcls (xlii, 2) and for other purposes; nevertheless, they are proverbially without value. Figuratively the term is used of the least important class of people (Isa. ix, 14; xix, 15; lviii, 5; Jer. ii, 22).

There is some doubt as to the specific identity of the agmôn, some believing that the word denotes "a rush" as well as a "reed" (see Rosenmuller [Bibl. Bot. p. 184] and Winler [Steudel. i, 481]). celery (Hier. 1, 465 sq.) has argued in favor of the Arundo phragmites (now Phragmites communis). That the agmôn denotes some specific plant is probable from the passages where it occurs, as well as from the fact that kanîk (ךָנִיק) is the generic term for reeds in general. Lobo, in his Voyage d'Abyssinie, says the Red Sea was seen to be literally red only in places where the gonenom was abundant. What this herb is does not elsewhere appear. Forskål applies the name of ghobehe to a species of arundo, which he considers connected with A. phragmites. M. Bovis, in his Voyage Botanique en Egypte, observed, especially on the borders of the Nile, quantities of Saccharum Aegyptiacum and of Arundo Aegyptio, which, is perhaps, only a variety of A. dinox, the cultivated Spanish or Cypris reed, or, as it is usually called, the box sedge, which grows abundantly in Cairo. In the neighborhood of Cairo he found Poa cynodontes (the khasha, or cusa, or sacred grass of the Hindoos), which, he says, serves "aux habitants pour faire des cordes, chauffer leurs fours, et cuire des briques et poteries. Le Saccharum cylindricum est employé aux mêmes usages." The Egyptian species of arundo is probably the A. scirpis of Dioscorides. Of Delile, which gives an account of the Egypt. These species are of considerable antiquity, and were commonly assembled in medicinal times once a year, at or about Whitsuntide. After the Reformation they were seldom convened, and so for many generations they have practically ceased to exist. Since the Catholic revival in 1830, they have been restored in England according to ancient precedent, and in the great majority of English dioceses they are now in full working order. English Roman Catholics have likewise restored this ancient machinery, and now have their own rural deanery chapters in several Anglo-Roman dioceses of Sept. 1129, destroyed the Arounds of Deutz, but left the convent and church unharmed. Two books De Mediatione Mortis give evidence that the author believed his end approaching; and with a commentary on Ecclesiastes, in which he develops, more than in any other work, the literal sense alone, he brought his exegetical labors to a close. A few additional writings, lives of saints, etc., do not require special mention. Ruperti died peacefully in his abbey of Deutz, March 4, 1135.

Ruperti, Georg Alexander, D.D., a Lutheran divin., was born at Bremervörde Dec. 19, 1758. Having been teacher for a number of years at Stade, he was appointed, in 1814, general superintendent of the duchies of Bremen and Verden, and died March 14, 1839. He wrote, Symbola ad Interpretationem Sacri Codicis (1815); Theologiarum (1820); Theologische Miscellen (1816-19, 4 vols.); Des A. Abendmahl- us Ursprungsreine der Feier (1821). See Fürst, Blät. Jud. iii, 181; Winer, Handbuch der theolog. Literatur, i, 13, 195, 454, 868; ii, 743. (B. P.)

Rupitani (or Rupitani), a name given to the small Donatist congregation at Rome, from their being driven to shelter among the rocks for the purpose of celebrating their religious exercises. See DEAN.

Rupstein, J. G. E. Friedrich, a German doctor of theology and abbot of Loccum, was born Aug. 80, 1794, at Wunsdorf. From 1813 to 1816 he studied at Göttingen, in 1820 he was made chaplain of the Neustädter Church in Hanover, in 1822 he was appointed pastor of the Schlosskirche, and in 1825 assessor of consistory. In 1826 he was made court preacher and consistory, in 1832 abbot of Loccum, and in 1866 first member of consistory, and died Oct. 7, 1876, in Hanover. He published, Auschnitt von Predigten (Hanover, 1832, 2 vols.): Dr. H. Ph. Szeetro (ibid. 1899), a biography. See Zochold, Bibl. Theol. p. 1106; Winer, Handbuch der theolog. Literatur, 144, 743; Schneider, Theologisches Jahrbuch, 1878, p. 227. (B. P.)

Rural Dean, a designation of a class of very ancient officers of the Church, who, being parish priests, executed the bishop's processions, inspected the lives and manners of the clergy and people within their district, and reported the same to the bishop. In order that they might have knowledge of the state of their respective deaneries, they had power to convene rural chapters. Much of their authority at the present day rests on custom and precedent. Their duties and powers vary in different dioceses. See DEAN.

Rural Deeney, a certain number of parishes placed under the supervision of a rural dean.

Ruridecanal Chapter, a chapter consisting of the parish priests of a rural deanery, assembled for convenient deenial. These chapters are of considerable antiquity, and were commonly assembled in medieval times once a year, at or about Whitsuntide. After the Reformation they were
employed for making partitions, etc. It is about six feet high, with annual stems, and is abundant about the banks of pools and rivers and in marshes. The panicule of flowers is very large, much subdivided, a little drooping and waving in the wind. The plant is used for thatching, making screens, garden fences, etc.; when split it is made into string, mats, and matches. It is the 

2. Gómé (γόμη; Sept. παριγός, βιδόμος, λαός; Vulg. secrerus, secrupus, paprusus, juncus) is found four times in the Bible. Moses was hid in a basket made of the papyrus (Exod. ii. 3; A.V. "bulrushes"). Transit boats were made out of the same material by the Ethiopians (Isa. xviii. 2; A.V. "bulrushes"). The gómé (A. V. "rush") is mentioned together with kamhé, the usual generic term for a "reed," in Isa. xxxv. 7, and in Job viii. 11, where it is asked, "Can the gómé (A. V. "rush") grow without mine?" The name gómé, according to Celsius (Hierob. ii. 138), is derived from γόμη, "absorbere, bitum, quia in aqua nascitur, et aquam semper inhabibat" (comp. Lucrex, Phara. iv. 136). Though other plants are added by translators and commentators as the gómé of Scripture, it yet is evident that only the papyrus can be meant, and that it is well suited to all the passages. Being in some respects so obvious, it could not escape the notice of all translators. Hence, in the Arabic version and in the Asmaul of Eusebius, the word bardi, the modern Arab name of the papyrus, is given as the synonym of gómé in Exod. ii. 3. In Arabic authors on materia medica we find the papyrus mentioned under the three heads of Faisir, Bardhi, and Carthas. Faisir is said to be the Egyptian name of a kind of bardhi (bur-reed) of which paper (chewr) and of bardi is made, and the word faisir (evidently a corruption of papyrus) is given as the Greek synonym. See Paper-reed.

(1.) The papyrus is now well known; it belongs to the tribe of sedges, or Cyperaceae, and is not a rush or bulrush, as in the A.V. It may be growing to the height of six or eight feet, even in tubs in the hot-houses of England, and is described by the ancients as growing in the shallow parts of the Nile. The root is fleshy, thick, and spreading; the stems triangular, eight or ten feet in height, of which two or so are usually under water, thick below, but tapering towards the apex, and destitute of leaves. The base leaves are broad, straight, and sword-shaped, but much shorter than the stem. This last is terminated by an involucre of about eight leaves, sword-shaped and acute, much shorter than the many-rayed umbel which they support. The secondary umbels are composed of only three or four short rays, with an involucre of three awl-shaped leaflets. The flowers are in a short spike at the extremity of each ray. Cassiodorus, as quoted by Carpenter, graphically described it as it appears on the banks of the Nile: "There rises to the view this forest without branches, this thicket without leaves, this hardest, most impenetrable of all thickets that can be imagined. It is found in stagnant pools as well as in running streams, in which latter case, according to Bruce, one of its angles is always opposed to the current of the stream.

The papyrus was well known to the ancients as a plant of the waters of Egypt: "Papyrus nascitur in palustribus Egyptianis in quaeque parietem Nili aqua, ubi egerat, in nubibus spasimus et dormientes habitat" (Pliny, xiii. 11). The papyrus was much earlier described, as it growing not in the deep parts, but where the water was of the depth of two cubits or even less. It was found in almost every part of Egypt inundated by the Nile, in the Delta—especially in the Sebenitic nome—and in the neighborhood of Memphis, etc. By some it was thought peculiar to Egypt; hence the Nile is called by Ovid "annis papyrus." So a modern author, Prosper Alpinus (De Plant. Egyptian, c. 86): "Papyrus, quam bardi Egyptiani nominant, est planta fluminis Nili." By others it was thought to be a native, also, of India, of the Euphrates near Babylon, of Syria and of Sicily. The genus Cyperus, in which it is usually referred, abounds in a great variety of large aquatic species, which it is difficult for the generality of observers to distinguish from one another; but there is no reason why it should not grow in the waters of hot countries, as, for instance, near Babylon or in India. In fact, modern botanists having divided the genus Cyperus into several genera, one of them is called papyrus and the original species F. Nilotica. Of this genus papyrus there are several species in the waters of India (Wight, Contributions to the Botany of India, "Cyperus," p. 88).

The papyrus reed is not now found in Egypt; it grows, however, in Syria. Dr. Hooker saw it on the banks of Lake Tiberias, a few miles north of the town. It appears to have existed there from the earliest times. Theophrastus (Hist. Plant. iv, 8, § 4) says: "The papyrus grows also in Syria around the lake in which the sweet-scented reed is found from which Antigonus used to make his perfumes," and also in a small stream two miles north of Jaffa. Dr. Hooker believes it is common in some parts of Syria. It does not occur anywhere else in Asia. It was seen by lady Callcott on the banks of the Anapus, near Syracus, and Sir Joseph Banks possessed paper made of papyrus from the lake of Thrasyneum (Script. Herb, p. 379).

(2.) A brief description of the uses of this plant, as given in the works of the ancients, is thus summed up by Parkinson in his Herbal, p. 1297: "The plant, say the ancients, is sweet, and used by the Egyptians, before that bread of corne was known unto them, for their food; and in their time was chew, and the sweet above sucked forth, the rest being spit out; the roots serveth them not only for fowell to burne, but to make many sorts of vessels to use, for it yielded much matter for the purpose. Papyrus ipsis (say they), that is the stalke, is profitable to many uses, as to make ships, and of the barske to weave, and make sailes, mats, carpets, some kinds of garments, and ropes towards of the apices, and destitute of leaves. The base leaves are broad, straight, and sword-shaped, but much shorter than the stem. This last is terminated by an involucre of about eight leaves, sword-shaped and acute, much shorter than the many-rayed umbel which
A. The construction of papyrus boats is mentioned by Theophrastus. So Pliny (Hist. Nat. vi. 24) says, "Papyrus is the paper of Egypt in the Nile."

Plutarch, as quoted by Rosenmuller, says, "Iasus circumnavigated the marshes in a papyrus boat, which was a common practice among the Egyptians in the time of the pharaohs, having a keel of acacia wood, to which the papyrus plants, fastened together, were fastened, being gathered up and behind, and the ends of the plants tied together. Representations of some Egyptian boats are given in Kitto's Pictorial Bible (ii. 185), where the editor remarks that when a boat is described as being of rushes or papyrus, as in Egypt, a covering of skin or bitumen is to be understood. Ludolf (Hist. Eth., i. 8) speaks of the Tsimic lake being navigated "moneylon stenix in typha proccressa confertis," a kind of sailing, he says, which is attended with considerable danger to the navigators. Wilkinson (Anc. Egypt, ii. 96, ed. 1838) says, "The right of growing and fishing in the papyrus plants belonged to the government, who made a profit by its monopoly, and thence the species of the Cyperaceae must be understood as affording all the various articles—such as baskets, canoes, sails, sandals, etc., which have been said to have been made from the real papyrus. Considering that Egypt abounds in Cyperaceae, there are many kinds of which might have served for forming canoes, etc., it is improbable that the papyrus alone should have been used for such a purpose; but that the true papyrus was used for boats there can be no doubt, if the testimony of Theophrastus (Hist. Plant. iv. 6, 4), Plutarch (Hist. Nat. xii. 11), and other ancient writers is to be believed."

C. From the soft cellular portion of the stem the ancient material called papyrus was made. "Papyri," says Sir G. Wilkinson, "are of the most remote Pharaonic periods. The mode of making them was as follows: the interior of the stalks of the plant, after the body had been removed, was cut into thin slices in the direction of their length; and these being laid on a flat board in succession, similar slices were placed over them at right angles; and their surfaces being cemented together by a sort of glue and subjected to a proper degree of pressure and well dried, the papyrus was completed. The length of the slices depended, of course, on the breadth of the intended sheet, as that of the sheet on the number of slices placed in succession beside each other, so that though the breadth was limited, the papyrus might be extended to an indefinitely length."

See WITTING.

Rush, Benjamin, M.D., LL.D., a distinguished American physician, was born near Bristol, in the vicinity of Philadelphia, Jan. 5, 1745. At nine years of age he was placed under the tuition of Dr. Samuel Finley, who was subsequently president of Princeton College. By him he was prepared for college, and entered the above-named institution under the presidency of Dr. Finley, and graduated in 1760. During the six years he devoted to the study of medicine under the preceptorship of Dr. John Rodman, of Philadelphia. To perfect himself in the science of medicine, he went to Europe, and attended medical lectures at the University of Edinburgh for two years, and afterwards spent some time in the London hospitals. In 1769 he returned to Philadelphia. He was not at first enter upon the practice of his profession, and was not long in obtaining an extensive and lucrative practice. He was appointed professor of chemistry in the University of Pennsylvania in 1789, and in 1791 professor of the theory and practice of medicine, and subsequently of the institutes of medicine and clinics, which he held during life. He was elected member of Congress in 1776, and signed the Declaration of Independence. He was appointed surgeon-general of the Middle Department of the army, and also physician-general. He resigned this post in 1778; and, after serving as delegate to the state convention of which he was a member, he retired to the United States, and, since 1813, has been the practice of his profession. His writings are mostly on medical subjects, and were published in five volumes. That on mental diseases, published in 1812, is especially valuable as to its bearing on medical jurisprudence. He was an enlightened and practical Christian, abounding in charity and mercy. He died in Philadelphia on Jan. 31, 1813. He published numerous pamphlets on moral, scientific, and social topics, for which and other literature, see Allborne, Dict. of Brit. and Amer. Authors, a v. (W. P. S.)
RUSSEL

RUSSIA

Russell, James, a distinguished minister of the Methodist Episcopal Church, was born in Mecklenburg County, N. C., about 1786. He was admitted on trial in the South Carolina Conference in 1805, but located, on account of ill-health, in 1815, and died Jan. 16, 1825. Mr. Russell had great power in the pulpit. See Sprague, Annals of the Pulpit, vii.

Russell, John, D.D., an English clergyman, was educated at the Charter House, and thence was elected student of Christ Church, Oxford, graduating in 1806. He was ordained in 1810, was head-master of the Charter House from 1811 to 1832, and canon of Canterbury in 1827. He became rector of St. Botolph's, Bishopsgate, and secretary of the Metropolitan Orphan Corporation in 1849. His death occurred in 1863. He published, Rudimenta Latina — English Grammar (London, 1832, 18mo.), which has run through eleven editions;—The Spital Pulpit (1858, 4to);—Concio ad Clerum (1853);—Besides Sermons, etc.

Russell, Michael, a Scottish prelate, was born at Edinburgh in 1781, and graduated from the University of Glasgow in 1806. He became minister at Allas in 1808, and of St. James's Chapel, Leith, in 1809, in which charge he continued during life. He was made dean of Edinburgh in 1831, bishop of Glasgow and Galloway in 1837, and died in 1848. Russell wrote, View of Education in Scotland (1815, 8vo);—Connection of Sacred emoluments etc. (London, 3 vols., 8vo; vols. i and ii, 1827; vol. iii, 1837);—Discourses on the Millennium (1859, 12mo);—History of the Church in Scotland (London, 1834, 2 vols. sm. 8vo);—Besides other several histories. See Allibone, Dict. of Brit. and Amer. Authors, s. v.

Russell, Alexander, physician to the English factory at Aleppo, was born and educated at Edinburgh. After a residence of many years in the East, during which he made himself familiar with the Turkish language, and gained great celebrity by his practice, he returned to Europe, and published his Natural History of Aleppo, a valuable performance, which has been translated into various languages. In 1759 he was elected physician of St. Thomas's Hospital, which position he sustained until his death, in 1770.

Russell, Moses, a Presbyterian minister, was born in Greene County, near Xenia, O., Feb. 29, 1812. He was early operated upon by the influences of the Holy Spirit; he felt his call to the ministry, and God opened up a way for him to follow the desire of his heart. In 1833 he completed his preparatory studies, and in 1837 graduated both at Marietta University, and pursued a course of his theological studies under the direction of the Rev. John S. Galloway, of Springfield, O., and finished the course at Hanover and Allegheny seminaries. In 1840 he was licensed to preach, and in November of the same year was ordained and installed pastor of the Cliffon Presbyterian Church, where he continued to labor until the day of his death, March 23, 1864. During this pastorate of almost a quarter of a century the Church increased greatly in numbers and strength, and erected a large and commodious church edifice. Mr. Russell was an active, faithful minister of the Gospel. His preaching was doctrinal and practical. His sermons were rigidly systematic, formed after a Scripture model. During his life he preached over 3000 times, and has left over 1000 written sermons. See Wilson, Preb. Hist. Almanac, 1865, p. 116. (J. L. S.)

Russell, Robert D., a Presbyterian minister, was born in Guilford County, N. C., March 23, 1798. He was educated at the academy at Greensborough, and the University of North Carolina, at Chapel Hill; studied divinity in the Union Theological Seminary at Prince Edward, Va., and was licensed by Orange Presbytery in 1829. In 1832 he labored for Goshen and Olney churches, in Lincoln County, N. C.; in 1834 in Tusculumia and Russellville, Ala.; and in 1837 he removed to Nanapola, and was ordained in that year by the South Alabama Presbytery. He was agent for the American Bible Society, and preached at Geneva, Tomskpinville, London, and Shell Creek, and at Nanapola, near which place he died, April 16, 1867. See Wilson, Preb. Hist. Almanac, 1868, p. 568. (J. L. S.)

Russell, Robert Young, a Presbyterian minister, was born in Antrim County, Ireland, April 18, 1800. In 1801 his parents emigrated to the United States, and settled in York District, S. C. After acquiring a good English education, he commenced the study of the languages under Dr. Samuel Wright, of Turkey Creek; subsequently taught school in order to obtain pecuniary means; and in 1820 entered Salem Academy in Union District, and thence went to Yorkville, where he completed his academic course under the care of Rev. Robert M. Davis. During this period he had, from honest and earnest convictions of truth and duty, connected himself with the Independent Presbyterian Church; and in view of the apparent necessities of this Church, then in its infancy, he was induced to forego his cherished design of completing his studies, and in 1824 he commenced the study of divinity under Rev. R. M. Davis. He was licensed by Yorkville Presbytery of the Independent Presbyterian Church, in 1825, and ordained by the same presbytery, April 22, 1826. He removed to Mount Tabor, in Union District, where he taught school for a time, and where he organized a Church to which he preached for many years. Thence he removed to the bounds of Bullock Creek Church, and became the pastor of that Church in May, 1836. His labors continued for thirty-seven years. He died Nov. 5, 1866. Mr. Russell was a man of unifirm zeal and impressive power as a minister of the Gospel. He had the most remarkable success all through his ministry. For thirty years prior to the union of the Independent Presbyterian Church and the Independent Presbyterian Church, he was the acknowledged and honored head of that branch of the Church in which he had cast his lot. He loved this Church and her peculiar doctrines, and yet in every endeavor which was made to heal the breach he gave his hearty approval and earnest aid. See Wilson, Preb. Hist. Almanac, 1867, p. 490. (J. L. S.)

Russia, one of the largest empires of the world, containing in 1881 an area of 8,500,000 square miles, a population of 105,710,282 souls, has, under its rule, the one-fifth of the entire surface of the earth, and still continues to expand in Asia. It is in point of territory about equalled by the British empire, but is more than twice as large as any other country. Among the Christian nations it is the foremost standard-bearer of the interests of the Greek Church, being not only the only Christian power from which this Church has been retaining within its borders fully seventy-seven per cent. of the aggregate population connected with it. More than any Catholic or Protestant state, the government of Russia uses its political influence for advancing the power of its official Church at home as well as abroad; and has recently not only co-operated in the re-establishment of a number of independent co-religious states in the Balkan peninsula, but is rapidly planting the creed of the Greek Church among the subject tribes of Asia, and also, to some extent, in the adjacent countries. The Russian empire, by its vast conquests in Europe and Asia, embraces a variety of religions, even the Mohammedan and heathen. The relation of the state to other forms of religion is determined by Article 40 et seq. of the first volume of the Russian law, as follows: "The ruling faith in the Russian empire is the Christian Orthodox Eastern Catholic declaration of belief. Religious liberty is not only assured to Christians of the orthodox faith; but also to Jews, Mohammedans, and pagans, so that all people living in Russia may worship God according to the laws and faith of their ancestors." This law, however, is interpreted in such a manner as to mean that religious liberty is assured only so long as a member of an orthodox Church adheres to the faith in which he was
RUSSIA 161 RUSSIA

ton; but all orthodox churches are forbidden to re-
ceive as members proselytes from other churches. A
severe penalty is imposed upon any one who leaves a
Christian for a non-Christian church.

I. The Russian Church.—1. Its Origin and Progress.

The Russian empire begins with the elevation in 862
of the Norman Ruric to the throne. At that time, the
territory inhabited by the Russians was without Chris-
tian churches. A Russian tradition, according to which
the apostle Andrew had planted the first cross at Kiev,
cannot be authenticated. The Slavonic, Greek, and Chry-
sian authors speak of the triumphs of Christianity among
the Scythians and Sarmatians, and a doubtful inference
has been drawn from their words that Christianity had also
made converts among the Russians at this early period.
If really any congregations were organized, they perished
during the migration of nations. It is reported that in
the 9th century patriarch Ignatius of Constantinople
sent again missionaries to the Russians, and patriarch
Photius praised them for their enthusiastic desire for the
Gospel—a praise which was not verified by subse-
quent events. In 955, Olga, the widow of Igor (912-
96), and regent of Russia, during the absence of her
son Svyatoslaw, procured baptism for herself in Constan-
tinople from the patriarch Theophylact, and had her
name changed to Helena; but even to the close of her
life she could enjoy the services of a Christian priest
only in secret. Her pious desire to see her son con-
verted was not fulfilled; but her grandson Vladimir I
(962-1015) in 988, freely embraced Christianity himself
(988), but at once decided the triumph of Christianity in the empire. After investigating the conflicting claims of Mohammedan,
judaism, and Christianity, as represented by mis-
sionaries of these various creeds, he was won over by
the enthusiastic accounts which his amontsellers to
Constantinople made of the splendor of the Eastern
service in the Church of Sophia. The people cried
when the images of Peroun and other gods were cast
into the Dnieper, but without active resistance yielded
to the demand of Vladimir that the people be bap-
tized. His son Yaroslav (1019-54) nearly completed
the conversion of the Russians who remained in close con-
nection with the see of Constantinople. A metropolitan
see was established at Kief, which was called a second
Constantinople. The fifth metropolis, Hilairion (1051-
71), was elected by order of grand-duke Yaroslav at
the Council of Kief without the co-operation of the pa-
tricians and patriarch of Constantinople. Vladimir III,
who became the 11th century a famous seminary of
the Russian clergy and a flourishing seat of Russian
literature. Here the monk Nestor (1056-1111) wrote
his Annales, the chief source of information for the
earliest history of the Russian Church. The rapid
growth of the Church, and the great practical strength
which it displayed so soon after its establishment, nat-
urally attract the attention of the Church historians,
who attribute it chiefly to the fact that the Church, at
its foundation, found the translation of the Bible by
Cyril and Methodius into the national Slavonic language
ready for use. The practical strength displayed by the
Russian Church in obtaining confirmation, and its great
power arising, as Russia alone among the European nations
(unless Spain and Hungary be counted exceptions) was
Christianized without the agency of missionaries, and
chiefly by the direct example, influence, or command
of its prince. The Russian Church has dignified its
founder, prince Vladimir the Great, by the title of \textit{the
first among the elders}, and the same honor has been conferred upon another prince
of the 13th century, Alexander Nevski, so called from a
victory on the banks of the Neva, in which he expelled
the Swedes. Besides these two saints, two other princes
are held in high veneration—the one, Yaroslav (1017)
for the edification and adornment of Russia, and the
other, Vladimir III, surnamed Monomachos, for being a model of a just
and religious ruler. Ivan I transferred (1825) his resi-
dence, and with it the primacy of the Russian Church,
from Kief to Moscow. Gradually the metropolitans of
the Russian Church became independent of Constantin-
ople and the patriarchate of Kief.

2. Church Government and Rites. In the middle of the 17th century, by
appointment of the grand-prince metropolitan of Moscow,
and recognised by a synod of all the Russian bishops
held at Moscow as metropolitan of Russia. He was the
first in whose appointment the "great church" had no
direct share. The metropolitan of Moscow remained,
however, in close and friendly relations with the pa-
tricia of the Byzantine empire, and conjunctly with
them the metropolitan Isidor attended the Union
Council of Florence. The fall of Constantinople in 1453
smoothed the way for an entire independence of the
Russian Church, which, however, was not fully estab-
lished until 1587. In that year, the patriarch Jeremiah
of Constantinople, while visiting Russia to obtain sup-
port, consented to turn the metropolitan of Moscow into
a patriarch in the person of Job, the patriarchate of
Russia thus taking, in the opinion of the Eastern bish-
ops, the place of the schismatic patriarch of Rome.

It was further arranged that the Church of Russia be gov-
erned by four metropolitans, six archbishops, and eight
bishops. Soon, however, the patriarchs of Alexandria
and Jerusalem, sixty-five metropolitans and twelve eng-
archbishops of the Byzantine empire, declared their con-
currence in the independent organization of the Russian
Church. The Moscowite patriarchs continued, how-
ever, to apply to Constantinople for confirmation until
1667, the last appeal being in 1657. Soon after the 17th century, Russia received from patriarch Dionysius II of Constantinople and the other Greek patriarchs the documentary de-
claration that the Russian patriarch might in future be
elected by his own clergy without needing a confirma-
tion by the Greek patriachs. The Roman popes of the
16th century, especially Leo X, Clement VII, and Greg-
ory XIII, made renewed efforts for gaining over the
Russian Church to a union with Rome. When Ivan
Vasilivitch (1533-84) had been defeated by the Poles,
he intimated a readiness (1581) to unite with the
Roman Catholic Church as long as he needed the help
of the emperor and the mediation of the pope. Gregory XIII sent the Jesuit Possesvino to the grand-
prince, who held a religious dispute with the Rus-
sians, in which the grand-prince himself took part.
Possesvino was, in the end, unsuccessful in Russia; but
ins those Russian provinces which fell with Lithuania
into the hands of the Poles, his efforts had the desired
effect. The union of 1589 was finally confirmed
by the patriarchs Jeremiah and Job, who convoked the bishops of his metropolitan district to a synod held
at Brzesc (1598), where the union with Rome was ef-
fected in conformity with the agreement which had
then been formed in Florence, with a great respect at
first for old ancestral usages. Clement VII announced
the union to the Catholic world in his bull \textit{Magnus Domi-
nus ac Laudabilis}, and confirmed the metropolitan in
the possession of his traditional rights of jurisdiction
(1596), including the right of confirming the bishops of
his metropolitan diocese; only the metropolitan him-
self was to apply to the papal nuncio in Poland for
the confirmation of his metropolitan. Joseph Joges, who refused to enter into the union with Rome, Peter
Mogila was in 1633 elected orthodox metropolitan of
Kief, with the approbation of king Vladislav IV. As a
bar against the further advance of Roman Catholic and
Protestant views, Mogila composed (1642) a catechism,
which was carried by all the clergy of the Russian,
an official confession of the orthodox Eastern Church.

Important innovations in the liturgy of the Russian Church were made by patriarch Nikon, who has been
called by a modern Church historian (Stanley, \textit{History
of the Eastern Church}) "the greatest character in the
annals of the Russian hierarchy," "a Russian Chryso-
com," and also "in close and honest sympathy with the
Russian Luther and a Russian Wolsey." The most im-
portant among the changes introduced by him was the
revival of preaching, entirely without an example in the other Eastern churches at that time. Among the innovations which he made in the Russian ritual, in or- der to avoid it more conformity to that of Constantinople, were the employments with three fingers instead of two, a white altar-cloth instead of an embroidered one, the kissing of pictures to take place only twice a year, a change in the way of signing the cross, and in the in- fections in pronouncing the Creed. Many regarded these as a profanation of the holy mystery of the Trinity, and used to adopt them, but at that time their protests were put down with an iron hand. The man whose energy introduced a new period in Church history was finally himself deposed from his office. His severity had exasperated the clergy, his insolence had enraged the nobles. In 1667 a council of the Eastern patriarchs, convened at Moscow, and presided over by the czar, for- mally deprived him of his office.

A still greater change was introduced into the Russian Church by Peter the Great. The aim of his life was to civilize the Russian empire and to raise it to a level with the remainder of Europe. While travelling in Europe, he studied the systems of belief. He heard the doctrines and studied the religious belief of all the countries which he passed, but he concluded to remain a prince of the Orthodox faith. He believed, however, that he would be guilty of in- gratitude to the Most High if, "after having reformed by his gracious assistance the civil and military order, he were to neglect the spiritual," and "if the Imperial Judge should require of him an account of the vast trust which had been reposed in him, he should not be able to give an account." Among the practical reforms which he introduced were the increase of schools, re- strictions on the growth of monasteries, and regulations respecting the monastic property. But by far the most radical change was the abolition of the patriarchate and the substitution for it of a permanent synod, con- sisting of prelates presided over by the emperor or his secretary. After the death of the eleventh patriarch, Hadrian (1702), whose retrograde policy had greatly exasperated him, Peter allowed his see to remain va- cant, and transferred the administration of the patriarchate to the metropolitan of Riazan, who as exarch had not the full authority of the patriarch, and was not allowed to exercise all his functions. This semblance of a patriarchal government lasted for twenty years, and during this time various changes were gradually carried into effect. Taxes were levied on monasteries and cloisters and bishops, the titles and dignities of several episcopal sees which were offensive to the czar were abolished, and the episcopal jurisdiction, which in former times had been wholly unhindered, was now in many respects restricted. A number of reformatory regula- tions were issued for the government of the religious orders. For the reform of the secular clergy Peter wrote with his own hand twenty-six articles of Spiritual Regulations, and for the use of the bishops he issued a pastoral instruction. After having accustomed in this way the clergy and the people to an absolute submission to his authority, Peter summoned a synod of bishops, held in 1720 at Moscow, that a patri- archate was neither necessary for the government of the Church nor useful for the State, and that he was deter- mined to introduce another form of Church government which would be intermediate between the government by one person (the patriarch) and a general council, since the Church government of Russia to great inconveniences and difficulties on ac- count of the vast extent of the empire. When some of the bishops objected that the patriarchate of Kiev and of all Russia had been erected with the consent of the Oriental patriarchs, Peter exclaimed, "I am your patri- arch," knocking down his book and adding in an out- rage to what he was saying, "There is your patriarch!" The plan of Peter was vigorously supported by Theophanes, bishop of Pskov, and Demetrius of Rostoff, adopted by the episcopal synod, and sanctioned by the whole body of Eastern patriarchs. In the next year (1721), the Holy Governing Synod of Russia was instituted, and solemnly ordaining by an edict their obedience to the patriarch and synod. Even those who blame Peter for sub- jecting a Church formerly enjoying the fullest amount of self-government to the rule of the State readily ad- mit that its first members were the best men of the Russian Church, and generally esteemed on account of their eminent learning and piety. For his introduction of the patriarchate and the establishment of the Holy Synod fixed the position of the Russian Church among the large national divisions of Christianity, other measures led to the separation from it of a large number of ultra-conserv- atives, who could not bear the idea of seeing the smallest change in the holy faith of their forefathers. Peter resolutely continued the work of patriarch Nikon, and as the latter had introduced many innovations from Constantinople, Peter introduced new customs from the West. Thus, on the opening of the 18th century the emperor decreed that henceforth the year should no longer begin on the 1st of September and be dated from the 1st of January, but that the Gregorian calendar should be adopted and the new year begin on the 1st of January. Still more irritating for the uncompromis- ing opponents of ecclesiastical reforms was Peter's en- deavor to assimilate his countrymen to the West by for- bidding the use of the beard. The Eastern Church had been accustomed to a bare face, but Peter showed a decided sense of national dignity. Michael Ce- rularius had laid it down in the 11th century as one of the primary differences between the Greek and the Latin Church, and "to shave the beard had been pro- nounced by the Council of Moscow in the 17th century as a sin which even the blood of the martyrs could not expiate." So determined was the opposition which was made to this innovation that even Peter, with all his energy, quailed before it. The nobles and the gentry, after a vain struggle, had to give way and be shaved; but the clergy were too strong for the czar, and the magnificent beards which the Russian priests are known to wear to the present day are the expressive proof of the ecclesiastical victory they gained in this particular over the reforming czar. The implacable enemies to the reforms of Nikon and Peter sullenly withdrew from the communion of the Established Church, and under the name "Raskolniki" (Separatists), or, as they call themselves, "Staroverzy" (Old Believers), have continued separate ecclesiastical organizations to the present day.

The reigns of most of the successors of Peter during the 18th century have left no marked influence upon the progress of the Russian Church. None of them continued the work of political reform with such energy as Catharine II. She was a friend of Voltaire, but did not deem it expedient to open to the deistic tendencies of Western Europe a road to the National Church of her dominions. During her reign, Ambrose, the learned archbishop of Moscow, came to a violent death (1771) by the populace of that city because he had ordered the removal of a miraculous picture to which the people of Moscow had recourse in an hour of distress. See AMBROSE. "I send you the incident," wrote the empress Catharine in one of her letters to Voltaire, "that you may record it among your instances of the effects of fanaticism." One of his successors to the see of Moscow, Plato, has attained outside of Russia a greater celebrity than any other Russian bishop. He was the favorite both of the civilized Catharine II and for a time of her savage son, Paul, and in the last years of his life was the trusted confidant of Alexander I in the terrible year of the French invasion. Alexander I made noble efforts to raise the educational standard of the Russian people, and thus contributed much to the improvement of the Church schools established on all the lands belonging to the crown, improvements made in the theological seminaries, and the respect of the people for the priestly character strength-
RUSSIA

RUSSIA

used by exempting the priests from the knout. For a time, Alexander showed himself very favorable to the principles of evangelical Protestantism; and when the British and Foreign Bible Society was formed in London, Alexander requested the society to establish a branch in St. Petersburg. In the labors of the Russian Bible Society he took a warm interest. At his request, the Holy Synod prepared a translation of the New Testament, into Russian, and into all the other languages spoken in the Russian empire. The emperor's inclination towards Biblical theology and experimental religion was greatly strengthened by the influence which in 1814 the pious and enthusiastic baroness von Krüdener gained over him; but in the latter years of his reign, his opposition to the Establishment of the Ecclesiastical opposition to the Bible Society, and it was finally abolished under Nicholas I in 1826. In the same year, Philaret, formerly bishop of Reval and archbishop of Iver, was appointed archbishop of Moscow. He has been called the most gifted and influential archbishop of Russia since Nikon. He revived in the Church the spirit of austerity asceticism, inflamed the religious enthusiasm of the people in the wars against the Mohammedan Turks and the Catholic Poles, vigorously aided the emperor in preparing the abolition of Russian serfdom, and made valuable contributions to the theological literature of the Russian Church. During the reign of Alexander II, the Russian Church has been the foremost efforts for the conversion of the Mohammedan and pagan subjects of the vast empire, and inducements were held out to those who might become converts to Christianity. The missionary zeal thus awakened was greatly strengthened during the reign of Nicholas I (1825-55), when schemes were formed and extensively supported for the consolidation of all the tribes of the vast empire into one language and one religion. The Armenian Church, which, in consequence of the conquest of a part of the Persian territory by Russia, saw the seat of its ecclesiastical head, the catholicos of Echmiadzin, placed under Russian rule, showed itself disinclined to being incorporated with the Russian Church; but the United Greeks of the formerly Polish provinces, who during Polish rule had been induced to recognize the supremacy of the pope, yielded to the influences brought to bear upon them by the Russian government. These exertions were begun as soon as Catherine II had acquired the Crimea, which he undertook to govern, and it has been calculated that during the reign of this empress about seven millions of United Greeks joined the Russian Church. Little was done for this purpose during the reigns of Paul and Alexander I, but Nicholas I resumed these efforts with extraordinary vigor; and in 1833, the bishops and clergy of the United Greek Church of Lithuania and White Russia were induced at the Synod of Polotak to declare in favor of a union with the Russian Church.

Only one United Greek diocese—Chelm, in Poland—remained in communion with Rome until about 1877, when the majority of its priests and people were reported to have likewise been received into the Russian Church by the diocese of Novgorod.

The missions among the pagan tribes of the empire made considerable progress, and especially Innocent, archbishop of Kamchatka, became a much-praised example of the revived missionary spirit in the Russian empire, traversing to and fro the long chain of pagan islands between North-eastern Asia and the western coast of North America. The reign of Alexander II (since 1855) has been prolific of important reforms in the civil administration of the empire. Some of them, as the total abolition of serfdom, and the organization of a system of public schools, have had a considerable and favorable reaction upon the progress of the national Church. The efforts made to establish Russian churches and Christian education among the tribes of the empire in one tongue and one creed gained in vigor and extent. The great Eastern war of 1877 was proclaimed by the Russian bishops as a holy religious war for the overthrow of the Mohammedan power over the Orthodox Eastern churches in the Turkish empire, and made the Russian Church appear to a greater extent than ever before as the standard-bearer of all the interests of the Oriental Eastern Church. The increasing missionary zeal of the Church overstepped the boundaries of the empire and founded missions in China and Japan which were prosperous beyond all expectation. In the years 1879-1880, Russia, Europe, and of the United States, Russian priests were appointed by the Russian government to gather not only the Orthodox Russians, but all persons belonging to the Eastern Oriental Church, into permanent congregations, and in 1879 even a bishop, with his residence in San Francisco, was appointed to exercise the functions of the see of St. Peter in the Far West and the Pacific coast of North America. A strong desire for establishing friendly intercourse and relations with other churches of episcopal constitution made itself felt among many of the most educated and zealous priests and laymen of the Church, and "societies for religious enlightenment" were formed at St. Petersburg and in other cities which proclaimed the promotion of this intercourse as one of their chief objects. The grand-duke Constantine, brother of Alexander II, is an enthusiastic patron of this movement and the president of the St. Petersburg society.

2. Doctrinal Basis of the Russian Church.—Although the connection between the Russian Church and the other sections of the Orthodox Eastern Church has for some time been severed, they have remained in entire union with regard to their common doctrine. Some (Schaaff, "Creeds of Christendom," i, 70) regard as the most hopeful feature of the Russian Church the comparatively free circulation of the Scriptures, which are more highly esteemed and more widely read than in other parts of the Eastern Church. Hepworth Dixon (Free Russia, p. 290) says that the Russians, next to the Scotch and the New-Englanders, are the greatest Bible-readers, but it must be remarked that not more than one out of ten Russians can read at all. Dr. Pinkerton, an English Independent, who for many years resided and travelled in Russia as agent of the British and Foreign Bible Society, takes, in his work on Russia (London, 1838), a hopeful view of the future of the Russian Church, "for the Church that permits every one of its members to read the Scriptures in a language understood by all, and which has been calculated that, with the growth of the clergy, and the establishment of the highest tribunal in matters of faith on earth, is possessed of the best reformer of all superstition." It is also noteworthy that the treatise on The Duty of Parish Priests, which was composed by archbishop Koninck of Mohyley, aided by bishop Sopofsky of Smolensk (St. Petersburg, 1776), and on the contents of which all candidates for holy orders in the Russian seminaries are examined, approaches more nearly the Protestant principle of the supremacy of the Bible in matters of Christian faith and Christian life than any deliverance of the Eastern Church. Thus it says, "All the articles of the faith are contained in the Word of God; that is, the apostolic faith as it is contained in the book of Holy Scripture, as it is called in the Old and the New Testament. The Word of God is the source, foundation, and perfect rule, both of our faith and of the good works of the law. The writings of the holy fathers are of great use, but neither the writings of the holy fathers nor the traditions of the Church are to be confounded or equalled with the Word of God and his commandments" (see Schaaff, "Creeds of Christendom," i, 73).

Notwithstanding this respect for the Russian Church for the supreme authority of the Scriptures, it has never been prevailed upon to hold ecclesiastical communion with any other than the several branches of the Orthodox Eastern (commonly called Greek) Church. An interesting example of its esteem for the Old and the New Testament, and co-operation between the Russian Church and some English bishops was made from 1717 to 1723 by two High-Church English bishops, called Nonjurors (for refusing to renounce their oath of allegiance to James,
II.), in connection with two Scottish bishops. They wrote to this end, in October, 1717, to Peter the Great and the Eastern patriarchs. The patriarchs, in 1723, sent their ultimatum, requiring as a term of communion an absolute submission of the British to all the dogmas of the Greek Church. The "Most Holy Governing Synod" of St. Petersburg was more polite, and in tranquility of the manner of the patriarchs proposed, in the name of the czar, "to the most revered the bishops of the remnant of the Catholic Church in Great Britain, our brethren most beloved in the Lord, that they should send two delegates to Russia to hold a friendly conference, in the name and spirit of Christ, who will be chosen by them, or by it may be more easily ascertained what may be yielded or given up by one or the other; what, on the other hand, may or ought for conscience' sake to be absolutely denied." The conference, however, was never held, for the death of Peter the Great put an end to the negotiations.

A more serious attempt to effect intercommunion between the Anglican and Russo-Greek churches was begun in 1862, with the authority of the Convocation of Canterbury and the General Convention of the Protestant Episcopal Church in the United States. In the session of the latter held in New York in 1862, a joint committee was appointed to consider the advisability of opening communication with the Russo-Greek Church, to collect authentic information about the subject, and to report to the next general convention." Soon afterwards (July 1, 1865) the Convocation of Canterbury appointed a similar committee looking to "such ecclesiastical intercommunion with the Orthodox East as should enable the laity and clergy of either Church to join in the sacraments and offices of the other without forfeiting the communion of their own Church." The Episcopal Church in Scotland likewise fell in with the movement. These committees corresponded with each other, and reported from time to time to their authorities. "Two Eastern Church associations were formed, one in England and one in America, for the publication of interesting information on the doctrines and worship of the Russo-Greek Church. Visits were made to Russia, fraternal letters and courtesies were exchanged, and informal conferences between Anglican and Russian dignitaries were held in London, and Moscow. The Russians, however, as well as the other branches of the Orthodox Eastern (Greek) Church, did not show the least disposition towards making any concession. A number of Russian divines took an active part in the Old Catholic reunion conferences at Boun in 1874 and 1875; but although the Anglican and Orthodox divines here surrendered as a peace-offering the filioque of the Western Creed, the Orientalas made no concession on their part. 3. Ecclesiastical Polity.—In regard to Church constitution, the organization of the Holy Governing Synod has established a considerable difference between the Russian Church, on the one hand, and all the other sections of the Orthodox Eastern Church, on the other.

(1.) The Holy Synod.—The members of the synod are partly priests, partly laymen. All of them are appointed by the czar, who has also the right to dismiss them whenever he pleases. They meet at St. Petersberg in a special part of the large building which has been erected for the high imperial boards. At first the synod had twelve clerical members, one president, two vice-presidents, four counsellors, and four assessors. The twelfth member was destined for the synodal office at Moscow. Three of the twelve clerical members had to be bishops, the others were to belong to different deaconries. The synod has the power to appoint an archimandrite or protopresbyter from any diocese the bishop of which was a member of the synod, as it was feared that the former might be influenced by their bishop. According to the pleasure of the czar, the number of the clerical members was, however, some-times larger, sometimes smaller than twelve. No episcopate see except that of Grussia (Tiflis) confers ecc. office upon its occupant the right of membership in the Holy Synod, but the metropolitanos of St. Petersburg, Moscow, and Kief invariably belong to it. Some of the members are obliged to reside at St. Petersburg, others are absent; members who are invited only when the matter in question is of great importance, do not resign their seats. The synod is always presided over by the oldest metropolitan. The most prominent among the lay members is the procurator-general of the synod. He represents the czar, makes the necessary preparations, has the right of veto, and carries out the measures which have to be voted. Every member of the synod, before taking his seat, must swear a solemn oath to discharge faithfully the duties of his office, to be loyal to the czar and his successor, and to recognise the czar as the highest judge in the synod. The salaries of the members of the synod were at first paid from the property of the former patriarchate, which after its abolition was called synodal property. At present they receive a very moderate fixed addition to the salaries which they derive from their regular ecclesiastical office (as archbishops, bishops, or priests). The synod is subject to the emperor, and receives his orders; on the other hand, all prelates and clergymen elected by the greater synod are subject to the synod. The main object of the synod are to preserve purity of doctrine, to regulate divine service, and to act as the highest court of appeal in all Church matters. The Synod has to prevent the spreading of heresies, to examine and censure theological books; it is entitled to prescribe ceremonies, and to see to it that they are observed. It has to superintend all churches and convents, to present to the czar suitable candidates for the vacant positions of archimandrites and prelates, and to examine the candidates for episcopal see. It may transfer bishops to other sees, remove them, or send them to a convent. It acts as a court of appeal from the decisions of the bishops, and receives the complaints of any clergyman against his superiors. It has the right in doubtful cases to give instruction to the prelates; but it can make new laws only with the consent of the czar. It can grant dispensation from ecclesiastical laws, as from the rigid observation of the fasts. All trials which were formerly under the jurisdiction of the bishops, are now to the jurisdiction of the synod; among them are trials for heresy (against the Raskolinskas), blasphemy, astrology; for doubtful, unlawful, and forced marriages; for adultery, divorce. Fornication and abduction are tried before secular courts. In affairs which are partly of an ecclesiastical and partly of a secular character, the synod acts conjointly with the senate, to which it is, in general, co-ordinate. The administrative functions of the synod are divided into two sections, the Economical Department (or College of Economy) and the comptroller's office. All affairs which involve an outlay of money—as the erection of churches, schools, convents, payments supports of clergyman, and so forth—are first submitted to the Economical Department. The Department of Comptol has to examine whether the money assigned have been properly used, and to examine the accounts. Since 1809 all sums realized by the sale of consecrated candles and other objects which the faithful present to the Church, as well as the proceeds of the voluntary offerings of the people, have to be sent by the bishops to the synod, which distributes them among the eparchies according to their several wants. The treasury of the synod, which receives all these moneys, stands under the special control of the two youngest members of the synod, and does not even explain to the czar its expenditures. In 1839 the commission of ecclesiastical schools, which had been established in 1806, was dissolved by the czar, and the Holy Synod was charged with the direction of these schools. Subordinate to the Holy Synod are—1. the synodal
office of Moscow, which is presided over by the metropolitan of the city, who is assisted by a vicar-general, one archimandrite, and one protopresbyter; 2, the synodal office of Grussia, in which the metropolitan of Tiflis and Grussia presides, being assisted by two archimandrites and one archimandrite; 3, the archbishop of the former Greek United Church in White Russia and Lithuania, presided over by the archbishop of Lithuania, who is assisted by three members of the secular clergy. The synod has two printing-offices, in St. Petersburg and Moscow, in which all the acts of the synod are printed, and all the acts of the bishop are printed. The synod has also a printing-office in Moscow. The synod has printed all the books it has published, and all the books printed for its use. The synod has printed all the books it has published, and all the books printed for its use.

to seven members. They are presented to the synod by the bishop, and, after their confirmation, can only be removed with the consent of the synod. Each consistory has its own chancery, which generally consists, in ecclesiastical seminaries, of several archdeacons, in eparchies of the second, of twenty-one, and in eparchies of the third, of nineteen. The consistory has to take the necessary measures for preserving the purity of the faith. It superintends the sermons and the keeping of the clerical registers, and reports once a year on the condition of the churches. In cases of need, it can revoke a synodical sentence below, also matrimonial affairs and the complaints of clergy-men and laymen against each other. If secular priests or monks wish to return to the ranks of the laity, the consistory has to subject them to an admonition, the former during three and the latter during six months; it has also to sentence clergymen for important or disgraceful offenses. The sentences pronounced against such clergymen are: 1. suspension; 2. degradation to a lower degree of the clergy; 3. entire degradation or depo-sition. The last-named sentence involves the surrender of the culprit into the army or to the imperial manufactures, and, in criminal cases, to the secular au-thorities of the town. For a first offence it may be taken to the prelature, and from the latter to the Holy Synod. In every large town of the eparchy there are offices called "ecclesiastical directories," generally consisting of two members, which have to receive petitions to the consistory and make reports to it. The bishop appoints, with the consent of the synod, deans for the different eparchies and the clergy of the synod. A dean's district embraces from ten to thirty parish churches. They have to visit the churches of their district, and to revise once every six months the registers of the Church and the lists of baptisms, marriages, and deaths. Under their presidency the parishes elect the church-voters. In the cities the protopresbyter of the principal church has the superintendence of the entire clergy.

The clergy are divided into the white, or secular, clergy, and the black clergy, or monks. The white clergy chiefly recruits itself from the sons of the priests and other employés of the Church. The admission of persons from other classes of society is surrounded with difficulties. The bishop is forbidden to ordain any one without the necessary knowledge, the requisite age, and good certificates of character, and is not to exceed the number of priests wanted by his eparchy. No one shall be ordained a secular priest without having previously learned for four years at the churches and the clergy of his eparchy. For the services of the Church, as sextons, choristers, etc., do not receive any ordination, but are also regarded as a part of the clergy.

(3.) Schools.—Peter the Great was the first who commanded the prelates to establish in the capitals of their eparchies ecclesiastical seminaries where boys—especially the sons of priests—might be educated for the priesthood. All that had been required before his time was that the candidates should be able to read, to write a little, and to perform the liturgical functions. Peter the Great also decreed that the chief convents should contribute one twentieth, and the principal churches one twentieth also, toward the support of the seminaries in the pupils of the ecclesiastical schools. After the con-fiscation of the Church property in 1764, the support of the seminaries devolved upon the Holy Synod. The ecclesiastical schools are divided into the four school districts of Petersburg, Kief, Moscow, and Kasan. At the age of five the child is sent to the ecclesiastical seminary. At each academy is a conference consisting of the rector of the academy, one archimandrite, one yero- monach, two secular priests, and several professors, and presided over by the metropolitan or archbishop, who has to superintend the execution of all the decrees of the synod in regard to the education of the clergy-men and of the priests. The Conference of the Academy of St. Petersburg constitutes the centre of the scientific life in the Russian Church, as the conferences of the other school districts receive from it the decisions of the Holy Synod. The system of Church schools, which is under the direct jurisdiction of the Holy Synod, consists of the ecclesiastical seminaries, the principal seminaries of the circuit schools, and the parish schools. Every pupil has first to enter the parish school and to remain there for two years. He then attends in succession the circuit school, the eparchial seminary, and finally the academy, remaining in each of these schools for three or four years.

(4.) Marriage and Privileges of the Priests.—As the secular clergy must be married, they cannot ascend to a higher position than that of a protopresbyter. Widower prebendaries were required by a canon of Theo-dorus, metropolitan of Moscow, to resign and withdraw to a convent. The Council of Moscow in 1657 authorized widower clergymen who led a virtuous life in the convent to continue their priestly functions as yermom-narch. Peter the Great forbade the bishop to force any widower priest to retire to a convent. By a second re-script, issued in 1724, he provided that widower priests who were good scholars or preachers and who should marry a second time should be employed as deans or clerical rectors of the seminaries or in the chapels of the bishops. At present the synod can give permission to widower priests to remain in their office.

The secular clergy are exempt from personal taxes and from military duty. For any criminal offence the clergy are subject to the civil court, but the proceedings are remitted to the bishop, who has the duty of forwarding them to the ecclesiastical court. The powers of the civil court are reserved to the ecclesiastical court. In the case of any other offence they are judged by the Church courts. No priest or deacon can be subjected to corporal punish-ment until he has been degraded by his ecclesiasti-cal superior. The wives of priests and other Church employees shall have the privileges of their husbands as long as they are not married again.

(5.) Appointment and Support of the Clergy.—In 1792 and 1723 the synod fixed, jointly with the senate, the number of clergy-men who were to serve at every church. Since the confiscation of the Church property in 1764, the Economy College of the Holy Synod pays fixed salaries to the clergy-men and employés of all churches which had real estate, or at least twenty serfs. In case a community wants a larger number of clergy-men than the government is bound to pay, it has to make satisfactory provision for a sufficient salary.

Every regiment of the army has its own priest, who is paid from the funds of the army in whose regi-ment is stationed. Only in time of war all the military priests are placed under the jurisdiction of a superior priest who is specially appointed for this purpose.

The bishop has full freedom in appointing the priests of all churches which have no patron. In the army no priest is to be appointed without the consent of the bishop. The children and relatives of a parish priest must not be appointed at the same church. The nobleman on whose estate a church has been erected has the right of patronage. He may propose a priest whose appointment he desires to the bishop, and without his consent no priest can be appointed. In villages the parochial academies, the church-warden and hold the key to the Church treasury.

(6.) Monks and Nuns.—All the convents of Russia follow the rule of St. Basil. No one can become a monk before the fortieth year of age, nor a nun before the fifteenth year. Before the year 1830 the thirtieth year was the age at which a secular monk could be ac-hieved. However, dispensations in regard to age, especially to young men who, after completing their studies at an ecclesiastical academy, desire to enter a convent with a view to securing as early as possible an appointment as prelate, archimandrite, or professor. Children need the consent of their parents to their entrance into a convent, and many legal precautions have been taken to check the gates of the convents against persons who are un-
willing, or who by entering a convent would violate other duties. In those convents which are supported by the State the limit of the number of monks is fixed by law. The novitiate lasts three years. After its termination the permission of the diocesan bishop is required for admitting the novices to a preparatory degree. On this admission they put on the black habit, from which the monks have received the name of the black clergy. The taking of the monastic vows is connected with solemn rites. There is a third monastic degree, called the "great" or "angelic" habit, but only a few monks are admitted to it.

Every convent of monks is either under an archimandrite, or under a pro-syntomotit (president); the female convents are under an igumen. Formerly the superiors of convents were elected by the monks, now they are appointed by the Holy Synod. The monks are divided into two classes, those who have received the order of priests or deacons and are called yeronomous and yeronomians, and common monks called monachs. The number of the former is only small. The convents are under the suzerainty of the bishop in whose eparchy they are situated; only the lauras, a small class of the most prominent convents, and the staurotopies, or exempt cloisters, are directly subject to the Holy Synod. The present regulations of the Russian convents date from the time of Peter the Great. By a ukase of 1701 he abolished the institution of the lay brothers, and bound the monks to receive and nurse invalid soldiers and other aged and poor men; the nuns, in the same way, were required to receive aged females, to educate orphans, and teach female handwork. The regulations are, on the whole, the same as for most of the religious orders of the Eastern and Roman Catholic churches. The monks are admonished to read often in the Bible and to study, and the superiors are required to be well versed in the Scriptures and the monastic rules. The monks are excluded from pastoral duties, only the chaplains of the navy are taken from their ranks. The government has established a college for this special purpose at Balaklava, in the Crimea. To this college monks are called from the various eparchies, and the archimandrite of the convent elects from them chaplains for the men-of-war. As the monks receive, in general, more education than the secular clergy, the professors in the seminaries and ecclesiastical academies are generally taken from them.

The first Russian convents were established during the reign of Vladimir the Great, but the cradle of all the Russian convents was the Petchersky Laura at Kiev, founded by the holy viator, bishop of Mount Athos, during the reign of Yaroslav (1086-54). From that time the convents increased rapidly. In 1342 Ivan II Vasilievitch forbade, at the Council of Moscow, the establishing of a convent without the permission of the monarch and the diocesan bishop. Peter the Great not only forbade bishops and other persons to build convents or hermitages, but also ordered the abolition of smaller convents and of all hermitages. Catharine II, in 1764, confiscated the entire property of the convents. At the same time many convents were suppressed, for the empress intended to preserve only the most prominent convents in the large cities and those that were the most advantageous. The empress also addressed petitions addressed to her, the empress allowed the continuance of many convents under the condition that such convents should support themselves or be supported by the voluntary offerings of the people. Since that time two classes of convents have been distinguished, those which are supported by the Russian College and those which are not. The former are, like the monastic communities, divided into three classes, according to the number of inmates and the amount of their salaries.

4. Statistic.- The procurator-general of the Holy Synod publishes annually an account of the condition of the Russian Church. The following facts are taken from the report made by the present procurator-general, count Tolstoi, on the state of the Church in 1876, and published in April, 1878. There were in 1876 in all the eparchies, with the exception of the exarchate Grussia, the Alexandro-Novski Laur (convent of the first rank) of St. Petersburg, and the Petchayevski-Uspenski Laur at Kiev, from which no report has as yet been received, 21 archiepiscopal houses and 800 convents of monks, of which 169 received no support from the State. The total number of monks was 10,512, of whom 4261 were serving brothers. Of nunnery there were 147 (forty of which derived no support from the State), with 14,574 nuns, of whom 10,771 were serving sisters. The number of church houses, including 57 episcopal churches, 562 chief churches of cities, 3 army cathedrals, and 3 naval cathedrals, was 625; of other churches, 39,388; of chapels and oratories, 13,594. Of the churches, 227 parish churches are reported to belong to Raskolniks. The total number of the secular clergy, which includes the sextons, was 98,802. In the course of the year 1876, 323 churches and 170 chapels and oratories were built. There were 87 hospitals with 1192 inmates, and 605 poorhouses with 6763 inmates. The number of persons received into the Russian Church was 12,540, embracing 11,922 Roman Catholics, 516 United Greeks, 8 Armenians, 698 Protestants, 2050 Raskolniks, and 3238 completely reformed (i.e., with the Russian Church, and 1041 re- served the use of the ancient canons), 450 Jews, 219 Moham medans, and 6728 pagans. The number of divorces was 1925; in 29 cases the cause was remarriage of the one party during the lifetime of the other; in 2, too close consanguinity; in 15, impotence; in 89, adultery; in 650, the unknown residence of one party; in 247, the condemnation of one party to forced labor or exile. The institutions for the education of the clergy, with the number of their teachers and pupils, were as follows:

The number of schools connected with churches and monasteries was 6811, with an aggregate of 137,191 pupils, of whom 97,883 were males and 39,308 females. The number of Church libraries was 15,770; the number of new libraries established in the course of the year, 235. The Church property under the administration of the procurator-general amounted, on Jan. 1, 1877, to 26,653,894 rubles. The population connected with the Church, with its population of Asiatic eparchies, the exarchate Grussia, and the army and navy, from which no reports had been received, amounted to 57,701,600. Adding an estimate of the Orthodox population in the districts above named, the total population of the Orthodox Russian Church was in 1876 about 68,100,000. The Orthodox Church prevails in each of the sixty governments into which Europe Russia is divided, except sixteen, of which twelve are chiefly inhabited by Roman Catholics, three by Protestants, and one by Mohammedans. Of the total Orthodox population about 54,900,000 live in European Russia, 3,100,000 in Caucasus, 3,000,000 in Siberia, and 270,000 in Central Asia. The grand-duchy of Finland has about 37,000 adherents of the Russian Church. Outside of Russia the Russian Church has established missions in China and Japan which are reported as making satisfactory progress, and as counting in each country a population of about 5000 souls.

II. Other Christian Churches.- While nearly the entire country is, as in the provinces which have not been under any other than Russian rule belong to the Greek Church, the empire has received a large Russian Catholic population by the annexation of Poland, and a considerable Protestant population by the annexation of the Baltic provinces. The conquest of Erivan in
1898 placed under Russian rule not only a considerable portion of the Armenian Church, but the seat of its head, the catholicos of Etchmiadzin.

1. Roman Catholics.—Until 1842 no provision had been made for the few Roman Catholics living in the Russian dominions. In 1842 the Italian embassy to Moscow sent two Jesuits to the capital; but twenty Capuchin monks and a fray. From 1705 to 1715 several other Jesuits were sent to Russia, and a college was established by them at Minsk. Pius VI sent a legate to St. Petersburg, and placed under his jurisdiction the missions of that city, Moscow, Riga, and Reval. As the provinces which were incorporated with Russia during the period of Peter the Great contained a considerable Catholic population, Catherine II concluded to erect a bishopric of the Latin rite for her Catholic subjects. This led to the establishment of the archbishopric of Mohilev, which was confirmed in 1783 by Pius VI. By the second and third partitions of Poland, a number of episcopal sees fell under Russian rule, all of which, except that of Livonia, were abolished by Catherine II, who, instead, erected two new ones. Paul I came to an understanding with the pope about a reorganization of the Catholic Church in the new Russian provinces, and accordingly, in 1787, the following dioceses were created in Mohilev, archbishopric; and Samogitia, Wilna, Luck, Kaminiec, and Minsk, bishoprics. All these dioceses received a new circumcision by the concordat of Aug. 3, 1847. By the same concordat a sixth episcopal see of Khorser, or Tirispol, was erected for the Catholics in the southern provinces of European Russia and in the Caucasus. The archbishop of Mohilev is president of the Roman Catholic academy, a kind of central or general seminary for all the Catholic dioceses above referred to. The constitution of this academy is almost the same as that of the four academies of the Orthodox Russian Church already referred to. The diocese of Mohilev embraces all those parts of Russia proper (exclusive of the former kingdom of Poland), which do not belong to one of the six dioceses which have been mentioned, also the Catholics of Finland. Besides the archbishopric of Mohilev, Russia has in the former kingdom of Poland the ecclesiastical province of Warsaw, embracing the archbishopric of Warsaw and the bishoprics of Cracow, Lublin, Yanov or Podlachia, Sandomir, Semya or Augustov, and Vladimir-Kalisal or Kuyavia. This ecclesiastical organization of Poland dates from the papal bull of June 30, 1818, and was confirmed by another concordat concluded in 1847. The Russian government has, with regard to the Catholic Church of Poland, the same policy as that with regard to the other denominations. The Church property was confiscated, and, in return, the clergy were paid and the buildings maintained by the government. The number of convents was greatly reduced, and the remaining ones placed under almost the same regulations as those of the Orthodox Russian Church. As the Russian government, in many cases, carried through new regulations in regard to the Roman Catholic Church without having come to a previous understanding with the pope, frequent conflicts between Russia and the pope have been the consequence. In 1878 the diplomatic relations between Russia and Rome were still interrupted. The active part which a number of the Catholic clergy in the Polish dioceses have always taken in the national movements of the Poles against the Russian rule has naturally added to the unfriendly feelings which have generally prevailed between Russia and the Roman Catholic Church. Notwithstanding these incessant conflicts, the immense majority of the total population of the Poles in Poland has adhered to the Roman Catholic Church. In 1878 the Roman Catholics there were reported as numbering 4,997,000 in a total population of 5,210,000, while the Orthodox Russian Church had only a population numbering 84,185 souls.

Exclusive of the kingdom of Poland, Russia proper in Europe had a Roman Catholic population of 2,989,000 souls; in Caucasus, 25,916; in Siberia, 24,316; in Central Asia, 1,161. Only in two governments did they form a majority of the total population—in Kovno, where they constitute 79.5 per cent., and in Wilna, where they constitute 61 per cent.

Besides the Catholics, a great population of the Latin rite, the Polish provinces had formerly a large population belonging to the United Greek Church. Nearly the whole of this population has been induced by the Russian government, in the manner already referred to, to unite with the Russian Church, and to sever its connection with Rome. The Russian government in 1879 reported that the Greek Catholics are estimated at about 33,000. They have no bishops of their own, but are under the jurisdiction of the Catholic bishops of the Latin rite.

2. Protestants.—By far the most numerous among the Protestant sects represented in Russia are the Lutherans, who, in the Baltic provinces, constitute a considerable majority of the entire population; besides them, there are Reformed, Mennonites, Moravians, and Baptists.

(1.) The Lutherans.—Until Peter the Great, Russia had a great Protestant congregation outside of Moscow. By the second and third partitions of Poland, a numerous Lutheran population was placed under Russian rule. The Russian government did not interfere with their Church constitution. The affairs of the Lutheran Church were superintended by the St. Petersburg College of Justice, and the administration of the several sections was carried on by consistorys. In 1810 the Lutheran, with all other non-Russian churches, was placed under the Ministry of Ecclesiastical Affairs; in 1832, under the Ministry of the Interior. In 1829 a committee was appointed in St. Petersburg to draft a new Church constitution, with the greatest possible regard for the existing institutions of the Church. As a fruit of the activity of this committee, a law was published in 1832 for the Evangelical Lutheran Church of Russia, an instruction of the clergy and Church boards, and an agenda for the congregations. All these laws, however, were only intended for Russia proper, not for the grand-duchy of Finland. The clergy and the teachers of theology and religion have to bind themselves by an oath to adhere to the symbolic books. The members of the Church are required to go at least once a year to the Lord's supper. Marriages with pagans are forbidden, but with Jews and Mohammedans permitted. Candidates for the ministry have to pass two examinations—one before the theological faculty at Dorpat, and the other in one of the United Church boards for the candidate, prior to the preach. A third examination has to be passed before they can be appointed. The appointment is at first for only one, two, or three years; after the expiration of which a new collocation is required. A number of parishes are united into a district, at the head of which is a pravost (provisor). There is a difference of degree between the titles of superintendent and superintendent-general, but the name of superintendency-general is given to the larger consistorial districts. The title of bishop, which was introduced in 1819, is only honorary, and does not denote a distinct office. The superintendent is the organ of the consistorys; they examine the candidates, obtain the preachers, and visit the provosts; only in exceptional cases the pastors. For this office of a provost all the preachers of a district propose two candidates, and the appointment is made by the State ministry upon the recommendation of the consistory. For the superintendent's office two candidates are proposed in the same way, one for Moscow and St. Petersburg by the General Consistory, in the other consistorial districts by the nobility. The appointments are made by the emperor. There are eight consistorys: St. Petersburg, Livonia, Courland, Esthonia, Moscow, Oesel, Riga, and Reval. The consistorys are composed of an equal number of clerical and lay mem-
RUSSIA

169

RUSSIA

bers, and presided over by a layman. All the members must belong to the Lutheran Church. The superintendent is the vice-president. The consistorial districts have jurisdiction in all matrimonial affairs. As the members do not reside in the same place, plenary meetings are only called at intervals for disposing of the more important affairs, while ordinary matters are treated by a committee.

The General Consistory of St. Petersburg is the central Church body and court of appeal in matrimonial matters. It has the exclusive right of deciding the disputes of deacons who meet twice a year in St. Petersburg, and are elected for a term of three years. Candidates for this office are nominated in a similar manner to those for the office of superintendent. The election of one of the candidates is made by the ministry, upon the recommendation of the consistorial district, and the right of appointment is exercised by the emperor. Preachers' synods are held in all the consistorial districts, and one half of the clergy are always required to be present. A Lutheran general synod is to be convoked from time to time as a deliberating assembly. It consists of clerical and lay delegates, who are partly chosen by the consistorial districts, and partly elected by the consistorial districts. The candidates for the ministry receive their theological education at the University of Dorpat. The total number of Lutherans amounts to about 2,400,000 in Russia proper, to 300,000 in Poland, and to 12,000 in Asia.

2. The Reformed Church.—The membership of this Church numbered 200,000, about one half of whom live in Lithuania, in the governments of Wilna and Grodno. Lithuania is divided into four districts, at the head of which are a superintendent and vice-superintendent. Annually a synod is held, which lasts from three to four weeks. This synod governs the Reformed Church of Lithuania, under the superintendence of the State ministers.

3. Other Protestant Denominations.—The Mennonites have established a number of flourishing colonies in Tauris (where they numbered in 1876 about 15,000 souls), and on the Volga. Quite recently, when the Russian government had revoked their exemption from military service, they began to emigrate to the United States.

The Moravians have in Livonia and Estonia prosperous societies, with more than 250 chapels and above 60,000 members. In accordance with the general character of the Moravian societies in the diaspora, the missionaries have kept up a connection with the State churches. See Moravians.

The German Baptists have recently established some missions, chiefly among the Germans of Russia, and they report encouraging progress.

3. The Gregorian Armenian Church.—By the conquest of the Persian province of Erivan in 1828 the head of the Armenian Church, the cathedral of Etchmiadzin, became a subject of Russia. When the Catholicos Ephrem died, in 1830, the emperor of Russia, who was desirous of restoring the ancient order of election, decreed to leave the election to all the clergy, and to the most distinguished lay members of the Armenian Church. This law in its original form has been modified, and now the Armenian Church in other states might be admitted. A new regulation for the government of the Armenian Church was drawn up by the St. Petersburg Department of the Ecclesiastical Affairs of Foreign Creeds, on the basis of propositions submitted by two commissions, one consisting of prominent Armenian clergy and the other consisting of Russian officers at St. Petersburg. The draft was examined and commented upon by the commander-in-chief of the Transcaucasian provinces, and sanctioned by the emperor in March, 1836. This new regulation is divided into ten chapters, of which six relate to the administration of the Church, and four to the administration of the Armenian Church of Russia in general. According to the first chapter, the Armenian Church and the Armenian clergy enjoy equal rights with those of other foreign (non-Russian) creeds. The clergy are free from taxes and corporal punishments. The second chapter tracts of the privileges and jurisdiction of the catholicois. For this office the clergy and the notables of the nation are to propose several candidates, one of whom is to be appointed by the emperor. The catholicois has the right to send a deputy to the coronation of the emperor. On leaving the palace, he is accompanied by an honorary guard of Armenians. He inherits all the privileges of the patriarch and is supported by the emperors. An imperial procurator is appointed at Etchmiadzin, as also at the seats of the supreme ecclesiastical authorities of other foreign creeds. The fourth chapter provides that the archbishops and bishops be solely appointed by the catholicois, and that they be responsible for the administration of their eparchies both to the catholicois and to the emperor. The number of eparchies which recognize the authority of the catholicois amounts to about forty, but only six are situated within the Russian empire, namely, Astrakhan, Erivan, Grusia, Nachitevian, Karabagh, and Shirvan. See also ARMENIAN CHURCH.

The number of Gregorian Armenians in 1878, as reported by the Russian government, was 700,000. In Exarchia, Russia, 595,310 in Caucasus, 15 in Siberia, and 1 in Central Asia.

III. Non-Christian Religions.—1. Jews.—For the education of Jewish rabbins, Rabbinical schools have been established by the government at Wilna and Slutomir. The government also supports Jewish schools at Odessa, Kishinev, Vinnica, Stara Constantino, and Berditchiv. The number of Jews in Russia proper in Europe was stated to be, in 1878, 1,944,378; in Poland, 815,458; in Caucasus, 22,732; in Siberia, 11,941; in Central Asia, 3,896.

2. Mohammedans.—The Mohammedan population has rapidly increased by the progress of the Russians in Central Asia. It now amounts to about 7,500,000, of whom 2,864,000 are found in Russia proper in Europe, 426 in Poland, 1,987,000 in Caucasus, 61,000 in Siberia, and 3,016,000 in Central Asia. The Mohammedans even constitute a majority of the population in one of the European departments—Djadjar. They number 20,000 mufass, molllas, and teachers, all of whom, except those of Tauris and the Kirghis Cossacks, are subject to the mufti of Orenburg.

Lutherans and Roman Catholics are forbidden to convert to Christianity a Mohammedan who is a Russian subject, while a non-Russian Mohammedan may be received into any of the Christian churches permitted in the empire. These laws have been very strictly executed. On several occasions Tartars who had embraced Christianity and had afterwards returned to their original faith were punished by imprisonment, while no attention was paid to the excuse that the reform had been accomplished by one of their number. The Orthodox clergy is exercised by Orthodox priests, as well as by their avariciousness. On the other hand, the government aids the Orthodox clergy in every possible manner in their efforts to convert the infidel. In Kasan, one of the principal seats of the Mohammedan population of Europe in Russia, the Brethrenhood of St. Guru was formed in 1870 for the purpose of converting infidels and pagans on the Volga. This brotherhood had established up to 1874 115 schools with their own means, which were attended by 1992 male and 389 female Tartars, besides members of other nationalities. The civil rights of the Mohammedans are, like those of the Jews, limited by special laws, so that they are, indeed, entitled to municipal and government offices under the same conditions as Christians; but in city councils, e.g., the non-Christian members must not exceed one third of the
RUSSIA

The popular school system among the Mohammedans was entirely reorganized by an imperial decree of Nov. 26, 1872. Among the inhabitants of the empire, the Mohammedans occupy the lowest rank with regard to the more serious crimes, there being but one conviction among 5779 Mohammedans against 2710 Orthodox Christians. With regard to the less serious offenses, the Mohammedans occupy the fifth rank; but even this relation is altered by the numerous convictions for evasion of military duty. Theft, however, is also of common occurrence among them. The Mohammedans are generally very prompt in observing their duties to the State, with the exception of those arising from the general liability to military service. The service in the regular army is to this day so unpopular with the Tartars of the empire that in 1872 the government was forced to take severe measures to prevent a wholesale emigration to Turkey. An official report states that the Tartars feared, above all things, that they would be forced to fight against their Mohammedan brothers, and that they would be compelled to eat pork, which is to them worse than death. But even before the declaration of war against Turkey, and during this war, the excitement was said to have subsided, and they were, with a few exceptions, loyal. The same was the case with the Mohammedans in Asiatic Russia. In matters pertaining to their religion, the Mohammedans are granted complete liberty, although the government takes care to be informed on the entire personnel of the clergy, their actions, etc.

The highest Moslem ecclesiastical body in the government of European Russia is the Mohammedan Ecclesiastical College of Oufa. This college is elected, and fills all offices under its jurisdiction without the necessity of obtaining the consent of the government. For the Mohammedan clergy of Central Asia, the cities of Bokhara and Samarcand are to this day centres of learning, and the heads of the institutions of learning at these places are regarded as the preservers of the true faith. The colleges for theology and Mohammedan law (madrasa, or medreseh) number several hundred. In European Russia there are two hundred and fifty, of which several are attended by hundreds of students. In these colleges, Mohammedan science flourishes, without ever having been touched by so much as a breath of Western culture. The government does not interfere in the internal affairs of these colleges; does not oppose a journey to Mecca; and even permits the priests (mollahs) who have finished their education in Constantinople, Arabia, or Egypt to hold a position upon their return to Russia. It was found that the ulama (the learned men) connected with the mosques or schools readily submit to any government, as this alone could secure to them the use of their legacies (nakbay), their main source of income. Those brethren, however, who have had themselves declared saints have become in all Mohammedan countries a perfect nuisance, and the sworn enemies of a well-regulated government.

The title of saint (Ghazan) is easily obtained. The motives to obtain it are, however, very frequently the most dishonorable, while the saints themselves in many cases bear a very poor reputation. In Central Asia, the majority of robberies are committed by the saints, and they are therefore avoided by the stationary population. The nomads, on the other hand, receive them with open arms, and here, among the roving sons of the steppe, the true faith could not be extinguished. The government at first did not oppose them. The decrees of 1781 and 1785, on the contrary, opened to them the newly acquired Kirghiz steppes. Their influence here was a very pernicious one. The government, however, treats them at present more strictly. In 1873 a case occurred in Orenburg, where such a saint was banished to a government having no Mohammedan inhabitants. In the same manner, the Russian government proceeded against the saints in the Caucasus, while in Turkestan it watches the fanatical order of Naqshbandi very closely.

3. Pogana.—The number of pagans in European Turkey is 258,125; in Poland, 240; in Caucasus, 4083; in Siberia, 286,016; in Central Asia, 14,740.

IV. Literature.—On the history of the Russian Church, see Mouraviéff, *History of the Russian Church* (transl. by Blackmore[1842]) to the year 1710, vol. 1; Strahlo, *Beiträge zur russischen Kirchengeschichte* (1827), vol. 1; id., *Historische Studien zur Geschichte der Kirche in Russland* (1867), vol. 1; Schmitz, *Die mittelalterliche Geschichte des russischen Kurfürstentums* (1828); id., *Kritische Geschichte der neugriech. und der russischen Kirche* (1840); Neale, *History of the Holy Eastern Church* (1860); Stanley, *History of the Eastern Church* (1862); Theiner, *Die Staatskirchen Russlands* (1865); Galitzin [prince A.], *L'Eglise Greco-Russe* (1861); Beissen, *L'Eglise de Russie* (1867, 2 vol.); Malinow, *Philologische und historische Reisen in die Kirche Russlands* (Germ., transl. by Blumenthal, 1872); Basaroff, *Russische Orthodoxe Kirche* (1873); also the *Occasional Papers of the Eastern Church Association of the Church of England and the Protestant Episcopal Church in the United States* (published in New York and London since 1864). The doctrine of the Orthodox Eastern Church as taught in Russia is set forth in the catechisms of the metropolitans Plato and Philaret of Moscow. An English translation of the larger catechism of Philaret was published by Blackmore (1845),
RUSSIA, VERSIONS OF

and republished in Schaff, Creeds of Christendom (1877), vol. ii. See also Guettée [a Gallician priest who joined the Russian Church], Exposition de la doctrine de l'Eglise Cath. Orthodoxe de Russ. (1866); Procopovitch, Theologia Cateniana (1773), 5 vols.; abridgment (1880). On the FEASTS and CEREMONIES of the Russian Church, see King [Anglican chaplain in St. Petersburg], The Rites and Ceremonies of the Greek Church in Russia (1772); Montefiore, Lettres à un Ami sur l'Office Divin (French trans. by prince Gallitzin). On the constitution and present condition of the Church, see Silbermag, Verfassung und Geschichte der orthodoxen Kirchen im Russischen Reich (1865); Neher, Kirch. Statistik (1865), vol. ii. The latest statistics of the Church are found in the annual reports of the procurator-general. A full statistical account of all the religious denominations of the empire is found in the Statistical Year-book of the Russian Empire (in the Russian language [St. Peters burg, 1871]), vol. iii. (A. J. S.)

RUSSIA, VERSIONS OF, or, rather, VERSIONS IN THE LANGUAGES OF RUSSIA. The praise which has been awarded to ancient Thebes on the Nile by calling it αἰείναυσα, "the hundred-gated," may be also given to Russia, which, in its geographical dimensions, variety of race, multiplicity of population, and diversity of languages, is a world in itself, and baffles and bewilders the mind into which all languages are concentrated from all quarters of the Orient. The tongue which has been the means of bringing the conversion of the Roman Empire, or which has influenced the ages and the world, or which has been the vehicle of the Word of God in their vernaculars. According to the geographical position, we get the following linguistic groups:

I. East Siberian, or Eastern Group:
   - B. Altaic Group:
     - A. Tungus: b, Manchu: e, Aino, or Kurile: d, Aleutian.
     - B. Mongolian Languages:
       - Mongol: b, Burut: c, Buryat.
   - D. Samoede: c, Xarik: c, Tawgy, Samoede.
   - E. Finnish Languages:
     - a, Urtian.
     - b, Otjag, b, Wogur:
     - c, Bulgar.
   - Theresminean: b, Morduin.
   - Perman: b, Sirenian: e, Wotjakian.
   - Finnish Branch:
     - a, Finish.
     - b, Finish, Finishian, or Finish, Finishian.
     - c, Carelian: 2, Tschiedin: 3, Uotian: 4, Olenetsian.
     - e, Ebenhish: e, Livian: e, Krewingian: f, Lappeonese.
   - III. Jeniseian Group:
     - a, Jeniseian: d, Kottian.
   - IV. Canaunian Group:
     - a, Georgic: b, Leuchic: c, Ristic: d, Tcherkezes Familiess.
   - V. Semitic Group:
     - a, Hebrew: b, Arabic.
   - VI. Asiatic Group:
     - Persia: b, Kurdist: c, Armenian: d, Ossetian.
   - VII. European Group:
     - A. Slavonic Family:
       - a, Russian: b, Polish: c, Servian: d, Tschecbian: e, Bulgarian.
     - B. Lithuanian Family:
       - a, Lithuanian and Samogitian: b, Lettish.
     - (C). Germanic Family:
       - a, German: b, English: c, Swedish: d, Dutch.
     - (D). Greek-Latin Family:
       - a, Greek: c, Albanian: d, Latit: d, Italian: e, French: f, Rouman.

These are the representatives of the Russian empire. As to the versions made for these different families, only a few enjoy this privilege. Following our table, we must pass over the East Siberia, or Eastern Group, as none of these people, who are but partially Christian, have the Scripture in their vernacular. The same must be said of the Ainos, or Kuriles, belonging to the Altaic, and of a great many others belonging to the other groups. For a better view, we will speak of the different versions in alphabetical order; and with the help of the linguistic table the reader will be guided as to which family the respective version belongs to. As the most important versions have either been given already, or will be given, in this Cyclopaedia, the reader will be referred to them.

1. Albanian.
2. Alenian is the language of the inhabitants of the Alenian Islands. It is the language of the Greek Church, which had the Gospel of St. Matthew printed for them in the Alenian, according to the translation prepared by professor Ikutsek, in the year 1646, in parallel columns with the Russian version.
3. Arabic.
5. Bulgarian. See Slavonic Versions.
6. Burial. The Burial in Luke Balkal, and numbering about 150,000 individuals, are Lomatists; some are Christians. At a very early time, prince Gallitzin, president of the Russian Academy, wrote to professor Ikutsek, requesting him to send two learned Burials to St. Petersburg for the purpose of assisting Dr. Schmidt in the translation. Two Burial versions were prepared, both noble and liberal, accordingly repaired to St. Petersburg, and, with the consent of their prince and lama, engaged in the work of translation. The word was known as the Divine Word of the Burial, and it was translated after their conversion, and in a letter addressed to their chief they avowed their faith in Jesus. In 1818 the Gospel of St. Matthew was published, which was revised in the Russian language, and became the English and the rest of the New Testament. Since 1840 the British and Foreign Bible Society possesses a translation of the entire Bible, which was prepared at the expense of that society.
7. Dutch.
8. English.
9. Estonian. Estonia is a maritime government in the north-west of European Russia, and forms one of the Baltic provinces, is a land in which the Dians—Dorpat and Reval Estonians. The former is spoken in South Estonia, and the latter prevails in the North. Among the Estonians and the Karels there is a great linguistic difference, which is spoken in the old parts of the New Testament. As early as 1656 they received the entire New Testament in the Estonian language, translated by John Fischerm, a German professor, and general superintendent of Livonia. This translation was executed at the command of Charles XI. A version of the Old Testament, made by the same translators, appeared in German, and was published in 1806 by Gosevskiun, appeared in 1809; but it is uncertain in which dialect these early versions were written, although it was understood throughout Estonia. Later versions, consisting of both dialects, and thus we have two versions—the Revahl Estonian (q. v.) and the Donspat Estonians. As to the latter dialect, a New Testament was printed in Riga in 1727, which edition was soon exhausted. In 1815, through the exertions of Dr. Paterson, a new edition of the New Testament was printed by the British and Foreign Bible Society; and in 1824 the Russian Bible Society had 500 copies printed, while another edition of 200 in 1830 by the aid of the Finnish Bible Society. In the same year a version of the Psalms, translated from the Hebrew by the Rev. Ferdinand Meyer, of Berlin, was printed by the aid of the gift of the British and Foreign Bible Society, and the number of copies of the New Testament, together with the Psalms which has been distributed is, according to the last report of the British and Foreign Bible Society (1878), 85,000.
10. Finish. As early as 1648 the New Testament was published at Stockholm. This version was made by Michael Agricola, rector, and afterwards bishop of Abo, a friend of Luther. In 1644 the entire Bible was published under the patronage of queen Christina, to whom the work was also dedicated. Editions of the New Testament, from the text of queen Christina’s version appeared in 1732, 1740, 1744, and 1776. In 1811 the British and Foreign Bible Society commenced its operations in Finland, and a Bible society was formed at Abo. In 1815 an edition of 5000 copies of the New Testament was published at Abo, and in the following year 6000 copies of the entire Bible left the press in Abo. A quarto edition of the entire Bible, issued by a grant from the British and Foreign Bible Society, was completed in 1827, but the extensive fire which broke out in the same year at Abo destroyed this edition (consisting of 5600 copies). In consequence, another edition of 5000 copies of the New Testament was undertaken by the same society; and this edition was completed at Stockholm in 1829. In 1832 the Bible Society of Abo was again in active operation, and a new edition of the entire Bible, as well as of the New Testament, left the press. Apart from the Finish edition printed at Abo, the St. Petersburg Society undertook some edition of the entire Bible, as well as of the New Testament, in their own neighborhood. The New Testament was printed in 1814 and again in 1822, and the entire Bible was completed in 1817. This version has subsequently been issued by the joint agency of the Finns and the British and Foreign Bible Societies. According to the latest report for 1878, the former society
RUSSIA, VERSIONS OF

RUSSIAN SECTS

had issued since its formation 539,278, and the latter 469,743 copies of the Holy Scriptures.

17. French.
18. Georgian.
20. Italian.
22. Judaeo-German.
24. Judaeo Polish is a language spoken by the Polish Jews, consisting principally of Old German with a mixture of the Polish and Russian, similar to the Jewish however with very little Polish in it. In 1839 a translation of the New Testament was undertaken by the London Society for Promoting Christianity among the Jews, and an edition was published in 1821 by the British and Foreign Bible Society, the characters being the so-called Rabbinic, a new edition in the Hebrew square letters was published by the London society in 1868, while in 1783 the British and Foreign Bible Society undertook a new edition in the pointed Hebrew characters, edited by P. Hermann, which was completed in 1783.

25. Kalmyk. For the Kalmyks near the mouth of the Volga, Mr. Netzelt, a missionary of the Moravian Brethren, at the beginning of this century undertook the work of a Russian collection. He published a volume of about 500,000 individuals, partially Christianized. In 1817 an attempt was made by the Brooklyn Society at Simbirsk to translate the New Testament and some years later another attempt was also made, but the work was not continued.

27. Karaites. In the collection of the last century, the work was continued under the aegis of the Department of the Holy Scriptures, which was transferred to the British and Foreign Bible Society for the benefit of this tribe in modern Russian characters.

30. Lappish. This is a dialect spoken by a people inhabiting both sides of the Volga, numbering about 150,000, but a considerable number of them are partially Christianized.

33. Komi. In 1802 the Russian Bible Society published the New Testament in the Komi, a language spoken by about 460,000.

35. Komi. The Komi is a dialect spoken by a people inhabiting both sides of the Volga, numbering about 460,000. There are two dialects spoken in this tribe, the Volga and the Ural.

30. Komi. The Komi is a dialect spoken by a people inhabiting both sides of the Volga, numbering about 460,000.

33. Komi. In 1802 the Russian Bible Society published the New Testament in the Komi, a language spoken by about 460,000.

35. Komi. The Komi is a dialect spoken by a people inhabiting both sides of the Volga, numbering about 460,000.

38. Komi. The Komi is a dialect spoken by a people inhabiting both sides of the Volga, numbering about 460,000.

39. Komi. The Komi is a dialect spoken by a people inhabiting both sides of the Volga, numbering about 460,000.

40. Komi. The Komi is a dialect spoken by a people inhabiting both sides of the Volga, numbering about 460,000.

43. Komi. The Komi is a dialect spoken by a people inhabiting both sides of the Volga, numbering about 460,000.

44. Komi. The Komi is a dialect spoken by a people inhabiting both sides of the Volga, numbering about 460,000.

45. Komi. The Komi is a dialect spoken by a people inhabiting both sides of the Volga, numbering about 460,000.

46. Komi. The Komi is a dialect spoken by a people inhabiting both sides of the Volga, numbering about 460,000.

47. Komi. The Komi is a dialect spoken by a people inhabiting both sides of the Volga, numbering about 460,000.

48. Komi. The Komi is a dialect spoken by a people inhabiting both sides of the Volga, numbering about 460,000.

49. Komi. The Komi is a dialect spoken by a people inhabiting both sides of the Volga, numbering about 460,000.

not three times; after the second adding "Glory to God."  
4. The processions around the churches should go with the course of the sun, and not against it.  
5. That the sign of the cross should be made by uniting the fourth and fifth fingers, and not the first three fingers, with the thumb.  
6. To acknowledge, respect, and adore only the eight-ended cross.  
7. The name of Jesus is to be written and pronounced Iesus, and not Jesus.

These were other and still smaller points of dispute, and the tendency to fanaticism so universally found in Russian dissent did not fail to appear among them. They were persecuted under Peter I (A.D. 1689-1725), who laid double taxes on them; but his successors, especially Catharine II and Alexander I, have adopted a milder policy with the hope of winning them back to the Eastern Church. But little success has attended these attempts at reconciliation.

5. Tokmollas, or Witches, an insignificant body who, during the time of the persecution (A.D. 1730),

Eight-ended Cross of the Raskolniki.

This cross is by all the different Russian Raskolniki considered the only true Christian cross; while by them the four-ended one is considered and declared to be an innovation made by the patriarch Nikon, and consequently anti-Christian.

1. The letter Χ is represented by a capital X, and by Α is meant to King Abgarus of Edessa.
2. The letter Ω is represented by W, and by Α is meant to King Abgarus of Edessa.
3. Α, the letter, is represented by a capital Α, and by Α is meant to King Abgarus of Edessa.
4. The writing under it is in Old Slavonic, and reads ονες αναμενάται, signifying "Hope not made by hands."
5. Rasa, Angeli Gospodnici, signifying "Angels of the Lord."
6. Thee stvatos, "Lord of Glory."
7. Jesus Christos, "Jesus Christ."
8. Dusk, "Son of God."
9. Sol, "Son."
10. Luna, "Moon."
11. Christos twonau, pokhroma meto, "Christ who is transfigured by love."

* The three little stars signify the perpetual virginity.
took refuge on the islands of the Wjetka, a small river between Russia and Poland, whence their name. Here they formed a separate community and built two monasteries, from which, fifty years later, some of them migrated to Poland and built a church and convent at Tchernobolitz. Their chief distinguishing practices are a refusal to take oaths and to offer prayers for the emperor.

II. The Bezpopochtni, as we have said, are dissenters who refuse to have priests, the sacraments being administered and services conducted by lay elders. They recognize no priestly hierarchy, and dislike the national bishops and priests so much that when any one of these enters their houses they hasten, as soon as he leaves, to wash the seats and walls. They believe that the Church is in a period of decline and apostasy, that the apostolic succession has been interrupted, and that legitimate priests are now impossible. They hold that the world has had four eras: a spring, or morning, from Adam until the building of Solomon's Temple; a summer, or noon, lasting until the birth of Christ; an autumn, or evening, until the appearance of Antichrist, about 1650; and now the cold winter, the dark night, which will continue until the Lord shall descend upon earth to save men. The Bezpopochtnis are divided up into very many sects, some of them holding opinions exceedingly absurd. The three principal of these sects are the following:
1. The Pomoryana.—The founder of this sect was a runaway deacon of the name of Danilo Wiculin. In the year 1655 he founded a monastery on the borders of the Viga, of which for forty years he was the prior and died in 1735. In the erection of the monastery and in its leadership he was assisted by Andrei Mihaletsky, who was of princely origin, and occupied his post until his end, in 1736. Soon after this a monastery for females was organized, of which Salomonia, the sister of Mihaletsky, became prioress. The monasteries soon amassed wealth, and were thereby enabled to procure a large library of old Slavic manuscripts, and composed books for the education of singers, writers, painters, and the future leaders of the sect. At the end of the past century these monasteries contained 2000 male and 1000 female inmates. Andrei and Simon Denisow have written several works for the sect, and in general defense of the Raskolniks, of which the Pomoryan Answers to the Questions of Neefit is the principal.

The teachings of the Pomoryans, also called Danilowitchina, consist in the following: a. From the time of Nikon, the Antichrist has been reigning, though unseen, in the orthodox Church, and has abolished the true sacraments and priesthood. b. Those from the orthodox Church who wish to join the Pomoryans must receive rebaptism, which, like other sacraments, can, in consequence of the fall of the true priesthood, be administered by laymen, and even by females. c. As there is no true priesthood, there is no one to solemnize marriages, therefore all are obliged to live in the unmarried state, and those married in the Church must separate. d. Monks from the orthodox Church can be acknowledged as such after having been rebaptized, and they may install others in that state and be permitted to serve as priests, even if they have not been such before. e. For those in authority no prayers are to be offered. During the reign of Anna Ivanova one of the Pomoryans reported this to the authorities; then, to avoid difficulties with the government, they introduced a prayer for the czar, which they have used ever since. f. The crosses not to have the inscription “I. N. R. I.” because this is a Latin heresy, but to have the initials of those words: Zur Slay Inus Christos Sin Boshii, “Lord of Glory, Jesus Christ, Son of God,” as it had been to the time of Nikon. g. The food bought in the market is not to be considered unclean. h. To be ready for suicide by fire for the true faith.

2. The Fedosejochtchina.—This is the second of the principal sects of the Deepopefochtchina, which spread with the same rapidity in another part of the country. The principal promoter of it was a deacon by the name of Fedosei, a contemporary of Danilo Wiculin. Having removed with his family to Poland, he gathered around him in a short time a number of Raskolutnik fugitives from Russia, and founded two abodes, one for males and the other for females, among whom he acted as priest. He agreed in all points with the Pomoryans, except two, viz.: a. The inscription of “I. N. R. I.” is to be retained upon the cross. b. The food bought in the markets must be purified by prayer and adoration. These two points gave rise to the sect. The efforts of the Pomoryans to form a union with the Fedosejochtchina proved unsuccessful, and an open enmity between the two began, which increased just as soon as the Pomoryans commenced to pray for the czar. In the year 1774 they succeeded, at Moscow, in founding a cenobitical establishment, known as the Preobrashensky Cemetery, which became the principal centre of the sect. The originator, and for thirty-eight years the head of this institution, was Eliazh Alexejew Kowilin, a dealer in bricks and wines. During the pestilence at Moscow in 1771, when all the poor workmen who had been there commenced to leave the town to return to their native places, and in that way carried the sickness to all parts of the country, Kowilin, with another merchant, Zenkoff, applied for permission to establish, at their expense, a quarantine on one of the principal roads leading from the city, and with it to connect a cemetery for the burial of those that died. Having received the permission, they established a barrier and building for the purpose proposed. He, with others, fed the hungry, nursed the sick, and comforted the dying. The news of the comfort provided by Kowilin spread very rapidly, and, besides the hungry and sick, the people en masse took refuge with him. He, on the other hand, did all he could to instil into the minds of the refugees that this woe from hunger and pestilence was sent upon Moscow by God as a just punishment for the Wikonian heresy, and exhorted them to repent and turn to God. The people, seeing that those dying as orthodox were
to deliver them from this calamity—by death, if necessary. They do not hesitate, therefore, to commit the crime of treason.

(4.) The Beguny (Deserter), or Stromylny (Wanderers).—This sect originated about 1790, in the village of Sopel, district of Jaroslaw, from which it is sometimes called Sopelinka. Its founder was Deserter Efmyy, who, after having been re-baptized, settled in said village and taught that the Antichrist had ascended his throne long ago: first, one thousand years after Christ he invisibly reigned in the Greek empire under the Greek name of Appolyon, as intimated by John in the Revelation; then, after the lapse of 666 years, which letters compose his name, he appeared in Russia, not yet as czar, but as a false prophet, as stated in the Revelation by John. And that the Antichrist concealed his throne for Nikon, for he was the first to blaspheme against God by changing the name of Isus into Jesus, and, like a beast, persecuted the worshippers of the true Jesus; and that he really was the beast spoken of in the Apocalypse is seen from his real or lay name, Nikita, in Greek Nikita, which gives the number 666. After his fall, there appeared the third Antichrist, or the second beast, with the two horns, which signify the two imperial names, czar and emperor, the last of which, in Greek, is Ἰησοῦς, and also gives the number 666. In this trinity the members of the orthodox Church are baptized, and Mark in is represented by the cross of the three fingers instead of by the two first, as it was of old. To escape eternal punishment, it is necessary, first to wash off this sign and mark by rebaptism, and then flee from every city and village which forms part of this Babel of Antichrist.

(5.) The Ibraniski, or "Company of the Elect."—The cause of the separation of this sect from the Russian Church was not any difference of doctrine or ritual, but a desire to protest against the laxity and inclination to change displayed by the clergy, and to adopt a greater piety and purity of life. They were termed by the orthodox party Rosholshiki (Seligionists). Pinkerts (On Russian Sects) identifies them with the Staroveri.

(6.) The Besavedatsi (the dumb), the name given to a not very numerous sect of the 18th century, whose members, after conversion, became perpetually speechless. Very little is known of their tenets.

(7.) The Istovye Christians. See Malakans. The name in Russian is derived from istov, to hold, to carry money, and posses passports, because the first is an invention of the Antichrist, and the last two bear the seal and imprint of the same.

(8.) The Spassova, or Kumintchina.—Its founder was Kusma, an illiterate peasant, and his doctrine was called Spassovizm; the word derived from Spass, which means "there is no grace, no sanctity, no sacraments. He taught that there is nothing holy remaining in the world, and that salvation is to be obtained only through the Spassva," which is the Slavic word for the Russian Spassnaitel, meaning "Saviour." His followers do not rebaptize those that join them, nor do they always baptize their own children, believing that the "Spassva" can save them without it. The marriage-tie, where or whenever performed, is with them considered indissoluble: but, with the approach of age, they are forbidden to make use of its rites. They worship only their own ikonas and crossees, which they always carry with them, and which, therefore, are small and made to fold together. This sect is principally to be found in the districts of Nishgrod.

(3.) The Djetoweizhchina (Infanticide).—This sect consider it a great misfortune for children to come under the influence of Antichrist (the established Church), and believe it to be the best offering they can make to God.
Religious Exercise of one of the Skoptzi.

In Moscow, to summon the elect, and reign over all the true Skoptzi. They are noted for their anxiety to procure converts, and he who gains twelve is dignified with the title of apostle. Their chief peculiarities of practice and doctrine are the rejection of the resurrection of the body, a refusal to observe Sunday, and the substitution of certain rites invented by themselves in lieu of the sacrament of the eucharist. They are a numerous sect in some governments, as that of Orel, comprising whole villages, and they have many adherents among the jewellers and goldsmiths of St. Petersburg, Moscow, and other large towns.

(19.) The Strigolniks. This sect arose in Novgorod at the close of the 14th or early in the 15th century. A Jew named Horie, joined by two Christian priests, Denis and Alexie, and afterwards by an excommunicated dean named Karp Strigolnik, preached a mixture of Judaism and Christianity, and gained so many followers that a national council was called to suppress him. They regard the payment of money by the clergy to the bishops on ordination as simoniacal, and confession to a priest as unscriptural. Strigolnik himself was thrown into the river and drowned during a riot in Novgorod, but the opposition of his followers to the Russian Church continued for many years after his death.

(20.) The Wjetzera.
(21.) The Yedinovertzi (Coreligionists). This name was given to some members of the Starovertzi in the reign of Alexander (1801-25), when strong hopes were entertained of regaining them to the orthodox communion. They assume for themselves the name of Blagoveshemt, or "The Blessed."

Y. 1853); Strahle, Gesch. der Grünberg, etc., der christlichen Lehre in Russland, etc. (Halle, 1880). See Russia.

Russian Version of the Scriptures. The Russian language, which is understood from Archangel to Astrakhan, admits of but two principal divisions, namely, Great Russian—the literary and official language of the nation, spoken in Moscow and the northern parts of the empire—and Little, or Male, Russian, which contains many obsolete forms of expression, and is pronounced in the south of European Russia, especially towards the east. To this may be added the White, or Polish, Russian, spoken by the common people in parts of Lithuania and in White Russia. The earliest Russian version of the Scriptures was written in White Russian, and in 1517 parts of the Old Test. were printed at Prague, while the Acts and the Epistles appeared at Wilna in 1527. The translator is said to have been Fr. Skorina. At the close of the 17th century another attempt was made to produce a version of the Scriptures in the Great Russian. The promoter of this version was the Lutheran pastor Ernest Glück, of Livonia, who made it from the Old Slavonic text. Unhappily, at the siege of Marienburg in 1702, the whole of Glück's MSS. were destroyed. In the year 1816 the Russian Bible Society laid before the emperor Alexander some copies of a new version, and he was much struck at perceiving that, while so many barbarous tribes had been thus put in possession of the oracles of God, "his own Russians still remained destitute of the boon mercifully designed to be freely communicated to all." At his instigation an order was immediately forwarded through the president of the society to the Holy Synod, enjoining the translation of the New Test. into modern Russ. Under the auspices of the Religious Academy of St. Petersburg, the work was undertaken by the archimandrite Philaret, and, after three years had been devoted to the undertaking, an edition of the Four Gospels was struck off, in parallel columns with the Slavonic text. The preface to the Gospels, which appeared in 1819, was signed by Philaret, Michael, metropolitan of Novgorod, and Seraphim of Moscow. The work was such that in 1829 the fourth edition of the Gospels was published; in the same year the second edition of the Acts was printed, while the first edition of the entire New Test. did not appear till 1823. As to the order of the books of the New Test., which were reprinted and published by Tauchnitz, of Leipzig, in 1834, and again in London in 1851, it is as follows: Matthew, Mark, Luke, John, Acts; the epistles of James, Peter, John, and Jude; Romans, Philemon, Hebrews, Revelation.

Of the Old Test., only the Psalms were translated by the Rev. Dr. Pavsky, of the Cathedral of St. Petersburg, the first Hebrew scholar in the empire. The edition appeared in 1822, and consisted of 15,000 copies; yet so great was the demand that within the space of two years no less than 100,000 copies were sold. In 1835 Mr. Tauchnitz, of Leipzig, published an edition in Hebrew and Russian. The edition before us, in Russ alone, was published at London in 1862, and it is noticeable that the word "Selah" is always put in brackets; that the number of verses in the different psalms does not agree with the English, but with the Hebrew, as the superscriptions, which are found in the English Bible in small type, are counted as a verse; Ps. ix and x are translated according to the Sept. as one, and thus, e.g., the xxvith Psalm is the xviith Psalm. The Psalm of the Hebrew is divided, as in the Sept., into two—cxvi, from 1-11, and cxvii, from 12-20—and thus the usual number of 150 psalms is gained. The translation of the other books of the Old Test. from the
Hebrew proceeded under the direction of the religious academies of St. Petersburg, Moscow, and Kief; and an edition to consist of 10,000 copies of the Pentateuch and the New Testament was undertaken; but in 1826 the Russian Bible Society was suspended by the ukase of the emperor Nicholas. A new translation has of late been issued by the Holy Synod, while the British and Foreign Bible Society also published a version, which is largely circulated in 1881, and from various statutes and other literary monuments still extant. Recently, printing in the Russiaka tongue has been recommenced. The Russiaka belongs, for the most part, to the United Greek Church, but in part also to the Non-Unitled. They preserve many old customs peculiar to themselves, and the church is the same as that current in Poland and Servia. This has been collected by Vaulin in his Pisma Polskis i Russke (Lenberg, 1883). Leviwick has published a Grammatik der russischen Sprache für Deutsche (Przemysl, 1889).

Russio-Greek Church is the community of Christians subject to the emperor of Russia, using the Slavonic liturgy and following the Russian rite. See Greek Church.

1. Origin. The early history of the Russian Church is involved in much obscurity; but that Christianity was introduced into Russia previous to the middle of the 9th century must be inferred from a letter of Photius (866) in which he says that the people called Russians had forsaken idolatry; received Christianity, and allowed a bishop to be placed over them (Epistola, ed. Montecau, p. 58). Its diffusion, however, was very limited. The princess Olga was baptized about the middle of the 10th century, but by no means succeeded in winning over her son Switoslaw and her people to Christianity. Nor was it till the alliance of Vladimir with the Byzantines that a thorough, and a successful, conversion of the people took place. Hereafter the introduction of the Eastern rite became general; and it is probably by the marriage of Vladimir with Anne, sister of the emperor Basil II, and his baptism in 988 (when he took the name of Wassily, or Basil), that the foundation of Christianity can be said to have been regularly laid in Russia. He issued an edict for the destruction of idols and idol temples throughout his dominions; and his subjects were commanded to receive baptism, which they did in very large numbers. Churches were built in all directions, the first of them being dedicated by Vladimir himself. Yaroslav, the next Russian monarch, built convents which he filled with Greek scholars and artists, and many works were translated from Greek into the Slavonic dialects.

2. Government. At first the Russian Church was under the jurisdiction of Rome, and it seems that as late as the Council of Florence (1439) the adherents of the Roman Church throughout Russia were as numerous as those of the Greek party. Its complete separation from Rome was effected by an archbishop of Kief, named Photius, in the latter part of the same century. For more than a century the Russians had no bishop subject to the patriarch of Constantinople; but in 1588 the patriarch Jeremias, being in Russia, held a synod of the Russian bishops and erected the see of Moscow into a patriarchate with jurisdiction over the entire territory. He was also induced in 1589 to consecrate Job, archbishop of Smolensk, as first bishop of Moscow, which see was afterwards confirmed by a synod held at Constantinople; but, as their junior, the patriarch of Moscow ranked after the patriarchs of Alexandria, Antioch, Jerusalem, and Constantinople. This subordination was acquiesced in until the reign of Alexis Michaelovich, when the patriarchs of Moscow, Nilos, refused to acknowledge it further. When Peter the Great became ruler, he saw that his government was, in fact, divided with the clergy and the patriarch. Upon the death of Adrian, in 1706, when the bishops were assembled to choose his successor, Peter entered and broke up the meeting, declaring himself patriarch of the Russian Church. For the choice of the clergy by their established rights, he kept the office open for upwards of twenty years, and abolished it in 1721. The permanent administration of Church affairs was placed under the direction of a council, called the Holy Synod, or Permanent Synod; consisting of archbishop, bishops, and archimandrites, all named by the emperor.

3. Constitution. Under the direction of this council, a series of official acts and formularies, and catechetical, doctrinal, and disciplinary treatises, was drawn up, by which the whole scheme of the doctrine, discipline, and Church government of the Russian Church was settled in detail, and to which all the clergy, officials, and dignitaries are required to subscribe. The leading principles of this constitution are the absolute supremacy of the czar, and it has been maintained in substance to the present time. The Holy Synod is considered as one of the great departments of the government, the minister of public worship being ex officio a member. This code was enacted in 1551 and received the name of Stolgar, or a hundred chapters.

4. Doctrine. As regards doctrine, the Russian Church may be considered as identical with the common body of the Greek Church (q.v.). With that Church it rejeets all the impositions of the popes and renounces the jurisdiction of the Holy Ghost. All the great leading characteristics of its discipline, too, are the same; the differences of ceremony being too minute to permit our entering into detail. The discipline as to the marriage of the clergy is the same as that described for the Greek Church; and in carrying out the law which enforces celibacy upon bishops the Russians adopt the same pediment with the Greeks, viz., of selecting the bishops from among the monks, who are celibates by virtue of their vow.

5. Liturgy. The service of the Russian Church was, at its commencement, borrowed from the Greek Church, and became the Russian Church; and by his marriage with a Greek princess, the czar and his dynasty descended into the Slavic, which to this day is the language of the Church. They translated, however, only the most necessary books, the others being translated into Russian since the time of Yaroslav I. In them we found many mistakes which Cyprian and Photius labored to correct; but, as the metropolitan who succeeded them were Russians, and not well versed in the Greek language, errors again crowded in. Making, a monk, was called from Athos in 1506 and ordered to revise the Church books, and soon discovered that, by the numerous errors of translation, even the articles of the Creed had been changed in meaning. His work displeased the emperor, who brought false charges against him, and he was sent to a monastery, deprived of the sacristies, and, after thirty years of suffering, died in 1556. When Nikon became patriarch, he undertook the cor-
RUST

section of the books, and sent to the East the monk Asey Suchanow for the purpose of collecting ancient Greek and Slavic MSS. This resulted in the correction of the Scriptures and the introduction of the corrected version in the place of the old ones. The Church service itself underwent no change except the addition of some holy days in honor of new saints.

6. Clergy.—There are three ranks of episcopacy in the Church—metropolitans, archbishops, and bishops, who each have a peculiar dress. These three classes are called by the general name of archires, or prelates; next to them in degree are the archimandrites and hegoumenoi, or abbots and priors of the monasteries; and last and lowest of all are the monks, who have been either ordained for the priestly office, for the second degree, or

Britan, iii, 30). The Hebrew וַָֽעַי (Isa. 1, 9) is rendered בְּרֹסָכ by Aquila (comp. also Epist. Jerem, v, 12, ἀπό ιου καὶ βουμᾶρτον, “from rust and moths”; A. V. Bar. vi, 12). Scultetus (Ezex. Evang, ii, 35; Crit. Sac. vol. vi) believes that the words יָאָכָל and בְּרָוָסָכ על-דיָּוָס, for יָאָכָל and בְּרָוָסָכ, are words which were formerly used in the sense of “rust.” The word יָאָכָל is also used for the insect which may attack treasures of any kind which have long been suffered to remain undisturbed. The allusion of James is to the corroding nature of יָאָכָל on metals. Scultetus correctly observes, “אֶדְּקָר גָּרְמָנְר יֶדֶמָר, sed non corrupuntur nummi,” but though this is, strictly speaking, true, the ancients, just as ourselves in common parlance, spoke of the corroding nature of "rust" (comp. Hammond, Armotat, in Matt. vi, 19.)—Smith. Moreover, various writers agree that the gold and silver coins of antiquity were much more liable to corrosion than those of the present, being much more extensively adulterated with alloys.

The word translated “seum” (רַעְשָה, chel’d) in Ezek. xxiv, 6, 11, 12 means the rust or corrosion of the pot of brass (or rather copper) which typified Jerusalem. Copper is more liable to corrosion than the other metals, each of which has its own dissolvent; but copper is acted upon by all those dissolvents, and the corrosion of the copper pot symbolizes the attitude of Jerusalem to corruptions, which, being shown by Ezekiel to be removed only by the agency of fire, was a type of the awful punishments and fiery purgation awaiting Jerusalem.

Rust, George, a learned English divine, was a native of Cambridge, and educated at Christ’s College. On the Restoration, Jeremy Taylor, foreseeing the vacancy in the deanship of Connor, in Ireland, sent to Cambridge to secure a man suitable for that position. Dr. Rust was chosen, and he landed at Dublin about August, 1601. He was preferred to the deanship as soon as it was void, and in 1602 to the rectory of the island of Magee. The bishop dying (Aug. 15, 1667), the bishopric was divided, and Dr. Rust became bishop of Dromore, which position he held until his death, in December, 1670. He wrote, A Letter of Resolution concerning Origens, etc. (Lond. 1661, 4to):—Discourse of Truth: besides several Sermons.

Rust, Isaac, a German doctor of theology and member of the consistory in Speyer, was born in 1736 at Mussbach, in Bavaria. In 1820 he was minister in Ungstein, in 1827 he was appointed minister of the French Reformed Church at Erlangen, in 1847 he was called to Munich, and was finally made pastor in Speyer, where he died in 1862. He wrote, Philosophie und Christenthum, oder Wissen und Glauben (Mannheim, 1838, 2d ed.):—Predigten über ausgewählte Texte (Erlangen, 1830):—Stimmen der Reformation u. der Reformatoren an die Fürsten u. Völker dieser Zeit (ibid. 1831):

—De Alia Poascae Veritatis et Divinitys Religionis Christianae Vindicte (ibid. 1833), pt. i, ii:—Jesus Christus gentem u. heute u. dehnte auch in Evangeli (München, 1830), sermons. See Wilke, Handbuch der theolog. Literatur, i, 25, 411; ii, 103, 405, 744; Zuchold, Bibli. Theol. p. 1101. (B. P.)

Rustic-work, ashrail masonry, the joints of which are worked with grooves, or channels, to render them conspicuous. Sometimes the whole of the joints are worked in this way, and sometimes only the horizontal ones. The grooves are either moulded or plain, and are formed in several different ways. Rustic-work is sometimes left, or purposely made, rough, but at the present day it is usually made even. Rustic-work was never employed in medieval buildings, but
it is said to have had its origin in the buildings of Augustus and Claudius at Rome.—Parker, Glos. of
Architect. s. v.

Ruter, Calvin W., a minister of the Methodist Episcopal Church, was born in Bradford, Orange Co.,
Vt., March 15, 1794. He was received into the Ohio Conference in 1817, and in 1820 was transferred to
the Missouri Conference. When the Indiana Conference was formed in 1833, Mr. Ruter was chosen its secretary.
He took deep interest in founding the Indiana Asbury University, and was for many years one of its trustees.
He took a superannuated relation in 1855, and died June 11, 1859. See Minutes of Annual Conferences,
1859, p. 274.

Ruter, Martin, D.D., a minister and instructor of the Methodist Episcopal Church, was born in Charlton,
Mass., April 3, 1785. In 1801 he was admitted into the New York Conference, and in 1818 was appointed
in charge of the Newmarket Wesleyan Academy, after wards removed to Wilbram. In 1828 he became
president of Augusta College, where he remained until August, 1882. In 1834 he accepted the position of
president of Allegheny College, and held it until 1857, when he was appointed superintendent of the Texas
mission, where he formed societies, secured the building of churches, and laid out the greater part of the state
in circuits. His death took place May 16, 1888. He published a Hebrew Grammar:—a History of Martyrs:
an Ecclesiastical History:—Sermons:—and Letters. See Simpson, Cyclop. of Methodists, s. v.

Rutgers, Henry, a distinguished Revolutionary patriot, philanthropist, and Christian of New York city,
who was severely wounded while serving as an officer in the war of independence, and always stood high
in the confidence of the state and general governments, was born in 1746. Possessed of ample wealth, he was
noted for his unceasing munificence to various objects of humane and religious charity. He was one of the
first managers of the American Bible Society, and was prominent in all the great benevolent movements of his
time. By a timely act of liberality, he was to a large degree instrumental in the revival of Queen's College,
which since that date (1825) has been honored with his venerated name as Rutgers College. In the public move-
ments of his denomination (the Dutch Reformed), he was "a prince and a great man, whose praise is in all
the churches." He died Feb. 17, 1830, in the full confidence and triumph of Christian hope. His last words
were "Home! home!" (W. R. B. T.)

Ruth (Heb. Ruth, רות, probably for רות, and this for רות, a female friend; Sept. and New Test., "Poiz"); Josephus, Poizη; Ant. v, 9, 1), a Moabitess, the wife, first, of Mahlon, a son of Boaz, and by him a daughter
of Obed, the ancestress of David and of Christ; and one of the four women (Tamar, Rahab, and Uriah's wife
being the other three) who are named by Matthew in the genealogy of Christ. She thus came into intimate
relation with the stock of Israel, and her history is given in the story of the sacerdotal generation which bears her
name. The narrative that brings her into the range of inspired story is constructed with ionic simplicity
and pathos, and forms a pleasant relief to the sombre and repulsive shades of the picture which the reader

has just been contemplating in the later annals of the Judges. It is the domestic history of a family com-
peled, by the urgency of a famine, to abandon the lands of Canaan, and seek an asylum in the territories of Moab.
Elimelech, the head of the emigrating household, dies in the land of his sojourn, where his two sur-
viving sons "took them wives of the women of Moab; the name of the one was Orpah, and the name of the other Ruth." On the death of the son the widowed
parent resolving to return to her country and kindred, the filial affection of the daughters-in-law is put to a
severe test, and Ruth determines at all hazards to ac-
company Naomi. "Whither thou goest, I will go, and
where thou lodgest, I will lodge; thy people shall be my people, and thy God my God: where thou diest, I will
also die; except the Lord will put me otherwise, I will not be disposed to thee, and more also, if aught but death part thee and me," was the expression of the unalterable attachment
of the young Moabish widow to the mother, to the land, and to the religion of her lost husband. They ar-
ri ved at Bethlehem just at the beginning of barley har-
vest, and Ruth, going out to glean for the support of her
mother-in-law and herself, chanced to go into the field
of Boaz, a wealthy man, the near kinsman of her father-
in-law, Elimelech. The story of her virtues and her kindness and fidelity to her mother-in-law, and her
preference for the land of her husband's birth, had gone before her; and immediately upon learning who the stranger was, Boaz treated her with utmost kindness and respect, and sent her home laden with corn which she had gleaned. Boaz had bidden her return from day to day, and directed his servants to give her a courteous welcome. An omen so propitious could not but be regarded as a special encouragement to both, and Naomi therefore counselled Ruth to seek an
opportunity for intimidating Boaz the claim she had
upon him as the nearest kinsman of her deceased hus-
band. A stratagem, which in other circumstances would have been of very doubtful propriety, was adopted for
compassing this object; and though Boaz entertained the proposal favorably, yet he replied that there was
another person more nearly related to the family than himself, whose title must first be disposed of. Without
delay he applied himself to ascertain whether the kins-
man in question was inclined to assert his right,—a
right which extended to a purchase of the ransom (at
the Jubilee) of Elimelech's estate. Finding him indis-
persed to the - Omen, he obtained from him a release,
ratiﬁed according to the legal forms of the time, and
next proceeded himself to redeem the patrimony of
Elimelech, and finally, with all due solemnity, took Ruth
to be his wife, amid the blessings and congratulations of their neighbors. As a singular example of virtue and piety in a rude age and among an idolatrous people, as one of the first-fruits of the Gentile harvest
gathered into the Church; as the heroine of a story of exquisitely beauty and simplicity; as illustrating in her history the workings of Divine Providence, and the truth of the saying that "the eyes of the Lord are over the righteous, and the manner of the sons of Adam," for the many interesting revelations of ancient domestic and national customs which are associated with her story, Ruth has always held a foremost place among the Scripture characters. Augustine has a curi-
ous speculation on the relative blessedness of Ruth, twice married, and by her second marriage becoming the ancestress of Christ, and Anna remaining constant in her maidenness. From this time on, the name of Ruth is an assurance that we can measure the greatness of Ruth's virtue by the
blessedness of her reward—"Ex ejus semine Christus oritur" (Epist. xxi ad Paulam).

The period in which the famine above spoken of occurred is a greatly disputed point among commentators.

The opinion of Fiefe of the sacred text which bears her name. The narrative that brings her into the range of inspired story is constructed with ionic simplicity and pathos, and forms a pleasant relief to the sombre and repulsive shades of the picture which the reader

of Gideon (B.C. cir. 1300), and which is a mean between the dates fixed upon by others, carries with it the greatest probability. The oppression of the Midianites, mentioned in Judg, vi, 3-6, which was productive of a fami-
and from which Gideon was instrumental in delivering his people, wasted the land and destroyed its increase, "till thou come unto Gaza;" and this embraced the region in which olives of David to have been his great-grandmother; but as Boaz is in the same list set down as the grandson of Nahshon, who flourished at the Exode, we are forced to suppose the omission of some new generations, which chronologers insert according to their respective schemes. See *Genealogy of Jesus Christ*.

**RUTH, BOOK OF.** This book is inserted in the canons, according to the English arrangement and that of the Sept., between the book of Judges and the books of Samuel, as a sequel to the former and an introduction to the latter. Among the ancient Jews it was added to the book of Judges, because they supposed that the transactions which it relates happened in the time of the judges of Israel (Judg., i. 1). Several of the ancient fathers, however, make but one book of Judges and Ruth. In the Hebrew Bible it stands among the Ketubim, or Hagiographa. But the modern Jews common place, after the Pentateuch, the five Megilloth (q. v.): — 1. The Song of Solomon; 2. Ruth; 3. The Lamentations of Jeremiah; 4. Ecclesiastes; 5. Esther. Sometimes Ruth is placed at the second, sometimes at the third, and sometimes at the fifth.

1. The true date and authorship of the book are alike unknown, though the current tradition is in favor of Samuel as the writer (Talmud, Baba Bathra, 14, 2). That it was written at a time considerably remote from the events it records would appear from the conclusions in ch. 5, which explains a custom referred to as having been "the manner in former time in Israel, concerning redeeming and concerning changing" (comp. Deut. xxxv, 9). That it was written, also, at least as late as the establishment of David's house upon the throne appears from the concluding verse, "And Obed begat Jesse, and Jesse begat David." The expression, moreover (in Ps. lxxxvi, 22), "by the book," marking the period of the occurrence of the events, indicates, no doubt, that in the writer's days kings had already begun to reign. Add to this what critics have considered as certain Chaldaisms with which the language is interspersed, denoting its composition at a period considerably later than that of the events themselves. That Eichhorn finds a Chaldaism or Syriacism in the use of נ for ר in ירנְחָלָכָה, though the same form occurs elsewhere. He adverted also to the existence of a superfluous יוד in ירנְחָלָכָה (iii, 9) and in ירנְחָלָכָה (ver. 4). As, however, the language is in other respects, in the main, pure, these few Chaldaisms may have arisen from a slight error of the copyists, and therefore can scarcely be alleged as having any special bearing on the era of the document. The same remark is applicable of certain idiomatic phrases and forms of expression which occur elsewhere in the books of Samuel and of Kings, as, "The Lord do so to me, and more also" (Ruth i, 17; comp. 1 Sam. iii, 17; xiv, 44; xx, 23; 2 Sam. iii, 9, 50; xix, 13; 1 Kings ii, 25; xx, 2, x, 10; 2 Kings vii, 31); "I have discovered to your ear," for "I have told you" (Ruth ii, 4, comm.); "I have sold you into their hands" (2 Sam. vii, 27).

2. The canonical authority of Ruth has never been questioned, a sufficient confirmation of it being found in the fact that Ruth, the Moabitess, comes into the genealogy of the Saviour, as distinctly given by the evangelist (Matt. i, 6). The principal difficulty in regard to the book arises, however, from this very genealogy; in which it is stated that Boaz, who was the husband of Ruth, and the great-grandfather of David, was the son of Salmon by Rahab. Now, if by Rahab we suppose to be meant, as is usually understood, Rahab the harlot, who protected the spies, it is easy to conceive that only three persons, Boaz, Obed, and Jesse, should more intervened between her and David, a period of nearly four hundred years. The solution of Usher is not probable, that the ancestors of David, as persons of pre-eminent piety, were favored with extraordinary longevity. It may be that the sacred writers have mentioned in the genealogy only such names as were distinguished and known among the Jews. But a more reasonable explanation is that some names are omitted, as we know is elsewhere the case in the same genealogy. (See above.)

3. The leading scope of the book has been variously understood by different commentators. Umbreit (Cebcr Garst and Zweck des Buches Ruth, in Theol. Stud. und Krit. for 1834, p. 308) thinks it was written with the specific moral design of showing how even a stranger, and that of the hated Moabitish stock, might be sufficiently noble to become the mother of the great king David, because she placed her reliance on the God of Israel. Berthold regards it as a picture of the history of Israel, in order to recommend the duty of a man to marry his kinswoman; while Eichhorn conceives that it was composed mainly in honor of the house of David, though it does not conceal the poverty of the family. The more probable design we think to be to preiminate, by the recorded adoption of a Gentile woman into the family from which Christ was to derive his origin, the final reception of the Gentile nations into the true Church, as fellow-heirs of the salvation of the Gospel. The moral lessons which it which it usually teaches are of the most interesting and touching character: that private families are as much objects of divine regard as the houses of princes; that the present life is a life of calamitous changes; that a devout trust in an overruling Providence will never fail of its reward; and that no condition, however adverse or afflicted, is absolutely hopeless; are truths that were never more strikingly illustrated than in the brief and simple narrative before us.

4. The separate commentaries on the entire book are not very numerous. Of the Church fathers we mention the following: Origen, Fragmentum (in Opp. ii, 478 sq.); Theodoret, Questions (in Opp. i, 1); Isidore, Commentarla in Opp.; Bede, Questions in Opp.; Raban, Commentarla in Opp.; also Trimmerus, Expositio (in Pez. Theol. iv, 1, 2; Pez. theol. iv, 1, 2). In modern expositors there are the following: Abolav, בָּלָד־עַש (incl. Cant. etc.) (finished in 1329; pub. by Markar, Riva di Trento, 1650, 4to; also in Frankfurturber's Rabbin. Bible); Birtinon, בָּלָד־עַש (Cracov. s. a. 4to; also in his works, Ven. 1585); Sal. Isak, בָּלָד־עַש (Salon, 1651, 4to); Alkabaz, בָּלָד־עַש (Const. 1561; Lubl. 1597, 4to; Mercer, Vessir Seruriu cum Scholias (Par. 1564, 4to); Isak ben-Joseph, בָּלָד־עַש (Sabbionetta, 1551, 8vo; Manuta, 1551, 16mo); Strigel, Scholias (Lipsi, 1571, 1572, 8vo); Feuerdant, Commentarius (Par. 1582; Antw. 1585, 4to); Lavater, Homiliae (Heidelb. 1586, 8vo; also in English, Lond. 1601, 8vo); De Celada, Commentarius (Loudg. 1564, 1651, fol.); Cuper, Commentarla [incl. Tobit, etc.] (Mogunt. 1600, 4to); Topsell, Commentarius (Lond. 1601, 8vo); also Lectures (ibid. 1615, 8vo; Alsheib, יַיְרָלְרְהָלָכָה, יַיְרָלְרְהָלָכָה (Ven. 1601, 4to); Alsheib, יַיְרָלְרְהָלָכָה (Ven. 1601, 4to); Heidenreich, Expositio [incl. Tobit] (Jen. 1608, 8vo); Serrarius, Explanatio [incl. Judg.] (Mogunt. 1609, fol.); Bernard, Commentary (Lond. 1629, 4to); Sanctius, Commentarius [incl. other books] (Loudg. 1628, fol.); Bonifere, Commentarius [incl. Josh. and Judges] (Par. 1631, 1639, 4to); Crom- mius, Commentarius [incl. Judg., etc.] (Lovan. 1631, 4to); Drusius, Commentarius (Amst. 1632, 4to; Schleun- gher, Expositio (Norib, 1632, 8vo); D'Acosta, Comment-
Ruthven, James, a noted ruling elder in the Presbyterian Church, was born in Glasgow, Scotland, Dec. 15, 1783. His father removed to the United States and settled in the city of New York, and attended the ministry of the Rev. John Mason, D.D., of the Scotch Church. In the sixth year of his age James witnessed the humiliation of Washington, with its indescribable emotions. In 1812 he was ordained a deacon and subsequently an elder in Dr. Mason's church, which was then in Murray Street. He removed in 1842 to Bridgetown, Conn., where his influence was of great value, and returned to New York after an absence of eight years. With his religion as an alightment with indescribable emotions. In 1812 he was ordained a deacon and subsequently an elder in Dr. Mason's church, which was then in Murray Street. He removed in 1842 to Bridgetown, Conn., where his influence was of great value, and returned to New York after an absence of eight years. He was educated at St. John's College, University of Edinburgh, and received his degree of A.B. in 1729 and A.M. in 1733. He was chosen fellow and made B.D. in 1740. Two years after, he was chosen fellow of the Royal Society, and in 1745 was appointed professor of divinity, took his degree of D.D., and was appointed chaplain to the Prince of Wales. He was afterwards rector of Barrow, in Suffolk; Shenstone, in Essex; Barley in Hertfordshire; and in 1753 archdeacon of Essex. He died Oct. 5, 1771, and was buried in the church at Barley. He was the author of Ordo Institutionum Physicorum, etc. (Camb. 1743, 4to):—Essay on the Natural Virtues and Virtues of Virtue (Lon. 1744, 8vo):—System of Natural Philosophy (Camb. 1747, 4to):—Credibility of the Holy Scriptures (Lond. 1751, 8vo):—Institutes of Natural Law (Lond. 1754-56, 2 vols. 8vo); 2d American ed. Baltimore, 1832), lectures read in St. John's College, Cambridge: also Letters, Sermons, etc. See Hutton, Dict.; Nichol, Lit. Anecdotes.; Watt, Bibl.Brit.

Rutherglen Declaration, the name given to a protestating declaration of an armed body of Covenanters who, in 1679, assembled in this old burgh, burned some obnoxious acts of Parliament, and affixed a copy of their protest to the market-cross. Cleaverhouse was sent, May 31, from Glasgow in search of the party; the battle of Drumclog was fought, and the royalist forces were routed. At the battle of Bothwell Bridge, Sunday, June 22, the Covenanters were defeated and twelve hundred were killed.

Ruthrauff, John F., a Lutheran minister, was born in Northampton County, Pa., Jan. 14, 1764, and began his theological studies with Rev. Jacob Goering in York, 1790. He began to preach in 1798, and had charge of several churches in York County and in Carlisle until June, 1798, when he accepted a call from the Green Cushion congregation in Carlisle, in which he labored upwards of forty years. His charge embraced M'Combsville, London, Mergusburg, Wayneboro', Quincy, Smoketown, Jacob's Church, and several in Washington County, Md. He continued his labors until the year before his death, which occurred Dec. 18, 1857. He was a man of strong mental qualifications; a powerful and instructive preacher, and possessed of substantial Christian excellence. See Sprague, Annals of the Amer. Pulpit, ix, 104.

Ruthrauff, Jonathan, a Lutheran minister, was born in Greencastle, Franklin Co., Pa., Aug. 16, 1801, and was son of the preceding. He entered Washington College, and in 1822 commenced his theological studies with Rev. Dr. Kurz, Hagerstown, Md., and continued them under Rev. Dr. Lochman. He was licensed to preach at Reading, Pa., in 1825, and served as itinerant missionary until Feb. 25, 1827, when he accepted a call from the united churches of Lewistown and vicinity. In 1829 he accepted a call from Hanover, where he labored for eight years. In December, 1837, he assumed charge of the Church at Lebanon, Pa., which he served with great fidelity until 1849, when he was prostrated by disease, which terminated his life, July 23, 1850. Mr. Ruthrauff was of a kind and genial nature; his preaching, which was in both German and English, was eminently practical and pungent. See Sprague, Annals of the Amer. Pulpit, ix, 175.
have more deeply impressed me with their absolute excellence than their entire thorough, and beautifully consistent character. And it is to this which remained unblemished for more than half a century. The ripeness and richness of his Biblical piety shone conspicuously in the social meetings, in the community, at the bed of sickness, everywhere. He loved the Church, honored the ministry, consecrated all his wealth to God, and as an almoner of the divine bounty scattered blessings far and wide. For him, "to live was Christ," and for him, "to die was eternal gain." The last words he uttered were, "Dying, and, behold, we live!" He died Nov. 25, 1855. (W. P. S.)

Rutledge, George, a minister of the Methodist Episcopal Church, was born in Augusta County, Va., Nov. 8, 1787. He was a professed convert of the Church when twenty years of age. In 1835 he was admitted on trial into the Baltimore Conference, and was immediately transferred to the Illinois Conference. He served as presiding elder on six different districts, and was three times delegate to the General Conference. His death occurred Sept. 7, 1871. See Minutes of Annual Conference, 1871, p. 712.

Ruttenstock, Jacob Dr., provost and later abbot at Klosterneuburg, in Austria, was born at Vienna, Feb. 10, 1776, and entered the Augustinian convent at Klosterneuburg, Oct. 6, 1795, completing his theological studies partly in the convent and partly at the University of Vienna. He took vows March 30, 1806, and on Sept. 8, 1808, he was consecrated to the priesthood. He devoted himself specially to the cure of souls, but steadily employed his leisure hours in the prosecution of theological studies. He was accordingly appointed professor of theology in the convent and canon law in the institute for theological tutors connected with his convent, and in December, 1808, he was made a temporary member of the chair of Church history at Vienna. In 1811 he became pastor of Klosterneuburg and director of its principal school, but was almost immediately transferred to the high-school at Vienna, where he became ordinary professor of Church history in 1819, and continued during nineteen years to apprise himself as a patient inquirer, a thorough scholar, and a capable instructor. The text-book entitled Institutiones Historiae Ecclesiasticae N. T. (Vienna, 1832-34), in three volumes, and extending to the year 1617, is the only monument of this period of his life that is preserved. He was chosen provost of Klosterneuburg, June 8, 1838, and in that capacity rendered valuable services in completing the convent and adorning the cathedral, etc. In 1832 the emperor Francis I appointed Ruttenstock a councillor of state, director of gymnasial studies in the hereditary states of Austria, etc. In 1842 he received the cross of the Order of Knights of Leopold. He died June 29, 1844, in the convent of Klosterneuburg. It remains to be added that several of Ruttenstock's sermons were published, and that he ranked, wherever known, as an eminent pulpit orator. See Wetzer u. Welte, Kirchen-Lex. n.s.

Ruysbroeck (or Ruysbroeck), Jean de, the most noted of mystics in the Netherlands, was born in A.D. 1296 at Ruysbroeck, near Brussels, and was educated in the latter city under the direction of an Augustinian prebendary who was his relative. His fondness for solitude and day-dreams prevented him from making solid progress, however. His Latin was imperfect, though it is clear that he became acquainted with the earlier mystical writings. He probably did not read the sermons and Bible commentaries, but was acquainted with some of the Arcana. His works suggest the thought that the writings of master Eckart (died 1328), with whom Ruysbroeck was contemporary for thirty-five years, exercised influence over our author's mind. Ruysbroeck became vicar of the Church of St. Gudula at Brussels, where he lived in strict asceticism, enjoying the society of persons who had devoted themselves to a contemplative life, composing books and exercising beneficence. He contended against the sins of the times, and gained unceasingly for himself unblemished for more than half a century. The ripeness and richness of his Biblical piety shone conspicuously in the social meetings, in the community, at the bed of sickness, everywhere. He loved the Church, honored the ministry, consecrated all his wealth to God, and as an almoner of the divine bounty scattered blessings far and wide. For him, "to live was Christ," and for him, "to die was eternal gain." The last words he uttered were, "Dying, and, behold, we live!" He died Nov. 25, 1855. (W. P. S.)

The chief of his mystical writings are, The Ornament of Spiritual Marriage (Lat. by Gerh. Groot, Ornatum Spiritualis Desponsionis, MS. at Strasburg; by another translator, and published by Faber Stapulensis [Paris, 1512], De Oraculis Sacris, Sulpicii, etc. in Latin, French, Toulouse, 1619; and in Flemish, 'J Cierait der gheestelycke Bruyloogh, Brussels, 1624): — Speculum Eternae Salutis:— De Calculo, an interpretation of the calculi carnalium, Rev. ii, 17:—Samuel, sire de Alte Con templationes. The other works of Ruysbroeck contain but little more than repetitions of the opinions already expressed in those here mentioned. He wrote in his native language, and rendered to that dialect the same service which accrued to the High German from its use by the mystics of the section where it prevailed. He is still regarded in Holland as "the best prose-writer of the Netherlands," and in the Middle Ages the Dutch school was characterized by great precision of statement, which becomes impaired, however, whenever his imagination soars, as it often does, to transcendental regions too sublimated for language to describe. His works were accessible until lately only in Latin editions (by Surius, Cologne, 1549, 1552, 1609 [the best], 1692, fol.), or in manuscripts scattered through different libraries in Belgium and Holland. Four of the more important works were published in their original tongue, with prefaces by Ullmann (Hanover, 1848). No complete edition has as yet been undertaken (see Moll, Der Bekenner van het S. Barbara tot het heil [Amsterdam, 1844], p. 41).

Ruysbroeck's mysticism begins with God, descends to man, and returns to God again, in the aim to make man one with God. God is a simple unity, the essence above all being, the immovable, and yet the moving, cause of all existences. The Son is the wisdom, the unclothed image of the Father; the Holy Spirit the love which proceeds from both the Father and the Son, and unites them to each other. Creatures pre-existent in God, in thought; and, as being in God, were God to that extent. Fallen man can only be restored through grace, which elevates him above the conditions of nature. Three stages are to be distinguished: the active, or operation in which the objective, or emotional; and the contemplative life. The first proceeds to conquer sin, and draw near to God through good works; the second consists in introspection, to which ascetic practices may be an aid, and which becomes indifferent to all that is not God. The soul is embraced and penetrated by the Spirit of God, and reveals in visions and ecstasies. Higher still is the contemplative state (civitas vitae), which is an immediate knowing and possessing of God, leaving no remains of individuality in the consciousness, and concentrating every energy on the contemplation of the eternal and absolute Being. This life is still the gift of grace, and has its essence in the unifying of the soul with God, so that he alone shall work. The soul is led on from glory to glory, until it becomes conscious of its essential unity in God.

Ruysbroeck was constantly desirous of preserving the distinction between the uncreated and created spirits. In the uncreated, he sought to distinguish between an identification of personality, but merely a cessation of the difference in thought and desire, and a giving-up of the independence of the creature. His language was often so strong, however, and his thought often so sublimated, that more cautious thinkers found serious cause to charge his writings with pantheism. This was not without effect, and some of Gerson (Op. cit., i, pt. i, p. 59 sq.). Few mystics
RUYSBROEK

have ascended to the empyrean where Ruysbroeck so constantly dwelt; and the endeavor to compress into forms of speech the visions seen in a state where all clear and real apprehension is at an end occasioned the fault of indistinctness with which his writings must be charged. His influence over theological and philosophical thought was not so great as that exercised by Eckart and Tauler, and was chiefly limited to his immediate followers. His Brotherhood of the Common Life (q.v.) was founded by Gerhard Groot, one of Ruysbroeck's pupils, and its first inception may perhaps be traced back to Ruysbroeck himself—a proof that he was not wholly indifferent to the conditions of practical life.

Surniel, Richard von St. Victor u. J. Ruysbroeck (Erlang, 1838); Ullmann, Reformatorven vor der Reformation, ii, 55 sq.; Schmidt, Etudes sur le Mysticisme Allemand au 17e siecle, in Memoires de l'Academie des Sciences Morales (1847); Noack, Die christliche Mystik, i, 147 sq.; Böhringer, Deutsche Mystiker d. 14ten u. 15ten Jahrhunderts, p. 492 sq.

Ruysbroeck (or Rubruqula), Willem de, a medieval traveller and missionary born in Brabant, is thus described by M. de Rebecq:—In 1258 Louis IX of France sent him and two other friars to Tartary. The object of their mission was to propagate Christianity among the Tartars, to search for Prester John, and to visit Sartach, a Tartar chief, who was reported to be a Christian. Ruysbroeck performed this arduous enterprise bravely, and, returning with his companions and Asia's curiously reached home in August, 1255. He died after 1256. He wrote a work, which is divided into two parts, De Gestis (or De Moribus) Tartarorum, and Itinerarium Orientis. Hakluyt published one part of his Principal Navigations (London, 1588-1608, 8 vols. fol.); but the story of Ruysbroeck is found most completely in Purchas's Pilgrims (1626, 4 vols. fol.).—Hoefer, Nov. Hist. Géograph., s. v.

Ruzé, Guillaume, a French prelate, was born at Paris about 1530. He taught rhetoric and philosophy in the College of Navarre, where he received the degree of doctor. He was a counsellor under Henry II, Charles IX, and Henry III, who made him grand almoner. In 1570 he was promoted to the bishopric of Saint-Malo, but resigned it two years later to receive that of Angers. In 1583 he assisted at the Council of Tournai, and rendered into French the confession of faith adopted by that council. He was also the author of a French translation of the Commentarius adversus Hereticos of Vincent de Lérins. Ruzé died Sept. 28, 1587. See Gallia Christiana.

Ryebill (or Ribaut), Paul, a French Protestant minister, was born near Montpellier in 1718. While the law made the preaching of Protestant doctrine a capital offence, he lived and preached for many years in caves and huts in the forest. He was a man of extensive influence, and often used it to restrain his people from violent measures. He died in 1759.

Ryder, Henry, D.D., an English prelate, a younger son of the earl of Harrowby, was born in 1777, became dean of Wells in 1812, bishop of Gloucester in 1815, and was translated to Lichfield and Coventry in 1824. He died in 1836. He published several Sermons and Charges (1806-32). For full obituary, see Gentleman's Magazine, 1836, i, 658.

Ryder, James, D.D., a Roman Catholic ecclesiastic, was born in Dublin in 1800, and emigrated to the United States in early youth. He entered the novitiate of the Society of Jesus in 1815, and pursued his secular studies at Georgetown College, Md., from 1815 to 1820, and his theological studies at Rome from 1820 to 1825. He then received holy orders, and occupied the chair of theology and Sacred Scriptures in the College of Spoleti, Italy, from 1825 to 1828. He returned to America in 1828, and was for several years professor of theology and vice-president of Georgetown College. In 1839 he was president of St. Mary's Church, Philadelphia, and also of St. John's Church, Frederick, Md. From 1840 to 1845, and also from 1848 to 1851, he was president of Georgetown College, and from 1845 to 1848 president of the College of the Holy Cross, Worcester, Mass. He was also superior of the Order of Jesuits in the province of North America. Ryder died in 1860. He published occasional Lectures and Discourses, and was a contributor to the Encyclopaedia of the Community. See Allibone, Dict. of Brit. and Amer. Authors, s. v.

Ryder, William, a minister of the Methodist Episcopal Church, was born in Hillistown, Middlesex Co., Mass., June 27, 1805. He joined the Church in Fort Ann, N. Y., in 1824, and in 1830 was licensed to preach. A year or two afterwards he entered the Troy Conference. He was ordained deacon in 1833, but was obliged through illness in 1833 to take a supernumerary relation. His disease was of a rheumatic-neuralgic nature, and so severe that in 1837 he lost all power of locomotion, and the use of almost every muscle. His sufferings were very intense, and from them he had very little relief. He contrived to have a book so placed before him that he could read, and was thus enabled to read the Holy Scriptures at the painful hours of daily prayer. He died in 1849. See Wentworth, The Superannuated (N. Y. 1846); Minutes of Annual Conferences, 1850, p. 458.

Rye, a place in Cornwall, England; and a county in Ireland.

Rye (zilla), kussāneth, occurs in three places of Scripture (Exod. ix, 32; Isa. xxvii, 25; and "fitches" in Ezek. iv, 9); but its true meaning still remains uncertain. It was one of the cultivated grains both of Egypt and of Syria, and one of those employed as an article of diet. It was also sown along with wheat, or, at least, its crop was in the same state of readiness; for we learn from Exod. ix, 32 that in the seventh plague the hail-storm consumed the wheat in the ears. The field which was baled; but that the wheat and the kussāneth were not smitten, for they were not grown up. Respecting the wheat and the barley, we know that they are often sown and come to maturity in different months. Thus Forskal says, "Barley ripens in February, but wheat stands till the end of March" (Flora Egypti, p. 49). The evw which above referred to probably took place in February (see Kitto, Pict. Bible, ad loc.). That kussāneth was cultivated in Palestine we learn from Isa. xxviii, 25, where it is mentioned along with ketsa (ngilla) and cumin, wheat and barley; and sown, according to some translators, "on the extreme border (zilla) of the fields," as a kind of fence for other descriptions of corn. See Agriculture.

This is quite an Oriental practice, and may be seen in the case of flax and other crops in India at the present day. The rye is a grain of cold climates, and is not cultivated even in the south of Europe. Korte declares (Travel. p. 160) that no rye grows in Egypt; and Shaw states (p. 351) that rye is little known in Barbary and Egypt (Rosenmüller, p. 76). That the kussāneth was employed for making bread by the Hebrews we know from Exod. xiv, 22, where it is said that the prophet commanded the Israelites to take corn, wheat, barley, and beans, and lentils, and millet, and kussāneth, and put them in a vessel, and make bread thereof.

Though it is very unlikely that kussāneth can mean rye, it is not easy to say what cultivated grain it designates. The principal kinds of grain, it is to be observed, are mentioned in the same passages with the kussāneth. Celsius has, as usual, with great labor and learning, collected together the different translations which have been given of this difficult word. In the Arabic translation of Exod. ix, 32, it is rendered jibbon: "ccounta, non circula, ut perperam legitur in versione Latina.

By our Arabic translators it is converted into kessaneth, and also beans. Many translate it vicia, or vetches, as in the A. V. of Exod. ix, 32; for according to Maimonides (ad tract. Shabb., xx, 3), carshinnah is a kind of legume, which in the Arabic is called kirsana, but in the
sacred language kussímeth. Both julbán and kiríána mean species of pulse, but it is not easy to ascertain the specific kinds. The majority, however, instead of a ēnome, consider kussímeth to indicate one of the cereal grains, as the rye (secalis); but they rather consider the name of which it is likely to have been. These have probably been selected because commentators usually adduce such grains as they themselves are acquainted with, or have heard of as commonly cultivated. Cel- sina, however, informs us that in the Syriac and Chaldean kussímeth is translated kúnta; far in the Latin Vulg., farther adoratum, Guisio, tract. Pesh. viii, 5, and tract. Chalmain, i, 1; zéa in the Sept., Isa. xxviii., Aquila, Symmachus, and others render it spellta. So Ben-Melech, on Exod. ix and Ezek. iv, says “kússei- neth, vulgo spellta,” and the Sept. has ἄλαια. Upon this Celsius remarks, “All these—that is, kanta, far, sid, zéa, spellta, and ἄλαια—are one and the same thing.” This he proves satisfactorily by quotations from the ancient authors (Hierobol. ii, 100). Dr. Harris states (Nat. Hist. of the Bible, s. v.) that the word kussímeth seems to be derived from kásaim, “to have long hairs”; and that hence a bearded grain must be intended; which confirms the probability of spelt being the true meaning. Gesenius derive it from סָפָל, “to shear, to pull,” and translates it, “a species of grain like wheat, with a smooth or bald ear, as if shorn.”

Spelt (Triticum spelta), or spelt, is in many respects so closely allied to the common wheats as to have been thought by some old authors to be the original stock of the cultivated kinds; but for this there is no foundation, as the kind cultivated for ages in Europe does not differ from specimens collected in a wild state. These were found by a French botanist, Michaux, in Persia, on a mountain four days’ journey to the north of Hamadan; it is similarly found in parts of Germany, in Switzerland, in the south of France, and in Italy. It is commonly sown in spring, and collected in July and August.—Kitto. There are three kinds of spelt, viz. Speltta, T. dicoccum (rice wheat), and T. monococcum. In its general appearance the more frequent form of spelt differs little from common bearded wheat (T. vul- gar.). It is equally nutritious, and in its habits more hardy. It grows on a coarser soil, and requires less care in its cultivation. There is an awnless variety, which is “perhaps the most naked of all the cerealia” so that, betwixt the smooth sort and the bearded, spelt should not conclude every wheat to be the same. See Tristram, Nat. Hist. of the Bible, p. 476. See Cereals.

Rye, Peter Ke., a minister of the Methodist Episcopal Church, was born in Norway in 1839. It is not known at what time he came to the United States; but in 1858, while a resident of Hart Prairie, Wis., he was converted; he prosecuted his studies at the Garrett Biblical Institute, and in 1861 was licensed to preach. In 1862 he was admitted on trial into the Rock River Conference, and at the close of the year was transferred to the Wisconsin Conference. In 1864 he was transferred back to the Rock River Conference and made superintendent of the Scandinavian Mission, with his headquarters at Copenhagen, Denmark. He returned to America in 1869, and continued to work until a few weeks before his death, May 16, 1873. See Minutes of Annual Conferences, 1875, p. 101.

Rykajoth, in the mythology of the ancient Prus- sians, was a place in which inferior deities were worshiped, always located under the shade of oak, lime, or elder trees. The superior gods were worshiped in similar places at Romowa (q.v.).

Ryland, William, a minister of the Methodist Episcopal Church, was born in the north of Ireland in 1770. He came to the United States at the age of eighteen, and settled in Harford County, Md. He afterwards removed to Baltimore and engaged in mercantile pursuits, but in 1802 was admitted on trial in the Baltimore Conference. His ministry comprised a period of forty-four years, the first nine of which were spent on circuits, the next eighteen in cities, and the remaining seventeen as a chaplain in the United States navy. He was five times elected chaplain of the United States Senate, was called to prepare the General Jackson, and commanded general respect on account of his integrity, his intellectual powers, and pulpit abilities. He died Jan. 10, 1846. See Sprague, Annals of the Amer. Pulpit, vii, 392.

Ryora, Alfred, a Presbyterian minister, was born on Long Island, N. Y., in 1812. He acquired his academic education under the direction of the venerable Dr. Steel, of Port Jefferson, N. Y. He graduated at Jefferson College, Canonsburg, Pa., in 1835; spent one year as tutor in Lafayette College, Easton; and in 1836 was elected professor of mathematics in the Ohio University at Athens. He was licensed to preach in 1838; retained his professorship in the Ohio University until 1844, when he was elected professor of mathematics in the Indiana University at Bloomington, where he remained until 1848, in which year he was recalled to the Ohio University and elected president. He held this office until 1853, when he left for the Indiana University; became a stated supply of the Church at Madison until, in 1854, he was elected professor of mathematics of Centre College at Danville, Ky. He died May 8, 1882. Mr. Ryora was an excellent writer, and eminently distinguished for his attainments as a professor. See Wil- son, Preb. Hist. Almanac, 1860, p. 77. (J. L. S.)

Rysdyck, Isaac, a (Dutch) Reformed minister, was born in Holland in 1720, and was educated at the Uni- versity of Groningen. After laboring for ten or fifteen years as a pastor in his native land, he accepted a call to the churches of Poughkeepsie, Fishkill, Hopewell, and New Hackensack, N. J., which made up one charge, and was installed in September, 1765. The strife between the Cetus and the Conference was running high, and the parties were bitterly divided when he arrived. He sided with the Conferentie, but was moderate in spirit and action, and in 1771 was prominent in the conven- tion which settled this sad conflict, and president of the convention of 1772, which formed the "Articles of
Sa. Manoel de, a Portuguese theologian, was born in 1530 at Villa do Conde. At the age of fifteen he joined the Order of Jesus, and became instructor in philosophy, first in the University of Coimbra, and afterwards at Gaudia. Being called to Rome in 1557, he spent his time in teaching, preaching, and editing a new version of the Bible, which appeared during the pontificate of Sixtus V. He also founded many religious houses in Upper Italy. After residing for a time in Genoa, he returned to the convent at Arezzo where he died, Dec. 30, 1596. Of his works, we have:

Aphorismi Confessorum (1595); Scholia in IV Evangeti (1596); Notationes in Totum S. Scripturam (1598).

Saadah, a sect in Hindistan which have rejected Hindu idolatry, substituting for it a species of deism. They are found chiefly at Delhi, Agra, Jyejore, and Farnam. Their name is Parsee. The sect originated in A.D. 1658, with a person named Birbhum. They have no temples, but assemble at stated periods, more especially every full moon, in private houses, or in adjoining courts set apart for this purpose. They wear white garments, use no pigments, nor sectarian marks upon their forehead, and have no chaplets or rosaries or jewels.

Saadah(a), Hag-Gaon (מגון, the majesty), ben-Joseph Ha-Pithouna, Ha-Mizri, called in Arabic Saad the Logician, a learned rabbi, was born at Fayyum, in Upper Egypt, A.D. 892. His contemporary was the Arabian historian Masudi. Saadah enjoyed the tuition of an eminent Karaite teacher, Solomon ben-Jerucham, an advantage that gave him an enlargement of mind beyond many of his colleagues in the Babylonian schools, though he never embraced the Karaite doctrines, but contended for the necessity of oral tradition. Saadah was distinguished alike as philosopher, Talmudist, theologian, orator, grammarians, and commentator, and, when little more than twenty-two (915), he published his first production, written in Arabic, entitled "A Refutation of Anan," or Kitab ʿar-rad ḫa Anan. This work has not as yet been found, but from Jerucham's rejoinder to it we learn that the import of it was to refute Anan's doctrines, and to show the necessity of the traditional explanation of the Scriptures as contained in the Rabbinc writings. "He urged in support of tradition that the simple words of the T. Genon, he returned to the convent at Arezzo, 186 Union" between these parties. In 1772 the Poughkeepsie Church separated peacefully from its collegiate relations, and Mr. Rysdyck retained the sole charge of the others until 1778, when the Rev. Isaac Bavelvilt was elected his colleague. The aged pastor died in 1789, and was buried beneath the pulpit of his old church in New Hackensack. Mr. Rysdyck was a stately specimen of the gentleman of the olden time—tall, venerable, precise in antique dress and address; punctilious, polite, and commanding universal respect and reverence. His dark complexion indicated Spanish blood in his Dutch veins. He usually rode on horseback when making parochial visits, and wore a cocked hat, white flowing wig, and the customary clerical dress; and when passing any one on the road, would always lift his hat and give a friendly greeting. Before the Revolutionary War he taught a classical school at Fishkill, and among his pupils was Alexander Hamilton. In 1819 he left New York for Boston, and was elected pastor of the church in West Newton. He was regarded as the most learned theologian and classical scholar in the Dutch Church. He wrote in Greek and Latin, and was as much at home in Hebrew as in his native tongue. His sermons were textual, analytical, and drawn directly out of the Scriptures. He also exploited learning with learning and affectionate faithfulness. In the most accurate commentaries of the Church he was always known as a peace-maker. For a long time he was the only minister in Dutchess County. He left no production in print. (W. J. R. T.)
and again, with important corrections, by Geiger in his Wissenschaftliche Zeitschrift (Leips. 1844), v. 317-324. All these works Saadia wrote before he was thirty-six years of age, i.e. between A.D. 915 and 928. So great was the reputation which these works secured for him that he was called to the Babylonian Academy, where he was appointed gaon of the academy, a dignity which he had never before been conferred upon any but the sages of Babylon, who were selected from the learned teachers of their own academies. After occupying this high position a little more than two years (928-930), he was deposed through the jealousy of others and his own unfitness for the position. In the presence of these accidents, he retired to his native Basra, where he lived nearly three years more (930-933), when he had to relinquish his dignity altogether. In Bagdad, where he now resided as a private individual from 933 to 937, he wrote against the celebrated Masoort Aaron ben-Asher, as well as those two philosophical works, viz., the commentary on the Book of Genesis, and the treatise commonly entitled רומא תרומא הרומא, Finitum et Breviâ, which were the foundation of the first system of Jewish philosophical thought. This treatise is of special interest, because it is the first work which is intended to demonstrate the reasonableness of the articles of the Jewish faith, and the unphilosophical of the dogmas and philosophemes opposed to them, consists of ten sections, and discusses the following subjects: 1. the creation of the world and all things therein; 2. the unity of the creator; 3. law and revelation; 4. sense and dissensibilities, divine justice and freedom; 5. merit and demerit; 6. the soul and immortality; 7. the resurrection; 8. the redemption; 9. reward and punishment; 10. the moral law. The original of this work, entitled יאכז לבר מצה יאכז, and written in Arabic, has not as yet been published. It is in Ibn-Tibbon's Hebrew translation of it, made in 1186, under the title ויתאכז ויתאכז ויתאכז, and published in Constantinople (1662), Amsterdam (1648), Berlin (1789), in Fürst's German translation (Leipsic, 1845), and in Ph. Bloch's translation in the Jüdisches Literaturblatt (Magdeburg, 1878), which shows that this treatise is accessible to scholars. Saadia also wrote an Agenda, containing prayers and hymns, which was published by Fürst. In 937 Saadia was reinstalled in his office as gaon of Sura, and died five years afterwards, in 942. See Rapaport, Biography of Saadia in Bikkure Ha-Ittim (Vienna, 1828), p. 110; Geiger, Wissenschaftliche Zeitschrift (Frankf.-v.-Main, 1855), ii. 182; Bibl. Leipsic. 1844, p. 46; Bibl. Judaica 1868, p. 309; 1872, p. 462; 1873, p. 295; Munk, Vorschläge zur Geschichte des Judentums, p. 85 sq.; Jowolowicz, Geschichte der Juden in Königsberg (Posen, 1867), p. 130 sq.; Ben Chayyim (1864), p. 749 sq. (B.P.)

Saba or Sabas (Saba), the name of several saints of the Roman Catholic Church. See also SABAÏA.

1. A Gothic soldier who was martyred at Rome with 170 other persons under the emperor Aurelian (Martyr., Rom. April 24; Tillemont, Mémoires, iv. 383).

2. Another Goth and martyr who suffered many cruel torments in the persecution under Decius, in the reign of the Galla, and was finally drowned in the river Tiber in Rome.

His relics, together with a letter from the Gothic to the Cappadocian Church (which is preserved among the epistles of St. Basil), were sent to Cappadocia by the Roman governor on the Scythian border (Basil., Ep. 155, 164, 163; Martyr. Rom. and Acta SS. April 12; Stolberg, xii. 209).

3. A hermit of Mount Sinai who, according to a statement by the hermit Ammonius (Combes, Acta SS.; Eust., etc. [Paris, 1660], was mortally wounded in a surprise by the Saracens towards the close of the 4th century (Tillemont, Mémoires, vii. 575).

4. The name of a priest who is said to have given his name to the diocese of Thedoret, (Vit. Patr., c. ii, equivalent to πανομοί), was conferred upon the hermit Julian of Edessa by the Mesopotamians. Julian was an account of the leading hermits by Jerome and Chrysostom. He spent forty years of his life (about A.D. 350-370) in a narrow and damp cave in the desert of Orose, practicing the utmost austerity, performing miracles chiefly works of healing and exorcisms, descriptions of which are given by Theodoret—and instructing a band of nearly 100 pupils. The death of Julian the Apostle was revealed to this saint at the moment when that emperor fell in battle (A.D. 393), though twenty days' journey separated him from the scene of conflict (Theodoret, H. E. iii. 24). In
the reign of Valens the Arians of Antioch claimed that this hermit, whose fame extended over the entire East, belonged to their party; but Saba, in response to the request of the Catholics, forsook his solitude for the first time in forty years, and appeared at Antioch to contradict the Arian boast, his journey to that place and back being signalized by the performance of numerous miracles. The recollection of this visit was still fresh when Chrysostom preached at Antioch. Sabas died in his cave, an old man. His festival is observed by the Greeks on Oct. 18 and 28, and by the Latins on Jan. 14 (Acta S. S. Jan. 14; Tillemont, Mémoires, vii, 581; Stolberg, xii, 198).

5. The most noted saint of this name appeared at the beginning of the 6th century in connection with the Monophysite controversy. He was born about A.D. 439 at Mutaianas, in Cappadocia, of good family. At first a monk under the rule of St. Basil, he became a hermit in Palestine before completing the eighteenth year of his age, and was received into favor as a pupil by the hermit Euthymius, to whose prayers he owed the preservation of his life at a subsequent day, when he was dying of thirst in the desert (Stolberg, xvii, 168). He was made a priest in A.D. 484, and placed over all the hermits in the neighborhood of Jerusalem, eventually filling his station with great success, though at first the strictness of his rule gave much dissatisfaction and caused his withdrawal to a distant solitude. At the time of the Monophysite controversy, the patriarch Elias of Jerusalem sent him with other hermits to Constantinople with a view to dispose the emperor Anastasius more favorably towards the Catholic cause, but his mission failed to produce lasting results. Elias having been superseded in the patriarchate by John, who belonged to the party of Severus (q. v.), Sabas and others induced the new primate to renounce his views and acknowledge the Council of Chalcedon. The emperor endeavored to reclaim John, but was met with a spirit of defiant opposition, which found further expression in the pronouncing of a solemn anathema upon Nestorius, Eutyches, Severus, and all other opponents of the Council of Chalcedon. The revolt of Vitalian in the meantime diverted attention from the insubordinate monks, and in 518 the emperor Anastasius died. Sabas afterwards performed a second journey to Constantinople, a year before he died, for the purpose of obtaining a reduction of the oppressive imposts exacted from the population of Palestine, and also to counteract the influence of Origenism, which began to make itself felt among the monks under his direction. He was received with great pomp, the emperor Justinian sending Epiphanius, the patriarch, and a number of bishops and courtiers in the imperial galleys to meet him, and on his arrival prostrating himself before the aged hermit to receive his blessing. The petition in behalf of Palestine was granted, and a large sum of money was offered to Sabas for the use of his convent; but this Sabas declined to receive, and asked that it be appropriated to other useful purposes in Palestine. Nothing, however, was done against Origenism while Sabas lived. See ORIGENISTIC CONTROVERSY. A joyful welcome awaited him on his return to Palestine, after which he retired to his keraun, and died Dec. 5, A.D. 531 or 532. There is a Greek liturgy entitled Termeia, etc. (printed at Venice, 1603, 1613, 1643, fol.), attributed to St. Sabas, but of unknown authorship. See Cyrilli Vita S. Sabææ in Coutelerii, Monum. Eccl. Gr., iii, and Latin in Surius, Dec. 5; Tillemont, Mémoires, xvi, 701 sq.

SABA (81), MONASTERY OF, now called Deir Mar Saba, still exists on the brink of Wady Nâr, the extension of the valley of the Kidron, near the Dead Sea. The surrounding scenery is of the wildest and most romantic character. See KIDRON. The convent hangs on the precipitous side of the ravine, being partly excavated out of the rock, and surrounded by a strong wall, accessible only on one side. The edifices within are extensive and commodious, being occupied by about sixty monks of the Greek rite, who are said to be quite rich. The original cell of the founder is shown, said to have been a cave occupied by a lion, which voluntarily relinquished it to the saint. The convent was plundered by the Persians in 556, and forty-four of the monks were then massacred; but it has survived all the vicissitudes of the Holy Land, of which it is one of the earliest monastic relics. No women are ever admitted within its portals, although the monks are hospitable to male visitors, provided they are furnished with the proper credentials. For a full description, see Robinson, Researches, i, 382, 391; Thomson, Land and Book, ii, 435; Porter, Handbook for Pilgrims, p. 229.

Sabachthani [many sabachth'asni] (ṣabṣayšā'avi, a Gersised form of the Chaldee shebak'ta'ni, thou hast left me), quoted by our Lord upon the cross.

Convent of Mar Saba (from a photograph by the Editor).
SABÆAN. As much confusion has been introduced by the variety of meanings which the name Sabaean has been made to bear, it may be proper to specify in this place their distinctive derivations and use. In our Authorized Version of Scripture the term seems to be applied to three different tribes.

1. The Sabuain (םבויא), with a sâmech, the descendants of Saba or Sabba, son of Cush, who ultimately settled in Ethiopia. See SHEBA.

2. The Shebaim (םביה), with a shin, the descendants of Sheba, son of Joktan, the Sabaei of the Greeks and Romans, who settled in Arabia Felix. They are the "Shebaeans" of Joel iii, 8, to whom the Jews were to sell the captives of Tyre. The unpublished Arabic Version, quoted by Pococke, has "the people of Yemen." Hence they are called "a people taken off" by the verb designation given in Jer. vi, 20 to Sheba, as the country of frankincense and the rich aromatic reed, and also by our Lord in Matt. xxi, 42, who says the queen of Sheba, or "the south," came to τον πατριοσ της γης, "from the earth's extremities." See SHEBA.

3. Another tribe of Sheba (Heb. sheba'a, שֶבַע, also with a shin), a horde of Bedawin marauders in the days of Job (9, 10); for whether we place the Wadi Uz in Idumaea or in Arabia Felix, it is by no means likely that the Arabs of the south would extend their excursions so far away. We must therefore look for this tribe in Desert Arabia; and it is singular enough that, besides the Sela of Cush and the Shobak of Joktan, there is another Sheba, son of Jokshan, and grandson of Abraham, by Keturah (Gen. xxvii, 2), who have been given the name of the wilderness," as were their kinsmen of Midian, Ephah, and Dedan. To them, however, the above-cited passage in the prophecy of Joel could not apply, because in respect (neither to the lands of Judah nor of Uz could they be correctly described as a people "afar off." As for the Sabuies of Ezek. xxvii, 42 (which our version also renders as Sabeans), while the Keri has שֶבַע, the Kethib has שׁבָע, שׁבָע, שֶבַע, שׁבָע, the last, i. e. of heaven (see an excursion by Gesenius in his translation of Isaiah, On the Astral Worship of the Chaldeans, and Sabaot). In the New Testament, the name of Saba, or Sabinus, has also been given to a sect in the East, the Mandarites, or, as they are commonly but incorrectly called, the "Christians" of St. John; for they deny the Messiahship of Christ, and pay superstitious worship to the Baptist. They are mentioned in the Koran under the name of Sabaana, and it is probable that the Arabs confounded them with the ancient Sabians above mentioned. Norberg, however, says that they themselves derive their own name from that which they give to the Baptist; and hence their name is Arabic, and should be transliterated as Saba, and also as Sabana. They are represented in the Koran as being a sect of Christians, and as having been converted to Islam by the Prophet; and it is related that they were under his directness and guardianship; but when employed with the view of heightening the idea of God's greatness and majesty, as the term 'hosts' is in the phrases in question, the hosts can only be those of the angelic or heavenly world (see Gesenius, Thesaur. s. v.) See HOST.

SABatism. See SABRAN.

Sabæan, classical סָבָאִי, a lien
bel, according to 1 Esdr. v. 34; but the Heb. lists (Ezra ii. 57; Neh. vii. 59) have no corresponding name. 2. The Jewish month Shemah (q. v.) (1 Mac. xvi. 14).

Sabate'as (Σαβαταές τ. Σαβαταίας και Σαβαήας), a Grecized form (1 Esdr. ix. 48) of the Heb. name (Neh. vii. 7) Shabbethai (q. v.).

Sabatnik, a sect of Russian Sabbatarians, or "Sabbath-bonhurers," which arose in Novgorod (cfr. A.D. 1470), where some clergy and laymen were persuaded by a Jew of Kiev, named Zacharias, into a belief that the Mosaic dispensation alone was of divine origin. They accepted the Old Testament only, of which, being acquainted with Hebrew, they used the Slavonic translation. Like the Jews, they were led to expect the advent of an earthly Messiah. Some of them denied the Resurrection; and, being accused of practicing several cabalistic arts, for which points of Jewish ceremonial may have been mistaken, were regarded by the common people as soothsayers and sorcerers. They gradually becoming a powerful sect, one of their number, named Zosima, having even been elected archbishop of Moscow, when in A.D. 1490 they were condemned by a synod, and a fierce persecution nearly obliterated them. But here and there, in remote parts of Russia, travelers have within the last century discovered fragmentary communities holding Jewish views, which have been thought to be relics of the older sect of Sabatnik. In Irkutsk they were mingled with impurities.—Gardner, Faiths of the World, s. v. See also Vollmer, Wörterbuch der Mythol. s. v.

Sab'a. See SABA.

Sab'ba (Σαββαίος, v. r. Σαββαγός), a corruptly Grecized form (1 Esdr. ix. 28) of the Heb. name (Ezra x. 27) ZABAD (q. v.).

Sabaszius, a deity worshipped by the ancient Phrygians, alleged to have sprung from Rhea or Cybele. In later times he was identified both with Dionysus and Zeus. The worship of Sabaszius was introduced into Greece, and his festivals, called Sabaziani, were mingled with impurities.—Gardner, Faiths of the World, s. v. See also Vollmer, Wörterbuch der Mythol. s. v.

Sabbath. See SABA.

Sabb'as (Σαββασ, Vulg. Saba), a corrupt form (1 Esdr. v. 65) of the Heb. name (Ezra viii. 35) SABAI (q. v.).

Sabbas, St. (Prince Rascheo), a mediæval ecclesiastic, was born during the latter part of the 12th century. He was the son of Stephen Nemanja, founder of the kingdom of Servia. Contrary to the wishes of his father, Rascheo embraced the monastic life, and, though young, was soon made abbot. He prevailed upon the patriarch of Constantinople to create a Servian archbishop, and was himself the first to enjoy the position. He made an extended tour through Egypt and the Holy Land, and, on his return, died at Trava, in Bulgaria, Jan. 14, 1287. His remains were placed in the monastery at Milechivo, but were buried in 1555 by the order of Skian Pasha. The 14th of January is kept in memory of this saint.

Sabbatarian, those who keep the seventh day as the Sabbath. They are to be found principally, if not wholly, among the Baptists. They object to the reasons which are generally alleged for keeping the first day, and assert that the change from the seventh to the first was effected by Constantine on his conversion to Christianity. The three following propositions contain a summary of their principles as to this article of the Sabbath, by which they are distinguished: 1. That God has required that the seventh, or last, day of every week be observed by mankind universally for the weekly Sabbath. 2. That this command of God is perpetually binding on man till time shall be no more. 3. That this sacred rest of the seventh-day Sabbath is not (by divine authority) changed from the seventh and last to the first day of the week, or that the Scripture nowhere requires the observance of any other day for this purpose than the seventh day only. They hold, in common with other Christians, the distinguishing doctrines of Christianity. See Evans, Sketches of the Denominations of the Christian World. See Baptists, Seventh-day.

Sabbathi, a name applied sometimes to the Waldenses (q. v.), from the circumstance that their teachers were mean or foolish men, which in French are called sabots.

Sabbath, Jewish. The word Sabbath is, in Hebrew, שבת (Shabath) (comp. Ezrah, Afsafuhr, Lehrb. p. 400; and see on the form shabbathon, in the end of this art.); in the Grecian form σαββατον, or, in the plural form, τα σαββατα (comp. Horae, Sat. 1, 9, 69). The derivation and meaning of the word are well known. Josephus (Apol. ii. 34) uses it as a rest from all labor, άναπαυσιν απο παντος γεωργου (comp. Ant. i, 1, 1). Mistaken etymologies, by those ignorant of Hebrew, are found in Josephus, Apion, loc. cit.; Plut. Symp, iv. 6, 2; Lactantius, Instit. vii. 14. On Sabbath (Gr. Σαββατον) in the sense of week, see Week. But it is clear that they (μηδ άναπαυσιν απο παντος γεωργου) means the Sabbath (comp. Josephus, War, ii. 8, 9).

This was the seventh day of the Hebrew week, extending from sunset on Friday to sunset on Saturday (comp. Lev. xxvii. 32, and see Lightfoot, Hor. Hebr. p. 312 sq.). See Day. The time during which the sun was going down was the eve of the Sabbath. See Friday.

Of course, the commencement of the week was fixed by the Jews as that on which the Sabbath varied with the higher or lower position of the observer. Thus, Carpzov quotes from the book Musar this statement: "Tiberias lay in a valley, where the sun disappeared half an hour before setting; Zephora was on a mountain, where the sun shone longer than on the plains. The people in the former, therefore, began their Sabbath sooner, in the latter later, than the rest of the nation." By a law of Augustus (Josephus, Ant. xvi. 6, 2), the Sabbath began at the ninth hour. According to the disciples of the Gemara, the Sabbath began and ended in all Jewish cities at the sound of the trumpet (comp. Maimon, Pitkoth, 5. 10; Babl. s. v.). Later records this as Wur, iv. 3, 12). In the Temple, the trumpet was to be blown from the "covert for the Sabbath," or Sabbath-roof; Heb. Mea'dik hash-shabbath, מיקדש שבת (2 Kings xv. 18). See Rhenford, Opera Philol. p. 770 sq.

This day was celebrated by the Hebrews as a holy day (Deut. v. 12), a day of rest and rejoicing (Isa. liviii. 18, comp. Hos. ii. 11; 1 Mac. i, 41); by ceasing from all labor, with their servants and all strangers, as well as at cattle (Exod. xx. 10; xxxi. 13 sq.; xxiv. 1; Deut. v. 14, 17; Jer. xxiv. 12; Josephus, Apion, ii. 39; Dion Cass. xxviii. 17. [Philo, Opp. i. 137, extends the Sabbath-rest even to plants—they were not to be eaten or reaped on that day]), and by a special burnt-offering presented in the Temple, in addition to the usual daily offering (q. v.)—which was doubled on that day—consisting of two yearling lambs, with the meat-offerings and drink-offerings belonging to it (Num. xxxiii. 9; comp. 2 Chron. xxxi. 3; Neh. xiii. 3; Ezek. xi. 4). In the holy place of the Temple, the shewbread was renewed (Lev. xxiv. 8; 1 Chron. ix. 32), and the new division of priests appointed for that week took their places (2 Kings xi. 5, 7, 9; 2 Chron. xxiii. 4). The services of the priests and Levites in and about the tabernacle and Temple were not accounted labor (comp. Matt. xii. 5), and continued through the Sabbath. Circumcision, too, as a religious ceremony, took place on the Sabbath, when that was the eighth day.
Debateable profession of this day was punished with death (Exod. xxxi, 14 sq.; xxxii, 3), which was inflic-
ted by stoning (Num. xv, 32 sq.; Mishna, Sanhedri, vii, 8). But if the law of the Sabbath was broken through ignorance or mistake, a sin-offering was required, and the offender pardoned (comp. Shab, vii, 1; xi, 6; Chri-
thuth, 10). There were times, too, when the Jews were dispen-
sed with the extreme severity of their law (Isa. lvi, 2; lviii, 13; Ezek. xx, 16; xlix, 8; Lam. ii, 6; Neh., xxii, 16); and the legal observance of the Sabbath seems never to have been rigorously enforced until after the Exile. At this time, too, the meaning of the work which the Sabbath was to prohibit was defended, since the lawgiver had left this to be determined by experience, and, in certain doubtful cases, the individu-
als conscience, definitely prohibiting but one act—the kindling of a fire in one’s house (Exod. xxxv, 3); comp. Eichhorn, Repert, ix, 32; xiii, 258) for cooking (Exod. xxvi, 29; Numb. xv, 32; comp. Mishna, Terum, ii, 3). This was interpreted by the Jews, however, to include the lighting of lamps, and they used this to do before the Sabbath began (Mishna, Shab, ii, 7; xvi, 8; comp. Seneca, Ep. 95, p. 423, Bip.). This prohibition compelled the Jews to cook and bake their food for the Sabbath on the Saturday, and to keep warm in vessels set in dry hay or chips (Mishna, Shab, iv 1 sq.; comp. also Josephus, War, ii, 8, 9, on the Es-
zenes). The intermission of labor was required on feast-days as well as on the Sabbath, except the prepa-
ration of food (comp. Exod. xii, 10; see also Tosef., Yom Tob, v, 2; Megilla, i, 5). A later age, which sought to observe painfully the letter of the law, and to confine as little as possible to the judgment and conscience of individuals, extended the meaning of this work much further, and strove to complete a formal code for Sab-
both observance. Marketing and public trade ceased on the Sabbath (Josephus, Ant. xiii, 8, 10; and it was merely an auxiliary police regulation of Neba-
miah to close the gates on that day (Neh. xiii, 19). It was in the spirit of the law, too, that travelling on the Sabbath was forbidden, with reference to Exod. xvi, 29 (comp. Josephus, Ant. xiii, 8, 4). See SABBATH-DAy’s JOYNEY. But the conduct of the Jewish armies in refusing to arm on the Sabbath, and suffering their en-
emies to cut them down, certainlyavored of fanaticism (1 Macc. ii, 32 sq.; 2 Macc. vii, 11, Josephus, Ant. xii, 6, 2; War, ii, 17, 10, Life, p. 32; comp. Plutarch, Superit. p. 325). A parallel may be found in the Jewish steersmen who left the helm at the moment of a squall becausethey did not wish to act on the Sabbath (Josephus, Ant. xii, 163, ed Petavy). Yet the apprehension of the great advantage which would assure to the enemy led prudent commanders to observe this rest from fighting only so far as to abstain on the Sabbath from offensive operations (1 Macc. xii, 34, 43 sq.; Josephus, Ant. xiii, i, 3, xiv, 4, 2 sq.). Marching armies halted on that day (Josephus, Ant. xiii, 8, 4; comp. xiv, 10, 12). The last passage seems to show that the Sabbath law was made a pretext by Jews to escape from foreign military service when they wished (see again Ant. xviii, 3, 2; 10, 2; War, iv, 2, 3; Michaelis, Mos. Beisch, iv, 133 sq.). Yet in the last Jewish war less caution was exercised, even in abstaining from offensive movement (Josephus, War, ii, 19, 2); and many an artifice was carried on by the aid of the Sabbath and its observances (ibid. iv, 2, 3). In this instance, it was less the fear of breaking the law than a shrewd calculation of advantage which prevented the Jews from engaging the enemy. The Pharisees gave very minute directions on the observance of the Sabbath; and although different teachers differed in many points, yet in the New-Testa-
ment period we find great rigor prevailing. The plucking of single ears of grain in passing (Matt. xii, 2; Mark ii, 25 sq.; Luke xx, 1 sq.), the bringing of the sick (Matt. xii, 10; Mark iii, 2; Luke vi, 7; xiii, 14; John ix, 14, 18; Thilo, Apocur. p. 508) the walking of a cured patient with his bent back, all were con-
sidered as desecrations of the Sabbath by the Pharise-
ese and their disciples; although when property was in danger, many acts which were certainly work were freely performed in cause of pressing need (Matt. xii, 11; Luke xiv, 5; comp. Gemara, Shab, xxviii, 1); yet even in the care of cattle (comp. Luke xiii, 15) all work was to be shunned which was not really neces-
sary (Shab. xxiv, 2 sq.). The Essenes seem to have been yet stricter in observing this day. The Mish-
a (Shab, c. 17) has severe regulations against the re-
moval of goods; yet certain exceptions were allowed (comp. Philo, Opp. ii, 560). On the severity of the Sa-
martan law, see the discussion of the Talmud, Ger. p. 85 sq.; comp. Origen, Princip. iv, 17; tom. i, p. 176). They refrained from sexual intercourse on the night of the Sabbath (Eichhorn, Repert, xiii, 258). The Mish-
a, in the tract Shab (21st part), which treats the whole subject of this article, names in particular (vii, 2) thir-
ty-nine forms of labor which are forbidden on the Sab-
both, each of which has, again, its variations and spe-
cies. In the twofold Gemara to this tract (the Tosaphi-
ta to the tract Shab) is found in Hebrew and Latin in Ugozini Theaur, xvii; the tract itself has been sepa-
redly edited by J. B. Carpzov, Leipsi, 1861); and in the Babylonian rabbinical writings the matter is far more

Digitized by Google
that no court was held on that day, nor even was a session begun the afternoon preceding, lest it might encroach upon the Sabbath (Mishnah, Shabb, i, 2; comp. Gemara, Sanhed. fol. 55, 1; nor can the force of these passages be removed by Gemara, Sanhed. fol. 88, 1, even though it referred to this subject). See Councl. It is remarkable that the times of the Jews themselves made an effort in Syria to do away with the observance of the Sabbath (Josephus, War, vii, 3, 3). This effort was aided, perhaps, by the view which the Romans took of this weekly rest, often mocking the Jews as slothful (Juvenal, xiv, 105 sqq.; Seneca, in August. Civ. Dei, vi, 11). The origin of the Sabbath is usually referred to Moses by the German critics (Ewald, Gesch. Isr. ii, 132 sqq.) on the ground that Gen. ii, 1 cannot be accepted as a testimony to its earlier institution, since this whole account of the creation, whose date and author are unknown, is plainly designed for the very purpose of presenting the Sabbath to us as an immediate divine ordinance (see Gabler, Neuer Vers. über die mos. Schöpfungsgesch. p. 38 sqq.; De Wette, Krit. p. 40 sqq.), just as it is often set forth in later writings in connection with the exode and with the legislation of Sinai (Ezek. xx. 11 sqq.; Neh. ix. 15 sqq.; comp. Deut. v, 14 sqq., with which Ezek. xvi 14 is parallel). Reggio, by a peculiar explanation of Gen. ii, 1, arrived at a date for the Sabbath, i.e., 1749, arrived at a date for the Sabbath appointed here for all mankind and that given to the Jews in their law (Zeitschrift für d. Judenth. 1848, p. 102 sqq., 121 sqq.). The Sabbath is considered as a Mosaic institution also by Eusebius (H. E. I, 1, 4, 3; Prep. Ec. vii, 6) and most of the rabbins (Selden, Jus Nat. et Gen., iii, 10). Among the more recent writers, this view is adopted by Spencer (Leg. Rit. i, 4, 9 sqq.); Eichhorn (Urgesch. i, 249 sqq.); Gabler (ibid. p. 38 sqq.; Neuer Versuch, p. 38 sqq.); Bauer (Gottglaubenswiss. Verfass., ii, 174 sqq., in answer to Hebelstein, De Sab. ante Leg. Mos. Existente [Lips. 1748]); Iken (Disert. Theol. p. 28 sqq.); Richter (in the Bibl. Brez. Nova, iii, 810 sqq.); Michaelis (Mos. Recht, iv, 110 sqq.). See Sabbath, Christian.

The question may be raised whether the Sabbath was not borrowed by Moses from some other ancient people, as the Egyptians. It is not necessary to discuss the unhistorical suppositions of Philo (ii, 137) and Josephus (Apion, ii, 39) that this feast was very widely spread among ancient nations. Yet it appears from Seneca (Ep. 95, p. 428, Bp.) and Ovid (Remed. Amor. p. 219) that a reverence for the seventh day had found an entrance among the Romans (comp. Idler, Chron. ii, 176). Various strange opinions as to the origin of the Sabbath are given by various people of the modern age (Phutarch, Sympos. iv, 6, 2), (On the pretended Jewish worship of Saturn, see Buttmann, Mythol. ii, 44 sqq.). It is certain that the Egyptians knew the reckoning by weeks, and even began each successive week with the day of Chrones (Dion Cass. xxxvii, 18, 19). Baur, following Tacitus (Hist. v, 6), has connected the Sabbath with the worship of Chronos-Saturn, to whom the Romans also dedicated particularly the seventh day of the week (Tübinger Zeitachr. für Theol. 1892, iii, 145 sqq.; comp. Movers, Phöniz. p. 315); hence the Roman historians compared the Jewish Sabbath with the day of Saturn (Dion Cass. xxxvii, 17, 18; Thol. i, 8, 173). His view rests on the well-known representation of the Jews, Greeks and Romans of the golden age long gone by, the age of rest and equality, under Saturn, and the custom connected with it of giving the slaves a holiday at the Saturnalia (see Syr. De Sabbato Gentili in Temp. Hebr. ii, 537 sqq.; and in Ugolino Theaur. vol. xvii, comment. on Wisd. iii, 26; and in Diod. u. Ces. de Genio Camiolo [Vita 1729]). But this theory is so finespun that it falls to pieces at the first touch, for the passage in Dion Cassius does not do anything towards proving a naming of the days of the week after the planets (see Idler, Chronol. i, 180). And the Western representations of Saturn cannot so much as be transferred to the East in that,

even among the Romans, the day of Saturn was counted an unlucky one. Astrologically, too, the day of Saturn is the first, not the seventh, of the week. But, apart from all this, it was more natural for an agricultural people to keep as a festival the last day of the week, after men and beasts had become weary with toil, in need of rest, and when they themselves saw the fruits of their labors; or the 7th day, therefore, is generally characterized, particularly with sacrifices. Why should we seek a foreign model for all the Mosaic institutions? Why refer these simple observances to such far-fetched and generally unsatisfactory explanations? (See especially Bahr, Symbol. 1, 584 sqq. In answer to Von Bohlen, Genesis, p. 137, Intro. see Tuch, Genesis, p. 14 sqq.).

The origin of the Sabbath is thus an ancient and solemn institution of the Hebrews, and the observance of the feast-days, was imitated and repeated, as it were, in several other festivals; e.g., the Sabbath Year, the Seventh New Moon, and the Year of Jubilee. On the subject of the whole article, see Carpos, Appar. p. 382 sqq.; Rendel, Ant. Sac. iv, 8; Bauer, op. cit. ii, 152 sqq.; Jahn, iii, 388 sqq.; Gais, Yoel. Din. Sel. iii, 1227 sqq.; Bahr, Symbol. ii, 566 sqq., 577 sqq. A figurative use of the word "Sabbath" denotes a solemn festival on which servile work was proscribed; but this occurs only with respect to the great day of annual atonement (Lev. xxvii, 33). The word properly representing such an abstract idea of rest is יָבֵטֶל, yavitel', yabattan, οἰκοβαστία, oikobastia, subbatism (q. v.). The term "Sabbath," however, is frequently applied to a longer period, the conclusion of that of the seventh year, the Sabbath year (q. v.). The Rabbinic or orthodox Jews likewise claim that in Lev. xxvii, 11-16, יָבֵטֶל, yavitel, is synonymous with יָבֵטֶל, yavitel', Passover, and accordingly they reckon Pentecost from the 16th of Nisan, the second day of unleavened bread, instead of the Sabbath following it. See Calendar, Jewish. In this they are upheld by a majority of Christian archaeologists and interpreters. The Karaites, on the contrary, contend that the word "Sabbath" in that ordinance has its usual and usual signification, namely, the seventh day of the week. The arguments advanced for the traditional view and reckoning, formidable as they at first appear, will be found, on a close examination, to be wholly conclusive. (1) It is a pure assumption that the phrase יָבֵטֶל יָבֵטֶל, yavitel, yavitel, morrow of the Sabbath, is equivalent to יָבֵטֶל יָבֵטֶל, yavitel, yavitel, morrow of the Passover.

The passage in Josh. vi, 11, often appealed to in proof, states that on the latter day the Israelites ate the produce of Canaan (יָבֵטֶל יָבֵטֶל, yavitel, yavitel), A.V. erroneously "old corn of the land." Hence, the unleavened cakes and parched ears of corn which the Israelites had in their possession to which the law in question was specially applicable (Lev. xxviii, 10; comp. Numb. xv, 18). (2) The definite art. in יָבֵטֶל יָבֵטֶל in the ordinance under consideration merely indicates it as the one Sabbath of the Paschal week, and cannot refer to any other of the Passover days in the context, which are not (either there or elsewhere) designated by this term. Nor is the word יָבֵטֶל, yavitel, Sabbath, ever used in Biblical Hebrew in the sense of a literal week, as the Rabbinical theory assumes.

The seven Sabbaths are termed עלון, on, "complete" because they are exclusive of the terminus a
Of equal regard with the Sabbath, as a day of entire rest, was the first Paschal day and the last (Lev. xxiii, 39), while the great day of rest was a Sabbath of Sabbaths (xvi, 31; xxiii, 32). Accordingly, some would understand the words in John xix, 31 (τος μετα- λη ἡ μηρα καινου του σαββατου, rendered in the A.V. "for that Sabbath day was a high day") of the first Paschal day. But a proper weekly Sabbath seems certainly to be new to Jews in honor of the institution of John; e.g. with xxxi, 1. It is called a great or high day because the first Paschal day fell upon it (see Carpzov, App. p. 384; Bleek, Beitr. z. Evangelien-Kritik, p. 31 sq.).

The Sabbath is kept by the modern Jews as a great festival with every demonstration of joy, taking the whole day as a period for religious and moral order from 11 a.m. (the foot from the Sabbath, from doing thy pleasure on my holy day, and call the Sabbath a delight, the holy of the Lord, honorable ... then shalt thou delight thyself in the Lord, and I will cause thee to ride upon the high places of the earth," etc. The Sabbath is held from evening to evening (Lev. xxiii, 32), but they begin it half an hour before sunset on Friday, and prolong it till half an hour after sunset on Saturday, for the benefit of the souls of the damned, who, they believe, are allowed on that day suspension of their sufferings. On Friday afternoon they prepare all the food, etc., that may be wanted, and lay out their best clothes to wear, and wash their face in honor of the Sabbath. The men keep magnificent dresses to be worn on the Sabbath alone. As soon as the Sabbath commences, the mistress of the house lights the Sabbath lamp, which is filled with pure olive-oil, and has from four to seven wicks, and lays on the table the Sabbath bread, shaped like a twisted plait, made of the finest wheat flour, and sprinkled with poppy seeds. They go to the synagogue, and after their devotions wish each other "a good Sabbath." At supper, the master of the house repeats the commemoration of the Sabbath out of Gen. ii, "Thus the heavens were finished," etc.; thanks God for the Sabbath, blesses the wine, and passes it round. They rise later than usual on the Sabbath morning; and at the synagogue they use some additional devotions, with a commemoration of the dead. They think it right to eat at least three meals on the Sabbath, because the word "to-day" relating to the Sabbath is repeated three times in Exod. xvi, 25. So convinced are they that their ·God will never allow his people to use their food without fasting that they sometimes fast the preceding day to enable them to eat the more at the Sabbath meals (Buxtorf, Syn. Jud. c. 15). There is a Jewish maxim, that he is greatly to be commended who honors the Sabbath exceedingly in his body, in his dress, and in eating and drinking. Such are the principal features of the carnal views of the Sabbath from which the early fathers wished to wean the Jewish converts. A full account of the sabbatical ceremonies observed at present by the Jews may be found in Buxtorf's Synagoga Judaica, and in Peciard's Religiosa Ceremoniae.

See, in general, Journal, of Soc. Lit. Oct. 1851. p. 70 sq.; Ball, History of the Passover. (Chronol. Synop. p. 231 sq.) an interpretation intimately connected with his whole system, that it is the first Sabbath in the second year of the seven years, reckoned from one sabbatical year to another; i.e., the first Sabbath of Nisan. Here it is assumed that a technical term, "the first Sabbath of every year in such a series of years; which is the least probable, as the civil year, with which the sabbatical year is connected (comp. Wieseler. p. 204 sq.), began in autumn. Add to this that no mode of reckoning in practical life by Sabbath years has been proved from Josephus (Ant. xiv. 10, 5 and 6), nor from the Mishna. In fine, the efforts of Buxtorf of the Sabbath, and the nature of his work, and that the historian, writing after it was instituted, there gives the reason of its institution: and this is supposed to be the case, as it is never mentioned during the
SABBATH 194 SABBATH

patriarchal age. But against this sentiment it is urged
(a) that it cannot be easily supposed that the inspired
prophet sanctioned the regulation of the seventh
day among the primeval transactions if such
sanctification had not taken place before 2500 years
afterwards; (b) that, considering Adam was restored to
favor through a Mediator, and a religious service insti-
tuted which man was required to observe, in testimony
not only of his dependence on the Creator, but also of
his faith and hope in the promise, it seems reasonable
that an institution so grand and solemn, and so nec-
sessary to the observance of this service, should be then
existing.

Some find the institution of it in the fourth command-
ment (Exod. xx, 8–11); but the language employed is
not such as to give origin to the idea that the
remember the Sabbath seems to imply that the Israel-
ites were already acquainted with its existence and sa-
crness. But such injunctions, we are told, have often
prospective significance, e. g. “Remember this day in
which ye came out from Egypt” (xiii, 3): “Remember
the word which Moses the servant of the Lord com-
manded you” (Josh. i, 18): “Remember now thy Crea-
tor in the days of thy youth” (Eccles. xii, 1). In all
these citations the meaning is—remember from this
time. To this stricture it may be replied that such in-
juctions have always relation to the future, but that
they also suppose antecedent knowledge. Children, for
example, are not told to remember their Creator unless
they had been previously informed about creation
—unless they had been instructed that one God had
made us, and that we are all his offspring. That an
ordinance should be ushered into existence by the require-
ment to remember it is a strange idea to which facts
give no countenance. Besides, the fourth command-
ment assigns a reason for observing the Sabbath, which,
if good for the future, must have been always valid.
We do not here enter into any disquisition about the
days of creation. It is enough that God, in a manner
befitting him, worked six days and rested on the sev-
enth, and has required that, in a manner befitting us,
we shall imitate his example. But how was it to be ex-
pected that this consideration should weigh much with
the Jews in time to come, if, in preceding ages, God
himself had made no account of it in his regulation of
human conduct?

Some, again, have contended that we do not require
to be proselytes to the Jewish Church in order to find its
commencement; they think they learn when and how it began in
Exod, xvi, 19–30: these verses have reference to the gathering
and cooking of manna. That an institution so prominent as
the Sabbath in the religion of the Jews should have been
initiated in a manner so insciential, and almost un-
observat, is in contradiction to the whole genius of the
economy. Nor does the passage countenance any such
notion. “It came to pass,” we are told (ver. 22), “that
on the sixth day they gathered twice as much bread.”
In other words, they gathered on the sixth day enough
for that day and for the following day. But why pro-
vide beforehand for the Sabbath in order to keep its rest, if not in supposed obedience to the will of
God, as previously notified? It is alleged, in reply, that
the order complied with is presented to us afterwards,
and occurs in ver. 23, “This is that which the Lord hath
told, To-morrow is the rest of the holy Sabbath
unto the Lord: bake that which ye will bake to-day,
and prepare that which ye will prepare; and lay up
for you, to be kept until the morning.” By this exegesis the practice (ver. 22) is first related, and
then we come to the injunction (ver. 23), of which
it was the fulfilment! In such inversion of natural or-
der there is obvious unlikelihood. But the exposition
in question is otherwise altogether absurd. The Jews
were not chosen to exhibit first the obedience, and then the statute obeyed, have no such intimacy of connection. They
refer, in fact, to different things. Ver. 23 does not touch
on the collection of the manna at all, but has regard to
the baking of it—a new subject: and therefore the gath-
ering of it on the sixth day in quantity sufficient also
for the seventh, and the laying up for the morrow, with
out any explanation, except a previous appointment
and prevalent knowledge of the sabbatical institution.

It is objected, however, that the Sabbath disappears
from the record during the antediluvian and patriarchal
periods. Why this protracted silence about it if it had
then a place among religious articles and usages? This
evidence of its existence is negative, and cannot outweigh
express contrary proof of its initiation. Of these times,
be it also remarked, we have not detailed accounts, and
we must therefore make allowance for great brevity and
many omissions. Succeeding annals are more ample,
and yet we have no indication of the observance of the
Sabbath in the patriarchal periods. It is not till the
 banquet had been confessedly proclaimed from Mount Sinai.
Even if neglect of the day could be established, such
neglect would not disprove obligation. The Pass-
over, during protracted periods, fell into disuse, and
there was general and continued departure from the
marriage relation as originally constituted.

It is not the case, however, that allusion to the Sab-
batch is wholly wanting during the time alleged.
Occasional mention is made of weeks; and we know that
the heathen world very extensively distributed days
into seven, with some notion of sacredness belonging to
the seventh. This arrangement is traced by some to the
Septuagint. The days of the week are divided into
lunar months, each of seven days, by the phases of the
moon. But this computation does not accord, except proximately, with fact, as the lunar
month exceeds twenty-nine days in duration. It as-
cribes consequence also to the number four, as well as
to the number seven—partitioning the month into four
divisions—and four has no distinctive sacredness in any
known country or language. The explanation, though
ingenious, is simply a guess, without any support from
Scripture or other writings, and has like validity with
another conjecture, that the assignment of seven days
to a week may have been derived from the supposed
number of the planets.

II. That the Sabbath owes its maintenance to its mo-
rality we will endeavor more expressly to substantiate.
Here a consideration of first consequence is that it forms
the subject of the fourth commandment. Some deny
the ethical character of the decalogue. They allege it
to be of a mixed nature, and insist that though par-
ticular prohibitions are of obligation, they are of
worth, yet, as a whole, it belonged to an economy of
shadows, and has vanished with them. Therefore the
presence of any statute in such a compendium is no de-
 cisive evidence of moral force.

1. But the decalogue in its integrity has a very dis-
tinctive place and consequence in the Bible. It was
proclaimed with extraordinary solemnity, peculiar to
itself, from Mount Sinai (Exod. xix, 16–24). God caused
it to be written on tables of stone, and he made these
stones to be deposited in the ark, representative of him-
self. “These words,” says Moses, “the Lord spake to all
your assembly in the mount, out of the midst of the
fire, of the cloud, and of the thick darkness, with a great
voice, and he added no more.” The decalogue was fre-
quently called the covenant, and the chest containing it
the ark of the covenant. Would a fragmentary and het-
erogeneous compound create or warrant any such designa-
tion? Again, as often as Christ cited any of these commandments, he used them as a general rule. The
Jews seem to have distributed them into greater and
less, and to have treated the less as scarcely deserving
consideration. But he impressively declared, “Who-
soever shall break one of these least commandments,
and shall teach men so, he shall be called least in the
kingdom of heaven. But if ye, being altogether clean,
teach them shall be called great in the kingdom of heaven.”
The kingdom of heaven is the Gospel dispensation.
Certain statutes our Lord declares to be congenial with
that economy, and their observance he characterizes as
a sure constituent or guarantee of its greatness. But what statutes could he speak of which verify this description, and are recognisable from others, unless those composing the decalogue? When, also, he resolved the law to be within the moral—within the stable branching off into piety and benevolence? In a word, the decalogue is reproduced by the apostles. What it enjoins they enjoin in the identical terms, or with only verbal alterations; and how could they more decisively affix their seal to its inedible righteousness?

2. The decalogue then, as a whole, is moral. See Law of Moses. If the Sabbath be an exception, it is the only exception. But when we have found it in a code collectively moral—the morality of which is attested by the clearest and most cumulative proof—and when we find it sharing all the conspicuousness and holiness of the other precepts, the second argument indeed to render credible its exceptional ritualism. Let us see whether good cause for so regarding it be discoverable in its own nature, or in prophecy, or in what Christ said of it expressly, or in the apocryphal epistles.

(1.) The Sabbath provides for rest and worship. Our senses being requires the one, and our spiritual being the other. To deny the laboring population any intermission of toil, or the heirs of immortality any time for religious observances, would be to offend against the fundamental conditions of our state of existence. Under these aspects the Sabbath is not arbitrary. It is founded on the necessities of man's natural constitution, and nothing here below can be more solid and stable than its groundwork. To speak of our spiritual responsibilities more especially—if it be a moral duty to worship God, it must also be a moral duty to observe that worship to the best advantage. For this the Sabbath provides. It is advantageous for worship that a certain day be set apart for it, and guarded from intrusive distractions. It is advantageous that the worshipers set apart the same day, both to the end that one may not draw another into temporal toil, and that religion may have the aids of social stimulus. It is advantageous that the worshipers set apart the same day, both to the end that one may not draw another into temporal toil, and that religion may have the aids of social stimulus. It is advantageous that the Sabbath be one of rest, of quiet, that God is desired with understanding the mind, and please that one day in seven is the best possible adjustment—"the most conducive to moral good in our existing circumstances? Experience has recommended no other division of time as preferable; on the contrary, every attempt to elongate or contract the week has utterly failed, and has owed the failure to a man-rested impracticability or mischievously. It follows that not only the duty, but the very timing of the duty, is of moral account, and that the Sabbath is entitled, by its nature, to the place it occupies in the decalogue—filly and justly ranking with statutes which transcend casualties, and will maintain their jurisdiction while the world lasts. On the same principle, if the sacredness of the Sabbath has been enhanced by rendering it commemorative of some great event, such as the natural creation, there may be religious benefit, and therefore moral suitability, in transferring it to another day of the seven, in order to commemorate another event of analogous but superior consequence—such as the accomplishment of a spiritual creation by the resurrection of Christ from the dead. Such a remembrance would be more effectual. Even notwithstanding its necessary regard to times, did not show any rigid adherence to particular days, when a sufficient reason existed for departing from them. Thus, while circumcision was by the law fixed to the eighth day, the great mass of the people who had grown up in the wilderness, knew the expiration on the same day (Deut. v. 10); and when any obstacle prevented men from the eating the Passover on the 14th of the first month, they were allowed to postpone it to the next (Num. ix. 6).

(2.) The prophets, speaking in the name of God, always express themselves in reverential language of the Sabbath. See, in particular, Isa. lvii. 7; cxlvii. 13, 14; also lxvi, 28. It is object that in these and like instances the Sabbath is allied with acknowledged constituents of the Mosaic law, and that such passages would therefore equally prove their permanent. It is in plain accordance, however, with the passage of time, the argument indeed to render credible its exceptional ritualism. Let us see whether good cause for so regarding it be discoverable in its own nature, or in prophecy, or in what Christ said of it expressly, or in the apocryphal epistles. (3.) As regards Christ's express sayings on this subject, he discouraged, no doubt, such a traditional observance of the Sabbath as would have transformed it into a day of heartless neglects and sanctionless rigors. But he counseled it for the keeping of it in its true spirit, a day of personal privilege and benedict usefulness—avowing that "the Sabbath was made for man, and not man for the Sabbath." This seems to teach that the Sabbath was made for men as a Jew or as a Christian, but as man, and therefore entitled to his regard in all conditions and through all ages. In reply, however, it appears that we are to understand by the word 'man' not 'man.' This must mean, it is said, "those for whom it was appointed, without specifying who they were, and not at all designating man in general." We see no grounds for such a paraphrase, but very much to demand its rejection. The article in such expressions defines the individual or the species. No individual man could be thus singled out as having the Sabbath made for him unless it were Adam; and none will assert that it was made for him in any sense exclusive of his posterity. Again, the article may define the species, as we say the horse, the ass, the oxt碲. Where the species is defined, it is usually renounced, and so an allegation is made as would apply to any of them differently. For example, "If the salt have lost its savory, it is good for nothing but to be trodden under the feet of men"—literally "the men," or the species, men without the distinction of Jew and Gentile. "Let your light so shine before men," literally "the men," in the sense of any or all men. "A thing which cometh out of the mouth this defileth a man"—literally "the man," equivalent to man or any man. Practically the distinction here attempted to be made is visionary. Since man without the article is general, and the man, meaning the species man, is also general, the article may be dropped or retained without metaphysical objection. Accordingly, these modes of expression are often used interchangeably. When Christ, then, declares that the Sabbath was made for man, we can only understand him as teaching that it was intended and instituted for
our common humanity, and that it is to be so employed as to conduct to man's highest or spiritual good. But he also said that he was "Lord of the Sabbath;" which shows that he had power to abolish the partially or wholly. It seems as if some cannot think of power in connection with the Sabbath unless it is exercised in abrogation. If it be placed in Christ's charge, they take for granted that more or less extinction must be the consequence. They speak as if Christ's scepter were an axe, and the only question was how much it would bow down and destroy! on the contrary, that Christ would not be the Lord of the Sabbath to its destroyer. In the language of the New Testament, this title points to assured prosperity. But though he will not superintend in order to annihilate either worship or worshippers, the designation "Lord" does suppose a manifested sovereignty, and leads us to expect ameliorating modification with essential preservation—in other words, a Christian Sabbath or Lord's day.

(4.) In the epistles, much stress has been laid by opponents of the Sabbath on some expressions of Paul. "One man esteemeth one day above another: another esteemeth every day alike. Let every man be persuaded in his own mind" (Rom. xiv, 5). To us this language is vague and seems general; but it had relation to specific disputes, and we do not know, because we have not been told, what days are more particularly intended. They may have been festival days of human appointment, or of the Church; or of the Jewish Sabbath—perfectly known, without danger of mistake, to the parties addressed. It is admitted that the apostles had stated religious services with assigned seasons for them; and if in the passage commented on we give his words the absolute and exceptionless sense claimed for them, it will follow that he courted contempt for his own ordering of worship. Assuredly he sanctioned no such sweeping indifference to days as would invalidate the injunction, "Forsake not the assembling of yourselves together, as the manner of some is." It is said (Col. ii, 16), "Let no man therefore judge you in meat or in drink, or in regard of a holyday, or of the new moon, or of the Sabbath days, which are a shadow of things to come, but the body is of Christ." This passage perfectly accords with a superseding of the Sabbath day as distinguished from the Lord's day, embodying substantially all that prior sabbatical observance had shadowed. In the same relation we would use the term "sabbatical." Independent of this, answers to the objection, many have held, with bishop Horsley, that the word Sabbath is not here used in its strict acceptance, but with reference to other days observed by the Jewish Church with Sabbath-like solemnity. Even if these passages had more difficulty than they present, two or three doubtful expressions, in relation to local circumstances and usages about which we have little information, are not to be balanced against the weighty and cumulative evidence which has been adduced for the morality of the Sabbath, and its consequent claims on the respect of all countries and ages.

It may appear to some an objection to these views that if the Sabbath be not divine, moral, and immutable, it would remain in heaven: whereas first and seventh days equally lose in the heavenly state their distinctive characters. There all duration is Sabbath—all space sanctuary—all engagement worship. It is sufficient to reply that morality supposes facts in demanding conformity to them. Final duty implies the existing relation of parent and child, and is ever binding while that relation subsists, but is otherwise non-existent. So the Sabbath supposes a sensible world, and in such a world it must ever be a duty to have time expressly for temporal and time expressly for spiritual occupations. But the seventh parts, where even the natural body becomes a spiritual body, and which we could not inherit, this discrimination disappears. It is the glory of the Sabbath that it prepares us for this common summation—for inheriting blessings transcending its own privileges, and even induces approximations to celestial perfection under present adverse circumstances.

III. Under the Christian dispensation, the Sabbath is altered from the seventh to the first day of the week (see Stone, in the Theol. Eclectic, iv, 542 sq.). The arguments for the change are these: 1. As the seventh day was observed by the Jewish Church in memory of the rest of God after the works of the creation, and their deliverance from Egypt's tyranny, so the first day of the week has always been observed by the Christian Church in memory of Christ's resurrection. 2. Christ conferred particular honor upon it by not only rising from the dead, but also by repeated visits to his disciples on that day. 3. It is called the Lord's day, exopikoos, a term otherwise only used in the New Testament, in reference to the sacred supper (1 Cor. xi, 20), and as in the latter passage it denotes that which specially commemorates the death of our Lord, it seems indisputable that it is applied in the former to that which especially commemorates his resurrection (Rev. i, 10). 4. On this day the apostles were assembled, when the Holy Ghost was sent down, and of which the chief of the Christian church was the Church of Jerusalem. 5. On this day Paul preaching in Troas, when the discip[...]

These arguments, it is true, are not satisfactory to some, and it must be confessed that there is no law in the New Testament concerning the first day. However, it may be observed that it is not so much the precise time that is universally held, as that one day out of seven is to be regarded. "As it is impossible," says Dr. Dodridge, "certainly to determine which is the seventh day from the creation; and as, in consequence of the spherical form of the earth, and the obscurity of the scheme which supposes it one great plain, the change of place will necessarily occasion the alternation in the time of the beginning and ending of any day in question, it being always at the same time, somewhere or other, sunrising and sunsetting, noon and midnight, it seems very unreasonable to lay such a stress upon the particular day as some do. It seems abundantly sufficient to the sufficiency of it that one day in the week be devoted to labor and one of religious rest, which there will be upon the Christian and the Jewish scheme." See Sunday.

As soon as Christianity was protected by the civil government, the Lord's day was ordered by law to be kept sacred. All proceedings in courts of law, excepting such as were deemed of absolute necessity, or of charity, as setting slaves at liberty, etc., were strictly forbidden; and all secular business, excepting such as was of necessity or mercy, was prohibited; and by a law of Theodosius senior, and another by Theodosius junior, no public games or shows, no amusements or recreations, were permitted to be practiced on that day (see Cod. Theod. lib. iii, cap. 1, dr. de festis, lib. iii; Cod. Theod. lib. xv, "De spectacula," lit. 5, leg. 2). The day was consecrated by all the primitive Christians to a regular and devout attendance upon the solemnities of public worship, and other religious exercises; and, as Bingham says in his Christian Antiquities, "this week it in such employments as were proper to set forth the glory of the Lord," and the religious assemblies for the celebration of the several parts of divine service—psalmody, reading the Scriptures, preaching, praying, and receiving the Communion; and such was the flaming zeal of those pious votaries that nothing but sickness, or a great necessity, or imprisonment, or some public duty, or some urgent and clear proof of the sanctity in which they held the Sabbath was their pious and zealous observance of the Saturday.
evening, or, rather, from midnight to break of day on the Lord's day. This time the early Christians spent in the exercises of devotion; and persons of all ranks employed in preparation for the sacred day. It must also be further observed that, in many places, particularly in cities, they usually had sermons twice a day at the churches, and that the evening was as well attended as the morning service; but in such churches as had no evening sermon, there were still the evening prayers, and the Christians of those times thought themselves obliged to spend the time in prayer and meditation in preparation for the public worship and solemnity of the Lord's day. The better to enforce this observance upon such as were ungodly or careless, ecclesiastical censures were inflicted upon them, whether they frequented places of public amusement or spent the day in indolence at home. These observations chiefly refer to the period between the publication of the Gospel by the apostles and the latter end of the 4th century—a period when this day might be expected to be observed more in accordance with the command of Christ and the will of the Holy Ghost.

4. As the Sabbath is of divine institution, so it is to be kept holy unto the Lord. Numerous have been the days appointed by men for religious services; but these are not binding, because of human institution. Not so the Sabbath. Hence the fourth commandment is ushered in with a peculiar emphasis—"Remember that thou shalt keep holy the Sabbath day." This is wise as in its intent: it may be more than a question of an in-structed, nations benefited, and families devoted to the service of God. It is lasting as to its duration. The abolition of it would be unreasonable, unscriptural (Exod. xxxi, 13), and every way disadvantageous to the body, to society, to the soul, and even to the brute creation. It is, however, awfully violated by violating, feasting, indolence, buying and selling, working, worldly amusements, and travelling. "Look into the streets," says bishop Porteus, "on the Lord's day, and see whether they convey the idea of a day of rest. Do not our servants and our cattle seem to be almost as fully occupied on that day as on any other? As if this were not a sufficient infringement of their rights, we contrive, by needless entertainments at home and needless journeys abroad, which are often by choice and inclination reserved for this very day, to take up all the little remaining part of their leisure time. A Sabbath-day's journey was among the Jews a proverbial expression for a very short one; among us it can have no such meaning. A Sabbath should be considered by too many as set apart, by divine and human authority, for the purpose, not of rest, but of its direct opposite, the labor of travelling, thus adding one day more of toil to those generous but wretched animals whose services they hire; and who, being generally strained beyond their strength the other six days of the week, have, of all creatures under heaven, the best and most equitable claim to suspension of labor on the seventh." The evils arising from Sabbath-breaking are greatly to be lamented: they are an insult to God, an injury to ourselves, and an awful example to our servants, our children, and our neighbors. To such a practice a man should consider it—(1) a day of rest; not, indeed, to exclude works of mercy and charity, but a cessation from all labor and care; (2) as a day of remembrance; of creation, preservation, redemption; (3) as a day of meditation and prayer, in which we should cultivate communion with God (Rev. i, 10); (4) as a day of public worship. To such an end is the Lord disposed to look down from on high (Isa. i, 2; Ps. cxviii, 24); (5) as a day of praise (Ps. cxvi, 12–14); (6) as a day of anticipation, looking forward to that holy, happy, and eternal Sabbath which remains for the people of God.

V. The literature of the subject is very copious. The concluding portion of this essay is borrowed from the Treatise of the Sabbath; Prideaux, Doctrine of the Sabbath; Bramhall, Discourses on the Controversy about the Sabbath; White, Treatise of the Sabbath Day; Heylin, History of the Sabbath; Chandler, Two Sermons on the Sabbath; Watts, Perpetuity of the Sabbath; Kemmott, Sermon and Dialogue on the Sabbath; Pakulski, Natural and Political Philosophy, bk. v, ch. vii; Holden, Christian Sabbath; Burnside, On the Weekly Sabbath; Bur-der, Law of the Sabbath; Wardlaw, Wilson, and Aegnew, severally, On the Sabbath; Modern Sabbath Examined (1852); James, On the Sacraments and Sabbath; Maurice, On the Sabbath; Kalsch, Commentary on Exodus (ed. loc.); Proudhon, De la Célébration Dimané; Heesey, Hampton Lecture (Lond. 1866); Johnstone, Sunday and the Sabbath (ibid. 1853); Domville, In-quiry into the Nature of the Sabbath (ibid. 1855, 2 vols.); Ellicott, History and Obligation of the Sabbath (ibid. 1844; N. Y. 1862); Hill, The Sabbath Made for Man (Lond. 1867); Cole, in the Bibliotheca Sacra, i, 556 sq.; and the literature cited by Malcolm, Theol. Indez. s. v., and especially by Cox, Literature of the Sabbath Question (Edinb. 1865, 2 vols. vso). Articles on special points connected with the institution of the Sabbath may be found (in addition to those referred to in Poole's Index, s. v.) in the Metz. Quart. Rev. Jan. 1849; April 1857; Soc. Journ. Nov. 1857; Theol. and Lit. Journ. 1857; North Brit. Rev. Feb. 1858; Bibliotheque Sacra, Oct. 1854; South Quart. Rev. July, 1857; New-Englander, Aug. 1858; United Presb. Rev. Jan. 1860; Amer. Theol. Rev. April, 1862; Brit. and For. Rev. Jan. 1863; Princeton Rev. Oct. 1863. See SUNDAY.

SABBATH. COURT OF THE (םַעֲשָׂאֹתָם, mussá hash-shabbatháth; Sept. שַׂעֲרֵי הַכּוּרֹת, ṣe'áří kūrót; Vulg. Moxsach sabbatháth, 2 Kings xxi, 13), is understood to mean a canopy under which Ahaz used to stand, at the entrance of the porch of the Temple, when he attended the service; but which he removed when he became an idolater, to show his contempt, and his intention of not resuming thither any more. See COURT. SABBATHS, COUNCIL OF THE 2 Chron. xxi, 10, 14 that he shut up the doors of the house of God' that none might enter to worship. See AHAZ.

SABBATH. MORROW AFTER THE. There has been from early times some difference of opinion as to the meaning of the words פָּסֶחְיָם, passíχayám, mookoróth hash-shabbatháth, thus rendered in the computation of the Passover (Lev. xxiii, 11, 13). It has, however, been generally held, by both Jewish and Christian writers of all ages, that the Sabbath here spoken of is the first day of holy convocation of the Lord in the 15th of Nisan, mentioned in Lev. xxiii, 7. In like manner the word פָּסֶחְיָם is evidently used as a designation of the day of atonement (Lev. xxiii, 32); and פָּסֶחְיָם (sabbath obser-vation) is applied to the first and eighth days of Tabernacles and to the Feast of Trumpets. That the Sept. so understood the passage in question can hardly be doubted from their calling it the "morrow after the first day" (i. e. of the festival): הַיּוֹם הַשַּׁנִּים yúmaḥ pi'áḥ. The word in ver. 13 and 16 has also been understood as "week," used in the same manner as סָדַבָּה sádáváha in the New Test. (Matt. xxvi, 2; Luke xxvii, 56, 62, etc., etc.). But some have insisted on taking the Sabbath to mean nothing but the seventh day of the week, or the "Sabbath of creation," as the Jewish writers have called it; and they see a difficulty in understanding the same word in the general sense of week as a period of seven days, contending that it can only mean a regu-lar and fixed weekly day, and is not applicable to any other day with the Sabbath. Hence the Baithusian (or Saddu-cean) party, and in later times the Karaites, supposed that the omer was offered on the day following that weekly Sabbath which might happen to fall within the seven days of the Passover. The day of Pentecost would thus always fall on the first day of the week. Hitzig (Osterr und Pfinzten [Heidelberg, 1837]) has put forth the notion that the Hebrews regularly began a new
week at the commencement of the year, so that the 7th, 14th, and 21st of Nisan were always Sabbath days. He imagines that "the morrow after the Sabbath" from which Pentecost was reckoned was the 22nd day of the month, the day after the proper termination of the Passover. He is well answered by Bähr (Symbolik, ii, 620), who refers especially to Josh. v, 11, as proving, in connection with the law in Lev. xxiii, 14, that the other was offered on the 16th of the month. It should be observed that the words in that passage, יִשְׂרָאֵל לְנָשָׁה יֵאָכֵל, mean merely "corn of the land, not, as in the A. V., "the old corn of the land." "The morrow after the Passover" (יִשְׂרָאֵל נָשָׁה) might at first sight seem to express the 15th of Nisan; but the expression may, on the whole, with more probability, be taken as equivalent to "the morrow after the Sabbath," that is, the 16th day. See Keil on Josh. v, 11; Masius and Druisius, on the same text, in the Cris. Sac.; Bähr, Symb., ii, 621; Selden, De Anno Civili, c. vii; Bartenora, in Chagghiah, i, 4; Buxtorf, Synod. Jud. vol. xx; Fagius, in Lev. xxiii, 15; Druisius, Notae Notariae in Lev. xxiii, 16. It is worthy of remark that the Sept. omits את יִשְׂרָאֵל, omitting instead את יִשְׂרָאֵל נָשָׁה, according to the texts of Tischendorf and Theile. See PARSOVER; PENTECOST. But there is strong ground for the Karaitic interpretation. See SABBATH (šabbath).

Sabbathain (Σαββαθαίας), a Grecized form (Esm. ix, 14) of the Heb. name (Zera x, 15) Shabathai (q. v.).

Sabbathai Zebi (I. e. שׁבָּתָי, the gazelle, or beauty, a family adjunct), a famous Jewish impostor, was born in Smyrna, July, 1641. When a child he was sent to a Rabbinic school and instructed in the whole cycle of Rabbinic law and tradition. After nineteen years he travestied himself to the study of the Cabala, rapidly mastered its mysteries, and became peerless in his knowledge of "those things which were revealed and those things which were hidden;" and at the age of eighteen obtained the honorable appellation of sage (שָׁבָתָי), delivering public lectures, and expounding the divine law and the esoteric doctrine before crowded audiences. At the age of twenty-four, he revealed to his disciples that he was the Messiah, the son of David, the true Redeemer, and called to contest and deliver Israel from their captivity among the Christians and Mohammedans. At the same time he publicly pronounced the Tetragrammaton as it is written, to do which, it is well known, was not permitted, save to the high-priest during the existence of the Temple, when he performed service in the Holy of Holies on the day of atonement, thus breaking the rule that the "penalty of death is pronounced on him who utters the Tetragrammaton publicly." When the sad intelligence reached the sages of Smyrna, they sent to him two messengers of the Beth-din (ecclesiastical tribunal) to warn him, and to caution him that if he should trespass again they would excommunicate him, and even consider it a meritorious act for any one to take his life. But Sabbathai replied that he was allowed to do so, being the anointed of God. Hearing this, the sages of Smyrna were much affrighted, and having deliberated together what to do, they decreed unanimously that he was guilty of death for two reasons: first, that he had uttered the name of the Lord according to its letters, and, secondly, because he pretended to be the Messiah. Therefore they excommunicated him, and proclaimed it a meritorious act for any one to slay him, and the fine imposed on the slayer by the laws of the Mohammedans they promised to pay. Now, when Sabbathai saw that evil was determined, he fled, and hid himself in an island near the coast of Asia Minor, where he was received with great honor, his evil deeds having not yet been known there. Many disciples also gathered around him to learn the science of the Cabala, and all the inhabitants of Salonika revered him and loved him more than any other man. But after having been there for a considerable time, he was aware of his former error, and repeated his former transgression, uttering the name of the Lord according to its letters in the presence of his disciples; and when his pupils asked him wherefore he did so, he replied that he was the anointed, and that it was therefore lawful for him to do this. The sages of Salonica, having heard of this repeated offense, sent to him two messengers of the Beth-din, ordering him to quit Salonica, otherwise he would be put to death, because he had wrought folly in Israel. Knowing that the Jews had more power at Salonica than in any other country, he secretly fled to Athens, and thence into Morea. But he found no refuge there, for the inhabitants of Morea, being informed that he had been expelled from Salonica, also drove him away. He then went through Greece to Alexandria, from this city to Cairo, and thence to the Holy Land, as far as Jerusalem, where he remained for several years, teaching the Cabala, proclaiming himself as the Messiah, anointing prophets, and performing miracles. So numerous were the believers in him that in many places trade was entirely stopped; the Jews wound up their affairs, disposed of their chattels, and made themselves ready to be redeemed from their captivity and led by Sabbathai Zebi back to Jerusalem. The consuls of Europe were ordered to inquire into this extraordinary movement, and the governors of the Different tribes of the Gentiles were ordered to restrain the sultan the cessation of commerce. Sabbathai Zebi was then arrested by order of the sultan Mohammed IV, and taken before him at Adrianople. The sultan spoke to him as follows: "I am going to test thy Messiahship. Three poisoned arrows shall be shot into thee, and if they do not kill thee, I too will believe that thou art the Messiah." He saved himself by embracing Islamism in the presence of the sultan, who gave him the name Effendi, and appointed him Captain Bashi. Sabbathai died Sept. 10, 1676, after having ruined thousands upon thousands of Jewish families. The literature on this pseudo-Messiah is very rich. See Fürst, Bibl. Jud., iii, 184 sq.; Grätz, Gesch. d. Juden, ii, 205 sq.; note 3, p. 23 sq.; Jost, Gesch. d. Juden, u. s. See MESSIAHS, FALSE (B. P.).

Sabbathist. See SABBATH.

Sabbath-day's Journey (סָבָתָי בְּנָדָּה, Acts i, 12; in Talmudical Heb. פְּנָי בְּנָדָּה, techumah; Sabbath-day's Journey) is a phrase for the prescribed distance which may lawfully be traversed on a Sabbath, and beyond which no Jew can go without violating the sanctity of the day, except he adopts the means appointed for exceeding the canonical boundary.

I. Distance of a Sabbath-way, and its Origin.—From the injunction in Exod. xvi, 29, that every man is to "abide in his place," and then 2000 years had passed, the ancient Hebrew legislators said that an Israelite must not go 2000 years, or 12,000 hand-breath as—the ancient Hebrew yard consisted of six hand-breaths—a five Greek stadia, for the Greek stadium measured 2400 hand-breaths—beyond the range in which a man could conveniently transport the contents of the Ark of the Covenant. The Epiphanius's definition of the Sabbath-day's journey is a six stadia = 14,400 hand-breaths, or 750 Roman geographical paces (Her. p. 66, 82), is most probably based upon the larger yard, which the Jews adopted at a later period. See WEIGHTS AND MEASURES. These 2000 years are not to be measured from any and every spot, but are to be defined from Jerusalem, Jerusalem being always to be reduced to a square. Thus if the Sabbath-day's walk is to be fixed from a circular city,
were probably loose statements rather than measured distances; and both are below the ordinary estimate of 2,000 cubits. Taking all circumstances into account, it seems likely that the ordinary Sabbath-day's journey was a somewhat loosely determined distance, seldom more than the whole and seldom less than three quarters of a geographical mile. See Selden, De Jure Nat. et Gent. iii, 9; Frischmuth, Dissert. de Ithn. Sabbat. (1670); Walcher, Dissert. de Ithn. Sabbat.; both in Theaurae Theologic. Philol. (Amstelorp 1720).

II. Cases in which the Limits of a Sabbath-day's Journey could be exceeded.—Though the laws about the Sabbath-day's journey are very rigorous, and he who walked beyond the 2,000 yards, or moved more than four yards farther than his temporary place of abode, when the Sabbath-day's journey had not been determined beforehand, received forty stripes save one; yet in cases of public or private service, when life was in danger, people were allowed to overstep the prescribed boundary (Mishna, Erubin, iv; Rosh-hashanah, ii, 5). The Pharisæes, or the orthodox Jews in the days of our Saviour, also contrived other means whereby the fraternity of this order could exceed the Sabbath-day's journey without transgressing the law. They ordained that all those who wished to join their social gatherings on the Sabbath were to deposit on Friday afternoon some article of food in a certain place at the end of the Sabbath-day's journey, that it might thereby be constituted a domicile, and thus another Sabbath-day's journey could be undertaken from the first termens. See Pharisæes.

This mode of connecting or amalgamating the distances (אַדֶּלֶת חַמָּשִׁים), as it is called, is observed by the orthodox Jews to the present day. Such importance have the Jews, since their return from the Babylonian captivity, attached to the Sabbath-day's journey that a whole tractate in the Mishna (Erubin) is devoted to it. Hence the phrase is mentioned in the New Test. (Acts i, 12) as exemplifying a well-known custom. A term called Jerusalem Targum translates Exod. xvi, 29, "And let no man go walking from his place beyond 2,000 yards on the seventh day," while the Chaldee paraphrase of Ruth i, 16 makes Naomi say to Ruth, "We are commanded to keep sabbaths and festivals, and not to walk beyond 2,000 yards" (comp. Mishna, Erubin, c. v; Rosh-hashanah, ii, 15; Babylon Talmud, Erubin, 56 b, 57 a; Zuckermann, in Frankel's Monatschrift für Geschichte und Wissenschaft des Judenthum [Breslaw, 1863], xii, 467 sq.).

Sabbath-school. See Sunday-school.

Sablaitians, a Judaizing section of the Novatians, who owed their origin to Sabatius, a presbyter that had been ordained by Marcian (Socrat. Hist. Eccl. v, 20; vii, 15). They assumed the name of Protospathis, and refused to communicate with any but those who adopted with them the Quodvultedesian rule in regard to the paschal festival. The Sabatians were included among heretics who were condemned in A.D. 381 by the seventh canon of the Council of Constantinople (Mansi Concil. iii, 568).

Sabbatic River. a stream of Palestine, described by ancient writers as flowing only on the Sabbath day (Reland, Palast. p. 291). Josephus locates it between Acre and Raphana (War, vii, 24). Thornes thinks that the intermittent spring of Nebel el-Fhair, in the valley of Mar Jirius, west of Kulat Husein, near Tripoli, may have been the origin of the fountain, as it seems to contain a siphon for carrying off the overflow of the water (Land and Book, i, 496 sq.).

Sabbatical Year, the septennial rest for the land from all tillage and cultivation enjoined in the Mosaic law (Exod. xxiii, 10, 11; Lev. xxv, 2-7; Deut. xv, 1-11; xxxi, 10-12), the remission of debts, which in Acts xiv, 16 is given as a Sabbath-day's journey. Josephus elsewhere determines the same distance as five stadia (Ant. xx, 8, 6); but both
luation this festival is called by four names, each of which expresses some feature connected with the observance that, nor thus it is called—(1) ِّبٍرَكَةُ رَفَستُهَا، Rest of entire Rest, or Sabbath of Sabbath (Lev. xxv, 4; A.V. “Sabbath of rests”), because the land is to have a complete rest from all tillage and cultivation; (2) ِّبٍرَكَةُ يِّلَيْلٍ، the Year of Sabbath or Rest (Lev. xxv, 5, “year of rest”), because the rest is to extend through the year; (3) ِّبٍرَكَةُ مَبَيَّناً، or more fully ِّبٍرَكَةُ مَبَيَّناً، “Release,” Remission, or “the Year of Release” (Deut. xxx, 1, 2, 9), because on it all debts were remitted; and (4) ِّبٍرَكَةُ ِّبَيْنِيْلٍ، the Seventh Year (i.e. ِّبَيْنِيْلٍ, Year), as is also the name of the tractate in the Mishna (Shebhith) treating on the sabbatical year. Josephus styles it the يِّلَيْلٍ ِّبَيْنِيْلٍ or يِّلَيْلٍ ِّبَيْنِيْلٍ (Ant. xiv, 10, 6; 15, 2; xv, 1, 3); once ِّبَيْنِيّلٍ ِّبَيْنِيّلٍ (War, i, 2, 4).

II. The Laws connected with this Festival.—Like the year of jubilee, the laws respecting the sabbatical year embrace three main enactments—(1) Rest for the soil; (2) care for the poor and for animals; and (3) remission of debts.

The first enactment, which is comprised in Exod. xxiii, 10, 11; Lev. xxv, 2-5, enjoins that the soil, the vineyards, and the olive-yards are to have perfect rest; there is to be no tillage or cultivation of any sort, at least in Palestine (comp. Tacit. Hist. v, 4, 5). What constitutes tillage and cultivation, and how much of labor was regarded as transgressing the law, may be seen from the following definitions of the Hebrew canons: “The planting even of trees which bear no fruit is not allowed on the sabbatical year; nor may one cut off withered or dried-up boughs of trees, nor break off the withered leaves and branches, nor cover the tops with dust or smoke under them to kill the insects, nor be

smear the plants with any kind of soil to protect them from being eaten by the birds when they are tender, nor bearbear any unripe fruit, etc., etc. And whoso does one of these things in the sabbatical year is to receive the stripes of a transgressor” (Maimonides, Jod Ha-Chochezah Hilkath Shemita Ve-Jebel, i, 5). Anything planted wildingly or unwittingly had to be plucked up by its roots (Mishna, Terum, ii, 3). Thus it was a regulation requiring all the land periodically to lie fallow (Philo, Opp. ii, 207, 277, 631), and as a year of rest corresponded with the Sabbath or day of rest (ibid. ii, 631; Josephus, l.c.; War, i, 2, 4; Tacit. L.c.); in fact, a Sabbath year, just as a year of rest, besides the sabbath of weeks each seventh week (Philo, Opp. ii, 481).

The second enactment, which is contained in Exod. xxiii, 11; Lev. xxv, 5-7, enjoins that the spontaneous growth (َّبِّنَّنْ) of the fields or of trees (comp. Isa. xxxvii, 30) is to be for the free use of the poor, hirelings, strangers, servants, and cattle (Exod. xxiii, 11; Lev. xxv, 5; Philo, Opp. ii; Mishna, Ed. ad loc.). This right is thus defined by the Jewish canons: “He who locks up his vineyard, or hedges in his field, or gathers all the fruit into his house in the sabbatical year, breaks this positive commandment. Everything is to be left common, and every man has a right to everything in every place, as it is written ‘that the poor of thy people may eat’ (Exod. xxiii, 11). One may only bring into his house a little at a time, according to the manner of taking things that are in common” (Maimonides, ibid. iv, 24). “The fruit of the seventh year, however, may only be eaten by man as long as the same kind is found in the field” (Maimonides, Ed. xxv, 7). “The beast that are in thy land shall all the increase thereof be meat” (Lev. xxv, 7). Therefore, as long as the animals eat the same kind in the field thou mayest eat of what there is of it in the house; and if the animal has consumed it all in the field, thou art bound to re-

move this kind from the house into the field” (Maimonides, ibid. vii, 29). The people, who were willing to live upon the harvest of the preceding year, and the spontaneous growth of the sabbatical year, are promised an especially fruitful harvest to precede the fallow year as a reward for obeying the injunction (Lev. xxv, 20-22). That the fields yielded a crop in the sabbatical year, and even in the second fallow year—i.e. in the year of jubilee—has been shown in the account (Judea, Ant. xvi, 11). The third enactment, which is contained in Deut. xv, 1-3, enjoins the remission of debts in the sabbatical year. The exceptions laid down are in the case of a foreigner, and that of there being no poor in the land. This latter, however, is a straightforward case, is what will always happen, though debts to be claimed, it is not said that they might not be voluntarily paid; and it has been questioned whether the release of the seventh year was final or merely lasted through the year. This law is defined by the ancient Hebrew canons as follows: The sabbatical year cancels every debt, whether lent on a bill or not. It does not cancel accounts for goods; daily wages for labor which may be performed in the sabbatical year, unless they have been converted into a loan; or the legal fines imposed upon one who committed a rape, or was guilty of seduction (Exod. xxii, 15, 16), or slander, or any judicial penalties; nor does it set aside a debt contracted on a pledge, or on a ِّبِّنَّنْ ِّبِّنَّنْ (or ِّبِّنَّنْ ِّبِّنَّنْ), i.e. declaration made before the court of justice at the time of lending not to remit the debt in the sabbatical year. The formula of this legal declaration was as follows: “I, A, deliver you, the judges of the district C, the declaration that I may call in at any time I like all debts due to me,” and it was signed either by the judges or witnesses. If this Prohibul was antedated, it was legal, but it was invalid if postdated. If one borrowed money from five different persons, a Prohibul was necessary from each individual; but if, on the contrary, one lent money to five different persons, one Prohibul was sufficient for all. This Prohibul was first introduced by Hillel (q. v.) the Great (born about B.C. 75), because he found that the warning contained in Deut. xv, 9 was disregarded: the rich would not lend to the poor for fear of the sabbatical year, which seriously impeded commercial and social intercourse (Mishna, Shebhith, x, 5-7). This shows how acute was the shadow of a doubt that the release of the seventh year did not simply last through the seventh year, as some will have it, but was final. The doctors before and in the time of Christ virtually did away with this law of remitting debts by regarding it as a meritorious act on the part of the giver, who assumed himself the onerous enactment, and pay his debts irrespective of the sabbatical year. But not glaringly to counteract the law, these doctors enacted that the creditor should say, “In accordance with the sabbatical year, I remit thee the debt;” whereto the debtor had to reply, “I verily wish to pay it,” and the creditor then accepted the payment (Mishna, Shebhith, x, 9). The second Mosaic enactment included the foreigner from the privilege of claiming the remission of his debts in the sabbatical year (Deut. xv, 9), the ancient Jewish canons enacted that even if any Is-

raelite borrows money from a proselyte whose children were converted to Judaism with him, he need not legally repay the debt to him before the next proselyte dies, because the proselyte, in consequence of his conversion, is regarded as having severed all his family ties, and this dissolution of the ties of nature sets aside mutual inheritance, even if the children professed Judaism with the father. Still the sages regarded it as a meritorious act if the proselyte repaid the debt in the sabbatical year (Mishna, Shebhith, x, 9). It is often said, too, that in the sabbatical year all slaves of Hebrew birth were freed; but the words in Exod. xxi, 2 (comp. Jer. xxxiv, 14 sq.) require only that they be freed in the seventh year of their servitude (Josephus, Ant. xvi, 1, 1). Deut. xv, 12
no more relates to the law of the sabbatical year than (ver. 19 sqq. (comp. Ranke, Pentat. ii, 369), and where the sabbatical year is expressly treated of—as in Lev. xxv)—nothing is said of such manumission. Nor does Joseph (Ant. iii, 12, 5) mention it. See Release.

III. Time, Observance, and Limit of the Sabbatical Year.—The sabbatical year, like the year of jubilee, began on the first day of the civil new year—the first of the month Tishri (Maimonides, l.c. c.v, 9). See New Year. But though this was the time fixed for the celebration of the sabbatical year during the period of the second Temple, yet the tillage and cultivation of certain fields and gardens had already to be left off in the sixth month. Thus it was ordained that fields upon which trees were planted were not to be cultivated after the feast of Pentecost of the sixth year (Mishna, Shabbith, i, 8), while the cultivation of corn-fields was to cease from the feast of Passover (ibid. ii, 1). Since the destruction of the Temple, however, the sabbatical year, or, more properly, cessation from tillage and cultivation of land, is not observable at the fixed time of the year. According to the Mosaic legislation, the laws of the sabbatical year were to come into operation when the children of Israel had possession of the promised land; and the Talmud, Maimonides, etc., tell us that the first sabbatical year was celebrated in the twenty-first year after they entered Canaan, as the conquest of it recorded in Jos. xiv, 10 occupied seven years, and the division thereof between the different tribes mentioned in Josh. xvii, etc., occupied seven years more, whereupon they had to cultivate it six years, and on the seventh year—the twenty-first after entering therein—the first sabbatical year was celebrated (Babylon Talmud, Erotem, 12 b; Maimonides, l.c. c. x, 2). On the feast of Tabernacles of the sabbatical year, certain portions of the law were read in the Temple before the whole congregation (Deut. xxxi, 10—18). As the Pentateuchal enactment assigns the protection of the law to the priests and college of presbyters (ibid.), viz. the spiritual and civil heads of the congregation (hence the singular נָשִׁירַת, 'thou shalt read this law before all Israel)—the Hebrew canons ordained that the high-priest, and after the return from Babylon the king, should perform the reading of the law in the manner in which the monarch is thus described in the Mishna: "At the close of the first day of the feast of Tabernacles in the eighth year, i.e. at the termination of the seventh sabbath year—a wooden platform was erected in the outer court, whereon he sat, as it is written, 'at the end of the seventh year on the festival' (ver. 10). Thereupon the superintendents of the synagogue took the book of the law and gave it to the head of the synagogue; the head of the synagogue then gave it to the head of the priests, the head of the priests again gave it to the high-priest, and the high-priest finally handed it to the king; the king stood up to receive it, but read it sitting. He read—(1) Deut. i, 1—vi, 3 ( Lev. xxvi, 8) (2) Deut. vi, 4—8 ( Lev. xxvi, 9) (3) Deut. xi, 13—22 ( Lev. xxi, 22) (4) Deut. xiv, 22—xxv, 29 ( Lev. xxvi, 22) (5) Deut. xxvi, 12—19 ( Lev. xxvi, 23) (6) Deut. xxvi, 14—20 ( Lev. xxvi, 26) (7) Deut. xxvii, 38 ( Lev. xxvi, 29) and (7) Deut. xxviii, 38 ( Lev. xxvi, 30). The king then concluded with the same benediction which the high-priest pronounced, except that he substituted the blessing of the festivals for the absolution of sins" (Mishna, Sota, vii, 8). This benediction forms to the present day a part of the blessing pronounced by the mephatir, or the one who is called to the reading of the lesson from the prophets after the reading of the lesson from the law, and is given in an English translation in the art. HAPHTARAH of this Cyclopaedia, beginning with the words "For the law, for the divine service, etc. The sabbatical year, however, was only binding upon the inhabitants of Palestine (Kiddushin, i, 9; Orlah, iii, 9), the limits of which were determined on the east by the desert of Arabia, on the west by the sea, on the north by the land of Bashan, and on the south the boundary was doubtful (comp. Geiger, Lehr- und Leseebuch zur Sprache der Mishna [Breslau, 1845], ii, 75, etc.). As to the obedience to this law, ancient Jewish tradition tells us that it was never kept before the exile, and that it was not observed after the Babylonian captivity, to give to the land the seventy years of which it was deprived during the sabbatical seven years, or the 430 years between the entrance into Canaan and the captivity, as it is written (2 Chron. xxxvi, 20, 21), "until the land had enjoyed her Sabbaths [i.e. sabbatical years], for as long as she lay desolate she kept Sabbath to fulfill threescore and ten years [i.e. sabbatical years]" (comp. Shabbath, 18, 5; Seder Olam, c. xxvi; Rashbi on 2 Chron. xxxvi, 20). After the captivity, however, when all the neglected laws were more rigidly observed (see Neh. x, 31), the sabbatical year was duly kept, as is evident from the declaration of Neh. x, 17, 18. "From the city, because they had no victuals there to endure the siege, it being a year of rest for the land," from the fact that both Alexander the Great and Caius Cesar exempted the Jews from tribute on the seventh year, because it was unlawful for them to sow seed or reap the harvest (Josephus, Ant. xvi, 4, 6), and from the sense of Tacitus about the origin of this festival (Hist. v, 2, 4), as well as from the undoubted records and the post-exilian minute regulations about the sabbatical year contained in the ancient Jewish writings. According to 1 Macc. vi, 58, the one hundred and fiftieth year of the Seleucid era was a sabbatical year (Josephus, Ant. xii, 8, 1, 16, 12, 12, 1, 2; War, i, 2, 4; comp. Hitzig, Isra. p. 483; Von Bohlen, Gen. p. 138 sqq. Einleitung.). The Samaritans observed it (Josephus, Ant. xi, 8, 6). St. Paul, in reproaching the Galatians with their Jewish tendencies, taxes them with observing years as well as days and months and times (Gal. iv, 10), from which we must infer that the teachers who communed with them those tendencies did more or less like themselves. Another allusion in the New Test. to the sabbatical year is perhaps to be found in the phrase ἐν σαββατικῷ διαρκέστερω (Luke vi, 1). Various explanations have been given of the term, one of them being that it denotes the first Sabbath year in the second year (Josephus, Ant. xvi, 4, 6), quoted by Alford, vol. i). See Second-First Sabbath.

IV. Design of the Regulation.—The spirit of this law is the same as that of the weekly Sabbath. Both have a beneficent tendency, limiting the rights and checking the sense of property; the one puts in God's claims on time, the other on the land. The land shall "keep a Sabbath unto the Lord." "The land is mine." The sabbatical year opened in the sabbatical month. It was thus, like the weekly Sabbath, no mere negative rest, but was to be marked by high and holy occupation, and connected with sacred reflection and sentiment. At the completion of a week of sabbatical years, the sabbatical scale received its completion in the year of jubilee.

This singular institution has the aspect, at first sight, of total impracticability. This, however, wears off when we consider that in no year was the owner allowed to reap the whole harvest (Lev. xix, 9; xxiii, 22). Unless, therefore, the remainder was gleaned very carefully, there must have been an easy board; and such spontaneous deposit of seed as in the fertile soil of Syria would produce some amount of crop in the succeeding year, while the vines and olives would of course yield their fruit of themselves. Moreover, it is clear that the owners of land were to lay by corn in previous years for their own and their dependents' wants. This is the unavoidable inference from Lev. xxv, 20—22. Though the right of property was in abeyance during the sab-
batical year, it has been suggested that this only applied to the fields, and not to the gardens attached to houses. The great physical advantage aimed at in the sabbati-
cal year was doubtless that the land lay fallow, thus in-
creasing the fruitfulness of the six years of cultivation, especially in that ancient period when the artificial use of fertilizers was unknown. But this rest was experi-
enced likewise by men and cattle. Other advantages of more or less importance have been suggested: the encouragement of the chase (comp. Lev. xxvii, 7); the securing of the land against famine (Michaelis in the Comment. Soc. Gotting. Oblat. [Brem. 1763], v. 9; Mos. Rech., ii, 39 sq.); the prevention of importation and for-
eign trade (Hug, Zeitschr. für das Erdbesch. Freiburg, i. 10 sq.). On the other hand, some scholars occasionally omitted the sabbatical year (1 Mac. vi. 49, 59; Jo-
sephus, Ant. xiv, 16, 2), and it is certain that the insti-
tution had various inconveniences incident to it (comp. Grever, Comment. Miss. Synagogae [Olden. 1754], p. 27 sq.; Von Raumer, Vorles. über alte Gesch. i, 198 sq.), which, however, are exaggerated by Von Raumer. Hüllmann, too, has been carried too far by his zeal against this institution (Staatsverfass. der Israel. p. 163 sq.).

V. Literature.—Mishna, Shebbith; the Talmud on this Mishna; Maimonides, Yad Ha-Chesuca Hilkoth Shemita Ve-Jobel; Michaelis, Commentaries on the Laws of Maimonides (English translation, Lond. 1842, p. 387—419); Biihr, Symbolik der mosaischen Cultus (Heidelb. 1839), ii, 569 sq., 601 sq.; Maimonides, Tr. de Jurib. Ann. Sept. Vertit Nitisque illustr. J. H. Maius (Frankf.-on-the-Main, 1708); Carpezov, Appar. p. 442 sq.; Winer, Realwörterb. ii, 349.

Sabbatier, Pierre, a French Benedictine, was born at Poitiers in 1682. In 1700 he took the habit of St. Benedict at the abbey of St. Faroz de Meaux. He was employed by prince Bruinart to edit the fifth volume of the Annales Benedictines. At this time he also began to publish the ancient version of the Scriptures, commonly called the Italian Version. The first edition had not appeared when, on the part of the abbey, he had taken in the Jansenist quarrel, he was exiled to the abbey of St. Nicolas at Rheims. He did not live to see the work completed, his death occurring on March 24, 1742, but it was finally published by Ballard and Vincent de la Rue under the title of Bibliorum Sac-

Sabbatini, Andrea, called Andrea da Sclerno, an Italian painter, was born at Salerno about 1480. He studied at Rome under Raphael, and, though he re-
mained there but one year, was one of the best imitators of Raphael's style. Among his numerous works at Naples are the frescos and scenes of Santa Maria della Grazia. His best works are at Gaeta and Salerno, and his Visitazione may be seen at the Louvre, in Paris. He died in 1545.—Hoefer, Nouv. Bioth. Générale, s. v.

Sabbatini, Lorenzo, called Lorenzo da Bo-

tagna, another Italian painter, was born about 1533 at Bologna. Being called to Rome under the pontificate of Gregory XIII, he painted in the royal hall of the Catholic Faith Triumphing over Unbelief, and other frescos in the Pauline Chapel. These gained for him the position of superintendent of the works in the Vatican, which he held till his death. The prin-
cipal pictures of Sabbatini are a Madonna, in the Louvre; the Marriage of St. Catherin, at Dresden; and the Virgin Enthroned, at Berlin. He died in 1577.

Sabbatini, Luigi Antonio, an Italian composer of music, was born at Albano in Marche. While young he joined the Order of St. Francis, and received his mu-

tic tendencies which were indigenous to Egypt. Sabellius held the Jewish position of a strict monotheism, recognizing only a single divine substance and a single hypostasis, which are but two names, God, or the same thing. In themselves they constitute the monad, as a single substance, the monad is "the silent God," i.e., it is inoperative and unproductive. It becomes active only through revelation and development, which are sometimes conceived of as an unfolding, sometimes as a speaking. The first form of Sabellianism seems to have been that of a speculative intuitional God-speaking, that is, God and the Logos. But this earlier form soon disappears, and gives place to a triad. Thus the monad evolves itself as a triad, as three divine persons, but not in the Nicene sense. The one divine substance simply assumes three forms (the Father, the Son, and the Holy Ghost) in its threefold relation to the world. This is not, however, simply three appellations, but it is three successive forms of manifestation of the one divine substance. In illustration of this, Sabellius compares the Father to the visible globe of the sun, the Son to its illuminating effects, and the Spirit to its warming influence, while the sun, per se, would correspond to the essence or the substance. The sphere of the Chaldean and the sphere of the sun were considered separately. The source of manifestation (the Father) is attributed the giving of the law, and in general the whole pre-Christian economy. Thereupon ensued the second form, the incarnation, in which God accomplished our objective redemption. Thereafter he appears under a third phase, the Spirit, the Holy Ghost. The source of manifestation is not the hearts of believers. The three manifestations are conceived of as successive, so also, are they but temporary and transitory. The divine substance does not manifest itself simultaneously in three forms, but as each new manifestation is made the previous one ceases; and when, finally, all three stages have been passed, the triad will again return into the monad, and the divine substance will again be all and in all. Thus appears the pantheistic tendency of Sabellianism as a whole. God is the abstract substance which evolves itself into the world of reality, traverses the stage of finite life, and eventually retires within itself. The "silent" God speaks forth in the universe, and then returns back into silence. Some of the fathers traced the doctrine of Sabellius to the Stoic system. The only common element, however, is the pantheistic expansion and contraction of the divine nature immanent in the world. Kindred ideas are also found in Pythagoreanism and to a considerable extent in the older forms of Manichaeanism. But this does not affect the vigorous originality of Sabellius. His theory broke the way for the Nicene Church doctrine by its full rejection of subordinationism, and by its complete co-ordination of the three persons. He differs from the orthodox view by his denial of the trinity of essence and the permanence of the threefold manifestation, thus making of the Father, Son, and Spirit simply a transient series of phenomena, which fulfill their mission, and then return into the abstract one divine substance.

Sab'bi [for rather SABI, as in the earliest editions of the A. V.] (Heb. סַבִּי, i. e. סַבִּי, Num. v. v. Zeb. 6) is mentioned in 1 Kingsii, 7; as the head of one of the families of "Solomon's ser- vants" who returned from Jerusalem; apparently a false name for the Zebaim (q. v.) of the Heb. lists (Ezra ii, 57; Neh. vii, 59).

Sabinian (sometimes confounded with Sabean), a very ancient sect, said to be named after Sabei, son of Enoch, reputed to have been the founder of their religion in its original and purest form. Their creed comprehended the doctrine of the one and only God, the Creator and Grand Creator of all things, who was to be addressed through a mediator, which office was to be performed by pure and invisible spirits. An admiration of the heavenly bodies, and an undue idea of their influence over earthly objects, soon produced an idolatrous worship of the heavenly luminaries, in which they conceived that the god Sabian worshiped towards the planets, as the residences of the mediating spirits between God and man; hence soon arose star-worship. Then they made images to re- present the stars, in which, after consecration, they imag- ined the intelligences came to reside; they named the images after the planets, and hence arose idolatry of its corruptions. They taught that the sun and moon were superior deities and the stars inferior ones; that the souls of the wicked were punished for nine thousand years, and then pardoned. They highly valued agricul- ture and cattle, and it was unlawful to kill the latter. The principal seats of Sabianism were Harran and "Ur of the Chaldees." A Sabian was either a native of Harran, or alternatively, a Sabian, till he was converted and left Chal- daea. Maimonides also says that it was very prevalent in the time of Moses. It is to Sabianism that Job alludes (xxxvi, 26, 27); "I will behold the sun when it shined, or the moon walking in brightness; and my heart hath not been secretly adjured by the furious of the hand"—i.e., in token of salutation. Also in different parts of the second book of Kings, and in Zeph. i, 5; Jer. xix, 13, the idolatrous worship of the host of heaven is mentioned. The Sabians of later times, when praying, turn towards the north pole; pray at sunrise, noon, and sunset; abstain from many kinds of food; believe in the ultimate pardon of the wicked, after nine thousand years of suffering; keep three year-ly fasts—one in February of seven days, one in March of thirty days, and one in December of nine days; offer many burnt-offerings, or holocausts; adore the stars; teach that meditators live in the seven planets, whom they call lords and gods; believe that true God they call Lord of lords; each planet, they teach, has his distinct region, office, and objects of guardianship; they believe that an intercourse is kept up between the planetary in- telligences and the earth, and that their influence is conveyed by talismanic mystical seals, made with spells and magical tiles; believe in the retribution of the grimage to Harran, in Mesopotamia, respect the temple at Mecca, and venerate the pyramids in Egypt, which they believe to be the sepulchres of Seth, Enoch, and Sabei; and they offer there a cock and black calf, and burn incense (Sale, Koran). See SABIANS.

The name of Sabinians is often given by the Moham- medans and Eastern Christians to a sect in and about Bagdad and Basseorah, whose proper appellation is Ment- daies, or "Disciples of John"; sometimes improperly called "Christians of St. John," as they have in reality no pretensions to Christianity. The name of their found- er is John, but it is not quite clear that he is John the Baptist, as has been surmised by some; or John the Baptist, as a kind of baptism. Their sacred books are a ritual, the book of John, and the book of Adam; the latter has been published, and is extremely mystical and obscure. It sets out with the Gnostic tenet of two eternal, self-existent, independent principles. It teaches that Jesus is one of the seven planets—viz., Mercury, who was baptized in Jordan by John, but corrupted the doctrines of John, wherefore the good genius Anuah delivered him up to be crucified. These Sabians pray at the seventh hour and at sunset; assemble at the place of worship on the first day of the week, on which day they baptize their children; they use extreme unction, holy oil, and bid the worshippers wash their hands, permit all kinds of food, but abstain from meat dressed by infidels; sign their chil- dren with a particular sign, and contemn all reverence
Sabin, or Sabinus, Elijah Robinson, an early American Methodist minister, was descended from an old Puritan family, and was born in Tolland, Conn., Sept. 10, 1776. Although he never went to school after he was eight years of age, he acquired a tolerable education by night study on his father's farm. He was early converted under Calvinistic influence, but soon joined the Methodists, and began to preach in Vermont in 1798. The next year he was received into what was then the New York Conference, and sent to Needham, Mass. His labors on the Landaff Circuit, in New Hampshire, which was his next appointment, were so severe as to impair his health, and he retired as an itinerant for two years, during which he married. He resumed his ministry in 1805 as presiding elder of the Vermont district, and afterwards presiding elder on the New London district, enduring many hardships and persecutions in the work. He next served on the Needham Circuit, and finally in Boston. In 1811, his health failing, he located and afterwards removed to Penobscot, where he endured the horrors of the ensuing war, being in 1814 temporarily compelled to escape to Landaff. In 1817 he visited the South, and died at Augusta, Ga., May 4, 1818. He was a man of fine figure and commanding address, and at one time was chaplain of the House of Representatives of Massachusetts. He published several small works: The Road to Happiness:—Charles Observer:—several occasional Sermons and Tracts:—and began the collection of materials for a History of Maine. See Sprague, Annals of the Amer. Pulpit, vii, 306 sq.

Sabinia, Poppea, first the mistress and afterwards the wife of Nero. Her father was T. Ollius, who perished at the fall of his patron Sejanus, and her maternal grandparents were famous Sabines assumed. Poppea had been originally married to Rufius Crispinus, by whom she had a son; but she afterwards became the mistress of Otho, a boon companion of Nero, by whose means she hoped to attract the notice of the emperor. Obtaining a divorce from Rufius, she married Otho. Her husband's lavish praise of her charms made the emperor anxious to see her. Her conduct had the desired effect. Nero removed Otho out of the way by sending him to govern Lusitania, A.D. 68. Poppea now became the acknowledged mistress of Nero, but was anxious to be his wife. As long, however, as Agrippina, the mother of Nero, was alive, she could scarcely hope to obtain this honor. Through her influence Nero was induced to put his mother to death, in A.D. 59, and in A.D. 62 he put away Octavia, on the plea of barrenness, and married Poppea a few days afterwards. Not feeling secure as long as Octavia was alive, she worked upon the fears and passions of her husband until she prevailed upon him to put the unhappy girl to death in the course of the same year. Poppea was killed by a kick from her husband in a fit of passion (A.D. 65). Her body was not burned, according to the Roman custom, but embalmed, and was deposited in the sepulchre of the Julii. She received the honor of a public funeral, and her funeral oration was pronounced by Nero himself. The only class in the empire who regretted her may have been the Jews, whose cause she had defended (Josephus, Life, § 3; Am. xx, 8, 11).

Sabinia, Saint and Martyr, was a pious and noble widow who had been converted to Christianity by Serena, a virgin of Antioch who lived in her house (in what station is not known). Serena was required to sacrifice to the gods, but refused; and when the presiding judge commanded her to offer to Christ instead, she replied, "I sacrifice to him continually, and pray to him day and night." To the inquiry, "Where is the temple of your Christ, and what sacrifices do you offer?" she responded, "I offer myself in chastity and purity, and endeavor to persuade others to the same course; for it is written, 'Ye are the temple of the living God.'" Thereupon the judge delivered her over to the Jews, together with Figures that they might violate her chastity; but they were smitten by divine power with blindness and terror, and were unable to accomplish their purpose. This result was attributed to the magical arts of Serena, and she was subjected to various tortures, and finally beheaded. Sabinia had the remains of her sainted teacher interred in her own tomb, and was soon called to suffer a similar fate. She endured joyfully for Christ, and was laid by the side of her companion. The year of their martyrdom was about A.D. 125, as both Tillemont and the Bollandists assume; the place, according to Tillemont, some town in Umbria, but according to the Bollandists, the town of Bologna. The Roman Catholic scholars are agreed respecting the character of such ancient "Acts" of this saint as still exist; some, like Baronius, regarding them as "sincerely," while others, like Tillemont (Monumenta, vol. ii), acknowledge them to be ancient, but doubt whether their antiquity reaches back to the time when these martyrs suffered, and also whether interpolations have not been added. The Bollandists decide, "nobis non videntur ita indignis, etiamvis non careant omni naufo" (see the Bollandists, in Act. SS. M.M. Serapie et Sabine ad 29 Augusti). The relics of the two confessors were transferred in A.D. 430 to a new church erected in their honor at Rome.

Sabinianus. See SABINIANUS.

Sabinianus, Pope, was a native of Volterra, and was elected bishop of Rome after the death of Gregory I, or the Great, Sept. 13, A.D. 604. He had been employed on a mission to the court of Phocas, the usurper of the Eastern empire. He is said to have shown himself avaricious and fond of hoarding, and to have thereby incurred the popular hatred. Sabinianus died in about eighteen months after his election (Feb. 28, A.D. 606), and was succeeded, after a vacancy of nearly one year, by Boniface III, the first bishop of Rome who was acknowledged by the imperial court of Constantiopolis as primate of the whole Church.

Sabotiers, a name given to the Waldensians, from the sabata (sandals) worn by the French peasantry. The sabata of the Waldensians were, however, distinguished by a painted cross—insabatari—either by sandals tied crosswise. They are described in an epistle of Innocent III as "calcamenta desuper aperta" (Innocent, Ep. xv, 187); and other writers speak of the Waldesians as wearing sandals, after the custom of the apostles, and as walking with naked feet. Evenard speaks of them contemptuously as assuming this name themselves: "Sabatenses a sabata potius quam Christiani a Christo, se velunt appellari." The custom was doubtless adopted in imitation of the voluntary poverty.
of the apostles, and in accordance with the names "Pau-
pere de Lugduno" and "De Lombardia," which they as-
sumed (Ehrard, Contr. Waldens. in Bibl. Lugd. [1572],
xxiv).

Sab‘ta (Heb. Sab‘ta, סבָּתָה, of unknown etymolo-
gy; Sept. Σαββάτα v. r. Σαββακάα; 1 Chron. i, 9; in Gen.
5, i, the Heb. [i.e., Mss.] is Sab‘thā, סבָּתָה, Sept.
Σαββάτα; Eng. Ver. "Sabath"); the third named of the
cousins of Cusd, the son of Ham. B.C. cir. 2475. His
descendants appear to have given name to a region of
the Cushites (Gen. x, 7; 1 Chron. i, 9). See Cush.

In accordance with the identifications of the settle-
mant of the Cushites in the act. ARABIA AND ELSE-
where, Sabath should be looked for along the southern
coast of Arabia. There seem to be no traces in Arabic
writers; but the statements of Pliny (vi, 32, § 156; xii,
23), Ptolemy (vi, 7, p. 411), and Anon. Peripl. (27), re-
specting Sabatha, Sabota, or Sabotale, metropolis of
the Atramiotes (probably the Charramotians), seem to
point to a trace of the tribe which descended from Sab-
a, always supposing that this city Sabatha was not a
corruption or dialectic variation of Saba, Seba, or
Sheba. See Sheka. It is only necessary to remark
here that the indications afforded by the Greek and
Roman writers of Arabic geography require very cau-
sious handling, presenting, as they do, a mass of con-
tradiction and untrustworthiness. Among the pain-
to be given up to the unknown Sabath of Arabia, The Happy, Arabia Thurifera, etc. Ptolemy places Sabatha in long. 77°,
latt. 16° 30'. It was an important city, containing no
less than sixty temples (Pliny, N. H. vi, 23, 32); it was
also situated in the territory of king Eilearos, or
p. 278, 279), supposed by Pressel to be identical with
"Ascharides," or "Alascharissoun" in Arabic (Journ.
Anim. Nouv. Série, x, 191). Winer thinks the identifi-
cation of Sabata with Sabbatha, etc., to be probable;
and it is accepted by Bunsen (Bibelwerk, Gen. x, and
Atlas). It certainly occupies a position in which we
should expect to find traces of Saba, where are traces
of Cushitic tribes in very early times, on their way,
as we bold, from their earlier colonies in Ethiopia to
Egypt. Genesius, who sees in Cush only Ethiopia,
has no doubt that Saba should be compared with
Σαβά, Σαβάδα (see Strabo, xvi, p. 770, ed. Ca-
sus; Ptolemy, iv, 10), on the shore of the Arabian
Gulf, situated here Aristobulus is, in the neigh-
borhood of which the Ptolemies hunted elephants.
Among the ancient translators, Pseudo-Jonathan saw
the true meaning, rendering it בָּשָׁל מֹדֶה, for which read
בָּשָׁל מֹדֶה, i.e. the Semnibri, whom Strabo (l. c. p. 786)
places in the same region. Josephus (Ant. i, 6, 1) un-
derstands it to be the inhabitants of Astabora (i.e.
Genesius, ed. Tregelles, s. v.). Here the etymology of
Sabata is compared plausibly with סַבָּה; but when proba-
ibility is against his being found in Ethiopia, etymology
is of small value, especially when it is remembered that
Sabat and its variations (Sabax, Sabai) may be related
to Seba, which certainly was in Ethiopia. On the
Rabbinical authoritites which he quotes we place no
value. It only remains to add that Michaelis (suppl. p. 1712)
removes Sabat to Cotta, opposite Gibraltar, called in
Arabic Sabtah (comp. Maraisid, s. v.); and that Bochart
(Phaleg, i, 114, 115, 252 sq.), while he mentions Sabba-
tha, prefers to place Sabata near the western shore of
the Persian Gulf, with the Saphata of Ptolemy, the
name also of an island in that gulf.

Sab'tah (Gen. x, 7). See sabata.

Sab’tchah (Heb. Sab’tchah, סבָּתּוֹה, etymology
unknown; Sept. in Gen. Σαββατάκαα v. r. Σαββακάα; in
Chron. A. V. "Sabtchah," סבָּתְנָא v. r. סבָּתְנָא;
B.C. cir. 2475. His descendants seem to have given
name to a people in Ethiopia (Gen. x, 7; 1 Chron. i, 9).
See Cush. "Their settlements would probably be near
the Persian Gulf, where are those of Raamah, the next
before him in the order of the Cushites. See DEDAN;
RAAMAH; SHEBA. He has not been identified with
any Arabic place or district, nor satisfactorily with any
given name by classical writers. Bochart (who is fol-
lowed by Bunsen, Bibelwerk, Gen. x, and Atlas) argues
that he should be placed in Carmania, on the Persian
shore of the gulf, comparing Sabtchah with the city of
Samphir of St. P. In Syria (Σαμφίρα or Σαμφίρα) of
Ptolemy, vi, 7, 7). This etymology appears to be very
far-fetched. Genesius (Theol. h. r. 93) merely says that
Sabtchah is the proper name of a district of Ethio-
pie, and adds the reading of the Tarq. Pseudo-Jonathan
(אֶשָּרִי, Zingatni) (Smith). In confirmation of this
latter view the name Sabtakah has been discovered on
the Egyptian monuments (Rosellini, Monumenta III
198)."

Sab'tecah (Gen. x, 7). See Sab'tchah.

Sabureans, a class of doctors among the mod-
ern Jews, who weakened the authority of the Tal-
maid by their doubts and conjectures. They were
sometimes termed Opinionists. It is said that rabbi
Josiah was the founder of the sect about twenty-
four years before the Talmud was finished. He had
some celebrated successors who became heads of the
academies of Sora and Pumbeditha. But as these
two famous academies were shut up by order of the
king of Persia, the sect of the Sabureans became
extinct about seventy-four years after its es-
establishment.

Saccæa, a festival observed by the ancient Persi-
ans and Babylonians in commemoration of a victory
gained over the Saccæ, a people of Scythia. It lasted
five days, and resembled in its mode of observance the
Roman saturnalia (q. v.).

Sa'car (Heb. Saccar, סַכָּר, hore, as often; Sept.
Χάσιρ v. r. Χασίρ, and Χασίρ in 1 Chron. xxvi, 4),
the name of two Israelites.

1. The father of Ahiam, one of David's mighty men;
he is called a Hararite (1 Chron. xi, 35), and is the
same man called SHABAR (q. v.) in 2 Sam. xxviii, 33.
B.C. ante 1030. See David.

2. The fourth son and eight sons of Edom-Edom (1
Chron. xxvi, 4). B.C. cir. 1012.

Sacci, ANDREA, an Italian painter, was born at
Rome in 1598. From his father, a mediocre artist, he
received his first ideas of art, and by studying the works
of Albani he became one of the best artists of the
Roman school. His works show great care in execution,
though they have been criticised by Raphael Mengs as
lacking in detail. In the Vatican are four of his paint-
ings, which are reproduced in Mosaic in the crypt of St.
Peter's. Among his best paintings are the Miracle of
St. Gregory the Great, Noah and his Sons, and Portr-
raits of Albani and of the artist himself. He died in
1661. His tomb is in the church of St. John Lateran at
Rome.

Sacchini, FRANCESCO, an Italian historian,
was born in the year 1570 at Piacenza, near Perugia,
in 1688 he joined the Order of Jesuits, and taught in
Rome. He was for seven years the secretary of
Vitelleschi, general of his order. His writings were
principally historical, as Historia Soc. Jesu (5 vols. fol.,
the last three of these were published after his death).
He also published a volume of ser-
mons, and an Italian translation of the life of Paulin
de Nole, by Rosweyda. He died at Rome Dec. 16,
1625.

Saccophori (sack-carriers), a name of a small
party of professing penitents in the 4th century, who
went about always dressed in the coarse apparel which:
the name of their order was derived from, The division of
the Erateties—those, namely, who thought fit to make an
outward profession of their rule. St. Basil puts together
the Erateties, Saccophori, and Apotaecias
as an offshoot of the Marcionites (Basil, *Ctm. Epist.* ii, can. 47). Theodotius made a decree, which was renewed by Honorius, that some of the Manicheans, who went by the name of Encratites, Sacrophori, or Hydroparastata, should be punished with death (Cod. Theod. lib. xvi, tit. 5. “De Haret.” leg. ixx).

Both the Marcionites and the Manicheans held the doctrine of Two Principles; and it is no wonder that the Encratites are referred now to one, now to the other of these sects. St. Basil's Canon is one relating to the baptism of these sects. See Encratites.

**Sacculus** (σακκός), a tight sleeveless habit worn by Greek patriarchs and metropolitanas.

**Sacellānus, The Grand**, an officer in the Greek Church, whose title denotes “head-master of the chapel.” He exercises inspection over monasteries and nunneries, presents all candidates for ordination to the patriarch or his deputy, and assists the patriarch in the performance of several of the ceremonies of the Church, and in the administration of his judicial functions.

**Sacellus** (Gr. σακελλάριος), a lay officer of the early Church, acting in the capacity of treasurer, as μέγας σακελλάριος, treasurer of the cloisters. See Coleman, *Christian Antiquities*, p. 129.

**Sacellum**, a sacred enclosure among the ancient Romans. It was dedicated to a god, and containing an altar and a statue of the deity.

**Sacer, Gottfried Wilhelm**, a German hymnist, was born at Naumburg July 11, 1635, and died Sept. 8, 1699. He was an excellent lawyer, and in his official duties distinguished himself by a strict conscientiousness and the most unbounded benevolence. He is the author of a number of very fine hymns; the greater part of which he composed while a student at the University of Greifswalde. When these hymns were collected and published in 1714, they immediately procured him the reputation of a distinguished poet. Two of them were also translated into English by Miss E. Cox: *Gott fährt auf gen Himmel* (Hymns from the German, p. 62), “Lo! God to heaven ascended,” and *So halb ich obsiegelt* (p. 86), “My race is now completed.” See Koch, *Geschichte der deutschen Kirchenväter*, iii, 398 sq.; *Gul. Saceri Monumia*,uctore Joanne Arnold Ballenstedt (Heimst. 1745). (L. P.)

**Sacerdos** (priest), a name by which bishops and presbyters are frequently designated in early writings, bishops being occasionally called *sacerdotes*. From the deacons performing only the subordinate ministerial duties, they were early called *sacerdotes secondi vel tertii ordinis*. See Coleman, *Chris. Antiq.* p. 111.

**Sacerdotal Cities**, the thirteen cities set apart by Joshua for the family of Aaron, which lay in the tribes of Judah, Simeon, and Benjamin (Josh. xxii, 4), and in the vicinity of the holy city. Their names were Hebron (the free city), Libnah, Jabir, Ziphomas, Holoan, Debir, Ain, Juttah, Beth-hezrah, Geba, Anathy, and Almon; the last four being in the tribe of Benjamin (ver. 10 sq.). After the exile, too, priests dwelt in these cities (Neh. vii, 73), though many were permanently settled in Jerusalem itself (xii, 10 sq.). See City; Levi; Priest.

**Sacerdotal Consecration** among the Israelites. Priests and high-priests were consecrated to their offices with a variety of ceremonies, which are described at great length in the sacred books (Exod. xxix, 1-37; Lev. viii, 1-30; Exod. xl, 12-15; comp. Bähr, *Symbolik*, ii, 166 sq.). The service consisted chiefly of washing the whole body, investment, and anointing with the sacred oil. See *Unguent*. The latter, indeed, in Exod. xxix, 7; Lev. vii, 12, is mentioned only of the high-priests; but that the common priests were also anointed is clear from Exod. xl, 15 (comp. xxviii, 41); and the peculiarity of the anointing of the high-priest seems to have been that he was the only one with power of anointing the head (xxix, 7; Lev. viii, 10), while the common priests were, perhaps, simply touched with the ointment on the hands, or, as the rabbins say, on the brow.

2. A sacrifice then followed. Three beasts were led to the altar, and the hands of the new-made priest were laid upon them. First a young bull was presented as a sin-offering, and essentially treated as a sin-offering of the first class. See Sin-offering. A ram was slain as a burnt-offering, according to the usual ceremonial; and finally the Ram of Consecration. Blood from this ram was placed on the ear-laps, on the right thumb, and on the great toe of the right foot, and was sprinkled about the altar. The parts of the body touched with blood point out the members chiefly used in sacerdotal service. (On the foot, comp. Exod. xxviii, 55. See Bähr, *op. cit.* p. 425. Comp. the five places touched by the Catholics in extreme unction. Their priests at consecration have only the hands anointed.) Now the bodies and the clothing of the candidates were again sprinkled with a mixture of the blood of the sacrifice and oil. The final ceremony was this: those parts of the ram of consecration which in the case of a thank-offering were raised and waved were placed, with some unleavened bread, upon the hands of the persons consecrated, and waved, and finally burned upon the altar, as a “foretaste of the burnt-offering.” This was the “shoulder of the burnt-offering” alone excepted. On the symbolic meaning of this ceremony, see Consecration Offering.

The ceremony of consecration, perhaps only the sacrifices of it, was to be repeated seven days (Exod. xxix, 39), and the priests were forbidden during this time to leave the sanctuary. It is not very probable that this minute ceremonial was carried out at the ordination of all Jewish priests. According to the rabbins, it was only necessary at the first institution of the priesthood, and afterwards each consecrated priest, on entering upon his office, was only required to present the meet-offering (Lev. vi, 12, 14 sq.). See Consecration Offering: Priest.

**Sacerdotal Order** (designated in general by the Hebrew word *priests*, **κοκαμίν*, for the etymology, see various views in Gesenius, *Theaurus*, ii, 661 sq.). In the patriarchal age the head of a family was its priest (Gen. xxxix, 1 sq. [see Jethro; Melchizedek]; but when the children of Israel became a nation, a special tribe of priests was set apart by law for them. This arrangement was so far similar to that of the Egyptians that they too had a separate caste or body of priests, who indeed were their first and highest caste (Herod. ii, 164; Dio. Sic. i, 73. On the Indian Brahmin, see Meiner, *Gesch. d. Religion*, ii, 541 sq.; yet comp. Bähr, *Symbolik*, ii, 92 sq.). By its hereditary nature, the priesthood acquired more firmness and security; the ritual and ceremonial law was more easily preserved and observed; and the higher culture which such a body always secures obtained a more definite and fixed centre.

These priests alone *drew near to God* (Num. xvi, 5; Exod. xix, 22; Ezek. xlii, 13; comp. Num. xxviii, 39), and hence must alone attend to all the services of the central sanctuary, the penalty of death being denounced against the others. They were assumed to be excluded from the camp (Num. xxvi, 6-10, 38; xvi, 40). These priests, who exercised their office, after the division of the kingdom, in Judah alone (1 Kings xiii, 33; 2 Chron. xi, 13 sq.), were confined to the family of Aaron (Exod. xxviii, 1), who were Koathites (comp. Num. iv, 2). Hence they are called *the children of Aaron*. (Lev. ii, 1-12; xvi, 3, 4, 9-12; although not the descendants of Aaron who were legally qualified actually served as priests. Thus Beniah, a priest's son (1 Chron. xxvii, 5), held military
SACREDOTAL ORDER

office under David (2 Sam. viii. 18; xx. 28). 1 Kings ii. 5.

were required to be wise in physiognomy, de-

became as men who must draw near to God, and

mediate between him and his people (Lev. xxii. 17 sq. ;

comp. Mishna, Bechoroth, c. 7; Josephus, War, v. 5, 7 ;

On the examination for priesthood, see Mishna, Midrash,

v. 4). They must also be of blameless reputation (Jose-

phus, Ant. iii. 12, 2; Philo, opp. ii. 225; see Richer, Pignioum. Sacerd. [Jena, 1715] ii. 4; Kiesling, De Legib. Mos. circa Sacerdot. Vitio Corporis Laborantes [Lips. 1756]), which, indeed, was demanded among other na-

The requirements of the canon law as to physical de-

fects are found in Justin, First Apology, ii. 8, 9; Eusebius, Her.

The law did not fix any definite year of the priest's age in which he should enter upon his office; yet the Gemarists assert that none was ever admitted before his twentieth year. Indeed, this age was required of the Levites (q.v.) before serving. But since, at a later day, even the high-priest might be but a youth (Josephus, Ant. xx. 3, 3), it may be that with priests of lower grade no strictness was ever exercised in this re-

spect. Indeed the Mishna (Yoma, i. 7; comp. Tamid, i) speaks of youths whose beard was just beginning to grow (if the gloss be right) as already entering the sanctuary in the priestly office. At a later day every one of the priestly clothes (for see Habak-

kah, Nad of, v. 4; Kiddush, iv. 4 sq.), which led the priest to set great value on their family records (comp. Ezra ii. 62; Neh. vii. 64; Josephus, Apion, i. 7); and the Ge-

nera refers to a special course of instruction for those entering on this office (Kethuboth, cvi. 1).

The formal consecration to the priesthood consisted in sacrificing, with symbolic ceremonies, purifications, and investiture (Exod. xxix; Lev. viii). See SACREDOTAL CONSECRATION. The Israelitish priests, during active service (and, ac-

cording to Jewish tradition, during their stay in the Temple; but see Josephus, War, v. 5, 7; according to the Mishna, Tamid i, 1, they were merely prohibited from sleeping in their clothes; these were kept in the Temple under a special officer (Mishna, Shekal. v. i), wore clothing of white linen (τύριβα, bad), as did the Egyptian priests (Herod. ii. 57), whose white linen gar-

ments, the simple expression of purity, were known through the ancient world (see Spencer, Leg. Ritu. iii. 5; Celsius, Homer, i. 290). Bühler supposes the Israelit-

ish clothes to have been like those of the Egyptian (Symbolii, ii. 89 sq.), but on insufficient grounds (comp. Hengstenberg, Mos. p. 149 sq. ). These gar-

ments of the Jewish priests consisted of the following distinct parts, which, however, are not accurately de-

scribed (Exod. xxxvii. 34, 40; xxxix. 27 sq.; Lev. vi. 3; v. 18): (1) γαζυσσα, mihastim (Sept. παποσίφος, A. V. "linen breeches"), which were simply drawers, a covering for the pudenda, extending from the hips to the thighs (so described by Josephus, Ant. iii. 7, 1; comp. Philo, leg. ii. 25); (2) γαζυσσα, keholomaprod(, or "cont", a woven tunic for the body. It is described by Josephus (Ant. iii. 7, 1) as reaching to the feet and fit-

ting the body, with sleeves tied fast to the arms, and
girded to the breast a little above the elbows. (3) πατέω, abnet, the "girdle" used to bind the tunic. It passed round the body several times, beginning at the girdle, and was then tied, and hung loosely down to the ankles, save when the priest was serving, when, for convenience, it was thrown over the shoulders. It was broad, and embroidered with braid (see Josephus, Ant. iii. 7, 2). (4) πατέω, migdab (A. V. "bonnet"), Exod. xxviii. 40, properly a cap or turban, not made conical, but covering rather more than half the head, and so made as to resemble a crown. It was of heavy linen, in many folds, and sewed together, and had a cover of fine linen, which reached down to the forehead. It was fitted closely to the head (Josephus, Ant. iii. 7, 8). But Bühler has made some well-grounded objections to the descrip-

tion of Josephus (Symboli, ii. 64 sq.), and the migdab may, perhaps, have been a real cap, possibly in the form of a flower-cup (comp. especially the extracts from Schil-

hte Hugdöbr. in Hebrew and German, in Ugolini Thesaur., vol. xiii, and Braun, De Vestit. Sacerdot. [Amst. 1701]). There is no specific reason for the Jewish men of the Law for these articles of clothing to have been imitated from Egyptian models. The Israelitish priests seem not to have worn shoes: no mention, at least, is made of them; and the belief prevailed that on a holy place one should tread only with bare feet (Exod. iii. 6; Josh. vi. 15; see Stroox). The Egyptian priests performed their ser-

vices barefoot (Suet. Aug. 56); for see Psalms, see Carpozy, Appar. p. 790 sqq.; Walch, De Vet. Relig. ant. i., p. 12 sq.; Baldvin, De Calceo Antiq. c. 23), though Herodotus ascribes to them sandals of papyrus (ii. 37). The Rabbinists assure us expressly that the priests wore no shoes (Bartenora, Ad Cod. Sacer., v. i, 1; Maimonides, Chele Habemula, v. 14; comp. Theodorot, Ad Exod. iii. 4, 7; Mishna, Berachoth, ix. 5), and refer in part to this cause the fre-

quency of diseases of the bowels among the priests, which rendered it necessary to keep a special physician at the Temple skilled in those diseases (comp. Braun, Vestit. Sacerd. i. 9, 38 sqq.; Kall, De Morbis Sacerdot. f. v. ex. Missarum. Conimbr. 1702).

The priests appear to have been divided by David into twenty-four classes for the daily service (1 Chron. xxiv. 3 sq.; comp. 2 Chron. viii. 14; xxxiv. 4 sq.; Josephus, Ant. vii. 14, 7), each of which had its president or ruler (2 Chron. xxxvi. 14; Ezra x, 6; Neh. xii. 7; Josephus, Ant. vii. 14), and is called according by Josephus, Ant. viii. 14; Life, v. 38, 39; and in the New Test., Matt. ii. 4; xvi. 21; Luke xxii. 52), and performed the service for one week, from Sabbath to Sabbath (2 Kings xi. 9; 2 Chron. xxiii. 4; comp. Luke i. 5; Josephus, Apion, ii. 7 sqq.); dividing itself further into six sections, one for each day of the week, the whole number acting on the Sabbath. These twenty-four classes still existed in the period after the exile (Josephus, Life, p. 1; Apion, ii. 7; comp. 1 Macc. i. 1), and the Talmud assumes (Lightfoot, Hor. Heb. p. 708 sq.) that the four priestly families which returned with Ezra (Ezra ii. 36 sq.) were immediately divided into twenty-four parts by the prophets (comp. Sonntag, De Sacerdot. f. v. et xx. Ephem. Pers. Hebr. Alt. 1829; Alchorne, Ephem. Sacerd. in his Exercit. i. 20). Herzfeld, how-

ever, considers the account of the original division into classes as a fable of the chronicler, yet without reason (Gesch. des Volkes Israel, i. 392 sqq.) The several duties, as they returned in order, were distributed by lot (Luke i. 9; Mishna, Yoma, ii. 8 sq.; and Tamid; see Light-

foot, Hor. Heb. p. 714 sq.), and there was a special offi-

cier at the Temple to preside over this distribution (Mishna, Shekal. v. 1). The office of priest, in distinct-

tion from that of Levite, consisted in "coming nigh" to the vessels of the sanctuary and to the altar (Numb. xviii. 3); and included the following special duties: (1) the priests (for see Josephus, Ant. iii. 7, 1) consecrated in the morning and evening (Luke i. 10); the cleansing of the lamps in the "golden candlestick" and filling them with oil; the weekly renewal of the shew-bread. (2) In the court of the Temple, the feeding of the continual fire on the altar of burnt-offering (Lev. vi. 9), and daily re-

oval of the "burnt offering" (Lev. vi. 8); the solemn cleansing of the Nazarite, on the final release from his vow (Numb. vi), and at the ordeal of a woman suspected of adultery (ver. 12 sq.), and the blowing of the metal
trumpets at set times (Numb. x. 8 sq.; 2 Chron. v. 12; vii. 6; xxix. 26; Neh. xii. 41; Mishna, Succa, v. 5; Arach, ii. 3). To these were added the examination of the unclean, especially of lepers and their cleansing (Lev. xiii. 14; comp. Deut. xxvii. 8; Matt. viii. 4; Luke xvii. 14 [see Purification]), the estimation of vows (Lev. xxvii.), and the nightly watch of the inner sanctuary (Exod. xxv. 2; comp. R. Man. 117b). How to keep the priests who kept the threshold (2 Kings xii. 9, xxv. 8; Jer. ii. 25) is uncertain. See Threshold.

The overseer of the regular watch of the priests is mentioned (Middoth, i. 2); perhaps the same with the captain of the Temple, σπαρτήρις τοῦ ἱεροῦ (Acts iv. 1; v. 24; comp. Deyling; Obser. iii. 902 sq.). But who, then, and where, was the Temple governor (Lev. xxii. 52)? Perhaps under-officers of the Levitical Temple-watch (comp. Mishna, Shekal. v. 1, 2). See Temple.

The priests were also required to instruct the people in the law, and in certain cases to give judicial answers (Deut. xvii. 8 sq.; xix. 17, xxv. 8, 9; comp. 2 Chron. xvii. 8 sq.). King Jehoshaphat even established a high tribunal, consisting of priests and Levites, in Jerusalem (2 Chron. xix. 8; comp. Josephus, Apion, ii. 21; Dodi. Sic. Ecl. xi. 1). On the services of priests in armies, see War.

The priests were required to perform all their offices in a state of ceremonial purity (Josephus, War, v. 5, 6), which led to their oft-repeated washings, especially before each performance of official duty (Exod. xxx. 19 sq.; Tamid, i. 2, 4; ii. 1), for which purpose vessels of water for bathing were kept in the court of the sanctuary. (On the duties of priests when rendered unclean, see the Mishna, Middoth, ii. 5.) They were not permitted, while engaged in official service, to take wine or any other intoxicating drink (Lev. x. 9 sq.; Ezek. xli. 21; Josephus, Ant. iii. 12, 5; War, v. 5, 7). According to Rabbinical regulations, those who had the daily ministration must entirely abstain, and the rest of the weekly division might drink wine only at night, because during the day they were liable to be called upon for aid (Mishna, Tamid, ii. 7; comp. Josephus, Apion, i. 22, p. 457 ed. Haverc). All extravagant demonstrations of sorrow, as rending the clothes, wounding the body, shaving the head, etc., were forbidden them (Lev. x. 6 sq.; xxvi. 5 [see Mourning]), and they were to abstain from eating of a portion (Zeb. xvi. 2; Ezek. xli. 25 sq.; Bähr, Symboli, ii. 182 sq.). With these restrictions may be compared those enjoined on the flamen duales among the Romans (Aul. Gell. x. 15). They were required in marrying, too, to have regard to priestly dignity; though not compelled to celibacy, as the Mishna (Maim. i. 1) shows. Dodi. Sic. Ecl. xi. 1. Thus they could only marry virgins or widows of character (never divorced women, Mishna, Sota, viii. 8), and of Israelitish descent (Lev. xxv. 7; Ezek. xli. 22; comp. Ezra x. 18), though no limit was enjoined as to the particular tribe; and in a later age even the Israelitish descent needed not to be direct (Mishna, B. Bicur. i. 8). Yet intercourse with the family of priests was especially sought (Luke i. 5; comp. Josephus, Apion, i. 7; Münch, De Matrim. Sacr. V. C. Bibliae Sacr. [Nuremberg 1747]). The law even extended its special care to the dignity and honor of the daughters of the priests (Lev. xxv. 9; comp. xxvii. 12; Mishna, Terumoth, vii. 2).

It is easy to understand how the priests enjoyed the peculiar reverence of the people (comp. Jer. xviii. 18; Sirach vii. 31 sq.; Josephus, Apion, ii. 21), although their scanty of piety, and even their immorality, often called for severe rebukes from the prophets (Jer. vi. 31; vi. 19; xxiii. 11; Lam. iv. 10; Ezek. xxii. 26; Hosea vi. 9; Mic. iii. 11; Zeph. i. 4; Mal. ii. 8). A number of cities (thirteen) were set apart for the residences of the priests, as also for the Levites (Josh. xxi. 4, 10 sq.), which lay near together in the vicinity of the sanctuary, in the tribes of Judah, Simeon, and Benjamin [see Sacerdotal Cities], and between which and Jerusalem they made their journeys on official duty (comp. Luke x. 31. (On the station or reserve body of priests in Jericho, see Lightfoot, Hor. Heb. p. 89, 709.) In the Holy City, the priests inhabited chambers in the neighborhood of the Temple (Neb. xi. 10 sq.).

The priesthood was supported (comp. Numb. xviii. Josephus, Ant. iv. 4, 4) by the assigned portions of the land (Deut. xxi. 11 sq.; xxii. 2; xii. 12 sq.; comp. Numb. vi. 29; Deut. xviii. 3), as in Egypt (see Herod. ii. 37; and see Sacrifice; comp. also Schol. ad Aristoph. Plut. 1186). This sacred portion was distributed also to those of priestly descent who were in- firm, or for other reasons not called into service (Lev. xxi. 22; Josephus, War, v. 5, 7; see Hottinger, Apologie, p. 85 ed. 1871). The secular portion was in the person of an officer in the Miscell. Groning. ii. 294 sq.; Deyling, Obser. v. 70 sq.). First-fruits, heave-offerings (Numb. xxxi. 29, tithes (q. v.), the shew-bread, when removed (Lev. xxiv. 9; Matt. xii. 4; comp. Succa, v. 8), the fines for Levitical transgressions (Numb. v. 6 sq.), the redemption price of the first-born (Ex. xiii. 15 sq.), the subjects of vows, or the price of their redemption (Lev. xxivv. Numb. xviii. 14; see in general Philo, De Præstis Sacr. in vol. ii. of Manegy's Ausp. p. 282 sq.), were also perquisites; some of which were only to be enjoyed by the priests themselves, and only then in the vicinity of the sanctuary. The priests received the pieces of the levitical offerings (Lev. vi. 19 sq.) and the shew-bread (xxix. 9); other only within the Holy City; while the tithes, heave-offerings, etc., were eaten in the sacerdotal cities, and by the entire families of the priests.

In addition to their receipts, the priests were free from taxes and from military service; and the freedom from taxation was granted them even in the period after the exile, and by the foreign rulers of Palestine (Ezra vii. 24; Josephus, Ant. xii. 3, 8). In the last period of the Jewish state the rapacity of the high-priests reduced the common priests even to want (Josephus, Ant. xx. 9, 2; comp. 8, 9). As the priests and Levites formed one thirteenth of the whole population, the support of this class was no small burden on the productive industry of the nation; yet the constant increase of the Levitical families caused such division of the revenues that the income of a Levite could never have been very great. In relation to this subject, it should be borne in mind, (1) that the tithes and first-fruits, on a small scale, were a very heavy burden; (2) that the other gifts, pieces from the sacrifices, vows, etc., depended in great part on the free choice of worshippers; (3) that, apart from the priests and a few officers of government, the whole people were producers, and, during the early period at least, the Levites might be supported by a standing army or a learned class; (4) that the increase in numbers of the Levites themselves did not increase the tithes, which were a fixed percentage of the produce. The true view is that one thirteenth of all the land rightfully belonged to the tribe of Levi; and, as this whole number was taxed to the other tribes, their receipts were not payments for their sacerdotal services, but interest or rent for their land.

Thus, until the destruction of the Temple at Jerusalem by the Romans, the priestly order continued as a hereditary and honored body (contrasted with the laity in the Talmud, Terum. v. 4), directing and expressing the worship of the people, and the religious ceremonies, and when their relations to Jehovah were disturbed by sin, restoring them by expiatory sacrifices. It was a kind of nobility (Josephus, Life, sec. I). It seems to have been in correspondence with their natural position in the nation that at an early period the priests had an active share in the govt. as counsellors (Numb. xxvii. 2; 19, xxi. 12 sq. 26; xxvii. 2; Deut. xxvii. 9; Josh. xvii. 4). Under the kings, they sometimes mediated between the prince and the people (2 Sam. xix. 11), or were prized as counsellors at court (1 Kings i. 7 sq. 39, iv. 2; 2 Sam. viii. 17); but later,
when the corruption of the people and the State became obvious, they allied themselves with kings and princes for the suppression of the bold speaking of the prophets (Jer. xx. 1 sq.; xxvi. 7 sq.), for their love of form and ritual would naturally endanger the spirit of faith within them, and place them in opposition to the prophets. See SACHS.

In the meantime the sacerdotal caste in Palestine does not seem to have begun with the settlement of the Israelites there. In the time of the Judges there were family priests appointed by the head of the household (Judg. xvii. 5 sq.; xviii. 3, 27, 30). Those who were not Levites, or at least not priests, offered on altars which they had themselves built (Judg. vi. 26; xii. 19; 1 Sam. vii. 9; xxx. 12). Several such altars exist (Rosennmüller, ad loc.; so in 1 Sam. vi. 14, as in 2 Sam. vi. 17, though priests are not expressly named); and in Shiloah, near the sanctuary, where a family of priests performed service, the people visited high-places and altars long before consecrated. See SACRIFICE.

Even under David, it would seem that the Levitical priests were not exclusively intrusted with the sanctuary, for David's sons were priests (2 Sam. viii. 18). It is true that the word בְּנוֹת, kokhin, is here often rendered privity-councillors, or, as in the A.V., princes; and so in other places where the priests are named with the people of the court, but without pilothegical grounds (Gesenius, Thesaur. ii, 663 sq.). An exclusive priesthood, independent of the people, was the outcome of the glorious mystery of the Temple, and their influence may have been increased by being concentrated within the little kingdom of Judah. According to 2 Chron. xi. 15 (comp. 1 Kings xii. 31; xiii. 33) the priests and Levites left the kingdom of Israel under its first king, and gathered in the portion of Judah (but comp. 2 Kings xviii. 27 sq.).

Sacheverell, Henry, D.D., a celebrated English divine, son of Joshua, minister of St. Peter's Church, Marlborough, was born about 1672. He was educated at Magdalen College, of which he became a fellow, and appears to have been celebrated and successful as a college tutor. He took his degree of M.A. in 1696, of B.D. in 1704, and D.D. in 1714. As a college tutor he was at Cannock, in Staffordshire, but in 1705 he was appointed preacher of St. Saviour's, Southwark. It was while in this situation that he delivered his two famous sermons—the first at the assizes at Derby, Aug. 15, 1709; the other before the lord mayor at St. Paul's, Nov. 5, in the same year. In both sermons he vehemently attacked Low-Churchmen and Dissenters, and asserted that the Church was in imminent danger. In one he was supposed to allude, under the name of Volpone, to lord Godolphin. He was impeached by the House of Commons, and tried before the Lords, found guilty, and for three months of the remainder of his term of imprisonment was be burned by the public hangman. On the expiration of his sentence (1713), the queen presented him to the living of St. Andrew's, Holborn. He died June 5, 1724. He left a number of sermons, principally remarkable because of their connection with his trial. Some excellent Latin poems by him are in the Muse Anglicana, vol. ii, iii. See Secret Memoirs of Sachseverell (London, 1710); History of Dr. Sachseverell (ibid. 1711).

Sachs, Hans, an eminent people's poet of Germany, was born at Nuremberg, Nov. 5, 1494. In a Latin school, from 1501 to 1509, he learned the elements of the sciences of the day. Though apprenticed to the trade of a shoemaker in his fifteenth year, and hindered from university training, the beginnings of general knowledge which he obtained in youth were fruitfully utilized in his after-life. As a schoolboy he was trained to take part in the choral service of the Church; and he enjoyed also the special instruction of the Meistersinger Lienhard Nonnenbeck. Thus he joined to his profession of cobbler that of a Meistersinger. In 1511 he started upon a wandering tour, and in the course of five years became acquainted with most of the cities of his country. He married, and when he returned to Nuremberg, married, and plying his two trades of cobbler and poet to the end of his life. He died Jan. 20, 1576, at the age of eighty-one.

The career of Sachs falls in the most prosperous period of Nuremberg's history, and covers the whole epoch of the Reformation. Among his townsmen were Dürer, Vischer, Eheberger, and Oslandar. When Luther began to preach, he warmly welcomed the new epoch, and called the reformer the "Wittenberg nightingale." Throughout his fruitful life he labored, directly or indirectly, to promote the new doctrines, and to promote honor and purity among the people. His poetic productivity began with his return to Nuremberg, in his twenty-fourth year. Thenceforth his fertility is almost marvellous, and comparable only to that of the Spanish poet Lope de Vega. His works embraced thirty-four folio volumes. In 1567 he estimated the number of his poems, short and long, at 6048, and nearly 800 were subsequently added. They were all written upon all possible subjects—history, sacred and profane; fable, classic and Gothic; civic life and domestic; animals, birds, and fishes; and in every style—tragedy, comedy, farce, epic, didactic, lyric, elegiac, and descriptive. The greater part of these poems were designed not for the press, but to be used by players in MS., and to be sung on special occasions. The first complete collection of his approved poems appeared at Augsburg, in 3 vols. fol., from 1558 to 1561. A larger edition, at the same place, in 5 vols. fol., in 1570-79. A selection of his better pieces appeared at Nuremberg in 1781, also in 3 vols.; ibid. in 1816-24; and anon., in 2 vols., in 1856; still another in 4th, 5th and 6th vols. of the Deutschen Dichter des 16. Jahrhunderts, by Goedeke and Tittmann (Leips. 1870-74).

During the dry dogmatic period of the 17th century, Sachs was quite neglected, but Wieland and Goethe brought him again into good repute. A monument was erected to him at Nuremberg in 1874. See Rainsbach, Leben des Hans Sachs (Altenburg, 1876); Hoffmann, Hans Sachs (Nuremberg, 1847); Herzog, Real-Enzyk. xx, 636, 635. (J. P. L.)

Sachs, Marcus, professor of Hebrew and exegetical theology, was born of Jewish parentage at Inovratzlay, in the duchy of Posen, June 13, 1812. He received his early education at Berlin, in the house of an uncle, who sent him to the gymnasium, where Homer became his delight. Having passed his examination, he entered the university, and gave himself to the study of French literature. Voltaire became his idol. The career of a rabbi was closed to him; and as for a position in any public office, the government of Prussia in those days was not liberal to men of his opinions. As trade also was not to his mind, he had decided to go to England. After a short sojourn in London he came to Leipsic, and here it was that, through the instrumentality of the late Dr. John Brown, this Jewish freethinker was brought to Christ. When he had made his public profession, he betook himself to the study for the ministry, and attended the lectures of Dr. Chalmers. Having obtained license as a preacher, he was appointed tutor in Hebrew to the Free Church Divinity Hall in Aberdeen. After having filled the office of tutor for some years, he was raised to the status and obtained the title of professor of Hebrew and exegetical theology. For nearly thirty years he held his honorable position, until he was called home. See Marcus, Hans Sachs (Aberdeen, 1872); Delitzsch, Saat auf Hoffnung (1875), xii, 41 sq. (B. P.)

Sachs, Michael, a German rabbi, was born at
Great-Glogau, Sept. 3, 1808. Owing to his distinguished talents both as a Biblical scholar and a preacher, he was invited to become rabbi preacher of the new temple at Prague in 1836, which office he occupied till 1844, when he was appointed rabbinate assessor to the Jewish community at Berlin, where he remained till his death, Jan. 81, 1864. He published a German translation of the Psalms, with annotations (Berlin, 1836) — Derrnto warum, Jotham, Judges, Samuel, Isaiah, Joel, Amos, Habakkuk, Zephaniah, Haggai, Malachi, the Psalms, the Song of Songs, and Lamentations, as well as part of Jeremiah, translated from the Hebrew into German, embodied in the Twenty-Four Books of Holy Scripture according to the Massoretic Text, edited by Zunz, Arnhem, Frhr. and Ackerman, S. R. Drenier, the Psalms in Spanish (ibid. 1845). — Stimmen vom Jordan und Eu- phrat (ibid. 1863). — Beiträge zur Sprach- und Altertumswissenschaft (ibid. 1852-54, 2 vols.). — Festical Prayers of the Israelites, the Hebrew text with a German translation and notes (ibid. 1856-57, 3 vols.). — Daily-Prayer-book, the Hebrew text with a German translation (ibid. 1856). — and finally, Sermonen (ibid. 1867-69, 2 vols., ed. by Dr. D. Rosin), besides a number of valuable essays, published in the Kerem-Chemed (ibid. 1856, new ser. vol. iii). See Fürst, Bibl. Jud. iii, 190 sq.; Kitto, Cyclop. s. v.; Geiger, Jüdische Zeitschrift, 1863, p. 263 sq.; Franke, Monatsschrift, 1864, p. 115 sq.; 1866, p. 301 sq.; Gritz, Geschichte der Juden in Berlin, 571 sq.; Cassel, Leitfaden der jüdischen Literatur, p. 114 sq.; Jew- ish Messenger (N. Y.), Aug. 27, 1875. (B. P.)

Sachse, Christian Friedrich Heinrich, D.D., a German Protestant theologian, was born July 2, 1785, at Eisenberg, in Saxo-Altenburg. Having finished his studies at Jena, he was in 1812 appointed deacon in Meissweil near Altenburg. In 1825 he was made court preacher at Altenburg, in 1831 member of consistory, and in 1841 his alma mater honored him with the theological doctorate. In February, 1860, he was obliged, through bodily infirmities, to retire from his important position, and on October 9 he was called to his home. Sachse wrote several very fine hymns, two of which are also translated into English — Wohlfort! Wohlfort! zum letzten Gang, sung at his own funeral (in Hymns from the Land of Luther [p. 108], “Come forth! come on with solemn song!”), and Lebewohl, die Erde wartet dein (ibid. p. 154, “Beloved and honored, fare thee well!”). See also Koch, Gesch. des deutschen Kirchenliedes, vii, 22; Knapp, Evangel. Liederschatz, p. 1942, s. v. (B. P.)

Sack, Brethren of the, a religious order, which was established about the beginning of the 13th century, and had monasteries in France, Germany, Italy, and England. The brethren were very austere, for they neither ate flesh nor drank wine. Besides the sack which they wore, and from which they took the name, they went barelegged, and had only wooden sandals on their feet.

Sack, August Friedrich Wilhelm, one of the most eminent German Reformed preachers of the reign of Frederick II of Prussia, was born at Harzgerode, Feb. 4, 1703. In 1722-24 he studied at Frankfort-on-the-Oder. The next two years he passed as tutor in the family of a French preacher at Stettin. Then he studied in Holland. Here he became acquainted with the chief theologians of the time, and, through their influence, took a permanent coloring. From 1729 to 1751 he was teacher to a young prince in the neighborhood of Magdeburg. In 1751 he began to preach in Magdeburg, and rapidly rose in esteem and in office. In the last year of the old king Frederick William I (1740) he was called to Berlin, where he entered upon his ministry of forty years. Throughout the whole of that period, he stood independent between the two prevalent parties — the slavishly orthodox and the rationalists — holding to the good in both parties, and esteemed by the best in both. At the outbreak of the Seven Years' War he ac-

Sack, Carl Heinrich, Dr., a German theologian, son of F. S. G. Sack, was born at Berlin, Oct. 17, 1790. He studied at Göttingen and Berlin, and commenced his lectures at the Berlin University in 1817. In 1818 he was made professor extraordinary, and in 1832 professor of theology there. He died at Papeendorf near Bonn, Oct. 16, 1875. Of his many works we mention Christliche Apologetik (Hamburg, 1841). — Christliche Poesie (ibid., 1838) — Geschichte der Predigt von Marsheim bis Schliersenmacher und Menken (Heidelberg, 1866). — Theologische Aufsätze (Gottha, 1871, etc.). See Zach- old, Bibellexica Theologica, ii, 1106 sq.; Theologischer Universal- Lexikon, s. v.; Koch, Gesch. der deutschen Kirchenliedes, vii, 353; Literarischer Handwörterbuch (1875), p. 483; Theologisches Jahrbuch (Biefeldt, 1877), p. 228. (B. P.)

Sack, Friedrich Ferdinand Adolph, brother of the preceding, was born at Berlin, July 16, 1788, and succeeded his father as court and cathedral preacher. He died Oct. 16, 1842. Together with his brother, he published a History of Bible (ibid., 1835). He is also the author of the beautiful communion hymn Du liebest, Herr, zu deinem Tisch. See Koch, Gesch. des deutschen Kirchenliedes, vii, 358; Knapp, Evangel. Liederschatz, p. 1342, s. v. (B. P.)

Sack, Friedrich Samuel Gottfried, a Prus- sian theologian, court preacher, and Church governor, was born Sept. 4, 1736. His mother was of a French refugee family. He explains that his family had for the French language and literature. He studied at the University of Frankfort-on-the-Oder from 1755 to 1757. The next two years he studied in England, coming into contact with Secker, the archbishop of Canterbury, Kennicott, Lardner, and others. On his return to Germany, he was appointed by his own wishes to the church of St. John in Berlin, where he continued to serve, and he accompanied to Frankfort-on-the-Oder, and where he again heard lectures. He now associated much with Tollner. After preaching at Magdeburg (1769-77) he was called by Frederick II as fifth court preacher to Berlin. Gradually he rose to the first place. In 1786 he became a member of the high consistory. The years 1794-95 were very eventful, during which the poor and suffering people of the capital. In 1816 the king conferred upon him the title of bishop of the Evangelical Church. He died Oct. 2, 1817. In theology Sack was independent of the traditions of orthodoxy, but he
Sackbut

Sackbut is the rendering in the A. V. of the Chaldean sabkab (written סָבְכָּב in Dan. iii, 5, but סָבְכָּב סָבְכָּב in Dan. iii, 7, 10, 15; thought by Gesenius, Theodorn. a. v., to be from סָבְכָּב, to weare, from the entwined strings), which the Sept. and Vulg. render by the corresponding Vien. sambucus, which, in fact, are mere transcriptions of the Chaldee word. The English version has evidently imitated the word. The sambucus, however, is an old English name for a wind instrument (see the Bide Educator, iv, 150), but the Greek and Roman sambucus had strings (see Smith, Dict. of Class. Antiq. a. v.,). Mr. Chappell says (Pop. Mus. i, 35), 'The sambucus was a bass trumpet with a slide, like the modern trombone.' It had a deep note, according to Dryton (Polybolion, iv, 865):

'The hobby, sambut deep, recorder, and the flinte.'

The sambucus was a triangular instrument with four or more strings played with the fingers. According to Athenaeus (xiv, 658B), Masarius described it as having a shrill tone; and Empedocles, in his book on the Isthmian games, said that it was used by the Parthians and Troglobytes, and had four strings. Its invention is attributed to one Sambux, and to Sibylla its first use (Athen. xiv, 637). Juba, in the 4th book of his Theatrical History, says it was discovered in Syria, but Neanthes of Cyzicus, in the first book of the Hours, assigns it to the poet Thycus of Rhegium (ibid. iv, 72). This last tradition is followed by Suidas, who describes the sambucus as a kind of triangular harp. That it was a foreign instrument is clear from the statement of Strabo (x, 471), who says its name is barbarous. Isidore of Seville (Origins, iii, 30) appears to regard it as a wind instrument, for he connects it with the sambucus, or elder, a kind of light wood of which pipes were made. The sambucus was early known at Rome, for Plautus (Stich. ii, 2, 57) mentions the women who played it (sambuccae, or sambucis-trae), as they are called in Livy, xxxix, 6). It was a favorite among the Rhegian musicians (Polybolion, iv, 72), and it was a rich and splendid work. In olden times (Ancient Monarchies, iii, 20) it is thought that the Chaldean sabkab was a large harp resting on the ground like that of the Egyptians. See Musical Instruments.

Sackcloth (סָכַך, sok, from its net-like or sieve-like structure; a word which has descended pure in the Greek σακχαρός and modern languages) is the name of a coarse material, apparently made of goat's or camel's hair (Rev. vi, 12), and resembling the cactus of the Romans (Gen. xxvii, 9; 1 Kings xxii, 21; 2 Kings xix, 1 sq.; Matt. xi, 21; Luke x, 18; comp. Josephus, Ant. vii, 1, 6; Porphyry. Abst. iv, 15; Plutarch, Superst. c. 7). It was probably dark brown or black in color (Isa. i, 8; Rev. vi, 12; comp. the black dresses of the Greeks: Eurip. Aec. 440; Orest. 458; Helen, 1088; and Romans xvi, 25; Rev. xiv, 4; compare Id. 11, 568; 21, 56; 22, 56; 25); Becker, Galtius, ii, 289; see Josephus, Life, 28). It was used for the following purposes: (1) For making sacks for grain, the same word describing both the material and the article (Gen. xlii, 25; Lev. vi, 32; Josh. ix, 4). Sacks are usually made of hair in the East; whence we may understand that where sackcloth is mentioned haircloth is intended. (2) This material was certainly employed for making the rough garments used by mourners (Ezra iv, 21), which were in extreme cases worn next the skin (1 Kings xxvi, 27; 2 Kings vi, 30; Job xvi, 18; Isa. xxxii, 11), and this even by females (Joel i, 8; 2 Mac. ii, 19), but at other times were worn over the clothes beneath (Josh. viii, 6) in lieu of the outer garment. The robe probably resembled a sack in shape, thus fitting closer to the person than the usual flowing garments of the Orientals (Niebuhr, Beschreibung, p. 340), as we may infer from the application of the term סָכַך, to bind, to the process of putting it on (2 Sam. iii, 9; Ezra vii, 18, etc.). It was confined by a girdle of similar material (Isa. iii, 24). Sometimes it was not laid on by the priests (1 Kings iii, 4), nor worn by the Kings of Israel. Prophets and ascetics wore it over the underclothing, to signify the sincerity of their calling (Isa. xx, 2; Matt. iii, 4; see Weinstein, N. T. i, 384 sq.). The Apocalypse intimates that this habit of sackcloth was that in which good people clothed themselves when they went to prayers (Baruch iv, 20). The use of haircloth as a penitential dress was retained by the early Oriental monks, hermits, and pilgrims, and was adopted by the Roman Church, which still retains it for the same purpose. Haircloth was, indeed, called 'sackcloth' by the early Greek and Latin fathers. It does not appear that sackcloth is now much used in token of grief in the East; but ornaments are relinquished, the usual dress is neglected, or it is laid aside, and one coarse or old assumed in its place (comp. Liske, De Sacco et Cinere [Vitenb, 1631]). See Mourning.

Saconay, GABRIEL DE, a French theologian, was born near Lyons. While quite young, he was made canon of Lyons, and afterwards became dean of the chapter. He was one of the most zealous opponents of the Reformation, and was for some time excommunicated from the city of Lyons. He died Aug. 3, 1580. His writings are principally controversial, and bitter in the extreme. They are, De la Providence de Dieu sur les Rois de France, with L'Histoire des Albigésiers (1668) — Traité de la Vraie Idolatrie de notre Temps (1688) — Discours des Premiers Eléments des Albigésiers (reprinted in answer to a Hugenot writing (La Géméloïe et la Fia des Huguenoits): — and Découverte du Calvi-
 SACRAMENT

nisme. Saccman also published an edition of the treatise of Henry VIII against Luther, to which he wrote a preface full of the most violent expressions. Calvin answered it by a satirical work called Gratulatio (1560).

Sacra (sacred rites), a general term used by the ancients to denote all that belonged to the worship of the gods. The sacra were either public or private, the former applying to the worship conducted at the expense of the State, and the latter at the expense of families or single individuals. In both cases the whole services were performed by the priests, who, in the case of the sacra publica, had also the charge of the funds raised for these services. The sacra privata were generally nothing more than sacrifices to the Penates, or household gods.

Sacra, Circa, or In sacris. The power of the magistrate is scarcely allowed by any party in sacris (in sacred things), but many allow his power circa sacra (about sacred things). The 23rd chapter of the Westminster Confession says, however: The civil magistrate may not assume to himself the administration of the word and sacraments for the power of the keys of the kingdom of heaven; yet he hath authority, and it is his duty, to take order that unity and peace be preserved in the Church, that the truth of God be kept pure and entire, that all blasphemies and heresies be suppressed, all corruptions and abuses in worship and discipline prevented or reformed, and all the ordinances of God duly settled, administered, and observed. For the better effect whereof, he hath power to call synods, to be present at them, and to provide that whatsoever is transacted in them be according to the mind of God.

It is noteworthy that one of the proof-texts in the Westminster Confession, under this head, is Matthew ii, 4, 5. Herod's calling together the sanhedrim when startled by the news of the birth of Christ—a rival prince, as he thought, and whom he proposed to destroy. A large party object to this doctrine of the magistrate's power as Erastian and unscriptural, and maintain that the Church should be free of all control on the part of the State, and alike independent of its pay and its patronage. See Erastianism. How the compromise is effected between the two powers in the Church of Scotland may be seen in the way in which the General Assembly is annually dismissed at the end of the statutory period beyond which it cannot prolong its sittings. Thus, in the summer of 1661, it was concluded not to address by saying, "As this General Assembly was convened in the name and by authority of the Lord Jesus Christ, so in the same name and by the same authority I now dissolve it, and appoint the next meeting of the General Assembly of the Church of Scotland to be held in this place on Thursday, the 22d day of May, 1685." The lord high commissioner then said: "Right reverend and right honorable, it is now my duty, in my sovereign's name, to dissolve this assembly; and, accordingly, I hereby declare this assembly dissolved in her name, and by the same authority I appoint the next General Assembly to meet on Thursday, the 22d day of May, 1682." See SECULAR POWER.

Sacrament (from the Lat. sacramentum, a military oath of enlistment), a word adopted by the writers of the Latin Church to denote those ordinances of religion by which Christians come under an obligation of obedience to God, and which obligation, they supposed, was renewed with each sacrament. Considering the simplicity of the manner and the brevity of the terms in which the Lord Jesus Christ instituted certain general and perpetual observances for the Church which he founded, it is difficult to repress amazement at the extent of the discussions and the voluminosity of the controversies that have sprung up in reference to them. Many of these controversies are now obsolete, and all of them shrink to comparative unimportance when the Word of God is taken as the one only source of authoritative instruction on the subject. In order to make proper distinctions between the divine teachings and human theories, and also to see how doctrine is affected by the changes of dogmatic periods without the shadow of scriptural authority, it is well first to note both the letter and the spirit of the New Testament teaching in reference to what we now call sacraments. We may then the more intelligently follow the line of historical development and practice, however that may have been corrupted from the simplicity of the apostolic age. A negative note of little significance is taught in the fact that the term sacrament is not found in the N.T.; neither is the Greek word μυστήριον in any instance applied to either baptism or the Lord's supper, or any other outward observance. That word, however, came subsequently into ecclesiastical usage as the equivalent of the Latin sacramentum. The Greek Church still uses it in that sense, designating as the seven mysteries what the Roman Church calls the seven sacraments.

I. Scriptural Statement of the Subject.—The instructions given by the N.T. in reference to baptism and the Lord's supper are of two kinds: 1. Those found in the book of Acts and the epistles of Christ himself; 2. Those found in the subsequent practice and teaching of the apostles. Introductory to both is the great fact with which the Gospel history opens, viz. John's baptism: that was distinctly declared to be a baptism of repentance, introductory to the kingdom of God about to be established by way of preparation. John's baptism, therefore, is to be regarded as a connecting link between the old and the new dispensation; and as it was prophetic of Christ's immediate advent, so it was sanctioned by the fact of Christ's accepting, indeed demanding, baptism at the hands of John, in order to "fulfil all righteousness." This threefold series we may understand to consist not only in the fact, in his own person, the law of the Abrahamic covenant in circumcision, but also the spiritual law of Christianity which he was about to establish, and of which baptism was to be the appointed emblem. This view is corroborated in the fact that, in connection with this baptism, not only was the Messiahship of Christ attested by an approving voice from heaven, but by the descent upon him of the Holy Ghost (Matt. iii, 13-17; Mark i, 8-11; Luke iii, 21, 22). This great event occurred at the beginning of Christ's public ministry; and although, in the record of his ministrations, little is said of baptism, yet sufficient is recorded to indicate that when Christ taught and practiced this sacrament, it was to have an introductory character to Christian discipleship. It is summarily mentioned in John iv, 1, 2, "that Jesus made and baptized more disciples than John, though Jesus himself baptized not, but his disciples." In the preceding chapter (ver. 22) it had been stated that "Jesus and his disciples came into the land of Judaea; and there he tarried with them, and baptized." Hence we may infer that baptism was fully established as a custom of the initial Church prior to the formal command by which, in the great Commission, its perpetual observance was enjoined (Matt. xxviii, 19). From the first exercise of their appointed office, the apostles preached baptism as a duty (Acts ii, 38) and administered it to professing Christianity (see Acts ii, 41; xvii, 12, 13, 16, 38; ix, 18; xvi, 15, 33; xviii, 6, etc.). See BAPTISM.

The institution of the Lord's supper was, in some respects, similar. In his custom of fulfilling all righteousness, our Lord, on the night before his betrayal, assemblage, and surrender, gave and administered to his apostles in their presence with Jewish law and custom. In that connection he not only identified himself as the true Paschal Lamb, slain from the foundation of the world, but appointed bread and wine to be emblems of his body and blood, to be used by all his followers in perpetual commemoration of his impending sacrificial death (see Matt. xxvi, 26; Mark xiv, 22; Luke xxii, 19; 1 Cor. x, 18). That this institution was observed by the apostles and the
churches founded by them in the simplicity and sacredness of its original appointment is obvious from various statements and allusions in the Acts and Epistles; but we may also seek to determine what is peculiar and essential to baptism and the Lord's supper, when considered as ordinances of the Christian Church, the following characteristics will be found to be inherent in both. They were prescribed by our Lord's own example, and enjoined by his specific command; 2. They were enjoined upon the whole Church, and as of perpetual obligation; 3. They were recognised by the apostles and the New Testament churches in the character stated, and by them observed in the form and spirit of their appointment; 4. Each of the institutions named had an important significance with reference to the whole scheme of salvation, and was adapted to serve as a means of grace to all Christians. See Lord's Supper. If, now, the ordinances named are to be considered as sacraments of the Christian Church (which has never been questioned or denied), it is incumbent upon us to consider a sacrament in which the same characteristics do not in like manner inhere. Let the several points named be applied as tests to five additional observances of the Greek and Roman churches, called by them sacraments—viz. confirmation, matrimony, penance, orders, and extreme unction—and it will be seen how few of them satisfy all. Keeping in view the fact that the term sacrament has no sanction from scriptural usage, a question of some importance arises as to how it came to its present significance and general adoption, also whether and to what extent the term itself has become an agency of error. In considering this question, it is well to go back in thought to the post-apostolic age, and trace downward, by successive steps, the development of ideas and customs in the Christian Church. 1. Ideas of peculiar sacredness could not fail to be associated with duties enjoined in the last commands of the Lord Jesus—the recently crucified but now ascended Saviour. 2. These ideas would be intensified in the participation of the Lord's supper, which, by its very design, addressed itself to the tenderest sympathies and highest moral purposes of the human soul. 3. As the act of communion demanded of each believer, not only self-examination as to his faith and spiritual life, but also mutual address, the whole range of future hope and duty would be practically before the надо devotion to Christ, the Captain of our salvation, so that pledge might easily come to be regarded somewhat in the light of an oath. 4. More especially as Christians were taught to regard themselves as soldiers, called to fight the fight of faith and to war a good warfare, it would be natural to regard the act of devotion by which they pledged allegiance to Christ as very analogous to the sacramentum, or oath, by which Roman soldiers swore allegiance to their emperor. Hence the Lord's supper came to be called sacramentum eucharistiae. 5. In like manner, as baptism was regarded in the light of an enrollment as to be a soldier of Jesus Christ, so also may the whole range of future hope and duty be practically before the mind and sacramentum eucharistiae would become generic and inclusive of the two and only observances enjoined by Christ as of universal and perpetual obligation upon the Church. Moreover, as both sacraments were designed to serve as outward signs of a personal religious relationship, we are not to be surprised to find the term sacramentum eucharistiae applied also to what was incomprehensible to the natural mind, in fact, mysterious. Hence, in the Greek language, the term μυστήριον (mystery) came to be used as the equivalent of sacramentum in the Latin. This term "mystery," however, became misleading by very natural processes. It had for a long time been employed in connection with the mysteries of the Egyptian pantheon, and was adopted among the Greeks [see ELUSINIAN MYSTERIES], and could hardly fail to suggest analogous and corrupting ideas to Christians at all inclined to a worldly policy. The writers of the New Testament had, in fact, repeatedly used the words "mystery" and "mysteries," but never in connection with the baptism of the Lord's supper, or any Christian ceremony. They had spoken of the mysteries of the kingdom of God, the mystery of faith, the mystery of godliness, and also of the Gospel as "the revelation of the mystery which was kept secret since the world began, but now is made manifest." Multiplication of the sacraments. When from such obviously appropriate usage the term mystery was, in ecclesiastical language, so far perverted as to be made almost exclusively to represent Christian ceremonies, a wide door was opened for the ingress of erroneous opinions and practice. The very term suggested secrecy where publicity was designed. It obviously prompted the artificial rules of the disciplina ecclesiastica (q. v.), and thus strongly encouraged ceremonial instead of spiritual conversion. It also stimulated the inventiveness of ecclesiastics in the multiplication of so-called sacraments. It gave countenance to priestly pretensions on the part of Christian ministers, and encouraged the encouragement of such a practice. Combined with other influences of like nature, it contributed to that great perversion of the sacrament of the Lord's supper by which it came to be regarded as a propitiatory sacrifice—a parent error, from which the mystical ceremonies and the doctrine of transubstantiation were logical outgrowths. Errors also arose from a loose application of the word sacrament in a term involved the generic idea of sacredness, so it came to be applied to various other usages that sprung up in the Church, with the tendency to attribute to them an importance and sanctity corresponding to those of the sacraments proper. For successive centuries the number of ceremonies called the sacraments was more or less varied and indefinite; one writer (Damian) enumerated twelve. But by degrees, the sacred number seven came to be adopted as the limit, yet not always in application to the same ceremonies or in the same order. The present enumeration of the Roman Church is credited to the schoolman Peter Lombard (d. 1164), although for at least three centuries later more or less controversy was maintained among the schoolmen as to the number and order of the sacraments. It was the General Council of Florence in 1439 that, following Peter Lombard and Thomas Aquinas, first assumed to define authoritatively the number as subsec tively necessary, or that in some special termination or limitation then decreed was promulgated in a synodal epistle from pope Eugenius to the Armenians in 1442. The language of the decree is full and explicit, not only as to the number, but also as to the doctrine of the sacraments. It says:

"The sacraments of the new law are seven—namely, baptism, confirmation, the eucharist, penance, extreme unction, orders, and matrimony—which differ much from the sacraments of the old law: for those do not come by grace, but represent it as only to be given through the passion of Christ: but the sacraments of the new law contain grace, and confer on them who worthily receive them the same effect as are ordained by the perfection of each man in himself; the last two, for the government and multiplication of the whole Church. . . . All these sacraments are performed in three ways—namely, by things as to the material, by words as to the form, and by the person of the administrator who confers the sacrament with the intention of doing what the Church does—of which, if any be wanting, the sacrament is not perfected. Among these sacraments there are three—baptism, confirmation, and orders—which impress indelibly on the soul a character: that is, a certain spiritual sign, distinct from the others, and not repeated on the same person. But the other four do not impress a character, and admit of reiteration."
During that period the living oracles were silent, and nearly all the prevailing influences united to enhance the prerogatives of the clergy by attaching magical or supernatural influence to their supposed priestly functions. Baptism, loaded down with accumulated ceremonies, became the essential agency of regeneration; absolution from sin was given or withheld at the option of a priest; while extreme unction was regarded as an important, if not an essential passport to usher a dying person into the presence of God. But it was the Lord's supper that was most suspiciously mysterious. The rite had become the holy of holies in the Christianity then prevalent. In the presence of the Lord Jesus Christ was believed to be secured as often as the priest performed the act of consecration; but the manner of that presence was for a long time undiscussed, being neither defined by canons, agitated before councils, nor determined by pope. During all those centuries no language was thought too strong to express the overpowering awe and reverence of the worshipers. The oratory of the pulpit and the homilist treatise had indulged freely in the boldest images; the innate poetry of the faith had worked those images into a form with a wonderful power of evocation. The employed reference to this subject may be taken from Chrysostom, written in his treatise on the priesthood, about A.D. 380: "The priestly office is discharged upon earth, but holds the rank of heavenly things, and very rightly so.... For when you behold the Lord sacrificed to your advantage, and present the sacrifice, and praying, and all stained with that precious blood, do you then suppose you are among men and standing upon earth? Are you not immediately transported to heaven?... Oh, the marvel! Oh, the love of God to man! He who sits with the Father on high is at that moment held in the hands of all, and gives himself to those who are willing to embrace and receive him!"

For centuries following Chrysostom, the prevalent ideas of the real presence in the eucharist were not only vague, but widely dissimilar, ranging from the border of a just spiritualism to a gross materialism, but with growing tendencies to the latter, until, at length, the more material the conception came to be of an actual and repeated sacrifice, the more it seemed to impress minds wholly uninstructed in Scripture truth. For a long period inquiries into the nature of the sacred mysteries were regarded as presumptuous; but when a generation arose whose opinions excited the most attention. It was to Paschais Radbert, a monk of Corvey (A.D. 831), that the Roman Church was indebted for the first clear statement of what came afterwards to be known as the doctrine of transubstantiation. Although Paschais Radbert did not employ that term, he fully set forth the idea which the term was afterwards invented to express. He taught that the substance of the bread and wine was actually transubstantiated, notwithstanding the corporeal form remained, in passing into and becoming the body and blood of the Redeemer—the actual body and blood of Jesus Christ, which had been reasuscitated in the resurrection, and which was not multiplied in countless numbers of times and places. He did not shrink from following out this theory to its grossest consequences, sustaining it by the narration of various miracles, such as the host bleeding and assuming the human form. It is not to be supposed that Paschais originated this doctrine; his task was that of formulating it from the still cruder notions of the average popular and priestly mind of his day. But, dark as were the times in which he lived, his theory, when reduced to a connected statement, was too gross to pass unchallenged. A protracted discussion arose, known in ecclesiastical history as the Controversy of Corvey.

Against the theory of Paschais, Fridegaid, a monk of another order, and Ratramnus, another monk of Corvey, urged sundry arguments, and quoted many passages from the fathers, especially from Augustine, showing that the body of Christ in the eucharist could not be the same body as that in which he was born, suffered, and rose again. Ratramnus, in fact, wrote a learned work entitled De Corporis et Sanguinis Christi, in which he modestly but ably controverted the positions of his abbot, Paschais. The latter had strongly urged those views of the sacrifice of the mass that had prevailed from the time of Gregory the Great. On the other hand, Ratramnus designated the eucharist as being only a commemorative mystery; and he triumphed, by remembrance of which Christians should make themselves capable of partaking of the divine grace of redemption. Rabanus Maurus, John Scotus Eriigena, and others also wrote in opposition to the theory of Radbert. Thus the controversy was protracted into the 10th century, but with a constantly increasing tendency to reject and silence all opposition to the extreme views as heretical. See Transubstantiation.

Notwithstanding the popular drift in the line of transubstantiation, Berengar of Tours (q. v.), about the middle of the 11th century, opened, by his acute and able opposition to the theory of Paschais Radbert, the most fertile field of controversy for about a century and a half—Controversy. His position was that the substance of the bread and wine was not changed by the consecration, but only their efficacy, thus maintaining a dynamical, as against an actual change. His chief literary opponent was Lanfranc (q. v.), but his ecclesiastical opponents were the new schools of the time. Over the question he could not be answered, he was summarily arraigned by popes and prelates, before councils and synods, and forced repeatedly to renounce his doctrines on pain of death. As often as he was able to escape from the power of his persecutors, he recanted his successive renunciations of his doctrines respecting the sacraments, until he at length renounced a refuge in England, where he was permitted, at the age of ninety, to die in peace. His views found many adherents, both in France and Germany, who came to be known and proscribed as Berengarians.

A synod of Rome in 1079 confirmed the doctrine of Paschais Radbert; and, although for some years afterwards that doctrine was maintained by the use of other terms, it attained length found definite expression in the term transubstantiation, which is said to have been first used by Hildebert of Tours (about 1134). Steps were now successively taken by which discussion was checked and opposition counteracted. St. Thomas Aquinas, the Third Crusader, in 1215, made transubstantiation (q. v.) an unchangeable article of the Roman Catholic faith; pope Urban IV, in 1264, instituted the annual festival of Corpus Christi; and pope Clement V, in 1311, reduced the doctrine in question to a liturgical form. By these means, not only the theologians and the clergy of the Church, but also the masses of the people, were committed to the actual delineation of the host, or consecrated wafer. The withholding of the cup from the laity was deemed a logical sequence of the doctrine of transubstantiation of more controlling influence than the express command of Christ with reference to the cup; and this practice was gradually followed. The concept quoted was thenceforward conveniently limited to the clergy.

From the periods named above, scholasticism was busy in the vindication and explanation, by various ingenious methods, of the new dogma; while in practice, the sacrifice of the mass became more than ever the centre of the Roman ritual. Nor is it easy for Protestants in the 19th century to understand how completely the combined influence of the decrees of the Church, the writings of the schoolmen, the ceremonies of the ritual, and the parade of festivals had blotted out from the mind the simple scriptural idea of the eucharist, and instituted in its place that blind superstition in reference to this now mutilated sacrament. The efforts made during successive centu-
ries to give reality and impressiveness to the Roman doctrine of the sacraments, and especially that of the eucharist, had not been limited to traditional and preceptive influences; stupendous miracles in demonstration of their reality had long been widely proclaimed. Besides, the very nature of the doctrine itself adapted it singularly to retain its hold on an ignorant and superstitious generation. The notion once impressed upon the multitude that, when they celebrated one of the sacraments of their Church, they actually swallowed the things that were the body and the blood of their God, was too intensely exciting, too attractive to their imagination, too closely connected with their senses, to be abandoned without great reluctance. We might, indeed, wonder how it was found possible to obtain so general a credence for a dogma than which, in its popular sense, no more audacious paradox was ever obtruded on the credulity of man; but, once received, once impressed on the belief, once embraced as an essential truth, it became so entirely essential, so predominant, so engraving, as to take almost exclusive possession of the soul, and to throw a shade of comparative insignificance over every other tenet. To be deprived of this cruzei of faith was to have proved radically inconsistent with the institution hitherto reverenced and adored as the very body of the Divinity were no more than bread and wine, unchanged by the sacerdotal consecration, either in substance or in accident, was, in the vulgar mind, to part with the portion of religion most nearly touching both feelings and practice. They were not the least of what was the first impression produced upon ignorant devotees; and those who had nourished that ignorance, and found their profit in it—the chiefs and champions of the system to which that dogma was so essential—united in one great confederacy to propagate the cry" (Waddington, History of the Reformation, ch. xxix).

III. Roman Catholic View.—The full and authoritative statement of the Roman Catholic doctrine concerning the sacraments is given in the Decree of the Council of Trent, as embraced in the following extract of the preface and in thirteen consecutive canons:

1. In order to complete the exposition of the wholesome doctrine of justification, published in the last session by the unanimous consent of the fathers, it hath been deemed proper to treat of the holy sacraments of the Church, by which grace and righteousness are imparted, the virtues increased, and afterwards restored, if lost. For which cause the sacred, holy, ecclesiastical, and general Council of Trent, having assembled, to consider the doctrine of the Sacred Scriptures, the tradition of the apostles, and the uniform consent of other councils and of the fathers, hath decreed in these articles, the illustrious canons of the Councils, in order to expel and extirpate the errors and heresies respecting the most holy sacraments which have appeared in divers ages—partly in the revivals of heresies long ago condemned by our ancestors, partly new inventions—and have proved highly detrimental to the purity of the Catholic faith, and to the salvation of men. The preceding canons, necessary to the completion of the work, will be published hereafter, by the help of God.

2. Canon 1. Whoever shall affirm that the sacraments of the new law were not all instituted by Jesus Christ our Lord, or that there are more of the same kind than seven—namely, baptism, confirmation, eucharist, penance, extreme unction, orders, and matrimony—or that any of these is not necessary for benefit, let him be accursed.

3. whoever shall affirm that the seven sacraments are in such sense equal that no one of them is in any respect more honorable than another, let him be accursed.

4. whoever shall affirm that the sacraments of the new law are not necessary to salvation, but superfluous, or that they are not sufficient to obtain the grace of faith, or only, without these sacraments (although it is granted that they are all not necessary to every individual), let him be accursed.

5. whoever shall affirm that the sacraments were instituted solely for the purpose of strengthening our faith, let him be accursed.

6. whoever shall affirm that the sacraments of the new law are not given in the grace of faith, or only, or in such sign as that they do not confer grace on those who place no obstacle in its way, as if they were only the external signs of grace or righteousness received by faith, and marks of Christian profession whereby the faithful are distinguished from the unbelievers, let him be accursed.

7. whoever shall affirm that grace is not always given by these sacraments, and upon all persons, as far as God is concerned, they are righteously received, but that it is only bestowed sometimes and on some persons, let him be accursed.

8. whoever shall affirm that grace is not conferred by the sacraments of the new law, by their own power (ex opere operato), even in the faithful, or in all that is necessary to obtain grace, let him be accursed.

9. whoever shall affirm that a character (that is, an inalienable sign) is inscribed forever upon the soul by the three sacraments of baptism, confirmation, and orders (for which reason they cannot be repeated) let him be accursed.

10. whoever shall affirm that all Christians have power to preach the word and administer all the sacraments, let him be accursed.

11. whoever shall affirm that, when ministers perform and confer a sacrament, it is not necessary that they should, at least, have the intention to do what the Church does, let him be accursed.

12. whoever shall affirm that a minister who is in a state of mortal sin does not perform or confer a sacrament, although he observes everything that is essential to the performance and bestowment thereof, let him be accursed.

13. whoever shall affirm that the received and appointed minister, whether the solemn administration of the sacraments, may be despised or omitted without sin by the minister, at his pleasure, or by the favor of a church may change them for others, let him be accursed.

Refutations of the Romanist theory of the sacraments have been so numerous and detailed in the writings of the Reformers, from the days of Wycliff down to the present time, that it seems only necessary to present here a brief résumé of the standard objections to it: 1. The sacramental theory of the Church of Rome wholly ignores the great scriptural doctrine of salvation by faith. 2. It elevates ceremonies above Christian obedience and duty. 3. It is artificial in naming sacraments several things which Christ did not appoint as sacraments, confirmation, confession, extreme unction, and matrimony; which last, instead of being instituted by Jesus Christ, was, in fact, appointed by God from the creation of man. 4. It is arbitrary in dividing the eucharist and denying the cup to the laity. 5. It unduly exalts the functions of the priesthood, making the gift of divine grace dependent on the intention of the administrator of a real or supposed sacrament. 6. It sanctions immorality in the highest offices and most sacred ceremonies of religion by maintaining that wickedness, even to the extent of mortal sin, does not disqualify the celebrant from truly administering them. 7. It is erroneous in giving the right of conferring them even to bad living, or even to crime, by teaching men that the sacraments impress upon the soul an indelible character of grace and spirituality, irrespective of their personal faith or practice.

The doctrine of the Old Catholics (q. v.), as stated in Art. VIII. of the Thesaurum agreed upon in the Conference at Brou in 1874, is thus expressed:

1. We acknowledge that the number of the sacraments was fixed at seven first in the 12th century, and then was received into the general teaching of the Church, not as a fixed norm, but as the seven earliest; but, as the result of theological speculation.

2. Catholico theologians (i.e. Bellarmine) acknowledge, and we acknowledge with them, that baptism and the eucharist are 'principia, praecepta, extrema salute nostrae sacramenta.'

IV. Tenets of the Oriental Churches. — The Greek Church, including the Russian, teaches that there are seven sacraments (μυστήρια), the same as the Roman Catholic—namely, baptism, union with chriat, the eucharist, penance, the priesthood, lawful marriage, and extreme unction (Orthodoxa Confessoria [A.D. 1648], q. 98; Insolutori Confessoria [A.D. 1672] q. 38; Concilium Cachemiarum [prepared by Philaret, and approved by the Synod of A.D. 1839], q. 285). That Church hold, indeed, some peculiarities as to the mode of administering certain of these sacraments; but they nevertheless
SACRAMENT

sacrament is the visible sign and pledge of a spiritual reality. It witnesses to that which is invisible and eternal.

Chapter 14, The Use of the Sacraments, contains the following language: "They were ordained, not only to the ends that they might be marks of rites or sacred things, but also to be signs and tokens of the grace of God in the Church. Therefore men are commanded to partake of them so as to join in the faith with which they believe the promises of God in them, and to pray so as to be united to these promises. Therefore we, the Lutheran Church, declare that the sacraments do justify by the work done (esse opera operato), as the Roman Church teaches that the remission of sins is requisite in the sacraments."

Part II, Art. 1, enjoin communion in both kinds, and discoursed in the carrying out the elements in the procession.

Art. 3 says: "Our church is wrongfully accused of being a false mass; for we do not retain among us, and celebrated with great reverence." Nevertheless, the article proceeds to condemn private masses as being celebrated only in licit's sake.

The Augsburg Confession does not definitely assert, but clearly implies, that the sacraments are only two in number. The Helvetic Confession of 1536 was explicit that point, stating, also, that both baptism and the eucharist are only outward signs of the hidden things, the spiritual communication of the body and blood of Christ in the promises of God. That confession also denies that the body and blood of Christ are naturally united, locally included, or actually present in the material bread and wine; but it affirms that the bread and wine, by the institution of God, are symbols through which, as from Christ himself, by the ministry of the Church, a true spiritual communication of his body and blood is made, not in perishable food, but for the sustenance of the soul's life.

In the further development of Protestantism, the most noted ecclesiastical statement of the doctrine of the sacraments is found in the Thirty-nine Articles of the Book of Common Prayer, which in England, originally adopted in 1547. The following extracts embrace the more important points:

"Sacraments ordained of Christ be not only badges or tokens of Christian men's profession, but they are certain sure witnesses and effectual signs of grace and God's good-will towards us, by which he doth work invisibly in us, and doth not only quicken, but also strengthen and confirm, our faith in him."

There are two sacraments ordained of Christ our Lord in the Gospel; that is to say, baptism and the supper of the Lord."

The Lord's Supper is a supper called sacred or holy, confirmation, penance, orders, marriage, and extreme unction—are not to be counted for sacraments of the Gospel."

The body of Christ is present not only in the substance of bread and wine in the supper of the Lord, but in the words of institution (or the change of the substance of bread and wine) in the supper of the Lord cannot be proved by Holy Writ, but is repugnant to the grace of God and the powers of Scripture, overthrows the nature of a sacrament, and hath given occasion to many superstitions."

The body of Christ is given, taken, and eaten in the supper only in a heavenly and spiritual manner; and the manner whereby the body of Christ is received and eaten in the supper is faith."

In the three symbols above quoted may be seen the type or pattern of the Church in its constitution and with slight variations of expression, in all Protestant evangelical churches. The Lutheran churches of Europe and America have alone followed the doctrines of the Augsburg Confession. The Calvinistic churches of all countries have followed, in the main, the Zwinglian doctrine as set forth in the next and theological process; while the formula of the Church of England has been adopted by the Methodistic churches of Great Britain and America and the Protestant Episcopal Church of the United States.

Notwithstanding the variations of views and statements among the churches of the primitive and early Protestantism, yet so substantial was the unity among all classes of the reformers in rejecting the doc-
long and bitter controversy ensued, which extended to several other topics of theology, as well as that relating to the ubiquity, or multipresence, of Christ's body. The high Lutherans insisted upon ubiquity as a necessary result of the real communication of the two natures in Christ; while the Philippians and Calvinists rejected it as inconsistent with the nature of a body, with the reality of Christ's ascension, and with the general principle that the infinite cannot be comprehended or shut up in the finite. At the end of the controversy, the views of the Lutherans became limited by a portion of the Protestants of Germany; while those of Melancthon and Calvin were adopted by the Reformed churches of Germany, Switzerland, France, and the Netherlands. Practically, the same views were embodied in the later Helvetic confessions, in the creeds and catechisms of the Scotch Kirk, and in the Westminster Confession.

During the last three hundred years a great degree of practical unity has prevailed throughout Protestant Christendom in reference to the theory of the sacraments. This fact may be attributed to the general use and recognised authority of the Word of God. There have, indeed, some small or local differences of opinion, and views of Socinus, have, by their theories, reduced the sacraments to mere commemorative observances, having a certain emblematic significance, but void of any spiritual influence. The Friends, or Quakers, have even rejected the sacraments as not designed for continued observance, at least in an outward form. They claim to receive communion only as the Lord's supper.

As to the form and mode of administration of the sacraments, the doctrine of Christ's followers is the baptism of the Holy Ghost, and the true Lord's supper is that alluded to in Rev. iii. 20: “Behold, I stand at the door, and knock: if any man hear my voice, and open the door, I will come in to him, and will sup with him, and he with me.” Aside from this, they hold such slight expectations in the body of Christians, while rejecting the mass and all other superstitious ceremonies of the Roman Catholic Church, have sought to practice the ordinances of baptism and the Lord's supper both in the form and spirit of their original appointment. It is true that somewhat extended controversies have arisen as to the subjects and the mode of baptism, prompted chiefly by the exclusive claims of those who would reject from the Lord's supper all who have not been baptized by immersion (q.v.; also INFANT BAPTISM). Another form of exception to the general Protestant sentiment has been exhibited by that class of Anglicans and others who have distinguished themselves by ritualizing the worship of the Church, which has frequently terminated in adhesion to the Church of Rome, with her full list of sacraments.

VI. Literature.—Taking into view all the phases of controversy that have been developed in reference to the sacraments, the literature of the subject is exceedingly voluminous; but by far the greater part of it is now obsolete and never likely to be reproduced. That the discussions of the past have, on the whole, had a favorable issue is indicated by the fact that the great majority of modern publications relating to baptism and the Lord's supper are of a practical character, aiming to set forth the design, the obligations to the observance, and the duties growing out of them. Publications of this character are so numerous and so common that an attempt to give a full or even a specimen list of their titles is deemed quite unnecessary. The following are chiefly books which discuss the broader aspects of the sacraments in general, or which furnish historical data respecting the development of the doctrine: Chrysostom, On the Priesthood (Homilies); Augustine, On Catechising the Ignorant; On Baptism (Sermons 218, 272); On True Religion; Ambrose, On the Sacraments; Gregory Nazianzen, Oratio 80; Gregory of Nyssa, Catechetical Orations; Cyril of Jerusalem, Catechetical Discourses; Gregory the Great, Liturgy; Book of Morals; the so-called Apostolic Constitutions (bk. 8); Bingham, Antiquities of the Christian Church; Ha-

angenbach, History of Doctrines; Neander, Church History; Gieseler, Church History; Melanchthon, Sententia de Cena Domini; Calvin, De Cena Domini; Alberti, De Eucharistia; Beza, Discourses; Cranmer, Definition of the True Doctrine of the Lord's Supper; Cudworth, True Notion of the Lord's Supper; Halley, On Symbolic Institutions; Barrows, Sermons; South, Sermons; Owen, Sacramental Discourses; Brevant, Sacrament and Sacrifice; Willet, Synopsis Papism; Elliott, Romanism; Bennett, History of the Eucharist; Whately, On the Sacraments; Adam Clarke, On the Eucharist; Lucky, On the Lord's Supper; Nevin, Mystical Presence; Harbaugh, Creed and Cultus; and Essays by other authors in Tercentenary Monument of the Heidelberg Catechism. The authors who have discussed the doctrine of the sacraments as a topic of theology are almost innumerable. See also all Church creeds, e.g., Schaff, Creeds of the Churches (N.Y. 1878, 8 vols. 8vo).

(D. P. K.)

SACRAMENTAL SEAL, an expression used by Romish writers to denote the obligation which rests upon the priesthood to conceal those things the knowledge of which is derived from sacramental confession.

Sacramentals, a name given to those rites which are of a sacramental character, but yet are not true sacraments, such as confirmation and matrimony.

Sacramentarians, a controversial name given by the Lutherans to the Zwinglians to designate their belief that the consecrated elements in the eucharist are merely sacramental symbols, and not in any way the means by which the body and blood of Christ are really and truly present to, and conveyed to, the faithful partaker of them. The third volume of Schlüsselfeld's Hervorragendes Catalogus contains 492 pages "De Secta Sacramentariorum qui Cinglani seu Calvinistes vocantur." See ZWINGLIANS.

Sacramentary, the name of a book in the Romish Church containing the collects, together with the canons, or that part of the sacramental service which is invariable.

Sacraments; Sacramentum. See SACRAMENT.

Sacrament, a term employed by the ancient Romans to denote any place in which sacred things were deposited. A sacrament was either public or private, the former being a part of a temple in which the idol stood, and the latter the part of a private house in which the Penatea were kept. In the early Latin Church the name was given to the chancel or bema, and also to the side table (oblationarium) on which the offerings of the people were deposited.

Sacred Heart, Brothers of the, a lay order in the Roman Catholic Church devoted to the instruction of youth, especially in France, where it was founded by the abbé Coindre in 1826, and whence it extended in 1847 to the United States. The Brothers have academies, orphan asylums, and schools, with more than 600 boys under their care, in Kentucky, Mississippi, and Louisiana.

SACRED HEART (of Jesus), Feast of the, a festival of comparatively modern institution in the Roman Catholic Church, and for a time the subject of much controversy among Roman Catholics themselves. Its origin is traced to a vision recorded of a French nun of the Order of the Visitatation, named Mary Margaret Alcoquy, which she had at Paray-le-Monial, in Burgundy, in the latter half of the 17th century, and whose enthusiasm led her to practice a special devotion to the heart of the Saviour. This devotion was gradually propagated in France, and at length was approved by pope Clement XII in 1732 and 1736, and by Clement XIII in 1753. The festival is held on the Friday after the octave of Corpus Christi.

This festival has for its principal object to excite in the hearts of those who celebrate it a feeling of love to Jesus. It has doubtless given origin to the societies of cognate title. The instructions to these for each day in the week are peculiar. Thus:

"Sunday.—You will enter into the opened heart of Jesus as into a furnace of love, there to purify yourself from all stains contracted during the week, and to destroy the life of sin, that you may live the life of pure love, which will transform all into itself. This day will be dedicated to a special homage to the blessed Trinity.

"Monday.—You will look on yourself as a criminal, who desires to appease his judge by sorrow for his sins, and who is ready to make satisfaction to his justice. You will enter in spirit into the heart of Jesus, in order to escape yourself in that prison of love.

"Tuesday.—You will enter into the heart of Jesus as into a school, in which you are one of his disciples. In this school is learned the science of the saints, the science of pure love, which makes us forget all worldly sciences.

"Wednesday.—You will enter into the heart of Jesus as a passenger into a ship.

"Thursday.—You will enter into the heart of Jesus as a friend who is invited to the feast of his friend. On this day you will perform all your actions in the spirit of love.

"Friday.—You will contemplate Jesus on the cross as a tender mother, who has brought you forth in his heart, with inexpressible pains; you will repose in his arms as a child in the arms of its mother.

"Saturday.—You will offer yourself to the heart of Jesus as a victim coming up to the temple to be immolated and led before the sacrificer."

SACRED HEART (of Jesus), LADIES OF THE, a religious congregation of the Roman Catholic Church, founded in Paris Nov. 21, 1806, and devoted to education. In that year Joseph Desire Varin, superior of the Fathers of the Faith, desiring of establishing a society of women who would devote themselves to the education of young ladies of the higher classes, selected Madeleine Sophie Louise Barat and Octavie Bailly. On Nov. 21 they consecrated themselves to the Heart of Jesus, and opened a school in Paris. They removed to Amiens in 1801, where both their community and pupils increased rapidly. Madame Barat was chosen superior in 1802, branch establishments were founded, and in 1806 a first chapter of the order was held, at which that lady was chosen superior-general, which post she retained till her death, in 1865. Pierre Varin completed his draft of the proposed constitutions in 1825, and they were approved by Leo XII Dec. 22, 1826. Being invited by the pope to Rome, they established themselves in the convent and church of Trinità de' Monti. They spread thence to the chief cities of Italy, and soon owned flourishing schools in Austria, Bavaria, Prussia, Belgium, England, and Ireland. They had come to the United States in 1817 with bishop Dubourg of New Orleans, and founded a house near St. Louis, Mo. Their

Outdoor Dress of the Brothers of the Sacred Heart.
increase in this country is chiefly owing to the late archbishop Hughes, to Madame Elizabeth Gallatin, and especially to Madame Aloysia Harley, who founded the majority of the American houses. They opened a school at the corner of Houston and Mulberry streets, New York, and now the order has spread to the principal states of the Union, to the Canadian provinces, Cuba, and Chili. The rules and constitutions are closely modelled on those of the Society of Jesus in all that regards the conditions for membership, training, degrees, elections, etc. The members employed in teaching and governing are styled "choir religious," the others "lay sisters." According to Appleton's Cyclopaedia, the order had (1873): "In France, 8 provinces and 42 establishments, including 1 in Algiers; the province of Belgium and Holland, with 4 establishments; that of England and Ireland, with 5; that of Italy, with 5; that of Spain, with 3; and that of Austria, with 5. In America, they had in the United States 3 provinces, with 21 houses; the province of Canada, with 5; and the province of Chili, with 5, besides an establishment at Havana. The number of "choir religious" was 2325, and that of lay sisters 1947; total 4272. The central house of the whole order and the residence of the superior-general is in the Boulevard des Invalides, Paris."

Outdoor Dress of the Ladies of the Sacred Heart.

SACRED HEART (of Mary), ORDER OF THE, a society of nuns established at Bâuge, in France, by the abbé Brault in 1755, and devoted to the care of the infirm and neglected, especially during the French Revolution.

SACRED HEARTS (of Jesus and Mary), CONGREGATION OF THE, a religious order in the Roman Catholic Church, founded at Poitiers in 1800 by M. Cordrin and Madame Ayne de la Chevalerie, for the cultivation of personal piety (hence it is sometimes styled the Order of the Perpetual Adoration of the Holy Host), the education of youth, missionary labors, etc. The Congregation has houses in various parts of France. See Migne, Dict. des Ordres Religieux, iv, 1277 sq.

Sacratissima, Christians who, to avoid condemnation before a heathen tribunal, had offered sacrifice to an idol. When such persons, after the persecution was over, returned to the Church, they were obliged to undergo a very rigid penance before they could be readmitted into its fellowship. Sacrificati is their denomination as penitents, after their return to the faith. Those who continued in idolatry were simply apostates. See Li-BELLATICI.

Sacrifice, properly so called, is the solemn infliction of death on a living creature, generally by effusion of its blood, in a way of religious worship; and the presenting of this act to the Deity as a supplication for the pardon of sin, and a supposed mean of compensation for the insult and injury thereby offered to his majesty and government. Among the Hebrews it was an offering made to God on his altar by the hand of a lawful minister. Sacrifice differed from oblation: in a sacrifice there was a real change or destruction of the thing offered, whereas an oblation was but a simple offering or gift. In the Mosaic economy it was the main public form of worship. See also SACRIFICIAL OFFERINGS.

1. Scripture Terms.—The following are the original words used in the Bible to express the sacrificial act:

1. מִנְכָּדָה, minchadh, from the obolete root מָנָכָד, "to give," used in Gen. xxxii, 13, 20, 21, of a gift from Jacob to Esau (Sept. ὀμόσω); in 2 Sam. viii, 2, 6 (εἰνα), in 1 Kings iv, 21 (ὑμαρα), in 2 Kings xvii, 4 (μαμαθ), of a tribute from a vassal king; in Gen. iv, 8, 5, of a sacrifice generally (μαμαθ and ἱππα, indifferently); and in Lev. ii, 1, 4, 5, 6, joined with the word korbêm, of an unbloody sacrifice, or "meat-offering" (generally ὁμόσω ἱππα). Its derivation and usage point to that idea of sacrifice which represents it as a eucharistic gift to our King. See MINCHAH.

2. כְּרָבָן, korbân (derived from the root כַּרָב, "to approach," or [in Hiphil] to "make to approach"); used with minchadh in Lev. ii, 1, 4, 5, 6 (Sept. ἱππα and ἱππα, generally rendered ὁμόσω (see Mark vii, 11, κορβᾶν, ὁ ἱππᾶ and ἵππος), or προσφορά. The idea of a gift hardly seems inherent in the root, which rather points to sacrifice, as a symbol of communion or covenant between God and man. See CORBAN.

3. פְּטַר, ἑβάτα, derived from the root פְּטֵר, "to slaughter animals," especially to "slay in sacrifice," refers emphatically to a bloody sacrifice, one in which the shedding of blood is the essential idea. Thus it is opposed to minchadh in Ps. xl, 6 (יוֹנָאע καὶ προσφορά), and to oldh (the whole burnt-offering) in Exod. x, 25; xviii, 12, etc. With it the expiatory idea of sacrifice is naturally connected. See VICTIM.

4. In the New Test. the comprehensive term is ἱππα (from ἱππα, which seems radically to express the "fuming up of the sacrificial smoke"), which is used both of the victim offered and of the act of immolation, whether literal or figurative.

Distinct from these general terms, and often appended to them, are the words denoting special kinds of sacrifice. See SACRIFICES.

5. ὁλὸς, oldh (Sept. generally ὄλοςτριγωνός), the "whole burnt-offering." See BURN'T-OFFERING.

6. παρίθεμ, shlem (Sept. ζυμωτόν κορμόν), used frequently with τῇ, and sometimes called τῇ, the "peace" or "thank-offering." See each of these words.

7. θείατbeth, chattath (Sept. generally τείματρις), the "sin-offering" (q. v.).

8. θαλαμή, askhâm (Sept. generally θαλαμελία), the "trespass-offering" (q. v.).

9. ἔσπις, ἐσπίς (from ἔσπις, fire), a "sacrifice made by fire"; spoken of every kind of sacrifice and offering, as commonly burned (Lev. ii, 3, 10), and even of those not consumed by fire (xiv, 7, 9); but usually in the ritual formula, "a sacrifice of sweet odor to Jehovah" (i, 9, 18, 17; ii, 2, 9; iii, 5; comp. Exod. xxix, 41; Lev. viii, 21; briefly, Exod. xxix, 18, 25; Lev. ii, 16). See FIRE.

10. τῶν, tothô, is used in a figurative sense only, "a sacrifice of praise." See PRAISE.

11. κληρί, chayy (from κυρίον, to dance in religious joy), is properly a festival only; but by metonymy is occasionally used for the sacrificial victims of such occasions (Exod. xxiii, 19; Ps. cviii, 27; Mal. ii, 5). See FESTIVAL.

The term "sacrifice" is sometimes used figuratively
SACRIFICE

for deep repentance (Psa. ii. 17), for the good works of believers (Phil. iv. 18; Heb. xiii. 16), and for the duties of prayer and praise (Rom. xii. 1; Heb. xiii. 15; 1 Pet. ii. 5).

II. Origin of Sacrifice.—Did it arise from a natural instinct of man, sanctioned and guided by God, or was it the subject of some distinct primeval revelation? This is a question the importance of which has probably been exaggerated. There can be no doubt that sacrifice was begun by God, and carried on with a special and typical reference to the atonement of Christ; its universal prevalence, independent of, and often opposed to, man's natural reasonings on his relation to God, shows it to have been primeval, and deeply rooted in the instincts of humanity. Whether it was first enjoined by an external command, or whether it was based on that sense of sin and lost communion with God which is stamped by his hand on the heart of man, is a historical question, perhaps insoluble, probably one which cannot be treated at all, except in connection with some general theory of the method of primeval revelation, but certainly one which does not affect the authority and the meaning of the rite itself. We need not discuss here the theory of the old English deists, such as Blount and Tyndale, that, as cruel men delighted in bloodshed, so they conceived God to be like themselves, and sought to please and appease him by the slaughter of innocent beasts; or the special improvement of this theory which Spencer (De Leg. &c., l. iii. dis. iii.) framed, that men sacrificed originally because of the savage wildness of their nature, and that God accepted and ratified their grim worship to restrain them from what was worse. The question is now proposed in this form: Did sacrifice arise from the natural religious instinct of man, with or without (for both views are held) an unconscious inspiration of the Divine Spirit, or did it originate in a distinct divine revelation? Those who advocate the former view speak of sacrifice as the "free expression of the divinely determined nature of man" (Neumann). "Man sacrifices because of his inalienable divine likeness, according to which he cannot cease to seek that communion with God for which he was created, even through such an effectual self-sacrifice as is exhibited in sacrifice. Sacrifices have thus been as little an arbitrary invention of man as prayer. Like prayer, they have originated in an inner necessity to which man freely surrenders himself" (Oehler, in Herzog's Real-Encycl., i. 167).

1. One recent writer on the subject (Davison, Inquiry into the Origin and Intent of Primitive Sacrifice, 1825) adduces (on the authority of Spencer and Outram) the consent of the fathers in favor of the human origin of primitive patriarchal sacrifice, and alleges that the notion of its divine origin is "a mere modern figment, exasperated in the presumptively speculative age of innovating Puritanism." This assertion has, in part, been met by Faber (Treatise on the Origin of Expiatory Sacrifice, 1827), who shows that the only authorities adduced by Outram (De Sacrificiis) and Spencer (De Leg. &c., l. iii.) are Justin Martyr, Chrysostom, the author of the Apostolical Constitutions, and the author of the Questions and Answers to the Orthodox. Faber impatiently quotes with the works of Justin Martyr. Of the early theologians thus adduced, the last three are positive and explicit in their assertion, while the sentiments of Justin Martyr are gathered rather by implication than by consciousness of any direct avowal. He says, "As circumcision, consecration to the Sabbath, and sacrifices, and oblations, and festivals commenced from Moses," which clearly intimates that he considered primitive sacrifice as a human invention until made by the law a matter of religious obligation. The great body of the fathers are silent as to the origin of sacrifice, and in consequence, of them, cited by Spencer (De Leg. &c., p. 646 sq.), held that sacrifice was admitted into the law through condescension to the weakness of the people, who had been familiarized with it in Egypt, and, if not allowed to sacrifice to God, would have been tempted to sacrifice to the idols of their neighbors. The author who held this opinion are Justin Martyr, Origen, Tertullian, Chrysostom, Theodoret, Cyril of Alexandria, Epiphanius of Salamis, Irenaeus, Jerome, Procopias, Eucherius, Anastasius, and the author of the Apostolical Constitutions. But out of the entire number, only the four already mentioned allege incidentally the human origin of primitive sacrifice, and none with a special and direct reference to the same point. "So, then, if men sacrificed (De Sacrificiis, lib. i., cap. 1, § 6, p. 8, 9), thinks that is giving this opinion they virtually deny the divine origin of sacrifice. But it is fairly answered that the assertion, if it be right or be wrong, that sacrifice was introduced into the law from condescension to the Egyptians, "on account of their weakness," furnishes no legitimate proof that the persons entertaining this opinion held the mere human origin of primitive patriarchal sacrifice, and affords no ground for alleging the consent of Christian antiquity in favor of that opinion. Such persons could not but have known that the rite of sacrifice existed anterior to the rise of pagan idolatry; and hence it appears from all that we need not discuss here the question as to the primitive origin of sacrifice entirely open, so far as they are concerned. Paganism, whether in Egypt or elsewhere, merely borrowed the rite from pure patriarchalism, which already possessed it; and unless a writer expressly declares such to be his opinion, we are not warranted in concluding that he entertained it. It was now, perhaps, the first indication of the human origin of primitive patriarchal sacrifice, simply because he conceived that a system of sacrificial service had been immediately adopted into the law from paganism out of condescension to the weakness of the people. Besides, some of these very fathers held language with respect to primitive sacrifice not much in favor of the interpretation which has, on this ground, been given to their sentiments. Thus, according to Cyril, "God accepted the sacrifice of Abel and rejected the sacrifice of Cain, because it was fitting that posterity should learn from thence how they might blamelessly offer unto God his meet and due honor." If, then, these authorities be taken as neutral on the question, with the four exceptions already indicated, we shall find whatever authority we ascribe to these more than counterbalanced by the testimony of other ancient witnesses in favor of the divine origin of primitive sacrifice. Philo-Judaus says, "Abel brought neither the same obligation as Cain, nor in the same manner; but, instead of things inanimate, he brought his own live lamb; and after the secondary products, he brought the older and the first: for he offered in sacrifice from the firstlings of his flock, and from their fat, according to the most holy command" (De Sacrifici. Abela et Caini, in Op. p. 145). Augustine, after expressly referring the origin of sacrifice to the divine command, more distinctly evokes his meaning by saying, "The prophetic immolation of blood, testifying from the very commencement of the human race, the future passion of the Mediator, is a matter of deep antiquity; insomuch as Abel is found in Holy Scripture to have been the first who offered up this prophetic immolation" (Contra Faust. Monich. in Op. v. 11). Next, Augustine (De Hier. Maior, i. c. 408) appeals to Athenæus, who gives the consent of the Old Testament to the fundamental doctrines of the New, says: "What Moses taught, these things his predecessor Abraham had preserved; and what Abraham had preserved, with those things Enoch and Noah were well acquainted; for they made a distinction in their sacrifices. And Abraham, the first of all the patriarchs, was capable of God. Thus, also, in like manner, Abel bore testimony; for he knew what he had learned from Adam, and Adam himself taught only what he had previously learned from the Lord" (Symb. Niceno-cens. contra Herr. Ari. in Opp. i. 408). Eusebius of Caesarea, in a passage of which originary sacrifice was first of all practised by the ancient lovers of God (the patriarchs), and that not by accident, but through a certain divine contrivance, under which, as
taught by the Divine Spirit, it became their duty thus to shadow forth the great and venerable victim, really acceptable to God, which was, in time then future, destined to be offered in behalf of the whole human race (Deut. 32:35).

Among the considerations urged in support of the opinion that sacrifice must have originated in a divine command, it has been suggested as exceedingly doubtfully whether, independently of such a command, and as distinct from all natural avocations, animal sacrifice, which involves the practice of slaughtering and burning an innocent victim, could ever, under any aspect, have been adopted as a rite likely to gain the favor of God. Our own course of scriptural education prevents us, perhaps, from being competent judges on this point; but we have means of judging how so singular a rite must strike the mind of any man in the same degree prepossessed by early associations. The ancient Greek masters of thought not unfrequently expressed their astonishment how and upon what rational principles so strange an institution as that of animal sacrifice could ever have originated; for as to the notion of its being pleasurable to the Deity, such a thought struck them as most impious (Isa. 66:3; Ps. 50:21; 51:16; 53:12; 55:9; 66:18; 80:15).

The only sacrifice of which we have any positive evidence is that which was common and frequently performed by the Israelites, and, in fact, Grotius, who held the human origin of sacrifices, and yet believed that animal food was not used before the Deluge, is reduced to the expedient of contending that Abel's offering was not an animal sacrifice, but only the produce—the milk and wool—of his best sheep. This, however, shows that he believes animal sacrifice to have been impossible before the Deluge without the sanction of a divine command, the existence of which he discredited.

A strong moral argument in favor of the divine institution of sacrifice, somewhat feebly put by Hallett (Comment. on Gen. xi, 4, cited by Magee, On the Atonement, p. 183), it amounts to this: (1) Sacrifice, when commanded by God, is a mere act of gratuitous superstition; whence, on the principle of Paul's reprobation of what he denominates will- worship, it is neither acceptable nor pleasing to God. (2) But sacrifices during the patriarchal age were not commanded by God, and are not, therefore, acceptable to him. (3) Therefore, sacrifice during the patriarchal age could not have been an act of superstition uncommanded by God. (4) If, then, such was the character of primitive sacrifice—that is to say, if primitive sacrifice was not a mere act of gratuitous superstition uncommanded by God—it must, in that case, indubitably have been a divine, and not a human, institution. If it be held that any of the ancient sacrifices were expiatory, or purificatory, the argument for their divine origin is strengthened, as it is hard to conceive the combination of ideas under which the notion of expiatory sacrifice could be worked out by the human mind. This difficulty is so great that the ablest advocates of the human origin of primitive animal sacrifice feel bound also to deny that such sacrifices as then existed were purificatory. It is strongly insisted that the doctrine of an atonement by animal sacrifice cannot be deduced from the light of nature or from the principles of reason. If, therefore, the doctrine of the sacrifice of Noah by the Israelites is so sacramental a doctrine, it is no wonder that the supreme sacrifice of Christ is not the affair of the intellect, but rather of the heart, of the feeling soul of the sinner, that is the object of our religio-sexual affections. The supposition of the "skins of beasts" in Gen. iii, 21 were skins of animals sacrificed by God's command is a pure assumption. The argument on Heb. xi, 4, that faith can rest only on a distinct divine command, and that the special mode of the sacrifice is contradicted by the general definition of it given in ver. 1. (See below.)

Nor is the fact of the miraculous and supernatural character of the doctrine of atonement, with which the sacrifices of the O. T. are expressly connected, any conclusive argument on this side of the question. All allow that the mystic and dialogical ideas of sacrifice are perfectly natural to man. The higher view of its expiatory character, dependent, as it is, entirely on...
its typical nature, appears but gradually in Scripture. It is veiled under other ideas in the case of the patriarchal sacrifices. It is first distinctly mentioned in the Law (Lev. xvi, 11, etc.); but even then the theory of the sin-offering, and of the classes of sins to which it referred, is allowed to be obscure and difficult; it is only in the N.T. (especially in the Epistle to the Hebrews) that its nature is clearly unfolded. It is as likely that it pleased God gradually to superadd the higher idea to an institution, derived by man from the lower ideas (which might eventually find their justification in the higher), as that he originally commanded the institution when the time for the revelation of its full meaning was not yet come. The rainbow was just as much a token of God’s approval in Genesis ix, 13–17, whether it had or had not existed as a natural phenomenon before the flood. What God sets his seal to he makes a part of his revelation, whatever its origin may be. It is to be noticed (see Warburton, Div. Leg. ix, 2) that, except in Gen. xxv, 9, the method of patriarchal sacrifice is left free, without any direction on the part of God, while in all the Mosaic ritual the limitation and regulation of sacrifice, as to time, place, and material, is a most prominent feature, on which much of its distinctness from heathen sacrifice depended. The inference is at least probable that when God sanctioned formally a natural rite, then, and not till then, He gave the method. See on the question, in addition to the above treatises, Sykes, Essay on the Nature, Origin, and Design of Sacrifices; Taylor, Scripture Doctrine of the Atonement (1758); Ritchie, Criticisms upon Modern Notions of Sacrifices (1761); Magee, Discourses on Atonement and Sacrifice. See also Atonement.

III. Biblical History of Sacrifices.—1. Ante-Mosaic Instances.—In examining the various sacrifices recorded in Scripture before the establishment of the law, we find that the words specially denoting expiatory sacrificial (נָעַם and בּוֹקֵץ) are not applied to them. This fact does not at all show that they were not actually expiatory, nor even that the offering had not that idea of expiation which must have been vaguely felt in all sacrifices; but it justifies the inference that this idea was not then the prominent one in the doctrine of sacrifice.

The sacrifice of Cain and Abel is called 민첩, although in the case of the latter it was a bloody sacrifice. (So in Heb. xii, 4 the word סירות is explained by the τοις δώροις below.) In the case of both it would appear to have been eucharistic, and the distinction between the offerings to have lain in their "faith" (Heb. xii, 19) that faith of Abel referred to the promise of the Redeemer and was connected with any idea of the typical meaning of sacrifice, or whether it was a simple and humble faith in the unseen God, as the giver and promised of all good, we are not authorized by Scripture to decide. See CAIN.

The sacrifice of Noah after the flood (Gen. viii, 20) is called burnt-offering (올.). This sacrifice is expressly connected with the institution of the covenant which follows in ix, 8–17. The same ratification of a covenant is seen in the burnt-offering of Abraham, especially enjoined and defined by God in Gen. xv, 9, and is probably to be traced in the "building of altars" by Abraham and Jacob at Bethel (Gen. xii, 7, 8) and Mamre (xiii, 18), by Isaac at Beerseba (xxvii, 25), and by Jacob at Shechem (xxxii, 20), and in Jacob’s setting-up and anointing of the pillar at Bethel (xxxvii, 18; xxxvii, 14). The sacrifice (טבּך) of Jacob at Mizpah also marks a covenant with Laban, to which God is called to be a witness and a party. In all these, therefore, the prominent idea seems to be seen where it is called the federative, the recognition of a bond between the sacrificer and God, and the dedication of himself, as represented by himself, to the service of the Lord. See NOAH.

The sacrifice of Isaac (Gen. xxii, 1–19) stands by itself as the sole instance in which the idea of human sacrifice was even for a moment, and as a trial, countenanced by God. Yet in its principle it appears to have been of the same nature as before: the voluntary surrender of an only son on Abraham’s part, and the willing dedication of himself on Isaac’s, are in the foreground; the expiatory idea, if recognised at all, holds a secondary position. See ISAAC.

In the burnt-offerings of Job for his children (Job i, 5) and for his three friends (xili, 8), we, for the first time, find the expression of the desire of expiation for sin accompanied by repentance and prayer, and brought prominently forward. The same is the case in the world-wide solemn expiation in God’s name (Exod. xx, 13–17), whether it had or had not existed as a natural phenomenon before the flood. What God sets his seal to he makes a part of his revelation, whatever its origin may be. It is to be noticed (see Warburton, Div. Leg. ix, 2) that, except in Gen. xxv, 9, the method of patriarchal sacrifice is left free, without any direction on the part of God, while in all the Mosaic ritual the limitation and regulation of sacrifice, as to time, place, and material, is a most prominent feature, on which much of its distinctness from heathen sacrifice depended. The inference is at least probable that when God sanctioned formally a natural rite, then, and not till then, He gave the method. See on the question, in addition to the above treatises, Sykes, Essay on the Nature, Origin, and Design of Sacrifices; Taylor, Scripture Doctrine of the Atonement (1758); Ritchie, Criticisms upon Modern Notions of Sacrifices (1761); Magee, Discourses on Atonement and Sacrifice. See also Atonement.

The sacrifice of Isaac (Exod. xxiv, 8, 10; xxxiv, 25) was not unlike in that the flesh was to be eaten by all (not burnt, or eaten by the priests alone), in token of their entering into covenant with God, and eating "at his table," as in the case of a peace-offering. Its peculiar position as a historical memorial, and its special reference to the future, naturally mark it out as incapable of being referred to any formal class of sacrifice; but it is clear that the idea of salvation from death by means of sacrifice is brought out in it with a distinctness before unknown. See PASSOVER.

The sacrifice of Exod. xxiv, offered as a solemn inauguration of the covenant of Sinai, has a similarly comprehensive character. It is called a burning-offering and a peace-offering in ver. 5; but the solemn use of the blood (comp. Heb. ix, 10–22) distinctly marks the idea that expiatory sacrifice was needed for entering into covenant with God, and that the sin and trespass offerings were afterwards the symbols.

The law of Leviticus now unfolds distinctly the various forms of sacrifice:

(a.) The burnt-offering. Self-dedicatory.
(b.) The burnt-offering (unbloody).—Eucharistic.
(c.) The peace-offering (bloody).—Expiatory.
(d.) The sin-offering. "Expiatory." The trespass-offering after sacrifice in the Holy Place, and (on the Day of Atonement) in the Holy of Holies, the symbol of the intercession of the priest (as a type of the Great High-priest), accompanying and making efficacious the prayer of the people.

In the consecration of Aaron and his sons (Lev. viii) we find these offered in what became ever afterwards the appointed order: first came the sin-offering, to prepare access to God; next the burnt-offering, to mark their dedication to his service; and, thirdly, the meat-offering of thanksgiving. The same sacrifices, in the same order, with the addition of a peace-offering (eaten, no doubt, by the priests), were offered weekly after for all the congregation, and accepted visibly by the descent of fire upon the burnt-offering. Henceforth the sacrificial system was fixed in all its parts, until He should come whom they typified. It is to be noticed that the law of Leviticus takes the rise of sacrifice for granted (see Lev. ii, 2; xi, 1, etc.); "If a man bring an offering of corn, or if of flesh, or of fat, or of wine," etc. It shows what was intended to guide and limit its exercise. But in every case that of the peace-offering the nature of the victim was carefully prescribed, as so to preserve the idea symbolized, but so as to avoid the notion (so inherent in heathen sac-
SACRIFICE 223

SACRIFICE

tems, and finding its logical result in human sacrifice) that
the more costly the offering, the more surely must it
meet with acceptance. At the same time, probably
in order to impress this truth on the mind, and also
to guard against corruption by heathenish ceremonial,
and against the notion that sacrifice in itself, without
obedience, could avail (see 1 Sam. xvii, 22, 23), the place of
offering was expressly limited, first to the Tabernacle,
then to the Temple, and finally to the Temple. (The instants of in-
fringement of this rule unenclosed, see Judg. ii, 5; vi,
26; xiii, 19; 1 Sam. xi, 15; xvi, 5; 2 Sam. vi, 13; 1
Kings iii, 2, 3. Most of these cases are special, some
authorized by special command; but the law probably
did not attain to its full strictness till the foundation of
the Temple. The limitations are to be considered as
periodical gathering as one nation before God, and so
kept clearly before their minds their relation to him
as their national King. Both limitations brought out
the great truth that God himself provided the way by
which man should approach him, and that the method
of reconciliation was initiated by him, and not by them.
In consequence of the peculiarities of the law, it has
been argued (as by Outram, Warburton, etc.) that
the whole system of sacrifice was only a concession
to the weakness of the people, borrowed, more or less, from
the heathen nations, especially from Egypt, in order to
guard against worse superstition and positive idolatry.
The system can only be understood based on the basis of
levi, vi, 2) on Ezek. xx, 25, and similar references in
the Old and New Test. to the nullity of all mere ceremo-
nial. Taken as an explanation of the theory of sacri-
ifice, it is weak and superficial; it labors under two fatal
difficulties, the historical fact of the primeval existence
of sacrifice, and its typical reference to the one atone-
ment of Christ, which was foreordained from the very
beginning, and had been already typified, as, for exam-
ple, in the sacrifice of Isaac. But as giving a reason
for the minuteness and elaboration of the Mosaic cere-
monial so remarkably contrasted with the freedom of
patriarchal sacrifice, and as furnishing an explanation of
certain special rites, it may probably have some val-
ue. It certainly contains this truth: that the craving
for visible tokens of God's presence, and visible rites of
worship, from which idolatry proceeds, was provided for
and turned into a safe channel by the whole ritual
and ceremonial organization of the Mosaic covenant.
The contact with the gigantic system of idolatry which
prevailed in Egypt, and which had so deeply tainted
the spirit of the Israelites, would doubtless render such
provision then especially necessary. It was one part
of the prophetic office to guard against its degradation
into formalism, and to bring out its spiritual meaning
and widen out its interpretation.
3. Post-Mosaic Sacrifices.—It will not be necessary
to pursue, in detail, the history of Post-Mosaic sacri-
fice, for its main principles were now fixed forever.
The most remarkable instances of sacrifice on a large
scale are by Solomon at the consecration of the Temple
(1 Kings viii, 63), by Nehemiah after the death of Atha-
liah (2 Chron. xxxii, 18), and by Hezekiah at his great
Passover and restoration of the Temple-worship (2
Chron. xxx, 21-24). In each case the lavish use of
victims was chiefly in the peace-offering, which were
a sacred national feast to the people at the table of
the Great King.

The regular sacrifices in the Temple service were:

(a.) Burnt-offerings. The daily burnt-offerings (Exod. xxii, 38-42).
(b.) The double burnt-offerings on the Sabbath (Num.
xxvii, 9, 10).
(c.) Burnt-offerings at the great festivals (Num.
xxviii, 11-xxix, 89).
(d.) Meat-offerings. The daily burnt-offerings accompanying the daily
burnt-offerings (flour, oil, and wine) (Exod. xxix, 40, 41).
(e.) Renewed every Sabbath (Lev. ix, 3). 4. The special meat-offerings at the Sabbath and the
great festivals (Num. xxviii, xxix).

4. The first-fruits, at the Passover (Lev. xxii, 12-14), at
Pentecost (Lev. xxiii, 20), and at the harvest-time
(Num. xv, 26, 31; Deut. xxvi, 1-11), called "heave-
offerings."

(c.) Sin-offerings.
(d.) Sin-offering (a kid) each new moon (Num. xxix, 18).
(e.) Sin-offerings at the Passover, Pentecost, Feast of
Trumpets, and of Atonement (Num. xxviii, 29, 30; xxix, 5,
15, 19, 29, 35, 31, 34, 35).
5. The offering of the two goats (the goat sacrificed, and
the scape-goat) for the people, and for the bull for the
priest himself on the Great Day of Atonement (Lev.
xxviii, 13).
6. Incense. The morning and evening incense (Exod. xxx, 7, 8).
7. The incense on the Great Day of Atonement (Lev.
xxviii, 13).

Besides these public sacrifices, there were offerings for
the people for themselves individually: at the purifica-
tion of women (Lev. xii); the presentation of the first-
born, and circumcision of all male children; the clean-
ing of the leper (ch. xiv) or any uncleanness (ch.
xxv); at the fulfillment of Nazirite and other vows
(Num. vi, 1-21); on occasions of marriage and of
burial, etc., besides the frequent offering of private sin-
offerings. These must have kept up a constant suc-
cession of sacrifices every day, and brought the rite
home to every man's thought and to every occasion of
human life. See SACRIFICAL OBLIGATIONS.

IV. SIGNS AND SYMBOLS OF THE MECOMONIAL SACRIFICES.—In ex-
amining the doctrine of sacrifice, it is necessary to re-
member that, in its development, the order of idea is
not necessarily the same as the order of time. By
the order of sacrifice in its perfect form (as in Lev. vii)
it is clear that the sin-offering occupies the most
important place, the burnt-offering comes next, and the
peace-offering, or peace-offering, last of all. The second
could only be offered after the first had been accepted;
the third was only a subsidiary part of the second. Yet,
in actual order of time, it has been seen that the patri-
archal sacrifices partook much more of the nature of the
peace-offering and burnt-offering; and that, under the
law, by which was "the knowledge of sin" (Rom. iii,
20), the sin-offering was for the first time explicitly set
forth. This is but natural, that the deepest ideas should
be the last in order of development.

It is also obvious that those who believe in the unity
of the Old and New Test., and the typical nature of the
Mosaic covenant, must view the type in constant
reference to the antitype, and be prepared, therefore,
to find in the former vague and recondite meanings
which are fixed and manifested by the latter. The
sacrifices must be considered, not merely as they stand in
the law, but as they appear to the prospects of those
who made them, but as they were illustrated by the
prophets, and perfectly interpreted in the N.T. (e.g. in the
Epistle to the Hebrews). It follows from this that, as belonging
to a system which was to embrace all mankind in its
influence, they should be also compared and contrasted
with the sacrifices and worship of God in other nations,
and the ideas which in them were dimly and confusedly
expressed.

1. Contrast with Heathenism.—It is needless to dwell
on the universality of heathen sacrifices (see Magge,
Dia. on Sacrifice, vol. i, dia. v, and Ernst von Lasaix,
Treatment of Greek and Roman Sacrifice, quoted in notes
23-26 to Thomson's Hampton Lectures, 1860), and it is
difficult to reduce to any single theory the various ideas
involved therein. It is clear that the sacrifice was often
looked upon as a gift or tribute to the gods; an idea
which, for example, runs through all Greek literature,
from the simple conception in Homer to the caricatures
of Aristophanes or Lucian, against the notion of
which Paul protested at Athens, when he declared that
It is also clear that sacrifices were used as prayers to
obtain benefits or to avert wrath, and that this idea
was corrupted into the superstition, denounced by hea-
then satirists as well as by Hebrew prophets, that by

Digitized by Google
SACRIFICE 224 SACRIFICE

them the gods' favor could be purchased for the wick
ed, or their "envy" be averted from the prosperous. On the other hand, that they were regarded as thank
offerings, and the feast on their flesh as a partaking of the "table of the gods" (comp. 1 Cor. xv, 29, 31), is equally certain. Nor was the higher idea of sacrifice as a representation of the self-devotion of the offerer, and ultimately of the gods themselves, though generally obscured by the grosser and more obvious concep
tions of the rite. But, besides all these, there seems always to have been latent the idea of propitiation; that is, the belief in a communion with the gods, natur
al to man, broken off in some way, and by sacrifice to be renewed. This is a type of the shedding of the blood as the essential part of the sacrifice, while the flesh was often eaten by the priests or the sacrificer, is not capa
ble of a full explanation by any of the ideas above referred to. Whether it represented the death of the sacrificer, or (as in cases of national offering of human victims, and of those self-devoted for their country) an atoning death for him; still, in either case, it contained the idea that "without shedding of blood is no remis
sion," and so had a vague and distorted glimpse of the great central truth of revelation. Such an idea may be, has been argued, "unnatural," in that it could not be explained by natural reason; but it certainly was not unnatural in frequency of existence and ac
cordance with a deep natural instinct be allowed to preclude that epithet.

Now, the essential difference between these heathen views of sacrifice and the scriptural doctrine of the O. T. is not to be found in its denial of any of these ideas. The very names used in it for sacrifice, as is seen above, involve the conception of the rite as a gift, a form of wor
ship, a thank-offering, a self-devotion, and an atone
ment. In fact, it brings out, clearly and distinctly, the ideas which, in heathenism, were uncertain, vague, and perverted. But the essential points of distinction are two:

(1) Whereas the heathen conceived of their gods as alienated in jealousy or anger, to be sought after, and to be appeased by the unaided action of man, Scripture represents God himself as approaching man, as point
ing out and sanctioning the way by which the broken covenant should be restored. This was impressed on the mind step by step by the clear and simple directions of the law as to time, place, victim, and ceremonial, and by its utterly disowning the "will-worship" which in heathenism found full scope, and rested in the invention of costly or monstrous sacrifices. It is especially to be noted that this particularity is increased as we ap
proach nearer to the deep propitiatory idea; for whereas the patriarchal sacrifices generally seem to have been undefined by God, and, even under the law, the nature of the peace-offerings, and, to some extent, the burnt-offerings, was determined by the sacrificer only, yet the solemn sacrifice of Abraham in the inauguration of his covenant was prescribed to him, and the sin-offer
ings under the law were most accurately and minutely determined (see, for example, the whole ceremonial of Lev. xxvi.). It is needless to remark how this essential difference purifies all the ideas above noticed from the corruptions which made them odious or contemptible, and sets on its true basis the relation between God and fallen man.

(2) The second mark of distinction is closely con
nected with this, inasmuch as it shows sacrifice to be a scheme proceeding from God, and, in his foreknowledge, connected with the one central fact of all human his
tory. It is to be found in the typical character of all Jewish sacrifices, on which, as the Epistle to the He
brews teaches, their efficacy depended. It must be remembered that, like other ordinances of the law, they had a twofold effect, depending on the special position of an Israelite as a member of the national theocracy, and on his general position as a man in relation with God. On the one hand, for example, the sin-offering was an atonement to the national law for moral offenses of negligence, which in "presumptuous"-i.e., deliberate and wilful-crime was rejected (see Numb. xxv, 27-31; and comp. Heb. x, 26, 27). On the other hand, it had, as the prophetic writings show us, a distinct spiritual sig
ificance as a means of expressing repentance and re
ceiving forgiveness, which could have belonged to it alone. It was only the one, thought generally, by the typical meaning was recognized at different periods and by different persons, it is useless to speculate; but it would be impossible to doubt, even if we had no testi
mony on the subject, that, in the face of the high spiri
tual teaching of the law and the prophets, a pious Israel
ite would still believe in the necessity of material sacrifice in its
self, and so believe that it cannot be any, and must be any, atonement of God, shadowing out some great spiritual truth or action of his. Nor is it unlikely that, with more or less distinctness, he connected the evolution of this, as of other truths, with the coming of the promised Mes
siah. But, however this be, we know that, in God's pur
pose, the whole system was typical; that all its spiri
tual efficacy depended on the true sacrifice which it re
presented, and could be received only on condition of faith; and, that therefore, it passed away when the Antitype had come.

2. The nature and meaning of the various kinds of sac
rifice. (a) Covenant offerings. From the form of their in
stitution and ceremonial, partly from the teaching of the prophets, and partly from the N. T., especially the Epistle to the Hebrews.

(1) Old Testament Relations.-Here all had relation, under different aspects, to a covenant between God and man.

(2) The sin-offering represented that covenant as broken by man, and as knit together again, by God's appoint
ation, through the "shedding of blood." Its characteristic ceremony was the sprinkling of the blood before the veil of the sanctuary, the putting some of it on the horns of the altar of incense, and the pouring-out of all the rest at the feet of the altar of burnt-offering. The flesh was in no case touched by the offerer; either it was consumed by fire without the camp, or it was eaten by the priest alone in the holy place, and every
thing that touched it was holy (בְּשַׁהוּת). This latter point marked the distinction from the peace-offering, and showed that the sacrificer had been rendered unworthy of communion with God. The shedding of the blood, the symbol of life, signified that the death of the offender was deserved for sin, but that the death of the victim was accepted for his death by the ordinance of God's mercy. This is seen most clearly in the ceremo
nial of the burnt-offering, where the whole blood of one animal, the high-priest's hand was laid on the head of the scape-goat—which was the other part of the sin-offering—with confession of the sins of the people, that it might visibly bear them away, and so bring out explicitly what in other sin-offerings was but implied, as a type, as we find (see quotation from the Mishna in Outram, De Sacer, i, ch. xv, § 10) that in all cases it was the custom for the offerer to lay his hand on the head of the sin-offering, to confess, generally or specially, his sins, and to say, "Let this be my expia
tion." Beyond all doubt, the sin-offering distinctly witnessed that sin existed in man, that the "wages of that sin" were death, and that God had accepted their im
ment by the vicarious suffering of an appointed victim. The reference of the Baptist to a "Lamb of God who taketh away the sins of the world" was one understood and hailed at once by a "true Israelite." See SIN-OFFER
ING.

(3) The ceremonial and meaning of the burnt-offer
ing were very different. The idea of expiation seems not to have been absent from it, for the blood was sprinkled round about the altar of sacrifice; and, befo
re the Levitical ordinance of the sin-offering to pre
cede it, this idea may have been even prominent. But
in the system of Leviticus, it is evidently only second-
ary. The main idea is the offering of the whole victim
to God, and in this respect the sacrifice again into ove-
head shows) the devotion of the sacrificer, body and
soul, to him. The death of the victim was (so to speak)
an incidental feature, to signify the completeness of the
devotion; and it is to be noticed that, in all solemn sac-
rifices, no burnt-offering could be made until a previous
sacrifice of blood had been made and walk honoring of
beverages, and the like, made in the sanctuaries, and
many others, are directed to one object—not to dis-
courage sacrifice, but to purify and spiritualize the feel-
ings of the offerers.

The same truth, here enunciated from without, is
recognised from within by the Psalmist. Thus he says,
in Psa. xi, 8-11, "Sacrifice and meat-offering, burnt-
offering and sin-offering, is too small for thee: I have
not acquainted thee with the terrors of the Lord, nor
with the glory of his power; such sacrifices as these
contrasts with them the homage of the heart."—Mine ears hast thou bored," and the active service of life—"Lo! I
come to do thy will, O God." In Isa. 12, 14, sacrifice
is contrasted with prayer and adoration (comp. Psa. xxii,
2): "Thine own soul, that I will eat bulls' flesh, and
drink the blood of goats! Offer unto God thankgiv-
ing; and pay thy vows to the Most High: and call upon
me in the day of trouble." In Psa. ii, 16,17, it is similarly
contrasted with true repentance of the heart: "The
sacrifice of God is a troubled spirit, a broken and a con-
trite heart." Yet here also the next verse shows that
sacrifice was not superseded, but purified: "Then
shall thou be pleasing with burnt-offerings and oblations;
then shall they offer young bullocks upon thine altar.
These passages are correlative to the others, expressing
the feelings, which those others in God's name require.
It is not to be argued from them that this idea of self-
dedication is the main one of sacrifice. The idea of
propitiation lies below it, taken for granted by the
prophets as by the whole people, but still enveloped in
mystery until the Antitype should come to make all
clear. For the evolution of this doctrine we must look
to the N. T.; the preparation for it by the prophets
was (so to speak) negative, the pointing out the nullity
of all other propitiations in themselves, and then learn-
ing the warnings of the conscience and the cravings
of the heart to fix men's hearts on the better atonement
to come.

(2.) New Testament Exposition.—Without entering
directly on the great subject of the atonement (which
would be foreign to the scope of this article), it will be
clearly shown in the next chapter, that the connection established in the
N. T. between it and the sacrifices of the Mosaic system.
To do this, we need do little more than analyze the
Epistle to the Hebrews, which contains the key of the
whole sacrificial doctrine.

(a.) In the first place, it follows the prophetic books
by stating, in the most emphatic terms, the intrinsic
necessity of all mere material sacrifices. The "gifts and
sacrifices" of the first tabernacle could "never make the
sacrificers perfect in conscience" (κατα συνήθειαν;) they were but "carnal ordinances, imposed on them till the
time of reformation" (τῶν υποκυνίων;) (Heb. ix, 9, 10).
The very fact of their constant repetition is said to
prove this to be the case, with the fundamental principle "that it is impossible that the blood of
bulls and goats should take away sin" (x, 4). But
it does not lead us to infer that they actually had no
spiritual efficacy if offered in repentance and faith.
On the contrary, the object of the whole epistle is to show
their value, and the basis on which they are useful, to
those who "cease to do evil and learn to do well... though
their sins be as scarlet, they shall be white as snow." Jeremiah reminds them (vii, 22, 23) that the Lord did not "command burnt-offerings or sacrifices"
under Moses, but said, "Obey my voice, and I will be your God." Ezekiel is full of such passages (xx, 39-44)
against the pollution of God's name by offer-
ings of those whose hearts were with their idols. Ho-

sets forth God's requirements (vi, 6) in words which
our Lord himself sanctioned: "I desired mercy and not
sacrifice, and the knowledge of God more than burnt-
offerings." Amos (v, 21-27) puts it even more strongly:
that God "hates" that their offerings "run down like water, and righteousness like a mighty
stream." And Micah (vi, 6-8) answers the question
which lies at the root of sacrifice—"Wherewith shall I
come before the Lord?" by the words, "What doth the
Lord require of thee, but to do justly, and love mercy,
and to walk humbly with thy God?"—to which "the con-
trasts with them the homage of the heart."—Mine ears hast thou bored," and the active service of life—"Lo! I

SACRIFICE

sacrifice alone procured. Otherwise the whole sacrificial system would have been one mere permission and a statute. The sins provided for by the sin-offering were certainly in some cases moral. The whole of the Mosiac description of sacrifices clearly implies some real spiritual benefit to be derived from them, besides the temporal privileges belonging to the national theocracy. Just as Paul argues (Gal. iii. 15–29) that the promise of the covenant to Abraham were of primary, the law only of secondary importance—so that men had under the law more than they had by the law—so it must be said of the Levitical sacrifices. They could convey nothing in themselves; yet, as types, they might, if accepted by a true, though necessarily imperfect faith, be made the means of some degree the blessings of the Antitype. See Typ. (b) This typical character of all sacrifice being thus set forth, the next point dwelt upon is the union in our Lord's person of the priest, the offerer, and the sacrifice. See Priest. The imperfection of all sacrifices, which made them, in themselves, liable to supersession and even explicable, lies in this: that, on the one hand, the victim seems arbitrarily chosen to be the substitute for, or the representative of, the sacrificer; and that, on the other, if there be a barrier of sin between man and God, he has not right of approach, or security that his sacrifice will be accepted; that there needs, therefore, to be a mediator, i.e. (according to the definition of Heb. v. 1, 4), a true priest, who shall, as being one with man, offer the sacrifice, and accept it, as being one with God. It is shown that this imperfection, which necessarily existed in all types, without which indeed they would have been substitutes, not prepartitions for the antitype, was altogether done away in him: that in the first place he, as the representative of the whole human race, offered no arbitrarily chosen victim, but the willing sacrifice of his own blood; that in the second place he was ordained by God, by a solemn oath, to be a high-priest forever, “after the order of Melchisedek,” one “in all points tempted like as we are, yet without sin,” united to our human nature, susceptible to its infirmities and trials, yet, at the same time, the true Son of God, exalted far above all created things, and ever living to make intercession in heaven, now that his sacrifice is over; and that, in the last place, the barrier between man and God is by his mediation done away forever, and every one is put on an equal footing with all the rest. All the points in the doctrine of sacrifice which had before been unintelligible were thus made clear. (c) This being the case, it next follows that all the various kinds of sacrifices were, each in its measure, representatives and types of the various aspects of the atonement. It is clear that the atonement in this epistle, as in the N. T. generally, is viewed in a two-fold light. (i) On the one hand, it is set forth distinctly as a vicarious sacrifice which was rendered necessary by the sin of man, and in which the Lord “bears the sins of many.” It is its essential characteristic that in it he stands absolutely alone, offering himself “without any reference to the faith or the conversion of men—offering it, indeed, for those who were still sinners” and at enmity with God. Moreover, it is called a “propitiation” (διαδίκησις or διασκευής), Rom. iii. 24; 1 John ii. 2; a “ransom” (αὔδοτήσις), Rom. viii. 25; 1 Cor. i. 30, etc., of which, if words mean anything, must imply that it makes a change in the heart of God and man, from separation to union, from wrath to love, and a change in man’s state from bondage to freedom. In it, then, he stands out alone as the mediator between God and man; and his sacrifice is offered once for all, never to be imitated or repeated. (ii) The atonement is set forth in the Epistle to the Hebrews as typified by the sin-offering, especially by that particular sin-offering with which the high-priest entered the most holy place on the great day of atonement (ix. 7–12), and by which hallowed the inauguration of the Mosaic covenant and cleansed the vessels of its ministration (ix. 18–23). In the same way Christ is called “our Passover, sacrificed for us” (1 Cor. v. 7); and is said, in even more startling language, to have been “made sin for us,” though he “knew no sin” (2 Cor. v. 21). This typical relation is pursued even into details, and our Lord’s suffering without the city is compared to the burning of the Altar without the camp (Heb. xiii. 10–18). The altar of sacrifice (antitypov) is said to have its antitype in his passion (xiii. 10). All the expiatory and propitiatory sacrifices of the law are now for the first time brought into full light. Although the principle of vicarious sacrifice still remains, and the idea of a holy mystery, yet the difference in him is illustrated by a thousand types. As the sin-offering, though not the earliest, is the most fundamental of all sacrifices, so the aspect of the atonement which it symbolizes is the one on which all others rest. (ii) On the other hand, the sacrifice of Christ is set forth to us as the completion of that perfect obedience to the will of the Father which is the natural duty of sinless man, in which he is the representative of all men, and in which he calls upon us, when reconciled to God, to “take up the cross and follow him.” “In the days of his flesh he offered up prayers and supplications, and was heard in that he feared; though he was a Son, yet he learned obedience by the things which he suffered: and being made perfect” (by that suffering; see ii. 10), “he became the author of salvation to all them that obey him” (v. 7, 8, 9). In this view his death is not the principal object; we dwell rather on his lowly incarnation, and his life of humility, temptation, and suffering, to which that death was but a fitting close. In the passage above referred to the allusion is not to the cross of Calvary, but to the agony in Gethsemane, which bowed his human will to the will of his Father. The main idea of this view of the atonement is representative rather than vicarious. In the first view the “second Adam” undid by his atoning blood the work of the first Adam; in the second he, by his perfect obedience, did that which the first Adam left undone, and, by his grace making us like himself, calls upon us to follow him in the same path. This latter view is typified by the burnt-offer- ing; in respect of which the N. T. merely quotes and enlarges, conforming the sacrifice of the animals especially (see Heb. x. 6–9) the words of Psa. xi. 6, etc., which contrast with material sacrifice the “doing the will of God.” It is one which cannot be dwelt upon at all without a previous implication of the other: as both were embraced in one act, so are they inseparably connected in idea. Thus it is put forth in Rom. xii. 1, where the “mercy of God” (i.e. the free salvation, through the sin-offering of Christ’s blood, dwelt upon in all the preceding part of the epistle) are made the ground for calling on us “to present our bodies, a living sacrifice, holy and acceptable to God,” inasmuch as we are all (see v. 5) one with Christ, and members of his body, and therefore strangers and foreigners “crucified with Christ” (Gal. ii. 20; Rom. vi. 6); to have “the sufferings of Christ abound in us” (2 Cor. i. 5); even to “fill up that which is behind (t · i: τα διασκευής) thereof” (Col. i. 24); and to be offered (σπερμα) upon the sacrifice of the faith of others (Phil. ii. 17; comp. 2 Tim. i. 6; 1 John iii. 10). And thus the sin-offering or the burnt-offering, would be impossible, so also without the burnt-offering the sin-offering will to us be unavailing. (d) With these views of our Lord’s sacrifice on earth, as typified in the Levitical sacrifices on the outer altar, is also to be connected the offering of his intercession for us in heaven, which was represented by the scapegoat. In the Epistle to the Hebrews, this part of his priestly office is dwelt upon with particular reference to the offering of incense in the most holy place by the high-priest on the great day of atonement (Heb. ix. 24–28;
SACRIFICE

common to both, merely in the process of time was softened down and passed into Jehovah, thus becoming the national deity of the people of Israel—so did their altars smoke with human blood, from the time of Abraham down to the fall of both kingdoms of Judah and Israel. In the same year appeared in Germany another work, "Der Feuer- und Molochstod der alten Hebräer," intended to prove that the worship of Moloch, involving his bloody rites, was the original, legal, and orthodox worship of the nation of Abraham, Moses, Samuel, and David. To these works a reply was put forth in 1848, by Löwengard (Jehovah, nicht Moloch, war der Gott der alten Hebräer), in which he defends the worship of Jehovah from all appearances as a worship distinguishing between the essential and the unessential, the durable and the temporary, to prepare the way for a reformation of modern Judaism.

We do not think that it requires any deep research or profound learning to ascertain from the Biblical records themselves that the religion of the Hebrews was chiefly, if not entirely, free from the shocking abominations of human sacrifices, and we do not therefore hesitate to urge the fact on the attention of the ordinary reader as not least considerable among many proofs not only of the superior character, but of the divine origin, of the Hebrew worship. It was in Egypt where the mind of Moses, and of the generation with whom he had to deal, was chiefly formed, so far as heathen influences were concerned. Here offerings were very numerous. Sacrifices of meat-offerings, libations, and incense were of very early date in the Egyptian temples. Oxen, wild goats, pigs, and particularly geese, were among the animal offerings; besides these, there were presented to the gods wine, oil, beer, milk, cakes, grain, oil, fruits, vegetables. In these, and in the case of meat-, peace-, and sin-offerings (as well as others), there exists a striking resemblance with similar Hebrew observations, which may be found indicated in detail in Wilkinson (Manners and Customs of the Ancient Egyptians, v. 385 sq.; see also ii. 375), who, in agreement with Herodotus, maintains, in opposition to Diodorus, that the Egyptians were never accustomed to sacrifice human beings—a decision which has a favorable aspect on our last position, namely, that the religion of the Israelites, even in its earliest days, was unprofaned by human blood sacrifices. This distinction between the observances of the Egyptians and the Jews in regard to sacrifices is that while the Egyptians received the blood of the slaughtered animal into a vase or basin, to be applied in cookery, the eating of blood was most strictly forbidden to the Israelites (Deut. xv. 29).

Sacrificial Festival (37). This was held with the pieces of the victims laid aside from sacrifices of a joyful nature (paelle sacre, dopes), not only in all ancient heathen nations (Sappho, De Sacrific. vii. 26; Feith, Antiq. Hom. i. 10, 7; Stuck, Antiq. Conviv. i. 38.; Lakemacher, Antiq. Graecor. Sacrar. p. 384 sq.); Douce, Annal. i. 230; on the Romans, see, among others, Josephus, War, vii. 1, 3; comp. also Plato, Leg. v. p. 738; Herod. vi. 67), but also among the Israelites (Deut. xii. 6 sq.; 1 Sam. ix. 19; xvi. 3, 5; 2 Sam. vi. 19). Only the thanx-offerings of individuals, however, among that by the people gave occasion for these festivals, as the altar alone certain rich portions were consumed on the altar (Lev. iii. 3 sq. 9 sq.; xiv. 15); the breast and the right shoulder belonged to the officiating priests (vii. 31 sq.), and all the rest of the flesh was restored to the offerer (Deut. xxvii. 7). This was to be eaten on the same day (Deut. xvi. 16), and the company of all members of the household and of hidden Levites especially were often invited (Deut. xii. 12). Other sacred meals were held at the times of festivals (xvi. 11 sq.), and the tithe meal, as seen, Herthen sacrificial meals, which were held sometimes in the temples (1 Cor. viii. 10), sometimes in private houses,
SACRIFICIAL INSTRUMENTS 228 SACRIFICIAL OFFERING

are mentioned (Numb. xxv, 2). The participation of an Israelite in these was accounted idolatry (xxv, 3 sq.: Psal. civ, 28; Tob. i, 12; 1 Cor. x, 20 sq.; Rev. ii, 14); hence, too, the apostles forbade Christians to join them (Acts xva, 29; xxi, 25), or at least warned against them on account of those who were weak in faith (1 Cor. vii, 1 sq.). Such "meat offerings to idols," however, was set forth on the table not only at the sacramental meals (1 Cor. vii, 10; x, 27), but the poor or the avaricious used to preserve it for future use (Theophor. Char. x) or sell it to traders (ibid. xxiii); hence it might easily happen that one who bought at the meat market (1 Cor. x, 29). See FESTIVAL.

Sacrificial Instruments in the Israelitish Sanctuary. For the use of the priests in offering sacrifices, especially those with blood, there were kept, within the tabernacle (Exod. xxvii, 3; xxxviii, 3; Numb. iv, 14) and in the Temple (1 Kings vii, 45, 46; 2 Kings xxi, 18 sq.); Jer. ii. 18 sq.) the following implements of brass:

1. הָעַל, yatán, shovel, perhaps to free the altar of burnt-offering from its ashes; to which the שִׂרְפֹּת, si-roth, or pots, belonged, into which they were thrown.
2. מְזוֹנַקְתָּן, miznakhthán, basin, to take up the blood of the victims for sprinkling.
3. מִזְלֹגוֹת, mislagoth, forks, flesh-forks.
4. מָכָטָה, mactoth, firepoles, in which coals were taken up.

The brazen תֵּלוֹת, mezannaroth (Jer. iii, 18), may be considered as belonging here, and will then doubtless mean sacrificial knives, elsewhere called מְזוֹנַקְתָּן, mislagoth. See KNIFE. The golden cases or vessels mentioned in 1 Kings vii, 50 are certainly different from those just mentioned (No. 2), and were intended for use in the holy place. See SACRIFICE; TEMPLE.

Sacrificial Offering. There is no doubt that the origin of sacrifices is to be referred to the very earliest ages of humanity, where also the Mosaic history places it (Gen. iv, 3 sq.; vii, 20; xxii, 2; xxv, 54; xxvi, 1; comp. Hüttinger, De Origine Sacripti, Patriaev. X, 386 [1843]). While men as yet made no distinction between the sensible and the supernatural, they sought to acquire or fix the favor of their gods, or to express their gratitude for their gifts, by thank-offerings, usually of some kind of food, since they attributed to their gods the wants of man (Lev. xxvi, 6; xxvii, 22; Num. xvi, 45; comp. Civ. and just. x, ii; ed. Hard). Homer, Iliad, iv, 48; Aristoph. Ares, 1516 sq. comp. Pauly's Real-Enzyklop. iv, 809 sq. (On the meaning and kinds of offerings, see Melchonoth, in the Apol. A. C. p. 253 sq. A contract view is taken by Sykes, Ueber d. Natur, Abibekw u. Uebr., u. Opfer [Halle, 1778]. There is a vain attempt to philosophize, by Rosenkranz, in the Huih, Encyklop. vol. iii, iv, p. 74; comp. Baader, Ueber eine Küste, Théorie d. Opfers und Cultus [Munich, 1836]; Bähr, Symbolik, 288 sq. The sensualism of an early age expressed itself, too, in supposing a god to be pleased with the odor of sacrifices (Lev. i, 9, 13; Numb. xv, 7 sq.; Lucian, Exvxm. 27). The sacrifices were usually of such food as men themselves most enjoyed, and of the greatest excellence in their kind (1 Sam. xv, 15; Psa. lxvi, 15), and were either raw or prepared in such a way as to be most palatable. Hence doubtless the use of salt (q. v.). Perhaps the first offerings were productions of the vegetable kingdom (Prov. xlii, 16), and then hewn, split, etc. animals not being offered until later (Theophor. in Porphyry, Ab- stinent. ii, 5, and xxxvii, 38; comp. Plato, Leg. vi, 782; Ovid, Fasti, i, 337; Pausan. viii, 2, 1). For the history informs us that man began with vegetable food, and afterwards to eat flesh (comp. Gen. i, 29; ix, 3; see Schickedanz, De Sacri sacri Sacrific. T. N. 14. sacri Mortis. repert.; [Franc. 1781], and in the Symbol. Danub. ii, ii, 493 sq.), and perhaps the sacrifice of animals may have led to the burning of the sacrifices on altars. (See in general Gedieke, Fcm. Schreift. p. 229 sq.; Wolf, Fcm. Schrift. u. Auff. [Halle, 1802], p. 243 sq.; Saubert, De Sacrific. Vet. Collectanea [Jen. 1695]; Meiner, Krit. Gesell. d. Religion, ii, 1 sq.; Baur, Symbol. u. Mythol. J, ii, 238 sq.). Such altars and such sacrifices were on altars were of immediate divine appointment (Deyling, Obertrüt. ii, 53 sq.), but this is not affirmed in the Mosaic history (comp. Wolf, Homerose Mose Verutons Sponte Sacrae fecisse, etc. [Lips. 1782], and is rejected by some as anthropomorphism. The views of those who see in the sacrificial relations in the ancient sacrifices a reflection of Tholuck (Ztschr. zum Br. u. d. Hebr. p. 69), do not belong to historical criticism, but to dogmatic theology (see also the Zeitschr. f. wissenschaft. Theol. 1863, iii). On the ritual of sacrifice among the Hebrews in general, see Lightfoot, De Ministerio Temp. in his Works, and in Ugozino, vol. ix, ch. viii, Carnevs, App. p. 633 sq.; Orttun, De Sacrific. Lib. (Lond. 1677). Vol. ii only (the first book relates to the Jewish sacrifices): Reland, Antiq. Sacrum, iii, 1; Bauer, Gottesdienst-Verfass., 80 sq.; Rosenmiiller, Exegetica, ad Lec. Gramberg, Reblat. i, 94 sq.; Scholl, in the Wirtemberg. Stud. u. Tüb. 1835 sq.; i, 108 sq.; Bähr, Symbolik, ii, 189 sq.; Grätz, Gesch. d. Völker, 364 sq.; Oppier, Milan, 1849. The Jewish views of the ritual of sacrifice are especially set forth in the treatises Schabachim, Menachoth, and Temarah, in the fifth part of the Mishna. From these and the rabbinic extracts are given by Otho, Lex. Talm. p. 621 sq. The entire Babylonian Gemara to the tract Schabachim, and the Tosita to the same tract, are found in Hebrew and Latin in Ugolino's Theatrum, vol. xxii. Many parallels and explanations are found in the Phoenician table of offerings discovered some years since in Marseilles, and published, with a commentary, by Movers (Breslau, 1847). (On the offerings of other Eastern and Western nations, see Flügel, Vitel, and Wachter, in the Holz. Encyklop. iii, iv, p. 77 sq.) The law adopted as a model the sacrifices already long in use, and gives exact directions as to the kinds of sacrifices and the ceremonies of offering. (We cannot here discuss the question of how much of this law was Mosaic. In answer to the view of De Wette, von Boeckh, and Geiger, that the whole is entirely of later origin, see Bleek, in the Stud. u. krit. 1831, iii, 491 sq.; Bähr, Symbolik, ii, 192 sq.) This law of offerings may be summed up thus:

1. The subjects to be sacrificed, in the proper sense of the word, which were laid, that is, on the burning altar, and brought out of the vegetable as the animal kingdom. (In the wider sense of offering, even tithes, first-fruits, and insec. are included. Comp. the offering of wood, Neh. x, 35.) Hence there is a distinction between offerings without blood (mešûchoth, προσφοραί, ñana) and offerings with blood (צְבָּאֵב, zebachim, Σκύρα). See 1 Sam. ii, 29; iii, 14; Psa. xi, 7; Heb. viii, 3. The latter were considered the more important. But salt, a mineral, was added to every distinct sacrifice of either kind. The vegetable products offered were both solid and fluid; of the former, roasted grain, flour, cakes with olive-oil (the cake always without leaven or honey), and incense as an accompaniment, formed the meat-offerings (the ַנִּשָּׁבָה, m. n. in the proper sense); of the latter, wine for the drink-offering (the ַנִּשָּׁבָה, n. k.), and the animal-offerings must be clean, and such as were fit for food, as Joseph (Ant. xii, 5, 4; comp. Gen. viii, 20), and must be tame beasts, as cattle (Bochart, Hieroz. i, 326 sq.), goats, sheep, and sometimes turtle-doves and young pigeons but never fishes. They must be altogether free from deformity (spadels, perfect, AGMENT, τόλμων, τίλλων. Lev. xi, 20 sq.; comp. Mal. i, 8, 14; Herod. ii, 38; Plutar. Deis. Deo, 40, 49; Ovid. Met. xvi, 106; Virgil, En. iv, 57; Pliny, v, 70; Athen. xxv, 674; Tertull. Apol. c. 14 with the
SACRIFICIAL OFFERING 229 SACRIFICIAL OFFERING

passage in Plutarch may be compared Polluc, Onom. i, 1, 29: Schol. ad Aristoph. Acharn. p. 785; on the expres-
sions in Lev. xxii, 20 see also Bochart, Sacr. 8, 54 sq.; com. Baldinger, præs. Hottinger, De Victim. Integritate et Mystério [Heidelb. 1731].) Except the doves, they
must at least eight days old, because younger flesh is unfit for food (Exod. xxix, 30; Lev. xxii, 27), the smaller
cattle being usually yearlings (sheep, goats, calves, Exod. xxix, 32; Lev. ix, 3; xii, 6; xiv, 10; xxii, 25; 28, 29; xxvii, 9 sq.), while the
larger were young, perhaps usually three years old (yet Judg. vi, 25 mentions a bull of seven years as a sacrifice; comp. Pliny, vii, 77; Herod. ii, 38). The
sex of four-footed beasts for sacrifice was sometimes in-
different (as in thank- and sin-offerings; comp. Lev. iii, 1, 6; yet in all public offerings the Mishna requires males, Temur, ii, 1), and sometimes males were
required, as in burnt-offerings; for the male sex was con-
sidered the superior. The choice of the kind of beast was
free in the burnt-offerings and thank-offerings (Lev. i, 2; iii, 1, 6), but was determined by law in the trespass-
and sin-offerings (iv, 5). Human sacrifices, as historiography (vierundzwanzigste zehn, viii; est, viii), were
avoided by the pious Israelites (Psa. cxvi, 37), although
their sacred history contained an example of the pur-
purposed sacrifice of a son by his father (Gen. xxii), and
in the unsettled days of the judges a daughter fell
under the sacrificial knife of her superstitious father
(Judg. xvi). The offerings of the gentiles are sometimes
seen Baur, Mythology. II, ii, 298 sq.; Wachsmuth, Hellen.
Alterth., ii, 549 sq.; and on those of the apostate Israe-
lites, see MOLOCH. The slanderous statement that the
Jews slaughtered strangers and drank their blood arose
about the time of Antiochus Epiphanes (see Josephus,
legal and regular circle of sacrificial beasts is ex-
plicable from the agricultural pursuits of the Israelites:
oxen, goats, and sheep were the usual stock of farmers,
and corn, oil, and wine were the chief productions of
the soil for the commonest wants of life. The addition
of doves springs from the fact that scarcely any creatures
with life suitable for sacrifice could be found save among
birds, and doves were the most common domestic birds.
But why not chickens; and why, according to the rabbinists, could not chickens be kept in the holy city?
(comp. Euskhe, De Gallis et Gallinânia ad Aram Javan seu Factis [Rut. 1741]). See Fatted Fowl. Each
people, comp. John, xi, 57; 1 Kings, xii, 29, 30, and those who lived near enough drove them from their
own herds. But later there arose in Jerusalem traders in beasts for sacrifice (eitchumirî niggutîtorae; Pliny, H.
xvii, 10; Mishna, Shkol, xvii, 2), and at the time of Jesus a regular market for this purpose stood in
the vicinity of the Temple (q.v.).

2. The place where alone sacrifices might be presented was the court of the national sanctuary—the tabernacle
first and afterwards the Temple (Deut. xii, 5 sq., 11), and every offering elsewhere was to be punished with
death (Lev. xvii, 4 sq.; Deut. xii, 13; comp. 1 Kings xi, 14; 16); without the altar, the death of the tabernacle of the congregation" (Lev. i, 3; iii, 2–
8; iv, 4–14); and, according to the Mishna (Shc, c. 5), the offerings were slain, part on the north side of the
altar, part, the less holy, at any place in the court indifferently (comp. Plato, Leges, x, 910). These
regulations were designed to prevent the idolatrous worship which the tabernacle, with the altar, represented: it
led the ritual legal.

Besides, the common place of worship must have had a beneficial influence on the spirit of a nation
so torn into factions (comp. 1 Kings xii, 27).

This common place of sacrifice was not always observed in the time of the judges, nor even of David (1 Kings
ii, 31; 1 Chron. vii, 40; 8, 14), and especially not in the tabernacle (Judg. ii, 5; 1 Sam. vii, 17; 1 Kings i, 9), espe-
cially on high-places (Judg. vi, 26; xxii, 13; Hos. iv, 13). Even the law-abiding Samuel did this (1 Sam.
iv. c.), and David tolerated it (1 Kings iii, 2 sq.). These
sacrifices on high-places lasted after Solomon’s time,
even under the later kings. In the kingdom of Israel in
the common place of sacrifice was abandoned. In the
time of the judges the irregularity sprang from the con-
fusion of jurisdiction and the unsettled condition of the
people, everywhere pressed by their enemies; yet it is,
on the whole, probable that such entire exclusiveness of
locality was not so severely demanded by the Mosaic
law as later, after the unfortunate consequences of pri-
ivate and voluntary sacrifices were seen.

3. The purpose of the sacrifices was special—either
to thank God for benefits received, or to propitiate him
for sins of sins and errors. Hence the distinction of
thank-offerings and sin- and trespass-offerings.
The burnt-offerings had a more general tendency (comp.
the division of sacrifices in Philo, Opp. ii, 240; see Scholl,
in Klaiber’s Studien, iv, 1, 36 sq.). The Hebrew sacrifices
are enumerated, though not defined with exactness, in
Numb. xv, 3 sq.; Deut. xii, 6; Jer. xvii, 26. On the
classes of Carthaginian sacrifices, see Mover (Phïn. p.
15, 41). These various offerings produced great variety
of ceremonies, as attested by the Mosaics. The he-
oblics. On great public festivals, great collective offer-
ings like hecatombs are mentioned (1 Kings viii, 5, 63
sq.; 2 Chron. xxxix, 32 sq.; xxx, 24; xxxv, 7 sq.; comp.
Herod. vii, 43; Xenoph. Hell. vi. iv, 29; Sueton. Calig. 14; Capitol. in Maxim. et Balbin. c. ii).

The burnt-offerings sometimes (Lev. xii, 6; Herod. vi,
57; Xenoph. Athen. ii, 9), sometimes private, sometimes
prescribed, sometimes voluntary; the latter were some-
times family sacrifices (1 Sam. i, 21; xx, 6). One
person had sacrifices offered for another, as the Catho-
lics with masses (Job i, 5; 2 Mac. iii, 32). Not only
the Israelites, but the heathens, were permitted to sacrifice to Jehovah (Numb. xv, 14; 2 Mac. iii, 25; xii, 25;
Phil. Opp. ii, 569; Josephus, Apion, ii, 5; Mishna, Shkel, vii, 6), and the Jews even made sacrifices for heathen
princes on the altars of Jehovah (1 Mac. vii, 38; Josephus, Ant. xii, 2, 5). Originally they were offered
only for the living, sometimes when death was near (Sir. xxxvii, 11); but after the resurrection came
a general belief sacrifices for the dead arose (2
Mac. xii, 43). There is, indeed, no other instance, and
perhaps they never were customary, especially as they
are not in harmony with the law (see Grotius, ad loc.).
The polemic writers against the Catholic masses for the
dead repudiate them indignantly (Chominia, Excer.
Concil. Tragi. in De cultu, ad loc.). See also the Masses of the Rabbis (1 Mac. xii, 39 sq. adnotavit Missam et Preces pro Defunctis [Tubing. 1749]), or suppose that the narrator
forged the account (Hyper. in the Miscell. Duisburgi, i, 458).

4. In the sacrifice of offerings with blood the owner
himself (see Hottinger, De Function. Lat. circa Victim. [Marburg, 1706]), after being cleansed and sanctified
(1 Sam. vi, 5; Job i, 5; comp. Josephus, Apion, ii, 23;
Hesiod, opp. p. 724 sq.; Ovid, Metem. x, 434 sq.; Tibul.
ii, 11, 1; Herod. ii, 37), led the beast to the altar (Lev.
i, 3; iv, 14; xiv, 4). Among the Greeks and Romans
of the time of the historian (Theod. i, 294; Ovthym., iii, 384, 420; Plato, Alcib. ii, c. 29; Virgil, Aen. ix, 297; Macrob. Sat. i, 17, 29, ed. Bip.
and crowned (comp. Acts xiv, 13; see Ovid, Metem.
xvi, 131; Lucian, Saurf, vol. xii; Lycochophon. Alex. p.
327; Statius, Theb. iv, 449; Pliny, vii, 4; Strabo, xvi,
792; Athen. xiv, 674; see Wetsstein, i, 549; Walch,
Disert. ad loc. in these books, and on the sacrificial
rivals among the Jews, at least with the thank-offer-
ings, is less clear from Josephus (Ant. xii, 8, 2) than
from the Mishna (Bikkurim iii, 2 sq.; comp. in general
Lakemacher, Obserr. i, 79 sq.). The owner laid his
hand upon the head of the beast (Lev. i, 4; iii, 2; iv,
15, 14; 7, 18; 8, 19; 11, 1); and the same practice
ruled among the Jews, at least with the thank-offer-
ings. If the sacrifice was that of a community, the elders
performed this duty (Lev. iv, 15); but when the offering
was public, i.e. in the name of the whole people, the
SACRIFICAL OFFERING

ritual mentions this imposition of the hand but in one case (xvi, 21; comp. the Mishna, Menach. ix, 7) yet see 2 (a) when in this ceremony the formal consecration of the beast to Jehovah; not the laying of the penalty due to sin upon the sacrifice, as Bochart thinks (Hieros. i, 330), for the ceremony occurs in the case of the thank-offering. According to the rabbins, a regular form of words was used in laying hands on the beast (Maimon. Hilch. Korban, iii, 9); then it was slain (Lev. iii. 14; iv, 15, 21; viii, 15, 19), but this might be, and in later times actually was, done by the priests (2 Chron. xxix, 24); perhaps even by the Levites, but 2 Chron. xxx, 17 does not prove this. Among the Romans, officers called popo or victimarii slew the victim (Bochart, Hieros. i, 380). The blood was then taken up from the body of the sacrificial beast, or poured out by the priest (Hottinger, De Function. Sacer. circa Vict., [Marb. 1706]). According to the varying character of the offering, the blood was sprinkled, or brought into the Temple and there sprinkled upon the ark of the covenant, and put on the horns of the altar of burnt-offerings, and the remainder thrown out at the foot of the altar of burnt-offering. The sacrificer (yet comp. 2 Chron. xxix, 34) then took off the skin of the victim (Lev. i, 6), which belonged, when not burned (iv, 11), either to the priest (viii, 20; only said of the burnt-offering) or to the offerer (comp. the directions in the Talmud—Mishna, Tosef. xii, 2 sq.). So, too, in the sacrifices of the Romans (found in Marseilles, 3, 4, 8, 10). In Sparta the skins of public sacrifices belonged to the kings (Herod. vi, 57). The victim was cut to pieces (Lev. i, 6; viii, 20), which were, in various sacrifices, either all (as the burnt-offerings), or certain specially valued pieces (in all other offerings); comp. Isa. i, 11; Zerubb. vii, 32; Catull. xi, 5), burned by the priest upon the altar. In the latter case the flesh belonged to the priests or to the sacrificer, or must be out of the city. (On the ceremony of offering the doves, see Lev. i, 14 sq.; vi, 8; comp. Hottinger, De Sacer. Aeinum [Marb. 1706].) The ceremonies of burning and waving took place in some sacrifices either before or after the victim was killed. See HSAFO; WAVE-OFFERING.

5. The yearly expense of sacrifices, both by individuals and the whole people, was not trifling; yet householders had at hand most of the necessary offerings, and wood was brought from the forests. (On the limits within which wood for sacrifice was obtained for public use in the later age, see the Mishna, Tosef., iv, 5.) For the trees used as sacrificial wood, see the tract Tmuxid, ii, 3.) Later, foreign princes who desired the favor of the Jews applied from their revenues a portion to public sacrifices (Ezra vi, 9; 1 Macc. x, 39; 2 Macc. iii, 3; ix, 16; Josephus, Ant. xii, 5, 3). (On a peculiar festival of carrying wood, see Josephus, War, ii, 17, 6. It was held in the beginning of the month Elul.)

6. As an expression of pious gratitude and of reverence towards Jehovah (Psa. lxv, 16; cx, 3; Sir. xxxviii, 4; comp. Matt. viii, 4; Acts xxii, 28), sacrifices were presented in abundance by the Hebrews through all antiquity, and he who offered none was accused of impiety (Eccles. ix, 2; comp. Isa. xliii, 25 sq.). Oaths were made by the offerings (Matt. xxiii, 18), and in descriptions of golden antiquity the ideally magnified splendor of the sacrificial ritual appears (Isa. xix, 21; lvi, 7; lx, 7; Zech. xiv, 21; Jer. xvii, 20; xxxiii, 18), which was the occasion for the threatened exile (Hos. iii, 4). Yet the Israelites often forgot in the symbol the higher affection of the heart, and their offerings became an opus operatum. Accordingly the prophets occasionally give warning against overvaluing sacrifices, and strive to call forth a pious disposition as more suitable to the heart of God than the form, in them the heart feels nothing (Isa. i, 11; Jer. vii, 20; vii, 21 sq.; Hos. vi, 6; Amos v, 22; Mic. vi, 6 sq.; comp. Psa. xi, 7; I, 9 sq.; II, 18 sq.; Prov. xxi, 3; Matt. v, 29 sq.; Sir. xxxvii, 1; comp. Plato, Alcib. ii, 150; Diod. Sic. xii, 20; Ovid, Herod. iii, 181 sq.; Seneca, Benef. i, 6; comp. Siebelis Disput. p. 121 sq.). Such representations do not justify in the Mosaic sacrifices the doctrine of symbolic substitution. The offering and bringing near of the naphesh, or life, in the sacrificial blood upon the altar, as the place of the presence and revelation of God, is a symbol of the offering of the naphesh, or life, of the sacrificer to Jehovah. As this presentation of the victim is not merely a concrete act, but also a spiritual act, so must also the spiritual life of self, as opposed to God, be given up and die. But since the giving-up to Jehovah, the Holy One, it is not merely a ceasing, something negative, but a dying, which in the very act is a becoming alive," etc. Apart from all the assumption in this theory, it is entirely too artificial, one might say too Christian, for Israelitish antiquity. It is necessary, too, to assume that the sacrifices with blood were the original ones, which is not proven; and the doctrine cannot be extended without violence to any but sin-offerings (see Kurta, Mos. Offr., p. 7 sq.), in which it cannot be denied that the idea of substitution is found.

In the burn-offering of sacrifices, which went further than the prophets, and retained of the outward ritual only the lustrations, not offering sacrifices at all (Josephus, Ant. xviii, 1, 5), it is well known that all the ceremonial of sacrifice has been given up by the Jews, since they no longer possess the Temple mountain; but yearly offer seven lambs on Mount Gerizim at the Passover (Robinson, iii, 98 sq.). See OFFERING.

The fact that every individual who brought a sacrifice had to be present in the Temple when it was offered gave rise to the opinion that the daily morning and evening sacrifices which were brought for the whole congregation of Israel required that the congregation should be represented in the Temple at the offering of these national sacrifices. Hence the whole people was divided into twenty-four divisions or orders, corresponding to the divisions of the priests and Levites. Every division chose a number of representatives ( Bakanim), one of whom was appointed chief (Tzavseh), and in turn sent up some of them as a deputation to Jerusalem to represent the nation at the daily sacrifices in the Temple, and pronounce the prayers and blessings in behalf of the people while the sacrifices were offered. They had also to fast four days (i.e. the second, third, fourth, and fifth day) during the week of their representation. Those of the representatives who remained at home assembled in a synagogue to pray during the time of sacrifice. See TEMPLE.

It will be observed from the above notices that there was one grand point of difference between the sacrifices and the sacrificial system; the former were never stained with human blood, than which nothing could be conceived more abhorrent to all the attributes of Jehovah (Jephthah's daughter is no exception, for it cannot be proved with certainty that she was sacrificed; on the contrary, many interpreters think that she was not slain, and that the terrible act was only pretended, and by the testimony of innumerably writers proves that no heathen nation has been free from human sacrifices; such having occurred, even among civilized people, at some period of their history, especially on some great occasion, to expiate a great sin or avert some dreadful calamity. Even to this day (1942) by the tenets forbid blood-sedelling, human self-immolations, or sacrificial suicides, are common. Another point of difference is found in the animal sacrifices, which, among the heathens, were frequently of such as were particu-
SACRILEGE 221 SACRILEGIUM

lary forbidden in the Mosaic law—unclean animals and beasts of prey; such as dogs offered to Hecate, swine to Mars (in the Suuctuarilis), and wolves to Apollo. Heathens in their sacrifices poured oil over the beast, which the Jews did not: they (the former) burned only a portion of the frankincense presented; the Jews burned all. The Greeks offered honey to the sun; in Jewish sacrifices it was forbidden; and the Sabian idolaters ate the blood of their sacrifices, which Maimonides thinks was one of the reasons why it was so particularly prohibited to the Jews. Their bread-offerings also were leavened. Some points of similarity are to be found between the Jewish and heathen sacrifices. The heathens brought their victims to the temples, chose them without blemish, poured out libations of wine, cut the animal's throat, flayed and disected it, caught the blood in a vessel, and poured it on and round the altar; and they used salt by mixing some with meal, and sprinkling it on the head of the animal, on which they also laid their hands. In the early times the sacrifice was burned whole, the skin being given to the priest; but later, part only was consumed and the rest given to the sacrificers (it was an estate animal) to feast upon. The thigs and fat were the share of the gods. The victims among the Greeks and Romans were crowned with garlands and adorned with fillets and ribbons, and the horns of large animals were gilded. None of these decorations are enjoined in the Jewish sacrifices. See SACRIFICE.

Roman Sacrifice of the Suuctuarilis.

Sacriego (ισαρολογία, to rob a temple, Rom. ii, 22; so the noun ἵππος, "robber of churches," Acts xix, 37), the violation or profanation of holy places, persons, or things. Though the word sacriego is not used elsewhere than as above in our version of the canonical Scriptures, yet we find the crime itself often alluded to; e. g., "profaning the sanctuary" (Lev. xxii, 22), "profaning hallowed things" (Lev. xix, 8), "profaning the covenant" (Mal. ii, 10). The first sacrilegious act we read of is that of Esau selling his birthright (Gen. xxv, 33), for which he is called "profane" by Paul (Heb. xii, 16). Instances of this under the Mosaic economy (which sternly forbade it [Exod. xxv, 14]) were the cases of Nadab and Abihu (Lev. x), the men of Beth-sheanesh (1 Sam. v), Uzzah (2 Sam. vi, 67), Uzziah (2 Chron. xxvi). The Jews at a later period of their history were eminently guilty in this particular, inasmuch as they witheld the tithes and offerings which God required of them (Mal. iii, 8-10), and converted his holy temple into a market (Matt. xxxi, 12, 13). This profanation is forbidden in the Talmud (Lightfoot, ad loc.). See TEMPLE. Yet they pretended to be piously scrupulous in their reverence for the interior building (Matt. xxvi, 61). So the grand accusation against Stephen was that he spoke disrespectfully of the Temple (Acts vi, 13). An uproar was excited against Paul in Jerusalem on the charge that he brought Greeks into the Temple and polluted the holy place (Acts xxii, 28, 29), though daily profanations were committed by the affected zealots with impunity. At length, in the closing scenes of Jerusalem, such were the multitude and the magnitude of the sacrileges that Josephus says if the Romans had not taken the city of Jerusalem he would have expected it to have been swallowed up like Sodom, or have had some other dreadful judgment. The jealously of the Almighty respecting things dedicated to him, and his punishment of the profanation of them, are alluded to by Paul (1 Cor. iii, 17): "If any man defile the temple of God, him shall God destroy: for the temple of God is holy, which temple ye are." We read but little else in the N. T. pertaining to sacriego except Paul's rebuke of the Corinthians for their profane conduct at the celebration of the Lord's supper (1 Cor. xi, 29). In that early period of Christian Church it had not become as yet regularly to establish sacred places and things; but as soon as circumstances permitted, we shall find in the Church history of every nation a due respect for consecrated things, and laws for their preservation. Even the heathens, particularly the Greeks and Romans, were not without their rules concerning sacriego, the penalty of which was usually death. Thus it was held sacriego for the polluted to pass beyond the porch of the temple, to spit or wipe the nose in a temple, to cut down consecrated trees, to build upon or till any spot of ground where a thunderbolt had fallen, to suffer a man to witness the ceremonies of the Bonae Dea, or Good Goddess, or to suffer a priestess of the temple of Diana in the Vicus Patricius in Rome, to suffer a birth or death to occur in the holy isle of Delos, to steal anything belonging to a temple, to approach a sacriego without being sprinkled by the priest with the lustral water, to consecrate a blemished man to the priesthood (compare with the Jewish law, Lev. xxvi, 21), and many other instances which will occur to the classical reader.

SACRILEGE, CHRISTIAN VIEW OF. The ancient Church distinguished several sorts of sacriego: 1st, the diverting things appropriated to sacred purposes to other uses; to break or burn the furniture of the Church, or deliver it to be broken or burned; 2d, to lay sacrilegious hands on the dead; 3d, those were considered as sacrilegious persons who delivered up their Bibles and the sacred utensils of the Church to the pagans in the time of the Diocletian persecution; 4th, profaning the sacralments, churches, altars, etc.; 5th, molesting the eunuch in the performance of his office; 6th, depriving men of the use of the Scriptures or the sacraments, particularly the cup in the eucharist, the last being condemned by Gelasius and pope Leo, and yet not recognised as sacriego by the Roman casuists. See SACRILEGIUM. In England sacriego is not now a legal, but a popular term, used to denote the breaking or destroying of places of worship and stealing therefrom. The legal offence comes generally under the head of burglary or house-breaking. A less punishment applies to the offence when committed in dissenting chapels. In Scotland there is no increase of severity in the punishment by reason of the sacred character of the places.

Sacrilegium, in Roman Catholic theology, is a term denoting contempt of God or of divine and holy things when expressed in act, the utterance of such feeling in speech being characterized by the word blasphemy (q. v.). This crime may be committed either directly against the holiest object by insult, touching of the consecrated bread and wine or otherwise desecrating their character (sacrilegium immedia tum); or indirectly against consecrated persons, things, or places (sacrilegium mediatum). The latter form is consequently either personale, incurred through violation of the
privilegium canonis, or assault on the persons of individuals belonging to the clerical and monastic orders [see Penitential laws], with intent to do bodily harm, or through violations of the law of chastity by persons of rank in such orders (sacriplegium carnale); or it is sacriplegium reale, consisting in the employment of sacred edifices and their decorations, vessels, utensils, etc., for common or even wicked purposes; the purloining of things which have been set apart for the use of a church by consecration or benediction (q. v.), or which have been placed in a church for protection and safe-keeping; the alienating from or denying to the Church of legal and customary revenues; the voluntary transfer of objects used in the worship and other services of the Church to the enemies of Christianity, particularly in times of war; and the violation of any "sacrament of the living" (q. v.) while in a state of mortal sin, and without having previously been absolved: or, lastly, the sacriplegium is locale, and may be committed by consciously violating an ecclesiastical asylum [see Asylum], by breaking a local interdict (q. v.) with armed force by desecrating holy places with murder, the guilty spilling of human blood or human sperm, the interment of unbelievers and excommunicated persons in churches and burial-grounds belonging to the Church, etc.

The punishments denounced against this crime have been severe under every code. According to the canon law, sacramentum absque distribuo, the sacriplegium itself was visited with the anathemas; against other sacred things, with the ban; and in case of obstinate contumacy, with the denial of Christian burial (c. 2, x, "De Rapt."
v. 17; c. 22, x, "De Sent. Excomm.", v. 39). The Roman law punished robbery of churches, unless mitigating circumstances intervened, with death (Jus. G. 9, "De Publ. Jud." iv, 18). The criminal code of Charles V decreed the punishment of death by fire against the theft of a monstrance or a ciborium (q. v.) containing the host, and death in a milder form against the theft of other sacred objects belonging to the altar and used in worship. Plundering an alms-chest might be punished by either corporal infirmities or death, and the abstraction of unsequestered objects from churches and sacristies (unaccompanied with violence or committed at night) by the infliction of penalties denounced upon ordinary burgalries (CC. C. of 1532, art. 172-175). The administration of criminal law in Germany likewise was invariably more severe than in the rest of Europe in matters crimes committed against the Church. Licentiousness on the part of clergymen belonging to the higher orders is punished by suspension and penances; if committed by monks, by confinement and severe penances. The violator of a nun, if a clergy- man, is deposed [see Decusorum]; if a laityman, is excommunicated; and the nun herself is subjected to close confinement and mortifications of the body (c. 6, 21; c. xxvii, qu. i.). Under the Roman law the violator of a consecrated female was beheaded (lib. 2, cod. "De Episc. et Cler."", i, 3, Nov. 125, c. 48.), and this penalty was retained under the code of the German empire.

Sacing-bell (campanello, tinobe) was rung at the elevation inside the church, in England, by the Constables of Cantelupe in 1240, as a warning of devotion. Becke says while the elements were blessed the servers at the altar, or parish clerk, rang the little sacring-bell, at which time the host was elevated and the host was elevated. The second sacring was the crossing of the chalice with the host. The custom has been attributed to cardinal Grey when he went to Germany, in 1203; it was confirmed by Gregory IX in 1299. At the beginning of the 13th century, at Paris, the bells were rung at this time. The Armenians use a cymbal, with little bells, called the qechones. A sacring-bell was found in the wall of Deddington church, and that of Hawstead still hangs above the rood-screen. The use of this bell has been traced back to the 11th century; and before 1114, Ivo, bishop of Chartres, thanked queen Maud of England for the bells which she had given to him. At the elevation of the host, a number of rings of any bell or of the chalice, and at the Domine non sum dignus, and once before the Pater (the latter dating from the 16th century), and also at benediction with the sacrament.

Sacris solemnibus jucunda sanguis is the beginning of a festival hymn composed by Thomas Aquinas, of which the first stanza runs thus:

quoniam displicuit janets e sanguine no precedoa;
ret ex precordia sonnet preconia;
recedent vetera, nova sint omnia;
vel, si voce, et eter opera.

There is an English translation by Chambers in the Lyra Eucharistica, p. 70:

"Let this our solemn feast
With holy joys be crowned," etc.; and another by Caswall in Hymns and Poems, Original and Translated, p. 54:

"Old things pass away,
Let all be fresh and bright," etc.

There is also a German translation of this hymn by Bösler's Auswahl altschristlicher Lieder (Berlin, 1858), p. 116, and a second one in Rambach, Anthologie christlicher Gesänge, i, 911. (B. P.)

Sacristan. (1.) The monastic treasurer and churchwarden. He kept all the necessaries for divine service; was keeper of the church keys, relics, fabric, plate, furniture, and ornaments; secretary, and chancellor. He arranged the way of processions for the preacher, superintended the bell-ringers, and received the rents, oblations, and burial-fees. At Canterbury he delivered the crosses to the new archbishop. At Ely he received the candlesticks, tapers, and flower vessels (the clergy were to supply the lights, and, as the bishop's vicar, exercised archdiocesan jurisdiction over the city chaplains. At Peterborough his fee were the horses of a knight buried in the minster, if under four marks in value, otherwise they accrued to the abbey; and at Worcester, the abbots of Gloucester, Tewkesbury, Pershore, and Worcester, and the abbot of Evesham gave him a cope of profession at their benediction. (2.) Vice-custos, the vicar of the treasurer, or sub-treasurer at York in 1230. He opened the doors of the sacristy in the morning, admitted the rector of choir and sick members who desired to say the Hours privately. He warned canons of chapter, kept the doors shut during the service, rang the bells, and led the procession. Bishop Storey mentions the use of the word sacrist in an inferior sense as recent in the 15th century. Where there was no permanent sacristan in a cathedral, a canon was appointed, called prefect of sacristy. In the Decretals of Gregory IX and at Lyons (1269) the sacrist was the inferior of the sacristan. In the new foundations he furnished the sacred elements, administered sacraments, officiated at marriages and burials, was the curate of the chapter, like the foreign parochus, and had charge of the bells, church goods, furniture, and lights. At Girona there were four sacristans; at Majorca he was vicar, canon, and custos, who administered the sacraments to sick canons and the choir clergy. (3.) The sacristan at mass has charge of the vessels, and attends in a surplice at the credence table, which is placed on the
SACRISTY 233  SADDLE

South side of the altar, and arranges on it the chalice, covered with the linen cloth called the purifier; and also the paten, which is covered with a stiff cloth and a rich veil of silk; the cruets for wine and water; the gospel and epistle books; the ewer, basin, and water for washing the celebrant's fingers; the corporal, or cloth on which the chalice and host are placed, and contained in a burse, or embroidered case; a crucifix, and two tapers. (4.) A church servant, now called sexton.

Sacristie, an apartment in a church or convent in which are kept the sacred objects used in the public worship, and which is the property of the clergy and which is sometimes called a sacristy, and which is sometimes called the sacristy. 

Sacred Bodhisattva, John de, an English ecclesiastical of the 13th century, is supposed to have been born at Halifax, in Yorkshire, but is claimed also as a native of Ireland and Scotland. He became a canon regular of St. Augustine in the monastery of Holywood, in Nithsdale. He afterwards went to Paris, and became professor of mathematics. His death occurred in 1256. His principal work was Sphaera Mundi (1648, 8vo). Other works were, De Anima Ratione, de Convem Computo Ecclesiasticum: — De Algorismo.

Sacy, Antoine Isaac Silvestre de, Baron, a celebrated French Orientalist, was born at Paris Sept. 21, 1756. In his early age he showed a talent for the study of languages; but it was mainly from self-instruction, with the help of irregular private lessons, that his immense learning was acquired. In Hebrew he was helped by a Jew; in Arabic, by a Benedictine monk, Bertheuren. Having entered upon the practice of the law at the age of twenty-three, he retired in 1789, at the age of thirty, after having devoted several years to private study. During the Reign of Terror, he lived very humbly among peasants, and could make but furtive visits to the libraries of Paris. Early in his learned career he had opened correspondence with the chief Orientalists of Europe—J. D. Michaelis, Sir Wm. Jones, Eichhorn, Spence, and others. He published three contributing frequent essays in France. He published in 1783 an essay on the origin of Arabic literature, and in 1782 an abridgment of the Natural History of Demiri. Still more valuable and erudite was his work Mémoires sur la Ceramique des Antiquités de la Perse (1793). In 1792 he was a member of the Académie des Inscriptions; and when, in 1795, the Convention founded a school for the study of modern Oriental languages, De Sacy was made professor of Arabic, a post which he held till his death. In 1806 he became also professor of Persian at the Collège de France. From this time he was very productive in all the branches of Oriental learning. Many of his works have had a fruitful influence upon Biblical criticism. We mention particularly a translation of Makris's treatise On Mohammedan Medals (1797): — The Outlines of Universal Grammar (1797): — his Christian Arabe (1806, 3 vols.): — his large Arabic Grammar (1810): — Cullina-re-Dinana, the Arabic version of the Fables of Pilpay (1810): — the Pindar, Ye-mos (Book of Gesnussel), a Persian didactic poem (1819): — The Sessions of Hariri, a romance in Arabic (1821): — and his work On the Religion of the Druids (1886, 2 vols.). The amount of learning which these works contain and imply can only be appreciated by Oriental specialists. Besides the works mentioned, he contributed scores of essays to learned journals in Germany and elsewhere. His style is simple and direct. The chief defect is a lack of poetic delicacy and of rhetorical polish. De Sacy, though beginning his career in obscurity, was finally abundantly honored. In 1808 he was given the honorary position of membership in the Corps Legislatif. In 1814 he was made a senator. In 1817 he became rector of the University of Paris. After the Revolution of 1830 he was made a peer of France and a grand officer of the Legion of Honor. Honors from abroad also came upon him in abundance. He founded chairs for the Sanscrit and the Chinese language at the Collège de France; and he continued his public lectures, six per week (an unusual number for a Persian savant) down to the day of his sickness. In politics he was conservative, in character upright, in religion Catholic. On Feb. 19, 1838, he was stricken with apoplexy on the street, and died three days after. See two biographical sketches in the Journal Asiatique, 1898; Encycl. Brit., vo. viii; Herzog, Real-Encyclop., xiii, 287-289. (J. P. L.)

Sacy, Louis Isaac le Maistre de, an eminently pious and learned Port-Royalist divine and Biblical critic, was born at Paris in 1613. He was shut up in the Bastille on account of his Jansenist doctrines, and died in 1684. The New Test. translated by De Sacy, and known as the Testament de Mons, was condemned by pope Clement IX. In 1663 De Sacy published his Testament de Mons, and in 1684, his De Sacy's version of Thomas à Kempis's De Imitatione had 150 editions. His commentary on the Scriptures has continued to maintain a high character. It is essentially valuable for unfolding the spiritual meaning of the sacred text. De Sacy was assisted in the work by Du Fossé, Charles Hêtre, and Le Tourneur. Many editions have been printed, both of the original work and of abridgments. The edition of 1692 is the best; that of 1705-80, bound variously in 40, 45, or 54 vols. 12mo, is esteemed for its convenient form; that of 1781, printed at Nines, in 25 vols. 8vo, has the advantage of being edited, with additions, by Romlet. De Sacy also wrote Lettres Chrétienes et Spirituelles (Paris, 1692, 2 vols. 8vo).

Sadamusa (Yulg. Sadom, the Greek original being lost), given in the Apocalypse (2 Esdr. i, 1) instead of Shalum (q. v.) in the ancestry of Ezra ( Ezra vii, 2).

Sadanana (the god with six fingers), in Hindii mythology, is a surname of the twelve-handed Skanda, who was born to Shiva the Destroyer by the two sisters Ganga and Usha. Sadanana slew the giant Torake by cutting him through the middle, and so divided his body into two, and upon which he rides. He is greatly revered in India, and has many pugadas.

Sadad (Σαδάς v. r. Ἀσάτα, Ἀγαφά), a corrupt Graecized form (1 Esdr. v, 13) of the name Azgad (q. v.) of the Heb. text (Ezra ii, 12).

Saddeus (or rather Daddéus) [as in 1 Esdr. vii, 40], Ledocius, v. r. λ. αὐκδίος, Λευκίας, Λαυκίας, and Λαυκίας, a corrupt Graecized form (1 Esdr. viii, 45) of the name Iono (q. v.) of the Hebrew text ( Ezra viii, 17).

Saddle (σαλάδα, merkáth, a "chariot" [1 Kings iv, 28; Heb. v, 6]; also a seat in a chariot or other vehicle, "saddle" [Lev. i, 8]; "covering" of a palanquin [Cant. iii, 10]). See CHARIOT.

The word which our translators elsewhere (Gen. xxii, 3; Num. xxvii, 21; Judg. xix, 10; 2 Sam. xii, 7, 17; xxvii, 23; 1 Kings ii, 40; xiii, 13, 23, 27; 2 Kings iv, 24) render by "saddle" literally signifies "to bind about" (as Exod. xxix, 9, 11; Lev. ii, 6; and 40th), and is probably used for riding or carrying burdens. It is certain that saddles were unknown for many ages after the custom of riding had been introduced. Those who did not ride bareback were contented with placing a piece of leather or cloth between them and their steed. As luxury advanced, a soft cushion was introduced, to which were added various ornamental trappings, and these were soon carried to a ridiculous excess
of ostentation. Saddles, properly so called, were in all probability invented by the Persians, perhaps for the sake of giving a steady seat to their mounted archers, a part of their military force to which they always paid the greatest attention. Pack-saddles must have been a much earlier invention, for something was obviously necessary to prevent the backs of animals bearing heavy burdens from being chafed by the loads (see Kitto, Pict. Bible, at Judg. ix. 10). See Ass; Camel; Horse.

The ordinary pack-saddles of the camels were high, and made of wood; carpets, cloths, etc., were heaped upon it, to form a comfortable seat for ladies who do not use the cradle, or hamper, while travelling. The cloth, etc., were removed at the end of the day's journey, and being laid on the ground, served as a sort of mattress in the tent, on which a person might sit or lie down, while he reclined against the pack-saddle itself (Gen. xxxii, 34).

Sadduca (or rather Sadda'cu, Saddukos, v. r. Saddukos), the Greekized form (1 Esdr. viii. 2) of the name of Zadok (q. v.), the high-priest, one of Ezra's ancestors (Ezra vii. 2).

Sadduce (strictly Sadda'can, Sadduckios [Matt. iii. 7; xvi. 1, 6, 11, 12; xxii. 28, 34; Mark xii. 18; Luke xx. 27; Acts iv. 1; v. 17; xxiii. 6, 7, 8]), the usual designation of one of the three sects or orders of Judaism in the time of Christ, the other two being the Essenes and the Pharisees. They were originally a religious party, if such free-thinkers could fairly be so designated. See Sects; Jesus.

I. Name of the Sect and Its Signification.—According to the current tradition of the Jews, the appellation modern סְדָדַעְנֵא, from which Sadducaic is Sadduceus the Greek form (used by Josephus and the New Testament as above), is derived from Zadok, the name of the founder of this sect, who was a disciple of Antigonus of Soho, B.C. 200-170. See School. This is not only declared in the Book of Rubai Nahum (cap. iv.), but by Saadiah Gaon, 892-942 A.D.; by R. Nathan (cir. 1030-1100 A.D.), in his lexicon called Joseph, v. r. יֵשׁוֹעִי, by Maimonides (1135-1204 A.D.), in his commentary on Abot (i, 3), but by the greatest Jewish authorities since the 9th century of the Christian era. Dr. Geiger, who, in his Urbshaft und Uebersetzungen der Bibel (p. 105), argues in a most elaborate manner that there are not sufficient historical data for deriving the name Sadduceus from Zadok, a disciple of Antigonus of Soho, derives it, nevertheless, from this proper name, which he assigns to another person of an earlier date, as will be seen in the sequel. Epiphanius, however, seems to derive it from a double source viz. from a proper name Zadok, and from the Hebrew name יְזָדֹק, righteousness. He says that they call themselves Sadducees because this name is derived from righteousness, as Zadok denotes righteousness (Ἐναγματικῶς τινος Σαδουκείων ὡς ἄντι δικαιοσύνης τῆς ἐπικλήσεως ὑρμομένης 'στείκ γάρ ἵμαντες δικαιοσύνη), and that there was also an ancient priest named Zadok, but they did not continue in the doctrines of their (i.e., Sadducees) chief (Adversus Harreres, i, 14). Dr. Low rejects altogether the derivation of Sadduceus from the proper name Zadok, for the following reasons: (1) There is no distinction in the whole ancient Jewish history for the followers of a sect to be called by the name of the chief of the sect, and that it is as contrary to the genius of the Hebrew if יְזָדֹק is taken as the proper name Zadok, with יְיָדֹק, to translate it as Sadducea, as it would be to render עַרְבָּךְ, a follower of Jeroboam. (2) The older Talmudic literature knows nothing of Zadok and Boethus, the supposed originators of the Sadducees. (3) The Sadducees, as is evident from ancient sources, called themselves יְזָדֹק, the righteous (Epiphanius, Adversus Harreres, i, i, 4). Hence Dr. Low concludes that, in harmony with his Hebrew name יְזָדֹק, the Sadducees called themselves in Greek Ἰουθής, the straightforward, open, honest, righteous, and that the opponents of this sect changed both the honorable Hebrew appellation יְזָדֹק into Ἰουθής (hence the singular יְזָדֹק = Sadduce), and the Greek name Ἰουθής, which is written in Hebrew יְזָדֹק (according to the analogy of בְּאָרָךְ = boethus), from which originated יְזָדֹק, Boethusians.

He moreover maintains that it is for this reason that the Sadian makes no distinction between the Sadducees and the Boethusians (Ben-Chananja, i, 946 sq.). This definition of the appellation Sadduceus is entirely speculative, and its soundness must be determined by an examination of the rise, progress, and doctrines of the Sadducees. Besides, the first objection against the derivation of יְזָדֹק from the proper name יְזָדֹק is set aside by the fact that the first Karaites called themselves יְזָדֹק, followers of Aman, Amanites; so that יְזָדֹק, an Amanite, is an exact parallel to יְזָדֹק, a Zadokite. Still more speculative, and altogether unique, is the opinion of Koster that "Sadduceus is simply a different form of Stoic" (Studien und Kritiken, 1887, p. 164). According to some readings the Sadducees also called themselves גָּדוֹל, Scripturaries, Biblic-followers, Karaites (Megilla, 24 b; Jerus. Megilla, iv, 9), because they adhered to the written law. This is in perfect accordance with the ancient custom of calling a Biblical student by the honorable Hebrew appellation יְזָדֹק (formed according to the analogy of יְזָדֹק); or by the Aramaic form יְזָדֹק (defective of יְזָדֹק), or יְזָדֹק, formed according to the analogy of יְזָדֹק. Thus Chaima, Abba Chali'ah, Eliezer ben-Simon, and Levi ben-Si, were designated by this title (Talmish, 27 b; Baba Bathra, 129; Midrash Rabbah on Lev. cap. xxx; Jalkut, On the Song of Songs, § 338); and the Talmud tells us that those whom were deemed worthy of this name "who understood how to read accurately the law, the prophets, and the Hagiography" (comp. Kiddushin, 12; First, Kardathem, p. 129).

II. Scripture Notices.—Although frequently mentioned in the New Testament in conjunction with the Pharisees, they do not throw such vivid light as their great antagonists on the real significance of Christianity. Except on one occasion, when they united with the Pharisees in insidiously asking for a sign from heaven (Matt. xvi, 1, 4, 6), Christ never assailed the Sadducees with the same bitter denunciations which he uttered against the Pharisees; and they do not, like the Pharisees, seem to have taken active measures for causing him to be put to death. In this respect, and in many others, they have not been so influential as the Pharisees in the world's history; but still they deserve attention, as representing Jewish ideas before the Pharisees became triumphant, and as indicating one phase of Jewish history at the time when the new religion of Christianity, destined to produce such a momentous revolution in the opinions of mankind, issued from Judaism.
The Sadducees are not spoken of at all in the fourth Gospel, where the Pharisees are frequently mentioned (John vii, 45; xi, 47, 57; xviii, 3; viii, 3, 13-19; ix, 13); an omission, which, as Geiger suggests, is not unreasonable, consciousness, and the Gospel of John, (of which p. 107). Moreover, while Paul had been a Pharisee and was the son of a Pharisee, while Josephus was a Pharisee, and the Mishna was a Pharisaical digest of Pharisaical opinions and practices, not a single undesigned writing of an acknowledged Sadducee has come down to us, so that we can form an estimate of their opinions; we are mainly dependent on their antagonists. This point should always be borne in mind in judging their opinions, and forming an estimate of their character, and its full bearing will be duly appreciated by those who reflect that even at the present day, with all the checks against misrepresentation arising from publicity and the invention of printing, probably no religious or political party in any country would be content to accept the statements of an opponent as giving a correct view of its opinions.

III. The Tenets and Practices of the Sadducees.—To apprehend duly the doctrines and usages of this sect, it must be born in mind that the Sadducees were the aristocratic and conservative priestly party, who clung to their ancient prerogatives and resisted every innovation which the ever-shifting circumstances of the commonwealth demanded; while their opponents, the Pharisees, were the liberals, the representatives of the people—principle being so to develop and modify the Mosaic law as to adapt it to the changing times, and, to make the people at large real that they were "a people of priests, a holy nation." Thus standing immoveably upon the ancient basis, the Sadducees, whose differences were at first chiefly political, afterwards extended these differences to doctrinal, legal, and ritual questions.

A. Political Opinions.—The primary political difference between the two sects was that the Sadducees maintained that a man's destiny is in his own hands, and that human ingenuity and statescraft are therefore to be resorted to in political matters; while the Pharisees clung to the conviction that the political relations with foreign nations, like the theocracy at home, are under the immediate control of the holy one of Israel (Josephus, Ant. xiii, 5, 9; xviii, 1, 4, with War, ii, 8, 14; Mishna, Berachoth, 33 b; Nidalah, 16, 72). That the Sadducees, who were the real aristocracy (Josephus, Ant. xvii, 1, 4) and the successful warriors in the Maccabean struggles (Josephus, Ant. xviii, 1, 4; War, ii, 5, 3), should have espoused such political views, was the natural result of their political success. Moreover, the doctrine that what a man possesses is what he deserves was peculiarly gratifying to the successful and aristocratic caste.

Besides, in this respect, as in all other matters, the Sadducees showed their conservatism in abiding by the Pentateuchal views that a man is rewarded in this world according to his deeds, and that prosperity and adversity are a test of piety and wickedness (Deut. xxviii, 1-68, with Ps. xxxvii, 25).

B. Doctrinal Views.—1. Rejection of the Oral Law.—Foremost among the doctrines of the Sadducees is the tenet that the oral traditions, which are not written in the law of Moses; and it is for this reason that the Sadducees reject them, saying that it is only the written observances which are binding, but those which are transmitted by the fathers are not to be observed (Ant. XIII, 10, 6). For the better understanding of this important question, it must be remarked that the Pharisees and the orthodox Jews to the present day have an oral law in addition to the written law. This oral law consists of sundry religious, ceremonial, and social practices which obtained in the course of time, and which were called forth either through the obscurity, insufficiency, or the carelessness, and the restrictions and contradictions of the written enactments, or through the inapplicability of some of the Mosaic statutes to the ever-changing circumstances of the commonwealth. Some of the enactments contained in this oral code are undoubtedly as old as the original laws which they supplement and explain, so as to adapt them to cases not specified in the Mosaic law; others, again, were promulged by the spiritual heads of the nation after the return from the Babylonian captivity, because the altered state of the nation absolutely required these regulations, although there was no basis in the Mosaic law for them; while others originated in party feeling, to shield the pious against even approaching the limits of transgression. Now the Sopherim (i.e. scribes and the lawyers), after the Babylonian captivity, who found this accumulated traditional code, tried to classify and arrange it. Those practices which could be deduced from or introduced into the text of Holy Writ by analogy, combination, or otherwise, were regarded as legitimate and authoritative traditional exposition of the law (see Massechoth); while those practices which obtained in the course of time, which were venerated and esteemed by the people both for their antiquity and utility, but for which neither author nor apparent reason could be found in the written law, were denominated A traditional law of Moses from Sinai (ללא מזדויה חק של מosis), because from their antiquity and importance, it was thought that they must have come down from the lawgiver himself. It is this oral law which the Sadducees rejected; and in their conservatism they adhered to the ancient Hebrew Scriptures, as well as to those time-honored explanations and practices (ToObject אֲשֶׁר לְכַלִּי) which were not at variance with the text of the Bible. It must be distinctly borne in mind that by their rejecting traditions is not meant that the Sadducees rejected all the traditional comments upon the law and the ancestral practices not found in the Bible. Even the Talmud itself only charges them with rejecting some things (Sanhedrin, 38 b; Horajoth, 4 a), and there is but little doubt that those practices which they rejected were originated by the Pharisees, the liberal party whose innovations the conservative Sadducees disliked, and regarded as an encroachment upon their priestly and aristocratic rights. In the Mishna (Dalkin, 5, 5), it is pointed out that "all the Pharisees and Sadducees are mentioned, which are unimportant—such, e.g., as touching the Holy Scriptures made the hands technically "unclean," in the Levitical sense, and whether the stream which flows when water is poured from a clean vessel into an unclean one is itself technically "clean" or "unclean" (Yad, iv, 6, 7). If the Pharisees and Sadducees had differed on all matters not directly contained in the Pentateuch, it would scarcely have been necessary to particularize points of difference such as these, which to Christians imbued with the genuine spirit of Christ's teaching (Matt. xxv, 11: Luke xi, 37-40) must appear so trifling as not to resemble the narrow and deceased imagination. Indeed, it will be seen in the course of this article, from the enumeration of their distinctive tenets, that the theological views of the two sects were not so much at variance as might have been supposed, and that the Sadducees in many cases actually adhered to ancient traditions, while the Pharisees abandoned such of those traditions as were not consonant with the true raising the people, whose true representatives they were, to a nation of kings and priests. See Tradition.

That the Sadducees also rejected the prophets and Hagiographa, and only believed in the Pentateuch, as is asserted by Epiphanius (Adversus Heresies, xiv), Origen (Cels., i, 49), Jerome (Comment. on Matt., xxvii, 31-38), and followed by some modern writers, is unli
SADDUCEE 236  SADDUCEE

at variance with the Jewish records of this sect, and has evidently arisen from a confusion of the Sadducees with the Samaritans.

2. Description of the Resurrection, etc.—Next in importance in point of doctrine is their eschatology. The Sadducees denied that the dead will rise to receive their reward and punishment. Josephus, who specifies this second cardinal difference between the Pharisees and the Sadducees, describes their respective doctrines of a future life, and of punishment in another world, as follows: 'In another place, again, where this historian mentions the distinctive eschatological views of the Sadducees, he plainly says, "Their doctrine is that souls perish with the body" (Saddaei- καιοι δι τας ψυχας δ ο λογος συναφανια τοις συναφι [Ant. xvi, 1, 4]). But in the Talmud and in the New Test., we are told that they simply denied the resurrection of the body (Sanhedr. 90 b; Luke xx, 27; Matt. xii, 18; see also Matt. xxi, 23), which by no means involves the immortality of the soul; and it cannot be supposed that if the Sadducees had actually denied the immortality of the soul, so vital a point would be passed over in silence by the Talmudic doctors, when unimportant points are so minutely specified. Therefore, before we can, therefore, be no doubt that Josephus, in his vanity to depict to the Greeks the Jewish sects in such colors as to make them correspond to the different philosophical schools among the Greeks, did injustice to the Sadducees by assigning to them the doctrines of the Stoics. The misrepresentation of the Sadducees will appear all the more evident when it is borne in mind how defectively Josephus describes the Pharisaic eschatology in the very same section. He there represents the Pharisees, who were his own party, as believing that the resurrection is to be confined to the righteous, while the wicked are to be detained in everlasting punishment in Hades under the earth (Ant. xviii, 1, 3); whereas it is well known that this opinion was only entertained by some of the later doctors, while the Pharisees generally believed in the resurrection of both the righteous and the wicked (Dan. xii, 2), and this was the common doctrine as late as the second book of Maccabees (comp. xii, 40-45). The Sadducees, however, in the section of the Resurrection, were for not believing in the resurrection of the dead to receive their reward and punishment is that it is not taught in the law of Moses (Sanhedrin, 90 b), which simply promises temporal rewards and punishments for obedience and disobedience (Exod. xx, 12; xxii, 25, 26; Deut. vii, 12-15; xxvii, 1-99). The very quotation made by our Saviour (Matt. xxii, 31, 32; Mark xii, 28, 27; Luke xx, 37) of Exod. iii, 6, 15, which is only natural to suppose is the most cogent text in the law, nevertheless does no more than suggest an inference on this doctrine. The Sadducees, however, did not admit the inference, and they simply regarded this mode of proving the resurrection of the soul as a proof that they were in the habit of hearing similar inferences deduced by the Pharisees from other passages. Thus the Talmud relates: "The Sadducees asked Rabbi Gamaliel, Whence do you know that the holy one, blessed be his name, will raise the dead? To which he replied, From the law, the prophets, and the Hagiographa: from the law because it is written, 'And the Lord said to Moses, Behold, thou shalt lie down with thy fathers (זון), and this people shall rise again' (Deut. xxxi, 10); from the prophets because it is written, 'Thy dead shall live,' etc. (Isa. xxvi, 19); and from the Hagiographa because it is written, 'And the roof of thy mouth,' etc. (Song of Songs, vii, 9). The Sadducees, however, would not accept these passages till he quoted the passage, 'The land which the Lord sware unto your fathers to give it to them' (Deut. xi, 21). He promised it to them (יִשְׂרָאֵל)—i.e. to the living, and not to the dead; but as they were now dead, it is evident that there will be a resurrection if the promise is to be fulfilled" (Sanhedrin, 90 b).

We are also told in the New Test. that the Sadducees believed in the resurrection of the angels in the day of the Lord (Acts ii, 23); but this can by no means imply that they altogether denied the existence of angelic and spiritual beings, since the Sadducees were firm believers in the divinity of the Mosaic law, where the appearance of angels is again and again recorded (Gen. xvi, 7; xix, 1; xxii, 11; xxviii, 12; Exod. xii, 20; Num. xxii, 28 et al.), and neither Josephus nor the Talmudic writings charge them with this unbelief. What they denied was the incarnation and manifestation of demoniac powers and angelic beings in later days, as believed and described in the Jewish writings and in the New Test.

3. The opinions of the Sadducees respecting the freedom of the will, and the way in which those opinions are treated by Josephus (Ant. xxiii, 5, 9), have been noticed elsewhere. See PHARISEES. It may here be added that possibly the great stress laid by the Sadducees on the freedom of the will may have had some connection with their forming such a large portion of that class from which the Scribes were selected. Jewish philosophers, in their study, although they knew that punishments as an instrument of good were unavoidable, might indulge in reflections that man seemed to be the creature of circumstances, and might regard with compassion the punishments inflicted on individuals whom a wiser moral training and a more happily balanced nature might have made useful members of society. Those Jews who were almost exclusively religious teachers would naturally insist on the inactivity of man to do anything good if God's Holy Spirit were taken away from him (Psa. li, 11, 19), and would enlarge on the perils which surrounded man from the temptations of Satan and evil spirits (1 Cor. x, 13; 1 Tim. iv, 13). But it is likely that the tendencies of the judicial class would be more practical and direct, and more strictly in accordance with the ideas of the Levitical prophet Ezekiel (xxxiii, 11-19) in a well-known passage in which he gives the responsibility of bad actions, and seems to attribute the power of performing good actions exclusively to the individual agent. Hence the sentiment of the lines,

"Our acts our angels are, or good or ill. Our fatal shadows that walk by us still,"

would express that portion of truth on which the Sadducees, in inflicting punishments, would dwell with most emphasis; and as, in some sense, they disbelieved in angels, these lines have a peculiar claim to be regarded as a reflection of Sadducean sentiments. If, however, new haps, if writings were extant in which the Sadducees explained their own ideas, we might find that they reconciled these principles, as we may be certain that Ezekiel did, with other passages apparently of a different import in the Old Test., and that the line of demarcation between them and the Pharisees was not, in theory, very sharply marked as the account of Josephus would lead us to suppose.

C. Legal Matters.—1. The Sadducees restricted the Levirate law to cases of betrothal (הדואר), but denied its obligation when the marriage was consummated (הזכרות). Thus, for instance, though they regarded a betrothed woman ( Subscriber) as a wife, and treated her as a married woman in accordance with the Mosaic legislation [see MARRIAGE], yet, when her betrothed husband died without cohabiting with her, his surviving brother could perform the duty of Levir without committing incest, as she was still a virgin. In this respect, too, the Sadducees, as the erudite Geiger has shown, held the ancient Levirate law, which is based upon Gen. xxxviii, 7-10, and which—inference from the similarity of expression used in vers. 7 and 10—that Esarhadon acted wickedly and not properly com-
summat the marriage with Tamar—enacted that the
Levir is only then to perform the duty towards his
decreed brother when the marriage has not been con-
summated (Yebamoth, 84 b; and Bava Rabbah, 4a).
Leviticus (Yebamoth) (Hesula, 18622, i, 30, etc.).
It is to be remarked that the Samaritans of old restric-
ted the Levirate law (Deut. xxy, 5, etc.) in the same
manner, and that the Talmud which records it tells us
that in support of this restriction the Samaritans ap-
pealed to the expression נִשָּׁה, which they trans-
lated שָׁבָט, and regarded as the adjective of נִשָּׁה, con-
straining it with the preceding נַעֲרָה, while they took
לַעֲרָה as explicative of the preceding by way of rep-
tation, translating the whole passage “The wife of the
decreed who is outside (i.e. the consummation of the
marriage) is not to be for another man” (Jerusalem Ye-
bamoth, i, 6; Kirchheim, Kirche in Shemron, p. 36).
The Karaites, who may be regarded as modern Sadducees,
explain the Levirate law in the same manner. This
restriction of the Levirate law on the part of the Sad-
duces imparts additional force to the incident recorded
in the Gospels (Matt. xxii, 23, etc.; Mark xii, 18, etc.;
Luke xx, 27, etc.). Here we are told that the Sad-
duces, not being in a resurrection, put the follow-
quoting question to our Saviour: The first of seven brothers
married a wife and died childless, whereupon the second
brother performed the duty of Levir, and he too died
without issue; then the third, fourth, fifth, sixth, and
seventh brother successively performed the duty of
Levir, so that she alternately became the wife of seven
husbands—now, whose wife is she to be at the resur-
rection? With the restricted application of the Levirate
law before us, it will be seen that though this ironical
question was chiefly directed against the doctrine of the
resurrection, yet it at the same time also attacks the
orthodox Pharisaic view of the Levirate law which was
undoubtedly shared by our Saviour. What the Sad-
duces thereby say is, as Geiger rightly remarks, that
according to their application of the Levirate law, which
restricts it to the betrothed woman נָשִׁית, especi-
al-Iy several times under similar circumstances, the rela-
tion of the woman to her last husband who consum-
mated the marriage is far more intimate than to any of
the other husbands to whom she was simply betrothed.
Supposing, therefore, her marriage to be kept secret, that there will
be a resurrection, and the woman will rise with all
the seven brothers, no difficulty will be experienced ac-
curring to the restricted application of this law, inasmuch
as she will be the wife of the last husband who alone
consummated the marriage. According to the Pharisaic
practice, however, the Levirs have to marry the
widow after the marriage has been consummated, so
that she is the real wife of all the seven brothers; hence
the ironical question put to our Saviour, “According to
the Pharisaic doctrine of the Levirate law, in which you
believe, the difficulty will be to decide whose wife she is
to be.”
2. The ceremony of taking off the shoe (גנבת הוא), in
case the surviving brother refuses to perform the duty
of Levir towards the widow of his deceased brother is,
explained most rigidly by the Sadducees insisting upon
the letter of the law, that the rejected widow is to spit
into the man’s face (Deut. xxv, 9); while the Pharisees,
adopting the law to the requirements of the time,
regarded the spitting before his face as satisfying the
demands of the injunction, and hence explained the
passage accordingly (Taamith, iv).
3. The same conservatism and rigor the Sadducees
manifested in the right of retaliation, insisting upon the
literal carrying-out of the law, “eye for eye, tooth for
Tooth, hand for hand, foot for foot,” etc. (Exod. xxi, 23,
etc.); while the Pharisees, with a due regard for the
interests of the people, maintained that pecuniary com-
pensation is sufficient (Baba Kama, 39 b; 34 a, b; Ta-
annah, iv, 2).
4. For the same reason the Sadducees also insisted
upon the literal explanation of the law in Deut. xix,
21, maintaining that false witnesses are only then to be
executed when the sentence of the falsely accused had
actually been carried out, in which case alone the words
“life for life” receive their literal fulfillment; whereas
the Pharisees concluded, from Deut. xix, 19, that if they
are found out, even before the sentence has been carried
out, they are to be executed; for it is there said, “Ye
shall do unto him as he intended to do unto his bro-
ther.” Hence the intention is to be visited with capital
punishment (Mishna, Maccot, i, 6; Tosiphta Sanhed-
rin, vi).
5. The law of inheritance formed another distinctive
feature of the Sadducees. According to the Mosaic
law, the son alone is the rightful heir; and in case there
is no son, the daughter inherits the father’s property
(Numb. xxvii, 1–11). Now, the Sadducees maintained
that in case the son, who is the heir presumptive, has
sisters, and that the daughter is the deceased son’s
heir, it was not to go entirely to his female issue, but that
the deceased’s sisters are to have an equal share with his
issue, urging that the deceased son’s daughter is only the
second degree, while his sisters are the first degree.
The Pharisees, on the contrary, maintained that the deceased
brother’s daughter is to the rightful heir as such, as she is the
descendant of the male heir, whose simple existence disinherited his sisters (Mishna, Baba Batra, viii, 1; Babylonian Baba Batra, 115 b; 116; Taanith, v, 2).
6. From the law that the owner of cattle is responsible
for damages done by his animals (Exod. xxii, 29, 30),
the Sadducees maintained that a master is responsible
for damages done by his slave, submitting that he is far
more answerable for his cattle than his captive, inasmuch as he is to
watch over his moral conduct. The Pharisees, on the
other hand, denied this, submitting that the slave is a rational,
and hence a responsible, creature; and that if the master be held answerable for his conduct, the
dismissed slave might, out of spite, commit ravages in order to make his master pay (Mishna, Yadaim, iv, 7).

D. Ritual Questions.—1. The first important distinction
in this department to be mentioned is the great stress
which the Sadducees laid on the ritual purity of the
person of the officiating priest. He had to keep
aloof from the very appearance of uncleanance. Hence
they required that the burning of the red heifer, from
the ashes of which the water of absolution was prepared,
should not be performed by any priest who had been
defiled, although he had immersed, because he does not
become undefiled before sunset (יִמְנָה לְךָ נָשִׁית).
The Pharisees, on the other hand, disregarding the person
and regarding the thing, opposed this great ado about
the aristocratic priest. “They prepared a baptism on the
Mount of Olives, where the burning of the red heifer
took place, and designedly defiled the priest who was
to burn it.” The Sadducees should not be able to say
that the heifer is not to be prepared by such as had
not become pure by the sun-setting” (Mishna, Parah, iii, 7).
2. The Sadducees, again, did not believe that the
sacred vessels in the Temple are to be subjected to the
strict laws of Levitical purity, which the Pharisees
stoutly maintained. So strict were their views on
this subject that the Pharisees had all the sacred ves-
sels immersed at the conclusion of every festival,
because some unclean priest might have touched them.
Hence, when the Pharisees, on one occasion, immersed
even the golden candlestick after a fastened funeral,
Mishna, Taanith, 79 d). That the Pharisees should have thus guarded
the sanctity of the vessels against the possible touch
of a defiled priest must have been all the more annoying to the priestly Sadducees, since in other things which did not affect this aristocratic fraternity, but concerned the daily life of the people at large, the Pharisees were less rigorous with regard to the laws of Levitical purity than the Sadducees, as may be seen from the following instance.

3. The Sadducees interpreted the injunction in Lev. xi, 39, 40 most rigidly, maintaining that it is not only the flesh, but the skin, bones, sinews, etc., which are defiled. They did not approve of the practice of making the skin, etc., defiled by cutting it off, but some of the bodies, such as the skin, bones, sinews, etc., while the Pharisees restricted this defilement by contact simply to the flesh, except the parts of a dead human body, and of a few reptiles, in which the skin and the flesh are, to a certain extent, identical.

4. As a necessary and vital consequence of the foregoing view, the Sadducees maintained that the skin and the other parts of an animal not legally slaughtered—i.e. both of all those animals which the law permits to be eaten when legally slaughtered, but which have died a natural death, and of those which the law does not permit to be eaten—are allowed to be made into different articles of use; and that leather, parchment, or any other of the numerous articles made from the skin, bones, veins, etc., is defiling. This rigid view obliged the Sadducees to explain Lev. vii, 24 in an unnatural manner, by taking the expression דָּלַד הַיּוֹם to denote an animal approaching the condition of becoming a carcass—i.e. being so weak that it must soon expire—and to urge that an animal in such a condition may be slaughtered before it breathes its last. In such a case, though its flesh is a defiling carcass, and must not be eaten, the fat, skin, bones, etc., may be used for diverse purposes (Jerusalem Megilla, 97; Jerusalem Babylon Sabbath, 108 a). The Pharisees, on the other hand, as the representatives of the people, whose interests they had at heart, allowed the sundry parts of such animals to be used as materials for different utensils. They even allowed the Sacred Scriptures, the phylacteries, and the mezuzah (q.v.) to be written on parchment prepared from the skin of an animal which either died a natural death or was torn by wild beasts, but not on parchment prepared from the skin of an unclean animal (ibid., and Torah ad init.; Sopherim ad init.). Bearing in mind this difference of opinion, we shall understand the import of the two discussions, recorded in the Mishna, between the Sadducees and the Pharisees, which are narrated by Rabbah upon the Sadducees, we are told, said, "We complain of you Pharisees because you say the Sacred Scriptures, when touched, defile the hands, but the books of Homer do not defile the hands." Johanan ben-Zakkai said, "And have we nothing else to object to the Pharisees but this? Do they not also assert that the bones of an ass are clean, but that the bones of Johanan the high-priest are unclean?" (Yadain, iv. 6). Now, according to the Sadducees, contact with sacred things, so far from defiling, actually sanctified; while the Pharisees, in order to guard the sacred things against contact, ordained that they not touch such holy things defiled. On the other hand, the Sadducees regarded the reading of foreign books as defiling, because they are written upon parchment made from skins of unclean animals, or of clean animals not legally slaughtered, which, with them, were like carcasses, and which, as we have seen, the Pharisees did not admit. Hence the charge of the Sadducees that the Pharisees were engaged in a superficial examination of the Sacred Scriptures, which Johanan ben-Zakkai rebuts by ironically enhancing this charge, and saying that this is not the only accusation against the Pharisees, inasmuch as he shows thereby a similar consequence arising from Pharisaic views. The bones of a dead ass are not unclean, according to the express declaration of the Bible, even if they were to be the bones of such a man as John Hyrcanus, the patron of the Sadducees; whereas the bones of an animal, even if it be unclean, and such a contempitible one as an ass, are clean; thus showing that the defiling power of an object does not always betoken a degradation in its nature, but, on the contrary, because it is of an elevating nature, therefore it defiles more easily. The other discussion, also arising from this difference of opinion, is recorded in the Talmud, where the law of the Pharisaic sages is recorded, that the Sacred Scriptures, the phylacteries, and the mezuzah may be written upon parch- ment prepared from the skin of an animal which died a natural death, but not from an unclean beast. Whereupon a Boethusian [=Sadducee] asked Rabbi Joshua Ha-Garsi, "Where can you show that the phylacteries are not to be written on the skin of an unclean animal?" R. Joshua. "Because it is written [Exod. xiii, 9, where the phylacteries are enjoined] that the law be written in [Exod. xiii, 9, where the phylacteries are enjoined] that the law shall be written on the forehead. But, according to the Sadducees, "the carcass ought also to be eaten." To this he replied, "The law says ye shall not eat of anything that died [Deut. xiv, 21]; and sayest thou that it should be eaten?" To this the Sadducees replied, "Bravo!" (יִדְנִלְךָ = קַנְוָע [Sabbath, 108 a]).

5. The Pharisees, who stood upon their priestly dignity and ancient prerogatives, rejected the artificial mode of amalagnating the distance (יִנְפַּת הַנָּעַר) introduced by the Pharisees to enable the members of their order to walk beyond the Sabbath-day's journey without infringing on the sanctity of the day, so as to join the social meal which was instituted in imitation of the priestly social repast. See PHARISEE; SABBATH-DAY'S JOURNEY.

6. As priests, the Sadducees were not subject to the stringent religious laws, and could therefore enjoy their meals comfortably, inasmuch as they regarded the work requisite for their preparation as part of their sacrailc duties, which set aside the Sabbath regulations; whereas upon the people they imposed the most rigorous observance. Thus, in accordance with Exod. xxv, 5, they insisted that lights must be not kindled on Sabbath and that the superfluous loaves in the dark (Sabbath, 55 b; Rashi, on Tosaphi in Sabbath, ibid.; Maimonides, Yad Hacheksa, Hilchot Sabbath, vi, 1; Tanchuma, lvii); they prohibited the eating of any food which was either kept warm since the preparation-day (יִנָּפְט בּוֹם), or was warmed on the Sabbath (Responsa of the Gaon, called Shoura Tehbbit, No. xxxiv); and forbade commisal intercourse because of the danger of defiling foreign books as defiling, because they are written upon parchment made from skins of unclean animals, or of clean animals not legally slaughtered, which, with them, were like carcasses, and which, as we have seen, the Pharisees did not admit. Hence the charge of the Sadducees that the Pharisees were engaged in a superficial examination of the Sacred Scriptures, which Johanan ben-Zakkai rebuts by ironically enhancing this charge, and saying that this is not the only accusation against the Pharisees, inasmuch as he shows thereby a similar consequence arising from Pharisaic views. The bones of a dead ass are not unclean, according to the express declaration of the Bible, even if they were to be the bones of such a man as John Hyrcanus, the patron of the Sadducees; whereas the bones of an animal,
the Temple treasury, on which was indicated that the money therein contained was destined for the sacrifices for all Israel. The required money was taken out of the boxes three times a year—on the three great festivals, i.e., on the feast of Passover, Pentecost, and Tabernacles. From the first box it was taken with the announcement that it was "in the name of the whole land," from the second, stated, "in the name of Media, and in the name of the distant countries generally;" so that all the Israelites, including even those who did not contribute to this tax, were represented in the dedication (Shekalim; Maimonides, *Shekalim*). So hotly was this point contested between them that it lasted eight days (Nisan, 1–8, year not mentioned), and that the Pharisees, to mark their victory over the Sadducees, appointed these eight days half-festivals, during which no mourning should take place (*Monochoth*, p. 65 a). 8. Regarding the sacrifices as their own, or as belonging to their priestly party, the Sadducees maintained that the priests might eat of the meat-offerings which were connected with the free-will animal sacrifices (Numb. xvi. 2, etc.); while the Pharisees maintained that they must be burned on the altar, and carried their opinion into a law, for which reason they again instituted a half-festival in commemoration of their victory. 9. Taking the expression *תֵּרְצוֹן* (*Lev.* xxiii, 11, 15, 16) literally, the Sadducees maintained that the Omer ought to be offered on the first day following the weekly Sabbath; so that the feast of Pentecost is always to be on the first day of the week (Mishna, *Me'aher*, x, 3; Gemara on the same, 65 a: *Talmid*, i, 1). See PENTECOST. 10. The Sadducees rejected the old custom of pouring water on the altar every day at the morning sacrifice during the feast of Tabernacles (עָלָהַיָּם), and so opposed were they to this ceremony that it became the cause of separation between the Sadducean king Alexander Jannaeus and the Pharisees (Succa, 46 b, with Josephus, *Ant.* xiii, 13, 5; Grütz, *Geschichte der Juden*, iii, 473, 2d ed.). 11. They also objected to the procession of the people round the altar holding willow branches in their hands on the feast of Tabernacles (*Yoma*, 43 b). See TABERNACLES, FEAST OF. 12. They maintained that the incense which the high-priest was to carry into the holy of holies on the great day of atonement ought to be kindled outside, and thus to be carried into the sanctuary; because they deemed it improper to do work in the presence of the Lord, and because it was more in accordance with the words of the court of the high-priest, before the Day of Atonement, to perform everything in strict accordance with their enactments (*Sipkra*, *Pericepo* וּכְאָשׁ בַּאָשׁ, iii; *Jerusalem Yoma*, 1, 5; *Babylon Yoma*, 19 b, 58 a). 13. Though admitting that Exod. xiii, 6 enjoins phylacteries, the Sadducees rejected the Pharisaic regulations about the making and weaving of them (*Sinhedrin*, 88 b; Maimonides, *Yad Hahazakah*, *Hilchoth Tefliloth*, iv, 5). See PHYLACTERIES. 14. Based upon the law that a lying-in-woman is not to touch holy things nor to go into the Temple during the thirty-three days following the seventh days after the birth of a boy, and during the sixty-six days following the first fourteen days after the birth of a girl (Lev. xii, 2–8), the Sadducees maintained that this law excludes the woman from the enjoyment of her communal rights all these days; while the Pharisees, who also believe laws to be permanent as much as possible from the burden of the law, did not transfer the holiness of the things and of the Temple to the persons, thus granting to the wife and to the husband the enjoyment of their rights. Hence, while they held every other appearance of blood in the woman as defiling, they regarded it, in this instance, as the effects of the birth, and as pure blood (*יַרְדֵּנֶשׁ*). It is for this reason that the שֵׁרְפָּתָה (*Lev.* iv, 5) has not the *mpikkūth*, thus denoting pure blood, as the present Masoretic text is the Pharisaic text; and that the rendering of it in the A. V. by "the blood of her having a lying-in," though agreeing with the Sadducean text, which is undoubtedly the original one, is at variance with the *textus receptus* (comp. Geiger, *He-Chalutz*, v. 29; 29 sq.; *Judische Zeitschrift*, i, 51; ii, 27, etc.). It must not, however, be concluded that these are the only distinctive features of the Sadducees, although not many are mentioned by their opponents, the Pharisees. 4. HISTORY OF THE SADDUCEES.—1. Their Origin.—The oldest record pretending to describe the source of this sect (טֵרְצווֹן וּכָאָשׁ) is the commentary of Rabbi Nathan Ha-Babi (q. v.) on the tractate of the Mishna entitled *Abot* (*אַבּוֹת* = *The Moral Sayings of the Ancient Fathers*. In this commentary on the saying of Antigonus of Soho (B.C. 200–170)—"Be not like servants who serve their master without expecting to receive wages, but be like servants who serve their master with hope to receive wages, and the Lord be upon you" (Mishna, *Abot*, i, 3)—Rabbi Nathan remarks as follows: "Antigonus of Soho had two disciples who proclaimed his maxims; they taught it to their disciples, and their disciples, again, taught it to their disciples. Thereupon they began to examine it after them, and said: 'What did our fathers purport to teach by this maxim? Is the laborer to work all day, and not receive his wages in the evening? Surely, if our fathers had known that there is another world, and believed in a resurrection of the dead, they would not have spoken thus. They then separated themselves from each other and two parties arose between them—[the *Zadokites* [=Sadducees] and the Boethians. The *Zadokites* are called after Zadok, and the Boethians after Boethus. They used vessels of silver and vessels of gold all their days, not because they were proud, but because the Sadducees said that the Pharisees had a tradition that they are to afflicthemselves in this world, and yet they have nothing in the world to come" (*Abot* of Rabbi Nathan, cap. v.). That Zadok and Boethus were contemporaries of Antigonus of Soho, that they opposed the doctrines of the sages, and that the sages ordained laws to obviate the cavils of their opponents, is also declared by Saadia Gaon (q. v.). (A.D. 892–942). Thus IsaacIsraeli tells us: "Saadia says the contemporaries and the tribunal of Antigonus of Soho ordained it as a law that the beginning of the month is to be determined by the appearance of the new moon, to do away with the cavils of Zadok and Boethus, who disputed against the sages about the fixing of the new moon" (*Yad Seder* 119, 2d ed. By Beloff, 1849). Similar in import to Rabbi Nathan's statement on *Abot*, i, 3 is the remark of Maimonides (A.D. 1135–1204) on the same passage. "Antigonus," says this great authority, "had two disciples, one named Zadok and the other Boethus, who, when they heard this saying proclaimed this maxim, left him, saying one to the other, the Rabbi distinctly declares that there is neither a fut-
SADDUCEE

SADDUCEE

ure state of reward and punishment, nor any hope for man—because they misunderstood his maxim. Therefore they strengthened each other's hands, separated themselves from the congregation, and left the observance of the law, when one sect followed the one, and another sect followed the other, whom the sages respectively called the Zadokites and the Boethusians. (Concerned, on Aboth, i, 3). It must be added that the greatest Jewish authorities since the 9th century of the Christian era have regarded Zadok and Boethus as the heretical leaders who originated two sects. Modern critics, however, reject this current account of the origin of the Sadducees from Zadok and Boethus, dismissing the Antigoneus of Soho, as not historical, because: (a) it is not mentioned either in Josephus, the Mishna, or the Gemara; (b) the original account of Rabbi Nathan neither says that Zadok and Boethus themselves misunderstood Antigonus's maxim, nor that they were the chiefs of these sects, but that their disciples misrepresented the import of the maxim, and separated themselves from the congregation; and (c) it is illogical to suppose that the disciples of Zadok, who, according to Rabbi Nathan's account, did not misunderstand Antigonus, but simply continued to propound his master maxim, would call themselves, or be called, Zadokites = Sadducees, and not Antigonites, seeing that the maxim belonged to Zadok and Boethus, and not to Zadok. Third reasons, however, are of little value, since the present text of Rabbi Nathan's Abot obscure, and since Sadden, the Aruch, Maimonides, and all the ancient Jewish authorities who lived centuries ago, and who had better means of procuring correct codices, understood the passage to mean, and also derived it from independent sources, that Zadok and Boethus themselves misunderstood their master Antigonus, and that they were the originators of the sects. It is the first reason which, coupled with the fact that the oldest records are perfectly silent about Zadok and Boethus as disciples of Antigonus, goes far to show that the passage in the Abot of Rabbi Nathan, like many other pieces in the same work, is by a later hand; and that its author, who most probably flourished towards the end of the 7th century, though possessing the right information that the Zadokites and Boethusians were the followers of Zadok and Boethus, misstated the fact by making these two chiefs, who lived at different times, contemporaries, and by describing them as disciples of Antigonus. This mistake is all the more natural since the real and essential differences between the Sadducees and the Pharisees actually began to develop themselves in the time of Antigonus; and it is not at all improbable that, though the two sects shall presently present early sentiments and distinctive name from a much older leader named Zadok, a distinguished descendant of that leader, bearing the same name, may have lived in the time of Antigonus, and may have contributed greatly to the final separation of the Sadducees from the Pharisees.

2. Development of the Sect.—We have seen from their tenets and practices that the Sadducees were the ancient priestly aristocracy, and that they persisted in maintaining their conservative notions, as well as in retaining their pristine prerogatives, against the voice of the people. It is therefore natural, in tracing their origin, to look for a leader who, in the first place, separated himself from the congregation, as their strong conservative sentiments would, as a matter of course, make them centre around a representative and a name of their own caste celebrated in the records of the Sacred Scriptures. Such a chief, answering all the conditions required, we find, as Geiger has elaborately shown, in the Zadok, the tenth in descent from the high-priest Aaron, who declared for the succession of Solomon to the throne when Abiathar took the part of Adoni-Jah (1 Kings i, 32-45), and whose line of descendants, or "house" as it is termed in the Bible, henceforth retained a pre-eminence in the future history of the Jewish people. Thus when Hezekiah put a question to the priests and Levites generally, the answer was given by Azariah, "the chief-priest of the house of Zadok" (2 Chron. xxxi, 10); and Ezekiel, in his prophetic vision of the future temple, pre-eminently distinguishes the "sons of Zadok," and the "priests and the Levites of the household of Zadok," as the only individuals selected for the sacred service in the Lord's sanctuary when the children of Israel were restored (Ezek. xl, 46; xlii, 19; xlv, 15; xlvi, 11). When the Jews returned from the Babylonian captivity, this sacerdotal aristocracy, and especially the "priest of the seed of Zadok," the "sons of Zadok," or, which comes to the same thing, "the Zadokites," were Sadducees, undistinguishable from the ancient royal and priestly house, formed state, and to be the time-honored guardians both of sacred heritage and their holy religion. The high-priests were also the chief functionaries of state. Their maxim, however, that statecraft and ingenuity are to be employed in political transactions with foreign nations, as well as the conduct of the chief among this sacerdotal aristocracy based upon this maxim, threatened to destroy both the nationality and the religion of the Jews. Hellenism—which gradually found its way into Judea after its occupation by Alexander the Great—Grecian sports, and political alliances with the heathen, were avowedly by the high-priests of the land, and by the sect of the Zadokites (2 Macc. i, 11-15). The very high-priest, who hitherto was the centre of religion, did all he could to denationalize the people of his charge (2 Macc. iv, 1-19). The people, who saw their sanctuary ravished by the Syrians while their aristocracy were engaged in their ruinous statecraft, became embittered against both the foreigners abroad and the rulers at home. We cannot do better than continue the description of the Sadducees in the powerful words of Geiger: "It was then that a pliable priestly family made itself the hand and the mouthpiece of this discontent; it conquered and crushed the foreign sway, overthrew the government at home, and assumed the pre-eminence. But the aristocracy soon surrounded the new sun of the Maccabees, and the Zadokites, who themselves had hitherto been the sun, now became its satellites, as Sadducees. The party struggle increased with continued success to the Pharisees. The internal struggles, however, made the interference of the Romans easy, and paved the way for the keenly ambitious Herod to the throne. He was neither a priest nor a born Israelite; but, like all upstarts, he was anxious to ally himself with the ancient aristocracy. His connection with Mariamme supported a Maccabean family in the court itself, which, in opposition to the Zadokites, became the chief support of Herod, whom the people called the new Aaron, but which, nevertheless, owed its elevation to the sovereignty, and was allied to his house. These were the Boethusians. Their double character, being both upstarts and yet claiming to be ancient aristocracy, enhanced their arrogance." (Judaica Zeitschrift, ii, 54 sqq.). They are the Herodians, attached to the branch of the Sadducees—naturally called Herodians and Sadducees in the New Test. (comp. Matt. xvi, 6 with Mark viii, 13). Thus we are told that the Pharisees took counsel with the Herodians—i.e. with the Boethusian branch of the Sadducees—how they might destroy Jesus (Mark iii, 6), as these Herodians, from their alliance with the reigning dynasty, had
the temporal power for their aid. Again, in Mark xi.,
Y. xi, 15, it is stated that the chief priests, the scribes,
and the elders, sent unto Jesus certain of the Phari-
seees and of the Herodians to catch him in his words;
and after they had conjointly put to him the question about
the tribute-money (xii., 14—17), each of the representa-
tives of the two sects—i.e., of the Sadducees and the
Pharisees—tried to entrap him with questions in harmo-
ny with their own party. This is perfectly understandable.
Sadducean portion of the deputation, which are called in
ver, 13 Herodians and in ver. 19 Sadducees, came
forward first and asked him the question about the
seven brothers, which bore upon the Sadducean doc-
tine of the resurrection and the Levirate law (xii., 19—
20). Jesus came to answer their question. The Sadducees
i.e., of the Pharisaic portion of the deputation—who
was pleased with the manner in which Jesus put down the
caval of the Herodians, came forward and tried to en-
tangle our Saviour with a question from a Pharisaic
point of view (xii., 25—37). The reason why our Sau-
vior, who so frequently rebuked the extravagances of
some of the Pharisees, did not expose the doctrines of
the Sadducees is that at his advent their tenets had
been thoroughly refuted by their opponents the Phar-
i sees; and that although, through their alliance with
the court, they wielded the temporal arm (Acts v., 17),
they exercised no religious influence whatever upon the
masses of the Jewish people. Doubtless their tenets had
been all in all (Joseph. Ant. xiii, 10, 5). But even their
political influence soon ceased, for with the de-
struction of the Jewish state by the Romans the Saddu-
cees lost their temporal significance; and though their
doctrines continued to be held by a small fraction of
the dispersed Jews, yet they were deemed of so little
influence that Jehovah the Holy (168—183). In his re-
duction of the Mishnah, only rarely and sparingly takes
notice of the different opinions upon the various Jewish
events held by the Sadducees and the Boethusians.
It is for this reason that the Sadducees are also men-
tioned so little in the Talmud and the Midrashim, and
that their origin was forgotten in the 7th century, when
the above-quoted passage relating to their rise
was introduced into the Aboth of Rabbi Nathan.
3. Their Eventual Fate.—The fact of the rapid dis-
appearance of the Sadducees from history after the 1st
century, and the subsequent predominance among the
Jews of the views of the Pharisees, has led to the con-
temporary consideration. Two circumstances indirectly but power-
fully contributed to produce this result: 1st, the defeat of the
Jews after the capture of Jerusalem by Titus; and, 2d, the growth of the Christian religion. As to the
first point it is difficult to overestimate the consterna-
tion and dismay which the destruction of Jerusalem
occasioned in the minds of sincerely religious Jews.
Their holy city was in ruins; their holy and beautiful
Temple, the centre of their worship and their love, had
been ruthlessly burned to the ground, and not one stone of
it was left upon another; their magnificent hopes,
either of an ideal king who was to restore the empire of
David, or of an ideal city which was to be eternally
in the clouds of heaven, seemed to them for a while like empty dreams; and the whole visible world was,
to their imagination, black with desolation and despair.
In this their hour of darkness and anguish, they natu-
really turned to the consolations and hopes of a future
state; and the doctrine of the Sadducees that there
was no resurrection beyond the present life would have
appeared to them cold, heartless, and hateful. Again,
while they were sunk in the lowest depths of depres-
sion, a new religion which they despised as a heresy
and a superstition, of which one of their own nation
was the object, and another the unrivalled missionary
to the heathen world, gradually found its way among
the subjects of their detested conquerors, the Romans.
One of the causes of its success was undoubtedly the
widely believed that the resurrection of Jesus, and a con-
sequent resurrection of all mankind, which was accepted
by its heathen converts with a passionate earnestness,
of which those who at the present day are familiar from
infancy with the doctrine of the resurrection of the
dead can form only a faint idea. To attempt to check
the progress of this new religion among the Jews by an
appeal to the temporary rewards and punishments of the
Pentateuch would have been as idle as an endeavor
to check an explosive power by ordinary mechanical
restraints. Certainly, under these circumstances, many
circumstances combined to induce the Jews, who were not Pharisees, but who resisted the new heresy,
to rally round the standard of the oral law, and to as-
sert that their holy legislator, Moses, had transmitted
his faith to his faithful people by word of mouth, although
not in writing; that the institution of the resurrection
was one of the most important points in the law, and
punishments. A great belief was thus built up on a
great fiction; early teaching and custom supplied the
place of evidence; faith in an imaginary fact produced
results as striking as could have flowed from the fact
itself; and the doctrine of a Mosaic oral law, enshrin-
ing convictions and hopes deeply rooted in the human
heart, has triumphed for nearly eighteen centuries in
the ideas of the Jewish people. See RABBINISM.
4. Their Modern Representatives.—Many leading Jew-
ish writers (Pinsker, Geiger, Fürst, etc.) claim the Ka-
rates as lineal descendants of the Sadducees; and this
identity is quietly assumed by Ginsburg in the art.
In the Jewish Encyclopedia (Kittel's Cyclopedie, which we have already
considered). It is true the modern Karaites hold, in common with the Sadducees, the decided rejection of the
oral law. Less important coincidences are also
pointed out, such as their views of worldly policy, their
notions respecting the Levirate law, retaliation, inheri-
tance, defilement, the Sabbath, phylacteries, etc.; but
these particulars, if indeed not merely accidental, are
certainly not conclusive, in the absence of any link of
historical connection between the two sects. On
the other hand, the failure of agreement in the marked ten-
ent respecting the resurrection is a sufficient offset to
these other marks of identity. See KARAITES.
V. The literature is nearly the same as that for the
Pharisees (q. v.). The following monographs, however,
may be specified: Cellarius, De Caesarii cur Sadducienen Agens nevortis (Zitz. 1637); Reiske, De Sadducien
(Jen. 1666); Mieg, De Argumento Christ. adversus Saddu-
cceanos (Heidelberg. 1667); Willemer, De Sadducien (Viteb.
1680); Barheb, De Sadduci et de l'Hermeneutique des
Phariseens, Sadducien et Esseniens (Abbe. 1689); Salmen,
De Sadducien et Phariseen (by his Otto Theol. p. 654);
Buding, De Sadducium Ammon e Caepheus (Buding. 1719);
Cobius, Argumentum. conv. contra Sadducien (Viteb.
1727); Walthier, De Immortalitate Animarum a Saddu-
ceanos negata (Neubrand. 1776); Schultz, Conjectural
Hist. crit. de Sadducien (Hal. 1778); Schaffner, Oratio
apologia in Ecclesia Hebrea Sadducea (Jen. s. a.);
Harenberg, Nervus Demonstrantios a Christo in Saddu-
csoos suscepit (in Iken's Theasur. ii, 242); Gade, De
Sadducieorum in Gente Judaeica Autoritate (in the Mis-
cell. Lips. Nor. xii, 18; v, 440); Gildenauff, Josephi de Sadduci et de l'Hermeneutique des Phariseens
De Philosoaphia Sadduceorum (Lips. 1835—39, 4 vols.);
Hane, Die Pharsider u. Sadduceer als polit. Parteien
in Hilgenfeld's Zeitschrift, 1867). See PHILOSOPHY.
Sade, Jean Baptiste de, a French prelate, nephew of Richard, was born at Avignon in 1632.
After the death of his uncle he became bishop of Ca-
vaillon, and died Dec. 21, 1707. He left several religi-
ous works: De l'Amour et des Amours (Paris, 1687);
—Reléxions Christiennes sur les Phases Penitentiantes
Trouvées dans la Cassette d'Antoine I, Roy de Portugal
(1679).
Sade, Pons de, a French prelate. He was first
professor of the University of Avignon, and in 1445
made bishop of Vaison. He died at Vaison in 1469.
Sade, Richard de, a French ecclesiastic, was suc-
cessively chamberlain of pope Urban VIII, vice-govern-

IX.—0
or of Tivoli and Ravenna, and after 1600 bishop of Ca-
vaillon. He died at Rome, June 37, 1668.
Sadeel (prop. Chandieu.), Antoine, one of the
promoters of the Reformation, was born, 1534, at the
castle of Chabot, in the Maconnais. At the age of twenty
he was invited to preach to a congregation of the Re-
formation at Paris. Attacked by the priests, he was em-
ployed by the Protestants to draw up a vindication, which
impressed the next year, 1568, but was released by the
king of Navarre. He went to Orleans, where, in 1562, he
presided at a national synod. He then went to Berne,
and finally to Geneva, where, from 1569, he labored as
preacher and professor of Hebrew until his death, Feb.
28, 1591. He wrote against the Jesuits, Sophiaeae F.
Turriani, etc. (1573) — Index Repetitionum Turriani
(1563, 8vo) — De Legitima Vocatione Pastorum Eccle-
siae Reformatae (1563, 8vo) — Response a la Profession
de Foy (1593, 8vo) — Opera Theologica (1592, fol.).
Sadhyanas, in Hindū mythology, are demi-gods, all
of whom are descended from the first Menū.
Sadīj Jug, in Hindū mythology, is a period in
Hindū chronology which embraces four world-periods,
or twelve thousand divine years of three hundred and
sixty-seven years each.
Sadler, Francis D., D.D., provost of Trinity College,
Dublin, from 1807 until his death in 1851, was a lineal
descendant of Sir Ralph Sadler. His Sermons and
Lectures (Donnell Lectures) were published in Dublin
(1821-22, 2 vols. 8vo).
Sadler, Anthony, D.D., chaplain to Charles II,
died about 1680. His published works are, Inquisitio
Anglicana (Lond. 1654, 4to) — The Loyal Mourner
(1699, 4to) — The King's Restoratio:
a Masque (1660, 4to) — Strange News Indeed
(1664, 4to) — Schemi Suvrum, etc. (1683). Also single
Sermons. See Bliss's Wood, Athen. Oxon. iii., 1267.
Sadler, John, an English divine and author, who
died 1595, is known principally by his work, Sacred
Records of the History of Christ (Lond. 8vo).
Sadler, Michael Thomas, an English states-
man and philanthropist, was a native of Snelston,
Derbyshire, and was born in 1780. He was for some time
a merchant of Leeds, was member of Parliament for
Newark-upon-Trent, 1829-30, and in 1831 for Aldbor-
ough, Yorkshire. He was noted for his philanthropic
interest on behalf of the agricultural poor and children
in factories, and his opposition to Roman Catholic
establishment and parliamentary reform. He died in
1835. The following are some of his principal works:
Ireland: its Evils and Remedies (Lond. 1828, 8vo):—
Speech in the House of Commons on the Roman Catholic
Relief Bill, March 17, 1829; Second Speech, March 30,
1829 (Lond. 1829).
Sadoc, the Greek form of the name Zadok (q.v.)
in the Apocrypha and Neh. Test.
1. (Vulg. Sadoc, the Greek original being Logos). The
high-priest Zadok (2 Esdr. i. 1) ; one of Ezra's an-
estors (Ezra vii, 2).
2. (Sadoc, Vulg. Sadoc). The son (great-grandson)
of Azor and father of Achim (Matt. i, 14) in Christ's an-
estry. B.C. cir. 220. See Genealogy (of Christ).
Sadolet, Jacopo, a Roman cardinal and bishop,
noted for his learning, ability, purity, and liberality,
both of his own and of that of his relatives. As profes-
sor at Pisa, then at Ferrara, gave him an excellent education.
While yet a mere youth he heard lectures on Aristotle,
and was introduced to the riches of classical literature.
Philosophy and eloquence were his favorite studies;
and Aristotle and Cicero his masters. His first publi-
cation was Philosophiae Consolatorum in Adv汶ea (1092).
He also made a promising start in poetry, as his De Cajo Curioso and De Laocoony Sta-
tia testify. On leaving the university he went to
Rome, and soon won the esteem of all scholars and of
several eminent prelates. Cardinal Caraffa had him
made a canon of San Lorenzo, a place which he held
until 1517. Leo X, on his accession, chose Sadolet
and Peter Bembo as his secretaries. In this position
Sadolet rendered his Church faithful services and won
great reputation. In 1517, while on a pilgrimage to
Loreto, he was appointed bishop of Carpentras, near
Avignon. After vainly declining this honor, he ac-
cepted it, not only from the pope's persuasion, but
against his own judgment. In 1526, he took an active
part in the Council of Trent, and in 1528, he was
sent as papal legate to Rome, where he dwelt for
twenty years, and died an old man in 1548.
SAFFRON

Sadoletto, Paolo, an Italian prelate, nephew of the preceding, was born at Moderna, 1508. He studied literature and ancient languages at Ferrara, and was in 1537 appointed to the See of Con- tranter, and in 1541 governor of Venetia. In 1544 he succeeded his uncle as bishop, and went to Rome as secretary of pope Julius III. At the death of that pontiff, in 1555, he returned to his diocese, and twice again was charged with the governorship of Venetia, 1560, 1567. He died at Venice, Feb. 29, 1582, deploring the loss of his excellent qualities and erudition. His Letters and Later Poems were published by abbe Costauzi at the end of his uncle's Letters. See Tiraboschi, Storia della Letteratura Italiana, vii; Barjavel, Dict. Hist. du Vénitien.

Sadr. in Scandinavian mythology, is a surname of Odin, the principal deity.

Sawulf, supposed to have been a merchant of Gloucester, drowned in 1102, and is noticed by William of Malmesbury. He left in manuscript an account of his travels in the Holy Land, A.D. 1102-3, under the title, Relatio de Peregrinatione Sawulfi ad Hierosolymam et Terram Sanctam, etc. A French translation was published in Paris, 1889, under the title, Relation des voyages de Sawulf à Jérusalem et en Terre- Sainte, and an English translation is included in Thomas Wright's Early Travels in Palestine (Lond. 1848).

Saffron (सफ़रून, karkom, Sept. κόκκος) occurs only once in the O. T., viz. in Cant. iv. 14, where it is mentioned along with several fragrant and stimulating substances, such as spikenard, calamus, and cinnamon, trees of frankincense, myrrh, and aloes (αχάλις): we may therefore suppose that it was some substance possessed of similar properties. The name, however, is so similar to the Persian karkam (see Castelli, Lex. Hept. Col. 1808) and the Greek κόκκος that we have no difficulty in tracing the Hebrew karkôm to the modern crocus or saffron. It is also probable that all three names had the same origin, saffron having from the earliest times been cultivated in Asiatic countries, as it still is in Persia and Cashmere (comp. Theophr. Plant. vi. 6; Pliny, xxii. 17), and especially in ancient Cilicia (Strabo, xiv. 6, 71; Dioscor. i. 25). Crocus is mentioned by Hippocrates and Theophrastus. Dioscorides describes the different kinds of it, and Pliny states that the benches of the public theatres were strewed with saffron; indeed, "the ancients frequently made use of this flower in perfumes. Not only saloons, theatres, and places which were to be filled with a pleasant fragrance were strewed with this substance, but all sorts of vinous tinctures retaining the scent were made of it, and this costly perfume was poured into small fountains, which diffused the odor which was so highly esteemed. Even fruit and conifites placed before guests, and the ornaments of the rooms, were spread over with it. It was used for the same purposes as the modern potpourri" (Rosenmüller, Bibl. Bot. p. 138). In the present day a very high price is given in India for saffron imported from Cashmere: native dishes are often colored and flavored with it, and it is in high esteem as a stimulant medicine. The common name, saffron, is no doubt derived from the Arabic safrân, as are the corresponding terms in most of the languages of Europe. To this it may be added that it was a favorite pigment or dye. "Saffron-vested" (epikôrasenAg) is a Homeric epithet for aurora or morning, and the crocus was a robe of delicate texture and bright-yellow color, occasionally worn by actors and Roman ladies. Its beauty in the landscape is referred to by Homer (Iliad, xiv. 399), Virgil (Georg. iv. 182), and Milton (Par. Lost, iv. 790). Nothing, therefore, was more likely than that saffron should be associated with the foregoing fragrant substances in the passage of Canticus, as it still continues to be esteemed by Asiatic nations, and, as we have seen, to be cultivated by them. Hasselquist also (Trav. p. 36), in reference to this Biblical plant, describes the ground between Smyrna and Magnesia as in some places covered with saffron; and Rauwolf mentions gardens and fields of crocus in the neighborhood of Aleppo, and particularly describes a fragrant variety in Syria. Kitto (Phyl. Hist. of Palest. p. 321) says that the safflower (Carthamus tinctorius), a very different plant from the crocus, is cultivated in Syria for the sake of the flowers which are used in dyeing; but the karkôm, no doubt, denotes the Crocus sativus.

Saffron belongs to the flag or iris order (Iridaceae). The different members of the crocus family are great favorites: the purple and golden varieties (Crocus vernus, Willd., and C. aureus, Sm.), which, on English flower borders, are the first to follow the snowdrop, and often fill with a flush of coming spring the earliest days of March; and the lonely, fragile sort (C. nudiflorus, Sm.), which, with its own leaves still underground, comes up amid the drifting foliage of autumn, making a mournful effort to cheer the last days of October. These, and other species now naturalized in various localities, are regarded by some as only varieties of the C. sativus of
Linnæus, the true or saffron-yielding crocus—a plant of plentiful occurrence in Greece and Asia Minor. The name saffron, as usually applied, does not denote the whole plant, nor even the whole flower, of Crocus sativus, but only the stigma, or part of the style, which, being plucked out, are carefully dried. (Comp. Halla Encycl. i, § xx, 165 sq., and plates in Plenck, Icones Plantar. Med. i, plate 32.) These, when prepared, are dry, narrow, thread-like, and twisted together, of an orange-yellow color, having a peculiar aromatic and penetrating odor, with bitterish and sweetish taste, tingling the mouth and saliva of a yellow color. Sometimes the stigmas are prepared by being submitted to pressure, and thus made into what is called cake saffron, a form in which it is still imported from Persia into India. Hay saffron is obtained chiefly from France and Spain, though it is also sometimes prepared from the native crocus cultivated for this purpose. Saffron was formerly highly esteemed as a stimulant medicine, and still enjoys high repute in Eastern countries both as a medicine and as a condiment. See further, Beckmann, Geschichte der Erfind. ii, 79 sq.; Celsius, Hierbool. ii, 11 sq.; Bod. a Stapel. Comment. in Theophr. p. 388 sq.; and the index to the Index Medicus (Jen. 1670); Tristrum, Nat. Hist. of the Bible, p. 496.

Saga, in Scandinavian mythology, possibly identical with Laga, is a deity who at least shares the dwelling-place of Laga in the cooling waters of Sowakaska, and participates in the love of Odin, who pays her daily visits. Saga is one of the Asins, whose songs commemorate the deeds of the heroes. See Norse Mythology.

Sagan, or Sangaren, in Hindū mythology, was a famous king, belonging to the race of Children of the Sun, whose sixty thousand sons were turned to ashes by an angry glance of the white penitent Kabiler.

Sagaris, in Greek mythology, was a Trojan who accompanied Aeneas to Italy, where he was slain by Turnus.

Sagaris, in Phcenician mythology, was a dryad who induced Atys to violate his faith with Cybele, to punish which the latter cut down the tree of Sagaris, and thus caused her death.

Sagatrakawazen, in Hindū mythology, was a monstrous giant who sprang from the blood of Brahma when that god was decapitated by the angry Siva, and who was provided with five hundred heads and a thousand arms.

Sage, John, a bishop of the Episcopal Church of Scotland, was born (1452) in the parish of Creich, Fife. He was educated at the University of St. Andrews (M.A. 1572), and was ordained in 1584. He officiated at Glasgow until the Revolution in 1688, and was consecrated a bishop for Scotland, 1705. He died in 1711. The following are his principal works: The Fundamental Charter of Presbyterianity (Lond. 1695, 8vo); The Principles of the Cyclopic Age with regard to Episcopal Power, etc. (1695, 4to; 1717, 8vo); A Vindication of the same (1701, 4to). These, together with his Life, were re-published, in three octavo volumes, by the Spottiswoode Society (Edin. 1844-46). See Allibone, Dict. of Authors, s. v.; Darling, Cyclop. Bibliography, s. v.

Sagittarius, Caspar, historiographer of the duchy of Saxony, professor of history at the University of Jena, and, according to his biographer, J. A. Schmidt, one of the ablest, most erudite, and industrious men of his time, was born Sept. 29, 1649, in Leipzig. He was taught with care, and sent him, when fifteen, to the gymnasium at Liebke. At this early age he published an essay, De Ritusbus Veterum Romanaorum Nuptiibus, and began his annotations on Justin. Here also he wrote an erudite history of the Passion of Jesus. After three years at the gymnasium, he entered the University of Helmstädt, and heard lectures on the whole field of human knowledge—exegesis, church history, metaphysics, logic, ethics, politics, physics, history, geography, and anatomy—thus laying a foundation for the character of polyhistor which he subsequently bore. He also preached and travelled in various parts of Germany, and formed relations with many learned men. He published his work, De Calceis et Nudipedibus Veterum. At the age of twenty-five he became rector of the school at Saalfeld (1668), where he not only distinguished himself as an educator, but also continued his literary productivity. In 1671 he was called to a professorship at Jena. After writing various philological treatises and theological disputationes—one of them De Martyrum Cruciatibus in Primitiva Ecclesia—he succeeded (1674) to the chair of J. A. Böse as professor of history. The next year he published a very learned work on the history and customs of Thuringia. In 1676 he visited the libraries of Germany and Copenhagen; in 1678 he issued his Compendium libri quinque in Thesaurum, a description of the library of the university of Jena, and was commissioned by the prince of Anhalt to write a theological history; in the following years he appeared as a polemic, defending Lutheranism against the Jesuit Schönmann. Thereupon followed various works on Pictish, which he boldly defended, and for which he was bitterly assailed by the said orthodox party. Among the best of his works was a History of the Church, which is his Christlicher Neusprache an alle evangelische Theologen, die die Beförderung des thätigen Christentums sich angelegen seyn lassen (Jena, 1692). Among his later writings were his Historia Viti Georgii Spaldianii (Jena, 1698), and an Introduction in Historiam Ecclesiasticam, which he did not live to finish. He died May 3, 1694. For a complete list of the works of Sag Curtius, see Joam. Andre, Schmidt's Commentarius de Viti et Script. Caspari Sagittarii (Jena, 1718). See Herzog, Real-Encycl. XII, 301-304. (J. P. L.)

Sahgut, in Hindū mythology, is the second stage of blessedness in the paradise of Vishnu. See Hinduism.

Sahadutha. See JEGAR-SAHADUTHA.

Sahidic (or Thelhian) Version. See Egyptian Versions.

Sahuguet, Marc Rene, abbé d'Espagnac, was born at Drives, in 1758. Being destined for the Church, he received orders, and was soon appointed canon of Paris. He published principally to literary pursuits, and his earlier essays have received just praise. In 1782 he became advisory clerk of Parliament, and soon developed a great love of riches. The agent and friend of Calonne, he only engaged in those enterprises which would increase his wealth. Among his operations was a speculation in shares of the East India Company, which was so scandalous as to oblige the government to cancel the whole bargain. After the disgrace of Calonne, the abbé d'Espagnac was exiled, though he was still canon of Notre Dame. In 1789 he returned to Paris and associated himself with the so-called Club of 1789. At this time he was a friend of Danton, whose influence procured for him the office of purveyor to the army of the Alps. He was very soon denounced by Cambon and put under sentence of arrest for engaging in fraudulent business transactions, but succeeded in clearing himself. Having gained his liberty, he attacked himself to the army of Dumioures, and by various means procured an immense fortune. But at the revolt of Dumioures, Sahuguet was arrested, and tried as an accomplice in a conspiracy to corrupt the government. He was found guilty, and executed at Paris, April 5, 1794. Of his literary works there are a few remaining which show considerable ability. The most notable are Les Faux de Mme de Genlis, who was crowned by the French Academy in 1775, and Réflexions sur l'Abbe Suger et sur son Siécle (1780).—Hoefer, Nouv. Biog. Générale, s. v.
SAIL

Sail is the incorrect rendering in the passages Isa. xxxiii, 23: Ezek. xxvii, 7, of the Hebrew כָּלָה (kōla), ñēs, usually a standard or flag-staff, and in the passages in question a flag of a ship. In Acts xxvii, 17 it stands vaguely for סַפֶּר (sāfer), a vessel or implement of any kind, which then designates the tacking, or sailing-apparatus in general of a ship. See, also, Main-Sail.

Sailer, Johann Michael, a Roman Catholic bishop of Ratisbon, the originator of a tendency in German Catholicism lowing the example of the great Fenelon. His document did not fully satisfy Rome, and it was only after considerable negotiation that the king of Bavaria obtained papal consent to his ecclesiastical prelature. In 1821 he was made prebendary of Ratisbon, and in 1822 vicar-general and coadjutor of the aged bishop von Wolf; at the same time he was made bishop in parlia
dom of Germanicopolis. With great conscientiousness he now entered upon the weighty duties of this great diocese of Ratisbon. Everywhere he endeavored to look into matters with his own eyes, and to correct all abuses to the extent of his ability. He held regular meetings with all his clergy, and endeavored to improve the moral and educational condition of his people. Under the name what he had long been in reality, bishop of Ratisbon. Three years later he died at the age of eighty-one. A complete edition of his works was published by J. Widmer (Sulzb. 1808-40) in forty volumes. Among them the following deserve special mention: Briefe aus allen Klostern (1840); Geschichte der Religion: Moralphilosophie; Erziehung für Erzieh
er: Die Weisheit auf der Grenze; Pastoralkunde; and many sermons and addresses. Though lacking in profound speculative power, Sailer's writings have yet had a very wide and very stimulating influence. He has been compared to Herder, but he had far more respect than the latter for the philosophy of casuistical thought. He endeavored in all things to practice the maxim In necessaria unitas, in dubius libertas, in omnibus curitas. Of a school of theology as springing from Sailer, we cannot properly speak. He did not leave a school, but only a spiritual impulse. He was of decidedly irreligious tendency. Full of Christian spirit, his ideal was a mild orthodoxy, equally opposed to rationalism, on the one hand, and to a stiff, arid, Roman orthodoxy, on the other. Among the most eminent followers of Sailer was Melchor Diepenbrock (1738-1861), his companion at Ratisbon, and subsequently prince-bishop of Breslau and cardinal of the Catholic Church in the last half of the 19th Century; but especially Herzog, Real-Encyl. xlii, 305-313. (J. P. L.)

Sailly, Thomas, a Belgian theologian, was born at Brussels in 1558, where he died in 1628. At the age of seventeen, having been already ordained priest, he went to Rome to enter the Society of Jesus. When hardly out of his novitiate, he was sent by Gregory XIII on an embassy to the earl Ivan. On account of his health he was recalled, and became confessor to prince Alexander of Parma. In 1597 he was made superior of a military mission, and in 1606 he went to Rome as procurator-general of the Belgian provinces. In 1620 he took part as missionary in the campaign of Spinola. He was the author of works in Latin, Flemish, and French: Guider et Pratique Spirituelle du Soldat Chrétien (1586); Etat de Vérité, ou Histoire de l'Inquisition, Paris 1659; Missebiet, ed. 1657; Vocation à l'Église, ed. 1658; Introduction à la Contemplation Divine (1679). He also translated several religious treatises into his native language.

Saint, an epithet applied to (1) a person eminent for piety and virtue; (2) a consecrated or sanctified person. There are works in the H. S. C. intended to express the above, both of which are rendered in our translation by the single expression Saïnt. (I. 840, 841) denotes a mental quality; its most certain acceptance being pious, just, godly, etc. It is
term to the sacred writers, are very inconsistent; for though they say St. John, St. Peter, St. David, they never heard from St. Isidore, St. Hesychius, etc. The practice has even extended to naming churches after certain saints. See PATRON SAINTS.

Concerning the bodies of the saints which arose and came out of their graves after the resurrection of Christ (Matt. xxvii, 50), it is believed that they were persons who believed in him and waited for him in hope, as old Simon Peter did (Luke ii, 22), but who had died before his resurrection, and who were thus favored to be an example of the general resurrection, and to whom Christ alluded (John v, 25), "the hour is coming, and now is, when the dead shall hear the voice of the Son of God, and they that hear shall live;" and of whom Paul speaks, "for ye know that Christ riseth from the dead, and become the first-fruits of them that shall rise," because his resurrection was the signal for theirs. It appears that these persons must have been deceived during the then present generation; for they went into Jerusalem, and appeared unto many, who could not have recognised them had they been much longer dead. We may here observe that the term word saint or sainted (Ἄγιος) is used in the New Test. relative to persons deceased, it is to be understood of the spirits of the just (without any distinction of office or character) made perfect. See RESURRECTION.

Saint-Amour, Louis Gorin de, a French theol. was born at Paris, Oct. 27, 1619. He was educated at the University of Paris, and afterwards became its rector. He made proficiency in Latin and Greek. His profound learning and the vigor of his argumentative powers so made him conspicuous in the assemblies of the faculty. When the Jesuits obtained the condemnation of the five propositions of the book of Jansensius, Saint-Amour became one of the most powerful adherents of the decision. He was among the doctors who went to Rome to obtain its reversal, but was obliged to return without having succeeded. By his defence of Arnould he was excluded from the assemblies of the Sorbonne, and, being arrested by the order of the Council of State, he was in 1684 burned at the stake. He published a Journal de ce qu's est passé à Rome touchant les cinq Propositions depuis 1646 jusqu'en 1653 (1662), edited by Arnould and De Sacy from the notes of Saint-Amour and the abbé Salaine.

Saint John, Knights Hospitallers of (also called Knights of Rhodes, and Knights of Nauplia), a religious and military order, originated in the middle of the 11th century. Some citizens of Amalfi, while trading with Palestine, had (1048) founded two hospitals for the reception of pilgrims to Jerusalem—one for men, and the other for women. The hospital for men bore the name of St. John the Almoner, a native of Cyprus and a convert. The foundation of the female Hospital in 614, after it had been sacked by Chosroes II. The confraternity which did service in the hospital was under the direction of Gerard. They displayed such heroic charity when Jerusalem was captured by the Crusaders, July 15, 1099, that several knights—among them Raymond de Puy—joined them as hospitalers. The lordship of Montbriore, in Brabant, was bestowed upon them by Godfrey de Bouillon. When peace was restored to the city, Gerard and his associates pledged themselves to labor forever in the hospitals "as the servants of the poor and of Christ," the members of both sexes assuming as their habit the black and white garter, and the black and white line cross of eight points on the left breast. The order received the papal approbation from pope Paschal II, Feb. 15, 1113, under the appellation of "Brothers Hospitallers". "

spoken of pious Hebrews (Psa. iv, 3; xxx, 4; xxxi, 23; xxxvii, 28; i, 5; iii, 9; lxix, 2; xxvii, 10; cxvi, 10). On the other hand, שֹׁפַט, kedosh, and also the Greek word δικαιος, signifies pure, clean, in reference to physical purity and cleanliness; they were also used as a term to describe the moral purity, holy, hallowed, sacred—applied to persons consecrated to the service of God: the priests (Exod. xxviii, 41; xxix, 1; Lev. xxi, 6; 1 Sam. vii, 1; 1 Pet. ii, 5); the first-born (Exod. xiii, 2; Luke ii, 23; Rom. xi, 16); and the people of Israel (Exod. xix, 10; Is. xiii, 9); prophets, kings and apostles (Luke, vii, 75; Acts iii, 21; 2 Pet. i, 21; Eph. iii, 5); the pious Israelites, the saints (Deut. xxxii, 8; 1 Sam. viii, 3; xxxiv, 9; Lxxxvii, 7, 9; Zechar. vii, 5; Dan. vii, 18, 21, 25, 27; Matt. xxvii, 52); and the angels (Job v, 1; xv, 15; Dan. viii, 13; Matt. xxv, 31; 1 Thess. iii, 13). The latter Greek word is also used of those who are purified and sanctified by the Holy Spirit; and as this is assumed of all who profess the Christian name, Christians are called saints (Acts ix, 13, 14, 32, 41; xxvi, 10; Rom. i, 7; vii, 27). It may here be observed that the Hebrew word for a consecrated person is קדוש, kedosh, derived from קדש, הקדש, in its signification of separated, dedicated, because such women among idolaters were devoted to the service of the temples of their false deities, particularly those of Venus, and to the ancient priests of Bel, or Belus. Of such female devotees, instances are to be found in the present day attached to the Hindú temples. The later Jews have their saints as well as the Christian; the word they use is שֹׁפַט, kedosh. Their most celebrated saint is rabbi Judah Hak-kadosh (rabbî Judah the Holy). He lived about one hundred and twenty years after the destruction of the second Temple, and was the author of the Mishna (or text) of the Babylonian Talmud. They have also their devotee men חסידים, chasidim, who devote themselves to a religious life and to the study of their law, visit the dying poor, pray for the rich, and the dead, etc. Of such kind were the "devout persons" with whom Paul disputed (Acts xvii, 17). In the New Test. the word δικαιος, as above, is used throughout wherever our version has "saint," and with the same signification as in the Sept.—viz. separated, dedicated, sanctified by consecration—because the Christians were then especially devoted to the service, the study and devotion of the Jews and pagans, as the Jews had been before the "holy people" separated from the Gentiles. See HOLINESS.

After the Christian era, the martyrs were considered as dignified saints in the same rank as the apostles—i.e., saints by profession and office, as distinguished from the saints, or holy and pious by character and conduct, such as have been eminent for religion and virtue, but not canonized. After some time canonization was extended also to confessors—that is, persons who during the persecutions against the Christians had made a resolute avowal and defence of their faith, and had suffered torture, imprisonment, or confiscation in consequence, but not the actual martyrdom of the monastic and ecclesiastical register, called a διπτυχ. It was not till about the 9th century that solemn and formal canonization, with its particular ceremonies, began to be regularly practiced. At present, in the Church of Rome, the ceremony of beatification, or being pronounced blessed by the pope, must precede canonization, and cannot take place till fifty years after death. See CANONIZATION. The word is generally applied by us to the apostles and other holy persons mentioned in the Scripture, but the Romanists make its application much more extensive, as, according to them, all who are canonized are made saints of a high degree. Protesants, in applying this...
of St. John in Jerusalem." A magnificent church was erected to St. John the Baptist on the traditional site of his parents' abode. Gerard took the title of Guardian of the order, and built, for the accommodation of pilgrims, hospitals in the chief maritime towns of Western Europe; these afterwards became commanderies of the order. Gerard died in 1118, and was succeeded by Raymond du Puy, who to their former day of hospitality and attendance upon the sick added that of knights; in opposition to indulgences this was soon the principal object of the order. Raymond divided the order into knights, priests, and brother-servants; and there grew up, also, a numerous intermediate class of sergeants (old Fr. servientes, servingmen), who rendered valuable service in field and hospital, and were in course of time, assigned separate commanderies. The order, under its new organization, was called after St. John the Baptist; and Raymond exchanged the title of guardian for that of master. The title of grand-master was first assumed by Hugues de Revé, 1267. The constitutions, based on the Augustinian rule, were drawn up by Raymond, and approved by Pope Calixtus II, 1120. The great influx of members caused the order to be divided according to nationalities, or "languages"—those of Provence, Auvergne, France, Italy, Aragon, Germany, and England—to which were added the languages of Castile and Portugal. The order became famous by its delivering Aniciste from the Moslems, raising the siege of Jaffa, assisting powerfully in the fall of Tyre, driving the enemy from Cæle-Syria and Phoenicia, and contributing to the fall of Ascalon, 1153. Amaury, king of Jerusalem, bribed them, in 1168, to promise to violate a solemn treaty and engage in an expedition against Egypt. The order was nearly annihilated in 1187 by Saladin in the battle of Hattin. After the fall of Jerusalem, it was established at the castle of Margat (Markét), the female branch of the order retiring to Europe. The Kharemsians nearly exterminated the order in 1244 at the battle of Gaza. When the Saracens took Acre (1291), the hospitals removed to Limisso, in Cyprus, where originated their naval character, as their vessels conveyed pilgrims to the Holy Land. Having conquered Rhodes in 1309 (or 1310), they afterwards made it the principal seat of their order, and were hence called Knights of Rhodes. They sustained there two sieges, the first, in 1480, under the grand-master D'Aubusson, proving disastrous to the besiegers; under the Grand-Admiral, in 1522, ending (after a heroic defence of six months) in the defeat of the knights and evacuation of the island. After taking refuge successively in Candia, Messina, and the mainland of Italy, they were put in possession of the islands of Gozo and Malta and the city of Tripoli by emperor Charles V. They made Malta one of the strongest places in the world, and it gave its name to the order. They repelled attacks from the Turks in 1551 and 1565, and held the island until June, 1798, when it was taken by Bonaparte, the grand-master Hompesch having abdicated and been sent to Trieste. Since that event the order has existed only in name. It was for a time under the protection of Paul I of Russia, whose reported conversion to Romanism led to his being elected grand-master. The seat of the order was removed to Catania in 1811, to Ferrara in 1826, and to Rome in 1834. See HOSPITALIERS.

Saint-John, Pawlett, D.D., rector of Yelden, Beds, prebendary of Hereford, and chaplain in ordinary. He received the degree of M.A. in 1706, and D.D. in 1716, and died in 1732. "His sermons were written in a forcible yet simple style." Fourteen of them, on practical subjects, were published (Lond. 1757, 8vo). See Darling, Cyclop. Bibliog. s. v.

Saint-Phoebus, D.D., a pseudonym. The real author was the Rev. Samuel Clapham, A.M. His Sermons were of a highly popular and useful character, two volumes of which were published (Lond. 1812, 8vo).

Saint-Jure, Jean Baptiste de, an ascetic author, was born in 1596, at Metz. At the age of sixteen he joined the Jesuits, and was appointed porter in the monastery of the Jesuits at Amiens, Alençon, Orléans, and Paris. He was one of the Jesuits who went into England during the reign of Charles I.; but the condition of the country was so unsettled that he returned to his native land. He died at Paris, April 30, 1657. He wrote several works which were printed, even at the present day. We mention De la Connaissance et de l'Amour de Jésus-Christ (1634)—Méthode pour bien mourir (1640)—L'Homme Spirituel (1646)—L'idée d'un Parfait Chretien, ou la Vie de M. de Renty (1651)—L'Homme Religieux (1657).

Saint-Maur. See MAUR (St.), Congregation of.

Saint-Pard (Pierre Nicholas van Blotquaette), Abbé de, a Belgian ascetic writer, was born, Feb. 9, 1734, at Givet-Saint-Hilaire. He studied with the Jesuits at Dinant, Jurgenier in tor, Académie, 1695, to become in various colleges. At the time of the suppression of the society he was at Vennes, but went to Paris; and, learning of the interdict of Parliament, he changed his name to that of Saint-Pard, which he retained till his death, which occurred at Paris, Dec. 1, 1824. During the Revolution he remained in Paris, and, though obliged to conceal himself, he still exercised his religious functions. Under the Directory he became bolder, and was twice imprisoned for preaching in public. In 1801 he became honorary canon of Notre Dame, and had charge of the parish of St. Jacques de Haut-Pas, which he held during the remainder of his life. Of his writings we have Retraite de six jours (1774) and Retraite de six mois formée sur les Maximes de l'Évangile (1774)—Exercices de l'Amour du Père (1779). He abridged and re-edited Le Livre des Œufs (1759), and La Connaissance de Jésus-Christ (1772).

Saint-Pierre, Charles Irénée Castel, a French ecclesiastic, was born near Barfleur, Normandy, Feb. 18, 1658. He was educated by the Jesuits at Caen, and joined the priesthood. He went to Paris in 1686, and proceeding to Rome, in 1695, became chaplain of the bishop of Orleans in 1702, and received, through him, the abbey of Tiron. He attended the Congress of Utrecht with cardinal Polignac in 1712. In some of his writings (Discours sur la Polygynodie) he severely judged Louis XIV, and advocated a constitutional government. For his adherence to the Academy; but an association known as the Club de l'Entrefoul gave him opportunities to expound his humanistic schemes. It was closed seven years after (1751) by cardinal Fleury. He died April 29, 1743. Most of his writings are included in his Oeuvres de Politique et de Morale (Rotterdam, 1758-61, 18 vols.).

Saint-Simon, Claude (the younger), a French prelate, was born in 1655. In 1716 he became superior of the abbey of Jumièges. Being made bishop of Novon, he was afterwards (in 1733) transferred to Metz; he there founded a seminary which bears his name, and in which he died, Feb. 29, 1760.

Saint-Simon, Claude Henri, Count of, one of the most eminent so-called socialist or communist philosophers of modern times. He was born in Paris of an ancient family; April 17, 1760. Grown up in the midst of religious and social agitation, he entered the army and was made a captain at the age of seventeen. In 1779 he went to America, fought under Bouillé and Washington, was captured with the count de Grasse in 1782, and, at the conclusion of the war, returned to France. In 1783 he visited Holland and endeavored to induce the government to join with France in an expedition against the English in the East Indies. He then went to Spain with an eccentric project of uniting Madrid by a canal.
of the condition of the class the most numerous and poor. The means was, to each man a vocation according to his capacity, and to each capacity a reward according to its works. The result aimed at was a sort of democratic epicureanism. It was an outbirth of a one-sided brooding over the conflict between capital and labor, noble and peasant, priest and devotee. It sprang of fanciful enthusiasm for a vaguely comprehended society and system as a whole vanished into thin air. Dissensions arose. Rodrigues, Enfantin, Le Roux, Bazard, Comte, each interpreted the master for himself, and each went his own way. The last remnant of organized Saint-Simonism was dispersed by decree of a civil court in August, 1822. After this date most of the numbers returned to the ranks of ordinary life, and the system became simply a matter of social history. See Carov, Der Saint-Simonismus (Leipzig, 1881); Veit, Saint-Simon (ibid. 1884); Matter, in Stud. u. Krit. (1882); Herzog, Real-Encyklop. xiii. 317-320; Encycl. Brit. (8th ed.), vol. xix. (J. P. L.)

Sainthood. See Invocation of Saints.

Sainte-Aulaire, Martial Louis de Beau- poir, de, a French prelate, was born in 1720, and in 1759 he was called to the bishopric of Phalerum, and made deputy to the state assembly of 1789. He was adverse to all innovations, and strongly opposed to the requirements of the law in obliging ecclesiastics to take the civil oath. In 1791 he went to England and afterwards to Switzerland, where he died in 1798.

Sainte-Beuve, Jacques de, a French theologian, was born at Paris, April 26, 1618. He received his degree in 1638 at the Sorbonne, and became royal professor of theology in that institution, where his learning gained for him so wide a reputation that he was considered one of the most ready casuists of his time. His refusal to subscribe to the censures passed upon two propositions of Arnauld caused him to lose his professorship in 1665. He was also deprived of his authority as preacher; but as he afterwards showed more submission to the dictates of the Church by signing the new formula prescribed Feb. 15, 1655, by Alexander VII, he was chosen theologian of the French clergy. This position brought him to so obliged him to write a Théologie Morale for the assembly at Mantes. Sainte-Beuve lived in Paris in retirement, but was sought for consultation by all the dignitaries of his time. It was said that he not only ruled all of one city, but a whole kingdom. He died Dec. 15, 1677. His writings are, De Confessione (1685) ; De Extrema Unctione (1686) : Déclarations de Cas de Conscience (1686). These works were edited after his death by his brother Jérôme.

Sainte-Marthe, Claude de, a French ascetic author, was born at Paris, June 8, 1620. He entered the priesthood in early life, and lived for a time in solitude. After being for some years confessor at Courbeville, in the diocese of Sens, he entered the order of Port-Royal des Champs. Twice he was obliged to leave on account of persecution, and finally, in 1679, went to live at his chateau at Courbeville, where he died Oct. 11, 1690. His writings are, Défense des Religieux de Port-Royal et de leur Recueil (1666) : Textes a l'Épitre (1702) : Lettres de l'Épitre et de Morale (1709). He wrote part of the Morale Pratique des Jeunes, and was engaged in the translation of the New Testament by Mons. Besides these, he left many petty works, sermons, and letters.

Sainte-Vaillier, Jean Baptiste de Lacroix de,
SAINTS

a French prelate, was born at Grenoble, Nov. 14, 1638. He became chaplain to Louis XIV, and in 1684 was appointed vicar-general of Quebec by bishop Lalav. He arrived in Quebec, Aug. 30, 1685, returned to France in 1687; was consecrated bishop of Quebec, Jan. 25, 1688, and went back to Canada in August of the same year; founded the general hospital at Quebec, was captured by the English at sea while returning from a visit to France, July, 1704, and remained a prisoner until 1709. He died at Quebec, Dec. 6, 1727. He was the author of "Essai Présent de l'Eglise et de la Colonie Française dans la Nouvelle France" (1688).

SAINTS' RELICS. See RELICS.

SALTAS, in Greek mythology, is a surname of Minerva; under which she possessed a temple on the mountain Poutnus, near Lerna, in Argolis. This Salian worship was doubtless derived from Sais, in Egypt, where the goddess Neith was adored, the latter service being incorporated with that of Minerva by the Greeks.

SALTONS, in Prussian mythology, were persons who issued wounds on themselves, and spilled their blood in the sacred groves, in order to make atonement to the gods for the sins of other people's.

SALVAS, the general name given to those among the Hindús who worship Siva the Destroyer, one of the members of the Trimurti. The only form under which this deity is worshipped is that of the Linga, which they adore either in temples or in their houses, or on the side of a sacred stream. The worship of Siva seems to have been, from a remote period, rather that of the learned and speculative classes than that of the masses of the people. In a renowned work called the Sankara-dig-nitya, or the victory of Sankara over the world, composed by Anandagiri, one of the disciples of Sankara, several subdivisions of the Saivas are named—viz., the Sivas, properly so called, who wore the impression of the Linga on both arms; the Rudras, who had a trident stamped on the forehead; the Ugras, who had the drum of Siva on their arms; the Bhaktas, with an impression of the Linga on their forehead; the Jagannathas, who carried a figure of the Linga on their forehead; and the Parvathas, who imprinted the same symbol on the forehead, breast, navel, and arms. The present divisions of the Saivas, however, are the following: the Dandus and Dasmami-Dandins; the Yogins; the Jagannathas; the Paramahanshas; the Aghorins; the Urdhavahanas; the Akasamukhins and Nakhins; the Gudharas, the Bikharsas, Sothkaras, and Ukharsas; the Kalingins; the Brahmanikins; and the Nagas. Each division is characterized by some peculiarities of dress, self-torture, penances, etc. (see Wilson, "Religious Sects of the Hindús," Lond. 1862, i, 188 sq).

SALVO CIMIAC, in Lapp mythology, was a mountain deity worshipped under the symbols of peculiarly shaped stones or mountains.

SALICTKATTA, a term given by the North American Indians to the persons who enjoy the special favor of their patron spirits, and are through such aid enabled to discover things that are hidden, to foretell future events, to bewitch other persons, to perform extended journeys in the soul while absent from the body, etc.—in short, the most cunning impostors in the tribes. The Indian equivalent for this title is Apatemaknieh, i.e. see.

SARKAR, in Mohammedan writers, is one of the seven hells, which serves as the place in which Parsees are punished for being what they are.

SALCHI BHAVAS, a Hindú sect who worship Radha as the personification of the Sakti or Kshrtina.

They assume the female garb, and adopt not only the dress and ornaments, but the manners and occupations of women. The sect are held in little estimation, and are very few in number. They occasionally lead a mendicant life, but are rarely met with. It is said that the only place where they are to be found in any number is Jaypur. There are a few at Be-nares, and a few scattered throughout several parts of Bengal.

SALIRTH is the Parsee name for the heaven which encloses the heaven of the fixed stars, and which is immovable and inhabited by Ormuzd alone.

SAKIA, in Arabian mythology, is a Mohammedan name for the god of a primeval race of giants and demons who dwelt in Arabia Petraea, and who drew down rain to the earth.

SALUKTO, ABRAHAM BEN-SAMUEL, a learned Jewish writer, was born at Salamanca about A.D. 1450. He was a celebrated astronomer, mathematician, historian, and lexicographer, and his distinguished talents secured for him the professional chair of astronomy at Saragossa. When he had to quit Spain, in 1492, he repaired to Portugal, where king Emmanuel appointed him chronographer and astronomer royal. On the Jews fleeing from Portugal, he was permitted to retire to Tunis. It was here that he completed, in 1504, the famous chronicle entitled הילמה רעא (The Book of Genealogies), which comprises a chronological history of the Jews from the creation to A.M. 5290 = A.D. 1500. In this elaborate work Salukto gives an account of the oral law as transmitted from Moses through the elders, prophets, sages, etc.; the acts and monuments of the kings of Israel, as well as of the surrounding nations, in chronological order; the Babylonian colleges at Siva and Pumbadita; the events which occurred during the period of the second Temple; the different sects of that period—viz., the Parthianese, Sudducees, Essenes, and Nazarites; the princes of the captivity, and the rector of the colleges after the close of the Talmud; and the period down to the end of the 15th century. Salukto's work, which is an encyclopedia of rabbinical literature, was first published at Constantinople (1566); then, with many additions and glosses, at Cracow (1581), Amsterdam (1717), Koniigsberg (1857), and from a MS. in the Bodleian Library, with many corrections, additions, etc., by Filipowski (Lond. 1867). Salukto also wrote a Rabbinic Aramaic lexicon to the Chaldee paraphrases, the Midrashim, and Talmud, entitled הילמה רעא (i.e. Supplementes to the Book Aruch), of which an account is given by Geiger in "Ztschrift der D. M. G. xliii, 144 sq. (Leips. 1868," הילמה רעא (Sweet to the Soul), on the future state, the separation of spirit from body, etc. (Constantinople, 1516). See Furst, Bibl. Jud. iii, 200 sq; Rosell, Dizionario Storico (Germ. transl.), p. 334; Stein- schneider, Catalogo Librorum Hebr. in Bibl. Bodl. p. 706 sq; Kitto, Cyclop a. v.; Linton, Hist. of the Jews, p. 267; Finn, Sphrag, p. 452; Da Costa, Israel and the Gentiles, p. 284; Etheridge, Intro. to Hebr. Literat., pp. 451 sq; Gritz, Gesch. d. Judenth., ix, 18 sq, 419, 458, 474; Jost, Gesch. d. Juden in u. s. System, iii, 113. (B. P.)

SAKTAS, the worshipers of the Sakti (q. v.), the female principle, or the divine nature in action, which is personified under different forms, according as the worshippers incline towards the adoration of Vishnu or Siva—Saraswati being the Sakti, or wife, of Brahma; Lakshmi the Sakti, or wife, of Vishnu; and Devi or Durga the Sakti, or wife, of Siva. In the Saktas the work of destruction, his energy, or wife, becomes still more the type of all that is terrible. As a consequence, her worship is based on the assumption that she can be propitiated only by practices which involve the destruction of life, and in which she herself delights.
SAKTI 250 SALADIN

Such a worship leads to brutalism and licentiousness, and it became the worst of all forms which the various aberrations of the Hindu mind assumed. Appealing to the superstitions of the vulgar mind, it has its professors chiefly among the lowest classes. The works from which the tenets and rites of this religion are derived are known by the collective name of Tantra; but as in some of these works the ritual enjoined does not comprehend all the impure practices which are recommended in others, the sect became divided into two leading branches—the Dakshinacharins and Vamacharins, or the followers of the right-hand and left-hand ritual. The Dakshinacharins are the more respectable of the two, although they indulge in practices contrary to the Vamacharins. The Vamacharins are the ritual of the grosser impurities. Their object is, by reverencing Devi, who is one with Siva, to obtain supernatural powers in this life, and to be identified after death with Siva and his consort. The worship of Sakti requires the presence of a female as the living representative and type of the goddess, and is mostly celebrated in a mixed society—the men representing Bhairava (or Siva as the Terrific), and the women Bhairavi (or Sakti as the Terrific). The ceremony generally terminated with the most scandalous orgies among the votaries. The members of the sect are very numerous, especially among the Brahminical castes. All classes are, however, amenable and subject alike to the deities and the human religious beings of the Saktas are a semicircular line or lines on the forehead of red sanders or vermilion, or a red streak up the middle of the forehead, with a circular spot of red at the root of the nose. They use a rosary made of the seeds of the elarpus or of coral beads, but of no greater length than may be concealed in the hand. In worshipping they wear a piece of red silk round the loins and decorate themselves with garlands of crimson flowers. Two other sects are likewise mentioned as belonging to the Saktas, but it is doubtful whether they are still in existence. See Wilson, Sketch of Religious Sects of the Hindits, i, 240 sq.

Sakti, the active volition or omnipotent energy of any one of the members of the Hindu Trimurti. It may exist separately from the essence of Deity, and in such a case it is conceived to be invested with a species of personality, and to be capable of exerting an independent agency. When viewed as the cause of phenomena, or sensible appearances, it is called Maya. The Sakti is worshipped by many Hinduts, being personified as a naked female, to whom meat and wine are offered.

Sakti Sodhana, a religious ceremony in connection with the Sakti, or personified energy of Deity among the Hinduts. The object of worship in this case should be a dancing-girl, a harlot, a washerwoman, or barber's wife, a female of the Brahminical or Sudra tribe, a flower-girl, or a milkmaid. The ceremony is performed at midnight with a party of eight, nine, or eleven couples. Appropriate mantra are to be used, according to the description of the person selected for the Sakti, who is then to be worshipped according to the prescribed form. She is placed disrobed, but richly ornamented, on the left of a circle described for the purpose, with various mantras and gestures, and is to be rendered pure by the repetition of different formulas. Being freshly sprinkled over with wine, the act being sanctified by the peculiar mantra, the Sakti is now purified; but if not previously initiated, she is further to be made an adept by the communication of the radical mantra whispered thrice in her ear, when the object of the ceremony is complete.

Sakuntala, one of the most pleasing female characters of Hindu mythology. She is mentioned as a water-nymph in the Yajurveda, is the subject of a beautiful episode of the Mahabharata, and is spoken of in the Puranas. Her name has become specially familiar in Europe through the celebrated drama of Kalidasa, which, introduced to us by Sir William Jones in 1789, became the starting-point of Sanscrit philology in Europe.

Sakyanuni, or SANT SAKTY, a name of Buddha (q.v.), the founder of the Buddhist religion.

Sala (Sala), the Greek form (Luke iii, 35) of the name of the patriarch SALAH (q.v.), the father of Eber (Gen. x, 24).

Salaam. See SALUTATION.

Salacia, in Roman mythology, was goddess of the salt waters, the wife of Neptune, and mother of Triton.

Saladin, the name given by Western writers to Salih ed-Din Yacub, the Sultan of Egypt, Syria, and the founder of the Ayyubite dynasty in those countries. As the great Moslem hero of the third crusade, and the beau-ideal of Moslem chivalry, he is one of the most interesting characters presented to us by the history of that period. He belonged to the Turkish tribe of Barad, and was born at Tekrit (a town on the Tigris, of which his father, Ayyub, was intendant or governor, under the Seljuks) in 1137. Following the example of his father and uncle, he entered the service of Nourreddin (q.v.), prince of Syria, and accompanied his uncle in his various expeditions to Egypt in command of Nourreddin's army. Saladin was at this time much admired for his chivalrous and generous spirit, and it was not till at the head of a small detachment of the Syrian army, he was beleaguered in Alexandria by the combined Christians of Palestine and the Egyptians, that he gave indications of possessing the qualities requisite for a great captain. On the death of his uncle, Shtrikh, Saladin became grand-vizier of the Fatimite caliph, and received the title of El-melek el-masr, 'the Victorious Prince.' But the Christians of Syria and Palestine, alarmed at the elevation of a Syrian emir to supreme power in Egypt, made a combined and vigorous attack on the new vizier. Saladin foiled them at Damietta, and transferred the contest to Palestine, taking several fortresses, and defeating his assailants near Gaza; but about the same time his new-born power was exposed to a still more formidable danger from his master, Nourreddin, whose jealousy of the talents and ambition of his able young lieutenant required all the skill and wariness at Saladin's command to avert. On Nourreddin's death, in 1174, Saladin became pasha, and governed with his hands. In his establishing himself as the Sultan of Egypt and Syria, a title which was confirmed to him by the caliph of Bagdad. The next ten years were occupied in petty wars with the Christians, and in the arrangement and consolidation of his now extensive dominion. The presence of Christians of a rich pilgrimage came on its way to Mecca, an infringement of the treaty with Saladin, brought down upon them the latter's vengeance. Their army suffered a dreadful defeat at Tibersias (July 4, 1187). The king of Jerusalem, the two grand-masters, and many other warriors of high rank were taken captive. Jerusalem was stormed (Oct. 2), and almost every fortified place in Palestine was taken. The news of this great success of the infidels being brought to Western Europe, aroused the enthusiasm of the Christians to its highest pitch, and a powerful army of crusaders, headed by the kings of France and England, speedily made their appearance on the scene of strife. The army was divided into three corps, the greatest, under Hugues de Lusignan, at the head of that portion of the crusading army which adhered to him, continued the war with success, twice defeated Saladin, took Cesarea and Jaffa, and finally obtained a treaty for three years (Aug. 1192), by which the coast from Jaffa to Tyre was yielded to the Christians. In the following year, the Sultan died at Damascus of a disease under which he had long suffered. Saladin was not a mere soldier; his wise administration left behind it traces which endured for centuries, and the citadel of Cairo and sundry canals, dikes, and roads are existing evidences of his careful attention to
the wants of his subjects. In him the warrior instinct of the Kird was united to a high intelligence; and even his opponents frankly attribute to him the noblest qualities of medieval chivalry, invincible courage, inviolable fidelity to treaty, greatness of soul, piety, justice, and moderation.

Salagrama, in Hindû mythology, was a stone into which Vishnu was transformed by the curse of a virtuous woman after he had violated her chastity in the guise of her husband.

Sâlah (Ibn, Sheikhul, نبيل, something sent forth, as a jëren or a sprout; Sept. and New Test. Σαλὰ, but Σαλά in 1 Chron. i, 54; A. V., "Sheelah" in 1 Chron. i, 16, 24), the only named son of the patriarch Arphaxad, and the father of Joktan (Gen. x, 24). In 1 Chron. i, 16, 24, B.C. cir. 2748. See Sâla. "The name is significant of extension, the cognate verb (نبيل) being applied to the spreading-out of the roots and branches of trees (Jer. xviii, 8; Ezek. xvii, 6). It thus seems to imply the historical fact of the gradual extension of a branch of the Semitic race from its original seat in Northern Assyria towards the river Euphrates. A place with a similar name in Northern Mesopotamia is noticed by Strabo (xv. 2, 10) and by Ptolemy (Geogr. ii, 16, 10)." In Memphite theophany he is known as His Holy Family and St. John in the Desert, and at Paris an Adoration of the Magi, besides many others scattered throughout Europe.

Salamanter, a kind of imaginary beings belonging rather to the physico-philosophical systems of the Cabalists than to the mythology of any particular people. They were supposed to inhabit fire as their proper element, and their skin was of a black color, of a glossy black, lizards-like reptiles of the species which are dotted with black, yellow, or red spots are likewise able to resist the destructive power of fire.

Salaminius, in Greek mythology, is a surname of Jupiter, derived from Salamin, in Cyprus, where a temple was erected to him by Teucer.

Salamis, in Greek mythology, was a daughter of the river-god Asopos, whose name was transferred to the island of Salamis, and who became by Neptune the mother of Cycnus.

Salamis (Σαλαμίς, perhaps from ἄλος, salt, as being on the sea), a city at the east end of the island of Cyprus, and the first place visited by Paul and Barnabas on the first missionary journey after leaving the mainland at Seleucia. See Paul. Two reasons why they took this course obviously suggest themselves, viz., the fact that Cyprus (and probably Salamis) was the native place of Barnabas, and the geographical proximity of this end of the island to Antioch. But a further reason is indicated by a circumstance in the narrative (Acts xiii, 5). Here alone, among all the Greek cities visited by Paul, we read expressly of "sangagogues" in the plural. Hence we conclude that there were many Jews in Cyprus in harmony with what we read elsewhere. To say nothing of possible mercantile relations in very early times (see Chittim), Jewish residents in the island are mentioned during the period when the Seleucidae reigned at Antioch (1 Macc. xv, 28). In the reign of Augustus, the Cyprian copper-mines were formed to Herod the Great (Josephus, Ant. xvi, i, 20, 4, 5), and this would probably attract many Hebrew families: to which we may add evidence to the same effect from Philo (Legat. ad Caes.) at the very time of Paul's journey. Again, at a later period, in the reign of Trajan, we are informed of dreadful tumults here, caused by a vast multitude of Jews, in the course of which "the whole populous city of Salamis became a desert" (Milman, Hist. of the Jews, iii, 111, 112). Hadrian, afterwards emperor, came to the aid of the Cypriots. He overcame the Jews, and expelled them from the island, forbidding any of that nation to approach its coasts; and so strictly was this carried out that if a Jew were ever cast by shipwreck on the island, he was put to death. We may well believe that from the Jews of Salamis came some of those early Cypriot Christians who are so prominently mentioned in the account of the first spreading of the Gospel beyond Palestine (Acts xi, 19, 20) even before the first missionary expedition. Moson (xvi, 16) might be one of them. Nor ought Mark to be forgotten here. He was at Salamis with Paul and his own kinsman Barnabas; and again he was there with the same kinsman after the misunderstanding with Paul and the separation (xv, 39). See Mark.

Salamis was not far from the modern Famagusta. Legend ascribed its origin to the Æacid Teucer. After various fortunes in the connections of the Greek states, it finally fell under the power of the Ptolemies. It was situated on a bight of the coast, a little to the north of a river called the Pedias, on low ground, which is, in fact, a continuation of the plain (anciently called Salaminia) running up into the interior towards the place where Nicias, the presiding capital of Cyprus, stands. We must notice in regard to Salamis that its harbor is spoken of by Greek writers as very good; and that one of the ancient tables lays down a road between this city and Paphos (q. v.), the next place which Paul and Barnabas visited on their journey. Salamis again has rather an eminent position in subsequent Christian history. Constantine or his successor rebuilt it and called it Constantinopolis, and, while it had this name, Epiphanius was one of its bishops. In the reign of Heraclius the new town was destroyed by the Saracens. See Cyprus.

Very little of the ancient city is now standing; but on the outside of the city recent travellers have seen the remains of a building two hundred feet in length, and six or eight feet high; also a stone church and portions of an aqueduct by which water was brought to the city from a distance of thirty miles. Of the travellers who have visited and described Salamis we must particularly mention Ptolemaeus (Descrip. of the Eist., i, 214) and Benvenuto (De ben. n. A. Salamis, p. 118-125). These travellers notice, in the neighborhood of Salamis, a village named St. Sergius, which is doubtless a reminiscence of Sergius Paulus, and a large Byzantine church bearing the name of St. Barnabas, and associated with a legend concerning the discovery of his relics. The legend will be found in Cedrenus (i, 618, ed. Bonn). See Barnabas; Sergius Paulus. See Smith, Dict. of Class. Geo., ii, 876 sq.; Conybeare and Howson, Life and Epistles of
Salary (Lat. salarium, salt-money, salt being part of the pay of the Roman soldier), an annual or periodic payment for services. Nothing like the provisions of the Levitical law, for the maintenance of the clergy, was known in the primitive Church. The duty, however, of the Church to maintain her religious teachers is implied in the New Test. "The workman is worthy of his meat," says Christ (Matt. x, 10), to which the apostle appeals, "Even so hath the Lord ordained that they which preach the Gospel should live of the Gospel" (1 Cor. ix, 14). In the apostolic age the maintenance of the clergy consisted merely in the supply of their personal wants (2 Cor. xi, 7, 8; Phil. iv, 16-18). There were probably in early times no fixed stipends for the ministers because the Church did not possess property; and when at length specific provision was made for the support of the clergy, it was not by any ordinance of the Church, but by the law of the State. Fees paid to the clergy for services rendered were called spota, sportelos, and sportula; probably in allusion to the bringing of the first-fruits in a basket, sportulae. They were not the same as the jura stolae, surplus fees (q. v.), which were unknown in the primitive Church. It was an established rule that no fees should be received for religious services. The first departure from it began with the celebration of religious ordinances in a private manner, in which the individual, at whose request this private celebration was performed, was required to pay something as an equivalent for the public and voluntary oblations that would otherwise have been made. So far as the clergy of the primitive Church can be said to have had any salary, it was paid, either according to their necessities or according to some general rule, from the treasury of the Church, which was supplied chiefly from voluntary contributions. Various rules were, from time to time, given for the distribution of funds. One required that they should be divided into three equal parts, one of which was to be paid to the bishops, another to the clergy, and the third was to be expended in making repairs, etc.

In the 4th century the Church and clergy came into the possession of real property. By a law of Constantine in the year 321, the clergy were permitted to receive donations and bequests. Liberal grants were also made by Constantine and by Gratian, Theodosius the Great, and other emperors. By other means also the revenues of the Church were enriched: 1. On the demobilisation of heathen temples by Theodosius the Great and his sons, the proceeds were applied to the benefit of the clergy, or appropriated to religious uses. 2. On the same principle, the property belonging to heretics was secularised. 3. The property of such clergy as died without heirs, and of all who relinquished their duties without sufficient cause, became the property of the Church. 4. The Church was made heir-at-law of all martyrs and confessors who died without near relations. 5. By tithes and first-fruits, which, however, were not established until the 4th or 5th century, Charlemagne first required the payment of tithes by statute law, and enforced the duty by severe penalties. His successors confirmed and completed the system of tithes by law which was subsequently introduced into England and Sweden. In the Eastern Church the support of religion was never legally enforced, but was urged as a religious duty, and tithes were paid as a voluntary offering. See Coleman, Christ. Antiquities, p. 149 sq.

Salaadath (אַלָאָדָת, לַאָדָת), asked of God; Sept. ἀλλαθία, more correctly, "Salaatil," in the A. V. in Ezra iii, 2; Neh. xii, 1; Hag. i, 12, 14, ii, 2). It is customary to distinguish two of this name, from the apparent difference of parentage in Matt. i, 12 and Luke iii, 27, but probably they were one, and the manner of keeping the Jewish records will readily suggest methods of reconciling the passages (comp. Strong, Harmony and Expos. of the Gospels, p. 10). See Genealogy of Christ. Salaathiel was the son of Jeconiah, perhaps grandson of Ner (Luke iii, 27), and father of Zerubbabel (1 Chron. iii, 17; Ezra iii, 2; Neh. xii, 2; Hag. i, 12, 14, ii, 2; Matt. i, 12; Luke iii, 27). See Shealtiel.

Salaath (Heb. Salkah, סַלָּךְ, from an Arabic root, signifying migration; Sept. Σαλάχα, v. r. Ἀλάχα, Σαλάχα, Ἀλάχα, etc.; A. V. "Salachah," in Deut. iii, 10 [Targum Pseudo-Jon. gives it סולכיה, i.e. Seleucia; though which Seleucia they can have supposed was here intended it is difficult to imagine], a city named in the early records of Israel as the extreme limit of Bashan (Deut. iii, 10; Josh. xiii, 11). This city appears to have been one of the old capitals of Og's kingdom (Josh. xii, 5). A statement in 1 Chron. v, 11 seems to show that Salachah was upon the eastern confines of both Manasseh and Gad, although it was really beyond the bounds of Palestine as occupied by the Hebrews. On another occasion the name seems to denote a district rather than a town (Josh. xii, 5). In later Jewish histories Salkah is never mentioned, the more probable supposition is that the city soon fell into the hands of the original inhabitants. By Eusebius and Jerome it is merely mentioned, apparently without their having had any real knowledge of it.

Salchah is, doubtless, identical with the present town of Salkhad, which stands at the southern extremity of the Jebel Haurran, twenty miles south of Kun wat (the ancient Kenath), which was the southern outpost of the Leja, the Argoth of the Bible. Salkhad is named by both the Christian and Mohammedan historians of the Middle Ages (Will of Tyre, XVI, 8, "Salchah!" Abulfeda [Toh. Syr. p. 106; also in Schefer-Levy, Intro Cat. p. 1]. Salkhad was visited by Burekharat (Syn. Nov. 22, 1810), Seetzen, and others, and more recently by Porter, who describes it at some length (Five Years in Damascus, ii, 176-216). Its identification with Salchah...

meet Abraham, adds weight to the statement that the
meeting took place after Abraham had returned—not
during his return, and is thus so far a favor of Salem
being Jerusalem. See Melchisedek.
3. Professor Ewald (Geschichte, i, 410, note) pronounces
that Salem is a town on the further side of Jordan, on
the road from Damascus to Sodom, quoting at the same
time John iii, 25; but there seems to be no authority for
this pecular existence of the name in that
direction either in former or recent times.
4. A tradition given by Eupolemus, a writer known
only through fragments preserved in the Pneumato
Evangelica of Eusebius (ix, 17), differs in some im-
portant points from the Biblical account. According
to this place in the diocesi du Juda of the city
Argezian, which is interpreted by Eupolemus to mean
"the Mountain of the Most High." "Argezian" (Pliny
uses nearly the same form—Argarius, H. N. v, 14) is, of
course, har-Gerizzim, Mount Gerizim. The source of
the tradition is, therefore, probably Samaritan, since the
encounter of Abraham and Melchizedek is one of the
events to which the Samaritans lay claim for Mount
Gerizim. But it may also proceed from the identifica-
tion of Salem with Shechem, which, lying at the foot
of Gerizim, would easily be confounded with the moun-
tain itself. See Salem.
5. A Salem is mentioned in Jud. iv, 4 among the
places which were divided and fortified by the Jews on
the approach of Holophernes. "The valley of Salem," as
it appears in the A. V. (τόν αὐλανα Σαλήμ), is pos-
sibly, as Reland has ingeniously suggested (Palest., p.
517), a corruption of τον αὐλανα της Σαλήμ—"into the
plain to Salem." If Αλεπος here, according to fre-
quent usage, the Jordan valley, then the Salem referred
to must surely be that mentioned by Jerome and al-
ready noticed. But in this passage it may be with
equal probability the broad plain of the Muknha which
stretches from Ebal and Gerizim, on the one hand, to
the hills on which Salim stands, on the other, which is
said to be still called "the plain of Salem" (Porter,
Handbook, p. 340 a.), and through which runs the cen-
tral north road of the country. Or, as is perhaps still
more likely, it refers to another Salem near Zerit (Jez-
reel), and to the plain which runs up between those
two places as far as Jenth, and which lay directly in
the route of the Assyrian army. There is nothing to
show that the Assyrians reached as far into the interi-
or of the country as the plain of the Muknha. The
other places enumerated in the verse seem, as far as they
can be recognised, to be points which guarded the main
approaches to the interior (one of the chief of which
was by Jezreel and Engannim), not towns in the interi-
or of, like Shechem or the Salem near it. See Ju-
oth, Book iv.
6. (Sept. iv lipqip; Vulg. in pace), Psa. Ixxvi, 2.
It seems to be agreed on all hands that Salem is here em-
ployed for Jerusalem, but whether as a mere abbrevia-
tion to suit some exigency of the poetry and point the
allusion to the place (shalah) which the city enjoyed
through the protection of God, or whether, after a well-
known habit of poets, it is an antique name preferred
to the more modern and familiar one, is a question not
yet decided. The latter is the opinion of the Jewish
commentators, but it is grounded on their belief that
the Salem of Melchizedek was the city which after-
wards was named Jerusalem. (See above.) See a remark-
able passage in Geiger's Urschicht, p. 74-75. The
autthet in ver. 1 between "Judah" and "Israel" might
seem to some to imply that some sacred place in the
northern kingdom is here contrasted with Zion, the
sanctuary of the south. If there were in the Bible any
sanction to the identification of Salem with Shechem
(Cf. above) the passage might perhaps be referred to
the continued relation of God to the kingdom of Is-
rael. But the parallelism is rather one of agreement
than contrast. Hence, Zion the sanctuary being named
in the one member of the verse, it is tolerably certain
that Salem, in the other, must denote the same city.
See Jerusalem.
Salem, in Arabic mythology, is the god of health
worshipped by a race of giants who are said to have in-
habited the regions beyond the Euphrates.
Sales, Francis de. See Francis of Sales.
Salesians, an order of recluse nuns, otherwise
known as Visitas. Its founder was Saint Francis of Sales
(q. v.), who conceived the idea of providing an
asylum for widows and other females in distress, and of
devoting them to the service of the sick and to a religi-
ous life. A vision encouraged him to carry forward
his purpose, and the active co-operation of a noble
widow (the Countess de Chantal), enabled him to
succeed. The order of the Friars of Mary, or Sales-
ians, was the result. The first house for their use
was secured in 1610, at Annecy, and the second in 1616,
at Lyons. Their rules (given by St. Francis) were mild
and intended rather to promote spiritual dispositions
and works of mercy than to encourage outward asceti-
cism. The sisters were required to take only the simple
vows; strict retirement was imposed only during the
period of the novitiate; their apparel was not required
to be different from that of ordinary females, except
that it should be of black color and modest appearance.
In 1618 pope Paul V. raised the congregation into an
order under the rule of St. Au-
gustine, and conferred on it all the privileges accorded
to other religious orders, making its special mission the
training of female children. The convents were placed
under the supervision of the diocesan bishops by the
will of their founder. Their number increased rapidly,
the first being established at Paris, in 1619; thirteen be-
tween the year of St. Francis died in 1622, and eighty-seven during the
life of mother du Chantal (died 1641). The order grad-
ually spread also over Italy, Germany, Poland, Austria,
Switzerland, Syria, and North America. It is now one
of the most important in the Roman Catholic Church,
having one hundred convents with at least three thou-
sand inmates.

The members of the order are classed as choristers,
associates, and house companions, the first of which
classes performs the duties of the choir, while the last
takes charge of the domestic administration of the
house. The modern rule is not especially strict, but
contains a few rules being observed. The habit of the
order is black, with a black band crossing the forehead,
and a small white breast-cloth pendant from the neck,
der under which a silver cross is suspended from a black
band.

Salganeus, in Greek mythology, is an appellative
of Apollo, derived from the Boeotian town of the
same name.

Salian, Jacques, a learned French Jesuit, was
born at Avignon in 1557. He was admitted in 1578
into the Institute of St. Ignatius, where he taught
theology, and also in the province of Lyons. He
was rector of the College of Besancon, and while on
a visit to Paris died of apoplexy, Jan. 28, 1640. His
classical work is entitled Annales Ecclesiae V. T.
(1619).

Salian. See Salesians.

Salier, Jacques, a French theologian, was born
at Saulieu in the year 1615. He belonged to the
order of the Minimes. After having taught theol-
y, he became provincial, and finally assistant of
the general of his order. He died at Dijon, Aug. 20,
1707. He wrote, De Eucharistia (1687): — Co-
cophalus (1694): — Pensees sur le Paradis et sur l'Ame
Rassnable, in which there is very little about para-
dis.

Salig, Christian August, a German theologian
of great learning and mystical tendency, was born near
Magdeburg, April 6, 1692. His father, a pastor,
instructed him in Latin, Greek, and Hebrew. In 1707 he
began to study at Halle, and heard lectures from A. H. Franke, P. Anton, Christian Wolf, and others, also taking frequent part in public discussions and disputations in philosophy, particularly on the religious side and Romanism. From the 1710 to 1712 he studied at Jena, under J. F. Buddeus, J. A. Dunz, and others, and took his master's degree. In 1714 he delivered lectures, philosophical, theological, and historical, at Halle. The same year he published Philosophicorum Veteranarum et Recentiorum de Animae et ejus Immortalitate, at Halle, a work which drew to him the attention of Thomassian. In 1717 he became corector of the school at Wolfenbüttel, and entered upon his duties with a dissertation, De Neez Corruptionus ac Instauratae Ecclesiae ac Scholarum. Here the excellent library furnished him welcome means of productive study. In 1729 he issued his work De Exegeticismo anse Exegeism, in which he treated also of the history of Nestorianism. For this work he was fiercely accused of Nestorianism himself. The second centenary of the Augsburg Confession occasioned the preparation of Salii's master-work, a complete history of the Augsburg Confession and Apology (Halle, 1730). In 1738 he issued an additional work on the history of Protestantism outside of Lutheranism. In 1735 he published an account of the inner growth and strife of Lutheranism, which was bitterly assailed because of its frank presentation of men and things as they actually were. As a continuation of his labors in the same field, he undertook the history of the Temple of Truth, but did not live to finish it. He died at Wolfenbüttel in 1755. He wrote, also, Nodus Profectionis Solutae. See Ballenstedt, De Ulyt et Obitu C. A. Salitij (Helmst, 1738); Herzog, Real-Enzyk., xiii, 325-325. (J. P. L.)

Salii were priests of Mars Gravisius, and are said to have been instituted by Numia. They were twelve in number, chosen from the patricians, and had charge of the sacred image (aneculis). They carried the body of the god to the Temple of Mars on the Palatine Hill. The distinguishing dress of the salii was an embroidered tunic bound with a brazen belt, the trabea, and the apex, also worn by the flamines. Each had a sword by his side, and in his right hand a spear or staff. The festival of Mars was celebrated by the salii on the 1st of March, and for several successive days, on which occasion they were accustomed to go through the city in their official dress, carrying the aneculis, singing and dancing. The members of the college were elected by co-optation. Tullius Hostilius established another college of salii, which was also twelve in number, chosen from the patricians, and appear to have been dedicated to the service of Quirinus. They were called the Salii Collini, Agonales, or Agoneses.

Salīm (Σαλίμ, n. r. Σαλλίμ; Vulg., Salim), a place named (John iii, 23) to denote the situation of Ἕβον, the scene of John's last baptisms—Salim being the well-known town or spot, and Ἕβον a place of fountains, or other water, near 11. Christ was in Judea (ver. 22), and the whole scope of the passage certainly conveys the impression that John was near him, and consequently Salim was either in Judea or close to its borders. The only direct testimony we possess is that of Eusebius and Jerome, who both affirm unhesitatingly (Onom., “Salim”) that it existed in their day near the Jordan, eight miles from Jerusalem. But many have held (under “Salam” that its name was then Salaminia. Elsewhere (Ep. ad Evangelum, § 7, 8) he states that it was identical with the Salam of Melchizedek. A tradition is mentioned by Roland (Palatinum, p. 978) that Salam was the native place of Simon Zelotes. This in itself seems to imply that its position was, at the date of the tradition, believed to be nearer to Galilee than to Judea. Various attempts have been more recently made to determine the locality of this interesting spot, but the question can hardly yet be regarded as definitely settled.

1. Some (as Alford, Greek Test. ad loc.) propose Shilhām and Ain, in the arid country far to the south of Judea, entire out of the circuit of John or our Lord. Others identify it with the Shalim of 1 Sam. ix, 4; but this latter place is itself unknown, and the name in Hebrew contains ש, to correspond with which the name in John should be שִּׁלְחָן or שְׁלָחָן.

2. Dr. Robinson (Bibl. Researches, iii, 333) suggests the modern village of Salīm, three miles east of Nablus; but this is no less out of the circle of John's ministrations, and is too near the Samaritans; and although there is somewhat to believe that the village contains two sources of living water (ibid., p. 394); the water is hardly sufficient for the abundance of deep water implied in the narrative. A writer in the Colonial Ch. Chron. No. cxvii, 464, who concurs in this opinion of Dr. Robinson, was told of a village an hour east (?) of Salīm "named Ain-im, with a copious stream of water." Lieut. Couder says (Test Work in Palestine, i, 92) that Wady Farah, in the locality in question, contains a succession of little but perennial springs, from which the water rushes out in a fine stream over a stony bed, and that the village of Ain-im lies five miles north of the stream.

3. Dr. Barclay (City of the Great King, p. 564) is filled with an "assured conviction" that Salim is to be found in Wady Farah, which he found in the valley of Ain Farah (ibid., p. 559), among the deep and intricate ravines some five miles north-east of Jerusalem. This certainly has the name in its favor and, if the glowing description and pictorial wood-cut of Dr. Barclay may be trusted, has water enough (διαρρέουσα ροφή) and of sufficient depth for the purpose. But the proximity to Jerusalem is a decided objection. See Σαλίμ.

4. There is said to be a village called Salīm in the plain of Mohna, east of Nablus, which is probably the Shameb of Gen. xxxiii, 18 (Porter, Handbook, p. 340; Robinson, Bibl. Researches, ii, 279); but it is too far north to suit the Gospel narrative; and, besides, it cannot be said of it "there is much water there." See Σαλίμ.

5. The name of Salim has been lately discovered by Van de Velde (Syr. and Pol., ii, 384) in a position exactly in accordance with the notice of Eusebius, viz. six English miles south of Beisan and two miles west of the Jordan. On the northern base of Tell Redghah is a site of the name of Musulman sanctuary, and also that no ruins of any extent are to be found on the spot; but with regard to the first objection, even Dr. Robinson does not say that his locality is there, and that the locality is in the closest agreement with the notice of Eusebius. As to the second, it is only necessary to point to Kefr-Saba, where a town (Antipatris), which so late as the time of the destruction of Jerusalem was of great size and extensive fortifications, has absolutely disappeared. The care of the Baptist has been examined in a former part of this work, and it has been shown with great probability that his progress was from south to north, and that the scene of his last baptisms was not far distant from the spot indicated by Eusebius, and now recovered by Van de Velde. See John. Jordan. Salim fulfils also the conditions implied in the number of the text, and the direct statement of the text that the place contained abundance of water. "The brook of Wady Chusneh runs close to it, a splendid fountain gushes out beside the Wely, and rivulets wind about in all directions. . . . Of few places in Palestine could it be more truly said, 'he was in water' (John xii, 28)"; but Drake, however, avers that "inquiries of the Arabs and fellahin of the district resulted in not a man of them even having heard of either of these places," i. e. Bir Salim and Sheik Salim (Quar. Report of the Pol. Explor. Fund, Jan. 1875, p. 82). See Salim.
SALIMENI 256 SALMASIUS

Salimbeni, Arcangelo, an Italian painter, was born at Sienna, and flourished from the year 1557 to 1579. He was a pupil of Sozzi, and enriched his native town with a great number of pictures. His best are a Holy Family and a Martyrdom of St. Peter.

Salimbeni, Simonido, son of the following, was born in 1597, and died in 1643. In one of the churches in Sienna are four frescoes by this artist.

Salimbeni, Ventura, called the Cavaliere Bisciaquoa, son of Arcangelo, was born at Sienna in 1565. He studied with his father, and at last went to Rome, where he executed many of his best frescoes. The number of these is very large, and in the church of St. Catharine at Sienna are some of the finest. At Florence may be seen his Apparition of St. Michael, and in Vienna a Holy Family. He died in 1613.

Salisbury, John. See John of Salisbury.

Salisbury, Nathaniel, a Methodist minister, was born in Vermont in 1794, and converted in Scipio, Tompkins County, N. Y., at the age of twenty-five years. He was admitted into the Geneseo Conference on trial in 1822, ordained deacon in 1824, and elder in 1826. He was employed on circuits eleven years, on stations seventeen years, and on districts, as presiding elder, fifteen years; and was on the superannuated list eleven years. He was in 1892 a member of the General Conference from the Oneida Conference. He was a man of fine preaching abilities, a safe counsellor, and was greatly beloved by the people. He died in Rome, N. Y., Feb. 18, 1876. See Minutes of Conferences, 1876, p. 63.

Salus, in Greek mythology, was one of the companions of Eneas, who secured a prize, consisting of the skin of a lion, in the races.

Salkeid, John, who flourished from 1575 to 1659, was educated partly at Oxford, and, after being for many years a Jesuit in Spain and Portugal, was converted by the eloquence of James I, and by him made vicar of Wellington, Somersetshire. From 1635 to 1645 he was minister of the church at Taunton, Devonshire, from which he was ejected in the civil wars. He published, A Treatise of Angels (Loud. 1613, 8vo) — Therese of Paradise, of the Serpent, Cherubim, etc. (1617, 12mo). See Allibone, Dict. of Authors, s. v.

Sal'la (Heb. סַלַּל), perhaps lifted up, from סַלַּל, sedil; or basket-maker; Sept. Σαλα, Σαλατ, v. r. סַלַּל, the name of two Hebrews. 1. One of the leaders of the sons of Benjamin, who settled at Jerusalem with 928 tribemen on the return from captivity (Neh. xi. 8), B.C. cir. 459. 2. One of the chiefs of the priests who returned to Jerusalem with Zerubbabel (Neh. xii. 20), B.C. cir. 459. He is elsewhere (Neh. xii. 7) called Sallith (q. v.).

Sal'i, the name of two Hebrews, differently spelled in the original. 1. (Heb. סָלִל, Sallu [םָלִל in Neh. xi. 7], weighed; Sept. סִלּוֹ, v. r. סַלּוֹ, סַלּוֹ לֹא). A Benjaminite, son of Meshubam, dwelling in Jerusalem after the return from exile (Neh. xi. 7; 1 Chron. ix. 7), B.C. cir. 459.

2. (Heb. סָלִלע, Sallu, weighed; Sept. סַלּוֹ לֹא v. r. סַלּוֹ לֹא). Another name (Neh. xii. 7) for Sallai (Neh. xii. 20), No. 2 (q. v.).

Sal'mus (סַלְמַשׁ v. r. סַלְמַנְשׁ), a Grecized form of פַּלְמַשׁ), of the name Shallem (q. v.) of the Heb. ( Ezra x, 24).

Sal'ma (Heb. סָלִמָה, Salma; a garment; Sept. סַלְמָנָה, סַלְמָנָה, כַּלָּמָנָה), the name of two men. 1. An ancestor of David and Christ (1 Chron. ii. 11); elsewhere Salmon (q. v.). 2. The second-named of three sons of Caleb the son of Hur, called the ‘father’ (i.e. founder) of Bethlehem and of the Netophathites (1 Chron. ii. 51, 54), B.C. ante 1500. Lord Hervey ('Genealogy of Our Lord, ch. iv. ix) confounds this person with the preceding (see Kell, ad loc).

Salmíacas, in Greek mythology, was the nymph of a fountain of the same name in Caria. She loved Hermaphroditus, the son of Mercury and Venus, who was possessed of extraordinary beauty; but he avoided her and despised her prayers. She therefore seized him in her embraces at a time when he was bathing in her fountain, and placed the gods to join her who, apparently, in case he should not listen to her pleas. The prayer was heard, and Hermaphroditus, previously a man, thereafter united both the sexes in his person.

Salmanasar (Ulg. Salmanuwar, for the Gr. text is lost), a less correct form (2 Esdr. xii. 40), of the name of the Assyrian king Shalmaneser (q. v.).

Salmanticardi (sc. theologii), a collection of theological 'Summae' emanating from the college of Discaled Carmelites at Salamanca, and highly esteemed in the Roman Catholic Church. The work, in arrangement and execution, is wholly in the style of Thomas Aquinas, and its teaching is emphatic in defending the views of the Angelical Doctor to the utmost, particularly with reference to the doctrine of grace. Its author directed a comment on his work especially of the Summa of Molina [see Molina, Luis], which was then a subject of controversy. In this course they were supported by the whole weight of the University of Salamanca, which not only clung to the Thomist doctrines in their utmost strictness, but whose faculty bound itself with a unanimous oath to present only the doctrines of Augustine and those in their public lectures containing the philosophical system of Aquinas had previously been issued by the Barefooted Carmelites of the College of Alcalá, under the title Compendiis Artium Curus, which served as a preliminary to the Salmantican theology. The authors of the above works are not definitely known, though Antonius, in Bolland, Higgan, mentions a Carmelite father Antonius as the principal author of both—a statement which is disproved by the preface to the Theology. The first volume of the Salmantican theologians appeared in 1651, and nine volumes are now known to exist (Pfaff, 'Introduct. in Hist. Theol. Literar. p. 205, mentions ten), the last of which contains the tract De Incarnatione.

A smaller work on moral theology, Currus Theol. Moralis (Venet. 1728, complete in 6 vols.), was published by the same order and school, whose authors were, without exception, Probabilites. See Pneum. Theol. Bibl. The books in the series have been given the title above, and the work has been highly commended by Roman Catholic theologians in the department of morals, e.g. by Gury.

Salmarius, Claudius (Claude de Saumaise), one of the greatest French scholars of the 17th century, was born at Sézimur-en-Auxois, in Burgundy, April 15, 1568. His father, a jurist, gave him the first elements of his classical knowledge, his mother, a Calvinist, impressed upon him her practical religion. At the age of ten he wrote Latin and Greek. At sixteen he went to the University of Paris, and was greatly stimulated by intercourse with those great classical scholars, Joseph Scaliger and Isaac Casaubon. To his Greek and Latin he now added Hebrew, Arabic, and Coptic, which he learned without a teacher. In 1606 he resorted to the University of Heidelberg to study jurisprudence under Gothaerus, but he found the most attraction in the rich library, and especially in its rare manuscripts. He now gave up jurisprudence as a specialty, and devoted himself, universal education. At the age of twenty-five he brought out his highly annotated edition of Florus, a work which gave him a name among the scholars of the age. In 1611 he printed at Paris his Scriptores Historiae Augustae. In 1623 he married, and lived for some years near Paris, working upon his essays on Pliny and Solinus. They appeared in Paris in 1629 in two
SALMEGGIA | 257 | SALMONE

philos volumes, under the title Pliniusae Dissertationes in Caude Julii Solini Polychistorum, and obtained for their author wide fame and calls to many foreign universities. In 1632 he accepted an honorary professorship at Leyden, with a comfortable pension, devoting himself to erudite labor, and declining many tempting invitations to return to France. Even the offer by Richelieu of six times as great a salary if he would come to Paris and become the great statesman's biographer was respectfully declined, with the remark that he could not consent to devote his pen to the work of flattery. His work on the primacy of the pope (1645) involved him in trouble with the Roman clergy; but the consequences of his Defensio Regia pro Karlolo Primo (Leyden, 1649), which he had written at the request of the banished king Charles II, were much more serious, for it not only called forth the able and passionate rejoinder of Milton, Defensio pro Populo Anglicano (1650), but it brought upon its author the disapproval of his republican patrons in Holland. Wounded at this, Salmansius hastily accepted an invitation of Christina of Sweden to enter her service; but, his expectations not being met, he returned to Holland in 1651. But his health was now completely broken. Salmansius became a Protestant at Heidelberg while still a youth, and held fast to his faith at no little self-sacrifice throughout life. He died at spa Sept. 6, 1655, and was buried at Maestricht. Among his writings which bear upon religion, we may mention De Episcopia et Presbyteria: —De Casuqie Virorum et Multorum Comus: —Super Hereditas Infanticida: —De Transubstantiatione: —De Cruce et Hyssopo. See Papillon, Bibliotheque des Auteurs de Bourgogne; Paquot, Memoires; Herzig, Real-Encyklo. xiii. 328-331. (J. P. L.)

Salmeggia, Enca, an Italian painter, was born at Bergamo. He was a pupil of Campi at Cremona, afterwards coming to Rome, and for fourteen years gave himself to the study of the works of Raphael. His works show the effect of this study. Many of his pictures are at Bergamo, but the best may be seen in Milan, as St. Victor, Christ in the Garden, and others. He died in 1626.

Salmeron, Alfonso, one of the original six who associated themselves with Loyola in founding the Society of Jesus. He was born at Toledo in 1515. Having learned the ancient languages at Alcali, he repaired to the University of Paris to study philosophy and theology. There he became attached to Loyola, and was soon one of his most zealous and efficient disciples. Subsequently he visited Italy, and promoted the cause of the new order to benthuse the public labors of every kind. His talent for controversy was of a high order. The pope rewarded his zeal by conferring on him the title of Apostolic Nuncio of Ireland. He was charged by the popes Paul III, Julius III, and Pius IV with the function of papal theologian and orator at the Council of Trent. In co-operation with Lainez, he prepared a statement of the so-called erroneous teachings of the Reformers, accompanying each one with citations from the fathers, popes, and councils which refuted and condemned them. After the Council of Trent he returned to Italy, and retired into the college which he had founded at Naples. There, as president of the provincial section of his order in Naples, he closed his days, in 1588, combating all forms of heresy, and preparing his extensive commentary on the Bible. His works were published, in sixteen volumes folio, at Madrid, Mantua, Brixen, and Cologne (1597-1612). Some of the titles of the separate volumes are, Prolegomenon in Universum Scripturum: —De Incarnazione Verbi: —De Sermonae Domini in Monte: —De Christi Miracula: —De Passione et Morte Domini: —De Resurrectione et Ascensione Domini. See Herzog, Real-Encykol. xiii. 331. (J. P. L.)

Salmon, the name of a man and of a hill.

2. (Heb. Šalmon, שָלָהָמ, shady.) A place named (Pea. lxviii, 14) as a battle-field, apparently during the Israelites' conquest of Canaan; probably the Mount Zalmon (q. v.) elsewhere (Judg. ix, 48) referred to.

Salmon, Nathaniel, an English clergyman and physician, son of the Rev. Thomas Salmon, was educated at Cambridge. He entered holy orders, but after a while abandoned the clerical profession for that of medicine, in the practice of which, and in the study of antiquities, he passed the remainder of his life. He died April 2, 1742. His principal works were, Lives of the English Bishops (Lond. 1733, 8vo): —History of Hertfordshire (ibid. 1728); and others on history and antiquities.

Salmon (Selemon, of unknown etymology), a promontory in Crete, apparently forming the north-east point of the island, mentioned thus in the narrative of Paul's voyage and shipwreck: "When we had scarce come over against Cnidus, the wind not suffering us, we sailed under Cret, over against Salmon" (Acts xxvii, 7). Capt. Smith (of Jordanhill) has shown the naturalness and accuracy of this notice in his own peculiar way. The direct course of the ship, he states, from Myra to Italy, after reaching Cnidus, lay by the north side of Crete; but the wind at the time did not suffer that, blowing, as he shows, from a point somewhat to the west of north-west—a wind very prevalent in the Archipelago in later summer. Then he says, "With north-west winds the ship could work up from
SALOMEUS

Myra to Cnidus; because, until she reached that point, she had the advantage of a weather shore, under the lee of which she would have smooth water and a westly current; but it would be slowly and with difficulty. At Cnidus that advantage ceased; and unless she had put into that harbor and waited for a fair wind, her only course was to run under the lee of Crete, catà Σαλομώνιον, in the direction of Salome, which is the eastern extremity of that island" (Paul's Voyage and Shipping). They passed the searchers, as the evangelist says, with some difficulty; and the modern writer mentions the case of a squadron (a portion of the British fleet from Abdkir) which tried to take the same course, but had the wind too westery to admit of their doing so (see Lewin, St. Paul, ii, 191). See SHIPWRECK (of St. Paul).

The classical name for the headland is Salomion, Salomion, ou Salomion (Σαλωμόν), Σαλωμών (Σαλωμών), Σαλωμών, Ptolem. iii, 15, § 5; Strabo, ii, 106; x, 474, 475, 478, 489; comp. Pomp. Mela, ii, 7, § 12; Pliny, iv, 20, § 21). The name Point Salomon is now usually applied to the end of Cape Sidero, the easternmost extreme of Crete. In Cretan, i, 472, presses (Greek searches in Crete [Long. 1855]) it thinks it is rather a southern extension of that headland called Cape Plaka. See CRETE.

Salomeus, in Greek mythology, was a son of Zeus and Enarete, and brother of Sisyphus. He was king in Elis (where he built Salome), and husband, first of Alcide, the mother of gyro, and afterwards of Sidero. His vanity that he demanded to be recognised and worshipped as Jupiter, and that, to deceive the populace, he attempted to imitate the lightnings of Jove by causing flaming torches to be thrown about him, and the thunders of the god by driving his thunder, bridges of brass with heavy war-carts, or by dragging his thunderbolt with a string behind his chariot. He was even charged with having murdered people, that he might pretend that they had fallen beneath his thunderbolts. Jupiter at length became wearied of his madness, and smote him with his bolt, besides destroying the entire city of Salome.

Salome, Σαλώμη, a Greek form in the Apocrypha, (q) incorrectly (1 Macc. ii, 26), for SALU (q.v.), the father of Zimi (Numb. xxxv, 14); (b) less correctly (Bar. i, 7), for salary (q.v.), the father of Hilkiah (1 Chron. vi, 13).

SALOME, from the Heb. סלome, i. e. peace, the name of several women mentioned or alluded to in the N. T. and by Josephus.

1. Called also Alexander, the wife of Aristobulus I., king of the Jews, on whose death (B.C. 106) she released her brothers, who had been thrown by him into prison, and advanced the eldest of them (Alexander Janneus) to the throne (Josephus, Ant. xiii, 12, 1; War, i, 4, 1). By some she has been identified with Alexander, the wife of Alexander Janneus. See ALEXANDRA.

2. A daughter of Antipater by his wife Cypros, and sister of Stilbas, one of the Seven Wise of women. She first married Joseph, whom she accused of familiarity with Mariamme, wife of Herod, and thus procured his death (B.C. 34). She afterwards married Costobarus; but, being disgusted with him, she put him away—a license till then unheard of among the Jews, whose law (says Josephus) allows men to put away their wives, but does not allow women equal liberty (B.C. 26). After this she accused him of treason against Herod, who put him to death. She caused much division and trouble in Herod's family by her calumnies and mischievous informations; and she may be considered as the chief author of the death of the princes Alexander and Aristobulus. See ALEXANDER, Aristobulus. She afterwards conceived a violent passion for an Arabian prince, called Salomeus, whom she would have married against her brother Herod's con-

sent; and even after she was married to Alexas, her in-
cubation for Salomeus was notorious. Salome survived Herod, who left her, by will, the cities of Samnia, Azoth, and Phasaës, with fifty thousand pieces of money. She favored Antipas against Archelaus, and died A.D. 9, a little after Archelaus had been banished to Vienne, in Dauphiny. Salome had five children by Alexas—Bere-
nice, Antipater, Callesus, and a son and a daughter whose names are not mentioned (Josephus, Ant. xv, 4; xvii, 9). See HEROD.

3. A daughter of Herod the Great by Elisip. In addi-
tion to what her father bequeathed to her, Augustus gave her a considerable dowry, and married her to one of the sons of Pheroras, Herod's brother (Josephus, Ant. xvii, 1; War, i, 28, etc.). See HEROD.

4. The wife of Zebedee, as appears from comparing Matt. xxvii, 56 with Mark xv, 40. It is further the opinion of many modern critics that she was that sister of Mary, the mother of Jesus, to whom reference is made in John xix, 25. The words admit, however, of another and hitherto generally received explanation, according to which they refer to the "Mary the wife of Cleophas," sister of Martha (Mark xvi, 11). In behalf of the former view, it may be urged that it gets rid of the difficulty arising out of two sisters having the same name; that it harmonizes John's narrative with those of Matthew and Mark; that this circuitous manner of describing his own mother is in character with his style, and that in describing her he does not consider the absence of any connecting link between the second and third designations may be accounted for on the ground that the four are arranged in two distinct couples; and, lastly, that the Peshito, the Persian, and the Ethiopic versions mark the distinction between the second and third by interpolating a conjunction. On the other hand, it may be urged that the difficulty arising out of the name may be disposed of by assuming a double marriage on the part of the father; that there is no necessity to harmonize John with Matthew and Mark, for that the time and the place in which the groups are noticed differ materially; that the language addressed to John—"Behold thy mother!"—favors the idea of the absence rather than of the presence of his natural mother; and that the varying traditions current in the early Church as to Salome's parents, worthless as they are in themselves, yet bear a negative testimony against the idea of her being related to the mother of Jesus. (According to one account, she was the daughter of Joseph by a former marriage [Epiphan. Hist. lxxvii, 8]; according to another, the wife of Joseph [Nepich. H. E. ii, 3].) Altogether, we can hardly regard the point as settled, though the weight of modern criticism is decid-
ently in favor of the former view (see Wieseler, in Stud. u. Krit. [1840] p. 695). The only events recorded of Salome are that she preferred a request, on behalf of her two sons, for seats of honor in the kingdom of heaven (Matt. xx, 20); that she attended at the cruci-
fixion of Jesus (Mark xv, 40); and that she visited his sepulchre (Mark xvi, 1) (A.D. 26–29). She is men-
tioned by name only on the two latter occasions. See ZEBEDEE.

5. The daughter of Herodias by her first husband, Herod Philip (Josephus, Ant. xviii, 8, 5). She is the "daughter of Herodias" noticed in Matt. xiv, 6 as dancing before Herod Antipas, and as procuring, at her mother's instigation, the death of John the Baptist. See HERODIAS. She was married, in the first place, to Philip, the tetrarch of Trachonitis, her paternal uncle, who died childless; and, secondly, to her cousin Aristobulus, son of Herod, the king of Chalcis, by whom she had three sons. The legendary account of her death (Nepich. H. E. i, 20) is a clumsy invention to the effect that Salome accomplished her mother Herodias, and her father's interest in her, in Herod the Great's lifetime. Her Excellency was banished from Dauphiny; and that, the emperor having obliged them to go into Spain, as she passed over a river that was frozen, the ice broke under her feet, and she sank in up
to her neck, when, the ice uniting again, she remained thus suspended by it, and suffered the same punishment she had made John the Baptist undergo. See HEBOD.

Salomon, Gotthold, a German rabbi, was born at Sandemelen, in the duchy of Anhalt-Dessau, Nov. 1, 1784. Up to his sixteenth year he was educated in Talmudic lore and literature, according to the custom of that time. After this he acquired the rudiments of the German language, especially through the efforts of the chaplain Bobe, who not only allowed him to come to his school, but also gave him private lessons. He then went to Dessau, to attend the lectures at the Jewish college, employing, however, all his spare time in acquiring himself with German literature. In 1802 he became tutor of German and Hebrew at the Franz school, and afterwards he was intrusted with the religious instruction. In 1806 he delivered his maiden-speech, which was very highly spoken of by Christians who heard him. Salomon never lost sight of his intention to become a preacher; and in this he was encouraged by his Christian friends, who not only supplied him with the sermons of Zölliskoer and Reinhardt, but even corrected his compositions in accordance with the rules of homiletics. In 1815 he went to Berlin, where he delivered his first discourse in Jacob- son's Temple. He now became known to his coreligionists; and when, in 1818, the Temple of the Reformed party at Hamburg was dedicated, Salomon was elected associate preacher. In the year 1841 he delivered the “New Temple,” and attended the assemblies of the rabbins at Brunswick, Frankfort, and Breslau. In the year 1857 he retired from his duties, and died Nov. 17, 1862. Of his numerous publications we mention: A transplanto von Predigten (Dessau, 1818);—Predigten (Hamburg, 1819—29);—Moses, in 21 sermons (ibid. 1835);—David, as Man, Israelite, and King, 26 sermons (ibid. 1837); — Eia, the Champion of Light and Truth, in 19 sermons (ibid. 1840);—Der Berg des Herrn, 17 sermons on the Decalogue (ibid. 1846).— יבג assembler, comments upon Haggai and Zechariah (Dessau, 1805);— Der Pentateuch, according to the Masoretic text, with a German translation and short glosses (Krotoschin, 1848—49, 5 vols.). Some of his sermons were also translated into English by Miss A. M. Goldsmith (London, 1839). See Furst, Bibl. Jud. iii, 226 sq.; Kayserling, Bibliothek jüdischer Kanzeldroner, i, 142—277; Jost, Gesch. d. Judentum u. s. Secten, iii, 365, 371; Grätz, Gesch. d. Juden, xi, 416 sq.; Pl. Philippson, Biographische Skizzen (Leips., 1866, 3 pts). Geiger, in der Zeitschrift für jüdische Theologie, ii, 127 sq.; ii, 91—102; Uneure Zeit, 296; Steinmeidler, Die hebr. Tora, 17; L. Philippson, Predigten und Schul-Magasin, ii, 258—296. (B. P.)

Salomon, John, professor of Hebrew, was a native of Posen, where he was born in 1625. He embraced Christianity at Danzig, Jan, 22, 1657. Two years later he was appointed professor of the Oriental languages at the gymnasium there, and died July 1, 1683. He wrote, Demonstrationes XXXVII contra Judæos (Frankfort, 1660);—Programma Hebr. ad Audiendi Orationem. Hebr. de Præsentia ut Utilitatem Logique Hebr. (Dantzic, 1666);—Programma de Jubilæa Hebraorum (ibid, 1658, 2 vols.);—See his letters to the Bernhardi scholar, Bibliograph. Handb. p. 128; id. Catalogus Librorum Hebr. in Bibli. Bodl. p. 2937; Wolf, Bibl. Hebr. i, 480; Delitzsch, Wissenschaft, Kunst und Judendäm, p. 139, 301; Basnage, Histoire des Juifs (Taylor’s transl.), p. 755. (B. P.)

Salomius, Sr., bishop of Geneva in the middle of the 5th century, was the son of Eucher, afterwards bishop of Lyons. At the early age of ten, he entered the monastery of Lerins, and there studied under Hilary, Honorat, and Vincent. It is not positively known whether Salomius had charge of the church at Vienna or Geneva, but it was probably the latter. He is supposed to have assisted, with his father, at the Council of Orange in 441. He died about 470. There remains a writing of Salomius, called Expositio Mystica in Parabolas Salomonis et Ecclesiasten. The style is simple, and the most of the exposition relates to ethics.

Salpinx, in Greek mythology, was a surname of Minerva. Hegeleos, the son of Tyrsenus, dedicated to her a temple with the above name after his father had invented the trumpet.

Salt (סלה, melach; Δλάχ), the chloride of sodium of modern chemistry. Indispensable as salt is to ourselves, it was even more so to the Hebrews, being to them not only an appetizing condiment in the food both of man (Job xvi, 6) and beast (Isa. xxx, 24; see margin), and a most valuable antidote to the effects of the heat and the climate on animal food, but also entering largely into their religious services as an accompaniment to the various offerings presented on the altar (Lev. ii, 13). They possessed an inexhaustible and ready supply of it on the southern shores of the Dead Sea. In the same manner the Arabs of the present day procure their supply of salt from the deposits of the Dead Sea, and carry on a considerable trade in that article throughout Syria. Here may have been situated the Valley of Salt (2 Sam. viii, 13), in proximity to the mountain of fossil salt which Robinson (Researches, ii, 198) describes as five miles in length, and a chief source of the salt in the sea itself. See SALT, VALEY OF. Here were the salt-pits (Zeph. ii, 9), probably formed in the marshes at the southern end of the lake, which are completely coated with salt, deposited periodically by the rising of the waters; and here also were the successive pillars of salt which tradition has from time to time identified with Lot’s wife (Wisd, x, 7; Josephus, Ant. i, 11, 4). See DEAD SEA. Salt might also be procured from the Mediterranean Sea, and from this source the Phoenicians would naturally obtain the supply necessary for salting fish (Neh. xiii, 16) and for other purposes. The Jews appear to have distinguished between rock-salt and that which was gained by evaporation, as the Talmudists particularize one species (probably the latter) as the “salt of Sodom” (Carpzov, Appar, p. 718). The notion that this expression means bitumen rests on no foundation. The salt-pits formed an important source of revenue to the rulers of the country (Josephus, Ant. xiii, 4, 9). The salt-pits were conferred upon the rabbinical: senate, and are said to have been on Jerusalem by presenting the city with 375 bushels of salt for the Temple service (ibid. xii, 3, 3). In addition to the uses of salt already specified, the inferior sorts were applied as a manure to the soil, or to hasten the decomposition of dung (Matt. xv, 18; Luke xiv, 15). Too large an admixture, however, was held to produce sterility, as exemplified on the shores of the Dead Sea (Deut. xxii, 23; Zeph. ii, 9); hence a “sulph” land was synonymous with barrenness (Job xxxix, 6; see margin; Jer. xvii, 6; comp. Josephus, War, iv, 8, 2, almu-
SALT

SALT SEA

ρωγις και ἀγωγος); and hence also arose the custom of sowing with salt the foundations of a destroyed city (Judg. ix, 43), as a token of its irretrievable ruin. It was the belief of the Jews that salt would, by exposure to the air, lose its virtue (πορωγια), Matt. v, 18, and became null and void (Jer. xxv. 13; Mark vi. 41). The same idea is implied in the expressions of Pllny, sal inera (xxxi. 39), sal tabacere (xxxi. 44); and Maundrell (Early Travels [ed. Bohn], p. 512) asserts that he found the surface of a salt rock in this condition (see Hackett, Illustr. of Script., p. 48 sq.).

The nations connected with salt in Eastern countries are important. As one of the most essential articles of diet, it symbolized hospitality; as an anti-ptic, durability, fidelity, and purity. Hence the expression, "covenant of salt" (Lev. ii, 13; Numb. xviii, 19; 2 Chron. xiii, 8), by betokening an indissoluble alliance between friends (see Gettyh. Evangel. Rec. Oct., 1867); and again the expression, "salted with the salt of the palace" (Ezra iv, 14), not necessarily meaning that they had "maintenance of the palace," as the A.V. has it, but that they were bound by sacred obligations of fidelity to the king. So in the present day, "to eat bread and salt together," is an expression for a league of mutual support (see Dunlop, App. i, 232). On the other hand, the Persian term for traitor is nemehkharm, "faithless to salt" (Genuesius, Theod. p. 790). The same force would be given by the preservative quality of salt (Bahrdt, De Fodere Salis [Lips. 1761]; Hallerordt, id. [ibid. 1770]; Zeibich, id. [Ger. 1769]; Thomson, Lemo et Inock, i, 42). See COVENANT. It was possible with a view to keep this idea prominently before the minds of the Jews that the use of salt was enjoined on the Israelites in their offerings to God; for in the first instance it was specifically ordered for the meat-offering (Lev. ii, 18), which consisted mainly of flour, and therefore was not liable to corruption (see Pontanus, De Sac. Sacrifice. [Traj. 1763]; Spencer, De Legis Bib., 5, 1). The extension of its use to burnt-sacrifices was a later addition (Ezra xiiiil, 24; Josephus, Ant. iii, 9, 1), in the spirit of the general injunction at the close of Lev. ii, 13. Similarly the heathens accompanied their sacrifices with salted barley-meal, the Greeks with their olives (Homer, U. i, 449), the Romans with their mola salata (Horace, Sat. ii, 3, 200 or their salina fruges (Virgil, Æn. ii, 138). Salt, therefore, became of great importance to Hebrew worshippers: it was sold accordingly in the Temple market, and a large quantity was kept in the Temple itself, in a chamber appropriated to the purpose, the Miill Simhah Symbol, in Redus Sacra [Giess, 1699]; Wokenius, De Salutaris Oblationum Deo Factarur. [Lips. 1747]; Josephus, Ant. xii, 3, 3; Midrath, v, 3; Othon. Lex. Robb. p. 668). It may, of course, be assumed that in all of these cases salt was added as a condiment; but the strictness with which the rule was adhered to—no sacrifice being offered without salt (Pliny, xxxii, 41), and still more the probable, though perhaps doubtful, admixture of it in incense (Exod. xxx, 38, where the word rendered "tempered together" by some understood as "salted")—leads to the conclusion that there was a symbolic force attached to its use (Josephus, Ant. iii, 9, 1; Philo, ii, 355; Hottinger, Jacob. Hebr. Leg., p. 108); as was certainly the case, with the Greeks and Romans (Pliny, Hist. Nat., xxi, 44; Ovid, Fast. i, 387; Spencer, De Leg. Rith. iii, 2, 2; Lukanemather, App. Grec. Sacr. p. 350; Hottinger, De Una Salis, etc. [Marburg, 1708]; Schickelanz, id. [Servetus, 1738]; Mauis, id. [Giess. 1693]; Mill, id. [1722]). Lord Bird (law) refers to Lord Bird's adjectival use for salt in Mark ix, 49, 50, though some of the other associations may also be implied. The purifying property of salt, as opposed to corruption, led to its selection as the outward sign in Elisha's miracle (2 Kings ii, 29, 21), and is also developed in the New Test. (Matt. v, 13; Col. i, 10). Salt, as a symbol of robbery, is mentioned with salt (Ezra xvi, 4), originated in sanitary considerations, but received also a symbolic meaning (Richter, De

SALT, ECCLESIASTICAL USE OF. It would appear from a sentence of Augustine that in the 4th century it was customary to use salt in baptism, at least in Milan. Salt was placed in some churches on the tongues of the officiating prelates, as one of their orations, and an admonition to attain it. With salt, milk and honey were given. In the Sacramentary of Gregory the Great, after a form for the benediction and consecration of salt, it is said, "Hac oratione expleta, accipiant sacerdos de eodem sale, et ponant in ore infantis, dicendo, Accipiat sal sacrosanctum e vitam aeternam" ("This benediction being finished, let the priest take a portion of the same salt and put it into the mouth of the infant, saying, Take the salt of wisdom to eternal life").

SALT, CITY OF (Heb. Ir-ham-Melah, הָרַם-מֶלֶךְ, Sept. αἱ πόλεις Σαλαίων, v. r. ή πόλεις τῶν ἁλῶν; Vulg. civitas Salis), the fifth of the six cities of Judah which lay in the "wilderness" (Josh. xv, 62). Its proximity to Jerusalem, the name itself, seem to point to its being situated close to, or at any rate in the neighborhood of, the Salt Sea. Dr. Robinson (Bib. Res. ii, 109) expresses his belief that it lay somewhere near the plain at the south end of that lake, which he would identify with the Valley of Salt (q. v.). This, though possibly supported by the reading of the Vatican Sept., "the city of the Salt of Sodom," is not put as a mere conjecture, since no trace of the name or the city has yet been discovered in that position. On the other hand, Van de Velde (Spr. and Pol. ii, 99; Memoir, p. 111, and Map) mentions a Naar Malhe which he passed in his route from Wady el-Rmial to Sebbeh, the name of which (though the orthography is not certain) may be found to contain a trace of the Hebrew. It is one of four ravines which unite to form the Wady el- Bedein. Another of the four, Wady 'Amrehe (ibid.), recalls the name of Gomorrah, to the Hebrew of which it is very similar. It seems most probable that it took its name from salt works or mines. At the south-western extremity of the Dead Sea stands a remarkable range of hills of pure salt, and near them "the City of Salt" was perhaps situated. There are ancient ruins at the mouth of Wady Zaweireh, at the northern end of the range; and others at Um-Bagheh, five miles farther north. One or other of these places may mark the site of the "City of Salt" (Van de Velde, Memoir, p. 345; Trismar, Land of Israel, p. 318 sq.). See JUDAH.

SALT, COVENANT OF. See COVENANT; SALT.

SALT SEA, usually known as "the Dead Sea." This is the largest lake in Palestine, and in many respects the most remarkable in the world. Well known as it has always been, its peculiarities have scarcely yet been adequately explored.

1. Names. This body of water has received a variety of designations from writers both ancient and modern; and, as they are characteristic, they demand a brief examination here.

1. "The Salt Sea" is the most common Scripture appellation (סֵדָן הָיָם, Yăm ham-Melah; Sept. ἡ ἅλασσα τῶν ἁλῶν, or ἁλία; also ἡ ἅλασσα ἡ ἁλίας; Vulg. Mare Salis). It is evidently a descriptive name, probably intended to indicate both the saltness of its water and the character of the plain and hills along its southern margin (Ralan, Palest., p. 240). It occurs in the earliest books of the Bible, but is not found later than the time of Joshua (Gen. xiv, 8; Numb. xxxvii, 3; Deut. iii, 7; Josh. iii, 16; xv, 2; xviii, 19). In the Talmudical books it is likewise called "the Sea of Salt" (房貸נה יבש). See quotations from the Tal-mud and the Midrash Tehillim by Ral ne (Palest. p. 237).

2. "The Sea of the Plain," or, more properly, of the Arabah (סֵדָן הָמֶשֶׂה, Yăm ha-Arabah; Sept.ἡ ἅλασσα

260 SALT

7th Salis apud Priscos Priscino et Sacro [Zitian, 1766]."

Digitized by Google
The sea is also a descriptive title, showing its geographical position in the centre of the great valley of the Arabah. It is first employed in combination with the preceding, as if Moses had heard it on his approach to Palestine (Deut. iii. 17); and possibly it may have afterwards supplanted the older name (Is. 44; 2 Kings xiv. 25), with which it is sometimes associated (Josh. iii. 16; xii. 9; Deut. iv. 23). See Salt.

3. "The East Sea" is the only other name employed in Scripture (zekâh, ha-Yam ha-Kadmoni; Sept. ἡ έλατσσα ἢ πρῶς άνάσαλα; Vulg. Mare Orientale). It is used by Ezekiel (xlvii, 8), Joel (ii, 20), and Zechariah (xiv, 8, where the A. V. has "the former sea," although the Hebrew is the same), to distinguish it from the Mediterranean, which was called "the western" (γαλατίας, literally "latter," though when opposed to τρύγος it means "western").

In one passage (Ezek. xlvii, 8) it is styled, without previous reference, "the Sea" (בֵּית הָיָם, ha-Yám), and distinguished from "the great sea"—the Mediterranean—(ver. 10).

4. The Sea of Sodom (סֵדָום יָם) is found in the Talmud (Reland, p. 237, 249), no doubt because common tradition represented the city of Sodom as having been engulfed by the "Sea of Sodom," thus differing from the name first suggested in the Bible in the book of 2 Esdras (v, 7) by the name "Sodomithia sea" (mare Sodomiticum).

5. Josephus, and before him Diodorus Siculus (ii, 48; xix, 38), names it the Asphaltic Lake—"Ασφαλτίτης λίμνη (Acts, i. 9; iv. 5, 11; ix. 10; War, i, 55, 5; iii, 10, 7; iv. 2, 4), and once Λ. ἀσφαλτερίῳ (Acts, xvi, 6, 5). Also (ibid. v, 1, 22) Σολωμώνικη λίμνη. This name was adopted by Galen and other ancient writers, apparently because bitumen or asphaltum was often found floating on its surface or lying along its shores (Reland, p. 241).

6. The name Dead Sea appears to have been first used in Greek (Σαλάνα κωπαδί) by Pausanias (v, 7) and Galen (iv, 9), and in Latin (mare mortuum) by Justin (xxxvi, 5, 6), or, rather, by the older historian, Trogus Pompei (B.C. cir. 100), whose work he epitomized. It is employed also by Eusebius (Onomast. a. v. Σάλον). The expressions of Pausanias and Galen imply that the Lake of Arimathea in the country of the Arabah, which is here confused with the Sea of Sodom, is corroborated by the expression of Jerome (Comm. on Dan. xii, 45), "Mare ... quo nunc appellatur mortuum." The origin of this name is given by Jerome (ad Ezek. xlvii), "In quo nihil poterat esse vitale," and in this respect modern research has to a large extent confirmed his view in opposition to that of Aufrère, proving that the name is appropriate. The Jewish writers appear never to have used it, but it has become established in modern literature from the belief in the very exaggerated stories of its deadly character and gloomy aspect, which themselves probably arose out of the name, and were due to the preconceived notions of the travellers who visited its shores, or to the implicit faith with which they received the statements of their guides. Thus Maundeville (ch. ix) says it is called the Dead Sea because it moveth not, but is ever still—the fact being that it is frequently agitated, and that when in motion its waves have great force. Hence also the fable that no birds could fly across it and live, a notion which the experience of almost every modern traveller to Palestine would contradict.

7. The Arabic name is بحر لد, "the Sea of Lot." The name of Lot is also specially connected with a small piece of land, sometimes island, sometimes peninsula, at the mouth of the lake. Another frequent designation among the modern inhabitants is El-Hebrei- ret el-Mejat, "Dead Sea," suggested by its character.

II. Physical Features.—1. General Position.—The Dead Sea is situated in the lowest part of that great valley which stretches in a direct line due south from the base of Hermon to the head of the gulf of Akabah. The valley is a chasm or fissure in the earth's crust, being for nearly 200 miles below the level of the ocean. The Dead Sea is the reservoir into which all its waters flow, and from which there is, and can be, no escape except by evaporation. It is the lowest and largest of the three lakes which interrupt the rush of the Jordan's waters into the Dead Sea. It is, therefore, a fact, a permanent one, that in its retreat from what there is reason to believe was at a very remote period a channel connecting the Mediterranean with the Red Sea. As the most enduring result of the great geological operation which determined the present form of the country, it may be called, without exaggeration, the key to the physical geography of the land of Israel. It is therefore in every way an object of extreme interest.

The valley is shut in on the east and west by parallel ranges of mountains, having steep, rugged, and bare sides, furrowed by wild ravines. The eastern range is somewhat higher than the western. In the parallel of Jericho the ranges expand slightly, and the valley there attains its greatest breadth—about twelve miles; but they contract again at the northern end of the Dead Sea, and continue in parallel lines throughout its entire length. The cliffs which hem in the valley are here steeper, higher, and wilder than elsewhere, and the scenery is thus broken and desolate. The sea occupies the whole width of the valley, in many places washing the sides of the cliffs.

2. Terrace Banks.—It is deserving of special note that the mountain-sides and low plains on both the eastern and western shores of the Dead Sea are marked by a series of terraces, manifestly water-lines of some remote ages. The highest is very distinctly seen on the mountain-chain of Moab, extending along the tops of the cliffs like a huge shelf. Its elevation appears to be about 1300 feet; and on the western range, at various places, there is a corresponding terrace. This terrace has been frequently noticed by travellers, but particular attention was recently given to it by Tristram, who remarks: "These terraces in the old Secondary limestone must be about the present level of the Mediterranean, and they seem to tell of a period long antecedent to the Tertiary terraces and deposits below, when the old Indian Ocean wore the rocks and scooped out the coves, as its unbroken tide swept up from the ocean to the present Dead Sea, and when the tides were a part of a great chain of African lakes" (Land of Israel, p. 247).

About 230 feet above the present level of the Dead Sea are traces of another ancient shore-line, marked by a strip of alluvial marl adhering to the rocks and cliffs, particularly at the north-west angle, and down as far as Ras el-Feisal, on the west coast of the Sea. See Ras el-Feisal and Ain-Fidy. The deposit is mixed with shells of existing species, layers of gypsum, and gravel. Where there are ravines running down to the sea between high cliffs, the deposit reaches up their sides in places to a height of 400 feet, and then slopes away in a series of terraces to the present level of the sea, as if the water had gradually and slowly emptied the ocean. At one point Tristram counted on the shore "no less than eight low gravel terraces, the ledges of comparatively recent beaches, distinctly marked. The highest of these was forty-four feet above the present sea-level" (p. 278).

At Jebel Shukif, a short distance north of Engeleti, Tristram, in advancing to the lower terraces, measured the elevations of three high terraces. The first at a height of 322 feet, marked by a deposit of marl on limestone; the second 655 feet, formed of hard limestone; and the third 1054 feet, of crystalline limestone (ibid. p. 290).

3. Circuit of the Shore.—The contour of the Dead Sea, as delineated in most maps, is regular, the shorelines having few indentations, and the curves at the north and south being uniform. Recent researches—especially those of Lynch, Robinson, and Tristram—have shown that this regularity of outline is incorrect.
The western shore especially has long promontories and deep bays, and the curves at the north and south are very far from being so gracefully rounded as most cartographers have delineated them.

On the north, at the embouchure of the Jordan, a low promontory is in process of gradual formation by the muddy deposits brought down by the river. It is mostly bare, destitute of all vegetation, and, like the adjoining plain, covered with a nitrous crust. At present it projects into the lake more than a mile. When the water is very high, a portion is overflowed. To the westward lies a deep bay, and beyond it a long, low isthmus, covered with cairns of loose rounded stones. De Saulcy has given to this isthmus the name Rejhm Lot, "Lot's ruin;" but this name is not heard on the spot. The ruins are shapeless and desolate. They are of the highest antiquity, and may perhaps be of the era of the "cities of the plain."

The shore-line now trends, with an easy curve, to the south-west, and then to the south, until it reaches the bold headland of Ras el-Feshkhab. So far it is flat and sandy, and the adjoining plain dreary and naked, save where, at long intervals, a little brackish spring rises, or a tiny streamlet flows, and there cane-brakes and shruberies of tamarisk are seen. Ridges of drift mark the water-line, and are composed of broken canes and willow branches, with trunks of palms, poplars, and other trees, half imbedded in slaty mud, and all covered with incrustations of salt.

A few miles north of Ras el-Feshkhab are some confused heaps and long ridges of loose unhewn stones and mounds of earth, to which De Saulcy has given the name Gunman. Other travellers, however, have been unsuccessful in discovering here any traces of a ruined city, or of the name which the French savant has given to it (Tristram, p. 249; Porter, Handbook, p. 208).

Ras el-Feshkhab is a bold headland of crystalline limestone, descending from a height of some 1500 feet in broken cliffs into the deep sea. It bars all passage along the shore; but Tristram by great exertions climbed round its face. It is cleft asunder by Wady en-Nar, the continuation of the Kidron. At the base of the cliff is a vein of bituminous limestone, largely used in the manufacture of little ornaments which are sold to the pilgrims at Jerusalem. "The substance seemed to have been partially ejected in a liquid form, and to have streamed down the cliffs. It was generally mixed with flints and pebbles, sometimes covering the boulders in large splashes, and then, in the sea itself, formed the matrix of a very hard conglomerate of gravel and flints. When thrown into the fire, it burned with a sulphurous smell, but would not ignite at the flame of a lamp" (Tristram, p. 254).

South of Ras el-Feshkhab the cliffs retreat, leaving a plain along the shore, varying from one to two miles in breadth, and extending to Ain-Terabeh, about six miles distant. The plain is an alluvial deposit with layers of gravel, and having spits of pure sand projecting at intervals into the sea. It is partially covered with shruberies of tamarisk, acacia, and retem (a species of broom; the Genista retem of Forskal, abounding in the peninsula of Sinai), and towards the south with dense cane-brakes. The coating of alluvial marl which once covered it is now in many places worn away; and deep gullies rend it in all directions. Enough remains to show that its top, like that of the plains at the northern and southern ends of the lake, formed the old Tertiary level of the waters (ibid. p. 256).

In the plain is a copious brackish spring, with a temperature of 86° Fahr. Farther south is Ain-Terabeh, a small fountain, slightly brackish, oozing up from the sand a few feet from the shore. Between it and the cliffs is a dense thicket abounding with birds and beasts: ducks, teal, pochard, thrush, bullul; with swine, leop ard, jackal, fox, hare, and porcupine (ibid. p. 273).

From Ain-Terabeh to Ras Mersed (six miles) the coast plain is a mere strip, frequently interrupted by rocky headlands which dip into the waves. Bitumen is here abundant with pebbles imbedded. "In a little bay, just before reaching Wady Shukif, we were struck by a powerful sulphurous odor, and after some search found hot water bubbling through the gravel, at a temperature of 95° Fahr., only six inches from the sea. The smell of sulphur and rotten eggs was very strong, and while scooping in the gravel my hands became quite black, and my boots were covered with a yellow incrustation. Pebbles thrown in became incrusted with sulphur in a few minutes, and all the rocks in the sea,
which were here quite hot—of the temperature of 80° Fahr.—were covered with it. There must be an enormous discharge of this mineral water under the sea, as the heat of the water extends for two hundred yards, and the odor to a much greater distance. The ordinary temperature of the sea elsewhere was 62° (ibid., p. 279). On the south side of this spring is Jebel Shukiff, a high, bold peak projecting into the sea. Two miles beyond it is an immense salt lake which surrounds forming a delta to two gulns which empty into it per- cipitously streams of fresh water. These, with the "foun- tain of the kid" itself, make this spot a paradise in the midst of a dreary desert. See Engedi.

South of Engedi the plain becomes wider, but it is bare and desolate. The cliffs rise over it in broken masses of marmorated limestone, covered with vegetation, while the alluvial deposits along their base are as white as snow. Two miles southwest a spring of fresh water (Birket el-Khulil) oozes up on the margin of the sea, having a temperature of 86° Fahr. Other springs must exist beneath the waves, for the water near the shore is much hotter than elsewhere, and the whole surrounding air is filled with fumes of sulphuret- ed hydrogen. No traces of trap-rock are anywhere seen; but near Wady Khudarah are veins of crystalline limestone, and great quantities of flint, coated with ox- ide of iron. These De Saucly and others mistook for lava torrents. The coast has the same general features as the entire western coast of the Dead Sea. That city which is situated on the Mount of Electronic (q.v.). There, at the base of the hill, are the remains of a Roman camp; and beyond it the aspect of the plain is that of utter and even painful sterility.

"Elsewhere the desolation is comparatively partial; here it reigns supreme. The two miles of rugged slope that lays between our path and the sea are difficult to describe. They are formed of a soft, white, and very salt deposit, torn and furrowed by winter torrents in every direction, which have left fantastic ruins and cas- tles of olden shape, flat-topped mamonels, cairns, and every imaginable form into which a wild fancy could have moulded matter, standing in a labyrinth, north and south, before and behind us" (ibid., p. 516). The Birket el-Khulil just alluded to is a shallow depression in the shore, which is filled by the water of the lake when at its greatest height, and forms a natural salt- pan. After the lake retires the water evaporates from the hollow, and the salt remains for the use of the Arab tribes. The土壤 soil is covered by layers of sand and gravel, the sand being deeper farther south, and on the peninsula (iby., June 2). One feature of the beach is too characteristic to escape mention—the line of drift-wood which encircles the lake, and marks the highest, or the ordinary high, level of the water. It consists of branches of brushwood, and of the limbs of trees, some of considerable size, brought down by the Jordan and other streams, and in course of time cast up on the beach. They stand up out of the sand and shingle in curiously fantastic shapes, as signs of life gone from them, and with a charred though blanched look very desolate to behold. Among them are said to be great numbers of palm-trunks (Poole, p. 69); even in winter the southern part is covered by the eastern shore already spoken of, and others brought down by the Jordan in the distant days when the palm flourished along its banks. The drift-wood is saturated with salt, and much of it is probably of a very great age.

From south the shore recedes, forming a bay some eight miles in length, the water in places almost wash- ing the base of the cliffs. One wild glen, called Um- Bagheek, breaks through the mountains, and sends out a tiny stream with a dense fringe of evergreens. Not far from it is another hot sulphur spring, which spreads its suffocating odors around. On the south the bay is bounded by the highest cliffs, the ancient arch of some extent, sprinkled with tamarisks and acacias, and torn in all directions with torrent-beds, through which the winter rains and the streamlets from numer- ous sulphurous and brackish springs find their way to the sea. The cliffs and peaks which rise over the oasis appear from a distance as an immense cul- tanic action, but closer inspection proves that there are no igneous rocks here or elsewhere along the western shore. Veins of ruddy limestone, blocks of ironstone, and multitudes of nodules of black flint look like trap- dikes and craters in the distance. There are, however, a few cinders and scoriae observable here and there along the shore.

A short distance south of the Wady Zuweiereh is Jebel Usdum, a range of hills running from north to south a distance of seven miles, with an average elevation of three hundred feet, composed of a solid mass of rock- salt. The top and sides are covered with a thick coast- ing of marron, from which the precipices of the chasms, while the alluvial deposits along their base are as white as snow. Two miles southwest a spring of fresh water (Birket el-Khulil) oozes up on the margin of the sea, having a temperature of 86° Fahr. Other springs must exist beneath the waves, for the water near the shore is much hotter than elsewhere, and the whole surrounding air is filled with fumes of sulphuret- ed hydrogen. No traces of trap-rock are anywhere seen; but near Wady Khudarah are veins of crystalline limestone, and great quantities of flint, coated with ox- ide of iron. These De Saucly and others mistook for lava torrents. The coast has the same general features as the entire western coast of the Dead Sea. That city which is situated on the Mount of Electronic (q.v.). There, at the base of the hill, are the remains of a Roman camp; and beyond it the aspect of the plain is that of utter and even painful sterility.

"Elsewhere the desolation is comparatively partial; here it reigns supreme. The two miles of rugged slope that lays between our path and the sea are difficult to describe. "Elsewhere the desolation is comparatively partial; here it reigns supreme. The two miles of rugged slope that lays between our path and the sea are difficult to describe. They are formed of a soft, white, and very salt deposit, torn and furrowed by winter torrents in every direction, which have left fantastic ruins and cas- tles of olden shape, flat-topped mamonels, cairns, and every imaginable form into which a wild fancy could have moulded matter, standing in a labyrinth, north and south, before and behind us" (ibid., p. 516). The Birket el-Khulil just alluded to is a shallow depression in the shore, which is filled by the water of the lake when at its greatest height, and forms a natural salt- pan. After the lake retires the water evaporates from the hollow, and the salt remains for the use of the Arab tribes. The soil soil is covered by layers of sand and gravel, the sand being deeper farther south, and on the peninsula (iby., June 2). One feature of the beach is too characteristic to escape mention—the line of drift-wood which encircles the lake, and marks the highest, or the ordinary high, level of the water. It consists of branches of brushwood, and of the limbs of trees, some of considerable size, brought down by the Jordan and other streams, and in course of time cast up on the beach. They stand up out of the sand and shingle in curiously fantastic shapes, as signs of life gone from them, and with a charred though blanched look very desolate to behold. Among them are said to be great numbers of palm-trunks (Poole, p. 69); even in winter the southern part is covered by the eastern shore already spoken of, and others brought down by the Jordan in the distant days when the palm flourished along its banks. The drift-wood is saturated with salt, and much of it is probably of a very great age.

From south the shore recedes, forming a bay some eight miles in length, the water in places almost wash- ing the base of the cliffs. One wild glen, called Um- Bagheek, breaks through the mountains, and sends out a tiny stream with a dense fringe of evergreens. Not far from it is another hot sulphur spring, which spreads its suffocating odors around. On the south the bay is bounded by the highest cliffs, the ancient arch of some extent, sprinkled with tamarisks and acacias, and torn in all directions with torrent-beds, through which the winter rains and the streamlets from numer-
points to a shower of hot sulphur, and an eruption of bitumen upon it, which would naturally be calcined and impregnated by its fumes, and this as a geological period quite subsequent to all the diluvial and alluvial action of which we have such abundant evidence. The catastrophe must have been since the formation of the wady, since the deposition of the marl, and while the water was at its present level; therefore, probably during the historic period (p. 355-357).

The shore-line runs for nearly three miles southward along the base of Jebel Usdum, and then sweeps sharply round to the east, leaving on the south a naked, miry plain called Sabkah, ten miles long from north to south by about six wide. It is in summer coated with a saline crust, but is so low that when the water is high a large section of it is flooded. Numerous torrent-beds from the salt range on the west, and from the higher ground of the Arabah on the south, run across it, converting large portions into impassable swamps. On its southern border the old diluvium terrace rises like a white wall to a height of more than two hundred feet. It is only on getting close to it that the sides are seen to be rent and torn into a thousand fantastic forms by winter torrents and the wearing-away of the softer deposits. The Sabkah is bounded on the east by Wady Tufelreh, one of the principal drains of the Arabah, and containing a brackish, perennial stream. Beyond it the character of the surface completely changes. The ground rises in an easy slope to the foot of the Moab Mountains, and is covered with dense thickets of reeds, tamarisk, acacia, retam, zygiphus, and other shrubs, intermixed with fertile fields, cultivated by the Ghawarineh Arabs (as the inhabitants of the Ghôr are called, here the worst representatives of their race), and producing abundant crops of wheat, maize, indigo, melons, and cucumbers. Tristram says: "The place positively swarmed with birds in countless myriads. There were doves by the score on every bush, large and small (Turtur riorius and T. Aegyptius); bulbulis, the hopping-thrush, shrikes, the gorgeous little sun-bird resident in the light, and, once more, our new sparrow. The Abyssinian lark, pipits, and wagtails luxuriated in the moist rills at our feet, which were fringed by drooping tufts of caper (Capparis Aegyptiaca) in full flower. All teemed with a prodigality of life" (p. 386).

This fertile tract touches the south-eastern shore of the sea, and continues along it as it trends north-east for some five miles to the mouth of the Wady Nimeireh, becoming gradually narrower as the shore-line approaches the rocky sides of the mountains. The geological formation of this eastern range is different from the western. The front cliffs are red sandstone, apparently overlying hard, crystalline limestone, and topped by more recent calcareous rock. Trap boulders and fragments of greenstone and sienite are strewn along the base.

Such are the great southern shores of the Dead Sea. The great valley is here narrower than at the northern shore, not because of any contraction in the mountain-ranges, but arising from the ridge of Usdum, which was evidently thrown up from the bottom of the valley at some period subsequent to the formation of the Arabah. The projecting base of Jebel Usdum on the west, and the high fertile region of Es-Salheh on the east, contract the southern end of the lake into the form of a semi-circular bay about six miles in diameter. A few miles farther north the shores on each side expand so much that the breadth of the sea is almost doubled. The general aspect of the shores is dreary and desolate in the extreme. The salt-incrustcd plain, the white downs of the Arabah, the naked line of salt hills, the bare and scathed mountain-ranges on each side, all blazing under the rays of a vertical sun, form a picture of utter and stern desolation such as the mind can scarcely conceive.

On the northern side of Wady Nimeireh a narrow strip of saline plain, very low and very barren, intervenes between the shore and the mountains. Here and there, at a little fountain or at the mouth of a ravine, a clump of bushes or a cane-brake may be seen.

The Peninsula of el-Lisân, "the Tongue" [see Bay], is the most remarkable feature on the eastern shore. It juts out opposite the great ravine of Kerak. The neck connecting it with the mainland is a strip of low, bare sand, measuring five miles across. In outline the peninsula bears some resemblance to the human foot, the toe projecting northward and forming a sharp promontory. Its length is about nine miles, and from the heel or south-western point to the southern shoreline is seven miles. The main body is a Post-tertiary deposit composed of layers of marl, gyposum, and sandy conglomerate, manifestly coeval with the great diluvial terrace, and corresponding with it in elevation. The top is a table-land, broad towards the south, but gradually narrowing to a serrated ridge at the northern end.

The Dead Sea from the heights behind Sebbeh (Massada), showing the wide beach on the western side of the lake and the tongue-shaped peninsula.
It is white and almost entirely destitute of vegetation. The surface is all rent and torn by torrent-beds; and the sides are worn away into pyramidal masses resembling lines and groups of white tents. It is worthy of special note that in the wadys and along the shores pieces of sulphur, bitumen, rock-salt, and pumice-stone are found in great profusion. Probably, if examined with care, geological phenomena similar to those in Wady Mahawit might be found on this peninsula, and some additional light thus thrown upon the destruction of the cities of the plain. Pode says "the soil appeared sulphurous" (Journal R. G. S. xxvi. 62-64).

The little plain at the mouth of Wady Draa, or Kerak, affords a striking contrast, in its thickets of evergreen and luxuriant corn-fields, to the arid desolation of the adjoining peninsula. It is here that the few inhabitants of the peninsula reside, in a wretched village called Mezrâ'a.

The shore of the Dead Sea between the peninsula and the north-eastern angle has never been thoroughly explored. Seetzen, Irby and Mangoles, De Saulcy, and more recently the party of the Duc de Loyynes, visited a few places; and Lienz and his officers touched at several points. A few miles north of el-Lisân the fertile plain called Ghur el-Mezrâ'a terminates, and the mountains descend in sublune cliffs of red sandstone almost to the water's edge. Higher up, white, calcareous limestone appears, and forms at this place the main body of the range. Basalt also appears in places, sometimes overlying the limestone as on the plain of Bashan, at others bursting through the sandstone strata in dikes and veins. The ravines of Mojjib (Arnon) and Zerka Ma'in appear like huge rents in the mountains. Near the mouth of the latter veins of gray and black trap cut through the sandstone, and a copious fountain of hot, sulphurous water sends a steamy river into the sea amid thickets of palms and tamarisks. This is Callirrhoe, so celebrated in olden time for its baths. Between this point and the plain of the Jordan volcanic eruptions have produced immense flows of basaltic rock, portions of which had been overflowed into the valley of the Jordan. Among other smaller basaltic streams three were found bordering on the eastern edge of the Dead Sea to the south of the little plain of Zarah (M. Lartet's paper to French Academy of Sciences; see in Journal de Soc. Litt.July, 1865, p. 495).

The plain between the mountains and the mouth of the Jordan is in general well watered, and covered with luxuriant vegetation and occasional thickets of tamarisk, retem, and acacia. At the ruins of Suweimeh, De Saulcy found a copious hot spring with a ruinous aqueduct (Voyage en Terre-Sainte, i. 517). Along the shore pieces of pumice-stone, lava, and bitumen are found imbedded in the sand and mud as if washed up by the waves; and at this point are more distinct traces of volcanic action than elsewhere along the sea.

One remarkable feature of the northern portion of the eastern heights is a plateau which divides the mountains half-way up, apparently forming a gigantic landing-place in the slope, and stretching northward from the Wady Zerka Ma'in. It is very plainly to be seen from Jerusalem, especially at sunset, when many of the points of these fascinating mountains come out into unexpected relief. This plateau appears to be on the same general level with a similar plateau on the western side opposite to it, with the top of the rock of Sebbeh, and perhaps with the Mediterranean.

The dimensions of the Dead Sea have never yet been taken with sufficient accuracy. Its longest axis is situated nearly north and south. It lies between 31° 6' 20" and 31° 46' 46" N. lat., nearly; and thus its water surface is from N. to S. as nearly as possible 40 geographical, or 46 English miles long. On the other hand, it lies between 36° 24' and 35° 37' E. long., nearly; and its greatest width (some three miles south of Ain-Jidy) is about 9 geographical miles, or 104 English miles. The ordinary area of the upper portion is about 174 square geographical miles; of the channel, 29; and of the lower portion, hereafter styled the lagoon, 46—in all, about 250 square geographical miles. It must be remembered that this varies considerably at different seasons of the year, and in different years. When the sea is filled up by winter rains, the flat plain on the south is submerged for several miles. The annual rainfall, too, is not uniform in Palestine. Some years it is more than double what it is in others, and this produces a corresponding effect on the volume of water in the sea, and consequently on its area. At its northern end the lake receives the stream of the Jordan; on its eastern side the Zerka Ma'in (the ancient Callirrhoe), and possibly the more ancient en-Eglaim, the Mojjib (the Arnon of the Bible), and the Beni-Hemâl. On the south the Kuruhy or el-Ahs, and on the west that of Ain-Jidy. These are probably all perennial, though variable, streams; but, in addition, the beds of the torrents which lead through the mountains east and west, and over the flat, shelving plains on both north and south of the lake, show that in the winter a very large quantity of water must be poured into it. There are also all along the western side a considerable number of springs, some fresh, some warm, some salt and fetid, which appear to run continually, and all find their way, more or less, absorbed by the sand and shingle of the beach, into its waters.

The peninsula of Lisân divides the sea into two sec-

Section of the Dead Sea from North to South.

tions: that on the north is an elongated oval in form, while that on the south is almost circular. The narrowest part of the channel between the peninsula and the mainland is not much more than two milles across. The northern section is a deep, regularly formed basin, the sides descending steeply and uniformly all round, as well on the north and south as on the east and west. This is one of the most remarkable features of the sea. Lynch ran seven lines of soundings across it from shore to shore, and found no rocks between that he could see. Wady Mojib, that is, about the centre of the northern section. From this point the depth decreased gradually towards the Lisan on the south and the mouth of the Jordan on the north. The greatest depth found by Lynch was 1808 feet, but Lieut. Molynex records one sounding taken by him as 1350 feet. The deep part of the lake terminates at the peninsula. The greatest depth of the channel between the Lisan and the western shore is only thirteen feet, and no part of the southern section was more than twelve feet in depth (Lynch, Official Report, p. 43).

It appears that when the water is very low there are two principal mouths from the peninsula to the mainland—one across the narrow channel, and the other running from the isthmus to the northern point of Jebel Usudam (Seetzen, Reisen, ii, 358; Irby and Mangles, Travels, p. 140).

5. The depression of the Dead Sea is without a parallel in the world. From the experiments made by boiling water in 1857, Messrs. Moore and Beke supposed the depression to be about 500 feet. In the following year, Russegger with his barometer made it about 1400 feet. Symonds by trigonometrical survey, in 1841, calculated the depression at 1312 feet; and the level run by Dale, an officer of Lynch’s expedition, gave a result of 1316 feet. A still more careful measurement has been recently made by the corps of English engineers under Capt. Wilson, with the following result: “The levelling from the Mediterranean to the Dead Sea has been performed with the greatest possible accuracy, and by two independent observers, using different instruments, and the result may be relied upon as being absolutely true to within three or four inches. The depression of the surface on March 12, 1865, was found to be 1292 feet; but from the line of drift-wood observed along the border of the Dead Sea, it was found that the level of the water at some period of the year—probably during the winter from November to March—was two feet six inches higher, which would make the least depth 1289.5 feet.” Capt. Wilson also learned, from inquiry among the Bedouin, and from European residents in Palestine, that during the early summer the level of the Dead Sea is lower by at least six feet. This would make the greatest depression to be as near as possible 1298 feet. . . . The most recent observation before that now given, by the Duc de Luynes and Lieut. Vignes, of the French navy, agrees with our result in a very remarkable manner, considering that the result was obtained by barometric observation, the depression given by them being 1286 feet on June 7, 1864, which at most differs only twelve feet from the result given by Capt. Wilson. The result obtained by Lynch, learned from inquiry among the Bedouin, and from European residents in Palestine, that during the early summer the level of the Dead Sea is lower by at least six feet. This would make the greatest depression to be as near as possible 1298 feet. . . . The most recent observation before that now given, by the Duc de Luynes and Lieut. Vignes, of the French navy, agrees with our result in a very remarkable manner, considering that the result was obtained by barometric observation, the depression given by them being 1286 feet on June 7, 1864, which at most differs only twelve feet from the result given by Capt. Wilson. The exact amount of the depression will, of course, vary with the rise and fall of the waters at different seasons. Traces along the shore prove that the level has varied as much as fifteen feet within the past half century (Robinson, Physical Geography, p. 190). It is a matter of common observation that the depression of the Dead Sea is very nearly equal, each about 1200 feet; the elevation of Jerusalem above the Mediterranean is about twice, and above the Dead Sea about three times that number (ibid. p. 190).

6. The water of the Dead Sea is more intensely salt than any other sea in the world. It has also a bitter, nauseous taste, and leaves upon the skin a slightly greasy feeling. Yet it is transparent as the water of the Mediterranean, and its color is the same—a delicate green. Its specific gravity, and consequent buoyancy, is very great. Bathers float easily in an upright position with head and shoulders above the surface. Lynch says that the eggs, which abound in the sea across the Jordan, are with only two thirds immersed. This peculiarity was well known to the ancients (Josephus, War, iv, 8, 4; Aristot. Meteor. ii, 3; see also in Reland, p. 241, 240). Of its weight and inertia the American expedition had also practical experience. In the gale in which the party was nearly lost, “we were all tossed about, between the mouth of the Jordan and Ain-Feshkahab, it seemed as if the bows of the boats were encountering the sledge-hammers of the Titans.” When, however, “the wind abated, the sea rapidly fell; the water, from its ponderous quality, settling as soon as the agitating cause had ceased to act” (Lynch, Narrative, p. 298). At ordinary times there is nothing remarkable in the formation of the surface of the lake. Its waves rise and fall, and surf beats on the shore, just like the ocean. Nor is its color dissimilar to that of the sea. The water has an oily feel, owing possibly to the saponification of the lime and other earthy salts with the perspiration of the skin, and this has imparted a yellowish tinge to some observers. There are some observers who have stated that it is a greasy look; but such a look exists in imagination only. It is quite transparent, of an opalescent green tint, and is compared by Lynch (ibid. p. 337) to diluted absinthe. Lynch (p. 296) distinctly contradicts the assertion that it has any smell, noxious or not. So do the chemists who have examined it. The chemical phenomena of the surface of the sea may be mentioned. Many of the old travellers, and some modern ones (as Osmund, Pal. Past and Present, p. 449, and Churton, Land of the Morning, p. 149), mention that the turbid, yellow stream of the Jordan is distinguishable for a long distance in the lake. Molynex (p. 129) speaks of a “curious broad strip of white foam which appeared to lie in a straight line nearly north and south throughout the whole length of the sea . . . some miles west of the mouth of the Jordan” (comp. Lynch, Narrative, p. 279, 295). “It seemed to be constantly bubbling and in motion, like a stream that runs rapidly through still water; while nearly over this track during both nights we observed in the sky a white streak like a cloud extending also north and south, and as far as the eye could reach.” Lines of foam on the surface are mentioned by others, as Robinson (Physical Geography, i, 508), Borrer (Journey, etc., p. 479), Lynch (Narrative, p. 298). From Ain-Jidy a current was observed by the Glow’s party running steadily from the south towards the north, as far as we could trace it (ibid. p. 291). It is possibly an eddy caused by the influx of the Jordan. Both De Sauley (Narrative, Jan. 8) and Robinson (Physical Geography, i, 504) speak of spots and belts of water remaining smooth and calm while the rest of the surface was rippled, and presenting a strong resemblance to islands (comp. Lynch, Narrative, p. 296; Irby, Travels, June 5). The haze or mist which perpetually broods over the water has already been mentioned. It is the result of the prodigious evaporation. Lynch continually mentions it. Irby (June 1) saw it in broad transparent columns, like water spouts, only very much larger. To these phenomena of the sea is attributed the heat of the sky, the heat produced by the heat and moisture, are occasionally seen (Lynch, Narrative, p. 329). The remarkable weight of this water is due to the very large quantity of mineral salts which it holds in solution. The details of the various analyses are given in the following table, accompanied by that of sea-water, for comparison. For the determination of the density of the Dead Sea the expedition appears that each gallon of the water, weighing 12 lb., contains nearly 3 lb. of matter in solution—an immense quantity when we recall that sea-water, weighing 10 lbs. per gallon, contains less than 1 lb. Of this 3 lb. nearly 1 lb. is common salt (chloride of sodium), 1 lb. 12 lbs. chloride of magnesium, less than 2 lb. of chloride of calcium (or muriate of lime). The most unusual ingredient is bromide of magnesium, which exists in a truely extraordinary quantity.
SALT SEA

COMPARATIVE TABLE OF ANALYSES OF THE WATER OF THE DEAD SEA.

Total solid contents: 24,459 18,739 21,733
Water: 75,566 81,282 75,277

Specific gravity: 1.200 1.158 1.140 at 60°F

Bolling-point: 321°F
Water obtained: 221 miles from Jerusalem late in May season.
Water obtained: 1,172.7 1,172.7
In March at the north end.

The water is fatal to animal life; and this fact, according to Jerome, originated the name Dead Sea (A. W. Essen, xlviii, 8), comp. Galen, De Simp., v, 19. Shells and small fish, in a dead or dying state, have been picked up along the northern shore, and are found in some of the little fountains along the western coast; but they are all of foreign importation. Recent investigations have led some to suppose that the Dead Sea does contain and support a few inferior organizations, but the fact has not as yet been established on conclusive evidence. Lying in this deep caldron, encompassed by naked white cliffs and white plains, exposed during a great part of the year to the unclouded beams of a Syrian sun, it is not strange that the shores of the Dead Sea should exhibit an almost unexperienced sterility and a death-like solitude; nor is it strange that in a rude community the sea should be subject of wild and wondrous superstitions. "Senecha relates that bricks would not sink in it. Early travellers describe the lake as an infernal region; its black and fetid waters always emitting a noisome smoke or vapor, which, being driven over the land, destroys all vegetation like a frost. Hence, too, the popular report that birds cannot fly over its deadly waters" (Robinson, Physical Geography, p. 199). Such stories are fabulous. It is true that the tropical heat causes immense evaporation, the exhalations from the sulphurous springs and marshes taint the air for miles, and the mist of the swamps on the north and south gives rise to fevers, and renders the ordinary inhabitants feeble and unhealthy; but this has no necessary connection with the Dead Sea, or the character of its waters. The marshes of Iskanderin are much more unhealthy than any part of the Ghôr. Wherever a copious fountain bubbles up along the shores, or a mountain streamlet affords water for irrigation, tangled thickets of tropical trees, shrubs, and flowers spread out their foliage. There birds sing as sweetly as in more genial climes, and the Arab pitches his tent like his brethren on the Eastern plateau, and an abundant harvest rewards the labors of the husbandman. Tristram exclaims with something of enthusiasm, "What a sanitarium Engedi might be made, if it were only accessible, and some enterprising speculator were to establish a hydropathic establishment! Hot water, cold water, and decidedly salt water baths, all supplied by nature on the spot, the hot sulphur springs only three miles off, and some of the presence is due to the therapeutic reputation enjoyed by the lake when its water was sent to Rome for wealthy invalids (Galen, in Belg., Part, p. 249) or lepers flocked to its shores (Ant. Mart. § 10). Bousisgault (Ann. de Chimie, 1868, xviii, 168) remarks that if ever bronze should become an article of commerce, the Dead Sea will be the natural source for it. It is the magnesium compounds which impart so nauseous and bitter a flavor to the quantity of common salt in solution is very large. Lynch (Narraflie, p. 377) that while distilled water would dissolve % of its weight of salt, and the water of the Atlantic %, the water of the Dead Sea was so nearly saturated as only to be able to take up %

The above differences in the analysis of the water of the Dead Sea must be expected. When the sea is flooded by the flow of the Jordan, the salts in solution will be less; when low, after the evaporation of the summer, the amount will be more. The presence of these foreign ingredients in such quantities is easily accounted for. The washings of the salt range of the Dead Sea, and numerous brackish streams along the shores, supply the salt; the great sulphur fountain at Calithrion, and many others on the north and west, with the sulphur, bitumen, iron, etc., found so abundantly in the later deposits, supply the other ingredients. It is known also that large masses of bitumen are occasionally forced up from the bed of the sea; and it may be that beneath its waves are fountains and deposits more numerous and more remarkable than those in the surrounding rocks and plains. Then, too, the constant evaporation takes away the pure water, but leaves behind all the salts, which are thus gradually increasing in quantity.

Of the temperature of the water more observations are necessary before any inferences can be drawn. Lynch (Report, May 3) states that a stratum at 59° Fahr. is almost invariably found at ten fathoms below the surface. Between Wady Zerka and Ain-Terabeh the temperature at surface was 76°, gradually decreasing to 62° at 1944 feet deep, with the exception just named (Narraqie, p. 374). At other times, and in the lagoon, the temperature ranged from 82° to 80°, and from 5° to 10° below that of the air (ibid, p. 310-320; comp. Poole, Nov. 2). Dr. Stewart (Tent and Khan, p. 884), on March 31, 1834, found the Jordan 60° Fahr. and the Dead Sea (north end) 73°; the temperature of the air being 83° in the former case and 76° in the latter.
granted sceney man ever enjoyed, in an atmosphere where half a lung is sufficient for inspiration' (The Land of Israel, p. 295).

III. Origin and History.—It is a question of the highest importance, and one which has created much controversy among scientific and Biblical students, whether the present physical aspect of the Jordan valley and shores of the Dead Sea tends to the light, uphold its origin and changes, or upon the destruction of Solom and Gomorrah. Our knowledge of the physical structure of the Jordan valley, and of the various strata and deposits along the shores of the Dead Sea, is not yet sufficiently extensive or minute to enable us to construct a satisfactory theory on the points at issue; but it may be possible fairly to advance a few simple considerations which are the actual statements made in Scripture about the Dead Sea, and what are the facts which scientific investigation, so far as hitherto prosecuted, has established.

1. The references to the Dead Sea in Scripture are few, and mostly incidental. Three passages deserve special attention (1). In Gen. xiii, 10, where the sacred writer relates the story of the separation of Abraham and Lot, he represents the two as standing on the mountain-top east of Bethel. He then says, 'Lot lifted up his eyes, and beheld all the plain (or circuit) of Jor- dan, that it was well watered everywhere, before the Lord destroyed Sodom and Gomorrah, as the garden of the Lord, like the land of Egypt, as thou comest unto Zoor.' It has been inferred from this that the cities of Solom and Gomorrah, and the whole plain around them, must have been in sight at the time referred to, and must therefore have been situated at the northern end of the Dead Sea, which alone is visible from the height at Bethel. But a careful examination of the passage shows that this does not follow. The patriarchs looked towards 'the circuit of the Jordan.' It is not implied that they saw it all, nor is it said that Solom and Gomorrah were in sight. They saw enough to give them a general idea of the whole region. One thing is evident from the statement: a remarkable change was effected in the plain at the time of the destruction of Solom. It was fertile and well watered before that event, but manifestly not so, or not so much so, after it. This is corroborated by the narrative in Gen. xiv, 24, 25.

The second passage is Gen. xiv, 2-10, which contains the story of Lot's capture. Ver. 3 is important: 'All these (kings) were joined together in the vale of Siddim, which is the Salt Sea.' There cannot be a doubt that the idea here expressed is that the district called in the time of Lot 'the vale of Siddim' had become, in the time of the writer, 'the Salt Sea,' or at least constituted the Salt Sea. The Hebrew phrase establishes the identity of the two just as certainly as the similar phrase in ver. 2 establishes the identity of Bela and Zoar. The clause is found in all the ancient MSS. and versions, and in the Targum of Onkelos. Its genuineness rests on the very same basis as the other portions of the narrative. It was manifestly the opinion of Moses that the vale of Siddim was submerged. Another point in the narrative demands attention. The route of the invading host is traced. They attacked the Rephanim in Bashan, then marched southward through Moab and Edom to Paran, on the west side of the Arabah, opposite Edom. There they turned, and entered the mountains of Kadesh; there they swept the territory of the Amalekites on the south of Judah, and of the Amorites 'who dwelt in Engedi.' Having thus ravaged all the countries surrounding the cities of the plain, they descended upon their territory from the west. The inhabitants now came out against them, and the marshalling of the vale of the Dead Sea is not described. It may have been north or it may have been south of Engedi. One thing, however, is certain: if the western shores of the sea were then as they are now, no army could have marched along them from Engedi to Jericho. On the other hand, from Engedi there is a good path southward. It is said, moreover, that 'the vale of Siddim was full of bitumen pits' (ver. 10). There is no part of the valley north of the sea to which this would apply; nor, indeed, is there any plain or vale along its shores 'full of bitumen pits' at the present day. These facts render it impossible that the vale of Siddim could have been on the plain of Jericho; and the only conclusion which the statement that Siddim was submerged. See SODOM.

(5.) The third passage is Gen. xix, 24, 25. 'Then the Lord rained upon Sodom and upon Gomorrah brimstone and fire from the Lord out of heaven; and he overthrew those cities, and all the plain, and all the inhabitants of the cities, and that which grew upon the ground.' Abraham stood up, and withdrew from the mountain-brow, 'looked towards Solom and Gomorrah, and towards all the land of the plain, and beheld, and lo, the smoke of the country went up as the smoke of a furnace' (ver. 28). As Abraham was at this time residing at Hebron, the view towards the south end of the Dead Sea must have been much more distant than to the northern end, although the lake itself is visible from Beni-Na'im (the traditioary site of Abra- ham's interview with Jehovah) through gaps in the western mountains (Robinson, Bib. Res., ii, 188). See SODOM.

2. The physical facts ascertained by scientific research are as follows: The formation of the great valley of the Jordan must have been long antecedent to historic times, and coeval with the existing mountain-ranges; the valley was, at some remote period, filled with water to the level of the ocean; the water has gradually decreased, apparently by evaporation, and has left a number of shore-lines, traced by terraces along the mountain-sides, all antecedent to historic times; the portion of the Dead Sea north of el-Lisân forms a distinct basin, and appears to have done so from a time long anterior to Abraham. The southern section is different: it is very shallow; its bottom is sandy. Sulphur springs stud its shores; sulphur is strewn, whether in layers or in fragments, over the desolate plains; and bitumen is ejected, in great, floating masses, from the bottom of the sea, oozes through the fissures of the rocks, is deposited with gravel on the beach, or, as in the Wady Mahawât, appears with sulphur, to have been precipitated during some convulsion (p. 285), so that at a period long subsequent to the latest diluvial formation, and apparently within the historic period.

There can be no doubt that the destruction of the cities was miraculous. A shower of ignited sulphur was rained upon them. May we not connect this historic fact with the observed fact just stated? Again, the Hebrew phrase establishes the identity of the two; it is 'the vale of Siddim which is the Salt Sea,' or 'the Salt Sea.' 'The vale of Siddim was full of bitumen pits.' Bitumen is inflammable, and, when ignited by the fiery shower, would burn fiercely. May we not also connect this with the phenomena of Wady Mahawât, of which Tristram says, 'The whole appearance points to a shower of hot sulphur, and an ignition of bitumen upon it, which would naturally be calcined and impregnated with its fumes' (p. 856). The sacred writer further says that the vale of Siddim became the Salt Sea, or was submerged. The southern part of the lake is now a muddy flat, covered with a few feet of water. Suppose the vale to have sunk a few feet, or the water to have risen a few feet, under the tremendous destruction of the cities: either supposition would accord with the Biblical narrative, would not be without a parallel in the history of countries exposed to earthquakes, and would not be opposed to any results of modern observation; it would accord, besides, with the views of ancient writers, and with uniform tradition (Josephus Antiqu. xii, 4; 10; 18; 4; Reland, p. 254 sq.).

This was the view suggested by Dr. Robinson, and sanctioned by the distinguished geologist, Leopold von Buch. In his latest work, published since his death, Robinson says: 'It seems to be a necessary conclusion that the Dead Sea extended no farther south than the
SALT SEA

peninsula, and that the cities destroyed lay on the south of the lake as it then existed. Lot fled from Sodom to Zoar, which was near (Gen. xiv. 20); and Zoar, as we know, was in always has been partial, divided to the Ghizek as it opened upon the neck of the peninsula. The fertile plain, therefore, which Lot chose for himself, where Sodom was situated, and which was well watered, like the land of Egypt, lay also south of the lake 'as thou comest to Zoar' (Gen. xiii. 10, 11). Even to the present day, moreover, there is no way into the Ghizek as it opened up the south end of the sea, from wadys of the eastern mountains, than are found so near together in all Palestine besides. Tracts of exuberant fertility are still seen along the streams, though elsewhere the district around the southern bay is almost desert" (Physical Geogr. of the Holy Land, p. 218). Notwithstanding the arguments, and almost contemptuous insinuations of some recent writers, not a single fact has been adduced calculated to overthrow this view; but, on the contrary, each new discovery seems as if a new evidence in its favor.

3. Letter and Modern Notices.—It does not appear probable that, with the above exception, the condition or aspect of the lake in ancient times was materially different from what it is at present. Other parts of Syria may have deteriorated in climate and appearance, owing to the destruction of the wood which once covered them; but there are no traces either of the ancient wood or of the grass which once covered the lake or of anything which would account for its destruction, supposing it to have existed. A few spots—such as Ain-Jidy, the mouth of the Wady Zuweirah, and that of the Wady ed-Dra—were more cultivated, and, consequently, more populous, than they are under the discouraging influences of Mohammedanism. But such attempts must always have been partial, confined to the immediate neighborhood of the fresh springs and to a certain degree of elevation, and ceasing directly irrigation was neglected. In fact, the climate of the shores of the lake is too sultry and trying to allow of any considerable amount of civilized occupation being conducted there. Nothing will grow without irrigation, and artificial irrigation is too laborious for such a situation. The plain of Jericho, we know, was cultivated like a garden; but the plain of Jericho is very nearly on a level with the spring of Ain-Jidy, some 600 feet above the Ghorb el-Lisân, the Ghôr es-Sâfih, or other cultivable spots near the borders of the Dead Sea. Of course, so far as the capabilities of the ground are concerned (provided there is plenty of water), the hotter the climate, the better; and it is not too much to say that if some system of irrigation could be carried out and maintained, the plain of Jericho, and still more the shores of the sea (the peninsula of the southern plain), might be the most productive spots in the world. But this is not possible, and the difficulty of communication with the external world alone would be as (it must always have been) a serious bar to any great agricultural efforts in this district.

When Macbride and Callirhos were inhabited (if, indeed, the former was ever more than a fortress, or the latter a bathing establishment occasionally resorted to), and when the plain of Jericho was occupied with the crowded population necessary for the cultivation of its balsam-gardens, vineyards, sugar-plantations, and palm-groves, there may have been a little more life on the shores. But this can never have materially affected the lake. The track along the western shore and over Ain-Jidy was then, as now, used for secret marauding expeditions, not for peaceful or commercial traffic. What transport there may have been between Idumea and the coast was carried on by another route. Macbride appears to state that the Moabites crossed the sea to invade Judah (Am. ix. 1, 2); and he informs us that the Romans used boats against the fugitive Jews (War, iv. 7, 6; comp. iv. 8, 4). A doubtful passage in Josephus (see Reland, Palæst., p. 252), and a reference by Edrizi (ed. Jaubert, in Ritter, Jordan, p. 799) to an occasional venture by the people of "Zara and Dana" in the 12th century, are all the remaining allusions to the navigation of the lake known to exist, until Englishmen and Americans, in the last century, started it open for purposes of scientific investigation. The temptation to the dwellers in the environs must always have been to ascend to the fresher air of the heights, rather than descend to the sultry climate of the shores. It is not strange that the Dead Sea was never navigated to any extent: fish do not thrive in it. The southern shore of the shores made water transit of little importance.

Costigan, an Irish traveller, was the first, in modern times, to navigate this Sea of Death. Having descended the Jordan in a little boat, he crossed to the peninsula of Lisan. For three days he had no fresh water, and he was carried to Jerusalem to die. No record of his journey has been found. In 1837 Moore and Beck had a light boat conveyed from Jaffa. They succeeded in visiting some points, and making a few experiments with boiling-water, which were the first to prove that the lake was below the level of the ocean. Ten years later, Lieutenant Molyneux, of the British navy, took a boat down the Jordan; visited the peninsula, and took some soundings. He was able to return to his ship, but died shortly afterwards. A brief record of his voyage is given in the Journal of the R. G. S. vol. xvii. The expedition of Lynch, in 1848, was the only one crowned with success, and was made with surprising skill, and as a matter of organization and strength of the party, and in part to the fact that it was undertaken at a comparatively cool season—April and May. Even this, however, was too late; several of the party took fever, and one—Lieutenant Dale—died. The unfortunate expeditions of Costigan and Molyneux were made in July and August respectively. Winter is the proper season for any such undertaking. Rain seldom falls on the shores; the air, during the depth of winter, is fresh and balmy, and cold is almost unknown.

Josephus gives a brief description of the Dead Sea (War, iv. 4); and several Greek and Roman authors, scientific as well as geographical, speak of its wonders. Extracts from the principal of these may be seen in Reland's Palæstina (p. 238-258). Among modern writers, the following may be consulted with advantage: Seetzen, in Zach's Monatliche Correspondenz, vol. xvii. xviii, xxiv, xxvi, 1827; Burnharm, Travels in Syria; Ibay and Macbride, Manual of the Dead Sea, 3d ed. London, Pal. and Spr., ii, 557-70; Poole, in Journal of the R. G. S. vol. xcvii. The books containing the fullest and latest accounts are: Robinson, Bib. Res., i, 501-523; ii, 187-192; and Physical Geogr. of Pal. p. 187-216; De Saulcy, Voyage autour de la Mer Morte, and Voyage en Terre-Sainte; and Ed. Jaubert, in Lettres et Memoires de l'Académie de Mont (1873); Lynch, Official Report, which contains Anderson's Geological Reconnaissance (published at the National Observatory, Washington, 1853); Ridgway, The Lord's Land, p. 344-464. There is an old monocell on the Dead Sea by Withmer, De Mariâ, in Helmh., i. 176; and a recent one by Fraas, Die tote Meer (Stuttg., 1867). See Dead Sea.

SALT, VALLEY OF (Heb. הנֵּבֶל, Neveh Melach, but twice with the article, הנֵּבֶל ה', Sept. ἐνεβέλε, τὸν ἐνεβέλεν, v. h. ἐνεβέλε, ἐνεβέλε; Vulg. Valtus Levelinum, but perhaps more accurately a "ravine," the Hebrew word ἥγγει appearing to bear that signification—in which occurred two memorable victories of the Israelitish arms.

1. That of David over the Edomites (2 Sam. xvii. 13; 1 Chron. xvii. 12). It appears to have immediately preceded the Edomite campaign, and was in all probability one of the incidents of the great Edomite war of extermination. The battle in the Valley of Salt appears to have been conducted by Abishai (1 Chron. xvii. 12), but David and Joab were both present in person at the battle and in the pursuit and campaign which followed: and Joab was left behind for six months to consummate the
doom of the conquered country (1 Kings xi, 15, 16; Psa. ix, title). The number of Edomites slain in the battle is uncertain: the narratives of Samuel and Chronicles both give it at 18,000, but this figure is lowered in the title of Psa. ix to 12,000. See David.

2. That of Amaziath (2 Kings xiv, 7; 2 Chron. xxv, 11), who is related to have slain 10,000 Edomites in this valley, and then to have proceeded with 10,000 prisoners to the north of the valley, the Elamites, i.e. Petra, and, after taking it, to have massacred them by hurling them down the precipice which gave its ancient name to the city. See Edom.

Neither of these notices affords any clue to the situation of the Valley of Salt, nor does the cursory mention of the name ("Gemtla" and "Mela") in the One superscription from Ugarit, unless it is in some other occasion. Reisen (ii, 556) was probably the first to suggest that it was the broad, open plain which lies at the lower end of the Dead Sea, and intervenes between the lake itself and the range of heights which crosses the valley at six or eight miles to the south. This view is taken (more decisively) by Dr. Robinson (Bib. Res., ii. 109). The plain is in fact the termination of the Ghor or valley through which the Jordan flows from the Lake of Tiberias to the Mediterranean. Its north-west corner is occupied by the Khashm Us-dum, a mountain of rock-salt, between which and the lake is an extensive salt marsh, while salt streams and brackish pools spread over the entire western half of the plain. Without presuming to contradict this suggestion, which yet can hardly be affirmed with safety in the very imperfect condition of our knowledge of the inaccessible regions south and south-east of the Dead Sea, it may be well to call attention to some considerations which seem to stand in the way of the implicit reception which most writers have given it since the publication of Dr. Robinson's Researches. (So Van de Velde, Memoir, p. 346; also Keil on 2 Kings xiv, 7.) See Sodom.

(a.) The word Gey (N2), employed for the place in question, is not elsewhere applied to a broad valley or sunk plain of the nature of the lower Ghor. Such tracts are denoted in the Scripture by the word Emek or Bikath, while Gey appears to be reserved for cliffs or ravines of a deeper and narrower character. See Valley. (b.) A priori, one would expect the tract in question to be called in Scripture by the peculiar uniformity applied to the more northern parts of the same valley, ha-Arakah, in the same manner that the Arabs now call it el-Ghor, "Ghor" being their equivalent for the Hebrew "Arakah." See Arakah.

(c.) The name "Salt," though at first sight conclusive, becomes less so on reflection. It does not follow, because the Hebrew word melakah signifies salt, that therefore the valley was salt. A case exactly parallel exists at el-Milh, the representative of the ancient Moladah, some sixteen miles south of Hebron. Like melakah, mith signifies salt; but there is no reason to believe that it existed there. And Dr. Robinson (Bib. Res., ii, 201, note) himself justlyadduces it as "an instance of the usual tendency of popular pronunciation to reduce foreign proper names to a significant form." Just as el-Milh is the Arabic representative of the Hebrew Moladah, so possibly was gey Melakah the Hebrew root of the Arabic Maghreb.

(d.) What little can be inferred from the narrative as to the situation of the Gey Melakah is in favor of its being nearer to Petra. Assuming Selah to be Petra (the chain of evidence for which is tolerably connected), it seems difficult to believe that a large body of prisoners should have been dragged upwards of fifty miles through the heart of a hostile and most difficult country merely for massacre. See Petra.

It would seem probable from the above considerations that the sacred writers do not refer to the Arabah, or great plain south of the Dead Sea, but rather to one or other of the passes leading from it, either up into Judah, on the one side, or Idum, on the other. Wady Zuweireh, a well-known pass at the northern end of the salt range of Usdum, might be the one meant, though the scope of the narrative would rather seem to locate it nearer Edom. Schwarz (Palest., p. 21, 22) fixes the valley at the same point, the south-west extremity of the Dead Sea, and thinks that Zoor is called the "City of Salt" in Josh. xvi, 62, because of the salt mountain near it. See Salt, City of.

Salter, Richard, D.D., a Congregational minister of New England, was born in Boston, Mass., in 1729. In due time he entered Harvard College, from which he graduated with honor, 1738. He studied and practiced medicine, but afterwards chose the ministry for his life work. He was settled in Manhattan, Conn., and ordained, June 27, 1744. Not long after Salter's settlement, a serious difficulty commenced in his church, in consequence of some of the members declaring in favor of the "Separatists" (q.v.), and the difficulty was protracted through several years. Peace was restored only after twenty-four of the members were expelled. He continued at this church until 1757, when his health perceptibly declined. In 1771 he was elected a fellow of Yale College, and was presented, 1782, by the same college with the degree of D.D. In 1781 he gave, by deed, a farm to Yale College "for encouraging and promoting the study of the Hebrew language, and other Oriental literature." He was twice married, but left no children. He preached the Connecticut Election Sermon (1768), which was published. He died in 1793. See Sprague, Annals of the Amer. Pulpit, i, 421 sq.

Salter, Samuel, D.D., a learned English divine, was born at Norwich, and educated at the free school of that city, at the Charter House, and at Benedict College, Cambridge, which he was elected a fellow. He became vicar of Bungay College, Li, guardian of the parochial and ecclesiastical endowments of the parish of St. Bartholomew the Less, London, 1756; and master of the Charter House, 1761. He died 1772. Several sermons of his were published (London, 1755, 1792). See Darling, Cyclopedia Biblical, s. v.

Saltmarsh, John, an Antinomian divine, was born in Yorkshire, England. He was educated at Magdalen College, Cambridge, became minister of Brasted, Kent, and chaplain in the army under Essex. He subsequently settled at Hiford, Essex, where he died in 1647. He published a number of works: The Smoke in the Temple (London, 1646, 4to) — Free Grace (ibid., 1645, 4to) — The Advocate for Liberty (ibid. 1646, 4to), and others. See Allibone, Diet. of Authors, s. v.

Saltzman, Friedrich Rudolph, an eminent, and once very popular, Protestant author, was born at Stralsburg, March 9, 1749. He studied in the gymnasium, and then in the University of Stralsburg. After his graduation in 1778, he journeyed through Italy and Germany, and then took charge of the education of the young Baron (afterwards Prussian minister) von Stein. Subsequently he lectured on history in Stralsburg, but without great success. He next edited a political paper, and thereby came into suspicion of aristocratic tendencies among the radicals and terrorists of the French Revolution. He was forced to flee and to live in disguise, and then took charge of the education of the young Baron. After the fall of Broussieres, he began the publication of a series of religious and mystical works, which made him many friends, and which enjoyed a very wide circulation. Among these publications were, Das christliche Erbauungabblatt, which was issued for
many years, from 1805 and on—Es wird Alles neu werden (1802-10), a work in seven instalments, consisting of essays upon, and extracts from, the chief mystics and theologians—Rusbroek, Tersteegen, Catherine of Siena, Meister Eckhart, Bonaventura, Brother James of the English Road, also Swedenborg, and Bromley:—On the Last Things (1806)—Glances at God's Dealings with Man from the Creation to the End of the World (1810), in which the author gives a survey of human history during the first six thousand years, and then, with the help of geology and astronomy, formulates the consumption of all things, which will be preceded by the millennium and terminated by the restoration of Paradise:—Religion der Bibel (1811), relating largely to the millennium:—Geist und Wahrheit (1816), a work much esteemed by Schubert, and treating of the so-called double-sense of Scripture. In all of these writings Salzmann manifests the highest reverence for the Bible and the most childlike faith in God. And yet, with all his Bible-study, he seems to find confirmation only for the views of the writers of the mystical school. But he is a mystic of the milder type; and he was entirely free from the "occult science" of a Böhme and a Schönherr. During his whole active career, Salzmann continued his political editorialship, and it was but his leisure moments that he gave to his theological studies. In his last years, when Schubert visited him in 1820, he had ceased all outward activity, and was patiently awaiting his call into his spirit-world. See La Revue d'Aixois, 1860; Herzog, Real-Encyklop. xiii, 337-341. (J. P. L.)

Sa'lu (Heb. Sala', נַלָע, weighed; Sept. Σελών v. Σελώει, a prince and head of a house among the children of Simeon; father of the Zimri who was slain by Phinehas for bringing the Midianitish woman into the camp of Israel (Num. xxv. 14; see ver. 7 sq.). B.C. ante 1618.

Sa'tum, a Greek form found in the Apocrypha of the Hebrew name Shallum (q.v.), a. (Σαλοὺμος v. Σαλοῦμος, 1 Esdr. viii. 1) the father of Hilkiah (Ezra v. 2); b. (Σαλοῦμος; i Esdr. v. 28) a temple "porter" (Ezra ii. 42).

Salus (health, prosperity, well-being), in some degree synonymous with the Greek Hgyia, in Roman mythology, was primarily the goddess of physical health, but afterwards also of the public weal or prosperity of the state. A temple was built in her honor after the conclusion of the Samnite war by C. Junius Bubulcus.

Salut, an evening office, which took its origin in Southern Europe (Spain and Italy), consisting of an exposition of the Sacrament, accompanied with chanting and a brilliant display of tapers. It varies in different churches; at Lyons it is followed by benediction, and in France generally is only used in a solemn form on the eve of great festivals. The Roman rite requires the sign of the cross to be made with the monstrose in silence; but in some parts of France the priest uses a form of benediction.

Salutation (from the Lat. salus, health, i.e. a wishing well; in the A. V. "salute" is the rendering of נַלָע, barak, to bless; נַלָע, shad, to inquire; but more properly of נַלָע, shalom, peace [q. v.]; in the N. T. of ἀμαρίαμω, to embrace], a term, which in the Bible, includes two classes or modes of address. These, however, were of course often used under various circumstances. See Courtesy.

The frequent allusion in Scripture to the customary salutations of the Jews invests the subject with a higher degree of interest than it might otherwise claim; and it is therefore fortunate that there are few scriptural topics which can be better understood by the help of the illustrations derivable from the existing usages of the East.

1. The forma of salutation that prevailed among the Hebrews, so far as can be collected from Scripture, are the following:

(1.) The salutation at meeting, consisted in early times, of various expressions of blessing, such as "God be gracious unto thee" (Gen. xliii. 29); "Blessed be thou of the Lord" (Ruth iii. 10; 1 Sam. xv. 13); "The Lord be with you," "The Lord bless thee" (Ruth ii. 4); "The blessing of the Lord be upon you; we bless you in the name of the Lord" (Psa. cxviii. 5). Hence the terms "blessed" received the secondary sense of "salute," and is occasionally so rendered in the A. V. (1 Sam. xiii. 10; xxv. 14; 2 Kings iv. 14; 25; 1 Kings viii. 6). Most of the expressions used in meeting, and also those which were used in parting, implied that the person who employed them interceded for the other. Hence the word נְלָע, barak, which originally signified "to bless," meant also "to salute" or "to welcome," and "to bid adieu" (Gen. xxviii. 8-11; Josh. xxii. 1). It had a phrase meaning "to salute" (Judg. xix. 20; Ruth ii. 4; 1 Sam. xxv. 6; 2 Sam. xx. 9; Psa. cxviii. 8). Hence the Hebrew term used in these instances נַלָע, shalom, has reference to general well-being, and distinctly answers to our "wellfare," as given in the text (Gen. xliii. 27; Exod. xvii. 7). It is used, not only in the case of salutation (in which sense it is frequently rendered "to salute," e.g. Judg. xviii. 15; 1 Sam. x. 4; 2 Kings x. 13), but also in other cases, where it was designed to soothe or to encourage a person (Gen. xliii. 23; Judg. vi. 28; xix. 20; 1 Chron. xii. 18; Dan. x. 19; comp. 1 Sam. xx. 21, where it is opposed to "hurt" 2 Sam. xvii. 28, "all is well," and 2 Sam. xi. 7, where it is applied to the progress of the war). The salutation at parting consisted originally of a simple blessing (Gen. xxiv. 60; xxviii. 11; xviii. 10; Josh. xxii. 6); but in later times the term shalom was introduced here also in the form "Go in peace," or, rather, "Farewell" (1 Sam. i. 17; xx. 42; 2 Sam. xv. 9). This was current at the time of our Saviour's ministry (Mark iii. 34; Luke vii. 50; Acts xvi. 36), and is adopt ed by him in his parting address to his disciples (John xiv. 27). It had been taken into a salutation on meeting, in such forms as "Peace be to this house" (Luke x. 5), "Peace be unto you" (Luke xxiv. 36; John xx. 19).

The more common salutation, however, at this period was borrowed from the Greeks, their word χαίρειν (to be jëñfél or in good health) being used both at meeting (Matt. xxv. 48; xxvii. 9; Luke i. 29), and probably also at departure. In modern times, the ordinary mode of address current in the East resembles the Hebrew:—Es selamo anejikim, "Peace be on you" (Lamb, Mod. Eng. ii. 7); and the term "salam" has been introduced into our own language to describe the Oriental salutation. Accordingly, we have the expression Xi'os, χαίρεις, Joy to thee! Joy to you! rendered by Halt! an equivalent of the Latin Ave! Salve! (Matt. xxvii. 29; xxviii. 9; Mark xv. 18; Luke i. 28; John xix. 3).

A still stronger form of this wish for the health of the person addressed was the expression "Live, my lord" (צְטַל תָּמוֹם), as a common salutation among the Phoenicians, and also in use among the Hebrews, but by them only addressed to their kings in the extended form of "Live, thy servant the king" (Gen. xxxv. 4), which was also employed in the Babylonian and Persian courts (Dn. iv. 4; iii. 9; v. 10; vi. 6, 21; Neh. ii. 3). This, which in fact is no more than a wish for a prolonged and prosperous life, has a parallel in the customs of most nations, and does not differ from the "Vi-
Oriental Salutation by Bowing or Prostration to a Superior.

(2.) The gestures and inflections used in salutation varied with the dignity and station of the person saluted, as is the case with the Orientals at this day. See Attitude. The obeisance with which this is accompanied varies according to the degree of respect designed to be shown to the person addressed, and this rises nearly according to the following scale: 1. Placing the right hand upon the breast; 2. Touching the lips and the forehead or turban (or the forehead and turban only) with the right hand; 3. Doing the same, but slightly inclining the head during the action; 4. The same as the preceding, but inclining the body also; 5. Still the same, with the addition of previously touching the ground with the right hand; 6. Kissing the hand of the person to whom obeisance is paid; 7. Kissing his sleeve; 8. Kissing the skirt of his clothing; 9. Kissing his feet; and 10. Kissing the carpet or ground before him. Persons distinguished by rank, wealth, or learning are saluted by many of the shopkeepers and passengers as they pass through the streets and market-places of Eastern cities, and are, besides, often greeted with a short ejaculatory prayer for the continuance of their life and happiness. Such were "the salutations and greetings in the market-place" of which the scribes were so extravagantly fond (see Mark xii, 28). When a very great man rides through the streets, most of the shopmen rise to him and pay their respects to him by inclining the head and touching the lips and forehead or turban with the right hand. It is usual for the person who returns the salutation to place at the same time his right hand upon his breast, or to touch his lips, and then his forehead or turban with the same hand. This latter mode, which is the most respectful, is often performed to a person of superior rank, not only with the salam, but also frequently during a conversation. In some cases the body is gently inclined, while the right hand is laid upon the left breast. A person of the lower orders in addressing a superior does not always give the salam, but shows his respect to high rank by bowing down his hand to the ground, and then putting it to his lips and forehead. See Bowing.

It is a common custom for a man to kiss the hand of his superior instead of his own (generally on the back only), but sometimes on both back and front, and then to put it to his forehead in order to pay more particular respect. Servants thus evince their respect towards their masters. Those residing in the East find their own servants always doing this on such little occasions as arise beyond the usage of their ordinary service; as on receiving a present, or on returning fresh from the public baths. The son also kisses the hand of his father, and the wife that of her husband. Very often, however, the superior does not allow this, but only touches the hand extended to take his, whereupon the other puts the hand that has been touched to his own lips and forehead. The custom of kissing the
beard is still preserved, and follows the first and preliminary gesture; it usually takes place on meeting after an absence of some duration, and not as an everyday compliment. In this case the person who gives the kiss lays the right hand under the beard, and raises it to his lips, or rather supports it while it receives his kiss. This custom strikingly illustrates 2 Sam. xx, 9. In Arabia Petraea and some other parts it is more usual for persons to lay the right sides of their cheeks together. These acts involved the necessity of dismounting in case a person were riding or driving (Gen. xxiv, 64; 1 Sam. xxxv, 29; 2 Kings v, 21). The same custom still prevails in the East (Niebuhr, Descript, p. 39). Among the Persians, persons in saluting often kiss each other on the lips; but if one of the individuals is of high rank, the kiss is given on the cheek instead of the lips. This seems to illustrate 2 Sam. xx, 9; Gen. xxxix, 11, 13; xxxiii, 4; xlvi, 10-12; Exod. iv, 27; xviii, 7. See Kiss.

Oriental Salutation by Kneeling and Kissing the Hand to a Sovereign.

Another mode of salutation is usual among friends on meeting after a journey. Joining their right hands together, each of them compliments the other upon his safety, and expresses his wishes for his welfare by repeating, alternately, many times the words selamat (meaning, “I congratulate you on your safety”) and nurubin (“I hope you are well”). In commencing this ceremony, which is often continued for nearly a minute before they proceed to make any particular inquiries, they join their hands in the same manner as is usually practiced by us; and at each alternation of the two expressions change the position of the hands. These circumstances further illustrate such passages as 2 Kings iv, 19; Luke x, 4. See HAND.

I. The epistolary salutations in the period subsequent to the Old Test. were framed on the model of the Latin style: the addition of the term “peace” may, however, be regarded as a vestige of the old Hebrew form (2 Macc. i, 1). The writer placed his own name first, and then that of the person whom he saluted; it was only in special cases that this order was reversed (2 Macc. i, 1; ix, 19; 1 Esdr. vi, 7). A combination of the first and third persons in the terms of the salutation was not infrequent (Gal. i, 1, 2; Phil. i, 1; 2 Pet. i, 1). The term used (either expressed or understood) in the introductory salutation was the Greek χαιρετις in an elliptical construction (1 Macc. x, 18; 2 Macc. ix, 19; 1 Esdr. viii, 9; Acts xxiii, 26); this, however, was more frequently omitted, and the only apostolic passages in which it occurs are Acts xx, 20 and James i, 1, 4, a coincidence which renders it probable that James composed the letter in the former passage. A form of prayer for spiritual mercies was also used, consisting generally of the terms “grace and peace,” but in the three pastoral epistles and in 2 John “grace, mercy, and peace,” and in Jude “mercy, peace, and love.” The concluding salutation consisted occasionally of a translation of the Latin vale (Acts xx, 29; xxiii, 30), but more generally of the term στολαγομαι, “I salute,” or the cognate substantive, accompanied by a prayer for peace or grace. Paul, who availed himself of an amanuensis (Rom. xvi, 22), added the salutation with his own hand (1 Cor. xvi, 20; Col. iv, 18; 2 Thes. iii, 17). The omission of the introductory salutation in the Epistle to the Hebrews is very noticeable. There are Latin monographs on the subject in general by Mayer (Gyroph. 1708), Allgor- ber (Ulm, 1728), Schmerschel (Jena, 1739), Heyrenbach (Viam. 1778), and Purmann (Frankf.-on-the-Main, 1749). See EPITLE.

II. SALUTATION, RITUAL. In the Roman Church, the words ad angelum to Mary are called the Angelic Salutation. The latter clause, “Santissima Maria, mater Dei, ora pro nobis peccatoribus,” was added, they tell us, in the fifth century; but the last words, “Nunc et in hora mortis nostrae,” were inserted by order of pope Pius V. It is sometimes repeated at the beginning of a sermon, ending with a prayer or a pro nobis, and bells are tolled to put people in mind of it. See SALVE REGINA.

In the Church-of-England service a species of salutation occurs. “Having all repeated our Creed, ... we now prepare ourselves to pray. And since salutations have ever been the expressions and badges of that mutual charity without which we are not fit to pray, therefore we begin with an ancient form of salutation, taken out of the Holy Scripture; the minister commencing, salutes the people with ‘The Lord be with you,’ and they return it with a like prayer, ‘And with thy Spirit.’”

Salutatorium (place of salutation), a room connected with an ancient church, where the bishop and clergy sat to receive the salutations of the people as they came to solicit prayers on their behalf or to consult them about important business.

Salvation (properly ἔλευσις, σωτηρία, both meaning originally deliveryance or safety). No idea was more ingrained in the Jewish mind than the truth that God
SAVATION was a Saviour, a Helper, a Deliverer, a Rescuer, a Defender, and a Preserver to his people. Their whole history was a history of salvation, and an unfolding of the nature and purposes of the Divine Being. Israel was a saved people (Deut. xxxiii, 29); saved from Egypt (Exod. xiv, 30), delivered from enemies on every side, preserved in prosperity, and restored from adversity— all by that One Person whom they had been taught to call Jehovah. Though human instruments were constant as, for instance, the judges, the priests, the people were always taught that it was God who saved by their hand (2 Sam. iii, 18; 2 Kings xii, 5; xiv, 27; Neh. ix, 27), and that there was not power in man to be his own savior (Job xl, 14; Psa. xxxiii, 16; xlvii, 5, 7), so that he must look to God alone for help (Isa. xlii, 11; xlv, 22; Hos. xi, 4, 10). This the Scriptures express in varied forms, usually in phrases, in which the Hebrews rarely use concrete terms, as they are called, but often abstract terms. Thus, instead of saying, God saves them and protects them, they say, God is their salvation. So, a voice of salvation, tidings of salvation, a word of salvation, etc., is equivalent to a voice declaring deliverance. Similarly, the great salvation in Israel signified to deliver Israel from some imminent danger, to obtain a great victory over enemies. Most of these phrases explain themselves, while others are of nearly equal facility of apprehension, e.g. the application of "the cup of salvation" to gratification and joy for deliverance (Psa. cxvi, 10); the "rock of salvation" to a refuge and a salvation in safety (2 Sam. xxii, 47); "the shield of salvation" and "helmet of salvation" to protection from the attack of an enemy (Psa. cvii, 35; Isa. lxx, 17); the "horn of salvation" to the power by which deliverance is effected (Psa. cviii, 9); "the garments of salvation" to the beauty and protection of holiness (Isa. xxxi, 10); the "wells of salvation" to the abundant sources of the mercies of salvation, free, overflowing, and refreshing (Isa. xii, 3). See each of these associated terms in its alphabetical place.

When we come to inquire into the nature of this salvation thus drawn from God, and the conditions on which it was granted during the Old-Test. dispensation, we learn that it implied every kind of assistance for body and soul, and that it was freely offered to God's people (Psa. xxviii, 9; lxix, 35); to the needy (Psa. lxxiii, 4, 13), to the meek (Psa. lxvii, 9), to the contrite (Psa. xxviii, 18), but not to the wicked (Psa. xlvii, 41) unless they repented and turned to him. Salvation comes out of the mouth of the enemy, and from the snares of the wicked (Psa. xxxvi, 40; lx, 2; cxi, 20), but also of forgiveness (Psa. lxxxi, 9), of an answer to prayer (Psa. lxix, 13), of spiritual gifts (Psa. lxviii, 19), of joy (Psa. li, 12), and of truth (Psa. xxxv, 9), and of righteousness (Psa. xxiv, 5; Isa. xiv, 8; xvi, 15; li, 6). Many of the beautiful promises in Isaiah refer to an everlasting and spiritual salvation, and God described himself as coming to earth to bring salvation to his people (Isa. xlii, 11; Zech. ix, 9). Thus was the way prepared for the coming of him who was to be called Jesus, because he should save his people from their sins. See SALVATION, infant.

"In the New Testament the spiritual idea of salvation strongly predominates, though the idea of temporal deliverance occasionally appears. Perhaps the word 'restoration' most clearly represents the great truth of the Gospel. The Son of God came to a lost world to restore those who would commit themselves unto him to live in harmony with God which they had lost by sin. He appeared among men as the Restorer. Disease, hunger, mourning, and spiritual depression fled from before him. All the sufferings to which the human race is subject were overcome by him. Death itself, the last enemy, was vanquished; and in his own resurrection he triumphed to all eternity. It is plain that God's purpose of bringing many sons unto glory was yet to be carried out. During his lifetime Jesus Christ was especially a healer and restorer of the body, and his missionings were confined to the lost sheep of the house of Israel; but by his death for the sins of the whole world, and by his subsequent resurrection and exaltation, he was enabled to fulfill the mission for which he had taken upon nature. He became generally the Saviour of the lost. All who come to him are brought by him to God; they have spiritual life, forgiveness, and peace, and they are adopted into the family of God. Their bodies are made temples of the Holy Ghost; but whose inworing power Christ is formed within them. Their hearts, being purified by faith in him as the Son of God, they receive from him the gifts and graces of God, and thus they have an earnest of the final inheritance, the complete restoration, which is the object of every Christian's hope. If it be asked when a man is saved, the answer is that the new life which is implanted by faith in Christ is salvation in the germ, so that every believer is a saved man. But during the whole Christian life salvation is worked out, in proportion to our faith, which is the connecting link between the Saviour and the saved—the vine and the branches. Salvation in its completion is 'ready to be revealed' in the day of Christ's appearing, when he who is our justifying Christ shall be saved from wrath through him, and when there shall be that complete restoration of body and soul which shall make us fit to dwell with God as his children for evermore." See SAVIOR.

SAVATION, infant. See Infant Salvation.

Salve. See Medicine; Unguent.

Salvē, caput cruentatum, is the beginning of one of Bernard's seven passion-hymns. The original, in fifty lines, in five stanzas, addressed to the face of Christ ("Ad faciem Christi", in cruce pendente), is the best of the seven passion-hymns, and runs thus in the first stanza:

"Salve, caput cruentatum, Totum spinis coronatum, Conquisassatum, vulneratum, Animum meum et ceterum. Facie spuita illita. Salve, cujus dulcis vultus Immutatus et inculturatus. Immunitat summ florem, Totus versus in palorem, Quem coeli transit cura."  

There are different English renderings of this hymn, as by Mrs. Charles, Christian Life in Song, p. 159: "Hail, thou Head! so bruised and wounded," which is also found in Schaff's Christ in Song; by Alford in the Year of Praise, No. 102: "Hail! that Head with sorrows bowing;" by Baker, in Hymns, Ancient and Modern, No. 57: "O Sacred Head, surrounded." There are a number of German translations, but the best is that by Gerhardt: "O Haupt voll Blut und Wunden," which again has been translated into English by Alexander and others. (B. P.)

Salvē, festa dies, totus venerabilis sev, is the beginning of a resurrection-hymn by Venantius Fortunatus. "In this sweet poem, the whole nature, born anew in the spring, and arrayed in the bridal garments of hope and promise, welcomes the risen Saviour, the Prince of spiritual and eternal life." The original, as given by Daniel (i, 170), has fourteen stanzas, of three lines each. Trench gives only ten lines, and so likewise Büssler, Rambach, and Simrock in their collections. Daniel remarks, "Ex hoc suavissime posita ecclesia deorum ecclesiis sibi vindicata est qui efferunt canicum triumphiem Paschatis." We give the first stanza:

"Salve, festa dies, totus venerabilis sev, Quis Deus infernii victi et astra tenet. Salvē, festa dies, totus venerabilis sev."  

There are different English renderings, as by Mrs. Charles, Christian Life in Song, p. 136: "Hail, festival day! ever exalted high;" in Lyra Eucharistica, p. 16; "Hail, festival day! for evermore adored;" in Schaff's Christ in Song, p. 285: "Hail, Day of Days! in peals of
Salve Jesu, summe bonus, is the beginning of one of St. Bernard's passion-hymns, and is addressed to the side of Christ. It has been translated into English by Thompson in Lyra Mssicanica, p. 289: "Jesus, sanctissimam Geos humiliter. On the branches of the Rod, Bow thy limbs, all anguish-worn, Bitterly were searched and torn. Thou that but too gracious art!"

Salve Regina (Hail, O Queen, i.e. Virgin Mary) is the name of an antiphon long in use in the Roman Catholic Church. Composer and date are unknown, though it is attributed to either Peter, bishop of Compostella in the 10th century, or to Hermannus Contractus, a Benedictine in the 11th. The Chronicles of Spire states that St. Bernard, when at Spire in the capacity of apostolical delegate, added the closing words, "O clemens, O pia, O dulcis Virgo Maria!" by which it received its present form (Chronica de Urbe Spiritualis, lib. xii.). Pope Gregory directed, in 1239, that it be recited in churches on the day of death of the pope, but in modern usage, it is employed during the interval between Trinity and Advent Sundays; and it also forms a part of the usual private devotions of believers, especially on Saturdays. In many dioceses the ritual in use directs the recitation of the Salve Regina at funerals, after the burial-service. Salve Regina is a view to supplement the maternal intercession of the Blessed Virgin for the souls in purgatory. St. Bernard discusses the subject—matter of this antiphon in his works, laying special emphasis on the mercy and power of Mary as here set forth (Opera [Antw. 1616], p. 1756, k v.).

Salve, flores martyrum, is the beginning of the famous hymn written by Prudentius of Spain (q.v.), and which is used in the Latin Church on Innocents' Day, the second day after Christmas. This hymn, of which the first stanza runs thus, "Salve, flores martyrum, Quos Incus Ipse in Limine Christi insequent suavitatis, Cen turbo nascente ruere;' has been translated into English by Chandler, Hymns of the Praying Church, 2nd ed., 1876. (q.v.) In modern usages, it is employed during the interval between Trinity and Advent Sundays; and it also forms a part of the usual private devotions of believers, especially on Saturdays. In many dioceses the ritual in use directs the recitation of the Salve Regina at funerals, after the burial-service. Salve Regina is a view to supplement the maternal intercession of the Blessed Virgin for the souls in purgatory. St. Bernard discusses the subject—matter of this antiphon in his works, laying special emphasis on the mercy and power of Mary as here set forth ( opera [Antw. 1616], p. 1756, k v.).

Salve mundi salutare, another of these passion-hymns, is addressed to the pierced feet of Christ, the original of which is given in Trench, Sacred Latin Poetry, p. 137, while Mrs. Charles, in Christian Life in Song, p. 161, has given an English rendering, "All the world's salvation, hail!" to which we may add another translation by H. S. Thompson in Lyra Messianica, p. 288, "Hail! O hail! high King of Saints;" which also rendered that part addressed to the hands, and commencing, "Salve, salve, Jesu bone," in Lyra Messianica, p. 301, "Hail! O Jesu, kind and good." (B.P.)

Salvi, Giovanni Battista, an Italian painter of the school born, was July 11, 1605. He studied at Venice, then went to Rome and Naples. In the latter city he became a pupil of Domenichino, whom he resembled in many respects. Salvi died Aug. 8, 1685.

Salvi, Nicolo, an Italian architect, was born, in 1599, at Rome. He was of wealthy parentage; and, having received a brilliant education, he applied himself in turn to poetry, mathematics, philosophy, and even medicine, but finally decided upon architecture, which had always been his favorite study. His master, Canaletto, leaving Rome, Salvi was left in charge of many important works. He designed several beautiful altars and constructed villas; but the work of his whole life was the church of St. Peter, which was commenced by order of Clement XII and finished under Benedict XIV. He died at Rome in 1751.

Salvianus, an elegant ecclesiastical writer of the 6th century, was born in the neighborhood of Trieres. Whether reared as a Christian is uncertain; but shortly after his marriage with Palladia, a pagan lady of Cologne, they both appear as earnest Christians. After the birth of a daughter, he joined his wife in making a vow of monastic chastity. He now removed to the south of France, and acted as presbyter of the Church at Marseille. Here he stood in close relations with bishop Eucherius of Lyons, to whose see he gave instruction. The period of his death is uncertain, but he lived at least until 490, for Gennadius wrote of him in 490-495, "Vivit usque hodie senectuta bona." Salvianus was a prolific author. Besides various treatises which have perished, the following are still extant: "Adversus Aquitaniam Libri IV ad Ecclesiam Catholicaem" (about 440 [it was printed by Sichardus, at Basle, in 1528; its object was to induce the laity to greater liberality to the Church]); "De gubernatione Dei et de Justo Prudentiae Judicio" (451-455 [it was printed by Frobenius, Basle, 1580; it was written at the time of the ravages of the Northern barbarians, and was designed, like the Civitates Dei of Augustine, to remove the doubts against the providence of God to which those calamities had given rise]); "Epistola IX", which had been addressed to friends on various familiar topics. These letters were first printed, with the author's collective works, in 1580. The collective works of Salvianus have been edited by J. P. L. (Paris, 1580, 8vo.), by Rittershusius (Altdorf, 1611), and by Balusius (ibid. 1609-18-84). See Heyne, Opuscula Academica, vol. vii; Smith, Dict. of Bio. and Myth., iii, 700, 701; Herzog, Real-Encycl. xiii, 342, 343. (J. P. L.)

Salviati, Alamanno, an Italian cardinal, was born at Florence, April 29, 1668. He was prothonotary of the Holy See and first vice-legate of Avignon, and in 1717 was made legate of Urbino, which charge he held till he was created cardinal in 1730. He died at Rome, Feb. 24, 1738. This prelate was the author of a dedication epistle addressed to the grand-duke Jean Gaston, and which is at the beginning of the Vocabolario of the Academy of Crusa.

Salviati, Antonio Maria, an Italian cardinal, nephew of Lorenzo and Giovanni, was born 1590. In 1561 he became bishop of Saint-Papoul, a diocese which had been held by his two uncles; but he relinquished it in 1563, and was sent by Pius IV as ambassador to the court of France. Gregory XIII also employed him in various capacities, and in 1580 invested him with the purple. Salviati was made legate at Bologna, and, on account of his virtues, was called the great cardinal Salviati. He died at Rome, April 28, 1602.

Salviati, Bernardo, an Italian cardinal of the same family as the preceding, was born at Florence in 1492. As a knight of St. John of Jerusalem he took part in several Holy Land expeditions; and was made archbishop of Pisa, and reached the rank of general of the galleys. He undertook a campaign in the Peloponnesus when the island of Rhodes was in the hands of Soliman; he
laid Tripoli in ruins, destroyed the forts along the canal of Fagiera, besieged and took Cordon, in the Morea, and ravaged the island of Scio. Thus in a short time his name became a terror to the Turks. Being sent to Barcelona, to Charles V., he pleaded with for the liberty of his country, then torn by revolutions. Having gone to the court of France, he followed the advice of his relative, Catherine de' Medici, entered in ecclesiastical life, and was made almoner of the queen. In 1549 Salviati became bishop of St-Piopoul, and in the request of Catherine de' Medici, received from Pius IV the cardinal's hat, together with the bishopric of Clermont. He died at Rome, May 6, 1568.

Salviati, Francesco Rossi de' (called Cecchino de' Salviatii), an Italian painter, was born in Florence in 1510. He was taught by his father, Filippo Rossi, but afterwards became a pupil of Buonarotti, and frequented the studies of the artists Rafael da Brescia and Andrea del Sarto. After he had gained some reputation, he was called to Rome by cardinal Giovanni Salviati, who became his patron, and whose name he took. He died at Rome in 1565. In his frescoes, Salviati shows a richness of invention and purity of drawing which made him justly celebrated. His paintings are to be found in many of the principal cities of Europe. In the Louvre are a Holy Family, a Visitatio, and The Unbelief of Thomas.

Salviati, Giovanni, an Italian cardinal, was born at Florence, March 24, 1490. He became cardinal in 1517, then administrator of the Church at Fermo, and, in 1529, bishop of Orvieto. His cousin Clement VII sent him to quiet the troubles in Parma, and also, in 1526, on a mission to Charles V. at Madrid, to solicit the release of Francis I and the recall of the imperial troops which had invaded the Papal States. Not being able to prevent the sack of Rome by the soldiers of the consuls de Bourbon, Salviati went to implore the aid of the king of France in favor of the Holy See. By his mediation the treaty of the Holy League was signed. May 29, 1527, between Clement VII, Francis I, and Henry VIII; and, in spite of many obstacles, he also brought about a peace between Charles V and the Holy See. From Francis I he received, in 1520, the diocese of Oleron, and the bishopric of Saintes, that is, besides several rich abbeys. In 1543 he became bishop of Albanon, and in 1546 of Porto. The home of Salviati at Rome was the resort of men of genius, who always found in him a generous patron. He died at Ravenna, Oct. 28, 1553.

Salvini, Salvino, an Italian scholar, was born in 1567, at Florence. He was educated at Pisa and gave himself to the study of belles-lettres and the antiquities of his country. He was canon of the cathedral of Florence, and member of several literary associations. He died at Florence, Nov. 29, 1751. His works were numerous, but not of a religious character, as Ponti Consolari dell' Accademia Fiorentina.

Salzburgers, the, is a term applied in Protestant history to the evangelical inhabitants of the duchy of Salzburg, who, after ages of persecution, finally, in 1731-32, gave up their property and homes, and found refuge in Eastern Prussia. Salzburg, in the Middle Ages, was a powerful archbishopric, and its archbishop the most important prelate of Germany. It lay in the mountainous west of Austria. It was Christianized by St. Rupert in the 6th century. The doctrines of Huss early obtained a footing, but the severe measures of archbishop Eberhard III in 1420 suppressed them, though it is probable that the good leisure still worked secretly in many hearts; for at the first dawn of the Reformation Salzburg warmly welcomed it, and many of its priests began to teach as Luther. Eminent among these was the venerable friend of Luther, Dr. Staupitz, who, in 1518, became the court preacher of the ducal archbishop of Salzburg. In 1520, however, he was silenced by the archbishop. Another eminent evangelical priest was Paul Sporerus, who was driven to banishment. Another, the most famous, was John Agricola, also a court preacher; after three years of imprisonment he escaped (1524), and became a pastor at Augsburg. A fourth was George Schärer, who was actually put to death for his earnest preaching of the Gospel. In 1538 archbishop Dietrich issued a decree that all the priests, who had within a month either become Catholics or leave the duchy. As the most of them chose the latter, another decree was issued confiscating their lands. Under his successor a similar measure was executed in 1614. During the whole period of the Thirty-years' War (1618-48), Salzburg was relatively quiet, and actually increased in material prosperity, while disorder and ruin prevailed elsewhere. But a tolerant archbishop was a rare exception. Accordingly the harsh measures broke out afresh under Gandolf in 1685. This was occasioned by the discovery of a rural parish which was wholly Lutheran, save that occasionally it held a public mass. All the church books of this parish were destroyed on being gathered up and burned, and the single choice offered of submission to Rome or exile, with loss of property and children. More than a thousand persons saw themselves forced in midwinter to leave their homes and children. Earnest remonstrances were made by Prussia and other Protestant powers against this direct violation of the provisions of the Peace of Westphalia. While this diplomatic correspondence was taking place, the archbishop died (1686). Under his two successors there was less persecution, and the Lutheran-minded among the inhabitants practiced more caution, concealing their Bibles and other books in the mountains, and resorting to secret places in the night and celebrating their simple worship, armed with axes, and with outstanding guards. But the final storm came at last, when the mischievous and ambitious Leopold Anton became archbishop (1728). This man was anxious for two things—to stand in high favor at Rome, and to fill his treasury. Both objects he might be reached by a severe course against all open or secret heresy. Accordingly he flooded his land with Jesuit spies. All heretics were at once arrested and cast into prison, and tormented with hunger and tortures. Meantime a few of the chief non-Catholics fled secretly to Ratisbon and to Prussia, in hopes of effecting forcible intervention on their behalf. The new archbishop favorably welcomed the friendly letter of William I of Prussia, and were promised homes and protection for all who should be forced to abandon their country. But before their return the archbishop had resorted to a more extreme measure. The nonconformity of the non-Catholics was represented to Austria as rebellion, and from 4000 to 6000 troops were obtained, and then quartered on the persecuted Lutherans; and then, in order to terrify the rest into submission, some 800 of the most prominent members were violently arrested, and required within eight days to leave the country. But the effect was the contrary of what had been expected: they were driven more securely and resolutely to combine the whole body of non-Catholics with a like enthusiasm. In December, 1731, they crossed the Bavarian frontier. A few days later another company of 500 followed them. By April, 1732, the number of the exiles had reached more than 14,000; and some of the best districts were almost desolated. The sole substantial help was given by the Swedish king, who sent a detachment to Augsburg in February, 1732, requiring his officers to furnish them with money to make their journey, acknowledging them as Prussian subjects, pledging his government to see that recompense should be made for their lands, and threatening to confiscate Catholic property in his own dominions, if this archbishop did not proceed with more moderation. Denmark, Sweden, and Holland made similar remonstrances and threats in their behalf.
At the suggestion of George II of England a collection was taken up for the sufferers throughout Protestant- 
dom. It amounted to some 900,000 florins. The place of 
refuge chosen was the castle of Stettin in Prusia- 
mania. The course of their march through Nuremberg, 
Erlangen, Leipsic, Halle, Wittenberg, Magdeburg, Pots-
dam, and Berlin was almost like a triumphal procession, 
so great was the sympathy which their long-endured 
sufferings had everywhere excited. At Potsdam the 
old king, Frederick William, received them into the 
 palace gardens; and with the queen, mingled among 
them very familiarly, asking them questions in regard 
to their faith, and giving them advice for the future. 
He was highly gratified with them, gave them money, 
and, assuring them that he would treat them in the 
best possible manner, bade them a hearty goodspeed. 
From Berlin the exiles took their way to Stettin, where 
they took ship and sailed to Königsberg. Thence they 
marched by land to Lithuania, where wild lands awaited 
them, and which their industry speedily transformed 
to a flourishing colony of towns and farm-houses. 

The number who positively settled there was over 
20,000. They commercially welcomed the Lutheran pas-
tors who were furnished to them at Berlin. The several 
millions of thalers which the king spent upon them 
proven no less a wise commercial investment than had 
been the case with the help given to the banished 
Fuhrman's by his grandfather, the great elector.

We are not rich enough to record the persecu-
tions of these Salzburgers, the persecuting archbishop 
was foiled in his real, sole purpose. Instead of filling 
his treasury, he actually emptied it. It was only im-
perfectly that he could supply his deserted fields and 
mines with new laborers; and those whom he did ob-
tain were, many of them, indolent and mendicant. 
In addition, there came upon him a debt of 11,000,000 flor-
ins for the Austrian troops which he had employed to 
oppress and expel his subjects. The results were an 
impoverished land and a heavier taxation upon the re-
maining Catholics, while the emigrants were entirely 
freed from all imposts and taxes for full ten years. Also 
other lands profited so richly from this persecution. 
Württem-
berg, Holland, Sweden, Russia, England, and America 
(Georgia) received large numbers of the exiles; so that 
the number actually lost to Salzburg by the folly of 
archbishop Anton was over 30,000. Since this era of 
prosperity the place has held a much less prominent 
place in European history. The territory was secular-
ized in 1802. In 1815 the most of it was given to Aus-

tria. In 1849 it became a separate crown-land of Aus-
tria. See Göckel, Emigrationsgeschichte von Salz-
burg (Leips. 1874); Passe, Geschichte der Auswanderung 
der Salzburger (Innsbr., 1887); Herzog, Real-
Encyklop. xiii, 346-359. (J. P. L.)

SAM, Conrad, known in German history as the 
"Reformer of Ulm," was born at Rothenacker in 1488. 
He studied Latin at Ulm, and in 1498 matriculated at 
Tübingen. In 1520 he was preacher at Brackenheim, 
near Heilbronn, and thoroughly devoted to the Refor-
mation. Luther corresponded with him, and sent to 
him regularly his publications. Copies still exist with 
Luther's autograph: "An den Sam, Pf. zu Brackenheim, 
M. Luther, Dr." In 1524 he was driven away from 
Brackenheim, but found protection in Ulm, and an open 
door to preach the new doctrines. Here his labors 
succeeded in the complete victory of Protestantism. 
His stentorian voice, his popular style and wit, filled the 
great cathedral with the eager populace. But soon 
great trials began. The exarchistic strike broke out. 
Sam gradually turned from Luther's views to the sim-
pler and more radical doctrine of Anabapti, with whom, 
as also with Zwingli and Calvin, he entered into close 
correspondence. After many struggles, the local authorities of Ulm were brought to consent to a 
formal reformation of Church rites and doctrine. The 
mass was abolished, images removed, cloisters closed, 
and the Zwinglian doctrines accepted. But victory, 
after seven years of valiant contest, was in its results 
for Sam fully as serious and full of danger as had been 
the open contest. So soon as the crown of victory was 
gained, the religion cooled off; attendance on the sermons declined; vice reigned among the 
high and low; the duties of Sam taxed his powers to 
the utmost; and, worse than all, the zeal of the 
oppressed party burst forth with new life. Romanists 
rocked out to every neighboring village to join in their 
old rites; and High Lutherans labored in the same di-
rection. In 1528 the last hope of the conspicuous 
peace began to break down. Twice he rose from his sick-bed 
to proclaim the Gospel afresh. It was too much. On 
June 20 he rested from his labors. See Keim, Reform. 
der Reichsstadt Ulm (1851); Herzog, Real-Encyklop. xx, 670-682. (J. P. L.)

Sám'æl (Σαμαίλι v. r. Σαλαμί), a corrupt form 
(Judith viii, 1) of the Heb. name (Num. i, 6) SHELA-
MIEL (q. v.).

Sam'ăi'as (Σαμαίας, but v. r. in Tobit Σαμίας, Σε-
μιας, etc.), a Grecized form for the name SHELEMIAH 
(q. v.): a. a Levite (1 Esdr. i, 9), in the reign of Josiah 
(2 Chron. xxxv, 9); b. an Israelite (1 Esdr. viii, 39) of 
the "sons of Adonikam (Ezra viii, 13); c. a "great 
personage, father of SAMAINAS and Jonathas (Tobit 
v, 13).

Samaneans, in Chinese mythology, are an order 
of saints who are given to self-contemplation. Fo, or 
Fohi, teaches that the essence of all things consists in 
the nothing and the vacuum, and that men return into 
the nothing, there first to attain to blesness. The 
Samaneans occupy the last stage in the progress to-
wards this nihilistic blessedness. He who has 
advanced to this stage need no longer worship the 
gods; he is delivered from his passions, lives in a 
state of constant self-contemplation, and dies only 
that he may be incorporated with the great soul of 
the world.

Samānēra is the name given to a novice among 
the Buddhists. It is derived from samamam, an 
ascetic. He must at least eight years of age, 
and must have received the consent of his parents to his 
abandonment of the world. He cannot receive ordi-
nation until he is twenty years of age, nor before he 
has reached that age can he perform any religious rite, 
nor is he allowed to interfere in matters of discipline 
or government. The vow of a Samānēra is in no case 
revocable.

Samā'ria [strictly Samari'a], CITY OF (Heb. 
Shomeror, שומרון, watch), so called probably from its 
commanding site, as well as by alliteration with its 
owner's name; Chald. Shomorann, שומרון, 
Ezra iv, 10, 17; Sept., New Test., and Josephus, usually 
Samiruma, as PoLomyr; but some copies of the Sept. 
often have Samira, and occasionally Samymun or 
Samymon; and Josephus once [Ant. viii, 12, 13] Samymour. 
An important place in Central Palestine, famous as the 
capital of the Northern Kingdom, and later as giving 
am name to a region of the country and to a schematic 
sect. Its boundaries, however, seem never to have 
been very definitely fixed. See ISRAEL, KINGDOM OF 
OF.

I. History.—The hill of the same name, which the 
city occupied, was purchased for two talents of silver 
from the owner, Shemher (q. v.), after whom the city was 
named (1 Kings xvi, 23, 24), by Omri (q. v.), king of 
Israel, for the foundation of his new metropolis, B.C. 
cir. 925. The first capital after the secession of the ten 
tribes has been sought for itself, whether all Israel had 
come to make Rehoboth-kamin. On the other hand, 
being fully accomplished, Jeroboam rebuilt that city (1 
Kings xii, 25), which had been razed to the ground by 
Abimelech (Judg. ix, 46). But he soon moved to 
Tirzah, a place, as Dr. Stanley observes, of great and pro-
verbial beauty (Cant. vi, 4), which continued to be the
SAMARIA 278 SAMARIA

royal residence until Zimri burned the palace and perished in its ruins (1 Kings xiv, 17; xv, 21, 33; xvi, 6–18). Omri, who prevailed in the kingdom that ensued, after "reigning six years" there, transferred his court and government to a new site, being under the necessity of reconstructing somewhere, and doubtless influenced by the natural advantages of the position, and desirous of commemorating his dynasty by a change of capital. Samaria, as the metropolis of Israel for the remaining two centuries of that kingdom's existence. During all this time it was the seat of idolatry, and is often as such denounced by the prophets (Isa. ix, 8; Jer. xxiii, 13, 14; Ezek. xvi, 46–55; Amos vi, 1; Mic. i, 1), sometimes in connection with Jerusalem (especially by Hosea), who rebuked a temple to Baal (1 Kings xxi, 32, 38); and from this circumstance a portion of the city, possibly fortified by a separate wall, was called "the city of the house of Baal" (2 Kings x, 25). It was the scene of many of the acts of the prophets Elijah and Elisha (q. v.), connected with the various famine of the land, the unexpected plenty of Samaria, and the several deliverances of the city from the Syrians. Jehu broke down the temple of Baal, but does not appear to have otherwise injured the city (ver. 18–20). Samaria must have been a place of great strength. It was twice besieged by the Syrians, in B.C. 901 (1 Kings xx, 1) and in B.C. 892 (2 Kings vi, 24–vii, 20); but on both occasions the siege was ineffectual. On the latter, indeed, it was relieved miraculously, but not until the inhabitants had suffered almost incredible horrors from famine during their protracted resistance. The possessor of Samaria was considered to be de facto king of Israel (xxv, 13–14); and was denounced against the nation were directed against it by name (Isa. vii, 9, etc.). Although characterized by gross voluptuousness, as well as other sins incidental to idolatry, its inhabitants did not entirely lose that generosity which had early characterized Ephraim, in evidence of which note the event that happened during the reign of the last but one of its kings (2 Chron. xxviii, 6–15). In B.C. 720 Samaria was taken, after a siege of three years, by Shalmaneser (or, rather, by his successor Sargon), king of Assyria (2 Kings xviii, 9, 10), and the kingdom of the ten tribes was destroyed. Doubtless was demolished by the conqueror. Col. Rawlinson, indeed, has lately endeavored to show that Samaria was not at once depopulated (Athenaeum [Lond.,] Aug. 22, 1865, p. 246); and this was doubtless true as regards the country around; but his application of the argument to the city itself (evidently in order to square with the hypothesis of a twofold event) by the reign of Hezekiah (q. v.) is based upon reasons so obviously inconclusive that they need not be here examined in detail. See SAMARITAN. Samaria is only called Beth-Khumri in the earlier cuneiform inscriptions (q. v.), but from the time of Tiglath-Pileser II the term used is Taumaria (Rawlinson, Hist. Evidence, p. 321). The people are figured on the Egyptian monuments among the captives with the hieroglyph Asmori attached (Wilkinson, Anc. Egyptians, i, 403). See CapTivity, Assyrian.

After this capture Samaria appears to have continued, for some time at least, the chief city of the foreigners brought to occupy the places of the departed natives, although Shechem soon became the capital of the Samaritans as a religious sect. From this it would seem that the city of Samaria had meanwhile been but partially rebuilt.

We do not, however, hear especially of the place until the days of Alexander the Great, B.C. 333. That conqueror took in his city the king of Samaria itself (Euseb. Chron. ad ann. Abs. 1684), killed a large portion of the inhabitants, and suffered the remainder to settle among their compatriots at Shechem (q. v.). He replaced them by a colony of Syro-Macedonians, and gave the adjacent territory (Σαμαριτῶν χώρα) to the Jews who had been evicted. The Syro-Macedonians occupied the city until the time of John Hyrcanus. It was then a place of considerable importance, for Josephus describes it (Ant. xiii, 10, 2) as a very strong city (πόλις δύναμις). John Hyrcanus took it after a year's siege, and did his best to demolish it entirely. He intersected the hill on which it lay with trenches, and sought to render it inaccessible, but thus undermined its foundation. "In fact," says the Jewish historian, "he took away all evidence of the very existence of the city." This story at first sight seems rather exaggerated, and inconsistent with the hilly site of Samaria. It may have referred only to the suburbs lying at its foot. "But," says Prideaux (Conneetion, B.C. 109, note), "Benjamin of Tudaels, who was in the place, tells us in his Itinerary (no such passage, however, exists in that work) that there were upon the top of this hill many fountains of water, and from these water enough may have been derived to fill these trenches." The site of Samaria was then probably a little higher than the site of Samaria at the time of Josephus, and thus the site of Samaria was lower than the hills in its neighborhood. This may account for the existence of these springs. Josephus describes the extremities to which the inhabitants were reduced during this siege, much in the same way that the author of the book of Kings does during that of Benhadad (comp. War. i, 2, 7 with 2 Kings vi, 25). John Hyrcanus's reasons for attacking Samaria were the injuries which its inhabitants had done to the people of Marissa, colonists and allies of the Jews. This confirms what was said above of the cession of the Samaritan neighborhood to the Jews by Alexander the Great. The mention of Marissa in this connection serves to explain a notice in the earlier history of the Maccabees. The Samaria named in the present text of 1 Macc. v, 66 (ἡ Σαμαρία; Vulg. Samarim) is evidently an error. At any rate, the well-known Samaria of the Old and New Testaments cannot be intended, for it is obvious that Judas, in passing from Hebron to the land of the Philistines (Acts), could not have known the place. The true correction is doubtless supplied by Josephus (Ant. xiii, 8, 6), who has Marissa (i.e. Maresah [q. v.]) a place which lay in the road from Hebron to the Philistine plain. One of the ancient Latin versions exhibits the same reading, which is accepted by Ewald (Geich. iv, 361) and a host of commentators (see Grimm, Kurg. exeg. Handb. on the passage). Darius proposed Samaria; but this is hardly so feasible as Maresah, and has no external support.

After this demolition (which occurred in B.C. 129), the Jews inhabited what remained of the city; at least, we find it in their possession in the time of Alexander Janneus (Josephus, Ant. xvi, 5, 4), and it was Pompey who gave it back to the descendants of its original inhabitants (ταῖς οἰκίσκοις). These οἰκίσκοι may possibly have been the Syro-Macedonians; but it is more probable that they were Samarians proper, whose ancestors had been dispossessed by the colonists of Alexander the Great. By directions of C. Aulus, therefore, the abandoned or desolate cities were rebuilt (ibid. xiv, 5, 3). But its more effective rebuilding was undertaken by Herod the Great, to whom it had been granted by Augustus, on the death of Anto and Cleopatra (ibid. xiii, 10, 3; xv, 8, 5; War, i, 20, 3). He called it Sebaste, Zabastai = Augusta, after the name of his patron. Josephus, Ant. xv, 7, 7; Josephus gives a more elaborate description of the improvements. The wall surrounding it was twenty stadia in length. In the middle of it was a close, of a stadium and a half square, containing a magnificent temple dedicated to the Caesar. It was colonized by 6000 veterans.
SAMARIA, 279

and others, for whose support a most beautiful and rich distillation of the ground was appropriated. Herod's motives in these arrangements were probably, first, the occupation of a commanding position, and then the desire of distinguishing himself for taste and the embellishment of a spot already so adorned by nature (Bibl. xxv, 8, 5, War, i, 20, 3, 21, 2).

How long Samaria maintained its splendor after Herod's improvements, we are not informed. In the New Test, the city itself does not appear to be mentioned, but rather a portion of the district to which, even in older times, it had extended its name. Our version, indeed, of Acts vii, 5 says that Philip the deacon "went down to the city of Samaria;" but the Greek of the passage is similar to Rom. xi, 11. It is safe to argue, however, either from the absence of the definite article, or from the probability that, had the city Samaria been intended, the term employed would have been Sebastae, that some one city of the district, the name of which is not specified, was in the mind of the writer (as Olausen, Heerem, De Wette, Meyer, etc.); for the generic is one of apposition (Winer), πόλις being sufficiently defined by it (Hackett), and the city was well known in that day by this name (see Josephus, Ant. xx, 8, 3). The evangelist would naturally have resorted first to the chief city, where also Simon Magus probably was. In ver. 9 of the same chapter "the people of Samaria believe on him," and the phrase in ver. 25, "many villages of the Samari- tans," shows that the operations of evangelizing were not confined to the city of Samaria itself (comp. Matt. x, 5, "unto any city of the Samaritans enter ye not;"). and John iv, 4, 5, where, after it has been said, "And he must needs go through Samaria," obviously the district, it is subjoined, "Then cometh he to a city of Samaria called Sychar"). Henceforth its history is very unconnected, although it is occasionally noticed in the reigns of the Roman emperors (Ulpian, Leg. I. de Cens. quoted by Dr. Robinson). Various specimens of coins struck on the spot have been preserved, extending from Nero to Geta, the brother of Caracalla (Vail- lant, in Numism. Imper., and Noras, quoted by Reland; Eckel, iii, 440; Mionnet, Méd. Antiq., v, 515). Septimius Severus appears to have established there a Roman colony in the beginning of the 3rd century (Cel- lianus, Not. Orb. ii, 425). Eusebius scarcely mentions the place. The name of Shechem was applied to it by other writers of the same and a later age (adduced in Reland's Palest. p. 979-981). But it could not have been a place of much political importance. We find in the Codex Theodosi, that by A.D. 409 the Holy Land had been divided into Palestina Prima, Secunda, and Tertia; and Thebanus, by which name it was known to the Philistines, Samaria (the district), and the northern part of Judea; but its capital was not Sebastae, but Cesarea.

In an ecclesiastical point of view it stood rather higher. It was an episcopal see probably as early as the 5th century. At any rate, its bishop was present among those of Palestine at the Council of Neapolis (315), and subscribed its acts as "Maximianus (el. Marinius) Sebasteus." The names of some of his successors have been preserved; the latest of them mentioned is Pelagius, who attended the synod at Jerusalem, A.D. 536. The title of the see occurs in the earlier Greek Notitiæ and in the later Latin ones (Reland, Palest. p. 214-229).

Jerome, whose acquaintance with Palestine imparts a sort of popularity to the tradition which prevailed so strongly in later days, asserts that Sebastae, which he invariably identifies with Samaria, was the place in which John the Baptist was imprisoned and suffered death. (Epiph. xliii, 50.) He also makes it the burial-place of the prophets Elisa and Obadiah (see various passages cited by Reland, Palest. p. 980, 981). Epiphanius is at great pains, in his work Epistolæ Hæræos (lib. i), in which he treats of the heresies of the Samaritans with singular minuteness, to account for the origin of their name. He interprets it as מְדַיָּה, φαθαρις, or "keepers." The hill on which the city was built, he says, designated Somer, or Somoron (Σωμήρων, Σωμόρων), from a certain Somor or the son of Somer, whom he considers to have been the chief of the ancient People of God, the Samari- òtes, themselves descendants of Canaan and Ham. But, he adds, the inhabitants may have been called Samari- tans from their guarding the land, or (coming down a much later in their history) from their guarding the law, as distinguished from the later writings of the Jew- ish canon, which they refused to allow. See SAMARIAN.

The city, along with Nabûs, fell into the power of the Moslems at the time of the siege of Jerusalem, A.D. 634, and we hear but little more of it till the time of the Crusades. At what time the city of Herod became de- solate no existing accounts state, but all the notices of the 4th century and later lead to the inference that its de- stuction had already taken place. The Crusaders es- tablished a Latin bishopric at Sebastae, and the title was continued in the Roman Church till the 15th century (Le Quien, Oriens Christ. iii, 1290). Saladin marched through it in A.D. 1184, after his repulse from Kerak (Abulafia, Annal. A.H. 580). Benjamin of Tudela describes it as having been "for some a very strong city, and situated on the mount, in a fine country, richly watered, and surrounded by gardens, vineyards, orchards, and olive-presses." He adds that the church was there (Itinere. [ed. Asher] p. 65). Phocas and Brocardus speak only of the church and tomb of John the Bap- tist, and of the Greek church and monastery on the sum- mit of the hill. Notices of the place occur in the trav- ellers of the 14th, 15th, and 16th centuries; nor are they all so meagre as Dr. Robinson conceives. That of Mori- son, for instance, is full and exact (Voyage du Mont Si- nai, p. 230-233). The description of Sandys, likewise, is quite circumstantial (see Kitto, Phys. Hist. of Palest. p. xxxvii sq.). Scarce any traces of the earlier or later Samaria could then be perceived, the materials having been used by the inhabitants for the construction of their own humble dwellings. The residents were an extremely poor and miserable set of people. In the 18th century the place appears to have been left unexplored, but in the present century it has often been visited and described.

II. Description.—In the territory originally belonging to the tribe of Joseph, about six miles to the north-west of the city of Samaria, a wide and level plain is sur- rounded with high hills, almost on the edge of the great plain which borders upon the Mediterranean. In the centre of this basin, which is on a lower level than the valley of Shechem, rises a level elevated oblong hill, with steep yet accessible sides, and a long flat top. The singu- lar beauty of its situation may thus be described. From further back the tasteful Idumean (Josephus, War, i, 21, 2; Ant. xv, 8, 5). All travellers agree that it would be difficult to find in the whole land a situation of equal strength, fertility, and beauty combined. In all these particular, says Dr. Robinson, it has greatly the advan- tage over Jerusalem (Bibl. Researches, iii, 146). In the valley there is an abundance of excellent water all the year round, but on the hill itself there is not so much as a single fountain. This is its only and great disad- vantage as a site for a city, and a most serious one it must have been, especially in the time of siege. This was a want which Samaria shared in common with the capital of Joseph, and the deficiency in fresh water was so amply supplied by cisterns under the houses and else- where that in the severe sieges we never read of either city suffering from a scarcity of water. See JERUSALEM.

The hill of Samaria itself is of considerable elevation and very regular in form, and the broad deep valley in the midst of which it lies is a remaining feature of the Nabûs (Shechem), which here expands into a breadth of five or six miles. Beyond this valley, which completely isolates the hill, the mountains rise again on every side, forming a complete wall around the city (as referred to in 2 Kings vi, 17). They are terraced to the
General View of Sebastiyeh (Samaria) from the south-east, and the Terraces of the Hill to the left. (From a photograph by the Editor.)

tops, sown in grain, and planted with olives and figs, in the midst of which a number of handsome villages appear to great advantage, their white stone cottages contrasting strikingly with the verdure of the trees. The hill of Samaria itself is cultivated from its base, the terraced sides and summit being covered with corn and with olive-trees. About midway up the ascent the hill is surrounded by a narrow terrace of level land, like a belt, below which the roots of the hill spread off more gradually into the valleys. Higher up, too, are the marks of slight terraces, once occupied, perhaps, by the streets of the ancient city. The ascent of the hill is very steep, and the narrow footpath winds among the mountains through substantial cottages of the modern Sebastiyeh (the Arabic form of Sebastate), which appear to have been constructed to a great extent of ancient materials, very superior in size and quality to anything which could at this day be wrought into an Arab habitation. The houses are all of stone, though erected with little or no regard to order and regularity. These, with their inmates, present the same uncLean appearance that is met with among all the Falashim of the country; and the inhabitants are remarkably rude, but more industrious than most of their race. The view from the summit is most interesting. Beneath, to the north and east, lie its own immediate fertile valleys; and, turning westwardly, the eye wanders over rich plains to Sharon and the blue Mediterranean; and even in the present impoverished state of the country the scene fills the mind of the beholder with delight.

On the summit, the first object which attracts the notice of the traveller, and, at the same time, the most conspicuous ruin of the place, is the church dedicated to John the Baptist, erected on the spot which an old tradition (noticed above) fixed as the place of his burial, if not of his martyrdom. It is said to have been built by the empress Helena; but the architecture limits its antiquity to the period of the Crusades, although a portion of the eastern end seems to have been of earlier date. There is a blending of Greek and Saracenic styles, which is particularly observable in the interior, where there are several pointed arches; others are round. The columns follow no regular order, while the capitals and ornaments present a motley combination, not to be found in any church erected in or near the age of Constantine. The length of the edifice is 153 feet inside, besides a porch of 10 feet; and the breadth is 75 feet. The eastern end is rounded, in the common Greek style; and, resting, as it does, upon a precipitous elevation of nearly 100 feet immediately above the valley, it is a noble and striking monument. Within the enclosure is a common Turkish tomb; and beneath it, at a depth reached by twenty-one stone steps, is a sepulchre, three or four paces square, where, according to the tradition, John the Baptist was interred after he had been slain by Herod. There is no trace of this tradition earlier than the time of Jerome; and if Josephus is correct in stating that John was beheaded in the castle of Macherus, on the east of the Dead Sea (Ant. xviii, 5, 2), his burial in Samaria is very improbable. See John the Baptist.

On approaching the summit of the hill, the traveller comes suddenly upon an area once surrounded by limestone columns, of which fifteen are still standing and two prostrate. These columns form two rows, thirty-two paces apart, while less than two paces intervene between the columns. They measure seven feet nine inches in circumference; but there is no trace of the order of their architecture, nor are there any foundations to indicate the nature of the edifice to which they belonged. Some refer them to Herod's temple to Augustus, others to a Greek church which seems to have once occupied the summit of the hill. The descent of the hill on the W.S.W. side brings the traveller to a very remarkable colonnade, which is easily traceable by a great number of columns, erect or prostrate, along the side of the hill for at least one third of a mile, where it terminates at a heap of ruins, near the eastern extremity of the ancient site. The columns are sixteen feet high, two feet in diameter at the base, and one foot eight inches at the top. The capitals have disappeared; but the shafts retain their polish, and, when not broken, are in good preservation. Eighty-two of these columns are still erect, and the number of those fallen and broken must be much greater. Most of them are of the limestone common to the region; but some are of white marble, and some of granite. The mass of ruins in which this colonnade terminates towards the west is composed of blocks of hewn stone, covering no great area, on the slope of the hill, many feet lower than the summit. Neither the situation nor extent of this pile favors the notion of its having been a palace, nor is it easy to conjecture the design of the edifice. The colonnade, the remnants of which now stand solitary and mournful in the midst of ploughed fields, may, however, with little hesitation, be referred to the time of Herod the Great, and must be regarded as belonging to some one of the splendid structures with which he adorned the city. In the deep ravine which bounds the city on the north there is another colon-
nade, not visited by Dr. Robinson, but fully described by Dr. Olin (Travels, ii, 371–373). The area in which these columns stand is completely shut in by hills, with the exception of an opening on the north-east; and so peculiarly sequestered is the situation that it is only visible from a few points of the heights of the ancient site, by which it is overshadowed. The columns, of which a large number are entire and several in fragments, are erect, and arranged in a quadrangle 196 paces in length and 64 in breadth. They are three paces asunder, which would give 170 columns as the whole number when the colonnade was complete. The columns resemble, in size and material, those of the colonnade last noticed, and appear to belong to the same age. These also probably formed part of Herod’s city, though it is difficult to determine to which use to which the colonnade was appropriated. Dr. Olin is possibly right in his conjecture that this was one of the places of public assembly and amusement which Herod introduced into his dominions. “A long avenue of broken pilars” (says dean Stanley), “apparently the main street of Herod’s city, here, as at Palmyra and Damascus, adorned by a colonnade on each side, still lines the topmost terrace of the hill.” But the fragmentary aspect of the whole place exhibits a present fulfilment of the prophecy of Micah (i, 6), though it may have been fulfilled more than once previously by the ravages of Shalmaneser or of John Hyrcanus: “I will make Samaria as a heap of the field, and as plantings of a vineyard: and I will pour down the stones thereof into the valley, and I will discover the foundations thereof” (Mic. i, 6; comp. Hos. xi, 16).

SAMARIA, Region of (usually Σαμαρία, the same as the city; but when distinguishing it from the latter, the Sept. and Josephus write Σαμαρία or Χώρος Σαμαρίας; sometimes Samar, as Pindery). This term at first included all the tribes over which Jeroboam made himself king, whether east or west of the river Jordan. Hence, even before the city of Samaria existed, we find the “old prophet who dwelt at Bethel” describing the predictions of “the man of God who came from Judah,” in reference to the altar at Bethel, as directed not merely against that altar, but “against all the houses of the high-places which are in the cities of Samaria” (1 Kings xiii, 32), i.e., of course, the cities of which Samaria was, or was to be, the head or capital. In other places in the historical books of the Old Testament (with the exception of 2 Kings xvii, 24, 26, 28, 29) Samaria seems to denote the city exclusively. But the prophets use the word, much as did the old prophet of Bethel, in a greatly extended sense. Thus the “calf of Bethel” is called by Hosea (viii, 5, 6) the “calf of Samaria;” in Amos (iii, 9) the “mountains of Samaria” are spoken of; and the “captivity of Samaria and her daughters” is a phrase found in Ezekiel (xvi, 53).

But, whatever extent the word might have acquired, it necessarily became contracted as the limits of the kingdom of Israel became contracted. In all probability the territory of Simeon and that of Dan were very early absorbed in the kingdom of Judah. This would be one limitation. Next, in B.C. 771 and 740 respectively, “Pul, king of Assyria, and Tilghath-pilneser, king of Assyria, carried away the Reubenites, and the Gadites, and the half-tribe of Manasseh, and brought them unto Halah, and Habor, and Hara, and to the river Gozan” (1 Chron. v, 26). This would be a second limitation. But the latter of these kings went further: “He took Ijon, and Abel-beth-maacah, and Janoah, and Kedesh, and Hazor, and Gilead, and Galilee, all the land of Naphtali, and carried them captive to Assyria” (2 Kings xv, 29). This would be a third limitation. Nearly a century before, B.C. 869, “the Lord had begun to cut Israel short,” for “Hazael, king of Syria, smote them in all the coasts of Israel: from Jordan eastward, all the land of Gilead, the Gadites, and the Reubenites, and the Manassites, from Aroer, which is by the river Arnon.
SAMARIA

even Gilead and Bashan" (2 Kings x, 32, 33). This, however, as we may conjecture from the diversity of expression, had been merely a passing inroad, and had involved no permanent subjection of the country, or despoilation of its inhabitants. The invasions of Pul and of Tilgath-pilneser were utter clearances of the population. The territory thus desolated by them was probably occupied by degrees by the pushing forward of the neighboring heathen, or by straggling families of the Israelites themselves. In reference to the northern part of Galilee, it appears that a branch of the population remained. Hence the phrase “Galilee of the nations” or “Gentiles” (Isa. ix. 1; 1 Mac. v. 15). No doubt this was the case also beyond Jordan. But we have yet to arrive at a fourth limitation of the kingdom of Samaria. It is evident from an occurrence in Hezekiah’s reign that, in the deposition of Hoshea, the last king of Israel, the authority of the king of Judah, or, at least, his influence, was recognized by portions of Asher, Issachar, and Zebulun, and even of Ephraim and Manasseh (2 Chron. xxx, 1-26). Men came from all these tribes to the Passover at Jerusalem. The leaders of Judah took 276. In fact, the limits of the kingdom of Samaria had been reduced, that when, two or three years afterwards, we are told that “Shalmaneser came up throughout the land,” and after a siege of three years “took Samaria, and carried Israel away into Assyria, and placed them in Halah, and in Habor, on the border of Gozan, and in the cities of the Medes” (2 Kings xvii, 6, 9), and yet again we are told that “Israel was carried away out of their own land into Assyria” (2 Kings xvii, 23), we must suppose a very small field of operations. Samaria (the city), and a few adjacent cities or villages only, represented that dominion which had once extended from Bethel to Dan northward, and from the Mediterranean to the borders of Syria and Ammon eastwards. This is further confirmed by what we read of Josiah’s progress, in B.C.628, through “the cities of Manasseh and Ephraim and Simeon, even unto Naphath” (2 Chron. xxxiv, 6). Such a progress would have been impracticable had the number of cities and villages been at all large. On the capture of the city of Samaria, and the final overthrow of the kingdom of Israel by Shalmaneser or Sargon (B.C.720), the Jews were removed, and strangers were brought from Assyria “and placed in the cities of Samaria” (2 Kings xvii, 24; comp. Ezra iv, 10). The name of the new country of the Medes, and of the Medes, is developed. See SAMARITANS. Instead of a kingdom, Samaria now became a province. Its extent cannot be exactly ascertained. The political geography of Palestine was undergoing changes every year, in consequence of incessant wars and conquests; and it was not until the period of the division of the kingdom that the boundaries of provinces began to be accurately defined. Josephus describes the province thus: “The district of Samaria lies between Judaea and Galilee. Commencing at a village called Ginea, situated in the Great Plain, it terminates at the territory of the Acrabatenes” (War, iii, 3, 4). Ginea is identical with the modern Jenin, on the southern side of Mount Hermon, the Nemrut Dagh of the ancients. Therefore, that the northern border of Samaria ran along the foot of the mountain-range, beginning at the promontory of Carmel on the west, and terminating at the Jordan, near the site of Succoth. Its southern border would probably correspond pretty nearly to a line drawn from Joppa eastward through Bethel to the Jordan (see Re- land, Palest, p. 192). Thus it comprehended the ancient territory of Ephraim, and of those Manasseites who were west of Jordan. “Its character,” Josephus continues, “is in no respect different from that of Judah. Both abound in mountains and plains, and are suited for agriculture, and productive, wooded, and full of fruits both wild and cultivated. They are not abundantly watered; but much rain falls there. The springs are of an exceedingly sweet taste; and, on account of the quantity of good grass, the cattle there produce more milk than elsewhere. But the best proof of their richness and fertility is that both are thickly populated.” The accounts of modern travellers confirm this description by the Jewish historian of the “good land” which was allotted to that powerful portion of the house of Joseph which crossed the Jordan, on the first division of the territory. The geographical position of the province is several times incidentally mentioned in the New Testament. Thus in Luke xvii, 11 it is stated that our Lord, in proceeding to Jerusalem from northern Palestine, “passed through the midst of the land” and Judea and went to Galilee, St. John says, “He must needs go through Samaria” (iv, 4). So also, when Paul and Barnabas were sent on a special mission from Antioch to Jerusalem, “they passed through Phenice and Samaria” (Acts xv, 5). They followed the road along the coast past Sidon, Tyre, and Caesarea.

After the time of Roman rule in Syria, the name of Samaria as a province appears to have passed away. It is used by Pliny and Ptolemy, and is mentioned by Jerome. It is not found, however, in the Notitiae Ecclesiasticae of the Patrology of Eusebius, but in the later lists of the ancient cities of the country, as if newly known to the natives of the country. The name of the ancient city has even given place to the Arabo-Greek Sebastiyeh—Kitty.

On the history and natural features of the region in question, see Israel, KINGDOM OF; PASTEUR; SAMARIA, CITY OF.

Samar'itan (Heb. Shomerovim, שומרונים, from Shomerim, the Heb. name of Samaria; Sept., Πα σαριτα, from Σαμαριταί, from Samaritans, the name of a small people still resident in the country across the Jordan from Jericho, who have a prolonged tradition and a peculiar form of worship. For this reason they were called Samaritans, or Samaritans, withersby [by a play upon their original name], i.e. keepers of the law), as interpreted by Epiphanius, Narr. i, 9), a term which in its strictest sense would denote an inhabitant of the city of Samaria. But it is not found at all in this sense, exclusively at any rate, in the Old Testament, nor perhaps elsewhere. In fact, it only occurs twice, and then in a wider signification, in 2 Kings xvii, 29. There it is employed to designate those whom the king of Assyria had “placed in (what are called) the cities of Samaria (whatever these may be) instead of the children of Israel.” Were the word Samaritan found elsewhere in the Old Testament, it would have designated those who had inhabited the kingdom of the ten tribes, which in a large sense was called Samaria. As the extent of that kingdom varied, which it did very much, gradually diminishing to the time of Shalmaneser, so the extent of the word Samaritan would have varied. In the New Testament, it is applied, strictly speaking, to the people or sect who had established an independent worship of their own in a temple or synagogue at Nablus. Although a comparatively small and isolated community, their history and literature are so closely connected with those of the Hebrew people as to give them great importance in a Biblical point of view. See Sects of the Jews. People.—As we have seen in the preceding articles, Shalmaneser, or Sargon, and the Medes and the Babylonians, up to Alexander the Great, the successors of Alexander the Great, the successors of Alexander the Great, destroyed, then again, the remnant of the ten tribes which still acknowledged Hosea’s authority, into Assyria. This remnant consisted, as has been shown, of Samaria (the city) and a few adjacent cities and villages. Now (c), did he carry away all their inhabitants, or not (d)? Whether they were wholly or only partially desolated, who replaced the deported population? On the answer to these inquiries will depend our determination of the questions, Were the Samaritans a mixed race, composed partly of Jews, partly of new settlers, or were they purely of foreign extraction? Upon few Biblical questions more different opinions have been held. 1. Arguments in Favor of an Exclusively Hebraic Origin of the Samaritans.—The great advocate of this view is Hengstenberg, who states not only the Biblical reasons, but continues the examination through Sirach.
the Maccabees, and the New Test. (Authentique des Penta-
tetch, i, 28). In favor of the purely Assyrian origin of the people, Hengstenberg quotes Mill, Schultz, R. Simon, Reland, and Elmacin. To this list others add Saiber, Rosemundt, Druses, Malduantes, Huévernik, Bonus, Böhm, and Trench (Paradise, p. 310 sqq.). In ancient times, Josephus, Origen, Eusebius, Epiphanius, Chrysostom, and Theodoret are quoted on the same side. The following is an outline of this position:

It has been asserted that the language of Scripture admits of scarcely a doubt. "Israel was carried away (2 Kings iv, 6, 12) into the nations which were placed in the cities of Samaria instead of the children of Israel" (2 Kings xxvi, 24). There is no mention whatever, as in the case of the somewhat parallel destruction of the kingdom of Judah, of "the poor of the land being left to be vine-dressers and husbandmen" (2 Kings xxxv, 15). It is added that, had any left, it would have been impossible for the new inhabitants to have been so utterly unable to acquaint themselves with "the manner of the God of the land" as to require to be taught by some priest of the captivity sent from the king of Assyria. Besides, it was not an unusual thing with Origen and Theodoret to ascribe the destruction of the national race of the inhabitants. Comp. Herod, iii, 149: "The Persians dragged (σαρηνασαντες) Samos, and delivered it up to Syro-
ian, stripped of all its men;" and, again, Herod. vi, 51, for the application of the same treatment to other islands, where the process called σαρηνασθαι is described, and is compared to a hunting-out of the population (ση-
ονείτης). Such a capture is presently connected with the capture of other territories to which σαρηνασθαι was not applied. Josephus's phrase in reference to the citi-
eties of Samaria is that Shalmaneser "transplanted all the people" (Ant. ix, 14, 1). A threat against Jerusalem, which was, indeed, only partially carried out, shows how complete and sudden was the last relics of the sister kingdom must have been: "I will stretch over Jerusalem the line of Samaria, and the plummet of the house of Ahab: and I will wipe Jerusalem as a man wipeth a dish: he wipeth and turneth it upon the face thereof" (2 Kings xxvi, 15). This was uttered within forty years after B.C. 721, during the reign of Man-
asseh. It must have derived much strength from the re-
centness and proximity of the calamity.

Hence it is concluded by the advocates of this view that the cities of Samaria were not partially, but wholly, evacuated of their inhabitants in B.C. 720, and that they remained so until, in the words of 2 Kings xvii, 24, "the king of Assyria brought men from Babylon, and from Cuthah, and from Avv (Ivah, 2 Kings xviii, 34), and from Hamath, and from Sepharvaim, and placed them in the cities of Samaria instead of the children of Israel: and they possessed Samaria, and dwelt in the cities thereof." Thus the new Samaritans—for such we would now call them—were Assyrians by birth or subjugation, were utterly strangers in the cities of Samaria, and were exclusively the inhabitants of those cities. An incidental question, however, arises: Who was the king of Assyria that ef-
fected this colonization? At first sight, one would sup-
pose the king of Assyria that marched on Jerusalem, and the repeopling seems to be a natural sequence of the depopulation. Such would appear to have been Josephus's view; for he says of Shalmaneser, "When he had removed the people out of their land, he brought other nations out of Cuthah, a place so called (for there is still in Persia a river of that name) from Samaria into the country of the Israelites" (Ant. ix, 14 and 8; x, 9, 7); but he must have been led to interpret this simple by the juxtaposition of the two transactions in the Hebrew text. The Samaritans themselves (in Ezra iv, 2, 10) attributed their colonization, not to Shalma-
neser, but to "Esar-haddon, king of Assur," or to "the great and mighty king, to whom Assur owes his throne," or to one of his generals. It was probably on his invasion of Judah, in the reign of Manasseh, about B.C. 677, that Esar-haddon discovered the policy of leaving a tract upon the very frontiers of that kingdom thus desolate, and determined to garrison it with foreigners. The fact, too, that some of these foreigners came from Bab-
ylon would seem to direct us to Esar-haddon rather than to his grandfather Shalmaneser: it was only re-
cently that Babylon had come into the hands of the Assyrian king. There is another reason why this date should be preferred: it coincides with the termination of the sixty-five years of Isaiah's prophecy, delivered B.C. 742, within which "Ephraim should be broken that it should not be a people" (Isa. vii, 8). This was not effectually accomplished until the very land itself was occupied by strangers. So long as this had not taken place, there might be hope of return; after it had taken place, no hope. Josephus (Ant. x, 9, 7) expressly notices this difference in the cases of the ten and of the two tribes. The land of the former became the posses-
sion of foreigners, the land of the latter not so.

These strangers, who are thus assumed to have been placed in "the cities of Samaria" by Esar-haddon, were, of course, idolaters, and worshiped a strange medley of divinities. Each of the five nations, says Josephus, who is confirmed by the words of Scripture, had its idol or gods. No place was found for the worship of Him who had once called the land his own, and whose it was still. God's displeasure was kindled, and they were infested by beasts of prey, which had probably increased to a great extent before their entrance upon it. "The Lord sent lions among them, which slew some of them." On their explaining their miserable condition to the king of Assyria, he despatched one of the captive priests to teach them "how they should fear the Lord." The priest came accordingly; and henceforth, in the lan-
guage of the sacred historian, they "feared the Lord, and served their graven images, both their children and their children's children: as did their fathers, so do they unto this day" (2 Kings xvii, 41). This last sentence was probably inserted by Ezra. It serves two purposes: 1st, to qualify the pretensions of the Samaritans of Ezra's time to be pure worshippers of God—they were no more exclusively his servants than was the Roman em-
peror, who desired to place a statue of "Christ in the Pantheon, entitled to be called a Christian: and, 2ndly, to show how entirely the Samaritans of later days dif-
fered from their ancestors in respect to idolatry. Jose-
phus's account of the distress of the Samaritans, and of the remedy for it, is very similar, with the exception that, with him, they are associated with pestilence.

Such, according to this view, to one of the views of the Jewish writers, was the origin of the post-captivity, or new Samaritans—men not of Jewish extraction, but from the farther East. The Cuthaenas had formerly belonged to the inner parts of Persia and Media, but were then called 'Sam-
aritans,' taking the name of the country to which they were removed," says Josephus (Ant. x, 9, 7). Again, he says (Ant. ix, 14, 8) they are called, "in He-
brew, 'Cuthaenas,' but in Greek, 'Samaritans.'" Our Lord expressly terms them ἀλλογενικοι (Luke xviii, 18); and Josephus's whole account of them shows that he believed them to have been μιντακοι ἀλλογενεῖς, though, as Strabo (1, 4, 3) says, "the place of the ten tribes, or of the ten tribes who were in the land of Israel to come to the great Passover which he celebrated, and the different
tribes are mentioned (ver. 10, 11) who did or did not respond to the invitation. Later, Esar-haddon adopted the policy of Shalmaneser, and a still further deportation took place (Ezra iv, 2); but even after this, though the land was left in the hands of the Assyrians, the people who had remained were not allowed to return. The land was not swept clean of its original inhabitants. Josiah, it is true, did not, like Hezekiah, invite the Samaritans to take part in the worship at Jerusalem; but, finding himself strong enough to disregard the power of Assyria, now on the decline, he virtually claimed the land of Israel as the rightful possession of his house. He adopted energetic measures for the suppression of idolatry, and even exterminated the Samaritan priests. But what is of more importance as showing that some portion of the ten tribes was still left in the land is the fact that, when the collection was made for the repairs of the Temple, we are told that the Levites gathered the money "of the hand of Manasseh and Ephraim, and of all the remnant of Israel," as well as "of Judah and Benjamin" (2 Chron. xxxiv, 9). So, also, after the discovery of the book of the law, Josiah bound not only "all who were present in Judah and Benjamin" to stand to the covenant contained in it; but "he took away all the abominations from the house of the Lord, and all theAlt of the children of Israel, and made all that were present in Israel to serve, even to serve Jehovah their God. All his days they departed not from serving Jehovah the God of their fathers" (2 Chron. xxxiv, 32, 33).

Later yet, during the viceroyalty of Gedaliah, we find that the house of David was the part of the ten tribes which had shown itself under Hezekiah and Josiah. Eighty devotes from Shechem, from Shiloh, and from Samaria, came with all the signs of mourning, and bearing offerings in their hand, to the Temple at Jerusalem. They thus testified both their sorrow for the desolation that had come upon it, and their readiness to take part in the worship there, now that order was restored. This, it may be reasonably presumed, was only one party out of many who came on a like errand. All these facts prove that, so far was the intercourse between Judah and the remnant of Israel from being imderoded by religious anomalies, that it was the religious bond which bound them together. Hence it would have been quite possible during any portion of this period for the mixed Samaritan population to have received the law from the Jews.

This is far more probable than that copies of the Pentateuch should have been preserved among those few grasshoppers who clung to the land when the land was shaven by the razer of the king of Assyria, or who had straggled back thither from their exile. If even in Jerusalem itself the book of the law was so scarce, and had been so forgotten, that the pious king Josiah knew nothing of its contents till it was accidently discovered, still less probable is it that in Israel, given up to idolatry and wasted by invasions, any copies of it should have survived.

On the whole, we should be led to infer that there had been a gradual fusion of the heathen settlers with the original inhabitants. At first the former, who resided in the cities of Jerusalem and in the hill country, built one of their own false gods, endeavored to appease him by adopting in part the religious worship of the nation whose land they occupied. They did this in the first instance, not by mixing with the resident population, but by sending to the king of Assyria for one of the Israelish priests who has been cited captive. But in process of time the amalgamation of races became complete, and the worship of Jehovah superseded the worship of idols, as is evident both from the wish of the Samaritans to join in the Temple worship after the captivity, and from the absence of all idolatrous symbols on Gerizim. So far, then, the history leaves us alto-
gether free from the doctrine that some change of the empire was received by the Samaritans. Copies of it might have been left in the northern kingdom after Shalmaneser's invasion, though this is hardly probable; or they might have been introduced thither during the religious reforms of Hezekiah or Josiah. Till the return from Babylon there is no evidence that the Samaritans regarded the Jews with any extraordinary dislike or hostility. Indeed, the whole period of their existence, of which the chief event was probably an attempt to be conciliated with which Nehemiah met their advances when he was rebuilding the walls of Jerusalem provoked their wrath. From this time forward they were declared and open enemies. The quarrel between the two nations was further aggravated by the determination of Nehemiah to break off all connection between the two tribes that had contracted between Jews and Samaritans. Manasseh, the brother of the high-priest (so Josephus calls him, Ant. xi, 7, 3), and himself acting high-priest, was one of the offenders. He refused to divorce his wife, and took refuge with his father-in-law, Sanballat, who consorted him for the loss of this priestly privilege in Jerusalem by making him high-priest of the new Samaritan temple on Gerizim. With Manasseh many other apostate Jews who refused to divorce their wives fled to Samaria. It seems highly probable that these men took the Pentateuch with them, and adopted it as the basis of the new religious system which they inaugurated. See Pentateuch, Assyrian inscriptions."

(2.) That the country should be swept clean of its inhabitants on the downfall of Samaria seems most improbable. It is true Eastern conquerors did sometimes utterly destroy cities, and occasionally extirpate whole islands (Herod. iii, 149). And some have thought the Pentateuch was translated into the Syriac from the older Assyrian inscriptions (Layard, Nineveh and its Remains, ii, 374); but, as Rawlinson justly remarks, "it appears by the inscriptions that towns were frequently spared, and that the bulk of the inhabitants were generally left in the place" (Five Great Monarchies, i, 304, note). Should such be the case, it must be argued that the conquest of the residents of the city of Samaria was of a character to draw upon them the severest chastisement of their conquerors—an indiscriminate slaughter, with implant or slavery awaiting the prisoners—there is no reason to suppose that the cities and towns of the provinces met with the same fate. According to the Assyrian inscriptions of Sargon, this removal consisted of only 27,280 families—amounting, let us say, to 200,000 individuals—which certainly would not exhaust the land.

It is popularly said and credited that those Assyrians were placed in Samaria by Shalmaneser soon after the fall of the kingdom; but this is a mistake. It arose probably from the statement of historians who, not noticing the distinction between Shalmaneser and Shalmaneser, included into this error from the juxtaposition in which the two events are related in the Hebrew text. It is doubtful whether Shalmaneser conducted the siege to its end, for there is a supposition that he was treacherously slain by the emissaries of Sargon, who had usurped the throne during his master's absence, and that the siege was terminated under the command of one of his lieutenants. The following expression is remarkable, and would tend to confirm this opinion: "Shalmaneser, king of Assyria, came up against Samaria and besieged it. And at the end of three years they took it" (2 Kings xviii, 9, 10). The two children, the captives, claim the victory to himself, as well as the removal of the Samaritans to Assyria (Rawlinson, Herodotus, i, 472; comp. Isa. xx, 1). It is a curious and interesting fact, for the knowledge of which we are indebted to Sir H. Rawlinson, that Sargon penetrated far into the interior of Arabia, but, coming off with the Arabian tribes, settled them in Samaria. This explanation of the capture of Samaria to the Arabian came to be associated with Samballat in the government of Judaea, as well as the mention of Aramaic in the army of Samaria (Illustrations of Egyptian History, etc., in the Trans. of the Roy. Soc. Lit. 1860, i, 148, 149). See Sasoo. Be this as it may, it is quite certain that the time elapsed between the fall of Samaria to the removal of the Assyrians into its cities. In the Assyrian inscriptions we have a list—probably a complete one—of the monarchs of the latter half of the
SAMARITAN

sith and the first half of the 7th century B.C., namely, Tiglath-pileser II, Shalmanesser II, Sargon, Sennacherib, and Esar-haddon. Now the Samaritans themselves attribute their removal to this last-mentioned monarch—"Esar-haddon, king of Assur," "the great and noble Asnapper" (Ezra iv, 2, 10); and of this there can be no reasonable doubt. He invaded Judah in the reign of Manasseh, about B.C. 677, and probably it was this expediti-

tion that moved him to place these his subjects in Samaritania, by which he is conjectured to have died in B.C. 669, the transmigration must have taken place some time between these dates. Let us suppose that it oc-

urred B.C. 670, and that king Josiah began his refor-

mation B.C. 628. This would have given the strangers a residence of forty-two years. The question now arises, Were these colonists so numerous as to replace the cit-

ies of Israel, from Bethel even to Naphtali? and was it over these that Josiah exercised his authority? Now, we have no means of arriving at any estimate of the number of these aliens; but, whatever it may have been, it is highly improbable that king Josiah would have had the impudence to interfere with any subjects of the king of Assyria, especially as that government had already laid a heavy hand upon Judah (2 Kings xviii, 13-15). Neither had he any religious jurisdiction over them. It seems far more likely that Josiah carried out his reform ostensibly among the remaining Israelites, the most of whom might be of Israelitish race, because under his rule. Israel was not at any time all given to idolatry. In one of its unholiest periods (under Ahaz) there were 7000 faithful men who had not bowed their knees unto Baal (1 Kings xix, 18). Again, when Hez-

ekiah sent his delegates to visit the nation, although the majority of the people "mocked them, nevertheless divers of Asher and Manasseh and of Zebulon humbled themselves and came to Jerusalem" (2 Chron. xxx, 11). The residue of the ten tribes would be still more at-

tached to the government of Judah after the destruc-

tion of their own.

(2.) On the whole, therefore, notwithstanding the force of the counter-arguments, we conclude that, al-

though the city of Samaria itself was probably razed to the ground, and its population wholly carried away, yet a considerable remnant of the inhabitants of the adjoining country was left. Consequently in later times the people, in their origin, were a mixed race. Doubtless the colonists, when not naturalized, became Jews, were greatly superior in numbers. When they came, they found none but the dregs of the populace, whom the victors had left. All power was in the hands of the colonists, All that the words in 2 Kings xvii, 24 prove is that the colonists who had been transplanted thither, who were not distinctively Israelites, had the king to the inhabitants of the local god. The request was granted. One of the transported priests was de-

patched to them, who came and dwelt at Bethel, and instructed them in the worship of Jehovah. He was not a Levitical priest, but an Israelitish priest of the calves; but he was, as we have seen, the hereditary king when the inhabitants were carried away, and because Bethel, where he settled, was the chief seat of the calf-worship.

On the return of the Jews from the Babylonian cap-

tivity, the Samaritans wished to join them in rebuild-

ing the Temple at Jerusalem, saying, "Let us build with you: for we seek your God as ye do; and we do sacrifice unto him since the days of Esar-haddon, king of Assur, which brought us up hither" (Ezra iv, 2). It is curious, and perhaps indicative of the treacherous character of their designs, to find them even then cal-

led, by anticipation, "the adversaries of Judah and Bere-

haim" (Ezra iv, 1), a title which they afterwards fully justified. But, so far as professions go, they are not enemies; they are most anxious to be friends. Their religion, they assert, is the same as that of the two tribes; therefore they have a right to share in that great religious undertaking. But they do not call it a national temple. They advocate the claims of the Jews to Jewish blood. They confess their Israelitish descent, and even put it forward ostentatiously, perhaps to en-

hance the merit of their partial conversion to God. That it was but partial they give no hint. It may have become purer already, but we have no information

SAMARITAN
that it had. But the proffered assistance was declined. Thenceforward they threw all obstacles in the way of the temple buildings. The question here was to determine the operations of the Jews entirely unsuccessful. Two Persian kings were induced to hinder the Jews in their rebuilding; and their opposition was not finally overcome till the reign of Darius Hystaspis, B.C. 519. The enmity which began at the time when the cooperation of the Samaritans in rebuilding the temple was refused continued to increase till it reached such a height as to become proverbial in after-times. It is probable, too, that the more the Samaritans detached themselves from idols and became devoted exclusively to a sort of worship of Jehovah, the more they resented the treatment of the Jews by the Samaritans as a form of fraternization. Matters at length came to a climax. About B.C. 409, in the reign of Darius Nthus, one Manasseh, of priestly descent, was expelled from Jerusalem by Nehemiah for an illegal marriage, and took refuge with the Samaritans. Whether the temple on Mount Gerizim as actually built in the days of Manasseh is doubtful. Probably he labored to unite the people in a common worship. The temple is not said to have been erected till the time of Alexander the Great, who gave permission to build it. If so, it did not exist till about one hundred years after Manasseh. It is difficult to make a consistent and clear account of the matter from the state of evidence as it is. The ancient construction is erroneous, since he is inconsistent with Neh. xiii, 28, etc. The establishment of a separate worship made the breach existing between the Jews and Samaritans irreparable. From this time malcontent Jews resorted to Samarim and the very name of either people became odious to the other. About the year B.C. 129, John Hyrcanus, high-priest of the Jews, destroyed the city of the Samaritans. The Cuthean Samaritans had possessed only a few towns and villages of the large area generally known as Samaria, and these lay almost together in the centre of the district. Shechem, or Sychar (as it was contemptuously designated), was their chief settlement, even before Alexander the Great destroyed the city of Samaria, probably because it lay almost close to Mount Gerizim. Afterwards it became more prominently so, and there on the destruction of the city of Samaria by Alexander they had built themselves a temple, which remained till the capture of Gerizim by John Hyrcanus. The Samaritans, from administering their own towns, became more prosperous. The only thing wanted to crystallize the opposition between the two races—viz., a rallying-point for schismatical worship—being now obtained, their animosity became more intense than ever. The Samaritans are said to have done everything in their power to annoy the Jews. They would send groups of Samaritans, as shepherds on their road to Jerusalem, as in our Lord's case. They would even waylay them in their journey (Joseph. Ant. xx, 6, 1); and many were compelled through fear to take the longer route by the east of Jordan. Certain Samaritans were said to have once penetrated into the Temple of Jerusalem, and to have defiled it by scattering dead men's bones on the sacred pavement (ibid. xviii, 2, 2). We are told, too, of a strange piece of mockery which must have been especially resented. It was the custom of the Jews to communicate to their brethren still in Babylon the exact day and hour of the rising of the paschal moon by beacon-fires commencing from one mountain and passing forward from hill to hill until they were mirrored in the Ephrathites. So the Greek poet represents Agamemnon as conveying the news of Troy's capture to the anxious watchers at Mycene. Those who "sat by the waters of Babylon" looked for this signal with much interest. It enabled them to share in the rejoicing of those who were in their fatherland, and it proved to them that they were not forgotten. The Samaritans thought scorn of these feelings, and would not unfrequently deceive and disappoint them by kindling a rival flame and perplexing the watchers on the mountains. "This fact," says Dr. Trench, "is mentioned by Makrizi (see De Sacry, Chrest. Arabs, ii, 159), who affirms that it was this which put an end to the Jews making claims to the mountains which they regarded as the moment of the new moon's appearance (comp. Schöttgen, Hort. Hebr. i, 344)."

Their own temple on Gerizim the Samaritans considered to be much superior to that at Jerusalem. There they sacrificed a pass-over. Towards the mountain, even after the temple on Mount Gerizim had fallen, wherever there were, they directed their worship. To their copy of the law they arrogated an antiquity and authority greater than attached to any copy in the possession of the Jews. The law (i.e. the five books of Moses) was their sole code; for they rejected every other book in the Jewish canon. They accordingly professed to hold the law better than did the Jews themselves, employing the expression not without meaning, "The Jews indeed do so and so; but we, observing the letter of the law, do otherwise." The Jews, on the other hand, were not more conciliatory in their treatment of the Samaritans. The copy of the law possessed by that people they declared to be the legacy of an apostate (Manasseh), and cast grave suspicions upon its genuineness. Certain other Jewish regenerate, as already observed, had, from time to time, taken refuge with the Samaritans. Hence, by degrees, the Samaritans claimed to partake of Jewish blood, especially if doing so happened to suit their interest (Joseph. Ant. xii, 6, 5; ix. 14, 3), or to suit the interests of others who were seeking to influence them. The Jews, however, would not make this request which they made to Alexander the Great, about B.C. 392. They desired to be excused payment of tribute in the sabbatical year, on the plea that as true Israelites, descendants of Ephraim and Manasseh, sons of Joseph, they refrained from cultivating their land in that year. Alexander, on cross-questioning them, discovered the hollowness of their pretensions. (They were greatly disconcerted at their failure, and their dissatisfaction probably led to the conduct which induced Alexander to besiege and destroy the city of Samaria. Shechem was, indeed, their metropolis, but the destruction of Samaria seems to have satisfied Alexander.) Another instance of claim to Jewish descent appears in the words of the woman of Samaria to our Lord, John iv, 12: "Art thou greater than our father Jacob, who gave us the well?" a question which she puts without recoiling that she had just before strongly contrasted the Jews and the Samaritans. Very far were the Jews from assuming claim to the blessing of the old covenant, or of these people. They were ever reminding them that they were, after all, mere Cutheans, mere strangers from Assyria. They accused them of worshipping the idol-gods buried long ago under the oak of Shechem (Gen. xxxv, 4). They would have no dealings with them that would partake of this filthiness, and would not have, of course, sometimes to give way to necessity, for the disciples had gone to Sycamore to buy food while our Lord was talking with the woman of Samaria by the well in its suburb (John iv, 38). From Luke ix, 52 we learn that the disciples went before our Lord at his command into a certain village of the Samaritans "to make ready" for him. Perhaps, indeed (though, as we see on both occasions, our Lord's influence over them was not yet complete), we are to attribute this partial abandonment of their ordinary scruples to the change which his example had already wrought in them. "Thou art a Samaritan and hast a devil" was the mode in which the Jews expressed their contempt and hatred, not only for these people, but for a bitter reproach. Everything that a Samaritan had touched was as swine's flesh to them. The Samaritan was publicly cursed in their synagogues; could not be admitted as a witness in the Jewish courts; could not be admitted to any sort of proselytism; and was thus, so far as the Jews concerned, excluded, not only from the pale of proselytism, but from any claim to a full degree of participation in their privileges, and from all chance of reconciliation, or even of partial reconciliation, with the Jewish community, with which he was excommunicated, excluded from the pale of proselytism, and excluded from all chance of acceptance into the Jewish community. The traditional hatred in which the Jew held him is expressed in Eccles. I, 25, 26. "There be two manner of nations which my heart abhorreth, and the third is no nation: they that sit on the mountain of Samaria; and they that dwel
among the Philistines; and that foolish people that dwell in Sichem. So long was it before such a tempest could be banished from the Jewish mind that they find even the apostles believing that an inhospitable slight shown by a Samaritan village to Christ would be not unduly avenged by calling down fire from heav-

en. "Ye know not what spirit ye are of," said the large-hearted Son of Man; and we find him on no one occasion uttering anything to the disapprovement of the Samaritans. So little did he regard the narrow-mindedness of his ministers confirm most thoroughly the view which has been taken above—that the Samaritans were not Jews. At the first sending-forth of the twelve (Matt. x, 5, 6), he charges them, "Go not into the way of the Gentiles; and into any city of the Samaritans enter not, but go rather to the lost sheep of the house of Israel." So, again, in his final address to them on Mount Olivet, "Ye shall be witnesses to me in Jeru-
salem and in all Judea, and in Samaria, and unto the uttermost part of the earth" (Acts i, 8). So the nine unthankful lepers, Jews, were contrasted by him with the tenth leper, the thankful stranger (διάογειτη), who was a Samaritan. So well-known was the unmis-

terficient Samaritan is contrasted with the unmerciful priest and Levite. And the very worship of the two races is described by him as different in character, "Ye worship ye know not what," this is said of the Sam-

aritans: "We know what we worship, for salvation is of the Jews" (John iv, 22).

Such were the Samaritans of our Lord's day: a people distinct from the Jews, though lying in the very midst of the Jews; a people preserving their identity, though seven centuries had rolled away since they had been brought from Assyria by Esar-haddon, and though they had abandoned their polytheism for a sort of ultra-Mosaisim; a people who, though their limits had been gradually contracted, and the rallying-place of their reli-

gion on Mount Gerizim had been destroyed one hun-
dred and sixty years before, and though Samaria (the city) had been again and again destroyed, and though their territory had been the battle-field of Syria and Egypt—still preserved their nationality, still worshiped from Shechem. Theirs was the Samaritan spirit and the influence of their faith, the "Samaritan spirit", which, so long preserved, the "Samaritan spirit", which, so long preserved, has been felt even in the Christian ages.

Under Vespasian, the city of Sichem received the new name of Neapolis, which still remains in the Ara-

bic, and in the time of Josephus was publicized as a place of excitement among the Samaritans by an adventurer who persuaded the common people to follow him to the sum-

mit of Gerizim, where he pretended that Moses had buried the golden vessels. But Pilate dispersed the multitude with troops, and put the heads of the sedi-

tion to death. In consequence of the Samaritans com-

plaining of his conduct to Vitellius, Pilate was deposed and sent to Rome (Joseph. Ant. xviii, 4, 1). Josephus relates (War, iii, 7, 32) that while Vespasian was en-
deavoring to subjugate the neighboring districts, the Samaritans collected in large numbers and took up their position on Mount Gerizim. The Roman general at-
tacked and captured it in 70. Under Septimius Severus the Jews joined against him; and therefore Neapolis was deprived of its rights. In the 3d and 4th centu-

ries, notwithstanding their former calamities, they seem to have greatly increased and extended, not only in the East, but in the West. They appear to have grown into importance under Diocletian, who was probably an apostate Jew. Epiphanius (Ad. Hæreses, lib. i), in the 4th century, considers them to be the chief and most dangerous adversaries of Christianity, and he enumer-
ates the several sects into which they had by that time divided themselves. They were popularly, and even by the fathers, confounded with the Jews, inso-
much that they were called the Samaritans, and were de
described as a tendency to Σαμαρητισμος or ιουδαιων. This confusion, however, did not extend to an identifica-

tion of the two races. It was simply an assertion

that their extreme opinions were identical. But the distinction between them and the Jews was sufficiently plain. The Samaritans, of course, were not Jews; in the 5th century a tumult was excited at Neapolis, during which the Samaritans ran into the Christian church, which was thronged with worshippers, killing, maiming, and mutilating many. The bishop, Terebin-
thus, having repaired to Constantinople and complained to the emperor, the latter punished the guilty by having them dragged by oxen through the streets of the Christians, where a church was erected in honor of the Virgin. Under Anastasius an inscription headed by a woman broke out, and was soon suppressed. Under Justinian there was a more formidable and extensive outbreak. It is related that all the Samaritans in Pal-

estine rose up against the Christians and committed many atrocities, killing, plundering, burning, and tort-

uring. In Neapolis they crowned their leader, Julian, king. But the imperial troops were sent against them, and great numbers, with Julian himself, were slain. In the time of the Crusaders, Neapolis suffered, along with other places in Palestine. In 1184 it was plun-

dered by Saladin. After the battle of Hattin, in 1187, it was devastated, and the sacred places in the neigh-

borhood were polluted by Saladin's troops. Having been several times in the hands of the Christians, it was taken by Abu 'Aly in 1244, since which it has re-

mained in the power of the Mohammedans. No Chris-

tian bishop has ever sat in the See of Gerizim among the Sam-

aritans; but they are noticed by Benjamin of Tudela in the 12th century, who calls them Cuthites, or Cutha-

eans. In the 17th century Della Valle gives an ac-

count of them; subsequently, Maundrell and Morison. After an interest in the people had been awakened by the reception of copies of their books from their church, their ans-

wers to the letters which Joseph Scaliger had sent to their communities in Nablus and Cairo came into the hands of John Morin, who made a Latin translation of them. The originals and a better version were published by De Sacy in Eichhorn's Repertorium, vol. xiii. In 1857 a letter was sent by the Samaritans at Nablus to Robert Huntington, which was answered by Thomas Marshall of Oxford. The correspondence thus began continued till 1868. De Sacy published it entire in Correspondance des Samaritains, contained in Notices et Extraits des MSS, de la Bibliothèque du Roi, vol. xii. The correspondence between Ludolf and the Samaritans is published in Eichhorn's Repertorium, vol. xiii. These letters are of great archaeological interest, and enter very minutely into the observances of the Samaritan ritual. Among other points worthy of notice in them is the inconsist-

ency displayed by the writers in valuing themselves on not being Jews, and yet claiming to be descendants of Joseph. In 1860 a letter from the Samaritans to Gé-

goire, the French bishop, came into De Sacy's hands, who answered it. This was followed by four others, which were all published by the eminent French Orien-

talist.

At Nablus the Samaritans have still a settlement, consisting of about two hundred persons. Yet they ob-

serve the law, and celebrate the Passover on a sacred spot on Mount Gerizim, with an exactness of minute ceremonial which the Jews themselves have long in-

terrupted. The people are very poor now, and to all appearance their total extinction is not far distant. In recent times many travelers have visited and given an account of the Samaritan remnant. We owe the account to Phile Scott, Robinson, and Wilson. See also Shelby, Notices of the Modern Samaritans (Lond. 1855). One of the late no-

tices is that of M. E. Rogers, in Domestic Life in Pale-

stine (1863, 2d ed.), ch. x. Another and fuller account is given in Mill, Three Months' Residence in Nablus, and on a Journey through Transjordan. See also Barges, Les Samaritains de Napoleou (Paris, 1855, 8vo). Mr. Grove has given an account of the ceremonial of their atonement, in Vacation Tourists for
SAMARITAN LANGUAGE

1861; and Stanley, of their Passover, in Lectures on the Jewish Church, Append. iii. and still more minutely in Sermons in the East, Append. i. For older monographs on the Samaritans, see Volbeding, Index Programmatum, p. 44. See also Samaritan Language, Literature, and Liturgy; Samaritans, Modern.

Samaritan Language. The Samaritan is a chiefly a compound of the Hebrew, Chaldee, and Syriac. Among the words derived from these sources are to be recognized a great number of Chaldee words, imported, doubtless, by the new colonists. We must therefore not be surprised that Greek, Latin, Persian, Arabic, and possibly other languages as well, have each contributed something to enrich the vocabulary. The grammar bears all the signs of irregularity which would characterize that of an idlerate people; the orthography is uncertain; there is a profusion of quiescents, and a complete confusion between the several gutturals and cognate letters respectively; the vowels are uncertain, the A sound being most prominent. Such is the dialect which was spoken in Samaria till the Arabian conquest of the country in the seventh century A.D., when the language of the victors was introduced, and by its superior vigor gradually overpowered its rival, till, probably by about the 8th or 9th century, it had entirely taken its place. The old language, however, still continued to be understood and written by the priests, so that, like the Jews, they had two sacred languages, which, however, they had not the skill completely to distinguish from each other. The "Hebrew," consequently, which appears in the correspondence of Samaritans with Europeans is largely impregnated with Aramaisms: Arabisms are also not by any means unfrequent.

Orthographic Elements. The Samaritan language, or, as the Samaritans call it, the "Hebrew," like all Semitic languages, is read from right to left. The alphabet consists only of consonants (twenty-two in number), in the adjoining table.

Some points and scanty orthographical signs, there are in Samaritan no accents or other diacritical marks, as in Hebrew. There are no vowel-points, as in other Semitic languages, but in order to supply this want and to indicate somewhat the pronunciation, some consonants are used as vowels, viz.:

SAMARITAN LITERATURE.

SAMARITAN LITERATURE. Under this head we propose to enumerate the works known to European scholars, somewhat in distinction from those current with the Samaritans themselves, which will be found under SAMARITAN.

1. Grammar and Lexicography.—In this department we have to mention three grammatical treatises, which were published from a MS. at Amsterdam, by Nöldke, in the Göttinger Nachrichten, 1862, p. 387, 388. They are built entirely upon the philological views of Arabic grammarians, some sections (such as those on transitive and intransitive verbs) being taken from their works. From the transcriptions of Hebrew words into Arabic, we may judge of the Samaritan pronunciation of the eleventh century. As to the present system of pronunciation, Prof. Petermann, of Berlin, has transcribed the whole book of Genesis after the manner in which it is now read in the synagouge of Nabûlû, and from this transcription the present system of pronunciation may be known, although it is difficult to decide whether the present system is due to genuine tradition, or whether it has been influenced by the Syriac and Arabic. According to Petermann's transcription, the first verse in Genesis would read thus: "Bârâ'ûs bârâ' kâlû, bârâ' mâyim wa-kâlû mâyim." (Abûnâfbûnâ Thànhânûn für die Kunde des Morgenlandes d. D. M. G. 1868, vol. v, No. 1.)

In the matter of lexicography there is little information to give; of dictionaries proper none has as yet come to light. At Paris (Bibl. Nat. Anciens Fonds, 6, Plate 6), there is a petrography of the Samaritans. There are MSS. and fragments in the Scriptures with the corresponding Arabic and Samaritan words in parallel columns, and a similar one is preserved at Cambridge (Christ's College Library), in which, however, the Samaritan equivalent is omitted. Of late the Imperial Library at St. Petersburg has obtained fragments of an Hebrew-Arabic dictionary, or "Tàrdashemesch" (Interpretation), as they are termed by Samaritans and Arabs, which will be described in the catalogue to be issued by Mr. Harkavy.

2. Calendars.—In this branch there are some astronomical tables, two of which were published by Scaliger, and one was edited with a translation by De Sacy (Vol. et extr. xii, 134, 135). Several more MSS. have found their way to Europe—one written A.D. 1759, another written 1689, a third dated 1724 (see Journ. Asiaticque, 1869, p. 467, 468). The Imperial Library of St. Petersburg also possesses several specimens.

3. Legends.—The British Museum possesses a MS. (Add. MS. 3350) written in the old and cursive style, and somewhat and very imperfectly transcribed into Hebrew. It has been translated by Dr. Leitner in Heidenheim's Vierteljahrschrift, iv, 184 sq. It borrows largely from Jewish sources. Of a similar type is the Jewelled Necklace in Praise of the Lord of the Human Race, composed in 1557 by Ismail Ibn-Badr Ibn-Abû-Izz Ibn-Rumâh (Brit. Mus. Add. MS. 19,021) in honor of Moses. It sets forth his divine nature, and extols the glories of his birth and miracles. With this may be classed a tract in which is contained a "complete explanation of the chapters on Balak" by Ghâzâl Ib-n-al-Duwaîkh (MS. xxvii, Bibl. Acad. Reg. Scient., xiv, p. 265—389); and another small tract (ibid. p. 292) by the same author. The cause of the fear felt by Jacob on his way to Egypt (Gen. xlvi, 1, 3), and by Abraham after the conquest of the five kings (ibid. xv, i), with a third (p. 294—296), by an unknown author, in which the fifteen occasions are quoted from Exodus and Numbers when the Israelites, by their complaints and abuse of Moses and Aaron, tempted God, the details of which are mentioned at which the divine glory appeared.

4. Commentaries.—Of great importance, especially for ascertaining the doctrinal views of the Samaritans, are their commentaries on the Pentateuch. The oldest extant is perhaps the one in the Bodleian Library (Add. MS. 40, 99, and described by Neubauer in the Journ. Asiaticque, 1873, p. 341 sq.), composed A.D. 1058 by an unknown Samaritan for the benefit of a certain Abû Said Levi. In this commentary we find quotations from the Pentateuch, the former and later prophets, Ne-hemiah, the Mishna, etc., but not from the Samaritan Targum. Another interesting and important commentary is one preserved at Berlin, from which large extracts were given by Geiger in the Zeitschrif d. D. M. G. xvi, 128 sq.; xx, 147 sq.; xxii, 532 sq. In it the national feeling as exhibited in opposition to the Rabbinic school of thought among the Jews is thoroughly represented.

An anonymous commentary on Genesis, brought from the East by bishop Huntington, and preserved in the Bodleian Library (Hunt. MS. 301), is of the same type as the preceding. The forty-ninth chapter was published by Schnurri in Eichhorn's Repertorium, xvi, 151—199.

To this class we must also reckon a haggadic commentary on the Pentateuch containing Genesis and Exodus, termed the Disipater of Darkness from the Revelations, written in 1733—54 by Gâzâl Ibn-Abû-s-Sârâl-Ghâzi (Brit. Mus. Add. MS. 19,657). Another part of the Commentary on Genesis, Exodus, and Leviticus, often quoted by Castelius in his notes on the Samaritan Pentateuch (Brit. Mus. Harl. MS. 19,477).

A number of fragments of such commentaries are also preserved at St. Petersburg. Other writers seem to have devoted their energies to the same subject, but nothing now remains to us but their names and the titles of their books (Aam. MS. xxvi, p. 309, 314 sq.).

5. Chronicles.—Here we mention:

(a.) The Samaritan Chronicle or Book of Joshua, sent to Scaliger by the Samaritans of Cairo in 1584. It was edited by Juynon (Leyden, 1848), and his acute investigations have shown that it was reduced into its present form about A.D. 1800, out of four special documents, three of which were Arabic and one Hebrew (i.e. the Leyden MS. in 2 pt., which Gesenius (De Sam. Theol., p. 8, n. 18) thinks unique, is dated A.H. 764—919 (A.D. 1362—1518); the Cod. in the Brit. Museum, lately acquired, dates A.H. 908 (A.D. 1502). The chronicle embraces the time from the beginning of Joshua to about A.D. 936, and was originally written in, or subsequently translated into, Arabic. After eight chapters of introductory matter begins the early history of "Israel" under "King Joshua," who, among other deeds of arms, wades war, with 300,000 mounted men—"half Israel"—against two kings of Persia. The last of his five "royal" successors is Shimhnon (Samsouw), the hand-down power of the house of David for the space of 250 years, and who were followed by five high-priests, the last of whom was Uzî (?—Uzzi, Ezra vii, 4). With the history of Ely, "the seducer," which then follows, and Samuel, "a sorcerer," the account by a sudden transition runs off to Nebuchadnezzar (ch. xlv), Alexander (ch. xlvii), and Hâdrian (ch. xlviii), and closes suddenly at the time of Julian the Apostate. The Hebrew of this chronicle is given by Kirchheim in his Karme Shomron,

(b.) The El-Thuledoth, or "The (book) of Generations." It professes to have been written by Eleazar ben-Aram in A.H. 544 (A.D. 1149), copied and continued by his son Isaac ben-Aron in 1290 year. It was continued down by other hands to 1659, when the present MS. was written by Jacob ben-Aaron, the high-priest. It was published by Neubauer in the Journ. Asiaticque for 1869, p. 385 sq. He gives the Samaritan, or rather Hebrew, text with notes and translation, citing the Arabic translation when the sense is not clear. His text is that of the Bibliothèque Nationale MS. 651, collated in some passages with one belonging to a private owner. A German translation with explanations has been given by Heidenheim in his Vierteljahrschrift für deutsch- und englisch-theolog. Forschung u. Kritik, iv, 347 sq. The chronicle is of interest to geographers, as, while mentioning the various Samaritan families settled in Damascus, Palestine, and Egypt, it
incidentally introduces the names of a considerable number of places inhabited by them. As to the importance of this chronicle for comparison with the "Book of Jubilees," comp. Rönsch, Das Buch der Jubileen (1874), p. 361.

(c) The Chronicle of Abulfath is a compilation from the Samaritan chronicle, as well as from various sources, Jewish or Rabbinical. It is full of fables, and contains little useful matter. The history in it extends from Adam to Mohammed, and was composed in the 14th century at Nablus. Five MSS. of it are known—one at Paris, another at Oxford, procured by Huntington, and three in Berlin; but one of the last three consists of nothing but a few fragments. Schnurrer gave a long extract from the Oxford copy, with a German translation; in Paulus, Neues Reperto-rium für Palästine und morgenländische Literatur (1796, Théil i, 120 sq.); and in Paulus, Memorabilia (1791, 2 vols.); so, too, De Saecy, in his Arabic Christenathyk, and Notices et Extraits des Manuscrits de la Bibliothèque du Roy, tom. xii. With an English translation by R. Payne Smith, it was printed in Heidenheim's Journal, ii, 304 sq., 482 sq. Recently it has been published by Vlamin, with the title, Arzeh el-Amlikh atau Arzeh Amlikh, ravanat Amlikh, cuum Prolog. Latina vertit et Commentario illus- travit (Gotha, 1865), after a collation of the various MSS., and with learned prolegomena.

6. Miscellaneous.—To this belongs a work of Abu-l-Hasan of Tyre, relating to lawful and forbidden meats, or "of force" (Bodl. MS. Hunt. 350 [1]). An Abrogation of the Mosaic Law according to the Samaritans, by Abu-l-Farag Ibn-Ishag Ibn-Kathir, is preserved at Paris (Bibl. Nat. Anciens Fonds, 5, Peiresco); a work on penance, in Amst. (MS. xxvii, p. 304), which MS. also contains a treatise on the nature of God and man, etc. (ibid. p. 223), and questions and answers, with interpretations from the Pentateuch (ibid. p. 297).

The St. Petersburg collection also contains fragments of Samaritan law-books (F. iv, 18); twenty-two documents in Arabic, relating to civil matters, and ranging from the 17th to the 19th century; about seventy contracts of marriage; and six amulets. See Petermann, Versuch einer hebr. Fornenlehre nach der Ausprägung der heutigen Samaritanier (Leips. 1868), introduction; Juynboll, Commentarius in Historiam Genesit Samartanarum (Lugd. Bat. 1846), p. 58 sq.; Noldeke, Uber einige samaritanisch-arab. Schriften, die hebr. Sprache betreffend (Göttingen, 1862); Geiger, Die hebr. Sprache bei den Samaritern, in Zeitach. d. d. ev. Forsch., xix, 748 sq.; Heidenheim, модель of Samaritan Literature (Frankfort, 1851), p. 28 sq. (F. R.)

SAMARITAN LITURGY. Under this head we propose to treat of the formal ritual of the Samaritans, including their most important doctrines, usages, etc., as gathered from documentary sources; reserving some additional details to their present practice for the art. SAMARITAN RITUAL. The liturgical literature of the Samaritans is very extensive, and not without a certain poetical value. It consists chiefly of hymns and prayers for Sabbath and feast days, and of occasional prayers at nuptials, circumcisions, burials, and the like. The Brit- ish Museum possesses fourteen (thirteen) illuminated prayers and hymns, which are described by Heidenheim in his verteljahrscnrschrift, i, 279 sq.; 408 sq. Several have also been published by Heidenheim, e.g. A Hymn for the Day of Atonement (ibid. i, 290 sq.); A Petition of Nahum ben-Marka (ibid. p. 432); A Petition of Mehal- meal of Daphne (ibid. p. 438 sq.); The Prayer of Ab. Gidragon, from a Vatican manuscript (ibid. ii, 232 sq.); The Litany of Marka, the end of which runs thus:

"Lord, for the sake of the three perfect ones! For the sake of Joseph, the interpreter of dreams! For the sake of Moses, chief of the prophets! For the sake of all the priests, the masters of the priests! For the sake of the Torah, most sacred of books! For the sake of Mount Gerizim, the everlasting hill! For the sake of the hosts of angels! Destroy the enemies and foes! Receive our prayers!!! Ever everlasting! Deliver us from these troubles! Open us to the treasure of heaven."

A Prayer of the High-Priest Pinchas for the Celebration of the New Moon (contained in Cod. 19.029 Add. MSS.); Two Hymns for the Day of Atonement, one by the priest Abraham, the other by the priest Tobias (ibid. iv, 110 sq.); contained in Cod. 19.009 Add. MSS.; The Prayer of Marka and that of Amram, both contained in the Vatic. MS. (ibid. iv, 207 sq.; 390 sq.). Of the hymns for the Holy day of Akhur, a fragment (ibid. i, 91 sq.). In Genesius, Car- mina Samartinana, fragments of liturgies from Damascus were published, which Kircheim has published with emendations in his Karne Shomron. One hymn on the Unity of God, and headed יְהוָה אֲלֹּהֵינוֹ יְהוָה אֲלֹהֵינוֹ יְהוָה אֲלֹהֵינוֹ, i.e. there is no God but one, runs thus:

1. יְהוָה אֲלֹהֵינוֹ יְהוָה אֲלֹהֵינוֹ יְהוָה אֲלֹהֵינוֹ Who liveth forever;

2. יְהוָה אֲלֹהֵינוֹ יְהוָה אֲלֹהֵינוֹ יְהוָה אֲלֹהֵינוֹ Who liveth above all powers;

Who and thus remnant forever.

And thy glory and mercy. Revelaed are both the things that are revealed, and those that are unrevealed, before the reign of thy Godhead, etc.

Petermann has published three "prayers of Moses and Joshua" and five "prayers of the angels" in his Grammatica Samaritana, p. 418 sq. A volume of prayers is also in the Paris Bibl. Nat. Anciens Fonds, 4, Peiresco. The present Samaritans have two collections, which they call Dwarás ("string of pearls") and Devér ("book"), the latter comprising the former, the arrangement of which they ascribe to Amram-eez-Zaman or Amram-Dari. The language in which they are written varies; some are in almost classical Hebrew, others in a dialect resembling that of the Targums, containing an admixture of Aramaic and Hebraism. The metre also differs considerably.

II. Doctrines.—From the various hymns and documents extant, it appears that the Samaritans had five principal articles of faith, viz.:

1. God is one, without partner or associate, without body and passions, the cause of all things, filling all things, etc.
Samaritan Liturgy 291 SAMARITAN LITURGY

2. Moses is the one messenger and prophet of God for all time, for his revelation, for word and familiar servant of God; none will arise like him.

3. The law is perfect and complete, destined for all time, to be supplemented or augmented by later revelations.

4. Gerizim is the abode of God on earth, the home of eternal life; over it is Paradise, whence comes all rain.

5. There will be a day of retribution, when the pious will ascend into heaven, and the disciples and their followers will then be cast into the fire and burned.

Other points in their creed may be noticed. From the prayer of Tobias v, 24, it seems that the Samaritans believed in original sin. "For the sake of Adam and because of all of flesh, forgive and pardon the whole congregation." From a prayer for the Day of Atonement we see that the doctrine concerning the angels was similar. In Lamentations, Lament. iv, 32, 41; also in their Hebrew, Vierteljahreschrift, iv, 126 sq. They believe in angels and astrology, which may be seen in a prayer given by Heidenheim, l.c. p. 545 sq.

The belief in a coming Messiah, or "Restorer," who should be the son of Joseph, was current among the Samaritans at a very early age, and this belief is based upon such Mesirian prophecies as Gen. xv, 17; xlix, 10; Numb. xxiv, 17; and Deut. xviii, 15. The Samaritans had at least a portion of these prophecies which they had studied, and they were to be understood when the people should be united. The phrase "the people shall unite themselves" (ibid. xlix, 10) is part of the prophecy that the Lord shall bring the people of Sheth and Israel together. (Gen. xxiv, 17). The Messiah shall be called "the true king" (Deut. xviii, 15). Our teachers have said that on this point the Messiah shall arise, and that all people shall submit to him and believe in him and in the law and Mount Gerizim; that the religion of Moses, son of Amram, will then appear in glory; that the beginning of the name of the prophet who will arise will be the letter "M"; that he will die and be interred near Joseph, "the fruitful bough"; that the Tabernacle will appear by his ministry and be established on Gerizim. Thus it is said in our books and in the book of Joshua, the son of Nun (Eichhorn, Reportorium, ix, 11 sq.). What has been said in this and other letters and works is merely an interpretation of the prophecy given in the ancient books of Abisheh Ben-Finches for the Day of Atonement, and contained in Cod. 19,651 Add. MSS. of the British Museum (comp. Heidenheim, v, 170 sq.). As to the time of his appearance the Samaritans were formerly uncertain. "No one knows his coming but Jehovah," says Ab Zebuta in 1583 (comp. Eichhorn, xil, 280). It is a great mystery with regard to Messiah who is to come and who will manifest his spirit; happy shall we be when he arrives," writes Salameh, in 1811 (see De Sacy, Not. et Extr. xii, 122). "The appearance of Messiah," writes Petermann, in 1860, "is to take place 6000 years after the creation, and these have just elapsed; consequently be not understood to think that the appearance is already going about on earth. In 1853 the Samaritans expected a great political revolution; but in 1863 the kings of the earth will, according to them, assemble the wisest of all nations in order by mutual counsel to discover the true faith. From the Israelis, l.c. Samaritans, will one other appear, and he will be the Messiah; on the first day lead them to Gerizim, where under the twelve stones they will find the ten commandments (or the whole Torah), and under the stone of Bethel the Temple utensils and manna. Then will all believe in the law, and acknowledge him as their King and Lord of all the earth. He will convert and equalize all men, live 110 years, and then die and ascend into paradise. All shall forsake for upon that pure and holy mountain, which is fifteen yards higher than Ebal, no burial can take place. Afterwards will the earth remain some hundreds of years more till the 7000 are completed, and then the last judgment will come in" (Herzog, R. Encycl. xil, 373 sq.).

III. USE. The present festivals of the Samaritans are the seven feasts of the year, although only one, the Passover, is observed with its former solemnities. A minute and interesting account of the ceremonies of this feast, as celebrated in 1853, is given by Petermann, in Herzog, R. Encycl. xiii, 378; also by Stanley, Hist. of the Jewish Ch. Ch. viii, 5, 513 sq. The liturgy for this feast is very rich; this evening service, during which the "dream of the priest Abísha" is read, to hear which only the elders are permitted. This dream is contained in Cod. 19,007 Add. MSS. Brit. Museum. There are Passover hymns composed by the high priests Marks, Fincus, and Abísha (q. v.), given by Heidenheim, l.c. 94 sq., 367 sq., 475 sq., and also a Haggadah for the Exod. of the Samaritans, a so-called Pesach-Haggadah, in which the Passover hymns are contained in Abhandlungen der D. M. G. v, no. 4 (Leips. 1876).

The second feast, celebrated on the 21st of Nisan, or last day of Unleavened Bread, is marked by a pilgrimage to Gerizim. The third feast is Pentecost; the fourth that of Trumpets; the fifth is the Day of Atonement. The first and eighth days of Tabernacles count for the remaining feast-days. The Sabbath, moreover, is kept with great strictness; the years of jubilee and release are also observed.

The Samaritans have two more days of assembly, though they do not count them as holidays, termed ssaumoth, on which the number of the congregation is taken, and in return every male over twenty years of age presents the priest with half a shekel (three piasters), in accordance with Exod. xxx, 12-14, receiving from him a calendar for the coming six months prepared from a table in his possession—originally, it is said, composed by Adam and committed to writing in the time of Phinehas. From these offerings, the tenth of the income of the congregation is collected to provide gifts, the priest gains his living. He may consecrate any of his family that he pleases to the priesthood, provided the candidate be twenty-five years of age and never have suffered his hair to be cut. Like other Oriental, he never removes his turban, and thus is not easily to be distinguished from the rest of the congregation; but, like the priest, he wears a sliitah around his head. They wear white turbans; ordinarily they are compelled, by way of distinction from Mohammedans, to wear them of a pale-red. They may not cut their beards, as they please, but not their beards, this being forbidden in Lev. xix, 27; xxxi, 5. Women must let their hair grow, and wear no earrings, because of them the golden calf was made. For fear of scandalizing the Mohammedans, none but the old one enter to attend the synagogue. When a boy is born, great rejoicing is held; his circumcision is not observed; he is not circumcised until the thirty-first day after birth, even though it be a Sabbath. Boys marry as early as fifteen or sixteen, girls at twelve. The Samaritans may marry Christian or Jewish girls, provided they become Samaritans. When a man has a childless wife he may take a second; but if she also be barren, not a third. Divorces were not uncommon. The dead are prepared for burial by their own friends; the whole body is washed, but especially the hands (thrice), mouth, nose, face, ears, both inside and out (all this in Mohammedan fashion), and lastly the feet. The burial takes place, if possible, before sunset the same day, accompanied with the recitation of the law and hymns. The following is a part of a litany for the dead:

*Digitized by Google*
SAMARITAN PENTATEUCH

SAMARITAN PENTATEUCH

I. History.—It had been well known to early Jewish and Christian writers that a recession of the Pentateuch, differing in important respects from that in use among the Jews, had been in possession of the Samaritan community. But these records require some separate light respectively. Thus the Jews treated it with contempt as a forgery. "You have falsified your law"— notwithstanding what R. Eizevier ben-Simeon (Jer. Sorot, viii, 3; Sotah, 38 b)—"and you have not profited aught by it," referring to the insertion of the words "opposite Shechem" in Deut. xi, 30. On another occasion they are ridiculed on account of their ignorance of one of the simplest rules of Hebrew grammar, displayed in their Pentateuch, viz. the use of the 3rd person (unknown, however, according to Jer. Meg. 6, 2, also to the people of Jerusalem). "Who has caused you to blunder?" said R. Simeon ben-Eizevier to them; referring to their abolition of the Mosaic ordinance of marrying the deceased brother's wife (Deut. xxv, 5 sq.)—through a misinterpretation of the passage in question, which enjoins that the wife of the dead man shall not be "without" to a stranger, but that the brother should marry her: they, however, taking לResponsable נשים (ל Responsable נשים) to be an epithet of נשים WHICH, translated "the outer wife," i.e. the betrothed only (Jer. Jebam, 1, 6; comp. Frankel, Vortr. d. p. 197 sq.).

Early Samaritan writers, on the other hand, speak of it with respect, in some cases even preferring its authority to that of the Mosaic text. "In the name of the rogà Σαμαρητικά Εσθονών, giving its various readings in the margin of his Hexapla (e.g. on Numb. xii, 1; comp. xxii, 15, and Montfaucon, Hexap. Pref. p. 18 sq.)." Eusebius of Cesarea, noticing the agreement in the chronology of the Sept. and Samaritan text as against the Hebrew, remarks that it was written in a character considerably more ancient than that of the latter (1 Chron. xvi, 1–11). Jerome (in Preface to Kings) also mentions this fact, and in his comment on Gal. iii, 10 he upholds the genuineness of its text over that of the Masoretic one, but in his Quest. in Gen. iv, 8 he speaks more favorably of the Hebrew; while Georgius Syncellus, the chronicler of the 8th century, is most outspoken in his praise of it, terming it "the earliest and best even by the testimony of the Jews themselves" (τό τῶν Σαμαρητῶν ἀρχαίωστον καὶ χαρακτηρικὸν ἑπτάστον καὶ πολλά τῶν καὶ πολλά τοῖσι ἐκ τῆς Σαμαρητικῆς ἐρευνασμάτων [Chron. xiii, 85 sq.]).

Down to within the last two hundred and fifty years, however, no copy of this divergent code of laws had reached Europe, and it began to be pronounced a fiction, and the plain words of the Church fathers—the better known authorities—who quoted it were subjected to subtle interpretations. Suddenly, in 1616, Pietro della Valle, one of the first discoverers also of the chuneiform inscriptions, acquired a complete code from the Samaritans in Damascus. In 1623 it was presented by Achille Harley de Sancy to the Library of the Oratory in Paris, and in 1628 there appeared a brief description of it by M. Morinius, the first editor, who prefaced his description of the text of the Sept. Three years later, shortly before it was published in the Paris Polyglot—whence it was copied, with a few emendations from other codices, by Walton—Morinus, the first editor, wrote his Exercitationes Ecclesiasticae in utrumque Samaritarum Pentateuchem, in which he presented the newly found code, with all its innumerable variants from the Masoretic text, to be infinitely superior to the latter; in fact, the unconditional and speedy emendation of the received text thereby was urged most authoritatively. And now the impulse was given to one of the most ancient and most barren literary and theological controversies, of which more anon. Between the latter and De Dieu's, however, the latter, partly complete, partly incomplete, were acquired by Ussher; five of which he deposited in English libraries, while one was sent to De Dieu, and has disappeared mysteri-
SAMARITAN PENTATEUCH

ously. Another codex, now in the Ambrosian Library at Milan, was brought to Italy in 1621. Peiresc procured two more, one of which was placed in the Royal Library of Paris, and one in the Barberini at Rome. Thus the number of MSS. in Europe gradually grew to sixteen. During the present century another, but far from the oldest, codex is owned by the British Library. A copy of the entire (?) Pentateuch, with Targum (? Samaritan version), in parallel columns (4to), on parchment, was brought from Nabûla by Mr. Grove in 1861, for the count of Paris, in whose library it is. Single portions of the Samaritan Pentateuch, in a more or less defective state, seem to have come into Europe in the last century. Of late the St. Petersburg Library has secured fragments of about three hundred Pentateuch MSS.

II. Description.—Respecting the external condition of these MSS., it may be observed that their sizes vary from 12mo to folio, and that no scroll, such as the Jews and the Samaritans use in their synagogues, is to be found among them. The letters, which are of a size corresponding to that of the book, exhibit none of those varieties of shape so frequent in the Masoretic text; such as majuscules, minuscules, suspended, inverted letters, etc. Their material is vellum or cotton-paper; the ink used is. In the oldest scroll of the Samaritans at Nabûla, the letters in which are in purple. There are neither vowels, accents, nor diacritical points. The individual words are separated from each other by a dot. Greater or smaller divisions of the text are marked by two dots placed one above the other; and by an asterisk. A small line above a consonant indicates a peculiarity of the word, an unusual form, a passive, and the like; it is, in fact, a contrivance to bespeak attention. For example, תבננה and תבננה, דז and דז, רזכ and רזכ, נב and נב, ל and ל, מ and מ, without a dagesh, etc., are thus pointed out to the reader (comp. Kirchheim, p. 94).

The whole Pentateuch is divided into nine hundred and sixty-four paragraphs, or Kazzi, the termination of which is indicated by these figures, =, =, or <. At the end of each book the number of its divisions is stated thus:

| 200 | 890 |
| 180 | 218 |
| 166 | 260 |

The Samaritan Pentateuch is halved in Lev. vii, 15 (viii, 8, in Hebrew text), where the words “Middle of the Torah” (היעלmaktadır לברכתי) are found. At the end of each MS. the year of the copying, the name of the scribe, and also that of the proprietor are usually stated. Yet their dates are not always trustworthy where this is not the case, and very difficult to be ascertained when entirely omitted, since the Samaritan letters afford no internal evidence of the period in which they were written. To none of the MSS., however, which have yet reached Europe can be assigned a higher date than the 10th Christian century. The scroll used in Nabûla bears—so the Samaritans pretend—the following inscription:

"I Abisahe, son of Phinehas, son of Eleazar, son of Aaron the priest—upon them be the grace of Jehovah—In his house have I written in all the words of the Tabernacle of Testimony on the Mount Gerizim, even Beth El, in the thirteenth year of the taking possession of the land of Canaan, and all its boundaries around it, by the children of Israel. I praise Jehovah." (Letter of Meshimah ben-Ab Sechua, Cod. 19,791, Add. MSS. Brit. Mus. in Heidenheim, i, 88. Comp. Eiph, Sam. Sichemkarum ad Jobam Ludolphum [Cizek, 1668]; Anuq. Esh. Orient. p. 126; Huntingtoni Eiph. p. 49; Eichhorn, Th. bibl.: V. 1, 245. But no European has fully succeeded in finding it in this scroll, however great the pains bestowed upon the search (comp. Eichhorn, Einleitung, ii, 599); and even if it had been found, it would not have deserved the slightest credence. It would appear, however (see archiepiscopo Tattami's letter in the Pacific, p. 507), that Mr. Levysohn, who was attached to the Russian staff in Jerusalem, has found the inscription in question "going through the middle of the body of the text of the Decalogue, and extending through three columns." Considering that the Samaritans themselves told Huntington "that this inscription had been erased in their scroll once, but must have been erased by some wicked hand" (comp. Eichhorn, ibid.), this startling piece of information must be received with extreme caution. Nevertheless, Lueit. Conder speaks as if he had actually seen the inscription on the venerable MS. (Tent Work in Palestine, i, 159)."

This venerable roll is written on parchment, in columns thirteen inches deep and seven and a half inches wide. The writing is in a good hand, but not nearly so large or beautiful as in many book-copies which they possess. Each column contains from seventy to seventy-two lines of the whole roll containing a hundred and ten columns. The skins of which the roll is made are of equal size, and each measures twenty-five inches in length by fifteen inches in width. In many places it is worn out and patched with rewritten parchment, and in many other places where not torn the writing is illegible. About two thirds of the original writing is still readable. Some of the scribe's names, as was told, is written in a kind of acrostic, and forms part of the text running through three columns of the book of Deuteronomy. In whatever light this statement may be regarded, the roll has the appearance of very great antiquity.

III. Critical Character.—We have briefly stated above that the Exercitaciones of J. Morin, which placed the Samaritan Pentateuch far above the received text in point of genuineness—partly on account of its agreeing in many places with the Sept., and partly on account of its superior " lucidity and harmony"—excited and kept up for nearly two hundred years one of the most extraordinary controversies on record. Though doubtfully enough, however, this was set at rest once for all by the very first systematic investigation of the point at issue. It would now appear as if the unquestioning rapture with which every new literary discovery was formerly hailed, the innate animosity against the Masoretic (Jewish) text, the general preference for the Sopherim's defective state of Hebraic studies—as if we said, all these put together were not sufficient to account for the phenomenon that men of any critical acumen could for one moment not only place the Samaritan Pentateuch on a par with the Masoretic text, but even raise it, unconditionally. Yet there was, in fact, work especially in the first period of the dispute; it was a controversial spirit which prompted J. Morin and his followers, Cappelius and others, to prove to the Reformers what kind of value was to be attached to their authority—the received form of the Bible, upon which, and which alone, they professed to take their stand. It was now evident that nothing short of the Divine Spirit, under the influence and inspiration of which the Scriptures were interpreted and expounded by the Roman Church, could be relied upon. On the other hand, most of the "Antimimrians"—De Meinis, Hettink, Stephen Morin, Baxtorff, Fuller, Leusden, Pfeiffer, etc.—insisted upon and criticized the subject and refuting their adversaries by arguments which were within their reach, as they are within ours,

the trough, Gen. xxviii, 30, has made room for בְּרֹאשׁוֹן, and she took down'; in Deut. xxxiii, 25; A.V. "thy strength,' is suggested; a word about the significance of which the commentators are at a greater loss even than about that of the original.

4. The fourth class consists of those readings where the Sam. is corrected or supplied from parallel passages. Thus בְּרֹאשׁוֹן (Gen. xviii, 29) becomes נָתַתָּה, according to ver. 28. Proper names, which are variously written in Hebrew, are all conformed to one orthography, as יְהֹוָה, Moses's father-in-law. In Gen. xi, 8, "and the tower," is added to the Hebrew text, taken from the fourth verse.

5. The fifth class consists of larger interpolations taken from parallels, in which whatever was said or done by Moses as recorded in a preceding passage is repeated; and whatever is said to have been commanded by God is repeated in as many words where it is recorded to have been carried into effect. In this way Exodus is much enlarged by interpolations from itself, or from Deuteronomy. Gesenius thinks that these insertions were made between the date of the Sept. and Origen, because the Alexandrian father mentions a passage of the kind (Puck, Horae Sanctorum.)

6. The sixth class consists of corrections made in order to remove what was offensive in sentiment to the Samaritans, or what conveyed an improbable meaning in their view. Thus in the antediluvian times none begets his first son after he is 150 years of age. Hence, from Jareed, Methuselah, and Lamech, 100 years are subtracted at the time they are said to have had their first sons, in the postdiluvian times none is allowed to beget a son till after he is fifty years old. Accordingly some years are subtracted from several patriarchs and added to others. To make this intelligible, we subjoin from our Horae Samaritanae the following table of the Hebrew and Samaritan chronology, and where the first column, marked A, gives the years before birth of son; the second, B, the rest of life; the third, C, the extent of whole life:

<table>

</tr>
</tbody>
</table>

Under this head falls the passage in Exod. xii, 40: Now the sojourning of the children of Israel who dwelt in Egypt was 430 years. The Sam. has 'The sojourning of the children of Israel and their fathers who dwelt in the land of Canaan and in the land of Egypt was 430 years.' The same reading is in the Sept. (cod. Alex. and Josephus; comp. also Gal. iii, 17). In Gen. ii, 4 'בְּרֹאשׁוֹן is altered into בְּרֹאשׁוֹת, the sixth.

7. The seventh class comprises what we might briefly call Samaritanisms, i.e. certain Hebrew forms translated into the idiomatic Samaritan; and here the Sam. codices vary considerably among themselves—so far as the very imperfect collation of them has hitherto shown—some having retained the Hebrew in many places where the others have adopted the new equivalents. Thus the guttural and שָׁבָע letters are frequently changed: בֹּא is altered into בֹּא (Gen. viii, 4); בֹּא is altered into בֹּא (xxiii, 18); בֹּא is altered

The ו is frequently doubled (?) as a mater lectionis.
SAMARITAN PENTATEUCH 296 SAMARITAN PENTATEUCH

(2nd pers. fem. sing. and pl.) are changed into and in the obsolete Heb. forms respectively; the suffix is in the termination of the 2d pers. fem. prec.

The medial letter of the verb is sometimes retained as or instead of being dropped as in the Hebrew. Again, verbs of the form have the frequently at the end of the infinitive, fut. and part., instead of the 

Nouns of the schema (etc.) are often spelled , into which the form is likewise occasionally transformed. Of distinctly Samaritan words may be mentioned: , (Chald.), "like," for the Heb. , "seal," "as though it budded," becomes , the Targ. , etc.

8. Passages which have been conform to the theology, hermeneutics, and worship of the Samaritans. Thus, to avoid the appearance of polytheism, the four passages where Elohim is construed with a plural are altered so as to single out the singular. Some, however, for example, for "cursed is their anger," the Sam. reads, "excellent is their anger," and instead of "the beloved of the Lord shall dwell," "the hand, the hand of the Lord makes him to dwell," which yields no sense. In like manner, , sometimes put when there is fancied immorality, as in Deut. xxxv, 11, is changed into .

Here Gesenius puts the notable passage Deut. xxvii, 4, where the Samaritans changed Ebal to Gerizim to favor their own temple. Some, as Whiston and Kennicott, have attempted to show that the Jews changed Gerizim into Ebal, but unsuccessfully (comp. on this point Lee's Prolegomena, p. 29).

From the immense number of these worse than worthless variations Gesenius has singled out four which he thinks preferable on the whole, to those of the Masoretic text, viz. Gen. iv, 8, where the Sam. adds, "Let us go into the field;" Gen. xxii, 13, , instead of ; Gen. xix, 14, , where ; Gen. xiv, 14, ; Gen. xiv, 14, , instead of ; i.e. he numbered, for .

Even these have been thought emendations and rejected by the majority of critics (comp. Frankel, Einfluss, p. 242).

Frankel has treated of the subject more by way of supplement to Gesenius than from an independent point of view. His additions to the classes of the latter are small and unimportant, besides being pervaded by erroneous conceptions of the age when the Samaritan Pentateuch originated. He adds — 1. The use of the imperative for the third person, as for (Exod. xxi, 48); and to ignorance of the use of the infinitive absolute, as for (Numb. vi, 23), etc. 2. The characteristics of the Galilean-Palestinian dialect, such as the interchange of the letters and of מ for י. But this peculiarity is simply owing to carelessness of transcription in the copyists, who wrote as they pronounced, and softened the hard gutturals which were difficult to their organs. 3. The Aramaic coloring and orthography, as and . This is likewise owing to transcription, and can hardly be called a characteristic of the Samaritan (Frankel, Einfluss, p. 288 sq.)

Another classification of the Samaritan characteristic readings is given by Kirchheim. He makes thirteen classes, as follows: 1. , additions and alterations in favor of Mount Gerizim, e. g. Deut. v, 21. 2. , additions to fill up. 3. , explications or glosses. 4. , change of verbs and conjunctions. 5. , change of nouns. 6. , assimilation, or bringing irregular forms into the same uniform type. 7. , permutation of letters. 8. , pronouns. 9. , gender. 10. , letters aded. 11. , add, addition of qualifying letters, as articles, conjunctives, and prepositions. 12. , chronological alterations (Karmen Shomron, p. 82 sq.). Comp. for No. 13, Pick, Hora Samaritana (Gen. v and xi, where the differences of the chronology in the Heb., Sept., Sam., and Josephus are exhibited).

A third division is that adopted by Kohn (De Pent. Sina, p. 9). He makes three divisions, viz. 1. Samaritan forms of words; 2. corrections and emendations; 3. glosses and corruptions for religious purposes; and perhaps, 4. blunders in orthography.

IV. Origin and Age. — In regard to these questions, opinions have been much divided. We shall enumerate the principal ones.

1. That the Samaritan Pentateuch came into the hands of the Samaritans as an inheritance from the ten tribes, whom they succeeded — so the popular notion runs. Of this opinion are J. Morimus, Walton, Cappellus, Kennicott, Michaelis, Elchhorn, Bauer, Jahn, Berthold, Steudel, Mazade, Stuart, Davidson, and others. Their reasons for it may be thus briefly summed up:

1. It seems improbable that the Samaritans should have accepted their code at the hands of the Jews after the Exile, as supposed by some critics, since there existed an intense hatred between the two nationalities.

2. The Samaritan canon has only the Pentateuch in common with the Hebrew canon: had that book been received at a period when the Hagiographa and the Prophets were in the Jews' hands, it would be surprising if they had not received those.

3. The Samaritan letters, awkwardly the more ancient, are found in the Samaritan code; therefore it is written before the alteration of the character into the square Hebrew, which dates from the end of the Exile — took place.

Since the above opinion — that the Pentateuch came into the hands of the Samaritans from the ten tribes — is the most popular one, we will now adduce some of the chief reasons brought against it; and we will set forth the somewhat feeble nature of the arguments on either side, that the last word has not yet been spoken in the matter.

(a.) There existed no religious animosity whatsoever between Judah and Israel when they separated: the ten tribes could not, therefore, have bequeathed such an animosity to the descendants of the tribe which preceded the Jews. It may add, probably cared as little, originally, for the disputes between Judah and Israel as colonists from off-far coun-
tries, belonging to utterly different races, are likely to care for the quarrels of the aborigines who formerly inhabited the country. On the contrary, the contests between aborigines with the Warambee tribes at their hands? That the Jews should yet have refused to receive them as equals is no more surprising than that the Samaritans from that time forward took their stand upon this very law—altered according to their circumstances—and proved from it that they and they alone were the Jews ear" (24).

(b) Their not possessing any other book of the Hebrew canon is not to be accounted for by the circumstance that there was no other book in existence at the time of the schism, because many psalms of David, writings of Solomon, etc., must have been circulating among the people. But the jealousy with which the Samaritans regarded Jerusalem, and the intense hatred which they naturally conceived against the post-Mosaic writers of national Hebrew history, would sufficiently account for their rejecting the other books, in all of which, save Joshua, Judges, and 1 and Job, in each of which, of the number of passages to the Alexandrine version had been noticed by all. Hassenpflug calculated some 900 places in which the Samaritan Pentateuch agreed with the Sept. Gesenius thinks that there are more than 1000 such places. The most important places are given by Pick in his Horae Samaritanae.

It must, on the other hand, be stated also that the Samaritan and Sept., quite as often disagree with each other, and follow each the Masoretic text; also, that the quotations in the N. T. from the Sept., where they coincide with the Samaritan against the Hebrew text, are so small in number, and of so unimportant a nature, that they cannot be added as any argument whatsoever. See Pentateuch.

The chief opinions with respect to the agreement and discord of the numerous readings of the Sept. (of which no critical edition exists as yet) and the Samaritan Pentateuch are:

(1) That the Sept. was translated from the Samaritan (De Dieu, Selden, Hottinger, Hassenpflug, Eichhorn, Kohl). (2) That the mutual interpolations have taken place (Grotius, Usher, Ravius, etc.). (3) That both versions were formed from Hebrew codices, which differed among themselves as well as from the one which afterwards obtained public authority in Palestine; that, however, very many willful corruptions and interpolations have crept in later times (Gesenius). (4) That the Samaritan has, in the main, been altered from the Sept. (Frankel). (5) As to the first of these opinions—that the Sept. was translated from the Samaritan—it has been alleged on the evidence of Origen and supported by Jerome that the Sept. was compiled in the first instance with the help of the word הִנָּחַא in the ancient Hebrew (i.e. Samaritan) character, not in those used at their time, Ezra, according to tradition, having introduced other letters after the captivity (Origen, Hexapla [ed. Montfaucon], i, 86; Jerome, Epistola 136 ad Marcellum). It is clear, however, from the statement made by Jerome on this point, that the remark of Origen can apply only to the Aramaic or square characters, not to those in use among the Samaritans. These are his words: "Nomen (viz. nomen Dei) est tetragrammatum, quod demagogum, i.e. ineffabile putaverunt, quod his scribatur: Yod, E, Vav, E. Quod quidam non intelligentes Pi Pi legere consueverunt;" and they explain how it came that some Greek copies could make πετα απειρω, out of the Hebrew הִנָּחַא. That the argument based upon Origen's words must fail to the ground is evident. Another reason alleged in support of the Sept., having been derived from the Sept., and that the Samaritan, having been given on the supposition that the variations from the Hebrew text arose from a confusion between letters resembling each other in the Samaritan and not in the square alphabet. But this argument is untenable; for while we admit that such errors may have arisen from a confusion between similar letters in the Samaritan, yet it is true that they have occurred as well in the square letters; thus, e.g., י and י, י and י, ו and ו, י and י, ו and ו, and כ and כ, and ת and ת, could have been mistaken. A third argument
Samaritan Pentateuch has been used: The Samaritans had already brought out for their own use a Greek translation, known under the name of the Samaritan Pentateuch; the Sept. finding this convenient for their purpose, took it for its basis, altering here and there after the Hebrew original to suit their own ideas (so Kohn, p. 38 sq.). But there is this objection to that: the Samaritan-Greek version was not translated before the 3d or 4th century A.D. Before this, it is very likely that the Samaritans, who on all other occasions showed themselves powerless to invent, only capable of feeble imitation, should in this one instance have disturbed their rivals in producing so great a literary work as a Greek translation of the Pentateuch. For this reason we must give up explaining the similarity of the two texts. (c.) The third opinion, that many interpolations have taken place, or that the Samaritan Pentateuch was corrected from the Septuagint, is true to a certain extent: many passages occur in the former which bear all the marks of being interpolations from the Alexandrine version, e. g. Gen. xxiii, 2, תִּירָזָא וְאֵין יְמָוֶת כְּעָצָא אֱלֹהִים אֶל יְשֹוֹעַ יְהוָּה מֵאֵל; Gen. xxiii, 23, אל נֶאֶס נֶאֶס נֶאֶס נֶאֶס. But however, on this supposition, are the equally numerous passages to be accounted for by which the Samaritan Pentateuch differs from the Sept., sometimes in these cases agreeing with the Hebrew, at others departing from it? (d.) The third view, advocated by Gesenius, that both the Samaritan and the Sept. were formed from Hebrew MSS., has the most probability.

(2.) The fourth opinion, which claims that the Samaritan-book in the Sept. has been altered from the Sept., will have few, if any, supporters, since, according to Frankel, this should have been accomplished through a Greek translation of a Targum and the Greek version of the Samaritan Pentateuch. See SEPTUAGINT.

VI. Copies.—1. The following is a list of the MSS. of the Samaritan Pentateuch now in European libraries (Kennezahl):

1. No. 1. Oxford (Uscher), Bodl., fol., No. 3197. Perfect, except the first 38 and last 9 vers.
2. No. 2. Oxford (Uscher), Bodl., fol., No. 3198, with an Arab. margin added. Imperfect. Wanting the whole of Leviticus and many portions of the other books of the Pentateuch.
9. No. 9. Paris (Peiresc), Imp. Libr., Sam. No. 2. Ancient MS. containing the whole, consisting in 78 chapters and all of Deuteronomy from the 7th chapter. Inconspicuous, having been lost, quotes from Gen. x. 11 of this codex—a rather puzzling circumstance.
15. No. 15. Milan (Ambrosian Libr.), of the very ancient not collated.
17. No. 17. Gotha (Duca Libr.). A fragment only.

No. 18. London (Count of Paris's library). With vellum.
No. 19. St. Petersburg (Imp. Libr.).

A description of No. 19 is expected from Mr. Harkavy, while the others are described by Kenenoho in his Dissertatio Generalis, reprinted by Blayney in his edition of the Samaritan Pentateuch.

All these are written on separate leaves; none are in the original style of writing. At Nablus, however, as is well known, there is still preserved in the synagogue, and only brought out with much solemnity on certain festivals, an ancient parchment roll, purporting, by its inscription, to have been written by the hand of the great-grandson of Aaron himself, thirteen years after the original settlement of the Israelites in Canaan. It is written in the Samaritan character, and consists of 11 fragments that served as thank-offerings (so says the priest). They are of unequal size, some containing five, some six, columns of writing. Other old MSS. are also mentioned as existing there and elsewhere in Palestine; one has the date of A.H. 85 (= A.D. 655) inscribed on it.

2. Printed editions are contained in the Paris and Walton Polyglots; and a separate reprint from the latter was made by Blayney (Oxford, 1790). A fac-simile of the 20th chapter of Exodus, from one of the Nablus MSS., has been edited, with portions of the corresponding Masoretic text, and a Russian translation and introduction, by Levysohn (Jerusalem, 1860); but the specimen has not been noted.

VII. Literature.—Besides the Introductions of Eichhorn, Berthold, Jahn, De Wette, Hiemerich, Keil, and Bleek, and the articles in the dictionaries of Kitto and Smith (which we have freely used here), the reader is referred to Gesenius, De Pent. Samarit. Origine, Indole, et Aceritate (Halle, 1783, 4to); Journ. de la Soc. de Jérusalem, July, 1858, p. 298 sq.; Morini (J.) Exercitationes in utrumque Samarit. Pentateuchum (Paris, 1631, 4to); Uscher, Syntagma de Sept. Interpretibus, Epistula ad L. Cappelium (London, 1555, 4to); Poncelet, Nouveau Edicairesments sur l'Origine et le Pentateuque des Samaritains (Paris, 1780, 8vo); Le Clerc, Sentiments de quelques Théologiens de Hollande sur l'Histoire Critique du R. Simon (Amsterdam, 1866, 8vo); Tychsen, Disputatio Historico-philologico-critica de Pentateuco Ebreeo-Samaritano, ob Ebreeo coae Masoreto Descriplo Exemplari (Butztii, 1765, 4to); Prideaux, Old and New Testament connected in the History of the Jews and Neighboring Nations (London, 1769, 8vo); Walther, Geschichte der älteren und jüngeren Schriften der Propheten und Propheten (3 vols., Leipsig, 1777, 8vo); xii, 9, 11; Cappelli Critica Sacra (ed. Vogel and Scharfenberg, Halle, 1775, 8vo), Hassencamp, Der entdeckte wahre Urprung der alten Bibelübersetzungen und der getreuten samar. Text (Minden, 1755); Kkennothian, Second Dissertation (Oxford, 1798); Rutherford, Letter to the Ren. Mr. Kkennothian, upon which his Defence of the Samaritan Pentateuch is examined, and his Second Dissertation on the State of the Printed Hebrew Text of the O. T. is shown to be, in many instances, Injudicious and Inaccurate (Cambridge, 1761, 8vo); Kkennothian, Answer to a Letter from the Rev. T. Rutherford, D. B. (1761, 8vo); Rutherford, Second Letter to the Reu. Mr. Kkennothian, for the Defence of the Second Dissertation is examined (1768, 8vo); Bauer, Critica Sacra (Lipsiae, 1795); Steudel, in Bengel's Archiv. iii, 626, etc.; R. Simon, Histoire Critique du V. T. (Paris, 1865, 4to); Pulula, in Paulus's Memorabilia, ii; Hesse, Auseiscen zu künstiger Aufklärung über das N. T. (Lubbecke, 1894, 8vo), pt. iv; Hufeld, Beleuchtung einiger dunklen und missverstandenen Stellen der allentestamentlichen Textgeschichte, in the Studien und Kritiken, 1830, pt. ii; Mazade, Sur l'Origine, l'Age, et l'État Critique du Pent. Samar. (Geneva, 1890, 8vo); Hug, in the Freiburg, Zeit- schrifft für die kath. Theologie, vii, 34, 1890; Scharfenberg, Pentateuch (Berlin, 1866, 8vo), vol. i; Stuart, in the North American Review for 1826, and American Biblical Repository for 1832; Frankel, Vorstudien (Leipsic, 1841), and Uber den Einfluss der palästinenischen Exegese auf
SAMARITAN SECTS

The most important information on the subject is given by Epiphanius (Heres., i. 28, followed by John Damascius [ibid. p. 79], and Nicetas [Theol. i. 35]). Epiphanius mentions four different sects—the Essenes, Sebuanans, Gortynians, and Doithetians. With regard to the last, nothing is known, nor is the information with regard to the Sebuanans (Σεβουάιοι) more satisfactory. They are said to have distinguished themselves by commemorating the year in the early autumn; soon after this they held the Feast of Unleavened Bread, Pentecost later, and that of Tabernacles in the spring, when the Jews were celebrating their Easter. Of the Gortynians, termed by Nicetas Soronothians, nothing whatever is known. With regard to the last of the four sects and their leader Doithetius, it is impossible to reconcile the discordant testimony of Jewish, Christian, Mohammedan, and Samaritan writers. Epiphanius relates of them that they were believers in the resurrection and austere in their manner of life, avoiding animal food, but crying out only once a year. In connexion to the observance of circumcision, the Baptist, avoiding contact with others, fasting and penance, they were not distinguished from the other Samaritans. Their founder was, he continues, a Jew who, for his learning, aspired to be chief among his party, but being disappointed in his ambitious schemes, went over to the Samaritans and founded a sect: later he retired to a cave, and there starved himself to death out of affected piety.

What Epiphanius relates here concerning Doithetius fully accords with the account of Abūl-Fath concerning Dāwūs; but the austere life of his adherents can only refer to that of Dostān, of whom we shall have to speak farther on. Further, that Epiphanius is the only Christian to mention the Doithetians in the two together, which has also been done by later writers. The statement of Abūl-Fath is that a sect appeared calling themselves Dostān, or "the Friends," who varied in many respects the hitherto received feasts and traditions of their fathers. Thus they held for impure a fountain into which a dead insect (אילע) had fallen; altered the time for reckoning the purification of women and communistic feasts; forbade the eating of eggs which had been laid, allowing those only to be eaten which were found inside a slain bird; considered dead snakes and cemeteries as unclean; and one any whose shadow fell upon a grave as impure for seven days. They rejected the words "Blessed be our God forever" (ברוך יתברך), and substituted Elohim for Jehovah; denied that Gerizim had been the first temple; and their feast of sacrifices for the feasts, giving thirty days to each month, rejecting the feasts and order of fasts, and the portions (due to the Levites). They counted the fifty days to Pentecost from the Sabbath the day after the first day of the Passover, like the Jews; not from the Sunday, like the other Samaritans. Their public servants, wishing impure, could not enter a house suspected of infection as long as he did not speak. When a pure and an impure house stood side by side, it was doubtful whether the impurity extended to the former as well, it was decided by watching whether a clean or unclean bird first settled upon it. On the Sabbath they might only eat and drink from earthen vessels, which, if defiled, could not be purified; they might give no food or water to their cattle: this was done on the day previous. Their high-priest was in a certain case expelled from his own community for immorality.

At a later period lived Dāwūs. Being condemned to death for adultery, he was resented on the promise of sowing dissension among the Samaritans by founding a new sect. He went to 'Askar, near Nablūs, and formed a group of friends, and was promised, if he continued his learning and piety, by the name of דוסית. Compelled, however, to fly for his life on account of a false accusation which he had brought against his friend, he took shelter at Shuēik by a widow woman named Amentu, in whose house he composed many writings; but, finding that a hot pursuit after him was still maintained, he retired to a cave, where he perished of hunger, and his body was eaten by dogs. Before his departure, however, he left his books with his hostess, enjoining her to let no one read them unless he first bathed in the tank hard by. Accordingly, when Levi, the high-priest's nephew—a pious, able man—arrived with seven others in search of him, they all bathed, one after the other, in the tank, and then he emerged, and declared, "I believe in thee, Jehovah, and in Dāwūs, thy servant, and his sons and daughters;" Levi adding, when his turn came, "Woe to us if we deny Dāwūs, the prophet of God." They then took the writings of Dāwūs, and found that he had made many alterations in the law—more, even, than Ezra. They concealed them, and on their return to Nablūs reported that Dāwūs had disappeared before they arrived, they knew not whither.

At the next Passover, Levi had to read out Exodus, xxii, 22 in the synagogue, but for "hyssop" (קש {(ח)ס) he substituted thyme (גרוס)...." Corrected by the congregation, he still perjured, crying, "This is right, as God hath said by his prophet Dāwūs, on whom be peace! Ye are all worthy of death for denying the prophetical office of his servant Dāwūs, altering the feasts, falsifying the great name of Jehovah, and persecuting the second prophet of God, whom he hath revealed from Sina! Woe unto you that you have rejected and do not follow him!" Levi was stoned. His friends dipped a palm-leaf in his blood, and ordained that whoever would read Dāwūs's writings should see the leaf last ten days and nights. They cut off their hair, shaved their beards, and at their funerals performed many strange ceremonies. On the Sabbath they would not move from their place, and kept their feasts only on this day, during which they would not remove their hands from their sleeves. When one of their friends died, they would gird him with a girdle, put a stick in his hand and shoes on his feet, saying, "If we rise, he will at once get up, believing that the dead man, as soon as he was laid in the grave, would rise and go to Paradise. As to the age in which Dāwūs lived, it must have been long before the time of Nathan ben Rehob on John xiii, 27 (ed. Lommatzsch, li, 49), tells us that a "certain Doithetius arose and claimed to be the Messiah; his followers are called Doithethians, who have his books and tell wonderful stories of him, as if he had not died and is still alive somewhere." This agrees with the statement of Abūl-Fath concerning Dāwūs. According to Origen, Doithetius was certainly not contemporary with Dāwūs, probably in the 1st, or at least in the 2d century of the Christian era. That he was the teacher or pupil of Simon Magus, as some have asserted, is an untenable conjecture. See Petermann in Herzog, xiii, 387 sq.; Nutzl, Samaritan History, p. 46 sq.; Basnage, Histoire des Juifs (Tav., ii. 343 n.); Jusdén, u. s. Secten, i, 62 sq.; de Sach, Christum, Arbe, i, 334 sq. (B. P.)

SAMARITAN VERSIONS. There exist three dif-
frequent translations of the Pentateuch in Samaritan, two of which have been translated into Greek and Arabic respectively.

1. Samaritan. — The origin, author, and age of the Samaritan version of the five books of Moses has hitherto — so Eichhorn quaintly observes — "always been a golden apple to the investigators, and will very probably remain so, until people leave off venturing decisive judgment upon historical subjects which no one has recorded in antiquity" (Eintellung, ii, 320). Indeed, modern investigators, keen as they have been, have done little towards the elucidation of the subject. According to the Samaritans themselves (De Sacz [Mem. 3], Paulus, Winer), their high-priest Nathaniel, who died about B.C. 20, is its author. Schlemiel puts its date a few years after Christ. Jayyus thinks that it had long been in use in the second post-Christian century. Frankel places it in the post-Mohammedan time, on account of the many Arabicisms. Other investigators date it from the time of Easar-haddon's priest (Schwarz), or either shortly before or after the foundation of the temple on Mount Gerizim. Kohn thinks that it was made by different authors. It seems certain, however, that it was composed before the destruction of the second Temple; and being intended, like the Targums, for the use of the people exclusively, it was written in the popular Samaritan idiom, a mixture of Hebrew, Aramaic, Syriac, and Arabic.

As a whole, the version cannot be called a good one, since the translator seems to have been guided by no proper rules of exegesis. Hence he falls into many mistakes. "Elohim" or "Jehovah" is commonly avoided, and "angel" put instead, to suit the supposed dignity of the divine being. The names of peoples, countries, cities, mountains, and rivers are changed from the old into the new ones, as the following list of geographical names will prove. Thus we read in

Gen. viii, 4, for Ararat, Sarendib, יִבְרָא לֶאִיר (Zohab).
10, "Shinar, Tsosofah, גֶּשֶׁר, צָוָּח (Zubah).
11, "Assur, Astun, גֶּשֶׁר, צָוָּח (Sittacene).
12, "Cainah, Lakehah, לֹא-כָּתְב (Tsittacene).
19, "Resen, Asofah, סֶתֶּר (Tswatam).
20, "Mesha, Mesbaa, מֵשֶׁה (Shebbas).
21, "Bavel, Libak, לֹא-בָּבֵל (Tsittacene).

Onkelos in Polyglot.
(Numb. vi, 1, 2.)
Samar. Version in Barberini Triglot.
Gen. xiii, 3, "Al, Cefrah, גְּפַרְרֶה (Cepirah, Jos. ix, 17).
14, "Asheroth Karnaim, Ainuth Karniah, יְשֵׁרַת קַרְנַיִם (Tsittacene).
15, "Ham, Liebath, לִיבָּת (Tsittacene).
16, "El Paraan, Pelishah, etc., פֶּלִישָׁה (Tsittacene).
17, "Hobab, Fograh, פּוּגֵר (Tsittacene).
18, "Shaveh, Mifneh, מַפְּנֵה (Tsittacene).
19, "Euphrates, Shalman, יְבֵרְעֶת (Tsittacene).
20, "Rephaim, Chasah, רְפַיִם (Tsittacene).
21, "Gerar, Askelon, גָּרַר (Tsittacene).
22, "Miteraim, Nefik, נֶפֶק (Exod.).
23, "Seir, Gablah, גָּבָלָה (Jebel).
24, "Rehoboth, Pathi, פַּתִּי (Tsittacene).

Taken from a face-simile by Blanchini (Evangeliarum Quadruplerum, II, ii, after DCIV). On account of this similarity, many critics, such as Hottinger, Eichhorn, and Kirchheim, have held it to have been copied from Onkelos. This, however, seems to be rather an overstatement of the case. It is true that הֵרָאָש עַבְרֵי and words of uncertain meaning are often rendered by identical or similar expressions in both. Moreover, when Onkelos borrows from Jewish tradition, the Samaritan Targum often follows him. Yet the two are independent. The latter falls into serious blunders from which the version of Onkelos should have protected it, it often retains difficulties of the Hebrew text where the other gives a translation. For instance, the word הֶנְקָה, "penitence" (Exod. ix, 15), the Samaritan renders by והנקה, "word," as if it had read הנקה, "a word." If it had followed Onkelos it could not have fallen into such a blunder, where the true reading is בֵּית עֵשֶׁב, i.e. "with death."
SAMARITAN VERSIONS MODERN

In Deut. i, 44, we read רַעְבֶּה, “bees,” where the Samaritan renders רַעְבֶּה, “words,” as if it read רַעְבֶּה, which could not have been the case had it followed Onkelos, who renders it correctly by רַעְבֶּהּ, “bees.”

That the Samaritan Targum has not followed the version of Onkelos may be also seen from the number of difficult Hebrew words, which, although intelligible to the Samaritan translator, he would not have retained had he followed Onkelos, who explained the same. Of such difficult words Winer mentions: Gen. ii, 12, דָּבָחַי, etc.; xlviii, 22, עָבָד; xlix, 10, וִיתֶּלֶת; li, 29, הֶבַח יִד; Exod. i, 16, רַעְבֶּהּ; viii, 21, יַעֲמָה; xlii, 18, רַעְבֶּהּ; xxiii, 28, רַעְבֶּהּ; xxvii, 4, הַרְבָּא; xxvii, 19, רַעְבֶּהּ; xxviii, 9, רַעְבֶּהּ; xxxiv, 35, רַעְבֶּהּ, etc. (comp. p. 39 sq.). Under these circumstances, we cannot but conclude that the Samaritan translator has not known the version of Onkelos, or that he has not perused it; and we can only suppose that single passages have been interpolated from Onkelos; for, as Eichhorn has justly remarked, “the Samaritan Paraphrase went through different hands, and was afterwards edited by one or more Samaritans” (Introduction, vol. i, 305).

The purpose of exegesis in the version is entirely useless. It is simply interesting as faithfully representing the religious ideas and literary progress of the Samaritans; it is valuable also for philological purposes, as being the most trustworthy monument of an important Shemite dialect. The oldest MSS. hitherto known to exist are both at Rome—the Barberini Targit and the Vatican. The former was bought by Peiresc at Damascus, in 1631, and bequeathed by him to cardinal Barberini, in whose library it still remains. It is imperfect; the oldest parts were written in A.D. 1226, and the end of Deuteronomy was supplied by a later hand in 1482.

The Vatican MSS. was bought by Pietro della Valle at Damascus, in 1616. It is much later than the one just described; it is on paper, dated A.D. 1514, with considerable lacune of words, and even verses (comp. Assemani, Bibl. Vat. Catal. i, 464). This is the only text that has ever been published; it appeared in the Paris Polyglot of 1645, and was thence copied, without, however, a single correction of the MSS., through the whole extent of the Hebrew Bible, from 1657, from which A. Brüll reprinted it in Hebrew characters, and published it under the title תְּנַהְגִּים הַרְבָּיִים (Frankfort-on-the-Main, 1875).

Petermann, of Berlin, intended to publish an edition from MSS. collated by him at Nablus, but the first part only was published: Pentateuchus Samaritanus, ad fidem Librorum Manuscriptorum apud Nabulitanos Recentiorum, editis et varias Lectiones additis H. Petersmann. Fragmenta i, Genesis (Berolini, 1872). Fragments of a Samaritan Targum (Lev. xxv, 26, to the end of that book, and parts of Numbers), from a Bodleian MS., were edited and published by Nutt (Lond. 1874). The Imperial Library of St. Petersburg contains also fragments of the Pentateuch, in the Arabo-Aramaic translation; as well as of the Samaritan Targum.

2. “The Samaritan” in Greek (τὸ Σαμαριταῖον). In the fathers of the 3d and 4th centuries, as well as in MSS. containing the Sept., with fragments of Aquila, Symmachus, and Theodotion, we find scholia, or pieces of a Greek translation of the Pentateuch so designated. These scholia have been collected by Kretzschmer, and Montfaucon, and are in Walton’s Prolegomena. Castell, Vossius, and Herbst think that they are merely translated extracts from the Samaritan Version; while Gemnius, Winer, and Juyonnell suppose them to be remains of a continuous Greek version of the Samaritan Pentateuch. On the other hand, Hengstenberg and Hävernick see in it only a corrected edition of certain passages of the Sept. The most probable of these opinions seems to be that which looks upon the notes or scholia as the Samaritan corrections of certain places in the Sept.

3. In 1070 an Arabic version of the Samaritan Pentateuch was made by Abu Sa‘id in Egypt, on the basis of the Arabic translation of Saadias Hag-gason (q.v.). Like the older versions of the Samaritans, it adopts the usages and anthropopathisms, replacing the latter by euphemisms, besides occasionally making some slight alterations, more especially in proper nouns. It appears to have been drawn up from the Samaritan text, not from the Samaritan Version, the Hebrew words being occasionally altered and translated. Often, also, it renders the original differently from the Samaritan Version. Principally noticeable is its excessive dread of assigning to God anything like human attributes, physical or mental. For, רַעְבֶּהּ, “God,” we find (as in Saadias sometimes) مَالِكُ آلَ اَللَّه, “the Angel of God;” for “the eyes of God” we have (Deut. ix, 12) “the beholding of God.” For “bread of God,” “the necessary,” etc. Great reverence is shown for Moses and the tribe of Levi but even for the tribe of Judah (Gen. iii). It is written in the vernacular language of the Arabs, and abounds in Samaritanisms. An edition of this version was commenced by Kuenen at Leyden. Genesis was published in 1861; Exodus and Leviticus in 1864. In Syria it would appear that the Samaritans still used Saadias’s even after Abu Sa‘id’s had been made, for pur- Ma‘or, reason he wrote scholia upon the latter in order to recommend it to the people. This must not be considered a new version, but a Syriac recension of the Arabic-Samaritan.

The two recensions—the Syriac of Abu Baracat and the Egyptian of Abu Sa‘id—were mixed together in the MSS., and cannot now be properly separated. For further particulars we must refer to Juyonnell and Eichhorn: the former in his Orientalia, ii, 115 sq.; the latter in the second volume of his Einleitung to the Old Testament. Van Volken described a MS. of Abu Sa‘id’s in the University of Leyden in 1803; and Juyonnell notices the MSS. at Paris, especially Nos. 2 and 4, in the Orientalia, ii, 115 sq.

Samaritans, Modern. As already stated (under SAMARITAN), a small remnant of the old nation still dwell in their ancient capital, Shechem. There existed a tradition among them, which has yet hardly died out, that large numbers of their brethren were dwelling in various parts of the world—in England, France, India, and elsewhere—and they have instituted inquiries from time to time in the hope of becoming acquainted with these their brethren. In past ages we do find them
not only inhabiting various cities in Palestine, but even in Egypt and Constantinople (El-Masudi, Hist. Enycl., i. 114; Rabbi Benjamin, Itinerary). They are now, however, confined to Nablus, the ancient Shechem, and their sacred city through all ages. Here they live together, Gheto-like, on the south-western side of the town, at the very foot of Gerizim, their sacred mount. They have dwindled down to a very small number, consisting of some forty families, and before many generations more have passed away, the ancient Samaritan nation will have become extinct. In 1872 they numbered 135 souls, 80 of whom were males; by the defection of Jacob Shlalay and his family, they have been reduced to a total of 180 souls. Perhaps no people have lived and carried on their race from age to age more than they have, yet it has served to knit them the more closely together. In appearance they are superior to their circumstances, as also to all others around them—a straight and high forehead, full brow, large and rather almond-shaped eyes, aquiline nose, somewhat large mouth, and well-formed chin are their chief physiological characteristics; and, with few exceptions, they are tall and of lofty bearing. If the present small community is a fair specimen of what their nation was in ancient times, they must have been a fine race.

A deep interest is attached to this people, not only because they are the oldest and smallest sect in the world; for although the opinions concerning their ceremonies, and habits of their forefathers, and are, like their Jewish brethren, a living evidence of the truth of Bible history, especially that of the Pentateuch. Our object will be, therefore, to give a summary account of all the principal features of their life and manners, as exhibited by these remaining votaries; and for this purpose we chiefly follow Mill's abridgment (in Fairbairn's Dictionary) of his larger account (Three Months in Nablus, Lond., 1864).

1. Domestic Life and Duties.—1. Circumcision.—The first and most important is to admit the male child into the Abrahamic covenant by circumcision. This ceremony must be performed on the eighth day, even should that be the Sabbath, as it was undoubtedly the practice of the Jews of old (John vii, 22); and not in the synagogue, but always in the house of the parents. The performance of the rite devolves upon the priest; but should he happen to be absent, any one acquainted with the ceremony may do it. The celebration of the ceremony the name of the child is announced, as of old (Luke i, 69), and, when over, they celebrate it (as the Jews do) by a feast, enlivened by Arab music and singing. If the child be female, the only observance is that of naming, which takes place on the third day after its birth. In the house, without particular ceremony or gathering of friends, the priest simply announcing it in the hearing of those who may happen to be present. Formerly, they used to redeem the first-born child, as the Jews still do, according to the commandment (Exod. xiii, 13), but now the ceremony is discontinued on account of the poverty of their people.

The Samaritans, like the Egyptians, have a strong desire for offspring, a feeling which is probably intensified by the paucity of their number. This, together with an early development in such a climate, leads them, like all their neighbors, to marry at a very early age, the males being eligible at fourteen and the females at ten years of age. But they never intermarry with persons of another creed, whether circumcised or uncircumcised; and never marry but on a Thursday, this in their estimation being a peculiarly propitious day. They have no betrothals, and the marriage rite is very simple. Upon the appointed day, two men who were witnesses of the agreement took the bride and her friends at midday to the bridegroom's house, where the ceremony is performed by the priest. The service is in Hebrew—unknown tongue to those most concerned—and consists of portions of the law interpreted with certain prayers; and the marriage agreement is read by which the young bridegroom has to pay a fixed dowry to the father of the bride. At evening a feast is made, followed by music, singing, and dancing, performed, however, not by themselves, but by hired Mussulmans. Here we may observe that they are not given to polygamy. There is nothing in their theology prohibiting it, but this virtue has grown upon them from necessity, on account of the unequal distribution of the sexes. Their present rule, and one which has existed for some ages past, is that any one may take an additional wife if the first wife be willing, but on that condition only.

3. Divorce.—The Samaritans are not given to divorce, and in this matter they stand in singular contrast to their Moslem and Christian neighbors. Their modern theology at least forbids it, except only for the cause of fornication, but their strict conformity to this dogma under all circumstances is very doubtful.

4. Purifications.—There are seven things that particularly defile a person, four of which relate to both sexes, the remaining three pertaining to the male: (1) the conjugal act; (2) nocturnal pollution; (3) touching any dead body; (4) touching unclean birds, quadrupeds, or reptiles; (5) a female from hemorrhage; (6) a female's menstrual discharge, when she remains unclean for seven days; (7) child-birth, when the mother is accounted unclean for forty-one days if the child be male, but if female for forty-five days. After this time the persons they purify themselves most scrupulously. Formerly, when sacrifices were used to be offered, the ashes of a burned heifer were kept to be mixed with running water and sprinkled on the unclean person by one that was clean according to the law (Numb. xix, 17-19). Now running water only is used. The washing of hands as a rite of purification at rising and before eating, etc., as the Jews do, is never observed by the Samaritans; they simply do it for the purpose of cleansing, and not as a religious ceremony (comp. Mark vii, 3, 4).

5. Morning and Evening Prayer.—The first duty on rising is to repeat the morning prayer, which is long and tedious. It is generally offered by each individual in private, although there is no law against its being performed in the presence of the family. Any one is at liberty to repeat this or any other prayer as often as he pleases during the day, but the morning and evening orisons must on no account be neglected, and must be said at the designated times. The celebration of the prayer, like all their other prayers, is a set one in the Hebrew tongue, and consequently not understood except by some one or two besides the priest. Still, the sacredness of the language, combined with the antiquity of the formula, imparts to it a kind of hallowedness, which has always held upon the conscience of the people. During the prayer they always turn towards Mount Gerizim.

6. Food.—When they sit to eat, a blessing is pronounced before the food is served. This duty devolves upon the head of the family. They make the broadest distinction in articles of diet; adhering faithfully to the law of Moses in everything relating to the greatest importance to its observance. They never eat the flesh of any beast that does not chew the cud and divide the hoof (Lev. xi, 3-8; Deut. xiv, 6-8), and swine are held in the greatest detestation. All kinds of poultry, except those notified as unclean (Lev. xi, 19-25), are considered lawful, as well as all flesh not cooked, "boiled milk" (Lev. xi, 9-12). Like the Jews, they never partake of flesh and butter (or milk) at the same meal, nor do they even place them on the table at the same time. Six hours must elapse after partaking of meat before milk or but- ter can be taken. The Jews found this custom on the passage, "Thou shalt not take a kidney of the flesh nor milk" (Exod. xxiii, 19), but the Samaritans refute it the importance of a law of Moses, and only observe it as a sanitary rule laid down by their sages. They hold it unlawful to eat anything prepared by either Jews or Gentiles, therefore they make their own bread, cheese,
butter, etc. Cattle and poultry too must be slaughtered by their own shochet, or killer, who has to pass through a course of study and training before he is qualified to kill according to the numerous rules prescribed by their sages.

7. Duties towards the Dead.—The Samaritans, like the Jews, teach the dying person to say as his last words, "The Lord our God is one Lord." This last utterance must be in the Hebrew, therefore all their people, women and children, are most carefully taught this phrase. The relations of the dead never rend their clothes, as they consider it to be contrary to the will of God. Nor have they any fixed time to mourn, or formula to repeat over the departed. With them it is simply a matter of feeling; some mourn for a long and some for a shorter time. But to indulge in grief is discouraged, forasmuch as the high-priest was forbidden to mourn for the dead (Lev. xxvi, 10); so they consider the refrainment from it to be a proof of a more thorough obedience to the will of God and a higher religious state of mind. As anciently, the house wherein the dead body lies is rendered unclean (Numb. xix, 14), and the priest carefully avoids crossing its threshold (Lev. xxvi, 11).

As soon as the dying person has expired, they perform the ceremony of ḫaḥar (taharah), purification, by washing the body carefully with clean running water. This is done by individuals appointed to that duty among themselves, after which it is wrapped in a cotton shroud (John xi, 44), and then placed in a wooden coffin. It is curious to observe that no other natives of any creed use coffins; the Samaritans, however, scrupulously follow the example set them by their father Joseph (Gen. i, 26). When a death is expected, the law is read in the chamber of the sick, not by the priest, but by one appointed for that purpose. As soon as all hopes of recovery are given up, the reading begins, is continued to the patient's death, and again resumed after the taharah, and continued to Numb. xxx. 1. After arranging the funeral procession, the reading is once more proceeded with until the whole law be read.

II. Religion.—The Samaritan idea of religion is a national one. To them their faith and people are synonymous. In this sense they are, according to their own belief, the only peculiar people of God, with whom the Almighty has entered into covenants, and which covenants they faithfully keep. These are seven in number, and are as follows: a, the covenant of Noah (Gen. x., 14); b, the covenant of Abraham concerning circumcision (Gen. xvii, 9-14); c, the covenant of the Sabbath (Exod. xxxi, 12-17); d, the covenant of the two tables of the ten commandments (Exod. xx, 2-17); e, the covenant of salt (Numb. xvi, 10); f, the covenant of the Passover (Exod. xii, 2); g, the covenant of the priesthood (Numb. xxv, 12, 13). By virtue of these they are separated, on the one hand, from all the Gentiles, and, on the other hand, from the Jews, who, they assert, are cursed since the time of Eliezer.

1. Constitution.—Their people, according to the above idea, constitute a national religious community, under which two officers preside. The chief is the priest (ḥazan). Upon him devolves the performance of all the duties prescribed in the law of Moses as pertaining to the priestly office. These are now but nominal, as they have no sacrifice because they have no temple; but certain prayers are offered instead of sacrifices. These, together with the priestly blessings, are given on all occasions by the priest himself, who is in reality but a Levite, for the last of the descendants of Aaron, according to their own chronicle, died in A.D. 1631. The second officer is the minister, ḫazan, who is a member of a younger branch of the same family. It is his duty to read the public service generally, both in the synagogue and out of it. Upon him also falls the work of educating the children and instructing them in the law. These two officers sitting in assembly constitute their ḫaḥaran, or house of judgment. The priest sits supreme and the minister second, and before this tribunal all Samaritan matters, whether social or religious, are settled. Should a question of any difficulty arise, the priest calls other members of the priestly family to assist in deciding the case; otherwise all kinds of questions are determined by the two officers alone.

2. Creed.—The Samaritans have no formula of belief or set articles of faith, excepting four great tenets: (1) to believe in Jehovah as the only God; (2) to believe in Moses as the only lawgiver; (3) to believe in the Torah (Pentateuch), as the only divine book; (4) to believe in Mount Gerizim as the only house of God. These are the cardinal points of the Samaritan faith; but so far as a more detailed theological creed is concerned, the thirteen articles drawn up by Maimonides would as well express the Samaritan as the Jewish faith. These consist of a belief, in God as Creator and Governor; in one God only; in his not
being corporeal; in God being first and last of all things; in God as the only object of prayer; in the truth of prophecy; in the truthfulness and superiority of Moses; in the law as the enactment of Moses; in the unchangeableness of the law; in the omniscience of God; in rewards and punishments; in the coming of the Messiah; and in a general resurrection (British Jews, p. 68).

Here it is important to observe that their only authority in theology is the Pentateuch—nothing is divine and binding but the Torah; all their dogmas are believed, whether rightly or wrongly, to be founded upon that sacred volume; and they are, in fact, strictly and wholly the disciples of Moses. It becomes, therefore, a subject of no little interest to the Biblical student to observe how many of the principal doctrines of revealed truth are held by the Samaritans to be the teaching of the law. For instance, they found the doctrine of a future state upon Exod. iii. 6—"I am the God of thy father, the God of Abraham, the God of Isaac, and the God of Jacob:" being the very passage quoted by the Saviour, and drawing from it the same conclusion that "he is not the God of the dead, but the God of the living." Mark xvi. 26, 27; and that of a resurrection they hold to be clearly revealed in Gen. ix, 5—

"And surely your blood of your lives will I require; at the hand of every beast will I require it, at the hand of man; at the hand of every man's brother will I require the life of man."

But we cannot help thinking that the whole doctrine of resurrection is developed in several points of modern Samaritanism, as well as of modern Judaism; and that some doctrines may be regarded as affiliated to the Torah rather than inductively from there. Their doctrine concerning the Messiah, although infinitely below the conception of the New Test., is yet far superior to that of the Jews. They never call him Messiah— that name not being in the law—but Taheebah, 되뉨, or the Arabic equivalent, Al-Mudy, the Restorer. They believe him to be a man, a son of Joseph, of the tribe of Ephraim, according to the words of Moses (Deut. xxxiii, 16). The promise of his coming was made by Moses—"The Lord thy God will raise up unto thee a prophet from the midst of thee, of thy brethren, like unto me; unto him ye shall hearken" (Deut. xviii, 15). He is to be not a king and conqueror, but a humble teacher and, His mission is not to shed blood, but to heal the nations; not to make war, but to bring peace. He will restore the law to its purity, preach it to the world, and bring all the nations over to its practice. In fact, he will be a great reformer, expressly sent by the Almighty, and endowed with the necessary qualifications to perform the task and glorious a work. Following his direction, they believe that the congregation will repair to Gerizim, where, under the "twelve stones," they will find the Ten Commandments, and under the stone of Bethel the golden vessels of the temple and the manna. After one hundred and ten years the Prophet is to die and be buried beside Joseph in the valley. Soon afterwards, on the conclusion of seven thousand years from its foundation, the world is to come to an end.

3. Synagogue.—They themselves never call it synagogue. Sometimes they use the Arabic term biil Al-lah, house of God, but the common appellation is kimshah, כִּמְשָׁה, place of assembly; equivalent to the Greek eisagogé and the Hebrew קַמְשָׁה. At present they have but one, a small and unpretentious building, but large enough for their community. Its extreme length measures thirty-seven feet five inches, with a breadth of eighteen feet. A part of the floor—namely, that of the right-hand division in the accompanying plan—is raised a foot higher than the remaining portion. On the left-hand side of the house are four feet square. The ceiling is vaulted, and from it hang very primitive chandeliers and a small oil-lamp. In the roof is a circular, dome-like window to admit light and air, the only opening besides the door. The small, square recess is the musbah, or altar, which is considered to be the most sacred spot in the building. It is here the Torah, or Law of Moses, is kept, in the form of a roll, and in this respect the musbah answers to the Jewish cher. But it has a further sacredness attached to it. During the existence of the temple on Gerizim sacrifices were slain on the altar, but since its demolition they are considered unlawful; therefore the musbah takes the place of the altar, and pray that of sacrifice. Its place in the synagogue, therefore, fronts the spot wherein the temple formerly stood, so that when the worshippers, during service, look towards the sacred recess their faces may be turned to Mount Gerizim. A large, square veil hangs continually in front of the musbah, in order to screen it from the gaze of the people, as no one is permitted to enter it but the two officials. The congregation consists of males only; but in this particular the Samaritans do not stand alone, as it is common to the natives of all creeds, with the exception of the few Christian Protestants in the country. Should the females wish to be present, they are at liberty to gather outside the building in the court and listen to the service, but no more. On this point Jews and Samaritans agree, but not with regard to the number necessary to constitute a congregation. With the first there must be a minyan—i.e., ten males of full age—present before the congregation is legal and the service can be read; but with the Samaritans there is no rule, but, like the Christian practice, it may be formed of any number met together to worship. They never assemble in the synagogue during week-days except on the feasts and fasts. On the Sabbath they have three services. The first is a short one at sunset on Friday, at which time their Sabbath commences. The second is early on the following morning, and is much the longest and most important, for during this service the law is shown. The minister takes it out of the musbah, removes its covering, opens the silver-gilt case in which it is kept, and exhibits to the congregation that column of the text which contains Aaron's blessing (Numb. vi, 24–27), when they step forward to kiss the sacred scroll. The last service is on Saturday afternoon a little before sunset, and consists of prayers interspersed with portions of the law, and arranged in one liturgy. The language being all Hebrew, the people understand the service but very imperfectly, the officials with one or two others excepted. It is performed in a kind of chant or cantillation most peculiar in its character. It differs not much from the native Arab music as from that of Europeans, and seems to have an origin both ancient and peculiar. They have seventy different melodies, composed, according to their tradition, by the seventy elders of Israel in the time of
Moses, which they have preserved and still use on various occasions.

4. Sacred Seasons.—An important part of the Samaritan religion consists of the observance of certain sacred seasons. These are as follows:

(1) The Sabbath.—Like the Jews, they reckon their days from sunset to sunset, according to the expression in Genesis—"And the evening and the morning were the third day." The Sabbath, therefore, as already said, commences at sunset on Friday and ends at sunset on Saturday. This day they keep most strictly as a day of rest, upon which no manner of work is to be done, according to the words of the law in Exod. xx, 9-10. To this command they adhere most faithfully, accepting it in their literal sense. Unlike the Jews, they employ no golam, or Gentiles, to light their fires or stuf their candles, but all within the gates keep the Sabbath alike. Consequently they never have any fire on that day, but scrupulously keep the command, "Ye shall kindle no fire throughout your habitations upon the Sabbath day" (Exod. xxxv, 9). Not a lamp or candle ever burns in their houses or in the synagogue on that day. When darkness comes on during the reading of the opening service on Friday evening, they never introduce lights, but finish the service in the dark, and remain so in their houses until they retire to rest. Their first and greatest idea of keeping the Sabbath holy is to remain quiet—never to go out of their dwellings except to the synagogue; and the second is, to live more generously than on ordinary days, but the cooking is all prepared on Friday. Although they carefully abstain from all kind of work, even the most trifling actions, they keep no such guard on their language nor check on their thoughts, but feel at liberty to talk about anything and everything; and of a higher and purer mode of sanctifying the day they have no idea.

(2) The New Moon.—Next in frequency, but not in importance, to the observance of the Sabbath is that of the new moon, the rosh hodesh, equivalent to the Jewish rosh chodesh. The new moon is sacredly watched for, and the afternoon immediately following its appearance, about half past four, the Samaritans assemble in the synagogue to perform the appointed service. It consists of prescribed prayers composed for the occasion, intermixed with portions of the law, especially those referring to the beginning of months (Num. x, 10; xxviii, 11-14). During the recital of the service, the whole of which lasts about two hours, the minister exhibits one of the roll-copies of the Pentateuch to the congregation.

(3) The Feasts and Festivals.—The Samaritans are not given to festivities. In this they greatly differ from their Jewish brethren, as well as from some Christian communities. In the Jewish calendar there are above thirty such seasons of greater or less importance; but in the Samaritan only eight, six of which are commanded in the law, the other two being less important.

These are the following:

(a) Karaban Apshah, or Jewish נס הילל, Pass- over. This is the memorial of their great national deliverance from Egypt (Exod. xii). The time of its celebration is the fifteenth day of their month Nisan, in the evening of the day; but should that happen to be a Sabbath, the feast is held on the previous day. Its place of celebration is Mount Gerizim, which they found upon Exod. iii, 18. Therefore, early on the morning of the fourteenth day the whole community, with few exceptions, close their dwellings in the city, and clad in linen cloth, in top of the ruins of the ancient temple, they pitch their tents in a circle. The lambs, five or six in number, and without blemish, are brought on the tenth day, and during the intervening days are carefully kept, and cleanly washed as a sort of purification to fit them for the paschal service (comp. John v, 2). On the sacred spot, near the tents, a fire is kindled, over which two caldrons full of water are placed. Another fire is kindled close by in a kind of circular pit sunk into the ground, where the lambs are to be roasted. At sunset the lambs are slaughtered by five or six young men dressed in blue robes of unbleached calico, having their loins girded, who dip their fingers in the streaming blood and with it mark the foreheads and noses of the children. The boiling water is carefully poured over the dead lambs, and, when fleeced, the right fore-legs, which belong to the priest, are removed and placed on wood already laid for the purpose, together with the entrails; salt is added, and they are then burned. The lambs are now spat and lowered into the oven. The spit is a long pole thrust through from head to tail, near the end of which is placed a transverse peg to prevent the carcass from slipping off. At midnight the lambs are taken up, when the paschal feast commences. A large copper dish filled with unleavened cakes and bitter herbs rolled up together is brought in and distributed among the congregation, all the adults wearing a kind of girdle around their waist, with staves in their hands, according to the command (Exod. xii, 11). The lambs are then laid upon carpets and strewn over with bitter herbs, all the congregation, i.e. the men, standing in two rows, one on each side of the lambs. During all this time, a long and tedious service peculiar to the day is recited by the two officials in turn, and when the reading has arrived at a certain point, all the expectant auditors stoop at once, and, as if in haste and hunger, tear away the flesh piecemeal with their fingers, and carry portions to the females and little ones in the tents. In a few minutes the whole disappears except some fragments, which are carefully gathered up, not a particle being left, which, with the bones, are all burned in a fire kindled for that purpose (Exod. xii, 10). On the following day rejoicings continue; fish, rice, and eggs are eaten, wine and spirits are drunk, and hymns, generally impromptu, are sung. Here we may observe that those who are unable to keep the Passover on this day may do so on the same day of the following month; but this second celebration is not kept on the hill, but in their own quarter in the city.

(b) Moed Apshah, answering to the Jewish נס הילל, Feast of Unleavened Cakes. Although this feast is intimately connected with the former, still, strictly speaking, they are two distinct solemnities, the Feast of the Passover commemorating the protection given them when the first-born of the Egyptians were slain, and that of the Unleavened Bread commemorating the beginning of their march out of Egypt. The distinction of the two feasts is more marked in the Samaritan than in the Jewish mode of their celebration. On the preceding day of the feast, every family removes all leaven-
ed bread out of its dwelling, and a most careful search is made, so that at least a fragment remains. Thus by the evening of the fourteenth day, all leavened bread and fermented drink are laid aside, and unleavened bread alone must be used during the seven following days, according to the law (Exod. xii, 18-20). This bread they call matzah, equivalent to the Hebrew māt-tōth; and the cake is made in the same form as the Jewish māt-tōth, except that it is a little larger, but of the same thickness. The Samaritans, like some of the strict Jews, hang up some of the cakes in their houses till the next Passover, believing them to have the power of charms in warding off evils and drawing many blessings upon the family. The first and seventh days of the feast are holy, according to Exod. xii, 16, but the seventh is considered the most sacred of the two. At early morn they form themselves into a procession and clamber up Gerizim, "in honor of God." There, on the sacred spot, the priest repeats the service for the day, which consists of lengthy portions of the law interspersed with prayers and songs.

(c) Chamatam, the "fiftieth," equivalent to the Ḥarav-ko-thath, Penteceot, of the New Test. It is thus called because it falls upon the fiftieth day after the morrow of the Sabbath of the Unleavened Bread. The Samaritans differ from the Jews in reckoning these days. The latter begin to count them from the second day of the week, the week being considered a day of grace, and the fiftieth, or the week following the week of grace, being considered the second week of grace. These latter days, however, do not actually happen; but the Samaritans commence on the morrow of the Sabbath which falls within the days of that feast, and cite as their authority Lev. xxiii, 15, 16. It is kept as a day to "rejoice before the Lord their God," on account of the bounties of his providence and the liberty to enjoy them in their own promised land (Deut. xvi, 9-12). This day likewise they go up Gerizim in procession, and on the same place as before the service for the day is gone through, which contains all the references made in the law to the harvest, as well as prayers and songs.

(d) Aaseh, similar to the Jewish Rosh-ha-shanah, and always falls on the 1st of Tisri, that month being the commencement of the civil year with the Samaritans as with the Jews. They keep this day as a holy convocation, in which no servile work is done (Lev. xxiii, 24). They attend synagoge, and the service lasts about six hours; but they neither have "blowing of horns," as in the Jewish synagoge, nor is the day regarded with the importance attached to it by the Jews.

(e) Kibbōrim, equivalent to the Jewish Yom Kippur, Day of Atonement of the Jews, which is held on the tenth day of Tishri, according to the command (Lev. xxiii, 27-32). In a strict point of view, this is the most important day in the Samaritan calendar. On the ninth day of the month, just two hours before sunset, all the community, both male and female, purify themselves by the free application of clean running water, after which they partake of the last meal before the great fast. The meal must be finished at least half an hour before sunset, when a rigid fast is observed until half an hour after sunset on the following day, making altogether a fast of twenty-five hours. During this time neither man, nor woman, nor child—not even the sick or sucking—is permitted to taste a morsel of bread or of any drink. The water, however trifling it may be, is permitted, and the whole fast is kept with such rigor that even medicine to the sick would on no account be administered. The day is therefore looked forward to with no little anxiety. They assemble at the synagogue a little before sunset, when the service commences and is kept up in solemn darkness through the night. It consists of the reading of the law, together with special prayers and supplications, portions of which are sung to their ancient melodies. The following morning they form a procession and visit the tombs of some of their prophecets, where they repeat a portion of the service, and on their return at it it is recited in the synagoge. As it draws to a conclusion the principal ceremony takes place—namely, the exhibition of the ancient roll of the law, believed by them to be written by Abiahu, the great-grandson of Aaron. Before the roll is covered and replaced, all step forward with eagerness to kiss it, as the opportunity only occurs annually. The service is under taken by the priest and minister alternately, with the occasional help of one of the congregation. A little after sunset the anxious and tedious duties of the solemn day are over.

(f) Sekuth, the Jewish Ḥarav-ko-thath, Tabernacles. They begin this festival on the fifteenth day of the same month, and keep it for seven days, conforming literally to the injunctions in Lev. xxiii, 34-46, 40-43. On the eleventh day they begin the erection of the booths, which must be finished by the morning of the fourteenth. These are raised in the courts of their houses, in the open air. On each day of this feast service is held in the synagoge both morning and evening, and they make in procession a daily ascent of Gerizim, "in honor of God." No servile work is done, nor is any business transacted during these days, of which the eighth and last is held the most sacred.

Besides the sacred seasons already mentioned, they have two other great festivals. The first is Ḥeβēst-ḥasseh, Ḥoš-ha-nah of the Jews, the beginning of the year. It is held, not on the first day of Tishri, the beginning of the civil year, but on the first day of Nisan, the commencement of their ecclesiastical year. The day is not kept sacred, for they all follow their usual vocations; they simply attend a short service in the synagoge both morning and evening. The next is Purim, not, like that of the Jews, held in the month Adar to commemorate the national deliverance through Queen Esther, but held in the preceding month, Shebat, in commemoration of the mission of Moses to drive out the Israelites out of Egypt.

4. Sacred Places. The religious rites of Palestine, whether performed in honor of the true God or that of idols, were celebrated from the earliest ages on the top of the highest mountains. The Hebrew lawgiver felt it necessary to enjoin on the Israelites the duty of destroying all these sacred high places on their coming into possession of the land. This external fact, deeply rooted was this form of worship in the religious feelings of Israel, as of the surrounding nations, that it proved a snare to them for many ages. It was these early sympathies that made Mount Gerizim so sacred to the children of Ephraim ever since the conquest, and in this fact have the Samaritans preserved it through all ages even to this day. Their great holy place is Gerizim. This mountain they hold to be the earth's centre, the house of God, the highest mountain on earth, the only one not covered by the flood, the site of altars raised by Adam, Seth, and Noah, the Mount Moriah of Abraham's sacrifice, the Bethel or Luz of Jacob's vision, and the place where Joshua and Jabez first an altar, next the tabernacle, and finally a temple. On its slope the cave of Makkeleah is also shown, though now closed up. Just as the Jew in all parts of the world turns his face in prayer towards the Temple mount at Jerusalem, so does the Samaritan to Gerizim, his temple mount. "This is the house of Jehovah," "the mountain of the world,""the mountain of God," "the Sanctuary," "the mountain of the Divine Presence," and other such like titles—all dwelling from their extravagant notions of its sacredness. They rarely write its name without the addition "the house of God." It was this that the woman of Samaria to answer the Saviour with such an air of pride—"Our fathers worshipped in this mountain" (John iv, 20). See Gerizim.

But Samaritanism has other holy places. These are the tombs of their early prophets and holy men—viz. 
mental activity existed among the people in former ages. Of their literary productions but little remains, in part owing to their destruction at the hands of the Greeks or to the ravages they suffered during the first centuries of the Christian era, and again under the Mohammedan rule. The works now known as extant may be classified under four heads, and we arrange the lists according to the Samaritan dates, including some already enumerated under SAMARITAN PENTATEUCH.

1. Theological. — It is to this class most belong, and the first on the list is the Torah, or Law of Moses. See SAMARITAN PENTATEUCH.

Rishalat Abchor Israel, a work explaining the feasts, their object, and manner of keeping them, by Eleasar, a priest of the family of Eleasar, who is said to have lived in the Sin of the conquest of Palestine by the tribes. (Compiled in Hebrew, of which there is an Arabic translation.)

Ab yishma, an exposition of Genesis from the beginning to ch. xxviii: the author not known, but dates from the 2nd century A.D. (Sometimes written in Hebrew, but, like the former, has an Arabic translation.)

El-Rofi. This is a work discussing the doctrines contained in the Torah, written by Joseph ibn-Asaki, A.D. 770. (Hebrew and Arabic.)

Masalat Chelaf, a work discussing the differences between the practices of the Samaritans, by Yosef ibn-Din, who lived in the 12th century. (Hebrew and Arabic.)

El-Muslafel af u-Sukhok, an explanation of the laws of marriage, by Yosef ibn-Din, who lived in the 15th century. (Hebrew and Arabic.)

Ketzt el-Marat, a work on the laws and regulations of wills and testament. (Written by Benjamin ibn-Asaki, in Hebrew, with an Arabic translation.)

Sharif al-Rikab, an historical exposition of the law, showing how the ancients observed it: written by El-Habur Jacob in the 12th century. (In Hebrew only.)

Sharif al-Khat, an exposition of the book of Exodus, by Yosef ibn-Din in the 13th century. (In Hebrew and Arabic.)

Rishalat el-Arakah, a book on the days of the month upon which the feasts were to be held, written by Ibrahim ibn-Alah, an author of the 15th century. (Hebrew and Arabic.)

Sharif al-Ikhwan, an exposition of the book of Leviticus and Numbers, by Yosef ibn-Maturj, who lived in the last century. (Hebrew and Arabic.)

Sharif al-Bakdash, a work concerning the Eterphal, together with certain social and ceremonial marriage and the Sabbath, by Ismail ibn-Ramaysh, in Arabic and Hebrew, but without date.

2. Liturgic. — This class comprises all the books relating to the public and private services, such as the feasts and fasts, circumcision, marriage, and burial. They consist of passages from the Torah, interspersed with prayers and poetic compositions, the reading of which is principally performed with a kind of cantillation; hence *mishmar Pirtat* generally and generally entitled *mishmar Pirtat*.

This specimen of an Ancient Samaritan Pentateuch. (From a Photograph.)

This is part of the so-called "Fire-tried Manuscript" belonging to a poor widow in Jerusalem, given to her by Abraham, son of the Rabbah of Jeshurun. She translated it from its own language, "Ezra, and his essay on the manuscript is kept with it. The whole consists of 517 leaves, comprising the Pentateuch, the Prophets, the Psalms, and the book of Esther. The leaves are small and are arranched at the beginning, the first being almost illegible. The real manuscript only begins at Gen. ii, 11; three leaves are added at the end for preserving the fields. These leaves are numbered by inches by inches in thickness. The text is divided into paragraphs with verse numbers, and words are not allowed to be broken by the line, but, in order to fill up the line, the last letters are further spaced. Where the word has a final stroke, the same stroke is repeated one or two times. The words are written in black, except those of Abrahams roll (the oldest at Nabul), nor large as those of the latter roll. The characters are generally large, but larger than those of the marginal letters (in that respect it resembles Abrahams roll), and so, also, the paragraphs are neither numbered nor stated in either text. These points seem to show the Fire-tried Manuscript to be ancient (Conder, Text Work in Palestine, i, 83).
All these liturgies exist only in Hebrew, as it would be unlawful to translate them into the vulgar tongue. They are all of ancient date, but the authors and compilers are unknown.

3. Historical.—In this class there are but few works, of which the following are the more remarkable:

Tarit. This is the Samaritan book of Joel, and, as it is generally called, is pretty well known to European scholars. At the time of Schlesinger, who, in A.D. 1864, received a copy from the Samaritans of Cairo, an edition of which was brought out by Juynbooy (Leyden, 1864), with a Latin translation and valuable annotations. It contains a brief history of themselves from the close of the Pentateuch down to modern times, and comprising a number of valuable information mixed up with much that is fictitious and exaggerated.

Both the Samaritan and Jewish works are extant, partly compiled from the above, by Abul-Fatah, an author of the 14th century, but not held in esteem by the Samaritans themselves.

Etched es-Sirah, a compendium of history from Adam to Moses. No author is named; but it is stated to have been written at the command of Moses. (Hebrew only.)

Itham Attarwarth. This is a chronologically table according to the Samaritan dates, extending from the creation of man to the present time. It is well known that the Persian and the Pentateuch dates are derived from both the Jewish Hebrew text and the Sept. version, thus causing a difference in the date of all subsequent historical events. Independently of this, there is a further difference between this table and all other accepted dates down to a period of 500 A. M., while the accepted date is 4004, thus making a difference of 243 years.

The same chronology gives the age of the world at the commencement of the Christian era as 4614 A. M., while the accepted date is 4004, thus making a difference of 434 years. But from this period the table generally agrees with our ordinary chronology.

4. Scientific.—Under this head may be comprised the following:

El-Choba. An astronomical work treating of the rules regulating the 10th of the year, i.e., the conjunctions of the sun and moon. It was written, we are told, under the direction of Adam. (Hebrew.)

Risatit. This is a sort of exposition of the former work, written by several authors, but whose names and times are unknown. (Hebrew and Arabic.)

To the foregoing list may be added the following works extant and known in Europe, but not now in the possession of the Samaritans themselves—viz. Ghanze, and Zadaka on parts of the law; Abul-Hassan and Zadaka el-Israeli on religion and ceremonies; and Abu Said and Abu Ishak Ibrahim on language and grammar.

Sam'at (Sepharic; Vulg. Semedius), given in the Apocrypha (1 Esdr. ix, 94) as the name of the fourth of the six sons of Osor (i.e., Abiah or Mochnebdai) among those Israelites who had married foreign wives after the captivity; but the Heb. list (Ezra x, 41, 49) contains the names Shlemiah, Shemariah, and Shallum in the corresponding place.

Samavarti, in Hindu mythology, is an appellation of Dhima, the god of the under-world, who judges the dead and separates the good from the wicked.

Samba, in Hindu mythology, was a son of Vishnu in the avatar of Krishna, born of Dasharmy, the beautiful daughter of the king of the bears. Samba, guided by his mother's advice, avert the injunction of a threatening curse to which he had imprudently exposed himself, built a city, to which he gave his own name, and introduced in it the worship of the sun, to which he gathered the priests by conveying them on the saddle-horse Garutha, which was sacred to Vishnu.

Sambation, a river mentioned in the Talmud as flowing during the first six days of every week and drying up on the Sabbath. The rabbins are not agreed as to the situation of the river, some placing it on the borders of Ethiopia and some in India. See Sabbatical River.
SAMMAEL 309 SAMOKRESTSCHENSTII

each (almost without exception) of the "kings" of Edom suggests that the Edomithian kingdom consisted of a confederacy of tribes, and that the chief city of the reigning tribe was the metropolis of the whole.
